The Western Road is now divided into three Districts. The first, extending from Sydney to Penrith, a distance of about 32 miles, was, until the passing of the Main Roads Management Act, under the superintendence of Road Trusts, by whom some judicious repairs were carried out.

It is now in charge of an overseer directly responsible to the Engineer for Roads; and the system of contract and task work is being very successfully carried out on it.

2nd District.

The Second District is between Penrith and Bathurst, a distance of 90 miles, and is under the charge of a Road Superintendent; it has three divisions, the first being from Penrith to Little Hartley, the second from Little Hartley to the foot of the Dividing Range, and the third from the Range to Bathurst. For the first and third divisions overseers have been appointed, but not for the second, the Superintendent residing about the centre of it*.

This district comprises the road over the Blue Mountains and the Dividing Range, upon which an immense amount of time and labor, and much scientific skill must have been expended, but which from neglect is now so completely ruined as to constitute it the worst portion of the Main Roads.

It is a sad thing in a new country to see the destruction of so much good work caused by the want of maintenance, and it is so much the worse, because with the means at command little can now be done to remedy the mischief; it must be plain to all that a sum of £50 per mile per annum, even if doubled by special votes, is quite inadequate properly to maintain, much less to reconstruct, a road in the condition this is now in; the expense of making and maintaining which is increased by the fact that running, as it does, along the narrow ridge of a sandstone range for nearly half its length, it is so far, destitute of good metal or ballast, and deficient even in good timber, while its only inhabitants, with scarcely an exception, are occupied in the keeping of the inns along the road side.

Contracts have, however, been taken for the repair of some of the worst places, and arrangements are now in progress for the expenditure, by task or contract work, of the balance remaining in hand after these contracts were taken.

The

* When necessary the Superintendents are allowed a ganger for their own division.

The following bridges are in course of construction, viz. :—Over Cox's River, Junction Creek, Vale Creek, Evans' Plains' Creek, and Jordan's Creek; the three last are of minor importance, and are being carried out under the inspection of the Road Superintendent of the 3rd District.

The laminated arches of the Denison Bridge at Bathurst having given way, owing to the shrinking of the bows and timber generally, the superstructure vibrated when the traffic passed over it to such an extent as to threaten its rapid ruin, unless at once seen to. The necessary repairs, which required a great amount of care and skill, have been very successfully carried out, at a cost of about £770.

Several deviations of the road within this district have been proposed; there are, however, only two that appear to me advisable at present: The first is to use the route at present taken by the public in preference to the old line, viz., by following the Mudgee Road where it leaves the main road until it reaches Lee's Inn at Bowenfels, and thence through Lee's ground to the junction of the Fish River Road, thus avoiding a descent of 200 feet into Bowen's Hollow.

The second is to avoid the long, narrow, and difficult ascent and descent of Mount Lambie, by forming a road, for which the ground is favorable, along its base, leaving the present road at a short distance eastward of the bridge at Solitary Creek, and joining it again at about half a mile east of Bedford's Inn.

In the place of this diversion a line through Piper's Flats has been suggested, but under all the circumstances I prefer that already recommended.

A question of the first importance in reference to the main road through this district (and indeed to the main roads generally), is the *rate* at which expenditure should be incurred upon it, or, in other words, whether a really good road is to be formed and maintained, or whether such repairs only are to be executed as shall be sufficient to prevent the traffic being stopped.

The decision of this question would appear to a great extent to hinge upon the policy of the country in reference to Railways. If the intention be to push them rapidly forward, it would probably be thought unnecessary to incur any heavy expenditure upon the formation of roads; but if they are to be constructed at the rate of a few miles only in each direction yearly, it is well worthy of consideration whether a good road should not as early as possible be made and maintained.

Thus, if it be intended within the next four or five years to carry the Railway, say for example, to Hartley, to re-form the Mountain Road would not be desirable; but it might be well worth while to make a thoroughly good road between Bathurst and Hartley, even if the funds were raised by loan; but if within the same period it was intended to carry the Railway to Bathurst, such a course would be no longer desirable.

The matter does not yet appear ripe for decision, since the Railway policy can scarcely be decided on until more is known of the general direction and cost of future lines; yet I think it even now of sufficient importance to draw attention to it.

3rd District.

Beyond Bathurst the road is generally undefined and unproclaimed; and several deviations have been suggested from the tracks now in use.

Of these, one in the neighbourhood of Guyong has been repeatedly examined; differences of opinion as to the best line having existed among the officers employed to report upon it, I directed the newly-appointed Superintendent of this district (as he will have to carry out whatever works are required upon it) also to examine it. His report has now been received, and I shall shortly be in a position to submit the matter for your decision.

In the neighbourhood of Molong, also, different interests lead to different opinions as to the direction the main road should follow; and there are those who maintain that it should not pass through Molong at all, but run from Orange *via* Stoney Creek to Wellington.

Under these circumstances, the importance of an early survey and proclamation of the main road through the district will be manifest.

Some

Some works of minor importance have been executed and are in progress; further specifications and estimates are now under consideration for such works, as there can be no doubt of their future utility.

It is scarcely necessary to observe that when a new officer takes charge of a new district, some time is necessarily spent in his making himself acquainted with it and its wants and requirements before anything can be done.

MUDGEE ROAD.

Extensive repairs, involving a considerable expenditure, have been made upon this road, and arrangements are in progress to call for further contracts. A careful instrumental examination of the various tracks over Cherry-tree Hill is however required, before the improvements proposed there can be carried out. The road is under the charge of a second-class Superintendent.

The bridge over the Cudgegong, at Mudgee, has been completed and opened for public traffic.

THE MAIN SOUTHERN ROAD.

The Main Southern Road is, from its greater length, divided into four districts.

First District.

The First District extends from the junction of the Western and Southern Roads to Camden, about 37 miles, and, like the Western, is under the charge of an overseer, directly responsible to the Engineer of Roads, and the system of task and contract work has been easily and successfully introduced.

The Cabramatta Bridge having on inspection been found in a condition dangerous to the public safety, has been re-constructed.

Second District.

The Second District is sub-divided into five divisions, the first extending from Camden to Lupton's Inn; the second from Lupton's Inn to Berrima Bridge; the third thence to Wingello Inn; the fourth from Wingello to Goulburn, and the fifth thence to Gunning. Upon the first, third, fourth, and fifth there are overseers, the whole being under the charge of the Superintendent, who resides at Berrima.

A large amount of work is in progress in this district by contract or task-work, the latter, to avoid delay, having in many instances been resorted to for services for which tenders could not be procured, or for which the tenders sent in were ineligible; specifications are also being prepared for such further services as it is proposed to execute within this district during the current year.

As the system becomes better understood it may be anticipated that competition will become greater, and tenders, therefore, be more easily procured for works even in the remoter districts.

Beyond Goulburn the same necessity for surveying and proclaiming the road exists as with the other main roads, and between Picton and Goulburn the same question arises as to the rate of expenditure that should be adopted, and the character of the road that should be formed and maintained.

Contracts have been taken for the formation of the main street at Gunning, for which special provision was made in this year's Estimates, and the works are in progress.

The Berrima Bridge and the Mulwarrie Ponds Bridge have been completed and opened, and the necessary drawings and specifications will be put in hand for those over the Wollondilly, and at Bungonia, as soon as any officer can be spared to prepare them.

3rd District.

It is proposed that the Third District should extend from Gunning to Jugiong or Gundagai, according to the works in progress between Gunning and Albury, and that it should be under the charge of a Superintendent, with one overseer.

Tenders have been received for the construction of four bridges over the following Creeks: Bogalong (2), Black Springs, and Coolac.

These bridges are to be supported on piles, with a wooden superstructure; they are to be constructed on one general plan, modified according to the section of each creek, and are of a simple and inexpensive design.

The

The laminated arch bridge at Yass was found on inspection to require immediate and extensive repair, the arches having given way from the same causes as those of the Denison Bridge; this work is in progress.

Specifications are also being prepared for the repair of the main road where it passes through the town of Yass.

The principal obstructions to traffic between Gunning and Gundagai, in addition to the creeks already named, are at Bowning Gap, Cooney's Hill, and the Money Money Ranges and Flat, towards the improvement of which funds have been set apart.

It must be observed, however, that at Cooney's Hill there is a proposed diversion, which must be instrumentally examined to decide upon the exact line of road before any work can be commenced there, and for this arrangements have been made; and further, that I received numerous statements, during my inspection of the Southern Road, that the proper line of road between Yass and Albury was by "The Levels," avoiding Jugiong and Gundagai altogether, and the broken country between them; and counter statements to the effect that "The Levels" line was altogether impracticable, being destitute of water in summer, and full of rotten ground in winter. Such questions, so far as the relative merits of the roads are concerned, can only fairly be decided by an extremely careful examination of the country.

But in the first place, the Schedule of the Main Roads Act defines the main road as passing through Gundagai, and in the second there appeared to me to be such an amount of private interests at stake as would warrant at any rate an expenditure sufficient to provide bridges over the worst creeks, and to assist in removing the leading obstructions to traffic: and these are the considerations that have influenced me in submitting the works to be executed upon the road between Yass and Albury.

When at Gundagai my attention was turned, in accordance with my instructions, to the formation of a road round Kimo Hill, and to the question of a bridge over the Murrumbidgee.

It is certainly practicable to make a road round Kimo Hill, and I am assured that its formation would tend greatly to enhance the value of the Crown Lands in its vicinity, but the amount voted for this service (£1000) is altogether inadequate, and it would be useless to expend it, unless more can be assured.

The inhabitants of Gundagai appear to be inconvenienced at least as much by the creeks along the flat, and its submerged state when the river is in flood, as by the want of a bridge. The Surveyor General was good enough to grant me the assistance of the resident Surveyor, by whom such plans and sections have been furnished as will enable the merits of the relative sites proposed on the spot, and the cost of the required works to be decided upon, and the necessary drawings will be made, and specifications and estimates prepared, to enable me to submit this matter for the decision of the Government as soon as an officer can be spared for the purpose.

4th District.

The Fourth District of the Southern Road will extend from Jugiong or Gundagai, as already stated, to Albury.

Within this district tenders have been received for the construction of bridges, on the same plan as those in the 3rd district, over 8 creeks.

The leading obstructions to traffic within this district, after the creeks, appeared to be Mundarlo and Tareutta Hills, some marshy spots, the entrance into Albury itself, and the approaches to the ferry there. The Government having decided, after considering my report upon the bridge to be constructed over the River Murray at Albury, that the structure should be of wood, and erected at the Wodonga-street site, the approaches can now be proceeded with, and the necessary plans and specifications for this service are in hand.

Revised plans for the bridge are also in hand, and I anticipate being able to call for tenders for its construction next month.

Funds have been reserved towards providing for the other services named, but I have not yet been able to find a gentleman of whom sufficient was known to enable me to recommend him with confidence to the Government for an appointment as Road Superintendent over a district so distant from the head office. The matter has, however, my constant attention.

GENERAL REMARKS.

The general matters in connection with the main roads which appear to call for special attention are :—

- 1st.—The necessity for the speedy survey and proclamation of those portions of the Main Roads requiring it.
- 2nd.—The consideration of the rate of expenditure upon the main roads, and of the class of Road to be formed and maintained.
- 3rd.—The consideration of the question whether, whenever any portion of the main road forms one of the streets of a town, the expenditure of the funds appropriated for its repair should not be entrusted to the municipal, or some local authorities, and the Commissioner be relieved of the charge of such portion of the main roads.

In conclusion, I may observe that the work consequent upon the passing of the Main Roads Management Act has grown so much faster than the head office establishment provided for its performance as to have rendered it throughout short-handed, and to have compelled me to request continually the attendance of the officers employed in it during extra hours, which has been cheerfully rendered. The same has been the case with certain of the officers in the Railway Branch of the Department.

ELECTRIC TELEGRAPH.

The progress of the Electric Telegraph, both as regards the construction of new and the working of existing lines in this Colony, has been satisfactory.

The first contract made was in May 1857, for the construction of the line from Liverpool to Albury, at £49 14s. 6d. per mile: at the same time the department undertook to connect Sydney (at Redfern) and Liverpool, a distance of 22 miles.

The latter work was completed in October, 1857, at a cost of £1,837 6s. 7d., but the progress made in the former not being satisfactory, the Government in the same month terminated the contract; the contractor, however, was subsequently allowed to complete the line between Liverpool and Picton (33 miles) at £48 14s. 6d. per mile, and this was finished in March, 1858.

In October, 1857, the department also undertook the construction of a line about 7 miles in length, connecting the Signal Station at South Head and the Sydney Exchange Office. This was completed in January, 1858, but was subsequently extended, about 2 miles to Fort Phillip and the Port, Post, and Railway Offices, at a total cost of £832 1s. 4d., the whole line being finished in March, 1858.

In January of that year the station at Redfern was connected by the department with the main station at the Sydney Exchange, the length of line being about $1\frac{1}{2}$ miles.

In the same month also a fresh contract was made for the construction of the line from Picton to Albury, a distance of 306 miles, at £57 per mile.

On the 26th of the same month, telegraphic communication commenced in New South Wales, by the opening for public use of the lines to Liverpool and the South Head.

On the 1st April the work had advanced as far as Berrima, and the line was tested by the exchange of messages between that place and Sydney.

On the 9th April the towns of Albury and Melbourne were placed in telegraphic communication, the inhabitants of Albury having themselves erected the connecting line*, and the Government having despatched thither an operating clerk, with the necessary instruments and batteries, &c.

On the 10th May, the day upon which the Railway to Campbelltown was opened for public traffic, the station there was placed in circuit.

On the 25th and 28th August the line was opened for use to Yass and Gundagai respectively.

In September a second wire for the use of the Railway was erected along the existing poles to Campbelltown, at a cost of £580 16s. 6d. for about 36 miles.

At

* About half a mile long, at a cost of £66, since paid by the Government.

At noon on the 28th October the Sydney wire was brought into the Albury Station, and at 3 P.M. on the following day telegraphic communication was established between the three Colonies of Victoria, South Australia, and New South Wales; and the line at once opened by the Government for business.

Since that period it has been constantly at work; the insulation has been found excellent, and the interruptions from breakage or other causes few* and of short duration.

From the amount of business that at once ensued on the line being opened, together with the comparative inexperience of the operators (all of whom with one exception were young hands trained in the Sydney Office, and not accustomed to the sole charge of stations,) some delays took place in the transmission of messages in 1858, but since April last when some departmental changes were made, the working of the line in this Colony has been excellent.

I regret to state, however, that upon the two last occasions of the arrival of the mail from England the press messages have not been received at Albury, and that therefore although the arrangements made by this department for that purpose remained perfect, the messages could not of course be furnished. The inconvenience to the public, and the loss of revenue have been so great, as to render the matter worthy of the special attention of the Government.

The growth of the telegraphic business will be seen from the following statement:—

For the first six months of 1858 the number of messages transmitted were 1,172, and the receipts £233 11s. 9d.; and for the second six months 7,969 messages, and £1,699 8s.

Between the 1st January and 30th June last, the number of messages rose to 17,509, and the receipts to £3,488 14s. 11d.; the total value of the messages transmitted being £3,876 9s. 11d.†

Of the former amount £3,394 11s. 4d. was earned by the inter-colonial line, and as the capital invested in this up to the 30th June last was £23,550 15s. 8d., and the expenditure upon it £1,469 16s. 3d., the amount of interest upon the capital invested, after payment of working expenses, is at the rate of 16·4 per cent. per annum; the total length of line opened in the Colony being 410 miles, the capital invested £25,067 3s. 6d., the expenditure £1,775 16s. 3d., and the rate of interest 13·6 per cent. per annum.

Under the existing arrangements no inter-colonial accounts exist, each Colony retaining the receipts for all messages transmitted from it, the principle being that each should have the advantage of the traffic it creates. Upon this principle press messages are excepted from the general rule, the receipts due for these being collected in the Colony receiving them.

The transmission on the arrival of the mail of press messages after the usual work of the day is done has occasionally rendered the duties of the operators extremely arduous, the offices at Albury and Sydney being open at such times nearly all night as well as all day.

In the last reports which I have received from the Superintendents of Victoria and South Australia, and which contain information up to the 31st December last, the following results are stated:—

In Victoria during the first six months of 1858 the cash receipts were £6,885 3s. 3d., and the value of messages on public service £3,052 5s. 2d.; the expenditure for maintenance and working £7,664 3s. 1d.

During the second six months of 1858 the cash receipts were £9,589 14s. 7d., and the value of messages on public service £7,074 10s. 8d., and the expenditure for maintenance and working £9,739 17s. 6d.

The

* A statement of the interruptions that have taken place during the current year in New South Wales, and their causes, will be found in the Appendix, Table 15. It will be seen that almost all have arisen from the heavy storms of thunder and lightning to which this Colony is subject. It may be interesting also to mention, that on the 29th of August last, upon the evening of which the Aurora Australis was seen, the electric circuit appeared to be deranged in a singular manner. The effect of ordinary thunderstorms is to invest the relays with additional magnetic powers, but in the present instance, although an extraordinary current of electricity appeared to be passing along the wires, the magnetic power was apparently neutralized, and this so constantly, as to prevent all working throughout the day, the derangement lasting from 10 A.M. to nearly 8 P.M., and occurring frequently at intervals of only half a minute; it ceased when the Aurora was seen.

† See Table 15, Appendix.

The balance upon the total transactions of the year, including value of messages on public service as cash receipts, gives 7 per cent. as the rate of interest upon £70,000, the then total outlay, after payment of working expenses.

In South Australia during the first six months of 1858 the cash receipts were £759 15s 3d, the number of messages being 19,805; and for the second six months £2,084 10s. 3d. The expenditure, capital invested, and rate of interest, are not given.*

The length of line opened in Victoria is 897 miles, and in South Australia 410 miles.

LINES IN PROGRESS.

Contracts have been made for the continuation of the lines to the Hunter and Bathurst, for which funds were provided by Parliament last session.

The line to the Hunter was commenced on the 6th of June last; starting from the Blacktown road it passes through Windsor and Richmond *via* Wiseman's Ferry to Wollombi and West Maitland, and thence to Morpeth, and along the Railway line to Newcastle.

The line to Bathurst follows the Railway line from Parramatta to Penrith, whence it ascends by Knapsack Gully to the main road, near the Pilgrim's Inn, and follows the general course of the road to Bathurst, with the exception of a deviation at Mount Victoria and another at Mount Lambic. The work commenced on the 23rd May last.

Between the head office at Sydney and Parramatta the line is being carried out by the department direct, contracts having been made for the poles, and the work being executed by agreement.

The estimated length of the Northern Line, measuring from Sydney, is 154 miles, and from the Blacktown road, 132 miles; of the Western Line, from Sydney 127 miles; and from Parramatta 118 miles. The contract price for the Northern Line is £55 per mile, and for the Western Line £51 per mile.

It is anticipated that both these lines will be ready for opening in the course of next November.

A contract has also been taken for the erection of the second wire to Albury, so much required to facilitate inter-colonial communication, the price being £17 10s. per mile, (less £100 on the entire distance.) This work has been commenced, and will probably be completed by the end of the present year.

Telegraphic communication will then extend in this Colony over about 677 miles, over 15 miles of which there will be five wires; 20 miles three wires; 331 miles two wires,—and the remainder a single wire.

The instruments for the Hunter and Bathurst lines (which have been ordered from Messrs. Henley and Co., of London, and are shortly expected,) are on a somewhat novel principle: the ordinary Morse register being worked by a permanent magnet, thus entirely dispensing with the use of main batteries.

By the estimates for the current year a sum of £3,000 has been provided for a line between Moreton Island and Brisbane, of which about 16 miles will be submarine. I anticipated at one time that sufficient would remain of the Tasmanian cable for this service, and I endeavoured to make arrangements for its purchase, and for proceeding at once with the work. Unforeseen circumstances have, however, prevented this, and it will now be necessary to send to England for the cable required.

By my letter of the 17 February last I communicated to the Government the arrangement proposed by Mr. Todd to the Government of South Australia, for the introduction of a money order system by telegraph, and suggested the adoption of similar measures in this Colony, and that the system might be extended so as to become inter-colonial; the suggestions made by me were approved of by the Governor and Executive Council in July last, and arrangements are now in progress to carry them into effect.

PROPOSED LINES.

The extensions, for the construction of which sums have been placed upon the Estimates for 1860, are as follows:—

From Maitland *via* the Railway Line to Singleton, and thence by the main road to Brisbane, a distance of about 600 miles, the estimated cost being £45,000.

An

An extension of the Western Line to Mudgee, the estimated cost being £6,000; this line, when further extended, will afford a second means of communication with the Northern Districts.

From Gundagai *via* Wagga Wagga to Deniliquin, a distance of about 200 miles, at an estimated cost of £15,000, connecting the Deniliquin Company's line with the New South Wales system.

The purchase of the Deniliquin and Echuca line, at a cost of about £3,800, which will provide additional means of communication with Melbourne and Adelaide by way of Ballarat.

By the completion of the proposed lines telegraphic communication would be extended in this Colony to a distance over 1,300 miles.

LINES CONTEMPLATED AND PROPOSED IN THE SISTER COLONIES.

In the Sister Colonies additional lines are also in progress and contemplated; the most important perhaps being the submarine and land line to connect Tasmania with Australia.

Among those in progress in Victoria are a line from Geelong to Cape Otway, to connect the Tasmanian Line with the existing intercolonial system, and from Kilmore to Heathcote; and among those contemplated, a second wire from Melbourne to Albury, and from Melbourne to Mount Gambier *via* Geelong, Colac, Camperdown, and Warnambool.

In South Australia a second wire has been sanctioned from Adelaide to Mount Gambier, and the south-eastern frontier of that Colony *via* Mount Barker, Strathalbyn, crossing the Murray at Wellington, and meeting the existing line near M'Grath's Flat on the Coorong, and the work will be proceeded with immediately; also a line from Burra Burra to the Eastern boundary near Lake Victoria; and I am informed that it is contemplated, should the mail steamers continue to call at Kangaroo Island, to connect it by telegraph with Adelaide.

The communications which I have received from the Superintendent of the Electric Telegraphs in South Australia, relative to the extension of the Deniliquin line to the eastern boundary of South Australia *via* the Murray, I have already had the honor of bringing under the attention of the Government. The length of line to be made by this Colony, the thinly peopled districts through which it would pass, and the heavy sums already placed upon the Estimates for telegraphic extensions, prevent my recommending that this proposition should be carried out; at any rate, until the effect of the additional means of communication afforded by the line *via* Deniliquin and Ballarat is known.

TELEGRAPHIC COMMUNICATION WITH ENGLAND.

The proposal lately laid before the Government and the public, for telegraphic communication with England, has naturally excited the greatest interest.

Attention was briefly drawn to this subject in my Second Report, and the proposition now made will be found discussed at length in a paper contained in the Appendix to this Report.*

It will be seen, that while submitting the project for the favorable consideration of the Government, it yet requires, in my opinion, considerable modification, especially as to the nature of the guarantee.

CONCLUSION.

In concluding this Report, I may be permitted to observe, that the rapid progress during the last two years of those public works which have been under consideration has involved constant alterations in the department placed by the Government under my charge, amounting almost to its reconstruction, and has naturally entailed a great increase of labor and responsibility. Such progress, however, in the extension and improvement of Railways, Roads, and Telegraphs, is a matter for congratulation, both as evidencing and as directly tending to the advancement of the real and solid prosperity of the Colony.

APPENDIX

* Appendix, Paper No. 4, page 29.

APPENDIX.

STATEMENT relative to the Settlement of Claims for Land taken for Railway Purposes, referred to in Note page 3 of Report.

Paper No. 1.

The system pursued in this Colony in the settlement of claims for land taken for Railway purposes is as follows:—

As soon as possible after the proclamation of any new line, or section of new line, notices are served, in accordance with the Act, upon those interested in the lands taken or required for the Railway. These notices state the particulars of the land taken, and that the Commissioner is willing to treat as to the compensation to be made, and call upon the parties interested to send in their claims. The claims as sent in are handed over to two valuers, appointed by the Governor and Executive Council, who make separate and confidential reports to the Commissioner of the amount that, in their opinion, should be paid. The Commissioner, after conferring with the valuers, transmits these reports, with his recommendation, to the Secretary for Lands and Public Works, and subsequently receives his instructions as to the amount which the Governor and Executive Council decide should be offered. Should the claimant accept this offer when made by the Commissioner, the money is paid by him as soon as he receives a certificate from the Crown Solicitor that the claimant has shewn a good title to the property to be conveyed. Should the claimant decline the offer, the amount to be paid can be determined before two Justices if the claim is less than £100; if it exceeds that amount, each party appoints an arbitrator, and the arbitrators an umpire, and, as a rule, the amount awarded by them is paid on title being proved as above. There is, however, a power of appeal to the Supreme Court in case either party is dissatisfied with the amount awarded, and where this amount exceeds £300. Considerable delay, it will be seen, must in any case arise, before the Commissioner is in a position to make payments to the parties whose claims have been received, and this has been increased by circumstances which no longer exist. Any delay in payment is objectionable, yet the large amounts involved, and the necessity of ascertaining in each case what is a fair sum to pay, and of having a clear title, must not be overlooked.

MEMORANDUM on the Railways of Victoria and New South Wales, referred to in page 6 of Report.

Paper No. 2.

The Government Railways in course of construction in Victoria at the present time are from Melbourne to Sandhurst, and from Geelong to Ballarat, the former being a distance of about 100 miles, and the latter of about 54 miles. From Sandhurst it is proposed to extend to Echuca, on the Murray, a length of about 57 miles.

The estimated cost of the Melbourne and Sandhurst line is £4,500,000, or about £45,000 per mile; of the Geelong and Ballarat Line £2,000,000, or about £37,000 per mile; and of the extension to the Murray £1,500,000, or about £26,000 per mile. In addition to which, it is estimated that £3,000 per mile will be required for stations and rolling stock; but the works will, it is considered, be completed for an amount considerably within the estimate, so that the total cost, including rolling stock, will not exceed £8,000,000.

The steepest gradient is 1 in 50, the ruling gradient being 1 in 80; the radius of the smallest curve is 30 chains, and varies from 40 to 60 chains and upwards. The rails are 80 lbs. to the yard, single chairs 30 lbs., joint chairs 43 lbs. About two-thirds of the lines will be fish jointed, the remainder being laid with joint chairs.*

The lines are double throughout; the bridges have stone piers and abutments, and either stone or brick arches, or an iron superstructure. The way and works are throughout of the most substantial and costly construction. Some of the works, such as the Warnambool Viaduct, are of great magnitude.

In New South Wales the principle has been laid down of extending the lines as rapidly as possible, and therefore of constructing them with the strictest economy, compatible with the way and works being thoroughly good, and sufficient to accommodate the traffic, until its increase warrants the cost of a double line and more expensive works.

The estimated cost of the lines now authorized, 67½ miles in length† is £744,000, including stations and compensation for land, but exclusive of rolling stock, for which a sum of £57,500 has been voted. The cost of the line from Campbelltown to Picton, of 20 miles, was estimated at £243,000, or £12,150 per mile; from Parramatta to Penrith, 20 miles, at £180,000, or £9,450 per mile; and from Maitland to Singleton, 27½ miles, at £312,000, or £11,193 per mile.

The

* I am indebted to Captain Pasley, R.E., Inspector General of Works, and Mr. Darbyshire, the Engineer-in-Chief of the Victoria Railways, for the above particulars.

† The actual distances according to the working plans will be—Picton Line 18½ miles, Penrith Line 19 miles and 68½ chains, Singleton Line 29 miles, making a total of 67 miles 48½ chains.

The steepest gradient is 1 in 70 ; the radius of the smallest curve (with the exception of 3 in the immediate vicinity of Picton, where the line crosses the spurs of a mountain range,) 30 chains. The rails are 75 lbs. to the yard, chairs 24 lbs. ; the lines are single and fish jointed throughout ; the bridges and viaducts of wood.

It is anticipated in Victoria that the traffic will be such as to justify the much heavier expenditure there incurred ; the circumstances of this Colony render such an outlay unnecessary, and, independently of other considerations, the great distances to be traversed would forbid it.

MEMORANDUM on Railway Rates, in New South Wales, referred to in page 9 of Report.

Paper No. 3.

No subject in connection with Railway management is more difficult or of more importance than the determination of the rates to be charged ; and especially upon the first introduction of Railways into any country.

In further reference* to the rates charged in this Colony, it may prevent misapprehension to state what the rates were in April, 1857 and 1858, to what they were raised in May, 1858, and what they now are.

And, first, as regards the passenger rates : these, in April, 1857, were (keeping to round numbers) calculated on the scale of 4d., 3d., and 2d., per mile ; in May, 1857, they were reduced to 3d., 2d., and 1½d. per mile, and in May, 1858, raised to 3½d., 3d., and 2d. per mile ; the tolls taken being fixed at the nearest convenient sum for payment to the amount arrived at by computing the mileage rate. Since the commencement of the present year they have been practically reduced by the issue of return tickets daily, instead of three times in the week only.

Now, assuming each person using the line to travel 12 miles each journey, and to make twelve journeys in the year, the increased cost to first and third class passengers would be 6s., and to second class passengers 12s. per annum. If each person be supposed to travel once a week—an extravagant supposition—the increase would be, to first and third class passengers 26s., and to second class, 52s. per annum.

These calculations are irrespective of any advantage to be derived from the issue of daily return tickets, and show that the increase made cannot be burdensome to the public generally.

It is to be regretted that no very definite conclusions as to the effect of the increase in rates can be arrived at from the traffic of the Southern Railway since it took place, for within two months after it the deplorable accident happened, which, being the first of its kind in the Colony, naturally communicated such a shock to the public, and proved a serious drawback to the use of the line. In the month of May, 1858, upon the 17th of which the revised rates came into operation, the receipts from passengers rose to £3,709, as compared with £2,349 in the previous month, the number carried being, allowing for return tickets, 36,268 and 31,705 respectively. But the month of May is always an exceptional month, owing to the races that then take place, and was especially so last year from the opening of the line to Campbelltown in the middle of it. In the following month of June 29,807 passengers were carried, and the receipts were £3,238 ; but in July, upon the 10th of which month the accident happened, the number fell to 23,830, and the receipts to £2,628 ; after this they steadily increased, † till December when they rose to 31,385, and the receipts to £3,097. During the present year the numbers carried have been, † January, 28,515 ; February, 24,536 ; March, 27,120 ; April, 29,258 ; May, 31,352 ; June, 31,845. And the receipts—January, £2,932 ; February, £2,471 ; March, £2,764 ; April, £2,959 ; May, £2,931 ; June, £2,909. §

It will be seen, on the one hand, that comparing the first 6 months of 1859 with the last 6 months of 1858, there is in 1859 an increase of passengers of 17,162, and an increase in receipts of £564—the numbers being 172,626 and 155,464 respectively, and the receipts £16,966 and £16,402 ; the reduction in the amount received in proportion to the number carried arising, to a great extent, from the issue of the return tickets daily. And, on the other hand, comparing the first four months of 1859 with those of 1858 that there is a decrease altogether of 19,325 passengers, but an increase of £1,177 in the receipts, 12 additional miles of line, however, being in use.

It will be further seen, that the increase in the number of passengers conveyed is gradual from February last, and that the number carried in June last is in excess of that carried in June 1858 by 2,038 ; but the receipts are less by £329. In June last the proportion of return to single tickets was about 41 per cent. ; in June 1858 the proportion was about 20 per cent.

In

* See 2nd Report on Internal Communication of New South Wales—1857.

† The number carried being—July, 23,830 ; August, 24,202 ; September, 24,535 ; October, 24,848 ; November, 26,664. And the receipts being—July, £2,628 ; August, £2,661 ; September, £2,570 ; October, £2,591 ; November, £2,855.

‡ The numbers carried in 1858 being—January, 35,565 ; February, 30,145 ; March, 31,339 ; April, 31,705. And receipts—January, £2,885 ; February, £2,388 ; March, £2,327 ; April, £2,349.

§ For full particulars of traffic, see Table 5 ; also, Tables 6 to 14 inclusive.

In the first four months of 1858, 21,414 passengers were carried on the Northern Railway, and the receipts were £2,064 15s. 11d. In the two following months of May and June, (the fares being raised in May), the number carried was 8,691, and the receipts were £1,122 8s. 4d., making a total for six months of 30,105 passengers, and £3,187 4s. 3d. receipts.

In July the line was opened to West Maitland, giving an additional length of nearly three miles. The number of passengers carried for the six months ending 31st December, 1858, was 40,206, and the receipts were £4,045 16s. 8d.; and for the first six months of the present year 43,069, for £4,120 18s. 2d.

In the last half year the proportion of return to single tickets was about 22 per cent.; in the previous half year about 15 per cent.

I am unable to see in these returns any warrant for diminishing the fares generally, and especially when I consider among other circumstances the strong feeling against Railway travelling which the accident created, the notoriously dull state of trade during the present year, and the effect of the efforts made to have the rates reduced.

It is customary in fixing Railway tolls to take into consideration the cost of travelling by other means.

Previous to the opening of the Railway between Liverpool and Campbelltown, the coach fare was 5s.; the 1st class Railway fare now is 3s. 6d., and the 3rd class 2s.

Between Parramatta and Windsor the coach fare is 5s., or about 3d. per mile; and between Parramatta and Penrith 3s., or about 2d. per mile.*

Between Campbelltown and Goulburn, a distance of about 95 miles, the fare by mail is £3 10s., or nearly 9d. per mile, the weight of luggage allowed free being only from 14 to 18 lbs.

Between Parramatta and Bathurst, a distance of 108 miles, the charge is £3, or at the rate of about 6½d. per mile, the weight of luggage allowed being 14lbs. only.

Between Maitland and Singleton the fare is 15s., the distance being 28 miles, or about 6½d. per mile.

Between Sydney and Newcastle, a distance of 70 miles, the charge by steamer is—cabin 17s. 6d., steerage 11s. 8d., or at the rate of 3d. and 2d. per mile.

These examples show that the railway rates are moderate, as compared with those charged by the ordinary public conveyances of the country.

In the neighbouring Colony of Victoria, the following are some of the maximum rates per mile, fixed by law:—

16 Vic. Melbourne, Mount Alexander, and Murray River Railway Company, 1853:—1st class 6d.; 2nd class 4d.; 3d class 2d.; goods per ton 9d.†

21 Vic., No. 42. Brighton and St. Kilda Railway, 1857:—1st class, 4d.; 2nd class, 3d.; horses, 1s. per mile; if more than one, 9d.; cattle, the same; calf or sheep, 6d.; if more than one, 4d.; dog, 1s.; goods per ton, from 2s. 6d. to 5s.; carriages conveyed on a truck or platform, 5s.; loading, 1s. per ton; unloading, 1s. Goods charged per quarter of a ton; parcels—7 lbs., 1s.; 14 lbs., 2s.; 28 lbs., 3s.; 56 to 500 lbs., 10s.; single articles over 8 tons per agreement.

21 Vic., No. 43. Melbourne and Suburban, 1857, same as Brighton and St. Kilda.

16 Vic. Geelong and Melbourne Railway, 1853,—1st class, 4½d.; 2nd class, 3d.; 3rd class, 1½d.; goods per ton, 6d. per mile.

16 Vic. Melbourne and Hobson's Bay, 1853,—1st class, 1s. 6d.; 2nd class, 1s.; goods, 10s. per ton, (through rates.)

The following are some of the rates actually charged:—

Melbourne to	No. OF Miles.	SINGLE.			RETURN.			HORSES.			CARRIAGES.	
		1st class.	2nd class.	3rd class.	1st class.	2nd class.	3rd class.	Single.	Pair.	Three.	2-wheel.	4-wheel.
Sunbury.....	24	7/6	5/6	..	11/6	8/6	..	24/0	44/0	60/0	24/0	30/0
Williamstown ..	9½	1/6	1/3	..	2/6	2/0	..	10/0	18/2	25/0	10/0	12/6
Werribee	20½	7/0	5/0	3/0	11/0	7/6	5/0
Geelong.....	46	12/6	10/0	6/0	21/0	16/0	10/0	20/0	35/0	50/0	30/0	30/0
Sandridge.....	2½	1/0	0/9	..	1/6	1/3
St. Kilda	4	1/0	0/9	..	1/6	1/3

The

* Until about a month ago the fare to Windsor was only 3s., and until about six months ago the fare to Penrith was 5s., it was then lowered, owing to competition, to 3s.; and I am informed that the rival coaches will now carry passengers for anything they will give.

† Since purchased by Government, under Act 19 Vic., No. 15, and being constructed under Act 21 Vic., No. 35.

It will be seen, therefore, that the Victoria fares are not arranged on a fixed mileage rate, but vary with local circumstances and competition; but they are generally in excess of those charged here.

The charge for Season Tickets is as follows:—

	Miles.	1st class...	Monthly.	2nd class, 40s.
Melbourne to Williamstown...	9 $\frac{1}{4}$	50s.		
„ Footscray	3 $\frac{3}{4}$	30s.	„	22s. 6d.
„ Sandridge	2 $\frac{1}{2}$	30s.	„	25s.
„ St. Kilda	4	30s.	„	25s.

Half-yearly, £8; yearly, £15; 1st. class only.

In this Colony the following changes were made in May, 1858, in the issue of Season Tickets—the 2nd class was done away with, and the rates for the 1st and 3rd class doubled, making the former 1 $\frac{1}{2}$ d. and the latter 1d. per mile, or about one-half the ordinary rates.* These rates were made subject to the following reductions:—

For 2 persons, being <i>bond fide</i> members of one family, a reduction of 25 per cent.			
„ 3	„	40	„
„ 4 or more persons	„	50	„ †

And as at the same time complaints were received that the system of quarterly tickets pressed heavily on persons having children at school, monthly tickets were issued in place of quarterly.

The number of season ticket holders, and the receipts for season tickets, during the year 1858, and the half-year of 1859, will be found in Table 7 of this Appendix.

In 1857 the following were the Goods Rates and Regulations:—

“ Goods Rates.

CLASS 1. @ 3d. $\frac{1}{2}$ ton $\frac{1}{2}$ mile.	CLASS 2. @ 4d. $\frac{1}{2}$ ton $\frac{1}{2}$ mile.	CLASS 3. @ 6d. $\frac{1}{2}$ ton $\frac{1}{2}$ mile.	CLASS 4. @ 9d. $\frac{1}{2}$ ton $\frac{1}{2}$ mile.
Firewood, stone, sand, posts, rails, spokes, treenails, and split timber generally, and coals.	Timber in logs and sawn in boards, scantling, naves, and felloes, and wrought and cast iron, brass, copper, tin, lead, machinery, bricks, slates, lime, cement, shingles, hides, tallow, hay, straw, salt.	Flour, grain of all kinds, potatoes, leather, wine, beer and vinegar in wood, ironmongery, wool, furniture, carpentry, paint, oil, fresh meat, earthenware, glass, raw sugar, soap, tobacco in tierces.	Groceries,* wine and beer in bottle, saddlery, dairy produce, vegetables, fish, butter and milk, &c., drapery, haberdashery.

“ All goods from 1 cwt. to 5 cwt. will be charged as quarter of a ton; from 5 cwt. to 10 cwt. as half a ton; 10 cwt. to 15 cwt. as three-quarters of a ton; and from 15 cwt. to 20 cwt. as one ton; and in the same proportion for all larger quantities, charging for the nearest quarter of a ton over the net quantity.

“ Saddlery, drapery, &c., firewood, timber, carpentry, and furniture, will be charged by measurement of 40 cubic feet to the ton; all other goods will be charged by weight.

“ *N. B.*—*Aquafortis*, *oil of vitriol*, *gunpowder*, or other goods which, in the judgment of those having care of the line, are of a dangerous nature, must be distinctly marked on the outside of the package containing the same, or otherwise notice given in writing to the book-keeper or other servant of the Railway with whom the same may be left at the time of sending. On all such goods an additional charge of 100 per cent. will be added to the usual rates of the highest class. On *musical instruments*, and other goods requiring great care and space, an additional charge of 50 per cent. will be made to the highest class. Loose hay or straw will not be carried under any circumstances.

“ Special monthly agreements will be entered into with parties willing to send regular loading, and a discount will be allowed on the above rates as follows:—

25 tons and under 100 tons per month	10 per cent.
100 tons and under 150	15 „
150 tons and upwards	20 „

These remained unaltered till the 1st of March, 1858, with the exception contained in the following note:—

“ No credit will in future be given except under special arrangements with the Commissioners, and no rebate or deduction from the authorised rates per mile will, in any case, be allowed.”

The

* With very few exceptions, Season Ticket Holders travel 3rd class.

† Making the 3rd class rate $\frac{2}{3}$ d., and $\frac{1}{2}$ of a penny per mile. These rates speak for themselves, but it may prove advantageous still to decrease them in some proportion to the mileage travelled beyond a certain distance.

The reason for this alteration was chiefly to prevent the possibility of parties intercepting traffic coming to the Railway from various sources, and consigning it in their own names, and so obtaining the per centage commission, to the detriment of the public revenue.

In March, 1858, the four classes were reduced to two, in consequence of representations that the former number made the rates too complex, especially for the carriers. The following then became the rates and regulations for goods traffic:—

“GOODS BRANCH.

“TRAFFIC DEPARTMENT.

“GREAT NORTHERN AND SOUTHERN RAILWAYS

“Notice is hereby given, that on and after the 1st March next, all goods not specially excepted, will be divided into *two* in place of *four* classes, and will be carried at the following rates:—

Class 1.

@ 3d. per ton per mile.

“2. Firewood, stone, sand, posts, rails, spokes, treenails, and split timber generally, coals, timber in log (under 15 feet in length) and sawn in boards, scantling, naves and felloes, mineral ores, bricks, slates, shingles, hides and skins (wet,) manure, iron, pig and bar, metals (unwrought,) pressed hay and straw.

Class 2.

@ 6d. per ton per mile.

“3. Flour, grain of all kinds, potatoes, leather, ironmongery, wool, carpentry, paint, oil, earthenware and glass (owner's risk,) sugar, soap, tobacco, wine, beer and vinegar in wood or in bottle (owner's risk,) machinery, lime, cement, hides and skins (dried,) tallow, salt, groceries, fish (dried,) drapery, haberdashery, millinery, saddlery, bonnets or hats (in cases,) and all other articles not specially excepted.

GENERAL REGULATIONS.

“4. Goods in the 1st class will be conveyed in open wagons, and must be loaded and unloaded by and at the risk and expense of the owners. Loose hay and straw will not be carried under any circumstances. If any delay occur in the loading or unloading, or if parties prefer it, the Railway servants will load or unload, and the goods will be charged at the rate of 4d. per ton per mile instead of 3d.

“5. On musical instruments, furniture, or other articles requiring unusual space or care, as drapery, haberdashery, millinery, saddlery, bonnets or hats *when packed in crates*, a charge of 50 per cent will be made in addition to the 2nd class rate.

“6. *Aqua fortis, oil of vitriol, and other acids, lucifer matches, gunpowder*, or other goods which in the judgment of those having charge of the line are of a dangerous nature, must be distinctly marked by the senders on the outside of the package containing the same, or notice given of the nature of the goods in writing to the goods clerk, and such goods will only be taken at the option of the Commissioners; on all such goods an additional charge of 100 per cent will be made to the 2nd class rate.

“7. Bullion, coin, clocks and watches, glass mirrors, paintings, prints, picture frames, jewellery, plate or plated articles, and similar valuable property, will only be conveyed at parcels rates or under special agreement; and due notice of the nature and value of such articles when sent must be given to the Commissioners.

“8. Articles of an unusual size or weight, as heavy machinery, timber in log (over 15 feet in length), and such like, or light articles occupying unusual space, will be charged 50 per cent in addition to the rate of the class under which articles of a similar nature, but of ordinary size or weight, would be carried.

“9. Fresh meat or fish, poultry, alive or dead, dairy produce, as butter and milk, eggs, fruit, vegetables, and other perishable articles, will be conveyed, when practicable, by the next train, passenger or otherwise, leaving after their receipt at a station, at a charge of 50 per cent in addition to the second class rate, and in all cases at the owner's risk; and if not removed from the Railway premises, will be thrown away should they become offensive.

“10. The Commissioners reserve to themselves the option of taking goods by weight or by measurement, at the rate of 40 cubic feet to the ton.

“11. Under no circumstances will the charge for the conveyance of goods for *short* distances be less than 1s. 6d. per ton for the first class, and 3s. per ton for the second class, and rateably for any proportionate part of a ton, the lowest charge however for any quantity being 1s.

“12. The Commissioners will not be liable for any damage or breakage of goods conveyed under the first class rates, whether loaded or unloaded by the senders or by the Railway servants, nor for damage to, loss of, or injury to any of the articles enumerated above to be conveyed at the owner's risk, nor for any goods that may not be delivered, or may be misdelivered in consequence of the same not being properly directed; nor for damage to, loss of, or injury to any goods in consequence of the same being improperly packed, or of leakage, fermentation, or accidental fire; nor will the Commissioners hold themselves liable for the safety of such valuable articles as are enumerated in clause 7, unless an insurance rate of 1 per cent. upon the declared value of such articles be paid in addition to the charge for conveyance.

“13.

" 13. Receipts will be given for all goods sent to be carried by Railway, and will be required on the goods being delivered up.

" 14. Merchants or other parties sending or receiving regular loading may have a monthly account if sanctioned by the Commissioners on application, otherwise no credit can be allowed, but all goods and parcels must be paid for either previously to or at the time of delivery, and if payment be refused the charge for storage or re-delivery must be defrayed in addition to the former charges, and in such case the Commissioners will not be responsible for any loss or damage, from whatever cause arising.

" 15. No goods business will be transacted on Sundays, Christmas Day, or Good Friday.

" 16 All goods will be charged by the cwt. only, instead of by the quarter of a ton, as at present.

" 17. For further information connected with the conveyance, collection, and delivery of goods, the public are referred to the advertisements inserted in the daily papers on the 28th December, 1857, to Cook's Railway Guide, and to the notices posted at all Railway Stations."

From a comparison of these two tables it will be seen that the following articles were transferred from the second class at 4d. per ton per mile to the first class at 3d. per ton, per mile:—Timber in log (under 15 feet in length) and sawn in boards, scantling, naves, and felloes, mineral ores, bricks, slates, and shingles, hides (wet), metals (unwrought), and pressed hay and straw. The object of this was to give parties, having heavy loading, the option of employing their own agents to load. A charge for loading or unloading of 1d. per ton per mile in addition to the 1st class rate was made, if performed by the Railway servants. Lime, cement, tallow, and salt, were placed in the higher rate of 6d. per ton per mile. Groceries, wine, and beer, fish (dried), drapery, haberdashery, millinery, saddlery, bonnets, or hats (in cases), were transferred from the 4th class of 9d. per ton per mile to 6d. On articles requiring unusual space or care the rate was reduced to 9d. per ton per mile from 13½d.

Poultry, dairy produce, fresh fish, fruit, and other perishable articles remain unaltered at 9d. per ton per mile, and fresh meat, being of a similar character, was transferred to this class from that of 6d. per ton per mile.

At the same time a reduction was made, which to a great extent, compensated to any persons concerned for the abolition of the monthly discount which existed in 1857, and which made that advantage general; viz., the charging for goods by the cwt. in lieu of by the quarter ton.

It will be seen, therefore, that while the goods rates were at this time simplified they were in numerous instances also reduced.

The further information alluded to in clause 17 of the regulations of the 1st March, was as follows:—

" GOODS DEPARTMENT.

" GREAT SOUTHERN RAILWAY.

" COLLECTION AND DELIVERY OF GOODS.

" 1. The Commissioners for Railways being desirous of affording the public every facility for the transport of goods by Railway, have made arrangements for the delivery and collection of goods and parcels on and after the 1st January next.

" 2. All goods or parcels transmitted from any part of the country to any station on the Great Southern Railway will, unless the same are specially marked "To be left till called for," be forwarded by the Traffic Manager, and delivered at the stores or offices of the consignees in Sydney within twenty-four hours after receipt at any station.

" 3. All goods to be transmitted by rail from Sydney for any part of the country will be collected at the premises of the consignors in Sydney within twenty-four hours after the receipt of an application in writing, addressed to C. J. Nealds, Esq., Traffic Manager, at any of the following addresses:—

Railway Department, Phillip-street;
The Station, Redfern;
Mr. Penfold, Tobacconist, 297, George-street;
Toogood's Rainbow Tavern, corner of King and Pitt-streets;
The Star Hotel, opposite the Exchange;
Bath's Hotel, corner of Bridge and George-streets;
Bransgrove's Great Britain Hotel, George-street;
Edinburgh Castle Hotel, corner of Pitt and Bathurst-streets;

" 4. All goods thus collected will be forwarded to Liverpool, or such other station as they may be addressed to, by the next goods train, and delivered, upon application, to carriers, or others, according to the directions of the senders; and all carrier drays will be loaded up by the Railway servants under the direction of the Traffic Manager, without any extra charge.

" 5. Upon the delivery of any goods by the Railway servants, a receipt will invariably be taken, as a discharge to the Commissioners.

" 6. It is supposed that as a rule carriers will continue to arrange with merchants and others for their return loading as at present; but the Traffic Manager will arrange with all carriers or other parties sending loading, for the return loading upon being requested to do so.

" 7. No charge whatever will be made for commission or agency.

" 8.

" 8. One charge only will be made, payable upon the receipt or the delivery of the goods to whomsoever consigned, and will consist of the authorised Railway charge, and a cartage charge for collection and delivery in Sydney, on the following scale :—

Goods over 1 cwt. and up to 5 cwt.....	1s. 6d.
" 5 cwt. " 10 cwt.....	2s. 6d.
" 10 cwt. " 15 cwt.....	3s. 0d.
" 15 cwt. " 20 cwt.....	4s. 0d.

and 2½d. per cwt. for every cwt. over 1 ton.

" 9. Thus the entire charge upon a ton of goods of the 3rd class, delivered at any merchant's stores in Sydney from Liverpool (22 miles), would be :—

Railway charge	11s.
Delivery in Sydney—cartage	4s.
Payable on delivery	15s.

or for a ton of goods under the same class delivered at the Parramatta Station from Sydney (13½ miles) would be :—

Railway charge.....	6s. 9d.
Collections in Sydney—cartage	4s. 0d.
Payable on delivery	10s. 9d.

" 10. The charges upon all goods or parcels must be paid before they are delivered up : no credit will, in future, be given except under special arrangement with the Commissioners, and no rebate or deduction from the authorised rates per mile will in any case be allowed.

" 11. Parties desirous of sending parcels or packages up to 1 cwt. by rail from Sydney, to any station upon the line, may book the same at the following places and rates, exclusive of the Railway charges :—

Mr. Penfold's, 297 George-street ;
 The Star Hotel, opposite the Exchange ;
 Bath's Hotel, corner of Bridge and George streets ;
 Toogood's Rainbow Tavern, corner of King-street and Pitt-street ;
 Bransgrove's Great Britain Hotel, George-street ;
 Edinburgh Castle Hotel, corner of Pitt-street and Bathurst-street.

Charge for 56lbs. and under, 6d. each ; over 56lbs. and up to 112lbs., 1s. each.

Parcels and packages carried by rail to the station at Redfern will also be delivered at the residences of parties to whom they are addressed in Sydney on the same terms.

All charges on packages and parcels must be paid on delivery.

" 12. It is to be distinctly understood that nothing in these arrangements is intended to hinder any parties from sending goods or parcels to the Railway by their own or hired vehicles, or removing them from it ; but all perishable articles, or articles marked " To be left till called for," will be retained at the risk of the owners ; and all goods whatsoever not removed within forty-eight hours after arrival per train will be liable to charges for storage at the rate of threepence per package per day, or one shilling per ton per day, at the option of the Commissioners.

" 13. The Commissioners will not be responsible for the safety of goods, without they are properly directed and packed ; and every consignment of goods should be accompanied by a consignment or forwarding note, signed by the sender or senders.

" 14. All goods intended to be sent per Railway must be delivered to the clerk of the Goods Department between the hours of 6 a. m. and 6 p. m.

" 15. The Railway servants are prohibited from receiving any gratuities, under pain of dismissal.

" 16. It is requested that any irregularity may be immediately noticed to the Chief Commissioner for Railways, Sydney, or to the Traffic Manager, Railway Department, Sydney."*

This system has ever since been carried out by the present Traffic Manager, one of whose duties also it is to exert himself in every way to procure loading ; and nearly one-half of whose income depends on the net receipts of the Railway.

The following alterations and reductions have since been made by His Excellency the Governor General and Executive Council, and have been in force from the 1st January last.

Coals, stone, sand, mineral ores, bricks, pig and bar iron, and unwrought metals, can be conveyed in owners' trucks at 2d. per ton per mile.

The charge for loading and unloading goods carried at the rate of 3d. per ton per mile, is fixed at 6d. per ton for loading or unloading, in place of 1d. per ton per mile. The rate for salt is altered from 6d. per ton per mile to 3d. The rate for carriage of articles of a dangerous nature is increased from 1s. to 1s. 6d. per ton per mile.

The minimum charge is reduced from 3s. per ton (for goods carried at 6d per ton per mile) to 2s.

These various reductions have seriously affected the proportion borne by the receipts to the tonnage carried.

It will be seen that since 1857 the tendency throughout has been to reduce the rates, and to facilitate the conveyance of goods by railway.

The

* By the Regulations published under the Government Railway Act of 1858, the charge for storage is reduced to 2d. per package, and the hours during which goods will be received to between 6 a.m. and 5 p.m., in place of 6 p.m. In other respects, except verbal alterations, the Regulations remain unchanged.

The present general rates are 2d., 3d., and 6d., per ton per mile, and 9d. for perishable articles

In Victoria the following are the rates :—

Melbourne to Footscray, 5s., or 1s. 4d., per ton per mile.

„ Williamston 6s., or about 7½d. „

Goods classed all round.

Melbourne and Sunbury Line—1st class, 8d ; 2nd class, 7d. ; 3rd class 6d. per ton, per mile.

Melbourne to Sandridge (Melbourne and Hobson's Bay Company) miles 2½—general cargo, 6s. per ton, or nearly 2s. 5d. per ton per mile ; sugar, 7s. per ton, or nearly 2s. 9½d. per ton, per mile. Dead weight as per agreement.

This Company declared a dividend for the half-year ending 30 April last at the usual rate of 14 per cent. per annum, leaving a surplus to be carried to the reserve fund of £2,112 13s. 9d. It carried during the half-year between Melbourne, Sandridge, St. Kilda, and Emerald Hill, 890,163 passengers, 69,080 tons of goods, and earned £45,343 19s. 4d. Its mileage rates have already been stated.

It is by the attentive study of such facts and data as have now been submitted that safe decisions can be arrived at as to the rates that should be charged in this Colony. I am unable myself to see that they would justify any reduction in the rates beyond those named in the body of my Report.

I have purposely avoided introducing the consideration of the rates in force in Europe and America, as I referred to those in England in my last Report, and as the length of the lines opened, and the difference in the price of labor, render any comparisons of less value than those made with the sister Colony of Victoria.

Paper No. 4.

REPORT to the Honorable the Secretary for Lands and Public Works, by Captain Martindale, R. E., Commissioner for Internal Communication, on the proposition submitted by Mr. Francis Gisborne, for the establishment of Telegraphic Communication between Europe and Australia.

*Department of Internal Communication,
16 September, 1859.*

Sir,

The advantages to be derived from the possession of the fullest and most rapid means of communication between Europe, the East, and Australia, whether in times of peace or war, are too apparent to require enumeration, and their importance is enhanced by the present disturbed state of Europe and the probabilities of the future. It is natural, therefore, that any project for the establishment of through Telegraphic Communication, should be welcomed with general interest and satisfaction, and excite an earnest feeling for its success.

The proposition to effect this object, now submitted by Mr. Gisborne on behalf of the promoters of the Australian Telegraph, is as follows :—

“ A submarine line to be laid from Moreton Bay to Banjoewangi (E. Java), the estimated cost being £720,000, and the capital to be raised not to exceed £800,000.* ”

“ The line to be constructed, held, and worked either by the several Colonial Governments, as their joint property, or by a company to be formed † ”

In the former case the different Governments would, of course, by their accredited agent or agents, make their own arrangements.

In the latter case Mr. Gisborne proposes that a subsidy should be given to the Company by each Government, or a guarantee of 6 per cent. interest on the outlay for 50 years, on the basis of the 4½ per cent. guarantee of Her Majesty's Government to the Red Sea and India Telegraph Company, the Shareholders to receive full interest on the amount of capital from time to time paid up during the period of the line being in course of construction, which is estimated at eighteen months, and subsequently, the difference between the net receipts and 6 per cent. ; the basis of the postal subsidy to be adopted in apportioning the liability of each Colony.

For the construction and working of the line I should prefer the agency of a company to the joint action of the several Colonial Governments.

No great force appears to exist in the objection that a company is not yet formed ; it may be assumed that such a guarantee can be given as would ensure the formation of a suitable company.

I should prefer also to guarantee a fixed rate of interest rather than to give a subsidy, but the proposed guarantee is such as, in my opinion, should not be assented to.

In the first place, it assumes that Telegraphic Communication with the Mother Country, by way of India, would benefit Australia alone, whereas the Home Government have throughout recognized § that the execution of such a scheme would confer the greatest

* Letter from Mr. Gisborne to the Honorable Charles Cowper, Esq., dated 8th August, 1859. Letter from Mr. Gisborne to His Excellency Sir W. Denison, dated 6th July, 1859.

† Letter of Mr. Gisborne of 6th, above referred to.

‡ Clause 6.—Schedule to Red Sea and India Telegraph Act, 1859, 22 Vic., Session 1859.

§ Letters from Mr. Merivale to Sir G. Clerk, dated 8th April, 1858, and from the Earl of Carnarvon to Sir W. Denison, dated 2nd May, 1859.

greatest benefit on the Empire as well as on the Australian Colonies. Whatever, therefore, be the guarantee given, I submit that the liability should be shared, at least, equally, by the Imperial Government.

In the second place, the guarantee asked is contrary to one of the two great principles *named by the Home Government, as having been after considerable recent discussion at length acquiesced in and adopted generally, and as being those on which Her Majesty's Government are prepared to act in cases of a character similar to the present, viz.,—to provide that any guarantee of interest should only take effect after the lines are in working order, and for so long only as they continue to remain in that condition.

In the third place, the rate of interest (6 per cent.) asked, if it is to be guaranteed on the outlay during the construction, and subsequently, whether the line be in working order or not, is excessive.

Provided, however, that the Imperial Government will adopt one-half of the entire liability, and that the guarantee take effect only while the line is in working order, I should feel no hesitation in recommending that interest should be guaranteed at the rate of six per cent., and that this Colony should take its share of such liability on the basis of the postal subsidy.†

The interest should, however, be paid only on the actual outlay, the probable amount of which is, I think, over estimated by Mr. Gisborne. The entire capital upon which interest should be guaranteed should not, in my opinion, be more than £650,000, or at the outside £700,000, so that the liability of this Colony would, under the arrangements proposed, not exceed £4,775 per annum.‡

In estimating this outlay, I have among other matter assumed that the submarine portion of the line would not be brought further south than Port Curtis; first, because there is no valid reason why the cheaper land line should not be adopted thus far to the north; and, secondly, because, if I am correctly informed, the influence of the barrier reef is not sufficient to protect the coast south of Port Curtis from heavy swells calculated to injure or destroy the cable.

Whether the land line should be extended from Port Curtis to the south of the Gulf of Carpentaria is worthy also of consideration.

From Gladstone (Port Curtis) a practicable route could probably be found by following up the Rivers Burdekin, Lynd, and Mitchell, falling into the gulf near the fifteenth parallel, and running as far as 18° south latitude within 120 miles of the eastern coast, which is indented with convenient bays and harbours for landing materials.

The main advantages of this line would be the opening up of so much new country; for, as it would be necessary to take unusual precautions to secure the line from fire and injury, and also to build posts at short intervals, and to maintain a force for its protection from destruction by the natives, the cost of construction and maintenance would be proportionately heavy; while it is possible that the Governments not directly concerned in developing north-eastern Australia might either prefer a different land line, (supposing one to be practicable) or might consider that the entire expense of that adopted should be borne by the Colonies more immediately interested in it.

The most ready plan, and that which appears most likely to commend itself generally, is the submarine line from Port Curtis to Java.

For this service Mr. Gisborne proposes that a cable should be laid, at the risk of the contractor§ similar—with the exception of the weight being increased from 21 to 22 cwt. per nautical mile—to that manufactured for the Red Sea and India Telegraph Company, and which is now working successfully between Suez and Aden.

From an examination of the charts there appears no reason to doubt that such a cable could be laid and worked successfully. The soundings along the proposed route will not, as a rule, exceed 40 or 50 fathoms; the bottom is shewn as soft sand and mud, and the sea is said to be naturally calm.

From Banjoewangi (E. Java) to Batavia (W. Java) a land line exists, and the Netherlands Government has contracted for a submarine line, to be completed this year, to Singapore, and has undertaken to grant such terms, either to the Governments concerned or to a company, as are sufficient to ensure telegraphic communication through its territory.||

The Secretary of State for India in Council was, in April last, in communication with the Lords Commissioners of Her Majesty's Treasury, upon the measures which should be taken for constructing the line from Singapore to Pegue; and it may be anticipated that this link in the telegraphic chain will be early supplied.¶

From Pegue to Kurrachee, and from Aden to Alexandria, there are existing lines. Between Kurrachee and Aden the cable, which is manufactured, is to be laid this year; over this entire length Her Majesty's Government exercise control; and the necessary concessions for

* The other being "to grant no exclusive privileges"—letter from the Earl of Carnarvan to Sir W. Denison, 2 May, 1859.

† Mr. Gisborne suggests that, with the view of simplifying the necessary arrangements, the entire amount to be paid by the Colonies should be guaranteed by Victoria and New South Wales only; they obtaining from the other Colonies their respective contributions.

‡ Instead of £9,504 as suggested by Mr. Gisborne in his letter of 8th August, above referred to.

§ Letter to Sir W. Denison, of 6 July, above referred to, and Estimate for Cable.

|| Conditions on which the British Government granted permission to the Netherlands Government to land a submarine cable, and to establish and administer a station at Singapore; and letter from the Minister for the Colonies, dated the Hague, 19 March, 1859. See Appendix.

¶ Letter from Mr. Dickinson to Sir G. Clerk, dated 14 July, 1858, and from Mr. Melvill to Mr. Gisborne, dated 7 April, 1859.

for the protection and working of the lines have been obtained from the Turkish and Egyptian Governments, where they pass through their territories.*

Between England and Alexandria the arrangements are both more complicated and not so complete. Between England and the Continent the lines belong to private companies. On the Continent and in Turkey they are in the hands of the State. Throughout Germany a Telegraphic Convention exists, fixing the charges, order of precedence, &c.; and there are similar conventions between France, Belgium, Prussia, and Switzerland. From these England is in every case excluded, except that, as I am informed, an arrangement exists by which her official messages can be sent in cypher, and have precedence over private messages; these latter, I presume, are under the protection of the State who first receives them.

At any rate, from England to Constantinople, and thence *via* the Dardanelles and Khio, continuous telegraphic lines exist; those from the Dardanelles to Candia and Egypt being held by an English Company; between Alexandria and Candia, however, the line has been twice lost, but it may be anticipated that the attempt will again be made to lay it.

Negotiations have also been in progress for some years past for a line from Ragusa *via* Corfu, and perhaps Candia, to Alexandria; and the Turkish Government at one time determined to undertake a line from Scutari to the Tigris, and *via* Bagdad to the Persian Gulf, but I believe the project is at a stand.

A very probable future line is one running from England *via* Gibraltar, Malta, Corfu, and Candia, to Alexandria; the first portion to Gibraltar is to be laid next spring, and, looking to the vast importance to the empire of uncontrolled telegraphic communication, it may fairly be presumed the remainder will follow.

Under existing circumstances, however, it does not appear desirable that this Colony should give any guarantee, except upon condition of satisfactory arrangements being first made for the due transmission of its messages, at rates and in an order of precedence to be agreed upon by the Home Government, the Governments of these Colonies, and the representatives of *all* the lines along which they would pass.

There is, however, no reason why such arrangements should not be made; the concessions given by the Netherlands, Turkish, and Egyptian Governments, and the terms contained in the agreement made between the Lords Commissioners of Her Majesty's Treasury and the Red Sea and India Telegraph Company, already referred to, being taken as a guide.

The basis for negotiations with Mr. Gisborne would therefore be somewhat as follows:—

The Government of New South Wales and Queensland (if concurrent) to continue the Australian land system to Port Curtis.

A company to be formed for the construction of a submarine line to place Australia in telegraphic communication with England—but to have no exclusive privileges.

The company to be formed within six months after an agreement for its formation shall have been entered into between the several Governments concerned and Mr. Gisborne acting for the promoters thereof.

The work to be undertaken by the company to be the laying down of a line of Electric Telegraph from Port Curtis to Banjoewangi.

The construction and laying down of the said line to be commenced immediately upon the formation of the company, and to be completed, and the line open for use, within two years.

The company to enter into a contract for the construction and laying down of the said line with contractors of high position and extensive experience in telegraphic operations; whereby the said contractors shall bind themselves to construct and lay down the said line from Port Curtis to Banjoewangi for a fixed sum, at their own risk and upon their own responsibility; and to hand over the line to the company in efficient working order within the said period of two years.

The company themselves efficiently to work the line for the transmission and delivery of messages.

All messages from or to Her Majesty or other Sovereign, or on public service, whether transmitted by the Home, Colonial, or Foreign Governments, to have priority over private messages; and if received from different Governments simultaneously to be dispatched alternately, the rates and charges to be paid thereon to be the same as those for private messages.

Private messages to be transmitted in the order in which they are received, and to be paid for at rates to be agreed upon between the several Governments concerned and the company.

The Imperial Government to guarantee during the period of fifty years one moiety, and the Colonial Governments the other moiety, of such sum as shall be sufficient to provide that the net receipts available for dividend upon each half-yearly statement of accounts, shall after payment of working expenses, be equal to interest at the rate of 6 per cent. per annum, upon the amount of outlay: Provided that the said outlay shall not exceed the sum of seven hundred thousand pounds, and that the said guarantee of interest shall be held only to take effect after the line is in working order, and for so long as it continues to remain in such order, and only to supplement the net receipts so far as to provide that the half-yearly dividend shall be at the rate of 6 per cent. per annum upon the outlay.

The Government of New South Wales to be liable, upon the above conditions, for the half-yearly payment of interest at the rate of 6 per cent. per annum, on any sum not exceeding 22 $\frac{1}{3}$ of £350,000.

All

* Concession granted to Mr. Gisborne by the Egyptian Government, and Agreement for the Establishment of the Telegraph Stations of the Red Sea Submarine Line.

All amounts paid by the several Governments under the above guarantee, to be a charge upon the company, to be paid out of future surplus profits, as hereinafter provided.

The company to keep proper and accurate accounts of capital and revenue expenditure, and of all moneys received for the working of the line; and all reasonable means to be furnished to the representatives of the several Governments interested to examine into and verify the correctness of such accounts.

The working expenses to include management, and to be paid in the first instance out of gross receipts, and should these be insufficient, then out of the reserve fund hereafter mentioned, or, failing that, out of the capital of the company.

If upon any half-year during, or after, the said fifty years, the net receipts shall be more than sufficient to pay a dividend at the rate of 6 per cent. per annum upon the outlay, the surplus shall be applied as follows:—

- (a) One-third to repay any debt due for payments made by the several Governments under their guarantee, in proportion to their payments; one-third towards a reserve fund not to exceed 10 per cent. of the outlay; one-third to increase the dividend to 10 per cent. per annum upon the outlay.
- (b) If there be no debt, two-thirds to be applied to increase the dividend to 10 per cent., and the remaining third, and any portion of the two-thirds not required so to increase the dividend, towards the reserve fund.
- (c) If the reserve fund be completed the dividend to be made up to 10 per cent., and any surplus remaining to be applied, either in reduction of the rates and charges, in the creation of a fund for the redemption of the Government guarantee, or, as shall be agreed upon by the several Governments interested.

The reserve fund to be applied, as occasion may require, for such purposes of restoration and construction as are not justly chargeable to working expenses, and if the reserve fund be not sufficient for these purposes they shall be paid out of the capital of the company.

The reserve fund, if reduced by any such payments, to be made good in the same manner as upon its original formation, and to be invested and the interest carried to revenue receipts.

In case the line from Port Curtis to Brujoewangi should not be laid and at work within the period specified, any agreement made to become null and void.

In case the company, during the said period of 50 years after the line is opened for work, fail to reinstate or restore, as occasion require, or efficiently to work the said line, the said company shall, on demand being made by the Governments interested, transfer to their agents, after six months notice, all their telegraph lines, works, instruments, and machinery, together with all their rights and privileges, on terms similar to those made between Her Majesty's Government and the Red Sea and India Telegraph Company.

The several Governments interested to be entitled to appoint agents to represent them in the Board of Directors, and to remove the same and appoint others in their stead, and such representatives shall possess all the powers and perform all the duties assigned to the *ex officio* directors, under the Red Sea and India Telegraph Company Act, and in addition, shall have the right to initiate and lay before the Board such measures as appear to them necessary; and in cases of difference of opinion between such representatives they shall vote among themselves, and act in accordance with the decision of the majority.

The Board of Directors shall sit either in London or in one or other of the Colonies, or the Board of Directors shall sit in London and a local Board in one or other of the Colonies, as may be agreed upon.

Any Government or the company shall have the right to establish a station on payment of the cost of so doing, and on giving a guarantee to cover its working expenses.

In case one wire should be found insufficient for the purposes of communication, the company shall lay down an additional wire or wires on terms similar to those now proposed.

The Governor in and over any of the Australian Colonies may, in case of necessity, take possession of the stations of the said telegraph line within such Colony, under provisions similar to those contained in the Red Sea and India Telegraph Act.

The provisions of that Act* would apply generally to the line now contemplated, and it might form the basis for the Imperial and Colonial Acts required for its construction and working.

I have been unable to obtain any reliable information as to the probable tariff for messages, but I apprehend that the important results to be derived from such rapid communication would altogether outweigh the expense of the transmission of messages, and that the line would be freely used.

I have given some consideration to the probable amount of working expenses, but until the length and character of the line, and the number, position, and character of its stations are decided, no estimate sufficiently accurate to record can be given.

My attention has also been turned to the other lines that have been projected for connecting Australia by telegraph with England and the East; these are,—

From Ceylon to Western Australia *via* Keeling's Island, and thence overland, or by a submarine line, to Adelaide.

From Java to Adelaide *via* Western Australia.

From Coepang (Timor) to Cambridge Gulf, and across the Continent to Adelaide.

The

* The copy of the Act attached is as "amended in Committee,"—not as finally passed, but I am informed there is little or no difference between them.

The Superintendent of Electric Telegraphs* in Victoria at one time preferred the first of these routes, but I believe he has since seen cause to modify that opinion, and to agree with the Superintendent of South Australia† in favor of that proposed by Mr. Gisborne. I concur in thinking it the best route yet proposed.

Should Mr. Gisborne, therefore, be disposed to enter into arrangements on the terms above stated, I submit that the risk entailed upon this Colony by the guarantee will be so trifling, as compared with the advantages to be derived from the proposed work if successfully carried out, that, under the sanction of Parliament, negotiations should at once be entered into with the Home Government, the neighbouring Colonies, and Mr. Gisborne, for its execution, and that a pledge should be given that this Colony will take its share of the guarantee on conditions such as those detailed in this Report.

I have, &c.,

JOHN H. BARLOW,
Accountant.

1859.

Legislative Assembly.

NEW SOUTH WALES.

PARISH AND MAIN ROADS OF THE COLONY.

(PETITION RELATIVE TO THE BROAD WHEELS ACT.)

Ordered by the Legislative Assembly to be Printed, 29 November, 1859.

To the Honorable the Legislative Assembly, in Council assembled.

The humble Petition of the undersigned Freeholders, Householders, and Travellers over the Parish and Main Roads of the Colony,—

SH EWETH :—

That your Petitioners are very much oppressed by the exorbitant Tolls demanded under the Broad Wheels Act, and pray that the said Act may be repealed, it being unsuited to the Colony—the Roads not being generally macadamized, and broad wheels over soft and bad Roads increase the weight. That it requires two animals to do the work of one, to the great injury of both producer and consumer.

That your Petitioners believe that Weigh-bridges should be constructed at the principal Toll-gates, and regulations made to prevent persons from overloading, as one overladen vehicle does more injury to Roads than twenty empty or moderately laden ones.

That it is difficult in many cases to define to what class of carriage some vehicles belong; it would be more convenient and satisfactory to rate the Toll according to the number of animals, weight, and number of wheels.

Your Petitioners therefore pray that your Honorable House will take the premises into your consideration, and grant to your Petitioners such relief as to your Honorable House may seem meet.

And your Petitioners, as in duty bound, will ever pray, &c.

[Here follow 497 Signatures.]

1859.

Legislative Assembly.

NEW SOUTH WALES.

ROAD FROM ULLADULLA TO SHOALHAVEN.

(CORRESPONDENCE RELATIVE TO.)

Ordered by the Legislative Assembly to be Printed, 15 December, 1859.

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 28 September, 1859, praying that His Excellency the Governor General would be pleased to cause to be laid upon the Table of this House,—

“ Copies of all Correspondence that has taken place between
 “ the Government and the Bench of Magistrates at Ulladulla,
 “ on the subject of the expenditure of the Grant for the
 “ formation of the Road leading from that place to Shoalhaven ;
 “ a copy of the Proclamation, if any ; also a copy of any
 “ Instruction that may have been given to David Warden, Esq.,
 “ J. P., or any other gentleman, relative to the said Road, and
 “ any other Correspondence which they have bearing on the
 “ same subject.”

(*Mr. Garrett.*)

ROAD FROM ULLADULLA TO SHOALHAVEN.

No. 1.

COLONIAL SECRETARY to THE BENCH OF MAGISTRATES, SHOALHAVEN.

*Colonial Secretary's Office,
Sydney, 25 August, 1856.*

GENTLEMEN,

I am directed to inform you that a sum of £380 has been allotted for the repair of the road from Shoalhaven to Ulladulla, and that it is proposed that the money shall be expended under the superintendence of the Magistrates at Shoalhaven and some of the residents at Ulladulla, assisted by Mr. Assistant Surveyor Shone, and I am to request that you will afford your assistance for this purpose accordingly.

I have, &c.,
W. ELYARD.

THE BENCH OF MAGISTRATES,
Shoalhaven.

No. 2.

AUDITOR GENERAL to THE SECRETARY FOR LANDS AND PUBLIC WORKS.

*Audit Office,
Sydney, 16 October, 1856.*

SIR,

I have the honor to transmit herewith, a letter addressed to me by the Honorable the Colonial Secretary; authorising the issue of £380 for the repair of the road between Shoalhaven and Ulladulla, together with the copy of one received from Mr. J. Thomson, M.P., giving the names of four gentlemen willing to superintend the work, and would feel obliged by being informed whether the amount may be issued to these gentlemen as recommended by Mr. Thomson.

I have, &c.,
W. C. MAYNE,
A.G.

THE HONORABLE THE SECRETARY
FOR LANDS AND PUBLIC WORKS.

[Enclosure 1 in No. 2.]

*Colonial Secretary's Office,
Sydney, 8 October, 1856.*

Sir,

For your information and guidance, I have the honor to transmit the copy of a letter addressed to the Surveyor General, authorizing the sum of £380 to be expended on the repairs of the road from Shoalhaven to Ulladulla.

It has been arranged that the money shall be expended under the direction of the Shoalhaven Magistrates, and one or two persons at Ulladulla, with the assistance of the Surveyor of the District.

I have, &c.,
W. ELYARD.

The Auditor General.

[Enclosure 2 in No. 2.]

Sydney, 7 October, 1856.

Sir,

I have the honor to forward you the names of gentlemen forming a Committee approved of by the Bench of Magistrates at Shoalhaven, for the purpose of superintending the expenditure of the money granted by the Government for the improvement of the road between Shoalhaven and Ulladulla, viz.,—Messrs. W. H. Wason, David Warden, John Kendall, and William Secombe, and beg to recommend that such sums of money be paid over to those gentlemen.

I have, &c.,
JAMES THOMSON, J.P.

The Auditor General.

No. 3.

No. 3.

UNDER SECRETARY FOR LANDS AND PUBLIC WORKS to THE AUDITOR GENERAL.

*Department of Lands and Public Works,
Sydney, 24 October, 1856.*

SIR,

In acknowledging the receipt of your letter of the 16th instant, forwarding a copy of a communication from Mr. Thomson, relative to the issue of funds for the repair of the road between Shoalhaven and Ulladulla, I am directed to inform you that the £380 allowed for the repair of that road was to have been expended under the superintendence of the Shoalhaven Magistrates, associated with other gentlemen, and the Government Surveyor.

Messrs. W. H.
Wason, David
Warden, John
Kendall, W.
Secombe.

2. As, however, Mr. Thomson states that the gentlemen named in the margin have been approved of by the Bench, for the purpose of superintending the expenditure of the money in question, his request that the money may be issued to them may be complied with, adding the name of the local surveyor (Mr. Shone.)

I have, &c.,

MICL. FITZPATRICK.

THE AUDITOR GENERAL.

No. 4.

UNDER SECRETARY FOR LANDS AND PUBLIC WORKS to J. THOMSON, ESQ., M.P.

*Department of Lands and Public Works,
Sydney, 24 October, 1856.*

SIR,

With reference to your communication of the 7th instant, addressed to the Auditor General, relative to the issue of funds for the repair of the road between Shoalhaven and Ulladulla, I am directed to inform you that the £380 allowed for the repair of that road was to have been expended under the superintendence of the Shoalhaven Magistrates, associated with other gentlemen, and the Government Surveyor.

2. As, however, you state that the gentlemen named in the margin have been approved of by the Bench, for the purpose of superintending the expenditure of the money in question, your request, that the money may be issued to them has been complied with, adding the name of the local surveyor (Mr. Shone.)

I have, &c.,

MICL. FITZPATRICK.

J. THOMSON, ESQ., M.P.,

No. 6.

JOHN KENDALL, ESQ., to THE SURVEYOR GENERAL.

*Kendall Dale, Ulladulla,
27 August, 1857.*

SIR,

I herewith enclose a Petition entrusted to me by the Petitioners therein mentioned for your consideration.

I have, &c.,

THE SURVEYOR GENERAL.

JOHN KENDALL.

[Enclosure in No 6.]

To the Surveyor General of the Colony of New South Wales.

The humble Petition of the undersigned Landowners and Inhabitants of Ulladulla and its vicinity,—

RESPECTFULLY SHEWETH:—

That the line of road near the "Big Hill," in the county of St. Vincent, colored "green" on the plan or sketch hereunto annexed, is the line of road presently used by the public.

That such line of road, owing to the abundant land springs, is altogether impassable for vehicles in wet weather.

That the traffic along the said road is considerable and daily increasing.

That the line of road marked "pink" on the said sketch is the original road, and was used for many years by the Inhabitants, prior to the alienation by the Crown to one David Warden, of fifty acres of land through which the said road passed.

Your Petitioners respectfully submit, that much advantage would be derived by the public, in the restoration of the said road to its original course.

And, therefore, humbly pray that the Surveyor General will be pleased to take the matter into early consideration, and cause the District Surveyor to set out the said road, or to afford such relief in the premises as to the Surveyor General shall seem meet.

And your Petitioners will ever pray, &c.

[Here follow 42 Signatures.]

No. 7.

INHABITANTS OF ULLADULLA to THE SURVEYOR GENERAL.

Ulladulla, 23 November, 1857.

SIR,

We, the undersigned, being desirous of purchasing land in the neighborhood of Ulladulla, and there being none now surveyed, the whole of the lands put up for sale on the 28th ult., at Shoalhaven, having been sold, we respectfully request that you will instruct the Licensed Surveyor, Mr. Cuthill, who is now on the spot, to survey all available land in the vicinity into suitable sized farms.

We also beg to call your attention to the road between Armstrong's Forest and Ulladulla, part of which has been surveyed and proclaimed, but a portion of about 3 miles from Ulladulla has never been so; and the surveyor being now in the neighborhood, we trust that instructions will be given him to survey the said road up to the township.

We have, &c.,

W. H. WASON, J.P.
JOHN KENDALL
DAVID WARDEN, J.P.
WILLIAM TUCKERMAN.
MILES BERRY.
HENRY CLAYTON.

THE SURVEYOR GENERAL,
Sydney.

No. 8.

SURVEYOR GENERAL to THE INHABITANTS OF ULLADULLA.

*Surveyor General's Office,**Sydney, 14 December, 1857.*

GENTLEMEN,

I have to acknowledge the receipt of your communication of 23rd ultimo, and, in reply, to inform you that Mr. Licensed Surveyor Cuthill has been directed to measure all the available land in the vicinity of Ulladulla, so soon as he shall have completed a survey at Nelligen, urgently required.

2. Mr. Cuthill has also been instructed to survey the portion of the road from Armstrong's Forest to Ulladulla, which has not as yet been proclaimed.

I am, &c.,

GEO. BARNEY,

S. G.

W. H. WASON, ESQ., AND OTHERS.

No. 9.

SURVEYOR GENERAL to MR. LICENSED SURVEYOR CUTHILL.

*Surveyor General's Office,**Sydney, 14 December, 1857.*

SIR,

I request that, on the application of Messrs. Wason, Kendall, and others, you will be good enough to measure all the available land in the vicinity of Ulladulla, being careful to preserve all water which may be required for general use, as directed by my circular on the subject, and to provide ways of access to all portions which you may measure.

2. You will also survey for proclamation the road from Armstrong's Forest to Ulladulla, from the point to which it has already been proclaimed at the south boundary of a portion of 35 acres recently sold, into and along one of the streets of Ulladulla to the vicinity of the landing-place.

3. It will be competent to you to recommend divergencies from the existing road should you consider such to be desirable, being careful of course not to infringe the conditions of the Act of Council 4 Wm. 4th, No. 11, an extract from the 2nd clause of which, with a form of a book of reference, by which your plan of the road will be accompanied, is herewith enclosed for your guidance.

4. As, however, the survey of the site of Nelligen is more urgent than the duties now committed to you, you are at liberty to postpone the latter until you shall have completed the former.

I am, &c.,

GEO. BARNEY,

S. G.

MR. LICENSED SURVEYOR CUTHILL.

No. 10.

MR. LICENSED SURVEYOR CUTHILL to THE SURVEYOR GENERAL.

Ulladulla, 20 February, 1858.

SIR,

As instructed in your letter of the 14th December, 1857, No. 1564, I have measured 15 more farms in the vicinity of Ulladulla, and I have paid particular attention to the directions with regard to providing ways of access to all these farms. Water may be found in every one of them by digging.

2. There appears to have been an oversight committed in surveying Tuckerman's eastern farm of 83 acres, as there was no road reserved along the north side of it.

3. The inhabitants are all anxious to obtain a road there, and Mr. Tuckerman is quite willing to allow one to be made, and would assist in clearing it, provided the present road (which being through a swamp is little used) is closed. I consider that this alteration would be a public benefit, and, therefore, I strongly recommend it.

I have, &c.,

JAMES CUTHILL,

L. S.

THE SURVEYOR GENERAL.

ROAD FROM ULLADULLA TO SHOALHAVEN.

7

No. 11.

UNDER SECRETARY FOR LANDS AND PUBLIC WORKS to BENCH OF MAGISTRATES,
SHOALHAVEN.

*Department of Lands and Public Works,
Sydney, 2 December, 1858.*

GENTLEMEN,

Referring to your letter of the *19th October last, on the subject of the distribution of the road grant for the current year for certain roads in the Shoalhaven, Moruya, and Kiama Districts, I am directed to inform you that the Secretary for Land and Public Works has now been pleased to approve of the following distribution of the money to be expended on the undermentioned roads under the charge of the Benches of Magistrates of the districts in which they are respectively situated, viz. :—

Shoalhaven District.

From Shoalhaven to the Duras Water, 70 miles of road, at £10 per mile ... £700
From Shoalhaven to the Crooked River, on the road to Kiama, 10 miles,
@ £14 $\frac{1}{2}$ mile 140

Moruya District.

From Moruya to the Duras Water, 35 miles, @ £10 $\frac{1}{2}$ mile 350

Kiama District.

From Kiama to the Crooked River, 12 miles, @ £14 $\frac{1}{2}$ mile 168

2. I am to point out to you, that, as the sum of £429 has been already placed to your credit in the Joint Stock Bank, under the former distribution of this grant, as explained to you in my circular letter of the 30th September last, you have only to receive a further sum of £411 to make up the whole amount now apportioned for the roads in your district before-named.

I have, &c.,

M. FITZPATRICK.

THE BENCH OF MAGISTRATES,
Shoalhaven.

No. 12.

DAVID WARDEN, ESQ., J.P., to SURVEYOR GENERAL.

Ulladulla, 8 February, 1859.

SIR,

In reference to your letter, 14th December, 1857, there has been no surveyor sent to survey the portion of road from Ulladulla to Armstrong's Forest, which has not yet been proclaimed, and as the Government has granted a sum of money to open out the road which cannot be done before the road is proclaimed.

I have, &c.,

DAVID WARDEN, J.P.

THE SURVEYOR GENERAL,
Sydney.

No. 13.

DAVID WARDEN, ESQ., J.P., to SURVEYOR GENERAL.

Ulladulla, 26 March, 1859.

SIR,

I am requested by the Shoalhaven and Ulladulla Road Committee to draw your attention to my letter dated the 8th February, and beg your earliest attention to the same. The Committee has been compelled to stop the work of opening the road till it is surveyed.

I have, &c.,

DAVID WARDEN,
Chairman.

THE SURVEYOR GENERAL, *
Survey Office,
Sydney.

No. 14.

No. 14.

SURVEYOR GENERAL to DAVID WARDEN, Esq., J.P.

*Surveyor General's Office,
Sydney, 9 April, 1859.*

SIR,

In reference to your letter of the 8th February last, I beg to inform you that Mr. Licensed Surveyor Cuthill having been superseded, there is at present no surveyor in the District in which the portion of road from Ulladulla to Armstrong's Forest, to which you refer, is included.

I have, &c.,

GEO. BARNEY,

Surveyor General.

D. WARDEN, Esq., J.P.,
Ulladulla.

No. 15.

DAVID WARDEN, Esq., J.P., to SURVEYOR GENERAL.

Ulladulla, 22 April, 1859.

SIR,

I do myself the honor to acknowledge the receipt of your letter of the 9th inst., with reference to the suspension of Mr. Surveyor Cuthill.

I would therefore beg to suggest that Mr. Secombe, Mr. Kendall, and myself, who have been appointed to see the contract for forming the road from this township to Armstrong's Forest carried out, are qualified, from our long experience in the district, to decide upon the line of road best suited to the wants of the public, so that when a surveyor has been appointed in the place of Mr. Cuthill, it will be ready for his inspection.

As the time within which the amount voted by Parliament must be expended, has nearly expired, I trust that no unnecessary delay will interfere to prevent your reply to this communication.

I have, &c.,

DAVID WARDEN, J.P.

THE SURVEYOR GENERAL,
&c., &c., &c.

No. 16.

UNDER SECRETARY FOR LANDS AND PUBLIC WORKS to BENCH OF MAGISTRATES,
SHOALHAVEN.

(Circular.)

*Department of Lands and Public Works,
Sydney, 6 May, 1859.*

GENTLEMEN,

The General Road Vote for 1859 having passed the Legislative Assembly, I am directed by the Honorable the Secretary for Lands and Public Works to inform you, that the sum of four hundred and ninety pounds has been allotted for the repair of the road (70 miles) from Nowra (*via* Ulladulla) to Duras Water, and that the Secretary to the Treasury has been requested to give you a Cash Credit for the same in the Joint Stock Bank.

2. Mr. Secretary Robertson is desirous of suggesting to you, that should there be persons of active habits and respectable character resident near the line of road, and directly interested in the successful employment of the means placed at your disposal, it would be desirable to associate two or three of them with you in the actual superintendence of the contemplated repairs.

3. I am also instructed to intimate to you, that to avoid confusion in the Public Accounts, it has been resolved not to keep appropriations of this character open for an indefinite period. Any portion therefore of the sum now placed at your disposal which may not have been expended, or contracted to be expended, on or before the 30th June, 1860, will be regarded as having lapsed.

4. It is most essential that the Clerk of your Bench should keep accurate accounts of the expenditure of this money, and that you should transmit such accounts, quarterly, to the Auditor General, accompanied by the proper vouchers for the expenditure. The
accounts

ROAD FROM ULLADULLA TO SHOALHAVEN.

accounts so rendered should be attested by the declaration of the Clerk, in the usual way, and should be certified by you as having been examined and found to correspond with the several authorised entries in the books kept by him for that purpose. They should, moreover, be kept wholly distinct from accounts of the expenditure of sums of public money entrusted to you for any other purpose.

5. With a view to meet your convenience, it has been arranged that the credit given you for this purpose shall be drawn by cheques, signed by any two of the members of your Bench, or of the persons associated with you as above suggested, and countersigned by the Clerk of the Bench. To enable the Bank to judge of the authenticity of the cheques presented to them for payment, it will be necessary (if not already done) that the Clerk of your Bench should, before any such cheque is drawn, send to the Bank a specimen of his autograph, or usual signature, as well as his name in full.

6. In order to ensure accuracy, and to simplify the keeping of the accounts, I am directed to request that no cheques on account of the road appropriations may be drawn except in the forms of cheque to be supplied for the purpose by the Secretary to the Treasury.

I have, &c.,

M. FITZPATRICK.

THE BENCH OF MAGISTRATES,
Shoalhaven.

No. 17.

To the Honorable John Robertson, Esq., M.P., Minister for Lands and Public Works.

The Petition of the undersigned Inhabitants of Shoalhaven,—

SHEWETH:—

That your Petitioners are much interested in the repair of the Southern Road, from Shoalhaven to Ulladulla, &c., &c.

That a sum of money has been in the hands of the Bench here for a considerable time for the repair of said road, but that nothing has as yet been expended on that portion of it between Nowra and what is known as The Falls, in consequence of no road having ever been officially marked, and there being several lines which have been for a certain distance used as the road to the south.

That a line has now been marked out by the Bench, which is admitted by all parties to be the best line that can be obtained, and that it is very desirable that a Government Surveyor be at once appointed to go over this part of the Southern Road, (a distance of six miles) and if approved of by him, that it should be at once proclaimed; the line proposed passes entirely through Government land.

Your Petitioners pray that you will take the premises into your immediate favorable consideration, and appoint Mr. Rowland, the Government Surveyor at present in this District, to examine and report upon the said portion of road, in order that the necessary work upon it may be immediately proceeded with.

And your Petitioners will ever pray.

[Here follow 59 Signatures.]

No. 18.

UNDER SECRETARY FOR LANDS AND PUBLIC WORKS to J. GARRETT, ESQ., M.L.A.

Department of Lands and Public Works,
Sydney, 3 September, 1859.

SIR,

With reference to the Petition presented by yourself and Messrs. Biddulph and Moss, from certain inhabitants of Shoalhaven, praying for the survey and proclamation of a road between Nowra and The Falls, I am directed to apprise you that the same has been referred for the report of the Acting Surveyor General, and that when that officer's reply has been obtained a further communication will be addressed to you.

I have, &c.,

M. FITZPATRICK.

JOHN GARRETT, ESQ., M.L.A.,
Legislative Chambers.

No. 19.

REPORT.

I see no objection to having this road surveyed, and in fact I have had it in contemplation to have such a survey made.

There are, however, so many road surveys of greater urgency and requiring more consideration, waiting Mr. Rowland's completion of the Shoalhaven and Goulburn road survey, that I think it expedient to employ another officer on this survey, now under reference. I have accordingly issued instructions to Mr. Licensed Surveyor Parkinson to make this survey.

A. G. McLEAN,
Acting Surveyor General.

B.C.—28 *Sept.*, 1859.

No. 20.

UNDER SECRETARY FOR LANDS AND PUBLIC WORKS to J. GARRETT, ESQ., M.L.A.

*Department of Lands and Public Works,
Sydney, 7 October, 1859.*

SIR,

Alluding to my letter of the 3rd ultimo, on the subject of the Petition presented by yourself and Messrs. Biddulph and Moss, praying for the survey and proclamation of the road between Nowra and The Falls, I am now directed to apprise you that Mr. Licensed Surveyor Parkinson has been instructed to make a survey of the road in question.

I have, &c.,

M. FITZPATRICK.

J. GARRETT, ESQ., M.P.,
Legislative Assembly.

No. 21.

The undermentioned *portions* only of the Road between Ulladulla and Shoalhaven, have been proclaimed :—

*Colonial Secretary's Office,
Sydney, 22 October, 1852.*

ROADS.

WITH reference to the Government Notice of the 10th August last, relative to the intention of the Government to open a certain parish road from the occupied portion of the district of Ulladulla to the township of that name; Notice is hereby given, that as no objections have been made within the period allowed by law to the line in question, His Excellency the Governor General, with the advice of the Executive Council, has been pleased to confirm the said road as already notified, in conformity with the Act of Council, 4th William IV., No. 11, intituled, "*An Act for making, altering, and improving the Roads throughout the Colony of New South Wales, and for opening and improving the Streets in the Towns thereof,*" and it is hereby declared expedient to open and make the said road according to the map or plan and book of reference thereof, to be seen at the Office of the Surveyor General, Sydney, and at the Police Office, Glen Duart, Broulee, and all persons intending to claim compensation in respect of the said line are hereby reminded that notice must be served upon the Colonial Secretary within forty days from the date hereof, in the manner and form provided by the 8th section of the Act above referred to, or they will be for ever foreclosed from such claim.

By His Excellency's Command,

E. DEAS THOMSON.

*Colonial Secretary's Office,
Sydney, 17 January, 1854.*

ROADS.

WITH reference to the Government Notice, dated 20th September last, relative to the opening and making of a parish road, being in continuation of the line of road from Ulladulla to Coorobya Creek, notice is hereby given, in accordance with the Act of Council 4th William IV., No. 11, intituled "*An Act for making, altering, and improving the Roads throughout the Colony of New South Wales, and for opening and improving the Streets in the Towns thereof*," that no objections having been made to the said road, in conformity with the said Act, His Excellency the Governor General, with the advice of the Executive Council, has been pleased to confirm the said road; and it is, therefore, hereby declared expedient to open and make the road referred to, according to the map or plan and book of reference, to be seen at the Office of the Surveyor General, in Sydney, and at the Police Office, Moruya; and all persons intending to claim compensation, in respect of the said line, are hereby reminded that notice must be served upon the Colonial Secretary within forty days from the date hereof, in such manner and form as are provided by the sixth section of the Act above referred to, or they will be for ever foreclosed from such claim.

By His Excellency's Command,

E. DEAS THOMSON.

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

MUDBANK AND COOK'S RIVER ROAD TOLL-BAR.

(PETITION OF INHABITANTS OF REDFERN MUNICIPALITY.)

Ordered by the Legislative Assembly to be Printed, 17 February, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the Inhabitants of the Redfern Municipality, of New South Wales,—

MOST HUMBLY SHEWETH:—

That whereas the Trustees of the Mudbank and Cook's River Road have erected a Toll-bar and buildings on the junction of three of the principal streets within the Municipality, namely, Redfern and Botany streets, adjoining Botany Road—the said Toll-bar and buildings being a great inconvenience to your Petitioners, and also an immense injury to their property—your Petitioners most respectfully beg that your Honorable House will take their case into your favorable consideration (seeing the great injustice of compelling a large portion of the inhabitants to pay both taxes and toll-bar dues) and pass an Act to amend the 82nd clause of the Municipalities Act of 1858, so as to give to Municipal bodies the power of taking charge of whatever roads, within the boundary of any Municipality, that may be in the hands of any Road Trust, or cause such measures to be taken as to your Honorable House may seem fit; and your Petitioners, as in duty bound, will ever pray.

[*Here follow 535 Signatures.*]

Sydney: Thomas Richards, Government Printer.—1860.

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

SUBORDINATE ROADS OF NEW SOUTH WALES.

(CLASSIFICATION AND PROPOSED EXPENDITURE FOR 1860.)

Ordered by the Legislative Assembly to be Printed, 3 April, 1860.

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 28 February, 1860, praying that His Excellency the Governor General would be pleased to cause to be laid upon the Table of this House,—

“ A Return or Classification of Roads in New South Wales, with the
 “ proposed Expenditure, for the year 1860, similar to the Return
 “ ordered by this Assembly to be printed, 21 December, 1858. ”

(Mr. Cape.)

CLASSIFICATION and proposed Distribution for 1860.

Legislative Assembly.

NEW SOUTH WALES.

ROAD FROM SHOALHAVEN TO GOULBURN.
(MR. SURVEYOR ROWLAND'S REPORT ON.)

Ordered by the Legislative Assembly to be Printed, 22 May, 1860.

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 28 February, 1860, praying that His Excellency the Governor General would be pleased to cause to be laid upon the Table of this House,—

“ Mr. Surveyor Rowland’s Report of the Road leading from
“ the navigable waters of the Shoalhaven to Goulburn.”

(*Mr. Garrett.*)

ROAD FROM SHOALHAVEN TO GOULBURN.

ACTING SURVEYOR GENERAL to UNDER SECRETARY FOR LANDS.

*Surveyor General's Office,
Sydney, 21 November, 1859.*

SIR,

With reference to your blank cover letter of the 14th March, and subsequent verbal instructions relative to the line of road from Shoalhaven towards Goulburn, I do myself the honor to transmit, for the information of the Honorable the Secretary for Lands, plans and sections, by Mr. Surveyor Rowland, of the line of road which has been selected and marked by that gentleman between the navigable waters of the Shoalhaven River and the Village of Marulan, on the Main South Road; together with reports, by Mr. Rowland, on the line of road and on the country and its resources through which the line passes.

The circumstance that this road would bring the Town of Goulburn within 57 miles of water carriage to Sydney at once stamps it as (if practicable) a very important road; and the sections shew that, although difficult, it is not an impracticable line.

In the consideration, in the first place, of the road as a means of communication between Goulburn and the country surrounding, and beyond it, and the metropolis, and for the transit of produce which would now be sent to Sydney by the Main South Road and the Southern Railway Line, it is obvious that the advantages of the road will gradually lessen (comparatively with the other lines of road) as the Southern Railway extends southerly and supersedes the Main Line of Road; and that the comparative economy of transmission of produce by this line, and by the Main South Road and Railway, must determine the importance of this line.

Supposing that this road might be opened for traffic by the time that the Railway Line to Menangle shall have been completed, there would be a difference of distance between Marulan (to which point from Goulburn all the roads are common) and the Shoalhaven River by the new road, and between Marulan and Menangle by the Main Road, of some 33 miles; the former being the shorter.

Crookhaven, which is the entrance to the Shoalhaven River, is distant from Sydney by sea about 90 miles; and the river navigation to the point where the road meets it is about 20 miles, thus making 110 miles of water carriage for the new line against 40 miles of railway carriage for the South Road.

The average cost of the water carriage per ton for goods and produce is, I learn, about 25s., while the cost of carriage per railway would apparently be from £1 to £1 10s. per ton.

The Valleys of the Budjong Creek and the Kangaroo River, particularly the latter, form, I regret to say, so much greater obstacles to traffic than any on the Main South Road, that it seems to me to be very problematical whether the saving in distance and economy of water carriage would, unless there were a great reduction of freight charge, lead to the diversion of any large amount of traffic from the Main South Road to the line in question; and, therefore, were the Goulburn or up-country traffic the only consideration, the very material expenditure which would be necessary for the construction of the line would, perhaps, not be warranted by the object to be obtained.

It will, however, be seen from Mr. Rowland's report, that the construction of this line of road will render available large tracts of rich agricultural lands which are still unalienated, and the increased value of which would probably more than repay any expenditure which may be made upon the road.

The existence of coal at Meryla Creek has long been known, and the seams are, I believe, of unusual thickness; but even after the construction of this road, it is not probable that

ROAD FROM SHOALHAVEN TO GOULBURN.

3

that coal mines in this position could be profitably worked in competition with those on the Hunter River, and at Illawarra, which possess so great advantages in facility of access to water carriage.

The existence of gold in this locality has not hitherto been known; gold was, however, long since found in Yalwal Creek, on the opposite side of the Shoalhaven River, but not in paying quantities; and that it is in paying quantities at Bundarra Creek has yet to be shown.

I think it probable that, after the construction of the road, a village may with advantage be laid out at Kangaroo River, as suggested by Mr. Rowland, and, possibly, one also at Budjong Creek; but I hope to be able to visit the ground before the laying of these villages shall be necessary.

Mr. Rowland feels convinced that there is no likelihood of any other line so available as that now in question being discovered, and that expenditure may confidently be made on it as the best line.

It would, no doubt, have been desirable to carry the road to a point on the Shoalhaven River where the land is still unalienated, but Mr. Rowland states there is no part of the river to which the road could be conducted by such a good gradient as Mr. Kennedy's, which is, I understand, the property of Mr. Berry.

Mr. Rowland estimates the cost of clearing and stumping this line of road, with a width of 33 feet, at £30 per mile, in all £1,203 15s., and the whole cost of the line at £5,903 15s. (see his estimate); and, I learn from him, there is abundance of good road metal in the vicinity of the line. But I am much disposed to doubt whether the sum estimated would prove sufficient for the construction of a good road.

The construction of the road is, in any case, a work involving so large an expenditure, that it may not be considered necessary or proper that I should offer any recommendation that provision should be made for it in the Estimates, and repeating my conviction that the increased value of land, which would result from opening the road, would repay any expenditure which may be required for the construction.

I have, &c.,

A. G. McLEAN.

MR. SURVEYOR ROWLAND to SURVEYOR GENERAL.

Sydney, 11 November, 1859.

SIR,

In transmitting the plans and sections of the new line of road discovered by Mr. Henry Moss, from Shoalhaven to Marulan, I do myself the honor to state that, in consequence of the thickness of the brush, I am not enabled to furnish so perfect a delineation of the features of the country through which the road passes as I should desire; at the same time, my report will be found as accurate as the circumstances permit.

2. I have little to add in this report to that laid before you in my examination report 59-25, July 2, 1859; further inspection has, however, confirmed my former opinion as to the vast tract of agricultural land, hitherto lying waste, which would be eagerly purchased by the public if opened up by the formation of this road and other facilitating lines of traffic in the adjacent districts.

3. From my knowledge of the resources and capabilities of these districts, I am brought to believe that the connection of Shoalhaven with Argyle by means of this road will be of the utmost importance, not only to the district immediately contiguous, but to the Colony in general. It will, unquestionably, be found that, irrespective of the great advantages to be derived to the inhabitants of Argyle, from the greater facility which this road will afford them for the transmission of goods to and from Sydney, an extent of fertile country hitherto comparatively unknown will also be opened up to the public, which must materially add to the wealth and prosperity of the country at large.

4. I have surveyed from two points on the Shoalhaven River to Marulan; one from Eerie, the other from Kennedy's. The distance from the latter is one mile and fifty-one chains shorter than that from Eerie, and in addition to its possessing this advantage, it presents a
much

much easier gradient in rising the Table Land; moreover, steamers can approach Kennedy's which could not go to Eerie, owing to the rocky shallows, as laid down in my chart of the soundings. Kennedy's Wharf is eight miles nearer than Eerie, a point which is also worthy of consideration. About one mile from Kennedy's the good land begins to shew itself, commencing at Brown's Mountain. From this point there are thousands of acres of rich brush and cabbage-tree land which, from its proximity to navigation being secured by the opening of this road will doubtless meet with very ready sale, and command a high price per acre. The whole of this district is likewise well provided with water.

5. On all the creeks between Brown's Mountain and Budjong Creek there are thousands of acres of rich brush land extending to the tops of the ranges on the one side, and the Shoalhaven River on the other. On the Shoalhaven River upwards, from the head of navigation, there are very extensive flats of rich alluvial soil, which would be purchased at once on this road being made practicable. On Budjong Creek there is a great extent of land, equal in quality to the richest Shoalhaven soil, which would be eagerly sought after if brought into the market.

6. At the point where the road crosses the Budjong Creek there is an admirable site for a township. This is within two miles of the Shoalhaven River; and, if a site is selected here, which I beg respectfully to recommend on the opening of this road, I have no doubt that within a very few years a very thriving town will be established. I am of opinion that, from the Table Land beyond the Budjong, to the descent of the Kangaroo River, the same quality of soil will be found to exist in large quantities, particularly at the foot of the ranges and along the banks of the Shoalhaven River.

7. At the point on the Argyle side where the road crosses the Kangaroo, I would also suggest the formation of a township, as in the immediate neighborhood there is a considerable tract of rich land, to which by this means the attention of the public would be attracted. The Kangaroo River is navigable for boats several miles above its junction with the Shoalhaven; and some miles above where the road crosses this fine stream, which is about 13 rods wide, is a rich and fertile country, almost unknown, which requires only branch roads to the proposed new Goulburn Line and to Broughton Creek to make it immediately available for sale. This river, moreover, swarms with fish (not an unimportant consideration to future settlers). There are several tributary creeks, which join the Kangaroo at the point I have recommended as a site for the township, along the banks of which, so far as from my limited inspection I have been able to judge, there is a great extent of agricultural land which might be opened up for sale. From the Table Land beyond the Kangaroo, the whole distance to Marulan on both sides of the road, the soil is of a lighter quality, being sandy alluvial, resting on a clay sub-soil. It is also well watered.

8. In recommending the erection of townships at Budjong and Kangaroo, I am influenced by considerations irrespective of the opening of the Goulburn Road. I am of opinion, from the geological formations on the Kangaroo River and Bundanoon Creek, in the vicinity of Mount Meryla, that at no very distant period an extensive gold field will be discovered in one or other of these localities. On Meryla and its continuations there are vast seams of coal cropping out of the surface. On the banks of the Kangaroo, near its junction with the Shoalhaven, vertical slate and quartz formation are predominant; and at Bundanoon Creek, in the direction of the Meryla chain of mountains, the formation is principally red granite, with veins of quartz intersecting the slate, standing vertical. Mr. Moss has obtained from Bundanoon and other creeks in the vicinity, several specks of coarse gold. There is no doubt of the auriferous indications which this part of the country presents, and it is well worthy of the attention of the Government Geologist. It is needless to expatiate upon the inestimable benefits that would be conferred upon the Colony at the present time, if the hidden riches here deposited could be brought to light.

I have, &c.,

ISAIAH ROWLAND.

P.S.—Annexed I beg to hand you my report upon the formation of the road from Shoalhaven to Goulburn, accompanied by an estimate of the probable cost of the works in connection therewith.

MR. SURVEYOR ROWLAND to SURVEYOR GENERAL.

Sydney, 14 November, 1859.

SIR,

I do myself the honor to lay before you the following report of the work that will be necessary in carrying out the formation of the new line of road from Shoalhaven to Goulburn, the difficulties that have to be met in doing so, and an estimate of the probable expenditure required for the purpose.

2. You will be aware, from my previous reports, that I have surveyed two lines of road; the one commencing at Eerie, the other at Kennedy's. I have been influenced in forming my opinion as to the superiority of the latter by the considerations that the distance to Sydney from Goulburn by it is shorter than that by the Eerie route to the extent of one mile and three-quarters by land, and eight miles by water; the gradients are easier, averaging in the former from 1 to 6, whilst in the latter they are 1 to 9; the cost of formation of the former would exceed that of the other by seven hundred pounds at least. Besides, Kennedy's Road opens up a larger extent of good land than the other, and is in a better position for the branch roads that will hereafter be formed through the available sold and unsold lands at Good Dog, Foxground, and the surrounding districts; the steamer, moreover, can go to Kennedy's Wharf, the terminus of the road, that could not go to Eerie, unless in the first instance a very large amount was expended in deepening the bed of the Shoalhaven River by the removal of the rocky shallows that now prohibit navigation between these two points. Any obstacle, however, of this kind that it might some day be advisable to remove between Adam's Wharf, at Shoalhaven, and Kennedy's, consists merely of sand.

3. The total length of the road from Kennedy's to Goulburn is 57 miles and 1 furlong, of which 17 miles from Marulan form a portion of the Main Southern Road, and which, not being included in my instructions, I have, of course, not examined. There is deep water in the Shoalhaven as high as Kennedy's Wharf, sufficient to allow of all vessels reaching that point which can navigate to the present steam wharf at Shoalhaven.

4. On the route from Kennedy's to Marulan there are only three places that present any difficulty such as to require the outlay of any money beyond the amount to be expended in clearing away the timber and brush:—

- (1.) The first of these difficulties occurs in the ascent from the Shoalhaven to the Table Land at Kennedy's, extending over about half a mile. To render this portion available for drays will cost one hundred pounds. The gradients average from 1 to 9. £100
 - (2.) The second difficulty to be overcome is in the descent to the Budjong,—the gradients here average from 1 to 8, with many resting places. A roadway will have to be formed in this descent to the extent of 40 chains. Again, in the ascent from this creek to the Table Land a further formation of ten chains will be necessary, including a side cutting twenty feet in width. The work in these two places will involve an outlay of about fifteen hundred pounds. The gradient is 1 in 8. £1,500.
 - (3.) The third point at which any extra expenditure will be called for is in the valley of the Kangaroo. Along the bank of this river to the extent of two miles and a half it will be necessary to form a good metalled road, as from the softness of the soil, in the event of heavy rain or floods, the road will be impassable. A punt will be likewise required for crossing the Kangaroo, to which I shall refer more particularly in the concluding paragraph of this report. The ascent from the valley of the Kangaroo to the Table Land in Argyle is the most formidable obstacle to be overcome; the length is one mile and three-quarters, and the gradients average 1 to 8, and will require a side cutting twenty feet wide throughout. I think the total cost of the works in the valley of the Kangaroo, including the ascent therefrom, cannot be estimated at less than two thousand five hundred pounds. A bridge will also be necessary in crossing a blind creek, where the road first diverges along the bank of the Kangaroo; not less than three hundred pounds should be set aside for this purpose, in order to secure a good and permanent work. £2,500. £300.
- I may remind you that these amounts are exclusive of that which is required for clearing the road half a chain wide in the first instance, which can be done for £30 per mile.

5. The other portions of the road present no great difficulties, and require no expenditure beyond that for clearing away the timber. The soil is of such a firm description as to stand the wear and tear of dray traffic, without having recourse to the expense of metalling. It will, however, eventually be required to build thirty culverts on the line, for crossing blind gullies, &c., at a cost of £10 each; but ten of this number can be dispensed with until the increase of the traffic requires their erection. No drainage will ever be required, because the course of the road is carried along the high ground throughout, and the creeks over which the culverts will pass will answer all purposes. Throughout the entire length of the road there is abundance of material for metalling at a convenient distance from the points where it is required, particularly along the valley of the Kangaroo, where only, as I have remarked above, it will, owing to the richness of the soil, be indispensable.

6. From this you will perceive there are about eight miles and a half of difficulty calling for extra expenditure, to the extent of £4,400, as per summary below.

7. With reference to the punt above referred to, across the Kangaroo, I beg to inform you that there are parties at work on the spot as sawyers, who, if there was a prospect of this road being opened at an early date, would be prepared to enter into a contract and to give the necessary security for its erection, or to build it on their own responsibility, provided the Government would give them possession for a term of years to be agreed upon.

I have, &c.,

ISALAH ROWLAND.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES NO. 40. FRIDAY, 9 DECEMBER, 1859.

12. Condition of Bathurst Road:—Mr. Cummings moved, pursuant to notice,—
 (1.) That a Select Committee be appointed to inquire into and report on the condition of the Bathurst Line of Road, from the West Bank of the Nepean River to the East Bank of the Macquarie River, with power to send for persons and papers.
 (2.) That such Committee consist of—Mr. Hawkins,* Mr. Clements, Mr. Egan, Mr. Gordon, Mr. Hoskins, Mr. Parkes, Mr. Wisdom, Mr. Lord, Mr. Rotton, and the Mover.
 Debate ensued.
 Mr. Flood moved, That the question be amended by the omission of all the words thereof from and inclusive of the word "Bathurst," to and inclusive of the words "Macquarie River," with a view to the insertion in their place of the words "following Roads, viz. :—The Great Western Road, from Penrith to the Macquarie River; the Great South Road, from Camden to the boundary of Victoria; and the Great North Road, from Maitland to the boundary of Queensland."
 Debate continued.
 Question put, That the words proposed to be omitted stand part of the Question.
 The House divided.

Ayes, 29. Noes, 10.

CONDITION OF THE BATHURST ROAD.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 9th December, 1859, "to inquire into and report on the Condition of the Bathurst Line of Road, from the West Bank of the Nepean River to the East Bank of the Macquarie River," and empowered on the 3rd February last "to inquire also into the management and construction of the Road,"—have agreed to the following Report:—

Your Committee, after long and minute investigation of witnesses, including several professional men, have the honor to report, that they have found that the Bathurst or Great Western Road, particularly that portion of it between Bathurst and Hartley, has been for some time past, and is, in an almost impassable condition. For upwards of six years no permanent repairs have been made upon the line, and no system of road-making, worthy of the name, has been in operation.

Your Committee have gathered from the evidence of the various witnesses, that, although large sums of money have been expended on the making and repairing the road, until within the last twelve months—that is to say, since the commencement of the present system of contracts—the outlay has for all practical purposes been fruitless. For upwards of three years and a half prior to the adoption of the present contract system, the works on the road appear mainly to have consisted of a series of experiments in road-making, at once clumsy and unscientific, and altogether unsuccessful. This state of affairs, in a great measure, resulted from the fact, that the officer superintending the Western Road had not the experience and scientific education requisite to qualify him for the important appointment he held. There appears, too, to have been a want in the department in charge of the public roads during Mr. Dawson's superintendence of the line, as regards the mode he chose in expending the public money in this behalf. Deviations of little or no utility were made from the main line of road; experiments in logging and other processes were adopted, upon which large sums of money were spent altogether uselessly. It does indeed appear to your Committee that Mr. Dawson, placed upon the road without anything like the requisite professional knowledge, seems rather to have been endeavoring to acquire, during

during a considerable period of his supervision, an acquaintance with road engineering, than bringing to bear the practical skill the public had a right to expect. Captain Martindale, while speaking of the natural ability and integrity of Mr. Dawson in high terms, states he was himself dissatisfied with not having a superintendent properly trained; and implies that the superintendent's experience had actually been gained while directing the repairs of the road.

Your Committee also find, that the sums of money at present appropriated under the Road Act for the maintenance and repair of public highways is insufficient to put the Bathurst Road in a fair state of repair. On this point the evidence of the professional witnesses, Captain Martindale and Mr. Civil Engineer Bennett, is clear and decisive. And the amounts actually granted are rendered, to a considerable extent, ineffectual for the purpose, by the dilatory mode in which the work is carried on, even under the present system of contracts.

Your Committee, as the result of their deliberations, with the fact before them that, as well from the causes already stated as from the physical character of the country traversed by the Western Line, none other of the Great Trunk Roads of the Colony seems to be in so utter a state of disrepair, beg to submit to your Honorable House the following recommendations:—

- 1st. That the road from the west bank of the Nepean to the east bank of the Macquarie should be forthwith put in repair, and in connection therewith two flying parties, say of ten men each, furnished with two stone trucks, two horses and carts, should be established at each end of the road, for the purpose of maintaining the repairs at the various points not included in the contracts.
- 2nd. That one superintendent will be sufficient for the supervision of the whole line, aided by two local superintendents—that is to say, an assistant superintendent stationed at either end of the road, with a view to the inspection over that half of the line nearest his station.
- 3rd. That the Old Mount Lambie Road be put and maintained in thorough repair; and that the sum of £1,000, voted for the diverging line by Greenhatch's, be used in clearing that line of brushwood and timber.
- 4th. That along the precipices on the line of road, particularly at Mount Lambie and the Weatherboard Bridge, substantial side fences of at least two rails should be erected.

WM. CUMMINGS,
Chairman.

*Legislative Assembly Chamber,
Sydney, 6 June, 1860.*

PROCEEDINGS OF THE COMMITTEE.

TUESDAY, 20 DECEMBER, 1859.

MEMBERS PRESENT:—

Mr. Cummings,		Mr. Hawkins,
Mr. Clements,		Mr. Rotton.

H. Rotton, Esq., called to the Chair.

Committee deliberated, and the Chairman having requested Mr. Cummings, the *Mover*, to inform the Committee of the object he had in view in moving for the Committee, and the course he proposed to pursue in carrying on the inquiry referred to them; and it being suggested that the scope of the inquiry be enlarged,—

Motion made (*Mr. Cummings*) and *Question*—That the House be moved for leave to the Select Committee on the "*Condition of the Bathurst Road*" to inquire also into the management and construction of the Road—*agreed to*.

[Committee adjourned.]

THURSDAY, 16 FEBRUARY, 1860.

MEMBERS PRESENT:—

Mr. Cummings,		Mr. Parkes,
Mr. Clements,		Mr. Hawkins,
Mr. Wisdom,		Mr. Hoskins.

T. J. Hawkins, Esq., in the absence of the Chairman (Mr. Rotton), called to the Chair.

And the Committee proceeding to consider whether Mr. Rotton would be likely to continue to act as Chairman,—

Motion made (*Mr. Parkes*) and *Question*—That it be an instruction to the Chairman (Mr. Hawkins), to communicate this day with Mr. Rotton, requesting him to state whether he desires to resign the Chair—*agreed to*.

Order of the House dated the 3rd instant, empowering the Committee to inquire also into the management and construction of the Bathurst Road, read.

Committee deliberated upon their future course of proceedings, and decided upon taking Evidence.

A list of witnesses proposed for examination having been furnished, the Clerk was instructed to ascertain when it would be convenient for certain parties living at a distance to attend the Committee for the purpose of giving evidence.

[Committee adjourned till Wednesday next, at *Ten* o'clock.]

WEDNESDAY, 22 FEBRUARY, 1860.

MEMBERS PRESENT:—

T. J. Hawkins, Esq., in the Chair.

Mr. Parkes,		Mr. Egan,
Mr. Cummings,		Mr. Hoskins,
		Mr. Clements.

The Clerk read to the Committee a letter from Mr. Rotton to Mr. Hawkins, tendering his resignation as Chairman, whereupon,—

Motion made (*Mr. Parkes*) and *Question*—That Mr. Hawkins be appointed Chairman of this Committee—*agreed to*.

Mr. R. Elliott called in and examined.

Mr. T. Boland called in and examined.

[Committee adjourned till Friday next, at *Eleven* o'clock.]

FRIDAY, 24 FEBRUARY, 1860.

MEMBERS PRESENT:—

T. J. Hawkins, Esq., in the Chair.

Mr. Clements,		Mr. Parkes,
		Mr. Cummings.

Mr. W. Green called in and examined.

Committee deliberated.

Mr. T. Brown called in and examined.

Committee deliberated as to which of the two remaining witnesses should be next examined, and decided that Mr. M'Garry should be first called in.

Mr. P. M'Garry called in accordingly and examined.

The

The Chairman here read a letter received from B. H. Martindale, requesting that the Committee will sanction the evidence of the various witnesses, as taken, being transmitted to him.

Committee deliberated, and postponed the consideration of the letter till next meeting. Mr. J. Collett called in and examined.

[Committee adjourned till Wednesday next, at half-past Ten o'clock.]

WEDNESDAY, 29 FEBRUARY, 1860.

MEMBERS PRESENT :—

T. J. Hawkins, Esq., in the Chair.
 Mr. Parkes, | Mr. Wisdom,
 Mr. Clements,

The Chairman laid before the Committee,—

(1.) A letter dated 24 February, 1860, from Mr. J. Durack, excusing his attendance as a witness, in consequence of the severe illness of a member of his family.

(2.) A letter from Mr. R. B. Dawson, informing the Committee that he would be in attendance on Friday next.

Captain B. H. Martindale, *R.E.*, called in and examined.

Mr. P. Toohy called in and examined.

Committee deliberated, and having postponed the consideration of Capt. Martindale's letter, received at the last meeting, till a fuller attendance of Members,—

[Adjourned till Friday next.]

FRIDAY, 2 MARCH, 1860.

Proceedings interrupted by adjournment of House.

THURSDAY, 19 APRIL, 1860.

MEMBERS PRESENT :—

Mr. Cummings, | Mr. Parkes,
 Mr. Rotton.

W. Cummings, Esq., called to the Chair, in room of the late Chairman, T. J. Hawkins, Esq., whose Seat in the House had been declared vacant since the previous meeting. Committee deliberated.

Clerk instructed to issue summonses to Messrs. R. B. Dawson, J. McLaughlin, and G. Sheppard, for their attendance as witnesses on the 27th instant.

[Adjourned till Friday, 27th instant, at Ten o'clock.]

FRIDAY, 27 APRIL, 1860.

MEMBERS PRESENT :—

W. Cummings, Esq., in the Chair.

Mr. Clements, | Mr. Parkes,
 Mr. Hoskins, | Mr. Rotton.

The Chairman produced a letter from Mr. G. Sheppard, excusing his non-attendance as a witness *this day*, on account of ill health.

R. B. Dawson, Esq., *Superintendent of the Western Road*, called in and examined.

Witness handed in certain Reports (2) having reference to the construction of roads adapted to the Western District.

Ordered to be appended to the Evidence. (*Vide A and B.*)

Witness withdrew.

Mr. J. McLaughlin, summoned for this day, was not in attendance.

The Chairman referred to the Proceedings of the Committee on 29th February last, when Captain Martindale's letter, requesting the transmission to him of the Evidence of the various witnesses as taken, was last under consideration.

Deliberation thereupon, having been then deferred, was now resumed.

Motion made (*Mr. Rotton*) and *Question*,—

- (1.) That the Committee decline to comply with Captain Martindale's request that the Evidence be transmitted to him as taken, on the ground that they believe such a course unusual, except in special cases; that there is nothing in the Evidence reflecting on Captain Martindale or the Roads Department materially; and that the Committee are desirous to close the inquiry and bring up their Report before the termination of the present Session;—
- (2.) That a communication to this effect be made in reply;—

agreed to.

[Adjourned.]

THURSDAY,

THURSDAY, 3 MAY, 1860.

MEMBERS PRESENT:—

W. Cummings, Esq., in the Chair.

Mr. Egan,		Mr. Parkes,
Mr. Hoskins,		Mr. Rotton.

Committee met pursuant to summons.

The Chairman informed Committee that, having received a certain letter from Mr. R. B. Dawson, the witness examined at the previous sitting, he had deemed it expedient to convene them to-day with a view to its full consideration, and especially in reference to the request preferred by Mr. Dawson, for a copy of the whole of the Evidence, in order to afford him "an opportunity of rebutting what is unfounded, and of explaining that,—which without " explanation, may appear prejudicial" to his reputation.

Letter from Mr. R. B. Dawson, dated 28th ultimo, read.

Committee deliberated.

And, it appearing that the answer conveying Resolution in reply to a similar application made on behalf of the Department of Internal Communication and disposed of at the former meeting had not yet been dispatched, and deliberation upon the one case touching also the other,—

Committee proceeded to reconsider such Resolution, viz.:—

" That the Committee decline to comply with Captain Martindale's request
 " that the Evidence be transmitted to him as taken, on the ground that they
 " believe such a course unusual, except in special cases; that there is nothing
 " in the Evidence reflecting on Captain Martindale or the Roads Department
 " materially; and that the Committee are desirous to close the inquiry and
 " bring up their Report before the termination of the present Session."

Motion made (*Mr. Rotton*) and Question proposed,—That the said Resolution be rescinded.

Amendment proposed (*Mr. Parkes*)—That the Question be amended by omitting the word "rescinded" and inserting the words "amended by the omission of all the words " following the word 'taken'" (line 2).

Question put—That the words proposed to be omitted stand part of the Question.

Committee divided.

Aye, 1.		Noes, 3.
Mr. Rotton.		Mr. Egan,
		Mr. Hoskins,
		Mr. Parkes.

Word omitted.

Question—That the words proposed to be inserted be so inserted—*agreed to*.

Words inserted.

Question, as amended—That the said Resolution be amended by the omission of all the words following the word "taken"—*agreed to*.

Deliberation respecting Mr. Dawson's letter resumed.

Motion made (*Mr. Rotton*) and Question—That a complete copy of the Evidence taken before this Committee be furnished to Mr. Dawson, in compliance with the request contained in his letter—*put*.

Committee divided.

Aye, 1.		Noes, 3.
Mr. Rotton.		Mr. Egan,
		Mr. Hoskins,
		Mr. Parkes.

Motion negatived.

Committee deliberating in reference to the subsequent portion of the letter,—

Motion made (*Mr. Parkes*) and Question,—

- (1.) That Mr. W. C. Bennett, Engineer to Roads, be summoned to give evidence before this Committee at the next meeting, with instructions to produce the Report on the state of the Western Road made by him to the Chief Commissioner for Railways in the latter part of 1857.
- (2.) That Mr. Dawson be informed by letter that the Committee decline to furnish a copy of the evidence as requested by him, but adopt the suggestion to obtain possession of Mr. Bennett's report on the occasion referred to—*agreed to*.

[Adjourned till Tuesday, 8th instant, at half-past Ten o'clock.]

TUESDAY, 8 MAY, 1860.

MEMBERS PRESENT:—

W. Cummings, Esq., in the Chair.

Mr. Parkes,		Mr. Rotton,
		Mr. Clements.

W. C. Bennett, Esq., *Engineer to Roads*, called in and examined.

Witness produced his Report to the Chief Commissioner for Railways, relative to the Western Road, under date 14th September, 1857; also, a subsequent Report thereupon, dated 7th April, 1858, together with estimates for all works necessary to the proper repair of road

LIST OF WITNESSES.

LIST OF APPENDIX.

<i>(To Evidence given by Capt. B. H. Martindale, R.E., 29 February, 1860.)</i>	
A.	
Report from Mr. R. B. Dawson (<i>Superintendent W. R.</i>) respecting "Metal and Stone lying alongside Western Road." 20 February, 1860	28
<i>(To Evidence given by R. B. Dawson, Esq., 27 April, 1860.)</i>	
A.	
Memorandum on Single Lines of Plank Road, having reference to certain Timber Tracks lately constructed between Penrith and Hartley. (Plan and Section herein referred to, follow page 62)	41
B.	
Report from Mr. R. B. Dawson (<i>Superintendent W. R.</i>) upon the applicability to Western Line of Road of narrow metalled centres with earthen out-turns. 17 September, 1857	43
<i>(To Evidence given by W. C. Bennett, Esq., C.E., 8 May, 1860.)</i>	
A.	
Report relative to Western Road, Mr. W. C. Bennett to Chief Engineer, for information of the Chief Commissioner. 14 September, 1857	54
B.	
Report on Western Road, Parramatta to Bathurst, Mr. W. C. Bennett to Chief Commissioner. 7 April, 1858	56
C.	
(1.) Memoranda to accompany Estimates for Western Road. 17 March, 1858	58
(2.) Estimate from Parramatta to Penrith	59
(3.) Do. Tollbar at Penrith Bridge to Junction of Mudgee Road	60
(4.) Do. Junction of Mudgee Road to Bathurst	61
(5.) Abstract of Estimate from Parramatta to Bathurst	62
(6.) Comparative Estimate—Piper's Flat Deviation. 21 April, 1858	62

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

CONDITION OF THE BATHURST ROAD.

WEDNESDAY, 22 FEBRUARY, 1860.

Present:—

Mr. PARKES,
Mr. CUMMINGS,
Mr. HAWKINS,Mr. EGAN,
Mr. CLEMENTS,
Mr. HOSKINS.

THOMAS JARMAN HAWKINS, Esq., IN THE CHAIR.

Mr. Robert Elliott called in and examined:—

1. *By the Chairman:* You are the mail contractor on the Bathurst Road? I am.
2. Have you had many opportunities of examining into the condition and construction of that road? Yes.
3. Have you had any experience in road-making, or does your knowledge of roads enable you to express an opinion as to the condition and management of a road? My experience is of a practical kind, having driven over them, as having seen them repaired, and the manner in which this was done.
4. How long have you been acquainted with the Bathurst Road? About five years.
5. Will you state for the information of the Committee your opinion as to the present condition and as to the construction of that road? Well, I do not agree as to the manner in which it has been repaired; for in many cases both myself and my men have been obliged to leave the main road, and with tomahawks make bush roads in the best way we could, and this for miles on the Bathurst Road where it has not been properly made.
6. Will you proceed in respect to the present condition of the road—you state it as your opinion that the road has not been properly constructed, that there are great faults in the construction? A great deal of money has been expended upon laying down large logs of timber, whereas if the road had been properly drained and made of a proper width, the roads would have been of a far better quality, if metalled; and besides that, a great deal of money expended upon miles of road upon which it was dangerous to travel with a vehicle would have been saved.
7. You believe that the system of logging has failed, and that their use upon that road has been very faulty? It is indeed. Through the manner in which the logs are laid down the horses legs are liable to get in between them, and they are in that way sometimes broken.
8. Can material for road-making of a better character be obtained within a reasonable distance of the road? I should say there was some good stone and metal to be got from the mountains.
9. *By Mr. Parkes:* Are you acquainted with the mountains? I have been among them and have seen much better materials for making a good road than those which have been used, which were sometimes yellow clay and sand.
10. Are the materials you speak of within a practicable distance of the road? Yes; there is some better metal now obtained not far from Boland's, and there is good material not far

Mr. R. Elliott.
22 Feb., 1860.

Mr. R. Elliott. from other parts of the road. I think I have been the greatest sufferer through the way in which the roads have been managed; it is seldom that I have not had a broken coach or an injured horse.

22 Feb., 1860.

11. *By the Chairman*: You speak of the logging as being defective? For the last two years it has been very bad; during that time I have not travelled over that part of the road that is logged fifty times.

12. Do you not think that on the sandy places in the mountains logs would, if properly laid, make a good foundation and a substantial road when covered with metal? There is no question about it, if the logs were properly laid; it is of no use putting freestone upon sand. It would be much better and cheaper to take away these logs instead of trying to patch and bank them over, because the first storm that comes washes away the sand and earth and leaves the logs bare.

13. Can you give the Committee any idea of the number of men usually employed on the mountain road between Hartley and Penrith? I cannot say what is at present the exact number. In some places there would be sometimes three or four, and in other places five or six.

14. Can you form any estimate as to the number of workmen that have been employed on the road within the last twelve months? No, I cannot. Some portions of the road, I believe, have been laid down by contracts taken by different parties. Some men were employed by parties appointed to get metal and see the work done.

15. Do you know what is the system now pursued in repairing the roads, or in what way it is undertaken—by contract or otherwise? Yes, I believe it is done by contract. I know that Mr. Boland has got a contract for a portion of the road near Springwood; and another part of the road is being done by contract, near the toll-bar.

16. Can you give the Committee any information, from your own observation, as to the way in which the late contracts have been carried out? They are not yet completed; they are being ballasted, and the contracts I understand are for so much per yard. I do not know any portions of the road between Hartley and Penrith that are finished.

17. How has the work upon the finished portions been done? By draining and metalling.

18. Has it been well done? That depends upon the contracts; if it is done in accordance with the contract I have nothing to do with it; but I believe there is a great improvement in the work upon this line since it was done by contract.

19. Have you seen that part of the road near Springwood undertaken by Mr. Boland? I have.

20. What is your opinion of the way in which that work is done? I look upon it as well done. It has been drained, rounded up in the middle, and then metal put on it.

21. Has it been logged? Yes, it was logged some years ago; but drays could not travel over it until it was repaired.

22. Do you think that where the logging has been sufficiently covered with earth, and metal put upon it, it makes a good road? At present the question is, whether the logs have been properly laid down. They were apart in many places, and there was danger of horses' legs getting into the holes betwixt them. If they shift again and this metal gets down between them they will be very dangerous places.

23. As regards the management—can you give the Committee any information as to the way in which the duties of the Government Superintendent have been performed? I have sometimes seen Mr. Dawson on the road with other superintendents, but whether they were acting under him or not I did not inquire. In many cases the coachman has applied to have the workmen removed to those parts of the road which the most badly required repairing. At Eighteen-mile Hollow the passengers had to hold on by a rope when they could not get into the bush.

24. Can you state what is the condition of the road between Hartley and Lapstone Hill? It is very bad indeed.

25. Is it safe to travel on? No, neither by night or day.

26. *By Mr. Parkes*: How then do you pass over it? Sometimes I do not pass over it for weeks at a stretch.

27. *By the Chairman*: Is it in a worse state than any other in the country that you know? It is the worst road of any within my knowledge in the Colony; and I have had the contract for the mails to Maneroo.

28. *By Mr. Parkes*: Have you any personal knowledge of the southern line? I have only just returned from the Southern Roads.

29. Taking the whole length of the Western Road, do you consider it to be in a worse state than the Southern Road? Decidedly. From Penrith to Lapstone Hill and Bathurst is the worst ninety miles of road that I know of.

30. Taking the two roads into comparison, you have no hesitation in giving it as your opinion that the Western Road is worse than the Southern Road? I have been only sixty miles on the Southern Road for the last two years.

31. But you are sure it is in a worse state than the southern line? I am confident of that.

32. Can you describe the difference? The Southern Road is all clear and well drained on the mountains; whilst the Western Road is in very few places drained, and it is full of rocks, so that there are parts where you cannot drive the mail without great danger of upsetting unless you went into the bush roads.

33. Confining your attention still to the two roads, is it the case that you can drive all through on the Southern Road on the ordinary road track, and that on the Western Road you are obliged to leave the right track to go into the bush as a better road? I have driven the mail on the road track from Campbelltown to Goulburn, and I could not go from Penrith to Hartley without going into the bush. When the telegraph line was being put up, too, the men had to make fresh tracks.

34. The Western Road, you say, is very irregular, having patches of what is called "corduroy," patches of earth, and also parts with planks—is the Southern Road irregular in the same manner? No. Mr. R. Elliott.
22 Feb., 1860.
35. Is it continuously made throughout? Not all the way to Goulburn.
36. Are there any patches of corduroy? Very few to Goulburn.
37. Upon the whole the Goulburn Road, taking the entire length, is in a much better state than the Western? I am satisfied of that. I cannot travel four miles an hour on the Western Road in the time that I can travel eight on the Southern Road.
38. If you were going to engage to drive a coach at the same amount of remuneration for each line, would you accept the Southern Road in preference to the Western? Decidedly; and I should save something in the wear and tea, which is very great on the Western Road. There must be some difference in the amounts of the mail contracts on the two lines; a contractor would rather take the Goulburn mail at £1,000 than that from Penrith to Bathurst for £2,000. You cannot run a coach for two months together on this road without having a breakage.
39. You have been acquainted with this main road for some years? I think, about twelve or thirteen years.
40. What suggestion could you offer for the better making and better management of the Western Road? I should recommend that it be well drained, made a good width, crowned pretty high in the middle, and then metalled. If you were to log them first it would be a great expense.
41. *By the Chairman*: But in laying a road on the sands, what would you do there? I think these sands are not very deep; they are certainly bad about the Blue Mountains.
42. *By Mr. Hoskins*: Do you not think blue metal may be found in that locality? Yes.
43. *By Mr. Cummings*: Is there not good ironstone in the mountains? I believe there is. There are still patches of the road upon which ironstone was laid by the old road parties, and they are as firm as a rock.
44. *By Mr. Hoskins*: You are aware, I suppose, that an equal amount of money has been voted for each of the main roads of the Colony? I am not aware of that.
45. Do you not think that, with an equal amount of money, more improvements could be made upon the Goulburn Road than upon the Western Road? Yes, I do think so in the present condition of the two roads.
46. Do you not think a greater expense is necessary to keep the Western Road in a passable state than would be required for the same purpose on the Southern Road? If the Bathurst Road was once in a substantial state of repair I cannot say that it would.
47. You are in the habit of travelling frequently over this road? Yes.
48. Can you say how many persons, on the average, are employed in repairing it? I cannot.
49. Is there generally a large number of persons employed upon it? No.
50. Are there many persons exercising supervision over the work? Yes.
51. I mean to say are not the foremen, surveyors, and overseers in large disproportion to the number of workmen employed? Yes. I think I could manage more men myself.
52. Has it not been the habit of expending the money not on the worst parts of the road, but patching here and there? Yes, and many places were repaired where it was not required.
53. Do you think that if the same sum of money were expended in the worst places, where the traffic was impeded, that the road could be made passable? Yes; I believe so. If all the places that most required it were repaired it would make a difference to me of a couple of miles in an hour.
54. *By Mr. Parkes*: Has your coach ever capsized on this road? Yes; and I have driven for seven years on the Southern Road without having an upset.
55. That was in consequence of the badness of the road? Yes; I have had several upsets on the mountains.
56. *By Mr. Hoskins*: You ascribe this bad state of the road to want of suitable draining? That, and want of metalling.
57. How do the plank roads answer? That portion of them which has been repaired has been made passable; but after a large sum of money was expended upon them until the last two years they were not passable.
58. Do you think they are as durable as a good metal way? I am sure they are not; a good metal road will last as long as any.
59. You think the money that has been voted has not been expended in a judicious manner on the roads? I think not; that is plainly to be seen.
60. *By Mr. Parkes*: Is not the method adopted in repairing this road to be properly characterised as "higgledy piggledy"? Yes, I think so. Repairs were made in all sorts of odd places. I believe that about £500 or £600 were spent on that side of the road opposite the Pilgrim Inn, though it is now as good a bit of road as you will see on the line. The workmen generally go on very slowly, unless they know some one is passing, especially if they see anybody coming the pick goes, and when the road is quiet again they sit down on a log.
61. *By Mr. Hoskins*: Do you not know that the work is now let out in small contracts to the working men? I believe it is; and I think in that way the road is likely to be better repaired than when it was made with clay and sand.
62. Do you not think that if the men were concentrated in different localities, where repairs were most required, that the road could be made passable with the same expenditure, or at all events more so than now? I believe that if the men were kept together on those spots which were in a bad state, and were well looked after, a great deal more work might be done.
63. *By the Chairman*: The work is now, I think you say, done on a system of small contracts? I believe it; I know that Mr. Boland has a contract.

Mr. R. Elliott. 64. Are the contracts principally undertaken by parties who are resident on the road? Mr. Boland is a resident on the road; and I think there is another up in the Eighteen-mile Hollow.

22 Feb., 1860.

65. In your opinion the system of contract is the best way of getting the repairs done to the roads? I believe it is; if the parties are bound to do the work they must complete it. I believe Mr. Boland is under a bond to complete the work he has contracted for; and if not done according to tender he will not be paid.

66. *By Mr. Hoskins*: I understand you to say the repairs are now let out by contract,—can you tell the Committee how many officials there are to superintend the work done in this way? I cannot.

67. *By Mr. Cummings*: I understand you to say that you have had a general knowledge of the Southern Road from having run upon it for several years? Yes.

68. And also a general knowledge of the Western Road for the last five or six years? Yes, I have.

69. From your general knowledge of both lines of road, then, do you think the same amount of money per mile expended upon each line of road would have the same good effect in putting the two roads in an equally substantial state of repair—or that if £20 per mile were to be expended upon the road from the bank of the Nepean to the east bank of the Macquarie, and the same amount per mile were expended upon the road from Campbelltown to Goulburn, there would be the same good effect upon the Bathurst Road as upon the Goulburn Road? Oh no, not in the present state of the two roads; one is in a bad state of repair, the other in a good state.

70. By your own experience on both lines of road are you aware that the Southern Road has, up to the present time, been kept in a much better state of repair than the Western? Yes; it was much better some time back, and is better now. A good deal of it is as level as this table.

71. *By the Chairman*: Then, from your own knowledge of both lines of road, there has been much more attention paid to the repairs of the southern line than to those of the western line? I can only speak of the Southern Road from my experience before the last five years; it was then in a good state; but the Western Road has been much improved since then.

72. What have been the improvements completed or undertaken, or in a state approaching completion, on the western line of road, from the Nepean to the Macquarie, during the last five years—with what materials has any attempt been made to repair that road, and on what portions of it? Along by the Green Swamp, and in various other places, holes have been filled up with small saplings and bushes, and some with clay dug out of the bank at Mount Lambie.

73. What has been the general state of the road from Hartley to Bathurst for the last five years, or since you have been a mail contractor on it—have any attempts been made to drain it, or is it rounded, or formed? It has never been what you call drained; they have turned the water off latterly, but they did not run it away. They fill up one hole, and then pass on to the next, and before they have done the road they have repaired gets bad again.

74. *By Mr. Cummings*: From your own knowledge of this road are you aware of it being frequently the case that teams are bogged in the public road, and, having to be dug out, leave large holes in the road? Yes; the Governor can answer for that.

75. *By Mr. Parkes*: Was the Governor bogged? No, he got out, and went on horseback. I have had a team of horses bogged between Penrith and Parramatta; and between Hartley and Bathurst I have seen five or six teams bogged, so that others could not go past or get up to the toll-bar.

76. *By Mr. Cummings*: From your general knowledge of those roads of the country which you have from time to time traversed, is it your opinion that the money so expended on the Bathurst line of road has been properly expended? I think the money for roads may be laid out to more advantage, and with greater advantage to the public at large, and more repairs done on the Bathurst, as well as on other lines of road.

77. Is it your opinion that the greater portion of the money has been actually wasted? The fact is, I consider that £500 or £700 has been almost thrown away.

78. Do you consider that the money expended in cutting and laying down green bushes, and filling up holes with sand and clay, is wasted in that way? I consider it just as much wasted as if thrown away. The first shower that comes washes the stuff away, and leaves the road as bad as ever.

79. Is it your opinion that if the Bathurst line of road was properly rounded, and drained so as to carry off the rain-water, it would be in a much better state of repair than at present? There is no question about that. I believe that if the Bathurst Road was in a good state of repair I could go from Bathurst to Penrith in twelve hours.

80. When what have been alluded to as “corduroy” roads were spoken of, I believe reference was made to portions of the road where small saplings have been cut three or four feet in length, and laid side by side, and the road then macadamised on both sides—have you seen portions of the road constructed on that principle? Yes; there is a piece on the other side of Penrith, by Mr. Boland’s.

81. The portions of the road to which I now allude are those where one-half of the width is made up of short saplings laid side by side, and the other half of the road for ten or fourteen feet on each side macadamised like that along by Little Hartley? There is a sort of plank road along by Little Hartley, with just room for a vehicle to pass over; and the other part of the road by the side is macadamised.

82. Is it your opinion that this is a proper process to be carried on in road-making? I think it would have been better if the road had been well rounded up in the middle, and no slabs laid down at all. As it is, you cannot get from one side to the other if you wish.

83. In travelling up and down this road, previous to the last twelve months, have you noticed what number of men were working on the roads, daily or weekly? I have seen three or four at King's Plains; two or three near Boland's; and four or five here and there at other places. Mr. R. Elliott.
22 Feb., 1860.

84. *By the Chairman:* With reference to your remark about the state of the Southern and Western Roads, you are of opinion, I understand you to say, that if both roads started on fair grounds—that is, if both were put into the same condition of repair that it would not afterwards require a greater expenditure per mile to keep the Bathurst Road in a passable state, than would be required for the same purpose on the southern line—if both were, in the first instance, put into the same state of repair? I believe that, if both started in the same state of repair, the Western Road would cost no more to keep it in good condition than the Southern Road would.

85. The same amount of expenditure would have the same effect upon both roads? I cannot exactly say that.

86. At present you are decidedly of opinion that the same amount of money expended upon both roads has a very different effect indeed? It would take £40 to do on the Bathurst Road what might be done on the Southern Road for £20.

87. *By Mr. Cummings:* From your general knowledge of the roads made on the mountain-way with logs, I understood you to say, that, after the roads had been repaired in that way, they could not be used? I do not travel over them by mail fifty times in sixteen or eighteen months, from the time they were first laid down.

88. Have you any knowledge what these log roads cost per yard? I have not.

89. *By the Chairman:* You are of opinion that on the Western Road there has been no regular system of road-making followed, but that it has been merely experimentalising? I think it has, in a great measure, been neglected in that way; it has been patched and repatched, and never kept in a good state. If there was a hole in the road at one place it would be filled up, and the men would then go a few miles further on to another. But where the road was really bad, and might be put in a good state by draining, they did not do it. There is not a quarter of a mile between Hartley and Bathurst over which you could safely trot at the rate of four miles an hour.

90. *By Mr. Clements:* Is there any difficulty in getting good metal on the road? There is plenty of good metal at Lapstone Hill, and at other places.

91. Between Hartley and Bathurst? Yes; I have seen good metal there.

92. Close to the road? Close to the road.

93. *By Mr. Cummings:* From your general knowledge, for the last five years, of the kind of repairs done to the mountain part of the Bathurst Road, is it your opinion, from the way in which the work has from time to time been performed, that the superintendents, or those having charge of the work, have the necessary ability for road-making? I cannot say.

94. *By Mr. Hoskins:* Do you not think that the nature of the soil between Hartley and Bathurst requires that more money should be expended to effect the same degree of improvement upon that road that would be required on the Southern Road? One is a mountainous, the other a flat country.

95. Even if in their primitive state you think that of the two roads the Western Road would require more expenditure for making it passable than the Southern Road? If nothing at all had been done to them I cannot tell. I cannot make an estimate of what the cost of either would be before it was laid out.

96. *By Mr. Cummings:* As to what they call ballasting the road—that is raising the road, say, either with logs or freestone—is it your opinion, from your knowledge of the country where you have seen it carried out, as at Springwood, that if the road was only properly rounded and drained there would be a great saving? There might be in some parts. At Springwood they were ballasting instead of logging.

97. Is it your opinion that a road of freestone and earth properly rounded and drained would answer the purpose, be much more solid, and last longer, indeed be of a more durable nature? I quite agree with the value of ballasting, and I would not do away with the logging. I think that for several miles of road there would be nothing to do but cut the timber, lay it down, and metal and drain it. Still I really believe that a road properly ballasted, metalled, and drained, would last as long as any.

98. *By the Chairman:* Is it your opinion that the state of the drainage along the whole line of road has been much neglected? It has been till latterly; but now they are taking up the plan of draining.

99. *By Mr. Clements:* Have you seen these timber or log roads answer anywhere? Well, I do not know that I have seen any portion of the roads logged except part of the Bathurst Road.

100. Has the logging been brought into use on the southern line? I think not. There may be places where logs are used on that road, but very rarely. I have seen it at Hanging Rock; and at Springwood the road has been logged for miles.

101. As a coach proprietor, do you approve of the system of logging, take it altogether? I do not approve of it, unless it is carried out properly, by laying the logs close together. I had a horse whose thigh bone was put out the other day by getting his leg into a hole between logs on the road where they had been laid too far apart.

102. *By the Chairman:* Have you any other information upon this subject that you can give the Committee in addition to the evidence you have already given? I have nothing else.

103. *By Mr. Clements:* As you have had a good deal of experience on the mountain road, I should like to know from you whether proper metal can be obtained on the road, or whether from the top of Lapstone Hill to Mount Victoria there is anything else but sandstone? There is plenty of sandstone, but there is other stone beside. There is a clear proof of this
from

Mr. R. Elliott, from the fact that a stone is now being brought on to the road which is neither sandstone or freestone.

22 Feb., 1860. 104. I should like to ascertain from you whether you have ever known log roads answer, and whether you can say that good metal can be obtained on the Western Road? I believe so. I would rather see a good metal road well rounded and drained.

105. You do not know from your own experience of the mountain road that metal can be obtained there; and you do not approve of log roads? I think the metal may be found there; and I believe that good roads may be made with logs properly laid and covered.

106. You believe that it is not necessary to use logs if good metal is obtainable? I think if good metal is used, and the road properly formed, nothing could be better; and I believe the metal can be obtained from the mountains. I have seen such miserable stuff put on the road to fill up holes that when a vehicle passed over a stone it would break like a goose egg. I have seen some repairs done by contract, however, with far superior stone.

107. You believe suitable metal can be obtained on the line? I do; plenty. There is good metal at the back of Boland's, and some could be found near Crooked Hill. If lapstones were broken they would make good road material, and there is plenty of that.

108. *By Mr. Egan:* Do you not think it advisable to use logs on roads to cross swamps before the road is crowned? It may make a good bottom; but the question is which would be the best and cheapest. Where there is a bog it may be desirable to use logs, and ballast it afterwards; that would make a very good road.

109. *By Mr. Cummings:* Have you observed on the mountain road patches of old road properly rounded and metalled with the same kind of metal that you are speaking of now, and which were metalled some years ago, before you were a contractor? About eight or ten yards at Eighteen-mile Hollow is part of the road made many years ago, and is still very good. It is well formed and properly rounded; and there is some beautiful metal there. I think if it was dug up at the Old Soldier's Pinch and put upon other parts of the road there would be some improvement.

110. *By the Chairman:* There is good metal at the Soldier's Pinch? Yes.

111. *By Mr. Hoskins:* Is it your opinion that the work on those portions of the road, the repair of which had been undertaken by contract, is more satisfactory than that done by day labor? It is.

Mr. Thomas Boland called in and examined:—

Mr. T. Boland. 112. *By the Chairman:* This is a Committee, Mr. Boland, to inquire into the condition, construction, and management of the Bathurst Road. How long have you been acquainted with what is called the Bathurst Road; that is, the road from the Nepean to Bathurst? About fourteen or fifteen years.

22 Feb., 1860.

113. Have you had many opportunities of seeing the condition of that road, the construction of such parts as have been repaired, and the way in which the repairs have been conducted? So far as this part of the road up to Penrith; I have travelled the other but very little.

114. How far from Penrith does your knowledge of the road extend? My place is about eleven miles from Penrith.

115. Have you any acquaintance with the road beyond your place of residence? I have.

116. For what distance? I have travelled all the way at different times, but not frequently or lately.

117. What is the present state of the road as far as you can say of your own knowledge? I believe it is in a very bad state from my knowledge of it; it certainly is not in a good state.

118. Has it become worse of late years? It has been better this last twelve months or two years than before.

119. Can you give the Committee any information as to the way in which the roads have been kept, or as to the way in which the money has been spent for the purpose of repairing them—or has it, in your opinion, been judiciously expended? From the time that Captain Scott had the management of the roads up to the time of the contracts the roads were not done well.

120. You say that lately there has been an improvement? Yes.

121. Do you speak as to the period since contracts for the repair of the line have been undertaken? I do.

122. Do you believe that the system of contracts is the best system? I think it is.

123. That is, as opposed to day labor? Yes, as opposed to day labor.

124. Are the contracts now taken up by parties on the road let out to more than one individual, to laboring men, or in what way? There is one contract taken up by a person at Lapstone Hill, and other contracts by different people towards Hartley.

125. Are the contractors called upon to enter into a bond for the due performance of the work? They are.

126. What length of road have you contracted for? Nearly 1,500 yards.

127. What is the price you tendered for? For £1 a yard, and wood bridges £8 10s.

128. What did you contract to do for £1 a yard? To ballast and raise the road with soft stone or gravel, and to put on two coats of road metal. The ballasting is to be of seven inches, the first coat of road metal to be five inches, the second three inches.

129. You state, I think, that you live about eleven miles from Penrith, at a place called Springwood? Yes.

130. Is there any difficulty there in obtaining road metal? Yes, a great deal.

131. At what distance from the road does it lie? Where we are now getting it is over two miles from the road. The place has been searched for metal and they could not get it, and we now go to a place where they never got it before.

132. Can you inform the Committee whether there are other portions of the mountain road where metal is accessible? I believe there are. Mr. T. Boland.
133. Where? About Black Hill, Pulpit Hill; but in no portion of the road so difficult as about Springwood. 22 Feb., 1860.
134. Do you know whether there is metal at Soldier's Pinch? I believe there is; I think there is metal all along the road.
135. *By Mr. Parkes*: What do you call the stone? Ironstone.
136. Is it durable? It is not the best, but it is the best that can be procured.
137. *By the Chairman*: Do you know the nature of the metal? I do.
138. Is it what is generally termed ironstone? There is iron mixed amongst a portion of the stone; the other stone is a sort of blue sandstone which we have to blast.
139. What stone do you call that? It is a kind of hard metal.
140. Bluestone? Yes.
141. Where is that obtainable? About a quarter of a mile from the roadside at Springwood.
142. As to the system of logging, Mr. Boland,—I think, as far as I have had an opportunity of judging, that portion of the road at Springwood is metalled on the logs? Yes.
143. That is on the logs laid down previously? Yes.
144. Do you find it practicable to make a good road upon the logs previously laid down by putting a large quantity of metal on the logs? Yes; they form a good foundation for the road; but if the logs had been adzed and put down close together it would have made a good road without metal, though it was very uneven at first.
145. On the shifting sands of the mountain road a logged foundation is advisable? I think so.
146. With metal on the top? Without metal, if gravel is put on, and if the timber could be conveniently obtained.
147. Have you had any acquaintance with the other main thoroughfares of the Colony? I have not.
148. You do not know, by comparison, what are the relative states of the two lines to the south and west? I do not.
149. What is the system now as regards contracts; what supervision is exercised over the contractors; and who is the party superintending? Mr. Dawson is principal superintendent, and there are overseers under him again.
150. Do you know how many overseers? One or two about the toll-gate and one or two about Hartley, besides the chief superintendent.
151. How often does he visit the work in course of construction? He has not been down for a month together; the measurement is usually done by his overseer; and he had been down about four or five times since I took the contract in October last.
152. *By Mr. Clements*: How often? Once a month.
153. *By the Chairman*: You believe that the system that has been followed up to the system of contracts has been a bad one? The system before was one of patching and a fallacy. The present mode, by contract, is the better way, because whoever contracts for the work will be looked to to carry it out.
154. *By Mr. Clements*: How often does the overseer visit the contract works? Almost every day.
155. Have you any idea of the expense of laying the timber before it was ballasted? I paid 4s. 6d. a yard for ballasting it first.
156. Are you aware of the cost of laying the road with logs, in the first instance? I think that at the time Captain Scott laid this road it cost about 8s. a yard for laying the logs.
157. Are you speaking of the piece of road which you afterwards contracted to metal? Yes.
158. It originally cost 8s. per yard for logging in addition to the 20s. per yard which you get now? Yes.
159. What is the highest price per yard, that you know of, any part of the Bathurst Road now costs? I do not know the price for the highest; it is beyond Hartley, and I think it is about 30s. per yard, because I understand they have to cut away a hill there.
160. Do you know the lowest contract? I think there are some portions of the repairs to the road being done at 14s. 6d., down at Black Hill, where the metal is more easily got.
161. Do you believe there is an abundance of road metal on the mountains fit for general purposes? I believe there is—close by the road.
162. In speaking of ironstone you mean some stone of a rusty color, or do you speak of it as knowing what is, by practical men, called ironstone? It is not stone equal to the metal down here, but there is a regular ironstone; you can see the iron it.
163. It is very good for road-making? Yes; if you can procure it at a reasonable distance.
164. Are you aware that a great deal of soft sandstone, under the term metal, has been used? I believe a great deal of sandstone has been used upon the road.
165. Has it been the invariable practice? Yes.
166. Up to the time the contracts were taken, was it not the invariable practice to put sandstone upon the road? Yes, sometime ago; they procured it near Springwood. I had to push further for better material.
167. If the superintendents had done their duty, could they not have procured better metal than they have put on the road? Yes. I think so.
168. At all events, you know there is plenty of good road metal to be obtained without going off the mountains? Yes; with the exception of one or two places.
169. Can you say that there are no places where it is so difficult to obtain metal as at Springwood, where you say you have to go two miles for it? Yes.
170. Do you consider that a good distance? Yes, taking into account the places where we have to get it from. I would sooner go five miles on the level road.
171. You say the surveyor of the roads visits them once a month? That is since October last. 172.

- Mr. T. Boland. 172. Do you consider that visits once a month to works of that kind is a sufficient supervision—is not a more diligent supervision necessary? It would be better if he was there oftener; but his overseer is just as well as him.
- 22 Feb., 1860. 173. You are the nearest contractor to Sydney? No.
174. Where is the nearest? About four miles from Penrith.
175. How near to Bathurst is the contractor in that direction; or from the place where the superintendent resides? The superintendent lives up at Bowenfels, about forty-two miles from my place.
176. Is there any contractor nearer to Bathurst? Yes.
177. I understand the road is contracted for from Bathurst down to Penrith? Yes, in portions.
178. *By Mr. Cummings*: Do I understand you to say that you can obtain the blue metal you are using for the road within half a mile of the road? Yes, that which I have blasted.
179. During the last three years, previous to your becoming a contractor, do you know what has been the character of the superintendence, or what were the respective duties of the superintendent and overseers—how often have you seen the superintendent inspecting the line previous to your becoming a Government contractor? I did not know him, except for a very short time before I became a contractor.
180. *By Mr. Clements*: You keep an inn on the road? Yes.
181. *By Mr. Cummings*: Have you, within the last three years, before becoming a Government contractor, known many men to be employed on that portion of the line of road about Springwood, doing any work in the shape of repairs? Yes; I have seen a good number employed about that portion of the road, about twelve months since.
182. Was that work done by contract? Partly by contract. The stones were quarried, drawn, and broken by contract.
183. During the time that work was being carried on, have you ever seen Mr. Dawson giving instructions or superintending the formation or repairs of the road? I believe he was there at times; but I was not acquainted with him.
184. From the repairs that you have seen performed from time to time, before contracts were entered into, what sort of materials do you know to have been used for filling up holes? There was a little portion of the road repaired last year, and some of it was logged; it was on this side of the valley. The logs were adzed and laid close together. Another portion of the road had been repaired with metal.
185. Was this work performed under the superintendence and inspection of an overseer or the superintendent of roads? Chiefly by the overseers.
186. Were there overseers at that time? Yes; I believe Mr. Corcoran was overseer at that time.
187. From your experience in the formation of roads, is it your opinion that the roads in and about Springwood, if properly rounded, without being logged or having freestone on them, but with sound earth well rounded and drained, would be more substantial, solid, and last longer than by logging and putting green wood and sand on them? I think the use of sandstone is a waste of public money. If we had good gravel it would be better to form the crown. If the wood was put close together it would be better.
188. How long would the wood last before it decays? A very little time; some of it is rotten now.
189. How long has this been laid? Six or seven years. Captain Scott, when superintendent, laid some of it down.
190. *By the Chairman*: Saplings? Portions of them were weighty logs.
191. *By Mr. Cummings*: Is it your opinion that if this road at Springwood, which has been logged at an expense of £1 1s. per yard, had been formed from each side with proper table and drainage, that it would have been a better and more substantial road, and that this would have been better than expending so much public money in logging and using freestone? I believe it would, unless they had the road entirely logged and done well.
192. Do you know the piece of plank road at Wascoe's, which was laid down in Captain Scott's time? Yes.
193. What is the nature of the soil there—is it sand or bog? There is a black soil in that place, which makes a good road itself.
194. Without stone or gravel? No; but a good road without planking.
195. From the time Captain Scott gave up the superintendence of the western line to the time when you became a contractor, what has been the sort of superintendence—or was it done by anybody? There has not been much done in that way. A few spots were repaired only about twelve months ago; there was then about 300 yards laid down in one part, and about 500 or 600 yards near that portion I have contracted for.
196. *By Mr. Hoskins*: Do you think there has been a want of system in conducting the repairs—that persons have not in any number been employed upon the worst parts of the road, but have been too much scattered—do you not think it would have been better to concentrate them in particular places where the road was in a bad state of repair? Yes, much better than having them divided; for unless you keep a person continually with them they will not do their duty.
197. You mean to say that some parts of the road are worse than others, and that there was a want of system in not having the services of the men, especially where they would be most valuable; that they had been scattered all over the road? Yes.
198. *By Mr. Egan*: You say you are a contractor, and get so much per yard? Yes.
199. Are you not bound to complete the contract within a certain time? I think there is some clause of that kind in the specification.
200. You are not aware that you are bound to finish what you have contracted for within

- a specified time? I think there is some clause in the specification, that some portion of the work named by the superintendent is to be done monthly. Mr. T. Boland.
201. Have you signed any specification of the contract you have obtained? No. 22 Feb., 1860.
202. *By Mr. Cummings:* You are to do so many yards per week or per month, but you have not signed to that effect? No. It is in the power of the Commissioner to take the contract out of my hands if he thinks I do not get on with the work.
203. You could employ two men or twenty men, just as you please? I should lose the contract if I did not carry it on to the satisfaction of the Commissioner. I am bound in a clause of the specification to carry it on according to the manner in which the Commissioner desires.
204. There is no specified time for completing it? No.
205. *By Mr. Clements:* Do you understand when you are to finish these 1,500 yards you have contracted for? I am allowed 200 yards to each month.
206. *By Mr. Cummings:* Have you signed a written paper to that effect? No.
207. *By Mr. Hoskins:* There is no agreement as to the number of men to be kept employed on the work under the contract? No.
208. *By Mr. Cummings:* Do you know there are any more men employed under contract on the main road, besides the number of men you employ yourself? I do.
209. How many? About ten or twelve at Lapstone Hill.
210. Under the same contract? Yes.
211. *By Mr. Egan:* How many do you employ yourself? About thirty.
212. Employed daily upon the work you contracted for? Not all; some of them are working by contract in drawing and breaking stone.
213. How long have you had your contract? Since October last.
214. For how many yards? About 1,450.
215. *By the Chairman:* Is that finished? No.
216. How much of it is done? I cannot say; there is a great deal of metal ready for turning out, and there is about 700 nearly finished, with the exception of 250 yards at which a little remains to be done.
217. *By Mr. Hoskins:* From whom do you take the contracts? From the Government, by tender.
218. You lodge the contract with the Commissioner for Public Works? Yes.
219. *By Mr. Clements:* I understand you to say you have thirty men employed on the average? I have that number now.
220. What has been the average? I have sometimes had fifteen, sometimes twenty, but he kept pressing me for the work, and I have now put thirty men on it, and I had four or five carts. On coming down to Sydney I took up a lot of men, and employed more carts upon the work.
221. *By Mr. Hoskins:* You do not know how many overseers there are on the western line? No.
222. *By Mr. Egan:* Is there one to each contractor? No. I think one overseer has from Hartley to Lapstone Hill.
223. He superintends all employed in that district? Yes. His name is Corcoran.
224. *By the Chairman:* What is the amount of bond entered into for the due performance of the contract? One-tenth of the amount.
225. Deducted from the payments? Yes.

FRIDAY, 24 FEBRUARY, 1860.

Present:—

MR. CLEMENTS, | MR. CUMMINGS,
MR. PARKES.

THOMAS JARMAN HAWKINS, ESQ., IN THE CHAIR.

Mr. William Green called in and examined:—

226. *By the Chairman:* What are you? Sergeant of the Gold Escort. Mr. W. Green.
227. Have you been long acquainted with the Bathurst road? Since 1851.
228. Have you travelled it frequently? I have been up and down it once a fortnight ever since, except a year and ten months. 24 Feb., 1860.
229. What is the present state of that road? Well, it is in middling order now to what I have seen it.
230. Which is the part most out of repair, that between Bathurst and Hartley, or between Hartley and Penrith? Between Hartley and Penrith is the worst.
231. That is what is called the mountain road? Yes.
232. Is not that in a very bad state? It is.
233. Are there many men employed upon it? I do not see many, we travel so much at night.
234. You believe there are men employed upon it? There are some men.
235. But you do not know how many? No, I cannot say.
236. Have you had any experience on any of the other roads in the country? Not lately; I was for a time on the Goulburn Road, but I am five years off it now.

- Mr. W. Green. 237. Have you any knowledge of the management of this road,—do you know any thing of the way in which the superintendence of it is conducted? Well, for some time I was used to making roads myself at home, and I often said, from the way I saw the men making this road, that they did not know how to do it.
238. Where have you been accustomed to road-making? In Ireland.
239. What is your opinion of the way in which the mountain road and the other parts of the Western Road have been repaired? For the last twelve months I have seen it being done the way I should say it was done right, but not before.
240. That is the new system? Yes.
241. What part of the road are you alluding to when you say it is better managed than it was before? The Penrith Road from Hartley to Penrith, and the road from Hartley to Bathurst.
242. Is the system different from what it was? Quite different.
243. What is the system now? They are draining the road, and putting stone on it in place of timber and clay, which they did before.
244. The work is done by contract now, is it not? I heard it was done by contract.
245. Do you think the system of contract is a good one? I do.
246. Better than employing day-laborers? Far better, in my opinion.
247. From what you have seen of the road before this last system has been adopted, do you believe that within the last three years, we will say, it has been repaired in a very inefficient and bad way? Indeed it was.
248. Did there seem to be any regular system followed? There was no regular system; it seemed to me that they were trying experiments on the road, for they laid out money quite uselessly.
249. You believe that, from the nature of these experiments, there was a very great waste of public money? Yes. I heard it was day-work, and there were men working there that I consider never made a road before.
250. Then you think money was wasted on account of the way in which the men were employed, and also the system that was pursued? I do.
251. Until within the last twelve months? Until within the last twelve months, or it may be more.
252. *By Mr. Clements:* Do you know under whose management the roads were, previous to the present contract system? I heard it was Mr. Dawson, but I never saw him more than twice on the road.
253. You know him if you see him? Yes.
254. Do you know under whose management the roads are now? I do not.
255. You do not know whether Mr. Dawson is still the superintendent? I do not.
256. Do you believe he is? I cannot say—I did not hear.
257. Do you believe Mr. Dawson has the management of them still? I cannot say whether he has or not. I have not seen Mr. Dawson on the road these six or eight months until I met him the last time I came down, between Penrith and Hartley.
258. Since the alteration has been made in the system of repairing the roads, that is, since contracts have been taken, you say there has been great improvement? Yes, great improvement.
259. In what way—with regard to drainage? Yes, with regard to draining, and rising the road, and making regular shores and culverts instead of the former ones; there were a dozen culverts made on Mount Lambic which were filled full of sand before they had been there a month—the first shower of rain filled them up level with sand. I have seen the men at one culvert from the time I passed by coming to Sydney till I came back again.
260. With what material are the holes filled up now? They level them first with soft stones, and then over that they put hard metal.
261. Some time ago, I believe, it was usual for the men to fill them up merely with earth and clay? Yes. They tried another plan—they made one-half the road with short junks of wood, and the other half with stone and clay.
262. How did that answer? The first heavy team that came on the ends of these logs raised them up, and made big holes in the road.
263. That system is abandoned now? Yes. There was only about a hundred yards made that way.
264. On the whole, the present management is much better? The present management is fifty to one better than it was; they are just making the roads now the same as they make them at Home.
265. Do you recollect how long it is since the change took place? I think about twelve months.
266. Do you know what persons there are under Mr. Dawson on the road? I know one man that used to be under Mr. Dawson; he has more men now, but I do not know their names.
267. You do not know how many overseers there are? No.
268. *By Mr. Cummings:* If I understood you rightly, you have had a knowledge of the Bathurst line of road for the last five or six years? Yes; five years.
269. As sergeant of the gold guard? Yes.
270. You have been in the habit of travelling over that line of road once a fortnight for that time? Yes.
271. Before the late improvements were commenced, what material was used in making repairs on that line of road—stone, wood, sand, or clay? In some places wood, what they call the corduroy road; in other places, nothing but clay; and other places, soft stone. That was the old way, until within the last twelve months.
272. Have you, during that time, frequently seen that road in an impassable state, with teams after teams bogged in the centre and at the sides of the road? Indeed I have, many a time.

273. So that they have been compelled to be dug out? Yes; we would have to go a mile *Mr. W. Green.* out of the road through the bush.
274. Is it your opinion that the money expended in filling up the holes, previous to the *24 Feb., 1860.* present improvements, has been to a very great extent wasted until within the last twelve months? It is. I have known wood to be drawn on to the road to make the road, and to be left there without being used until it has disappeared; whether it was taken away for firewood or not I do not know.
275. Do you allude to large trees or small trees? Middling trees.
276. After they had been drawn to the side of the road, did they remain there for any length of time before they disappeared? Yes, nearly twelve months.
277. That is a work that must be performed at some expense? Yes. I understood the men to say they were to make a corduroy road of it across the bridge at the foot of Mount Victoria. The trees have disappeared; but what was done with them I cannot say. Either this side of Mount Victoria or the other there were hundreds of loads of wood, and I do not see half of them there at the present time.
278. They must have been brought there at very large expense? Indeed they were, for they had to get them a good distance in the bush.
279. During the last five years, from the impassable state of the road, how long have you known bullock teams to be detained on the journey between Bathurst and Sydney, and between Sydney and Bathurst? Three weeks—a month—six weeks. I have often seen six, seven, or eight teams broke down between Penrith and Hartley alone, and we could not go on the road at all for eleven miles.
280. You found you could go better through the bush? Yes. We have had to make three or four bridges on one journey; we took an axe and a spade and went a road a coach never went before.
281. You know Superintendent Dawson? Yes.
282. And I understood you to say that though you have been up and down that road for five years you never saw him but twice or three times? I have never seen him more than three times in the last three years. Last Wednesday fortnight I saw him the last time, riding up the mountains.
283. You are thoroughly acquainted with what is called Mount Lambie? Yes.
284. Do you know the new cut that goes around through the bush by Greenhatch's? Yes.
285. In wet weather and soft weather what sort of a tract is that? Very bad; in wet weather it is not as good a road as the other to come, though sometimes there are such holes in Mount Lambie, and there is such a fall on one side that it is more dangerous. I would rather come over the hill than go Greenhatch's road.
286. Which of the two roads is the shortest and best and the easiest to put in thorough repair? In my opinion over the mountain is the best road. We are going over the mountain now these last six months.
287. Do you know of your own knowledge, or from representations made to you, if there is one deputy overseer or more on the line of road from Hassan's Walls to Bathurst, besides Mr. Dawson? Yes; there are three or four.
288. Although there is not to your knowledge a daily or weekly man employed on the road now? I understand it is done by contract.
289. *By Mr. Clements:* Do I understand you to say there are overseers paid by Government on that line of road now? I cannot say as to that; I cannot say whether they are paid by Government or by the contractors—but there are overseers.
290. *By Mr. Cummings:* From your knowledge of road-making in the Mother Country and your general knowledge of the roads here, do you believe there was a great want of ability in the authorities that had the management of the mountain road for the last three or four or five years previous to the present contracts? Previous to the present contracts I considered the money laid out on this road was a regular waste of money, and I even told the men who were working on it so.
291. Are you aware whether there is plenty of road metal to be obtained at reasonable distances along the line of road from Hartley to the edge of Bathurst Plains, or to Green Swamp? Plenty; they are getting good metal now in sight of the road.
292. And on the side of the road? Yes.
293. Is it your opinion that the want of drainage and properly rounding the roads has been one of the great causes of the mountain road being so very bad? That is the very thing I consider makes it so bad; they do not drain it properly, nor rise the road properly. In some parts of the road that they made formerly, the centre used to be the hollow and the rise at each side.
294. Have you seen the water, from the hollow state of the road, remain there until absorbed into the earth, because it could not run off? I have, frequently.
295. Is it your opinion that it would be preferable to ballast the centre of the road with the earth taken out of the water-tables and out of sufficient drains, the road being well rounded, instead of drawing for the purpose soft freestone, or wood, which must eventually rot away in a few years? I consider it would be the best—that the more stuff they take away from the sides of the road the more they will cause drainage. It is better than wood. There is not a bit of stuff taken away from the side of the road but it forms a place for drawing away the water.
296. Even through the bogs and soft country at home, the roads have been rounded from earth taken out of the water-tables? Yes.
297. There is no wood drawn in that soft country to ballast the roads, but they are rounded from the mother earth taken out of the drains and water-tables? Yes, I have known at home

Mr. W. Green: home places so soft that you could not walk in them, and by drainage they have made them good hard roads.

- 24 Feb., 1860. 298. *By the Chairman*: Have you observed a quantity of metal lying on the side of the road, in various places, for a long while, that has been broken and not used? Yes.
299. Can you say why that metal is left there unused after so much money has been expended in bringing it? I cannot, though I often spoke about it.
300. Large quantities of metal have been lying unused while the road was in an almost impassable state? Yes.
301. *By Mr. Clements*: The holes being filled up with clay at the same time? Yes.
302. *By the Chairman*: You have had experience of road-making at home? Yes.
303. Would you not say that, in making the line of road from the Nepean to Bathurst, under the system of contracts, a general superintendent with one overseer would be sufficient to watch the work,—or what number would you say would be sufficient under the system of contract? I should say one man could do it.
304. One man could watch the contracts? One man could watch the contracts. It does not require to be watched like day-work. One man could do it from Pentith to Bathurst.
305. Do you believe or do you know that there are several men employed in the superintendence of the contracts? I believe there are several people employed.
306. Then you would say that, under the system of contract, a general Government Superintendent, with one man under him, would be amply sufficient to watch the contracts on the part of the Government? Yes, quite sufficient.
307. *By Mr. Clements*: This metal that has been spoken of was broken at the time when the whole of the line of road was being repaired by day-labor by the Government? Yes.
308. And overseers paid by Government inspected the work at the time? Yes.
309. Mr. Dawson was then inspector? Yes; and there was a man under him as overseer, named Francesco Gilloupa, or some name like that, an Italian.
310. Is that the man that has now a contract on a portion of the road? Yes.
311. Then the stone which lay so long on the side of the road, broken but not used, was prepared when that man was overseer? Yes.
312. Is that stone now there? I think some of that stone has been taken since for some of these contracts, but I will not say so positively.
313. Do you not, since the contracts, in several places miss heaps of stone that you have seen lay there a long time? Yes.
314. Is that stone removed for any other purpose besides repairing the Bathurst Road? I cannot see anywhere else it should be removed to.
315. You know of no improvements or repairs that are being made by private individuals? No, I do not.
316. But the stone is not now to be seen? No; it is taken away, but not put upon the road.
317. *By Mr. Cummings*: Do you recollect a large pile of broken stone lying between Redbank and Diamond Swamp? I do.
318. That was broken by contract at some fixed price between Mr. Dawson and the parties who broke it? I know of that large heap of stone being broken there.
319. Do you know what has become of that large heap of stone? No.
320. Are you aware that that large heap of stone was broken when the men were employed by Government? I cannot answer that—I cannot say for a certainty.
321. That stone was broken and lying in a heap for a long time before the present contract for the repairs of the road at Redbank had been taken, or attempted to be performed? I believe so; I believe the stone was broken there before anything was done with Redbank Hill; the contract might have been taken before that, but I cannot say. I have seen several heaps of stone as well as that.
322. Broken by weekly men? Broken in the time of the day-work.
323. Has all that disappeared? Very nearly; I know I remarked that a great deal of it was disappearing.
324. I understood you to say that notwithstanding these stones had been previously drawn and thrown down in heaps, and left there month after month, the holes in the road were filled up with clay? Yes.
325. Do you know what has become of these particular heaps of stone drawn at these great gulches where people have to turn into the bush on account of the badness of the road? I cannot tell.
326. Do you know the gap at Hassan's Walls, which is now under repair? Yes.
327. You have known it for the last five years? For the last nine years.
328. Was it in the power of Superintendent Dawson, who lived within a mile or a mile and a-half of that gap —? More than that.
329. Say three or four miles? About four miles.
330. From the impassable state of that gap, was it not necessary to cut a new line of road at a very large expense, and to make some bridges, so as to get by Hassan's Walls at all? Yes, we did not go round there for eight months.
331. This new line of road, with the bridges or viaducts laid down upon it to make it passable, must it not have cost a great amount of money? Yes, it must; the men were working on it for a long time.
332. Daily or weekly men? Yes.
333. It is useless now? Yes.
334. Was it in the power of the superintendent, for two or three years previous to that expense, to repair that gap in the same way in which he is repairing it now? If they had laid out the money upon the main road that was laid out on that back road it would have made it a great deal better than what the road was that was made. Though the road was bad,

bad, it was not bad all round; it was only spots that were bad; and in place of that they ^{Mr. W. Green.} made this road all round.

335. What length is that new cut that is now shut up and not used—what length do you ^{24 Feb., 1860.} suppose it to be from where it turned off the main road until it came out on the main road again at Hassan's Walls? I think it is a good mile.

336. Is it your opinion that that was a complete waste of money? I do consider it nothing else. It is in private hands now.

337. Going through private property? Yes.

338. It is fenced off? Yes.

339. The repairs to that gap could have been done as well three years ago as they are now? Indeed they could.

340. There was nothing to prevent the same repairs? Nothing.

341. *By Mr. Clements*: So far as you know? So far as I know, of course.

342. Did you ever hear a report that there was a connection between the superintendent of the road and the Italian contractor, with regard to horses and carts? Well, I did hear it.

343. You heard a rumour? Yes.

344. To what effect? I heard by two or three that they went regular halves.

345. *By the Chairman*: Divided the spoil? Yes, that he would apply for these contracts and Mr. Dawson would give them to him.

346. *By Mr. Parkes*: You say you heard from two or three persons? Yes.

347. Persons of what character? First, I heard it from the coachman on the road, and then I heard it from other people; I heard a publican on the road mention something about it.

348. *By Mr. Cummings*: Did one fact connected with the matter come under your notice, that, during the time this Italian was in the public service as overseer, his own or Mr. Dawson's horses and carts were employed daily in the public works at so much per day? I heard so, but I could not say whether it was the fact.

349. You have heard it as a general report? Yes.

350. *By Mr. Parkes*: Have you personally any knowledge of facts that would give consistency to these rumours? No, I have not.

351. Regarding this road as the Queen's highway and as a principal thoroughfare for passenger traffic, are there not places where, from the precipitous nature of the sides of the road, there is great danger to the traffic for want of fences? Indeed there are; I could mention several places.

352. Are there not places on this road where from the slightest divergence on the part of the horses the mail would be precipitated down the embankment? Yes, on several places two coaches could not pass.

353. Will you endeavor to describe those places as far as you recollect them? I can describe a good many of them. I will commence first with King's Table Land there is a dangerous place; also the bridge going over the Weatherboard cannot be worse.

354. Might not the slightest circumstance, the slightest cause of fright to the horses, cause the destruction of the whole of the passengers at that bridge? Indeed it would.

355. For want of a very trifling expense in the erection of a fence? Yes. If a pole-chain should break, as it often does, the thing we do is to lay into the wheelers, give the leaders the whip, and go at full speed down the hill. There is a dangerous place at Elliston's Toll-bar, and another at Seventeen-mile Hollow—I think that is the very worst. Going down Pulpit Hill is as dangerous a place as ever the bridge was. Soldier's Pinch then is a very dangerous place. There are several places besides that I do not know the names of; but these are places that are very dangerous. The top of Mount Victoria is a dangerous place; also going into what they call Big Hartley; then the bridge at Solitary Creek is dangerous; and Mount Lambie, all round the curve.

356. You think it necessary that a fence should be put on Mount Lambie on the side where the declivity is? Yes, a very strong fence.

357. Do you recollect a very serious accident which occurred on Mount Victoria when all the mail horses were killed and one or two of the passengers? Yes.

358. Do you recollect also an accident which occurred when the horses were frightened by the lightning? No; I was at Braidwood at that time.

259. How long have you been in the Colony? About ten years.

360. Have you ever heard that a horse team fell over Lapstone Hill? Yes.

361. Was it since you have been sergeant of the gold guard that the coach and horses went over at Mount Victoria for want of a fence? I was not on that road then; I had been gone about a month.

362. *By Mr. Clements*: Did not Sergeant Graves get his leg broken at another time near the same place? Down a little lower.

363. *By Mr. Parkes*: Will you proceed to mention any other dangerous places that occur to you? The next place beyond Mount Lambie is the Frying-pan Hut; that is a very bad place.

364. Do you consider it necessary to have strong fences put up at all these places? Yes.

365. Is the danger at all these places of this character—that the safety of the mail entirely depends upon the skilful driving of the coachman; and in the event of insobriety or inattention on the part of the coachman, nothing would save a very serious accident? That is true; nothing could prevent them going over at any of these places.

366. *By Mr. Clements*: If I understand you rightly, the places that strike you as being the most dangerous are these:—Elliston's Toll-bar, King's Table Land, the Weatherboard Bridge, Pulpit Hill, Soldier's Pinch, the top of Mount Victoria, going into Hartley and out of Hartley, Solitary Creek Bridge, Mount Lambie, and Frying-pan Hut? Yes.

Thomas Brown, Esq., called in and examined:—

- T. Brown,
Esq.
24 Feb., 1860.
367. *By the Chairman*: You are a resident at Hartley? Yes, I have been so for the last twenty years.
368. Are you well acquainted with the Bathurst Road, from the Nepean to Bathurst? I am pretty well acquainted with it. I had charge of it for some time under former Governments.
369. What in your opinion is the present state and condition of that road? It is very bad. I can scarcely compare it to anything but the bed of a canal partly dried up.
370. Will you enumerate some of the worst places on the road, beginning with the mountain road? In some places it is almost impassable, particularly after rain. When I came down on Wednesday last it was up to the horse's belly almost in nothing but mud and slush in many places.
371. Will you enumerate some of these places? There are one or two places about Springwood that are very bad, and then again before you get to Eighteen-mile Hollow, round some of those sharp curves, where Captain Bull used to have his station—there is a place there almost impassable. Then on both sides of Pulpit Hill it is very bad. I did not see the Soldier's Pinch, because, being on horseback, I came the short way; indeed, I avoided all the worst places I could. Beyond Hartley, I have not seen the road for a long time.
372. You are more acquainted with the mountain road? Yes. The neighborhood of Hassan's Walls has been a place dangerous to pass for years.
373. Have you any knowledge of the construction of roads? Yes; I have had a little experience both in the old country and in this country.
374. What is your opinion as to the way in which the money has been expended in repairs on the mountain road? It has been wasted, I consider, as far as my judgment goes, making by-roads where there was no occasion for them.
375. Does it seem to you that any regular system of road-making has been adopted and followed up? Not till lately. They have been just trying experiments and wasting the money. Lately there have been some few contracts let.
376. Within what period has there been an improvement? I see considerable improvement in the last six months, since the few contracts have been let.
377. Will you inform the Committee in what way you believe the system, until the contracts were entered into, was bad, and in what way the money was wasted? Instead of making proper repairs on the old road, short cuts were taken, making by-roads, as they said, preliminary to great improvements on the present line; and as much money was expended on these by-roads as would have made the main road good. I have seen stone broken and culverts made on by-roads which would have made the main road good—round Hassan's Walls, for instance.
378. When you speak of experimental road-making, you mean by that that several different systems appear to have been attempted? Yes. In some places they made one-half of the road of wood and the other half of stone.
379. Are you aware in what way the general superintendence of the road, on the part of the Government, is managed—the number of superintendents, and the number under them, Government employées? I believe there are three under ones and the head one between Bathurst and Penrith. I think there is Drew next to Bathurst, Hanley at Bathurst, and Quodling (the brother of the sergeant of the Sappers and Miners) at the lower end.
380. What do you call these men—overseers? Overseers they are called.
381. And Mr. Dawson is the general superintendent over the whole? Yes.
382. Then there are three overseers and the superintendent? Yes.
383. Would you consider that, under the system of contract, so many superintendents and overseers on the part of the Government are necessary? Not at all; the person at the head of the department could examine it all himself by being often enough on the road.
384. Now that the contract system is in operation? Yes. If it is not going too far I may mention an instance of what I saw coming down. In some of the heaps of broken stone which had been measured, they had packed large stones in the middle, and these stones were afterwards taken out and carted away to another place where they would be broken, measured again, and paid for a second time.
385. You saw that on your way down? It was pointed out to me. I mention that to shew that the work is not properly inspected when done. I intended to have told Captain Martindale of it.
386. These large stones were packed in the middle of the heaps? Yes; and covered with small stones.
387. Which made the heaps larger of course? Yes.
388. Are you aware whether in the mountains good metal for the roads is obtainable within a reasonable distance of the road? I think it is very fair metal; it is a sort of mixture of ironstone, and would stand very well if properly put on. The great drawback to the road is, that they leave it too long without attending to fill up the holes.
389. Has bad material been used when good material was obtainable? In some places it has; at Hassan's Walls in particular, sandstone has been used when metal was within reach.
390. Do you believe that the Government superintendence of the road is not only very expensive at present but very faulty? I do.
391. *By Mr. Clements*: It is usual, I believe, when stone is prepared for the road, to have the place where it is deposited before being measured, squared and the heaps of a certain depth? Yes, and the ground should be level.
392. And before that stone is allowed to be used, it should be subject to inspection by a Government overseer? Yes.
393. If he did his duty, would it be possible for the imposition you have alluded to, to be practised?

practised? I think not; I think by cutting through the heap in various directions as they ought to do, that would be found out.

394. That ought to be an invariable rule? Yes; either they should do that or attend a second time when the heap is spread.

395. Do you think that the superintendent and one overseer, if they did their duty, could not attend to the whole of that road under the present contract system? I think the superintendent ought to do it alone.

396. *By Mr. Cummings:* I understood you to say you had some experience of road-making in the Mother Country as well as in New South Wales? Yes.

397. What has been, in your opinion, the great cause of our Western Road being so very bad and all but impassable,—is it the want of drainage and properly rounding the road? To a great extent it is. The principal thing to begin with is the want of competent people in charge; we never have had a competent person in charge of our road.

398. The want of drainage and proper formation of the road by rounding it you consider to be one of the great defects? Yes; when once it is properly rounded the water keeps off, and even a clay road will then last a long time.

399. From your knowledge of the road and the nature of the earth, or mixed earth and gravel, as the case may be, is it your opinion that, if the road was properly rounded and drained, even without metalling or macadamising, it would last for years? There are portions of the road that would do that.

400. Is it your opinion, that if the road was properly rounded from the earth or gravel, as the case may be, taken out of the water-tables, and properly drained, that it would be more substantial than ballasting the road with freestone and wood? In some places it would. I do not think I would ballast it with freestone at all.

401. Previous to the present contract system being entered into, is it your opinion that the money used for repairs of the road has been wasted to a very great extent? To a very great extent.

402. Is it your opinion that the gentleman who has charge of the road is a fit and competent person, and thoroughly up to his employment as a roadmaker? From what we see he has not proved himself such.

403. Do you know an Italian who was formerly an overseer on the road, but is now a contractor? Yes; we used to call him Mr. Dawson's aide-de-camp.

404. Do you know his name? Francesco we call him at Hartley.

405. Did you know him as a deputy superintendent of roads under Mr. Dawson? We considered him as such.

406. Has it come to your knowledge that during the time Francesco was a Government servant, as overseer under Mr. Dawson, his carts and horses were employed by the day or week, as the case might be, working on the public road? I cannot answer that question. Mr. Dawson and I are not very friendly, and I never had ———

407. Have you ever known Mr. Dawson's horses and carts to be employed on the road? Not to speak with certainty; I have heard such a report.

408. Do you consider it a waste of public money to employ so many overseers under Mr. Dawson while the work is performed by public contract? I think so; I think the superintendent ought to examine all the contracts himself.

409. I understood you to say that on your way down you found the mountain road almost impassable at various places? I did; particularly at Eighteen-mile Hollow; it is almost impossible for a team to get through.

410. And from your own knowledge you are aware that moderately good metal is obtainable within reasonable distances? I think so; there may be some particular spots where it would have to be drawn a few miles.

411. *By Mr. Parkes:* Supposing £50,000 were placed at your disposal for the repair of this road, in what way should you proceed, as a practical man, in the reformation of the road? £50,000 would not do much.

412. Suppose that sum—proceeding on the basis of that sum? I would repair the worst places on the road, and leave a man in charge every two or three miles to keep these in repair, as far as £50,000 would go. It would take £150,000 to make the Bathurst Road good.

413. I was desirous of ascertaining in what manner you would repair these places—would you repair them in the same way as the repairs are done now—for instance, would you form the road with clay or gravel, or ballast it with sandstone before putting on the metal? In some places I would form up the road with clay, but there are other spots where I would put on metal, because I think it would be folly to put on clay where metal could be obtained.

414. Should you proceed on any plan involving a radical change from the method in which the road is repaired at the present time? In all the soft boggy places I would first cover the road with large stones, perhaps nearly a foot square, and then break smaller stones and put them on the top; the large stones would prevent the small ones from being swallowed up in the mud, and would also drain the road. I believe a road made in that way would last for twenty years. It wants something as drainage.

415. My object is to elicit your opinion as to how the road could be best put in a good state of repair. I will put another question hypothetically. Suppose you were commissioned to put the road in a good state of repair without regard to expense, how would you proceed? I would macadamise it where I could get the stone, laying the foundation of large stones, as I have just said, and putting smaller stones over that again.

416. Would you adopt the present track from the Nepean to the Macquarie, or make any divergences from it? I do not think I would make any, without a very large sum was voted to carry them out.

T. Brown,
Esq.

24 Feb., 1860.

- T. Brown,
Esq.
24 Feb., 1860.
417. You would adopt the old line of road? Yes, generally. There are places where I would diverge a little.
418. Would you attempt to level any part of the road? No, I think I would keep the present road. There are places where an improvement could be made, but it would require a much larger sum of money than we could expect.
419. Speaking without regard to expense? I would follow the present line of road in most places.
420. You would adopt it not only as to track but also as to levels—you would simply remake the road and proceed on the ordinary system of macadamising? Yes, where it could be done.
421. Then, in your opinion, all that is wanted is, that the road should be macadamised? Yes.
422. Have you ever considered the question of a tramway across the mountains to Bathurst? No; I have never had any experience in tramways.
423. Have you ever heard anything about the plank roads in America? Yes, I have travelled over them.
424. Have you ever thought that a mode of construction like the plank road in America would be suitable for the mountains? If it could be made it would be, but it could only be done at very great expense; we have not such timber in the mountains as they have alongside the roads in America. The short piece they tried on the mountains did not answer very well.
425. I do not think that was on the American plan? Not quite.
426. *By the Chairman*: You mean the piece near Wascoe's? Yes.
427. *By Mr. Parkes*: You say you have travelled on the American roads? Yes.
428. Are not the planks laid longitudinally there? Yes.
429. In the instance you mention the pieces were laid crossways? Yes.
430. Are you an advocate for a railway to Bathurst? Yes.
431. Do you expect to get one very soon? I hope so.
432. Do you really think a railway will be carried through the mountains in any reasonable time? I cannot say. I am afraid Parliament will not grant the money.
433. You must have seriously considered the probability of railway communication with Bathurst, your own interest being wrapped in that question—has it appeared to you that you have a right to expect a railroad within the next several years? I do look forward to it.
434. Do you think you will get it—do you feel confident about it? It can be made if we can get the money.
435. What I want to elicit is, whether you, as representing a part of the Western District, expect to see your desire realised within the next few years? I must say I do feel a good deal of confidence in having a railway to Bathurst; but at the same time good roads are necessary, besides the railway, to carry the produce.
436. The road would not be of much use after the railroad was made? Not on the Blue Mountains, but after you leave the Blue Mountains it would.
437. Supposing it takes £150,000 to put the main thoroughfare in good order, as I understood you to say it would do, it would be not only a folly, but beyond the means of the Colony to vote that sum if at the same time we were voting money for a railway? I would not recommend that money to be expended now, until we see whether we are to have a railway. It depends so much on Parliament.
438. *By the Chairman*: There are many places where the main road has to be abandoned for the bush in consequence of its bad state? Yes, a great many places. Being on horse-back coming down I did not see so many of them, but the mail has to leave the road in a great many places.
439. Are you acquainted with a cut which avoids Mount Lambie, going round by Greenhatch's? I have travelled round that.
440. Have you formed any opinion as to whether it is desirable to expend a large sum of money on that new cut in preference to the Mount Lambie line? No, I would keep the old road.
441. *By Mr. Parkes*: The road by Greenhatch's is certainly over a much more level country? Yes, but a much more rotten country, where it would be very expensive to make the road.
442. *By Mr. Clements*: Do you think that in the first instance that would have been the preferable line? Yes, decidedly so.
443. If you had to remake the two, would you not prefer constructing that road in preference to the road over Mount Lambie? Yes, decidedly.
444. Do you know anything of the Fish River, from Hartley to Bathurst? I do not know much of that country; I never travelled to Bathurst that way.
445. *By Mr. Parkes*: I should infer from what you have said that you think carrying the road over Mount Lambie was a great engineering mistake? Yes.
446. *By Mr. Cummings*: You know what they call the Gap at the Red Waterhole? Yes, at the Yellow Waterhole.
447. Is that at present being repaired? Yes.
448. It has been impassable for some length of time? For nearly four years it has been almost impassable in wet weather.
449. Are you acquainted with the new cut that was made to avoid that some two or three years ago? Yes.
450. Has that new cut cost a large amount of money? I should say as much as would have put the other in thorough repair. I have seen a great many men working on it for a length of time.
451. That new cut is now abandoned? The other is not quite finished; but it is partly abandoned now, and as soon as the contract is finished it will be abandoned altogether.

452. Then as soon as the Gap is completely repaired, the money expended on the new cut will be a dead loss? Yes. T. Brown, Esq.
453. Had the superintendent a full opportunity of getting that piece of road repaired previous to that great expense being incurred on that new line of road;—would not a portion of the money laid out in the formation of the new line of road have repaired the old line of road? Yes, I believe it would have done so. It was already formed and only wanted water-tables properly sunk, and metal put on the road. 24 Feb., 1860.
454. Had the money been expended, in the first instance, in the repair of that portion of the road from the Gap to the Yellow Waterhole, would not the cost of the new cut have been saved to the public? I consider so.
455. You think that was completely lost? All that was put on the by-road was.
456. *By Mr. Parkes*: There are some places on the road where it is absolutely necessary that fences should be placed along the declivities to prevent danger, in case of fright to the horses, or other accident? Yes, several places.
457. Where by slight inattention on the part of the driver, or by sudden fright to the horses, the mail or any other carriage would be upset and all or nearly all the passengers killed? Yes; I have heard of accidents of the kind.
458. *By Mr. Clements*: Are not these some of the places where such fences are required:—Elliston's Bar, King's Table Land, Weatherboard Bridge, Pulpit Hill, Soldier's Pinch, the top of Mount Victoria, the hill coming down to Hartley, and going out of Hartley again? Yes; a man was killed when the coach upset there not very long ago.
459. Then the Solitary Creek Bridge, part of Mount Lambie, and Frying-pan Hut? Yes.
460. *By Mr. Parkes*: You consider that at all the places just named strong fences are absolutely required to guard against fatal and calamitous accidents? Yes; it would be a great security to life and property. Two or three accidents have happened already.

Mr. Patrick McGarry called in and examined:—

461. *By Mr. Cummings*: Where do you reside? At Hartley. Mr. Patrick McGarry.
462. Have you any knowledge of road-making? Yes. 24 Feb., 1860.
463. In any other country besides this, or did you receive all your information of road-making in this country? In this country I received what information I have of road-making.
464. Are you acquainted with the line of road from Hartley to the Nepean River? Yes.
465. Are you also acquainted with that portion of the road from Hartley to Bathurst? Yes.
466. How long have you been acquainted with it? Twenty-four years.
467. In what state is that portion of the line of road from Hartley to the Nepean River at the present time? Well, from the Toll-bar to Mount Victoria—to Springwood in particular, it is in a very bad state; in fact, the most part of it, from what I have seen coming down, is more like a creek than a road; there is no formation of the road at all, and it is a complete quagmire in places.
468. Does it appear to you that a proper system of road-making has been carried on on that line of road for these last few years, or at any time that you have been acquainted with it—say the last six or seven years? For the last six months I very much approve of it.
469. What is your opinion respecting the system pursued for the last six or seven years, up to the time of the present contract system being adopted? I consider that the repairs have never been carried on in a satisfactory manner up to that time; too many different plans have been adopted, and what was approved of to-day would be condemned a day or two after. I have had an opportunity of observing, for I have been a considerable time a working overseer on the roads, close on four years; I have been under Mr. Andrew Brown, under Captain Scott, and under Mr. Dawson.
470. What, in your opinion, is the bad state of the road traceable to—is it to the want of proper formation and the want of drainage? The chief fault is, I think, the want of drainage. I have seen the road a deal higher where the water-table should be than in the centre. In other places, work that has been done has been all removed again; in fact I have been employed myself with a party of men in that way, at a place where a great sum of money had been expended, on Soldier's Pinch—where Captain Bull constructed the road formerly. Logs were placed on the road at certain distances, and between these logs was filled in with sand from the road side, and the first heavy rain washed it all away. When Captain Martindale was going up, about two years ago, both ends of this road were stopped up, and I was sent with a party of men to take the logs all away again into the bush.
471. By whose orders was that work performed? By Mr. Dawson's order. It was done by a lot of Italians, I believe.
472. Where that sand was being put on to level the road was metal obtainable? Plenty, on the roadside.
473. Had the metal been brought on to the roadside at the public expense? No, it was not brought on to the roadside; but it was to be obtained on the roadside.
474. And at that particular spot Captain Martindale ordered you and a party of men —? No, no. This road was stopped at both ends when Captain Martindale was coming. It appeared to me as if they did not wish Captain Martindale to see it. The clay was all washed away, and the logs stood on the road—not on Old Soldier's Pinch, but what they call the Second Soldier's Pinch. Two parties were sent there and had it levelled to make it passable before Captain Martindale came up; and this other road was completely stopped up.
475. *By Mr. Clements*: Do you mean that it was the New Soldier's Pinch that was stopped up? Yes. It had been levelled with logs and sand; the logs within about a rod of each other

- Mr. Patrick M'Garry.
- 24 Feb., 1860.
- other and the space between filled in with sand; and when the rain came it washed the sand away.
476. *By Mr. Cummings*: After drawing the logs on to the road you were sent with a party of men to draw them away again? Yes. It was not Mr. Dawson that told me to do so; he placed me under the supervision of a man they called Francesco.
477. Was he an overseer too? He was overseer over me.
478. And Mr. Dawson over him? I do not know how that was.
479. Was Mr. Dawson at that time superintendent? Yes.
480. You were acting as assistant overseer, under the instructions of Francisco, when you took these logs away? Yes.
481. Do you know at whose instance those repairs were first made? I should say it was by Mr. Dawson's orders, for it was in his time the repairs were done. I never knew any logs laid that way on the road before Mr. Dawson came.
482. Did that appear to you to be an experimental process of road-making? Yes. I am satisfied it was experimentalising; it was nothing else.
483. Am I to understand that the money so expended was completely lost to the public? Yes, I consider the road was a good deal better before the logs were put on it. I could compare the road to nothing else, when we took the logs off, but nice little beds in a garden, marked out by the places where they had been lying.
484. How long altogether were you assistant overseer on the Hartley road? Very nearly four years—not four years all out, but very near I think.
485. Is it your opinion, from your knowledge of road-making, that the present system of ballasting the road with sandstone and logs in many places is a proper system—or would it be a better system to round the road from the earth taken out of the water-tables, and make sufficient drainage to carry the water off the roads? Owing to the nature of the materials on the road, there are places where the stuff out of the water-tables would do a great deal of harm; but with anything of granite or even stiff clay, I think it would be far superior to sandstone.
486. Is it your opinion, from what you have seen, that the present superintendent possesses the necessary ability and knowledge of road-making to enable him to carry on the repairs required on the road? No, according to my opinion he is not capable of carrying the roads out; he has no certain system of doing it—what he would tell me to do to-day he would condemn to-morrow, and what he would condemn one day he would tell me to do again the next. He has told me to make three roads in one—a track made of logs on each side, and a clay road in the centre for summer traffic.
487. Three different tracks? Yes, an eight-foot road going up and eight-foot road coming down, of logs; and not to allow the centre to be worked on at all in winter, but to keep it for a summer road. On a very bad part of the road he has ordered me, where there was a very deep hole, to clean it out and make it a foot deeper and wider than it was; if it was only four feet deep I was to make it six, and if it was two feet deep I was to make it three, and to cut the hole square, so as to get all the bad stuff out of the bottom, then I was to fill the hole in again within a certain distance of the surface, about eighteen inches, and then get good big heavy logs and get them rammed in with two men and a heavy rammer, into the hole, and put clay on to the top; then, to convey the water away from this hole in the centre of the road, I had to dig a small drain on each side and fill it with boughs of trees made into faggots that the water might ooze from the hole; I gave him my opinion that the first heavy dray that would come would sink down through this little bit of a drain, and that the boughs would be of no use; and he seemed to be very angry with me for saying so. This was between the two Hartleys, at a time when the road was in very bad condition.
488. *By Mr. Parkes*: Was this method adopted in other instances? No, I never did it at other places.
489. That was an experiment? Yes, I suppose it was.
490. *By the Chairman*: Did you do much in that way? No, I commenced that, and then I was stopped in order to do it another way.
491. *By Mr. Parkes*: I think you have said already that there was no system whatever pursued in repairing the road during your experience, but that it was done first one way and then another? There was no system that I could see that was carried on for any length of time; nearly every week there was a different way.
492. You say repairs were done in some instances, and then undone again? Yes.
493. *By Mr. Cummings*: You know Hassan's Walls? I do.
494. You know what they call the Red or Yellow Waterhole in the Gap? Yes.
495. Have you any knowledge of a new piece of road that has been made there two or three years ago to avoid that bad piece of road in the Gap? Yes.
496. Do you know of your own knowledge the time that road was commenced to be made—the new road? Well, I think about last winter it was three years.
497. Had the present superintendent and overseers an opportunity, previous to the making of that new road, to repair the old road that is now undergoing repair? Yes, they had, and they commenced to repair it, and left it and went to open a bridge; they did some work at the bridge, and bought a deal of logs, and the logs lie there still—or they did the last time I was there. They marked out the bridge across the road, and cut a drain a long way down the bush to convey the water. I have not been up there for twelve months, but the last time I was there I saw the logs there.
498. Had they never been used? No.
499. How long ago is that? They must have been there two years the last time I saw them.
500. Could the expense of making that new cut have been avoided by repairing the old road

road which is now undergoing thorough repair? Yes, if the old road had been repaired there would have been no necessity for the bottom road.

501. Have you any idea what the expenses might be of making that new cut? I could have no idea what it has cost. I know there was men working on it, but I could be no judge of what their work was to come to. They were all foreigners that were working there.

502. Is it your opinion that the general system of repairs that has been carried on for the last three or four years, previous to the present contracts being entered into, was such as should have been adopted by a man or men who thoroughly understood their work? No, I do not think so.

503. Do you know this man Francisco? Yes.

504. At the time that man was overseer over you, did it come within your knowledge that his or Mr. Dawson's carts and horses were ever employed on the public works? I know that man had a good many horses—three at one time—but whether they belonged to him or Mr. Dawson I do not know.

505. *By Mr. Parkes:* This Committee has been appointed to consider the condition, management, and best mode of repairing the Western Road. As you have been employed upon it as overseer, and appear to have directed your attention very particularly to this road, and to have a good knowledge of road-making, would you state deliberately your opinion about it in your own way, as to the state of the road—whether the money has been wastefully or prudently expended; and when you have done that, state what, in your opinion, is requisite to put the road in a good state, economically on the part of the Government, and substantially on the part of the public? Two years last winter Mr. Dawson got a great number of logs drawn out between the foot of Mount Lambie and Jones' public-house. Those on Mount Lambie must have cost a great deal of money, and I am sure not one log was of use, but the bullock-drivers from that day have been making firewood of them. I have known Mr. Dawson to employ a lot of Italians to dig a great drain on Mr. Beattie's ground at Little Hartley; and before the drain was dug he drew a deal of logs and laid down a great row of them; then he put a foot or eighteen inches of sand on the top of them, and another row of logs on the top of that, and then more sand; and then he set fire to them and burnt the logs for charcoal. I have also known him to have a party on Mount Lambie a considerable time, and after that party left he sent me with another party and a horse and cart, and what the first party did we threw all off again. We cut drains across the road, if the road was ever so good before, that I am satisfied were enough to stop any team; we cut five foot logs and buried them in these drains, and the first rain that would come the logs would become a complete shotch, and the clay and stuff would pour from each side of the logs until a man could scarcely draw his load out of it at all.

506. *By Mr. Clements:* Were those what were called the open culverts? Yes.

507. *By Mr. Parkes:* Have you ever heard the men employed there pass their opinion as to the value of these works? Each culvert was valued at £5.

508. I mean have you ever heard the men employed on the road passing their opinion as to whether these plans of road-making were judicious? I always heard every man condemn them, and never one approve them.

509. *By the Chairman:* Was it a common topic of conversation among the parties employed—the conduct of Mr. Dawson and the way in which he made these roads? Yes, it was; every person I ever heard speaking of it condemned it.

510. *By Mr. Parkes:* You consider that the expenditure on this road has been a very wasteful expenditure? Yes; I conceive that what we did one week was often a deal worse the week after than it was before it was touched.

511. What plan would you advise to put the road in a good state of repair? To raise the centre of the road well, open good tables, and keep plenty of outlet for the water, and to keep good metal on the road.

512. Can good metal be procured on the mountains? Not to say very good metal.

513. Other witnesses have stated that good metal can be got—a stone they describe as ironstone? There is a crust of ironstone on it, but it is generally sandstone; it grinds away very quick.

514. Have you anything else to add, as to the best mode of constructing the road? I do not know of any other thing.

515. The road is in a very bad state now? Yes.

516. And you consider the present management very bad? I do not know about the present management. What is doing now I consider to be very well done.

517. That is by contract? Yes.

518. *By the Chairman:* You believe that since the present contracts have been entered into, the way in which the road is repaired is much better? Yes, the road repaired lately looks very well. I have not seen many of the contracts, only from Hartley to Penrith.

519. *By Mr. Parkes:* You do not think any improvement is necessary in the way the work is done by contract? None that I could point out.

520. *By Mr. Cummings:* How many overseers were employed under Mr. Dawson on the Bathurst Road, while you were there? Four besides me.

521. And how many men were employed weekly or monthly? Some overseers he allowed very few men to; he never allowed me more than five or six men.

522. In general there were very few men? The last time he sent me on the road he sent me without tools, and I had to get what tools I could myself.

523. But you got your wages? Yes, of course.

524. *By Mr. Clements:* Whether you worked or not? Yes, of course. I found the men in tools myself, because I had had contracts on the road, and on that account I had tools of my own. I was only about four months under Mr. Dawson after he first came on the road, and

- Mr. Patrick McGarry. I left, and about eighteen months after he asked me if I would return, and I did so for about two months; it was between the time I was on the road at first, and the time I went on again, that I had contracts.
- 24 Feb., 1860. 525. Do you know how many overseers are on the road now? Three,—Quodling, Hanley, and Drew.
526. Do you think as many as three are necessary under the contract system? I do not think they are.
527. *By the Chairman*: Do you think the superintendent could do it all? I think he could about Hartley.
528. *By Mr. Clements*: It is usual when stone is broken by contract to have it measured? Yes.
529. How is it done? The stones are broken in heaps on the roadside, and the heaps are measured.
530. In what way are they measured? The length, and breadth, and height of the heaps are taken.
531. Are the heaps of any particular shape? They are generally squared; they may be longer than they are broad; but they are squared at the corners.
532. Is there any possibility of fraud, or do you know of any fraud having taken place in the measurement? No.
533. Do you know of any unbroken stone having been paid for as broken? No, I had not an opportunity of seeing them putting the metal out.
534. Have you, sometime ago, seen heaps of broken stone lie for a long time by the road side unused? Yes.
535. During the time that stone was there, how were the holes in the road filled up? They were all at that time filled up with clay. The broken stones lay on the road side till the drays used to work them down the hill, and the floods took away the chief part of them.
536. Are any of these heaps to be seen since the contract system has been entered into? I have not seen any of them lately. Whatever has been put on the road was put on twelve months ago.
537. You have missed them all? Yes.
538. Were they used before the contract system were entered into? Yes, I think they were.

Mr. Joseph Collett called in and examined:—

- Mr. J. Collett. 539. *By the Chairman*: You reside at Hartley? Yes.
- 24 Feb., 1860. 540. Are you well acquainted with the Bathurst Road? Yes; I ought to be, after living on it thirty-five years.
541. Will you, as shortly as you can, give your opinion as to the present state of the road, and the way in which it has been managed and constructed for the last three years? I think the road has been done very badly, and that some hundreds of pounds have been wasted on it. I do not call it making a road at all, except what is just being made now.
542. In what way has the money been wasted? In cutting timber and leaving it on the road side, and breaking stone and not putting it on the road. Some tons and tons of stones have been wasted and ground to pieces alongside the road; there is a lot at Mount Victoria, and at several other places; they drew it along the road, broke it, and left it there to waste.
543. You believe there has been great waste of public money? I do.
544. This is under the superintendence of Mr. Dawson, principally? I believe it is.
545. Do you believe there has been any general system of road-making followed? Not till lately.
546. There has been a great deal of experimentalising? Yes.
547. And waste of money in trying useless plans? Yes.
548. Do you know, from your own experience, that many of these plans are perfect failures? Yes. Even those culverts they put in they had to take up in two or three months afterwards; in place of being covered over, as they should be, they would break a dray to go into them; I have seen them with as much as eighteen inches or two feet of a fall in the centre.
549. What they would do one month they would undo in a month or two? Yes.
550. Do you approve of the system of contracts? Yes; for I think it is the best, if carried out right.
551. Do you believe good metal to be obtainable on the mountain road? On the chief part of the mountain road it is; there may be here and there a place where they would have to draw it some distance.
552. Do you think the stone to be thus obtained is preferable to the system of logging, in the way Mr. Dawson has carried it out? I do; there is an experiment at our own door—one side is logged and the other stoned, and I see the stone wearing out the logs; the road where the stone is is far superior to that where the logs are.
553. Has the draining been attended to? Yes, just along there.
554. I mean generally? I cannot say; there has been but very little drainage done on the mountains. I have not had much occasion to go on the Bathurst Road this last year or two, but when I was up about three months ago it was in a very bad state then.
555. Can you give the Committee any information as to the number of superintendents that would be necessary now that the contracts are in operation? I think one man ought to do it; if you give him a fair salary I think he would be quite capable of inspecting the whole road.
556. *By Mr. Clements*: To whom do you allude? Any competent man would be quite capable of fulfilling the work.

557. *By the Chairman*: Do you believe, from your knowledge of Mr. Dawson, that he possesses the requisite ability for road-making? I cannot say whether he does, but from his acting I should say he does not. Mr. J. Collett.
24 Feb., 1860.

558. Judging from the work? Yes, from what I see.

559. What is your opinion of the present condition of the Bathurst Road from Bathurst to the Nepean? It is in a very bad state; I never saw it worse than it was when I was there.

560. And you also believe that the system of management pursued by Mr. Dawson has been very bad? I do.

561. And that under his management there has been very great waste of public money? Yes, enormous waste of it—money that would make miles of a good road; there has been hundreds of pounds' worth of timber drawn that has not been used; they paid the teams £1 a day for drawing it; on Mount Victoria alone there was £30 or £40 worth, and it has all been burnt in a bush fire.

562. *By Mr. Clements*: They paid teams £1 a day for drawing the timber—? Yes, independent of the cost of cutting it; I know a man that did it.

563. Are you aware that for a considerable time large quantities of broken stone were placed by the side of the road in heaps? Yes, it was broken there and ground to pieces on the side of the road, and never put on the road at all.

564. Are you aware, at the time the stone was there, with what material the holes in the road were being filled up? I do not know that they were filled up at all.

565. I refer more to the road between Bathurst and Hartley,—have you seen the holes there filled up with anything while the stone was there? No, I never did.

566. *By Mr. Cummings*: Has it come to your knowledge that there has been a large outlay in laying logs and piling earth on the top of those logs, for the purpose of burning earth to macadamise that part of the road, by the instructions of Mr. Dawson? Yes, I believe there was a lot done.

567. Did you see an open kiln at Little Hartley? I did; I asked a man who was there what they were doing, and he said they were burning it to put on the road. I saw them burning it and putting it on the railroad here.

568. Did you ever know that stuff to be used? No; it never was used; it lies there to this day.

569. *By Mr. Clements*: Have you any idea what that cost? No; there were some men working there between a week and a fortnight.

570. Do you think it advisable that any superintendent of roads should have the power of experimentalising in this way, or that there should be a general system of road-making followed? I think there ought to be a general system.

571. From your observation do you think Mr. Dawson had any general system? No, I do not think he had.

WEDNESDAY, 29 FEBRUARY, 1860.

Present:—

MR. CLEMENTS,
MR. CUMMINGS,

MR. PARKES,
MR. WISDOM.

THOMAS JARMAN HAWKINS, ESQ., IN THE CHAIR.

Captain Ben Hay Martindale, R.E., Commissioner of Internal Communication, called in and examined:—

572. *By the Chairman*: You are aware that this Committee has been appointed to inquire into the present condition and construction of the Western Road from the Nepean to the Macquarie River at Bathurst? I am. Captain B. H.
Martindale,
R. E.
29 Feb., 1860.

573. You have had frequent opportunities I suppose of examining that road? Between Penrith and Bathurst I have; I have been to Wellington once.

574. What is the state of that portion of the road at present? The state of the road between Penrith and Bathurst is bad. It is, however, being very considerably improved under the present contract system. I may refer the Committee to my Third Report on Internal Communication, pages 14 and 15, for a report upon the Western Road.

575. During what length of time have you had occasion to supervise that road? The road from Penrith to Bathurst was placed under my charge about August, 1857, but it was not till October, 1858, that I had an opportunity of inspecting it. The remainder of the Western Road was placed under my charge in June, 1858, shortly after the passing of the Main Roads Management Act, under which I was appointed Commissioner for Roads.

576. What has been the system of repairing the road pursued during the time you have had the supervision? The system of repair previous to my inspection in October, 1858, was to a great extent day work, and small contracts made on the spot by the road superintendent. On my inspection I was dissatisfied with the working of that system, and at once directed that, until a general system of road management could be established, task work should be substituted for day-work. In the commencement of 1859, the sanction of the Government was obtained to a general system of road management, and that has since been in operation with very good results.

- Captain B. H. Martindale, R. E.
29 Feb., 1860.
577. Will you inform the Committee why you were dissatisfied—was it from the way in which the work was performed, or the system pursued, or was it from the defective superintendence? I was dissatisfied because, in the first place, while I had the responsibility in Sydney, and the nominal control, I had, under the system of day-labor, no practical control. I was dissatisfied, next, because it is most difficult, all but impracticable, to keep a check upon scattered works of the nature of road-making in patches, conducted by day-labor; and the condition of the road itself was so miserable, that I felt that the result of the system of day-labor was not satisfactory.
578. You have not exactly answered one of the questions I put, as to the superintendence—had you any cause to be dissatisfied with the way in which that was carried out? Do you mean with the man or with the system?
579. With the supervision by the Government officers—had you reason to be dissatisfied with the way in which that was carried out? I attached more importance to the system than to the supervision. I do not think it is possible for a staff of three men, over a distance of some hundred miles—or, I believe, then 180 miles, for the Mudgee Road was included—to maintain effective superintendence over day-labor. I have always laid this down as a principle, that the superintendent should be a practical scientific man; but the greatest difficulty is found in obtaining men of that class at the salaries which are given in this Colony; and as regards the quality of the superintendence I was more dissatisfied on that ground than for any personal reasons—reasons I mean applying to the men themselves, who were conducting the superintendence.
580. Was it in the power of the superintendent of the road himself to experimentalise, and upon his own plans to endeavor to carry out those experiments? It certainly was in his power under day-labor; but I am not aware that any experiments have been conducted since I took office. A small portion of plank road was tried, but that was tried with my special sanction.
581. Have you observed on many portions of the road a system of partial logging and partial macadamising? I have. I believe that was all done previous to my arrival in the Colony. I believe the major part of the logging was done previous to Mr. Dawson becoming superintendent.
582. You believe there has been a very great improvement since the system of contracts has been in operation? Yes, I am sure of it. I went over the Bathurst Road in January last, and, from reports which I had heard previously to going up, I certainly went with the idea that I should have occasion to find considerable fault; I was agreeably surprised, however, with the character of the work which I then saw. I think the contracts that have been taken under the votes of 1859, are being very well executed.
583. Since the system of contracts has been pursued, are not the duties of the Government officers much lightened—you stated some time since that you thought the staff was not sufficient under the system of day-labor? Yes.
584. Well, under the system of contracts is there not much less duty? I think the present staff is but adequate to the duties it has to perform.
585. Even now? Even now. Perhaps the Committee would allow me to state how the road is divided. The district from Penrith to Bathurst is divided into three divisions:—the first division extends from Penrith to Mount Victoria; the second division from Mount Victoria to the River Cox; and the third division from the Cox to Bathurst. On the first and third divisions there are overseers; on the intermediate division, where the superintendent himself resides (he resides at Bowenfels) there is no overseer, but while any large works are in progress, he is allowed the help of a ganger to see the work done. The Committee will therefore see, that in the whole distance there are but one superintendent and two overseers employed, with the occasional help of a ganger.
586. What is the salary of the superintendent? The superintendent receives £500 a year, and £100 for travelling allowances. The overseers receive £200 a year; and one 4s. a day in lieu of forage allowance, and the other 3s. a day in lieu of forage allowance.
587. Have you yourself had any reason to be dissatisfied with the way in which Mr. Dawson has conducted the superintendence of the line—do you approve of his management? I do not think that, under the day-work system, the road works were well carried out; but under the present system they are being well carried out by Mr. Dawson, under instructions from the head office.
588. I wish to confine my question more to the day-work? I was not satisfied with the road when I went over it in 1858.
589. Will you inform the Committee in what respect you were most dissatisfied? It appeared to me there were considerable numbers of men employed, and that being employed in day-labor there was no efficient check upon them.
590. Are you aware whether any particular system, or a variety of systems, was carried out, or attempted to be carried out, by the superintendent himself, or under his direction? The only variety that I am aware of is that some few pieces of plank road were tried by Mr. Dawson, of different scantlings and construction; and sometimes along the metal road frameworks of wood were inserted, to keep the metal in its place. I am not aware of any more experiments than these having been tried by Mr. Dawson.
591. Are you of opinion that the money voted by the Government for the repairs of that portion of the road of which we are speaking, was judiciously and economically expended, up to the introduction of the system of contracts? Not having seen the road till 1858, immediately after which the contract system was practically introduced, I am unable to say; that is to say, I cannot tell what amount of improvement was effected upon the road for the money.
592. *By Mr. Clements:* Was it because you were dissatisfied with the appearance of the road that

that you were induced to alter the system? The main thing that induced me to alter the system was this, that a considerable number of men were employed on day-labor, and necessarily there was no efficient check upon them.

593. Then it was more for the sake of bringing the men within proper supervision than for the sake of repairing the road? It was in order that I myself might submit to the Government precisely what works should be done, and that I might be able at any time to ascertain that the works ordered had been done. Under the present system, which I will explain to the Committee, if they think fit, they will see that there is in the head office an absolute check upon the work. Under the present system, after the votes have passed the Assembly, the Commissioner submits to the Minister a statement of the manner in which he proposes to expend the votes. Presuming the Minister to sanction the expenditure proposed, specifications and estimates are prepared for the different works to be carried out. These specifications were for the first year prepared in the head office; they are now prepared by the road superintendents, and revised in the head office. On a plan of the road all the works to be executed during the year are marked down and numbered to correspond with the number of the contract to be called for for each particular work. Tenders are then invited for the performance of these works; and, as a rule, the lowest tender is accepted. When the work commences two marks are made upon the road, or rather upon a tree or rock alongside the road—one where the contract commences, and the other where it leaves off. The result of this system is that any officer from the head office can at any time ascertain whether a contract has been properly carried out or not. That is the general system now in force; and the Committee will here see the different plans and the system upon which they are marked. (*Plans produced.*) These are the forms in which the accounts are transmitted to the head office, which will exhibit the checks established upon the accounts. (*Forms produced.*) One is simply a form upon which is entered in detail every fortnight the whole amount of work done in the district; and the other is an account which accompanies it.

Captain B. H.
Martindale,
R. E.

29 Feb., 1860.

594. *By the Chairman:* With reference to the construction of the road, what, in your opinion, is the best mode of proceeding? Do you mean generally?

595. Yes? The best mode, in my opinion, would be to take at once such a sum as would make it a good road. I believe the present system of comparatively small votes to be necessarily an extravagant system. I have only to qualify that opinion by one remark,—that the amount of expenditure should depend upon the probability, or improbability, of the immediate construction of a railroad. The Committee will of course see, without my going further into the matter, why.

596. You are acquainted, I take it, with the other main roads of the country—the Northern and Southern? I am.

597. As compared with those roads, what is the state of the Bathurst Road? I consider the road from Penrith to Bathurst the worst main road in the Colony.

598. I believe there is a certain sum voted per mile, to be expended on all the main lines of road? There is £50 per mile voted, and special votes for special places also.

599. Do you believe that a sum of money per mile, expended on the Western Road, will have the same beneficial effects as the same amount per mile expended on the other roads? £50 a mile will, I think, go farthest on the Northern Road; next on the Southern; and last on the Mountain Road.

600. *By Mr. Cummings:* Have you had practical knowledge of the construction and formation of roads? I have.

601. In the Mother Country? In foreign countries, and in the Mother Country also. I have been almost for the last seventeen years engaged in public works of every description.

602. From your general knowledge of the formation of roads in this country as well as other countries, do you think the formation of the Bathurst Road has been performed or carried out with that general knowledge that such a work requires? Under the present system I believe nothing can be better than the way in which the road is being formed,—that is to say, the small portions of the road for which contracts have been entered into.

603. My question is general. Since you have had charge of the roads in New South Wales, up to the time of the present contracts being entered into, is it your opinion that a proper system of constructing and forming the Western Road has been carried out? The only regularly formed road that I saw when I went over the Western Road in 1858, was that which I believe was formed some years ago by prison labor. The remainder of the road appeared to me to have been allowed to go entirely to ruin, and the money spent upon it to have been employed in an endeavor to keep the traffic open in the worst places. That was what struck me as being the general state of the road from the Hawkesbury to Bathurst, when I went over it in 1858.

604. You have been over the road since then? Frequently, and I think at present a marked improvement is going on.

605. It is admitted that those few yards of macadamising—although I am very sorry to say the work has not been done in the workmanlike manner that I think it ought to have been, for the roads are even now too flat, the water-tables not deep enough, and the roads not round enough? Perhaps the Committee will allow me to say that scarcely one of the contracts is yet completed. First a layer of ballast is put on, then one coat of metal, and afterwards a second coat of metal; and although I do not know at this moment what the state of the contracts is, I know that when I went up in January last, in no case, except in one or two small places, had the second coat been put on; and as the Committee are aware much of the rounding is done in putting on the metal.

606. With reference to the repairs, if I can so call them, that have been performed on the Bathurst Road, previous to the present contracts being entered into, is it your opinion that the money

Captain B. H.
Martindale,
R. E.
29 Feb., 1860.

money has been very extravagantly used, all but wasted? I have already said that not having seen the Bathurst Road before October, 1858, I am not in a position to say what effect the money previously expended had upon that road. From the time I did see that road, I am of opinion that as far as the money has been voted for the purpose it has been well expended. Since October, 1858, I see a marked improvement, considering the means available.

607. On your route in 1858 or 1859 did you carefully inspect the road? Yes.

608. Did you observe large heaps of stone lying alongside the road, near large holes in the centre of the road? At Mount Lambie, and at some other places, there is stone.

609. Have you seen the holes filled up with common clay when the stone was in heaps alongside the road? I should wish to explain to the Committee that I have had a report from Mr. Dawson on the subject of those heaps of metal.

610. *By the Chairman*: Did it arise from any remark of yours? It arose from a remark of mine. In consequence of a rumour that heaps of metal were lying about unused, I called upon Mr. Dawson for a statement of what metal belonging to the Government there was along the road; and if any of that metal had not been used, why not. Mr. Dawson has sent me in a report in reply to that, which I can read to the Committee if they think fit, and which may probably be appended to my evidence. (*The witness read the report referred to. Vide Appendix*)

611. *By Mr. Cummings*: Have you inspected the proposed new cut to avoid Mount Lambie, for which I see there is a sum of £1,000 on the estimates? I have.

612. Considering the dreadful state of the Bathurst Road, and the small amount of funds available for its repair, is it your opinion that it is sound economy to attempt this new cut? It is.

613. For what reason? Because I think it is contrary to every principle to drag the traffic up such a hill as Mount Lambie in order to drag it down again.

614. What amount in your opinion would it take to make a permanent road around this new cut, over such a dreadful boggy country—marches that are impassable eight months out of the twelve if there is a shower of rain? I am not at present prepared to say what will be the entire amount.

615. Will £1,000 do more than merely clear the bush and wood off this new cut? It will—much more.

616. Will it make anything like a permanent road? I believe it will make a passable road of it.

617. In wet weather? I believe so.

618. If half that £1,000 were laid out in thoroughly repairing Mount Lambie, what difference is there in the elevation between getting up the main ridge on this new cut and the low land at Mount Lambie? I am not aware at this moment what the difference is; I know it is very considerable; but £500 would not at all repair the Mount Lambie Road.

619. I allude now to the flat portion of country at the foot of Mount Lambie East, taking the elevation from that flat ground to the top of Mount Lambie—the top of the present road, as used—and taking the elevation of the new cut from the flat land east of the range? I presume your object is that I should inform the Committee what height would be saved by going round instead of over Mount Lambie?

620. That entirely depends from where the elevation might be taken. We know Mount Lambie, if it is taken from Solitary Creek, is much higher? We will take the points of divergence for starting points at each end; it is the fairest thing to do.

621. I beg leave to differ with you there; of course I am in duty bound to bow to your greater experience, and I most willingly do so, but there is a gradual ascent and descent till you go to the foot of Mount Lambie East? If you will allow me to point it out to you, the only way to take it is to take the diversion at each end and compare the difference of levels attained on each line. We can only make a comparison by taking the levels from fixed points of that kind.

622. Well we will leave that;—have you ever travelled over the new cut in wet weather? Not in wet weather; it was dry when I rode over it.

623. In dry weather it is a good road, but in wet weather it is impassable—you could not ride a saddle-horse over it? I know parts of it are. I may say I have been informed by several persons, at different times, that the road is naturally a good road in all weathers, except in certain parts, where the ground is low and wet.

624. We will turn to Mount Lambie West. Now, with respect to the stone drawn and laid down there, that you have seen yourself at the bottom of the hill at Mount Lambie West, can you say, from your own knowledge, what has become of that stone? When I went up in January last I saw on Mount Lambie a considerable quantity of broken metal, and I then asked Mr. Dawson, whom I met at Bathurst, why that metal had not been used, and his reply was what he has now given in his report which I have just read. I did then express an opinion that, seeing that some time must elapse before the diversion was opened, some portion of that stone should be used in filling up some of the worst holes on the road, but I gave him no decided order to that effect.

625. Are you aware what length of time those stones had been lying there? I am not aware.

626. Is it your opinion, from your general knowledge of the formation of roads, that there are great portions of the Bathurst Road which could be made good from the natural mixture of ironstone gravel and common gravel to be found in the soil of the road itself, if properly formed and drained? There are parts of the road between Mount Victoria and Bathurst where you come on decomposed granite, which might be used as ballast, and would make a very good road with proper drainage. The remainder of the line needs macadamising, or some substitute for macadamising.

627. Is it your opinion that rounding the road from the sound earth that is taken out of the water-tables, and proper drains, would not be more substantial than ballasting the road, or attempting to round it with sandstone or freestone? A great part of the Western Road is sandstone rock cut into gullies by water and traffic; it is necessary to fill these gullies up with something, and the best available material I know of is freestone or sandstone, above which should be placed as good metal as can be obtained—and the best on the mountain is not good—some considerable parts of the road are loose sand.
628. You know that piece of road contracted for by Mr. Boland, at Springwood? I do. It has been a log road, and is now being converted into a metal road.
629. Portions of it? Nearly the whole is contracted for.
630. It is not all logged? No.
631. Over that sound yellow clay country, mixed with a portion of ironstone gravel, do you think it is necessary or beneficial to the construction of the roads to have them ballasted with freestone or sandstone? I can hardly answer your question; for I am not aware how much of that road (if any) is sound clay, and having ballast put upon it. I could not say without going into the detail; for the Committee must be aware that there are somewhere about one hundred of these contracts, and it is impossible for me to carry the details in my mind.
632. I am now alluding to that portion of the work contracted for by Mr. Boland, in the neighborhood of Springwood? I am aware.
633. Your knowledge of the soil does not enable you to speak? Not of that detail. As a rule, I think the system of putting an inferior stone under a better metal is both cheap and good. It has been adopted here in Sydney with great success; and it is a modification (certainly a rude modification) of the best known road, which is the Telford Road.
634. How many superintendents and overseers are employed at present, receiving pay from the Government for the superintendence of the Bathurst Road? One superintendent and two overseers.
635. Have you not charge yourself? I have.
636. Is not Mr. Bennett under you—is it not a portion of his duty to inspect this line of road? It is.
637. As well as a portion of your own duty? It is.
638. That is two—Mr. Dawson is head superintendent? Mr. Dawson is superintendent.
639. Under both Mr. Bennett and you? Yes.
640. That is three. Now can you inform us how many deputy overseers there are? Two.
641. Is there not another? Not that I am aware of.
642. Do you recollect their names? Coghlan and Drew. A ganger is allowed from time to time, of the name of Hanley. I believe latterly he has been almost constantly employed.
643. Is he under pay now? Yes, I believe he is.
644. That is four, besides your superintendence and Mr. Bennett's? Besides my instructions and Mr. Bennett's. But perhaps in common fairness the Honorable Member will allow me to observe, that the superintendence of two out of the six named by him extends over nearly a thousand miles of road, in addition, in the case of the Commissioner, to the charge of Railways and Telegraphs, and the duties of Under Secretary for Public Works, and in the case of the Engineer for Roads to preparing plans, specifications, and estimates for bridges generally.
645. I think I said that it was but a small portion of your duties? And but a very small portion you will perceive.
646. The whole of the work now carried on is carried on by contract? A very large part of it.
647. Are there any daily men or weekly men? There are some; I believe two or three. I can easily ascertain that fact.
648. You cannot speak positively? I can see by turning to the returns. I was going to say that some work is done by task-work.
649. Is not that contract too? It is contract, but we distinguish between contract and task-work; task-work is a small contract in fact.
650. That is to perform a certain portion of work within a given time? For a given sum of money.
651. Are the contracts for the repairs of the Bathurst Road, as carried on now, entered into under a specific bond? They are.
652. Are these contractors bound to perform their work in terms of a specification? They are.
653. Within a given time? Not within a defined given time; but under this condition, that if the Engineer of Roads is at any time dissatisfied with the rate of progress, or with the work done, the Commissioner has the power to cancel the contract.
654. At once? At once; which is a much more stringent provision than a given time.
655. Is it your opinion that such a power should be vested in the hands of one individual, when human nature is so liable to err, and when men are so liable to differ in opinion as to what a man's work should be. One man may say, these men have done a good week's work; the next man may say they have not done half a week's work. Is it your opinion that such a power, as vested in Mr. Dawson, is a dangerous power? Mr. Dawson has not the power. The officer invested with the power is the Engineer for Roads.
656. Who is he? Mr. Bennett; and he must satisfy the Commissioner of the fact that a proper amount of work has not been done, before the Commissioner will consent to cancel the contract. The engineer has not the power of cancelling the contract; the Commissioner alone has the power of cancelling the contract.
657. *By the Chairman*: That is yourself? Yes.
658. *By Mr. Cummings*: If a contractor is bound under a special bond to perform a certain portion

Captain B. H.
Martindale,
R. E.
29 Feb., 1866.

Captain B. H.
Martindale,
R. E.
25 Feb., 1860.

portion of work, under a certain plan or specification, why should the public be put to the expense of paying superintendents and overseers to superintend the men for the contractor? Ought it not to be the specific duty of a competent man to go at times, when occasion required, to inspect the work contracted for, and, if he found the work performed according to the terms of the contract, to give the contractor a certificate, and to sign the proper vouchers for the payment of the money. But is it not a waste of money to say we have so many men employed wasting the little money that it is so hard to obtain from the Government for the repair of the roads? The amount of the vote last year was, I think, £22,000, and the cost of the superintendence about £1,500; that is, about seven per cent. I think that is not an extravagant sum to pay for superintendence. The work has to be done in certain ways: for instance, the ballasting has first to be consolidated, then one coat of metal to be put on and consolidated, and then a second coat of metal; the coats of metal and ballast being of certain thicknesses. The metal has to be measured in the quarry, and again on the road, to ascertain that the true quantity of metal—which on the Western Road is very expensive—is properly delivered. The contractors require to have their work set out, and have to be watched that they perform it honestly and faithfully. I can only say, that I consider it the worst possible economy to attempt to carry out road contracts without sufficient superintendence. I do not consider one superintendent and two overseers in a distance of one hundred miles in any degree too much.

659. From what you have seen of the repairs performed on the Bathurst Road up to 1858, and from the general features of the road when you came to inspect it, do you believe a proper system was carried on or ever has been carried on on the Bathurst Road up to the adoption of the system of small contracts? I do not think that up to October, 1858, the system pursued upon the road, as far as I could judge from a first inspection of a road which I had never even seen before, was satisfactory.

660. *By the Chairman:* When did the contract system commence? The task-work system commenced immediately after my visit, in October, 1858. I felt that until I had inspected the road myself I was incompetent to give directions as to what should be done. Immediately after I inspected it, I directed that as far as possible day-labor should be discontinued, and the system of task-work substituted, till a general system of road management could be introduced. The Main Roads Act, the Committee should be informed, passed in June, 1858. I was appointed Commissioner towards, I think, the end of June, 1858; in September, I inspected the Northern Road, and in October the Western Road.

661. How long did you supervise the road before the system of contracts was commenced? I supervised the road, I believe, from September, 1857.

662. I have rather gathered from your answers that you were dissatisfied not only with the way in which the work was done before the commencement of the contract system, but also with the superintendence of the work—I wish you distinctly to state that point, if you please? I was dissatisfied with the general system. I felt that I was being held responsible for an expenditure over which I had practically, under the existing system, no real control, and therefore as soon as the Act passed, and my other duties permitted, I visited the road to see what was doing, and what was required. I found the Western Road in an extremely bad state. I learned from the superintendent that the funds that he had had, and the state of the weather had been such, that all that he had attempted to do was to patch up the worst places, and to keep the traffic open. There did not appear to me to be any thoroughly defined system of work, and therefore I altered the whole thing, and introduced the present system. I do not think there was a sufficient check on the day labor, and I do not think it was possible to have an efficient check upon it. My objection to the system rested on the fact of the works being done by day labor.

663. Were you satisfied with Mr. Dawson's superintendence of the road previous to the system of contracts? In my opinion every road superintendent should be a gentleman who has been educated as at any rate a clerk of works. He should be competent to take ordinary surveys and levels; he should be competent to construct ordinary bridges, and to perform the repairs to such bridges; and he should have a thorough knowledge of the measurement of work. I am under the impression that Mr. Dawson has not been so educated, and does not possess certainly a part of the knowledge I have mentioned. I was, therefore, dissatisfied at having a superintendent who, I thought, had not been properly trained for the work. I heard, and I always have heard, the highest character of Mr. Dawson's integrity and natural ability; and I think that Mr. Dawson has acquired a considerable amount of experience in the construction of the road, and is now competent to see the works carried out under the present system. I think it is very necessary that we should have men to superintend these works who will not enter into collusion with the contractors, and allow them to "scamp" their work; and Mr. Dawson I believe to be a thoroughly honest and upright man.

664. *By Mr. Cummings:* I understood you to say that a great deal of the work for which contracts have been taken is not yet finished, which accounts for the road not being in a good state? The Committee will allow me to say that the Estimates did not pass in 1859, until towards the end of March; contracts were called for in April, and it was June before the tenders were received. Even then, on the Western Road, eligible tenders for only three out of fourteen contracts were received. Tenders were again invited on the 27th June, for the remaining eleven contracts, and were accepted on the 3rd August. On the 15th October tenders for fourteen more contracts were advertised for, and eight were accepted. That will shew the Committee the difficulty that existed in obtaining tenders, and the reason why the works were not more complete within the year. During the year 1859, and 1860 up to the present time, no less than 27 contracts had been taken, amounting altogether to £10,000; and the whole amount paid thus far has been about £2,850, leaving still to be paid on these contracts

- contracts more than £7,000. The Committee will, therefore, see that the present state of the Bathurst road is not a criterion of what will be done with the money of 1859.
665. It is not all expended? It is contracted for, but the work is not performed, and the amount only is paid for which work has been performed.
666. In September, 1857, you took charge of this road? Yes.
667. Do you recollect an Italian who was employed in some way upon the road? Yes.
668. Do you remember his name? Francisco Bacigalupo.
669. Has he been employed as overseer since you have taken charge? Previous to my journey of 1858 he was; he was a ganger.
670. Is it customary for men in that capacity to employ their own carts and horses on the public works—are you aware that such was the case with this man? I do not know that it was the case with Bacigalupo. I know it was the case in some instances. I think the system wrong, and it has been abolished.
671. *By Mr. Clements*: You put a stop to it on the Northern Road? It has been put a stop to everywhere.
672. Who has the superintendence of the Mudgee Road from Bowenfels? A Mr. Hill had till now.
673. For what length of time? He had it for two months—he has just resigned.
674. Who had it previous to that? A Mr. Harper.
675. Has it been under the charge of Mr. Dawson at all? It was under Mr. Dawson's charge till the beginning of 1859.
676. My reason for asking the question is, that it has been surmised that Mr. Dawson not only received £500 a year as superintendent of the Bathurst Road, but also £500 a year as superintendent of the Mudgee Road—was that the case? That was not the case. Mr. Dawson did not receive one penny for the superintendence of the Mudgee Road.
677. Is it your opinion, that the stone to be found at Mount Victoria and Lapstone Hill is fit for road purposes? It is not good metal, but it is the best that can be got.
678. Must it not necessarily be subject to frequent renewal? It must.
679. And consequently be very expensive? It must.
680. From your experience, is it not your opinion that anything like a macadamised road, no matter how well constructed, from any metal obtainable on the mountains, must be very expensive to maintain? The cost of maintenance must always be heavy on the mountain road.
681. Unusually heavy? Unusually heavy as compared with other main roads.
682. Do you know any other main road in this country of the same extent that would be as costly to maintain as a macadamised road? I do not think either of the other main roads would be so costly to maintain.
683. If the overseers on the road did their duty, would it be possible for fraud to take place in the measurement of the broken stone—for instance could large unbroken stones be covered up in the heaps unknown to them? It is impossible for the Government to be defrauded if the overseers do their duty.
684. Would you consider that there had been very great neglect on the part of an overseer if it came to your knowledge that he had passed as finished metal heaps containing large numbers of unbroken stones? Where a man has such a distance as from Penrith to Mount Victoria to superintend, which is what one overseer now has, a contractor might play such a trick on him; but under the present system it would not help the contractor, because the metal is twice measured, once in the heap and again when placed on the road.
685. Then it is more likely to be a trick played on the contractor by the men he employs than one by the contractor on the overseer? Yes. The Committee will see that in such a distance, in some part of which heavy work may be going on, the overseer will feel quite justified in leaving the metal for a week or a fortnight, and when he went on the spot he would measure the metal in heaps, presuming them to be *bonâ fide* heaps; the check would come when the metal was spread on the road.
686. The fraud would be more between the laborer and the contractor? Fraud could not take place on the Government provided the overseers did their duty.
687. Is it a part of your arrangements that all laborers employed by the contractors are subject to the orders of your overseers and liable to be dismissed by them? It is.
688. Do you think that is just? I think it is an absolute necessity. The Committee will perceive that without that power the laborer of a contractor might use any amount of abuse to a Government officer.
689. Are there not courts and laws to correct that—do you not think that such a power is open to very great abuse? I do not. I never have known any contract in England, or elsewhere, where that power was not reserved.
690. It is usual is it? It is in all Government contracts.
691. It has already been alluded to that there is £1,000 on the estimates for going round Mount Lambie—are you of opinion that £1,000 will be sufficient to make a really good road of that? A vote for £500 was taken in 1859; the £1,000 will be supplementary to that; and I should feel justified in recommending the Government to suspend, on that part of the line, whatever fair proportion of the general vote would have been spent on Mount Lambie itself.
692. Is it intended to shut up the Mount Lambie Road? To discontinue the repair of it.
693. Have you examined the piece of country over which this new road will pass, yourself? Yes; I have ridden over Piper's Flat twice, and over the proposed diversion once. My doubt was between the Piper's Flat Road and the proposed diversion, because the Piper's Flat leads through better land, and if it had not been that that road would require a considerably larger expenditure, and the probability of a railway, I should have recommended the Piper's Flat Road.
- 694.

Captain B. H.
Martindale,
R. E.

29 Feb., 1860.

- Captain B. H. Martindale, R. E.
29 Feb., 1860.
694. You recommend this road on the score of economy? Yes, as compared with Piper's Flat.
695. And as compared with Mount Lambie? As compared with Mount Lambie, and because I think it is contrary to every recognised principle to take the road some hundred feet up a hill to go down again.
696. *By Mr. Cummings*: Under the prospect of a railway to Bathurst do you not think it would be much better to try to put the old road in a passable state instead of trying experiments? I do not look upon it as trying an experiment.
697. There is, at present, £50 a mile voted for the repairs of the three main lines of road. From the dreadful state of the Bathurst road at present, £50 a mile will have little or no beneficial effect on the repairs of the road,—will it or will it not? It will not do much.
698. Is it your opinion that, regardless of expense, the Bathurst line of road should be put in passable repair; I am not alluding to macadamising the whole road? It is. I believe it would be the cheapest thing to do it at once.

APPENDIX.

Road Branch,
Department of Internal Communication,
Sydney, 7 March, 1860.

METAL AND STONE LYING ALONGSIDE WESTERN ROAD.

THERE are several places on which metal and rough stone have been stacked on this road. I particularise all that I can call to mind, and the reasons for not making immediate use of it.

1. *Frying-pan Hill*.—When the last day-labor and task-work party was employed at this place, at the end of 1858, the hutkeeper was engaged, during all his leisure time, in breaking this stone. Before it could be turned to use, the system of letting works by public tender was adopted, and the hill subsequently let by contract (Nos. 14 and 25). The stone, therefore, remains where it was, available for maintaining these contracts when finished.

2. *Hill above Davidson's Viaduct*.—Two small heaps were placed here when this work was finished, to maintain it in good order, and are used for that purpose when funds are available.

3. *Near Redbank*.—A heap of metal remained here for some months, stacked by a stonebreaker, who broke it on speculation when the contract system was first promulgated, and subsequently sold it to the contractor for Redbank.

4. *Mount Lambie West*.—Some heaps were here got and broken, to be in readiness for repairs when required. A small part only has been used; because, as it was subsequently determined to divert the Mount Lambie Road, it then became desirable to do as little as possible on the line to be eventually disused. This metal, however, will be readily available for the diversion now in progress (contract No. 18), and also for maintaining contract 19 (Mount Lambie West) now in hand.

N.B.—This metal was partly got by screening the naturally broken surface stone, and cost, as it lies, 3s. 6d. per cubic yard only.

5. *Foot of Mount Lambie East*.—Some rough stone has been here got out, and is made available from time to time in repairing the partly timbered viaduct at Solitary Creek, where, from the rotting of the old woodwork, the road surface gives way, and holes are thus continually occurring.

6. *Top of Lapstone Hill*.—Some rough stone has been stacked here for a considerable time, and occasionally used for repairing Lapstone Hill. Hard stone hereabout can only be got in small heaps, varying from a few dray loads to perhaps one barrow load in a place; and in the thick scrub it is always difficult to find it. When this stone was got roads had first previously been cut through the scrub, and patches of it burnt, to get at the quarries. I, therefore, deemed it advisable, while these roads were open, and the stone easily found on the burnt surface, to get out, not only what was wanted for immediate use, but also as much as I could then procure, to be in readiness for future repairs.

The scrub is now grown up again, and the bush roads, cleared by former contractors, blocked by the underwood. Had I not taken the precaution stated above the labor of clearing and burning the scrub, and of looking for the stone, would have been again required whenever metal might have been needed for urgent repairs. This labor may be estimated in some measure, when I mention that 260 cubic yards of stone, got in this way, came from fifty-five different places.

R. B. DAWSON,
S. W. R.

20 February, 1860.

Mr. Peter Toohey called in and examined:—

- Mr. P. Toohey. 699. *By Mr. Cummings*: Where do you reside? In Penrith.
700. What is your present employment? Coachman.
- 29 Feb., 1860. 701. How long have you been acting as coachman on the Bathurst line of road between Penrith and Bathurst? Nearly six years.
702. How long were you coachman on the Bathurst end of the road from Hartley to Bathurst? Two years and three months.
703. How often do you travel over that line of road in a week, one week with another? Seven times.
704. Every day? Every day.
705. What has been the state of that road? Well, it has been very bad.
706. What is the cause, in your opinion, of the badness of that end of the road—what is the great cause of its dreadful state? Because it is not properly attended to, I believe; the water running across it, principally for want of drainage and rounding.
707. Is it your opinion that the great cause of the dreadful state of that road is the want of drainage, and the want of formation of the road in rounding it? It is.
708. Have you, during the time you have been on the road between Hartley and Bathurst, seen any work carried on in the shape of repairing it? Yes, I have seen a few men at work on it. I saw a man or two near Hartley, and perhaps three somewhere about Durac's, throwing mud on the road and filling up the holes with bushes; and one or two at the Frying-pan, doing the same thing.

709.

709. From your own personal knowledge of the repairs you have seen (if they could be called repairs) during the time you have been speaking of, is it your opinion that the money has been properly laid out? It is not. Mr. P. Toohy.
29 Feb., 1860.
710. In what year did you go to the Bathurst end of the road? In 1855.
711. And you drove there till the early part of 1858? Yes. Since that I have been between Hartley and Penrith.
712. What is the state of the road at this present time? Between Bathurst and Hartley I could not positively tell.
713. Between Hartley and Penrith? Between Hartley and Penrith I never saw it worse—not taking it as a whole.
714. *By Mr. Clements:* Than it is now? Than it is now.
715. *By the Chairman:* Are you acquainted with any of the other main roads in the Colony? I am not.
716. *By Mr. Cummings:* Since 1858, up to the commencement of the present contracts on the road, what has been the general mode of repair on this end of the road on the mountains? I think by men paid by the day.
717. Do you approve of paying men by the day for the repair of the road? I do not.
718. *By the Chairman:* That is done away with now, are you aware? I am not positively aware of it, but there is a contract or two; Boland has a contract, and Smith has a contract on Lapstone Hill, and a man named McGarry has a contract somewhere between Little Hartley and Big Hartley.
719. *By Mr. Cummings:* Since the early part of 1858, when you came driving on this end of the road, up to the adoption of the present mode of contracting, do you think the money laid out in what is called repairing the mountain road has been properly used? I do not.
720. What has been the material generally used for these so-called repairs? Sandstone.
721. Is there plenty of what is called ironstone metal to be obtained, generally speaking, on the mountain road? I believe so.
722. *By Mr. Clements:* Why do you believe so? Because I see Boland is getting some of it out now for his contract.
723. Have you seen any on any other part of the mountains? On Lapstone Hill.
724. Any beyond Boland's? Yes, a piece at Ellison's Toll-bar, made some five years ago.
725. Do you think good stone could be got if they took the trouble? I do.
726. *By Mr. Cummings:* The so-called repairs, previous to the present contracts, on both ends of the road since you have been coach-driver, and had them under your daily inspection at one end or the other, have been, if I understand you right, of a very doubtful description? Yes; on the Bathurst end of the road I have seen them clean out a hole and chuck the mud back again after filling it with bushes; they did that from Thorpe's Pinch to Durac's public-house.
727. How long ago? Three years.
728. *By Mr. Clements:* Was there any stone in the neighborhood? Yes, good stone. I saw the same at the Frying-pan four years ago, when the roads were so very bad. I saw it from Green's public-house round the Frying-pan Hill.
729. Who was superintendent of the road then? I believe Mr. Dawson, I will not be positive.
730. Was it not Captain Scott? Now, I remember, I think it was Captain Scott, on account of the logging at Springwood.
731. *By the Chairman:* You cannot speak positively? No.
732. *By Mr. Cummings:* Is it your opinion, or is it not, that the public money so expended was completely wasted? It is.
733. Are you aware, from your own knowledge, that there is abundance of good metal to be obtained along the line of road from Solitary Creek to the Frying-pan? Yes, from my own personal knowledge.
734. And that has always been considered to be the worst portion of the Bathurst end of the road? From the Frying-pan to the Solitary Creek it is.
735. Is it your opinion that there are various portions of the Bathurst line of road that if properly rounded and drained would make a reasonably good road, without being macadamised at all? There are, I believe, from the top of the hill leading into Big Hartley to Bowenfels.
736. *By the Chairman:* In the granite country? Yes.
737. *By Mr. Cummings:* And other places? There are other places that I dare say would answer the same. The Frying-pan Hill, I am positive, if properly rounded would need no macadamising, for there is a good solid bottom; but I never saw it yet so that the water could escape; it must run across the road.
738. Or down the centre? Or down the centre.
739. Do you know a portion of the road near Hassan's Walls, they call the Yellow Water-hole or Gap? I do.
740. That is now undergoing repair? Yes.
741. Are you aware that a new line of road has been opened, a cut around, to avoid that? There was one there; I believe it is stopped up by Simons's fence now.
742. Has that cost a large amount of money? There was a great deal of money laid out on it at the time that Francisco and the Italians were working there.
743. Was it by contract? I believe not.
744. If the money so expended on this road had been expended on improving the present Gap and the line of road along there, is it your opinion that the amount would have been saved to the public? It is.
745. And that money so expended on the new cut has been a waste of funds? It is a waste.

Mr. P. Toolsey waste. It was so far useful at the time; but I believe that if that money had been laid out on the road we could have got along without the new line at all.

29 Feb., 1860. 746. Now I understood you to say that for the last five years, up to the present time, you have been daily driving on the Western Road, either between Hartley and Bathurst, or between Hartley and Penrith? I have.

747. Have you ever, and how often, in the week, month, or half-year, seen Mr. Dawson inspecting the line of road? Not often.

748. Within the last five years to the best of your recollection how often have you seen him in the year, taking one year with another? I have not seen him surveying or inspecting it more than twice in the year. I have seen him oftener, but not inspecting the road. I have seen him at Bowenfels, where he resides, going to and from church.

749. But not in the performance of his public duty of inspecting the road and giving instructions? Not more than twice a year.

750. *By the Chairman:* Do you think he could be on the road without your knowing it? He may have been. Since I have been driving the night mail he may have been stopping at one of the houses without my knowing it.

751. *By Mr. Cummings:* During the five years that you have been constantly up and down, have you ever heard, or has it been the general subject of conversation amongst the inhabitants and passengers that Mr. Dawson has neglected his duty as superintendent? It has.

752. Has it been the general opinion? It has been the general opinion. I believe for the last two years, however.

753. From your own knowledge, being every day in the week, Sundays as well as other days, on the road, is it your opinion that he has performed his duty to the public in using that exertion that a superintendent ought to use in getting the road in repair? It is not.

754. And such repairs, if they can be so called, as have been done, have been a waste of public money—is that your opinion or is it not? It is.

FRIDAY, 27 APRIL, 1860.

Present:—

MR. CLEMENTS,
MR. HOSKINS,

MR. PARKES,
MR. ROTTON.

WILLIAM CUMMINGS, Esq., IN THE CHAIR.

Robert Barrington Dawson, Esq., called in and examined:—

R. B. Dawson,
Esq.
27 April, 1860. 755. *By the Chairman:* You are the superintendent of the Bathurst line of road? I am.
756. When did you commence your duties on that line of road? In August, 1856, rather more than 3½ years ago.

757. Are you now in the same capacity as when you first commenced? In the same capacity, with a difference; that is to say, I was very little controlled during the first year and a-half, until Captain Martindale took the management; in fact I may say for the first 2½ years the actual planning was left to me, the amount of expenditure being of course controlled in Sydney. Since then I have had less control over the actual working.

758. I understand you to say you had full control until a recent date? I had written instructions which I was of course bound to respect; but, practically, I was left pretty much to myself, as to where I would employ labor, and how I would employ it.

759. Did you continue to exercise the same power up to the present contract system being adopted? No, not quite. I may say I continued to exercise that power substantially, or nearly so, till November, 1858, about two years.

760. Was there any portion of the work done by contract during that period you allude to? Yes, during my period of control a good deal of contract or task work was done—that is, work paid by the piece.

761. What portion of the work performed on the Bathurst line of road during that time was done in the lump, or by the job, as the case may be? I cannot tell you sum for sum. For a considerable time the Mudgee Road—

762. I am now speaking of the Bathurst line of road only? True, but until lately I had charge of the whole Western Road, including both the Mudgee Road and the Bathurst Road; and up to June, 1857, no special sum was authorized for one Road or the other. The money placed at my disposal was for the whole Western Road, both from Penrith to Bathurst, and from Bowenfels to Mudgee.

763. Am I to understand that your instructions empowered you to expend whatever amount you thought proper on what you believed to be the Western Road, including the Mudgee line of road? Yes, but first reporting what I intended to do, and submitting my propositions to the Colonial Architect, who was at that time the head of the department; but, practically, what I advised was generally sanctioned.

764. When did that system commence? I found it in operation in 1856, when I took the management of the road, and the works were principally directed by me till about November, 1858—the year Captain Martindale came up and made his first inspection. Mr. Bennett, now Engineer of Roads, had, however, been up before in the previous September (1857), and I then went over the road with him to shew him all I could. I may mention that there was a distinction made between the Mudgee Road and the Bathurst Road, I think about June,

June, 1857, when a sum of £1,600 was specially allotted to the Mudgee Road—that was R. B. Dawson, Esq.

the first year.

765. When you were made acquainted with the sums voted for the roads—so much for the Mudgee Road and so much for the Bathurst Road—did you immediately commence to expend the money so voted? The first intimation I would have of the vote would be in the newspapers; then I would expend nothing till I received instructions—generally it was a monthly authority, and on that monthly authority I would expend the money where I thought best, submitting my intentions to the office before proceeding.

766. *By Mr. Clements*: It was not optional to expend the whole of that vote within a month or two months? No, I was strictly limited within certain sums, but keeping within those sums I expended the money where I thought it advisable, until within the last year and a half.

767. *By the Chairman*: Were those repairs on the Western Road that were let by contract, or by the lump, what we call log roads? There are two species of log roads, the corduroy—

768. I will come to that directly? I have only had to do with one description of timbered road.

769. Can you inform the Committee what that sort of road cost per yard, done under your superintendence? The log road done by me was the narrow log road, adzed on the surface, and fitted together similar to a plank road. It cost, including everything complete, 16s. per lineal yard, where laid on sleepers; where not laid on sleepers, 14s. per lineal yard.

770. *By Mr. Clements*: Do I understand you to call it log road where it is adzed, and corduroy road where it is rough? Yes.

771. *By Mr. Rotton*: The log roads you are now speaking of—? We call it adzed log road—

772. Are those where portions are logged and portions macadamized? Yes.

773. There really is no plank road? No; except about 100 lineal yards at Wascoe's, which was laid before my time.

774. *By the Chairman*: My question is as to that portion we call log roads, logged the full width and laid down either on sleepers—? There are no sleepers on corduroy roads.

775. I am not alluding to corduroy roads—I mean the roads made a certain width? You mean the half width. There are two distinct species of log roads, one of which I had to do with, and the other I had nothing to do with.

776. At any time during your superintendence, were there any log roads let by you? Yes; the whole of the log roads with the exception of one piece about 60 feet long.

777. I am now speaking of the log roads on the mountains? That is the only part where log roads are laid. They were all, with the exception of one small piece, laid by contract, and cost 16s. per lineal yard on sleepers, and 14s. not on sleepers,—out-turn and all; but the out-turn is not macadamised.

778. *By Mr. Clements*: Is the road you are now speaking of as log road that which is only half laid across? Yes.

779. Was it the log portion which cost 16s. a yard? No; the whole road complete for traffic. (*The witness exhibited a plan showing the description of road referred to.*)

780. *By Mr. Parkes*: Where is this description of road laid down? Over various quagmires, from 60 feet to 200 yards in length.

781. Where is any one of them situated? At Black Log Hollow, at Springwood; they are nearly all between the top of Lapstone Hill and Springwood. The longest continuous piece is about a mile east of Boland's Inn.

782. *By the Chairman*: Did the piece of log road that Mr. Boland is now metalling cost the same price, 14s. and 16s. per yard? The metalling of it do you mean?

783. The logging? I do not know; it was done by Captain Scott before my time. I have always heard it was done at £1 a yard, but I think the ballasting was extra afterwards—it was ballasted over with sandstone. Practically, this kind of sapling road cannot be repeated, you must have the saw to proceed, since I and Captain Scott together have used up nearly all the timber suitable for such work.

784. *By Mr. Clements*: Do you not think sawn timber would be cheaper? Steam-saw machinery will work quicker and cheaper than manual labor; but if miles of plank road were laid down, we should soon have a long way to send for the timber, and the extra expense of haulage would then probably counterbalance the saving effected by machinery. To say the truth, I think timber could be imported cheaper from America, where there is so much water-power, or perhaps even from New Zealand; assuming that the plank road was commenced at Penrith, so that as the roadway proceeded there will always be a good road surface for the conveyance of the planks from the railway terminus.

785. *By Mr. Rotton*: Would that timber be sufficiently durable? If it were tarred, and sand put over it, it would last; the veins of the timber get impregnated with sand, and they would perhaps be still better filled if tarred first; while by kyanizing or creosoting the wood, which I have heard can be done at a very trifling expense, decay would be greatly retarded.

786. *By the Chairman*: In speaking of the durability of timber, are we to understand that you allude also to the logs which are at present laid down on the mountain road? As far as wear is concerned, I allude to that timber also.

787. Are you aware, from your experience, how long the same sort of timber will last in the ground when used for building purposes, or any other purpose where it comes in contact with the earth? I have a paper here, in which I have referred specially to that subject, and which will supply the best answer I can give.

788. Does your experience enable you to state what length of time this sapling wood will last? To a certain extent it does.

- B. B. Dawson, Esq.
27 April, 1860.
789. Will you be pleased to inform the Committee? The saplings which have been longest in the ground that I am aware of will be four years next September; some have rotted, evidently those that were decayed when they went into the ground; others of the same kind of timber are still quite sound; but I see logs in other parts of the road which I know have been down these dozen years, and which are sound to this day. Their soundness appears to depend on their being well buried, and something on the quality of the timber; box saplings will last twelve or fifteen years. As far as the Western Road is concerned I can only speak from an experience of $3\frac{1}{2}$ years, the time I have been there.
790. You have alluded to quagmires, where those portions of wood have been used on the road; do you designate those portions as quagmires from your own experience? They were quagmires when we laid down the timber roads. In one case, however, a sandy road was particularly chosen to try whether the logs would do as well in sand; but the principal places were actual quagmires. The adzed log roads were laid down over these places partly as an experiment, and partly as forming the only means of repairing these sections during the continuous flood season of 1857.
791. What you state to be quagmires, in your opinion, are they not a few holes in the road which the water washes the white and black sand into, where it is deposited for a time? One quagmire in particular was near James's Inn, the first we did, 60 feet long, almost impassable, and where drays bogged to the very axle. The next was near Black Log Hollow, not quite so bad. The third was near Springwood, where drays frequently bogged to the axle. The fourth was on a hill, where a bank spring issued into the road and made a quagmire about 100 feet long. The fourth and fifth were on sandy roads, no otherwise obstructive than that the sand was very deep.
792. Were not many of the places you call quagmires the effect of the road or track being completely worn out—not being rounded, and the water having no means of escape, they became quagmires. The natural formation of the mountain country is not a quagmire country? Except about Springwood, certainly not.
793. Nor at Springwood. What is the description of soil at Springwood? A black argillaceous soil.
794. Is it not a yellow soil of a substantial nature? There is a dark or chocolate-colored soil three or four inches in depth upon the surface; then you come to a fair yellow clay; and, below that, shale, very like rock when dry, but whenever rain falls the shale absorbs it like a sponge, and becomes soft.
795. Have not these quagmires been caused by the bad state of the road, allowing the rain water to lodge in the centre of the road, and causing the track to become soft? Some small pieces of 50 or 60 feet were quagmires of that kind, where the waters had collected between two hills, perhaps to the depth of a foot.
796. Have you had much experience in roadmaking before you came to this country? I had a good deal as quite a young man. My father was somewhat concerned in roads; he was one of the first followers of Macadam.
797. *By Mr. Parkes:* In what part of England? In Essex chiefly, and subsequently in Warwickshire.
798. Had you anything to do with roads in Warwickshire? Nothing practically, any more than as a follower of my father, who had.
799. What particular roads? Both highways and by-ways.
800. What main roads? From Birmingham to Wallsall I beg you to understand that I had no official connection with roads at all. Any knowledge I have acquired has been merely at second-hand, gained from those who had to do with them. I was, however, thoroughly imbued with the principles of Macadam before I came here.
801. *By the Chairman:* The portions of log roads laid down on the mountains have been constructed as an experimental mode of roadmaking? No, I can hardly call them that, because it is a description of road a great deal used in Canada.
802. It is an experiment in this country? In this country it was experimental, decidedly; I never saw it here before.
803. During your superintendence has any general system of drainage been carried on on the mountain road? During the whole period or any part of it?
804. Up to the present system of contracts? I never attempted to make a road without draining it thoroughly; it is of no use without drains.
805. Will you have the kindness to mention to the Committee on what portion of this line the road has been rounded previous to the present contracts being entered into? In many places, from Knight's Store to Spargoe's Inn the whole section was drained—about a mile. On Mount Lambie we did a good deal of draining; but the road is so very narrow there that the drains were soon obliterated—within a year or a year and a half after they were made. At Hartley we drained nearly a mile; at Junction Hill and Flat, three miles; at Meadow Flat, 1,100 yards; at Bowenfels and Hassan's Walls, the whole country side, and many other places.
806. In what you call drainage were there any aqueducts to enable the water to make its escape? Yes, either old culverts were put in repair or new ones formed.
807. Open culverts? Both open culverts and closed ones. When I came to Mount Lambie, in the flood season of 1856-7, a man could scarcely stand upon it; the bullock drivers would cross some sections of it with their boots off, and sometimes stripped to the waist. As soon as we got a little dry weather I devoted myself to draining Mount Lambie, and got it into such order, with a small amount of money, that it has been passable ever since.
808. How was the trade of the western districts carried on at that time—by what route? By no other route that I know of but Mount Lambie. I used to see dray after dray unloaded, while double teams dragged at the hinder part of the empty cart; horses smothered in the mud,

mud, and part of the harness sometimes left behind in the mire, because it was almost hopeless to grope for it. At that time (1856) I had not more than about £1,700 for both the Bathurst and Mudgee Roads.

R. B. Dawson,
Esq.

809. Have you had any experience in ballasting roads from the natural formation of clay soils? We ballasted with almost everything that we thought would answer. In general we only think of rounding up a road for permanent traffic from the side drains when the soil is decomposed granite or similar material.

27 April, 1860.

810. I ask if you have had any experience in ballasting—what I call rounding roads—from the natural soil of the immediate locality where the roads are formed, such as strong clay soils of any color? In dry weather, in summer time, I have rounded up the roads with clay soil, intending to ballast immediately after, and before rain should fall; but it would be quite unavailing to attempt to form a permanent roadway with such material.

811. Do you think that if the whole of that line of road were ballasted with the earth out of the water-tables and drains, which should be sufficient to enable the water to make its escape, it would answer the purpose much better than soft freestone? You cannot speak of the whole line in that way.

812. I am speaking of the whole line of road from the Nepean River to the Macquarie River, with the exception of the sandy hollows on the mountains in one or two places, or may be more—would not the work be substantially performed if the road were rounded with the solid clay or earth, as the case may be, taken from the water-tables and drains, and at much less cost than when you go to the enormous expense of drawing white sandstone to ballast the roads at a cost of 4s. 6d. a yard? A road ballasted with clay would be useless, and a road ballasted with soil would in general be useless, excepting with soil formed of decomposed granite, of which there is a considerable portion on the section which lies between the mountain road and Junction Creek.

813. *By Mr. Rotton*: What distance would you have to carry that decomposed granite to repair the sandy road on what is called the mountains? Four miles would be the shortest distance, and we should have besides to ascend Mount Victoria.

814. And the longest? About 30 miles.

815. And the decomposed granite, even when carried to these roads, would be absorbed by the sand? Yes, it would be quite useless.

816. *By the Chairman*: On what part of the line of road is this decomposed granite to be found? From the top of Great Hartley Hill, near Hayes's house, to the top of Lett Hill.

817. *By Mr. Clements*: You mean the range on this side the River Lett? Yes, the descent to the River Lett, and the ascent from the River Lett; and again, the descent to Junction Creek is also decomposed granite.

818. *By the Chairman*: From Hayes's to the River Lett, has this decomposed granite been used for the repairs of the road? It has.

819. And has been found to answer? Yes.

820. What is the distance from the decomposed granite to the Yellow Waterhole opposite Blackman's house? The nearest available decomposed granite to Blackman's house will be about a mile and a quarter to a mile and a half, up-hill.

821. West of the River Lett? Yes.

822. Would it not be quite impracticable to convey any of this decomposed granite on to the mountains, to repair any of those sandy hollows? Quite impracticable.

823. In fact, it could not be done without enormous expense? Certainly not; and we have a better material close alongside, on the mountains.

824. A much better material? No, not a much better material—a better—as good, at any rate.

825. Can reasonably good metal be obtained at reasonable distances on the mountain road? There is no real metal on the mountain road. The best that can be got is a hard, red sandstone, commonly called ironstone.

826. Is that plentiful? The best quality is generally scarce. Of an ordinary quality, it is plentiful from Shepherd's Tollbar to the Blue Mountain Inn, but very scarce from the Blue Mountain Inn to Emu Plains.

827. *By Mr. Rotton*: The best quality soon breaks up, does it not? Yes; unless the road can be formed and consolidated in continuously wet weather. If laid down in dry weather it soon grinds to pieces.

828. *By Mr. Clements*: You have had a good deal of experience on the road—is there, in your opinion, any metal worth putting on the road, from one end of the mountains to the other? There is none of which (looking to the extremely heavy traffic) you can say anything more than that it is better than nothing.

829. *By the Chairman*: Are you acquainted with that portion of line of road from Kelso to the River Macquarie? I am.

830. Do you know how that portion of the road was ballasted, or rounded, and with what? I only know from what I see. With screened gravel from the banks.

831. Are you aware that the road formed across what Sir Thomas Mitchell called the Bay of Biscay was ballasted and rounded with the earth out of two large holes in Mr. Kite's paddock? I do not know.

832. Have you had opportunity of seeing that road? I see a gravelled road there; I never saw it before it was gravelled.

833. You are not aware that it was rounded or ballasted with black soil—rich earth—out of two holes in Mr. Kite's paddock, three feet deep? No; I am not aware of it.

834. You have received no information on the subject? I never heard anything of the kind.

835. *By Mr. Rotton*: I apprehend it makes very little difference what the road is first formed with, provided it is not used until completed by ballasting and metalling? You can form a road of almost anything if there is dry weather during its formation.

- R. B. Dawson, Esq.
27 April, 1860.
836. But if, during its formation, the road is used and suffered to be cut up, it is impossible to make it a good road? Yes; and that is especially so on narrow roads not exposed to the sun. Across Bathurst Plains, or other similar localities, there will always be a passable road, because, although it may get greasy and rutted during the rains, it will always heal up again in dry weather. In all open countries the roads are generally passable, and often in very good order, as we have all seen.
837. *By the Chairman*: Is it your opinion, from your experience, that, if a line of road was properly drained, it would cost much less to put it in repair and keep it so? Drainage, without ballasting or metalling, is absolutely useless on most parts of the Western Road; it would be cut to pieces during the first wet weather.
838. *By Mr. Clements*: Do I understand you that, if the drains were kept open, it would be of no use? Practically, they could not be kept open; they would be quickly obliterated. As soon as a narrow road is cut into there is no drainage from it; the water remains on the road; the wheel tracks intercepting all lateral drainage. A soft soil road may, however, be drained, in some degree, lineally; since, where any slope exists, the water will run down the wheel tracks, and may be conducted off the road at intervals. In this makeshift way some good might be done, especially if broad wheels were in use, or light wagons like those adopted in America.
839. *By the Chairman*: Would it not be a very great improvement on that line of road if the holes were filled up with metal? It is always of use to fill the holes with good material on every firm road, and this is done as far as practicable. It would, however, be wasteful to fill the deep holes formed on clay soil roads with metal; it would be throwing money away.
840. Is it not the practice with your men to fill the holes up with whatever sort of soil is most convenient? No, certainly not; the greatest care is taken to obtain proper material.
841. Have any holes on the line of road from Mount Lambie to Green Swamp been filled with metal previous to the contracts? They have been filled with various material; in some cases with metal, in others with the best ballast procurable.
842. What has been the general material used for filling holes? What I may call an inferior kind of rock, which we term ballast; it is not quite good enough for metal, but it is the next thing to it; it is easily broken and yet hard and silicious; it does not grind to mud. In some cases rubble ballast is first filled in, and then metalled over.
843. Have these holes, which are so very numerous, been filled with earth or clay from the side of the road? Certainly not. A man would be instantly discharged if found filling a hole with soil; except where the road was first to be formed to proper shape with soil, then ballasted, and then metalled over all.
844. I am speaking now as to holes? They are not filled with soil. That is not our mode of repairing holes.
845. How often have you been in the habit of inspecting that line of road previous to the contracts being taken? Constantly.
846. Then you can speak from personal knowledge that these holes have not been repaired with soil? Of my own personal knowledge, most decidedly.
847. Has it been done under your immediate superintendence? No, because every gang had a head man who was responsible for the acts of his men, and who would immediately have been discharged if the holes had been filled up with soil.
848. It never came under your notice? It never came under anybody's notice. I will not say a man here and there might not have done what he ought not to have done, but if he did his overseer was called to book. I never employed an overseer who was at all likely to do such a thing. One or two overseers were, in the first instance, discharged for ballasting with improper material, after being warned against the practice.
849. *By Mr. Clements*: Do I understand that you discharged some men for this? I discharged one man in particular for repeated disobedience of this order.
850. *By the Chairman*: What was the repeated disobedience of orders? Ballasting with material that was not fit to be placed on the road.
851. *By Mr. Rotton*: What was the man's name? M'Garry.
852. *By Mr. Parkes*: In this particular instance had the overseer carried on the work to any extent? No; I had, once or twice, found him putting improper material on the road; he had been ordered to cut down the side banks, which were of good material, and to throw them to the centre, with some screened gravel got near at hand, but persisted in putting soft stuff on the road, telling me it would do, and would bind, and so forth; I went again two or three times, and finding he was determined to have his own way, I threatened to discharge him. He, however, discharged himself, throwing down his spade and saying,—Well, then, I had better go, or something of the sort. He was, on the whole, a good man; industrious, but desirous to have his own way in opposition to me, which of course I could not permit.
853. *By the Chairman*: On what part of the line did that occurrence take place? At Hassan's Walls.
854. I was not speaking of Hassan's Walls, I was speaking of the line of road from Solitary Creek to Bathurst? I was merely referring to the case of the overseer.
855. My question is, what material has been used in filling up the holes from Solitary Creek to the end of Mount Lambie West, and from Mount Lambie West to Bathurst? Stone ballast invariably. No other material has been used to my knowledge.
856. Is there a quantity of broken stone, which has been paid for, lying, and how long has it been lying, on the west end of Mount Lambie, unused? A year and a half I daresay, or a year and three-quarters.
857. A large quantity? I cannot say how many cubic yards—I daresay 70 or 80. A good deal of it has been used from time to time, but certainly not a third of it.

858. Since that stone has been lying there, in what state of repair, relative to large holes, *R. B. Dawson, Esq.* has that identical piece of the mountain been in—the west end of the mountain? Very bad. There is, however, stone much nearer at hand to repair it than the stone in question. 27 April, 1860.
859. Right along-side the stone—what sort of repair has that portion of the road been in? That portion of the road is in fair repair.
860. In what state was it six months ago? Very bad, as bad as possible.
861. Impassable? No, not impassable, because everything passed it, but very nearly so.
862. Had not the teams, where a large quantity of stone was lying, paid for, to turn into the bush? Not exactly where the stone was deposited, further west.
863. A few yards? I should say about a mile.
864. I am now alluding to those impassable holes close alongside where the stone has been broken for eighteen months or two years? There were no impassable holes close alongside the stone.
865. Within a few rods of it? The only piece that could be called nearly impassable was certainly three-quarters of a mile from it, at the turn of the road generally called Thorpe's Pinch.
866. This is Mount Lambie, where the stone has been deposited? There has been no impassable hole within about three-quarters of a mile.
867. Twelve or eighteen months ago? More than eighteen months ago. I was applied to some time since for a written explanation on that subject, and I sent one to Captain Martindale.
868. Until within the last six months, has the road at that point, and within a few rods of where the stone is deposited, been impassable, the whole traffic being turned off the road? At that particular point I could not answer your question precisely; but, if they had an option of turning off into the bush I certainly should not have mended the road, since there were so many places to mend that it was seldom possible to repair even those where there was but one road. Never having money enough to mend nearly all the places where there is but one passage, it has been impossible to attend to those where there is an out-turn by which the teams can get round.
869. That stone remains there still unused? It does.
870. *By Mr. Rotton*: The means at your command for repairing the road are so limited that you are obliged to apply them where you think the repairs most urgently required? Out of nine places sadly requiring repair, we can seldom do more than one or two, and we take the worst first.
871. *By the Chairman*: How many overseers have you on the Bathurst line of road? Two overseers; one from Solitary Creek to Bathurst, and one from Penrith to Mount Victoria; and a ganger is generally employed between Mount Victoria and Solitary Creek, which is called the middle division.
872. What duty has he to perform? To see that the contractors do their duty; to watch that their stone is properly broken; sometimes, when I am away, to measure it; to see that they spread it of the specified thickness; in fact, to keep them up to the mark; and to superintend the minor repairs done by task-work.
873. Have there been any weekly men continually employed from Hartley to Bathurst for the last six months? No weekly men have been continually employed; it is nearly all task-work. Now and then we are obliged to employ a day laborer at little jobs.
874. Is it contract work? The greatest part of it is task-work. We call the greater works contracts, where they are let by public tender; and the minor works are done by task, in which cases it is I who decide whether the prices are fair and reasonable.
875. *By Mr. Cements*: May I ask the difference between a ganger and an overseer? The overseer is constant, the ganger is not constant; the overseer is allowed a horse, as he has from 30 to 40 miles of road under him. The ganger has no allowance for a horse.
876. The ganger is a minor overseer? A sub-overseer in fact.
877. *By the Chairman*: Your duty is to superintend the whole? Yes; and to keep the accounts, as well as superintend the out-door repairs.
878. Whether work is let by contract or by task it is let under a plan and specification, is it not? Contracts are let on specification, task-work is by agreement—generally a short written agreement.
879. Is there not a specification? The agreement is a specification, if you please to call it so;—something in this way: A. B. agrees to cut so many yards of drain at such a price per yard, to be such a depth and such a width. It is a specification, though a brief one, since generally our men understand perfectly what they have to do.
880. In letting these portions of road, is the drainage included in these special contracts? The larger contracts are generally to make the road complete—forming, drainage, ballasting, metalling or gravelling, as the case may be.
881. Would not one inspection of this work performed by plan and specification be sufficient before being paid for? Certainly not; it requires constant inspection. A contractor would be able to "seamp" his work throughout, if not constantly inspected; the measurements are constant.
882. Are the contractors bound to perform their various contracts within a certain time? No; they are bound to make reasonable progress, in the opinion of the superintendent. We could not bind a man to perform his contract in a given time, because in roadmaking so much depends on the weather; for instance, in a period of drought he cannot spread his metal, or if he does his metal is spoiled; the process of consolidation depends entirely on the weather, and until one part of his work is consolidated he cannot be allowed to proceed with the other.
883. *By Mr. Rotton*: When you let a piece of road by contract, do you let the whole of the repairs

- R. B. Dawson, Esq.
27 April, 1860.
- repairs to one individual, or take separate contracts for the different descriptions—forming, ballasting, draining, and so on? The whole to one individual for the finished work. In the case of the Mount Lambie diversion, however, we let the clearing to one individual in a separate contract; and in another case, the contractor would not take the culverts, and we had to get another to do so; but generally, we let the finished work in one piece.
884. In either case it is necessary, while the work is progressing, to have some person to see that the different portions are properly performed? Yes.
885. For instance, if the road were only inspected when completed, you could not tell whether it was properly ballasted or not? No, we could not tell whether there was the right quantity of ballast.
886. Without pulling up great portions of the road? Not without pulling most of it up.
887. *By Mr. Hoskins*: Are not contractors generally bound to time in public works? Yes; and they are bound to time here; that is, they are bound to make reasonable progress; but if continuous rains were to fall we are obliged to modify the conditions.
888. *By Mr. Rotton*: What is the reason that Mr. Boland has taken such a very long time to perform that contract of his? I can give one or two reasons. In the first place, metal is very difficult to get there. He gets a few loads here, and a few loads there; and when he opens a quarry, he sometimes finds that instead of getting better the stone gets worse as he goes deeper into it. I do not, however, think he has gone on so fast as he might have done, and he has been urged pretty sharply to keep moving. Lately a great many of his men struck work and went to the Snowy River; and a number of men who were sent up to him by Mr. Bennett, although he offered them a shilling a yard more than he had been paying others, refused it and went away. We could hardly blame him for that. After a time, the attraction of the Snowy River subsided, and he got on faster. Now, the weather has stopped him again.
889. *By Mr. Hoskins*: Are you not aware that contractors for the formation of railways are bound to time? It is easier to form a railway within a term than a road; there is no traffic going on. If we could block up our roads when we pleased we could get on faster; but the traffic of heavy teams in wet weather is very obstructive. We could lay down plank road in a given time.
890. *By Mr. Rotton*: A piece of the road that Boland has contracted to repair was originally a log road? Yes, corduroy.
891. That is a rough log road? Yes.
892. With an uneven surface? Yes, very uneven.
893. Was that adzed off previous to being metalled? No, it was ballasted a few inches over the surface.
894. Do you think that was judicious? Yes, I think it would have been labor thrown away to have adzed it.
895. Are you not aware that on some portions of similar road, which have been metalled, the metal has been entirely cut through in consequence of the logs not having been squared off? I think that may have occurred where there is an insufficient thickness of metal, and without ballast beneath it.
896. Do you not think it is likely to do the same on this piece? No, there is too great an interval of ballast between the metal and the logs. Cut through it will, no doubt, very quickly, because the metal is so inferior, and for which reason I should have preferred a plank road.
897. *By Mr. Hoskins*: You say you cannot get suitable metal? For forty miles we can get material which will make a road—and, if constantly maintained, a very good road—but a very expensive one to keep in order.
898. The stone crumbles? When we can get it finished and consolidated in wet weather, it makes a very good road for some time, but in dry weather, long continued, it grinds to pieces.
899. Have you heard of the plank roads in use in British America? I have read something of them.
900. What do you think of them? That they are in this case the only panacea; we must come to them sooner or later.
901. Do you not think they would be cheaper than constantly metalling with bad material? Yes, both cheaper and more durable.
902. *By Mr. Clements*: Have you made any calculation as to what sum of money would be required to put the mountain road in thorough repair, so that the mail could travel at the rate of seven or eight miles an hour? I did, without the sands, on one occasion, more for my own satisfaction than anything else; I thought about £90,000, leaving the sands alone; that is, taking the whole road from Penrith to Bathurst.
903. I am speaking of the mountain road only? I never calculated the cost of the mountain road *per se*.
904. *By the Chairman*: Was that on the supposition that it was to be macadamised? It would have been partly macadamised with the metal to be found there, on the steeper gradients, and partly planked.
905. *By Mr. Clements*: Have you made any calculation as to what you think a sufficient annual vote to keep it in repair, if once in repair? £50 a mile, if the road were once properly made. It depends, however, upon how much plank road you would have, because plank road requires comparatively very little repair.
906. *By the Chairman*: In what state is the mountain road now? Almost as bad as it can possibly be. I do not think it is quite so bad as when I went to it, because some of the worst pinches have been made right. Perhaps I should modify my answer, and say very bad. There is only one actual sticking place just now, and upon this we are now at work, at Ell son's Bar.

907. From the dreadful state of the road, is it your opinion that a large number of men ought to be employed at once, under proper superintendence, to put the road in passable repair, so that the trade of the country could be carried on? I think, looking to the heavy rains just passed, and to the winter season just at hand, it would be advisable to devote a considerable sum to what are called desultory repairs, at the discretion of the superintendent.

R. B. Dawson,
Esq.

27 April, 1860.

908. By employing men? Yes, as he may please.

909. I should not like to give the superintendent too much power? I am always diffident in asking that for myself; but, as a matter of opinion, I would give him all power, if I had my way. I think the power cannot be too close to the work.

910. Is it your opinion that it is quite necessary to adopt some plan of that kind at once, for fear of labor getting scarce in the spring, in consequence of the Snowy River diggings? I think labor is likely to be scarce in the spring from that cause.

911. Would you recommend that mode of action? I would recommend simply that a considerable sum should always be placed at the discretion of the superintendent, to be used when, where, and how he pleases. That would be at my discretion. To me it is generally pleasanter to be controlled, since with the annual vote so little general improvement can be made that, do what one will, it is impossible to give general satisfaction.

912. *By Mr. Hoskins*: You are favorably disposed to the adoption of plank roads? I am, decidedly, where the gradients are suitable. I have here a paper on that very subject, which I sent to Captain Martindale two years ago. It embodies almost all I have been able to think upon the subject.

913. *By Mr. Clements*: Is not the piece of plank road near Wascoc's the most expensive piece of road that has ever been laid down on the Western Road? I do not know what it cost.

914. Being near a camping ground, is it not generally avoided by teams? Only by those teams which go to camp there.

915. From the position of that piece of road would you be enabled to form any opinion as to the wear and tear of a road similarly constructed upon a narrow part of the road, where all the traffic would pass over it? Yes, I think you can see by that road what is the durability of sound timber. In four years the originally sound timber is still sound and very slightly worn.

916. But, if the whole traffic had necessarily been obliged to pass over that planking, would it not have worn out much quicker than it has done? No, I do not think it would, because on those plank roads, over which *all* the traffic has passed, the wear is scarcely perceptible; you cannot see the sign of a wheel track. I think plank roads will be destroyed by decay long before they are worn out, especially if covered with sand.

917. *By Mr. Hoskins*: You have adopted plank roads yourself? Yes, on the Canadian narrow principle.

918. And highly approve of it? Yes.

919. And you think it is cheaper? We have laid down the few short pieces hitherto constructed more cheaply than metalled roads, and have spent very little in repairs, except in one instance where the construction was originally faulty.

920. Do you not think it would be the best plan to repair it with a plank road? Yes, I think all narrow sections, secluded from the sun, as many portions of the mountain road are, all sandy bottoms, and generally speaking all moderate gradients on this part of the Western road should be planked.

921. You think a plank road would answer best in an economical point of view? I do; but more particularly between Emu Plains and the Blue Mountain Inn. If we had plank roads here they would gradually change the traffic; we should soon have light teams started, as in America, which would gradually drive out the others; and these might be encouraged by differential tolls to the great advantage of the road.

922. Do you not think that from the saving in wear and tear of horses and vehicles it would be preferable to adopt plank roads generally? I am strongly in favor of them on all suitable gradients. I would not have answered this query so firmly three years ago, because I had not then seen what the wear and tear would be; but, observing how well they have worn under the present uncivilised, barbarous style of traffic, I have no hesitation in recommending a further advance in the same direction.

923. *By Mr. Rotton*: What is the designation of your office? Superintendent of the Western Road, having charge of the Bathurst Road.

924. Have you charge of the Mudgee Road as well as the Bathurst Road? No, I have not; I had up to last May.

925. Is any gentleman in charge of that road now? Yes.

926. Are you an engineer? No, I have not been professionally educated at all.

927. Nor surveyor? Nor surveyor.

928. What is the general condition of the Western Road? Very bad, those parts excepted which have been recently repaired.

929. Have you had an opportunity of seeing any of the other main roads of the Colony, the Northern or Southern? Not of late years.

930. Then you are not able to state what the condition of the Western Road is in comparison with the other roads? I am not.

931. Taking the whole road from the Nepean River to Hartley, including all the mountain road, how much per mile, on the average, do you think it would cost to make a good road of it, that is, a macadamised road, taking it as it is now? At a very rough estimate I would say £1,500 per mile for that portion of the road—for thorough work of course.

932. Is that for making it with metal? For plank where practicable and suitable, for metal where nothing but metal can be used, which would be on the steeper gradients.

R. B. Dawson, Esq. 933. I wanted to arrive at a comparison of the difference of cost between the two systems?

Neither could well be used entirely on account of the gradients being adverse in the one case, and the want of proper material in the other; * [and some little contrivance would be necessary where the plank road and metal road form a junction; for instance, in descending a metallated hill, we will say, where there is from 18 to 20 feet of travelling space, you find in a sandy bottom a piece of plank road which you are approaching; if that plank road is the narrow width, all the drays, towards the bottom of the hill, would concentrate upon one track to get upon the plank road, and consequently the metallated road at that point would be unduly worn. To avoid that I would have the plank road made so as to fan out a little, to concentrate the traffic gradually.]

27 April, 1860.

934. Then you think £1,500 per mile would make a good road, plank in the sandy parts and metal where plank would not be practicable? I think so.

935. Do you think it would be practicable in the sandy places on the mountains to make a metallated road at all? I think it would be possible, but much more expensive at first and far more expensive to keep in repair.

936. You say you have devoted a good deal of attention to the subject of plank roads, and have written out your ideas? I have.

937. Have you the document with you? I have.

938. Have you any objection to put it in? None whatever. (*The witness handed in the paper referred to. Vide Appendix A.*) There are two papers, I may mention. The one has reference to narrow metallated roads (B), and the other to plank roads.

939. The questions I have asked you now have had reference not to casual repairs, but to constructing and making a good road; and your opinion is, that £1,500 a mile would do it, at a rough estimate—do you think it would cost as much, or take less? When I say £1,500 a mile, I mean that the 43 miles of mountain road could be constructed for a bulk sum represented by £1,500 a mile.

940. And from Hartley to Bathurst at less cost? From Hartley to Bathurst material is everywhere abundant. Excepting from Woodside westward, there is no part of the line where ballast and metal are not abundant.

941. On that part you would not recommend a plank road? I think not, unless upon some swampy flats; although, generally, even the worst flats have metal near at hand. The difficulty of maintaining a metallated road would also be less felt on the Bathurst side, as there are settled inhabitants scattered here and there; while there is no population whatever between Hartley and Emu Plains.

942. Would the cost be as great between Hartley and Bathurst as that you have now spoken of, between the Nepean and Hartley? No, on the average I think not, because there is more road already made there, and a good deal of the road could be done at a much more reasonable rate than on the mountains. Also, what we *have* done is the very worst of it, such as the sections near Redbank and the Frying-pan.

943. You spoke just now of plank roads costing 16s. a lineal yard? Yes.

944. Did you allude to those experimental pieces that have been made? Yes.

945. Do you include logging on one side and metallating on the other as well? Yes, nine feet of logging, two feet of metallated margin, and seven feet of sloped earth bank, and the drains—in fact, the road complete; but in any future work the timber track should be two feet wider.

946. These were merely experimental bits of road-making, as I understand, to prove which was the best way of making a log road? They were laid down partly as an experiment, partly because they were cheaper than metallating, and partly because, from the very wet season, that was the most practicable mode of repairing those very bad places.

947. If it cost 16s. a yard to make the road in that way—half metallated and half formed—could it not be done for less, supposing you were to construct a planked piece in the centre of the road sufficient for a track? For a double track?

948. Yes? No, I think not; I should always have preferred a double track, but for the difficulty of getting a sufficient quantity of straight timber of the necessary length. Working, as we did, with the axe and adze only, we were obliged to be content with what timber we could find that was straight; and now it would be doubly difficult to get proper timber without saw machinery.

949. Then to make a plank road wide enough for a double track it would cost more? Yes. The more timber that is required the further we shall have to go for it, and the greater, consequently, will be the expense of haulage.

950. What is about the average that you have paid for metallating the road? For metallating only, or metallating and ballast?

951. For the repairs that have been effected where contracts have been taken? I can give you the highest and the lowest. Our highest has been 30s. per lineal yard, and the lowest 10s.; one for metal, the other for ballast—decomposed granite.

952. Does that include metal, ballast, and all? Everything excepting culverts; 10s. for granite gravel, 30s. for metal.

953. What do you imagine it would cost to make a log road—or what you call a plank road—such as you have stated has been done for 16s. a yard—to make it double the width, so as to form a sufficient track for drays to pass? Of sawn timber of course, because practically it could not be done in the same way as formerly, with the axe and adze, on account

* NOTE.—This portion of answer 933 was *obliterated* by witness (when the MS. evidence was under his revision) "as not relevant to the question asked." The original has been restored by order of the Committee (*Vide Proceedings*, 17 May, 1860.)

- account of the deficiency of suitable timber. I should hardly think it could be done for less than 25s. a yard. For a width of 11 feet my estimate was £1, but a very rough estimate.
954. How do you make out, from the prices you have now stated to us, that you could construct a road on the mountains for £1,500 a mile, and for a less sum on the other end of the road, when it appears from the prices you are now paying that the formation and metalling of the road costs at the rate of £2,640 a mile, and the logging, at the estimate you have now given, £2,200? Our highest price for metal is, it is true, £2,640, but there would be a good deal of road gravelled at say from 10s. to 12s. per yard; and there is a considerable extent of road already done, and this too on the very worst places.
955. You take credit in your estimate for the repairs already effected? Yes. Making, of course, a very rough estimate. In this kind of way, I think a safe sum to assume, from Penrith to Bathurst, taking credit for all that has been done, would be £1 a yard, allowing the present price of labor to continue.
956. £1,760 a mile? Put it down at £2,000 a mile; I think that would clear it.
957. It would not be practicable, I think you said, on the mountains, to make a plank road continuously, but where practicable, I think I understood you to say, a plank road would be the cheapest? Both in construction and maintenance. The steeper gradients would have to be formed of other material.
958. Whether the work were performed by contract, or by task-work, or by day labor, would it be possible for you to dispense with the services of the overseers? I do not think it would.
959. You think it would not be by any means an economical arrangement? Decidedly not. For instance, in the laying of a plank road the men must be watched very closely, as it is essential that every log should be thoroughly packed with the packing hammer till it lies on a thoroughly solid base, otherwise it is liable to constant displacement.
960. Your duty is, I presume, to lay out the work? To specify and to lay out the work.
961. And generally to inspect it? Generally to inspect it, and to keep the accounts.
962. To do the office work? Yes.
963. It would be impossible for you to be continually at the different contracts which you give out, inspecting them as they progress? It would be impossible.
964. And unless you had the assistance of overseers it would be possible for the contractors to scamp their work? Yes. Incidentally I may mention that I nearly wore out myself, and my horses too, before I was allowed mounted overseers.
965. You have stated that a great deal of material was procured previous to the system of contracts? No, not a great deal.
966. There was some? There was some, and part of it lies there still.
967. Do you make any arrangement with the present contractors for the use of that material? It still lies there, available for a road we have in contemplation. There was a particular reason for leaving that metal there.
968. That is one spot. Allow me to draw your attention to another particular portion of the road, known as the Frying-pan Hill, on which there is a great deal of metal. I observed lately, in passing it, that that metal has been used up in the repair of the road—has the contractor made any allowance for it? It has not been used by the contractor, but by ourselves in task-work. Part of the metal at the Frying-pan Hill was not ours, although it appeared to be. It was broken on speculation by one of the men that we had employed on task-work, who, finding that we had no work for him for a time, occupied himself in breaking this metal, and finally sold it to one of the contractors.
969. Where metal has not been previously disposed of, if it is used by a contractor is any allowance made for it? Decidedly. No contractor would be permitted to remove a stone without paying for it.
970. It has not been a loss to the funds? No. I think in one case a contractor was allowed to remove some stone because it was in his way, but he became bound to replace it.
971. There are a quantity of logs lying at the bottom of Mount Victoria, which were procured by you? Yes.
972. At what cost? On the left hand side of the ascent of Mount Victoria there is an out-turn cleared, and a good deal of that timber came from it; I had it laid on one side intending to timber, in the adzed log fashion, the viaduct near Jones' inn.
973. Will you state what the cost of that timber might have been? We had teams employed by the day, and perhaps there were as many logs left unused as a couple of teams would haul in * [a couple of days—say from £2 to £4. We used a good deal of these logs for those little cross drains. Most of them have been used up, but the power of using them has been taken out of my hands.]
974. There is one question I want to ask, but I think it right to tell you that you are not bound to answer it, and perhaps it is also right to tell you that it has been stated, not to the Committee, but to me personally, by people in the district, that you had your own servants employed in the construction of the roads, and that you derived an individual benefit from their labor before the roads were let out by contract. Had you any men in your own service, or any teams of your own, employed on the road, or did you in any way derive any individual benefit from the labor of any of the people employed on the road? In no shape or way, directly or indirectly, have I ever been concerned in malpractices of this

* NOTE.—This portion of Answer 973 was *obliterated* and altered by witness (when the MS. evidence was under his revision) thus,—“Three or four days, say from £5 to £6. We used a good many of these logs for side guards, cross drains, &c. Most of them would have been used up but the urgent occasion for them passed away with the flood season of 1857-8, and worse places elsewhere have since claimed more attention.” The original has been restored by order of the Committee (*Vide Proceedings, 17 May, 1860.*)

R. B. Dawson,
Esq.
27 April, 1860.

R. B. Dawson, this kind. The statement is utterly without foundation, in whatever way the question may be put. A similar question, with respect to carts, was put to me officially by Captain Martindale, some two years ago, and received my reply. At that time I had never possessed a horse of my own that would go in harness. I have only had one since, and that one in constant use for my own domestic purposes. * [I was asked if I employed my own carts, but I had not a horse that would go in harness at that time.]

Esq.
27 April, 1860.

975. Have you any personal interest in any of the contracts now in operation? Not the remotest. None but a scoundrel could, I imagine, have any such interest while holding my position.

976. A sum of money has been placed upon the Estimates for the Mount Lambie diversion—is it intended to abandon Mount Lambie altogether, and open the diversion as the road? When the diversion is completed it is. In the meantime it is proposed to keep the old road over the mountain in passable condition.

977. Of course you have considerable knowledge of the locality, the character of the soil, the gradients, and so on? Yes.

978. Which do you consider the best line of road, the diversion or the road over Mount Lambie? I think unquestionably the diversion. In fact I had not been on the road a fortnight before I wrote a special report on that point.

979. When once made do you think it will be maintained at less cost than the road over Mount Lambie? Yes, for several reasons I could state.

980. Are you able to state what is the ascent of Mount Lambie—what height? No, but the information can be obtained from the sappers' and miners' survey. There is no comparison between the gradients.

981. In comparison to Mount Lambie there is no hill on the other line? No; when our road is cleared and shaped, there will be but one ascent and descent to be spoken of, and even these will be trifling when compared with the old line.

982. I presume you had not anything to do with the planning of the bridge which is erected over Cox's River? No.

983. Or the site which was chosen? No.

984. Is there not some fault in the approach to the bridge on the western side? Yes, there is at present an apparent fault, because the work is not completed; a contract being now open for cutting out the opposite bank, and giving a wider sweep.

985. *By the Chairman*: I understood you to say that the stone on the west side of Mount Lambie was reserved for some specific purpose; if so, what purpose? It was at first intended for the repairs on Mount Lambie itself, or for any point adjacent, because the metal was there abundant, and was got chiefly by screening, not by breaking, at a full cost of 3s. 6d. a yard as it lies, which is very cheap. Generally, I may add, I have been in the practice of laying up stone wherever I could get it, so as to have it ready when the right weather comes for spreading it.

986. Can you state to the Committee the distance from where the diversion comes out on the present line of road to Solitary Creek? I cannot tell you precisely; but I can tell you nearly the difference between the two by rough measurement. I believe it is from three to four chains, not more.

987. The new road is three or four chains longer? Yes.

988. Will you state to the Committee what is the formation of the country on the proposed new line? It varies very much. From Solitary Creek to Greenhatch's house it consists chiefly of long sloping gravelly ridges, with occasional black flats of no great length; through Greenhatch's paddock about 500 yards of black soil; from Greenhatch's paddock to Honeysuckle Swamp open ridges, rather gravelly for the most part; across Honeysuckle Swamp about 600 yards of black soil, with a good fall for water, and, on the whole, a pretty sound bottom, as drays can pass over it even now in anything like reasonable weather; from Honeysuckle Swamp to the old line, which completes the diversion, there is a somewhat steep ascent and descent of ordinary soil, which is now being formed and drained under contract.

989. *By Mr. Rotton*: A considerable portion of that road has been open for some time? Yes; there is a great deal of traffic over that road in dry weather, and even some in wet weather.

990. From Solitary Creek to the dividing range west of Greenhatch's house, in any sort of moist weather, the country is very soft, is it not? No; it is not a very soft country; the bush track there is generally pretty hard, and even the narrow road which has been formed by the drays does not cut up very much.

991. Will it require to be macadamized to make it passable in wet weather? If cleared and travelled upon at first, during dry weather only, a good deal of good bush road may be made without macadamization. It will, however, require to be macadamized on the black flats.

992. With ordinary repair would it be as good as the other? With reasonable care it will speedily make a much better road.

993. Mount Lambie is one of the worst hills on the Western Road? I think it is the very worst, since the gradient is steep on both sides.

994.

* NOTE.—This portion of Answer 974 was *obliterated* by witness (when the MS. evidence was under his revision) and the following substituted,—“I have traced these and similar calumnies to one well-known individual, who, besides being an industrious and persevering detractor, has been also at the same time an assiduous applicant for my appointment.” The original has been restored by order of the Committee (*Vide Proceedings*, 17 May, 1860.)

994. And this diversion entirely avoids it, with a very gradual ascent? Yes; this diversion is a road with, on the whole, very moderate gradients. R. B. Dawson,
Esq.
995. *By the Chairman*: If Mount Lambie was put in thorough repair would it not last for years with slight repairs? I do not think Mount Lambie could be put in proper repair without great expense. It is a very narrow scarping, in some places not more than 13 feet 6 inches wide; not, in fact, wide enough to admit of side drains being formed without heavy side cuttings being first made. It is entirely secluded from the sun in winter, and the snow lies upon it for many days after it has disappeared from the other side. 27 April, 1860.
996. *By Mr. Rotton*: You referred just now to some overseer whom you had occasion to discharge? Yes.
997. What was his name? Patrick McGarry.
998. Are you aware whether he is the same person who has given evidence before this Committee? I have no doubt he is the same person.
999. *By the Chairman*: Is there a surveyor on the Bathurst line of road under pay? Not that I am aware of. There was a young man in charge of two bridges; I believe he is a surveyor by profession.
1000. *By Mr. Rotton*: He belongs to a different department? He belongs, I believe, to the engineer's department.
1001. Some little time ago, perhaps more than twelve months now, was there not a diversion made from the top of Rivulet Hill, near where the public-house now stands, to avoid a very bad hole that was on the main road? The bad hole was a section of the road, from 300 to 400 yards in length, and was utterly impassable in wet weather.
1002. Was not a great deal of money spent on that diversion? No; it was an old road which was re-opened; a gang consisting of an overseer and eleven men were placed there, and the diversion was formed in about a month. It has been travelled over for about two years. There were at that time no means available for making the main road passable.
1003. Would not the amount expended on that diversion have put the main road in a passable state of repair? I do not think ten times the amount would have done it at that time. I really do not think it could have been done, till dry weather set in, at any price; and in the meantime, but for the diversion, all traffic would have been stopped. It was a quagmire to a man's middle. It was difficult during that season to get a horse, within a compass of twenty miles, able to draw an empty cart even. Corn was 20s. a bushel, and the mail brought its own forage, truss by truss, from Bathurst to Bowenfels—38 miles.
1004. Then, in fact, there was no alternative but to repair that diversion? That was the real fact; and right glad I was when it was done.

APPENDIX A.

WESTERN ROADS.

MEMORANDUM on Single Lines of Plank Road, having reference to certain Timber Tracks lately constructed between Penrith and Hartley, of which Plans and Sections are forwarded herewith.

HAVING given my best attention to the formation, and, as far as it has yet gone, to the working, of single lines of timber tracks, I would beg to offer the following observations, as the result of much anxious reflection on the subject:—

1. *As to Materials.*—I think that to determine upon particular kinds of timber only, for such works, would end in disappointment. Nearly every kind of timber must be used, or, except in some few places, enough will not be found. I think that even young trees, of not less than nine inches in diameter, may be used with advantage. If stripped of their sap by the steam saw, and laid, well packed, upon ground properly drained, I believe they would form a very durable roadway. In many parts of this line, I doubt if timber sufficient could be got in full lengths of nine feet; but I am well convinced that shorter lengths, upon extra sleepers, would, at some additional expense, answer equally well, if properly packed and spiked. To insure the greatest amount of good timber in any given roadway, operation should be commenced at any point where it may abound. The newly formed line would then carry forward the good timber at the minimum expense of haulage.

2. *Comparative durability of various kinds of Timber.*—This is a question for experience. Some of the Colonial woods are well known to be lasting to a proverb—"ironbark" and "box," for instance; but I conceive the real point to be, What is the average durability of sound Colonial forest timber—for, if plank roads should be extensively laid down, every kind, with perhaps one or two special exceptions, will infallibly be made use of. As far as my experience goes, hearsay evidence, derived from sawyers and splitters, is not often to be depended on. The same wood goes in different districts by different names, and wherever any particular sort grows abundantly there is always a disposition, among those who live by cutting it, to give it a fair character. Some timber is of bad reputation undeservedly—"spotted gum," for instance. This timber, in the sapling state, is worthless. I have found it, after two or three years' use in a dry situation, to be perfectly rotten, and extensively perforated by a worm; yet, when full grown, and stripped of the sap, it forms a most useful and durable timber. A careful examination, at the ground surface, of the posts used in old Colonial fences (the dates of whose construction will be often ascertainable), would, perhaps, be the readiest way of arriving at a correct conclusion upon the subject of this paragraph—due regard being had to the soil and situation in which such posts may have stood. The following facts may be valuable, as far as they extend:—A plank road, 21 feet wide, on several rows of sleepers, was laid over about 100 yards of swampy ground, near the Old Pilgrim Inn (five miles west of Penrith), about two years ago. It is formed of various kinds of timber found in the neighborhood. The roadway is not properly drained, inasmuch as the timbers have no cross slope, while the presence of standing water under them makes itself audible to a passing horseman in wet weather; yet the roadway is, to all appearance, in nearly as good preservation as on the day it was laid down. The Denison Bridge is another case of about the same duration and preservation; but here, the planks, being laid without any soil beneath, have immediately dried with every return of fair weather. The third case which I have to mention is of some small green saplings laid down over a culvert on a private road, at the North Shore, now nearly three years and a half ago. In July last, I noticed that the rains had denuded the soil from some of these saplings; yet they then, after three years' service, appeared perfectly sound, and refused to break under such weight and force as I could personally bring to bear upon them.

3. *As to packing the Planks, or laying them hollow.*—In all the adzed log roadways I have yet laid down, the cross timbers rest upon a solid substratum as well as upon the sleepers, and are slightly sloped to insure surface drainage—the printed (American) instructions, which I have followed, insisting strongly.

R. B. Dawson,
Esq.
27 April, 1860.

strongly upon *thorough* packing, which, if well performed, renders spiking to the sleepers unnecessary. I have since been told, however, that many plank roads in Canada are laid *without* packing, over hollow drains, the planks being spiked to the sleepers, which last are laid, as nearly as possible, under the wheel tracks. I presume that this mode of laying the timbers is intended to retard their decay by keeping them from the damp of the soil. After some consideration, however, I still incline to prefer the method of close packing, for the following reasons, viz.:—First, simplicity of construction. A road laid hollow, and dependent throughout upon effective under drainage, would be both more difficult and more expensive to make. Without numerous and trustworthy foremen of works (not easily obtained) the drainage would be ill executed, and consequently worthless. On the contrary, any defect in packing would be immediately detected by the springing of the planks under heavy weights. Next, safety in use and simplicity in repair are both in favor of the solid system. On a road laid hollow, the breakage of a single timber would form a dangerous obstruction, only to be repaired by another timber of the same dimensions; while on a road laid solid a defective timber might be temporarily replaced by a plugging of gravel or broken stone. Moreover, the breakage of a timber laid hollow would at once expose the drain under it to more or less damage. Thirdly, timbers well packed upon a sound under stratum will not require spiking. This, besides the saving of expense, would admit of the under faces of the planks being readily turned uppermost should the original surface of the roadway become injuriously abraded by the traffic. Moreover, careful packing would go far towards hermetically sealing three sides of the planks, and would thus, I think, considerably retard their decay. I conceive, too, that planks in a roadway have their durability somewhat increased through the pressure of the traffic filling closely with soil all their superficial cracks and veins. They are thus, in a considerable measure, defended from the action of the weather. Fourthly, a roadway laid hollow will become almost useless as soon as unsoundness commences, since the timbers *alone* must in this case support the whole of the pressure; whereas, if laid solid, decay may proceed to a considerable extent before the roadway will be rendered unserviceable—the actual weight of the traffic being borne, in this instance, not by the timbers but by the ground.

4. *Should the Planks be laid diagonally, or at right angles with the axis of the Road?*—Both plans have, it is stated, been adopted in America—the latter being the more usual. The experimental roadways on this line have hitherto been laid rectangularly, partly from this being the simpler mode of construction, and partly because, since hard timber wears *smooth* under traffic, while soft timber wears rough, a rectangular position of the planks seemed more likely to prevent animals from slipping than a diagonal bearing.

5. *With respect to the Out-turns.*—Looking to the heavy loads and lengthy teams now in vogue, I think that a double out-turn, composed partly of broken stone (as in No. 3 plan and section), is very desirable. In any case, the roadway should not be considered finished for traffic till the sidings have been thoroughly consolidated by rolling. I am aware that some practical difficulties present themselves. Rollers of the best kind will be costly to purchase, and, especially on a mountain road, both difficult and expensive to transport. I think, however, that all this may be met by having ordinary “box drays,” with cylindrical wheels about sixteen inches wide, a breadth of tire which was once not uncommon in England. Such drays might be sent when wanted, either empty or with supplies, and there loaded as rollers to the required weight. Such dray rollers would often be useful in consolidating tracks to quarries, and in bringing timber and stone from ridges rendered unsound by the rains, and consequently impassable by narrow tires, if heavily loaded.

6.—*Breadth of Planks.*—Although, in America, boards of from 9 to 12 inches wide are commonly used, I am inclined to think that the hardwood of the Colony would prove slippery if laid down in similar widths. Narrower planks, say from 5 to 8 inches, would give firmer foothold, would be less liable to be warped by the sun, and would be far more easily procured.

7.—*As to Spiking or not Spiking the Planks to the Sleepers.*—On roadways, laid hollow, spiking would no doubt be necessary; but I conceive that those laid solid would not need spikes, which, it is said, are frequently dispensed with on the American lines. On the single line roadways which I have laid down neither treenails nor spikes have been used, nor do they seem to be required; but the case is somewhat different, inasmuch as the adzed logs are shouldered on to the sleepers, and are individually heavier, in most cases, than sawn planks would be. Under the superior consolidation to be derived from *double* well rolled out turns, I consider that spikes would certainly not be needed, and their absence would facilitate a reversal of the planks should that operation eventually become desirable.

8.—*With respect to Sleepers.*—I think, that in this case, all care should be taken to have this part of the roadway formed, not only of the soundest but also of the most durable timber; since well selected sleepers would probably out-last more than one set of planks.

9.—*As to the First Cost of Single Line Plank Roads.*—The roadways, formed of logs adzed level, and laid on sleepers, have been laid by contract in small patches, at 16s. (sixteen) per lineal yard. A similar roadway with a *double* out-turn,—*i.e.*, having two margins of broken stone, each 4 feet instead of 2 feet wide (as in No. 3 Plan and Section), can now be laid down for 20s. per lineal yard. How the application of locomotive steam saws would affect the matter of cost, I am unable to say; but there is little doubt that, with their assistance, a timber roadway could be much more quickly as well as more efficiently constructed. I do not think, however, that the cost of such works would be much diminished by their being undertaken on a larger scale, since the timber would have to be brought from greater distances, and less accessible places, in proportion to the quantity required.

10.—*Comparative view of Planked and Macadamized Roadways.*—I conceive, that macadamization, though admirably adapted to populous countries in which timber is scarce, is not so applicable to the roads of a thinly peopled colony. From the moment a macadamized road is completed, a series of minute repairs become necessary, which cannot at any time be neglected, without ultimate and serious loss. Moreover, such repairs require to be performed by an intelligent body of men trained to the work, or the money expended will be merely thrown away. Assuming that it is possible to collect and train such bodies of laborers, it is scarcely possible to retain them permanently under the excitements to change of life afforded by most newly settled countries. Repairs, therefore, are too frequently neglected altogether, or performed at long intervals only. What is done, is not *thoroughly done*; lateral drainage becomes interrupted, and a very costly and well constructed work may, in fact, be nearly destroyed in one wet season, by a neglect for which nobody can well be blamed.

It is further to be observed, that the long periods of drought to which this country is subject are highly unfavorable to macadamization, which cannot be efficiently performed unless sufficient moisture be present to consolidate the broken stone. Moreover, the heavy flooding rains which so often succeed long droughts are also unfavorable to this operation. At such times, unless large quantities of broken stone are used, it is swallowed in the mud. If, again, stone should be broken and left ready to be applied at the proper time, the deficient means of transport, and the uncertainty of procuring labor, will make it very difficult to insure that the proper season for spreading it shall be seized when it comes. After all is apparently completed, there will still exist a constant necessity for much attention and some skill. In short, without a well organized and costly system of superintendence, macadamization must everywhere prove a failure. With plank roads on the other hand, long droughts will be rather favorable to their construction; while the experience of the past season proves that such works need not be discontinued, nor much delayed by the wettest weather. As soon as any portion is laid down, the lateral drainage from it is perfect, and will remain perfect for years, or until, in fact, the roadway begins to decay. The repair is also simple; while the absence of all concussion is an element of durability which no skill and labor can provide to nearly the same extent upon a roadway of broken stone.

For the above reasons, I am inclined to think that, wherever timber is sufficiently abundant, it will be found a superior and economical covering for all clay soil, or swampy roads, upon which the gradient

gradient is not so steep as to render the woodwork too slippery for traffic. That its use may be probably still further extended with good economy, is not unlikely; but I think that the experiment should be, in the first instance, confined to localities where these conditions exist.

R. B. Dawson,
Esq.

R. B. DAWSON.

27 April, 1860.

Bowenfels.

APPENDIX B.

MEMORANDUM.—WESTERN ROAD.

REPORT upon the applicability to this line of a Metalled Roadway, twelve feet wide only, with a carefully sloped and drained earth track on either side.

1. The principal objections to a narrow line of hard road, whether of timber or metal, arise not from the amount of traffic over the Western Road, but from the mode adopted by the teamsters of putting enormous loads upon two-wheeled drays drawn by long strings of bullocks or horses. Upon this line the load carried over two-wheel tracks is seldom less than about 65 cwt., as follows:—The dray will weigh from 14 to 17 cwt., forage for the journey about 10 cwt., and the minimum load about 40 cwt. The whole is drawn by from five to six horses, or from ten to twelve, and sometimes fourteen bullocks. Of many similarly laden drays, all carrying sawn timber from Sydney to the Lachlan River, I stopped one, a few months since, to examine the "weigh bill." The gross weight on the two tire tracks was 4 tons 8 cwt.; and I have reason to believe that, in dry weather, such weights are frequently placed upon the road. In this case the width of tire was 2½ inches.

Weights such as these, over so narrow a surface, could hardly be supported by any earthen bank during continuous rains; and the metalled roadway would have to be gravelled and rolled to a nearly smooth surface, ere unshod oxen would travel on it, if the alternative of an earthen track lay before them, which would thus be used to a detrimental extent. Moreover, heavily laden drays in descending narrow roadways, laid upon slopes, would make constant, and most injurious, use of the earthen tracks, especially in wet weather. Upon all the hills it is daily to be seen that both drivers and their cattle invariably seek the softest track for descending wheels; and will often come down a hill with one wheel actually in the side drain, however deep and dangerous it may be. In truth, with the loads now carried, this course is almost a necessity, in order to save the backs or necks of the foot-sore and often weak or leg-weary shaft animals.

2. The unwieldy length of the teams is another difficulty in the way of narrow tracks, as forming an obstacle to exact driving. The only course which occurs to me, as likely to obviate some of the objections urged above, is to have the side track or tracks firmly barred against all continuous traffic by heavy transverse logs, placed at such intervals as would admit of one team passing another easily, but would yet force both on to the central track immediately after the passage. Here again, however, the enormous weight and strength of the teams is adverse to the improvement. No ordinary obstacle would prove a barrier. Even now experience shews that the heaviest logs placed to guard side drains or parapets will sooner or later be driven over, and more or less displaced.

3. Before a narrow metalled road of this kind—indeed before any extensive scheme of economical improvement—can be fairly carried out upon these roads, I think steps must be taken to limit the weights carried upon the present narrow tires. Broad wheels will undoubtedly be a great improvement; but should the Legislature insist stringently upon them, some decided and extensive improvement of the roads should precede, or at least accompany, their introduction. In a wet season, with roads as they now are, it would be very difficult to extricate a broad wheel from a deep mud-hole when the mire had once closed over the felloe. In Victoria, I am informed that this difficulty has been met by fastening thin boards or plates from felloe to felloe on both sides, so that the wheel, thus covered, becomes a hollow cylinder, but I have not been informed whether this plan has answered sufficiently well to have been generally adopted. In that province, I am assured that heavy teams have long been discarded, and the lighter American modes of conveyance adopted. A light cart with two or three horses at most is said to be the usual vehicle for "goods traffic." Such a system would facilitate the adoption either of narrow metalled roads, like those now under consideration, or of plank roads. The comparatively light cart, or wagon, could be confined to any prescribed route by inexpensive barriers, easily procured. A good road for such traffic could be economically constructed, and would slowly deteriorate; while the saving to carriers in forage, wear and tear, time and temper, would be incalculable.

Bowenfels, 17 September, 1857.

R. B. DAWSON, S. W. R.

TUESDAY, 8 MAY, 1860.

Present:—

MR. ROTTON, | MR. CLEMENTS,
MR. PARKES.

WILLIAM CUMMINGS, ESQ., IN THE CHAIR.

Mr. William Christopher Bennett, C.E., called in and examined:—

1005. *By the Chairman:* You are an officer in the Road Department? Yes, I am engineer to that department.

Mr. W. C.
Bennett, C.E.

1006. Are you a military engineer? No, I am a civil engineer and an associate of the institute.

8 May, 1860.

1007. Have you at any time been sent to inspect the Bathurst Road from the Nepean to Bathurst? Yes; I was instructed to go to Bathurst to inspect the Denison Bridge, which was then in danger, and on my route I was directed to examine into and make a short report upon the state of the road; and I reported accordingly.

1008. Have you that report with you? Yes, and I now produce it.

1009. In what year was this? In 1857.

1010. Did you make an examination of the road? I made only a cursory examination at that time, because the state of the Denison Bridge was the great object of my visit.

1011. Then, in consequence of some repairs being required to the Denison Bridge, you were instructed in 1857 to go and inspect it? Yes.

1012. That was your special mission? It was.

1013.

- Mr. W. C. Bennett, C.E.
- 8 May, 1860.
1013. And on your way you inspected the Bathurst Road? I did.
1014. On the occasion of that inspection in what state did you find it? It was in a very bad state.
1015. In what month of the year was this? In the month of September, 1857.
1016. Did you on that occasion take particular notice of any recent repairs that had been effected? I did.
1017. What did those repairs consist of? There were a great many patches of desultory repairs in different places. Those at Williams's Pinch, it strikes me, were about the most extensive; but there were no large repairs in any particular place, only a number of small repairs here and there.
1018. Were they of a permanent character? No, certainly not.
1019. Did the material used in the performance of these works come under your notice; if so, will you state to the Committee what it was? Different materials were used upon different parts of the road. A kind of igneous rock or gneiss was used near Hartley; on the mountain an iron sand stone was employed, and in some places a decomposed granite.
1020. Will you state when and on what part of the road the repairs were completed? Williams's Pinch was the only one that was perfect that I can remember. They were doing some repairs at Hartley; and there was also a plank road that had been executed by Captain Scott.
1021. That is the piece of road by what is known as "The Pilgrim"? Yes.
1022. Did you examine that portion of the road called the "New Soldier's Pinch," or did you travel by the line of the "Old Soldier's Pinch"? I think I went over both. I think I went by one line and returned by the other. I have been over both since, but I cannot be certain whether I did so on that occasion.
1023. I understand you to say that the repairs you took notice of were of a very slight nature? Yes, they were merely temporary repairs. It certainly struck me that they were not of a permanent character.
1024. Did you take notice of a piece of road at what is called Little Hartley? Yes, at that time that piece of road was being constructed.
1025. It was a piece of what is commonly known as "corduroy road?" No, it was not strictly a "corduroy road;" it was an adzed log road.
1026. Half the width of the road was laid down with saplings and the other half was macadamized? Yes; but in a corduroy road the saplings are laid down round in their natural form, but on this road the round surface was adzed off.
1027. Then one-half was laid with adzed logs? Yes, and the other half with stone.
1028. Have you any idea of what that piece of road cost per yard? As far as I can recollect it was 17s. per yard.
1029. Were you accompanied on that tour of inspection by the superintendent of the Western Road? I was; he returned, but did not go with me. I went up by the mail, as there was a pressing necessity for my visiting the Denison Bridge at once, and I rode back.
1030. Was there a large heap of burnt clay shewn to you, as being intended to be used for ballasting the road at Little Hartley? I do not recollect it.
1031. You recollect no remark being made to you in reference to that? No, none whatever.
1032. With respect to the making of this corduroy or adzed log road, do you consider that in making it they were experimentalising on the road; and is that a usual thing to do? Decidedly it was an experiment.
1033. And were these experiments authorized by the Government? That I do not know, for at that time I was not connected with the Road Department, but was employed upon the railway. It was only just after that that Captain Martindale got charge of the roads.
1034. The repairs that you then inspected, or that came under your notice upon that occasion, did you approve of them as having been properly done? Not as permanent works; but, under the circumstances that Mr. Dawson explained to me, they were, perhaps, as good as could have been done by him with the means at his disposal. His object was to keep the road open for traffic, and this was the instruction he had received; all that he was, therefore, trying to do was to repair the worst places so as not to let the road be shut up.
1035. Do you know what power was vested in him with regard to repairs? He had the usual control over the works. He was under the Colonial Architect at that time; but that officer never interfered with the details, with these exceptions, that Mr. Dawson was restricted from making contracts for more than £50 to one person at one time, and that he was not to employ overseers at more than a certain rate of wages—for which rate he could not get good and responsible men.
1036. Could you state to the Committee the number of men employed on the road at that time? No, I could not; as I have said, I was not then connected with the department.
1037. Had not Mr. Dawson full power and control over the funds for road purposes, and for the repair of the roads, so that he might use them how he liked and where he liked? Yes, with the two restrictions I have named, he had—that he was not allowed to give overseers more than a certain rate of wages, and was not permitted to give a higher contract than £50 to the same person at the same time.
1038. Did you inspect the road over Mount Lambie? I did.
1039. What state of repair did you find it in? It was in a dreadful state—all but impassable. I recollect that the mail could not go over it, and that we had to go round by Greenhatch's.
1040. Have you inspected that particular part of the road since? I have; but I would remind the Committee that, hitherto, I have given my answers solely with reference to my visit in 1857. Since then, however, I have made two official reports upon the state of the road.
1041. Then, in 1857, you say, Mount Lambie was in a very bad state? Yes, very bad.

1042. Did you, at that time, take notice of a large quantity of metal lying ready for use on the western edge of Mount Lambie? Not at that time. Mr. W. C. Bennett, C.E.
1043. How long afterwards was it that you saw it? When I went up the road on a tour of inspection with Captain Martindale, more than twelve months ago—about the end of 1858. 8 May, 1860.
1044. It was then you noticed this heap of metal? Yes.
1045. And what state was Mount Lambie in at that time? It was bad; but not so bad as it was in 1857.
1046. Do you recollect some large impassable holes in the centre of the road going down towards McNeilly's? Yes; there were some bad holes there.
1047. Were not the heap of stones that you saw in sight of this impassable portion of the road? I am not prepared to say that it was in sight; but it was not very far off. But, if you will permit me to say, Mr. Dawson gave me some good reason why he had not put the stones on that piece of road. What his reason was I do not now recollect; but I perfectly well remember suggesting that it would be as well to put the stones into those holes, and Mr. Dawson then gave, what I considered to be, a good reason for not having done so.
1048. You do not recollect what that reason was? I do not.
1049. Did he state for what purpose he had collected them? He may have done so; but I do not recollect what it was.
1050. Did he say what he was going to do with them? He must have done so, for, of course, that was his reason for not putting them in the holes.
1051. And that you do not recollect? I do not.
1052. There was, however, some reason given for keeping the metal? Yes.
1053. And that reason at the time appeared to you to be a valid one? I was satisfied with it at the time, because, if I had not been, I should have reported the circumstances to the head of my department, Captain Martindale. Not having done so I imagine his reasons must have been valid.
1054. Is it possible that your memory is so defective that you can remember seeing the heap of stones, and calling attention to it, and yet not remember the reason that was given for not using it? So it is; but if the Committee will but consider the very great number of little things of this kind that I have to deal with, and the utter impossibility of keeping them in mind for any length of time, they will see that there is good cause for my not being able to remember such a circumstance as this which happened so long ago.
1055. But you must confess that it does seem strange that you should have forgotten the reason given in such a striking case as this? It may; but I do not recollect the reason he gave, and the only cause I have for saying that the reason then given was a valid one, is, that instructions were not given for the stones to be used, as should have been done had I not been satisfied.
1056. However, Mount Lambie was in a very bad state of repair at that time? It was.
1057. And you are aware that there is plenty of metal for road purposes on the Mount? Yes, a great deal.
1058. I understood you to say, that in going up by the mail in 1857, you went round by the diverging line, to avoid Mount Lambie? Yes, by Greenhatch's.
1059. Did you inspect that line of road? I did.
1060. What was the state of the weather at that time? It was a very wet year.
1061. Was it not in consequence of the dreadful holes on the Mount that neither the mail nor teams could pass along that road? Certainly; it was in consequence of the state of the road.
1062. Have you been round the diverging line more than once? Yes, I have been along it five or six times.
1063. In wet weather? Yes.
1064. Will you describe the state of that piece of road in wet weather? Part of it is soft.
1065. What portion of this diverging line is affected in that manner? I should say about the half of it.
1066. Is it not completely boggy in wet weather? Yes; that is what I mean when I say it is soft.
1067. Is it possible to make a substantial road round that diverging line, unless at very great expense? The expense would be considerable, but not greater than it would cost to make a road over the hills, and when once made the cost of maintenance would be much less.
1068. Do you recollect the road by Thorpe's Pinch? I do.
1069. If it cost £2,600 a mile to make the road there, would it not cost much more to make the road round by Greenhatch's? I cannot say how much the road by Thorpe's Pinch cost, but I do not think that it was so much as £2,600 a mile. However, I can ascertain at the office what Thorpe's Pinch cost, and will let the Committee know.*
1070. Will you point out to the Committee what reason you have for saying that the road by Greenhatch's would not cost more to make than that by Thorpe's Pinch? I did not say that; the road by Greenhatch's would cost more; but what I said was, that I did not think that the Thorpe's Pinch road cost so much as £2,600, because I do not think it would require so much per mile to make the road by Greenhatch's.
1071. What, in your opinion, as an engineer, would be the probable expense per mile of making a permanent road over Mount Lambie? You mean the whole expense?
1072. Yes; of forming, draining, making culverts, metalling, and clearing? I should say that, with the metal, it would cost from 18s. to 20s. a yard, to make a really good road. But

* NOTE (by witness upon revision).—The contract for this portion of the road is one pound four shillings per yard forward, or £2,200 per mile.

Mr. W. C. Bennett, C.E.

8 May, 1860.

But after making this road, and going to all this expense, you would not have so good a road as that by Greenhatch's, because on Mount Lambie the gradients are so much heavier.

1073. Can you inform the Committee what is the difference in distance between the two roads—how much longer the one is than the other? No, I cannot do so from memory;* but in 1858 I was ordered to report upon this part of the road, and made plan and section of the diverging line by Piper's Flat.

1074. Supposing the diverging line to be adopted, and the road formed, where is the metal for it to be obtained? At different points along the line, at the bases of the hills.

1075. Have you examined that locality, for the purpose of seeing if metal was to be procured? No, I have not.

1076. You cannot, from your own knowledge, say that any is to be found? No, I cannot.

1077. How do you know that stone is to be found at the bases of the hills? From Mr. Dawson's report.

1078. Has it come to your knowledge, directly or indirectly, that a large quantity of stone has been reserved, for the purpose of being carted on to this new line of road? Decidedly not.

1079. Has it come within your knowledge that proper accounts have been kept, by the Superintendent of the Western Road, of the money that he has been authorized to expend, shewing how and where it has been expended? Before the passing of the Roads Act, the accounts were kept by the Superintendent in the form prescribed by the Colonial Architect, who was then at the head of this branch. This form did not give a detailed account of the expenditure; but I believe that Mr. Dawson, for his own information, did keep a detail of his expenditure.

1080. At what times was he ordered to furnish his accounts? Whenever payments were made. There were no abstracts of accounts sent in at that time. But I beg to say, that on this point I am only speaking from my impressions, as I had no connection with that department.

1081. Since this department has come under your notice, or been under your direction, how have payments been made—what I mean is, since the period of your taking charge under Captain Martindale, and upon the present contract system being entered into, has there not been a weekly or monthly abstract forwarded to you by the Superintendent, shewing how and where the money has been expended? Yes. Upon my coming into office that was the first thing that I wished to have done. My desire was, as far as possible, to localise the expenditure; that is, to have such a system adopted as that I could point to any particular part of the road and say, "From here to there so much has been expended." This has been done as far as possible at present; but there is always some expenditure that is incidental and cannot be localised, though the amount is gradually being reduced. This year, according to estimated cost of works, the amount of money not to be expended by public tender will be but £800.

1082. That amount is not contracted for? No. You will see in the papers a long list of advertisements calling for tenders.

1083. Previous to the adoption of the present mode of letting the work by contract, the repairs to the road were neither substantially nor properly done? Previously to Captain Martindale taking charge they were not.

1084. Are you aware when the first contracts were taken? Yes, last year.

1085. At what time? As soon as possible after the Estimates were passed by the Parliament.

1086. Then up to that time you conceive that the work performed on the road was of a very slight and unsatisfactory character? No, I do not say that; because there was a sort of interval between the giving up of the old and the adoption of the new or contract system, during which we introduced a system of task-work, which was certainly a step in advance.

1087. What did that system comprise? It consisted of letting out repairs by the piece or by task-work. It was in fact contract without advertisement or tender.

1088. Then under that system the road superintendent had power to let portions of the road without calling for tenders? To a certain amount he had.

1089. And that is what you call the task-work system? Yes.

1090. I should rather call it contract work by private tender? Yes, it was; but it is a system known in the profession as task-work.

1091. *By Mr. Rotton:* What office do you hold under the Government? I am Engineer for Roads, and have charge of the roads and bridges of the Colony, under Captain Martindale.

1092. That is of the Main Trunk Roads? Yes, and of some other roads. We have also charge of the bridges on other roads; for, though that does not properly come under our department, we are generally called on to make the plans and specifications and superintend the work.

1093. Did you hold the office of Engineer of Roads in 1857, at the time you refer to as having visited the Western Road? No. The office was not then in existence. It was only called into being by the Main Roads Act.

1094. What was the reason for sending you to examine this road in 1857? The reason was, that the Denison Bridge went down considerably at one end, and Captain Martindale was asked to send some one from his department to examine. It happened that there was just then no one else available, and I was taken from my work on the railway and sent up to see what repairs were necessary to be done to the bridge. Mr. Hay, who then had charge of the Department of Lands and Works, thought it desirable that, as I was going up there, I should examine into, and report upon the state of the Western Road, as from being a professional man, I might be able to offer some serviceable suggestions.

1095.

* NOTE (*by witness upon revision*).—I find there is about a quarter of a mile difference—the new road is the longest.

1095. And you did furnish a report? I did.
1096. What was the general character of that report? It describes the state of the road, and the repairs that were being made upon it; it states that the money allocated by Parliament was utterly insufficient to effect the necessary repairs; it suggests that the mode of doing the repairs should be altered; and shews that the state of the road had arisen from causes beyond the control of the superintendent.
1097. Does it in any way allude to Mr. Dawson's management in making the repairs? No, it states that the badness of the road arose from causes beyond his control.
1098. It passes no opinion upon Mr. Dawson's superintendence? No.*
1099. Did you form any opinion respecting that gentleman? Yes. I found him to be a very active officer, and, for an unprofessional man, a very efficient one; his whole soul seemed to be in his work.
1100. *By the Chairman*: Is that the report of your first trip up the Western Road? Yes.
1101. And did you come to that decided opinion in reference to Mr. Dawson's efficiency, by that one interview you had with him? I gave this as being so far I could form an opinion. Mr. Whitton, to whom I reported, knew the circumstances under which the report was made, and would of course take my opinion *quantum valeat*.
1102. *By Mr. Rotton*: Several witnesses have been examined by this Committee, as to the state of the road and character of the repairs made on it, and some have expressed their opinions pretty freely as to the ability of Mr. Dawson, the superintendent, to manage those repairs; and, I believe, in consequence of this evidence having come to Mr. Dawson's knowledge, that gentleman has written a letter to this Committee, requesting us to procure from you a report upon the state of the Western Road, made by you in 1857. He says that he is not aware of the character of that report, as he has never been furnished with a copy of it, but he is desirous that it should be before the Committee, as he conceives that it will afford us some information upon the subject of our inquiry. Perhaps you will be good enough to state whether that report embodies your impressions at the time? Yes, it was only made from what I saw then, and the impressions then made on my mind.
1103. You have that report with you? I have.
1104. Have you any objection to hand it in? None whatever. (*Report handed in. Vide Appendix A.*)
1105. This report was made previous to your appointment as Engineer of Roads, and previous to the passing of the Main Roads Act? It was.
1106. The management of the Western Road was at that time entirely under the control of Mr. Dawson? Yes, with the two restrictions I have named, which restrictions, I conceive, very much affected his arrangements.
1107. You consider that his hands were tied up by those restrictions? I do; as by those restrictions he could not properly carry out any system effectively.
1108. You have made a subsequent inspection and report upon this road? Yes, I have twice reported upon it since.
1109. Will you hand them in? With much pleasure. (*Report of 7th April, 1858, handed in. Vide Appendix B.*)
1110. What is your opinion of Mr. Dawson's management of the roads previous to the alteration of the system, taking into account the way in which he was restricted? I think that he was not to blame for the state into which the road had got, and that the restrictions tied up his hands so that it was impossible for him to act judiciously upon any system. He was restricted in the amount of wages to be paid to his overseers, and also in the amount of contracts he was allowed to accept, and this prevented him from setting good men as overseers, or really responsible men as contractors. Then again he was supplied with funds very irregularly, and then only in very small amounts.
1111. In addition to this you think that the funds placed at his disposal were insufficient? Yes, and they were given to him at no regular periods. It frequently happened that he got the money voted for the roads at a time when all the good weather had passed, and when the season for effecting repairs with advantage had gone over. And the Committee are, no doubt, aware that £1 spent on the roads in good weather is better than £5 laid on them in bad.
1112. *By the Chairman*: Are you speaking of the time when the repairs were carried on by Mr. Dawson, antecedent to the passing of the Road Act? Yes, previous to my being in office under that Act.
1113. And who furnished you with the information you have now given to this Committee; Mr. Dawson.
1114. *By Mr. Rotton*: But I understood you to say that you had inspected the road? Yes, I did so.
1115. Then to what information do you allude when you say that it was furnished by Mr. Dawson? To the mode of payment, and the way in which Mr. Dawson's hands were tied.
1116. *By the Chairman*: I understood you to say that you were not aware what number of men were employed on this road? I am not aware.
1117. Then you cannot say whether there was any deficiency in the superintendence that the works required? There was no deficiency of that kind, for the defect that struck me was, that there were too many overseers employed. I can speak as to the number and the character of the overseers, and can say that they were certainly not men all fitted for their work, and that there were too many of them.
1118. Did it come under your notice that there were nearly as many overseers employed as there were men? Yes, and that was one of the things I objected to in the system when I recommended its alteration.
1119. Had not Mr. Dawson the power of himself remodelling the system if there was anything wrong in it—or was he compelled by the authorities to keep up this surplus staff of overseers?

Mr. W. C.
Bennett, C.E.
8 May, 1860.

Mr. W. C.
Bennett, C.E.
8 May, 1860.

overseers? I do not think that there was exactly a surplus staff of overseers, because, from the character of the system followed, small parties of two or three men were sent here and there on the road, and he was obliged to send an overseer with each party. This, of course, compelled him to keep more overseers than he would otherwise have required. As soon as there was a hole in the road there would be an outcry about it, and he would be called upon to repair it. He would send off a couple of men, perhaps, to do the work, and then had to send an overseer with them. These men received only a shilling a day or so more than the other men, and were called working overseers, as they were expected to work as well as the men. Of course they never did; but instead of working, I should think, often kept the men from work by getting them into conversation.

1120. *By Mr. Rotton:* At the time you inspected the road in 1857, did you take notice of many deviations from the main line of road which were being repaired to render them passable? I did.

1121. Did you consider those repairs to be judicious? No, I did not; and I expressed my opinion very strongly against them to Mr. Dawson. He urged the necessity of having some road passable; but I gave a very strong opinion against expending anything except on the main line of road. He was in favor of keeping a road open for the traffic somewhere; but I told him that it was throwing money away to expend it on any other than main roads.

1122. Did he give you any reason for acting in this way? Yes; he said that he was doing it in compliance with instructions he had received to keep the road open.

1123. Why were these deviations made, and in what respect were they in compliance with instructions? The main road itself was impassable; and these deviations were made to keep open the traffic. Mr. Dawson states to me that at some of these places the road was so utterly impassable that it was necessary to make a track for the traffic whilst those portions of the main road were being repaired.

1124. Was it because the repairs on those portions of the line were hopeless unless effectually done? Yes; at Blackman's Gap, for instance, it would have been useless to do anything until the road could be done thoroughly. There were several other places the same, amongst them Springwood, and beyond Durack's, at Redbank.

1125. Then they were made to facilitate the traffic, to make a way for the people to avoid the places that were impassable? Yes, it was a matter of expediency, but I differed on the question of its advisability.

1126. *By the Chairman:* You have mentioned Blackman's Gap, allow me to ask you how long Mr. Dawson had had charge of that part of the road before you visited it? I believe about eighteen months.

1127. Had he had sufficient time, during the eighteen months he had charge, to repair the road at Blackman's Gap? He had the time, but not the money.

1128. Would not the money spent by him on the diverging line have been sufficient to have repaired the road itself? No, I think not.

1129. At all events it would have helped materially? Yes, no doubt; but it would have been quite inadequate to make the road passable.

1130. You cannot say what the diverging line that was made from the commencement of Hassan's Walls cost? No, I cannot.

1131. From what you have seen of that divergence, and the knowledge you have of the expense incurred in similar works, what in your opinion must that diverging line have cost? I cannot form the least idea. It would be impossible to form any estimate of the cost of works upon such a line, because repairs may be effected, and then the first heavy thunderstorm will obliterate all traces of them.

1132. You found fault, I believe, with the way in which Mr. Dawson was expending the public money? I found fault with the principle upon which he was doing it; but, as he explained to me, he was induced to these expedients in his anxiety to obey instructions and to keep the road open.

1133. Did he receive instructions to make these divergencies, or was he directed to expend the money on the main road? He certainly was not instructed to make these diverging roads; but he was ordered to keep the road open for traffic, and he regarded these divergencies as part of the main road.

1134. Was it not at his own will and pleasure that he made them,—without any instructions from head quarters? Well, I believe it was.

1135. In case these contracts now advertised for should not be taken up, is it your opinion that the Government would act rightly by sending men upon the line to put it in repair? Under what system?

1136. Under proper superintendence? By day-work?

1137. Yes, by day-work? I set my face against day-work in any shape; and for task-work the superintendence we can get is not sufficiently good. The contract system is decidedly the best that we can have. I was at one time an advocate for the task-work system, and that system was introduced by me when I was first appointed to my present office, but I found it did not work as I had anticipated, and I have since become a convert to the contract system.

1138. *By Mr. Rotton:* Nearly all the evidence you have given to us concerning the roads, has relation to a period up to about the end of 1857, or previous to the alteration of system consequent upon the passing of the Main Roads Act? It has.

1139. I think I gather from this evidence, that the system of road-making previous to this change of system was altogether very bad, and that the means placed at the disposal of those who had the control of the works were too limited? Yes, that is my impression.

1140. Since then there has been a complete alteration of system? Yes, it has been altered *in toto*.

1141. Do you find that the present system is working much better? Yes, very much better, but I do not think you can fairly judge of what the system will be by what it is now; for it has not yet had a fair trial, though it has been in partial operation for about a year. Mr. W. C. Bennett, C.E.
1142. Do you think that sufficient means are placed at your disposal even under the present system? In what respect? 8 May, 1860.
1143. Do you think that the money voted annually by Parliament is sufficient? No, not at all. It is quite inadequate to the work.
1144. You are acquainted with the other main roads of the Colony? Yes, perfectly.
1145. What is the state of the Western Road, in comparison with the Northern and Southern Roads? It is in a much worse state, and there are far less facilities existing on it for road-making.
1146. In consequence of its state being so much worse, and the facilities for road-making not being so great upon the Western as upon the Northern and Southern Roads, do you not consider that a very much larger sum of money should be voted for the repair of the Western than of the other two main roads? To keep the Western Road in repair it would be necessary that a larger sum should be expended upon the Western than upon the Northern or Southern Road, that is per mile, because the Southern Road is much longer.
1147. How much per mile do you think would be a sufficient sum to make a really good road between Penrith and Bathurst? The first section between Penrith and Hartley would be the most expensive; and the difficulty and expense would be so great that I am of opinion that the most economical thing would be to make a railway. There is not much material on that part of the line for making a good road, and plank roads are out of the question. The Committee may think it strange that I should say this, because I have recommended the formation of plank roads on this line, but latterly I have altered my opinion on this point, because I have seen them in Victoria, where they have proved an entire failure.
1148. When you say that the difficulty and expense of making roads at all over these mountains would be so very great, you allude not only to the cost of first construction, but also to the cost of maintaining them, and that taking these two together you conceive that it would be the cheapest plan in the end to construct a railroad? Yes; but I would wish my answer to be qualified by my want of knowledge as to the approximate cost of a railroad; but, altogether independent of the consideration of the saving of time, and increased facilities for traffic, I do think that it would be cheapest to make a railroad, and to me it seems almost extravagant to attempt to keep this line in repair as a macadamized road.
1149. Can you recommend any system of road-making which would answer for making a really good road on what is known as the mountains—such a road as would be permanent and lasting? No; not through the mountains, and we are not attempting anything of the kind. The system we are now adopting is metalling the worst pinches on the line, and leaving the teams to pull through the sandy places.
1150. Can you give any recommendation as to what is best to be done to make a really good road; or, in other words, what kind of road do you conceive would be the best? The Macadam road next to a railroad.
1151. Is there any metal at all on the mountains, between the top of Lapstone Hill and Little Hartley, which would really be fit to metal the roads with? I have no doubt that by long cartage you would be able to get enough to metal it through, but it would be very expensive to maintain.
1152. Could no metal then be got on the mountains? For the centre parts you might cart some from the ends, but when the ends were denuded you would have to cart it up from the plains below for the extremities of the road, and that would be a very expensive plan, and one that I would not be prepared to recommend.
1153. Can you state what the whole road would cost on the average per mile to put it in a perfect state throughout? I have attached to my report of 1858 a detailed estimate shewing what each mile of the road would cost, and by that estimate it would appear that the gross amount would be somewhere about £162,000.
1154. Is that for the whole length? Yes; from Parramatta to Bathurst.
1155. Have you any objection to hand in that estimate to the Committee? I have not; but I give it in with this modification, that my views as to plank roads have been altered from my knowledge of their failure in Victoria, where I have seen them in use. (*Estimate handed in. Vide Appendix C.*)
1156. Since the alteration in the system of the management of the roads, do you find that alteration work satisfactorily on the whole? Yes; as far as our office goes it certainly does.
1157. But with regard to the works themselves? Yes. There is a very great improvement both in the character of the works and in their cost.
1158. You are acquainted with Mr. Dawson? I am.
1159. Do you consider him a fit and competent person to hold office under the present system? I have expressed my opinion in writing as regards Mr. Dawson, and that opinion is to the effect that he has now had considerable experience, that he is a man of unimpeachable integrity, and that, until we can get for the same salary a professional man of equally high character to take his place, he is the best man we can have for the office.
1160. Captain Martindale, in the evidence he has given before this Committee, says, "Mr. Dawson has acquired a considerable amount of experience in the construction of the road, and is now competent to see the works carried out under the present system. I think it is very necessary that we should have men to superintend these works who will not enter into collusion with the contractors, and allow them to 'scamp' their work; and Mr. Dawson I believe to be a thoroughly honest and upright man"—do you concur in that opinion? I do. I believe him to be competent, and to be the best man we could get for the money he receives.

- Mr. W. C. Bennett, C.E.
8 May, 1860.
1161. Does he give satisfaction to the department? He does.
1162. There have been some complaints made that there are too many overseers employed upon the line at present—do you consider that there are too many? I do not think that we could do with less. It would be desirable to do with less if we could; but when you want men at any particular part of the year it is necessary to employ them all the year through, or you will not get them when they are required; and the main point is to secure honest and trustworthy men, and this is the only way to do it. A certain amount of surveillance cannot be done without at particular times, and to secure good men they must be retained on pay, even though their services may not occasionally be required.
1163. Do you think that, with the length of road that Mr. Dawson has charge of—from Penrith to Bathurst—he could, without the assistance of overseers, properly inspect the works? No; not with a system of small contracts such as that which is now followed, when thirty or so small contracts are given out for one portion of the road only. When the system comes to be more developed we may, perhaps, be able to dispense with much of this supervision; but at present it would not be safe to do so, because there is metal to be measured, and work to be looked after. I conceive that our superintendence is for the present minimised.
1164. There are none of the overseers, however, that can be dispensed with? No, not with advantage.
1165. Mr. Brown, a resident of Hartley, and a gentleman who at one time had charge of this road under former Governments, in giving evidence before this Committee, has said that the money expended on the road “Has been wasted, as far as my judgment goes, “making bye-roads where there was no occasion for them; that no regular system of road-making was adopted, but that they have just been trying experiments, and wasting the “money”; and that, “As much money was expended on these bye-roads as would have “made the main road good”—you do not concur in that opinion? I do not.
1166. You believe that the superintendence is not expensive, and that it is not faulty? I do.
1167. Mr. Brown was also asked, “Do you think that the superintendent and one overseer, “if they did their duty, could attend to the whole of that road under the present contract “system”? And to this he replied, “I think the superintendent ought to do it alone”—now do you think that he could do so? Not effectually—I am sure he could not. He might do it part of the year, when there is not much work going on. For the last four months, for instance, there has not been much work doing; but we cannot discharge our overseers, because it would not do for us, in the busy time, to have to take on casual men on whom we could not place implicit reliance.
1168. With regard to the deviation round Mount Lambie to the Solitary Creek, do you consider that to be a judicious deviation? The Committee will see by my Report that I have recommended the Piper’s Flat deviation; but as it was not considered advisable to make so great a deviation as this would have been, I consider the Solitary Creek to be the next best.
1169. Can you state what rise is saved by going round by the Solitary Creek? I should say there is about 300 feet of ascent and descent that is saved by going round.
1170. The deviation then is comparatively level? It is.
1171. Mount Lambie, I believe, is the most severe ascent on the Western line of road? Yes; it is the highest summit between Sydney and Bathurst.
1172. Would it not, to your mind, be against all principle to construct a road up a hill like Mount Lambie when you might make almost a level road to avoid the hill that would be but very little longer? Yes; but then, in the infant state of a Colony, road-making is a very different thing from what it afterwards becomes. In the early days of a Colony expense is a matter of great consideration, and that is not of so much importance now. Where a bog exists it is impassable without the expenditure of money, and then, of course it is an advantage to go over the hills where the road is sounder. That was the case, I presume, formerly; now, however, that we have funds, we find it better to fill in the bogs and avoid the hills.
1173. You have been round that deviation? I have.
1174. Is not the land in the vicinity good, and available for farming purposes? Yes; there is some very rich land there.
1175. And what is the character of the land on Mount Lambie? It is stony and worthless.
1176. Not fit for cultivation? No; it is too steep.
1177. So that, by carrying the road round by that deviation, we shall, in some measure, tend to open up available country? Yes.
1178. Then, altogether, you consider it to be a judicious deviation? If I had not I should not have recommended it.
1179. And, if once it is made, you consider that it may be maintained at less cost than the road over Mount Lambie? Yes; in this climate it may be maintained at one-fourth of the cost of the mountain road.
1180. There is a part of Mount Lambie, a very considerable portion of it, which is very much in the shade throughout the year, and to which the sun scarcely ever gets in the winter season? Yes; particularly on the southern ascent.
1181. Whilst the road on the other side would be always open? Yes; with some clearing.
1182. In consequence of the stony nature of the soil, would it not be difficult to properly drain the Mount Lambie road? Yes; there would be a difficulty in maintaining the drains. They would soon get filled up, as the strata is very impermeable, from being composed mainly of red clay; the road would soon become saturated and impassable.
1183. Then it would be difficult to properly drain the road without widening the roadway in the first instance, which would be a great expense; and next, without making a great number of cross drains? It would.
- 1184.

1184. And this difficulty would be avoided on the deviation? Yes; ordinary drains, with culverts at stated intervals, would maintain the road; but, upon Mount Lambie, the culverts would have to be at much shorter intervals. Mr. W. C. Bennett, C.E.
1185. Is not the metal, generally, procurable on the mountains, of a bad character? Some of it is; but near Macneilly's there is some hard trap that makes very good road metal. 8 May, 1860.
1186. *By Mr. Clements*: Did I understand you to say that good metal is obtainable on the Blue Mountains? Not good metal; but there is an ironstone that is obtainable which will serve the purpose.
1187. That is a very inferior kind of stone for road metal? Yes; it requires a great deal more attention.
1188. And, in consequence of its being of inferior quality, it requires that more of it shall be laid on the road? Yes.
1189. It also requires more frequent renewing? Yes.
1190. And, from your observation, it has always been an expensive matter to keep a road metalled with it in proper repair? Yes.
1191. Have you made any calculation of the relative cost of forming and making a road with that metal, and of making an adzed log road? No, I have not; but I should say that there would be very little difference, because you would have to renew your adzed log road in five years.
1192. Do the same objections exist in your mind against an adzed log road, as you have stated to exist against a plank road? To some extent they do.
1193. The log road would not be so costly as the plank one? If there was not much of it it would not be; but, if there was much of it, it would, because then it would pay you to get a saw mill and saw your planks, which could then be turned out cheaper than the adzed logs. But then, under those circumstances, the cheapest road in the long run would be a railway.
1194. You think that would be cheapest if there were much of the log road to make? Decidedly; and I say this totally irrespective of the advantages and facilities to traffic, and, looking at the capitalising of the cost of carriage, I have no doubt that, after a lapse of years, the construction and maintenance of a railroad would be *absolutely* cheaper in figures than that of an ordinary Macadam road properly made and maintained.
1195. Have you had any experience in tramways—those with the broad flanged rails? Yes; I have seen some of them at work at the Dalky quarries.
1196. Do you approve of them? Not for ordinary traffic.
1197. Had not Mr. Dawson considerable latitude allowed him in the way of trying experiments? He had.
1198. Were not his experiments rendered necessary by the very poor material that he had at hand, as well as to the want of any general system at that time? You cannot have a general system upon this road. Where you have good material, and abundance of it, you may work upon a general system; but, where material is not to be had, the case is different. Taking this into account, and looking at the small means at his disposal, I think his experiments were rather praiseworthy than otherwise.
1199. Is he now allowed to pursue his own plans, or is he confined to a system? He is not allowed to try any experiments now. The plan adopted is, that I go over the road with him, or, perhaps, Captain Martindale goes; and where there are places requiring repair, arrangements are made as to the best means of effecting them; and then plans are prepared and contracts called for.
1200. Is he still limited to the amount he may expend per month? No. We should be glad if we could get all the work for which Parliament grants us money executed in a month.
1201. Does it now rest with him whether repairs are pushed forward or retarded? No; under our present system of contract it rests with the contractor. But then there is always some delay in our office after the money has been voted, on account of the contract system, in preparing specifications, and then in calling for tenders. Hitherto there has been more delay than there will be in future, between the time of the authorization of the work and the calling for tenders, because the system has barely yet got into fair work. There must, however, be a delay between the time of calling for tenders and that of letting the works—that delay is inevitable.
1202. But there is no positive limit to the amount of tender by one person, if the money be found? No; we are only limited in so far as the vote of Parliament extends. When a work is let, we are only too glad when the contractor gets through his work quickly.
1203. There is, I believe, a great deal of difference in the quality of the road material obtainable on the mountains, and that which is procurable on the portion of road lying beyond the mountains? Yes. On the western section of the road there is good material to be had everywhere. With respect to making the road over the mountains there is this also to be said—that besides the disadvantages that will attend making it, if a railway be constructed from Sydney to Bathurst the mountain road will be useless, for it will never be travelled. It is different with the road between Hartley and Bathurst; because even with a railway running between the two, the road will be valuable as a parish road for local purposes.
1204. Then, until the railway should be determined on, you would not recommend the spending of any great sum of money on the mountain road? No. I would not recommend doing more than is now being done; that is, making good the pinches, and allowing the teams to drag through the sand.
1205. Would it not be advisable to have a few men, with horses and carts, to go along the line and repair the worst places? No, I would not advise commencing anything of the kind; because if once begun, there is no knowing where it will end. If there be bad spots, let

Mr. W. C. Bennett, C.E. let specifications of the repairs be made, and let them be contracted for in small tenders; or what would be nearly the same thing,—an estimate of the probable cost might be made, and then they could be let out in small tasks, at a fixed sum, to working men.

May, 1860.

1206. How often is the superintendent expected personally to inspect the works on the road? There is no fixed time for his inspection, but he is expected to do it as often as he may consider necessary. We cannot assume any fixed time for his visits, because he has a considerable amount of office work to do.

1207. But it is his duty to inspect the line frequently? Yes; he should do so, at all events, once a fortnight.

1208. *By Mr. Rotton:* With reference to the system of tramroads, could you recommend the adoption of any such system upon any part of this line? No, I could not. They have never been approved for general traffic. I was engaged in a project for something of the kind in South America—it being proposed to form a tramway from Houda to Bögötä. Before commencing the work Mr. Stevenson was consulted about it, and his opinion went completely against the adoption of anything of the kind for general traffic. For ordinary traffic, there is nothing like the common macadamized road, or a railway.

1209. And you do not approve of log or plank roads? I do not, though at one time I was an advocate for them.

1210. Do you not think that there are many places on the mountain road—many sandy spots—over which a squared log or plank road would necessarily be the best? No; if you must have a road, let it be either a Macadam or a rail road.

1211. Putting railroads out of the question—would not the sand swallow up any amount of metal you could lay down on it? Not necessarily. You could prevent that by putting down a thick coat of clay on the sand, and then the metal on the top of that.

1212. You, however, would prefer a railroad to any other kind of road? Decidedly.

1213. You conceive the would be cheaper in the end? Yes.

1214. And would last longer? Yes.

1215. Have any complaints been made to you, or to your office, in reference to Mr. Dawson? Very many have been made to the office, but not to me.

1216. Would complaints against him come through you? No; through Captain Martindale, as the head of the department.

1217. Then you do not know what those complaints are? Yes, they come to me, through Captain Martindale. They go to him first, and he hands them over to me.

1218. Have any complaints been made that Mr. Dawson has employed horses and carts of his own on the line? Such complaints have, I believe, been made, but before my time.

1219. Has any investigation been made into that charge? That I do not know.

1220. Have you found any difficulty in getting the contracts taken up? Yes, last year we had. When we first called for tenders we only got some two or three contracts let. Finding this, further measures were taken, and we got all the contracts let.

1221. Then you find no difficulty now? No, nor did we then, because the second time of advertising we let them all.

1222. Have you heard the road contractors make any complaints of the want of labor? Yes, Boland has complained that he cannot get men; but the overseer has told me that he could have got plenty of men, if he had given the price they asked. The only reason he cannot get men is that he offers too low wages.

1223. What wages does he give? I do not know.

1224. Has there, since you have had anything to do with the roads, been found any difficulty in procuring labor? Yes, there has been a difficulty about labor on the Blue Mountains; but the difficulty has not been so much the want of sufficient labor, as in the finding accommodation for the men, such as tents and water. The men come and engage readily enough, but they will not remain, because of this want of accommodation. And this I conceive to be one of the great advantages of the contract system, because under a system of day-labor there is an endless variety of expenses over which the Government cannot possibly have any control.

1225. *By Mr. Clements:* Do you think that ironstone is a proper name by which to describe the particular kind of stone used on the mountains for road metal? No, it is not ironstone. It is what I would call a ferruginous sandstone.

1226. It is not an ironstone from which ore is obtainable? No; it is a sandstone discolored with the oxide of iron.

1227. *By the Chairman:* As to the diverging line at Mount Lambic to the Solitary Creek—allow me to ask you how many bridges will be required on that line, and what will be the probable cost of allowing the water to flow away from the swamps over which the road will have to pass? I cannot say from memory, but by a reference to the papers in our office I could tell you the cost and the number of culverts. I think, however, that the plans shew that only five small culverts are required.*

1228. Will you state what width of swamp this road will pass over—swamps that must contain a large quantity of water? If you mean the distance the road will have to pass over swampy land, I should say that about one-half the distance is swampy.

1229. And there is a difficulty in crossing them in wet weather? Swamps are always difficult to cross at that time.

1230. Was in wet weather that you inspected this line? † No, it was in the summer.

1231.

* NOTE (by witness upon revision).—One bridge will be required, and several culverts.

† NOTE (by witness upon revision).—It strikes me that the word "last" is omitted between "you" and "inspected." My answer applies only to question so amended.

1231. Is there a sound bottom to these swamps, such as would be capable of supporting a roadway? Of course an artificial substratum must be made to support the roadway.
1232. And this will have to be done over half the length of the line? Yes, over about half.
1233. If this road has to be made, you will first have to make a bottom with timber or stone—the road must be ballasted? Yes, it must.
1234. With timber or stone? With stone or brushwood, or perhaps with both.
1235. Then in order to procure stone for the work, must it not be carted a distance of from one to four miles—must it not be carted from the end of Mount Lambie? It will not have to be carted so far as four miles. The valley is not so wide as that, and the greatest distance you would have to cart would be half the width of the valley, because there is plenty of stone at the bases of all the hills which border the valley.
1236. If it is procured on the east side, you would have to break it by employing men to do so? Yes, in the ordinary way.
1237. Cannot abundance of stone suitable, without breaking, for metalling the road, be procured at the foot of Mount Lambie by screening it out of the alluvial soil? It may be.
1238. Are there not hundreds of tons lying at the western end of Mount Lambie only requiring to be collected? Yes.
1239. And any quantity may be obtained by screening? Yes.
1240. After this projected line has been opened, will not stone have to be carted from the foot of Mount Lambie to macadamize it? It will have to be carted from the base of the Honeysuckle Range, but no further.
1241. What is the greatest distance that stone will have to be carted? About half the width of the valley, from the base of the range to the road.
1242. What distance is that? It will not exceed half-a-mile.
1243. Can stone fit for metalling be procured on the north side of Mount Lambie*? No; no good stone has been discovered there.†
1244. Are you sure of that? I should imagine so.
1245. Have you searched for it? No; it is not from actual inspection that I say so, but from the character of the country. I should infer that good stone was not‡ to be obtained.
1246. *By Mr. Parkes*: Is the country across the valley now practicable for cartage? Yes; it is rather soft in places, but the drays go that road.
1247. There is no serious impediment to the formation of a road there? No.
1248. And in dry seasons it is quite practicable now? It is.
1249. *By Mr. Rotton*: Are you not in fact aware that in fine weather, when the land is dry, all the traffic to Bathurst at present goes that way, and that drays carrying two and three tons continually go that track? Yes, I am.
1250. They prefer that road? Yes.
1251. As being the easiest and the best? Yes.
1252. *By the Chairman*: Previous to the late rains, and since the holes have been filled up on Mount Lambie, have there been any laden drays up the Solitary Creek track? That I cannot say.
1253. How long is it since you were there? I visited the spot in January last.
1254. In any sort of moist weather is it not impossible for a laden dray to go round that track? I cannot say; I went round there in a very wet season by the mail.
1255. At all events, in wet weather it would be impossible for the contractors to cart their stones across the swamps? They would have to select fine weather for doing this work.
1256. Let me ask you, whether it would not be quite easy to make culverts, and to cut drains on the road across Mount Lambie—would there be any difficulty about it? The difficulty would be in the matter of money; with plenty of money there would be no difficulty about doing the work.
1257. And there is abundance of metal all along the line and on the spot? Yes.
1258. I understood you to say, that the road across Mount Lambie was adopted in consequence of the want of money, at a time when the Colony had no money to lay out upon road-making? Yes.
1259. Are you aware that that road was made by prison labor? I am.
1260. And that consequently no money was required, though there was at the time an abundant Treasury, and the Colony was sending thousands home to England to pay for the importation of immigrants? I am not aware of all the circumstances you speak of; but in what I said my remarks were general, and were meant to convey this:—that in laying out roads different principles should actuate a community when they have reached an advanced stage to those which actuated them in their earlier career. A young country, with only a small amount of funds at its disposal, will make its roads on the sound ground of the hills, mounting by the most available gradients, to where a road is passable without any considerable outlay. When it is older and more flourishing, it looks to directness and the avoidance of inconvenient gradients, without regard to the expense entailed.
1261. And that you conceive to have been the reason why the road over Mount Lambie was selected? I do.
1262. Are you aware that Sir Thomas Mitchell selected that route, as being much sounder and better than that by Piper's Flat? I am not, but I should infer it on the principle I have stated.
- 1263.

* NOTE (by witness upon revision).—My answer to this question, applies only to a question put in this form—"Do you not know that no stone fit for metalling can be procured on the north side of "Mount Lambie"?"

† NOTE (corrected by witness upon revision).—"I think good stone will be discovered there."

‡ NOTE (corrected by witness upon revision).—Omitting "not".

Mr. W. C. Bennett, C.E. 1263. You say that the soundest portion of a country ought to be selected for a road, when there is not money enough to make one elsewhere? Yes.

1264. *By Mr. Rotton*: Are you still of opinion, that the divergence at the Solitary Creek is the more preferable line of the two? Yes, decidedly.

8 May, 1860. 1265. From what cause? From its manifest superiority.

1266. Even though you have to ballast it through half its length? Yes; but you must remember that the first outlay in that case will be the last, and that the cost of maintenance will be very small.

APPENDIX A.

*Cross Roads, Liverpool,
September 14, 1857.*

Sir,

In continuation of my Report of this day relative to the Western Road, I have to state for the further information of the Chief Commissioner, that—

The road from Emu Ferry to the foot of Lapstone Hill, a distance of 1½ miles, is wide, direct, and nearly level, through cuttings averaging 6 to 8 feet in depth. From inattention to the maintenance of drainage, and neglect of timely repair, the original surface of the road has been worn away, and the present track is chiefly over oviform boulders 9 inches by 5, scattered through a sandy clay; in bad weather, full of sloughs and pools of water. There is no timber near this portion of the road.

From the base to the summit of Lapstone Hill, about 1½ miles, the road winds in steep ascent up the southern flank of a ravine; the surface is rough, rocky, and waterworn, but is now being repaired with a hard red sandstone; the drainage is not so defective as on the flats, but further provision is required for intercepting the flow of the flood waters falling on the surface of the road above.

From the summit of Lapstone to near the tollbar at Springwood, a distance of about 6 miles, is a gentle ascent through a stiff clay country; good road material scarce, and timber abundant, and suitable for a plank road. The present surface is in very bad order, full of sloughs and impassable in many places; where lateral bush tracks have been cleared for the traffic, those tracks soon get out up, when it becomes necessary to clear others. The lower portion of this road has been lately repaired with ironstone, and several pieces of timber road, of various construction, have been laid down, viz., about 1,000 yards of corduroy, 100 yards of plank, and 450 yards of log road.

The corduroy road has been a failure, the timber was not of uniform size, and not laid on sleepers; and though now nearly all metalled over, is still very rough. The plank road, near Wascoe's, has been two years made; it is 21 feet wide, and over a marshy flat, has no perceptible lateral or longitudinal inclination. The timber (stringybark, mahogany, and gum) is nearly as good as when laid down. I understand there are four rows of longitudinal sleepers, the planks are 5 to 7 inches wide, and 3 inches thick, spiked to the sleepers. It cost £5 per lineal yard; but its price is no criterion for the expense of a plank road now to be constructed on a judicious plan.

The adzed log road has all been made by Mr. Dawson; some is now being executed by contract at 16s. per lineal yard, including forming, draining, and lightly metalling a continuous turn-out. The first piece laid down (three months since) is now in very fair order, it has no longitudinal sleepers, but to prevent the displacement of the logs, a marginal log, 9 inches by 9 inches, bedded in road metal, was placed on either side. The portions now being constructed are formed of logs from 6 to 8 inches in diameter, or of half timbers 1 foot in diameter, notched on longitudinal sleepers, 7 inches to 8 inches in diameter. When laid down, the half round top is adzed off, so as to present a surface smooth enough for traffic without jolting, though rough enough to afford good footing for horses. The surface has a slope of 1 in 30, from the centre to the side, and is 9 feet wide.

From Springwood to the Blue Mountain Inn, 11 miles, the route passes along the summit of the range through a deep sand, with occasional pipe-clay flats, and yellow clay and rocky ascents; the track through the sand appears to be in a state of nature. On the pipe-clay flats a road has been made, but was long since worn away; the substrata is cut up into ruts 3 and 4 feet deep, and part is in an impassable state, with lateral bush tracks for the traffic. The rocky pinches are generally in fair order, their repair being imperative, the steep ground on either side prohibiting out-turns.

To secure the road metal on the naked slopes of the rock, Mr. Dawson has laid down transverse and longitudinal timbers, forming frames, into which the metal is packed. This answers very well, but will require careful repair. There are some short lengths on this rocky part which do not seem to have been repaired for some time, and are still in fair order; the metal used has been the ironstone, which is thinly scattered over the narrow summit of the range. The constant demand has used up all within some distance of the road, so that repairs will yearly become more expensive. Timber adapted for a plank road is also scarce on the ridge; but the construction might be modified so as to permit the use of the nearest timber. Should it prove insufficient, wood of a superior sort can be had at intervals in the ravines.

From the Blue Mountain Inn to the summit of the Mount Victoria Pass—21 miles—the character of the country, and the road, is nearly the same as from Springfield to the Blue Mountain. Metal is getting equally scarce, but timber is more abundant, and of a better description. Some extensive repairs have lately been made on this portion of the road, particularly on the rocky slopes. The descent of Mount Victoria—about 1½ miles—was in very bad order, but has recently been partially repaired with ironstone and blue trap, a quarry of which has been opened by Mr. Dawson, at the base of the hill.

The recent rains have caused some slips from the hill: the debris is now removed, and the fence repaired. The retaining walls of embankments across the deep ravines are bridged, but the injury does not appear recent. The road surface should at once be put in order, and the drainage restored, to prevent danger to the walls from the water accumulated in the hollow of the road above.

From the foot of Mount Victoria to Hartley—1½ miles—the road passes over an undulating clay country, and is now being repaired, part with metal, and 150 yards with adzed logs. It was in a very bad state, and the traffic still goes over a bush track for a part of the distance.

From Hartley, descending to the River Lett, and thence ascending to Blackman's new building, a distance of 1½ miles, the road is over a decomposed granite; about three-quarters of a mile of this is in admirable order, though not repaired for years. The road was, in the first instance, well made, with moderate inclination and adequate provision for drainage, but it now begins to require repair.

From Blackman's to near Bowenfels—1½ miles—the road is impassable. There is a side track through the bush. The main route passes through some deep cuttings, in a tenacious clay. From neglected drainage the bottoms of the excavations have become huge drains, with the surface broken up three to four feet in depth. Considerable expense has been incurred in providing a temporary passage for the traffic. This is one of the worst points on the road.

At Bowenfels the branch road to Mudgee diverges, and thence to Bathurst the traffic is not so great as on the trunk line.

From Bowenfels to Junction or Farmer's Creek—3 miles—is a decomposed granite soil. The road can be restored by properly forming the natural surface, with due attention to drainage.

From the Junction Creek to Cox's River—1 mile—the road contours round the flanks of some hills; the level was so rigidly preserved that no longitudinal drainage exists, and all the lateral drainage has

has been destroyed by heavy rains. The centre of the road is a morass, three to four feet deep; and as the locality does not admit of out-turns, this portion is very dangerous, from the risk of being upset over the precipice, on the edge of which the coach is obliged to travel to avoid the central slough. Timber for a plank road is abundant. Road metal can also be had in the river, which is near the road, for the entire of this distance.

At Cox's River the causeway was swept away by the last flood, and has since been rebuilt in a permanent manner. The old ford was also destroyed by the flood, and the present one is circuitous, and, in times of fresh, dangerous. A bridge is much wanted here.

From Cox's River, over the summit of the range dividing the eastern and western waters, to Solitary Creek—about 3 miles—the road is through an undulating country, well timbered, and with heavy clay soil lying on soft shale. There are several considerable excavations; one, close to Cox's River, is about 30 feet deep, and a quarter of a mile in length. The bottom of a cutting is invariably the worst part of the road; the intercepting drains have either silted up or burst into the cutting; and the discharge of their waters, together with the soakage and the trampling of oxen driven on the margin of the road have obliterated all trace of a side drain.

From Solitary Creek, over Mount Lambic, or Honeysuckle Hill—about 5 miles—part of the road is in very fine order, but a portion is an impassable slough; repairs are at present in progress. The ascent of Mount Lambic is about 800 feet in 2½ miles, but the mail generally goes round the northern base of the hill, the increase in distance being only one mile, and the route through rather a flat country, well-timbered, and suited for a plank road, but road metal scarce.

Before any extensive repairs are undertaken on this portion it might be advisable to have a detailed estimate made of the expense of making a plank road round the base of the hill, as it would probably amount to little more than would be necessary to re-make and maintain the road over the summit.

I should state that some of the land round the base has been alienated, but the occupiers may agree to allow the road to be made through their land without compensation.

Another route has also been suggested from Solitary Creek to Bathurst, by Solitary Creek to the Fish River, and thence by the Valley of the Fish River to Bathurst. I have not been over this line, and can only state that it is the natural inclination of the country.

From the foot of Mount Lambic to Green Swamp—6½ miles—the road passes through an undulating country, with a clay soil closely timbered. There are some very bad points, particularly about the Frying-pan, where the road passes under some hills, and the intercepting drains having been destroyed, the soakage and rains from the upland render the road a quagmire even in ordinary weather, and as the lower slope of the hill is steep, and an out-turn impracticable, the road is here dangerous. For a considerable distance on this length the mail travels through the bush; some partial repairs have been executed.

From Green Swamp to Bathurst—14 miles—the road is through an open country, with good soil, composed of the debris of granite and trap. The surface of the road is in fair order, and hitherto a considerable breadth has been available for transit; this has tended very much to its preservation; but as the traffic is being confined to the limits of the road by fencing, it will be necessary to provide for the increase of wear which will be caused thereby. In many places between Emu Ferry and Bathurst the trees have been felled to expose the road to the sun and wind; also numerous adzed log surface water crossings have been laid down, for conducting water from the side drains, and intercepting the discharge flowing in the wheel tracks from the upper surface of the road, which, if allowed to accumulate, would soon become a stream and tear up the formation, as it has hitherto done in many places. Those crossings are formed of adzed logs placed transversely about 2 feet below the ordinary level of the road, which is sloped down to meet them on either side, the surface of the logs being curved to meet the slope. This arrangement is good and economical.

In conducting the repair of this road it has hitherto been quite impossible to adopt any system; the surface has been allowed to get into such a state as to require to be relaid from end to end. A considerable proportion of the funds allocated for its repair have been expended in clearing and making lateral tracks (requiring almost daily renewal) at points where a prompt repair was impracticable from the state of the weather, and the inadequate means at the disposal of the Surveyor. A large amount was also expended in desultory patching, necessary to prevent the communication being interrupted, and the cost of this has been materially increased by the loss of valuable time, moving men and plant, more particularly between Lapstone Hill and Mount Victoria, where food and water for oxen and horses is so difficult to procure.

Several extensive repairs have been made with metal, but though very effective for the present, and full value for the money paid for them, are not durable or ultimately economical, as the limited funds did not admit of an outlay sufficient for really permanent work, the main object being to extend the repair over as great a length of road as possible.

The adzed log road is decidedly the most durable work executed, and the cheapest that can be adopted, until a light steam saw mill drawn by oxen be procured, when a plank road will, I have no doubt, prove cheaper. There has been about 600 yards of log road already laid down.

The plank road should be formed of the best available timber, in planks 9 feet long by 3½ or 4 inches thick, and whatever width the timber would allow, laid on two longitudinal sleepers sawn to a fair face on the upper side, and well packed with gravel or broken stone, with every possible provision for adequate drainage, suitable metalled sidings for passing to be provided at stated intervals, or continuously, as may be necessary.

There are many portions of the road where planking does not seem advisable, and where timber is scarce, and material for a Macadam road good and abundant. Here a modified Macadam road might be adopted, a narrow centre track made in a superior manner of the best material, with one or two side tracks of the ordinary stone lightly spread.

Over the Emu Plains, Lapstone Hill, Mount Victoria, and generally on the rocky declivities, a Macadam road would be the best, as timber is scarce, and good metal can be had. Forming and draining would make a fair road over the decomposed granite soil near Hartley, and between Bowenfels and Junction Creek. The soft clay portions of the road between Lapstone and Mount Victoria, from the foot of Mount Victoria to Hartley, from Blackman's to Bowenfels, and from the Junction Creek to Green Swamp, should be planked; and as most of the sandy flats between Lapstone and Mount Victoria are always at least passable, their improvement need not yet be undertaken; from Green Swamp to Bathurst forming and repairs to the drains would suffice.

The present mode of partial and desultory repair will require a large increase in the annual outlay merely to maintain the communication in its present imperfect state. If the whole line was once thoroughly restored, and a properly organised system of prompt and watchful minor repair established, the annual sum required to keep the road in a creditable state would be less than half what is now expended, with the results which I have tried to describe.

I have not made any estimate, as my examination was too cursory to allow of the requisite measurements, or of minute inquiry into the cost of details.

I have received every information and assistance from Mr. Dawson, the road surveyor, to whom it is but justice to state that the present very bad condition of the road proceeds from causes altogether beyond his control.

John Whitton, Esq.,
Chief Engineer.

I have, &c.,
WILLIAM C. BENNETT.

APPENDIX B.

Railway Office, Sydney,
7 April, 1858.

Sir,

In compliance with the instructions contained in your Minute of the 22nd December, 1857, I have the honor to forward you the following report on the Western Road, from Parramatta to Bathurst.

From Parramatta to Eastern Creek—12 $\frac{1}{2}$ miles—the road is in very fair repair, the general direction is good, the surface undulating, and for the most part lately covered with blue metal. At Eastern Creek is a large bridge of round timber, which was being repaired when I examined the road.

From Eastern Creek to 10th milestone is rough, and requires repair; thence to Rooty Hill bridge a part has been recently repaired; remainder is in fair order. The metal used on this part of the line is the blue trap, similar to the Pennant Hills stone; the longest carriage is close to Parramatta.

From Rooty Hill Bridge to St. Mary's Church is through a heavy clay soil, impressible in wet weather, so that an out-turn was necessary all the winter; this would be a most desirable place to test a plank road, the timber to be cut by a saw-mill; ironbark and box timber is quite close. In the estimate I have provided for a plank road 18 feet wide on the flatter portions.

At Roper's Creek is a lintel bridge, one of the piers of which has fallen; the bridge must soon be replaced. From the end of proposed plank road, near St. Mary's Church, to the ferry at Penrith—4 $\frac{1}{2}$ miles—the road is in very bad order, and occasionally flooded. The repairs are chiefly made with shingle and coarse gravel, which is found close to the surface. Considerable attention to drainage will be required through Penrith.

The bridge at South Creek, taken away last flood, has been replaced by another, at a very oblique angle with the road.

The entire road from Parramatta to Penrith—22 miles 19 chains—is at present in charge of trustees, and is through a country of quite a different character to that through which the remainder of the Western Road passes. The latter is a mere mountain track; the former is a road 1 $\frac{1}{2}$ chain wide, great part fenced, with 21 feet wide of metal in the centre, and traversing a heavy clay country, formerly wooded, but now partially cleared.

The culverts on this length are generally in very good order. Many of the larger structures were swept away and injured last winter; some have been repaired; others, at Fox under the Hill, Rooty Hill, Roper's Creek, and the Governor Bourke Inn, must be rebuilt or thoroughly repaired.

From Lapstone Hill to Little Hartley—including the mountain road—with approaches from Emu Ferry to Lapstone, and from Hartley to Mount Victoria. Some eight or ten years ago the works on this division were completed; it was then a very perfect Macadam road, traces of which still remain, more particularly at the 20-mile Hollow, where the remains of a very superior road, now fast wearing into big holes, are evident,—the stone being the same iron-bearing sandstone in use all over the mountains,—the road owing its preservation to its perfect drainage and good form in the first instance. The contrast with the heavy sands is very great, as no trace whatever exists on them of the former road. The contrast is also very great between the remains of the old road and the roads lately put in order by the road surveyor. It is not easy to account for the way in which the metal on recent repairs has been crushed into dust, except from the very great drought destroying its cohesion, and the heavy traffic then grinding it to powder; however, the drought has had no effect on the old road surface, which is perfectly hard and free from dust, and is a good example for imitation in making Macadam roads of the red sandstone on the mountains. The total length of this division is 43 miles, of which it is proposed to make, or repair, 24 $\frac{1}{2}$ miles as a metal road, 9 $\frac{1}{2}$ miles as a timber road of different descriptions, and to leave 9 $\frac{1}{2}$ miles over the heavy sands in their present state, as there is no timber within reasonable distance to make a plank road, and a Macadam road without pitching would be but a temporary expedient, even were good stone to be had, which it is not.

Those sands never interrupt, but only impede, transit in summer, when they become very heavy. The best mode of treatment would ultimately be planking, when the other portions of the road are in good repair, and carriage reasonable.

The wooden road to be made, or repaired, consists of 1 $\frac{1}{2}$ miles of adzed log and corduroy, to be taken up and relaid as adzed log, and of 8 miles of plank road—18 ft. wide—to be cut by the portable steam saw. I cannot recommend any new road to be made of less width than 18 ft., as the adzed log roads—9 ft. wide—I find much disturbed from the wheels of vehicles getting on the metalled margins and plunging up a deep rut at the end of the logs—the next vehicle displacing the log.

The metal repairs should all be executed with best red iron sandstone—to be 8 inches deep in the centre, and 4 $\frac{1}{2}$ inches at the sides, broken to a 2 $\frac{1}{2}$ inch gauge—the road surface having been previously formed with a lateral inclination, in a sort of inverse proportion to the longitudinal.

The drains to be most particularly attended to, specially on the upper side of the rock side-cuttings; numerous small culverts to be constructed to carry the water from the lower side, at intervals; catchwater drains to be excavated where necessary; provision has been made for small culverts at every quarter of a mile in addition to those already in existence.

There are no bridges of any importance on this length, nor any requiring repairs; but attention must be paid to the foundations of the Lapstone Bridge, and the retaining walls at Mount Victoria, to detect the occurrence of any further slipping, which would endanger the stability of these structures.

From Little Hartley the road has been repaired with metal, and also with some log road. A surface water crossing has been made near Little Hartley, which might have been an under culvert, as the bottom is quite deep enough. I do not approve of those surface water crossings as permanent works, to be executed in good weather; they were only allowable last winter, when any other repair was impossible.

It is proposed to lay down $\frac{3}{4}$ of a mile of plank road, in continuation of the present repairs from the top of Hartley Hill; and thence to repair the road generally to Hassan's Walls with the granite so plentiful along the margin of the road; at Blackman's Gap it is intended to lay down a plank road, on the very soft clay now in so bad a state.

Thence to Mudgee Road a general repair will be required; the granite from the spurs below to be used.

From the Mudgee Road to the Junction Creek the line is chiefly through a decomposed granite but metal is estimated for, as the granite sand would not resist the action of the heavy rains on so great an inclination.

From the Junction Creek to Cox's River a metal road is estimated for, as timber is scarce; but good stone, by careful selection, can be had from the rock escarpment on the margin of the road.

The repair of the ascent of the dividing range from the Cox is rather a difficult matter, as there is no suitable stone at all close; the lower end can be repaired with shingle from the river, the upper end with the red sandstone from the summit; the ascent is so steep that plank road could not be used.

From the summit of the range to Solitary Creek stone is also scarce, but its use is imperative as timber is not to be had.

From Solitary Creek to Meadow Flat stone is abundant; west of Meadow Flat, where the road passes over heavy clay soil, and where good timber is abundant, and stone rather scarce, a plank road has been estimated for. The fall to Diamond Flat it is intended to repair with stone, and to continue the plank road across the flat.

The ascent to Redbank to be thoroughly repaired with metal, and the flat contour road on the summit planked and thoroughly drained; there is plenty of suitable timber close to the road.

The

The plank road to be laid down on the flats near Kirkeconnell, the steep places to be thoroughly repaired with metal, and the large stones on the descent to the Frying-pan Creek to be raised and broken.

Thence to the Woodman Inn, provision has been made for laying down a plank road where possible, and for metalling the remainder.

From the Woodman Inn to Bathurst, the road over the decomposed granite to have a drain cut on the upper side, and to have the holes filled up; the lower side to have no drain, in order to allow the traffic to spread over the unfenced land; one small bridge and several patches of plank road to be laid down.

With respect to deviations. Of the many proposed, I can only recommend one; that from Lee's, at Bowenfels, by the Mudgee Road, and Piper's Flats to Meadow Flat.

Sir Thomas Mitchell, at a point called Soldier's Pinch, changed the direction of the road on the mountains, but I do not consider it an improvement, as it is very steep at one point. It is now more generally used than the other line as the surface is harder, and in better order; but if the other line were repaired, the inclination would be much more uniform.

From the toll-bar at Mount Victoria several routes have been in use, and proposed at different times for descending into the valley, viz., the route at present in use, the old descent by Mount York, and the descent by Darling's Causeway; the last, though a little out of the direct line, would have been much the more gradual descent from the mountains, but would now entail so much expense, and cause such inconvenience, by removing the traffic so completely from the existing channel, that its adoption would be out of the question.

The route by Mount York has no advantage over the Mount Victoria Pass, on which so much money has been expended, so that a change is not desirable on any grounds.

From Little Hartley to Hassan's Walls, near Bowenfels, a deviation has been proposed along the course of an old road crossing the River Lett, at a point 237 ft. higher than the Bridge at Hartley. The descent of the old road to the river being 137 ft., and of the present road 380 ft., the ascent to Hassan's Walls in the one instance being 395 feet, and 632 feet in the other.

The inclinations on the present road are very uniform, not exceeding 1 in 12, and the surface not in very bad repair—very superior metal is abundant, the granite cropping out on the road side for a great part of the distance.

The old road (the proposed deviation) passes through level sandy flats, in some instances flooded in winter, with no available outfall for drainage, without incurring great expense; road metal can be had, but it is neither so good or so abundant as on the present line.

This deviation would avoid the town of Hartley, which is a very forcible reason for not making it, without a very manifest superiority; but, putting aside all consideration of the injury to the town, this deviation would not be available, as it is 23 per cent longer, and the character of the country much less favorable.

From the commencement of Hassan's Walls to Bowenfels no deviation is possible; the road winding round the base of the hills in rather gentle inclinations.

At Bowenfels, the public themselves have made a deviation which ought to be sanctioned by the authorities; it follows the Mudgee Road to Lee's, and thence through Lee's ground to the junction of the Fish River Road, thereby avoiding a descent of 200 feet into Bowen's Hollow.

At or near Lee's the different lines to avoid the descent into the valley of the Cox, or the ascent of Mount Lambie, diverge:—

- 1st. The old road by the Fish River;
- 2nd. By the Sod Walls and Fish River Road, both descending to the Cox, and crossing Mount Blaxland and the dividing range at very high levels; and
- 3rd.—The road by Piper's Flats, avoiding the descent to the junction, and the ascent of Mount Lambie.

The only one of those routes worthy of consideration is that by Piper's Flat, which passes the Cox 300 feet higher than at the Junction, crossing the dividing range, at Con Ryan's, at the same elevation which the other road has where it leaves the dividing range west of Mount Lambie.

This has formerly been *the* road, and is at present very much used; it was proposed in 1848 to return to it, making a new road across the dividing range at Gow's Gap, uniting again with the present road at Redbank. As the portion of the road from Gow's Gap to Redbank is through thick brush, and over rather an undulating country, and the main road for that portion not very objectionable, it will be advisable to follow, with some slight improvement, the present Piper's Flat route, joining the present road at Meadow Flat. This will increase the distance, but the cost of the Redbank extension would be altogether in excess of the advantage to be derived from its adoption.

It is proposed to cut off the bend at Walerawang, by passing between the house and the present road; this avoids a rather broken bit of country, but a bridge must be provided, as the crossing is not so good as on the existing road. A change is also proposed from the Piper's Flat track at Luckie's, by passing south of the house, the broken character of the country renders this unavailable to as great an extent as desirable; however, a good route has been marked, passing close to the projected railway line, and avoiding what has been the great objection to this route from the beginning, the softness of the black flats, north of Luckie's.

The change recommended will bring the road over two considerable hills—the Middle River Hill and the Dividing Range—but neither within 300 feet of the height of Mount Lambie; it also passes Brown's River, Middle River, and Cox's River, all streams of some magnitude, and for which bridges will have to be provided; but as Brown's River is on the Mudgee Road, the number of bridges for the Bathurst Road will be the same as required for the present line but of much less span.

The old road, from Lee's to Meadow Flat, measures 15 miles 70 chains; by the new route the distance will be 18 miles 54 chains, an increase of 2½ miles, or 17 per cent. This will be more than compensated for by the improvement in the section, saving 300 feet descent into the valley of the Cox, and 300 feet ascent of Mount Lambie.

From Lee's to the Middle River Hill, a distance of 6½ miles, the deviation follows the Mudgee Road, which requires to be put into proper order; but as this road must be kept in repair in any case, and is common to both lines, there will be 3½ miles less road to maintain than with the present arrangement, independent of the great improvement in the road.

In recommending this change, I can only do so presuming that a perfect Macadam or plank road, as estimated, will be made; if this is not done, I can only advise that the present road be adhered to, as naturally a harder surface. One of the great advantages of the new route will be the comparative saving in repairs, as the new road being flatter will be cheaper to maintain than the road over Mount Lambie.

Another route has also been proposed, from Walerawang by Greenhatch's to Howell's; it is not so level, or in any respects so good, as by Piper's Flats.

With respect to the best mode of executing the work estimated for, small contracts would be the most advisable way; the repairs should also be done by contract. Where labor is so valuable, as in this country, day work should be entirely prohibited.

Some change is required in the mode of making payments in use on the road at present: it appears to be objectionable to intrust the division of cheques for a considerable amount to irresponsible persons (the road overseers), who have also the keeping of the accounts on which the payments are made.

In addition to the estimate for a thorough repair, I have shewn the amounts required for urgent repairs, without which, the road will soon be impassable. Such sums have been estimated as will suffice

suffice to put those bad portions of the road into *permanent* repair, and not merely a temporary patching which would last but a few months,

In fact, the system which has been in operation on the road cannot be continued. Hitherto, some relics of the old road remained on which to found repairs, the last trace of this is now nearly worn away, so that if the road is not thoroughly repaired, it will either become impassable, or the cost of maintenance will, in some few years, exceed the first cost of a thorough repair.

It must also be recollected that the best possible road, even in Europe, requires careful and timely minor repair, which is much more requisite here on account of the very heavy rains following long droughts.

Considerable attention has been given to the rates of price used in the estimate; they are based on the cost of the work now being executed, and I think will prove fair for the character of work contemplated.

I am, &c.,
WILLIAM C. BENNETT,
Ast. Engineer of Roads.

Captain Martindale, R.E.,
Chief Commissioner of Railways.

APPENDIX C.

MEMORANDA to accompany Estimates for Western Road.

The total amount of £162,411, includes all works necessary to put the present line of road in proper repair for a width of eighteen feet, from Parramatta to Bathurst, with the exception of 9 miles 38 chains of sandy flats on the mountains, on which it is not desirable to spend any money at present, as they are better in wet than in dry weather. No provision is made therein for bridges at Cox's River or the Junction Creek, as the estimate for those structures must be calculated from drawings to be made in Sydney.

Plank Road—The road to be 18 feet wide, of 4 inch planks, spiked to 3 longitudinal sleepers, 14" X 6", as long as they can be had; the planks may be alternately 9 feet in length, breaking joint on the centre sleeper. Plank road is preferred to metal repair on *all the flats* where timber is to be had nearer than suitable stone; the estimate is £1 4s. per yard run, which, though in the first instance as expensive as stone, would at the end of seven years (the probable duration of the timber) be much cheaper; and, as it is likely that some other means of transit will be ere then adopted, there can be little doubt that the plank road is the most advantageous.

Forming and Metalling—This item includes the re-making the surface of the road and covering it with a coating of metal 8 inches thick at the centre, and 4½ feet at the sides, averaging 6 inches; the price is estimated at 11s. 6d. per cubic yard, with 1s. 3d. per cubic yard extra for each additional half mile of lead. With forming and metalling provision is also made for a perfect drainage of the road, the price for drains being 1s. to 2s. 6d. per yard run, as they occur in soil or rock; the price for forming is from 2s. to 10s. in some extreme cases, as at King's Table Land, where £1 5s. 6d. per yard run is the price for drains, forming, and metalling.

Metalling—This item includes drains in almost all cases; the quantity of metal and price as above.

Metal Repair—This provides for repairs of drains, and covering the road with 4½ inches of metal; the price averaging from 8s. to 10s. per yard.

Corduroy to be raised and relaid—This includes raising the corduroy road near Springwood, and forming it into an adzed log road 18 feet wide, the only mode of dealing with this construction; the price is 15s. per lineal yard.

Adzed log to be laid down—An adzed log road is recommended at some points where repair is very urgent, and for some isolated patches where a timber road is required, but in too limited a quantity to warrant the expense of removing the sawing machine.

Good road, slight repair—Provides for patching where other repair is not required, and consists chiefly of recent repairs; the price estimated to 2s. to 6s. per yard.

Adzed log laid down—Shews the length of adzed log road laid down; some minor repairs have been estimated for.

Heavy sand—Shews the number of chains of heavy sandy road where no trace of any former road exists; it is not intended to deal with those portions at present, as they are never impassable.

Granite—Shews the length of road over the granite soil near Bathurst, which it is not considered necessary to interfere with, except by cutting an intercepting drain on the upper side.

Bridges and culverts—Amounts have been put down for all necessary repairs to bridges and culverts, and provision made for the construction of numerous small culverts, particularly on the steep inclines.

Urgent repairs—The portion estimated under this heading includes the full price as in the other estimates for all works required to keep the road in a passable state.

MAINTENANCE.

It is estimated that a sum of £13,498 will be required each year to maintain the road in good order after the above-mentioned works are executed, viz. :—

76 miles 23 chains of metalled road, at £150 per mile	£11,443
19 miles 27½ chains of wooden road, at £20 per mile	386
1½ miles 37½ chains of sand and granite road, for keeping drains in order, &c., at £30 per mile	442
	<hr/>
	£12,271
10 per cent. for superintendence and contingencies	1,227
	<hr/>
	£13,498

Bowenfels, 17 March, 1858.

Legislative Assembly.

NEW SOUTH WALES.

ENCROACHMENT UPON MARKET-STREET.

(LETTER FROM SECRETARY TO CROWN LAW OFFICERS RESPECTING.)

Ordered by the Legislative Assembly to be Printed, 23 May, 1860.

Crown Law Offices,

Sydney, 24 January, 1860.

SIR,

In reference to your letter of the 22nd ultimo, covering communication from Mr. Walter Beames, representing that Mr. William Northwood was then erecting a building half-way across Market-street, near the entrance of the Pyrmont Bridge, and also with reference to the papers transmitted by you under blank cover, 24th December last, from the Town Clerk, respecting the aforesaid matters, I am directed by Mr. Solicitor General Hargrave to state that the defence of that encroachment by setting up "an amicable arrangement" by parties, without legal authority to make such an arrangement, cannot stand against the public right. The defence set up in the letter of Mr. Northwood, dated 2nd July, 1859, that no legal notice was given to him before the land was resumed, must, the Solicitor General thinks, be inquired into.

I have, &c.,

W. E. PLUNKETT.

THE UNDER SECRETARY.

Sydney: Thomas Richards, Government Printer.—1860.

PUBLIC BUILDINGS AT SHOALHAVEN.

(PETITION RELATIVE TO.)

Ordered by the Legislative Assembly to be Printed, 20 October, 1859.

To the Honorable the Legislative Assembly of New South Wales.

SHREWETH :—

That your Petitioners have of late years observed with concern and surprise several attempts by interested parties to ignore the features of the Shoalhaven District, they maintaining that as Nowra is a Government Village Reserve all Public Buildings and conveniences should be erected thereon.

That your Petitioners have also seen that these attempts have succeeded in some instances, and that the newly elected member for the district is pledged to use his utmost endeavours to have the Public Buildings erected at Nowra.

That it has been acknowledged at various times by nearly every Magistrate of the district, and it is also proved by patent facts that Nowra is not the central spot of the district, whence it follows that the interests of your Petitioners and others should not be sacrificed on insufficient grounds; a comparison of the township of Nowra with that of Terara is made at foot, which is evidence of the non-central position of Nowra. And your Petitioners would further point out that whilst the lots at Nowra have only been sold with difficulty, and after being repeatedly offered, and that the upset price of £8 per acre only has been obtained, land on Terara is leased at ground rents varying from £50 per annum per acre to £5 per annum per acre;—this fact of itself your Petitioners deem to be conclusive.

That the only objections of any weight that your Petitioners have heard against adopting Terara as the centre of the district are—that Terara is private property, and that none of it is for sale. Though your Petitioners conceive that the greatest convenience of the greatest number is the true principle to regulate the placing of Public Buildings, they are, nevertheless, able to answer both the foregoing objections by stating that Terara is now being surveyed for sale in small lots, and that the proprietor has stated her willingness to give the necessary land for sites for Public Buildings. It may be observed, that nearly all the alienated portion of Nowra belongs to one individual ostensibly or by secret lien.

That the Steam Company have selected Terara as the fittest place for the erection of their stores, and all commercial evidence tends the same way.

That your Petitioners would also observe that Terara is midway between the temporary Court Houses of Numba and Nowra, and nearly midway between the present Post Offices and that of the two Ferries, from the Camden side of the river, one crosses Terara near its eastern boundary, and the other about two-thirds of a mile above its western boundary.

That on comparison of Nowra with Terara, as regards trade, your Petitioners beg to state that—

Terara contains—		Nowra contains—	
Publicans.....	1	1
Storekeepers	6	0
Blacksmiths	2	0
Bakers	1	0
Shoemakers	3	0
Carpenters	2	1
Wheelwrights	1	0
Watchmakers	1	0
Auctioneers	3	0
Tailors.....	2	0
Saddlers	1	0
Cabinetmakers	1	1
Churches	2	0
Day and Sunday Scholars	200	14
Steam Flour Mill	1	1

That the publican at Nowra is also a cabinetmaker, who maintains himself in a weatherboard house of the value of perhaps £250, by the exercise of both trades.

That the publican at Terara has a large brick hotel erected at a cost of £2,000, of a very superior class.

That the Church of England edifice at Terara is a substantial brick building, erected at a cost of £700.

That the Wesleyan Church was erected at a cost of £350.

That in view of these facts, the truth or falsehood of which can be easily discovered by a slight examination, your Petitioners pray that no hasty steps will be taken to fix the Public Buildings in what is literally the bush, but pray that your Honorable House will make inquiry into the truth of the various facts herein stated, in order that the buildings so much wanted, may be placed in accordance with the real wants of the population.

[Here follow 124 Signatures.]

NEW SOUTH WALES.

BRIDGE OVER THE LACHLAN RIVER.
(PETITION RELATIVE TO.)

Ordered by the Legislative Assembly to be Printed, 22 February, 1860.

To the Honorable the Members of the Legislative Assembly, in Parliament assembled.

The Petition of the undersigned Inhabitants of the Carcoar and Lachlan Districts, and others, interested in the movement of stock and conveyance of property over the Lachlan River,—

RESPECTFULLY SHEWETH:—

That your Petitioners suffer much loss and inconvenience through the want of a Bridge over the Lachlan River, at Cowra.

During average seasons all passage of vehicles across the river is stopped for several weeks, and in the rainy seasons all traffic is suspended for months.

The principal road, from the north to the south, is by Cowra; the transition of stock is now very large, and during floods the residents suffer much in consequence of the detention of the stock on the north bank of the river, usually consuming the whole of the herbage on their runs, to their serious injury.

At present there is a boat on the river, at Cowra, but in consequence of the shifting of the sands the sides of the river may be very deep and the centre very shallow, and from this cause a punt of sufficient capacity to take teams and vehicles over would be useless.

The traffic is such at Cowra, that during floods from five to twenty pounds per week have been received by the boatman for the conveyance of passengers and property over the river.

It frequently happens during floods that several lives are lost in attempting to cross the river.

Your Petitioners therefore pray that your Honorable House will sanction the erection, at Cowra, of any Bridge over the Lachlan River for which funds may be placed upon the Estimates.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 171 Signatures.]

Legislative Assembly.

NEW SOUTH WALES.

BRIDGE OVER THE LACHLAN RIVER.

(PETITION RELATIVE TO.)

Ordered by the Legislative Assembly to be Printed, 24 February, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Inhabitants of Carcoar, and the surrounding Districts,—

SHewETH:—

That your Petitioners, having noticed the motion of the Honorable Member for East Macquarie praying that the sum of seven thousand pounds may be placed on the Estimates for the construction of a Bridge across the Lachlan River at Nanimi, beg most respectfully to state, that they consider this to be the most fit site for a Bridge, it being the direct road from Bathurst, Orange, Carcoar, and Canowindra, to Wagga Wagga and Deniliquin, and also the direct road from the Northern Districts for all overland stock to Port Phillip.

Your Petitioners, therefore, humbly recommend that should the said sum be placed on the Estimates, for the purpose of constructing a Bridge across the Lachlan River, that Nanimi may be the place fixed upon for that purpose.

And your Petitioners as in duty bound will ever pray.

PENRITH NEPEAN BRIDGE RE-CONSTRUCTION BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration was referred on the 7th instant the "*Penrith Nepean Bridge Re-construction Bill*," beg leave to report to your Honorable House,—

That they have carefully perused the Bill referred for their consideration, and examined the Promoter on behalf of the Company,* and * J. T. Ryan, Esq. also their Engineer † (whose Evidence respectively will be found appended † E. O. Moriarty, Esq. hereto), and that the Preamble ‡ of the Bill having been satisfactorily ‡ Vide Schedule of Amendments. proved by the Evidence of those gentlemen, they proceeded with the several Clauses of the Bill, in certain whereof they deemed it necessary to introduce Amendments, as shewn in the accompanying Schedule. (Page 5.)

And your Committee now beg to lay before your Honorable House the Bill, as amended by them.

ROBERT T. JAMISON,

Chairman.

Legislative Assembly Chamber,

Sydney, 12 June, 1860.

PROCEEDINGS OF THE COMMITTEE.

FRIDAY, 8 JUNE, 1860.

MEMBERS PRESENT:—

Mr. Atkinson,		Mr. Flett,
Mr. Clements,		Mr. Hyeronimus,
Mr. Cummings,		Mr. Jamison,
Mr. Samuel.		

R. T. Jamison, Esq., called to the Chair.
 Order of the House referring Bill to Committee on the 7th instant, read.
Promoters of the Bill—The Penrith Nepean Bridge Company.
Agent for Promoters—J. T. Ryan, Esq.
 J. T. Ryan, Esq., examined.
 Witness withdrew.
 Committee deliberated.

[Adjourned.]

TUESDAY, 12 JUNE, 1860.

MEMBERS PRESENT:—

R. T. Jamison, Esq., in the Chair.

Mr. Clements,		Mr. Cummings,
Mr. Mort.		

In attendance—

J. T. Ryan, Esq., on behalf of the Penrith Nepean Bridge Company.
 E. O. Moriarty, Esq., C. E., *Engineer to Company*, called in and examined.
 Witness withdrew.
 Preamble of the Bill read.
 Committee deliberated.
 Motion made (*Mr. Clements*) and *Question*,—That the Preamble be amended (lines 10 and 11) by omitting “compensate the said Company in some measure for their heavy loss in that behalf and to”—*agreed to*.
 Preamble, as amended, read.
 Motion made (*Chairman*) and *Question*,—That this Preamble stand part of the Bill—*agreed to*.
 Clauses 1, 2, and 3, respectively read and agreed to.
 Clause 4 read.
 Motion made (*Mr. Clements*) and *Question*,—That the Clause be amended (line 35) after “River” by inserting “one punt to leave each side of the River every quarter of an hour from six o'clock A. M. to six o'clock P. M. and from six o'clock P. M. to six o'clock A. M. at such times as may be required”—*agreed to*.
 Clause, as amended, read and agreed to.
 Clause 5 read.
 Motion made (*Mr. Clements*)—That the Clause be amended (line 14) by omitting “half a mile”, and inserting “one furlong”—*agreed to*.
 Motion made (*Mr. Clements*) and *Question proposed*,—That the Clause be further amended (lines 18 and 19) by omitting, “as well upon each and every person so hiring as upon each and every person so using or employing any such boat punt or other vessel.”
 Committee deliberated.
Question,—That the words proposed to be omitted stand part of the Clause—*put*.
 Committee divided.

Ayes, 2.		No, 1.
Mr. Cummings,		Mr. Clements.
Mr. Mort.		

And Committee considering whether the voice of the Chairman, exercising also a casting vote, should be included, according to Standing Order (101) of the House of Commons governing Committees on Private Bills,—

It was Resolved—

“That, in the absence of any precedent for such a course, in the case of former Committees of this Legislature, it is inexpedient to raise a question by departing from the ordinary practice.”

Whereupon, *Motion* (for amendment, lines 18 and 19) *negatived*.

Motion

Motion made (*Chairman*) and *Question*,—That the Clause be further amended (line 21) after “aforesaid,” by inserting “and the said several penalties shall be recoverable in manner directed or required by the provisions of the said Acts hereinbefore referred to or either of them”—*agreed to*.

Motion made (*Chairman*) and *Question*,—That the Clause be further amended (line 24) by adding the second proviso following:—“Provided also that this Clause and anything in this Act contained shall not be construed to prevent the erection or construction of any other Bridge by any other Company or persons within the above-mentioned distance after application in the usual way to the Legislature of the said Colony”—*agreed to*.

Clause as amended, read and agreed to.

Clause 6 read.

Motion made (*Mr. Mort*) and *Question*,—That the blank (line 30) be removed by inserting “twenty”—*agreed to*.

Clause as amended, read and agreed to.

Clauses 7 and 8 respectively, read and agreed to.

And no Title having been prefixed to the Bill,—

Motion made (*Chairman*) and *Question*—That the Title hereof be “*A Bill to confer certain powers on the Penrith Nepean Bridge Company*”—*agreed to*.

Chairman requested to report the amended Bill to the House.

SCHEDULE OF AMENDMENTS.

Page 1, Title.	<i>Insert</i> “A Bill to confer certain powers on the Penrith Nepean Bridge Company.”
Page 1, Preamble, Lines 10 & 11.	<i>Omit</i> “compensate the said Company in some measure for their heavy loss in that behalf and to.”
Page 1, Clause 4, Line 35.	<i>After</i> “River,” <i>insert</i> “one punt to leave each side of the River every quarter of an hour from Six o'clock a. m. to Six o'clock p. m. and from Six o'clock p. m. to Six o'clock a.m. at such times as may be required.”
Page 2, Clause 5, Line 14.	<i>Omit</i> “half a mile”; <i>insert</i> “one furlong.”
Page 2, Clause 5, Line 21.	<i>After</i> “aforesaid,” <i>insert</i> “and the said several penalties shall be recoverable in manner directed or required by the provisions of the said Acts hereinbefore referred to or either of them.”
Page 2, Clause 5, Line 24.	<i>After</i> “Penrith,” <i>add</i> “Provided also that this clause and anything in this Act contained shall not be construed to prevent the erection or construction of any other Bridge by any other Company or persons within the above mentioned distance after application in the usual way to the Legislature of the said Colony.”
Page 2, Clause 6, Line 30.	<i>Before</i> “pounds,” <i>insert</i> “twenty.”

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

PENRITH NEPEAN BRIDGE RE-CONSTRUCTION BILL.

FRIDAY, 8 JUNE, 1860.

Present:—

MR. ATKINSON,		MR. FLETT,
MR. CLEMENTS,		MR. HYERONIMUS,
MR. CUMMINGS,		MR. JAMISON,
MR. SAMUEL.		

ROBERT THOMAS JAMISON, Esq., IN THE CHAIR.

Mr. James Tobias Ryan called in and examined:—

1. *By the Chairman*: You are a director, and one of the original proprietors of the Penrith Nepean Bridge Company? Yes. I appear here on behalf of the Company.
2. In what year was the Penrith Nepean Bridge first erected? It was opened on the 1st January, 1856.
3. In consequence of an Act obtained in the fifteenth year of Victoria, incorporating the Company? Yes.
4. Was there any Act subsequent to that? Yes; the 18th Victoria.
5. What was the object of the second Act? To increase the capital stock of the Company, as it was found to be insufficient.
6. By what amount was the capital increased? From £6,000 to £20,000.
7. What was the actual cost of the first bridge, as near as you can say? £12,570, or thereabouts.
8. How long did it stand? Eighteen months, within a day or two. It was washed away on the 29th June, 1857.
9. The Company then erected another bridge? Yes.
10. At what cost? £11,300, and upwards.
11. Making in all about £24,000? Yes.
12. How long did the second bridge stand? Twelve months exactly, to a day, from the time it was opened.
13. When was it opened? In May, 1859, I think.
14. By both the Acts mentioned, the Company were authorised to receive the tolls of the bridge? Yes.
15. According to rates specified in the schedule? Yes.
16. What is the state of the bridge at present? The state of the bridge is, that eleven piers of the new structure are standing erect in the centre of the river, all the old work that they were connected with having been carried away, and the top of the bridge lifted off by the water.
17. Where has the deck or platform of the bridge been carried to? About a quarter of a mile down the river, on to a sandbank on my land.
18. Will that be available in the construction of the contemplated new bridge? Yes, the whole of it will come in.
19. What do you consider the value of the material? The cost value given by the contractor for the timber alone of the new work was £3,500.

Mr. J. T.
Ryan.

8 June, 1860.

- Mr. J. T. Ryan.
- 8 June, 1860.
20. Exclusive of the ironwork? Yes. The cost of the ironwork in the new bridge was £1,500.
21. I suppose it would be impossible to obtain those amounts for the materials as they are, but they are worth that for the new structure? It would be impossible in any other way; they are worth that for the new structure.
22. In the event of your not obtaining this Bill this will be a dead loss? Yes, or nearly so.
23. As a director, are you aware whether it was the intention of the Company, previous to the destruction of the bridge, to apply to the Legislature to cure any defect in their previous enactments? Yes, it was proposed to apply for power to increase the capital, as it was found that £6,000 would be inadequate to carry out the object, the cost having amounted to £11,000.
24. Who at present receives the tolls at Emu Ferry? Mrs. Piesley, who happened to have a punt at the time of the flood taking away the bridge. The punt belonging to the Company had broken away from its moorings in the previous flood.
25. Then the Company are not in possession of a punt at present? A punt is to be launched to-day.
26. Since the destruction of the bridge the Company have constructed a punt? Yes.
27. In the event of this Bill passing, and until the completion of the bridge proposed to be erected, will the Company be in a position to keep the ferry open to the public? Yes, at all times. Our intention is to keep two punts, so that at all times there shall be one on each side of the river, and as soon as one crosses the middle of the river the punt at the other side is to start, empty or full.
28. By what engineer was the first bridge erected? Mr. David McBeath.
29. And the second structure? By Mr. Moriarty.
30. The eleven central piers remaining—whose work was that? Mr. Moriarty's.
31. Have you seen the plans prepared for the proposed bridge? No, I have not; they are in Mr. Moriarty's office, not finished yet, I believe.
32. Where is Mr. Moriarty? At Newcastle; I believe he was in the steamer, "City of Newcastle," which started for Newcastle yesterday, and returned to port on account of the bad weather. I may add, to what I have already stated, that the approaches are in a very bad state at the present moment, and it is intended to put them in repair at once if the Bill is carried.
33. *By Mr. Clements*: Are you aware whether anything has been done by the Government to these approaches since the last flood? No, nothing has been done by the Government.
34. *By Mr. Cummings*: Do you allude to the approaches to the bridge or the approaches to the punt? The punt, irrespective of the approaches to the bridge.
35. Are they in an impassable state? They are in a bad state.
36. I see by this Bill that the Company proposes to amend and put in passable repair these approaches? Yes.
37. Therefore, the Government will not be called upon to expend any money? No.
38. Is the Company in a position now to comply with the wants of the district for conveyance across the river? Quite so. A new punt is to be launched to-day.
39. *By Mr. Clements*: Are you aware what arrangements, if any, has been entered into between the Government and Mrs. Piesley as to the present working of the punt? From what the present Government told me, on application to them for assistance, they have allowed Mrs. Piesley to carry on the traffic. Mrs. Piesley was the late lessee of our bridge; and when the bridge was washed away, knowing she had a punt, and that many people thought she would make extravagant charges, I went to her and begged that she would put her punt on the river and charge only the fare charged on the late bridge; I told her that it would be best for her future benefit, because if she did otherwise it would aggravate the Government and the people. She did as we wished, and I believe everything has since been carried out as well as it could be under the circumstances.
40. I have a letter complaining of overcharge and great inattention in the working of the punt—are you aware of anything of the kind? Occasionally, but very rarely, the approaches being very bad; I have known a team to be stuck at one side of the river, and consequently the traffic could not be carried on with one punt as well as it could be done with two.
41. Have you heard of any attempts at extortion? Not one.
42. Have you heard that Chinamen have been charged a shilling a head, no matter what their number? I believe that has been the case.
43. Prior to the present arrangement, has it not always been usual to let this punt by tender, and for the lessee to pay for it? Prior to any bridge being opened it was let by auction.
44. Is there not great inconvenience occasioned by there being but one punt? Yes.
45. And your Company will be prepared, in the event of this Bill passing, to keep a punt at each side, without charging any increased rates over those formerly charged? Not a farthing more than was allowed by the previous Bill.
46. You mean the rates charged on the bridge? Yes.
47. What was the difference between the bridge rates and the rates allowed to the punts before the construction of the bridge? They were only payable once a day by the bridge, and every time by the punt.
48. Do you not think it is unfair that persons travelling long journeys should pay as much for one passage over the river, as those who go over eight or ten times a day? People who live in the district would often take a ride or drive across the water if they had to pay only once.
49. Why should those coming long distances pay for the pleasure or convenience of those residing in the neighborhood? They would pay ten times more in the year than travellers making long journeys.
50. *By the Chairman*: The charge over the bridge was payable only once a day? Yes.
51. *By Mr. Clements*: Were not the tolls on the bridge much larger than those originally allowed for the punt? No, the same toll exactly, but payable only once a day on the bridge.

52. Do you not think it would be an advantage and convenience to the public that the punt should start at certain times, as near as possible? Yes; I have said it is the intention of the Company at once to have two punts and a man in each, and when one crosses the middle of the river the other is to start, full or empty,—so that at all times there will be a punt at each side.
53. Speaking of the value of the material of the bridge lately destroyed by the flood, do I understand that it is the intention to erect a bridge of a similar character, or to confine yourselves exclusively to a pontoon bridge? A pontoon bridge is proposed at the present moment, but I would rather myself have a more permanent structure, if it is possible to get one. In the meantime, I believe, the intention is that we should place before the House the proposed plan as soon as it is ready.
54. *By the Chairman*: With regard to the Company having exclusive rights over a certain portion of the river, how has the necessity for that originated—why do you wish to have exclusive rights over a certain distance? Because other punts plying for hire would, of course, decrease the revenue derivable from the ferry to the Company.
55. When your bridge was first opened was there any competition by punts or otherwise? There was a punt in opposition to us. It was a defect in the first Bill that it never provided that, if the first bridge should be washed away, we should work by punts, and, consequently, one had as much right on the river as another.
56. When it was a Government ferry was anybody allowed to ply within a certain distance? Not within a mile.
57. And you ask for exclusive right for half a mile? Yes.
58. Would not a much less space be sufficient? Yes, even a quarter of a mile, or a couple of hundred yards.
59. *By Mr. Cummings*: The Company seeks for no further protection under this Act, as it appears to me, than the Government has on similar occasions adopted? No.
60. When the Government had a ferry at this place that ferry was let annually by lease? Yes.
61. Did the Government then protect the lessee from any invasion of his rights, by debarring other punts from working alongside the lessee's punts? Most decidedly so.
62. The Company seeks no more than the same protection? No.
63. By an Act the construction of a bridge across the Nepean River has been authorized? Yes.
64. The Company has expended on that work a large sum of money? Yes.
65. To the amount of £24,000? Yes.
66. At present that outlay is a dead loss to the shareholders? Yes.
67. And now, at a further expense of £10,000, they propose, for public convenience, to erect a pontoon bridge? Yes.
68. To enable them to do so, they seek in this Act for the protection the Government has hitherto established? Yes, exactly so. I may add that, prior to our getting the Bill at all, when the statistics of the punts were taken into consideration, the revenue derived by the Government from the tolls amounted to a mere nothing. It took quite as much money to keep them in punts, and to keep the approaches right, as the Government received from the punts. I believe you will find that in the first evidence on the Bill.
69. Was that during the time the Government managed the punts themselves? Yes. I mean when the Government sold the tolls by auction.
70. Their management turned out a dead failure? Yes, their management never gained anything to the revenue.
71. *By Mr. Clements*: Have the Government had the punts in their own hands since the first year of the gold discovery? No.
72. Was there not a great increase in the traffic then? That was not the reason of the difference. It came under my knowledge that when the tolls were put up to auction the lessees would come to an agreement among themselves to prevent the Government from getting the full value; they were deteriorated about one-third. One would get £50, and another £30, and so on, not to bid against the man that wanted it.
73. *By the Chairman*: The lessee bought off a number of parties from bidding against him, and so reduced the price? Yes.
74. *By Mr. Cummings*: I believe that has been frequently the case? Yes, it has come under my notice often.
75. *By Mr. Samuel*: Do you not think it would be a much greater advantage to the public to have a permanent bridge than a pontoon bridge? My opinion is that no bridge would stand when it came to be under water.
76. I refer to such a bridge as the floods would not touch. Would this Bill, as you submit it to the Committee, preclude the possibility of a permanent bridge, such as I speak of, being built, within the duration of this Act, within the limits of half a mile of the Company's bridge on either side? It would as it stands.
77. Do you not think it possible that another Company, or your own Company, might subscribe additional capital to build a permanent bridge? It is our intention, if this Bill passes, to do so; and I am in communication with Mr. Harbinger, an agent for suspension bridges from England; and if it is found expedient we would make an arrangement at once for a permanent bridge of that description in preference to putting up a pontoon bridge.
78. But if this Bill passes in its present shape it will prevent such a bridge being erected by anyone but yourselves for a period of forty years? Yes, I should imagine so.
79. Then if you were not disposed to do so it would be impossible for a permanent bridge to be erected within the distance of half a mile on each side of your bridge? Yes.
80. *By Mr. Clements*: In the event of railway extension over the river at that point, would this Bill affect it? ———.

Mr. J. T.
Ryan.

June, 1860.

- Mr. J. T. Ryan. 81. *By the Chairman*: I take it that the Company would have no objection to have a proviso inserted in your Bill allowing another bridge to be erected within any distance? Within any distance, if a permanent structure was mooted.
- 8 June, 1860. 82. Although, if you get your Bill, you will have an exclusive right to the tolls within a certain distance, you have no objection to a proviso allowing another bridge to be built even alongside yours? Not the slightest.
83. *By Mr. Flett*: Why do you ask such a long term as forty years—would not twenty years be sufficient? No; we have lost already £24,000, and the principal and interest of that sum, and the additional cost of a new bridge could never be repaid in less time than forty years.

TUESDAY, 12 JUNE, 1860.

Present:—

MR. CLEMENTS,

MR. MORT.

MR. CUMMINGS,

ROBERT THOMAS JAMISON, Esq., IN THE CHAIR.

Edward Orpen Moriarty, Esq., C.E., called in and examined:—

- E.O. Moriarty, Esq., C.E. 84. *By the Chairman*: You are a civil engineer? Yes.
- 12 June, 1860. 85. And are Engineer for Harbors and Rivers? Yes.
86. Were you the engineer for the late Nepean Bridge? Yes; I was the engineer under whom the repairs were carried out.
87. The first erection was not yours? No.
88. Do you know the person by whom it was first erected? By a person named McBeath.
89. That was carried away by a flood some three years ago? Yes.
90. You were then the engineer of the company to repair the bridge? To repair the parts that had been carried away.
91. How much of the first bridge was carried away? 290 feet of the centre, and about 40 feet at each end, where it joins the land. There was a detached part left on each side, 160 feet on one side, 140 on the other, to which the new work was joined.
92. In repairing the bridge, did you follow upon Mr. McBeath's plan? As to the height of the bridge—the height limited me—I could not alter the height.
93. Will you explain the difference between your's and Mr. McBeath's? I should explain that the bottom of the river is rock right across; Mr. McBeath attempted to drive piles on this rock, which of course was impossible, the piles were merely battered up at the end—they had no hold whatever at the bottom, but merely rested upon the rock. The result was, that the first heavy flood which came down swept away the centre part where the bridge rested upon the rock. When I went to work, I saw that the only way of putting down anything that would stand was to fasten the piers to the rock, to secure them down, which I did by means of a diving bell, and these piers have all stood; but the end portions, which had been constructed by Mr. McBeath—being 160 feet on one side, and 140 feet on the other—were swept away by a heavy flood, carrying away the whole of the deck with them.
94. You have seen the site of the bridge since the recent destruction? Yes.
95. How many piers of your work are still standing? Eleven.
96. That is the whole number? Yes.
97. Have you been consulted by the Company with reference to the re-construction of the bridge on that or on any other plan? Yes; I was asked by the Company to advise them in the matter, and as they do not seem in a position to put up a permanent bridge, I suggested that they might put up a pontoon bridge.
98. *By Mr. Clements*: For what reason do you conclude that they are not in a position to build a permanent bridge? I fancy the difficulty of raising money, which is very great.
99. *By the Chairman*: A permanent bridge could only be constructed at a very large outlay? I think about £15,000; that is a bridge above the reach of all floods.
100. *By Mr. Clements*: Not upon the level of the former bridge? No.
101. *By Mr. Cummings*: Above high-water mark? Above the reach of all floods.
102. *By Mr. Clements*: Would any portion of the present, or late structure be used? No further than the timber—the timber being on the spot a great portion of it might be used.
103. *By Mr. Cummings*: Of the framing and deck? Yes.
104. *By Mr. Clements*: Have you any idea what that would be worth? I dare say £1,500 or £2,000.
105. Would you erect a new bridge on the present site? Yes, or a little above it; I should keep a little higher up the river. For a bridge to be above everything there could not be a better site, as the rocky foundation would give a capital opportunity of carrying up stone piers.
106. *By the Chairman*: I see by one of the clauses of the Bill, you propose to construct the bridge wholly or in part of pontoons—can you explain that? We have not decided yet—at least I have not sufficiently examined the foundations to see whether the present piers might not be available—whether we might not bring back the deck, a considerable length of which is in one piece, and put it on the old piers, and connect that portion with the land on each side by means of pontoons.
107. In the event of that plan being adopted would the bridge be open for traffic at a higher level of the river than that at which punts can at present work? No, I do not think so.

108. Would it be equal? I think nearly equal. I can scarcely give a correct opinion upon the subject, for I have not seen the river at different stages of flood to ascertain what its rapidity is, or to judge how the punt could work. E.O. Moriarty,
Esq., C.E.
109. Supposing the river to be ten feet above the ordinary level, and the punts to be unable to work—would the pontoon bridge be able to work? I think not; but it would if not above six feet. 12 June, 1860.
110. *By Mr. Clements*: Could this be worked in the event of the river being unusually low? Yes, for the flaps at the end connected with the platform would rise and fall with the rise and fall of the river.
111. *By the Chairman*: In the event of your finding that the piers at present standing were not sufficiently secure, would you then construct a bridge resting wholly on pontoons? Yes.
112. *By Mr. Mort*: Would not a pontoon bridge be better than a bridge resting partly upon pontoons and partly upon piles? If a bridge rested wholly on pontoons, the pontoons would, in the event of a flood, have to be cast adrift at one end to lie alongside the bank, and allow the water full means of escape; besides by the present arrangement, if the piles are made available, the cost of building pontoons for the centre, a length of 290 feet, is saved.
113. *By Mr. Clements*: The width of the river is about 200 yards—is it not? Somewhere about that; I forget the exact length.
114. Have you seen pontoon bridges of any size? Yes, several.
115. On as large a scale as this would be? Much larger.
116. Are they found to answer? Yes; there is one on the Neva very much longer than this—at least there was one when I was at St. Petersburg.
117. *By Mr. Cummings*: Where the traffic is much greater? Yes, it is in the heart of St. Petersburg. There are also several on the Rhine, where there would be danger of constructing fixed bridges from the masses of ice.
118. And timber? On the Neva the chief danger is from the ice floating down the river.
119. *By the Chairman*: Have you seen any pontoon bridges in this Colony? Never.
120. Are you aware whether any have been constructed in the Colony? I cannot say that I am.
121. Of what do you propose to make the pontoons? Of timber—just ordinary punts.
122. Not of iron? Iron might be better, it would be more durable, but would be much more expensive.
123. In the event of your making timber pontoons, a quantity of the timber from the recent bridge would be available? Yes, nearly all of it. The decking of the late bridge would come in for the decking of the pontoons, the planks, and sides.
124. In erecting a pontoon bridge, do you propose to make it as wide as the present bridge? Yes, I should put on the deck just as it stood upon the former bridge.
125. That is about thirty-two feet? I do not like to say, as I have a bad memory for those things, but I think somewhere about that.
126. *By Mr. Clements*: Supposing the Company to be empowered to proceed to work, how long would it be before they would be able to open the bridge? It might be opened, I should say, in eight months; but there is great risk of labor. I am afraid we are likely to have a troubled labor market next year, and that we might have some difficulty in getting contractors.
127. Is it a work of such a nature that it could be proceeded with at once with extraordinary vigor? Yes, it might. I do not know exactly the state of the river now. A good deal would depend upon whether the river was perfectly clear, so as to enable parties to examine the foundation of the old piers. Before the bridge was carried away a part of the old work had risen six inches, and Mr. Fitzgerald directed me to have it examined at once, and to report upon it as soon as possible. I sent men to examine it, and they said the mud was so thick at the bottom that they could see nothing, and that, therefore, the matter had better be deferred. I agreed to that, but meantime the second flood came, and carried away the bridge. I have myself been down in the bell, and I know that when the water has been thick, it has been so dark that I could scarcely see the other man in the bell.
128. *By the Chairman*: Then, when you say the work could be completed in eight months, you mean supposing everything to be favorable? Yes; it might be that the water would not be sufficiently settled to enable us to do anything.
129. *By Mr. Clements*: But the pontoons and other work could be done? Yes. If we found the piers were so shaken or started from the bottom that they would not come in, it would take a great deal longer time to build pontoons for the whole bridge.
130. Under any circumstances you think it would not be ready by the next wool season? I am afraid not.
131. *By Mr. Mort*: I suppose it would take eighteen months to build a pontoon bridge? I dare say it would.
132. *By the Chairman*: Do you assist the Company with these plans in consequence of your previous engagement with them? Yes. I told the Company that my services would be quite gratuitous. I would not charge them for any assistance I might now give.
133. In fact you look upon yourself as bound in some measure to assist them out of their difficulties? Yes.
134. *By Mr. Clements*: You think you could suggest nothing better? Except a high level bridge; and I feel satisfied that that will ultimately be necessary.
135. *By Mr. Cummings*: Under all the present circumstances you recommend a pontoon bridge? Yes.

1859.

Legislative Assembly.

NEW SOUTH WALES.

TENDERS TO LEASE CROWN LANDS.

(CORRESPONDENCE RELATIVE TO REJECTION OF.)

Ordered by the Legislative Assembly to be Printed, 20 September, 1859.

RETURN to an Address of the Honorable the Legislative Assembly of New South Wales, dated 18 May, 1858, praying that His Excellency the Governor General would be pleased to cause to be laid upon the Table of this House,—

“Copies of all Correspondence between the Executive Government and any Commissioner of Crown Lands, or other person, on the subject of rejection of Tenders or Applications for Leases or Occupation Licenses, or of alleged delay or neglect on the part of any Commissioner of Crown Lands to report thereon.”

(Mr. Forster.)

SCHEDULE.

NO.	PAGE.
1. Commissioner O'Connell, reporting on A. Scott's tender for Hornett Bank. 22 October, 1852.	3
2. Chief Commissioner of Crown Lands to A. Scott, declining tender. 12 March, 1853 ..	3
3. Commissioner Wiseman, reporting upon A. Scott's tender, No. 8, September, 1853. 1 November, 1856	4
4. Chief Commissioner of Crown Lands to Commissioner Wiseman, in respect to tender. 18 January, 1857	4
5. Chief Commissioner of Crown Lands to Commissioner Halloran, requesting explanation. 28 July, 1857	5
—	
1. J. Scott to Commissioner O'Connell, respecting his tender on Palm Tree Creek. 8 September, 1853	5
2. Commissioner O'Connell, reporting on tender for Palm Tree Creek, No. 1. 25 November, 1853	6
3. Do., do., No. 2. Do. ..	7
4. Do., do., No. 3. Do. ..	7
5. J. Scott to Chief Commissioner of Crown Lands, relative to his tenders. 21 November, 1855	7
6. The Chief Commissioner of Crown Lands to Commissioner Wiseman, respecting foregoing tender. 19 December, 1855	9
7. Chief Commissioner to Commissioner Wiseman, further respecting Scott's tenders. 16 January, 1856	9

TENDERS TO LEASE CROWN LANDS.

No. 1.

COMMISSIONER O'CONNELL to CHIEF COMMISSIONER OF CROWN LANDS.

*Crown Lands Office,
Gayndah, 22 October, 1852.*

1. This tender is for land that would have been included under their original descriptions in the tenders of Mr. Stephens, but having amended these, (with that gentleman's consent,) as mentioned in my report of the 20th instant, on Cowanga, Mr. Scott's tender is open for acceptance.

Tender No. 2,
March, 1851.
Andrew Scott.
No. 2, Hornet
Bank, No. 1,
22,400 acres, to be
called Hornett
Bank, 17,280
acres.

2. I see no necessity for a reserve.

3. I recommend that the description of this run stands thus:—A rectangular block of land on the right or eastern bank of the Dawson River, commencing at a tree marked with a cross (×), and being the point at which a line at right angles to the river is drawn as the boundary between this run and that on Mr. Owen's, and from the before-mentioned tree by the corner of the river, upwards six miles, by four and a-half miles back from the river. 17,280 acres.

4. The land applied for is situated in the Unsettled Districts.

5. By the descriptions of this tender sent to me, three distinct blocks are included in one application, and I therefore report on each block separately,—with the exception of the third block which I cannot, as yet, report on.

6. I will take this opportunity of mentioning that Mr. Lyons' "Bungaban" tenders *might* come upon any part of the Dawson River, so far as the letter of their descriptions defines their localities, and I, therefore, in reporting on any Dawson River tender, presume the Bungaban tenders to have been rejected.

I am, &c.,

M. C. O'CONNELL,
Commissioner of Crown Lands.

THE CHIEF COMMISSIONER
OF CROWN LANDS,
Sydney.

No. 2.

CHIEF COMMISSIONER OF CROWN LANDS to MR. A. SCOTT.

*Crown Lands Office,
Sydney, 12 March, 1853.*

SIR,

As it appears from the report of Mr. Commissioner O'Connell that you have included in your tender of 1st February, 1851, for a run called Hornett Banks, three distinct runs, I have the honor to inform you that your tender has been declined.

2. This course would have been followed at the time of the opening of the tender, but the area and estimated capabilities given was understood to apply to the whole extent of country applied for.

I am, &c.,

GEO. BARNEY,
Chief Commissioner of Crown Lands.

MR. A. SCOTT,
Burnett District.

No. 3.

Commissioner's report on tender No. 8, September, 1853, from Andrew Scott, Hornett Bank, 16,000 acres.

Crown Lands Office,

Leichhardt, 1 November, 1856.

1. The land applied for in this tender is not under lease, nor applied for in any other tender.

2. There is no apparent necessity for a reserve.

3. The boundary requires the following amendment:—

Bounded on the east by a marked tree line running south from a tree marked by Commissioner O'Connell X on the south bank of the Dawson; on the north by five miles of the Dawson River to a tree marked Q by Commissioner Wiseman; on the west by a line running from the tree marked Q five miles parallel and equal to eastern boundary, to a tree in the scrub marked 2; on the south by a line from that tree, parallel and equal to northern boundary.

6thly. I desire to point out to the Honorable Board that Captain M. C. O'Connell, when Commissioner, reported favorably in 1852, or thereabouts, on this and the two adjoining runs, Hornett Plains and Hornett Creek, Nos. 9 and 10, Sept., 1853; but that Mr. Scott's tenders were rejected or sent back to him by the Board, because he had ignorantly tendered for the whole area, and had only offered one rent. Mr. Scott is not yet in legal possession, but he was the very first occupier, and has now many valuable improvements on the land. Some of his neighbours insist on it that Captain O'Connell reported favorably only on one run. Inform him that they have tendered for the land where his improvements are, and encroach thereon. Mr. Scott has come to me, and pointed out in a report written by me last year what my opinion on the subject was; but at that time I had not the abstract of the tenders in my office. I have now seen Captain M. C. O'Connell, in presence of Mr. Andrew Scott, and Captain M. C. O'Connell distinctly told me that he had reported favorably on all the three runs tendered for by Mr. Andrew Scott, and that he still thinks that person entitled to them. In this opinion I concur; and I venture to express a hope that the Honorable Board will, as soon as convenient, put Mr. A. Scott in legal possession, so that he may be enabled to contend successfully with his more intelligent neighbours.

8thly. The land applied for is in the unsettled District of Leichhardt, and I beg to recommend that this tender be accepted.

W. H. WISEMAN,

Commissioner of Crown Lands.

THE CHIEF COMMISSIONER
OF CROWN LANDS,
Sydney.

No. 4.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER WISEMAN.

Crown Lands Office,

Sydney, 13 January, 1857.

SIR,

In reply to your report of 1st November last, on tender No. 8, of September, 1853, from Mr. Andrew Scott, for a run in your district, called Hornett Bank, No. 1,— I have the honor to inform you that the tender of Mr. Andrew Scott, embracing three distinct runs, was recommended for acceptance by Captain O'Connell, but declined as excessive by His Excellency the late Governor General, on the recommendation of the Board, as intimated to Mr. Scott on the 12th April, 1853. Having been finally declined no claim can now be admitted as regards this tender.

2. The present tenders of Mr. Scott can only, by the Regulations, be dealt with upon their own merits, and on the Commissioner making a report upon the several points admitting of inquiry, as noticed in the Circular of Instructions.

I have, &c.,

GEO. BARNEY,

Chief Commissioner of Crown Lands.

THE COMMISSIONER OF CROWN LANDS,
Leichhardt.

TENDERS TO LEASE CROWN LANDS.

5

No. 5.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER HALLORAN.

*Crown Lands Office,
Sydney, 23 July, 1857.*

SIR,

I beg to call you attention to my letter of the 13th January last, respecting tenders of Mr. Andrew Scott for runs named in the margin, and to request your reply at once, together with an explanation why you did not reply upon receipt of my letter, as it must have been in your power to do so.

I have, &c.,

GEO. BARNEY,

Chief Commissioner of Crown Lands.

THE COMMISSIONER OF CROWN LANDS,
Wide Bay and Burnett.

No. 1.

MR. J. SCOTT to COMMISSIONER O'CONNELL.

Drayton, 8 September, 1853.

SIR,

I have the honor to inform you that since seeing you at Crown Lands Office in Sydney, I have been over the country on Palm Tree Creek, Burnett District, tendered for by Sir C. Nicholson.

The scrub of which there is a considerable quantity upon the ground approaches in several places so closely to the creek as to circumscribe the available country very much, consequently, I consider that from six to ten miles frontage along the creek will be necessary to render a block capable of depasturing 4,000 sheep. I think you will not look upon this as too much when you bear in mind that the tenders embrace only one side of the creek.

As I find that some people in the neighbourhood have been in the habit of mistaking the Robinson Creek of Leichhardt for the Palm Tree Creek, and of calling the main creek the North Branch, I beg to enclose a diagram shewing the different creeks and the position of the several tenders.

You will see that the Robinson, which comes from the south of west, loses itself in a swamp from which several runners come out and join the Palm Tree Creek at eight or ten miles from its junction with the Dawson. I believe the rough sketch I have sent to be as nearly correct as possible.

As I am acting for Sir Charles Nicholson in this matter I shall feel obliged by your directing any communications you may think necessary either to him or to me at his residence, Sydney.

I have, &c.,

JOHN SCOTT.

M. C. O'CONNELL, Esq.,
Commissioner of Crown Lands,
Gaydah.

Mr. Commissioner Wiseman's Report.

I cannot discern that anyone has made such a mistake; everyone knows that the Robinson Creek alluded to by Dr. Leichhardt ran west, and that it falls into the Dawson much higher up. This creek called Robinson by Mr. Scott could not be taken for any other creek but Palm Tree Creek, because it is the only creek which has palms on both sides of it, the other branch or Ruined Castle Creek having but two near its junction. Dr. Leichhardt went up this Palm Tree Creek. This sketch is not quite correct, of course,—what Mr. Scott names Robinson's Creek is evidently Palm Tree Creek. This letter would mislead Captain O'Connell as he had not been there on the spot to see for himself. No one who ever rode up and down Palm Tree Creek could have the slightest doubt about which creek was Palm Tree Creek.

W. H. W.

No. 2.

No. 2.

BURNETT DISTRICT.

Commissioner's report on tender (October, 1850) from Charles Nicholson, No. 11, Lower Palm Tree, No. 1, 16,000 acres. No. 11, Lower Palm Tree Creek, No. 1, 16,000 acres.

*Crown Lands Office,
Gayndah, 25 November, 1853.*

1. This tender does not comprise any land now under lease or applied for in any previous tender,

2. I do not at present see a necessity for a reserve.

3. The description given sufficiently indicates the land tendered for, but I recommend that the length of the northern boundary be more clearly defined by altering the description of the starting point of the western line, thus—west by a line running about south from a marked tree on the creek about 7 miles from its junction with the Dawson; and, further, I think the southern boundary should be described thus—south by a line from a marked tree on the river Dawson, about 4 miles from its junction with Palm Tree Creek to a marked tree at south end of western boundary, the quantity of land will thus be 17,920 acres; but this excess is fully warranted from the scrubby nature of the country.

4. The land applied for in this tender is in the Unsettled Districts, and I beg to recommend it for acceptance, remarking that the tract of country tendered for in this, and the six other consecutive tenders of Sir Charles Nicholson's of the same date, is as yet quite unoccupied, and, therefore, that there may be some inaccuracies in the descriptions, at least, in regard to the decision of which is the true and main branch of the Palm Tree Creek, which can only be remedied by more exact local knowledge; and, as these tenders have, undoubtedly, priority of claim, and are for clearly defined rectangular blocks on Palm Tree Creek, I can see no reason for their longer remaining in abeyance. ("They should have remained in abeyance till the Commissioner had seen the locality.—W. H. W."*)

M. C. O'CONNELL,
Commissioner of Crown Lands.

Commissioner Wiseman's Report.

By this, Capt. O'Connell distinctly confines Mr. J. Scott to his boundary of Palm Tree Creek on the north, for immediately on the northern bank is the land tendered for by Mr. Goggs, in April, 1851, and Mr. J. M'Laren, in May, 1853.

If the three lower blocks called respectively Lower Palm Tree Creek, 1, 2, 3, are to be removed from Palm Tree Creek to another creek, which is most probably Ruined Castle Creek, what are to become of the four upper blocks consecutive or contiguous here mentioned? I hear they belong to Mr. Gordon Sandeman, who, as there is water on them, would scarcely like to lose them for country on a creek where there is scarcely any water or space.

Had Capt. O'Connell visited the country he would not have had the slightest doubt as to which really was Palm Tree Creek; it being unoccupied does not alter its natural features, nor is it any valid reason for there being an inaccuracy in the description. The runs are well described on the contrary, not the slightest foundation of a right to the piece of country lying on the northern bank of Palm Tree Creek is conferred on Mr. J. Scott by this award of Capt. O'Connell. There could be no uncertainty on any person's mind who had once seen the country as to which was really Palm Tree Creek. Sir Charles Nicholson's runs are by this bounded by Palm Tree Creek on the north, and as there can exist no doubt which is Palm Tree Creek, there can be no doubt where Sir Charles Nicholson's runs are.

No. 3.

TENDERS TO LEASE CROWN LANDS.

7

No. 3.

BURNETT DISTRICT.

Commissioner's report on tender (October, 1850) from Charles Nicholson, No. 12, Lower Palm Tree Creek, No. 2, 16,000 acres.

*Crown Lands Office,
Gayndah, 25 November, 1853.*

1. This tender does not comprise any lands now under lease or applied for in other tender.
2. There is no apparent necessity for a reserve.
3. The descriptions given sufficiently indicate the land tendered for, but I would recommend that the size of the block be more clearly defined by the addition of these words—
“The whole forming a rectangular block of seven miles by four; quantity, 17,920 acres.”
4. The land applied for is in the Unsettled Districts, and I beg to recommend this tender for acceptance, remarking that it is one of the consecutive tenders alluded to in my report of this date on Sir Charles Nicholson's Palm Tree Creek, No. 1.

M. C. O'CONNELL,

THE CHIEF COMMISSIONER OF CROWN LANDS,
Sydney.

Commissioner of Crown Lands.

No. 4.

BURNETT DISTRICT.

Commissioner's report on tender (October, 1850) from Charles Nicholson, No. 13, Lower Palm Tree Creek, No. 3, 16,000 acres.

*Crown Lands Office,
Gayndah, 25 November, 1853.*

1. This tender does not comprise any lands now under lease or applied for in any previous tender.
2. There is no apparent necessity for a reserve.
3. The descriptions given sufficiently indicate the land tendered for, but as in the previous report, I recommend the addition of these words,—“The whole forming a rectangular block, 7 miles by 4, quantity 17,920 acres.”
4. The land applied for is in the Unsettled Districts, and I beg to recommend this tender for acceptance.

M. C. O'CONNELL,

THE CHIEF COMMISSIONER
OF CROWN LANDS,
Sydney.

Commissioner of Crown Lands.

No. 5.

MR. J. SCOTT to CHIEF COMMISSIONER OF CROWN LANDS.

*Lower Palm Tree Creek,
21 November, 1855.*

SIR,

I have the honor to inform you that Mr. Commissioner Wiseman, of the Leichhardt District, has stated that he does not recognise me as being in authorised possession of the three runs named in the margin, formerly in the Burnett District, but now comprised in the Leichhardt District.

Lower Palm Tree
Creek, Nos. 1, 2,
and 3.

He considers that the branch of Palm Tree Creek upon which my stock are at present depasturing should be named Ruined Castle Creek, because it is supposed that Ruined Castle Creek is one of the heads of the said branch, although no one, as far as I can ascertain, has traced the one creek into the other, and that the *South Branch* should be considered Palm Tree Creek; this I believe to be Robinson Creek.

I

I would beg to state that the runs in question were originally applied for by Sir Charles Nicholson, and that prior to their being reported upon, I, as his agent, carefully examined the country tendered for, and then forwarded the letter, of which the enclosed is a copy, to Captain O'Connell, who was at that time Commissioner of the Burnett District.

By referring to Captain O'Connell's report in the Crown Lands Office, you will see that he states that there is a doubt as to which is the main branch of the creek, but at the same time he amends the several tenders and recommends them for acceptance.

Upon the faith of this report, the three runs in question having been transferred from Sir Charles Nicholson's name to mine, I have occupied the country and gone to considerable expense in putting up buildings upon what I always considered the main creek, there being (with the exception of a hole a few feet in diameter) no water in the south branch within 21 miles of the Dawson.

My occupation does not interfere with anyone's rights, their being no accepted tenders for any country in the neighbourhood, consequently I trust that Captain O'Connell's recommendation will hold good.

As I understand that Mr. Commissioner Wiseman has been marking out runs on both sides of this creek, I would respectfully beg that any reports by him embracing both sides of any of the tributaries of of Palm Tree Creek may be reserved or withheld until it is clearly ascertained whether or not they include any portion of my runs named Lower Palm Treee Creek, Nos. 1, 2, 3.

I would respectfully urge upon your attention the importance to me of an early answer, as I have been forced to put a stop to all work, and have no means of preventing sheep from trespassing upon what I believe to be my licensed run.

I have, &c.,

JOHN SCOTT.

THE CHIEF COMMISSIONER
OF CROWN LANDS,
Sydney.

Commissioner Wiseman's Report.

Mr. Scott is in error, I shewed him his boundary, viz., Palm Tree Creek, and informed him that the ground on which he was building was not comprised in the land leased to him.

2. Anyone who attentively reads Dr. Leichhardt's work and sees the country must come to the conclusion which I do. I went up Ruined Castle Creek to the broken country, Mr. W. Miles, of Keniroul, informed me that he had been on the head of it, on some blocks of country tendered for by Mr. Bell, of Bergen-op-Zoom, that the rocks are so rugged and close to the creek that no horse could pass, but that he had no doubt on the subject that this creek was Ruined Castle Creek.

As Captain O'Connell never saw the country he could not form an opinion, and his allowing the lessee to take what boundary he pleased would be an interference with the rights of others.

When Mr. Scott began building the country was already occupied by Mr. McLaren, who was building thereon; I also informed Mr. Scott that it was hazardous in him building where he was, and this when his buildings were very little advanced.

There were tenders sent in for the piece of country which Mr. Scott persists belongs to him by lease, as Captain O'Connell never altered the description of the three runs leased to Mr. J. Scott, the public always believed that Mr. J. Scott's runs were bounded on the north by Palm Tree Creek.

When it was originally taken up for Sir Charles Nicholson, as the numerous fine lagoons on it were full of water and as the country was good, it was considered a very fine sheep run;—Why should not Mr. J. Scott have to abide by the bargain he made with Sir Charles Nicholson? If he has been deluded his remedy is against Sir Charles.

His application if granted by Government would interfere with other rights.

TENDERS TO LEASE CROWN LANDS.

9

No. 6.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER WISEMAN.

*Crown Lands Office,
Sydney, 19 December, 1855.*

SIR,

I do myself the honor to refer you, for your information and report, the enclosed ^{Dated 21 Nov., 1855.} copy of a letter from Mr. John Scott, respecting his right of possession to the Lower Palm Tree Creek Runs, Nos. 1, 2, and 3, in your district. It seems to have been undetermined at the time of the acceptance of the tenders of Sir C. Nicholson which branch of Palm Tree Creek was to be regarded as the proper boundary of the Burnett District, and, aware of this uncertainty, Captain O'Connell seems to have left the question to be determined by the occupation of the lessee, whose applications were of prior date to any others.

2. You, while of course you compare the claims of the writer to the land described in his lease (descriptions enclosed), should be careful that the arrangements which may be made by you for the settlement of the tenders do not interfere with pre-existent rights.

I have, &c.,

THE COMMISSIONER OF CROWN LANDS,
Leichhardt District.

Chief Commissioner of Crown Lands.

No. 7.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER WISEMAN.

*Crown Lands Office,
Sydney, 16 January, 1856.*

SIR,

With reference to my letter of the 19th ultimo, on the subject of certain tenders made by Mr. J. Scott for runs in your district, I do myself the honor to inform you that Captain O'Connell, having been shewn the papers in this case, has expressed his views in accordance with those already communicated to you, namely,—that Sir Charles Nicholson having been the first applicant for the country now occupied by his assignee, Mr. Scott, and the latter having, prior to the acceptance of the tenders, made the Government aware of the land he was desirous of occupying—his occupation, as far as the tenders will cover it, should not now be disturbed on the ground of a doubt as to what was at the time the proper boundary of the Burnett District, a doubt, be it observed, which the Government was not at the time in a position to determine; enclosed I transmit Mr. Scott's letter.

I have, &c.,

THE COMMISSIONER OF CROWN LANDS,
Leichhardt.

GEO. BARNEY,
Chief Commissioner of Crown Lands.

No. 1.

COMMISSIONER COLE to CHIEF COMMISSIONER OF CROWN LANDS.

*Crown Commissioner's Office,
Euston, Lower Darling,
31 October, 1854.*

SIR,

I do myself the honor to recommend for acceptance tender No. 34, of October, 1853, (William Ross,) and to state that I am not aware of any objection to the description given of the country indicated. It may be proper to remark that the report is made subject to the adjustment of the eastern boundary between Mr. Morris, the present superintendent of the stations on the Murrumbidgee, and Mr. Phelps, the first occupant of the country.

I have, &c.,

THE CHIEF COMMISSIONER OF CROWN LANDS.

S. COLE.
Commissioner of Crown Lands.

No. 2.

No. 2.

MR. WM. ROSS to CHIEF COMMISSIONER OF CROWN LANDS.

Meilman, 3 July, 1855.

SIR,

When in Sydney last March I called at the Crown Lands Office to learn whether two tenders for new runs named respectively Toylamboul and Bidura, which I had put in, had been accepted or not, and was informed that they awaited some further report than the one already furnished by the Commissioner of the district, but—that gentleman was at the time in Sydney—the matter would be settled on his being consulted. . . .

I now respectfully solicit that the result be made known to me at as early a period as convenient, and am,

Yours, &c.,

THE CHIEF COMMISSIONER OF CROWN LANDS,
Sydney.

WM. ROSS.

No. 3.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER COLE.

*Crown Lands Office,**Sydney, 26 July, 1855.*

SIR,

With reference to the amended descriptions sent to you of Mr. Morris' runs, I have the honor to request the favor of your report, in the usual manner, upon the enclosed letter of Mr. William Ross, requesting to be informed of the state of his tenders for two new runs in your district, called Toylamboul and Bidura.

I have, &c.,

THE COMMISSIONER OF CROWN LANDS,
Lower Darling.

GEO. BARNEY,
Chief Commissioner of Crown Lands.

No. 4.

COMMISSIONER COLE to CHIEF COMMISSIONER OF CROWN LANDS.

*Crown Commissioner's Office,**Euston, Lower Darling,**27 August, 1855.*

SIR,

In acknowledging the receipt of your letter of the 26th July last, on the subject of the country designated Toylamboul, I do myself the honor of stating that I have received no amended descriptions from Mr. Morris, and that I am not aware that any deviation should be made from the description furnished by Mr. Ross in his tender, No. 34, October, 1853, reported on in my letter of 31 October, 1854.

THE CHIEF COMMISSIONER OF CROWN LANDS.

S. COLE,
Commissioner of Crown Lands.

No. 5.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER COLE.

*Crown Lands Office,**Sydney, 10 October, 1855.*

SIR,

I have the honor to acknowledge the receipt of your letter of the 27th August last, respecting the Toylamboul run in your district.

2. It appears from the representations that have been made that the existing descriptions of runs under lease to Messrs. Mort & Co., are quite inapplicable to the country, the course of the River Laehlan having been mistaken by your predecessor. To accept tender or tenders abutting upon the runs thus uncertainly set forth would only have the effect of giving rise to litigation hereafter; I would, therefore, request that you will at once
visit

visit the country, and by reference to original applications for the several runs, and to what was the obvious intention of your predecessor in the descriptions prepared by him, adjust the boundaries of the frontage runs and those applied for beyond them in such a distinct manner as will admit of no doubt hereafter, and of the within tenders being accepted if it should prove that the land is available, without danger of encroachment upon the rights of existing occupants.

THE COMMISSIONER OF CROWN LANDS,
Lower Darling.

I have, &c.,
GEO. BARNEY.

No. 6.

MR. WM. ROSS to COMMISSIONER COLE.

Moulmein, Lower Darling,
31 March, 1856.

SIR,

I beg to propose to you, as annexed, what shall be considered the boundaries of the run of Toylamboul in your district, and agreeably to your wish I have made a considerable, and, to me, a very important abandonment of country in diminishing the area of Toylamboul.

In making this proposition I can conceive no difficulty whatever to arise in the settlement of the eastern boundary of the Toylamboul Run with Mr. Morris to whom I must remark to you I have made a concession of country, certainly not warranted on my part, and which was distinctly vacant waste lands of the Crown at the time I forwarded my tender, and was recognized by you in your recommendation of the acceptance of the tender to the Government. Under these circumstances, and if you sanction the altered and reduced boundaries of Toylamboul as set forth by me, I have no objection to make the concession so stated, with the view to a final arrangement or otherwise; I resume the boundaries as set forth in my original tender, and previously to the proposed reconstruction on his part of the boundaries of the runs of Mr. Mr. Morris' runs.

STEPHEN COLE, ESQ.,
Commissioner of Crown Lands,
Lower Darling District.

I have, &c.,
WM. ROSS.

Boundaries to be substituted for those stated in tender No. 34, October, 1853.

TOYLAMBOUL.

Commencing at a point 18 miles north from the north-west corner of the Waldaira Reserve, and bounded on the south by a line east 6 miles; on the east by a line north 16 miles; on the north by a line west 6 miles; and on the west by a line south 16 miles, being respectively 12 and 4 miles of the Bidura and Upper Lette Runs eastern boundaries.

No. 7.

COMMISSIONER COLE to CHIEF COMMISSIONER OF CROWN LANDS.

Crown Lands Office,
Euston, Lower Darling,
24 April, 1856.

SIR,

I do myself the honor to cover herewith a letter from Mr. William Ross, in 31 March, 1856. which he proposes to alter the boundaries of his run of Toylamboul, No. 34, October, 1853, so as to admit of the adjustment of its eastern side line with the western boundary of the back run of Yarrowal, of Messrs. Morris, Hood, and Mayne.

2. I beg to recommend the adoption of Mr. Ross' proposal with the view to the acceptance of his tender as reported upon in my letter of 31st October, 1854, and to submit that the same appears to be the most reasonable when considered with reference to the documents herewith transmitted.

3. It will be perceived by a letter dated 5th November, 1854, from a Mr. J. J. Phelps, covering a document dated 28th March, 1853, from Mr. John Christie, Mr. Wentworth's manager of these properties for many years, and a Magistrate of New South Wales, addressed to "J. Locky Phelps, Esquire," that he states—"the boundary which I have considered as existing between your runs and Mr. Wentworth's on the north side of the Murrumbidgee, is a line running north from marked tree 140, near Balranald Public-house, and extending 25 miles back," which is in a measure confirmed by the brother of Mr. Augustus Morris: Mr. James Morris in his letter of 30th June, 1854,—“I think we shall have to tender for an extension of our back runs in that neighbourhood; any information you can give me as to the boundaries of the runs in that locality will be thankfully received.”

This boundary, as shewn by the papers above quoted, will pass to the eastward of the eastern boundary line of Toylamboul as now proposed by Mr. Ross about 6 miles, and under these circumstances there appears no objection to the acceptance of the tender for Toylamboul as proposed to be amended in its description.

I have, &c.,

S. COLE,

Commissioner of Crown Lands.

COLONEL BARNEY,
Surveyor General.

No. 8.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER COLE.

Crown Lands Office,

Sydney, 25 July, 1856.

SIR,

With reference to your letter of the 24th April last, respecting the boundaries of Toylamboul Run in your district recommended to be leased to Mr. William Ross, I do myself the honor to inform you that the Government cannot accept a tender leaving the country in dispute between the tenderer and parties already holding the promise of lease.

The description given is moreover altogether by reference to bearing and imaginary lines, leaving the run altogether undetermined on the ground, and the question in that state which has been found, of all others, to be most conducive to subsequent uncertainty and litigation; I beg at the same time to refer you to the instructions conveyed in my letter of the 10th October last, and to request that you proceed to the ground in question, and determine the boundaries of existing runs as therein directed without delay.

I have, &c.,

GEO. BARNEY,

Chief Commissioner of Crown Lands.

THE COMMISSIONER OF CROWN LANDS,
Lower Darling.

No. 9.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER COLE.

Crown Lands Office,

Sydney, 29 January, 1857.

SIR,

I have the honor to draw your attention to my letter of the 26th July last, conveying to you instructions for the disposal of Mr. Wm. Ross' tender, No. 34, of October, 1853, for a run in your district called Toylamboul, and request that you will, at your earliest convenience, furnish me with your report, to enable me to dispose of the tender in question.

I have, &c.,

GEO. BARNEY,

Chief Commissioner of Crown Lands.

THE COMMISSIONER OF CROWN LANDS,
Lower Darling.

No. 10.

No. 10.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER COLE.

*Crown Lands Office,
Sydney, 16 July, 1857.*

SIR,
I do myself the honor to call your attention to my letter of the 29th January last, respecting the disposal of Mr. Wm. Ross' tender for the Toylamboul Run in your district, No. 34, Octr., 1853, and I beg to request your report upon this matter without further delay, the cause of the delay is to be stated.

THE COMMISSIONER OF CROWN LANDS,
Lower Darling.

I have, &c.,
GEO. BARNEY,
Chief Commissioner of Crown Lands.

No. 1.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER HALLOBAN.

*Crown Lands Office,
Sydney, 25 April, 1855.*

SIR,
With reference to the enclosed letter of Mr. H. B. Watson, requesting information as to the state of certain tenders sent in by him, I do myself the honor to request that you will supply the necessary information for the disposal of the tenders in question; your predecessor's reports must have miscarried in some of the stages through which they had to pass.

THE COMMISSIONER OF CROWN LANDS,
Wide Bay and Burnett.

I have, &c.,
GEO. BARNEY,
Chief Commissioner of Crown Lands.

No. 2.

COMMISSIONER HALLORAN to CHIEF COMMISSIONER OF CROWN LANDS.

*Commissioner's Office,
Tynana, 25 May, 1855.*

SIR,
In acknowledging the receipt of your letter, No. 55-1063, of the 25th ultimo, enclosing a letter from Mr. Henry B. Watson (herewith returned), respecting certain tenders of his for runs in this district, and requesting me to furnish you with the necessary information for the disposal of the tenders in question, I do myself the honor to forward you copies of the reports on these tenders made by the late Commissioner, who examined the country tendered for, containing the information you require. Not now accessible.

I beg to add that Mr. Watson never resided or occupied country in this district; and I believe is now in treaty with a gentleman, for the sale of the runs now under report, which are of a fair description.

THE CHIEF COMMISSIONER
OF CROWN LANDS,
Sydney.

I have, &c.,
ARTHUR E. HALLORAN,
Commissioner of Crown Lands.

No. 3.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER HALLORAN.

*Crown Lands Office,**Sydney, 6 February, 1856.*

SIR,

With reference to your letter of the 25th May last, respecting certain tenders from Mr. Henry B. Watson, for new runs in your district, I do myself the honor to request you to examine the descriptions originally given in the tenders of the applicant, and to compare them with the amended descriptions prepared by your predecessor. You will then be able to offer an opinion as to whether there has actually been such a conflict of the original tenders, and an adjustment of them, as to render it necessary under the 13th Section of Cap. of the Order in Council to offer the adjusted runs for fresh tenders, or whether the country indicated in the tenders has only been so far amended in descriptions as to admit of the tenders being accepted, subject to these amended descriptions.

2. Judging from the tenor of Mr. Bidwell's reports, it would seem as if the country had originally been so indefinitely described, that the tenders would have been inadmissible; if you should be of the same opinion, you should furnish a report to that effect, leaving the applicant to send in fresh tenders if he desires it.

3. The questions affecting the case depend so much upon the local features, that it is extremely difficult without a local knowledge to arrive at a decision regarding them.

I have, &c.,

THE COMMISSIONER

OF CROWN LANDS,

Wide Bay and Burnett.

GEO. BARNEY,

Chief Commissioner of Crown Lands.

No. 1.

MR. S. CALDWELL to CHIEF COMMISSIONER OF CROWN LANDS.

Morpeth, November 7, 1855.

SIR,

With reference to your letter 28th October, 1851, No. 12, acknowledging receipt of my tender for a new run in the District of New England, and known by the name of Wolston, Dingo Creek, which you say had been forwarded to the District Commissioner in accordance with the Regulations of the 1st January, 1848, I do myself the honor to request that you will be pleased to inform me what steps have been taken with regard to my tender now in question; I think four years a long time to wait for a reply to the application before-mentioned.

I have, &c.,

GEO. BARNEY, ESQUIRE,

Chief Commissioner of Crown Lands,

Sydney.

S. CALDWELL.

No. 2.

CHIEF COMMISSIONER OF CROWN LANDS to MR. S. CALDWELL.

*Crown Lands Office,**Sydney, 17 November, 1855.*

SIR,

In reply to your letter of the 7th instant, I do myself the honor to inform you that the Commissioner of the District has not yet reported upon your tender for a run called Woolston, Dingo Creek.

2. I have requested him to attend to the matter as early as possible.

I have, &c.,

MR. S. CALDWELL,

Morpeth.

GEO. BARNEY,

Chief Commissioner of Crown Lands.

W. ELYARD.

MR. S. CALDWELL,
Morpeth.

No. 6.

MR. S. CALDWELL to COLONIAL SECRETARY.

Morpeth, 25 April, 1856.

SIR,

With reference to your letter of the 23rd February last, in answer to my letter of the 18th* of same month, relative to my tender for a new run situated in New England District, which letter had been sent to the Chief Commissioner of Crown Lands for his report thereon, I now do myself the honor to request that you will be pleased to inform me what has been the result of the Chief Commissioner's report alluded to; and at same time beg to state that I am laboring under great disadvantages on account of the matter being delayed so long. Praying His Excellency's favorable consideration, and your early answer, * Cannot be now obtained.

I have, &c.,

THE HONORABLE
THE COLONIAL SECRETARY,
Sydney.

S. CALDWELL.

[Transmitted to the Chief Commissioner of Crown Lands, Blank Cover, 5th May, 1856.—W. E.]

No. 7.

No. 7.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER MEREWETHER.

*Crown Lands Office,
Sydney, 8 May, 1856.*

SIR,

I do myself the honor to transmit the enclosed abstract of a tender from Mr. Samuel Caldwell, for a run in your district called Woolston, Dingo Creek, and request that you will be so good as to report upon it in the usual manner.

I have, &c.,

MR. COMMISSIONER MEREWETHER,
New England.

GEO. BARNEY,
Chief Commissioner of Crown Lands.

No. 8.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER MORIARTY.

*Crown Lands Office,
Sydney, 5 February, 1858.*

SIR,

The tender named in the margin appears by the records of this Office to await your report, and delayed pending the receipt of such report; and as such delay is productive of unnecessary reference indoors, and of dissatisfaction without, I am extremely desirous to be furnished with your report, or with an explanation of the occasion of the delay, for the satisfaction of the Honorable the Secretary for Lands and Public Works.

I have, &c.,

THE COMMISSIONER OF CROWN LANDS,
New England and M'Leay.

GEO. BARNEY,
Chief Commissioner of Crown Lands.

No. 9.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER MORIARTY.

*Crown Lands Office,
Sydney, 5 February, 1858.*

SIR,

I have the honor to draw your attention to my letter of the 8th May, 1856, transmitting an abstract of the tender named in the margin, and requesting your report thereon, and beg to state that, unless the required report be immediately received, it will be my duty to bring the subject under the notice of the Honorable the Secretary for Lands and Public Works.

I have, &c.,

THE COMMISSIONER OF CROWN LANDS,
New England and M'Leay.

GEO. BARNEY,
Chief Commissioner of Crown Lands.

No. 10.

COMMISSIONER MORIARTY to CHIEF COMMISSIONER OF CROWN LANDS.

*Commissioner's Quarters,
Armidale, 15 February, 1858.*

SIR,

I had the honor to receive a few days back your letter No. 58-40, of the 5th instant, requiring an explanation of the delay in reporting on the above tender; and by the following post I received your letter No. 58-457, of the same date, informing me that unless the report should immediately be furnished you would bring the subject under notice of the Government.

2. As the subject has seemed to you so important as to require that you should address to me two letters on the same day, complaining of delay, I have respectfully to beg that you will submit to the Honorable the Secretary as you have proposed, and that you will forward at the same time this explanation of the delay of which you complain.

3. I might have suggested that this being the only tender of old date remaining without a final report—of the seven years arrear remaining when a few months back I took charge of this district—I am hardly chargeable, *prima facie*, with delay, especially since you have not informed me of a decision having been come to in reference to any of those tenders, of the same and previous date, reported upon by me in the early part of October last.

4. But the facts of this case are, that I have twice been in the vicinity of the land applied for (assuming that there is any such land) with the object of reporting upon the tender, that the description has not enabled me to find it, that the heads of the Barnard on which it is situated (again supposing that there is any such run) comprise the most broken and difficult country in New South Wales, that I have had no communication from the applicant, and have been unable to find him, and that the arrear of duty—a paramount duty in the assessment of runs which I found on taking charge of this district, and have been enabled but partially to overtake—has had more pressing claims upon my attention than the particular tender at present in question, one which involves, if any, but a very inconsiderable interest, even if it should produce, as you observe, unnecessary references indoors, &c.

I have, &c.,

THE CHIEF COMMISSIONER OF CROWN LANDS.

A. ORPEN MORIARTY.

No. 11.

CHIEF COMMISSIONER OF CROWN LANDS to MR. S. CALDWELL.

*Crown Lands Office,
Sydney 31 July, 1858.*

SIR,

With reference to your letter of the 7th November, 1855, and my reply thereto of 17th of the same month, I have now to inform you that Mr. Commissioner Moriarty has reported that he is unable to identify the land as described in your tender for the Woolston Run, on the Dingo Creek, that he has had no communication from, and that he has been unable to find you.

You will therefore have the goodness to intimate to me whether you are prepared to point out the country described in your tender to the officer appointed to report thereon.

I have, &c.,

MR. S. CALDWELL,
Morpeth.

GEO. BARNEY,
Chief Commissioner of Crown Lands.

No. 1.

COMMISSIONER COLE to CHIEF COMMISSIONER OF CROWN LANDS.

*Crown Lands Office,
Euston, Lower Darling,
3 September, 1856.*

SIR,

I do myself the honor to report upon tender No. 39, of December, 1854 (James Tyson), and to submit that the same should be declined. Tyson's Back Run.

2. The country indicated by the description may be considered to be included in the accepted tender of W. C. Wentworth, for an area of country called the Back Run of Jreanbong, as intimated by your letter of the 31st October, 1851, No. 51-1751. Usual printed letter, accepting Mr. Wentworth's tender.

I have, &c.,

COLONEL BARNEY,
Surveyor General.

STEPHEN COLE,
Commissioner of Crown Lands.

No. 2.

No. 2.

COMMISSIONER COLE to CHIEF COMMISSIONER OF CROWN LANDS.

*Crown Lands Office,
Euston, Lower Darling,
4 September, 1856.*

SIR,

I beg to request that you will be good enough to furnish me with instructions for the disposal of tender No. 92, of August, 1850, William Peter.

2. The country indicated by this tender is already under lease to W. C. Wentworth, originally being comprised in the subsequent tender, No. 88, of October, 1850, "the back "ruu of Tuanbung."

3. The same tender, No. 92, of August, 1850, indicates or includes the same country described in tender No. 39, of December, 1854, recommended to be declined in my letter of 3rd instant, being an area of 50 square miles, described on the back line of Tyson's Run, and is the country situated directly at the back of that run.

4. It appears that the tender has been framed with a view of blocking in the frontage, Tyson's Run, as No. 93, of August, 1850, declined by the same party, was intended to block in No. 78, of May, 1850, Phelps & Chadwick, No. 1.

5. A general regulation or order, in respect to immediate back country of this description under similar and like circumstances, seems much required, to obviate the varied difficulties and inconvenience that arise to prevent the disposal of tenders, and for the suppression of subsequent disputes.

I have, &c.,

STEPHEN COLE,
Commissioner of Crown Lands.

COLONEL BARNEY,
Surveyor General.

No. 3.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER COLE.

*Crown Lands Office,
Sydney, 8 January, 1857.*

SIR,

With reference to your communication of the 4th September last, requesting instructions for the disposal of tender No. 92, of August, 1850, I have the honor to request that you will have the goodness to inform me if the applicant has ever taken any steps to follow up his tender, and if not whether, supposing the land to have been open to tender, the tender in itself open to any such objection as would have justified its being rejected.

Further, if the applicant is resident in the district, and if so, whether he will be willing to withdraw his tender, the land being under lease.

I have, &c.,

GEO. BARNEY,
Chief Commissioner of Crown Lands.

THE COMMISSIONER OF CROWN LANDS,
Lower Darling.

No. 4.

COMMISSIONER COLE to CHIEF COMMISSIONER OF CROWN LANDS.

*Crown Lands Office,
Euston, Lower Darling,
25 February, 1857.*

SIR,

In reply to your letter of the 8th ultimo, on the subject of tender No. 92, of August, 1850, I do myself the honor to state that it does not appear the applicant has ever taken any steps to follow up his tender, nor is he a resident in this district. No application by letter or personally has been received by me from the applicant in respect to the tender in question, nor can I trace that any had been made to my predecessor.

TENDERS TO LEASE CROWN LANDS.

19

2. It may be proper to observe that the tender appears to me altogether speculative, and has been put in with a view of blocking in the frontage or Tyson's station. The applicant is not a lessee or licensee of waste lands in this district, and if ever possessed of the country he could not occupy it for the want of water, as it can only be made available during two or three of the winter months at most, when rain falls, which it does not always even in the winter in this district; and, as stated in the tender, is "available only during "wet seasons."

3. The description, moreover, does not indicate the country applied for, as "a line "west 10 miles to the north-west point of the run called Tyson's" would not touch that point, but terminate considerably to the north of it.

4. Under the foregoing remarks I beg to submit that under the circumstances whether the tender may not be declined with a view of its disposal.

STEPHEN COLE,
Commissioner of Crown Lands.

COLONEL BARNEY,
Surveyor General.

No. 5.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER COLE.

*Crown Lands Office,
Sydney, 23 July, 1857.*

SIR,

With reference to your report upon the tender of Mr. William Peter for Tyson's back run, which was recommended to be declined because the description did not indicate the land tendered for, I beg to inform you that Mr. Secretary Hay considers that the true reason for declining the tender was that under a subsequent tender the land had been granted to Mr. W. C. Wentworth. This seems to Mr. Secretary Hay to have arisen from neglect on the part of the late Commissioner M'Donald, but may have been caused by the irregularity of communication, so far back as 1850, with the distant district of Lower Darling.

2. Under the circumstance of the land having been licensed to another party Mr. Peter's tender is declined.

I have, &c.,

GEO. BARNEY,
Chief Commissioner of Crown Lands.

THE COMMISSIONER OF CROWN LANDS,
Lower Darling.

No. 1.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER BLIQH.

*Crown Lands Office,
Sydney, 13 January, 1857.*

SIR,

I have the honor to request that you will have the goodness to explain, for the information of the Honorable the Secretary for Lands and Public Works, why, in reporting upon Mr. O. Fry's tender for a run called Cobiquoi, you did not also report upon Messrs. Barnes and Fawcett's tenders, in which the Cobiquoi Run is said to be applied for.

I have, &c.,

GEO. BARNEY,
Chief Commissioner of Crown Lands.

THE COMMISSIONER OF CROWN LANDS,
Clarence River.

No. 2.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER BLIGH.

*Crown Lands Office,
Sydney, 15 September, 1857.*

SIR,

I have the honor to draw your attention to my letter of the 13th January last, No. 1827, requesting you to explain, for the information of the Honorable the Secretary for Lands and Public Works, why, in reporting upon Mr. O. Fry's tender for a run called Cobiquoi, you did not also report upon Messrs Barnes and Fawcett's tenders, in which the run in question is said to be applied for, and I beg to request that you will favor me with a reply thereto without further delay.

I have, &c.,

GEO. BARNEY,

Chief Commissioner of Crown Lands.

THE COMMISSIONER OF CROWN LANDS,
Clarence River.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER WISEMAN.

*Crown Lands Office,
Sydney, 26 February, 1857.*

SIR,

Referring to your letter of the 8th ultimo, requesting instructions with regard to the disposal of tenders for new runs in your district by parties failing to attend when summoned to shew their runs, I have the honor to inform you that I am afraid the only remedy available in the circumstances of an applicant failing to attend to explain his tender, will be to take the tender and deal with it without reference to the explanation of the applicant, and in the event of any tender so dealt with not containing in itself sufficient detailed information to admit of its acceptance, for you to furnish a report to that effect, to the end that the tender may be declined as not comprising a clear description of the land applied for, and of the boundaries of the same, as required by the Order in Council.

You should let it be understood, and yourself bear in mind, that it is to the tenders that you should look as the *matter* referred for your report, not as merely containing an intimation of *claims* requiring investigation. By following this, the rule obviously based on the Order in Council, you would probably find less difficulty in dealing with claims insufficiently defined, and of which the parties interested fail to afford you explanation necessary before a tender could be accepted, the absence of which would be a very sufficient reason for a tender being declined.

People cannot be compelled to attend the Commissioner, but if they were to understand that failing to attend to give him sufficient information in explanation, their tenders rest, and will be dealt with on their own merits, it is probable that a change for the better in this respect would be effected.

I have, &c.,

GEO. BARNEY,

Chief Commissioner of Crown Lands.

THE COMMISSIONER OF CROWN LANDS,
Leichhardt.

(Circular, No. 3.)

*Crown Lands Office,
Sydney, 26 February, 1857.*

SIR,

I have the honor to request that you will have the goodness to furnish me with the undermentioned returns:—

1st. Return shewing the number of runs remaining unassessed in your district on 1st January, 1857.

2nd.

2nd. Return shewing the number of tenders not reported upon in your district on 1st January, 1857.

Similar returns to be transmitted quarterly in future.

I have, &c,

GEO. BARNEY,

Chief Commissioner of Crown Lands.

TO ALL COMMISSIONERS
OF CROWN LANDS.

(Circular.)

Crown Lands Office,

Sydney, 12 May, 1857.

SIR,

It having been brought under the notice of the Government, that the attention of the Crown Lands Commissioners to their legitimate duties—viz., those required by this Department—is diverted by reason of their having likewise to attend to police business, I am directed to request that you will, with all despatch, dispose of the arrears now in your hands, and, as a preliminary, call the attention of the Magistrates of the Bench at which you are used to preside to the necessity for their lending every aid in the performance of the judicial duties.

2. I am also to instruct you to recommend to the Government such gentlemen for the Commission of the Peace as you may consider necessary to meet the requirements of the district, and eligible for the appointments, such recommendation to be addressed to me, marked *separate and confidential*.

GEO. BARNEY,

Chief Commissioner of Crown Lands.

TO ALL COMMISSIONERS
OF CROWN LANDS.

P.S.—Although I have, as directed, addressed to you the above circular, still, as new runs are always being taken up in your district, and arrears must be always accumulating, I would observe that I am not unmindful of this peculiarity in your position.

TO COMMISSIONER WISEMAN,
" HAILORAN,
" BOYLE,
" PERRY,
" COLE,
" O'CONNELL,
" WHITTY,
" JARDINE.

} The above postscript was addressed to these gentlemen.

(Circular, No. 11.)

Crown Lands Office,

Sydney, 14 September, 1857.

SIR,

Referring to circular dated 15th May last, I have again to urge you to forward the business of your district with all possible despatch; it is very important that reports on tenders and valuation of runs be completed by the close of the year.

2. The Government has determined to reduce the number of Commissioners employed, and the future prospects of those reduced, as far as Government employ is concerned, will very much depend upon the industry displayed in completing the work of their respective districts.

I have, &c.,

GEO. BARNEY,

Chief Commissioners of Crown Lands.

TO ALL COMMISSIONERS
OF CROWN LANDS.

TENDERS TO LEASE CROWN LANDS.

No. 1.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER COLE.

*Crown Lands Office,
Sydney, 1 July, 1857.*

SIR,

For the information of the Secretary for Lands and Public Works, you will have the goodness to explain why the tenders of Mr. Edmund Morey, Nos. 14, 15, and 16, of December 1852, which have been four years on hand, and are now declined as being identical with other tenders, reported on in August 1855, were not reported on in the year 1855, the case being then before you.

THE COMMISSIONER
OF CROWN LANDS,
Lower Darling.

I have, &c.,
GEO. BARNEY,
Chief Commissioner of Crown Lands.

No. 2.

COMMISSIONER COLE to CHIEF COMMISSIONER OF CROWN LANDS.

*Crown Lands Office,
Euston, Lower Darling,
1 September, 1857.*

SIR,

I do myself the honor to acknowledge the receipt of your letter of the 1st July last, No. 57-5632, and to report for the information of the Honorable Mr. Secretary Hay, that the tenders therein referred to, Nos. 14, 15, and 16, of December, 1852, were delayed conformable to the practice observed, as I understand it, for the disposal of tenders under similar circumstances, that the first tenders should be finally dealt with, before others of a subsequent date can be disposed of.

2. Tenders Nos. 79 and 80, of January, 1850, from the same party, describes the same country under different names, and were declined on the 7th April, 1856, in consequence of their identity with the prior tenders Nos. 36 and 37, of July, 1849, A. and D. Cameron, deceased, reported upon under special directions contained in your letter of the 10th January, 1855, No. 55-68.

3. It now appears that Mr. Morey has purchased of John Cameron, the next akin and assign of A. and D. Cameron, the interest in the tenders 36 and 37, of July 1849; so perfectly satisfied was he that he had no claim to the country under his tenders 79 and 80, of January, 1850, and 14, 15, and 16, of December, 1852, which are similar, and indicate the same country under different descriptions and varied areas.

4. Under the above circumstances it will be perceived that no injustice has occurred to Mr. Edmund Morey with the delay referred to, inasmuch as he has been personally informed at this Office that his tender would be declined; and that so far as his tenders, Nos. 79 and 80, of January, 1850, were affected, he knows that the neglect of his agent in Sydney, Mr. Benjamin Buchanan, is the occasion of their not being the prior tenders to those of Messrs. A. and D. Cameron.

COLONEL BARNEY,
Surveyor General.

I have, &c.,
STEPHEN COLE,
Commissioner of Crown Lands.

(Circular.)

*Crown Lands Office,
Sydney, 22 July, 1857.*

SIR,

I beg to inform you that Mr. Secretary Hay has recently expressed great dissatisfaction at the delay which has frequently occurred in reporting on tenders for new runs.

2. I have therefore to impress upon you the necessity which exists for your attention to this duty with every practicable despatch; and I have to request that you will always specifically report any reasons which may have prevented an earlier report than is usual and necessary.

TO ALL COMMISSIONERS
OF CROWN LANDS.

I have, &c.,
GEO. BARNEY,
Chief Commissioner of Crown Lands.

No. 1.

MR. J. SANDFORD to CHIEF COMMISSIONER OF CROWN LANDS.

*Nullee, Namoi River,
Wee Waa, 3 August, 1857.*

SIR,

I have the honor to inform you that I have received information that the tenders made by me for the two blocks of land, known as the Upper and Lower Tareen, have been refused, in consequence of Mr. Commissioner Whitty having reported that the country tendered for was part of the Nul Keribiddy Station, for which run a fourteen years' lease has been applied for by Mr. Henry Keyes.

I now beg leave to request that a survey of the aforesaid country be made with as little delay as possible, feeling assured that the runs I have tendered for, above-mentioned, will be found to be beyond the boundaries of the Nul Keribiddy Station.

THE CHIEF COMMISSIONER
OF CROWN LANDS.

I am, &c.,
JOHN SANDFORD.

No. 2.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER WHITTY.

*Crown Lands Office,
Sydney, 10 October, 1857.*

SIR,

I have the honor to request the favor of your report upon the enclosed letter from Mr. John Sandford, disputing the correctness of your report upon his tenders, Nos. 41 and 45, of December, 1856.

THE COMMISSIONER OF CROWN LANDS,
Wellington.

I have, &c.,
GEO. BARNEY,
Chief Commissioner of Crown Lands.

No. 3.

MR. J. SANDFORD to CHIEF COMMISSIONER OF CROWN LANDS.

*Post Office, Walgett,
27 November, 1857.*

SIR,

I very respectfully beg to state that I have applied for two blocks of land on the Tareen Creek, in the Wellington District, some time since, and been refused in consequence of Mr. Commissioner Whitty reporting that the place I tendered for was part of the Nul Keribiddy Run. I now very respectfully beg to say that Mr. Whitty has never seen the place, and any information he has received must be from interested parties. I feel confident that the place I have tendered for will be found to be more than five miles from the Barwin River. I believe Mr. Commissioner Whitty has been within forty miles of the place I tendered for. I would like to know what steps I had better take to have the place surveyed, as I feel confident it will be found to be more than five miles from the Barwin River.

THE CHIEF COMMISSIONER
OF CROWN LANDS,
Sydney.

I am, &c.,
JOHN SANDFORD.

No. 4.

No. 4.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER WHITTY.

*Crown Lands Office,
Sydney, 12 December, 1857.*

SIR,

I beg to draw your attention to my letter of the 10th of October last, forwarding for your report a letter from Mr. John Sandford, respecting two tenders he had sent in for new runs in your district, and to request your immediate attention thereto. I beg at the same time to forward a second letter from Mr. Sandford on the subject.

I am, &c.,

THE CHIEF COMMISSIONER
OF CROWN LANDS,
Wellington.

GEO. BARNEY,
Chief Commissioner of Crown Lands.

No. 5.

COMMISSIONER WHITTY to CHIEF COMMISSIONER OF CROWN LANDS.

*Crown Lands Office,
Molong, 14 January, 1858.*

SIR,

In acknowledging the receipt of your letters, dated respectively the 10th October, 1857, 2,324, and 12th December, 1857, 13,199, each enclosing a letter from Mr. J. Sandford, disputing the correctness of my reports on his tenders, as per margin, I do myself the honor to inform you my reports were correct, Mr. J. Sandford having described for the eastern boundary of "South Tareen" the Run "Muramin," consequently "South Tareen" would be identical with the Run "Nileumbide;" he having also described "Lower Tareen" to be bounded on the east by "South Tareen," it would be identical with the Run "Goonoo South."

I have written to Mr. Sandford, explaining the correctness of my reports on his tenders, and informing him of the unoccupied land in that part of my district, and enclosing a sketch of it.

I am, &c.,

THE CHIEF COMMISSIONER
OF CROWN LANDS,
Sydney.

H. WHITTY,
Chief Commissioner of Crown Lands.

No. 1.

CHIEF COMMISSIONER OF CROWN LANDS to COMMISSIONER OF CROWN LANDS, GWYDIR.

*Crown Lands Office,
Sydney, 5 February, 1858.*

SIR,

The tenders referred to in the enclosed list appear by the records of this Office to await your reports, and to be delayed pending the receipts of such reports, and as such delays are productive of unnecessary references indoors, and of dissatisfaction without, I am extremely desirous to be furnished with your reports, or with an explanation of the cause of the delay, for the satisfaction of the Honorable the Secretary for Lands and Public Works.

I have, &c.,

THE COMMISSIONER OF CROWN LANDS,
Gwydir.

GEO. BARNEY,
Chief Commissioner of Crown Lands.

1859.

Legislative Assembly.

NEW SOUTH WALES.

CROWN LANDS.

(UNDER LEASE OR LICENSE BEYOND THE SETTLED DISTRICTS.)

Ordered by the Legislative Assembly to be Printed, 21 September, 1859.

RETURN to Addresses, and to an Order of the Honorable the Legislative Assembly, that there be laid upon the Table of this House,—

- 1st.—“ (1.) A Return shewing the total number of Leases or Licenses to occupy Crown Lands outside the Settled Districts issued in each year, under Her Majesty’s Orders in Council, by the Crown to individuals, from the 1st January, 1850, to the 1st January, 1857, distinguishing the number of Leases or Licenses in each County or District; the total number respectively of Sheep and Cattle assessed thereon by the Commissioners, with the amount of assessment money received therefrom at the Treasury; the total number of fines reported by the Commissioners, and the amount received therefrom at the Treasury. On the motion of Mr. R. Campbell.—17th February, 1857.
- “ (2.) A Return shewing the total number of Runs leased by Tender or otherwise to individuals upon which no assessments are received by the Crown, and the amount that would be received were such Runs assessed.
- “ (3.) A Return shewing the total area in Acres of Land so Leased or Licensed in each year.”

- 2nd.—“ A Return of all the Waste Lands of the Crown held under Lease or License beyond the Settled Districts of the Colony, from the date of the Proclamation of the Orders in Council on 7th October, 1847, to the present time, shewing in alpha- On the motion of Mr. W. R. Piddington.—2nd December, 1857.

“ betical order the names of all the applicants for Leases or
 “ Licenses in each year, and the names of the parties to whom
 “ Leases or Licenses have been issued; the names of all the Runs;
 “ the District in which the Run is situated; the supposed extent
 “ of the Run; the total number respectively of Sheep and Cattle
 “ assessed thereon by the Commissioner; the amount of assess-
 “ ment money received from each Run since the enactment 20th
 “ Vict., No. 39; the amount of annual rent payable on each
 “ Run at the present time.”

On the motion of Mr.
 White.—19th Oct.,
 1858.

3rd.—“ A Return of all the Runs occupied under the Orders in
 “ Council of the 9th March, 1847, distinguishing in columns
 “ the name of each Run and the District in which situated; the
 “ name of the original Occupant; the name of the present
 “ Occupant; the estimated acreage of each Run; the grazing
 “ capabilities of each Run; the amount of annual rent payable
 “ for each Run; the name of each Run where no official estimate
 “ of grazing capabilities has been made; the name of the Com-
 “ missioner upon whose report the Run has been granted; the
 “ date when any Tender was received, the date of the Com-
 “ missioner’s report thereon, and the date of acceptance;—with
 “ a view to its being referred to the Select Committee now
 “ sitting on the Management of the Survey Department.”

CROWN LANDS UNDER LEASE OR LICENSE.

NOTE.—There was no Assessment Act in force for the years 1853, 1854, 1855.

HENRY LANE,
Under Secretary.

The Treasury, New South Wales,
7 February, 1859.

1859.

Legislative Assembly.
NEW SOUTH WALES.

WILLIAM SUTHERLAND.

(PETITION RELATIVE TO GRANT OF LAND AT MINTO.)

Ordered by the Legislative Assembly to be Printed, 7 October, 1859.

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of William Sutherland, of Braidwood, in the said Colony, Gentleman,—

SHEWETH:—

That your Petitioner, in 1832, became the purchaser of the fee-simple of one hundred acres at Minto, Liverpool, granted to one Isaac Knight in 1831, but which your Petitioner found, on attempting to take possession of, was informed that it had been previously granted to him in the year 1810.

That your Petitioner has been for more than twenty years past applying for compensation to the various Governments of New South Wales.

That the justness of Petitioner's claim is acknowledged by the Government, and a sum is placed on the Estimates to afford him compensation, which, however, he considers no sufficient remuneration for the loss he has sustained by being deprived for so many years of the use of his property, and put to heavy expense in prosecuting his right.

Your Petitioner humbly prays your Honorable House will take his case into your consideration, and award him such redress as you deem him entitled to.

And your Petitioner will ever pray, &c.

WM. SUTHERLAND.

Sydney, 4 October, 1859.

PETITION OF MR. WILLIAM SUTHERLAND.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly appointed on the 7th October, 1859, "to inquire into and report upon the Petition of William Sutherland, presented to the House during the present Session," have agreed to the following Report:—

Your Committee after examining witnesses whose evidence will be found appended hereto, and perusing various papers relating to the case (obtained from the office of the Secretary for Lands), are decidedly of opinion that the allegations contained in the Petition have been substantiated so as to entitle the Petitioner to compensation from the Government, not only for the original loss sustained by him, but for the great expense to which he has been put by previous Governments not giving his case the consideration it deserved.

Your Committee find from the evidence taken and from the documents alluded to, that Mr. Sutherland in the year 1832 purchased from one Isaac Knight, for the sum of £40, 100 acres of land near Liverpool in the Parish of Minto, bounded by George's River, for which the Government had issued a deed of grant in 1831, to the said I. Knight. On Mr. Sutherland trying to take possession of said land he was resisted by Mr. Throsby, who was in possession—he, Mr. Throsby, having purchased the said land on a deed issued by the Government in 1810 to the same I. Knight.

The reason assigned by former Governments for refusing compensation to Mr. Sutherland was that a fraud had been perpetrated by the said I. Knight. But your Committee are of opinion that this was assumed without the slightest foundation.

Your Committee are of opinion that the Government were to blame, not only for issuing two deeds for the same piece of land, but also for not giving the subject sufficient attention when first brought under their notice.

Your

Your Committee, therefore, taking all the circumstances of the Petitioner's case into consideration, beg to recommend that the sum of £500 be paid to Mr. Sutherland out of the Consolidated Revenue Fund, as compensation for the losses he has sustained by the action of the Government.

The evidence of Mr. Atkinson and others goes to prove that the land at present is valued at from £20 to £25 per acre, but your Committee are of opinion that in awarding compensation they cannot accept this valuation, as your Committee cannot assume that Mr. Sutherland would have retained the land in his possession for such a length of time.

Your Committee, therefore, have thought it better to propose the above award, as there is no principle on which Mr. Sutherland's loss can be accurately calculated.

J. BOWIE WILSON,
Chairman.

*Legislative Assembly Chamber,
Sydney, 31 January, 1860.*

PROCEEDINGS OF THE COMMITTEE.

TUESDAY, 18 OCTOBER, 1859.

MEMBERS PRESENT:—

Mr. Wilson,		Mr. Douglas,
Mr. Pemell,		Mr. G. Lang,
Mr. Gray,		Mr. Laycock.

J. B. Wilson, Esq., called to the Chair.

1. The Clerk, by direction of the Chairman, read the Petition of W. Sutherland, referred to the Committee for consideration and report.

Committee deliberated, and decided on examining the Petitioner and the Under Secretary for Lands.

Committee then adjourned till Friday, the 21st instant, at 10 o'clock.

FRIDAY, 21 OCTOBER, 1859.

The House having adjourned from the 20th to the 25th instant, there was no meeting of the Committee this day.

TUESDAY, 6 DECEMBER, 1859.

MEMBERS PRESENT:—

J. B. Wilson, Esq., in the Chair.

Mr. Laidlaw,		Mr. Pemell,
Mr G. Lang,		Mr. Parkes.
	Mr. Gray.	

Mr. W. Sutherland called in and examined.

Committee then deliberated and adjourned till Friday, the 9th instant.

FRIDAY, 9 DECEMBER, 1859.

MEMBERS PRESENT:—

J. B. Wilson, Esq., in the Chair.

Mr. G. Lang,		Mr. Laidlaw,
	Mr. Gray.	

M. Fitzpatrick, Esq., *Under Secretary for Lands*, examined.

The Witness produced all the papers connected with the case, which were ordered to lie on the Table for the use of the Committee, and after the Report is brought up, to be returned to the Witness.

Motion made and *Question (Mr. Gray)*—That it be an instruction to the Clerk to write to Mr. J. H. Atkinson, requesting that he would be so good as to furnish the Committee with any particulars he may be acquainted with in reference to the land claimed by Mr. W. Sutherland, more particularly as to its present value. (*Carried.*)

Committee then adjourned till the 15th instant.

THURSDAY, 15 DECEMBER, 1859.

MEMBERS PRESENT:—

J. B. Wilson, Esq., in the Chair.

Mr. G. Lang,		Mr. Gray,
	Mr. Parkes.	

J. H. Atkinson, Esq., M. P., examined.

The Chairman having produced and read a Draft Report, the Committee proceeded to consider the same in detail.

The Report was verbally amended in various particulars.

Motion made and *Question (Mr. Gray)*—That the further consideration of the Draft Report be postponed till next Meeting. (*Carried.*)

Committee then adjourned till Tuesday, 20th instant.

TUESDAY,

TUESDAY, 20 DECEMBER, 1859.

MEMBERS PRESENT :—

J. B. Wilson, Esq., in the Chair.

Mr. G. Lang,		Mr. Parkes,
Mr. Laidlaw,		Mr. Pemell,
Mr. Laycock.		

The Chairman brought under the notice of the Committee a communication which had been made to him by the Petitioner, to the effect that Mr. Hosking could give the Committee some information relative to the value of the land in question, and the Committee decided upon calling that gentleman before them to give evidence. Committee adjourned till 23rd instant.

FRIDAY, 23 DECEMBER, 1859.

MEMBERS PRESENT :—

J. B. Wilson, Esq., in the Chair.

Mr. Parkes,		Mr. Murray,
Mr. G. Lang,		Mr. Gray.

The witness summoned for this day not being in attendance, the Chairman again brought the Draft Report under consideration, which the Committee proceeded to deliberate upon, and the same was verbally amended. At this stage of the proceedings, the witness, J. Hosking, Esq., being in attendance, was called in and examined.

The Committee continued the consideration of the Draft Report, and made further verbal amendments therein.

Motion made and *Question (Mr. Gray)*—That in the opinion of this Committee, the amount of compensation to which Petitioner is entitled is the sum of £500. (*Carried.*)

Motion made and *Question (Mr. Murray)*—That the following paragraph be added to the Draft Report, as read by the Chairman, viz. :—

“The Evidence of Mr. Atkinson and others goes to prove, that the land is at present valued at from £20 to £25 per acre; but your Committee are of opinion, that in awarding compensation they cannot accept this valuation, as your Committee cannot assume that Mr. Sutherland would have retained the land in his possession for such a length of time. Your Committee therefore have thought it better to propose the above award, as there is no principle upon which Mr. Sutherland's loss can be accurately calculated.”

Carried.
And the Report having by the Chairman been read as amended.
Question put—That the Report just read be adopted as the Report of the Committee—*agreed to.*

Chairman ordered to report the same to the House.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

PETITION OF WILLIAM SUTHERLAND.

TUESDAY, 6 DECEMBER, 1859.

Present:—

MR. GRAY,	MR. PARKES,
MR. LAIDLAW,	MR. PENELL,
MR. G. LANG,	MR. WILSON.

JOHN BOWIE WILSON, ESQ., IN THE CHAIR.

Mr. William Sutherland called in and examined:—

1. *By the Chairman*: You reside at Braidwood? I do, in the district.
2. You bought some land from one Isaac Knight? I did.
3. In what year? In 1832.
4. Where was this land situated? In Minto.
5. Did you pay him for that land? I did.
6. How much? I think £40.
7. Did you ever get possession of that land? Never.
8. What prevented you? I was prevented by the agent of Mr. Throsby—Dr. Hall.
9. On what grounds? That Mr. Throsby had a prior grant.
10. For the same land? For the same land.
11. Was the description the same in both deeds, are you aware? No, very different.
12. What was the name in your deed? Minto.
13. What was the name in Mr. Throsby's? Blacktown.
14. Was there any doubt as to Minto and Blacktown being one and the same piece of land? I never heard of it; I have asked people for many years acquainted with the neighborhood, who have said they have heard of a Blacktown, but never of it being so called.
15. Did you try to get possession of that land by legal proceedings from Mr. Throsby? Yes; I employed the late Mr. George Robert Nichols for that purpose.
16. He failed to get it for you? I received from him a writ of ejectment, which I served upon Colonel Mackenzie, who then occupied that land as a tenant.
17. You failed to get possession, owing to Mr. Throsby having a prior grant of the same land? Mr. Throsby came to Sydney and saw Mr. Nichols, who after that would not go forward, because, he said, Mr. Throsby's deeds were in England. Mr. Nichols kept my papers for two years.
18. What became of your deed ultimately? I entrusted it to Government, and they have lost it.
19. Did they give you an acknowledgment for it? Yes. The Government had all the documents connected with it—the transfer, and the document from Mr. Nichols shewing that he had been employed, and that Mr. Throsby had represented that two deeds had been issued for the same land; also a document from Mr. Armstrong, shewing that he had surveyed it, and that I had paid for it at the same time. These I sent to the Government to attest that I had a claim upon it.

Mr. William
Sutherland.

6 Dec., 1859.

- Mr. William Sutherland.
- 6 Dec., 1859.
20. Did you ever apply for redress before? I did, to Sir George Gipps first, after I heard that there could be such a thing as two grants issued.
21. Have you applied to the Government more than once—have you kept constantly applying? I have applied to all the Governors but this.
22. And could get no satisfaction? None.
23. On what grounds? That Knight was a swindler, and that I ought to fall back upon him.
24. Have you been to much expense in pursuing your claim upon the Government? I have, to great expense, for twenty-seven years. I was down away from home twice last year, and I have been waiting now ten weeks in Sydney.
25. If there had been only one deed of grant you could eject Mr. Throsby now, of course? I could.
26. Was the farm cleared when you bought it? It was. The clearing gangs had cleared it for Mr. Throsby. These gangs were at that time regularly employed to clear the lands.
27. Who was this Isaac Knight? One of the first fleet that came out—a non-commissioned officer of the Royal Marines. Mr. Gordon—my father-in-law—was in the same position and in the same ship; he was the first man who landed in this Colony and, I think, for thirty years was Government storekeeper here.
28. Was the acknowledgment given by the Government returned to you again? The Government got all my acknowledgments. Sir George Gipps wrote for all my documents, to look into my claim, and never returned them.
29. Was Isaac Knight a pensioner? Yes.
30. Had he any other property in the Colony? He had some grants. At the time of selling the land to me he was an aged man, living on his pension, with Mr. Hassall, on the Cowpastures.
31. What was his age? Between eighty and ninety.
32. Was he infirm? He was a strong-boned healthy man for his age, but quite an aged man.
33. Was he aware of the position of the ground? No. I bought the land before he received the deeds, when he was on the way going to Sydney for them. He and my father-in-law were very intimate, having been shipmates and in the same corps, and he always stopped with him on his way from the Cowpastures to Liverpool.
34. How did you find out where this grant was situated? By a surveyor—Mr. Armstrong—who is still alive.
35. Did Mr. Armstrong re-survey the ground for you? Yes.
36. Did Mr. Throsby interfere? His agent, Dr. Hall, did, by threatening to prosecute.
37. When did Isaac Knight die? I think about four or five years after the sale of the land to me.
38. During these four or five years were you engaged trying to get possession of the land you had bought? Yes.
39. You could not recover from the estate of Isaac Knight? No; he had nothing.
40. What do you suppose was the value of that land? I had it surveyed and valued the other day by Mr. Langley. (*The witness handed in the document. Vide Appendix A.*)
41. How much expense do you estimate you have been at in prosecuting your claim against the Government for this land? I should say not less than £100; it cost me £20 each journey I had to Sydney last year, and I have been here ten weeks this year in order to attend the Committee, the meeting of which was fixed for the day upon which the House adjourned.
42. The Government have acknowledged the justice of your claim? Yes.
43. And you are aware that they put a sum upon the Estimates by way of compensation? I am.
44. You are not satisfied with that? I am not. I desired last year to submit the question to arbitration, or to a Committee, but the Government would not consent.
45. What was said to be the date of Mr. Throsby's grant? 1810.
46. Did Knight ever explain to you the reason why he received the grant from Government in 1832? No; it was in 1831. It was then advertised in the *Gazette* (which will still be found), that there was a grant for Isaac Knight in Minto, and he was called upon to come and receive it. Being in the country, and not receiving the *Gazette*, he never saw this advertisement; but in 1832 he received a letter calling upon him to come down and receive his deed, which letter he received before he had his deed.
47. *By Mr. Gray*: Were the deeds taken out? He took them out himself, and gave them up to me, together with the transfer, which were all registered in the Supreme Court. There is nothing of Mr. Throsby's grant at Minto registered. He has a grant at Blacktown, but mine is at Minto, and they say that the two places were one.
48. *By Mr. Lang*: Was the description of the land in Knight's grant the same as that of the land in Mr. Throsby's? Not at all; the description of the boundaries in the early grant are all wrong, but my description is quite correct. There is one corner called "Tull's Corner" the same in both descriptions, and that is the reason they think they are one grant.
49. *By the Chairman*: Have the Government given any acknowledgment to Mr. Throsby, that that is the original grant of 1810? I am not aware; I have no knowledge.
50. Up to the present time you have been able to get no satisfaction from Government? None whatever. I have here a letter from the Government. (*The witness handed in the same. Vide Appendix B.*)
51. *By Mr. Laidlaw*: Who is in possession of the land now? Mr. Throsby.
52. Did you ever employ any other person than Mr. Nichols? No; I was not in affluent circumstances, and I employed him as a man who, from all accounts, was likely to do justice to a poor man.
53. *By Mr. Lang*: Does Mr. Throsby's grant give him a clear title to the land you claim? He has never produced his deeds. I requested him to do so, and he said he had not them here—that they were in England; that was all the information I could get.

54. It may be, then, that this land was not originally granted to Mr. Throsby? The Government acknowledge that it is. I can give no further information. Mr. William Sutherland.
55. *By Mr. Parkes*: Do you know, of your own knowledge, what land adjacent to this hundred acres has been sold at lately? No. 6 Dec., 1859.
56. You do not, of your own knowledge, know the price obtained for contiguous land? No; but it was always considered to be worth £10 an acre; it is close to Liverpool, has a beautiful river frontage, and is good flat land. The only water on Mr. Throsby's estate of 900 acres is on this 100 acres. Mr. Langley, when he drew out his report, inquired of people resident at Liverpool as to its value.
57. *By Mr. Laidlaw*: Was Knight ever in possession of this land? He was on the way to obtain the deeds, and was stopping at my father-in-law's. He let me have it at my own price. Being an old friend of the family, it was looked upon more as a gift than as a purchase.
58. How much did you pay for it? £40. £5 was the expense of the surveyor.

APPENDIX A.

This is to certify, that I have surveyed and valued 100 acres of land situated in the Parish of Minto, County of Cumberland, in the Colony of New South Wales, originally granted to Mr. I. Knight.

And I further certify, that the said 100 acres of land would cost for clearing, stumping, fencing, and being brought into its present state of cultivation, at least £20 per acre; and I value the land, taking into consideration its frontage to George's River, which is fresh water, and also its proximity to the town of Liverpool, Railway Station, &c., at £30 per acre.

CHAS. E. LANGLEY.

C. E. & Surveyor.

Sydney, corner of Pitt and King Streets,
December 2nd, 1859.

APPENDIX B.

*Department of Land and Public Works,
Sydney, 22 February, 1859.*

Sir,

With reference to my letter of the 18th May last, and other correspondence on the subject of your claim to compensation for pecuniary loss sustained by you as the purchaser, in the year 1832, from one Isaac Knight, of 100 acres of land at Minto, originally granted to him in 1810, but for which a second deed was erroneously issued in the year 1831, I am now directed to inform you that the Government, having had the circumstances connected with the case under their consideration, have caused to be noted on the Supplementary Estimates for next session the sum to which you are considered to be entitled as compensation, that is to say, forty-five pounds as the price (with other expenses) of the land in question, together with 27 years interest, at 5 per cent., computed from the date of your purchase up to the 29th September next, amounting in all to the sum of £105 15s.

I am, &c.,

MICL. FITZPATRICK.

Mr. William Sutherland,
173, Pitt-street, Sydney.

FRIDAY, 9 DECEMBER, 1859.

Present:—

MR. GRAY,
MR. G. LANG,

MR. LAIDLAW,
MR. WILSON.

JOHN BOWIE WILSON, Esq., IN THE CHAIR.

Michael Fitzpatrick, Esq., Under Secretary for Lands, called in and examined:—

59. *By the Chairman*: Our object in requesting your attendance here is to obtain from you certain papers relative to a grant of land at Minto made to Isaac Knight? I produce all the papers in our office on the subject; they appear to be complete. (*The witness handed in the same.*) M. Fitzpatrick Esq.
9 Dec., 1859.

60. Have you any information you could personally give relative to the matter under the consideration of the Committee; as to any reasons that may have induced former Governments to refuse, or to delay, giving compensation to Mr. Sutherland? I can of course inform the Committee the reasons assigned; but my information is not personal, it is derived from the correspondence.

61. Which information can be derived from that? It can be derived from that, but I may act as a sort of index. I can give the Committee a précis or resumé of the case.

62. Perhaps you would be kind enough to do so? I find in all that three deeds have issued for the land in question. The first is dated 20th April, 1809, issued by Colonel Paterson to Richard Wrather; that was under what is known historically in New South Wales as "the

M. Fitzpatrick Esq.
9 Dec., 1859.

"the rebel Government," and, consequently, that deed has never been regarded as having any validity whatever. The second is dated 14th July, 1810, issued by Governor Macquarie to Isaac Knight, in which deed the locality is described as "*the district of Bankstown.*" The third deed is dated 19th October, 1831, issued by Governor Darling, also to Isaac Knight, in which the locality is described as "*the parish of Minto.*" As a matter of fact, the locality is the same, though the name was changed after the issue of the deed of 1810. Sutherland appears to have purchased from Knight on the 3rd October, 1832, for the sum of £40. There is evidence here (*referring to the papers produced*) that he at once attempted to assume the rights of ownership, and was prevented by the person already in occupancy, Mr. Throsby. He then discovered that Mr. Throsby alleged the existence of a previous deed. He had bought under, and had the deed of October, 1831, and he found on proceeding to take possession that Mr. Throsby claimed under a previous deed, which on inquiry was found to exist. Sutherland's first claim to the Government is dated 15th March, 1839, and then the fact of the existence of a second deed was officially reported. The question was laid before the then Governor, Sir George Gipps, who ruled that Sutherland had no claim on the Crown—that it was a case of fraud on the part of the grantee. I might here mention that in this Colony cases had been numerous in which two deeds have issued for the same land, but that has always been to two different grantees by mistake; this is the only case I know in which two deeds for the same land have been issued to the same grantee.

63. Are you aware of any proof of fraud on the part of Knight? No further than that suggested by the fact that Knight being the holder of both deeds of grant sold them to two different persons.

64. *By Mr. Laidlaw*: Had he sold to Mr. Throsby? He had sold his grant and delivered it to Mr. Throsby, that is under the deed of 1810, and he had sold and delivered his right, if he had any, under the deed of 1831, to Mr. Sutherland. I believe the case is peculiarly clear as to the facts; all the allegations are borne out. As in some degree rebutting the charge of fraud, it is right I should mention that it is here stated that Knight had more than one grant given to him; that it was the practice of the Colony at that early period to give more than one grant to persons; that in the deed issued in 1831 it is recited that that grant is in satisfaction of a promise made on a date subsequent to the deed of 1810 (I am now throwing out of regard the deed issued by Colonel Paterson)—and therefore there was on the face of it much that would mislead—certainly mislead a purchaser, even though he had been aware of the existence of the former deed for land nominally in a different locality. The history of the case may be almost concluded here; Sir George Gipps would not entertain the case; Sutherland applied a second and third time, but Sir G. Gipps declined to interfere. When a new Governor arrived, Sutherland repeated his claim; a history of the case was laid before Sir Charles Fitz Roy, who put this minute upon it,—“This matter having been decided upon by my predecessor, and having myself given it full consideration, I must decline to interfere.” After the advent of Responsible Government in April, 1856, Mr. Sutherland renewed his claim, and the then Minister for Lands, Mr. Robertson, examined into the history of the case, and he put this minute upon the letter addressed to him by Mr. Sutherland,—“I see no reason to object to the course taken in the papers above alluded to, and think it unnecessary again to open the matter.” Then Mr. Sutherland appealed again, and the only new circumstance that came out at that time was one to which I invited the attention of the Minister. I had heard then, personally, for the first time, either from Mr. Sutherland or from Dr. Aldcorn, of the existence of a third deed, and I find this note by me on the history of the case,—“The existence of the third deed for the land issued by the rebel Government in no way affects Sutherland's position. But the statement now made for the first time—that the deed of 1831 purports to be in satisfaction of a promise made in 1811, that is of subsequent date to the first valid deed (Governor Macquarie's) certainly appears to me to be entitled to some consideration.” On that fact the Minister seems to have qualified his opinion, and the case was entertained so far as to take legal opinion as to the position in which Sutherland now stood. In the opinion given by Mr. Martin, the then Attorney General, he says—“If Sutherland had the means of ascertaining, by searching in the Registry Office, that the land had been already conveyed away by the grantee, I do not think that the Government are called upon to help him. I presume Throsby's conveyance was registered, and a reference to that registry would have immediately put Sutherland on inquiry.” I sent that to the Crown Solicitor, who reported that the registration was duly recorded there.

65. Previously to the transfer to Sutherland? Yes, from Knight to Throsby. It is Knight in each case who received the deeds. He transferred the grant of 1810 to Throsby, and the grant of 1831 to Sutherland. Sutherland appealed still further, and got an unsatisfactory answer. There was then a further appeal and a second reference to the Crown Lawyers. The following opinion was given by Mr. Dalley:—“I have bestowed considerable time and care upon this case, which is a very remarkable one, and surrounded with many difficulties, principally arising from the imperfect nature of the information furnished to this office. The single circumstance, however, with which the Government has to deal, is this,—Was Sutherland prejudiced originally by any course adopted by former Governments? If he was he is entitled to compensation. I cannot agree with the opinion expressed by Sir George Gipps, to the effect that the case was simply one of fraud on the part of Knight. The case seems to me to be clearly one of mistake on the part of the Government. If Knight were, as I perceive by Dr. Aldcorn's Minute of 11th June, 1858, he is alleged to have been, an illiterate person, he might have made his second sale with perfect *bona fides*, under the impression that he was possessed of a second and distinct property. He takes out the grant of 100 acres either in 1810 or 1811, and in 1831 he receives a notice to come in and take out a grant for 100 acres, which turns out to be a second grant.”

“grant of the former property, though each designates the place differently; but I can find nothing which establishes in any way a case of fraud against Knight. I can only see a case of gross negligence on the part of former Governments—negligence so complete that, although Sutherland took every precaution in effecting his purchase from Knight, by the employment of a legal adviser and a surveyor, it was impossible to ascertain the fact of a prior grant. In my opinion Sutherland has established his claim to compensation. I am aware this opinion is opposed to that of a former law adviser of the Crown, but I can hardly think that he bestowed upon the matter that consideration which its importance, as an act of reparation on the part of the Government, deserves.” Then this matter was taken again into the consideration of the Cabinet, which arrived at the determination to pay Sutherland what he had paid for the land, together with interest, computed at five per cent., from the date of purchase. Mr. Robertson gave me this instruction,—“Place on Supplementary Estimate for 1859 £45, with 5 per cent. interest per annum added.” The computation was made of twenty-seven years interest, up to the 29th September, 1859, for £45—equal to £60 15s, which, added to the principal, makes £105 15s., and I think £106 was put upon the Estimates. There was, however, a mistake made in the amount. The purchase money was £40, and not £45. There the history of the case, so far as the Government are concerned, ends. They intended to compensate Sutherland by giving him the price of the land, with interest at five per cent. added.

M. Fitzpatrick
Esq.
9 Dec., 1859.

66. With regard to the opinion of Mr. Martin as to the registration of that original grant, do you think Sutherland could have had any means of discovering that Bankstown, under which name it would have been registered, was the same piece of land as that granted to him under the name of Minto? He had the means—it was quite possible; but it is quite clear to me that he might have been misled, and any professional man whom he might have employed might have been equally misled, unless he were well versed in the history of the Colony; in that case he might have known that Bankstown and Minto were identical, but an ordinary attorney would not. I may mention that Sir George Gipps, while refusing to entertain Sutherland's claim for compensation, proffered to return him the money paid for quit rents, which were quite trifling, of course.

THURSDAY, 15 DECEMBER, 1859.

Present:—

Mr. GRAY, | Mr. LANG,
Mr. WILSON.

JOHN BOWIE WILSON, Esq., IN THE CHAIR.

James Henry Atkinson, Esq., M.P., examined:—

67. *By the Chairman:* The Committee are desirous to ascertain the present value of a J.H. Atkinson hundred acres of land situate at Glenfield, and bounded by George's River, now the property of Mr. Throsby; it is the land on a portion of which his house is built? I was there yesterday, and refreshed my memory as to the land, and, judging from the rate at which land has been selling lately, I should value it at £25 an acre. J.H. Atkinson
Esq., M.P.
15 Dec., 1859.

68. *By Mr. Gray:* What reason have you to conclude it is of that value? Some land of my own adjoining it has been sold lately—land of a similar character.

69. *By the Chairman:* Was it sold by auction or by private sale? It was sold through an auctioneer, privately. The site of the residence is very beautiful, and the land is therefore more valuable there; the land in the flat is of an alluvial character.

FRIDAY, 23 DECEMBER, 1859.

Present:—

Mr. GRAY, | Mr. MURRAY,
Mr. PARKES.

JOHN BOWIE WILSON, Esq., IN THE CHAIR.

John Hosking, Esq., called in and examined:—

70. *By the Chairman:* You have been requested to attend here with the view of giving the Committee some information respecting the value of a piece of land, bought by William Sutherland from Isaac Knight, in the parish of Minto, near Liverpool, in the year 1832; do you know anything of that purchase having been made? I recollect a grant of 100 acres of land to Knight some twenty-five years ago; I do not recollect the precise locality, although I know it is not very far from Macquarie Fields. I had something to do with getting the man his grant—he was an old pensioner. I do not recollect whether any grant was issued, or what Knight did with it farther than this, that he told me he had sold it to Mr. Throsby, to the best of my recollection.

J. Hosking.
Esq.
23 Dec., 1859.

- J. Hosking, Esq.
23 Dec., 1859.
71. *By Mr. Parkes*: Do you recollect a person of the name of Sutherland, in connection with this land? I do not, in connection with this land; but a person called upon me a short time since, and brought the circumstances connected with the land to my recollection.
72. Do you recollect having offered to purchase the land? I have no recollection of that, but the person who called upon me, asked me that question.
73. *By Mr. Murray*: Can you give us some information as to the value of land in that locality? I do not know what part of the estate it was—the estate adjoins Macquarie Fields.
74. Take the average of the district? The railway paid me, I think, £25 an acre, for passing through Macquarie Fields, taking good and bad land. I fancy that would be about the value of land of fair average quality.
75. *By the Chairman*: It is described in the deed as bounded by George's River? (*The Chairman read the description.*) I should say that would probably be the best part of it; but that varies, in some parts it is sandy. I should think from £20 to £25.
76. *By Mr. Parkes*: You do not recollect making an offer to purchase the land? No, I do not; but I recollect Knight telling me he had disposed of it to Mr. Throsby, because, about that time, I got possession of Macquarie Fields, and I thought, if it were anywhere near there, I might have got possession of it myself. Since the man called upon me, I have an indistinct recollection of a grant having been issued in my own name; but I never heard of it further, and never got the grant; where I obtained the information, I do not know, but for years it was upon my mind that Mr. Throsby had called upon me for a conveyance. But these are merely afterthoughts, which have arisen upon considering the matter.
77. *By the Chairman*: From what you knew of Knight's character, do you think he was likely to have perpetrated a fraud upon the Government? I think it most unlikely; he was a most straightforward, honest, honorable man. I knew him for many years, and took a great deal of interest in him. At one time he held a good deal of property in the Colony. He was quite above anything of that sort; I am confident he would not be guilty of any attempt at fraud. Whatever may have occurred—if it have that complexion—I am sure it was not wilful on his part.
78. At the time you speak of, 1832, was he a very old man? Yes, he was an old man—upwards of seventy I imagine.
79. *By Mr. Gray*: Could you give any idea what a hundred acres situated there might have been worth at the time this land was sold by Knight to Throsby? Knight selected it, and it was open to selection at that time at five shillings an acre—the upset price. To a person like Mr. Throsby it would be worth more than to one who purchased it on speculation. Upon reflection I think the five shillings an acre system commenced after the time I speak of.
80. *By the Chairman*: We have it in evidence that this land was cleared by Government gangs before it was granted; would that enhance its value? It would certainly, but I never heard of that circumstance.

1859.

Legislative Assembly.

NEW SOUTH WALES.

REVENUE FROM LAND SALES.

(AMOUNT OF, SINCE ESTABLISHMENT OF RESPONSIBLE GOVERNMENT.)

Ordered by the Legislative Assembly to be Printed, 30 November, 1859.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 23 September, 1859, that there be laid upon the Table of this House,—

“ (1.) A Return shewing the total amount of Revenue that
 “ has been obtained from the sale of Public Lands, from the
 “ first establishment of Responsible Government to June 30th,
 “ 1859, distinguishing, as nearly as can be done, the number
 “ of acres sold, the average value of the land, and the total
 “ amount realised in the Western, Northern, and Southern
 “ Districts, respectively.

“ (2.) The number of acres sold, and amount derived from lands
 “ purchased under pre-emptive right, in the Intermediate and
 “ Unsettled Districts respectively.

“ (3.) The number of lots and of acres offered for sale by auction,
 “ and not sold, during same period, and now open for selection
 “ at the upset price.”

(Mr. Clements.)

REVENUE FROM LAND SALES.

RETURN shewing the total amount of Revenue received from the sale of Crown Lands in the Northern, Western, and Southern Districts, respectively; together with the area, and average price per acre, from the establishment of Responsible Government to the 30th June, 1859.

DISTRICTS.	QUANTITY.			AMOUNT.			AVERAGE PRICE PER ACRE.

1859.

—
Legislative Assembly.
NEW SOUTH WALES.

—
RELIGIOUS ENDOWMENTS.
 (FURTHER RETURN RELATIVE TO.)

—
Ordered by the Legislative Assembly to be Printed, 13 December, 1859.

FURTHER RETURN to two *Addresses* of the Honorable the Legislative Assembly of New South Wales, dated 21 December, 1858, and 8 February, 1859, respectively, praying, That His Excellency the Governor General would be pleased to cause to be laid upon the Table of this House,—

“ A Return shewing the number of Acres gratuitously granted
 “ by the Crown at any time to the several Religious Denomi-
 “ nations in aid of either Churches or Schools—specifying in
 “ tables under the head of each of such denominations respectively
 “ —the number of acres so granted to each—and in each case,
 “ to what person or persons the legal interest was conveyed—
 “ the ostensible purpose or purposes of the grant—the date
 “ when possession was given—the locality in which such lands
 “ are situated—the probable present value thereof—and by
 “ whom they are at present occupied.”

Also,

“ (1.) A List of all properties in Land belonging to the several
 “ Religious Bodies in this Colony obtained from the Crown by
 “ grant or otherwise.
 “ (2.) A List of Lands originally intended for Glebes—stating
 “ the use to which they are now applied—the income derived
 “ therefrom, and for whose benefit.
 “ (3.) An account of Sales or other disposition of those
 “ Lands originally intended for the Bishop’s maintenance, now
 “ known as Bishopthorpe, near the Sydney University,—the
 “ quantity still unsold—and the income derivable from the
 “ whole of the said property under the Act of Council, passed
 “ in November, 1855.”

RELIGIOUS ENDOWMENTS.

A RETURN shewing the Number of Acres Granted by the CROWN to the several Religious Denominations in Aid of Churches, Schools, &c., specifying under the Head of each Denomination the number of Acres so granted—to what person or persons the legal interest was conveyed—the ostensible purpose or purposes of the Grant—the date of the Grant and when possession was given—the locality in which such Lands are situated—the probable present value thereof—and by whom the Land is at present occupied.

NOTE.—The information required in the last two columns, as far as it has been introduced, was furnished by the Heads of the Denominations represented. This Office does not possess means of supplying the still existing deficiencies in these Columns, for although as regards the former some approximation might be arrived at, it would be of necessity so loose as to be practically without value or reliance.
Surveyor General's Office,
6 September, 1853.

HENRY LANE.

1859.

Legislative Assembly.
NEW SOUTH WALES.

LANDS SOLD IN THE NOWRA AND GOOD DOG MUNICIPALITY.
 (RETURN RELATIVE TO.)

Ordered by the Legislative Assembly to be Printed, 13 December, 1859.

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 7 October, 1859, praying that His Excellency the Governor General would be pleased to cause to be laid upon the Table of this House,—

“ A Return shewing all Lands sold in the Nowra and Good
 “ Dog Municipality, setting forth the names of each purchaser,
 “ the date of the transaction, the extent of and price paid for
 “ each lot, at per acre or otherwise, and, if any has been granted,
 “ for what service.”

(*Mr. Garrett.*)

LANDS SOLD IN THE NOWRA & GOOD DOG MUNICIPALITY.

RETURN shewing all Lands in the Nowra and Good Dog Municipality, setting forth the names of each Purchaser, the date of the transaction, the extent of, and price paid for each Lot; and also Lands granted.

Legislative Assembly.

NEW SOUTH WALES.

MAITLAND PASTURAGE RESERVE.

(PETITION OF CERTAIN INHABITANTS OF MAITLAND.)

Ordered by the Legislative Assembly to be Printed, 3 February, 1860.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned Inhabitants of Maitland and its vicinity,—

HUMBLY SHEWETH :—

That the Town of Maitland was first surveyed by Government in or about the year one thousand eight hundred and twenty-nine, only a portion of the Crown Land was then laid down in allotments, a large portion (about 300 acres) towards the south being marked on the plan "for Town Reserve," and a more distant part (about 800 acres) towards the east being marked "Reserve for Pasturage for Maitland."

About 200 allotments in the Township were then sold, being almost all the land so laid down in allotments; but a most effective impediment was then made to the further increase of the Town by the difficulty of obtaining allotments to be put up for sale, for although the streets were marked out, and the sections shewn in blocks on the said plan, exhibited at the Court House, yet for many years the Government delayed a further survey—in fact it is believed no survey was made from 1829, the date of Town plan until about 1852, when the increased demand for land consequent on the discovery of gold urged the Government to mark out other allotments; but these allotments were all marked out and sold by the Plan of 1829, which had remained at the Court House, and was exhibited to the purchasers at the time of sale. About this time the sale of land was committed to Local Commissioners, and the original plan was sent into Government, and a duplicate made for the Commissioner at Maitland, who now has such duplicate in his possession, and who has hitherto effected all sales by it.

About the year 1854 the Government were about conveying to a Mr. Osborne a portion of the Reserve marked for Town Reserve; it was to be conveyed as compensation for some deficiency in a grant of land at Illawarra, but your memorialists represented that such Land could not be used for any other purpose than that for which it was reserved on the plan, and (after an appeal by your Petitioners to your Honorable House) the intention of improperly disposing of it was abandoned. During the investigation of the case a Plan of the Town was lithographed, to accompany the printed documents, and for the information of your Honorable House, and by that plan your Honorable House will perceive that the original intention was still preserved, and that the Pasturage Reserve was still set forth as 'Reserve for Pasturage for Maitland.' It was not until the year 1855 that any departure from the Plan of 1829 was suggested, when a plan was sent to the Local Commissioner, on which it appeared that the Reserve which up to that time had been marked on all plans as "Reserve for Pasturage for Maitland," had been differently designated, being therein marked "Reserve for Pasturage and Extension."

Thus your Honorable House will perceive all those persons who had purchased allotments on the faith of the Town Plan of 1829, and with the rights of participating in the benefits of a commodious commonage, were threatened to be deprived of these rights, but as no overt act followed the issuing of this last plan, no action was taken in the matter; it was

not until about the year 1858 that a plan shewing the resumption of the Government of a portion of the Pasturage Reserve was sent to the Local Commissioner of Crown Lands; and it was not until the present year of 1860 that this plan (lithographed and dated November, 1859,) was published by authority and sent to the Commissioner for sale. Your Petitioners beg to annex hereto a copy thereof, and to call the attention of your Honorable House to the fact, that on the portion which is marked in the plans of 1829 and 1854, "Reserve for Pasturage for Maitland," the Government have now marked out allotments for sale and other purposes, and have designated the Reserve as "Reserve for Town Extension and Temporary Pasturage."

It would be idle to trouble your Honorable House with particulars of the many remonstrances which have been from time to time made against this unjustifiable alteration of the Town Plans, and it will be sufficient to say that after mature consideration and full public discussion, your Petitioners have come to a conclusion that the only recourse now open is a second appeal to your Honorable House.

Your Petitioners humbly represent that the question for consideration by your House is, whether the Government have or have not dedicated the Pasturage Reserve to the use of the inhabitants.

And your Petitioners, in their behalf, would humbly represent,—

That the original survey was made with the intention of reserving the Pasturage as a Commonage for the Town.

That the Sale Plans shew it to be a Reserve for Pasturage only.

That the Government are bound by their Sale Plan, and that the inhabitants have claims to the enjoyment of Public Reserves, as recognised by the Commonage Act and the Public Parks Act of 1854, while the Municipality Act of 1858 secures to Country Municipalities the management of public places for recreation, and of Lands lawfully set apart as a Commonage for the depasturing of sheep, cattle, horses, and other animals belonging to the inhabitants.

That the Reserve has hitherto, viz., for 20 years or upwards been uninterruptedly used by the inhabitants for the purpose for which it was reserved on the Plan, and is of great value to the community, not only in providing pasture for their cattle, but in promoting the trade of the District with Sydney, inasmuch as the large flocks of sheep which are sent from the interior to Sydney Market, are depastured thereon, and drafted from time to time, as required, on board the steam vessels.

That the denial of this privilege to the inhabitants would greatly depreciate Town Property, as allotments hitherto purchased were bought under the belief that this valuable privilege was lawfully attached to them.

That there are yet remaining upwards of 600 acres of unsold Town Lands, and therefore ample scope exists for the due enlargement of the Town.

That the Reserve for Pasturage comprises a large portion of swamp, unfit for building, land which may probably have been the cause of the same being originally reserved for Pasturage, but which your Petitioners do not now urge as the reason for their present claim, seeing that the Sydney Domain and other possession—most eligible building sites—is still reserved for public use.

Your Petitioners would also humbly represent that they are prepared to offer proof to your Honorable House of the truth of the above representations, and they submit that by so doing they will entitle their claim to your favorable consideration.

Your Petitioners, therefore, humbly pray that your Honorable House will be pleased to take cognizance of this their Petition, and will secure to your Petitioners the due and lawful use of their Town Reserve for Pasturage, by such ways and means as to your Honorable House may seem meet.

And your Petitioners will ever pray, &c.

MAITLAND PASTURAGE RESERVE.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 16th February last, "to inquire into and report upon the allegations contained in the Petition of the Inhabitants of Maitland, having reference to Pasture Reserves," have agreed to the following Report:—

Your Committee, in the course of their inquiry, have examined, as witnesses, the gentlemen named in the margin, whose Evidence will be found appended hereto; and, after careful consideration, are of opinion that the allegations of Petitioners have been substantially proved.

A. G. McLean, Esq.
 Jos. Chambers, Esq.
 John Kingsmill, Esq.
 Alex. Dadds, Esq.
 G. B. White, Esq.
 Jas. Thomson, Esq.

It appears from the evidence,—

1. That the Maitland Pasturage Reserve was laid out about the year 1833.
2. That it was so laid out originally with the intention of reserving it permanently as a Commonage for the Town, or, at all events, that the purchasers of the various Town Allotments were led—by the conduct of the Government, and more particularly by the plans published by the Government, from time to time—to believe that the Reserve was to be permanent, and that they purchased under that belief.
3. That, in consequence of the advantages afforded by this Reserve, allotments in the Town of Maitland have been sold at greatly increased prices.

Your Committee are therefore of opinion that it would now be an injustice to those purchasers, and a breach of faith with them, to deprive the Town of the use of the lands referred to as a permanent Reserve, or to appropriate them to any other purpose than that for which they appear to have been intended when first laid out.

In conclusion, your Committee recommend that the Maitland Pasturage Reserve should be placed under the management of Trustees, as a Commonage, for the general benefit of the Inhabitants.

JAMES DICKSON,
Chairman.

*Legislative Assembly Chamber,
 Sydney, 25 May, 1860.*

PROCEEDINGS OF THE COMMITTEE.

WEDNESDAY, 29 FEBRUARY, 1860.

MEMBERS PRESENT:—

Mr. Dickson, | Mr. Close,
Mr. Wisdom.

James Dickson, Esq., called to the Chair.

Resolution of the House appointing the Committee, and the Petition referred to them therein, read by the Clerk.

Committee deliberated upon their course of proceedings, and the expediency of obtaining the production of certain correspondence, plans, &c., alluded to in the Petition.

[Adjourned.]

WEDNESDAY, 18 APRIL, 1860.

MEMBERS PRESENT:—

J. Dickson, Esq., in the Chair.

Mr. Close, | Mr. Faucett.

Committee met pursuant to summons.

A. G. McLean, Esq., *Acting Surveyor General*, called in and examined.

Witness, in the course of examination, produced plans of the town of Maitland, marked respectively M. 583 b, M. 583 d, M. 583 f., together with a lithograph of the last.

Witness withdrew.

J. Chambers, Esq., *Crown Prosecutor, Western District*, called in and examined.

Witness withdrew.

J. Kingsmill, Esq., called in and examined.

Witness withdrew.

A. Dodds, Esq., called in and examined.

Witness withdrew.

Committee directed summons to be issued for the attendance of A. G. McLean, Esq., to give further evidence; and that G. B. White, Esq., and Jas. Thomson, Esq., both of Maitland, be also summoned for the next meeting, the latter to be instructed to produce the plans of Maitland from which Town Allotments are sold.

[Adjourned till Wednesday, 25th instant, at Eleven o'clock]

WEDNESDAY, 25 APRIL, 1860.

MEMBERS PRESENT:—

Mr. Dickson, | Mr. Faucett.

In the absence of a Quorum of the Committee, the meeting convened for this day lapsed.

WEDNESDAY, 2 MAY, 1860.

MEMBERS PRESENT:—

J. Dickson, Esq., in the Chair.

Mr. Close, | Mr. Faucett.

Committee met pursuant to summons.

A. G. McLean, Esq., *Acting Surveyor General*, called in and further examined.

Witness withdrew.

G. B. White, Esq., called in and examined.

Witness withdrew.

J. Thomson, Esq., *Commissioner of Crown Lands, Maitland*, called in and examined.

Witness withdrew.

Committee deliberated upon the expediency of obtaining Copies of the Evidence prior to the next meeting, with a view to their proceeding with the consideration of a Report.

It was *Resolved*:—

“That it will be unnecessary to transmit for revision the MS. Evidence of the
“Witnesses residing in Maitland, and that the same be placed in the hands
“of the Printer as soon as transcribed by the Short-hand Writer.”

The Chairman laid before Committee, letters received from Mr. Kingsmill, Mr. Thomson, and Mr. White; the two former severally dated the 21st, and the latter the 25th, ultimo; each of such letters having reference to the payment of witnesses' expenses in attending Committee.

Committee deliberated.

Deliberation adjourned.

The Chairman brought under notice the revised MS. of the Evidence given by Mr. Chambers on the 18th instant, wherein witness proposed to omit the latter portion of Answer 89, together with the following Questions and Answers numbered 90, 91, 92, and 93.

Committee Resolved :—

“ That the Evidence stand as originally given, and that Mr. Chambers's note, in
“ reference to the omission of this portion, be added as Appendix B. to his
“ Evidence, with an *asterisk* in the text directing attention thereto.”

[Adjourned.]

WEDNESDAY, 23 MAY, 1860.

MEMBER PRESENT :—

Mr. Dickson.

In the absence of a Quorum of the Committee, the meeting convened for this day *lapsed*.

(By direction of the Chairman to be again convened for Friday, 25th instant, at 11 o'clock.)

FRIDAY, 25 MAY, 1860.

MEMBERS PRESENT :—

J. Dickson, Esq., in the Chair.

Mr. Black, | Mr. Close,
Mr. Faucett.

The Chairman laid before Committee a Draft Report.

Committee deliberated.

Draft Report read and *verbally* amended.

Committee reverted to the consideration of letters, touching the payment of expenses of certain witnesses, brought under notice by the Chairman on the 2nd instant.

Letters of Messrs. J. Kingsmill, J. Thomson, and G. B. White, severally read,—

It was Resolved :—

“ (1.) That in the cases under consideration, the Committee see no reason for
“ recommending a deviation from the usual practice under the 44th Standing
“ Order, by which expenses may only be awarded to professional or other
“ witnesses specially employed.”

“ (2.) That the several parties be informed accordingly.”

Deliberation on Draft Report resumed.

Motion made (*Mr. Faucett*) and Question,—That the Report, *as amended*, be the Report of this Committee—*agreed to*.

Chairman requested to report to the House.

LIST OF WITNESSES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

MAITLAND PASTURAGE RESERVE.

WEDNESDAY, 18 APRIL, 1860.

Present:—

MR. CLOSE, | MR. DICKSON,
MR. FAUCETT.

JAMES DICKSON, Esq., IN THE CHAIR.

Alexander Grant M'Lean, Esq., Acting Surveyor General, called in and examined:—

1. *By the Chairman*: Do you produce the plans of the township of Maitland? I have ^{A. G. M'Lean, Esq.} here four plans of the town of Maitland.
2. Will you produce the original plan? This is the first plan of the town of Maitland, dated in 1829, and approved and signed by Sir Ralph Darling. (*The witness produced the* ^{18 April, 1860.} plan referred to, marked M 583 b.)
3. *By Mr. Faucett*: This is what is now called East Maitland? Yes, this is the Government town of Maitland, now known as East Maitland; West Maitland is a private town.
4. *By the Chairman*: Have you any other plans? Here is another plan drawn in 1842 or 1843. (*The witness produced the plan referred to, marked M 583 d.*) It is a copy of the first plan, with the additions made from time to time, and was used for a number of years as the official plan of the town.
5. *By Mr. Faucett*: By additions you mean fillings in? Yes, each plan has had additions from time to time.
6. *By the Chairman*: Is there any other plan? This is a later plan, made in the year 1855, and has since been used as the official plan. (*The witness produced the plan referred to, marked M 583 f.*)
7. Is this a copy of the original plan also? It is a copy of the second plan, with certain additions.
8. Fillings in? Yes. The last one is the lithograph plan published by authority of the Government. We do not use this in the office, but it is the same as the last plan, which comes up to the present time.
9. Are the reserves shewn in the first plan? No.
10. Are they shewn on the second plan? They are shewn, but they are not part of the second plan; they are fillings in.
11. The plan marked 583 d shews the town reserves? It shews the reserve for pasturage, but I may mention that it was not on it at the date of the original plan; it has been added since.
12. Added since 1843? Yes.
13. On the original plan were the reserves shewn? No, not the reserve for pasturage; reserves in the town were shewn.
14. Are you aware that allotments have been sold according to this plan? Yes.

- A. G. McLean, Esq.
18 April, 1860.
15. Since the addition of the reserve? Both before and after the addition of the reserve.
 16. Have there been many allotments sold since this plan was drawn? A considerable number have been sold; you will see a great many have been sold, by looking to the present plan.
 17. *By Mr. Faucett:* They have been sold with the knowledge that the reserve was marked out? They have been principally sold at the local office at Maitland, from a copy of that plan, with the pasturage reserve marked on it.
 18. *By the Chairman:* Are you aware of the extent of this reserve as marked here, "Reserve for pasturage for Maitland?" Speaking from memory I believe about 800 acres, but very little of it is shewn on that plan.
 19. There are other reserves in connection with the town of Maitland? Yes, reserves inside the town—for a gaol, court-house, market-place, and for recreation.
 20. Are you aware that in the year 1854 Mr. Osborne was about obtaining a portion of the town reserves? I am aware he was so, at one period, about that time.
 21. But in consequence of the action of some of the inhabitants they were not obtained? No, and Mr. Osborne was obliged to select elsewhere. That was not part of these 800 acres.
 22. There are a considerable number of allotments still unsold within the town of Maitland? Yes.
 23. Are you aware to what extent? Some hundreds of acres—perhaps 200 acres.
 24. 300 acres, I am informed? From 200 to 300 acres.
 25. When was the alteration made upon the plans, from "Reserve for pasturage for Maitland" to "Reserve for temporary pasturage and extension?" I cannot say at what precise date that was made, but this lithograph was published in November, 1859, and then the words "for pasturage and extension" and "temporary pasturage" were introduced.
 26. *By Mr. Faucett:* Those words appear first on the lithograph? Yes.
 27. *By the Chairman:* Can you identify this map (*handing a map marked by the Chairman X*)? Yes; it is a portion of the lithograph map of the County of Northumberland, published by the Government.
 28. *By Mr. Close:* It is a correct map? Yes, it is published by authority.
 29. *By Mr. Faucett:* With respect to the 800 acres—they appear on the map of 1842 or 1843 as "reserve for pasturage for Maitland"—? That reservation was added to the map about the year 1848, I can say from memory.
 30. *By the Chairman:* You have stated that allotments have been sold since that time? Before and since.
 31. *By Mr. Faucett:* Was there at that time any general system for making reserves? Yes, there were instructions from the Colonial Secretary's Office, that all important towns in the Colony should have pasturage reserves attached to them.
 32. Could you furnish us with a copy of those instructions? Yes. (*Vide Appendix.*)
 33. It was according to those instructions that these 800 acres were marked out? That is the only official record of the authority on which this reserve was marked out.
 34. There is no doubt, I presume, that it was in consequence of those instructions that these reserves were made? No.
 35. These reserves within the township marked for cattle-market, for recreation, and for gaol and court-house were, I suppose, reserved when the township was first laid out? No; this for the cattle-market was a recent reservation instead of another.
 36. Was the first reserve for the cattle-market laid out at the laying out of the town? Yes.
 37. And the reserve for gaol and court-house also? Yes, that was laid out early.
 38. And also the reserve for recreation? That was also determined on early, but its specific boundaries were not marked out.
 39. A space there was determined upon, but its boundaries were not defined? Yes.
 40. With respect to Mr. Osborne's claim, there was a space of 2,000 acres which he was getting as a grant for some purpose,—was that out of land set aside as a reserve for the township in any way? I think that was another case,—that was a grant to Dr. Douglass, which Mr. Osborne had purchased the right to select. This was a selection as compensation for a deficiency in the area of a grant at Dapto.
 41. There was some action, we are told, taken by the people of Maitland against that proceeding;—did they take that action in consequence of any claim to this land as being reserved land? Not as being a pasturage reserve, but on the general ground of its being a part of the town reserve and not open for selection.
 42. It was not specifically reserved for pasturage? No, that portion was never determined to be for pasturage purposes until the publication of the lithograph plan, when it was marked for temporary pasturage.
 43. *By Mr. Close:* Have the reserves of other towns been sold by the Government in the same way as it is proposed to sell the Maitland Town Reserve? In a great many cases land set apart for pasturage has been sold to some extent, more or less. The reservation for pasturage has not been considered a bar to sale, and latterly, since the question arose as to whether they were properly open for sale, all such reserves have been marked "for pasturage and extension," so that they may be applied to both purposes.
 44. *By Mr. Faucett:* That is in fact changing the character of the reserve? Only changing the name of the reserve, because the same practice is still applied; we sold them before and we sell them now.
 45. When they were merely called reserves for pasturage were they sold? They were.
 46. That is, they were sold for purposes of town extension? For town extension, or suburban allotments; generally suburban allotments, as they were usually at some distance.
 47. Then, as I understand you, the Government never considered a reserve for pasturage as precluding them from selling the same land for town extensions or suburban extensions? It was never considered so until this case arose. Practically speaking, they have been sold.

SELECT COMMITTEE ON MAITLAND PASTURAGE RESERVE.

8

48. Have they sold any of the reserve for pasturage at Yass? Yes, part of the pasturage reserved at Yass has been sold. A. G. M'Lean,
Esq.
18 April, 1860.
49. Has any of the pasturage reserve at Goulburn been sold? I do not think it has, since the boundaries were laid down.
50. Have you any recollection when the Government first began to sell these reserves? Almost immediately after their formation. They were only formed about 1848, and they have been sold at various times since.
51. *By Mr. Close:* What prevented Mr. Osborne from obtaining the land when he selected it on the town reserve at Maitland? Because it was part of the town reserve. He was obtaining compensation for the loss of a portion of country land, and he was allowed to select land of equal value. He selected this land, and was about obtaining it, when it was objected that it formed part of the town reserve, and in consequence of that objection he was told he must select elsewhere.
52. *By Mr. Faucett:* He got a particular number of acres in compensation for the same number of which his grant at Dapto was deficient? Yes, 20 acres.
53. And he selected these 20 acres, in the first instance, on the town reserve at Maitland? Yes. It was not the proximity to Maitland that gave the land value, but it contained coal, and was valuable on that account.
54. *By the Chairman:* Were these allotments laid out on one of these maps, on the 800 acre reserve marked off by order of the Government? They have not been laid out on the ground—they have only been designed, excepting those marked as cemeteries.
55. None of them have been sold? None have been sold. The reserves for public recreation and for cemeteries have been measured.
56. *By Mr. Faucett:* There is a large portion of 300 acres, marked on the plan for a town reserve—where is that? (*The witness pointed it out on the map.*)
57. *By the Chairman:* That was never regarded as a pasturage reserve? No, it was only recently called a reserve for "temporary" pasturage.
58. But you would call the 800 acres a permanent reserve? In the ordinary acceptance of the words they might be considered so, but knowing what the practice has been in the office, I could hardly deem them so.

APPENDIX.

Colonial Secretary's Office,
Sydney, 22 January, 1849.

Sir,

In reference to your report of the 17th April last, respecting the land which has been reserved for the use of the townspeople of Yass, as pasturage for their milch cows, I now do myself the honor to transmit to you the accompanying extract from a Minute of the Executive Council upon the subject, which has been duly approved of by the Governor; and in accordance therewith I am directed by His Excellency to request that you will have the goodness to furnish me, for the necessary publication, with a description of the land so reserved.

The Surveyor General.

I am, &c.,
E. DEAS THOMSON.

EXTRACT from Minute of the Executive Council, dated 19th December, 1848, respecting the best mode of securing to the Inhabitants of Townships the exclusive right of pasturage for their Milch Cows over certain lands proposed to be reserved for that purpose.

"With reference to the proceedings on the 12th September last, His Excellency the Governor lays before the Council the Attorney and Solicitor General's letter of the 28th November, 1848.

"In accordance with the recommendations contained in this opinion, the Council advise that, in the case of Bathurst, and of every other town to which a similar privilege may be conceded, notice should be issued that His Excellency, acting on behalf of Her Majesty, has reserved a certain portion of land (to be described) for the exclusive use (so long as it may remain unalienated by grant) of the householders residing in the town, for the pasturage of their milch cows, according to certain rules to be in that behalf made and provided; that the Magistrates in Petty Sessions should be authorized to frame such rules, subject to their approval by His Excellency the Governor; and that the Chief Constable, or some other suitable person, should in such case be authorized to act as Crown Bailiff in respect to the reserved lands, and to proceed against intruders thereon, under the 4th section of the statute 9th and 10th Victoria, chapter 104."

Joseph Chambers, Esq., called in and examined:—

59. *By the Chairman:* You have prepared a statement in writing upon the subject which J. Chambers, Esq. has been referred to this Committee? Yes.
60. Will you read it? (*The witness read the statement referred to. Vide Appendix A.*)
61. Can you identify this map (M 583 d) as similar to the one you had in Maitland, by which you sold allotments? It is not actually the same plan; but I believe it to be a duplicate of it. 18 April, 1860.
62. Yours was a copy of that? Mine was a copy of this.
63. Have you bought allotments by that plan? Yes.
64. Did you consider that the reserves gave any increased value to those allotments at the time you purchased? Decidedly.
65. Are the reserves of value, generally, to the township? Yes, of great value. At first, I remember, and I mention it incidentally, we used to have a town herd; a boy used to come round for our cows, take them to the reserve, and bring them back in the evening.

J. Chambers, 66. *By Mr. Faucett*: The reserve was and is used as a common? Yes; and the circumstance I mention will prove the common use of it.

Esq. 67. *By the Chairman*: A considerable number of allotments have been sold by that plan? A very large number up to the year 1858. I may mention that I believe that, when I first saw this plan, sections 14, 19, 24, 38, 40, 43, and 45 were not marked out into allotments; that is, they were not so marked out on my plan; and, therefore, all the allotments in these sections must have been sold according to this plan.

18 April, 1860.

68. Sold since the 800 acre reserve was marked out as "for pasturage for Maitland"? Yes. I might also mention a portion of section 20; and, if you think it worth taking down, I may mention that I myself applied for these allotments in section 20, and my application was upwards of six years in the office before I could get them put up for sale. They were then marked out by Mr. Lewis; I was myself present when he marked them out; I subsequently bought them by this plan; and I see my name entered here. Now when I applied for them that part of the block on the original plan had not been surveyed; it had been blocked out into streets, but the allotments had never been marked out. So that I can speak positively, that these allotments in section 20 were sold by the plan shewing the reserves.

69. As Clerk of the Bench at Maitland you have sold allotments by that plan, shewing the reserves as they are set forth? Exactly.

70. And you have always regarded those reserves as giving an enhanced value to the allotments? Yes.

71. Are you aware whether other purchasers regarded them in that light? I am aware they all did, more or less; but many I am sure did. It was always thought that the reserve was of the highest value to working men with horses, because they could send out their horses there on a Saturday, by which they would be refreshed for work again on Monday. I have heard it frequently alluded to in this way.

72. Are you aware whether all the allotments within the police boundary are sold? No; about 600 acres are still unsold.

73. Within the police boundary of the town of Maitland? No; the police boundary as shewn here would leave out all the temporary reserve for pasturage and extension, from 250 to 300 acres, as well as the 800 acres. With these 300 acres, I think there are still 600 unsold. In the old plans this 300 acre reserve was marked "for town extension," but those might have been private plans which were about the town. The plan published by authority of the House, in Mr. Osborne's case, shews the reserve for pasturage, and also I believe the reserve for town extension.

74. You are aware that Mr. Osborne applied for a portion of the temporary reserve of 300 acres? Yes.

75. Did the inhabitants of Maitland make any objection to his getting it? Yes, there was a petition forwarded to the Legislative Assembly; and I do not know whether there was a Committee appointed. However, the promise which I fancy the Government had made to Mr. Osborne was never carried into effect.

76. In consequence of the action of the inhabitants? In consequence of the action of the inhabitants.

77. *By Mr. Faucett*: You yourself bought in the distinct belief that the reserve for pasturage was a permanent reserve? Yes, and I never heard till 1858 that there was any doubt about it.

78. Commencing from what period? I could only tell from the time I went there in 1842. I did not become aware that there was to be any change in the designation of the reserve till very late in 1858, and I did not know it as a fact until I saw the plan in 1860. I heard it rumoured that Mr. Adams was surveying a part of the town reserve to be cut up into allotments, but I only heard it as a rumour. That was about 1858. I might mention, as a proof of the general belief that this reserve was for the use of the inhabitants, that the police magistrate and the other magistrates on the Bench were always in the habit of telling persons, that though their cattle would be impounded if they allowed them to stray in the streets, if they sent them to the reserve, which they had a right to do, they could not be impounded.

79. *By the Chairman*: When were these permanent pasturage reserves granted or in any way given to the township? I cannot tell. They were used as reserves when I went there in 1842.

80. *By Mr. Faucett*: I am to understand that you, and all the others so far as you are aware, purchased under the belief that this was a permanent reserve? Yes.

81. And you are partly led to that belief by seeing the words "reserve for pasturage" on the sale plan? Yes.

82. Do you recollect when the Government first expressly interfered with that understanding? No; I believe there was no interference at all, until Mr. Adams, the surveyor, received instructions to lay it out, which must have been about 1857 or 1858—certainly not before.

83. When was the portion for the racecourse applied for—in 1855? No; about 1858 or 1859. With reference to the burial grounds, I am sure the Wesleyans spoke to me not more than two years ago, saying they understood there were burial grounds to be had now, and they were going to apply.

84. Where are the burial grounds in use now? At a place marked "Glebe" upon the plan, for the Episcopalians. The Roman Catholic and Presbyterian burial grounds adjoin one another at the western end of Maize-street. The Wesleyans made application for a portion of the reserve. It seemed to be rumoured about in 1858 or 1859, that there was to be a scramble for anything that could be got, and that the Government were going to cut up the reserve; but I am sure that was not before 1858 or 1859.

85. *By the Chairman*: If any portion of the reserve were granted to the different denominations, as cemeteries, would it be detrimental to the value of the allotments in the town and the interests of those who have purchased them? Yes. J. Chambers,
Esq.
86. *By Mr. Faucett*: Is the land on all sides of these 800 acres private land? It is on all sides; I am not aware of any unsold land within ten or fifteen miles of it. 18 April, 1860.
87. Then, in fact, there is no convenient place for a cemetery, unless within the reserve? No, unless on private land—or on the reserve for town extension.
88. Except on the part that is reserved for town extension there is no other place on which a cemetery could be formed unless you go on private land? There is not. At the same time I may say that the cemeteries already formed in the town are abundant for the next twenty years. As regards the Presbyterian burial ground I should suppose there are not more than two or three dozen graves in it; the Roman Catholic ground is more crowded, but there is ample room; and as regards the Episcopalian burial ground a large piece of three acres has just been added.
89. *By Mr. Close*: The Wesleyans have no burial ground in East Maitland? I am not aware that they have.* I may state that there was an excuse made at one time that the burial grounds were marked out here, because the Act requires that no burial shall take place within a mile of the town. But if this Act is to be carried into force it will be perfectly illegal to use them. *vide Appen-
dix B.
90. *By Mr. Faucett*: Then the burial grounds as marked out on the plan of 1855 will be within a mile of the town? Yes, within half a mile.
91. Are not the other cemeteries within the distance? Yes, they are within the town.
92. *By the Chairman*: When was the Act passed? Somewhere about 1834 or 1835.
93. *By Mr. Faucett*: After the formation of the present cemeteries? Yes.
94. *By the Chairman*: Have you anything to state further? No.
95. *By Mr. Close*: When you sold land for the Government at Maitland did you receive any instructions to tell people of the right of commonage? No, I merely sold by the plan.
96. *By Mr. Faucett*: You were instructed to sell by the plan? Yes.
97. *By the Chairman*: That reserve for pasturage appeared on the plan? Yes.

APPENDIX A.

I was appointed clerk to the Bench of Magistrates at Maitland in the year 1843. Among the public documents of my office was a plan of the township of Maitland, dated 1829; it was exhibited in my office in order that persons wishing to buy town allotments might thereby select and identify them.

I believe not more than 50 acres of land appeared by the plan to be measured off into allotments. About 200 acres were blocked out, but not subdivided into allotments; and about 600 acres were marked "Reserve for town extension." All the remainder of the town land, being the land, lying to the east of an extension of E. C. Close's western boundary line, and comprising a section of about one mile square, was marked "Reserve for pasturage for Maitland."

It was my duty to exhibit this plan to the public, and I am aware that many allotments were chosen by it. I am also aware that for six or seven years after all or very nearly all the allotments had been taken, no selections could be made in the blocks, because they had not been subdivided. At this time all sales of Government lands were effected in Sydney, the clerks of benches had no duties beyond shewing the sale plans, and instructing inquirers in the manner of their proceeding to have allotments put up for sale.

The plan of the town of Maitland remained with me until about 1853, when arrangements were made for selling lands in country districts, and I was instructed to send down the Government sale plan to have it made up by marking off the allotments sold, subdividing some of the blocks, &c. I did so, and a perfected copy was returned, and by which under authority of the Government I sold upwards of one hundred allotments. On this plan also (which was I believe a transcript of that dated 1829) the back section was not divided with streets or into blocks, but was marked "Reserve for pasturage for Maitland." I ceased to act as clerk of the bench in 1854 or 1855, but I know the same plan was exhibited by my successor, and a large number of sales effected by it.

Besides this plan published in 1829 and republished in 1853, there will be found one printed by authority of the Legislative Assembly in 1854, which shews the township reserve for pasturage, as does also the county map, published by the Government about 1838; indeed, I believe all Government maps and plans of the locality up to 1858 will be found to describe the reserve as a reserve for pasturage and for no other purpose.

I have lived upwards of nineteen years at Maitland, during which time the inhabitants have had uninterrupted use of the reserve for pasturage, and, I am of opinion, there being such a reserve has enhanced the value of the allotments sold by Government, and has been the cause of many persons purchasing.

I have purchased twelve allotments at the Government sales, and the plans exhibited at the several auctions at which I bought shewed the reserve to be a reserve for pasturage for Maitland. I believe it was not until the present year 1860 that I ever saw a plan shewing that reserve to be diverted from the use to which it had been heretofore dedicated; the plan I allude to is the one dated November, 1859, by which it would appear that the pasturage reserve is to be sold in allotments, and otherwise appropriated.

I believe the inhabitants of Maitland feel that this appropriation would be very injurious to them: The late Municipality Act vests commonages, &c., in the Local Corporation, and I know it was the intention of the inhabitants to have formed such a body if the Government would have left with them this commonage according to the town plan. The inhabitants at their public meeting admitted the right of Government to deal as they pleased with the numerous blocks in the township plan marked with the letter B, or with the word "Reserve," or in any other manner set apart for no stated special purpose, but they consider that those marked on the sale plan as reserved for a stated special purpose such as "Reserve for recreation ground," "Reserve for pasturage," &c., are thereby dedicated to those purposes, and ought not now to be sold.

APPENDIX B.

I must ask the Committee to allow me to cut out this portion of my evidence; for, on reference to the Acts of Council, I find that the 6 Geo. 4, 21, which prohibited burials within a mile of the township was repealed by 19 Vic., No. 30, passed 30 Nov., 1855. There might be evidence procurable to the effect that the plan dated 1855, laying out the cemeteries, was made before the 19 Vic., was passed; and that, therefore, the reserve was parcelled out for purposes then illegal; but I do not see that the main question would be much affected thereby.—J. C.

John

MINUTES OF EVIDENCE TAKEN BEFORE THE

John Kingsmill, Esq., called in and examined:—

- J. Kingsmill, Esq.
18 April, 1860.
98. *By the Chairman*: How long have you been resident at Maitland? Since 1832.
99. Have you ever purchased any allotments in Maitland? I have; I purchased two, I think, in 1834.
100. On the plans shewn you when purchasing, were there any reserves mentioned? My impression is that there were. There was a pasturage reserve to the eastward of the town, and it was my early impression, and it has been the same since, that those reserves were for the pasturage of the town, as a common; and they have been used so ever since.
101. Do you know the extent of the reserves? I could not take it on me to say anything about the extent; but I know it has been treated with the greatest liberty by the townspeople since, in putting their cows and horses on it, and taking timber off it, and so on.
102. You consider these reserves as valuable to the town? Most undoubtedly. I have received some advantage myself by putting my horses and cows there.
103. You would consider it an inconvenience if it were appropriated to any other purpose? Yes, because I always looked upon it as an appendage to the town. I must say I, as one of the old residents, felt very jealous of any encroachment being made upon it.
104. At the time you purchased allotments, did you consider that the extensive reserves gave an enhanced value to those allotments? Most unquestionably.
105. Are you aware of any interference having taken place with these reserves since you purchased? Recently I heard it spoken of that there was a change on the map, some new map that had been made, where it was called reserve for town extension; I never heard of anything like that before, until that map.
106. That was in 1859? Yes, about 1859. My impression is, but I cannot positively state, that the map I purchased from had written on it "pasturage reserve," but no "town extension," or any other name, on that section.
107. You have always regarded these pasturage reserves as being permanent, and set aside for that special purpose? Most undoubtedly; just the same as any reserve—just the same as the Curragh of Kildare, or any reserves of that kind at Home.
108. You are a very old resident—did you ever know any of these reserves made use of for any other purpose than as a reserve for pasturage? No. Sheep have been driven out there when they come down from the country for slaughter, and are to this day.
109. Did you ever know any attempt made to put a stop to the feeding of cattle or other stock there? No.
110. Have you ever heard of the magistrates warning people about allowing their cattle to stray about the town and telling them at the same time to take them to the common? Yes. I have known the magistrates to fine people for allowing their horses or cattle to run at large in the town. When they complained that their horses were impounded, they were told there was a commonage for them, and why not take them there. I often see men driving their horses in dozens there on Sunday mornings, after their week's work, for safety and for rest.
111. *By Mr. Faucett*: I suppose that reserve is not enclosed? It is nearly enclosed now. The railway encloses it on one side, and Mr. Close's fence on the other.
112. You spoke of people taking away timber? I mean that they could go with impunity and cut as much timber as they liked, whereas if they did so on private property they would be prevented—firewood, saplings for building sheds, and so on.
113. I suppose that would rather improve the pasturage than otherwise? Yes.
114. *By the Chairman*: Having bought allotments under the impression that this was to be a permanent reserve, would you consider it a breach of faith on the part of the Government if it were devoted to any other purpose, and that it would be an injury to the inhabitants and freeholders of the town? Yes.
115. All the inhabitants have equal rights to obtain firewood or any advantage it offers? Yes, all in common.

Alexander Dodds, Esq., called in and examined.

- A. Dodds, Esq.
18 April, 1860.
116. *By the Chairman*: You are an auctioneer at Maitland? Yes.
117. How many years have you been there? I came to Maitland in 1834.
118. You are in the habit of selling land? Very extensively.
119. If lands are sold under certain conditions—advantages being offered as an inducement why parties should become purchasers—you would consider yourself, as an auctioneer, bound to see them carried out? I should say it would be an act of injustice to deprive purchasers of their just rights, obtained under the exhibition of a plan where there were reserves marked out.
120. Have you ever purchased any land at Maitland? Yes, in 1836 and 1837 I bought town allotments at Maitland.
121. You saw the plan? Yes, dated in 1829.
122. The Government plan? Yes.
123. Were there any reserves shewn on that plan? Yes, the exact words on the plan of 1829 were "reserve for pasturage for Maitland." I was influenced in some measure by that to purchase.
124. You regard these reserves as being valuable to Maitland? Yes, I do; in fact, if they were taken away, it would depreciate the value of property to a very considerable extent in the town, for the reason that the Towns Police Act is very stringently enforced, and parties have not the means of running a single beast unless they have recourse to this reserve.
125. Are these reserves used for any purpose for the accommodation of the inhabitants?
No;

MINUTES OF EVIDENCE TAKEN BEFORE THE

- A. G. McLean, Esq.
2 May, 1860.
- of that Minute? No means of saying positively. I do not think there is any official record. It would depend on the memory of individuals. Probably the memory of Mr. Thompson, the late Deputy Surveyor General, would be conclusive. I know in whose handwriting the words on the map—"Reserve for Pasturage for Maitland"—are.
152. Whose is it? It is the handwriting of Mr. Ryan, who is now dead.
153. Since 1849? About 1853, I think, he died.
154. *By the Chairman*: Do you know how the Pitt Town Reserve has been vested? It has been vested in certain trustees.
155. And the Field of Mars Common? The present grant of the Field of Mars Common was executed on the 10th November, 1849; but the original grant by Governor King was issued 4th August, 1804.
156. Where is the Field of Mars? Close to Parramatta.
157. *By Mr. Faucett*: That is a pasturage reserve? It is called the Field of Mars Common.
158. Is it for the use of the people of Parramatta? No; for a certain district in the County of Cumberland—Ryde and Hunter's Hill, and part of the Field of Mars Parish, I think.
159. It is now granted to trustees? Yes.
160. *By the Chairman*: Was there any circumstance connected with the granting of that common different from the circumstances connected with the reserve for pasturage for Maitland? Yes; this was actually granted in the year 1804, by Governor King, as a commonage for the owners of land in a certain district, which district was defined in the grant by a sketch. I am not aware how the original grant became void, but I think the trustees died out, and it was necessary to issue a fresh grant to new trustees, and under some different provision for filling up vacancies.
161. *By Mr. Faucett*: There have been several other places where reserves of this kind have been granted to trustees? There have been several in the County of Cumberland; one in the County of Cook, in the Kurrajong; and one in Northumberland, a place called Wollombine Common.
162. Do you recollect how the Goulburn Reserve is situated? The Goulburn Pasturage Reserve is similar in character to the Maitland Reserve, excepting that the boundaries are more clearly defined on the Goulburn town plan.
163. *By Mr. Close*: What is the extent of the reserve at the Field of Mars? 6,235 acres; Pitt Town and Mulgrave Place, 8,875 acres; Wollombine Common, 2,565 acres.
164. *By the Chairman*: These have all been granted to trustees and are now held by them? Yes.
165. *By Mr. Faucett*: The Goulburn Reserve is in the same state as the Maitland Reserve, not granted to trustees? Yes.
166. There is also a reserve at Yass? Yes.
167. Is that granted to trustees? No.
168. Is there not a reserve at Burrowa? For pasturage and extension, not specially for pasturage.
169. *By the Chairman*: The Goulburn and Yass Reserves are both for pasturage? I think they are both marked for pasturage only. I was under the impression that in that Minute, or rather the letter enclosing it, there would be some memorandum directing that these commons should be noted on the maps, but it appears that there is no such memorandum.

George Boyle White, Esq., called in and examined:—

- G. B. White, Esq.
2 May, 1860.
170. *By the Chairman*: You are a surveyor? I am.
171. How long have you acted in that capacity? Since the year 1826.
172. You know the town of Maitland? I do.
173. Did you lay it out? I did. I have the instructions here, dated in 1829. (*Vide Appendix A.*)
174. Under those instructions you laid out the town? In the first instance, I was ordered by Sir Thomas Mitchell to sketch the ground; I sketched the ground, and sent the sketch to him; he then laid out the town to suit the features; it was approved and signed by the Governor, and then sent back to me. I do not see that plan here, but when I left the service I returned it into the hands of the Government. It was bound round with pink ribbon; I should know it if I saw it. The first plan was the plan I speak of.
175. Do you think this is the plan (M 583 b)? It is a copy of it. The plan sent to me was for the use of the district; and it had both the signatures of the Governor and Sir Thomas Mitchell.
176. On that plan were there any reserves apportioned to the town? There were, and laid out.
177. Do they appear on that plan? The reserve for the gaol and court-house is here, the reserve for a Catholic chapel, the reserve for the proposed Church, and the reserve for the cattle market.
178. Is there any reserve for pasturage? That was a subsequent matter. There was an addition of a section.
179. Will you look at the other plan (marked M 583 d)? This does not shew it all. There was an addition of a section and a quarter, or, I think, 30 chains.
180. Did you lay out the reserves as shewn on that plan? I did.
181. In what year was that? I think it was in the year 1833.
182. *By Mr. Faucett*: Will you try to be as nearly accurate as you can, because this is an important point? I can tell you distinctly by reference to a document—the boundary lines of the town of Maitland, as proclaimed; then these portions were added to the plans of Maitland,

Maitland, I think it was in the year 1833; but it is in the *Government Gazette*, proclaimed as a township. I brought down the letter authorizing the marking of the boundaries of the town, but I have mislaid it somewhere; and in doing that the town was extended, and a section and this piece of a section were then added to the town. G. B. White,
Esq.
2 May, 1860.

183. Was that added as a reserve? Yes; I think there must have been 800 or 900 acres.

184. That, you say, was about the year 1833? Yes.

185. Clearly before 1840? Clearly before 1840. Mr. Day was police magistrate of Maitland, and he went round the boundaries with me, and the chief constable and the constables of the town were also instructed to do so; and for two or three years after, on every Easter Monday, we went round these boundaries.

186. *By Mr. Close*: I think you are wrong—Mr. Day was not police magistrate in 1833? It was before Mr. Grant's time, for Mr. Grant discontinued perambulating the boundaries.

187. *By Mr. Faucett*: Some police magistrate went round the boundaries with you? Yes.

188. *By the Chairman*: You are quite sure it was about 1833? Yes.

189. The reserves were then allotted as now shewn on that map as pasture reserves? Yes, but this map (M 583 b) would not shew it.

190. *By Mr. Faucett*: This will shew it (M 583 f)? This shews the reserved land.

191. That is the land you laid out in 1833? Yes, that is the land I laid out in 1833 and added to the township.

192. *By the Chairman*: As a pasture reserve? As a pasture reserve.

193. Can you say if these reserves were intended as permanent reserves for pasturage? They were.

194. And they have been always regarded in that light since they were laid out? Always, and they were included in the boundaries perambulated.

195. *By Mr. Faucett*: In perambulating the boundaries of the town you went round the boundaries of that reserve? Yes.

196. That is to say, you perambulated a space including this 800 acre reserve? Yes. To bring it more distinctly before the Government, I may say that there were stones cut for every angle here, and they laid in the quarry at Maitland for 15 or 20 years. They were to have been put up by Mr. Grant, but they never were put up. I think some of them are to be found there yet.

197. *By the Chairman*: From that time are you aware whether these reserves have been entirely devoted for pasturage purposes? I always imagined so.

198. *By Mr. Close*: They were always devoted for pasturage purposes before you measured them? Yes.

199. And generally looked upon as a reserve for that purpose? Yes.

200. *By Mr. Faucett*: You understood from your instructions that they were intended to be permanent reserves—not that they were intended for town extension? Yes, decidedly.

201. *By the Chairman*: Do you consider them valuable to the township? Yes, very valuable to the township.

202. And a great public convenience? Yes, very great.

203. Are you aware whether the land within the boundaries of the township has been all sold? No, I am not. I have had nothing to do with the township or that portion of the country since 1847.

204. *By Mr. Faucett*: Then anything that was done with reference to this reserve was clearly done, at all events, before 1847? Yes. I was withdrawn from the district in 1847, and sent to extend the boundaries of the Colony.

205. Then the reserve that you have spoken of as laid out by you could not have been laid out under a Minute dated in the year 1849? Certainly not. I left the district in 1847, and had instructions to carry on the survey of the interior country for squatting purposes; and from that date I have never been employed in what we called the old Colony.

206. You have no doubt that you understood the reserve was to be a permanent reserve? Yes, and it will be seen noted in the *Government Gazette*. I could walk round the reserves now as marked out by me originally; I laid out the town in 1829, and I had everything to do with it till 1847.

207. *By the Chairman*: And these pasture reserves were laid out before that time? Yes; I think I laid it out in 1833.

208. I think you have spoken positively as to this reserve being specially for pasturage purposes? For the general benefit of the town, that was what I understood.

209. *By Mr. Close*: You succeeded Mr. Dangar as surveyor for that district? Yes. The map they must have in the office has Sir Thomas Mitchell's signature, and has the reserve marked upon it; it is bound with purple ribbon, and backed with linen.

APPENDIX A.

EXTRACT from Surveyor General's letter to Mr. Assistant Surveyor White, dated 12th March, 1829.

"5. The subject to which I have now to call your immediate attention is the direction of the principal streets of the Township of Maitland as laid down on the enclosed plan. The principal Superintendent of Roads and Bridges will give orders to the road parties to open out these streets by cutting the timber. You will, therefore, lay them out exactly according to the plan enclosed, and point them out to the Assistant Surveyor of Roads, and particularly the situation of the Church and School, which has been selected by the Archdeacon. It will contain an acre, round the outside of which it will be necessary to clear to the breadth of a street, which should be preserved of the given uniform breadth of one chain and twenty links, which is that also of the streets."

SELECT COMMITTEE ON MAITLAND PASTURAGE RESERVE.

James Thomson, Esq., called in and examined:—

- J. Thomson, Esq.
 2 May, 1860.
210. *By the Chairman*: You are the Commissioner for the sale of land in Maitland? Yes.
211. How long have you held that office? For about twelve years. I was the first appointed Commissioner.
212. Can you state the year? I am not certain as to the year, but I have been in the service of the Government seventeen or eighteen years, of which time I have been twelve or thirteen years Commissioner at Maitland.
213. You have sold allotments in the town of Maitland? Yes.
214. Do you recognise the plan now before you (M 583 f) as the plan of the town of Maitland? Yes.
215. Is that the plan by which you have sold allotments? There is an earlier plan than this. I commenced the first sale of town allotments in Maitland on the 29th August, 1853.
216. Is this (M 583 d) a copy of the plan by which you have sold allotments? Yes. But I may state that in selling these allotments they were sold from tracings, with reference to a plan. This is the original tracing of the first land sold by me in Maitland. (*The witness handed in a tracing.*)
217. Any purchasers would of course refer to the plan? Yes.
218. You notice that there are reserves marked on that plan? Yes.
219. There is a reserve marked for pasturage? Yes, "Reserve for Pasturage for Maitland."
220. Have you regarded that reserve as being a permanent reserve? I always considered it such.
221. And allotments have been sold on the faith that it was a permanent reserve? On the strength that this was a permanent reserve for pasturage purposes.
222. Are these reserves valuable to the town of Maitland? I should say so, very materially.
223. Would they form an element in the value of the allotments? I think it would deteriorate the value of the allotments very materially if this was to be taken entirely away.
224. If cut up for town allotments or appropriated for any other purpose? Yes, I think so.
225. Have you purchased any allotments in Maitland yourself? I have.
226. How long ago? Twelve years ago, I think.
227. As a purchaser you would consider the value of the allotments enhanced by these extensive pasturage reserves? Very much so.
228. And as a purchaser you regarded them as being permanent reserves, in the manner laid out in the plan? No doubt of it.
229. That appears to have been the general understanding among purchasers? It is always considered a great benefit to the town.
230. But it has been always considered by purchasers that these were permanent reserves? Yes, they have always been regarded as such.
231. As a Government officer, in selling these allotments, did you do anything to lead people to suppose they were permanent? I do not think there was ever any such demand asked of me.
232. The question was not raised, in fact? The plan was exhibited, and they might see for themselves.
233. *By Mr. Close*: Did anybody ever ask you any question regarding these reserves? No.
234. *By the Chairman*: In what way do you regard these reserves as valuable to Maitland? For pasturage. I remember Mr. Chambers always alluding for many years to obtaining them for the purpose of fencing them in, and making a return to the town.
235. *By Mr. Faucett*: You had no instructions, I suppose, from the Government, to state to purchasers that these were not permanent reserves? Never.
236. Had you any instructions to state anything at all about them? Nothing.

1859-60.

Legislative Assembly.
NEW SOUTH WALES.

CHURCH AND SCHOOL LANDS.
(DISTRICT OF BRAIDWOOD.)

Ordered by the Legislative Assembly to be Printed, 3 April, 1860.

RETURN to an Address of the Honorable the Legislative Assembly of New South Wales, dated 23 September, 1859, praying that His Excellency the Governor General would be pleased to cause to be laid upon the Table of this House,—

“ A Copy of any Petition received by the Government regarding
“ the so-called Church and School Lands in the District of
“ Braidwood; also, a Copy of any Correspondence that has
“ passed between the Braidwood Bench of Magistrates, the
“ Gold Fields Commissioner, or any other parties and the
“ Government concerning said lands.”

(Mr. Wilson.)

SCHEDULE.

NO.	PAGE.
1. W. C. Fell, Esquire, to J. Husband, Esquire, enclosing (for transmission to Secretary for Lands and Public Works) two Petitions from Residents and Gold Diggers, Braidwood and Jembaicumbene Swamp, with respect to Church and School Lands under lease to W. J. Roberts and others (2 enclosures). 22 March, 1859	2
2. Assistant Gold Commissioner Griffin to Secretary for Lands and Public Works, on same subject. 26 March, 1859.....	5
3. Under Secretary for Lands and Public Works, in reply. 30 April, 1859	5
4. Same to Mr. Fell, with reference to his letter of 22nd March. 30 April, 1859	6
5. Assistant Gold Commissioner Griffin to Secretary for Lands and Public Works, furnishing further report on the matter. 10 June, 1859	6
6. Under Secretary to Assistant Commissioner Griffin, requesting him to furnish description of the land proposed to be resumed by the Government. 27 July, 1859.....	7
7. Assistant Commissioner Griffin, in reply (with enclosure). 22 August, 1859.....	7
8. Description (as furnished by Acting Surveyor General) of land alluded to	8
9. Under Secretary for Lands to Mr. Oloete (Commissioner in charge of the Southern Gold Districts), notifying intention of Government to withdraw this land from lease, &c. 18 January, 1860	8
10. Same to Agent for Church and School Estates, on the same subject. 18 January, 1860..	9
11. Notice in <i>Government Gazette</i> of withdrawal. 19 January, 1860.....	9

CHURCH AND SCHOOL LANDS, BRAIDWOOD.

No. 1.

W. C. FELL, Esq., to JAMES HUSBAND, Esq.

Braidwood, 22 March, 1859.

DIGGERS' PETITION.

DEAR SIR,

I enclose two Petitions, one from the Diggers resident upon and in the neighborhood of the Jembaicumbene Swamp, and the other from the inhabitants of Braidwood. Both Petitions are worded nearly alike, and both have the same object in view, namely, to get the Church and School Estates (now belonging to the Government) thrown open for digging purposes, or, in other words, to settle the now existing dispute between the diggers and the lessees of these lands. Taking the terms of the leases, the effect of a miner's right, the proclamation as to gold (I think in 1852), and the 20th Vic., No. 29, sec. 10, in connection, the diggers have (to say the least of it) a *colorable* title to dig upon the lands. By referring to the enclosed newspaper, the *Braidwood Dispatch*, you will see that Mr. Roberts (one of the lessees) failed in his cases for *malicious* trespass; and I submit that, even had the summons been taken out under the 9th section of the 20th Viet., No. 29, the Bench would have had no jurisdiction in the matter, as they would have had to decide upon a *right* to the usufruct of land. You will also perceive, from the leading article in the above paper, and from the account of the demonstration made by the diggers, that the point at issue is of vital importance to all parties.

I would also draw your attention to the signatures of the Inhabitants' Petition, to which you will find appended the signatures of all classes, including the *clergy* of all denominations.

Notwithstanding my urgent advice to the diggers in the first instance, and the reiteration of that advice publicly in Court after the dismissal of the cases for trespass, no less than forty claims are now opened on Mr. Roberts's land, simply because the Jembaicumbene Government Reserve is worked out, and the diggers must live.

A good many of the parties signing the Petition are marksmen, and their signatures are attested by Mr. Lewis; I am well acquainted with Mr. Lewis, and know his handwriting, and, if necessary, I will get a declaration from him as to the genuineness of the signatures made by mark only.

I now leave to you to forward these Petitions to the proper quarter, through such hands and in such way as you may think fit, and particularly request your own personal attention to the matter.

Please to forward to me without delay any communication you may receive from the Government.

As this letter alludes to several matters of importance not mentioned in the Petitions, perhaps it (or a copy of it) had better accompany the Petitions.

I remain, &c.,

W. C. FELL.

[Enclosure

[Enclosure in No. 1.]

To His Excellency Sir William Thomas Denison, Knight Commander of the Most Honorable Order of the Bath, Governor General in and over all Her Majesty's Colonies of New South Wales, Victoria, South Australia, and Western Australia, and Captain General and Governor-in-Chief of the Territory of New South Wales and its dependencies, and Vice-Admiral of the same, &c.

The humble Petition of the undersigned,—

SHEWETH:—

That your Petitioners are inhabitants of the district of Braidwood.

That upon the various diggings in the said district of Braidwood, namely, Upper and Lower Araluen, Little River, Major's Creek, Long Flat, Bell's Creek, Bell's Paddock, and Jembaicumbene Swamp, there is a population of about three thousand or four thousand diggers.

That in the said district of Braidwood there is no trade or manufacture, and owing to its distance from Sydney, the great expense of carriage, and from various other causes, a very small quantity of grain was until recently grown in such district, and the price of land and of sheep and cattle was very low; but that since the opening of the above-named diggings agricultural farming has greatly increased, the price of land (particularly town allotments in Braidwood) has risen several hundreds per cent., and the price of cattle and sheep and other stock has also risen, owing to the consequent influx of a large digging population; and such population has been the cause of bringing into this district a very considerable number of storekeepers, innkeepers, and tradesmen, all of whom are now wholly dependent, either directly or indirectly, upon the success of the diggers, and that any circumstances, therefore, tending seriously to injure the diggers and to drive them from the district would inevitably ruin at least nine-tenths of the inhabitants.

That the Araluen diggings, nearly the whole of which are taken up and worked by small companies, are fit only for strong parties possessed of a good amount of capital, the whole of the work being carried on there by deep sinking, stripping, and sluicing; whereas most of the other places above enumerated are what is termed "dry diggings," the work being carried on principally by shallow sinking, surfacing, and puddling, and the greater part of the latter diggings are now nearly worked out.

That of all the above-mentioned places the easiest to work and the best payable gold field is upon the Government Reserve at Jembaicumbene, and was the only spot available for the numerous diggers sent up to this district by the Sydney Diggers Relief Fund, and there is now a population of upwards of six hundred diggers on such Government Reserve, but the same will be entirely worked out in a few weeks.

That anticipating the failure of the last-named Gold Field, several parties prospected the adjoining land, which land forms part of the Church and School Estates, and found an excellent prospect; but owing to such land being under lease, they were unable to work to advantage, and the lessees themselves felt doubtful how to act in the matter.

That by the terms of the leases of the Church and School Estates the Government reserve to themselves all mines of gold and silver, &c., with liberty to enter and dig for the same, and also power to resume all lands required for any public purpose, upon giving such compensation to the lessees as shall be settled by arbitration in the manner mentioned in such leases.

That there is a very small portion of available Government land in this district, with the exception of the Church and School Estates, which comprise three large parishes, containing altogether no less than forty-two thousand four hundred and sixty acres, and the whole of these lands are now under lease; and from the prospects obtained in many parts, at a considerable distance from each other, are believed to be highly auriferous.

That all the land available for digging purposes for some distance around the Church and School Lands is for the most part private property, and, therefore, inaccessible for digging purposes, except through leave of the owners, and upon payment of a royalty or rent; if, therefore, the Church and School Lands are not at once thrown open for digging purposes it will be a great loss, if not ruin, to the district of Braidwood, as the diggers will be necessarily compelled to abandon the district, whereas if these lands are made available for digging purposes there is every prospect of the district increasing in prosperity, besides a much better revenue will be derived by the Government from the production of Gold than is now derived from the rent of the land in question.

Your Petitioners, therefore, humbly pray your Excellency, that you will be pleased to take such steps as may be necessary for the purpose of throwing open the Church and School Estates in the district of Braidwood for the purpose of gold digging. And that your Excellency will be pleased to consider the prayer of this Petition at as early a period as possible, as the subject matter thereof is of vital importance to your Petitioners.

And that you will grant such further and other relief in the premises as to your Excellency shall seem fit.

And your Petitioners will ever pray.

Signed by—

JOHN COULMAN,
and 106 other Petitioners. }

[Enclosure 2 in No. 1.]

To His Excellency Sir William Thomas Denison, Knight Commander of the Most Honorable Order of the Bath, Governor General in and over all Her Majesty's Colonies of New South Wales, Tasmania, Victoria, South Australia, and Western Australia, and Captain General and Governor-in-Chief of the Territory of New South Wales and its dependencies, and Vice-Admiral of the same, &c.

The humble Petition of the undersigned,—

SH EWETH :—

That your Petitioners are gold diggers, holding miners' rights.

That your Petitioners have for some time past been working at the various diggings in the said district of Braidwood, in the Colony of New South Wales.

That upon the various diggings in the said district of Braidwood, namely, Upper and Lower Araluen, Little River, Major's Creek, Long Flat, Bell's Creek, Bell's Paddock, and Jembaicumbene Swamp, there is a population of about three thousand or four thousand diggers.

That in the said district of Braidwood there is no trade or manufacture, and owing to its distance from Sydney, the great expense of carriage, and from other various causes, a very small quantity of grain was until recently grown in such district, and the price of land and of sheep and cattle was very low; but that since the opening of the above-named diggings agricultural farming has greatly increased, the price of land (particularly town allotments in Braidwood) has risen several hundreds per cent., and the price of cattle and sheep and other stock has also risen, owing to the consequent influx of a large digging population; and such population has been the cause of bringing into this district a very considerable number of storckeeper, innkeeper, and tradesmen, all of whom are now wholly dependent, either directly or indirectly, upon the success of the diggings, and that any circumstances, therefore, tending seriously to injure the diggers and drive them from the district would inevitably ruin at least nine-tenths of the inhabitants.

That the Araluen diggings (the whole of which are taken up and worked by small companies) are fit only for strong parties possessed of a good amount of capital, the whole of the work being carried on there by deep sinking, stripping, and sluicing; whereas most of the other places above enumerated are what is termed "dry diggings," the work being carried on principally by shallow sinking, surfacing, and puddling, and the greater part of the latter diggings are now nearly worked out.

Appendix A.

That of all the above-mentioned places the easiest to work and the best payable gold field is upon the Government Reserve at Jembaicumbene, marked A in the plan hereto annexed, and was the only spot available for the numerous diggers sent up to this district by the Sydney Diggers Relief Fund; and there is now a population of upwards of six hundred diggers on such Government Reserve, but the same will be entirely worked out in a few weeks.

That, antieipating the failure of the last-named gold field, several parties prospected the adjoining land, which land forms part of the Church and School Estates, and found excellent prospects; but were prohibited from working them by the lessees of those lands, although several parties have been working there for some time past with the consent of some of the lessees, and on payment to them of a monthly rent of £1 per man.

That by the terms of the leases of the Church and School Estates, the Government reserve to themselves all mines of gold, silver, &c., with liberty to enter and dig for the same, and also power to resume all lands required for any public purpose, upon giving such compensation to the lessees as shall be settled by arbitration, in the manner mentioned in such leases. It is therefore submitted, that the lessees allowing the gold reserved as the property of the Government to be carried away, and receiving compensation for breaking the soil of their leasehold land, was in direct contravention of the terms of their leases. That nearly the whole of the Church and School Lands are used by the lessees thereof for the purpose of grazing only, and your Petitioners submit that the lessees would be entitled, under any circumstances, to a very small compensation, as their cattle could for many years continue to graze upon the greater part of the said lands, notwithstanding the gold digging operations. Your Petitioners also beg to draw your Excellency's attention to the leases, and submit that it is questionable whether, by the terms thereof, the lessees are entitled to any compensation in case of the soil being broken for the mere purpose of obtaining minerals. That there is very small portion of Government land in this district, with the exception of the Church and School Estates, which comprise three large parishes, containing altogether no less than forty-two thousand four hundred and sixty acres, as appears by the tracing hereto annexed, and the whole of these lands are now under lease, and from the prospects obtained in many parts, at a considerable distance from each other, are believed to be highly auriferous.

Appendix A.

That all the land available for digging purposes for some distance round the Church and School Lands is for the most part private property, and, therefore, inaccessible for digging purposes, except through leave of the owners, which is often refused, and, if granted, is granted upon payment of a royalty or rent; in addition to which the works can be stopped at any moment at the will of the owner of the property. If, therefore, the Church and School Lands are not at once thrown open for digging purposes, it will be a great loss, if not ruin, to the district of Braidwood, as your Petitioners will necessarily be compelled to abandon the district; whereas, if these lands are made available for digging purposes, there is every prospect of your Petitioners being able from the extent and nature of the land, not only to continue to maintain themselves, but to realise an independence; in addition to which the unemployed

CHURCH AND SCHOOL LANDS, BRAIDWOOD.

5

unemployed population of Sydney to the extent of many hundreds will meet with abundance of profitable employment.

Your Petitioners, therefore, humbly pray your Excellency, that you will be pleased to take such steps as may be necessary for the purpose of throwing open the Church and School Estates in the district of Braidwood for the purpose of gold digging, and that your Excellency will be pleased to consider the prayer of this Petition at as early a period as possible, as the subject matter thereof is of vital importance to your Petitioners, and that you will grant such further and other relief in the premises as to your Excellency shall seem fit.

And your Petitioners will ever pray, &c.

[Signed by 234 Petitioners.]

No. 2.

ASSISTANT GOLD COMMISSIONER to SECRETARY FOR LANDS AND PUBLIC WORKS.

Braidwood, 26 March, 1859.

SIR,

I have the honor to call your attention to the following matter.

2. It seems that, in 1850, a lease of certain lands in this neighborhood, known as Church and School Lands, was granted to a Mr. Roberts for *grazing* purposes, a right to *all minerals* being reserved.

3. Mr. Roberts some months ago threw open a portion of land to the public for gold digging—a license fee of £1 per month being paid to his agent by all persons mining on that portion.

4. Very lately, gold in paying quantities having been discovered in an *enclosed* piece of this leased land, the diggers have commenced operations against Mr. Roberts's wish—the result being the police case reported in the newspaper I forward herewith.

5. It is stated that some notion is entertained of laying the information under a different Act—the recent Gold Fields' Act—as mining on *private* land without the owner's consent, and so bringing the case on again. I should, therefore, like some information as to whether Church and School Lands are to be considered Crown Lands or not—the lease being as yet uncanceled.

I have, &c.,

J. H. GRIFFIN,

A. G. C.

No. 3.

UNDER SECRETARY FOR LANDS AND PUBLIC WORKS to ASSISTANT GOLD COMMISSIONER.

Department of Lands and Public Works,
Sydney, 30 April, 1859.

SIR,

Referring to your letter of the 26th ultimo, in which you represent that Mr. William Roberts, the lessee of certain Church and School Lands in the vicinity of Braidwood, has refused the diggers permission to work upon portions of his land, and request, therefore, instructions in the matter,—I am directed to inform you that two Petitions having been received through Mr. W. C. Fell, solicitor at Braidwood—one from the diggers in the vicinity of the Jembaicumbene Swamp, and the other from certain of the inhabitants of Braidwood, praying that such lands may be thrown open for digging purposes—the Secretary for Lands and Public Works is desirous of having from you a *full* report as to the richness, &c., and other advantages that these lands possess.

2. This information I am desired to state is necessary to enable the Government rightly to determine whether or not such a case is made out as would justify an application to Parliament to make provision for the compensation which it appears, from an opinion given by the Crown Law Officers in 1852, it would be necessary to award to the lessee on the resumption of the land by the Government.

I have, &c.,

MICL. FITZPATRICK.

No. 4.

No. 4.

UNDER SECRETARY FOR LANDS AND PUBLIC WORKS to W. C. FELL, Esq.

*Department of Lands and Public Works,
Sydney, 30 April, 1859.*

SIR,

With reference to the letter addressed by you to James Husband, Esq., for transmission to this office, of date the 22nd ultimo, and with which were forwarded two Petitions, one from certain diggers resident in the vicinity of the Jembaicumbene Swamp, and the other from the inhabitants of Braidwood, praying that the Church and School Lands, at present under lease to private parties, may be thrown open for gold digging purposes,—I am instructed by the Secretary for Lands and Public Works to inform you, that from an opinion given by the Crown Law Officers on the subject in 1852, it appears that the only way in which Church and School Lands that are already leased can be thrown open to the operations of the diggers is by the Government resuming such of those lands as may be required, and that such resumption can only be enforced on payment of compensation.

2. As, however, means of compensation can of course only be obtained by a vote of Parliament, I am directed to state that Mr. Secretary Robertson has considered it desirable to refer the matter to the Assistant Gold Commissioner at Araluen, Mr. Griffin, in order that he may report fully as to the richness, and other advantages, that these lands possess, so as to enable the Government rightly to determine whether or not such a case is made out as to justify an application to Parliament for the necessary provision.

I have, &c.,

MICL. FITZPATRICK.

No. 5.

ASSISTANT GOLD COMMISSIONER to SECRETARY FOR LANDS AND PUBLIC WORKS.

Braidwood, 10 June, 1859.

SIR,

In accordance with the instructions conveyed in your letter of the 30th April last, requesting a Report on the Church and School Estates in this neighborhood, I have the honor to forward a statement of the grazing, agricultural, and mineral advantages which these lands in my opinion possess.

2. This fine tract of country in the County of St. Vincent, known as the Church and School Estates, adjoins and is bounded on the east by the town of Braidwood, on the south by the Jembaicumbene Creek, and on the north and west by the Shoalhaven River. The block of land encircled by these boundaries, containing more than 43,000 acres, comprises three parishes, being, with the exception of some small portions or patches here and there, in point of grazing and agricultural capabilities, second to no other portion of the Braidwood District.

3. It appears to me, after as careful an inspection as the various calls on my time admitted, that the greatest quantity of good grazing and agricultural land in this Estate lies between the Durran Durra Creek and Mount Solos or Gillimatong, chiefly in the parish of Percy; with some excellent patches between the Gillimatong and Jembaicumbene Creeks, in the parish of Boyle; as well as the "Warri" and other good alluvial flats, in the parish marked Bruce.

4. A rough estimate—arrived at partly from personal inspection, and partly from the suggestion of competent agriculturists—leads me to the conclusion that at least 35,000 acres of this estate are excellent grazing land, including fully 15,000 acres fit for the plough; leaving some 8,000 acres more or less occupied by scrub, or covered with soil so shallow and intersected with rocks, as to be ill adapted for either agriculture or grazing.

5. If one may judge of the mineral riches of these lands from their geological formation, as compared with Major's Creek, Long Flat, and the Bell's Paddock diggings, gold would appear to be more or less distributed over the whole block—indeed, digging operations are being successfully carried on along and near the banks of the Jembaicumbene Creek; from the village reserve which adjoins the sections marked on the map "John
"Coghill,"

"Coghill," to near the junction of the stream with the Shoalhaven River, and in many of the smaller watercourses passing through the land, especially in the bed of the Gillimatong Creek, which passes through the town of Braidwood, "prospects" proving the existence of gold have been obtained.

6. The digging operations alluded to above, on the Jembaicumbene Creek, have given rise to proceedings in the Braidwood Police Office, between Mr. Roberts, the lessee, and the persons digging (mentioned in my letter of the 26th March last.) Presuming, therefore, that the question of compensation to the lessee, as to the amount of damages sustained, will be gone into by arbitration on the spot, I think it needless in this Report to more than suggest that the Resident Gold Commissioner for the time being be empowered, on the occurrence of any sudden emergency caused by the discovery of a paying gold field on any portion of these lands, to call on the local surveyor to measure and estimate, as nearly as possible, the number of acres required for gold digging purposes, so that leases might be *partially* instead of *wholly* cancelled, as cases might arise where gold mining would not materially interfere with land leased for grazing; and it seems to me that the mining interest might be promoted without in any way being antagonistic to that of the grazier.

7. The whole of this Estate is held, more or less, under grazing leases, either in blocks of open or enclosed forest land. Most of the buildings and other similar erections are of an inexpensive kind. The fencing, however, of many of the enclosures under lease seems to have been put up well and substantially, and at considerable cost, either by the lessees or their tenants—persons to whom portions of these lands have been sub-let for agricultural and other purposes.

8. In conclusion, I may remark that these lands, situate, as they are, close to the town of Braidwood, and in the centre of its gold fields—well-watered, luxuriantly grassed, abounding in good land, covered with timber available for building, fencing, and other farming purposes, would, even in the absence of paying deposits of gold, by a judicious measurement and division, whether in small agricultural farms or otherwise, always realize the full upset value of £1 per acre.

I have, &c.,

J. H. GRIFFIN,

A. G. C.

No. 6.

UNDER SECRETARY FOR LANDS AND PUBLIC WORKS to ASSISTANT GOLD COMMISSIONER.

*Department of Lands and Public Works,
Sydney, 27 July, 1859.*

SIR,

With reference to your letter of the 10th ultimo, reporting upon the Church and School Lands in the vicinity of Braidwood, which the mining population have petitioned to be thrown open for gold digging purposes, I am now directed to request that you will be so good as to report how much of the above lands you consider it necessary to withdraw from lease, in order to satisfy the requirements of the gold diggers; and further, that you will endeavor so to describe the land to be withdrawn, as to enable the Surveyor General to identify it, and prepare a technical description of its boundaries.

I have, &c.,

MICL. FITZPATRICK.

No. 7.

ASSISTANT GOLD COMMISSIONER to UNDER SECRETARY FOR LANDS.

Braidwood, 22 August, 1859.

SIR,

With reference to your letter of the 27th July last, requesting me to report how much of the Church and School Lands, in this neighborhood, I would recommend to be withdrawn from lease for gold digging purposes, I have the honor to forward herewith the description and tracing of some two thousand acres, on the Jembaicumbene Creek, which Appendix B. block will, I think, satisfy the present requirements of the gold diggers located there.

2. I would suggest the reservation of all roads now in use, and give permission to any persons renting the lands adjoining for grazing purposes to fence off one or more approaches to water on the creek, for the use of cattle, if required.

3. It may be advisable to continue a reserve, of say half a mile, of this land along the whole bank of the Shoalhaven River, from the junction of the Jembaicumbene Creek, downwards, the line marked on the tracing attached being merely a provision for present wants.

I have, &c.,

J. H. GRIFFIN,
A. G. C.

[Enclosure in No. 7].

The block proposed to be thrown open for digging is:—Bounded on the south by Jembaicumbene Creek to its confluence with the Shoalhaven River; on the west by that river; on the east by a village reserve and a continuation of the eastern boundary of that reserve, northerly say forty chains; and on the north by a line bearing west to the Shoalhaven River.

J. H. GRIFFIN.

No. 8.

DESCRIPTION of Land proposed to be withdrawn from Lease for Gold Mining purposes in the neighborhood of Braidwood.

2,188 acres.

County of St. Vincent, parish of Boyle, on Jembaicumbene Creek and Shoalhaven River.

Commencing on Jembaicumbene Creek, at the south-west corner of a village reserve, being a point one mile west from the west boundary of John Coghill's 890 acres; and bounded on the east by the west boundary of the aforesaid reserve, bearing north; on the south by the north boundary of that reserve, bearing east one mile, to the west corner of John Coghill's 890 acres aforesaid; again on the east by part of the west boundary of John Coghill's 640 acres, bearing north half a mile; on the north by a line bearing west to the Shoalhaven River; on the west by that river upwards to the confluence therewith of Jembaicumbene Creek; and again on the south by that creek upwards to the point of commencement.

By plans in the Surveyor General's Office the lessees of the above area are—W. J. Roberts, 1,013 acres; Andrew Badgery, 477 acres; Alexander McKellar, 698 acres; total, 2,188 acres.

No. 9.

UNDER SECRETARY FOR LANDS to GOLD COMMISSIONER, GOULBURN.

Department of Lands,

Sydney, 18 January, 1860.

SIR,

I am directed to inform you that the Government, having had under consideration a correspondence which has taken place between Mr. Commissioner Griffin and this Department, respecting certain portions of Church and School Lands near Braidwood, proposed to be withdrawn from lease for gold digging purposes, are of opinion that the land (a description of which is herewith enclosed) is obviously required for public purposes in connection with the beneficial working of the Gold Fields, and have decided therefore upon resuming the same, subject to the proper arrangements being made for compensating the holders of the existing leases.

2. The Agent for Church and School Estates has been accordingly apprised to this effect, and requested to make the necessary communication to the parties interested.

3. I am to add that a notification of the withdrawal of these lands from lease will appear in an early number of the *Government Gazette*.

I have, &c.,

MICL. FITZPATRICK.

See No. 8 in
Schedule.

No. 10.

No. 10.

UNDER SECRETARY FOR LANDS to AGENT FOR CHURCH AND SCHOOL ESTATES.

Department of Lands,

Sydney, 18 February, 1860.

SIR,

It having been decided by the Government to withdraw from lease—subject to the proper arrangements being made for compensating the holders of the existing leases—certain portions of Church and School Lands in the vicinity of Braidwood, which are, it is considered, obviously required for public purposes in connection with the beneficial working of the Gold Fields,—I am directed to request that you will have the goodness to communicate this decision to the lessees of the lands in question, in order that they may name the arbitrators whom they may wish to act in their behalf in the award of compensation, as provided by the terms of lease.

Description here-
with (see No. 8
in Schedule.)

Messrs.
W. J. Roberts,
A. Badgery,
and
Alex. McKellar

2. I am to add, that a notification of the withdrawal of these lands from lease will appear in an early number of the *Government Gazette*.

I am, &c.,

MICL. FITZPATRICK.

*OPINION of J. H. Plunkett, Esq., Attorney General, and W. M. Manning, Esq.,
Solicitor General.*

*Attorney General's Office,
1 December, 1846.*

SIR,

Church and
School Lands.

With reference to the letter of the Agent for the Church and School Lands, dated 22nd September, 1846, respecting the leasing of those lands, which letter His Excellency the Governor was pleased to refer to us for our report thereon,—

We have the honor to state that we have carefully examined the letters patent, incorporating "the trustees of the Clergy and School Lands;" copies of the grants to that Corporation; the Secretary of State's Despatches of 25th May, 1829, and 19th June, 1830, together with the King's instructions enclosed in the latter despatch, for altering the management of the affairs of the Corporation; the Order in Council revoking the above letters patent; and the Colonial Act of 5 William IV., No. 11; and the Imperial Act of 5 and 6 Vict., cap. 36; and that we are of opinion that the lands originally granted to the late Corporation and resumed by the Crown upon its dissolution are not "*waste lands*" of the Crown within the meaning of the Crown Land Sales Act, by reason of their having been "*dedicated and set apart for a public use,*" and that consequently they may be leased in the same manner as previously to the passing of that Act.

We have, &c.,

J. H. PLUNKETT,
Attorney General.

W. M. MANNING,
Solicitor General.

THE HONORABLE
THE COLONIAL SECRETARY.

No. 2.

*OPINION of James Martin, Esq., Attorney General, and Alfred P. Lutwyche, Esq.,
Solicitor General.*

(No. 56-155.)

SIR,

*Attorney General's Office,
Sydney, 2 October, 1856.*

Enclosures here-
with returned.

In reply to your letter of the 27th ultimo, covering papers respecting the Church and School Lands at Blaney, we have the honor to state that we think, for the reasons assigned by us in detail in the accompanying communication, that the village of Blaney, being part of the Clergy and School Estates, is a portion of the waste lands of the Crown.

2. It may, therefore, be sold, but cannot be leased.

We have, &c.,

JAMES MARTIN,
Attorney General.

ALFRED P. LUTWYCHE,
Solicitor General.

THE HONORABLE
THE COLONIAL SECRETARY.

OPINION of James Martin, Esq., Attorney General, and Alfred P. Lutwyche, Esq., Solicitor General.

(No. 56-156.)

*Attorney General's Office,
Sydney, 2 October, 1856.*

SIR,

In reply to your letters of the 4th and 25th ultimo, requesting opinion respecting Leases of Church and School Estates, we have the honor to state that we think, for the reasons assigned in detail in an accompanying communication, that the Church and School Estates form a portion of the waste lands of the Crown, and therefore may be sold, but cannot be leased.

We have, &c.,

JAMES MARTIN,

Attorney General.

THE HONORABLE

THE COLONIAL SECRETARY.

ALFRED P. LUTWYCHE,

Solicitor General.

No. 4.

OPINION of James Martin, Esq., Attorney General, and Alfred P. Lutwyche, Esq., Solicitor General.

(No. 56-157.)

*Attorney General's Office,
Sydney, 2 October, 1856.*

SIR,

Referring to a letter addressed from your office on the 26th February last, No. 173, to the Crown Law Officers, and enclosing the copy of a letter, dated 14th of February, from the Acting Auditor General, we have the honor to make the following report for the information of His Excellency the Governor General :—

1. The Church and School Lands, comprehending nearly 450,000 acres, appear to have been granted to a Corporation, created by Royal Charter in 1826, in order "to make provision for the maintenance of religion and the education of youth in the Colony of New South Wales."

2. In 1833 the Corporation was dissolved, under a power reserved in the Charter, by an Order in Council dated on the 4th February in that year.

3. On the 5th August, 1834, an Act of Council (5 Will. IV., No. 11) was passed for regulating the affairs of the late Corporation, and to secure to purchasers their titles to lands purchased by them from the said Corporation. The preamble of that Act recites, that on the dissolution of the Corporation all the lands vested in the said Corporation reverted and became absolutely vested in the Crown, but contains no provisions for carrying out the trusts for which the Corporation was created.

4. Apparently, however, upon the ground that the Crown, although it could not be a trustee in a strictly legal sense for anyone, was yet a trustee in public policy for the maintenance of religion and the education of youth, the Government of the day seems to have considered that the lands in question ought to be reserved for those objects.

5. No systematic plan appears to have been adopted to form to advantage the estate until 1841, when a scheme was approved of for granting leases for seven, fourteen, and twenty-one years.

6. On the 22nd June, 1842, an Imperial Act (5 and 6 Vict., cap. 36) was passed for regulating the sale of waste land belonging to the Crown in the Australian Colonies. The 23rd section of that Act defines the words "waste lands" to mean lands "which now are or shall hereafter be vested in Her Majesty, and which have not been dedicated or set apart for some public use."

7. In 1843 the scheme of granting leases for terms of seven, fourteen, and twenty-one years was abandoned, upon the supposition that the lands originally granted to the Corporation had, by its dissolution, become absolutely vested in the Crown, and that consequently they were "waste lands" within the meaning of the statute last referred to.

8. The matter having been referred to the Law Officers, the late Attorney and Solicitor General, Mr. Plunkett and Mr. Manning, on 1st December, 1846, gave a joint opinion that the lands in question were not "waste lands" within the meaning of the Act 5 and 6 Vict., cap. 36, upon the ground that they had been "dedicated and set apart for a public use."

9. We regret that we are unable to concur in that opinion. We think that the 3rd section of the Act clearly shews what the Imperial Parliament contemplated by lands "dedicated and set apart for a public use." That section excepts from the operation of the Act lands required for public uses, and specifies "such lands as may be required for public roads or other internal communications, whether by land or water, or for the use or benefit of the aboriginal inhabitants of the country, or for purposes of military defence, or as the sites of places of public worship, schools, or other public buildings, or as places for the interment of the dead, or places for the recreation and amusement of the inhabitants of any town or village, or as the sites of public quays or landing places on the sea coast or shores of navigable streams, or for any other purpose of public safety, convenience, health, or enjoyment."

The words which are underlined can only be construed according to the rules laid down for the interpretation of statutes to purposes of the same kind as those previously enumerated; and we are of opinion, that the maintenance of religion and the education of youth are not purposes which the Imperial Parliament had in view by that section.

10. We are fortified in the opinion above expressed, by observing that the late Attorney General, Mr. Manning, in a Memorandum dated 17th June last, suggests that there may possibly be ground for dissent from the opinion of Mr. Plunkett and himself, dated 1st December, 1846.

11. As we think that the lands in question were absolutely vested in the Crown at the time of the passing of the Act 5 and 6 Vic., cap. 36, it follows, that all revenue derived from the Clergy and School Estates forms a portion of the Consolidated Revenue Fund, which, under section 47 of the Constitution Act, includes all territorial revenues of the Crown, and must be accounted for to the Legislature of the Colony.

12. We are of opinion, that it will be necessary to introduce a Bill into the Legislature to carry out, in a legal manner, any of the objects to which the income derived from the lands in question has hitherto been applied.

THE HONORABLE
THE COLONIAL SECRETARY.

We have, &c.,
JAMES MARTIN,
ALFRED P. LUTWYCHE.

No. 5.

OPINION of W. M. Manning, Esq., Attorney General.

I ENTIRELY concur in the opinion given by the Solicitor General (Mr. Darvall), which confirms, as will be seen, that given by the late Attorney General, Mr. Plunkett, and myself, as Solicitor General, on 6th December, 1846, and is opposed to that lately given by Mr. Martin and Mr. Lutwyche, whilst Attorney and Solicitor General.

2. Upon minute examination of the documents and Acts of Council bearing upon the question many further arguments suggest themselves, which support the result at which he has arrived; of these I will only mention the following:—

The Act of 5 Gul. IV., instead of declaring that the lands and other property of the late Corporation shall be dealt with as ordinary lands and property of the Crown, makes special provisions for their management by the Governor and by an agent to be appointed expressly for that purpose. This implies that these lands and property were not to be regarded as being identical in tenure and destination with the lands and property absolutely vested in the Crown for general public uses. The provisions in question even go the length of giving to the agent the powers of a bailiff for preventing intrusion, &c., "in respect of lands of the said Corporation which are now vested in Her Majesty;" although the Legislature had in the immediately preceding year provided "for the protection of the
" Crown

“ ‘*Crown Lands*’ of the Colony,” by authorizing the appointment of commissioners, and giving to such commissioners powers *in respect of Crown Lands*, precisely similar to those so given to the agent of the Church and School Lands. Had the lands been regarded as “*Crown Lands*” in the general sense of the term, the Legislature would have left them, in common with other lands, to the protection of the Commissioners. It is also to be observed that, although the term “*Crown Lands*” had a known and recognised meaning, and had been adopted by the Legislature in the Act 4 Gul. IV., No. 10, it is entirely avoided in the Act for regulating the affairs of the Corporation.

17 December, 1856.

W. M. MANNING,
Attorney General.

No. 6.

OPINION of J. B. Darvall, Esq., Solicitor General.

THE Church and School Lands were granted by the Crown to a Corporation, which was created by Charter on the 9th March, 1826, and called, “The Trustees of the Clergy and School Lands in the Colony of New South Wales,” with powers to hold, let, sell, cultivate, mortgage, &c., &c.

2. By the 36th clause of this Charter the Crown was empowered to *dissolve the Corporation* if it should seem expedient, and therefore the land was to revert to, and become absolutely vested in, the Crown (subject to existing contracts or mortgages, &c., &c.), “*To be held, applied, and disposed of by the Crown in such a manner as to the Crown should appear most conducive to the maintenance and promotion of religion and the education of youth in the Colony.*”

3. By the contemplated exercise of this power the Charter seems to me to have intended the destruction of the Corporation, but the preservation of the trusts, and that the lands should vest in the Crown, not as absolute owner, but as a trustee for a particular purpose consistently with the original dedication of the land.

4. The King can, I apprehend, be a trustee of lands, although he cannot be compelled to execute the trusts, and that, by the due exercise of the powers in the Charter, the land would vest in the Crown as trustee.

5. On the 1st January, 1831, under a power in the Charter to alter the management of the estate, commissioners were appointed to supersede the trustees in the management of the lands, which, however, still remained vested in the trustees. I assume that the commissioners acted.

6. On the 4th February, 1833, the power of dissolution was exercised, and the Corporation was dissolved in terms of the Charter provisions, which did not go to the abolition of the trust. By this dissolution the land vested in the Crown, not, in my judgment, as absolute owner, but as trustee, and the land remained, I think, subject to the trusts before alluded to.

7. On 5th August, 1834, the 5th and 6th Will. IV., No. 11, was passed *inter alia to regulate the affairs of the late Corporation*, the recital of that Act shews that the intention of the Legislature was to enable the Governor justly to carry out the then existing contracts of the Corporation, and only recites so much of the effect of the dissolution as is relevant to that object. The Act then proceeds to vest in the Crown all debts, mortgages, stock, &c., of the Corporation which had not so vested by the operation of the Order in Council dissolving the Corporation, and although the words used in the Act might be large enough to include the lands of the Corporation which had already vested in the Crown, and although the words in the Act seem to declare that stock, debts, mortgages, &c., had already vested in the Crown, which I think had not before the Act so vested, still the Act does not seem to me to affect the lands granted to the Corporation, because they had already vested in the Crown, and I think the Legislature only intended to do what was necessary, viz., to vest in the Crown stock, mortgages, &c., which had not by the operation of the dissolution vested in the Crown. I think, therefore, that this Act did not disturb the

trusteeship

trusteeship of the Crown which was previously created, but only cast additional duties on the Crown, and transferred to it additional property.

8. On the 22nd June, 1842, the 5th and 6th Vic., cap. 36, was passed, *for regulating the sale of the waste lands of the Crown*. The 3rd section of this Act gives a certain prospective power of reserving lands for certain purposes, "or for any other purposes of public safety, convenience, health, or enjoyment."

9. The 23rd section defines waste lands to be "lands vested in the Crown" (that is, absolutely vested and not held in trust), and which had not been already granted, or lawfully granted to any person or persons in fee simple or for an estate of freehold, or for a term of years, and which had not been dedicated or set apart for any public use.

10. If the lands in question had been waste lands, I should think that the reserving power in sect. 3 would not justify their reservation as Church and School Lands; but to bring the lands within the operation of that Act, or of the Constitution Act, they must be waste lands.

I think they are not waste lands, and that even if they do not fall within the description of lands *which have been already granted*, still they have been set apart for a public use, and for that use are now held by the Crown in trust.

11. The term public use is not, in my opinion, to be limited to the class of cases defined by the 3rd section. It follows, therefore, that in my opinion the moneys and lands are not a part of the Consolidated Revenue of the Colony.

J. B. DARVALL,
Solicitor General.

17 December, 1856.

No. 7.

OPINION of the Honorable Edward Wise, Solicitor General.

I HAVE perused the several opinions herein, and I agree with Messrs. Plunkett, Manning, and Darvall, that the lands in question are not waste lands within the 5th and 6th Vic., cap. 36.

Had the question been put, prior to that Act,—Are these lands dedicated and set apart for some public use? I cannot doubt that the answer would have been in the affirmative; and, if so, what is there in that Act to alter their character? The definition in section 23 is altogether independent of the powers given by section 2 to dispose of waste lands otherwise than by sale in future; and I do not think that the powers given by section 2 can limit the wider meaning of the words in the 25th section.

This opinion is supported, I think, by the 5th and 6th Vic., cap. 36, section 20, which enacts, "that nothing therein contained shall affect or be construed to affect any contract, or to prevent the fulfilment of any promise or engagement made by or on behalf of Her Majesty with respect to any lands situate in any of the said colonies in cases where such contracts promises or engagements shall have been lawfully made before the time at which this Act shall take effect in any such colony."

Now the original charter provided, "that the lands which should revert to the Crown should be held, applied, and disposed of by the Crown in such manner as to the Crown should appear most conducive to the maintenance and promotion of religion and the education of youth in the colony." It might, therefore, be held, without any strained construction, that there was a promise or engagement with respect to Church and School Lands, which would exclude them from the operation of the Act.

A further argument in support of this view is, I think, derived from the circumstance that the Orphan School Estates were, by virtue of the 7th George IV., No. 4, vested in the Corporation (Clergy and School Trustees) at the time of its dissolution. And, if the words waste lands include the latter, it would necessarily follow that they would include the former, which would be such an act of gross injustice, that nothing but the clearest enactment could legalize.

On the whole, therefore, my opinion is, that the Church and School Lands are not "waste lands" within the 5th and 6th Vic., section 26.

E. WISE,
Solicitor General.

7 July, 1857.

No. 8.

OPINION of Mr. Solicitor General Lutwyche.

1. I have persued, with the attention which the importance of the subject demands, the several opinions of Messrs. Darvall, Manning, and Wise, on this matter; but, with all the respect which I entertain for the legal attainments and abilities of those gentlemen, I am bound to say that their reasoning has failed to convince me that the Clergy and School Estates are not waste lands of the Crown, and that I, therefore, still adhere to the opinion given by the present Attorney General and myself on the 2nd of October, 1856.

2. Mr. Darvall's opinion appears to be chiefly based upon the assumption that a trust and power are, if not absolutely identical, so closely allied as to be convertible terms. I apprehend, however, that they are essentially distinct, and that a Court of Equity could not as against a Corporation—much less as against the Crown—enforce any particular mode of dealing with the lands in question under provisions similar to those of the 36th clause of the Charter. By the terms of that clause it was stipulated that if the Crown thought fit the Corporation should be dissolved, and that thereupon the land should revert to and become absolutely vested in the Crown (subject to existing contracts or mortgages), to be held, applied, and disposed of by the Crown *in such manner as to the Crown should appear most conducive* to the maintenance and promotion of religion and the education of youth in the Colony. Such a clause did not define and create a trust in its legal sense, which is the only sense in which jurists can deal with it, but conferred a discretionary power, the exercise of which no one could ever have called in question, even if it had been exerted to effect objects very remote indeed from the maintenance and promotion of religion and the education of youth in the Colony.

3. The instances in which the Queen may be a trustee of lands, though even then she would not be compellable to execute the trusts, seem to be confined to cases in which she takes land derivatively, as by descent, or by forfeiture from a trustee. She is also considered to be a *quasi* trustee in the case of a lunatic. But the general rule of law is, that the Crown cannot be a trustee for anyone, and I think that this rule applies with peculiar force to lands which *revert* to the Crown on the dissolution of a Corporation, because it has failed to carry out the objects for which it was created.

4. I think that the 3rd and the 23rd clauses of the Act 5 and 6 Vict., cap. 36, must be read and construed together in order to give effect to the other portions of the Act. The preamble recites the expediency of establishing an uniform system of disposing of the *waste* lands of the Crown. The second section enacts that no such lands shall be alienated except by sale, and the third section proceeds to except from the operation of the preceding clause lands required for public uses. Among these it specifies *sites* of places of public worship or schools, and by that very specification excludes, in accordance with a well known rule of construction, lands which may be required as an *endowment* for such places of public worship or schools, when built. The words "set apart for some public use" in the interpretation clause appear to be a compendious form of expressing the public uses enumerated in the 3rd section, for although the operation of that section is prospective, while the 25th section is retrospective in its effect, I shall be slow to believe that the Imperial Legislature meant to open up so wide a field for litigation as the larger construction, which Mr. Darvall has contended for, would present. It would be very difficult indeed to say what "*some* public use" would not include.

5. The Act 5 Wm. IV., No. 11, bears entirely upon matters arising out of the dealings of the lately dissolved Corporation, with the exception of the clauses relating to the agent's authority; and, I think, that very little weight is due to the argument derived from his separate appointment. That might have been determined on simply as an administrative arrangement.

6. The 20th section of the Act 5 and 6 Vic., c. 36, does not seem to me to touch the present question. To or with whom has any promise, contract, or engagement been made or entered into since the dissolution of the Corporation? Doubtless a general impression and understanding prevailed that the revenues of the Church and School Estates would be applied

applied for religious and educational purposes ; but the question is, whether a legal promise has been given by the Crown, since the Corporation was dissolved, to apply the revenues exclusively to those purposes. It has dealt with them in that manner, but there is no evidence of a formal engagement to that effect.

7. Upon the whole, therefore, I am of opinion that, upon the dissolution of the Corporation, the Church and School Estates vested absolutely in the Crown ; that, at the time of the passing of the Act 5 and 6 Vic., c. 36, these lands had neither been granted nor contracted to be granted to any person, and had not been set apart for any public use ; that they were consequently then waste lands of the Crown ; that as such they could only have been since legally alienated by way of sale, or by grant for some of the public uses specified in the 3rd section of that Act ; and that all revenue derivable therefrom forms a portion, under the existing Constitution Act, of the Consolidated Revenue Fund.

ALFRED P. LUTWYCHE,

Solicitor General.

No. 9.

OPINION of Mr. Solicitor General Lutwyche.

FOR the reasons detailed in my opinion of the 16th November instant, and in the joint opinion of the present Attorney General and myself of 2nd October, 1856, I think that the Church and School Estates are Waste Lands of the Crown, and as such cannot be leased.

ALFRED P. LUTWYCHE,

Solicitor General.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES No. 15. FRIDAY, 23 SEPTEMBER, 1859.

14. Church and School Lands:—Mr. Murray moved, pursuant to notice,—
(1.) That a Select Committee be appointed to inquire into and report upon the so-called Church and School Lands of this Colony.
(2.) That such Committee consist of Mr. Clements, Mr. Rotton, Mr. Wilson, Mr. Nott, Mr. Egan, Mr. Flood*, Mr. Black†, Mr. Parkes, Mr. Morris, and the Mover.
Debate ensued.
Question put and passed.

* Seat declared vacant, 30 September, 1859.

† Seat declared vacant, 26 October, 1859.

VOTES No. 44. FRIDAY, 16 DECEMBER, 1859.

17. Church and School Lands:—Mr. Murray moved, pursuant to notice, That the following Members be added to the Select Committee upon Church and School Lands, viz.:—
Mr. Flood*, and Mr. Black.
Question put and passed.

* Seat vacant, 16 January, 1860.

VOTES No. 81. THURSDAY, 19 APRIL, 1860.

14. Church and School Lands:—Mr. Rotton (*by Consent*) moved, pursuant to notice (No. 6), on behalf of the Chairman of the Select Committee on Church and School Lands,—
That the Rev. Dr. Lang be added to that Committee.
Question put and passed.

VOTES No. 84. TUESDAY, 24 APRIL, 1860.

2. Church and School Lands:—Mr. Wilson, on behalf of the Chairman, brought up the Report from, and laid upon the Table the Proceedings of, and Minutes of Evidence taken before, the Select Committee on Church and School Lands.
Ordered to be printed.

CHURCH AND SCHOOL LANDS.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 23rd September, 1859, "*to inquire into and report upon the so called Church and School Lands of this Colony,*" have agreed to the following Report:—

THE Church and School Lands Corporation was established by Royal Charter, in 1826, for the maintenance and support of Clergy and Schools in this Colony in connection with the Church of England. About 450,000 acres of land, in different parts of the country, were granted to the Corporation for this particular purpose. The Crown reserved the right to alter, revoke, or vary the conditions, regulations, or declarations of the Charter, as well as the power of dissolving the Corporation altogether. And, in the event of such dissolution, it was provided that all the lands granted to it should revert to His Majesty, His Heirs, and Successors, "to be held, applied, and disposed of, in such manner as should appear most conducive to the maintenance and promotion of religion and the education of youth in the Colony."

In pursuance of the powers thus reserved, Letters Patent were issued on the 1st of January, 1831, appointing five Commissioners for the management and performance of the several duties vested in the Corporation by the Charter; and by an Order in Council, on the 4th of February, 1833, the Corporation was dissolved.

To remove all doubts as to the absolute reversion of the lands to the Crown, it was declared in a Colonial Act at the time, 5 Wm. IV, 2, that all the lands and all property of any kind or description, held by the Corporation at the time of its dissolution, became thereupon invested in Her Majesty in right of the Crown of England.

At this period a difference of opinion arose between Sir Richard Bourke, the Governor, and Archdeacon Broughton, the head of the Church of England clergy in this Colony, as to the appropriation of the revenues derived from these lands. The Governor was of opinion that they should be applied to the maintenance and promotion of Religion and Education generally, while the Archdeacon contended that they should be expended exclusively on Clergy and Schools in connection with the Church of England.

The

The matter was referred to the Secretary of State in September, 1833, and two years afterwards an answer was received, stating that the fund should be appropriated according to the views of the Governor, and adding that the Archdeacon had been made Bishop of Sydney. Ever since the revenues of these lands have been applied to the promotion of Religion and Education among the four principal sects into which Christians are divided in this Colony.

The lands were selected in favored localities. They are not only well situated, but, in some instances, abut upon towns of rising importance, and in all, not being open for sale, appear to retard the settlement of the country. This is particularly the case at Braidwood, where 45,000 acres thus held would be settled on rapidly by the mining population of that important district if reasonable facilities were afforded in the way of purchase or occupancy.

The 450,000 acres may be fairly estimated as worth half a million sterling, yet the net income derived from them amounts to but £6,000 a year. They are managed by an Agent appointed by the Government; but the appropriation of the revenues derived from them has never been subjected to Parliamentary control.

The policy of maintaining or promoting either religion or education by grants of public lands appears to your Committee to be very questionable. Experience shews that in most instances in which such endowments are made they produce, as an application of means to an end, very inadequate results. Admitting fully the claims which the cause of education has upon society, your Committee, nevertheless, consider that the State ought to know clearly the extent to which it aids that cause. To devote tracts of public lands to it, is to give it an indefinite, fluctuating support, dependent for its results on varying circumstances and casual management.

On these grounds it appears to your Committee to have been a mistake in policy to devote these lands to this purpose.

There can be no doubt that the promoters of the Corporation contemplated the establishment of one particular Church in this Colony.

The grants whereby the lands were conveyed recite that the Corporation was created for "the establishment and support, within the Colony of New South Wales, of the Protestant Reformed Religion, as by law established in England and Ireland, and for the education of youth in the discipline and according to the principles of the United Church of England and Ireland." And they specify that the lands are to be held for the maintenance and support of religion and the education of youth, "subject in all respects to the provisions, declarations, and regulations contained in the Letters Patent whereby the Corporation was established." And by the 38th section of the Charter provision was made for the appropriation of the revenues derivable from these estates, when "the whole of the inhabitants of the Colony" had been educated in the principles of the Church of England.

This

This may have been in accordance with opinions in the ascendant when the Charter was granted; but any intention of the kind, with regard to any Church, is in direct opposition to that strict neutrality, with regard to forms of religious worship or belief, which is generally maintained in these days as a fundamental principle in our Government.

And a very important question, involving the legality of the Charter *ab initio* arises on this very point. By the 25th section of the Act of Union between England and Scotland, the Church of England was declared to be established within the "Kingdom of England and Ireland, the domain of Wales, and the town of Berwick-upon-Tweed; and the Church of Scotland was declared to be established in Scotland"; and by the 4th article of the Union it was enacted, "That all the subjects of the United Kingdom of Great Britain shall from and after the Union have full freedom and intercourse of trade and navigation to and from any port and place within the said United Kingdom and the dominions and plantations thereunto belonging; and that there be a communication of all other rights, privileges, and advantages which do or may belong to the subjects of either Kingdom, except where it is otherwise expressly agreed in these articles."

It appears to have been admitted in the discussions which took place in the Imperial Parliament on the Canadian Clergy Reserves Act, that under this clause the preservation of the two Churches of England and Scotland in the same state in which they were at the time of the Union is a fundamental principle of the Union; that this principle extends to the Colonies, and that the one Church cannot be established in any Colony, or receive any privileges, to the prejudice of the other.

Mr. Bayley, the late Attorney General, when examined by your Committee on this point, stated as follows:—"I think it deserves much consideration, because if this article is applicable to this Colony—if the argument be pushed to its full extent—it would invalidate the grant of every single acre. I think there would be great difficulty if this were so, because, take this case:—Supposing, when this Charter of Incorporation was issued, there were no Scotch persons in this Colony, the Charter would be good; supposing one Scotchman were in the country, even though he arrived only the day before, the Charter would be bad. It would involve the necessity of inquiring whether there was one Scotchman here at a particular moment. I do not like to give an opinion one way or another."

This view of the case your Committee submit to your Honorable House as one which demands serious and pressing attention, inasmuch as it affects at once the legal status of the Charter and the validity of the grants made under it.

If the Charter was void *ab initio*, the lands referred to are still Waste Lands of the Crown, and can only be administered under the ordinary Crown Lands Acts or Regulations.

But

But the anomalous position in which these lands stand in other respects renders it highly desirable that their exact legal status should be determined as speedily as possible.

The revenues derived from them are not applied to the purpose intended by the Charter and specified in the grants—namely, the maintenance and support of religion, and the education of youth according to the principles of the Church of England, but are appropriated to the four denominations at present receiving State support on the principles established by Sir Richard Bourke's Church Act; *and in derogation of the original trust.*

From the answers which he gave to the following questions, Mr. Bayley appears to consider their present appropriation illegal, viz. :—

“ 171. You are of opinion, from the original Charter, that the
“ Corporation was established for the benefit of the Church
“ of England exclusively? Certainly.

“ 172. Do you know how the proceeds of this land have been
“ applied? I do not know—the papers have not come
“ under my notice.

“ 173. It is a fact that they have been distributed among the
“ various denominations—it appears from the evidence that
“ Schedule C has been supplemented to the extent of five-
“ sevenths of the net proceeds of these lands for several
“ years past—then, according to your view of the law of
“ the case, such a distribution was illegal? Assuming the
“ facts to be as you state, I think so.

“ 174. Do you not think that such a departure from the original
“ Charter renders it legal? I think not; I think the
“ Crown is bound by the trust; and however illegally it
“ may have acted, and however long, it will not alter the
“ matter. Mere prescription will not make an illegal act
“ legal.”

But it is held on other grounds that these lands are part and parcel of the Waste Lands of the Crown. An elaborate opinion, hereunto appended,* to that effect was given, in 1856, by Mr. Martin and Mr. Lutwyche, then Attorney and Solicitor General. But Sir William Manning and Mr. Darvall, who filled those offices before the close of that

*Vide Mr. W. E. Plunkett's Evidence, Appendix D.

†Vide Mr. W. E. Plunkett's Evidence, Appendix E and F.

year, gave a strong opinion, also appended,† to the contrary. Mr. Plunkett, Attorney General of the Colony for many years, who held in 1846 that they were not Waste Lands of the Crown, now contends *that they became so under the 50th section of the Constitution Act*, by which it is declared that the several sums mentioned in “ Schedules A, “ B, and C, shall be accepted and taken by Her Majesty, Her Heirs, and “ Successors, by way of Civil List, instead of all territorial, casual, and “ other revenues of the Crown, including all royalties from whatever
“ source

“ source arising within the said Colony, and to the disposal of which the
“ Crown may be entitled either absolutely or conditionally or otherwise
“ howsoever.”

The legality of the Corporation, the validity of the grants, the appropriation of the revenues derived from them, if now left unsettled, may in future times be fruitful sources of dispute—perhaps of that baneful society, religious animosity. Doubts or difficulties connected with them can never be more easily adjusted than at present.

Taking all the circumstances of the case into consideration, your Committee are of opinion that these lands are simply Waste Lands of the Crown, and recommend that your Honorable House should take immediate steps for the passing of an Act to remove all doubts on the subject.

*Legislative Assembly Chamber,
Sydney, 24 April, 1860.*

T. A. MURRAY,
Chairman.

•

PROCEEDINGS OF THE COMMITTEE.

WEDNESDAY, 28 SEPTEMBER, 1859.

MEMBERS PRESENT :—

Mr. Morris,		Mr. Nott,
Mr. Parkes,		Mr. Wilson,
Mr. Clements,		Mr. Egan,
Mr. Murray,		Mr. Black.

T. A. Murray, Esquire, called to the Chair.

Committee deliberated as to the best course of proceeding in carrying on the inquiry referred to them, with as little delay as possible, and decided upon taking evidence ;—the first Witness to be summoned being W. Elyard, Esquire (Under Secretary), with instruction to produce any copy of grant or lease that may be in his possession as Custodian of the Records of the Colony, in reference to the subject under consideration.

[Committee adjourned till Thursday, the 29th instant, at *Eleven* o'clock.]

THURSDAY, 29 SEPTEMBER, 1859.

MEMBERS PRESENT :—

T. A. Murray, Esquire, in the Chair.

Mr. Wilson,		Mr. Clements,
Mr. Morris,		Mr. Parkes,
Mr. Black,		Mr. Nott.

W. Elyard, Esquire, called in and examined.

The Witness produced a copy of the Church and School Grant which was ordered to be appended to his Evidence. (*Vide Appendix A.*)

J. H. Plunkett, Esquire, *M.P.*, called in and examined.

[Committee adjourned till Tuesday, the 4th October, at *Eleven* o'clock.]

TUESDAY, 4 OCTOBER, 1859.

MEMBERS PRESENT :—

T. A. Murray, Esquire, in the Chair.

Mr. Clements,		Mr. Nott.
		Mr. Wilson.

F. G. Campbell, Esquire, *Agent for Church and School Lands*, called in and examined.

[Committee adjourned till Tuesday, the 11th instant, at *Ten* o'clock.]

TUESDAY, 11 OCTOBER, 1859.

MEMBERS PRESENT :—

T. A. Murray, Esquire, in the Chair.

Mr. Clements,		Mr. Black,
Mr. Morris,		Mr. Wilson,
Mr. Parkes,		Mr. Rotton,
		Mr. Egan.

The Chairman read a letter from F. G. Campbell, Esquire, who was examined before the Committee at their last meeting, which was ordered by the Committee to be printed as Appendix C to that gentleman's Evidence.

The Honorable L. H. Bayley, Esquire, *M.P.*, *Attorney General*, examined.

[Committee adjourned.]

TUESDAY,

TUESDAY, 20 DECEMBER, 1859.

MEMBERS PRESENT :—

T. A. Murray, Esquire, in the Chair.
 Mr. Parkes, | Mr. Rotton,
 Mr. Wilson, | Mr. Clements.
 Mr. Plunkett.

W. E. Plunkett, Esquire, *Secretary to Crown Law Officers*, called in and examined. The Chairman then brought under the notice of the Committee the opinions of the successive Crown Law Officers, (1846 to 1857,) handed in by Witness. (*Vide Appendices to Mr. W. E. Plunkett's Evidence A to I.*)
 The several Opinions read at length.
 Committee deliberated.

[Committee adjourned till Tuesday, the 22nd instant, at *Eleven* o'clock.]

THURSDAY, 22 DECEMBER, 1859.

MEMBERS PRESENT :—

T. A. Murray, Esquire, in the Chair.
 Mr. Clements, | Mr. Wilson,
 Mr. Morris, | Mr. Rotton,
 Mr. Parkes.

The Chairman brought under the notice of the Committee the whole of the Evidence taken during the course of the inquiry ; and the Committee having deliberated thereon, the Chairman was requested to prepare, for consideration at next meeting, a Draft Report on the subject referred to them.

[Committee adjourned.]

FRIDAY, 17 FEBRUARY, 1860.

MEMBERS PRESENT :—

The Honorable T. A. Murray, Esquire, in the Chair.
 Mr. Clements, | Mr. Wilson.

Committee deliberated upon the subject of their inquiry, and agreed to defer the consideration of a Report till their next meeting.

[Adjourned till Thursday next, at *Eleven* o'clock.]

THURSDAY, 23 FEBRUARY, 1860.

MEMBERS PRESENT :—

The Honorable T. A. Murray, Esquire, in the Chair.
 Mr. Clements, | Mr. Wilson.

[Committee adjourned.]

FRIDAY, 13 APRIL, 1860.

MEMBERS PRESENT :—

The Honorable T. A. Murray, Esquire, in the Chair.
 Mr. Black, | Mr. Clements,
 Mr. Rotton.

The Chairman laid before the Committee a Draft Report.
 Committee deliberated, and gave instruction for the circulation of copies in proof prior to their next meeting.

Committee then deliberated upon the expediency of restoring the complement of its Members, with a view to the full consideration of the Report, the resignation of Mr. Flood having occurred during the term of their appointment.

Motion made (*Mr Rotton*) and *Question*—That the House be moved to order the addition of the Rev. Dr. Lang to the Members serving on this Committee,—*agreed to.*

And Mr. Rotton requested, on behalf of the Chairman, to move in the House accordingly.

[Committee adjourned.]

TUESDAY, 24 APRIL, 1860.

MEMBERS PRESENT :—

The Honorable T. A. Murray, Esquire, in the Chair.

Mr. Black,	Mr. Parkes,
Mr. Clements,	Mr. Rotton,
Rev. Dr. Lang,	Mr. Wilson.

The Draft Report submitted at the last meeting having been circulated among the several Members, Committee met to consider same.

Draft Report read first time.

Committee deliberated.

Motion made and *Question*—That this Report be now read a second time, and considered paragraph by paragraph,—*agreed to*.

Report read paragraph by paragraph.

Paragraphs 1 to 3, 5, 7, 9 to 17, 20, 22, and 24 (now 23), agreed to without amendment.

Paragraphs 4, 6, 8, 18, 19, and 21, and former portion of paragraph 26, *verbally* amended.

Motion made (*Mr Parkes*) and *Question*—That paragraph 23, viz. :—

“The various questions that thus affect these lands may hereafter cause considerable difficulty in their management,” be omitted,—*agreed to*.

Motion made and *Question*—That paragraph 25, viz. :—

“The Parliament of the country is the proper authority to deal with all questions connected with the education of the people; and no particular religious sect has any right to obtain from the State support which other sects do not rateably receive,” be omitted—*agreed to*.

Motion made (*Mr. Rotton*) and *Question*—That the latter portion of paragraph 26 (now 24) viz. :—

“The State is the proper guardian, the proper director of the education of the people. And, however expedient such territorial endowments for religious or educational purposes might have been in former times, they are wholly at variance with the principles most approved of in the present day. Grants of land for educational purposes actually involve an abnegation of its functions in regard to education on the part of the State,” be omitted—*agreed to*.

Motion made (*Mr. Parkes*) and *Question*—That the Report, as amended, be the Report of this Committee—*agreed to*.

Mr. Wilson (on behalf of the Chairman) requested to report to the House.

1859.

Legislative Assembly.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

CHURCH AND SCHOOL LANDS.

THURSDAY, 29 SEPTEMBER, 1859.

Present :—

MR. BLACK,
MR. CLEMENTS,
MR. MORRIS,

DR. WILSON.

MR. MURRAY,
MR. NOTT,
MR. PARKES,

THE HON. TERENCE AUBREY MURRAY, ESQ., IN THE CHAIR.

William Elyard, Esq., called in and examined :—

1. *By the Chairman* : You are the Under Secretary ? Yes.
2. And have been for many years in the Colonial Secretary's Office ? Yes.
3. How many years ? Upwards of thirty-seven.
4. Do you remember the establishment of the Church and School Corporation in this Colony ? Yes.
5. In what year was it established ? The charter is dated 9th March, 1826, and was issued by Governor Darling, under Royal Instructions, in the reign of George the Fourth.
6. Have you a copy of those instructions ? No ; they are probably at Government House, with a Despatch from the Secretary of State.
7. Is the Clerk of the Executive Council the proper person to have the custody of them ? They are, of course, in the possession of the Governor General, but His Excellency's Private Secretary would have access to them.
8. Are you at all aware whether any grants of land were made to that Corporation ? Yes. A Return to an Address which was laid before the Legislative Council on the 3rd July, 1855, includes certain letters in which reference is made to a number of deeds for land so granted.
9. Do you know where those deeds are ? They should be in the Church and School Estate Chest, which used to be in charge of the Agent. This officer has, I believe, been discontinued, and I understand that the chest is now deposited in the Treasury.
10. You have no record of them ? The register of grants to the Corporation, which was formerly in the Colonial Secretary's Office, is now at the Surveyor General's Office. Under the impression that the Committee wished to ascertain the nature of the deed, I have had a copy made, and have brought it with me. This bears date the 3rd of February, 1829, and is, I believe, one of the first of the deeds issued in favor of the Corporation. (*The witness handed in the same. Vide Appendix A.*)
11. Do you know if the Corporation have sold any of this land ? Yes, I believe so, as reference to the sale of lands is made in the printed papers already referred to.
12. Does the list given in this printed document laid before the House include all the lands granted to the Church and School Corporation ? Perhaps not, but I am unable to state the particular grants to the Corporation.
13. Could you state the extent of the grants ? No ; but this information could be obtained by a return from the Survey Department.
14. How do you know this is a copy of the deed ? It is a copy of the registration of the deed.
15. You obtained it from the Registration Office ? I obtained the register from the Survey Office, and had the copy prepared from the record of the deed.
16. *By Mr. Nott* : Is the deed produced that under which all the grants were made ? I believe they are in the same form, but of course I cannot speak positively as to that. It could only be ascertained by a comparison of the deeds ; but, having glanced over them to-day, they appear to me to be in the same form. They are issued under certain instructions which are recited in them.
17. Do you know who administers the funds of these Church and School Lands ? The collections

W. Elyard,
Esq.

29 Sept., 1859.

W. Elyard,
Esq.

29 Sept., 1859.

collections are paid into the Treasury to a separate account, and the appropriation of the revenue is made, under a Minute of the Executive Council, in the proportion of two-seventh parts to the support of Schools, and five-sevenths to the maintenance of Public Worship.

18. Do you know the date of that decision? I think the Minutes now in force are dated the 14th March, and 29th January, 1850, and the 12th January, 1853.

19. There are no trustees for that fund at the present time, other than the Executive Council I suppose? I am not aware of the appointment of any trustees. The management of the affairs of the Church and School Estates is under the direction of the Government, and the funds were collected by the Agent for the Church and School Lands, and paid by him into the Treasury.

20. You do not know in what way the funds are now collected? No, I do not precisely know the arrangement, because it has been made since the separation of the business from the office of the Colonial Secretary, and, therefore, the instructions with reference to these matters issue from another department.

21. Then the Agent must have been appointed by the Colonial Secretary originally? No; the first Agent was appointed by Sir Richard Bourke, in 1834 or 1835. Mr. Fisher, I think, was the first Agent appointed. When the Charter of the Church and School Corporation was revoked the management of the estates was vested in Commissioners, and when these were discontinued an Agent was appointed, and an Agent continued to conduct the business until recently, when, I believe, it was thought that an arrangement could be made for its performance in the departments of the Surveyer General and the Treasury, without an Agent. Under this arrangement, the revenue is now collected and appropriated in the way I have mentioned, under Minutes of the Executive Council, in pursuance of instructions conveyed by the Secretary of State to the Governor and Executive Council for that purpose.

22. Then there are no trustees between the Crown and the parties holding these lands? I am not aware of any parties having been appointed trustees.

23. *By the Chairman*: They are administered now by a person holding office under the Government? Or by some department of the Government.

24. *By Mr. Clements*: Have you any recollection under what regulations any of the lands were sold in 1844 or 1845? No; excepting what is stated in the papers to which I have before referred; but I think that returns on the subject would best afford this information.

25. *By the Chairman*: What is the appellation of the officer who manages these lands now? The duties formerly performed by the Agent for Church and School Estates are now, I believe, attached to the Surveyor General's Department.

26. Will you be good enough to look at this portion of the deed—it is stated, "I, the said Ralph Darling, am fully authorised, empowered, and directed when, and so soon as a certain corporation then about to be created 'for the establishment and support within the said Colony of New South Wales, of the Protestant reformed religion as by law established in England and Ireland, and for the education of youth in the discipline and according to the principles of the United Church of England and Ireland,' should be established to give and grant under the public Seal of New South Wales aforesaid to the said corporation certain lands within the said Colony"—Do you understand by the recital in the grant that these lands were granted originally for purposes strictly in connection with the Church of England? I should suppose that to have been the intention, although I am not sure that that is the construction to be placed on the Charter taken as a whole, but of course I am not competent to give an opinion upon a question which is one of law.

27. What I wish to ask you is,—how the proceeds of this land are applied at present? At present they are not appropriated exclusively to the Church of England, but to the four communions receiving aid from the public funds, and to the schools, both National and Denominational, in the proportion I have mentioned before, that is, of five-sevenths for public worship, and two-sevenths for schools, in conformity with, as it appears to be understood, the original Charter, and the regulations and instructions on the subject.

28. With what part of the original Charter is that in conformity? In section 28 it is stated that "the balance of the funds standing to the credit of the said account, called 'The Clergy and School Account' shall be applied as to two equal seventh parts for the support of schools and schoolmasters, and as to the remaining five equal parts, to the support and maintenance of the clergy, in manner aforesaid."

29. Does that apply to the clergy of any particular denomination, or to schools and clergymen generally—you observe that the commencement of the section you have quoted is as follows:— "And we do further will and ordain that the part of the moneys aforesaid which hereinbefore is directed to be applied in and towards the support and maintenance of schools and schoolmasters shall be so applied in manner following, that is to say,—in and towards the maintenance and support of schools and schoolmasters in any parish of the said Colony in connection with the Established Church, and under and subject to the visitation and control of the Bishop, or in his absence the Archdeacon for the time being of the said Colony, it being our will that, until provision shall be effectually made for the support of schools, and the education of youth in our said Colony, the balance of the fund" and so on, as you have just read—does not that seem to limit the application strictly to the clergy of the Church of England? Yes, it would seem so.

30. Then the proceeds are not to be appropriated to other purposes? There is another clause in the Charter, and the one I intended to have referred to which is more general, namely, the 36th, in which after providing that the Corporation may be dissolved and that the lands shall thereupon revert to the Crown, it is stated that, subject to all mortgages and contracts for the sale thereof lawfully made by the said Corporation, the said lands shall be held, applied, and disposed of in such manner, as to us, our heirs and successors shall appear most conducive to the maintenance and promotion of religion, and the education of youth in the said Colony." This section seems to contemplate such a distribution as is now made under instructions issued on the subject through the Secretary of State.

31. Will you be good enough to look at the 32nd clause? That appears to have reference to what were known as the Orphan School Estates, which were vested in the Corporation, exclusive of any lands otherwise granted.

W. Elyard,
Esq.

29 Sept., 1859.

32. "And all such parts of our revenues, arising within our said Colony as hath by any such Governor been appropriated and set apart for the education of youth therein, shall be, and the same are hereby vested in, and placed under the management, care, and superintendence of the said Corporation, to be by them applied and disposed of in aid of the funds aforesaid, in and towards the education of the youth in the said Colony on the principles of the established Church"? That has reference to the appropriation for the orphan schools intended also to have formed part of the income of the Corporation, but the arrangement does not appear to have been carried into effect, and these schools have been and are a charge on the general revenue.

33. If you look to the first clause you will see who are to be the officers; after reciting a number of names it proceeds—"and the nine senior chaplains, or assistant chaplains, appointed, or to be appointed, by us, our heirs and successors, to officiate and perform Divine Service, according to the rites and ceremonies of the Church of England." So that it appears all through that this Corporation is established for the support of the clergy and schools in connection with the Church of England? I think there can be no doubt, looking also at the instructions under which the Deeds of Grant were issued that such was the original intention.

34. That intention has been departed from; can you state under what, and by whose authority, the deviation has been made? I think that in a Minute of Sir Richard Bourke, dated 30th May, 1834, it is first explained what arrangement was proposed with respect to the revenue of the Church and School Estates; and in the Estimates for 1835 provision was made for an agent to manage the affairs of these estates. There is also a despatch of Sir Richard Bourke, dated 30th September, 1833, with the reply of the Secretary of State, dated 30th September, 1835, which formed the basis of Sir Richard Bourke's Church Act, 7th William, 4th, No. 3, dated 29th July, 1836, which may afford further explanation of the subject, and which, together with the Minute referred to, will be found in the published Votes and Proceedings of the former Legislative Council. Subsequently the appropriation at present made was authorized under the minutes and instructions to which I have before alluded.

35. Then, practically, whether by competent authority or not, the original Charter of Incorporation has been departed from? Supposing the construction is right—that it was intended that the lands should be appropriated to the Church of England only—there is so far a deviation, that revenue derived from them is appropriated to the four communions receiving aid from Government, and to other schools than those in connection with that church.

36. Do the proceeds of these lands go into the General Revenue of the Colony? The proceeds do not form part of the General or Consolidated Revenue of the Colony. As in the case of the Police Reward Fund, or trust moneys deposited in the Treasury, the amount is shewn in the statement of receipts and expenditure laid before Parliament; but it is not included in the Consolidated Revenue.

37. There is, of course, an account kept of the expenditure? Yes.

38. Then Schedule C, which relates to the support of the clergy, is supplemented so far by the net revenues of the Church and School Lands? Yes, excepting the portion paid for schools.

39. *By Mr. Nott:* Or to the extent of five-sevenths, without the authority of Parliament? Without the authority of Parliament. The appropriation is made under the directions of the Secretary of State, or of the Royal Instructions.

40. Are you aware that the Royal Instructions advert to this subject at all? The Return laid upon the Table of the Assembly in reply to an Address, on the motion of Mr. Piddington, explains the circumstances under which it appears to have been considered that no order or direction was necessary in the Royal Instructions last issued, with respect to sums reserved for religious purposes, and there is a clause in the Commission of the Governor which provides for the Instructions of the Queen being given through the Secretary of State, by whose authority the distribution of the Church and School Estate Revenue for church and school purposes has been made.

41. *By Mr. Clements:* Had not the Orphan Schools separate support from that derived from the Church and School Lands? Before the establishment of the Church and School Corporation there were estates known as the Orphan School Estates, which were considered to be vested in the Church and School Corporation on its establishment. The management of those schools was under the direction of the Corporation.

42. I see under the 36th clause there are full powers "to dissolve and put an end to the said Corporation"—have they been acted upon? There was first a despatch of the 25th May, 1829, to Sir Ralph Darling, which contained instructions for revoking the letters patent erecting the Church and School Corporation, and appointing Commissioners.

43. *By the Chairman:* In page 7 of the papers laid on the Table, there is a proclamation of the King in Council abolishing the Corporation, and directing the Secretary of State to give the necessary instructions thereon? A despatch, No. 151, of 1833, I believe, enclosed the Order in Council dated 4th February, 1833, for dissolving the Corporation. The instructions referred to in the answer to the preceding question are not in the Colonial Secretary's Office, but are no doubt in the Governor General's Office.

44. *By Mr. Nott:* Which is included in this paper? That order is included with the papers laid before the Council in 1855, but not the despatch.

45. *By the Chairman:* However, the Corporation has been absolutely abolished? Yes; it has been dissolved.

46. This is the proclamation:—"Now, therefore, His Majesty doth, with and by the advice aforesaid, hereby dissolve and put an end to the said Corporation; and the same is by this present Order dissolved accordingly"? That is the Order in Council dated the 4th February, 1833; but the order was made subject to certain provisions of the Charter.

W. Elyard,
Esq.

29 Sept., 1859.

47. It is on condition that these lands revert to the Crown for the same trusts for which they were originally granted? Yes, as stated in the 36th clause of the Charter.

48. *By Mr. Black:* Do you know in what proportion the five-sevenths of the revenue derived from these lands are divided between the four religious bodies? According to their numerical proportion, in the same way as the sum reserved by the schedule for Public Worship.

49. And the other two-sevenths, appropriated for schools, are divided on the same basis, that is, with reference to population? There is, in the first place, an equal division between the National and Denominational Schools, and the distribution to the latter is made upon the same principle as the division of the funds for church purposes.

APPENDIX A.

To all to whom these Presents shall come,—

I, RALPH DARLING, Lieutenant-General commanding His Majesty's Forces, Captain General and Governor-in-Chief of the Colony of New South Wales and its Dependencies, and Vice-Admiral of the same,—send Greeting:—

WHEREAS by His Majesty the King's Instructions under the Royal Sign Manual, bearing date the seventeenth day of July, in the year of our Lord one thousand eight hundred and twenty-five, I, the said Ralph Darling, am fully authorised, empowered, and directed, when and so soon as a certain Corporation then about to be created "for the establishment and support within the said Colony of New South Wales of the Protestant Reformed Religion, "as by law established in England and Ireland, and for the education of youth in the "discipline, and according to the principles of the United Church of England and Ireland," should be established to give and grant, under the Public Seal of New South Wales aforesaid, to the said Corporation certain lands within the said Colony: And whereas by Letters Patent dated the ninth day of March, in the year of our Lord one thousand eight hundred and twenty-six, His said Majesty was pleased to create and appoint a Corporation within the said Colony of New South Wales, under the name and title of "The Trustees of the Clergy and School Lands in the Colony of New South Wales": Now therefore know ye, that I, the said Ralph Darling, in pursuance of the power and authority given and granted to me in and by His Majesty's said Instructions, do hereby grant unto the Trustees of the Clergy and School Lands in the said Colony of New South Wales, their successors and assigns, for the purpose of making provision for the maintenance and promotion of religion and the education of youth in the said Colony, but subject in all respects to the provisions, declarations, and regulations contained in the said Letters Patent of the ninth day of March, one thousand eight hundred and twenty-six; and also subject to the laws and municipal regulations that may now or hereafter apply to the Colony at large, or to the parish, district, or county in which the said land is situated—all that piece or parcel of land situate, lying, and being in the parish of Saint Peter, in the county of Cumberland, containing by admeasurement one hundred acres; bounded on the north-east by a line commencing at the south-west corner of Lock's farm, and bearing south forty-five degrees east forty-eight chains; on the south-east by the north-west boundary of John Foley's farm, bearing south forty-five degrees west, twenty-four chains; on the south by a line bearing west thirty-six degrees and a half, north twenty-nine chains, and south thirty-six degrees and a half, west twenty chains fifty links, and west thirty-six degrees and a half, north five chains; and on the west by a line bearing north twenty-five degrees east fifty-one chains, to the commencing south-west corner of Lock's farm; reserving to His said Majesty, his heirs and successors, all such part of the said land as may be within one hundred feet of high-water mark on the sea coast, or on any creek, harbour, or inlet; also reserving out of the said land the right of making and constructing all highways and bridges which shall be considered necessary by or on behalf of His said Majesty, or any of his successors, or shall be set out by any person or persons lawfully authorised in that respect; and also reserving the right of taking and removing all such stone and gravel, and indigenous timber now growing, and other materials, being the produce of the said land, as shall be required at any time for making or repairing such highways and bridges, or any of them, or for constructing public works or buildings, or for Government naval use, or for other public purposes; and further reserving to His said Majesty, his heirs and successors, all gold and silver mines which may be in the said land; to have and to hold the said piece or parcel of land, with its appurtenances, reserving therefrom respectively as aforesaid unto the said Trustees of the Clergy and School Lands, and their successors and assigns, for ever, subject to the payment of an annual quit rent to His said Majesty, his heirs and successors, of one peppercorn, if demanded. Provided that the said piece or parcel of land hereinbefore described shall be subject as aforesaid to all laws and municipal regulations that may now or hereafter be in force and apply to the said Colony at large, or to the parish, district, or county, or any of them, in which the said land is situated; and also subject to the rules, declarations, ordinances, provisoes, and directions contained in the said Letters Patent creating the aforesaid Corporation relative to the powers thereby given and granted to the said Trustees and their successors.

Given under my hand and the Seal of the Colony, at Sydney, in New South Wales, this third day of February, in the year of our Lord one thousand eight hundred and twenty-nine.

(Signed) RA. DARLING,
Governor-in-Chief.

(Signed) J. DE LA CONDAMINE.
C. H. DARLING.

Entered on Record by me, this third }
day of February, 1829. }
(Signed) ALEX. MCLEAY.

John Hubert Plunkett, Esq., Q.C., and M.P., examined :—

50. *By the Chairman* : You were Attorney General of this Colony for many years? Yes. J.H. Plunkett, Esq., Q.C., and M.P.
51. For how many years? I first arrived, as Solicitor General, in June, 1832, and became Attorney General in March, 1836; in which office I remained until the introduction of Responsible Government.
52. Have you looked into the Charter of Incorporation of the Church and School Lands? I often had occasion to look into it and give my attention to it in the course of my official duty. I regret that I did not know your wish to have my opinion upon the matter until yesterday at a late hour, as I have not had much time to refresh my memory. 29 Sept., 1859.
53. This Corporation was established for the support of the clergy and schools apparently of the Church of England? No doubt the intention in establishing this Corporation was the benefit of the Church of England as the established Church of the Colony.
54. *By Mr. Black* : Exclusively? Yes.
55. *By the Chairman* : I suppose you are aware that they received a very large grant of land? Yes, they had a very large grant of land, vested in Trustees; it was found afterwards better to put Commissioners in the place of Trustees.
56. Do you know what led to that change? I believe the dissatisfaction given by the management under the former system. In No 2 of the printed papers here before the Committee the letters instituting the Corporation are recited, then, that it may be revoked, and that it is accordingly revoked with respect to the Trustees, and it goes on to recite—"after the date of these presents" it is to be managed by five Commissioners, and the five Commissioners are "Our trusty and well-beloved the Reverend and Venerable William Grant Broughton, the Archdeacon of New South Wales; our trusty and well-beloved Alexander Macleay, Esquire, the Colonial Secretary of our said Colony; our trusty and well-beloved Michael Cullen Cotton, Esquire, Collector of Customs of our said Colony; our trusty and well-beloved William Lithgow, Esquire, the Auditor General of our said Colony; and our trusty and well-beloved Thomas Macquoid, Esquire, the Sheriff of our said Colony." The Commissioners were these five officers of the Government.
57. They were to manage these lands under exactly the same restrictions and for the same purposes for which the original Corporation was to manage? The Charter of Incorporation was their only guide. They were only put in the place of the Trustees.
58. The spirit of the institution, if it is to be so called, remained just the same? Yes. There is a reservation to the King, his heirs, and successors, that he shall have full power and authority from time to time "to revoke, alter, or vary any of the provisions, declarations, and conditions, or regulations therein contained, and in their place and stead to establish, institute, and ordain, such other further rules and provisions" as he shall think proper.
59. These Commissioners were appointed to manage the affairs of the Corporation, who were to perform the several duties vested in the said Corporation by the said Letters Patent? They were to manage these lands under the same conditions as those under which they were to be managed by the original Corporation? Yes; I believe there were no rules and orders issued inconsistent with the Charter, until the Charter was abolished and the Corporation was dissolved.
60. In a subsequent passage of the same paper, No. 2, it is stated that "they shall observe and obey all such general or special rules and orders as may from time to time to them be issued for their guidance in the performance of the duties hereby committed to them by the Governor or by the Officer for the time administering the Government of our said Colony, with the advice of the Executive Council thereof." Do you think that passage conveyed to the Crown or to the Governor of the Colony any power of revoking or of altering the terms of the original Charter? No, certainly not; in point of fact nothing of the kind was attempted; the affairs of the Corporation, I always understood, were carried on under the Charter in its original integrity, entirely for the benefit of the Church of England, taking it for granted that that was the established Church of the Colony.
61. Will you look at the Proclamation at the bottom of page 7, by the King in Council,— "Now therefore His Majesty doth, with and by the advice aforesaid, hereby dissolve and put an end to the said Corporation, and the same is, by this present order, dissolved accordingly?" That is the document by which the Corporation was dissolved.
62. That absolutely dissolves the Corporation? Yes; and what follows is—"And the Right Honorable Viscount Goderich, one of His Majesty's Principal Secretaries of State, is to give the necessary directions therein,"—and the necessary directions were given.
63. If you look to the 36th clause of the original Charter of Incorporation you will see that the authority to dissolve the Corporation was reserved to the Crown, and it is stated that "thereupon,"—that is, upon the dissolution of the Corporation,— "all the lands which may by us, our heirs, and successors, be granted to the said Corporation, shall revert and become absolutely vested in us or them, subject to all mortgages and contracts for the sale thereof, lawfully made by the said Corporation to be held, applied, and disposed of in such manner as to us, our heirs, and successors, shall appear most conducive to the maintenance and promotion of religion and the education of youth in the said Colony?" It is quite clear by that that it was originally intended that in case of the abolition of the Corporation the lands should revert to the Crown, but there is a condition to that preserving all contracts and mortgages intact that might have been made before, and that it "shall be held, applied, and disposed of in such manner as to us, our heirs, and successors shall appear most conducive to the maintenance and promotion of religion and the education of the youth in the said Colony." Now, in order to make it more certain—that the title from the Crown should be the more undoubted—an Act was passed after the dissolution. I believe under the instructions from Home,—at all events it was in the time of Sir Richard Bourke—the 5th William IV., No. 11, "An Act for regulating the affairs of the late Corporation of the Trustees of the Clergy and School Lands, and to secure to the purchasers

J.H. Plunkett, Esq., Q.C., and M.P.
 29 Sept., 1859.

"purchasers their titles to certain lands purchased by them from the said Corporation." The recital is long as to the property, the mortgages, deeds, and so forth; and, after the recital, it declares and enacts,—“That all and every deed or deeds of mortgage executed by any person or persons to the late Corporation of the Trustees of the Clergy and School Lands, and all sums of money thereby secured to be paid respectively, and all the lands,” and so forth, “and all debts due to the said Corporation, and all stock of cattle, sheep, or any other property of any kind or description soever which belonged to the said Corporation at the time of its dissolution, became and were thereupon vested in His Majesty, in right of his Crown of England, and are now vested in His Majesty, his heirs, and successors”—so that that came in addition to section 36, and there can be no doubt, looking to this Act and to the section 36, that when the Corporation was dissolved the property reverted to the Crown, and that there was such a title in the Crown as was undoubted after the passing of this Act. But still I find, by correspondence that took place after that despatch from Sir Richard Bourke, that no instructions came to act upon the last part of the section 36 in the Charter, as to how the proceeds should be disposed of in the way “most conducive to the maintenance and promotion of religion, and the education of youth in the said Colony.” The despatch I allude to is published in a Council paper of the day. It is a despatch from Sir Richard Bourke, dated 30th September, 1833, to the Right Honorable E. G. Stanley, Secretary of State for the Colonies. It begins in this way—“Having lately received the Order of the King, in Council, for dissolving the Church and School Corporation in New South Wales, unaccompanied by any intimation of the views of His Majesty’s Government as to the future maintenance and regulation of churches and schools within the Colony, I deem it my duty to submit, for your consideration, such observations upon these important subjects as my knowledge of the state of the country enables me to offer, and to suggest such arrangements as will, in my opinion, meet with the favor and support of the great majority of the colonists, and thereby promote, with the best assurance of success, the religious instruction and general education of the people.” Then he goes on to say that this is a mixed community, and he gives a detailed account of the state of the Church of England, as to the stipends and property of the clergy of the Church of England, and also the state of the Presbyterian, and of the Roman Catholic Churches. The latter part of the despatch is as follows:—“You may thus perceive, Sir, the great disproportion which exists in the support given by the State to schools formed for the use of different denominations of Christians in the Colony; a disproportion not based on the relative numbers of each, but guided, it would seem, by the same principles which have regulated the support afforded to the different churches. It is a subject of very general complaint, I am inclined to think, that schools for the *general education* of the colonial youth, supported by the Government, and regulated after the manner of the Irish schools, which, since the year 1831, receive aid from public funds, would be well suited to the circumstances of this country.” In answer to this despatch, nearly two years after, Lord Glenelg concurs in the views of Sir Richard Bourke; he says, “the successive changes which have taken place in His Majesty’s Government since the receipt of your despatch of the 30th September, 1833, No. 76, and the importance of the subject to which it refers, have occasioned a delay in answering it which I much regret, but which has been in a great measure unavoidable.” Sir Richard Bourke at that time held opinions different from those entertained by Archdeacon Broughton, who afterwards became Bishop of Sydney, and he is informed by Lord Glenelg that Archdeacon Broughton is in future to be Bishop, but in opposition to the views of the Archdeacon, who held that the funds should still be applicable to the Church of England, the recommendation of Sir Richard Bourke was approved, namely,—that the fund should go to the maintenance and promotion of *general religion and education*, so that it was in consequence of the representation of Sir Richard Bourke that the change was caused to be made.

64. The change then has been made by the authority of the Secretary of State? Yes.

65. There is this important question involved, whether the Crown can be a trustee under such circumstances if these lands reverted to the Crown so absolutely as is stated in the Act you refer to, and as appears to be the case in the terms of this clause, can they be regarded as held by the Crown for any special trust? We must look to the history of the case. The change took place under the circumstances I have stated, and the funds have been since applied to the benefit of all denominations that were known in the Colony in the time of Sir Richard Bourke, but they were always kept separately and distinctly for the purposes of religion and education, and by an Act (the same Act that I before adverted to) an agent was appointed for their management. The 2nd section of that Act provides for the appointment of an agent; the 3rd section defines the powers of the agent; and the 4th section enables the agent to recover and grant discharges for debts. It constitutes an agent as the bailiff of the Crown, and gives him all the powers of a bailiff of the Crown to authorise him to distrain. It is under that Act the different agents have been appointed for the mere management of these lands.

66. But still there is the main question, can the Crown be a trustee? In law, the Crown cannot be a trustee. A trustee is amenable to the Court of Chancery, and a writ could not go against the Crown in the Court of Chancery. I believe English history will furnish us with an instance in proof that the Crown cannot be a trustee, in the case of Richard III; he happened to be a trustee for a great many valuable properties when he came to the Crown, but as it would be inequitable to let the strict law take effect, which would invest all the lands in himself as the Sovereign, a statute was passed to meet the equity of the case to vest the lands in the other trustees with whom he had been associated.

67. Under this clause if these lands revert to the Crown for the purposes specified, would they not be supposed to revert to the Crown as a trustee for such special purposes? They reverted to the Crown, but then the Crown had the disposal of them as was thought proper,
 and

and they were dedicated by the Crown to these particular purposes, and have been since kept apart. The practice shews what the dedication was; questions have arisen under the late Lands Sales Act, as to whether they were included in "the waste lands of the Crown." There were different opinions formed upon that subject, but the definition of waste lands of the Crown is found in the 23rd section of the Land Sales Act, 5 and 6 Victoria, ch. 36. "By 'waste lands' of the Crown as used in the present Act, are intended and described any lands situate therein, and which now are, or shall hereafter be vested in Her Majesty, her heirs and successors, and which have not been already granted, or lawfully contracted to be granted to any person or persons in fee simple, or for an estate of freehold or for a term of years, and which have not been dedicated and set apart for some public use"; now it has been held, and the opinion has been acted upon. Doubts have been expressed on the point, but the Crown lawyers of England, and some lawyers here too have had no doubt—that the Church and School Lands did not come within that definition of waste lands, having been granted before the passing of the Act, although they had now reverted to the Crown; and also as they appeared "to be dedicated and set apart for some public use." That is the position in which the question stood, until the passing of our Constitution Act, and it appears to me that the Constitution Act sets the difficulty very much at rest; for although the 43rd section of the Constitution Act uses the term "the waste lands of the Colony," and these probably would be construed to be waste lands, according to the definition in the former Act in these terms, "Subject to the provisions herein contained, it shall be lawful for the Legislature of this Colony to make laws for regulating the sale, letting, disposal and occupation of the waste lands of the Crown within the said Colony." Now although there may be some doubt whether these particular lands are included in the waste lands of the Crown, still as by the 50th section of this Act a civil list is given, and it is declared that "The said several sums mentioned in Schedules A, B, and C, shall be accepted and taken by Her Majesty, her heirs, and successors, by way of civil list instead of *all territorial, casual, and other revenues of the Crown*, including all royalties, from whatever source arising within the said Colony, and to the disposal of which the Crown may be entitled either absolutely or conditional, or otherwise howsoever." I think there can be no doubt whatever that these lands are absolutely given up by the Crown, are now at the disposal of the Legislature, and ought to form part of the Consolidated Revenue, whatever doubts there may have been, or whatever the practice may have been heretofore. I would refer the Committee also to the 58th section of the same Act, and also the Statute 18 & 19 Vic., ch. 56, s. 2. The commencement of that 58th section is as follows:—"The foregoing provisions of this Act shall have no force or effect until so much and such parts and so forth, of certain Acts shall have been repealed." Among other Acts is the "Act for regulating the sale of Waste Land belonging to the Crown in the Australian Colonies,"—"An Act to amend an Act for regulating the sale of Waste Land belonging to the Crown in the Australian Colonies, and to make further provision for the management thereof"—"as severally relate to the Colony of New South Wales and as are repugnant to this Act shall have been repealed and the entire management and control of the waste lands belonging to the Crown in the said Colony of New South Wales and also the appropriation of the gross proceeds of the sales of such lands and of all other proceeds, and revenues of the same from whatever source arising within the said Colony including all royalties mines and minerals shall be vested in the Legislature of the said Colony—provided that nothing herein contained shall affect or be construed to affect any contract or prevent the fulfilment of any promise or engagement made by or on behalf of Her Majesty with respect to any lands situate within the said Colony in cases where such contracts promises or engagements shall have been lawfully made before the time at which this Act shall take effect within this Colony nor to disturb or in any way interfere with or prejudice any vested or other rights which have accrued or belonged to the licensed occupants or lessees of any Crown lands within or without the settled districts under and by virtue of the aforesaid Act of the Parliament passed in the 9th and 10th year of Her Majesty's Reign or of any Order or Orders of Her Majesty in Council issued in pursuance thereof."

68. *By Mr. Clements*: Still that alludes to waste lands—did these Church and School Lands come within the meaning of waste lands previous to that? If these lands are not included within that Act there is no reservation whatever. If the opinions I have referred to be correct, that they were not included in the waste lands, I take it that the Legislature have them now transferred, without any condition or reservation whatever.

69. *By the Chairman*: Supposing they are to be regarded as waste lands? I mean to say if they are not waste lands they do not come within this proviso; they are then absolutely vested in the Legislature; and although it appears they have been dedicated for these purposes, since the dedication of the Corporation, there is nothing in fact to control or to hamper the Legislature in dealing with them as they think most equitable, most conducive to the general interests of the country.

70. It appears that deeds of grant have issued in these cases—we have before us a copy of one of these deeds. (*The Chairman read the same.*) If these grants have been issued in this form may not a question arise hereafter—if the matter is not dealt with now at once—whether they were not appropriated altogether for one particular sect. What is the date of the grant?

71. That is a copy of one of the earlier ones, and is dated 17th July, 1825. These grants apparently are not issued for the purposes of religion and education generally but for one particular sect, so that the dedication so far as grants from the Crown go is for one particular sect—might not a question hereafter arise whether the proceeds of these lands should not be appropriated exclusively to the Church of England? That was the question I understood to be raised in England in 1834 by Bishop Broughton. I believe he went Home for the purpose of raising the question and enforcing his views upon the Home Government, but he failed, and the views of Sir Richard Bourke were acted upon by the Government. I apprehend

apprehend that they considered the dissolution of the Corporation, together with the Act I have referred to vesting all the property, lands, and otherwise after the dissolution of the Corporation absolutely in the Crown, set the question at rest.

72. Then these grants are absolutely null and void? So I think. I deduce from the circumstances that the Imperial Government must have been so advised.

73. But the fact of grants from the Crown having been issued does not in any way whatever prevent the Legislature from dealing with these lands? I think not.

74. There is no repudiation involved in any such course of proceeding? It was the circumstance of their having been granted that raised a doubt in my mind as to their coming under the definition of "waste lands" under the last Land Sales Act, the question also arose with reference to "forfeited lands." In the case of Tawell, the Quaker, who was hanged in England, and who possessed land in this Colony—some at Woolloomooloo—there was no doubt as to his personal property being vested in the Crown the moment sentence was passed, but it was necessary to hold an inquisition to discover what land he died possessed of, in order that it might be forfeited to the Crown. The Crown was willing to give to Tawell's wife and to his friends at Home all the property, but it was found it could not be done without having an inquisition held here, and then the question arose on the inquisition whether the land did not become, by reason of the forfeiture, "waste land of the Crown," and, if so, whether it would not come under the operation of the Land Sales Act, and be out of the power of the Home Government to give it up. However, the Crown Law Officers of England, as I understood, give it as their opinion that it was part of the casual revenue, and not part of the waste lands of the Colony, and that therefore the Crown could exercise its full power in giving it back.

75. *By Mr. Black:* You stated that you considered the subsequent grants invalid—on what ground do you consider them invalid? They were given to trustees enumerated as such upon certain trusts pointed out in the Charter, and when the Charter was dissolved the trustees fell along with the Charter, and there were no persons to carry out the trust. The 36th section of the Charter itself reserved to the Crown the power to revoke at any time, and this Act the 5th William 4th, which I have before read, declaring that all the property that was vested in the trustees of the Clergy and School Lands at the time of its dissolution became and were thereupon vested in His Majesty in right of His Crown of England.

76. Is there anything in that Act, from beginning to end, shewing that the lands which reverted to the Crown reverted for any special purpose? No.

77. *By Dr. Wilson:* There is one thing which appears to me to be very clear, that is, that before 1831 the Crown did not consider that these were absolute grants—that they must be conditional grants—for it is stated here, in the papers relating to the Clergy and School Lands, that the most valuable portion of the land at Botany Bay has been resumed. That land never could have been an absolute grant, or the Government could not have resumed it? It appears by Sir Richard Bourke's letter that I before referred to, that all the property granted to the Church and School Corporation are over and above the glebes granted to the Chaplains of the Church of England. He says, "The Chaplains of the Church of England are provided with glebes of forty acres each, or with a money allowance in lieu, and with houses or lodging money. No advantage of this kind, obtained at the public expense, is possessed by the clergy of the Established Church of Scotland, or by the Roman Catholics, if I except a grant of forty acres for the use of the Minister of the Scots Church at Bathurst. A distribution of support from the Government, of so unequal an amount as that which I have just described, cannot be supposed to be generally acceptable to the colonists who provide the funds from which this distribution is made." I have always considered that the operation of the Church Act was more confined than it was originally intended, and the only reason for it is that there were only four denominations known in the Colony at the time; but the plan intended, and authorised by the Secretary of State, was one more expansive to meet the requirements of all, and to put all denominations, as they might spring up, on the same footing.

78. *By Mr. Morris:* Reverting to the 36th section of the Letters Patent, where the power is given to the Crown to dissolve the Corporation; surely that power is subject to the condition that the Crown shall employ the proceeds of these lands in the maintenance and promotion of religion and education? Yes, that was the intention.

79. Then if you look to the 38th section you will see what religious instruction and education these lands were intended to be appropriated to the maintenance of for all time to come? But, although Sir Richard Bourke states in his letter, as his reason for writing, is that no instructions had come to him, he suggests the plan that was afterwards adopted—that plan is embodied in the Church Act, and the Church Act then is put in lieu of what was before intended as it relates to the maintenance of religion, and instead of the grants for education in connection with the Church of England, the National System of Education was devised by Sir Richard Bourke, and sanctioned by the Queen through the Secretary of State. Then comes the schedule to the Constitution Act, giving a sum of £28,000 per annum to the Queen as an equivalent for all the property she gives up—the Church and School Lands, according to my notion, included. That is part of the contract which I spoke of as made with the Crown, under the Constitution Act, and if that is withdrawn there great awkwardness may arise. The 50th section of the Constitution Act is as follows:—
"The said several sums mentioned in Schedules A, B, and C, shall be accepted and taken by Her Majesty, Her Heirs, and Successors, by way of Civil List, instead of all territorial, casual, and other revenues of the Crown (including all royalties) from whatever source arising within the said Colony." If this is an equivalent for the Church and School—if you take away what is given as an equivalent, whether the other ought to return or not, may be a very serious and embarrassing question. It is for the Legislature to decide whether the dedication of those lands, as they have, up to the present time, been kept and set apart for religious and general education, shall continue or not. It is a matter of policy rather than law.

TUESDAY, 4 OCTOBER, 1859.

Present:—

MR. MURRAY,		MR. NOTT,
MR. CLEMENTS,		DR. WILSON,
MR. MORRIS.		

THE HON. TERENCE AUBREY MURRAY, ESQ., IN THE CHAIR.

Francis George Campbell, Esq., called in and examined:—

80. *By the Chairman*: You hold some office under the Government in reference to Church and School Lands? I am the Agent. F.G. Campbell
Esq.
81. How long have you held that office? Since the 28th of January last.
82. Can you tell the Committee what is the extent of these lands? I think about 500,000 acres. 4 Oct., 1859.
83. Can you mention where they are situated? Principally in the Counties of Gloucester, Bathurst, St Vincent, Northumberland, Durham, Cumberland, and Camden.
84. Can you state the extent in each County? Gloucester, about 176,000 acres; Bathurst, 136,000; St. Vincent, 44,000; Northumberland, 20,000; Durham, 29,000; Cumberland, 28,000; Camden, 11,500. Total, 444,500 acres.
85. Can you state how these lands are at present occupied? By tenants who have purchased the right of occupation at auction.
86. The whole of them? Almost the whole.
87. What extent is unoccupied, that is, not let? I could not answer that question without reference to the plans. The plans are not in my charge; they are in charge of the Surveyor General at present: and I should have some difficulty in getting at them. I can tell what lands are occupied, but not what are not occupied.
88. All the receipts go through you? Yes.
89. Do you know if any of the land has been sold? Not for a good many years.
90. When was the last sale of any leases? Some three or four years ago.
91. For what periods have the leases been granted? Country lands for twenty-one years, and the town lands for ninety-nine years, that is, the lands at the Glebe and at Botany. The rent of the country lands increases every seventh year.
92. Has the tenant the right of giving up the lease at the end of seven years? Yes, at the end of each period of seven years.
93. Has the Government the right of terminating the lease also? Only in consequence of non-payment of rent.
94. Then the tenant has the option of renewal every seven years, but the Government has not the option of withdrawing the land from lease until the end of the term of twenty-one years? Not unless the tenant fails to pay the rent.
95. *By Dr. Wilson*: Is there not a clause in the lease empowering the Government to resume the land at pleasure on giving compensation? I think not; but I can furnish a copy of the lease as now granted. (*Vide Appendix A.*) I have never had occasion to issue any leases yet, so that I have not referred directly to the terms. In fact I am only collecting the moneys and paying them in to the Colonial Treasurer as a clerk in his office.
96. But you hold the appointment of Agent? Yes. It was proposed to abolish the office of Agent when Mr. Stirling went to England in November, 1858; but it was subsequently found that by an Act of Parliament the office could not be abolished without another Act, and then the Government appointed me as Agent.
97. Do you hold your appointment in the Treasury still? Not the same appointment, but another in the same office.
98. Do you get a separate salary as Agent for Church and School Lands? No, nothing at all.
99. *By the Chairman*: Then you are virtually doing the duty of the office without receiving any remuneration whatever? Yes.
100. Can you tell the extent of the town lands? Not without reference to the maps.
101. How are these town lands let? By auction.
102. At so much per acre? Yes; it is fixed by the Surveyor General.
103. What is the maximum rent paid? I am not certain, but I think there is some as high as £50 an acre.
104. What is the lowest? Portion of the grant at Long Bay is leased for 99 years at about £1 per acre. This grant has been incorrectly surveyed, and there is therefore a probability of some difficulty in the collection of the rent.
105. Can you state the average? The average rate is about £25 per acre per annum.
106. What are the gross proceeds of all these lands? About £5,000 a year.
107. What is the expense of collection? The expense of collection is nothing now.
108. *By Dr. Wilson*: Does the sum you have named include the proceeds from town, country, and suburban lands? Yes.
109. *By the Chairman*: Not more than £5,000? Very little more.
110. A short time ago the net proceeds were about £6,000 a-year? I think the largest commission paid to the Agent has been £275 a-year; that would make it, at five per cent., under £6,000.
111. Are you quite clear that the total rent is under £6,000 a-year? I am almost certain of it.
112. *By Mr. Clements*: How do the country tenants pay their rent; do they send it down to you here? Yes; principally by post.
113. There is no agent employed in collecting in the country districts? No.

- F.G. Campbell Esq.
4 Oct., 1859.
114. Can you say whether these lands are not principally held by middle men, who sub-let them? I do not think they are principally. Mr. Lawson and Mr. Icely, and others of the same class, hold very large blocks, and the Australian Agricultural Company also.
115. Could you tell nearly about the number of tenants who hold the whole of the country lands? About two hundred altogether.
116. *By the Chairman*: Will you furnish a tabular statement shewing the extent of these Church and School Lands,—how they have been disposed of, that is, whether by sale or lease; the names of the purchases and lessees; the extent held by each individual; the rents paid; the dates of the leases; and the periods they have to run,—distinguishing also, town, suburban, and country lands? Yes. (*Vide Appendix B.*)
117. How are the proceeds of these lands applied? Five-sevenths to church purposes and two-sevenths for school purposes. The portion set apart for church purposes is appropriated, according to the Census of 1851, to the different denominations; and the two-sevenths for schools are divided thus:—one-seventh for the National Schools and one-seventh for the Denominational, the latter being divided among the different denominations according to the same Census.
118. By what authority is this appropriation made; is it by consent of Parliament or by the Executive Government? By the Executive Government only, I think.
119. The money is not in any way paid into the General Revenue? No; it is kept as a distinct account.
120. Schedule C is supplemented by five-sevenths of the amount? Yes.
121. You are quite clear on that point that it forms no portion of the Consolidated Revenue? Yes.
122. Then the sum appropriated to public worship is increased by five-sevenths of the proceeds of these Church and School Lands and the Educational Fund to the extent of two-sevenths? Yes.
123. I think you said you would furnish a copy of the lease? Yes.
124. *By Mr. Nott*: Are the leases printed? Yes.
125. *By Dr. Wilson*: Will you be good enough to compare the form of lease at present in use with the form originally issued, and see whether the conditions are the same? On comparison of the forms I find that there is no material difference, and that I was in error in stating that none of these lands could be resumed by the Government until the expiration of the lease. Those leased for 21 years can be resumed at any time on payment of the value of the unexpired portion of the lease, and of the improvements as fixed by arbitration.
126. *By the Chairman*: Have any of these lands been leased since you have had the management? No.
127. Do you know if any of the leases are falling in? I think not for three or four years.
128. Have you any idea of the number that will be falling in then? There will not be many so soon as that.
129. *By Dr. Wilson*: When were leases of these lands first granted? The first sale of leases was held in January, 1841, but the first lease does not appear to have been granted till October of the same year.
130. *By Mr. Nott*: Are the Government letting any of these lands now? No.
131. When were the last let? Some three or four years since.
132. Then the remainder of the lands are all lying unoccupied? Yes.
133. Is there no provision for their occupation at all? No.
134. Can no one get them by applying for them? I think not, except such as have already been put up to auction; they may be taken under lease at the upset price.
135. No portion of these lands has been actually sold since you have had the agency? No, and, I think, not for many years previously.

APPENDIX A.

THIS INDENTURE made the _____ day of _____ in the year of Our Lord one thousand eight hundred and _____, between Her Most Gracious Majesty Queen Victoria, of the one part, and _____ in the Territory of New South Wales; of the other part.

WITNESSETH, that in consideration of the sum of _____ now in hand paid to us, being one year's rent in advance, and of the rent hereinafter reserved, we of our special grace do demise and lease unto the said _____ his executors, administrators, and assigns, subject to the conditions, reservations, and provisoes hereinafter mentioned, all that piece or parcel of land in our said territory, containing by admeasurement _____ be the same more or less, situate in the county of _____ parish of _____ being a portion of certain lands formerly belonging to the late Corporation of the Trustees of the Clergy and School Lands,

with all the rights and appurtenances thereto belonging: To hold the said piece or parcel of land, hereby demised, unto the said _____ his executors, administrators, and assigns, from the _____ day of _____ for and during, and unto the full end of the term of ninety-nine years, from thence next ensuing, and fully to be complete and ended, terminable, nevertheless, as hereinafter mentioned: Yielding and paying therefore yearly and every year, during the said term of ninety-nine years, unto us, our heirs and successors, the clear yearly rent or sum of _____ by even half-yearly payments in advance, commencing on the _____ day of _____ now next, that is say, on the _____ day of _____ and the _____ day of _____ in each and every year, during the said term.

And

And the said doth hereby for himself, his heirs, executors, and administrators, F.G. Campbell
 covenant with Her said Majesty Queen Victoria, her heirs and successors, in manner Esq.
 following, that is to say; That he, the said his heirs, executors, and administrators,
 shall and will, during the term hereby granted, well and truly pay, or cause to be paid 4 Oct., 1859.
 the said yearly rent hereinbefore reserved, on the days and times and in manner herein-
 before appointed for the payment thereof: Provided always, that if the said rent shall be at
 any time unpaid for the space of twenty days after the same shall become due, although no
 formal demand shall have been made thereof, it shall be lawful for us, our heirs and suc-
 cessors, by our Governor for the time being of our said territory, or for the agent for the
 time being of the said Church and School Lands, or for any person or persons authorised by
 our said Governor, or by the said agent in that behalf, to put an end to the term hereby
 created, by a notice to that effect in the New South Wales *Government Gazette*, or to re-enter
 upon the said land or any part thereof, with its appurtenances, and thence to remove the
 said his executors, administrators, and assigns, and all tenants and occupiers of
 the said land or any part thereof, and the term hereby created, shall, in either of such cases,
 cease and be void to all intents and purposes; provided further, that it shall and may be
 lawful for us, our heirs, and successors, by our Governor for the time being of our said
 territory, or for the agent for the time being of the said Church and School Lands, or for
 any other person or persons authorised by our said Governor, or by the said agent in that
 behalf, with or without surveyors and workmen, twice or oftener in every year during the
 said term, at all reasonable times in the day to enter and come into and upon the said land
 and premises hereby demised, or any part thereof, and all buildings and erections which
 theretofore shall have been erected and placed thereon, to view such and see the state and
 condition of the same, and of all injuries, decays, defects, and want of reparation and amend-
 ment, which upon every such view or views shall be found, to give or leave notice or warning
 in writing, at or upon the said demised premises, unto or for the said his executors,
 administrators, and assigns, to repair and amend the same within three calendar months then
 next following, within which said time or space of three calendar months next, after every
 such notice or warning shall be so given, or left as aforesaid, he the said for himself,
 his heirs, executors, administrators, and assigns, doth hereby covenant, promise, agree, to and
 with us, our heirs and successors, to repair, remove, and amend all such injuries, decays,
 defects, and wants of reparation and amendment accordingly.

*In witness whereof the Seal of the Territory of New South Wales
 is affixed; and to the affixing whereof is witness our trusty
 and well-beloved our Captain-General and Govern-
 in-Chief of our said Territory, and the said
 Lessee hath set his hand and seal, the day and year aforesaid.*

Signed, sealed, and delivered, by the said }
 in the presence of }

Entered on record by me, in Register of Church and School Leases, No. pages
 this day of one thousand eight hundred and

Colonial Secretary and Registrar.

APPENDIX B.

*Office of the Clergy and School Estates,
 19 October, 1859.*

Sir,

Owing to the very imperfect state of the records in my possession—the very loose manner in which the books and other documents appear to have been formerly kept—and the confusion into which the whole matter was thrown when it was sought to abolish the office of Agent—some of the records having been sent to this office—some to the Department of Lands—some to the Survey Office—while my predecessor had left the Colony before I knew the office was to devolve on me, and as I could find no one who knew anything of the management of these lands, was compelled to learn my duties from the documents entrusted to me. I cannot, in the short time allowed me, find sufficient reliable data to justify me in adding to the enclosed statement columns shewing the land formerly sold and the names of the purchasers; nor can I, without considerable expenditure of time, tell even the exact quantity of land in each county forming the Church and School Estates. I applied to the Acting Surveyor General for information respecting their extent and position; the area mentioned by him as comprising their whole extent in some counties is however less than the portions actually leased. I presume the maps in his possession only shew the lands originally granted to the Corporation.

The only large block which I know to be unoccupied is the grant at Botany of 4,004 acres. This was surveyed in 1854, and laid out in suburban allotments, but only a few acres actually let, (for 99 years) owing to some inaccuracy in the survey.

With the exception of this, and 219 acres laid out some years since as the village of Blayney, near Careoar, I regret that I have no means at present of ascertaining either the position or extent of the small portions of the Estates remaining unproductive.

I have, &c.,

F. G. CAMPBELL,

Agent.

The Chairman of the Select Committee
 on Church and School Estates.

[Enclosure

[Enclosure to Appendix B.]

STATEMENT, shewing the present disposition of the Clergy and School Estates.

F. G. CAMPBELL,
Agent for the Clergy and School Estates.

Treasury,
19 October, 1859.

APPENDIX C.

F.G. Campbell
Esq.

4 October, 1859.

4 Oct., 1859.

Sir,

I think I made an error this morning with respect to the reservations in the leases of the Clergy and School Estates.

Those leased for 99 years can only be resumed by the Government in the event of non-payment of rent; whereas the lands leased for 21 years may be resumed at any time on payment to the lessee of the value of the remaining portion of the lease, and the price of the improvements, as fixed by arbitration.

I think I included both classes in the same category.

T. A. Murray, Esq.,
Chairman of the Select Committee on
Church and School Estates.

I am, &c.,
F. G. CAMPBELL,
Agent.

TUESDAY, 11 OCTOBER, 1859.

Present:—

MR. MURRAY,
MR. WILSON,
MR. PARKES,
MR. BLACK,

MR. MORRIS,
MR. WILSON,
MR. EGAN,
MR. CLEMENTS.

THE HON. TERENCE AUBREY MURRAY, ESQ., IN THE CHAIR.

The Honorable Lyttelton Holyoake Bayley, Esq., called in and examined:—

136. *By the Chairman:* You are Attorney General, Mr. Bayley? Yes.
137. The Committee is desirous of having your opinion as to the position of the present Church and School Lands in the Colony, in regard to their ownership for the trusts under which they are held—have you at all looked into the question? I looked to this yesterday for the first time—having been engaged last week; I yesterday made inquiries as to the state of this question; what I was told was this—and perhaps the Committee will correct me if I am wrong:—It is a simple question of whether the Crown is now in possession of these lands, clothed or not clothed with certain trusts—in other words the land was granted to a Corporation for church purposes; that Corporation was abolished by law, and the property escheated to the Crown; the question is whether the Crown is now bound by those previous trusts—or whether the Crown has absolute power over the lands irrespective of any trusts at all—that, I am told by one of my colleagues, is the origin of this matter; if I am wrong I shall be glad to be corrected. I have not seen the papers—but a very careful and elaborate opinion was given by Mr. Manning and Mr. Darvall in 1856, on the subject, and I was told, after forming my own opinion on the matter, what was the tenor of their opinion. The papers are in the Colonial Secretary's Office, and I have not had time to look at them.
138. Do you know the purport of their opinion? I am told it is that the trust subsists, or rather that the trusts subsist. I have not seen the document at all; but on the mere abstract question I am prepared to agree with them.
139. I suppose you are scarcely prepared, without the documents before you, to enter fully into the case and give an opinion on it? I am told that is the simple question which I have stated—and assuming that to be the question (and I believe it is) I should be prepared to give such an opinion as I have been able to form in the short time I have had to consult the authorities.
140. Have you seen the original Charter of these Church and School Lands? No, I have not.
141. *By Mr. Black:* Don't you think that it would be desirable, before you committed yourself to an opinion, to see all the documents? I believe, glancing over it (*the Charter which had been handed to witness*) the statement given by me yesterday corresponds with what I have said existed. By the 36th section of the Charter I see power is given to dissolve the Corporation if it were expedient to do so, and, by the Order in Council of the 4th February, 1833, that power was exercised, and the Corporation dissolved.
142. *By Mr. Wilson:* There are also powers given with regard to the land? That is not inconsistent with the opinion which I have formed, that the resumption by the Crown does not annihilate the trusts.
143. *By Mr. Murray:* You think the resumption, under such circumstances, did not annihilate the trusts of the Corporation which were existing at the time the Charter was granted—they continue? That is what I am disposed to think.
144. Will you please look at the 4th section of the Charter of Incorporation? I may say when I go over my evidence, and have looked carefully at the matter, if I see any reason to modify my opinion I will do so.
145. Is the continued resumption and the trust inseparable? If any trusts did exist, the Crown would not take the land absolutely but subject to the trusts—it could not take them otherwise. I may say that this is a question of extreme difficulty; in looking into the authorities I find there is a case in which the point is touched on by Lord Henley 100 years ago, although he expressed an opinion it was not necessary for the decision of the case, but he

The Hon.
L. H. Bayley,
Esq.

11 Oct., 1859.

The Hon. L. H. Bayley, Esq. he mentioned such a point might arise, and gave his opinion stating he had searched the authorities for two centuries, and found nothing at variance with it.

146. Do you see who were incorporated in the first instance? Yes.

11 Oct., 1869. 147. You see the Governor, General Darling, the Chief Justice of the Supreme Court, the several Members of the Legislature, the Archdeacon Scott, Alexander M'Leay, Esq., Saxe Bannister, Esq., John Stephen, Esq., nine senior Chaplains and their successors, of the Church of England, shall be a body politic and corporate, with succession, and so on—do you see any mention made of other clergymen besides clergymen of the Church of England? No, I do not.

148. Will you be good enough to look at the 23th section? In answer to that I may state I think I doubt if the test and Corporation Acts were repealed,—then I forget exactly what year they were repealed,—they were subsistent, I think.

149. Would the repeal of those Acts annihilate the trusts? No; they might account for only one body, the Church of England being included. Catholic emancipation did not take place till 1829, therefore I do not think the fact of persons in the Church of England being the only persons mentioned affords a topic for argument.

150. Will you look at the 26th section? Yes.

151. The appropriation of the proceeds in the account referred to in that section is limited apparently to the application of it to the established Church of England in this Colony? That is the point, it may be for the reason I have alluded to.

152. *By Mr. Wilson:* Do you think the Scotch union was in existence then? It was, certainly, long before.

153. *By Mr. Murray:* Will you look at the 30th section—"And we do further direct and ordain that the schools so to be established as aforesaid, shall be subject to the order, direction, and superintendence and control of the clergyman or minister of the Church of England for the time being, officiating in the church of and belonging to the parish in which any such school may be established, and that the Bishop, or in his absence, the Archdeacon for the time being of the said Colony shall be, and he is hereby constituted and appointed the visitor of all the said schools throughout the said Colony." Does that apply to schools generally of all denominations, or is it limited to the Church of England exclusively? I see no reason for construing this clause differently from the ordinary manner in which one construes ordinary documents; one of the cardinal rules is, you are to take the language in its ordinary grammatical sense, and as clergymen of the Church of England are alone mentioned in this clause, on the principle that the expression of one is the exclusion of the others, I should certainly say that this is limited in the manner designated to clergymen in the ministry of the Church of England. I do not see how you can incorporate with a trust parties not mentioned in it.

154. Look at the 32d clause—"And it is our will, and we do further declare, that all and every the lands and tenements within our said Colony heretofore appropriated and set apart by the former Governors of our said Colony, or any of them, for the maintenance and education of male or female orphans, and all such parts of our revenues arising within our said Colony as hath by any such Governor been appropriated and set apart for the education of youth therein, shall be, and the same are hereby vested in and placed under the management, care, and superintendence of the said Corporation, to be by them applied and disposed of in aid of the funds aforesaid, in and towards the education of youth in the said Colony in the principles of the established Church?" That again appears to me to mean the established Church of England and Ireland.

155. Look at the 33rd section—"And we do further grant and declare, that all the lands heretofore set apart within the said Colony for the support of the clergy of the established Church, and known by the name of the Glebe lands, or by whatever other name the same may be known, shall from and immediately after the death, resignation, removal, or other avoidance of the chaplain or clergyman now in the occupation and enjoyment thereof respectively, pass to and become vested in the said Corporation, upon, under and subject to the trusts, and to and for the intents and purposes hereinbefore declared respecting the other estates of the said Corporation?" That appears to contemplate a restriction to the Church of England.

156. Then it appears to you that the trusts involved in this Corporation as established were trusts exclusively in favor of the Church of England? If the Crown under section 36 had the power of revocation of the Corporation, and of exercising the trusts itself, that trust still was to be exercised in the terms of the original charter for the purposes set out therein.

157. You state the revocation does not annihilate the trust? That is my opinion. I find the 37th clause is as follows:—"And we do further will and ordain, that it shall be lawful for us, our heirs and successors, from time to time, as occasion may require, to revoke, alter or vary, any of the provisions, declarations and conditions, or regulations herein contained, and in their place and stead to establish, institute and ordain such other further rules, orders, and provisions, for the better conduct of the affairs of the said Corporation, or for the better regulating of the constitution thereof, or otherwise in respect of the matters aforesaid, or any of them, as to us, our heirs and successors, may seem meet. Provided, nevertheless, that no such revocation, alteration, or variation as aforesaid, and that no such new rules, orders of provisions, as aforesaid, shall be established, except by Letters Patent, to be issued under the Great Seal of our said Colony, by the Governor or Acting Governor thereof for the time being, in pursuance of an instrument to be to him for that purpose issued by us, our heirs and successors, under our and their Royal Sign Manual." I don't like to pledge myself that the Crown has not the power of creating fresh trusts.

158. Do you think that under this section 37 the Crown might revoke all the trusts, and establish new ones? Allow me to look at the matter first. The 38th clause appears to render clear what

what I will not say was a doubtful point even, but if it had been doubtful it appears to me to provide exclusively for the education in the doctrines of the Church, or, to use their own language, "for the religious instruction and education in the principles of the Church of England of the whole of the inhabitants of the said Colony."

The Hon.
L. H. Bayley,
Esq.

159. Are you of opinion the trusts were created especially for the benefit of the Church of England Clergy and Schools? Yes.

11 Oct., 1859.

160. And could that trust be revoked? Before answering that question I should like to look into it more closely. I am disposed to think that, considering the Corporation was, by Order of Council of the 4th February, 1833, dissolved, and put an end to, that the power given to the Crown by the 37th section or clause of the Charter of Incorporation cannot be exercised as there is nothing to act upon.

161. But at the second paper, page 7, you will see a recital, that it was lawful for the Crown to revoke the trust, and the following passage occurs—"We do hereby ordain and declare, that in place and stead of the provision, declaration, conditions, and regulations, hereby revoked as aforesaid, the affairs of the said Corporation shall, from and after the date of these presents, be managed by five commissioners, who are to perform the several duties vested in the said Corporation in and by the said Letters Patent, and we do hereby nominate and appoint our trusty and well-beloved the Reverend and Venerable William Grant Broughton, the Archdeacon of New South Wales; our trusty and well-beloved Alexander Macleay, Esquire, the Colonial Secretary of our said Colony; our trusty and well-beloved Michael Cullen Cotton, Esquire, Collector of Customs of our said Colony; our trusty and right well-beloved William Lithgow, Esquire, the Auditor General of our said Colony; and our trusty and well-beloved Thomas Macquoid, the Sheriff of our said Colony; to be Commissioners to manage the affairs of the said Corporation, and to perform the several duties vested in the said Corporation in and by the said Letters Patent accordingly." That appears to be morely a change of trustees as far as I have gone. This appears merely to be substituting for the numerous trustees in the Charter of Incorporation the smaller body of five.

162. Does that alter the trust? There would be no alteration in the trust unless there were express words altering it. I see, in the latter part of the instrument, it is stated—"We do hereby reserve to ourselves, our heirs, and successors, full power and authority from time to time, as occasion may require, to make, ordain, and establish all such new rules, orders, and provisions in respect to the matters aforesaid or any of them, as to us, our heirs and successors, may seem meet;" that does not appear to touch the trust, the mere fact of appointing Commissioners shews something to act upon.

163. Please refer to page 8, that portion where the whole thing is abolished, it is there stated—"Whereas it doth appear to His Majesty, with the advice of the Privy Council, expedient to dissolve and put an end to the said Corporation: Now, therefore, His Majesty doth, with and by the advice aforesaid, hereby dissolve and put an end to the said Corporation, and the same is by this present order dissolved accordingly?" That appears to me to be precisely in accordance with the summary of what I understood to be the question as to the trusts. The question is whether the trusts subsist.

164. If it does subsist it is vested in the Crown? If the trust does subsist the Crown is the trustee.

165. Then, if the Crown is the trustee, is the Crown limited in the exercise of the trust by the conditions that have been imposed in the original Charter and which at that time had not been revoked? That appears to be a question of some little difficulty, because to answer that question we must see whether there is not power to alter the regulations given by the 37th clause. My impression is, without giving a strong opinion on it, that the Crown has not the power under the 37th clause of making fresh regulations, because I see these regulations are defined to be for the better conduct of the affairs of the said Corporation. Now the Corporation has ceased to exist, therefore the Crown cannot make rules. It would be apparently inconsistent that the Crown should have the power to make regulations for the conduct of the Corporation after the Corporation had ceased to exist, these rules being described as "for the better regulation of the constitution thereof;" the same objection is supported further on where it goes on to say—"or otherwise in respect to the matters aforesaid or any of them." I do not like, without further consideration, to say whether the Crown has the power under these words of altering these provisions. I think the question one of considerable difficulty.

166. That is a question you would like to consider? From the opportunities I have had of consulting the authorities, it appears to me to be perfectly settled that where a Corporation has become incapable of affecting the objects for which it was originally constituted it ceases to exist, and the King or Crown can remodel the old Corporation or create a new one. The question has frequently been before the Courts; there is one case under the old Municipal Corporation law of England. If the Committee would like to have a statement on the matter I would refer to the books which I brought with me for the purpose of supplying the information. I have read all the authorities I have been able to look at during the three or four hours I have been able to devote to the matter, and I have no hesitation in saying that is the law on the subject. There is one case in the Court of King's Bench decided in 1797, on a motion for *quo warranto* to shew by what authority a person held the office of mayor. Queen Elizabeth granted a Charter to the town, and for some reason or other the Charter was considered by the law officers invalid. In the reign of George I, he created a fresh Charter, and the question was whether the original Charter had been abolished; it was argued twice very elaborately; the law as to the objects for which the Corporation was incorporated was discussed, and it was decided that when these objects cannot be performed the Corporation dies a natural death. The case is the *King v. Passmore*, 4 Term Reports—and the

marginal

The Hon. marginal note is as follows:—"when an integral part of a Corporation is gone, and the Corporation has not the power of restoring it or doing any corporate act, the Corporation is so far dissolved that the Crown may issue a new Charter."

L. H. Bayley,
Esq.
11 Oct., 1869.

167. That is the decision? Yes.

168. Does it appear that the Corporation under the new Charter did not carry out the trusts of the old? I don't think it does. Perhaps I may be permitted to read a short extract, which appears to bear on this subject:—Mr. Justice Ashurst in the case of the King *v.* Passmore, said, "It may be proper to consider what is the end and intention of creating Corporations aggregate of the kind now under discussion; the principal end is for preserving good order and government within the limits of the towns in which they are established—they are not merely temporary institutions, but are intended to have perpetual succession, therefore they must have the means of preserving that succession; and whenever a Corporation is so far reduced by negligence or accident, as to be inadequate to the purposes of government, and to have lost the power of continuing the succession for want of an integral part, it is virtually dead, for it is no longer capable of answering the ends of its institution; and as it was originally created for the public good, and not merely with a view to the private interest of individuals whenever it can no longer perform these functions, which is a condition incident to its incorporation, the Crown ought not for the sake of a few individuals to be restrained from exercising its prerogative in granting a new Constitution for the benefit of the inhabitants of the place, whose interest the Crown had in view in the original incorporation. This Corporation was in that state at the time of the new Charter—it could not continue its own existence, nor do any corporate act,—then what should in law or reason prevent the Crown from interposing? But it has been intended that the old Corporation was not dissolved, because some of the natural members were in existence, and that there cannot be two Corporations at one time in the same place with co-extensive powers. I admit the latter part of the position to be true, namely, that there cannot be two such effective Corporations in the same place, for instead of good order that would only be productive of anarchy; but I deny the former position, for I say when the old Corporation was reduced to such a state as to be incapable of continuing its existence, and of doing any corporate act, it was extinct as a body corporate."

169. Then according to that, the Crown can establish new trusts? In this particular case it can; the present case of the Church and School Lands is not identical with that of the King *v.* Passmore, because the Corporation there is appointed to the purpose of keeping good order within the limits of the town in which it is established; here there are certain specific terms. Under this Charter of Incorporation it may be a question whether the Crown now has a right to alter the destination for which these lands were originally granted.

170. You think it doubtful if the proceeds of the land derived from rents and sales of land, can be lawfully devoted to other purposes than those set out in the original Charter? Very doubtful, I think it cannot; the Crown is in the place of the trustee, and the trusts continue.

171. You are of opinion from the original Charter that the Corporation was established for the benefit of the Church of England exclusively? Certainly.

172. Do you know how the proceeds of this land have been applied? I do not know; the papers have not come under my notice.

173. It is a fact that they have been distributed among the various denominations—it appears from the evidence that Schedule C has been supplemented to the extent of five-sevenths of the net proceeds of these lands, for some years past—then according to your view of the law of the case such a distribution was illegal? Assuming the facts to be as you state, I think so.

174. *By Mr. Black:* Do you not think that that such a departure from the original Charter renders it legal? I think not. I think the Crown is bound by the trust, and however illegally it may have acted, and however long, it will not alter the matter; mere prescription will not make an illegal act legal. I may mention that some persons have entertained the opinion that the King cannot be a trustee. I find, after looking at the authorities, he can be. You can easily proceed against an ordinary trustee in a Court of Chancery by a subpoena, but you cannot compel the King to perform his trust; but this does not prevent him from acting as a trustee. It is laid down in one of the best law books on the subject (Lewin on Trusts) that the King can be a trustee.

175. *By Mr. Murray:* Is there any peculiarity in the trusts the Crown can exercise? The Crown can exercise any trust for any purposes general.

176. Can the Crown be a trustee for any purposes whatever? Not for an illegal purpose, but I am not aware of any limitation.

177. *By Mr. Parkes:* Has that been decided in a late case? I find it in "Sanders, on Uses and Trusts," 5th edition, 1844. I may, perhaps, read a short passage as this is an uncommon point. I may mention this is considered to be the best essay on trusts. He says in page 388—"The modern exercise of trusts differs, perhaps, in no instance so essentially from the system of uses as in the construction of Courts of Equity under the capacity or liability of persons to act as trustees. Formerly we have seen that the intention of the parties has been frequently frustrated by the rigid adherence of the Court of Chancery to the technical scruples of the common law, for uses were considered as annexed to the estate of the feoffees in the land, and not to the land itself. Against the notion of an use attaching upon the land we find the following curious arguments:—"It is absurd to say that confidence and trust can be reposed in land, which wants sense, and which, in regard to sense, is inferior to brute beasts; and it would not be less absurd to say that beasts may be trusted who have sense and want reason, than land, which wants also sense and reason, should be trusted." But, notwithstanding the force of this grave argument, the Courts of Equity in their later times

"times have said that a trust shall never fail on account of the disability or non-appointment of a trustee, because they hold that the trust of property created will fasten upon and attach to the land intended to be made subject to it. The King or a corporate body may be a trustee, and where an estate was devised to the separate use of a *feme covert* without the intervention of trustees, it was determined that the husband should be trustee for his wife. So in the case, where a devise to a Corporation (in trust, was void by the late statute of mortmain, the Court decreed that the heir-at-law of the devisor should be a trustee for the purposes of his will." That is the statement of the law in the best book we have on the subject. In the most recent book—Lewin on trusts (3rd edition, p. 30)—is the following passage:—"The Sovereign may sustain the character of a trustee so far as regards the capacity to take the estate and to execute the trust, but great doubts have been entertained whether the subject can, by any legal process, enforce the performance of the trust." The right of the *cestui que* trust is sufficiently clear, but the defect was in the remedy. The Court of Chancery has no jurisdiction over the King's conscience, for that is a power delegated by the King to the Chancellor to exercise the King's equitable authority betwixt subject and subject. The Court of Exchequer has, in its character as a court of revenue, an especial superintendence over royal property, and it has been thought that, through that channel, a *cestui que* trust might indirectly obtain the relief to which, on the general principles of equity, he is confessedly entitled.

The Hon.
L. H. Bayley,
Esq.
11 Oct., 1859.

178. *By Mr. Murray*: Then there is great doubt whether the trust can be exercised? Yes.
179. Does it not seem a fatal objection to a trust being exercised by the Crown? No. I will answer your remark by the concluding passage from this book,—“And in a recent case it was decided that, though the Court of Exchequer cover decree, the possessor of the property according to the equitable title, it had no jurisdiction to direct the Crown to convey the legal estate. The subject may undoubtedly appeal to the Sovereign by presenting a petition of right, and it cannot be supposed that the fountain of justice would not do justice.” Therefore, from that and other authorities, I think the Crown may be a trustee; it is so stated in the best law books we have; the difficulty is merely in case the Crown does not exercise it; the subject can only appeal by petition; he cannot compel the Crown to execute the trust.

180. Will you please look at the despatch of Sir R. Bourke, dated 30th September, 1853, to the Honorable E. G. Stanley, Secretary of State for the Colonies? That would be after the intelligence arrived that the Corporation had been dissolved.

181. It says, does it not,—“That the three schools thus described now are, and will, in all probability, continue to be exclusively for the Church of England—they may be supported, and the orphan schools extended by means of the income which will, at no great distance of time, be derived from the lands granted under Seal to the Church and School Corporation, and which on its demolition became, by the terms of the Charter, vested in the Crown, to be disposed of by His Majesty, his heirs, and successors, in such manner as shall appear most conducive to the maintenance and promotion of religion, and the education of the youth of the Colony. Under these terms the income of the lands may be applied to the support of any of the churches referred to in this despatch”? Yes.

182. This despatch, if you look over it, refers to the churches and schools of all denominations, English, Scotch, and Roman Catholic? This appears to have been written without his being aware of the legal difficulty that exists at the present moment.

183. The Charter dissolving the Corporation is dated 4th February, 1833,—Sir Richard Bourke wrote this despatch in September, in the same year;—according to your opinion, Sir Richard Bourke in acting as he then mentions was incorrect? I presume the lands were granted.

184. *By Mr. Murray*: Yes? I may mention that the 38th clause seems to put the matter beyond all doubt. I read the first line of the recital of the Charter of Incorporation and couple that with the last clause, and one can only form the opinion I have arrived at.

185. *By Mr. Rotton*: That is that the proceeds cannot be appropriated for any other purpose? Yes; the last clause says, “when and so soon as the several purposes and objects aforesaid shall have been fully and effectually performed and carried into execution, and when provision shall have been made for the religious instruction and education in the principles of the Church of England, of the whole of the inhabitants of the said Colony, it shall and may be lawful for us, our heirs and successors, to direct and provide for the manner in which the several uses and purposes, upon or towards which such part of the lands so to be granted to the said Corporation as aforesaid, shall be held and applied as may not be wanting to carry into effect the several purposes before mentioned.”

186. *By Mr. Wilson*: Does not the 38th clause also provide—if the 36th is not operated upon the lands revert to the Crown? I think the intention of both is the same, in considering an instrument we must give effect to every part of it. The 38th clause contemplates the existence of lands which are not necessary for the purpose of carrying into effect the object contemplated by the Charter; it reserves power to the Crown, which the Crown might, perhaps, have had by implication, the power to dictate the uses and provide for the manner in which the extra lands shall be applied to the uses to which they may be subject.

187. *By Mr. Murray*: That appropriation was only to take place when the whole of the inhabitants of the Colony were properly instructed in the principles of the Church of England? Yes, but it does not say at what time. I apprehend that would not take place till doomsday, because the inhabitants of the Colony are always on the increase—growing up from day to day.

188. *By Mr. Wilson*: Look at last paper, page 23, near the bottom—even at that time a portion of the land granted near the shore of Botany Bay had been resumed, and you think

The Hon.
L. H. Bayley,
Esq.
11 Oct., 1859.

that land was legally resumed? I can hardly give a direct answer to that question. I am not aware when this question was first raised. Mr. Darvall told me this morning he gave the case the greatest consideration in 1856; but I found, on talking with him, that independently of, and without knowing his opinion, I had arrived at the same conclusion as he did after careful research.

189. *By Mr. Murray:* Do you think the Constitution Act, by which the whole of the territory was conveyed to the control of the Legislature of the Colony, would affect this question at all —? Would you allow me to look at the clause of the Constitution Act, I think the words are, "The whole of the waste lands of the Crown." I cannot lay my hand on it at this moment, I think it is in a previous Act.

190. Supposing the revenue derived from these Church and School Lands are still subject to the trusts originally contemplated, how ought the proceeds to be appropriated? They ought to be appropriated if the trust subsists, according to the terms of the original Charter.

191. By the Crown? By the Crown.

192. Without the interference of Parliament? That is a difficult question involving various considerations as to the position of the Crown and the lands of this Colony.

193. Look at this deed of grant,—is it in strict accordance with the Charter of Incorporation? It appears to me it is a grant to trustees to hold subject to rules and regulations; I may mention that there is a quit-rent reserved, and certain exceptions from the grant, such as mines and quarries, reservations which clearly shew there is a reservation to the Crown.

194. But a limited reservation? Yes.

195. Do you understand from that grant that it was given exclusively for purposes appertaining to the Church of England? I think so, in this manner,—it is given subject to the rules and regulations under the Charter. It is granted to the Corporation for the purposes for which it is incorporated.

196. Well, these grants having been granted on these conditions, is it competent for the Crown to vary these conditions so as to apply the grants of land to other purposes than the education in the doctrines of the Church of England? I am inclined to think not, except by the consent of Parliament; a person cannot derogate from his own grant; I do not think that in this or any other instance, a party having granted the trust can alter it in derogation of his grant, in other words, to the detriment of the parties to whom it is granted.

197. *By Mr. Morris:* Are you aware that by the 25th Act of Union the Church of England is established within the Kingdoms of England, Ireland, the domain of Wales, and the town of Berwick-upon-Tweed. Yes.

198. And the Church of Scotland established in Scotland; and by the fourth article of Union there is a communication of all rights, privileges, and advantages which do or may belong to the subjects of either Kingdom? Yes.

199. Was it possible for the Crown, legally, to grant to the Church of England exclusively, the rights and privileges set forth in the Charter of Incorporation referred to, by which the whole of the youth of the country is to be brought up in the doctrines and religion of the Church of England? That point is presented to me for the first time; I think it deserves much consideration, because if this article is applicable to this Colony—if the argument be pushed to its full extent—it would invalidate the grant of every single acre. I think there would be great difficulty if this were so, because, take this case;—supposing when this Charter of Incorporation was issued there were no Scotch persons in this Colony, the Charter would be good; supposing one Scotchman were in the country even though he landed only the day before the Charter would be bad. It would involve the necessity of inquiring whether there was one Scotchman here at one particular moment. I do not like to give an opinion one way or the other.

200. Do I understand this point was decided in Canada? Yes; it was the line of argument taken.

201. With effect? Yes

202. *By Mr. Rotton:* Do you think that Sir Richard Bourke's Church Act in any way affects this matter? I should like to see it before I answer the question.

203. You stated, just now, that in the event of the Corporation failing to fulfil its duties, it would become defunct, the whole affair would be inoperative, the Charter would become defunct as it were? I did not go to that extent; I think the trust created by the Charter would subsist, the land reverting to the persons by whom it was granted, which would be in this case to the Queen.

204. The first Corporation appears to have been abolished, and in its stead certain Commissioners appointed, and power is given to the Governor to supply any vacancies which may from time to time occur in the commission by the death, resignation, suspension, removal, incapacity, or absence from the Colony of any of the members thereof;—if the Governor has never acted on that authority, and there really is no Corporation or Commission for the management of these lands, what is to be the effect? I think, as I read it, the matter is thus—new Commissioners were appointed in lieu of numerous persons forming trustees,—that does not alter the Corporation. These Letters Patent of 1 January, 1831, appointed these Commissioners in accordance with the power reserved to the Crown in one of the clauses of the Charter; it does not alter the Corporation at all, the body corporate still exists, the individuals designated in the first clause of the Charter are removed, and others substituted, but that does not alter the character of the original Corporation, it is only saying that five persons shall be the parties instead of numerous persons mentioned in the first clause. I cited a case to shew that the Judges of England have held that when a Corporation failed to perform the duties for which it was incorporated it became defunct. That I cited to shew that the Corporation may be defunct when the object of its institution no longer exists. The Crown has but the power where there is no Corporation of forming a new one; in this case, there are com-
missioners

missioners appointed to perform the acts of the trustees. Two years after the Corporation was abolished, the legal result of which was the trustees no longer exist, but I think the Crown would be bound, in the abolition of the trustees, to take the trusts as they existed in the Charter of Incorporation.

The Hon.
L. H. Bayley,
Esq.

11 Oct., 1859.

205. It is a fact there has been no trustee, the Governor has not appointed fresh ones, and there has not in fact for some years been a trustee,—would that have the effect of compelling the whole trusts to revert to the Crown? I hardly like to answer that question without further information. I see power is given by the 7th clause of the Charter of Incorporation to make by-laws; if those had been duly made the Crown would still be bound by them. I see by the 17th clause the Corporation have power to grant leases, the Crown would still be bound by their leases just as an ordinary individual.

206. Supposing the trust had reverted to the Crown, which I think, from the opinions you have given, there can be little doubt of, what would be the effect of our last Constitution Act with reference to these lands, wherein it states the whole of the lands of the Colony are handed over to the Colonial Parliament? I forget whether the terms of that Act are the waste lands, or all the lands of the Colony. I think it says all unalienated land shall be waste land; if it says so, it would not comprise these, as they are alienated lands.

207. How is that, when only a small portion has been granted? I understood the whole had been granted.

208. You are clearly of opinion that, looking at the grant, these lands are still held in trust? By somebody.

209. And if held in trust, are held for all the purposes specified in the grants? Yes; provided they have not been altered by the regulations made in accordance with the power given to the Crown.

210. How should those regulations be issued in the manner provided by the Charter of Incorporation—by the 37th clause? Yes; but the inclination of my opinion is, that that power could not be exercised after the Corporation had ceased to exist.

211. You see no reference to any such alteration in the proclamation of the King in Council, of 4th February, 1833? None at all. I may read three lines of a case which came before Lord Ruper Henley and the Eight Judges 100 years ago (*Burgess v. Wheate*, 1 William Blackstone's Rep. 123, and Eden's Rep. 255.) In 1718 Mrs. Harding conveyed property to trustees, in trust for herself, her heirs and assigns, and uses, as she might appoint. She died without executing that power of appointment, and without heirs. Thus *ex parte paternita*, therefore, the property escheated to the Crown. The question arose whether the trustees could by that accident take the property to themselves, or whether it was escheated to the Crown. This case came on before Lord Ruper Henley, Lord Mansfield, and Sir T. Clarke, Master of the Rolls. The whole subject of escheats to the Crown, and rights of the Crown, as against trustees, was fully discussed. The Court decided in favor of the trustee. There is one short passage in the report to which I would call the attention of the Committee; it is in the first volume of Sir William Blackstone's Reports. Lord Ruper Henley says, p. 179—"But I don't know it has been determined that it shall escheat discharged of the trusts; I shall give no positive opinion upon it. So far I may say, unless a trust can be distinguished from an use the most learned Judges say the right comes as a reversion failing heirs, and that the time of escheating is when there is a want of a tenant, the right of the lord being paramount the trust cannot be effected by it." "But possibly there might be an equity in the other case against the lord, for if trustee died without heir, and the lord had the estate, this Court might say you shall hold to compensate yourself for your rent and services, but we will embrace the rest for the *cestui que* trust." He goes on to add—"Two centuries have passed since uses and trusts have been admitted, and I cannot find a doctrine that the Crown shall have an escheat of a trust, but I find in other books the contrary, and by one of the most learned Judges that ever adorned the profession." (Hall, 247.)

ADDENDUM.

Since I gave the above evidence before the Committee I have perused the opinions given by Mr. Manning and Mr. Darvall, when Attorney and Solicitor Generals, in December, 1856, and find that I arrived at precisely the same opinion as they had previously done.

In addition, I have seen the opinions given by Mr. Plunkett and Mr. Manning, in 1846, to the effect that these lands are not "waste lands." It appears, too, that Mr. Wise has given an opinion in accordance with those I have above-mentioned, but I have not had an opportunity of seeing it.

These various opinions, and the reasoning on which they are founded, tend to strengthen that pronounced by me before the Committee.

I have carefully perused an elaborate opinion given by Mr. Lutwyche, when Solicitor General in 1857, in which he arrives at the conclusion that the lands in question are "waste lands", and that the trusts no longer exist; but notwithstanding such opinion was shared by Mr. Martin, the Attorney General, who, however, does not appear to have given any written opinion on the matter, though pressed by his colleague so to do, I think the reasoning on which Mr. Lutwyche's opinion was founded extremely faulty, as nothing therein stated at all shakes my belief that the views I present to the Committee are correct.

Crown Law Offices,
19 October, 1859.

L. H. BAYLEY,
Attorney General.

TUESDAY,

TUESDAY, 20 DECEMBER, 1859.

Present:—

Mr. CLEMENTS,
Mr. MURRAY,
Mr. PARKES,

Mr. PLUNKETT,
Mr. ROTTON,
Mr. WILSON.

THE HON. TERENCE AUBREY MURRAY, Esq., IN THE CHAIR.

William Edwin Plunkett, Esq., called in and examined:—

- W.E.Plunkett Esq. 216. *By the Chairman:* You are Secretary to the Crown Law Officers? Yes.
217. You have been summoned to give evidence here to-day? I have.
20 Dec., 1859. 218. Have you been requested to produce any opinions given by the Crown Law Officers upon any subject? I have brought some papers here, notice of motion for the production of which was given by the present Attorney General, Mr. Wise, prior to his taking office; since his appointment he has not, however, proceeded further in the matter, as he has access to the papers by virtue of his office. The papers have not therefore been laid upon the Table of the Council.
219. Have you these opinions with you? I have.
220. Will you hand them in? Yes. (*The witness handed in the same. Vide Appendix.*)
221. Will you state whose opinions they are? There is an opinion of the 1st December, 1846, of Messrs. Plunkett and Manning; a letter referring to an opinion given on the 2nd October, 1856, by Messrs. Martin and Lutwyche; there is also an opinion of Mr., now Sir William, Manning, 17th December, 1856; there is likewise an opinion of Mr. Darvall of the same date, 17th December, 1856; there is an opinion of Mr. Wise, when Solicitor General, dated 7th July, 1857; the opinion of Mr. Lutwyche, dated 16th November, 1857; and a further opinion, 17th December, 1857. Here are two forms of lease, one for ninety-nine years, and the other for twenty-one years. (*The witness handed in the same.*) No leases for Church and School Lands have been issued for some time past, it being the opinion of the law officers, Messrs. Martin and Lutwyche, that they are waste lands of the Crown, and, as such, cannot be leased.

APPENDIX A.

*Attorney General's Office,
1 December, 1846.*

Sir,

With reference to the letter of the Agent for the Church and School Lands; dated 22nd September, 1846, respecting the leasing of those lands, which letter His Excellency the Governor was pleased to refer to us for our report thereon,

We have the honor to state that we have carefully examined the letters patent, incorporating "the trustees of the Clergy and School Lands;" copies of the grants to that Corporation; the Secretary of State's Despatches of 25th May, 1829, and 19th June, 1830, together with the King's instructions enclosed in the latter despatch, for altering the management of the affairs of the Corporation; the Order in Council revoking the above letters patent; and the Colonial Act of 5 William IV., No. 11; and the Imperial Act of 5 and 6 Vict., cap. 36; and that we are of opinion that the lands originally granted to the late Corporation and resumed by the Crown upon its dissolution are not "waste lands" of the Crown within the meaning of the Crown Land Sales Act, by reason of their having been "dedicated and set apart for a public use," and that consequently they may be leased in the same manner as previously to the passing of that Act.

We have, &c.,

J. H. PLUNKETT,
Attorney General.

W. M. MANNING,
Solicitor General.

The Honorable
The Colonial Secretary.

APPENDIX B.

(No. 56-155.)

*Attorney General's Office,
Sydney, 2 October, 1856.*

Sir,

In reply to your letter of the 27th ultimo, covering papers respecting the Church and School Lands at Blaney, we have the honor to state that we think, for the reasons assigned by us in detail in the accompanying communication, that the village of Blaney, being part of the Clergy and School Estates, is a portion of the waste lands of the Crown.

2. It may, therefore, be sold, but cannot be leased.

We have, &c.,

JAMES MARTIN,
Attorney General.

ALFRED P. LUTWYCHE,
Solicitor General.

The Honorable
The Colonial Secretary.

APPENDIX

APPENDIX C.

(No. 56-156.)

Attorney General's Office,
Sydney, 2 October, 1856.

W.E. Plunkett
Esq.
20 Dec., 1859.

Sir,

In reply to your letters of the 4th and 25th ultimo, requesting opinion respecting Leases of Church and School Estates, we have the honor to state that we think for the reasons assigned in detail in an accompanying communication that the Church and School Estates form a portion of the waste lands of the Crown, and therefore may be sold, but cannot be leased.

Enclosure in
letter 4th here-
with.

We have, &c.,

JAMES MARTIN,

Attorney General.

ALFRED P. LUTWYCHE,

Solicitor General.

The Honorable
The Colonial Secretary.

APPENDIX D.

(No. 56-157.)

Attorney General's Office,
Sydney, 2 October, 1856.

Sir,

Referring to a letter addressed from your office on the 26th February last, No. 173, to the Crown Law Officers, and enclosing the copy of a letter dated 14th of February, from the Acting Auditor General, we have the honor to make the following report for the information of His Excellency the Governor General.

1. The Church and School Lands, comprehending nearly 450,000 acres, appear to have been granted to a Corporation created by Royal Charter in 1826, in order "to make provision for the maintenance of religion and the education of youth in the Colony of New South Wales."

2. In 1833 the Corporation was dissolved, under a power reserved in the Charter, by an Order in Council dated on the 4th February in that year.

3. On the 5th August, 1834, an Act of Council (5 Will. IV., No. 11) was passed for regulating the affairs of the late Corporation, and to secure to purchasers their titles to lands purchased by them from the said Corporation. The preamble of that Act recites, that on the dissolution of the Corporation all the lands vested in the said Corporation reverted and became absolutely vested in the Crown, but contains no provisions for carrying out the trusts for which the Corporation was created.

4. Apparently, however, upon the ground that the Crown, although it could not be a trustee in a strictly legal sense for any one, was yet a trustee in public policy for the maintenance of religion and the education of youth, the Government of the day seems to have considered that the lands in question ought to be reserved for those objects.

5. No systematic plan appears to have been adopted to form to advantage the estate until 1841, when a scheme was approved of for granting leases for seven, fourteen, and twenty-one years.

6. On the 22nd June, 1842, an Imperial Act (5 and 6 Viet., cap. 36) was passed for regulating the sale of waste land belonging to the Crown in the Australian Colonies. The 23rd section of that Act defines the words "waste lands" to mean lands "which now are or shall hereafter be vested in Her Majesty, and which have not been dedicated or set apart for some public use."

7. In 1843, the scheme of granting leases for terms of seven, fourteen, and twenty-one years was abandoned, upon the supposition that the lands originally granted to the Corporation had, by its dissolution, become absolutely vested in the Crown, and that consequently they were "waste lands" within the meaning of the Statute last referred to.

8. The matter having been referred to the Law Officers, the late Attorney and Solicitor General, Mr. Plunkett and Mr. Manning, on 1st December, 1846, gave a joint opinion that the lands in question were not "waste lands" within the meaning of the Act 5 and 6 Viet., cap. 36, upon the ground that they had been "dedicated and set apart for a public use."

9. We regret that we are unable to concur in that opinion. We think that the 3rd section of the Act clearly shows what the Imperial Parliament contemplated by lands "dedicated and set apart for a public use." That section excepts from the operation of the Act lands required for public uses, and specifies "such lands as may be required for public roads or other internal communications, whether by land or water, or for the use or benefit of the aboriginal inhabitants of the country, or for purposes of military defence, or as the sites of places of public worship, schools, or other public buildings, or as places for the interment of the dead, or places for the recreation and amusement of the inhabitants of any town or village, or as the sites of public quays or landing places on the sea coast or shores of navigable streams, or for any other purpose of public safety, convenience, health, or enjoyment."

The words which are underlined can only be construed according to the rules laid down for the interpretation of statutes to purposes of the same kind as those previously enumerated; and we are of opinion, that the maintenance of religion, and the education of youth, are not purposes which the Imperial Parliament had in view by that section.

10. We are fortified in the opinion above expressed, by observing that the late Attorney-General, Mr. Manning, in a Memorandum dated 17th June last, suggests that there may possibly be ground for dissent from the opinion of Mr. Plunkett and himself, dated 1st December, 1846.

11. As we think that the lands in question were absolutely vested in the Crown at the time of the passing of the Act 5 and 6 Vic., cap. 36, it follows, that all revenue, derived from the Clergy and School Estates, forms a portion of the Consolidated Revenue Fund, which, under section 47 of the Constitution Act, includes all territorial revenues of the Crown, and must be accounted for to the Legislature of the Colony.

12. We are of opinion, that it will be necessary to introduce a Bill into the Legislature, to carry out, in a legal manner, any of the objects to which the income derived from the lands in question has hitherto been applied.

The Honorable
The Colonial Secretary.

We have, &c.,

JAMES MARTIN.

ALFRED P. LUTWYCHE.

APPENDIX E.

OPINION of the Honorable W. M. Manning, Attorney General, respecting mode of accounting for the Church and School Estates since Proclamation of the New Constitution Act.

I ENTIRELY concur in the opinion given by the Solicitor General (Mr. Darvall), which confirms, as will be seen, that given by the late Attorney General, Mr. Plunkett, and myself, as Solicitor General, on 6th December, 1846, and is opposed to that lately given by Mr. Martin and Mr. Lutwyche, whilst Attorney and Solicitor General.

2. Upon minute examination of the documents and Acts of Council bearing upon the question many further arguments suggest themselves, which support the result at which he has arrived; of these I will only mention the following:—

The Act of 5 Gul. IV., instead of declaring that the lands and other property of the late Corporation shall be dealt with as ordinary lands and property of the Crown, makes special provisions for their management by the Governor and by an agent to be appointed expressly for that purpose. This implies that these lands and property were not to be regarded as being identical in tenure and destination with the lands and property absolutely vested in the Crown for general public uses. The provisions in question even go the length of giving to the agent the powers of a bailiff for preventing intrusion, &c., "in respect of "lands of the said Corporation which are now vested in Her Majesty;" although the Legislature had in the immediately preceding year provided "for the protection of the "Crown Lands" of the Colony," by authorising the appointment of commissioners, and giving to such commissioners powers *in respect of Crown Lands*, precisely similar to those so given to the agent of the Church and School Lands. Had the lands been regarded as "Crown "Lands" in the general sense of the term, the Legislature would have left them, in common with other lands, to the protection of the commissioners. It is also to be observed that, although the term "Crown Lands" had a known and recognised meaning, and had been adopted by the Legislature in the Act 4th Gul. IV., No. 10, it is entirely avoided in the Act for regulating the affairs of the Corporation.

W. M. MANNING,

Attorney General.

17 December, 1856.

APPENDIX F.

OPINION of the Honorable the Solicitor General, J. B. Darvall, respecting mode of accounting for Revenue of Church and School Lands since Proclamation of New Constitution Act.

THE Church and School Lands were granted by the Crown to a Corporation, which was created by Charter on the 9th March, 1826, and called, "The Trustees of the Clergy and "School Lands in the Colony of New South Wales," with powers to hold, let, sell, cultivate, mortgage, &c., &c.

2. By the 36th clause of this Charter the Crown was empowered to *dissolve the Corporation* if it should seem expedient, and therefore the land was to revert to, and become absolutely vested in, the Crown (subject to existing contracts or mortgages, &c., &c.), "To be held, applied, and disposed of by the Crown in such a manner as to the Crown "should appear most conducive to the maintenance and promotion of religion and the education of youth in the Colony."

3. By the contemplated exercise of this power the Charter seems to me to have intended the destruction of the Corporation, but the preservation of the trusts, and that the lands should vest in the Crown not as absolute owner, but as trustee for a particular purpose consistently with the original dedication of the land.

4. The King can, I apprehend, be a trustee of lands, although he cannot be compelled to execute the trusts, and that, by the due exercise of the powers in the Charter, the land would vest in the Crown as trustee.

5. On the 1st January, 1831, under a power in the Charter to alter the management of the estate, commissioners were appointed to supersede the trustees in the management of the lands, which, however, still remained vested in the trustees. I assume that the commissioners acted.

6. On the 4th February, 1833, the power of dissolution was exercised, and the Corporation was dissolved in terms of the Charter provisions, which did not go to the abolition of the trust. By this dissolution the land vested in the Crown, not, in my judgment,

ment, as absolute owner, but as trustee, and the land remained, I think, subject to the trusts before alluded to.

7. On 5th August, 1834, the 5th and 6th Will. IV., No. 11, was passed *inter alia* to regulate the affairs of the late Corporation, the recital of that Act shews that the intention of the Legislature was to enable the Governor justly to carry out the then existing contracts of the Corporation, and only recites so much of the effect of the dissolution as is relevant to that object. The Act then proceeds to vest in the Crown all debts, mortgages, stock, &c., of the Corporation which had not so vested by the operation of the Order in Council dissolving the Corporation, and although the words used in the Act might be large enough to include the lands of the Corporation which had already vested in the Crown, and although the words in the Act seem to declare that stock, debts, mortgages, &c., had already vested in the Crown, which I think had not before the Act so vested still the Act does not seem to me to affect the lands granted to the Corporation, because they had already vested in the Crown, and I think the Legislature only intended to do what was necessary, viz, to vest in the Crown stock, mortgages, &c., which had not by the operation of the dissolution vested in the Crown. I think, therefore, that this Act did not disturb the trusteeship of the Crown which was previously created, but only cast additional duties on the Crown, and transferred to it additional property.

8. On the 22nd June, 1842, the 5th and 6th Vict., cap. 36, was passed, *for regulating the sale of the waste lands of the Crown*. The 3rd section of this Act gives a certain prospective power of reserving lands for certain purposes, "or for any other purposes of public safety, convenience, health, or enjoyment."

9. The 23rd section defines waste lands to be "lands vested in the Crown," (that is, absolutely vested and not held in trust) and which had not been already granted, or lawfully granted to any person or persons in fee simple or for an estate of freehold, or for a term of years, and which had not been dedicated or set apart for any public use.

10. If the lands in question had been waste lands, I should think that the reserving power in sect. 3 would not justify their reservation as Church and School Lands; but to bring the lands within the operation of that Act or of the Constitution Act, they must be waste lands.

I think they are not waste lands, and that even if they do not fall within the description of lands *which have been already granted*, still they have been set apart for a public use, and for that use are now held by the Crown in trust.

11. The term public use is not, in my opinion, to be limited to the class of cases defined by the 3rd section. It follows, therefore, that in my opinion the moneys and lands are not a part of the Consolidated Revenue of the Colony.

J. B. DARVALL,
Solicitor General.

17 December, 1856.

APPENDIX G.

OPINION of the Honorable Edward Wise, Solicitor General, respecting the mode of accounting for Revenue and Expenditure of the Clergy and School Estates.

I HAVE perused the several opinions herein, and I agree with Messrs. Plunkett, Manning, and Darvall, that the lands in question are not waste lands within the 5th and 6th Vic., cap. 36.

Had the question been put, prior to that Act,—Are these lands dedicated and set apart for some public use? I cannot doubt that the answer would have been in the affirmative; and if so, what is there in that Act to alter their character? The definition in section 23 is altogether independent of the powers given by section 2 to dispose of waste lands otherwise than by sale in future; and I do not think that the powers given by section 2 can limit the wider meaning of the words in the 25th section.

This opinion is supported, I think, by the 5th and 6th Vic., cap. 36, section 20, which enacts, "that nothing therein contained shall effect or be construed to effect any contract, or to prevent the fulfilment of any promise or engagement made by or on behalf of Her Majesty with respect to any lands situate in any of the said colonies in cases where such contracts promises or engagements shall have been lawfully made before the time at which this Act shall take effect in any such colony."

Now the original charter provided, "that the lands which should revert to the Crown should be held, applied, and disposed of by the Crown in such manner as to the Crown should appear most conducive to the maintenance and promotion of religion and the education of youth in the colony." It might, therefore, be held, without any strained construction, that there was a promise or engagement with respect to Church and School Lands, which would exclude them from the operation of the Act.

A further argument in support of this view is, I think, derived from the circumstance that the Orphan School Estates were, by virtue of the 7th George IV., No. 4, vested in the Corporation (Clergy and School Trustees,) at the time of its dissolution. And if the words waste lands include the latter, it would necessarily follow that they would include the former, which would be such an act of gross injustice, that nothing but the clearest enactment could legalize.

On the whole, therefore, my opinion is, that the Church and School Lands are not "Waste Lands," within the 5th and 6th Vic., section 36.

E. WISE,
Solicitor-General.

7 July, 1857.

APPENDIX H.

In the matter of the mode of accounting for the Revenue and Expenditure of the Clergy and School Estates.

Copy.—Opinion of Mr. Solicitor General Lutwyche.

1. I have perused, with the attention which the importance of the subject demands, the several opinions of Messrs. Darvall, Manning, and Wise on this matter; but, with all the respect which I entertain for the legal attainments and abilities of those gentlemen, I am bound to say that their reasoning has failed to convince me that the Clergy and School Estates are not waste lands of the Crown, and that I, therefore, still adhere to the opinion given by the present Attorney General and myself on the 2nd of October, 1856.

2. Mr. Darvall's opinion appears to be chiefly based upon the assumption that a trust and a power are, if not absolutely identical, so closely allied as to be convertible terms. I apprehend, however, that they are essentially distinct, and that a Court of Equity could not as against a Corporation—much less as against the Crown—enforce any particular mode of dealing with the lands in question under provisions similar to those of the 36th clause of the Charter. By the terms of that clause it was stipulated that if the Crown thought fit the Corporation should be dissolved, and that thereupon the land should revert to and become absolutely vested in the Crown (subject to existing contracts or mortgages), to be held, applied, and disposed of by the Crown *in such manner as to the Crown should appear most conducive* to the maintenance and promotion of religion and the education of youth in the Colony. Such a clause did not define and create a trust in its legal sense, which is the only sense in which jurists can deal with it, but conferred a discretionary power, the exercise of which no one could ever have called in question, even if it had been exerted to effect objects very remote indeed from the maintenance and promotion of religion and the education of youth in the Colony.

3. The instances in which the Queen may be a trustee of lands, though even then she would not be compellable to execute the trusts, seem to be confined to cases in which she takes land derivatively, as by descent, or by forfeiture from a trustee. She is also considered to be a *quasi* trustee in the case of a lunatic. But the general rule of law is, that the Crown cannot be a trustee for any one, and I think that this rule applies with peculiar force to lands which *revert* to the Crown on the dissolution of a Corporation, because it has failed to carry out the objects for which it was created.

4. I think that the 3rd and the 23rd clauses of the Act 5 and 6 Vic., cap. 36, must be read and construed together in order to give effect to the other portions of the Act. The preamble recites the expediency of establishing an uniform system of disposing of the *waste* lands of the Crown. The second section enacts that no such lands shall be alienated except by sale, and the third section proceeds to except from the operation of the preceding clause lands required for public uses. Among these it specifies *sites* of places of public worship or schools, and by that very specification excludes, in accordance with a well known rule of construction, lands which may be required as an *endowment* for such places of public worship or schools, when built. The words "set apart for some public use" in the interpretation clause appear to be a compendious form of expressing the public uses enumerated in the 3rd section, for although the operation of that section is prospective, while the 25th section is retrospective in its effect, I shall be slow to believe that the Imperial Legislature meant to open up so wide a field for litigation as the larger construction, which Mr. Darvall has contended for, would present. It would be very difficult indeed to say what "*some public use*" would not include.

5. The Act 5 Wm. IV., No. 11, bears entirely upon matters arising out of the dealings of the lately dissolved Corporation, with the exception of the clause relating to the agent's authority; and I think that very little weight is due to the argument derived from his separate appointment. That might have been determined on simply as an administrative arrangement.

6. The 20th section of the Act 5 and 6 Vic., c. 36, does not seem to me to touch the present question. To or with whom has any promise, contract, or engagement been made or entered into since the dissolution of the Corporation? Doubtless a general impression and understanding prevailed that the revenues of the Church and School Estates would be applied for religious and educational purposes; but the question is whether a legal promise has been given by the Crown, since the Corporation was dissolved, to apply the revenues exclusively to those purposes. It has dealt with them in that manner, but there is no evidence of a formal engagement to that effect.

7. Upon the whole, therefore, I am of opinion that upon the dissolution of the Corporation the Church and School Estates vested absolutely in the Crown; that at the time of the passing of the Act 5 and 6 Vic., c. 36, these lands had neither been granted nor contracted to be granted to any person, and had not been set apart for any public use; that they were consequently then waste lands of the Crown; that as such they could only have been since legally alienated by way of sale, or by grant for some of the public uses specified in the 3rd section of that Act; and that all revenue derivable therefrom forms a portion, under the existing Constitution Act, of the Consolidated Revenue Fund.

ALFRED P. LUTWYCHE,
Solicitor General.

16 November, 1857.

APPENDIX I.

LEASES of Church and School Lands.

Copy.—Opinion of Mr. Solicitor General Lutwyche.

For the reasons detailed in my opinion of the 16th November instant, and in the joint opinion of the present Attorney General and myself of 2nd October, 1856, I think that the Church and School Estates are Waste Lands of the Crown, and as such cannot be leased.

ALFRED P. LUTWYCHE,
Solicitor General.

17 November, 1857.

APPENDIX J.

MEMO.

I hand in to the Committee two forms of lease,—one for 99 years and the other for 21 years.

I may add that no leases for Church and School Lands have been issued for some time past, it being the opinion of the Law Officers, Messrs. Martin and Lutwyche, that they are Waste Lands of the Crown, and, as such, cannot be leased.

S. B. W.

THIS INDENTURE made the _____ day of _____ in the Year of Our Lord One Thousand eight hundred and _____, between HER MOST GRACIOUS MAJESTY QUEEN VICTORIA, of the one part, and _____ of the other part.

WITNESSETH, that in consideration of the Sum of _____ now in hand paid to Us, being One year's Rent in advance, and of the Rent hereinafter reserved, WE of Our Special Grace, do Demise and lease unto the said _____ his Executors, Administrators and Assigns, Subject to the Conditions, Reservations, and Provisos hereinafter mentioned, ALL that Piece or Parcel of Land in Our said Territory, containing by Admeasurement _____ Acres, be the same more or less, situate in the County of _____ Parish of _____ being a portion of certain Lands formerly belonging to the late Corporation of the Trustees of the Clergy and School Lands,

with all the Rights and Appurtenances thereto belonging: TO HOLD the said Piece or Parcel of Land, hereby demised, unto the said _____ his Executors, Administrators, and Assigns, from the _____ day of _____ for and during, and unto the full end and Term of Ninety-nine years, from thence next ensuing, and fully to be complete and ended, determinable, nevertheless, as hereinafter mentioned: YIELDING AND PAYING therefore Yearly and every Year, during the said Term of Ninety-nine years, unto Us, Our Heirs or Successors, the clear Yearly Rent or Sum of _____ by even Half-yearly payments in advance, commencing on the _____ day of _____ now next, that is to say, on the _____ day of _____ and the _____ day of _____ in each and every year, during the said term.

AND the said _____ doth hereby for Himself, his Heirs, Executors, and Administrators, covenant with Her said MAJESTY QUEEN VICTORIA, Her Heirs and Successors, in manner following, that is to say; That he, the said _____ his Heirs, Executors, and Administrators, shall and will, during the Term hereby granted, well and truly pay, or cause to be paid, the said yearly Rent hereinbefore reserved, on the days and times and in manner hereinbefore appointed for the payment thereof; PROVIDED ALWAYS, that if the said Rent shall be, at any time unpaid for the space of Twenty days after the same shall become due, although no formal demand shall have been made thereof, it shall be lawful for Us, Our Heirs and Successors, by Our Governor for the time-being of Our said Territory, or for the Agent for the time-being, of the said Church and School Lands, or for any person or persons authorised by Our said Governor, or by the said Agent in that behalf, to put an end to the Term hereby created, by a Notice to that effect in the NEW SOUTH WALES *Government Gazette*, or to re-enter upon the said Land or any part thereof, with its appurtenances, and thence to remove the said _____ his Executors, Administrators, and Assigns, and all Tenants and Occupiers of the said Land or any part thereof, and the Term hereby created, shall, in either of such cases, cease and be void to all intents and purposes; PROVIDED FURTHER, that it shall and may be lawful for Us, Our Heirs and Successors, by Our Governor for the time-being of Our said Territory, or for the Agent for the time-being of the said Church and School Lands, or for any other person or persons authorised by Our said Governor, or by the said Agent in that behalf, with or without Surveyors and workmen, twice or oftener in every year during the said Term, at all reasonable times in the day to enter and come into and upon the said Land and premises hereby demised, or any part thereof, and all buildings and erections which theretofore shall have been erected and placed thereon, to view such and see the state and condition of the same, and of all injuries, decays, defects, and wants of reparation and amendment, which upon every such view or views shall be found, to give or leave Notice or Warning in writing, at or upon the said demised premises, unto or for the said _____ his Executors, Administrators, and Assigns, to repair and amend the same within Three Calendar Months then

then next following, within which said time or space of Three Calendar Months next, after every such Notice or Warning shall be so given, or left as aforesaid, he the said for Himself, his Heirs, Executors, Administrators and Assigns, doth hereby Covenant, Promise, and Agree, to and with Us, Our Heirs and Successors, to repair, remove, and amend all such injuries, decays, defects, and wants of reparation and amendment accordingly.

IN WITNESS WHEREOF, the Seal of the Territory of NEW SOUTH WALES, is affixed; and to the affixing whereof is witness Our Trusty and well-beloved Our Captain-General and Governor-in-Chief of Our said Territory; And the said Lessee hath set his Hand and Seal, the Day and Year aforesaid.

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

GLEBES.

Ordered by the Legislative Assembly to be Printed, 2 May, 1860.

RETURN, in part, to an *Address* from the Honorable the Legislative Assembly of New South Wales to the Governor General, dated 22 February, 1860, praying that His Excellency would be pleased to cause to be laid upon the Table,—

“ (1.) A copy of the several Deeds of Grant issued to Trustees
“ for the maintenance of Glebes throughout the Colony.

“ (2.) A Return shewing the names of the persons to whom the
“ Lands so granted have been leased; the quantity demised in
“ each case; and the amount of annual rent reserved.

“ (3.) The total value of the lands granted for each Glebe
“ respectively.

“ (4.) How the revenue is appropriated.”

(*Mr. Hart.*)

GLEBES.

THE UNDER SECRETARY FOR LANDS to THE UNDER SECRETARY.

*Department of Lands,
Sydney, 25 April, 1860.*

SIR,

Referring to your letter of the 13th ultimo, I am directed to forward to you copies of the several Deeds of Grant of Glebes throughout the Colony issued to Trustees, including copies of certain grants appropriated to Chaplains for the time-being; with a request that you will have the goodness to obtain the further information respecting Glebes, called for by the Legislative Assembly, from the Lord Bishop of Sydney.

I have, &c.,

MICL. FITZPATRICK.

400 ACRES.

UNTO the Chaplain for the time-being of the Church of Saint Matthew, at Windsor, and unto his Successors the Chaplains for the time-being, four hundred acres of Glebe land, situate, lying, and being at Windsor, in the County of Cumberland; bounded on the south-east side by a line south thirty-four degrees west forty-two chains, commencing forty links west of Braithwait's south corner; on the south-west side by a line bearing west forty degrees north one hundred and two chains; on the north-west side by a line bearing east thirty-seven degrees north to Eazy's farm; and on the north-east side by that farm and Braithwait's farm. Quit-rent, eight shillings sterling.

In witness, &c., this 1st day of November, 1822.

THOS. BRISBANE.

Witnessed by—

ROB. CRAWFORD.

UNITED CHURCH OF ENGLAND AND IRELAND. No. IV.

DATE, 9th May, 1842.
COUNTY, Macquarie.
PARISH, Macquarie.
CHURCH, St. Thomas.
ACRES, 40.

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, and so forth;

TO ALL TO WHOM THESE PRESENTS SHALL COME, GREETING:—

KNOW YE, that in order to promote Religion and Education in Our Territory of NEW SOUTH WALES, WE, of Our Special Grace, HAVE GRANTED, and for Us, Our Heirs and Successors, DO HEREBY GRANT unto the Lord Bishop of Australia, the Reverend John Cross, Archibald Clunes Innes, William Nairn Gray, and William Henry Geary, being respectively Trustees nominated and appointed under and by Virtue of an Act of the Governor and Legislative Council of Our said Territory, made and passed in the Eighth Year of the Reign of His late Majesty King William the Fourth, intituled, "*An Act to regulate the Temporal Affairs of Churches and Chapels, of the United Church of England and Ireland, in NEW SOUTH WALES,*" and to their Heirs and Assigns, Subject to the Trusts, Conditions, Reservations, and Provisos hereinafter contained, ALL THOSE two Pieces or Parcels of Land in Our said Territory, containing by admeasurement Forty Acres, be the same more or less, situated in the County of Macquarie, and Parish of Macquarie; First Portion, containing Two Roods, situated in the County and Parish aforesaid, and Town of Macquarie, in front of the Church, Allotment number one of Section number Seven, commencing at the corner of Hay and William Streets, bounded on the Westward by Hay-street two chains, on the Southward by a line at right angles to that Street two chains fifty links, on the Eastward by a line at right angles to the last line two chains to William-street, and on the Northward by that Street two chains fifty links to the corner of Hay and William Streets. Second Portion, containing Thirty-nine Acres and Two Roods, situated in the County and Parish aforesaid, at the junction of Koolunbung and Wright's Creeks, bounded on the North by Wright's Creek eighteen chains (commencing at the junction of the two Creeks), on the East by a line South fourteen chains eighty links, on the South by a line West twenty-seven chains to the Koolunbung Creek, and on the West by that Creek to the junction of the Creeks (Advertised as No. 16 in the Government Notice, dated 8th February, 1842), with all the Rights and Appurtenances whatsoever thereto belonging; TO HOLD unto the said Lord Bishop of Australia, the Reverend John Cross, Archibald Clunes Innes, William Nairn Gray, and William Henry Geary, their Heirs and Assigns for ever, YIELDING and Paying therefor Yearly, unto Us, Our Heirs and Successors, the Quit-Rent or Sum of One Farthing for ever, if demanded; UPON TRUST, for the appropriation thereof as the Glebe, annexed to the Church of the United Church of England and Ireland, as by Law Established, erected at Port Macquarie, and known as Saint Thomas; in conformity with

with the Provisions of the said Act, and of a certain other Act of the Governor and Legislative Council of Our said Territory, made and passed in the Seventh Year of the Reign of His said late Majesty King William the Fourth, intituled, "*An Act to promote the Building of Churches and Chapels, and to provide for the Maintenance of Ministers of Religion, in NEW SOUTH WALES,*" so far as the same may apply to the TRUSTS of this Our Grant, and for no other Purpose whatsoever; ON CONDITION THAT the said Grantees, their Heirs and Assigns, or some of them, do and shall construct proper Drains through and from the same Lands to the nearest Common Drain or Sewer, when required so to do; AND ALSO THAT they do and shall in every respect, and at all times hereafter conform to the Government Regulations, for the time-being, and to the Laws and Regulations now or hereafter to be in Force, for the better regulating the Alignment of Streets in Our said Territory, so far as the same may be applicable; PROVIDED NEVERTHELESS, AND WE DO HEREBY RESERVE unto Us, Our Heirs and Successors, all such parts, and so much of the said Lands as may hereafter be required for a Public Way or Public Ways, in, over, and through the same, to be set out by the Governor for the time-being, of Our said Territory, or some person by Him authorised in that respect; AND ALSO, all Stone and Gravel, all Indigenous Timber, and all other Materials, the produce of the said Lands, which may be required at any time or times hereafter, for the construction and repair of Ways and Bridges, for Naval Purposes, and for Public Works, together with the Right of taking and removing the same; AND ALSO, all Lands within One hundred feet of High Water-mark on the Sea Coast, and on every Creek, Harbour, and Inlet of the Sea; AND ALSO, all Mines of Gold, of Silver, and of Coals, with full and free liberty and power to search for, dig, and take away the same; AND ALSO, the right of full and free ingress, egress, and regress, into, out of, and upon, the said Lands for the several purposes aforesaid; AND WE DO FURTHER RESERVE unto Us, Our Heirs and Successors, full power for Us or Them, or for the Governor for the time-being of Our said Territory to resume and take possession of all or any part of the said Land not hereinbefore reserved, which may be required at any time or times hereafter for any Public Purpose whatsoever, the value of the said Lands not hereinbefore reserved, or of so much thereof as shall be so required, and of any Building standing on the said required Lands, being paid by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators chosen as hereinafter mentioned, in which valuation the benefit to accrue to the said Party, from any such Public Purpose, shall be allowed by way of Set-off; AND WE DO ALSO RESERVE unto Us, Our Heirs and Successors, and to the Governor for the time-being of Our said Territory, by such Person or Persons as shall be by Them or Him authorised in that behalf, full power to make and conduct through the said Lands all Common or Public Drains and Sewers which may be deemed expedient, Three Calendar Months Notice being previously given to the Occupier, Owner, or Trustees thereof, and the Damage which any Building may sustain thereby, being paid for by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators as aforesaid; AND WE DO HEREBY DECLARE, that in every case of Arbitration which shall arise under and by Virtue hereof, One Arbitrator shall be chosen by the Governor for the time-being of Our said Territory, and One by the then Owner, Owners, or Trustees of the said Lands, or of such part thereof as may be thereby affected, which Two Arbitrators (before they proceed to the said Arbitration) shall elect an Umpire, who shall determine any disagreement between the Two said Arbitrators; BUT if the said Owner, Owners, or Trustees shall refuse or neglect to choose an Arbitrator, on His, Her, or Their part, within One Calendar Month after being required so to do by Public Advertisement in the *Government Gazette* or otherwise, or if such Arbitrator, being chosen, shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, then both Arbitrators shall be chosen by the Governor for the time-being of Our said Territory, which said last-mentioned Arbitrators shall also elect an Umpire in the manner and for the purpose above-mentioned; and if any Umpire shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, the Arbitrators for the time-being, whether chosen one by each Party, or both by the Governor of Our said Territory, shall in every such case forthwith elect another Umpire, in the same manner, for the same purpose, and Subject to the same Condition as the Umpire first elected as aforesaid; PROVIDED ALWAYS, THAT if the Trusts, Conditions, Reservations, and Provisos herein contained, or any part thereof, be not duly observed and performed by the said Grantees, their Heirs and Assigns, then the said Lands shall be forfeited, and revert unto Us, Our Heirs and Successors, and these Presents, and every matter and thing herein contained, shall cease and determine, and become absolutely void to all intents and purposes; And it shall be lawful for Us, Our Heirs and Successors, by Our Governor for the time-being of Our said Territory, or some Person by Them or Him authorised in that behalf, to re-enter upon and take possession of the said Lands, or any part thereof, and the said Grantees, their Heirs and Assigns, and all Occupiers thereof, therefrom wholly to remove; IN TESTIMONY WHEREOF, WE have caused this Our Grant to be Sealed with the Seal of Our said Territory.

WITNESS Our Trusty and Well-beloved SIR GEORGE GIPPS, KNIGHT, Our Captain-General, and Governor-in-Chief of Our said Territory and its Dependencies, at Government House, Sydney, in New South Wales aforesaid, this ninth day of May, in the Fifth Year of Our Reign; And in the Year of Our Lord One thousand eight hundred and forty-two.

VICTORIA, by the Grace of God of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, and so forth;

TO ALL TO WHOM THESE PRESENTS SHALL COME, GREETING:—

KNOW YE, that in order to promote Religion and Education in Our Territory of NEW SOUTH WALES, WE, of Our Special Grace, HAVE GRANTED, and for Us, Our Heirs and Successors, DO HEREBY GRANT unto The Lord Bishop of Australia, as sole Trustee, nominated and appointed under and by Virtue of an Act of the Governor and Legislative Council of Our said Territory, made and passed in the Eighth Year of the Reign of His late Majesty King William the Fourth, intituled, "An Act to regulate the Temporal Affairs of Churches and Chapels, of the United Church of England and Ireland, in NEW SOUTH WALES," and to his Heirs and Assigns, Subject to the Trusts, Conditions, Reservations, and Provisos hereinafter contained, ALL THAT Piece or Parcel of Land in Our said Territory, containing by

Admeasurement Forty Acres, be the same more or less, situated in the County of Cumberland and Parish of Castle Hill, bounded North-easterly by a line commencing at a marked fence, where the South-west boundary of Hankinson's two hundred Acres crosses a small creek bearing East twenty-five degrees South eighteen chains twenty links, Easterly by a line dividing it from the road from Parramatta to Wiseman's South five and a half degrees West six chains twenty links, Southerly by a line West six degrees South thirty-three chains, South-westerly by a line West thirty-seven degrees North six chains fifty links to a small creek, and North-westerly by that creek to the marked fence aforesaid (Advertised as No. 3 in the Government Notice dated 8th February, 1842); with all the Rights and Appurtenances whatsoever thereto belonging; TO HOLD unto the said Lord Bishop of Australia, his Heirs and Assigns for ever, YIELDING and Paying therefor Yearly unto Us, Our Heirs and Successors, the Quit-Rent or Sum of One Parting for ever, if demanded; UPON TRUST, for the appropriation thereof as the Glebe, annexed to the Church of the United Church of England and Ireland, as by Law Established, erected at Castle Hill, and known as Saint Simon; in conformity with the Provisions of the said Act, and of a certain other Act of the Governor and Legislative Council of Our said Territory, made and passed in the Seventh Year of the Reign of His said late Majesty King William the Fourth, intituled, "*An Act to promote the Building of Churches and Chapels, and to provide for the maintenance of Ministers of Religion, in NEW SOUTH WALES,*" so far as the same may apply to the TRUSTS of this Our Grant, and for no other Purpose whatsoever; ON CONDITION THAT the said Grantee, his Heirs and Assigns, or some of them, do and shall construct proper Drains through and from the same Land to the nearest Common Drain or Sewer, when required so to do; AND ALSO THAT they do and shall in every respect, and at all times hereafter conform to the Government Regulations, for the time-being, and to the Laws and Regulations now or hereafter to be in force, for the better regulating the Alignment of Streets in Our said Territory, so far as the same may be applicable; PROVIDED NEVERTHELESS, AND WE DO HEREBY RESERVE unto Us, Our Heirs and Successors, all such parts, and so much of the said Land as may hereafter be required for a Public Way or Public Ways, in, over, and through the same, to be set out by the Governor for the time-being, of Our said Territory, or some person by Him authorised in that respect; AND ALSO, all Stone and Gravel, all Indigenous Timber, and all other Materials, the produce of the said Land, which may be required at any time or times hereafter, for the construction and repair of Ways and Bridges, for Naval Purposes, and for Public Works, together with the Right of taking and removing the same; AND ALSO, all Land within One hundred feet of High Water-mark on the Sea Coast, and on every Creek, Harbour, and Inlet of the Sea; AND ALSO, all Mines of Gold, of Silver, and of Coals, with full and free liberty and power to search for, dig, and take away the same; AND ALSO, the right of full and free ingress, egress, and regress, into, out of, and upon the same land, for the several purposes aforesaid; AND WE DO FURTHER RESERVE unto Us, our Heirs and Successors, full power for Us or Them, or for the Governor for the time-being of Our said Territory, to resume and take possession of all or any part of the said Land not hereinbefore reserved, which may be required at any time or times hereafter for any Public Purpose whatsoever, the value of the said Land not hereinbefore reserved, or of so much thereof as shall be so required, and of any Building standing on the said required Land, being paid by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators chosen as hereinafter mentioned, in which valuation the benefit to accrue to the said Party, from any such Public Purpose, shall be allowed by way of Set-off; AND WE DO ALSO RESERVE unto Us, Our Heirs and Successors, and to the Governor for the time-being of Our said Territory, by such Person or Persons as shall be by Them or Him Authorised in that behalf, full power to make and conduct through the said Land, all Common or Public Drains and Sewers which may be deemed expedient, Three Calendar Months Notice being previously given to the Occupier, Owner, or Trustees thereof, and the Damage which any Building may sustain thereby, being paid for by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators as aforesaid; AND WE DO HEREBY DECLARE, that in every case of Arbitration which shall arise under and by Virtue hereof, One Arbitrator shall be chosen by the Governor for the time-being of Our said Territory, and One by the then Owner, Owners, or Trustees of the said Land, or of such part thereof as may be thereby affected, which Two Arbitrators (before they proceed to the said Arbitration) shall elect an Umpire, who shall determine any disagreement between the two said Arbitrators; BUT if the said Owner, Owners, or Trustees shall refuse or neglect to choose an Arbitrator, on His, Her, or Their part within One Calendar Month after being required so to do by Public Advertisement in the *Government Gazette*, or otherwise, or if such Arbitrator being chosen, shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, then both Arbitrators shall be chosen by the Governor for the time-being of Our said Territory, which said last-mentioned Arbitrators shall also elect an Umpire in the manner and for the purpose above-mentioned; and if any Umpire shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, the Arbitrators for the time-being, whether chosen one by each Party, or both by the Governor of Our said Territory, shall in every such case forthwith elect another Umpire, in the same manner, for the same purpose, and Subject to the same Conditions as the Umpire first elected as aforesaid; PROVIDED ALWAYS, THAT if the Trusts, Conditions, Reservations, and Provisos herein contained, or any part thereof, be not duly observed and performed by the said Grantee, his Heirs and Assigns, then the said Land shall be forfeited, and revert unto Us, Our Heirs and Successors, and these Presents, and every matter and thing herein contained shall cease and determine, and become absolutely void to all intents and purposes; And it shall be lawful for Us, Our Heirs and Successors, by Our Governor for the time-being of our said Territory, or some Person by Them or Him authorised in that behalf,

behalf, to re-enter upon and take possession of the said Land, or any part thereof, and the said Grantee, his Heirs and Assigns, and all Occupiers thereof, therefrom wholly to remove; IN TESTIMONY WHEREOF, WE have caused this Our Grant to be Sealed with the Seal of Our said Territory.

WITNESS Our Trusty and Well-beloved SIR GEORGE GIPPS, KNIGHT, Our Captain-General, and Governor-in-Chief of Our said Territory and its Dependencies, at Government House, Sydney, in New South Wales aforesaid, this Ninth day of May, in the Fifth Year of Our Reign; And in the Year of Our Lord One thousand eight hundred and forty-two.

TO ALL TO WHOM THESE PRESENTS SHALL COME, GREETING:—

KNOW YE, that in order to promote Religion and Education in Our Territory of NEW SOUTH WALES, WE, of Our Special Grace, HAVE GRANTED, and for Us, Our Heirs and Successors, DO HEREBY GRANT unto the Right Reverend William Grant Broughton, D.D., Bishop of Australia, or the Bishop of Australia for the time-being, Alexander McLeay, Richard Jones, William Macpherson, and John Lamb, being respectively Trustees nominated and appointed under and by Virtue of an Act of the Governor and Legislative Council of Our said Territory, made and passed in the Eighth Year of the Reign of His late Majesty King William the Fourth, intituled, "*An Act to regulate the Temporal Affairs of Churches and Chapels, of the United Church of England and Ireland, in NEW SOUTH WALES,*" and to their Heirs and Assigns, Subject to the Trusts, Conditions, Reservations, and Provisos hereinafter contained, ALL THAT Piece or Parcel of Land in Our said Territory, containing by Admeasurement Twenty-nine Acres, be the same more or less, situated in the County of Cumberland, and Parish of Alexandria, near Rushcutter's Bay; commencing at a point on the Point Piper Road, and bounded on the South-west by a fence running North nineteen degrees forty-five minutes West one chain and ninety-nine links, North fourteen degrees West seven chains, North sixteen degrees thirty minutes West three chains, North thirty-nine degrees thirty minutes West three chains, West seven degrees North one chain and thirty links, West twenty-nine degrees fifteen minutes North one chain and fifty links, West thirty-two degrees North six chains, West thirty-seven degrees North three chains and fifty links, and West forty degrees North four chains and eighty links; thence on the South by a continuation of the fence, being a line bearing West twenty-two degrees South one chain and ninety-five links; thence again on the South-west by a line bearing North nineteen degrees thirty minutes West seven chains and fifty links to a road; and then by that road six chains and eighty links; thence on the North-west by a line bearing East thirty-three degrees thirty minutes North fifty links to the New South Head Road; thence on the North-east and North by that road to its junction with the Double Bay and Point Piper Roads; and thence on the East by the Point Piper Road to the point of commencement; AND ALSO, all that other piece or parcel of Land in Our said Territory, containing by admeasurement eleven acres, be the same more or less, situated in the County and Parish aforesaid; commencing at the North-west corner of Hough's ten acres, and bounded on the East by a line bearing South nineteen chains and eighty-three links; on the south by a line bearing West five chains and forty-two links; on the West by a line bearing North twenty chains and seventy-eight links to the public road; and on the North by the public road five chains and fifty links to the point of commencement (Advertised as No. 42 in the Government Notice, dated 14th July, 1842); with all the Rights and Appurtenances whatsoever thereto belonging; TO HOLD unto the said Bishop of Australia, or the Bishop of Australia for the time-being, Alexander McLeay, Richard Jones, William Macpherson, and John Lamb, and to their Heirs and Assigns for ever, YIELDING and Paying therefore Yearly unto Us, Our Heirs and Successors, the Quit-Rent or Sum of One Farthing for ever, if demanded; UPON TRUST, for the appropriation thereof as the Glebe, annexed to the Church of the United Church of England and Ireland, as by Law Established, erected at Sydney, and known as Saint James, in conformity with the Provisions of the said Act, and of a certain other Act of the Governor and Legislative Council of Our said Territory, made and passed in the Seventh Year of the Reign of His said late Majesty King William the Fourth, intituled, "*An Act to promote the Building of Churches and Chapels, and to provide for the Maintenance of Ministers*"

" of

"of Religion, in NEW SOUTH WALES," so far as the same may apply to the TRUSTS of this Our Grant, and for no other Purpose whatsoever; ON CONDITION THAT the said Grantees, their Heirs and Assigns, or some of them, do and shall construct proper Drains through and from the same Land to the nearest Common Drain or Sewer, when required so to do; AND ALSO THAT they do and shall in every respect, and at all times hereafter conform to the Government Regulations, for the time-being, and to the Laws and Regulations now or hereafter to be in Force, for the better regulating the Alignment of Streets in Our said Territory, so far as the same may be applicable; PROVIDED NEVERTHELESS, AND WE DO HEREBY RESERVE unto Us, Our Heirs and Successors, all such parts, and so much of the said Land as may hereafter be required for a Public Way or Public Ways, in, over, and through the same, to be set out by the Governor for the time-being, of Our said Territory, or some person by Him authorised in that respect; AND ALSO, all Stone and Gravel, all Indigenous Timber, and all other Materials, the produce of the said Land, which may be required at any time or times hereafter, for the construction and repair of Ways and Bridges, for Naval Purposes, and for Public Works, together with the Right of taking and removing the same; AND ALSO, all Land within One hundred feet of High Water-mark on the Sea Coast, and on every Creek, Harbour, and Inlet of the Sea; AND ALSO, all Mines of Gold, of Silver, and of Coals, with full and free liberty and power to search for, dig, and take away the same; AND ALSO, the right of full and free ingress, egress, and regress, into, out of, and upon the said Land for the several purposes aforesaid; AND WE DO FURTHER RESERVE unto Us, Our Heirs, and Successors, full power for Us or Them, or for the Governor for the time-being of Our said Territory, to resume and take possession of all or any part of the said Land not hereinbefore reserved, which may be required at any time or times hereafter for any Public Purpose whatsoever, the value of the said Land not hereinbefore reserved, or of so much thereof as shall be so required, and of any Building standing on the said required Land, being paid by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators chosen as hereinafter mentioned, in which valuation the benefit to accrue to the said Party, from any such Public Purpose, shall be allowed by way of Set-off; AND WE DO ALSO RESERVE unto Us, Our Heirs and Successors, and to the Governor for the time-being of Our said Territory, by such Person or Persons as shall be by Them or Him Authorised in that behalf, full power to make and conduct through the said Land, all Common or Public Drains and Sewers which may be deemed expedient, Three Calendar Months' Notice being previously given to the Occupier, Owner, or Trustees thereof, and the Damage which any Building may sustain thereby, being paid for by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators as aforesaid; AND WE DO HEREBY DECLARE, that in every case of Arbitration which shall arise under and by Virtue hereof, One Arbitrator shall be chosen by the Governor for the time-being of Our said Territory, and One by the then Owner, Owners, or Trustees of the said Land, or of such part thereof as may be thereby affected, which Two Arbitrators (before they proceed to the said Arbitration) shall elect an Umpire, who shall determine any disagreement between the two said Arbitrators; BUT if the said Owner, Owners, or Trustees shall refuse or neglect to choose an Arbitrator, on His, Her, or Their part within One Calendar Month after being required so to do by Public Advertisement in the *Government Gazette*, or otherwise, or if such Arbitrator, being chosen, shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, then both Arbitrators shall be chosen by the Governor for the time-being of Our said Territory, which said last-mentioned Arbitrators shall also elect an Umpire in the manner and for the purpose above-mentioned; and if any Umpire shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, the Arbitrators for the time-being, whether chosen one by each Party, or both by the Governor of Our said Territory, shall in every such case forthwith elect another Umpire, in the same manner, for the same purpose, and Subject to the same Condition as the Umpire first elected as aforesaid; PROVIDED ALWAYS, THAT if the Trusts, Conditions, Reservations, and Provisos herein contained, or any part thereof, be not duly observed and performed by the said Grantees, their Heirs and Assigns, then the said Land shall be forfeited, and revert unto Us, Our Heirs and Successors, and these Presents, and every matter and thing herein contained shall cease and determine, and become absolutely void to all intents and purposes; And it shall be lawful for Us, Our Heirs and Successors, by Our Governor for the time-being of Our said Territory, or some Person by Them or Him authorised in that behalf, to re-enter upon and take possession of the said Land or any part thereof, and the said Grantees, their Heirs and Assigns, and all Occupiers thereof, therefrom wholly to remove; IN TESTIMONY WHEREOF, WE have caused this Our Grant to be Sealed with the Seal of Our Said Territory.

WITNESS Our Trusty and Well-beloved SIR GEORGE GIPPS, KNIGHT, Our Captain-General, and Governor-in-Chief of Our said Territory and its Dependencies, at Government House, Sydney, in New South Wales aforesaid, this Third day of September, in the Sixth Year of Our Reign; And in the Year of Our Lord One thousand eight hundred and forty-two.

KNOW YE, that in order to promote Religion and Education in Our Territory of NEW SOUTH WALES, WE, of Our Special Grace, HAVE GRANTED, and for US, Our Heirs and Successors, DO HEREBY GRANT unto the Right Reverend William Grant Broughton, D.D., Bishop of Australia, or the Bishop of Australia for the time-being, John Campbell, and Francis Mitchell, being respectively Trustees nominated and appointed under and by Virtue of an Act of the Governor and Legislative Council of Our said Territory, made and passed in the Eighth Year of the Reign of His late Majesty King William the Fourth, intituled, "An Act to regulate the Temporal Affairs of Churches and Chapels, of the United Church of England and Ireland, in NEW SOUTH WALES," and to their Heirs and Assigns, Subject to the Trusts, Conditions, Reservations, and Provisos hereinafter contained, ALL THAT Piece or Parcel of Land in Our said Territory, containing by Admeasurement Thirty-two Acres, Three Roods, and Nineteen Perches, be the same more or less, situated in the County of Cumberland and Parish of Petersham, bounded on the West by a line bearing South forty-six degrees thirty minutes West, commencing at the High Water-mark of the waters of Black Wattle Bay, at a large rock on the line of fence dividing the Glebe from Dr. Bowman's property, two thousand three hundred and thirty-seven links to the Glebe Road; on the South by the Glebe Road bearing South fifty-nine degrees forty-five minutes East two thousand three hundred and twenty-seven links; on the East by a line bearing North eight degrees fifteen minutes East eight hundred and ten links; and from that point to the High Water-mark of the waters of Black Wattle Bay by a line bearing North seven degrees forty-five minutes East one thousand three hundred and twenty-six links; and on the North by the High Water-mark of Black Wattle Bay to the commencing point at the rock aforesaid; being a portion of the Land granted to the Trustees of the late Church and School Corporation, by deed dated twenty-fourth day of November, One thousand eight hundred and twenty-nine, but which reverted to the Crown, on the Dissolution of that Body, by order of the King in Council of fourth day of February, One thousand eight hundred and thirty-three (being also the Land Advertised as No. 43 in the Government Notice, dated 14th July, 1842); with all the Rights and Appurtenances whatsoever thereto belonging; TO HOLD unto the said Bishop of Australia, or the Bishop of Australia for the time-being, John Campbell, and Francis Mitchell, and to their Heirs and Assigns for ever, YIELDING and Paying therefor Yearly unto Us, Our Heirs and Successors, the Quit-Rent or Sum of One Farthing for ever, if demanded; UPON TRUST, for the appropriation thereof as the Glebe, annexed to the Church of the United Church of England and Ireland, as by Law Established, erected at Sydney, and known as Saint Philip's; in conformity with the Provisions of the said Act, and of a certain other Act of the Governor and Legislative Council of Our said Territory, made and passed in the Seventh Year of the Reign of His said late Majesty King William the Fourth, intituled, "An Act to promote the Building of Churches and Chapels, and to provide for the Maintenance of Ministers of Religion, in NEW SOUTH WALES," so far as the same may apply to the TRUSTS of this Our Grant, and for no other Purpose whatsoever; ON CONDITION THAT the said Grantees, their Heirs and Assigns, or some of them, do and shall construct proper Drains through and from the same Land to the nearest Common Drain or Sewer, when required so to do; AND ALSO THAT they do and shall in every respect, and at all times hereafter, conform to the Government Regulations for the time-being, and to the Laws and Regulations now or hereafter to be in Force, for the better regulating the Alignment of Streets in Our said Territory, so far as the same may be applicable; PROVIDED NEVERTHELESS, AND WE DO HEREBY RESERVE unto Us, Our Heirs and Successors, all such parts, and so much of the said Land as may hereafter be required for a Public Way or Public Ways, in, over, and through the same, to be set out by the Governor for the time-being, of Our said Territory, or some person by Him authorised in that respect; AND ALSO, all Stone and Gravel, all Indigenous Timber, and all other Materials, the produce of the said Land, which may be required at any time or times hereafter, for the construction and repair of Ways and Bridges, for Naval Purposes, and for Public Works, together with the Right of taking and removing the same; AND ALSO, all Land within One hundred feet of High Water-mark on the Sea Coast, and on every Creek, Harbour, and Inlet of the Sea; AND ALSO, all Mines of Gold, of Silver, and of Coals, with full and free liberty and power to search for, dig, and take away the same; AND ALSO, the right of full and free ingress, egress, and regress, into, out of, and upon the said Land, for the several purposes aforesaid; AND WE DO FURTHER RESERVE unto Us, Our Heirs and Successors, full power for Us or Them, or for the Governor for the time-being of Our said Territory, to resume and take possession of all or any part of the said Land not hereinbefore reserved, which may be required at any time or times hereafter for any Public Purpose whatsoever, the value of the said Land not hereinbefore reserved, or of so much thereof as shall be so required, and of any Building standing on the said required Land, being paid by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators chosen as hereinafter mentioned, in which valuation the benefit to accrue to the said Party, from any such Public Purpose, shall be allowed by way of Set-off; AND WE DO ALSO RESERVE unto Us, Our Heirs and Successors, and to the Governor for the time-being of Our said Territory, by such Person or Persons as shall be by Them or Him authorised in that behalf, full power to

to make and conduct through the said Land, all Common or Public Drains and Sewers which may be deemed expedient, Three Calendar Months' Notice being previously given to the Occupier, Owner, or Trustees thereof, and the Damage which any Building may sustain thereby being paid for by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators as aforesaid; AND WE DO HEREBY DECLARE, that in every case of Arbitration which shall arise under and by Virtue hereof, One Arbitrator shall be chosen by the Governor for the time-being of Our said Territory, and One by the then Owner, Owners, or Trustees of the said Land, or of such part thereof as may be thereby affected, which Two Arbitrators (before they proceed to the said Arbitration) shall elect an Umpire, who shall determine any disagreement between the Two said Arbitrators; BUT if the said Owner, Owners, or Trustees shall refuse or neglect to choose an Arbitrator, on His, Her, or Their part within One Calendar Month after being required so to do by Public Advertisement in the *Government Gazette*, or otherwise, or if such Arbitrator, being chosen, shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, then both Arbitrators shall be chosen by the Governor for the time-being of Our said Territory, which said last-mentioned Arbitrators shall also elect an Umpire in the manner and for the purpose above-mentioned; and if any Umpire shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, the Arbitrators for the time-being, whether chosen one by each Party, or both by the Governor of Our said Territory, shall in every such case forthwith elect another Umpire, in the same manner, for the same purpose, and Subject to the same Condition as the Umpire first elected as aforesaid; PROVIDED ALWAYS, THAT if the Trusts, Conditions, Reservations, and Provisos herein contained, or any part thereof, be not duly observed and performed by the said Grantees, their Heirs and Assigns, then the said Lands shall be forfeited, and revert unto Us, Our Heirs and Successors, and these presents, and every matter and thing herein contained, shall cease and determine, and become absolutely void to all intents and purposes; And it shall be lawful for Us, Our Heirs and Successors, by Our Governor for the time-being of Our said Territory, or some Person by Them or Him authorised in that behalf, to re-enter upon and take possession of the said Land, or any part thereof, and the said Grantees, their Heirs and Assigns, and all Occupiers thereof, therefrom wholly to remove; IN TESTIMONY WHEREOF, WE have caused this Our Grant to be Sealed with the Seal of Our said Territory.

WITNESS Our Trusty and Well-beloved SIR GEORGE GIPPS, KNIGHT, Our Captain-General and Governor-in-Chief of Our said Territory and its Dependencies, at Government House, Sydney, in New South Wales aforesaid, this Thirteenth day of September, in the Sixth Year of Our Reign; And in the Year of Our Lord One thousand eight hundred and forty-two.

and 5a. 1r. 5p. } TO ALL TO WHOM THESE PRESENTS SHALL COME, GREETING:—

KNOW YE, that in order to promote Religion and Education in Our Territory of NEW SOUTH WALES, WE, of Our Special Grace, HAVE GRANTED, and for Us, Our Heirs and Successors, DO HEREBY GRANT unto the Right Reverend William Grant Broughton, D.D., Bishop of Australia, or the Bishop of Australia for the time-being, Thomas Valentine Blomfield, Joshua John Moore, and Richard Sadlier, being respectively Trustees nominated and appointed under and by Virtue of an Act of the Governor and Legislative Council of Our said Territory, made and passed in the Eighth Year of the Reign of His late Majesty King William the Fourth, intituled, "*An Act to regulate the Temporal Affairs of Churches and Chapels, of the United Church of England and Ireland, in NEW SOUTH WALES,*" and to their Heirs and Assigns, Subject to the Trusts, Conditions, Reservations, and Provisos hereinafter contained, ALL THAT Piece or Parcel of Land in Our said Territory, containing by Admeasurement Twenty Acres, be the same more or less, situated in the County of Cumberland, and Parish of Saint Luke; commencing at the North-west corner of Eber Bunker's five hundred Acres Grant, and bounded on the North by a line bearing West twenty-five chains; on the West by a line bearing South six chains; on the South by a line bearing East twenty-three chains to Bunker's West boundary; and on the East by part of the said West boundary, being a line bearing South ten degrees West to the North-west corner of Bunker's Land as aforesaid, reserving an Occupation Road of a chain wide on the East side; AND ALSO, all that other Piece or Parcel of Land in Our said Territory, containing by Admeasurement Fourteen Acres Two Roods and Thirty-five Perches, be the same more or less, situated in the County and Parish aforesaid, commencing at the South-east corner of R. Cartwright's Grant of one hundred and sixteen acres, bounded on the South-west by a line bearing North sixty degrees West three chains fifty links, on the

North-west by a line North twenty-six degrees East sixteen chains fifty links, on the North-east by a line South sixty-three degrees East fifteen chains to the New Bridge, and on the South and South-east by Cabramatta Creek; AND ALSO, all that other Piece or Parcel of Land, in Our said Territory, containing by Admeasurement Five Acres One Rood and Five Perches, be the same more or less, situated in the County and Parish aforesaid, and Town of Liverpool; commencing at the South-east corner of the Allotment formerly the Market Place in the Town of Liverpool, and bounded on the South by a line bearing West four chains forty-nine links; on the West by a line North twelve chains; on the North by a line East four chains thirty-two links; and on the East by a line South twelve chains (Advertised as No. 36 in the Government Notice dated 28th June, 1842); with all the Rights and Appurtenances whatsoever thereto belonging; TO HOLD unto the said Bishop of Australia, or the Bishop of Australia for the time-being, Thomas Valentine Blomfield, Joshua John Moore, and Richard Sudler, and to their Heirs and Assigns for ever, YIELDING and Paying therefor Yearly unto Us, Our Heirs and Successors, the Quit-Rent or Sum of One Farthing for ever, if demanded; UPON TRUST, for the appropriation thereof as the Glebe, annexed to the Church of the United Church of England and Ireland, as by Law Established, erected at Liverpool, and known as Saint Luke's, in conformity with the Provisions of the said Act, and of a certain other Act of the Governor and Legislative Council of Our said Territory, made and passed in the Seventh Year of the Reign of His said late Majesty King William the Fourth, intituled, "*An Act to promote the Building of Churches and Chapels, and to provide for the Maintenance of Ministers of Religion, in NEW SOUTH WALES,*" so far as the same may apply to the TRUSTS of this Our Grant, and for no other Purpose whatsoever; ON CONDITION THAT the said Grantees, their Heirs and Assigns, or some of them, do and shall construct proper Drains through and from the same Lands to the nearest Common Drain or Sewer, when required so to do; AND ALSO THAT they do and shall in every respect, and at all times hereafter conform to the Government Regulations, for the time-being, and to the Laws and Regulations now or hereafter to be in Force, for the better regulating the Alignment of Streets in Our said Territory, so far as the same may be applicable; PROVIDED NEVERTHELESS, AND WE DO HEREBY RESERVE unto Us, Our Heirs and Successors, all such parts, and so much of the said Land as may hereafter be required for a Public Way or Public Ways, in, over, and through the same, to be set out by the Governor for the time-being, of Our said Territory, or some person by Him authorised in that respect; AND ALSO, all Stone and Gravel, all Indigenous Timber, and all other Materials, the produce of the said Lands, which may be required at any time or times hereafter, for the construction and repair of Ways and Bridges, for Naval Purposes, and for Public Works, together with the Right of taking and removing the same; AND ALSO, all Lands within One hundred feet of High Water-mark on the Sea Coast, and on every Creek, Harbour, and Inlet of the Sea; AND ALSO, all Mines of Gold, of Silver, and of Coals, with full and free liberty and power to search for, dig, and take away the same; AND ALSO, the right of full and free ingress, egress, and regress, into, out of, and upon the said Lands for the several purposes aforesaid; AND WE DO FURTHER RESERVE unto Us, Our Heirs, and Successors, full power for Us or Them, or for the Governor for the time-being of Our said Territory, to resume and take possession of all or any part of the said Lands not hereinbefore reserved, which may be required at any time or times hereafter for any Public Purpose whatsoever, the value of the said Lands not hereinbefore reserved, or of so much thereof as shall be so required, and of any Building standing on the said required Lands, being paid by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators chosen as hereinafter mentioned, in which valuation the benefit to accrue to the said Party, from any such Public Purpose, shall be allowed by way of Set-off; AND WE DO ALSO RESERVE unto Us, Our Heirs and Successors, and to the Governor for the time-being of Our said Territory, by such Person or Persons as shall be by Them or Him Authorised in that behalf, full power to make and conduct through the said Lands, all Common or Public Drains and Sewers which may be deemed expedient, Three Calendar Months' Notice being previously given to the Occupier, Owner, or Trustees thereof, and the Damage which any Building may sustain thereby, being paid for by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators as aforesaid; AND WE DO HEREBY DECLARE, that in every case of Arbitration which shall arise under and by Virtue hereof, One Arbitrator shall be chosen by the Governor for the time-being of Our said Territory, and One by the then Owner, Owners, or Trustees of the said Lands, or of such part thereof as may be thereby affected, which Two Arbitrators (before they proceed to the said Arbitration) shall elect an Umpire, who shall determine any disagreement between the two said Arbitrators; BUT if the said Owner, Owners, or Trustees shall refuse or neglect to choose an Arbitrator, on His, Her, or Their part within One Calendar Month after being required so to do by Public Advertisement in the *Government Gazette*, or otherwise, or if such Arbitrator, being chosen, shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, then both Arbitrators shall be chosen by the Governor for the time-being of Our said Territory, which said last-mentioned Arbitrators shall also elect an Umpire in the manner and for the purpose above-mentioned; and if any Umpire shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, the Arbitrators for the time-being, whether chosen one by each Party, or both by the Governor of Our said Territory, shall in every such case forthwith elect another Umpire, in the same manner, for the same purpose, and Subject to the same Condition as the Umpire first elected as aforesaid; PROVIDED ALWAYS, THAT if the Trusts, Conditions, Reservations, and Provisos herein contained, or any part thereof, be not duly observed and performed by the said Grantees, their Heirs and Assigns, then the said

Lands

Lands shall be forfeited, and revert unto Us, Our Heirs and Successors, and these Presents, and every matter and thing herein contained shall cease and determine, and become absolutely void to all intents and purposes; And it shall be lawful for Us, Our Heirs and Successors, by Our Governor for the time-being of Our said Territory, or some Person by Them or Him authorised in that behalf, to re-enter upon and take possession of the said Lands or any part thereof, and the said Grantees, their Heirs and Assigns, and all Occupiers thereof, therefrom wholly to remove; IN TESTIMONY WHEREOF, WE have caused this Our Grant to be Sealed with the Seal of Our Said Territory.

WITNESS Our Trusty and Well-beloved SIR GEORGE GIPPS, KNIGHT, Our Captain-General, and Governor-in-Chief of Our said Territory and its Dependencies, at Government House, Sydney, in New South Wales aforesaid, this nineteenth day of September, in the Sixth Year of Our Reign; And in the Year of Our Lord One thousand eight hundred and forty-two.

VICTORIA, by the Grace of God of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, and so forth;

TO ALL TO WHOM THESE PRESENTS SHALL COME, GREETING:—

KNOW YE, that in order to promote Religion and Education in Our Territory of NEW SOUTH WALES, WE, of Our Special Grace, HAVE GRANTED, and for Us, Our Heirs and Successors, DO HEREBY GRANT unto The Right Reverend William Grant Broughton, D.D., Bishop of Australia, or the Bishop of Australia for the time-being, the Reverend Henry Hodgkinson Bobart, John Blaxland, Hannibal Hawkins Macarthur, and John Betts, being respectively Trustees nominated and appointed under and by Virtue of an Act of the Governor and Legislative Council of Our said Territory, made and passed in the Eighth Year of the Reign of His late Majesty King William the Fourth, intituled, "An Act to regulate the Temporal Affairs of Churches and Chapels, of the United Church of England and Ireland, in NEW SOUTH WALES," and to their Heirs and Assigns, Subject to the Trusts, Conditions, Reservations, and Provisos hereinafter contained, ALL THAT Piece or Parcel of Land in Our said Territory, containing by Admeasurement Twelve Acres and Twenty-eight Perches, be the same more or less, situated in the County of Cumberland and Parish of Saint John, Town of Parramatta; bounded on the North by the Great Western Road, being a line bearing East four degrees fifty-seven minutes South five chains and eight links; on the East by another part of the Glebe, and by Crown Land, being a line bearing South fifty-five minutes East twenty chains ninety-six links; on the South by the Racecourse, being a line bearing South seventy-four degrees West six chains twenty-nine links; and on the West by Crown Land, being a line bearing North one degree forty-five minutes East twenty-three chains sixteen links, Reserving the right to continue Early-street and Lansdowne-street through the same; AND ALSO all that other Piece or Parcel of Land in Our said Territory, containing by Admeasurement Eight Acres Three Roods and Fifteen Perches, be the same more or less, situated in the County, Parish, and Town aforesaid, bounded on the South by the Great Western Road, bearing East five degrees thirty minutes South sixteen chains ninety-five links; on the East by a line bearing North six degrees ten minutes East five chains sixteen links; on the North by a line bearing West six degrees fifty minutes North sixteen chains ninety links; and on the West by a line bearing South six degrees seven minutes West five chains thirty-five links; AND ALSO all that other Piece or Parcel of Land in Our said Territory, containing by Admeasurement One Acre One Rood and Seventy-four Perches, be the same more or less, situated in the County, Parish, and Town aforesaid, bounded on the North by the Great Western Road, being a line bearing East four degrees fifty-seven minutes South five chains eighty links; on the East by Crown Land, being a line bearing South five degrees fifteen minutes West two chains and forty-nine links; on the South by Crown Land, being a line bearing West five degrees North five chains fifty-five links; and on the West by another part of the Glebe, being a line bearing North fifty-five minutes East two chains fifty-one links (Advertised as No 39 in the Government Notice dated 28th June, 1842); with all the Rights and Appurtenances whatsoever thereto belonging; TO HOLD unto the said Bishop of Australia, or the Bishop of Australia for the time-being, the Reverend Henry Hodgkinson Bobart, John Blaxland, Hannibal Hawkins Macarthur, and John Betts, and to their Heirs and Assigns for ever, YIELDING and Paying therefor Yearly unto Us, Our Heirs and Successors, the Quit-Rent or Sum of One Farthing for ever, if demanded; UPON TRUST, for the appropriation thereof as the Glebe, annexed to the Church of the United Church of England and Ireland, as by Law Established, erected at Parramatta, and known as Saint John;

John; in conformity with the Provisions of the said Act, and of a certain other Act of the Governor and Legislative Council of Our said Territory, made and passed in the Seventh Year of the Reign of His said late Majesty King William the Fourth, intituled, "An Act to promote the Building of Churches and Chapels, and to provide for the maintenance of Ministers of Religion, in NEW SOUTH WALES," so far as the same may apply to the TRUSTS of this Our Grant, and for no other Purpose whatsoever; ON CONDITION THAT the said Grantees, their Heirs and Assigns, or some of them, do and shall construct proper Drains through and from the same Lands to the nearest Common Drain or Sewer, when required so to do; AND ALSO THAT they do and shall in every respect, and at all times hereafter conform to the Government Regulations, for the time-being, and to the Laws and Regulations now or hereafter to be in force, for the better regulating the Alignment of Streets in Our said Territory, so far as the same may be applicable; PROVIDED NEVERTHELESS, AND WE DO HEREBY RESERVE unto Us, Our Heirs and Successors, all such parts, and so much of the said Land as may hereafter be required for a Public Way or Public Ways, in, over, and through the same, to be set out by the Governor for the time-being, of Our said Territory, or some person by Him authorised in that respect; AND ALSO, all Stone and Gravel, all Indigenous Timber, and all other Materials, the produce of the said Lands, which may be required at any time or times hereafter, for the construction and repair of Ways and Bridges, for Naval Purposes, and for Public Works, together with the Right of taking and removing the same; AND ALSO, all Lands within One hundred feet of High Water-mark on the Sea Coast, and on every Creek, Harbour, and Inlet of the Sea; AND ALSO, all Mines of Gold, of Silver, and of Coals, with full and free liberty and power to search for, dig, and take away the same; AND ALSO, the right of full and free ingress, egress, and regress, into, out of, and upon the said Lands, for the several purposes aforesaid; AND WE DO FURTHER RESERVE unto Us, Our Heirs and Successors, full power for Us or Them, or for the Governor for the time-being of Our said Territory, to resume and take possession of all or any part of the said Lands not hereinbefore reserved, which may be required at any time or times hereafter for any Public Purpose whatsoever, the value of the said Lands not hereinbefore reserved, or of so much thereof as shall be so required, and of any Building standing on the said required Lands, being paid by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators chosen as hereinafter mentioned, in which valuation the benefit to accrue to the said Party, from any such Public Purpose, shall be allowed by way of Set-off; AND WE DO ALSO RESERVE unto Us, Our Heirs and Successors, and to the Governor for the time-being of Our said Territory, by such Person or Persons as shall be by Them or Him Authorised in that behalf, full power to make and conduct through the said Lands, all Common or Public Drains and Sewers which may be deemed expedient, Three Calendar Months' Notice being previously given to the Occupier, Owner, or Trustees thereof, and the Damage which any Building may sustain thereby, being paid for by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators as aforesaid; AND WE DO HEREBY DECLARE, that in every case of Arbitration which shall arise under and by Virtue hereof, One Arbitrator shall be chosen by the Governor for the time-being of Our said Territory, and One by the then Owner, Owners, or Trustees of the said Lands, or of such part thereof as may be thereby affected, which Two Arbitrators (before they proceed to the said Arbitration) shall elect an Umpire, who shall determine any disagreement between the two said Arbitrators; BUT if the said Owner, Owners, or Trustees shall refuse or neglect to choose an Arbitrator, on His, Her, or Their part within One Calendar Month after being required so to do by Public Advertisement in the *Government Gazette*, or otherwise, or if such Arbitrator being chosen, shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, then both Arbitrators shall be chosen by the Governor for the time-being of Our said Territory, which said last-mentioned Arbitrators shall also elect an Umpire in the manner and for the purpose above-mentioned; and if any Umpire shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, the Arbitrators for the time-being, whether chosen one by each Party, or both by the Governor of Our said Territory, shall in every such case forthwith elect another Umpire, in the same manner, for the same purpose, and Subject to the same Conditions as the Umpire first elected as aforesaid; PROVIDED ALWAYS, THAT if the Trusts, Conditions, Reservations, and Provisos herein contained, or any part thereof, be not duly observed and performed by the said Grantees, their Heirs and Assigns, then the said Lands shall be forfeited, and revert unto Us, Our Heirs and Successors, and these Presents, and every matter and thing herein contained shall cease and determine, and become absolutely void to all intents and purposes; And it shall be lawful for Us, Our Heirs and Successors, by Our Governor for the time-being of our said Territory, or some Person by Them or Him authorised in that behalf, to re-enter upon and take possession of the said Lands, or any part thereof, and the said Grantees, their Heirs and Assigns, and all Occupiers thereof, therefrom wholly to remove; IN TESTIMONY WHEREOF, WE have caused this Our Grant to be Sealed with the Seal of Our said Territory.

WITNESS Our Trusty and Well-beloved SIR GEORGE GIPPS, KNIGHT, Our Captain-General, and Governor-in-Chief of Our said Territory and its Dependencies, at Government House, Sydney, in New South Wales aforesaid, this Nineteenth day of September, in the Sixth Year of Our Reign; And in the Year of Our Lord One thousand eight hundred and forty-two.

TO ALL TO WHOM THESE PRESENTS SHALL COME, GREETING :—

KNOW YE, that in order to promote Religion and Education in Our Territory of NEW SOUTH WALES, WE, of Our Special Grace, HAVE GRANTED, and for Us, Our Heirs and Successors, DO HEREBY GRANT unto John Single, Alexander Fraser, John Hosking, and John Smith, being respectively Trustees nominated and appointed under and by Virtue of an Act of the Governor and Legislative Council of Our said Territory, made and passed in the Eighth Year of the Reign of His late Majesty King William the Fourth, intituled, "*An Act to regulate the Temporal Affairs of Churches and Chapels, of the United Church of England and Ireland, in NEW SOUTH WALES,*" and to their Heirs and Assigns, Subject to the Trusts, Conditions, Reservations, and Provisos hereinafter contained, ALL THAT Piece or Parcel of Land in Our said Territory, containing by admeasurement Forty Acres, be the same more or less, situated in the County of Cumberland, and Parish of Castlereagh; commencing at the North-west corner of Williams' Sixty Acres Grant; bounded on the South by a line East fourteen chains; on the East by a line North thirty-one chains fifty links; on the North by a line West seven chains; on the North-west by a line bearing South forty-three degrees West ten chains; and on the West by a line South twenty-four chains eighty links (Advertised as No. 34 in the Government Notice dated 28th June, 1842); with all the Rights and Appurtenances whatsoever thereto belonging; TO HOLD unto the said John Single, Alexander Fraser, John Hosking, and John Smith, their Heirs and Assigns for ever, YIELDING and Paying therefor Yearly unto Us, Our Heirs and Successors, the Quit-Rent or Sum of One Farthing for ever, if demanded; UPON TRUST, for the appropriation thereof as the Glebe, annexed to the Church of the United Church of England and Ireland, as by Law Established, to be erected at Castlereagh, and known as ———; in conformity with the Provisions of the said Act, and of a certain other Act of the Governor and Legislative Council of Our said Territory, made and passed in the Seventh Year of the Reign of His said late Majesty King William the Fourth, intituled, "*An Act to promote the Building of Churches and Chapels, and to provide for the Maintenance of Ministers of Religion, in NEW SOUTH WALES,*" so far as the same may apply to the TRUSTS of this Our Grant, and for no other Purpose whatsoever; ON CONDITION THAT the said Grantees, their Heirs and Assigns, or some of them, do and shall construct proper Drains through and from the same Land to the nearest Common Drain or Sewer, when required so to do; AND ALSO THAT they do and shall in every respect, and at all times hereafter conform to the Government Regulations, for the time-being, and to the Laws and Regulations now or hereafter to be in Force, for the better regulating the Alignment of Streets in Our said Territory, so far as the same may be applicable; PROVIDED NEVERTHELESS, AND WE DO HEREBY RESERVE unto Us, Our Heirs and Successors, all such parts, and so much of the said Land as may hereafter be required for a Public Way or Public Ways, in, over, and through the same, to be set out by the Governor for the time-being, of Our said Territory, or some person by Him authorised in that respect; AND ALSO, all Stone and Gravel, all Indigenous Timber, and all other Materials, the produce of the said Land, which may be required at any time or times hereafter, for the construction and repair of Ways and Bridges, for Naval Purposes, and for Public Works, together with the Right of taking and removing the same; AND ALSO, all Land within One hundred feet of High Water-mark on the Sea Coast, and on every Creek, Harbour, and Inlet of the Sea; AND ALSO, all Mines of Gold, of Silver, and of Coals, with full and free liberty and power to search for, dig, and take away the same; AND ALSO, the right of full and free ingress, egress, and regress, into, out of, and upon, the said Land for the several purposes aforesaid; AND WE DO FURTHER RESERVE unto Us, Our Heirs and Successors, full power for Us or Them, or for the Governor for the time-being of Our said Territory to resume and take possession of all or any part of the said Land not hereinbefore reserved, which may be required at any time or times hereafter for any Public Purpose whatsoever, the value of the said Land not hereinbefore reserved, or of so much thereof as shall be so required, and of any Building standing on the said required Land, being paid by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators chosen as hereinafter mentioned, in which valuation the benefit to accrue to the said Party, from any such Public Purpose, shall be allowed by way of Set-off; AND WE DO ALSO RESERVE unto Us, Our Heirs and Successors, and to the Governor for the time-being of Our said Territory, by such Person or Persons as shall be by Them or Him authorised in that behalf, full power to make and conduct through the said Land all Common or Public Drains and Sewers which may be deemed expedient, Three Calendar Months' Notice being previously given to the Occupier, Owner, or Trustees thereof, and the Damage which any Building may sustain thereby, being paid for by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators as aforesaid; AND WE DO HEREBY DECLARE, that in every case of Arbitration which shall arise under and by Virtue hereof, One Arbitrator shall be chosen by the Governor for the time-being of Our said Territory, and One by the then Owner, Owners, or Trustees of the said Land, or of such part thereof as may be thereby affected, which Two Arbitrators (before they proceed to the said Arbitration) shall elect an Umpire, who shall determine any disagreement between the Two said Arbitrators; BUT if the said Owner, Owners, or Trustees shall refuse or neglect to choose an Arbitrator, on His, Her, or Their part, within One Calendar

Calendar Month after being required so to do by Public Advertisement in the *Government Gazette*, or otherwise, or if such Arbitrator, being chosen, shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, then both Arbitrators shall be chosen by the Governor for the time-being of Our said Territory, which said last-mentioned Arbitrators shall also elect an Umpire in the manner and for the purpose above-mentioned; and if any Umpire shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, the Arbitrators for the time-being, whether chosen one by each Party, or both by the Governor of Our said Territory, shall in every such case forthwith elect another Umpire, in the same manner, for the same purpose, and Subject to the same Condition as the Umpire first elected as aforesaid; PROVIDED ALWAYS, THAT if the Trusts, Conditions, Reservations, and Provisos herein contained, or any part thereof, be not duly observed and performed by the said Grantees, their Heirs and Assigns, then the said Land shall be forfeited, and revert unto Us, Our Heirs and Successors, and these Presents, and every matter and thing herein contained, shall cease and determine, and become absolutely void to all intents and purposes; And it shall be lawful for Us, Our Heirs and Successors, by Our Governor for the time-being of Our said Territory, or some Person by Them or Him authorised in that behalf, to re-enter upon and take possession of the said Land, or any part thereof, and the said Grantees, their Heirs and Assigns, and all Occupiers thereof, therefrom wholly to remove; IN TESTIMONY WHEREOF, We have caused this Our Grant to be Sealed with the Seal of Our said Territory.

WITNESS Our Trusty and Well-beloved SIR GEORGE GIPPS, KNIGHT, Our Captain-General, and Governor-in-Chief of Our said Territory and its Dependencies, at Government House, Sydney, in New South Wales aforesaid, this Fourth day of November, in the Sixth Year of Our Reign; And in the Year of Our Lord One thousand eight hundred and forty-two.

--	---	---

KNOW YE, that in order to promote Religion and Education in Our Territory of NEW SOUTH WALES, WE, of Our Special Grace, HAVE GRANTED, and for US, Our Heirs and Successors, DO HEREBY GRANT unto Charles Throsby, Henry Badgery, William Bowman, George Meares Countees Bowen, and the Reverend George Vidal, being respectively Trustees nominated and appointed under and by Virtue of an Act of the Governor and Legislative Council of Our said Territory, made and passed in the Eighth Year of the Reign of His late Majesty King William the Fourth, intituled, "*An Act to regulate the Temporal Affairs of Churches and Chapels, of the United Church of England and Ireland, in NEW SOUTH WALES,*" and to their Heirs and Assigns, Subject to the Trusts, Conditions, Reservations, and Provisos hereinafter contained, ALL THAT Piece or Parcel of Land in Our said Territory, containing by Admeasurement Forty Acres, be the same more or less, situated in the County of Camden and Parish Unnamed, at Sutton Forest; bounded on the East by a line North twenty-six chains forty links, commencing at Lowry's South-west corner; on the North by Pavey's, bearing West twenty-four chains seventy links; on the West by a line South forty degrees East twenty-three chains thirty links, and a line South eight chains from Teague's South-east corner; and on the South by a line East nine chains sixty links (Advertised as No. 46 in the Government Notice dated 1st October, 1842); with all the Rights and Appurtenances whatsoever thereto belonging; TO HOLD unto the said Charles Throsby, Henry Badgery, William Bowman, George Meares Countees Bowen, and the Reverend George Vidal, their Heirs and Assigns for ever, YIELDING and Paying therefor Yearly unto Us, Our Heirs and Successors, the Quit-Rent or Sum of One Farthing for ever, if demanded; UPON TRUST, for the appropriation thereof as the Glebe, annexed to the Church of the United Church of England and Ireland, as by Law Established, erected at Sutton Forest, and known as All Saints; in conformity with the Provisions of the said Act, and of a certain other Act of the Governor and Legislative Council of Our said Territory, made and passed in the Seventh Year of the Reign of His said late Majesty King William the Fourth, intituled, "*An Act to promote the Building of Churches and Chapels, and to provide for the Maintenance of Ministers of Religion, in NEW SOUTH WALES,*" so far as the same may apply to the TRUSTS of this Our Grant, and for no other Purpose whatsoever; ON CONDITION THAT the said Grantees, their Heirs and Assigns, or some of them, do and shall construct proper Drains through and from the same Land

Land to the nearest Common Drain or Sewer, when required so to do; AND ALSO THAT they do and shall in every respect, and at all times hereafter, conform to the Government Regulations for the time-being, and to the Laws and Regulations now or hereafter to be in Force, for the better regulating the Alignment of Streets in Our said Territory, so far as the same may be applicable; PROVIDED NEVERTHELESS, AND WE DO HEREBY RESERVE unto Us, Our Heirs and Successors, all such parts, and so much of the said Land as may hereafter be required for a Public Way or Public Ways, in, over, and through the same, to be set out by the Governor for the time-being, of Our said Territory, or some person by Him authorised in that respect; AND ALSO, all Stone and Gravel, all Indigenous Timber, and all other Materials, the produce of the said Land, which may be required at any time or times hereafter, for the construction and repair of Ways and Bridges, for Naval Purposes, and for Public Works, together with the Right of taking and removing the same; AND ALSO, all Land within One hundred feet of High Water-mark on the Sea Coast, and on every Creek, Harbour, and Inlet of the Sea; AND ALSO, all Mines of Gold, of Silver, and of Coals, with full and free liberty and power to search for, dig, and take away the same; AND ALSO, the right of full and free ingress, egress, and regress, into, out of, and upon the said Land, for the several purposes aforesaid; AND WE DO FURTHER RESERVE unto Us, Our Heirs and Successors, full power for Us or Them, or for the Governor for the time-being of Our said Territory, to resume and take possession of all or any part of the said Land not hereinbefore reserved, which may be required at any time or times hereafter for any Public Purpose whatsoever, the value of the said Land not hereinbefore reserved, or of so much thereof as shall be so required, and of any Building standing on the said required Land, being paid by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators chosen as hereinafter mentioned, in which valuation the benefit to accrue to the said Party, from any such Public Purpose, shall be allowed by way of Set-off; AND WE DO ALSO RESERVE unto Us, Our Heirs and Successors, and to the Governor for the time-being of Our said Territory, by such Person or Persons as shall be by Them or Him authorised in that behalf, full power to make and conduct through the said Land, all Common or Public Drains and Sewers which may be deemed expedient, Three Calendar Months' Notice being previously given to the Occupier, Owner, or Trustees thereof, and the Damage which any Building may sustain thereby, being paid for by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators as aforesaid; AND WE DO HEREBY DECLARE, that in every case of Arbitration which shall arise under and by Virtue hereof, One Arbitrator shall be chosen by the Governor for the time-being of Our said Territory, and One by the then Owner, Owners, or Trustees of the said Land, or of such part thereof as may be thereby affected, which Two Arbitrators (before they proceed to the said Arbitration) shall elect an Umpire, who shall determine any disagreement between the two said Arbitrators; BUT if the said Owner, Owners, or Trustees shall refuse or neglect to choose an Arbitrator, on His, Her, or Their part within One Calendar Month after being required so to do by Public Advertisement in the *Government Gazette*, or otherwise, or if such Arbitrator being chosen, shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, then both Arbitrators shall be chosen by the Governor for the time-being of Our said Territory, which said last-mentioned Arbitrators shall also elect an Umpire in the manner and for the purpose above-mentioned; and if any Umpire shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, the Arbitrators for the time-being, whether chosen one by each Party, or both by the Governor of Our said Territory, shall in every such case forthwith elect another Umpire, in the same manner, for the same purpose, and Subject to the same Condition as the Umpire first elected as aforesaid; PROVIDED ALWAYS, THAT if the Trusts, Conditions, Reservations, and Provisos herein contained, or any part thereof, be not duly observed and performed by the said Grantees, their Heirs and Assigns, then the said Land shall be forfeited, and revert unto Us, Our Heirs and Successors, and these Presents, and every matter and thing herein contained shall cease and determine, and become absolutely void to all intents and purposes; And it shall be lawful for Us, Our Heirs and Successors, by Our Governor for the time-being of Our said Territory, or some Person by Them or Him authorised in that behalf, to re-enter upon and take possession of the said Land, or any part thereof, and the said Grantees, their Heirs and Assigns, and all Occupiers thereof, therefrom wholly to remove; IN TESTIMONY WHEREOF, We have caused this Our Grant to be Sealed with the Seal of Our said Territory.

WITNESS Our Trusty and Well-beloved SIR GEORGE GIPPS, KNIGHT, Our Captain-General, and Governor-in-Chief of Our said Territory and its Dependencies, at Government House, Sydney, in New South Wales aforesaid, this Tenth day of November, in the Sixth Year of Our Reign; And in the Year of Our Lord One thousand eight hundred and forty-two.

UNITED CHURCH OF ENGLAND AND IRELAND. NO. IV.

DATE, 1st May, 1849. COUNTY, Cumberland. PARISH, Saint John. CHURCH, Saint John. 17 ACRES 2r. and 16p.	}	<i>VICTORIA, by the Grace of God of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, and so forth;</i> To ALL TO WHOM THESE PRESENTS SHALL COME, GREETING:—
--	---	--

KNOW YE, that in order to promote Religion and Education in Our Territory of NEW SOUTH WALES, WE, of Our Special Grace, HAVE GRANTED, and for Us, Our Heirs and Successors, DO HEREBY GRANT unto the Right Reverend William Grant Broughton, the Lord Bishop of Sydney and his Successors, Bishops of Sydney for ever, the Reverend Henry Hodgkinson Bobart, Francis Watkins, and Arthur Blaxland, being respectively Trustees nominated and appointed under and by Virtue of an Act of the Governor and Legislative Council of Our said Territory, made and passed in the Eighth Year of the Reign of His late Majesty King William the Fourth, intituled, "*An Act to regulate the Temporal Affairs of the Churches and Chapels, of the United Church of England and Ireland, in NEW SOUTH WALES,*" and to their Heirs and Assigns, subject to the Trusts, Conditions, Reservations, and Provisos hereinafter contained, ALL THAT Piece or Parcel of Land in Our said Territory, containing by Admeasurement Seventeen Acres Two Roods and Sixteen Perches, be the same more or less, situated in the County of Cumberland, and Parish of Saint John, at Parramatta; commencing on the Penrith Road, at the North-east corner, and bounded on the East by a line bearing South one degree forty-five minutes West eleven chains fifty-two links; partly on the South by a measured portion containing two acres and nineteen perches, being a line bearing West one degree forty-five minutes North three chains seventy-five links; again on the East by that measured portion, being a line bearing South one degree forty-five minutes West six chains forty-three links; on the South by the Racecourse, being a line bearing South seventy-four degrees West seven chains sixty links; on the West by part of the Glebe, being a line bearing North fifty-five minutes West eighteen chains fifty links; on the North by a portion of the Glebe land, being a line bearing East five degrees South five chains fifty-five links to Blakefield's Allotment; again on the East by that allotment, being a line bearing South five degrees fifteen minutes West one chain sixty-three links; again on the North by Blakefield's Allotment, being a line bearing East five degrees forty-five minutes South one chain twenty-two links; again on the West by Blakefield's

field's Allotment, being a line bearing North five degrees fifteen minutes East four chains fourteen links to the Penrith Road; and again on the North by the Penrith Road, being a line bearing East four degrees fifty-seven minutes South four chains ninety-four links, to the North-east corner aforesaid (Advertised as No. 113 in the Government Notice dated 19th February, 1849); with all the Rights and Appurtenances whatsoever thereto belonging; TO HOLD unto the said Right Reverend William Grant Broughton, the Lord Bishop of Sydney and his Successors, Bishops of Sydney for ever, the Reverend Henry Hodgkinson Bobart, Francis Watkins, and Arthur Blaxland, their Heirs and Assigns for ever, YIELDING and Paying therefor Yearly unto Us, Our Heirs and Successors, the Quit-Rent or Sum of One Farthing for ever, if demanded; UPON TRUST, for the appropriation thereof as the residue of the Glebe, annexed to the Church of the United Church of England and Ireland, as by Law Established, erected at Parramatta, and known as Saint John's, in conformity with the Provisions of the said Act, and of a certain other Act of the Governor and Legislative Council of Our said Territory, made and passed in the Seventh Year of the Reign of His said late Majesty King William the Fourth, intituled, "*An Act to promote the Building of Churches and Chapels, and to provide for the Maintenance of Ministers of Religion, in NEW SOUTH WALES,*" so far as the same may apply to the TRUSTS of this Our Grant, and for no other Purpose whatsoever; ON CONDITION THAT the said Grantees, their Heirs and Assigns, or some of them, do and shall construct proper Drains through and from the same Land to the nearest Common Drain or Sewer, when required so to do; AND ALSO THAT they do and shall in every respect, and at all times hereafter conform to the Government Regulations, for the time-being, and to the Laws and Regulations now or hereafter to be in Force, for the better regulating the Alignment of Streets in Our said Territory, so far as the same may be applicable; PROVIDED NEVERTHELESS, AND WE DO HEREBY RESERVE unto Us, Our Heirs and Successors, all such parts, and so much of the said Land as may hereafter be required for a Public Way or Public Ways, in, over, and through the same, to be set out by the Governor for the time-being, of Our said Territory, or some person by Him authorised in that respect; AND ALSO, all Stone and Gravel, all Indigenous Timber, and all other Materials, the produce of the said Lands, which may be required at any time or times hereafter, for the construction and repair of Ways and Bridges, for Naval Purposes, and for Public Works, together with the Right of taking and removing the same; AND ALSO, all Land within One hundred feet of High Water-mark on the Sea Coast, and on every Creek, Harbour, and Inlet of the Sea; AND ALSO, all Mines of Gold, of Silver, and of Coals, with full and free liberty and power to search for, dig, and take away the same; AND ALSO, the right of full and free ingress, egress, and regress, into, out of, and upon the said Land for the several purposes aforesaid; AND WE DO FURTHER RESERVE unto Us, Our Heirs, and Successors, full power for Us or Them, or for the Governor for the time-being of Our said Territory, to resume and take possession of all or any part of the said Land not hereinbefore reserved, which may be required at any time or times hereafter for any Public Purpose whatsoever, the value of the said Land not hereinbefore reserved, or of so much thereof as shall be so required, and of any Building standing on the said required Land, being paid by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators chosen as hereinafter mentioned, in which valuation the benefit to accrue to the said Party, from any such Public Purpose, shall be allowed by way of Set-off; AND WE DO ALSO RESERVE unto Us, Our Heirs and Successors, and to the Governor for the time-being of Our said Territory, by such Person or Persons as shall be by Them or Him Authorised in that behalf, full power to make and conduct through the said Land, all Common or Public Drains and Sewers which may be deemed expedient, Three Calendar Months' Notice being previously given to the Occupier, Owner, or Trustees thereof, and the Damage which any Building may sustain thereby, being paid for by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators as aforesaid; AND WE DO HEREBY DECLARE, that in every case of Arbitration which shall arise under and by Virtue hereof, One Arbitrator shall be chosen by the Governor for the time-being of Our said Territory, and One by the then Owner, Owners, or Trustees of the said Land, or of such part thereof as may be thereby affected, which Two Arbitrators (before they proceed to the said Arbitration) shall elect an Umpire, who shall determine any disagreement between the two said Arbitrators; BUT if the said Owner, Owners, or Trustees shall refuse or neglect to choose an Arbitrator, on His, Her, or Their part within One Calendar Month after being required so to do by Public Advertisement in the *Government Gazette*, or otherwise, or if such Arbitrator, being chosen, shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, then both Arbitrators shall be chosen by the Governor for the time-being of Our said Territory, which said last-mentioned Arbitrators shall also elect an Umpire in the manner and for the purpose above-mentioned; and if any Umpire shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, the Arbitrators for the time-being, whether chosen one by each Party, or both by the Governor of Our said Territory, shall in every such case forthwith elect another Umpire, in the same manner, for the same purpose, and Subject to the same Condition as the Umpire first elected as aforesaid; PROVIDED ALWAYS, THAT if the Trusts, Conditions, Reservations, and Provisos herein contained, or any part thereof, be not duly observed and performed by the said Grantees, their Heirs and Assigns, then the said Lands shall be forfeited, and revert unto Us, Our Heirs and Successors, and these Presents, and every matter and thing herein contained shall cease and determine, and become absolutely void to all intents and purposes; And it shall be lawful for Us, Our Heirs and Successors, by Our Governor for the time-being of Our said Territory, or some Person by Them or Him authorised in that behalf, to re-enter upon and take possession of the said Land

Land or any part thereof, and the said Grantees, their Heirs and Assigns, and all Occupiers thereof, therefrom wholly to remove; IN TESTIMONY WHEREOF, WE have caused this Our Grant to be Sealed with the Seal of Our Said Territory.

WITNESS Our Trusty and Well-beloved SIR CHARLES AUGUSTUS FITZ ROY, Knight Companion of the Royal Hanoverian Guelphic Order, Our Captain-General, and Governor-in-Chief of Our said Territory and its Dependencies, at Government House, Sydney, in New South Wales aforesaid, this First day of May, in the Twelfth Year of Our Reign; And in the Year of Our Lord One thousand eight hundred and forty-nine.

L. S. (Signed) CH^s. A. FITZ ROY.

ENTERED on Record by me, this Tenth day of May, One thousand eight hundred and forty-nine.

(Signed) E. DEAS THOMSON,
Colonial Secretary and Registrar.

ACRES,

VICTORIA, by the Grace of God of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, and so forth;

TO ALL TO WHOM THESE PRESENTS SHALL COME, GREETING:—

KNOW YE, that in order to promote Religion and Education in Our Territory of NEW SOUTH WALES, WE, of Our Special Grace, with the advice of Our Executive Council of New South Wales, HAVE GRANTED, and for Us, Our Heirs and Successors, DO HEREBY GRANT unto Thomas Whistler Smith, Thomas Sutcliffe Mort, John Croft, Robert Tooth, and James Norton, junior, being respectively Trustees nominated and appointed under and by Virtue of an Act of the Governor and Legislative Council of Our said Territory, made and passed in the Eighth Year of the Reign of His late Majesty King William the Fourth, intituled, "*An Act to regulate the Temporal Affairs of Churches and Chapels, of the United Church of England and Ireland, in NEW SOUTH WALES,*" and to their Heirs and Assigns, Subject to the Trusts, Conditions, Reservations, and Provisos hereinafter contained, ALL THAT Piece or Parcel of Land in Our said Territory, containing by Admeasurement Forty Acres, be the same more or less, situated in the County of Cumberland and Parish of Alexandria, near Coogee—First portion, containing Thirty Acres Three Roods and Nine Perches, situate in the County and Parish aforesaid, near Coogee aforesaid; commencing on the Frenchman's Road, at a point distant one chain and twenty-five links West from the West boundary line of Stewart Alexander Donaldson's Allotment number sixty-one, and bounded on the East by a line bearing South two chains and ninety links; on the North by a line bearing East seventy-five links; again on the East by the West side of a Road fifty links wide, dividing it from the aforesaid Stuart Alexander Donaldson's Allotment number sixty-one, by the West boundary line of W. Roberts' Allotment number sixty and A. Dick's allotment number fifty-nine, by the West side of a road fifty links wide, dividing it from part of A. Dick's Allotment number fifty-eight, and by the West side of Nathan-street, being in all a line bearing South fourteen chains and eight links; on the North-east by Nathan-street, bearing South nineteen degrees forty minutes East seven chains and forty-two links, South one chain and ninety links, South seventeen degrees five minutes East four chains and ninety-one links, and South one chain and seventeen links; on the South by the North boundary of James Hart's Allotment number thirty-five, and its Westerly continuation, being in all a line bearing West eight chains and ten links to the West bank of a Creek; again on the East by the West bank of that Creek dividing it from the aforesaid James Hart's Allotment number thirty-five, and from J. Hart's Allotment number thirty-four Southerly to Alison Road; on the South-west by that road bearing West twenty-two degrees fifty minutes North six chains and thirty-seven links to St. Mark's Road; on the West by that road bearing North seventeen degrees forty-five minutes West three chains and sixty links, North twelve chains and eighty-two links, North eighteen degrees thirty minutes East six chains and twelve links, and North one degree four minutes East five chains and seventy-five links to the Frenchman's Road aforesaid; and on the North-west by the Frenchman's Road bearing North fifty-five degrees fifteen minutes East four chains and forty-seven links, North thirty-three degrees thirty minutes East five chains and ninety-six links, and North forty-two degrees East one chain and seven links to the point of commencement—exclusively of a Road one chain wide passing through this land the centre of which commences at the North-west corner thereof, being the South-easterly intersection of Saint Mark's Road with the Frenchman's Road, bearing thence East fifteen degrees South three chains thirty-five links, East twenty-seven degrees South three chains ten links, East forty-four degrees thirty minutes South one chain fifty-five links, and South nineteen degrees forty minutes East to its junction with the Western side of Nathan-street, the area of which Road has been deducted from the total area; Second portion, containing Nine Acres and Thirty-one Perches, situate in the County and Parish aforesaid, near Coogee aforesaid,

aforesaid, commencing on Alison Road, at the South-east corner of C. Nathan's five acres and two roods and thirty-three perches, and bounded on the West by a line dividing it from that land, and from T. Wood's seven acres and thirty-four perches, bearing North thirteen chains and two links to the South-east corner of A. M'Gee's six acres three roods; on the North by a line bearing East one chain, being the extremity of a Road of one chain wide; again on the West by that Road one chain wide, dividing it from A. M'Gee's Land aforesaid, bearing North eight chains and forty links; on the North-east by Chapel-street one chain wide, bearing East fifty-two degrees thirty minutes South six chains and thirty-four links, East seventy-one degrees thirty-seven minutes South one chain and sixteen links to Saint Mark's Road, one chain wide; on the East by Saint Mark's Road bearing South ten chains and seventy links, East seventy-two degrees fifteen minutes South two chains and eighty-six links, and South eighty-seven links to Alison Road; on the South-east by that Road, one chain wide, bearing South seventy-two degrees fifteen minutes West three chains and eighty-nine links; and on the South by the same road bearing West two chains and forty-three links to the corner of commencement (Advertised as No. 1 in the Government Notice dated 1st February, 1856); with all the Rights and Appurtenances whatsoever thereto belonging; TO HOLD unto the said Thomas Whistler Smith, Thomas Sutcliffe Mort, John Croft, Robert Tooth, and James Norton, junior, their Heirs and Assigns for ever, YIELDING and Paying therefor Yearly unto Us, Our Heirs and Successors, the Quit-Rent or Sum of One Farthing for ever, if demanded; UPON TRUST, for the appropriation thereof as the Glebe, annexed to the Church of the United Church of England and Ireland, as by Law Established, erected at Green Oaks, Darling Point, and known as Saint Mark's; in conformity with the Provisions of the said Act, and of a certain other Act of the Governor and Legislative Council of Our said Territory, made and passed in the Seventh Year of the Reign of His said late Majesty King William the Fourth, intituled, "*An Act to promote the Building of Churches and Chapels, and to provide for the maintenance of Ministers of Religion, in NEW SOUTH WALES,*" so far as the same may apply to the TRUSTS of this Our Grant, and for no other Purpose whatsoever; ON CONDITION THAT the said Grantees, their Heirs and Assigns, or some of them, do and shall construct proper Drains through and from the same Land to the nearest Common Drain or Sewer, when required so to do; AND ALSO THAT they do and shall in every respect, and at all times hereafter conform to the Government Regulations, for the time-being, and to the Laws and Regulations now or hereafter to be in force, for the better regulating the Alignment of Streets in Our said Territory, so far as the same may be applicable; PROVIDED NEVERTHELESS, AND WE DO HEREBY RESERVE unto Us, Our Heirs and Successors, all such parts, and so much of the said Land as may hereafter be required for a Public Way or Public Ways, in, over, and through the same, to be set out by the Governor for the time-being, of Our said Territory, or some person by Him authorised in that respect; AND ALSO, all Stone and Gravel, all Indigenous Timber, and all other Materials, the produce of the said Land, which may be required at any time or times hereafter, for the construction and repair of Ways and Bridges, for Naval Purposes, and for Public Works, together with the Right of taking and removing the same; AND ALSO, all Land within One hundred feet of High Water-mark on the Sea Coast, and on every Creek, Harbour, and Inlet of the Sea; AND ALSO, all Mines of Gold, of Silver, and of Coals, with full and free liberty and power to search for, dig, and take away the same; AND ALSO, the right of full and free ingress, egress, and regress, into, out of, and upon the said Land, for the several purposes aforesaid; AND WE DO FURTHER RESERVE unto Us, Our Heirs and Successors, full power for Us or Them, or for the Governor for the time-being of Our said Territory, to resume and take possession of all or any part of the said Land not hereinbefore reserved, which may be required at any time or times hereafter for any Public Purpose whatsoever, the value of the said Land not hereinbefore reserved, or of so much thereof as shall be so required, and of any Building standing on the said required Land, being paid by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators chosen as hereinafter mentioned, in which valuation the benefit to accrue to the said Party, from any such Public Purpose, shall be allowed by way of Set-off; AND WE DO ALSO RESERVE unto Us, Our Heirs and Successors, and to the Governor for the time-being of Our said Territory, by such Person or Persons as shall be by Them or Him Authorised in that behalf, full power to make and conduct through the said Land, all Common or Public Drains and Sewers which may be deemed expedient, Three Calendar Months' Notice being previously given to the Occupier, Owner, or Trustees thereof, and the Damage which any Building may sustain thereby, being paid for by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators as aforesaid; AND WE DO HEREBY DECLARE, that in every case of Arbitration which shall arise under and by Virtue hereof, One Arbitrator shall be chosen by the Governor for the time-being of Our said Territory, and One by the then Owner, Owners, or Trustees of the said Lands, or of such part thereof as may be thereby affected, which Two Arbitrators (before they proceed to the said Arbitration) shall elect an Umpire, who shall determine any disagreement between the two said Arbitrators; BUT if the said Owner, Owners, or Trustees shall refuse or neglect to choose an Arbitrator, on His, Her, or Their part within One Calendar Month after being required so to do by Public Advertisement in the *Government Gazette*, or otherwise, or if such Arbitrator being chosen, shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, then both Arbitrators shall be chosen by the Governor for the time-being of Our said Territory, which said last-mentioned Arbitrators shall also elect an Umpire in the manner and for the purpose above-mentioned; and if any Umpire shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, the Arbitrators for the time-being, whether chosen one by each Party, or both by the Governor of Our said Territory, shall in every such case forthwith elect another Umpire,

in

in the same manner, for the same purpose, and Subject to the same Conditions as the Umpire first elected as aforesaid; PROVIDED ALWAYS, THAT if the Trusts, Conditions, Reservations, and Provisos herein contained, or any part thereof, be not duly observed and performed by the said Grantees, their Heirs and Assigns, then the said Lands shall be forfeited, and revert unto Us, Our Heirs and Successors, and these Presents, and every matter and thing herein contained shall cease and determine, and become absolutely void to all intents and purposes; And it shall be lawful for Us, Our Heirs and Successors, by Our Governor for the time-being of our said Territory, or some Person by Them or Him authorised in that behalf, to re-enter upon and take possession of the said Land, or any part thereof, and the said Grantees, their Heirs and Assigns, and all Occupiers thereof, therefrom wholly to remove; IN TESTIMONY WHEREOF, WE have caused this Our Grant to be Sealed with the Seal of Our said Territory.

WITNESS Our Trusty and Well-beloved SIR WILLIAM THOMAS DENISON, Knight Commander of the Most Honorable Order of the Bath, Governor General in and over all Our Colonies of New South Wales, Tasmania, Victoria, South Australia, and Western Australia, Our Captain-General, and Governor-in-Chief of Our Territory of New South Wales and its Dependencies, at Government House, Sydney, in New South Wales aforesaid, this Third day of June, in the Twentieth Year of Our Reign; And in the Year of Our Lord One thousand eight hundred and fifty-seven.

VICTORIA, by the Grace of God of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, and so forth;

TO ALL TO WHOM THESE PRESENTS SHALL COME, GREETING:—

KNOW YE, that in order to promote Religion and Education in our Territory of NEW SOUTH WALES, WE, of Our Special Grace, with the advice of Our Executive Council of New South Wales, HAVE GRANTED, and for Us, Our Heirs and Successors, DO HEREBY GRANT unto The Reverend Robert Allwood, Charles Kemp, Charles Martyn, Hutchinson Hothersall Browne, and Clark Irving, being respectively Trustees nominated and appointed under and by Virtue of an Act of the Governor and Legislative Council of Our said Territory, made and passed in the Eighth Year of the Reign of His late Majesty King William the Fourth, intituled, "*An Act to regulate the Temporal Affairs of Churches and Chapels of the United Church of England and Ireland, in NEW SOUTH WALES,*" and to their Heirs and Assigns, Subject to the Trusts, Conditions, Reservations, and Provisos hereinafter contained, ALL THAT Piece or Parcel of Land in Our said Territory, containing by Admeasurement Three Roods and Five Perches, be the same more or less, situated in the County of Cumberland, and Parish of Alexandria; commencing on the Southern side of the Old South Head Road, at the North-west corner of the eleven acres (appropriated for St. James' Glebe), and bounded thence on the East by part of the West boundary line of that land, bearing South three chains and eighty links; on the South by a line bearing West two chains; on the West by a line bearing North four chains and two links to the Old South Head Road; and on the North by that Road bearing East six degrees twenty-six minutes South two chains and two links to the point of commencement,—being granted in lieu of land appropriated for a School House for Saint Mark's, Double Bay (Advertised in the Government Notice dated 12th October, 1858); with all the Rights and Appurtenances whatsoever thereto belonging; TO HOLD unto the said Reverend Robert Allwood, Charles Kemp, Charles Martyn, Hutchinson Hothersall Browne, and Clark Irving, their Heirs and Assigns for ever, YIELDING and Paying therefor Yearly unto Us, Our Heirs and Successors, the Quit-Rent or Sum of One Farthing for ever, if demanded; UPON TRUST, for the appropriation thereof as a portion of the Glebe, annexed to the Church of the United Church of England and Ireland, as by Law Established, erected at Sydney, and known as St. James, in conformity with the Provisions of the said Act, and of a certain other Act of the Governor and Legislative Council of Our said Territory, made and passed in the Seventh Year of the Reign of His said late Majesty King William the Fourth, intituled, "*An Act to promote the Building of Churches and Chapels, and to provide for the Maintenance of Ministers of Religion, in NEW SOUTH WALES,*" so far as the same may apply to the TRUSTS of this Our Grant, and for no other Purpose whatsoever; ON CONDITION THAT the said Grantees, their Heirs and Assigns, or some of them, do and shall construct proper Drains through and from the same Land to the nearest Common Drain or Sewer, when required so to do; AND ALSO THAT they do and shall in every respect, and at all times hereafter conform to the Government Regulations, for the time-being, and to the Laws and Regulations now or hereafter to be in Force, for the better regulating the Alignment of Streets in Our said Territory, so far as the same may be applicable; PROVIDED NEVERTHELESS, AND WE DO HEREBY RESERVE unto Us, our Heirs, and Successors, all such parts, and so much of the said Land as may hereafter be required for a Public Way or Public Ways, in, over, and through the same, to be set out by the Governor for the time-being, of Our said Territory, or some person by Him authorised in that

that respect ; AND ALSO, all Stone and Gravel, all Indigenous Timber, and all other Materials, the produce of the said Land, which may be required at any time or times hereafter, for the construction and repair of Ways and Bridges, for Naval Purposes, and for Public Works, together with the Right of taking and removing the same ; AND ALSO, all Land within One hundred feet of High Water-mark on the Sea Coast, and on every Creek, Harbour, and Inlet of the Sea ; AND ALSO, all Mines of Gold, of Silver, and of Coals, with full and free liberty and power to search for, dig, and take away the same ; AND ALSO, the right of full and free ingress, egress, and regress, into, out of, and upon the said Land, for the several purposes aforesaid ; AND WE DO FURTHER RESERVE unto Us, Our Heirs and Successors, full power for Us or Them, or for the Governor for the time-being of Our said Territory, to resume and take possession of all or any part of the said Land not hereinbefore reserved, which may be required at any time or times hereafter for any Public Purpose whatsoever, the value of the said Land not hereinbefore reserved, or of so much thereof as shall be so required, and of any Building standing on the said required Land, being paid by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators chosen as hereinafter mentioned, in which valuation the benefit to accrue to the said Party, from any such Public Purpose, shall be allowed by way of Set-off ; AND WE DO ALSO RESERVE unto Us, Our Heirs and Successors, and to the Governor for the time-being of Our said Territory, by such Person or Persons as shall be by Them or Him Authorised in that behalf, full power to make and conduct through the said Land all Common or Public Drains and Sewers which may be deemed expedient, Three Calendar Months' Notice being previously given to the Occupier, Owner, or Trustees thereof, and the Damage which any Building may sustain thereby, being paid for by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators as aforesaid ; AND WE DO HEREBY DECLARE, that in every case of Arbitration which shall arise under and by Virtue hereof, One Arbitrator shall be chosen by the Governor for the time-being of Our said Territory, and One by the then Owner, Owners, or Trustees of the said Land or of such part thereof as may be thereby affected, which Two Arbitrators (before they proceed to the said Arbitration) shall elect an Umpire, who shall determine any disagreement between the two said Arbitrators ; BUT if the said Owner, Owners, or Trustees shall refuse or neglect to choose an Arbitrator, on His, Her, or Their part within One Calendar Month after being required so to do by Public Advertisement in the *Government Gazette*, or otherwise, or if such Arbitrator, being chosen, shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, then both Arbitrators shall be chosen by the Governor for the time-being of Our said Territory, which said last-mentioned Arbitrators shall also elect an Umpire in the manner and for the purpose above-mentioned ; and if any Umpire shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, the Arbitrators for the time-being, whether chosen one by each Party, or both by the Governor of Our said Territory, shall in every such case forthwith elect another Umpire, in the same manner, for the same purpose, and Subject to the same Condition as the Umpire first elected as aforesaid ; PROVIDED ALWAYS, THAT if the Trusts, Conditions, Reservations, and Provisos herein contained, or any part thereof, be not duly observed and performed by the said Grantees, their Heirs and Assigns, then the said Lands shall be forfeited, and revert unto Us, Our Heirs and Successors, and these presents, and every matter and thing herein contained, shall cease and determine, and become absolutely void to all intents and purposes ; And it shall be lawful for Us, Our Heirs and Successors, by Our Governor for the time-being of Our said Territory, or some Person by Them or Him authorised in that behalf, to re-enter upon and take possession of the said Land, or any part thereof, and the said Grantees, their Heirs and Assigns, and all Occupiers thereof, therefrom wholly to remove ; IN TESTIMONY WHEREOF, WE have caused this Our Grant to be Sealed with the Seal of Our said Territory.

WITNESS Our Trusty and Well-beloved SIR WILLIAM THOMAS DENISON, Knight Commander of the Most Honorable Order of the Bath, Governor General in and over all Our Colonies of New South Wales, Tasmania, Victoria, South Australia, and Western Australia, Our Captain-General and Governor-in-Chief of Our Territory of New South Wales and its Dependencies, at Government House, Sydney, in New South Wales aforesaid, this Twenty-second day of February, in the Twenty-second Year of Our Reign ; And in the Year of Our Lord One thousand eight hundred and fifty-nine.

TO ALL TO WHOM THESE PRESENTS SHALL COME, GREETING:—

KNOW YE, that in order to promote Religion and Education in Our Territory of NEW SOUTH WALES, WE, of Our Special Grace, HAVE GRANTED, and for Us, Our Heirs and Successors, DO HEREBY GRANT unto William Stewart, John Piper, David Maxwell Irving, George Busby, and Robert Smith, being respectively Trustees nominated and appointed under and by Virtue of an Act of the Governor and Legislative Council of Our said Territory, made and passed in the Eighth Year of the Reign of His late Majesty King William the Fourth, intituled, "*An Act to regulate the Temporal Affairs of the Presbyterian Churches and Chapels, connected with the Church of Scotland in the Colony of NEW SOUTH WALES,*" and to their Heirs and Assigns, subject to the Trusts, Conditions, Reservations, and Provisos hereinafter contained, ALL THAT Piece or Parcel of Land in Our said Territory, containing by Admeasurement Forty Acres, be the same more or less, situated in the County of Bathurst, and Parish of Bathurst, bounded on the North by the Township Reserve, West thirty-five chains fifteen links, commencing at Queen Charlotte's Vale Creek, opposite the western extremity of J. Vincent's northern boundary; on the West by a line South fourteen chains; on the South by a line East twenty-one chains to Queen Charlotte's Vale Creek; and on the East by the Creek to the point opposite the western extremity of J. Vincent's northern boundary (Advertised as No. 20 in the Government Notice dated 12th September, 1843); with all the Rights and Appurtenances whatsoever thereto belonging; TO HOLD unto the said William Stewart, John Piper, David Maxwell Irving, George Busby, and Robert Smith, their Heirs and Assigns, for ever, YIELDING and Paying therefor Yearly unto Us, Our Heirs and Successors, the Quit-Rent or Sum of One Farthing for ever, if demanded; UPON TRUST, for the appropriation thereof as the Glebe, annexed to the Church of the Synod of Australia, in connexion with the Established Church of Scotland, erected at Bathurst, and known as _____, in conformity with the Provisions of the said Act, and of a certain other Act of the Governor and Legislative Council of Our said Territory, made and passed in the Seventh Year of the Reign

Reign of His said late Majesty King William the Fourth, intituled, "*An Act to promote the Building of Churches and Chapels, and to provide for the Maintenance of Ministers of Religion, in NEW SOUTH WALES,*" so far as the same may apply to the TRUSTS of this Our Grant, and for no other Purpose whatsoever; ON CONDITION THAT the said Grantees, their Heirs and Assigns, or some of them, do and shall construct proper Drains through and from the same Land to the nearest Common Drain or Sewer, when required so to do; AND ALSO THAT they do and shall in every respect, and at all times hereafter conform to the Government Regulations, for the time-being, and to the Laws and Regulations now or hereafter to be in Force, for the better regulating the Aligment of Streets in Our said Territory, so far as the same may be applicable; PROVIDED NEVERTHELESS, AND WE DO HEREBY RESERVE unto Us, Our Heirs and Successors, all such parts, and so much of the said Land as may hereafter be required for a Public Way or Public Ways, in, over, and through the same, to be set out by the Governor for the time-being, of Our said Territory, or some person by Him authorised in that respect; AND ALSO, all Stone and Gravel, all Indigenous Timber, and all other Materials, the produce of the said Land, which may be required at any time or times hereafter, for the construction and repair of Ways and Bridges, for Naval Purposes, and for Public Works, together with the Right of taking and removing the same; AND ALSO, all Land within One hundred feet of High Water-mark on the Sea Coast, and on every Creek, Harbour, and Inlet of the Sea; AND ALSO, all Mines of Gold, of Silver, and of Coals, with full and free liberty and power to search for, dig, and take away the same; AND ALSO, the right of full and free ingress, egress, and regress, into, out of, and upon the said Land for the several purposes aforesaid; AND WE DO FURTHER RESERVE unto Us, Our Heirs and Successors, full power for Us or Them, or for the Governor for the time-being of Our said Territory, to resume and take possession of all or any part of the said Land not hereinbefore reserved, which may be required at any time or times hereafter for any Public Purpose whatsoever, the value of the said Land not hereinbefore reserved, or of so much thereof as shall be so required, and of any Building standing on the said required Land, being paid by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators chosen as hereinafter mentioned, in which valuation the benefit to accrue to the said Party, from any such Public Purpose, shall be allowed by way of Set-off; AND WE DO ALSO RESERVE unto Us, Our Heirs and Successors, and to the Governor for the time-being of Our said Territory, by such Person or Persons as shall be by Them or Him Authorised in that behalf, full power to make and conduct through the said Land, all Common or Public Drains and Sewers which may be deemed expedient, Three Calendar Months' Notice being previously given to the Occupier, Owner, or Trustees thereof, and the Damage which any Building may sustain thereby, being paid for by the Government to the Party entitled thereto, at a valuation fixed by Arbitrators as aforesaid; AND WE DO HEREBY DECLARE, that in every case of Arbitration which shall arise under and by Virtue hereof, One Arbitrator shall be chosen by the Governor for the time-being of Our said Territory, and One by the then Owner, Owners, or Trustees of the said Land, or of such part thereof as may be thereby affected, which Two Arbitrators (before they proceed to the said Arbitration) shall elect an Umpire, who shall determine any disagreement between the two said Arbitrators; But if the said Owner, Owners, or Trustees shall refuse or neglect to choose an Arbitrator, on His, Her, or Their part within One Calendar Month after being required so to do by Public Advertisement in the *Government Gazette*, or otherwise, or if such Arbitrator, being chosen, shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, then both Arbitrators shall be chosen by the Governor for the time-being of Our said Territory, which said last-mentioned Arbitrators shall also elect an Umpire in the manner and for the purpose above-mentioned; and if any Umpire shall refuse or neglect to Act, and within One Calendar Month determine the matter to him referred, the Arbitrators for the time-being, whether chosen one by each Party, or both by the Governor of Our said Territory, shall in every such case forthwith elect another Umpire, in the same manner, for the same purpose, and Subject to the same Condition as the Umpire first elected as aforesaid; PROVIDED ALWAYS, THAT if the Trusts, Conditions, Reservations, and Provisos herein contained, or any part thereof, be not duly observed and performed by the said Grantees, their Heirs and Assigns, then the said Land shall be forfeited, and revert unto Us, Our Heirs and Successors, and these Presents, and every matter and thing herein contained shall cease and determine, and become absolutely void to all intents and purposes; And it shall be lawful for Us, Our Heirs and Successors, by Our Governor for the time-being of Our said Territory, or some Person by Them or Him authorised in that behalf, to re-enter upon and take possession of the said Land or any part thereof, and the said Grantees, their Heirs and Assigns, and all Occupiers thereof, therefrom wholly to remove; IN TESTIMONY WHEREOF, WE have caused this Our Grant to be Sealed with the Seal of Our Said Territory.

WITNESS Our Trusty and Well-beloved SIR GEORGE GIPPS, Knight, Our Captain-General, and Governor-in-Chief of Our said Territory and its Dependencies, at Government House, Sydney, in New South Wales aforesaid, this Twenty-eighth day of December, in the Seventh Year of Our Reign; And in the Year of Our Lord One thousand eight hundred and forty-three.

Legislative Assembly.

NEW SOUTH WALES.

LAND LAW.

(PETITION OF CERTAIN INHABITANTS OF SYDNEY.)

Ordered by the Legislative Assembly to be Printed, 1 June, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Inhabitants of Sydney and others, in public meeting assembled,—

SHEWETH:—

That your Petitioners have seen with great regret the prevalence of much distress and wretchedness among the industrious classes, and which, as your Petitioners believe, are not the effects of natural causes.

That your Petitioners humbly appeal to your Honorable House, being their representatives and legally constituted guardians of the common-weal.

That your Petitioners have long and patiently endured great privations in the anxious hope that your Honorable House would be called upon by the responsible Executive to enact an equitable Land Law, which would accord with the benign intentions of the Imperial Parliament; but, again and again, those hopes have been doomed to disappointment. Session after Session, and year after year, have passed away, yet no legislation has taken place in a matter which your Petitioners conceive to exceed in importance any other coming before your Honorable House.

Under these circumstances, your Petitioners entreat your Honorable House to take into your immediate consideration the state of misery to which great numbers of your constituents are reduced, and that you will be careful in voting away any large sums of the taxes levied upon the community, until an equitable Land Bill has been submitted to and passed into Law by your Honorable House.

May it therefore please your Honorable House to take this Petition into your immediate and serious consideration, and to refuse your assent to any further supplies being voted until an equitable Land Law shall have been enacted.

And your Petitioners shall ever pray.

Sydney, 28 May, 1860.

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

CROWN LANDS OCCUPATION.

(PROPOSED BILL IN REFERENCE THERETO, DATED 29 JUNE, 1860.)

Ordered by the Legislative Assembly to be Printed, 3 July, 1860.

24^o VICTORIA, 1860.

A BILL

For Regulating the Occupation of the Crown Lands.

WHEREAS it is expedient to make better provision for the occupa-^{Preamble.}
tion of the Crown Lands Be it enacted by the Queen's Most
Excellent Majesty by and with the advice and consent of the Legislative
Council and Legislative Assembly of New South Wales in Parliament
assembled and by the authority of the same as follows :—

I. The following terms within inverted commas whenever used ^{Interpretation.}
herein shall unless the context otherwise indicate bear the meanings set
against them respectively—

“ Crown Lands ”—All Lands vested in Her Majesty which have
not been dedicated to any public purpose
or which have not been granted or law-
fully contracted to be granted to any
person in fee simple.

“ 1st Class Settled Districts ”—The Lands declared to be of the
Settled class under the Orders in Council.

“ 2nd Class Settled Districts ”—The Lands converted into the
Settled class by the Act of Council twenty-
third Victoria chapter four.

“ Unsettled Districts ”—All other Crown Lands.

“ Orders in Council ”—The Orders in Council and Regulations or
some or one of them from time to time
issued under the Imperial Act ninth and
tenth Victoria chapter one hundred and
four.

“ Old Run ” — Any portion of Crown Lands within the Second class Settled or the Unsettled Districts comprised in any unexpired lease or license granted or lawfully contracted to be granted before the twenty-second day of February one thousand eight hundred and fifty-eight.

“ Run ” — Any portion of Crown Lands comprised in any lease or license granted or lawfully contracted to be granted on or after the twenty-second day of February one thousand eight hundred and fifty-eight.

“ Minister ” — The Minister for the time being charged with the administration of the Crown Lands.

“ Land Agent ” — Any person duly appointed to sell Crown Lands.

“ Appraisalment ” — Settlement of rent or value by appraisers.

“ Arbitration ” — Settlement of boundaries by arbitrators.

Partial Repeal of Acts Orders in Council and Regulations.

II. On and from the day of the commencement of this Act the Acts of Council eleventh Victoria number sixty-one and sixteenth Victoria number twenty-nine and such parts of the Orders in Council and Regulations now in force as are repugnant to any provision of this Act shall be repealed Provided that nothing herein shall prejudice or affect anything already lawfully done or commenced or contracted to be done thereunder respectively.

Conversion of existing Leases.

III. Existing leases of Crown Lands shall not be renewed but may be converted into leases under the provisions of this Act.

Withdrawal of land from lease.

IV. The Governor with the advice of the Executive Council may by notice in the *Gazette* withdraw from any Run any lands which may be required for the site of any City Town or Village or for any roadway for general traffic or for passage of stock or for access to back runs or for sale as containing improvements belonging to any person other than the lessee of such run or otherwise for sale or for commonage or for the working of any Mines of Gold or other minerals or for any public purpose whatsoever.

Conflicting claims to leases.

V. In cases in which two or more persons entitled to a lease under the Orders in Council may claim the same land the lease shall be granted to the person whose right thereto may have been or may be declared by the Minister to have been legally established and in any such case in which no right shall have been so established the lease may be granted to the person who may be by arbitration declared entitled thereto.

When valuations under Orders in Council neglected.

VI. In any case in which the rent of an old run or any other matter required by the Orders in Council to be determined by valuers appointed in the manner therein prescribed shall not have been so determined it shall be lawful for the Minister to direct that such rent or other matter shall be determined by appraisalment under the provisions of this Act and the valuation thus arrived at shall be as effectual as if made under the provisions of the Orders in Council.

Lessee not to obstruct authorized persons.

VII. It shall not be lawful for any holder of any old run or run to obstruct any Government Surveyor or other officer in entering on such run whenever such officer may require to do so nor to obstruct or prevent any person authorized by the Minister from entering upon such run searching for and removing gold and other minerals or cutting and removing therefrom timber or digging and removing gravel stone brick earth or other material.

Marking of boundaries.

VIII. It shall be lawful for any Officer duly authorized by the Minister to mark on the ground the boundaries of any runs whether previously undisputed or determined after dispute by decision of the Governor and the boundaries so marked shall be and be held to be the boundaries of such runs.

Leasing of lands.

IX. Any Crown Lands not being comprised within an old run may be demised or let upon lease under and subject to the provisions of this Act or under the provisions of the Gold Fields Act 20 Victoria No. 29 but

but not otherwise And the Governor with the advice of the Executive Council is hereby authorized in the name and on behalf of Her Majesty to demise or lease any such Crown Lands as hereinafter enacted.

X. Crown Lands may be demised by lease for any term not exceeding the following:—

For pastoral purposes in the first class Settled Districts One year.

For pastoral purposes in the second class Settled Districts or the Unsettled Districts Five years.

For ferries bridges wharfs quarries and for the erection of machinery for saw mills brickmaking and other objects of a like nature Five years.

For mineral purposes other than gold mining Fourteen years.

Provided that lands within areas bounded by lines bearing north east south and west and distant ten miles from the outside boundary of any city or two miles from the outside boundary of any town or village having according to the last Census for the time being one hundred inhabitants or lands set apart for sites of towns or villages shall not be open for lease for pastoral purposes.

XI. Leases of Runs within the first class Settled Districts may be granted subject to the next following conditions and to the general provisions of this Act:—

(1.) Lands shall not be let in portions of less than six hundred and forty acres or one square mile, except in special cases hereinafter provided for.

(2.) Every such lease shall be for the then current year and shall expire on the thirty-first day of December.

(3.) Leases may be renewed annually by payment between the first and the thirtieth day of September to the Land Agent of the District or to the Colonial Treasurer of rent for the ensuing year at the rate of two pounds per square mile or such higher rate as the lessee may pay for the current year unless the lands be required for sale or for any public purpose or for the satisfaction of any pre-emptive lease claims in right of new purchases and Leases not so renewed may be brought to sale by public auction.

(4.) Leases under the Regulations of twenty-ninth March one thousand eight hundred and forty-eight may be converted into leases under this Act by payment to the Colonial Treasurer in Sydney or to the Land Agent of the District not later than

of rent for the ensuing year at the rate of two pounds per square mile or such higher rate as the lessee may now pay unless the land be required for sale or for any public purpose or for the satisfaction of any pre-emptive lease claims which may arise under this Act.

(5.) The holders in fee simple of any lands may be allowed leases of Crown Lands adjacent to their respective properties without competition at the rate of two pounds per section of 640 acres and to the extent of three times their own purchased or granted lands if there be so much vacant Crown Lands available Provided that the rent to be charged for land so leased to parties not having the right to take six hundred and forty acres shall in no case be less than one pound.

(6.) If there be two or more claimants the division of the land amongst them shall be settled by arbitration Provided that if such land be of less extent than 640 acres it may on such award be forthwith occupied in accordance therewith and without further formal apportionment Provided also that if at the end of three months from the date of the letters announcing to the several claimants

of

of portions not less than 640 acres the names of their competitors an award shall not have been arrived at and duly communicated to the Minister the leases of the lands so circumstanced may be offered for sale by auction.

Notification of pre-emptive leases.

(7.) All leases granted under pre-emptive right shall be notified in the *Gazette* and if within two months from the date of such notification the rent for the same shall not have been paid to the Colonial Treasurer or to the Land Agent of the District leases of the land shall be submitted for sale by auction.

Leases at auction.

(8.) Crown Lands over which no pre-emptive right of lease shall have been exercised within one year from the passing of this Act may be put up to lease at auction at the Land Office of the District either on application or otherwise but no such sale of leases shall take place without one month's notice thereof having been given in the *Gazette*.

Upset price of lots.

(9.) The upset price of each lot shall be at the rate of one pound per section of six hundred and forty acres or of ten shillings if half of the current year shall have expired before the day of sale and the full price bid for each lot shall be paid at the time of sale.

Leases bid for but not paid for.

(10.) Any lease bid for but the price of which may not be forthwith paid shall thereupon be again offered for sale at auction.

Selection of leases not bid for.

(11.) The lease of any land which may have been offered for sale at auction and not bid for may be obtained on payment of the upset price to the Land Agent of the District.

Cancellation of leases.

(12.) The sale conditional or otherwise of any portion of land under lease shall cancel such lease Leases may also be cancelled by the Minister for other sufficient reason and the balance of rent from the date of cancellation shall in either case be returned to the lessee.

Pastoral leases in the second class Settled or the Unsettled Districts.

XII. The Governor with the advice of the Executive Council may grant leases of Crown Lands in the second class Settled Districts or in the Unsettled Districts subject to the following conditions and to the general provisions of this Act :—

(1.) Leases of runs may be converted into leases for five years under this Act by payment to the Colonial Treasurer not later than the
of rent to be determined by appraisement of the fair annual value for pastoral purposes of the Lands comprised in the runs Provided that in estimating such value neither the construction of dams or reservoirs nor the laying down of grass nor the making of any other improvement by the occupier shall be taken into account Provided also that the rent shall in no case be less than ten pounds per annum Leases of old runs may on their expiration be in like manner converted into leases under this Act.

Commencement of rent addition of interest and forfeiture of lease.

(2.) The rent shall be payable to the Colonial Treasurer in Sydney for each year after the first year during the month of September of the year preceding Provided that a fine shall be payable for the whole time during which any rent due shall remain unpaid at the rate of five per centum on the amount if not more than three months in arrear—and if more than three months then at the rate of ten per centum And if the rent be not paid at or before the end of six months together with such fine the lease shall then become forfeited.

No pre-emptive right of purchase.

(3.) Leases shall not confer any right to purchase by pre-emption.

(4.)

- (4.) Crown Lands may be resumed from such lease for the site of any City Town or Village or for Commonage or for any public purpose whatever and no compensation shall be payable to the holder of such lease for any such resumption excepting re-payment of rent to an extent proportionate to the area withdrawn and the period unexpired. Resumption of lands leased. Provided also that in any case of partial withdrawal the holder may if he think fit surrender his lease and have the full balance of rent refunded for the unexpired portion of the time for which it was paid.

XIII. The Governor with the advice of the Executive Council may proclaim any district to be open for the formation of runs and may from time to time alter the boundaries of such districts or of any district now existing and leases of such runs may be obtained subject to the next following conditions. Proclamation of districts for the formation of runs. Provided that no district not so proclaimed shall be open for the formation of such runs :—

- (1.) Runs shall in ordinary cases consist of not more than twenty-five square miles but should that area in the opinion of the proper officer of the Government be insufficient in average seasons for the pasturage of four thousand sheep or eight hundred head of cattle the run may be enlarged to the area necessary for that purpose but not exceeding one hundred square miles. Area and capabilities of runs.

- (2.) Tenders for runs may be deposited in a box to be kept for that purpose at the Office of the Minister for Lands which shall be opened by a Board of Officers to be appointed for that purpose by the Governor with the advice of the Executive Council and the person making the highest tender for any run shall be entitled to a lease thereof. Tenders for runs. Provided that should two tenders embrace a portion of the same land the common boundary may be determined by arbitration. Provided also that should such boundary not be so determined within months of the date at which the parties may be informed of the conflict by their tenders the whole of the lands tendered for may be leased by auction sale. Provided also that should a run not be occupied and stocked with not less than two hundred head of cattle or one thousand sheep within six months of the notification of the acceptance of the tender the run shall be forfeited and may be leased by auction sale.

- (3.) The Minister may modify the boundaries proposed in any tender in order to make the run a compact block of rectangular form in which the external lines shall run east and west and north and south subject however to such deviations as the general features of the country and the adoption of natural boundaries may require and subject also to the exclusion of water necessary to the beneficial occupation of adjoining lands. Direction of boundaries in tenders.

- (4.) Tenders shall be in a form to be prescribed by the Governor with the advice of the Executive Council and shall contain clear descriptions of the boundaries of the runs applied for and the marks or natural features by which such boundaries are indicated and also estimates of the areas and pastoral capabilities of such runs. Descriptions in Tenders.

- (5.) Each run shall be subject to a rent of ten pounds per annum payable in accordance with condition number two under section twelve of this Act and to assessment at the same rate and subject to the same conditions as the runs under the Act twenty-second Victoria number seventeen. Rent and assessment of runs.

- (6.) Runs may be held from year to year until an appraisalment shall be made of the fair annual value thereof for pastoral purposes. Tenure of run at fixed rent and assessment.

- purposes whereupon the holdings shall be converted into leases under section twelve of this Act.
- Sale at auction of leases of forfeited runs. XIV. Old runs or runs which have been forfeited or vacated shall be submitted to sale by auction in leases for the term of five years at the minimum upset rent of one pound per annum for every square mile of estimated area. And the whole rental for the first year shall be paid in advance. And any such run if unsold may be again put up for sale in like manner and if not then sold the Minister may reduce the minimum upset rental to any less sum not being less than ten pounds.
- Cancellation of leases of runs or portions thereof and pre-emptive lease to purchaser. XV. The sale conditional or otherwise of any Land within any lease granted under this Act in the second class Settled Districts or in the Unsettled Districts for pastoral purposes shall cancel so much of the leasehold as relates to the land so sold and to three times the area thereof adjacent which last mentioned area may be held by the new purchaser under pre-emptive lease to which all conditions and liabilities attached to pre-emptive leases in the first class Settled Districts shall apply.
- Passage of stock. XVI. Any person driving horses cattle or sheep along any track used or required for the purpose of travelling may depasture the same on any Crown Lands within the distance of one half mile of such track notwithstanding any lease of any such lands for pastoral purposes. Provided that unless prevented by rain or flood such horses or cattle shall be moved at least seven miles and such sheep at least four miles in one and the same direction within every successive period of twenty-four hours.
- Use of timber or material by lessees. XVII. Lessees of Crown Lands for pastoral purposes either in the Settled Districts or in the Unsettled Districts shall be permitted to cut and use such timber and material for building and other purposes as may be required by them as tenants of their several lands.
- Removal of timber and material by others than lessees. XVIII. Lessees of Crown Lands for pastoral purposes either in the Settled Districts or in the Unsettled Districts shall not have power to restrict other persons duly authorized by the Minister either from cutting or removing timber or material for building or other purposes or from searching for any metal or mineral within the land leased.
- Leases for mining purposes other than gold mining. XIX. The Governor with the advice aforesaid may grant leases for purposes of mining for any metal or mineral excepting gold to any person applying for the same of any Crown Lands not exceeding _____ acres for coal mining lots and not exceeding _____ acres for other mineral lots for any period not exceeding _____ years and with a right of renewal for a further period not exceeding _____ years upon the next following conditions on the breach of any of which by any lessee the lease may be cancelled by the Governor with the advice of the Executive Council.
- Authority to select mineral lots. (1.) Persons may on application to the Minister obtain authority in writing to select on Crown Lands within twelve months from the date thereof coal or other mineral lots and may take possession of such lots and hold them for the period mentioned in such authority but the right shall be reserved to determine the boundaries of any such lots and to make provision for reservation of water supply. Provided that applications made prior to the passing of this Act may be accepted under it and shall take precedence in the order of their date.
- Payment of rent. (2.) The rent shall be _____ per acre payable annually in advance at the Colonial Treasury the first payment to be made on application for authority to select and thereafter within the month of September for each ensuing year and leases shall in all cases end on the thirty-first day of December.
- Necessary annual expenditure. (3.) Lessees shall expend at the rate of _____ sterling per acre annually on their lots.
- Determination of leases. (4.) Lessees may determine their leases by giving to the Minister three months' notice of their desire to do so but no rent shall in any such case be refunded.

(5.)

- (5.) Lessees may on application to the Minister in writing during the _____ year of their leases obtain a renewal of the same for a further period not exceeding _____ years and the fine to be paid on such renewal not being less than _____ per acre shall be determined by appraisement and full information of the working and returns of the mine shall be afforded to the appraisers by the lessees on pain of forfeiting their claim to renewal. Renewal of leases.
- (6.) If any lease be forfeited or not renewed the lessee shall be at liberty within six months from the termination of his lease to remove or otherwise dispose of all machinery and improvements and the minerals brought to the surface during the term of his lease. Removal of machinery.

XX. Whenever it shall become necessary or desirable to fix or ascertain any price value or sum of money which by this Act it is provided may be fixed or ascertained by appraisement in case of dispute as to the amount of any compensation to be made under the provisions of this Act and in case of any matter which by this Act is authorized or directed to be settled by arbitration the appraiser or appraisers arbitrator or arbitrators and umpire shall be appointed in manner hereinafter mentioned that is to say :— Mode of appraisement or arbitration.

- (1.) The Minister and the claimant in matters hereinbefore mentioned to be settled by appraisement or the parties interested in any dispute which by the provisions of this Act may be left to arbitration may concur in the appointment of a single appraiser or arbitrator or failing such appointment each party on the request of the other shall appoint an appraiser or arbitrator as the case may require to whom the matter shall be referred And every such appointment shall be made by the Minister and the claimant or by the parties to the matter in dispute under their hands in writing or if such party be a corporation aggregate under its common seal and such appointment shall be delivered to the appraisers or arbitrators and shall be deemed a submission to appraisement or to arbitration as the case may be by the parties making the same. Appointment of appraisers or arbitrators.
- (2.) After the making of any such appointment the same shall not be revoked without the consent of both parties nor shall the death of either party operate as a revocation. Appointment not to be revoked
- (3.) If for the space of _____ days after any such dispute or matter shall have arisen and notice in writing by one party who has himself duly appointed an appraiser or arbitrator to the other party stating the dispute or matter to be referred and accompanied by a copy of such appointment the party to whom notice is given fail to appoint an appraiser or arbitrator the appraiser or arbitrator appointed by the party giving the notice shall be deemed to be appointed by and shall act on behalf of both parties. Single appraiser or arbitrator to act in certain cases.
- (4.) The award of any appraiser or appraisers arbitrator or arbitrators appointed in pursuance of this Act shall be binding final and conclusive upon all persons and to all intents and purposes whatsoever. Award to be binding.
- (5.) If before the determination of any matter so referred any appraiser or arbitrator die or refuse or become incapable to act the party by whom such arbitrator was appointed may appoint in writing another person in his stead and if he fail so to do for the space of _____ days after notice in writing from the other party in that behalf the remaining appraiser or arbitrator may proceed *ex parte* and every appraiser or arbitrator so appointed shall have the same powers and authorities as were vested in the appraiser or arbitrator in whose stead the appointment is made. In case of death of or failure to act by appraiser or arbitrator.

(6.)

In case of death or failure to act by a single appraiser or arbitrator.

Appointment of umpire.

Determination by umpire in certain cases.

Production of documents.

Determination of costs.

Arbitration subject to Rule of Supreme Court.

Declaration by appraiser arbitrator or umpire.

Marking of boundaries by arbitrators or umpire.

- (6.) In case a single arbitrator die or become incapable to act before the making of his award or fail to make his award within _____ days after his appointment or within such extended time if any not exceeding _____ days as shall have been duly appointed by him for that purpose the matters referred to him shall be again referred to appraisement or arbitration under the provisions of this Act as if no former reference had been made.
- (7.) In case there be more than one appraiser or arbitrator the appraisers or arbitrators shall before they enter upon the reference appoint by writing under their hands an umpire and if the person appointed to be umpire die or become incapable to act the appraisers or arbitrators shall forthwith appoint another person in his stead and in case the appraisers or arbitrators neglect or refuse to appoint an umpire for _____ after being requested so to do by any party to the appraisement or arbitration the Minister may appoint an umpire and he is hereby empowered so to do and the award of the umpire shall be binding final and conclusive upon all persons and to all intents and purposes whatsoever.
- (8.) In case appraisers or arbitrators fail to make their award within _____ after the day on which the last of them was appointed or within such extended time if any as shall have been duly appointed by them for that purpose the matters referred shall be determined by the umpire and the provisions of this Act with respect to the time for making an appraisement or award and with respect to extending the same in the case of a single arbitrator shall apply to any umpirage.
- (9.) Any appraiser arbitrator or umpire appointed by virtue of this Act may require the production of such documents in the possession or power of either party as he may think necessary for determining the matters referred and may examine the parties as witnesses on oath.
- (10.) All costs of and consequent upon the reference shall be in the discretion of the appraiser or appraisers arbitrator or arbitrators or of the umpire in case the matters referred are determined by an umpire.
- (11.) Any submission to arbitration under the provisions of this Act may be made a Rule of the Supreme Court of the said Colony on the application of any party thereto.
- (12.) Before any appraiser arbitrator or umpire shall enter upon the consideration of any matter referred to him as aforesaid he shall make out and subscribe a declaration in the form following before a Justice of the Peace that is to say—
- I A B do solemnly and sincerely declare that I will faithfully honestly and to the best of my skill and ability hear and determine the matters referred to me under the Crown Lands Occupation Act of 1860.
- (13.) And such declaration shall be annexed to the appraisement or award when made and if any appraiser arbitrator or umpire shall wilfully act contrary to such declaration he shall be guilty of a misdemeanor.

XXI. It shall be lawful for arbitrators or the umpire who may determine under this Act the boundaries or any boundary of a run to mark on the ground such boundary and such boundary so marked shall be held to be the boundary of such run.

XXII.

XXII. It shall be lawful for any authorized officer umpire or arbitrators who may have marked on the ground the boundaries or any boundary of any run to certify by his or their signatures duly attached to any plan representing such boundary the accuracy of such representation and such plan shall thenceforth become and be legal evidence of the boundary or boundaries of the lands to be demised by the Crown.

Attestation of maps and plans.

XXIII. In any lease or other instrument granted under the Orders in Council or under the provisions of this Act it shall be sufficient if the land thereby intended to be conveyed be defined according to the best description of such land and of the boundaries thereof which may have been procurable notwithstanding that such description may not have been prepared after actual survey and no such lease or other instrument shall be liable to be set aside by reason only of the imperfection of any such description so long as the land shall thereby be defined with reasonable certainty.

Descriptions of leased lands.

XXIV. The Governor with the advice aforesaid may proclaim and set apart temporarily any Crown Lands for commonage purposes for the use and benefit of the landholders in any city town or village or other specified locality and may make and proclaim regulations for the management of such commonage.

Commonage proclamation and regulations.

XXV. The Governor with the advice aforesaid may grant by auction or otherwise leases of any portion of Crown Lands for Wharfs Bridges Punt Houses Ferries and for the erection of machinery for saw mills brickmaking and other objects of a like nature and may determine the upset price thereof if to be let at auction or the fixed rent if to be let otherwise and may annex such conditions to the occupation thereof as shall seem fit Provided that an abstract of all such licenses or leases where not sold by auction shall be annually laid before Parliament within one month after the granting of the same if Parliament be then in Session or otherwise within one month after the commencement of the next ensuing Session.

Leases for wharfs bridges ferries and other objects.

XXVI. The Governor with the aforesaid advice may subject to any regulations to be made as hereinafter enacted authorize Land Agents to issue licenses for any term not exceeding one year to enter any Crown Lands whether under lease or license or not and to cut and take therefrom any timber or to dig for and remove any gravel stone brick earth shells or other material Provided that the fee which the Governor with the advice aforesaid may fix for such license shall be paid in advance.

Licenses to cut timber and procure other materials.

XXVII. On information in writing preferred by any Commissioner of Crown Lands or other person duly authorized to any Justice of the Peace setting forth that any person is in the unlawful occupation of any Crown Land or in the occupation of any Crown Land in virtue or under color of any lease or license although such lease or license shall have been forfeited or although the conditions thereof shall have been broken or unfulfilled or although such lease or license shall have expired or although the term for which the same shall have been granted or made shall have come to an end such Justice shall issue his summons for the appearance before any two Justices of the Peace at a place and time therein specified of the person so informed against And at such time and place such two Justices on the appearance of such person or on due proof of the service of such summons on him or at his usual or last place of abode or business shall hear and inquire into the subject matter of such information And on being satisfied of the truth thereof either by the admission of the person informed against or on other sufficient evidence such Justices shall issue their warrant addressed to the Commissioner of Crown Lands or to any Chief or District Constable or other proper officer requiring him forthwith to dispossess and remove such person from such land and to take possession of the same on behalf of Her Majesty and the person to whom such warrant is addressed shall forthwith carry the same into execution.

Removal of trespassers.

Penalties for trespassing.

XXVIII. Any person unless lawfully claiming under any subsisting lease or license or otherwise under the Orders in Council or under this Act or under the Act twenty Victoria number twenty-nine who shall be found occupying any Crown Land or land granted reserved or dedicated for public purposes either by residing or by erecting any hut or building thereon or by clearing digging up enclosing or cultivating any part thereof or cutting timber other than firewood not for sale thereon shall be liable on conviction to a penalty not exceeding five pounds for the first offence and not exceeding ten pounds for the second offence and not exceeding twenty pounds for the third or any subsequent offence Provided that no information shall be laid for any second or subsequent offence until thirty clear days shall have elapsed from the date of the previous conviction.

Limitation of actions.

XXIX. All actions or other proceedings against any Commissioner of Crown Lands or other Officer acting under the provisions of this Act for anything wrongfully done under or against the provisions of this Act shall be commenced within six months after the matter complained of was committed and not otherwise And notice in writing of any such action and of the cause thereof shall be given to the defendant one month at least before the commencement of the proceeding And in every such proceeding the defendant may plead the general issue and give this Act and the special matter in evidence at any trial to be had thereupon And no plaintiff shall recover in any such proceeding if tender of sufficient amends shall have been made before the same was commenced or if a sufficient sum of money shall have been paid into Court after such commencement by or on behalf of the defendant together with costs incurred up to that time And if a verdict shall pass for the defendant or the plaintiff shall become nonsuit or discontinue such proceeding or if upon demurrer or otherwise judgment shall be given against the plaintiff the defendant shall recover his full costs as between attorney and client and have the like remedy for the same as any defendant has by law in other cases.

Instruments under Act to be evidence.

XXX. Any lease or other instrument issued under this Act may be proved in all legal proceedings by the production of a certified copy thereof signed by the officer to be authorized for that purpose under any regulation made as hereinafter enacted.

Governor in Council to make and proclaim Regulations.

XXXI. The Governor with the advice of the Executive Council may make and proclaim regulations for carrying this Act into full effect so as to provide for all proceedings—forms of leases and other instruments—and all other matters and things arising under and consistent with the provisions of this Act and not herein expressly provided for And all such regulations shall upon publication in the *Gazette* be as valid in law as if contained herein Provided that a copy of every such regulation shall be laid before both Houses of Parliament within one month from the issue thereof if Parliament be then in Session or otherwise within one month after the commencement of the then next ensuing Session.

Commencement and Short Title.

XXXII. This Act shall commence on the _____ of _____ next And may be styled and cited as the "Crown Lands Occupation Act of 1860."

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

CROWN LANDS ALIENATION.

(PROPOSED BILL IN REFERENCE THERETO, DATED 29 JUNE, 1860.)

Ordered by the Legislative Assembly to be Printed, 3 July, 1860.

24th VICTORIA, 1860.

A BILL

For Regulating the Alienation of Crown Lands.

WHEREAS it is expedient to make better provision for the alienation of Crown Lands Be it enacted by the Queen's Most Excellent Majesty by and with the advice and consent of the Legislative Council and Legislative Assembly of New South Wales in Parliament assembled and by the authority of the same as follows:—

I. The following terms within inverted commas shall for the purposes of this Act unless the context otherwise indicate bear the meanings set against them respectively—

“Crown Lands”—All Lands vested in Her Majesty which have not been dedicated to any public purpose or which have not been granted or lawfully contracted to be granted to any person in fee simple.

“Town Lands”—Crown Lands in any City Town or Village or set apart as a site for the same.

“Suburban Lands”—Crown Lands declared in the *Gazette* to be Suburban by the Governor and Executive Council.

“Orders in Council”—The Orders in Council and Regulations or some or one of them from time to time issued under the Imperial Act ninth and tenth Victoria chapter one hundred and four.

“Minister”—The Minister for the time being charged with the administration of the Public Lands.

“Land Agent”—Any person duly appointed to sell Crown Lands.

“Land Office Days”—Days notified in the *Gazette* upon which Land Agents shall attend at the Land Offices of their Districts respectively.

“Appraisement”—Settlement of price value or damage by appraisers.

“Arbitration”—Settlement of boundaries by arbitrators.

“Improvements”—Improvements on Crown Lands to the value to be determined by appraisement if disputed in Town and Suburban lands of not less than twice the upset price of the allotment or portion on which the improvements may stand and in other lands of not less than one pound per acre.

“Frontage”—Frontage to any river stream or watercourse which according to the practice of the Survey Department ought to form a boundary between different sections or lots of land.

Partial Repeal of Orders in Council &c.

II. On and from the day of the commencement of this Act so much of the Orders in Council and Regulations now in force as are repugnant to any provision of this Act shall be repealed Provided that nothing herein shall prejudice or affect anything already lawfully done or commenced or contracted to be done thereunder respectively.

Alienation of Crown Lands.

III. Any Crown Lands may lawfully be granted in fee simple or dedicated to any public purpose under and subject to the provisions of this Act but not otherwise And the Governor with the advice of the Executive Council is hereby authorized in the name and on the behalf of Her Majesty so to grant or dedicate any Crown Lands.

Publication of notice of sites of cities towns suburban lands reserves &c.

IV. The Governor with the advice of the Executive Council may by notice in the *Gazette* declare what portions of Crown Lands shall be set apart as the sites of new cities towns or villages and define the limits of the suburban lands to be attached thereto and to any existing city town or village and also the portions of town lands or suburban lands to be dedicated to public purposes and what lands shall be reserved from sale until surveyed for the preservation of water supply or other public purpose And upon any such notice being published in the *Gazette* such lands shall become and be set apart attached or dedicated accordingly Provided that the Governor with the advice aforesaid may by notice in the *Gazette* rescind the determination of boundaries or reservations under previous notices or of existing reservations in whole or in part in any cases in which sales of town allotments shall not have taken place in the reserves Provided also that within one month should Parliament be then in Session and otherwise within one month after the commencement of the next ensuing Session of Parliament there shall be laid before both Houses of Parliament an abstract of all such declarations and rescissions.

Dedication of Crown Lands to public purposes.

V. The Governor with the advice aforesaid may by notice in the *Gazette* grant reserve or dedicate in such manner as may seem best for the public interest any Crown Lands required for any railway or railway station—any public road canal or other internal communication—any public quay or landing-place—any public reservoir aqueduct or watercourse—or for any purpose of defence—or as the site of any place of public worship—or of any hospital asylum or infirmary—or of any public market or slaughter-house—or for the interment of the dead—or for any college school mechanics’ institute public library museum or other institution for public instruction or amusement—or for any pasturage common—or as any area for public health recreation convenience or enjoyment—or for any other public purpose—And upon any such notice being published in the *Gazette* such lands shall become and be granted reserved or dedicated accordingly Provided that within one month should Parliament be then in Session and otherwise within one month after the commencement of the next ensuing Session there shall be laid before both Houses of Parliament an abstract of all such grants reservations and dedications.

Abstract to be laid before Parliament.

Exception from sale of certain lands.

VI. Crown Lands held under lease or promise of lease issued or made previously to the twenty-second day of February one thousand eight hundred and fifty-eight shall during the currency of such lease be exempt from sale under this Act except where such lands have been

been or may hereafter be lawfully withdrawn from the holding of the lessee in accordance with the Orders in Council Provided that the lessee may be permitted to exercise a pre-emptive right of purchase over one portion and no more of an area not exceeding _____ acres out of each block of twenty-five square miles and at a value to be determined by appraisalment not being less than one pound per acre And provided that each such purchase shall contain improvements the property of the said lessee to the value at least of _____ for every acre of such land.

Limitation of pre-emptive right of purchase.

VII. Upon application made within twelve months after the passing of this Act by any person who may prior thereto have made improvements on any Crown Lands or upon application within twelve months after the notification in the *Gazette* of any reserve from lease or promise of lease under the Orders in Council within which improvements may be situated or upon application made at any period for the sale of improved lands in proclaimed Gold Fields the Governor may with the like advice sell and grant such lands to the owner of such improvements without competition in fee simple at a price to be fixed by appraisalment not being less than the minimum upset price of the class of land as set forth in section twelve of this Act Provided that nothing herein contained shall be held to require the sale of any land which may contain auriferous deposits.

Sales in consideration of improvements

VIII. The Governor with the advice aforesaid may cause to be filled in and reclaimed from the waters of any harbor or river land lying beyond or below high-water-mark and may let or sell the same by public auction provided that the damage if any to lands so severed from immediate contact with the water shall be determined by appraisalment account being taken of any increased value conferred on such lands in consequence of the reclamation as aforesaid or by the construction of wharfs streets or other public works and the amount of such award shall be paid to the owner of the land so severed Provided always that the intention to fill in and reclaim such land shall have been previously intimated by a notice in the *Gazette* at least three months before such filling in or reclamation is commenced.

Reclamation of lands.

IX. The Governor with the like advice may authorize any proprietor of land having frontage to any harbor or river to fill in and reclaim any land adjoining thereto and lying beyond or below high-water-mark or to erect a wharf or jetty upon or over the same and on payment of an adequate money consideration to be determined by appraisalment such land or any land which may already have been so reclaimed under competent authority shall become vested in fee simple in such proprietor and may be granted to him accordingly.

Reclamation of lands by proprietor of adjoining lands.

X. Whenever the owner or owners of any lands adjoining a road which has been reserved for access to such lands only and not otherwise required for public use or convenience shall make application to the Minister to close such road it shall be lawful for the Governor with the advice aforesaid to notify in the *Gazette* and in the local newspapers if any that such road will be closed and at any period not less than two months after the first publication of such notice a grant or grants of the road so closed may issue to the owner or owners of adjoining lands in fair proportion or in accordance with agreement among such owners Provided that an adequate money consideration to be determined by appraisalment shall be paid for the same.

Closing and alienation of unnecessary roads.

XI. In cases in which there may be no convenient way of access to any portion of Crown Land or in which any such portion may be insufficient in area for public sale or in which a portion of Crown Land may lie between land already granted and a street or road which forms or should form the way of approach to such granted land or in which buildings erected on lands already granted may have extended over Crown Land or in any other cases of a like kind the Governor may with the advice

Sales without competition in special cases.

advice aforesaid sell and grant such lands to the holder or holders of adjacent lands without competition and at a price to be determined by appraisement.

Rescission of reservation of water frontage.

XII. The Governor may with the like advice by a memorandum in writing under his hand declare that any reservation of any water frontage or land adjoining such frontage contained in any Crown grant shall be rescinded wholly or to such extent as shall be specified in such memorandum and subject to such conditions or restrictions as shall be therein specified and such reservation shall be so rescinded accordingly and the land shall by virtue and according to the terms of such memorandum on payment of an adequate money consideration to be determined by appraisement become vested in the owner of the land conveyed in such Crown grant.

Conditional sale of unimproved lands without competition.

XIII. Crown Lands other than town lands or suburban lands not being within areas bounded by lines bearing north east south and west and distant ten miles from the outside boundary of any city and two miles from the outside boundary of any town or village containing according to the last Census for the time being one hundred inhabitants and not reserved for the site of any town or village or for the supply of water or for any other public purpose and not containing improvements and not excepted from sale under section six of this Act and not having been already offered for sale by auction shall be open for conditional sale by selection in the manner following that is to say Any person may upon any Land Office day tender to the Land Agent a written application for the conditional purchase of any such lands not less than acres nor more than three hundred and twenty acres at the price of twenty shillings per acre and may pay to such Land Agent a deposit of per centum of the purchase money thereof And if no other like application and deposit for the same land be tendered at the same time such person shall be declared the conditional purchaser thereof at the price aforesaid Provided that if more than one such application and deposit for the same land or any part thereof shall be tendered at the same time to the said Land Agent he shall unless all such applications but one be immediately withdrawn forthwith forward all such applications and deposit moneys to the Treasury to await the survey of the land so applied for and the said land shall be surveyed and put up for sale in one or more lots for competition at auction between such applicants only and the highest bidder shall be declared the purchaser of any such lot And after the sale the deposit of every unsuccessful applicant shall be returned Provided also that if all such applications except one be withdrawn as aforesaid such applicant shall be declared the conditional purchaser Provided further that should the lands selected be within a proclaimed Gold Field and be found to contain auriferous deposits it shall be in the power of the Governor and Executive Council to annul the sale at any time within six months from the date of selection and thereupon the conditional purchaser shall be entitled to have the amount paid by him refunded Provided also that such purchase shall not in any case confer a claim to any gold or other minerals which the land may contain.

Record by Land Agent.

XIV. Every Land Agent shall duly enter at the time in a book to be provided for the purpose the particulars of every application for conditional purchase lodged with him under the provisions of clause thirteen of this Act and shall transmit to the proper officer of the Government on Monday in each week a true extract therefrom shewing the particulars of all such applications for the week preceding.

Temporary boundaries of land until surveyed by Government.

XV. If at the time of conditional purchase of any Crown Land under section thirteen of this Act such Land shall not have been surveyed by the Government temporary boundaries thereof may be determined by the conditional purchaser who shall within one month occupy the land And any dispute between such purchaser and any other person claiming any interest therein respecting such boundaries shall be settled by arbitration Provided that such Land shall be surveyed by and at the expense of the Government within after purchase.

XVI.

Crown Lands Alienation.—Proposed Bill.

XVI. Crown Lands conditionally purchased under section thirteen of this Act shall if measured previously to such purchase be taken in portions as measured and if unmeasured and having frontage to any river creek road or intended road shall have a depth of not less than forty chains and shall have their boundaries other than the frontages directed to the cardinal points by compass and if having no frontages as aforesaid shall be measured in square blocks and with boundaries directed to such cardinal points Provided that should it seem to the Minister to be expedient the boundaries of portions having frontages may be made approximately at right angles with the frontage and otherwise modified and the boundaries of portions having no frontages may be modified and necessary roadways and water reserves excluded from such measurement.

Form of measurement of portions selected under section thirteen and reservation of roads and water.

XVII. At the expiration of three years from the date of conditional purchase of any such land as aforesaid or within three months thereafter the balance of the purchase money shall be tendered at the office of the Colonial Treasurer together with a declaration to the effect that permanent improvements have been made upon such land to the value of at least per centum of the entire cost price thereof and that such land has been from the date of occupation the *bonâ fide* residence either continuously of the original purchaser or of some alienee or successive alienees of his whole estate and interest therein and that no such alienation has been made by any holder thereof until after the *bonâ fide* residence thereon of such holder for one whole year at the least And upon the Minister being satisfied by such declaration or otherwise of the facts aforesaid the Colonial Treasurer shall receive and acknowledge the remaining purchase money and a grant of the fee simple but with reservation of any minerals which the land may contain shall be made to the then rightful owner Provided that should interest at the rate of per centum on the balance of the purchase money be paid within the said three months to the Colonial Treasurer the payment of such balance may be deferred to a period within three months of the first day of January then next ensuing and may be so deferred from year to year by payment of such interest during the first quarter of each year But on default of a compliance with the requirements of this section the land shall revert to Her Majesty and be liable to be sold and the deposit shall be forfeited Provided that when any such sale shall result in payment to the Government of more money than would have been payable under the original conditions of purchase the surplus after paying the expenses of sale shall be paid to the party who was entitled to purchase without competition.

Conditions of residence and improvement and payment of purchase money.

XVIII. Crown Lands conditionally purchased under section thirteen of this Act and proved to the satisfaction of the Governor and Executive Council to have been abandoned by the purchaser thereof or his legal alienee before the expiration of three years from the date of purchase shall be forfeited and may be sold at auction.

Sale by Auction of lands abandoned by selectors.

XIX. Conditional purchasers of portions of Crown Lands under section thirteen of this Act not exceeding acres or their legal alienees may make additional selection of lands adjoining to the first selection or to each other but not otherwise and not exceeding in the whole three hundred and twenty acres and subject to all the conditions applicable to the original purchase.

Additional selection of adjacent lands.

XX. Crown Lands intended to be sold without conditions for residence and improvement shall be put up for public auction in lots not exceeding acres each at such places and times as the Minister shall direct to be notified by advertisement in the *Gazette* And the upset prices per acre shall not be lower than for Town Lands Eight pounds—Suburban Lands Two pounds—good Lands having frontage One pound—inferior and back Land Five shillings Provided that the upset prices may be respectively fixed at any higher amounts.

Sale by auction of other lands.

Upset prices.

XXI. Town lands and suburban lands without valuable improvements shall be sold by Public Auction only.

Sale by auction of town and suburban lands.

XXII.

As to lands put up
and not sold.

XXII. Any Crown Lands put up for sale by public auction and not sold may be again put up in like manner. Provided that all lands other than town or suburban so put up and not sold shall be open for sale at the upset price or in case of a higher price having been offered for the same then at such higher price less in either case the deposit if any paid thereon. Provided also that the Minister may withdraw any such lands from selection and again submit them to Public Auction.

Payment of purchase
moneys.

XXIII. A deposit of twenty-five per centum of the purchase money for all lands sold by auction under any provision of this Act shall be paid by the purchaser at the time of sale. And unless the remainder of such purchase money be paid within three months thereafter the sale and contract shall be void and the deposit shall be forfeited.

Record by Land
Agent.

XXIV. Every Land Agent shall duly enter in a book to be provided for the purpose the particulars of all sales under sections twenty, twenty-one and twenty-two of this Act.

Mode of appraisement
or arbitration.

XXV. Whenever it shall become necessary or desirable to fix or ascertain any price value or sum of money which by this Act it is provided may be fixed or ascertained by appraisement in case of dispute as to the amount of any compensation to be made under the provisions of this Act and in case of any matter which by this Act is authorized or directed to be settled by arbitration the appraiser or appraisers arbitrator or arbitrators and umpire shall be appointed in manner hereinafter mentioned that is to say:—

Appointment of
appraisers or
arbitrators.

(1.) The Minister and the claimant in matters hereinbefore mentioned to be settled by appraisement or the parties interested in any dispute which by the provisions of this Act may be left to arbitration may concur in the appointment of a single appraiser or arbitrator or failing such appointment each party on the request of the other shall appoint an appraiser or arbitrator as the case may require to whom the matter shall be referred. And every such appointment shall be made by the Minister and the claimant or by the parties to the matter in dispute under their hands in writing or if such party be a corporation aggregate under its common seal and such appointment shall be delivered to the appraisers or arbitrators and shall be deemed a submission to appraisement or to arbitration as the case may be by the parties making the same.

Appointment not to
be revoked.

(2.) After the making of any such appointment the same shall not be revoked without the consent of both parties nor shall the death of either party operate as a revocation.

Single appraiser or
arbitrator to act in
certain cases.

(3.) If for the space of _____ days after any such dispute or matter shall have arisen and notice in writing by one party who has himself duly appointed an appraiser or arbitrator to the other party stating the dispute or matter to be referred and accompanied by a copy of such appointment the party to whom notice is given fail to appoint an appraiser or arbitrator the appraiser or arbitrator appointed by the party giving the notice shall be deemed to be appointed by and shall act on behalf of both parties.

Award to be binding.

(4.) The award of any appraiser or appraisers arbitrator or arbitrators appointed in pursuance of this Act shall be binding final and conclusive upon all persons and to all intents and purposes whatsoever.

In case of death of
or failure to act by
appraiser or arbi-
trator.

(5.) If before the determination of any matter so referred any appraiser or arbitrator die or refuse or become incapable to act the party by whom such arbitrator was appointed may appoint in writing another person in his stead and if he fail so to do for the space of _____ days after notice in writing from the other party in that behalf the remaining appraiser or arbitrator may proceed *ex parte* and every appraiser

appraiser or arbitrator so appointed shall have the same powers and authorities as were vested in the appraiser or arbitrator in whose stead the appointment is made.

- (6.) In case a single arbitrator die or become incapable to act before the making of his award or fail to make his award within days after his appointment or within such extended time if any not exceeding days as shall have been duly appointed by him for that purpose the matters referred to him shall be again referred to appraisement or arbitration under the provisions of this Act as if no former reference had been made. In case of death or failure to act by a single appraiser or arbitrator.
- (7.) In case there be more than one appraiser or arbitrator the appraisers or arbitrators shall before they enter upon the reference appoint by writing under their hands an umpire and if the person appointed to be umpire die or become incapable to act the appraisers or arbitrators shall forthwith appoint another person in his stead and in case the appraisers or arbitrators neglect or refuse to appoint an umpire for after being requested so to do by any party to the appraisement or arbitration the Minister may appoint an umpire and he is hereby empowered so to do and the award of the umpire shall be binding final and conclusive upon all persons and to all intents and purposes whatsoever. Appointment of umpire.
- (8.) In case appraisers or arbitrators fail to make their award within after the day on which the last of them was appointed or within such extended time if any as shall have been duly appointed by them for that purpose the matters referred shall be determined by the umpire and the provisions of this Act with respect to the time for making an appraisement or award and with respect to extending the same in the case of a single arbitrator shall apply to any umpirage. Determination by umpire in certain cases.
- (9.) Any appraiser arbitrator or umpire appointed by virtue of this Act may require the production of such documents in the possession or power of either party as he may think necessary for determining the matters referred and may examine the parties as witnesses on oath. Production of documents.
- (10.) All costs of and consequent upon the reference shall be in the discretion of the appraiser or appraisers arbitrator or arbitrators or of the umpire in case the matters referred are determined by an umpire. Determination of costs.
- (11.) Any submission to arbitration under the provisions of this Act may be made a Rule of the Supreme Court of the said Colony on the application of any party thereto. Arbitration subject to rule of Supreme Court.
- (12.) Before any appraiser arbitrator or umpire shall enter upon the consideration of any matter referred to him as aforesaid he shall make out and subscribe a declaration in the form following before a Justice of the Peace that is to say—
I A B do solemnly and sincerely declare that I will faithfully honestly and to the best of my skill and ability hear and determine the matters referred to me under the Crown Lands Alienation Act of 1860. Declaration by appraiser arbitrator or umpire.
- (13.) And such declaration shall be annexed to the appraisement or award when made and if any appraiser arbitrator or umpire shall wilfully act contrary to such declaration he shall be guilty of a misdemeanor.

Instruments under Act to be evidence.	XXVI. Any instrument of sale or conveyance made and issued under this Act may be proved in all legal proceedings by the production of a certified copy thereof signed by the officer to be authorized for that purpose under any regulation made as hereinafter enacted.
Governor in Council to make and proclaim regulations.	XXVII. The Governor with the advice aforesaid may make regulations for carrying this Act into full effect so as to provide for all proceedings—forms of grants and other instruments—and all other matters and things arising under and consistent with this Act and not herein expressly provided for And all such regulations shall upon being published in the <i>Gazette</i> be as valid in law as if contained herein Provided that a copy of every such regulation shall be laid before both Houses of Parliament within one month from the issue thereof if Parliament be then in Session or otherwise within one month after the commencement of the next ensuing Session.
Commencement and Short Title.	XXVIII. This Act shall commence on the _____ of _____ next And shall be styled and may be cited as the “Crown Lands “Alienation Act of 1860.”

1859.

Legislative Assembly.
NEW SOUTH WALES.

MEMBERS OF THE ASSEMBLY BEING TENANTS OF THE CROWN.
(RETURN IN REFERENCE TO.)

Ordered by the Legislative Assembly to be Printed, 6 December, 1859.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 23 September, 1859, That there be laid upon the Table of this House,—

- “ A Return shewing the following particulars :—
- “ (1.) The number and names of Members of the present
- “ Assembly who are Pastoral Tenants of the Crown.
- “ (2.) The number of Runs, and the extent of each, held by
- “ each Member.
- “ (3.) The number of years the Runs have been occupied, and
- “ the right of occupancy unexpired in each case.
- “ (4.) The amount of Rent and of Assessment paid by each
- “ Member.
- “ (5.) The quantity of Stock depastured on each Run, where
- “ it can be ascertained.
- “ (6.) The extent to which the pre-emptive right of purchase
- “ has been exercised ; the date of approval by the Executive ;
- “ and the price obtained in each case.
- “ (7.) The situation of the Run ; the character of the soil ;
- “ whether or not it is suitable for the ordinary purposes of
- “ agricultural settlement, and its contiguity to water communi-
- “ cation ; in each case where such information can be obtained
- “ from the Survey Office before the second reading of the
- “ Land Bills.”

(*Mr. Parkes.*)

Legislative Assembly.

NEW SOUTH WALES.

LAND TAX BILL.

(PETITION FROM RAYMOND TERRACE AGAINST THE PASSING OF.)

Ordered by the Legislative Assembly to be Printed, 10 April, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Landed Proprietors, Tenants, and others, inhabitants of Raymond Terrace and its vicinity,—

MOST RESPECTFULLY SHEWETH:—

That your Petitioners beg to adopt this the legitimate mode of representing their views on the Land Tax Bill now before your Honorable House, and to state their earnest conviction that the passing of such a measure would result in serious and lasting injury to the best interests of the country—that it would not only be land-owners and occupiers of land, but indirectly, yet nevertheless as certainly, the trading classes and the community at large who would be hurtfully affected by the impost.

That your Petitioners protest against the principle of the tax on the broad ground of its being a class one, which is uncalled for in, and would be very baneful to, a young colony such as this. They also respectfully maintain that if additional revenue be required, it should be obtained rather from the luxuries and indulgencies of life, than from its very system of support.

That your Petitioners, however, believe the object of the proposed impost to be more for the purpose of preventing land from being bought up by speculatists than for that of revenue. If so, your Petitioners submit that if it have that effect, it will also serve to defeat the very Land Bill it appears the Land Tax Bill is framed to support; for if the proposed subsidy would be sufficient to check monopoly, it would have a similar effect on the intentions of *bona fide* purchasers of land.

That your Petitioners conceive, if the purpose of the Bill is the prevention of monopoly, that a special tax upon unoccupied land would have the desired result, without intrenching upon real buyers.

That, holding these views, your Petitioners humbly pray that your Honorable House will take these premises into consideration, and not pass the Bill into law.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 166 Signatures.]

Sydney: Thomas Richards, Government Printer.—1860.

1859.

Legislative Assembly.
NEW SOUTH WALES.

MR. SAMUEL CLIFT.

(PETITION OF.)

Ordered by the Legislative Assembly to be Printed, 23 September, 1859.

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of Samuel Clift,—

SHEWETH :—

That in or about the year 1837 your Petitioner entered into possession of a run or station called Doono, situate in the District of Liverpool Plains; one Joseph Merrick, who at the time occupied the said run under a license from the Crown, having transferred his interest therein to your Petitioner.

That, from the time your Petitioner first entered into possession of the said run down to the present time, your Petitioner has continually and uninterruptedly held a license from the Crown to occupy the said run under the name of Doono, and has continually and uninterruptedly occupied the same with sheep and cattle, and has regularly paid to the Crown his license fees for the said run, and assessments on stock depasturing thereon.

That about the year 1841 your Petitioner took legal proceedings against Mr. Edward Uhr, who had without your Petitioner's authority or permission placed some sheep on a portion of the said run, and compelled him to remove the said sheep.

That about the year 1844 some sheep of Mr. John Eales were placed on the said run without your Petitioner's authority or permission, and your Petitioner in like manner caused them to be removed.

That for several years your Petitioner's right to the said run was not disputed by anyone.

That in consequence of a claim set up by Mr. William Nowland, who had got possession of a piece of land called Wallalla, adjoining Doono on the south, one of the Boundary Commissioners appointed under the Act of Council 11th Victoria, No. 61, was directed by His Excellency the Governor General to investigate the dispute between your Petitioner and Mr. Nowland, as to the respective boundaries of Doono and Wallalla.

That about the year 1848 or 1849 the Boundary Commissioner accordingly held an investigation under and by virtue of the said Act of Council, and reported, as your Petitioner has been informed, against the claim of Mr. Nowland and in favor of your Petitioner.

That, in reference to the said Report of the Boundary Commissioner, your Petitioner received from Colonel Barney, Chief Commissioner of Crown Lands, a letter, of which the following is a copy :—

*Crown Lands Office,
Sydney, 21 July, 1851.*

Sir,

His Excellency the Governor General having been pleased to confirm the final Report of the Commissioner appointed, under the Act of Council 11 Victoria, No. 61, to investigate the case of disputed boundary noted in the margin, I am now directed to forward, for your information, a description of the approved boundaries, subject to which the leases of the respective runs will be prepared.

I have, &c.,
GEO. BARNEY,
Chief Commissioner of Crown Lands.

Which letter has an endorsement in the following words :—

Boundary line between Wallalla and Doono :—To run from the junction of Dry Creek in a direction as nearly rectangular with the course of the river as possible, running back to Wyndham's station, Colly Blue Mountain, joining Lang's station at the Oak Tree, Breeza.

GEO. BARNEY,
Chief Commissioner of Crown Lands.

That the said endorsement describes the run called Doono as occupied by your Petitioner from the year 1837 to the present time.

That about the year 1848 or 1849 some sheep of Mr. John Eales were again placed on a part of the Doono, and the dispute between your Petitioner and Mr. Eales was also referred by His Excellency the Governor General to one of the Boundary Commissioners for investigation; and that the Boundary Commissioner held an investigation accordingly, and reported thereon to His Excellency the Governor General.

That in reference to the said dispute between your Petitioner and Mr. Eales, your Petitioner received from Colonel Barney a letter, of which the following is a copy :—

*Crown Lands Office,
Sydney, 20 November, 1851.*

Sir,

His Excellency the Governor having been pleased to disallow the final Report of the Commissioner appointed under the Act of Council 11 Victoria, No. 61, to investigate the case of disputed boundary noted in the margin, I am now directed to forward for your information a description of the approved boundaries, subject to which the leases of the respective runs will be prepared.

I have, &c.,
GEO. BARNEY,
Chief Commissioner of Crown Lands.

Which letter also had an endorsement in the following words :—

Boundary between Doono and Wallalla :—Commencing at a marked tree at the junction of Dry Creek with the Mooki River, and proceeding east as nearly as possible rectangular with the course of the river to the Breeza Road, and along that road north so as to throw the land in dispute within the Doono station.

GEO. BARNEY,
Chief Commissioner of Crown Lands.

That the latter description refers only to the part of Doono then in dispute between your Petitioner and Mr. Eales, but so far as it goes entirely corresponds with and confirms the description contained in the endorsement on Colonel Barney's letter of the 21st July, 1851.

That, notwithstanding the Report of the Boundary Commissioner, confirmed as it was by His Excellency the Governor General, as notified in Colonel Barney's letter of the 21st July, 1851, and subsequently re-affirmed by His Excellency, as notified in Colonel Barney's letter of the 20th November, 1851, Mr. William Nowland has trespassed upon Doono with large numbers of cattle.

That, after various other proceedings, your Petitioner in the year 1856 commenced an action in the Supreme Court against Mr. Nowland, for trespassing with his cattle upon Doono, your Petitioner claiming as Doono the land described in the endorsement on Colonel Barney's letter of the 21st July, 1851, and that Mr. Nowland soon after commenced a cross-action against your Petitioner for trespassing on Wallalla, claiming Doono as a part of Wallalla.

That both the actions came on for trial at the Maitland Assizes in September, 1857.

That the action of your Petitioner against Nowland was first tried, and the Jury found a verdict for your Petitioner,—thus finding that Doono, as described in the letters hereinbefore referred to, was your Petitioner's land.

That

That Mr. Nowland subsequently applied for a new trial, which was refused, and that judgment was eventually entered up for your Petitioner.

That while the cross-action of Nowland against your Petitioner was being tried, an arrangement took place by which your Petitioner consented to a verdict for Mr. Nowland, with nominal damages, but only as to the land south of Doono as described in the letters hereinbefore mentioned, which land your Petitioner never claimed,—Mr. Nowland thus virtually admitting that he was not then able to support his claim to Doono.

That, notwithstanding the result of these actions, Mr. Nowland commenced another action against your Petitioner for trespasses upon Wallalla, again claiming Doono as part of Wallalla.

That the said action was tried in Sydney in February, 1858, when a verdict was returned for Mr. Nowland.

That a new trial was granted by the Supreme Court, and that a second trial took place in Sydney, commencing in May, and, after adjournments, terminating in August, 1859, having occupied the Court for fourteen days, when the Jury not agreeing was discharged without finding a verdict.

That, as the witnesses are necessarily very numerous and brought from distant parts of the country, these actions are from their expense almost ruinous, and in every respect most harassing to your Petitioner.

That, as your Petitioner believes, no license was issued by the Crown for the run called Wallalla, until several years after your Petitioner obtained a license for Doono.

That your Petitioner humbly submits, that the confirmation by His Excellency the Governor General of the final Report of the Boundary Commissioner, as notified in Colonel Barney's letter of the 21st July, 1851, and the subsequent virtual re-affirmation of His Excellency's decision, as notified in Colonel Barney's letter of the 20th November, 1851, clearly entitled your Petitioner to a lease of Doono, as described in the endorsements on the said letters.

That your Petitioner has made several applications to the Government for a lease of Doono in accordance with the said descriptions, but hitherto without success.

That your Petitioner further submits that the withholding by the Government of such a lease has subjected your Petitioner to the expensive and harassing law proceedings hereinbefore mentioned.

Your Petitioner therefore humbly prays that your Honorable House will take the premises into your consideration, and cause such proceedings to be taken in reference thereto as to your Honorable House may seem fit.

And your Petitioner will ever pray, &c.

his
SAMUEL X CLIFT.
mark

Dated this 7th day of September, 1859.

The mark of Samuel Clift was hereto affixed in my presence,
R. W. THOMPSON,
Solicitor, West Maitland.

HENRY LANE,

Under Secretary.

The Treasury, New South Wales,
8 December, 1859.

1859-60.

Legislative Assembly.
NEW SOUTH WALES.

ASSESSMENT ON RUNS.

(DESPATCHES RESPECTING ROYAL ASSENT TO ACT 22 VIC., No. 17.)

Ordered by the Legislative Assembly to be Printed, 24 January, 1860.

THE GOVERNOR GENERAL to THE SECRETARY OF STATE FOR THE COLONIES.
(No. 176.)

*Government House,
Sydney, 17 November, 1858.*

SIR,

I have the honor to forward herewith an Act (No. 17) of the Legislature of New South Wales, to which I have assented in the name and on the behalf of Her Majesty.

This enactment is intituled "an Act to impose an Assessment on Runs in the " Unsettled and Intermediate Districts, and to increase the Rent of Lands leased for Pastoral " purposes within the Settled Districts of New South Wales."

The circumstances connected with the giving of my assent to this Act are so peculiar that I feel that I should not be justified in forwarding it for Her Majesty's approval without some more detailed explanation than is usually considered necessary.

It appears that when this Act, having been passed by the Legislative Assembly, was submitted to the Legislative Council it received the assent of the majority, but certain members were permitted to enter a protest against it. It was then brought up to me in the usual manner, no reference being made to the protest, and was by me as usual submitted to the Law Officers, with directions to state whether in their opinion there was any objection to my giving my assent to it, or whether I was required under the provisions of the Constitution or any other Acts, or the Royal Instructions, to withhold my assent to it, or to reserve it for the signification of Her Majesty's pleasure.

In reply to these directions I received from Mr. Lutwyche, the then Solicitor General, a written opinion, a copy of which is enclosed, in which he alludes to the protest signed by certain Members of the Legislative Council, and in his own name, and in that of Mr. Martin, the then Attorney General, repudiates altogether the validity of the arguments upon which the legality of the measure was impugned. To this letter, however, was appended a memorandum by the Attorney General, dated on the day but one previous to his resignation of office, stating that he could not concur in the opinion given by the Solicitor General for reasons therein stated—a copy of this memorandum is also herewith transmitted.

Under these very peculiar circumstances, I felt myself bound to consider not merely the legal and technical grounds upon which the objections to the Act were based, but also the spirit in which the particular clause in the Constitution was framed, to which reference is made by the Attorney General, and thus to form my own opinion upon the objections raised to the legality of this enactment. Having satisfied myself that these objections were not well-founded, I gave my assent to the Act in the usual form, and I will now proceed to lay before you the reasons which have induced me to differ from the view taken by the Attorney General, and to concur in that taken by the Solicitor General.

Printed Copy.

Printed Copy.

The 58th clause in the Constitution Act, after repealing the Land Sales Act, vests the entire management and control of the Waste Lands belonging to the Crown in the Legislature of the Colony, with this proviso:—"That nothing therein contained shall affect or be construed to affect any contract, or to prevent the fulfilment of any promise or engagement made by or on behalf of Her Majesty with respect to any Lands situate in the said Colony, in cases where such contracts or engagements have been lawfully made before the time at which this Act shall take effect within this Colony, nor to disturb or in any way interfere with or prejudice any vested or other rights which have accrued or belong to the licensed occupants or lessees of any Crown Lands within or without the Settled Districts, under or by virtue of the Act of Parliament passed in the 9th and 10th year of the Reign of Her Majesty, or of any Order in Council issued in pursuance thereof."

The Orders in Council herein referred to, after stating the minimum rent to be paid for a run estimated in accordance with a scheme laid down, as capable of carrying a given number of cattle or sheep, say (cap. 2, sec. 4):—"The rents to be paid are to be reserved exclusively of any existing assessments of taxes or rates on sheep or cattle, and are to be paid without abatement on account of the existing or any future assessments of taxes or rates on sheep or cattle, and are in no way to interfere with the right of the Colonial Legislature to impose from time to time such assessments as may be deemed advisable."

The Act which I forward herewith imposes an assessment, not upon the sheep and cattle actually depastured upon the run, but upon the number which it shall have been estimated upon competent authority to be capable of carrying. The main object of the Legislature in making this alteration was to secure the Colony from a nuisance which has sprung up of late years, in consequence of the demand for runs, in the shape of a set of jobbers in runs, who, without any intention of ever occupying the country, tender for the occupancy of extensive districts, which they afterwards sell at a high premium to the flock-owners who are in want of fresh pasturage for their increasing flocks.

The imposition of an assessment upon the quantity of stock which a run is estimated to carry is in point of fact a bonus to a *bona fide* occupant, as in hardly any case does this estimated quantity, which is assumed to represent the average capabilities of the run during a long range of seasons equal the amount actually depastured. But it is calculated to check the operations of the jobber. Is there then anything illegal in the enactment?

In the first place it is clear that by the very wording of the Order in Council, and from what has taken place in the Colony of Victoria, that it is perfectly within the competence of the Legislature to impose any amount of assessment upon sheep and cattle which might seem to be advisable, and in imposing so small a charge, as compared with that enacted in Victoria, the Legislature has shewn itself careful of the interests of the important class affected by the present law.

In the second place it is perfectly clear that it is within the power of the Legislature to make any provision for the occupancy of lands, or to impose any rent or assessment which may appear to it advisable, upon persons who may have occupied Crown Land since the passing of the Constitution Act, or who may hereafter occupy such land; and, therefore, that as far as regards these persons there can be no doubt of the legality of the present enactment.

Does, then, the mode in which the assessment upon stock is now proposed to be levied, in any way prejudice any vested rights in the possession of those who occupied land or held leases previous to the passing of the Constitution Act? I do not think it can be held to do so. As I have before said, I believe that the amount of the assessment to be paid by individual occupants will be, in nearly every case, upon a smaller number of cattle and sheep than those actually pastured by them. And should there be any individual in the Colony who can have been so little alive to his own interests as to keep his run unstocked for the last three years, and thus be liable under the present enactment to pay an assessment upon sheep and cattle which he does not possess, he would have a remedy at law, on showing that in his individual case the agreement under which he held his run had been violated, and the proviso of the Constitution Act had not been complied with. It would, however, I hold, be most impolitic to interfere with the powers which have been so fully conceded to the Legislature, upon the grounds that, in a case most improbable to occur, some possible injustice

ASSESSMENT ON RUNS.

2

injustice might be done to an individual, or a set of individuals, for whom the law would provide with a distinct remedy,—and I would beg to express an earnest hope that Her Majesty would not exercise Her power of disallowing a Bill which is calculated to set at rest a very vexatious question in a manner which cannot be considered in any way oppressive or unjust.

I have, &c.,

W. DENISON.

THE RIGHT HONORABLE

SIR E. BULWER LYTTON, BART.

THE SECRETARY OF STATE FOR THE COLONIES to THE GOVERNOR GENERAL.

(No. 35.)

Downing-street,

9 April, 1859.

SIR,

I have received your Despatch, No. 176, of the 17th of November last, forwarding, with a full explanation of your reasons for assenting to the same, the copy of an Act passed by the Legislative Council and Assembly of New South Wales, entitled "An Act to impose an Assessment on Runs in the Unsettled and Intermediate Districts, and to increase the Rent of Lands leased for Pastoral purposes within the Settled Districts of New South Wales."

I have also received a letter addressed to the Secretary of State, by Mr. Holt, Chairman of a Meeting held at Sydney on the 8th of December last, in which he informs me, that, in accordance with the resolutions passed upon the occasion, petitions will be framed and forwarded to this office, praying Her Majesty to disallow the enactment.

Looking to the great interests involved in the passing of this Act, and to the doubts which exist in respect of its validity, I have to inform you that I cannot advise Her Majesty to prejudge, by assenting to this enactment, a doubtful question of law, which would be most properly and completely decided by the local Courts of Justice.

If the Act be really illegal, it is open to those persons who may consider themselves aggrieved by it to protect themselves by an action before the Supreme Court; and, if it be not, I should regret for the sake of the Colony at large to disallow it on a merely legal ground.

Under these circumstances, therefore, the Act will be permitted to remain in operation, unless within the period allowed for its disallowance its repugnance to the Imperial Act shall be conclusively established by the sentence of a Court of Law.

I have, &c.,

CARNARVON,

(in the absence of Sir E. Lytton.)

GOVERNOR

SIR W. DENISON, K.C.B.,

&c., &c., &c.

THE GOVERNOR GENERAL to THE SECRETARY OF STATE FOR THE COLONIES.

(No. 69.)

*Government House,**Sydney, 4 August, 1859.*

SIR,

I have the honor to acknowledge the receipt of your Despatch, No. 35, dated 9th April, 1859, on the subject of the allowance by Her Majesty of the Act of the Legislature of this Colony, 22nd Victoria, No. 17, intituled, "An Act to impose an Assessment on Runs in the Unsettled and Intermediate Districts, and to increase the Rent of Land leased for Pastoral purposes within the Settled Districts of New South Wales."

Looking to the very peculiar circumstances under which this enactment was submitted for approval, and to the fact that, in a letter addressed to the Secretary of State by Mr. Holt, information was given of the probable arrival of Petitions praying for the disallowance of the Act, I could hardly expect that it would be in your power to follow any course but that notified in your Despatch.

ASSESSMENT ON RUNS.

I have, however, great pleasure in stating, for your information, that no opposition has as yet been made to the collection of the Assessment; even Mr. Holt, the Chairman of the meeting, who addressed you on the subject of the disallowance of the Act, has quietly paid the amount charged for the Runs in which he is interested; and the following statement will show that the advantages given by the Act have been generally accepted by the occupiers of Runs, and the legality of the Act acquiesced in:—

	LESSEES.	RUNS.
Total number on which Assessment is payable	1,652	3,086
Unpaid	42	84
<i>Of these forty-two the following is the Classification:—</i>		
Disregarded the law	26	51
Sent in claims for exemption	6	14
Lodged the amount without the fine due for non-payment	10	19
	42	84

I have reason to believe that, of the 26 who have disregarded the claim made by the Government, in accordance with the Act, many, if not the whole, will be found to have taken up Runs on speculation, and to have no intention of retaining them; and I have very little doubt that I shall be able shortly to report the payment of all the sums due under the enactment, the legality of which has been impugned, in my opinion, on insufficient grounds.

I have, &c.,

THE RIGHT HONORABLE
SIR E. BULWER LYTTON, BART.

W. DENISON.

THE SECRETARY OF STATE FOR THE COLONIES to THE GOVERNOR GENERAL.

(No. 34.)

Downing-street,

28 October, 1859.

SIR,

I have to acknowledge the receipt of your Despatch, No. 69, of the 4th August last, reporting that the Act passed by the Legislature of New South Wales in 1858 (No. 17), to increase the Assessment and Rent of Lands leased for Pastoral purposes, had hitherto worked satisfactorily, and that no serious question had been raised in the Colony respecting the legality of this enactment.

I have, &c.,

GOVERNOR SIR WILLIAM DENISON, K.C.B.,
&c., &c., &c.,
New South Wales.

NEWCASTLE.

1859.

Legislative Assembly.
NEW SOUTH WALES.

MR. JOHN MALLEY.

(COMPLAINING OF PREMATURE DISMISSAL.)

Ordered by the Legislative Assembly to be Printed, 20 September, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of John Malley, late Railway Surveyor to the Government,—

MOST RESPECTFULLY SHEWETH:—

That your Petitioner was engaged and appointed in London, on the 27th of June, 1855, as one of the Surveyors for New South Wales, by Edward Barnard, Esquire, Agent General for the Colonies, to survey, by contract, for a period of three years from the date of his arrival in the Colony, full work being guaranteed for those three years, at a certain scale of fees, as mentioned in the enclosure of His Excellency the Governor General's Despatch of the 20th of June, 1854 (No. 80, Executive.)

2. That on your Petitioner's arrival in Sydney, on the 26th of November, 1855, he, at the request of the Government, accepted an appointment as Railway Surveyor, at a salary of £400 per annum, and £400 for allowances, on the perfect understanding of being employed for three years, as per original agreement, otherwise he would not have accepted it.

3. That your Petitioner was ordered to Moreton Bay, and remained in that District from the 28th of January, 1856, until the 12th of October, 1857, during which time he performed the duties of his appointment, as hereinafter specified, viz.:—Explored, in company with two other gentlemen, the whole of the country from Brisbane to Warwick, and from the east of Spicer's Peak to Drayton, in all about 500 miles, to determine the best general direction for crossing the Range, for that portion of the Great Northern Railway Line between Brisbane and Warwick.

4. Having determined the best general direction over the Range, your Petitioner assisted in selecting, cutting, and ranging out the first 47 miles.

5. That your Petitioner measured, staked, and marked out the base lines of those 47 miles, as well as made the survey to a considerable distance on each side.

6. That your Petitioner selected, cut, ranged out, and surveyed, the next 13 miles, in all 60 miles of Railway, containing 29,000 acres, made the whole of the surveys, protracted the angles, laid down the work, plotted and finished the plans, as well as levelled 32 miles in and about the Town of Ipswich, and inserted the heights on the Plan, for the information of the Railway Commissioners.

7. Your Petitioner received orders, on the 12th of October, 1857, to proceed to Sydney, to receive fresh instructions and see the state of the work, leaving his men and equipment in the bush, as he received no orders relative to them; and on his arrival in Sydney, he reported himself at Head Quarters, on the 18th October, and delivered the Plans and Field Books complete in every respect in the Office, and attended daily for six weeks without receiving any notice of displeasure, and without any fault being found with his work.

8. That, notwithstanding, on the 2nd of December, your Petitioner received notice of dismissal, for the 1st of January, 1858, by which he was deprived of one year of the term of his agreement, on the short notice of one month, his establishment still remaining in the North.

9. That your Petitioner has performed his duties according to his instructions, and has worked zealously and honestly, and could not have done more than he has done, taking the nature of the country, bad weather, rising of creeks, and every other difficulty into account, and that no better line could be found in the general direction pointed out by the instructions received.

10. That your Petitioner most respectfully submits, that he has done nothing to deprive him of one year of the term of his engagement, nor to warrant his dismissal in so summary a manner.

Your Petitioner therefore prays your Honorable House to take the premises into your favorable consideration, and accord to him that justice which upon the merits of the case he may appear entitled to.

And your Petitioner, as in duty bound, will ever pray.

JOHN MALLEY.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES NO. 37. TUESDAY, 6 DECEMBER, 1859.

15. Grievances:—Mr. Parkes moved, pursuant to *amended* notice,—
1. That a Select Committee be appointed to inquire into and report upon the allegations contained in the several undermentioned Petitions:—

* * * * * * *

 - (4.) The Petition of John Malley, presented to the Legislative Assembly, September 16th, 1859.

* * * * * * *
 2. That such Committee consist of Mr. Flood,* Mr. Rotton, Mr. Pemell, Dr. Lang, Mr. Macleay, Mr. Nott, Mr. Dickson, Mr. Laycock, Mr. Black, and the Mover.
Debate ensued.
Question put and passed.

* Seat vacant, 16 January, 1860.

VOTES NO. 61. WEDNESDAY, 15 FEBRUARY, 1860.

8. Grievances:—Mr. Parkes, as Chairman, brought up a Progress Report from the Select Committee on Grievances, in reference to the case of John Malley, whose Petition was referred to the Committee on the 6th December last.
Ordered to be printed.
-

VOTES NO. 87. FRIDAY, 27 APRIL, 1860.

1. * * * * * * * *
Committee on Grievances:—Mr. Parkes, by leave of the House, moved, without previous notice, That the Select Committee on Grievances have power to report the Minutes of Evidence taken before them, from time to time, to the House.
Question put and passed.
 2. Mr. John Malley:—Mr. Parkes, pursuant to leave granted, brought up and laid upon the Table the Minutes of Evidence taken before the Select Committee on Grievances, in the case of Mr. John Malley, and moved that the same be printed.
Question put and passed.
Ordered to be printed.

TAKEN BEFORE

THE SELECT COMMITTEE

ON

GRIEVANCES.

JOHN MALLEY—PETITION OF.

THURSDAY, 9 DECEMBER, 1859.

Present:—

MR. DICKSON,		MR. PARKES,
DR. LANG,		MR. PEMELL,
MR. ROTTON.		

HENRY PARKES, Esq., IN THE CHAIR.

Mr. John Malley called in and examined:—

1. *By the Chairman*: You were engaged in Ireland by the Colonial Agent for this Government, I believe? No, in London.
2. When was that? I think that was on the 27th June, 1855.
3. What was the name of the gentleman who engaged you? James Barnard, of 5, Cannon Row.
4. For what duties were you engaged? No duties were specified, but I was engaged as a surveyor for the term of three years, to survey by contract at a certain scale of prices.
5. Did you enter into a written agreement? Yes, I have a copy of it here. (*The witness handed in the same. Vide Appendix.*)
6. Under what circumstances, and with whom did you acquire a knowledge of your profession? The first part of my articles was served with a gentleman by the name of Knight. In the year 1835 I was articled to Mr. Knight, of Castlebar, in the County of Mayo, west of Ireland; and after serving about twelve months with him, he got into a little difficulty, and left Castlebar. He advised my father to speak to Lieutenant Greatrex, then in Castlebar, an engineer officer, to get me on in what was termed the ordnance survey of Ireland. I did not go then, and the cause of my not going then was that they were about to proceed to the extreme west of Ireland, which is a very mountainous place, and my father would not allow me to be exposed to the dangers of the place; but after they removed to a place called Galway, my father got a recommendation from the chief magistrate of the town, and I laid this recommendation before Lieutenant Botcher. It was on the 17th January, 1837, this occurred, that I joined the ordnance survey, or 1836, I am not certain, but I think it was 1837, to the best of my recollection. I remained with them; went through the west of Ireland, as far as what is called Connemara; I worked there with them; and from that I went to County Clare, and then to County Limerick; and then Lieutenant Durnford took charge. After working under the command of Lieutenant Durnford for about two years we were then transferred to the survey of Great Britain and Ireland. Captain Tucker then

Mr. J. Malley.

9 Dec., 1859.

Mr. J. Malley took charge, and I was sent off to Yorkshire. After working there about twelve months I was transferred back again to what was called the levelling or hill draughting department—levelling and contouring—under Lieutenant Leech, until 1845. And from 1845 to 1855 engaged with different surveyors and engineers, in England, on railway and other surveys. From the 17th January, 1837, until 1846, I served under different officers; and then there was a great pressure for surveyors, in consequence of the railway mania. I applied for leave of absence to Lieut. Leech, and he granted me three months leave, although at first he wanted to prevent my going; and as he liked my work pretty well, and had no older surveyor, he said if I would remain he would allow me a rise of 6d. a day; but I thought I would embrace the opportunity of going to England, and I did so. The first offer that was made me when I arrived in England was three guineas a day. That was on a railway of which Sir John Rennie was the engineer-in-chief. It was called the Crewe branch; and Messrs. Gaudle & Brupton were the chief surveyors. I levelled the whole of the Crewe Branch in 1845. After a time, many of the surveys being completed, there was a reduction in the number of officers on the different lines. Many of the surveyors who had come from Germany and France returned, and I went back to Lieut. Leech, and remained with him till (I think) 1847; and in 1847 or 1848 (I do not know which) I left him, came over and joined the English surveys again. I surveyed for Mr. Rigley, of Manchester, in 1846, on the Manchester Water Works, and different other surveyors and engineers up to January, 1848, when I was employed by Mr. Newlands, on the survey of the Town of Liverpool. I worked on what is called the Manchester Water Works. That was, I think, in the beginning of 1846, after the railways were over. That was the preliminary survey with Mr. Rigley, at the Great Bore in the County of Derbyshire, on the Leeds line, where they intended to construct the reservoir for the Manchester Water Works. I also worked with Mr. Dalgleish, a surveyor thoroughly established, a scientific man, in St. Helen's. This was after leaving the Ordnance altogether; for I was told by Captain Leech, on leaving in 1847, that if I left then I should never join the Ordnance again if he could prevent it. During the three months I had had leave of absence I made money; but he said that there was then a considerable glut in the market, and if I left I should not go back. I never joined him again, for I never had occasion.

7. To what date have you got now? To the date that I joined the town survey of Liverpool, 8th June, 1849.

8. Will you describe where you were from 1849 to 1855, when you were engaged to come out here? With Mr. Newlands sixteen months, on the town survey of Liverpool for sanitary purposes.

9. Where were you after that? I was engaged with the Metropolitan Commissioners of Sewers, which was for sanitary purposes also.

10. How long were you so employed? From the date I left Mr. Newlands till the 24th August, 1852.

11. Where were you from that time till 1855? Then I resigned from that department, because I got established with a firm in London by the name of Messrs. Reed, and they did a great deal of railway surveys for the great engineer, Mr. John Fowler,—the engineer-in-chief here, I believe, was an assistant-engineer to Mr. Fowler—and when I found I was well established, because railway surveyors are better paid than others, I remained on and off with them as with other people occasionally from that date till I came over here.

12. When you made application to Mr. Barnard for an engagement to come out here, did you state these facts generally, or the principal of them? No.

13. Did he ask for your references? There was no occasion, I believe all this was settled by the Government.

14. How did he ascertain that you were a properly qualified surveyor,—by what test? There was no test, for he found that I was, from these recommendations which were given to him.

15. Would not these recommendations themselves constitute a test? It was on the strength of these recommendations that I was employed.

16. How did you come to apply; was it from seeing advertisements in the public papers? I heard of it privately; I heard that Colonel Dawson, of No. 4, Saint James's-square, London, was the gentleman whom the Government had written to and authorised to make the selection. I went to him, and he asked me where I got a knowledge of my profession, and where I had practised; I told him, but, of course, not so fully as I have done here. He asked me if I had any testimonials to shew, and I shewed him the whole of these I now hold in my hand. They are from the following persons:—the first from James Newlands, borough engineer of Liverpool, dated 8th June, 1849, for a period of sixteen months; another from Mr. Joseph Smith, surveyor to the Metropolitan Commissioners of Sewers, up to the 24th August, 1852, from that date; another from a gentleman of the name of Whitehead, civil engineer and surveyor, of Exeter, dated 27th September, 1854; the last is from Mr. Francis Newman, town surveyor, of Ryde,—I had the whole charge of that survey; this testimonial is dated 31st March, 1855.

17. These are from the gentlemen with whom you were last engaged? Yes.

18. These are the identical testimonials you handed to Colonel Dawson? Yes.

19. You have no objection to hand them in? No. (*The witness handed in the same. Vide Appendix.*)

20. After entering into an engagement with Mr. Barnard, I suppose you proceeded, in pursuance of that agreement, and in accordance with its terms, to this Colony? Yes.

21. On your arrival here, you were appointed to the Northern District? On my arrival here, the Government asked if there were among the gentlemen who came out, any who knew anything about railway surveys; some said they did, and others said they did not.

22. Whom did you see when you arrived here; who represented the Government? Colonel Barney.

23. What you are going to say refers to Colonel Barney? Yes; as he was acting on behalf of the Government. I told him, for one, that I was accustomed to railway surveys. He wished that all who were acquainted with such surveys would state so, and if they thought fit to form themselves into parties of three in each party, he would be better pleased. These were similar to the very words, he would be better pleased that those acquainted with railway survey should form into parties, and that those who were not could join the staff, or take to licensed surveying or surveying by contract. Then one of the surveyors asked if those who joined the railway survey would be kept for the term of three years, and Colonel Barney said, "Yes." Under these terms I, Mr. Condon, Mr. Grogan, and a good many more, said they would join the railway department. Others said they would join the staff, but in the course of some time, when they found at what rate the staff were paid, they joined the railway. It has been said since that we knew that the money voted for railway purposes was only voted from year to year, but I wish to state solemnly that I had no expectation when I joined the department that I was not to be kept for three years, for the indenture states distinctly that I was engaged for three years. We were to send in an official statement to the effect that we were willing to go upon the railway survey, and we were to receive £400 a year as salary, and £400 a year for allowances. This may be considered great pay, but if everything be taken into account £400 a year never covered my expenses in the Moreton Bay district. I was kept about two months in town, and at the expiration of that time was ordered to Moreton Bay.
24. Does this petition state fully and accurately what took place afterwards with regard to your work? Yes, it does.
25. *By Mr. Rotton:* The work referred to is comprised in paragraphs 3 to 7 inclusive? Yes.
26. *By the Chairman:* According to your petition you were dismissed from the public service on the 2nd December, 1858? Yes, it should be 2nd December, 1857.
27. How was your dismissal communicated to you? I went to the office before this, and spoke to Captain Martindale, requesting him to give me permission to proceed to my establishment at the Northern District, as I had three men, my horses, and in fact all my property there. I requested he would give me permission to proceed to Moreton Bay. He said it would be better for me to put the things into the Government store. I said there was no Government store at Ipswich, and my men were encamped within four miles of Ipswich. Some gentleman who was present said there was a store, and I said it was not fit for a store, it was only a tent.
28. At this time you were waiting in Sydney for instructions? Yes, I was waiting six weeks.
29. All this time were your staff encamped four or five miles from Ipswich? Yes, all the time I was waiting in Sydney. I went to the office one morning to shew myself, when I got this letter handed to me by the porter. He said, "Here is another for Mr. Grogan." He was one of my colleagues. I opened the letter, and, to my astonishment, found that it contained my dismissal. I have not the letter here, but think I can remember the very words:—"The Government, taking into account the quality of the work performed by you since your arrival in the Colony, together with the report upon your qualifications from Captain Martindale, will not require your services after 31st December, 1858." I never heard a word of it before.
30. You say no complaint of your work had been made? I never heard a word of it.
31. During the period you were waiting in Sydney, was nothing ever said to you as to your work—no doubt expressed as to your efficiency? No doubt whatever. I should have stated that I was sent for on the 29th October, and ordered to be at the office at two o'clock. I went at that time, and I think there was nothing required of me on that day. I then called every day, because Captain Martindale had left word that I should at a certain hour. A few days after I was called into Captain Martindale's office. I had heard rumours before that there was an intention to make a reduction in that establishment, and when I went in I saw an instrument standing up in the corner. Captain Martindale had been speaking to me about different things; he said, "Oh, by the by, how would you read this angle?" I saw immediately what he was shifting about. He did not come up manfully and say, "I want to examine you;" if he had I should have objected, because I heard a reduction was to take place. After he had examined me Mr. Whitton came in, and he and I differed as to the reading of the angle. Mr. Whitton said, "He is right." That was the first examination. About a fortnight after I was sent for again, and he said he did not feel satisfied how he had examined me the last day; and he was then for an hour examining me; and we did not agree, that is the fact; but there was only one thing we disagreed upon—the instrument was not in proper adjustment; and when he asked me was it, I told him not. He said, "How would you read that angle?" I read it as it was. He said, "How would you apply it—would you add or subtract it?" I said, "I would subtract it." He said, "You are wrong." Of course I did not wish to tell a gentleman like Captain Martindale that he was wrong, and never having any expectation that I would be discharged I never contradicted him. That was all the fault he ever found with me. But, with regard to my work, I have a copy of my instructions, and, if my work were compared with my instructions, no fault could be found. A week after this I got my discharge; still Captain Martindale did not state what I was discharged for.
32. You had no notice that you would be required to go through an examination? No.
33. With regard to your work, is there any evidence available on the part of competent authorities as to its quality? Yes, there is another gentleman who went out with me—Mr. Grogan.
34. Is he in the Survey Office? No.

Mr. J. Malley.

9 Dec., 1859.

Mr. J. Welley. 35. Is he the gentleman who was dismissed with you? Yes, though he passed through both examinations; he was very wise, he had no dispute, but he has never got any work.

9 Dec., 1859. 36. Is there any other gentleman? The only gentleman besides was on the same establishment, Mr. Sanderson, but I believe his case is disposed of already.

37. Where is Mr. Geogan? Staying at the "Star Inn," Macquarie-place.

38. What did you do after you got this letter of dismissal? After I got this dismissal, the very next day I went to a counsellor, and laid all my papers before him, these testimonials and the agreement I have handed in.

39. To whom did you go? To Mr. Dalley; and he told me—these were the very words he said—he says, "It's a shame to discharge any gentleman in that manner; coming out here "and then to discharge him in that manner it's a shame;" and he got a little excited, and said something else, and I made answer, "No, I require nothing but my just claim, and I am "determined to have that, and I want your advice"; at that time I had money. I said, "I will pay you for it, whatever it is I will pay you." He said "I will give you no advice, "but I say you are wrongly discharged, that is all; I will give you a note, and you go up "with it to Mr. Rowley." Well, he gave me a note, and I went to Mr. Rowley, but he was not in. I went again the next day and saw him; he said "I will push for half-a-year's "salary, but I will guarantee a quarter's pay; you are a yearly servant, and have a right to "get a quarter's notice"; and then I gave him authority to write; this was before I was actually discharged; I gave him authority to dispute the legality of my discharge; he wrote to Captain Martindale, who gave me no reply, but left orders that my month's salary was not to be paid till he had seen me; he sent for me, and when I went upstairs to him, he said, "What is it you want?" "I want nothing but justice; I want the full term of "my engagement to be kept up to, and to fall back upon my original engagement, and I am "satisfied." He said, "I will write to the Government about it." "Very well," said I. I went and talked to Mr. Rowley about it, and he said, "You will now have to obey his "orders to the very tittle if you expect to be paid." He then wrote another letter to press him. The answer to that letter was not dry when I got it: I have it here. (*The witness searched among his papers but did not produce the letter referred to.*) He said he wanted me upon business, and when I went there it was nothing but to tell me he had written to Government, and that I would be employed if I would pass an examination satisfactorily. This was a verbal agreement, and I thought nothing of this. I said "Very well, Sir, I will "withdraw the lawsuit," and I went up and spoke to Mr. Rowley about it, and he said, "Do you think you are ever likely to pass an examination satisfactorily after threatening "them with a lawsuit—you never will pass it." Then Captain Martindale wrote to me officially that I was to proceed to the Surveyor General's Office, to undergo an examination before Colonel Barney. Then I disputed undergoing examination, as I was under advice, although I agreed afterwards to be examined, as my brother surveyors advised me to settle it; they said there was no employment to be had in the country for surveyors except under Government, and it was better for me to get out of my difficulty as easily as I could, and to undergo an examination. I then consented to undergo an examination; and the answer I received, about three weeks afterwards, was that I was incompetent.

40. Since that what steps have you taken—did you ever apply to the Government? Yes; I wrote for nine months.

41. What did you apply for; did you apply for the fulfilment of the original agreement, or for compensation for the loss of your situation, or what was the substance of your application? My first application was either for re-employment or for compensation, because re-employment would amount to the fulfilment of my agreement.

42. To whom was this addressed? I think the first was to Mr. Robertson, the Minister for Lands and Public Works, and I went to him two or three weeks after—that was on the 20th September, 1858.

43. Have you a copy of your application? I have not it here. Immediately after the gold discovery at Port Curtis I got an answer that it was referred to Captain Martindale for his report, and as soon as he would make his report I would be replied to. I got a reply which did not prove satisfactory to my wishes. I then went to Mr. Robertson and stated my case as briefly as possible; of course I did not enter into it so fully as I have done here, and what he said was "Write officially," for he wanted to get rid of me. However I wrote officially until the case was brought so far that Mr. Cowper asked me to send in a bill of my claim, and I did send in a bill.

44. What did you claim? I sent in a claim for £238 10s. I merely got a reply that as the Executive Council had decided my case it could not be re-opened. I went and spoke to Mr. Robertson, who got into a passion, and said I had got my answer. I said I would never let the matter rest till it was fairly decided. He said he would vote against it. "Do you "want me to upset the decision of Mr. Hay?" I noticed the word "upset," and I said "Mr. Hay had nothing to do with it, it was the Honorable Mr. Murray, the Secretary for "Lands and Works." He said "It was no matter." I wanted to have a few words conversation with him, and after that I parted with him; and then I petitioned the Legislative Assembly. The amount of my claim is £238 10s.—£38 10s. of which is private money paid out of my pocket.

45. Have you copies of the official letters you sent in? I have.

46. How do you make out your claim? I make out my claim in this manner: I did not get my notice in time before the end of the quarter; I had my men engaged by the quarter; I engaged and paid them by the quarter; and when I got my notice here, I wrote up and stated to my men that I would not require them after the 1st January—that was two of them; they wrote back, and objected to the notice, and claimed a quarter's pay. Then there was the expense of going to Moreton Bay and disposing of my property there; there was also a quarter's notice for being dismissed.

47. What you really claim is your salary for a quarter? Yes.
48. And the expenses incurred by your dismissal? Yes; because I had to keep the men on a month after that—that is, for the month of January, 1858, I had to keep them and support them, and I gave these persons £38 10s. Mr. J. Malley.
9 Dec., 1859.
49. Did you, after you had petitioned the Legislative Assembly, again make any application to the Executive Government? I went to the Honorable Mr. Forster, and he asked me had I anything to shew that I was engaged for three years; I said I had; and he then said it was very wrong for the Government to engage anyone for three years and not to fulfil the engagement. There were just a few words in this manner, for I put it in a worse light for myself to him, than I have in this place, because this being an official inquiry, I speak the truth. I made my own case worse; he said you are entitled to compensation, and he sent a note to Mr. Eagar to have the question investigated; I gave the note to Mr. Eagar. Captain Martindale was present, and Mr. Eagar said, "What do you want—do you think Mr. Forster has any authority over me?" this was the second interview with him. "Why should you go to him, he has no authority over my department?" I got a little confused, for I had been to Mr. Eagar before, and he said he would make inquiry, and told me to write officially; but I place no dependence upon these official letters, unless I am engaged in the department. I went to Mr. Forster again, being hard pressed for money, to see if he could enforce my claim as a case of justice; he gave me a note at this time, and said he would see justice done to me, and referred me to Mr. Eagar again; he thought mine was a case that justice would be done. That is what I told you about when I went to Mr. Eagar, and when I went there that is the answer I got. He was going to write an answer to this note, when Captain Martindale took a pen and writes a line on a slip of paper and throws it before Mr. Eagar this way (*describing the action*). Mr. Eagar said, "just so, just so"; in fact they would not even intrust me with the carriage of that note back again. That is all that took place, and then I went to Mr. Parkes and asked him to push this case forward as far as he could.
50. *By Mr. Rotton*: Were you ever regularly articleed to your profession? Yes, I was, to Mr. Knight.
51. I think you stated that you commenced to learn your profession in 1835 or 1836? I think it was in 1835, in a place called Castlebar, County Mayo.
52. What age were you then? About sixteen.
53. And you have been since employed in various capacities as surveyor? Not as a regular surveyor, because I had to go with a surveyor, that is to say the same as if I were articleed, for it should be borne in mind that while I was in the Ordnance I had to go through the different grades that an articleed pupil with a surveyor has.
54. For what period were you articleed? For three years to this Mr. Knight.
55. After having fulfilled your time did you submit to any examination? No.
56. You have never passed an examination? No; because that is not the usual course at home, it is not requisite.
57. I think you stated that when you came out to the Colony you did not enter into the agreement under which you were engaged in England—did you cancel that agreement? I was not under the impression that I did cancel it, but I accepted the proposal made by Colonel Barney.
58. Was this agreement cancelled in any formal way? No. The Surveyor General requested those who intended to join the railway department to send a note to that effect.
59. Have you that note, or a copy of it? No.
60. Do you remember the contents of it—did you in it consent to forego any advantages contained in the first agreement? No.
61. *By the Chairman*: Was anything said to you about foregoing any advantage? No.
62. *By Mr. Rotton*: You accepted this permanent salary of £400 in lieu of this agreement? Yes; thinking we would be entitled to retain this situation for three years; in fact, longer than that we thought.
63. Was there any memorandum of agreement at that time, or any positive promise that you should be retained for three years at this salary? I will give you Colonel Barney's answer when that question was put to him. The question was put by Mr. Oliver, who is employed now. He said, "Will we be kept employed for three years?" Colonel Barney said, "There are more railways to be surveyed in this country than you will live to see—not only will you be kept for three years, but as long as the Government are satisfied with your work." Another gentleman who was present can prove that.
64. There was, then, no positive understanding that you were to be retained for three years, but you engaged under the supposition that there would be plenty of employment, knowing that the Government were much in want of surveyors, and believing that there was not the slightest probability of your being discharged? We heard so then, but I have since heard that, in 1858, the fact was that Government did not know what to do with us.
65. *By the Chairman*: Did it ever occur to you that you would forego your original agreement by this arrangement? No.
66. Did you consider it intact as to time? Yes; so long as I performed my duty and worked honestly.
67. *By Dr. Lang*: You considered employment on railway surveys as part of the general duty of a surveyor in this Colony? Yes.
68. *By Mr. Dickson*: Were you aware that the railway department was dependent upon an annual vote of this House? No, I was not, until I saw Mr. Sanderson's evidence. I there saw that Mr. Hay had put that question. That was the first time I ever knew it. When I had made the agreement I never gave myself any further trouble about it.
69. *By the Chairman*: Were you aware when you arrived here that there was a Legislature which annually voted these moneys—during the time that you waited in Sydney, at the time
of

Mr. J. Malley. of your arrival, did you not learn that there was a Legislature which voted the annual supplies? I knew they passed the Estimates—of course all Governments must pass their
 2 Dec., 1859. Estimates through the House of Assembly; but I did not think my agreement depended upon an annual vote.

70. *By Mr. Rotton:* How was it you arrived at the conclusion that your agreement could be cancelled by a quarter's notice? In consequence of what my solicitor told me; he told me that by accepting the second engagement I cancelled the first—that was the first time I ever heard of it; but he said, "When you did that you were a yearly servant, and the Government must give you a quarter's notice, if you are guided by me."

71. The ground of your dismissal is incompetency? Just as I tell you—he says, "Sir, the Government having taken into account the quality of the work done by you since your arrival in the Colony, together with the report upon your qualification from Captain Martindale," or the Chief Commissioner, I am not sure which, "will not require your services from the 1st January next."

72. Were there any more definite reasons than those given? No; I can produce a copy of the letter, if that is not correct.

73. Are you not aware that there has already been an inquiry by the Government into your case; or is it not the fact that there has been an inquiry by the Government into your case? I am certain there has not since I complained. It is all referred to Captain Martindale, and his report is maintained.

74. What did Mr. Robertson mean when he said he would not interfere with the inquiry made by Mr. Hay—that he would not reverse Mr. Hay's decision? He meant that when Captain Martindale made his report it was sanctioned by the Government, and the Secretary for Lands and Works at the time was the person who sanctioned it, and that, therefore, he could not think of disturbing his decision. But I never received any intimation of this report having been made, until I got this notice.

75. You have, I think, submitted to an examination in this Colony? Yes, I have.

76. And the report has been unfavorable? In the first instance, it appears, I would do; that is my impression.

77. By whom were you examined—by a regularly appointed board, or by Captain Martindale? By Captain Martindale, Mr. Whitton, and another gentleman. There were two examinations in Captain Martindale's office, as well as this examination when the third gentleman was present, and then I was examined by the Board; but that was after I was dismissed, and had written these two lawyer's letters.

78. What was the report of the Board? The report of the Board, at least this is what Colonel Barney stated, that—"from the report of the Board to the Secretary for Lands and Public Works he could not sanction my employment in that capacity." Whatever "that capacity" meant I do not know, for it appeared I was ineligible to perform the duty of a licensed surveyor.

79. Has any of your work been condemned? No.

80. Have you had full charge of the works? Full charge of a portion of the work. Before this we had three separate duties, but we were still together.

81. But these surveys you speak of in your petition—were they conducted entirely under your own direction? Yes, the surveys.

82. Were there any complaints as to the character of the work? No.

83. Was your work approved of? With the exception of this, it was said that the Commissioner found fault with the amount of information given; but when I came down and spoke to Mr. Whitton about it, he said he never found fault with it; that he saw nothing impracticable in the line; but as to the terminus at the Town of Ipswich, there was not enough detail given.

84. Have you ever been employed on any of the railways under the immediate superintendence of Mr. Whitton or of Captain Martindale? No; for Mr. Whitton never had any control over any of the railways that I knew in England.

85. Have you ever done, on account of the Government, any land surveying in this Colony, or have you been exclusively employed in survey for a railroad? That is all in this Colony.

86. You have not been employed under this first agreement? No.

87. It was contemplated in the first instance to employ you as a licensed surveyor upon a scale of fees in measuring lands for sale? Yes.

88. You have never done anything except as a railway trial surveyor? No.

89. You say you are not aware of any inquiry having been made by the Government in your case? I am certain there was not. Captain Martindale himself stated to Mr. Eagar when he was asked had I an engagement for three years, there was no doubt about that. I am certain there was no re-opening of the case before the Executive Council to give me an opportunity of explaining even. I cannot even get a character, though I have applied for it, therefore I cannot get employment in this country, and I am deprived of a living. When I am asked, "Have you a character?" I tell the truth, and say I have not, and of course I cannot get work. They cannot condemn my work; but I drew pay for two years and one month, and when this is added up it is considered a large sum for such a small amount of work; but it must be borne in mind that I was two months in Sydney before I was sent to Moreton Bay, then I was two months exploring, then there were two or three months of wet weather, the creeks rose so much, and the weather was so bad, that I could not do a turn for one month. If these things were to be considered, the work would not look so small; but Captain Martindale, newly in the country, and knowing nothing of these things, came and made a report as to work which he had never been on the ground to look at, or to test at all. He went only on the quantity of work performed.

90. There was no complaint of the quality of the work? No.

91. *By Mr. Dickson* : When you arrived here was it optional with you to accept employment on the staff or on the railway survey? Yes Mr. J. Malley.
92. To fulfil your agreement or to accept employment on railway works? Yes. 9 Dec., 1855.
93. Did you consider that the railway works would afford you better remuneration than the other? At that time I was not in a position to form an opinion, but it was intimated to me that the Governor General would be better pleased if some of the gentlemen would go on the railway survey.
94. Did you consider that the remuneration on the railway works would be better than that which you would receive under your original engagement with the Government? I did then, not knowing what this country was; but since I have been through it I think differently.
95. *By Mr. Rotton* : For what term did you actually serve? Two years and a month; but then we came here on the 24th November, 1855, and we were paid for that month in consequence of our original agreement, which stated that we should be paid from the day of our landing.
96. How long would you have had to serve to have completed the term of your agreement? Eleven months.
97. Does the month you have spoken of include the notice given? There was a month's notice given.
98. Would that term include the month? It was two years on the 24th November, and I got my notice on the 1st December.
99. Did you continue in employment till the expiration of the notice? Yes.
100. Then there were eleven months of your term to run? Yes.
101. *By Mr. Dickson* : When you sent in your claim for a quarter's salary you did not consider yourself entitled to three years' employment under the original agreement? I owed some money in the town and some people wanted it very much, and I thought I would sacrifice a good deal if I could get this amount. I felt satisfied that by making a low claim Government would give it me at once but that they might delay if I sent in a larger one. I intended at this time to go to Melbourne, and that was the reason I sent in a claim for this low amount.
102. *By Dr. Lang* : What was the claim? £238 10s.
103. You considered your employment on the railway survey as quite in accordance with the duties for which you were engaged under the original agreement? I considered that being employed by the Government when I came into this country, I would be engaged for three years. Whatever duties I might be sent to I was still in the employment of the Government, and it did not matter to me what the duty was as I considered that I should be retained for three years.

APPENDIX A.

AGREEMENT made this twenty-seventh day of June, one thousand eight hundred and fifty-five, between John Malley, of Red Lion-passage, Red Lion-street, in the County of Middlesex, Surveyor, of the one part; and Edward Barnard, of Cannon Row, in the City of Westminster, Esquire, Agent General for Crown Colonies, for and on behalf of Her Majesty, of the other part.

WHEREAS John Malley hath been duly appointed a surveyor in New South Wales, on the terms mentioned in the enclosure of the Despatch of the Governor General, dated 20th June, 1854, No. 80, (Executive) and hath received the sum of fifty pounds on account of his contract, with a free passage for himself and wife to the Colony.

Now the said John Malley, in consideration of the premises, doth hereby agree with the said Edward Barnard, that should he the said John Malley relinquish his said appointment as aforesaid, or quit the said Colony without leave, within the period of three years from the date of his arrival in the said Colony, that he the said John Malley will, upon so quitting the said Colony, or relinquishing his said appointment, refund and repay to the Colonial Secretary of the Government of the said Colony for the time being, or to the Agent General for the said Colony in London, for the time being, the amount paid for the passages of himself and wife, and also the sum of fifty pounds advanced to him as aforesaid.

Provided always that nothing herein contained shall bind or oblige the said John Malley to repay the said passage money and fifty pounds if at the time he shall relinquish his said appointment or quit the said Colony as aforesaid, the Colonial Secretary of the Government of the said Colony, or person acting as such, shall certify that he the said John Malley is unable, from bodily or mental infirmity, to continue in the performance of his duty as such surveyor.

Witness our Hands this twenty-seventh day of June, in the year of our Lord, one thousand eight hundred and fifty-five.

Signed by the said Edward Barnard, in the presence of
of J. Payne, 5, Cannon Row.

Signed by the said John Malley, in the presence of
E. F. Carter, 5, Cannon Row, Westminster.

EDWARD BARNARD.

JOHN MALLEY.

APPENDIX B.

Town of Ryde, Surveyor's Office,
31 March, 1855.

I have much pleasure in stating that Mr. John Malley has been employed by me on the survey of this town (comprising about 1,200 acres, and 2,000 houses) for the last four months, and has given me great satisfaction. As he has had almost the entire charge of the survey, and run all the trigonometrical and traverse lines, I have much confidence in bearing testimony to his abilities as an engineering surveyor.

FRANCIS NEWMAN,
Town Surveyor.

Mr. J. Malley.

APPENDIX C.

Dear Sir,
 9 Dec., 1859.

I have written some notes on your plan to tell you that I want you to take into, to this plotting, about 60 chains further towards Pilton, and arrange with Mr. Lindley about it; then send your plotting to London, write to me, and go on to the Star at Wells; you will receive money on Tuesday; you seem to have done your work first-rate—I will remember that another time.

Yours truly,
 R. F. REED.

APPENDIX D.

1, Adelphi Terrace, London,
 31 March, 1855.

Dear Sir,

In answer to your request for a testimonial, I have to say that you have done a good deal of work for us, and have always given us satisfaction, both as to quality and expedition, and I shall always be glad of your services when opportunity offers.

I remain, &c.,
 R. F. REED.

Mr. John Malley.

APPENDIX E.

4, Dix Field, Exeter,
 27 September, 1854.

I certify that Mr. John Malley was employed by me in filling in portions of the surveys of the towns of Dorchester and Exmouth, under the Public Health Act, 1848; and that I found his work correct; and that he is industrious and expeditious in getting through it; and that I should be very glad to avail myself of his services in the same capacity, at a future time, should I require them.

ARTHUR WHITEHEAD,
 Civil Engineer and Surveyor.

APPENDIX F.

(No. 332.)

Metropolitan Commission of Sewers,
 1, Greek-street, Soho.

Mr. John Malley has been upwards of three years in the service of the Metropolitan Commissioners of Sewers; during more than a year of which time he was employed as a house drainage surveyor; his work has been performed in a satisfactory manner. Mr. Malley leaves the department at his own request.

JOS. SMITH,
 Surveyor.

APPENDIX G.

Public Offices, 2, Cornwallis-street,
 Engineer's Department, Liverpool, 31 March, 1849.

Dear Sir,

I am sorry to inform you that the Health Committee will not require your services after the 1st of May next. I sincerely trust that you will have procured other permanent employment ere that time.

Mr. John Malley.

I am, &c.,
 JAMES NEWLANDS,
 Borough Engineer.

APPENDIX H.

Public Offices, 2, Cornwallis-street,
 Engineer's Department, Liverpool, 8 June, 1849.

I hereby certify that Mr. Malley has been employed in the survey of the town of Liverpool, under my direction, for the last 16 months, and is now discharged on account of the completion of the work. He is a good surveyor, and has given me satisfaction by his steadiness and attention.

JAMES NEWLANDS,
 Borough Engineer of Liverpool.

TUESDAY, 13 DECEMBER, 1859.

Present:—

DR. LANG,
MR. LAYCOCK,MR. PEMELL,
MR. ROTTON.

HENRY PARKES, ESQ., IN THE CHAIR.

John Whitton, Esq., called in and examined:—

104. *By the Chairman:* There is a gentleman of the name of Malley who was employed as a surveyor under the Government of this Colony in the years 1855-6, and 7? Ycs. J. Whitton,
Esq.
13 Dec., 1859.
105. Had you anything whatever to do with this gentleman, professionally, when he first arrived in the Colony? I had not; I was not in the Colony at the time of his arrival.
106. You are aware that he was appointed to proceed to the Northern District? Yes.
107. The preliminary surveys made by him were under your department? At the time of his appointment he was under the Surveyor General, and he was only transferred to the Railway Department in 1857, that was the first time I saw him. At the time of the transfer of himself and the assistant surveyors employed to the northward they were all sent for to undergo examination.
108. Had you any opportunity of judging of the work Mr. Malley executed in the Northern District? I had.
109. Will you have the goodness to state the character of his work? I may state that in the first instance I examined Mr. Malley as to the use of the theodolite, and I reported that I found, as to the theodolite, his knowledge was superficial, and as to the level he had scarcely any knowledge whatever.
110. At what period was this personal examination made? I think in September, 1857.
111. This was on his arrival in Sydney from the Northern District? Yes; he was sent for purposely to undergo an examination.
112. Are you aware whether your opinion was communicated to him? I am; I communicated my opinion to him myself. I examined him on his arrival in Sydney, and I gave him my opinion as to the use of these instruments—I saw him on several occasions afterwards.
113. Did this examination occupy more than one day? I examined him one day, and I think Captain Martindale examined him again, and that he was also examined by Sergeant Quodling of the Royal Engineers.
114. Did you report in writing upon his qualification? I do not find that I reported at all in writing, but my opinion was referred to by Captain Martindale in his reports.
115. When you stated you reported that his knowledge was very deficient, I presume that you mean you stated that opinion to Captain Martindale? I did; Captain Martindale was present during the greater portion of the time that he was under examination.
116. With regard to the character of the work—did you examine that afterwards? Yes; I also examined the work at the time, and it was very unsatisfactory—the work done by him.
117. State in what way, so that it may be apparent to the members of the Committee? The work was done in such a manner that we could not join the two surveys together. A large survey was made of either Ipswich or Brisbane, and the two surveys that were made could not be connected.
118. State from what this arose? I have no doubt it arose from their inexperience of surveying generally.
119. Mr. Malley himself states, in his petition to the Legislative Assembly, that he has performed his duties well, in his opinion,—that there had never been any complaint made of his performance of them, and that he was dismissed without the reasons of his dismissal being explained to him? I do not think that is the case, for the sergeant of the Royal Engineers took the whole of his field-books, and examined the whole of his lines, and in his report he says he considers the whole of them valueless. I did not go into the detail myself, as I did not consider it necessary to do so.
120. He sent in a written report? He did.
121. *By Mr. Rotton:* Where is that report? Captain Martindale will produce the report this morning.
122. *By Mr. Laycock:* It seems strange that he should have been kept in the employ so long, and that he should then have been discharged at a month's notice? Mr. Sanderson had charge of the Moreton Bay district, and Messrs. Grogan and Malley were sent there as his assistants. I do not know whether any work was sent by them to the Surveyor General. The first work sent from that district to the Railway Department was in 1857; whether the Surveyor General received any work from them previous to that I cannot say.
123. *By the Chairman (at the request of Mr. Malley):* How often did these surveys not fit—was it Mr. Malley's work which did not fit, or the joining of the two sheets given to him from old surveys from the Surveyor General's office? Where the plans came from I do not know; I know these plans were sent in the surveys from that district, that I attempted to fit them and could not. I was requested by Mr. Grogan or Mr. Malley to do so, and I could not. I do not remember whether Mr. Malley said he got them from the Surveyor General's or not, but I know these plans were sent to the Railway Department, and we could not join them. It is possible Mr. Malley might have received these plans from that office. The details of the work were gone into by Sergeant Quodling.
124. He went into the details of the work? Yes.
125. And sent in a written report? He did.

- J. Whitton, Esq.
13 Dec., 1859.
126. Was it possible for any surveyor properly to condemn that work without going on the ground—without checking it properly with measured lines on the ground? There is no difficulty whatever in checking work, if the field-books are sent in by the surveyor.
127. That is, if the work and the field-book also are good, you can ascertain whether the work has been accurately plotted? Yes; you can only check the work from the books and work sent in; but, if they do not agree, the assumption is that the work is wrong, and that the lines have been altered from the books to make them fit.
128. That assumption would be warranted from the general practice in your profession? It would.
129. *By Mr. Rotton*: From your own knowledge of Mr. Malley, and of the work which has been submitted to you for your inspection, do you believe him to be a competent surveyor—such an one as Government ought to employ on works so important as preliminary surveys for railways? I do not.
130. You do not think him competent to undertake surveys of that kind? I do not; a man who has no knowledge of the adjustment of an instrument is not fit to use that instrument.
131. Do you think him competent to perform the work for which he was originally engaged, as a licensed surveyor, to survey and plot out land for sale? I do not. I believe he has since been to the Surveyor General, who has refused to pass him as a licensed surveyor.
132. Do you belong to the Examination Board? I do not.
133. You merely examined him as one of the authorities of the Railway Department? Yes. All assistant surveyors employed in the Railway Department are examined by me.
134. You do not allow them to perform any work in conducting surveys till they are examined? I do not.
135. Your duty as one of the officers of that department is to submit them to examination? Yes.
136. And you examined him and found him deficient? I found him deficient both in the knowledge of the theodolite and of the level; and any person who professes to be a surveyor, if he cannot adjust an instrument, is not fit to use it.
137. *By Mr. Pemell*: If he had undergone an examination in England he would not have passed? I do not think he would.
138. *By the Chairman*: According to your evidence you passed Mr. Malley through examination as soon as he was transferred to the Railway Department? I did at the first opportunity. I may state that few of the whole number of assistant engineers who were examined at that time understood the adjustment of the level; they had been levelling for more than two years without the slightest knowledge how to adjust the level.
139. *By Mr. Rotton*: How do you account for their having been sent to such important work without its having been ascertained that they were competent to conduct it? I cannot understand how it was. They were examined in England, I believe, previously to their being sent out as licensed surveyors, for which they were originally intended.
140. Mr. Malley told us in his evidence that he had never submitted to an examination before he left home; that in England he had been merely engaged upon testimonials, and he has produced testimonials which speak highly of him? I do not think much of testimonials as a general rule.
141. *By the Chairman*: Will you look at these testimonials (*handing the witness the testimonials produced by Mr. Malley*), and state whether you know anything of the persons signing them. These documents were handed in by Mr. Malley as testimonials he had received from professional men in England? I know Mr. Francis Reed; he is a very good surveyor in England. This can hardly be called a testimonial (*referring to one of the documents*); it is merely an instruction to do certain work, but it does not say how he performed that work. The next one is from the same person, and that does say that Mr. Malley has performed a great deal of work for him.
142. One of them said he had performed his work "first rate,"—that is the word employed? "You have always given us satisfaction," are the words in Mr. Reed's note. The only name I know among these is Mr. Reed, of the Adelphi.
143. *By Mr. Rotton*: Have you had business transactions with Mr. Reed? Yes.
144. Do you know his signature? Yes.
145. You have no doubt that the signature is genuine? It is the signature of Mr. Francis Reed, Mr. Reed's son.
146. *By the Chairman*: You have no doubt of the genuineness of the documents? Not the slightest.
147. (*At the request of Mr. Malley.*) Was the work replotted by any one besides Sergeant Quodling? I am not aware that the work was examined carefully by any one besides Sergeant Quodling, but his report says, that he considers the whole as valueless, in consequence of its inaccuracy. I think if a man cannot plot his own survey, he cannot make a survey; and in a number of instances where assistant surveyors are employed in the Ordnance, they never do plot their work. I believe many inaccuracies arise from this practice.
148. *By Mr. Rotton*: You believe Sergeant Quodling to be competent to test the work? I do, undoubtedly.
149. *By the Chairman (at the request of Mr. Malley)*: When you examined Mr. Malley upon the theodolite and level, were there any other persons present? Captain Martindale was present.
150. During the whole time? I am not clear whether any other person was present.
151. Was Captain Martindale there by pre-arrangement or by accident? By pre-arrangement. I went to Captain Martindale's room to examine Mr. Malley on the theodolite and the use of the level.
152. At the time you came into the office, was not Captain Martindale examining Mr. Malley relative to the reading of the instrument; was there not a dispute, and did not you say, "He is right," referring to Malley? I do not remember anything of the kind.

John Robertson, Esq., M. P., examined:—

153. *By the Chairman:* Do you remember any thing of a complaint made to your department by Mr. Malley, one of the surveyors who came out to this Colony in 1855? Yes, I remember Mr. Malley requesting me to re-open a matter that had been in dispute with him and my predecessor in office, and I went into the papers somewhat elaborately, and thought I saw no reason to change the decision of my predecessor, which was against Mr. Malley's claim. J. Robertson,
Esq., M.P.
13 Dec., 1879.
154. Was any report ever made to you of the efficiency of Mr. Malley as a surveyor? My memory of the matter, not having seen the papers for, I think, a year, is this: that Mr. Malley and some other gentlemen were induced to come out to this Colony for the purpose of being employed as licensed surveyors in the public service, to be paid by a system of fees then understood. While he was to have the appointment of a licensed surveyor he was under engagement for employment for three years to be paid by a system of fees. He preferred to abandon that position, and to take a higher one, namely, one on which he was to have a permanent salary of £400 a year, and £400 a year for allowances, and to hold it permanently during good conduct, in fact. In that view by accepting this permanent office he abandoned his position as a licensed surveyor, and his claim for three years employment. He then was employed on the railway works, and my predecessor dismissed him for incompetency. When Mr. Malley applied to me to have the matter reconsidered I called for the report, if my memory serves me arights, from the Chief Commissioner—whether the report came formally I am not quite sure—and it was clear that nothing was to be said in favor of Mr. Malley, that he could not be employed on railway works for what was alleged to me, his incompetence. Mr. Malley then applied to me subsequently for employment as a licensed surveyor, and as we wanted licensed surveyors at the time, indeed we were always short of licensed surveyors, I thought it was very desirable, if he were competent for that duty, that he should have employment. I caused an inquiry to be made by the Surveyor General to ascertain whether or not Malley was capable of doing that duty, and received a rejoinder that he certainly was unfit, so that the whole matter seemed to be just in this position, that we could not employ him. Then Mr. Malley demanded some compensation for not having been employed for three years according to the terms of his first agreement. It seemed to me first, that he had abandoned this agreement by going into a higher position at a higher salary, with permanent employment during good behaviour; and second, that he had not the least claim upon the public for employment, as the report from the Surveyor General warranted me in dismissing him for incompetency, even if he had not already been dismissed. Under these circumstances I could not see my way to recommend the Government to employ him, or to give him compensation. I should say that during the time this matter was under consideration Mr. Malley intimated that he was of opinion he had some legal claim. The opinion of the Crown Law Officers, however, was taken, and was entirely against his claim. That is all I know of the case.
155. *By Mr. Rotton:* Can you explain how it was that Mr. Malley was not subjected to an examination before he was put on work at all? That was before my time.
156. He seems to have been employed for two years before he was found to be incompetent? The reason of that is obvious. The policy of the previous Government was to send to England for men; they sent to some office, or to some departmental people there, to select these; and when they arrived here, they were in the position of having been selected, and, therefore, were not examined. During my time we always examined every person who was taken into the Survey Department. Every candidate for employment went through a strict examination. These gentlemen arrived in the Colony in 1855, and I took office in 1858.
157. You said you were disposed to give Mr. Malley employment as a licensed surveyor, did you then order any examination? I am not sure he went through an examination, but I am perfectly clear that there was a report that he was unfit for the duty.
158. Was that report from the Examination Board? It was from the Surveyor General, I presume; it was made by the chief draftsman and Mr. Thomson, who formed the Examination Board; but I have not the papers here to refer to.
159. *By the Chairman (at the request of Mr. Malley):* Did Mr. Malley, at any time during his intercourse with you, request you to submit his case to the Crown Law Officers? I cannot say, but I think the idea might have arisen in conversation with Mr. Malley; but his case was submitted to them; and their opinion will be found among the papers.
160. Did you ever hear that Mr. Malley sent a lawyer's letter to the Government? Yes, I think he did.
161. *By Mr. Rotton:* I suppose that would necessitate an application to the Crown Law Officers? Yes.
162. *By the Chairman (at the request of Mr. Malley):* These letters, placed in my hands by Mr. Malley, purport to have emanated from your office, when you were Secretary for Lands and Public Works,—will you be so good as to look at them, and state whether they were written by your direction? They were. (*Vide Appendix.*)
163. There is no statement made in either of these letters that Mr. Malley's case had been referred to the Crown Law Officers? No.
164. It appears to me that, if such reference had been made, it would have been stated; that you would not have said, as you have in your later letter, that you were not prepared to open the case, but would have given the opinion of the Crown Law Officers? I do not see that I should.
165. *By Mr. Rotton:* You have referred to the decision of the Executive Council—? The decision of the Executive Council was given before I took office; I only declined to submit the case to the Executive Council again, because I saw no sufficient reason.
166. *By Mr. Laycock:* It appears a long time to have allowed an inefficient person to receive Government

J. Robertson, Government pay? So it was, but it was before my time. I may state that it is highly improbable that the letters produced are the only ones that have been written to Mr. Malley, and the only way to obtain information as to what letters were written to Mr. Malley is to call upon the Under Secretary for Lands to produce the letter-book.

Esq., M.P.
13 Dec., 1859.

APPENDIX A.

*Department of Land and Public Works,
Sydney, 28 September, 1858.*

Sir,
I am directed to acknowledge the receipt of your application dated the 20th instant, for compensation for alleged loss of office, or re-employment in the Government service; and to inform you that the same has been referred to the Chief Commissioner of Railways for his Report.
2. As soon as the necessary information has been obtained a further communication will be made to you.

I have, &c.,
MICL. FITZPATRICK.

Mr. J. Malley,
13, Margaret-street.

APPENDIX B.

*Department of Land and Public Works,
Sydney, 13 July, 1859.*

Sir,
In reference to your letter of the 23rd May last, to the Honorable the Chief Secretary, respecting your claim to compensation for the loss of your appointment as Government Railway Surveyor, I am directed to inform you that, after due consideration, the Secretary for Lands and Public Works fails to see anything to justify a re-opening of your case as decided upon by the Executive Council.

John Malley, Esq.,
82, Liverpool-street, Sydney.

I have, &c.,
MICL. FITZPATRICK.

Captain B. H. Martindale, R.E., was called in and examined:—

- Captain B. H. Martindale, R.E.
13 Dec., 1859.
167. *By the Chairman:* You are Chief Commissioner of Railways? Commissioner for Internal Communication.
168. When did you commence your duties in the Colony? On the 28th June, 1857.
169. Then you were not in the Colony when Mr. John Malley, a railway surveyor who has positioned the Legislative Assembly, arrived from England? No.
170. You know under what circumstances he came to the Colony? I do.
171. When did he come under your supervision for the first time? The system in operation when I took office was, that though Mr. Malley was employed under the Surveyor General his plans were transmitted to the Commissioner for Railways for inspection; so to that extent he was under the department when I joined.
172. What were your first instructions to Mr. Malley, or what was your first communication to him of any kind? The first communication I had with Mr. Malley was a letter addressed to him on the 21st September, 1857, directing him to proceed to Sydney, to shew his work, and to receive instructions.
173. This would be within three months of your taking charge? Yes.
174. He came to Sydney? No notice was taken of that letter, and I wrote again on the 9th October, 1857, to call his attention to it.
175. What was the result then? I find that on the 29th October, I addressed a letter to Mr. Malley in Sydney, directing him to attend at the office on the next day, from which I presume he had in the interim come to Sydney.
176. Can you state how long he had been employed in the Colony upon surveys at that time? Since November, 1855.
177. What was your object in sending to Mr. Malley? To satisfy myself as to the work he had done, and as to his competency for doing further work.
178. When he attended at your office what took place? When he attended at my office I examined him personally as to his knowledge of the theodolite, and Mr. Whitton, the engineer-in-chief, examined him in my presence as to his knowledge of levelling. The conclusion I came to I reported to the Government in these words—"Mr. Malley has a very slight acquaintance with the use of the theodolite, and a superficial knowledge of the level, he is an indifferent draftsman, and I cannot recommend the Government to retain him in their employment. I venture to suggest that he should, however, receive at any rate the allowances and salary above-named to the end of the present month and year respectively."
179. Is that a report upon his qualifications as a surveyor generally, or as a railway surveyor? This was a report upon the qualifications of several.
180. What is the date of that? The 5th November, 1857.
181. This was written in consequence of your examination? In consequence of my examination. I subsequently referred Mr. Malley's work to Sergeant Quodding of the Royal Engineers, who is a man of great knowledge in survey matters, and I received a report from him that Mr. Malley's work was useless. I have that report here. These are the words of the final portion, "I beg to submit my candid opinion that the whole of the work is valueless."

182. That passage in the report refers to Mr. Malley's work? It refers to Mr. Malley's work; Captain B. H. Martindale, R. E. it also refers I think to the work of another gentleman, but perhaps I had better not mention his name.

183. In Sergeant Quodling's report is there any other reference made to Mr. Malley? I think not. 13 Dec., 1859.

184. Did you communicate with the Government as to the legality of discharging Mr. Malley, inasmuch as he had engaged in England with the Colonial Agent, who acted on the part of the Government of this Colony, to be continued in the public employment for three years? I did.

185. Be kind enough to state the result of that communication? The report is dated 5th November, 1857, it is the same as the one I have alluded to before:—"Sir, I have the honor to inform you that I recently recalled Mr. Malley from Ipswich, for the purpose of examining the work he has done, and his qualification for the proper performance of it; and I regret to say that the inquiry has not proved at all satisfactory. This person has been employed in this Colony as a railway surveyor since November, 1855, and he has lately been attached as such to this department. He was engaged in England in 1855 as a licensed surveyor, for the term of three years from his landing in the Colony, and was to be paid according to a fixed scale of rates. Under this engagement he would have had a claim for employment until November, 1858, but upon his arrival here he cancelled his original contract, and accepted salaried employment as an assistant railway surveyor, at a fixed salary of £400 per annum, with £400 a year in lieu of equipment, chainmen, travelling and all other expenses whatsoever, and in the papers I have seen there is no guarantee that this employment should be for any fixed period, but it may be reasonably doubted whether it was not the intention at the time, that the engagement should be binding on both sides, for the same period as that originally made. Such is the view taken by the surveyors, who contend that not only is the salary of £400 a year guaranteed to them for the above-named period, but also the allowance of £400 a year in lieu of equipment. I need not trouble you with my own idea upon this point, because the authority who made the agreement can better inform you what the full intention of it was, and what it will be just to do in terminating it; but my opinion is that it would be most unadvisable to continue to employ this party in the manner he has hitherto been, or at the salary he has hitherto enjoyed, if it can be avoided with justice." The result of that was that the Governor and Executive Council approved of the recommendation in this letter, that Mr. Malley's service should be dispensed with, he being paid the full allowance to the end of the month—that was the month of November, and his salary to the end of the year. The communication to that effect did not reach me till, I think, the 23rd November, and I then wrote to the Secretary for Lands and Works, recommending that, as that period had elapsed, Mr. Malley's allowance should be continued to the end of the year, as well as his salary, with a view of giving him time to dismiss his men, and make his arrangements. That was sanctioned by the Government.

186. Are you aware whether the opinion of the Crown Law Officers was taken upon the legal question? The opinion of the Crown Law Officers was taken subsequently.

187. Have you a copy of that? I have.

188. Is that opinion concurred in by more than one of the Crown Law Officers? It is the opinion of the then Solicitor General only.

189. Will you hand in a copy of this opinion? I will. (*Vide Appendix.*)

190. Mr. Malley himself, when he gave evidence before this Committee, stated very distinctly that he and the other surveyors, when they consented to go on the railway survey, were not under the opinion that they, in any way, relinquished that part of their original agreement which related to time; are you aware whether that was the impression of the Surveyor General when the alteration was made in their manner of employment? I made inquiries of the Surveyor General, who stated that he, as well as Mr. McLean and Mr. Halloran, were under the impression that the new arrangement then made was for the same term as the original agreement, namely, for three years, and at yearly salaries. The arrangement appears to have been a verbal one.

191. *By the Chairman (at Mr. Malley's request):* You state that Mr. Malley's knowledge of the theodolite is very deficient, and his knowledge of levelling superficial; has there been any fault found on the ground, has it been examined on the ground, or have you received any report that the work is inaccurate, besides that of Sergeant Quodling? The work has not been examined on the ground, but it is not necessary to do this to ascertain whether a person is acquainted with the use of instruments or not.

192. Sergeant Quodling examined the field-books? He did, and the work and plans.

193. I understand if the field-books are kept properly they accurately represent the work, and that the work can be judged by the field-book, if no error is committed? All errors can be detected by an indifferent party plotting the field-books.

194. *By Mr. Rotton:* I understand, from your last answer to Mr. Parkes, that it is not necessary to examine the work on the ground, in order to test the work? It is not necessary; it might be necessary in some matter, where the field-books failed to satisfy the examiner.

195. *By the Chairman (at the request of Mr. Malley):* In a case like that of Mr. Malley, where, after a personal examination of a surveyor, you are satisfied of his want of competency, do you consider it necessary to ascertain, by examination on the spot, the character of his work? I do not consider it necessary. It is evident that if the party employed is ill acquainted with the instruments he has to use, no reliance can be placed upon his work, and as Mr. Malley could not explain to the engineer-in-chief, in my presence, how to adjust a level, I was perfectly satisfied that his levelling could be of little or no value.

196. *By Mr. Rotton:* I think I understood you just now to say that although when Mr. Malley first came out he was under the orders of the Surveyor General, still his work was submitted to your inspection? To the inspection of the Railway Department.

- Captain B. H. Martindale, R. E.
13 Dec., 1859.
197. Is it not usual for surveyors to send in periodical reports of their work? It is.
198. How was it then that he was allowed to remain two years and a month in employment before his incompetence was discovered? It occurred before my arrival in the Colony, and I am not prepared to say how it happened. I took the matter in hand within a very few weeks of assuming office myself, and I am not aware why it was not taken up before.
199. *By the Chairman:* Had you ever any complaint against Mr. Malley personally for impropriety of conduct? No.
200. For neglect of duty? No.
201. Drunkenness? No.
202. Or for want of any of those qualities necessary for the due performance of his duty? No.
203. You have had no complaint except as to his want of efficiency? I scarcely could have had a complaint, because although my duties in the Colony commenced on the 28th June, I did not regularly enter into the subject of these surveys till about the period when this examination began; but I had no complaint of any kind. I think I had a general report from the engineer-in-chief of being dissatisfied with the work of Mr. Malley, but it was very general.
204. Of course you admit that when engagements are entered into, whether with men belonging to a profession, or to other persons, there may be cases where there are grounds of dissatisfaction, which grounds are not so great as to justify dismissal or the termination of an engagement, although sufficient to prevent the renewal of an engagement? It may be so.
205. In a case where duties of so responsible a character as those which this gentleman had to perform were involved—the survey of a line for an important railway—do you think that his inefficiency, which you consider was proved, sufficient justification for dismissing him? I do, because if the work is not accurate it is worse than valueless, as it leads to serious miscalculations, which may greatly affect the construction of a railway.
206. Supposing the Law Officers of the Crown had given it as their opinion that the engagement was good for three years, should you still have adhered to the opinion that Mr. Malley ought not to be employed on that work? Yes.
207. Even if Government had had to pay him compensation for the remainder of his time? Yes. I should wish in addition to state, that Mr. Malley has been since examined for a licensed surveyorship, and was unable to pass his examination.
208. When was that? That was in the spring of 1858, some two or three months after he was dismissed by the Government. I am not aware of the exact date, but I am aware of the fact.
209. Before whom was he examined? I believe, before Mr. McLean, the present Acting Surveyor General.
210. *By Mr. Rotton:* Is there not a regular Board for the examination of those who seek to be admitted as licensed surveyors? I am not aware.

APPENDIX.

COPY opinion of Mr. Solicitor General Lutwyche on the case of Mr. Malley.

1. I think that the removal from the public service of Messrs. ——— and Malley may be legally carried out, pursuant to the recommendation of Captain Martindale, as adopted by the Executive Council. In every contract for the performance of work, the law implies, on the part of the person undertaking it, an engagement that it shall be performed with due care and skill; and incompetency to discharge the duties of a particular employment appears to afford a reasonable ground for dismissal, without previous warning, even although the duration of the employment has been made one of the terms of the contract. Authorities are not wanting to shew that habitual neglect of duty will justify an instantaneous dismissal; and it seems to make no difference, in point of principle, whether the neglect is evidenced by an indisposition, or by an incapacity, to perform the service. The recent case of *Andrews v. Lomax*, 24 Law J. Exch. 80. is in unison with the view here taken.

2. In expressing the foregoing opinion I have assumed that the letter of the 26 November, 1855, in which the surveyors agree to the cancellation of the contract made in England, does not contain any special conditions which would take the case out of the operation of the general rule of the law.

That letter, though more than once applied for, has not yet been forwarded; but, as I understand that an immediate opinion is desired, I have written the above, subject to any change which the perusal of that letter, when brought under notice, may render necessary.

1 January, 1858.

ALFRED P. LUTWYCHE,
Solicitor General.

Mr. John Grogan called in and examined:—

- Mr. J. Grogan, 13 Dec., 1859.
211. *By the Chairman:* You are a surveyor? Yes.
212. Are you engaged in that capacity at the present time? Not at work.
213. You were engaged in England in the year 1855 to come out to this Colony as a surveyor? Yes.
214. On your arrival here were you ordered by your superior officer to the Northern District? Yes.
215. Were you ordered upon the same work as John Malley? Yes.
216. How long were you there? Short of two years, I think, not much.
217. Did you return to Sydney at the same time as Mr. Malley? I did.
218. Can you state to the Committee whether, in your opinion, Mr. Malley performed his work in a strictly professional and satisfactory manner? My opinion is that he did.
219. You were engaged upon the same work, and had opportunities of witnessing his performance of it? Yes, sometimes.
220. You left the public service some time ago? I did not leave the public service, but I was not at work.
221. Do you then consider that you belong to the public service now? I do.
222. You have not been engaged at any other service? Not at work, no, not at work.

SELECT COMMITTEE ON GRIEVANCES.

223. When was it you ceased ;—I hardly understand you ; you say you still belong to the public service, but you have not been at work,—how long have you belonged to the public service without being at work ? Better than two years. Mr. J. Grogan.
13 Dec., 1859.
224. Are there many more in the public service at this time who are not at work ? I cannot say ; there may be.
225. Do you get a salary ? I have not been paid now for the last two years.
226. How much do you consider you have to draw ? Well, I really cannot say. I supplied my accounts some time ago up to a certain time ; I was not paid since.
227. Are you aware that the Commissioner for Internal Communication found fault with Mr. Malley for want of competence in the performance of his work ? I was given to understand so.
228. Are you aware that Mr. Malley underwent an examination as to his knowledge of his profession ? I understood he did.
229. Did you undergo any examination ? I did.
230. Was Captain Martindale satisfied with your knowledge of your duties ? It would seem that he was ; he might find a little fault.
231. What was the evidence that he was satisfied ? It would seem he was very well satisfied ; he might differ a little in my opinion or suggestions.
232. However, in your opinion, Mr. Malley's work was properly executed during the time he was under your observation ? That is my opinion.
233. You do not wish to make any observation upon the manner in which his work was performed ? My opinion is that it was well performed.
234. *By Mr. Rotton :* You stated that you considered yourself still in the employment of the Government,—how is it then that you are not kept at work ? Really, I could not say ; I was instructed by the Surveyor General that I would be sent for when work would be prepared.
235. Are you not one of the surveyors who came out under the same arrangement and at the same time as Mr. Malley ? Yes.
236. Is it not the fact that you have received notice of dismissal from the Government ? No.
237. Have you not in similar terms to those received by Mr. Malley ? No. I do not know. Dismissal !
238. *By the Chairman :* You are not aware that a case was submitted to the Law Officers of the Crown, in which your name was included, as to whether persons engaged for three years to act in the Colony as surveyors, if found to be incompetent for duty, could be dismissed without notice, and that the Crown Law Officers gave it as their opinion that they could ? I am not aware.
239. Such an opinion has been handed in by the Commissioner for Internal Communication, and includes your name ? I am not aware.
240. *By Mr. Rotton :* Have you not been in any manner informed that your services would not be required by the Survey Department ? No ; not officially.—No, I was not ; I was never discharged ; I was engaged for three years.
241. Mr. Malley states in his petition that he received notice of dismissal from the 1st of January, 1858, and from other evidence which has been given here, it appears that other surveyors were included in that notice—that your name was amongst them—is it not the fact that your name was included ? No ; I was not aware of it.
242. You are not aware of any complaint having been made against yourself for incompetency ? No ; there might have been.
243. *By Mr. Pemell :* The three years you refer to would have expired on the last day of November last year ? The 24th of November.
244. *By the Chairman (at the request of Mr. Malley) :* You are aware that you were offered employment by Capt. Martindale, at £250 a year, with actual field expenses ? —
245. Did Mr. Malley bring you a letter containing that proposal from Capt. Martindale ? Yes.
246. Did you pass an examination and receive instructions to remain in town until your work would be prepared ? Yes.
247. Have you, since the expiration of your term of three years, sent your claim to the Government ? Yes.
248. What did the Government say when you applied for payment ? That the Government were not satisfied to pay.
249. *By Mr. Rotton :* Were no grounds given ? No.
250. Do you know their reasons for not paying you ? No.
251. They merely stated that they were not satisfied to pay ? Yes.
252. *By Mr. Laycock :* That they considered you were not entitled to payment ? Yes, something to that purport.

Mr. John Malley further examined :—

253. *By the Chairman :* You stated in your former evidence that you are £38 out of pocket on account of having had to keep your staff beyond the time for which you received payment from Government ? Yes. I have a copy of the bill sent to the Government, and that claim is included in it. Mr. J. Malley.
13 Dec., 1859.
254. Did that arise in this way—that at the time you received notice of dismissal you had your staff at Moreton Bay, and that you had not sufficient time to dismiss your staff without incurring this expense ? That was the cause of it.
255. *By Mr. Rotton :* In point of fact, you received your salary and allowances a month after you were dismissed ? Yes, up to the end of the year.
256. *By the Chairman :* Do I understand this : that though you received a month's proportion of your allowance, still you had to pay that away to your staff during that month, and over and above that were out of pocket ? Yes, before I could break up my establishment and pay off my men it was the end of January. I had to keep them till that time.

Ordered to be printed.
-

1859-60.

GRIEVANCES.

(PETITION OF JOHN MALLEY.)

PROGRESS REPORT.

THE SELECT COMMITTEE appointed on 6th December, 1859, "*to inquire into and Report upon the allegations contained in the Petitions of John Malley and others,*" have agreed to the following Progress Report:—

Your Committee have, in the first place, directed their attention to the case of the Petitioner, John Malley, and in the course of their inquiry have taken the evidence of several witnesses, including Captain Martindale, Mr. Whitton, Mr. Robertson, the late Secretary for Lands and Public Works, and the Petitioner himself.

Mr. Malley was engaged by the Colonial Agent in London in June, 1855, to proceed to this Colony as a surveyor, under an agreement for three years from the date of his arrival. He was employed from January, 1856, till October, 1857, on preliminary railway surveys in the Northern District, under terms of remuneration quite different from those of the original agreement; but this alteration does not appear to have been intended by either party to affect the period of engagement. After the arrival of Captain Martindale, Mr. Malley was ordered to report himself in Sydney, when his professional ability was tested by certain examinations under the direction of this officer, which resulted in his dismissal from the public service on the 1st of January, 1858, when more than twelve months of his engagement were unexpired.

Mr. Malley has placed before your Committee testimonials of his professional competency, in the performance of survey works in England, from several respectable persons; and he appears to have been engaged on the strength of these testimonials. And no unfavorable report on his work actually performed in this Colony has been made. The evidence of Captain Martindale and Mr. Whitton goes to shew, however, that his professional knowledge was found to be so imperfect, that, in the opinion of these gentlemen, he was unfit for employment; and though Mr. Malley had repeated opportunities to prove his competency, by examinations, he did not succeed in establishing it.

Under

Under these circumstances, and considering the admissions made by the Petitioner himself, your Committee has arrived at the conclusion that Mr. Malley's removal from the public service does not call for the interference of your Honorable House; but Mr. Malley states that in breaking up his staff at Moreton Bay, which he could not do for some time after his dismissal, he incurred a pecuniary loss in direct payments to his men of £38 10s. in excess of his allowances from the Government, and your Committee is of opinion that Mr. Malley is in equity entitled to the reimbursement of this sum.

Your Committee therefore respectfully submit their opinion on this point to your Honorable House, with the hope that Mr. Malley's claim in this particular may be referred for the consideration of the Government.

HENRY PARKES,
Chairman.

LEGISLATIVE ASSEMBLY.**

VOTES No. 9. WEDNESDAY, 14 SEPTEMBER, 1859.

9. Mr. C. F. Gorton:—Mr. Wild moved, pursuant to *amended* notice,—
- (1.) That a Select Committee be appointed to inquire into and report upon the dismissal of Mr. C. F. Gorton from the Survey Department, with power to send for persons and papers; and that all papers laid upon the Table of the House at the close of last Session in reference thereto, and the Minutes of Proceedings and Evidence taken before the Select Committee of Session 1858, on the Management of the Survey Department, be referred to such Committee.
- (2.) That such Committee consist of Mr. Murray, Mr. Macleay, Mr. Flood, Mr. Douglas, Mr. Morris, Mr. Jenkins, and the Mover.
- And Mr. Robertson requiring that the proposed Committee be appointed by Ballot,—
- Question—That a Select Committee be appointed to inquire into and report upon the dismissal of Mr. C. F. Gorton from the Survey Department, with power to send for persons and papers; and that all papers laid upon the Table of the House at the close of last Session in reference thereto, and the Minutes of Proceedings and Evidence taken before the Select Committee of Session 1858, on the Management of the Survey Department, be referred to such Committee,—put and passed;—
- Whereupon, the House proceeded to the Ballot, and the Speaker declared the following Members to be, with the Mover, the Committee duly appointed, viz.:—Mr. Murray, Mr. Douglas,* Mr. Flood,† Mr. Macleay, Mr. Morris, and Mr. Scott.

* Seat vacant, 29 November, 1859.

† Seat declared vacant, 30 September, 1859.

VOTES No. 37. TUESDAY, 6 DECEMBER, 1859.

21. Mr. C. F. Gorton:—Mr. Wild moved, pursuant to notice, That the following Members be added to the Committee on the case of Mr. C. F. Gorton, viz.:—Mr. Jenkins, Mr. Harley, and Mr. Nott.
- Question put and passed.

VOTES No. 82. THURSDAY, 19 APRIL, 1860.

3. Mr. C. F. Gorton:—Mr. Wild, as Chairman, brought up the Report from, and laid upon the Table the Minutes of Evidence taken before, the Select Committee appointed on 14th September last on the case of Mr. C. F. Gorton.
- Ordered to be printed.

VOTES No. 83. FRIDAY, 20 APRIL, 1860.

2. Question of Order (*Mr. C. F. Gorton*):—Mr. Wild, adverting to the Report and Evidence in the case of Mr. C. F. Gorton, presented by him to the House yesterday, (*as recorded in Entry No. 3 of Votes and Proceedings No. 82*), stated that that Report, although concurred in individually by Members of the Select Committee, had, from inadvertence on his part, neither been submitted to the Committee in its collective capacity, nor entered upon the records of its Proceedings.
- Mr. Wild, therefore, moved (with reference to the principle laid down in Bourke's Precedents, page 111,) that he have leave to withdraw the said Report and Evidence.
- Question put and passed.
- Mr. Wild then moved, That the order for printing the said Report and Evidence (*recorded in the said entry*) be rescinded.
- Question put and passed.

VOTES No. 88. TUESDAY, 1 MAY, 1860.

3. Mr. C. F. Gorton:—Mr. Wild, as Chairman, brought up the Report from, and laid upon the Table the Proceedings of, and Minutes of Evidence taken before, the Select Committee on the case of Mr. C. F. Gorton.
- Ordered to be printed.

DISMISSAL OF MR. C. F. GORTON.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 14th September, 1859, "to inquire into and report upon the dismissal of Mr. C. F. Gorton from the Survey Department," and to whom at the same time were referred "all papers laid upon the Table of the House at the close of last Session in reference thereto, and the Minutes of Proceedings and Evidence taken before the Select Committee of Session 1858, on the Management of the Survey Department," have agreed to the following Report:—

Your Committee, after carefully considering the circumstances surrounding this case, and after taking the evidence hereunto appended, are of opinion that the justice of this case would have been met by the payment of Mr. Gorton's salary up to the 31st December, 1858.

Your Committee also wish to express a hope that Mr. Gorton's dismissal from his situation, as clerk in the Survey Office, may not, under all the circumstances, be regarded as a bar to his re-employment in the Government service.

WILLIAM V. WILD,
Chairman.

Legislative Assembly Chamber,
Sydney, 1 May, 1860.

PROCEEDINGS

PROCEEDINGS OF THE COMMITTEE.

FRIDAY, 30 SEPTEMBER, 1859.

MEMBERS PRESENT :—

Mr. Wild,		Mr. Douglas,
Mr. Macleay,		Mr. Morris.

W. V. Wild, Esquire, called to the Chair.

The Clerk, by direction of the Chairman, read the resolution of the House, appointing the Committee.

Petition of Mr. C. F. Gorton read.

Committee deliberated on the course to be adopted in inquiring into the allegations contained in the said Petition, and

Resolved,—That the Petitioner be summoned to give evidence at the next meeting.

[Committee adjourned.]

WEDNESDAY, 19 OCTOBER, 1859.

MEMBERS PRESENT :—

Mr. Morris,		Mr. Wild.
-------------	--	-----------

There not being a Quorum present, no meeting of the Committee was held this day.

TUESDAY, 13 DECEMBER, 1859.

MEMBERS PRESENT :—

W. V. Wild, Esquire, in the Chair.

Mr. Jenkins,		Mr. Morris.
--------------	--	-------------

Mr. C. F. Gorton called in and examined.

[Committee adjourned till Friday next, at Ten o'clock.]

FRIDAY, 16 DECEMBER, 1859.

MEMBERS PRESENT :—

W. V. Wild, Esquire, in the Chair.

Mr. Morris,		Mr. Jenkins.
-------------	--	--------------

A. G. M'Lean, Esquire, *Acting Surveyor General*, called in and examined.

Committee then deliberated upon the tenor of the evidence given on the subject referred to them, and

[Adjourned till Wednesday next, at Ten o'clock.]

WEDNESDAY, 21 DECEMBER, 1859.

There not being a Quorum present at the appointed hour, there was no meeting of the Committee held this day.

TUESDAY, 24 JANUARY, 1860.

MEMBERS PRESENT :—

W. V. Wild, Esquire, in the Chair.

Mr. Morris,		Mr. Jenkins.
-------------	--	--------------

There having been no witness summoned for this day,—

[Committee adjourned till Tuesday next, at Ten o'clock.]

TUESDAY, 31 JANUARY, 1860.

MEMBERS PRESENT :—

W. V. Wild, Esquire, in the Chair.

Mr. Morris,		Mr. Jenkins.
-------------	--	--------------

The witness (J. Robertson, Esq., M.P.) requested to attend this day not being present,—
Committee deliberated upon the advisability of again summoning that gentleman, inasmuch as his evidence might materially assist them in their inquiry, and

Resolved,—That Mr. Robertson be requested to attend at the next sitting of the Committee.

[Committee adjourned till Friday next, at Ten o'clock.]

FRIDAY,

FRIDAY, 3 FEBRUARY, 1860.

MEMBERS PRESENT :—

W. V. Wild, Esquire, in the Chair.

Mr. Morris,

Mr. Hurley.

Mr. Jenkins,

J. Robertson, Esquire, M.P., examined.

Committee deliberated, and

It was *Resolved*,—That the Chairman draw up a Report, to be considered, together with the Evidence as far as printed, at their next meeting.

[Committee adjourned till Wednesday next at *Ten o'clock*.]

WEDNESDAY, 8 FEBRUARY, 1860.

By direction of the Chairman, the meeting of the Committee summoned for this day,—

[Postponed to Friday next at *half-past Eleven o'clock*.]

FRIDAY, 10 FEBRUARY, 1860.

There not being a Quorum present, no meeting of the Committee was held this day.

FRIDAY, 17 FEBRUARY, 1860.

There not being a Quorum present, no meeting of the Committee was held this day.

WEDNESDAY, 22 FEBRUARY, 1860.

There not being a Quorum present, no meeting of the Committee was held this day.

TUESDAY, 28 FEBRUARY, 1860.

MEMBERS PRESENT :—

W. V. Wild, Esquire, in the Chair.

Mr. Morris,

Mr. Macleay.

Committee deliberated.

[Adjourned.]

TUESDAY, 24 APRIL, 1860.

MEMBER PRESENT :—

Mr. Wild.

There not being a Quorum present, no meeting of the Committee was held this day.

TUESDAY, 1 MAY, 1860.

MEMBERS PRESENT :—

W. V. Wild, Esquire, in the Chair.

Mr. Jenkins,

Mr. Morris.

The Chairman laid before the Committee a Draft Report.

Draft Report read, and certain Amendments made therein.

It was *Resolved*,—That the Report, as amended, be the Report of this Committee. Chairman requested to report to the House.

LIST OF WITNESSES.

. **Legislative Assembly.**
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

MR. C. F. GORTON'S CASE.

TUESDAY, 13 DECEMBER, 1859.

Present:—

MR. MORRIS,

MR. WILD.

MR. JENKINS,

W. V. WILD, ESQ., IN THE CHAIR.

Mr. Charles F. Gorton called in and examined:—

1. *By the Chairman:* You petitioned the Legislative Assembly for redress in a certain matter? Yes.

2. Will you tell the Committee, as briefly as you can, under what circumstances? Because I found I had been dismissed on account of my having been examined for evidence before a Select Committee of the Legislative Assembly upon the management of the Survey Department.

3. You were summoned to attend that Committee? I was summoned by the Chairman, and although during the examination I was told by the examiners that I should suffer no loss or detriment on account of any evidence I might give, I was afterwards dismissed.

4. How do you prove that it was in consequence of your examination before the Committee that you were dismissed? Colonel Barney submitted for the consideration of the Minister of Lands and Works certain of my letters, which he considered improper, and the Minister for Lands finally decided in this matter in his blank cover Memorandum of the 31st of July, 1858. I was to remain at the same salary without promotion if I withdrew the correspondence, which I did. I considered, however, that I had a right to take advantage of the permission granted under the blank cover memorandum to the effect, that I should put my case in a more temperate style. This I did.

5. What was the effect of this Memorandum of the Surveyor General—that you were not to receive promotion, but remain in the office under the same circumstances as before? Yes; that is, that the gentleman recommended for promotion should be put over my head.

6. Did you withdraw the correspondence? I did; and requested the Minister not to consider my correspondence as having been written, in a sufficiently temperate style, and begging him to give my case re-consideration, as one of great hardship. The Surveyor General then pointed out to the Minister for Lands and Works my gross insubordination, in having been examined before a Select Committee of your honorable House; and I was then dismissed without further hearing.

7. How do you know that on account of your having given evidence before this Committee you were dismissed? Because there was nothing else. The Surveyor General notified to me that any communications I had to send to the Minister for Lands and Works must not be sent direct to that gentleman, but through him (the Surveyor General); but only when the Estimates providing for the department were about to be passed, did I again communicate with the Minister. I found that my letters to him through the Surveyor General

Mr. C. F.
Gorton.

13 Dec., 1859.

Mr. C. F. Gorton. would be detained in the office until they were too late, and I sent copies of them to the Secretary for Lands and Works.

13 Dec., 1859. 8. Was that the only other time you were reported? There was no other complaint but with respect to this application for promotion.

9. How long have you been in the Surveyor General's Office? About six years and a half, up to the time I was dismissed.

10. Has your dismissal from the Survey Office occasioned you any loss besides the loss of salary? Yes; the stigma cast upon my character has prevented me from obtaining employment elsewhere.

11. Have you had no employment since your dismissal? I have had no employment since then, except a little during the elections; and my family have suffered very much. I have lost my life insurance for £300, because I could not pay up the interest. I was insured in the Mutual Provident Society.

12. Did you and Mr. Halloran, the chief clerk in the office, have any correspondence on the subject of your dismissal? No, sir.

13. Or as to the fact of your having given evidence before a Select Committee? Mr. Halloran mentioned it as an instance of insubordination that I did not apply to the Surveyor General for permission to attend on summons.

14. You did apply to the Surveyor General for permission? No; I applied to the chief clerk, as his subordinate.

15. One question you have not answered fully—how do you prove, after all, that your dismissal was owing to your having given evidence before the Select Committee? Because it was delivered under blank cover of the 21st of September.

16. Did no correspondence of an angry character pass between you and the Surveyor General? None; but a request asking him to take into re-consideration my extremely hard case, and also to take into consideration the Minister's Minute.

17. *By Mr. Morris:* Is the insubordination here alluded to in effect the addressing of letters to the Chief Secretary instead of to the Surveyor General? Not that exactly.

18. I will call your attention to the paragraph (last but three on the tenth page) of a letter from the Minister for Lands, dated the 27th of August, which states that "Mr. Gorton's continued transmission of letters direct to myself, notwithstanding it having been frequently pointed out to him that they should be sent through the head of his department, is in this last letter peculiarly blameable, for I am assured by Mr. Fitzpatrick that he warned Mr. Gorton of the proper mode of action in this matter, and that he nevertheless persevered." Is not that the substance of the complaint made against you? I do not think it was; another clerk in the office forwarded a letter to the Minister for Lands and received promotion, no notice having been taken of it.

19. Is it because you removed from the office, without permission, an original document, in order that you might give evidence upon it before the Select Committee? I do not know that I ever did so.

20. Have you not read Mr. Robertson's memorandum of the 27th August? No. I think the memorandum refers to an original document which Mr. Halloran wrote to me when I was put in possession of the branch department; it was a private memo: stating that he would hold me personally responsible for the management of the letter branch; I kept that document, and gave it to Mr. White.

21. *By the Chairman:* That is what is called an original document in the Minute of the Secretary for Lands? I suppose so; but it belonged to me, and I considered it my private property.

22. Would it be contrary to order to carry it out of the office? No.

23. Will you be kind enough to look at that memorandum signed "H. Halloran," and dated the 19th of August, 1857—is that a copy of the original document referred to in the Chief Secretary's memorandum? Yes. That certainly belongs to me, and not to the office.

24. Would you be kind enough to state what possible bearing it could have upon the inquiry into the management of the department? Because it was stated in the evidence of Mr. Halloran that there were three branches in the department; I said seven. Mr. Forster asked me how I proved that there were seven; I said, if you refer to the document sent in to the Retrenchment Committee, you will see that there are seven; I was the seventh in charge.

25. *By Mr. Jenkins:* How was it the Select Committee chose you as a witness in the first instance? I called upon Mr. White, the Chairman, who is a friend of Mr. Robertson's, and I went to Mr. Dark, and asked him to speak to Mr. Robertson in my favor. He asked me if I had any objection to give evidence before the Committee; I said I had been six years and a-half in the department, and therefore had had some experience in it; and he said he would summon me.

26. *By the Chairman:* Have you anything further to state in reference to this matter? Nothing more than to point out that I was allowed to retain my appointment before Colonel Barney pointed out to Mr. Robertson that I had been examined before the Committee.

27. It was after the withdrawal of this correspondence that you were allowed to retain your appointment? Yes. Mr. Robertson said it would be necessary for me to withdraw that letter, and I did so.

28. How long after this was it that you were dismissed? I wrote a letter the following morning, and in forwarding this letter to the Secretary for Lands the Surveyor General called attention to my insubordination in having been examined before a Select Committee.

29. Then you were dismissed on the remaining act? I was dismissed on the remaining act.

30. *By Mr. Morris:* I understand you to say that it is the practice in the Surveyor General's Office that if any officers in the department have any communication to make to the Chief Secretary

Secretary that they must not address them to him direct, but only through the Surveyor General? Only through the Surveyor General; unless you find your letters were being detained, that would be the regular course. My letters were detained three weeks, and it was only when the Estimates of the department were being dealt with that I communicated with the Chief Secretary, because the letters if detained after that date would be too late.

31. *By the Chairman*: How long were they detained? They were detained seven days.

32. *By Mr. Jenkins*: Notwithstanding that Colonel Barney did not dismiss you, Mr. Robertson recommended your dismissal? That is it.

33. The usual practice is to pass letters to the Chief Secretary through the head of the department? Yes. But when Mr. Hay was there we were allowed to appeal to him.

34. Did you pass any letters previously? I did not do so until I suspected that my application would be too late. Mr. Malloran knew that it would be too late, and he wished to put his friend over my head as corresponding clerk.

Mr. C. F.
Gorton.
13 Dec., 1859.

FRIDAY, 16 DECEMBER, 1859.

Present:—

MR. WILD, | MR. JENKINS,
Mr. MORRIS.

W. V. WILD, ESQ., IN THE CHAIR.

Alexander Grant M'Lean, Esq., called in and examined:—

35. *By the Chairman*: You are Acting Surveyor General? I am.

36. Do you know the circumstances under which Mr. Gorton was dismissed, or do you recollect them? I do not recollect them very precisely.

37. Were you Acting Surveyor General then? No; I was chief draftsman at that time and had nothing to do with the clerical branch.

38. Then you do not know anything of those circumstances? No, nothing, excepting generally.

39. What would be the practice with reference to writing letters direct to the heads of departments from a subordinate? Direct to a Minister?

40. Direct to the head of another department instead of writing through the head of your own? There was a case in point lately, when one of the surveyors addressed the Secretary for Lands on the subject of the stoppage of pay; having previously written through the head of the department, who declined to forward the letter. His letter was returned to me with the request that I would inform him that the request should come only through the head of the department. That is the usual course.

41. There is a memorandum here, signed by Mr. Robertson, in which he says "Mr. Gorton should put forward his claims, such as they are, more temperately. It will be necessary that he withdraw the correspondence as suggested by the Surveyor General on the 26th July. Holding, as I do, the Surveyor General responsible for the proper and efficient working of his department, I am not disposed to interfere with any decision of his, unless in an extreme case." Now, supposing Mr. Gorton, in pursuance of this memorandum, withdraws the correspondence and does advance his claims in a more temperate way, would that be an act of insubordination? Through the head of the department?

42. Supposing there was any subsequent correspondence written in a proper manner, would that memorandum be looked upon as preventing him from writing? I think, on the contrary, it invites him, and might be interpreted as a permission to write direct.

43. To the head of any other department? I think it might be so interpreted.

44. At all events, if there were any doubt on that question, it would be rather a venial error? I think so.

45. And if so? I think it would almost justify the irregularity.

46. *By Mr. Morris*: Probably you will state to the Committee the exact rule in the office as to the matter before the Committee—as to correspondence between any of the officers, for instance, in your department and the Chief Secretary for Lands. Supposing they had a communication to make to the Chief Secretary, would they address a letter direct to the Chief Secretary, sending it through the head of your department—would that be proper or not? I think there would be no impropriety in directing a letter to the Chief Secretary and sending it through the Surveyor General. The ordinary course would be to send it to the Surveyor General, requesting that it might be laid before the Chief Secretary.

47. Probably you are aware that Mr. Gorton, after having had the permission of the Chief Secretary to put forward his claims more temperately, adopted that course? Yes; I perceive that he adopted that course.

48. Well, this letter of Mr. Gorton's to the Chief Secretary for Lands being on the very face of it a pressing matter, inasmuch as the estimates were to be made out in a few days, and Mr. Gorton finding that seven days were allowed to elapse without this letter being sent at all to the Chief Secretary by the Surveyor General—was he then wrong in writing direct and not through the head of the department to the Chief Secretary—was that an act of insubordination? I confess that I think that rather a nice question.

49. Does it bear on the face of it insubordination? Well, I think the case at this stage almost came under the designation of an extreme case, in which this letter merely begging that

A. G. M'Lean,
Esq.
16 Dec., 1859.

A. G. McLean, Esq. that an inquiry might be made into the matter, was not unjustifiable under Mr. Robertson's memorandum.

16 Dec., 1859. 50. Now will you be kind enough to turn to the bottom paragraph of the eighth page of the correspondence—to a memorandum by Mr. Halloran, signed "H. Halloran"—probably you would be kind enough to read it? Yes; I see he is held responsible for despatching all letters on the day they are dated.

51. Now when Mr. Gorton was summoned to give evidence before a Select Committee of the Legislative Assembly, did he commit an act of insubordination by producing that memorandum addressed to himself without having first obtained the permission of the head of his department—is that such a memorandum as he should not have taken from the office without having first obtained the sanction of the head of the department? I think it is a memorandum addressed to himself personally, and one which he would have been quite justified in keeping in his own house if he had felt disposed.

52. *By the Chairman*: How long was Mr. Gorton in the department while you were there? Speaking from memory, I think he must have been for four or five years.

53. Have you had an opportunity of seeing his conduct and demeanor in the office? Yes, I have had frequent opportunities.

54. Can you give an opinion as to the regularity of his attendance, and the degree of efficiency with which he performed his duty? He was regular, as far as I have observed, in his attendance. The duty he had to perform was not of a very important nature—the superintendence of entry and despatch of letters. I have heard complaints of his conduct on one or two occasions.

55. *By Mr. Jenkins*: What was the nature of those complaints? It was not such as to affect the present inquiry.

56. Nothing to do with any act of insubordination? No, I know of no act of insubordination further than what appears in these papers.

57. *By Mr. Morris*: Mr. Gorton, if I understand rightly, was on the third class of clerks? I think he was a clerk of the third class.

58. Could you say at all whether he was competent for the discharge of duties such as are performed by clerks of the second class? Well, I think that, hitherto, in the Government service, the classification of clerks has not been quite in accordance with their duties; but I do not think he was equally competent with Mr. Thomas, who is mentioned in this correspondence. So long as the system of seniority rules, of course, competency and classification cannot well be in accordance with each other.

59. Would you be kind enough to look at page 7 and No. 7 of the correspondence, and read the letter of the Surveyor General to Mr. Gorton—do you think a compliance on Mr. Gorton's part with the request of the Surveyor General would condone his former offence, or, was his former offence condoned by his compliance with the request? I think, so far as there was no other ground of complaint it may have been, but not if a similar ground of complaint arose.

FRIDAY, 3 FEBRUARY, 1860.

Present:—

MR. MORRIS,		MR. JENKINS,
MR. HURLEY,		MR. WILD.

W. V. WILD, Esq., IN THE CHAIR.

The Hon. J. Robertson called in and examined:—

The Hon. J. Robertson. 60. *By the Chairman*: You were Secretary for Lands and Works, from July to September, 1858? From the 11th of January, 1858, to the 27th of October, 1859, I think.

3 Feb., 1860. 61. Do you recollect any correspondence which took place between Mr. C. F. Gorton and the Surveyor General, about July, 1858? Yes.

62. Do you recollect that, in consequence of the tone of these communications, complaints were made against Mr. Gorton? If you will permit me, I will state what I recollect of the matter; and then perhaps you may ask me questions upon those points with regard to which you more especially require information. Although, since the matter was opened, I have not taken an opportunity to read the papers respecting it, I think I remember sufficient of it to state the circumstances. As I remember the circumstances, they are these:—Mr. Gorton was a clerk holding an inferior position in the Surveyor General's Department; his duty being that of entering the receipt of letters—a duty similar to that of a copying clerk; but I do not think he was considered a very efficient person. I found that my predecessor, Mr. Hay, had been applied to by Mr. Gorton, some time before, in objection to the course of the Surveyor General, in that that official had not recommended him for promotion. Mr. Hay concurred in the view of the Surveyor General, and did not promote Mr. Gorton. Mr. Gorton then, contrary to the rules of the service, directed a communication to Mr. Hay; the practice of the public service being, that before communications are sent from subordinates to the Minister, they should come through the head of the department. Mr. Gorton persisted in this course; and Mr. Hay communicated his displeasure at that gentleman acting thus insubordinately; stating that he might consider himself as recommended

mended for dismissal, if he did not withdraw this letter. Thus much of the papers I read at the time Mr. Gorton's case was brought under my notice. When I came into office there was a claim for promotion (not the same promotion, I think, as Mr. Hay had had to deal with), and there being then a gentleman in the office who happened not to have been there so long as Mr. Gorton, but who was represented to be much more efficient and superior to Mr. Gorton, that gentleman (Mr. Thomas, I believe) was recommended by the Surveyor General for promotion. Almost as a matter of course, the recommendation was indorsed by me, on the ground that it would be improper in me to interfere with the recommendation of the head of the department, unless I had strong reasons for doing so. Seeing that no sufficiently strong reason existed for doing so in this instance, I acquiesced in the recommendation. However, Mr. Gorton re-opened his claim for promotion, and addressed a letter of remonstrance to myself. He took the course of communicating directly to me, notwithstanding the expressed opinion of Mr. Hay in reference to that matter. But more than that, he did so in a remarkably offensive manner; for he first sent his letter to the Under Secretary for Lands and Works, who returned it to the Surveyor General, pointing out the necessity of reminding Mr. Gorton that his communications with the Minister must be through the head of his department. Mr. Gorton, subsequently, himself called upon the Under Secretary, who personally told him that such a course must not be pursued; but he still persisted in the course of directly communicating with the Minister. It was not, therefore, done in ignorance, or with a want of knowledge of the proper course, because my predecessor had stated his condemnation of it, which, accompanied by the minute of the Executive Council, was forwarded to Mr. Gorton. In the meantime a Committee of Inquiry into the Department (Mr. White's Committee) was appointed, and Mr. Gorton was summoned to attend that Committee. Colonel Barney subsequently complained to me that Mr. Gorton had attended this Committee, and had taken from the office certain official records without the consent of his superiors, or that of the gentleman in charge of the room. At that time a fresh question was raised, and I received a letter requesting my interference, in consequence of the repeated acts of insubordination committed by Mr. Gorton; and the matter was on my table for consideration when the statement of Colonel Barney in reference to this fresh act of insubordination—the bringing away of the official papers—was brought under my notice. I wrote a Minute on the subject for the consideration of my colleagues, which, at their instance was somewhat modified, and the Governor General was recommended to dismiss Mr. Gorton for these repeated acts of insubordination; not on consideration of the last complaint for taking away the papers, but on account of persistence in insubordination. The other (the last) point had not been decided upon; and it was not upon that it was determined to dismiss, although in the Minute it was mentioned with the others. Colonel Barney, whose recollection appeared to have failed him, had made a mistake in reference to the statement that Mr. Gorton had taken away these official papers without authority, as it seems on further examination that Mr. Gorton had obtained authority from Mr. Halloran, his immediate superior. Therefore that part of the alleged misconduct of Mr. Gorton was a mistake; and it was one of several errors of memory on Colonel Barney's part, which at last led to his retirement from the public service. I think it will be seen that, although my Cabinet Minute mentions this taking away of an official document, it is as a matter of minor complaint, and the Executive Minute does not mention it; for in the interim between the Executive Council having determined upon recommending the Governor to remove Mr. Gorton and the making of the Minute, I had discovered that Colonel Barney had made an error about these records. Thus it will be seen that in the Executive Minute there is nothing said about their removal.

63. *By the Chairman:* Then, I understand you to state that the immediate cause of Mr. Gorton's dismissal was the irregularity of the correspondence? The impropriety of his persisting in addressing the Minister directly, notwithstanding remonstrance after remonstrance, first on the part of his superior officer, Colonel Barney, next by Mr. Hay's Minute, then by the Under Secretary for Lands sending back the letter addressed to me to the Surveyor General; then his persisting in doing so after his having called upon the Under Secretary, and after that officer having warned him of the irregularity and its probable consequences. There was nothing to do but to upset the rules of the service or to dismiss this gentleman.

64. *By Mr. Morris:* If you will be kind enough to turn to page 6 of the correspondence, and look at No. 5 extract, you will observe a Minute of your own? Yes.

65. Would you be kind enough to read it, and say whether, in the face of that Minute, Mr. Gorton was not justified in renewing his claim, such as he had? Perfectly justified, but not directly to the Minister; he should have addressed his application through the Surveyor General, and this he did not do.

66. If you will have the kindness to turn to page 8, and extract No. 9, I think you will find that Mr. Gorton did address the letter to you through the Surveyor General? Just so, in the first instance, and we considered that his claims were not sufficient.

67. This letter forwarded directly was never considered, and no reply given to it? He directed the letter No. 9 to us before we could get to the consideration of the previous one, but it was considered.

68. Would you be kind enough to read No. 9, and say whether you do not think an apparent injustice was done to Mr. Gorton by withholding the letter dated the 10th of August, when, unless a decision upon it were come to at once, his claim could not of course be considered? Under the circumstances detailed in letter No. 9, was he not justified in appealing directly to you, supposing that an injustice to him had been done by the Surveyor General withholding his letter? No; I think he might have directed a short communication to me merely calling my attention to that fact; but any letter on the subject of promotion ought to have been forwarded

The Hon.
J. Robertson.
3 Feb., 1860.

The Hon. J. Robertson. forwarded through the Surveyor General. Colonel Barney could not transmit the paper, although written on the 10th of August, without communicating with Mr. Halloran, the gentleman in charge of the room, and the Minister would not then be in a position to deal with the question of whether the allegations were correct or not, it would be required that they should be submitted to the chief clerk, who would express his opinion upon the matter, and that would have occasioned some little delay before the subject could be placed before the Minister.

Feb., 1860.

69. Do you not think there was unreasonable delay? Well, there did appear to have been some unnecessary delay, although I cannot say what might have been the pressure of work in the department at that time; but I am sure of this, that if Colonel Barney found that the appointment was likely to be filled up by me during the period that Mr. Gorton's letter remained unreported upon or unconsidered, he would have entrusted the matter to me, and thus there would have been no chance of its being filled up till the communication was considered.

70. What I wish to arrive at is, whether, under the circumstance of the supposed injustice, Mr. Gorton was not justified in addressing the letter No. 9 to yourself? I do not think he was.

71. I may state that we have it in evidence from the head of the department that, under such circumstances or considerations, he was quite justified, and that that would be the practice? Perhaps so; I would not be positive upon the point; I am not the best authority upon the technicalities of officialism of that kind; but I think the right way would have been to communicate through Colonel Barney.

72. *By Mr. Jenkins:* Is it within your memory that this letter of the 10th of August reached you before the 19th or 20th of August? I cannot say, but I have no doubt it was mentioned to me that such a letter was in existence and under reference; hence there could not have been an appointment made in the meantime. If Colonel Barney held back a paper of that kind, and an appointment was made in the interim, Colonel Barney himself would be in a very awkward position. There would then be a grave charge against him. There cannot be a doubt that, on receiving the recommendation of Mr. Halloran, the Surveyor General thought it better that the gentleman whose appointment was recommended should be sustained in that appointment. Mr. Gorton has been long enough in the service to know that any head of a department would risk his position in the public service by taking the course of withholding such a letter as his, whilst the appointment it referred to was under the consideration of the Minister.

73. *By the Chairman:* I observe that in your Minute of the 27th of August (the last Minute of your correspondence), you recommend, in the concluding sentence, that the mildest mode of disposing of his (Mr. Gorton's) case would be to give him notice, that at the end of the current year—it then being August—his services should be discontinued? Yes; I thought that within that time he would be able to find some other means of obtaining a livelihood, but my colleagues differed with me in that respect, thinking that it was of no use to continue so long in that office the services of a gentleman who was continually at war with the head of his department, and that it would be better to let him go where he might be able to make his own way. I thought it might be possible that there were faults on both sides, and desired, therefore, that some time should be given Mr. Gorton, in order to allow him to find an appointment for himself; but my colleagues thought the case one which required more prompt treatment.

74. As head of this particular department your view of the case was, that it would be but just to dismiss Mr. Gorton at the end of the year? For the public interest it would not have been desirable to have these quarrels, but as I thought there might be some irritation working upon the feelings of Mr. Gorton, I wished to let him down as easily as possible.

75. *By Mr. Jenkins:* I think you say that, as far as Mr. Gorton is concerned, it would be a sufficient mark of your displeasure to have let him off at the end of six months; but how would he have done his work in the meantime? There was no direct complaint as to the manner in which he performed the duties for which he was retained, while, at the same time, there was no mark of ability in Mr. Gorton to warrant his promotion. I am not aware of anything on the papers leading to the belief that the public service was damaged by the want of ability in Mr. Gorton to perform those duties he was then performing; but I think the public service would have been damaged if I continued in the office one who was always at war with others in the department. Mr. Hay states in his letter that "the valuable time of the heads of departments must not be taken up by continual discussion of such points; my answer must be conclusive"—a decision I perfectly acquiesce in; but I may also say that if you have a gentleman in the service, who, for whatever reason, is continually at war and occupying so much time and correspondence—doing acts clearly unwarranted and contrary to his instructions—the best way is to ease him out of the public service as early as possible, having regard to fair consideration for his personal prospects.

76. *By the Chairman:* You say that by the withdrawal of the previous correspondence Mr. Gorton appeared to have started again on a clear footing? I do not think he was clear at all.

77. But everything that he had previously done appears to have been condoned by that withdrawal? Even if it were so, surely when a fresh matter is raised his previous character and conduct is not to be forgotten. If you forgive twenty offences, and afterwards the faults are repeated, you do not overlook what has gone before. I do not conceive that this shut out Mr. Gorton from employment in the public service, and my Minute shewed a desire to keep him in it for some months, during which he might have found other employment. The Minute of the Secretary for Lands and Works, that he might be retained in office for six months, was not acquiesced in by the Minute of the Executive.

78. *By Mr. Jenkins:* If it was necessary that he should be removed, why keep him there, his

his services being undesirable,—would it not be a practical censure upon the service? There had been no censure upon the character of his services, nor would his retention be a practical censure upon the public service. The Hon.
J. Robertson.

79. *By Mr. Morris*: If you will refer to the correspondence which occasioned Mr. Hay's Minute, you will observe that the practical censure therein conveyed did not refer in any way to the question of Mr. Gorton's efficiency? But he continued his insubordination by direct communication with the Minister. 3 Feb., 1860.

80. Mr. Hay seems to have approved of his having communicated with him in the way in which he did, Mr. Hay alluding to it in this way, "If Mr. Gorton considers himself aggrieved he may appeal to me, and that appeal ought to be considered final"? Yes, that is all right if that was done as in the first instance, in the usual way, through the head of the department; but he subsequently communicated directly to the Minister. I may be permitted to say that as I have not read any of the papers for some time, there may be some inaccuracies in my statement of the case; but from what I remember of it I believed that it was of no use keeping this gentleman in the service under the state of things he had brought about, and that the best way of settling matters was to ease him out of it.

81. Nothing in Mr. Gorton's conduct, I think you remark, occurred to exclude him from future employment in the public service? I think not. There may have been some irritation displayed in this matter, and perhaps a little temper by both Colonel Barney and Mr. Gorton. If I had remained in office, and this gentleman had been for a year or so without public employment, I should not think his conduct a bar to recommending his engagement in the public service in some other department.

82. *By Mr. Hurley*: Would it not be injurious to the public service, in any department, to engage so violent a person? I never saw the gentleman that I know of; but it seems to me that there was a little feeling between him and others in the department, and it was quite possible that if this gentleman was placed in another office he might get on better, as there might be some source of irritation existing in his former position, which would not be found in another. Besides, we submit to things inflicted by some persons, as well as in Governments, whilst we would not submit quietly to the same things if done by others.

1859.

NEW SOUTH WALES.

GERMAN IMMIGRATION.

(DESPATCH RELATIVE TO.)

Presented to both Houses of Parliament, by Command.

THE SECRETARY OF STATE FOR THE COLONIES to THE GOVERNOR GENERAL.

(No. 29.)

Downing-street,
24 March, 1859.

SIR,

I have to acknowledge the receipt of your Despatch, No. 155, of the 25th October last, reporting upon the defective manner in which emigration has been conducted to New South Wales from some of the German Ports; and I transmit for your information a copy of a correspondence which has passed upon the subject between this Department and the Foreign Office, from which you will learn the steps that have at present been taken upon the subject.

C. O. to F. O., 11 March.
F. O., 16 March.

A further communication will be addressed to you when more information has been received from the Foreign Office.

I have, &c.,
E. B. LYTTON.

GOVERNOR
SIR WILLIAM T. DENISON, K.C.B.,
&c., &c., &c.

[Enclosure No. 1.]

Downing-street,
11 March, 1859.

Sir,

I am directed by Secretary Sir E. B. Lytton to transmit to you, to be laid before the Earl of Malmesbury, the accompanying copy of a Despatch from the Governor of New South Wales, with its enclosures, on the subject of the defective and objectionable manner in which emigration has been conducted to that Colony from some of the German ports. I am also to enclose the copy of a Report which has been received from the Colonial Land and Emigration Commissioners in reply to the reference which was made to them.

No. 155, 25 October, 1858.
16 February, 1859.

I am to request that you will move the Earl of Malmesbury to cause the Governments of Hamburg and Bremen to be apprised of the evils brought to light in emigrant ships proceeding from those cities, to which they will doubtless be desirous to afford a correction; and that you will inform his Lordship that Sir E. B. Lytton is disposed, if he should see no objection, to authorise the Governor to concur in any Colonial enactment of the kind specified by the Emigration Commissioners which may be passed by the local Legislature to remedy the evils complained of; in which case it will be necessary that notice to that effect should be given to the Governments of any of the German States from which emigrant ships proceed to Australia.

I have, &c.,
H. MERIVALE.

E. Hammond, Esq;

[Enclosure

[Enclosure No. 2.]

Emigration Office,
15 February, 1859.

Sir,

No. 155, 25 October, enclosures to which are here-with returned.

I have to acknowledge your letter of 25th ultimo, enclosing the copy of a Despatch from Sir W. Denison, with various enclosures, on the manner in which emigration to New South Wales from German ports is conducted.

2. It appears that in May, 1858, a Committee of the Legislative Council was appointed to inquire into the alleged abuses in German Emigration. In the following September the Bremen ship "Wilhelm Kirchner" arrived in Sydney, and in consequence of a complaint from the passengers, an inquiry was instituted before the Immigration Board. The results of the two inquiries coincide in a remarkable degree, and prove that in German ships there is a great neglect of the regulations and precautions necessary for the proper conduct of emigration. It appears that there is no separation of the sexes, and that gross immorality in consequence prevails; that there is no sufficient inspection of the fittings of the ship, of the provisions, or of the passengers, at the port of embarkation; that no effectual precaution is taken against overcrowding; that the issue of provisions and water is very irregular, and often very insufficient; that the person carried as Surgeon is often not properly qualified, and that there is no separate hospital for the sick. It is further shewn that, as the law at present stands, the emigrant can obtain no redress on his arrival at his destination for breach of contract, or ill-treatment on the voyage.

3. The Committee of the Legislative Council recommend, to remedy these evils, that a local Act should be passed, founded on the Imperial Passenger Act, the Passengers Act of the United States, and the Immigration Act of the Colony of Victoria, "which, while sufficiently stringent to remove the grievances, will not trench unjustifiably on the maritime rights of Foreign States."

Sir W. Denison, however, points out that such an Act would be punitive only, not preventive, and suggests that it would be better that steps should be taken at the port of departure to ensure the maintenance of order and decency on board by regulations analagous to those enforced in British ships.

The alternative would, he considers, be the enforcement in the Colony of regulations of such stringency as practically to put a stop to German Immigration.

4. There can be no question as to the importance of adopting measures to place this emigration on a better footing, the only question is as to the nature of those measures. The matter is one of considerable difficulty, from the circumstance that where the witnesses are there is no jurisdiction, and where the jurisdiction is there are no witnesses, to allow the law to be put in force for offences committed on the voyage. The same difficulty is constantly meeting us in the case of emigrants leaving this country in foreign ships, but we are enabled in some degree to overcome it by means of the bond given to the Crown under the Passengers' Act.

5. The ports from which the vessels complained of have sailed are Bremen and Hamburgh.

There would probably be no difficulty in inducing the Legislature of those cities to revise and improve their existing laws for the regulation of passenger ships to the British Colonies, if they were made aware that the alternative would be that the Colonies would pass such laws as would virtually put an end to emigration to them in German ships.

The points on which further regulations appear to be most urgently required, are the number to be carried and the space to be allotted to each, the proper fittings, ventilation, and lighting of the passenger decks; the effectual separation of the berths of married and single, and single males and females; the establishment of hospitals and separate privies; the exclusion of dangerous or unwholesome articles of cargo; the proper inspection of the quality and quantity of the provisions and water; the verification of the competency of the medical officer; and the medical inspection of the passengers and of the medicines before sailing.

The sections in the Passengers' Act, 1855 (of which a copy is enclosed), which refer to these points, are stated in the margin. I also enclose a memorandum on the Passengers' Act, compiled for the assistance of Emigration Officers. The pages which refer to the points above alluded to are stated in the margin. I observe it is stated in the evidence before the Committee of the Legislative Council that solid divisions are forbidden by the Bremen law in the between decks of emigrant ships, from an apprehension of their interfering with ventilation. Experience in Government ships for a great many years, and in ordinary ships since 1852, enables me to say that such apprehensions are quite unnecessary, and that a wooden partition either strongly louvred in the upper part, or left open to within a few inches of the deck above, will do no harm in a ship that is otherwise properly ventilated.

6. But although the enactment by the Legislatures of Bremen and Hamburgh of regulations analagous to those in our Passengers' Act would ensure that ships should be better found and fitted on proceeding to sea, they could not ensure that order or decency should be maintained on the voyage, that the passengers should not be ill-treated, and that the proper quantities of provisions and water should be issued to them; and as the Colonial Courts could not, as I have observed, punish such offences, and there would be little chance of the emigrant returning to Germany to take proceedings against the Master, he might with great confidence calculate on impunity for anything he might do to emigrants on the voyage. This, however, might be prevented if the Legislatures of Bremen and Hamburgh would require the masters of all passenger ships to give a contract ticket to their passengers analagous to that in Schedule K of our Passengers' Act, but binding him, in addition, to treat the passengers well, and to observe any regulations which may be prescribed by law for the maintenance of order and decency,—such contracts could, I apprehend, be put in force against the Master before the Colonial Courts, by a law to be passed for the purpose, without violence

Enclosure 1.
Sections 18, 14,
20, 21, 22, 24, 25,
26, 29, 31, 42 and
44.
Enclosure 2.
P.P. 15 to 20.
" 24 to 29.
" 33 to 42.

violence to international law; and, if so put in force, there can be little doubt that they would be effectual. The damages and costs which, under our Passengers' Act, can be recovered for breach of the stipulations of the contract ticket, are fixed (sec. 73) at the amount of the passage money, and £20. If the Legislatures of Bremen and Hamburgh should consent to require such contract tickets, it would probably be thought right to insert in them some maximum as damages.

7. Lastly, the Colonial Legislature would be competent to pass a law on the model of the law of the United States and of the neighbouring Colony of Victoria, enacting that any passenger ship which shall arrive in the Colony having more than a specified number of passengers in proportion to her tonnage and space (exclusive of any born on the voyage), or not having her decks and berths properly fitted, or proper separation between the sleeping places of married and single, and single men and women, or not sufficiently ventilated and lighted, or without a duly qualified medical officer (except in case of his death on the voyage), shall be subject to penalties on conviction before the local tribunals. Such a law, however, if passed, must apply to all foreign countries, not to the ports complained of only; and it would be necessary therefore to give early notice of it to the resident Consuls of the foreign countries from which emigrants come, in order that they might communicate it to their respective Governments. It would also be desirable to postpone the operation of any such Act so as not to affect any ships which may have sailed before its enactment could be known in the port from which they sailed.

I have, &c.,

T. W. C. MURDOCH.

Herman Merivale, Esq., C.B.

[Enclosure No. 3.]

Foreign Office,
16 March, 1859.

Sir,

I am directed by the Earl of Malmesbury to acknowledge the receipt of your letter of the 11th instant, relating to the objectionable manner in which emigration from the German ports to the Colony of New South Wales has been conducted; and I am to acquaint you that his Lordship has instructed Her Majesty's Chargé d'affaires to bring this subject to the notice of the Hanse Towns Government.

I am, &c.,

WM. SEYMOUR FITZGERALD.

Herman Merivale, Esq.

Legislative Assembly.
NEW SOUTH WALES.

GERMAN IMMIGRATION.

(CORRESPONDENCE IN REFERENCE TO.)

Ordered by the Legislative Assembly to be Printed, 9 September, 1859.

SCHEDULE.

NO.	PAGE
1. Mr. Henry Hamburger to the Colonial Secretary, requesting that naturalized Germans may be allowed facilities in the introduction into the Colony of their relatives and friends. 8 January, 1859	1
2. Immigration Agent to the Under Secretary, reporting on above application. 17 January, 1859	2
3. The Under Secretary to the Immigration Agent, communicating the decision of the Government, and requesting him to submit draft notice for giving publicity to the arrangement. 28 March, 1859	2
4. The Immigration Agent to the Under Secretary, forwarding draft notice accordingly. 18 June, 1859	2

No. 1.

HENRY HAMBURGER, ESQ., to THE COLONIAL SECRETARY.

German Immigration Offices,

Lower George-street, Sydney,

8 January, 1859.

SIR,

I have the honor to apply to you on behalf of several naturalized Germans, who are desirous of bringing out to this Colony their nearest relations, such as father or mother, brothers or sisters, and children, &c., to inquire if permission could not be given to import them under the Government Immigration Regulations of 10th August, 1857, now in force for the United Kingdom.

Having become, as they will prove by their certificates of naturalization, subjects of the Queen, they are in hopes to be entitled to the enjoyment of the same rights and privileges as any other British subject; and I trust that, upon consideration, you will be pleased to give such instructions as will assist this useful class of people to emigrate to this Colony.

In order to facilitate their emigrating, I take the liberty of suggesting, that instead of presenting themselves with their testimonials to the Emigration Commissioners of London, they may be allowed to do so at any of H. M. Consular Offices in Germany, whose signature would be a sufficient guarantee of the correctness of their papers, and would enable them to embark at some Continental port.

I have, &c.,

HY. HAMBURGER.

THE HONORABLE

THE COLONIAL SECRETARY.

No. 2.

THE AGENT FOR IMMIGRATION to THE PRINCIPAL UNDER SECRETARY.

*Government Immigration Office,
Sydney, 17 January, 1859.*

SIR,

I have the honor to return herewith Mr. Hamburger's letter of the 8th instant, referred to me in your B. C. of the 11th.

I deem that it would hardly be right to appropriate the funds voted for Emigration from the United Kingdom towards the introduction of Foreigners.

There is, however, I believe, a considerable balance remaining unexpended of the last appropriation of £10,000 for Foreign Immigration, and this balance might, I conceive, be fairly applied to the purpose of bringing out the relatives of "German Residents," provided these contributed towards the cost of the passages of their nominees the same amounts, and in the like proportions, as are contributed by our own countrymen.

I have, &c.,

THE PRINCIPAL
UNDER SECRETARY.H. H. BROWNE,
Agent for Immigration.

No. 3.

THE PRINCIPAL UNDER SECRETARY to THE IMMIGRATION AGENT.

(No. 16.)

*Colonial Secretary's Office,
Sydney, 28 March, 1859.*

SIR,

I am directed to inform you that your letter of the 17th instant, in which you reported on Mr. Hamburger's communication of the 8th January last, inquiring whether permission could not be given to bring to Sydney the relations of certain Germans, under the Government Immigration Regulations of 10th August, 1857, has been submitted to the Executive Council.

2. The Council fully concurring in the propriety of extending the benefit of the Immigration Regulations of the 10th August and 16th September, 1857, to naturalized subjects, and perceiving from a report of the Auditor General that there was a balance of £7,122 10s. which, subject only to outstanding claims, may be made available for that object, advised that instructions should be given accordingly to permit the relatives of naturalized and resident Foreigners to be imported under the Regulations referred to, subject to the same amounts, and in the same proportions being contributed as in the case of Emigrants from the United Kingdom, and the terms of the Regulations with respect to the class of persons to be introduced, &c., being in like manner adhered to.

3. I am accordingly to request that you will have the goodness to submit the draft of a notice for giving publicity to the arrangement should you consider this necessary.

I have, &c.,

THE IMMIGRATION AGENT.

W. ELYARD.

No. 4.

THE AGENT FOR IMMIGRATION to THE PRINCIPAL UNDER SECRETARY.

*Government Immigration Office,
Sydney, 18 June, 1859.*

SIR,

I have the honor to acknowledge the receipt of your letter of the 28th March last, No. 16, and, in accordance with the request contained therein, to submit for the approval of the Government a Draft Notice* containing Regulations which I have prepared for facilitating Immigration from the Continent of Europe, and I beg to observe that, in order to carry out the views of the Executive Council on the subject as conveyed to me in your communication above referred to, I have endeavoured as nearly as possible to assimilate these Regulations to the Immigration Remittance Regulations of August and September, 1857.

I have, &c.,

THE PRINCIPAL
UNDER SECRETARY.H. H. BROWNE,
Agent for Immigration.

* Ordered by the Legislative Assembly to be Printed, 8 September, 1859.

1859.

Legislative Assembly.

NEW SOUTH WALES.

IMMIGRATION.(REGULATIONS FOR FACILITATING THE INTRODUCTION OF RELATIVES OF
NATURALIZED FOREIGNERS.)*Ordered by the Legislative Assembly to be Printed, 8 September, 1859.*REGULATIONS FOR FACILITATING IMMIGRATION FROM THE CONTI-
NENT OF EUROPE, OF RELATIONS AND FRIENDS OF PERSONS
NATURALIZED IN NEW SOUTH WALES.*Colonial Secretary's Office,
Sydney, 22 August, 1859.*

WITH a view to facilitate the introduction of the relatives and friends of naturalized Foreigners resident in the Colony, His Excellency the Governor General, with the advice of the Executive Council, has been pleased to direct the publication of the following Regulations.

2. Any naturalized Foreigner, resident in the Colony, who may be desirous of introducing from the continent of Europe any of his or her relatives, will be permitted to do so on the following terms and conditions:—

(1st.) By making the following Deposits, viz.:—For each Immigrant between 1 and 12 years of age, £2; between 12 and 40 years of age, £4; between 40 and 50 years of age, £8. But single women above 35, and single men above 40 years of age, will not be deemed eligible under these Regulations, unless upon payment of a deposit of £12 for each. Such deposits must be made, if in Sydney, at the Government Immigration Office, on any lawful day, between the hours of 10 a.m. and half-past 2 p.m., and, if in the Country Districts, with the Clerks of Petty Sessions during the usual office hours; and at the time of making the deposit the depositor must be prepared to afford all such information respecting the persons he proposes to introduce, as may be necessary to enable the Immigration Agent or Clerk of Petty Sessions to comply with his application and the requirements of these Regulations.

(2nd.) The persons eligible under these Regulations are mechanics of every description, domestic servants, and all persons of the laboring class. They must be of sound mental and bodily health, and of good moral character. But no advantage will be allowed in respect of any person brought out as a cabin or intermediate passenger.

(3rd.) The Immigrants, on arrival in the Colony, will be subjected to the examination of the Immigration Board, who will require proof of their eligibility under these Regulations.

(4th.) The Board will also require proof that the Immigrants have been properly found during the voyage with an outfit of suitable clothing, bedding, mess utensils, provisions, water, medical comforts, medical attendance, and suitable

accommodation

accommodation. As a general rule, the outfit of clothing, and the dietary and medical comforts, should be provided according to the annexed list and scale, which will be adopted as the criterion in judging of the fulfilment of the requirements under these heads.

- (5th.) In the case of single Females they must (unless accompanying their parents) be between the ages of 15 and 35; and proof will be required that they have been placed during the voyage under proper and *effectual* protection.
- (6th.) The separation of husbands and wives, and of parents from children under 15 years of age, will in no case be allowed.
- (7th.) Passages will not be granted under these Regulations to children under 15 years of age, unless forming part of a family, or unless their parents be resident in the Colony.
- (8th.) Families in which there are more than two children under 7, or three under 10 years of age, will be deemed ineligible, as well as all persons who have not been vaccinated or had the small-pox.
- (9th.) In any case in which the amount deposited shall exceed that required for the number of Immigrants actually introduced by the depositor, the excess will be returned to him at the expiration of the period fixed for their introduction, on the return to the Immigration Agent of the Bounty Ticket.
- (10th.) The arrival of all persons emigrating in pursuance of these Regulations will, as far as practicable, be duly notified in the newspapers for the information of their relatives or friends.

3. The Clerks of Petty Sessions, on receipt of any deposit under these Regulations, will immediately remit the amount to the Immigration Agent at Sydney, with a statement of the number and description of Immigrants whom the depositor wishes to introduce. The Immigration Agent will thereupon prepare and forward to the Clerk of Petty Sessions, for delivery to the depositor, a Bounty Ticket, to enable his nominee to obtain a passage. Similar Bounty Tickets will be issued to depositors in Sydney, on payment of their deposits to the Agent for Immigration.

4. The Bounty Tickets will not be available beyond the period of two years from the date of their issue.

5. If on arrival of the Immigrants introduced in pursuance of any Bounty Tickets issued under these Regulations, the Immigration Board shall be satisfied that the several conditions hereby imposed, and contained in the Bounty Ticket, have been faithfully observed, they will grant to the person authorized to introduce the Immigrants, or to his Assign, being the commander, owner, or agent of the ship by which such Immigrants shall have arrived, a certificate to that effect, endorsed on the Bounty Ticket, and on presentation thereof at the Colonial Treasury, the authorized holder will be entitled to receive the sum of twelve pounds for every Immigrant between the ages of 12 and 50, and half that sum for every Immigrant between 1 and 12 years of age.

6. It is to be distinctly understood, that no Quarantine or other expenses whatever attendant upon the introduction of Emigrants under this notice will be defrayed by Government, excepting the Bounties hereinbefore mentioned.

7. To prevent misapprehension and disappointment, and to ensure a rigid adherence to the principle of these Regulations, it is proper to state that the whole of the conditions thereby imposed will be strictly construed. Parties, therefore, who may introduce relations or friends not qualified by age, calling, character, or otherwise, will do so entirely at their own risk, and will have no claim on the Government to obtain the Bounties offered by the present Notice.

8. Forms of Application, as well as all other information for the guidance of depositors, can be obtained from the several Clerks of Petty Sessions in the Country Districts, or in Sydney at the Office of the Agent for Immigration.

9. These Regulations will take effect from the date of their issue, and will so remain until the amount which is limited for the introduction of Foreigners is expended.

CHARLES COWPER.

OUTFIT

OUTFIT OF CLOTHING.

<i>For Males.</i>	<i>For Females.</i>
Six shirts.	Six shifts.
Six pairs of stockings.	Two warm and strong flannel petticoats.
Two warm flannel or Guernsey shirts.	Six pairs stockings.
Two pairs new shoes.	Two pairs strong shoes.
Two complete suits of strong exterior clothing.	Two strong gowns, one of which must be warm.

But for each child nine shirts or shifts, four warm flannel waistcoats, and one warm cloak or outside coat, six pairs of stockings, two pairs of strong shoes, and two complete suits of exterior clothing, are required. There must be also, at least, three sheets for each berth, and four towels, and two pounds of marine soap, for each person. The necessary brushes and combs and clothes brushes, for cleanliness, must be provided by the Emigrants. Emigrants must not have less than the above outfit; but the larger the stock of clothing the better for health and comfort during the voyage, which usually lasts about four months; and as the Emigrants have always to pass through very hot and very cold weather, they should be prepared for both. Two or three coloured serge shirts for men, and an extra supply of flannel for women and children, are strongly recommended.

Rations of Provisions and Water, according to the following scale, are to be issued during the voyage, and until disembarkation, to each Male and Female Passenger of twelve years of age and upwards;—to children of one year and under twelve years of age, one-half of such rations.

DIETARY SCALE.

Sunday—8 ozs. Beef, with Pudding, and Dried Fruit.
Monday—8 ozs. Pork, with Potatoes, and Sauerkraut.
Tuesday—8 ozs. Beef, with Peas, or Lentils, or Beans.
Wednesday—Fish, Potatoes, &c.
Thursday—8 ozs. Beef, with Rice, and Molasses.
Friday—8 ozs. Pork, with Potatoes, Peas, Lentils, or Beans.
Saturday—Barley, with Molasses and Dried Fruit.
Fresh Water—3 Quarts per diem, exclusive of that required for cooking purposes.

WEEKLY.

2 ozs. Coffee.	8 ozs. Butter.
$\frac{3}{4}$ oz. Tea.	5 lbs. Biscuit.
8 ozs. Sugar.	Salt, Pepper, Mustard, as required.

Potatoes and Sauerkraut will be given as long as they will keep, after that they will be replaced by preserved Potatoes.

MEDICAL COMFORTS FOR EACH 100 ADULTS.

28 lbs. of Carolina rice.	10 lbs. of preserved beef, half in 1lb. and the remainder in $\frac{1}{2}$ lb. tins.
20 $\frac{1}{2}$ -lb. packets of best prepared oatmeal grits.	400 lbs. of sugar.
35 lbs. of West India arrowroot.	3 dozen bottles of wine.
25 lbs. of barley.	86 gallons of beer.
25 lbs. of sago.	5 gallons of brandy.
10 lbs. of tapioca.	5 gallons of vinegar.
25 lbs. of best preserved meat soup } in 1lb.	10 dozen pints of preserved milk.
25 lbs. of preserved broth } tins.	2 cwt. of marine soap.
30 lbs. of preserved boiled mutton, and	1 cwt. of best yellow soap.

1859.

Legislative Assembly.

NEW SOUTH WALES.

ASSISTED IMMIGRATION TO MORETON BAY.

(RETURN SHEWING PARTICULARS IN REFERENCE TO.)

Ordered by the Legislative Assembly to be Printed, 13 September, 1859.

RETURN to an *Address* from the Honorable the Legislative Assembly of New South Wales, to the Governor General, dated 3 February, 1859, praying that His Excellency would be pleased to cause to be laid upon the Table,—

“ 1st. A Return shewing the following particulars in reference to Assisted Immigration to Moreton Bay :—

“ (1.) The number of persons who came or were brought out under that system at their own expense, or at that of their friends at Moreton Bay.

“ (2.) The number of those persons who were landed at Moreton Bay, at the first expense represented by the Deposit Receipts.

“ (3.) The number of those persons who were landed at Sydney and for whom their friends or themselves had to incur the additional expense of their passage from Sydney to Moreton Bay.

“ (4.) The number of persons of the latter class, the expense of whose passage from Sydney to Moreton Bay was reimbursed by Government to their friends or themselves.

“ 2nd. Also the triplicate Deposit Receipts for the passage of all such persons lodged in the Immigration Office or elsewhere, with the Immigration Agent's endorsement thereon.

“ 3rd. And, finally, similar particulars in regard to Assisted Immigration to the several other seaports in New South Wales.”

(Mr. Deniehy.)

ASSISTED IMMIGRATION TO MORETON BAY.

RETURN of Assisted Immigrants for whom Deposits were made in the District of Moreton Bay under the Remittance Regulations, shewing whether landed at Brisbane, in accordance with the terms upon which the Deposits referred to were made, or landed at Sydney or elsewhere.

YEAR.	Number of Persons who came or were brought out under the Immigration Remittance Regulations at their own expense or at that of their friends at Moreton Bay.		Number of these Persons who were landed at Moreton Bay at the first expense represented by the Deposit Receipts.	Number of those Persons who were landed at Sydney, and for whom their friends or themselves had to incur the additional expense of their passage from Sydney to Moreton Bay.	Number of Persons of the latter class the expense of whose passage from Sydney to Moreton Bay was reimbursed by Government to their friends or themselves.	Triplicate Deposit Receipts for the passage of all such persons lodged in the Immigration Office or elsewhere with the Immigration Agent's endorsement thereon.	Similar particulars in regard to Immigration under Remittance Regulations to several other seaports in New South Wales.
	At their own expense.	Partially at the expense of their friends.					
1848	Nil	Nil	None. The expense represented by the Deposit Receipts forms only a very small proportion of the entire cost of the passages as paid by the Government.	Cannot be ascertained.	No reimbursements have been made by Government to either immigrants or their friends under such circumstances, but 78 Immigrants under the Remittance Regulations were forwarded from Sydney to their friends at Moreton Bay at the expense of the Government.	Sample of Document referred to, used in all cases with Immigration Agent's usual Minute thereon—appended.	No passages are provided by the Government to the other out-ports direct, but during the existence of the Country Depôts Remittance persons were forwarded at the cost of the Government to Newcastle, Maitland, and Parramatta.

**MORETON BAY IMMIGRATION AND LAND COMPANY'S ACT
AMENDMENT BILL.**

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and Report was referred, on the 3rd instant, the "*Moreton Bay Immigration and Land Company's Act Amendment Bill*," beg leave to report to your Honorable House,—

That they have carefully perused the Bill referred for their consideration, and examined the Promoter of the Bill* and Sir Charles Nicholson, Baronet, (whose respective evidence will be found appended hereto) as to the object thereof, and the necessity for its being passed to give vitality to the original Act; and that the Preamble of the Bill having been satisfactorily proved by the evidence of those gentlemen, they proceeded with the several Clauses of the Bill, in the first of which they found it necessary to make *certain verbal amendments*,† inserting also *an additional Clause*† to authorise Meetings of the Directors to be held in Sydney.

* The Rev. Dr. Lang.

† Vide "Schedule of Amendments."

And your Committee now beg to lay before your Honorable House the Bill, as amended by them.

*Legislative Assembly Chamber,
Sydney, 19 April, 1860.*

A. MORRIS,
Chairman.

PROCEEDINGS OF THE COMMITTEE.

THURSDAY, 12 APRIL, 1860.

The meeting of the Committee called for this day, lapsed, by reason of the adjournment of the House from the 11th to the 13th instant.

FRIDAY, 13 APRIL, 1860.

MEMBERS PRESENT:—

Rev. Dr. Lang,		* Mr. Flett,
Mr. Morris,		Mr. Black,
	Mr. Rotton.	

Mr. Morris called to the Chair.

Agent for the Promoters of the Bill, the Rev. Dr. Lang.

The Rev. Dr. Lang (also a Member of the Committee) examined in his place.

Sir Charles Nicholson, Bart., examined.

Witness withdrew.

Committee deliberated.

[Adjourned to Tuesday, at *half-past two* o'clock.]

TUESDAY, 17 APRIL, 1860.

MEMBERS PRESENT:—

Mr. Morris in the Chair.

Rev. Dr. Lang,		Mr. Rotton,
Mr. Black,		Mr. Flett.

Committee deliberated.

[Adjourned to Thursday, 19th instant, at *Ten* o'clock.]

THURSDAY, 19 APRIL, 1860.

MEMBERS PRESENT:—

Mr. Morris in the Chair.

Mr. Black,		Mr. Rotton,
Mr. Flett,		The Rev. Dr. Lang.

The Committee proceeded to consider the Preamble of the Bill.

Preamble read.

Motion made (*Mr. Black*) and *Question*—That the Preamble stand part of the Bill—*agreed to*.

Committee proceeded to consider the several clauses.

Clause 1 read, *verbally amended* (*Vide* Schedule of Amendments), and *agreed to*.

Motion made (*Mr. Black*) and *Question*—That the Bill be amended after Clause 1, by inserting the following new Clause:—

“(2.) And whereas it is provided in the thirty-ninth section of the original Act
 “ that the Directors shall hold meetings from time to time and from place to
 “ place within the District of Moreton Bay but the Clarence and Richmond
 “ River District of New South Wales being no longer within the District of
 “ Moreton Bay since the Separation of Queensland the Directors may meet
 “ and adjourn as they think proper from time to time in Sydney as well as
 “ at Moreton Bay”—*agreed to*.

Clause 2 (now 3) read and *agreed to*.

The Chairman laid before the Committee a Draft Report.

Draft Report read.

Motion made (*Mr. Black*) and *Question*—That the Draft Report as read be the Report of this Committee—*agreed to*.

Chairman requested to report to the House.

SCHEDULE OF AMENDMENTS.

- Clause 1, line 17—*Omit* "said."
 After "Colony;" *insert* "of New South Wales."
 " " 19—*Omit* "to be selected by the Company."
 After "to the;" *insert* "said."
 " " 20—*Omit* "aforesaid;" *insert* "to be selected by the Company."
 After Clause 1, *insert* new clause 2—"And whereas it is provided in the thirty-ninth
 " section of the original Act that the Directors shall hold
 " meetings from time to time and from place to place
 " within the District of Moreton Bay but the Clarence
 " and Richmond River District of New South Wales being
 " no longer within the District of Moreton Bay since the
 " separation of Queensland the Directors may meet and
 " adjourn as they think proper from time to time in
 " Sydney as well as at Moreton Bay."

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

MORETON BAY IMMIGRATION AND LAND
COMPANY'S ACT AMENDMENT BILL.

FRIDAY, 13 APRIL, 1860.

Present:—

MR. BLACK,
MR. FLETT,

DR. LANG,
MR. MORRIS,

MR. ROTTON.

AUGUSTUS MORRIS, ESQ., IN THE CHAIR.

The Rev. John Dunmore Lang, D.D., a Member of the Committee, examined in his place:—

1. *By the Chairman:* The Committee will be obliged to you if you will state the object and intention of the Bill referred to this Committee? In the Session of 1855 of the late Legislative Council, an Act was passed for the incorporation of a Company, to be called the Moreton Bay Immigration and Land Company, with a view to the introduction and settlement of an agricultural population from the Mother Country, for the growth of cotton and other articles of agricultural produce suited to the soil and climate of the Northern Districts of New South Wales; and the mode which the Act contemplated for carrying out the measure was, that the sums paid from time to time into the hands of the Commissioners of Land and Emigration in the Mother Country, for the passage out of immigrants duly selected by the Company under the provisions of the Act, should be credited by the Government here as payment for land purchased from the Government in the usual way, deducting such amounts as might be deemed requisite for meeting the expenses of survey, and of medical treatment and superintendence of the immigrants on their passage out. It was proposed by the Directors of the Company, immediately after their organization, that some fit and proper person should proceed to the Mother Country to organize a number of emigration societies to supply fit and proper persons as immigrants for the purposes contemplated by the Company, and generally to give an impulse to emigration to the Northern Districts of the Colony. It was found, however, on referring to the Local Government, that as the late Legislative Council had no power to deal with the public lands, the arrangement that formed the pivot of the Act, namely, that the money paid for immigration should be credited for the purchase of land, could not be carried out; and, from the cancelling of certain regulations previously in force in connection with immigration, it was deemed necessary to have a specific Act passed to enable the Local Government, whenever the Legislature should be put in possession of or have the control over the public lands, to give vitality to the Company, by taking the necessary measures for carrying out that arrangement. This, then, is the object of the present Bill, which merely contemplates that the moneys paid for the passages of suitable immigrants to the credit of the Commissioners of Land and Emigration in England should be credited for the purchase of land, with the deductions I have mentioned,

The Rev.
J. D. Lang,
D.D.

13 April, 1860.

The Rev.
J. D. Lang,
D. D.
13 April, 1860.

mentioned, in this Colony. Having had much experience among the classes contemplated as likely to furnish suitable immigrants for the Company, and for its objects in the Mother Country, I am strongly persuaded that the thing might be made popular, and that a large immigration might be effected under such an arrangement. I have also paid much attention to the capability of the Colony all along the coast to the northward for the production, particularly, of cotton, as well as other semi-tropical productions; and I am satisfied, that in order to introduce and to extend indefinitely that branch of agricultural production in the northern regions of this territory, nothing further is necessary than the introduction and settlement of an industrious agricultural population.

Sir Charles Nicholson, Bart., D.C.L., examined:—

Sir Charles
Nicholson,
Bart., D.C.L.
13 April, 1860.

2. *By the Chairman*: Do you approve of the general principle upon which this Immigration Act for the Northern Districts appears to be founded, that of rendering the alienation of the land subservient to the purposes of immigration? I do; I entirely approve of that principle, and would be glad to witness its extension generally with reference to the waste lands of the Colony. I think it desirable that there should be an immediate and personal connection between the process of immigration on the one hand and the acquisition of land in respect to that immigration on the other.

3. Do you think the want of such a connection in time past has very seriously affected the amount of immigration to this Colony? I am quite certain it has, and I speak from my own personal experience. Recently, when I was in England, there were numerous cases where I should have been glad, out of my own personal resources, to have provided passages for some immigrants for this Colony if I could have been assured of the re-payment of the sum so advanced in land.

4. Have you directed your attention to the capability of the soil and climate of the northern portions of this territory for the production of cotton, and of other semi-tropical productions? I have. I entertain the most favorable opinion as to the capability of the whole of the northern portions of this Colony, Moreton and Queensland, as respects the production of cotton, the coffee plant, and in short most produce of tropical growth. I saw them all recently flourishing in a state of the greatest possible luxuriance in the garden at Brisbane. I saw the cotton plant producing cotton of the finest quality, which I have reason to know would realise probably from 1s. 10d. to 2s. or 2s. 3d. a pound. I saw growing, in immediate juxtaposition to this, a coffee plant, a cinnamon tree, which appeared to me just as luxuriant in growth as I ever saw it in Ceylon, together with the arrowroot. The sugarcane, of which I have recently sent specimens Home, I was assured attained a luxuriance of growth which is never hardly surpassed in the West Indies or Mauritius. There were various other tropical growths in an equally thriving condition. There is, in my opinion, only one drawback to the cultivation of these productions in the distant north, and that is the climate. I think the climate is, in some degree, incompatible with the Anglo-Saxon constitution; but that objection would, perhaps, only apply, in a very marked degree, to the country considerably to the north of Moreton Bay, and would not be applicable, or only in a much less degree, to the northern settlements of New South Wales proper according to the present boundary.

5. You are aware that the proposed Act can only refer to the portion of the territory that is included within the present Colony of New South Wales? Then I should say that what I have just urged would be of little importance. Certainly the climate is very depressing to the north, and I can hardly imagine Englishmen or Scotchmen laboring in the open air latitude 21° or 22°. My remark would not apply to Richmond or Clarence Rivers, and I am told that cotton does not affect the extremes of climate, but that there is an intermediate zone of a temperate character where the cotton attains its highest degree of perfection—that it does not thrive best under the Equator, but requires a certain stimulus of cold to give it the proper development. There is one important fact, a most favorable circumstance in connection with the growth of cotton here, that whereas in the United States of America, where there is such an enormous production, the plant, in consequence of the severe winters, is only annual, here, in consequence of our more genial climate, it becomes a perennial. I may state, that in a communication I had a month or two ago from a friend of mine, Lord Alfred Churchill, written from the residence of the Mayor of Manchester, Mr. Beazley, various specimens of cotton were re-enclosed, with the valuations affixed. He stated that Mr. Beazley was very sanguine as to the results of the growth of cotton here. He took a great interest in it, and was prepared to say that there was a capacity of receiving cotton in the English market beyond almost all calculation. I regard it as a subject of the very greatest importance, and think the propriety of encouraging the raising such a product one that involves considerations of the most weighty character, as affecting the commercial interests of England—the extension of colonization in Australia—and as likely eventually to contribute to the extinction of slave labor in America. As a proof of the great interest exerted in the production of this article, most persons are aware of the efforts of Dr. Livingstone in Central Africa, and of the great support he has received in his further enterprises; this has arisen from the hope, which I believe is a fallacious one, that cotton may be grown on the Zambesi, and the interior plains of Africa. I confess, that after having read all the evidence I have been able to procure on the subject, and after having talked with Dr. Livingstone, I am not so sanguine as to the fulfilment of his hopes; and I have ventured to say, both in public and in private, that here was a field almost wholly unoccupied, where nature had given every facility for the production of this article, which was under British rule, and it seemed an extravagant proposal that we should turn our attention to Africa under the circumstances, seeing we had

had such a field as we have in this Colony. I mention this incident as merely a proof of the great attention paid to the subject at Home, and of the intense anxiety which prevails in the minds of the commercial population and of thinking people, with reference to the production of a material upon the manufacture of which into articles of commerce so many hundreds of thousands of the laboring community of England depend.

Sir Charles
Nicholson,
Bart., D.C.L.

13 April, 1860.

6. You do not think there is any obstacle to the settlement of an agricultural population from the Mother Country for the growth of cotton and other semi-tropical productions in any part of the territory which still remains a portion of New South Wales? On the contrary, I think they present every incentive and facility towards the successful attainment of that object.

7. Can you inform the Committee whether there is any likelihood of co-operation on the part of the cotton interest in England in the event of a feasible project being laid before them, conjoining the acquisition of land with the extension of immigration for that purpose? I have every reason to believe the most perfect readiness of disposition on the part of men of the highest influence at Home—Members of Parliament and large manufacturers in the Mother Country—to co-operate most effectively in carrying out such a scheme.

8. You are aware that it has been frequently suggested that Coolie immigration should be encouraged extensively into this territory and the neighboring Colony of Queensland, for the production of such articles as cotton, coffee, and sugar,—do you think it desirable, if it can be prevented, to have a Coolie population? No, if you can get an Anglo-Saxon population I should greatly prefer it; at the same time I think, with reference to the more northern settlements of Australasia, that is the only kind of labor that will ultimately be found available. I do not wish to see a mixed population, as I know the evil of a mixed race; still with regard to the extreme northward, the tropical climate will be inconsistent with the residence of a laboring population. Therefore, although I deprecate the introduction of this race, I think it must arise to some extent in the northern settlements, and I think it would be wise to establish proper regulations before it commences.

9. That remark does not apply to New South Wales? No.

10. Do you consider that the hopes of civilization and Christianity are bound up with the extension of the Anglo-Saxon race? I do; and I think the extinction of that greatest opprobrium of civilization—slavery—is involved in the carrying out such an idea as that involved in this proposition.

11. You think the extensive production of cotton by a free population would go far to promote the extinction of slavery in the United States of America? Certainly.

1859.

DIGGERS' EMPLOYMENT COMMITTEE.

CHARLES KEMP, ESQ., to THE COLONIAL SECRETARY.

Sydney, 30 October, 1858.

Sir,

With reference to your conversation yesterday with the deputation appointed by the "Diggers' Employment Committee," wherein you kindly consented to the following proposition,—“That the Government should contribute an amount equal to what might be collected by the Committee appointed for the purpose of aiding diggers and others to reach “the interior,”—we have the honor to request that, as heavy expenses are being daily incurred for the fulfilment of this object, the Government should pay from time to time into the hands of the Treasurer, Mr. Charles Kemp, a sum equal to that actually paid by the subscribers.

We avail ourselves of this opportunity of acknowledging the very handsome and liberal manner in which the Government have so generously granted their assistance in aid of an object which must have the effect of relieving a great amount of distress, and of placing in the interior a number of useful laborers.

We have, &c.,

(For the Committee)

CHARLES KEMP,

Chairman.

THE HONORABLE

THE COLONIAL SECRETARY.

THE UNDER SECRETARY to CHARLES KEMP, ESQ.

Colonial Secretary's Office,

Sydney, 3 November, 1858.

Sir,

I am directed by the Colonial Secretary to acknowledge the receipt of your letter of the 30th ultimo, in which, with reference to the interview which a deputation from the "Diggers' Employment Committee" had with him on that day, you request that a contribution may be made from public funds in aid of their measures for enabling diggers who have returned from Port Curtis, and others, to reach the interior.

2. In reply, I am desired to inform you that the Legislature having already affirmed the expediency of promoting the removal to the country districts of the unemployed labor of the metropolis, the Government are of opinion that it is desirable that they should assist the Committee in the objects which they have in view, and that they are therefore prepared to issue to the Committee, from time to time, any sum equal to the amounts raised by private subscription, not exceeding in the whole £2,500.

I have, &c.,

CHARLES KEMP, ESQ.,

Chairman of the Diggers'

Employment Committee.

W. ELYARD.

Sydney,

Sydney, 12 November, 1858.

FIRST REPORT of the "Diggers' Employment Committee," appointed at a Public Meeting held at W. Dean & Co's. Auction Rooms, O'Connell-street, on Thursday, the 26th October, to carry into effect the Resolutions of the Meeting.

These Resolutions were to the effect:—

1. That it was desirable that measures should be taken to enable the large number of practical Diggers then in Sydney to proceed into the interior, for the purpose of developing the capabilities of the Gold Fields of New South Wales.
2. That it was desirable that a Public Subscription should be opened for the purpose of sending to the different Gold Fields of this Colony, such numbers of Diggers, and others, as might be deemed expedient.

THE Committee have the honor to Report that in pursuance of these Resolutions a Public Subscription, to aid Diggers and others to reach the interior of this Colony for the purpose of developing the capabilities of the Gold Fields of New South Wales, was opened on the 26th of October, which now amounts to (£1,803 11s.) eighteen hundred and three pounds eleven shillings, of which sum (£1,350) thirteen hundred and fifty pounds has been paid to the Treasurer, and placed to the credit of the Committee at the Commercial Bank.

The Committee have also to Report that a Deputation appointed by the Committee consisting of W. Dean, S. Cohen, and Walter Lamb, waited upon the Government to request their aid in carrying out the objects proposed by the Committee.

To this application a reply was received from the Honorable the Colonial Secretary by the Treasurer, stating the intention of the Government to grant a sum equal in amount to that subscribed by the public, to an amount not exceeding (£2,500) two thousand five hundred pounds, and the sum of (£1,000) one thousand pounds has accordingly been placed by the Government to the credit of the Committee, in compliance with an application made by the Treasurer for that amount.

Free passages by railway have also been granted by the Government to all persons sent into the interior by the Committee. The Committee have also to Report that circulars have been sent to the Magistrates, Gold Commissioners, Storekeepers, and other residents of the country districts, suggesting the formation of local Sub-Committees to co-operate with the Committee, and to receive subscriptions for the "Diggers' Employment Fund."

The Committee have also to Report that a list was opened on Thursday, the 28th of October, in which has been registered the name of each applicant, how arrived, from what diggings, and the Gold Field to which each wished to be sent by the Committee.

Of the 1,350 applicants to the Committee, 1,100 have been sent to the different Gold Fields at an estimated expense of (£2,185) two thousand one hundred and eighty-five pounds, or about (£2) per head, leaving a balance in hand, if all amounts subscribed are paid up, with the amount to be received from Government, of about (£1,400) fourteen hundred pounds.

Of the 1,350 applicants, about two-thirds have returned from Rockhampton, the remainder being chiefly arrivals at Sydney from Melbourne, on their way to the Fitzroy River, and remaining in consequence of the failure of the Canoona Diggings.

There are 666 applicants, or about one-half who came originally from the Victoria Diggings, 323 from the Western Diggings, 142 from Braidwood, 103 from the Peel River and other Northern Diggings, 24 from Adelong and other Southern Diggings, 13 from Nelson and other New Zealand Diggings, and 4 from Tasmania, leaving the number of applicants (not practical diggers), laborers and mechanics of Sydney out of employment, 75.

List of applicants to the Committee:—

From the Gold Fields of Victoria	666
Western Gold Fields, New South Wales... ..	323
Braidwood	142
Peel River and Rocky River	103
Adelong	24
Nelson and New Zealand Diggings... ..	13
Tasmania... ..	4
	1,275
Laborers and Mechanics of Sydney	75
	1,350

Of the Applicants, 100 have been sent to the Meroo, 200 to the Turon, 200 to Mudgee,—making a total of 500 forwarded to the Western Gold Fields.

Two hundred and ninety-six (296) have been sent to the Clyde River for Braidwood and the other adjacent diggings, 112 to the Peel River and other Northern Diggings, 140 to the Fairfield Diggings on the Clarence River, and 52 to Adelong, making the total number forwarded by the Committee into the interior 1,100, of whom at least 1,000 are practical Gold diggers.

List

List of applicants sent into the interior by the Committee:—

To the Western Gold Fields	500
To Braidwood	296
To Fairfield	140
To Peel River	112
To Adelong	52
	1,100

Of the 1,100 applicants sent into the interior by the Committee, 500, or nearly one-half, are from the various Victoria Diggings, 160 from the Western Gold Fields, 150 from Braidwood, 66 from the Peel River, 24 from Adelong, 12 from New Zealand, 9 from Fairfield, 3 from Tasmania, and 26 from Sydney, making 950; of the 150 remaining, 100 were sent to the Clyde River for Braidwood, without an account being taken of the diggings they had been upon, while the other 50 had been to the Fitzroy River, but to no other diggings. The Committee have therefore the pleasure of announcing to their subscribers and the public, that they have forwarded into the interior, and placed in a position to develop the resources and capabilities of the Colony, the labor and skill of 1,100 men, diggers and others, many of whom arrived in Sydney from Rockhampton with means completely exhausted, and in a state of utter destitution.

The number of applicants names still upon the list is 250, which number will probably be doubled in the course of a few days, arrivals from Rockhampton being expected daily.

SECOND REPORT.

Sydney, 13 December, 1858.

THE Committee have the honor to Report, that the number of applicants to the Committee for assistance in reaching the Gold Fields, from November the 15th to December 8th, when the list was finally closed, is 425, making the number of applicants 1,775, of whom 1,489 have been forwarded into the interior, at an estimated outlay of (£2,806) two thousand eight hundred and six pounds, or about (£1 18s.) one pound eighteen shillings per head, leaving a balance in hand of (£850) eight hundred and fifty pounds.

Of the applicants to the Committee there are—

From the Gold Fields of Victoria	933
Western Gold Fields	410
Braidwood	156
Peel River and Rocky River	127
Adelong	30
Nelson and other New Zealand Gold Fields ...	17
Tasmania	6
California	3
Adelaide	8
Laborers and Mechanics of Sydney	85
	1,775

There have been forwarded by the Committee into the interior—

To the Western Gold Fields	868
Braidwood	296
Fairfield	140
Peel River and Rocky River	112
Adelong	73
	1,489

Of the 1,489 diggers and others forwarded into the interior by the Committee, a large proportion had been to Rockhampton, many of whom returned to Sydney without any means of subsistence, and who, but for the assistance thus afforded, must have been dependent upon charity for support, as it would be almost an impossibility to have provided the large number of men thus suddenly thrown into Sydney with employment.

Of the results of this movement it is as yet too soon to speak with any certainty; but there is little reason to doubt that the community will ultimately benefit by the labor and skill of the large number of practical diggers who have been placed in a position to accomplish one of the objects proposed by the Committee—the development of the capabilities of the Gold Fields of New South Wales.

Nearly 1,500 men have been assisted in circumstances of great distress—the result of the rush to the Fitzroy River—and will probably be enabled to retrieve their losses, by finding a more profitable market for their labor than the Cancona Diggings; and those who are unable, from want of tools or means, to work upon the Gold Fields, will supply the existing demand for labor in the country districts; the want of labor being much felt, in consequence of the shearing season and the coming harvest.

REPORTS FROM DIGGERS' EMPLOYMENT COMMITTEE.

THIRD REPORT.

Sydney, 16 February, 1859.

THE Committee have the honor to Report to their subscribers and the public, that 1,507 diggers and others have been forwarded to the various Gold Fields of New South Wales, out of 1,789 applicants.

The subscription for this object amounts to (£1,915 3s. 3d.) nineteen hundred and fifteen pounds three shillings and three-pence, to which the Government have added (£1,750) seventeen hundred and fifty pounds, making a total of £3,665 3s. 3d. The expenditure for this purpose to this date is (£2,732 15s. 0d.) two thousand seven hundred and thirty-two pounds fifteen shillings, leaving a balance in hand of (£932 8s. 3d.) nine hundred and thirty-two pounds eight shillings and three-pence.

FOURTH REPORT.

THE SECRETARY TO THE DIGGERS' EMPLOYMENT COMMITTEE to THE COLONIAL SECRETARY.

Sydney, 4 May, 1859.

SIR,

I beg to forward to you the Fourth Report of the Diggers' Employment Committee, with Statement and Balance Sheet to 2nd May; the Committee considering that the necessity no longer exists for forwarding laborers and mechanics of Sydney into the interior to find employment.

The Committee have therefore adjourned for one month, pending the receipt of any outstanding claims, when they will meet to decide upon the disposal of the funds then remaining, after settlement of all claims against the Committee.

I have, &c.,

CHARLES KEMP.

THE HONORABLE
THE COLONIAL SECRETARY.

[Enclosure No. 1.]

Sydney, 2 May, 1859.

THE Committee have the honor to Report, that in accordance with Resolutions passed at a Meeting of the Committee, held the 11th of March, a List was opened of the "Unemployed" of Sydney, in which the names, callings, &c., of 297 applicants have been registered.

Of these applicants 228 have been forwarded into the interior, several being accompanied by their wives and families, namely, to Bathurst, 68; to the Clyde River, 85; to Yass, 39; and to Grafton, 35.

The large increase in the returns from the various Gold Fields shews that the Committee have to some extent succeeded in one of the objects proposed by the Committee—the further development of the Gold Fields of New South Wales.

The Committee have also assisted 1,735 Diggers and others, many of whom may reasonably be expected to return the advances made to them, as from the accounts which have been already received, it is evident that many have done, and are doing well upon the Gold Fields, since they were forwarded to them by the Committee.

The balance in hand on the 16th of February was (£932 8s. 3d.) nine hundred and thirty-two pounds eight shillings and three-pence; the outlay since that date has been (£382 9s. 5d.) three hundred and eighty-two pounds nine shillings and five-pence, leaving a balance in hand of (£549 18s. 10d.) five hundred and forty-nine pounds eighteen shillings and ten-pence. The estimated liabilities incurred to this date are about (£50) fifty pounds, leaving a final balance of about (£500) five hundred pounds. The total outlay to this date is (£3,136 14s. 5d.) three thousand one hundred and thirty-six pounds fourteen shillings and five-pence, out of (£3,686 13s. 3d.) three thousand six hundred and eighty-six pounds thirteen shillings and three-pence, leaving a balance as per statement of (£549 18s. 10d.) five hundred and forty-nine pounds eighteen shillings and ten-pence.

CHARLES KEMP.

The Honorable
The Colonial Secretary.

THE SECRETARY TO THE DIGGERS' EMPLOYMENT COMMITTEE to THE COLONIAL
SECRETARY.

Sydney, 31 January, 1859.

SIR,

The proceedings of the Diggers' Employment Committee having been nearly brought to a close, I beg leave to inform you that the total amount received by private subscription has been (£1,909 17s. 9d.) nineteen hundred and nine pounds seventeen shillings and nine-pence. A List of the Subscribers is enclosed. To meet this, we have received from the Government (£1,750) seventeen hundred and fifty pounds.

Our total expenditure to the present time has been (£2,673 3s. 6d.) two thousand six hundred and seventy-three pounds three shillings and sixpence; and we have in the Bank a balance of (£976 14s. 3d.) nine hundred and seventy-six pounds fourteen shillings and three-pence. We have forwarded into the interior 1,507 persons, out of 1,789 applicants. In a few days we shall have received and paid all outstanding claims, when I will forward a detailed Report of our proceedings, and an Account Current shewing the items of our expenditure.

I have, &c.,

CHARLES KEMP.

THE HONORABLE

THE COLONIAL SECRETARY.

[Enclosure in the foregoing.]

1859.

 Legislative Assembly.

NEW SOUTH WALES.

 DIGGERS' EMPLOYMENT COMMITTEE.

(FINAL REPORT FROM.)

Ordered by the Legislative Assembly to be Printed.

FIFTH and FINAL REPORT of the Diggers' Employment Committee.
Sydney, 26 August, 1859.

1. The Committee have the honor to Report to the Honorable the Colonial Secretary, that since their last Report was sent in the Committee, at the request of the Honorable John Robertson, Secretary for Lands and Public Works, opened a List of Laborers and Mechanics of Sydney who were desirous to procure employment on the Railway Works at Campbelltown. There were 78 applicants to the Committee, 30 of whom were furnished with orders for conveyance by Rail to Campbelltown, the remaining 48 not availing themselves of the assistance offered.

2. The balance in hand to credit of Committee, May 2nd, when the last statement was forwarded, was (549 18s. 10d.) five hundred and forty-nine pounds eighteen shillings and ten-pence; of which amount the Committee have expended (£87 18s. 6d.) eighty-seven pounds eighteen shillings and six-pence, leaving a balance in hand of (£462 0s. 4d.) four hundred and sixty-two pounds and four-pence. The total receipts of the Committee have been (£3,686 13s. 3d.) three thousand six hundred and eighty-six pounds thirteen shillings and three-pence; expenditure (£3,224 12s. 11d.) three thousand two hundred and twenty-four pounds twelve shillings and eleven-pence,—leaving a final balance of (£462 0s. 4d.) four hundred and sixty-two pounds and four-pence.

CHARLES KEMP,
Chairman.

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

THE UNEMPLOYED.

(PETITION OF.)

Ordered by the Legislative Assembly to be Printed, 3 May, 1860.

To the Honorable the Legislative Assembly, in Parliament assembled.

MAY IT PLEASE YOUR HONORABLE HOUSE :—

We, the unemployed laborers and artizans, citizens of Sydney, beg most respectfully to represent the lamentable and miserable condition to which they are reduced in consequence of the great want of employment at present existing, not only in this city, but all over the Colony.

Your Petitioners are of opinion that they are adopting a great constitutional privilege in coming to your Honorable House for redress and alleviation in seasons of calamity and deep distress.

Your Petitioners are firmly impressed with the conviction that it is in your power to alleviate their distresses by opening (for the benefit of the unemployed) some of those great public works for which large sums of money have been voted, particularly the road between Pyrmont and Glebe Island ; your viaducts have been swept away—your railway lines require vast repair—the Long Bay Road requires formation—and there are various other public works which would afford us relief upon this lamentable occasion.

We therefore pray your Honorable House to take our case into your consideration, and, by opening some of these public works for the benefit of the unemployed, dispel the heavy gloom at present hovering over our circumstances.

And your Petitioners, as in duty bound, will ever pray.

Signed, on behalf of the Meeting,

W. JENNETT,
Chairman.

J. H. WEST,
Secretary.

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

WILLIAM JENNETT.

(PETITION OF.)

Ordered by the Legislative Assembly to be Printed, 25 May, 1860.

To the Honorable the Legislative Assembly, in Parliament assembled.

MAY IT PLEASE YOUR HONORABLE HOUSE :—

We, the undersigned Electors and Citizens of Sydney, beg most respectfully to represent, that on Friday, the 11th inst., a public meeting was held in Hyde Park, at which, among other resolutions, it was proposed and carried that "a deputation be formed, for the purpose of proceeding to the Assembly, and presenting the thanks of the meeting to six Members of your Honorable House."

2ndly. That in the exercise of this their constitutional privilege, your Petitioners complain that they were resisted, not by any act, word, or deed of the three Estates of the Realm, but by the intervention of usurped authority on the part of a Civic functionary, who dared to outrage law and order, and despotically trifle with the inalienable right of Englishmen.

3rdly. That your Petitioners respectfully represent, that not only was the deputation refused admittance, but were most unjustifiably assaulted by the Police, trampled under the horse hoofs of the Mounted Patrol, and many persons brutally beaten with bludgeons; some falsely imprisoned and subjected to every species of indignity, degrading to their moral standard as citizens of unblemished and unimpeachable reputation, destructive to their confidence in that administration of justice which could associate citizens—prisoners of the State—with thieves, vagabonds, and persons capable of crimes that put your Petitioners to the blush to designate even but in name; and the which your Petitioners indignantly, manfully, but respectfully resent, and represent to your Honorable House.

4thly. Your Petitioners desire to know, for the sake of the liberty of the subject, as well as for the sake of future deputations, under what circumstances, and by whose orders, this unnecessary display of questionable power and ferocity took place.

5thly. Your Petitioners being well advised that, had the Mayor and Police not "interfered," there could and would have been no dispute whatever. And be it remembered, that nothing disorderly did occur until that interference took place.

In conclusion, your Petitioners pray for the appointment of a Select Committee to inquire into the whole transaction, feeling confident as they do that the blame will then be placed upon the right persons.

And your Petitioners, as in duty bound, will ever pray.

Signed on behalf of the Meeting,

WILLIAM JENNETT,

Chairman.

Sydney: Thomas Richards, Government Printer.—1860.

BY-LAWS OF THE SOCIETY FOR THE RELIEF OF DESTITUTE CHILDREN.

I.—OBJECT.

1. The object of the Society is—the protection, support, industrial training, and moral and religious instruction of children, deserted or left destitute by dissolute and abandoned parents, or from other causes neglected, or in a state of great privation, and without adequate means of support.

2. Under the foregoing description of destitute children admissible into the Institution, shall be included only:—

1st—Children abandoned by their parents, or left without friends and protection.

2nd—Children the offspring of parents, either or both of whom may, from profligate habits, or conviction for felony, be unable to support, and unfit to educate them; and who may voluntarily surrender them to the care of the Society.

3rd—Children who, coming within any of the classes above enumerated, may, according to any law in force for the time being, be compulsorily placed in the Institution.

4th—

- 4th—Children of any of the above classes, who may be received, by order of the Government, from any Benevolent Asylum or other Public Institution; and for whose support provision shall be made by the Legislature.
3. Children admissible into the Protestant or Roman Catholic Orphan Schools shall not be considered eligible for reception into this Institution.
4. In every case the House Committee—to be constituted in manner hereinafter mentioned—shall determine the amount (if any) to be paid for the support of the children coming within the 1st, 2nd, and 3rd classes above enumerated, and the security to be taken for its payment.
5. Children admitted by order of the Government shall be paid for according to an estimate—to be prepared by the House Committee—of the average cost of each child for the time being.
6. No child shall be admitted into the Institution who shall not be certified by one of its medical officers to be free from any contagious, infectious, or cutaneous disease.
7. No child shall be admitted of an age younger than three years, or older than ten years, unless in cases of peculiar emergency, to be decided by the House Committee.
8. No child shall be admitted into the Institution, or allowed to leave it, or shall be dismissed from it, unless by order of the House Committee.
9. So soon as any child shall have attained the age of fourteen years, or earlier if advisable, but not being under twelve years, the House Committee shall take the necessary steps to have such child apprenticed according to law, or otherwise suitably provided for.

II.—MEMBERS.

10. Every subscriber of one guinea per annum shall be a Member of the Society.
11. Every donor of ten pounds in one payment shall be a Life Member.
12. Every donor of fifty pounds in one payment shall be a Life Director.
13. Every Minister of Religion who shall raise for the Society, from his congregation, the sum of fifty pounds, in one or more collectings, shall be a Life Member.

III.—PATRON.

14. His Excellency the Governor General shall be invited to accept the office of Patron of the Society.

IV.—OFFICERS, AND BOARD OF MANAGEMENT.

15. There shall be a President, one or more Vice-Presidents, a Treasurer, and Secretary; all of whom shall be elected at the Annual General Meeting.
16. The Management of the Institution shall devolve upon a Board of Directors, consisting of the officers mentioned in the preceding rule, and all Life Directors, together with not less than sixteen Members, to be elected at the Annual General Meeting; six of whom shall retire at the end of each year, being those Members who have attended the Meetings of the Board the least number of times, but who, nevertheless, shall be eligible for re-election.

17. If any of the offices aforesaid, or elective seat at the Board, shall become vacant after the annual election, the same shall, until the next Annual General Meeting, be provisionally filled up by the Board of Directors, at any monthly meeting: notice being previously given of the name of the Member intended to be proposed to fill such vacancy.

V.—MEETINGS OF THE SOCIETY.

18. An Annual General Meeting of the Society shall be holden in each year, in the month of January, or as soon after as the Board of Directors may deem advisable. Notice of such meeting shall be given in one or more of the public newspapers, at least ten days before the time appointed for holding the same.

19. A Special General Meeting of the Society, for the transaction of any particular business, may at any time be called by the Board of Directors, or on a requisition being addressed to the Secretary, by not less than seven Members; and notice thereof, and of the matter to be considered, shall be given in like manner, and for a similar period, as in the case of the Annual General Meeting.

20. At every Annual General Meeting, or Special General Meeting, not less than fifteen Members shall be required to form a quorum.

21. At the Annual General Meeting, the Report of the Directors and the audited Accounts of the Treasurer for the past year shall be presented; and such other business transacted as may be brought before the meeting by the Board of Directors.

22. If, at the time appointed for any Annual or Special General Meeting, a sufficient number of Members to form a quorum be not present, the Chairman by his own authority, or on the motion of any Member, may adjourn such meeting to some future convenient day.

VI.—DUTIES OF THE BOARD OF DIRECTORS AND HOUSE COMMITTEE.

23. The Board shall meet once a month, for the transaction of business, at such times and places as they may appoint; and five of them shall be a quorum. The Secretary, on occasions of emergency, or when requested by three Members of the Board, shall be empowered to call Special Meetings—the nature of the business to be specified in the notice.

24. The Board shall, at the first meeting after each Annual General Meeting of the Society, appoint from among the Members a House Committee, consisting of not less than nine Members—three to be a quorum—whose duties shall be:—

1st—To meet at the Institution once a week, or oftener if they deem necessary, on such day or days, and at such hour, as they may from time to time appoint; there to inspect and manage the domestic affairs of the Institution.

2nd—To receive applications for the admission of children, and decide upon them.

3rd—To hire and discharge servants.

4th—To give instructions to the Superintendent and Matron, on all points connected with the duties of their office.

5th—To receive and decide upon tenders for supplies; and to order the necessary purchase of utensils, clothing, furniture, articles of food, fuel, &c., where no tenders are required; and to inspect the monthly bills.

6th—To report to the Board the monthly accounts, as well as to lay before it the Minutes of their proceedings during the preceding month.

25. The Board shall give instructions to the House Committee upon any of the matters committed to their management, as it may think advisable.

26. The Board will make such by-laws for the management of the Institution, and for the admission of children, as circumstances may render advisable.

27. The Board shall have the power of appointing and dismissing the Superintendent and Matron.

VII.—THE TREASURER.

28. All moneys received by him shall be lodged in the Commercial or other Colonial Bank, in the name of "The Society for the Relief of Destitute Children."

29. At every Monthly Meeting of the Board the Treasurer shall furnish a balance sheet, shewing the then state of the funds of the Institution.

30. No account shall be paid by him, excepting upon the authority of the Board given at some duly convened meeting, and certified accordingly by the Chairman then present.

31. All cheques shall be signed by the Secretary and the Treasurer.

32. The Board shall appoint annually two Auditors, to audit the Treasurer's accounts previously to the Annual General Meeting.

VIII.

VIII.—THE SECRETARY.

33. His duties shall be to attend all meetings of the Board and House Committee, to keep the Minutes of the proceedings, and to conduct the general correspondence of the Institution.

34. To summons all meetings, and—subject to the approval of the Directors—to prepare the annual Report.

35. To arrange the business to be brought before the Board and House Committee.

36. To take charge of all documents, &c.

IX.—SUPERINTENDENT AND MATRON.

37. They shall impart to the children useful knowledge, by instructing them practically in domestic and other industrial pursuits, as well as the elements of a plain English education; with such assistance as the House Committee may deem necessary.

38. They shall have entire charge of the house furniture, bedding, and stores; shall preside at all the meals of the children; shall have the general superintendence of the servants; shall keep a daily journal of the house, a diet book, and a register of admissions, departures, and deaths; shall report to the House Committee every case of misconduct on the part of the children or servants; and in general carry out the instructions of the Board of Directors and House Committee.

X.—EDUCATION OF THE CHILDREN.

39. A system of moral training should be adopted, in the first instance (with the youngest children), similar to that pursued in infant schools; to be followed by a general education, conducted as far as possible on the system pursued in the National Schools, and supplemented by such industrial training as the Board may from time to time direct. The hours of attendance to be fixed by the House Committee.

XI.—RELIGIOUS EXERCISES.

40.

1st—A form of prayer, to be approved of by the Directors, shall be read morning and evening by the schoolmaster; and grace shall be said before and after meat.

2nd—During the reading of prayers the children of Roman Catholic parents shall be allowed to retire to another department, where arrangements may be made with the House Committee for conducting the devotions after their own forms.

3rd—On Sundays the Protestant children may attend the Episcopal Church nearest to the Institution; except in the case of those who are not Episcopalians, who shall be at liberty to attend their own places of worship, upon a representation being made to the House Committee, and proper surveillance secured.

4th—The children of Roman Catholic parents may attend at the church of that denomination nearest to the Institution; the proper surveillance of them also being secured.

5th—On the Friday of each week, and between such hours as the House Committee shall appoint, the children of the various denominations shall be allowed to receive religious instructions from duly authorized persons belonging to their various communions. The names and authority of such persons shall be reported to the House Committee.

XII.—DRESS, FOOD, AND GENERAL CARE OF CHILDREN.

41.

1st—The children shall wear one uniform dress, as may be directed from time to time by the House Committee.

2nd—They shall have three meals a day—breakfast, dinner, and supper; to consist of such articles and such quantities as the House Committee may from time to time appoint.

3rd—They shall have their hair cut short, and be washed in a bath, upon their admission; and be well washed and combed every morning.

XIII.

XIII.—VISITING.

42.

1st—No person shall be allowed to visit the Institution on Sunday, except Ministers of Religion, Members of the Board, and such friends as they may bring along with them.

2nd—No parent or relative of a child abandoned by its parents shall be admitted to see such child without the special order of the House Committee.

3rd—Visitors to the Institution, not being Members of the Board, shall only be admitted between the hours of 11 a. m. and 4 p. m. in winter, and till 6 p. m. in the summer; or at such other hours as the House Committee may appoint.

4th—Parents or other relatives shall only be allowed to see the children in the presence of the Superintendent or Matron.

XIV.—MEDICAL OFFICERS.

43. There shall be one Physician, and one Surgeon, who shall be appointed by the Board of Directors, at its first meeting after each Annual General Meeting of the Society. The duties expected to be performed by them shall be—to visit the Institution once a week, for the general inspection of the children, and to give the necessary attendance and advice when any of them are sick.

XV.—THE RULES.

44. No alteration of or addition to the preceding Rules shall be made, except upon the recommendation of the Board of Directors, and at the Annual General Meeting of the Members of the Society, or some Special General Meeting duly convened for the purpose.

HAWKESBURY BENEVOLENT SOCIETY'S ACT AMENDMENT BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and Report was referred, on the 16th February last, the "*Hawkesbury Benevolent Society's Act Amendment Bill*," beg leave to Report to your Honorable House,—

That they have carefully perused the Bill referred for their consideration, and examined the Solicitor for the Society* (whose evidence will be found appended hereto), and that the Preamble of the Bill having been satisfactorily proved by the evidence of that gentleman, they proceeded with the several clauses of the Bill, in which they found it unnecessary to make any amendment.

And your Committee now beg to lay before your Honorable House the said Bill, with a *verbal amendment*† in the Preamble.

*W. Walker,
Esq., M.P.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

HAWKESBURY BENEVOLENT SOCIETY'S ACT
AMENDMENT BILL.

THURSDAY, 26 APRIL, 1860.

Present:—

MR. HAY, | MR. PARKES,
MR. PIDDINGTON.

HENRY PARKES, ESQUIRE, IN THE CHAIR.

William Walker, Esq., M.P., examined:—

1. *By the Chairman*: You are a Solicitor of the Supreme Court, I believe? Yes.
2. Do you act professionally for the Hawkesbury Benevolent Society? I did; I drew this Bill up and had it placed in the hands of Mr. Dalley.
3. Have you got the original Act of Incorporation before you? Yes.
4. What are the provisions of that Act as to the Society holding freehold property? The sixth section states—"That the members of the said Society shall be, and they are hereby authorised and empowered, by and in the name of the Trustees of the said Society, hereinafter named, or the Trustees thereof, for the time-being, to accept, take, and hold any estate or estates, in lands, tenements, or hereditaments, already granted or hereafter to be granted to them by the Crown, but no other estates, lands, tenements, or hereditaments whatsoever except what may be absolutely required for the purpose of building a house or houses, for receiving the persons to be relieved by the said Society."
5. *By Mr. Piddington*: Is that the whole of that section? Yes.
6. *By the Chairman*: I believe you have held some office in the Society? Yes; I was, until very recently, honorary secretary.
7. And you are also solicitor? Yes.
8. Will you be good enough to state to the Committee the circumstances which render it expedient to alter and amend that section of the Act? The Society have been advised that they cannot hold, under this clause, any lands, except lands granted to them by the Crown, unless such are absolutely required for building a house, as stated by the section. Now it so happens that the Society has a large sum of money—surplus money—which they are desirous to invest on real security, that is, by way of mortgage, but under this clause they are prevented from taking any mortgage, inasmuch as in the way mortgages are now drawn—as I dare say you are aware—there is a conveyance of the lands; the lands are conveyed, subject to redemption. Under this clause they have been advised they cannot accept a mortgage, and therefore they have been precluded from investing their money, by way of mortgage; and it is more particularly to enable the Society to invest their money in that way that they wish to be empowered in the manner provided by this Bill.
9. *By Mr. Hay*: What do the words in the last clause—"either absolutely or on mortgage, or otherwise howsoever"—apply to? That means that they can take an absolute conveyance from a private individual.
10. Then they refer to the preceding words—"to accept, take, and hold"—not to the words "conveyed or granted"? The words—"accept, take, and hold any estate or estates, in lands, tenements, or hereditaments conveyed or granted to them by any person or persons whomsoever, either absolutely or upon mortgage, or otherwise howsoever"—are all taken together. Under these words the Society could hold lands absolutely on mortgage, that is, if they choose to take a simple conveyance they can do so.
11. In fact the last words of the clause qualify the words "accept, take, and hold," not the words "conveyed or granted"? Yes; the Society are to "accept, take, and hold," absolutely, or on mortgage, as circumstances may arise.

W. Walker,
Esq., M.P.

Legislative Assembly.

NEW SOUTH WALES.

SCHEDULE FOR PUBLIC WORSHIP.

(DESPATCHES AND INSTRUCTIONS RELATING TO.)

Ordered by the Legislative Assembly to be Printed.

RETURN to an *Address* from the Honorable the Legislative Assembly of New South Wales, to the Governor General, dated 8 March, 1859, praying that His Excellency would be pleased to cause to be laid upon the Table,—

“ Copies of all Royal Instructions, or of any Despatches
 “ from Secretaries of State, relating to the appropriation or
 “ distribution of the sum of £28,000, reserved by Schedule
 “ C to Schedule I of the Act of the Imperial Parliament, 18
 “ and 19 Vict., cap. 54.”

(Mr. Piddington.)

SCHEDULE.

NO.	PAGE.
1. Extract from the Royal Instructions to His Excellency Sir Charles Fitz Roy, as Governor of New South Wales, in reference to the Schedule for Public Worship annexed to the Act 5th and 6th Victoria, Cap. 76. 20 January, 1846.	3
2. Despatch from the Secretary of State to Governor Sir Charles Fitz Roy, respecting an application made for superior Salaries for a Roman Catholic Bishop and a Vicar General. 6 December, 1849.	4
3. Minute of the Executive Council on the subject. 21 May, 1850.	4
4. Secretary of State to Governor Sir Charles Fitz Roy, further with reference to the application before mentioned. 22 December, 1849.	5
5. Minute of the Executive Council on the foregoing Despatch. 15 July, 1850.	6
6. Secretary of State to Governor Sir Charles Fitz Roy, on same subject. 7 February, 1851.	6
7. Minute of the Executive Council, stating their views of the question raised by the application referred to. 17 June, 1851.	7
8. Minute of the Executive Council on the subject of the omission, in the new Instructions to Sir Charles Fitz Roy, dated 31 December, 1850, of any order or direction, such as was contained in the 37th Clause of those of the 20 February, 1846, respecting the Sums reserved for Public Worship by the 13th and 14th Vict., Cap. 59, and suggestions with respect to it. 5 August, 1851.	8
9. Secretary of State to Governor Sir Charles Fitz Roy, pointing out and explaining the reasons for omitting in the Instructions of the 31 December, 1850, the 37th Clause of the Royal Instructions of 1846, relating to the disposal of the Public Worship Fund; and respecting the grant of Salaries to certain superior Clergy. 26 February, 1852, No. 28.	10
10. Same to the same, referring to the previous Despatch as containing the reason why no order or direction was conveyed by the Royal Instructions of 1850 for the distribution of the Public Worship Fund, and concurring in the arrangement with respect to it suggested in the Minute of the Executive Council of the 5th of August, 1851 (No. 8.) 30 July, 1852, No. 45.	11
11. Minute of the Executive Council regulating the distribution of the Public Worship Fund, in pursuance of the authority conveyed in the Despatch No. 45, of the 30 July, 1852. 12 January, 1853.	11
12. Extract of Despatch from Secretary of State to Governor Sir W. Denison, in which the Constitution Act, 18th and 19th Vic., Cap. 54, was forwarded, adverting to the provision made in the Schedule thereto annexed for certain services, and intimating intention to furnish the Governor with Instructions amended in such particulars as the introduction of Responsible Government rendered it necessary to change. 20 July, 1855.	13
13. Secretary of State to Governor Sir William Denison, forwarding such Instructions. 8 September, 1855.	13

SCHEDULE FOR PUBLIC WORSHIP.

No. 1.

*EXTRACT from the Royal Instructions to His Excellency Sir Charles Augustus Fitz Roy,
as Governor of New South Wales, dated 20th February, 1846.*

“ *Thirty-seventh* —Whereas by an Act of Parliament made and passed in the fifth and sixth year of Our Reign, intituled, “ *An Act for the Government of New South Wales and Van Diemen’s Land,*” it is amongst other things provided, that out of the Revenue Fund of Our said Territory of New South Wales, there shall be payable every year to Us, Our Heirs and Successors, a sum of thirty thousand pounds for defraying the expenses of the several services and purposes under the head of Public Worship, as specified in the Schedule C, annexed to the said Act; and whereas Our Executive Council of Our said Territory, by a certain Resolution adopted by them on the ninth day of June, one thousand eight hundred and forty-five, proposed and advised that the said sum of thirty thousand pounds should be distributed in the manner following, that is to say :—

“ *First*.—That the thirty thousand pounds granted to Her Majesty by Schedule C of the Act of Parliament fifth and sixth Victoria, chapter seventy-six, be divided among the Communions now receiving aid from the Government, under the Colonial Church Act, 7th William IV., No. 3, in proportion to the numbers of their respective members as shewn in the Census Tables of the year one thousand eight hundred and forty-one.

“ *Second*.—That the total amount of stipends granted to any one of the said Communions be limited to five-sixth parts of the sum allotted to it,—it being however understood that the proportions mentioned in this and the preceding paragraph will be temporarily varied, so far as may be necessary, to secure to existing Clergymen a continuance of the salaries which they at present enjoy.

“ *Third*.—That all salaries granted to Ministers of Religion previously to the passing of the Church Act, be held to form a primary charge upon the portions of the thirty thousand pounds assigned to the Communions by whose Ministers those salaries are enjoyed.

“ *Fourth*.—That subject to the reservation contained in the preceding paragraph, the thirty thousand pounds shall be appropriated under the provisions of the Colonial Church Act, 7th William IV., No. 3.

“ *Fifth*.—That any portion of the yearly sum, assigned as aforesaid to any one of the said Communions, which shall remain unexpended at the year’s end, shall be reserved for the benefit of that Communion, and shall be applied to any purpose connected with the Public Worship thereof, which shall be recommended by the head of such Communion, and approved of by the Governor and the Executive Council.”

“ Now, therefore, in exercise of all and every the powers in Us in that behalf vested, We are pleased hereby to sanction, confirm, and ratify the said several recommendations of Our Executive Council, in regard to the distribution of the aforesaid sum of thirty thousand pounds so to be expended for the services and purposes of Public Worship in Our said Territory of New South Wales: And We further direct, that until further orders shall be made in that behalf, the apportionment of the said sum, as recommended by Our said Council for the services and purposes aforesaid, shall be observed and followed by you: Provided always, and We do hereby reserve to Ourselves, Our Heirs, and Successors, full power and authority to modify and explain so much of the recommendations aforesaid as relates to the appropriation of a portion of the said sum of thirty thousand pounds for the support of the Clergy of the Church of England in Our said Territory.”

No. 2.

THE SECRETARY OF STATE FOR THE COLONIES to GOVERNOR SIR CHARLES FITZ ROY.
(No. 192.)

Downing-street,
6 December, 1849.

SIR,

I transmit to you the copy of a letter which has been addressed to me by the Rev. Dr. Geoghegan, submitting the claim of Dr. Goold to a provision for a superior salary as Roman Catholic Bishop at Port Phillip, and advancing a similar claim on his own account as Vicar General of Dr. Goold.

Dr. Goold appears to have been one of the Chaplains on the Establishment of the Sydney District, with the usual salary under the Church Act of £200. There he seems to have been superseded by another Chaplain, and to have proceeded to Port Phillip in the character of Bishop, but without being borne on the establishment of the Colony.

The principle has already been established in the cases of Archbishop Polding and Bishop Wilson in Van Diemen's Land, of granting superior salaries to the heads of the Roman Catholic Churches in those Colonies, but I have informed Dr. Geoghegan that I exercise no control over the distribution of the share of the £30,000 appropriated to religious purposes in New South Wales under Schedule C of the Constitution Act, except that measures adopted on the subject by the local authorities are referred to me for allowance or disallowance. I can therefore only refer the question to you for your opinion.

I have, &c.,

GOVERNOR SIR CHARLES FITZ ROY,
&c., &c., &c.

GREY.

[Enclosure in No. 2.]

London, 63, Paternoster Row,
21st November, 1849.

My Lord,

As the Vicar General of the Right Reverend Dr. Goold, Bishop of the Roman Catholic Church of Port Phillip, I have the honor to bring under your Lordship's earliest consideration the following statement and application.

The Right Rev. Bishop Goold has been canonically constituted the head of the Roman Catholic Church of Port Phillip, since the 6th of August, 1848; up to this period, however, His Lordship has received no stipend or allowance of any kind from the Colonial Treasury. This deficiency lays the Roman Catholic Clergy and community of the district under privation of one of the principal benefits intended by the Colonial Church Act, their Bishop being thus rendered dependent solely on them for his support.

The Most Reverend Archbishop Polding receives for himself £500, and for his Vicar General £200 per annum, in virtue of the Church Act, and for their respective offices. Bishop Goold is the Head of the Roman Catholic Church of Port Phillip, precisely as Archbishop Polding is the head of the Roman Catholic Church of the District of Sydney; and I humbly submit to your Lordship that it is not only equitable, indeed a realization of the intents of the Church Act, which respects equally the districts of Sydney and Port Phillip, but most desirable, as between Her Majesty's Government and her faithful Roman Catholic subjects in so new a Colony, to make provision for Bishop Goold and the office of his Vicar General, similar to the provision made so wisely for Archbishop Polding's Establishment. I therefore beg most respectfully that your Lordship will have the goodness to authorize His Excellency the Governor of New South Wales, to recognize Bishop Goold's claims in this matter, and to issue, under title of the Church Act, stipends accordingly.

I have, &c.,

P. B. GEOGHEGAN,
Vicar General, Melbourne.

The Right Honorable Earl Grey.

No. 3.

PROCEEDINGS of the Executive Council on the 21st May, 1850, relative to a Despatch from the Secretary of State, respecting an application made to him by the Rev. Dr. Geoghegan, in England, for Superior Salaries for the Roman Catholic Bishop and Vicar General in the District of Port Phillip.

Minute No. 50-20. Confirmed 10th June, 1850.

His Excellency the Governor lays before the Council a Despatch from the Secretary of State, respecting an application made to him by the Rev. Dr. Geoghegan, in England, for superior salaries for the Roman Catholic Bishop and Vicar General in the District of Port Phillip.

SCHEDULE FOR PUBLIC WORSHIP.

5

2. His Lordship in this Despatch states that the principle has been already established in the cases of Archbishop Polding and Bishop Wilson, in Van Diemen's Land, of granting superior salaries to the heads of the Roman Catholic Churches in those Colonies; but that he has informed Dr. Geoghagan that he exercises no control over the distribution of the thirty thousand pounds appropriated to religious purposes in New South Wales, under £30,000. Schedule C of the Constitution Act, except that measures adopted on the subject by the local authorities are referred to him for allowance or disallowance. The question is, therefore, referred by His Lordship for the Governor's opinion.

3. The Council do not see any objection in principle to superior salaries being granted to the Roman Catholic Bishop and Vicar General at Melbourne, as they are at Sydney, if the funds to be appropriated under the expected Act of Parliament, providing for the formation of the Port Phillip District into a separate Colony, will admit of the additional charges being made upon them. It should, however, be explained that Dr. Geoghagan is in error in supposing that such salaries can be granted under the Church Act of the Colony, and, as Her Majesty has directed by Instructions issued under the Sign Manual, that the Roman Catholic share of the funds appropriated to purposes of Public Worship shall be applied under the provisions of that Act, the desired salaries cannot be granted without Her Majesty's express authority.

4. The Council accordingly advise that a reply should be made to the Secretary of State to the above effect.

FRANCIS L. S. MEREWETHER,

Clerk of the Council.

*Executive Council Office,**Sydney, 18 June, 1850. No. 50-163.*

No. 4.

THE SECRETARY OF STATE FOR THE COLONIES to GOVERNOR SIR C. A. FITZ ROY.

(No. 212.)

*Downing-street,**22nd December, 1849.*

SIR,

With reference to my Despatch No. 192, of the 6th instant, I transmit to you, herewith, a copy of a further letter from the Reverend Dr. Geoghagan, on the subject of his ^{8 Dec., 1849.} application for a special provision for the Salaries of the Roman Catholic Bishop at Port Phillip, and of his Vicar General.

I have directed that Dr. Geoghagan should be informed that I would authorise you to act upon that application, if you should think it desirable to do so, and should have sufficient funds for that purpose, without incurring the further delay of a reference to this country.

At the same time, it has been pointed out to Dr. Geoghagan, that, so far as I am informed, I am not aware of any special provision being made in any of the Australian Colonies for Vicars General, beyond the salary of an Ordinary Chaplain.

I have, &c,

GOVERNOR SIR C. A. FITZ ROY,
&c., &c., &c.

GREY.

[Enclosure in No. 4.]

*London, 63, Paternoster Row,
8 December, 1849.*

Sir,

I had the honor to receive your letter of the 6th instant, communicating to me Earl Grey's intention of transmitting to the Governor of New South Wales, for his opinion, my application dated 21st ultimo, for the grant of salaries to the Right Reverend Bishop Goold and his Vicar General, conformably with the principle upon which similar salaries are issued to the Most Reverend Archbishop Polding's Ecclesiastical Establishment.

My duty hastens me to request you will have the goodness to lay before Earl Grey my respectful suggestions of an amendment to his Lordship's decision, prior to its despatch to the Colonies;—it is founded on these reasons,—

First, Any surplus, which yet for sometime may rest over the current expenditure of the Roman Catholic apportionment of the £30,000 appropriated to Public Worship

SCHEDULE FOR PUBLIC WORSHIP.

Worship would with certainty be employed, and on missionary objects, inferior in claim to that of Bishop Goold, within the term of eighteen months or upwards, necessary for Earl Grey's proposed purpose.

Secondly, The Governor and Executive Council are invariably confined to the regulations of the Church Act in their strictest technicality; Bishop Goold's case, although in perfect unison with the intent of the Church Act, is a new case, and requires a new rule which the Governor and Executive Council would not consider themselves justified in framing, without authority from Her Majesty's Secretary of State for the Colonies.

In order therefore to meet the exigency of my application, I respectively beg to suggest, that in Earl Grey's Despatch on this subject, his Lordship would be pleased to signify his allowance of the necessary rule, should the Governor and Executive Council deem it equitable to frame it.

I have, &c.,

P. B. GEOGHEGAN,
Vicar General.

Benjamin Hawes, Esq., M.P.,
Colonial Office.

No. 5.

PROCEEDINGS of the Executive Council on the 15th July, 1850, relative to a Despatch from the Secretary of State, respecting a Salary for the Roman Catholic Vicar General at Port Phillip.

Minute No. 50-28. Confirmed 29th July, 1850.

His Excellency the Governor lays before the Council a Despatch from the Secretary of State, in which in compliance with a request to that effect made by the Reverend Dr. Geoghegan, His Lordship authorizes the Governor to act upon that gentleman's application for a salary for the Roman Catholic Vicar General at Port Phillip, should His Excellency think it desirable to do so, and should there be sufficient funds for the purpose without incurring the further delay of a reference to England.

2. It does not appear to the Council that any measures can be taken on this Despatch, as the Governor and Council have no power to grant the salary in question, without the express authority of Her Majesty. The necessity for such an authority was pointed out in their former Minute on the subject, with a view to its being brought under the notice of the Secretary of State.

FRANCIS L. S. MEREWETHER,
Clerk of the Council.

*Executive Council Office,
Sydney, 5th August, 1850. No. 50-215.*

No. 6.

THE SECRETARY OF STATE FOR THE COLONIES to GOVERNOR SIR C. A. FITZ ROY.

*Downing-street,
7 February, 1851.*

(No. 11.)

SIR,

I have received your Despatches, Nos. 124 and 154, of the 6th July and 14th August last, on the subject of the application of the Reverend Dr. Geoghegan for the grant of superior salaries for the Roman Catholic Bishop and Vicar General, in the District of Port Phillip.

You report that the Executive Council saw no objection, in principle, to the grant of superior salaries to the Roman Catholic Bishop and Vicar General, at Melbourne, as at Sydney, if the funds to be appropriated under the recent Act of Parliament, providing for the formation of Port Phillip into a separate Province, should admit of such additional charge being made upon them; but, you add, that the Executive Council consider it necessary to point out, that Dr. Geoghegan was in error in supposing that such salaries can be granted under the Church Act of the Colony, and that, as Her Majesty has directed, by Instructions under the Sign Manual, that the Roman Catholics' share of the funds appropriated to purposes of Public Worship, shall be applied under the provisions of that Act, the desired salaries cannot be granted without Her Majesty's express sanction.

I feel some difficulty in clearly understanding the conclusion at which you and the Executive Council have arrived.

Under

Under the 37th Clause of the Royal Instructions, which were founded on the recommendation of the Executive Council, you are enabled to apply the proceeds of the sum set apart in the Schedule, for the Roman Catholics, in accordance only with the provisions of the Church Act, 7 William IV., No. 3, with the exception of any surplus remaining above the sum necessary for the purposes of that Act. Such surplus you are enabled to appropriate, with the advice of your Council, for general purposes connected with Roman Catholic Public Worship.

I am aware that the Act contains no provision which can be construed into an express authority for paying such higher salaries to the superior Clergy. It would seem, therefore, that if such higher salaries can be given, it can only be out of the surplus appropriable for "general purposes;" but, if so, the Queen's express authority is not requisite, and if this surplus is already anticipated, or for other reasons cannot be so applied, I do not see what directions Her Majesty can give; for it is not in the power of the Crown to increase the fund fixed under the Schedule, or to apply any other fund to the same purpose.

I have, &c.,

GOVERNOR SIR C. A. FITZ ROY,
&c., &c., &c.,
New South Wales.

GREY.

No. 7.

PROCEEDINGS of the Executive Council, on the 17th June, 1851, relative to a Despatch from the Secretary of State, on the subject of the Rev. Dr. Geoghegan's application for the grant of Superior Salaries for the Roman Catholic Bishop and Vicar General in the District of Port Phillip.

Minute No. 51-30. Confirmed, 24 June, 1851.

WITH reference to the Proceedings on the 21st May and 15th July, 1850, His Excellency the Governor General lays before the Council a farther Despatch from the Right Honorable the Secretary of State, on the subject of the application made by the Rev. Dr. Geoghegan for the grant of superior salaries for the Roman Catholic Bishop and Vicar General, in the District of Port Phillip.

2. On the first of the above dates the Council recorded its opinion that there was no objection in principle to superior salaries being granted to the Roman Catholic Bishop and Vicar General at Melbourne, as they are at Sydney, if the funds to be appropriated under the then expected Act of Parliament, providing for the formation of the Port Phillip District into a separate Colony, would admit of the additional charges being made upon them; but it was explained that Dr. Geoghegan was in error in supposing that such salaries could be granted under the Church Act of the Colony; and that as Her Majesty had directed, by Instructions under the Sign Manual, that the Roman Catholics' share of the funds appropriated to purposes of Public Worship should be applied under the provisions of that Act, the desired salaries could not be granted without Her Majesty's express authority.

3. In the Despatch now laid before the Council, Earl Grey states that he feels some difficulty in clearly understanding the conclusion at which the Governor and the Executive Council had arrived; and his Lordship then proceeds as follows:—

"Under the 37th clause of the Royal Instructions, which were founded on the recommendation of the Executive Council, you are enabled to apply the proceeds of the sum set apart in the Schedule for the Roman Catholics, in accordance only with the Church Act, 7 William IV., No. 3, with the exception of any surplus remaining above the sum necessary for the purposes of that Act. Such surplus you are enabled to appropriate, with the advice of your Council, for general purposes connected with Roman Catholic Public Worship." His Lordship adds:—"I am aware that the Act contains no provision which can be construed into an express authority for paying such higher salaries to the superior Clergy. It would seem, therefore, that if such higher salaries can be given, it can only be out of the surplus appropriable for 'general purposes'; but if so, the Queen's
" expre ss

“ express authority is not requisite ; and if this surplus is already anticipated, or for other reasons cannot be so applied, I do not see what directions Her Majesty can give ; for it is not in the power of the Crown to increase the Fund fixed under the Schedule, or to apply any other fund to the same purposes.”

4. In order to afford the explanation desired by Earl Grey in this matter, the Council record their opinion as follows :—

That portion of the entire sum reserved to Her Majesty for purposes of Public Worship, which is allotted to the Roman Catholics, is, by Her Majesty's Instructions, expended under the provisions of the Church Act. That Act does not recognise the payment of superior salaries of the nature now under consideration ; neither is there any surplus of sums available for general purposes, which could be devoted to the object. But as the entire sum reserved by the Act of Parliament is granted unconditionally to Her Majesty for the purposes of Public Worship in this Colony, the Council conceive that it is quite competent to Her Majesty, by an additional Instruction under the Sign Manual, to withhold from the operation of the Church Act such portion of the sums allotted to the Roman Catholics, as the Government and the recognised Authorities of that Church may concur in appropriating in the manner suggested in Dr. Geoghegan's application, or to any other kindred purpose.

This principle has been acted on in the distribution of the portion of funds for Public Worship accruing to the Church of England. The Bishops of the recently established Sees of Newcastle and Melbourne having had superior salaries assigned to them in virtue of special reservation contained in Her Majesty's Instructions.

MICL. FITZPATRICK,
Clerk of the Council.

Executive Council Office,
Sydney, 28 June, 1851. No. 51-165.

No. 8.

PROCEEDINGS of the Executive Council on the 5th August, 1851, with reference to the opinion of the Crown Law Officers on the omission in the Instructions to His Excellency the Governor General, of any Order or Direction as to the appropriation of the Funds for Public Worship.

Extract from Minute of the Executive Council, No. 51-41, dated 5 August, 1851.

REFERRING to the Proceedings on the 24th ultimo, on the subject of the appropriation of the sums reserved to Her Majesty for the purposes of Public Worship in this Colony, by Schedule A, part 3, annexed to the Imperial Act 13 and 14 Victoria, cap 59, with respect to which no order or direction is contained in the Instructions issued to His Excellency the Governor General, on his resumption of the office of Captain-General and Governor-in-Chief of New South Wales, His Excellency now lays before the Council, a letter from the Crown Law Officers, in which they advise that the Queen's Instructions, dated 20th February, 1846, ought, until further Instructions shall have been received, to regulate the distribution by His Excellency of the sums reserved for Public Worship by the Act just referred to.

2. Under this opinion the sums reserved for purposes of Public Worship by the Act 13 and 14 Victoria, cap. 59, will be distributed in accordance with the Instructions issued under the Royal Sign Manual, for the distribution of the sums reserved by the previous Act 5 and 6 Victoria, cap. 76. As however it is possible that the non-issue of a new Instruction on this head was not intentional, the Council advise that His Excellency the Governor General should bring the matter under the notice of the Right Honorable the Secretary of State for the Colonies, in order to ascertain whether it is Her Majesty's pleasure that the allotment of the Funds appropriated to purposes of Public Worship in this Colony should still be based on the Population Returns of 1841.

3. The Council further advise, that in making this reference to the Secretary of State, His Excellency should inform His Lordship, that a Census has been taken for 1851,
the

the accuracy of which there is just as little reason to question as that of the Census of 1846, which was recommended for adoption in the report made to Her Majesty, in May, 1849, by the Committee of the Privy Council on Trade and Plantations.

4. But whether based on the Census of 1846, or on that of 1851, the Council would strongly urge that the arrangement sanctioned by Her Majesty should be a permanent one. On this point the Council entirely concur in the argument used in the Report of the Committee of the Privy Council above referred to.

5. The Council think moreover that in making any such allotment of the Funds reserved for Public Worship, it would be very desirable if the whole of the sums mentioned in Schedule A, part 3, annexed to the Act of Parliament, were appropriated to the payment of Ministers' stipends, using as a Building Fund that portion of the sums accruing from the Church and School Lands (5-7ths) which has hitherto supplemented the sums reserved by the Act of Parliament. This is considered desirable, because the portion allotted to each Communion of the sums reserved in the Schedule is fixed and invariable, and may therefore be pledged for the payment of fixed stipends, whilst the Church and School Fund is of a contingent character, liable to vary every year, and may consequently be more appropriately used as a Building Fund.

6. Before this important alteration however, is finally recommended to Her Majesty's Government, the Council advise that it should be submitted to the Heads of the various Denominations in the receipt of Public Aid, in order that they may have an opportunity of stating any objections that they may entertain to its adoption.

7. Finally, the Council advise that the Head of each such Denomination should be informed of the omission in Her Majesty's Instructions of any Order or Direction to the Governor General, for the appropriation of the sums reserved for purposes of Public Worship in the recent Act of Parliament, and that under the opinion of the Crown Law Officers, His Excellency will act upon the existing arrangement which is based on the Census of 1841.

MICL. FITZPATRICK,
Clerk of the Council.

APPENDIX.

THE HONORABLE THE ATTORNEY GENERAL AND THE SOLICITOR GENERAL to THE HONORABLE THE COLONIAL SECRETARY, *Reporting as to Instructions to His Excellency the Governor General with reference to Money for purposes of Public Worship.*

*Attorney General's Office,
Sydney, 29 July, 1851.*

Sir,

We have the honor to acknowledge the receipt of your letter of yesterday's date, No. 513, stating that His Excellency the Governor General has directed the attention of his Executive Council to the circumstance that, in Her Majesty's Instructions under the Sign Manual, addressed to His Excellency on his resumption of the office of Captain-General and Governor-in-Chief of New South Wales, which were laid before his Council on the 24th June last, no order or direction is contained similar to that inserted in Her Majesty's previous Instructions dated 20th February, 1846, authorizing and empowering the Governor, with the advice of the Executive Council, to appropriate the sums reserved to Her Majesty for the purpose of Public Worship, by Schedule A, Part 3, of the Act of Parliament for the better Government of the Australian Colonies, 13 and 14 Victoria, ch. 59, and requesting our opinion upon this matter.

2. In reply, we have the honor to advise, that the Queen's Instructions, dated 20th February, 1846, ought, until further Instructions shall have been received, to regulate the distribution by His Excellency of the sum reserved for Public Worship in this Colony by the Act of 13 and 14 Vict., ch. 59.

If the question were regarded as one of strict law, it would be competent to the Governor General to appropriate the amount in such manner as he might think fit, without reference either to the Census of 1841 or to that of 1846, or of 1851. The Act of 13 and 14 Vict., ch. 59 (sect 17), simply reserves to Her Majesty the amount specified in the Schedule for the general purpose of "Public Worship," and directs the amount to be paid by the Treasurer of the Colony in discharge of Warrants under the hand and seal of the Governor, and does not specifically require that His Excellency shall receive or obey Instructions from Her Majesty. And as there are no Royal Instructions expressly applicable to the sums reserved under the late Act, His Excellency's legal authority is not fettered by positive injunctions from the Queen.

But we have not here to deal with a mere question of law. The question depends rather upon considerations relating to the political right of Her Majesty and Her Ministers to control the exercise of the Governor's authority in this respect, and in that view the same technical rules which would determine matters of law, are inapplicable here. Therefore, although the Instructions of 1846 in terms relate only to the sums appropriated by the then subsisting Constitution Act of New South Wales, we think that, in the absence of specific Instructions under the New Act, His Excellency ought to be guided entirely by them, in so far as they are now capable of being carried out.

It is indeed to be strongly inferred, from the entire omission to notice the subject in the recent Instructions, that it was deliberately intended that for the present the Instructions of 1846 (*mutatis mutandis*) should be obeyed. This inference we draw principally from the following considerations, namely, That it is highly improbable so important a subject of instruction could have been accidentally overlooked, even were the subject entirely new; that the former Instructions were no doubt under the eye of the Ministers who framed the new ones; and that the subject was distinctly and prominently brought under notice by the Report of the Privy Council, dated 1st May, 1849.

Possibly it may have been considered desirable by Her Majesty's Advisers to await the result of the expected Census for 1851, but it is not for us to speculate upon the considerations which may have influenced them. It is sufficient for us to say that, in our opinion, Her Majesty must be taken to have intended that the Instructions given as to the appropriation of the £30,000 reserved by the Act of 1842, should guide the Governor General as to the distribution of the £28,000 reserved by the Act of 1850, for the same general purpose, within the reduced limits of the Colony.

We have, &c.,

J. H. PLUNKETT,
Attorney General.

The Honorable
The Colonial Secretary.

W. M. MANNING,
Solicitor General.

No. 9.

THE SECRETARY OF STATE FOR THE COLONIES to THE GOVERNOR GENERAL.

(No. 28.)

Downing-street,
26 February, 1852.

SIR,

I have to acknowledge your Despatch No. 154, of the 28th of August last, conveying further explanations, and a Minute of your Executive Council, on the subject of the application of the Reverend Dr. Geoghegan, Bishop and Vicar General in Victoria.

2. I should not have answered this Despatch to yourself, the Province of Victoria now having a separate Administration, but that the subject of your Despatch is of importance to your own Government likewise.

3. The 37th Clause of the Royal Instructions annexed to your former Commission, to which the Executive Council refer, has been omitted from your Instructions of 1850; a fact of which the Council was probably not aware. This was purposely done, in order to leave the discretion of yourself and your Executive Council unrestrained as to the disposal of sums reserved for Religious purposes, except by such directions as you might from time to time receive from Her Majesty's Government, through the Secretary of State.

4. You will, therefore, continue to dispose of the fund in question, as you have hitherto done, as nearly as conveniently may be according to the principle of the Church Act 7 William IV., No. 3. Subject to this principle, I see no objection to the application of Dr. Geoghegan, and shall accordingly direct Lieutenant-Governor Latrobe to accede to it, if in his judgment this can be done without either diminishing what is now allotted to particular Roman Catholic Clergymen, or otherwise inconveniently interfering with the existing distribution of the portion of the fund appropriated to the purposes of the Roman Catholic community.

5. I address a copy of this correspondence to Lieutenant-Governor Latrobe.

I have, &c.,

GREY.

GOVERNOR SIR CHARLES FITZ ROY,
&c., &c., &c.

No. 10.

THE SECRETARY OF STATE FOR THE COLONIES to THE GOVERNOR GENERAL.

(No. 45.)

Downing-street,
30 July, 1852.

SIR,

I have received your Despatch, No. 23, of the 30th January last, in which you advert to the fact that the Instructions under the Royal Sign Manual, addressed to you as Captain-General and Governor-in-Chief of Australia, contain no order or direction for the distribution amongst the various Religious Denominations receiving aid from the Government in New South Wales, of the sums reserved to Her Majesty for purposes of Public Worship, by Schedule A, part 3, annexed to the Act of Parliament for the better Government of the Australian Colonies, 13 and 14 Victoria, cap. 59, and you suggest the mode in which, with the concurrence of the Executive Council, you think that those sums had better be distributed. You have already been informed by Lord Grey's Despatch, No. 28, of the 26th of February last, of the reason why no order or direction upon this subject was conveyed to you by the Royal Instructions.

I concur in the arrangement which you propose, and which may properly be based on the Census of 1851, and I agree with you in thinking that this should be regarded as a final arrangement, not again to be disturbed, unless the Legislature should see fit to interfere by local enactment, according to the powers conveyed by the Constitutional Act with this portion of the Civil List.

I have, &c,

JOHN S. PAKINGTON.

GOVERNOR SIR CHARLES FITZ ROY,
&c., &c., &c.

No. 11.

PROCEEDINGS of the Executive Council on the 12th January, 1853, with respect to the Distribution of the Public Worship Fund.

IN pursuance of the authority conveyed in the Secretary of State's Despatch, No. 45, of the 30th July, 1852, which was laid before them on the 22nd November last, the Council, at the invitation of His Excellency the Governor General, proceed to consider the mode in which the sum reserved to Her Majesty for purposes of Public Worship, by the Imperial Act 13th and 14th Victoria, cap. 59, should be distributed amongst the several Communion receiving aid from Public Funds, and they advise as follows:—

- (1.) In accordance with the rule laid down by this Council in 1845, with respect to the distribution of the £30,000 reserved for purposes of Public Worship by the 5th and 6th Victoria, cap. 76,—which rule was based on an opinion of the Crown Law Officers,—the £28,000 reserved for the like purposes by the 13th and 14th Victoria, cap. 59, will be expended by the Governor General, with the advice of the Executive Council, under the provisions of the Colonial Church Act, 7 Gul. IV., No. 3.
- (2.) The amount reserved by the Act of Parliament cannot of course be exceeded; but on the authority of the legal opinion referred to, the Governor General and Executive can withhold the issue of sums applied for, in pursuance of the provisions of the Church Act, so as to keep the entire expenditure for Public Worship within the amount fixed by the Act of Parliament.
- (3.) The entire sum of £28,000 will be divided into four parts, to be respectively allotted to the four Communion receiving aid from the Government, namely, the Church of England, the Church of Rome, the Church of Scotland, and the Wesleyan Methodist Society.
- (4.) This allotment will be made according to the relative numbers of each of these Communion, as shewn in the Census Returns of 1851, and will not be liable to be disturbed by any future Census.
- (5.) The result of this distribution is shewn in the Table annexed, but it is to be understood that the sum allotted to each Communion is liable to be charged with

- with special salaries to the superior Clergy, in any case in which the Government and the Head of the particular Communion may concur in thinking the allowance of such special salary advisable.
- (6.) The whole of the money so allotted to each Communion will be regarded as a Stipend Fund, leaving claims for building purposes to be satisfied from that portion of the Revenue derived from the Church and School Lands which is available for Church purposes
- (7.) Any balance of the Stipend Fund which may remain at the expiration of any one year, will be appropriated to such purposes (including building purposes, if necessary) as the Government may approve of on the recommendation of the recognised Heads of the different Communions.
- (8.) The rule hitherto existing will still be observed, according to which not more than one-third part of the amount authorised in any case for building purposes will be expended on the Minister's dwelling.
- (9.) At the close of each year it should be ascertained what portion of the Church and School Funds according to the existing division is available for purposes of Public Worship, and the amount should be divided and placed to the credit of the four Communions abovenamed, according to their relative numbers in the Census of 1851. As in the case of the Stipend Fund, any balance that may remain at the end of any one year will be appropriated to such purposes (stipends included) as the Government may approve of on the recommendation of the recognised Heads of Communions.
- (10.) All existing salaries will be preserved intact, but, as vacancies occur, they will be reduced to the standard fixed by the Colonial Church Act.
- (11.) Any sums which have been held in reserve, pending the reference of this question to Her Majesty's Government, as advised on the 17th February of last year, will be added to the general Church balance for 1852, and divided amongst the several Communions according to the proportions indicated in the annexure to this Minute.
- (12.) All claims, whether for stipends or for aid in the erection of buildings which have been duly preferred under the Church Act, but have not hitherto been satisfied for want of adequate funds, will be entertained according to their priority, and in so far as the funds now available will permit. For this purpose the Council desire to be informed of the amounts which according to the present decision will be at the credit of each of the four Communions, as stipend and building funds during the now current year, and also of the authorised charges borne on those amounts respectively.
- (13.) The arrangement now sanctioned should take effect from the 1st January instant.

[Annexure referred to.]

MICL. FITZPATRICK,
Clerk of the Council.

Executive Council Office,
Sydney, 19th January, 1853. No. 53-13.

No. 12.

EXTRACT of a Despatch from the Secretary of State for the Colonies to Governor Sir William Denison, dated 20th July, 1855, enclosing the Constitution Act, 18 and 19 Vic., Cap. 54.

“17. With respect to the Schedule containing the Civil List, as it is popularly termed, although in effect only an enactment withholding certain portions of the regular expenditure of the Colony from being voted in the annual Estimates, Her Majesty’s Government have the fullest reason to recognise the ample nature of the provision therein made; and to admit that the Legislature have acted on a very liberal understanding of the mutual engagements which formed the basis of the present enactment.

“18. It is, however, by no means their wish to enforce on the Colony the observance of the present arrangement as final. They believe it to be of great importance to the political well-being of a community, that certain services of the higher class should be provided for by law, and not subject to annual vote. But they regard this as a subject of strictly local, however high, concern, and they would not be justified in throwing other obstacles in the way of its reconsideration, than what the Local Legislature have themselves thought proper to raise.

“19. But, with respect to the holders of present interests, whether in the salaries or pensions provided for them, Her Majesty’s Government entertain the opinion, in which they do not doubt the concurrence of yourself and the Legislature, that the maintenance of those interests is incumbent on the Crown, in order to keep faith with individuals, and incumbent on the Legislature in due execution of its compact with the Crown. I have therefore to instruct you to reserve for the assent of the Crown any Bill which may affect such interests (those, namely of present incumbents), either in such salaries or pensions, unless, in your discretion, you think proper to negative it.

* * * * *

“21. The only remaining instructions which I have to convey, relate to the introduction of Responsible Government; but it is so evident, from the provisions of the Colonial Bill before me, that your advisers and the Legislature have had fully in view the exigencies of that system, that I am not aware that any special directions are required from myself. You will shortly receive a fresh Commission and Instructions, amended in those particulars which the introduction of that system renders it necessary to change. There need be no delay in bringing the Act into operation, as these documents will arrive in time for the assembling of the new Legislature.”

No. 13.

THE SECRETARY OF STATE FOR THE COLONIES to GOVERNOR SIR W. DENISON.

(No. 23.)

*Downing-street,
8 September, 1855.*

SIR,

In accordance with the intention conveyed to you in my Predecessor’s Despatch, No. 51, of the 20th July, I have the honor to transmit to you herewith, the Queen’s Commission, under the Great Seal, revoking the Commission addressed to you on the 20th September, 1854, and re-constituting you to be Governor of the Colony of New South Wales, together with new Instructions, under Her Majesty’s Sign Manual and Signet, for your guidance in the administration of the Government of that Colony.

I have, &c.,

GOVERNOR SIR W. DENISON,
&c., &c., &c.,
New South Wales.

W. MOLESWORTH.

(The Commission and Instructions referred to in this Despatch were laid before the Legislative Council and printed, on the 19th December, 1855.)

Church of England.			
<i>Sydney Diocese.</i>			
Right Reverend Fredk. Barker, D.D.	Bishop and Metropolitan Dean of Sydney	May 1855.	<p>The Parishes named in this Return became entitled to Ministers' stipends under the provisions of Sir Richard Bourke's Act, commonly called the Church Act; and such stipends were, in each case, specially granted by the Executive Council, in the order of the registration of the claims.</p> <p>Clergymen were licensed to the respective parishes as the latter thus became legally entitled; and successors were from time to time appointed, as vacancies occurred.</p> <p>The Bishop's stipend of £500 per annum was promised by the Principal Secretary of State for the Colonies in 1847, on the express condition that the Society for the Propagation of the Gospel should provide and invest a sum of money, for the endowment of the See of Newcastle, which should produce the annual interest of two-thirds of the promised £500, namely, — £333 13s. 4d. The principal of was then provided and invested; and with this clear, express arrangement, the appointment of first Bishop to that See was offered to, and accepted by, the present Bishop.</p> <p>With respect to the circumstances under which each clergyman first received his stipend,—in the generality of cases they received them on being appointed to their present cures, either on coming to the Colony as ordained Ministers, or on being ordained by the Bishop.</p>

STATE-PAID CLERGYMEN.

THE CHAIRMAN OF THE WESLEYAN BODY to THE COLONIAL SECRETARY.

Newtown, 12 October, 1859.

SIR,

I have the honor to enclose the form transmitted to me for filling up, and beg at the same time to offer the following remarks on the subject to which it has reference.

1. It is a fixed Regulation of the Wesleyan Church that its Ministers shall itinerate, they not being allowed (except in extraordinary cases) to remain in the same charge for more than three consecutive years.

2. Owing to this Regulation the names of those Ministers receiving State aid have from time to time been changed, such changes having always been submitted for the approval and sanction of His Excellency the Governor General and the Executive Council for the time being, and in no instance objected to.

3. In order to meet the difficulty arising out of this system, it has been the practice of the Wesleyan Church, for many years, to place the moneys received from the Government to the credit of a common Fund, out of which all cases of necessity in town and country have from time to time been met. This arrangement has not, in any case, been objected to by the Ministers whose stipends were paid by the Government, they having been secured salaries to a higher amount from other sources.

I have, &c.,

STEPHEN RABONE,
Chairman of Wesleyans.

THE HONORABLE
THE COLONIAL SECRETARY.

MODERATOR OF THE SYNOD OF AUSTRALIA to THE COLONIAL SECRETARY.

Sydney, 7 January, 1860.

SIR,

I have the honor to acknowledge receipt of your letter of 6th January, requesting that certain returns called for by your letter of 3rd October, 1859, should be immediately forwarded. I have to state, that at that date I was not Moderator, and was not, until receipt of your letter, aware that these returns had been solicited and not sent in to you. I have already taken steps to collect the information you require, and hope very shortly to transmit to you the required returns.

I have, &c.,

THE HONORABLE
THE COLONIAL SECRETARY.

JOHN DOUGALL,
Moderator Synod Australia.

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

STATE-PAID CLERGYMEN.

(FINAL RETURN IN REFERENCE TO.)

Ordered by the Legislative Assembly to be Printed, 3 February, 1860.

FINAL RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, on 23 September, 1859, for information respecting State-paid Clergymen, being a Return shewing,—

“The names of all Presbyterian Clergymen receiving Stipends
“from the amount appropriated for Public Worship by Schedule
“C of the Constitution Act; the date of arrival in the Colony
“of each such Clergyman; and, so far as may be practicable
“and in a brief form, the circumstances under which each such
“Clergyman first received his Stipend under the said Schedule.”

(Mr. Jones.)

Moderator of the Synod of Australia to THE COLONIAL SECRETARY.

Sydney, 21 January, 1860.

SIR,

I have the honor to forward to you the Return required by Government of particulars in regard to Presbyterian Ministers in receipt of State Aid, viz., the date of their arrival in the Colony, and the circumstances under which each first received stipend under Schedule C.

I have, &c,

JOHN DOUGALL,

Moderator Synod Australia.

THE HONORABLE

THE COLONIAL SECRETARY.

STATE-PAID CLERGYMEN.

1034

NAME.	STATION.	DATE OF ARRIVAL IN THE COLONY.	CIRCUMSTANCES UNDER WHICH CLERGYMAN FIRST RECEIVED HIS STIPEND UNDER SCHEDULE C.
Rev. John Dougall	St. Andrew's, Sydney	1 February, 1854	{ Selected by deputation from the Synod of Australia, and sent out by General Assembly of the Church of Scotland, to a charge in Sydney; officiated in St. Andrew's Church; formally inducted 6 April, 1854.
„ James Fullerton	Pitt-street, Sydney	3 December, 1837	{ Resigned a charge in Ireland; came out at the instance of the Church of Scotland; received £150 from Secretary of State for the Colonies as passage money; salary paid from date of landing; shortly after complied with Church Act.
„ James B. Laughton	Bathurst	October, 1843	{ Educated for the Church of Scotland; resigned the Rectorship of the Sydney College to assume a charge at Carcoar under the Synod in 1850; in 1851, appointed to Paterson, with Government salary.
„ William McKee	Campbelltown	6 October, 1848	{ Licentiate of Synod of Ulster, in connection with the Church of Scotland; came out with a view to the ministry; appointed to Port Macquarie, with Government salary, in January, 1849; translated to Campbelltown.
„ William Ross	Goulburn	11 November, 1838	{ Sent out by Church of Scotland; passage and outfit paid by Secretary of State for the Colonies; received salary from date of arrival; shortly afterwards appointed to Paterson, after complying with terms of the Bourke Act.
„ Robert Blain	Hinton	3 December, 1837	{ From Synod of Ulster, in connection with Church of Scotland; passage and outfit paid by Secretary of State for the Colonies; received salary from date of landing; after laboring some time in the Hunter District appointed in terms of Bourke Act to a charge at Hinton, with a salary of £200.
„ William L. Wilson	Ipswich	About May, 1853	{ Selected by deputation from the Synod of Australia; sent by Church of Scotland to Ipswich, Moreton Bay; received salary in 1853, on fulfilling the conditions of the Act.
„ William Purves	Maitland	March, 1839	{ Ordained to Port Macquarie in 1839, having complied with the conditions of the Bourke Act, and obtained the number of names entitling to a stipend of £200; transferred to Maitland with same salary; licentiate of Church of Scotland.
„ James Nimmo	Newcastle	March, 1854	{ Selected by a deputation from the Synod of Australia, and sent by the Church of Scotland to the charge of Newcastle; complied with the Act; salary allowed from landing.
„ James Milne	Paddington	March, 1854	{ Selected by a deputation from the Synod of Australia; resigned a charge in Scotland; sent out by the Church of Scotland to charge of Port Macquarie; settled at Paddington, having complied with Bourke Act.
„ James Coutts	Parramatta	1 April, 1849	{ Sent by the Church of Scotland to the charge of St. Andrew's, Parramatta; duly inducted to that charge 22 April, 1849.
„ Thomas Starton	Paterson	— 1851	{ Sent by Church of Scotland for charge of Stroud and Dungog; appointed to the charge of Paterson, with Government salary, in 1856.
„ Edward Holland	Port Macquarie	About May, 1853	{ Formerly Missionary in the West India Islands; came to Australia with a view to the ministry; appointed in 1853 to Port Macquarie.
„ George Macfie	Pitt Town, Portland Head, &c. ..	3 December, 1837	{ Sent by the Church of Scotland; received £150, as passage and outfit, from Secretary of State for the Colonies; salary paid from arrival; appointed to Portland Head, in terms of the Act.
„ James L. White	Singleton	— 1832	{ Educated for the ministry; licensed and ordained by the Synod; and appointed to the charge of St. Andrew's, Singleton, in 1847.
„ John McGibbon	Woolloomooloo	March, 1850	{ Came to the Colony with a view to the ministry; ordained by the Synod to the charge of Woolloomooloo; obtained salary on duly complying with terms of the Act.
„ Mathew Adam	Windsor	About beginning of 1838	{ Appointed by the Church of Scotland, with sanction of Secretary of State for the Colonies; after discharging various ministerial duties, duly received salary under Schedule C at the commencement of 1839.
„ Cunningham Atchison	Wollongong	3 December, 1837	{ Came out along with several mentioned above, on 3 December, 1837; received Government salary from date of landing; shortly afterwards complied with the Church Act.

1859.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(BATHURST.)

Ordered by the Legislative Assembly to be Printed, 18 October, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Inhabitants of Bathurst,—

HUMBLY SHEWETH :—

That your Petitioners are most strongly opposed to the abolition of State Aid to Religion, inasmuch as your Petitioners are firmly of opinion that such a measure would not only be most detrimental to the immediate interests of religion, morality, and public order, but also decidedly inimical to the future welfare of the Colony.

That, in the opinion of your Petitioners, permanent provision should be continued for the due support of the Christian Religion in proportion to the wants of the population, and also made for the population resident in the Bush Districts, and on the Gold Fields.

Your Petitioners therefore humbly pray that your Honorable House will be pleased to take the premises into consideration, and adopt such measures as may be necessary for the permanent support of the Christian Religion in this Colony, and also for the extension of the Ministrations of Religion in the Bush Districts, and on the Gold Fields.

And your Petitioners will ever pray.

[Here follow 128 Signatures.]

Sydney: Thomas Richards, Government Printer.—1859.

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(BATHURST.)

Ordered by the Legislative Assembly to be Printed, 16 February, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of certain Catholics of Bathurst,—

SHEWETH :—

That your Petitioners observe with grief the several propositions now under discussion for the total or partial abolition of that moderate degree of aid by which the Church Act promotes the interests of Religion, in securing a portion of the common funds towards the maintenance of the Ministers of Religion.

That your Petitioners respectfully urge on the consideration of your Honorable House the fact, that an absolute covenant exists between the Government and all those parties who, throughout the Colony, have accepted and fulfilled the terms of the covenant proposed in the said Act.

That the people of New South Wales, in the various Districts, have expended money in building Churches, with full confidence that those Churches were endowed with an annuity from the common funds, and that the Ecclesiastical Authorities of the several Denominations have drawn from their people frequent contributions for building Churches and Ministers' Residences, and have invited from Europe Ministers of Religion, deeming that the public faith was pledged to the permanency of that partial support of a Minister, in perpetuity, which was undertaken by the Church Act.

That your Petitioners have just ground for considering the Clerical Stipends established by the said Act to be Annuities—debts under a covenant—to which the parties are, on one side, the people who build Churches, and on the other side, Her Majesty the Queen, the Imperial Parliament, and the Colonial Government.

That if it were maintained that a limit to the operation of the Church Act was proposed or implied in the Constitution Act, it could be, at most, a limit of the amount of the annuity—£28,000—and not a limit of time determining its duration. The Queen surrendered into the hands of the Colonial Government the disposal of the Waste Lands, and in consideration of such surrender accepted certain sums, to be provided annually, amongst which sums is this for Public Worship; and the very circumstance that a limit of amount alone is stated, authorises clearly the inference that no limit in duration was intended.

That the annuity for Public Worship is as much an integrant part of the Constitution Act as is the annuity for Pensions, and that both of them are similarly and equally protected by the guarantee of public honor.

Your Petitioners, therefore, pray that no withdrawal of State Aid to Religion may take place, but that the provisions of the Church Act may be continued, and confidence in the public faith of New South Wales remain undisturbed.

And they will ever pray, &c.

[Here follow 308 Signatures.]

Sydney: Thomas Richards, Government Printer,—1860.

1859.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(DISTRICT OF MORPETH.)

Ordered by the Legislative Assembly to be Printed, 18 October, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Inhabitants of the District of Morpeth,—

SH EWETH :—

That your Petitioners have heard with apprehension that it has been proposed to your Honorable House to amend the Constitution Act, so far as it relates to the provision for Public Worship.

That your Petitioners are of opinion that any steps which would withdraw the grants hitherto made in that behalf would be followed by very disastrous results to the Religion of the Colony.

Your Petitioners would respectfully urge it upon the consideration of your Honorable House, that the present number of Ministers of Religion in New South Wales needs large increase rather than diminution.

That, even with the assistance at present given by the State, it is a matter of great difficulty to procure salaries for any additional Clergymen, although that difficulty is further diminished by voluntary offerings to a considerable amount contributed from districts in which the salaries of the Clergy are provided by the State.

That, if the present aid be withdrawn, those districts which now give assistance to their less favored brethren will require all their contributions for the maintenance of their own Clergy, and will therefore be unable to assist the more destitute districts.

That although some of the originally formed parishes are able to maintain their own Ministers, there are others which would be wholly unable to do so; and in those cases the withdrawal of State Aid would either reduce the Clergy to great destitution, or deprive their districts of the ministrations of Religion which they have long enjoyed.

That the withdrawal of the aid given by the State would also be unjust towards those of the Clergy who have entered the Ministry in this Country with the understanding that their salaries would be provided by the State.

Your Petitioners, therefore, earnestly pray your Honorable House not to assent to any proposition which would withdraw the present grant without giving ample compensation for the same.

And your Petitioners will ever pray.

[*Here follow 239 Signatures.*]

1859.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(TOWN AND DISTRICT OF MUDGEE.)

Ordered by the Legislative Assembly to be Printed, 18 October, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled

The humble Petition of the Inhabitants of the Town and District of Mudgee,—

HUMBLY SHEWETH :—

1. That your Petitioners consider the question of State Aid to Religion as one of serious importance, requiring the serious attention of the Legislature.

2. That your Petitioners consider the present provision made by the Colonial Government, for the support of Religious Worship, utterly inadequate for the requirements of the population.

3. That your Petitioners are of opinion that it is most desirable and expedient, for the better government of the Colony, more adequate aid should be afforded for the extension of Religious Ordinances in the scattered towns of the interior, and on the various Gold Fields.

4. That your Petitioners are satisfied that the withdrawal of Government Aid for Ministers' Stipends, either in part or altogether, is premature, considering the scattered state of the Colony.

5. That your Petitioners consider that the most powerful engine which the State can employ to extend civilization, to promote harmony, to secure subordination to legitimate authority, to foster contentedness, to cherish true patriotism, and cultivate all the virtues which should animate and elevate society, is the influence of Religion ; and that, therefore, the State should appreciate the social benefits of Religion by contributing to its support.

Upon these grounds your Petitioners humbly pray your Honorable House will not support any motion for the abolition of State Aid to Clergy.

And your Petitioners, in duty bound, will ever pray.

[*Here follow 447 Signatures.*]

1859.

Legislative Assembly.
NEW SOUTH WALES.

STATE AID TO RELIGION.

(BURWOOD.)

Ordered by the Legislative Assembly to be Printed, 18 October, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Members of the Church of England
residing at Burwood, in the Diocese of Sydney,—

RESPECTFULLY SHEWETH:—

1st. That your Petitioners view with much concern the Bill introduced by the Ministry into your Honorable House, for the abolition of State Aid to Religion, the principles of which Bill are, in their opinion, directly at variance with those of good government, which involve the support by the State of true religion and virtue.

2nd. That your Petitioners would observe that the Government considers itself in duty bound to provide for the administration of justice, and for the maintenance of law and good order in this Colony, such duty being founded upon the moral and religious obligations owed by the Government to the community, and that provision is accordingly made by the Civil List, and from the General Revenue of the Colony for these purposes.

3rd. That your Petitioners believe that the advancement and support of Religion are calculated to facilitate the administration of justice and the maintenance of law and good order, and in every way to advance the best interests of the Colony; and that, therefore, provision ought likewise to be made by the Government for the due administration of the ordinances of religion in this Colony.

4th. That your Petitioners believe that the circumstances of a large portion of the people of this Colony are such as render it inadvisable, on the part of your Honorable House, to pass any measure in favour of the abolition of State Aid to Religion, inasmuch as without such aid the scattered population residing in the interior would be deprived of the ordinances of religion.

5th. That taking the premises into consideration, your Petitioners would respectfully and earnestly protest against the passing of the Bill to abolish State Aid to Religion, now before your Honorable House, and humbly intreat that your Honorable House will maintain the Civil List of this Colony in its entirety, and thus secure to its population the religious advantages it has hitherto enjoyed.

And your Petitioners will ever pray.

STATE AID TO RELIGION.

(RICHMOND.)

Ordered by the Legislative Assembly to be Printed, 18 October, 1859.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned Adult Members of the United Church of England and Ireland in the District of Richmond, New South Wales,—

HUMBLY SHEWETH :—

1. That your Petitioners observe with feelings of regret that a Bill has been brought before your Honorable House, having for its object the repeal of Schedule C of the Constitution Act, thus abolishing the aid hitherto afforded to the Church of England in the Colony.

2. That your Petitioners earnestly deprecate such a measure as a dereliction of the duty of the Government, contrary to sound policy, tending to degrade the Clergy and diminish their usefulness, as hostile to the interests of Religion, and, consequently, to the well-being of the community generally.

3. That your Petitioners beseech your Honorable House to take these premises into consideration, and that you will refuse your assent to the Bill referred to.

And your Petitioners will humbly pray, &c.

STATE AID TO RELIGION.

(PARISH OF ST. JOHN, CAMDEN.)

Ordered by the Legislative Assembly to be Printed, 18 October, 1859.

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of the undersigned Members of the Church of England,
resident in the Parish of St. John, Camden,—

SHEWETH :—

That your Petitioners view with alarm and disapprobation the proposal to abolish the aid given by the State towards the support of Religion in this Colony. They are of opinion that in the less populous districts of the interior it will be found impossible to raise, by voluntary subscription, even a moiety of the sum required for this purpose. They hold that it is not expedient to make the Minister of Religion dependent on his flock, not solely for the oft-repeated reason that he is thus directly influenced to speak only "smooth things," but because it will be found, in practice, that to obtain the means of living the Minister must himself be a collector, and that, consequently, the man who is ashamed to beg will starve, while he who is unscrupulous and unfaithful will prosper.

They are further of opinion that even a general sustentation fund would not, under existing circumstances, cure this defect; for they fear that, possessing no proper Synodal action, the Church of England could not, at present, distribute satisfactorily funds raised for Church purposes.

For these reasons your Petitioners pray that your Honorable House will refuse your assent to the Bill for the Abolition of State Aid, which is now under consideration.

And your Petitioners, as in duty bound, will ever pray.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(CAMDEN.)

Ordered by the Legislative Assembly to be Printed, 3 April, 1860.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned Inhabitants of Camden,—

HUMBLY SHEWETH:—

That the provisions of the Constitution Act in reference to the public support of religion under Schedule C ought to be forthwith abolished, because—

1. The support of so many and conflicting forms of the Christian religion tends to latitudinarianism, recognising as it does an equal claim for the upholding of error as of truth.

2. It involves the admission of a grave fallacy, namely, that the Christian religion is incompetent to commend itself to the confidence and proper support due to its administration.

3. That, as a consequence, the artificial support that is given has a tendency to repress Christian effort, and encourages, both in theory and practice, a manifest antagonism and violation of Christian principles.

Your Petitioners, therefore, pray that the existing laws may be abolished.

And your Petitioners, as in duty bound, will ever pray.

1859.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(EAST MAITLAND.)

Ordered by the Legislative Assembly to be Printed, 18 October, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Inhabitants of East Maitland,—

SHEWETH:—

That your Petitioners have heard with apprehension that it has been proposed to your Honorable House to amend the Constitution Act, so far as it relates to the provision for Public Worship.

Your Petitioners are of opinion that any step which would withdraw the grants hitherto made in that behalf would be followed by very disastrous results to the Religion of the Colony.

Your Petitioners would respectfully urge it upon the consideration of your Honorable House, that the present number of Ministers of Religion in New South Wales needs large increase rather than diminution.

That, even with the assistance at present given by the State, it is a matter of great difficulty to procure salaries for any additional Clergy, although that difficulty is in some measure diminished by voluntary offerings to a considerable amount contributed from districts in which the salaries of the Clergy are provided by the State.

That, if the present aid be withdrawn, those districts which now give assistance to their less favored brethren will require all their contributions for the maintenance of their own Clergy, and will therefore be unable to assist the more destitute districts.

That although there are some of the originally formed parishes which are able to maintain their own Ministers, there are others which would be wholly unable to do so; and in these cases the withdrawal of the State Aid would either reduce the Clergy to great destitution, or deprive the districts of the ministrations of Religion which they have long enjoyed.

That the withdrawal of the aid given by the State would also be unjust towards those of the Clergy who have entered the Ministry in this Colony with the understanding that their salaries would be provided by the State.

Your Petitioners, therefore, pray your Honorable House not to assent to any proposition which would withdraw the present grant without giving ample compensation for the same.

And your Petitioners will ever pray, &c.

[Here follow 80 Signatures.]

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(EAST MAITLAND, DAGWORTH, &c.)

Ordered by the Legislative Assembly to be Printed, 17 February, 1860.

WE, the undersigned Catholic Inhabitants of East Maitland, Dagworth, Louth Park, Morpeth, Hinton, and Seaham, with profound respect present this Petition to the Legislative Assembly of New South Wales, praying the Honorable House not to abolish the aid hitherto given to the different denominations for religious purposes, but to continue the same.

We consider it unwise and inexpedient, at the present juncture, to deprive Religion in this summary manner, of the small help allowed by the Government for so many years, and the more so as Sir Richard Bourke's Church Act has worked so well and beneficially, making light the obligations of the people, supporting Religion with decency, respect, dignity, and preventing undue preference.

It would, your Petitioners are convinced, be a great hardship in most places, if the congregations be deprived of this help, because they are not in a position to support the Clergyman, as becomes his state, and at the same time to erect Churches, Schools, Presbyteries, &c. The population, as yet, in our opinion, is very fluctuating, changing from one place to another, not sufficiently fixed and settled to warrant the withdrawal of this aid.

That which is usually termed State Aid we consider it is no more than the just rights of the community at large, because the different denominations contribute towards the Revenue of the State, and therefore, why should not their religious wants be supplied in proportion to their numbers, as well as any other requirement? So that, strictly speaking, by this arrangement, the Legislature only disburses to each denomination what the denomination has raised towards its own support, and thus there can be no question about contributing towards the support of error.

We are convinced, in the event of the aid being withdrawn from the Churches, that learned and pious Clergymen will not be procurable, and then disorder and license must necessarily follow. Further, we are of opinion that so far from it being economical to make this retrenchment, it will increase the public expenditure in various ways, which could be shewn, and involve the Government in much trouble.

We therefore pray that your Honorable House, taking all these arguments into favorable consideration, will not make so large a concession to what is but a fraction of the population, but may deem it wise and most expedient to continue and confirm the Act in favor of State Aid, in all its integrity.

[Here follow 408 Signatures.]

1859-60.

Legislative Assembly.
NEW SOUTH WALES.

STATE AID TO RELIGION.
(EAST MAITLAND AND SUBURBS.)

Ordered by the Legislative Assembly to be Printed, 24 April, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Inhabitants of East Maitland and its Suburbs,—

RESPECTFULLY SHEWETH:—

That the mode of applying State Revenues to the support and propagation of religious and ecclesiastical systems, in use in this Colony, is contrary to the nature of religious truth and destructive of its free operation, since it maintains the most palpable contradictions, and thus unsettles both belief and practice.

That, for this reason, the system is decidedly immoral, and ought to be abolished.

That it is as inexpedient as it is immoral, since it takes away the motives for that liberality in support of religion which is everyone's personal duty and privilege; and thus deprives religion of its true and legitimate resources.

That it is found to be utterly inefficient in the work of instructing the people, leaving them in a very large degree under the worst forms of ignorance and vice, though it has now been so long tried. The evidence of this is found on every side.

That true religion wants no such support, being, when rightly cherished, abundantly able to supply motives for its own propagation in the high and self-denying generosity it inspires, and that every artifice to support religion, without these motives, is only a dangerous deception.

That, for these and many other reasons, equally strong, but too numerous to be mentioned here, your Petitioners cannot but feel that the time is fully come for the total abolition of every form of State aid to religion in this Colony. In its main principles they approve of the Bill now before your Honorable House relating to this subject.

And your Petitioners most respectfully entreat your Honorable House to pass the said Bill unchanged in principle, and only with such alterations in the details as may be deemed necessary for equity to existing incumbents.

And your Petitioners will ever pray, &c.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(PETITION FROM SINGLETON AGAINST.)

Ordered by the Legislative Assembly to be Printed, 18 October, 1859.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned inhabitants of Singleton and its neighbourhood,—

HUMBLY SHEWETH:—

That whereas a system of so-called Religious Endowments, totally at variance with Bible Truth, is in existence in the Colony—said system maintaining and extending conflicting and mutually distinctive creeds; and whereas it is manifestly absurd, viewing the system simply in the light of reason, for a Legislature to support antagonisms (or to build up with one hand what the other pulls down); and whereas the non-necessity of State Aid is proved by the existence and extension of religious ordinances throughout the Colony independently of such aid; and whereas true religion is valued supremely by all who know its power; and whereas Churches in their corporate capacity, if not dead to its vitality are able to maintain and promote it according to their respective creeds, without continuing the glaring injustice of receiving State Aid at the expense of many in the Colony who maintain and extend religious ordinances at their own expense, it is their conviction that, in the present state of the Colony divided by so many religious sects, it is inexpedient, impolitic, and prejudicial to truth for the Government to continue its aid from the public funds to the Religious Bodies now receiving it, or bestow it upon any others until something like Christian unity begin to dawn upon the Colony, and it is their earnest desire that State Aid to Religious Denominations be withdrawn.

And your Petitioners will ever pray.

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(WEST MAITLAND.)

Ordered by the Legislative Assembly to be Printed, 17 February, 1860.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned Roman Catholics, residing within the District of West Maitland,—

HUMBLY SHEWETH :—

That your Petitioners have heard with pain that it is proposed to withdraw State Aid from the different religious denominations now receiving it throughout the Colony.

That your Petitioners cannot view such withdrawal otherwise than a violation of the compact, which induced the various congregations to comply with the conditions of what is generally styled "Sir Richard Bourke's Church Act," that compact implied permanent support to the Clergymen, who would with the approbation of their ecclesiastical superiors be employed in ministering to the spiritual wants of the said congregations.

That your Petitioners are firmly impressed with the conviction that the withdrawal of State Aid would, in the present state of the Colony, militate against the interests of religion by withdrawing her ministrations from many localities, and by placing the Clergymen in a dependant and humiliating position.

Your Petitioners therefore respectfully and confidently hope that your Honorable House will take the foregoing premises into favorable consideration, and adopt such measures as will give stability and permanency to Schedule C, which is a debt at once due to the Imperial Government, and the heads of the different denominations who have complied with the conditions of the Church Act.

And your Petitioners, as in duty bound, will ever pray.

NEW SOUTH WALES.

STATE AID TO RELIGION.
(WEST MAITLAND.)

Ordered by the Legislative Assembly to be Printed, 3 April, 1860.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned Inhabitants of West Maitland,—

SHEWETH:—

That your Petitioners have heard, with much gratification, that a Bill has been introduced into your Honorable House for the abolition of the system of religious endowment which obtains in this Colony.

That this system, supporting as it does opposite creeds, is evidently open to the objection that it affords support to error.

That, while it is sinful, it is also highly impolitic, on the part of a community to provide for the maintenance and diffusion of error, inasmuch as religious error, especially under its more aggravated forms, ever exerts a baneful influence on moral character, and thus on national prosperity.

That the support of antagonistic and mutually destructive forms of religion is evidently unreasonable, and involves a wasteful expenditure of the public money.

That the existing system must necessarily, from its character, be injurious to the interests of religion on the part of denominations that accept it; and that, at the same time, it seriously obstructs the exercise of Christian liberality. May it therefore please your Honorable House to take the premises into your consideration, and to abolish the existing system of endowment.

And your Petitioners will ever pray.

NEW SOUTH WALES.

STATE AID TO RELIGION.
(BRISBANE WATER.)

Ordered by the Legislative Assembly to be Printed, 18 October, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Council assembled.

The Memorial of the undersigned Members of the United Church of England and Ireland, and other residents in the District of Brisbane Water, favorable to the continuance of State Aid to Ministers of Religion,—

HUMBLY SHEWETH:—

That your Memorialists, observing that a Bill has been introduced into the Legislative Assembly, having for its object the repeal of that portion of the Constitution Act which provides for the maintenance of Public Worship, beg respectfully to express their disapproval of such a measure, considering that as contributors, individually and collectively, to the Public Revenue of the Colony, they are entitled to a fair proportion of such Public Funds for the support and maintenance of the Ministers of Religion, and also that the present mode of paying the stipends of the Clergy from the Colonial Treasury is far more satisfactory, and more in accordance with the feelings and wishes of both Clergy and Laity generally, than that of leaving the Clergy solely dependent on the voluntary support of their respective congregations.

Your Memorialists also feel assured that the withdrawal of State Aid to Religion could not fail of producing much serious evil throughout the Colony, especially in the thinly populated and poorer districts, where the people would be left wholly destitute of the ministrations of Religion.

Your Memorialists, therefore, humbly pray that your Honorable House will not give your sanction to any measure for the abolition of the provision heretofore made for the maintenance of Public Worship, unless some ample compensation be made in lieu of such provision.

And your Memorialists, as in duty bound, will ever pray.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(BRISBANE WATER.)

Ordered by the Legislative Assembly to be Printed, 17 February, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Inhabitants of the District of Brisbane Water,—

SHEVETH:—

That it is with the deepest regret they have heard of the intended withdrawal of State Aid from the Ministers of Religion.

That they regret it for many reasons; but the principal ones are,—

First—It tends to destroy in the minds of the rising generation the deep-rooted conviction we ourselves possess, viz., that religion and morality are not only “the one thing necessary” for a happy future, but that they ought to shed their influence on our every-day concerns, and that no Government or people can be happy or prosperous without them.

Should those who have unfortunately introduced the Bill for the abolition of State Aid to Religion succeed, they will tell our children, in unmistakeable terms, that, after all, religion and morality are but matters of secondary consideration.

Secondly—We consider that in the fluctuating state of this and every other young Colony, the continual migration of its inhabitants from one part to another, especially in the country districts, would oblige the Ministers of Religion to have recourse to some secular employment in order to procure the means of subsistence; their time would be divided between their care of souls and the world, and their people but half cared for, whilst the respect their sacred character ought necessarily command would be lost sight of; and we need not remind your Honorable House that once these hallowed barriers are thrown down, a flood of immorality will be only the terrific harbinger of infidelity, and that the trifle now allowed by Government for the support of Religion will then serve but little towards stemming the torrent.

We therefore pray and beseech your Honorable House will, for the sake of ourselves and our children, for the sake of our temporal and eternal welfare (as also that the guidance of Heaven might preside in your Councils), continue to be the defenders of religion and morality, and consequently the supporters of its ministers.

And your Petitioners, as in duty bound, will ever pray.

NEW SOUTH WALES.

STATE AID TO RELIGION.
(MURRURUNDI.)

Ordered by the Legislative Assembly to be Printed, 18 October, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.
The Petition of the undersigned Inhabitants of the Town and District of
Murrurundi,—

HUMBLY SHEWETH :—

That your Petitioners have learnt, with deep regret, that a Bill has been introduced into your Honorable House, to withdraw the Grant which for years has been made towards the furtherance of Religion in New South Wales.

That your Petitioners believe the withdrawal of the said Grant will materially injure the progress of Religion in the Colony, and, in a great measure, deprive the country districts of the ministrations of Religion.

That your Petitioners are of opinion, that the existing appropriation of the Grant in aid of Religion requires remodelling as soon as circumstances will permit, in order that distant and thinly peopled districts may have a larger and more direct participation of the Government Grant than at present; and your Petitioners respectfully submit that, in the event of State Aid being withdrawn, many parts of the Colony must, for years to come, be destitute of that moral and religious culture so essential to the well-being of any people, while directly or indirectly the entire Colony must suffer.

Your Petitioners, therefore, humbly pray your Honorable House may be pleased to take these premises into favorable consideration.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 162 Signatures.]

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(MURRURUNDI.)

Ordered by the Legislative Assembly to be Printed, 3 April, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Inhabitants of Murrurundi,—

HUMBLY SHEWETH:—

That your Petitioners hail with satisfaction the measure now introduced into your Honorable House, by the Government, for the abolition of the system of State Aid to Religion in this Colony.

That, although your Petitioners cordially approve of the abolition of State aid, as proposed, they desire to guard themselves against countenancing so grave an error as that of viewing the amounts proposed by the Bill, to be paid to the Clergy, as compensation money, and not rather as the free gifts of a generous public. To regard it as compensation would appear to imply that the provisions of any law, once enjoyed, became in virtue thereof, permanent, or that its repeal was only fairly to be had by purchase—by compensation, as it is called.

That, although your Petitioners are of opinion that the amounts proposed to be paid are excessive, and that payment, in any measure, is an act of generosity and not of obligation to the Clergy, or rather the congregations receiving public money for the last twenty years, yet deem it expedient, for the public welfare and for the interests of religion, to secure the extinction of the system, as proposed in the Bill, by making liberal concessions and great sacrifices.

Praying that your Honorable House will take these premises into favorable consideration, and duly pass the measure now before it into law.

And your Petitioners, as in duty bound, will ever pray.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(TOWN AND POLICE DISTRICT OF SCONE.)

Ordered by the Legislative Assembly to be Printed, 18 October, 1859.

To the Honorable the Legislative Assembly of the Colony of New South Wales, in
Parliament assembled.

The Petition of the Inhabitants of the Town of Scone and the Police District
thereof,—

HUMBLY SHEWETH:—

That a Bill is now before your Honorable House, having for its object the ultimate withdrawal of the present grant of twenty-eight thousand pounds from the Treasury, towards the support of Public Worship in this Colony.

That your Petitioners believe that this Bill, if passed, will materially injure the cause of Religion in this Colony.

That your Petitioners believe that it will be impossible to extend the blessings of Religion to the remote Districts of the Colony without assistance from the Public Revenue.

That your Petitioners know that great difficulties have been experienced on various occasions in raising even small sums to supplement the present grants to the Districts, and that this difficulty is found to be greater wherever the population is small or widely dispersed.

That your Petitioners therefore humbly pray that your Honorable House will not pass the aforesaid Bill which has for its object the ultimate withdrawal of the present grant of twenty-eight thousand pounds towards Public Worship.

And your Petitioners, as in duty bound, shall ever pray.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(LOWER HAWKESBURY AND MACDONALD RIVER.)

Ordered by the Legislative Assembly to be Printed, 18 October, 1859.

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of the undersigned Inhabitants of the Lower Hawkesbury and Macdonald River,—

SHEWETH:—

That your Petitioners have learnt with much surprise and regret that a Bill is about to be brought forward in your Honorable House, to abolish State Aid to Religion.

That your Petitioners—considering the scattered population of a great portion of this Colony, which renders combined operation for all purposes, moral, philanthropic, or religious, in the present state of this extensive Colony, most difficult, impracticable, and almost impossible—view this measure as most dangerous to the well-being of this Colony, and to the moral, intellectual, and religious advancement of the rising generation.

That your Petitioners consider that the promotion of religious teaching is a much more certain preventative of crime than any other measure which can be adopted to secure the peace and good order of society; and that this is well deserving the consideration of your Honorable House, on the soundest principles of civil polity.

That your Petitioners, being taxed for the public benefit of the community in general, deem themselves entitled to all the advantages by which such public benefit may be extended by the expenditure of those public resources, to which they will at all times most cheerfully and loyally contribute.

That your Petitioners, therefore, request your Honorable House will not leave the provision for religious instruction, and the maintenance of the Clergy, to the uncertainty of casual and private exertion, but continue State Aid to Religion as heretofore, but in a measure more consistent with the importance of the object, the dignity of your Honorable House, and the wants and requirements of this fast-increasing community.

And your Petitioners will ever pray, &c.

Petition to the Honorable the Legislative Assembly, in Parliament assembled, from several, the residents in the Williams River District.

We, the undersigned, residents in the Williams River District, briefly but earnestly pray that your Honorable House will not assent to the repeal of the Schedule in the "New Constitution Act" having reference to State Aid, unless ample concurrent provision be made against its sudden and unconditional withdrawal.

We beg most respectfully to remind your Honorable House that, unless compensation be granted under such contingency, many congregations will almost certainly be deprived of the ministrations of Religion, and this our consideration is, we humbly submit, appalling enough to influence your Honorable House in your deliberations on this question, and additional weight is afforded by the fact that those congregations hitherto deriving aid from the annual grant have, indisputably, a moral right, in the event of its withdrawal, to a full equivalent.

And your Petitioners will ever pray, &c.

STATE AID TO RELIGION.

(WOLLOMBI.)

Ordered by the Legislative Assembly to be Printed, 18 October, 1859.

To the Honorable the Speaker and the Members of the Legislative Assembly of
New South Wales.

The Petition of the undersigned Inhabitants of the Wollombi District,—

HUMBLY SHEWETH :—

That a Bill has been introduced by one of the Members of your Honorable House to abolish the aid now afforded by the State to the Ministers of various religious denominations in this Colony.

Your Petitioners humbly represent that such a measure as the one proposed would be productive of great and serious injury to the cause of Religion in general, and to the spiritual and temporal interests of the Inhabitants of this District in particular, and they are of opinion that these important interests would be better promoted by an increased amount rather than by a deprivation of the aid hitherto afforded.

Your Petitioners, deeply impressed with a conviction of the injurious consequences that inevitably would attend the abolition of State Aid, respectfully pray that the Bill now introduced for such purpose may not be permitted to pass your Honorable House, or in the event of its being carried that your Honorable Assembly will be pleased to grant a just and ample amount of compensation in lieu of the sum now annually appropriated for religious purposes.

And your Petitioners, as in duty bound, will ever pray, &c.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(MUSWELLBROOK.)

Ordered by the Legislative Assembly to be Printed, 20 October, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the Inhabitants of Muswellbrook, and its vicinity,—

HUMBLY SHEWETH:—

That your Petitioners are decidedly opposed to the abolition of State Aid to Religion, believing that such a measure must be of serious injury to its best interests.

That they are of opinion that to consign Religion to the voluntary support of the great body of professing Christians, however plausible in theory, in practice would be to render its maintenance actually incumbent upon a small minority, the religious indifference of the majority being acknowledged by all; a scheme in effect, therefore, oppressive and hazardous if not impracticable.

That as a consequence of the entire want of all guarantee for the permanent support of the Clergy serious evil is calculated to ensue.

That the present regular systematic celebration of the public ordinances of Religion, together with the discharge of all other ministerial functions, would be rendered liable at any moment to interruption.

That the necessarily dependent and fluctuating position of the Clergy would tend, insensibly, either to exercise an injurious moral influence upon their character and teaching, or else to occasion in process of time a lapse into ignorance by offering no inducements to men duly qualified to enter the Ministry.

Your Petitioners desire, therefore, to express their conviction, that in order to secure the services of a faithful and efficient Ministry a permanent provision should be made for their support, such a provision as should secure a constant influx of candidates from all ranks, as should encourage them to speak with all boldness, and as should prevent the meanness of their condition from prejudicing the force of their instructions.

They regard it as altogether visionary to suppose that temporal motives will not have their weight in this temporal state of things, as well as unreasonable to imagine that parents will at much cost educate their children to spend their lives possibly in glorious poverty.

Your Petitioners venture therefore to memorialize your Honorable House, praying that State Aid to Religion may not be abolished.

And your Petitioners will ever pray, &c.

[Here follow 86 Signatures.]

1859.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(MANNING RIVER DISTRICT.)

Ordered by the Legislative Assembly to be Printed, 20 October, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Members of the different Protestant Denominations, residing on the Manning River, above the age of fourteen years,—

RESPECTFULLY SHEWETH:—

1. That your Petitioners have heard with very deep regret that a Bill has been brought before your Honorable House to abolish State Aid to Religion.

2. That in the month of June last a meeting of the most influential Members of the Church of England was held on this river, for the purpose of securing, if possible, the services of a resident Minister, when a resolution was (with three exceptions) passed unanimously to this effect, "That State Aid was necessary in the present state of the Colony for the support of Religion, and that the present grant required to be supplemented, so that destitute districts might be assisted," and further, we believe that were time given the large number of all the three Protestant Denominations, receiving State Aid on this river, would gladly sign this Petition.

3. That for many years the only religious ministrations enjoyed by the residents on this river were from the Clergymen of the Churches of England and Scotland located at Port Macquarie; and we are of opinion that were State Aid withdrawn, Port Macquarie and the Manning River are unitedly too poor to support even one Minister of each Protestant Denomination.

4. That few being real Christians, and so giving as a duty and privilege, the burden of a voluntary contribution would fall too heavily upon those few, while the very bread of the Minister would in a great degree depend, not upon his zeal and faithfulness but the likings or dislikings of a fickle people.

Praying therefore that this our respectful Petition may be received, and that our district may be thought deserving of a portion of State Aid so that we may enjoy the great privilege of regular religious ministrations,

We beg to subscribe ourselves

Your very humble and obedient Servants.

1859.

Legislative Assembly.
NEW SOUTH WALES.

STATE AID TO RELIGION.

(PETITION FROM THE MANNING RIVER AGAINST.)

Ordered by the Legislative Assembly to be Printed, 16 December, 1859.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned Inhabitants of the Manning River District,—

SHEWETH :—

That your Petitioners have observed with much satisfaction that a Bill has been introduced into your Honorable House for the abolition of the system of religious endowment which obtains in this Colony.

That the endowment of antagonistic creeds, which is sanctioned by the principle of this system and characterises the application of it, necessarily compriscs the endowment of error.

That inasmuch as error thus endowed must, from its nature, exert a baneful influence on the interests of individuals and of the community, the endowment of it is sinful and highly impolitic.

That, further, the support by the State of mutually destructive forms of religion is wholly unreasonable and involves a wasteful expenditure of the public money.

That while your Petitioners recognise the obligation of respecting vested rights, they submit that the rights of Ministers, supported by the voluntary contributions of the people, and the rights of their congregations are equally entitled to consideration, and that it would be more equitable toward such Ministers and congregations that either immediately, or after the clapse of a short and specified period, the present system of endowment should wholly cease, such compensation being made to those who now receive salaries under it as might be deemed due to them.

That religious bodies and congregations that support their own Ministers and thus occupy the position which it is the intention of the Bill, with respect to which your Petitioners now address you, that all shall ultimately occupy, will be subjected to obvious and great disadvantage, if side by side with them, other religious bodies and congregations shall be wholly or in part supported by the State.

May it therefore please your Honorable House to take the premises into your consideration, and, in dealing with the existing system of endowment, to allow to the consideration presented whatever influence they ought to exert.

And your Petitioners will ever pray.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(PETITION OF THOMAS WALKER, AS CHAIRMAN OF A PUBLIC MEETING, IN SYDNEY.)

Ordered by the Legislative Assembly to be Printed, 20 November, 1859.

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of Thomas Walker, Esquire, Chairman of a Public Meeting of the inhabitants of Sydney, held at the Mechanics' School of Arts,—

SHEWETH :—

That a Public Meeting of the inhabitants of Sydney was held on Monday evening, the seventeenth day of October, one thousand eight hundred and fifty-nine, at the Hall of the Mechanics' School of Arts, Pitt-street, in favor of the Abolition of State Aid for Religious Purposes, and the following resolutions were submitted to the Meeting, and carried :—

“ 1. That this Meeting is of opinion that the system of State Aid to Religion which at present obtains in this colony is wrong in principle and prejudicial to the best interests of the community, and ought to be abolished.

“ 2. That this Meeting regards with strong dissatisfaction the Bill now before Parliament ‘to amend the Constitution Act so far as relates to the provision for Public Worship,’ inasmuch as, if it pass into law in its present shape, it will not unmistakably secure the entire abolition of such State Aid.

“ 3. That in the opinion of this Meeting the provision proposed by the said Bill to be made for the present recipients of State Aid is not satisfactory, and this Meeting would recommend in preference the immediate settlement of such claims as may be admitted by the Parliament of New South Wales.

“ 4. That a Petition embodying the foregoing resolutions be presented to the Legislative Assembly without delay, signed by the Chairman on behalf of this Meeting.”

Your Petitioner, therefore, prays that your Honorable House will take the premises into your consideration, and pass a law which will secure the entire abolition of State Aid for Religious Purposes, and provide for the immediate settlement of such claims of the present recipients as may be admitted by the Parliament of New South Wales.

And your Petitioner will ever pray, &c.

THOMAS WALKER,
Chairman.

1859.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(PETITION OF REV. JOHN DOUGALL.)

Ordered by the Legislative Assembly to be Printed, 2 December, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of John Dougall, Moderator of the Synod of Australia, in connection with the Established Church of Scotland,—

HUMBLY SHEWETH :—

That your Petitioner—as the representative, for the time being, of a large and influential denomination of Christians—is desirous of bringing under the notice of your Honorable House the circumstances of the Chaplains of the Church of Scotland, at present officiating in the Western and Southern Gold Fields.

Your Petitioner begs most respectfully to represent, that both these gentlemen,—the Rev. Alexander McEwen, and the Rev. Alexander L. Pennicook,—were sent out to this Colony by the Colonial Committee of the General Assembly of the Church of Scotland, at the express desire of the Synod of Australia, conveyed to them by the Rev. William Purvis, of East Maitland, one of your Petitioner's predecessors in the Moderatorship; that they were sent out expressly for their present sphere of duty, and with the understanding that the salaries granted to them by the Colonial Legislature would be permanent.

That the Western and Southern Gold Fields include very extensive portions of the territory, inhabited by a very unsettled and migratory population, whose circumstances, with respect to the maintenance of Religious Ordinances, are totally different from those of the residents in more settled districts; and, consequently, your Petitioner feels compelled to urge his conviction, based upon evidence which has been officially communicated to him, and of undoubted credibility, that the withdrawal of support from the Chaplains of the Gold Fields would be tantamount to depriving the inhabitants of those districts of religion altogether.

Your Petitioner, therefore, humbly prays that your Honorable House will take the premises into consideration, and on the one hand refuse assent to any proposition to deprive the Church of Scotland's Gold Field Chaplains of their stipends, to which they were led to believe the faith of the country was pledged; and on the other refuse assent to any proposition which may take away the light of religious truth, as at present exhibited in the preaching of the Gospel, from a large and influential portion of the inhabitants of this Colony, and so neutralize the good which has already resulted from the labors of the gentlemen to whom your Petitioner more immediately refers.

And your Petitioner, as in duty bound, will ever pray.

JOHN DOUGALL,
Moderator of the Synod of Australia.

1859.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(PETITION FROM GUNNING AND COLLECTOR.)

Ordered by the Legislative Assembly to be Printed, 13 December, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Inhabitants of Gunning and Collector, and the Suburbs of their United District,—

HUMBLY SHEWETH:—

That they view with serious alarm and concern the proposal to abolish the provision for maintenance of Public Worship, as supported and aided heretofore by Schedule C.

That in scattered and thinly peopled country districts, inhabited by small settlers, where churches and residences for clergymen have still to be created, the only encouragement for local exertion hitherto has been, that Schedule C aided in raising a respectable maintenance for Ministers of Religion. Taking these premises into your most serious consideration, whilst your Petitioners would, on the one hand, most respectfully beg for the continuance of Schedule C, on the other hand, they would respectfully petition your Honorable House to allot the larger portion thereof to such country districts as their own, where no augmentations arise from gleberents, house property, church leases, and other sources of increasing the income of the clergyman in residence amongst the people.

[Here follow 336 Signatures.]

1859.

Legislative Assembly.
NEW SOUTH WALES.

STATE AID TO RELIGION.

(PETITION FROM RAYMOND TERRACE.)

Ordered by the Legislative Assembly to be Printed, 15 December, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Members of various denominations of Christians,
resident in the district of Raymond Terrace,—

HUMBLY SHEWETH:—

That your Petitioners have heard with apprehension that it has been proposed to your Honorable House to alter the Constitution Act so far as it relates to the provision for Public Worship.

That your Petitioners are of opinion that any step which would withdraw the grants hitherto made in that behalf would be followed by very disastrous results to the religion and general morality of the colony. Your Petitioners would respectfully urge it upon the consideration of your Honorable House that the present number of Ministers of Religion in New South Wales needs large increase rather than diminution.

That even with the assistance given by the State it is a matter of great difficulty to procure salaries for any additional clergy, although that difficulty is in some degree diminished at present by voluntary contributions to a considerable amount from districts in which the salaries of the clergy are provided by the State.

That if the present aid be withdrawn, those districts which now give assistance to others less favoured, will require all their contributions for the maintenance of their own clergy, and will, therefore, not be enabled to assist the more destitute districts.

That, although there are some of the originally formed parishes which are able to maintain their own ministers, there are others which would be wholly unable to do so, and in those cases the withdrawal of State Aid would not only reduce the clergy to great destitution, but also deprive the districts of the ministrations of religion which they have so long enjoyed.

That the withdrawal of the aid given by the State would also be unjust towards those of the clergy who have entered upon their several Cures with the understanding that their salaries would be provided by the State.

Your Petitioners, therefore, pray your Honorable House not to assent to any proposition having for its object the withdrawal of the present grant.

And your Petitioners, as in duty bound, will ever pray, &c.

[Here follow 191 Signatures.]

1859.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(CERTAIN PARISHIONERS OF ST. JOHN THE EVANGELIST, DARLINGHURST.)

Ordered by the Legislative Assembly to be Printed, 15 December, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.
The humble Petition of the undersigned Members of the Church of England and
Parishioners of St. John the Evangelist, Darlinghurst, in the City of Sydney,—

SHEWETH:—

That your Petitioners have heard with pain and regret that a Bill has been introduced into your Honorable House to repeal so much of the Constitution Act as reserves the amount mentioned in Schedule C to that Act for the purposes of Public Worship.

That your Petitioners are firmly persuaded that the withdrawal of the amount so provided for the maintenance of Public Worship would be injurious to the interests of Religion in general, and highly prejudicial to the religious and moral welfare of the Members of the Church of England in this Colony.

That in the opinion of your Petitioners it would be utterly unjust to pass the said proposed measure, inasmuch as the passing thereof would be a breach of a distinct Parliamentary compact made between the Legislature of this Colony and Her Majesty, whereby, in consideration of Her Majesty relinquishing the statutable provision previously belonging to Her Majesty, and of other concessions made by Her Majesty, the said Legislature granted to Her Majesty, her heirs and successors, among other things, the said sum of money mentioned in the said Schedule for the said purposes therein mentioned.

That your Petitioners respectfully submit that if the said proposed measure is passed into law, a gross breach of the public faith will also be committed towards all those persons who have built or subscribed towards the building of Churches and places for Public Worship under and in pursuance of the Act commonly known as "Sir Richard Bourke's Church Act."

That your Petitioners are firmly persuaded that the due performance of Public Worship cannot be carried on in this Colony upon the voluntary principle, and that, even if it were possible, it would not be desirable to introduce that principle into the Church of England.

Your Petitioners, therefore, earnestly pray your Honorable House to maintain the provision contained in the said Constitution Act for the maintenance of Public Worship, and not to pass the said Bill.

HUMBLY SHEWETH:—

That it is with the deepest anxiety that your Petitioners contemplate a Bill, laid upon the Table of your Honorable House, which will, if passed, deprive the Church of England in this Colony of all State Aid.

That, however this may effect our brethren in the town and city parishes, the only result to us in the rural districts will be to deprive us of the blessing of the ministration of God's Holy Word and Sacraments.

That such cannot be the desire of your Honorable House, and we earnestly hope that due consideration will be given to the deep distress in which such an enactment would involve the Church of England, until she has perfected such measures as will enable her to be independent of "Schedule C;" and that the Bill before your Honorable House will not be allowed to pass.

And your Petitioners, as in duty bound, will ever pray, &c.

[Here follow 101 Signatures.]

Ordered by the Legislative Assembly to be Printed, 25 January, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Inhabitants of the M'Leay River District, in the said Colony,—

SH EWETH :—

That your Petitioners have heard with regret that it is in contemplation to abolish State Aid to Religion, and in pursuance thereof to cut of Schedule C from the list as heretofore for the purpose of supporting religious worship.

That the efficiency of ministers of religion depending in a great measure upon their freedom from direct pecuniary obligations to their parishioners, it is expedient they should not be subject to the degradation of either directly or indirectly soliciting contributions for their subsistence.

That although districts like the M'Leay, solely dependent upon agriculture, contribute on the average, according to population, a fair proportion of the State expenses, including those of religion, yet there will occasionally be periods of great depression, like the present, when the settlers, experiencing great difficulty in providing food for their families, will be totally unable to maintain their ministers of religion by voluntary contributions.

That religion being intimately connected with the moral interests of the people, like National Education, ought to be provided for out of the general revenue, and particularly in sparsely populated districts like the M'Leay, where there are no churches out of the sittings in which a sufficient revenue might be derived; and, therefore, your Petitioners strongly deprecate the contemplated abolition of State Aid for Church support.

Your Petitioners, therefore, humbly pray that State Aid to Religion may not be abolished.

And your Petitioners shall ever pray, &c.

[Here follow 112 Signatures.]

1859-60.

—

Legislative Assembly.
NEW SOUTH WALES.

STATE AID TO RELIGION.

(PENRITH.)

The respectful Petition of the undersigned Magistrates, Landholders, and other
Inhabitants of the District of Penrith, in the Counties of Cumberland and
Cook,—

SHewETH:—

That your Petitioners, claiming and, under the blessing of their Heavenly
Father, enjoying the rights and privileges of the British Constitution, recognise as the most
important the free exercise of the Christian Religion.

That your Petitioners have seen, with feelings they are unwilling to express, that it
is intended to submit to your Honorable House a proposal to withdraw from the people of
the Colony all assistance by the State to maintain and further diffuse the knowledge and
worship of Almighty God.

That, granting the present system of support to the ministrations of Religion be
inadequate, your Petitioners deprecate the idea that, because the question has its difficulties,
the Government are justified in withdrawing from the so manifest obligation to provide by
law for the support of the Christian Church, and view their casting the worship of God
upon the chance aid of a voluntary system as a dereliction of their duty as rulers of a
Christian community, and as an act tending to weaken the confidence and attachment of the
people to the constituted authorities of the land.

That your Petitioners are far from desirous to shrink from individually contributing
towards the due support of those who minister among them, but are conscious that a proper
apportionment will be best attained under provisions of an Act of the Legislature.

Your Petitioners, therefore, pray your Honorable House will not assent to the
discontinuance of the State Aid now afforded, until by Legislative enactment a better and
more adequate amount be available by law.

And your Petitioners will ever pray, &c.

[Here follow 24 Signatures.]

Sydney: Thomas Richards, Government Printer.—1860.

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(WOLLONGONG.)

Ordered by the Legislative Assembly to be Printed, 10 February, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Inhabitants of Wollongong,—

SHEWETH:—

That your Petitioners have heard, with deep regret, that an attempt will be made to induce your Honorable House to discontinue the grant hitherto annually made for Religious purposes; for, in the opinion of your Petitioners, such an Act would injuriously affect the spiritual condition of the colonists, morally, socially, and intellectually.

That as this is a young Colony, and was peopled under circumstances unfavorable to its rapid advancement in religion and morality, your Petitioners think that your Honorable House should continue the grant which has hitherto operated so beneficially.

That your Petitioners, having ascertained that Institutions such as the Sydney Benevolent Asylum do not receive from the colonists the aid which their usefulness merits, believe, that to commit the higher interests of religion—which are admitted to be not only intimately connected with individual happiness, but also with the prosperity of nations—to the precarious support of the voluntary system, would be detrimental to the Colony.

That should your Honorable House determine to withdraw the grant aforesaid, your Petitioners hope that due compensation will be made, by your Honorable House, to the clergymen who through the Colonial Government now receive stipends annually.

That your Petitioners would respectfully remind your Honorable House, that the Constitution Act reserves the sum of £28,000 for the spiritual instruction and improvement of the colonists.

Your Petitioners therefore pray, that the present grant for Ecclesiastical purposes may be continued; and that, if your Honorable House withdraw the said grant, ample compensation may be made to those clergymen whose salaries are paid by the State.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 202 Signatures.]

1859-60.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(KIAMA.)

Ordered by the Legislative Assembly to be Printed, 16 February, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Catholics of the Kiama District,—

SHEWETH:—

That your Petitioners observe with grief the several propositions now under discussion for the total or partial abolition of that moderate degree of aid by which the Church Act promotes the interests of Religion, in securing a portion of the common funds towards the maintenance of the Ministers of Religion.

That your Petitioners respectfully urge on the consideration of your Honorable House the fact, that an absolute covenant exists between the Government and all those parties who, throughout the Colony, have accepted and fulfilled the terms of the covenant proposed in the said Act.

That the people of New South Wales, in the various Districts, have expended money in building Churches, with full confidence that those Churches were endowed with an annuity from the common funds, and that the Ecclesiastical Authorities of the several Denominations have drawn from their people frequent contributions for building Churches and Ministers' Residences, and have invited from Europe Ministers of Religion, deeming that the public faith was pledged to the permanency of that partial support of a Minister, in perpetuity, which was undertaken by the Church Act.

That your Petitioners have just ground for considering the Clerical Stipends established by the said Act to be Annuities—debts under a covenant—to which the parties are, on one side, the people who build Churches, and on the other side, Her Majesty the Queen, the Imperial Parliament, and the Colonial Government.

That if it were maintained that a limit to the operation of the Church Act was proposed or implied in the Constitution Act, it could be, at most, a limit of the amount of the annuity—£28,000—and not a limit of time determining its duration. The Queen surrendered into the hands of the Colonial Government the disposal of the Waste Lands, and in consideration of such surrender accepted certain sums, to be provided annually, amongst which sums is this for Public Worship; and the very circumstance that a limit of amount alone is stated, authorises clearly the inference that no limit in duration was intended.

That the annuity for Public Worship is as much an integrant part of the Constitution Act as is the annuity for Pensions, and that both of them are similarly and equally protected by the guarantee of public honor.

Your Petitioners, therefore, pray that no withdrawal of State Aid to Religion may take place, but that the provisions of the Church Act may be continued, and confidence in the public faith of New South Wales remain undisturbed.

And they will ever pray, &c.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(KIAMA.)

Ordered by the Legislative Assembly to be Printed, 3 April, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Inhabitants of Kiama and its suburbs,—

RESPECTFULLY SHEWETH:—

That the mode of applying State Revenues to the support and propagation of religious and ecclesiastical systems, in use in this Colony, is contrary to the nature of religious truth and destructive of its free operation, since it maintains the most palpable contradictions, and thus unsettles both belief and practice.

That, for this reason, the system is decidedly immoral and ought to be abolished.

That it is as inexpedient as it is immoral, since it takes away the motives for that liberality in support of religion which is everyone's personal duty and privilege; and thus deprives religion of its true and legitimate resources.

That it is found to be utterly inefficient in the work of instructing the people, leaving them in a very large degree under the worst forms of ignorance and vice, though it has now been so long tried. The evidence of this is found on every side.

That true religion wants no such support, being, when rightly cherished, abundantly able to supply motives for its own propagation in the high and self-denying generosity it inspires, and that every artifice to support religion, without these motives, is only a dangerous deception.

That, for these and many other reasons, equally strong, but too numerous to be mentioned here, your Petitioners cannot but feel that the time is fully come for the total abolition of every form of State aid to religion in this Colony. In its main principles they approve of the Bill now before your Honorable House relating to this subject.

Your Petitioners most respectfully pray your Honorable House to pass the said Bill unchanged in principle, and only with such alterations in the details as may be deemed necessary for equity to existing incumbents.

And your Petitioners will ever pray, &c.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(SHOALHAVEN.)

Ordered by the Legislative Assembly to be Printed, 16 February, 1860.

To the Honorable Members of the Legislative House of Assembly of New South Wales,
in Parliament assembled.

We, the undersigned Petitioners, Parishioners of the Roman Catholic Church in the District of Shoalhaven, having ascertained that a Bill is introduced into the Council to take away State Aid from the Clergymen,—

We humbly and respectfully petition our Honorable Members of the Legislative House of Assembly to make no change whatever in Sir Richard Bourke's Church Act, regarding State Aid towards building Churches, and Clergymen's salaries, as the Church Act of this good Governor and wise Legislator has done so much good to this Colony, and as it is still so beneficial to us all, to deviate in the least from the excellent provisions it contains is in our opinion quite premature, unsuited to our circumstances, and would prove highly prejudicial to the interests of our Church and the support of our Clergymen.

And your Petitioners will ever pray.

STATE AID TO RELIGION.

(ILLAWARRA.)

Ordered by the Legislative Assembly to be Printed, 16 February, 1860.

To the Honorable the Members of the Legislative Assembly of New South Wales, in
Parliament assembled.

The humble Petition of the Roman Catholics of the Mission, in the District
of Illawarra,—

SHEWETH:—

That a Bill for the Abolition of State Aid to Religion being under the consideration of your Honorable House, your Petitioners beg leave to offer the following reasons why the said Bill should not pass into law, namely,—

That the united funds now accruing from voluntary offerings, and the present endowment from Schedule C are barely sufficient to support one Clergyman in the Mission, which is so extensive that two would be required in it.

That your Petitioners contemplate with regret the withdrawal of State Aid in this Mission, knowing as they do that the Inhabitants thereof could not make up the deficiency which would arise from such withdrawal in the emolument necessary to maintain their Clergyman in the manner becoming his position.

That whatever the Illawarra District may hereafter become, your Petitioners feel certain the time has not yet arrived when the aid in question can with safety be withdrawn; or be withdrawn with any regard for the spiritual interests of your Petitioners.

Wherefore your Petitioners humbly pray that your Honorable House may be pleased not to permit the said Bill for the Abolition of State Aid to Religion to pass into law.

And your Petitioners will ever pray, &c.

Legislative Assembly.
NEW SOUTH WALES.

STATE AID TO RELIGION.

(HARTLEY.)

Ordered by the Legislative Assembly to be Printed, 16 February, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled,

The Petition of the Roman Catholic Inhabitants of the District of Hartley,—

HUMBLY SHEWETH :—

That, having heard with regret that it is the intention of the Legislature to abolish State Aid to Religion, they most respectfully express their unanimous conviction that it is absolutely necessary for the moral welfare of the rising generation of this young Colony, that Ministers of Religion shall continue to receive aid from the State; and that the total or partial withdrawal of such aid, at the present juncture, would be premature and impolitic, and productive of evil consequences—in a social as well as moral sense to the community at large.

That, holding these opinions, and believing, moreover, that it would be impossible for a Clergyman in the isolated and thinly-populated districts, to maintain himself in the absence of State Aid with any degree of comfort, except, indeed, at the expense of his feelings as a gentleman, and of that native character of respectability that always attaches to his sacred avocation, Petitioners humbly pray your Honorable House will be pleased to give the subject of their Petition the benefit of your calm and dispassionate consideration, and not deprive them of one of the best and dearest boons they enjoy from the State, namely, that of assisting to remunerate those from whose ministry they derive the first and greatest of earthly blessings—spiritual assistance and consolation.

And your Petitioners will ever pray.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(NEWCASTLE.)

Ordered by the Legislative Assembly to be Printed, 17 February, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Members of the Roman Catholic Church, resident in the District of Newcastle,—

HUMBLY SHEWETH :—

That your Petitioners have heard with apprehension that it has been proposed to your Honorable House to alter the Constitution Act, so far as it relates to the provision for Public Worship.

That your Petitioners are of opinion that any step which would withdraw the grants hitherto made in that behalf would be followed by very disastrous results to the religion of the Colony. Your Petitioners would respectfully urge it upon the consideration of your Honorable House that the present number of Ministers of Religion in New South Wales needs large increase rather than diminution.

That, even with the assistance given by the State, it is a matter of great difficulty to procure salaries for any additional Clergymen, although that difficulty is in some degree diminished at present by voluntary contributions to a considerable amount from those districts in which the salaries of the Clergy are provided by the State.

That if the present aid be withdrawn, those districts which now give assistance to others less favored will require all their contributions for the maintenance of their own clergy, and will, therefore, not be enabled to assist the more destitute districts.

That though there are some of the originally formed Missions which are able to maintain their own Clergy, there are others which would be wholly unable to do so, and in those cases the withdrawal of State Aid would not only reduce the Clergy to great destitution, but also deprive the districts of the ministrations of Religion which they have so long enjoyed.

That the withdrawal of the aid given by the State would be also unjust towards those of the Clergy who have entered upon their several missions with the understanding that their salaries would be provided by the State.

Your Petitioners, therefore, pray your Honorable House not to assent to any proposition, having for its object the withdrawal of the present grant.

And your Petitioners, as in duty bound, will ever pray, &c.

NEW SOUTH WALES.

STATE AID TO RELIGION.
(WINDSOR.)

Ordered by the Legislative Assembly to be Printed, 17 February, 1860.

To the Honorable Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Catholic Inhabitants of the Town and District of Windsor,—

SHEWETH :—

1. That your Petitioners have observed, with extreme regret, that a Bill is before your Honorable House, the effect of which, if carried, would be to abolish State Aid to Religion.

2. That, in the opinion of your Petitioners, such a Bill passed into law is calculated to resist the progress of practical Christianity and to substitute in its place negative infidelity. As an illustration we would desire to bring before your Honorable House the appalling fact, that many millions of the inhabitants of the United States of America have declared that they belong to no Church ; and we beg leave to submit that this is the sad result of the want of adequate means to present the Ordinances of Religion to the minds of the youths of that Republic, in each succeeding generation.

3. That such a Bill carried into law is calculated in its results to deprive the civil law, to a great extent, of its chief sanction, viz., the conscientious belief that it is our duty, as Christians, to render obedience to the laws, the Legislature that pass them, and the Courts that expound and apply them.

4. That your Petitioners humbly beg your Honorable House to take the premises into consideration and reject the said Bill.

And your Petitioners, as in duty bound, will ever pray.

STATE AID TO RELIGION.

(BALMAIN.)

Ordered by the Legislative Assembly to be Printed, 17 February, 1860.

To the Honorable the Legislative House of Assembly.

The Petition of the undersigned Inhabitants of Balmain,—

HUMBLY AND MOST RESPECTFULLY SHEWETH:—

That having learned with great regret that it is proposed to discontinue or diminish, by a Legislative enactment, the very moderate pecuniary assistance hitherto afforded by the Government to the Ministers of Religion, the Petitioners beg most respectfully to submit to your Honorable House, that the contemplated measure to which they refer would, in their humble opinion, be productive of much evil, and of no benefit whatever to society. It is universally known, and generally admitted, that this class of persons constantly render to the colonists invaluable services, and merit thereby efficient and permanent support from the hands of those who are intrusted with the Administration of the Public Funds.

The Petitioners, therefore, humbly and most respectfully solicit your Honorable House to avert the impending calamity, and your Petitioners shall ever pray.

STATE AID TO RELIGION.

(ALBURY.)

Ordered by the Legislative Assembly to be Printed, 17 February, 1860.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned Inhabitants of the District of Albury,—

SHEWETH:—

That as certain Members of our Colonial Parliament have used their influence to withdraw State Aid from the Clergy.

Petitioners therefore beg leave to appeal to your Honorable House against the efforts of those individuals who would willingly deprive the Clergy of any assistance from Government in a thinly-populated and infant Colony such as this.

Petitioners direct your serious attention to the strict right of a continuation of payment by Government to the Clergymen who comply with the provisions of Governor Bourke's Church Act.

Petitioners are furthermore surprised how any religious sect should complain, for all Denominations are on an equality.

Petitioners are anxious to point out to you that, in the event of having State Aid withdrawn, those Clergymen who built Churches, with an expectation of the usual support from Government, would not be able to meet the liabilities contracted.

Petitioners are desirous to impress on your learned Assembly, that if those persons succeed who are adverse to, the temporalities of the Clergy, it is the firm conviction of Petitioners, the revenue of New South Wales would be then considerably reduced, for many a Clergyman at Home would not have an opportunity of settling down amongst us,—others who are now at Home and anxious to study for the Church would be prevented from going on this mission; the result of this would be that numbers of lay persons would remain with their Clergy or follow them elsewhere, consequently many a broad acre of this beautiful territory would remain a perfect wilderness, which could be turned to good account if our Legislators had not been penny wise and pound foolish.

May it therefore please your Honorable and learned Assembly to take the above premises into your kind consideration.

And your Petitioners will ever pray.

The humble Petition of the undersigned Inhabitants of the District of Liverpool,—

SHEWETH :—

That your Petitioners have heard, with surprise and regret, that a motion is before your Honorable House, having for its object the taking away of an annual sum granted directly from the Crown towards the support of Public Worship in New South Wales.

That your Petitioners consider any interference with a grant made directly from the Crown calculated to render the validity of all other grants from the Crown exceedingly questionable, and to destroy public confidence therein.

That your Petitioners are persuaded that interference with a grant from the Crown, which was secured for an especial purpose by a separate clause or schedule of the Act of Settlement, is calculated to cause the world at large to doubt the probable adherence of the Government to their promises or acts on other questions, and to beget an expectation that, if money payments be repudiated under such circumstances, repudiation may be looked for in other departments.

That your Petitioners beg respectfully to submit that no payment to or agreement with the present receivers of the money granted originally from the Crown, and secured by the Act of Settlement, can invalidate the claim which future holders of the office of Ministers of Religion will have upon the funds thus provided towards the support of Public Worship.

That your Petitioners contemplate with much alarm the injury to the best interests of the people of New South Wales which will result from the withdrawal of the funds provided for the maintenance of Public Worship. They deem it unnecessary to enlarge upon the misery of a people destitute of the ordinances of religion; but they are persuaded that, as a natural consequence of the withdrawal of the grant from the Crown, this misery in all its force will inevitably fall upon many districts in the interior of the Colony, and that, within a few years, the children of the settlers will grow up with no more sense of religion than is found among the children of the aborigines.

That your Petitioners, therefore, earnestly and respectfully pray that your Honorable House will not allow the annual sum granted from the Crown for the support of Public Worship to be in any way interfered with or diverted from the original object for which it was designed.

And your Petitioners will ever pray, &c., &c.

Legislative Assembly.
NEW SOUTH WALES.

STATE AID TO RELIGION.
(CAMPBELLTOWN.)

Ordered by the Legislative Assembly to be Printed, 3 April, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Inhabitants of Campbelltown and its Suburbs,—

RESPECTFULLY SHEWETH:—

That the mode of applying State Revenues to the support and propagation of religious and ecclesiastical systems in use in this Colony is contrary to the nature of religious truth, and destructive of its free operation, since it maintains the most palpable contradictions, and thus unsettles both belief and practice.

That, for this reason, the system is decidedly immoral, and ought to be abolished.

That it is as inexpedient as it is immoral, since it takes away the motives for that liberality in support of religion which is everyone's personal duty and privilege, and thus deprives religion of its true and legitimate resources.

That it is found to be utterly inefficient in the work of instructing the people, leaving them in a very large degree under the worst forms of ignorance and vice, though it has been so long tried; the evidence of this is found on every side.

* That true religion wants no such support, being, when rightly cherished, abundantly able to supply motives for its own propagation in the high and self-denying generosity it inspires; and that every artifice to support religion without these motives is only a dangerous deception.

That for these and many other reasons equally strong, but too numerous to be mentioned here, your Petitioners cannot but feel that the time is fully come for the total abolition of every form of State Aid to Religion in this Colony. In its main principles they approve of the Bill now before your Honorable House relating to this subject.

Your Petitioners most respectfully pray your Honorable House to pass the said Bill unchanged in principle, and only with such alterations in the details as may be deemed necessary for equity to existing incumbents.

And your Petitioners will ever pray, &c.

[Here follow 54 Signatures.]

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(CAMPBELLTOWN, CAMDEN, AND MENANGLE.)

Ordered by the Legislative Assembly to be Printed, 22 February, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Catholics of Campbelltown, Camden, and Menangle,—

SH EWETH :—

That your Petitioners observe with grief the several propositions now under discussion for the total or partial abolition of that moderate degree of aid by which the Church Act promotes the interests of Religion, in securing a portion of the common funds towards the maintenance of the Ministers of Religion.

That your Petitioners respectfully urge on the consideration of your Honorable House the fact, that an absolute covenant exists between the Government and all those parties who, throughout the Colony, have accepted and fulfilled the terms of the covenant proposed in the said Act.

That the people of New South Wales, in the various Districts, have expended money in building Churches, with the full confidence that those Churches were endowed with an annuity from the common fund, and that the Ecclesiastical Authorities of the several Denominations have drawn from their people frequent contributions for building Churches and Ministers' Residences, and invited from Europe Ministers of Religion, deeming that the public faith was pledged to the permanency of that partial support, in perpetuity undertaken, which was declared by the Church Act.

That your Petitioners have just ground for considering the Clerical Stipend established by said Act to be annuities—debts under a covenant—to which the parties are, on the one side, the people who build Churches, and, on the other side, Her Majesty the Queen, the Imperial Parliament, and Colonial Government.

That if it were maintained that a limit to the operation of the Church Act was proposed or implied in the Constitution Act, it could be, at most, a limit of the amount of £28,000, and not a limit of time determining its duration. The Queen surrendered into the hands of the Colonial Parliament the disposal of the Waste Lands, and in consideration of such surrender accepted certain sums, to be provided annually, amongst which sums is this for Public Worship.

That the annuity for Public Worship is as much an integrant part of the Constitution Act as is the annuity for Pensions, and that both of them are similarly and equally protected by the guarantee of public honor.

That your Petitioners, therefore, pray that no withdrawal of State Aid to Religion may take place, but that the provisions of the Church Act may be continued, and confidence in the public faith of New South Wales remain undisturbed.

And your Petitioners will ever pray.

STATE AID TO RELIGION.

(ST. MICHAEL'S, SURRY HILLS.)

Ordered by the Legislative Assembly to be Printed, 22 February, 1860.

To the Honorable the Speaker and the Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Members of the Church of England, and Parishioners of St. Michael's, Surry Hills, Sydney,—

SHEWETH :—

That your Petitioners have heard, with pain and regret, that a Bill has been introduced into your Honorable House to repeal so much of the Constitution Act as reserves the amount mentioned in Schedule C to that Act for the purposes of Public Worship.

That your Petitioners are firmly persuaded that the withdrawal of the amount so provided for the maintenance of Public Worship would be injurious to the interests of religion and moral welfare of the members of the Church of England in this Colony.

That your Petitioners respectfully submit, that if the said proposed measure is passed into law, a breach of the public faith will be committed towards all those persons who have built or subscribed towards the building of Churches and places for Public Worship under and in pursuance of the Act commonly known as Sir Richard Bourke's Church Act.

Your Petitioners, therefore, earnestly pray your Honorable House to maintain the provisions contained in the said Constitution Act for the maintenance of Public Worship, and not to pass the said Bill.

And your Petitioners, as in duty bound, will ever pray, &c.

STATE AID TO RELIGION.

(CERTAIN CLERGYMEN OF THE CHURCH OF ENGLAND.)

Ordered by the Legislative Assembly to be Printed, 3 April, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Clergymen of the United Church of England and Ireland, in the Diocese of Sydney,—

HUMBLY SHEWETH:—

That your Petitioners have heard with much concern that a Bill has been introduced into your Honorable House having for its object to abolish State Aid to Religion.

That your Petitioners are firmly persuaded that it is not expedient to abolish provision by the State for public worship.

That your Petitioners have also special objections to urge against the present Bill, and are persuaded that it would prove highly detrimental to the interests of the Church of which they are Ministers, and to the progress of religion generally—more especially in the Rural Districts, many of which are now unable, without extraneous aid, to make due provision for the sustentation of religious ordinances.

That admitting that pecuniary advantages might accrue to individual clergymen from the provisions of the Bill, your Petitioners nevertheless consider that its adoption would be unjust to the church at large, particularly to those numerous parishes which have erected churches and parsonages, and entered into engagements, relying on the continuance of that aid to religion which they regarded as secured by the Act of Council, 7 Wm. IV., No. 3.

That your Petitioners further object to the Bill, because it ignores the conditions upon the faith of which the chief pastor of their church accepted the office of Bishop and Metropolitan.

For these and other weighty reasons, your Petitioners therefore pray that your Honorable House will be pleased to withhold your assent from the present Bill, and from any measure to which the same objections may be offered.

And your Petitioners, as in duty bound, will ever pray, &c.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(HINTON.)

Ordered by the Legislative Assembly to be Printed, 3 April, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Inhabitants of Hinton and its vicinity,—
MOST RESPECTFULLY SHEWETH :—

That your Petitioners are under the belief, that the present system of State Endowment to Religion in this Colony is detrimental to the best interests of the people; and they respectfully urge upon your Honorable House the necessity of its immediate and total abolition.

That your Petitioners view, with unfeigned pleasure, the "Abolition Bill" now before your Honorable House; and they sincerely trust that the said Bill, with certain amendments, may pass into law without delay.

That your Petitioners desire most respectfully to call the attention of your Honorable House to the painful fact, that there are certain Clergymen in the Colony who would be entitled to compensation under the proposed "Abolition Act" in its present shape, but who have forfeited all claim to the same, by grossly neglecting the sacred duties they stipulated to perform, in order to devote their time and talents to secular pursuits.

Your Petitioners, therefore, humbly pray that a Committee of your Honorable House may be appointed to inquire into the individual merits of the respective Clergymen, previously to the amount of compensation being agreed upon; so that the faithful servant may be distinguished from the unfaithful one, and that each may be rewarded according to his desert.

That your Petitioners, in conclusion, respectfully beg to call the attention of your Honorable House to the alarming truth, that many of the youth of the Colony are perishing through lack of knowledge; and, in doing so, your Petitioners desire to express their humble opinion, that the total abolition of the Government stipends to Clergymen is only paving the way for the introduction and establishment of a liberal, comprehensive, and permanent system of Primary Education.

And your Petitioners, as in duty bound, will ever pray.

(COOMA.)

Ordered by the Legislative Assembly to be Printed, 10 April, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned residents in the District of Cooma, in the Pastoral District of Maneroo,—

RESPECTFULLY SHEWETH:—

That the District of Cooma is of vast extent, and the population very scattered and sparse, and the great majority of them are engaged as shepherds and stockmen, and are not in a position to maintain their Clergy without assistance from the Public Funds.

That the spiritual necessities of the District require at least the constant services of a Clergyman of the Church of England and of the Church of Rome.

That, in consequence of their parishioners being scattered over so vast a district, the expenses of the Clergy are necessarily large, and the amounts raised by the contributions of the inhabitants cannot be sufficient to support them in decent comfort.

That your Petitioners have heard, with alarm and apprehension, that measures are being brought forward for the purpose of depriving the Clergy of such assistance.

Your Petitioners, therefore, humbly pray, that in any Bill about to be passed for the alteration or regulation of the Schedule from which the funds for the payment of the Clergy have hitherto been provided due precaution may be used, that in this and other similarly situated districts the scattered inhabitants may not be deprived of the spiritual consolations and privileges of the ministrations of religion by the withdrawal or diminution of the aid at present afforded by the State towards the support of the Clergy.

And your Petitioners, as in duty bound, will ever pray, &c., &c.

(MEMBERS OF THE JEWISH FAITH.)

Ordered by the Legislative Assembly to be Printed, 23 May, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Members of the Jewish Faith, residing in the City of Sydney,—

RESPECTFULLY SHEWETH:—

1. That your Petitioners have observed that an Honorable Member of your Honorable House has intimated his intention of moving that your Honorable House do resolve itself into a Committee of the whole to consider of an Address to the Governor General, praying that His Excellency will be pleased to cause to be placed upon the Supplementary Estimates for the Year 1860, the sum of two hundred pounds, to be paid to the Jewish Minister resident in Sydney, in aid of the stipend received by him from the Members of that Denomination.

2. That your Petitioners are of opinion, that so long as aid from the Public Revenue is granted for Public Worship, as provided for in Schedule C of the Constitution Act, they are entitled to a proportion of that grant.

3. That your Petitioners would, however, gladly see State Aid abolished, and they object to the sum set apart under the Constitution Act from being supplemented in any way.

4. That your Petitioners, therefore, respectfully pray that your Honorable House will assert the right of the Jewish community to receive a proportion of the £28,000 reserved by the Constitution Act for Public Worship, and that you will not assent to the proposition of the Honorable and Learned Member for East Sydney.

And your Petitioners, as in duty bound, will ever pray.

(WELLINGTON.)

Ordered by the Legislative Assembly to be Printed, 3 February, 1860.

To the Honorable Members of the Legislative Assembly of New South Wales, now in Parliament assembled.

The Petition of the undersigned Residents, Landholders, and Leaseholders of the Police District of Wellington, in the Colony of New South Wales.

Your Petitioners view with regret the proposed change, with regard to the abolition of State Aid to Religion, which would be productive of injury to the cause of Religion, and to the spiritual and temporal interests of this district.

Your Petitioners pray against the withdrawal of the sum of money usually voted for Religion; and to state respectfully, that, in a sparsely peopled district like Wellington, the withdrawal of Government assistance would be a loss impossible to be supplied in any other way; and humbly pray that the Bill now before the House may not be allowed to pass into a law.

Your Petitioners beg that this Petition may be taken into consideration, emanating from a large and populous district, the inhabitants of which are widely spread apart; many of whom never had an opportunity of having religious instruction at all, owing to the want of sufficient Ministers of Religion; and which number, at present so scanty, must be lessened by the withdrawal of State Aid.

Your Petitioners will ever pray, &c.

1859.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(PETITION FROM BRAIDWOOD GOLD FIELDS.)

Ordered by the Legislative Assembly to be Printed, 22 September, 1859.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned Inhabitants of the District of Braidwood,
including the Gold Fields,—

SHEWETH :—

That in consequence of official intimation lately received to the effect that Ministers do not intend to place any sum on the Estimates for Salaries to the Chaplains on the Gold Fields after the expiration of the present year, Petitioners beg leave to appeal to your Honorable House against a proposal which they cannot look upon otherwise than as wholly unnecessary and uncalled for.

Petitioners specially call the attention of your Honorable House to the fact that the Gold Miners are already taxed for the support of their Chaplains, and that the amount thus contributed is more than sufficient to cover the whole expenditure on the Gold Fields. Petitioners are therefore at a loss to conceive how Ministers can reconcile it with a faithful stewardship of the Gold Revenue, to withhold it from its legitimate purpose.

Petitioners beg to trespass on the patience of your Honorable House still further by adding that they look upon the circumstances of the Gold Chaplains as altogether exceptional; and, notwithstanding the difference of opinion among Petitioners on the general question of State Aid to the Clergy, they all agree in regarding the right of the Gold Chaplains to Government Salaries, or, at least, the right of the Gold Miners to claim such Salaries for them as undeniable.

Petitioners will be so candid as to say that the carrying into effect of the Ministerial proposal will be followed, as a natural consequence, by a demand upon Ministers for the remission of the export duty upon gold, if not with other unpleasant circumstances; but Petitioners have the fullest confidence that a Reformed Parliament, animated by a sense of justice and honor, will prevent such an undesirable issue, by giving an unanimous negative to the Ministerial project, should Ministers themselves, on better thought, not see it prudent to alter their purpose.

May it therefore please your Honorable House to take the premises into your favorable consideration.

And your Petitioners will ever pray, &c.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(DARLING POINT.)

Ordered by the Legislative Assembly to be Printed, 10 February, 1860.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.
The humble Petition of the undersigned Members of the Church of England, and
Parishioners of St. Mark the Evangelist, Darling Point, near the City of
Sydney,—

SHEWETH :—

That your Petitioners have heard, with pain and regret, that a Bill has been introduced into your Honorable House to repeal so much of the Constitution Act as reserves the amount mentioned in Schedule C to that Act for the purposes of Public Worship.

That your Petitioners are firmly persuaded that the withdrawal of the amount so provided for the maintenance of Public Worship would be injurious to the interests of religion in general, and highly prejudicial to the religious and moral welfare of the members of the Church of England in this Colony.

That, in the opinion of your Petitioners, it would be utterly unjust to pass the said proposed measure, inasmuch as the passing thereof would be a breach of a distinct Parliamentary compact made between the Legislature of this Colony and Her Majesty, whereby, in consideration of Her Majesty relinquishing the statutable provision previously belonging to Her Majesty, and of other concessions made by Her Majesty, the said Legislature granted to Her Majesty, her heirs, and successors, among other things, the said sum of money mentioned in the said schedule for the said purposes therein mentioned.

That your Petitioners respectfully submit that, if the said proposed measure is passed into law, a gross breach of the public faith will also be committed towards all those persons who have built or subscribed towards the building of Churches and places for Public Worship under and in pursuance of the Act commonly known as Sir Richard Bourke's Church Act.

That your Petitioners are firmly persuaded that the due performance of the Public Worship cannot be carried on in this Colony upon the voluntary principle, and that, even if it were possible, it would not be desirable to introduce that principle into the Church of England.

Your Petitioners, therefore, earnestly pray your Honorable House to maintain the provision contained in the said Constitution Act for the maintenance of Public Worship, and not to pass the said Bill.

And your Petitioners will ever pray, &c.

Legislative Assembly.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(PETITION FROM WESTERN GOLD FIELDS.)

Ordered by the Legislative Assembly to be Printed, 2 September, 1859.

To the Honorable the Legislative Assembly, in Parliament assembled.

The Humble Petition of the undersigned Residents on the Western Gold Fields,—

SHEWETH :—

That Ministers of Religion of the following Denominations, viz. :—Church of England, Church of Rome, Presbyterian, and Wesleyan, were appointed in these Districts with a promise from the Government that Stipends should be paid to them out of the Revenue of the Colony.

That they are accordingly in receipt of Salaries amounting to three hundred pounds a year, with forage or allowance for one horse.

That the necessaries of life upon the Gold Fields being much more expensive than in other parts of the Colony, it is impossible for a Minister of Religion to maintain himself in respectability on a smaller sum.

That the peculiar circumstances of the population render it impossible for Ministers of Religion to be supported upon the Gold Fields under any other than the existing system of State Aid.

That the population of the Gold Fields being entirely dependent upon daily labor of a kind in which success is very uncertain, and there being no fixed proprietary, and no settled residence, also very few persons in the community possessed of any independent means, the voluntary system is entirely inapplicable to these Districts.

That your Petitioners are under the most serious apprehension, that if State Aid be withdrawn they will be deprived of the Religious Ordinances they have hitherto enjoyed, and of the advantages resulting from the influence of the Ministers of Religion to the causes of Education and Morality.

That the large revenue immediately derived, and the immense benefits to the material wealth of the Colony arising indirectly from the production of Gold, give your Petitioners a special claim upon the liberality of the Government for the maintenance of any institution which may contribute to the welfare of the mining population, and especially for the support of the Ordinances of Religion.

Your Petitioners, therefore, intreat that your Honorable House will take these circumstances into favorable consideration; and respectfully urge the expediency—should State Aid to Religion be withdrawn in other parts of the Colony—of making an exception in favor of the Gold Fields.

And your Petitioners, as in duty bound, will ever pray, &c., &c.

NEW SOUTH WALES.

STATE AID TO RELIGION.

(PETITION FROM WESTERN GOLD FIELDS.)

Ordered by the Legislative Assembly to be Printed, 2 September, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned, Members of the Church of England, Church of Rome, Presbyterians, and Wesleyans,—

HUMBLY SHEWETH :—

That your Petitioners are at present resident on the Western Gold Fields.

That your Petitioners deplore the recent decision of your Honorable House, by which the Stipends of the several Ministers of Religion, now laboring amongst them, are entirely withdrawn.

That from the peculiar circumstances attending the occupation of a Gold Field, the uncertainty of gold mining pursuits in any locality, and consequent duration of residence, it is obviously impossible for such a community to support their own Religious Establishments, the power of doing so even by a settled community possessed of a resident proprietary, having yet to be proved.

That this Gold Field at present numbers a Christian population of at least four thousand souls.

That your Petitioners approach your Honorable House fully convinced that it was not the intention of the decision referred to to deprive this numerous and peculiarly circumstanced community of the advantages of Religious instruction, and therefore pray for such relief as your Honorable House may see fit to grant.

Legislative Assembly.

NEW SOUTH WALES.

SCOTS' CHURCH ALLOTMENT.

(PROPOSED EXCHANGE OF A PORTION OF.)

Ordered by the Legislative Assembly to be Printed, 16 December, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Moderator and Clerk of the Synod of Australia,—

HUMBLY SHEWETH :—

That your Petitioners have learnt with surprise that notice has been given to your Honorable House of a motion “for leave to bring in a Bill to enable the Trustees of “the Scots' Church to exchange a portion of their Allotment.”

2. That the Land thus sought to be exchanged is subject of a Lawsuit now pending in the Law Courts of this Colony.

3. That in the matter involving this Land a judgment favorable to the Synod of Australia has already been given by the Judge in Equity, of which judgment the following extract is given as bearing upon the matter in question :—

“I decree that Dr. Lang and Mr. Ramsay, who is absent from the Colony, but “appeared at the hearing, be removed from being Trustees of this Church and the other “buildings, standing on the Land contained in the grant from the Crown, and that it be “referred to the Master to appoint five new Trustees in the places of the original five Trustees,
“ * * * * *

“And I order him (Dr. Lang) to deliver up possession thereof to the five new Trustees, when “and so soon as they shall be so appointed; and I order that the said Dr. Lang and Mr. “Ramsay do all necessary acts for vesting the premises in such new Trustees; and I order “that an injunction do issue to restrain the defendants, Dr. Lang and Mr. Ramsay, from “interfering with the Church and premises save as directed by this decree.”

4. That the matter is now carried by Appeal of the Trustees of the Scots' Church to the full Court of Judges.

5. That as the Land thus sought to be exchanged, and the Trustees seeking this permission, are the same referred to so decisively in the above decree, to grant such sanction as is sought for by the motion would be to obstruct the course of justice, to overrule the decision of a Law Court of this Colony, and to anticipate the Judgment now pending.

That your Petitioners, on the above grounds, humbly beg your Honorable House to take the premises under your consideration, and to refuse the sanction sought for in the motion of Dr. Lang.

And your Petitioners, as in duty bound, will ever pray.

JOHN DOUGALL,

Moderator of the Synod of Australia.

JA. MILNE,

Clerk of Synod.

NEW SOUTH WALES.

DEAN OF ST. ANDREW'S, SYDNEY.
(PETITION OF CHURCHWARDENS.)

Ordered by the Legislative Assembly to be Printed, 3 February, 1860.

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of the undersigned, the Churchwardens of St. Andrew's
temporary Cathedral,—

RESPECTFULLY SHEWETH:—

1. That the Revd. George King is the Licensed Minister and Incumbent of St. Andrew's Cathedral Church, with the Parish annexed.
2. That for upwards of ten years he has faithfully discharged the duties of this office, as sole Minister.
3. That on the second day of August, 1858, an announcement was published in the "Church of England Chronicle," stating that the Revd. W. M. Cowper had been nominated to the Deanery of St. Andrew's Cathedral, in the City of Sydney.
4. That a salary of three hundred pounds per annum, to be paid to the said Revd. W. M. Cowper, as Dean, has been authorised by the Executive Government, in which his brother, Charles Cowper, Esq., held, at the time of this appropriation, the office of Colonial Secretary and Vice-President of the Council.
5. That the said Revd. W. M. Cowper has received, and continues to receive, the aforesaid salary of three hundred pounds per annum, as Dean of Sydney.
6. That the Incumbency of their Minister, the aforesaid Revd. George King, as your Petitioners are informed, and verily believe, invalidates the appointment in question, and renders the assumption of the title of Dean of St. Andrew's Cathedral, by the said Revd. W. M. Cowper, completely nugatory.
7. That your Petitioners' predecessors in office regarded this movement as an aggression upon the rights and privileges of their Minister, and protested against it.
8. That your Petitioners, acquiescing in the aforesaid view of their predecessors in office, repeated the same protest against it.
9. That the Office of Dean of St. Andrew's Cathedral, in the person of the said Revd. W. M. Cowper, who is the acting Incumbent of St. Phillip's Church, is a mere sinecure, no duties having ever been performed by him in connection with St. Andrew's Cathedral Church, in consideration of such salary.
10. That in answer to a question proposed by an Honorable Member in the Legislative Assembly, asking what duties the so-called Dean of St. Andrew's Cathedral performed on account of such high salary, the late Colonial Secretary replied to the following effect— that he would have certain duties to perform connected with Denominational Schools.

11.

11. That your Petitioners cannot regard the performance of work done in the Denominational School Office as a fair pretence for obtaining money as Dean of St. Andrew's Cathedral.

12. And your Petitioners pray that your Honorable Assembly will be pleased to grant such relief in the premises as may seem meet, and withhold your sanction from the appointment above complained of, by refusing to appropriate moneys towards the endowment of an Office which is a perfect sinecure and plurality.

And your Honorable Assembly's Petitioners will ever pray.

F. R. ROBINSON, }
HENRY SELBY, } Churchwardens of St. Andrew's
JOHN A. BUTTREY, } Cathedral Church.

REPORT FROM THE SELECT COMMITTEE

IN REFERENCE TO THE

DEAN OF ST. ANDREW'S, SYDNEY;

TOGETHER WITH THE

PROCEEDINGS OF THE COMMITTEE

AND

MINUTES OF EVIDENCE.

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED,

1 June, 1860.

SYDNEY:

THOMAS RICHARDS, GOVERNMENT PRINTER, PHILLIP-STREET.

1860.

[Price, 1s. 6d.]

579--

1859-60.

DEAN OF ST. ANDREW'S, SYDNEY.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 17th February last, to whom was referred "*the Petition from the Churchwardens of St. Andrew's,*" regarding the appointment of the Rev. Wm. M. Cowper as Dean of St. Andrew's, Sydney, have agreed to the following Report:—

In conducting the inquiry into the subject referred to their consideration, your Committee have examined two witnesses, the Rev. George King, Incumbent of St. Andrew's Church, Sydney, and the Very Rev. Wm. M. Cowper, Dean of St. Andrew's; and by the evidence of these gentlemen the following facts have been established.

On the 15th July, 1849, the Rev. Mr. King was appointed to the Incumbency of St. Andrew's Church, Sydney, and ever since that time has been the sole Incumbent of the same,—performing the duties of the office, and drawing from the funds appropriated under Schedule C of the Constitution Act an annual salary of £200, besides an allowance of £25 in lieu of Glebe. This church, which is a wooden structure, was built under the provisions of Sir Richard Bourke's Act for promoting the Building of Churches and Chapels; and, from being a mere ordinary Parish Church, appears to have been afterwards regarded in the additional character of a Cathedral Church,—being described by the Dean of St. Andrew's as answering the purpose of "a temporary Cathedral" until the other, which is now in course of being built, shall be completed.

By a Deed Poll, dated the 10th July, 1858, under the hand of the Bishop of Sydney, the dignity of a Deanery of the Cathedral Church of St. Andrew's, in the City of Sydney, was founded by virtue of the power granted by Her Majesty's Letters Patent, dated the 19th October, 1854; and by another instrument, dated 12th July of the same year, His Lordship conferred on the Rev. Wm. M. Cowper "the office and title of dignity of Dean of" the "said Cathedral Church, by the style and "title of Dean of Sydney"; and further committed to the said Dean of Sydney "full and complete Archidiaconal jurisdiction and authority "within the said City of Sydney and the suburbs thereof."

At the time of this appointment it appears that the Rev. Mr. Cowper was Minister of St. John's, Bishopsthorpe; but that on 1st August, 1858, he was translated from that charge to the Incumbency of St. Philip's, Sydney,

Sydney, which office he still holds. As Dean of St. Andrew's, the Rev. Mr. Cowper draws a salary of £300 per annum from the Colonial Treasury; and, as the Incumbent of St. Philip's, a salary of £160 per annum from the same source, besides £150 from the Glebe Funds,—making in all, for this plurality of offices, £610 a year.

The Petitioners allege “that the office of Dean of St. Andrew's Cathedral in the person of the said Rev. Wm. M. Cowper, who is the acting Incumbent of St. Philip's Church, is a mere sinecure, no duties having ever been performed by him in connection with St. Andrew's Cathedral Church, in consideration of such salary.”

On this point, which your Committee regard as the most important involved in the inquiry—and indeed the only one with which, it is conceived, they have any right to deal—the evidence given by the Rev. Mr. Cowper himself appears to be conclusive, as will be seen from the following extracts:—

- “ 260. * * * * * * * * * * what
 “ salary do you receive as Dean of St. Andrew's? £300 per annum.
 “ 261. From what source is that paid? From the Colonial Treasury.
 “ 262. From the same source from which you derive your salary as minister of St. Philip's
 “ Church? Yes.
 “ 263. With regard to the duties attached to this office, is it true, as stated in the petition,
 “ that there are no duties belonging to the office? In answer to that question, I should state
 “ that the office of Dean of St. Andrew's is not my correct title; I am Dean of Sydney as
 “ well as Dean of St. Andrew's, and as such, am invested with archidiaconal jurisdiction over
 “ the clergy of Sydney and its suburbs. The two offices of dean and archdeacon are united.
 “ 264. Is there any formal instrument appointing you to that office? There is. I have an
 “ instrument founding a deanery in St. Andrew's, and an instrument collating me to the
 “ office of Dean of Sydney.
 “ 265. Have you any objection to hand them in? (*The witness handed in the same. Vide*
 “ *Appendix A and B.*)
 “ 266. I suppose, under this instrument, founding a deanery there is no appointment of
 “ yourself as dean? No.
 “ 267. Is there under the other instrument? The other instrument collates me to the office
 “ of Dean of Sydney, and the duties which devolve upon me as dean with archidiaconal
 “ jurisdiction in the city and suburbs, are stated in another document at length.
 “ 268. In the collation? Not in the collation; but, rather, I should say, in a paper of
 “ instructions from the Bishop which accompanied it; and which I have here. (*The witness*
 “ *handed in the same. Vide Appendix C.*)
 “ * * * * * * * * * *
 “ 307. When were you appointed Dean of St. Andrew's? On the 12th July, 1858.
 “ 308. Is the cathedral of St. Andrew's finished? It is not.
 “ 309. Is divine service performed in any part of the cathedral? It is not.
 “ 310. Have you ever preached in the cathedral? I have not.
 “ 311. What are the duties of dean of a cathedral according to the practice of the Established
 “ Church of England and Ireland? He is next to the Bishop, the chief minister in the
 “ Church. His duties are to conduct divine service during a portion of the year, to preach,
 “ and he is to reside a certain time, I think about ninety days in the year, in the cathedral
 “ or its precincts.
 “ 312. Have you ever, according to that practice, conducted divine service in the cathedral
 “ of St. Andrew's or resided within the cathedral or its precincts? That is quite impossible,
 “ inasmuch as it has had no roof upon it until recently.
 “ 313. You say you receive your salary merely as Dean of Sydney, and sign a receipt for it?
 “ Yes.
 “ 314. Do you sign a receipt for that salary in virtue of the performance of any duties as
 “ dean? I do, as Dean of Sydney, with archidiaconal jurisdiction.
 “ 315. According to your definition of the duties of dean, you have never resided within the
 “ precincts of the cathedral, nor have you performed divine service within the cathedral? I
 “ have stated that I have not.
 “ 316. Then, according to the English practice, you receive a salary of £300 a year for not
 “ performing the duty of dean? I receive a salary of £300 for performing duties which
 “ have been delegated to me by the Bishop —.
 “ 317. I am asking you with reference to the duties of dean, according to the English
 “ practice? The Bishop has connected with the office of dean certain duties, for which I
 “ consider myself entitled to a salary.
 “ 318. What are the duties for which you conceive you are entitled to a salary—are they
 “ the archidiaconal duties you have alluded to? They are.

“ 319. Do you know of any case where the dean of a cathedral church in England or Ireland has had tacked on to the office of dean the performance of archidiaconal duties, in virtue of his appointment as dean? I am not acquainted with the practice in England, having been in this Colony for more than the last 24 years.

“ 320. Do you know of any case of a similar kind in practice of the Church of England and Ireland? I do not, of my own knowledge. I believe such was the practice formerly in England.

“ 321. When you say formerly, do you allude to the present century? I do not.

“ 322. How many centuries back? Several centuries back.

* * * * *

“ 365. When do you expect to be in performance of the duties strictly connected with your appointment as dean of the cathedral church of St. Andrew's? I am not in a position to answer that question; I should think it would be not less than two years from the present time. Great progress has been made towards the completion of the building, but there is a great deal to be done with regard to the internal arrangements, which I should think would hardly be completed within the next two years.”

According to these statements, the only duties which Mr. Cowper professes to perform, under his appointment of Dean of Sydney, are of a purely Archidiaconal character, and your Committee believe that it is several centuries since any case occurred in England of such a union of offices as that of Dean and Archdeacon.

The foregoing allegation of the Petitioners, therefore, appears to be substantially correct.

Into the question as to how far the Bishop of Sydney is authorized to appoint Dignitaries in the Church, of which his Lordship is the spiritual head in this Colony, your Committee do not think themselves called on to inquire. But, whatever may be the precise nature of the Bishop's powers in that respect, it is clear to your Committee that the appointment of a dignitary without a function—of an officer without a duty—is an abuse of those powers, and that the payment of any salary to such an officer out of the public Treasury is a misappropriation of the public money, equally unwarrantable and indefensible.

J. BLACK,

Chairman.

*Legislative Assembly Chamber,
Sydney, 1 June, 1860.*

PROCEEDINGS OF THE COMMITTEE.

WEDNESDAY, 11 APRIL, 1860.

MEMBERS PRESENT:—

Mr. Black,		Rev. Dr. Lang,
	Mr. Plunkett.	

J. Black, Esq., called to the Chair.

Resolution of the House, dated the 17th February last, appointing Committee and referring Petition, read.

Original Petition produced, and copies laid before Committee.

Mr. Plunkett submitted the following objections, entertained by that gentleman personally, to proceeding with the subject of inquiry:—

1. That he was unable to recognise the right or policy of inquiring into the discipline of any particular church.
2. That not being a member of the United Church of England and Ireland, he was unconcerned in the internal administration of its affairs.

Committee deliberated.

Mr. Plunkett withdrew.

A quorum of Members not being present, Committee

[Adjourned till Friday, 13th instant, at *half-past Ten* o'clock.]

FRIDAY, 13 APRIL, 1860.

MEMBER PRESENT:—

Mr. Black.

In the absence of a quorum of the Committee, the meeting convened for this day *lapsed*.

WEDNESDAY, 25 APRIL, 1860.

MEMBERS PRESENT:—

J. Black, Esq., in the Chair.

Mr. Faucett,		Rev. Dr. Lang,
Mr. Garrett,	Mr. Samuel.	Mr. Piddington,

Committee met pursuant to summons.

Minutes of Proceedings at the first meeting read.

Committee deliberated upon the course of inquiry to be adopted.

Motion made (*Mr. Piddington*) and *Question*—That the Rev. G. King, Incumbent of the Parish of St. Andrew, and the Very Rev. W. M. Cowper, Dean of Sydney, be summoned to give evidence at the next sitting—*agreed to*.[Adjourned till Wednesday, 2nd proximo, at *Eleven* o'clock.]

WEDNESDAY, 2 MAY, 1860.

MEMBERS PRESENT:—

J. Black, Esq., in the Chair.

Mr. Faucett,		Mr. Piddington,
Mr. Garrett,	Mr. Samuel.	

Rev. G. King, *Incumbent of the Parish St. Andrew, Sydney*, called in and examined.Very Rev. Dean Cowper *present* while Mr. King gave evidence, but leaving, by permission, before its conclusion, was not examined *this day*.

Examination of the Rev. Mr. King concluded.

Witness withdrew.

Committee directed the attendance of the Very Rev. Dean Cowper to be summoned for Tuesday next, at eleven o'clock,—the Rev. Mr. King having been apprised of such meeting by the Chairman.

[Adjourned accordingly.]

TUESDAY,

TUESDAY, 8 MAY, 1860.

MEMBERS PRESENT :—

J. Black, Esq., in the Chair.

Mr. Garrett, | Mr. Piddington.

Rev. G. King, and
Very Rev. Dean Cowper, *present*.
Very Rev. W. M. Cowper, *Dean of Sydney*, examined.

And a question having been put to witness, whether, since his appointment as Dean, the rights and privileges of the Rev. Mr. King had been in any way infringed, and
Objection taken thereto by Mr. Faucett.

Witness and party withdrew.

Committee deliberated upon the objection urged, viz., That any consideration of the ecclesiastical rights and privileges attached to the position of the Rev. Mr. King would tend to divert the Committee from their proper range of inquiry.

Committee resolved to waive any further question on the subject referred to.

Witness and party called in.

Rev. G. King, and
Very Rev. Dean Cowper, *present*.
Examination of the Very Rev. W. M. Cowper, *Dean of Sydney*, concluded.

Witness withdrew.

Committee directed that the Rev. Mr. King be summoned to give further evidence at the next sitting, and that the Very Rev. Dean Cowper be pre-informed of the same being held.

[Adjourned till Tuesday, 15th instant, at *Eleven* o'clock.]

TUESDAY, 15 MAY, 1860.

MEMBERS PRESENT :—

J. Black, Esq., in the Chair.

Rev. Dr. Lang, | Mr. Piddington.

Rev. G. King, *present*.
Rev. G. King, *Incumbent of the Parish of St. Andrew, Sydney*, further examined.
Witness withdrew.

Committee deliberated relative to succeeding steps in the matter, and
Resolved, That the Question presented in the Petition, as developed by the Evidence taken, be considered at the ensuing meeting.

[Adjourned till Tuesday, 22nd instant, at *Eleven* o'clock.]

TUESDAY, 22 MAY, 1860.

MEMBERS PRESENT :—

J. Black, Esq., in the Chair.

Mr. Faucett, | Mr. Piddington,
Rev. Dr. Lang, | Mr. Samuel.

Committee deliberated, reviewing the several allegations contained in the Petition. Chairman instructed to prepare Draft Report for consideration at the next meeting.

[Adjourned till Tuesday, 29th instant, at *Eleven* o'clock.]

TUESDAY, 29 MAY, 1860.

MEMBERS PRESENT :—

J. Black, Esq., in the Chair.

Rev. Dr. Lang, | Mr. Piddington.

The Chairman informed Committee, that as copies of the Evidence had but now been obtainable, it might better suit the convenience of several members to defer proceeding with a Draft Report until the following meeting.

Committee deliberated.

Directions given for the circulation of the evidence.

[Adjourned till Thursday, 31st instant, at *Eleven* o'clock.]

THURSDAY,

THURSDAY, 31 MAY, 1860.

MEMBERS PRESENT:—

J. Black, Esq., in the Chair.
 Rev. Dr. Lang, | Mr. Piddington,
 Mr. Samuel.

The Chairman laid before Committee a Draft Report.
 Committee deliberated.
 Draft Report read 1°.

[Adjourned till to-morrow, 1st proximo, at *Eleven* o'clock.]

FRIDAY, 1 JUNE, 1860.

MEMBERS PRESENT:—

J. Black, Esq., in the Chair.
 Rev. Dr. Lang, | Mr. Piddington,
 Mr. Samuel.

Committee met to further consider Draft Report.
 Draft Report read 2°.
 And the same having been *verbally* amended,—
It was Resolved, That this be the Report of the Committee.
 Chairman requested to report to the House.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

IN REFERENCE TO

THE DEAN OF ST. ANDREW'S, SYDNEY.

WEDNESDAY, 2 MAY, 1860.

Present:—

MR. BLACK,		MR. PIDDINGTON,
MR. GARRETT,		MR. SAMUEL,
	MR. FAUCETT.	

JOHN BLACK, Esq., IN THE CHAIR.

The Rev. George King called in and examined:—

1. *By the Chairman:* Mr. King, what office do you hold in connection with the Church? That of Incumbent of St. Andrew's.
2. Incumbent of St. Andrew's? Incumbent of St. Andrew's Church, Sydney.
3. You are a regularly ordained clergyman? I am a regularly ordained clergyman.
4. Where were you ordained? In Christ's Church, Belfast, as deacon; and in my own Church at Holywood, as priest, by the Bishop of Down.
5. By the Bishop of Down? Yes; by Bishop Mant, the author of Mant's Bible.
6. Did you officiate in the capacity of priest in any church? I did.
7. In what church? Holywood Church.
8. For how long? I was more than a year there as priest.
9. And after that you came to this Colony? I came direct from there to Western Australia. I was appointed by the Gospel Propagation Society as their sole missionary in Western Australia, which, during my residence there, constituted a portion of the diocese of the late Dr. Broughton, Bishop of Sydney. My appointment to that Colony was accompanied by an authority from the Archbishop of Canterbury, to select my own place of abode there, and to extend my administrations as widely as I thought proper over the whole territory. After a residence of more than seven years there—
10. In Western Australia? After a residence of more than seven years in Western Australia, I was appointed by the late Bishop Incumbent of St. Andrew's Cathedral Church, with the parish annexed.
11. When did that appointment take place? On the 15th July, 1849.
12. By Bishop Broughton? By Bishop Broughton; the same Bishop that corresponded with me in Western Australia, and who was my Bishop there. I was in his diocese, and have been in this diocese for about nineteen years.
13. Did the Bishop offer the appointment to you? The Bishop offered the appointment to me without my seeking.
14. And you were appointed in July, 1849? In July, 1849.
15. Did you then actually commence to perform the duties? I then entered upon the duties. Previously to that time I performed full service in St. Andrew's Cathedral Church, and I have continued since that time as the sole incumbent.

The Rev.
George King.
2 May, 1860.

- The Rev. George King.
- 2 May, 1860.
16. At what salary? I received £200 per annum from the Government, from the beginning.
17. And has that same salary been continued to you ever since? That same salary has been continued to me ever since; together with £25 per annum in lieu of a glebe, which the late Bishop promised should be continued to me.
18. And do you still enjoy that sum of £25? I have, up to the present year; but Mr. James tells me that this year it will be discontinued.
19. The £25? He tells me so.
20. On what grounds? That is for Mr. James to explain.
21. Did Mr. James not assign the reason for its withdrawal? He was not particular in assigning reasons; he wished to make it appear that the Bishop could not do it.
22. That there was a deficiency in the funds? I can scarcely say that he stated it so. I do not know that there is a deficiency in the funds.
23. Then, so far as Mr. James' communication goes, you are left wholly in doubt as to the withdrawal of the £25? Yes.
24. Have you expressly acquiesced in the —? I have demurred against it, because it was a direct promise from the late Bishop in his own office. That promise was given as an inducement for me to remain here; for, at that time, I was unwilling to remain. The Bishop held it out as a reason why I should not be apprehensive about my children.
25. Is that the whole emolument you derive? No; my parishioners always give me very good Easter offerings, and contributions beside, to a considerable amount.
26. But everything beyond the £200 and the £25 is voluntary? Yes; voluntary contributions.
27. Have you officiated in this diocese since your appointment in 1849? Yes, ever since.
28. Are there any ministers beside yourself connected with this Church of St. Andrew's? It is stated that there are nominal canons; but I have no authority for it. The late Bishop never mentioned it to me. It never was announced until six weeks after the departure of the late Bishop from this country, that canons had been nominated by him.
29. The Bishop has stated that canons are appointed to this church, has he? Not to my knowledge. I should have received the announcement. But, more than six weeks after the departure of the late Bishop, Mr. James signified that there were canons appointed. I would regard them as nominal officers. They cannot be legal officers. I never interfere with them, nor they with me.
30. You are aware that the Rev. Mr. Cowper was appointed Dean of St. Andrew's? I am aware that he was appointed dean, nominally, of the Church of St. Andrew's.
31. How were you made aware of that fact? First, in the public prints—in the *Sydney Morning Herald*.
32. Had you no intimation on the subject from the Bishop? None whatever; not in the slightest degree. On the contrary, the Bishop told me that he had consulted upon the subject at Home, and that he thought he would appoint himself dean.
33. Appoint himself? Himself. There was some difficulty in the matter suggested to him at Home, it appears —.
34. Then you gathered from the public prints that this appointment had taken place? I gathered from the public prints that this appointment had been made.
35. Well, have any duties been performed in your church in consequence of that appointment, since it took place? None whatever.
36. Did you expect that the gentleman appointed (Mr. Cowper) would enter upon the performance of any duties? If it had been a legal appointment. He ought to have been installed. He could not receive a salary until he had been installed and properly instituted.
37. No duties have been performed in the church by him publicly? None whatever.
38. Are you aware of any duties whatever that are performed by Mr. Cowper in connection with this appointment? None whatever.
39. You do not know of any? I do not know of any, and I believe there are none performed by him in connection with St. Andrew's Cathedral Church.
40. You believe there are none, but you do not know it as a positive fact? There could be none performed in connection with my church without my knowledge.
41. You are aware that a petition was presented to the Legislative Assembly on this subject? Yes.
42. By the churchwardens of St. Andrew's Cathedral Church? Yes.
43. Do you know that this appointment excited dissatisfaction on the part of the churchwardens and congregation generally? Yes, it created great dissatisfaction.
44. On what ground did they feel dissatisfied with the appointment—what grounds did they assign? They felt dissatisfied because they perceived that it was an interference with my office as incumbent.
45. Did the feeling of dissatisfaction arise from the fact of your not having been appointed dean instead of Mr. Cowper? I have heard that stated by some —.
46. Or was it to the appointment of a dean at all in connection with the Church? I do not know exactly as to the "appointment of a dean at all." I do not hear that there would be any great dissatisfaction felt at the appointment of a dean, if it did not interfere with individual interests. For instance, a nominal dean might be appointed, as in other Colonial cathedral churches—in Adelaide and Melbourne. But the ministers of those churches have been appointed deans, so that there has been no interference with the interests of other parties.
47. Then the churchwardens conceive that an injustice has been done to you? Yes, in a double sense.
48. In what did this alleged injustice towards you consist, in their opinion? The Bishop of Sydney has written to the Archbishop of Canterbury, to state that in two years from the period of his writing that letter —.

49. What letter? A letter of the Bishop's, dated the 9th September, 1858, the new cathedral would be ready for consecration, and that Mr. Cowper would enter upon his duties there as dean. The Rev. George King.
50. Two years after the date of the appointment, do you mean? No; two years after the date of the Bishop of Sydney's letter. This is the letter. 2 May, 1860.
51. From whom is that letter? The Bishop of Sydney.
52. To whom? The Archbishop of Canterbury. It states—"The cathedral will probably be completed in two years, and the dean, who is at present the incumbent of an adjoining parish, will enter upon his duties at the cathedral." (*Letter handed in. Vide Appendix A.*)
53. Is this the actual letter itself? That is a copy of the letter.
54. *By Mr. Samuel*: How did you obtain a copy of that letter? It was sent to me from the Bishop's office.
55. *By the Chairman*: You were going on to answer that question as to what it was in which the injustice consisted, which, in the opinion of the churchwardens, had been done to you? Yes; it is considered that Mr. Cowper will supersede me in that cathedral. He, as the dean, if he come to officiate there, must be the rector. I am the rector as incumbent of the church; there cannot be two rectors. When he comes there, of course it will be to take my place.
56. They do not then mean to say that any injustice has yet been done, but this they look upon as a preliminary? As imminent. There are very few months now to come till the month of September, when the Bishop stated that the dean would commence his duties there.
57. In September, 1860? Yes, two years, from September, 1858, will be September, 1860.
58. And then, is it expected by the churchwardens that you will be succeeded to all intents and purposes? They consider it illegal; I do not suppose they would permit it.
59. But has the Bishop intimated to you, or has it been intimated to you from any quarter, in distinct terms, that the Dean of Sydney is to supersede you as incumbent? I think so. The terms of that letter shew that it is intended that he should be dean, and if he is to come there as dean of my church he is to supersede me; it was fully understood that no person should supersede me in that cathedral church except the Bishop himself.
60. *By Mr. Piddington*: Have you any letter to shew that? The Bishop called it my own church, and on my entering upon my duties there he encouraged me with hopes and expectations that within a period of three years from my entering upon office there, I should be amply repaid for all the inconveniences to which I might be subjected in the temporary building, by the spacious structure which we were erecting in its stead. And as an assurance that my interest should not be effected by the transference from the wooden to the stone building, his Lordship placed in my hands a letter from the Colonial Secretary, addressed to him upon the subject, as a guarantee to me that my rights would be respected by the Government as well as by the Church. Unforeseen circumstances prevented the completion of the building within the period of time specified by the Bishop.
61. While you are going on it may be as well, perhaps, to refer to the letter of the Colonial Secretary of the day, to which you have alluded—have you that letter? The Bishop placed it in my hands.
62. A letter from the Colonial Secretary to yourself? To the Bishop of Sydney.
63. And the Bishop placed this letter in your hands for the purpose of doing away with those apprehensions you had? Yes, this is the letter (*produced*). The Bishop gave me that letter to retain as a guarantee that I should be secure until we entered the new cathedral —
64. *By Mr. Piddington*: In what way does that affect the right of the Bishop to appoint a dean, or affect the incumbent of the parish of St. Andrew's—that appears to me to be merely a letter stating that the matter should not be interfered with until the cathedral is completed? The temporary cathedral is as much a cathedral as the other building.
65. It only refers to the assurance of the Government that the building now used should not be interfered with? Yes, and that his object in giving it to me was to give me the assurance that I should not be left without a church.
66. *By the Chairman*: This letter appears to refer merely to the site of the building? Yes.
67. *By Mr. Samuel*: That letter is dated 1848; your appointment was in 1849? The Bishop held that letter. It is probable that he may have given it to some other clergyman before he gave it to me. It is very much worn.
68. *By the Chairman*: In the petition to which you have referred, there is an allegation to this effect: that your petitioners' predecessors in office regarded this movement as an aggression upon the rights and privileges of their minister, and protested against it; that is to say, the predecessors in office of these gentlemen as churchwardens? As churchwardens.
69. They regarded the appointment of a dean as an aggression upon the rights and privileges of their minister, and protested against it? Yes, just so.
70. Now, what right or privilege of yours has been invaded by the appointment of a dean? The dean would be regarded as the rector, but the incumbent is the rector. I am the rector. There cannot be two rectors of that church, and in order to prevent his coming in to supersede me on the consecration of the new building—which might take place very soon—they wished to preclude the occurrence of that evil, to prevent it—and they protested against it.
71. Was it a written protest? A written protest.
72. Delivered to whom? To the Bishop.
73. Did any procedure follow on the lodging of that protest? None whatever. The Bishop retained it.

- The Rev. George King.
- 2 May, 1860.
74. Were the petitioners informed afterwards by the Bishop in what light he viewed this protestation on their part? He received it stating that he did not wish to enter into any controversy with them, and would have no further communication on the subject.
75. And no further correspondence has taken place between them? I protested against the appointment myself.
76. To whom—to the Bishop? And through the Bishop to the Archbishop of Canterbury.
77. Was that a written protest? A written protest.
78. Have you a copy of that protest? I have.
79. Have you any objection to produce it? None whatever.
80. Does that protest set forth the injury to which you conceive you have been subjected by the appointment? Yes; it states that I protest against the present nomination of a dean as an act of injustice to myself, inasmuch as it is calculated, if carried into effect, to supersede me in St. Andrew's Church.
81. Will it necessarily produce a change in your position? It will necessarily affect me as incumbent of the church very seriously indeed.
82. But not, I presume without further action on the part of the Bishop? If the Bishop will do as he stated in his letter to the Archbishop of Canterbury, (in which one would presume he was in earnest) it would have a very serious effect on me. You will perceive by reference to the original appointment of a minister, that the clergyman was appointed with reference to the new cathedral. I would refer to the Minute of Council upon the point, and the Bishop's letter. In a Minute of Council of the 14th of November, 1840, of which this is a brief extract, there are these words:—"Cathedral Church of St. Andrew's. Application for allowance of stipend for a minister, appended to Minute No. 40-16."
83. Is that a copy of a Minute of the Executive Council of this country? Yes, with reference to St. Andrew's Church—"with reference to the proceedings."
84. How did you get possession of this? From the Colonial Secretary's Office. (*The witness read the same. Vide Appendix B.*)
85. In what communication does he state that? In a letter to the Colonial Secretary, September 4th, 1840, with reference to the Minute of Council, No. 40-16. (*The witness read the same. Vide Appendix C.*) The 16th May, 1837, to which reference is here made, was the day on which the foundation stone of the new cathedral was laid by Sir Richard Bourke.
86. When was this church first called a cathedral? It was called from its beginning nominally a cathedral.
87. From the beginning? I think the first Governor that talked of making it a cathedral was Governor Macquarie; but the foundation stone was laid by Sir Richard Bourke.
88. Supposing that your services, instead of being performed in the present church, were to be performed in the new cathedral church; would you, in consequence of that change become entitled to a higher salary? No, I should not be entitled to any higher salary, because I am in the cathedral now as much as I could be if the new building were ready. From the moment of my entering on duty, all the public services which are generally held in cathedral churches have been performed there. In fact from the opening of St. Andrew's temporary cathedral church it has been always a cathedral.
89. The church in which you officiate has been? The church in which I officiate has been a cathedral, and all the ordinations have been performed there up to the period of this appointment of Mr. Cowper nominally as dean—all the ordinations and confirmations generally, visitations, valedictory services of the Bishop, and services preparatory to synodical action.
90. You consider your church, then, to have been a cathedral, in the same sense in which we use the word in reference to a cathedral church in England? Oh, certainly not. It is not legally a cathedral church; it is only nominally so. We never can have a cathedral in this country in that sense. It is merely nominally a cathedral. Spiritually we have all the services, and I am the minister and perform all those services. If a dean is appointed he comes in and supersedes me in the performance of many of my services—which, as the incumbent, I am entitled to perform myself.
91. But so far you have not been superseded in the performance of any duty? So far I have not actually been so.
92. Do you not know of any duties the dean performs in connection with this office? None whatever.
93. You do not know of any? None whatever.
94. But he performs none in your church? None whatever in my church.
95. Then do I understand the churchwardens to complain of an appointment having been made to the church of which they are officers without their concurrence—without their sanction? I do not think they would interfere in the appointment. I do not think they wish it to be done by their sanction, but they wish to see justice done. They do not wish to see an aggression on the rights of their minister.
96. *By Mr. Piddington:* I perceive by the first clause of the Petition of the Churchwardens of St. Andrew's they state "that the Reverend George King is the licensed Minister and Incumbent of St. Andrew's Cathedral Church with the parish annexed,"—are you aware of any example in the practice of the Church of England and Ireland that affords a precedent for this statement.—I mean, can any minister be a minister and incumbent of a cathedral and of a parish at the same time? Of a cathedral and the parish annexed!—yes, the parish is annexed to that cathedral.
97. Is not the church to which you are appointed an ordinary parish church? It was built according to the provisions of Sir Richard Bourke's Act for the erection of churches and chapels.

98. But is it not a parish church? In that respect it must be a parish church, because there is no provision in Sir Richard Bourke's Act for the erection of a cathedral, and there was no special Act of Parliament constituting St. Andrew's a cathedral.
99. Then you view yourself as the incumbent of a parish church? A parish church constituted by the Bishop—so far as he can constitute it—a cathedral, but not recognised by law as a cathedral.
100. Is such an incumbency as yours one that would be recognised by the discipline of the Church of England as an incumbency in reference to any cathedral? There is no parallel whatever between the circumstances of a cathedral at home, appointed by law, and under the old *regime* of the Church of England and St. Andrew's Cathedral in Sydney. There is no analogy whatever existing between them. If you make that inquiry nominally I can give you a reply. I was the minister, before I came out here, of a nominal cathedral church. The Bishop resided in my parish and performed his ordinations in my church.
101. Are you alluding to an English bishopric? Yes.
102. What is the diocese? The diocese of Down.
103. Of Down? Of Down.
104. *By Mr. Garrett:* In Ireland? In Ireland. I lived in the glebe house and was the minister. I was only the minister of the church, and the Bishop performed his ordinations there. I was ordained in that church myself.
105. *By Mr. Piddington:* Is there any cathedral in the diocese of Down? Yes; but the Bishop seldom went to it; it was very inconvenient; he residing near, found it convenient to perform his ordinations in my Church.
106. But you do not know any example according to the practice of the Church of England and Ireland of a minister of the parish being necessarily connected with a cathedral which may be built in that parish? There are various arrangements made in the several cathedrals.
107. But do you know any example in the practice of the Church of England and Ireland similar in fact? It is not necessary that it should be, because we have no parallel —.
108. I am not asking you whether it is necessary —? My experience is not very extensive, and my explanation on that point would be of little importance to the question.
109. I am only asking you for an answer,—whether you know of such an example? I cannot mention any just now.
110. I think you stated that all the various divine services and public services usually performed in cathedrals have been performed in the parish church of St. Andrew's? They have been all.
111. Has a daily religious service been performed in St. Andrew's parish church? It has been.
112. There is religious service there daily? I had it there until I found my duties so heavy that it was impossible to continue it; but for years I did perform a daily service, so far constituting it a cathedral. But you will find by reference to the late Bishop's correspondence I was to have had an assistant.
113. I am not asking you the reason why the services were not performed, but simply whether a daily service is performed there? It has been for years.
114. But is it now? I am not able, because the promises of assistance have not been fulfilled.
115. Is a daily service performed? A daily service is not now performed, because it is impossible.
116. But a daily service is part of the usual duties performed in a cathedral, is it not? Yes; and we should have daily service now if I had an assistant.
117. But is it not part of the usual duties? It ought to be.
118. *By the Chairman:* How long is it since those daily services were discontinued? Several years; a reference to the books would tell.
119. *By Mr. Piddington:* Are you aware whether the English Cathedrals are independent of the parish church—cathedrals in England and Ireland? There are various arrangements made. In some cathedrals there is a wing appropriated for the parishioners who reside very near, and the central part of the church is devoted to the large cathedral service. That is in some of the old cathedrals in England.
120. Do you know whether the cathedral of St. Paul's in London, or the cathedral of Westminster are viewed as parish churches by the parishes in which they stand? There might be a parish church in them, but I cannot tell you exactly the circumstances of those particular cathedrals.
121. You are not aware whether the cathedral of Westminster stands in a parish which has a distinct parish church belonging to it? I cannot state just now.
122. Is the cathedral of St. Andrew's in a fit state for cathedral worship? It is.
123. To what building do you now allude? To the temporary building.
124. I am not alluding to that, I am referring to the stone building? To the stone building?
125. Yes, the stone building? The stone building is not ready yet.
126. Then no portion of the building in course of erection is yet fit for the performance of of divine service? No portion.
127. Have you read the letters patent, creating the Diocese of Sydney? I have.
128. Do you recollect any portion of it, authorising the Bishop and his successors to found one or more dignitaries in the cathedral church of St. Andrew's? I do, distinctly.
129. Do you not think that the letters patent confer, by virtue of the clauses contained in them, absolute authority upon the Bishop of Sydney and his successors to found dignitaries in the cathedral church? Nominally so; yes.
130. Not nominally, but really, virtually, actually? It is stated in the letters patent: you have read correctly from them.
131. And are you aware whether the letters patent, creating the Diocese of Newcastle, also

The Rev.
George King.
2 May, 1860.

The Rev.
George King
2 May, 1860

also confer similar authority on the Bishop of Newcastle? I have not read the Bishop of Newcastle's letters patent.

132. Did you ever know of the office of dean being created before the cathedral was built? Never. It is not legal. The appointment is invalid.

133. I think you stated that upon the appointment of the dean of the cathedral of St. Andrew's that functionary must necessarily become the rector? Must necessarily become the rector.

134. Upon what ground do you arrive at that conclusion? The practice in England. Here there are no temporalities. A dean is appointed in England chiefly with reference to temporalities; he is "a governor secular."

135. And do you know of any case in England where the dean of a cathedral necessarily becomes the incumbent of the parish in which that cathedral is erected? I cannot now give you instances, but I suppose there are cases.

136. What is there in the discipline of the Church of England in reference to the existence of deans that leads you to suppose that when a dean is created he necessarily becomes the rector of a parish? That is the invariable practice of the church.

137. Of the parish in which the cathedral happens to be erected? I do not speak of the parish. He would have no parochial charge. He would be rector of the cathedral. I am speaking with reference to the church. He does not at any time pretend to have any parochial charge. The aggression is upon my rights as the incumbent of the church, not with reference to the parish.

138. Cannot you conceive it possible that you might still remain incumbent of the church of St. Andrew's, and that a dean might be appointed to the cathedral after a similar mode to the practice in England? If I submitted to be degraded, it might possibly be so; but on no other terms could it be so, and that degradation is what I told the Bishop I never should submit to.

139. Is not the dean of the cathedral the principal dignitary connected with it? He is the principal dignitary.

140. And have you any evidence to shew that you were ever appointed to such an office? There could not be a legal appointment.

141. No, I am not speaking legally, have you any evidence to shew that you were appointed as the principal dignitary? Yes, I was appointed the principal dignitary there. There never was any one above me in the cathedral but the Bishop.

142. What evidence have you to shew that you were so appointed? My appointment.

143. What is that appointment—to what office? Minister of St. Andrew's Church.

144. But it appears to me that does not prove that the appointment of minister to St. Andrew's Church is one equivalent to the appointment of the principal dignitary of the cathedral? When his late Majesty King William the Fourth wished to compliment this Colony, after consulting the Duke of Wellington in reference to the matter, he presented St. Andrew's Church with a piece of plate. He consulted, on that occasion, as to what was the character of the church, and in what terms he should place the inscription upon it; and this is the inscription:—"Presented for the office of the Holy Communion by His Majesty King William the Fourth to the Church of St. Andrew's, Sydney, in his Colony of New South Wales. Anno Domini 1835." That is the inscription upon all our plate.

145. Do you question the authority of the Bishop of Sydney to appoint a dean? To appoint a dean over my head—I do.

146. Upon what grounds? Because he cannot supersede me without shewing cause.

147. You use the expression "supersede."? Yes, supersede.

148. The question is then, whether you are dean. Have you been appointed dean? I have performed all the services quasi dean; but, of course, the dean's is a mere nominal appointment, as the canon's are a nominal appointment.

149. Do you call that appointment nominal which is connected with the receipt of public money? There I object to the appropriation of the public funds.

150. It is not whether you object or not:—Do you call that a nominal appointment which is connected with the receipt of public money? My object is to ask the Legislative Assembly to disallow the continuance of such payment of money.

151. What your object is, is no answer to my question. Do you call that a nominal appointment which is connected with the receipt of salary from the State, in virtue of that appointment? The salary, I suppose, makes it very substantial.

152. *By Mr. Garrett*: Nominal, as regards its duties? Nominal as regards the appointment, and as regards the duties too.

153. *By Mr. Piddington*: What are the duties of a dean in accordance with the practice of the Church of England and Ireland? To reside in the cathedral for a certain portion of time, and to preach there, and to see that the services are performed.

154. *By Mr. Garrett*: Purely spiritual? No, they are more of a temporal character. The appointment is that of a governor secular over the temporalities; and also attached to that are the conditions that he must reside in the cathedral during a certain period of time every year, and preach there during a certain portion of the year, and see that the services are performed in his absence.

155. *By Mr. Piddington*: You describe the duties as including a residence for a certain portion of the year, and preaching sermons during that period of residence? That is necessary.

156. Are you aware whether such duties have been performed by the present Dean of Sydney? I am aware that that they have never been performed by him.

157. Are you aware whether any functions connected with the discharge of the duties of a dean have been performed by the present Dean of Sydney? None whatever.

158. Then in what way can you explain the appropriation of a sum of public money to the office of dean, when according to your statement, the officer has performed no duties whatever? I think it was a misappropriation. The Rev. George King.
159. Have you ever heard in the practice of the Church of England and Ireland of a dean being appointed to a cathedral, and that that officer is then called upon to perform the duties of an archdeacon? The Bishop states that that has been recommended. 2 May, 1869.
160. Have you ever heard of it? I have never heard of it.
161. Are the duties of a dean in any way necessarily connected with the duties of an archdeacon? No; it is expressly stated that a dean's church is exempt from the jurisdiction of the archdeacon according to law—which shews that they must be distinct.
162. Have deaneries in England any cure of souls? No, not generally. Not according to law.
163. Is not that a proof that a dean, as such, has no parochial duties to perform? He has no parochial duties to perform as dean.
164. *By Mr. Garrett:* Do you consider that the Legislature have anything to do with your appointment as a minister of the Church of England? I should think they have. They vote certain sums of money for the church.
165. But that is a payment, that is not an appointment? The Governor has something to do with it; and of course the Legislature are the highest judicial body of the Colony.
166. Your appointment to this Colony, I think you have already stated, emanated from Bishop Broughton? From Bishop Broughton.
167. And have you any reason to believe that he consulted the Government of this Colony in reference to your appointment? No, I have no reason to think so.
168. How do you expect the inquiry we have now entered upon to aid you? In this respect—I consider that the appropriation of funds from the public revenue is a sanction of the appointment; and as the Legislature is the highest judicial body in the Colony, I call upon them for protection and redress under this grievance of which I complain. They can afford this by withholding their sanction from the granting of £300 per annum to the so-called Dean of St. Andrew's Cathedral.
169. But does not that sum of £300 come out of the £28,000 we call Schedule C? I believe it does. But my impression is that the Legislature have control over everything regarding pounds, shillings, and pence, and more especially since constitutional Government has been established.
170. Are you not aware that the Governor can appropriate the £28,000 without the sanction of the Assembly at all—it being a reserved schedule in the Constitution Act—are you not aware that he can appropriate that amount without the interference or without the authority and beside the control of the Legislature? Perhaps he can.
171. Well, if that be the fact, does it not place that portion of this inquiry beyond our control? I do not see exactly that it does. I think if there is a grievance—if there is a wrong in reference to which a member of the community at large appeals to your body, you will endeavour to redress that grievance.
172. Does it not strike you as a question of law more? As a question of law then, I state that it is an illegal appointment, and that the granting of money towards it is an illegal appropriation of money from the public revenue.
173. But the appointment of those dignitaries rests with the Bishop? That is the point on which we are at issue just now.
174. Is it not a question affecting the internal government of your church? I think the appropriation of public funds—
175. The appointment I mean? Yes. Perhaps the appointment itself is scarcely to be interfered with by the Legislature.
176. How does the appointment of Dean Cowper affect your present position—it does not affect your receipts? It does not affect my receipts, but it affects my own position in my own church very materially.
177. From what funds are you now paid? From Schedule C.
178. You have £200? Yes.
179. And some extras in the shape of allowance for a glebe? In lieu of a glebe.
180. From what fund does Dean Cowper receive the amount stated in this petition? From the same fund, I believe.
181. Then you do not expect that any interference—supposing we have a right to interfere—would benefit your position in a money sense? By your withdrawing your sanction from his appointment, I think it would benefit me very much.
182. But taking £300 from him would not put £300 into your pocket? I have no intention of the kind.
183. You do not expect our interference to benefit you in a money sense? Not in the slightest degree.
184. *By Mr. Samuel:* You have petitioned the Legislature for relief, on the assumption that it has control over the £28,000 set aside under the Schedule? I think they have some control, and I should like an expression of opinion by the Legislature on the subject.
185. How do you think they have control? I think they have control over all money expended by the State.
186. Are you aware that this money is not subject to an annual vote? Not in a formal way.
187. Are you aware that it is in no way subjected to the Assembly to appropriate? I think if the Assembly expresses an opinion that it is a mal-appropriation, and that no services are performed, the allowance would be discontinued; because you will perceive that Mr. Cowper states month after month, by signing this document—"I certify that the above-named person (Mr. Cowper) was actually employed in the situation and during the period above-mentioned."

- The Rev. "mentioned." He signs in those terms month after month for his £25, and I deny that he
George King has been so employed.
188. What £25? For his monthly payment.
- 2 May, 1860. 189. *By the Chairman*: As dean? As Dean of Sydney, which is an evasion.
190. Does he certify that the service has been performed? Every month he signs the following—"I certify that the above-named person was actually employed in the situation "and during the period above-mentioned."
191. In the situation? In the situation *as dean*. He receives £200 a year as minister of the parish of St. Philip's, and £300 a year as Dean of Sydney, on a separate sheet—different abstracts.
192. *By Mr. Samuel*: You do not, I suppose, dispute the right of the Government to pay a larger sum than £200 a year to any minister of the Church of England? Certainly not. I do not object to it.
193. You do not dispute that question? It would be an illegal payment, because I believe £200 a year is the highest salary allowed by the Government. Anything beyond that is illegal.
194. You consider that? Yes, according to the Temporalities Act.
195. You consider any payment beyond £200 a year to any minister of the church illegal? Yes, except to some of the old chaplains who were appointed according to the old *regime*. They receive £460.
196. Then you would consider the payment of £300 to the dean illegal under any circumstances? Yes, under the present law—until they pass another Act of Parliament. If you please to pass another Act of Parliament on the subject you may give him £300 a year.
197. *By the Chairman*: Are you aware whether Mr. Cowper, as Dean of Sydney, gives any written receipts for the payment of the money he receives in the capacity of Dean of Sydney? I am aware that he does.
198. As Dean of Sydney? Yes.
199. *By Mr. Piddington*: You do not happen to have a form by you? There are numbers of them in the Audit Office. I have seen them. (*Document produced*.)
200. *By the Chairman*: This is an exact copy? The exact copy of what he signs.
201. The only difference in this signature is the manner in which he gives it in? As Dean of Sydney month after month he signs that document.
202. *By Mr. Piddington*: Is it headed "for duties performed as dean of Sydney"? Yes, as Dean of Sydney.
203. This is headed, "Abstract of the Clergymen of the Church of England"? Yes, the Church of England.
204. *By the Chairman*: Is the heading of the other the same? Yes, but he adds here—"as Dean of Sydney."
205. *By Mr. Piddington*: He signs with the title of dean, but he does not describe the duties for which he receives his salary? He states that he was employed in the situation, and during the period, and I think the Legislative Assembly could take action on that account.
206. *By the Chairman*: "In the situation,"—that is to say, "in the enjoyment of the title," for the situation appears to amount to that and no more? It amounts to that only.
207. *By Mr. Garrett*: From your expression just now I should be led to believe that no alteration could take place in the internal government of your church in reference to payments without an Act of Parliament? A larger sum than £200 a year could not legally be granted to any minister under the existing law.
208. You are aware that the Bishop has a much larger sum—how does he come to appropriate so large a sum, if it is contrary to law—can you explain that? No, I cannot explain how the Bishop receives his salary in that way.
209. But supposing you had funds arising from other sources than Government sources, and that they were sufficient to augment the salaries of a few, if not all, the ministers of your communion—could not that augmentation take place without legislative sanction? I do not see how it could when the law expressly states that no clergyman is to receive more than £200 a year.
210. *By Mr. Samuel*: You are aware that the £28,000 is distributed amongst the various denominations according to the population? Yes, according to the population.
211. If then an improper appropriation has taken place of the proportion which belongs to the Church of England, no other denomination but the Church of England, I take it, would have a right to complain? I do not think it would affect any other denominations.
212. You do not see that it would affect any other denominations? I am not sure that it would, but I do not say that it would not, because the reduction of the sum by the amount of £300 is a diminution so far of church revenue.
213. It would give an additional minister to your church? It would give me an additional minister in my church.
214. I do not mean your church, but the Church of England—if they had £200 or £300 extra—a minister and a half? Yes, the Governor General himself objected to the appointment of dean, in the Executive Council, on those grounds.
215. *By the Chairman*: Do I understand you to complain of the appointment of Mr. Cowper as the Dean of Sydney on the ground that it is in your opinion a mal-appropriation of the public funds, and that as a mere member of the state you feel aggrieved on that account? I conceive it to be so.
216. And therefore, as a member of the state, you complain of it? I might complain as a member of the state very properly.
217. And do I understand that the other ground of your complaint is that the appointment
of

of a dean to the cathedral church of St. Andrew's, as it is called, is an indignity to you—that you feel it an indignity? I do. I feel that it would go to supersede me in my own church

The Rev. George King.

2 May, 1860.

218. And, in your opinion, if any such dignitary as Dean of Sydney were to be appointed, you ought to have been the minister appointed? Certainly.

219. That is your view? Yes; but it would be a mere nominal appointment. I never asked it of this Bishop or any other Bishop; but he could not appoint any other while I am the incumbent there.

220. When you say the Bishop could not appoint any other? Without superseding me.

221. You do not mean to say that there is any legal obstacle in the way of his appointing anyone he may think proper? I think there is a legal obstacle.

222. What is the legal obstacle? Because I affirm that I am appointed according to law, and I affirm that the appointment of Mr. Cowper is not according to law, and that his appointment is illegal. Yet the Bishop wishes through that illegal appointment to supersede me in my legal position.

223. Could the Bishop withdraw your license as a clergyman? He could not without shewing cause.

224. *By Mr. Piddington*: In what Court would he have to shew cause? He must determine that. The Bishop can hold no Court.

225. *By Mr. Samuel*: Unless he appeal? It is very questionable whether we have any appeal from here to any other Court. But this is certain—the Bishop has no jurisdiction here. He could not constitute a Court in order to try the question.

226. *By Mr. Piddington*: Do you recollect the circumstance of the late Bishop withdrawing the license of Mr. Russell, the minister of St. Mark's? I remember it well. I was one of the persons called to sit in that illegal Court. I did not know then that it was illegal. I thought the Bishop must know his own duty. I was a stranger here, and I sat in that Court and heard illegal proceedings. The whole matter was illegal and arbitrary from beginning to end.

227. I am not speaking of the Court, but of the power of the Bishop to withdraw licenses from clergymen. Are you not aware that the Bishop has full power, without let or hindrance—seeing that the ecclesiastical laws of England do not extend to the Colony—to withdraw the license from any minister, according to his mere grace and motion? He has not.

228. *By Mr. Garrett*: Has he assumed that power? The late Bishop did in one instance. It was a very sad instance, indeed. Partly in consequence of that proceeding, all the Bishops of the Province assembled together in Sydney, and held a kind of Synod or Conference. At that Synod ordinances were drawn up, in which the Prelates engaged that they would not withdraw a license from any clergyman without a proper inquiry.

229. *By Mr. Piddington*: But any resolutions of that so-called Synod would have no force in law? It would have no force in law.

230. *By the Chairman*: It only imposes a sort of moral obligation as long as they choose to acknowledge it? But all the Bishops are bound by it.

231. *By Mr. Garrett*: The same as one honorable man is bound towards another to observe a solemn engagement? Yes; they are bound by it. Their signatures are attached to it.

232. *By the Chairman*: Now, supposing instead of Mr. Cowper that you had been appointed Dean of Sydney, would you not have considered your appointment, with a salary of £300 a year, to be a violation of the Church Act, which you say limits salaries to £200? Certainly, I should consider the receipt of that £300 as money obtained in an illegal way.

233. That is to say, there is nothing so peculiar in your connection as Dean of St. Andrew's as would have made your appointment more justifiable than that of Mr. Cowper? There would be nothing to justify my receiving £300 a year contrary to law.

234. And your object is not to procure the appointment of dean for yourself? No; I have never sought that. I never sought it from the late Bishop nor from the present. On the contrary, when the present Bishop told me that he thought of appointing himself as dean I never demurred against it,—I never expressed an objection to his doing so. If he had appointed himself as dean it would have been illegal,—it would have been a nominal appointment, and I would have submitted to it, because it would be no degradation to me—the Bishop being in my church. As dean he would not interfere with my rights; but the appointment of a brother clergyman does interfere with my rights in a very different way,—particularly when the Bishop states that he will come into my church—the church to which I am appointed—as soon as it is consecrated, and for which I have been laboring for eleven years. I have exerted myself to build that church, bringing all my influence to bear upon it. The late Bishop himself told me it was my own church. In my place as a member of the Committee for the erection of that church—as incumbent, and as rector, and in every proper place, and by all appropriate means—I have pushed forward the erection of that cathedral church as my own church; and now am I to be told, when it is just near completion, that another clergyman, who was not in this diocese during the eleven years I have been laboring in it, and who has never contributed a sixpence all that time towards its erection, is to supersede me in that church without cause being shewn?

235. Do you not think it probable that, after the cathedral is finished, Mr. Cowper may continue to enjoy the title and draw the salary—interfering as little in the actual performance of your duties then as now? According to the Bishop's statement that is not to be the case. The Bishop states positively that he is to enter upon his duties there.

236. *By Mr. Piddington*: Two years hence? Three or four months hence; two years from September, 1858.

237. Are you aware, Mr. King, of any prebends or canons being appointed in order to form

The Rev. a chapter of the cathedral church of St. Andrew's? We have a notice from Mr. Kerrison
George King. James, which was written long after the departure of the late Bishop, stating that he had
appointed two such persons.

2 May, 1830. 238. Who had appointed? The late Bishop. I know nothing of it, officially. They have
never been instituted.

239. In what capacity? As canons. They have never been installed, nor performed a
single service. They could not be canons without being installed. It would be my duty to
install them, if legally appointed.

240. You have heard of the appointment of two or three persons to the cathedral of St.
Andrew's? The temporary cathedral?

241. You have not heard whether any appropriation of public money has been made in
favor of those dignitaries? They receive nothing as canons.

242. Nor do they discharge any duty in virtue of their appointment as canons? No; and
never have done duty as such.

243. Then, in reference to the discharge of duty, they stand precisely in the same condition
as the Dean of Sydney? Precisely.

244. But with this difference? There is a difference between their position and that of the
Dean of Sydney, in reference to the receipt of public money.

245. But no other difference exists so far as you know? No, not in that respect; but
there is a difference here—the Bishop.

246. I mean with respect to the receipt of public money as between the various dignitaries—
there is no other difference? There is no other difference except this—the Bishop states that
the so-called Dean of Sydney will enter upon his duties in my church.

247. I am now speaking in reference to the receipt of public money, and not concerning the
discharge of duties—there is no difference in respect to the receipt of public money between
the Dean of Sydney and the canons of the cathedral, except that the dean receives money
and the canons do not? Exactly so.

248. *By the Chairman:* But were those canons actually appointed? That is the question.
Mr. James wrote a letter to us. The letter was read by a gentleman at our Board meeting
in the cathedral; but that letter is not an authority. I should like to have it officially
signified to me.

249. Then, no ceremony having taken place in the church, you infer that the appointment
has not actually been made? It is a nominal appointment. They may have been appointed
nominally, perhaps; but the manner in which they have been appointed is very extraordinary.
I was here for several years before the Bishop took his departure. The last act that he
did was to come down to my church and perform a service there—at which I took the most
active part, assisting the Bishop in administering the Holy Communion, and performing the
whole of the service myself. He then drove down to our house, and bade us good-bye; but
he never mentioned to me that he had made any new appointments. More than six weeks
afterwards Mr. James stated that he had nominated three gentlemen as canons.

250. *By Mr. Piddington:* Have you heard the names of the gentlemen appointed canons?
Mr. Grills, Mr. Allwood, and Mr. Walsh.

251. Two of these gentlemen are still resident in the Colony? Yes.

252. And one of them is not a resident here now? One of them is "no more."

253. *By the Chairman:* Is it in consequence of that appointment by Bishop Broughton that
those clergymen enjoy the title of Canon Allwood and Canon Walsh? I suppose so; but it
is a mere nominal, and not a legal appointment.

APPENDIX.

A.

*Sydney, New South Wales,
9 September, 1838.*

My Lord Archbishop,

At the desire of one of my clergy I send to your Grace a letter which he has addressed to
me, in the form of a protest against the appointment of a dean in the cathedral church of St. Andrew's,
in this city.

The clergyman in question is the Rev. G. King, incumbent of the parish of St. Andrew's, in
which the cathedral is being built. He officiates in a temporary church, which, on the completion of
the cathedral, is to be pulled down, and the parishioners of St. Andrew's will be accommodated in the
cathedral itself. The cathedral will, probably, be completed in two years, and the dean, who is at
present the incumbent of an adjoining parish, will enter upon his duties at the cathedral.

Mr. King is apprehensive that the appointment will tend to interfere with his privileges as the
parochial minister; and although I have assured him that such will not be the case, and that the
arrangements for conducting divine service may easily be made so as to suit the convenience of all
parties, he is greatly dissatisfied. I have also declined making him a canon, and vice-dean, as he
requested me to do; at all events I saw no necessity for doing this at present, and several disadvantages
might arise from a premature appointment of this kind. The correspondence I have had with Mr. King
only seems to increase my conviction that the course I have adopted is the proper one.

The gentleman whom I have appointed dean is the son of the late beloved and lamented arch-
deacon. To his character and fitness for the office not a single objection has been raised. On the
contrary, all persons, even those who are commonly opposed to me, have commended this act; and a
Melbourne paper speaks of it as giving satisfaction to all the members of the Church of England
throughout the Australian Colonies.

I regret that your Grace should be troubled with these documents, nor do I see any advantage
which Mr. King can hope from your reception of them; but as I might be exposed to the charge of
dealing unfairly with one of my clergy, and then of being afraid to allow his protest to reach your
Grace, I venture to trespass upon your attention, unreasonable as I feel it to be to do so.

I beg to, &c.,

F. S.

B.

B.

M. 5280.—14 November, 1840.

EXTRACT from Minute of Council, No. 40-16.

26 October, 1840.

The Rev.
George King.
2 May, 1860.

With reference to the proceedings of the 9th of February, 1838, relating to the application of trustees, and allowance of aid towards the erection of the cathedral church of St. Andrew's, in Sydney, for members of the Church of England, His Excellency the Governor laid before the Council an application, under the existing regulations, for the allowance of stipend to the officiating minister, from five hundred and forty-five persons.

The Council advised the allowance of a stipend to the officiating minister, to commence from the date of his license.

W. M'PIERSON.

SUMMARY.

Cathedral Church of St. Andrew's.—Application for allowance of stipend for the minister. Appended to Minute No. 40-16.

(B). Letter from the Lord Bishop of Australia, dated 4 September, 1840.

Second Application from five hundred and forty-five persons.

C.

7 September, 1840.

Laid before the Executive Council, 26 October, 1840.

Minute No. 40-16.—W. M'P.

Sydney, 4 September, 1840.

Sir,

I have the honor to forward herewith, for the purpose of being submitted for the approval of His Excellency the Governor, and the Executive Council, an application, in Form B. for a stipend for a minister in the parish of St. Andrew's, Sydney.

The list contains the names of upwards of five hundred adults, and the sum of £300 having been paid up previously to the 16th of May, 1837, on account of the erection of the cathedral church in the parish bearing its name, the amount of stipend authorised by the regulations will be receivable by the officiating clergyman from the date of his license.

I have, &c.,

W. G. AUSTRALIA.

To the Honorable

The Colonial Secretary.

TUESDAY, 8 MAY, 1860.

Present:—

MR. BLACK,
MR. FAUCETT,MR. GARRETT,
MR. PIDDINGTON,

MR. SAMUEL.

JOHN BLACK, ESQ., IN THE CHAIR.

The Very Rev. William Macquarie Cowper called in and examined:—

254. *By the Chairman:* You are aware, I presume, that a petition was presented to the Very Rev. Assembly by the Churchwardens of St. Andrew's, with reference to your appointment to the office of Dean of St. Andrew's? I am.

255. When were you appointed to the office of Dean of St. Andrew's? I think it was on 8 May, 1860. the 12th July, 1858.

256. Previous to that time, what office did you hold in connection with the church? I was minister of St. John's, Bishopsthorpe.

257. Do you still hold that office? No; I am now minister of St. Philip's, Sydney.

258. When did that change take place? I became the minister of St. Philip's from the 1st August in the same year, 1858.

259. And you are still minister of St. Philip's? I am.

260. In the petition to which I have referred, an allegation is made to the effect "That the office of Dean of St. Andrew's Cathedral, in the person of the said Rev. W. M. Cowper, who is the acting incumbent of St. Philip's Church, is a mere sinecure, no duties having ever been performed by him in connection with St. Andrew's Cathedral Church in consideration of such salary." Now with reference to this allegation of the petition, what salary do you receive as Dean of St. Andrew's? £300 per annum.

261. From what source is that paid? From the Colonial Treasury.

262. From the same source from which you derive your salary as minister of St. Philip's Church? Yes.

263. With regard to the duties attached to this office, is it true, as stated in the petition, that there are no duties belonging to the office? In answer to that question, I should state that the office of Dean of St. Andrew's is not my correct title; I am Dean of Sydney as well as Dean of St. Andrew's, and as such, am invested with archidiaconal jurisdiction over the clergy of Sydney and its suburbs. The two offices of dean and archdeacon are united.

264. Is there any formal instrument appointing you to that office? There is. I have an instrument founding a deanery in St. Andrew's, and an instrument collating me to the office of Dean of Sydney.

265. Have you any objection to hand them in? (*The witness handed in the same. Vide Appendix, A and B.*)

- The Very Rev. W.M. Cowper. 266. I suppose, under this instrument, founding a deanery there is no appointment of yourself as dean? No.
- 8 May, 1860. 267. Is there under the other instrument? The other instrument collates me to the office of Dean of Sydney, and the duties which devolve upon me as dean with archidiaconal jurisdiction in the city and suburbs, are stated in another document at length.
268. In the collation? Not in the collation; but, rather, I should say, in a paper of instructions from the Bishop which accompanied it; and which I have here (*The witness handed in the same. Vide Appendix C.*)
269. Perhaps you can state off-hand in a general way what the nature of the duties of that office is? Privately to advise, exhort, and encourage any clergyman in the performance of his duties; to advise with the Bishop with regard to matters relating to the clergy and their parishes; to inquire from time to time respecting the state of ecclesiastical buildings, the necessity for sub-dividing parishes, and making parochial arrangements; seeking out young men who may be qualified for the ministerial office, or to hold services in places for which clergymen are not available. I have, also on various occasions, been called upon to supply the place of clergymen who are sick; and I have given considerable assistance to some of the clergy in that way. I should add that there are many matters in connection with the church within the deanery in which the clergy would communicate with the Bishop through me, and the Bishop with the clergy.
270. Have you ever officiated in your capacity of minister in the church of St. Andrew's? Only on the occasion of the Bishop's visitation. I acted officially upon that occasion as dean; but I have not had an opportunity of performing any other duties in the church. I should state that the present temporary cathedral is a wooden building, and is used for parochial purposes. The cathedral in which I expect to officiate as dean is a stone structure now in the course of completion.
271. And it will only be after the completion of that building which is in course of being erected now, that you will have what you consider a fair opportunity of exercising your functions as dean? As dean of that cathedral, or minister of that church.
272. In the event of your succeeding to the ministry of that church—the new cathedral—would that in any way interfere with the position of the gentlemen who is presently officiating as the minister of St. Andrew's Church, that is the Rev. Mr. King? That is a question which perhaps I am not exactly in a position to answer.
273. You cannot say what view may be taken by the Bishop, who would have the arrangement of these things? I have never looked upon that gentleman in any other light than as a minister of St. Andrew's parish, and not as in any way connected with the cathedral, which is the Bishop's church, and the church of the whole diocese.
274. Then your officiating in the cathedral church would not in your opinion necessarily supersede Mr. King as the minister of St. Andrew's Church? Not as the minister of St. Andrew's parochial church.
275. Are you aware that in Sir Richard Bourke's Act, the Church Act as it is generally called, the salaries of ministers are restricted to £200 a year? I am; except in any such special case as the appointment of a dignitary.
276. Is there any authority in that Act for the appointment of a dignitary? I am not aware that there is.
277. Supposing this to be so, that there is not anything in the Act for the appointment of a dignitary, and that the Act restricts the salaries of ministers to £200 a year, does it not appear to you somewhat questionable whether the appointment of anyone to an office in the church with a salary of £300 is consistent with or warranted by the Act? I do not think that is a question for me so much as for the Executive Government to consider; and I am aware, from correspondence which has been recently published, that a communication was made by the Bishop of Sydney, to the Government, with reference to this matter; and that there was some letter from the Secretary of State upon the subject, which appeared to authorize the Executive to make an appropriation of special salaries for dignitaries of the Church.
278. An authority from the Secretary of State? I think so.
279. Recently transmitted to the country? No, it was in 1853, if I remember rightly.
280. Was that a despatch? All I know with reference to it is contained in a letter from the Bishop of Sydney to the Colonial Secretary, dated 19th July, 1858, which perhaps I may be permitted to read. (*The witness read the same. Vide Appendix D.*) I find that I made a serious mistake in saying a despatch from the Secretary of State. I should have said—a Minute of the Executive Council.
281. *By Mr. Piddington*: Founded on the despatch? It may have been founded upon a despatch.
282. *By the Chairman*: According to that minute, it appears that the Bishop had been invested by the Queen with authority under his letters patent to found a deanery? Exactly so.
283. That, under that authority, he had founded a deanery and appointed you to the office; and then, under an arrangement between the Executive Government and the Bishop, the amount of salary was arranged? Yes, that is a correct statement of the matter.
284. You have stated that the emolument of the office of dean is £300 per annum—will you be kind enough to state what is the salary attached to the incumbency of St. Philip's? That salary from the Treasury is £160 per annum.
285. While we are on the point of salary, I may ask whether you derive any other emolument from your connection with the church of St. Philip's? £150 from the glebe of St. Philip's is appropriated to the minister of the church.
286. Under what name is that appropriated—is that part of the salary of the office? It is appropriated

appropriated from the glebe by Act of Council Where there is a glebe the clergyman derives an emolument from it; but by the Act of Council the sum is limited to £150. The Very Rev.
W.M. Cowper.

287. Do you receive that amount? Yes.

288. You receive £160 and £150, besides £300 as Dean of St. Andrew's? Yes; a portion of which I have paid a part of the time for the assistance of a curate. 8 May, 1860.

289. A curate to officiate in St. Philip's? Yes, while I had one. I have not a curate now.

290. The church which is being built now is called the Cathedral Church of St. Andrew's? The Cathedral Church of St. Andrews.

291. Do you use the term in the same sense as it is used at Home, or in what sense do you consider it a cathedral? As the seat of the Bishop—the principal church of the diocese, where the Bishop, both by custom and by right, performs those duties which are peculiarly appropriate to his office. It is a church open also to the whole diocese to attend, free of any pew rents or any charges upon them for any accommodation they may receive.

292. Have any other dignitaries been appointed to this cathedral? There were three canons appointed, two of whom are still living.

293. Perhaps it may be within your knowledge, if so I presume you will have no objection to supply the information—do you know whether those ministers derive any salary in virtue of their office as canons? They do not, for the simple reason that there is no endowment connected with it. I have heard that it was originally intended they should each receive £50 per annum.

294. There are three? There were three, there are now only two; the Reverend Canon Allwood, and the Reverend Canon Walsh.

295. In the petition to which I have referred there is an allegation to the effect that the predecessors in office of the petitioners, the petitioners being the churchwardens, regarded the appointment of yourself as Dean of St. Andrew's as an aggression upon the rights and privileges of their minister, alluding by "their minister" to the Reverend George King, and it is stated that they protested against it. Now, are you aware of any instance in which, since your appointment as the Dean of St. Andrew's, you have infringed in any way on the rights or privileges of Mr. King? Not in any single particular that I can charge my memory with. Very shortly after my appointment as Dean of Sydney I had occasion to apply to the Rev. Mr. King, for permission to perform a marriage in his church, as the minister of St. Andrew's parish, which he very courteously granted, and I performed the marriage there by his permission.

Mr. Faucett objected to the Committee entering upon this question, as it might involve upon them to decide what the rights and privileges of the minister were.

The witness withdrew.

Debate ensued.

The witness was again called in

296. You have already stated, I believe, that you are, strictly speaking, not Dean of St. Andrew's, but Dean of Sydney? I am Dean of St. Andrew's, with the title of Dean of Sydney. Perhaps I have not expressed myself quite accurately. I wish to draw the attention of the Committee to the fact that while I am Dean of St. Andrew's I am also Dean of Sydney, invested with archidiaconal jurisdiction over the city and its suburbs.

297. In giving—which I suppose you are in the habit of doing like all other public officers—receipts for the salary you derive as dean, do you give those receipts as Dean of Sydney, or as Dean of St. Andrew's? As Dean of Sydney.

298. Do these receipts refer in any way to the nature of the duties you perform as Dean of Sydney? They do not; there is nothing in the abstract which requires that the particular duties be specified.

299. *By Mr. Piddington:* You have put in an instrument under the seal of the Bishop of Sydney, creating a deanery in the cathedral church of St. Andrew's? Yes.

300. That instrument recites an authority from the letters patent creating the Bishop and Diocese of Sydney; giving the Bishop of Sydney the right to found "one or more dignitaries" in the Cathedral Church of St. Andrew's, does it not? Yes.

301. By that instrument, under the seal of the Bishop of Sydney, creating the dignity of dean, is not the title and style recited in that instrument "the Deanery of St. Andrew's"? It is.

302. By another instrument, which you have also put in, signed by the Bishop of Sydney, and sealed with the seal of the diocese you are collated to, "the office and dignity of dean in the said cathedral church"? Yes.

303. And are not, except by way of mere title, appointed Dean of Sydney? By title.

304. By way of mere title, this instrument which collates you to the appointment, appoints you as dean of the cathedral church? Yes, it does.

305. And afterwards recites that, as dean of that church, you should be known by a certain title? It does so recite.

306. Then, in fact, under this instrument, you are appointed to be Dean of the Cathedral of St. Andrew's? Yes.

307. When were you appointed Dean of St. Andrew's? On the 12th July, 1858.

308. Is the cathedral of St. Andrew's finished? It is not.

309. Is divine service performed in any part of the cathedral? It is not.

310. Have you ever preached in the cathedral? I have not.

311. What are the duties of dean of a cathedral according to the practice of the Established Church of England and Ireland? He is next to the Bishop, the chief minister in the Church. His duties are to conduct divine service during a portion of the year, to preach, and he is to reside a certain time, I think about ninety days in the year, in the cathedral or its precincts.

312. Have you ever, according to that practice, conducted divine service in the cathedral of St.

The Very Rev. St. Andrew's, or resided within the cathedral or its precincts? That is quite impossible, inasmuch as it has had no roof upon it until recently.

W.M. Cowper. 313. You say you receive your salary merely as Dean of Sydney, and sign a receipt for it? Yes.

8 May, 1860. 314. Do you sign a receipt for that salary in virtue of the performance of any duties as dean? I do, as Dean of Sydney, with archidiaconal jurisdiction.

315. According to your definition of the duties of dean, you have never resided within the precincts of the cathedral, nor have you performed divine service within the cathedral? I have stated that I have not.

316. Then according to the English practice, you receive a salary of £300 a year for not performing the duty of dean? I receive a salary of £300 for performing duties which have been delegated to me by the Bishop—

317. I am asking you with reference to the duties of dean, according to the English practice? The Bishop has connected with the office of dean certain duties, for which I consider myself entitled to a salary.

318. What are the duties for which you conceive you are entitled to a salary—are they the archidiaconal duties you have alluded to? They are.

319. Do you know of any case where the dean of a cathedral church in England or Ireland has had tacked on to the office of dean, the performance of archidiaconal duties, in virtue of his appointment as dean? I am not acquainted with the practice in England, having been in this Colony for more than the last 24 years.

320. Do you know of any case of a similar kind in practice of the Church of England and Ireland? I do not, of my own knowledge. I believe such was the practice formerly in England.

321. When you say formerly, do you allude to the present century? I do not.

322. How many centuries back? Several centuries back. I have among the documents which are on the table one which contains the opinion of a barrister of this Colony, in which he advises the Bishop that it was competent to his Lordship to found the dignity of dean in the cathedral connecting with it the office of archdeacon; and he refers in that opinion to the reports of the Ecclesiastical Commissioners, who recommended that such connection should be made in future in England in accordance with the early practice of the church.

323. I do not question the competency of the Bishop to appoint a dean, and to attach to that appointment the performance of archidiaconal duties—my question is simply directed to whether you know of any case of such appointment in the practice of the Church of England and Ireland? I cannot remember, at the present time, whether there is such a case in England or Ireland; but, if I might be allowed, I would quote one referred to in the opinion I have alluded to.

324. The only case you have heard of is one some centuries old, is it not? I should say it is; it appears to have been the case in Lichfield Cathedral.

325. The only case that you are aware of where the duties of archdeacon were connected with the appointment of dean of a cathedral refers to the city of Lichfield, does it not? Yes.

326. Have you any other cases that you are acquainted with in any way? I am not acquainted with any other cases.

327. According to the practice of the Church of England and Ireland the dean of the cathedral church has no cure of souls? He has not, except of those persons who are connected with the cathedral; they are his cure of souls.

328. But the congregation may vary? The members of the cathedral, those under his special care, are his cure of souls.

329. You allude to the chapter? To the chapter, the choristers, and those connected officially with the cathedral.

330. Did you ever, before your own case occurred, hear of a Bishop appointing a dean to a cathedral not built? No, I cannot say that I have. I do not know what is the position of the Deans of Melbourne and Adelaide in this respect. There is a Dean of Melbourne appointed by the Bishop of Melbourne, but I am not aware whether there is a cathedral church there, in the sense in which we generally understand the words "cathedral church" to be used.

331. Have prebendaries and canons been appointed to the church of St. Andrew's? Canons.

332. Under the authority of the letters patent, has the Bishop of Sydney authority to appoint any number of prebends or canons? He has the authority to "found one or more dignities."

333. "One or more," you would take to be an unlimited number? I should conceive the Bishop not to be restricted as to the number.

334. Have the canons, who have already been appointed, salaries? I believe they have not at present; I have heard it was intended originally that they should have.

335. If the Bishop of Sydney has the authority, under his letters patent, to appoint an unlimited number of prebends or canons, might he not also appeal to the Executive to attach salaries to each of those appointments? I am not aware whether he could; I cannot answer that question.

336. Has not the Bishop appealed to the Executive to attach a salary to your appointment as dean? He has.

337. Might he not, on the same authority, request the Executive to attach salaries to the offices of canons and prebends? It would be within his power to make such an application.

338. Would it not also, in a similar manner to your own case, be within the authority of the Executive to attach salaries to these offices? It might, if the funds sufficed.

339. Then if the Bishop of Sydney chose to appoint twelve prebendaries, or canons, in the cathedral as a chapter, and the Executive chose to attach salaries of £200 a year to each, might

might they not do it in the same manner as they attached the salary to the office of dean? ^{The Very Rev. W.M. Cowper.} That would be a question for the Executive Government.

340. Might they not do it under the same authority? I am not sufficiently acquainted with their authority to say. 8 May, 1860.

341. Can you state any reason why the canons already appointed receive no salary? Simply because there are no funds. It was intended that a salary should be derived from some endowment. I speak merely from hearsay, but I have no official information on the subject.

342. But there is as much endowment available for the payment of Dean of Sydney, is there not, as there is for the payment of canons in the cathedral? That is simply none from private sources.

343. But as Dean of St. Andrew's you receive a salary out of the Schedule? I do.

344. Can you give any reason why canons, who form a part of your cathedral establishment, do not receive a salary out of the same source? I cannot give any reason.

345. Do you think it arises from the circumstance that the canons have no duty to perform as canons? I do not know what it arises from.

346. Is it not customary that the prebends and canons of cathedrals in England have salaries? It is.

347. From what source are such salaries derived? From the endowments with which the cathedrals are generally provided.

348. Is it not from the same source also that the dean of a cathedral derives his salary? It is.

349. But you do not derive your salary from such a source? No.

350. Is not the money reserved by Schedule C very limited in amount? If my memory serves me correctly, it is limited to £28,000.

351. Now would not the salary of £300 per annum, which you receive as dean, supply a country clergyman for the interior? No doubt it would.

352. To that extent of £300, do you not consider the country is injured by the appointment of a sinecure official in Sydney? Decidedly not; I do not consider that it is a sinecure which I hold as Dean of Sydney; I have not found it to be so.

353. But you yourself have stated that you have not preached in the cathedral? I have not preached in it.

354. Nor resided in it? No.

355. Are not those duties peculiarly appertaining to the office of dean in a cathedral church? They are, but I think it hardly fair to separate the archidiaconal duties from those of dean, for they are connected together by the Bishop's instructions to me, and I have, by virtue of that authority, been in the habit of performing them.

356. Could not these duties of an archidiaconal character been as effectively and more appropriately performed by the appointment of an archdeacon in the usual manner? I think not.

357. Then, as I understand you, although the Bishop has the authority to appoint an archdeacon, if he exercises that authority the person appointed would not perform his duty so well as if he had some other duty to discharge? An archdeacon must necessarily hold some other office in connection with the archdeaconry, because there is no endowment to provide for an archdeacon. The Bishop has in this instance looked forward and appointed an officer who should have deanal and archidiaconal jurisdiction conjointly, and who should be specially charged with both in such manner as that both could be effectually performed.

358. Is there not as much reason to expect a salary from the Executive, for the discharge of the duties of archdeacon, as for the discharge of the duties of dean? There might have been as much reason; but these are matters regarding the internal arrangements of the church which I suppose the head of the church may be considered to have wisely arranged, in the way which is most productive of benefit.

359. What is the entire amount of the emoluments you receive, in virtue of the various ecclesiastical appointments you hold in the diocese? £610 per annum.

360. The maximum amount permitted by the local Act of Council, called Sir Richard Bourke's Act, appropriated to each minister of religion is £200? From the Government funds.

361. Then you receive equal to the amounts that three ministers of religion could receive under that Act? That is not quite so. I receive from the public funds £460 per annum, and £150 from the glebe. Other ministers have glebes which in some cases produce, I believe, an equal amount. The clergyman next to me receives a £100 a-year from the same glebe.

362. From the glebe of St. Philip's? Yes.

363. *By Mr. Faucett:* The £150 glebe money is from public funds? It is derived from the glebe.

364. It is an addition to the £460? It is an addition to the £460.

365. *By Mr. Piddington:* When do you expect to be in performance of the duties strictly connected with your appointment as dean of the cathedral church of St. Andrew's? I am not in a position to answer that question; I should think it would be not less than two years from the present time. Great progress has been made towards the completion of the building, but there is a great deal to be done with regard to the internal arrangements which I should think would hardly be completed within the next two years.

366. *By the Chairman:* Do you draw any distinction between the Rev. Mr. King, as minister of the parish and minister of the church? Between minister of the parish and minister of the cathedral church—I have always been given to understand that the Rev. George King was licensed to be minister of St. Andrew's parish just in the same way as any other minister is licensed to be minister of his parish. My object in stating what I did in the former part of my evidence was to defend myself from the charge of making any aggression.

The Very Rev. aggression upon his rights as minister of St. Andrew's parish. The present wooden
W.M. Cowper. building is the *temporary* cathedral until the other is completed.

8 May, 1860. 367. Do you regard it as the parish church, seeing that the Rev. Mr. King is in your estimation the minister of the parish? I regard it as a building used as the parish church.

368. *By Mr. Piddington:* And as a building used as the cathedral at the same time? Yes. There are several cases in England and Ireland in which a portion of the cathedral is used as the parish church.

369. Can you mention any places in England? I cannot. I intended to have provided myself with the information, but I had not the opportunity.

370. *By Mr. Faucett:* Do you know the Protestant Church of St. Patrick's, in Dublin? I have heard that it is so there.

371. Is not that the parish church as well as the cathedral? A portion of it I believe is used as the parish church, and there are other cases both in England and Ireland.

372. Is the dean of that church, of St. Patrick's, also incumbent of the parish as well as dean of the cathedral? I believe not.

373. Is there not another clergyman who is parson or incumbent of the parish? I believe that is the case.

374. *By the Chairman:* Have you ever seen the license of the Rev. Mr. King, granted to him by the late Bishop, as minister of the church of St. Andrew's, with the parish annexed? I have not.

375. *By Mr. Piddington:* Do you consider yourself the incumbent of the parish of St. Andrew's? Decidedly not.

376. *By the Chairman:* You are aware that Mr. King is the incumbent of the parish of St. Andrew's? Yes.

377. You do not profess to hold that office? Decidedly not; I have no right in any way to that office.

378. *By Mr. Garrett:* When the cathedral is opened, and you discharge the duties of dean, what may be Mr. King's position then? That is a question I cannot answer; I suppose that will be a matter for future arrangement.

379. *By the Chairman:* I understood you to say that the discharge of your duties in the cathedral would not, in your opinion, necessarily supersede Mr. King in his office as incumbent of the parish? Certainly not.

380. Does the fact of your receiving £300 a year as Dean of Sydney in any way affect the emoluments of Mr. King as Incumbent of St. Andrew's, so far as those emoluments arise from the State? It does not interfere in any way with Mr. King's emoluments.

381. Are you aware of any instance in England in which the persons holding the office of dean of any cathedral draws a salary from the public treasury? I am not.

382. When was this church at which Mr. King presently officiates first designated the cathedral church? I do not know.

APPENDIX.

A.

(*Foundation of the Deanery.*)

Frederic, by Divine permission, Bishop of Sydney and Metropolitan.

To all to whom these presents shall come,—

Greeting:—

Whereas, by letters patent under the Great Seal of the United Kingdom of Great Britain and Ireland, bearing date the nineteenth day of October, one thousand eight hundred and fifty-four, Her Most Gracious Majesty Queen Victoria was pleased to nominate and appoint us, Frederic Barker, Doctor in Divinity, to be Bishop of the See of Sydney, and to be Metropolitan Bishop of Australia, and did, among other things, grant and declare that we, as Bishop of Sydney, may found one or more dignities in our cathedral church of St. Andrew's, in the City of Sydney, and may collate one or more fit and proper persons to be dignitaries of the said cathedral church. Now, therefore, know ye that, by virtue and in exercise of the power so granted to us as aforesaid, we have thought fit to found, and do by these presents found, the dignity of a deanery in our said cathedral church of St. Andrew's, in the City of Sydney aforesaid, such dignity to be hereafter named and styled the Deanery of St. Andrew's.

In testimony, &c., this 10th day of July, A.D., 1858, and of our consecration the fourth.

F. SYDNEY. (L.S.)

B.

(*Appointment of the Dean of Sydney.*)

To all whom these presents shall come.

We, Frederic, by Divine permission, Bishop of Sydney and Metropolitan,

Send Greeting:—

Whereas, by a deed poll in writing, bearing date the tenth day of July, one thousand eight hundred and fifty-eight, under our hand, and under the Episcopal seal of the said Diocese of Sydney, we did, by virtue and in exercise of the power granted to us by Her Majesty's letters patent, bearing date the nineteenth day of October, one thousand eight hundred and fifty-four, found the dignity of a deanery in our cathedral church of St. Andrew's, in the City of Sydney, by the name or style of the Deanery of St. Andrew's; and whereas, by virtue and in further exercise of the same power, we have determined to confer on the Reverend William Macquarie Cowper, Master of Arts, of Magdalene Hall, Oxford, the office and title of dignity of Dean in the said cathedral church. We, the Bishop aforesaid, do therefore, by these presents under our hand and the Episcopal seal of the said diocese, collate the said William Macquarie Cowper, clerk, M.A., to be a dignitary of our said cathedral church, and do hereby confer on him the office and title of dignity of Dean of our said cathedral church by the style and title of Dean of Sydney, together with all and singular the rights, members, and privileges thereto appurtenant

appurtenant and belonging. And it is our will and pleasure, and we do hereby commit to the said Dean of Sydney full and complete archidiaconal jurisdiction and authority within the said City of Sydney and the suburbs thereof, he having before us subscribed the articles, taken the oaths, and made and subscribed the declaration which are in this case required to be subscribed, made, and taken.

The Very Rev.
W.M. Cowper,

8 May, 1860.

In testimony whereof, &c., this 12th July, A.D., 1858, and of our consecration the fourth.

F. SYDNEY. (L.S.)

C.

The following instructions were forwarded to the Dean with the foregoing appointment:—

The office of Dean with Archidiaconal Jurisdiction in the City and Suburbs.

As the dean, though next in rank to the Bishop, has no official authority, except over the clergy of the cathedral, I have thought it well to intrust to him archidiaconal authority in the cathedral, city, and the suburbs thereof.

The paper hereto annexed, and drawn up at my request by Alexander Gordon, Esq., barrister-at-law, contains a statement of the precedent and recommendations on which this union of diaconal and archidiaconal jurisdiction is founded.

The object of this minute is to define the duties comprised in such archidiaconal authority.

In England, the archdeacon holds his visitation, and delivers a charge to the clergy, and exercises a visitatorial care and authority over his archdeaconry.

In the present instance the dean invested with archidiaconal authority ought—

1. Privately to advise, exhort, encourage, or reprove any parochial clergyman as there may appear to him to be occasion, in matters relating to the ministry; also to suggest to any parochial clergyman, and (if requested) aid him in the erection of a church or school, or the establishment of an additional service, or the adoption of any other means for promoting the spiritual welfare of a parish or district, but not to control, or (unless requested) actually interfere with any clergyman in his parochial arrangements.
2. To inform the Bishop of any matter relating to a clergyman, or to any parish or district within his jurisdiction, with which the Bishop ought to be acquainted; to suggest to the Bishop the formation of new, or the sub-division of existing, parishes or districts, and the appointment or location of additional clergymen or catechists.
3. To seek for young men suited for the ministry, or for laymen willing and qualified to hold services in places in which there is no clergyman available.
4. To inquire from time to time respecting the condition of all ecclesiastical buildings, the uses of church property, and the trusteeships; and to make reports to the Bishop, as the circumstances of each case may make advisable.

The dean, invested with this authority, out to be regarded by the clergy within the limits of his jurisdiction, as the person to whom they should apply whenever they stand in need of advice or assistance, in any matter relating to their parishes or districts.

He ought also to be regarded by the Bishop as the person to whom he should refer, whenever he requires information or counsel upon any matter relating to the clergy, the arrangement of parishes and districts, the location of new clergymen or catechists, and the general welfare and progress of the church.

It is essential for this efficiency, that one holding so important an office should possess the confidence both of the Bishop and the clergy; and should be esteemed by them as one whose Christian faithfulness, integrity, sound judgment, and kindly sympathy, may be thoroughly relied upon.

With these qualities there ought also to be combined energy of mind and activity of body; a talent for arrangement and organisation, a power of calling forth and directing the energies of others; a discrimination of character; a temper not easily ruffled; a readiness in seizing favorable opportunities; patience in waiting for the proper time to commence an undertaking; perseverance in carrying out whatever has been commenced; and, above all, an ardent missionary spirit, and a strong faith in the promises of God.

An influence over the clergy is to be acquired, not by an assumption of authority, or by a periodical official visitation, but by a frequent brotherly intercourse with them, and the habitual manifestation of a kindly interest in their concerns.

F. SYDNEY. (L.S.)

A List of Churches and Parishes in the City and Suburbs over which the jurisdiction of the Dean of Sydney, as above defined, will extend—

St. Philip's.	St. John's, Bishopthorpe.
Holy Trinity.	St. Stephen's Camperdown.
St. James'.	St. Peter's, Cook's River.
St. Lawrence.	St. Bartholomew's, Pyrmont.
St. Andrew's.	St. Mary's, Bahmain.
St. Paul's.	St. Leonard's, North Shore.
St. Michael's.	St. Ann's, Ryde.
St. John's, Darlinghurst.	Hunter's Hill.
St. Mark's, Alexandria.	Ashfield.
St. Mary's, Waverley.	Enfield.
St. Jude's, Randwick.	Burwood.
St. Matthias', Paddington.	

Opinion of Alexander Gordon, Esq., before referred to:—

I have perused the letters patent appointing Dr. Barker to be Bishop of Sydney, also the two deeds poll, the one founding the Deanery of St. Andrew's, and the other collating the Rev. W. M. Cowper to be Dean of Sydney, and committing to him full and complete archidiaconal jurisdiction and authority within the City of Sydney and the suburbs thereof; and it appears to me that the two deeds poll are a good and valid exercise of the power conferred on the Bishop of Sydney by the letters patent to found one or more dignities in the cathedral church of St. Andrew's, and to collate one or more fit and proper persons to be dignitaries of the said cathedral church.

The only point that seems to call for particular remark is the committing to the Dean of Sydney archidiaconal jurisdiction within the City and its suburbs. With regard to this I observe that the Commissioners appointed in 1852 for inquiring into the state and condition of the cathedral and collegiate churches in England and Wales by their first report, in which they set out the result of an inquiry as to the origin and subsequent history of cathedral churches, make the following statement in reference to the office of dean as one of the members of the cathedral body:—"The dean elected by the chapter, summoned for that purpose, was next to the Bishop in honor and authority, to be revered and obeyed by all the members of the church. To him was assigned a part of the daily divine offices, the cure of souls in the precinct, the chief care of discipline and morals, and archidiaconal authority over all the churches in the cathedral city." (Report p. w.) This statement is supported by the following extracts set out in the Appendix, pp. 6-7:—

The Very Rev.
W.M. Cowper.

8 May, 1860.

"Officium decani est, quod omnibus canonicis et vicariis, in animarum regimine et morum correctione præmineat, et quod debeat omnes causas ad capitulum spectantes audire, et iudicio capituli terminare; excessus clericorum, qui in villa Lichfeldia, et in parochiis communæ, et in præbendis, per appellationem corrigere, et delinquentium personas juxta delicti quantitatem, et personarum qualitatem, digna animadversione punire." (Dugdale, vol. vi., p. 1256, ed. 1849.)

"Item decanus habet curam archidiaconalem in ecclesia et villa Lichfeldia, in omnibus." (Ibid, p. 1257.)

"Decanus jurisdictionem archidiaconalem habet in præbendis canonicorum et in ecclesiis ad communionem pertinentibus, ita quod eas visitare tenetur, et officium archidiaconi penitus exercere, et procuraciones recipere et causas parochianorum præbendarum, per appellationem ad eum devolutas, iudicio capituli terminare." (Ibid.)

"In civitate vero Lichfeldensi, de causis emergentibus spiritualibus, decanus cognoscat, sicut tractemus est optentum, cujuslibet tamen jure salvo." (Ibid, p. 1260.)

From these quotations, which I have examined, it is clear that in the case of Lichfield, the dean exercised precisely that jurisdiction which it is now proposed to commit to the Dean of Sydney; and it would appear that the same arrangement prevailed in Salisbury. (Wilkins Concilia, vol. 1, 741.)

Referring again to the Report of the Cathedral Commissioners, I find it stated as "suggested from several quarters that, besides the present duty of superintending the entire cathedral administration, the dean should be, as formerly in some of the old cathedrals, archdeacon of the cathedral City, and generally assistant to the Bishop." (Report p. xxviii.) And in the Appendix, p. 694. The Bishop of St. Asaph thus clearly expresses his view on this subject—"The duty of the dean is to be the chief clergyman in the cathedral; and in the cathedral town, where the town was large and there were many parishes, he would become a sort of archdeacon for the town, and superintend the spiritual matters of the town generally;" and opinions to the same effect are given by the Bishop of Salisbury (Appendix p. 592); and the Dean and Chapter of Wells (Appendix p. 613.)

It thus appears that there is ancient precedent in favor of the course proposed to be adopted by the Bishop of Sydney, and there is also strong recommendation for following it. Under these circumstances, Her Majesty having conferred on the Bishop the power of founding a deanery, and collating a fit and proper person to the title of dignity of dean, I see no reason for not committing to the individual so collated any jurisdiction that can be shewn to be consistent with, or rather appurtenant to, his office.

ALEXANDER GORDON.

125, Elizabeth-street, Sydney, 17 September, 1858.

D.

Sydney, 19 July, 1858.

Sir,

With reference to the letter I had the honour to address to you, dated the 17th instant, notifying the appointment of the Reverend William Macquarie Cowper, M.A., as Dean of Sydney, I now beg to submit, for the approval of His Excellency the Governor General, and Executive Council, my recommendation that an endowment of three hundred pounds (£300) per annum should be annexed to the said dignity, in accordance with the principle laid down in the Minute of the Executive Council, dated 12th January, 1853, as follows: * * * "It is to be understood that the sum allotted to each communion is liable to be charged with special salaries, to the superior clergy, in any case in which the Government and the head of the particular communion may concur in thinking the allowance of such special salary advisable."

The proposed income of the deanery to be irrespective of the emoluments and advantages of any cure or living, also held by the dean.

To effect this arrangement without any increase of the grant to the Church of England, I have the honour to suggest that the £300 per annum so recommended may be appropriated from the balance of the allowances of the late archdeacon, after assigning the legal stipend of two hundred pounds (£200) per annum to the incumbent of St. Philip's parish, vacant by the decease of the Reverend Dr. Cowper.

I have, &c.,

F. SYDNEY.

The Honorable the Colonial Secretary.

TUESDAY, 15 MAY, 1860.

Present:—

MR. BLACK,		MR. PIDDINGTON,
DR. LANG,		MR. SAMUEL.

JOHN BLACK, ESQ., IN THE CHAIR.

The Rev. George King further examined:—

The Rev.
George King.

15 May, 1860.

383. *By the Chairman:* You are aware that the last time the Committee met, you, at the close of the proceedings, expressed a desire to furnish the Committee with some further information regarding the subject of this inquiry; but as they were not able to prolong the sitting that day, they determined to give you an opportunity at another meeting of affording that information—it is for that purpose you have now been summoned? As the Session of Parliament is drawing to its close, and as I am very anxious that the result of your deliberations should be placed before the Parliament, I do not desire to throw any obstacle in the way, by prolonging the investigation further. I should prefer rather to forego any desire I might have expressed to give further evidence, in order that you may come to a decision as soon as possible; particularly when I find that all I might have said is contained in the evidence I have given before. Not having a copy of that evidence before me at the last meeting, I thought I might have omitted certain points.

384. Under these circumstances, it appears to you unnecessary to enter upon any further consideration of the matter? I think so. I consider it unnecessary to occupy your valuable time further.

385. If there is any point upon which you think the Committee is imperfectly informed, of course you will take this opportunity of supplying the information? I do not wish to add anything further.

Legislative Assembly.
NEW SOUTH WALES.

REVD. DR. LANG.
(PETITION FROM CLARENCE AND RICHMOND RIVER DISTRICTS.)

Ordered by the Legislative Assembly to be Printed, 18 October, 1859.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned Presbyterians and other friends of Religious
liberty in the Clarence and Richmond River Districts,—

HUMBLY SHEWETH:—

That your Petitioners are strongly of opinion that the present divisions of the Presbyterian body in New South Wales are in great measure, if not entirely, owing to certain anomalous proceedings of the Synod of Australia towards the Reverend Dr. Lang in the year 1842.

That your Petitioners have reason to believe that these proceedings were contrary to law and justice, discreditable to those concerned, and ruinous to the peace and prosperity of the entire body of Presbyterians.

That your Petitioners are also of opinion that peace and harmony can never be restored to the Presbyterian body in this Colony, nor its present divisions healed, till these proceedings are investigated by competent authority, and their real character exposed, and the wrongs they have inflicted publicly redressed.

That in the opinion of your Petitioners your Honorable House is the only competent authority that can prosecute such an inquiry, and declare its result with satisfaction to the Presbyterians of the Colony.

Your Petitioners, therefore, humbly pray that your Honorable House will be pleased to appoint a Select Committee to inquire into the proceedings of the Synod of Australia towards Revd. Dr. Lang in the year 1842, and to report.

And your Petitioners, as in duty bound, will ever pray, &c., &c.

Legislative Assembly.
NEW SOUTH WALES.

REV. DR. LANG.

(PROCEEDINGS RELATIVE TO, BY SYNOD OF AUSTRALIA, IN 1842.)

Ordered by the Legislative Assembly to be Printed, 1 December, 1859.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned,—

HUMBLY SHEWETH :—

That your Petitioners have learned with surprise that notice has been given to your Honorable House that a motion will be made for the appointment of a Select Committee to inquire into and report upon the proceedings of the Synod of Australia in the year 1842, with respect to the deposition of Dr. John Dunmore Lang.

That the appointment of any such Committee would, in the opinion of your Petitioners, be an open and uncalled for invasion of our rights and privileges as a Christian community, as it would imply that the Legislature, as such, has a right to interfere with and review the discipline and practice of our Church Courts.

That your Petitioners hold that, according to the standards of the Presbyterian Church, the power of appointing, censuring, and removing ministers and other church officers, belongs exclusively to the regularly constituted Church Courts; and that the proceedings of such Courts would be unwarrantably interfered with were any of the civil authorities of the land to investigate and review them for any such purpose as indicated in the notice of motion referred to.

That the Ecclesiastical Courts of the Synod of Australia have a full and unrestricted power over their own members to deprive them of all the rights and privileges belonging thereto for offences committed against their laws, to which every member thereof has voluntarily made himself amenable; that, therefore, any interference on the part of the Legislature, as now sought, relative to the proceedings of the Synod of Australia, would be unconstitutional and oppressive, as a direct encroachment on the inherent rights and liberties of the said Synod as an Ecclesiastical Court.

That in the year 1842 the said Dr. John Dunmore Lang was, after due process, deposed from the office of the holy ministry for grave ecclesiastical offences, an account of which was published in the public prints of the day, and officially transmitted to the General Assembly of the Church of Scotland, and also to the Presbytery of Irvine, that being the Presbytery which licensed and ordained Dr. Lang.

That the said proceedings of the Synod of Australia against Dr. John Dunmore Lang were sanctioned and confirmed by the Presbytery of Irvine in the first place, and afterwards by the General Assembly of the Church of Scotland, after the most patient and anxious investigation.

That, although there is no appeal from the decisions of the Synod of Australia in reference to matters purely ecclesiastical, and to discipline of the Church within this Colony, any minister who had received license and ordination from the Church of Scotland might, even after deposition by the Synod of Australia, be still received by the Courts of the Church of Scotland in the Mother Country, provided those Courts were of opinion that such minister had been treated with injustice by the Synod of Australia.

That it is a fact well known that Dr. John Dunmore Lang, since his deposition, resided in Scotland at one time for a period of three years, without having by petition or otherwise complained, either to the Presbytery of Irvine, or to the General Assembly of the Church of Scotland, of any injustice received by him from the Synod of Australia.

Your Petitioners, therefore, humbly pray that your Honorable House will take the premises into your serious consideration, and resist so gross an outrage upon the freedom of our spiritual judicatories as that contemplated in the motion before your Honorable House, by refusing to appoint any Committee to inquire into and report upon the proceedings of the Synod of Australia referred to.

And your Petitioners, as in duty bound, will ever pray, &c.

1859.

Legislative Assembly.
NEW SOUTH WALES.

REV. DR. LANG.

(PETITION FROM DR. FULLERTON IN REFERENCE TO.)

Ordered by the Legislative Assembly to be Printed, 6 December, 1859.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned,—

HUMBLY SHEWETH :—

That your Petitioner has learned with surprise that notice has been given to your Honorable House that a motion will be made for the appointment of a Select Committee to inquire into and report upon the proceedings of the Synod of Australia in the year 1842, with respect to the deposition of Dr. John Dunmore Lang.

That the said deposition was a matter of Ecclesiastical discipline, with which your Honorable House cannot constitutionally interfere. If the Legislature, as such, have a right to review the proceedings of Ecclesiastical Courts in cases of deposition, these Courts would be subservient to the Government, and might, by interference on the part of the Civil Government, be deprived of all freedom, and compelled either to endure persecution for conscience' sake, or to act contrary to what they believed to be the proper course of duty.

That it would be unreasonable and oppressive in your Honorable House to require the Members of a Church Court to restore to his former office in the Church a person whom they had, after due process, deposed, because they were convinced that he had by his conduct proved himself to be altogether unworthy to fill the office of Minister in a Christian Church.

That the appointment of the proposed Committee can have no practical result, unless your Honorable House are prepared to deprive the Members of the Synod of Australia and other Colonial Church Courts of all freedom of action by taking into your own hands the entire management of all Ecclesiastical matters.

That Dr. John Dunmore Lang, since his deposition, resided in Scotland at one time for a period of three years, without having by petition or otherwise complained to the General Assembly of the Church of Scotland, or to the Presbytery of Irvine, that being the Presbytery by whom he was ordained.

That a full report of the deposition of Dr. Lang and of the evidence produced against him was sent officially to the Presbytery of Irvine and to the General Assembly of the Church of Scotland by the Synod of Australia, and had he convinced the said Presbytery and Assembly that he had been deposed unjustly they might have received him in Scotland as a Minister of the Church of Scotland, but they could not interfere with the decision of the Synod of Australia in this Colony.

That Dr. Lang practically admitted the justice of his deposition by not complaining while in Scotland to the judicatories of the Church of Scotland; and that it is both unconstitutional

stitutional and unjust to ask the appointment of a Select Committee of your Honorable House to review the proceedings of the Synod of Australia in relation to a matter of Church discipline.

That your Petitioner, therefore, humbly prays that your Honorable House will take the premises into your serious consideration, and resist so gross an outrage on the freedom of our spiritual judicatories as that contemplated in the motion before your Honorable House, by refusing to appoint any Committee to inquire into and report upon the proceedings of the Synod of Australia referred to.

And your Petitioner, as in duty bound, will ever pray, &c.

JAMES FULLERTON, LL.D.,
Minister of the Scots' Church,
Pitt-street South, Sydney.

1859.

Legislative Assembly.

NEW SOUTH WALES.

REV. DR. LANG.

(PETITION FROM REV. JOHN M'GIBBON, IN REFERENCE TO.)

Ordered by the Legislative Assembly to be Printed, 6 December, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.
The Petition of the undersigned, one of the Secretaries of the Presbyterian
College Committee,—

HUMBLY SHEWETH :—

That your Petitioner has observed in the Parliamentary Reports, that notice has been placed on the paper of your Honorable House by Dr. Lang, that he will “ move on “ Friday, 21st October, that the Report of the Select Committee of the late Legislative “ Assembly on the Presbyterian College, be referred to the Select Committee (recently “ appointed) on the Presbyterian College Bill, for their consideration.”

That the Select Committee of the late Legislative Assembly was appointed to take evidence on certain matters set forth in a Petition from Dr. Lang.

That your Petitioner was called before the said Committee to give evidence on the several matters set forth in the allegations of the said Petition ; and that, after your Petitioner had answered the questions of the members of the Committee, and on being asked by the Chairman whether Petitioner had anything further to add with reference to the allegations of the said Petition, your Petitioner answered that he had, and forthwith proceeded to make an *oral* statement, in which proof was offered that the several allegations of the said Petition were without foundation in fact.

That the said statement was taken down by the short-hand writer in the usual way, and afterwards sent to Petitioner along with his other evidence for perusal and correction.

That your Petitioner considers that the said statement was of the utmost importance to the Committee, appointed as they were to inquire into the allegations of the said Petition, inasmuch as the said statement entered into particular proof on each allegation, and shewed conclusively that the allegations of the Petition referred to were wholly groundless.

That, nevertheless, the Committee suppressed the said statement of Petitioner, without in any way acquainting him with the reasons for so doing, or giving him any opportunity of adding to his evidence given before the Committee.

That your Petitioner submits, that the usual course followed in all such cases by Committees appointed to make inquiry is, to allow every one interested, called to give evidence, to make his evidence as full as possible by statement, or otherwise ; and that in this case, the casual practice so manifestly founded in justice was so far departed from.

That your Petitioner, therefore, feels deeply aggrieved, as the only opportunity which he had of adding to his evidence, elicited by the questions of the members of Committee, was denied him ; and that, in so far, his evidence was rendered incomplete, and its value as against the Petition referred to diminished.

That

That your Petitioner therefore submits, that the evidence taken by the Select Committee of the late Assembly, (that part of Petitioner's evidence which he considers most material against the Petition having been suppressed,) is defective, and only likely to mislead the Committee recently appointed to take evidence on the Bill of Incorporation of the Presbyterian College.

And lastly, that your Petitioner begs respectfully to remind your Honorable House, that the Evidence and Report of the Select Committee of the late Assembly were never submitted to that Assembly for its approval and adoption; nor yet had the said Evidence and Report been submitted to the New Parliament for adoption, (so that your Petitioner and others have hitherto had no opportunity of petitioning against them) and, therefore, as your Petitioner conceives, the said Evidence and Report are without any authority to guide the proceedings of the Committee recently appointed.

Your Petitioner, therefore, humbly prays that your Honorable House will be pleased to take the premises into favorable consideration, and either refuse to accede to the motion of Dr. Lang, or that the statement referred to of Petitioner be restored to the evidence, and remitted along with the other evidence.

And your Petitioner, as in duty bound, will ever pray.

JOHN M'GIBBON,

One of the Secretaries of the
College Committee, and Minister of the
Presbyterian Church, Woolloomooloo.

1859.

Legislative Assembly.
NEW SOUTH WALES.

REV. DR. LANG.

(PETITION FROM SINGLETON.)

Ordered by the Legislative Assembly to be Printed, 6 December, 1859.

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned,—

HUMBLY SHEWETH:—

That your Petitioners have learned with surprise that notice has been given to your Honorable House that a motion will be made for the appointment of a Select Committee to inquire into and report upon the proceedings of the Synod of Australia in the year 1842, with respect to the deposition of Dr. John Dunmore Lang.

That the appointment of any such Committee would, in the opinion of your Petitioners, be an open and uncalled for invasion of our rights and privileges as a Christian community, as it would imply that the Legislature as such has a right to interfere with and review the discipline and practice of our Church Courts.

That your Petitioners hold that, according to the standards of the Presbyterian Church, the power of appointing, censuring, and removing ministers and other church officers, belongs exclusively to the regularly constituted Church Courts; that the proceedings of such Courts would be unwarrantably interfered with were any of the civil authorities of the land to investigate and review them for any such purpose as indicated in the notice of motion referred to.

That the Ecclesiastical Courts of the Synod of Australia have a full and an unrestricted power over their own members, to deprive them of all the rights and privileges belonging thereto for offences committed against their laws, to which every member thereof has voluntarily made himself amenable; that, therefore, any interference on the part of the Legislature, as now sought relative to the proceedings of the Synod of Australia, would be unconstitutional and oppressive, as a direct encroachment upon the inherent rights and liberties of the Synod as a spiritual judicatory, and destructive of all discipline and order as an Ecclesiastical Court.

That in the year 1842 the said Dr. John Dunmore Lang was, after due process, deposed from the office of the holy ministry for grave ecclesiastical offences, an account of which was published in the public prints of the day, and officially transmitted to the General Assembly of the Church of Scotland, and also to the Presbytery of Irvine, that being the Presbytery which licensed and ordained Dr. Lang.

That the said proceedings of the Synod of Australia against Dr. John Dunmore Lang were sanctioned and confirmed by the Presbytery of Irvine in the first instance, and hereafter by the General Assembly of the Church of Scotland, after the most patient and anxious investigation.

That, although there is no appeal from the decisions of the Synod of Australia in reference to matters purely ecclesiastical, and to discipline of the Church within this Colony, any minister who has received license and ordination from the Church of Scotland might, even after deposition by the Synod of Australia, be still received by the Courts of Scotland in the Mother Country, provided those Courts were of opinion that such ministers had been treated with injustice by the Synod of Australia.

That it is a fact well known that the said Dr. John Dunmore Lang, since his deposition, resided in Scotland at one time for a period of three years, without having by petition or otherwise complained, either to the General Assembly of Scotland, or to the Presbytery of Irvine, of any injustice received by him from the Synod of Australia.

That your Petitioners consider it highly irregular, unpresbyterian, and censurable in any member of a Presbyterian Church Court to appeal in matters of doctrine or discipline to your Honorable House as a civil authority; any such appeal from a sentence of an Ecclesiastical Court to civil authority, incompetent to take cognizance of such cases, being held by all Presbyterian Churches to be an offence of so grave a nature, as of itself to warrant the immediate deposition of such minister.

Your Petitioners, therefore, humbly pray that your Honorable House will take the premises into your serious consideration, and resist so gross an outrage upon the freedom of our spiritual judicatories as that contemplated in the motion before your Honorable House, by refusing to appoint any Committee to inquire into and report upon the proceedings of the Synod of Australia referred to.

And your Petitioners, as in duty bound, will ever pray, &c.

[Here follow 40 Signatures.]
