1877-8.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

WELLINGTON, WAGGA WAGGA, MUSWELLBROOK, AND  
NIMBOY BRIDGES.  
(INFORMATION RESPECTING.)

*Ordered by the Legislative Assembly to be printed, 5 February, 1878.*

FRIDAY, 1 FEBRUARY, 1878.

(12.) Wellington, Wagga Wagga, Muswellbrook, and Nimboy Bridges:—Mr. Macintosh asked the Secretary for Public Works, pursuant to Notice,—

(1.) Will he be pleased to lay upon the Table of this House the contract price for sinking per foot run and per ton the piers of the Wellington, Wagga Wagga, and Muswellbrook Bridges, and the price per ton for erecting the superstructures of the same bridges?

(2.) Also the cost per ton for the supply of the wrought and cast iron work of the bridge over the Nimboy River, and the contract price per ton of Messrs. Bell and Franklin for fixing and erecting the same, and what it subsequently cost the Government per ton, in labour, plant, tools, supervision, &c., in completing the same work by day labour after it had been taken out of the hands of the contractors?

Mr. Sutherland answered,—I will have this information prepared, and lay it upon the Table on Tuesday next.

	(1.)		
	<i>Wellington.</i> 11 & 9 ft. cylinders.	<i>Wagga.</i> 9 ft. cylinders.	<i>Muswellbrook.</i> 5 & 6 ft. cylinders.
Sinking and fixing cylinders, } per foot run ... .. }	£7 0 0	£6 0 0	£5 10 0
Erecting superstructure, per } ton ... .. }	15 0 0	6 15 6	11 15 0

(2.)

The price per ton for Nimboy Bridge, made in the Colony. (Tender accepted, December, 1868.)

Cast-iron ... ..	£18 13 4
Wrought-iron cylinders ... ..	37 0 0
Wrought-iron girders... ..	32 0 0

The tender of Bell and Franklin was a bulk sum, with no Schedule rates; it amounted to £2,290, and included other work besides fixing cylinders. As nearly as can be ascertained by estimating cost of this other work, their tender would be about £9 per ton for fixing superstructure. The cost to the Government per ton, in labour, plant, tools, &c., in completing the work by day labour after it had been taken out of the hands of the contractors was, as nearly as can now be ascertained, about £7 per ton for riveting and fixing superstructure, and about £4 9s. per foot run for sinking, fixing, and filling cylinders—or £8 per ton.

It should be noted that comparisons of this sort are extremely delusive,—so much depends on the locality, and the size and weight of the iron-work. The Nimboy cylinders were very light and with riveted bracing, and had much more work per ton on them than any of the others.

1877-8.

NEW SOUTH WALES.

# SYDNEY SEWERAGE AND WATER SUPPLY.

(TWENTY-FIRST ANNUAL REPORT FROM THE MUNICIPAL COUNCIL—1877.)

Presented to both Houses of Parliament, pursuant to Act 30 Vic. No. 36, sec. 75.

The Town Clerk to The Principal Under Secretary.

Sir,

Municipal Council, Sydney,

Town Clerk's Office, 5 March, 1878.

I have the honor, by direction of the Right Worshipful the Mayor, to transmit herewith, for the information of the Parliament of New South Wales, the Twenty-first Annual Report of the Municipal Council of Sydney, of their proceedings under the Water and Sewerage Acts, during the year 1877.

I have, &amp;c.,

CHAS. H. WOOLCOTT,

Town Clerk.

*TWENTY-FIRST ANNUAL REPORT of the Municipal Council of Sydney, of their proceedings under the Water and Sewerage Acts.*

THE Municipal Council of the City of Sydney have the honor to furnish, for the information of the Parliament of New South Wales, the following Report of their proceedings in connection with the Water and Sewerage Works during the year 1877, together with Statements of their Receipts and Expenditure under each fund for the same period.

### WATER-WORKS.

The pumping machinery and engines at Botany have been working throughout the year most efficiently, nothing but the ordinary repairs being necessary. Two of the engines have been constantly at work, except occasionally for three to five hours at a time, when the service reservoirs have been signalled full.

The total quantity of water pumped up from Botany into Crown-street and Paddington Reservoirs during the year was twelve hundred and thirty million forty-seven thousand four hundred and sixty-eight (1,230,047,468) gallons, being an increase on the year 1876 of one hundred and fifty-five million four hundred and sixty-three thousand nine hundred and ninety-six (155,463,996) gallons,—the quantity pumped to Crown-street being seven hundred and sixty-three million four hundred and sixty-eight thousand seven hundred and eighty (763,468,780) gallons; and to Paddington, four hundred and sixty-six million five hundred and seventy-eight thousand six hundred and eighty-eight (466,578,688) gallons respectively. The increase is attributable to the large extension of the mains to the suburbs, where seven and three-quarter ( $7\frac{3}{4}$ ) miles of new pipes have been laid, supplying over two thousand (2,000) additional houses.

The quantity of coal consumed during the year was five thousand two hundred and sixty-three and a half ( $5,263\frac{1}{2}$ ) tons, or two hundred and thirty-seven and a half ( $237\frac{1}{2}$ ) tons more than last year.

A large increase has been made to the storing capacity of the dams in the Lachlan Reserve, by raising and enlarging the embankments, &c., the water from which is delivered into Sydney by gravitation, thus relieving the Botany engines very considerably. Every farthing expended on these works is remunerative in the extreme.

The Bunnerong Dam has been completed during the year, and the quantity of water thrown back and conserved in the dam has surpassed general expectations.

The Botany Dams throughout the year have had an unusual supply of water, being very nearly full all the year—the water running to waste into Botany Bay for fully six months continuously; the embankments and weirs only requiring ordinary attention to keep them in repair.

The pumping engines and machinery at Crown-street for the purpose of relieving the Botany engines from the duty of raising the water the additional height of seventy-three feet (the difference between Crown-street and Paddington Reservoirs) are now nearly completed, as well as the engine-house and chimney.

The number of houses connected with the water mains during the year was two thousand and sixty (2,060), and the total number of houses now receiving and paying for water is twenty-three thousand nine hundred and three (23,903).

The number of meters fixed at the end of the year was three hundred and nineteen (319), and the quantity of water registered as passing through them was eighty-nine million and sixteen thousand (89,016,000) gallons.

The total length of pipes laid during the year for the extension of the water supply to the city and suburbs is seven and three-quarter miles and two hundred and eighty-nine yards, and the mains that have been taken up and replaced by new ones is twelve hundred and ninety-three (1,293) yards, making a total length of mains laid during 1877 of eight and a half miles two hundred and sixty-two yards. (*Appendix A.*)

During the year 1870 there were pumped up from Botany sixteen hundred million three hundred and eighty-three thousand four hundred and fifty-six (1,600,383,456) gallons, and the revenue from the Water Fund was £32,420 12s. 4d.; since then there have been laid forty-one miles and thirty yards additional new mains in the city and suburbs, with six thousand one hundred and fifty-seven (6,157) additional house connections and numerous meters, and still the quantity of water pumped from Botany and the expenses are considerably less. Thus, water pumped from Botany during 1877 was twelve hundred and thirty million forty-seven thousand four hundred and sixty-eight (1,230,047,468), or less than in the year 1870 by three hundred and seventy million three hundred and thirty-five thousand nine hundred and eighty-eight (370,335,988) gallons, and the revenue from Water Fund is for 1877, £50,404 13s. 1d., or £17,984 0s. 9d. more than during 1870, with less consumption of fuel and expenses. This wonderfully favourable result has been attained by the construction of dams on the Lachlan watershed which did not exist in 1870, and the water from which is delivered into Sydney by gravitation, thus relieving the pumping machinery very considerably, and effecting the enormous increase in the revenue of £17,984 0s. 9d.

## COMPARISON.

Year.	Pumped from Botany.		Revenue Water Fund.			No. of houses supplied.
	gallons.		£	s.	d.	
1870 ... ..	1,600,383,456		32,420	12	4	17,686
1877 ... ..	1,230,047,468		50,404	13	1	23,903
Less ... ..	370,335,988	Increase	£17,984	0	9	Increase 6,157

## SEWERAGE.

The main sewers throughout the city are in good order.

During the year 1877 a tender was accepted for sewerage works in Darling Harbour. The contract was for the construction of a 4 feet 6 inch brick sewer from the silt-pit in Lackey-street along Pier-street, and then southerly along Hay-street to the Railway culvert, a distance of about 650 feet, with a branch 3 feet 6 inch brick sewer in Hay-street northerly to the Railway, a distance of about 230 feet; a 3 feet 6 inch brick sewer from the silt-pit easterly along Pier-street for about 430 feet, together with the laying of stoneware pipe sewers in Hay-street, Factory-street, Burns-street, Little Pier-street, Little Harbour-street, and Little Quay-street; and the construction and connection therewith of street gullies.

The contract is in progress, but owing to the difficulty of obtaining bricks in sufficient quantity the work has been delayed over the contract time.

The only casualties to the sewers has been the blowing up of a portion of the Blackwattle sewer in Wattle-street, near Parramatta-street; the sewer burst up twice in the same place during the year, and was repaired each time. The cause is attributable to the obstruction placed at the end of the sewer in the silt-pit constructed by the Government, and until this is removed frequent occurrences of the same thing must be expected.

During the year, 4,369 feet of pipe drain sewers have been laid, of the dimensions and in the localities detailed in Appendix B.

Four hundred and seventy (470) additional houses have been connected with the sewers, making a total of eight thousand five hundred and ninety-six (8,596).

## FINANCIAL.

The annual statements of Revenue and Expenditure for the year, duly certified by the City Auditors, are appended.

JAMES MERRIMAN,  
Mayor.

Adopted by the Municipal Council, this fifth day of March, A.D. 1878,—  
CHAS. H. WOOLCOTT, Town Clerk.

## WATER SUPPLY TO SYDNEY AND SUBURBS.

(CORRESPONDENCE BETWEEN MR. JAMES MANNING AND THE PRESENT AND LATE GOVERNMENTS)

---

*Ordered by the Legislative Assembly to be printed, 9 April, 1878.*

---

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, on 2nd April, 1878, That there be laid upon the Table of this House,—

“Copies of all Correspondence between Mr. James Manning and the present and late Governments, upon the question of Water Supply to the City of Sydney and Suburbs; together with any Reports, Minutes, &c., arising out of such Correspondence.”

(*Mr. Greenwood.*)

## WATER SUPPLY TO SYDNEY AND SUBURBS.

No. 1.

James Manning, Esq., to The Colonial Secretary.

Sir,

Sydney, 12 October, 1877.

Herewith I have the honor to forward copy of my Review of the Report of the Hydraulic Engineer on the question of Water Supply for Sydney. A copy is already in the hands of Mr. Clark.

With this pamphlet, and by this letter, I beg, on behalf of the citizens of Sydney, to protest against the adoption of Mr. Clark's report on Sydney Water Supply; and furthermore, and on their behalf, I respectfully submit that the Government should call on Mr. Clark, before he leaves the Colony, either to admit or refute the arguments which the Review contains against such adoption.

However inadmissible controversy may be in the position held by Mr. Clark, our public interests demand at least some explanation concerning the misstatements of the simple facts of a valuable competing water scheme.

I have, &c.,

JAMES MANNING.

### SYDNEY WATER SUPPLY.

*REVIEW on the Report of William Clark, Esq., Hydraulic Engineer, on the question of Water Supply for Sydney, by James Manning, Esq.*

To the Parliament of New South Wales, Citizens of Sydney, &c. &c.

THE ensuing articles are a Review of the Report of W. CLARK, Esq., Hydraulic Engineer, on the question of Water Supply for Sydney. They appeared in the *Sydney Morning Herald*, between 16th June and 1st August last, almost in their present shape.

Appendix 1 contains my official letter to the Government of 15th November, 1876, detailing the Loddon and Wingecarribee water scheme.

Appendix 2 contains a copy of that portion of Mr. Clark's Report which refers to that scheme.

The annexed diagram shows the routes or courses of the Upper Nepean and Loddon and Wingecarribee schemes respectively, with the rivers, creeks, &c., appertaining to each, and the character of the conduits by which in each case water is proposed to be conducted.

The Review has been dictated by a conscientious belief that the course recommended by Mr. Clark involves a serious menace to some of the best interests of this community, and that its adoption by our authorities will be productive of a lasting injury to the citizens of Sydney.

I regret that these articles have not appeared earlier in this form, but the delay has not been with me. In July last I wrote to the Government to know whether they would publish them for general information. They instructed their printer to report upon the cost of the publication, and at his request I furnished the manuscript for his inspection. Nevertheless, at the end of two months they refused the use of the Government Press. I accordingly placed the work in the hands of a private printer at once.

Sydney, 24th September, 1877.

JAMES MANNING.

#### ART. I.

I PURPOSE, in a few articles, to survey the Report on this subject lately furnished to our Government by Mr. Clark, the Hydraulic Engineer. In doing so, I trust that I shall receive credit for candour, and for having the interest of the people at heart; and I also express a hope that the matter which I shall adduce will be carefully read and digested, without reference to the seeming seal of authority which the subject has received. It is impossible to ventilate this question too much, or too strongly to insist on its vital importance; and I sincerely hope that the citizens will rouse themselves to a personal critical consideration of it, so that what they eventually resolve to do, they may do with their eyes open, and of their own individual motion, and with such an intimate knowledge of the facts of the undertaking as will enable them to bear the responsibility themselves. An immense amount of the public money is involved, and the owners of it ought to look well into the proposed investment; and now is the time for inspection, for once launched into it there will be no getting out.

I purpose to treat this subject under three heads:—

- I. To inquire whether the Upper Nepean scheme, which has been recommended, is really the scheme which it is represented to be.
- II. To inquire into the quality of the Loddon and Wingecarribee scheme, which, along with others, has been rejected.
- III. To contrast the two schemes.

#### I.—UPPER NEPEAN SCHEME.

Mr. Clark, in his letter to the Colonial Secretary forwarding his Report, says, or rather conveys the assertion, that this scheme has the merit of bringing about 80 million gallons daily into the city of Sydney, subject only to sufficient conduits being provided for the last fourteen miles. The city of Sydney of course means the whole suppliable population.

It will readily be believed that this would be more than the utmost growth of any scheme for the supply of Sydney. At per head of population, it is something like eight times greater than the present supply of Glasgow, and two-thirds of the supply of London itself. I may, therefore, for argument's sake, safely assume that this would be the utmost growth of this scheme, if it could ever grow to it under the most auspicious conditions. Let us now see to what extent in fact it is capable of realizing the representation.

I will here enunciate the fact that in ordinary average seasons, when our rains are fairly frequent, in the mere matter of quantity of water all the schemes are good, and one scheme is nearly as good as another; and as to those which we are here discussing, neither has any superiority. Comparisons are only admissible, and Mr. Clark has only drawn them, in respect of their behaviour in dry times and under

minimum

minimum rainfalls; and it is such behaviour only that will here be taken notice of, and such dry times and minimum rainfalls will be deemed, for the purpose of the argument, continually present.

Mr. Clark began at the outset to cast about for a test, and in searching the record of our seasons, lighted upon a certain period, viz., *eight months* (August, 1875, to March, 1876, both inclusive), during which less rain fell than ever fell in any recorded period of the same length, viz., by the Cordeaux rain gauge, 16.92 inches.

On the theory that what has once happened may at any time happen again, he treats this "dry period" and its minimum rainfall as a climatic fact capable of indefinite recurrence, and from it deduces a crucial test, which he applies without distinction to all the water schemes submitted, viz., *a capacity to supply the demands of the city for a dry period of eight months by the storage and the flow of the minimum rainfall of such eight months.*

It will presently be seen that in this uncertain climate, neither eight months nor any other number of months, nor any known period whatever, can be depended upon or trusted to for such a purpose as the above, and therefore I will not now stop to discuss this point; but I must remark that, assuming for argument's sake that there is virtue in any arbitrary period, Mr. Clark ought at least to have taken nine months into his reckoning, for the month immediately preceding his "dry period" was drier than any month within that period, except one. But I am dealing with his Report as it stands.

The demands of the city are an unknown quantity, and may be any number of million gallons daily, according to circumstances, such as increase of population, extension of service, cheapening of price, and so forth. By possibility the demand may be 80 millions daily; and a power to supply that quantity cannot be claimed as a merit unless the demand is able to approach it, there being no virtue in wholesale waste of water any more than of any other article of consumption. The merit being claimed I assume the use.

Let us now submit the Nepean scheme to Mr. Clark's test at an 80-million gallon rate. Upon the figures in the Report, the following is the case:—

	Gallons.
Storage power ... ..	7,110,000,000
Deduct eighty-nine days' consumption at eighty millions daily, say	7,110,000,000
	<hr/>
Add eighty-nine days' influx at daily average for eight months ...	1,290,500,000
Deduct eighty-nine days' evaporation ... ..	569,600,000
	<hr/>
Leaves nine days' supply ... ..	720,900,000

That is to say, at an 80-million gallon rate, the reservoir will be dry in ninety-eight days or three months, and for the remainder of the drought or dry period, of whatever length, short or long, the daily supply will only be the influx less the evaporation, nominally averaging about 8 million gallons for five months, and after that running from a maximum 8 millions downwards.

This is the outcome of this claim; whether it be supportable or not in wet seasons, in such a one as Mr. Clark selects for a basis it entirely fails.

As a matter of practical fact, such a power of delivery, even if it existed, would be no merit to any scheme for Sydney purposes. The utmost demands of this city will never reach it; and enough is as good as a feast. I will now examine into the efficiency or otherwise of this scheme under more reasonable and probable demands.

The Water Commissioners in 1869 expressed themselves to the effect that twelve million gallons per day is requisite for a population of a quarter of a million, and that any scheme to be considered adequate and acceptable for the supply of Sydney should be able to reach twenty-four million gallons daily, for (say) half a million souls. The Health and Sewage Board subsequently increased this requirement to a minimum of thirty millions.

ART. II.

These functionaries assumed to speak the opinion of the public, and their utterances should be respected and their demands complied with. Moreover, the requiring of thirty millions has the merit of much wisdom and foresight. It foreshadows the true principles of water schemes, viz.—if possible, complete exhaustive construction at the outset; expansion of consumption, not of supply,—of the people to the water, not the water to the people; elasticity of supply rather than of extension. This thirty millions is (Mr. Clark says) exactly the present actual Glasgow rate with half a million souls, three times our population, and it is called the best water supply in Britain. Practically there is no human probability of Sydney ever exceeding that number of inhabitants, though in theory we may approach it, and by possibility may be as big as Babylon. Then what can we want more than this? It would be eminently liberal for our population expanded to the utmost limits likely, while at the same time it would not be open to the objection of being extravagantly in excess of our possible wants. I have, therefore, no hesitation in saying, *thirty million gallons daily is the true rate for Sydney supply.*

The best, cheapest, and only perfect compliance with the official demand for this rate is, not to provide a part of it now and other parts or increments from time to time, but to provide the whole at once. The expense of constructing a scheme in whole is much less than of constructing it in pieces, though the first outlay is greater; and such course has immense countervailing advantages, such as greater supply, cheaper water, knowing how much we have, and how much we have to pay for it. Further, we are not only justified, but in duty bound to our successors, to expend the capital of the Country in productive and permanent works; and since it now appears that a waterwork is essentially of this profitable character, and all the more so if finished out of hand, there is no longer any ground for contending (as I seem to have done in my letter to the Government, from the point of view of expense only) that we should not go beyond the wants of the present generation.

Mr. Clark, therefore, seems to me to fall short of perfect compliance with the requisition put forward by our authorities, and has not proceeded on the best possible basis in providing a 12-million gallon rate with increments of 6 millions; and so his estimates for cost per 1,000 gallons become unsettled, and his comparisons of one scheme with another for this purpose require remodelling. At one place in his Report he approaches the neighbourhood of the 30-million rate by mentioning the figure 29 millions; but a careful examination of the text shows that this 29 millions is only the carrying capacity of a certain portion of conduit, and is mentioned not as any indication of power in the scheme or propriety of rate, but only as a matter of detail and elaboration of the works, in no way connected with the amount of supply to be delivered.

Let

Let us now submit the Nepean scheme to investigation at a 30-million gallon rate. Upon the figures in the Report, the following is the case:—

	Gallons.
Storage power ... ..	7,110,000,000
Deduct 237 days' consumption at 30 millions daily ...	7,110,000,000
<hr/>	
Add 237 days' influx at daily average for eight months ...	3,436,000,000
Deduct 237 days' evaporation ... ..	1,516,800,000
<hr/>	
Leaves sixty-four days' supply ... ..	1,919,700,000

That is to say, at a 30-million gallon rate, there is eight months supply from store, and two months additional supply from the flow of that eight months, and the reservoir will be dry in three hundred and one days, or ten months, and for the remainder of the drought or dry period, of whatever length, short or long, the daily supply will only be the influx, less the evaporation, running from a maximum 8 millions downwards.

This deduction shows the Upper Nepean to be a very fair scheme, so far as quantity of supply is concerned—it is perhaps even better than its supporters thought; but it is no merit to any scheme to have sufficient supply, for without this it is no scheme at all. If supply were the only thing needed, the best project would be Port Jackson, with a steam condenser at Dawes Point. Therefore, the Upper Nepean scheme is not entitled on this ground to take precedence of all others, unless it also appear, either that it has special merits and no blemishes, or that the other schemes have not sufficient supply, or having supply have countervailing blemishes. There are others among the rejected schemes possessing sufficient supply, some of them greater than the Upper Nepean; and if any one of these has the supply, with special merits and no blemish, the Upper Nepean must also show special merits and no blemish, or else it must take rank as a rejected scheme.

We shall now inquire how it will come out of this investigation; and first we will look into the special merits claimed, which are as follows:—

#### 1. LARGE EXTENT OF WATERSHED.

The collective watershed of the Upper Nepean scheme is said to be 354 square miles. It is divided into two distinct parts of widely different qualities. One is the low country, lying below an elevation of 1,000 feet or thereabouts, a low-class watershed, for the most part barren, rocky, and dry, yielding in dry seasons an almost infinitesimal flow, immense in extent, and during spasmodic rains a fruitful cause of floods. The other is the top sources above the 1,000 feet level, a high-class watershed, comparatively limited in extent, full of permanent water-bearing swamps, and yielding in all seasons a comparatively large discharge. The permanent flow of the Nepean streams, which in dry seasons, to which we are limited in all our considerations, is the only supply that the Upper Nepean scheme can count upon, is nearly all from these top sources, where the rainfall is heavier and steadier, the evaporation less in proportion to it (owing to the natural humidity of the climate, caused by proximity to the sea and the high elevation), the soil moist and retentive, and the flow regular and equable. The flow from these top sources has to travel immense and exhausting distances in its natural channels through the low country, and in its passage pays the penalty exacted by sun and wind and a parched and thirsty soil. So the two discharges, the minimum from the poor watershed and the maximum from the rich, mingle on the lower levels and together pass along.

These physical features of the watershed seem to have been only partially observed by Mr. Clark, and their natural consequences are unnoticed.

Mr. Clark, by deduction from observations taken in the Nepean streams, finds the flow of the rivers to be 1-20th of the whole rainfall on the collective watershed. This is a figure for flow unknown, as far as I am aware, to any experience, and should have prompted some inquiry into the causes of it. The cause will be seen above—the flow of the two watersheds have mingled, and the result is the mean between them, the richness of the one going to supplement the poverty of the other. Therefore, this figure, 1-20 flow, does not represent the distributive flow of the Nepean watersheds; and as a figure for general application to all watersheds (top sources among others) it has no value at all, but is worse than useless, being deceptive.

We shall now be able to ascertain what is the real value of the entire Nepean watershed. The ordinary average yield of British watersheds, according to Humber and other authorities, is not less than 2-5ths (8-20th) of the rainfall; and in my letter to the Government I pointed out numerous instances in proof of this. Beyond all doubt or question, the top sources of the Nepean waters as a source of permanent supply are, mile for mile, equal to the best of these; hence they really yield at a rate eight times better than the whole Nepean watershed apparently yields, so that one-eighth of the whole at the high rate would do as much work as the whole at the low rate. Therefore, after allowing an ample margin, the entire Nepean watershed, as a staunch working watershed at top sources rate of flow, is not worth 100 square miles.

#### 2. LARGE STORAGE CAPACITY.

This is a true claim so far as it goes, but since we have seen that this scheme will go only 10 months at a 30-million gallon rate, and it will subsequently be shown that, among others, the Loddon and Wingecarribee scheme will go longer and stand better at the same rate, it is difficult to see how this is any special merit. If, as Mr. Clark seeks to point out, the Prospect reservoir resembles the Yan Yean in quantity of store, it will also probably resemble it in the future experience of the working power of that store. Melbourne has already found that she must supplement the Yan Yean reservoir.

#### 3. SUPERABUNDANT SUPPLY AND COLLATERAL ADVANTAGES.

We have previously seen that this claim at an 80-million rate is untenable. We have also seen to what extent it is tenable at a 30-million rate. We shall presently see that the Loddon and Wingecarribee scheme possesses the same merit in a still greater degree.

The collateral advantage claimed for the Nepean scheme is, that the Nepean River, while providing a water supply scheme for the city of Sydney, also provides an irrigating scheme for the intervening country.

If this were really true, it would be a great virtue of the Nepean River; but there is no faith to be placed in any combination of water supply and irrigation, unless it be on a very small scale, or else from

from an utterly inexhaustible source (which the Upper Nepean is not), such as could be furnished by means of snow-fed rivers, or by such dams as the great Poonah dam in India, or Mr. Woore's proposed dam at Warragamba, both of which do or would have thrown back waters for sixteen miles. The Poonah dam, with cheap and abundant labour, was more than seven years in building, though 100 yards short of a mile.

As a matter of practice and actual fact, this application of Nepean waters, even if possible, would be found to be a dead letter. The Government will never build the requisite irrigating dams, because it is no business of theirs. The owners of the country capable of irrigation will also never build them, for the works would be of too great magnitude for individual enterprise, and they could only be carried out by unanimous concerted action, which would be most difficult, if not impossible, to bring about. Further than this, supposing the dams constructed and the irrigating scheme in working order, it would be found that the store and the inflow would always be least during those seasons when the demand for water would be greatest. Further still, since the recipients of irrigation would most urgently want the flow of the canal at the times when the city would be least willing and able to give it, antagonism and conflicting interests would be likely to arise. Thus this feature of the scheme, however intrinsically good, lacks practicability, and therefore is not entitled to the merit with which at first blush it was credited.

#### 4. CHEAP WATER.

At a 30-million gallon rate, the Loddon and Wingecarribee scheme could deliver every 1,000 gallons for two-pence. And here I must entirely object to Mr. Clark's method of estimating cost of water by small increments of supply. This plan may suit some sorts of water schemes, but there is no principle involved in it, and as applied to the Loddon and Wingecarribee scheme it is altogether inappropriate and foreign to the quality, and encumbers it with a load of expense with which it is no way rightly chargeable. The minimum Nepean price of 1,000 gallons at an 18-million rate is 2·45 pence,\* always assuming that the scheme can be constructed for the figures alleged; and for the extra 12 millions the reduplications of necessary works would be so costly that I think the price would not come down.

#### 5. IMMUNITY OF STORAGE RESERVOIR FROM CHANNEL FORCE.

As compared with river schemes, whose great dams (mostly with inadequate by-washes) stand in the main streams themselves, and have to bear the rush of millions of tons of storm waters coming off immense and unmanageable tracts of country with all the debris and impurities which such country yields, this isolation of the storage reservoir is undoubtedly a merit; but as compared with such a scheme as the Loddon and Wingecarribee, whose watersheds are all top sources, clean, compact, and controllable country, whose dams are comparatively small and low, and almost free from risk, and where nearly all the storm waters can be directly impounded for use, and they scarcely less clear and pure than the natural flow itself—this feature of the Nepean scheme is in no way a peculiar virtue.

#### 6. PERMANENT SECURITY OF WORKS AND SMALL REPAIRS.

Let no one try to make me believe that the Prospect dam is safe. Eighty feet high (besides extra height for wash), one mile and a quarter long, and two million cubic yards of earthwork! There can be little doubt that its presence will depreciate the value, whatever that may be, of the property in the neighbourhood below, which, if a casualty were to happen to the dam, would be submerged for miles.

It yet remains to be proved that the weir and compensation dam will be safe. These are both integral parts of the works, and indeed upon them depends the whole issue.

No doubt the repairs would be small; so they would be in the works of many other schemes, among others, of the Loddon and Wingecarribee.

#### 7. RESEMBLANCE BETWEEN PROSPECT AND YAN YEAN RESERVOIRS.

This comparison is rather important, and unfortunate for the Nepean scheme. The resemblance goes thus far,—that the acreage of each reservoir is much alike, each is about the same distance from the city, they hold about the same amount of available water, and both are removed from the river channel. Here the comparison ends and the disparities begin. The Yan Yean dam is 48 chains long and only 25 feet high at the deepest point; the Prospect dam is 108 chains long and 80 feet high, and with a cubical content as big as the Yan Yean, the Coliban, and the Ballarat dams put together. The entire storage of Yan Yean is available for consumption; Prospect has 3,525 million gallons of unavailable water in it. The Yan Yean elevation is 600 feet above sea level, and discharges into one large distributing reservoir at Preston, six miles from Melbourne, which commands with 300 feet high gravitation every height for miles around, extending as far and further than our Parramatta distance, by pipe service alone. Prospect elevation is only 170 to 195 feet above sea level, far below the top height of Sydney, discharges into the Crown-street reservoir and other small distributing reservoirs about the town at the low levels, and as to the inhabited levels above Crown-street, they can only be got at by pumps. And yet this is called a gravitation scheme!

I have thus discussed all the special merits claimed by the Upper Nepean scheme, and the result shows that few of them are tenable. I will now examine into the blemishes or defects of the scheme, which are mainly as follows:—

#### 1. INSUFFICIENT GRAVITATION, AND ITS CONSEQUENCES.

There is no room to doubt that there was and always has been among our citizens a strong desire for a gravitation scheme, in preference to any pumping plan, either in whole or in part. This feeling was induced by a plain straightforward view of the case, requiring no engineering knowledge, and dictated by common sense and reasons too obvious to require statement. So much so was this the case that I believe the public, or at any rate the reflecting portion of them who guide public opinion, would gladly pay more money for a thorough gravitation scheme than for any plan which had the element of pumps, on account of the high natural pressure and other superior qualities of the former. The Water Commission in 1869 echoed only the sentiments of the people when they looked diligently about for a good gravitation project, and they recommended the Upper Nepean only because they could not find a better, and concluded by inviting scrutiny and criticism, and suggested that better schemes might yet be found. These general views, and the reasons which prompted them, and the sentiments of the Water Commission as the mouthpiece of the community, had right to be respected, and therefore special inquiry should have been made into such of the schemes submitted as would, on this head, have effectually satisfied such general views.

Notwithstanding

\* NOTE.—Mr. Clark gives two figures for this price, 2·45 and 2·65 pence. Clearly one or other must be wrong, so I have given the scheme the benefit of the doubt.

Notwithstanding this evident leaning to gravitation principles, Mr. Clark has expressed an opinion that these views are scarcely tenable here, and implies that, as between pumps and gravitation, it is only a matter of money.

To say the least, this is a plea for pumps, and must mean that he holds gravitation in no particular esteem. The result is that the real gravitation schemes get no special investigation for the sake of the gravitation feature; and finally we are told that there is nothing better to be had than the Upper Nepean, which is low delivery and pumps.

Let us now inquire into the consequences of all this.

(1.) It is stated that water will run from Prospect to receiving reservoirs at Crown-street, Petersham, and Newtown, and that pumps at Crown-street and Paddington will raise water to Paddington, Woollahra, and Waverley, and that from these six centres the whole city and suburbs can be supplied.

What about North Shore? It is not once mentioned in Mr. Clark's Report, and would seem to be no part of the city. It can scarcely be included by implication among the areas above Crown-street levels, for he specifies those areas as being Cook and Fitzroy Wards, Paddington, Randwick, and Waverley. It is therefore not provided for, and this is an oversight which must be corrected. Moreover, the supply must come from the Sydney side, for there is no water to be had on the spot, at least so far as I am aware. Whether there is any to be had or not, the cost of adequately supplying North Shore with water, from whatever source, must be immediately chargeable against any Sydney water scheme.

Mr. Clark proposes to allow the specified areas above Crown-street level  $1\frac{1}{2}$  million gallons per day, and capitalizes the cost of lifting this (with an average lifting height of 108 feet) at £44,000. If the high levels on the Sydney side get all this, well and good, though there is nothing very wonderful in it as a supply, and before the Nepean scheme is ready to deliver, those levels will probably want more. But if it is sought to abstract any of this for a North Shore supply, I contend that  $1\frac{1}{2}$  million is or very soon will be quite inadequate for the population on all the high levels. North Shore is an integral part of the city, and has a right to and could now take nearly as much water as Woollahra and Waverley, and should have one million gallons daily provided for its present and immediately prospective wants. The capitalized cost of lifting this to the top heights of St. Leonards (the lifting height not being less than 159 feet from Crown-street) is just about another £44,000, exclusive of the cost of the carrying main and North Shore reservoir. Therefore this amount, and more, is immediately chargeable against the Nepean scheme over and above Mr. Clark's estimate.

The fact is, the supply of North Shore is a difficult task for this scheme. This suburb is growing larger and larger every day, and must continue to grow without ceasing. Its healthiness, height, great extent of building sites, and easy access to the business centres, render it impossible to doubt that it must eventually be the greatest extension of the city. This £44,000 is only a minimum cost, in fact is no more than an instalment of what will have to be paid in the end; for want of water is the main drawback of North Shore, and once give it that, it will increase with immense rapidity, and soon the pumping power must be reduplicated, and there goes another £40,000, besides extra conduits.

These remarks apply with parallel force to the Waverley and Randwick side. There is an immense extent of high elevations available for residences, stretching from South Head nearly to Botany. These places are not built on yet, because they are more or less difficult of access, and there is no water. But once lead the water there, and the population will follow it for the sake of the coveted elevation, and the consumption of one gallon of water will be the groundwork for the consumption of two more. So the pumping power provided would soon be overtaken, and then away goes another £40,000 for extra power on the Sydney side, besides additional conduits.

The upshot of all this is, that we should never know when we have done with paying, and expense would go on repeating itself every few years, and *the desirable element of finality is absent from the scheme.*

All these troubles and difficulties, born of the low delivery defects, are intensified by the plan of providing the city by small increments of supply. There is no comprehensive nature or forward action in this plan, and, so far as Sydney is concerned, its situation and character of locality render it peculiarly unsuitable and expensive. It is a pity that the Health and Sewage Board, when they raised the rate per day to 30 millions, did not also insist upon works immediately adequate to deliver that rate.

(2.) Another consequence of this low gravitation is that the works from Prospect to Sydney are rendered unnaturally expensive. After the first 11 miles through a complex and costly system of canal, aqueduct, and syphon, with 31 feet fall, there are only 23 feet of fall to Crown-street, 10 miles through cast-iron pipes. Velocity in water means the saving of size and expense in the carrying conduit—the greater the velocity, the smaller the conduit and the cost, and *vice versa*; and as the velocity in this iron conduit is minimum, therefore the size and expense are maximum. So valuable is velocity in the construction of high-level schemes, that I shall be very little out when I say that the cost of piping to bring 30 million gallons a day from the Loddon to Waverley will be no greater than the cost of piping in the Nepean scheme to bring the same quantity from Prospect to Crown-street; though more than twice the distance.

(3.) It is stated that the height of Crown-street and the other receiving reservoirs is 141 feet above sea level. The surrounding localities are very populous, and in some cases the populous neighbourhood extends some miles, and may yet extend much further; and, indeed, for the purposes of water supply, must be credited with indefinite extension. This is the case in Melbourne; the whole six miles from Preston to the city is populated, and the consumption of water per head is large, for they are accustomed to abundance, and know nothing whatever about stint or intermittent supply. The following is a proved fact in Melbourne: *By the time the water reaches the sea levels of the city from Preston, the 6 miles' intermediate abstraction of water in times of heavy consumption eats up, by the friction generated, 150 feet out of the 300 feet head with which it started.* Sydney may fairly be expected to grow as populous as the sister city, and her citizens may reasonably look for the same efficient water supply. What is true of water in one place is true of it in another; that is to say, in Sydney, *if water seeks to run by ordinary mains from Crown-street 6 miles in any direction through a district as populous as that between Melbourne and Preston, the intermediate abstraction of water, when the draught is heavy, will eat up the 141 feet head, and the water will not reach to the end of the 6 miles.* This can only be met by more and more expense, either in laying down larger service mains to neutralize the friction and give the water play, or in constructing more assistant reservoirs in the outlying districts (to be filled intermittently when the heavy abstraction is off), or else in applying more steam power, *to pump down hill.*

This would be a pretty state of things, a nice outcome of a low delivery plan. Yet such must be the inevitable result if this scheme be used and Sydney grow large enough to prove it. It shows conclusively that the *Nepean scheme would be least valuable when most wanted.*

(4.) As a power for the extinction of fires, with the necessity to pump to and from various levels, there is no dependence to be placed in this scheme. When the house which is on fire is at the low levels of the town the water would certainly have some power, that is to say, just the same as the present Sydney supply has, which is little enough; but if the house be on or more or less a little below the level of the Crown-street reservoir (and a large portion of the town is on that level) or of any other reservoir with which its main connects, there is little or no power at all, and in some cases indeed the water could scarcely crawl into the ground floors, far less reach the roof. The consequence, therefore, would be (or rather, should be, in order to preserve a true balance of risk) that the premium for a fire insurance would vary with the situation; and if, as might easily be, a big fire at any time broke out on these unprotected levels, the disasters of Boston or Chicago might be repeated.

## 2. COST.

This subject had come up already, and on the wrong side for the Nepean scheme. There are certain other matters connected with this portion of the subject which require investigation.

Mr. Clark has said that, in his opinion, many of Mr. Moriarty's prices (as revised from his original estimates) are sufficient, but others of them not. I have not the slightest doubt that Mr. Clark examined those figures as carefully as he could, and with all the light he could obtain, and that as an expression of his own belief this statement is entitled to the highest respect. But if I am right in saying that colonists know more about prices current and ruling in their own country than a stranger can possibly be expected to know, and that we have among us contractors and other people well able to make estimates and calculations in such matter, then I say that the public ought to be allowed an opportunity to see and examine those figures for themselves.

As we have not yet been furnished with these revised estimates, we must, for argument's sake, assume them right, so far as they go. Now let us see how far they do not go.

Since our authorities have declared that any acceptable scheme must be able to provide 30 millions daily whenever required, it is clear that the only proper estimate of its cost is one which will cover all the works necessary to provide that 30 millions. The proper complete cost of the Nepean plan, therefore, is something like the following:—

1. To bring 12 millions daily to Sydney:—	
Works, land, superintendence, and contingencies, as per Report ...	£1,126,768
Capitalized value of raising 1½ million to high level, Sydney side, as per Report ... ..	44,000
Ditto 1 million, North Shore side, say ... ..	44,000
2. To bring the remaining 18 millions. Without the revised estimates before me, it is impossible to get at this more than approximately. From Mr. Moriarty's figures in 1869, of which Mr. Clark required revision, owing to the great difference of prices between 1869 and 1877, we find something of the following kind:—	
Cast iron piping for 10 miles into Crown-street ... ..	279,164
Reduplication of syphon pipe to cross Duck Creek, without charging anything for extra work on canal and aqueduct, &c., from Prospect ... ..	52,000
Capitalized value of raising 2½ millions to high levels (being the one-eighth part which Mr. Clark allots), 1½ million to North Shore side, having greatest capacity for extension, say ...	54,000
and 1 million to Sydney side, say ... ..	30,000
Enlargement of reservoirs and all contingencies not included.	
	£1,629,932

The above estimate of cost to reduplicate for the whole balance of 18 million gallons is for one large reduplication at once. But the Nepean plan of proceeding is not to reduplicate in one whole of 18 millions, but in three increments of 6 millions each. This course would immensely swell the figures for the cost of the cast iron piping, for the expense of three 34-inch mains carrying 6 millions each would, with little doubt, be double that of one (say) 48-inch or larger main carrying the whole 18 millions at once. Mr. Clark suggested modification to 36-inch mains would go but little way towards modifying the general expense.

Here then is the proof of that which has so long been generally believed, viz., *that the Upper Nepean scheme will cost far more money than its promoters say*. The above estimates are merely approximate, wholly inexhaustive, prepared upon a basis of cost admittedly too low, and beyond any doubt would work out to a far higher figure. And yet we are asked to believe that the total cost of the undertaking will be £1,170,768, when here is the moral certainty of an eventual *two millions sterling!*

The "12 million and 6 million increment" plan is again responsible for this discrepancy in price. The figures in the Report for costs, to the general reader at least, would seem to mean *cost of scheme*; but in point of fact they only mean *cost of a certain instalment of water out of a scheme*. The distinction is a vital one.

It is known and acknowledged that the building of the Nepean scheme would take ten years, during which time the works would be unproductive, and the scheme should bear the burthen of the interest of the money which its works will absorb. Mr. Clark has omitted this as an item of charge, saying that it cannot be readily estimated, and is common to all schemes.

Had he said that a *reasonable time for construction* is common to all, there would have been no objection to the remark. But ten years is an *unreasonable* time; and if any other schemes could be constructed in a reasonable and shorter time, the Nepean must be charged interest of money for the *difference of time*. It will subsequently be seen that this means a very large sum of money, which must be added to the Nepean cost beyond all question.

## 3. IMPURITY OF WATER.

Mr. Clark has said that he does not think filtration necessary. This may, perhaps, be true of the 12-million gallon rate, because to supply this quantity the influx of ordinary seasons would be sufficient without letting in floods or freshes. But it is certainly not true of 30 millions. The average daily influx into

into the Prospect reservoir for the eight years of observation, as shown by the figure of the Report, is at most 51 millions—floods, freshes and everything. This is only 21 millions more than the daily draught, so that the scheme to maintain its store can ill afford to shut out anything. The influx of dirty storm-waters for a day or two would impurify the whole of the supply in the reservoir, and the impurities would probably not be settled to the bottom before another influx of storm-waters would renew the impurification. Thus the store of water would practically be in a continual state of cloudiness, and an elaborate system of filtration would be indispensable. But gravitation is necessary for filtration works, and the scheme has none to spare—having no more than enough to deliver its waters at the distributing reservoirs; so that there is practically no option in the matter, except between cloudy water or no water at all.

#### 4. DANGER OF PROSPECT RESERVOIR, AND ITS CONSEQUENCES.

It is of the essence of the Nepean scheme that the Prospect reservoir should always be as full as it can manage to be, because, if the water gets low, and a drought comes on, the influx is insufficient to get the store up again, and the ten months' store becomes a myth, and the qualification of sufficiency is gone. But if there is danger in any dam (other than river dams), the greatest causes of it are immense size and depth, and this necessity of fulness, and the pressure on the lower strata of the dam, acting upon the slightest flaws—which flaws cannot be found or known until the money is all spent, and the water in, and damage past remedy. Mr. Gordon, Hydraulic Engineer-in-Chief of Victoria, in his Report on the new Ballarat supply, says that "the risks of failure increase in a greater ratio than the square of the height, and it is no disparagement of the skill of any engineer to state that fact, nor will any one who has had experience in making high dams be inclined to make light of it." All these causes of danger are present in the Prospect reservoir to a maximum extent, and therefore in its complete form it contains the seeds of imminent peril.

But it is not only dangerous, *but it is the only storage reservoir*—unless the Bull's Hill site be also used by way of obviating the danger; and to obtain this security, the Nepean scheme must pay a quarter of a million and upwards over and above its full estimate, and when built the dam is no safer than Prospect, being bigger and more unwieldy still. The Yan Yean scheme possesses the same element of risk, but only in theory, for the comparative smallness of the dam, shallow depth of water (never more and rarely so much as 25 feet), and steady influx, render the fulness of the reservoir, though of course highly desirable, not absolutely essential, and reduce the risk to a minimum. Even the small risk which the Yan Yean does run, Melbourne is now proposing to obviate—the new dam which the people are about to build will serve not only to supplement and better ensure the supply, but also, if accident should happen to either, to preserve the balance of safety by a pair of safe reservoirs. But the Nepean scheme as elaborated has no such safeguard, and this is one of the greatest blots upon it. If accident should happen to the Prospect dam, to say nothing of the damage inflicted to the neighbourhood, the city would have a water famine.

I have now finished the examination of the Upper Nepean scheme. I have found it to be a scheme possessing sufficient supply, no special merits, and many glaring defects. There are many matters yet deserving comment, such as the possibility of the compensation dam not coming up to expectation, and leaving the Upper Nepean dry—the impropriety of charging unequal water rates between the high and low levels, when the people themselves pay for the erection of the works at a uniform rate—and others of more or less consequence. But time and space do not permit. I shall therefore next proceed to the second part of the subject, viz., to inquire into the Loddon and Wingecarribee scheme.

#### II.—LODDON AND WINGECARRIBEE SCHEME.

ART. IV,  
PART I.

Before proceeding to the discussion of this subject, it is only right in its behalf to say that its rejection by Mr. Clark should not set it at any disadvantage in the reader's mind. A proper appreciation of the recommended scheme can only be arrived at by seeing it through the light of another, and I desire to throw that light through the medium of the scheme now before us.

The vicissitudes of our climate are such, that the only indubitable truth about it is this—*dry and wet periods alternate without any known principle of alternation*. Our best skill and science has failed as yet to arrive at any more definite conclusion. Droughts and floods, and every conceivable intermediate phase of season, come and go, and we cannot tell when they will come, or how long they will stay, or when they will go. There have been droughts of every length, from three months up to two years; there have been wet seasons the same, some with floods, some without floods, and some with two, three, and four floods consecutively. We live in the dark as to what climatic issues to expect. It is in no man's power to affirm that the least of these evils will ever happen again, or to deny that the worst of them will begin to-morrow. Again, we cannot assume that as it is in one locality so it will be in another. Severe seasons of both kinds, wet and dry, have been experienced at one and the same time within the influence of the Eastern Cordillera. Some localities seem always more or less dry, others always more or less wet; in some places it rains little and often, in others seldom and much. Further still, there is a great variety of soils—some are hard and dry, and absorb only so much rain as they want themselves, and waste the rest; while others are moist and spongy, and hold the water and give it off moderately and equably. And so the changes, of different rainfalls and different results from rainfall, are rung almost *ad infinitum*.

Many theories and beliefs have been from time to time advanced by way of solution of these apparent anomalies; but none of them have stood any lengthened test, and we are invariably compelled to fall back baffled, and to confess that the laws of our climate are a sealed book to us.

As touching water schemes in our own climate, there are three plain inferences to be drawn from these facts.

1. There is no period known or recorded which can be treated as a climatic fact, and the assumption of any such as a guiding principle is perilous and wrong.
2. The storage capacity, that is, the lasting or staying power of a scheme, is the only certainty, and therefore the true and only standard by which all schemes must be judged.
3. The rainfall and flow of the rainfall in one locality is no criterion of the rainfall and flow of the rainfall in another.

The

The first of these truths upsets Mr. Clark's arbitrary eight months "dry period" which he assumes to be a climatic fact, capable of indefinite recurrence. The second he admits himself (Report, p. 6). The third proves the impropriety of assigning the same qualities as to rainfall and flow to all watersheds alike; and is equal to saying that the rainfall due to any water scheme is the minimum observed rainfall on its own particular watershed during the lasting period of its store, and that the portion of rainfall available for supply is that portion of the minimum observed rainfall which the particular watershed discharges during that lasting period.

Hence it becomes evident that Mr. Clark's test of our water schemes—viz., capacity for eight months' supply out of storage and eight months' minimum flow—is not a true test of all our water schemes. It is, therefore, not necessarily true of any, and, as a matter of fact, it is untrue of some, and, if true of any, it is by accident. It must therefore be given up and a better one found.

The better and true test is comprehended in the above investigations. Storage capacity is the standard of judgment, and the lasting period of the store varies with the rate demanded, and the yielding power of the watershed during that lasting period is such and such an observed flow out of the minimum observed rainfall of that period. Hence we have the true test of all water schemes in this and other uncertain climates, viz., *capacity to supply a given daily rate for an unlimited time by the storage and the flow of the minimum rainfall on the watershed during the lasting period of the store.*

Any water scheme which can absolutely satisfy this test is perfect as to supply; and by so much as one scheme satisfies it more nearly than another, by so much that one is superior. As I am now dealing with the Loddon and Wingecarribee, I will give it first trial by this exhaustive test, and I will subsequently submit the Upper Nepean to the same.

The first thing to be done in the matter is to ascertain the entire storage capacity of the scheme, for upon this depends the whole issue. And before beginning my investigation, I desire to premise generally that I differ materially from Mr. Clark in some things, and that some of my remarks will not be acceptable to him. But truth and the public good are the first objects of my search, and if in that search I cross the views of others, I ask credit for good intention. Also I ask the reader's leniency if my figures should sometimes lack mathematical precision, but they will be found to be quite accurate enough for the purpose of the arguments to be drawn from them.

The storage capacity of the reservoirs on the Loddon watersheds is 2,892 million gallons, capable of being held in the Loddon Lake alone, if it were necessary (which it is not, owing to the existence of relief reservoirs), and the following is the proof.

The Loddon Lake, as at present surveyed, is far below its possible size, and with the cross sections for cubical content at present taken, it has a dam of only 55 feet high (like a flattened V, in a narrow gorge) an extent of 408 acres, an average depth of 13 feet, and a cubical content of 1,446 million gallons. The ranges rise steadily on either side of the dam, and further dam construction is easy, and in my letter to the Government on the subject, the power of large augmentation is distinctly claimed for the reservoir. Mr. Clark therefore wrongly calls 55 feet a maximum height (Report, page 16), and I now exercise the power to increase. 13 feet more dam will double the surveyed store, and the spread, which would be immense, is not counted, but given in for any purpose it can serve.

The Madden's Plains and Tunnel reservoirs are together 63 acres minimum, and drain not less than 4,000 to 4,500 acres; but not having been surveyed for cubical content, these are not counted as independent stores, but given in as supplementary reservoirs to meet any supposed or possible deficiency of the Loddon Lake. This means the storage only without the flow.

The storage capacity of the reservoirs on the Kangaloon watershed has not been ascertained by survey. Though I could not be expected to go any further than I had gone in the way of private expenditure for a public matter, in my letter to the Government I intimated my belief that one reservoir site could be found there having of itself alone a storage power only second to the surveyed power of the Loddon lake. Mr. Clark applied to me for surveys of this, and for the above reasons I referred him to the Government as the proper source of such work. It seems he did not adopt the reference, though why I cannot tell, since he called upon the Government for further surveys in respect of nearly all the other schemes. However, when speaking to my statements on the subject of Kangaloon storage power (Report, page 19), he expresses his willingness to assume "that one or more such sites could be found where, by the construction of dams, it would be possible to impound at reasonable cost as much water as has been calculated for Lake Loddon." Since then, in the absence of surveys, Mr. Clark and I are in accord, I call the storage capacity of the reservoirs on the Kangaloon watershed 1,446 million gallons.

The storage capacity of the reservoir on the Wingecarribee watershed is 9,555 million gallons, contained in the Wingecarribee swamp alone, and the following is the proof.

This swamp, in its present natural state, is a great water-basin 6 miles long, 1,170 acres in extent, having a depth of more than 20 feet in many places where tried, and believed to average 20 feet deep and upwards. Its surface is covered by a dangerous quaking bog of peaty nature. It is not quite level, but has a very slight fall from end to end, not perceptible to the naked eye, and dips a little more just at the outlet, where the Wingecarribee River forms. The outlet proper, that is the stream course, is very narrow, and the land rises bluff on one side to great height, and gradually on the other to a height of something like 50 or 60 feet in about a mile.

The storage of this swamp is of two kinds, natural and artificial. The natural storage is what is in it now, or rather what will be in it when the swamp is levelled off by damming the outlet, which is easy and simple, as Mr. Clark knows. From the body of water thus confined, this scheme claims to be able to draw as the available portion of the natural store, 10 feet of water out of the average 20 feet depth of the swamp. For this I have Mr. Clark's warrant, as he says that he is willing to take a part of these waters. (Report, page 19.)

The facilities for tapping the swamp by tunnel at its lowest levels (owing to the fact that this tunnel has nearly 200 feet of available fall to work upon) are such that every other drop of water in the remaining depth, if ever wanted, could be drained out of it for use. But the collective storage of the scheme will be found to be so great that it is quite unnecessary to depend upon the lower levels of the swamp for any supply, and accordingly I fix 10 feet of water for the purposes of estimate. 1,170 acres, 10 feet deep, means not less than 3,185 million gallons.

The artificial storage is what will be got on top of the natural store, by heightening the dam at the outlet. My necessarily inexhaustive elaboration, and my high opinion of the natural store (which I may here remark is, together with the Kangaloon and Loddon stores, already more than equal to the whole

Nepean store) led me to be satisfied with the latter, and rightly so, and to make no further call upon the capabilities of the swamp. But since insufficiency of storage has become the main ground of rejection, the scheme, in refutation of this ill-founded charge, has a right to display all its dormant powers, and which should, beyond all doubt, have been critically inquired into before judgment was pronounced. The power to raise the Wingecarribee dam is one of these, and on behalf of the scheme I now exercise it.

If, then, this dam be raised 20 feet, as it can with ease and at reasonable cost, 1,170 acres 20 feet deep means not less than 6,370 million gallons, and the spread, which would be immense, is not counted, but given in for any purpose it can serve.

All necessary evaporations will be subsequently allowed for at Mr. Clark's own rate.

Hence the result: *the storage capacity of the Loddon and Wingecarribee scheme is 13,893 million gallons (nearly as much as two Nepean schemes), equal at a 30-million gallon rate to fifteen months' supply without rain or flow.*

These are not mere matters of belief, but absolute existing facts, and I put them forward as such. It now lies with the public authorities to do what they should have done long ago, that is, have these matters properly sifted, and verified, or otherwise, for the public interests. They have never yet received the inquiry they deserve, and every attempt at any such has been persistently balked, as is well known, and the community in general are the losers; for of all the blunders that were ever made in the management of our civic matters, there is not one to compare with that of rejecting the Loddon and Wingecarribee scheme, on the ground of insufficiency of store.

Mr. Clark has stated (Report, page 19) that the entire quantity of water stored by this scheme is only 2,892 million gallons. The immense disparity between his figures and mine must strike people as strange, and they naturally ask for an explanation.

I confess it was some time before I could find one myself. At length it struck me that there was an error of addition, and the discovery revealed the fact that the scheme has had no credit for any portion of its Wingecarribee store. Mr. Clark admits a proved possible store of 1,446 million gallons in the Loddon Lake; he also admits and agrees with me upon a possible store of 1,446 million gallons in reservoirs on the Kangaloon watershed, which watershed can abundantly supply this by itself, without assistance from the Wingecarribee or any other source. But the sum of those two stores is all the credit given to the scheme; that is to say, *the Wingecarribee swamp, the greatest store of all, is not counted!*

But this is not all. This mistake is rendered all the more extraordinary by the fact that the question of damming the Wingecarribee swamp was a prominent feature in the intercourse between Mr. Clark and myself during our visit of inspection in January last. From the earliest time of my discovering this high-level scheme, the outlying watersheds, then known to me only faintly and geologically, but which have since developed into the Kangaloon and Wingecarribee, were distinct portions of the general plan, and claimed by me as such (in proof of which I refer to my published papers read before the Royal Society of New South Wales in 1874-5). They did not receive such early notice as the Loddon, simply for the same reason that Rome was not built in a day, and my limited facilities prevented my elaborating all the details of the general plan as exhaustively as they richly deserved. Among other things, the Wingecarribee part of the scheme could not be said to be perfectly elaborated until the facility of damming the outlet of the swamp was established. As I had not referred to this in my letter to the Government, and, in order that the scheme might have the full benefit of this ability, and to establish its storage capacity beyond the possibility of doubt, I took Mr. Clark to the outlet of the swamp, that he might see the feature for himself. The result of our careful inspection of the site was a satisfactory conclusion that *the damming of the Wingecarribee swamp, if and whenever wanted, would be practicable, simple, and inexpensive.*

Yet, not one word of all this in the Report. Not only no reference to the facility of damming the swamp, the easy extension of which results in an immense artificial store—not only no credit given to the scheme generally for its natural store, known and admitted by Mr. Clark—but *the swamp is actually treated as a sluice, storing nothing!*

Such blunders as these are very serious, and I much regret that it necessarily devolves upon me to expose them. But when I find that this Loddon and Wingecarribee scheme is condemned on the ground, among others, of insufficient store, while the fact is, *that it possesses one reservoir alone superior to the whole storage capacity of the Upper Nepean scheme*, and that Mr. Clark had the means of knowing it, then delicacy has no longer any place, and I am bound in duty to the community and to myself to show up the mistakes.

I have now ascertained the storage capacity of this scheme, and established its sufficiency on this head, and upset the main ground of the rejection. The next thing to be done in the matter is to find the means of filling the store.

I have shown that this scheme, with its reservoirs assumed as full, will stand for fifteen months at a 30-million gallon daily rate without help. I have also shown that the rainfall due to any scheme is the minimum observed rainfall on its own watershed during the lasting period of its store. Therefore, this scheme is entitled to the minimum observed rainfall on its own watershed for fifteen consecutive months.

The entire extent of catchment area available to discharge into the stores of the scheme is 30,000 acres minimum. Mr. Clark says 48½ square miles; but this is rather more than I am aware of, and I will not count upon the excess.

It may be well to mention here that these catchment areas are perfect as to management. The reservoirs of the scheme absolutely command the country, and such a thing as escaped rainfall does not exist. In this respect the scheme differs widely from the Nepean scheme, which can gather into its reservoir per day only 84 million gallons at most, no matter how much water may be going down the Nepean River. This subject will be found further discussed at page 15.

The situation of these watersheds is on the landward side or summit of the Barrier South Coast Range, under the direct influence of the sea, and, as Mr. Clark says, they intercept the rain-clouds and mists coming from the sea, and (aided by the prevailing west winds), condense these waters on their areas. The elevations are very high, nothing under about 1,100 feet, and some of them as high as 2,500.

Independently

Independently of their including some of the head sources of George's River, they are the top sources of and give rise to the Cataract, Upper Nepean, and Wingecarribee Rivers, which are three of the main streams which eventually form the Hawkesbury; and as against the Upper Nepean and Warragamba water schemes, whose large watersheds include these small ones, this scheme has prior title to, and is the true possessor of these watersheds. Mr. Clark, speaking of the Loddon climate (applicable in an equal degree to the Kangaloon and Wingecarribee country), says (Report, page 17): "It is to be borne in mind that the atmosphere of this district is frequently loaded with moisture, which, though not measurable by the rain-gauge, will probably assist in saturating this swampy area. \* \* \* Moreover, exposed as the region is to the south-east winds and close upon the sea-coast, the rainfall is considerable." This is probably one of the causes of the formation of swamps, which are the characteristic features of these watersheds, and are to be met with at every turn, even on the hill-tops themselves.

I need not further enlarge upon the rainfall question. I have said enough to show conclusively that it is far heavier and steadier in those high regions than at any of the points of observation on the Nepean streams, all of which are several hundred feet lower, and more or less out of range of the climatic influences which create the heavy wet. I shall therefore err against the scheme, and be entirely on the safe side, in assuming that the minimum rainfall on the Loddon and Wingecarribee watersheds is at least equal to the minimum rainfall at Cordeaux, which is the nearest point of observation, and whose gauge is adopted by Mr. Clark as universal.

The driest fifteen consecutive months during the eight years of observation are from April, 1875, to June, 1876, both inclusive, and comprise Mr. Clark's "dry period." The minimum observed rainfall at Cordeaux during that fifteen months was 59·79-100 inches. For the above reasons I will take a small further credit of 21-100ths of 1-5th inch for the Loddon and Wingecarribee watersheds, just for the purpose of making an even figure of 60 inches. The rainfall due to 30,000 acres, at 60 inches in fifteen months, is 40,837,375,000 gallons. It now becomes necessary to ascertain the flow or discharge of that rainfall.

From observations taken on Nepean streams, Mr. Clark finds that of the rainfall due to the collective watershed of the Nepean scheme for a dry period of eight months, 1-20th only passed down the rivers. Having been furnished with none other than Nepean observations, he assumes all watersheds to be of the same class and character, and applies the figure 1-20th flow to all alike.

If this figure, 1-20th flow, really had any meaning, it would be an argument for giving up the Nepean scheme. I believe the world does not furnish so poor an example, and for the credit of our climate we should look, before deciding, for some nearer approximation to general experience.

In the first part of this article I proved the impropriety, as a matter of climate, of judging one watershed by another as to rainfall and flow. In a previous article (No. II) I pointed out that the Nepean scheme possesses two distinct kinds of watershed, having very different qualities of flow—one, the low country, large and poor, the other, top sources, small and rich, and that with regard to their behaviour in dry times, the poor watershed yields an infinitesimal flow, and the rich a comparatively large discharge, and that the recorded or deduced flow is that of the mixed watersheds only, a mean figure, and true of neither distributively.

Since then, as a matter of principle, this indiscriminate application of one fixed rate of flow is improper, and the fixed rate, 1-20th, is not true even of the distributive watersheds which have been supposed to give it, I am at liberty to reject that rate as not necessarily true of the Loddon and Wingecarribee watersheds. We must therefore search for some other figure for flow which will be true of them distinctively.

The watersheds of the Loddon and Wingecarribee scheme comprise the majority of the rich portion of the Nepean watersheds, being, in fact, as above stated, the top sources of the George's River, Cataract, Upper Nepean, and Wingecarribee Rivers, all country of precisely the same class as to water discharge. Therefore, whatever is true of the rich Nepean catchment area, is true of the Loddon and Wingecarribee watersheds.

The richness of the rich portion of the Nepean watershed lies in its saturating power, by which it absorbs the rains when falling up to saturating point, discharges the surplus (if any) at the time of fall, and gives off the saturation steadily and equably from its body after and independently of rains. Hence Mr. Clark's remark about them (Report, page 12): "There are, moreover, numerous swamps in this upper portion of the catchment area which retain the water falling upon it, preventing its rapid discharge by the rivers and rendering their flow more equable." The poverty of the poor portion consists in the comparative absence of this saturating power, so that it can only give off water from its surface in harmony with the rainfall, whether that be steady or fitful.

If, then, the rain should fall on the whole watershed as steadily and equably as the rich portion of it gives off the saturated store, the flow of the whole mixed watershed, poor and rich together, would most nearly approximate to the flow of the rich watershed alone, and would only never equal it, owing to the fact that the rich portion itself helps to produce the approximation.

The nearest possible approach to and the only receivable type of rainfall producing such a result, is the rainfall of all the observed seasons as evidenced by the average flow of all those seasons. By deductions from figures in the Report (page 6) I find that average flow to be 35-100ths, or more than one-third of the rainfall. Therefore, this figure, 35-100ths, plus something besides for the individual extra credit of the rich watershed, is a minimum figure for the flow of that rich watershed, and must be substituted for the 1-20th hitherto applied to it.

This is in unison with the world's experience. British watersheds yield an average flow in excess of 2-5ths (40-100ths), and the average flow of the watersheds of twenty-five schemes instanced by the Water Commission (page 106 of their Report) is more than 499-1,000ths—that is to say, one-half.

From personal observation of the features of those rich watersheds themselves, Mr. Clark says (Report, page 16): "The area has been carefully inspected, and its characteristic feature is the large extent of swamps of which it is composed. These swamps are not deep, but even during a somewhat dry period at the time of my visit in December (*sic*) last, they were saturated with moisture."

Therefore, having got 35-100ths absolutely and an unascertained extra by deduction from Nepean observations, and having the world's experience in further support, and Mr. Clark's high opinion on this portion of the Nepean watershed as a source of flow, I shall do no more than bare justice to these rich watersheds by crediting them with a flow of 40-100ths, or 2-5ths minimum.

I have thus established for the watersheds of the Loddon and Wingecarribee scheme a clear claim for 2-5ths flow; therefore, out of the fifteen months' rainfall for which it has credit, there will be discharged into the reservoirs in those fifteen months 16,335,000 gallons.

With regard to Mr. Clark's remark (Report, page 17) "that the evaporation from a swampy area is most probably largely in excess of the average," I will remark in passing that, even if such should be the case, which is more than doubtful, it cannot fairly be used as an argument against the flow of these watersheds, inasmuch as their rainfall (owing to high elevation and proximity to the sea) is admittedly superior to the rate of rainfall on which the estimates are made, and the excess of rain, even after allowing for any such extra evaporation, will give the scheme a credit balance.

Notwithstanding the eulogiums passed by Mr. Clark upon the quality of the Loddon and Wingecarribee watersheds, he yet, strangely enough, speaks (Report, pages 17 and 18) in discouraging terms of their ordinary discharge. He says that on the occasion of his inspection the discharge of the Loddon River was insignificant, and that there was a stream of about three million gallons daily running into the Wingecarribee swamp at the upper end, and that the river draining the swamp is occasionally dry.

I have proved the amount of rainfall, and I have proved the proportion of flow, and it seems to me that this is sufficient answer, and it is unnecessary to say more. But it is perhaps as well to answer those objections pointedly as well as generally.

As to the Loddon River, neither Mr. Clark nor any one else, except myself, has ever gauged it, and my gauging showed a discharge of 70 per cent., or nearly double the 2-5ths claimed and proved for it, and establishes the similarity of that watershed to many English watersheds, concerning some of which engineers Bateman and Copeland have stated that from 70 to 80 per cent. of rainfall could be obtained for use.

I have seen the Nepean River, at Camden Bridge, so small and insignificant that I could step across it; and even the Murrumbidgee itself, above the Tumut junction, I have crossed on stepping stones. The experience that I speak of happened before the recorded seasons, which contain nothing like it; and I am informed by old colonists still alive, that in 1828, a yet earlier date than mine, matters were far worse still. These events may easily happen again, and if they prove anything at all, it is the worthlessness of these enormous watersheds, and the value of the small controllable ones.

It is nothing whatever to the point, how small the volume of water in a natural watercourse may become in a dry time, so long as there is facility for impounding the large volume of water that passes down the watercourse during wet times. It is a popular error to suppose that a source of water supply, to be any good, must show a continual efficiency in its natural state before its works are constructed. Such an argument would eventually lead us to the absurdity of condemning every water scheme which requires the assistance of storage reservoirs. Indeed, in an uncertain climate such as ours, the most perfect qualification which a water scheme can possess is to have abundance of good storage room, so as to be able to store all the water that comes whenever it comes, and to provide well against and be independent of subsequent emergencies; and this virtue the Loddon and Wingecarribee scheme claims to possess in an eminent degree. But not so the Nepean scheme; it has comparatively limited storage room, and it can only take water into store at a limited rate per day, and all the surplus, when there is any, perforce runs to waste, and no sufficient store is put by to meet a long drought; and when there is no surplus, but a deficiency, the scheme must do without supplies, however much it may want them, and then the drought comes, and the scheme fails us.

This subject will be found again discussed at page 33, therefore it is not necessary to proceed further with it here.

As to the Wingecarribee swamp, the influx of the particular stream referred to was never gauged by Mr. Clark, not even roughly, and the eye is a false guide in such matters, and should not be trusted when important results are depending. I am given to understand that other competent spectators fixed the stream at same date at nearly double Mr. Clark's estimate. Even allowing his guess to be true, I am informed by residents, and know of my own knowledge, and Mr. Clark acknowledges, that the combined influx of the Wingecarribee swamp is counted by dozens of streams.

As to the Wingecarribee River, it has *never* been known to be dry. I know that on some rare occasions it ceased running on the surface of the outlet, but still it ran underground, for the water appeared again some little distance below, somewhat after the nature of the Indian streams dammed by porous "annicuts." This objection is silenced by damming the outlet by sinking for proper foundation, and is not due to the swamp.

As a matter of fact, the stream at the outlet was running in large volume when Mr. Clark saw it. (Report, page 18.) It was a dry time (January, 1877), but there had been a night's rain just before inspection, and therefore he rejects the large volume as being no indication of the ordinary flow.

The rejection of this indication of flow was wrong, and clearly shows that Mr. Clark little knew the character of the Wingecarribee swamp. I have been furnished with a simple answer to this objection, viz., that on one occasion at least (and no doubt there are many others) it rained for *four days* without making any material alteration in the volume of the outlet stream. Then it rose with astonishing rapidity, and the rain of only one or two more days made one of the largest floods remembered there.

To return to the main subject. From the above-mentioned amount of flow must be deducted the evaporation of the stores. At 32.5 inches for eight months—Mr. Clark's rate, which, I should here remark, is far in excess of the practically proved rate upon Victorian reservoirs—the evaporation for fifteen months is about as follows:—

	Gallons.
On Loddon reservoirs ... ..	564,000,000
Kangaloon reservoirs (only half store assumed, but same evaporation allowed) ... ..	564,000,000
Wingecarribee reservoir... ..	1,592,000,000
Total ... ..	2,720,000,000

thus leaving 13,615 million gallons as the minimum flow of the scheme for fifteen months to supply the reservoirs.

Hence

Hence the complete result of this investigation of the Loddon and Wingecarribee scheme as to supply:—

	Gallons.
Storage power ... ..	13,893,000,000
Deduct fifteen months' consumption, at 30 millions daily ...	13,680,000,000
	213,000,000
Add influx for fifteen months ... ..	16,335,000,000
	16,548,000,000
Deduct evaporation for fifteen months... ..	2,720,000,000
	13,828,000,000

That is to say, at a 30-million gallon rate, the scheme has fifteen months' supply from store, and fifteen months' additional supply from the flow of that fifteen months, and the flow overbalances the draught, and once full, always full and wasting. This scheme, therefore, absolutely satisfies the test, and is perfect as to supply at the 30-million gallon rate.

Now let us try the Upper Nepean scheme from the same point of view. The statement of figures in article No. II holds good, and shows that the Nepean scheme is not good enough. Mr. Clark's eight months' test is untrue of the Loddon and Wingecarribee, because this scheme has fifteen months' store, and therefore fifteen months' rain; but it is true of the Upper Nepean, because, by accident, the so-called "dry period" of the climate is identical in length with the lasting power of the scheme. Therefore, as applied to the Upper Nepean, Mr. Clark's test and mine are the same. Let us repeat the figures:—

	Gallons.
Storage power ... ..	7,110,000,000
Deduct 237 days' consumption at 30 millions daily ... ..	7,110,000,000
Add 237 days' influx, at daily average for eight months ...	3,436,000,000
Deduct 237 days' evaporation ... ..	1,516,800,000
	919,700,000

That is to say, at 30 millions daily, the scheme has eight months' supply from store, and two months' additional supply from its eight months' flow, in all ten months' supply, and the reservoir is empty. If the drought last longer, the daily supply is only influx less evaporation, being from a maximum 8 million gallons downwards.

These comparisons speak for themselves—the Loddon and Wingecarribee scheme needs no further advocacy on the score of supply. I will now investigate the scheme for its special merits.

These consist mainly in being the opposites of the defects of the Upper Nepean scheme, and the prevention of the evils which those defects would produce. I will enlarge upon the chief of them.

ART. V.

#### 1. GOOD GRAVITATION AND ITS ADVANTAGES.

This scheme satisfies the utmost leaning of our people to gravitation principles. Of all those submitted for examination, it alone exhaustively complies with the requisition to *supply Sydney by gravitation*, which Mr. F. H. Grundy, in his Report in 1869 to the Water Commission, of which he was a member, very properly "conceives to have been the real original decision of that body"; and I have no doubt whatever that, had this scheme been known to them then as I have since displayed it, the Upper Nepean would never have been presented for acceptance.

This scheme commands every height within the county of Cumberland. As regards Sydney, its water would deliver itself at the top heights of Waverley by its own natural force, and from one distributing reservoir there it would again deliver itself far and near, north, south and west, to every inhabited and habitable height of the city and suburbs, including North Shore and all the locality on the north side of the harbour,\* *without cost*, except of service mains. Pumps, and all their attendant infirmities, would have no place in this scheme.

The system of town and suburban reservoirs, suggested by Mr. Clark, with their attendant expenses, would be needless (except of course, the necessary distributing reservoir at Waverley, and a reservoir at North Shore), and we could follow directly in the steps of Melbourne, whose water system, acknowledged to be the best in Australia, has no such thing as a town or suburban reservoir, and supplies every demand, far and near, from one distributing site at Preston, six miles outside the city, whose elevation is as nearly as possible the same as Waverley. As to the Crown-street and Paddington reservoirs already existing, the managing authorities might use them or not as they please—perhaps keep them going until they had perfected an improved system of reticulation for bearing the Waverley pressure, and then sell the sites.

Under this scheme there would be no such thing as artificial unequal heads of water, which the Nepean system of pumping from one level to another would create, but at every spot served the water would have the head that the Waverley height would give it there, less the friction developed up to that spot. Therefore fires would have no chance to live anywhere, and if the reticulation be laid down sufficiently large and liberal in the first instance, so as to meet the friction developed by intermediate abstractions of water, the pressure of the Waverley height might be availed of all over the town by the application of hydraulic lifts. Further still, public baths and playing fountains, the groundwork of health, cleanliness, and beauty, might be had everywhere.

Moreover, for the mere purposes of delivering water to the population, this scheme requires a much smaller system of reticulation than the Upper Nepean. This latter cannot afford to have much friction generated by water abstractions, because it has not head enough to match it, and therefore must use large and costly service mains to give the water play; but the scheme now under consideration has a head which no amount of friction can neutralize, and which will make the service mains do far more work with

\* NOTE.—By service mains direct to the heights of St. Leonards, laid across the harbour under water from Daves Point to Milson's Point, by the aid of "Ward's Flexible Joints," or by bridge, if ever built.

with far less size. This virtue of the high-delivery plan will enable it to supply with ease from Waverley all the railway suburbs, right away to Parramatta itself, and further, without stint or intermittence, just as St. Kilda and Brighton (Melbourne suburbs) are supplied from Preston; while, under the Nepean system of low delivery, in later years, when the railway suburbs become more thickly inhabited, the outposts of population will probably find their water supply not permanent, unless still larger and costlier mains, capable of neutralizing friction, be used for conveying the water.

The high altitude at which this scheme starts its waters for Sydney (1,062 feet or thereabouts) is a value which cannot be over-estimated. First, it enables the scheme to deliver its waters high to the city, as we have already seen. Hence its works would be more beneficial to Sydney than the Nepean works. Its tunnels and canals, and the pipe line uniting the outlying Wingecarribee and Kangaloon with the Loddon system, no matter what their cost, serve the good end of bringing the accumulated waters to an elevated spot, from which high delivery to Sydney can be effected. But the Nepean has to do prodigious work in tunnels and canals to get its waters out at all, even on to a low level, and when it has delivered them in Sydney the level is not nearly high enough, and it has to recoup itself, by artificial means and with feeble effect, that quality of elevation which nature deprived it of in the passage.

In the next place, the height of the starting-point gives the water immense velocity, which means, as I pointed out previously (Article No. III), saving of expense in the carrying conduits; and as the greater portion of the conduit is iron piping, in which the velocity tells, it will be found that the cost of the whole of the Loddon and Wingecarribee conduits to deliver 30 million gallons a day, 75 miles of tunnels, canals, and pipes, will be less than that of the Upper Nepean conduits to deliver the same, 63 miles of corresponding but far more complicated structures.

Again (and this is akin to the velocity question), the head with which the water would be delivered at Waverley (viz., 700 feet and upwards, being the difference of height between the starting and discharging-points) would eliminate there out of suitable pipes, when the pressure is released, a certain amount of motive power having a permanent annual value for application to machinery. In my letter to the Government on the subject I stated that the value of this power would pay a large proportion of the interest on the cost of the scheme. This would unquestionably be the case if the closed-pipe system (which means, stopping the water at the bottom or end of the pipe, so as to get the weight of the column) were adopted, and Mr. Clark has misunderstood me in concluding, as he seems to do (Report, pages 20 and 21) that I have assumed for this scheme a virtue which it does not possess. But inasmuch as the proper adaptation of the pipes so as to allow the power to generate, would be, as Mr. Clark truly remarks, an expense not needed for the mere delivery of water, and since by the adoption of the open pipe system (which means, stopping the water at or near the top or starting-point of the pipe, thus making it a free channel), the pressure in the pipes is greatly relieved, and therefore the cost reduced, I should prefer a reduced cost of pipes with little motive power, to an increased cost of pipes with high power. Therefore, the matter really comes back to the same point, viz., that the height of the starting-point gives us money's worth in either one way or the other, and it only rests with ourselves to determine which way we will avail of it.

### 2. LARGE STORAGE CAPACITY.

This was claimed as a special merit of the Upper Nepean scheme, and is so far true that, at a 30-million gallon rate, the scheme is equal to eight months' supply from store and two months from flow, plus influx. But, on the same score, it is far truer of the Loddon and Wingecarribee, which at the same rate will stand as shown, fifteen months' supply from store and fifteen months' from flow, plus influx. This merit was, therefore, claimed for the wrong scheme.

Independently of the mere number of days or months that the stores of the respective schemes will last, the lasting power of the Loddon and Wingecarribee has the additional virtue of being able to tide over that amount of trial which our experience denotes as most likely to happen. An eight months' drought is much more probable than a fifteen months' drought—in other words, the probability of a drought is inversely with the length allowed it. The lasting power of the Nepean scheme might not unfrequently be sorely tested, while a trial of the strength of the Loddon and Wingecarribee would but seldom happen.

### 3. SUPERABUNDANT SUPPLY AND COLLATERAL ADVANTAGES.

Neither the Upper Nepean nor the Loddon and Wingecarribee, nor any water scheme except Warragamba, George's River, and Lower Nepean, could properly face the 80-million gallon rate spoken of by Mr. Clark in his letter to the Government forwarding his Report, nor is there the slightest chance of any scheme for Sydney purposes ever being required to do so. But, so far as mere relative ability goes, the Loddon and Wingecarribee could deliver 80 millions daily for nearly twice as long as the Upper Nepean—viz., in proportion to their respective stores.

The Nepean water scheme possesses at its back a fund of fitful power in the Nepean River, a large portion of which power it cannot appropriate to its own use, and, indeed, in very wet times is quite unmanageable, and has to be left alone to expend itself in the Pacific Ocean. This spasmodic energy—wasted, so far as water supply to Sydney is concerned—it is sought to turn to more or less account by elaborating a Nepean irrigating scheme, so far as the character of the river is fit for it, for the benefit of that portion of the county of Cumberland which lies between Pheasant's Nest and Prospect.

In a previous article (No. II) I discussed this project, and found that, as a matter of fact, it is very impracticable and unreliable, and apt to interfere with the working of the Nepean water scheme, and that it is not really deserving of the credit which has been assigned to it. However, to whatever extent the feature might be good or could be practically availed of, the Nepean water scheme has a perfect right to claim it as a collateral advantage, so long as it is entirely subservient to the first and foremost consideration—water supply for Sydney and suburbs.

For the same reasons, the excessive quantity of supply possessed by the Loddon and Wingecarribee water scheme over and above the possible wants of Sydney, at any rate for a great many years to come, entitles the scheme to seek for an extended field for utilizing its wasted energies. Had I the slightest faith in irrigation from sources which are not absolutely inexhaustible (and neither the Upper Nepean nor the Loddon and Wingecarribee sources are), I might claim for this scheme a power to irrigate a large portion of the best part of the Illawarra country, which lies immediately below its conduits, and is for the most part far better worth irrigating than any country which the Nepean can reach, and each scheme has an equal title to the claim for irrigating power, that is to say, in my opinion, neither has any title at all.

But

But the Loddon and Wingecarribee scheme has a further field of work in genuine town supply, to which it is well entitled, and in respect of which the Nepean has no equal advantage—the power to supply the town of Campbelltown being, though very useful, not at all of the same corresponding value. I refer to the power to supply water to the town of Wollongong for domestic purposes. This centre of population, including the town itself and its immediate surroundings, and not counting the Bulli and coal-mining populations, contains now not less than 2,000 souls. These people are entirely dependent for water upon what they can catch in tanks or sink for in wells, helped out by a lagoon near the town, and tanks, wells, and lagoon all give out together, and after that the people have to go to Fig-tree Creek for water, two miles out, at a cost of 4s. per cask of 56 gallons. I am also given to understand that the water in general use is of indifferent quality.

The growing prosperity of the Southern Coal-fields is causing the Wollongong, and indeed all the Illawarra population, to increase; and apart from the future connection of that district with Port Jackson by rail, its further field for eventual improvement in manufactures and so forth gives us good ground for anticipating a much larger increase, and it is beginning now to be clearly seen by the people that some effort must shortly be made to provide a proper supply of water for domestic and other purposes.

Wollongong lies, at the farthest, only 4 miles from the Wingecarribee mains. From the mains to the town the fall is immense—say 1,400 feet—and the velocity of water in a branch pipe from the main would create such a tremendous delivery power, that a comparatively small pipe would suffice to bring down more water than Wollongong could ever consume. The cost of such a water supply, exclusive of the reservoir and reticulation, would be included in the cost of the Loddon and Wingecarribee scheme.

But altogether beside the above valuable collateral advantage, there is yet another equally feasible, and of infinitely greater merit (already hinted at by me in my published paper, read before the Royal Society of New South Wales, on 4th August, 1875), viz., the ability of the Loddon and Wingecarribee scheme to supply water to Wollongong so as to transform it into a great manufacturing emporium. In this case, the three main elements of manufacturing success, so rarely found combined, are all present together in an uncommon degree. First, there is the great Southern Coal-field, the cheapest coal in Australia, its present working pits within three miles of the centre of Wollongong, and in direct communication with it by rail and tramways, and with capacity for unlimited expansion. Next, there would be the water running past within 4 miles of the town in far greater quantity than the wants of Sydney are equal to, and the surplus water would be ready, instead of all running to Sydney, where there would be no sufficient use for it, some to run to Sydney for manufacturing purposes, and the remainder to another, and, in my opinion, superior field of operations, viz., *to the coal itself*, at Wollongong. Lastly, there is the sea, the great receptacle of pollution, ready to sweep away, without cost or labour, and render innocuous, all the waste and impurities which an unlimited extent of manufactories might produce. The combination of these three incidents has all over the world resulted in manufacturing prosperity; and wherever it can be met with capital and industry will avail of it.

This qualification of the Loddon and Wingecarribee scheme, both in its inception and development, is worth twenty Nepean irrigating schemes, and is so big with financial results that it would assume the proportions of a national matter. I should perhaps say that a reasonable labour rate is a condition precedent and essential to its development. But it is impossible to believe that the present starved condition of the Colony for population can last for ever; and whether it last or not, this scheme is not amenable for the condition of the labour market, and its merit is simply dormant, ready to spring into action as soon as an improved condition comes.

The cost of delivering a reasonable quantity of water at Wollongong, for the purpose of initiating manufactures and industries, would also be included in the cost of the Loddon and Wingecarribee scheme.

#### 4. FACILITY OF COLLECTING WATER.

As I have previously stated (Article No. IV), the watersheds of this scheme are under perfect control, and the reservoirs absolutely command them like mountain passes, and all the rain that ever falls on them, from the heaviest storm to the gentlest shower, must pass without waste into the reservoirs, less soakage and evaporation.

Being all top sources, the country is very clean and pure, and free from the dirt and *débris* which pollute the low-lying areas. I have seen the Loddon River in flood, and there was no material difference between the waters then passing down and the ordinary flow.

The general average experience of our own rains is, that the heavy spasmodic semi-tropical down-pour is more common and frequent than the gentle steady rains of the northern latitudes of Europe. The heavier the rain, of course the less the proportion of evaporation and soakage, because the water has no sufficient time to operate upon the soil and be operated upon by temperature, being hurried off by the falling torrent, and hence the reason why storm-waters do but little comparative good to ordinary soils, and run off in immense volume and cause floods.

Since there is no escape for the rainfall, whether much or little, from the Loddon and Wingecarribee reservoirs, and the watersheds are small, so that the rain never falls at any great and exhausting distance from the dams, and since the heavy rains or storm-waters run off clean and almost *in globo* after the complete saturation of the absorbing swamps which the watersheds contain, the rain is scarcely fallen on the watersheds before it is in the reservoirs ready and fit for use. This means that *the whole country is a canal to the reservoirs*, and there is no waste whatever except after they are full.

This is an immense advantage, and one which the Nepean scheme does not possess. The most that that scheme can take into store in a day is 84 million gallons (by a canal whose power to draw upon the Nepean River is limited to that), and whatever more goes down the Nepean River runs to waste, not because the scheme may not want it, but because it cannot help it, unless it depart from its elaborated shape, and enlarge its canals and duplicate its reservoirs. The time when there is most water to take and the greatest harvest is to be made, namely, periods of heavy wet, is just the time when the Nepean waters are least fit to take, owing to impurities, and the Nepean scheme must reject them and shut its gates, or apply them to irrigating purposes alone. By the time the river is clear again, and the Nepean gates can be opened, the water which would have filled the Prospect reservoir, had it been fit to take, is in the sea, and the river is rapidly running down to its average level, at which it seems from the figures in the Report that the canal does not draw more, that is, cannot get more to draw, than 51 million gallons daily, or only 21 million gallons in excess of the required draught. And yet this compulsory waste of water by the Nepean

Nepean scheme, for all that it is so patent a weakness, is put forward as a credit, and a tabulated statement of the daily average waste for eight years finds a place in the Report!

#### 5. SAFETY OF RESERVOIRS.

The statement cannot be gainsayed, that the most perfect possible dam is that which, being of minimum relative size, impounds a maximum relative store, and *vice versa*. Therefore the Prospect dam must be the worst possible dam, since, out of its whole 80 feet height, 55 feet is useless work, and serves no other end than that of being a sediment pond, and the top 25 feet alone are of any use for the purpose of storing water for the city. In a previous article (No. III) I pointed out the danger of a large city depending for its supply upon a solitary reservoir, owing to the many risks which such reservoir runs, and that in our own particular case, the Prospect dam, owing to its immense height and length, and difficult position, possesses the elements of danger in a maximum degree. I also mentioned that the Yan Yean water scheme, running minimum risks of the same kind, is now about to obviate those risks and increase its supply by duplicating its dams and stores.

The reservoirs of the Loddon and Wingecarribee scheme are so disposed and situated that *they absolutely annihilate risk, and establish a perfect balance of safety*. The dams are comparatively small and simple, and all put together would cost no more than, if as much as, the Prospect dam alone. The Wingecarribee swamp dam, wedge-shaped, of earthwork and puddle wall, impounding 9,555 million gallons, would be about a mile long, 45 feet high at most in the river bed, and tapering to nothing. The Kangaloon dams, impounding (say) 1,446 million gallons, are not surveyed as they should have been by Government, but the biggest of them would not be more than (say) 30 feet high and 12 chains long, in timber and earthwork. Of the Loddon dams, impounding 2,892 million gallons, the Loddon Lake is the only one worth mentioning, the others, though eminently useful and effective, being comparatively mere trifles to construct. This dam, in concrete, shaped like a flattened V, as already said, would be about 38 to 40 chains long, 68 feet high in the centre, and tapering quickly on either side to nothing. All these reservoirs present a perfect chain, able to connect and disconnect at will, and in the event of a casualty happening to any of them—a most unlikely occurrence—the others would carry on the work whilst repairs were doing, and, so far as the permanent supply of the city is concerned, none but the management would know that anything had happened.

These are the chief special merits of the Loddon and Wingecarribee scheme, and it has been seen that they are peculiarly its own, and that the Upper Nepean scheme at any rate has no claim to them. I will now consider the alleged imperfections.

These are all on points radical to the issue, and no defence having been called for before judgment, rejection followed as a matter of course. I must now inquire into the truth of the charges, which are mainly as follows.

#### 1. LIMITED CATCHMENT AND STORAGE.

This involves the whole question of power to supply, and is the chief charge of all. It is said (Report, page 19) that, at a 12-million gallon daily rate, the storage and flow of the scheme would be exhausted in 240 days, thus leaving no margin beyond eight dry months.

Article No. IV has been devoted to the consideration of this subject, and I have only briefly to recapitulate. It is there shown that, so far from this statement being true, the fact is, that at a 30-million gallon daily rate *the scheme is practically inexhaustible*, since it has fifteen months' supply in store to start with, and at the end of fifteen months' draught there is still fifteen months' supply in store, the inflow being equal to the draught, and at the end of every repeating fifteen months there is still fifteen months' store, and so on endlessly.

It is a matter of some surprise to me how Mr. Clark can have set his allocatur upon such a statement as the one referred to. It is traceable to three proved errors, viz., miscount of the store of this scheme, deduction of a wrong figure as the flow of the watersheds of another scheme, and wrongful assumption of that wrong figure as representing the flow of the watersheds of this scheme. With such fallacies as these for a foundation, the superstructure cannot help but crumble.

A great deal has been said, from time to time, about the smallness of the Loddon and Wingecarribee catchment areas, and the general impression has been that as their size so their value—that is to say, by their extent they shall be judged. The arguments adopted by me in Article No. IV should have effectually dispelled this mistaken notion, and set up a new standard of judgment of the value of catchment areas, viz., as their *yield*, so their value—that is to say, *they shall be known by their own fruits*. It is by this test that we try everything else in the world, and why make any exception of watersheds? Where would the Vehar Waterworks be, if its small but productive watershed was judged by the former standard? Yet, as a matter of fact, 3,948 acres supplies the whole city of Bombay, with more than half a million of population. Liverpool, Dublin, Dartmoor, Botany, where would all these water systems be if judged by such a standard? They must be all condemned at once; yet as a matter of fact they have done and are daily doing wonders, and, speaking by relation, are among the finest systems in the world. It is nothing whatever to the point how large or how small watersheds are; if we can get as good work and as much return from ten thousand acres in one place as we can from one hundred thousand acres in another, the ten thousand is worth every whit as much as the hundred thousand, and more, being better under control. These are truisms too obvious to require any further elucidation, and I consider that the question is at rest.

#### 2. WINGECARRIBEE SWAMP AS A STORAGE RESERVOIR.

Mr. Clark says (Report, page 19),—"While I hold an opinion that the Wingecarribee Swamp is unsuited to act as a storage reservoir, I am desirous to give the full advantage to the statement of the promoter of this scheme, by taking a part of its waters."

This remark, to be consistent, means two things: one, that the Wingecarribee waters are worth having; the other, that the merit of the swamp as a storehouse for water admits of difference of opinion. I quite agree with him on the first point, and have availed of the admission in a former place (Article No. IV), when speaking of the storage of the swamp. On the other point I hold, by his sanction, a different opinion—and I propose to show grounds for my opinion.

It is impossible that there can be any objection to the swamp as a storehouse on the score of any physical features, such as size or depth, since a single reservoir 1,170 acres and more, 30 feet deep and

and more all over, is not to be found every day provided by Nature, with so little work to do to perfect it. There are only two other possible reasons for Mr. Clark's opinion, viz., either that the swamp is incapable of being dammed up, or that, whether capable or not, it contains within itself the elements of failure and the seeds of injury to the store.

In Article No. IV, I established the fact that the swamp is capable of being dammed, and that Mr. Clark knew and admitted it. As therefore this cannot be his reason, there is but the other possible, and this is evidently the line he has adopted. He says (Report, pages 18-19)—“Pure as the water now is, without any demand on its volume beyond that of the overflow by the river and loss by evaporation, it might be otherwise when 10 or 12 million gallons daily were withdrawn from it and probably some of the vegetation now immersed become dry; the conditions would then be altered, and a process of decay and change would be continually going on which might alter materially the present pure condition of the water.”

The damming of the swamp, so as to bring all its levels up flush (which is, as previously pointed out in Article No. IV, the amount of dam work required to impound all the natural store), would effect two objects, one the prevention of the outflow, the other the submersion of the surface. Had Mr. Clark gauged the volume of the outflow when he saw it, instead of rejecting it as no true indication because of a few hours' previous rain, he would certainly have found that outflow to be in excess of the 10 or 12 million gallons draught which he speaks of, and indeed he admitted as much at the time. Hence, at the rate of outflow then observed, and with the rate of draught just mentioned, the swamp would be permanently submerged on the execution of only so much dam-work as would impound the natural store, and therefore the vegetation would never become dry, and the process of decay and change would never begin, and the present pure condition of the water would never be altered.

But this is not sufficient answer to the false alarm about the quality of the swamp as a reservoir, because the outflow (or rather what would be outflow if the swamp were not dammed up) might possibly average less than what it was when we saw it; and if the draught upon the swamp for purposes of supply were in excess for any great length of time, the level of the natural store of water would sink, and the vegetation be again exposed. Personally I do not believe in such a thing as decay and change, such as Mr. Clark means, among water plants (than which there is nothing else in the Wingecarribee swamp), for they strike their roots to the water whatever its level, and so long only as they are not deprived of air they will amply preserve their own vitality. But it is unnecessary to pursue this argument further than just to mention it, since, whatever the drawbacks of the vegetation, great or little, they will be removed altogether.

In a former place (Article No. IV) I pointed out the ease and simplicity of extending the Wingecarribee swamp dam. Mr. Clark was as well able to see this feature as I was, and indeed had far better opportunity, for the survey staff of the Colony was at his command, and he should have used it, and if he had used it he would have had the mathematical proof of that which I have alleged and know to be a fact, viz., the ability to raise the dam 20 feet and more above the swamp level. This 20 feet of water thus thrown over the whole swamp would weigh more than 28 million tons, and would exert a downward pressure of 10 lbs. to the square inch all over the 1,170 acres area, and would smother and annihilate the entire mass of vegetation and precipitate it bodily to the bottom. This was the Yan Yean experience under circumstances not at all dissimilar, and there is no reason why the same effect should not be produced in this case. What then becomes of the alleged impurification? The objection is unfounded, and should never have been raised.

### 3. CHARACTER OF WINGECARRIBEE WATERSHED.

Mr. Clark says (Report, page 19)—“The country round the swamp and Kangaloon Creek is very fertile, the soil consisting of decomposed trap, and every portion of the district is, I believe, alienated, with the exception of the area of the swamp itself. It is being rapidly cleared of timber and converted into pasturage for cattle. To a small extent it is used for agriculture. Its value is said to be from £10 to £12 per acre to the agriculturist, and I should apprehend would become the seat of a large population.”

After our tour of inspection, but before the Report was issued, Mr. Clark expressed an opinion to me, that if this scheme were recommended the lands might have to be bought up.

These remarks, summarized, would seem to mean that agricultural and pastoral operations, and still more a large settled population on the Kangaloon and Wingecarribee watersheds, might have a deleterious effect upon their waters by the absorption of impurities, and that large compensations might eventually be necessary to obviate this.

The Kangaloon watershed is scarcely within the scope of these remarks, as, although a portion of it is alienated, the majority of it is still reserved with the Nepean catchment areas. Therefore, I shall treat the objection as referring to the Wingecarribee alone. But in any case, my arguments will apply equally to both.

If these are Mr. Clark's views, they are significant of prejudice against this remarkable watershed and the storage to be obtained from it. They are also unscientific, and require refutation.

The alienation of that district is not of late date, having begun with the Land Act of 1861, and was completed in something like two years, and is now fully occupied. There is little increase of population except by natural birth, no influx of people, and not the slightest likelihood of the present rate of increase ever being much exceeded, nor the least right or reason for anticipating any such thing as density or town massing. The staple business of the country is and ever will be pastoral, in the shape of dairy operations; and our long experience in these Colonies goes to prove that large populations are not due to nor in keeping with such, and in fact rarely, if ever, follow fertile lands when distantly removed from the metropolitan market. The country is already fully stocked with cattle (that is to say, so much of it as is cleared, which is much the major part), and it has been so for years, and in fact at the present time is carrying a prodigious quantity.

Therefore, Mr. Clark need have no apprehension whatever as to the further stocking of the Wingecarribee country either by man or beast. He does not find the water polluted yet, for all the heavy stocking, but, on the contrary, he admits, and his analysis proves, that the Wingecarribee water, under the existing state of things, cannot be surpassed for purity; and the above statements are sufficient proof that it will ever maintain that purity, under any subsequent conditions probable.

But I desire to go further, and to say that, supposing all these lands should become utilized to their utmost, and settled with agricultural and pastoral population, even more heavily than experience has ever shown, and stocked with animals even more densely than now (which would be rather difficult, for I was told by one resident that there were 5,000 dairy cows in the immediate vicinity), there would still be no cause for apprehension such as Mr. Clark indicates. This assertion is supported by the following reasons:—

It is an admitted axiom, and well known in science, that Nature has made a special provision for the preservation of the purity of water for animal life. Humber, in his valuable work on "Water Supply for Cities and Towns" (page 22), speaking of the organic impurities in Thames water (which, I should remark, must be far greater than the utmost amount of impurities ever possible in the Wingecarribee waters), quotes the language used by Dr. Franckland to the Royal Commission on Water Supply for London (1869):—"These noxious elements would be sufficient to do great mischief, were it not for a most beneficial provision of Nature for effecting spontaneously the purification of the streams. Some of the noxious matter is removed by fish and other animal life; and a further quantity is absorbed by the growth of aquatic vegetation. But, in addition to these obstructions, important changes are effected by chemical action. The organic compounds dissolved in the water appear to be of very unstable constitution, and to be very easily decomposed, the great agent in this decomposition being oxygen, and the process being considerably hastened by the motion of the water. Now, as such waters contain naturally much air dissolved in them, the decomposing agent is ready at hand to exert its influence the moment the matter is received into the water, in addition to which the motion causes a further action by exposure to the atmosphere. The effect of the action of oxygen on these organic matters, when complete, is to break them up, to destroy all their peculiar organic constitution, and to rearrange their elements into permanent inorganic forms, innocuous and free from any deleterious quality."

As applied to the Wingecarribee case, this indisputable authority (to whom Mr. Clark himself refers in his Report) means that the waters discharging off pasture lands become cleansed of all organic matters by the simple effect of the oxygen in the air oxidizing, or burning up, all such matters during their passage to the reservoir, and that what is not done by the atmosphere would be completed by free oxygen in the water itself. In other words, motion produces exposure of the particles, and exposure admits the attack of the decomposing agent, and the necessary result is organic change. Moreover, the power of water to absorb oxygen from the air (and carbonic acid, which gives it freshness and life) increases with its coldness; and as the waters of this high-source scheme are practically mountain waters (and, as a matter of fact, would be delivered in Sydney many degrees colder than either Nepean or Botany waters), they contain in themselves a comparatively greater power of ridding themselves of any imperfections. Added to this, the aquatic vegetation and the fish and animal life to be imported into the reservoir would give further purifying assistance: and further still, the water would receive a finishing course of oxidation and aeration not only in the reservoir, but also during its onward course through tunnels, canals, and pipes, for 75 miles, all the way to Sydney.

In saying the above, my remarks must be understood to apply only to the impurities which would be generated in a dairying and sparsely populated country, such as the Wingecarribee must ever necessarily be, and not to the subject of organic town sewage, which could have no possible place on the watershed in question.

The above remarks are a complete answer to any objection that may ever be raised against the Loddon and Wingecarribee scheme on the ground of impurity of any of its watersheds.

#### 4. WROUGHT-IRON PIPES.

##### ART. VI. PART 2.

The *wrought iron* system of pipes is of the essence of this scheme, as distinct from a cast-iron plan. It is an engineering question, and, as such, is the point of variance between me and the advisers of our Government on the water subject, beginning with the Government officers and culminating with the Hydraulic Engineer. This may seem a curious variance, between a single amateur and a band of professionals, but I do not apologize for it—let the sequel show.

There is a great defence due to this question, and it is of itself entitled to far more space than this paper will permit. The main points, however, must be discussed here, and I will do this as succinctly and consecutively as possible.

The hydraulic advisers of our Government know nothing whatever about the use of wrought-iron pipes. In the published evidence taken early in 1876, by the Health and Sewage Commission on our systems of water supply for the information of the Hydraulic Engineer then ordered from Home, Mr. Moriarty, as the general mouthpiece, expressed himself to the effect that "he was not aware, and had never been able to learn, that wrought-iron pipes are used to any extent in America in connection with the supply of water to towns, and that Virginia City, a small mining town in California, was the only one he was aware of, and that they were not, to his knowledge, adopted in any of the other States." Other members of the same Commission have expressed similar views on other occasions.

Mr. Clark, when speaking to my statements on this head, contained in my letter to the Government, says (Report, page 20):—"Wrought-iron pipes are used in America, but I am not aware that up to the present time they have been used in England or by English engineers."

Our advisers know as little about the value of wrought-iron pipes as they know about the use. Mr. Moriarty, in the same evidence, said that "they are objectionable for carrying water any distance (and 28 miles, the then supposed length of the pipe line from the Loddon to Sydney, he considered a great deal too far to bring water by pipes), being more liable than cast iron to corrosion and affection by water and earth." Mr. Clark (Report, page 20) expresses himself to the effect that wrought iron does not resist corrosion so well as cast iron; that the anti-corrosive asphaltum coating (which is of the essence of the wrought-iron system) is now universally used for the protection of cast-iron pipes; that from the experience of gas-pipes wrought-iron pipes are durable when the coating is perfect, but failing that, they corrode; and that in a pipe trench such coating can only be painted on, and perfect coating without flaw cannot be obtained.

This is the pith and substance of all the allegations against the wrought-iron pipe system, both as to its use and its value. I will disprove it all.

First,

First, as to use and application. In my letter to the Government, I stated that "wrought-iron pipes in America are counted by hundreds of miles." In support of this statement, among the scores of instances all over the continent of East and West America, where they have been for years and years, and are now in continual use and uninterrupted swing, and others now projected, I am in a position to enumerate a few, sufficient for the argument, as follows:—

	Wrought-iron pipes.	
	Miles.	Diameter in inches.
Eastern (New York) States:		
Rochester Waterworks (besides some seventy or more instances unknown to me by name) ... ..	28	36 and 24
Western States:		
Virginia and Gold Hill Waterworks ... ..	7½	12
Cherokee Gravel Mines ... ..	2½	30
Spring Valley Hydraulic Mine ... ..	—	30
Dutch Hill ditto ... ..	—	22
San Francisco, present insufficient supply &c., &c., &c. ... ..	34	30 and 22

San Francisco proposed supply (now under the consideration of their Water Commissioners and Colonel G. H. Mendell, U. S. Engineer of Harbours and Fortifications), among some ten or twelve submitted schemes of all of which I have not the particulars, but all of immense length,—

Blue Lakes scheme, to deliver 40 million gallons daily ...	138	42 and 40
San Joaquin scheme, 25 millions ... ..	81	46
El Dorado scheme ... ..	139	40
Lake Tahoe scheme (I believe) ... ..	153	

All this independently of canal work, which in the Blue Lakes scheme alone is over 50 miles.

So much, then, in proof of the widespread use and development of the wrought-iron pipe system in America. The evidence is irresistible, and yet all the members of the Health and Sewage Commission, and all the advisers of our Government on the water question, have admitted their ignorance of it, and Mr. Clark is silent, except to mention its bare existence.

But I am in a position to go still further on this question of use, and to state that the system is also known in England. I hold the name and address of one firm in the Midland Counties (and there may be others there and elsewhere, for anything that either Mr. Clark or I know to the contrary) which manufactures wrought-iron pipes for purposes of water supply, and that, too, with the very latest improvements, namely, *seamless pipes*, without any longitudinal riveting, and of all sizes up to 36 inches diameter. These are admitted by some American engineers to be even superior to their own pipes, and this English firm has agencies in America, and is now introducing these improvements to the very people who may be called the pioneers of the principle.

To what extent English engineers may yet have availed themselves of this invaluable scientific advance in the matter of water pipes I am not in a position to say; but it is a very remote probability that such a manufacture, working in the midst of an intelligent and observant community, is going on for export purposes only, and without any one knowing it—and therefore I fear that Mr. Clark's statement must be received with much reservation.

Next, as to value and durability. It is unnecessary to compare wrought and cast iron for relative advantages. Mr. Clark admits (Report, page 20) the great superiority of the former in bearing pressure—which pressure it is so desirable to obtain and keep, if possible to be had—and American instances might be quoted, almost without number, as evidence of the extraordinary amount of pressure which wrought iron is capable of bearing. Thus, in the case of the Virginia City and Gold Hill Waterworks, the pressure borne is no less than 750 lbs. to the square inch on a pipe only 34-100th inch thick. The comparative lightness and easy manipulation of wrought-iron pipes require neither admission nor proof. For the purpose of a carrying main, as distinct from distributing or service purposes, wrought iron is superior to cast iron in every point of comparison except in lasting power; and this is now the one point left to be settled, whether or not this power can be grafted on to it.

The asphaltum coating of wrought-iron pipes is no new feature, for, as Mr. Clark says, cast-iron pipes use it equally for purposes of general preservation, and indeed it is among the most valuable inventions of modern times, and it is to California that we owe it. If the coating of wrought iron be perfect and without flaw when the pipes are laid in the trench, it is admitted that wrought iron is as durable as cast; therefore the question simply resolves itself into one of the practical application of the asphaltum coating.

Mr. Clark is evidently not aware that in America *the method of asphaltum coating wrought-iron pipes has been brought to perfection*, as otherwise his objection would have been inadmissible to himself. Up to the time of laying in the trench, the process of asphaltum coating is the same for both kinds of pipe, namely, immersion and boiling in molten liquid, which makes, as Mr. Clark says, an efficient protection. But after that there is a difference. Cast-iron connections are made with lead, and there is little or no concussion, and therefore no abrasion of the impervious coating, so that nothing more is required to be done; but wrought-iron is jointed by double riveting, which necessitates hammering, and therefore cracks and flaws come in the coating at the joints. If these cracks and flaws are allowed to remain, they become the point of attack for the water, and eventually result in corrosion and decay, which is the objection to the wrought-iron system. But if, on the other hand, these are removed, and the impervious coating restored, the objection also is removed; and the following is the description of the mode of doing this—a mode universally adopted in America, an integral part of the business of pipe-laying, and so complete and effective that, the defects and casualties arising out of want of experience once got over, such a thing is now never heard of (except through mere accident) as corrosion of an asphalted wrought-iron pipe.

As soon as a joint is riveted complete in the pipe trench, boiling asphaltum and coal tar is painted on and about the joint, inside and out, by means of wire brushes. The joint is then subjected to the action of circular gas jets inside and out, until the temperature of the iron reaches some 300° to 400° (Fahrenheit). The effect of this heat is to burn the asphaltum in like a japan, and the cracks and flaws entirely disappear, and the pipe regains the same impervious coating as it had before the riveting began.

This

This, added to the instances given of the practical working of the system, seems to me to be proof enough, without more, that the quality of durability or lasting has been successfully engrafted on wrought iron. Therefore, its supremacy over cast-iron is established, since in point of durability only did it fail.

There are some alleged instances of wrought-iron pipes having been taken up, corroded. The only case that I know of, and at any rate the case most spoken of, was at Toronto, in Canada. The champions of cast iron have held up these few instances in condemnation of the wrought-iron system generally, and with as little show of right as all their other objections. The pipes which have been taken up were neither plain wrought iron nor asphalted wrought iron, but *cemented or concreted* wrought iron, namely, pipes prepared under a plan and by a method peculiar to Eastern America, of coating with hydraulic cement. The plan is very effective, if perfect, but the perfection is difficult and unreliable, and the asphaltting process is far before it, and is, in fact, superseding it, and, indeed, I believe that Western America has never used the cemented process at all.

But if, as to the value of the wrought-iron pipe system, there be any readers yet unconvinced, notwithstanding what I say now and have been saying more or less for the last three years, then let them hear what others say. I append three letters, from gentlemen of variously high positions in America, which have been handed to me for general information, and which speak for themselves.

"San Francisco, January 2, 1874.

"To the Hon. Board of Commissioners, Rochester, N.Y.

"Gentlemen,—In answer to your question in regard to the durability of wrought-iron pipe, allow me to state that pipes uncoated, either in or outside, I have known to last for ten years or more. Pipes, though, that we laid in 1861 (22-inch pipe of No. 14 iron), with 100 feet pressure, well coated in and outside, are perfectly sound and in full operation to-day, an examination I have lately made, after about twelve years' working, revealing the fact of their being sound throughout, the iron under the coating having the same blackish blue face as when it left the rolling mill. All the wrought-iron pipes I lately laid, that is 1867, more care having been taken with riveting and especially coating, are perfectly sound to-day, and we expect them to last from fifty to seventy-five years, or perhaps more. On an average a wrought-iron pipe costs us about 25 per cent. of what a cast iron one, of the same interior, diameter, strength, and reliability would cost \* \* \* \* \*

"H. SCHUSSLER,

"Chief Engineer of the San Francisco Waterworks."

"U.S. Coast Survey Station, San Francisco, Cal., April 20, 1877.

"My dear Mr. Bishop,

"If I personally knew any one in Australia to whom I could address a letter in your behalf, I would do so with the greatest cheerfulness and with confidence in you.

"In the special matter which you propose to bring before the authorities concerning the supply of water to the city of Sydney, I am sure you can place before them, with the fullest assurance, the examples in this State of carrying water under extraordinary heads by means of wrought-iron pipe.

"I have personally taken great interest in this matter, because when the first experiments were made I had very grave doubts of its success, not as a question of strength, but of lasting. But the results have been conclusive and convincing to my mind, and we need not hesitate a moment upon adopting wrought-iron pipes of any diameter and length, when the article is properly prepared to resist oxidation.

"Of the very many examples afforded in our 'hydraulic diggings,' you can hardly go amiss in selecting good types, and even in the supply of our town under great difficulties.

"It is upon the success of the wrought-iron pipe system in this and adjacent States that so many projects have been placed before the Water Commissioners for the supply of this city that contemplate the carrying of water under enormous heads for distances of even more than 100 miles.

"After simply naming the pipe part of the system for the supply of San Francisco, I would suggest as good specimens the 12-inch pipe line of the Virginia and Gold Hill Waterworks, with its length of 7½ miles of wrought-iron pipe, under a pressure of 1,750 feet, or say 750 lbs. per square inch.

"Also the pipe line of the Cherokee gravel mines, where the 30-inch wrought-iron pipe line has a total length of 2½ miles, and a pressure of 890 feet, or say 390 lbs. per square inch. I visited the invert of this pipe in 1873, as one of the United States Commissioners of Irrigation. I was hardly prepared for the statement then made, that even small boulders dropped into it were carried clean through it rapidly. But I have no doubt of the fact. When we visited the line it was in capital condition.

"And you should not fail to call attention to those examples where the wrought-iron pipe has been employed to cross deep sharp ravines by suspending it in mid air, where a cast-iron pipe could not have been carried without much greater cost and doubt.

"I could communicate many other less impressive, although instructive, examples that we saw, but you are more familiar with them than I am.

"The results of all Californian experience through many years have convinced me of the decided superiority and economy of the wrought-iron-pipe method; and I do not hesitate to fully endorse it, and would advise its employment in decided preference over cast-iron piping for water supply under large and small heads.

"Your long acquaintance and experience with the subject of water supply entitles your opinion to the largest respect; and I hope you will be successful in establishing it abroad as well as you have done it amongst those who know you here.

"So far as my good will and good opinion will aid you, do not hesitate to call upon me at any time.

"Yours very sincerely,

"GEORGE DAVIDSON."

"Mr. F. A. Bishop, C.E., Hydraulic Engineer,

"El Dorado Water and Mining Company, Placerville, California."

"U.S. Engineer Office, San Francisco, April 23, 1877.

"Dear Sir,

"On the occasion of your departure for Australia, I wish to express the sincere hope that your journey will serve to restore the vigour of health which you seemed to possess last summer.

"I hope that you will be able to interest yourself in the hydraulic operations which I understand are being introduced for mining purposes in Australia. Your long experience in managing these enterprises in California, and in the construction of canals and use of wrought-iron pipe, makes your opinion on these subjects valuable anywhere.

"The use of wrought-iron riveted pipe for the carriage of water under high pressure is almost peculiar to California, and quite so in the subjection of iron to strains of a degree unusual elsewhere. What was at first experiment became, after due experience, conservative and safe, and we now in California have no hesitation in applying strains which as yet will scarcely be admitted where less experience obtains. We, however, use the iron under a steady pressure when high strains are employed, and keep it as free as possible from shocks.

"These wrought-iron conduits are the means through which this city is now supplied with water, and they must so remain, unless superseded by steel, for the reason that the configuration of the country is so uneven as to require a succession of inverted siphons.

"If

"If occasion should arise for the discussion of this kind of conduit in Australia, your observation will supply you with a great many instances in California where these pipes have been in use twelve or fifteen years.

"Your friend,

G. H. MENDELL,

"U.S. Engineer Harbours and Fortifications."

"F. A. Bishop, C.E."\*

Our Victorian neighbours have lately been obtaining still further corroborative evidence on this head. It appears to have been somewhat on this wise. The Sandhurst School of Mines, having become satisfied that something was going on in America which they ought to know, about the carriage of water for mining and other purposes, in wrought or sheet iron pipes, from far distances and under great heads, requested the Victorian Government to send over a Commission of inquiry for the benefit of the mining interests of the Colony generally. The Government refused, so the School of Mines took the matter up themselves. Their delegate, Mr. G. Thureau, has lately returned from California, and is now issuing notes of his researches, preliminary to a more comprehensive report. The first of his series of notes was published in the *Town and Country Journal* of 21st July instant, and will well repay the reading of it. The bulk of this article was written before those notes appeared, yet the two are wonderfully in accord, and singularly enough, some of our instances are identical.

The above collective evidence must carry conviction to the mind of the utterest sceptic. It proves that the wrought-iron pipe system is an existing, accomplished, working fact, and has revolutionized the whole question of the supply of water to towns. It proves that the local advisers of our Government on the water question, and the members of the Health and Sewage Commission, who reported on the Loddon scheme, were not competent to investigate the matter; and,—what I very much more regret to say, yet perforce must say,—it points to the fact that Mr. Clark himself possesses an insufficient knowledge and experience to make him a just judge of the merits of this water scheme. Finally, it completely verifies the truths and principles for which I have so long contended, and substantiates the fact that, as a means of transporting water from far and elevated distances, the wrought-iron pipe system is not a bane but a blessing, and that the cast-iron age is past.

Thus far I have fought this fight in the interest of Sydney single-handed, against those combined leanings and tendencies which would deprive her of much available good. Henceforth, I consider that I should no longer be left, as I have been left, to battle the watch alone, but that I should now receive the countenance and active support of those who are satisfied with the proof, to put a stop to the retrograde movement now being enacted, and to show that, as a body of enlightened citizens, we know what is going on in the world, and intend to have the benefit of its progress.

#### 5. Cost.

Much has been said from time to time about the cost of this scheme, mostly by people who know least about it. Mr. Moriarty, in his evidence before the Health and Sewage Commission, said that the Loddon portion alone (being less than half of the whole, and the only portion that the Commissioners took any notice of) could not be estimated at less than  $1\frac{1}{2}$  to  $1\frac{1}{2}$  million pounds sterling.

Mr. Clark, failing to understand the quality of the scheme, tried to estimate its cost by his "12 million and 6 million increment" plan, and upon that plan arrived at £1,136,000 for 12 million gallons, and £556,000 more for every extra 6 millions, in all £2,804,000 for 30 millions.

Until lately even my own knowledge was indefinite, and I do not blame others for being at sea in their figures, provided they make, as Mr. Clark has, an effort to bring them honestly out; but, on behalf of the scheme, I object, first to the random statements uttered generally on the subject by members of the Health and Sewage Commission, as uncalled for, unsupported, and untrue; and next to Mr. Clark's plan of providing small increments of supply, and estimating the cost of the scheme by those small increments. Whether this plan suits other schemes or not (which I do not believe), it is at any rate foreign to this one, and cannot be entertained.

In a former article (No. II) I showed that the only genuine compliance with the demand of our authorities for an eventual 30-million gallon rate, and the wisest, most comprehensive, and in the end most economical plan, though somewhat heavy at first, is to deliver the required 30 millions from the start, and, therefore, to charge ourselves with the entire cost at once. In my letter to the Government, I seem to have propounded other views, saying that I did not desire to advocate works which might not be required for a considerable time. But I had then considered the question only from the point of view of expense, and not from that of productiveness, and the argument to be drawn from this latter is alone sufficient to engender an alteration of opinion as to the amount of work desirable to execute. Moreover, the experience of other systems of water supply points the same way. I take Glasgow as a type, and in support I quote from a leading article in the *Sydney Morning Herald* of 16th May, 1874, from the pen of a gentleman who is now no more, but whose loss to this community is only equalled by his worth—the late Mr. Howard Reed:—

"Instances are not wanted in which enormous sums of money have been expended upon water-works, the money repaid, leaving the works as a source of revenue to the towns for whose benefit they were made. During the few first years the rates upon property were somewhat heavier, but these in time spread over a wider area, and the result was that the cost virtually decreased in proportion as the use of the water increased. Several cities might be mentioned in which this has been the effect. Aberdeen and Glasgow are striking cases. The facts of the latter being in our possession, we will refer to them.

"It appears that up to the year 1858, the expenditure of Glasgow for water was £651,199. In return for this outlay, the 420,000 people within the bounds of this supply received 16,710,000 gallons daily, or 39·8 gallons a head. This was at the rate of 26 gallons for every pound expended. The domestic rate per pound was (for both sides of the Clyde) thirteen-pence. But at this date the demand for water required additional works. The capital was increased by loans to £1,272,940, or nearly double what it was in 1857, and the expenditure of that year exceeded the revenue by £5,642, the latter being £68,497. The rate the following year was still thirteenpence in the pound, but the capital was increased

to

\* NOTE.—Mr. Bishop, the gentleman to whom these last two letters are addressed, lately came to Sydney from San Francisco, with a view to establish business relations here, and in so doing to give the Colony the benefit of his long and varied experience in those branches of hydraulic engineering for which Western America has become noted. Unfortunately ill health has compelled him to return home, but he was so well pleased with his reception, and so satisfied with the Colony as a new field of operations, that he intends to come back if restored.

to £1,428,452, and the expenditure exceeded the revenue by £14,417—a rather alarming deficit. A continued enlargement of the capital took place in 1860-61, when the limit seems to have been reached. The expenditure was then £83,964, the revenue £75,699, and the rate per pound unchanged. The deficit, of course, was £8,265. In 1861-2 the deficit merely amounted to £5,000. An extra two-pence in the pound in 1862-3 brought about a change, and, in place of a deficit, left a surplus of £2,539; and a continuation of the same remedy yielded a surplus of £7,022. In 1864-5 there was a return to a thirteen-penny rate, and yet a surplus of £5,292. During the following five years a shilling rate sufficed—the surplus in 1869-70 being £17,519. The year following the rate was reduced to nine-pence, and in 1871-2 it stood at eight-pence—the money expended on the works having been £1,706,306, the annual expenditure £109,014, and the income £110,780.

“This affords an excellent example of what may be reasonably expected in all cases of towns destined to become the centres of manufacturing industry. It would be impossible to say in what degree the foresight of the Corporation of Glasgow has contributed to the spread and importance of the city by this judicious expenditure of money, but it is clear that Glasgow could not have been what it is without it. It must be equally apparent to any one who surveys the position and prospects of Sydney, that we are justified in making preparation for a spread of the population. The city would be experiencing the benefits of the change before they had time to feel the weight of its cost, and finally, consideration of cost would fade before countervailing advantages.

“It is a question whether we shall provide for or check the disposition to grow; whether we shall rely upon such experience as we have presented from Glasgow, or as might be presented from Melbourne (for we understand that the works there are now paid for, and no longer exist as a burden upon property); or whether we shall be contented with some cheap and temporary scheme, which will be sure to fail when we most need it.

“We want water for houses, water for streets, water for manufactories, water for fountains, water for fires, a supply from a source equal in all these particulars to the wants of 500,000 people prospectively. Are we to content ourselves with barely enough for household and street use? It is clear from the above figures that a spirited endeavour to make the supply adequate to the growing wants of Glasgow, although burdensome at first for two or three years, is becoming less and less so each year, and will cease finally to be a burden at all. The same experience may be ours if we make a judicious use of the means at command.”

This language of our lamented friend is almost prophetic, and commends itself to the respectful attention of every reader. It is opposed to the principle of Mr. Clark's work, which provides only sufficient for the day, and distinctly points to the nobility of the Loddon and Wingecarribee, or any other plan which will provide superabundance at the outset, so that people may learn its value, and grow to it.

So far, then, as this scheme is concerned, it is entirely settled that its cost is the cost of delivering 30 million gallons daily from the beginning. In my letter to the Government, I stated this to be, in round numbers, a million and a half of money. I own that I could not then have substantiated the figures in any detail, but I knew enough to tell me that I was not very far out. Since then there has been great accretion of works proposed, notably in the shape of increased storage accommodation, and such augmentation of works means a corresponding augmentation of price. Since then, also, I have gained more definite knowledge as to cost, and have now arrived at an ultimatum in the matter—which is, that 30 million gallons daily can be delivered at Waverley for two-pence per 1,000 gallons, and the cost of the scheme is the capitalized value of that two-pence at 5 per cent., or £1,825,300, plus some trifling compensations, which will be matched by the sale of the useless city reservoirs, and interest at 5 per cent. on the money expended during the time of building, five years maximum.

I promised in a former article (No. III) to ascertain the true minimum cost of the Nepean scheme, when elaborated to a 30-million gallon rate, with interest added. At prices admittedly too low, I found £1,629,932, with every probability of the cost reaching £2,000,000. Giving the scheme the benefit of the doubt, it will cost at least the £1,825,000 above found to be the cost of the Loddon and Wingecarribee. The latter scheme having been charged with interest for its time of building, five years, the Nepean scheme must also be charged interest for its time of building, ten years. Since the Loddon and Wingecarribee will be ready to deliver, and therefore earning, at the end of five years or sooner, the interest for the difference between the respective times of building, viz., five years, must be charged against the Upper Nepean scheme, and added to the principal sum as capital, and interest be then charged upon that whole sum for the remaining five years. Therefore the whole cost of the Upper Nepean scheme is at least £1,825,000, plus £456,250, or £2,281,250, plus interest for five years building.

The claim of the Upper Nepean, that it can begin to supply earlier by supplementary works, even if true, does not reduce the general cost, since the cost of the supplementary works themselves would probably be more than equal to the interest for the difference of the years. In this respect the Loddon and Wingecarribee has a far superior merit, in that the Loddon portion, delivering from 9 to 12 million gallons daily, can be finished complete in three years.

Thus we find that the Upper Nepean scheme would cost altogether more than the Loddon and Wingecarribee by nearly half a million of money, and would then be a much inferior scheme in almost every point of comparison, and I doubt if any one could be found to contract for the building at the price. Therefore, I have brought forward a scheme which will cost less than that recommended by the professional engineers, and the Upper Nepean is out of Court on the question of cost.

But with regard to the Loddon and Wingecarribee scheme, not only can it be constructed for the money stated, but more than that, *it will be done*, if the Country will sanction the work. The able article from which I quoted above contains the following remark:—“What a boon it would be if some one would relieve us of the difficulty of solving the water question for Sydney, by appearing with a scheme in his hand and commanding its immediate execution.”

I come with this scheme in my hand. I do not command its execution, for ours is not a despotism, and if it were I am not its despot. But this scheme already commands the attention and confidence of large and various bodies of capitalists, ready and willing to embark in the work, and it only remains for the Government to signify willingness to treat, and its execution can become a fact upon the above terms.

I have now finished the discussion of the Loddon and Wingecarribee scheme. I have found it to be a scheme possessing not only equal but far greater power of supply than the Upper Nepean, great special merits to which the other has no claim, and its alleged defects, so far from being defects, are actual boons.

These

These papers are not by any means exhaustive as to either scheme, and from many points of view, Mr. Clark's Report itself requires considerably more handling. But I cannot trespass longer upon the patience of the reader, and abstain from further investigation. I will now epitomize and contrast the two schemes, and conclude my review.

### III.—UPPER NEPEAN AND LODDON AND WINGECARRIBEE SCHEMES CONTRASTED.

ART. VII.

It is clearly understood that dry times and minimum rainfalls are the only phases of climate which can be taken notice of in examining the merits of water schemes, and it is upon such phases only that all the calculations, both by Mr. Clark and me, have proceeded.

It has also been seen and well understood that a 30-million gallon daily rate is the prescribed rate of any scheme for supply of Sydney, and therefore all statements, investigations, and comparisons must be made upon this basis, and they have been so made throughout these articles.

A selection of all the features, good and bad, of the two schemes which we have been considering, results in the following epitomized comparison:—

#### I.—UPPER NEPEAN.

1. Supply, 30 million gallons daily for ten months only, viz., eight months from store and two months from flow, and thereafter the reservoir is empty, and the subsequent supply is only influx less evaporation, 8 millions daily maximum and diminishing, if the eight-months' minimum rate of rainfall last beyond eight months.

2. Storage, 7,110 million gallons, held in one reservoir only, an immense work, of very doubtful security, and no balance of safety provided in the event of casualty, and the prospect of a water famine in such event, besides terrible damage to property in the neighbourhood.

3. Poor gravitation and low delivery, requiring to be supplemented by pumps to reach the high levels of the city and suburbs, resulting in low and uneven pressures, and necessitating an elaborate system of town and suburban reservoirs (six on the Sydney side and one on the North Shore), and costly service mains and large reticulations.

4. Dull, lifeless water, and cloudy, unless prevented by filtration, the works for which would require an amount of gravitation which the scheme cannot afford to spare, having only just enough head of water to enable its waters to reach the distributing reservoirs.

5. Insufficient power of collecting water, owing to dependence for supply on a canal of limited draught drawing upon a river of ever-varying flow, resulting sometimes in unavoidable waste of river flow, which would otherwise be available for store, at other times in insufficient supply of river flow to keep the drawing power of the canal occupied.

6. No margin of storage power over the period of a comparatively likely drought, viz., eight months, and only two months' supply in the meanwhile from flow to help it out, and therefore comparative probability of frequent trial.

7. No security against fires, or power to extinguish.

8. Obligation of the scheme to preserve Nepean vested water rights, and provide compensating supplies—thus rendering its success dependent on the effectiveness of a compensation dam of very doubtful power, and possibly necessitating eventual abandonment of the scheme on the failure of the compensation dam to effect the necessary purposes.

9. Cost of scheme, £2,281,250 minimum, or not less than 2½d. per 1,000 gallons, plus interest for five years building, and no end of trouble to get the work executed.

10. Unequal water rates between the high and low levels, surely not to be tolerated under the circumstances of this city; but, whether or no, arising out of the necessity to pump.

#### II.—LODDON AND WINGECARRIBEE.

1. Supply, 30 million gallons daily for practically an unlimited time, viz., fifteen months from store, and fifteen months from flow, and the flow overbalances the draught, and, therefore, once full always full and wasting, unless the fifteen months' minimum rate of rainfall last beyond fifteen months.

2. Storage, 13,893 million gallons, held in chains of safe reservoirs, the works for which are moderate, and a perfect balance of safety preserved, and no risk of water famine possible, and no neighbouring property to damage even if a casualty happened.

3. Good gravitation and high delivery, reaching every height of Sydney and suburbs of its own natural force, with an even uniform Waverley pressure, and no city or suburban reservoirs at all required except one at Waverley and one at North Shore for distributing purposes, and a comparatively cheap service system. Hydraulic lifts, available all over the city, and public baths and fountains throughout the city and suburbs.

4. Living, sparkling water, pure and cold, from a clean mountain country, and abundant room to filter without diminishing the high pressure. But filtration will not be nearly so necessary as in the Nepean case, and indeed not needed at all.

5. Maximum facility for collecting water, there being no escape for any portion of the rainfall except over the dams when full.

6. Storage power equal to a comparatively unlikely drought, viz., fifteen months, and helped out by fifteen months' supply in the meantime from flow, so that the scheme could stand out longer than the longest drought on record.

7. Perfect security against fires.

8. No vested water rights to conserve, nor compensating supplies to provide.

9. Cost of scheme, £1,825,000 (and a few trifling compensations which the sale of the present city reservoir would balance), equal to 2d. per 1,000 gallons, plus interest for five years building. No trouble about getting the work done, there being contractors ready to take the whole thing up.

10. Uniform water rates, and no risks with pumping machinery.

11. Collateral advantages,—an irrigating plan of very dubious success, and to a large extent impracticable.

11. Collateral advantages,—a power to create another manufacturing centre in the Colony besides Sydney, viz., Wollongong, only dependent upon the same contingency as industry generally, viz., a reasonable labour rate.

This comparison requires no comment, but is the proof itself of the inferiority of the recommended scheme, and therefore, *the Upper Nepean must take rank as a rejected scheme.*

This question naturally rises to every reader's lips,—“Why did we not learn all these things from the report of the Hydraulic Engineer?” The answer will not be palatable to all readers; but the public interest demands it, and though an unpleasant duty I must not shrink from it.

The Water Commission of 1869 was appointed to inquire into the best water supply for Sydney. Its members were, as is well known, Lieut. Woore, R.N., Professor Smith, Mr. F. H. Grundy, C.E., Mr. Adams, Surveyor General, and Mr. Moriarty and Mr. Bennett, engineers and hydraulic advisers of our Government. After taking voluminous evidence, they found no other than the Upper Nepean scheme which seemed to them worthy of development. Even had they discovered the Loddon and Wingecarribee scheme, they must have passed it over, at any rate, for the time, for cast-iron mains would be quite unequal to bearing its high pressure, besides being untransportable in mountainous country, and they knew nothing at all about wrought-iron mains, or of any means of getting water down from such heights except by letting it run down to the low levels by its own natural channels, and thus losing the quality of gravitation which they were so desirous of finding. Portions of the Loddon and Wingecarribee, in fact, become portions of the Nepean when its waters are run down to the low levels and the gravitation lost. Accordingly, with little wisdom, the Water Commission spent all its money in elaborating the Upper Nepean scheme, to a large extent wastefully, and recommended it to the Government for acceptance.

For the reasons which would have prevented the Water Commission from accepting the Loddon and Wingecarribee scheme even had they known of it, for the same reasons Mr. Clark, who did know of it, was obliged to reject it, even had he been able to find no other reasons or ground of objection. As has been already sufficiently shown (Article No. IV) the wrought-iron pipe system is the soul of the scheme, and to both the Water Commission and Mr. Clark that system is a foreign tongue.

Of the members who represent the Report of the Commission there are now virtually but two persons. Mr. Woore resigned rather than be a party to it. Professor Smith, President of the Commission, acknowledged his disagreement, at the Royal Society meeting of 9th December, 1874, on the occasion of my reading my first paper on water supply for Sydney, and stated that he was in a minority among the Commissioners, and that he was mainly instrumental in procuring the insertion of that clause in their Report which called for scrutiny and criticism, and admitted the possibility of superior discoveries. Mr. Grundy, in his own Report to the Commission, disagreed with the scheme, so far as the reservoir portion of it is concerned, and that is nine-tenths of the whole. Mr. Adams is and always has been neutral, and for that reason, among other good ones, was very properly selected as Mr. Clark's guide in his official inspection of the water schemes. The Government Engineers, Mr. Moriarty and Mr. Bennett, are the only ones left; all the others have virtually deserted the scheme of the Commission.

Between the recommendation and elaboration out of a public vote, the Nepean became called “the Government scheme.” It was a false name, for the Government had no right to be a partisan, and could have no scheme at all except the one that should eventually be shown to be the best. But the name being once given, stuck to it, and imparted a semblance of tone and quality to which the scheme was not entitled; and as the hydraulic credit of its promoters depended on it, although they knew that the appellation was wrong, they could scarcely be expected to correct it.

It has also been called “the Commissioners' scheme,” because it emanated from the body of the Water Commission. This is no more its proper name than the other. *There is no such thing as a Commissioners' scheme*, for all the Commissioners did not agree to it—though they all signed it (I may be allowed to say unwisely) except Mr. Woore.

The Upper Nepean was quite as much a private scheme as the Loddon and Wingecarribee, or any other scheme promoted—the only and great difference being that the promoters had public money to promote it with; and its real fathers and promoters were the professional hydraulic advisers of the Government, and it is their private scheme and nothing else; and the proper name by which it ought to be called is, “the scheme of the Government Engineers.”

Since that time other schemes have been discovered, more or less deserving of notice, among them the Loddon and Wingecarribee, which is the only one with which I have to do; and as to this one, it is well known that, owing to its thorough gravitation and other manifest virtues, a large portion of the current of public opinion set in its favour. Therefore this scheme at least, if not others also, was entitled to as thorough an investigation as the Nepean received, and this one still more so, because it possesses in a peculiar degree that very quality of gravitation which the people had asked for through the Commission.

But the Water Commission, or rather all that was virtually left of it, namely, its most active members, the Government Engineers, being themselves the promoters of the Nepean scheme, had identified themselves with and become wedded to it to the exclusion of all others—not only those that were before them at the time of making their Report, but also those that were of subsequent discovery. Moreover, they had spent all their money, and, even if willing, they were not able to do anything for any other scheme.

The Health and Sewage Commission of 1876 was appointed for various purposes, among others (I presume, since they assumed the power) to take additional evidence on our water systems, for the benefit of the expected Hydraulic Engineer. It consisted, among other members, of all the members of the Water Commission except Mr. Woore, and I am not aware—and at any rate the result does not show—that the new body contained any more hydraulic knowledge or ability than the old one, except that among its members were Mr. Whitton, who accepted neither office nor emoluments, and Mr. Bell, whose attention has been confined almost exclusively to the Botany system of water supply. It echoed exactly the same sentiments upon the Nepean scheme as the Water Commission; and as to the Loddon scheme—the only new one which it attempted to examine—it uttered sentiments of which the less said the better, and which received their fit reward at the hands of the first assemblage of gentlemen in the land.\*

\* See the debate on their Report in the Upper House, 30th March, 1876.

These

These things point to a murky atmosphere and a gloomy prospect for our civic affairs. There are three things shown—first, that the Upper Nepean is a bad scheme, at least as compared with the Loddon and Wingecarribee, and perhaps others; next, that the Government engineers are its fathers, and, as such, interested in its maintenance, because their hydraulic credit depends upon it; and lastly, that with the Government engineers on every Board and Commission, their Nepean scheme always comes uppermost. What is the deduction? Plainly this—first, generally, that such Boards and Commissions as hitherto constituted are valueless for the protection of public interests; next, particularly that the influence of the Government engineers, exerting itself on such Boards and Commissions, predominates and rules and carries the day in favour of the bad scheme which the Government engineers have promoted—and so the “sick man” among the water schemes wins, because the other schemes are handicapped in the competition.

That which is true in the past and present will prove to be equally true in the future. The same influence will be found operating on all subsequent Boards and Commissions, unless some radical change of the system be made. The Central Board of Works, or Commission, as suggested by the Health and Sewage Board, and endorsed by Mr. Clark, for management of water supply and drainage, although itself good in the abstract, yet as a matter of practical effect will be no good whatever, unless it be constituted of widely different material from that which constituted the Health and Sewage Board itself. However efficient such bodies may be for executing works which others decide upon, for the purpose of themselves deciding upon the works, they are not to be trusted.

It is time that our body public roused itself from the lethargy and sleep which pervades it on all these matters; and if they fail to do so after the hint being so broadly given, they will stand finally convicted of Mr. Garrett's terse reproach, of being “a very prosperous and a very stupid people.”

To return. The meaning of all this is, that nothing but the Upper Nepean scheme could get a hearing, the people who were appointed to hear having turned a deaf ear to all others. And not only no hearing, but no help. Knowing the intrinsic value of the Loddon and Wingecarribee scheme and its incalculable worth to Sydney, I applied repeatedly to the Government for assistance to develop its features and put it into proper shape for inspection. All that I was ever allowed (independently of some printing) was the services of one surveyor for a week—and that, thanks only to the courtesy of the then Premier (Sir John Robertson), and in direct opposition to the Health and Sewage Board; and the result of that isolated piece of work was to disprove certain statements made by some members of the Board, and to verify my counter statements.

Finding that I could get nothing at all done for this scheme, I did the best I could myself, and I spent my own time and labour and money for a public object to an unwarrantable extent—rather than I would see a valuable scheme shelved, because it possessed merits which endangered the safety of the scheme of the Government engineers.

The result and value of my work, viz., the plans, sections, data, and every sort of information which I laid before Mr. Clark, was simply this: it had no pretensions to being sufficient for purposes of construction, and, compared with the herculean labours expended on the Nepean elaborations for construction, it made no show whatever; but, for the only purpose which was necessary, and which could be expected from the promoter of any scheme—viz., to enable any inspector to see all over the scheme from one end to the other, and know what there was in it, and what could be made out of it, to sound the key-notes from which the chords could be struck, and to point out the scent from which the hunt could be followed—my work was abundantly sufficient. It is upon that work, and no other, that other people have become as perfectly master of the scheme as I am; and it has been held to be quite enough for the purposes of estimate and contract, and to warrant the investment of money and the staking of reputation and means.

But, for the purposes of Mr. Clark's vision, it appears that my work was insufficient. He says that the Upper Nepean scheme has been elaborated and investigated in considerable detail, but that the plans and data with which I had furnished him are necessarily very incomplete. In other words, the projects were summoned to trial, but in the Nepean case only was the evidence for the defence sufficiently got up for him.

This was an improper condition for things to be left in, and one under which no righteous judgment could be expected from Mr. Clark. He therefore had only two consistent courses before him, viz., either to declare for the Upper Nepean at once, upon the elaborations shown, or to defer judgment until better investigation of the others. He could not, and did not, do the first of these, for it would have been tantamount to admitting that he came out to Sydney for nothing. His plain duty, therefore, was to do the other; and the question is—did he do it or not?

So far as the Loddon and Wingecarribee scheme is concerned, he did not do it. After all the difficulties which I have had to contend with, and all the injustice which the scheme has suffered, I naturally looked, when he brought his independent judgment to bear, that at last this unfortunate and ill-used scheme would be heard, and that my labours, well begun for the general good, would be as efficiently carried on, and that any insufficiency in my data would be supplemented, so that the scheme might have a just and thorough searching, and its merits and faults be critically examined and brought to light. But, as a matter of fact, nothing of the sort was done. Mr. Clark made no effort to improve or complete my plans and data, or to find out what the scheme was capable of, although his power was plenary, and the survey staff of the Colony was placed at his disposal for the purpose, and his instructions were to use his opportunities of observation. I was once applied to for further surveys, as if this was a private affair of my own; and when I referred the application to the Government as the proper person to ask, the matter was dropped. Considerable sums of public money were expended over others of the schemes submitted, as stated by Mr. Clark in his Report, and even over the Upper Nepean itself, already so elaborately investigated, but none on the Loddon and Wingecarribee. Even those very virtues of the scheme which were patent to the eye, independently of nicer investigation by survey, which were more or less seen, discussed, and admitted at the time of official inspection—even these have been passed over in silence, and the Report on the subject reads as if they had no existence. Worse still, the scheme has been charged with faults which are no faults at all, but cardinal virtues, and the very grounds out of which rejection sprung should have brought it in the accepted scheme.

I have yet to learn how these facts can be reconciled with Mr. Clark's published statement, that he has endeavoured to weigh all the schemes submitted fairly upon their merits.

Finally, every line of the records of this scheme is a history of the contest between progress and stagnation

stagnation in hydraulic science. The Upper Nepean is of the old order of things, good enough if nothing better can be had, and at least much better than nothing; but the march of discovery has put them in the back ground. The Loddon and Wingecarribee is of the new order, a type of the advanced ideas, a sample of those things which fresh enlightenment has placed at our command, but which under formerly received opinions were quite beyond our reach. In the position which Sydney now occupies, pausing before a great social question, and weighing the arguments as to what course to pursue, it will be a permanent blot upon her escutcheon if she fail to avail herself of the new lights of hydraulic science.

I therefore now state it to the public as a proved fact,—*the decision of the Hydraulic Engineer on the Sydney water question has been given without evidence, and against the weight of evidence.* Hence the community suffers. Whether the people know it not, and whether they will listen or not, I tell them that the seeds have been sown of a great misfortune, and that its only cure is timely uprooting, and its certain fruit, if allowed to go on, will be universal disappointment. If the people desire to protect their own best interests, they must adopt one or other of two courses, viz., either to have the whole water question reconsidered, or to take the short cut to success which the people of Dublin and Glasgow took—they carried the two best schemes in Britain in direct opposition to their advising engineers.

I am not well versed in the history of the other water schemes before the public, my own and the Upper Nepean being quite enough to engage my attention; but if any of them can show such good qualities as the Loddon and Wingecarribee has shown, and can prove such wholesale neglect as the Loddon and Wingecarribee has proved, then, for the good of the community, it is the duty of their promoters to show it as I have.

I trust that this review will not be taken as a controversy between me and the Hydraulic Engineer. I have been obliged perforce to cross his views, and that in no mild way sometimes; but not out of hostility to him, and only as an enforced guardian of the interests of our citizens, that they may ensue the good and eschew the evil scheme. So far, indeed, as Mr. Clark is personally concerned, I take the liberty of expressing my regret that he has linked his name with such a scheme.

I have no more to say. The Water Commission concluded their Report by inviting scrutiny and criticism, and at last, though late, they have had it. I, in my turn, invite scrutiny and criticism of mine; and if any one is able to upset my position, for the general good, I call upon him to do so.

JAMES MANNING.

#### APPENDIX No. 1.

##### OFFICIAL PARTICULARS OF THE LODDON AND WINGECARRIBEE SCHEME.

James Manning, Esq., to The Colonial Secretary.

Sir,

Sydney, 15 November, 1876.

In compliance with the request contained in your letters of the 22nd May and 29th September last, I now proceed to give a concise statement of my scheme for the supply of water by gravitation to Sydney and suburbs.

I desire this paper to be read in connection with my previous papers on the subject, read before the Royal Society of New South Wales, which are already in your possession. Wherever diversities appear, they are to be understood as having arisen out of the further development and extension of the general plan, of which the statements herein made are the true exponents.

The whole project, in its entirety, consists of two distinct schemes; one a high level, the other a low level scheme. My remarks will be mainly directed to the first, as in the events which have happened, I do not, comparatively, attach much importance to the other.

The high level scheme is in two parts or sections, viz. :—

1. Loddon and Madden's Plains.
2. Wingecarribee and Kangaloon.

The low level scheme is of one part only, viz. :—

Port Hacking River.

All these three plans are distinct in themselves, and any one of them is practicable and constructable without reference to the others. The Wingecarribee and Loddon schemes, however, can with the utmost facility and to the greatest advantage be worked together, and are by nature so homogeneous and concurrent that so far as their practical results are concerned they could not be distinguished. The Wingecarribee and Kangaloon is simply a distinct adjunct of the Loddon and Madden's Plains, available as part of it at any moment when required, but not needing to be dealt with until required. They are, therefore, properly conjoint. The Port Hacking River scheme, on the other hand, is without this advantage, and being hundreds of feet lower than either the Loddon or the Wingecarribee levels, its waters cannot be delivered at anything like the same elevation. It is, therefore, necessarily and properly separate.

#### I.—HIGH LEVEL SCHEME.

##### PART I.—LODDON AND MADDEN'S PLAINS.

Commonly known by the name of the "Loddon scheme." As to the ability of this scheme, I have personally no doubt whatever that it would be sufficient to satisfy the wants of Sydney for many years to come. For four months of the year, the dry season, at the summer level of the streams, it would deliver at Waverley (the highest point within miles of Sydney, and considerably upwards of 300 feet above sea level), with storage help, 9,000,000 gallons daily—a quantity quite double the present Sydney supply, and equal, I believe, on an average to the supply of the best watered cities in England, but not up to the nominal 12,000,000 gallons spoken of by the Water Commission. During the remainder of the year the supply is far greater, and to increase the summer supply, so as to equalize it over the year up to the stated 12,000,000

12,000,000 gallons, it is only necessary to increase the storage. The works could be constructed in three years at most, at a cost of about £600,000, exclusive of compensations, which are of a trifling nature. Lastly, the waters are of the purest quality, and of sparkling brightness, coming as they do from a sandstone country, free from impurity of every kind.

This section is divisible under three heads or branches—namely, watersheds, reservoirs, and conduits.

#### 1. Watersheds, or gathering grounds.

1. *Loddon watershed.*—This is an area of 3,218 acres measured, on the west side of the Bottle Forest Road, and some 200 acres unmeasured between the Bottle Forest Road and the sea cliffs between Bulli and Coal Cliff.

2. *Second Loddon watershed.*—This is an area of 938 acres measured, lying between the previous watershed and the Wollongong and Appin Road, and closely abutting on the Loddon Bridge.

These two watersheds constitute what is commonly known as the "Loddon basin," measured to the extent of 4,156 acres, besides some unmeasured additions.

There are some 3,000 acres of watershed close by, arising from Knight's and Reeve's Creeks to the south-east of the Loddon Basin, and from the country immediately abutting on the Wollongong and Appin Road (of which 783 acres are measured), all of which can without any engineering difficulty be brought into the second Loddon watershed, and be there utilized as if it were directly part of it.

By further ditching to the southward and by simply grading of levels, the water falling upon an additional area can be brought to the same destination; but I do not think it is necessary to extend this system any further than as previously stated.

3. *Madden's Plains watershed.*—This is an area of some 1,500 acres lying to the east and west of the Bottle Forest Road, to the north of the Loddon watershed. By the assistance of simple but adequate storm-water dams, these waters can be easily intercepted in their natural western course, and be diverted north into a short sloping underground conduit of about 30 yards, which would lead into the main tunnel to be hereafter described.

4. *Waranora watershed.*—This is an area of about 1,000 acres lying to the north of Madden's Plains. These waters trend north, and by simply deflecting to the eastward the course of the canal conduit to be hereafter described, they fall into it in their natural course.

These above-named four watersheds constitute the body of the Loddon scheme, being a total collective watershed of at least 9,000 acres, or upwards of 14 square miles. The first and second belong to the Nepean system of waters, the third and fourth are tributaries of George's River.

This is a suitable occasion to remark upon the superiority of small watersheds over large ones. All over the world the best systems of waterworks are those whose catchment areas are sufficient to provide ample supplies, yet are not so large as to be unmanageable. Mr. Hughes, F.G.S., C.E., the writer of the well-known work called "Waterworks," and himself a great authority upon all water matters; has the following remark on the subject:—"It is now generally admitted that immense gathering grounds of several hundred square miles are not adapted to furnish large concentrated supplies of water, in consequence of the numerous difficulties and expense of collecting them."

It is also noteworthy that several of the best systems of waterworks in Great Britain are derived from small watersheds. Thus:—

*Liverpool*, with 493,000 inhabitants, is principally supplied from the Rivington district, with 12 million gallons daily; the drainage area is estimated at 10,400 acres, 120 days' consumption is stored in the reservoirs, and of the mean annual rainfall of 46.23 inches, 436 is saved. It is true that the population has now quite outgrown this supply, but that is no argument against its efficiency.

*Plymouth*, with 71,000 inhabitants, is supplied from the Dartmoor Hills, having a drainage area of about 4,000 acres, the average annual rainfall on which is found to be 44 inches, of which 343 comes in for town supply.

*Greenock* is supplied from a drainage area of 5,043 acres; the average rainfall on which is 60 inches, of which 603 has been observed to run into the reservoirs.

*Dublin*, with a population of 340,000 in 1867, now receives its supply from the river Vartry (30 miles off, from a high level in the county of Wicklow), which off a drainage area of 14,000 acres furnishes 20 million gallons daily, besides compensation to mill-owners. The storage reservoirs are capable of containing 120 days' consumption at the above rates, and of the mean annual rainfall of 60 inches 402 is saved.

This Dublin water supply, initiated and promoted by Sir John Gray in the teeth of a determined opposition, was thus spoken of in March, 1876, by Mr. M. Brooks, M.P., in the House of Commons:—"By these admirable waterworks an ample supply is brought into the city from the county of Wicklow, a distance of nearly 30 miles, and distributed not only in the city but throughout the suburbs for many miles. I think I may say that in the whole world there is not a better or more efficient supply."

The circumstances of our own city tell strikingly in favour of this contention. The consumers of city water in Sydney and suburbs are, roughly estimated, something over 100,000 souls. The watershed which has supplied them, if not bountifully, at least sufficiently, and which has shown a staying power beyond all belief, is only 4,250 acres.

The maximum discharge of the watersheds which supply the above-mentioned British towns is 60 per cent. If, then, the general watershed above described had only the same discharge, the fact that these towns are sufficiently supplied by their systems is proof that Sydney, at its present size and larger, would be sufficiently supplied by this system. But not only have we here a discharge of 60 per cent., but late gauging experiments made by me in the Loddon River after ordinary rains show beyond a doubt a discharge equal to 70 per cent. That there are such places in the world having such discharges, the celebrated engineer Bateman is a distinct authority; and if there be any such place, the Loddon country, from its spongy character and saturated stratifications, is best calculated to fulfil the conditions.

#### 2. Reservoirs or storage.

1. *Loddon Lake.*—This is an area of 408 acres, receiving all the waters of the first Loddon watershed, and proved by survey, and average depths estimated from cross sections, to be capable of storing 1,446,000,000 gallons minimum. It is constructed by building a concrete dam 55 feet high and 25 chains long over all, across a narrow and rocky gorge in the Loddon River, at a height of 1,121 feet above the sea. There is no engineering difficulty in its construction, there being many similar works in the world.

This

This is the storage reservoir of the Loddon scheme. It may take twelve months at most to fill in a dry season, but in a wet one much less time. When full it will hold 120 days' supply at the full rate of consumption of 12,000,000 gallons daily, but at the lesser rate, 160 days. It is not to be supposed that these figures represent the limit of the capabilities of this reservoir. The acreage, cubical contents, and storage supply above stated, are the product of a dam 55 feet high only. The last 5 feet have added 42 acres (a former survey having shown 366 acres for 50 feet) and another 5 feet would probably add far more. There is no sound reason against raising the dam much higher than I have at present fixed it, nor any difficulty in increasing the storage to any desired extent, and every drop of the store would be available and fit for consumption. There are other storage reservoirs besides this available, but I have not thought it necessary to amplify them here. I may, however, specially mention one feasible on the Madden's Plains watershed, capable of holding at least a month's supply at highest rates of consumption, and possessing great facilities for augmentation.

2. *The Tunnel Reservoir*, so called because it is the starting point of the tunnel, which I shall describe hereafter. This is an area of 37 acres, abutting upon Loddon Lake, and in connection with it by proper waterways. It is formed by a small dam 20 feet high and 8 chains long, put across another narrow gorge of the river at a point 42 chains distant from the upper dam, and at a level of 12 feet below the floor of the Loddon Lake. This reservoir receives all the waters which come into the second Loddon watershed, besides the overflow waters of Loddon Lake. It is a feeding reservoir, supplying and regulating the supply to the conduits. It is capable of large augmentation like the Loddon Lake, and in wet seasons it and the Madden's Plains and Waranora watersheds will supply Sydney by themselves. Indeed the late Sir Thomas Mitchell, who is looked upon as an authority in these matters, credited these sources of supply with even more effectiveness than I do.

3. *The Waverley Reservoir*.—A small covered reservoir for receiving the waters from the high-level conduits, and for distributing the water to the city, suburbs, and surrounding country (North Shore and Balmain included). To be situated, as its name implies, on the highest available point of Waverley, and to be large enough to hold not less than 2,000,000 gallons.

### 3. Conduits.

From the floor of the tunnel reservoir, at a height of about 1,111 feet above sea level and about 10 feet below the outlet of Loddon Lake, the waters are let into a tunnel, and proceed by that tunnel about  $3\frac{1}{2}$  miles very nearly north; thence by an open aqueduct about  $4\frac{1}{2}$  miles, by a tortuous course, mainly northerly and easterly, to a point about 1,062 feet above the sea level on the Bottle Forest Road, where the Port Hacking River sources begin to form; thence by wrought-iron piping of suitable diameter through and over every obstruction for a distance of under 32 miles to the Waverley reservoir.

There are no practical obstructions to the laying of this pipe line. The chief difficulty to be overcome in its course is George's River. This need not be regarded as an obstruction, as it can be easily surmounted by means of proper turpentine pile supports, which can be made to serve the double purpose of a traffic bridge.

From Waverley the city and all the suburbs and surrounding country could be commanded and supplied by direct gravitation, with a head of water of more than 300 feet above sea level, after releasing the pressure of 750 feet in the mains at the reservoir.

## PART 2.—WINGECARRIBEE AND KANGALOO.

The so-called "Wingecarribee Swamp" is situated at a height of 2,230 feet above sea level, about 36 miles south from the Loddon basin, by the course along which water can be conducted. Its formation is peculiar, and can only be described as a great water basin, evidently a trachytic formation produced by igneous eruption in past ages. It is 6 miles in length, and of various widths, from 60 chains downwards: its surface is 1,170 acres measured, and its average depth is about 20 feet. Its surface is more or less covered by a dangerous quaking bog, bearing only water plants and mosses. It has a watershed of  $18\frac{1}{2}$  square miles, or 11,840 acres, all consisting of high volcanic ranges rising from 300 to 500 feet above the lake. The natural outlet of these waters (which, in point of purity, cannot be surpassed) is westward by the Wingecarribee River into the Wollondilly, and thence into the Lower Nepean by Warragamba.

These waters could be brought eastward into the head of the Upper Nepean River by a tunnel of about  $1\frac{1}{4}$  mile in length, through the range which separates the watersheds. This tunnel would start from somewhere at the eastern end of the Wingecarribee Swamp, where its inlet would be at the bottom levels of the swamp; then it would perforate the range towards Kangaloon, and open into a tributary of the Mittagong River, one of the main streams of the Upper Nepean. Thus the Wingecarribee and Nepean waters would meet and the point of junction would be about half a mile above Howell's Bridge across the Mittagong River, which stands at an elevation of about 2,030 above the sea.

The Kangaloon watershed forms the sources of the Mittagong River and its top tributaries, and also Wombat Creek, Little River, and Molly Morgan's Creek, all permanently running streams, and, at the elevation at which this scheme can avail of it, it has a collective area of rather more than 14 square miles, or 9,000 acres. I shall presently show the mode of utilizing this watershed and the supplies arising therefrom.

At a little distance below the meeting point of the Mittagong River and the Wingecarribee waters there is a fine site for a storage reservoir. A simple crib and earth dam, 29 feet high and  $11\frac{1}{2}$  chains long over all, would throw back a sea of water second only to the Loddon Lake. Considering the immense, I might almost say inexhaustible, natural storage in the Wingecarribee swamp, I cannot see how this reservoir will ever be needed; but if it should be wanted, or if it should at any time be thought a desirable addition to the scheme, it is available at a moment's notice.

In the Mittagong River, at a point about half a mile below Howell's Bridge, or at any other neighbouring point thought preferable, according to the exigency of the levels, an ordinary weir would be constructed, to turn the waters into an open canal or ditch. By this conduit and one short tunnel they would proceed in a north-easterly direction, contouring Mount Butler and the other natural features of the country by a moderately winding course, cutting and gathering *en route* the supplies from Wombat Creek, Little River, and Molly Morgan's Creek, with a gradual fall for about 7 or 8 miles to a point on the old

Dapto

Dapto and Bong Bong Road, about 1,955 feet above the sea. Here the country begins to fall rapidly. From this point to the Loddon the course is nearly north, skirting the Illawarra country, along the western slopes of the coast ranges, passing close by Dapto Mountain, Mount Kembla, Mount Kiera, Broker's Nose, Rixon's Pass, Woonoona, and Bulli Pass; and by this course from the 1,955 feet level, the waters gathered there from all these topmost sources, to the extent of 20,000,000 gallons daily, and more, in all seasons, would be conducted in closed wrought-iron mains direct over hill and dale with a fall of 500 feet for 22 or 23 miles to a point near the Bulli Pass about 1,449 feet above the sea, and  $3\frac{1}{2}$  or 4 miles from the Loddon Basin; and from that point by ditching and 72 chains of tunnelling into the Tunnel Reservoir, 1,129 feet above the sea.\*

Thus the Wingecarribee and Kangaloon waters would become part of the Loddon waters, and both would go to Waverley together by the system of conduits above described. In kind, that system is perfect for the purpose; in degree it only requires sufficient amplification.

For the discovery and simple development of this general plan I am indebted to the salient geological fact—the regular dip from south to north of the coast country. Having regard to the relative situations of the Wingecarribee Swamp and George's River, the highest and lowest points in the plan, it is a very singular coincidence that the Loddon Basin, which is the natural meeting-place of the two systems of water supply, should be almost exactly half-way between those two points, both in respect of distance and of elevation.

This is the complete high-level scheme. Its total collective watershed is not less than 30,000 acres, or 47 square miles. Its works, from first to last, will take about five years, and cost a million and a half of money. When complete its daily delivery will be 30,000,000 gallons and upwards, and no one need for one moment hesitate to contract or guarantee to deliver not only the 12,000,000 gallons spoken of by the Water Commission, but more than double that quantity—in fact, a supply which will set all anxiety upon the subject finally at rest.

It may be said that this cost and this supply are in excess of our requirements. As to supply, I will not offer an opinion beyond what I have already said. If the supply is wanted, the cost is not excessive, for in these matters cost is the last consideration—quality and effectiveness are the great desiderata. But if the supply is needless, and the cost inadvisable, there is no necessity to avail of the whole scheme—either section will suffice. From the point of view of a perfect work, I should much prefer to see the completion of the entire scheme, but have no desire to advocate works that may not be necessary for a considerable time, especially as the scheme can be developed without difficulty as occasion may appear to require.

I will here, in passing, institute a comparison between this scheme and the two best systems of water supply in Great Britain and Australia—Glasgow from Loch Katrine, and Melbourne from Yan Yean (both gravitation schemes). From such comparison this proposed scheme will come out with credit. The figures which I am about to give, though they do not all of them pretend to exactness, as I have no means of attaining to greater accuracy, are yet near enough to preserve the value of the comparisons:—

	Population.	Watershed, in sq. miles.		Rainfall, in inches.	Amount saved out of total rainfall.	Average daily supply in gallons.	Character of country.	Length in miles.			Gallons per head of population.
		Tunnels.	Aque. ducts.					Closed mains.			
Glasgow—											
Loch Katrine ...	540,000	72	78 mx.	$\frac{2}{3}$ of $\frac{2}{3}$ = $\frac{2}{3}$ actual.	50 millions possible, 30 millions actual (besides 40 millions for compensations to mill-owners, &c.)	Granite	13	...	$3\frac{1}{2}$	55 present, actual.	
Melbourne—											
Yan Yean .....	200,000	70	26	$\frac{1}{2}$ of $\frac{2}{3}$ = $\frac{1}{3}$ actual.	10 millions actual, 14 millions possible.	Clay-slate.	$\frac{1}{2}$	9	16	50 actual, 70 possible.	
Sydney, proposed—											
Loddon and Wingecarribee	167,000	47	52	$\frac{2}{3}$ nominal.....	30 millions nominal, 40 millions indicated.	Sandstone and trachyte.	$6\frac{1}{2}$	$14\frac{1}{2}$	55	180 nominal, 240 indicated.	

All experience in water supply seems to point to the fact that the quantity of water usually saveable from watersheds, *i.e.*, the discharge, is about two-fifths of the total rainfall, the remainder going in soakage and evaporation, &c. This is, in fact, mainly true of all the instances given in this paper. It is in theory no doubt true of the Yan Yean, but in this case all the freshets and flood waters, which may be taken to represent half the discharge, are shut out owing to their impurity, and only the permanent stream availed of. What is true of most watersheds I assume to be at least true of those whose adoption I am now advocating; and as to the Loddon basin, I believe, as above stated, that it possesses extraordinary qualifications in this respect.

According to my calculations, by the light of the figures above given, I estimate that the actual yearly yield of water into the present Yan Yean reservoirs is something over 5,000,000,000 gallons (though the consumption has never reached that amount). With that fact before us, and by parity of reasoning, I deduce that the scheme now under consideration will annually yield over 14,000,000,000 gallons. This is nearly equal to 40 million gallons per day, so that my previous assurance of a daily supply of 30 millions to Sydney will be considered moderate. This is pretty clear evidence that the supplies available for this scheme will amply suffice for Sydney when it is five or six times as large as it is now.

I should not omit some special remarks upon the value of this scheme, derived from its high levels and high pressures. It has a head of water of 700 feet or more at Waverley, and the value of the motive power there obtainable from the pressure resulting from this head would go far towards paying the interest

\* These waters could with equal facility be let into the Loddon Lake, if such course should be thought more desirable; with this difference, however, that owing to a depression in the country, the last  $3\frac{1}{2}$  or 4 miles of ditch and tunnel must be replaced by closed mains.

interest on the total cost of the works.\* It would also be invaluable as a fire-engine, since the pressure that the Waverley height would give would reduce the risk of fires to a minimum. Moreover, as a purgative, it would be particularly valuable in the flushing of sewers and the erection of baths, and as a source of ornament it would have the special recommendation that every garden and homestead in Sydney and suburbs could be irrigated to perfection, and with the same pleasing results as are enjoyed by our Melbourne neighbours. Also, in the matter of cost of iron piping, this scheme shows great economy. In round numbers, a 26-inch pipe would bring 9,000,000 gallons from the Loddon to Sydney, a 30-inch pipe, 14,000,000, a 36-inch pipe, 21,000,000, and so on; and there the expenses end. But from a low level, like the Port Hacking River plan, of which I have yet to speak, and like all the other plans before the public, the above quantities would require double pipes of such sizes to carry them, and when carried, they would not be nearly as high as they ought to be, and pumping expenses would have to be continually incurred to bring them within reach of every citizen.

It is specially important to notice the value of the 300 feet head of water at the distributing reservoir. Any system of water supply designed for a large city, having numerous suburbs to be served, must have a large head of water to work upon, if it be intended by the system to provide supplies to such suburbs; otherwise the extra friction created by such abstraction of water will cause the water to have little or no head to reach its supposed destination, if the draught upon it be very considerable. Thus, in Melbourne, with a head of water 300 feet above sea level, at the Preston reservoir, six miles distant, in times of extreme consumption, 150 feet, or one-half the head, is required to overcome the friction. This is a startling fact, and simply means that, if the Yan Yean waters at the Preston reservoir had not a head of 150 feet, the quantity required in times of extreme consumption could not be brought to Melbourne.

This is the weakness, more or less, of all the other schemes for water supply before the public, including my Port Hacking River plan. They would all have slow, sluggish streams, and the best of them could get little higher than Paddington, with all their resources husbanded. Now, suppose that Parramatta, and every other suburb lying along the line of pipes, had, as they certainly should have, leave to tap *en route*, the consequence would probably be that during the hot summer months, when the demand is everywhere the greatest, the best of the schemes would deliver only an intermittent supply to the city, and the others of them nil.

## II.—LOW LEVEL SCHEME.

(Omitted, as not bearing on the subject.)

With reference to these various schemes, it may possibly be said that they are insufficiently illustrated and inexhaustively treated. I would reply, this is no fault of mine. As the schemes now stand, and as far as they are known to the public, they are, with the exception of one slight assistance rendered to me by the Government, the product of my sole unaided efforts. It will readily be conceded that no private purse could be expected to elaborate a plan designed for the public good, in the same exhaustive manner as can be effected by the public coffers, nor is it in any sense the duty of a private individual to do so. His duty is done when he has pointed the way, and it rests with the rulers of the country to take advantage of it. Nevertheless, it is but right to say, that there is neither guessing nor approximation about the particulars I have given—they are the product of accurate, skilful, and authentic survey. Moreover, an immense amount of work has been done to get those particulars together. I have personally made no less than seventeen visits to the localities in question; there have been not less than a hundred miles of surveying and levelling done by competent surveyors; labour to the extent of some ten or a dozen persons has been from time to time employed about the work; and from first to last the whole thing has cost me some hundreds of pounds. I mention these facts, not willingly but in self-defence, and to put a final end to the erroneous impression that I have not sufficient support for my statements.

I have the pleasure to be in frequent correspondence with some of the first engineers of America. That country is peculiarly remarkable for the immense strides made by it of late years in the science of hydraulic engineering, and has conceived designs and executed works of which it may fairly be said that for grandeur and successful results they surpass anything in the world. Their waterworks are on the most magnificent scale. Their water-pipes, now all in wrought-iron for high pressures, cast-iron being discarded in its favour, are counted by hundreds of miles. San Francisco has already 34 miles of 30-inch wrought-iron conduits, and it is now in contemplation to go further afield to the extent of 153 miles to the Sierras Nevadas. The town of Rochester, N.Y., with its population of only 100,000, has recently laid down and completed, with the greatest success, a conduit of water thus described to me by an American hydraulic engineer:—"The water comes from Hemlock Lake, 28 miles south of the city, being conducted through lines of 36-inch wrought-iron pipe to the first reservoir, and from thence 8 miles to the distributing reservoir by 24-inch wrought-iron pipe, and passed through the city by over 60 miles of service pipe of different diameters. It is one of the most complete and effective systems of waterworks in America." These are only two out of numerous cases (one on the Pacific, the other on the Atlantic side), and every day is bringing forth new improvements and results.

The main features of the scheme which I have laid before you are already known to some of the most eminent hydraulic engineers both in East and West America, and have received the most satisfactory criticisms and confirmations. The figures for expenses given in this paper are based upon information obtained from them, and it is largely due to them that I see the way so clearly through this water scheme, and can predict its success if undertaken. I have also much pleasure in stating that, during recent surveys privately undertaken by myself, I have been most ably assisted by Mr. Gipps, a civil engineer of the American school, who has had considerable experience in hydraulic works in Nevada.

Lastly,

\* One of my American correspondents has the following remarks upon the subject of this pressure:—"The above pressure is not exceptional. The Spring Valley Hydraulic Mine has 950 feet pressure on a 30-inch pipe, the plate being  $\frac{3}{8}$  inch thick. The Dutch Hill Hydraulic Mine has 612 feet on a 22-inch pipe, number 12 plate. The Virginia City and Gold Hill Waterworks has 1,750 feet on a 12-inch pipe of N. O. Birmingham wire gauge, or 34/100 inch thickness.

Lastly, I would remark, that the wrought-iron mains now so much in vogue in America, and against which the objection of corrosion is always raised here, are, by anti-corrosive materials that are habitually used, rendered, in the words of one of my American correspondents, "practically indestructible, and perfectly impervious to the action of water and earth." It is besides distinctly proved that no bad taste or prejudicial consequences whatever are imparted to the water by such treatment of the pipes. Granting this proved, wrought iron must stand unrivalled for this kind of service, especially for mountain regions, since its wonderful power of bearing pressure enables us to dispense with weight, and therefore its proportionate lightness renders it capable of being carried, worked, and handled at a mere fraction of the cost of cast iron.

Thus I have done my best to provide this important city with a good system of water supply, and to assure the country of its great value under its various phases. The proposals which I have ventured to press upon the attention of the Government would be, as I have shown, sufficient to ensure for this growing metropolis an ample supply of pure water for many years to come, and have also the merit of being expansive enough to provide for a remoter future. The cost of the works would be small when compared with the utility, the safety, and the magnitude of the undertaking; and once set going they would last for all time, with occasional and slight repairs.

I have, &c.,  
JAMES MANNING.

## APPENDIX No. II.

### MR. CLARK'S REPORT ON THE LODDON AND WINGECARRIBEE SCHEME.

JAMES MANNING, Esq., proposes to obtain a supply of water from the Loddon and Madden's Plains, supplemented by a further supply from Kangaloon and Wingecarribee.

He has a still further proposal to obtain a supply from Port Hacking, but which is entirely separate and distinct from the others.

The Loddon scheme has its collecting reservoir near to, and north of the road leading from Appin to Bulli Pass; and on the river Loddon this is supplemented by some other small intercepting reservoirs.

The catchment area in this locality is stated to be between 9,000 and 10,000 acres, or about 15½ square miles.

It is entirely on the sandstone formation, quite unsuited for cultivation; and from its general sterile character it may be assumed that, except as a catchment area for purpose of water supply, it is unlikely to find any economical use. It is, moreover, I believe, unalienated.

The area has been carefully inspected, and its characteristic feature is the large extent of swamps of which it is composed.

These swamps are not deep, but even during a somewhat dry period at the time of my visit in December last they were saturated with moisture.

Their existence is due probably to the elevated situation of the district, 1,100 to 1,300 feet above the level of the sea, and also to its proximity and influence.

It is proposed to form a reservoir by constructing a dam of concrete across the Loddon Creek about 60 chains from the point where it runs under the Appin Road.

This dam with a maximum height of 55 feet will form a reservoir estimated by the proposer at 408 acres in extent, with a storage capacity of 1,446 million gallons, or, as stated, 120 days' supply, at the rate of 12 million gallons daily—this does not however allow for loss by evaporation.

A second and smaller dam half a mile nearer to the Appin Road, and lower down the stream, would intercept a portion of the water at a somewhat lower level and add 37 acres to the storage reservoir. The dam is proposed to be 20 feet in height. A third dam, on Madden's Plains, 26¼ acres in extent, will receive the drainage of 1,500 acres included in the above total area, lying to the east and west of the Bottle Forest Road; these are to be brought into connection with the main tunnel through which the water passes in its course to Sydney.

The heights of the waters in these reservoirs are stated to be 1,121, 1,111, and 1,203 feet above the sea respectively.

The sandstone rock is exposed at the surface at the proposed sites for the dams.

The total distance of the Loddon Lake from Sydney over the various lengths of work mentioned by Mr. Manning will be 40¼ miles.

The water is to be conducted from these storage reservoirs, partly by tunnel and partly by open conduit, to a point on the Bottle Forest Road, 8¼ miles from the Loddon Reservoir, where a pipe line is to commence by which it descends to Sydney by gravitation.

This pipe line is to follow the Bottle Forest Road to George's River, to be crossed either by a timber bridge, or by a flexible pipe laid in the bed of the stream, and thence to a reservoir proposed to be constructed at Waverley; the total length of this pipe line is stated to be 32 miles.

The cost as estimated by the proposer is £600,000, and the amount of water to be delivered during four months of the year, or dry season, 9 million gallons a day; and for the remaining portion of the year, 12 million gallons daily.

Mr. Manning considers that this portion of his scheme will be sufficient for many years to come, and that only when it is proved to be insufficient will it be necessary to extend this work to Wingecarribee.

He claims for it the great advantage of a delivery of the water to a distributing reservoir to be constructed at Waverley 300 feet above sea level, and at a pressure of 700 feet, which used as a motive power will go far towards paying the interest on the total cost of the work.

Under this view it will be convenient to inquire how far this scheme will be likely to realize the expectations of the proposer, in delivering into Sydney 9 to 12 millions of gallons daily for domestic consumption, from a catchment area of 15½ square miles, aided by the reservoir for storage.

It must, however, be noted that situated as the area is, very near the top of the range of hills and sources of the Cataract and George's Rivers, it is necessarily limited in extent, and Mr. Manning evidently depends upon arresting the water that would otherwise run off by the river during periods of storm. At  
ordinary

ordinary times the discharge by the river Loddon is small, and on the occasion of my inspection of it was insignificant.

As before mentioned, I propose to apply to this and the other schemes the test of the dry period of eight months in 1875-6.

The tables of rainfall, &c., in the Appendix, and the proportion flowing down the rivers Nepean and Cataract, will also be used for this purpose.

It was found, page 6, that  $\frac{1}{20}$  or about 1-20th of the rainfall by measurement, was passing down the river at this period, and that proportion is therefore assumed as the quantity available.

It is however to be borne in mind that the atmosphere of this district is frequently loaded with moisture which, though not measurable by the rain-gauge, will probably assist in saturating this swampy area; while on the other hand it must be remembered that the evaporation from a swampy area is most probably largely in excess of the average. Moreover, exposed as the region is to the south-east winds, and close upon the sea-coast, the rainfall is considerable. This however affects the measurement in the river lower down, where observations have been most carefully recorded during the past eight years, and it will therefore be safe, and not unjust to the merits of this scheme, to take these results as applicable to this case.

The amount of rainfall, as recorded at Cordeaux during eight months, September, 1875, to August 1876, was  $16\frac{32}{100}$  inches.

1-20 of $16\frac{32}{100}$ inches on $15\frac{1}{2}$ square miles	...	...	190	million gallons

Equivalent to 201 days' supply at 12 million gallons, whereas the dry period extended over 240 days.

However efficient in ordinary seasons, it is very evident that the Loddon scheme would be insufficient to give the requisite supply during a period such as that experienced last year, and the extended project to include the Kangaloon and Wingecarribee must now be considered.

This Wingecarribee Swamp is described as six miles in length, and of varying widths from 60 chains downwards; it measures 1,170 acres in area, and its average depth is stated to be about 20 feet; its surface is more or less covered by a quaking bog, bearing water-plants and mosses. It receives the drainage of about  $18\frac{1}{2}$  square miles; its natural outlet is by the Wingecarribee River into the Wollondilly, and thence into the Lower Nepean by the Warragamba. The surface level of the water has been found to be about 2,244 feet over the sea.

In addition to this, Mr. Manning proposes to intercept the drainage of  $14\frac{1}{2}$  square miles, running into the Kangaloon Creek and Nepean or Mittagong River.

From these sources it is stated that 20 million gallons or more daily could in all seasons be taken, and by means of wrought-iron pipes and conduit delivered into the tunnel reservoir at Loddon, 1,100 feet below the Wingecarribee.

At very considerable personal labour Mr. Manning has recently taken the levels over the country between Wingecarribee and Loddon, and the section so made has been handed to me; it shows a very rough country, and one which for purpose of a pipe line and conduit is certainly not favourable. No doubt, however, it could be much improved by further examination and survey.

An inspection of the locality, with all the information I could obtain, appeared to indicate that a considerable supply could be derived from this source. Mr. Hanrahan, an old resident, informed me that I saw the water at its lowest, and there was then a stream of about three million gallons daily running into the swamp at its upper end, and in addition, in every direction small rills of water were trickling down the hill sides, in quantity which would add considerably to the total volume. Scarcely any open water was to be seen. At the surface of the swamp, upon which cattle were grazing, a 20-foot pole did not fathom the depth in several places when tried, but a plummet suspended to a string could not be got through the mass of vegetation.

The outlet from the swamp into the Wingecarribee at the time I saw it was running in a large volume, owing to a heavy rain of eight or ten hours duration, which had fallen in the previous night, and could not be taken therefore as an indication of the ordinary flow.

In consequence of the analysis of the Wingecarribee water, as given in the Report of the Commission, being somewhat unfavourable in regard to the volatile matter, 3 grains per gallon indicating a somewhat large amount of organic impurity, a further analysis has been made by the Government Analyst, which will be found in the Appendix.\*

The fact has been brought to my notice that the river which drains the swamp is occasionally dry. This indicates that seasons do occur when the swamp would have to be drawn upon as a reservoir. It is a matter for consideration how far it is suited for this purpose. Pure as the water now is—without any demand on its volume beyond that of the overflow by the river and loss by evaporation—it might be otherwise

\* Establishing a purity unsurpassed by the water of any scheme examined by Mr. Clark.

otherwise when 10 or 12 million gallons daily were withdrawn from it and probably some of the vegetation now immersed became dry; the conditions would then be altered, and a process of decay and change would be continually going on, which might alter materially the present pure condition of the water.

The country round the swamp and Kangaloon Creek is very fertile, the soil consisting of decomposed trap; and every portion of the district is, I believe, alienated, with exception of the area of the swamp itself. It is being rapidly cleared of timber and converted into pasturage for cattle. To a small extent it is used for agriculture. Its value is said to be from £10 to £12 per acre to the agriculturist, and I should apprehend would become the seat of a large population.

The plans and data with which I have been furnished by Mr. Manning are necessarily very incomplete. He has, however, estimated the cost of the entire project at 1½ million sterling, and, when completed, its daily delivery at 30 million gallons of water.

There are no data to enable me to estimate this latter quantity except those which have been already applied to Lake Loddon; nor have I any means of determining the storage capacity of the Wingecarribee Swamps, or amount of evaporation from a reservoir nearly filled with growing vegetable matter, the presence of which diminishes the storage capacity and increases the rate of evaporation.

In the absence therefore of any observations of the rainfall of this district, or of the discharge of the rivers, I adopt those above referred to, for the dry period of eight months in 1875-6; and I may here add that while I hold an opinion that the Wingecarribee Swamp is unsuited to act as a storage reservoir, I am desirous to give the full advantage to the statement of the promoter of this scheme, by taking a part of its waters.

On the occasion of my visit Mr. Manning pointed out what appeared a suitable site for a reservoir at Kangaloon; he since informs me that "a simple crib and earth dam, 29 feet high, and 11½ chains over all, would throw back a sea of water second only to the Loddon Lake." This however would require verification by actual survey; for the purpose of estimate, however, I will assume that one or more such sites could be found where by the construction of dams it would be possible to impound at reasonable cost as much water as has been calculated for Lake Loddon.

Under this supposition we shall then have the entire drainage area comprised in the several sites as follows:—

Loddon	...	...	...	...	15½ square miles
Kangaloon	...	...	...	...	14½ "
Wingecarribee	...	...	...	...	18½ "
Total	...	...	...	...	48½ "

Taking then 1-20th of the rainfall 16.92 inches as recorded at Cordeaux, during the dry period of eight months before referred to, as the quantity passing into the reservoirs, it will amount to 593 million gallons.

Then—

From rainfall	...	...	...	593 million gallons.
Quantity stored, assumed as twice the quantity in Loddon Reservoir	...	...	...	2,892 "
Total	...	...	...	3,485 "
Deduct evaporation 2 × 301	...	...	...	602 "
				2,883 "

an amount equivalent to 240 days' supply, at the rate of 12 million gallons per day, which would empty the storage reservoirs at the end of such a period of eight dry months.

Mr. Manning states that the cost of these works will be "1½ million of money."

I have also endeavoured to form an estimate with the information before me. To do this, however, it has been necessary to assume many quantities which could alone be ascertained by detailed surveys, which I have little doubt, from an inspection of the sections, would rather tend to increase than diminish the amount. Exclusive of land, compensation, &c., my estimate for the works executed, as proposed, with wrought-iron pipes, &c., amounts to £1,136,000. This sum includes the cost of two pipes, each 24 inches in diameter, for the lower or Loddon portion of the scheme, each theoretically capable of delivering 7½ million gallons in twenty-four hours. The sum also includes the cost of one 26-inch pipe between Wingecarribee and Loddon, capable of delivering 6½ million gallons per day theoretically.

In the event of an addition to the daily 12 million gallons becoming necessary at any future time, an additional 54½ miles of pipes would be required, costing £556,000 for the increase to the supply of 6 million gallons, supposing that from the source under consideration water be available.

The wrought-iron pipes which are proposed for conveying the water to Sydney are used in America, but I am not aware that, up to the present time, they have been used in England or by English engineers.

When the pressure exceeds 300 or 400 feet of head, wrought iron is undoubtedly better suited to bear such excessive pressure, and the concussions liable to be brought upon it, than cast iron. It is known, however, that when buried in the ground wrought iron does not resist corrosion so well as cast iron. I have known wrought iron to be used for gas-pipes, and when the asphaltum with which they are always coated was perfect, the pipes were durable; but where from any cause, such as making a connection or otherwise, any part of the iron was exposed to the action of the soil, a hole speedily followed, and the pipes were ultimately removed owing to the large escape of the gas from this cause.

It is proposed that the wrought-iron pipes, which are riveted longitudinally, and across to form the joints, should be coated with Angus Smith's solution inside and out, in the same way that is now the universal practice for the protection of cast-iron pipes; this is done by immersing the pipe in the molten liquid and boiling them in it for about twenty minutes; so applied it forms an efficient protection. Where, however, the seams would have to be riveted in the pipe-trench to join together the different lengths, the solution can only be painted on, and it is precisely at these joints as with a steam-boiler, which they resemble, where corrosion would take place. Everyday experience will render familiar examples of the corrosion of plate-iron when used for water-tanks.

Bessemer iron, which is rolled out from an ingot, and is therefore homogeneous and unlike ordinary rolled plate, which is lamellar in its structure, would be far better suited for such work than the best of ordinary plate. The corrosive action of the soil would affect this also, but in a less degree, as it would take place only at the surface.

A further consideration in the case is: how far it is desirable to undertake a work of this nature with a material dependent in so great a degree upon a varnish for its permanence.

Regarding the motive power which Mr. Manning expects might be obtained from pressure due to the height from which the water is brought, it may be well to explain that by the usual arrangements no effective power can be obtained save by an extra expense in cost of piping.

The size of a pipe is usually calculated to be that which will at the given inclination deliver the quantity of water required.

In this case the distance of the inlet of the pipe at Madden's Plains from Waverley is 32 miles; the difference of level is 1,062, less 320 or 742 feet.

A pipe to deliver 6,000,000 gallons flowing continuously during twenty-four hours must be 22 inches diameter, and the water will issue with a velocity of 4.66 feet per second, or about 3 miles per hour only, to supply that quantity.

If then any form of machine be interposed in order to obtain useful work, the flow will by the resistance it has to overcome be checked, and the discharge diminished in proportion to the resistance interposed.

To obtain motive power from water flowing through a pipe, it is therefore evident that a pipe of larger diameter than is actually necessary to supply the city must be adopted, involving an extra expense.

In the case of hydraulic gold-mining, jets of water are used of much smaller diameter than the pipe which supplies them, as in the case of fire hose attached to an ordinary street hydrant; if, however, these jets be increased in number till their collective areas approach to that of the pipe which supplies them, they will fail to act as jets.

It may be remarked that the pipes included in the estimate are calculated to discharge, theoretically, 3,000,000 gallons daily in excess of the required quantity; this is necessary to ensure efficient working, and to meet occasional difficulties when repairs of pipes are required; but I am not of opinion that it would be desirable to apply any power which might be derivable from this increased size to any purpose foreign to the delivery of water for the supply of the city.

Valuable as such a power would be, especially in extinguishing fires, such a pressure as is here contemplated could not with safety be put upon the ordinary street mains and house fittings which are calculated to bear from two to three hundred feet, and special pipes of the necessary strength would require to be provided. There are many other inconveniences attending the introduction of such extreme pressures into the arrangements for town supplies.

The better plan in such a system is to control the flow of water by a sluice placed at or near its upper end, while the pipe is left entirely open at its lower end. By this arrangement all danger of bursting the pipe by a sudden stoppage of the flow of water would be avoided.

This being the only one of the various schemes which is capable of delivering water at a higher level than the Crown-street Reservoir, it is necessary to ascertain the amount with which this scheme should be credited in order to make a just comparison with others not possessing this advantage.

It has been ascertained that of the present population of 167,146 of Sydney and its suburbs, that 146,000 reside on an area of the town which can be supplied by the Crown-street Reservoir, and that 21,000 are on an area above that level—the latter being the population of Cook and Fitzroy Wards, together with portions of Paddington, Randwick, and Waverley. The present proportion would therefore be about seven to one. This proportion must increase every year, as the high level area is of very limited extent, whilst the low level area may be taken as extending as far as Parramatta, and the settlement per acre is much more dense than is ever likely to be on the high land about Paddington; moreover, all water used for manufacturing purposes would of course be supplied from the low level.

Such being the case, one-eighth of the daily supply must be estimated as requiring to be pumped from Crown-street; and if it be assumed that the higher or Waverley levels be one-third of that area, the quantity, when 12 million gallons per day are supplied, will be as follows:—

12 million	
—————	= 1½ million per day
8	
To be lifted to the height of Paddington	
Reservoir ... ..	214
From Crown-street ... ..	141
	————— 73 feet.

And one-third of 1½ million = 500,000, to be lifted—

To Waverley ... ..	say 320
From Paddington ... ..	214
	————— 106 feet.

The above quantities lifted these respective heights will be equivalent to lifting the entire quantity of 1½ million gallons to a height of 108 feet, and this would require an engine of 70 h.-p., working twelve hours per day.

The cost of the above, with necessary buildings, or of duplicating the engine of 84 h.-p., now in course of erection, is about £9,000.

The cost of establishment and coals, at £1 per ton, stores, and upholding, will amount to £1,750 per annum, which capitalized—

£1,750 per annum, at twenty years' purchase ...	35,000
Cost of engines, buildings, &c. ... ..	9,000
	—————
	£44,000

Which sum of £44,000 must be taken in reduction of the estimate of this scheme for purpose of comparison, reducing it to £1,092,000.

WILLIAM CLARK.

## No. 2.

James Manning, Esq., to The Hon. the Premier.

Sir,

Sydney, 8 February, 1878.

On the 12th October last I had the honor to address a letter to the then Colonial Secretary, by which I protested, in behalf of the citizens of Sydney and suburbs, against the adoption of Mr. Clark's Report on the Sydney Water Supply.

I then submitted that the Government should call upon Mr. Clark, before he left the Colony, either to admit or refute the arguments which my published Review of his Report contains against such adoption.

I also added that, "however inadmissible controversy may be in the position held by Mr. Clark, our public interests demand at least some explanation concerning the misstatements of the simple facts of a valuable competing water supply scheme."

In reply to such letter I only received a written acknowledgment of the letter, and no further notice was taken of my communication.

Seeing that the matter of Mr. Clark's hydraulic scheme has again come before the Assembly, I do myself the honor to address you, as Premier, to submit very respectfully that the arguments and statements contained in my Review on this all-important subject should be carefully inquired into, before the Country is finally committed to a water supply scheme, which if adopted, I am sure will lead the Country into an enormous expense quite incommensurate with the advantages expected, and will only cause in the end universal disappointment by its inefficiency, as pointed out by me in my Review.

I have, &amp;c.,

JAMES MANNING.

## No. 3.

James Manning, Esq., to The Hon. the Premier.

Sir,

Sydney, 7 March, 1878.

Referring to my letters to the Government of the 12th October and 8th February, on the subject of a high-level water supply to the city and suburbs, in which I protested, on behalf of the citizens of Sydney, against the adoption of Mr. Clark's Report, and suggested that Mr. Clark should be called upon, before he left the Colony, to answer the arguments and the charges of misrepresentations which I had advanced against such adoption, but to which I have as yet received no reply,—I now do myself the honor to say that, in order that there may be no uncertain sound upon this momentous matter, I am now in a position to state that American engineers of the highest standing, backed by capitalists who will find unquestionable security, are prepared to guarantee a daily and perpetual delivery from the Loddon and Wingecarribee of thirty million gallons of the purest water on to the heights at Waverley, at 320 feet over the sea (or much higher by use of stand-pipes if required), at a less cost by a quarter of a million of money at least than the same quantity can be delivered by the Upper Nepean plan (by Mr. Clark's own showing) even to the Crown-street Reservoir, which latter is 179 feet below the Waverley level for a reservoir there. Or, to be more definite, the parties referred to will contract to do the work above referred to for the sum of £1,825,000, which at 5 per cent. on that capital will put the cost of the water at two-pence per thousand gallons (the present charge in Sydney by meter being thirty pence) without allowing for the use of the water under high pressure for fire extinctions, or for its power in working machinery, which ought to go far towards providing the whole interest.

The contractors would bind themselves to complete the work within five years from signing the contract.

Pardon me for calling your attention to the fact that London is about incurring an outlay of five and a half millions with the main object of a high level supply to protect property from fire, from reservoirs that are to be 400 feet over ordnance datum.

I have, &amp;c.,

JAMES MANNING.

# WATER SUPPLY TO SYDNEY AND SUBURBS.

(ADDITIONAL PAPER.)

*Ordered by the Legislative Assembly to be printed, 21 May, 1878.*

[*To be printed with the papers already laid upon the Table on this subject.*]

## On the value of High-pressure Water Supplies, especially for the extinction of fires.

The object of this paper is to point out some of the most important consequences of high level water pressures which have suggested themselves to me through long experience, with the practical consequences of water supply by gravitation principles.

I propose to divide my subject under four special heads.

I.—The first and greatest value of high pressure in water supplies is that which can insure immunity from conflagrations of cities and towns.

II.—The second is in the economy of delivery of large quantities of water through comparatively small and suitable pipes when brought down from high elevations.

III.—The third is in the value of hydraulic force obtainable on low lands by waters conducted through pipes from high regions, apart from the power to extinguish fires. These are the leading and prominent features of high level water supplies.

IV.—There is another but comparatively smaller value due to high pressure, namely, that which is derivable from its application to park and garden ornamentation, in form of garden irrigation and attractive *jets d'eau* or playing fountains of greater or less magnitude, according to the supply and elevation of the so called "head of water."

I propose to treat these four values *seriatim*, and to enlarge upon each subject as may seem to be due to its importance.

I.—High-pressure water power in cities and towns has been and is increasingly a matter of the greatest importance. Since the adoption of railways all over the world, centralization of populations has increased in a marvellous manner, and with such centralization the imminent risk of conflagrations has increased, evidences of which have unfortunately been only too numerous of late years. The cities of Chicago, Boston, and St. John in New Brunswick, also of London, of late are alarming instances of the danger of low level water supplies dependent on pumping action. These have all proved that when once a fire takes a fast hold of a city, unless it is duly protected by water pressure, the whole city and population are endangered. At Chicago, notwithstanding that they have a wonderful steam pump, capable of pumping 36 million gallons of water daily from Lake Michigan into a receiving reservoir 100 feet high, for the general purposes of household supply for that level city, it is nevertheless found to be almost useless in its effect on fires, owing to the insignificant pressure given; and on the last occasion of the conflagration of that city, the stupendous pump was itself disabled by the effect of the raging fire telling upon the expansion of, and injury to, the small gearing of its works.

From these and other instances, and from the prudent forecast of our ablest engineers in England and in America, it seems to be like an accepted axiom, that no city is wholly safe from fire risks, unless it can avail of a pressure due to at least 300 feet head of water, or thereabouts; and that the intermediate application of what may be called a middle power, in form of fire-engines and hoses, is undesirable, and to be avoided if possible.

A paper was read in August last, at Plymouth, before the British Association, on the subject of water supply for London. The statements therein contained are so pertinent and valuable that I shall quote copiously from it in furtherance of my own reflections and practical deductions.

This paper on London water supply of which I have spoken was the joint production of Messrs. Bramwell, F.R.S., and Mr. Easton, C.E. To explain in the simplest way the purport of this paper, I will quote their introduction or preamble on the subject. These gentlemen then said, by the reading of Mr. Bramwell:—

"Probably some of the members present may remember that we have, in conjunction with Sir Joseph Bazalgette, at the request of the Metropolitan Board of Works, recently reported upon the water supply of London, especially in relation to the quality of the potable water and to the provision of water at an adequate pressure for the extinction of fires. We make no apology for bringing the subject before this section, because that subject is an extremely large one, and the questions involved in its economic considerations are therefore of very considerable importance."

After dwelling at length on statistics connected with the population and water supply of London, showing by Colonel Bolton's monthly report of June, 1877, that there was a daily delivery in the summer months of that year, by the eight Companies, of 132,500,000 gallons of water to 3,796,000 inhabitants, dwelling in 533,000 houses, they go on to say that London is quite deficient in two great wants of a proper water supply—namely, first in good drinking and cooking water; and secondly, in water for the extinction of fires. They add that it is impossible to exaggerate the importance of these two heads, as on the quality of the potable water depends, to a large extent, the health of a large population; and on the adequate provision of water for the extinction of fires depends the preservation of the largest aggregation of wealth in the world.

On this latter subject, and from evidence given before a Parliamentary Committee in 1876-7, it appears that as much as £540,000,000 of London property is insured in the fire offices; that this amount only represents about one-third of the whole value of the whole property, and that therefore the total value of London property is valued at £1,600,000,000, or twice as much as the National Debt.

The same figures may be deemed to apply approximately to Sydney properties and insurances in proportion to its population.

This paper having only to deal with the value and consequences of pressure supplies, I must pass over the very interesting parts connected with the London drinking and cooking waters, and confine myself especially to those parallels bearing on the subject of the value of water pressure.

It seems that, with regard to fire extinction, nothing at all has been done by the London Water Companies beyond the giving of a supply of water at street levels, to be picked up by the pumps of the fire-engines and pumped upon the fire. "But (say Messrs. Bramwell and Easton) there can be no doubt that, to insure the prompt extinction of fires, it would be in the highest degree desirable to be able to apply an effective jet from the water main without the intervention of a fire-engine. This has been amply proved by the experience of Manchester, Liverpool, and other towns where there is, by gravitation in the mains, a constant high pressure competent to deliver large quantities of water in the form of jets."

With regard to such jets, these gentlemen, in conjunction with Sir Joseph Bazalgette, were instructed by the Board of Works to carry out a series of practical experiments upon the question of fire jets which should put beyond all doubt the engineering points involved. They state briefly the result of these experiments, and partly as follows:—

"With a very low jet of some 30 feet, about seven-eighths of the head or pressure effective at the orifice would be obtained as the height of the column of water."

They go on to show the great loss of power by consequence of friction through the ordinary hoses of fire-engines, which retards the delivery of water for fires, and which on only 200 feet of hose (which is a mere nothing compared with the lengths sometimes used) is equal to a little more than a quarter the power as against the delivery from direct hydrants; and, as a matter of fact, they say that 200 feet of hose demands 53 feet of pressure to get 150 gallons per minute at the end of the 200 feet of hose; therefore to obtain a jet of 80 feet high expending 150 gallons per minute at the end of the 200 feet of hose there is needed a pressure at the main of 181 feet, and that this pressure must be maintained whilst the water is flowing.

It seems also that all the Water Companies give very inadequate pressure, and that with the exception of one, none of the other Companies are bound to any but an insignificant pressure, and that the largest Company but one has its obligations fulfilled by giving a pressure of 40 feet above street pavement,—a pressure which, so far from being able to produce a jet delivering 150 gallons at the end of 200 feet of hose, can only succeed in driving 122 gallons per minute through a hose of that length at the ground level without any jet at all. The energetic Captain Shaw, of the London Fire Brigade, especially, besides other eminent Royal Commissioners, state decisively that all this is wholly inadequate provision for London, and that on the point of extinguishing fires, London will no longer be content with the provisions as regards quantity and pressure which now prevail. A radical change is thus made imperative to protect that immense city and population from possible total annihilation. London, they say, must be supplied with wholesome potable water, and it must have a greater security from fires.

Let us now see how these able and renowned engineers propose to meet these alarming objections, both as to supply of potable water for the whole of London, and for an adequate pressure supply for the extinction of fires.

The recent propositions for bringing water to London from the lake districts of Wales and Cumberland by means of gigantic aqueducts have, after full examination by Royal Commissioners, been rejected as impracticable, and as being too costly even for a rich city like London, since it was estimated that the direct and indirect expense of such schemes would cost £50,000,000; and that, moreover, such projects if carried out could not deliver the water at a height which would give sufficient pressure for the extinguishing of fires without the aid of pumping.

The new project brought forward by Messrs. Bramwell and Easton and Sir Joseph Bazalgette is this: The existing supplies for all purposes except for drinking and the extinction of fires is to go on as at present with the eight Companies. It is found that the most liberal allowance for drinking and cooking is covered by two gallons per head per diem, or from seven to eight million gallons per day for the whole city of London. They propose to pump up and bring in double that quantity of pure water from the neighbouring chalk formation outside London; that there should be made, on the high ground to the north and south of London, reservoirs at a height of 400 feet above Ordnance datum; that these reservoirs should be supplied by pumping-engines, drawing their supply of spring water at distances from eight to fifteen miles beyond the reservoirs, that is to say in the open country; that the reservoirs should all be united by large arterial mains, passing along the sides of the streets; and from those latter mains a service pipe would proceed to each house, delivering the water into a close vessel having a draw-off tap, and containing, according to the size of the house, from three to ten gallons, and filling up gradually after having been emptied.

On these mains would also be placed, at the time they were laid down, the hydrants for fire-extinction.

The total cost of the works necessary for carrying out this separate supply of 16 million gallons daily, under the valuable pressure of 400 feet head, is estimated to cost £5,500,000, which would include house-fittings and the hydrants.

Further very interesting details of this scheme follow, proving its economy and its efficacy, which were entirely borne out by the after discussion. All present were unanimous in their approval, and especially so was Lord Fortescue, the President, who "thanked the authors of the paper for a contribution which (he said) was one which added lustre to the section." Also, Sir J. Watson, late Provost of Glasgow, stated to the meeting that lately in Glasgow, even with an already large supply of 30 million gallons a day from Lock Katrine, the Corporation had found it expedient to economize the water, by taking inferior water from the Clyde River, and distributing it by separate means for manifold purposes.

Now, the pressure due to 400 feet head, in the proposed new and extra London supply, having due regard to the distance of its distributing reservoirs from London, and to the amount of friction over so long a reticulation, would practically be a pressure in every street in London that would be about equal to

to the pressure in every street in Sydney, Melbourne, and San Francisco respectively, from reservoirs stationed respectively at Waverley, Preston, and the Upper Russian Hill Reservoir, having the relative heights of (say) 400, 300, 300, and 306 feet above sea levels and city bases; and the practical results and effects to all four cities—London, Sydney, Melbourne, and San Francisco—would be much the same.

In neither case of three of these four cities is there the slightest difficulty made about the high pressure on the service pipes. In Sydney only is the question raised. As a matter of course these pipes are or will be equal to the pressure to be sustained. Can there then be a more convincing proof given of the value of high level water supplies wherever available by direct gravitation?

II.—The second value of hydraulic pressure consists in the ability to conduct waters from high levels at much less cost than when and where the element of high pressure is wanting. Velocity in the conduct of waters from really high levels through suitable pipes means, in simple language, the saving of half or even two-thirds the money, as against the conduits under low pressures with almost no head at all when iron pipes are necessarily made the medium of transport.

I will not give theoretical formulæ in proof of this assertion—it speaks for itself. I will therefore refrain from giving details on this important point, but will give some remarkable contrasts between the relative powers of low and of high delivery through wrought-iron pipes.

It is stated by one distinguished engineer (Mr. Clark) that a pipe of 36 inches diameter, with a fall of 23 feet in a run of 11 miles, can deliver 8 million gallons daily. By other distinguished engineers, whose formulæ are accepted as proved problems, it has been ascertained that a similar pipe of 36 inches diameter with a fall of 730 feet in a run of 30 miles will convey daily over 22 million gallons; and by a similar pipe with a fall of 910 feet, with a 30-mile run, there would be a daily delivery of over 25 million gallons, or more than three times as much as would be delivered by the first-named pipe of same size with only 23 feet of fall and with only 11 miles to run. (*See Appendix.*)

The wrought-iron conduits of the recently recommended San Francisco extra water supply scheme being about an average of  $41\frac{1}{2}$  inches diameter, and having a run of no less than  $137\frac{1}{2}$  miles with a pressure due to an hydraulic grade line of 896 feet fall in the whole of that distance (equal to  $6\frac{1}{2}$  feet to the mile) will in all deliver 20,000,000 gallons daily at most; whereas those same conduits of  $41\frac{1}{2}$  inches diameter, with an hydraulic grade line or head of 730 feet in a run of 30 miles (equal to  $24\frac{1}{3}$  feet fall to the mile), would deliver no less than 32,223,500 gallons daily. So much for velocity under high pressure.

III.—The third value of high pressure lies in its yielding water power in proportion to supply, and of applicability to hydraulic force. This is also a subject so universally understood that I may spare expression on its details and virtues, but may call special attention to the value of pressure in cities for the purposes of labour-saving appliances in form of hydraulic lifts in all warehouses and in large public buildings, hotels, &c.; also to its value in the ability of placing pressure hydrants in and about all such and highest buildings for the purpose of extinguishing fire wherever it may first break out; to the advantages of filling baths rapidly anywhere in the city and suburbs; to the ability of cleansing the fronts of houses and the footpaths, flushing sewers, &c. Cities which can enjoy the advantage of full-sized mains, with a pressure due to 300 feet, could not only be supplied safely with service pipes into every house without risk of damage, but also, motive power to an extent equal to driving printing-presses and such like machinery could be applied everywhere with the fullest advantage.

I would add that the Californian appliances of this economic force of water through asphalted wrought-iron pipes have brought about results which never had a parallel in any part of the world, in connection with great water conduits, and with its wonderful effects on the new principle of hydraulic mining; and notably so by the superlative application of this force in deep-sinking with the rock diamond drill apparatus, whereby every length of its strong rods has a three-quarter inch bore through it, given for the express purpose of conducting water down the rods, with the double object of bringing up to the surface by hydraulic pressure and by syphon-like action (no matter from what depth) all the ground-up *débris* of the rocks perforated, and to lubricate the quick revolving rods and diamond boring apparatus.

IV.—The fourth and smaller value of high pressure on water consists in its adaptation to park and garden ornamentation, in form of playing fountains, and in spray jets for watering lawns and moistening gardens by artificial rains. To most who have travelled, the beautiful fountains of Versailles and St. Cloud, near Paris, must be familiar; but these are far surpassed by the one at the Landgrave's Gardens at Hesse-Cassel, known as "Wilhelmshöhe," the water supply for which is brought down from a high table-land close behind those gardens by a considerable-sized main. The famous *jet d'eau* which plays there at stated times before the palace where Louis Napoleon was confined after the battle of Sedan is the finest in Europe. When the water is turned on from its orifice of 12 inches diameter out of the large main, and having a pressure due to about 300 feet head, it rises majestically to a height of 140 to 150 feet. Its spent waters fall back gracefully into a circular basin or stone pond having a diameter of 433 feet.

These waterworks included formerly grand cascades, and a miniature Teufelsbrücke or Devil's Bridge, similar to the old one of that name on the Mount Saint Gothard Road from Flüen in Switzerland. These works were made at the time of the forming of these gardens, in the years 1701 to 1714. The grand *jet d'eau* has, I believe, since its commencement always played every Sunday afternoon at 3 o'clock, as a stated time for the public and for travellers' entertainment. It was under one of these occasions that I had the pleasure of seeing it in its best form, on a bright Sunday afternoon in July, 1831. I believe that the Sunday playing of this noble fountain continues to the present time. It may be surmised that very few persons could witness such a sight without its producing lasting impressions of the value of high pressure water supplies.

I remark on these princely ornamental water-works at Hesse-Cassel for the sake of their own intrinsic worth, and for their practical exhibition of the enormous power of hydraulic pressure even in this form. I mention it, also, in support of an idea of my own—that if a high-level system were adopted for Sydney a similar *jet d'eau* to the one at Hesse-Cassel, or say of even half the size, might be made to play in our Botanic Gardens, or on the Government House lawn. This would give a very attractive feature to the gardens or to the lawn, and if made to play there at sufficiently high levels, such as the lawn presents, the receiving pond of the spent waters could act as a distributing reservoir for the after purposes on the lower levels about the shipping, and could supply public baths in that neighbourhood.

What is stated here of park and garden fountain ornamentations on a large scale, applies with greater force to the application of the same results by high pressure in the gardens and tenements of tens of thousands of people who dwell in cities and their suburbs, which are capable by natural features

features of enjoying the fruits of high-level supplies. With high pressure, and with unlimited supplies of water, every garden of every inhabitant could redound with plenty, and could beam with beauty of vegetation, as is the case everywhere in and around Melbourne, with its grand Yan Yean water supply, under its head of 300 feet of pressure from the Preston Reservoir, and from which pressure supply the inhabitants of the whole country around enjoy an almost perfect immunity from the risk of large conflagrations.

These remarks on high pressure express the four values of hydraulic force from high-level water supplies which are most worthy of being brought under consideration. There are others of minor value, such as that of conducting cold spring waters underground by pipes with force, for the economic exchanges of temperature, &c. ; but it is unnecessary to enlarge on this question.

Sydney has a paramount advantage over perhaps any city in the world to avail of all the great advantages of high pressure and pure mountain water supplies, if her inhabitants will insist on the adoption of those most favourable conditions given to them by nature, and which are available only by obtaining the waters from the near and high Illawarra mountains, by means of properly coated wrought-iron pipes. From thence an abundance of the purest waters, with all the special merits of pressure, can be obtained with unsurpassable economy, and thus fulfil all the proper conditions of a perfect water scheme which can be summed up in the qualities exemplified by the four words in capital P's:—

PLENTY, PURITY, PRESSURE, PRICE.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## WATER SUPPLY TO SYDNEY AND SUBURBS.

(PROGRESS REPORT OF THE ENGINEER-IN-CHIEF.)

*Ordered by the Legislative Assembly to be printed, 21 May, 1878.*

## SYDNEY WATER SUPPLY.

I HAVE the honor to report, for the information of Mr. Secretary Sutherland, the progress which has been made up to this date with the surveys and sections for the contract plans :

Three of the works, viz., the Nepean tunnel of  $4\frac{1}{2}$  miles, the Cataract tunnel of  $1\frac{1}{2}$  mile in length, and the Prospect dam, are those which, from their magnitude and the length of time they will necessarily take to complete, should first be commenced ; the minor works involved in the conduit or canal aqueducts and short tunnels may safely be deferred till the others are fairly in hand.

I have devoted my attention mainly then to the former, and the Nepean and Cataract tunnels are set out on the ground ; the plans and sections are all but completed ; the specification will be ready in a few days, and if thought advisable by the Government, which I would beg most strongly to recommend, tenders may be immediately called for their excavation.

The surveys for the Prospect reservoir are likewise in an advanced state, but this work is not so pressing as its completion need not be waited for to introduce the Nepean water into Sydney as I should propose to bring the water across the reservoir in a timber floom, so as to give the bank time to settle and consolidate before admitting the water.

Of the minor works, about  $2\frac{1}{2}$  miles of the canal below the Cataract tunnel are staked out for contract, and trial pits to ascertain the character of the ground which show it to be favourable have been put down. The site for the dam in the Cataract River has been determined and the sections and plans completed.

The line of conduit from the crossing of the Menangle Road for a distance of 17 miles towards Prospect has been primarily staked out, and I am happy to state that I find considerable improvements can be made on it.

I may state that generally the surveys are in fair train, and with one trifling exception progressing favourably.

## ALBURY WATER SUPPLY.

(REPORT FROM MR. CLARK RESPECTING.)

Presented to Parliament by Command.

W. Clark, Esq., to The Colonial Secretary.

Sir,

Sydney, 2 October, 1877.

I have the honor to return herewith the documents forwarded to me on the 17th September, with Mr. Halloran's letter 77/6914, requesting me to peruse and report thereon.

I have carefully read through these documents and find that they were received by the Mayor of Albury in reply to a public advertisement inviting schemes for obtaining a supply of water for that town. Under these circumstances, as might be expected, the various suggestions are put forward on very insufficient data; these can only be obtained when the locality is carefully examined and the necessary plans and levels are available, which private individuals are not likely to undertake, as involving expense and time, and without which the best opinion can be but suggestive of the direction for further enquiry, and it is the more difficult for me to enter into the subject as I have never seen the locality. As however I have recently been engaged on similar enquiries in regard to other large towns in the Colony, I am desirous to comply with your request, and give the best assistance I can towards forwarding the views of the Corporation of Albury, who desire to obtain one of the first necessities to healthy existence in a pure and sufficient supply of water for their Borough.

The documents referred to are described in the Report of the Water Committee, dated 10th July, 1877, under the following designations, plans A, B, C, D, A2, and E, but the latter, which proposes to lift the water of the river by an "Aquapult" worked by the motive power of the river, did not reach me, and I am therefore unable to take it into consideration.

As however a similar machine is alluded to in two of the other schemes, and appears to involve the damming of the river in order to obtain the power required, which I estimate as equal to 15 h.p., I do not think for such a purpose alone it would be desirable to obstruct an important stream when fuel can be obtained at a moderate cost, as I am informed it can be at Albury, nor is the machine alluded to suitable for high lifts of 100 feet and upwards.

From these documents I gather that Albury is a town with a population of about 3,000, and is situated near to the river Murray.

There is no plan which shows the levels of the town, but it appears that an elevation of about 150 feet can be obtained above the level of the river and about 130 feet above the site of the Post Office. Whether any other part of the town is situated at higher levels there is nothing in these documents to show. I have therefore to assume that this level would be sufficient to do what is intended, *i.e.*, to supply the entire area of the town with water, an assumption which requires to be carefully verified.

Regarding the quantity of water required it appears that Albury is an increasing town, and some additional provision beyond the satisfying of the present want should be made.

Assuming then that the population numbers 5,000 persons, the quantity required per head will be about 30 gallons, which is sufficient for domestic purposes, and for watering the more important thoroughfares where there is no waste from bad work and fittings. The quantity would then be  $5,000 \times 30 = 150,000$  gallons per day.

Then if a pumping scheme is adopted from a river which is occasionally muddy it will be necessary in order to supply pure and wholesome water that the means of cleansing it should be provided. These to be efficient should consist of two tanks, each sufficient to contain a day's supply, arranged after the manner which I have recommended in the case of the Bathurst supply, with two filters, clear water tank, and engine capable of lifting the water 150 feet as above mentioned, and it is desirable that it should be capable of doing this in about 8 or 10 hours. For such work an engine capable of exerting 15 h.p. effective would be required. The engine would lift the daily supply of water first from the river into the settling tank, and from the clear water tank, after it has passed through the filters into the service reservoir at 150 feet elevation, from which it would gravitate into the town.

The site of the pumping work should undoubtedly be near the river, above the town, where it is less likely to receive impurities from drainage, &c., &c.

I am unable to ascertain exactly at what distance from the town a proper site for the service reservoir could be obtained at the required elevation, or the distance of the reservoir from the pumps, but assuming the fall to the town to be at the rate of 100 feet per mile, the diameter of the pipe should not be less than 7 inches, which would at present cost about £1,500 per mile.

The cost of settling tanks, filters, clear water-tank, engine, boiler, and house, with the necessary connecting pipes, valves, &c., &c., between tanks, filter, and pumps, would be about £6,000, to which must be added the cost of the pipe, the length of which I have no means of ascertaining, with the data before me.

The cost of a covered service reservoir, to contain (say) 200,000 gallons, would probably be about £1,200.

From the above some idea may be obtained of the probable cost of the works, which, with the information before me, I am of opinion should be adopted for supplying Albury with water by pumping, and it will be better understood by referring to my report on Bathurst.

Having no means of knowing the cost of fuel I am unable to give my opinion as to the working expenses of such a scheme, but it would probably not exceed £500 per annum, exclusive of the interest on first cost of the works.

Two of the papers refer to the possibility of supplying the requisite quantity of water by gravitation, and one of them, "C", gives in some detail the data upon which the scheme is founded, but it is unaccompanied by any plan to scale.

There are no sections of the dam and proposed reservoir, and it is therefore wholly impossible for me to check any of the calculations of quantities, or to fix the size of the pipes, &c., upon which the cost of the scheme depends.

If however, as I apprehend, that the creek which would supply the intended dam is occasionally dry, it would be unsafe to undertake works without careful surveys, to determine accurately the storage capacity, and more particularly than has been done, the flow of the creek during various seasons. The slope of the dam would probably require to be increased, and puddle provided, which is not in the estimate.

The cost of the dam of 32,000 cubic yards, a weir 15 chains long, average depth 7 feet, width 92 feet, filter beds, and service reserve, to contain 1,500,000 gallons of water, with the necessary connections, is put down at £3,222 and appears to be a low estimate.

The cost of the distributing pipes is not given and will depend on the length necessary, and the pressure available, on which subject I have no means of judging.

I am of opinion however that the suggestion for the gravitation scheme is worthy of further inquiry.

I have, &c.,

W. CLARK.

1877.

NEW SOUTH WALES.

SUPPLY OF WATER FOR THE TOWN OF GOULBURN.

REPORT

TO THE

GOVERNMENT OF NEW SOUTH WALES

ON A

SUPPLY OF WATER FOR THE TOWN OF GOULBURN:

BY

W. CLARK,  
MEMBER INSTITUTE OF CIVIL ENGINEERS.

Presented to Parliament by Command.

SYDNEY: THOMAS RICHARDS, GOVERNMENT PRINTER.

1877.

## REPORT to the Government of New South Wales on a supply of Water for the Town of Goulburn.

To the Honorable Sir John Robertson,  
Colonial Secretary, New South Wales.

Sir,

In accordance with your instructions conveyed to me in Mr. Halloran's letter of 1st October, 1877, that I should visit Goulburn for the purpose of inquiring into and reporting on the subject of its Water Supply, I proceeded there on the 15th November.

Goulburn is a town of 4,453 inhabitants, and, for a proper supply of the present, with probable future increase of population, should I consider be provided with the means of distributing 250,000 gallons per day; and the works hereafter to be described will all be designed with this view.

The present means of obtaining water are by water-carts, at a cost of 6d. for 50 gallons, and from wells on private property.

The town is undrained, and the mortality is 27 in the 1,000—about one-third more than is inevitable—notwithstanding its exceptionally healthy site.

The surface of the town is undulating, and lies between an elevation of 2,187 feet above sea level—which is a high point in Cowper-street—and 2,077 feet, the level near the Railway Station. The difference, 110 feet, will afford a good working pressure over the greater part of the area of the town, and it is therefore proposed to construct the service reservoir on the high point referred to, which is a very favourable site. - A semicircle of half a mile radius will include nearly all the populated area.

The various schemes which I propose to investigate all terminate at this point, with a reservoir capable of containing one day's supply or 250,000 gallons.

The streams in the neighbourhood of the town which have been investigated as offering probable sources of supply are—

The Wollondilly, with a catchment area of...	264.98 square miles.
Mulwarree Ponds	200.73
Sully Ponds	51.12
Green Gully Creek, included in the Sully Ponds watershed	5.83

One only of these streams has any claim to permanence, and even this one, the Wollondilly, during periods of long continued drought is said to cease running.

The term "Ponds" appears to be given to the other streams from the fact of their ceasing to run soon after the cessation of the rain, when they assume the form of a chain of waterholes.

The average rainfall of thirteen years in Goulburn is recorded as 26.296 inches per annum. The heaviest rainfall was in 1860, when 40.52 inches fell; the smallest in 1865, when 11.72 inches fell. In a year so exceptionally dry as this last but very little water would run off by the streams, and it is evident from these conditions that a large storage of water is desirable in order to carry on the supply through periods of protracted drought, and that such storage reservoir must intercept the water during periods of storm.

The

The water in all the above-mentioned sources is more or less turbid during and for some time after rain has fallen; filtration before distribution is therefore necessary, and when in a very turbid condition this process is attended with some considerable difficulty. To overcome this, settling tanks, capable of containing two or three days' supply, should be provided, wherein the water may deposit the greater part of the mud in suspension before being admitted to the filters.

The two first sources to which my attention has been directed are the Wollondilly and Mulwarree near the town, whence the supply may be obtained by pumping; and I think it desirable to explain these works in some detail, as it is probable that I may not be in possession of all the data on which a decision should be formed before my departure from the Colony.

Samples of water from the various sources have been forwarded for examination by the Government Analyst, and should be considered when the source of supply is decided. It appears probable, however, that all the sources will, with filtration, yield water of fair quality.

Bearing in mind what has been stated above as to the turbidity of the streams during storms and for some time after, it is desirable to obtain if possible a site for a reservoir into which the water can be admitted or pumped when comparatively clear, and kept for use on these occasions.

#### PUMPING SCHEME FROM THE WOLLONDILLY.

Such a site as above referred to has been found in connection with this scheme; it is shown at 43 chains 40 links from the river on the general plan No. 1, where a reservoir can be formed by the construction of a dam with an area of about 6 acres, containing 32,000 cubic yards of earthwork. It will store 19 million gallons of water, sufficient for two months' supply, which, while being ample for settlement, would render pumping from the river during excessive turbidity unnecessary.

In this scheme the engine is proposed to be fixed at a point 24 chains above Marsden's bridge, where there is a waterhole in the course of the river about 1,100 feet long, and varying in depth from 5 to 17 feet, having a capacity below low-water in the river of  $8\frac{1}{2}$  million gallons.

An engine 27 h.p., with boilers in duplicate, will be fixed above flood line at the margin of this hole, and distant from the reservoir above described 45 chains, and will be capable of forcing the daily supply of water to a height of 164 feet through a 12-inch pipe in about eight hours.

The water will be drawn from the reservoir to 20 feet below top water line, as shown in the section, plan No. 2, by a pipe 10 inches in diameter,  $25\frac{1}{2}$  chains in length, laid in a tunnel through the hill about 14 chains in length to the filters.

This pipe will have a floating end to take the water from a few inches below the surface.

The filters are circular in plan, each capable of filtering half a day's supply in twenty-four hours. The tanks are 68 feet in diameter, and 8 feet deep, with sloping sides  $\frac{1}{2}$  to 1, lined with concrete.

Their capacity is sufficient to contain 5 feet in depth of filtering medium and 2 feet of water.

Two filters would at first be sufficient, but land for a third should be taken, which can be constructed when found necessary.

The filters are provided with proper inlet-air and overflow pipes, and the water will be received by an 8-inch pipe, 60 chains in length, and delivered into the service reservoir.

The service reservoir is shown, in Cowper-street, on plan No. 1. It is 60 feet in diameter, 15 feet deep, lined with brickwork in cement, capable of holding 250,000 gallons, and covered with a corrugated iron roof (*vide* plan No. 3). At this point the distribution of the water through the street mains in the town will commence.

The estimate for the works above described, inclusive of land, is £19,606.

PUMPING

## PUMPING SCHEME FROM THE MULWARREE.

Thorne's Waterhole is a natural reservoir in the bed of this river, 6,915 feet long, from 30 feet to 247 feet wide, having a depth of from 3 feet to 24 feet, with a capacity of 10,000,000 cubic feet, or 62,000,000 gallons.

Immediately on the margin of this pool a hill rises to a height of about 186 feet over the water level, where a suitable site for settling tanks and filters is found. From these latter the daily supply of water would flow through a 7-inch pipe, with a fall of 46 feet in 2 miles 36 chains to the service reservoir in Cowper-street, as above described.

As the storm water will flow through Thorne's Waterhole, and at such times be turbid and unfit to pass on to the filters, it will be necessary to provide three settling tanks, two of which may be first constructed to receive the water from the engine.

The engine in this case also will be 27 h. p. The pipe connecting the engine with the settling tanks will be 12 inches diameter, 25 chains long, through which the engine will be capable of forcing the daily supply in nine hours.

The settling tanks will be circular in form, 90 feet in diameter, 11 feet deep, of similar construction to the filters before described, each capable of containing a day's supply in 7 feet of depth, with overflow 1 foot below top of wall.

The lower 3 feet not to be drawn off, except when cleaning out the tank.

Two walls are provided at the inlet, as shown in the plan No. 4, where the general arrangement of these works is indicated, over which the water will pass in a thin sheet for the purpose of aerating it, and for arresting the larger portion of the mud which will collect between them; this mud can be cleaned out without drawing off the water from the entire tank.

The precise position of these tanks and filters cannot be determined until the nature of the rock in the locality is ascertained. If this be hard to the surface, it will be well to form the tank for about half its depth in the solid rock, and half made up with the material so obtained.

The necessity or otherwise for lining the tanks throughout will only be ascertained when the excavation is made; if the rock be sound and compact, partial lining only will be necessary. Provision, however, is made in the estimate for 12 inches of concrete throughout.

The filters and service reservoir will be precisely the same as in the case of the Wollondilly pumping scheme.

The estimate for the works above described, including land, is £15,000.

I have seen a Report by Mr. Usher, C.E., on the supply of 200,000 gallons per day to Goulburn, by pumping from the Wollondilly, near the Rocky Point, about 20 chains above Marsden's Bridge, and forcing it to a point in Deccan-street, on the plan No. 1, at 208·92—57·88 = 151 feet above the level of the river.

In this Report no provision is made for settling tanks; these I consider to be necessary for the cleansing of the water and proper action of the filters when the river is turbid.

Adding the cost of these to Mr. Usher's scheme, extending it to the service reservoir in Cowper-street, and adopting the quantity ( $\frac{1}{4}$  million gallons per day) and prices I have put to the work in the other schemes, I estimate the cost to be £14,214; and, as compared with the pumping scheme from the Wollondilly before described at page 4, shows a reduction on that estimate of £5,392, by omitting the reservoir to contain 19,000,000 gallons, and the substitution of two settling tanks containing  $\frac{1}{2}$  million gallons each, and is a little less than the cost of the Mulwarree pumping scheme.

In deciding on the relative merits of these several schemes, it will be necessary to consider in connection with their cost which of them is and is likely to remain the most pure and permanent source of supply with the amount of storage provided.

In the absence of any records of flow, &c., beyond what I have above stated, local experience, with the result of the analysis, which will be included in the Appendix to this Report, will be the most competent to decide.

The

The cost of distributing the water in Goulburn will be in proportion to the length of streets to be piped. The plan shows about 21 miles of streets, and about  $8\frac{1}{2}$  miles of these streets are occupied by allotments containing buildings, which would require about 587 tons of iron pipes.

For distributing the water I propose that a standpost shall be fixed in the streets, at the centre of each 10-chain block, from which water can be drawn by the inhabitants; seventy standposts will be required for this purpose.

Fire hydrants should be fixed at distances of about 250 feet apart, for the purpose of watering the roads, extinguishing fires, &c.; about 200 hydrants would be necessary.

The total cost of these distributing works, with necessary sluices, at present price of iron, would be about £9,000, and commencing at the service reservoir in Cowper-street would be the same in all cases.

For the management of these works the following establishment will be necessary:—

One mechanic superintendent, with residence,	£
per annum ... ..	250
One engine tender, with residence, at £3 per	
week ... ..	156
One labourer, with filters, &c., at £2 10s. ...	130
Coals, at £1 per ton, oil, tallow, and stores, &c.	417
Repair to engine, &c., say ... ..	100
Sand for filters ... ..	50
	<hr/>
Total working expenses per annum ...	£1,103
	<hr/>
By capitalizing these annual expenses at 5 per	
cent., the amount is ... ..	22,000
Cost of pipe distribution in all cases ... ..	9,000
	<hr/>
Total ... ..	£31,000
	<hr/>
Estimate for the Wollondilly pumping scheme	
No. 1 ... ..	19,600
Add above ... ..	31,000
	<hr/>
Total ... ..	£50,600
	<hr/>
Estimate for Mulwarree pumping scheme ...	15,000
Add above ... ..	31,000
	<hr/>
Total ... ..	£46,000
	<hr/>
Estimate for Wollondilly pumping scheme No. 2	14,214
Add above ... ..	31,000
	<hr/>
Total ... ..	£45,214

and 5 per cent. per annum on these several sums will be the cost of distributing 250,000 gallons per day throughout the inhabited portion of Goulburn.

The above estimates have been made while waiting for information in the form of surveys, levels, &c., in several probable sources of supply by gravitation, and to enable me to determine the cost within which a gravitation scheme would be more economical.

As it is probable that the necessary information may not all be obtained in time for my examination, I shall now consider the probable annual working expenses for such a scheme, should it be found practicable from the Wollondilly in the neighbourhood of Pomeroy. Assuming that it is practicable, the race for bringing the water into Goulburn would be about 28 miles long, and it will require for its inspection and repair the attention of two men.

The

The annual working expenses will then be:—

1 mechanic superintendent and residence ...	£250
2 men in charge of race and residence ...	260
1 man in charge of filters, and residence ...	130
Sand for filter, &c. ... ..	50
	<hr/>
Total annual expenditure ...	£690
	<hr/>
Which amount capitalized at 5 per cent. amounts to...	£13,800
Add cost of distributing pipes, &c. ... ..	9,000
1 settling tank, 2 filters and connections, houses for workmen, storage reservoir, and land, &c. ...	5,600
	<hr/>
	£28,400
	<hr/>
The estimate for pumping scheme, as above is... ..	£46,000
	<hr/>

From this it is evident that the total cost of the dam and race in a gravitation scheme must not exceed the difference between these two sums, £17,600, which includes the dam with its outlets and waste weir, the race, land, and fencing; for if the cost be greater than this amount, the gravitation scheme will be more expensive than the pumping scheme.

Seeing the desirability for obtaining a large storage of water, I examined the country in the neighbourhood of Goulburn, to ascertain whether an artificial lake can be formed by the construction of a dam across some natural creek; and a considerable amount of time and expense has been incurred in the necessary surveys, levels, &c., by Mr. District-Surveyor Twynam and his assistants, and Mr. Fuller, who has assisted me in this inquiry also.

Two sites for dams were investigated with this view in addition to the one described at page 4.

The first was on the Green Gully Creek which falls into the Sully Ponds; a dam at the point marked A on the plan No. 5, with a maximum height of 31 feet, would intercept an area of about 30 acres of water, with a storage capacity of 20 $\frac{1}{4}$  million gallons. The length of the embankment is nearly 500 feet, and the earthwork in its construction would amount to 30,000 cubic yards.

The level to which the water would be drawn off was however found to be 2,175.44 over datum, or 11 feet lower than the service reservoir in Cowper-street.

The length of the race in this case would probably be about 7 miles. The fall in the race for this distance, together with the loss of head for working the water through the settling tanks and filters, would require an additional elevation of about 54 feet, and for the want of this elevation, as well as the comparatively small storage, this scheme was abandoned.

The Sully Ponds Creek, at the place shown at the crossing of Tuena Road, and marked B on the plan No. 5, has also been investigated as the site for a dam. Here an embankment 370 feet long, with a maximum height of 33 feet, would hold back an area of 60 acres of water, with a capacity of 69 million gallons in 20 feet of depth. This dam would contain 33,000 cubic yards of earthwork, and could be drawn off 20 feet in depth to a level of 2170.4 feet over datum, or 5 feet lower than in the case of the embankment on the Green Gully Creek. Favourable as this site appears to be, it must also be rejected, as of insufficient elevation to give the required pressure in Goulburn without pumping.

These dams, though inapplicable for the purpose required, may at some time be useful as auxiliary to a pumping scheme on the Wollondilly, or for any of the many purposes to which water can be applied in this Colony.

The Sully Ponds embankment would for a comparatively small cost form a very fine reservoir, and the rather extensive waste weir which would be necessary for so large a drainage area as 51 square miles could be obtained without any great difficulty.

The

The only remaining probable source of supply by gravitation is from the Wollondilly, in the neighbourhood of Pomeroy. I personally examined this locality, and the levels which have been taken since show that the height of the river-bed above Mr. Woore's mill, where a dam formerly existed, is 2,237·65 feet above datum, whereas the site of the service reservoir in Goulburn is 2,186·82 feet, a difference of 50·83 feet only, whereas a race of 28 miles in length would require, with the fall through filters, &c., not less than 100 feet. A further investigation of a creek falling into the Wollondilly, near Pomeroy, was also made by Mr. Surveyor Deane and Mr. Fuller, whose report is given in the Appendix, page 10.

From this it appears that even though the desired elevation may be obtained, this creek is occasionally dry, and a large storage reservoir would be necessary, and for this no site can be found.

Unless further investigation of this locality prove that a more suitable locality can be found, which appears to me improbable, it will be necessary to decide which of the three pumping schemes is the most desirable to be adopted as the source whence Goulburn must obtain its water supply. I think, moreover, that if obtained, the length of race necessary (not less than 28 miles) and the rocky character of the country through which it would be brought would involve a greater expense than the sum £17,600, which I have shown at page 7 must not be exceeded to ensure any economy over the pumping schemes.

The total first cost of the works, the annual expense of working, together with interest on capital expended, and the cost per 1,000 gallons of water delivered, are as follows:—

		First Cost.	Annual expenditure for working expenses and interest.	Cost of water per 1,000 gallons.
Wollondilly scheme, No. 1	...	£28,600	2,530	6·4 pence
"    No. 2	...	23,214	2,261	5·95 "
Mulwarree	... ..	24,000	2,300	6·0 "

Or, the difference per 1,000 gallons for the more extensive storage on the Wollondilly is  $\frac{1}{2}$ d. per 1,000 gallons, and I am of opinion that the probable greater purity of the water which this storage reservoir would ensure would be well worth the additional cost.

The annual value of premises in Goulburn for assessment is £27,000. I would recommend that a rate of 9d. in the £ be levied for the water, and for public purposes, such as extinguishing fires, watering roads, &c., and that this amount gives to every rate-payer the right to draw any quantity of water required for domestic purposes, from the public standposts, while those who wish to have the water "laid on" to their premises should pay for the same by meter, at the rate of 1s. per 1,000 gallons.

The proceeds of a 9d. rate in £27,000 is £1,013 per annum; this would require the daily sale of 87,000 gallons per day, at 1s. per 1,000 gallons, to cover the annual expenditure; and I have great confidence that when the comfort and convenience of a good supply of water is experienced this quantity would be largely exceeded, and the works prove remunerative to the authorities, and enable them to extinguish the debt incurred by the construction of the works; then the surplus revenue could be applied to effecting public improvements in the town, or to a reduction of the rate, as might appear to be most desirable.

The streets in Goulburn are  $1\frac{1}{2}$  chain, or 99 feet, in width, and considerable expense will be saved to house-owners, together with benefit to the distributing works, by placing a service main on either side of the street, near the edge of the footpath. Probably, on account of the expense, very few of the streets in Goulburn could at first have two pipes laid in them; and in selecting on which side the pipe should be placed, the probability of the sale of water should be considered.

Not

Not being in possession of the analysis of the water, I am unable at present to state definitely the scheme which I would recommend for adoption. Supposing, however, that the water is of equal purity, I think that any one may be adopted with confidence; but the more perfect settlement of the water which the No. 1 Wollondilly scheme admits of, before passing on to the filters, would more effectually overcome the difficulty which will be experienced with the other schemes when the races are in a turbid condition.

Some additional powers would be required by the authorities to carry out these works, requiring a legislative enactment. These have been referred to in my Reports on Bathurst and Orange, and need not here be repeated.

W. CLARK,  
M. Inst. C. Engineers.

---

P.S.—Since the foregoing was in print I have received a further communication from Mr. Deane, given in the Appendix, dated 5th November, 1877, enclosing another dated 24th September, 1875, on the subject of the creeks falling into the Wollondilly, near Pomeroy, as a probable source for supplying Goulburn with water.

Where a creek ceases to run for any considerable period, in an ordinary year, I think it is unsafe to adopt as a source of supply in this climate, unless the storage provided is ample, especially when the water is to be conveyed through a long open earthen channel such as this must be; one year's supply, with sufficient to meet the loss of evaporation, would probably be required in such a position. Mr. Deane's local experience on this subject deserves every consideration, and it may be desirable to investigate further the possibility of obtaining the water from the creeks he alludes to, but I think I should not be justified in any protracted inquiry on this question.—W. CLARK.

## APPENDIX.

F. J. Fuller, Esq., to W. Clark, Esq., M. Inst. C.E.

Sir,

Goulburn, 2 November, 1877.

According to verbal instructions received from you yesterday afternoon, I this morning accompanied Mr. Deane, licensed surveyor, to the heads of Turner's Creek, about 23 miles from Goulburn, which creek flows into the Wollondilly at Pomeroy, and in which he informed you the necessary height for a gravitation scheme could be obtained.

Before starting I compared the aneroid barometers, noted their reading and difference, and took one with me.

Mr. Deane's idea was that sufficient height could be obtained in this creek to throw the water from a dam on to the Main Dividing Range, and then to bring it into Goulburn, on the end of the range, at the back of the Roman Catholic College.

I find from reduced barometrical observations that the height of this hill is 205 about Auburn-street, opposite the Royal Hotel.

The part of the range pointed out by Mr. Deane as the only low place where the water could be brought over, and so along the top, and which is situated on the creek, I found to be 400 feet above Auburn-street. Here however there was not sufficient catchment area; I therefore proceeded down the creek about 2 miles, the barometer showing a fall of 205 feet, Mr. Deane stating that we were still 5 miles from the junction of this creek with the Wollondilly. The point we had thus arrived at was only 195 feet above Auburn-street, and 10 feet below the point of the range at the back of the Roman Catholic College.

As the hill on which you propose to place the daily service reservoir is 68 feet above Auburn-street, this quantity must be deducted from the 195 feet, leaving 127 feet for the purpose of race, filters, &c. Allowing 25 feet for filters we have left 102 feet for race, thus reducing the hydraulic gradient to something under 4 feet per mile.

The great drawback to this scheme however is as follows:—The fall in this creek, as proved, is some 200 feet in 2 miles, and as the flats do not exceed 10 chains in length, and do not average more than 3 chains in width, the sites (of which there are only three in this distance) where impounding reservoirs could be made are insufficient to reach to anything like the quantity required, viz., 130 million gallons. Thus, though the water might be brought in, yet in my opinion the storage capacity is quite insufficient to guarantee such an outlay as would be required for a gravitation scheme to supply Goulburn with water.

Trusting that this information will be satisfactory to you to enable you to make your decision as to its practicability,—

I have, &c.,

FRANCIS J. FULLER.

Francis J. Fuller, Esq., to Mr. Licensed-Surveyor Deane.

My dear Sir,

William-street, Goulburn, 2 November, 1877.

Mr. Clark has requested me to ask you for an expression of your opinion as to the possibility of obtaining an impounding reservoir on the creek we visited to-day, and between the head and the junction with "Sheet-of-water Creek," to contain 130 million gallons of water, after allowing for evaporation, 1 acre of water of average depth of 1 foot, containing about  $\frac{1}{4}$  of a million gallons.

If you will do this at your earliest opportunity, you would oblige,—

Yours very truly,

FRANCIS J. FULLER.

Mr. Licensed-Surveyor Deane, Esq., to W. Clark, Esq., M. Inst. C.E.

Sir,

Goulburn, 5 November, 1877.

In reply to Mr. Fuller's note of the 2nd November instant, I have the honor to enclose herewith, for your perusal, a copy of my report to the Surveyor General, dated 24th September, 1872, No. 75/69, making certain recommendations with reference to reservation of land from sale for future water supply to Goulburn; and in reference thereto, I would beg to state that I still hold the opinion therein expressed, and think that the project of obtaining such supply from the sources of Gurrunda (sometimes called Heffernan's or Turner's) Creek is worthy of consideration and careful inspection of the locality. I may add that the watershed of Gurrunda Creek is about 40 square miles, and that a very considerable elevation may be obtained with corresponding and moderate diminution of area towards the several sources of this watercourse.

I have, &c.,

E. R. DEANE.

[Enclosure.]

[Enclosure.]

Mr. Licensed-Surveyor Deane to The Surveyor General.

Sir,

Goulburn, 24 September, 1875.

I have the honor to submit the following matter to your notice as deserving your consideration, thinking my intimate knowledge of the County of Argyle may in this case prove valuable to the public.

I have heard the supply of water to Goulburn by gravitation spoken of, and would desire to point out that the upper part of the watershed of Gurrunda Creek might be made available for this purpose. The natural conditions afford facilities for construction of a dam which would retain an immense supply of water to be carried by means of an open race, following along the Dividing Range (to the south of the Wollondilly River), without necessitating the crossing or flowing over any creeks, to a reservoir which might be provided on the heights at the back (on the west) of the city of Goulburn. There this water might be retained at such a height that the pressure in the pipes might be utilized for machinery. The length of race would be about twenty miles.

Should you think favourably of this scheme thus barely and briefly indicated, I would suggest that the extensive watershed towards the head of Gurrunda Creek should be inspected, the character of the water in the numerous springs and creeks analysed, and a large reserve be at once proclaimed for preservation of water supply.

The country is trap, overlying slate and altered rocks, and springs of course break out in all directions, and run in nearly all seasons. The land is not suitable for small farms, but several small patches are likely to be taken up within the next few years, and such occupation might hereafter materially interfere with the scheme now proposed.

I have the honor to submit this proposed reservation for your consideration in this preliminary form, and await an expression of your wishes as to further particulars, or to reply to any question you may ask.

I feel it is needless to do more than refer to the great benefit such a race along the Dividing Range would be to the small farms along its course, the owners of which have now in dry seasons to cart all their water from the Wollondilly River.

I have, &amp;c.,

E. R. DEANE.

The Government Analyst to The Principal Under Secretary.

Sir,

22 November, 1877.

Herewith I have the honor to forward my report respecting the samples of water received from your office on the 14th instant.

I fear that the perfect removal of the suspended clay from either of the waters will be found somewhat troublesome, but if this be effected I have no doubt that the water so treated will then be fairly good.

I have, &amp;c.,

CHAS. WATT,

Government Analyst.

22 November, 1877.

Each sample was allowed to settle before analysis.

Parts per 100,000.

	Total Solid matter.	Volatile at a red heat.	Chlorine.	Saline Ammonia.	Organic Ammonia.
Mark "M," no date .....	11.7	1.7	1.96	.01	.032
"W," "3/11/77" .....	11.76	2.1	2.66	.008	.034

*Remarks.*

These samples of water were found to be very similar in every respect. They cannot be considered as suitable in their present state for domestic purposes. They both contained fine clay in suspension, which did not show any tendency to deposit, and gave them a somewhat milky appearance. If they can be *efficiently* filtered so as to remove the suspended clay they will be very much improved in other respects. The solid matters after ignition were found to consist of silicate of alumina, oxide of iron, chloride of sodium, and small quantities of salts of lime and magnesia.

CHAS. WATT.

## LIST OF PLANS.

- 1.—General plan, showing proposed reservoir, settling tanks, filters, and line of pipes to the town.
- 2.—Section of Wollondilly reservoir, tunnel, and filter.
- 3.—Plan of service reservoir.
- 4.—Plan and sections of Mulwarree settling tanks and filters.
- 5.—Local sketch showing the position of the Green Gully and Sully Ponds, &c.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## PUBLIC WATER SUPPLY.

(PETITION FROM BOROUGH COUNCIL OF WAGGA WAGGA.)

*Ordered by the Legislative Assembly to be printed, 29 January, 1878.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the Borough Council of Wagga Wagga,—

MOST RESPECTFULLY SHOWETH:—

That, in the opinion of your Petitioners, the subject of a plenteous supply of pure water is one which vitally affects and influences the moral and physical condition of all communities and centres of population.

That is one which viewed under any of its many aspects, or considered under the numerous important phases it presents, entitles it to be dealt with by special and liberal legislation.

That (in a climate like ours especially) it is a subject which forcibly and prominently obtrudes itself as a great national question, to be taken up by the State and treated as one directly and seriously influencing the very highest interests of the people.

That the fact must be well known to your Honorable House, that the existing revenue of corporate towns in the Colony, even when supported by the inadequate and uncertain endowment contributed by the Government, are wholly insufficient to meet a tithe of the cost necessary for the construction of water-works of the most economic and least expensive character, even in favoured localities possessing the most extended natural advantages towards so desirable a work.

That your Petitioners, earnestly believing that the question of a Public Water Supply should be dealt with as one of the very first subjects of national importance and public policy, would respectfully express their opinion that, under suitable legislation for an equitable division of necessary expenses between the Government and the people, it should be compulsory on all corporate towns to construct permanent works sufficient to supply their inhabitants with an abundance of pure water for sanitary purposes.

That your Petitioners, believing in the probability of the introduction of a new amended Municipal Bill for your consideration shortly, earnestly hope and pray that your Honorable House will exercise such a supervision thereof as shall ensure provision being made for a comprehensive system of Public Water Supply in and for all corporate towns throughout the Colony.

And your Petitioners, as in duty bound, will ever pray, &c., &c.

THOMAS HODSON,  
Mayor.

Municipal Council Chamber,  
Wagga Wagga, 22 December, 1877.

1877-8.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

**PUBLIC WATER SUPPLY.**

(PETITION FROM MAYOR AND ALDERMEN OF ARMIDALE.)

*Ordered by the Legislative Assembly to be printed, 19 February, 1878.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The memorial of the Borough Council of Armidale,—

MOST RESPECTFULLY SHOWETH:—

That in the opinion of your Petitioners the subject of a plenteous supply of pure water is one which vitally affects and influences the physical and moral condition of all communities and centres of population.

That it is one which viewed under any of its many aspects, or considered under the numerous important phases it presents, entitles it to be dealt with by special and liberal legislation.

That in a climate like ours especially it is a subject which forcibly and prominently intrudes itself as a great national question, to be taken up by the State and treated as one directly and seriously influencing the very highest interests of the people.

That the fact must be well known to your Honorable House, that the existing revenues of corporate towns in the Colony, even when supported by the inadequate and uncertain endowment contributed by the Government and wholly insufficient to meet a tithe of the cost necessary for the construction of Water Works of the most economic and least expensive character, even in those favoured localities possessing the most extended natural advantages towards so desirable a work.

That your Petitioners earnestly believing that the question of a public water supply should be dealt with as one of the very first subjects of national importance, and public policy would respectfully express their opinion that under suitable legislation for the equitable division of the necessary expenses between the Government and the people it should be made compulsory on all corporate towns to construct permanent works sufficient to supply their inhabitants with an abundance of pure water for sanitary purposes.

That your Petitioners, believing in the probability of the introduction of a new amended Municipal Bill for your consideration shortly, earnestly hope and pray that your Honorable House will exercise such a supervision thereof as shall ensure provision being made for a comprehensive system of public water supply in and for all corporate towns throughout the Colony.

1877-8.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

**PUBLIC WATER SUPPLY.**

(PETITION FROM MUNICIPALITY OF HAY.)

*Ordered by the Legislative Assembly to be printed, 12 March, 1878.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Memorial of the Municipal District Council of Hay,—

MOST RESPECTFULLY SHOWETH :—

That in the opinion of your Petitioners the subject of a plenteous supply of pure water is one which vitally affects and influences the physical and moral condition of all communities and centres of population.

That it is one, viewed in any of its many aspects, or considered under the numerous important phases it presents, entitles it to be dealt with by special and liberal legislation.

That in a climate like ours especially it is a subject which prominently and forcibly obtrudes itself as a great national question to be taken up by the State, and treated as one directly and seriously influencing the very highest interests of the people.

That the fact must be well known to your Honorable House that the existing revenues of Corporate towns in the Colony, even when supported by the inadequate and uncertain endowment contributed by the Government, are wholly insufficient to meet a tithe of the cost necessary for the construction of water-works of the most economic and least expensive character, even in those favored localities possessing the most extended natural advantages towards so desirable a work.

That your Petitioners, earnestly believing that the question of a public water supply should be dealt with as one of the very first subjects of national importance and public policy, would most respectfully express their opinion that suitable legislation should be obtained for the equitable division of the necessary expenses of constructing water supply works to corporate towns.

That your Petitioners, believing in the probability of an introduction of a new or amended Municipal Bill for your consideration shortly, earnestly hope and pray that your Honorable House will exercise such a supervision thereof as shall ensure provision being made for a comprehensive system of public water supply in and for corporate towns throughout the Colony.

And your Petitioners, as in duty bound, will ever pray.

*[Here follow 6 signatures.]*

1877-8.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MUNICIPALITY OF GLEN INNES.

(PETITION OF RATEPAYERS RESPECTING BOUNDARIES.)

*Ordered by the Legislative Assembly to be printed, 29 January, 1878.*

To the Honorable the Legislative Council and Legislative Assembly, in Parliament assembled.

The humble Petition of the undersigned Ratepayers of the Municipal Council of Glen Innes, in the Colony of New South Wales,—

SHOWETH:—

1. That the majority of your Petitioners reside at an average of five miles from the Town of Glen Innes aforesaid, and are land-holders.

2. That the majority of your Petitioners reside at a considerable distance from the Main North Road, and consequently have to make roads from your Petitioners' residences to the Main North Road, and keep the said roads in repair, at a great loss of time and expense to your Petitioners.

3. That your Petitioners' property is annually assessed, and your Petitioners have to pay rates on the same without deriving any benefit therefrom.

4. That the Municipal Council of Glen Innes aforesaid has not heretofore made or repaired the said roads, and your Petitioners are led to believe that it is not the intention of the said Municipal Council of Glen Innes to keep the said roads in repair, or to contribute to the reparation of the same.

5. That the boundary of the Municipality of Glen Innes aforesaid at present extends north from the Court House five miles, south from the Court House seven miles, with an average breadth of one mile and a half.

6. That your Petitioners are led to believe that the Municipal Council of Glen Innes aforesaid consent to the curtailment of the boundaries of the said Municipality, as will be seen by the copy resolution hereunto annexed.

Your Petitioners therefore humbly pray that your Honorable House will take into your favorable consideration the premises, with the view of curtailing the boundaries of the said Municipality; and your Petitioners would respectfully suggest that the boundaries of the said Municipality should extend two miles north, two miles south, two miles east, and two miles west from the Court House at Glen Innes aforesaid.

And your Petitioners, as in duty bound, will ever pray.

Dated at Glen Innes, this twentieth day of November, A.D. 1877.

[Here follow 125 signatures.]

## NEW SOUTH WALES.

## MUNICIPALITIES.

(BOROUGH OF PARRAMATTA—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 5th November, 1877.

## BOROUGH OF PARRAMATTA.

## BY-LAWS.

THE following By-laws, made by the Council of the Borough of Parramatta, for the control and maintenance of order in Alfred Square, at Parramatta, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

JOHN ROBERTSON.

## BOROUGH OF PARRAMATTA.—BY-LAWS.

## BY-LAWS for the control and maintenance of order on Alfred Square.

- 1st. The public shall at all times have free access to the said Square.
- 2nd. Any person or persons obstructing the thoroughfare, creating a disturbance, fighting, or using obscene language in Alfred Square shall be liable to a penalty not exceeding forty shillings or less than ten shillings.
- 3rd. No cricketing-wicket shall be pitched so as to obstruct the thoroughfare.
- 4th. Any person or persons found destroying the trees, fencing, seats, or any property that may be erected by the Council on the said Square, shall be liable to a penalty of forty shillings in addition to the amount of damage done.
- 5th. Any person or persons found cutting the grass without having first purchased the right to the same, or obtained permission from the Mayor to do so, shall be liable to a penalty not exceeding twenty shillings or less than two shillings and six-pence.

Passed at a meeting of the Borough Council, held on Monday, the 2nd day of July, 1877.

SYDNEY WICKHAM, Council Clerk.

CHARLES J. BYRNES,  
Mayor.

1877-8.

**MUNICIPALITIES.**

(BOROUGH OF MUDGEES—BY-LAW.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.Colonial Secretary's Office,  
Sydney, 3rd January, 1878.

BOROUGH OF MUDGEES.

BY-LAW.

THE following By-law relating to fires, made by the Council of the Borough of Mudgees, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the requirements of the Municipalities Act of 1867.

MICHAEL FITZPATRICK.

BOROUGH OF MUDGEES.—BY-LAW.

BY-LAW passed by the Council of the Borough of Mudgees, held on the 21st day of November, 1877, as follows:—

IF any chimney accidentally catch or be on fire, the person occupying or using the premises in which such chimney is situate, shall be liable to a penalty not exceeding forty shillings and not less than ten shillings.

Provided always that such penalty shall not be incurred if such person prove to the satisfaction of the Justices before whom the case is heard that such fire was in no wise owing to the omission, neglect, or carelessness whether in respect to cleaning such chimney or otherwise, of himself or his servant.

Dated at Mudgees, this 22nd day of November, 1877.

GEO. DAVIDSON, Mayor.

1877-8.

(BOROUGH OF THE GLEBE—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 3rd January, 1878.

## BOROUGH OF THE GLEBE.

## BY-LAWS.

THE following By-laws, made by the Council of the Borough of the Glebe, for enforcing a building fee and for the prevention of careless and reckless driving and riding in the Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

MICHAEL FITZPATRICK.

## BY-LAW to enforce a building fee in the Borough of the Glebe.

EVERY person who shall erect any new building within the said Borough, shall before commencing such building pay a building fee of five shillings to the Council Clerk for the benefit of the Borough; and any person who shall neglect to pay such fee, shall for every such offence forfeit and pay any sum not less than ten shillings nor more than two pounds.

Passed by the Municipal Council of the Borough of the Glebe, this 12th day of November, 1877.

(L.S.) G. WIGRAM ALLEN, Mayor.

W. DE BURGH HOCTER, Council Clerk and Surveyor.

## BY-LAW to prevent careless and reckless driving and riding in the Borough of the Glebe.

ANY person who shall ride or drive round and upon the corner of any street, road, or public-place, within the said Borough, at a pace faster than a walk, shall on conviction forfeit and pay a sum not exceeding two pounds, nor less than ten shillings for every such offence.

Passed by the Municipal Council of the Borough of the Glebe, this 12th day of November, 1877.

(L.S.) G. WIGRAM ALLEN, Mayor.

W. DE BURGH HOCTER, Council Clerk and Surveyor.

(BOROUGH OF WATERLOO—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 7th January, 1878.

## BOROUGH OF WATERLOO.

## BY-LAWS.

THE following By-laws, relating to the day of meeting of the Council, and regulating the width of streets in the Municipality, made by the Council of the Borough of Waterloo in substitution of the By-laws passed on the 21st of March, 1872, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

MICHAEL FITZPATRICK.

## BOROUGH OF WATERLOO.

BY-LAWS made by the Council of the Borough of Waterloo for altering the day of meeting of the Council, and amending the By-laws regulating the width of streets, of the twenty-first day of March, 1872.

1. That "By-law No. 1," part 1, of the twenty-first day of March, 1872, be altered so as to read every alternate "Friday" instead of every alternate "Wednesday" as heretofore.
2. That By-laws "one and two" of part "four," of the twenty-first day of March, 1872, is hereby repealed as to that portion of it which regulates the width of streets, and in lieu thereof that henceforth any street may be made by the Council irrespective of its width.

Made and passed by the Municipal Council of the Borough of Waterloo, the twenty-ninth day of August, A.D. one thousand eight hundred and seventy-seven.

P. HOGAN,  
Mayor.

## MUNICIPALITIES.

(BOROUGH OF WEST MAITLAND—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 7th January, 1878.

## BOROUGH OF WEST MAITLAND.

## BY-LAWS.

THE following By-laws, made by the Council of the Borough of West Maitland, for regulating and licensing vehicles plying for hire within the Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

MICHAEL FITZPATRICK.

## BOROUGH OF WEST MAITLAND.

BY-LAWS for regulating and licensing vehicles plying for hire within the Borough of West Maitland.

THE Council of the Borough of West Maitland do, by virtue of the power and authority vested in such Council by the Municipalities Act of 1867, hereby make the following By-Laws for regulating and licensing vehicles plying for hire within the said Borough of West Maitland, and declare that the same shall stand in the place of and instead of all By-Laws heretofore in force, which By-laws heretofore made are hereby repealed.

In the construction of these By-laws unless the context shall otherwise indicate the following terms in inverted commas shall bear the meaning and include the things hereinafter severally assigned or set against them:—

- "Council."—The Borough Council of West Maitland.
- "Inspector."—The Inspector or Sub-Inspector now or hereafter to be appointed by the said Borough Council.
- "Proprietor."—Every person who alone or in partnership with any other person, shall keep any vehicle for which a license shall or may be obtained by or transferred to him under these By-Laws.
- "Driver."—Every person engaged or employed in driving any vehicle.
- "Conductor."—Every person other than the driver engaged or employed in attending upon passengers in or upon any omnibus.
- "Passenger."—Every person carried in or upon any vehicle other than the driver or conductor.
- "Horse."—Horse, mare, gelding.

1. The word "vehicle" in these By-laws shall include and apply to every omnibus, car, hackney carriage, cab, or buggy. An omnibus shall mean a vehicle upon four wheels drawn by one or more horses, and a car shall mean a vehicle upon two wheels, for which omnibus licenses have been taken out, and a hackney carriage shall mean a vehicle upon four wheels

drawn by two or more horses, and a cab shall mean a vehicle upon two wheels drawn by one horse, and a buggy shall mean a vehicle upon four wheels, drawn by one or more horses, plying for hire within the Borough of West Maitland; and in the construction of these By-laws any word importing the singular number shall be understood to include several persons or things as well as one person or thing, and any word importing the plural number shall be applied to one person or thing, and every word importing the masculine gender shall extend and be applied to a female as well as a male.

2. From and after the 1st day of January, one thousand eight hundred and seventy-eight, no vehicle shall ply for hire, nor shall any person act as driver or conductor of any such vehicle within the said Borough of West Maitland until and unless licensed for such purpose in the manner hereinafter mentioned, nor during the suspension or after cancellation of such license as hereinafter provided.

3. Before any license for plying any such vehicle, or for driving or conducting the same shall be granted, the party requiring such license shall obtain from the Council Clerk, free of charge, a requisition in the form of Schedule A hereto, or to the like effect and shall duly fill up and sign the same and deliver it to the Council Clerk and shall also insert in such requisition in addition to the particulars set forth in Schedule A hereto, tables of rates and fares proposed to be charged by such party for any such vehicle. And in the case of drivers and conductors shall obtain a certificate from two respectable ratepayers to the effect that the applicant is of good character and competent to act as such driver or conductor as the case may be, and shall also obtain from the Inspector a certificate that the vehicle for which a license is applied for is fit for the accommodation and conveyance of passengers.

4. The Mayor for the said Borough for the time being shall be and is hereby authorised to issue all such licenses in the name and on behalf of the said Borough Council, and the Mayor shall by indorsement on such license signify his approval of the scale of rates proposed to be charged for the hire of any such vehicle so licensed.

5. Licenses for proprietors, drivers, or conductors of vehicles shall be in the form of Schedule B hereto or to the like effect, and shall be made out, numbered, and registered by the Council Clerk.
6. Every license granted by the Mayor shall bear the impression of the Seal of the said Borough Council, and shall be signed by the Mayor and countersigned by the Council Clerk, and shall be in force until the thirty-first day of December next ensuing the date thereof, and no such license shall include more than one vehicle, and shall state the number of passengers such vehicle shall be permitted to carry.
7. For every vehicle license and for every renewal thereof there shall be paid to the said Borough Council the sum of two pounds annually if the license be granted on or after the first day of January and on or before the thirty-first day of March in every year, and if after that date then in the following proportions:—If on or before the thirtieth day of June the sum of thirty (30) shillings, if on or before the thirtieth day of September the sum of twenty (20) shillings, and if after that date the sum of ten (10) shillings.
8. For every conductor's or driver's license and for every renewal thereof there shall be paid to the said Borough Council the sum of five shillings.
9. The person or persons in whose name or names a license shall have been obtained shall be deemed the proprietor of the vehicle in respect of which such license shall have been taken out.
10. No license shall be granted to any person to drive any vehicle unless he be above seventeen years of age, nor to act as conductor unless he be fourteen years of age.
11. Every driver or conductor licensed under these By-laws shall whilst driving or conducting any vehicle, wear a badge on the left breast outside his clothing, such badge to be furnished free of charge at the time of the issue of the license, and the said driver or conductor shall keep the same clean and in good order.
12. No proprietor shall be at liberty to part with or lend his license, and any proprietor transferring or selling his licensed vehicle shall immediately give notice thereof to the Council Clerk, and the transferee or purchaser shall thereupon apply to have the license transferred to him, and shall sign his name in the books of the said Borough Council and on the license, and until this By-law shall have been complied with the transferor or seller shall remain liable as owner for breach of any of these By-laws, and no transferee or purchaser shall use such vehicle or allow it to ply for hire until this By-law shall have been so complied with.
13. No driver or conductor of any licensed vehicle shall lend or part with his license, nor shall the proprietor of any such vehicle employ an unlicensed person as the driver or conductor thereof.
14. Every proprietor, driver, or conductor of any vehicle, and every vehicle shall be deemed to be licensed under these By-laws on the production by the Inspector of the License Register Book containing a copy of any such license; and it shall not be necessary to call upon the person prosecuted to produce the original license to enable the prosecutor to give secondary evidence of its contents.
15. Every person or persons and all and every vehicle shall be deemed to be unlicensed unless it appears, on the production of the License Register Book by the Inspector, that a license had been duly issued.
16. The license of the proprietor, driver, or conductor of any vehicle may be cancelled or suspended by the Mayor for the time being of the said Borough Council as he shall deem right (after three days notice in writing signed by the Council Clerk and served upon such proprietor, driver, or conductor, or left at his usual place of abode, calling upon him to show cause why such license should not be cancelled or suspended, and opportunity given such proprietor, driver, or conductor to show such cause), in case either the proprietor, driver, or conductor shall have been convicted of two offences against these By-laws committed within a period of six months next preceding.
17. Such person or persons as may from time to time be appointed by the said Borough Council shall be the Inspector or Sub-Inspector of all licensed vehicles plying for hire within the said Borough, and such Inspector or Sub-Inspector shall as often as he or they may deem necessary inspect all licensed vehicles, and also the harness and horse or horses or other animal or animals used in drawing the same; and if such vehicles, horse or horses, animal or animals shall in his or their opinion be unfit for public use he shall report the same in writing to the Mayor who shall have power to suspend the license of such vehicle until such vehicle, harness, horse or horses, or other animal or animals used in or drawing the same shall be in a fit state for public use, and it shall be the special duty of such Inspector at all times to see that as far as possible these By-laws are duly observed and enforced.
18. No proprietor, driver, or conductor of any vehicle nor any other person, shall hinder or obstruct such Inspector or Sub-Inspectors in the execution of any of his or their duties.
19. The number of the license granted for every omnibus or car in figures not less than four inches in height, and for every hackney carriage, cab, or buggy in figures not less than two inches in height and of proportionate breadth, white upon a ground of black, shall be printed or painted outside on the panel of the door or doors of such vehicles, or on a plate or plates fixed thereon, and also upon each lamp used upon such vehicle as the Inspector may direct, and the proprietor of such omnibus or car, hackney carriage, cab, or buggy shall keep such number on such panel of the door or doors or on such place or places as aforesaid legible and undefaced during all the time such vehicle shall ply or be used for hire.
20. The number of the license of every omnibus or car, or hackney carriage or cab, or buggy on a card or plate six inches by three inches, printed or painted in clear legible figures, and the table of fares so indorsed by the Mayor upon such license as aforesaid, shall be affixed at the upper part of the front panel or in such other place inside of such omnibus or car, or hackney carriage or cab, or buggy, as the Inspector may direct, and the proprietor of such omnibus or car, hackney carriage, cab, or buggy, shall keep such card or plate so affixed and legible and undefaced during all the time the omnibus or car, hackney carriage, cab, or buggy shall ply or be used for hire.
21. No proprietor or driver of any licensed vehicle shall demand more than the several fares indorsed on the license of such vehicle.
23. The places specified in Schedule C hereto annexed are hereby respectively appointed public stands for licensed vehicles, provided that the Council may from time to time, as they shall see fit, abolish or alter the number and situation of the above stands.
24. The proprietor or driver of any licensed vehicle shall not permit the same to stand for hire except at or from an appointed stand.
25. The driver of any omnibus having started with such omnibus from any public stand shall complete the journey to the other stand without turning round or leaving High-street; and the driver of any omnibus who shall have started from or having passed the public stand at the southern side of High-street, next to where the Great Northern Railway crosses High-street, shall not turn his omnibus round or leave High-street until he reaches the public stand on the north side High-street at its junction with Hannan-street.
26. The driver of any omnibus shall not ply for hire at the public stand in Elgin-street, nor shall such driver be on such stand with his omnibus at any time other than ten minutes before the arrival of any passenger train and five minutes after its departure. Nor shall the driver of any omnibus proceed to the said stand in Elgin-street by any other route than along the said Elgin-street, and shall only be in such street for the *bonâ fide* purpose of proceeding to each public stand to meet passenger trains.
27. No driver or conductor of any vehicle whilst standing at his proper stand (or on Sundays in any part of the said Borough) shall endeavour to attract notice by shouting, ringing of bells, blowing of horns, or other noise, nor shall deceive any person in respect of the route or destination of such vehicle by word or sign.
28. The first omnibus or car that arrives at any public stand shall be the first to start therefrom, and the others in due rotation in the order in which they arrive at such stands, at intervals of not less than ten minutes.
29. At every second vehicle on every stand there shall be left a space of at least ten feet for passengers on foot to pass through.
30. Every vehicle on its arrival at any such public stand shall be drawn at the end of and be the last of the rank of any vehicles that may be there on such stand and at every public stand. All vehicles shall be arranged in single rank only.
31. No driver of any vehicle shall suffer the same to stand or loiter in any street, or alongside any other vehicle, nor obstruct the driver or conductor of any other vehicle in taking up or setting down any person, or wilfully or wrongfully or forcibly prevent or endeavour to prevent the driver or conductor of any other vehicle from taking a passenger or fare.
32. No driver or conductor shall, when standing on a public stand or plying for hire, be at such a distance from the horse or horses attached thereto, as to prevent his having control over the same, nor shall the driver or conductor at any time stand by or remain on the footway or pavement of the street next adjoining any public stand, but every driver and conductor when not actually employed in or about his vehicle, shall remain on the driving box or steps of his vehicle and not elsewhere.
33. The driver of any vehicle taking up or setting down passengers at any place of public worship or public amusement, or at any public meeting within the said Borough of West Maitland, or who is waiting for any of those purposes, shall obey the directions of the Inspector as to the taking up or setting down, or waiting for passengers, and as to the order and place in which any vehicle shall stand, and every driver shall

perform his duty in a careful and quiet manner, and shall not push into or get out of the line or position fixed for the vehicles so as to endeavour to arrive at his place of destination before any other vehicle, the driver whereof, from its position would have a prior right to take up or set down passengers.

34. No driver or conductor of any vehicle shall, whilst driving, loading, or unloading, or attending any vehicle or whilst on any public stand wilfully or negligently do or cause or suffer to be done any damage to the person or property of any one, or be guilty of any breach of the peace, misconduct, or ill-behaviour, or be intoxicated or make use of any threatening, obscene, indecent, profane, abusive, or insulting language, sign, or gesticulation, but shall at all times be sober and careful in the discharge of his duties.

35. Every driver whilst engaged in taking up or setting down any passenger, shall during such taking up or setting down place his vehicle as near as conveniently may be to that side of the street (and at a line with the kerbstone or edge of the footpath) at which such taking up or setting down is required.

36. No driver shall, except when standing on an appointed stand, permit his vehicle with or without a horse or horses, to stand in any part of the said Borough longer than may be absolutely necessary for loading or unloading, or for taking up or setting down passengers, nor shall he cause any obstruction in any part of the said Borough.

37. Every driver of any vehicle shall keep the same on the left or near side of the road, and shall permit any other vehicle to pass, having the right so to do, and when about to stop such driver shall raise his whip straight up so as to warn the driver of any vehicle that may be behind.

38. The driver of every vehicle in turning the corner of any street within the said Borough, shall bring the horse or horses drawing such vehicle to a walking pace.

39. No omnibus shall pass another omnibus proceeding in the same direction if the latter be proceeding on its journey at a pace faster than a walk.

40. No licensed vehicle shall be drawn at a pace faster than that commonly known as trotting. And in the event of the conviction of any driver for a breach of this by-law his license shall be cancelled by the Mayor.

41. The proprietor of every vehicle shall at all times when the same is plying or employed for hire, make and keep it clean, strong, and in good order in all respects, and if with windows they shall be sound and unbroken, with the leathers or lifts suitably attached to the frames. The horse or horses shall be able and sufficient for their work, free from disease, and properly broken into harness; the harness for each horse shall be perfect, good, and sufficient for the purpose; and every driver or conductor shall be clean in his person, and wear a good hat and other clean and respectable clothes, and conduct himself in a proper and decorous manner.

42. No person suffering from an infectious or contagious disease shall ride in or upon any licensed vehicle, and no driver or conductor shall knowingly carry, or permit to be carried, any such person or (except to some police office or watch-house) any corpse or any person in a state of intoxication, or who is so noisily or violently conducting himself, or otherwise so misbehaving as to occasion any annoyance or to disturb the public peace. And no passenger shall carry inside any vehicle any animal or any substance of an offensive character, or that might soil or damage the vehicle, or the apparel of other passengers; and no driver or conductor shall sleep in or upon any licensed vehicle, or use the same for eating his meals therein.

43. No driver of any vehicle shall carry more passengers than his vehicle is licensed to carry, nor shall the driver of any cab carry any passenger or other person, on the driver's box or step behind the same, nor shall the driver or conductor of any omnibus or omnibus car permit or suffer any person, except the conductor to be on the foot-steps at the back of any such omnibus or omnibus car.

44. No driver or conductor shall smoke tobacco, cigars, or other thing, whilst driving or conducting any licensed vehicle engaged on any fare, nor shall any passenger smoke inside or on any vehicle without the permission of the driver, or against the wish of any passenger.

45. The driver and conductor of every licensed vehicle (if such vehicle has a conductor) shall be constantly attendant upon the same whenever standing, or whilst plying or engaged for hire.

46. Every licensed vehicle shall be provided with a lamp on each side of the same outside, and the driver of such vehicle, when plying for hire, between sunset and sunrise, shall light and keep such lamps lighted.

47. The driver of every omnibus and omnibus car shall provide and keep a lamp properly lighted in such a position inside of every such licensed vehicle as the inspector may direct, whenever such vehicle be plying for hire or engaged at any time between sunset and sunrise.

48. Every lamp used on the outside of any vehicle shall be such and so placed as to appear white on the front and outside and red behind.

49. Every omnibus for which a license shall hereafter be applied for shall be of the dimensions herein directed, and shall be provided with the fittings and furniture detailed and described as follows,—From floor to roof, in line with front of each seat, not less than five feet; from top of seat of cushion to roof not less than three feet six inches; each seat shall be not less than fourteen inches wide; space from seat to seat between the inside seats not less than two feet; the outside seats when not of the rustic pattern and all inside seats shall be furnished with good cushions; springs shall be provided to all window frames of an approved pattern effective to prevent noise; a bell or check string to warn the driver to stop when required; two lamps outside, one on each side of the omnibus, and one lamp inside of the colour prescribed by these By-laws.

50. When an application is made for a license for any other omnibus than those in use at the time of the passing of these By-laws, it shall be the duty of the Inspector to see that the fittings and furniture are complete, as detailed and provided for in the last preceding By-law, are properly affixed to such omnibus, and the Inspector shall not grant a certificate to any such omnibus unless it shall be of the dimensions set out in such By-law.

51. Any person having engaged any licensed vehicle and not paying the charge so endorsed as aforesaid upon the license of such vehicle when demanded, shall on conviction forfeit and pay the proprietor or driver of such vehicle such charge, together with such further sum for damages, costs, and expenses for loss of time or otherwise as the convicting Justices shall in their discretion think proper.

52. No vehicle which shall be let to hire by special agreement only, or only when bespoken at the stables or residence of its owner, and which shall never publicly ply for hire off the premises of its owner, shall be deemed a licensed vehicle within the meaning of these By-laws; nor shall the proprietor, driver, or conductor of such vehicle be subject to the provisions thereof in any respect whatever.

53. For every offence against the provisions of these By-laws the offender shall be liable to and shall pay a penalty not exceeding ten pounds nor less than five shillings; and such penalty shall be recoverable before any two Justices in Petty Sessions according to the provisions of the Act fourteen Victoria number forty-three and the Acts therein adopted.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(MUNICIPAL DISTRICT OF GULGONG—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 15th January, 1878.

## MUNICIPAL DISTRICT OF GULGONG.

## BY-LAWS.

THE following By-laws made by the Council of the Municipal District of Gulgong, for regulating the proceedings of the Council, the collection of rates, and for the general good rule and government of the Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

MICHAEL FITZPATRICK.

## MUNICIPALITY OF GULGONG.

BY-LAWS to regulate the proceedings of the Municipal Council of Gulgong, the collection of rates, and for the general good rule and government of the Municipality.

## Preamble.

WHEREAS it is expedient that provision should be made for regulating the proceedings of the Council of the Municipality of Gulgong, it is hereby ordered by the said Council, by virtue of the powers and authority vested in the said Council in that behalf, that the following shall be the By-laws and Standing Orders for regulating the proceedings of the said Council, &c.

## PART I.

*Proceedings of the Council and Committees, preservation of order at Council Meetings, duties of officers and servants, &c.*

## Meetings of the Council.

1. The Council shall meet for the dispatch of business at the hour of 7 p.m. on every alternate Wednesday, unless such day shall happen to be a public holiday; in the latter case the meeting shall be held on such other day as the Council may appoint.

## Election of Chairman in absence of Mayor.

2. If at any meeting of the Council the Mayor shall not attend within thirty minutes after the time appointed for holding such meeting, the Aldermen then present shall proceed to elect from among themselves a Chairman for such meeting. Whenever there shall be an adjournment of any meeting for want of a quorum, the names of the members present shall be taken down, and shall be recorded in the minute book.

## Standing Orders of the Council.

3. All questions duly proposed and seconded shall be put by the Mayor or Chairman, and the sense of the Council thereon shall be declared by him.

4. The Mayor or Chairman shall preserve order, and his decision on disputed points of order shall be final.

5. Every member of the Council who shall commit a breach of any section of this "Part" of the By-laws, or who shall move or attempt to move any motion or amendment embodying any matter as to which the Council has no legal jurisdiction, or who shall in any other way raise or attempt to raise any question, or shall address, or attempt to address the Council, upon any subject which the said Council has no legal right to entertain or to discuss, or who shall use any other language which, according to the common usage of gentlemen, would be held disorderly, or who shall say or do anything calculated to bring the Council into contempt, shall be out of order.

6. A member called to order shall withdraw while the question of order is being discussed and decided upon, unless specially permitted to offer an explanation, retraction, or apology; but on obtaining such special permission, such member may explain, retract, or apologize for the matter or remark alleged to have been out of order; and if such explanation, retraction, or apology be deemed satisfactory, no further discussion on the question of order shall be permitted. If any member, on being called to order, shall ask such permission to explain, retract, or apologize as aforesaid, the Mayor or Chairman may, of his own authority, grant or refuse such permission as he may think fit, unless any member shall require the sense of the Council to be taken on this question. In such case it shall be the duty of the Mayor or Chairman to take the sense of the Council at once, and without discussion, as to whether such permission shall be granted. And when any such explanation, retraction, or apology shall have been made or offered by permission of the Mayor or Chairman, the latter shall in like manner decide, or if required so to do, shall take the sense of the Council as to whether such explanation, retraction, or apology is considered sufficient. If such permission be refused, or if such explanation, retraction, or apology be considered insufficient, the question of order shall be considered and decided before any other business is proceeded with: Provided that if such Mayor or Chairman shall have decided the question of order before any member shall have required the sense of the Council to be taken in reference thereto, such question of order shall not be re-opened. And provided further, that nothing herein contained shall be

held to affect the right of such Mayor or Chairman to decide finally, as hereinbefore provided, upon any such point of order after the same shall have been discussed.

7. No member shall deviate from the subject under debate, or make personal reflections on any other member.

8. The Mayor or Presiding Alderman may, without waiting for the interposition of any member of the Council, call to order any member proceeding to speak a second time on the same question (except in explanation, and without introducing any new matter). The member introducing a motion to have the right of reply; and every member shall have the liberty of speaking once on every amendment, as well as on the original motion.

9. Any Alderman may at any time call the attention of the Mayor to any Alderman being out of order, or to any other point of order.

10. The Council shall vote by show of hands, but any Alderman may divide the Council on any question, both in full Council or in Committee of the Whole, in which case every Alderman there present shall be compelled to vote; and all divisions shall be entered in the Minute Book.

11. No notice shall be taken by the Mayor or Presiding Alderman of any motion unless it be seconded.

12. All notices of motion or amendment thereon shall be in writing, dated and signed by the Alderman proposing the same, previous to being handed to the Council Clerk, and shall not be withdrawn without the leave of the majority of the Council.

#### Order of business.

13. 1. Reading and confirming Minutes of last meeting.
2. Reading copies of letters sent.
3. Reading letters received, and ordering thereon.
4. Presentation of Petitions.
5. Miscellaneous (considering tenders, &c.)
6. Considering reports of Committees.
7. Motions of which notice has been given.
8. Orders of the Day.

Provided that the Council may, by resolution without notice, entertain any particular motion or deal with any particular matter of business out of its regular order on the business paper, without any formal suspension of this section; and may in like manner direct that any particular motion or matter of business shall have precedence at a future meeting.

#### Time for speaking.

14. No member shall speak on any motion or amendment longer than ten minutes, unless by permission from the Council.

#### Adjournment of debate.

15. A debate may be adjourned to a later hour of the same day, or to another day specified.

#### Member entitled to pre-audience.

16. The member upon whose motion any debate shall be adjourned shall be entitled to pre-audience on the resumption of the debate.

#### Motion for adjournment.

17. Any motion for adjournment, if seconded, shall be immediately put without discussion; but if such motion be negatived it shall not be competent for any member to make a like motion until the lapse of a quarter of an hour.

#### Rescinding resolution.

18. It shall be competent to give notice of motion for the rescinding of any resolution on the same day on which such resolution shall have been passed by the Council.

#### Call of the whole Council.

19. No motion, the effect of which if carried would be to rescind any motion which has already passed the Council, shall be entered on the business paper unless a call of the whole Council has been duly made.

#### Call—how ordered.

20. A call of the Council may be ordered by resolution, without notice, for the consideration of any question of which previous notice has been given.

#### Mode of proceeding.

21. The call shall be made immediately before the motion or business for which such call has been ordered, or is required to be made by the last preceding section, shall be moved or considered. Such call shall be made as follows:—The Council Clerk shall call the names of all the members in their alphabetical order; each member present shall answer to his name as so called, and if any members are absent a record shall be made of such absence; but if leave of absence to any such member shall have been previously granted, or if such an excuse, in writing, shall have been forwarded to the Mayor or Council Clerk as a majority of the Council then present shall consider satisfactory, such absent member shall stand excused, and a record shall be made of such excuse, and of the reasons for the same.

#### Penalty for absence without legal excuse.

22. Any member of the Council who, having had notice of such call of the Council, shall not answer to his name as aforesaid, or who being absent, shall not be legally excused as aforesaid, or who, if absent and not so excused, shall fail to show that, by reason of extreme illness or any other sufficient cause, he has been unable to send an excuse, in writing, as aforesaid, or who, having answered to his name as aforesaid, shall not be present when a vote is taken on the motion or business as to which such call has been made as aforesaid, shall for every such offence be liable to a penalty of not less than ten shillings nor more than five pounds: Provided that if the consideration of every such motion or matter of business be adjourned to a future day, there shall be a further call on the resumption of such consideration, and the provisions herein, as to penalties for absence, shall have reference to such further call; and if there shall be more than one adjournment, this proviso shall be taken to extend to the resumption of the consideration of such motion or matter of business after every such adjournment.

#### Question to be read when required.

23. Any member may require the question under discussion to be read for his information at any time during the debate, but not so as to interrupt any other member whilst speaking.

#### Council Clerk to give notice of Committee meetings.

24. The Council Clerk shall call a meeting of any Committee when requested so to do by the Chairman or any three members of such Committee.

#### Petitions—no debate.

25. On the presentation of a Petition no debate shall take place until notice has been given in the usual manner, and the only question that can be entertained by the Council on the day of its presentation shall be that the Petition be received, or that it be referred to a Committee.

#### Language of petitions.

26. It shall be incumbent on any Alderman presenting a petition to acquaint himself with the language thereof, and to report to the Council that he considers it unobjectionable.

#### Petitions of parties signing.

27. All petitions shall be received only as the petitions of the parties signing the same.

#### Committees.

28. Before appointing such special Committees as from time to time shall be found necessary, there shall be a Standing Finance Committee, which shall examine and check all accounts and shall watch generally over the collection and expenditure of the municipal revenues. They shall inquire and report from time to time as to all matters which they may consider to affect or be likely to affect the finances of the Municipality, and as to such matters or subjects of the like nature as they may be directed by resolution of the Council to inquire and report upon. Such Committee shall be appointed by resolution of the Council within thirty days after the election of the Mayor for the municipal year.

#### Committee of the Whole.

29. The By-laws as to the proceedings of meetings of the Council shall be observed in Committee of the whole Council, except the rule limiting the times of speaking.

#### Chairman of Committees.

30. Every Committee of which the Mayor shall not be a member shall elect a permanent Chairman of such Committee, and such Chairman may direct the Council Clerk to call meetings whenever he shall think it expedient.

#### Report to be signed.

31. Every report of a Committee shall be signed by the Chairman thereof.

#### Funds of Municipality.

32. No work affecting the funds of the Municipality shall be undertaken until the probable expense be first ascertained by the Council, and all accounts to be paid by the Council shall be examined before any warrant shall be issued for the payment thereof: Provided that in cases of emergency the Mayor, with the assent of any two Aldermen, may authorize the expenditure of any sum not exceeding ten pounds, and such expenditure shall be reported to the Council at its next sitting.

#### Security.

33. In cases where security is required by the Municipalities Act of 1867, no security shall be accepted otherwise than by a vote of the Council.

#### Books and papers not to be shown.

34. No officer or servant appointed by the Council shall be at liberty to show, lay open, or expose any of the books, papers, or records of the Council to any person not a member of the Council, except as provided by law.

**Common Seal.**

35. The Common Seal shall not be affixed to any document without the express authority of the Council, and every impression thereof shall be verified by the signatures of the Mayor and Council Clerk, or in the absence of the Mayor by the signatures of three Aldermen and the Council Clerk.

**Seal, Charter, &c., where kept.**

36. The seal of the Municipality, and all charters, deeds, and records of the Council, shall be kept in the custody of the Council Clerk, unless the Council shall otherwise order.

**Records of transactions in Committee.**

37. The Chairman of each Standing Committee shall make or cause to be made, in a book to be kept by him for that purpose, memoranda of all transactions of such Committee, which book he shall, on ceasing to be such Chairman, hand over to his successor.

**How books of account are to be kept and inspected.**

38. The Treasurer shall keep such books of account, and such records, statements, and memoranda of receipts and expenditure, in such manner and form as the Council may from time to time direct. It shall be the duty of the Finance Committee to inspect all such books of account, records, statements, and memoranda from time to time, to ascertain that the same are properly kept, and to report at once to the Council any act of neglect or appearance of inefficiency which they may have discovered in the keeping of the same; also to report to the Council, from time to time, any changes which such Committee may think advisable in the mode of keeping the accounts.

**Impression of Seal not to be taken, &c.**

39. No member or officer of the Council shall be at liberty to take any impression of the Corporate Seal, or to show, lay open, or expose any of the books or records of the Council to any person other than a member of the same without leave from such Council, except as otherwise provided by law. Any member or officer of the Council who shall be guilty of a breach of this section shall be liable on conviction, for the first offence, to a penalty of not less than five shillings nor more than two pounds; for a second offence, to a penalty of not less than one pound nor more than ten pounds; and for a third and every subsequent offence, to a penalty of not less than five pounds nor more than twenty-five pounds.

**Penalty for defacing or destroying record.**

40. Any person destroying, defacing, or altering any record of the Council, shall for every such offence be liable to a penalty of not less than five pounds nor more than twenty pounds.

**Notice to candidates for office.**

41. No appointment to any permanent office at the disposal of the Council shall take place until public notice shall have been given as hereinafter provided, inviting applications from qualified candidates for the same. The salary or allowance attached to such office shall in every case be fixed before such advertisement is published, and shall be stated in such advertisement.

**Mode of appointment.**

42. Every such appointment shall be made by ballot, in such mode as may at the time be determined on, whenever there is more than one candidate for such permanent office.

**Exceptional cases. ?**

43. Nothing herein contained shall be held to prevent the appointment by the Council, without advertisement, of any salaried officer or servant of the Corporation to any other permanent office or employment at the disposal of such Council to which no further salary is attached; or to prevent the appointment in like manner of any such officer or servant to any other office or employment of which the duties require only occasional attention and are to be paid for by allowances proportionate to the extent of such duties; or to prevent any similar employment or appointment by the Mayor or by any Committee or officer of the Council of any such officer or servant, under the authority of any By-law; or to prevent the employment, as may be from time to time found necessary, and as may be ordered by the Council or Chairman of Committee, of any workman or labourers on the public works of the Municipality.

**Bonds for good conduct.**

44. All bonds given by officers or servants of the Council for the faithful performance of their duties shall be deposited with the attorney or bankers of the Corporation, as the Council may order, and no officer or servant of the Council shall be received as surety for any other such officer or servant.

**Duties of Council Clerk.**

45. The Council Clerk, in addition to the duties which by the Municipalities Act of 1867, or by the present or any other By-laws thereunder, he may be required to perform, shall be the Clerk of all Revision Courts held in the Municipality under the provisions of the said Municipalities Act. He shall also,

under the direction of the Mayor, conduct all correspondence which may be necessary on the part of the Council. He shall likewise have charge of all the records of such Council, except such books or documents as may (as hereinbefore and hereinafter provided) be entrusted to any other officer, and shall be responsible for the safe keeping of such records. He shall generally assist the Mayor in carrying out the orders of the Council and the duties of such Mayor.

**Mode of calling for Tenders.**

46. Whenever it is decided that any work shall be executed or any materials supplied by contract, tenders for the execution of such work or the supply of such material shall be called for by public notice.

**PART II.****Collection and enforcement of rates.****Times and modes of collection.**

47. All rates levied or imposed by the Council under the provisions of the "Municipalities Act of 1867," and for the purposes mentioned in the said Act, shall be collected once a year. And such rate shall be held to be due and payable on and after such days as the Council shall by resolution appoint at the time of making or imposing such rate.

**Rates to be paid at office of Council Clerk.**

48. All rates made and authorized by the Council shall be paid within the time prescribed by the Act at the Council Chamber of the Municipality, at such hours and such days as the Council shall from time to time appoint.

**Unpaid rates.**

49. The Council Clerk shall prepare, at such times as may be ordered by direction of the Mayor, a list of the names of all persons whose rates are unpaid at the expiration of the time fixed for the payment of the same; and the Mayor shall take immediate proceedings either by summons or by the issue of distress warrants against defaulters.

**Bailiff.**

50. The Bailiff shall be appointed by resolution of the Council, and shall be at any time removable by a like resolution, or by the 152nd clause of the Act, and shall give such security as the Council shall approve of for the faithful performance of the duties of such office.

**Levies and distresses.**

51. The Bailiff shall make all levies and distresses for the recovery of rates under the warrant of the Mayor; such warrant to be made in accordance with the form in Schedule hereto annexed marked A.

**Entry and levy.**

52. The Bailiff shall be paid for entry and levy made under these By-laws according to the Schedule annexed marked C.

**Making a distress.**

53. At the time of making a distress the Bailiff shall forthwith make out a written inventory in the form or to the effect of the Schedule annexed marked B, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person on his or her behalf, resident in the place where the distress has been made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted in some conspicuous part of the land or premises on which the distress has been made, and the Bailiff shall deliver a copy of such inventory to the Council Clerk for the information of all parties concerned.

**Bailiff to enter upon land, &c.**

54. It shall be lawful for the Bailiff, and such assistants as he may require, to enter into any part of the land, building, tenement, or other property in respect of which a warrant has been issued for the recovery of any rate or rates as aforesaid, and to distrain the goods therein or thereon, and to remain in such building, tenement, or other property in charge thereof; and if the sum for which distress shall have been made or taken shall not be paid on or before the expiration of five days, it shall be lawful to sell the goods so distrained or a sufficient portion thereof, by public auction, either on the premises or at such other place within the Municipal District as the said Bailiff may think proper to remove them to for such purpose; and the surplus, if any, that may remain after deducting the sum distrained for, together with the expenses attendant upon such distress, shall be paid over on demand to the owner of the goods so sold: Provided always that nothing herein contained as to the time of sale shall apply to any crop of cereals, fruit, or vegetables, which may be growing at the time when such distress shall be made.

**The Bailiff may impound.**

55. The Bailiff when making a distress as aforesaid may impound or otherwise secure the distress so made, of what nature or kind soever it may be, in such places or in such part of the land or premises chargeable with the rate as shall be

most fit and convenient for such purpose; and it shall be lawful for any person whomsoever, after the expiration of the five days hereinbefore mentioned, to come and go to and from such place or part of the said land and premises where any distress shall be impounded and secured as aforesaid, in order to view and buy, and to carry off and remove the same on account of the purchaser thereof.

*Goods how to be sold.*

56. The owner of any goods or chattels so distrained upon may, by writing, direct and specify the order in which they shall be successively sold, and the said goods and chattels shall in such case be put up for sale according to such direction.

*Proceeds of sale to be paid to Council Clerk.*

57. The Bailiff shall hand over to the Council Clerk all proceeds of such distresses within twenty-four hours after such sale, also the copy of every inventory and account of every such sale or sales.

*Bailiff may appoint deputy.*

58. The Bailiff, with the sanction in writing of the Mayor, may authorize any person, in writing, to act temporarily as his deputy, and the person thus authorized shall have and exercise for the time being all the powers of the Bailiff himself, but the Bailiff and his sureties shall in such case be held responsible for the act of such deputy.

### SCHEDULE A.

*Warrant of Distress.*

I,                     , Mayor of the Municipality of Gulgong, do hereby authorize you,                     , Bailiff of the said Municipality, to distrain the goods and chattels of the dwelling-house, or in and upon the land and premises of                     , situate at                     , for the sum of £                     , being the amount of municipal rates due to the said Municipality, to the                      day of                     , for the said dwelling-house, land or premises, as the case may be, and to proceed thereon for the recovery of the said rate according to law.

Dated this                      day of                     , 187                     .

Mayor.

### SCHEDULE B.

*Inventory.*

I HAVE this day, in virtue of a warrant under the hand of the Mayor of the Municipality of Gulgong, dated                     , of which a copy is attached hereto, distrained the following goods and chattels in the dwelling-house, or in or upon the land and premises of                     , situate at                     , within the said Municipality, for the sum of £                     , being the amount of rates due to the said Municipality to the day of                      187                     .

Dated this                      day of                     , 187                     .

Bailiff.

*(List to be appended.)*

### SCHEDULE C.

*Costs.*

	s.	d.
For every warrant of distress.....	4	0
For serving every warrant and making levy.....	2	6
For making and furnishing copy of inventory.....	2	6
For man in possession each day or part of a day.....	5	0
For sale and delivery of goods, any sum not exceeding one shilling in the pound on the gross proceeds of the sale, at the discretion of the Council, in addition to the costs of advertisements (if any).		

### PART III.

*Preventing and extinguishing fires.*

*Fire or combustible materials, &c.*

59. Every person who shall place, or knowingly permit to be placed, in any house, yard, workshop, out-offices, or other premises, fire, gunpowder, or combustible or inflammable materials of any kind, in such a manner as to endanger contiguous buildings, shall, on conviction of every such offence, forfeit and pay a penalty of not more than five pounds; and shall forthwith remove such fire, gunpowder, or combustible or inflammable materials. And every such person who shall suffer any such fire, gunpowder, or combustible or inflammable materials to remain as aforesaid for twenty-four hours after such conviction shall be deemed guilty of a further offence against this By-law.

*Inflammable fences, &c.*

60. Every person who shall erect any fence of brushwood, bushes, or other inflammable material, or shall make or place any stack of hay, corn, straw, or other produce, or place as or for the covering of any such stack any inflammable material so as to endanger contiguous buildings or properties, or any trees, shrubs, or other produce thereof, or any chattels therein, shall forfeit on conviction for every such offence, a penalty of not more than five pounds, and shall also remove such fence, stack, or covering within a reasonable time after such conviction. And any person failing to remove such fence, stack, or covering within a reasonable time after such conviction as aforesaid, shall be deemed guilty of a further offence against this By-law.

*Setting fire to matter.*

61. Every person who shall wilfully set fire to any inflammable matter whatsoever in the open air, without taking all due and proper precautions against the spreading of the said fire to the injury of himself and neighbours, shall forfeit a sum not exceeding five pounds.

*Wilfully setting fire to chimneys.*

62. Every person who wilfully sets or causes to be set on fire any chimney, flue, smoke-vent, or stove-pipe, herein called in common "chimney," shall forfeit a sum not exceeding five pounds.

*Negligently suffering chimney to be on fire.*

63. If any chimney catch or be on fire the person occupying or using the premises in which such chimney is situated shall forfeit a sum not exceeding forty shillings: Provided always that such forfeiture shall not be incurred if such person prove to the satisfaction of the Justices before whom the case is heard, that such fire was in no wise owing to the omission, neglect, or carelessness, whether with respect to cleansing such chimney or otherwise, of himself or his servant.

*Occupier of house to keep water.*

64. For the extinguishing of fires, the occupier of every dwelling-house, warehouse, or shop, or other building within the boundaries of the Town of Gulgong, shall at all times keep therein or upon the land appertaining thereto, in some fit butt or tank, water in quantity not less than fifty gallons; and every such occupier who shall make default contrary to this section shall forfeit a sum not exceeding twenty shillings.

*Compensation for attendance at fires.*

65. There shall be paid out of the municipal funds to the owner of every licensed water-cart who shall have attended with any water at the place of any fire, as herein provided, and delivered the same as required for extinguishing such fire, such reasonable compensation as the Council shall, by resolution, have appointed in that behalf; and also to such owners of such carts as shall have first and second in order attended with loads of water such further sums by way of reward as the Council may by similar resolutions have fixed.

### PART IV.

*Streets and public places, public health and decency.*

*Driving carriages, &c., on footpaths, &c.*

66. Any person who shall throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or to remain, any ashes, rubbish, offal, dung, soil, dead animal, blood, or other filth or annoyance, or any matter or thing, in or upon the carriageway or footway of any street or other public place in the said Municipality,—or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other animal, in or so near to any such street or other public place as that any blood or filth shall run or flow upon or over or be on any or either of any such carriage or foot way,—or shall run, roll, drive, draw, place, or cause, permit, or suffer to be run, rolled, driven, drawn, or placed, upon any of the said footways of any such street or public place, any waggon, cart, dray, sledge, or other carriage, or any wheel, wheelbarrow, handbarrow, or truck, or any hogshead, cask, or barrel,—or shall wilfully lead, drive, or ride any horse, ass, or mule, or other beast, upon any such footway,—shall upon conviction forfeit and pay, for the first offence a sum not exceeding forty shillings nor less than five shillings, for the second offence a sum not exceeding five pounds nor less than ten shillings, and for a third and every subsequent offence a sum not exceeding ten pounds nor less than one pound for each such offence.

*Dead animals, &c., not to be thrown in any public watercourse, &c.*

67. Any person who shall cast any filth, rubbish, or any dead animal, or any animal with intent of drowning, into any public watercourse, sewer, waterhole, river, creek, or canal,—or who shall suffer slops, suds, or filth of any kind to flow from his or her premises into any such watercourse, sewer, waterhole, river, creek, or canal,—or who shall permit or suffer any such slops, suds, or filth to flow from his or her premises over any of the footways or streets of the Municipality,—or shall permit or cause, by means of pipes, shoots, channels, or other contrivances, filth of any kind whatsoever to flow into any public watercourse,

sewer, waterhole, river, creek, or canal,—or shall obstruct or divert from its channel any such sewer, or watercourse, river, creek, or canal, shall forfeit any sum not exceeding five pounds, and shall pay the cost of removing such filth or obstruction, or of restoring such sewer, watercourse, river, creek, or canal, to its proper channel.

Swine not to be kept, &c.

68. Any person who shall breed, feed, or keep any kind of swine in any house, building, yard, garden, or other hereditament, situate and being in or within 40 yards of any street or public place in the said Municipality,—or shall suffer any kind of swine, or any horse, ass, mule, sheep, goat, or other cattle, belonging to him or her, or under his or her charge, to stray or go about, or to be tethered or depastured, in any such street or public place,—shall on conviction forfeit and pay for such offence a sum not exceeding forty shillings nor less than five shillings.

As to private avenues.

69. Any owner or occupier of any house or place within the said Municipality who shall neglect to keep clean all private avenues, passages, yards, and ways within the said premises, so as by such neglect to cause a nuisance by offensive smell or otherwise, shall on conviction forfeit and pay a sum not exceeding forty shillings nor less than ten shillings for every such offence.

Cleansing butchers' shambles, slaughter-houses, &c.

70. For preserving the cleanliness of the said Municipality, and the health of the inhabitants thereof, it shall be lawful for the Inspector of Nuisances, or for any other officer or officers appointed by the Council from time to time, and when and as often as he or either of them shall see occasion, to visit and inspect the butchers' shambles, slaughter-houses, boiling-down establishments, tanneries, and felmongering establishments in the said Municipality, and to give such directions concerning the cleansing the said shambles, slaughter-houses, tanneries, and establishments both within and without as to him shall seem needful; and any butcher, or the owner or occupier of any such shamble, slaughter-house, tannery, or establishment, who shall refuse or neglect to comply with such directions within a reasonable time shall forfeit and pay a sum not exceeding ten pounds nor less than ten shillings.

Inspection of premises.

71. Upon the reasonable complaint of any householder, that the house, premises, yards, closets, or drains of the neighbouring or adjoining premises are a nuisance or offensive, the Inspector of Nuisances, or any other person appointed by the Council, shall make an inspection of the premises complained of; and the officer of the Council shall have full power, without any other authority than this By-law, to go upon such premises for the aforesaid purpose.

Wells to be covered over. Penalty.

72. Every person who shall have a well situated between his or her dwelling-house, or the appurtenances thereof, and any road, street, or footway within the limits of the said Municipality, or at the side of or in any yard or place open or exposed to such street, road, or footway, shall cause such well to be securely and permanently covered over; and if any person having any such well as aforesaid shall fail to cover and secure the same within twenty-four hours after notice in writing shall have been given to him or her by any officer of the said Council, or shall have been left for such person at his or her usual or last-known place of abode, or on the said premises, shall on conviction forfeit and pay not less than two shillings and sixpence nor more than twenty shillings; and for every day after such notice that such well shall remain open and uncovered contrary to the provisions hereof such person shall be deemed guilty of a separate offence against this By-law.

Drawing or trailing timber.

73. Any person who shall haul or draw, or cause to be hauled or drawn upon any part of any street or public place within the said Municipality any timber, stone, or other thing otherwise than upon wheeled vehicles or barrows, or shall suffer any timber, stone, or other thing which shall be carried principally or in part upon any wheeled vehicle or barrow, to drag or trail upon any part of such street or public place to the injury thereof, or to hang over any part of any such vehicle or barrow so as to occupy or obstruct the street beyond the breadth of the said vehicle or barrow, shall upon conviction forfeit and pay for every such offence a sum of not more than forty shillings nor less than five shillings over and above the damages occasioned thereby.

Driving carriages, &c., on footways.

74. Any person who shall run, roll, drive, draw, place, or cause, permit, or suffer to be run, rolled, driven, drawn, or placed upon any of the said footways of any such street or public place any waggon, cart, dray, barrow, or truck, or any hog-head, cask, or barrel, or shall wilfully lead, drive, ride, or leave standing or fastened up any horse, ass, or mule, or other beast upon any such footway, shall upon conviction forfeit and pay

for the first offence a sum not exceeding forty shillings nor less than five shillings, for the second offence a sum not exceeding five pounds nor less than ten shillings, and for a third and every subsequent offence a sum not exceeding ten pounds nor less than one pound for each such offence.

Riding on drays, careless driving, &c.

75. If the driver of any waggon, cart, or dray of any kind shall ride upon any such carriage in any such street as aforesaid not having some person on foot to guide the same (such carts as are drawn by one horse and driven or guided with reins only excepted), or if the driver of any carriage whatsoever shall wilfully be at such a distance from such carriage or in such a situation that he cannot have the direction and government of the horse or horses or cattle drawing the same, or if the driver of any waggon, cart, dray, or coach, or other carriage whatsoever meeting any other carriage shall not keep his vehicle on the left or near side of the road, or if any person shall in any manner wilfully prevent any other person or persons from passing him or her or any carriage under his or her care upon such street, or by negligence or misbehaviour prevent, hinder, or interrupt the free passage of any carriage, or person in or upon the same, every such driver or person so offending shall upon conviction forfeit and pay any sum not exceeding forty shillings.

Traffic may be stopped temporarily.

76. The Council, or any officer or person acting under the authority of such Council, may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped temporarily for the purpose of repairing the same.

Injury to curbstones, guttering, &c.

77. No driver, earter, or other person, shall wilfully or negligently do or suffer, or cause to be done, any damage or injury to the curbstones, gutters, or pathways of any street or roadway.

Orange peel on footpaths.

78. Any person throwing orange peel on the footpaths of the Town of Gulgong shall on conviction forfeit and pay a sum not exceeding twenty shillings.

Destroying pathways or roads.

79. No person shall be allowed to alter, cut up, or destroy the pathways or roads, or to remove loam, sand, or gravel from any of the streets or roads of the Municipality without the authority of the Council, and for such authority a fee of one shilling shall be paid.

Placing materials on streets, &c.

80. No person shall be allowed to place on the streets or pathways building materials otherwise than is absolutely necessary, and by the sanction in writing of the Mayor or Council Clerk, and no person shall be allowed to have water-holes or excavations for cellars or other purposes in or adjoining any public place unfenced, or in such a manner as to be dangerous to passers by; and all places where buildings are being carried on, or where any obstruction to the danger of passers by exists, the person causing such obstruction shall be required to provide lights on either side, and keep the same lighted from sunset to sunrise, in default the Council shall provide the same at his or her expense.

Damaging trees and shrubs, &c.

81. No person shall destroy or damage any shrub or tree growing in any street or thoroughfare, or other public place within this Municipality, or injure any hedge, fence, gate, or building in any such street, thoroughfare, or public place, or set fire to any shrubs or trees, or to cut or remove any timber from any such street, thoroughfare, or public place aforesaid, or to destroy, tear, deface, or otherwise injure any notice, proclamation, or other document purporting to be under the authority of the Council, or of any officer of the said Council, which shall be affixed in any public place.

Persons bathing.

82. No person shall bathe within two hundred yards of any public road or place, unless in some enclosed place, or otherwise in such manner as not to offend against common decency.

Exposing goods for sale.

83. No person shall place or expose for sale on the pathways or streets, carts, goods, parcels, or produce of any kind whatever to the obstruction of the public.

Driving cattle, &c.

84. Any person driving cattle other than milkers, or horses, not under proper control within the boundaries of the Town of Gulgong, between the hours of 6 a.m. and 6 p.m., shall on conviction forfeit and pay a sum not less than two shillings for each beast, and not exceeding five pounds in the aggregate; and the burden of proving that any animals the subject of any information hereunder come within the above exceptions, shall be cast upon the defendant.

## Abandoned shafts, &amp;c.

85. Any person occupying unfenced lands within the municipal boundaries, whereon waterholes or abandoned shafts exist, shall be required to secure the same to the satisfaction of the Mayor and Council.

## Penalty.

86. For every offence against the provisions of the By-laws of this Municipality, except as otherwise provided, the offender shall be liable to and shall pay a penalty not exceeding ten pounds nor less than two shillings and sixpence, to be recovered in a summary way before any two Justices of the Peace; and all other penalties and fines imposed by such By-laws, except as otherwise provided, shall be recoverable in a summary way before any two Justices of the Peace.

## Open spaces and steps to be enclosed.

87. Every owner or occupier of any house, building, premises or land within the said Town of Gulgong, having any entrance area, garden, or other open space, or any vacant building lot, waterhole, or excavated space adjoining the footway of any street or public place in such town, shall protect and guard the same by good and sufficient rails, fences, or other enclosures, so as to prevent danger to persons passing and repassing; and every such owner or occupier of any such house, building, premises, or land, having any steps adjoining the footway of any such street or public place shall in like manner protect and guard the same by fences, rails, or other enclosures, so as to prevent the like danger to persons passing and repassing; and on failure thereof, every such owner or occupier shall as often as he shall be convicted of such offence forfeit and pay any sum not being less than forty shillings nor more than five pounds. And every such owner or occupier as aforesaid who shall fail to erect such rails, fences, or other enclosures as aforesaid within five days after any such conviction as aforesaid, shall be deemed guilty of a further offence against this By-law.

## Blasting rock.

88. Any person who shall be desirous of blasting any rock within thirty (30) yards of any street or public place in the Town of Gulgong shall give notice in writing twenty-four hours previously to the Council Clerk, who shall appoint a time when the same may take place, and give such other directions as he may deem necessary for the public safety; and if any person shall blast or cause to be blasted any rock within the limits aforesaid without giving such notice, or shall not conform to the directions given to him by the said Council Clerk, he or she shall on conviction forfeit and pay for every such offence any sum not less than five pounds nor more than twenty pounds.

## Injuring or extinguishing lamps.

89. Any person who shall wantonly or maliciously break or injure any lamp or lamp-post, or extinguish any lamp set up for public convenience in the said Municipality, shall, over and above the necessary expense of repairing the injury committed, forfeit and pay for every such offence any sum not less than one pound nor more than five pounds.

## Houses of ill-fame.

90. Upon representation by any respectable ratepayer that any house or premises within the Municipality and near to the residence of such ratepayer is of ill-fame, it shall be lawful for the By-law Committee to cause the residents of such house or premises to furnish to the Council a list of names, ages, sexes, and occupation of all the inmates of the said house or premises, and upon non-compliance with such request, or if upon consideration the said Committee consider the house to be one of ill-fame, they shall with the sanction of the Council declare the same to be a nuisance, and shall cause a notice in writing to be served upon the holder of such house or premises or any person resident or being therein, to discontinue or abate the said nuisance within forty-eight hours after the receipt of such notice. And if such nuisance be not so abated, the holder of such house or premises, or other person residing or being therein and acting as such holder, shall be liable to be proceeded against for such nuisance, and shall on conviction thereof forfeit and pay any sum not less than two pounds nor more than twenty pounds. And if such nuisance shall not be abated within forty-eight hours after such conviction, such holder of such house, or such other person residing or being therein as aforesaid, shall forfeit and pay for such second offence a sum of not less than five pounds nor more than fifty pounds. And if a further period of forty-eight hours shall elapse after such second conviction without the abatement of such nuisance, such holder of such house, or other person residing or being therein as aforesaid, shall for such third offence forfeit and pay any sum not less than ten pounds nor more than fifty pounds.

## Deposit of refuse.

91. Any person who shall throw, cast, or lay any refuse or rubbish within the boundaries of the town, except at the depôts proclaimed for that purpose by the Council, shall forfeit and pay a sum not exceeding forty shillings nor less than five shillings.

## PART V.

*Public Exhibitions, &c.*

Exhibitions, &c., to be licensed.

92. No exhibition, other than exhibitions licensed by the Colonial Secretary under the provisions of the Act 14 Vic. No. 23, or as amended by 36 Vic. No. 8, or exhibitions of a temporary character hereinafter specially provided for, shall be held or kept for hire or profit within the said Municipality; nor shall any bowling-alley or other place of public amusement, other than a place licensed as aforesaid, or a place for temporary amusement hereinafter specially provided for, be used as such, for hire or profit, within the said Municipality, unless and until the same shall be duly registered as hereinafter prescribed.

## Temporary license by Mayor.

93. It shall be lawful for the Mayor, by writing under his hand, and without charge, to permit any such exhibition as aforesaid, other than an exhibition requiring to be licensed by the Colonial Secretary under the said Act, and which shall not be held or kept for more than one week; and in like manner to allow any place within the said Municipality to be used for purposes of public amusement, other than entertainments requiring to be licensed as aforesaid, for not more than one week: Provided that it shall be incumbent upon such Mayor to inquire strictly as to the nature of such proposed exhibition or amusement before granting such permission, and to refuse such permission if it shall appear that such proposed exhibition or amusement is of such a nature as to require to be licensed by the Colonial Secretary as aforesaid, or if there shall be reasonable cause for believing that such exhibition or amusement will be likely to entail any violation of public decency, to endanger the public peace, or to be a nuisance to any inhabitant of the Municipality. Every person holding or keeping any such exhibition or using any place within the said Municipality for public amusement as aforesaid, or causing or permitting such place to be so used, without such permission of such Mayor, shall forfeit and pay a sum of not less than five shillings nor more than forty shillings for every day that such exhibition shall be so held or kept, or such place shall be so used for public amusement as aforesaid.

## Public buildings, &amp;c., to be registered.

94. Every occupier of any building or ground in which any exhibition is held or kept, or any public amusement conducted as aforesaid, shall in each year register at the office of the Council such building or ground, together with the situation and description thereof, and of the exhibition proposed to be held or kept, or the public amusement proposed to be conducted as aforesaid in or upon such building or ground, and the name of such occupier. And every person who causes, and every occupier of any such building or land who permits any such exhibition to be held or kept, or any public amusement to be conducted, for a longer period than one week, in or on any such building or land not being registered for the purpose, or without such certificate of registration as hereinafter mentioned having been obtained for the same, shall forfeit for every such offence any sum not less than one pound nor more than twenty pounds.

## Certificate of registration.

95. The Council, upon the written application of any such occupier as aforesaid, stating the particulars aforesaid, and if upon inspection by the proper officer, the building or land shall have been found to be secure and proper for the purpose stated, and if the proposed exhibition or amusement shall not be such as to require a license from the Colonial Secretary as aforesaid, and shall not be thought likely to entail any violation of public decency, or to endanger the public peace, or to be a nuisance to any inhabitant of the said Municipality, the said Council shall cause the aforesaid premises to be registered in a registry-book to be kept for that purpose; and shall thereupon grant to the applicant a certificate of such registration of such premises. And the said Council may at any time, and for any of the causes hereafter mentioned, suspend for a stated period the effect of, or cancel any such registration, and shall forthwith give notice of such suspension or cancellation to the occupier of the registered building or land; and during such suspension, or after such cancellation, such premises shall be deemed to be unregistered in respect of the purpose mentioned in the certificate of registration, and such certificate shall be of no force or virtue.

## Inspection.

96. The proper officer of the Council may, at all reasonable times, enter into and upon and inspect any such registered building or land.

## No exhibitions, &amp;c., on Sundays, &amp;c.

97. No such exhibition or place of public amusement as aforesaid shall be held or kept open or used for the purposes of such public amusements on Sunday, Christmas Day, or Good Friday. And every person offending against this By-law in this behalf shall, on conviction, forfeit and pay a sum not exceeding five pounds nor less than two pounds for every such offence.

## Registration fee.

98. For every such registration as aforesaid the occupier of the building or land so registered shall pay to the Council Clerk, for the benefit of the said Municipality, a fee of one pound; and every such registration, whenever the same may be made, shall be in force until the thirty-first day of December then next ensuing and no longer.

## Certificate of registration to operate as license.

99. The certificate of registration aforesaid shall be regarded as a license from the Council for the holding or keeping of the exhibition, or for carrying on of the public amusements therein mentioned, but for none other. Any occupier of such building or land who shall hold or keep therein or thereon any exhibition, or shall use such building or land for any public amusements other than such exhibition or amusements mentioned in such certificate or license shall, for every such offence, forfeit and pay any sum not less than ten shillings nor more than ten pounds.

## Unlawful games and exhibitions.

100. No license shall be granted as aforesaid to or for any building or land wherein or whereon any games with dice or other games of chance for money, or any bull-baiting, dog-fighting, cock-fighting, or other exhibitions or amusements opposed to public morality, or involving cruelty to animals, or likely to cause any breach of the peace, are proposed to be had, held, or carried on. And the occupier of any building or land so registered as aforesaid who shall permit any such game of chance or exhibition or amusement as are in the section before mentioned to be had, held, or carried on in or upon such building shall, for every such offence, forfeit and pay a sum of not less than ten shillings nor more than ten pounds.

## Suspension or revocation of license.

101. The effect of any such registration as aforesaid may be suspended, or such registration may be cancelled as the Council shall think fit, for any of the following causes, namely:—Whenever the occupier of the registered building or land, or the manager of any such exhibition or amusement as aforesaid held, kept, conducted, or carried on in or upon such building or ground shall have been twice convicted of offences against these By-laws within a period of twelve months, or whenever it shall be shown to the satisfaction of the said Council that the Superintendent, Director, Manager, or other person in charge of any such exhibition or amusement is a confirmed drunkard, or that any such exhibition or amusement is being conducted in such a manner as to violate public decency, to endanger the public peace, or to become a nuisance to any inhabitants of the said Municipality: Provided that before any such suspension or cancellation as aforesaid the occupier of such registered building or land shall have notice of the fact that the said Council is about to consider whether there shall be any such suspension or cancellation, and of the causes for this proceeding, and shall be allowed to show cause against such suspension or cancellation before the same shall be ordered.

## Construction of term "occupier."

102. Any person who shall superintend, manage, or direct, or who shall be otherwise in charge of any such exhibition or public amusement as aforesaid, in or upon any such building or land as aforesaid, and who shall reside in or upon any such building or land wherein or whereon any such exhibition or public amusement shall be held, kept, or carried on, or who being the owner, lessee, or tenant of any such building or land, shall permit the same to be used for the purposes of any such exhibition or public amusement, shall be deemed the "occupier" of such building or land for all the purposes of these By-laws. And the said By-laws shall be held to be applicable in every case to any number of such occupiers as to any single occupier. And every such occupier whose name shall have been so registered as aforesaid shall be deemed and taken to be, and continue such occupier for all the purposes of these By-laws: Provided that in the event of any change in the occupancy of any such building or ground as aforesaid, it shall be competent for the parties concerned to notify the same, by writing under their hands, to the said Council Clerk, who shall lay such notification before the Council at its next meeting; and if after such inquiry as such Council may deem necessary there shall seem to be no valid objection to such change of occupancy, a corresponding entry shall be made in the registry aforesaid, and a new certificate shall be issued, which shall be in force until the then next ensuing 31st day of December and no longer. And for every such new certificate a fee of five shillings shall be paid to the Council Clerk for the benefit of the said Municipality. And any person who shall make any false statements in any such application or notice as aforesaid as to any of the facts or particulars required by these By-laws to be stated in such application or notice, shall for every such offence forfeit and pay any sum not less than one pound nor more than twenty pounds.

## PART VI.

## Public Vehicles.

## License.

103. No vehicle shall ply for hire, nor shall any person act as the driver or conductor of any such vehicle within the Municipality unless licensed in the manner hereinafter described, and that a separate license shall be taken out for each driver and each vehicle, and no transfer of any license for any such vehicle shall be obtained without permission of the Council.

## Schedule A.

104. Before any license for plying a vehicle, or to drive or conduct the same shall be granted, the party requiring such license shall obtain from the Council Clerk, free of charge, a requisition in the form of Schedule A hereto, or to the like effect, and shall duly fill up and sign the same and deliver it to the Council Clerk; and in the case of drivers and conductors, shall obtain a certificate from two respectable ratepayers to the effect that the applicant is of good character, and competent to act as such driver or conductor as the case may be. And meetings for the purpose of granting such licenses shall be held by the Mayor and Aldermen at the Council Chambers on such days as they may determine.

## Vehicles in bad condition.

105. No license shall be granted in respect of any vehicle which, in the opinion of the By-law Committee, or of the Mayor and any two Aldermen, shall be unsafe or in bad repair, or otherwise unfit for the accommodation and conveyance of passengers.

## Form of license, Schedule B.

106. Licenses for proprietors, drivers, or conductors of vehicles shall be in the form of Schedule B hereto, or to the like effect.

## License to continue in force to December 31st.

107. Every license granted under these By-laws shall be in force from the date of such license until the thirty-first day of December then next ensuing, and no such license shall include more than one vehicle: Provided that where the licensed vehicle shall be under repair, if the proprietor shall so desire, he may be permitted to substitute another for a period to be thereby specified by indorsement on the license, under the hand of the Council Clerk.

## Renewal of licenses.

108. Licenses may be renewed each year by indorsement thereon, under the hand of the Council Clerk for the time being.

## Fee for licenses, Schedule C.

109. For every such license and renewal thereof, there shall be paid to the Treasurer of the Municipality, for the benefit of such Municipality, the several rates set forth in Schedule C hereto.

## Licenses—how made out.

110. All licenses shall be made out by the Council Clerk, and numbered in such order as he may think fit.

## Not to part with or lend vehicle or license.

111. No proprietor shall be at liberty to part with or lend his license, nor to part with his licensed vehicle to any person, without the knowledge and approval of the Mayor, and the registry of the name of the purchaser in the books of the Council Clerk, and on the license granted for such vehicle; and any proprietor who shall part with his vehicle without such approval and registry shall be deemed the proprietor thereof, and subject as such to all the provisions of this By-law as fully as if no change of ownership had taken place; and the purchaser of such vehicle who shall allow the same to be used or ply for hire without such approval or registry, shall be subject to the same penalty as is imposed by this By-law for plying without a license.

## Who shall be deemed owner.

112. The person or persons in whose name or names a license shall appear to have been obtained shall be deemed the owner of the vehicle in respect of which the same shall have been taken out.

## License may be revoked or suspended.

113. The license of the proprietor, driver, or conductor of any vehicle may be revoked or suspended by the Mayor as he shall deem right (after three days' notice in writing given to such proprietor, driver, or conductor to show cause why the same should not be revoked or suspended, and opportunity thereupon given to show such cause) in case either the proprietor, driver, or conductor shall have been convicted of two offences against this "Part" of these By-laws, committed within a period of eight months next preceding.

**SCHEDULE A.**

*A Requisition for License to*

To the Municipal Council of Gulgong.

I, \_\_\_\_\_, residing in \_\_\_\_\_ street, do hereby request that a license may be granted to me to No. \_\_\_\_\_ within the said Municipality.

Dated \_\_\_\_\_, 187 .

**SCHEDULE B.**

*License.*

This is to certify that \_\_\_\_\_ is hereby licensed to a certain No. \_\_\_\_\_ within the Municipality of Gulgong, from the date hereof to the thirty-first day of December next, subject nevertheless to all and every the By-laws, Rules, and Regulations in force relating thereto.

Given under the Common Seal of the Municipal Council of Gulgong, this \_\_\_\_\_ day of \_\_\_\_\_, 187 .

(L.S.) \_\_\_\_\_ Mayor.

Council Clerk.

**SCHEDULE C.**

*Table of Rates to be paid.*

	s.	d.
For vehicle .....	10	0
For driver .....	2	6
For transfer .....	2	6

**PART VII.**

*Carters, &c.*

*Licenses for carts.*

114. The Council may, from time to time, license to ply for hire within the said Municipality, carts approved of by the By-law Committee for any or either of the following purposes, namely: drawing wood, water, wash-dirt, quartz, earth, stone, gravel, timber, bricks, or for any other purpose, whether hired by the day or by the load, and whether driven by the owner or by any person in the owner's employ. Licenses may also be granted for the drivers of such carts to such persons as may be approved of by the By-law Committee, such licenses to be personal to the grantee and not transferable, but the license for any cart may be transferred with the cart to any person upon approval as aforesaid, and for every such license, &c.

*Application for license.*

115. Every such license shall be granted on the written application for the same of the owner, or if there be more owners than one, of some one owner of the cart to be licensed; and in every such application shall be set forth truly the name and surname and place of abode of the applicant, and the like shall be set forth in the license when granted, which should be in the form of Schedule B hereto, or to the like effect; and any person who shall willfully omit from any such application any particular hereby required to be stated therein, or shall willfully state anything falsely touching any such particular, shall forfeit a sum not exceeding five pounds.

*Numbering, &c., of licenses and carts.*

116. Every such license for a cart shall be numbered and registered by the Council Clerk, and shall be in force from the date thereof until the 31st day of December then next ensuing; and the owner named in any such license shall cause to be painted or marked, and to be kept so painted or marked, on some conspicuous place on the right or off side of the cart thereby licensed, the name of the Municipality, with the number of such license, in legible letters and figures one inch in length and of a proportionate depth, and the words "Licensed cart" in the like letters; and every such owner who shall omit or fail to comply with the provisions of this section shall forfeit a sum not exceeding forty shillings; and every such license for a driver shall be made out in the form of Schedule C, and shall be exhibited on demand to any person authorized for that purpose by the Council.

*Plying for hire, &c., without license, &c.*

117. If any owner of any cart permit the same to stand or ply for hire within the Municipality without having a license in force for such cart, licensing or authorizing such standing, plying for hire or use respectively within such Municipality, or if any person be found within such Municipality standing or plying for hire with any cart for which no such license is in force, or without having the name of the Municipality and the number of such license and the words "Licensed cart" displayed upon such cart openly and in manner herein provided; and every person acting as driver of any licensed cart so plying as aforesaid without holding a driver's license,—every such person so offending shall, on conviction, forfeit a sum not exceeding forty shillings.

*Leaving cart unattended, &c.*

118. If the driver of any cart shall leave the same unattended in any street, whether public or private, or shall go for a distance of more than two yards from the side of such cart, being in any such street, without passing through the near wheel or wheels thereof a suitable chain or chains so as effectually to prevent the rotation of such wheel or wheels, whether in any such case such cart be hired or not, such driver shall in every such case forfeit a sum not exceeding forty shillings for such offence.

*Lights for carts.*

119. The driver of every cart which shall, during the hours after sunset of any day and before sunrise of the following day, be in any street or public place within the said Municipality, shall keep a light attached to or suspended from the off or right side of such cart so as to be plainly visible to the driver of any carriage proceeding along or through such street or place in a contrary direction to that in which such first-mentioned cart shall be directed; and every driver who shall fail to comply with this section shall forfeit a sum not exceeding forty shillings.

*Interpretation.*

120. The word "cart" shall for the purposes of this Part of these By-laws include every waggon, dray, or other such carriage, whatever be its construction, drawn by horses or other animals, used for any of the purposes hereinbefore described in section 114.

**SCHEDULE A.**

*Table of Charges for Carters' Licenses.*

	s.	d.
For cart .....	5	0
For driver .....	1	0

**SCHEDULE B.**

**MUNICIPALITIES.**

(BOROUGH OF EAST ST. LEONARDS—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 15th May, 1878.

BOROUGH OF EAST ST. LEONARDS.

AMENDED BY-LAWS.

THE following By-laws made by the Borough Council of East St. Leonards, altering the day of meeting of the Council, in substitution of the 1st By-law of Part I, passed on the 9th May, 1872, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the requirements of the Municipalities Act of 1867.

MICHAEL FITZPATRICK.

BOROUGH OF EAST ST. LEONARDS.

BY-LAWS.

*Altering day for holding Ordinary Meetings of Council.*

1. The first of the By-laws of the Council of the Borough of East St. Leonards, published in the Supplementary Government Gazette of the 18th October, 1872, has been and is hereby repealed.

2. The Council shall for the future meet for the transaction of business on the first Tuesday in every month, unless such day shall happen to be a public holiday; in the latter case the meeting shall be held on such other day as the Mayor may appoint.

Passed by the Municipal Council of East St. Leonards, on the seventh day of March, in the year of our Lord, one thousand eight hundred and seventy-eight.

R. P. ABBOTT,  
Mayor.

1877-8.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(BOROUGH OF RICHMOND—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 14th May, 1878.

## BOROUGH OF RICHMOND.

## BY-LAWS.

THE following By-laws made by the Council of the Borough of Richmond, for regulating their own proceedings and the duties of the officers and servants thereof, &c.; for determining the times and modes of collecting and enforcing payment of rates, &c.; for suppressing nuisances, &c.; as to streets; as to the public park; and for generally maintaining the good rule and government of the Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

MICHAEL FITZPATRICK.

THE following By-laws made by the Municipal Council of Richmond, for regulating their own proceedings and the duties of their officers and servants; for preserving order at meetings of the Council; for determining the times and modes of collecting and enforcing payment of rates; for suppressing nuisances, and extirpating weeds; for delegating certain powers to the Mayor; for the management of the park, and generally for maintaining the good rule and government of the said Borough, are forwarded for the approval of His Excellency the Governor, in accordance with the requirements of the Municipalities Act, 1867.

## PART I.

*Meetings of Council.*

## Ordinary Meetings.

1. The Council shall meet for the despatch of business at the hour of eight p.m. on every alternate Wednesday, unless such day shall happen to be a public holiday; in the latter case the meeting shall be held on such other day as the Mayor may appoint, and each meeting may be adjourned from day to day or otherwise, until all the business then pending shall have been disposed of: Provided also, the Council may by resolution, appoint any other hour for adjournment.

Election of Chairman in absence of Mayor—Adjournment for want of a quorum.

2. If at any meeting of the Council the Mayor be absent at the expiration of fifteen minutes after the time appointed for holding such meeting, the Aldermen then present shall proceed to elect from among themselves a Chairman for such meeting, and no Alderman shall be allowed to leave the meeting after entering upon the business of such meeting, unless permission be given by the Mayor or Chairman then presiding. Whenever there shall be an adjournment of any such meeting for want of a quorum the names of the members present shall be taken down and recorded in the minute-book.

429—A

Order of business—Business of ordinary meetings—Business may be dealt with out of order.

3. The following shall be the order of business at all meetings of the Council, other than special meetings:—

1. The minutes of the last preceding meeting to be read, corrected, if erroneous, and verified by the signature of the Mayor or other Chairman. No discussion to be permitted on such minutes, except as to whether they are correct.
2. Petitions (if any) to be presented and dealt with.
3. Correspondence to be read and if necessary ordered upon.
4. Reports from Committees and minutes from the Mayor (if any), to be presented and ordered upon.
5. Questions as to any matters under the jurisdiction or within the official cognizance of the Council, to be put and replied to, and statements as to any facts, matters, or circumstances requiring attention by the Council, or any of its Committees or officers, to be made.
6. Motions of which notice has been given to be dealt with in the order in which they stand on the business paper.
7. Orders of the day to be disposed of as they stand on the business paper: Provided that it shall be competent to the Council at any time by resolution, without notice to entertain any particular motion, or to deal with any particular matter of business, out of its regular order on the business paper without any formal suspension of this section. Also, and in like manner to direct that any particular motion or matter of business shall have precedence at a future meeting.

**Business of Special Meetings.**

4. At special meetings of the Council, the business after the minutes shall have been read and verified, which shall be done in the same manner as at an ordinary meeting, shall be taken in such order as the Mayor or the Aldermen at whose instance such special meeting shall have been called, may have directed.

**Business paper for ordinary meeting how prepared.**

5. The business paper for every meeting of the Council other than a special meeting shall be made up by the Council Clerk, not less than two nor more than three days before the day appointed for such meeting. He shall enter upon such business paper a copy or the substance of every notice of motion and of every requisition or order as to business proposed to be transacted at such meeting, which he shall have received or shall have been required or directed so to enter in due course of law, and as hereinafter provided. Every such entry shall be made (subject to the provisions of section 3 of this part of these By-laws) in the same order as such notice, requisition, or direction shall have been received.

**Business paper for special meetings.**

6. The business paper for each special meeting shall contain only such matters as shall have been specially ordered to be entered thereon by the Mayor or Alderman calling such meeting.

7. The summons to members of the Council for every meeting thereof, shall be prepared from the business paper for such meeting, and shall embody the substance of such business paper.

**How business paper to be disposed of.**

8. The business paper for each meeting of the Council, shall at such meeting be laid before the Mayor or Chairman, who shall make a note upon such business paper of the mode in which matter entered thereon has been dealt with, and such business paper, so noted, shall be a record of the Council.

Notices of motion to be numbered as received and preserved until matter disposed of, unless withdrawn before business paper made up.

9. All notices of motion, and all requisitions from Aldermen and directions from the Mayor as to the entry of any particular matters of business, for the consideration of the Council at its then next or any future meeting, shall be numbered by the Council Clerk as they are received, and each such notice, requisition, or direction, shall be preserved by such Clerk until after the matter to which it relates shall have been disposed of, and the record in the minute-book of the manner in which such matter has been so disposed of, shall have been duly verified as required by section 3 of this part of these By-laws. Provided however, that the person giving or forwarding any such notice of motion, requisition, or direction to the Council Clerk, shall be at liberty to withdraw the same at any time before the making up of the business paper.

After business paper made up all Notices to be the property of the Council.

10. After the business paper shall have been made up as aforesaid, all the said notices of motions, requisitions, and directions, as to which entries have been made thereon, shall be the property of the Council, and shall not be withdrawn, altered, or amended, without leave having been first obtained from the Council for such withdrawal, alteration, or amendment.

**Motions and Amendments.****Motions—how to be moved.**

11. Except by leave of the Council, motions shall be moved in the order in which they stand on the business paper, and if not so moved, or postponed, shall be struck from such business paper, and be considered to have lapsed.

**Absence of proposed mover.**

12. No motion of which notice shall have been given on the business paper shall (except as hereinafter provided) be proceeded with in the absence of the Alderman by whom such notice shall have been given, unless by some other Alderman producing a written authority for that purpose from such first named Alderman.

**Motion to be seconded.**

13. No motion in Council shall be discussed unless and until it be seconded.

**Amendment may be moved.**

14. When a motion in Council shall have been made and seconded, any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed unless and until it be seconded.

**Motions and Amendments to be in writing.**

15. No motion or amendment shall be discussed until it shall have been reduced into writing.

**Only one amendment at a time.**

16. No second or subsequent amendment shall be taken into consideration until the previous amendment or amendments shall have been disposed of.

**Amended Question—further amendment may be moved thereon.**

17. If an amendment be carried, the question as amended thereby, shall become itself the question before the Council, whereupon any further amendments upon such question may be moved.

**How subsequent amendment may be moved.**

18. If any amendment, either upon an original question or upon any question amended as aforesaid shall be negatived, then a further amendment may be moved to the question to which such first mentioned amendment was moved, and so on: Provided that not more than one question and one proposed amendment thereof shall be before the Council at any one time.

**Motions for adjournments.**

19. No discussion shall be permitted on any motion for the adjournment of the Council; and if upon the question being put upon any such motion, the same may be negatived; the subject then under consideration, or the next in order on the business paper, or any other on such paper that may be allowed precedence, shall be discussed before any subsequent motion for adjournment shall be receivable.

**Requisitions from Aldermen—how to be dealt with.**

20. Every requisition by an Alderman, that any particular matter of business be brought before the Council, shall be regarded and treated as a notice of motion by such Alderman, that such business be taken into consideration by the Council, and he shall be called upon, in due order, to move that such business be so considered, or to make any other motion which he may think fit in reference thereto, which shall be consistent with the notice of such business, and with good order; and if such Alderman be absent, or if being present and so called upon he shall make no such motion, then it shall be open to any other Alderman to make such motion, and when any such motion shall have been made, it shall be dealt with in precisely the same manner as if notice thereof had been given, subsequent however to any objection which may exist as to its not being in accordance with the notice actually given of such business, or with good order; and if no motion shall be made in reference to such business, the entry relating thereto shall be struck from the business paper.

**Orders of the Day—of what orders of the day shall consist.**

21. The orders of the day shall consist of any matter other than motions on notice which the Council shall at a previous meeting thereof have directed to be taken into consideration, or which the Mayor or any Committee of the Council shall have directed to be entered on the business paper for consideration.

**How they are to be dealt with.**

22. Section 20 of this part of these By-laws shall be considered applicable to orders of the day, and the Alderman who has the usual charge of, or who has previously moved in reference to the particular business to which any such order of the day relates, shall be the person called upon to move: Provided that as to any order of the day entered as aforesaid by the direction of the Mayor, such Mayor may arrange with any Alderman to move, and may in such case call upon the Alderman with whom he has so arranged.

**Petitions.****Petitions to be respectfully worded.**

23. It shall be incumbent on every Alderman presenting a Petition to acquaint himself with the contents thereof, and to ascertain that it does not contain language disrespectful to the Council; the nature and prayer of every such Petition shall be stated to the Council by the Alderman presenting the same.

**Petitions—how received.**

24. All Petitions shall be received only as the petition of the parties signing the same.

**How Petitions are to be dealt with.**

25. No motion shall, unless as hereinafter provided, be permissible on the presentation of a Petition, except that the same be received and referred to one of the permanent Committees hereinafter mentioned, or that it be received, and that its consideration stand an order of the day for some future meeting: Provided, however, that if any Alderman shall have given due notice of a motion in reference to any Petition, and such Petition shall have been presented before such Alderman shall have been called upon to move such motion, the said motion shall, if otherwise unobjectionable, be considered in order.

**Correspondence—Duties of Mayor as to correspondence.**

26. The Mayor shall have the same duty in reference to letters addressed to the Council before directing the same to be read as by section 23 of this part of these By-laws is imposed upon any Alderman presenting Petitions. The Mayor shall direct as to the order in which all correspondence shall be read, and no letter addressed to the Council shall be presented or read by any Alderman. If the Mayor be absent, and shall not have examined any such letters addressed to the Council, or have given any such directions as aforesaid, then the duties imposed by this section shall devolve upon the presiding Alderman.

## Section 25 to apply to letters.

27. Section 25 of this part of these By-laws shall be considered as fully applicable to the letters addressed to the Council as to Petitions.

Letters sent not to be discussed, but every letter may be subject of motion

28. No discussion shall be permitted in reference to any letters which have been written and sent by the Mayor, or by any officer of the Council, and copies of which may be read to such Council: Provided, however, that any notice of motion consistent with good order may be entertained with reference to any such letters, whether read or not, or with reference to any letters addressed to the Council, which the Mayor or Presiding Officer may not have ordered to be read as aforesaid.

*Reports from Committees and Minutes from the Mayor.**Form of reports.*

29. All reports from Committees shall be written on foolscap paper, with a margin of at least one fourth of the width of such paper, and shall be signed by the Chairman of such Committee, or in his absence by some other member of the same.

*Mayor's minute.*

30. The Mayor shall have the right of directing the attention of the Council to any matter or subject within its jurisdiction or official cognizance by a minute in writing. Every such minute shall be written upon paper of the same kind, and with the same margin, as a report from a Committee, and shall be signed by such Mayor.

*How Reports, &c., are to be dealt with.**Duties of Chairman, &c., in certain cases.*

31. No motion shall (unless as hereinafter provided) be permissible on the presentation of a report from a Committee, or a minute from the Mayor, except that the same be received, or that it be received and that its consideration stand an order of the day for some future meeting. Provided, however, that if any Alderman shall have given due notice in reference to any such report or minute, or if an order for the consideration of such report or minute shall have been entered among the orders of the day, such motion or order may, if otherwise unobjectionable, be moved or considered in due course. And whenever any such report or minute embodies any recommendation which cannot legally be carried out without due notice, and it is nevertheless desirable that such report or minute shall be definitely ordered upon during the meeting of the Council at which such report or minute is presented, it shall be the duty of the Chairman or member of such Committee signing such report or of such Mayor, as the case may be, to give or transmit to the Council Clerk such a notice of motion, requisition, or direction as aforesaid, as will enable such Council Clerk to make the necessary entry on the business paper, and to give such due notice.

*Questions and Statements.**Limitations as to questions and statements.*

32. No question or statement shall be allowed to be put or made which is inconsistent with good order or is not in strict accordance with the requirements of section 3 of this part of these By-laws.

*Notice to be given.*

33. Sufficient notice of every question shall be given to the person who is expected to reply thereto to allow for the consideration of such reply, and if necessary for a reference to other persons or documents.

*Answers not compulsory.*

34. It shall not be compulsory upon any person questioned as aforesaid to answer the question so put to him.

*Questions to be put without argument, &c.*

35. Every such question must be put categorically without any argument or statement of fact.

*Similar provision as to statement.*

36. Every such statement must be made without argument. No discussion on questions, &c.—Right of objection and of subsequent motion reserved.

37. No discussion shall be permitted as to any such question, or as to any reply or refusal to reply thereto, or as to any such statement at the times when such question is put, or such reply or refusal to reply is given or such statement is made. Provided however that nothing herein contained shall prevent the taking of any objection, or to any such question or statement being out of order, or shall prevent the discussion after due notice as hereinbefore provided of any matters properly arising out of or relating to any such question or reply or refusal to reply, or any such statement as aforesaid.

*Order of Debate.**Mode of addressing the Council.*

38. Every Alderman who shall make or second any motion or shall propose or second any amendment, or shall take any part in any debate or discussion, or shall put or reply to any question, or shall make any statement, or shall in any other way or for any other purpose address observations to the Council,

shall while so doing stand up in his customary place (unless he shall be prevented from so doing by reason of some bodily infirmity), and shall address himself to the Mayor or other Chairman then presiding. Provided that in case of a question such question may by permission of such Mayor or Chairman be put directly to the Alderman or officer to be questioned, and may be replied to in like manner, but in every such case the question so put and the answer thereto shall be subject to every legal objection on the ground of disorder or irrelevancy. And all members of the Council shall on all occasions when in such Council address and speak of each other by their official designations as Mayor, Chairman, or Alderman, as the case may be.

*Speaker not to be interrupted if in order.*

39. No Alderman shall be interrupted while thus speaking unless for the purpose of calling him to order as hereinafter provided.

*Limitations as to number of speeches, &c.*

40. Every mover of an original motion shall have a right of general reply to all observations which may have been made in reference to such motion, and to any amendments moved thereon, as well as a right to speak upon every such amendment, every Alderman other than the mover of such original motion shall have a right to speak once upon such motion and on every amendment thereon. No Alderman shall speak upon any question for more than fifteen minutes without the consent of the Council, nor oftener than once upon any question other than a question of order unless when misrepresented or misunderstood, in which case he shall be permitted to explain without adding any further observations than may be necessary for the purpose of such explanation.

*Mover and Seconder.*

41. An Alderman who has moved any motion or amendment shall be considered to have spoken thereon. But an Alderman who shall have seconded any such motion or amendment without any further observation than that he seconded the same, shall be at liberty to speak on such motion or amendment.

*Speaker not to digress, &c.*

42. No Alderman shall digress from the subject under discussion, or shall make personal reflections on, or impute improper motives to any other Alderman.

*Adjournment of debate.*

43. A debate may be adjourned to a later hour of the day or to any other day specified, and the Alderman upon whose motion such debate shall have been so adjourned shall be entitled to pre-audience on the resumption of the same.

*Mayor to decide as to pre-audience.*

44. If two or more Aldermen rise to speak at the same time the Mayor or Chairman shall decide which of such Aldermen shall be first heard.

*Alderman may request questions to be stated, &c., under certain restrictions.*

45. Any Alderman may request the question or matter under discussion to be read or stated for his information, or may require the production of any records of the Council bearing upon such question or matter which are readily accessible. Provided, however, that no such request or requisition shall be so made as to interrupt any other Alderman when speaking, or materially to interrupt the discussion; also that if any such request or requisition shall appear to the Mayor or Chairman not to have been made *bona fide* it shall not be complied with.

Mayor or Chairman not to move or second Motion, &c., but may address Council thereon.

46. The Mayor or Chairman shall not move or second any motion or amendment, nor put any question as provided for by section 3 of this part of the By-laws except as is further provided for by section 38 of the same. But such Mayor or Chairman shall have the same right as any other Alderman to speak once upon every subject or amendment. The Mayor or Chairman shall rise when so speaking (unless prevented by some bodily infirmity from so doing), but shall be considered as still presiding.

*Questions of Order.**Mayor or Chairman to decide points of order.*

47. The Mayor or Chairman shall preserve order and his decision on disputed points of order or practice shall be final, except in so far as the same may be questioned as in the manner hereinafter provided.

*Acts of disorder.*

48. Every member of the Council who shall commit a breach of any section of this part of these By-laws or who shall move or attempt to move any motion or amendment embodying any matter as to which the Council has no legal jurisdiction, or who shall in any other way raise or attempt to raise any question, or shall address or attempt to address the Council upon any subject which the said Council has no legal right to entertain or to discuss, or who shall use any other language which, according to the common usage of gentlemen, should be held disorderly, or who shall say or do anything calculated to bring the Council into contempt shall be out of order.

Mayor, &c., may call member to order.

49. The Mayor or Chairman may without the interposition of any other member of the Council call any Alderman to order whenever in the opinion of the said Mayor or Chairman there shall be a necessity for so doing.

Any Member may raise question of Order.

50. Every member of the Council shall have the right of calling the attention of the Mayor or Chairman to any motion, amendment, statement, argument, or observation moved, used, or made by any other member which first named member considers out of order.

Mode of proceeding thereon.

51. A member called to order shall, if required by the Mayor or Chairman, withdraw while the question of order is being discussed and decided upon unless specially permitted to offer an explanation, retraction, or apology. But on obtaining such special permission such member may explain, retract, or apologize for the matter or remark alleged to have been out of order, and if such explanation, retraction, or apology be deemed satisfactory no further discussion on the question of order shall be permitted. If any member on being called to order shall ask such permission to explain, retract, or apologize as aforesaid the Mayor or Chairman may of his own authority grant or refuse such permission as he may think fit unless any member shall require the sense of the Council to be taken on the question; in such case it shall be the duty of the Mayor or Chairman to take the sense of the Council at once and without discussion as to whether such permission shall be granted. And when any such explanation, retraction, or apology shall have been made or offered by permission of the Mayor or Chairman the latter shall in like manner decide, or if required so to do, shall take the sense of the Council as to whether such explanation, retraction, or apology is considered sufficient. If such permission be refused, or if such explanation, retraction, or apology be considered insufficient, the question of order shall be considered and decided before any further business is proceeded with. Provided that if such Mayor or Chairman shall have decided the question of order before any member shall have required the sense of the Council to be taken in reference thereto, such question of order shall not be re-opened. And provided further that nothing herein contained shall be held to affect the right of such Mayor or Chairman to decide finally as hereinafter provided upon any such point of order after the same shall have been discussed.

Decision of points of order.

52. The Mayor or Chairman when called upon to decide points of order or practice shall if necessary state the provision, rule, or practice which he shall deem applicable to the case without discussing or commenting upon the same.

*Motions out of order to be rejected.*

Members to explain, retract, or apologize, &c.

53. Whenever it shall have been decided as aforesaid that any motion, amendment, or other matter before the Council is out of order the same shall be rejected, and whenever anything is said or done in Council by any Alderman shall be similarly decided to be out of order such Alderman shall be called upon by the Mayor or Chairman to make such explanation, retraction, or apology as the case may require.

Penalties for persisting in disorderly conduct.

54. Any member of the Council who shall have been called to order and who after having been twice directed to withdraw as aforesaid shall refuse to do so, or who shall persist in any line of conduct, or argument, or of observation which shall have been decided as aforesaid to be disorderly, or who shall refuse to make such explanation, retraction, or apology as aforesaid when required so to do, or who shall be guilty of any other act of disorder as defined in section 48 of this part of the By-laws, and shall refuse to make such explanation, retraction, or apology as a majority of the Aldermen then present shall consider satisfactory, shall be liable on conviction for the first offence to a penalty of five shillings, and on a second conviction for the like offence he shall be liable to a penalty of ten shillings, and on a third conviction and for every further conviction for the like offence he shall be liable to a penalty of twenty shillings. All information under this clause to be laid by a member of the Council.

Power of Council as to laying down general rules, &c.

55. Any Alderman who is dissatisfied with the decision of the Mayor or Chairman on any such question of order or practice may by motion or notice respectfully worded invite the Council to lay down a different rule or principle for the determination of any similar questions of order or practice which may thereafter arise. Any rule or principle thus laid down shall be binding on all parties unless and until it be rescinded, but shall have no retroactive operation. Provided however that nothing herein contained shall be held to bind any Mayor or Chairman to put any motion to the Council which in his opinion is contrary to law.

Mode of voting—How questions are to be put.

56. The Mayor or Chairman shall put to the Council all questions on which it shall be necessary that a vote be taken, and shall declare the sense of such Council thereon, and he shall be at liberty to put any such question as often as may be necessary to enable him to form and declare his opinion as to the opinion of the majority.

Divisions—Penalty for refusing to vote.

57. Any Alderman shall be at liberty to call for a division. In such case the question shall be put first in the affirmative and then in the negative, and the Aldermen shall vote by show of hands, and the names and votes of the Aldermen present shall be recorded. Any Alderman who shall be present when a decision is called for and shall not vote on such division, not being disabled by law from so voting, shall be liable for every such offence to a penalty of not less than ten shillings nor more than two pounds.

Protests—Mode of protesting.

58. Every member of the Council (the Mayor included) may protest against any resolution or vote by the Council. Notice of the intention so to protest must however be given at the meeting when such resolution is passed or such vote is arrived at, and the protest itself must be handed or sent to the Council Clerk not later than seven days after such notice. The Council Clerk shall enter every such protest in the minute-book, but if in the opinion of the Council it be consistent with the truth or disrespectfully worded, it may (by resolution on notice) be ordered to be expunged. In such case the expunction shall be made by drawing a perpendicular line with the pen through the entry of such protest, with a reference in the margin to the resolution ordering such expunction.

*Committees of the whole Council.*

Rules applicable to business in Committee.

59. The following sections of this part of these By-laws shall (except as is herein excepted) be taken to apply to the conduct of business in Committee of the whole Council, namely:—Sections 14 (except that it shall not be necessary that any motion or amendment in Committee shall be seconded), 15, 16, 17, 18, 38, 39, 42, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 56, 57, and any member may speak as often as he may deem it necessary, but not longer than fifteen minutes at any one time.

Disorderly conduct in Committee—Refusal to vote.

60. Whenever any member of the Council shall, while the Council is in Committee of the whole, be considered guilty of an offence against good order within the meaning of section 54 of the part of these By-laws, it shall be competent to any Alderman to move that the Council resume its sittings and that such matter be reported, and if such motion be carried such matter shall be reported accordingly and an entry of such report shall be made in the minute-book, and whenever any Alderman shall have failed to vote on any occasion in Committee of the whole Council, as required by section 57 of this part of these By-laws, the fact shall be reported to the Council, and such report on such facts shall be duly recorded in the minute-book; Provided that in case of an Alderman failing to vote as aforesaid, no special motion that the Council resume its sitting shall be necessary, but it shall be the duty of the Chairman of such Committee of the whole, in making his report of the proceeding in such Committee whenever such report may be made to include in such report a statement of such failure to vote as aforesaid, and of the question as to which such Alderman has so failed to vote.

Decisions in Committee on points of order may be reported.

61. Whenever a decision upon any question of order shall have been given by the Chairman of a Committee of the whole Council under the provision of section 47 of this part of these By-laws, any Alderman may move that such decision be embodied in the report to the Council of the proceedings of such Committee, and if such motion be carried such decision shall be so embodied in such report whenever the same shall be made.

How progress may be reported, &c.

62. Any Alderman may at any time during the sitting of a Committee of the whole Council, move that the Chairman report progress or no progress as the case may be, and that leave be asked to sit again at a later period of the same day or on any further day, or that no leave be asked to sit again, and if any such motion be carried the Council shall resume the sittings and a report shall be made accordingly, but no discussion shall be permitted on any such motion, and if the same be negatived the subject then under consideration shall be discussed before another such motion shall be receivable.

*Reports of proceedings in Committee.*

Want of quorum in Committee.

63. All reports of proceedings in Committee of the whole Council shall be made to the Council  *viva voce*  by the Chairman of such Committee, and a report of such proceedings shall be made in every case, except when it shall be found on counting the number of members during the sitting of any such

Committee that there is not a quorum present, in the latter case the sitting of the Council shall be resumed without any motion for that purpose, and the proceedings in Committee shall be considered to have lapsed: Provided that in the making of any such report as aforesaid, it shall not be necessary to report any such proceedings *in extenso*, but only to state the result, general effect, or substance of such proceedings.

*How reports are to be dealt with.*

64. All such reports of proceedings in Committee of the whole Council shall be recorded in the minute-book, but except as hereinafter mentioned, no such report shall be considered as adopted by the Council, nor shall any such application as aforesaid, for leave to sit again, be considered to have been granted by such Council until a motion shall have been made and passed for such adoption, or for the granting of such leave, and every such motion for the adoption of a report, or for the granting of leave as aforesaid, and the order of debate on such motion shall be subject to all the same rules as other motions in Council and the order of debate on such other motions: Provided however that where a report shall have been made under section 60 of this part of these By-laws of disorderly conduct in Committee, or under section 57 of this part of these By-laws of failure to vote on division, or of any decision in Committee upon any question of order, such report shall so far as it relates to such facts be regarded and recorded as a statement thereof, and to that extent shall not, unless for the correction of a manifest error, be interfered with upon any pretext whatever.

*Calls of the Council—How calls may be ordered.*

65. A call of the Council may be ordered by any resolution of which due notice shall have been given for the consideration of any motion or matter of business before such Council.

*Such call compulsory in certain cases.*

66. There shall without any special order to that effect, be a call of the Council for the consideration of every motion which may be made under section 55 of this part of these By-laws and of every motion for the rescission of any resolution, order, or decision of such Council.

*Mode of proceeding.*

67. The call shall be made immediately before the motion or business for which such call has been ordered, or is required to be made by the last preceding section, shall be moved or considered. Such call shall be made as follows:—The Council Clerk shall call the names of all the members in their alphabetical order, each member present shall answer to his name as so called, and if any members are absent a record shall be made of such absence, but if leave of absence to any such member shall have previously been granted, or if such an excuse in writing shall have been forwarded to the Mayor or Council Clerk, as a majority of the Council then present shall consider satisfactory, such absent member shall stand excused and a record shall be made of such excuse and of the reasons for the same.

*Penalty for absence without legal excuse.*

*Further call when question adjourned.*

68. Any member of Council who having had notice of such call of the Council shall not answer to his name as aforesaid, or who being absent shall not be legally excused as aforesaid, or who if absent and not so excused shall fail to show that by reason of extreme illness or any other sufficient cause he has been unable to send an excuse in writing as aforesaid, or who having answered to his name as aforesaid, shall not be present when a vote is taken on the motion or business as to which such call has been made as aforesaid, shall for every such offence be liable to a penalty of not less than ten shillings nor more than two pounds: Provided that if the consideration of every such motion or matter of business be adjourned to a future day there shall be a further call on the resumption of such consideration and the provisions herein as to penalties for absence shall have reference to such further call; and if there shall be more than one adjournment, this proviso shall be taken to extend to the resumption of the consideration of such motion or matter of business after every such adjournment.

*Standing and Special Committees.*

*Standing Committees.*

69. There shall be four standing Committees, namely, a By-laws Committee, a Committee for Works, a Finance Committee, and a Committee for general purposes. These Committees shall be re-appointed every year at the first meeting of the Council which shall be holden after the election of the Mayor.

*Constitution of Standing Committees.*

70. Each of the three Committees first named in the last preceding section shall consist of not less than three members. The Committee for general purposes shall consist of the Chairman of the three said first-named Committees.

*Mode of re-appointing Standing Committees.*

71. The re-appointment of the three said first-named Committees may, on resolution of the Council, be made by ballot. In such case a list or lists of the members shall be handed to each member then present, who shall mark against the name of each such member the title of the Committee to which in his opinion such member ought to belong. And the Mayor or Chairman shall thereupon examine such lists so marked, and shall declare the result. And if there should be an equal number of votes for the appointment of any two or more members to any one of such first-named Committees, such Mayor or Chairman shall decide which of such members shall be appointed to such Committee.

*By-laws Committee.*

72. The By-laws Committee shall prepare for the consideration of the Council drafts of all such By-laws as may be required for the good government of the Borough. They shall also watch over the administration of the By-laws, and of any statute of which the operation has been or may be extended to the Borough; and shall take such steps as may be necessary for the prevention or punishment of offences against such By-laws or Statutes, and for the preservation of public health, order, and decency.

*Committee for Works.*

73. The Committee for Works shall have the general direction of all works ordered or sanctioned by the Council, and the general inspection of all streets, roads, ways, bridges, public reserves, and other public places under the care and management of the Council. They shall also inquire and report, from time to time, as to such improvements or repairs as they may think necessary, or as they may be directed by resolution of the Council, to inquire and report upon.

*Finance Committee.*

74. The Finance Committee shall examine and check all accounts, and shall watch generally over the collection and expenditure of the Municipal Revenues. They shall inquire and report, from time to time, as to all matters which they may consider to affect or to be likely to affect the finances of the Borough, and as to such matters or subjects of the like nature as they may be directed by resolution of the Council to inquire and report upon.

*Committee for general purposes.*

75. The Committee for general purposes shall take cognizance of every matter, subject, or question within the jurisdiction of the Council, not coming within the province of one or other of the before-mentioned Standing Committees; and shall, from time to time, inquire into and report upon any such subject, matter, or question as they may think necessary, or as they may be directed by resolution of the Council, to inquire into and report upon.

*Special Committees.*

76. Special Committees may consist of any number of members, and may be appointed for the performance of any duty which may be lawfully entrusted to a committee, and for which, in the opinion of the Council, a Special Committee ought to be appointed; and no Standing Committee shall interfere with the performance of any duty which may, for the time being, have been entrusted to any such Special Committee. The appointment of every such Special Committee shall be made by resolution after due notice; and it shall be incumbent on the mover of such resolution to embody therein a statement of the duties proposed to be entrusted to such Special Committee. The mover of any such resolution may name therein such members as in his opinion ought to constitute such Committee; or he may propose that such Committee consist of a certain number of members to be appointed by ballot; and in the latter case—or if an amendment to the effect that such Special Committee be appointed by ballot be carried—each member then present shall receive a list of all the members of the Council, from which list he shall strike out all names but those of the persons of whom in his opinion such Special Committee ought to be comprised; and the Mayor or Chairman shall examine such lists, and shall declare the result; and in the event of its becoming necessary, through an equality of votes, to decide as to which of two or more Aldermen shall serve on such Committee such Mayor or Chairman shall decide.

*Chairman of Committees.*

77. Every Committee of which the Mayor shall not be a member, shall elect a permanent Chairman of such Committee within seven days after their appointment.

*Term of service in Committee.*

78. Appointments to the By-laws Committee, the Committee of Works, and the Finance Committee, shall be for the whole municipal year. The Chairman of these three Committees, as appointed or removed from the Chairmanship of the same, shall be thereby, and without any further order, regarded as having been appointed to or removed from the Committee for general purposes. The appointment of every Special Committee shall be considered to endure until the duties for which such committee shall have been fully performed: Provided, however, that nothing

herein contained shall be held to affect in any way the right of such Committee to remove any Chairman of such Committee, or to appoint another such Chairman in his stead, or to militate against the general provisions as to Committees in section 109 and 110 of the Municipalities Act of 1867; and that so much of this By-law as relates to the appointment, powers, and duties of Committees shall be read and interpreted in connection with such last-mentioned general provisions.

*Committee Meeting—how called.*

79. The Council Clerk shall call a Meeting of any Committee when requested so to do by the Chairman or any two members of such Committee.

*Records of transactions in Committee.*

80. The Chairman of each Standing Committee shall make, or cause to be made, in a book to be kept by him for that purpose, memoranda of all the transactions of such Committee, which book he shall, on ceasing to be such Chairman, hand over to his successor.

*Expenditure.*

Except in emergent matters, costs of all work to be estimated before undertaken.

81. With the exception of emergent matters, hereinafter specially provided for, no work affecting the funds of the Borough shall be undertaken until the probable expenses thereof shall have been first ascertained by the Council.

Emergent matters and necessary current expenses. Expenses authorized to be reported. Outlay to be in accordance with Orders of the Council.

82. For emergent matters and for necessary current expenses during the intervals which may elapse between the meetings of the Council, outlays to the following extent may be incurred—

1. By order of the Committee for Works, or of the Mayor and two members of such Committee for repairs or emergent works, to the extent of five pounds.
2. By order of the Mayor for necessary current expenses to the extent of two pounds.
3. By order of the Mayor and any two Aldermen, or without the Mayor of any four Aldermen for any emergent purpose to the extent of five pounds.

Provided that in every case a detailed report in writing of every such outlay shall be laid before the Council at its next meeting, such report to be signed by the Chairman of the Committee of Works, or the Mayor, or the Mayor and Aldermen, or the Aldermen without the Mayor, as the case may be, by whom such outlay shall have been authorized. Also, that such outlay shall only be permissible in reference to matters coming strictly within the jurisdiction or functions of the Council, and that no outlay involving a disobedience or evasion of an order or resolution of such Council shall on any pretence be thus authorized.

All claims to be examined and reported upon by Finance Committee.

83. All accounts and demands of money against or from the Council shall be examined and reported on by the Finance Committee before any order shall be made for payment of such accounts or demands.

Certificate required with each claim—Salaries and wages to be payable on Mayor's order—Certificates to be attached to report.

84. No payment shall be so ordered unless there shall be a certificate or memorandum from the Committee, from the Mayor, or from the officer of the Council to whom the direction or guardianship of such expenditure properly belongs, showing that the demand is a legitimate one, and has been duly authorized and inquired into. It shall be the imperative duty of the Finance Committee to see that the requirement is fulfilled, or to report specially as to the reasons for its non-fulfilment before recommending payment: Provided, however, that such special report as last herein mentioned may be embodied with the report by which payment of the amount in question is recommended: Provided also that in cases of special expenditure under section 82 of this part of these By-laws the report directed by that section to be laid before the Council, shall if the outlay shall have been lawfully incurred, be deemed a sufficient certificate. And, provided further, that in regard to salaries and wages of labour for officers, servants, and labourers employed at fixed rates of payment by order of the Council, the certificate of the Mayor of the amount due to any such officer, servant, or labourer, and the order of such Mayor for payment of such amount shall be a sufficient authorization for such payment, and such certificates, memoranda, and authorizations shall be attached respectively to the reports to the Finance Committee on the payment or outlays to which such certificate, memoranda, or authorizations have reference.

*Common Seal and Records of Council.*

Common Seal and Press how secured—care of same.

85. The common seal and press to which the same is attached shall be secured by a cover or box which, except when such seal and press are in use, shall be kept locked. There shall be duplicate keys to the lock of the cover or box, of which keys one shall be kept by the Mayor, and the other by the Council Clerk; such common seal and press shall be in the custody and the care of the Council Clerk.

*When and how Common Seal to be used.*

86. The common seal shall not be attached to any document without an express order of the Council; in every case when such common seal has been ordered to be attached to any document such document shall also be signed by the Mayor, or in case of the absence or illness of such Mayor, by two Aldermen, and countersigned by the Council Clerk.

How books of account are to be kept and inspected.

87. The Treasurer shall keep such books of account and such records, statements, and memoranda of receipts and expenditure in such manner and form as the Council may from time to time direct. It shall be the duty of the Finance Committee to inspect all such books of accounts, records, statements, and memoranda, from time to time, to ascertain that the same are properly kept, and to report at once to the Council any act of neglect or appearance of inefficiency which they may have discovered in the keeping of the same, also to report to the Council, from time to time, any changes which such Committee may think advisable in the mode of keeping the accounts.

Records of Council defined—provisions for proper keeping of same.

88. The minute book, letter book, and all rates and assessment books, books of account, records, statements, and memoranda of receipts and expenditure, electoral rolls and other records relating to elections, business papers, reports from Committee, minutes from the Mayor, petitions, letters on municipal business addressed to the Council, or to the Mayor, to any officer or servant of the Council, orders, reports, returns, and memoranda relating to Municipal business, drawings, maps, plans, contracts, specifications, agreements, and all other books and papers connected with the business of the Council, shall be deemed records of the Council. It shall be the duty of the By-laws Committee to inspect the records from time to time to ascertain that the same are properly kept as aforesaid, and to report at once to the Council any act of neglect or appearance of inefficiency which they may discover in the keeping of such records.

Impression of seal not to be taken without leave of Council.

89. No member or officer of the Council shall be at liberty to take any impression of the Corporate Seal, or to show, lay open, or expose any of the books or records of the Council to any other person other than a member of the same without leave from such Council, except as otherwise provided by law. Any member or officer of the Council who shall be guilty of a breach of this section, shall be liable on conviction for the first offence to a penalty of not less than five shillings nor more than two pounds, for a second offence to a penalty of not less than one pound nor more than ten pounds, and for a third and every subsequent offence to a penalty of not less than five pounds nor more than twenty-five pounds.

Records not to be removed, &c.

90. Any person removing any such book or other record of the Council aforesaid from the Council Chamber, or the place where by direction of the Council such book or other record is usually kept, without leave for such removal having been first obtained from such Council, or without other lawful cause for such removal as hereinafter provided, shall for every such offence be liable to a penalty of not less than ten shillings nor more than ten pounds. And nothing herein contained shall be held to affect the further liability of any person who shall have removed such book or other record as aforesaid and shall not have returned the same, to prosecution for stealing such book or record, or to an action at law for detention of the same as the circumstances of the case may warrant: Provided that leave for temporary removal of a book or other record may be granted to the Council Clerk or the Treasurer by the Mayor in order that such Clerk or Treasurer may post up entries, prepare returns, or perform any other duty which it may be necessary that he should perform. Also that the Mayor or Chairman of Committee, or any Alderman acting for any such Chairman, may temporarily remove any record necessary for the preparation of a minute or a report, or for the purposes of any prosecution, or a suit at law by, against, or at the instance of the Council, but in all such cases such Clerk, Treasurer, Mayor, Chairman, or Alderman, as the case may be, shall give a receipt under his hand for every document so removed, and every such receipt shall be carefully preserved among the records until the book or other record to which it refers shall have been returned, when such receipt shall be destroyed. And provided also, that the Mayor, Council Clerk, or other officer of the Council who may be subpoenaed to produce any book or other record of the Council in a Court of Law, shall have the right to remove such book or other record for the purpose of obeying such summons, but shall return such book or record as speedily as may be, and shall before removing the same leave at the Council Chamber a receipt for such book or other record aforesaid. And every such person so temporarily removing any book or other record of the Council as aforesaid shall be legally responsible for the safe keeping and return of the same.

Penalty for defacing or destroying record.

91. Any person wilfully destroying, defacing, or altering any record of the Council shall, for every such offence, be liable to a penalty of not less than five pounds nor more than twenty-five pounds.

*Officers and Servants.*

Notices to candidates in certain cases.

92. No appointment to any office at the disposal of the Council shall be made until public notice shall have been given, as hereinafter provided, inviting applications from qualified candidates for the same. The salary or allowance attached to such office shall in every case be fixed before such notice is given, and shall be stated in such notice.

Mode of appointment.

93. Every such appointment shall be made by ballot, in such mode as may at the time be determined on, whenever there is more than one candidate for such office.

Exceptional cases.

94. Nothing herein contained shall be held to prevent the employment, as may be from time to time found necessary and as may be ordered by the Council, of any workmen or labourers on the public works of the Borough.

Bonds for good conduct.

95. All bonds given by officers or servants of the Council for the faithful performance of their duties shall be deposited with the Attorney or the Bankers of the Corporation, as the Council may order; and no officer or servant of the Council shall be received as surety for any other such officer or servant.

Duties of Council Clerk.

96. The Council Clerk, in addition to the duties which, by the Municipalities Act of 1867, or by the present or any other By-laws thereunder he may be required to perform, shall be the Clerk of all Revision Courts held in the Borough under the provisions of the said Municipalities Act. He shall also, under the direction of the Mayor, conduct all correspondence which may be necessary on the part of the Council. He shall likewise have charge of all records of such Council, except such books or documents as may (as hereafter provided) be entrusted to any other officer, and shall be responsible for the safe keeping of such records. He shall generally assist the Mayor in carrying out the orders of the Council and the duties of such Mayor.

Duties of Treasurer, &c.

97. The Treasurer shall have charge of such books of account and other records of the Council as are mentioned in section 87 of these By-laws, and shall be responsible for the safe keeping of the same, and any other officer of the Council may have any other records thereof committed to his charge by an order of the Council, and in such case shall be responsible for the safe keeping of such records.

Duties of other officers and servants.

98. The duties of all officers and servants of the Corporation shall be defined by such regulations as may from time to time, and in accordance with the law, be made as follows, namely:—As to the duties of the Council Clerk and his assistants (if any), by the Mayor; as to the Treasurer and all collectors of rates, bailiffs, bailiff's assistants, and other officers and servants employed in and about the collection of revenue whose superintendence is not hereinafter specially entrusted to any other Committee, by the Finance Committee; as to all Surveyors, Architects, Clerks of Works, Overseers of sewerage or drainage, or other officers and servants employed in and about the public works of the Borough, or the sewerage or drainage thereof, whose superintendence is not herein specially entrusted to any other Committee, by the Committee of Works; as to the Attorney of the Corporation, Inspector of Nuisances, Pound-keeper, and other officers and servants employed in and about the carrying out and enforcement of the general provisions of the Municipalities Act of 1867, and of any other statute of which the operation has been extended to the Borough, and of the By-laws for the general good government of such Borough, whose superintendence is not herein specially entrusted to any other Committee, by the By-laws Committee; and as to the managers of public institutions or reserves under the charge of the Council, and all other officers and servants employed in or about any matter over which the Council has control, and whose superintendence is not hereby specially entrusted to any other Committee or to the Mayor, by the Committee for General Purposes: Provided that all such regulations shall be in writing, and shall be in all cases laid before the Council at the first meeting thereof which shall be holden after the making of any such regulations, and shall be in strict accordance with any such orders or directions as may have been at any time given by such Council touching the matters to which any such regulations may have reference.

Special powers of Mayor.

99. The Mayor shall exercise a general supervision over all officers and servants of the Corporation, and may order the preparation of any such return or statement, or the giving of any such explanation or information by any such officer or servant as he may think necessary, unless such return or statement shall have been already prepared, or such explanation or information already given, and such return, statement, explanation, or information is on record as hereinbefore provided, or unless the Council shall have expressly forbidden or dispensed with the preparation of such return or statement, or the giving

of such explanation or information. All such returns or statements as aforesaid shall be in writing, and shall be recorded. All such explanation or information may, except as hereinafter provided, be either rendered *viva voce* or put into writing, as the Mayor may direct.

How complaints against officers, &c., are to be dealt with.

100. All complaints against officers or servants of the Corporation must be in writing, and must in every case be signed by the person or persons complaining; and no notice whatever shall be taken of any complaint which is not in writing, or is anonymous. All such complaints may be addressed to the Mayor, who, immediately upon the receipt of any such complaint, and without laying the same before the Council, shall have power to investigate the same; and if any such complaint be made to the Council, or to any member or officer thereof, it shall be referred to and investigated by the Mayor before it shall in any way (otherwise than by such reference) be ordered upon or dealt with by such Council: Provided that every report, explanation, and information which may be made or rendered in reference to every such complaint shall be in writing, and such Mayor shall state in writing the result of every such investigation, and his opinion as to what order (if any) ought to be made in connection therewith, and such complaint, with all reports, explanations, and information as aforesaid in connection therewith, and the Mayor's statement as aforesaid thereon, shall be laid before the Council at the next meeting thereof which shall be holden after the Mayor shall have made such statement, and shall be duly recorded: Provided further, that nothing herein contained shall be held to affect in any way the special powers conferred on the Mayor by section 152 of the Municipalities Act of 1867, or any other special power which now is, or hereafter may be, conferred by statute upon such Mayor.

Miscellaneous leave of absence.

101. The leave of absence shall be granted to the Mayor or to any Alderman otherwise than by a resolution of the Council, adopted after due notice.

Mode of calling for tenders.

102. Whenever it is decided that any work shall be executed or any materials supplied by contract, tenders for the execution of such work or the supply of such materials shall be called for by public notice, as hereinafter provided.

Drafts of intended By-laws.

103. A draft of every intended By-law shall be in the office of the Council for at least seven days before such draft shall be taken into consideration by such Council, and shall be open to the inspection of any rate-payer who may desire to inspect the same; and public notice shall be given, as hereinafter provided, that such draft is so lying for inspection.

Motions for rescission of previous orders, &c.

104. Whenever a motion for the rescission of any order, resolution, or vote of the Council shall have been negatived, no other motion to the same effect shall be permissible until a period of three months shall have elapsed from the time of negativing such first-mentioned motion: Provided that nothing herein contained shall be held to prohibit the re-consideration and amendment of any proposed By-law which may have been submitted to the Governor for confirmation and may have been remitted to the Council with suggested amendments of the same or the passage after due notice, as hereinbefore provided, and in due course of law of any By-law for the repeal or amendment of any other By-law.

Lapsed business.

105. Whenever the consideration of any motion or matter of business shall have been interrupted by reason of a quorum not having been present, the resumption of such consideration may be ordered by resolution of the Council, after due notice, and such consideration shall, in such case, be resumed at the point where it was so interrupted as aforesaid.

Suits and prosecutions for penalties, &c.

106. Such suits or informations for the enforcement of penalties for or in respect of a breach of the Municipalities Act of 1867, or of any By-law made thereunder, or of any statute, the operation of which may have been extended to the Borough, as may have been directed by the Council or by the By-law Committee or by the Mayor to be commenced or laid, shall be so commenced or laid, as follows, namely:—When against a member of the Council or an Auditor or any officer of the Corporation by another member of the Council or by the Council Clerk, unless such Council Clerk shall be the officer to be proceeded against, and in such case, by any other officer named by the Council for that purpose. When against any other person by the officer to whom the carrying out of the statutory provision or By-law imposing the penalty sought to be enforced has been entrusted; and if there shall be no such officer, then by any such officer or person as shall be appointed for that purpose by the Council or the By-law Committee or the Mayor, as the case may be, on directing such suit or information as aforesaid. And no such suit shall be brought or information laid as aforesaid against any member of

the Council or Auditor except by order of such Council, nor shall any similar proceeding be taken against any other officer of the Council except on the order of such Council or of the Mayor, nor against any other person except upon the order of the Council or of the Mayor or of the By-law Committee. And no such suit shall be directed to be brought, nor shall any such information be directed to be laid as aforesaid, except on the express resolution of the Council, in any case where the bringing of such suit or the laying of such information will be adverse to any previous direction by such Council, or where, on the trial or hearing of any such suit or information, the same shall have been dismissed on the merits: Provided that, in any such case, the conduct or prosecution of any such suit or information may, on the order of the Council, be entrusted to an attorney.

*How notices are to be published.*

107. In all cases where public notice is or shall be required to be given by any By-law of any appointment, resolution, act, order, or regulation done, made, or passed, or proposed to be made, done, or passed by the Council, or by any Committee thereof, or by the Mayor, or any officer of the said Council, such notice shall be given and published by posting the same on or near the outer door of the Council Chambers for the space of seven days, and by advertising the same in some newspaper or newspapers circulating in the Borough, or by placards posted up in the Borough.

*Mode of proceeding in cases not provided for.*

108. In all cases not herein provided for resort shall be held to the rules, forms, and usages of the Legislative Assembly of New South Wales so far as the same are applicable to the proceedings of the Council.

*Power to suspend temporarily certain portions of this By-law.*

109. Any such section or sections of this part of these By-laws, or any portion or portions of such section or sections as are not hereinafter excepted, may be suspended by resolution on notice at any meeting of the Council: Provided that there shall be a distinct statement in every such resolution and in the notice of the motion whereon the same shall have been adopted for the purpose for which such suspension is required; and that, for every separate matter or business as to which such suspension is so required, there shall be a separate resolution as aforesaid: And provided also, that the following sections hereof shall never be suspended, nor shall any one of them, nor any portion of any such section be suspended on any ground whatever, namely: Sections 5, 6, 7, 8, 9, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 34, 38, 39, 42, 44, 47, 48, 49, 50, 51, 53, 54, 55, 56, 57, 58, 59, 60, 61, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 95, 98, 99, 100, 101, 104, 106, 107, and 108.

**PART II.**

*Collection and enforcement of rates—fines and modes of collection.*

Rates under section 164 of the 31st of Victoria, No. 13, to be collected half-yearly.

1. All rates levied or imposed by the Council under the provisions of section 164 of the Municipalities Act of 1867, and for the purposes mentioned in the said section, shall be collected by yearly or half-yearly instalments, and such instalment shall, as to every such rate and every such instalment thereof, be held to be due and payable on and after such days as the Council shall by resolution appoint at the time of making or imposing such rate.

*Special rates.*

2. All rates levied or imposed by the Council under sections 165, 166, and 167 of the said Municipalities Act of 1867, and for the purpose mentioned in the said sections or under the provisions of any of the said sections or for any of the purposes mentioned therein, shall be collected in such manner and shall be held to be due and payable on and after such day or days as the Council may by resolution, at the time of the making or imposing such rates or any of them, have appointed.

*Rates to be paid at office of Council Clerk.*

3. All persons liable to pay any rates as aforesaid shall pay the amount thereof within the time prescribed by the said Act into the office of the Council Clerk during office hours—that is to say, from two to five of the clock in the afternoon of every Monday.

*Defaulters.*

4. It shall be the duty of the Council Clerk to furnish the Mayor with a list of the names of all persons whose rates are unpaid at the expiration of the times fixed for the payment of the same as aforesaid.

*Mayor to enforce payment.*

5. It shall be the duty of the Mayor to issue distress warrants against all such persons, and to cause such warrants to be enforced, or to cause such defaulters to be sued for the amount of such rates in a Court of competent jurisdiction.

*Enforcement by distress—Bailiff.*

6. A Bailiff shall, when found necessary, be appointed by the Mayor.

*Bailiff's sureties.*

7. The Bailiff shall find two sureties, to the satisfaction of the Mayor, to the extent of twenty-five pounds each for the faithful performance of his duty.

*Duty of Bailiff.*

8. It shall be the duty of the Bailiff to make all levies by distress for the recovery of rates in the manner hereinafter provided.

*Warrant of Distress.*

9. All levies and distresses shall be made under warrant in the form of Schedule A hereto, under the hand of the Mayor or any Alderman who may for the time being be duly authorized to perform the duties of that office.

*Distress and Sale, &c.*

10. If the sum for which any such distress shall have been made shall not be paid with costs, as hereinafter provided, on or before the expiration of five days, the Bailiff shall sell the goods so distrained, or a sufficient portion thereof, by public auction, either on the premises or at such other place within the said Borough as the Bailiff may think proper to remove them for such purpose, and shall pay over the surplus (if any) that may remain after deducting the amount of sum distrained for and costs, as hereinafter provided, to the owner of the goods so sold on demand of such surplus by such owner.

*Inventory.*

11. At the time of making a distress the Bailiff shall make out a written inventory in the form of Schedule B hereto, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person on his or her behalf, resident at the place where such distress shall be made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted in some conspicuous part of the land or premises on which the distress is made; and the Bailiff shall give a copy of the inventory to the ratepayer on demand, at any time within one month after making such distress.

*Goods may be impounded.*

12. The Bailiff on making a distress as aforesaid may impound or otherwise secure the goods or chattels so distrained of what nature or kind soever, in such place or places or in such part of the land or premises chargeable with rates as shall be most fit and convenient for this purpose; and it shall be lawful for any person whomsoever after the expiration of the five days, as hereinbefore mentioned, to come and go to and from such place or part of the said lands or premises where such goods or chattels shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

*Owner to direct order of sale.*

13. The owner of any goods or chattels so distrained upon may, at his or her option, direct and specify the order in which they shall be successively sold, and the said goods or chattels shall in such cases be put up for sale according to such direction.

*Proceeds of Distress.*

14. The Bailiff shall hand over to the Council Clerk all proceeds of every such distress within forty-eight hours after having received the same.

*Costs.*

15. There shall be payable to the Bailiff, for the use of the Council, for every levy and distress made under this By-law, the costs and charges in the Schedule hereunto annexed marked C.

**SCHEDULE A.**

*Warrant of Distress.*

I, \_\_\_\_\_, Mayor of the Borough of Richmond, do hereby authorize you, \_\_\_\_\_, the Bailiff of the said Municipality, to distrain the goods and chattels in the dwelling-house (or in and upon the land and premises), of \_\_\_\_\_, situate at \_\_\_\_\_, for \_\_\_\_\_, being the amount of rates due to the said Borough to the \_\_\_\_\_ day of \_\_\_\_\_, for the said dwelling-house (or land or premises, as the case may be), and to proceed thereon for the recovery of the said rates according to law.

Dated this \_\_\_\_\_ day of \_\_\_\_\_, 18 \_\_\_\_\_.

Mayor.

**SCHEDULE B.**

*Inventory.*

I have this day, in virtue of the warrant under the hand of the Mayor of the Borough of Richmond, dated \_\_\_\_\_, distrained the following goods and chattels in the dwelling-house (or in and about the land and premises) of \_\_\_\_\_, situate at \_\_\_\_\_, within the said Borough, for \_\_\_\_\_, being the amount of rates due to the said Borough to the \_\_\_\_\_ day of \_\_\_\_\_.

Dated this \_\_\_\_\_ day of \_\_\_\_\_, 18 \_\_\_\_\_.

Bailiff.

SCHEDULE C.

Costs.

	s.	d.
For every warrant of distress .....	2	0
For serving every warrant and making levy where the sum is not more than £20 .....	2	0
Above that sum in addition for every £1 .....	0	1
For making and furnishing copy of inventory .....	2	0
For man in possession each day or part of a day .....	4	0
For sale commission and delivery of goods per pound on proceeds of sale .....	1	0

PART III.

Suppressing Nuisances.

Premises not to be offensive.

1. No householder or resident shall be permitted to allow his or her premises, yards, closets, or drains to be offensive, or a nuisance to the adjoining householders or residents.

Offensive trades not to be carried on.

2. No noisome or offensive trade shall be permitted to be carried on in any premises to the inconvenience of the residents of adjoining houses.

Inspection of premises to be made, and if nuisance not removed proceedings to be taken.

3. Upon representation by any two respectable householders that the house, yard, closet, hogsties, or drains of the adjoining premises are a nuisance or offensive, the Mayor and any two Aldermen shall cause an inspection to be made of the premises complained of, and if any such premises shall be found to be a nuisance or otherwise offensive, notice shall be given in writing to the proprietor or resident of such premises that if within seven days after such notice the nuisance shall not be removed proceedings will be taken before Justices against the proprietor or tenant of the aforesaid premises to obtain an order compelling the removal or abatement of such nuisance; and if such proceedings shall be taken each person shall pay the costs thereof; and if such person, after any such order by the Justices, shall not remove or abate such nuisance within the time ordered by such Justices, he shall be liable to a penalty of ten shillings for every day during which such nuisance shall not be removed or abated after the expiration of the time so limited by such Justice.

Public Health.

Cleansing Butchers' Shambles, &c.

4. For preserving the cleanliness of the said Borough and the health of the inhabitants thereof, it shall be lawful for the Inspector of Nuisances or for any other officer or officers appointed by the Council from time to time, and when and as often as he or either of them shall see occasion, to visit and inspect any premises, yards, closets, drains, and any establishments within the said Borough, and to give such directions concerning the cleansing the said premises, yards, closets, drains, and establishments, both within and without, as to him shall seem needful, and any owner or occupier of any such premises, yards, closets, drains, and establishments, who shall refuse or neglect to comply with such directions within a reasonable time, shall for so doing forfeit and pay on conviction in a summary manner, a sum not exceeding five pounds nor less than ten shillings for every such offence.

PART IV.

Extirpating Weeds—Notice to be served.

1. The Mayor may cause notice to be served upon any person upon whose land or premises any Bathurst bur or Scotch thistle, or other poisonous weed is growing, requiring such person within some reasonable time in that behalf to remove and extirpate such weeds.

Proceedings before Justices.

2. If such person do not within such time remove and extirpate such weeds, proceedings shall be taken before Justices for the purpose of obtaining an order requiring the removal and abatement of such weeds, the person upon whom such notice shall have been served in manner herein mentioned paying the costs of such proceedings.

If weeds not removed, penalty incurred.

3. If such weeds are not removed and extirpated by the time for such purpose appointed by the Justices, the person upon whose land or premises such weeds are, shall be liable to a penalty of five shillings for every day during which such weeds or any part of them shall remain upon such land or premises after the time by which such Justices shall have ordered the removal and extirpation thereof.

Person appointed by the Council may enter upon land.

4. If such weeds shall not be removed and extirpated by the time for such purpose appointed by such Justices (besides the provision as to penalty above mentioned), and also if there be

no person upon whom such notice as mentioned in the first By-law of this part can be served, and in this last case without the necessity of any proceedings before Justices, it shall be lawful for any person appointed by the Council for that purpose, either by general or special appointment, to enter upon any such lands and premises, and by all effectual and necessary means to remove and extirpate any such weeds, for such purpose breaking open, taking down, or removing any locks, gates, and fences, restoring as far as possible the same to their former condition after such removal and extirpation of such weeds.

PART V.

For delegating certain powers to the Mayor.

128th clause of the Municipalities Act.

That the Mayor be the officer appointed by this Council for the purpose of carrying out the provisions of the 128th clause of the Municipalities Act of 1867, except so much of the clause as applies to the setting out and defining of the carriage-way and foot-ways of streets and public places.

PART VI.

Streets.

Drawing or hauling timber.

1. Any person who shall haul or draw, or cause to be hauled or drawn, upon any part of any street within the said Borough, any timber, stone, or any other thing otherwise than on a wheeled vehicle, or barrow, or shall suffer any timber, stone, or other thing, which shall be carried principally on or in part upon any wheeled vehicle or barrow, to drag or trail upon any part of such street, to the injury or obstruction thereof, shall for every such offence on conviction, forfeit and pay a sum of not less than two shillings and six pence, nor more than twenty shillings.

Holes to be enclosed.

2. Any person who shall dig or make, or cause to be dug or made, any hole, or leave or cause to be left, any hole adjoining or near any street or public place within the said Borough, for the purpose of making any cellar or the foundation of any house or other building, or for any other purpose whatsoever, and shall not forthwith enclose the same, and keep the same enclosed in a sufficient manner, to the satisfaction of the Committee of Works of the said Borough, shall forfeit and pay for every such refusal, offence, or neglect, any sum not less than five shillings nor more than forty shillings.

Streets and roads—Public health—Committee for Works to fix street levels.

3. The Committee for Works or any officer or person acting under the supervision of such committee, shall, subject to such orders as shall from time to time be made by the Council in that behalf, fix and lay out the levels of all public roads, streets, and ways within the Borough, and the carriage-ways and the foot-ways thereof; and it shall be the duty of such committee, officers, or persons, to place posts or stones at the corners or intersections of any such public roads, streets, and of carriage-ways, and foot-ways of such roads, wherever the same may be considered necessary or desirable by the Council: Provided that there shall be no change of level in any such public road, street, or way, until the same have been submitted to and adopted by the Council.

PART VII.

Public Park.

1. No person shall pluck or destroy any of the flowers or shrubs or trees, or walk on the beds or borders, or disturb, damage, or destroy any fence, property, or thing in the Richmond Park.

2. All dogs, goats, and pigs, and all poultry found within the park shall be destroyed, and the owner shall make compensation for any damage done.

3. All cattle or horses trespassing in the Park will be impounded, and the owner shall make compensation for any damage done by such cattle or horses.

Penalties.

4. Any person offending against this By-law, shall for the first offence forfeit and pay any sum not exceeding two pounds, ten shillings, for the second offence forfeit and pay any sum not exceeding five pounds, for the third offence forfeit and pay any sum not exceeding ten pounds.

Made and passed by the Municipal Council of Richmond, this twenty-third day of September, in the year of our Lord one thousand eight hundred and seventy-four.

(L.S.) WILLIAM H. HOLBOROW, Mayor.  
CHARLES S. GUEST, Council Clerk.

1877-8.

## NEW SOUTH WALES.

MUNICIPALITIES ACT OF 1867 AND NUISANCES.  
PREVENTION ACT OF 1875.

(MUNICIPAL DISTRICT OF MANLY—BY-LAWS.)

Presented to Parliament pursuant to Acts 31 Vict. No. 12, sec. 158, and 39 Vict. No. 14, sec. 18.

Colonial Secretary's Office,  
Sydney, 9th January, 1878.

## MUNICIPAL DISTRICT OF MANLY.

## BY-LAWS.

THE following By-laws made by the Council of the Municipal District of Manly, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867 and the Nuisances Prevention Act 1875.

MICHAEL FITZPATRICK.

## BY-LAWS—MUNICIPALITY OF MANLY.

BY-LAWS made by the Municipal Council of Manly, for regulating the proceedings of the Council and the duties of the officers and servants of such Council; for preserving order at meetings of said Council; for determining the times and modes of collecting and enforcing payment of rates; for preventing and extinguishing fires; for suppressing nuisances and houses of ill fame; for preventing or regulating and licensing exhibitions held or kept for hire or profit, bowling or skittle alleys, and other places of amusement; compelling residents to keep their premises free from offensive or unwholesome matters; opening new public roads, streets, ways, and reserves; for protection of public fountains and water-courses; aligning and cleansing roads and streets; for regulating and licensing public vehicles; the slaughtering of cattle; for the collection of rates and special rates; for constructing and maintaining any works for or relating to or regulating the Municipality or any part or parts thereof with gas; for regulating the supply and distribution of water, sewerage, and drainage; for regulating as to the blasting of any rock or rocks; preventing trees from overhanging public pathways, and preserving trees, shrubs, and other public property; for regulating free libraries; for preventing or regulating the bathing or washing the person in any public water near a public thoroughfare; for preserving public decency; for providing for the health of the Municipality, and the spreading of contagious or infectious diseases; and further provision for the benefit of the general cemetery; for restraining noisome and offensive trades; and generally for maintaining the good rule and government of the said Municipality.

*Meetings of Council.*

## Ordinary Meetings.

1. The Council shall meet for the despatch of business at the hour of 8 p.m. every alternate Thursday, unless such day shall happen to be a public holiday. In the latter case the meeting shall be held on such other day as the Mayor may appoint.

Election of Chairman in absence of Mayor—Adjournment for want of Quorum.

2. If at any meeting of the Council the Mayor be absent at the expiration of fifteen minutes after the time appointed for holding such meeting, the Aldermen then present shall proceed to elect from among themselves a Chairman for such meeting—to give place to Mayor if he should arrive at any later hour during meeting. Whenever there shall be an adjournment of any such meeting for want of a quorum, the names of the members present shall be taken down, and shall be recorded in the minute book.

*Order of business.*

## Business of ordinary meetings.

3. The following shall be the order of business at all meetings of the Council, other than special meetings:—

- 1st. The minutes of the last preceeding meeting to be read, corrected, if erroneous, and verified by the signature of the Mayor or other Chairman. No discussion to be permitted on such minutes, except as to whether they are correct.
- 2nd. Correspondence to be read, and, if necessary, ordered upon.
- 3rd. Petitions (if any) to be presented and dealt with.
- 4th. Reports from Committees and minutes from the Mayor (if any) to be presented and ordered upon.
- 5th. Questions as to any matters under the jurisdiction or within the official cognizance of the Council to be put and replied to; and statements as to any facts, matters, or circumstances requiring attention by the Council, or any of its Committees or officers, to be made.
- 6th. Motions of which notice has been given to be dealt with in the order in which they stand on the business paper.
- 7th. Orders of the day to be disposed of as they stand on the business paper.

*Business may be dealt with out of regular order.*

4. Provided it shall be competent to the Council at any time by resolution, without notice, to entertain any particular motion, or to deal with any particular matter of business, out of its regular order on the business paper, without any formal suspension of this section; also, and in like manner, to direct that any particular motion or matter of business shall have precedence at a future meeting.

*Business at special meetings.*

5. At special meetings of the Council the business, after the minutes shall have been read and verified, which shall be done in the same manner as at an ordinary meeting, shall be taken in such order as the Mayor or the Alderman at whose instance such special meeting shall have been called may have directed.

*Business paper for ordinary meeting—how prepared.*

6. The business paper for every meeting of the Council, other than a special meeting, shall be made up by the Council Clerk or other person acting as his substitute, not less than 48 hours before the day appointed for such meeting. He shall enter on such business paper a copy or the substance of every notice of motion, and of every requisition or order as to business proposed to be transacted at such meeting which he shall have received, or shall have been required or directed so to enter in due course of law, and as hereinafter provided. Every such entry shall be made subject to the provisions of section 4 of this "Part" of these By-laws, in the same order as such notice, requisition, or direction shall have been received.

*Business paper for special meeting.*

7. The business paper for each special meeting shall contain only such matters as shall have been specially ordered to be entered thereon by the Mayor or Aldermen calling such meeting.

*Summons to members.*

8. The summons to members of the Council of every meeting thereof shall be prepared from the business paper for such meeting, and shall embody the substance of such business paper.

*How business paper is to be disposed of.*

9. The business paper for each meeting of the Council shall, at such meeting, be laid before the Mayor or Chairman, who shall make a note upon such business paper of the mode in which each matter entered thereon has been dealt with; and such business paper so noted shall be a record of the Council.

After business paper made up, all notices, &c., to be the property of the Council.

10. After the business paper shall have been made up as aforesaid, all the said notices of motion, requisitions, and directions as to which entries have been made thereon, shall be the property of the Council, and shall not be withdrawn, altered, or amended, without leave having been first obtained from the Council for such withdrawal, alteration, or amendment.

*Motions and Amendments.*

*Motions how to be moved.*

11. Except by leave of the Council motions shall be moved in the order in which they stand on the business paper, and if not so moved or postponed shall be struck from such business paper, and be considered to have lapsed.

*Absence of proposed mover.*

12. No motion of which notice shall have been entered on the business paper, shall, as hereinafter provided, be proceeded with in the absence of the Alderman by whom such notice shall have been given, unless by some other Alderman producing a written authority for that purpose from such first-named Alderman.

*Motions to be seconded.*

13. No motion in Council shall be discussed, unless and until it be seconded.

*Amendments may be moved.*

14. When a motion in Council shall have been made and seconded, any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed unless and until it be seconded.

*Motions and amendments to be in writing.*

15. No motion or amendment shall be discussed until it shall have been reduced into writing.

*Only one amendment at a time.*

16. No second or subsequent amendment shall be taken into consideration until the previous amendment, or amendments shall have been disposed of.

*Amended question—further amendment may be moved thereon.*

17. If an amendment be carried, the question as amended thereby shall become itself the question before the Council, whereupon any further amendment upon such question may be moved.

*How amendments to be put.*

18. Any number of amendments may be proposed on a motion before the Council, and when more than one amendment shall have been moved and seconded, the question shall first be put on the last amendment, then on the next preceding the last, and so on, in inverse order to that in which they shall have been moved, unless when such motion or amendment shall relate to the fixing of salaries, rates, or other matters of finance, in which case the lowest sum shall be put first, and then the next lowest, and so on to the highest.

*Motions for adjournment.*

19. No motion for adjournment of the Council shall be discussed. If seconded, such motion shall be put at once. If negatived, no similar motion will be permitted to be made until half-an-hour has elapsed after putting the one that has been negatived, and the subjects on the business paper shall be proceeded with in order.

*Motions to be in writing and not withdrawn without leave.*

20. The Council Clerk shall put every motion into writing, which shall be signed by the mover; and every motion, when seconded and read by the Clerk, shall be considered the property of the Council, and shall not be withdrawn without leave of the Council.

*Orders of the day.*

*Of what orders of the day shall consist.*

21. The orders of the day shall consist of any matters other than motions on notice which the Council shall at a previous meeting thereof have directed to be taken into consideration, or which the Mayor or Chairman, or any Committee of the Council shall have directed to be entered on the business paper for consideration.

*How they are to be dealt with.*

22. The Alderman who has the usual charge of, or who has previously moved in reference to the particular business to which any such order of the day relates, shall be the person called upon to move: Provided that the Mayor or Chairman for the time being may as to any order of the day entered by his direction, arrange with and call upon any Alderman to move the same.

*Petitions.*

*Petitions to be respectfully worded.*

23. It shall be incumbent on every Alderman presenting a petition to acquaint himself with the contents thereof, and to ascertain that it does not contain language disrespectful to the Council. The nature and prayer of every such petition shall be stated to the Council by the Alderman presenting the same.

*Petitions how received.*

24. All petitions shall be received only as the petitions of the parties signing the same.

*How Petitions are to be dealt with.*

25. No motion shall, unless as hereinafter provided, be permissible on the presentation of a petition, except that the same be received and referred to one of the permanent Committees hereinafter mentioned, or that it be received, and that its consideration stand an order of the day for some future meeting: Provided however that if any Alderman shall have given due notice of a motion in reference to any petition, and such petition shall have been presented before such Alderman shall have been called upon to move such motion, the said motion shall, if otherwise unobjectionable, be considered in order.

*Correspondence.*

*Duties of Mayor as to Correspondence.*

26. The Mayor shall have the same duty in reference to letters addressed to the Council before directing the same to be read as by section 26 of this Part of these By-laws is imposed on Aldermen presenting petitions. The Mayor shall direct as to the order in which all correspondence shall be read, and no letter addressed to the Council shall be presented or read by any Alderman. If the Mayor be absent and shall not have examined any such letters addressed to the Council, or have given any such directions as aforesaid, then the duties imposed by this section shall devolve upon the presiding Alderman.

*Section 26 to apply to letters.*

27. Section 26 of this "Part" of these By-laws shall be considered as fully applicable to letters addressed to the Council as to petitions.

*Reports from Committees, and Minutes from the Mayor.*

*Form of Report.*

28. All reports from Committees shall be written on foolscap paper, with a margin of at least one-fourth of the width of such paper, and shall be signed by the Chairman of such Committee, or, in his absence, by some other member of the same.

*Mayor's Minute.*

29. The Mayor shall have the right of directing the attention of the Council to any matter or subject within its jurisdiction or official cognizance by a minute in writing. Every such minute shall be written on paper of the same kind, and with the same margin as a report from a Committee, and shall be signed by such Mayor.

How reports, &c. are to be dealt with; duties of Chairman, &c. in certain cases.

30. No motion shall (unless as hereinafter provided) be permissible on the presentation of a report from a Committee, or a minute from the Mayor, except that the same be received, or that it be received and that its consideration stand an order of the day for some future meeting: Provided, however, that if any Alderman shall have given due notice in reference to any such report or minute, or if any order for the consideration of such report or minute shall have been entered among the orders of the day, such motion or order may, if otherwise unobjectionable, be moved or considered in due course; and whenever any such report or minute embodies any recommendation which cannot legally be carried out without due notice, and it is nevertheless desirable that such report or minute shall be definitely ordered upon during the meeting of the Council at which such report or minute is presented, it shall be the duty of the Chairman or member of such Committee signing such report, or of such Mayor, as the case may be, to give or transmit to the Council Clerk such a notice of motion, requisition, or direction as aforesaid as will enable such Council Clerk to make the necessary entry on the business paper and to give such due notice.

*Questions and Statements.**Limitations as to Questions and Statements.*

31. No question or statement shall be allowed to be put or made which is inconsistent with good order or is not in strict accordance with the requirements of section 4 of this Part of these By-laws.

*Notice to be given.*

32. Twenty-four hours notice of every question shall be given to the person who is expected to reply thereto; to allow for the consideration of such reply, and if necessary for a reference to other persons or to documents.

*Answer not compulsory.*

33. It shall not be compulsory upon any person questioned as aforesaid to answer the question so put to him.

*Question to be put without argument, &c.*

34. Every such question must be put categorically, without any argument or statement of fact.

*Similar provision as to statements.*

35. Every such statement must be made without argument.

No discussion on question, &c., Rights of objection, and of subsequent motion reserved.

36. No discussion shall be permitted as to any such question or as to any reply or refusal to reply thereto, or as to any such statement, at the time when such question is put, or such reply or refusal to reply is given, or such statement is made: Provided however, that nothing herein contained shall prevent the taking of any objection as to any such question or statement being out of order, or shall prevent the discussion after due notice, as hereinbefore provided, of any matters properly arising out of or relating to any such question, or reply, or refusal to reply, or any such statement as aforesaid.

*Order of Debate.**Mode of addressing the Council.*

37. Every Alderman who shall make or second any motion, or shall propose or second any amendment, or shall take any part in any debate or discussion, or shall put or reply to any question, or shall make any statement, or shall in any other way or for any other purpose address observations to the Council, shall while so doing stand up in his customary place (unless he shall be prevented from so doing by reason of some bodily infirmity), and shall address himself to the Mayor or other Chairman then presiding: Provided that in the case of a question, such question may by permission of such Mayor or Chairman be put directly to the Alderman or officer to be questioned, and may be replied to in a like manner; but in every such case the question so put, and the answer thereto, shall be subject to every legal objection, on the ground of disorder or inclemency. And all members of the Council shall on all occasions when in such Council, address and speak of each other by their official designations as—Mayor, Chairman, or Alderman—as the case may be.

*Speaker not to be interrupted if in order.*

38. No Alderman shall be interrupted while thus speaking, unless for the purpose of calling him to order as hereinafter provided.

*Limitation as to number of speeches, &c.*

39. Every mover of an original motion shall have a right of general reply to all observations which may have been made in reference to such motion, and to any amendments moved thereon, as well as a right to speak upon every such amendment. Every Alderman, other than the mover of such original motion shall have a right to speak once upon such motion, and on every amendment thereon. No Alderman shall speak longer than fifteen minutes nor oftener than once upon any question other than a question of order, unless when misrepresented or misunderstood, in which case he shall be permitted to explain, without adding any further observations than may be necessary for the purposes of such explanation.

*Mover and Seconder.*

40. An Alderman who has moved any motion or amendment shall be considered to have spoken thereon; but an Alderman who shall have seconded any such motion or amendment without any further observation than that he seconded the same, shall be at liberty to speak on such motion or amendment.

*Speaker not to digress, &c.*

41. No Alderman shall digress from the subject under discussion, or shall make any personal reflections on nor impute improper motives to any other Alderman.

*Adjournment of debate.*

42. A debate may be adjourned to a later hour of the day, or to any other day specified; and the Alderman upon whose motion such debate shall have been so adjourned shall be entitled to pre-audience on the resumption of the same.

*Mayor to decide as to pre-audience.*

43. If two or more Aldermen rise to speak at the same time, the Mayor or Chairman shall decide which of such Aldermen shall be first heard.

*Alderman may require questions to be stated, &c., under certain restrictions.*

44. Any Alderman may request the matter or question under discussion to be stated or read for his information, or may require the production of any records of the Council bearing upon any such question or matter. No such request or requisition shall be made so as to interrupt any Alderman when speaking.

Mayor or Chairman not to move or second motion, &c., but may address Council thereon.

45. The Mayor or Chairman shall not move any motion or amendment, nor put any question, as provided for by section 4 of this Part of these By-laws, except as is further provided for by section 37 of the same; but such Mayor or Chairman shall have the same right as any other Alderman to speak once upon every such subject or amendment. The Mayor or Chairman shall rise when so speaking (unless as in section 37), but shall be considered as still presiding.

*Questions of Order.**Mayor may call Member to order.*

46. The Mayor or Chairman for the time being may, without the interposition of any other Member of the Council, call any Alderman to order whenever in the opinion of such Mayor or Chairman there shall be a necessity for so doing.

*Decision of points of order.*

47. The Mayor or Chairman for the time being, when called upon to decide points of order or practice, shall state the provision, rule, or practice, which he shall deem applicable to the case, without discussing or commenting on the same.

*Motion out of order to be rejected.*

48. Whenever it shall have been decided as aforesaid that any motion, amendment, or other matter before the Council is out of order, the same shall be rejected.

*Mode of Voting.**How questions to be put.*

49. The Mayor or Chairman for the time being shall put to the Council all questions on which it shall be necessary that a vote be taken, and declare the sense of the Council thereon.

*Divisions—penalty for refusing to vote.*

50. Any Alderman may call for a division, and the votes shall be taken by a show of hands. In such case the question shall be put first in the affirmative and then in the negative, and the names and votes of the Aldermen present shall be recorded. Any Alderman present when a division is called for who shall not vote on such division, not being disabled by law from so voting, shall be liable for every such offence to a penalty of not less than five shillings nor more than two pounds.

*Committee of the Whole Council.**Business in Committee.*

51. The business Committees of the Whole Council shall be conducted in accordance with the rules hereinbefore provided as near as the same shall apply, except that it shall not be necessary that any motion or amendment in Committee shall be seconded.

*Calls of the Council.*

How call of Council to be made.

52. A call of the Council may be ordered by any resolution of which due notice shall have been given for the consideration of any motion or matter of business before the Council.

Such call to be compulsory in certain cases.

53. No motion, the effect of which if carried would be to rescind any resolution, order, or decision of the Council, shall be entered on the business paper unless a call of the Council has been duly made and granted for such purpose.

Mode of proceeding.

54. The call shall be made immediately before the motion or business for which such call has been ordered shall be moved or considered.

*Standing and Special Committees.*

Standing Committees.

55. There shall be three Standing Committees, namely, a By-law, a Works, and a Finance. These Committees shall be re-appointed every year, at the first meeting of the Council which shall be holden after the election of the Mayor.

Mode of re-appointing Standing Committees.

56. The re-appointment of the three Standing Committees may, on resolution of the Council, be made by ballot. In such case a list or lists of the members shall be handed to each then present, who shall mark against the name of each such member the title of the Committee to which, in his opinion, such member ought to belong; and the Mayor or Chairman shall thereupon examine such lists so marked, and shall declare the result; and if there shall be an equal number of votes for the appointment of any two or more members to any one of such Committees, such Mayor or Chairman shall decide which of such members shall be appointed.

By-law Committee.

57. The By-law Committee shall prepare for the consideration of the Council drafts of all such By-laws as may be required for the good government of the Municipality.

Works Committee.

58. The Committee for Works shall have the general direction of all works ordered or sanctioned by the Council, and the general inspection of all streets, roads, ways, bridges, public reserves, and other public places under the care and management of the Council; they shall also inquire and report from time to time as to such improvements or repairs as they may think necessary, or as they may be directed by resolution of the Council to inquire and report upon.

Finance Committee.

59. The Finance Committee shall examine and check all accounts, and shall watch generally over the collection and expenditure of the municipal revenues. They shall inquire and report from time to time as to all matters which they may consider to affect or to be likely to affect the finances of the Municipality, and as to such matters or subjects of the like nature as they may be directed by resolution of the Council to inquire and report upon.

Records of transactions in Committee.

60. The Chairman of each Standing Committee shall make or cause to be made, in a book kept by him for that purpose, memoranda of all the transactions of such Committee, which book he shall, on ceasing to be such Chairman, hand over to his successor.

*Expenditure.*

Except in emergent matters, cost of all work to be estimated before undertaken.

61. With the exception of emergent matters hereinafter specially provided for, no work affecting the funds of the Municipality shall be undertaken until the probable expense thereof shall have been first ascertained by the Council.

Emergent matters and necessary current expenses—Expenses authorized to be reported—Outlay to be in accordance with the orders of the Council.

62. For emergent matters and for necessary current expenses during the intervals which may elapse between the meetings of the Council, outlays to the following extent may be incurred:—

- (1.) By order of the Committee for Works, or of the Mayor and one member of such Committee for repairs or emergent works, to the extent of five pounds.
- (2.) By order of the Mayor, for necessary current expenses, to the extent of ten pounds.

Provided that in every case a detailed report in writing of every such outlay shall be laid before the Council at its next meeting, such report to be signed by the Chairman of the Committee of Works or the Mayor.

All claims to be examined and reported upon by Finance Committee.

63. All accounts and demands of money against or from the Council shall be examined and reported on by the Finance Committee before any order shall be made for payment of such accounts or demands.

Certificate required with each claim—Salaries and wages to be payable on Mayor's order—Certificates to be attached to report.

64. No payment shall be so ordered unless there shall be a certificate or memorandum from the Committee or Mayor showing that the demand is a legitimate one, and has been duly authorized or inquired into. It shall be the imperative duty of the Finance Committee to see that this requirement is fulfilled, or to report specially as to the reasons for its non-fulfilment before recommending payment; and provided further, that in regard to salaries and wages of labour for officers, servants, and labourers employed at fixed rates of payment by order of the Council, the certificate of the Mayor of the amount due to such officer, servant, or labourer, and the order of such Mayor for payment of such amount, shall be a sufficient authorization for such payment.

Common seal and records of the Council—Common seal and press, how secured—care of same.

65. The common seal and the press to which the same is attached shall be secured by a cover or box, which—except when such seal and press are in use—shall be kept locked. There shall be duplicate keys to the lock of this cover or box, of which keys one shall be kept by the Mayor and the other by the Council Clerk. Such common seal and press shall be in the custody and the care of the Council Clerk.

When and how common seal to be used.

66. The common seal shall not be attached to any document without an express order of the Council. In every case when such common seal has been ordered to be attached to any document, such document shall also be signed by the Mayor, or in case of the absence or illness of such Mayor, by two Aldermen, and countersigned by the Council Clerk.

How books of account, &c. be kept.

67. All books, deeds, memorials, letters, documents, and other records of the Council, except as hereinafter mentioned, shall be kept at the Council Chambers in the custody and care of the Council Clerk, who shall be responsible for the safe custody of the same, but the Mayor or Council Clerk may for any special purpose authorize their removal.

Books, &c., not to be shown or exposed to view without leave.

68. No member or officer of the Council shall be at liberty to show, lay open, or expose any of the books, papers, or records of the Council to any person not a member of the Council, without the written permission of the Mayor. Any member or officer who shall commit a breach of this section shall be liable on conviction to a penalty of not less than ten shillings nor more than two pounds.

Records not to be removed.

69. Any person removing any such book, paper, or record from the Council Chambers, without leave from the Mayor or Council Clerk in writing first had and obtained, shall be subject to a penalty of not less than ten shillings nor more than ten pounds. And nothing herein contained shall be held to affect the further liability of any person who shall have received such book, paper, or record, and shall not have returned the same, to prosecution for stealing such book, paper, or record, or to an action at law for detention of the same as the circumstances of the case may warrant.

Receipt for documents.

70. Every person removing any document or record with such consent as aforesaid shall give a receipt under his hand for every such document, which receipt shall be carefully preserved among the records until the document or other record to which it refers shall have been returned, when such receipt shall be destroyed.

Penalty for destroying or defacing records.

71. Any person destroying or defacing, or wilfully or improperly altering any books, papers, or records, shall for every such offence be liable to a penalty of not less than five pounds nor more than twenty pounds.

*Officers and Servants.*

Notice to Candidates.

72. No appointment to any permanent office at the disposal of the Council shall take place until notice shall have been given as hereinafter provided, inviting applications from qualified candidates for the same. The salary or allowance attached to the office shall in every case be fixed before such advertisement is published, and shall be stated in such advertisement.

Mode of appointment.

73. Every such appointment shall be made by ballot, in such mode as may at the time be determined upon, whenever there is more than one candidate for such permanent office.

Exceptional cases.

74. Nothing herein contained shall be held to prevent the employment, as may be from time to time found necessary and as may be ordered by the Council, of any workmen or labourers on the public works of the Municipality.

**Bonds for good conduct.**

75. All bonds given by officers or servants of the Council for the faithful performance of their duties shall be deposited with the attorney or bankers of the Corporation, as the Council may order; and no officer or servant of the Council shall be received as surety for any other such officer or servant.

**Duties of Council Clerk.**

76. The Council Clerk, in addition to the duties which by the "Municipalities Act of 1867" and the "Municipalities Act of 1867 Amendment Act of 1874," or by the present or any other By-laws thereunder he may be required to perform, shall be the Clerk of all Revision Courts held in the Municipality under the provisions of the said Municipalities Acts; he shall also, under the direction of the Mayor, conduct all correspondence which may be necessary on the part of the Council; he shall likewise have charge of all the records of such Council, except such books or documents as may be entrusted to any other officer, and shall be responsible for the safe keeping of such records; he shall generally assist the Mayor in carrying out the orders of the Council, and the duties of the Mayor, and shall make a half-yearly return of the revenue and expenditure.

**Duties of other officers and servants.**

77. The duties of all officers and servants of the Corporation, in addition to the duties which by the present or any other By-laws thereunder he may be required to perform, shall be defined by such Regulations as may from time to time and in accordance with law be made.

**Special powers of Mayor.**

78. The Mayor shall exercise a general supervision over all officers and servants of the Corporation, and may order the preparation of any such return or statement, or the giving of any such explanation or information, by any such officer or servant as he may think necessary, unless such return or statement shall have been already prepared, or such return or statement, explanation, or information, already given and on record, or unless the Council shall have expressly forbidden or dispensed with the preparation of such return or statement, or the giving of such explanation or information. All such returns or statements as aforesaid shall be in writing, and shall be recorded. All such explanations or information may be either rendered *vis à voce*, or put into writing, as the Mayor may direct.

**Complaints against officers.**

79. All complaints against officers or servants of the Corporation must be in writing, addressed to the Mayor, and must in every case be signed by the person or persons complaining; and no notice whatever shall be taken of any complaint which is not in writing or which is anonymous. And such complaint as aforesaid shall be laid by the Mayor before the Council at the next meeting thereof which shall be holden after the Mayor shall have received the same, and shall be duly recorded.

**Miscellaneous.****Leave of absence.**

80. No leave of absence shall be granted to the Mayor, or to any Alderman, otherwise than by a resolution of Council, adopted after due notice.

**Mode of calling for tenders.**

81. Whenever it is decided that any work shall be executed, or any material supplied by contract, tenders for the execution of such work, or the supply of such material, shall be called for by public notice, as hereinafter provided.

**Draft of intended By-laws.**

82. A draft of every intended By-law shall lie in the office of the Council for at least seven days before such draft shall be taken into consideration by the Council, and shall be open to the inspection of any ratepayer who may desire to inspect the same; and public notice shall be given, as hereinafter provided, that such draft is so lying for inspection.

**Motions for rescission of previous orders, &c.**

83. Whenever a motion for the rescission of any order, resolution, or vote of the Council, shall have been negatived, no other motion to the same effect shall be permissible until a period of three months shall have elapsed from the time of negativing such first-mentioned motion: Provided that nothing herein contained shall be held to prohibit the reconsideration and amendment of any proposed By-law which may have been remitted to the Governor for confirmation, and may have been remitted to the Council, with suggested amendments of the same, or the passage, after due notice as hereinbefore provided, and in due course of law, of any By-law for the repeal or amendment of any other By-law.

**Lapsed business.**

84. Whenever the consideration of any motion or matter of business shall have been interrupted, by reason of a quorum not having been present, the resumption of such consideration shall in such case be resumed at the next meeting, at the point where it was so interrupted.

**Suits and prosecutions for penalties, &c.**

85. Such suits or informations for the enforcement of penalties for or in respect of breach of the Municipalities Act of 1867, or of any By-law made thereunder, or of any statute the operation of which may have been extended to the Municipality as may have been directed by the Council, shall be so commenced or laid by the Solicitor of the Municipality, or by any officer named by the Council for that purpose imposing the penalty sought to be enforced; and no such suit shall be brought or information laid as aforesaid against any member of the Council, or Auditor, or servant, except on an express resolution of the Council.

**How notices are to be published.**

86. In all cases where public notice is or shall be required to be given by any By-law, such notice shall be given and published by advertising the same in some newspaper circulating in the Municipality.

**Mode of proceeding in cases not provided for.**

87. In all cases not herein provided for, resort shall be had to the rules, forms, and usages of the Legislative Assembly of New South Wales, so far as the same are applicable to the proceedings of the Council.

**Power to suspend temporarily any portion of these By-laws.**

88. Any of the foregoing By-laws which relate to or affect the proceedings at meetings of the Council, may be suspended *pro tempore* without notice, in cases of emergency, if all the members of the Council then present shall deem such suspension necessary.

**PART II.****Collection and enforcement of rates.****Rates when due and payable.**

1. All rates levied and imposed by the Council shall be held to be due and payable on and after such day or days as the Council shall by resolution from time to time appoint.

**Time and place of payment.**

2. All such rates shall be paid at the Council Chambers, during the hours appointed by the Council for that purpose.

**Defaulters.**

3. Every person not paying his or her rates as aforesaid, within thirty days after the day so appointed for payment thereof, shall be deemed a defaulter, and it shall be the duty of the Council Clerk to furnish the Mayor from time to time with a list of the names of all persons so in default.

**Mayor to enforce payment.**

4. It shall be the duty of the Mayor to take proceedings to enforce the payment of all rates in default, either by action at law or by issuing warrants of distress upon the goods and chattels of the defaulter.

**Bailiff, how appointed.**

5. The Bailiff of the Municipality shall be appointed by the Council, and may from time to time be removed by them.

**Bailiff, to find sureties.**

6. The Bailiff shall find two sureties to the satisfaction of the Mayor, to the extent of (£50) fifty pounds each, for the faithful performance of his duty.

**Duties of Bailiff.**

7. It shall be the duty of the Bailiff to make levies by distress for the recovery of rates in manner hereinafter provided.

**Warrant of distress.**

8. All levies and distresses shall be made under warrant in the form of Schedule A hereto, under the hand of the Mayor, or any Alderman who may for the time being be duly authorized to perform the duties of that office.

**Distress and sale, &c.**

9. It shall be lawful for the Bailiff, or his deputy, and such assistants as he may take with him, to enter into any part of the land, building, tenement, or other property, in respect of which such rate or rates shall have been made as aforesaid, and to distrain the goods therein or thereon, and to remain in such building, tenement, or other property in charge thereof. And if the sum for which any such distress shall have been made or taken, together with the costs of such distress, shall not have been paid on or before the expiration of three clear days, the Bailiff or his deputy may, between the hours of eleven in the morning and two in the afternoon, on the next day thereafter, cause the goods so distrained, or a sufficient portion thereof to be sold by public auction, either on the premises or at such other place within the Municipality as the Bailiff may think proper to remove them for such purpose, and shall pay over the surplus (if any) that may remain after deducting the amount of the sum distrained for, and the costs of such distress, to the owner of such goods so sold, on demand by such owner.

**Inventory.**

10. At the time of making a distress the Bailiff shall make out a written inventory in the form of Schedule B hereto, which inventory shall be delivered to the occupant of the land or premises, the owner of the goods so distrained, or to some person on his or her behalf resident at the place where the distress shall be made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress is made; and the Bailiff shall give a copy of the inventory to the Council Clerk.

**Goods may be impounded.**

11. The Bailiff, on making a distress as aforesaid, may impound or otherwise secure the goods or chattels so distrained, of what nature or kind soever, in such place or places, or in such part of the land or premises chargeable with rates as shall be most fit and convenient for this purpose; and it shall be lawful for any person whomsoever, after the expiration of three days, as hereinbefore mentioned, to come and go to and from such place or part of the land or premises where such goods or chattels shall be impounded and secured as aforesaid, in order to view and buy and in order to carry off and remove the same on account of the purchaser thereof.

**Owner to direct order of sale.**

12. The owner of the goods or chattels so distrained upon may, at his or her option, direct and specify the order in which they shall be successively sold; and the said goods or chattels shall in such case be put up for sale according to such direction.

**Proceeds of distress.**

13. The Bailiff shall hand over to the Council Clerk all proceeds of every such distress within forty-eight hours after having received the same.

**Deputy.**

14. The Bailiff may, with the sanction in writing of the Mayor, or in his absence with the sanction of any two Aldermen of the Municipality, authorize by writing under his hand any person to act temporarily as his deputy; and the person so authorized shall have and exercise all the powers of the Bailiff himself, but the Bailiff and his sureties shall in every case be responsible for the acts of such deputy.

**Costs.**

15. There shall be payable to the Bailiff for the use of the Council, for every levy and distress made under this By-law, the costs and charges in the Schedule hereunto annexed marked C.

**SCHEDULE A.**

**Warrant of Distress.**

I, \_\_\_\_\_, Mayor of the Municipality of Manly, do hereby authorize you \_\_\_\_\_, the Bailiff of the said Municipality, to distrain the goods and chattels in the dwelling-house (or in and upon the land and premises) of \_\_\_\_\_ situate at \_\_\_\_\_, for \_\_\_\_\_, being the amount of rates due to the said Municipality to the \_\_\_\_\_ day of \_\_\_\_\_ for the said dwelling-house (or land or premises as the case may be), and to proceed for the recovery of the said rates according to law.

Dated this \_\_\_\_\_ day of \_\_\_\_\_ 18 \_\_\_\_\_  
Mayor.

**SCHEDULE B.**

**Inventory.**

I have this day, in virtue of the warrant under the hand of the Mayor of the Municipality of Manly, dated \_\_\_\_\_, distrained the following goods and chattels in the dwelling-house (or in and upon the land and premises) of \_\_\_\_\_ situate at \_\_\_\_\_, within the said Municipality, for \_\_\_\_\_, being the amount of rates due the said Municipality to the \_\_\_\_\_ day of \_\_\_\_\_

Dated this \_\_\_\_\_ day of \_\_\_\_\_ 18 \_\_\_\_\_  
Bailiff.

**SCHEDULE C.**

**Costs.**

	s.	d.
For every warrant of distress .....	2	0
For every warrant and making levy where the sum is not more than £20 .....	2	0
Above that sum, in addition for every £1 .....	0	1
For making and furnishing copy of inventory ...	2	0
For man in possession each day, or part of day ...	5	0
For sale, commission and delivery of goods, per pound on proceeds of sale .....	1	0

**PART III.**

**Preventing and extinguishing fires.**

**Fire or combustible materials, &c.**

1. Every person who shall place or knowingly permit to be placed, in any house, yard, workshop, out-offices, or other premises, fire, gunpowder, or combustible or inflammable materials of any kind, in such a manner as to endanger contiguous buildings, shall on conviction for every such offence forfeit and pay a penalty of not more than five pounds; and shall forthwith remove such fire, gunpowder, or combustible or inflammable materials; and every such person who shall suffer any such fire, gunpowder, or combustible or inflammable materials to remain as aforesaid for twenty-four hours after any such conviction, shall be deemed guilty of a further offence against this By-law.

**Inflammable fences, &c.**

2. Every person who shall erect any fence of brushwood, bushes, or other inflammable material, or shall make or place any stack of hay, corn, straw, or other produce, or place as or for the covering of any such stack, any inflammable material, so as to endanger contiguous buildings or properties, or any trees, shrubs, or other produce of such properties, or any chattels in or upon such buildings or properties, shall forfeit on conviction for every such offence a penalty of not more than five pounds, and also shall remove such fence, stack, or covering within a reasonable time after such conviction as aforesaid, shall be deemed guilty of a further offence against this By-law.

**Setting fire to matter without notice.**

3. Any person who shall wilfully set fire to any inflammable matter whatever in the open air, within five yards of any dwelling-house or other building or boundary or dividing fence within the said Municipality, without having given notice in writing to the occupiers of the land adjoining the land upon which such matter shall be of his intention so to do, or between the hours of six in the afternoon of any day and six in the morning of the following day, shall for every such offence forfeit a sum not exceeding five pounds.

**Fireworks.**

4. Every person who shall light any bonfire, tar barrel, or firework, upon or within ten yards of any public or private street, or any public place, or shall discharge any fire-arms without lawful cause within one thousand yards of any dwelling within the boundaries, shall forfeit a sum not exceeding five pounds.

**Wilfully setting fire to chimneys.**

5. Every person who wilfully sets or causes to be set on fire any chimney-flue, smoke-vent, or stove-pipe, herein called in common a "chimney," shall forfeit a sum not exceeding five pounds: Provided always that nothing herein contained shall exempt the persons so setting or causing to be set on fire any chimney, from liability to be informed against or prosecuted before any Criminal Court for such act as for an indictable offence.

**Burning shavings, &c., in the streets.**

6. Any person who shall burn any shavings, rubbish, or any other matter or thing, in any road, street, lane, or public place within the said Municipality, or who shall within ten yards of any dwelling-house, burn rags, bones, corks, or other offensive substance, shall for every such offence forfeit and pay a sum not exceeding forty shillings nor less than five shillings.

**Placards not to be affixed on walls without consent.**

7. It shall not be lawful for any person to paste or otherwise affix any placard or other paper upon any wall, house, fence, or other erection, nor deface any such wall, house, fence, or erection with chalk, paint, or other matter, unless with the consent of the owner thereof; and every person who shall be guilty of any such offence shall pay a sum not exceeding twenty shillings nor less than five shillings.

**Compensation for attendance at fires.—Rewards.**

8. There shall be paid out of the municipal funds to the owner of every water-cart who shall have attended with any water at the place of any fire as herein provided, and delivered the same as required for extinguishing such fire, such reasonable compensation as the Council shall by resolution have appointed in that behalf, and also to such owners of such carts as shall have first and second in order attended with loads of water, such further sums by way of reward as the Council may by similar resolutions have fixed.

**PART IV.**

**Streets and public places. Public health and decency, &c. Streets, &c.**

**New roads to be reported on.**

1. No new public road, street, way, reserve, or other place proposed to be dedicated to the public, shall be taken under the charge and management of the Council until after such road, street, way, or reserve shall have been examined by the Committee for Works and reported upon to the Council by such Committee.

Plans of proposed new road, &c. to be deposited.

2. Whenever any proprietor or proprietors of land within the said Municipality shall open any road, street, or way, or lay out any park or other place for public use or recreation, through or upon such land, and shall be desirous that the Council shall undertake the care and management of such road, street, way, reserve, or other place, he or they shall furnish the Council with a plan or plans signed by himself or themselves, showing clearly the position and extent of such road, street, way, reserve, or other place as aforesaid.

Dedications of new roads, &c.

3. If the Council determine to take charge of any such road, way, or other place as aforesaid, the plan or plans, so signed as aforesaid, shall be preserved as a record or records of the Council, and the proprietor or proprietors aforesaid shall execute such further instrument dedicating such road, way, reserve, or other place to public use or recreation as aforesaid, as may be considered necessary by the Committee for Works, and such further instrument of dedication shall also be preserved as a record of the Council.

Committee for Works to fix street-levels, &c.

4. The Committee for Works, or any officer or person acting under the supervision of such Committee, shall, subject to such orders as shall from time to time be made by the Council in that behalf, fix and lay out the levels of all public roads, streets, and ways within the Municipality, and the carriage and footways thereof; and it shall be the duty of such Committee, officer, or person, to place posts at the corners or intersections of any such public roads and streets, and of the carriage-ways and footways of such roads and streets, wherever the same may be considered necessary or desirable by the Council: Provided that there shall be no change of level in any such public road, street, or way, until the same shall have been submitted to and adopted by the Council as hereinafter directed.

Change of street-levels.

5. Whenever it may be deemed necessary to alter the level of any such public road, street, or way, as aforesaid, the Committee for Works shall cause a plan and section, showing the proposed cuttings, to be exhibited at the Council Chamber for fourteen days, for the information and inspection of rate-payers, and shall notify, by advertisement in some newspaper circulating in the Municipality, that such plan is so open to inspection. At a subsequent meeting of the Council the said plan and section shall, if adopted, be signed by the Mayor or Chairman, and the proposer and seconder of the motion for such adoption, and countersigned by the Council Clerk; and such plan and section so signed and countersigned shall be a record of the Council.

No turf, gravel, &c. to be removed from streets without permission.

6. Any person who shall form, dig, or open any drain or sewer, or remove or cause to be removed any turf, clay, sand, soil, gravel, stone, or other material, or any road scrapings or sweepings, in or from any part of the carriage or foot way of any street or any other public place within the said Municipality, without leave first had and obtained from the Council, or who shall wantonly break up or otherwise damage any such carriage or foot-way, shall on conviction forfeit and pay for every such offence any sum not exceeding five pounds nor less than one pound.

Holes to be enclosed.

7. Any person or persons who shall dig or make, or cause to be dug or made, any hole, or leave or cause to be left any hole adjoining or near to any street or public place within the said Municipality, for the purpose of making any vault or vaults, or the foundation or foundations to any house or building, or for any other purpose whatsoever, or shall erect or pull down any building and shall not forthwith enclose the same, and keep the same enclosed in a good and sufficient manner, to the satisfaction of the Committee for Works of the said Municipality, or shall keep up or cause to be kept up and continued any such enclosure for any time which shall be no longer than shall be absolutely necessary in the opinion of the said Committee, and shall not place lights upon each side of the said enclosure and keep the same constantly burning from sunset to sunrise during the continuance of such enclosure, shall forfeit and pay for every such refusal or neglect any sum not being less than forty shillings nor exceeding five pounds.

Open spaces and steps adjoining footways to be enclosed under penalty.

8. Every owner or occupier of any house, building, or premises or land, within the said Municipality, having any entrance area, garden, or other open space, or any vacant building lot, water-hole, or excavated space, adjoining the footway of any street or public place in such Municipality, shall protect and guard the same by good and sufficient rails, fences, or other enclosures, so as to prevent danger to persons passing and re-passing; and every such owner or occupier of any such house, building, premises, or land having any steps adjoining the footway of any such street or public place, shall in like manner protect and guard the same by fences, rails, or other enclosure, so as to prevent

the like danger to persons passing and re-passing; and on failure thereof of every such owner or occupier shall as often as he shall be convicted of such offence forfeit and pay a sum not being less than forty shillings nor more than five pounds. And every such owner or occupier as aforesaid who shall fail to erect such fences or other enclosures as aforesaid shall be deemed guilty of a further offence against this By-law.

Wells to be covered over—penalty.

9. Every person who shall have a well situated between his or her dwelling-house, or the appurtenances thereof, and any road, street, or footway, within the limits of the said Municipality, or at the side of or in any yard or place open or exposed to such road, street, or footway within the limits of the said Municipality, or at the side of or in any yard or place open or exposed to such road, street, or footway, shall cause such well to be securely and permanently covered over; and if any person having such well as aforesaid shall fail to cover over and secure the same within twenty-four hours after notice in writing shall have been given to him or her by any officer of the said Council, or shall have been left for such person at his or her usual or last known place of abode, or on the said premises, shall on conviction forfeit and pay a sum of ten shillings, and for every day after such notice that such well shall remain open or uncovered contrary to the provisions thereof, such person shall be deemed guilty of a separate offence against this By-law.

Temporary stoppage of traffic for repairs.

10. The Committee for Works, or any officer or person acting under the authority of such Committee, may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same, or for any necessary purpose; and any person or persons offending against this By-law, either by travelling on street, lane, or thoroughfare, or by removing or destroying any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty of any sum not exceeding five pounds for every such offence.

Drawing or trailing timber, &c.

11. Any person who shall haul or draw, or cause to be hauled or drawn upon any part of any street or public place within the said Municipality any timber, stone, or other thing, otherwise than upon wheeled vehicles or barrows, or shall suffer any timber, stone, or other thing, which shall be carried principally or in part upon any wheeled vehicle or barrow, to drag or trail upon any part of such street or public place to the injury thereof, or to hang over any part of any such vehicle or barrow, so as to occupy or obstruct the street beyond the breadth of the said vehicle or barrow, shall upon conviction forfeit and pay for every such offence a sum not more than forty shillings nor less than five shillings over and above the damage occasioned thereby.

Driving carriages, &c. on footways, and throwing filth, &c.

12. Any person who shall throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or to remain, any ashes, rubbish, offal, dung, soil, dead animal, blood, or other filth or annoyance, or any matter or thing in or upon the carriage-way or foot-way of any street or other public place in the said Municipality, or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other animal, in or so near to any such street or other public place as that any blood or filth shall run or flow upon or over or be on any or either of any such carriage or foot-way, or shall run, roll, drive, draw, place, or cause, permit, or suffer to be run, rolled, driven, drawn, or placed upon any of the said footways of any such street or public place any waggon, cart, dray, sledge, or other carriage, or any wheelbarrow, handbarrow, or truck, or any hogshead, cask, or barrel, or shall wilfully lead, drive, or ride any horse, ass, mule, or other beast upon any such footway shall, upon conviction, forfeit and pay for the first offence a sum not exceeding forty shillings nor less than five shillings; for the second offence a sum not exceeding five pounds nor less than ten shillings, and for a third and every subsequent offence a sum not exceeding ten pounds nor less than one pound for each such offence.

Rain not to be carried on to footpaths.

13. It shall not be lawful for any person whomsoever to carry, by means of pipes, gutters, or other contrivances, any rain-water from the roof of his or her premises or house upon any of the footways of any street or public place within the said Municipality, or any owner or occupier of any such house or premises who shall neglect or refuse to remedy or remove any such pipes, gutters, or contrivances, when required to do so by any officer of the Council, shall on conviction forfeit and pay any sum not exceeding ten shillings, and a like sum for every day or part of a day that the same shall not be remedied or removed: Provided that the owner or occupier of any such house or premises may convey any such rain-water by means of pipes laid under the surface of such footways into the gutters adjoining the same; and provided also that all such pipes shall be laid down to the satisfaction and under the superintendence of the officer appointed by the Council.

Placing carriages, goods, &c., on footways, &c. Not removing when required. Replacing the same after removal. Not to prevent awnings being erected in front of shops.

14. Any person who shall set or place or cause, or permit to be set or placed, any stall-board, chopping-block, show-board, (on hinges or otherwise), basket, wares, merchandise, casks or goods of any kind whatsoever, or shall hoop, place, wash, or cleanse, or shall cause to be hooped, placed, washed, or cleansed, any pipe, barrel, cask, or vessel, in or upon or over any carriage or foot way in any street or public place within the said Municipality,—or shall set out, lay or place, or shall cause or procure, permit, or suffer to be set out, laid or placed, any coach, cart, wain, waggon, dray, wheel-barrow, hand-barrow, sledge, truck, or other carriage, upon any such carriage-way, except for the necessary time of loading and unloading such cart, wain, waggon, dray, sledge, truck, or other carriage, or taking up or setting down any fare, or waiting for passengers when actually hired, or harnessing or unharnessing the horses or other animals from such coach, cart, wain, waggon, dray, sledge, truck, or other carriage,—or if any person shall set or place, or cause to be set or placed, in or upon or over any such carriage or foot way, any timber, stones, bricks, lime, or other materials or things for building whatsoever (unless the same shall be enclosed as herein directed), or any other matters or things whatsoever,—or shall hang out or expose, or shall cause or permit to be hung out or exposed any meat or offal, or other thing or matter whatsoever, from any house or other building or premises, or any other matter or thing from and on the outside of the front or any other part of any house or other building or premises, over or next unto any such street or public place, and shall not immediately remove all or any such matters or things, being thereto required by the Inspector of Nuisances or other proper officer of the Council,—or if any person who having, in pursuance of any such requisition as aforesaid, removed or caused to be removed any such stall-board, show-board, chopping-block, basket, wares, merchandise, casks, goods, coach, cart, wain, waggon, dray, wheel-barrow, sledge, truck, carriage, timber, stones, bricks, lime, meat, offal, or other matters or things, shall at any time thereafter again set, lay, or place, expose or put out, or cause, procure, permit, or suffer to be set, laid, placed, exposed or put out, the same or any of them, or any other stall-board, show-board, chopping-block, basket, wares, merchandise, goods, timber, stones, bricks, lime, coach, cart, wain, waggon, dray, truck, wheel-barrow, hand-barrow, sledge, meat, offal, or other things or matters whatsoever (save and except as aforesaid), in, upon, or over any such carriage or foot way, or next unto any such street or public place as aforesaid,—shall, upon conviction, for every such offence, forfeit and pay for the first offence a sum not exceeding forty shillings nor less than five shillings, for the second offence a sum not exceeding five pounds nor less than ten shillings, and for a third and every subsequent offence a sum not exceeding ten pounds nor less than one pound: Provided that nothing herein contained shall be deemed to prevent any person from placing an awning in front of his or her shop or house, in such manner as that such awning shall be at least seven feet above the height of the foot-way, and that the posts be placed close to the curb-stone or outer edge of such foot-way, and a plan must be submitted to the Council prior to its erection.

*Riding on drays, careless driving, &c.*

15. If the driver of any waggon, wain, cart, or dray of any kind shall ride upon any such carriage in any street as aforesaid, not having some person on foot to guide the same (such carts as are drawn by one horse and driver or guided with reins only excepted),—or if the driver of any carriage whatsoever shall wilfully be at such a distance from such carriage, or in such a situation, whilst it shall be passing upon such street, that he cannot have the direction and government of the horse or horses, or cattle drawing the same,—or if the driver of any waggon, cart, dray, or coach, or other carriage whatsoever meeting any other carriage shall not keep his waggon, cart, dray, or coach, or other carriage, on the left or near side of the road, street, or thoroughfare,—or if any person shall in any manner wilfully prevent any other person or persons from passing him or her, or any carriage under his or her care upon such street, or by negligence or misbehaviour prevent, hinder, or interrupt the free passage of any carriage or person in or upon the same,—every driver or person so offending shall upon conviction forfeit and pay any sum not exceeding forty shillings.

*Riding or driving furiously, &c.*

16. Any person who shall ride or drive through or upon any street or public place within the said Municipality so negligently, carelessly, or furiously that the safety of any other person shall or may be endangered, shall on conviction forfeit and pay a sum not exceeding ten pounds nor less than two pounds.

*Swine, &c., not to wander about the streets.*

17. Any person who shall breed, feed, or keep any kind of swine in any house, yard or enclosure, situate and being in or within forty yards of any street or public place within the Municipality, or shall suffer any kind of swine, or any horse, ass, cattle, mule, sheep, goat, or any other animal of the like

nature belonging to him or her, or under his or her charge, to stray or go about, or to be tethered or depastured in any street, road, or public place, within the said Municipality, shall forfeit and pay for every such offence a sum not exceeding forty shillings and be made liable for damages.

*Blasting rock.*

No rock to be blasted without notice to the Council Clerk.

18. Any person who shall be desirous of blasting any rock within one hundred yards of any street or public place or dwelling-house in the said Municipality shall give notice, in writing, twenty-four hours previously, to the Council Clerk, who shall appoint a time when the same may take place, and give such other directions as he may deem necessary for the public safety; and if any person shall blast or cause to be blasted any rock within the limits aforesaid without giving such notice, or shall not conform to the directions given to him by the said Council Clerk, he or she shall, on conviction, forfeit and pay for every such offence any sum not less than five pounds nor more than twenty pounds.

*Public property.*

*Injuring or extinguishing lamps.*

19. Any person who shall wantonly or maliciously break or injure any lamp or lamp-post, or extinguish any lamp set up for public convenience in the said Municipality shall, over and above the necessary expense of repairing the injury committed, forfeit and pay for every such offence any sum not less than one pound nor more than five pounds.

*As to damaging buildings.*

20. Any person who shall damage any public building, toll-gate, toll-bar, toll-board, wall, parapet, fence, sluice, bridge, culvert, sewer, watercourse, or other public property within the said Municipality, shall pay the costs of repairing the same, and if such damage be wilfully done shall forfeit and pay a sum not exceeding twenty pounds nor less than five pounds.

*Damaging trees.*

21. Any person who shall wilfully, and without the authority of the Council, cut, break, bark, root up, or otherwise destroy or damage the whole or any part of any tree, sapling, shrub, or underwood, growing in or upon any street or place under the management of the Council, shall forfeit any sum not exceeding ten pounds nor less than one pound.

*Obstructing public pathways.*

22. That the owner or occupier of any land situate on the side of any street or road in this Municipality who shall permit any tree, shrub, or plant kept for ornament or otherwise, to overhang any footpath or footway on the side of any such street or road, so as to obstruct the passage thereof, and who on demand made by the Council, or their overseer or inspector, shall not cut or cause to be cut, lopped, or caused to be lopped, all such trees, shrubs, or plants, to the height of eight feet at the least, the said Council, and their servants, labourers, and workmen may cut, or cause to be cut or lopped all such overhanging trees, plants, and shrubs, and to remove or burn any portion of such trees, plants, or shrubs so cut or lopped, without being deemed a trespasser or trespassers; and in case any person or persons shall resist or in any manner forcibly oppose the said Council or their servants, labourers, or workmen, in the due execution of the powers given in this behalf by virtue of the Municipalities Act of 1867, every person so offending shall on conviction for every such offence forfeit and pay any sum not exceeding ten pounds.

*Injuring public fountains, &c.*

23. Any person who shall injure any public fountain, pump, cock, waterpipe, or any other thing connected with the preservation or supply of water to the Municipality, or to any portion thereof, shall forfeit and pay the amount of such damage, and any further sum not exceeding twenty pounds nor less than one pound; and any person who shall bathe and wash himself, or shall wash any cloths or other article at or in any reservoir, channel, fountain, or basin provided for public use, or who shall in any other way foul the water preserved or used for the purpose aforesaid, shall forfeit and pay any sum not exceeding one pound nor less than five shillings.

*Obstructions.*

Dead animals, &c., not to be thrown into any public places, reserves, watercourses.

24. Any person who shall cast any filth, rubbish, or any dead animal, or any animal with intent of drowning into any public watercourse, sewer, waterhole, river, creek, or canal, or who shall suffer slops, suds, or filth of any kind to flow from his or her premises over any of the footways or streets of the Municipality, or shall permit or cause, by means of pipes, shoots, channels, or other contrivances, filth of any kind whatever to flow into any public watercourse, waterhole, river, creek, or canal, or shall obstruct or divert from its channel any sewer or watercourse, river, creek, or canal, shall forfeit any sum not exceeding five pounds.

Suppression of nuisances, &c.

25. In case any privy, hogsty, or any other matter or thing whatsoever which shall at any time be or become a nuisance by causing unwholesome smells to arise within any part of this Municipality, it shall be lawful for any two Justices upon complaint thereof by any person, to investigate such complaint, and to order that such privy, hogsty, boiling down establishment, or other matter or thing, being a nuisance as aforesaid, to be cleansed, removed, or discontinued, as the case may be, within seven days after such order has been made, and notice given to the owner or occupier of the premises whereon such nuisance shall exist; and every such owner or occupier neglecting to remedy or remove such nuisance, pursuant to such notice or order, and to the satisfaction of such Justices, shall forfeit and pay a sum of ten pounds for every such neglect or disobedience; and also it shall be lawful for such Justices to indict or cause to be indicted for such nuisances such person or persons so neglecting or disobeying any such notice or order at the then next Court of General or Quarter Sessions to be held nearest to the said Municipality; and the person or persons being found guilty shall be subject to such punishment and such further order as the Justices assembled at such Sessions shall lawfully decide.

Swine not to be kept.

26. Any person who shall keep, breed, or feed any kind of swine in any house, building, yard, garden, or other hereditament, situate and being in or within forty yards of any street or public place or any dwelling-house in the said Municipality, shall, on conviction, forfeit and pay for every such offence a sum not exceeding forty shillings nor less than five shillings.

Cattle, &c., not allowed to go about the streets, &c.

27. It shall not be lawful for any person whomsoever to suffer any kind of cattle, horse, ass, mule, sheep, swine, or goats belonging to him, or under his or her charge, to depasture, stray, or go about, or to be tethered or depastured in any street, road, or public place within the said Municipality; and any person who shall so offend shall forfeit and pay in respect to every such offence any sum not exceeding two pounds nor less than five shillings.

As to private avenues, &c.

28. Any owner or occupier of any house or place within the said Municipality who shall neglect to keep clean any private avenues, passages, yards, and ways within the said premises, so as by such neglect to cause a nuisance by offensive smell or otherwise, shall on conviction forfeit and pay a sum not exceeding forty shillings nor less than ten shillings for every such offence.

Cleansing butchers' shambles, slaughter-houses, &c.

29. For preserving the cleanliness of the said Municipality and the health of the inhabitants thereof, it shall be lawful for the Inspector of Nuisances, or for any other officer or officers appointed by the Council from time to time, and when and as often as he or either of them shall see occasion, to visit and inspect the butchers' shambles, slaughter-houses, boiling-down establishments, tanneries, and fellmongering establishments in the said Municipality, and to give such directions concerning the cleansing the said shambles, slaughter-houses, tanneries, and establishments, both within and without, as to him shall seem needful; and any butcher, or the owner or occupier of any such shamble, slaughter-house, tannery, or establishment, who shall refuse or neglect to comply with such directions within a reasonable time shall forfeit and pay a sum not exceeding ten pounds nor less than ten shillings.

Inspection of premises.

30. Upon the reasonable complaint, in writing, of any householder that the house, premises, yards, closets, or drains of the neighbouring or adjoining premises are a nuisance or offensive, the Inspector of Nuisances, or any other person appointed by the Council, shall make an inspection of the premises complained of; and the officer of the Council shall have full power, without any other authority than this By-law, to go upon such premises for the aforesaid purpose.

Various obstructions and annoyances.

31. Every person who in any street or other public place or passage within the said Municipality, to the obstruction, annoyance, or danger of the residents or passengers, shall commit any of the following offences, shall on conviction for any and every such offence forfeit and pay a penalty of not more than two pounds:—

Every person who shall hoist or cause to be hoisted, or lower or cause to be lowered, goods of any description from any opening in any house fronting any street or public place, and close to the footway thereof, without sufficient and proper ropes and tackling.

Every person who shall carry or convey, or cause to be carried or conveyed, in any street or public place, the carcass, or any part of the carcass, of any newly slaughtered animal without a sufficient and proper cloth covering the same for the concealment from public view, or shall hawk or carry about butcher's meat for sale without covering the same as aforesaid.

Every person who shall place any line, cord, or pole across any street, lane, or passage, or hang or place clothes thereon to the danger or annoyance of any person.

Every person who shall place any flower-pot in any upper window near to any street or public place without sufficiently guarding the same from being thrown down.

Every person who shall throw or cast from the roof, or any part of any house or other building, any slate, brick, part of a brick, wood, rubbish, or other material or thing (unless within a hoard or enclosure when any house or building is being erected, pulled down, or repaired).

Every blacksmith, whitesmith, anchorsmith, nail-maker, metal-founder, lime-burner, brickmaker, potter, or other person using a forge, furnace, or kiln, and having a door, window, or aperture fronting or opening into or towards any street, lane, or passage, and not enclosing such door, or not fastening the shutters or other fastenings of such window, and closing such aperture, and placing a screen before the same every evening, within one hour after sunset, so as effectually to prevent the light from showing through the doorway, window, or aperture next or upon such street, lane, or passage.

Every person who shall be the keeper of or have any dog or other animal which shall attack or endanger the life or limb of any person who may have the right-of-way or use of any private yard, alley, street, or any other place within the said Municipality.

*Premises in state to endanger public health.*

Houses to be purified on certificate of two medical practitioners.

32. If upon the certificate of any two duly qualified medical practitioners it appears to the Council that any house or part thereof, or the premises occupied in connection therewith, within the limits of the said Municipality, is in a filthy or unwholesome condition, that the health of any person is or may be liable to be affected or endangered thereby, and that the whitewashing, cleansing, or purifying of any house or part thereof, or the premises occupied in connection therewith, would tend to prevent or check infectious or contagious disease, the said Council shall give notice in writing to the owner or occupier of such house or part thereof, or the premises occupied in connection therewith, to whitewash, cleanse, or purify the same as the case may require; and if the person to whom such notice is so given shall fail to comply therewith within such time as shall be specified in the said notice, he shall be liable to a penalty not exceeding ten shillings for every day during which he continues to make default: Provided that no such penalties shall collectively amount to any greater sum than twenty pounds.

*Offences against public decency.*

Bathing prohibited within certain limits.

33. Any person who shall bathe near or within view of any inhabited house, or of any public wharf, quay, bridge, street, road, or other place of public resort within the limits of the said Municipality, between the hours of seven in the morning and eight in the evening, shall on conviction forfeit and pay a sum not exceeding one pound for every such offence.

Penalty on indecent exposure of person.

34. Any individual who shall offend against decency, by exposure of his or her person in any street or public place within the said Municipality, or in the view thereof, shall on conviction forfeit and pay for every such offence a sum not exceeding ten pounds, nor less than five pounds.

Houses of ill-fame.

35. Upon representation of any respectable ratepayer that any house or premises within the Municipality, and near to the residence of such ratepayer, is of ill-fame, it shall be lawful for the By-law Committee to cause the residents of such house or premises to furnish to the Council a list of names, ages, sexes, and occupations of all the inmates of the said house or premises; and upon non-compliance with such request, or if, upon consideration, the said Committee consider the house to be one of ill-fame, they shall, with the sanction of the Council, declare the same to be a nuisance, and shall cause a notice in writing to be served upon the holder of such house or premises, or any person resident or being therein, to discontinue or abate the said nuisance within forty-eight hours after the receipt of such notice; and if such nuisance be not so abated, the holder of such house or premises, or other person residing or being therein, and acting as such holder, shall be liable to be proceeded against for such nuisance, and shall on conviction thereof forfeit and pay any sum not less than two pounds nor more than twenty pounds; and if such nuisance shall not be abated within forty-eight hours after such conviction, such holder of such house, or such other person residing or being therein as aforesaid, shall forfeit and pay for every such second offence a sum not less than five pounds nor more than fifty pounds; and

if a further period of forty-eight hours shall elapse after such second conviction, without the abatement of such nuisance, such holder of such house, or other person residing or being therein as aforesaid, shall for such third offence forfeit and pay any sum not less than ten pounds nor more than fifty pounds.

#### PART V.

##### *Noisome and offensive trades.*

No noisome or offensive trades to be carried on to the injury of any inhabitant.

1. No person shall carry on any noisome or offensive trade within the said Municipality, so as to injure or be a nuisance as hereinafter stated, to the inhabitants thereof.

Definition of "noisome and offensive trades."

2. Any manufacture, trade, calling, or operation, in the conducting, following, or carrying on of which, or in consequence of, or in connection therewith, or from the premises where the same is conducted, followed or carried on, any gas, vapour, or effluvia, or any large quantities of smoke, shall be evolved or discharged, which gas, vapour, effluvia, or smoke, shall be calculated to injure animal or vegetable life, or in any other way to injure or be a nuisance to the inhabitants of the said Municipality, shall be considered a "noisome and offensive trade" within the meaning of these By-laws.

Complaint—Inquire and report—Order of Council thereon—Notice to discontinue, &c.—Penalty.

3. Upon the complaint in writing of any householder that any noisome or offensive trade is being so followed, conducted, or carried on in the vicinity of his or her residence or property, as to injure his or her health, or the health of any member of his or her family, or to be a nuisance to such householder, and to his or her family, the Inspector of Nuisances, or any other person or persons appointed by the Council, shall make an inspection of the premises where such trade is alleged to be so conducted, followed, or carried on as aforesaid, and of the premises or property of the complainant, and shall inquire into the grounds for such complaint and shall report thereon to the said Council; and if the said Council shall on the consideration of such report, or after any such further inquiry as may be deemed necessary, be of opinion that the said complaint is well founded, and that any manufacture, trade, calling, or operation so complained of, and so being conducted, followed, or carried on as aforesaid is a "noisome or offensive trade," within the meaning of these By-laws, notice shall be given to the person or persons conducting, following, or carrying on such trade, to cease and discontinue the same within such reasonable time, not being less than thirty days nor more than sixty days, as the said Council may direct, or so to conduct, follow, or carry on his, her, or their manufacture, trade, calling or operation, as that within such reasonable time as aforesaid, the same shall wholly and permanently cease to be noisome or offensive within the meaning of these By-laws, either to the said complainant or to any other resident within the said Municipality; and if such trade shall not be discontinued as aforesaid, or shall not be so conducted as that it shall wholly cease to be noisome and offensive as aforesaid, within the time named in such notice as aforesaid, any person conducting, following, or carrying on such trade as aforesaid, shall for the first offence forfeit and pay a sum not less than forty shillings nor more than five pounds; for a second offence, a sum not less than five pounds nor more than twenty-five pounds; and for a third and every subsequent offence, a sum not less than ten pounds nor more than fifty pounds.

Mode of proceeding when "noisome and offensive trade" is about to be commenced—Penalty.

4. The like proceeding shall be taken as aforesaid whenever there shall be a complaint as aforesaid that any manufacture, trade, calling, or operation, is about to be commenced or entered upon which is likely to prove "noisome and offensive" within the meaning of these By-laws, save and except the notice to be given as aforesaid shall be given to the person or persons about to enter upon such manufacture, trade, calling, or operation, and shall require him, her, or them not to commence or enter upon the same, or take such measures as shall effectually prevent the same from becoming "noisome and offensive" within the meaning of these By-laws to any resident within the Municipality. And any person who shall in such case commence, enter upon, or continue, any such manufacture, trade, calling, or operation, so that the same shall in any way be "noisome and offensive" within the meaning of these By-laws, shall for every such offence forfeit and pay a sum not less than pounds nor more than fifty pounds.

Service of notices—Liabilities.

Service of any such notice as aforesaid upon the occupier or owner of any premises or land wherein or whereon any such manufacture, trade, calling, or operation, is being conducted, followed, or carried on, or is about to be commenced or entered upon, or at the last known place of abode of such occupier or owner, or upon any person on the said premises or land, shall be a good and sufficient service of such notice for all

the purposes of these By-laws. And every person who shall be actually engaged in superintending, directing, or managing, or who shall be in any other way actually engaged or employed in any such manufacture, trade, calling, or operation, as aforesaid, shall be liable to be regarded and treated as a person conducting, following, or carrying on such manufacture, trade, calling, or operation, within the meaning and for all the purposes of these By-laws.

#### PART VI.

##### MISCELLANEOUS.

##### *Public Exhibitions, &c.*

Exhibitions, &c., to be licensed.

1. No exhibition other than exhibitions licensed by the Colonial Secretary under the provisions of the Act 14 Victoria, No. 23, or exhibitions of a temporary character specially provided for, shall be held or kept for hire or profit within the said Municipality, nor shall any bowling-alley, skittle-alley, or other place of public amusement other than a place licensed as aforesaid, or a place for temporary amusement, be used as such for hire or profit within the said Municipality, unless and until permission in writing be granted by the Mayor.

No exhibition, &c., on Sundays, &c.

2. No such exhibition or place of public amusement as aforesaid, shall be held, or kept open, or used for the purposes of such public amusements on Sunday, Christmas Day, or Good Friday; and every person offending against this By-law in this behalf shall, on conviction, forfeit and pay a sum not exceeding five pounds nor less than two pounds for every such offence.

Wilful trespass.

3. Every person who shall wilfully let in or knowingly suffer to enter upon the reserves or place of public recreation ground any animals, without due authority, shall be deemed guilty of wilful trespass, and shall be liable for every such offence to a penalty not exceeding twenty pounds nor less than two pounds.

Penalty for destroying boundary marks.

4. Any person pulling down, destroying, defacing, or injuring any marks, or any fence or other erection thereon, without the authority of the Council, shall forfeit and pay any sum not exceeding ten pounds nor less than one pound.

Erection of houses, &c.

5. No person shall be permitted to erect any house, shop, or other building, in any street, lane, or place, in the Municipality, without first serving notice, in writing, on the Mayor or Council Clerk, on any lawful day between the hours of six and eight o'clock p.m., stating such intention, and describing the proposed situation of the building or erection, and without having received an authority from the Mayor or Council Clerk, who will give the required level and alignment, if in a proclaimed street, on a payment of a fee of five shillings. No person shall be at liberty to encroach beyond the building-line in any street or lane, by the erection of houses, verandahs, door-steps, fences, or any other obstruction whatever.

Houses, &c., to be spouted.

6. All proprietors of houses within the Municipality having a frontage to any main thoroughfare, shall be bound to have the same sufficiently spouted with down pipe, to be carried under the surface of the footpath into the gutter, under a penalty of ten shillings on conviction; and if not remedied at the expiration of seven days after such conviction, the offender shall be again liable to a like conviction and penalty also for every succeeding seven days.

Using bark for building in the main thoroughfares.

7. All persons are prohibited from erecting buildings any portion of which shall be constructed of bark, palings, or other dangerously inflammable material; and any person or persons erecting such buildings shall forfeit, on conviction of every such offence, a penalty of not more than twenty pounds.

#### PART VII.

By-laws for the Municipality of Manly, for carrying into effect the provisions of the "Nuisances Prevention Act of 1875."

1. No cesspits, closets, or pit to contain fecal matter, shall be allowed to be made. Every person about to erect an earth-closet shall, before he commence any such work, give to the Council Clerk seven days notice, in writing, of his intention, and of the proposed position of such earth-closet; or in default thereof, or in case of his commencing such work without such notice, he shall be liable to a penalty of not less than one pound nor more than five pounds.

2. No earth-closet shall be erected except in such position as shall be approved by the Inspector of Nuisances or other officer appointed by the Council, or shall be approved by the Council; and any person being guilty of a breach of this By-law shall be liable to a penalty of not less than one pound nor more than five pounds.

3. Every earth-closet shall be built with walls 7 feet high, and shall be not less than 3 feet 6 inches wide and 4 feet 6 inches long, and shall be provided with a door capable of being fastened from the inside, and shall be ventilated; and every person having or building a closet contrary to this By-law shall be liable to a penalty of not less than one pound nor more than five pounds.

4. When two or more closets adjoin each other, there shall be a sufficient dividing-wall, not less than 9 inches in thickness, between every two closets, and such wall shall extend from the bottom of the closet, through the roof of the closet, so as to effect a complete separation; and every person having or building closets adjoining each other contrary to this By-law shall be liable to a penalty of not less than one pound nor more than five pounds.

5. A separate closet shall be provided for every tenement; and a breach of this By-law shall make persons using a joint closet liable to a penalty of not less than one pound nor more than five pounds.

6. Every closet shall be built in such a position that the same may be emptied without the contents being carried through any dwelling-house; and every person having or building a closet contrary to this By-law shall be liable to a penalty of not less than one pound nor more than five pounds.

7. If any alteration shall be requisite, in the opinion of the Inspector of Nuisances, or any officer appointed by the Council in that behalf, for preserving the public health or decency in the case of any existing closet, and the Council shall adjudge such closet to be either injurious to health, or opposed to decency by exposure or otherwise, the same shall be altered by such Inspector of Nuisances, or other officer, and the cost of such alterations shall be paid by the owner or occupier of the premises whereon the same shall be.

8. The place of deposit shall be in such locality as may be from time to time determined upon by the Council.

9. Until otherwise provided by the Council, all night-soil from existing closets shall be removed from cesspits by contract, in water-tight covered vehicles, between the hours of 11 o'clock in the evening and 5 o'clock in the morning; earth-closets may be emptied during the day.

10. Until, and unless otherwise provided by the Council, all night-soil shall be disposed of by burying it in the earth.

11. In case the Council shall sell or give away any night-soil, the same shall be removed in the same manner as above provided; and on being removed from the vehicles in which it is carried, shall be deodorized by chemicals, or in some other manner, or covered with earth, so as to prevent any offensive smell arising therefrom. Any person guilty of a breach of this By-law shall be punishable by a penalty of not less than one pound nor more than twenty pounds.

12. All earth-closets shall be emptied once in seven days or oftener, and the contents buried in the earth; and every person infringing this By-law shall be liable to a penalty of not less than one pound nor more than two pounds.

13. The Inspector of Nuisances, or other officer appointed by the Council, may visit and inspect any premises or do any work authorized by the "Nuisances Prevention Act, 1875" therein, on all days except Sundays and public holidays, between the hours of 10 o'clock in the morning and 4 o'clock in the evening.

14. Every person shall be at liberty to use on his own premises all night-soil collected thereon; but if any nuisance shall arise therefrom, he shall be liable to a penalty of not less than one pound nor more than five pounds.

15. No person shall be at liberty, without the permission of the Council, or the Inspector of Nuisances, or other officer appointed in that behalf, to use on his own premises any night-soil brought from elsewhere; and in the event of his so doing, he shall be liable to a penalty of not less than two pounds nor more than ten pounds.

16. The Council may recover such sums for the emptying of any closet as may be decided upon from time to time by resolution of the Council.

I hereby certify that the foregoing By-laws were adopted by a resolution of the Council, at a meeting thereof duly convened and held on the twelfth day of July, A.D. one thousand eight hundred and seventy-seven.

WILLIAM JOHNSON,  
Council Clerk.

(L.S.)

THOS. ROWE,  
Mayor.

## NEW SOUTH WALES.

## NUISANCES PREVENTION ACT OF 1875.

(BY-LAWS—BOROUGH OF PARRAMATTA.)

Presented to Parliament pursuant to Act 39 Vict. No. 14, sec. 18.

Colonial Secretary's Office,  
Sydney, 5th November, 1877.

## BOROUGH OF PARRAMATTA.

## BY-LAWS.

The following By-laws, made by the Council of the Borough of Parramatta, under the "Nuisances Prevention Act 1875," having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of that Act.

JOHN ROBERTSON.

## BOROUGH OF PARRAMATTA.

## BY-LAWS.

To carry into effect the provisions of the Nuisances Prevention Act, 1875, within the Borough of Parramatta.

Clause No. 1. Every person about to erect a closet or form a cesspit, shall, before he shall commence any such work, give to the Council Clerk seven days notice in writing of his intention, and of the proposed position of such closet or cesspit; and in default thereof, or in case of his commencing such work without such notice, he shall be liable to a penalty not exceeding (£10) ten pounds.

Clause No. 2. No closet shall be erected or cesspit formed except in such position as shall be approved of by the Council, or by the Inspector of Nuisances, or other officer appointed by the Council: Provided that, where practicable, no cesspit shall be formed within (20) twenty feet of any dwelling-house or factory.

Clause No. 3. All closets, where the dwelling-houses consist of more than three rooms, shall be built with cesspit not less than (4) four feet by (3) three feet clear, internal measure, exclusive of the man-hole hereafter mentioned, and not less than (4) four feet or more than (6) feet deep below the ground surface, and the top of every cesspit shall not be less than (6) six inches higher than the highest part of the ground immediately adjoining it: Provided that this By-law does not affect such closets as are provided for under By-law No. 17.

Clause No. 4. Each closet shall have a man-hole of the clear internal dimensions of (2) two feet (3) three inches by (2) two feet outside the walls of the closet and connected with the pit, as shown on the drawing exhibited at the Council Chamber, and constructed of the same material specified for the construction of the soil-pit, and covered closely with strong stone flags, or such other material as the Council may approve of.

Clause 5. The walls of every soil-pit shall be built of brick or stone of a thickness of not less than (9) nine inches, and shall be built in cement and rendered ( $\frac{3}{4}$ ) three-quarters of an inch thick with cement inside, at bottom, and on the walls, in

such a manner as to make it perfectly water-tight, to the satisfaction of the Inspector of Nuisances, or of such other officer as may be appointed by the Council.

Clause 6. Every closet shall be built (7) seven feet high from the floor to the wall-plate of roof, and shall not be less than (3) three feet (6) six inches wide and (4) four feet (6) six inches long, and shall be provided with a door capable of being fastened from the inside, and shall have ventilating holes ( $4\frac{1}{2}$ ) four and a half inches wide, or a window that will open.

Clause 7. When two or more closets adjoin each other there shall be a brick or stone dividing-wall of not less than ( $4\frac{1}{2}$ ) four and a half inches in thickness between every two closets, and each wall shall extend from the bottom of the cess-pit through the roof of the closets, so as to effect a complete separation.

Clause 8. A separate closet shall be provided for every tenement, and a breach of this By-law shall make the owners or occupiers of any premises upon which there shall be a joint closet liable to a penalty not exceeding (£5) five pounds.

Clause 9. The place of deposit for night-soil shall be in such locality as may be from time to time determined upon by the Council, and no night-soil shall be deposited in any other locality within the Borough except as allowed by By-laws 18 and 19.

Clause 10. Until otherwise provided by the Council, all night-soil shall be removed from cesspits by the servants of, or contractors with, the Council, in water-tight covered vehicles, between the hours of 11 o'clock in the evening and 5 o'clock in the morning.

Clause 11. Until and unless otherwise provided by the Council, all night-soil shall be disposed of by burying it in the earth.

Clause 12. In case the Council shall sell or give away any night-soil, the same shall be removed in the same manner as above provided; and on being removed from the vehicle in which it is carried it shall be deodorized by chemicals or in some other manner or covered with earth, so as to prevent any offensive smell arising therefrom.

Clause 13. The Inspector of Nuisances or other officer appointed by the Council may visit and inspect any premises or do any work authorized by the Nuisances Prevention Act,

1875, on all days except Sundays and public holidays, between the hours of ten o'clock in the morning and four o'clock in the evening.

Clause 14. Any person desirous of erecting an earth closet or any other improved plan of closet, shall be at liberty to do so after giving notice of his intention to the Inspector of Nuisances or other officer appointed by the Council, subject to this Council's approval; but all night-soil shall be removed therefrom once in four days and buried in the earth.

Clause 15. Every person shall be at liberty to use on his own premises all night-soil collected thereon, but if any nuisance shall arise therefrom he shall be liable to a penalty not exceeding (£5) five pounds.

Clause 16. No person shall be at liberty without the permission of the Council or of the Inspector of Nuisances or other officer appointed in that behalf, to use on his premises any night-soil brought from elsewhere.

Clause 17. The Council may recover, and the owner or occupier of the premises shall pay, such sums for the emptying of cesspits as may be decided upon from time to time by resolution of the Council.

Clause 18. The owner or occupier of any premises within this Borough or any other person who shall have or erect upon his premises any closet or cesspit otherwise than in accordance with these By-laws or who shall refuse or neglect to comply

with the provisions of any of the preceding By-laws or who shall commit any breach thereof, shall in cases where no special penalty is provided forfeit and pay a penalty not exceeding (£5) five pounds.

Clause 19. All words occurring in these By-laws and which also occur in the Nuisances Prevention Act, 1875, shall have the like meaning assigned to them as are provided in the 4th section of the same Act.

Passed at a meeting of the Borough Council, held on Monday, the 16th day of July, 1877, and amended on the 3rd September, 1877.

(L.S.) CHARLES J. BYRNES,  
Mayor.

SYDNEY WICKHAM, Council Clerk.

The Corporate Seal was attached to these By-laws this 20th day of July, 1877.—S. W.

(L.S.) CHARLES J. BYRNES,  
Mayor.

The Corporate Seal was re-attached to these By-laws this 3rd day of September, 1877.

SYDNEY WICKHAM, Council Clerk.

1877-8.

## NEW SOUTH WALES.

## NUISANCES PREVENTION ACT OF 1875.

(MUNICIPAL DISTRICT OF LEICHHARDT—BY-LAWS.)

Presented to Parliament, pursuant to Act 39 Vic. No. 14, sec. 18.

Colonial Secretary's Office,  
Sydney, 7th January, 1878.

## MUNICIPAL DISTRICT OF LEICHHARDT.

## BY-LAWS.

THE following By-Laws, made by the Council of the Municipal District of Leichhardt, under the provisions of the "Nuisances Prevention Act, 1875," having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of that Act.

MICHAEL FITZPATRICK.

At a meeting of the By-Laws Committee of the Municipal District of Leichhardt, held on the 16th day of November, 1877, the following draft of By-Laws in accordance with the provisions of the "Nuisances Prevention Act of 1875," were approved of:—

1. All closets hereafter to be made shall be constructed as follows:—The cesspit of each shall not be less than four feet in depth, and not less than three feet long by three feet wide, and the top built at least six inches above the surface of the ground, and if from the nature of the ground a greater depth is required such depth and situation of the closet to be determined by the Council or such Officer as they may appoint; every cesspit to be of brick or stone, cemented. And any person refusing or neglecting to comply with this By-Law shall be liable to a penalty not exceeding ten pounds nor less than one pound.

2. A separate closet shall be provided for every tenement, and in dwellings where the ordinary number of inmates exceeds twelve, the capacity of the cesspit shall be increased by four cubic feet for every person beyond such number or a separate closet provided for every twelve persons; in schools or factories where a number of persons exceeding twelve shall reside or be employed, one closet shall be provided for every thirty persons, with a cesspit of a capacity of eighty cubic feet, and separate closets shall be provided for each sex; closets to have walls not less than seven feet high to wall-plate, and not less than three feet six inches wide and four feet six inches long, and be provided with a door to fasten on the inside; where two or more closets adjoin each other there shall be a dividing wall between each, nine inches thick from the bottom of cesspit to the roof so as to effect a complete separation; and any person offending against the provisions of this By-law shall incur a penalty not exceeding ten pounds nor less than two pounds.

3. If in the opinion of the Inspector of Nuisances any alteration is required in existing cesspits or closets, he shall report the same to the Council, who shall determine what alteration is necessary for the preservation of health or decency, and such alteration shall forthwith be made by the owner of the premises on notice received, under a penalty for every week's neglect or delay in effecting such alteration not exceeding five pounds nor less than two pounds.

4. The Council shall from time to time, with the approval of the Governor, appoint a place for the deposit of night-soil.

5. The night-soil shall be removed by contract or otherwise in properly constructed water-tight carts between such hours as the Council may determine; and the contractor or persons so employed will be held responsible for the careful conveyance of the night-soil to the appointed dépôt, and shall dispose of the same by burying in the earth a sufficient distance, and covering with earth so as to prevent any nuisance arising therefrom, under a penalty for neglect not exceeding twenty pounds nor less than five pounds.

6. If the night-soil or any portion thereof shall be sold or given away by the Council, the person removing the same shall do so only at such times and in such manner as the Council may direct, and shall dispose of the same so as not to cause a public nuisance; and the person purchasing or obtaining it shall be held responsible for the same under a penalty not exceeding ten pounds nor less than two pounds.

7. The Inspector of Nuisances shall have power to visit and inspect all premises on any lawful day between the hours of 10 a.m. and 6 p.m.; and any person refusing admittance or obstructing or hindering the officer in the discharge of his duty, shall incur a penalty not exceeding five pounds nor less than one pound.

8. The Council shall from time to time fix the charges to be made for emptying and removing night-soil from closets, which shall be emptied as often as may be necessary in the opinion of the Council.

9. No person shall be permitted to connect any closet with any drain, watercourse, or sewer, without the sanction of the Council; and persons so offending shall be liable to a penalty not exceeding twenty pounds nor less than five pounds.

10. Any persons requiring their cesspits emptied shall send written notice to the Council or the Inspector of Nuisances; and persons emptying, or causing to be emptied, any closet without the sanction of the Council, shall be liable to a penalty not exceeding ten pounds nor less than one pound.

11. Any persons wishing to use earth closets in place of cesspits must give notice of such intention, and make provision for the emptying the same to the satisfaction of the Inspector of Nuisances; and any person causing a nuisance from the careless use of such closet shall be liable to a penalty not exceeding five pounds nor less than one pound.

12. Written notice must be given to the Council or the Inspector of Nuisances by all persons about to construct new or alter existing closets, so as to enable the Inspector to visit and report on the same, under a penalty for neglect not exceeding five pounds nor less than one pound; and closets constructed without such notice being given must be removed or altered if judged necessary by the Council, under a further penalty not exceeding two pounds nor less than five shillings for each and every day they may remain unremoved or unaltered after due notice to that effect.

Made and passed by the Municipal Council of Leichhardt,  
assembled this 26th day of November, A.D. 1877, and  
the Corporate Seal affixed by order of the said Council.

(L.S.) FRED. PARSONS,  
Mayor.  
WALTER BEAMES,  
Council Clerk.

1877-8.

## NEW SOUTH WALES.

## PUBLIC VEHICLES REGULATION ACT OF 1873.

(BY-LAWS UNDER.)

Presented to Parliament, pursuant to Act 36 Vic. No. 14, sec. 15.

Colonial Secretary's Office,  
Sydney, 4th December, 1877.

THE following By-laws, made by the Metropolitan Transit Commissioners, amending the Time-tables, Line of Road, and Stands for waggonettes plying to and from George-street, Redfern, and Wynyard-square, Sydney, and appointing Stands for cabs in Yurong, Crown, and Park Streets and Cowper Wharf, and establishing the Time-table, Line of Road, and Stands for waggonettes plying to and from Elizabeth-street, Paddington, and Macquarie-place, Sydney, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the provisions of the "Public Vehicles Regulation Act of 1873."

JOHN ROBERTSON.

THE Board of Metropolitan Transit Commissioners, constituted and empowered by the Public Vehicles Regulation Act of 1873, do, by virtue of the power and authority in them vested by the said Act, declare that the following Omnibus Time-table of Schedule J, under the By-laws now in force for regulating Licensed Vehicles, shall be and the same is hereby repealed, viz. :—

From and to Buckland-street, Redfern, and Wynyard-square.

And that the following Time-table shall be adopted in lieu thereof :—

TIME-TABLE for Omnibuses plying to and from Buckland-street, Redfern, and Wynyard-square.

Omnibuses shall start from Buckland-street, at George-street, Redfern, for Wynyard-square, at 8 a.m., and every 7 minutes till 9:39 p.m.; and shall start from Wynyard-square for Buckland-street, Redfern, at 8:20 a.m. and every 7 minutes till 9:59 p.m. And each omnibus shall perform the journey to and from Buckland-street and Wynyard-square in 20 minutes, and the parts of the journey as follows :—

From Buckland-street to Regent-street, at Cleveland-street, in 6 minutes.  
 „ Cleveland-street to Railway Bridge, George-street, in 3 minutes.  
 „ Railway Bridge to Liverpool-street in 4 minutes.  
 „ Liverpool-street to "Royal Hotel" in 4 minutes.  
 „ "Royal Hotel" to Wynyard-square in 3 minutes.  
 „ Wynyard-square to "Royal Hotel" in 3 minutes.  
 „ "Royal Hotel" to Liverpool-street in 4 minutes.  
 „ Liverpool-street to Railway Bridge in 4 minutes.  
 „ Railway Bridge, George-street, to Cleveland-street, in 3 minutes.  
 Cleveland-street, at Regent-street, to Buckland-street, in 6 minutes.

The Board of Metropolitan Transit Commissioners as aforesaid do declare that the following Public Stand, as shown in Schedule H, under the By-laws now in force for regulating Licensed Vehicles, shall be and the same is hereby repealed, viz. :—

Elizabeth-street, east side, at Market-street, to rank south, first cab to stand on the south side of Market-street, at east side of Pitt-street, for 20.

And that the following Public Stands shall be made and established in lieu thereof :—

## SCHEDULE H—continued.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

ANDERSON'S ARTIZANS COLLEGE AND HOME FOR  
FATHERLESS BOYS.  
(CORRESPONDENCE.)

*Ordered by the Legislative Assembly to be printed, 1 May, 1878.*

## SCHEDULE.

NO.		PAGE.
1.	The Under Secretary, Colonial Secretary's Office, to the Inspector of Public Charities. 21 March, 1878 .....	1
2.	The Inspector of Public Charities to the Principal Under Secretary. 26 March, 1878 .....	1
3.	The Under Secretary, Colonial Secretary's Office, to the Inspector of Public Charities. 16 April, 1878 .....	2
4.	The Inspector of Public Charities to the Principal Under Secretary. 26 April, 1878 .....	2

## No. 1.

The Under Secretary, Colonial Secretary's Office, to The Inspector of Public Charities.

Sir,

Colonial Secretary's Office, Sydney, 21 March, 1878.

Mr. Anderson, the founder of a species of Orphanage at Balmain, called the "Artizans' College," having requested that you should visit the Institution and report upon it, I am directed to inform you, that the Colonial Secretary will be glad if you will take an opportunity of doing so.

I have, &amp;c.,

M. R. ALLAN.

## No. 2.

The Inspector of Public Charities to The Under Secretary, Colonial Secretary's Office.

Sir,

Office of Inspector of Public Charities, 26 March, 1878.

I have the honor to state, for the information of the Colonial Secretary, that, in accordance with his instructions, I have visited the "Artizans' College, and Home for Fatherless Boys," recently started by Mr. Anderson. The scheme was described to me by its originator, as combining the elements of philanthropy with those of ordinary business gains. His intentions are to provide a good home to boys who are otherwise friendless, to raise them in the social scale, and provide them with a certain means of self support, while, at the same time, he wishes to demonstrate that the above is practicable without interfering with his ordinary business avocations.

The workshop is situated at Balmain, and the Home at Hunter's Hill, Lane Cove.

At the former I found ten boys at work under the direction of four tradesmen, engaged in the rudimentary parts of furniture making, upholstering, &c. The premises are good and clean, and the boys looked clean and healthy.

The Institution was opened in August; the first boy entered six months ago,—others are only recent arrivals. All answered my questions readily, and expressed themselves as happy, and contented with their prospects.

I then accompanied Mr. Anderson to the Home, Hunter's Hill. Here I found the dormitories very clean, and the bedding good. Mrs. Anderson and a servant do the house-work, but the boys assist in the smaller duties; they call Mrs. Anderson mother, and from various details I gathered that a family feeling and *esprit de corps* is springing up. The boys, accompanied by Mr. Anderson, row in their boat between the Home and workshop daily; on Sundays they attend Church and Sunday-school, and on week-day evenings read in classes, &c.

Altogether I was much pleased with what I saw.

Mr.

Mr. Anderson wishes the Institution placed under the Industrial Schools Act, and to receive Government countenance and aid. He stated that he had received upwards of a hundred applications from persons desirous of placing youths in his charge, but had not means to embark in so large a scheme.

While acknowledging the good work he proposed doing I endeavoured to show him that the age at which he received his apprentices was beyond that at which under ordinary circumstances Government had to provide for children, and that therefore he was not in fact relieving Government of their maintenance. I believe, however, Mr. Anderson is worthy of assistance, and suggest two ways in which it might be given:—

1. Let him be placed on a somewhat favoured footing in supplying such articles of furniture as he is able to make, so long as in quality and price he can compete in the open market.
2. Let a sum of £100 be paid him, to go as rent for three years, or during such time as his scheme is struggling into maturity.

In event of the Government deciding on doing away with the Nautical School Ship "Vernon," and adopting my suggestions, I believe Mr. Anderson's Institution could be made to render valuable aid to the Government in the disposal of certain of the senior boys, who, after satisfactorily serving a probationary term on the Government Pilot Vessels, declined to serve on the Men-of-War.

I have, &c.,

HUGH ROBISON,  
Inspector of Public Charities.

### No. 3.

The Under Secretary, Colonial Secretary's Office, to The Inspector of Public Charities.

Sir,

Colonial Secretary's Office, Sydney, 16 April, 1878.

In acknowledging the receipt of your letter of the 26th of last month, respecting the result of your inspection of the "Artizans' College and Home for Fatherless Boys," recently established by Mr. Anderson, I am directed by the Colonial Secretary to inform you that, while it affords him great satisfaction to read of the success attending Mr. Anderson's unaided effort, he regrets that he cannot accede to either of your suggestions as to special privilege in the purchase of furniture manufactured by Mr. Anderson, and as to the payment of rent.

2. I am to request, however, that you will ascertain and state the number of boys that Mr. Anderson could properly accommodate if the Government should see fit to bring his establishment under the Industrial Schools Act.

I have, &c.,

M. R. ALLAN.

### No. 4.

The Inspector of Public Charities to The Under Secretary, Colonial Secretary's Office.

Sir,

Office of Inspector of Public Charities, Hyde Park, Sydney, 26 April, 1878.

In reply to letter of 16th April, requesting me to ascertain the number of boys Mr. Anderson is prepared to accommodate in his "Artizans' College and Home, &c.," I have the honor to state I have had further conversation with Mr. Anderson, who tells me he can receive a total number of twenty-five apprentices, that is fifteen beyond his present number.

He further expressed a fear lest bringing his Institution within the Industrial Schools Act might disturb the purely voluntary character of the contract between his apprentices and himself, or compel him to introduce a coercive element into his relations with his boys.

He also dwelt at much length on the great advantage it would be to him could he obtain small Government contracts or work at rates not exceeding current prices.

In arriving at his decision on this matter I would, with highest respect, solicit the Colonial Secretary to keep in view:—

- 1st. That the chief value of Mr. Anderson's scheme lies in his statement that it is self-supporting.
- 2nd. That there exists throughout the Colony a demand beyond the supply for the labour of youths of the apprenticing ages, say 13 to 16 years, and over, and that therefore no actual pecuniary relief is given by Mr. Anderson's Establishment to the Government.

These considerations caused me to suggest the temporary aid contained in my former letter as a sufficient recognition of Mr. Anderson's philanthropic intentions, and in fact assisting him in the direction he himself pointed out.

I have, &c.,

HUGH ROBISON,  
Inspector of Public Charities.

1877-8.

## NEW SOUTH WALES.

## APPREHENSION OF DESERTERS FROM MERCHANT SHIPS.

(DESPATCH RESPECTING, BELONGING TO KINGDOM OF MADAGASCAR.)

Presented to Parliament by Command.

The Treasury, New South Wales,  
8th May, 1878.

His Excellency the Governor directs the publication, for general information, of the following Circular Despatch from the Principal Secretary of State for the Colonies, transmitting Order of Her Majesty in Council, providing for the apprehension of Deserters from Merchant Ships belonging to the Kingdom of Madagascar, under the "Foreign Deserters Act, 1852."

H. E. COHEN.

Circular.)

Downing-street,  
7th December, 1877.

Sir,

I have the honor to transmit to you a copy of an Order of the Queen in Council, dated the 28th December, 1866, applying the "Foreign Deserters Act, 1852," to the Kingdom of Madagascar.

This Order appears to have been sent out in original to the Governor of Mauritius without any steps having been taken at the time to communicate it to the rest of the Colonies. It is therefore now forwarded for your information and for publication in the Colony under your Government.

I have, &c.,  
CARNARVON.The Officer Administering  
the Government of New South Wales.At the Court at Osborne House, Isle of Wight,  
the 28th day of December, 1866.*Present:*

The Queen's Most Excellent Majesty in Council.

WHEREAS by the "Foreign Deserters Act, 1852," it is provided that whenever it is made to appear to Her Majesty that due facilities are or will be given for recovering or apprehending seamen who desert from British merchant ships in the territories of any foreign power, Her Majesty may, by Order in Council stating that such facilities are or will be given,

declare that seamen, not being slaves, who desert from merchant ships belonging to such power when within Her Majesty's dominions, shall be liable to be apprehended and carried on board their respective ships, and may limit the operation of such Order, and may render the operation thereof subject to such conditions and qualifications, if any, as may be deemed expedient; and whereas it has been made to appear to Her Majesty that due facilities are given for recovering and apprehending seamen who desert from British merchant ships in the territories of Her Majesty the Queen of Madagascar.

Now, therefore, Her Majesty, by virtue of the powers vested in Her by the said "Foreign Deserters Act, 1852," and by and with the advice of Her Privy Council, is pleased to order and declare, and it is hereby ordered and declared that from and after the publication hereof in the London Gazette, seamen, not being slaves, and not being British subjects, who, within Her Majesty's dominions, desert from merchant ships belonging to the Kingdom of Madagascar, shall be liable to be apprehended and carried on board their respective ships.

Provided always, that if any such deserter has committed any crime in Her Majesty's dominions, he may be detained until he has been tried by a competent Court, and until his sentence (if any) has been fully carried into effect.

And the Right Honorable the Earl of Carnarvon, the Right Honorable Viscount Cranborne, and the Right Honorable Spencer Horatio Walpole, three of Her Majesty's Principal Secretaries of State, are to give the necessary directions accordingly.

EDMUND HARRISON.

1877-8.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

---

**AUCTIONEERS' LICENSING ACT.**

(PETITION FROM ALFRED NEWMAN.)

---

*Ordered by the Legislative Assembly to be printed, 12 March, 1878.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of Alfred Newman, Auctioneer, of Hill End,—

HUMBLY SHOWETH:—

1. That your Petitioner is a licensed auctioneer.
2. That in the present Auctioneers' Act there is no clause that enables him to sell the stock-in-trade of a licensed victualler.
3. That a licensed victualler cannot hold an auctioneer's license, and is thus precluded from selling his stock by public auction.
4. That Clerks of Petty Sessions, Curators of Intestate Estates, Poundkeepers, Bailiffs, and others, can sell without holding a license.
5. That persons styling themselves "Cheap Jacks" evade the law by selling downwards, though in point of fact they sell to the highest bidder, and that at all hours of the night.
6. That an auctioneer cannot sell after sunset or before sunrise.
7. That the fee for a district license is too small.

Your Petitioner therefore humbly prays that measures may be taken to amend the present Auctioneers' Act, more particularly in reference to clauses 2, 4, 5, and 7, as set forth in this Petition.

And your Petitioner, as in duty bound, will ever pray, &c., &c.

Hillend, January 29, 1878.

ALFRED NEWMAN.

1877-8.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

---

**BEER'S DISABILITIES BILL.**

(PETITION OF FREDERICK BEER, M.D.)

---

*Ordered by the Legislative Assembly to be printed, 13 February, 1878.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of Frederick Beer, M.D., of Sydney, in the said Colony,—

RESPECTFULLY SHOWETH:—

That a Bill, which has been read a first time, is now before your Honorable House to relieve your Petitioner from all disabilities arising from his having been illegally and erroneously convicted of felony in the year one thousand eight hundred and fifty-six.

And whereas before the said Bill comes on for its second reading your Petitioner earnestly desires to be heard by Counsel, learned in the law, at the Bar of your Honorable House.

Your Petitioner therefore humbly prays that he may be heard by Counsel as aforesaid.

And your Petitioner, as in duty bound, will ever pray, &c., &c.

FREDERICK BEER, M.D.

Dated at Sydney, this eleventh day of February, A.D. 1878.

## BRITISH DUTIES ON AUSTRALIAN WINES.

## No. 1.

The Agent General for New South Wales to The Colonial Secretary.

Sir,

London, 21 December, 1876.

I have the honor to enclose herewith copy of a letter from the Colonial Office, dated 22nd ultimo, relating to the duty on Australian wines, and covering report by the Board of Customs, dated 13th ultimo, in reply to my letter to the Colonial Office dated 11th October last, a copy of which was transmitted to you under cover of my letter, No. 172, of the 19th October last.

I have, &amp;c.,

WILLIAM FORSTER.

Submitted.—5/2/77. The Treasurer.—JOHN R., 9/2/77. The Under Secretary for Finance and Trade, B.C., 9/2/77.—H.H.

I would suggest that my hon. colleague should urge again that a reconsideration be made of the regulation, so that without denying the general proposition laid down by the Commissioners, the door may be opened for admission into England of Colonial wines.—A.S., 10/2/77.

The Under Secretary, Colonial Secretary's Department, B.C. 14/2/77. G.E.

To be carried out.—21/3/77, JOHN R.

Mr. Malcolm to Mr. Forster.

Sir,

Downing-street, 22 November, 1876.

With reference to your letter of the 11th October, relating to duty charged on Australian wines in this country, I am directed by the Earl of Carnarvon to transmit to you a copy of a report by the Board of Customs on the subject, which he has received from the Lords Commissioners of the Treasury.

I am, &amp;c.,

W. R. MALCOLM.

(No. 367.) The Commissioners of Customs to The Treasury.

YOUR Lordships having referred to us the annexed letter from the Colonial Office, with copy of a letter therein referred to from the Agent General of New South Wales, enclosing copy of a report of Mr. Lumsdaine, Chief Inspector of Distilleries at Sydney, on the subject of the alcoholic strength of Australian wines, and requesting that the expediency of revising the Customs Tariff may be again considered, on the ground that natural wines from the Australian Colonies contain more than 26 degrees of proof spirit, the limit of strength under which they can be imported into this country at the duty of 1s. per gallon,—

We report—

That in our report to your Lordships, dated the 11th August last, No. 285, on a previous letter from the Colonial Office enclosing a report from Mr. Leslie Moody, Chief Inspector of Distilleries in Victoria, suggesting that the existing Customs Tariff on Wine should be replaced by a sliding scale of duties, with the view to the admission of natural wine from Australia on more advantageous terms, we stated that the points raised by Mr. Moody had been fully discussed in our report to your Lordships, dated 6th January, 1875, No. 4, in which we pointed out that it had never been maintained that natural wine could not be produced under exceptional circumstances of climate, soil, or mode of manufacture, containing more than 26 degrees per cent. of proof spirit, but our contention had been that the great bulk of all the natural wines of the world would not yield, by simple fermentation, that amount of spirit, and we submitted that Mr. Moody's suggestion should not be adopted.

In the present application the Agent General of New South Wales would appear to attach much importance to the report of Mr. Lumsdaine, and he states that he is disposed to think that if we had been acquainted with that report we might possibly have arrived at a different conclusion, or at any rate have considerably modified the conclusion at which we did arrive.

We have examined the report of Mr. Lumsdaine, and we gather therefrom that he procured from several vineyards samples of grape must, which were fermented and tested by Mr. Moody, and subsequently sent to Mr. Lumsdaine for analysis, who found that the strength varied from 28° to 32° 4', and he alleges that a determination of a higher percentage than 26° and 28° of proof spirit in Australian wines has been conclusively established.

Upon which we have to observe that, taking into consideration the care which appears to have been bestowed in selecting the samples of must, and the scientific manner in which they have been fermented and tested by Mr. Moody, and subsequently analysed by Mr. Lumsdaine, the results obtained are not only possible but such as might have been expected; and they only prove what we have always admitted, viz., that natural wine may, under exceptional circumstances, contain more than 26° of proof spirit; but they do not in any way disprove the allegation that the great bulk of all the natural wines of the world will not yield by simple fermentation that amount of spirit; and we are of opinion that no new facts have been adduced of sufficient weight to call for a reconsideration of the principle upon which the wine duties are levied in this country.

F. GOULBURN.

GRENVILLE L. BERKELEY.

Custom House, 13 November, 1876.

## No. 2.

The Under Secretary, Colonial Secretary's Department, to The Under Secretary for Finance and Trade.

Sir,

Colonial Secretary's Office, Sydney, 4 April, 1877.

With reference to your communication of the 14th of February last, returning with a minute of the late Colonial Treasurer's the Agent General's letter and its inclosures concerning the English duty on Australian wines, I am directed by the Colonial Secretary to state that Mr. Forster has now been instructed

instructed to endeavour to obtain from the Imperial Government a reconsideration of the regulation affecting such wines, so that without any denying of the general proposition laid down by the Commissioners of Customs in their report of the 13th of November last, the door may be opened for the admission of Colonial wines into England.

I have, &c.,  
HENRY HALLORAN.

Seen.—W.R.P., 10/4/77.

No. 3.

The Agent General to The Colonial Secretary.

London, 3, Westminster Chambers, Victoria-street, S.W.,  
23 August, 1877.

Sir,

With reference to your despatch, No. 77-1,173 of the 3rd April, 1877, on the subject of the duty on Australian wines, I have now the honor to enclose a copy of a letter dated 7th instant, which I addressed, in compliance with the request contained in your above quoted despatch to the Under Secretary of State for the Colonies, with a view to obtain from the Imperial Government a reconsideration of the regulation affecting such wine, and of the reply dated 17th instant.

I have, &c.,  
WILLIAM FORSTER.

The Colonial Treasurer.—JOHN R., 12/10/77.

The Under Secretary for Finance and Trade.—B.C., 12/10/77, H.H.

To be laid on the Table of the House.—W.A.L., 7/12/77.

The Agent General to The Under Secretary of State for the Colonies.

3, Westminster Chambers, Victoria-street, S.W.,  
7 August, 1877.

My Lord,

Having forwarded to my Government a copy of recent correspondence with the Colonial Office on the subject of the duty on Australian wines, I have in reply received from the Chief Secretary a despatch, dated Sydney, 3rd April, 1877, a copy of which I have the honor to submit for your Lordship's consideration—in which I am instructed to endeavour to obtain from the Imperial Government a reconsideration of the regulation affecting such wines.

I was in hopes that my Government would have seen fit to make a special remonstrance to the Imperial Government with reference to these duties, whether or not in co-operation with the Government of Victoria. I regret exceedingly that the responsibility has been thrown upon me of re-submitting the question to the Imperial Government, simply because I feel that I have nothing to add to what has been already said and done in a former correspondence between this Office and the Colonial Office.

I trust that Her Majesty's Ministers will have perceived that the arguments adduced by Her Majesty's Commissioners of Customs, and apparently relied upon by Her Majesty's Ministers in the course they took of declining to accede to the wishes of the two Colonies chiefly concerned for a reduction of the duties to such an extent, or in such a form as might admit Colonial wines upon equal or nearly terms as Continental into the United Kingdom, have been sufficiently controverted by the representations made, and facts adduced by official investigations made under the authority of the two Governments of New South Wales and Victoria, which seem conclusively to prove that the scientific data upon which Her Majesty's Commissioners of Customs based their conclusions were insufficient, inasmuch as it now appears certain from the official investigations alluded to that a large quantity of perfectly pure wines, which have not been fortified by the addition of artificial or extraneous alcohol, but which are unfortunately above the standard of wines entitled to admission under the shilling duty, have been manufactured, and are constantly being manufactured, in New South Wales and Victoria, and that this species of manufacture tends to be largely increased in proportion to the obviously increasing public demand for these wines.

I submit that, as a question of morality and social improvement, it is the duty of every Government, and I cannot doubt that it is the desire of Her Majesty's Ministers to afford all possible facilities and encouragement for the general use of these wines, or wines of such character, in substitution for the consumption of alcohol and alcoholic beverages properly so called. I submit further that such a reduction of the duties as will admit Australian to the benefits of the present Imperial tariff is clearly most consistent with the understood objects of that tariff, namely, to encourage the consumption of a certain class of wines, and in some measure to extend approximately the doctrines of free trade; and that with regard to this latter object, New South Wales, from her well known recognition of free trade principles, has a peculiar claim upon the consideration of the Imperial Government.

I trust therefore that the desire of the Government of New South Wales that the question should be further considered by Her Majesty's Ministers will not only induce such reconsideration, but that the trifling advantage asked for of a slight alteration of the standard of strength for wines subject to the lowest duty may be ultimately conceded.

I have, &c.,  
WILLIAM FORSTER.

Mr. J. Bramston to The Agent General.

Sir,

Downing-street, 17 August, 1877.

I am directed by the Earl of Carnarvon to acknowledge the receipt of your letter of the 7th instant, enclosing copy of a communication from the Chief Secretary of the Government of New South Wales, urging a reconsideration of the regulation affecting the importation of Australian wines into this country.

Lord

Lord Carnarvon has forwarded a copy of your letter and enclosure to the Lords Commissioners of the Treasury, for their consideration, and the question will no doubt receive further consideration, though at present Lord Carnarvon believes that the Board of Treasury and the Customs authorities do not see their way to the concession desired in favour of Australian wines.

I am, &c.

JOHN BRAMSTON.

No. 4.

The Agent General to The Colonial Secretary.

Sir, London, 3, Westminster Chambers, Victoria-street, S.W., 18 October, 1877.

In continuation of my despatch, No. 295-77, of the 23rd August last, relative to the duty on Australian wines, I have the honor to enclose herewith a copy of a further letter, dated 20th ult., which I have addressed to the Secretary of State for the Colonies, and of His Lordship's reply, dated 4th inst., on this subject. A recent parliamentary paper, entitled a "Translation of the New Spanish Tariff, dated July 17, 1877, with an Explanatory Report by Sir J. Walsham, Bart., Her Majesty's Chargé d'Affaires at Madrid," a copy of which I enclose, led me again to address the Secretary of State, as the paper appeared to me to afford some arguments in our favour. And as the matter had recently been discussed in the *Times* (see the enclosed leading article from the *Times* of 30th August last), I also wrote to the Editor of that paper, and I enclose copy of my letter, taken from the *Times* of the 11th instant.

I have, &c.,

WILLIAM FORSTER.

Submitted.—6/12/77. The Treasury.—JOHN R., 7/12/77. The Under Secretary for Finance and Trade, B.C., 7/12/77.—H.H. To be returned.

The Agent General to The Secretary of State for the Colonies.

My Lord, 3, Westminster Chambers, Victoria-street, S.W., 20 September, 1877.

Since my receipt of Mr. Bramston's letter of the 17th ultimo, in reply to mine of the 7th ultimo, with reference to the question of a proposed alteration of the Imperial Tariff, with a view to facilitate the introduction of pure Australian wines of such alcoholic strength as to subject them to a duty of not more than one shilling, a parliamentary paper has been published purporting to be a "Translation of the New Spanish Tariff, with an Explanatory Report by Sir J. Walsham, Bart., Her Majesty's Chargé d'Affaires at Madrid," from which it appears that a very important difference of opinion upon a question of fact has arisen between the Spanish Government and Her Majesty's representative. The translation shows, page 6, that Great Britain is not included among those nations "which concede to the products of Spain, by reason of treaty stipulations, the Customs duties established for the most favoured nation." And Sir John Walsham says, in his report, page 29, "As regards Great Britain, it is contended that differential duties are imposed on Spanish wines, and that consequently British commerce cannot expect to receive better treatment in Spain." Sir John Walsham proceeds to deny the contention, and asserts that "Spanish produce and manufacture enjoy under the Customs tariff of the United Kingdom the same treatment as the produce and manufacture of all other Countries." No doubt Sir John Walsham is literally correct in his statement. But it cannot be supposed that the Spanish Government would make an exactly contrary statement without some reasonable or at least colourable grounds. And the difference upon the question of fact may perhaps be accounted for by the difference in character between French and Spanish wines, the alcoholic strength of the former being in general so low as to admit the greater number of them under the shilling duty, while of the latter the alcoholic strength is such that although they may be equally pure wines as those of France, they are virtually excluded from the British market by being subject on a higher duty.

The publication of this paper, and the circumstances to which it refers, appear to me to constitute a favourable occasion for again calling your Lordship's attention to the subject, and for requesting your Lordship to take such steps as may be necessary to move Her Majesty's Commissioners of Customs to reconsider their former decision in the matter under whatever fresh light may be thrown upon it in connection with the effect of the Imperial Tariff upon the importation of Spanish wines. I would respectfully submit that, whatever grounds of complaint or dissatisfaction with the operation of the tariff in this respect the Spanish Government may have, still stronger grounds of complaint and dissatisfaction exist in the case of the Australian Colonies, considered as British dependencies and component parts of the Empire, and that the fidelity of New South Wales to the principles of free trade entitles her to still more favourable consideration. I submit further, that the attitude assumed by the Spanish Government in this matter furnishes additional evidence of the insufficiency of the reasons, from a general point of view, upon which the concession prayed for by the Australian Colonies is understood to have been declined by the Imperial Government.

I would further respectfully express a hope that if the Imperial Government should not be able to see their way to a general reduction of the duty on wine, or to such an increase of the standard of alcoholic strength as may admit a larger number of wines of the class now virtually excluded, some compromise in the shape of a sliding scale might be adopted which would admit some of the wines last referred to at an intermediate rate.

I have, &c.,

WILLIAM FORSTER.

Mr. W. R. Malcolm to The Agent General.

Sir, Downing-street, 4 October, 1877.

I am directed by the Earl of Carnarvon to acknowledge the receipt of your letter of the 20th of September in reference to the effect of the wine duties now levied in this Country upon the importation of wine grown in the Australian Colonies and in Spain, and I am to inform you that a copy of it has been transmitted to the Lords Commissioners of the Treasury for their consideration.

I am, &c.,

W. R. MALCOLM.

(The

(The Times, Thursday, August 30, 1877.)

A PARLIAMENTARY paper just issued contains the text of the new Spanish Tariff and an explanatory letter from Sir John Walsham, our *Chargé d'Affaires* at Madrid. When we say it is an unsatisfactory story, we do not mean that our representative in Spain has failed to do his duty, but that the light he throws upon the motives of the Spanish Ministry makes us fear there may be some prolonged difficulty in obtaining a repeal of the differential duties to which our manufactures are exposed. We are not indeed, the only sufferers. France and the United States are in the same position as ourselves; and it would seem that the Government of France has already had a proof of the temper which prevails at Madrid. It is reported that the French Government requested the Spanish Government to suspend the application of the differential scale of duties to French commodities until an agreement had been made for a new Treaty of Commerce, and that the request has been met with a distinct refusal. The Government of Spain has backed up this refusal with a counter demand that Spain shall have the treatment accorded by France to the "most favoured nation." We do not know in what particular this treatment is at this moment withheld by France. As for ourselves we make no discrimination among the countries with which we deal. We have the same scale of duties, whatever the country of origin of the commodities imported into the United Kingdom. We might, therefore, claim at once that, as we give Spain the treatment of the "most favoured nation," we ought to receive, and, according to Spanish professions, we are entitled to receive, the treatment of the "most favoured nation." But the Spanish Government has a reply, which it holds to be conclusive. It admits that we put no special import duties on Spanish commodities, but it says that the higher duty we levy on wines of greater alcoholic strength does, in fact, operate as a special tax on Spanish wines, and that while the staple export of the Peninsula is thus placed at a disadvantage, their country is practically denied the treatment of the "most favoured nation." The argument thus stated is very fallacious, but the chance of speedily dislodging it from the minds of Spaniards does not appear to be promising.

The history of the new Spanish Tariff is exceedingly simple. Previous to it the import duties on commodities brought into Spain were regulated by the Tariff of 1869. The principle of this Tariff was to levy certain *ad valorem* duties on special conventional values. Prices, however, change, and in the last seven or eight years they have greatly changed in Spain, and when the Minister of Finance brought in his Budget this year he proposed to revise these duties. There was no intention to effect any radical alterations in the duties levied, but to substitute specific duties consequent on a new valuation of prices for the *ad valorem* duties formerly levied. The Minister, Señor Barzanallana, however, suggested that the opportunity might be taken, first, to impose special surcharges on the produce of countries that in any way specially compete with the produce and commerce of Spain, and, secondly, to withhold from nations not conceding to Spain "most favoured nation" treatment the benefit of any incidental reductions which might follow upon the revaluation of prices and substitution of specific for *ad valorem* duties. It appears that on the 11th of July the Cortes approved the propositions of the Finance Minister, and we ought to have been then warned that alterations of the Tariff prejudicial to our interests might be expected. Nothing, however, has been done in the way of imposing surcharges on the commodities of nations supposed to do special harm to Spanish commerce. It is under the second part of the Finance Minister's proposals that we suffer. The revaluations have been made, and a list of specific duties published; but where these duties are lower than those which have been levied under the Tariff of 1869, we are left, with France and the United States, under the operation of the pre-existing and higher duties. The complaint against the United States is probably the same as against ourselves—that they levy duties on wines varying according to their alcoholic strength, so that sherries are, as a rule, subjected to higher duties than clarets. The same thing is, of course, true of ports; but the Spaniards appear to regard Portugal as an *annexe* of Spain. We are so indifferent to the nationality of wines that we tax the produce of our own Colonies at the same rate as the produce of foreigners, and where, as in the case of the wines of the Cape Colony, they come within the operation of the test of greater alcoholic strength, the higher duty of 2s. 6d. per gallon is levied upon them, with the effect, as the Cape colonists aver, of extinguishing entirely what was a flourishing and increasing trade. Have the Spaniards any ground of complaint in our method of levying duties on wines, and, if so, can we remove it? As we have said, and it cannot too often be repeated, we never ask where the grapes were grown or the wine made. Our Tariff exactly fulfils the conditions Señor Barzanallana himself laid down. We have no convention with Spain promising to put Spanish commerce on the "most favoured nation" footing; but, to use his words, we have, "without conventions, applied our Customs system to the commerce of Spain in exactly the same way, and on precisely the same conditions, as we apply it to the commerce of other countries, no distinction being made between any particular Spanish produce and similar produce of other countries." Nevertheless, it is quite true that sherries do, as a rule, pay 2s. 6d. per gallon. The lighter unbranded sherries and Val de Peñas are admitted at the lower rate of 1s. per gallon, but when the alcoholic test shows more than 26 degrees the higher duty is exacted. This is not done for the purpose of protecting any particular wine trade, nor with the intention, as seems to have been erroneously stated in Spain, of protecting our spirit distilleries. On spirits themselves we levy a uniform duty of 10s. 6d. per gallon, whether they are British or foreign; and the sole purpose of the additional duty on the wines of greater alcoholic strength is to save the revenue raised by the duty on spirits from being filched away by the introduction of highly-branded wines at nominal rates. This object is so important that we can hold out no hopes of the reduction of the duties on wine to the uniform rate of 1s. per gallon. There might be some break in the transition from 1s. to 2s. 6d. The increase is evidently disproportionately great; and while it must be perfectly right to charge so-called wine having 40 degrees of spirit with 2s. 6d. a gallon, it is difficult to defend the transition under which wine with 25 degrees pays 1s. and wine with 27 degrees pays 2s. 6d. The *maximum* of alcoholic strength now permitted in wine might be reduced, and in any case an intermediate grade of duty could be instituted. It cannot, however, be admitted that Spain has suffered under our present Tariff. The last three or four years have not been favourable to the Spanish wine trade, but this has not been in consequence of the import duties we levy on wines. Civil war is never likely to develop trade, and Spain is no exception to the rule. But Spaniards, if they look at long averages and the general current of commerce, will be forced to acknowledge that the increase in the importation of wine from Spain was, up to the time of the war, absolutely greater than the increase in the importation of wine from France since the French Treaty. The relative increase of the French wine trade was, no doubt, greater because this trade was extremely limited when  
the

the Treaty was negotiated; but sherry long retained its pre-eminence, and with the return of peace in Spain it will regain the position in our imports which has for the moment been endangered or lost.

No man can examine the position taken by the Spanish Government without being reminded of the complaint, now become inveterate, of the inequalities of taxation levied upon the inhabitants of that part of the United Kingdom called Ireland. Señor Barzanallana and Mr. Mitchell Henry assume the same position. A man is not subject to any unequal taxation because he is an Irishman, but if he buys a shilling's worth of whisky he contributes more to the Exchequer than if he buys a shilling's worth of beer. In the same way the wine bought of the Spanish merchant and brought into England does not pay an additional farthing of duty because it comes from Spain; but if a gallon of Spanish wine contains three pints of alcohol, we must tax it at a higher rate than a pint of Rhenish or Gascon wine that does not contain more than a pint. A Spanish Minister of Finance may be pardoned if he remonstrates against this principle of taxation, but, after his remonstrance has been made, we must continue to pursue the same course. There may be some modification of details; there can be no abandonment of the main principle until the golden day arrives when neither for fiscal nor for moral reasons shall it be necessary to impose any special impost on the vending of alcoholic drinks. If this statement is not accepted as satisfactory at Madrid—and we do not suppose it will be at once received as conclusive—we must wait till it makes its way. After all, we work in a world where the fact that the same thing is viewed by different men from different lights must be accepted as a condition of practical life. Señor Barzanallana and Sir Stafford Northcote do not occupy the same point of view. Our fathers did not always realize this truth, and when they did they took little account of it. We are ready to recognise it, but while we bear it in mind, we cannot alter the whole scheme of our fiscal system in consequence of it.

(*The Times*, Thursday, October 11, 1877.)

SPANISH AND AUSTRALIAN WINES.

To the Editor of the Times.

Sir,

A recently published Parliamentary paper, purporting to be a "Translation of the new Spanish Tariff, with an explanatory Report by Sir J. Walsham, Her Majesty's Chargé d'Affaires at Madrid," discloses a singular difference of opinion upon an important question of fact between the Spanish Government and Her Majesty's representative. By this Tariff—page 6—Great Britain is not included among those nations "which concede to the products of Spain, by reason of treaty stipulations, the Customs duties established for the most favoured nation." Sir J. Walsham, in his Report—page 29—says, "As regards Great Britain, it is contended that differential duties are imposed on Spanish wines, and that, consequently, British commerce cannot expect to receive better treatment in Spain." But Sir J. Walsham denies the fact, and positively asserts that "Spanish produce and manufacture enjoy, under the Customs Tariff of the United Kingdom, precisely the same treatment as the produce and manufacture of all other countries." Now, it cannot be for a moment supposed that in a matter of so much importance, and by way of rejoinder to a previous statement of the Spanish Government, Sir J. Walsham would be capable of mis-stating such a fact, even by inadvertence. But, on the other hand, it is highly improbable that the Spanish Government had no grounds whatever for their contrary statement. It will strike any one acquainted with the manner in which the Customs Tariff of the United Kingdom affects Australian wines that the difficulty may be explained by the difference in character between Spanish and other wines, particularly French, and that probably, although Sir J. Walsham may state the literal fact with perfect accuracy and sincerity, the Spanish Government may yet be right in the spirit of their complaint. It is well known that the last alteration of the British Tariff was effected ostensibly in the interests of free trade, but also with the avowed object of admitting and introducing into general consumption the light French wines. The alteration consisted mainly in reducing the duty on wines containing only 26 per cent. of alcohol to 1s. per gallon, wines above that strength remaining subject to a duty of 2s. 6d. per gallon. As no complaints appear to come from or on the part of France, it may be assumed that the Tariff has so far accomplished its intended purpose by admitting the greater number of light and pure French wines, or, at any rate, of those which it is considered desirable to export. But, from the testimony of certain correspondents of yours, and the course taken in this matter by the Spanish Government, it may be gathered that this Tariff virtually excludes a number of Spanish wines similar in other respects to light French wines, and although perfectly pure—that is to say, not artificially mixed with or strengthened by alcohol—yet of sufficient alcoholic strength to render them subject to the higher and almost prohibitory duty of half-a-crown per gallon. To admit these wines and bring them into general competition, or, in other words, to place them upon an equal footing with French wines, would require either a reduction of the duty upon all pure wines, or an increase of the standard of strength to which wines subject only to the shilling duty are at present limited. In these circumstances, if the alteration of the tariff were intended, or could be regarded, as a manifestation of free trade principles, and not as an instance of favour shown to a particular nation, the Spanish Government are not so entirely without reason in the course they have taken as would appear from Sir J. Walsham's Report.

No doubt it is simply from inadvertence or ignorance of the facts, that, while your correspondents show themselves fully alive to the alleged claims of Spain to a more favourable treatment of her wine-growers, the at least equal claims, whether from a national or commercial point of view, of the Australian Colonies have been entirely overlooked. It appears to be far from generally known that the claims and interests of Australian wine-growers in this matter of the Tariff run on all fours with those of the Spanish, and possibly also of Italian, Cape, and many other wine-growers, whose wines are the produce of rich volcanic soils, similar to those of Australia. It is only lately that scientific analysts and physiologists have been brought to acknowledge the existence, in any quantity, of pure wines strong enough to contain, say, 30 per cent. of what is called natural alcohol. But the fact has been long notorious in Australia, where it has been recently established upon both an official and a scientific basis, by an investigation instituted by the Governments of New South Wales and Victoria. The natural result has been a series of remonstrances, through their respective Agents General, addressed to the Imperial authorities, against the virtually prohibitory character of their Tariff in the matter of Australian wines, but hitherto without effect. I had almost said that in this, as in other cases, we experience the benefit of being British subjects  
and

and members of the British Empire in our exclusion from certain benefits conceded to foreigners and foreign nations. But I shall probably be reminded that by this exclusion Spain, as well as other wine-growing nations, are sufferers no less than the Australian Colonies; and it remains to be seen whether an identity of interest in the case before us will avail to secure for the Colonies concerned fuller and more effective consideration than they could obtain on their own account. Certainly there is no reason why Spain should expect an impartiality not extended to British Colonies. But it is obvious that a Tariff which practically excludes the bulk of the same class of commodities of one nation which it admits in the case of another, can have no pretension to be considered either an exemplification of free trade principles or of strictly impartial treatment of the world in general. I willingly admit the courtesy with which these Colonial remonstrances have been received and considered by the Imperial authorities; but the fact remains that no concession has been made, although the question is still under consideration. I admit, also, the difficulties by which the question is surrounded, and which, no doubt, stand greatly in the way of the desired concession. But I am in hopes that these difficulties, which appear to consist chiefly in a somewhat exaggerated apprehension of loss of revenue, partly from the direct effect of reduction of duty and partly from the indirect effect of possible adulteration, may not be found insuperable; and I submit that the Colonies are entitled to expect some sacrifice of mere revenue from the Mother Country, for reasons similar to those which were effectually urged for the reduction of duty on wines imported from a foreign country. The fidelity of New South Wales to free trade principles, which has been frequently the subject of eulogy in your columns, would perhaps be generally held to give her a special claim to consideration.

I remain, &c.,

WILLIAM FORSTER,

Agent General for New South Wales.

Translation of the New Spanish Tariff, dated July 17, 1877; with an Explanatory Report by Sir J. Walsham, Bart., Her Majesty's Chargé d'Affaires at Madrid.

No. 1.

*Royal Decree sanctioning the new Customs Tariff.*

(Translation.)

*Ministry of Finance.*

In conformity with the reasons set forth by my Minister of Finance, and in accordance with the opinion of the Council of Ministers,

I decree as follows:—

Article 1.—There shall be immediately published the new "Arancel de Aduanas" (Customs Tariff) as reformed by Article 31 of the "Ley de Presupuestos" (Budget Law) of July 11, 1877, with the imposts and dispositions established in Articles 28, 29, and 34 of the said law.

Art. 2.—In accordance with the powers conceded to the Government by Article 35 of the said Budget Law, the reduction of duties in the new tariff shall only be applicable to the produce and exports of the nations which have treaties with Spain containing "the most-favoured-nation clause."

Given in Gijon, this 17th of July, 1877.

(Signed)

ALFONSO.

(Countersigned)

MANUEL DE OROVIO,

*Minister of Finance.*

*Rules for the application of the Tariff.*

RULE NO. 1.—*Articles free of duty.*

The following articles shall be exempt from Customs duties on importation into the Peninsula and the Balearic Isles:—

1. Mineral waters, with the exception of their "envases."\*
2. Trees ("arboles"), vine shoots ("sarmientos"), and plants.
3. Lime (protoxide of calcium).
4. Collections of plants and herbs, scientifically formed.
5. Minerals in loose pieces or in collections for study.
6. Mineral of copper.
7. Mineral of gold.
8. Mineral of silver.
9. Models in small pieces of any kind.
10. Samples of textiles and of felt-stuffs in pieces sufficient to show the pattern.
11. Samples of stained paper ("papel pintado") for the obtaining of orders.
12. Archeological and numismatical objects.
13. Gold, silver, and platinum in ornaments, jewels ("alhajas"), and table services ("vajillas") broken up. Ingots ("barras"); coins ("moneda"); pieces and dust of precious metals, and "tejos" (silver or gold in an unmanufactured form).
14. Gold, silver, and platinum worked up and assayed in Spain.
15. Pearls, broken pearls, and mis-shapen pearls ("aljofar"), and precious stones.
16. Silk in pod, waste silk, and silkworms' eggs.
17. Gypsum (sulphate of lime).

RULE NO. 2.—*Articles free of duty, subject to the observance of the formalities determined in Appendix 16 of the Customs Regulations.*

1. Packages, bottles, &c., for exportation of national merchandises.
2. Casks, barrels ("piperia"), sacks, and the large inner packages of metal imported with merchandises paying no duty, including the said "envases," when they are to be exported.
3. National wines and their "envases" returned from abroad.
4. Carriages, horses, mules, and beasts of burden, cattle ("ganados"), animals broken in ("adiestrados") alone, or with the carriages to which they belong; portable theatres, wax figures, and other like objects for public entertainments, introduced temporarily, to be re-exported.
5. Spanish carriages and their teams—horses, mules, &c. ("ganados") leaving Spain by land, and returning the same way.

6.

\* The word "envases" will occur frequently. It signifies the package in which the substance is contained—as, for example, the bottle for liquids, drugs, medicines, wines, spirits, &c.; the tin case for such things as sardines, fruits, biscuits, &c.; the inner packings of damageable articles, to the exclusion of the wooden case, box, cask, or barrel.

6. Used furniture of persons resident in the Spanish Colonial provinces, and the Canary Islands, also of Spaniards resident abroad, and of foreigners coming to reside in Spain.
7. Furniture, luggage, carriages, and effects of the Diplomatic Corps.
8. National articles returned from foreign Exhibitions.
9. Foreign articles coming to Spanish Exhibitions.
10. Submarine telegraphic cables.
11. Salvage effects of national vessels wrecked on foreign shores.

*Articles free of duty, subject to the observance of the formalities expressed below.*

1. Wearing apparel ("ropas hechas"), toilette objects, bed and table linen, books, tools, portable instruments, theatrical costumes, jewels, ornaments, and table services, bearing evident signs of having been used, brought by travellers in their luggage, in quantities proportioned to their class, profession, and circumstances. When the travellers do not bring their effects with them, the clearing of the same may be made by the conductors or persons authorized for the purpose, provided they prove to the satisfaction of the Administration that the effects are destined for private use.
2. Coral collected by Spaniards and imported in Spanish vessels, subject to proof of the fact.
3. Works of fine art executed by Spaniards abroad, and those acquired by the Government, the academies, or other corporations, destined for museums, galleries, or lecture halls ("Salas de Estudio") in all cases where due proofs can be given.
4. Pictures and objects of fine art returned from abroad, originally exported under Customs permit, subject on re-importation to declaration of the number of the said document, or its presentation in duplicate for the purpose of the necessary proof.
5. Rosaries and other pious objects, introduced with the proper authority.
6. Spanish books returned from abroad, in whose permit of exportation the number of copies, the title of the work, and the name of the printer, has been expressed.

NOTE.—If the regulations in each case are not complied with, or if the examination is not perfectly satisfactory, the exemption will be annulled, and the Customs will impose the corresponding duties.

**RULE No. 3.—Special Duties.**

1. Cotton ("con pepita"), in pod or with seed, shall pay half the duties fixed under the number ("partida") 96.
2. Uncleaned rice shall pay half the duties fixed under No. 227.
3. Ground breadstuffs ("harinas") shall pay the duties of the grain from which they are derived, plus 50 per cent.
4. Made-up clothing, &c. ("Ropas hechas") (Note 1), shall pay on their total weight the duties fixed for the material of which they may be composed in their exterior part, plus 50 per cent. If embroidered ("tela bordada"), this 50 per cent. shall be paid over and above the duty on the embroidery.
5. Materials embroidered by hand or machine, and those with a mixture of fine metals or imitations thereof, shall pay the duty corresponding to the class of textiles to which they belong, plus 50 per cent.
6. Textiles of flax, wool, and silk which contain a mixture of cotton in the warp or the weft only shall be assessed for duty as if for linen, wool, or silk without mixture.
7. Textiles of wool and silk or waste silk whose warp or weft may be of one or other of these materials shall pay one-fifth duty as silk, and four-fifths duty as wool.
8. Textiles of flax and silk, or waste silk ("borra de seda"), whose warp or weft may be of one of these materials, and those of cotton and silk, or waste silk, whose warp or weft may be all cotton, shall pay four-fifths duty on the weight as textiles of linen or cotton as the case may be, and one-fifth as textiles of silk.
- Plush ("felpas") and velvets ("terciopelas") shall be excepted, which shall pay three-fifths according to No. 106, and two-fifths according to No. 146.
9. Textiles of flax and wool, whose warp or weft may be of one of these two materials, shall pay on three-fifths of the weight as wool, and two-fifths as linen. The same duty shall be paid on carpets, plushes, and velvets which contain one warp of wool and another of linen, and a weft of cotton, or *vice versa*.
10. Textiles of flax and cotton, whose warp or weft may be all of cotton, shall pay on half the weight as textiles of cotton, and on the other half as linen.
11. Textiles which have all their warp or weft of flax, wool, silk, or cotton, and on the other side of the material two or more of these materials, shall pay as per former rules, being considered as of linen, wool, silk, or cotton, or of the mixed material which pays the highest duties.
12. Tulles which have their foundation of silk, although bordered, embroidered, or mixed with cotton or other materials, shall pay as tulles of silk. Tulles of cotton foundation, although bordered, embroidered, or mixed with silk or other material, shall be assessed as tulles of cotton. When there is a mixture in the foundation the duty shall be paid on the preponderating material.
13. Large pieces of iron and steel generally employed in the construction of edifices, bridges, &c., composed of bars, or of bars and plates held together with rivets, &c., shall pay, according to No. 25 of the tariff, plus 30 per cent.
14. Wire gauze, &c., unworked, shall pay double the duty of the wire of which it is wrought.
15. Carpets of jute and cotton shall pay according to No. 125 when they do not contain more than 33 per cent. of the latter material.
16. Washed wools shall pay double the duty fixed on unwashed in Nos. 127, 128.
17. Spun silk and textiles of black silk shall pay 80 per cent. of the duty fixed in their respective numbers in the tariff.
18. Instruments of science and of art, not otherwise expressed in the tariff, shall pay on the material of the part which has the greatest weight, including the cases and boxes ("estuches") in which they are contained.
19. Salvage of foreign vessels wrecked on the Spanish coasts shall pay 8 per cent. on the value as realized by public auction ("subasta publica") conducted in conformity with the formalities of Article 204 of the Customs Regulations.

**RULE No. 4.—Packings ("Envases y Empaques").**

Articles whose duty is fixed by weight, oils, greases, and fats (except wax), honey, flesh, fish, &c., in brine (*i.e.*, salted), machinery, drugs, and chemical products, shall pay on the gross weight ("peso bruto") when they come in one single package or enclosure (casks, keg, barrel, packing-case, &c.)

If they come in two or more inclosures, or in packets contained in one single inclosure ("envase"), there shall only be included in the weight of the merchandise that of the interior "envases" or packets.

All other merchandise shall pay duty also on paper wrappings, silk or cotton ribbons or tapes ("cintas"), packing, or interior "envases," provided always that these are not "estuches" or "cajas" (fancy boxes, &c.), assessed separately in the Tariff.

Exceptions from this rule:—1. The caps and capsules for fire-arms, hooks and eyes, pins, eyelet-holes of metals, steel pens, games, instruments of science, art, &c., which pay also when the interior fancy boxes &c., ("cajas ó estuchas interiores"), containing them, and with which they are generally sold by retail; and 2. China silk handkerchiefs, which pay on their net weight, without including paper or wrappings.

The rollers, or boards of wood, or pieces of cardboard on which fabrics come wrapped, and those for oil-cloths ("hules") and laces, ribbons, &c., ("pasamaneria"), shall be deducted from the weight of the articles on payment of duty.

Casks and barrels which remain fit for the holding of liquids, and the large interior metal linings of cases fit to contain other merchandise than that brought in them, shall pay (independently of their contents) the duties corresponding to their class.

Sacks ("sacos") introduced as serving for "envase" shall pay 10 c. of a peseta each (1d.), except when they contain drugs, chemical products, or articles paying duty by weight ("derecho de balanza"). In these cases they shall be subject to the stipulations of paragraph 1 of this Rule.

By "envase exterior" shall be understood that which is visible when the package ("bulto") is unopened. Every inclosure contained therein is an "envase interior."

**RULE**

RULE No. 5.—*Tares.*

From the gross weight ("peso bruto") of the undermentioned merchandise there shall be deducted as tare the following percentage:—

	Deduction per cent.
Steel in cases .....	10
Reels of cotton or thread .....	40
Indigo (anil) in bags .....	10
Ditto, in boxes .....	15
Sugar of any kind, in boxes and casks .....	14
Cinnamon, in its original bags .....	8
Ditto in boxes .....	20
Liebig's extract of meat, for the pot or vessel in which contained .....	70
Thread, in bundles or packages .....	3
Tin, in boxes .....	10
Matches, when they come in tin boxes and wooden cases .....	50
Ditto, when in tin boxes only .....	30
Grancina (madder dye) in casks .....	20
Earthenware, in cases and casks .....	30
Ditto, in crates .....	16
Laces, ribbons, &c., when the interior is of wood, cardboard, &c., except textiles (off the net weight) .....	10
Clay pipes for smoking, in barrels .....	30
Perfumery, for all interior envasos and packings .....	25
Silk, floss silk, and twisted silk, on reels, for the reels .....	45
Glass and glass-ware, in packages (not earthenware, Note 2) .....	40
Ditto, in crates .....	20

RULE No. 6.—*Exportation and re-importation.*

Merchandise not included in the Tariff of Exportation may be sent abroad free of duty.

Goods, fruits, and effects exported to the Spanish Colonial Provinces shall be exempt from duty on their return to the Peninsula or Balearic Islands, subject to the proof that they are the same as exported. This proof shall be by presenting at the time of clearance a certificate from the Colonial Customs setting forth the description of the merchandise, according to the Tariff, the vessel of importation, the number and date of the exportation permit. The Customs shall compare the export permit with the other declarations, and if there be conformity the freedom of duty shall be conceded, the quantities returned being noted in the said permit. Of these notations account shall be given to the original exporter where a third person appears as the clearer on re-importation. Newspapers and other publications, and works sent to the Colonies by post, may be freely returned, but the declarations must be made by the authors, editors, or directors of the newspapers or works, or by persons duly authorized by the same; they must indicate in the document the titles of the publications, the names of the authors, editors, directors, and printers.

These data shall be compared with the printed matter returned. When the packages are returned unaccompanied by the said certificate from the Colonial Customs, or when there is any other informality, but the examination shows nationality and marks of constructor, &c., there shall be paid an exceptional penalty of 5 per cent. of the Customs duty. In all other cases the default of any of the indicated formalities shall annul the exemption from duty.

The goods, fruits, and other national effects exported to foreign countries and returned to the Peninsula or Balearic Islands shall be considered as foreign, and pay the duties fixed in the Tariff of Importation. There shall be excepted those comprehended in Rule 2, the oars and staves from the Mountain Irati, in the Province of Navarre, and national merchandise passing through Portugal, always provided that the prescriptions of the Reglamento of February 7, 1877, are observed.

RULE No. 7.—*Commerce with the Canary Islands.*

The ports of Santa Cruz de Tenerife, Orotava, Ciudad de Real de Las Palmas, Santa Cruz de la Palma, Arracife de Lauzarote, Puerto de Cabras, San Sebastian y Valverde, in the Canary Islands, are the only ones which can trade with the ports of the peninsula.

From the said islands the following articles shall be admitted as national products:—

Oil of Tartago (Aceite de Tartago)	Garbanzos, pease (Garbanzos)
Almonds (Almendras)	Seeds (Semillas)
Lupines (Altramuces)	Indian corn (Maiz)
French beans (Alubias)	Dyes (Orchilla)
Mineral soda (Barrillas)	Potatoes (Patatas)
Chestnuts (Castañas)	Fish (Pescado)
Barley (Cebada)	Filtering stones (Piedras de filtro)
Onions (Cebollas)	Stones for paving (Losetas)
Rye (Centena)	Silk in cocoon or pod (Seda en capulla)
Cochineal (Cochinilla)	" in skein (en rama y)
Sweetmeats (Dulces)	" worked up (elaborada)
Straw, for hats (Esterilla)	Wheat grain (Trigo)
Fruits (Frutas)	Wines (Vino)

Goods, fruits, and effects exported from the Canary Islands as unsaleable, and from other similar causes, lose their nationality. Merchandise from the Spanish Colonies of Ultramar, touching or landing at the Canaries, shall preserve their nationality on introduction into the peninsula, the said ports being considered as deposits, but subject to the certificates referred to in Article 317 of the Ordenanzas.

RULE No. 8.—*Commerce with the Spanish Provinces of America.*

(See Note 3 to this Tariff, and Article 317 of the Ordenanzas.)

Merchandise the product of and proceeding from these provinces, not having their duties fixed in the Tariff, shall pay the half of what foreign produce of like kind would pay.

RULE No. 9.—*Commerce with the Spanish Provinces of Oceania.*

(See No. 3 to this Tariff, and Article 317 of the Ordenanzas.)

Merchandise the product of and proceeding from these provinces shall pay the fifth part of what foreign produce of like kind would pay.

RULE No. 10.—*Commerce with Fernando Po.*

(See Note 3 to this Tariff, and Article 317 of the Ordenanzas.)

Merchandise the product of and directly proceeding from the Spanish Island of Fernando Po, and its dependencies Annobon, Corisco, Elobey, and Cabo de San Juan, shall pay no duties on introduction into the peninsula, as the trade is considered coasting ("cabotaje").

The products of the West Coast of Africa brought into the said islands and thence imported directly into the peninsula shall pay three-fifths of the duties assigned in the Tariff, always provided they are accompanied by the documents required by the Customs Regulations.

RULE No. 11.—*Commerce with Ceuta, Melilla, Alhucemas, Penon de la Gomera and Chafarinas Islands.*

The above being declared free ports by the Law of May 18, 1863, and Royal Order of August 30, 1872, the goods, fruits, and effects of national production imported from them into the peninsula and adjacent islands shall be considered as foreign, and shall therefore pay the full duties of this Tariff.

There

There shall only be admitted free of duty fish the product of and proceeding from the tunny fisheries of Ceuta, Malilla, and Chafarine Islands, subject to the formalities established in the Regulations.

**RULE NO. 12.—Commerce with the Nations that have concluded Treaties with Spain.**

The duties in the present Tariff (column 2), inferior to those fixed in 1869, shall only be applicable to goods the product of and proceeding from the German Empire, Switzerland, Belgium, Italy, Austria-Hungary, Sweden and Norway, Netherlands, Russia, Portugal, Morocco and Turkey, which nations concede to the products of Spain, by reason of Treaty stipulations, the Customs duties established for the most-favoured nation. To prove that the merchandise is the product of and proceeds from the said countries, the interested parties must present at the time of importation into Spain a certificate from the Foreign Custom-house, *visé* by the Spanish Consul, establishing the exportation of the said merchandise.

If the products of the before-mentioned nations pass in transit through any other foreign country on their way to Spain, the transit must be verified by a certificate from the Administration of Customs of the said foreign country through which the merchandise passes, *visé* by the Spanish Consul.

When any of these documents cannot be presented, the highest scale of duties fixed in the Tariff of 1869 (column 1) shall be imposed.

**RULE NO. 13.**

The following articles are forbidden to be imported into the kingdom :—

1. Arms, projectiles, and ammunition, except by permission of the Government (note 4).
2. Hydrographic charts, published by the Navy Department.
3. Maps and plans by Spanish authors, whose right of property has not expired, except by permission of the same.
4. Books and printed matter in Spanish, in cases prescribed by the law of literary property (copyright).
5. Missals, breviaries, and other liturgical books of the Catholic Church.
6. Paintings, figures, or any other objects offensive to morality.
7. Pharmaceutical preparations or secret remedies, whose composition cannot possibly be discovered, or whose formula has not been published.
8. Tobacco in the form and with the coverings specified in the rules of the monopoly.
9. Moorish coinage ("ochavos Morunos").
10. Catapults and air-guns, &c. ("cervatanas y bastones escopetas de viento").
11. Rosaries, sanctuaries, and other pious objects of the holy places ("santos lugares"), introduced by traders and private individuals, except those imported by the Commissary-General of the Obra Pia de Jerusalem, who has the privilege of their introduction into Spain and her dominions.

*Temporary Prohibitions.*

Roots, shoots, graftings, seeds, or plants of the genus "cissus" and "ampelopsis:" all that may be attempted to be introduced will be destroyed.

12. Potatoes, their leaves, shoots, sprouts, parings, peelings, and cuttings, and the sacks or packages ("envases"), in which they may be brought, from any part of America: those which may be attempted to be introduced will be destroyed, together with their sacks or packages ("envases").

**TARIFF of Duties on Foreign and Colonial Merchandise Imported into the Peninsula and Balearic Islands.**

(Signed)

MANUEL D. OROVIO,  
Minister of Finance.

## NOTES (NOTAS).

1. *Ropas Hechas*.—Rule, 3, paragraph 4.—shall be considered for duty as "ropas hechas" not only clothing completely finished, but that half-sewn, and simply stitched.

2. *Vidrio y Cristal*.—Rule 3.—Glass and crystal coming in open wood-work packages shall not be subject to the tare fixed in Rule 5.

3. *Merchandise from America, Fernando Po, and the Spanish Provinces of Oceania*.—Rules 8 and 10, and Nos. 233, 237, 245.—The duties fixed in Nos. 233, 237, 245, and those imposed by virtue of Rules 8, 9, 10 shall only be applied when the importing vessels make the voyage direct from the port of shipment to the ports of the Peninsula or the Balearic Islands.

Shall be excepted the merchandise of the Spanish Provinces of Oceania which may be brought in vessels bringing other foreign merchandise embarked in ports of the Indian and China Seas, without losing the right of the benefits of Rule 9, always provided the nationality and shipment shall be verified by Customs certificate from the said provinces.

In

In case of distress ("arribada forzosa") or to receive orders in search of a market (calling for orders) the vessels may touch at foreign ports, but the fact must be verified by certificate from the Consul. Neither shall shipments lose their character as direct when the vessels, from inevitable damage or accident at sea, tranship the merchandise in foreign ports into other vessels to convey them to their destination; always provided that the facts shall be justified before the Consul, and it be set forth in the commercial documents that the goods are consigned to Spain.

4. *Arms and Munitions of War*.—Rule 13.—Shall be considered as arms of war, pistols, revolvers, guns, and carbines, which have a calibre of over seven millimetres, as also their ammunition.

5. *Mineral Carbon*.—(Mode of clearing.)—No. 5.—Coal and coke shall be cleared according to the weight expressed in a certificate given by the Spanish Consul to the vessel at the port of shipment, in which shall be set forth the quantity received on board, according to the charter-parties, policies, and bills of lading, the presentation of which shall be required for the purpose.

In cases of doubt the Customs may make the necessary verification.

6. *Petroleum and other Mineral Oils*.—Nos. 6 and 7.—For duty purposes, crude petroleum ("petróleos crudos") shall be understood to be natural petroleum; and those produced by the first distillation of the schists ("esquistos"), distinguishable by their yellow colour, and density of 900 to 920, or 59 grades of the "areometer centesimo," equivalent to 21 of that of Cartier.

All other mineral oils not falling in this rank and condition shall be considered as refined oils.

7. *Vidrio y Cristal (Glass, Earthenware, &c.)*.—Nos. 9, 10.—Shall be considered as included in No. 9, bottles, demi-johns, and flasks for holding oils, wines, drugs, perfumery, and chemical products, provided they have no graven, raised, or embossed work ("talla"). In No. 10 shall be included the bottles, vases, glasses, and other objects for the service of the table, for lighting purposes, for ornamental purposes, whether of crystal or of glass, white or coloured.

8. *Joyeria y Alhajas*.—Nos. 16 and 17.—The classification of "joyeria" and "alhajas" includes all small objects of luxury, such as pins, rings, ear-rings, bracelets, watch-chains, snuff and tobacco boxes, necklaces, buckles, clasps, pen and pencil holders, keys, card-cases, trinkets for the head, neck, &c., pens, seals, brooches, &c., not otherwise provided for in this Tariff.

9. *Vajilla (Gold and Silver Table Services, &c.)*.—No. 18.—The classification of "vajilla" comprehends all utensils of fine metals, such as sugar-bowls, coffee-pots, candelabra, candlesticks, cups, spoons, ladles, dishes, jars, jugs, lamps, basins, plates, soup-plates, knives, forks, tea-kettles, vases, &c., and other objects for domestic use. Also, chalices, cibaries, crosses, custodias, lamps, viriles for the host, and other similar pieces destined to the services of the church, not otherwise provided for in this Tariff.

10. *Mastic (tare of)* in objects of fine metal.—Nos. 16 and 18.—In clearing finished objects of jewellery, gold, silver, and platinum, where mastic is used, allowance will be made for the tare.

11. *Fire-arms*.—No. 38.—In order that the pieces of fire-arms may pay according to No. 38, they must be polished.

12. *Colours*.—No. 66, 68.—The colours comprehended in No. 66 are those composed of a metallic base, which are used mixed with oil or other liquids ("aguarras"), and which are generally insoluble in water, alcohol, and ether, rarely crystallized, and almost always in powder or in lumps, such as white lead, yellow ochre, vermilion, prussian blue, theuardt blue, verdigris, red lead, &c.

The colours comprehended in No. 68 are those known as artificial or organic products in which mineral substances rarely enter; the bodies are generally crystallized, soluble in water, alcohol, and ether. They are employed mostly in painting, in dyeing, and printing on fabrics, paper, &c., with or without size, such as picric acid, aldehyde green, English violet, rosoline and its salts, naphthaline colours, artificial alizarine, &c.

13. *Barillas (soda-ash, &c.)*.—No. 75.—Barrillas, natural and artificial, are understood to be carbonates of impure soda, which contain carbon.

13. *Pharmaceutical Products*.—Nos. 86 and 87.—Only the Pharmaceutical Inspectors can examine pharmaceutical and medicinal products for purposes of duty as per Nos. 86 and 87, and they must sign the declarations with the Customs Officers in the following form:—

"The goods cleared are those expressed in the 'declaration,' and are (or are not) admitted to importation by virtue of their formula having been published [here express where], or their composition has been discovered by analysis made by"

15. *Determination of the Number in Cotton*.—Nos. 97 and 98.—To ascertain the number according to the English system (the system to be adopted in this Tariff), to which a piece of cotton cloth corresponds, any number of metres of cloth may be taken, which number is to be multiplied by the invariable factor 59 (this being the number of centigrammes a metre of cloth of a single thread (No. 1) weighs). The product of the above multiplication is to be divided by the number of centigrammes that the piece of cloth may weigh. The quotient will then give the corresponding English number; to which 7 or 10 per cent. is to be added, according to the number of threads in the cloth, be it twisted only or twisted and coloured.

16. *How to count the Threads and settle doubts as to their Number*.—(Nos. 100 to 103, 106, 119 to 121).—The number of threads in a piece of cloth must be determined by counting with the magnifying glass called thread-counter, those contained in the space of six square millimetres. In hempen textiles only the threads of the warp are to be counted. In cottons those both of weft and warp are to be counted.

According to No. 9, Rule 3, the threads of warp and weft in plushes of velvet and wool are not to be counted for duty. Doubts arising as to there being one thread more or less than the number given as a limit, in the space occupied by the thread-counter, shall be settled in favour of the importer.

17. *Compensation for the Number of Threads in the Weft by those in the Warp, and vice versa*.—(Nos. 100 to 103).—It is not indispensable that the textiles comprised in Nos. 100 to 103 should have precisely the same number of threads in warp and weft: surplus threads in the one way go to make up the deficiency in the other. It is only essential that those of Nos. 100 and 102 should make together, between warp and weft, 50 threads, and that those of Nos. 101 to 103 should make 51 threads and upwards.

18. *Cotton Lace ("Puntella de Algodon")*.—Nos. 108 and 109.—All cotton lace of real crotchet, i.e., that made by hand, as also that fabricated in loom or machine, imitation of the same, shall pay according to No. 108, and all others according to No. 109.

19. *Twine ("Hilo bramante ó accareto")*.—No. 118.—This shall be understood to be the hemp thread, linen thread, or jute thread, twisted in two or more threads, 10 metres of which weigh more than 5 grams.

20. *Wools ("lanas")*.—Nos. 127 and 128.—Shall be considered as uncleaned wool ("lana sucia") that which after being washed with sulphate of carbon loses more than 10 per cent. of its weight. Wool being more than 10 centimetres in length shall be considered as long wool.

21. *Blanketings ("mantas")*.—No. 135.—Under the name of "mantas" shall be comprehended for the effects of this Tariff, bed covers and horse blankets. Shall be excepted those called plaids, or the like, which being woven like other textiles, should be expressly assessed as such "telas" (textiles) in cut pieces, pieces, shawls, &c.

22. *Woollen Shawls, with Fringes superadded*.—No. 138: shall be assessed for the fringe separately with the duty corresponding to its class.

23. *Books and their Bindings ("Eucudernaciones")*.—Nos. 153 and 154.—The regulations contained in Nos. 153 and 154 are only applicable to unbound books or in wrappers. In taxing bound books, the weight of the binding shall be deducted, and charged for according to its kind.

24. *Books printed in Spanish*.—Rule 13, paragraph 4, and No. 153.—May be introduced into Spain all printed works published previously, or which may first be printed in Spanish abroad, subject to the payment of the duties fixed in this Tariff. Authors or editors only can introduce them, and they can only do so by remitting to the Minister of Fomento a note of the printed matter they desire to introduce into Spain. This note shall be published in the "Gazette," and the importation cannot be made until 15 days after the said publication.

The right of authorship shall be obtained by the mere presentation of the book on which the name of the writer appears. In anonymous works, authorship must be proved to the satisfaction of the authorities.

The right of proprietor must be proved by the exhibition of the receipt or certificate given in countries where laws of copyright prevail by the competent authority to the authors or editors making the deposit and fulfilling the other formalities of the said laws, this fulfilment being that which constitutes legal rights to author or publisher.

Permission to introduce a work after publication in the "Gazette," and the expiration of the fifteen days' notice, authors and editors may import without new permission as many copies as they please, provided that in every case they prove their rights.

Newspapers

Newspapers in Spanish printed abroad do not need any authorization previous to their introduction into Spain.

25. *Books from France the entry of which is subject to the Copyright Convention.*—Nos. 153 and 154.—Works and publications comprised in the Copyright Convention of November 1853, between France and Spain, are books proceeding from France, in whatever language, and those from other countries which are in French. Importation of this class of works into the kingdom can only be passed through a Custom-house of the 1st Class.

The proof of the nationality of French works is to be made by presenting a certificate from the competent authorities in France, in which shall be set forth that the work is an original publication and legal property in that country, conformably to the following model:—

CONVENIO FRANCO-ESPAÑOL.

The undersigned  
following works, viz. :—

*Certificate.*  
inhabitant of

[France], declares that the

No. of Order.	Titles of Books.	No. of Copies.	Observations, No. and Mark of the Packages.

are forwarded from France to Spain by the Office of  
to Señor \_\_\_\_\_, resident of \_\_\_\_\_

I declare moreover that these publications are originals and of legal property in France, or have been declared such by the payment of entry duties. [This part of the phrase should be omitted in case the package does not contain foreign works sent from France to Spain.]

(Here the signature of the Agent.)

*Visé* by us, Minister, Secretary of State in the Department of the Interior.

By the Minister and by authority.

The Chief of the Section of Printing and Bookselling.

(True copy.)

The proof of nationality of French works, not printed in France, must be made by presentation of a certificate from the authorities of the country whence they proceed declaring them to be originals, and are legal property in the country from whence they come, or have become so by payment of entry duties.

26. *Slabs of Marble.*—Nos. 168 to 170.—Slabs of marble for tops of furniture ("muebles") shall be assessed according to No. 2 of the Tariff, provided that they are presented separate from the objects to which they belong.

27. *Pianos.*—No. 198.—Cases with their cords for pianos shall pay the duties of the No. corresponding to pianos, even when not accompanied by the other pieces which are necessary to constitute the musical instrument properly so called.

28. *Works for Watches, Clocks, &c.*—No. 203.—Cases, pedestals, dials, and other accessories shall pay as manufactured objects duty according to the No. of the corresponding material.

Machinery for wall or table clocks, &c., and pieces of brass for the same, shall pay according to No. 45.

29. *Agricultural Machines.*—No. 205.—The machines here referred to are only those employed by the field labourer and agriculturist for preparing the land, collecting its produce, and for cleaning the produce or benefitting it without essentially varying the natural form.

According to Article 15 of the Rural and Agricultural Law of 3rd June, 1868, landlords and tenants enjoying its benefits may introduce into Spain all classes of instruments ("aperos") and agricultural machines, with the simple payment of 1 per cent. duty *ad valorem*. To obtain this benefit in cases where the Tariff establishes a higher duty, the proprietor or tenant must produce a certificate from the Alcalde of the locality, certifying that the articles are destined to be employed in lands, farms, or Colonies which have obtained and enjoy the privileges of the said law.

30. *Machinery, Straps, &c.*—In order that such articles should pay according to No. 207, it is necessary that the importer be a manufacturer, and that they are required for his industry.

31. *Foreign Vessels, Boats, &c.* ("Embarcaciones Estrangeras").—Nos. 214 to 217.—The following articles are comprised under these numbers: anchors, kedges, grappels, chains, barometers, chronometers, binnacles, binnacle lamps, compasses loose and fixed, speaking trumpets, telescopes, cooperage ("piperia"), rigging, tackle, cordage, ("jarcia"), sails, masts, yards, booms, &c., necessary for the manœuvres and safety of the vessel, &c., belonging to her class. Spare stocks of rigging, ropes, sails, masts, cordage, &c. ("jarcia," "velamen," and "arboladura"), will also be admitted without extra duty if in accordance with the requirements of the vessel.

This rule will also apply to carpetings, glass, and earthenware, &c., lamps, fixtures, furniture, and other articles of commodity and luxury, destined exclusively to the cabin service, the private use and defence of the vessel, in quantities proportioned to the destination of the same.

Under other circumstances the objects referred to in this note shall pay the duties fixed in the Tariff.

32. *Foreign Shipping.*—Nos. 214 to 217.—Duties on steam vessels (imported) shall be levied upon the total number of English tons which may result from the official measurement ("arqueo"), and no separate duty shall be levied on machinery which shall be considered an integral part of the vessel.

As a base for the measurement of ships introduced from abroad, the Certificate of Tonnage may be used provisionally, which, in conformity with Article 28 of the Regulation of the 2nd December, 1874, and the Royal Order of the 12th January, 1874, has to be delivered to the Collector of Customs, with the *visé* of the Captain of the Port of the place.

The parties interested must present to the Customs a certificate of the Captain of the Port, showing that the certificate of measurement has been approved by the Inspector, in accordance with Articles 29 and 32 of the said Regulations; and it is to be understood that the Customs will not consider the clearance and payment of the duties as finally settled until this formality has been complied with and noted.

Swedish, Austrian, English, and Italian vessels, which take the Spanish flag in Spain, and which have already been measured in their own country according to the Moorsen system, need not be re-measured in the ports of the Peninsula. The duties are to be levied on the number of cubic metres which may result from multiplying by the factor 2.83 the given number of English tons according to the ship's papers.

Spanish ships lengthened in foreign dockyards must on their return pay duty on their increased tonnage. Ships repaired abroad must, on their return to a port in Spain, pay duty on the materials employed for the purpose.

33. *Bottles ("Envases") for Aguardiente Liquors, Beer, Cyder, and Wines.*—Nos. 245 to 250.—These shall be separately assessed for duty according to the Tariff number.

34. *Harness, &c.* ("Talabarteria").—No. 190.—Shall be understood as articles of harness, saddles, bridles, reins, gear ("mouturas y arneses") of horses, mules, stables of all classes, travelling objects, such as bags, portmanteaus, trunks, hat-boxes, and other articles composed of leather, or lined with leather or skin ("piel").

35. *Sword Canes ("Bastones con estoque").*—No. 264.—These shall pay the duties fixed for their foils and blades, as well as those fixed for canes and sticks without blades.

36. *Lace ("Pasamaneria").*—Numbers 279, 280, and 281, Rule 5.—Goods shall be assessed as "pasamaneria" of silk which contain more than 40 per cent. of that material. As "pasamaneria" of wool when they contain more than 40 per cent. of wool, or of wool and silk. The tare of 10 per cent. allowed by Rule 5 on "pasamaneria" mounted on wood or card-board, slips, or rollers, paste-board, or other analagous material, but not textile like cotton, is on the net weight of the "pasamaneria," that is without the folding-board, card-board, papers, strings, ribbons ("cintas"), or anything which may not be the lace and work.

37. *Estuches* (Cases for jewellery, cutlery, &c.).—These referred to in Nos. 269 and 270 pay the duties fixed therein, even when they come empty.

38. *Various*.—The articles which pay duty under general headings in this Tariff, as, for example, manufactured wood ("madera labrada"), manufactured metals ("metales obrados"), gums, elastics, &c., made into any class of objects ("goma labrada"), are only those not otherwise specially mentioned.

39. *Leads and Litharges*.—Nos. 4 and 5 of Export Duties.—Shall be understood as "plomo" or "argentíferos litharges" those which contain over 40 gramos of silver to each 100 kilogrammes of lead.

40. *Minerals and Metals*.—Nos. 3, 4, and 5 of the Export Tariff.—For clearing minerals and metals paying duties on exportation, the following rules shall be observed:—

- (1.) If the exporter declares them as "galenas" (sulphurets of lead, be they argentíferous or not), the examination and assessment for duty shall be made in accordance with the Ordenanzas of the Renta, the examiners taking care to take proof of the weight with the least molestation to the trade.
- (2.) When they are declared as leads and litharges not argentíferous, after examination and weight, samples ("muestras ó bocados") shall be taken in duplicate, marked and sealed duly, the wrapping signed by the Administrator, the examiner, and the exporter. One of these shall be sent to the Ingeniero Jefe of Mines of the province to which the Customs belongs, or of the nearest mineral district, in case there are no means for a formal assay to be made. The duplicate shall be kept in the Custom House for proof in the due time.
- (3.) If the assay results in showing that the leads and litharges have not the amount of silver expressed in Note 39 to qualify them as argentíferous, they shall be exported free of duty. If, on the contrary, they prove to be argentíferous, they shall pay the corresponding duty and surcharge.
- (4.) The Collectors of Customs may permit exportation pending the result of the assay, when the exporter gives guarantees for payment of duties, and penalty for inexactitude in his declaration.
- (5.) Inaccuracies of description shall be fixed in accordance with the Ordenanzas.

SPECIAL TARIFF for Material cleared by Railway Companies comprehended in Article 34 of the Budget Law for 1877-78.

## Notices.

1. The country of production, and the place of direct export, must be established according to the Customs Regulations.
2. Clearing, payment of duty, &c., on the introduction of tobaccos, shall be in conformity with Appendix 29 of the said Customs Regulations.

## Royal Order.

To the Director General of Customs.

Your Excellency,

The Royal Decree of the 17th instant having authorized the publication of the new Customs Tariff, His Majesty the King has been pleased to resolve that it shall take effect in the Peninsula and Balearic Isles on the 1st August, 1877, in respect of the part not yet carried out by anterior orders given for the fulfilment of the existing Budget. There is no exception as to articles surcharged and imported by sea than that provided for in Article 37 of the said Budget, viz., that the surcharge shall not be made on merchandises and vessels which left their ports of departure, and can prove it by their papers, before the promulgation of the Budget Law.

By Royal Order, &c.

Madrid, July 21, 1877.

(Signed) OROVIO.

To the Director General of Customs.

Your Excellency,

In view of the report as to the advisability of using or not the authority which the present Budget Law vests in the Government to impose a surcharge on the import duties on the produce of America and Asia coming from foreign depôts in Europe:

Whereas the spirit of the authority has no tendency in favour of the interests of the Treasury.

Whereas the principal products of foreign America already come chiefly directly to the Peninsula without the necessity of differential duties, and with the benefit which commerce derives by obtaining them in the place of their production:

Whereas from the moment that foreign ships, in consequence of the suppression of the differential duty on the flag, can trade directly with the same advantages that may be established for Spaniards, competition remains open to shipping of all nations, that which offers the most advantages obtaining the greater trade without any special benefit accruing to Spanish ships:

His Majesty the King, in conformity with your Excellency's proposals, has resolved not to use the authority vested in the Government by Article XXXVI of the actual Budget Law.

By Royal Order I inform you of the same, &c.

God guard, &c.

(Signed) OROVIO.

## No. 2.

## REPORT BY SIR J. WALSHAM ON THE REVISED SPANISH TARIFF OF 1869.

BEFORE examining the changes which, in accordance with the Budget Law of 1877-78, voted by the Cortés on the 11th July last, have been introduced into the Customs Tariff of 1869, it may perhaps be as well if I say a few words with respect to the Spanish system as it existed previously to that year.

Taking, as a starting point, the year 1860, which witnessed a radical change in the commercial policy of the United Kingdom, it will be found that the principle of imposing a differential duty on merchandise imported into Spain in foreign vessels or by land still existed in full force at the above period. The differential duty was fixed at 20 per cent. of the value of the articles so imported, but it would be increased if necessary.

In addition to this duty, foreign raw materials, which were not produced in sufficient quantity in the country itself to meet the requirements of native industry, had to pay high *ad valorem* duties ranging from 1 per cent. to 14 per cent., while raw materials, similar to those which were abundant in Spain, and capable of entering into competition with the latter, were subjected to a charge of 20 per cent. to 50 per cent. of their value. In the same way, foreign articles of consumption, which native industry did not furnish, paid an *ad valorem* duty ranging up to 15 per cent., and in certain special cases reaching 20 per cent.

There were, besides, several articles of foreign produce or manufacture, the introduction of which into Spain was prohibited, such, for instance, as fire-arms, projectiles, munitions of war, gunpowder, quicksilver, hydrographic charts published by the Marine Department and reproduced abroad, maps and plans, the copyright privileges connected with which had not yet

yet terminated; reprints of Spanish authors, if not introduced by the authors themselves, and a few other articles not necessary to be mentioned. The prohibition on some of those I have enumerated still continues.

I have extracted the above details from the Spanish Tariff of 1865, which, based on that of 1849, had been revised by order of the Cortés and sanctioned by Royal Decree in the usual form before any change of Tariff can be carried into effect.

Up to the year 1865 the differential (flag) and protective duties, as well as the prohibitions, were applied equally and without distinction to the produce of all countries alike. But in that year a short Commercial Treaty was concluded between France and Spain on the 18th of June, and ratified on the 22nd of July following.

To this Treaty were annexed the two following special Tariffs, containing the list of articles which would be imported by each of the Contracting Parties into the territory of the other, free of duty, or at a lower rate than that which was fixed for similar articles, the produce and manufacture of other countries.

It is true that the list of these articles was not a long one either; still, until 1868, France became the sole privileged nation as far as they were concerned.

TARIF (A) annexé à la Convention conclue le 18 Juin, 1865, entre l'Espagne et la France.

Les droits, à l'importation en Espagne des produits ci-après mentionnés d'origine ou de manufacture Française, sont fixés ainsi qu'il suit :—

Articles du Tarif Espagnol en vigueur en 1865.		Bases.	Droits.
90	Manches ou bâtons d'ivoire ou de nacre, travaillés, avec ou sans montures en argent, pour soutenir les plumes ou pour broder ...	Le 100	Rs. 3. 100 00
91	Manches d'os ou de bois travaillés ou non ...	Idem	4 00
164	Quincaillerie commune en cuivre, pièces, terminées, telles que plats-à-barbe, brasiers et leurs pieds, bassinoires, casseroles, chocolatières, porte-manteaux, cuvettes, marteaux de portes, manivelles, moules ou matrices pour caractères d'imprimerie, verroux, loquets, fourchettes, poignées de sonnettes, gonds, ou autres pièces semblables, quoique vernies ou peintes, en alliage de cuivre, zinc ou autre, et celles dites alpaca et plak-fond ...	Le kilog.	5 10
175	Agrafes en fil métallique, de fer ou de laiton, argenté ou non, y compris la tare ...	Idem	4 00
200	Curis en poil, d'ânes, de chevaux, de buffles, de phoques, ou de vaches, non tannés, secs, salés ou non; peaux de ces mêmes espèces d'animaux d'un an ou au-dessus, ou morts-nés, provenant d'Europe ou d'Afrique ...	100 kilog.	50 00
231	Essences de toutes autres sortes ou fruits pour liqueurs, parfumerie ou autres usages, y compris la tare ...	Le kilog.	3 60
280	Chevaux Hongres dépassant la marque, quelque soit leur âge ...	Par tête.	450 00
281	Chevaux entiers ou Hongres et juments ne dépassant pas la marque, quelque soit leur âge ...	Idem	120 00
290	Mulets et mules jusqu'à 1 an ...	Idem	60 00
297	Mulets et mules de plus de 1 an ...	Idem	90 00
398	Objets de gomme élastique travaillée sous toutes formes, vulcanisés ou non, et non spécifiés dans les autres articles du Tarif ...	Le kilog.	9 00
590	Quincaillerie commune en laiton, sans être vernie ni dorée, en pièces achevées, comme plats-à-barbe, brasiers et leurs pieds, bassinoires, casseroles, chocolatières, porte-manteaux, cuvettes, lampions, marteaux de portes, manivelles, verroux, loquets, poignées de sonnettes, gonds, au autres pièces semblables pour ornements et garnitures ...	Idem	5 10
630	Produits végétaux, tels que gommes, résines, gommes-résine, huile de résine au térébenthine, et autres produits analogues non spécifiés dans les autres articles du Tarif, et les matières végétales telles que racines, tiges, au plantes et feuilles, fruits, fleurs, graines, et écorces destinées à l'industrie et à la médecine non spécifiés dans le Tarif ...	Idem	0 50
642	Chapeaux et bonnets non montés de feutre, de castor, de poils, de jone, et de palme	Pièce	4 00
	Objets pour habillement ou autres usages, sans coutures, en tissu de coton, rendus imperméables au moyen de bains de gomme élastique ...	Le kilog.	9 00

(L.S.) (Firmado) HENRI MERCIER DE LOSTENDE.

TARIF (B) annexé à la Convention conclue le 18 Juin, 1865, entre l'Espagne et la France.

Les droits, à l'importation en France des produits ci-après dénommés d'origine ou de manufacture Espagnole, sont fixés ainsi qu'il suit :—

	Bases.	Fr. c.
Fruits de tables, frais, citrons, oranges, et leurs variétés ...	100 kilog.	2 00
Huile ordinaire d'olive ...	Idem	3 00
Eau de vie en bouteilles, et liqueurs, sans distinction de degrés, non compris les droits de consommation ...	Hectol.	15 00
Mercuré natif ...	100 kilog.	Exempt
Jus de réglisse ...	Idem	4 00
Soies gréges... ..	Idem	Exemptes
Cuivre en barres ... ..	Idem	Exempt
Plomb en masses brutes ... ..	Idem	Exempt
Cochénille ... ..	Idem	Exempte
Fruits secs ou tapés, fruits confits, fruits conservés sans sucre ni miel ... ..	Idem	8 00
Livres imprimés ... ..	Idem	Exempt
Soie à coudre ... ..	Idem	Exempte
Tissus de laine, bas et draps ... ..	Ad valorem	10 pour cent.
Nettes et tresses de sparte... ..	100 kilog.	1 00

(L.S.) (Firmado) HENRI MERCIER DE LOSTENDE.

In 1868, that is to say, one year before the Spanish Tariff which has just been revised came into operation, a Commercial Treaty was concluded between Germany and Spain, the former of which then became entitled to the advantages to be derived from the French Treaty. Subsequently

Subsequently to 1869 similar Commercial Treaties have been concluded between Spain and other countries, amongst them Switzerland, Belgium, Italy, Austria, Norway and Sweden, and Holland, and each of these countries now enjoys the benefit of the Tariff annexed to the French Convention of 1865, which is still in force.

As, however, the privileged duties of some of the articles in that Tariff were still further reduced in the Spanish Tariff of 1869, it is only in cases where these duties are still lower than those in the Spanish Tariff that any advantage can at present be obtained from a participation in them. The state of things, therefore, before 1869, the year in which the present Spanish Tariff came into operation, was as follows:—

Up to 1865 all nations were subject to the differential duties imposed by Spain on articles of foreign produce or manufacture imported in foreign vessels or by land. Between 1865 and 1869 France obtained certain privileges as regards Customs duties which were enjoyed by Germany in virtue of her Treaty with Spain of 1868.

In 1865 the differential duty on foreign goods entering Spain by land was abolished in favour of France, that on similar goods imported in foreign vessels continuing to exist for all nations alike. It will only be necessary for me to state here, that neither previously nor subsequently to 1869 have British produce and manufactures been permitted to profit by the advantages accorded to French produce and manufactures in virtue of the Treaty of 1865, and afterwards extended to the produce and manufactures of several other countries; the alleged ground for such exclusion being that under our ancient Treaties with Spain we could not claim "most-favoured nation treatment," although from 1860 Spain had been receiving, as she has continued to receive, precisely the same treatment with respect to the liberal charges introduced into our own Customs Tariff as had been accorded to other nations.

Having now stated what the position of foreign commercial relations with Spain was before 1869, I will endeavour to explain the Tariff system introduced into this country in that year, as otherwise the object and meaning of the alterations which have now been made might be misunderstood, and an impression created that an entirely new Tariff has recently come into force; whereas many of the changes are held by the Government to be in accordance with the provisions of the Law under which the Tariff of 1869 was established, although it is very doubtful whether, looking to the stipulations of certain Treaties concluded with Spain, and to which I shall have occasion to allude later on, the Spanish Government was justified in proposing or the Cortés in sanctioning them.

On the 22nd of November, 1868, the year of the revolution, and when General Serrano was head of the State, a Decree was published bearing the signature of the Minister of Finance, Signor Figuerola, giving the reasons of the Government for considering that the time had arrived for abolishing the differential (flag) duty on foreign goods imported in foreign vessels or by land.

The extinction of this duty was to be gradual. It was to commence on the 1st of January of the following year, and from and after the 1st January, 1872, the duty was to cease altogether.

The provisions of this Decree were faithfully carried out, and since the year 1872 there has been no difference made between goods imported in foreign vessels and these carried by Spanish ships.\*

We now come to the Tariff of 1869.

By the 9th Article of the Budget Law of that year, which was voted by the Cortés on the 1st July, the Government was empowered to reform the Customs Tariff then in existence, which, as I have stated above, was based on the old Tariff of 1849.

It will be necessary to allude to some of the conditions on which the reform was to be effected, as I shall have to refer to them in connection with the alterations that have now taken place.

1. All foreign merchandise was to be admitted into the Peninsula and the adjacent islands with the exception of articles the introduction of which into the country might be prohibited by the Penal Code, or by the laws for the protection of public security, or by those relating to Government monopolies.

2. The export of any kind of native produce whatsoever, whether natural or artificial, was to be allowed.

3. The impost to be levied on the several classes of merchandise specified in the Tariff was, as formerly, to be called a Customs duty; and for determining the amount, the calculation was to be made in the following manner:—For goods on which, under the old Tariff, a protective duty had been levied in addition to the differential (flag) duty, the amount of the new duty would be fixed by taking from 15 to 30 per cent. of their estimated value, and up to 35 per cent. in the case of goods which, formerly prohibited, were then to be admitted, or which, from their great value or from the fact of their being required for general consumption, though not of absolute necessity, would bear a duty representing from 15 to 35 per cent. of their value. The above duty for all purposes of the Tariff, and for facilitating future calculations, was to be termed "extraordinary."

For all other goods the new Tariff duty was to be represented either by an amount ranging up to 15 per cent. of their estimated value, and to be called "fiscal," or by a trifling amount to be fixed by the Government on the unit of quantity, weight, or measurement.

The last-named duty was to be called "balanza."

The Government was to determine what goods were to pay the "fiscal," and what the "balanza" duty.

4. The duties called "extraordinary" were to remain unaltered for six years after the publication of the Tariff, 1st July, 1869, and from 1st July, 1875, to be gradually reduced during the succeeding six years until they reached the maximum of the "fiscal duty," viz., a duty representing 15 per cent. of the estimated value of the goods.

I may mention that the articles in the Tariff before which the letter (a) stands are those on which a duty above 15 per cent. (maximum of fiscal duty), but under 20 per cent. of their value, was levied in 1869.

The articles preceded by (b) are those on which a duty above 20 per cent. of their value was fixed at the same period.

An asterisk before any article in the Tariff shows that such article pays the "balanza" duty.

The duties on the remaining articles, which have no sign before them, are those which, in 1869, were fixed at an amount under the maximum of the "fiscal" duty (15 per cent.); or are special duties, and were or were not to be reduced after the 1st July, 1875, as the Government might determine.

In the Budget Law of July 1, 1869, which authorized the formation of the Tariff of that year, there is not the slightest indication that when the time came for reducing the duties to which I have already alluded, the benefit of the reduction was to be extended only to the produce and exports of certain countries; on the contrary, it is quite clear that there was to be no distinction. It so happened, however, that in the treaties concluded with Belgium, Italy, and Austria, in 1870, the Tariff of 1869 was annexed to and formed an integral part of them, Spain in return enjoying the advantages of the conventional Tariffs of those Powers; and when the time approached for commencing the reduction of certain duties in 1875, as provided for by the Budget Law of July 1, 1869, the Spanish Government applied to the Governments of Austria, Belgium, and Italy for permission to postpone to a later period the reduction in question—their right to claim which, from and after July 1, 1875, was not disputed—on the ground that, owing to the state of the country during the six years which had intervened since the publication of the Tariff of 1869, native industry had been prevented from making sufficient progress to enable it to compete fairly with foreign produce if the duties on the latter were lowered.

Austria and Belgium consented to the postponement of the reduction for a term of ten years, i.e., till July 1, 1885, on condition that if Spain at any time during that period renounced their treaties, the reduction of the duties was to be given concurrently with the denunciation, and continue for a twelvemonth, the term during which the treaties would remain in force after they had been denounced.

Italy, however, preferred to withdraw from her Treaty the Spanish Tariff of 1869, and to fall back upon the most favoured nation clause for the treatment of all questions arising out of her commercial relations with Spain.

Such then was the state of things when the late Minister of Finance, Señor Barzanallana, submitted to the Cortés his financial scheme for 1877-78.

His Excellency, amongst other things, proposed that—

"The Government shall revise the values and classification of articles in the existing Tariff, and shall convert into fixed duties those now levied *ad valorem*, in accordance with the provisions contained in the last paragraph of Sections 7 and 8 of the Budget Law of July 1, 1869."

The last paragraph of Section 7 states as follows:—"The valuation of goods shall be effected by taking an average of the prices of articles at the points on the coasts or frontier where the duties are to be paid, and in all cases for the conversion of *ad valorem* into specific duties a certain sum shall be paid on the unit of weight, measurement, or quantity."

According

\* Except as regards the Colonies

According to the last paragraph of Section 8, "the revision of the classification of articles shall be made every three years, on the suggestion of the Director General of Customs, and in conformity with the decision of the Tariff Committee."

Señor Barzanallana further proposed in his scheme, "that the Government shall be empowered to impose a special surcharge ('recargo') on the import duties and navigation dues which are levied on the produce, vessels, and exports of countries that in any way especially harm our produce and our commerce, and also not to apply the reduction in the duties which may result from the revision in the Tariff to the produce and exports ('procedencias') of any other countries than those which concede to Spain most favoured nation treatment."

Those two proposals of His Excellency were voted by both Chambers, and became law on the 11th July last.

I should mention that the Government has not yet availed itself of the privilege of imposing the differential treatment alluded to in the first part of the second proposal, the extraordinary duty or surcharge which has actually been levied under the revised Tariff on the goods of all nations alike being of a different character, as I will explain later on. The Government has, however, availed itself of the privilege of excluding certain nations from the advantages of the reduced state of duties, and amongst them Great Britain, France, and the United States, the privileged nations being Austria, Belgium, Germany, Holland, Italy, Morocco, Norway and Sweden, Portugal, Russia, Switzerland, and Turkey.

I should also mention that the reduction of the duties, from participation in which Great Britain has now been deprived by an act of the executive power, is not the gradual reduction which was to take place six years after the publication of the Tariff in 1869, and which should have commenced on the 1st of July, 1875, but was afterwards postponed for ten years for the reasons I have given in another part of this report. The present reduction is a distinct matter; and, according to the statement made to the Cortés by the late Minister of Finance, when he introduced his scheme for the current year, is the result of a new assessment of the value of the articles which pay Customs duties, such assessment having been rendered necessary on account of the change in the market value of many of the articles since 1859, the price of some having risen, while in other cases it had fallen.

It was unfair, therefore, his Excellency considered, that, where the price had fallen, those who paid duties should be expected to pay the old rates; and equally unfair, when it had risen, that the Government should only charge the old rates. Under these circumstances, therefore, the Syndicate appointed for the purpose had revalued the articles, and affixed to each the duties which corresponded with the results of the fresh valuation—in some instances the duties having been raised, in others reduced.

In fact, this new valuation was a matter of general policy, and in no manner dependent on treaty obligations or conventional Tariffs. It was carried out because, in the estimation of the Minister of Finance, it would have been unjust to commerce on the one hand, and to the Spanish Government on the other, to leave matters as they were; and yet there had not been any hesitation whatever in levying upon British produce and manufactures the old rate of duties in every case where the revaluation has proved that such duties were unfairly high, and must consequently be reduced.

To show that the revision of the Tariff had nothing whatever to do with obligations contracted with Spain with those particular nations who now benefit by any change that may have been introduced into the Tariff, I need merely state that in every case where the old duties have been raised on account of the new valuation, the produce and manufactures of those same nations pay the higher duties equally with the like goods of the non-privileged nations, just in the same way as they pay the extraordinary duty or surcharge which, except in certain cases, is to be levied under the revised tariff upon the imports of all nations equally; and in those exceptional cases British merchandise would be no less exempt from the surcharge.

Consequently, there is not for privileged nations a special Tariff, with a reduced scale of duties from beginning to end and a general Tariff with the old rate of duties for other nations.

What has taken place is simply this: that the duties of the general Tariff, which came into force in 1869, and were applicable to all nations alike, have been revised according to a fresh valuation of the price of goods; and wherever a reduction has been deemed necessary, certain nations alone profit by it; but those same nations share equally with all others the disadvantage of any increase in those duties, wherever they have on the same principle been raised, their merchandise also equally pays the old rate of duties where neither reduction nor increase has taken place during the revaluation, and it is no less subject to the extraordinary duty or surcharge.

In other words, Spain has not a conventional and a general Tariff in the ordinary acceptance of these terms.

For an explanation of the reasons which have induced the Spanish Government to make this distinction between nations as regards the revised Tariff, I cannot do better than refer to the explanation given by the late Minister of Finance himself to the Cortés, when alluding to the changes he proposed to introduce into the Tariff.

His Excellency reminded the Chambers that there were certain nations which denied to Spanish commerce the same treatment they granted to the commerce of other nations, and imposed on it prohibitions and differential duties; and after going on to say that such a state of things would not be tolerated, Señor Barzanallana pointed out that some of these same nations, forgetful of the reforms which had been introduced into the Tariff of 1869, and ignoring the fact that this Tariff made no distinction between one nation and another, systematically refused to give to Spanish trade the benefit of conventions and special Tariffs, although they saw no objection to granting these favours to other countries. There were, he added, nations which imposed on Spanish wines differential duties based on the alcoholic test; and one important country, which had two Tariffs—the first containing a series of prohibitions, high duties, and surcharges; the second a conventional Tariff with limited duties and no prohibitions or exceptional charges—applied the first almost exclusively to Spain. It was absolutely necessary, therefore, to obtain from these countries, not exceptional privileges, but the same as were granted to other nations; and the only way of arriving at this result was to apply whatever reduction in any of the duties might be arrived at through the proposed revision of the Tariff, to the produce and exports of those nations only which, by conventions, placed Spanish commerce on most favoured nation footing; or which, without conventions, applied its Customs system to the commerce of Spain in exactly the same way and on precisely the same conditions as they applied it to the commerce of other countries, no distinction being made between any particular Spanish produce and similar produce of one or more countries.

If this proved insufficient to procure for Spanish commerce most favoured treatment, the Government should then be empowered not only to exclude from participation in the benefits of the revised Tariff any nation which injured that commerce, but also to impose upon their produce, manufactures, and ships, differential duties.

It will be seen from what I have stated in another place, that Señor Barzanallana's views were embodied in the Project of Law which His Excellency presented to the Cortés, and were subsequently approved by the Chambers.

In addition to the revision of the Tariff, as regards the increase or reduction of duties according to a revaluation of the articles on which they are levied, the Minister of Finance proposed, as one of the new taxes to be levied during the current year, an "extraordinary and transitory" duty or surcharge on the above duties, whether increased or reduced, to be calculated on the following principle:—

On all merchandise which paid a fixed duty equivalent to from 3 per cent. to 9 per cent. inclusive, of the estimated value of the article on which it was levied, the surcharge was to be 1 per cent. of that value, and on all merchandise which paid a duty equivalent to 10 per cent. and upwards of the estimated value, the surcharge was to be 4 per cent. of that value.

There was to be no surcharge on duties which represented less than 3 per cent. of the estimated value of articles, nor was it to affect either "textiles" or goods which were subject to the "Consumo" duty.

I have already explained that the articles in the Tariff before which (a) and (b) stand pay duties representing respectively to from 15 per cent. to 20 per cent., and from 20 per cent. upwards, of the estimated value of those articles, consequently it will be seen at once that on all these articles the surcharge would be 4 per cent. of this estimated value.

Besides this extraordinary duty of 1 per cent. and 4 per cent., calculated on the principle I have stated, and applicable respectively to most of the articles paying Customs duties, there are certain arbitrary surcharges on the following articles:—

Aguardiente (a sort of brandy) will, in addition to the Customs duty, pay a surcharge of 20 pesetas (1 peseta=1 fr.=10d.) the hectolitre.

Petroleum and other rectified mineral oils, as well as benzine, 12½ pesetas the 100 kilog., and they will also pay "Consumo" duties.

Table oil, 8 pesetas for 100 kilog.; cocoa-nut, palm, and other oils, except linseed, 20 pesetas for the same quantity.

Coal and coke, 2½ pesetas per ton, without any surcharge. The two latter paid formerly 1 peseta 25 c. per ton.

The late Minister of Finance had intended to impose an export duty of 4 per cent. on the wines from Xeres and Port St. Mary, and a similar duty of 2 per cent. on the ordinary wines of the country; but so great was the opposition he encountered from the wine-growers, that he was compelled to give up the idea, and to surcharge heavily the articles of foreign commerce I have just mentioned, in order to make good the receipts he expected to obtain from these export duties.

His

His Excellency considered that the wines would support such charges, and that in the necessitous state of the Treasury he was perfectly justified in imposing them; for, as his Excellency explained in his Address to the Cortés, the export of wines had in no way diminished, notwithstanding the high duties levied upon them in the countries to which they are exported.

I allude to this statement on the part of the Minister of Finance, because there seems to be a very general impression in Spain that—at all events, as far as Great Britain is concerned—differential duties are charged on Spanish wines, and that the alcoholic test was specially invented to injure the Spanish wine trade.

Yet, according to Señor Barzanallana's figures, the latest returns showed that the value of the wine exported from Xeres and Port St. Mary amounted to 62,933,168 pesetas, or over 2,500,000*l.*; and his Excellency might have added that most of this wine found its way into the English market.

The principal articles of British produce or manufacture which will be affected by the changes in the Tariff, wherever a reduction, in which they will not participate, has been made in the duties, as a result of the revaluation of these articles, are iron, steel, cottons, woollens, linens, and silk, in all their various branches, whether manufactured or otherwise. (Classes 2, 4, 5, 6, 7 of Tariff.)

A more considerable reduction has been made in the duties on silk goods than in those levied on cotton, linen, and woollen goods, and although there is a marked reduction in one or two instances with respect to the duties on cotton and woollen manufactures, the duties on linen, flax, and hempen articles have been, as a rule, but little changed.

With respect to the principal articles of cutlery, I do not observe that the duties have been altered.

Those on paper have been generally raised, but this will not affect England alone, for whenever an increase of duties on articles has resulted from the new valuation, British commerce will not suffer in competition with the commerce of other nations, as such increase will be equally applied to the produce and manufactures of all countries alike, as will also the "extraordinary" duty or surcharge, the favoured nations not being exempt from it.

From the revaluation of the articles paying Customs duties the Government expects to obtain a sum of 3,000,000 pesetas, or about 120,000*l.*, apart from what the surcharge will produce.

The amount to be derived from the 1 per cent. surcharge on merchandise which pays duties equivalent to from 3 per cent. to 9 per cent. of the estimated value is calculated at 1,375,000 pesetas, or about 55,000*l.*, and the 4 per cent surcharge on merchandise paying duties equivalent to 10 per cent. and upwards of the estimated value, together with a similar surcharge on tobacco introduced by private individuals (these being a Government monopoly), will, it is supposed produce 7,092,273 pesetas, or about 283,690*l.*

Before the Tariff was revised, many of the materials required in the construction of railways were, under circumstances, admitted free of duty. These materials will in future pay the duties specified in the subjoined Table, while others employed for the same purpose, but not mentioned in the Table, will pay the duty set down for them in the general Tariff.

Partida.	Unit.	Duty.
1 Rails of iron and of steel ... ..	100 kilog.	2 30
2 Fish-plates ... ..	"	2 20

15 Iron buffers for carriages and waggons ... ..	"	5 50
16 Tires of iron for the same ... ..	"	3 80
17 Pieces of iron for bridges, crossings, &c. ... ..	"	2 84
18 Turn-tables ... ..	"	3 10
19 Carriages—		
1st Class ... ..	One	900 00
2nd Class ... ..	"	700 00
3rd Class ... ..	"	500 00
20 Waggons and trunks of all classes ... ..	"	300 00
21 Copper tubes ... ..	100 kilog.	27 50
22 Spiral springs of steel ... ..	"	9 60

The above duties will be the same for all nations.

With respect to the conversion of *ad valorem* into specific duties in the revised Tariff, I am unable to say whether the latter represent a correct equivalent to the former, as the Table of Estimated Values used for the revision of the Tariff duties has not yet been published.

The *ad valorem* duties in the unrevised Tariff were, however, comparatively few.

There are the same number of classes and groups of articles in the revised as there were in the unrevised Tariff. In some instances, however, the arrangement has been changed; that is to say, some articles formerly in a particular group have been removed to another, while others which had formerly a distinctive Tariff number (partida) attached to them, now come under the number of a series of articles similar to them in kind; and sometimes, on the contrary, articles have been taken out of a particular series and placed by themselves in the group.

I regret that, owing to great pressure of business connected with this revision of the Tariff and with current work, I have not been able to draw up, as I had hoped to do, a comparative statement showing how the principal articles of British commerce will be affected by the recent alterations in the duties, but I prefer sending my report as it is to waiting until I have time to prepare such a statement.

The object of the revision of the Spanish Tariff has been twofold; first, that of increasing the revenue of the country, and then that of enabling the Spanish Government to have the power of withholding from certain nations any advantages that might be derived from the benefits of revision, on the ground that those nations do not accord to Spanish commerce the same treatment that they allow to the commerce of other countries. It is perhaps unnecessary to state, that in the Address of the late Minister of Finance to the Cortés, when introducing the Estimates of the current year, an extract from which I have given in another part of this Report, his Excellency referred to Great Britain and France when alluding to two nations which denied to Spanish commerce "most favoured treatment."

If there ever would have been any doubt on the subject, it has been now cleared up by the treatment these two nations have just received.

As regards Great Britain, it is contended that differential duties are imposed on Spanish wines, and that consequently British commerce cannot expect to receive better treatment in Spain. Inasmuch, however, as this is not a fact, and as Spanish produce and manufacture enjoy under the Customs Tariff of the United Kingdom precisely the same treatment as the produce and manufactures of all other countries, it is difficult to understand upon what principle British commerce has been denied the advantages of the revised Tariff, more especially as the law under which this Tariff was allowed to be revised distinctly stated that those advantages would be refused to those nations only which did not concede to Spanish commerce the same treatment as they gave to the commerce of other nations.

Madrid, August 11, 1877.

JOHN WALSHAM.

1877-8.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

CAPTAIN COOK STATUE.

(LETTER FROM AGENT GENERAL.)

*Ordered by the Legislative Assembly to be printed, 13 December, 1877.*

The Agent General for New South Wales to The Colonial Secretary.

Sir, London, 3, Westminster Chambers, Victoria-street, S.W., 18 October, 1877.

With reference to my despatch, No. 231/77, of the 31st May last, relative to the Cook Statue, I have now the honor to inform you that on the 10th instant Mr. Woolner intimated to me that the full size model of the Statue was ready for my inspection. I therefore visited Mr. Woolner's studio on the 16th instant, and so far as I can judge the work seems admirably executed and calculated to do credit both to Mr. Woolner and the Colony.

The second instalment of £1,000 has now been paid in accordance with the instructions contained in your despatch, No. 77/1,198, of the 21st March last.

Mr. Woolner hopes to complete the statue in about six months. He thinks that he may be able to arrange for its exhibition for a few weeks in a prominent situation in London, as is sometimes done with similar works of art whose eventual destination is beyond the United Kingdom; and I would suggest that you should grant permission for the slight delay which would thereby be involved, say for a period not exceeding two months.

I have, &c.,

WILLIAM FORSTER.

1877-8.

## LEGISLATIVE ASSEMBLY.

## NEW SOUTH WALES.

## CASTINGS FOR HARBOURS AND RIVERS DEPARTMENT.

(PAPERS RESPECTING SUPPLY OF.)

*Ordered by the Legislative Assembly to be printed, 12 February, 1878.**(Laid upon Table in accordance with promise in answer to Question 6, Votes No. 24, 12 Feb., 1878.)*

## HARBOURS AND RIVERS DEPARTMENT.

TENDERS FOR CASTINGS, 1878.

*Abstract of Tenders.*

	Sydney.		Hunter River.
1. James Ellis ...	2½ %	under Schedule rates.	
2. Davy & Co....	10 %	do.	
3. J. S. Rodgers	...	...	at Schedule rates.
4. Mort & Co....	7½ %	do.	
5. Morison & Bearby	...	...	5 % under.
6. Alexr. Rodgers	...	...	10 % over.

## Mr. Hoey to Engineer-in-Chief.

Sir,

In reference to Davy & Co.'s tender for Castings for 1878, I have the honor to report that, in consequence of the great distance at which Davy & Co.'s Works are from Fitz Roy Dock, much inconvenience and loss of time would frequently arise, in cases where castings were urgently required, and considerable expense would be incurred in conveying orders and patterns to them. Although the firm have a good reputation for the quality of the work produced by them, for the above reasons I do not think it would be to the advantage of the Public Service that their tender should be accepted.

From the proximity of Mort & Co.'s Works to Fitz Roy Dock, and the facility of communicating with them, together with the quick delivery of castings in urgent cases, I consider that, should their tender be accepted, a much greater saving would arise than the amount that their tender is in excess of that of Davy & Co.'s. I would therefore respectfully recommend that their offer be accepted.

I have, &c.,  
JAMES HOEY, 3/1/78.

## Minute of Engineer-in-Chief.

ALTHOUGH Mort's Dock and Engineering Co.'s tender is not nominally the lowest, yet, for the reasons set forth in the accompanying memorandum, 78/44, in which it is, I think, clearly shown that that tender will practically be the lowest, and most to the interest of the Government to accept, I beg to recommend its acceptance accordingly. The tender of Messrs. Morison & Bearby is the lowest for the Hunter River District; and as it appears these gentlemen gave great satisfaction as contractors last year (see 77/4,880), I beg to recommend their tender for acceptance for the Hunter River District.

E. O. MORIARTY, 16/1/78.

Mr. Moriarty's recommendation approved.—J.S., 18/1/78.

## Telegram from Mr. Darley to Engineer-in-Chief.

I CAN confidently recommend the acceptance of Morison & Bearby's tender for castings; they gave the greatest possible satisfaction this year.

31st December, 1877.

*No alteration whatever to be made in the Printed Prices ; the percentage to be general on the whole.*

SCHEDULE OF PRICES FOR THE SUPPLY OF CASTINGS, FOR THE SERVICE OF THE HARBOURS AND RIVERS DEPARTMENT.

All persons tendering are requested to notice the following directions :—

THE person who submits a tender is to fill up the undertaking at the end of the list of prices, stating at how much per cent. above or below the prices inserted in the Schedule he is willing to contract for the supply of Castings, &c., that may be required, to which he is to sign his name ; he is also to give his address, and the names, professions, and places of residence of his proposed bondsmen.

The contractor is to make out his account in duplicate on the Government Forms, not later than the 3rd (third) of each month, at the printed prices, and add or deduct from each article the percentage according to his tender.

NOTE.—Parties tendering are *particularly requested to observe* that they must name only one rate of percentage above or below *all* the prices in the Schedule, and they must not give one rate of percentage upon the prices of certain of the items and another rate upon others.

*General Conditions.*

1. All articles included in this contract must be supplied in such quantities and at such times as may be required, from the 1st January next to the 31st December, 187 .

2. All articles which may be required for use or delivery in Sydney or at the Fitz Roy Dock, and in the Hunter River District (see clause 8), or on any vessel in Port Jackson or the Parramatta River, must be delivered where directed free of cost ; but to any other part of the Colony the freight or carriage to be charged, in addition, by the contractor.

3. Samples will be required in all cases where practicable, unless some special and satisfactory reason be assigned.

4. All articles must be of the very best quality, according to sample, where samples may have been furnished, and are to be subject to the approval of the Engineer-in-Chief, or his authorized subordinate ; and in case of any dispute as to the quality of such articles, or as to any other matter in connection with the contract, the decision of the Engineer-in-Chief shall be final.

5. In the event of there being any unnecessary or unreasonable delay in executing any order under the contract, the articles so ordered, or any portion of them, may be purchased by the Engineer-in-Chief, at his discretion, and in such manner as he may think best for the public interests ; and in the event of any loss being suffered by the Government by reason of such articles not having been duly and promptly supplied as aforesaid, the amount of such loss may be deducted by the Engineer-in-Chief from any moneys that may be due or that may become due to the contractor in respect of his contract.

6. The Secretary for Public Works reserves to himself the right to annul the contract at any time, on giving three months' notice in writing to that effect, should he not be satisfied with the quality of the articles, or with the manner in which his orders may have been executed.

7. Payments will be made not oftener than once in every month, but only on the certificate of the proper officer that the articles have been supplied according to contract.

8. Separate tenders to be sent in for the supply of Stores in the Hunter River District, to be delivered free of cost.

9. The contractor will have to pay all stamp duties required under his contract.

10. The person whose tender may be accepted is to enter into a bond, with two eligible sureties, jointly and separately, to be bound under a penalty of one hundred pounds for the due performance of this contract.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

COLORADO BEETLE.

(CORRESPONDENCE.)

*Ordered by the Legislative Assembly to be printed, 21 May, 1878.*

The Agent General to The Colonial Secretary.

Sir,

London, 3 Westminster Chambers,  
Victoria-street, S.W., 28 March, 1878.

I have the honor to inform you that having, in compliance with the instructions contained in your despatch, No. 78-597, of the 22nd January last, addressed the Clerk of the Privy Council, by letter dated 20th instant, of which a copy is enclosed, with a view to obtaining for you all the information procurable respecting the Colorado beetle, I have to-day received a reply, dated 27th instant, a copy of which, with all the enclosures therein detailed, is forwarded herewith.

Should I be able to obtain any further information on the subject from the Royal Agricultural Society, as suggested in the latter part of Mr. Lennox Peel's letter, it will be at once transmitted to you.

I have, &amp;c.,

WILLIAM FORSTER.

Secretary for Lands.—M.F.      The Under Secretary for Lands, B.C., 13 May, 1878.—M.R.A.

The Agent General to The Privy Council Office.

Sir,

3 Westminster Chambers, S.W., 20 March, 1878.

Having been instructed by my Government to obtain as early as possible, and to forward for their use, all the information procurable respecting the Colorado beetle, I have the honor to request that you will be good enough to furnish me with such reports and papers on this subject as have been prepared under your directions, and that you will also be good enough to refer me, if convenient, to such other reliable sources of information as you may be able to recommend.

I have, &amp;c.,

WILLIAM FORSTER.

The Privy Council Office to The Agent General.

Sir,

Council Office, 27 March, 1878.

I have submitted to the Lord President of the Council your letter of the 20th instant, in which you request to be furnished, for the use of the Government of New South Wales, with all the information that can be supplied by this office on the subject of the Colorado beetle.

His Grace has instructed me to transmit to you copies of the following documents, viz. :—

1. A Return made to the House of Lords on the 13th August last.
2. "The Destructive Insects Act, 1877."
3. "The Colorado Beetle Order, 1877," and "The Colorado Beetle (Customs) Order, 1877," and—
4. A circular issued by the Commissioners of Her Majesty's Customs on 24th August last, together with a notice referred to in that circular.

It is inferred, from all the information which has reached the Lords of the Council, that "Paris green" is considered the most successful of the various means which have been resorted to for the destruction of the Colorado beetle.

I may add, that "Paris green," better known in England as "Scheele's green," is a preparation of a most virulent poison, and that the greatest possible care is required in its use, in order to reduce to a minimum the risk of absorption of the poison into the system, through the nose, mouth, or pores of the skin.

It is possible that you may obtain further information on the subject by making application to the Royal Agricultural Society of England, at 12, Hanover Square.

I am, &amp;c.,

C. L. PEEL.

COLORADO

## COLORADO BEETLE.

RETURN to an Address of the House of Lords, dated 10th August, 1877, for Copy of the Report of the Canadian Minister of Agriculture on the Colorado Beetle, and Copies or Extracts of any other Papers on the subject.

Council Office, 13th August, 1877.

C. L. PEEL.

MEMORANDUM of the Canadian Minister of Agriculture upon reference of a despatch of the Secretary of State for the Colonies, on the subject of the Colorado Beetle.

THE undersigned, in accordance with a request of the Secretary of State for the Colonies, having carefully examined the despatches of Lord Carnarvon, respectively bearing date the 3rd of March, 1875, and the 28th of August, 1876, has the honor to report as follows:—

The occasion of considering measures for the prevention of the introduction of the Colorado potato beetle into other countries from Canada has not yet presented itself, and the information from the German authorities, conveyed to Her Majesty's Minister at Berlin, on the capture of the insect on board ships and at Bremen, as well as other information given by newspapers relative to its introduction into Sweden, shows that the beetles had come from the United States, having been shipped at ports the neighbourhoods of which were invaded by them.

The document furnished to Her Majesty's Minister at Berlin, a copy of which forms part of the despatch of the 28th August last, contains the following remark:—

"It may be considered an almost insoluble problem in regard to transatlantic ships' traffic to prevent by more extensive supervisory measures the introduction of these beetles in Europe."

The difficulty thus foreseen by the German authorities cannot but be self-evident when the habits and modes of progression of the insect are examined: for not only does it move by flying, and by navigating, so to speak, smooth water, but also travels on common vehicles, railway carriages, and platforms, on decks of vessels, &c., especially during the months of August and September.

In localities fully invaded the beetles may be seen creeping on side-walks, bridges, and wharves, crawling up buildings, occupying fences, lodging themselves in every crevice, penetrating houses and dwellings, ascending and occupying vehicles of all sorts, finding their way into boats and vessels, placing themselves on any and every article, and being found alive after a long sojourn in situations where there would seem to exist no chance for them to find any subsistence.

Such a short but correct *exposé* of the habits of the beetle as connected with the possibility of its penetrating almost anywhere, and by almost any means of transport, renders indeed insoluble the problem of absolutely preventing its inroad into new fields of devastation, no matter how remote or by what obstacles they may be separated from the regions already invaded.

It may be remarked in this respect that potatoes and their covering are neither more nor less apt to harbour the insect than anything else.

But if the absolute repelling of the invader is unfortunately beyond reach, the extent of the disaster is fortunately in a very great measure under control, involving, of course, care and expense.

The remedies which necessity has taught on this side of the Atlantic are such as to require for their application the joint effort of the community at large, kept alive to its interests and duties by the authorities, and men of devotedness to the common welfare.

These remedies are,—

- 1st. Searching for and crushing every potato beetle wherever found.
- 2nd. Frequent visits to the potato fields, and searching for the eggs deposited on the under side of the leaves of the potato vine; and
- 3rd. Watching for the presence of the larvæ on the buds and on the leaves of the plant, in order to destroy them by means of *Paris green*,—the only substance yet discovered to be effectually operative on a large scale for the destruction of the insect in its larva state.

By these means, and by these means only, the invaded American States and the western part of Canada have been able to secure potato crops in a measure commensurate with the care and energy bestowed, and by similar means only can the invasion be retarded and lessened in its effects.

No measure has been taken in Canada, for reasons given, to prevent the falling or creeping of individual insects on board ships loading in Dominion seaports.

There is, however, almost a certainty that the environs of Montreal will be invaded next year; and, with that prospect in view, general orders may be given to public officers and *employés* of the ports to look for and destroy any beetles which might be observed on the wharves, on sheds, on packages of goods to be embarked, or on board ships. A general appeal might also be made to all persons having to deal with the shipping, for assistance, in the execution of such preventive measures.

The undersigned respectfully recommends the adoption of such precautions, beyond which he does not see that there is anything within the power of the Canadian Government to do.

The whole respectfully submitted.

L. LETELLIER.

Department of Agriculture, Ottawa, 6 October, 1876.

For drawing of the Colorado beetle, see annexed.\*

\* See Appendix, No. 1.

Dr. J. Macdonald, of Ontario, to The Secretary of State for the Home Department.

"Sir,

"London, Ontario, 24 May, 1877.

"With reference to the instructions which have been issued to the Commissioners of Customs on the subject of the Colorado potato beetle, I beg to suggest, as a superior means to enable the officers of Customs to ascertain its identity, that they be provided with these insects preserved and enclosed in small glass cases. And, with a view to aid in carrying out this suggestion, should you think favourably of it, I shall, with this communication, enclose a few specimens which I have prepared.

"I could furnish any number of such preparations. The country around this town is swarming with the beetle in question.

"I am, &c.,

"J. MACDONALD, M.D.,

"Drawer B 35, Post Office, London,

"Ontario, Canada."

"P.S.

"P.S.—It might be productive of good results were preparations, such as those I have sent, distributed to landlords, holders of land, and to all parties having a direct interest in preventing the Colorado beetle from establishing itself in the United Kingdom. So doing would, no doubt, facilitate its detection should it unfortunately be introduced, and, as a matter of course, its prompt destruction. It is a well known fact that this insect increases with extreme rapidity.—J.M."

Telegram from Mr. H. MacDonell.

"Berlin, 27 June, 1877.

"MINISTRY of Agriculture as yet possess no reliable information respecting appearance of Colorado beetle at Mülheim. They have sent Professor Gerstaker, entomologist, to investigate and report. Papers state Professor Foester, of Aachen, has pronounced the insect to be the Colorado beetle. Shall report any further information I obtain."

"H. MACDONELL."

Telegram from Her Majesty's Consul General at Düsseldorf, dated 28th June, 1877.

"COLORADO beetle was found with larvæ numerous in a potato field near Mülheim. Yesterday, before the authorities, the field was fired with sawdust and petroleum. One beetle was seen on the wing. It is feared the plague may spread."

Letter from Her Majesty's Vice-Consul at Cologne, dated 27th of June, 1877, and translation of Reports from *Cologne Gazette* and *Stadt Anzeiger*, &c.

"Sir,

"Cologne, 27 June, 1877.

"I hasten to send you the different reports on the Colorado beetle which I have found in the different editions of the *Cologne Gazette* and the *Stadt Anzeiger*, supposing that they will give you a better insight into the present state of the approaching plague than a personal report could do.

"The Government, as well as the public, seem to take the matter seriously enough, so we will hope that their united endeavours will succeed in preventing further devastation.

"It seems to be a fact that the insect found on a potato field near Mülheim, on the Rhine, belonging to a butcher who imports American bacon, is the real Colorado beetle. The chrysalis of the insect appears inconsiderable, but the beetle itself in more confined quantities till now, on about one-fifth of the field, which measures about 20 acres.

"It was reported that the insect had appeared already on another potato field near Mülheim. This, however, has been strictly contradicted in yesterday's evening paper.

"I shall follow up the progress of this lamentable discovery, and report further what may be of interest to you.

"I have, &c.,

"J. A. Crowe, Esq.,

"WAM. HELLMERS."

"Her Britannic Majesty's Consul General, Düsseldorf.

[Enclosures.]

COLORADO BEETLE.

*Cologne Gazette*, II.—25th June.

THE Colorado or potato beetle having been found near Mülheim, on the Rhine, as we reported in the first paper to-day, it appears appropriate to recall to memory the following communications from an article on this dreaded destroyer of one of our principal means of subsistence, published in No. 45 of this paper, in the year 1875.

The State of Missouri has appointed an entomologist, Charles Riley, who is to collect all observations on the subject and to publish them. This is done in the "Annual Report on the noxious, beneficial, and other Insects of the State of Missouri."

The last report, of the year 1875, gives the most recent information concerning the Colorado beetle. The insect passes the winter in the ground; but as soon as the potato plants are up and the first leaves developed the beetle appears. The female then lays her orange-coloured eggs in clusters of ten to twelve on the underside of the leaves; from these eggs come the larvæ in five to eight days, and they carry on their work of destruction during fourteen to twenty days. Then they change into the chrysalis state, and from ten to fourteen days afterwards the beetles come out.

The deposit of eggs begins again, and so three generations may be produced in the course of one summer, the last of which hides in the ground and passes the winter there.

To the latest report, a Mr. Henry Gillman, of Detroit, Michigan, appends remarks on the attachment of the beetle to other plants. On the 19th of June, 1872, he found it on young grass, upon which, as well as in the neighbouring potato fields, it had laid eggs. A month later he found beetles and larvæ close to a well nigh ruined potato field, devouring the young blossoms and leaves of *Cirsium lanceolatum*, *Amaranthus retroflexus*, *Sisymbrium officinale*, *Polygonum hydropiper*, *Solanum nigrum*. After two or three weeks the thickest stalks of thistles were eaten away, nearly all the leaves destroyed, and the bloom heads hanging withered. At the same time he observed the insect on *Chenopodium hybridum* and *Chenopodium album*; and in August of the same year both beetles and larvæ, greedily feeding on *Hyoscyamus niger*, upon which eggs also were to be found. On this Mr. Gillman observes that it is a significant fact that the insect takes to henbane, which was brought from Europe to America, therefore it does not seek out the native plants only.

These examples show what an extraordinary aptitude the beetle has to accommodate itself to its food, and to this circumstance is to be attributed the difficulty of extirpating it when it has once got a lodgment. The insect lived originally on the wild Solanæ of the Rocky Mountains. As cultivation advanced towards the west, the potato fields drew nearer the habitation of the animal; upon these it settled, and, with the extended feeding ground, the insect increased with such inconceivable rapidity as to become a general pest to the country. In the year 1859 its progress towards the east had already begun, and the foremost parts of the swarm have now reached the Atlantic coast, whilst the main body has still some way to make. When this also arrives at the coasts it may be expected that the insect will pass over into Europe, and probably into Ireland first. In 1874 the migration continued without interruption, and in Ohio three or four swarms of this beetle were observed following each other in the course of an hour or two. Impartial observers estimate the number of a swarm at 10,000 insects. Some beetles remained behind as the flights passed on, the work of destruction began, and consternation spread amongst the agriculturists.

The

The means which have been adopted for the extirpation of the beetles are of three kinds:—

1. Promoting the increase of the beetles' enemies. This, however, does not appear to have been successful, although nature comes to the aid of man, for with the insect the feeding ground of its enemy also extends, and thus promotes their increase.
2. Mechanical means. The simplest, and for a long time the only known defensive, means was gathering by hand. But this is so expensive that it is only worth while when the price of potatoes is so high as to render them an article of luxury. The *New York Tribune* quotes instances wherein it took 50 days' work in the course of a summer to pick an acre, therefore about 120 would be required for a hectare. This would make picking impossible in Germany, even if school children were employed. The heavy expense has also led to the introduction of machines for gathering, such as tongs for crushing the insects and larvæ, boxes with springs to be fixed on the stems, small barrels with forked joggng apparatus, but none of them have been quite effective.
3. Chemical means. Of all these that have been tried, such as blue vitriol, green vitriol, chloride of lime, carbonate of lime, one has been very much approved of, that is, Paris (Schweinfurt) green (arseniated oxide of copper). It is used in two forms—dry, and mixed with water. In the latter case a tablespoonful of pure green is reckoned for a bucket of water. In both cases it is mixed with flour to make it stick to the plants. The application of the dry powder is most advantageous; as it can be equally distributed over the plants by means of dredgers, but the danger of poisoning men and animals is greater. Neither can the powdering take place at all times of the day—but chiefly on dewy mornings and in the evening. The application with water has therefore been more generally adopted, as it can be done at any time. This also has its disadvantages, which however may be decreased by clever operation.
  1. Paris green is not soluble in water, and therefore soon goes to the bottom. In order to prevent this, the liquid must be continually stirred while the sprinkling is going on.
  2. The liquid rests in the hollows of the leaves, and deposits the coloured matter too thickly.
  3. Therefore much of it falls on the ground and is wasted.
  4. It is not easy to mix the green, the flour, and the water so that the flour shall not form clots; therefore a special mixing apparatus is required. The success of this means is, however, so great, that the fear of the beetles' devastations has very much decreased, and as experiments have shown that the ground is in no way poisoned by the green, as was at first supposed, this means is now coming more and more into use. The expense is reckoned at about 12 marks per hectare.

We gather from a communication sent to us by Mr. Proff, of Mülheim, to-day, that the potato beetle has already been found in at least two neighbouring fields. Mr. Proff concludes his letter by requesting us to publish the intelligence at once (we had already done so), so that every exertion may be made by the Agricultural Ministry, as well as the Agricultural Society, to prevent the further spreading of the terrible pest.

The distinguished entomologist, Professor Dr. Förster, of Aix-la-Chapelle, to whom some beetles have been sent, says, with reason,—“If the multiplication of the voracious insect goes on here as fast as in America, very soon no field in the Rhine province will be spared. This enemy must be destroyed, and even out-of-the-way means ought to be adopted to effect this.” We have to state hereon, that we have already informed the Agricultural Ministry, by telegraph, of the appearance of the beetle here.

The Colorado beetles that have come into our possession we have placed at the disposal of the Chief Burgomaster. He will have them shown to the market-people from the country, and likewise to the pupils of the public schools here, so as to promote the utter annihilation of the foe to our potato fields. A proposition made by an inhabitant here ought to be seriously encouraged, viz., that a good number of eggs, larvæ, and beetles be collected in glass cases, fed there, and then be subjected to experiment by chemists, to ascertain how they can be most easily and quickly destroyed. In addition to this, we would recommend that the collecting and taking away the beetles by officious persons be strictly forbidden, so that the insects may not be spread about through carelessness.

*Cologne News*, 25th June.

We have received information from Mülheim, on the Rhine, that larvæ of beetles, and also beetle eggs, which to all appearance come from the Colorado beetle, have been found in a potato field near that place. The field belongs to a butcher, who imports bacon from America, and it is therefore supposed that the said beetles have come over with the bacon. Further investigation will show how far this sad intelligence is true.

*Cologne Gazette*, II, 26th June.

As the Colorado beetle has but just appeared in some places at Mülheim, a correspondent recommends as a simple and effectual means to cover the plots of ground in question with sawdust or dry tanners' bark, to pour a couple of casks of petroleum over it, and set it on fire, which would make the ground so hot that no living thing could remain in it. This would cost but very little for a parish or a district in comparison with the damage that would arise from neglect.

(See next communication.)

Cologne, 26 June.

As we have obtained accurate information to-day in our neighbour town of Mülheim respecting the appearance of the Colorado beetle, we are able to impart the gratifying intelligence that as yet the destructive insect has only spread over a space of 5 acres in a large potato-field containing 20 acres. In order to prevent the dispersion of the beetle, Mr. Landrath V. Reisewand will immediately have the infested plot placed under strict inspection, and on the arrival of the President of the Government, who will be at Mülheim at half-past 4 this afternoon, will take measures for the radical extirpation of the voracious

voracious insects, which for the most part occur in the larvæ shape, with but few specimens of the beetle. Probably the infested field will be covered with straw, hay, and shavings, and these be well saturated with petroleum, then the whole will be set fire to, and the ground afterwards purified by corrosive acids.

After close investigation it appears that the fields surrounding the one in question have not yet been attacked by the mischief, and a statement that the beetle had been found on a distant potato-plot turns out to be quite false.

Town Advertiser of the *Cologne Gazette*, 26th June, 1877.

Local News.

On account of the immense importance of the matter, we repeat here the information given in the first issue of our paper yesterday respecting the discovery of the Colorado beetle in a potato-field near Mülheim. Unfortunately, as will appear from the close of this notice, the dreaded insect has already appeared in other parts of our province. The owner of the Rhenish Asphalt and Coal Tar Works, at Mülheim on Rhine, Sturmergasse 10, Mr. Bernhard Zimmermann, wrote us yesterday, as follows: "A man came to me to-day with a little box containing several beetle larvæ of a peculiar form; he said he had found them in a potato-field near Mülheim, and asked me whether I knew them. I remembered the descriptions of the American potato beetle published in the newspapers, and thought the appearance of the larvæ corresponded with them. I went at once with the man to the said field, and found eggs, larvæ, and full-formed beetles on the potato-plants there. The larvæ are shining red, and show two rows of black spots on the two sides. The body of the beetle is likewise red, the wings yellow, with ten black stripes lengthwise. The size of the beetles is about a centimètre, but I do not know whether they are full grown. Larvæ and beetles devour the potato-plant with great voracity. It appears that the field belongs to a butcher who sells American bacon. This circumstance strengthened my opinion that the little voracious animal might be the Colorado beetle, the pest of the American potato-fields, because I thought that the eggs of the insect might have come across the ocean in the packing of the meat, and then have got to the field."

Mr. Zimmermann brought with him to us a number of the larvæ that he suspects, and two beetles in a glass, and he has the beetle in all forms of development at his house ready for inspection. That we really have the wretched foe of the potato-field before us we can hardly doubt, inasmuch as the beetle shows on its wing-cases the ten lines corresponding with its name of *Doryphora decemlineata*. It is therefore of the greatest importance to adopt immediate measures for its extirpation. The Colorado beetles which came into our possession we have placed at the disposal of the chief Burgomaster; he will have them shown to the market people from the country, and to the pupils of the public schools here, in order to promote a radical extinction of this enemy of our potato fields. A proposition made by an inhabitant here ought to be warmly recommended, viz., to collect a good number of eggs, larvæ, and beetles in glass cases, to feed them there, and then to have experiments made by chemists to ascertain the easiest and quickest way of destroying them. In addition to this we would recommend that meddling persons be everywhere strictly forbidden to collect and carry away the beetles, lest they be spread about through carelessness.

*Cologne Gazette*, 27 June.

A letter from Mülheim tells us that "the state of affairs concerning Colorado beetle is as follows: The larvæ feed in a restricted spot; they are mostly of a good size already. The pupæ rest in the ground, and send forth, as it appears, the beetles in daily, nay, hourly increasing numbers. These make all the surrounding country unsafe, for they are found beyond the feeding-ground of the larvæ. Their dispersion is promoted by the wind, and still more, as well as that of the larvæ, by the numerous collectors, of whom a great many were present to-day, and they are not decreased by the shutting off. This is certainly not a time to rest in confidence; every day the danger increases by the hatching of the beetles, which, it is to be hoped, belong to the first generation. This is a time for energetic measures, such as those against the cattle plague."

*Cologne Gazette*, 27 June.

As we obtained accurate information yesterday, at noon, in our neighbour town of Mülheim, respecting the appearance of the Colorado beetle, we are able to give the satisfactory intelligence that as yet the destructive insect has only spread over a space of five acres in a large potato field containing twenty acres. In order to prevent the dispersion of the beetle, Mr. Landrath von Riesewand has already had the infested spot placed under strict inspection, and, after an arrangement with the President of the Government, will adopt measures for the radical extirpation of the voracious insects, which, for the most part occur in the larva state, with only a few specimens of the beetle. Probably the infested field will be covered with straw, hay, and shavings, and these will be well saturated with petroleum; then the whole will be set fire to, and the ground will be afterwards purified by corrosive acids. After close investigation, it appears that the fields surrounding the one in question have not yet been attacked by the pest; and a statement that the beetle had made its appearance in a distant potato plot turns out to be quite false.

Despatch from Her Majesty's Consul-General at Düsseldorf to The Right Hon. the Earl of Derby, &c.

My Lord,

Düsseldorf, 29 June, 1877.

No discovery has as yet been made as to the manner in which the Colorado beetle was imported into the field in which it was found on the 24th instant, near Mülheim. The statement that the owner of the field, being an importer of American bacon, may have had Colorado beetles' eggs in his bacon cases, is as yet the only plausible one that has been given. The field, which I visited yesterday, is a large one, but edged on one side by houses; one of them, I believe, the property and residence of the importer above mentioned.

As yet no signs of an extension of the beetle plague have been discovered; but the authorities are apprehensive that it may spread, and they have issued a notice to the following effect:—

"The potato beetle (*Chrisomela decemlineata*) commonly called the Colorado beetle, has undoubtedly been found in a field by Mülheim-am-Rhein. The ravages which this insect is well known to cause induce the issue of the following police order:—

"1.

- "1. Every owner, user, or lessee of fields planted with potatoes, is bound to give notice of the appearance of the Colorado beetle, or its brood, to the police of his place of habitation." (Here follows a full description of the beetle and its larvæ and eggs.)
- "2. Whoever shall neglect this duty will be fined from nine to thirty marks, or suffer proportionate imprisonment. Neglect will be held to have been shown whenever, on revision, larvæ shall have been found in any potato field.—GUYONNEAU."

Köln, 27 June, 1877.

I have, &c.,  
J. A. CROWE.

Letter from Mr. MacDonell to The Earl of Derby.

My Lord,

Berlin, 30 June, 1877.

With reference to my telegram to your Lordship, No. 45 Commercial, of the 27th instant, on the subject of the appearance of the Colorado beetle at Mülheim, I have now the honor to report that, in answer to my inquiries at the Imperial Sanitary Office, which has been entrusted by Prince Bismarck's order with the investigation of the matter, I have been informed that a report has been received from Dr. Sell, professor of chemistry, who was sent to devise the best means of destroying the insect.

Dr. Sell states that there is no doubt that the insect is really the much dreaded Colorado beetle, but that prompt means have been taken for its destruction in the field where it appeared, which is only of about the extent of one hectare.

The Sanitary Office have promised to furnish me with a copy of Dr. Sell's report on Monday, when I shall be able to send your Lordship further particulars.

I have, &c.,  
B. G. MACDONELL.

Letters from Mr. MacDonell to The Earl of Derby.

My Lord,

Berlin, 4 July, 1877.

With reference to my despatch, No. 46 Commercial, of the 30th ultimo, I have the honor to enclose herewith a *précis* of the report made by Dr. Sell to the Imperial German Sanitary Office, on the subject of the appearance of the Colorado beetle, together with a *précis* from the "Gazette of the Empire" on the same subject.

I have, &c.,  
B. G. MACDONELL.

In his report to Dr. Struck, the Director of the Sanitary Office of the Empire, Dr. Sell states that he visited the field where the Colorado beetle was said to have appeared, and that there is no doubt that it is the much dreaded beetle, as Dr. Gerstäcker has also reported.

The field, which is about one hectare in extent, had been burnt with petroleum before Dr. Sell's arrival, and the vegetables in the neighbouring fields cut and burnt by way of precaution. On the day following, a search for traces of the beetle was almost without result, but the next morning from forty to fifty larvæ and chrysalides were dug out in presence of the reporter and Professor Gerstäcker at a depth not exceeding from ten to twelve centimètres.

Another burning of the field was to take place at once, and Dr. Sell proposed the application of an alkaline preparation composed of about one hundred hectolitres of raw potash and limewash, which should be worked into the ground, and from which he promised a successful result.

In spite of every precaution which could be taken by the authorities, there was still a fear that collectors or the curious might spread the evil; and, with a view of preventing this, a notice has been issued that all persons in possession of larvæ or chrysalides should hand them over to the authorities, under pain of a fine; the public are also called upon to give any information in their power with regard to the existence of the insect; and all owners of potato-fields in the mayoralty have been directed, also under pain of fine, to have them closely inspected at least twice a week.

Dr. Sell concludes by stating that, in his opinion, everything has been done on the part of the local officials which can entail the entire extermination of the plague.

*Précis* of account in the "Gazette of the Empire" of the Colorado beetle's appearance at Mülheim.

On the 25th June it became known to the authorities for the first time that a strange insect had appeared in a field close to the town of Mülheim, and that it was feared that it was the Colorado beetle, which turned out to be the case.

The piece of land attacked by the insect is about five hectares in extent, divided among different proprietors, and all planted with potatoes. It is bounded on one side by a road, and on the other three sides by pieces of ground planted with other vegetables.

The point at which the beetle was first found was in the middle of the potato ground, where it existed in great quantity, and with the exception of the chrysalis, in every stage of development.

The deep yellow eggs were on the under side of the leaves, while the larvæ were found on the upper.

These latter were of different sizes, from that of a small vetch up to the dimensions of a coffee bean; and it was observed at the same time, that all larvæ feeding on the same plant were of equal size with one another. Beetles were found in small number, and it appeared that they were not yet able to fly.

The most careful investigation respecting the manner in which the insect was introduced has hitherto been without success, but it is considered that its introduction by American bacon is improbable.

Letter from Mr. Harris to The Earl of Derby.

My Lord,

The Hague, 5 July, 1877.

I have the honor to communicate to your Lordship the following statement, which has been published in the official gazette of the Netherlands by the Minister for the Home Department:—

"While the steamboat 'Rotterdam,' with goods from New York, was being unladen at Rotterdam, an insect was discovered on the ground and sent up to the Home Department, where it has been declared to be a living female Colorado beetle (*Doryphora decemlineata*).

"The

"The Minister draws the attention of the public to the repeated warnings given by the Government, and to the description and engraving of the insect issued and published by the Home Department; and draws particular attention to the fact of the discovery of the above-mentioned specimen; and requests everybody to assist in preventing the general calamity that would result from the introduction of the Colorado beetle into the potato fields, by making inquiries, and by killing the injurious insect."

I have the honor further to state, from information just received from the Home Department, that the ship—in unloading which the above-mentioned insect was discovered—contained a cargo of general goods, and that the beetle was found on or in the vicinity of a chest of onions that was subsequently destroyed.

Nothing else is known concerning the Colorado beetle; it has not yet made its appearance in the potato fields of this country.

An engraving,\* with a description of the insect, is herewith enclosed.

I have, &c.,

E. A. J. HARRIS.

\* See Appendix No. 2.

[Enclosure.]

(Translation.)

#### THE COLORADO BEETLE.

THE Colorado beetle (*d*), which has committed such frightful ravages in the potato fields of America, when seen from above, has the shape of our native green brass beetle, but it is a little larger—about 11 to 12 millimètres ( $\frac{1}{2}$ ths inch) long. Its colour is a flesh tint, red or ruddy dove colour, with black eyes, eighteen small black spots and specks on the thorax, and five curved stripes, lengthwise, on each wing-case (*e*). The knees and tarsi of the legs are black. The stripe along the suture of the wing-cases is very narrow, the others are rather broad; the side edges of these stripes are not sharply defined, and between them are seen a good many fine diminutive black or brown speckles on the dove-coloured ground.

The eggs (*a*) are glued fast by the mother beetle to the under side of the leaves in little clusters of thirty, or a few more or less. They are rather more than two millimètres ( $\frac{1}{4}$ th inch) long, and 0·7 millimètres broad. Smooth, deep yellow or orange colour, and of a cylindrical shape, rounded at both ends. Within five or six days the young larvæ (*b*) make their appearance from these eggs. At first they are blood red; this colour subsequently changes to a flesh tint. The full-grown larvæ (*c*) are between eight and nine millimètres ( $\frac{3}{8}$ ths inch) long; thick and swelling out behind the second ring of the body; projecting like a hump on the back, pointed at the end, bare all over, and without any pimples or warts. The circular-shaped head, somewhat indented in front, is of a glossy black, with a whitish upper lip, four small black eyes on each side—protected by little bristly hairs; the upper jaw has five small teeth. The thorax is white at the fore edge, then black, whilst the other longest part is flesh-coloured, with many small olive brown spots, each separately formed of two specks. The remaining part of the body is flesh-coloured or yellowish, with two rows of round black spots, one above another, at the sides. The six legs, of which the hindmost are rather long, have black hips and white thighs, with shanks and tarsi black on the upper and white on the under side. After having ravaged the plants for nineteen days or nearly three weeks, the larva, being full grown, creeps into the earth and turns into a chrysalis, from which in summer the beetle appears after ten or twelve days. There are three generations every year, and the last spends the whole of the winter in the pupa state under ground.

If you meet with this formidable enemy of the potato field in any shape whatever, kill it at once. Published by the Home Department.

REPORT drawn up by Mr. P. Le Poer Trench, Second Secretary in H. M.'s Legation at Washington, on the natural history and habits of the Colorado beetle.

As it would now appear to be an established fact that this destructive beetle has found its way over to Germany and Sweden, and even threatens to invade Great Britain and Ireland, an account of its natural history and habits may not be out of place, while some timely advice as to the best means of preventing its ravages may, unfortunately, be only too soon required. According to the report of Professor Glover, the eminent entomologist of the Department of Agriculture, this beetle has been known for more than fifty years, and has been particularly injurious to the cultivated potato since about the year 1860, when it commenced its travels eastward from the base of the Rocky Mountains, and has been steadily progressing at the rate of 60 to 80 miles a year. It is known as the Colorado or western potato beetle, or ten-lined spearman (*Doryphora decemlineata*), and its habits are as follows:—

The eggs are deposited by the female to the number of about 700 to 1,200, at intervals during forty days, on the leaves of the potato stalk, in somewhat regularly arranged loose clusters. In about six days they hatch into larvæ, which feed upon the foliage of the plant from seventeen to twenty days, but never touch the potato (tuber); they then descend into the ground, and, after remaining in the chrysalis (pupa) state, to which the larvæ changes for ten or twelve days, they again make their appearance as perfect beetles. The larvæ also feed on the egg-plant, and in Europe might possibly attack other vegetables. In about a week the sexes pair, and in another week the females begin to lay their eggs for a second brood; thus requiring but fifty days from egg to egg again. To give some idea of their powers of reproduction, the Canadian entomologist states that if the progeny of a single pair were allowed to increase without molestation for one season, the result would amount to over 60 millions. The insects do not die immediately after laying their eggs, as Professor Daniels, of the Wisconsin University, once kept a female alive six weeks without food after she had laid 1,200 eggs. There is another insect belonging to the same genus, which is often mistaken for the Colorado beetle. It is, however, easily distinguished from the genuine, as the second and third stripes are always united behind, giving the appearance of a heavy black stripe, and the edges of all the stripes have but a single row of punctures; the legs also have a black spot in the middle of the thighs. This insect has also been found feeding upon the horse-nettle in South Carolina, and has been taken upon potatoes and egg plants in Alabama. In the accompanying woodcut,† 1 represents the true potato beetle (*Doryphora decemlineata*); 3, the *Doryphora juncta*; and 2

† See tracing, Appendix No. 3.

is an apparent cross between the two, or a variety once found in the Southern States, in which the heavy thick black line of the *juncta* has a very fine yellowish line running partly through it longitudinally. The Colorado beetle has in America a great many foes, or parasitic insect enemies, that do much towards lessening its numbers and preventing still greater destruction in the potato fields in this country. It is also attacked by numerous beetles and by other insects, and its eggs are also destroyed by the coccinella, or what is called in America the "lady-bug," and which bears a strong resemblance to what is known

known in England as the lady-bird. The remedy most recommended by Professor Glover is pure Paris green, mixed with ashes or damaged flour in the proportion of one part to twelve or fifteen. It should be dusted over the young plants in the morning when the dew is on the foliage, and should always be repeated after rains. A convenient way of dusting the vines (potato stalks) evenly, is to prepare a "dredge" on a large scale from an old tin can, by puncturing small holes in the bottom, and securing to the side a handle about two feet long. This, when filled, the operator can carry in one hand as he walks down the rows, gently tapping the handle with a stick, and being careful always to keep to windward. The amount can be regulated by the speed of the operator. Three pounds of Paris green to about forty pounds of flour, ashes, or air-slaked lime, will be sufficient for an acre of potatoes. Paris green mixed with water, sprinkled over the plants, has also been applied with good effect, and has the advantage of having no dust. Some persons recommend hand-picking, but though it may answer early in the season, it is neither practicable nor sure later on when the insects become more abundant. It is said that insects caught in this manner should never be crushed with the fingers, as they are very poisonous; and of this I had ocular proof a few days ago, when a friend of mine, while showing me over his potato field, crushed one of the larvæ with his spud, and accidentally let some of the yellowish pus-like fluid touch the palm of his hand, which produced a blister like a sting of a nettle, and was very painful for twenty-four hours.

Deaths have been known to result from breathing the steam from hot water that had been used to kill beetles, and also from carelessly partaking of food without washing the hands after handling these insects. Paris green is also very poisonous, and great care should be exercised in its use. It is a pigment made from the arsenite or arseniate copper (Scheele's green), which is a powerful poison.

This preparation (Paris green), or a similar one, is also known in Europe under the name of Schweinfurt green. Green pigments not containing the arsenic salt would be useless for the purpose. Much of the Paris green that is sold for the purpose of destroying the potato beetle is impure, and in many instances not Paris green at all, but chrome green or imperial green. The following is, according to a Baltimore manufacturer, the best test for its purity:—Place a small portion of the green in a test tube, adding a small quantity of water and caustic potash, which will take up all the arsenic, throwing down the oxide of copper; wash this with a little water, to free it from the arsenite of potash, then add nitric acid and water, which will dissolve the copper, leaving the adulteration, if any. In many parts of the United States farmers have resorted to patent preparations, but they have generally proved a failure; and so far, no better remedy has been discovered than Paris green, mixed and used in the manner above described.

Professor Glover, to whom I am indebted for much valuable information respecting the beetle, considers that there is great danger of the destructive insect being imported into Great Britain on board ships. In the first place, when in the egg state, it might be introduced on dried potato leaves carelessly left amongst and packed in with potatoes. As larvæ there is not so much danger, and they would probably die of starvation before the end of the voyage, if more than ten days without green food. As pupæ it can be introduced in the clods of earth adhering to the potatoes, for in that state it eats nothing, and remains motionless until the proper time for changing into the perfect insect arrives. The perfect insect can hide itself in crevices of a ship, and could easily fly ashore while the vessel is lying in port.

As measures of precaution against the importation of the beetle, it would be advisable to instruct the authorities in seaport towns to cause all the refuse left at the bottom of potato sacks and barrels to be emptied out and immediately burned on the arrival of a ship, as the eggs, pupæ, &c., would necessarily be sifted to the bottom when shaken, while being transferred from place to place, or by the rolling of the ship; that proper care should be taken to distribute coloured drawings of the insect among persons connected with shipping, and to warn them of the danger of introducing such a destructive insect enemy, and to urge them to kill every one found.

By taking such preventive measures the evil may be averted for some time, but in spite of all precautions Professor Glover fears that the insect will eventually find its way to Great Britain, and if the climate suits it, will spread all over England and the adjacent islands for a certain time, and then become scarce again, so as to do little damage, especially if its insect enemies should be numerous in the localities invaded, and farmers are persistent in the use of Paris green.

If the above precautionary measures are not taken in time, and if war to the knife is not declared against the insect on its first appearance, the damage done to the potato crops will be incalculable; and in Ireland, where the potato is still with many the staple article of food, this voracious and prolific beetle may prove a curse second only to the famine of 1848.

Washington, 19 July, 1877.

P. LE POER TRENCH.

Lord Odo Russell to The Earl of Derby.

My Lord,

Berlin, 20 July, 1877.

With reference to your Lordship's telegram of yesterday's date, requesting to be furnished with a model of the beetle believed to be the destroyer of the Colorado beetle, which model was reported to have been circulated by the German Government, I have the honor to state that, on inquiry at the Ministry of Agriculture, I am informed that the authorities have no model of the beetle alleged to have followed the Colorado beetle, nor have they even any confirmation of the report in the *Standard* of the appearance of such an insect at Cologne.

A model of the Colorado beetle can be obtained at Cologne.

I have, &c.,  
ODO RUSSELL.

Captain J. Tennant to The Clerk of the Privy Council.

Sir,

Green Dragon Hotel, Hereford, 29 July, 1877.

I telegraphed to you at 10 a.m. to-day (with reference to the supposed appearance of the Colorado beetle in Hereford), to the effect that the Town Clerk of Hereford had informed me that some specimens had been submitted to Dr. Chapman (not Carpenter, as stated by error in my telegram).

I have, since telegraphing to you, seen Dr. Chapman, who is, I have been informed, a good entomologist. I showed him some specimens of some pupæ and larvæ I had myself collected at the place where the Colorado beetle was supposed to exist, and he pronounced them without hesitation to belong to the *Coccinella septem punctata*, or seven-spotted lady-bird.

I

I also showed the specimens to the editor of the *Hereford Journal* newspaper, who it appears first published the report, in order that I might ascertain whether the specimens reported on by Dr. Chapman were similar to those seen by the editor. I was not able however to obtain any satisfactory information from that gentleman. He stated that he did not think the specimens I then showed him were like those he first saw, but was unable to describe the difference between them.

It appears these first specimens were collected by a Mr. Williams, who, I am informed, still has them. I was unable to see them to-day in Mr. Williams's absence, but I have arranged a meeting with him for to-morrow morning.

Up to this time, therefore, I have the honor to report that I have not succeeded in obtaining any trace of the Colorado beetle, and I think there is no reason to suppose that it exists in the neighbourhood of Hereford.

I have, &c.,

J. TENNANT,

Travelling Inspector of the Privy Council.

Her Majesty's Consul General at Düsseldorf to The Earl of Derby.

My Lord,

Düsseldorf, 2 August, 1877.

The Colorado beetle has again been discovered in fields near Mülheim and Rhein.

On the 27th ultimo larvæ were found north-east of the ground disinfected on the 28th of June. Immediate steps were taken to destroy the insects. A ditch was dug round the field, the surface was fired with sawdust and "benzol," the earth was then ploughed and fired afresh.

After this double operation, search was made for grubs, and none were found. On the 30th ultimo another set of larvæ was seen in a potato field, separated by a patch of rye from the field just previously fired. Here a female beetle and eggs were also discovered.

This field also was fired, and hopes are entertained that the plague will thus have been arrested. Yet the rapid increase of the insect, and the quick way in which it has invaded new ground gives cause for anxiety.

Government officials have been sent from Berlin to superintend the operations for destroying the beetle and its brood, and French officials are also on the spot, with instructions to report to the Government in Paris.

I have, &c.,

J. A. CROWE.

Colorado beetle in Liverpool.

T. J. Moore, Curator, to the Right Honorable R. A. Cross, M.P., Secretary of State for the Home Department.

Sir,

Museum, 7 August, 1877.

I have the honor to forward herewith a living specimen of the Colorado beetle captured in Liverpool.

It was found by Mr. Gilbert S. Goodwin, consulting engineer, in the cabin of a Spanish steamer, which arrived in Liverpool on Saturday from New York with a cargo of cattle, and was supposed to have been brought in the fodder.

Mr. Goodwin took the beetle to the office of the *Liverpool Mercury* this morning, in order that some public notice might be taken of the occurrence, and this will be done in to-morrow's issue. From thence it was sent to this Museum for verification, and there can be no doubt of its being an actual specimen of this much dreaded pest.

I regret the absence from Liverpool of a colleague, the Rev. H. H. Higgins, who, I am sure, would gladly have joined me in the identification and forwarding of this example.

I have, &c.,

THOMAS J. MOORE,

Curator.

Secretary of Customs to Clerk of the Council.

Sir,

London, E.C., 10 August, 1877.

With reference to your letter of the 8th instant, transmitting copy of a letter which had been received at the Council Office from Mr. Moore, the Curator of the Liverpool Museum, &c., relative to the capture of a Colorado beetle alive, found in the cabin of a Spanish steamer which arrived in Liverpool from New York with a cargo of cattle, I am desired to acquaint you, for the information of the Lord President of the Council, that immediately on receipt of your communication copies of the letters were transmitted to the Collector of this revenue at Liverpool for his information and guidance, with directions to him to impress upon the officers the necessity of the greatest vigilance being exercised in the examination of vessels and cargoes arriving from ports in America, Canada, or Germany, since which similar instructions have been issued to all the Customs ports in the United Kingdom.

I have, &c.,

JNO. SMITH.

(40 & 41 Vict.)

DESTRUCTIVE INSECTS.

(Ch. 68.)

Chapter 68.

AN Act for preventing the introduction and spreading of Insects destructive to Crops.

(14th August, 1877.)

A.D. 1877.

BE it enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:—

GREAT BRITAIN.

1. The Lords and others of Her Majesty's Most Honorable Privy Council (in this Act referred to as the Privy Council) may from time to time make such Orders as they think expedient for preventing the introduction into Great Britain of the insect designated as *Doryphora decemlineata* and commonly called the Colorado beetle.

Power to Privy Council to make Orders for preventing introduction of destructive insects. Any

Any such Order, if the Privy Council think fit, may prohibit or regulate the landing in Great Britain of potatoes or of the stalks and leaves of potatoes, or other vegetable substance, or other article, brought from any place out of Great Britain, the landing whereof may appear to the Privy Council likely to introduce the said insect into Great Britain, and may direct or authorize the destruction of any such article, if landed.

If any person lands or attempts to land any article in contravention of any Order under this Act such article shall be liable to be forfeited in like manner as goods the importation whereof is prohibited by the Acts relating to the Customs are liable to be forfeited; and the persons so offending shall be liable, according to those Acts, to such penalties as are imposed on persons importing or attempting to import goods the importation whereof is prohibited by those Acts.

2. The Privy Council may from time to time make such Orders as they think expedient for preventing the spreading in Great Britain of the said insect.

Any such Order may, if the Privy Council think fit, direct or authorize the removal or destruction of any crop of potatoes or other crop or substance on which the said insect in any stage of existence is found, or to or by means of which the said insect may appear to the Privy Council likely to spread, and the entering on any lands for the purpose of such removal or destruction, or for the purpose of any examination or inquiry authorized by the Order, or for any other purpose of the Order.

Any such Order may, if the Privy Council think fit, prohibit the keeping, selling, or exposing or offering for sale, or the keeping of living specimens of the said insect, in any stage of existence, or the distribution in any manner of such specimens.

Any such Order may impose penalties for offences against the Order, not exceeding ten pounds for any offence; and those penalties shall by virtue of this Act be recoverable with costs, on summary conviction before two Justices of the Peace, and shall be applied as penalties recovered under the "Contagious Diseases (Animals) Act, 1869," are applicable.

3. Where by any Order under this Act the Privy Council direct or authorize the removal or destruction of any crop, they may direct or authorize the payment by the local authority of compensation for the crop; and the local authority shall pay the same, subject and according to the following provisions:—

- (1.) In the case of a crop on which the said insect, in any stage of existence, is found, the compensation shall not exceed one-half of the value of the crop.
- (2.) In every other case the compensation shall not exceed three-fourths of the value of the crop.
- (3.) The value of the crop shall in each case be taken to be the value which, in ordinary circumstances, the crop would have had at the time of its removal or destruction.
- (4.) The local authority may, if they think fit, require the value of the crop to be ascertained by their officers or by arbitration.
- (5.) The local authority may, if they think fit, withhold compensation, if, in relation to the crop, the owner or the person having charge thereof, has, in their judgment, done anything in contravention of, or failed to do anything in compliance with, any Order under this Act.

4. The local authorities under the "Contagious Diseases (Animals) Act, 1869," with their respective districts, local rates, clerks and committees, shall be in like manner local authorities for the purposes of this Act.

The Privy Council may, if they think fit, require a local authority to carry into effect any Order of the Privy Council under this Act.

The expenses incurred and compensation paid by a local authority in pursuance of any Order under this Act, shall be paid by them out of the local rate.

Every local authority shall keep, in such manner and form as the Privy Council from time to time by Order direct, a record relative to proceedings in pursuance of any Order under this Act, stating the date of the removal or destruction of any crop or substance, and other proper particulars, which record shall be admitted in evidence.

5. Every Order of the Privy Council under this Act shall be published, if it relates to England, in the *London Gazette*, and, if it relates to Scotland, in the *Edinburgh Gazette*; save that, where the Order affects only specified lands, the insertion in the *London or Edinburgh Gazette* (as the case may require) of a notice of the making of the Order shall be sufficient.

Any Order of the Privy Council under this Act shall be published by any local authority to whom it is sent by the Privy Council for publication in such manner as the Privy Council direct, and, subject to, or in the absence of, any such direction, in such manner as the local authority think sufficient and proper to ensure publicity.

6. The powers by this Act conferred on the Privy Council may be exercised by any two or more of the Lords and others of the Privy Council, and, as regards the making of Orders affecting only specified lands, may be exercised by the Lord President, or one of Her Majesty's Principal Secretaries of State.

#### IRELAND.

7. The foregoing provisions of this Act shall apply to Ireland as if Ireland were named therein instead of Great Britain, but subject to the provisions of this section.

- (1.) The powers conferred on the Privy Council shall be vested in the Lord Lieutenant, or other Chief Governor or Governors of Ireland, acting by the advice of Her Majesty's Privy Council in Ireland.
- (2.) The local authorities shall be the Boards of Guardians of the several Poor Law Unions.
- (3.) The expenses incurred and compensation paid by a local authority shall be paid by the treasurer of the Union out of Union funds, that is to say, out of any money in his hands to the credit of the Guardians of the Union; and if there is not sufficient money in his hands, then out of the money next received by him, and placed to their credit.
- (4.) Penalties (other than penalties recoverable under the Acts relating to the Customs) shall be recovered in a summary manner, and shall be applied according to the provisions of the Fines Act (Ireland), 1851, and any Act amending the same.
- (5.) Orders shall be published in the *Dublin Gazette*.

#### GENERAL.

8. Every Order under this Act shall be laid before both Houses of Parliament within ten days after the making thereof, if Parliament is then sitting; and if not, then within ten days after the next meeting of Parliament.

Power to Privy Council to make Orders for preventing spreading of destructive insects.

32 & 33 Vic. c. 96. Compensation for crops.

Local authorities and execution of Orders of Council.

40 & 41 Vic.

Publication of Orders of Council.

Exercise of powers of Act by Privy Council.

Application of Act to Ireland.

14 & 15 Vic. c. 90.

Orders to be laid before Houses of Parliament.

9. The expenses of the execution of this Act, other than expenses and compensation paid by local authorities, shall be paid out of money to be provided by Parliament. Expenses of Act.

10. This Act may be cited as "The Destructive Insects Act of 1877."

Short title.

At the Council Chamber, Whitehall, the 14th day of August, 1877.

By the Lords of Her Majesty's Most Honorable Privy Council.

Present:

Lord Chancellor. | Lord President.

The Lords and others of Her Majesty's Most Honorable Privy Council, by virtue and in exercise of the powers in them vested under The Destructive Insects Act, 1877, and of every other power enabling them in this behalf, do order, and it is hereby ordered, as follows:—

1. This Order may be cited as The Colorado Beetle Order, 1877.
2. This Order extends to Great Britain only.
3. Words in this Order have the same meaning as in The Destructive Insects Act, 1877.
4. If the owner of, or any person having under his charge, any crop of potatoes, or other crop, or vegetable, or substance, finds, or knows to be found thereon, the Colorado beetle, in any stage of existence, he shall, with all practicable speed, give notice of the fact of the same being so found to a constable of the police establishment for the place where the same is found.

The constable shall forthwith give notice thereof to the local authority, and the local authority shall forthwith give notice thereof by telegraph to the Privy Council.

5. It shall not be lawful for any person to sell, or expose or offer for sale, or keep any living specimen of the Colorado beetle, in any stage of existence, or to distribute in any manner any such specimens.
6. If any person fails to do anything which he is required by this Order to do, or does anything in contravention of this Order, he shall be deemed guilty of an offence against this Order, and shall, for each offence, be liable to a penalty not exceeding ten pounds.

C. L. PEEL.

At the Council Chamber, Whitehall, the 14th day of August, 1877.

By the Lords of Her Majesty's Most Honorable Privy Council.

Present:

Lord Chancellor. | Lord President.

The Lords and others of Her Majesty's Most Honorable Privy Council, by virtue and in exercise of the powers in them vested under The Destructive Insects Act, 1877, and of every other power enabling them in this behalf, do order, and it is hereby ordered, as follows:—

1. This Order may be cited as The Colorado Beetle (Customs) Order, 1877.
2. This Order extends to Great Britain only.
3. This Order shall have effect from and immediately after the 31st day of August, 1877.
4. It shall not be lawful for any person to land potato haulm, leaves, or stalks, brought from the United States of America, Canada, or the German Empire.
5. The Commissioners of Her Majesty's Customs may, in any case, if they think fit, order the collection and destruction of any sand, dirt, or other refuse imported with potatoes brought from the United States of America, Canada, or the German Empire, and detain the potatoes until such destruction has been effected.

C. L. PEEL.

(No. 96/1877.)

Sir,

Custom House, London, 24 August, 1877.

I am desired by the Board to transmit copies of the Act 40 and 41 Vic., cap. 68, entitled "The Destructive Insects Act, 1877," also copies of an Order of Council, dated the 14th instant, issued under the provisions of the said Act, and to direct you to instruct the officers under your supervision to exercise the utmost vigilance in carrying out the provisions of the Order.

You will observe that the landing in Great Britain of potato haulm, leaves, or stalks from the United States of America, Canada, or the German Empire is prohibited; and in case such articles are brought in any ship, you are to take care that the same be either destroyed by fire or treated as "other refuse" in the manner stated below. You are also to require that all loose sand, dirt, or other refuse imported with potatoes be carefully collected from all parts of the importing vessel, from the barges used for conveying the potatoes to a wharf, and from the wharf itself, and, if practicable, passed through fire.

In cases where fire cannot be employed, the sand, dirt, &c., should be collected in a heap, and be well wetted with a mixture of Paris green and water applied from a watering pot. The heap should then be turned over and the mixture again used, and this process should be repeated until the officers are satisfied that every part of the refuse has been brought into contact with the Paris green. Great care is to be taken that the mixture, which is a poison, is not brought into contact with the potatoes.

Your are therefore, upon the arrival at your port of potatoes from either of the countries named in the Order, to obtain a supply of Paris green and the necessary appliances, at the Crown's expense, observing that about two tablespoonfuls of Paris green should be added to a bucket of water; and that with a view to prevent the Paris green sinking to the bottom, the liquid should be continually stirred while the process of wetting the sand, &c., is in progress.

Copies of a notice informing the public of this regulation are also forwarded, and are to be posted up in conspicuous places in and about the Custom House and places where the cargoes of vessels are discharged.

The Collector at

I am, &c.,

J. SMITH.

At

At the Council Chamber, Whitehall.

The 14th day of August, 1877.

By the Lords of Her Majesty's Most Honorable Privy Council.

Present:

Lord Chancellor, | Lord President.

THE Lords and others of Her Majesty's Most Honorable Privy Council, by virtue and in exercise of the powers in them vested under The Destructive Insects Act, 1877, and of every other power enabling them in this behalf, do order, and it is hereby ordered, as follows:—

1. This Order may be cited as the Colorado Beetle (Customs) Order, 1877.
2. This Order extends to Great Britain only.
3. This Order shall have effect from and immediately after the 31st day of August, 1877.
4. It shall not be lawful for any person to land potato haulm, leaves, or stalks, brought from the United States of America, Canada, or the German Empire.
5. The Commissioners of Her Majesty's Customs may, in any case if they think fit, order the collection and destruction of any sand, dirt, or other refuse imported with potatoes brought from the United States of America, Canada, or the German Empire, and detain the potatoes until such destruction has been effected.

C. L. PEELE.

By the Commissioners of Her Majesty's Customs.

NOTICE.

Destructive Insects Act, 1877.

THE Lords of Her Majesty's Most Honorable Privy Council have, by Order dated the 14th August, 1877, prohibited the landing in Great Britain of potato haulm, leaves, or stalks, from the United States of America, Canada, or the German Empire, and have directed that any sand, dirt, or other refuse imported with potatoes brought from those countries be collected and destroyed.

Notice is therefore given, that for the purpose of destroying the Colorado beetle in case it may be imported therewith, the articles above named when brought to this country must either be passed through fire, or if that process be not available, must be saturated with a mixture of Paris green and water; and all persons connected with shipping are requested by a careful examination of packages of every description and their contents when brought from infested countries to aid in the destruction of the Colorado beetle.

By order of the Commissioners,—

Custom House, London,  
24th August, 1877.

J. B. HALE,  
Secretary.

## DEPOSIT OF NIGHTSOIL NEAR THE BOTANY ROAD.

(PETITION FROM CERTAIN RESIDENTS ON THE BOTANY ROAD.)

*Ordered by the Legislative Assembly to be printed, 4 December, 1877.*

To the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned,—

SHOWETH:—

That the undersigned, residing on the Botany Road, have been and are subjected to one of the greatest nuisances that can be thrust upon a community.

This nuisance is rapidly increasing, and has grown to such alarming proportions that there is not a night allowed to pass without three or four, and sometimes even forty or fifty *nightsoil carts* emptying their contents in the immediate vicinity of the above.

We feel it is needless on our part to describe the effects of this nuisance, which has caused us so much annoyance, feeling convinced, your *Honorable House* has every knowledge thereof.

Not only looking at it in a sanitary point, but, on behalf of the comfort of ourselves and families, we pray you to take our Petition into your kind consideration.

And your Petitioners, as in duty bound, will ever pray.

## DESTRUCTION OF FLYING FOXES.

(PETITION FROM FARMERS AND SETTLERS ON THE HAWKESBURY.)

---

*Ordered by the Legislative Assembly to be printed, 29 January, 1878.*

---

To the Honorable the Legislative Assembly, in Parliament assembled.

The humble Petition of the undersigned Farmers and Settlers residing in the district of the Hawkesbury,—

RESPECTFULLY SHOWETH:—

That we are great sufferers by the destruction caused by the vast numbers of Flying Foxes that infest our Orchards and destroy the results of our industry.

We respectfully represent that some steps ought to be taken to secure the Orchards and fruit trees from their devastation, and we humbly pray that your Honorable House will in your wisdom devise some method of abating this great evil.

And your Petitioners, as in duty bound, will ever pray, &c.

**DREDGE FOR THE MANNING RIVER.**  
(PAPERS.)

*Ordered by the Legislative Assembly to be printed, 6 February, 1878.*

**The Engineer-in-Chief to The Under Secretary for Public Works.**

Sir, Department of Public Works, Harbours and Rivers Branch, 3 January, 1878.

In reply to the repeated applications of Mr. Smith, Member for the Hastings, that a dredge should be sent to the Manning River, a promise was made him that as soon as she could be spared the "Fitz Roy" dredge, then working on the Macleay, should be sent there, and latterly arrangements having been made for the purpose, tenders were invited for the services of a steamer to tow her from the former to the latter river. The only steamers offered for the purpose were the "Ballina" and the "Challenge," and for their services the large amount of £400 is asked, namely, on the ground of the dangerous character of the services, and the high rate of insurance the owners of the steamers would have to pay.

I find upon inquiry that both vessels draw about 7 feet of water, and the Pilot reports (see telegram of 15th ultimo—77/4699) that there is only that depth (viz., 7 feet) on the Manning Bar at present at high tide. I do not consider under these circumstances that it would be safe to entrust the service to either of these vessels, as if they were to touch and hang on the Bar while going in, which is almost certain to occur, they would lose all control of the dredge, which would be very likely to be lost.

Under these circumstances I cannot take the responsibility of recommending that the attempt be made, and I think the dredge should be allowed to resume her work on the Macleay till a more favorable time.

E. O. MORIARTY.

*Copy of Telegram referred to in above Minute.*

Telegram from Pilot, Manning River, to Engineer-in-Chief.

Sydney, 15 December, 1877.

VARIABLE, fine, smooth—souther Bar all over this morning, high water only 7 feet with long flat.

Copy of the Minister for Works' Minute.

The dredge should be kept working in the Macleay for the present; bring the matter again before the Minister when the Bar changes, or any other circumstance not now known.

J.S., 21/1/78.

Telegram from Engineer-in-Chief to Pilot, Manning River.

As soon as there is any material improvement in depth of Manning Bar please inform me.

Pro E. O. MORIARTY.

## GAME PROTECTION BILL.

(PETITION OF RICHARD SADLEIR, R.N.)

*Ordered by the Legislative Assembly to be printed, 6 March, 1878.*

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of Richard Sadleir, R.N.,—

HUMBLY SHOWETH:—

Your Petitioner having noticed the motion of introducing a Bill for the Preservation of Game into your Honorable House, prays—as such law may seriously affect the interests of agriculturists and horticulturists already suffering from the introduction of the rabbit, the hare, sparrows, &c., in their orchards, vineyards, gardens, and general crops, threatening ruin to these industries—your Honorable House may, under the recollection that a former law was all but inoperative from its unpopularity, be pleased not to add to the evils aforesaid or increase the catalogue of crime in a matter so widely affecting their interests.

Your Petitioner further calls your attention that while in the former Bill native birds injurious to their crops were protected, yet insectivorous birds were left unprotected, and therefore wantonly destroyed.

Any law passed in humane principles in the protection of birds or animals, and not for slaughter of sport or game, your Petitioner would willingly acquiesce in as merciful, but Game Laws are not of that character.

Your Petitioner further views with alarm the contemplated introduction of the fox, and the indiscriminate importation of dogs, when the voyage is so short and hydrophobia is so prevalent at home, and prays your Honorable House may be pleased to adopt precautionary measures against the introduction of such a fearful malady.

Your Petitioner prays that your Honorable House may take the aforesaid premises under consideration.

And will, in duty bound, ever pray.

RICHARD SADLEIR.

Feby. 28th, 1878.

1877-8.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

**INSOLVENCY LAWS.**

(PETITION OF MINERS AND OTHERS, GOODRICH.)

*Ordered by the Legislative Assembly to be printed, 27 March, 1878.*

To the Honorable the Members of the Legislative Assembly, in Parliament assembled.

The humble Petition of the undersigned miners, labourers, &amp;c., lately employed in the mines at Goodrich,—

RESPECTFULLY SHOWETH:—

That your Petitioners have been at various times employed by one John Rowling in the capacity of miners, labourers, woodcutters, carters, &c.

That it has been the custom, as your Petitioners believe, at the various mines to pay the men employed their wages monthly, which custom has been generally observed at Goodrich.

That the wages and earnings of your Petitioners have been delayed by the said John Rowling on one pretext and the other for the last two months.

That on the 9th February last the said John Rowling informed the men employed that he could only pay them by promissory-notes at two months date. This some of your Petitioners accepted; others, who declined to take them, summoned the said John Rowling to the Police Court, Obley, at which Court he did not appear. For the contempt of the Court in not so appearing warrants were issued for his apprehension. For the purpose of evading these warrants the said John Rowling filed his schedule in Sydney, showing liabilities £1,620—assets £5. That, protected by the order of the Chief Commissioner in Insolvency, the said John Rowling appears at the Police Court, Obley, under bond, but the Bench are powerless to make any order for the satisfaction of your Petitioners, who are thereby put to great loss and inconvenience by the non-payment of their just wages.

Your Petitioners, being only poor men, dependent on their earnings for the support of their wives and families, are, by the apparently fraudulent action of the said John Rowling, reduced to positive distress and misery, many of your Petitioners and their wives and children being almost reduced to starvation.

Your Petitioners would respectfully point out to your Honorable House the great injustice they are suffering, and would respectfully pray to take the subject into your favourable consideration, with the object of effecting such alterations in the insolvency laws as to your wisdom may be necessary, and which would have the effect of preventing a recurrence of such fraudulent courses of which your Petitioners complain.

LAND, CORNER OF PITT AND BRIDGE STREETS.

No. 1.

The Surveyor General to Mr. Assistant Surveyor Burrowes.

Sir, Surveyor General's Office, Sydney, 9 August, 1856.

The enclosed \*account having been forwarded by Mr. Randle for covering in the Tank Stream in accordance with instructions from the late City Engineer, who, it is stated, received his directions from you, I request that you will have the goodness, at your earliest convenience, to examine and report upon the manner in which the work has been performed, its extent, and the reasonableness of the charge, in order that, if there should then be no objection, the account may be forwarded for payment.

I have, &c., GEO. BARNEY, S.G.

No. 2.

Mr. Assistant Surveyor Burrowes to The Surveyor General.

Sir, Sydney, 16 August, 1856.

With reference to your letter, dated 9th instant, requesting me to report on the manner in which the Tank Stream had been covered over (as it was supposed I was engaged on the work), I have the honor to state that I merely pointed out the direction of Hamilton-lane, under which the Stream was to run, to Mr. Rider, the then City Engineer, under whose supervision, I understood, the work was conducted; and as I thought it was connected with the sewerage of the City, and consequently not under this Department, I did not take any particular notice of the work during its construction, and do not therefore feel in a position to report on it.

I have, &c., M. E. L. BURROWES, A.S.

Forward account to the Colonial Secretary, as having been sent back by the Commissioners, and state that the payment should be made by that Department, if not out of the vote for sewerage.—G.B.

No. 3.

The Surveyor General to The Colonial Secretary.

Sir, Surveyor General's Office, Sydney, 21 August, 1856.

I do myself the honor to forward an \*account presented to this Department by Mr. W. Randle for the work of covering over the Tank Stream, and returned to me by the City Commissioners, to whom, as being apparently the proper authorities, I had caused it to be referred for payment.

2. The Commissioners, however, as appears from their memorandum, have no objection to settle this matter, on the receipt of positive instructions from the Government, with which, accordingly, I submit that they should immediately be furnished, as the account is one which ought to be discharged by that Department, if not out of the vote for sewerage.

I have, &c., GEO. BARNEY, S.G.

No. 4.

Memo. by The Surveyor General.

HEREWITH is the description of an allotment sold in 1839 to J. T. Hughes, and which is bounded on one side by Pitt-street and on the other by a lane 11½ feet in width.

Since the measurement of this allotment the line of Pitt-street has been moved some 12 feet farther east, and a question arises as to whether the position of the allotment should be governed by that of the street, and the lane thereby widened, or whether the position should be that in which it was marked, and a useless space be left between the front of the allotment and Pitt-street?

The lane referred to communicates with Hamilton-lane from Bridge-street, and it would doubtless be a great advantage to widen this communication and thus make a convenient thoroughfare to Hamilton-lane (which is 25 feet wide), without breaking the Pitt-street line of buildings unnecessarily. It will be seen that Pitt-street is mentioned in the description, and that the width of the lane is not specified, although the records show it positively. Therefore, if the deed determine the position, the lane will be widened. If the marking (which the records prove), the lane will remain 11½ feet, and the useless space be left in Pitt-street.

Mr. Burrowes has, I believe, had some communication with the holders of the allotment, without any tangible result, but before entering into any further treaty it may be well to ascertain by reference to the Crown Law Officers what the exact powers of the Crown are in this matter.

G.B., 5 Sept., 1856.

The course would evidently be an arrangement with the parties interested, for exchanging one portion for another; surrender of the one and fictitious sale for the title of the other, being what has been before resorted to.—11 Sept.

I think this will be the ultimate course, but I have doubts whether the Crown may not have the power to insist on the occupancy of the portion in Pitt-street, or rather leaving room for the portion there, to widen Hamilton-

Hamilton-lane. It would at all events be well before communicating further with the parties to learn what, under the plan and deed, the legal powers of the Government actually are.—G.B., 12 Sept.

Letter to Colonial Secretary, inquiring under the circumstances the legal position of the Crown as to changing position of allotment sold.—18 Sept.

---

No. 5.

The Principal Under Secretary to The Surveyor General.

Sir,

Colonial Secretary's Office, Sydney, 9 September, 1856.

In acknowledging the receipt of your letter of the 21st ultimo, submitting an account presented by Mr. W. Randle for the covering over of the Tank Stream, which has been returned to you by the City Commissioners, to whom, as being apparently the proper authorities, you had caused it to be referred for payment, I am directed to inform you that instructions have been given to the Commissioners for the payment of the amount, viz., £869 11s.

I have, &c.,  
W. ELYARD.

See No. 3.

---

No. 6.

The Surveyor General to The Colonial Secretary.

Sir,

Surveyor General's Office, Sydney, 19 September, 1856.

I do myself the honor to enclose a sketch and a description of an allotment of land in Bridge-street, Sydney, which was sold in the year 1839 to Mr. J. T. Hughes, and which is bounded on one side by Pitt-street, and on the opposite side by a lane 11½ feet in width, and to state that the line of Pitt-street having been moved since the measurement of this allotment some 12 feet further east, a question has arisen as to whether the position of the allotment should be governed by that of the street, and the lane thereby widened, or whether the position should be that in which the allotment was marked, and a useless space be thus left between the front of the allotment and Pitt-street.

2nd. The lane referred to communicates with Hamilton-lane from Bridge-street, and it would no doubt be a great advantage to widen this communication, and thus make a convenient thoroughfare to Hamilton-lane, which is 25 feet wide, without breaking the Pitt-street line of buildings unnecessarily.

3rd. It will be seen that Pitt-street is mentioned in the description, and that the width of the lane, although positively shown by the records, is not specified. Therefore, if the street determine the position, the lane will be widened; if the marking (which the records prove) the lane will remain 11½ feet wide, and the useless space will be left in Pitt-street.

Under these circumstances, therefore, it appears advisable to ascertain, by reference to the Crown Law Officers, what the exact powers of the Crown are as to changing the position of the allotment sold.

I have, &c.,  
GEORGE BARNEY,  
S.G.

See Enclosures  
A and B.  
Appendix A.

Referred accordingly to the Honorable the Attorney General and the Solicitor General, for the purpose named in the fourth paragraph of this communication. B.C., 25 Sept., 1856.—W. ELYARD.  
To be returned.

---

[Enclosure B to No. 6.]

6 perches, county of Cumberland, parishes of St. James and St. Phillip, City of Sydney, allotment 11 of section 46: Bounded on the north by Bridge-street, being a line bearing east 16 degrees north 38½ links; on the east by the continuation of Pitt-street, being a line bearing south 4 degrees 30 minutes east by 139 links; on the south by a line bearing west 16 degrees south 25 links; and on the west by a reserved lane dividing it from an allotment No. 1 of the old lumber-yard purchased by John Terry Hughes, being the allotment sold as lot 48 in pursuance of the advertisement of 13th July, 1839, but upon the express condition, nevertheless, that the said John Terry Hughes should construct an archway over the Tank stream according to a plan deposited in the office of the Town Surveyor, and on the further condition that he should erect a first-class building on the said land within two years from the 15th day of August, 1839, the day of sale thereof. Purchase money, £413 sterling.

The building conditions attached to this allotment have been rescinded. (Vide Colonial Secretary's letter, dated 20th November, 1848.)

See Appendix.

---

[Appendix to Enclosure B to No. 6.]

The Colonial Secretary to The Surveyor General.

Sir,

Colonial Secretary's Office, Sydney, 20 November, 1848.

I do myself the honor to inform you that His Excellency the Governor has been pleased to release the allotments of land sold by the Government in Bridge-street from the building conditions attached to them.

I have, &c.,  
E. DEAS THOMSON.

---

No. 7.

The Principal Under Secretary to The Surveyor General.

Sir,

Colonial Secretary's Office, Sydney, 19 September, 1856.

In reference to your report under blank cover of the 11th inst., I am directed to apprise you that the application of Mr. H. K. James, on behalf of the trustees in the estate of the late Mr. Thomas Moore, for permission to erect an arch over a certain lane near the Tank Stream, has been refused in terms of that report.

I have, &c.,  
W. ELYARD.

Not with the  
papers.

No. 8.

Opinion of The Attorney and Solicitor Generals.

Attorney General's Office, Sydney, 2 October, 1856.

WE are of opinion that the Crown has no power to change the position of the allotment sold, unless the consent of the purchaser or his representatives be first obtained. The land was described by boundaries in existence at the time of the grant, and a subsequent change in the position of a street which formed its eastern boundary does not alter the position of the soil which passed by the grant.

2. Should the owner of the allotment consent to the change proposed, we are of opinion that the Governor, with the advice of his Executive Council, may permit the resumption of the space in question, pursuant to the provisions of the Act of Council 6 Will. 4 No. 9, sect. 2.

JAMES MARTIN, Attorney General. ALFRED J. P. LUTWYCHE, Solicitor General.

Transmitted for the information of the Surveyor General, and for his further report, B.C., 6 Oct., /56.—W. ELYARD.

No. 9.

The Surveyor General to Mr. Assistant Surveyor Burrowes.

Sir, Surveyor General's Office, 14 October, 1856.

I enclose herewith certain \*correspondence connected with a proposal which the Government is willing should be made to the present holders of an allotment sold in 1839 to J. T. Hughes, for the projection of the allotment in question to the present line of Pitt-street, so that land should be obtained in front for the surrender of an equivalent quantity in rear. \*See previous papers.

I believe that you are not unacquainted with this matter, and you will therefore consider yourself authorized to make a specific proposal to the parties alluded to, as shown in the correspondence, furnishing me with a report as early as practicable of the result of the same.

I have, &c., G. BARNEY, S.G.

No. 10.

Memo. of Mr. Assistant Surveyor Burrowes.

17 November, 1856.

THE expense of covering over the remainder of the Tank Stream between Hunter and Bridge streets will be about £2 12s. 6d. per running foot, to be constructed in the same manner as that portion of the stream has been done to the northward of Bridge-street under the superintendence of the City authorities.

Should it be deemed necessary, I will forward a specification of the work, although it has hitherto never been furnished by this department. M. E. L. BURROWES, Assistant Surveyor. See Enclosure.

N.B.—B.C.L. and Mr. Randall's bill returned enclosed.

[Enclosure to No. 10.]

The Surveyor General Dr. to W. Randle, Tank Stream.

February 8th, 1856.

Building walls and side drains, and laying platform over do.

Table with 3 columns: Description, £, s. d. Includes items like '413 perches cubic rubble walling in mortar, except stone' and 'Excavating and levelling, for foundations, and filling in; mining under adjoining houses, to examine foundations—Labour, 35 1/2 days'.

Measurement of work executed by Mr. Randle at the Tank Stream.

Table with 3 columns: Description, ft., ft., ft. Includes 'Rubble wall', 'Side drains', 'Timber', and 'Ironbark girders'.

Table with 2 columns: Description, ft., ft. Includes 'Planking' and 'Plate'.

Excavation. Excavating foundation in line of Hamilton-lane, and examination of foundation of two houses—time returned: 27 1/2 days.

W. B. RIDER, Engineer, July 23rd, 1856. MINUTES

## MINUTES ON No. 10.

MEMO.—Sketch required of the land unsold upon the line of New Pitt-street, cut into allotments; also an estimate of the expense of covering in the Tank Stream, to admit of the sale of the allotments.—G.B., 13 August. 240 feet of New Pitt-street frontage still to be sold. 260 feet of the Tank Stream to be covered in, and about 100 feet of a lane, 10 feet in width, to be filled up.—A.G.M., 15 August. Estimate must now be submitted with a recommendation to sell the remainder of the line. Let me have a sketch.—G.B., 20 Nov. To be deferred by Surveyor General's directions until some arrangement is made with the owner of Hughes's 6 perches. Mr. Burrowes may be informed.—A.G.M., 26 Nov. Inform him, 27.

## No. 11.

## The Surveyor General to Mr. Assistant Surveyor Burrowes.

Sir,

Surveyor General's Office, Sydney, 29 November, 1856.

Referring to your blank cover letter of the 17th instant, reporting the probable cost of covering over the remainder of the Tank Stream, between Hunter and Bridge streets, I beg to inform you that the preparation of the specification of this work may be deferred until some arrangement shall have been made with the present owner of Hughes's 6 perches.

I have, &c.,  
GEO. BARNEY, S.G.

No. 10.

## No. 12.

## The Under Secretary for Lands and Public Works to The Surveyor General.

Sir,

Department of Lands and Public Works, Sydney, 30 December, 1856.

With reference to your blank cover report of the 7th ultimo, on the subject of the payment of Mr. Randle's account for covering in the Tank Stream, I am directed to inform you that it seems to be useless to attempt to follow up the inquiry as to the authority on which this work was done. As however the work in question forms no part of the general system of sewerage, and probably will not answer as a portion of that system, the City Commissioners cannot fairly be called upon to pay for it. The Secretary for Lands and Public Works is therefore of opinion that as the work has been done and the public benefited by it, it must be paid for by a vote of the Legislative Assembly out of the Consolidated Fund.

2. I am further directed to state that as the City Commissioners have offered to make the payment on the condition of being reimbursed, and as the work was executed under the surveillance of their officer (the City Engineer), they have now been called upon to do so, and at the same time they have been requested to cause in the first instance a searching investigation to be made by their Engineer into the character and value of the work performed.

I have, &c.,  
M. FITZPATRICK.

See No. 10.

## No. 13.

## Mr. J. Garsed to The Surveyor General.

Sir,

Willow Lodge, Glebe, 28 March, 1857.

I have the honor to inform you that I have leased the allotment of land (late Jobbins'), situate at the corner of Bridge and Pitt streets, and as I am desirous of putting up buildings thereon on piles without filling up, I am desirous of calling the attention of the proper authorities to the fact, in order that some arrangement might be made respecting it.

I presume very shortly the Government will cover over this part of the Tank Stream, and as the buildings I should erect might create an obstacle, or cause much greater expense than it would at present, I beg to suggest the advisability of some arrangement being made respecting the covering in of the Tank Stream previous to my commencing operations in building.

I have, &c.,  
JOHN GARSED.

## No. 14.

## The Surveyor General to Mr. Assistant Surveyor Burrowes.

Sir,

Surveyor General's Office, Sydney, 31 March, 1857.

I request that you will be good enough to report what has been done with reference to the covering over of the Tank Stream, between Hunter and Bridge streets, Mr. Garsed having in a letter addressed to me stated that he has become the lessee of the allotment (late Jobbins') situated at the corner of Pitt and Bridge streets, and suggested that that portion of the stream should be covered over previous to the commencement of certain buildings which he contemplates erecting on the allotment alluded to, the description of which buildings might (Mr. Garsed states) create an obstacle to or cause much greater expense in the carrying out of the work if left till after their completion.

I have, &c.,  
GEO. BARNEY,  
S.G.

See No. 13.

## No. 15.

## Mr. Assistant Surveyor Burrowes to The Surveyor General.

Sir,

Sydney, 6 April, 1857.

With reference to your letters dated 14th October, 1856, and its enclosures, and 31st March last, relative to Mr. Jobbins' (formerly John Terry Hughes's) allotment of 6 perches at the corner of Pitt and Bridge streets, I have the honor to forward you a letter addressed to me by Messrs. Nichols and Williams in answer to one from me dated 19th November last, by which it will appear that the trustees of the will of the late Mr. Jobbins have no power to surrender the present grant in exchange for another, although they see no objection thereto, and that the only method of effecting an exchange would be by an Act of Council.

2.

Nos. 9 &amp; 14.

\*Not with the papers.

2. I have had frequent interviews with Mr. Williams (one of the trustees) on the subject, and it has been arranged (subject to your sanction) that they should occupy the ground as described in the deed, commencing from the present corner of Pitt and Bridge streets so that the lane will be of the width of (24 ft. 3 in.) twenty-four feet and three inches, until the necessary Act for the exchange be obtained. I have re-marked out the allotment in accordance therewith on the ground.

3. Mr. Garsed, who has leased the land from the trustees, is anxious to commence building, but cannot do so until the Tank Stream is covered over. He informs me that he would contract to do the work. The contract for covering over the former portion of Hamilton-lane was performed under the direction of the City Engineer, and as I imagine that the Tank Stream will be in connection of the city sewerage perhaps that officer might be requested to see the work carried on.

I have, &c.,

M. E. L. BURROWES,  
Assistant Surveyor.

[Enclosure to No. 15.]

Messrs. Nichols & Williams to Mr. Assistant Surveyor Burrowes.

Sir,

In reply to your communication of the 19th November last, we beg to inform you that we have deferred answering the same in the expectation of the termination of certain proceedings in Equity respecting Mr. Jobbins' property, and now in reply thereto we beg to inform you that the trustees of the will of the late Mr. Jobbins have no power or authority to surrender the present grant and accept another grant of other land, however beneficial, as no doubt it will be to the estate. It appears the only course will be to obtain an Act of Council to enable the Government and trustees to do what is required, to which we can see no possible objection.

Sydney, 61-Pitt-street, 31 March, 1857.

We have, &c.,

NICHOLS & WILLIAMS.

## No. 16.

The Surveyor General to The Under Secretary for Lands and Public Works.

Sir,

Surveyor General's Office, Sydney, 24 April, 1857.

I have the honor to forward herewith, for submission to the Honorable the Secretary for Lands and Public Works, certain correspondence which took place towards the close of 1856 as to an arrangement proposed to be made with the representatives of the late Mr. John Terry Hughes (the trustees under the will of the late John Jobbins) for an exchange of a portion of an allotment of land in Bridge-street, sold in 1839 for another portion intervening between it and the line of new Pitt-street,—the former portion being required for widening the continuation of Hamilton-lane into Bridge-street. An illustrated tracing is enclosed which will I trust make the matter sufficiently obvious.

2. I also beg to forward a report from Assistant Surveyor Burrowes, with a letter from the trustees of Jobbins, showing that although they have no legal power to make the exchange they see no objection to it, and that an Act of Parliament is the only method by which it can be legally effected.

3. I beg to submit the matter for the approval of Mr. Secretary Hay, and in order that the requisite measures may be taken thereafter for initiating the required Act to legalize the proposed exchange.

I have, &c.,

GEO. BARNEY,  
S.G.

I do not see that much is to be gained by the public in this matter, because, although the width of the lane will be increased its *uniformity* will not. It is not possible, I believe (and certainly not proper if it were possible), to deny to J. T. Hughes's allotment frontage to Pitt-street; but when allowed to come up to the new line of street, I think it would be better to arrange for the sale to his representatives of the land, which will be between the grant so located and the existing lane. The only way in which the lane could be improved would be by widening it on its *present* western side, so as to align with Hamilton-lane, but the land on that side is, I believe, all alienated.—M.F., 25 April.

It strikes me that the arrangement proposed is exceedingly imperfect to justify us taking an Act of Parliament to complete it. Scarcely any advantage will be derived from the proposed widening of the lane by any one, except the representatives of J. T. Hughes, so long as the narrow neck in the lane at the corner of their existing grant remains unaltered. Perhaps the Surveyor General may be able to show how this can be done. The ownership of the adjoining land on the south will be an important element in the question. If it is Crown land there will be no difficulty; if private property, it still appears to me that an adjustment might be made beneficial to all parties, by which the object in view may be fully or partially carried out. As it may, to carry such an arrangement out, be necessary to alter the shape of the allotment granted to J. T. Hughes, it is desirable that the present occupant should not proceed with improvements in the faith of a proposal which may not be sanctioned.—J.H., 27 May.

Returned to the Surveyor General for further report on the points raised, B.C., 29 May, 1857.—M.F.

In returning the papers relative to an arrangement with the representatives of the late Mr. John Terry Hughes, for the exchange of a portion of an allotment in Bridge-street, and in reference to the minutes thereon, I have the honor to state that, having given the subject further consideration, I am still of opinion that the proposed exchange of land will be greatly to the advantage of the public. It does not appear to me material whether the opening from Hamilton-lane to Bridge-street be in a direct line or not. The object to be gained is the *width* of the opening, which will be enlarged from 10 feet to 25 feet. In fact, Hamilton-lane could not be carried into Bridge-street by a direct line, without the purchase of land on its western side, already built upon, and of course highly valuable. It appears to be considered by Mr. Secretary Hay that the arrangement proposed is too imperfect to justify an Act of Parliament to authorize its completion; but it seems to be doubtful whether the Governor General, under the advice of his Executive Council, does not possess authority to approve of the exchange of land—such is the opinion expressed by the Law Officers of the Crown, dated 2nd October, 1856. Mr. Secretary Hay considers that scarcely any advantage will be gained by the proposed widening of the lane, so long

See No. 8.

long as the narrow neck of the lane, at the corner of the existing grant, remains unaltered; but I beg to observe that the space marked A is public property, which will, of course, admit of Hamilton-lane being carried through the entire length from Hunter-street to Bridge-street, at about a uniform width, and such was the intention in bringing the subject forward. This explanation will, I hope, be satisfactory, and as no alteration in the shape of the allotment granted to Mr. Hughes, except that already shown on the plan, will be necessary, I trust that an early decision will be come to in the matter. In the meantime the parties who are building on the line of Pitt-street will be warned to desist, although I cannot really see any necessity for such a course.—GEO. BARNEY, Surveyor General, 2 June, 1857.

See Enclosure A to No. 6.

Submitted, 4. This may be referred to the Executive Council. Get up the correspondence relating to the case. The letter from Jobbins' trustees is not now with the papers. Now herewith.

See Enclosure A to No. 6.

I think it desirable that the exchange should take place, with the sanction of the Government, the line being widened according to the pencil marking now made on the sketch by the Surveyor General. The Attorney General will be able to say whether, under the state of things stated in the letter from Jobbins' trustees, an Act of Parliament will be necessary or not.—J.H., 6 June.

Transmitted to the Clerk of the Executive Council, B.C., 8 June, 1857.—M.F.

The Executive Council advise that the proposed exchange be sanctioned, and that Hamilton-lane be widened throughout, according to the pencil marking in the illustrative tracing referred to within.—EDWARD C. MEREWETHER, Clerk of the Council, 9 July, 1857. Approved.—W.D., 10 July.

Before taking any further steps to carry out the exchange, I think that the papers had better be referred to the Law Officers, who may say how it may be legally effected. If it appear that Messrs. Nicholls and Williams are correct in their opinion that it will require an Act, I suppose that the Bill should be prepared by them (or the Parliamentary Draftsman), under the approval of the Law Officers, and brought into Parliament with the sanction of the Government. But before proceeding further in the matter, on the footing now authorized by the Council, it will be necessary to know how far the grantees are bound to cover over the Tank Stream; because, if they are, it would be absurd to relieve them of that liability. (See Mr. Burrowes's letter.) Before sending the case on, however, I think another attempt must be made to get at the precise nature of the authority which the lessee has obtained, if any, from any of the Officers of the Survey Department.—J.H., 10 July.

See No. 15.

#### No. 17.

#### Memo. of Mr. Assistant Surveyor Burrowes to Mr. Halloran.

Mr. Halloran,

Made by sanction of Surveyor General.

With reference to your verbal communication this morning respecting the proposed stoppage of the erection of a building at the corner of Pitt and Bridge streets, on land intended to be given to the trustees of the late Mr. Jobbins, in exchange for other, I think if it be put a stop to it will vitiate all previous arrangements made with those gentlemen, and may perhaps entail some expense, as the lane (Hamilton) will be required by the public, and of a breadth certainly not less than 20 feet, the narrowest allowed by the City Act.

The trustees would at least require £100 per foot for any land required from them.  
8 June, 1857. M. E. L. BURROWES,  
Assistant Surveyor.

Inform Mr. Secretary Hay to this effect.—G.B.

#### No. 18.

#### The Surveyor General to The Under Secretary for Lands and Public Works.

Sir,

Surveyor General's Office, Sydney, 12 June, 1857.

See No. 16.

In reference to the concluding paragraph of my report, under blank cover of the 2nd instant, relative to the exchange of portion of an allotment sold to the late John T. Hughes for land intervening between it and the line of New Pitt-street, I do myself the honor to state that in reply to a communication which I made to that officer, Mr. Assistant Surveyor Burrowes has reported that in the event of an erection of the buildings on the land alluded to being stopped the arrangement previously made with Jobbins' trustees will be vitiated, and additional expense probably entailed upon the Government, providing for the width of Hamilton-lane under the Corporation Act.

2. I therefore consider it advisable to await the further instructions of the Secretary for Lands and Public Works before making any communication with the trustees.

I have, &c.,  
GEO. BARNEY,  
S.G.

Submitted.—16.

I wish to know on what authority Mr. Burrowes made the agreement with Jobbins' trustees, involving as it seems to do the necessity of an Act of Parliament. I see no agreement indicated on the papers.—J.H., 17 June. Any answer.—J.H., 2 July. No.—M.F., 3 July.

Remind the Surveyor General that he has overlooked this question, which I think admitted of an answer at once, being as to a mere matter of fact.—J.H., 7 July.

#### No. 19.

#### The Under Secretary for Lands and Public Works to The Surveyor General.

Sir,

Department of Lands and Public Works, Sydney, 22 June, 1857.

No. 18.

I am directed by the Secretary for Lands and Public Works to acknowledge the receipt of your letter of the 12th instant in which you state that Mr. Surveyor Burrowes has reported that in the event of the erection of the buildings at the corner of Pitt and Bridge streets being stopped, the arrangements

ments previously made by him with Jobbins's trustees would be violated and additional expense probably entailed upon the Government in providing for the width of Hamilton-lane.

2. I am at the same time instructed to inquire on what authority Mr. Surveyor Burrowes made the agreement with the trustees alluded to, involving, as it seems to do, the necessity of an Act of Parliament.

I have, &c.,

M. FITZPATRICK.

MEMO.—In the Surveyor General's letter, to which this is a reply, it was not stated that the "agreement" but that the arrangements made with the Trustees would be violated by stopping the erection of the buildings; neither was it stated that such arrangements were made by Mr. Burrowes.—W.T., 30 June.

#### No. 20.

#### The Surveyor General to Mr. Assistant Surveyor Burrowes.

Sir,

Surveyor General's Office, Sydney, 30 June, 1857.

Referring to your memorandum of the 8th instant, reporting that, in the event of the erection of the buildings at the corner of Pitt and Bridge streets being stopped, the arrangements previously made with Jobbins's trustees will be violated, and additional expense probably entailed upon the Government in providing for the width of Hamilton-lane, I have to request that you will be good enough to state, for the information of the Honorable the Secretary for Lands and Public Works, the authority on which you made the agreement with the trustees. See No. 17.

I have, &c.,

GEO. BARNEY, S.G.

#### No. 21.

#### Mr. Assistant Surveyor Burrowes to The Surveyor General.

Sir,

Sydney, 2 July, 1857.

With reference to your letter, dated 30th ultimo, received by me yesterday afternoon, requesting to know by what authority I had made an agreement with the trustees of the late Mr. Jobbins for an exchange of land in Bridge-street, I have the honor to state that no agreement has been made by me. See No. 20.

Arrangements were made by me in accordance with your instructions, dated 14th October, 1856. These were subject to your approval, as stated in my letter, dated 6th April, 1857, and a letter addressed to me by Mr. Williams (one of the trustees), dated 31st March, 1857, forwarded with mine, will fully show that neither he nor I had any power to make agreements. See No. 9.  
See No. 15.  
See Enclosure to No. 15.

I have, &c.,

M. E. L. BURROWES.

#### No. 22.

#### The Under Secretary for Lands and Public Works to The Surveyor General.

Sir,

Department of Lands and Public Works, Sydney, 8 July, 1857.

Adverting to the letter addressed to you from this Department on the 22nd June last, inquiring upon what authority Mr. Assistant Surveyor Burrowes had made an agreement with the trustees of J. Jobbins respecting certain land near the corner of Pitt and Bridge streets, I am directed to remind you that you have overlooked this question which the Secretary for Lands and Public Works thinks admitted of an answer at once, being as to a mere matter of fact. See No. 19.

I have, &c.,

M. FITZPATRICK.

#### No. 23.

#### The Surveyor General to The Under Secretary for Lands and Public Works.

Sir,

Surveyor General's Office, Sydney, 10 July, 1857.

With reference to your letter of the 22nd ultimo, in which you ask for the information of the Honorable the Secretary for Lands and Public Works on what authority Mr. Assistant Surveyor Burrowes made the agreement with the trustees of Jobbins, involving as it would seem to do the necessity for an Act of Parliament, I have the honor to transmit a letter from Mr. Burrowes on the subject, with a copy of my instructions to that gentleman, from which it will be seen that I authorized him to make a specific proposal to the trustees in the terms of the previous correspondence now with Mr. Secretary Hay; that is, a proposal to exchange certain land in Pitt-street for an equivalent, admitting of the widening of Hamilton-lane from 11½ to 25 feet. See No. 19.  
See No. 27.  
See No. 9.

2. I am not aware that any agreement has been entered into, neither am I aware of the positive necessity for an Act of Parliament to authorize the proposed exchange. I stated in the previous correspondence that the approval of the Governor General, under the advice of the Executive Council, seemed by the Law Officers of the Crown to be considered sufficient.

3. I may observe that the title deeds show that the allotments in possession of the trustees are bounded by Pitt-street; the Government, however, having altered the line of street; leaving a small space between the original building-line and the new line (see sketch with previous correspondence), which being only to the width of 12 feet, would be utterly useless for building purposes, except under the exchange contemplated, and the open space would be a nuisance to the public. See Enclosure A to No. 6.

4. It is under these circumstances that I proposed to effect the exchange alluded to, which I know would be very much to the advantage of the public, without originating any expenditure or indeed loss to the revenue.

I have, &c.,

GEORGE BARNEY, S.G.

*Minutes thereon.*

Submitted.—13 July.

- See No. 16. These papers may now accompany the reference on 57/1,402 to the Law Officers.
- See No. 18. The Surveyor General may be informed in the meantime that it was impossible to understand the "arrangements" made by Mr. Surveyor Burrowes as being anything short of an "agreement," when he stated by letter of 12th June, as the purport of that officer's report, that "should the erection of the buildings be stopped, the *arrangements* previously made with Jobbins's trustees will be *vitiating*, and additional expense probably entailed upon the Government in providing for the width of Hamilton-lane under the Corporation Act." It appears now that these arrangements so liable to be vitiated were those reported by Mr. Burrowes in his letter of 6th April, made in pursuance of the directions from the Surveyor General, and seeming to imply a liability on the part of the Government to cover in the Tank Stream.
- See Enclosure to No. 15. The Surveyor General will further observe that the letter of Jobbins's trustees expressly states that they are not in a position to complete an exchange without an "Act of Parliament." In these circumstances I have referred to the Crown Law Officers to determine in what way the proposed exchange, which is considered to be desirable, as much to secure an equitable adjustment of the claims of Jobbins's trustees to frontage, as to accomplish the widening of the lane, can be legally effected.—J.H., 14 July.

## No. 24.

The Under Secretary for Lands and Public Works to The Surveyor General.

Sir, Department of Lands and Public Works, Sydney, 17 July, 1857.

- See No. 9.
- See No. 18.
- See No. 15. 2. It now appears to Mr. Secretary Hay that the arrangements alluded to as so liable to be vitiated were those reported by Mr. Burrowes in his letter of 6th April last, made in pursuance of your directions, and seeming to imply a liability on the part of the Government to cover in the Tank Stream.
- See Enclosure to No. 15. 3. I am to state that the letter of Jobbins's trustees, dated 31st March last, expressly says, as you will observe, that they are not in a position to complete an exchange without an Act of Parliament.
4. Under these circumstances Mr. Secretary Hay has deemed it necessary to refer the matter to the Crown Law Officers for them to determine in what way the proposed exchange, which is considered to be desirable as much to secure an equitable adjustment of the claims of Jobbins's trustees to frontage as to accomplish the widening of the lane, can be legally effected.

I have, &amp;c.,

M. FITZPATRICK.

## No. 25.

The Under Secretary for Lands and Public Works to The Civil Crown Solicitor.

Sir, Department of Lands and Public Works, Sydney, 17 July, 1857.

I am directed to forward to you the enclosed correspondence on the subject of an exchange of certain land at the corner of Pitt and Bridge streets, now in the possession of Jobbins's trustees, in order that they may be laid before the Crown Law Officers for their opinion as to the mode in which the exchange may be legally made. If Messrs. Nichols and Williams are correct in their opinion that it will require an Act of Parliament to legalise the exchange, Mr. Secretary Hay supposes that the Bill will be prepared by them, or by the Parliamentary Draftsman, subject to the approval of the Law Officers, and brought into Parliament with the sanction of the Government.

I have, &amp;c.,

M. FITZPATRICK.

## No. 26.

The Civil Crown Solicitor to The Under Secretary for Lands and Public Works.

Sir, Civil Crown Solicitor's Office, Sydney, 5 September, 1857.

- See No. 25. Referring to your letter to me of the — ultimo, forwarding the enclosed correspondence on the subject of an exchange of certain land at the corner of Pitt and Bridge streets, now in possession of Jobbins's trustees, and requesting me to take the opinion of the Crown Law Officers as to the necessary steps to be taken to legalize the proposed exchange, I have the honor to inform you that I have taken the opinion of the Honorable the Solicitor General in the matter, a copy of whose opinion I enclose for the information of the Honorable the Secretary for Lands and Public Works.

I have, &amp;c.,

WM. W. BILLYARD,  
Civil Crown Solicitor.

[Enclosure.]

Copy of opinion.

AN Act of Council is clearly requisite, for the trustees could not act without, and as at present advised the Crown lands could not be exchanged in the way proposed. The Bill should be prepared by the Parliamentary Draftsman.—EDWARD WISE, S.G., September 4, 1857.

The Surveyor General may be informed of this opinion, and instructed to communicate it to the trustees.—T.A.M., September 8, 1857. Forwarded to the Surveyor General for this purpose accordingly, B.C., 8 September, 1857.—M.F.

No. 27.

## No. 27.

## Messrs. Holden &amp; M'Carthy to The Secretary for Lands.

Sir,

Castlereagh-street, Sydney, 6 August, 1862.

We beg to apply, on behalf of the trustees of the will of the late Mr. John Jobbins, for the sanction of the Government to our clients being permitted to avail themselves, so far as may be necessary, of the name of the Crown in proceedings about to be instituted by them, for the purpose of recovering possession of a piece of land at the corner of Bridge-street and Pitt-street, of which they have been wrongly dispossessed under the circumstances which we proceed to detail.

2. Mr. Jobbins was at the time of his death, and the trustees of his will now are, the legal owners of an allotment of land originally sold by the Crown to the late Mr. John Terry Hughes, in the year 1839. The land is described in the deed of grant to Hughes as being "bounded on the north by Bridge-street, being a line bearing east 16 degrees north 38½ links; on the east by the continuation of Pitt-street, being a line bearing south 4 degrees 30 minutes east 139 links; on the south by a line bearing west 16 degrees south 25 links; and on the west by reserved land, dividing it from allotment No. 1 of the old lumber-yard."

3. After the issue of the grant on the proposed extension of Pitt-street being carried out by the Government, the alignment of the western side of that street was carried considerably to the eastward of the eastern boundary of the land as described in the grant, leaving therefore a strip of land about 20 feet wide intervening between such eastern boundary and the line of Pitt-street uncovered by the grant, and remaining consequently in the Crown. At the same time the land mentioned in the grant as forming the western boundary of Hughes's purchase was also extended in width on its eastern side, and consequently encroached upon the western boundary of the allotment in question.

4. Mr. Jobbins having thus not only lost a portion of the land comprised in the grant, but having also been deprived of the whole of his frontage to Pitt-street, applied for and received the sanction of the Surveyor General's Department to fence in the allotment to the line of Pitt-street, so as to include the strip of land above referred to.

5. The land so fenced in was leased by Mr. Jobbins's trustees to Mr. John Garsed, who erected the buildings now standing upon it known as the Commercial Chambers. That lease expired about two years ago. A Mr. Smart came into possession it is supposed under Garsed.

Smart became insolvent some months ago, and the property then came into possession of Mr. Sempill, as official assignee of Smart's insolvent estate, who refuses to give up possession, relying we presume on the difficulty Mr. Jobbins's trustees would have in showing title, under an action of ejectment, to that portion of the land which is not included in the grant.

6. No rent whatever has been paid to the trustees, either by Mr. Garsed or Mr. Smart.

7. Under these circumstances we venture to hope that the Government will see no objection to assist our clients in ejecting the parties in possession of the property, who have no title, either under the Crown or Mr. Jobbins' trustees, and are mere trespassers.

We have, &amp;c.,

HOLDEN &amp; M'Carthy.

Surveyor General.—12 Aug., M.F. The least objectionable mode of dealing will be to apply under the 11th clause of the Alienation Act for the land. The arrangements about the money can easily be made.—JOHN R., 12 Sept.

## No. 28.

## Mr. W. R. Smart to The Surveyor General.

Sir,

Commercial Chambers, New Pitt-street, Sydney, 18 September, 1862.

Having become the proprietor of the improvements detailed below, and which I estimate to be worth more than £1,000, I have the honor to apply that I may be permitted to purchase without competition, under the provisions of the "Crown Lands Alienation Act of 1861," the Crown lands on which they stand, and which are described hereunder.

The improvements referred to are now in the possession of myself and Mr. Robert Hamilton Sempill, official assignee, in whose behalf and my own I now apply.

I have, &amp;c.,

(For self and R. H. SEMPILL, official assignee.)

WM. R. SMART.

*Nature of improvements:* The offices known as the Commercial Chambers.

*Description of land.*

County of Cumberland, parish of St. James, City of Sydney, situated at the corner of Bridge-street and New Pitt-street, opposite the Exchange, having a frontage to Bridge-street of about 25 feet, by a depth of about 90 feet, adjoining on the southern lot No. 23, section 46a, in Pitt-street north.

*Minutes thereon.*

This application is objectionable, inasmuch as the Government have already recognized another ownership to the adjacent land. *Vide* 62/6048.—12 January.

The paper referred to is an opinion—that there is no legal objection to permission being given to Messrs. Holden and M'Carthy to proceed in the name of the Crown for the recovery of the land in question. Permission has been given, and it may therefore be inferred that it is not the intention to entertain any application from Mr. Smart pending the issue of the suit, if at all.—18.

It may be desirable to ascertain whether any proceedings have been taken under such authority, and with what result: Letter to Messrs. M'Carthy and Son (representing Messrs. Holden and M'Carthy's late firm).—18 Jan., /64.

## No. 29.

The Under Secretary for Lands to Messrs. Holden &amp; M'Carthy.

No. 27. Gentlemen, Department of Lands, Sydney, 24 September, 1862.  
Referring to your letter of the 6th ultimo, respecting proceedings about to be taken by the trustees of the will of the late Mr. John Jobbins to show their title to a certain strip of land at the corner of Bridge and Pitt streets, which he was allowed to fence in, and which is in the possession of parties unauthorized by them, I am directed by Mr. Secretary Robertson to inform you, that the least objectionable mode of dealing with the matter will be for the trustees to apply for the strip of land under the eleventh clause of the "Crown Lands Alienation Act of 1861."

I have, &c.,  
M. FITZPATRICK.

## No. 30.

Messrs. Holden &amp; M'Carthy to The Secretary for Lands.

No. 27. Sir, Castlereagh-street, Sydney, 30 October, 1862.  
Referring to our letter of the 6th of August last, applying for the sanction of the Government to our clients, the trustees of the will of the late Mr. Jobbins, using the name of the Crown in proceedings to be taken for recovering possession of the land at the corner of Bridge-street and Pitt-street under the circumstances mentioned in our letter; and referring also to the reply thereto of the 24th ultimo, suggesting an application under the 11th clause of the "Crown Lands Alienation Act of 1861," we beg to say that such an application will not meet the whole exigencies of the case, inasmuch as our clients seek not only to recover the land but also the mesne profits accruing during the wrongful occupation of the parties in possession, to which a new grant would afford no title.

No. 29. We beg also to inform you that since the date of our former letter we have obtained the report of a surveyor on the subject, by which it appears that the effect of the widening of the lane mentioned in our letter as forming the western boundary of Hughes' grant (being a continuation to Bridge-street to Hamilton-lane) has been to reduce that grant to a triangle, of which the base in Bridge-street of 7 feet 6 inches only and the two sides 25 feet each.

We beg respectfully to urge that a compliance with our original application will afford the best means of relief as against the parties in wrongful possession; having disposed of them, the settlement of any questions between our clients and the Government may be, we hope, easily adjusted.

We have, &c.,  
HOLDEN & M'CARTHY.

Mr. Williams being personally interested in this matter, perhaps the Attorney General may be asked whether he sees any objection to a compliance with this request. 31 Oct., written by the Under Secretary. Yes.—JOHN R., 5 Nov.

Forward this to the Secretary of the Law Department, to be laid before the Honorable the Attorney General.—M.F., B.C., 6 Nov., 1862.

It appears to me that there is no legal objection (under the circumstances mentioned in these papers) to the request of Messrs. Holden & M'Carthy being complied with; but whether such request should be complied with is for the Minister of Lands, or possibly the Executive Council.—JOHN F. HARGRAVE, Attorney General. The Under Secretary for Lands, B.C., 21 Nov., 1862.—W.E.P. Submitted, 24. Approved.—JOHN R., 28 Nov.

## No. 31.

Mr. J. Garsed to The Secretary for Lands.

Not with the papers. Sir, 88, William-street, Woolloomooloo, 1 November, 1862.  
I have the honor to receive a letter from the Under Secretary, Treasury Department, informing me that my letter of the 31st ultimo, respecting rent of Commercial Chambers built on Crown land, has been forwarded to the Under Secretary for Lands.

I beg most respectfully to state that, from circumstances over which I had no control, has unfortunately caused great confusion in the titles relating to several valuable properties; in consequence thereof you will greatly oblige by submitting my letter respecting rent of Commercial Chambers to the Honorable the Attorney General.

I have, &c.,  
JOHN GARSED.

## No. 32.

The Under Secretary for Lands to Messrs. Holden &amp; M'Carthy.

No. 30. Gentlemen, Department of Lands, Sydney, 29 November, 1862.  
With reference to your letter of the 30th ultimo, respecting your application on behalf of your clients, the trustees of the will of the late Mr. Jobbins, for authority to use the name of the Crown in proceedings about to be taken for the recovery of certain land at the corner of Bridge and Pitt streets,—I am directed to inform you that the Minister for Lands has approved of a compliance with your request. The authority applied for is therefore hereby granted.

I have, &c.,  
M. FITZPATRICK.

## No. 33.

Messrs. M'Carthy and Son to The Surveyor General

Sir,

125, Castlereagh-street, Sydney, 27 January, 1864.

In reply to yours of the 22nd instant, received this afternoon, we have the honor to inform you that the proceedings to which you refer long since terminated in a judgment for the Crown, under which our clients obtained possession of the premises in question.

We have, &amp;c.,

M'CARTHY &amp; SON.

The papers may then, I apprehend, be put away.—9 Feb.

## No. 34.

Mr. J. Garsed to The Secretary for Lands.

Sir,

Tobacco Factory, 304, Castlereagh-street, Sydney, 25 April, 1865.

About January, 1857, I leased certain land, situate corner of Bridge and Pitt streets, opposite the Exchange, with power to sell or remove any buildings erected thereon. Mr. Burrowes, from the Surveyor General's Office, marked out the boundary. I erected on the said land, at a cost of £1,500, or thereabouts, certain buildings known as the Commercial Chambers. I purchased from my solicitor, Mr. Randolph John Want, one-third undivided interest in forty-five houses, and land adjoining, situate Bay, Ultimo, and Chambers-streets, Glebe, subject to a mortgage to Mr. Clark Irving of £4,000, on condition that Mr. Irving renewed the mortgage.

*(Copy in Mr. R. J. Want's handwriting.)*

"Mr. Irving agreed to extend the period of the mortgage for two years, on the Blackwattle Swamp, from the expiration of the same.

*(Copy.)*

"2, Pitt-street, 11th November, 1857.

"RECEIVED from Mr. Garsed, on loan, a deed, dated 5th June, 1856—R. J. Want to J. Garsed. Conveyance and Indemnity.

"To be returned to Mr. Garsed as early as convenient.

"R. J. & G. WANT,  
"Per W. C. FELL."

In consequence of Mr. Want's clerk (I believe Mr. Fell) having, in engrossing an agreement prepared by my solicitor, Mr. R. J. Want, on the 11th August, 1857, left out the several sums mentioned in the first schedule of the said agreement prepared by Mr. R. J. Want, viz., £5,200, £900, £1,200, £900, £600, total, £8,800, I, sometime in November, 1857, said to Mr. Clark Irving, "If he would join with me in compelling Mr. R. J. Want to divide the said forty-five houses and land adjoining, I would borrow from him the sum of £1,500, to be secured upon my Commercial Chambers, and pay to him the sum of £1,500 in reduction of the said mortgage debt of £4,000"; this, Mr. Irving, agreed to do.

Messrs. Reuss and Brown, surveyors, of Pitt-street, Sydney, were instructed to draw plans of the said forty-five houses, and land adjoining, situate at the Glebe. After this was done, I and Mr. R. J. Want and Mr. Clark Irving met at the Glebe, and we divided the said property into three parts. After this Mr. R. J. Want prepared the necessary deeds, but before the said deeds were executed, Mr. Want left the Colony, and in consequence thereof I did not borrow from Mr. Irving the said sum of £1,500, and the said property remains undivided to this day. The said forty-five houses, and land adjoining, and Commercial Chambers, corner of Pitt and Bridge streets, are mentioned in a bill now pending in equity against myself and others.

On or about the beginning of May, 1858, I borrowed from Mr. Clark Irving upon my Commercial Chambers, the sum of £160, at the same time delivered to him the lease of my said Chambers, and he, Mr. Irving, promised to collect and account to me for the rents of my Commercial Chambers and also my third share of rents of the said forty-five houses.

On the 22nd December, in the year of our Lord, 1858, I was sent in custody to Darlinghurst Gaol, for swearing what is in every sense of the word strictly true, and that is, "I gave Ashdown a bonus of £2,000, or thereabouts, of which the £680 15s. 3d., the amount of the bill of exchange now sued upon, forms part." And it is impossible that the affidavit sworn by Ashdown, and filed in the Supreme Court, 2nd March, 1858, and the information for perjury, filed by the Attorney General in the Supreme Court, 1st August, 1859, can both be true; one is inconsistent with the other, and the result was, that I remained in prison until the Honorable the Attorney General, Mr. Hargrave, released me from confinement.

Mr. Clark Irving received the rents of the aforesaid properties from on or about the beginning of May, 1858, until sometime after I was sent to prison for swearing the truth.

Sometime during the time I was suffering in prison Mr. Clark Irving delivered the lease of my Commercial Chambers to Mr. W. R. Smart, conveyancer, without receiving any consideration. From that time Mr. R. Smart collected the rents of my said Commercial Chambers until the time he became insolvent. From that time until on or about December, 1862, his official assignee, Mr. Robert Sempill, collected the rents of my Commercial Chambers.

Sometime on or about December, 1862, a writ of intrusion, at the suit of the Crown, was served upon Mr. W. R. Smart, conveyancer, and others; this was followed by a writ of ejectment at the suit of the Crown.

From the time that I built my Commercial Chambers, until sometime after I left Her Majesty's Gaol, Darlinghurst, I was not aware that my Commercial Chambers were built upon Crown land. A portion of my Commercial Chambers is now a public house, called the "Exchange Hotel."

You will greatly oblige by informing me if the said land upon which my Commercial Chambers are built is still in the possession of the Crown; and if not, will you please to inform me what sum of money was paid to the Crown for my Commercial Chambers, and the name of the purchaser?

I have, &c.,

JOHN GARSED.

With reference to last paragraph, refer to the Surveyor General.—M.F., B.C., 27 April, /65.

## No. 35.

## Mr. J. Garsed to The Secretary for Lands.

No. 34.

Sir,

Tobacco Factory, 304, Castlereagh-street, Sydney, 26 April, 1865.

In my letter of yesterday's date, relative to certain Crown land leased by me from *Jobbins's trustees, John Williams and others*, situate corner of Bridge and Pitt streets, opposite the Exchange, I say "45 houses and land adjoining, and Commercial Chambers, corner of Bridge and Pitt streets, are mentioned in a bill now pending in Equity against myself and others."

The said bill was filed 1st February, 1859. Plaintiff: The late Adam Wilson.

The following is a copy of a document in my attorney's (the late P. A. Tompson) handwriting, instructing Mr. Wm. R. Smart, conveyancer, not to register a certain trust deed, dated 4th February, 1858:—

Fort-street—Subject to mortgage of	... ..	£1,200	
Willow Lodge and Oak Lodge, subject to mortgage of	... ..	£3,500	
			£4,700

In satisfaction to be conveyed to Mrs. Garsed's trustee, Equity of Redemption of Bexley, subject to mortgage to Terry of	... ..	2,000	
Blackwattle and Chambers—Subject to mortgage to C. Irving	... ..	4,000	
Chippendale Cottages—Subject to mortgage to Provident Trust Company of	... ..	700	
Camperdown and Bligh Terrace properties—Free from incumbrances.			
Conveyance showing no trust.			
Not to be registered—Trust deed to realize and apply.			

Proceeds in discharging the £4,700, and after payment of the same to account to Mrs. Garsed for one-half of the profits.

At the death of Mr. Adam Wilson three deeds, dated 4th February, 1858, were safely deposited in the Crown Law Office, viz. :—Deed registered, showing no trust, "trust deed," and deed articles of agreement.

I beg most respectfully to say that in my dealings with my fellow-men I have always been guided strictly by honesty and integrity of principle. For example: In May, 1858, it was the opinion of my attorney, P. A. Tompson, that Willow Lodge and Oak Lodge did not belong to Mrs. Garsed; in consequence thereof the equity of this property was sold to Mr. S. H. Terry, M.P.; he offered Mrs. Garsed an annuity for life of £90 a year, or the sum of £1,500. The annuity was refused on the grounds that if Mrs. Garsed was entitled to the annuity she was legally entitled to the property, and the £1,500 was paid Mr. Terry in reduction of other mortgage debts.

Mrs. S. H. Terry signed all four of Mrs. Garsed's petitions for my release from prison, and I believe you read her first, signed by Wm. Dean, F. M. Stokes, and Joseph Carroll, Esqs., in the presence of my wife, in Mr. Clark Irving's office.

In the year 1858 Mr. Dick was Mr. Terry's solicitor.

Copy from signatures recommending Mrs. Garsed's fourth and last petition:—

"I have always considered Garsed has been harshly treated, if not unjustly punished.—

ALEXANDER DICK."

"I recommend the prayer of the Petitioner to the favourable consideration of the Government, but do not consider Garsed innocent of the charge brought against him."—S. H. TERRY.

I am happy to have it in my power to say that the Honorable Colonial Secretary, Edwin Daintrey, Esq., and Mr. Phenna, one of the jury that tried me for perjury (*swearing the truth*) at Darlinghurst, suffice it to say, no person could misunderstand the meaning of her last petition.

I purchased from Mr. P. A. Tompson 1,100 acres of land, part of Chandler's grant, at £5 per acre—£5,500. I sold several small farms at £15 per acre. My wife's trustee sold 30 acres at £12 per acre; the deeds speak for themselves.

September, 1857, I mortgaged to Mrs. S. H. Terry upwards of 1,000 acres of the said Bexley Estate, to secure payment of £2,000, which sum I borrowed for 5 years at 8 per cent.; memorandum to be taken as part of the mortgage deed, whereby it is agreed between Mr. Terry and myself that I shall be at liberty at any time hereafter to effect sales of the lands upon the following terms, viz., for the parcel of land comprising the 300 acre lot, at any price not less than £15 per acre, and all or any other lots at not less than £5 an acre; and agreed that Terry shall be entitled to receive the amounts of any such sales in reduction of the original mortgage debt of £2,000, and to re-convey any portion of Bexley at the above estimated value per acre. In May, 1858, the original mortgage on the above property was reduced by payment of £750, but Mr. Terry to this day has not fulfilled his part of the contract; that is to say, he has not conveyed to my wife's trustee 50 acres of the said land, comprising the 300-acre lot, or 150 acres, comprising the remaining lots.

Blackwattle, subject to a mortgage to Mr. Irving of £4,000; originally I built for Messrs. Want, Irving, and Barber, 21 houses at a cost of about £7,500. I purchased Mr. Irving's one-third share for £4,000, secured upon the property. Subsequently, I, Want, and Barber built 24 houses on a portion of the land; after this I sold my third share of 45 houses and land to Mr. R. J. Want, subject to Mr. Irving's mortgage of £4,000.

Chippendale Cottages mortgaged to Provident Society to secure £700. With respect to this property suffice it to say to assist Archibald Ashdown in building for himself a private residence on land situate Hereford Road, Glebe; I agreed to purchase Ashdown's half share of seven cottages, situate at Chippendale, for £700; in consequence thereof I borrowed £700 from the Provident Society upon the said seven cottages, but in consequence of Archibald Ashdown's affidavit, filed in the Supreme Court, 2nd March, 1858, I lost my £700. If Ashdown's half share was worth £700, surely my half share was worth the same.

I have, &c.,

JOHN GARSED,

P.S.—I have enclosed a printed copy of Mrs. Garsed's fourth and last petition.

I do not understand this document.—27 April.

I cannot understand this letter. Mr. Garsed must put his views and wishes more intelligibly.—

JOHN R.

[Enclosure

[Enclosure to No. 35.]

## Mrs. Garsed's fourth and last Petition.

To His Excellency Sir John Young, Bart., Governor-in-Chief of the Territory of New South Wales, &amp;c., &amp;c.

The humble Petition of Emma Garsed, on behalf of her husband John Garsed, now confined three years and three months on the 21st March, 1862, in her Majesty's Gaol, Sydney,—

Humbly Sheweth:—

That your Petitioner is suffering both in body and mind, and respectfully prays that your Excellency will release her unfortunate husband, John Garsed, from confinement, and feels confident in her own mind that he is innocent of the charge brought against him.

Your petitioner saith, that her husband was committed on the 21st day of December, 1858, to take his trial at the next Criminal Court, on the charge of perjury. The perjury is assigned on his equitable plea, filed in the Supreme Court, 26th February, 1858, in defence of an action commenced against him by William Dean and Archibald Ashdown, on a certain bill of exchange for £680 15s. 3d.

That your petitioner's husband was fully prepared to defend himself at the said sittings, which were held in February, 1859, and so stated to the Court when brought to the Bar, but from delays, to which her husband was no party, he was not put upon his trial until the sittings held in the month of October following.

That your petitioner's husband was then tried before his Honor the Chief Justice for swearing, viz. :—

"I gave Ashdown a bonus of £2,000, or thereabouts, of which the £680 15s. 3d., the amount of the bill of exchange now sued upon, forms part."

Ashdown denies the bonus, and says the said bill of exchange now sued upon was the balance due by her husband to the firm of W. Dean and Co. Verdict, guilty, and sentenced to three years confinement in Her Majesty's Gaol, Darlinghurst.

Your petitioner most respectfully saith, that her husband was guided solely by a high sense of right and justice in defending the payment of the bill of exchange for £680 15s. 3d., out of which the charge of perjury arose. That before defending the payment of the said bill of exchange on equitable grounds her husband's solicitor took the opinion of counsel, namely, Mr. Justice Wise, then practising at the bar of this Colony. Mr. Wise examined a number of her husband's documents, afterwards deposited in the Prothonotary's office, but which, though called for, were not produced in evidence upon his trial. [Subsequently her husband wrote to the Acting Chief Justice to ascertain the safety of these documents, and received in reply a letter stating that he, the acting Chief Justice, had made all due inquiry but could not ascertain their whereabouts.] That her husband never disputed the agreement signed "A. Ashdown," and dated 30th September, 1857, but disputed the account submitted by the said A. Ashdown in evidence on his trial, and stated by him (A. Ashdown) to be a true copy in figures of a "red ink account," delivered to her husband by a Mr. Pritchard (his, Ashdown's, clerk), on the 24th September, 1857. This "red ink account" does not appear in any account book, neither is it mentioned in either of the three agreements signed "A. Ashdown," and produced by him (A. Ashdown) in evidence upon the prosecution. That the joint affidavit sworn by A. Ashdown and C. P. Pritchard, and filed in the Prothonotary's office, 2nd March, 1858 (but lost at the time her husband was committed), distinctly sets forth in the 3rd and 14th paragraphs as follows, viz. :—

"The settlement of the transactions mentioned in her husband's affidavit, sworn on the 26th February, 1858, was made by an agreement dated 30th September, 1857. The bill of exchange for the sum of £680 15s. 3d. was the balance found to be due on the accounts between the said Archibald Ashdown and her husband."

Mr. Pritchard's conversation with Mr. Edwin Daintrey, solicitor, in September, 1857, and given in evidence before the Magistrate, Mr. Forbes, proves that her husband did at last agree to give Ashdown a bonus of £2,000; and your Petitioner says that her husband did actually give A. Ashdown a bonus of £2,000. That the account books kept by Mr. Pritchard at W. Dean & Co.'s office prove that the bill of exchange for £680 15s. 3d. was payable to A. Ashdown individually. That Sir John Dickinson, at her husband's trial at the Supreme Court, ruled that Dean & Co. (A. Ashdown's partner) were bound by the books kept by Mr. Pritchard.

Your Petitioner humbly begs your Excellency to take into merciful consideration the length of time which elapsed between her husband's committal and trial—a period of nearly ten months—and therefore humbly prays that your Excellency will be graciously pleased to remit the remaining portion of her husband's sentence.

And your Petitioner, as in duty bound, will ever pray, &c.,

EMMA Garsed.

I recommend the Prayer of the Petitioner to the favorable consideration of His Excellency,—

And twenty-four other gentlemen

I, John Garsed, beg most respectfully to inform those gentlemen that signed the above and three previous petitions that I am guided in this my appeal to the public by a high sense of right and justice, and all that I require is what in England would not be denied to the meanest of Her Majesty's subjects, and that is an opportunity of establishing my innocence before the highest tribunal in the Colony, from the plaintiff's (Ashdown's) own account books and his own evidence without calling further evidence. In figures my case is remarkable for simplicity, and all that is wanted is for W. Dean to produce Dean and Ashdown's account books, and let his accountant, Joseph Carroll, exhibit all entries made in connection with Ashdown's fictitious account, for which I suffered, endorsed in the handwriting of his Honor the Chief Justice, "Pritchard's red ink account or memorandum," 5/10/59. I will then ask Mr. Joseph Carroll the following questions:—"How many accounts did Ashdown keep in my name in the firm's books on 15th July, 1857?" "The names of each account?" "And the balance of each account at that date?" The following are the names and balance of each account in W. Dean & Co's books, 15th July, 1857, copied from his Honor the Chief Justice's notes of Mr. Carroll's evidence:—Advance account, £1,323 12s. 4d.; loan account, £2,500; Glebe account, £1,600; special account, £500; general account, £40 6s. 8d."

62—1820. 199.

(Copy.)

Sir,

Colonial Secretary's Office, Sydney, 2 May, 1862.

I am directed to inform you that your letter of the 14th ultimo and the petition therein, forwarded from Mrs. Garsed, in favor of her husband, a prisoner in Darlinghurst Gaol, have been laid before His Excellency the Governor, but that there do not appear to be any grounds for authorizing the remission of any portion of John Garsed's sentence.

Alexander Dick, Esq., M.P.,

I have, &c.,

267, George-street, Sydney.

W. ELYARD.

Before Mrs. Garsed's third petition was refused a proposal was made to her that if I (John Garsed) would sign a memorandum, already prepared in substance, that *I might have been mistaken*, I should have my liberty. This unprecedented proposal was refused with indignation.

I had to thank the Hon. Attorney General (now Solicitor General) for my release from confinement on the 19th May, A.D. 1862; and that gentleman is of my opinion, and that is, *if I had been guilty of perjury it would not have taken seven days to prove it*; and am happy to have it in my power to say that if an opportunity is afforded me I can establish my innocence from His Honor the Chief Justice's notes of evidence.

The following is the late Lord Macaulay's opinion of false witnesses—

"To the guilt of making innocent persons suffer he has added the guilt of violating the most solemn engagement into which man can enter with his fellow men, and of making institutions to which it is desirable that the public should look with respect and confidence, instruments of frightful wrong and objects of general distrust."

The information for perjury was filed in the Supreme Court of New South Wales on the 1st of August, 1859; on the same evening I pleaded before His Honor Judge Milford "Not Guilty," and stated that I was prepared to take my trial without calling a witness; all I required of the plaintiff, Archibald Ashdown, was for him to produce W. Dean & Co's account books and exhibit all entries made in connection with C. P. Pritchard's account books, kept by him (Pritchard) under the plaintiff Ashdown's inspection, on the premises occupied by W. Dean & Co.

[Copy. Received sometime between 1st and 5th August, 1859.]

In the Supreme Court, }  
Criminal Jurisdiction. }

In the matter of the prosecution of the Queen against John Garsed for perjury.

TAKE notice that you are hereby required to produce to the Court and jury, on the trial of this prosecution, a memorandum of account, written in red ink, and prepared by Mr. Charles Pearson Pritchard, showing the settlement that was made on the 30th September, 1857, and handed to the said John Garsed by the said Charles Pearson Pritchard on or about the 23rd or 24th of September, 1857, and all other documents, letters, books, papers, and writings whatsoever containing any entry, memorandum, or minute, or other matter in anywise relating to the matters in question in this prosecution.

Dated this day of August, A.D. 1859.

Yours, &c.,

To Mr. John Garsed.

(Signed) JOHN WILLIAMS, Crown Prosecutor.

The original subpoena was left with my petition and statement at Government House, on or about 1st May, 1860.

The first time I had the misfortune of seeing the said account prepared by Mr. C. P. Pritchard was on Tuesday, the 18th May, 1858; on that day it was improperly admitted as evidence by the learned Judge in the civil action, and the cause of my losing the verdict. Notice of motion for a new trial was filed on the 22nd May, A.D. 1858, and certified by William B. Dalley, Esq., and his notes of Pritchard's evidence proves that the said accounts prepared by Pritchard is totally untrue. About thirty of my documents were in the civil action deposited in the Prothonotary's office. After receiving the above subpoena, or notice to produce, I received the following document, written in pencil:—

(Copy) Crown v. John Garsed.—Get from Garsed a copy of the affidavit of A. Ashdown, or the statement of account in red ink, showing that the bill of £680 15s. 3d. was given to balance on account due to W. Dean & Co. by Garsed. Get the items composing the balance of £680 15s. 3d. as proved by Ashdown and Pritchard on the trial that lasted six days.

I, in open Court, on or about the 5th August, 1859, produced a copy of Ashdown and Pritchard's joint affidavit, signed "Want"; the original was filed in the Supreme Court, 2nd March, 1858. The Attorney General, in August, 1859, refused to prosecute me for perjury.

### No. 36.

#### The Under Secretary for Lands to Mr. J. Garsed.

Sir,

Department of Lands, Sydney, 27 April, 1865.

No. 34.

I am directed to acknowledge the receipt of your letter of the 25th instant on the subject noted hereunder, and to inform you that it will receive due attention.

S. B. WARBURTON,

For the Under Secretary.

Subject: Land, corner of Bridge and Pitt streets.

### No. 37.

#### Mr. J. Garsed to The Secretary for Lands.

Sir,

Tobacco Factory, 30½, Castlereagh-street, Sydney, 1 May, 1865.

No. 36.

No. 34.

I beg to acknowledge the receipt of your letter, dated 27 April, 1865, in reply to mine of the 25th instant, the subject, Crown land, corner of Pitt and Bridge streets, opposite the Exchange.

See No. 35.

In addition to the information contained in my second letter to you, on the same subject, dated 26th April, I now refer you to the following affidavits, filed in the office of the Prothonotary, Supreme Court House, Sydney.

Affidavit

Affidavit of Hugh Dixon, filed 10th June, 1858, No. 317. Dean and another v. Garsed. Bill of Exchange—£680 15s. 3d.

Affidavit of A. Ashdown, filed 10th June, 1858.

Joint affidavit of John Garsed, William Robert Smart, and Thomas Sanders Hutchinson, filed June 14th, 1858.

In reply to Ashdown's affidavit: In March, 1857, Ashdown engaged one C. P. Pritchard at a salary of £500 a year, to keep a set of account books on the joint account of Ashdown and self. Ashdown's name was not to appear until after he had left the firm of W. Dean & Co. Between the 1st of April and the 15th July, 1857, Ashdown made use of the firm's name to carry out certain private building speculations between us; that is to say, I, at Ashdown's request, and for our mutual accommodation, accept certain bills of exchange in favour of W. Dean & Co. Ashdown discounts those bills at the Oriental and English, Scottish, and Australian Chartered Bank. By this means Ashdown is placed in funds, and out of those funds I received from Ashdown from time to time cheques signed "W. Dean & Co.," to pay wages and materials towards erecting my Commercial Chambers, opposite the Exchange, repairing certain cottages situate at Chippendale, partly building the "Alma Inn," situate at Camperdown, &c., &c. This Ashdown calls in the firm books "Garsed's advance account," "Garsed's open advance account or loan account"; and I believe an attempt was made to set fire to W. Dean & Co.'s premises on the evening of the 2nd March, 1860, on purpose to destroy Dean and Ashdown's account books, and my belief is confirmed by the words "Advance Account," "Glebe Account" written in pencil upon the fictitious account, for which I suffered, now deposited in the Crown Law Office, and endorsed in the handwriting of the Chief Justice, "Pritchard's Red Ink Account or Memorandum," 5/10/59. My petition and statement, left at Government House on or about 1st March, 1860, had been previously left at W. Dean & Co.'s office for examination, in connection with Dean and Ashdown's account books. Not with papers.

About March, 1857, I engaged Mr. T. S. Hutchinson, then residing in England, to assist in carrying out certain private partnership arrangements entered into between Ashdown and self. He arrived in this Colony December, 1857, and by advice of my attorney, Mr. P. A. Tompson, he was appointed my wife's trustee.

In reply to Hugh Dixon's affidavit, suffice it to say at present that there was mutual credit between us, and my private papers will prove that the balance is in my favour. Mr. T. S. Hutchinson is now and has been in the employ of Mr. Dixon in instructing his girls to manufacture cigars, I believe nearly two years; and it is seldom that I ever mention Mr. Dixon's name, unless it is upon the subject of the growth and manufacture of tobacco in this Colony.

It was in consequence of Mr. T. S. Hutchinson having conveyed to Mr. Hugh Dixon a certain piece or parcel of land called "Coventry," situate and adjoining the Bexley Estate, "Chandler's Grant," for £30, Mr. Hutchinson only receiving £5, that certain deeds, Hutchinson to Garsed dated 10th June, 1858, relating to Bexley House, orchard, paddock, and Coventry were signed in blank, I having promised Hutchinson to pay Mr. Dixon all moneys he had advanced, together with Mr. Thurlow's expenses, which I did, and promised to hold Coventry in trust for Mr. Monteith, of London. At the death of Mr. Adam Wilson the deeds, dated June 10th, 1858, were safely deposited in the Crown Law Office. Mr. Adam Wilson was well acquainted with all the facts connected with this matter.

On the 5th July, 1858, my residence, Willow Lodge, Glebe, was strictly searched, and after 10 at night Mr. James Husband, solicitor, took away in a cab my private papers, not one of which papers was ever to my knowledge submitted in evidence against me; no doubt many of my papers are now destroyed. The first result of this illegal act was that one Marmaduke Constable, a debtor to a large amount, was allowed to prove a fraudulent claim against my estate for upwards of £700.

James Husband, a solicitor, being duly sworn before His Honor Judge Dickinson, stated as follows: On the evening of July 5th, 1858, I called at the house of Garsed, by the instructions of Mr. Hugh Dixon; I had no written instructions for my guidance from any other person; there was a paper which Garsed's wife wanted to tear up (my wife's note, addressed to the present Dean of Sydney), but I stopped her, telling her it was a felony.

After my release from prison for swearing the truth (truth may be assailed, but all the laws made by man cannot destroy it) Mr. Husband informed me that it was illegal of him to take away my private papers, but stated he was well paid, and if he had been paid £1,000 it would not have been too much for what he did. He further stated that if I would give him £100 he would expunge all claims wrongfully allowed against my estate.

"James Husband, Esq.,—

"Dear Sir,

Sydney, 23 July, 1862.

"Understanding from you if you received £100 cash, you would expunge some of the claims disputed by me, and proved in my estate, such as Dean & Co., Constable, Pellow, &c., &c., I have spoken to some of my friends, and they appear willing to assist me. Will you, if you receive £50, trust me the remainder.

"JOHN Garsed.

"Mr. John Garsed,—

"Sir,

375, George-street, 24 July, 1862.

"I am in receipt of your letter, and in reply beg to say I cannot commence the proceedings you require unless £100 be first paid to me.

JAMES HUSBAND."

If the land corner of Bridge and Pitt streets is still the property of the Crown I trust that you will, on the grounds of justice, sell to my wife's trustee, Mr. Thos. S. Hutchinson, the said land to hold in trust for the sole and separate use of my wife, Emma Garsed, her heirs and assigns, for ever. In the event of the Crown having granted the said land to some other individual I trust then in that case that the Crown will convey to my wife's trustee some other land, the property of the Crown, equivalent in value to the cost of the said Commercial Chambers; by so doing my wife will, in the event of my death, be partly recompensed for the money I borrowed upon her four houses, situate in Devonshire-street, Fort-street; the said four houses are now, in consequence of the bill in Equity, the property of the mortgagee.

I have, &c.,

JOHN Garsed.

P.S.

P.S.—I have annexed to this a printed statement to prove to you that the information for perjury, filed in the Supreme Court, 1st August, 1859, is filed contrary to the law of the land. It is a singular fact that Miss Kelly was tried for perjury at the same Criminal Court, October, 1859.

Let this follow the other paper.—M.F. Surveyor General.—5 May.

[Enclosure to No. 37.]

(COPY.)

O.H.M.S.

Tobacco Factory, 304, Castlereagh-street, October 29, 1864.

Queen against John Garsed.

Information for perjury, filed 1st August, 1859.  
 Attorney General—Mr. Bailey.  
 Witness—Archibald Ashdown.  
 Crown Prosecutor—Mr. Holroyd (who appeared for the plaintiff at the Police Office, April and December, A.D. 1858.)  
 Tried at the Criminal Court 5th, 6th, 7th, 8th, 10th, 11th, 12th days October, A.D. 1859.

Mr. J. Garsed to The Honorable The Premier.

Sir,

I beg most respectfully to state that the Attorney General in his unprecedented information states that "I did not give the plaintiff Ashdown a bonus of £2,000." I say that I did give Ashdown a bonus of £2,000, and my statement is confirmed by Mr. Daintrey Solicitor's evidence, sworn at the Police Office, Dec., 1858.

The Attorney General says that "a certain bill of exchange for the sum of £680 15s. 3d. was a debt due by me to the firm of W. Dean & Co., auctioneers, and not a debt due to Archibald Ashdown alone." I say that on the 1st August, 1859, I was not indebted to the late firm of W. Dean & Co., auctioneers, to the value of the ink on this paper.

Law.—Affidavits being admissions upon oath, are evidence as such against the persons that make them.

A joint affidavit made by Ashdown and Pritchard, filed the 2nd March, 1858, states, "the bill of exchange for £680 15s. 3d. was the balance of accounts between John Garsed and Archibald Ashdown, in terms of an agreement prepared and attested by his own solicitor, Mr. R. J. Want, on the 30th September, 1857."

Mr. R. J. Want's evidence at the Police Office proves that the said bill, £680 15s. 3d., is payable to A. Ashdown alone; also, that the said attested agreement contains nothing false.

Copy from His Honor the Chief Justice's notes of evidence:—"Books refused (meaning W. Dean & Co.'s auctioneers, and Pritchard's account-books—the former were nearly destroyed by an incendiary fire, March 2nd, 1860, and the latter the Judge in the civil action ruled that W. Dean & Co. are bound by Pritchard's books.) Charge:—"Single question is whether bill sued on formed a portion of £2,000; whether that sum is a bonus or not is no importance."

I beg most respectfully to state if I had not given Ashdown a bonus of £2,000 the bill for the sum of £680 15s. 3d. would not have been in existence, and in that case there would have been no necessity of my sequestrating my estate to have W. Dean & Co.'s account books examined in connection with Pritchard's fictitious red ink account, now deposited in the Crown Law Office; and the writing in pencil, written thereon after the trial, proves the same totally untrue.

On the 1st August, 1859, the said joint affidavit and about thirty of my documents were lost—in Miss Kelly's case only two documents were missing.

You will greatly oblige by informing me by return of post if the Crown paid Mr. Holroyd for prosecuting me with the public money, or funds belonging to my estate.

I have, &c.,

JOHN Garsed.

(EXTRACT.)

Hyde Park, 7 Feb., 1860.

It is with great reluctance that I announce my inability to enter again into this case—a trial unprecedented for length and cross-examinations. But it is never too late to inquire into facts while the means of inquiry exist. That inquiry, however, must be instituted by the Government, as in England is invariably done. It is not my duty in the present state of things to enter into any such inquiry.

ALFRED STEPHEN.

[Case of Garsed, convicted at the Sydney Gaol Delivery of perjury.]

The last four letters John Garsed received from the Hon. Charles Cowper, Colonial Secretary, states "that it is not considered expedient for the Government to investigate certain circumstances connected with his case.

Then the question is, "why not?"

Sir, Colonial Secretary's Office, Sydney, 8 August, 1862.  
 With reference to your further letter, dated 15th October, 1862, but received on the 15th ultimo, I am directed by the Colonial Secretary to inform you that it is not considered expedient that the investigation of certain circumstances connected with your case, which appears to be the object of your communication, should be instituted by the Government.

Mr. John Garsed,  
 Care of H. Milford, Esq., Pitt-street.

I have, &c.,

W. ELYARD.

Annexed to my letter was a printed statement, which statement includes an epitome of my schedule, filed July 3rd, A.D. 1858.

I, John Garsed, addressed a letter to the acting Chief Justice to ascertain the safety of my documents deposited in the Supreme Court in a certain action relative to a bill of exchange for the sum of £680 15s. 3d.—"the plea for defence amounts to a plea of want of consideration,"—and received the following reply:—

John Garsed, Supreme Court, Sydney, January 3rd, 1861.  
 I am directed by the Acting Chief Justice to acknowledge the receipt of your letter, dated 29th Dec., 1860. His Honor further directs me to state that he has made all due enquiries regarding the documents to which you allude, but has not been able to learn their whereabouts.

SEBASTIAN S. COWPER.

I received a letter from Mr. Robert Sempill. That gentleman in his letter states that he took great care of my documents, and placed them in the proper place appointed by law. In the year A.D. 1862 I received from the Supreme Court twenty-one of my documents (but not all); each is marked "Exhibit," in the handwriting of Mr. Sempill, and the endorsement will prove that not one of them was in evidence in October, 1859.

Ashdown and Pritchard's joint affidavits, filed in the Supreme Court 2nd March, 1858, proves that the said bill of exchange (£680 15s. 3d.) is payable to A. Ashdown alone, in terms of an attested agreement annexed thereto—and I say the same. The said joint affidavit states that the only joint transaction Ashdown had with me was a place called "Rosherville," situate on the North Shore. In the *Sydney Times*, dated 11th June, 1864, is published a copy of an indenture, dated 18th March, 1857, and made between me and Ashdown, which deed states I held in trust for Archibald Ashdown and his heirs one half undivided interest in seven houses, situate in the city of Sydney—the remaining half for myself and heirs.

On the 31st of March, A.D. 1858, Archibald Ashdown brought the case to a dead lock, before going to trial, by swearing at the Police Office that the said bill of exchange for the sum of £680 15s. 3d. was a debt due by me to the firm of W. Dean & Co., auctioneers, and not a debt due to him alone. The case was tried before Mr. Justice Dickinson in April and May, 1858, the particulars of which will be published. In doing so I shall copy Ashdown and Pritchard's evidence from the briefs held by my counsel, now Mr. Justice Wise, and the Honorable W. B. Dalley. Suffice it to say at present that I sequestrated my valuable estate to have W. Dean & Co.'s account books examined before Mr. Purefoy, in connection with Pritchard's journal, and a certain fictitious account, only 106 figures, called "Pritchard's Red Ink Account or Memorandum" (Judge's orders were served for that purpose but no examination took place), and then to release my estate from sequestration.

(COPY)

John Garsed is anxious, out of respect to those gentlemen that signed Mrs. Garsed's first and last petition to establish his innocence from Ashdown's own evidence and his own account books without calling further evidence before the highest tribunal in this colony. (Discharged some months before the expiration of sentence.)

(COPY OF LETTER TO THE CHIEF COMMISSIONER.)

O.H.M.S.

Tobacco Factory, 304, Castlereagh-street, Nov. 21, 1864.

Estate of JOHN GARSEED, Merchant. Voluntary sequestration, 3rd July, 1858.  
Schedule prepared by Mr. P. A. Thompson, solicitor, to meet the regulations of the Court.

To Alfred McFarland, Esq., Chief Commissioner of Insolvent Estates.

Sir,

On the 5th instant I received a further communication from the Hon. Colonial Treasurer. That gentleman states that "moneys are paid into the Treasury by the Official Assignees without such information as would enable him to show the amounts, if any, that have been paid into the Treasury by the Official Assignees in my estate;" and I have to suggest that you address any further letters thereon to the Chief Commissioner of Insolvent Estates, under whose supervision the Assignees perform their duties.

I was greatly surprised on learning that official assignees are allowed by your Honor to pay moneys into the Treasury without being accompanied with such information as would enable the Treasurer to state at once the exact amount paid belonging to each separate estate placed under their management; for under the present system it is possible that an official assignee might receive moneys belonging to several estates, amounting in all to £20,000, and only pay £5,000 of that sum into the Treasury.

On the 3rd instant I received a communication from Mr. Campbell, Registrar. That gentleman states, "with respect to the moneys paid into the Treasury by Mr. Adam Wilson, I presume the accounts were filed with the Prothonotary under the old rules of Court. The same remark applies to Mr. Mackenzie's intromissions with Mr. Garsed's estate, in which, I believe, no moneys have been paid or received since the appointment of a Registrar under the Act 25 Vic. No. 8, and the rules in insolvency made thereunder.

My letter to your Honor, dated 21st October, 1864, was returned to me on the 22nd, endorsed "To be returned unopened to Mr. Garsed, who, I believe, is the writer." (Signed) A. McF., 21/10/1864.

I beg most respectfully to request of your Honor to read this letter, and to answer by return of post the following questions:—

1st.—Were the account books belonging to my Official Assignee, Mr. Adam Wilson, balanced at the time of his death?

2nd. If not balanced, did his successor at any time correctly balance Mr. Adam Wilson's account books, that is, showing the exact amount of moneys received and paid in each separate estate (not closed) placed under the management of Mr. Adam Wilson up to the time of his death?

3rd.—Did the Registrar arrive at the amounts received and paid in my estate, as published by him in the *Sydney Morning Herald* from the records of your office; and, if not, please to state from what source he derived his information—for figures speak for themselves?

I beg most respectfully to state that I make no charges against my official assignees, but at the same time I again state that my complaints are not groundless, and that some of my complaints, which I consider to be matters of public importance, are (according to law) duly certified by your Honor to be true copies, or extracts from the original proceedings, filed of record in your office in my estate. My assignee's report, filed 20th October, 1861, states "my estate is mixed up in law and equity suits; the property has not passed to the official assignee: (Signed) J. P. Mackenzie." My official assignee, on the 20th July, 1863, was duly sworn and examined before your Honor, and the question put to him—"Did any assets come into your hands from the date of your appointment as official assignee, from that time up to the 7th November, 1862?" His answer, "none did."

My complaints are not denied by your Honor; and I say, among other things, that my Official Assignee's management of my estate ceased to be legal 23rd September, 1858 (and, according to law, what followed subsequent to that date must be illegal);—that large sums of money have been received in my estate and not accounted for on the file;—that the official accounts published in my estate are inconsistent with the records of your office;—that a certain document filed in your office (signed, M. Constable, President) was, some time after being filed, altered;—and that several documents are missing.

During the last two years I have frequently and most respectfully requested of your Honor to change my official assignee for one that will act, or allow me to use his name to enable me to release my valuable estate from sequestration, but this simple act of justice is denied me; and I respectfully state that if your Honor declines to answer the above three questions by return I will forward a copy of this to the Honorable Attorney General, who is also Premier, and as such, I believe, has the power to order Mr. Adam Wilson's account books to be forwarded to the Treasury, that the same may be examined and correctly balanced by competent accountants.

I have, &amp;c.,

JOHN GARSEED.

My letter was returned to me open by the Messenger of the Court, on the 28th November, at 5 p.m. I believe, in consequence of my having addressed a further letter to the Chief Commissioner, dated 28th November, 1864, in which I say, "Not receiving a reply to my letter of the 21st inst., I have, according to promise, forwarded a copy to the Honorable Attorney General, and beg most respectfully to state that in consequence of your Honor's administration of justice in my estate I am compelled to appeal to the public for that justice which is denied me by your Honor."

If my official assignees have kept proper accounts in accordance and within the sense and meaning of the Insolvent Act, 5 Vic. No. 17, then there can be no possible objection to the accounts being examined in open Court. I have in my possession a summons signed by Mr. McFarland, ordering Mr. Mackenzie to produce before him the late Mr. Adam Wilson's account books; but the books were not produced, neither was my attorney, the late P. A. Thompson, examined. I presume that if an insolvent fails to keep proper accounts and squanders his means of payment the Chief Commissioner would refuse his certificate. In my case I was committed to take my trial for perjury because Pritchard's journal, kept under the inspection of plaintiff Ashdown, proves that the settlement between us is strictly in accordance with an attested agreement annexed to Ashdown and Pritchard's joint affidavit. The said journal further proves that on the 1st October, 1857, I had a balance in my favor of £19,315 8s. 2d., and after having suffered three years and nearly five months in prison for SWEARING THE TRUTH, I am now anxious to know what is done with my properties and my wife's properties, and why a bill in equity was filed 1st Feb., 1859. Mr. W. Dean, and Mr. J. Carroll, his principal accountant, signed Mrs. Garsed's first petition; the last-named gentleman proved at my trial, in twelve minutes, that the fictitious account for which I suffered, endorsed in the handwriting of the Chief Justice "Pritchard's red ink account or memorandum," 5-10-59, is totally untrue. (See Mr. Carroll's letter, published in the *Empire*, 12th October, 1859.)

On the 30th September, A.D. 1857, I, John Garsed, by an agreement dated 30th September, 1857, and registered the 13th February, A.D. 1863, No. 814, book 81, repurchased from one Archibald Ashdown (at that time a partner of William Dean, and trading in Sydney under the style of W. Dean & Co., auctioneers), certain properties for the sum of £9,830 15s. 3d.; this sum includes a bonus of £2,000 and the balance of a bill of exchange for the sum of £680 15s. 3d., which said bill of exchange I, at Ashdown's request and for his accommodation, accepted in favor of W. Dean & Co.

On the 9th day of February, A.D. 1858, an action was commenced in the Supreme Court of New South Wales on the said bill of exchange, in which said action William Dean and another were the plaintiffs, and I was the defendant, and in the course of the proceedings in the said action, and in order to defend the same, it was necessary that my attorney should file a plea to the declaration of the said plaintiffs, and that my plea should be accompanied by my affidavit of the truth of such plea, as required by a certain Act of the Legislature, intitled "*An Act to facilitate the remedies on bills of exchange and promissory notes.*" My equitable plea, prepared by my attorney and verified by my affidavit, was filed on the 26th February, in the year aforesaid, and is strictly true. The alleged perjury, for which I suffered illegally in a prison three years and nearly five months, is assigned on this affidavit. The Honorable Attorney General only copied from my affidavit the following few words and figures:—

"I gave Ashdown a bonus of £2,000 or thereabouts, of which the £680 15s. 3d., the amount of the bill of exchange now sued upon, forms part." My affidavit was sworn before Edwin Daintrey, Esq., a Commissioner of the Supreme Court for taking affidavits.

LAW: "When perjury is assigned on an affidavit, that part on which the perjury is assigned may be explained by another part."

In the Supreme Court in its criminal jurisdiction I was not allowed to travel out of the record or demur to the informal, and my questions relating to the partnership transactions mentioned in my affidavit were not allowed to be answered.

Application

Application was made to take my equitable plea off the file, on the grounds disclosed in the joint affidavit of Archibald Ashdown and Charles Pearson Pritchard, filed in the Supreme Court on the 2nd March, in the year aforesaid; and on the 3rd of the same month the Judge sitting in Chambers refused the said application. On the 4th my attorney, the late Pidcock Arthur Tompson, filed my reply to the said joint affidavit.

LAW: "Upon an indictment for perjury there must be two witnesses; one alone is not sufficient, because there is in that case only one oath against another."

Endorsed on the information for perjury, filed in the Supreme Court, Sydney, 1st August, A.D. 1859.

Witness, ARCHIBALD ASHDOWN.

LAW: "Affidavits being admissions upon oath are evidence as such against the parties who made them."

After I had sequestrated my valuable estate to protect my properties and to seek justice, the said joint affidavit was taken from its proper place of deposit appointed by law.

LAW: STEALING, OBLITERATING, OR REMOVING RECORDS: Statute enacts,—“That if any person shall steal, or shall for any fraudulent purpose, take from its place of deposit for the time being, or from any person having lawful custody thereof, or obliterate, injure, or destroy any record, deposition, affidavit, or any original document whatsoever, of or belonging to any Court of record, or relating to any matter, civil or criminal, began, defended, or terminated in any such Court, every such offender shall be guilty of a misdemeanor.

(COPY.)—Copied from evidence received by me from the Crown Law Office:—

“The deponent, Andrew Mackechnie, on his oath, states:—I am one of the clerks of the Supreme Court; I produce the proceedings in the said Court, in a case of William Dean and Archibald Ashdown against John Garsed; I produce a summons dated 2nd March, 1858, issued by the Prothonotary, calling upon defendant to show cause why the plea should not be struck out; I have not got an affidavit sworn before Mr. Pownall, 2nd March, 1858, by Ashdown and Pritchard; I am not aware that any such affidavit was ever filed; if it had been filed and in its proper place it would have been in the hands of the Prothonotary, and then in my custody among the papers I produced; if it had been sworn and filed in the case of Dean and Ashdown against Garsed, and was in its proper place, it would be with the papers produced; there would be no record kept of any such affidavit having been filed; I know nothing about the affidavit; I said yesterday that there was an affidavit missing, and I say so again; I don't know of my own knowledge that such an affidavit was ever filed or in the Court; I won't swear I never saw the affidavit; I don't remember having seen it. (Signed) ANDREW MCKECHNIE.

Sworn at Sydney, this 17th day of December. Signed before D. FORBES, J.P.”

#### IN THE SUPREME COURT OF NEW SOUTH WALES.

*The twenty-sixth day of February, in the year of our Lord, 1858.*

GARSED, defendant, DEAN & ASHDOWN.—The defendant, by Pidcock Arthur Tompson, his attorney for defence on equitable grounds, says: That before the commencement of this suit defendant and plaintiff Ashdown were in partnership together in various transactions, and that in settlement of those transactions (except certain lands, buildings, and premises at Onion's Point, on the north shore of the harbour of Port Jackson, in the Colony of New South Wales, and known as the Rosherville house and grounds in which they were also jointly interested), the defendant gave to the said Ashdown a *bonus* of £2,000 or thereabouts, of which the £680 15s. 3d., the amount of the bill of exchange now sued upon, forms parts. And the defendant further says, that the said bill of exchange for £680 15s. 3d. was drawn by the plaintiff, Dean & Co., of which firm the said Ashdown was and still is a partner upon defendant, and was at the request of the plaintiff, Ashdown, accepted by defendant; and that to secure the payment of the said sum of £680 15s. 3d., defendant then handed to the plaintiff the title deeds of certain other lands belonging to defendant, and defendant also requested the said plaintiff to sell his, the defendant's, interest in the Rosherville house and grounds, and to apply the proceeds in or towards liquidation of the said sum of £680 15s. 3d., and the plaintiff, Ashdown, has repeatedly promised to do so, but has broken his promise. And the defendant avers that it was the duty of the said plaintiff to sell the said Rosherville house and grounds, and the other lands which, on the said 3rd day of October, in the year 1857, were and still are of greater value than the amount of the said bill of exchange, and that until they have exhausted the aforesaid securities they are not entitled to proceed against defendant upon the said bill of exchange.

1, Commercial Chambers, New Pitt-street, Sydney.

The above equitable plea is verified by affidavit sworn before Edwin Daintrey, Esq., solicitor.

PIDDOCK ARTHUR TOMPSON,  
Defendant's Attorney.

#### IN THE SUPREME COURT OF NEW SOUTH WALES.

*Between William Dean and Archibald Ashdown, plaintiffs, and John Garsed, defendant.*

Let the defendant, his attorney, or agent, attend before the Judge sitting in Chambers, at the Supreme Court House, King-street, Sydney, on Wednesday next, the 3rd day of March instant, at the rising of the Court, to show cause why the plea filed herein should not be struck out, with leave to the plaintiffs to sign judgment as for the want of a plea on the grounds that the said plea is so framed as to prejudice, embarrass, and delay the fair trial of the action. And that the said plea is wholly false, and on the further grounds stated and disclosed in the joint affidavit of Archibald Ashdown and Charles Pearson Pritchard, sworn and filed in support of this application, and a true copy whereof is served herewith.

Dated this 2nd day of March, A.D. 1858.

For the Prothonotary,

A. P. MACKECHNIE, 3rd Clerk, Supreme Court.

To the above defendant and to Pidcock Arthur Tompson, Esq., his Attorney.

#### IN THE SUPREME COURT OF NEW SOUTH WALES.

*Between William Dean and Archibald Ashdown, plaintiffs, and John Garsed, defendant.*

On the 2nd day of March, in the year 1858, Archibald Ashdown, of Sydney, one of the abovenamed plaintiffs, and Charles Pearson Pritchard, of O'Connell-street, in the Colony of New South Wales, gentleman, being severally sworn, make oath and say as follows—

1. I, Archibald Ashdown, for myself say I never was in any partnership transaction with the abovenamed defendant, the only joint transaction in which I was concerned with him being the purchase of a place called *Rosherville*, and the erection of certain buildings thereon.

2. The said John Garsed never gave me a *bonus* of two thousand pounds.

3. The settlement of the transactions mentioned in the affidavit of John Garsed, sworn herein on the 26th day of February, 1858, was made by an agreement, of which a copy is hereunto annexed, and marked with the letter A, and which agreement was in fact a mere re-purchase by the said John Garsed of certain properties previously purchased by me from him, and the said bill of £680 15s. 3d., the subject matter of this action does not form part of any *bonus*, none having ever been given by the said John Garsed to me.

4. Shortly before the said agreement I offered to the said John Garsed, if he would place me in the same position I was in before I had any transactions with him, to give him £200 and give him back all the property I had so purchased from him, which terms the said John Garsed refused to accede to.

5. The title deeds of some property of the said John Garsed were handed to the said William Dean & Company as a collateral security for the due payment of the said sum of £680 15s. 3d., but the said W. Dean & Co. never had any power of sale in the said property.

6. The title deeds of the said Rosherville Estate have been in my hands since the month of April last, or thereabouts, as the joint owner of the same with the said John Garsed, but I never promised the said John Garsed to sell the same, and apply the proceeds in and towards the payment of the sum of £680 15s. 3d.

7. I am advised that the plea filed by the defendant herein contained no defence to this action, and I verily believe that such plea has been filed merely for the purpose of delaying the abovenamed plaintiffs in obtaining judgment for the amount due upon the bill of exchange, upon which this action is brought.

8. I have been informed and verily believe that the said defendant is making away with his property for the purpose of avoiding the payment of this bill of exchange, and that the said defendant has stated his intention to place his property in such a position as the abovenamed plaintiffs shall not be able to touch it under any execution obtained herein.

9. I, Charles Pearson Pritchard, for myself, say, I have been fully acquainted with the whole of the transactions between the said John Garsed and the said Archibald Ashdown, and have been employed by the said John Garsed and the said Archibald Ashdown to make up the accounts hereof. (Meaning to keep a set of account books.)

10. The said Archibald Ashdown never was in partnership with the said John Garsed, and never had any joint transaction with him, except the purchase and building of Rosherville.

11. The settlement of the transactions between the said John Garsed and the said Archibald Ashdown, mentioned in the affidavit of John Garsed, sworn herein on the 26th day of February, 1858, was carried into effect by an agreement, a copy of which is annexed to this affidavit.

12. The said John Garsed never gave the said Archibald Ashdown a bonus of £2,000.

13. The said Archibald Ashdown having previously to the entering into of such agreement offered to the said John Garsed to reconvey all the property which he had purchased from him, and to give him a cheque for the sum of £200 if he would place him in the same position as he was before purchasing any property from him.

14. The bill of exchange for the sum of £680 15s. 3d. did not form part of a bonus of £2,000, but was the balance found to be due on the accounts between the said Archibald Ashdown and the said John Garsed, but was in no way a part of any bonus.

15. We, the said Archibald Ashdown and Charles Pearson Pritchard, say that we have read the affidavit of the abovenamed defendant, sworn herein on the 26th day of February, 1858, and that the several allegations therein, that "before the commencement of this suit he and the plaintiff Ashdown were in partnership transactions," and that in settlement of these transactions ("except certain lands, and buildings, and premises at Onion's Point, on the North Shore of the harbour of Port Jackson, in the Colony of New South Wales, and known as the Rosherville house and grounds, in which I and Ashdown were also jointly interested), I gave Ashdown a bonus of £2,000 or thereabouts, of which the £680 15s. 3d., the amount of the bill of exchange now sued upon, forms part," are altogether untrue.

16. And I, the said Archibald Ashdown, for myself further say, that the allegations in the above-mentioned affidavit, "that he, the said John Garsed, requested the plaintiff to sell his interest in Rosherville house and grounds, and to apply the proceeds in or towards payment of the said £680 15s. 3d., and the plaintiff, Archibald Ashdown, has repeatedly promised to do so, but has broken his promise," is also totally untrue.

Sworn by the two deponents, on the day first above-mentioned, at Sydney, before me,—

A. ASHDOWN.

C. P. PRITCHARD.

GEORGE POWNALL, a Commissioner for Affidavits.

Archibald Ashdown, on his oath, states as follows: I was at one time a partner in the firm of Dean & Co.; I engaged Pritchard to look after the accounts between Garsed and self; the books kept by Mr. Pritchard were kept by him in an office he had in the building occupied by W. Dean & Co.; Mr. Charles Pearson Pritchard has left the Colony; about 23rd or 24th September, 1857, I saw an account produced, marked N, handed to the defendant; it was in red ink [meaning the fictitious account for which I suffered]; Mr. Daintrey prepared the whole of the deeds; the bills £1,900 and £700 (meaning two bills due 11th and 14th August, 1857), were renewed by Garsed as I have stated, were given to Dean & Co. as between Garsed and self; I only was liable, and not Dean & Co.; there was not a fresh agreement between Garsed and self, 11th August, 1857, but a letter passed; Mr. Randolph Want prepared and attested the agreement 30th September, 1857; I understood it; I do not come here to impeach that agreement; the bills making up the £7,830 15s. 3d. are all paid; if, under all my agreements with Garsed, I had been a loser, Dean & Co. would not have participated in the loss; I never took from Garsed yet any bills in my own name, except two for £50 each, on account of Pritchard's salary, and these I sold at 20 per cent. discount, endorsed without recourse; those bills were given long after the agreement of 30th September, 1857.

Sworn at Sydney, this 20th December, 1858,—

(Signed) D. FORBES, J.P.

(Signed) A. ASHDOWN.

Copy from receipts for documents deposited in the Prothonotary's office, marked exhibits in Dean and another v. Garsed, bill of exchange, £680 15s. 3d.

Deed of Trust, Garsed to Ashdown, dated 18th March, 1858.

(Signed)

PHILLIP DIVE for R. J. WANT.

On reading this deed the Judge ruled partnership transactions proved.

Agreement 11th August, 1857, Ashdown to Garsed.

(Signed)

E. A. SEAWELL.

The above two documents are published in the *Sydney Times*, dated 4th and 11th June, 1864.

[Copied from affidavit filed in the Prothonotary's office.]

In the Supreme Court of New South Wales.

In the matter of Randolph John Want *ex parte* John Garsed, on the 21st of October, 1862, Randolph John Want, of No. 142, Pitt-street, gentleman, being duly sworn, maketh oath and saith as follows:—

1. I am not aware and cannot comprehend from the very general description given in the summons what exhibits the said John Garsed requires, except the two documents of which the dates are given (meaning the two documents published).

2. The said two documents are, I believe, in the possession of Mr. Archibald Ashdown, one of the plaintiffs in the action mentioned in the first paragraph of the affidavit, sworn and filed herein by the said John Garsed in support of his application herein.

Sworn by the deponent, on the day first above-mentioned, at Sydney, before me,—

(Signed)

R. WANT.

RICHARD MILFORD, a Commissioner for Affidavits.

I believe I have now proved that the information for perjury was filed contrary to common law.

In this my appeal to the public for justice, I beg most respectfully to state that all I require is to establish my innocence before the highest legal tribunal in this Colony from plaintiff's own evidence and their own account books, without calling further evidence. In my next will be published a copy of agreement annexed to Ashdown and Pritchard's joint affidavit, the said fictitious red ink account, also my examination of W. Dean & Co's account books in connection with the same.

## No. 38.

### Mr. J. Garsed to The Secretary for Lands.

Sir,

Tobacco Factory, 304, Castlereagh-street, Sydney, 2 May, 1865.

I beg to acknowledge the receipt of your letter, dated 28th April, 1865, in reply to mine of the 26th ultimo. Subject:—Land corner of Bridge and Pitt streets.

I received yours after I had written a further letter on the same subject, dated 1st May, my private residence, 60, Surry-street.

Mr. William Robert Smart's conveyancer—affidavit sworn before Mr. Gurner, solicitor, a Commissioner for Affidavits, on the 3rd March, 1858, and filed in the Supreme Court—in reply to Ashdown and Pritchard's joint affidavit, filed in the same Court 2nd March, 1858, will afford you further information respecting the erection of buildings on the said land, corner of Bridge and Pitt streets.

The following deed speaks for itself:—

2, Pitt-street, 11 November, 1857.

RECEIVED from Mr. Garsed on loan as deed, dated 5th June, 1856. R. J. Want to J. Garsed.

Conveyance and indemnity.

To be returned to Mr. Garsed as early as convenient.

R. J. & G. WANT,  
Per W. C. FELL.

The

No such letter sent.  
See No. 25.  
See No. 27.

The following memorandums I believe will sufficiently prove that I cannot be indebted to the firm of R. J. & G. Want, solicitors:—

THE firm's account between us and Garsed is thus stated and settled at £400 for the account to June 30th, 1857.

R. J. WANT.  
WANT, ROXBURGH, & WANT.  
JOHN GARSEED.

I paid the £400, and subsequent to June 30th, /57, Mr. George Want received from one Mr. Conder, £50, money I had lent him, secured upon a certain cottage situate at New Parramatta:—

I HAVE received from Mr. Garsed £200, being for his half interest of 400 feet of land at New Parramatta, on which some cottages are already erected, and the remaining portion to be agreed on hereafter.

R. J. WANT.

I paid the cost of erection of six cottages on the said land. The deeds are now in Mr. R. J. Want's possession, not registered:—

	£	s.	d.
Principle .....	1,050	0	0
Interest at 5 per cent., 1½ year .....	318	15	0
Interest to October 3rd, 1857.....	17	10	0
	<u>£1,386</u>	<u>5</u>	<u>0</u>

Mr. Garsed paid me this amount in full for his mortgage, 3rd October, 1857.

R. J. WANT.

I HAVE received payment of Mr. Garsed's promissory-note for £437 13s. 2d. by a transfer of thirty shares in the Joint Stock Bank.—October 5th, 1857.

R. J. WANT.

THE account between R. J. Want and John Garsed, in respect to Vauxhall, is stated and settled at £100.—21st Nov., 1857.

R. J. WANT.  
JOHN GARSEED.

The following copy is extracted from a copy received by me from the Crown Law Office to prove to you that a certain bill, £680 15s. 3d., was payable to Ashdown individually:—

*Randolph John Want*, on his oath, states:—I had distinctly informed Mr. Garsed that I should not act for him; I was acting for Ashdown alone; I never acted for Garsed in the settlement of the agreement of the 30th September, 1857; I had previously acted for Garsed in reference to the properties (meaning on the 11th of August, 1857); a mortgage of £1,050 was owing to me on one of the properties at the Glebe; I received that money; I prepared, and am the attesting witness to the agreement, 30th September, 1857; it contains nothing false; a bill was to be given for the balance by Garsed to Ashdown at a short date, payment of which was to be secured by the depositing of the deeds.

Sworn, at Sydney, before,—

D. FORBES, J.P.

R. J. WANT.

Mr. Piddock Arthur Tompson was my solicitor in September, 1857, and it was he that gave me the information that Mr. Want's clerk had left out the value of my properties in engrossing the agreement prepared by Mr. R. J. Want on the 11th of August, 1857, and as the basis of that agreement I left with Mr. Want the contract signed by Ashdown, 15th July, 1857.

The lease granted to me, relating to the land corner of Bridge and Pitt streets, speaks for itself.

I have, &c.,

JOHN GARSEED.

## No. 39.

### Mr. J. Garsed to The Secretary for Lands.

Sir, . Tobacco Factory, 304, Castlereagh-street, Sydney, 4 May, 1865.

No. 37.

In my letter addressed to you, dated 1st instant, I say I believe an attempt was made to set fire to W. Dean & Co.'s premises on the evening of the 2nd March, 1860, on purpose to destroy Dean & Ashdown's account books, and my belief is confirmed by the words "advance account," "Glebe account," written in pencil upon the fictitious account, for which I suffered, now deposited in the Crown Law Office, endorsed in the handwriting of the Chief Justice. ("Pritchard's red ink account or memorandum, 5/10/59".)

The following is an extract from my letter, dated 13th August, 1862, addressed to the Honorable John F. Hargrave, Esq., Attorney General:—"At my last interview we had some conversation about Mr. Bailey, late Attorney General, relating to my case, Ashdown v. Garsed. I believe Mr. Bailey's act was unconstitutional in allowing his name to be used to the information filed 1st August, 1859, on the grounds that the matters contained in the said information are not sufficient in law. I beg to call your attention to my letter addressed to you on the subject, 1st May, 1861.

Not with papers.

Not necessary.  
See No. 54.

The following is an extract from my letter, dated 14th August, 1862, addressed to the Honorable the Colonial Secretary, in reply to his letter dated 8th August, 1862.

[Government Gazette.]

Colonial Secretary's Office, Sydney, 12 March, 1860.

£100 REWARD.

WHEREAS on the evening of Friday, the 2nd instant, an attempt was made to set fire to the premises of Messrs. W. Dean & Co., auctioneers, Pitt and O'Connell-streets, by some explosive compound by some persons unknown: Notice is hereby given that a reward of £100 will be paid by the Government to any person who may within six months from the present date give such information as shall lead to the apprehension and conviction of the guilty parties.

CHARLES COWPER.

I prepared a petition and statement to his late Excellency. My statement discloses various accounts kept in my name by A. Ashdown in the account books belonging to the firm of W. Dean & Co.

On the 24th February, 1860, Mrs. Garsed left my statement for examination at the office of W. Dean & Co. Ashdown at that time was not a partner.

Copy in the handwriting of Mrs. Garsed.

William

William Dean, Esq.,—  
Sir,

The petition you were so kind as to sign this morning is merely a statement of facts. As Mr. Stokes was a witness at the Police Court on Mr. Ashdown's behalf, I beg of you that he shall not be made acquainted with the matter, as he is our greatest enemy (meaning Ashdown), and will do all in his power to keep my unfortunate husband where he is.

EMMA GARSEED.

On the 25th of the same month Mrs. Garsed received from Mr. Dean my statement, together with her said letter, endorsed I believe in the handwriting of Mr. Stokes:—"The memorial is to ask to have the whole of his affairs investigated, and not for any remission."

I CERTIFY that I have this day erased the name of W. Dean & Co. on the statement of Mr. Garsed.—Dated this 25th February, 1860.

JAS. B. GUZZARONI.

On or about the 1st of March, 1860, Mrs. Garsed left my statement at Government House; on the 2nd of the same month my five distinct accounts, kept by Archibald Ashdown in Messrs. W. Dean & Co.'s books, were nearly destroyed by an explosion of gun-cotton. On the 10th of the same month I addressed a long letter in words and figures to Wm. Dean, Glenmore Road. Some months subsequent to the said explosion I forwarded you in a registered letter a true copy of my said letter, addressed Wm. Dean, Glenmore Road, dated 10th March, 1860.

Not with the papers.

The following are the names of A. Ashdown's private accounts kept by him in Wm. Dean & Co.'s account books on the 2nd March, 1860:—"Garsed's advance account," "Garsed's Glebe account," "Garsed's open advance account."

I then set out a copy of an account received by me from the Crown Law Office in the handwriting of Mr. Frazer, one of the clerks of the Crown Law Office, on the 29th July, 1862, endorsed "Pritchard's red ink account or memorandum." Reg. v. John Garsed, 5/10/59.—E.L. (E.L. means the Chief Justice's Associate).

Will the Government inform me the date the above memorandum of accounts were examined in connection with those account books nearly destroyed by an explosion of gun-cotton, also the name of the person in whose handwriting "Glebe account" and "advance account" are written with pencil on the said memo., called Pritchard's red ink account.

JOHN GARSEED.

On the 19th of August, 1862, I received a letter from the Honorable Colonial Secretary in reply to the above (62-4,009-396.)

Letter-book containing this cannot be found.

Mr. Francis Michael Stokes was foreman of the jury—civil action relative to a bill of exchange for the sum of £680 15s. 3d., and he signed Mrs. Garsed's first petition, worded on the grounds of innocence. This was some time after my statement was left at W. Dean & Co.'s office for examination, also after Mrs. Garsed's petition and statement were left at W. Dean & Co.'s office for examination. Previously to the Martin administration I lent to Mr. Sutherland, M.P., Mrs. Garsed's statement, and I think it is quite time he returned my wife's statement. A marginal note is written in pencil—"Mr. Stokes did attend."

On reading the evidence relating to the said attempt to set fire to W. Dean & Co.'s premises, I beg to state at that date I was under the impression that some person or persons in the employ of W. Dean & Co. had set fire to the premises, but from information I received some time past I now feel convinced in my own mind that all those persons that were in the employ of W. Dean & Co., 2nd March, 1860, were totally unacquainted with the mystery that still surrounds that fire.

I have entered into this explanation in consequence of the wording of Mrs. Garsed's note, addressed to William Dean, Esq., for any stranger unacquainted with the circumstances connected with my case, on reading Mrs. Garsed's note, it might leave an impression on his mind that Mr. Stokes was my greatest enemy.

I have, &c.,

JOHN GARSEED.

#### No. 40.

The Under Secretary for Lands to Mr. J. Garsed.

Sir,

Department of Lands, Sydney, 10 May, 1865.

With reference to your letter of the 26th ultimo, respecting your transactions with regard to certain houses and lands in the City of Sydney, I am directed by the Secretary for Lands to state that he cannot understand the purport of your communication, and that it will be necessary for you to put your views and wishes in a more intelligible shape.

No. 35.

I have, &c.,

MICHAEL FITZPATRICK.

#### No. 41.

Mr. J. Garsed to The Secretary for Lands.

Sir,

Tobacco Factory, 304, Castlereagh-street, Sydney, May 15, 1865.

On Saturday last I received by post the following letter:—

No. 40.

Sir,

Department of Lands, Sydney, 10 May, 1865.

With reference to your letter of the 26th ultimo, respecting your transactions with regard to certain houses and lands in the City of Sydney, I am directed by the Secretary for Lands to state that he cannot understand the purport of your communication, and that it will be necessary for you to put your views and wishes in a more intelligible shape.

See No. 35.

I have, &c.,

MICHAEL FITZPATRICK.

Mr. J. Garsed, 304, Castlereagh-st., Sydney.

In reply to that portion of the above letter which I have underlined [italics] I beg most respectfully to refer you to my letter, dated 25th April, 1865:—

See No. 34.

Sir,

Department of Lands, Sydney, 27 April, 1865.

I am directed to acknowledge the receipt of your letter of the 25th instant, on the subject noted hereunder, and to inform you that it will receive due attention.

See No. 34.

I have, &c.,

S. B. WARBURTON,

For the Under Secretary.

To Mr. J. Garsed, Tobacco Factory, 304, Castlereagh-st.

Subject—Land, corner of Bridge and Pitt streets.

In

See No. 35.

In my letter addressed to you, dated 26th April, 1865, is a copy of a certain document, in the handwriting of my attorney, Mr. Piddock Arthur Tompson, instructing Mr. William Robert Smart, conveyancer, not to register a certain trust deed, Hutchinson to Garsed, dated 4th February, 1858, which said trust deed relates to land, corner of Bridge and Pitt streets.

See No. 37.

In my further letter to you, relating to same subject—land, corner of Bridge and Pitt streets, dated Sydney, 1st May, 1865,—I say, "If the land, corner of Bridge and Pitt streets, is still the property of the Crown, I trust that you will, on the grounds of justice, sell to my wife's trustee, Mr. Thos. Sanders Hutchinson, the said land, to hold in trust for the sole and separate use of my wife, Emma Garsed, her heirs and assigns for ever." In the event of the Crown having already granted the said land to some other individual, I trust, then, in that case that the Crown will convey to my wife's trustee some other land, the property of the Crown, equivalent in value to the said Commercial Chambers, meaning certain buildings erected by me at a cost of £1,500, or thereabouts, on the said land, corner of Bridge and Pitt streets. By so doing, my wife will, in the event of my death, be partly recompensed for the money I borrowed upon her four houses, situate Devonshire-street, Fort-street; the said four houses are now, in consequence of the bill in equity (meaning a bill now pending in equity, filed 1st February, 1859; plaintiff, the late Adam Wilson; defendants—myself, my wife, and my wife's trustee), the property of the mortgagee.

The facts which relate to the land, corner of Bridge and Pitt streets, so far as I am concerned, are simple, and are as follows:—

On or about the beginning of January, 1857, Mr. William Robert Smart, conveyancer, submitted to me a plan of the said land, and, from conversation I had with him respecting the same, induced me to lease on certain conditions the said land from Joseph Thomas, Andrew Styles, William Crane, and John Williams, Esquires.

On being informed that a certain portion of the said land, having a frontage to Pitt-street, had been by the Crown originally reserved for a cab stand, but that, in order to widen Hamilton-lane, running from Bridge-street to Hunter-street, the Crown made an exchange of land—that is to say, the Crown exchanged the land originally reserved for a cab-stand for a piece or parcel of land adjoining.

In consequence of the peculiar shape of the said land, corner of Bridge and Pitt streets, and in consequence of the said exchange of land, I requested my surveyor, Mr. Charles Henry Storey, to have the boundary of the said land marked out by one of the Government surveyors.

The following is copied from Mr. C. H. Storey's account:—

Mr. Garsed, Glebe, to C. H. Storey,—

1857.  
February 7th.—Attending the City Engineer and Surveyor, relative to surveying Tank Stream.  
March 21st.—Attending at Surveyor General's, and at Mr. Burrowes', respecting land in Pitt-street.  
" 30th.—Attending Mr. Burrowes, about covering in the Tank Stream.  
April 8th.—Attending at Surveyor General's.  
" 9th.— Do. do.  
" 25th.—Attending upon the City Building Surveyor, to give notice for houses in Pitt-street, meaning my Commercial Chambers.

After my release from prison for swearing the truth, Mr. William Robert Smart, conveyancer, informed me that, in consequence of a mistake on the part of some Government Surveyor, *I had built my Commercial Chambers on Crown land*, that, in order to protect my interest, he had addressed a letter to the Government, offering to purchase the said land, corner of Bridge and Pitt streets, at the upset price, but received no reply, and that at the suit of the Crown he was ejected from the Commercial Chambers, and his goods turned into the street.

The impression on my mind is that my lease of the said land, corner of Bridge and Pitt streets, is dated about the middle of August, 1857, and as I was no party to the mistake made by the Crown Land Surveyor I therefore humbly submit that the Crown ought not, in equity and justice, to allow either me or my wife, or her heirs, to suffer in consequence of such mistake.

I have, &c.,

JOHN Garsed.

P.S.—The last paragraph but one of the following memorandum relates to the rents of the said Commercial Chambers:—

The following memorandum will fully explain the mystery that surrounds the bill £680 15s. 3d.; also the real value of Garsed's estate.

The following pencil memorandum was deposited in the Pritchard account books after my trial in October, 1859. Pritchard's Journal, page 22:—

Ashdown takes over Dean & Co.....	£1,154 18 0
Bills to .....	6,675 17 3
	£7,830 15 3

Page 24, Ashdown claims £9,830 15s. 3d. Pages 25 and 26 show the manner in which Garsed pays or secures to Ashdown £10,330 15s. 3d., which is £500 more than the above £9,830 15s. 3d. realized, and show that £680 15s. 3d., the bill sued on, is the balance of the account due to Ashdown.

The following items compose part of the above sum of £1,154 18s.:—July 3rd, cash per cheque, £150; 10th do., £150; 16th do., £150; 24th do., £250. Those cheques relate to private partnership transactions between self and Archibald Ashdown, and given to pay wages, &c.

Joseph Carroll's evidence, copied from His Honor the Chief Justice's notes:—I have seen Pritchard's books; they are here—Pritchard's journal, page 26, under date September, 1857; entry, A. Ashdown, dr. to sundries, £10,330 15s. 3d. The dr. entry precedes this page 23, as provided for in agreement, dated 30th September, 1857; in ledger entry corresponding refers to entry, page 23; in journal upper garden is valued at £2,800.

April 3rd, 1857, in consideration of the sum of £2,900, to be paid to me in manner hereinafter stated, I agreed to erect for Archibald Ashdown a dwelling-house upon land situated at the Glebe. Payment of the above sum to be made in sixteen weekly payments of £100 each; the residue during the progress and upon the completion of the works. [A large portion of the residue is not yet paid. Ashdown swears that the only joint transactions in which he was concerned with me being the purchase of a place called "Rosherville," and the erection of certain buildings thereon.] I received the above sixteen weekly payments

payments of £100 each, and each cheque was signed W. Dean & Co. Ashdown calls this account, in W. Dean & Co.'s account books, "Garsed's Glebe account." After long and frequent agreements between Mr. Wise and Mr. Isaacs, His Honor Judge Dickinson ruled that W. Dean & Co. are bound by Pritchard's account books.

Pritchard's evidence proves that he wrote up his journal from page 20 some time after the 30th September, 1857. Garsed received from Ashdown's office Pritchard's account books on the 22nd of December, and closed the books on the 31st, 1857; subsequent to that date Garsed instructed Mr. Lawrence and Mr. F. T. Humphery, official assignee, both competent accountants, to examine and balance Pritchard's journal, which they did.

On the death of Mr. Adam Wilson certain deeds, dated 10th June, 1858, signed in blank, relating to Bexley House, orchard, paddock, and Coventry were, together with several other deeds, safely deposited in the Crown Law Office. September, 1857, Garsed borrowed from S. H. Terry, Esq., the sum of £3,500 for five years, secured by way of mortgage upon Bexley, upwards of 1,000 acres of land, and ground rents of a certain other estate situate at Camperdown. In May, 1858, the original mortgage debts were reduced by payment to Mr. Terry of the sum of £1,500. On 4th August, 1858, Mr. S. H. Terry, examined by affidavit, proved a debt against Garsed's valuable estate for £2,000, balance of principal money secured, together with interest from 25th June to 3rd July, 1858, amounting to the sum of £3 1s. 1½d. On the 3rd November, 1858, Adam Wilson filed an affidavit in the Supreme Court to restrain Mr. S. H. Terry from selling the said properties.

On and after September Adam Wilson and John Garsed cautioned the public from purchasing certain properties mentioned in a bill now pending in equity against John Garsed and others; and after the death of Adam Wilson, John Garsed cautioned the public against purchasing certain properties by advertisement published in the *Government Gazette*.

Mr. Clark Irving received the rents coming in from Garsed's Commercial Chambers, opposite the Exchange; also Garsed's one-third share of rents coming in from forty-five houses situate Bay and Ultimo streets, Glebe. Garsed borrowed from Mr. Irving, about June, 1858, the sum of £160, secured upon his Commercial Chambers, out of which sum Mr. Irving deducted £80, due to him for interest, and promised to account to Garsed for the rents.

In May, 1858, the rents of the said Commercial Chambers were upwards of £500 per annum.

Mrs. Garsed left with my petition and statement at Government House, on or about 1st March, 1860, copies of certain correspondence, agreements, affidavits, receipts, and Pritchard's journal, printed by Mr. Parkes, editor of the *Empire*, which said statement had been previously left with W. Dean for examination in connection with W. Dean & Co.'s account books.

JOHN GARSED.

The Surveyor General.—M.F., 16 May, 1865.

#### No. 42.

#### Memo. from The Surveyor General to The Under Secretary for Lands.

An allotment of 6 perches at the corner of Bridge and Pitt streets was sold to John Terry Hughes in 1839.

Afterwards the alignment of Pitt-street was altered, leaving a space of about 15 feet between the east boundary of the allotment and the new alignment of Pitt-street, as shown on the accompany tracing. Appendix B.

The Commercial Chambers are built partly upon the allotment and partly upon the space in question, which has not as yet been legally alienated from the Crown.

I have, &c.,

W. R. DAVIDSON,  
B.C., 14 June, 1865.

I think the proper answer to Mr. Garsed (if any answer be given), would be that the Government can only alienate the portion of land alluded to, to the lawful owner of the allotment sold to J. T. Hughes, at any rate until he has declined to claim under the law.—JOHN R., 24 June.

#### No. 43.

#### The Under Secretary for Lands to Mr. J. Garsed.

Sir,

Department of Lands, Sydney, 30 June, 1865.

Referring to your application of the 15th ultimo, that certain land at the corner of Bridge and Pitt streets, being the site of the buildings known as the Commercial Chambers, may be alienated to the trustee of your wife's estate, I am directed by Mr. Secretary Robertson to inform you that an allotment of 6 perches at the corner of Bridge and Pitt streets was sold to John Terry Hughes in 1839; but that afterwards the alignment of Pitt-street was altered, leaving a space of about 15 feet between the east boundary of the allotment and the new alignment of Pitt-street. No. 41.

2. The Commercial Chambers are built partly upon the allotment and partly upon the space in question, which has not as yet been legally alienated from the Crown, and can only be alienated to the lawful owner of the allotment sold to J. T. Hughes—at any rate until such owner has declined to claim under the law.

I have, &c.,

M. FITZPATRICK.

#### No. 44.

#### Mr. J. Garsed to The Secretary for Lands.

Sir,

304, Castlereagh-street, Sydney, 10 July, 1865.

I have the honor to acknowledge the receipt of your letter, dated 30th June, 1865, wherein you state that "an allotment of 6 perches at the corner of Bridge and Pitt streets was sold to John Terry Hughes in 1839, but that afterwards the alignment of Pitt-street was altered, leaving a space of about 15 feet between the east boundary of the allotment and the new alignment of Pitt-street." No. 43.

And your letter also states "that the Commercial Chambers are built partly upon the allotment, and partly upon the space in question, which has not as yet been legally alienated from the Crown, and can only be alienated to the lawful owner of the allotment sold to J. T. Hughes, at any rate until such owner has declined to claim under the law."

I now beg to call your attention to the proceedings in the Supreme Court by the then Attorney General (now Mr. Justice Hargrave) prosecuting on behalf of the Crown by action of intrusion against the then occupiers of the Commercial Chambers, Roll 120, 4th Term, A.D. 1862, wherein the proceedings are set forth showing that the Government by their writ claimed a larger portion of land than the description mentioned in your letter comprises. The description in the writ and judgment is as follows:—That all that allotment of land situate in Pitt and Bridge streets, Sydney, commencing on the west side of Pitt-street at the angle formed by the intersection of that street with Bridge-street; bounded on the east by Pitt-street, being a line bearing south 4 degrees east 92 feet 3 inches; on the south by a line bearing west 17 degrees south 16 feet 8½ inches; on part of the west by the east side of Hamilton-lane, being a line bearing north 43 feet 9 inches, and north 20 degrees west 23 feet 3 inches; and on the remainder of the west by part of the east boundary of John Terry Hughes's grant, being a line bearing north 25 feet to Bridge-street; and on the north by that street, 20 feet to the point of commencement.

The Crown through the Sheriff took possession of the land described in the writ and ejected all parties, taking possession of the buildings thereon erected by me at a cost of £1,500 or thereabouts, some portion of which by your own letter was not erected upon Crown land, to wit—the difference between 15 feet between the east boundary of the allotment and the alignment of New Pitt-street, whereas under the proceedings the Crown did claim and have obtained 20 feet frontage to Bridge-street, being in excess 5 feet, together with the buildings thereon.

The portion of the buildings according to your own showing was erected upon a part of John Terry Hughes's grant, lawfully alienated by the Crown and legally occupied, by William Robert Smart, and persons deriving a title under me, of which they and myself have been deprived, having had a lease from the representatives of Jobbins, who purchased from John Terry Hughes, with permission to remove all buildings at the termination of the lease.

I was suffering wrongfully in prison at the time the lease expired, and consequently unable to prosecute my claim to the buildings, by which you will see I am a loser of the whole of my outlay upon the land—of both that claimed by the Crown, and upon that which is admitted to be that of John Terry Hughes'.

Under the circumstances above set forth you will see that I am a great sufferer by reason of no permission being granted to remove the improvements erected upon the Government land, which I feel satisfied myself and all others are of opinion, that it is beneath the dignity of the Crown or Government to take possession of my improvements, whereby a great loss is sustained by my wife's trustee, I having borrowed upon my wife's separate estate a certain sum of money, giving the said Commercial Chambers amongst other properties as security.

I have been informed that some person or persons have been illegally permitted by the Sheriff to take and occupy the said premises without any title or permission from the Crown whatsoever according to law, and that certain back rents have been demanded, under a threat of proceedings at law and paid over—but not to the Crown.

I cannot but feel that the whole of the proceedings instituted by the Attorney General on behalf of the Crown have worked great injustice by depriving me and my wife of the benefit I could otherwise have obtained but for the interference of the Crown in this private matter, and I feel assured that where it is manifest an injury has been done. The Crown and the advisers of the Government will give their earnest consideration, and advise such compensation as under the circumstances of the case is just in this behalf. I may also add that no claim has yet been made by any persons claiming as lawful owner under the grant to John Terry Hughes.

I earnestly request your views on this application, in order that I may be in a position to follow up the matter, as I am advised, without delay, as I feel that Mr. Justice Hargrave will upon further investigation of the above see justice done me, arising from the proceedings, an injudicious or improper use of his name as Attorney General on behalf of the Crown, which have resulted (unintentionally on his part) unfortunately to me.

I have, &c.,  
JOHN GARSESD.

I cannot justify the re-opening of the case.—JOHN R., 18 July.

#### No. 45.

The Under Secretary for Lands to Mr. J. Garsed.

Sir,

Department of Lands, Sydney, 24 July, 1865.

In reply to your letter of the 10th instant, respecting the land at the corner of Bridge and streets which you applied for to be alienated to the trustees of your wife's estate, I beg to inform you that Mr. Secretary Robertson does not feel justified in re-opening this case.

I have, &c.,  
M. FITZPATRICK.

#### No. 46.

Mr. J. Garsed to The Secretary for Lands.

Sir,

304, Castlereagh-street, Sydney, 31 July, 1865.

I beg to acknowledge the receipt of your communication, dated 24th July, 1865, respecting the land at the corner of Bridge and Pitt streets, referred to in my letter to you of the 10th of July instant, wherein Mr. Fitzpatrick (your Under Secretary) informs me that you (Mr. Secretary Robertson, of Lands) does not feel justified in re-opening this case.

I now wish to inquire what case is alluded to by the words "*Does not feel justified in re-opening this case.*" I must say that I have no knowledge of any case respecting the said land, and have never received any information, nor has any inquiry been made respecting the same, and whatever has been done it must have been done without knowledge on your part, of the facts and circumstances to warrant the arbitrary proceedings taken to obtain the whole of the buildings known as the Commercial Chambers, which are admitted in your letter, referred to in mine of the 10th instant. I am now desirous of hearing from you, as the proper Minister of the Government, the full particulars of the representations made to you in *this case*, and of all proceedings connected therewith, and the reason of arriving at the conclusion to allow proceedings by the Attorney General to bring an action of intrusion at the suit of the Crown for other premises than the Crown was lawfully entitled.

I respectfully request a full and fair explanation on the above matter in order that I may be enabled to take the necessary steps to obtain justice to myself and those claiming under me, who are severe sufferers by the proceedings taken in the name of the Crown.

I have, &c.,  
JOHN GARSED.

Refer him to previous letters.

#### The Under Secretary for Lands to Mr. J. Garsed.

Sir,

Department of Lands, Sydney, 5 August, 1865.  
Alluding to your letter of the 31st ultimo, respecting your application to have certain land at the corner of Pitt and Bridge streets alienated to the trustees of your wife's estate, I am directed to refer you to my letter of the 24th ultimo, in which you were informed that Mr. Secretary Robertson did not feel justified in re-opening this case.

I have, &c.,  
M. FITZPATRICK.

#### No. 48.

#### Mr. J. Garsed to The Secretary for Lands.

Sir,

304, Castlereagh-street, Sydney, 11 August, 1865.  
I beg to acknowledge the receipt of your communication dated 5th August, 1865, respecting the land corner of Bridge and Pitt streets, referred to in my letter of the 31st ultimo, wherein Mr. Fitzpatrick (your Under Secretary) again informs me that you (Mr. Secretary Robertson, of Lands), does not feel justified in reopening this case.

I beg most respectfully to state that your letter of the 5th instant is no reply to my letter of the 31st ultimo, which you will see on reading the following copy:—

"O.H.M.S.

"304, Castlereagh-street, Sydney, 31 July, 1865.

"To the Honorable the Secretary for Lands,—

"Sir,

"I beg to acknowledge the receipt of your communication, dated 24th July, 1865, respecting the land corner of Bridge and Pitt streets, referred to in my letter to you of the 10th of July, wherein Mr. Fitzpatrick (your Under Secretary) informs me that you (Mr. Secretary Robertson, of Lands) does not feel justified in re-opening this case.

"I now wish to inquire what case is alluded to by the words '*Does not feel justified in re-opening this case?*' I must say that I have no knowledge of any case respecting the said land, and have never received any information, nor has any inquiry been made respecting the same, and whatever has been done it must have been without knowledge on your part of the facts and circumstances to warrant the arbitrary proceedings taken to obtain the whole of the buildings known as the Commercial Chambers, which are admitted in your letter referred to in mine of the 10th instant. I am now desirous of hearing from you, as the proper Minister of the Government, the full particulars of the representations made to you in this case, and of all proceedings connected therewith, and the reason of arriving at the conclusion to allow proceedings by the Attorney General to bring an action of intrusion at the suit of the Crown for other premises than the Crown was lawfully entitled.

"I respectfully request a full and fair explanation on the above matters, in order that I may be enabled to take the necessary steps to obtain justice to myself and those claiming under me, who are severe sufferers by the proceedings taken in the name of the Crown.

"I have, &c.,  
"JOHN GARSED."

I again respectfully and most earnestly request a full and fair explanation on the matters referred to in my letter of the 31st ultimo, in order that I may be enabled to take the necessary steps to obtain justice to myself and those claiming under me.

I have, &c.,  
JOHN GARSED.

#### No. 49.

#### Mr. J. Garsed to The Under Secretary for Lands.

Sir,

88, William-street, Woolloomooloo, Sydney, 19 August, 1865.  
Having removed from 304, Castlereagh-street, you will oblige by addressing Mr. Secretary Robertson's reply to my letter dated 11th August, 1865, subject, land corner of Bridge and Pitt streets:—"Mr. John Garsed, 88, William-street, Woolloomooloo."

I have, &c.,  
JOHN GARSED.

No. 50.

## No. 50.

## Mr. J. Garsed to The Secretary for Lands.

Subject: Land and Commercial Chambers, corner of Bridge and Pitt streets.

Sir, 88, William-street, Woolloomooloo, Sydney, 5 October, 1865.

See No. 48. I beg most respectfully to state that I addressed a further letter to you, dated 11th August, 1865, relating to the abovementioned land and Commercial Chambers, but have not yet received a reply.  
See No. 45. You will oblige by informing me what case is alluded to in your letter to me, dated 24th July, 1865, wherein your Under Secretary informs me that you (Mr. Secretary Robertson, of Lands) *does not feel justified in re-opening this case.*

If the "writ of intrusion" filed by the Honorable the Attorney General for Her Majesty the Queen, in the Supreme Court, 23rd December, 1862, is true, then in that case I built my Commercial Chambers upon land which has not been alienated from the Crown. If not true, then in that case the Attorney General brought an action of intrusion, at the suit of the Crown, for other premises than the Crown was lawfully entitled.

The present Crown Solicitor and others leased to me the said land, with power to sell or remove any building I might erect thereon. I erected the said Commercial Chambers at a cost of £1,500, or thereabouts; but while I was suffering *wrongfully in prison* the lease expired. I am now anxious to know what the proper Minister of the Crown, the Secretary for Lands, has done with my Commercial Chambers.

I have, &c.,  
JOHN GARSED.

## No. 51.

## Mr. J. Garsed to The Secretary for Lands.

Subject: Crown land, corner of Bridge and Pitt streets.

Sir, 88, William-street, Sydney, 23 October, 1865.

I received the following letter, relating to the above subject:—

" (Copy.)

" Sir, Department of Lands, Sydney, 24 July, 1865.  
" In reply to your letter of the 10th instant, respecting the land at the corner of Bridge and Pitt streets, which you applied for to be alienated to the trustees of your wife's estate, I am directed to inform you that Mr. Secretary Robertson does not feel justified in re-opening this case.  
" Mr. John Garsed. MICHAEL FITZPATRICK."

See No. 44.

See No. 46.

I beg most respectfully to state that not understanding the meaning of the above letter I in reply addressed a further letter to the Honorable Secretary for Lands, dated 31st July, 1865, and received in reply the following letter:—

" (Copy.)

" Sir, Department of Lands, Sydney, 5 August, 1865.  
" Alluding to your letter of the 31st ultimo, respecting your application to have certain land at the corner of Pitt and Bridge streets alienated to the trustees of your wife's estate, I am directed to refer you to my letter of the 24th ultimo, in which you were informed that Mr. Secretary Robertson did not feel justified in re-opening this case.  
" Mr. John Garsed. M. FITZPATRICK."

See No. 46.

See No. 45.

See No. 43.

See No. 47.

See No. 46.

I addressed a further letter to the Honorable Secretary for Lands, dated 11th August, 1865, in which letter I say, " I beg most respectfully to state that your letter of the 5th instant is no reply to my letter of the 31st ultimo, which you will see on reading the following copy. (Then follows a copy of my letter of the 31st ultimo.)

JOHN GARSED.

I shall feel greatly obliged if you will answer my letter, dated 11th August, 1865, this week.

I have, &amp;c.,

JOHN GARSED.

P.S.—The frontage of the building "erected on the said land" to Bridge-street is about 25 feet; that portion nearest to George-street is built on the bed of the Tank Stream.

See No. 43.

Her Majesty's Attorney General, in his information of intrusion, filed in the Supreme Court, states that 20 feet frontage to Bridge-street is *Crown land*.

The Honorable Secretary for Lands, in his letter to me, dated 30th June, 1865, states in effect, that only 15 feet frontage to Bridge-street is *Crown land*.

The buildings cost me about £1,500, and I am anxious to learn what the Minister for the Crown has done with my buildings, built on land not alienated from the Crown.

Acknowledge, and inform that the claim of right apparently preferred by Mr. Garsed does not require the interference of the Government, but, if it exist, should be subjected to adjudication in the proper Court.—W.M.A., 25/10/65.

## No. 52.

## Mr. J. Garsed to The Colonial Treasurer.

Sir, 88, William-street, Woolloomooloo, Sydney, 23 October, 1865.

In the year 1857 I leased certain land, corner of Bridge and Pitt streets, with power to remove any buildings I might erect upon the said land. At a cost of £1,500, or thereabouts, I built on the land certain premises known as the Commercial Chambers.

In May, 1858, Mr. Clark Irving received the rents of the said Commercial Chambers, he promising to account to me for the same; but during the time I was suffering in prison for swearing an affidavit before Mr. Edwin Daintrey, *strictly true*, the lease expired.

After

After my release from prison for swearing the truth I learnt that Mr. Clark Irving received the rents for about three years; after that time Mr. W. R. Smart, conveyancer, received the rents up to the time of his insolvency; from that time his official assignee, Mr. Robt. H. Sempill, received the rents of the said Commercial Chambers.

On the 23rd December, 1862, Her Majesty's Attorney General filed, in the Supreme Court, an information of intrusion against the said W. R. Smart and others, which was followed by a writ of ejectment, and the said W. R. Smart and others were forcibly ejected from the said Commercial Chambers.

Will you please to inform me whether Mr. Robert H. Sempill, official assignee, or any other person, paid the rents Mr. Sempill received from the Commercial Chambers into the Treasury to the credit of Mr. W. R. Smart's estate, or to the credit of the Crown?

I have, &c.,  
JOHN GARSEED.

P.S.—The frontage of the Commercial Chambers to Bridge-street is about 25 feet; that portion nearest to George-street is built on the bed of the Tank Stream.

Her Majesty's Attorney General, in his information of intrusion, filed in the Supreme Court, states 20 feet frontage to Bridge-street is Crown land.

The honorable Secretary for Lands, in his letter to me, dated 30th June, 1865, states, in effect, that See No. 43. only 15 feet frontage to Bridge-street is Crown land.

On the 21st March, 1857, my architect, Mr. C. H. Storey, attended at the Surveyor General's Office to see Mr. Burrowes respecting the said land corner of Bridge and Pitt streets.

On the 25th of April, 1857, Mr. C. H. Storey attended upon City Building Surveyor to give notice for building upon the said land, corner of Bridge and Pitt streets.—J.G.

The enclosed printed statement will explain why I, although not insolvent, endeavoured to find See enclosure to No. 37. justice in the Insolvent Court. In my estate there has been no legal adjudication.—J.G.

Under Secretary for Lands, B.C., 23 October, 1865.—J.W.

#### No. 53.

The Under Secretary for Lands to Mr. J. Garsed.

Sir,

Department of Lands, Sydney, 27 October, 1865.

In acknowledging the receipt of your letter of the 23rd instant, respecting certain land at the No. 51. corner of Bridge and Pitt streets, I am directed by Mr. Secretary Arnold to inform you that the claim of right apparently preferred by you in connection therewith does not require the interference of the Government, but, if it exist, should be subjected to adjudication in the proper Court.

I have, &c.,  
M. FITZPATRICK.

#### No. 54.

Mr. J. Garsed to The Colonial Treasurer.

Sir,

88, William-street, Woolloomooloo, Sydney, 30 October, 1865.

You will greatly oblige by answering my letter of the 23rd instant, by informing me whether See No. 52. Mr. Robert Sempill, official assignee, paid the rents that he received from the Commercial Chambers into the Treasury, to the credit of W. R. Smart's estate, or to the credit of the Crown.

The late Mr. Clark Irving signed Mr. Garsed's first petition, and in consequence thereof I am sorry to say that his affidavit, sworn before Wm. A. Purefoy, Esq., a Commissioner for Affidavits, relating to the said Commercial Chambers, and filed in the Supreme Court, 4th March, 1859, is not true. The real facts are as follows:—By a deed of indenture, dated 5th June, 1856, not registered.

Randolph John Want to John Garsed,  
Conveyance and Indemnity.

I re-purchased from Mr. R. J. Want one-third undivided share in forty-five houses and land situate at Blackwattle Swamp, Glebe, subject to a mortgage upon the said property to Mr. C. Irving of £4,000.

(Copy in Mr. R. J. Want's handwriting, dated August 5th, 1856.)

"Mr. Irving agreed to extend the period of the mortgage for two years on the Blackwattle Swamp, from the expiration of the same."

In consequence of an error of Mr. R. J. Want's clerk in copying from a draft agreement prepared by Mr. R. J. Want on the 11th of August, 1857, I was prejudiced to the extent of nearly £6,000, and sacrificed £2,000 to set it right. (I trust the Honorable the Attorney General will read this letter and compare the copy with the draft.)

Having lost confidence in my solicitor, Mr. R. J. Want, I made a proposal to Mr. Irving, which he accepted, in effect—that if he would join with me in compelling Mr. R. J. Want to divide the said forty-five houses and land, I would borrow of him, secured upon my Commercial Chambers, the sum of £1,500, and pay him that sum in part payment of the said £4,000. I would then sell a portion of my third share of the said forty-five houses and land, and pay the balance.

Messrs. Reuss and Brown, surveyors, were instructed to divide the said property, which they did, and I, Mr. R. J. Want and Mr. Clark Irving, met at the Glebe. Mr. Want held in his hand three straws; I drew the longest and had the first choice. Mr. R. J. Want was instructed to prepare the deeds of division, relating to the said forty-five houses and land, but he, Mr. R. J. Want, left the Colony before the deeds were executed.

By a certain deed of trust, dated 4th February, 1858, not registered, the said forty-five houses and land, and the said Commercial Chambers, were conveyed in trust to Mrs. Garsed's trustee, subject to the said £4,000. The said Commercial Chambers were let for upwards of £500 a year.

The plaintiff, in a bill filed in equity against myself, my wife, and my wife's trustee, now pending, calls three deeds each deed, dated 4th February, 1858, fraudulent deeds. In July last the Examiners of Titles, after receiving every information relating to the said bill, granted an indefeasible title to one Mr. Sixsmith,

Sixsmith, who held his title under those very deeds, *called fraudulent deeds*. I have given notice that if an indefeasible title is granted to any person claiming a title under the plaintiff in the said bill, the Government will be held liable, for it is physically impossible that those claiming a title under the plaintiff, and those claiming a title under the defendant, can both have *indefeasible titles*.

About the end of May, or beginning of June, I borrowed from Mr. Irving, upon my Commercial Chambers, £160, £80 of which Mr. Irving retained for one quarter's interest due on the said £4,000, and with part of the balance Mr. Irving paid a £50 note I had given A. Ashdown towards Pritchard's salary, together with expenses. Mr. Irving, at the time I executed an indenture of mortgage, received the lease of the Commercial Chambers, for I expected that immediately upon the return of Mr. R. J. Want to the Colony, the deeds of division relating to the said forty-five houses and land would be signed by all parties concerned.

“(Copy.)

“The Principal Under Secretary to Mr. John Garsed.

“Sir,

“Colonial Secretary's Office, Sydney, 8 August, 1862.

“With reference to your further letter, dated 15th October, 1852, but received on the 15th ultimo, I am directed by the Colonial Secretary to inform you that it is not considered expedient that the investigation of certain circumstances connected with your case should be instituted by the Government.

“W. ELYARD.”

Annexed to my letter is an *epitome in print* of my schedule filed 3rd July, 1858; on reading, you will learn that the said forty-five houses and land, and the said Commercial Chambers, are mentioned in the said epitome. You will also learn that it was impossible I could be a fraudulent insolvent, or insolvent in the sense that the public generally understands insolvency, and that is unable to pay 20s. in the £ on just debts. No man likes to pay fraudulent claims, and I can assure you that although I made myself acquainted with certain facts connected with the “Custom House Fraud,” in September, 1858, I had no more to do with the matter than you had.

I was released from prison on the grounds of innocence, and so simple are the real facts of the case that I can establish my innocence from His Honor the Chief Justice's notes of evidence. His Honor's notes, in figures, relating to Mr. Dean and Co.'s account books, are remarkably correct. Now, I cannot understand why the editors of the Empire, in their paper published the day after I was released from prison, mixed my name up with a number of prisoners, and falsely said I was sentenced to prison four years for *fraudulent insolvency*.

What did it concern my case, whether the said prisoners were released for good or bad conduct. I am informed some of them soon found their way back. Surely the gentlemen who signed my wife's petition knew what they were signing. The *Editors of the Empire*, I believe, signed two.

I have, &c.,

JOHN GARSED.

The Under Secretary for Lands.—J.W., B.C., 30 Oct., /65.

## No. 55.

### Mr. J. Garsed to The Secretary for Lands.

Sir,

88, William-street, Woolloomooloo, Sydney, 31 October, 1865.

In acknowledging the receipt of your letter of the 27th instant, received yesterday, respecting Crown land, corner of Bridge and Pitt streets, I, in reply, beg to inform you that in the year 1857 I leased from the trustees of Jobbins' estate the said Crown land, with power to remove any building I might erect thereon; but in consequence of the Tank Stream, I did not commence to build the Commercial Chambers until after a gentleman from the Surveyor General's Department marked out the boundary.

The Commercial Chambers cost me about £1,500; the frontage to Bridge-street is about 25 feet by a depth of about 92 feet, narrowing in depth in one part to about 15 feet. At the time the Commercial Chambers were built the Tank Stream was not covered in; I kept men constantly pumping while the masons were laying the foundation of the stone piers; the front of the buildings to Pitt-street is built upon piles; I let the Commercial Chambers to Mr. W. R. Smart and others, at a rental of about £500 a year.

I believe that the Tank Stream was never alienated from the Crown, and my belief is confirmed by the following proceedings:—

In the Supreme Court of New South Wales.

On the 22nd of December, 1862, the Honorable Attorney General, for Her Majesty the Queen, prosecutes for Her Majesty in the above Court, and for Her Majesty gives the Court to understand that all this allotment of land, situate in Bridge and Pitt streets, that is, 20 feet frontage to Bridge, 92 feet 3 inches to Pitt-street, 16 feet 8½ inches from Pitt-street to Hamilton-lane, by the side of Hamilton-lane to Bridge-street, 92 feet, ought to be in possession of Her Majesty in right of the Crown of England, and on behalf of Her said Majesty prays the consideration of the Court.

JOHN F. HARGRAVE,  
Attorney General.

This information of intrusion is followed by a writ of ejectment, and Mr. W. R. Smart and others are forcibly ejected from the Commercial Chambers. The Attorney General, on behalf of Her Majesty, takes possession of the land, together with the buildings, which said buildings were conveyed in trust to my wife's trustee by deed dated 4th February, 1858.

The Honorable Mr. Secretary Robertson in his letter to me dated 30th June, 1865, says:—“Referring to your application of the 15th ultimo that certain land at the corner of Bridge and Pitt streets, being the site of the buildings known as the Commercial Chambers, may be alienated to the trustee of your wife's estate. That an allotment of 6 perches at the corner of Bridge and Pitt streets was sold to John Terry Hughes in 1839, but that afterwards the alignment of Pitt-street was altered, leaving a space of about 15 feet between the east boundary of the allotment and the new alignment of Pitt-street.

2. The Commercial Chambers are built partly upon the allotment and partly upon the space in question, which has not as yet been legally alienated from the Crown.

I,

Incorrect, not  
with the papers.

Unnecessary.

No. 53.

See No. 43.

See No. 41.

I, in reply to the above by letter dated 10th July, 1865, called the Honorable Secretary for Lands' See No. 44. attention to the proceedings in the Supreme Court, whereas the Crown claimed and obtained 20 feet frontage to Bridge-street, being admitted by Mr. Secretary Robertson in his letter to be 5 feet to Bridge-street in excess, together with the buildings thereon, more than the Crown was lawfully entitled; and I respectfully requested of him a full and fair explanation, in order that I may be enabled to take the necessary steps to obtain justice to myself and those claiming under me.

This said 6 perches cannot be any portion of the land mentioned in the said information of intrusion. My opinion is that the said 6 perches is part of the land upon which John Terry Hughes erected buildings in Bridge-street on the side of the Tank Stream nearest to George-street.

I subsequently received from the Honorable the Secretary for Lands two letters, in which Mr. Secretary Robertson says "he does not feel justified in re-opening this case."

I beg most respectfully of the Honorable Mr. Secretary Arnold to inform me what case is alluded to by the words "does not feel justified in re-opening this case."

I have no knowledge of any case respecting the said land, and am now desirous of hearing from you, as the proper Minister of the Government, the full particulars and representations made to Mr. Secretary Robertson in "this case," and of all proceedings connected therewith, and the reason of arriving at the conclusion to allow proceedings by the Attorney General to bring an action of intrusion at the suit of the Crown according to his own admission for other premises than the Crown was lawfully entitled.

If I cannot get the information I require I will forward a copy of this to some Honorable M.P. that signed my wife's petition, to move, that there be laid upon the Table of the House the correspondence between me, the Honorable Mr. Secretary Robertson, and yourself from the 15th of May last, relating to the said Crown land, corner of Bridge and Pitt streets; also all correspondence between Mr. Secretary Robertson and others in this case; also my letters dated 23rd and 30th October, 1865, addressed to the Honorable the Colonial Secretary—subject: rents received and paid into the Treasury on account of the buildings erected upon the said Crown land.

I have, &c.,

JOHN GARSEED.

#### No. 56.

#### Mr. J. Garsed to The Secretary for Lands.

Sir, 88, William-street, Woolloomooloo, 13 November, 1865.

I received from the Treasury the following letter:—

"(Copy.)"

"Sir, The Treasury, New South Wales, Sydney, 31 October, 1865.

"I have honor to inform you that your letter of the 30th instant, respecting rent of Commercial Chambers, has been forwarded to the Under Secretary for Lands, to whom it should have been addressed. See No. 54.

"JOHN WELLS,

"Under Secretary."

You will greatly oblige in acknowledging the receipt of the above letter by return of post.

"With reference to your further letter, dated \*15th October, 1862, but received on the 15th ultimo, I am directed by the Colonial Secretary to inform you that it is not considered expedient that the investigation of certain circumstances connected with your case should be instituted by the Government. \* Incorrect, not with papers.

"Mr. John Garsed.

WM. ELYARD."

Annexed

Annexed to my letter, dated 15th October instead of 15th July, 1862, is an epitome of my schedule in print, filed 3rd July, 1858; it was my intention to have released my valuable estate from sequestration—immediately after Dean and Ashdown's account books had been examined in accordance and within the sense and meaning of the Insolvency Act, 5 Vic. No. 17, in connection with Pritchard's fictitious red ink account, and Pritchard's journal.

On the 2nd March, 1860, Dean and Ashdown's account books were nearly destroyed by an incendiary fire, I believe, to prevent the same from being examined in connection with my statement, left at Government House on or about the 1st of March, 1860. My statement was signed by Mr. W. P. Moffat, solicitor, and Mr. F. Humphery, official assignee; it had been signed by Mr. Wm. Dean on the 24th February, 1860, but his name was afterwards erased. My statement was not entertained.

“ In the Supreme Court of } (Copy.)  
New South Wales. } Insolvency Jurisdiction.

“ In the Insolvent Estate of John Garsed, of the City of Sydney, in the Colony of New South Wales, Merchant.

“ On the 4th day of March, in the year 1859, Clark Irving, of the City of Sydney, in the Colony of (Inid.) Wm. A.P. New South Wales, Esquire, being duly sworn, maketh oath, and saith as follows:—

£4,188 12s. 10d. “ 1. The abovenamed insolvent at the date of his insolvency was, and his estate still is, justly indebted to me in the sum of £4,188 12s. 10d. for money lent by me to him, and for arrears of interest thereon, that is to say: On the 14th day of October, 1854, I lent him the sum of £4,000, repayment of which was secured upon certain property at Blackwattle Swamp, and was made payable on the 14th day of October, 1857.

“ 2. Prior to the month of December, 1857, I required payment of the sum, with the interest due thereon, and would have sued for and recovered the same had not the said John Garsed, on or about the 6th day of December, 1857, as an inducement to me to forbear to sue, and grant him an extension of time for payment, equitably deposited with me the lease of the Commercial Chambers in New Pitt-street, Sydney, and agreed to execute an indenture of mortgage over the same to secure £1,500, part of the said sum of £4,000, and in pursuance of such agreement he, on the 1st day of June last, executed to me an indenture of mortgage to secure the said sum of £1,500, and £60 which I advanced him to discharge a writ of “*fiore facias*,” and by the said indenture the time of payment was deferred until the 14th day of October, 1859.

“ 3. By both indentures of mortgage the insolvent covenanted to pay me interest at the rate of £8 per centum per annum.

Proof admitted for £68 over and above security held.—(Signed) Wm. A. Purefoy, C.A. Security valued at £4,120.

“ 4. I hold no security for the debt due to me other than the aforesaid indentures of mortgage, and the title deeds of the properties mortgaged.

“ 5. The insolvent has no set-off against the same, as far as I know and believe.

“ 6. I value the aforesaid securities at the sum of £4,120.

“ Sworn by the deponent on the day first above-mentioned, }  
at Sydney, aforesaid, before me,— }

CLARK IRVING.

“ Wm. A. PUREFOY,

“ A Commissioner for Affidavits.”

On the 28th August, 1865, George Hibbert Deffell, Esq., Chief Commissioner for Insolvent Estates, and Archibald Campbell, Esq., Registrar in Insolvency, certified the above to be a true copy of the original.

It was physically impossible for me to prevent Mr. Clark Irving swearing falsely, for on the 4th day of March, 1859, I was in prison for swearing an affidavit strictly true. The day before Mr. Irving left the Colony he informed my wife that he did not intend to leave the Colony.

After my release from prison the Honorable Attorney General informed me that I had to thank him for my release, and that I was not the first innocent person that had suffered in a prison. While in prison my letters, addressed to the Honorable the Colonial Secretary, were generally signed by me—so long in prison for swearing the truth, being released before the expiration of my sentence, was an admission on the part of execution that I had suffered wrongfully in prison.

I have, &c.,

JOHN GARSED.

See memorandum appended to postscript of No. 41.

I have annexed a printed statement relating to Mr. Clark Irving's receiving rents of Commercial Chambers.

### No. 59.

#### Mr. J. Garsed to The Under Secretary for Lands.

Sir,

88, William-street, Woolloomooloo, 18 November, 1865.

No. 51. In reply to your letter of the 17th instant, in which you say I am directed to acknowledge the receipt of your letter of the 13th instant, and to inform you that the communication therein alluded to relative to the sale of the Commercial Chambers, has been duly received at this Department from the Treasury.

See No. 56.

My letter of the 13th instant does not refer to any sale of the Commercial Chambers.

See No. 58.

My letter to you of the 17th instant says: I again most respectfully request that you will acknowledge the receipt of the following letter by return of post:—

“(Copy.)

“ Sir,

The Treasury, New South Wales, Sydney, 31 October, 1865.

See No. 54.

“ I have the honor to inform you that your letter of the 30th instant, respecting rent of Commercial Chambers, has been forwarded to the Under Secretary for Lands, to whom it should have been addressed.

“ Mr. John Garsed.

JOHN WELLS.”

In my last letter is a certified copy of the late Mr. Clark Irving's, M.L.A., affidavit, sworn before Wm. A. Purefoy, Esq., a Commissioner for Affidavits, on the 4th of March, 1859, relating to the Commercial Chambers.

You

You will please to acknowledge the receipt of my letter of the 17th instant, and correct yours of the same date, unless you mean that the Honorable the Secretary for Lands has sold the Commercial Chambers; if so, please to inform me the name of the purchaser, and the amount of purchase money. In your letter to me, dated 5th August, 1865, you say, Mr. Secretary Robertson does not feel justified in reopening this case. I have no knowledge of any case respecting the Commercial Chambers being opened.

I have, &c.,  
JOHN GARSED.

No. 60.

Mr. R. W. Robberds to The Secretary for Lands.

Sir,

159, Castlereagh-street, Sydney, 27 November, 1865.

Some twelve years ago a piece of land situate at the corner of Pitt and Bridge streets, Sydney, was given up to the Government by the late Mr. Jobbins, at the instance and for the accommodation of the Government, in exchange for a piece of land belonging to the Crown, on the other side of Mr. Jobbins's property, but no deeds were executed for giving legal effect to the arrangement.

Mr. Jobbins's interest in the property has since passed to, and is now vested in, my client, Mr. Thomas Gale, who has instructed me to take the necessary steps on his part to get the matter completed.

I have the honor, therefore, to request that you will be pleased to instruct the Crown Solicitor to do what is necessary on behalf of the Government for carrying out the arrangement in question.

I have, &c.,  
R. W. ROBBERDS.

Crown Solicitor, B.C., 7 December, /65.—M.F.

No. 61.

The Crown Solicitor to The Under Secretary for Lands.

Sir,

Crown Solicitor's Office, Sydney, 8 December, 1865.

I have the honor to return to you, herewith, the papers relating to Mr. Thomas Gale's application respecting land derived by him through the late John Jobbins, and to request that you will favor me with specific instructions as to what I am to do thereupon.

I should mention that I was, until recently, the trustee of the late Mr. Jobbins's estate, and that I am aware that Mr. Garsed claims to have some interest in the land referred to in the present application. I, therefore, under these circumstances, think it desirable that I should only act under direct instructions—the present reference to me is in general terms.

I have, &c.,  
JOHN WILLIAMS,  
Crown Solicitor.

The questions which it was thought would be solved by a reference to the Crown Solicitor are—1st. Who are now the legal representatives of J. T. Hughes's ground, the allotment in Bridge-street? 2nd. How can they now procure a legal title to the portion of land intervening between the allotment as granted and the new line of Pitt-street, which strip of land they are entitled to in exchange for the land taken on the other side by the widening of the lane?

If the present or former interest of Mr. Williams in this matter renders it embarrassing for him to deal with the case, the papers might, as on a former occasion, go to the Attorney General direct.

Crown Solicitor, B.C., 12 December, 1865.—M.F. C.C., 12 Dec.

No. 62.

The Crown Solicitor to The Under Secretary for Lands.

Sir,

Crown Solicitor's Office, Sydney, 8 February, 1866.

I have the honor to return, herewith, the papers relating to the land near Pitt-street, taken from the late John Jobbins for the purpose of increasing the width of a lane, and with reference to the application of Mr. Robberds, as solicitor for Mr. Gale, to state that before I can take the necessary steps to carry out the contract so far as the Government is concerned, that is I suppose to prepare a formal surrender from Mr. Gale of the land which the Government has resumed—it is necessary that it should be shown that Mr. Gale is in a position to execute such a surrender, and this should be done before the papers are submitted to the Crown Law Officers for their advice as to the mode in which the land to be given by the Crown shall be granted.

At the time the arrangement referred to in the papers was made with Mr. Jobbins it was not, to the best of my recollection, agreed that a formal surrender should be made by him of the land required by the Government, and the land given in exchange be granted as is now requested, but as the land of which Mr. Jobbins took possession answered to the description in the deed of grant, both in quantity and boundaries, although in fact it is not the land granted, it should be considered included in that deed.

If the Minister should be of opinion that this arrangement was in effect an agreement that the Crown should perfect Mr. Jobbins's title to the land taken by him in lieu of the land the Government had taken possession of, it will be necessary to refer to the Crown Law Officers upon the question as to the way in which this arrangement shall be carried out; before doing this it will be as well, as I before suggested, that Mr. Gale should show that he is in a position to act in the matter.

I have, &c.,  
JOHN WILLIAMS,  
Crown Solicitor.

Write to Mr. Robberds accordingly.—9 Feb., /66. Perhaps Mr. Robberds may be reminded.—3 May. Put by until the parties interested move in the matter.—7 May.

## No. 63.

The Under Secretary for Lands to Mr. R. W. Robberds.

Sir,

Department of Lands, Sydney, 14 February, 1866.

No. 60.

In reference to your letter of the 27th November last, requesting that the necessary steps may be taken for giving legal effect to the arrangement by which certain land at the corner of Pitt and Bridge streets was given up by the late Mr. Jobbins in exchange for another piece of land belonging to the Crown in the same locality, I am directed to inform you, that under an opinion obtained in the matter from the Crown Solicitor it will be necessary for Mr. Gale, in whom you state the late Mr. Jobbins's interest in the property is now vested, to show that he is in a position to execute a legal surrender of the land in question to the Crown.

I have, &amp;c.,

M. FITZPATRICK.

## No. 64.

Mr. J. Garsed to The Secretary for Lands.

Queen v. John Garsed. Charge—Perjury. The perjury is assigned on an affidavit strictly true, filed in the Supreme Court, 26th February, 1858.

Crown's witness—Archibald Ashdown.

Sir,

Macleay-street, Sydney, 30 July, 1866.

I respectfully and most earnestly beg to bring under your notice a case of extreme wrong and long suffering, which can never terminate in the Supreme Court, in consequence of an unprecedented error in law on record in the said Court.

The facts are simple; the Attorney General's information is remarkable for brevity, but filed contrary to statute law; he merely copies the following from my affidavit:—

"I gave Ashdown a bonus of £2,000 or thereabouts, of which the £680 15s. 3d., the amount of the bill of exchange now sued upon, forms part."

Her Majesty's Attorney General, who in himself is the grand jury of this Colony, denies the above truthful statement, and states that the bill, £680 15s. 3d., is a debt due by me to the firm of Wm. Dean and Co., auctioneers, and not a debt due to Archibald Ashdown alone.

It is legally and physically impossible that the said information for perjury, and Ashdown and Pritchard's joint affidavit, filed in the Supreme Court, 2nd March, 1858, can both be true, for one is inconsistent or repugnant with the other.

When the case relative to bill £680 15s. 3d. was tried before Mr. Justice Dickinson in April and May, 1858, Mr. Daintrey's, solicitor, evidence was not admissible, and Mr. R. J. Want, solicitor, was absent from the Colony. But their evidence, sworn before Mr. Forbes Pile, in December, 1858, proves that I did give Archibald Ashdown a bonus of £2,000, and that the said bill, £680 15s. 3d., is a debt due by me to Archibald Ashdown *individually*, in terms of an agreement annexed to the said joint affidavit, and not a debt due by me to the firm of W. Dean & Co., auctioneers; in fact I was not indebted to the firm of W. Dean & Co., auctioneers, the value of the ink on this paper.

Any christian body of gentlemen will say on reading Mr. Daintrey's evidence, sworn at the Police Office, it is the evidence of a truthful witness.

The struggle before the Chief Justice in October, 1859, on the part of the Crown Prosecutor, was to keep out of evidence W. Dean & Co's. account books; and W. Dean & Co's. account books on the fourth day the books were in evidence, on the sixth day the Judge refused the books, seventh day the struggle closed, and thus ended I believe the longest case on record in the Supreme Court in its criminal jurisdiction.

Mr. Joseph Carroll's letter, published in the "*Empire*," October 12/59, relates to W. Dean & Co's. account book; on reading the extraordinary statement of evidence published in the "*Sydney Herald*," October, 12/59, for Garsed's account books read Pritchard's account books.

Ashdown engaged Pritchard at a salary of £500 a year to keep the books on the joint account of self and Ashdown; the books were kept under Ashdown's inspection; the settlement 30th September, 1857, is correctly entered in Pritchard's account books, which books I received from Ashdown's office on or about 22nd December, 1857; on my clerk, Mr. G. L. Wilson, calling my attention to certain *false entries* and *erasures* made by Pritchard in his journal while kept under the inspection of the Crown's witness, Archibald Ashdown, I closed Pritchard's account books on the 31st December, 1857.

Copy in print of C. P. Pritchard's journal and other documents in print were left at Government House, with my statement, for inquiry into my case on the 1st of March, 1860; on the following evening W. Dean & Co's. account books were nearly destroyed by an incendiary fire. I am informed and believe the explosive compound used to set fire to W. Dean & Co's. premises was gun cotton; how fortunate for those persons engaged at the "*Empire*" and "*Herald*" Office, that the explosive compound was not nitro-glycerine. According to statements published in the *Herald* respecting the explosive power of nitro-glycerine that compound must have destroyed Dean & Co's. and the adjoining premises.

Long after the said incendiary fire W. Dean & Co., Mr. F. M. Stokes and Mr. Joseph Carroll signed my wife's first petition on the grounds of innocence. My illegal sentence expired, 12th October, 1862, and I remained in prison until 19th May, 1862, and Her Majesty's Honorable Attorney General, John Fletcher Hargrave, informed me that I was not the first innocent person that had suffered in a prison.

No amount of money can compensate myself and my wife for what we have suffered in defending the truth; therefore on those grounds we ask for no money compensation; all I ask for is for the verdict to be reversed, by indorsing on the "information for perjury" this unprecedented *error in the Law Department*, and advertising the same in the *Government Gazette*, and after this, the proper Minister of the Crown, legally, to put myself and my wife in possession of our own properties, which properties by illegal means have been taken from us.

I have sent copies in print of my wife's last \* petition, and I believe there are gentlemen that signed that petition that perfectly understood the sense and meaning of the same, and it could not have been written in language so simple if I had been either legally or morally guilty of perjury; also \* copy of Ashdown and Pritchard's joint affidavit, filed March, 2/58; \* my equitable plea verified by affidavit; \* fictitious account for which I suffered, indorsed in the handwriting of His Honor the Chief Justice, "*Pritchard's red ink account or memorandum*," 5/10/59, and other printed statements.

\*See enclosure to No. 35.

\*See enclosure to No. 37.

"(Copy.)"

"(Copy.)

"Sir,

Supreme Court House, 16 December, 1862.

"I am directed by His Honor the Chief Justice to inform you that you must forthwith give notice to Dean and Ashdown of your petition, and also to the assignee, and that it will be heard before the full Court on Saturday next, the 20th instant.

John Garsed.

F. H. STEPHEN."

On Monday, 22nd December, 1862, their Honors held that they had no jurisdiction to entertain my application to expunge fraudulent claims against my estate, and show upon affidavits, and upon production of accounts, and upon exposition of the facts that the allegations in my affidavit were strictly true, and for the removal of the assignee; it must be first adjudicated upon by the Chief Commissioner. After several applications I at last received an official letter, stating that the Chief Commissioner has not the power to remove an official assignee.

"(Copy.)

"Sir,

Colonial Secretary's Office, Sydney, 8 August, 1862.

"With reference to your further letter, dated 15th October, 1862, \* but received on the 15th ultimo, I am directed by the Colonial Secretary to inform you, that it is not considered expedient that the investigation of certain circumstances connected with your case, which appears to be the object of your communication, should be instituted by the Government. Incorrect.

Mr. John Garsed.

W. ELYARD."

Annexed to my letter was a printed statement, which includes an epitome of my schedule, filed July 3rd, A.D. 1858.

Before I sequestrated my estate to have Dean & Co's. account books examined in connection with C. P. Pritchard's account books, to prove my equitable plea strictly true, I paid all my mercantile bills of exchange or promissory-notes given for value received.

"(Extract.)

"Hyde Park, 7 February, 1860.

"It is with great reluctance that I announce my inability to enter again into this case—a trial unprecedented for length and cross-examinations. But it is never too late to inquire into facts while the means of inquiry exist. That inquiry, however, must be instituted by the Government, as in England is invariably done. It is not my duty in the present state of things to enter into any such inquiry.

"ALFRED STEPHEN."

"[Case of Garsed convicted at the Sydney Gaol delivery of perjury.]

"The original letter was left with my statement at Government House, March 1, 1860.

"(Copy.)

"John Garsed,

"Supreme Court, Sydney, 3 January, 1861.

"I am directed by the Acting Chief Justice to acknowledge the receipt of your letter, dated 29th Dec., 1860. His Honor further directs me to state that he has made all due inquiries regarding the documents to which you allude, but has not been able to learn their whereabouts. Not with the papers.

"SEDGWICK S. COWPER."

If the verdict was against evidence, and the weight of evidence in the civil action, what must it have been in October, 1859, when I defended myself without a single document of mine in evidence in the civil action, with the exception of C. P. Pritchard's account books, which were refused by the Judges?

I beg of you for the sake of truth and justice to use your influence in my behalf, and advise His Excellency the Governor General (the representative of Her Majesty in this Colony) to investigate this charge of perjury. No witness need be examined to establish the truth publicly, that is if I am allowed to produce before His Excellency copies of records deposited in our Courts of Law, and original documents now in my possession, marked "exhibits in the civil action"; by so doing you will be the means of restoring peace of mind to myself and wife. You must admit that if my documents can be taken out of the Supreme Court without fear of investigation yours can, and, if required, destroyed.

I have, &c.,

JOHN GARSED,

One that suffered in a prison for swearing the truth—three years and nearly five months.

[Enclosure to No. 64.]

THE following is copied from a fictitious account deposited in the Crown Solicitor's Office, endorsed in the handwriting of his Honor the Chief Justice "Pritchard's red ink account or memorandum, 5/10/59." Although Pritchard's evidence and his affidavit, filed in the Supreme Court, 2nd March, 1858, proves it totally untrue, nevertheless, I, John Garsed, at the end of seven days, was, upon the evidence of this fictitious account, convicted of perjury, and sentenced to three years' confinement in a prison.

On the 21st day of December, 1858, I was committed to take my trial for perjury, because Pritchard's account books will not show a fictitious settlement between myself and the plaintiff Archibald Ashdown, on the 30th September, 1857. In April, 1858, after long arguments between the late Mr. Justice Wise and the Honorable R. M. Isaacs, Sir John Nodds Dickinson ruled that W. Dean & Co. are bound by Pritchard's account books. Pritchard's account books at my trial are called "Garsed's Account Books."

The Honorable Attorney General, Mr. Lutwyche, refused to file an information for perjury against me, but the Honorable Attorney General, Mr. Bailey, did on the 1st August, 1859; and at the time the information was filed Ashdown's and Pritchard's joint false affidavit, filed 2nd March, 1858, and about thirty of my documents, marked "exhibit," were either mislaid or taken out of the Supreme Court, and that, with the exception of Pritchard's account books, not one of my documents were in evidence before the Chief Justice in October, 1859.

The

The information for perjury, filed in the Supreme Court 1st August, 1859, is filed contrary to the law of the land. When perjury is assigned on an affidavit, that part on which it is assigned may be explained in another part, and upon an indictment for perjury there must be two witnesses; one alone is not sufficient, because there is in that case only one oath against another. Mr. C. P. Pritchard left the Colony the same day as Archibald Ashdown the second time charged me with perjury.

Pritchard's statement of accounts with John Garsed in terms of an agreement dated 30th September, 1857:—  
To J. Garsed, liabilities to W. Dean & Co., consisting of—

	£	s.	d.

Glebe account and advance account are written in pencil, and two of Ashdown's private accounts, kept by him in my name, in W. Dean & Co's. account books, relating to our private partnership transactions.

BANCO COURT, May 20th, 1858.

Before Mr. Justice Dickinson and a jury of four.

Foreman—F. M. Stokes, Esq.

Dean and another v. Garsed. Bill £680 15s. 3d.

The trial of this case was brought to a close. His Honor in his charge to the jury expressed great regret that he had not the power of compelling a reference to arbitration in a case of this nature, which was one that did not come legitimately within the province of a Judge and Jury to decide, and that in England a reference to arbitration would, under similar circumstances, have been at once assented to when recommended by the Judge. The material issue was whether there had been any consideration money from the plaintiffs jointly to Garsed for the acceptance of the bill £680 15s. 3d., or whether the consideration had been from Ashdown alone. According to the ruling of his Honor the verdict must be for the defendant in the latter case. After his Honor's ruling that W. Dean & Co. are bound by Pritchard's books, and that I had proved joint partnership transactions between self and Ashdown, His Honor improperly admitted in evidence a concocted account, called Pritchard's red ink account, and although this concocted account gained for the plaintiffs the verdict, that verdict was against evidence and against the weight of evidence Ashdown had charged me with perjury before going to trial, and, in consequence thereof, had brought the case to a dead lock. I sequestered my valuable estate, 3rd July, 1858, to prove before the Chief Commissioner, from the plaintiff's own account books, kept by double entry, when examined in connection with Pritchard's fictitious red ink account and his journal, that I was not guilty of perjury in defending the said bill upon equitable grounds; Judge's orders were served for that purpose, but the examination of the account books never took place until October, 1859.

My solicitor, Mr. P. A. Tompson, prepared my schedule to meet the regulations of the Court, that is showing a deficiency explained in my advertisement in the *Sydney Herald*, July 10th, 1858. To defeat the attachment, my residence Willow Lodge, Glebe, was searched, 5th July, 1858, and after 10 at night Mr. Husband, solicitor, took away my deed case full of deeds, abstracts of titles, agreements, and other valuable documents, and, to this day, I am not even allowed to see them.

I was charged with fraud for executing five deeds relating to several valuable properties, and twice committed to take my trial for fraud for executing two of the deeds—one between myself, Mr. Terry, Mr. Dick, and Mr. Smart; one trial for fraud lasted five days. On the 1st February, 1859, a bill was filed in equity against me, my wife, and her trustee to set aside three deeds of even date, dated 4th February, 1858, which are called fraudulent deeds; and it is a fact that the Examiners of Titles, although the bill is not dismissed, accepted in July last the defendant's title by granting a certificate of title to William Sixsmith for 30 acres of land, part of Bexley Estate, originally granted to James Chandler.

So simple are the real facts connected with my case, that I can prove from His Honor the Chief Justice's notes of Mr. Carroll's evidence relating to W. Dean & Co's. account books, that the fictitious red ink account is totally untrue.

The following memorandum will fully explain the mystery that surrounds the bill £680 15s. 3d., &c., &c., &c. :—

Devonshire-street, Fort-street,—Four dwelling-houses, valued at (10)—£2,810; containing in each six good rooms, built of stone and brick, with slated roofs, cemented all round outside, each having a frontage to this street of 14 feet by a depth of feet to the water. Let at £1 10s. 9d. per week each house. (See plan of the property.)

The above four dwelling-houses belonged to my wife. This property is valued by the plaintiff in the bill pending in equity at upwards of £4,000; in consequence of the said bill, my wife, during the time I was suffering wrongfully in a prison, lost her four houses; nevertheless, by her own industry, she kept herself, and supported me in a prison; and when a proposal was made to her that I should have my liberty if I would sign a memorandum that "I might have been mistaken," her reply,—  
"I would rather see my husband die in a prison than ask him to sign such a memorandum."

JOHN GARSEED.

No. 65.

Mr. J. Garsed to The Secretary for Lands.

Sir,

Bowenfels, 1 May, 1869.

I beg most respectfully to call your attention to the following letter:—

"(Copy.)"

"Sir,

Department of Lands, Sydney, 30 June, 1865.

Referring to your application of the 15th ultimo that certain land at the corner of Bridge and Pitt streets, being the site of the buildings known as the Commercial Chambers, may be alienated to the trustee of your wife's estate,—

"I

"I am directed by Mr. Secretary Robertson to inform you that an allotment of 6 perches, at the corner of Bridge and Pitt streets, was sold to John Terry Hughes in 1839, but that afterwards the alignment of Pitt-street was altered, leaving a space of about 15 feet between the east boundary of the allotment and the new alignment of Pitt-street.

"2. The Commercial Chambers are built partly upon the allotment and partly upon the space in question, which has not as yet been legally alienated from the Crown, and can only be alienated to the lawful owner of the allotment sold to J. T. Hughes; at any rate until such owner has declined to claim under the law.

"M. FITZPATRICK."

Mr. Burrowes from the Survey Department marked out the space upon which I built my Commercial Chambers, at a cost of £1,500, or thereabouts.

In the year 1857 Mr. John Williams, Crown Solicitor, and others, acting as trustees, leased to me the site upon which I built my Commercial Chambers, having power at the expiration of my lease either to sell or pull down my said chambers. During the time I was suffering illegally in Darlinghurst prison, the late Mr. Clark Irving, M.P., received in trust the rents coming in from my Commercial Chambers (about £500 a year), and the said lease expired during the time I was in prison.

In the Supreme Court of New South Wales, Her Majesty's Honorable Attorney General, John Fletcher Hargrave, Esq., did, on behalf of Her Majesty the Queen, on the 23rd Decr., 1862 (Roll 120, 4th Term, A.D. 1862), file an information for intrusion against Isaac Wellbank, W. R. Smart, G. L. Wilson, and others claiming under me. This writ of intrusion was followed by a writ of ejectment; and those persons who refused to acknowledge the right of the Queen were turned off the land, and the Sheriff, on behalf of the Queen, took possession of the land, together with the buildings, which cost me about £1,500 to erect.

I beg most respectfully to call your attention to the description of the land claimed on behalf of the Queen, as set forth in the said writ, and you will learn that, with the exception of a few square feet, part of the original Tank Stream, now covered over, and fronting to Bridge-street, I built my Commercial Chambers upon land not alienated from the Crown; and that the allotment of said 6 perches, sold to John Terry Hughes in 1839, will be found in Hamilton's-lane, near my Commercial Chambers.

The lawful owner of the allotment sold to J. T. Hughes can have no claim under the law to land not yet alienated from the Crown, and upon which I built my Commercial Chambers. Will you please to inform me if the Government are receiving the rents of my Commercial Chambers. Your early reply will greatly oblige.

I have, &c.,

JOHN GARSEED.

P.S.—I trust that, for the sake of justice, the present Government will sell to the trustee of my wife's separate estate, for the benefit of my wife, the said piece of land, corner of Bridge and Pitt streets, being the site of the buildings known as the Commercial Chambers, at the upset price, on the grounds that I could not foresee that private individuals would lease me land not alienated from the Crown. If the Government required the said 6 perches of land sold to John Terry Hughes in 1839 for a lane or road running from Bridge-street to Hunter-street, surely the Government had the power to re-purchase the land; and I respectfully say in my opinion it would be beneath the dignity of the Crown to compensate the lawful owner of the allotment sold to John Terry Hughes by giving such owner my Commercial Chambers, which cost me and not the Government £1,500, or thereabouts, to build. Two wrongs will never make one right.

J.G.

I do not think the position of the case is altered since Mr. Garsed was last written to. The land alluded to as unalienated can only be alienated to the person holding the fee-simple of the adjoining granted allotment.—M.F., 5 May.

I see no sufficient reason to interfere.—W.F., May 6, 1869.

#### No. 66.

#### The Under Secretary for Lands to Mr. J. Garsed.

Sir,

Department of Lands, Sydney, 18 May, 1869.

Referring to your letter of the 1st instant, in which you apply that the Commercial Chambers See No. 66. in Pitt-street may be alienated to the trustees of Mrs. Garsed's separate estate, I am directed to inform you that the position of this case is not altered since the date of my last letter, and that the land to which you allude as unalienated can only be alienated to the person holding the fee simple of the adjoining granted allotment.

I have, &c.,

M. FITZPATRICK.

#### No. 67.

#### Mr. J. Garsed to The Secretary for Lands.

Sir,

Bowenfels, 9 November, 1870.

I beg respectfully to bring under your notice the following *hard case* :—

In the year A.D. 1839 an allotment of 6 perches of land, near the corner of Bridge and Pitt streets, Sydney, was sold to John Terry Hughes; there was a space between the east boundary of this allotment and the new alignment of Pitt-street.

About the beginning of 1857 I had the misfortune to lease from Mr. John Williams and others, trustees, a piece of land corner of Bridge and Pitt streets, Sydney, and informed about 10 feet of this land, having a frontage to Pitt-street, had not been alienated from the Crown, I had power in terms of the lease to sell or pull down any building that I might erect upon the land. I took the precaution before building upon this land to call at the Surveyor General's Department to have a surveyor from that department to mark out the land I had leased, and this Mr. Burrowes did. After this I built at an expense of about £1,500, certain buildings known as the Commercial Chambers, and I leased Chambers to Wm. Robert Smart, conveyancer, P. A. Thompson, solicitor, and others; some of those leases were deposited, in 1859, in the Crown Law Office. On the 21st December, 1858, Mr. D. Forbes, P.M., illegally sent me to prison, to take my trial on a charge of perjury; suffice it to say the perjury is assigned on an affidavit which the records of the Supreme Court will prove is *strictly true*. I was tried on the evidence of a fable, and

and on this evidence was convicted of perjury, and sentenced to three years in a prison. A few months before the expiration of my illegal conviction and sentence, "to wit," on the 19th of May, 1862, His late Excellency the Governor, by the advice of Her Majesty's Attorney General, now Mr. Justice Hargrave, released me from prison, on the grounds that I was neither legally nor morally guilty of perjury in making this said affidavit.

During the time that I was suffering in a prison for swearing the truth the lease of the said land expired.

Shortly after my release from confinement the Attorney General, on behalf of the Crown, claims the land I had lessed from Mr. John Williams and others.

In the Supreme Court, Sydney, 2,085, 4th term, A.D. 1862, John Fletcher Hargrave, Esq., on behalf of the Crown, files a writ of intrusion, 31st December, 1862, against Wm. R. Smart and others, claiming a title under me. I believe Mr. Wm. Robert Smart put in an appearance, but suffice it to say the Crown got possession of the land, together with my buildings, which cost me about £1,500.

If you refer to the writ filed by John Fletcher Hargrave, Esq., you will find that the Crown claimed the whole of the land, and that no portion of the land upon which I built my Commercial Chambers was sold to John Terry Hughes in 1839.

Mine is a hard case; five men combine together to send me to prison; the principal conspirator was A. Ashdown, the late Railway Accountant. The late Mr. Clark Irving, during the time I was suffering wrongfully in a prison, received in trust the rents coming in from my Commercial Chambers, and never accounts for a single shilling; Mr. Irving left the Colony shortly before I was released from confinement. After my release from prison the Honorable Colonial Secretary informs me it was not expedient for the Government to investigate my case. On Monday, 22nd December, 1862, I appealed to the full Court for justice, and their Honors held that they had no jurisdiction; and this week I have received a letter from the Duke of Edinburgh's Equerry, informing me that it is not in His Royal Highness's power to interfere in my behalf, but I trust that when Her Majesty the Queen hears of my pitiable case of injustice, every circumstance connected with it will be strictly investigated.

I beg respectfully to say that you have it in your power, being the proper Minister of the Crown, to do me justice in this matter of my Commercial Chambers, and I most earnestly beg of you either to sell to me this land upon which my Commercial Chambers are built, or make me some compensation for the buildings. Your early reply will greatly oblige.

I have, &c.,

JOHN GARSED.

#### No. 68.

#### Mr. J. Garsed to The Secretary for Lands.

Sir,

Bowenfels, 15 November, 1870.

No. 67.

I, on the 9th instant, addressed a letter to you, relative to my Commercial Chambers, built upon Crown land, corner of Pitt and Bridge streets, Sydney, and thinking that you might have submitted my letter to Her Majesty's Attorney General, to enable him to examine the proceedings instituted in the Supreme Court, 4th term, A.D. 1862, "The Attorney General v. Reading and others, M'Carthy and Son, Solicitors," I have sent you the sequel to my letter, that you may submit the same to the Attorney General to enable him more clearly to understand the case. (In speaking of law reform this matter relates to law and equity.)

The following is copied from the *Empire*, published Wednesday, May 21st, 1862:—

"To the Editor of the *Empire*.

"Sir,

"Will you please to correct the following statement in your issue of to-day, under the head of 'Release of prisoners from Darlinghurst Gaol.'

"John Garsed, who, it may be remembered, was found guilty of fraudulent insolvency, for which he was sentenced to a term of four years imprisonment.

"The following is a correct statement: October, 1859, I was tried before His Honor the Chief Justice for swearing I gave Ashdown a bonus of £2,000, or thereabouts, of which the £680 15s. 3d., the amount of the bill of exchange, now sued upon, forms part. 'Verdict—guilty,' and sentenced to three years confinement in Darlinghurst. So far from being a fraudulent insolvent, the undersigned voluntarily sequestrated his estate to protect his properties, first paying all bill of exchange and promissory notes, with the exception of the above in dispute, and even that was secured.

"Sydney, May 20th.

JOHN GARSED."

Case.

Anterior to 14th October, 1854 (on land at Blackwattle Swamp, Glebe), I built for R. J. Want, L. Barber, and C. Irving twenty-one houses, at a cost of about £7,500. On the 14th October, 1854, I purchased of Mr. C. Irving his one-third share of the said houses for £4,000, to be paid on the 14th October, 1857. The said £4,000 was secured upon the said property.

Subsequent to 14th October, 1854, R. J. Want, L. Barber, and myself built jointly twenty-four houses on a portion of the land, making in all forty-five houses.

I sold to Mr. R. J. Want my third undivided share in the said forty-five houses and land, subject to Mr. Irving's mortgage debt of £4,000, and Mr. L. Barber sold to Mr. Irving his one-third share in the said property. I agreed to re-purchase from Mr. R. J. Want one-third undivided share in the said property, on condition the term of payment of the said £4,000 was deferred until the 14th October, 1859. Mr. Irving agreed to this arrangement.

Copy in Mr. R. J. Want's handwriting, dated August 5th, 1856.

Mr. Irving agreed to extend the period of the mortgage for two years, on the Blackwattle Swamp, from the expiration of the same.

"Extract—Copy.

"Dear Sir,

Commercial Chambers, Pitt-street, 20 October, 1857.

"I wish to call your attention to C. Irving, Esq.'s mortgages. The first expired on the 14th. It will be necessary for you, before leaving Sydney, to see that the two years are added, if not already done.

"R. J. Want, Esq.

JOHN GARSED."

Extract

Extract from my letter to R. J. and G. Want, dated January 25th, 1858:—

"With respect to Mr. Ashdown's matter, I certainly thought, in the first instance, that you were acting as my attorney, or I should have applied to some other gentleman, by which means I should have been a gainer of £2,000, which I have now lost, for no one acting for me would have allowed the written contract to have been varied in the inexcusable way in which it has been; and, but for the trust and confidence I had in you, should have perused the draft myself, or have got some one else to do so. Compare the contract with the rental of the contract in the deed."

The original draft, in Mr. R. J. Want's handwriting, ought to be in the Crown Law Office, also the copy dated 11th August, 1857. This Ashdown is the late Railway Accountant. He absconded 1st of April last, and the Government offered a reward of £100 for his apprehension.

Mr. R. J. Want left the Colony in or about December, 1857, but previously to him leaving Sydney I made a proposal to Mr. C. Irving, which he agreed to; that is to say, I agreed that if Mr. Irving would join me in compelling Mr. R. J. Want to divide the said property at Blackwattle Swamp, Glebe, into three equal parts, I would give him a mortgage over my Commercial Chambers for £1,500, and this £1,500 could go in part payment of the said £4,000, and that I would sell a portion of my third share of the property, and pay him the balance.

Messrs. Reuss and Brown, surveyors, Pitt-street, Sydney, were instructed to divide the property of Blackwattle Swamp into three parts, which they did, and R. J. Want, C. Irving, and myself met at the Glebe. Mr. Want held in his hand three straws. I drew the longest, and had first choice. I and Mr. Irving instructed Mr. R. J. Want to prepare the deeds of division; but Mr. Want left the Colony before the deeds were executed, and the property to this day remains undivided.

About May, 1858, I borrowed of Mr. C. Irving £160, and on the 1st of June, 1858, or thereabouts, I executed an indenture of mortgage over my Commercial Chambers to secure the said £1,500, and deposited with him the lease of the said land upon which my Commercial Chambers are built, corner of Bridge and Pitt streets, Sydney; and I instructed Mr. C. Irving to receive in trust my third share of the rents of the said forty-five houses, and the rents coming in from my Commercial Chambers, and to give me credit for the same off the said two sums of £4,000 and £160, and further informed him, as soon as Mr. R. J. Want returned to the Colony, and the deeds were executed, I would sell a portion of my share of the property and pay him what balance might then be due.

Mr. C. Irving, or his agent, from on or about the 1st of June, 1858, did receive my share of the rents of the said forty-five houses, also the rents coming in from my Commercial Chambers; but during the time I was suffering illegally in prison, Mr. Irving, I believe, without receiving any consideration, gave the lease of the land upon which my Commercial Chambers are built, to Mr. W. R. Smart, conveyancer, and Mr. Smart received the rents and kept the money up to the date of his insolvency, and after this Mr. Robert Sempill, Official Assignee, received the rent of my Commercial Chambers, I believe, up to the time that the Crown claimed the land upon which my Commercial Chambers are built.

On the 4th of March, 1859, Mr. Clarke Irving made an affidavit, sworn before Mr. A. Purefoy, a Commissioner for Affidavits, and filed in my estate (I believe this affidavit is in the handwriting of my solicitor, Mr. P. A. Thompson, in substance, that he never received any of the said rents, or, in other words, I had no set-off against the said £4,000 and £160; and Mr. Irving swears that on the 4th day of March, A.D. 1859, I was indebted to him in the sum of £4,188 12s. 10d.

I had borrowed the sum of £4,700, secured upon my wife's separate estate; £3,500, part of the said sum of £4,700, I borrowed from Mr. S. H. Terry, in September, 1857.

Copy in my solicitor's (Mr. P. A. Thompson) handwriting, endorsed Regina v. Garsed, Ex. 6th Sept., 1859.—R.S. (meaning Robert Sempill.)

Fort-street, subject to mortgage of	£1,200
Willow Lodge, and Oak Lodge, subject to mortgage of	3,500

In consideration. To be conveyed to Mrs. Garsed's trustee. £4,700

Equity of redemption.

Bexley, subject to mortgage to Terry of	£2,000
Blackwattle and Chambers, subject to mortgage to C. Irving of	4,000
Chippendale (7) cottages, subject to mortgage to Provident Trust Company of	700

And Camperdown Bligh Terrace properties free from encumbrance, conveyance showing no trust.

Trust deed to realize and apply proceeds in discharging the £4,700, *not to be registered*, and after payment of that sum to account to Mr. Garsed for one half of the profits.

The above are Mr. P. A. Thompson's instructions to Mr. W. R. Smart, conveyancer, to prepare three deeds, each dated 4th February, 1858. Those three said deeds are, or ought to be, in the Crown Law Office, exhibits in the matter of the Queen against myself, in August and September, 1859.

My wife's trustee paid Mr. Terry £750 in part payment of the said £2,000, and a bill, now pending in equity, prevents my wife's trustee paying Mr. Terry the balance.

I believe Mr. C. Irving received in rents the said £4,000, and Archibald Ashdown's estate is liable for the said £700. There are seven cottages, valued at £1,400. A deed of trust, prepared in Mr. R. J. Want's office, dated 18th March, 1857, signed by A. Ashdown and myself, which deed proves that I held in trust for A. Ashdown and his heirs one half share in the said seven cottages, the remaining half-share for myself and my heirs. An affidavit, prepared in Mr. R. J. Want's office, and sworn by A. Ashdown and C. P. Pritchard before George Pownall, Esq., a Commissioner for Affidavits, 2nd March, 1858, states, the only joint transaction A. Ashdown had with me was a purchase of a place called Rosherville, and the erection of certain buildings thereon. The seven cottages are built in the city of Sydney. Rosherville is situated on North Shore.

I trust that I have clearly elucidated and explained this matter of the Commercial Chambers in a way that you cannot misunderstand the facts of this case. Although Mr. Adam Wilson, R. J. Want, P. A. Thompson, and C. Irving are dead, and A. Ashdown absconded, nevertheless death in no way complicates matters in my case. Your early acknowledgment of my letter will greatly oblige.

I have, &c.,

JOHN GARSED.

P.S.—I have sent with this a copy of my advertisement, which refers to this suit pending in Herewith. equity.—J.G.

See last decision on No. 65.—W.W.S., 4 Jan., 1871. Mr. Garsed has already been informed that the Government cannot re-open this case.—J.B.W., 9 Jan.

[Enclosure

## [Enclosure.]

In the Supreme Court of New South Wales.—In Equity.

Adam Wilson v. Thos. S. Hutchinson, John Garsed, and Emma Garsed.

Bill filed in Master's Office, 1st February, 1859. (Case still pending.)

TAKE notice, that in consequence of Mr. Archibald Ashdown, who was arrested on the charge of embezzlement, having absconded, I, the undersigned, further caution the public against purchasing properties mentioned in the said bill, filed 1st Feb., 1859.

The Examiners of Titles, in July, 1865, and without waiting for the dismissal of the said bill, accepted the defendant's title (which said A. Ashdown and others called fraudulent) by granting a certificate of title to William Sixsmith for 30 acres of land, being lots 2 and 4 and part of another of section 5 of the Bexley Estate, according to the original subdivision by John Garsed; and portion of 1,200 acres originally granted to James Chandler.

“(65-181)”

“ [Copy.] ”

“ Sir,

Registrar General's Department, Land Titles Branch, Sydney, May 31, 1865.

“ With reference to your communication of the 29th instant, relative to the application of William Sixsmith, I beg to state that if you have any caveat to enter, you must do so in the usual form.

“ Mr. J. Garsed.

“ E. G. WARD,  
Deputy Registrar General.”

Defendants say William Sixsmith's title to his land is as good as any direct from the Crown; and the Registrar General received from me every information relative to the said suit, as will be seen by the following letter:—

“(65-310)”

“ [Copy.] ”

“ Sir,

Registrar General's Department, Lands Title Branch, Sydney, August 9, 1865.

“ I beg to acknowledge the receipt of your letter (No. 12) with regard to proceedings in the Supreme Court—Adam Wilson, plaintiff, and Hutchinson and others, defendants.

“ Mr. John Garsed.

“ E. G. WARD,  
Deputy Registrar General.”

“ In the Supreme Court of New South Wales.

“ No. 317—A.D. 1858.

“ W. Dean and A. Ashdown, plaintiffs; John Garsed, defendant.

A CERTAIN joint affidavit, made by William Robert Smart, certificated conveyancer, John Garsed, and Thomas Sanders Hutchinson, filed in said action, June 14th, 1858, in reply to certain affidavits made by Hugh Dixon and Archibald Ashdown, filed in the said action June 10th, 1858, sets out the nature of the deeds, which A. Ashdown and others call fraudulent. I am in possession of a document in the handwriting of my solicitor, Mr. P. A. Tompson (marked exhibit), which proves that my solicitor instructed Mr. W. R. Smart to prepare three deeds, each dated 4th February, 1858, to register the conveyance for £4,700, Garsed to Hutchinson, showing no trust; but not to register the trust deed—said conveyance registered 8th February, 1858, No. 455, book 53. Annexed to this conveyance are four plans—plan marked D, which relates to 45 houses and land adjoining undivided property, belonging to John Garsed, Randolph John Want, and Clark Irving. This property still remains undivided, in consequence of Mr. R. J. Want leaving the Colony in December, 1857, before the deeds of division were executed.

“ The undersigned further cautions the public against purchasing certain properties mentioned in an attested agreement, dated 30th September, 1857, signed “ A. Ashdown,” registered by me 13th February, 1863, No. 814, book 81; more particular “ Transfer of Eggliton's mortgage for £900;” mortgage on Russell's Arms and portion of Newtown Foundry, and land adjoining; also, eight allotments of land situate at Bligh Terrace, Newtown.

“ The Government having offered a reward of £100 for the apprehension of A. Ashdown, and if not apprehended within two months, application will be made to have the said bill dismissed on the grounds of want of prosecution. At the death of the plaintiff the three said deeds, dated 4th February, 1858, with others, were deposited in the Crown Law Office.

“ April 20th, 1870.

“ JOHN GARSED,  
Bowenfels.”

THE following official letters will explain the mystery that surrounds my case. Suffice it to say, I was neither legally nor morally guilty of perjury in defending the above action on equitable grounds. Mr. Adam Wilson, on oath, established my innocence on all charges brought against me in his name. It was from circumstances over which I had no control, and could not foresee, that induced me to seek justice in the Insolvent Court; but before so doing, I paid all my bills of exchange or promissory notes given for value received. Not being insolvent, my solicitor, Mr. P. A. Tompson, prepared my schedule, filed 3rd July, 1858, to meet the regulations of the Court. On the 10th July, 1858, Mr. Adam Wilson filed a suggestion in the Supreme Court to defend the above action, signed P. A. Tompson, attorney for the defendant; Gilbert Wright, attorney for Adam Wilson. This action is still pending; but owing to a dead-lock in law cannot terminate.

Dead Lock.—Annexed to A. Ashdown and C. P. Pritchard's joint affidavit, filed in the above action, 2nd March, 1858, is a copy of said agreement, dated 30th September, 1857, signed A. Ashdown; registered No. 814; book 81.

Mr. Bailey, on behalf of the Queen, filed an information for perjury against me 1st August, 1859; his witness, Archibald Ashdown. The perjury is assigned on my equitable plea, which amounts to a plea of want of consideration, verified by affidavit filed in the above action, 26th February, 1858.

On the 1st August, 1859, the said joint affidavit, made by Ashdown and Pritchard, was not in the Supreme Court.

The facts are remarkable for simplicity; the only matter at issue is the bill of exchange, £680 15s. 3d., mentioned in the agreement registered No. 814; book 81.

The Queen, in the information, states:—“ Whereas in truth and in fact the said sum of £680 15s. 3d., the amount of the said bill of exchange, was the balance of an account due from John Garsed to the firm of Dean and Company, and was not a debt due to Archibald Ashdown alone.”

The evidence of Ashdown and Pritchard's joint affidavit proves the reverse. “ The law provides no remedy in a case like this,” and so simple are the facts that any competent accountant can prove, on examination of Dean and Company's account books, that on the 1st of August, 1859, I was not indebted to the firm the value of the smallest coin of the realm.

The Attorney General, Mr. Bailey, states in his information—“ It was necessary that John Garsed should file a plea to the declaration of Wm. Dean and Archibald Ashdown,” and that the plea should be accompanied by an affidavit of the truth of such, as required by a certain Act, meaning ‘ An Act to facilitate the remedies on bills of exchange and p-notes.’ I merely obey the law, for my equitable plea was prepared by Mr. E. Wise (afterwards Mr. Justice Wise) and Mr. P. A. Tompson, from about thirty of my documents, and Pritchard's account books, kept under the inspection of A. Ashdown. Not one of my documents was in evidence at my trial for perjury—‘ all taken out of the Supreme Court.’ Unfortunately this said Act gives the Judge no power to refer matters of disputed accounts to arbitration. Mr. Fisher, barrister-at-law, in speaking of my case, thinks it could not have happened had the law been reformed, and refers to this Act.”

(Official Correspondence.)

“ Hyde Park, 7 February, 1860.

“ It is with great reluctance that I announce my inability to enter again into this case—a trial unprecedented for length. But it is never too late to inquire into facts while the means of inquiry exist. That inquiry, however, must be instituted by the Government, as in England is invariably done.

“ [Case of Garsed, convicted at the Sydney gaol delivery of perjury.] ”

“ ALFRED STEPHEN.

“ P.S.—My note-books, including the notes of this trial, will be left in charge of Mr. Justice Dickinson, on application to whose clerk they will, no doubt, be admissible at any time.”

His

His Honor the Chief Justice's letter and my memorial were left at Government House, 1st March, 1860. On the following evening A. Ashdown's private accounts, kept in my name in Dean and Ashdown's account books, were nearly destroyed by an incendiary fire.

"(62-3506-375)

Colonial Secretary's Office, Sydney, 8 August, 1862.

"Sir,

"With reference to your further letter, dated 15th October, 1862, but received on the 15th ultimo, I am directed by the Colonial Secretary to inform you that it is not considered expedient that the investigation of certain circumstances connected with your case, which appears to be the object of your communication, should be instituted by the Government.

"Mr. John Garsed.

W. ELYARD."

In my letter, dated by mistake 15th October, was a printed epitome of my schedule, and the nature of the charges brought against me in the name of Adam Wilson.

"(69-2903-369.)

Colonial Secretary's Office, Sydney, 20 April, 1869.

"Sir,

"In acknowledging the receipt of your several letters (the first addressed to His Excellency the Governor) relative to the case the Queen v. yourself for perjury, I am directed by the Colonial Secretary to inform you that the communication made to you on the subject from this office on the 30th ultimo must be considered final.

"John Garsed, Esq., Bowenfels.

HENRY HALLORAN."

"Extract from letter, 30th ultimo:—'The Crown Law Officers have not, nor has the Executive Government, any jurisdiction whatever over the case.'"

I will suggest a simple remedy, that is—That the Executive Government pass an Act on behalf of the Queen to expunge from the records of the Supreme Court all proceedings instituted against me in the name of the Queen.

Shortly after the 10th July, 1858, all proceedings in my estate ceased to be legal. I did intend to publish the document in the handwriting of my solicitor, Mr. P. A. Tompson, marked "exhibit," giving instructions to Mr. R. W. Smart to prepare the said deeds, dated 4th February, 1858 (the said £4,700 relates to my wife's separate estate); but owing to two trust deeds and three others not being registered, it would occupy too much space for an advertisement in setting out an abstract of title.

Bowenfels, 26th May, 1870.

JOHN Garsed.

### No. 69.

#### The Under Secretary for Lands to Mr. J. Garsed.

Sir,

Department of Lands, Sydney, 13 January, 1871.

Adverting to your letter of the 15th November last, in which you urge reconsideration of your application for the alienation of certain land at the corner of Bridge and Pitt streets, on which buildings had been erected by you, I am directed by the Secretary for Lands to inform you that the Government cannot re-open this case, to which effect you have already on several occasions been apprised. See No. 69.

I have, &c.,

W. W. STEPHEN.

### No. 70.

#### Mr. J. Garsed to The Secretary for Lands.

Sir,

Bowenfels, 14 January, 1871.

I had the honor of receiving a letter from your Secretary, dated 13th January, 1871, relative to my Commercial Chambers, which I had the misfortune to build, at a cost of about £1,500, upon Crown land at the corner of Bridge and Pitt streets, Sydney; and your Secretary informs me that the Government cannot re-open this case, to which effect I have already on several occasions been apprised. See No. 69.

The facts are simple: This land was leased to me for three years, with power to remove any buildings that I might erect upon the land at the expiration of the lease; but at the time the lease expired I was suffering wrongfully and illegally in a prison on a charge of perjury brought against me by the Attorney General, Mr. Bailey. The perjury is assigned upon an equitable plea strictly true, verified by affidavit. After a change of Attorney Generals His late Excellency the Governor, by the advice of the Attorney General (now Mr. Justice Hargrave) released me from prison before the expiration of my illegal sentence on the grounds that I was neither legally nor morally guilty of perjury.

The Attorney General, on behalf of the Crown, filed a writ of intrusion in the Supreme Court, and from the description of the land as therein set forth claims the whole of the land, with the exception of a few square feet near the bridge that crossed the Tank Stream in Bridge-street. At the time I erected the Chambers the Tank Stream was an open stream.

The only information received by me from the Government, throwing any light on the matter, is contained in a letter dated 30th June, 1865. This letter informs me that an allotment of 6 perches was sold to John Terry Hughes in 1839; that afterwards the alignment of Pitt-street was altered, and a space of about 15 feet between the east boundary of the allotment and the new alignment of Pitt-street. The Commercial Chambers are built partly upon the allotment and partly upon the space in question, which has not been alienated from the Crown. No. 43.

I am informed, and believe, the Tank Stream divides the said allotment sold to John Terry Hughes in 1839 and the Crown land upon which I had the misfortune to build my Commercial Chambers, and this is borne out by the description of the land set forth in the said writ of intrusion.

Will you please to forward me a description of the land from the conveyance of the said allotment of 6 perches sold to John Terry Hughes in 1839, that I may give a copy of the same to a surveyor, for him to ascertain which is correct, viz., "the description of the land as set forth in the writ of intrusion filed by the Attorney General, on behalf of the Crown, in the Supreme Court, 31st December, 1862," or the information contained in said letter, dated 30th June, 1865; for the impression on my mind is that the Crown at no time alienated the Tank Stream to John Terry Hughes, and the boundary of the land on one side, upon which I built the Chambers, is on the edge of Tank Stream. Note.—Stone piers are built on the edge of the Tank Stream, on which are turned brick arches to carry the back-front of the building; on the front, facing Pitt-street, piles are driven to carry the building. No. 43.

The Crown claims all the land from said piles to said piers; therefore how is it possible that any portion of the land between the Tank Stream and Pitt-street was sold to John Terry Hughes in 1839?

All that I require is but a simple act of justice, and that is—that the Government should either make me some compensation for the buildings, which cost me about £1,500 to erect, or allow me to remove the buildings.

Mine is a hard case. I suffer from first to last for obeying the law, and the Cowper Ministry informed me it was not expedient for the Government to investigate my case.

I have, &c.,

JOHN Garsed.

## No. 71.

## Mr. J. Garsed to The Secretary for Lands.

Sir,

Bowenfels, 16 January, 1871.

No. 70.  
No. 43.

In my letter of the 14th instant, relative to Crown land, corner of Bridge and Pitt streets, Sydney, I forgot to mention letter dated 30th June, 1865, received from Department of Lands, informing me that an allotment of 6 perches at the corner of Bridge and Pitt streets was sold to John Terry Hughes in 1839.

Allotment—If corner of Bridge and Pitt streets it is evident the course of the Tank Stream must have altered and run nearer Pitt-street, and in that case the 6 perches of land will be found in Hamilton Road; but it is quite clear had not the Attorney General, on behalf of the Crown, filed a writ of intrusion, followed up by a writ of ejectment and taken possession of the land, I should not have lost my Commercial Chambers; but it is easy for the Surveyor General to have the original grants of land surveyed from George-street towards Pitt-street, and then it will be ascertained whether the Crown in the information for intrusion claimed more land than belonged to the Crown.

There is no neglect on my side as you will see by the following statement:—

My surveyor, 7th February, 1857, attended on City Engineer and Surveyor, relative to surveying in the Tank Stream.

My surveyor, 21st March, attended on the Surveyor General and Mr. Burrowes respecting this land.

My surveyor, 30th March, attended on Mr. Burrowes, about covering in the Tank Stream.

My surveyor, 25th April, attended upon the City Building Surveyor, to give notice for houses in Pitt-street.

I humbly submit that two wrongs will not make one right, and I respectfully say that it is beneath the dignity of the Crown to take the land, together with my Commercial Chambers, which cost me about £1,500, without making some compensation for the same. I will briefly mention that Mr. Burrowes, surveyor, drove the corner pegs, and marked out the boundary of the land.

I have, &amp;c.,

JOHN GARSED.

Information for intrusion, filed 23rd December, 1862, 2085 Roll 120, 4th Term.

No. 68.

I have annexed to this copy of an advertisement that will clearly explain to you the mystery that surrounds my case. It is unprecedented in the history of criminal jurisdiction. Two wrong convictions for perjury in one gaol delivery, viz., Miss Isabella Mary Kelly and myself; but in my case the Judge had no jurisdiction, owing to a dead lock in law.—J.G.

## No. 72.

## Mr. J. Garsed to The Secretary for Lands.

Sir,

Ilford, 15 July, 1872.

In March, 1857, a portion of the Tank Stream was an open ditch, and on or about 21st of March, 1857, Mr. Burrowes, from the Surveyor General's Department, marked out the boundary of a piece of land having a frontage to Bridge and Pitt streets, Sydney, which land I had leased from one Mr. John Williams and others, with power to sell or remove any building I might erect upon the land, at the end of the lease, and at a cost of £1,500, or thereabouts, I erected certain buildings known as Garsed's Commercial Chambers; a portion of the building is now occupied as a public-house.

On the 9th of December, 1858, one Archibald Ashdown the second time lodged at the Central Police Court, Sydney, a monstrous charge of perjury against me; and if you refer to *Sydney Morning Herald*, December 17th, 1858, you will learn Mr. Holroyd appeared for Ashdown, and Mr. Butler for me, and the chief items of the information, strange to say, Pritchard's account books, kept under the inspection of Ashdown, sent me to prison on the 21st December, 1858, to take my trial for perjury. But it was not until the 1st of August, 1859, that Mr. Bailey, Attorney General, on behalf of the Queen, filed an information in the Supreme Court against me for perjury. This information is filed contrary to common law and strange to say that in this case we have on record in the Prothonotary's Office a dead lock in law on and from the 1st of August, 1859, which prevents the Judges having any legal jurisdiction in the matter.

To make the matter simple, the following is copied from *Sydney Morning Herald*, 17th December, 1858: "Defendant filed a plea, on the 26th February, 1858, and made an affidavit in verification thereof before Edwin Daintrey, Esq., a Commissioner for taking affidavits, and swore among other things that, *"I gave Ashdown a bonus of £2,000, or thereabouts, of which the £680 15s. 3d., the amount of the bill of exchange now sued upon, forms part."*

The underlined [italics] is the record in the information filed by the Attorney General on behalf of the Queen.

The Attorney General on behalf of the Queen denies the above truthful statement, and states the said bill, £680 15s. 3d., was the balance of an account due by me to Dean & Co., auctioneers, and not a debt due to A. Ashdown alone.

You will clearly see there is nothing complicated in the above, and if you read the depositions, sworn at the Police Office, you will learn that Mr. Edwin Daintrey's evidence proves I did give Ashdown a bonus of £2,000, and if you read Mr. M'Kechnie's (clerk of the Supreme Court) evidence, you will learn that Ashdown and Pritchard's joint affidavits filed 2nd March, 1858, was missing.

I do not mean to say that Mr. Bailey, Attorney General, read either the said joint affidavit or depositions sworn at the Police Court before filing his information for perjury, but this I say, it is not legal or constitutional to make me the victim of the erroneous opinion of Her Majesty's Attorney General; for the evidence of Ashdown and Pritchard's joint affidavit, and copy of an agreement annexed, prove clearly that the said bill, £680 15s. 3d., is payable to A. Ashdown individually, and Dean and Ashdown's account books prove I was not indebted to the firm of W. Dean & Co. on the 1st of August, 1859.

On

On the 5th October, 1859, I was tried before the Chief Justice, convicted, and sentenced to remain in prison until October, 1862, on the evidence of a fictitious memorandum, marked in the handwriting of His Honor the Chief Justice—"Pritchard's red ink account or memorandum" (5/10/59). On the 19th May, 1862, His Excellency the Governor, by the advice of Her Majesty's Attorney General (now Mr. Justice Hargrave) released me from prison, on the grounds I was neither legally nor morally guilty of perjury. In August following I received official letters from the Honorable Colonial Secretary (now Sir Charles Cowper) informing me it was not expedient for the Government to investigate certain circumstances connected with my case. In England the public would want to know what the Colonial Secretary meant.

During the time I was suffering illegally in a prison the lease of the said land terminated, and in December, 1862, Her Majesty's Attorney General, on behalf of the Queen, filed in the Supreme Court at Sydney a writ of intrusion, which was followed by a writ of ejectment, and the Sheriff, on behalf of the Queen, took possession of the land, together with buildings which cost me about £1,500.

I respectfully wish to learn from you who is the proper Minister of the Crown in this matter?

1st. Will you sell me the Crown lands set forth in the said writ of intrusion at the upset price?

2nd. If not, will you pay me the value of the buildings, such value to be settled by arbitration?

3rd. If you will not sell to me the land, or pay for the buildings, will you allow me to remove the buildings?

Your early reply will greatly oblige.

I have, &c.,  
JOHN GARSED.

P.S.—I will mention I received from Ashdown Pritchard's account books on the 21st of December, 1857, on the payment to him of two £50 promissory-notes towards Pritchard's salary, which I paid. The said account books showed a balance in my favour of £19,315 8s. 2d. Owing to false entries and erasures made by Pritchard in his journal, while kept under the inspection of Ashdown, I closed Pritchard's account books on the 31st of December, 1857, and gave them to Mr. Lawrence and Mr. Humphery to examine and balance, which they did, and the bill, £680 15s. 3d., is entered by Pritchard to the debit of Ashdown; and I can assure you that no Englishman likes to be defrauded out of his properties for obeying the law, and then cast into a prison.—J.G.

A. Ashdown absconded on the 1st of April, 1870, and a reward of £100 is offered by the Government for his apprehension, on a charge of embezzlement.

Mr. Garsed has written over and over again on the subject of this letter, and has been informed more than once that the Government cannot again go into the matter. His two last letters were purposely left unanswered.—W.W.S., 6 August.

Seen.—J.S.F., 8/8/72.

### No. 73.

#### Mr. Surveyor Smith to The Surveyor General.

Sir,

Sydney, 16 August, 1875.

In compliance with verbal instructions of the Chief Draftsman, I have the honor to transmit herewith the plan showing chainage of part of the south side of Bridge-street, between Bridge-lane and Hamilton-lane, parish of St. James and St. Phillip, in the City of Sydney, showing the position of the buildings erected with regard to the boundaries of the allotments determined by the lengths given on original plan, cat. s. 2, 842.

In portions Nos. 11, 10, 9, 8, and 7 the difference between the lengths given on plan and the boundaries determined by the several party-walls is inappreciable. This is satisfactory, as it identifies the eastern boundary of allotment No. 7. Appendix C.  
Plan and tracing  
herewith.

In allotments 5 and 6 the buildings occupy two feet four inches (2ft. 4in.) more than the length given on plan.

Between the eastern boundary of allotment No. 7 and the outside edge of wall of Mr. Wolfen's building the actual measurement is 4 feet 8 inches in excess of the lengths given on the plan.

This 4 ft. 8 in. of excess is distributed 2 ft. 4 in. in the late Thomas Moore's property, and 2 ft. 4 in. in Mr. Wolfen's.

I now have to draw your attention to the difference in the position of J. T. Hughes's 6 perches, as shown by the plan of original survey (cat. s. 105) and the land now built upon as that allotment.

The red colour on a tracing herewith shows the position of old grant, and the blue the land now built upon.

From as much of the correspondence as I have perused, together with the copies of the original deeds in the Survey and Registrar General's Office, I find there has been no cancellation of the original deeds or authority given for taking the land as built upon in lieu of the land as originally sold.

Thus the land sold, and which could be claimed, comes to within 11½ ft. (left for a lane) of the eastern boundary of allotment No. 1. The 4 ft. 8 in. of land applied for to purchase by Mr. Wolfen to include his improvements would therefore have to be taken from the width of this lane, reducing it to 6ft. 10 in. wide, thus rendering it useless for a thoroughfare.

Although there may at present be no likelihood to claim the land (J. T. Hughes' 00 chains) as sold by deed, I would (thinking it only prudent) beg to recommend for your consideration that the difference between the actual position of the portion and the land occupied be definitely settled before the land applied for by Mr. Wolfen, to include his improvements, be sold to him.

I have, &c.,  
THOMAS H. SMITH,  
Surveyor.

## No. 74.

Mr. J. Garsed to The Secretary for Lands.

Sir, 324, Liverpool-street, Darlinghurst, Sydney, 3 July, 1876.

I respectfully refer to your answer to John Hurley, Esq., M.L.A., 5th question, published in No. 117 Votes and Proceedings of the Legislative Assembly, Friday, 30th June, 1876, relating to Crown land corner of Pitt and Bridge streets, Sydney.

Your answer—"It is probable that some marking did take place, but at present this cannot immediately be more definitely stated."

For your information I respectfully send you an extract from Mr. C. H. Storey's account, delivered to me.

Mr. Garsed, Glebe, to C. H. Storey,—  
1857.

February	7th.	Attending the City Engineer relative to surveying in the Tank Stream.
March	21st.	Attending at Surveyor General's, and at Mr. Burrowes, respecting land in Pitt-street.
"	30th.	Attending Mr. Burrowes's about covering in Tank Stream.
April	6th.	Attending City Surveyor, and taking out license for hoard in Pitt-street.
"	7th.	Attending and waiting for Mr. Burrowes, and upon City Surveyor, for specification of work executed at the Tank Stream.
"	8th.	Attending at Surveyor General's.
"	9th.	"
"	25th.	Attending upon City Building Surveyor to give notice for houses in Pitt-street.
May	16th.	Making tracing of Pitt-street Chambers, for submission to trustees of Church property.
October	31st.	To preparing drawings and specifications for new buildings in Pitt-street, superintending and certifying to the amount of £1,050.

I am under the impression a copy in print of Mr. C. H. Storey's account is among my papers deposited in the-Crown Law Office.

In reply to the 4th question "No; it flows through the 6 perches in question."

I must presume that the original bed of the Tank Stream was never sold to John Terry Hughes. I am informed that John Terry Hughes, in the erection of stone walls and pillars on his land having a frontage to Bridge-street, diverted the stream to enable him to build upon the site of the original bed of the Tank Stream, and this he did to benefit himself and not to benefit the public.

I trust, after having expended so large a sum of money (nearly £1,500) in improvements that you will sell me the land described and set forth in a writ of intrusion, filed by the Honorable Attorney General on behalf of Her Majesty the Queen, in the Supreme Court, Sydney, on the 23rd of December, 1862.

An early reply will greatly oblige.

I have, &c.,  
JOHN GARSED.

## No. 75.

Mr. J. Garsed to The Secretary for Lands.

Sir, 324, Liverpool-street, Darlinghurst, Sydney, 7 July, 1876.

After reading my letter of the 3rd instant you informed me you would lay the papers before the Honorable Attorney General for his opinion.

I respectfully bring under your notice that on the 28th ultimo I received from the Crown Law Office six copies of opinions respecting my unprecedented case. Two opinions are signed J. N. Dickinson—one, Alfred Stephen—three, John F. Hargrave, Attorney General.

That in consequence of these opinions it becomes necessary that I should give you further information relating to my Commercial Chambers, referred to in the following letter:—

Copy from letter I received from Department of Lands.

"Department of Lands, Sydney, 30 June, 1865.

"An allotment of 6 perches, at the corner of Bridge and Pitt streets, was sold to John Terry Hughes in 1839, but that afterwards the alignment was altered, leaving a space of about 15 feet between the east boundary of the allotment and the new alignment of Pitt-street.

"2. The Commercial Chambers are built partly upon the allotment and partly upon the space in question."

You state, in reply to Mr. Hurley's (*Hartley*) (6) question—Has the land described in said writ of intrusion been legally alienated from the Crown? The land does not appear to have been alienated.

The description of land is clearly described in the writ, and I respectfully beg of you to read this writ of intrusion.

In April, 1858, I had printed at the *Empire* office copies of affidavits, agreements, correspondence, Pritchard's journal, &c., &c., and a copy of same is deposited with my papers, *Queen v. Garsed*, in the Crown Law Department.

To arrive at the facts it will be necessary for you to examine carefully those printed papers. For example, in speaking of affidavits—printed copy of Ashdown and Pritchard's joint affidavits, sworn 2nd March, 1858; of Wm. Robt. Smart's affidavit, relating to my Commercial Chambers, sworn 3rd March, 1858; of my equitable plea, filed 26th February, 1858.

Agreements.—Printed copy of agreement, dated 15th July, 1857, signed John Garsed, signed A. Ashdown. Engross, &c., R. J. & G. Want; this agreement prepared in my presence by Mr. R. J. Want, 11th August, 1857. Printed copy of agreement, dated 30th September, 1857, signed A. Ashdown; witness, R. J. Want.

"The above agreement is in full satisfaction and discharge of all previous agreements or understandings relative to the sale or purchase of the above properties between the above parties.—  
A. ASHDOWN. September 30th, 1857."

This

This last agreement is registered, and a copy is annexed to Ashdown and Pritchard's said joint affidavit.

Printed copy of journal—brief history:—This journal was kept by Pritchard, under A. Ashdown's inspection, and upon the premises occupied by Wm. Dean & Co., auctioneers. I received this journal from Ashdown, 22nd December, 1857, on payment to him of £100, my share of Pritchard's salary, and not an entry is made in this journal after the 31st December, 1857. In April, 1858, Mr. Justice Dickinson ruled Wm. Dean & Co. are bound by this journal. On the 21st December, 1858, this journal, and not the evidence, sent me to prison to take my trial on a charge of perjury, instituted against me by A. Ashdown. I was convicted, and sentenced in April, 1859, to twelve months imprisonment on a cross entry made in this journal, and I received this journal from Mr. J. P. Mackenzie on the 8th May, 1875; also a ledger, made up from this journal by Mr. Humphery, now Official Assignee. This journal is marked Dean and another v. Garsed D's Ex., 22/4/58.—R.S.

Folio 120 of this Journal, I found deposited the following pencil memorandum:—

Page 22.—Ashdown takes over Dean ... ..	£1,154 18 0
Bills W. Dean ... ..	6,675 17 3
	<hr/>
A. Want's £1,050.	£7,830 15 3

Page 24.—Ashdown claims to £9,830 15s. 3d.

Pages 25 and 26 show the manner in which Garsed pays or secures to A—£10,330 15s. 3d., which is £500 more than the above £9,830 15s. 3d. as agreed, and shows that the £680 15s. 3d., the bill sued on, is the balance of the account due to A.

The above memorandum clearly solves the mystery that surrounds my case.

This journal proves the balance in my favour on the 30th September, 1857, £19,315 8s. 2d.

This large balance does not include the whole of my assets; in fact, Bexley House, and about 36 acres of land, which cost £1,500, was conveyed to me on the 10th of June, 1858, and I sequestered my estate, 3rd July, 1858.

This ledger, endorsed R.S. (meaning an exhibit) at the time I was tried on a charge of mutilation of a deed, before Mr. Justice Dickinson, in August and September, 1859, at the end of five days the jury in one-half minute returned a verdict of "not guilty," and I beg of you to read Mr. Wm. Robert Smart's evidence, given before Mr. Justice Dickinson, published in the *S. M. Herald*, September, 1859.

(Copy from ledger.)

"This ledger has been made up by me from the journal of Mr. Pritchard's keeping, and I certify that the whole of the accounts contained therein are correctly and accurately posted from such journal. April 20th, 1858. F. HUMPHREY."

"I have examined the whole with Mr. Humphrey, and vouch for the correctness.

"GEO. L. WILSON, April 20th, 1858."

(Copy from printed correspondence.)

"Mr. Irving agreed to extend the period of the mortgage for two years on the Blackwattle Swamp from the expiration of the same.

"August 5th, 1856.

R. J. WANT."

Expiration of the same 14th October, 1857, but payable 14th October, 1859. To understand the above memorandum, I agreed to re-purchase from Mr. R. J. Want one-third undivided share in forty-five houses and land at Blackwattle Swamp, Glebe, subject to Mr. Irving's mortgage of £4,000, provided that the period for payment was extended to 14th October, 1859. Mr. Irving agreed to this.

"Commercial Chambers, 16 December, 1857.

"Messrs. R. J. and G. Want. Gentlemen,—Mr. Fell requested on your behalf the loan of the deed, dated 5th June, 1856." R. J. Want to myself. Conveyance and indemnity.

I received this deed, together with several other deeds, from Mr. J. P. Mackenzie, 7th May, 1875, and all the deeds I received were in evidence on my trial—"mutilation of a deed" already referred to.

I will write you further extracts from printed papers, and refer to deeds now in my possession, and explain why Mr. C. Irving, or his agent, received the rents of my Commercial Chambers, and my third share of rents of forty-five houses from on or about 1st of June, 1858, and I believe he received of my rents in trust sufficient to pay said £4,000.

I have annexed to this letter one of my advertisements, which will afford you further information.

I have, &c.,

JOHN Garsed.

## No. 76.

### Mr. J. Garsed to The Secretary for Lands.

Sir,

324, Liverpool-street, Darlinghurst, Sydney, 19 July, 1876.

I respectfully annex to this letter "Copy of your answers to Mr. Hurley's (*Hartley*) questions relating to said Crown lands." Herewith.

The following is in the handwriting of my solicitor, the late Mr. P. A. Thompson—his instructions to Mr. W. R. Smart, conveyancer, to prepare three deeds, each dated 4th Feby., 1858, viz., John Garsed to Thos. Sanders Hutchinson, conveyance of properties at Bexley, Chippendale, Camperdown, Blackwattle Swamp, and new Pitt-street, Sydney, meaning said Crown land; Thos. Sanders Hutchinson to John Garsed—covenant; Thos. Saunders Hutchinson to John Garsed—articles of agreement.

This Mr. Smart is the same Mr. Smart that you refer to in answer to first question; and a printed copy of Mr. Smart's affidavit, sworn 3rd March, 1858, respecting the erection of buildings upon said Crown land, is deposited with my papers, "Queen v. John Garsed," in the Crown Law Office.

(Copy.)

Fort-street:—Subject to mortgage of £1,200.

Willow Lodge and Oak Lodge:—Subject to mortgage of £3,500—£4,700.

In satisfaction—to be conveyed to Mrs. Garsed's trustee—equity of redemption of Bexley, subject to mortgage to Terry of £2,000.

Blackwattle and Chambers:—Subject to mortgage to C. Irving of £4,000.

Chippendale Cottages:—Subject to mortgage to Provident Trust Company of £700, and Camperdown and Bligh-terrace properties free from encumbrance.

Conveyance

The Attorney General, Mr. Bailey, on behalf of the Queen, states the reverse. The law in a case like this provides no remedy.

Of the names mentioned in this letter Messrs. R. J. & G. Want, Mr. Irving, Mr. Smart, and Mr. Dean, are dead. I am informed Mr. Pritchard is dead; he left the Colony, 13th Decr., 1858. A. Ashdown, I am informed, is in San Francisco. W. Dean & Co.'s books, in evidence, Outr., 1859, are, I am informed, in possession of Mr. Bellley, merchant, one of the executors in the estate of Mr. Dean, deceased. See Appendix to No. 68.

Regd. 8th Feby., 1858, No. 455, book 53.

Regd. 29th July, 1875, No. 96, Book 152. Regd. 29th July, 1875, No. 97, Book 152.

Reduced by payment, May, 1858, to £1,350.

Meaning Commercial Chambers. 5 question.

Conveyance showing no trust; not to be registered.

Trust deeds to realize and apply the proceeds in discharging the £4,700. To understand the meaning of Blackwattle and Chambers subject to C. Irving's £4,000, I will again briefly refer to printed papers deposited in Crown Law Office with the papers in my case.

Copy, in the handwriting of the late Mr. R. J. Want, Mr. Irving agreed to extend the period of the mortgage for two years on the Blackwattle Swamp from the expiration of the same, 5th August, 1856.

I agreed with Mr. R. J. Want to re-purchase one-third undivided share in forty-five houses, and land at Blackwattle Swamp, Glebe, subject to Mr. Irving's mortgage of £4,000, provided that the period for payment of this £4,000 was extended to 14th October, 1859, and Mr. Irving agreed to this.

Owing to my quarrel with Mr. A. Ashdown, in August, 1857, I made a proposal to Mr. Irving, which he accepted, to this effect: that I would give him a mortgage upon my Commercial Chambers for £1,500, provided he acted with me in having the forty-five houses and land Blackwattle divided into three equal parts, that each might have his own share; and Messrs. Reuss & Brown, surveyors, Pitt-street, Sydney, received instructions to divide this property, which was done; and Mr. Irving and myself instructed Mr. R. J. Want to prepare the deeds, but Mr. Want left the Colony before the deeds were executed.

Copy from printed papers in Crown Law Office:—

"R. J. Want, Esq.,

"Commercial Chambers, Pitt-street, 20 October, 1857.

"Dear Sir,

"I wish to call your attention to C. Irving, Esq., mortgages; the first expired on the 14th, and it will be necessary for you, before leaving Sydney, to see that the two years are added—if not already done; when you persuaded me to purchase back one-third, it was only on condition that C. Irving was agreeable to extend the time two years longer; and I hold your memorandum to that effect in which you state he had agreed.

JOHN GARSED."

Mr. R. J. Want did not return to the Colony until towards the end of 1858.

On or about the 1st of June, 1858, I carried out my part of the agreement, by executing the mortgage for £1,500, and handed to Mr. Irving the lease of my Commercial Chambers; and it was arranged between us that Mr. Irving should receive the rents of my chambers, and my third share of rents of said forty-five houses in trust towards payment of this sum of £4,000; and Mr. Irving, or his agent, received the rents from on or about the 1st of June, 1858, to the date I was wrongfully sent to prison to take my trial on a charge of perjury, instituted by A. Ashdown; and I was not released from prison until the 19th May, 1862, and then I learnt from Mr. Smart that Mr. Irving, previous to leaving the Colony, handed to him (Mr. Smart) the lease of my Commercial Chambers, stating that he (Mr. Irving) had no claim upon the buildings, and that he (Mr. Smart) would account to me for rents he had received. On the 23rd December, 1862, Mr. Smart was insolvent, and his official assignee (Mr. Robert Sempill).

I believe that Mr. C. Irving, or his agent, received my rents up to the date of Mr. Irving's insolvency, sufficient to pay the said £4,000; the interest on this £4,000 decreased week after week, from on or about the 1st of June, 1858, owing to sums received for rents of my Commercial Chambers at the time I was sent to prison, were (I believe), over £500 per annum.

I leased this Crown land from the trustees in Jobbins's estate, with the intention to purchase the land, but provided I did not purchase the land I had power to sell or remove the buildings; the lease expired at the time I was suffering wrongfully in Darlinghurst Gaol.

It is clearly evident from description of said land, described in writ of intrusion, filed 23rd December, 1862, that the trustees in Jobbins's estate had leased to me land not vested in them.

Mr. Irving, on or about the 1st of June, 1858, lent me the sum of £160, but the deeds registered will prove I never received this £1,500 from Mr. Irving. The conveyance, registered 8th February, 1858, reads:—"As to the premises, Blackwattle Swamp, a certain indenture of mortgage, which is already prepared and agreed to be given to Clark Irving, to secure £2,500 and interest; and as to the premises known as the Commercial Chambers, a certain other indenture of mortgage, which is already prepared, and agreed to be given to Clark Irving for securing £1,500 and interest.

I cannot say whether the said mortgage for £2,500 was executed, but I think not, owing to the property not being divided, as it was my intention to sell a portion of my third share of the property to pay Mr. Irving this £2,500.

At the date I purchased Mr. Irving's one-third share of this property for £4,000, only 21 houses were erected, and Mr. Want, Mr. Barber, and myself, erected 24 houses, making in all 45 houses.

I trust that you will sell to me the land described and set forth in said writ of intrusion at the upset price, without competition, on the ground, I expended about £1,500 in improvements.

I have, &c.,

JOHN GARSED.

See No. 74.

P.S.—At the time I delivered to you my letter of the 3rd instant you informed me that you would lay my letter and papers before the Honorable Attorney General for his opinion; will you please lay before the Honorable Attorney General my further communication of the 7th instant, and this letter to explain the mystery that surrounds this land, mentioned in said writ of intrusion.—J.G.

See No. 75.

[Enclosure to No. 76.]

(7.) Land at corner of Bridge and Pitt streets:—Mr. Hurley (*Hartley*) asked the Secretary for Lands pursuant to Notice,—(1.) Did the Hon. Attorney General, John Fletcher Hargrave, Esq., file in the Supreme Court House, Sydney, on the 23rd December, 1862, an information on behalf of the Queen against Isaac Wellbank, William Robert Smart, George Lea Wilson, and others for intrusion upon Crown land, corner of Bridge and Pitt streets, Sydney?

(2.) Did John Garsed address a letter, dated 15th July, 1865, to the Honorable Minister for Lands, requesting that the said Crown land, corner of Bridge and Pitt streets, may be alienated to the trustees of his wife, on payment of the upset price of the land, on the ground of improvement?

(3.) Did the Honorable Minister for Lands, by letter dated Department of Lands, Sydney, 13th June, 1865, in referring to John Garsed's application of the 15th ultimo, state that an allotment of 6 perches of land at the corner of Bridge and Pitt streets was sold to John Terry Hughes in 1839?

(4.) Did the Tank Stream in 1839 flow between the said 6 perches of land sold to John Terry Hughes and Pitt-street?

(5.) Did Mr. Burrows, from the Surveyor General's Department, some time in March, 1857, mark out the site, corner of Bridge and Pitt streets, upon which John Garsed, at a cost of about £1,500, built the Commercial Chambers?

(6.) Has the land described in said writ of intrusion been legally alienated from the Crown?

Mr. Garrett answered,—

(1.) On the 23rd December, 1862, a writ of intrusion was filed, signed by John Fletcher Hargrave, Esq., Attorney General, against James Reading, Isaac Wellbank, William Robert Smart, George Lea Wilson, Henry Hamburger, Harold

Harold Brees, Thomas Ellen, Henry Manton, and Daniel Bell, allotment of land in Pitt and Bridge streets, Sydney; Holden and M'Carthy, solicitors. Defendant Smart appeared, 31st December, 1862, and pleaded 31st January, 1863. Writ of *Amoveas Manus* issued 23rd February, 1863.  
 (2 & 3.) That a letter was received under date 13th May, 1865, and replied to on the 30th June, 1865.  
 (4.) No; it flows through the 6 perches in question.  
 (5.) It is probable that some marking did take place, but at present this cannot immediately be more definitely stated.  
 (6.) The land does not appear to have been alienated.

## No. 77.

J. Hurley, Esq., M.P., to The Secretary for Lands.

Sir,

Sydney, 24 July, 1876.

I should esteem it a favor if you will instruct your Department to give a reply to Mr. John Garsed's letters in reference to land, viz., Tank Stream, it being of serious importance to him.  
 Your attention will oblige.

I have, &c.,  
 JOHN HURLEY.

Have an acknowledgment sent at once to Garsed.—T.G., 25/7/76.

See No. 78.

## No. 78.

The Under Secretary for Lands to Mr. J. Garsed.

Sir,

Department of Lands, 7 August, 1876.

I am directed by the Minister for Lands to acknowledge the receipt of your letter of the 19th ultimo, on the subject of your claim to land situated in the City of Sydney, at the corner of Bridge and Pitt streets, and I am to inform you that the matter is now under consideration in this Department. See No. 76.

I have, &c.,  
 W. W. STEPHEN.

## No. 79.

Mr. J. Garsed to The Under Secretary for Lands.

Sir,

324, Liverpool-street, Darlinghurst, Sydney, 11 August, 1876.

I beg to acknowledge the receipt of your letter of the 7th inst., relating to my claim to land at the corner of Bridge and Pitt streets. You inform me the matter is now under consideration in this Department. See No. 73.

I respectfully call the honorable Minister for Lands attention to my letter, dated Sydney, May 15th, 1865, in reply to letter 435, dated Department of Lands, Sydney, 10th May, 1865, in which I state, "The facts which relate to the land, corner of Bridge and Pitt streets, so far as I am concerned, are simple, &c., &c." See No. 41.  
See No. 40.

On Tuesday, the 8th inst., John Hurley, Esq., M.L.A., moved "That an Address be presented to the Governor, praying that His Excellency will be pleased to cause to be laid upon the Table of this House, copies of the proceedings filed in the Supreme Court, 4th Term, A.D. 1862, in the matter of the Attorney General, Reading and others, &c., &c."

The motion was put and agreed to, and I trust the honorable the Colonial Secretary will lay upon the Table of the House on Tuesday next, the 15th inst., the papers asked for.

The honorable Attorney General (now Mr. Justice Hargrave) filed on behalf of the Queen, in the Supreme Court House, Sydney, on the 23rd December, 1862, a writ of intrusion, and writ of *amoveas manus*, issued 23rd February, 1863.

Defendant Smart, at the time insolvent; his official assignee, Mr. Robert Sempill.

Mr. Burrowes, from the Surveyor General's Department, marked out the site upon which I erected my Commercial Chambers, at a cost of about £1,500.

The Attorney General, on behalf of the Queen, claims the whole of the land marked out by Mr. Burrowes, with the exception of a small angle piece corner of Hamilton-lane and Bridge-street. At the date I erected the said Commercial Chambers it was an open stream, and to the best of my recollection this angle piece abuts on corner of Bridge, next to Pitt street, and that I had to build a stone wall level with the surface at this angle piece, and am under the impression the Government paid for the erection of this wall, and it is not probable this small angle piece of land had been legally alienated from the Crown.

I have, &c.,  
 JOHN GARSED.

## No. 80.

J. Hurley, Esq., M.P., to The Under Secretary for Lands.

Dear Sir,

Botany-street, 3 October.

I desire to appoint Friday next for interview *re* Garsed's case. The only papers, I, for my part, desire to see, are the proceedings filed in the Supreme Court, *re* Attorney General—Reading and others; also the lease granted by John Williams, Esq., now Crown Solicitor, and others, to John Garsed, in 1867; also Mr. Garsed's letter of 15th May, 1865, and Mr. Robertson's reply thereto, 30th June, 1865. See No. 41.  
See No. 43.

I should be glad if you will see that those papers are produced, for I am persuaded Mr. Garsed has been put off from time to time on account of pressure of business in the Department, and if it is possible, the question shall be settled *pro* or *con*. during the next Session of the House; therefore it is necessary the papers should be printed, &c., &c.

I have, &c.,  
 JOHN HURLEY.

No. 81.

## No. 81.

## Mr. J. Garsed to The Under Secretary for Lands.

Sir,

324, Liverpool-street, Darlinghurst, 4 October, 1876.

On the 7th of August, Mr. John Hurley, M.L.A., moved, "That an Address be presented to the Governor, praying that His Excellency will be pleased to cause to be laid upon the Table of this House, copies of the proceedings filed in the Supreme Court, Fourth Term, A.D. 1862, in the matter of the Attorney General v. Reading and others; also letter from John Garsed, of 15th May, 1865, and letter from Mr. Secretary Robertson, in reply thereto, dated June 30th, 1865, in reference to the above proceedings."

See No. 41.  
See No. 40.

The Honorable John Robertson, Colonial Secretary, said he had no objection to the production of the papers asked for. The motion was put and agreed to.

You will please observe by the above, that I confine myself to papers in your Department, for Mr. Hurley at the same time moved to be laid upon the Table, Mrs. Emma Garsed's petition of 1862, together with Mr. Dick's letter, dated 14th April, 1862, and the Attorney General's opinion of remission of Garsed's sentence of 10th January, 1862.

" (Copy—Opinion.)

" John Garsed, praying remission of sentence.

"I THINK this is a proper case for remission of the remainder of the sentence upon the prisoner. There is a considerable difficulty in forming a clear opinion as to the many points bearing upon the subject; but their combined effect on my own mind has been to recommend that this is a proper case for merciful consideration, and not for exacting the full punishment to which the strict law would subject the offender.

" JOHN F. HARGRAVE,  
" Attorney General."

I had to thank the Honorable the Attorney General for my release from confinement.

Yesterday I brought under your notice, in the presence of Mr. Hurley, your letter of the 7th of August, in which you acknowledge the receipt of letter of the 19th ultimo, on the subject of my claim to land, corner of Bridge and Pitt streets, and inform me the matter is now under consideration in this Department.

See No. 78.  
See No. 70.

Will you please to have in your office on Friday next, the 6th instant, those papers that Mr. Hurley moved for on the 7th of August; also my letter of the 19th July.

The facts of my case are simple: In 1857 I leased from the trustees in Jobbins' estate, a piece of land between the open Tank Stream and Pitt-street, with power to remove any building that I might erect thereon; and Mr. Burrowes, from the Survey Department, marked out the boundary of land leased; and at a cost of about £1,500 I erected my Commercial Chambers.

On the 21st December, 1858, I was sent to Darlinghurst Gaol to take my trial on a charge of perjury, instituted against me by A. Ashdown, late Railway Accountant, and the Attorney General filed an information for perjury against me in the Supreme Court, contrary to common law, and I remained in prison until Monday, 19th May, 1862; but during the time I was suffering wrongfully in prison the term of said lease expired, and in December, 1862, the Honorable Attorney General, on behalf of the Crown, filed in the Supreme Court a writ of intrusion, and by description in this writ, which must be the best evidence that can be given, claimed the whole of the land marked out by Mr. Burrowes, with the exception of a small angle-piece near the bridge—the Tank Stream. It is hard that I, owing to the erroneous opinion of Her Majesty's Attorney General, Mr. Bailey, should for years suffer wrongfully in a prison, and shortly after my release to suffer the loss of my Commercial Chambers, owing to my confinement in a prison.

I have received from your Department a large number of letters relating to this piece of Crown land, and the only letter that gives me any information on the matter is Mr. Secretary Robertson's letter of the 30th of June, 1865, and this voluminous correspondence naturally creates confusion, for example, the Acting Chief Justice, in his letter to the Honorable Colonial Secretary, under date March 31st, 1860, states, "I beg leave to observe that I have not (for want of time) studied the papers sent to me in this (Garsed's) case. If I had a few weeks leisure to examine witnesses, account books, letters, and other documents, I might possibly be able to advise His Excellency whether or not a pardon should be granted to Garsed."

See No. 43.

So simple is this case that I can prove from the evidence in the Civil case I was wrongfully convicted on this charge of perjury, tried in the Supreme Court, criminal jurisdiction, in October, 1859.

I have, &amp;c.,

JOHN Garsed.

In my case the best evidence are the proceedings filed in the Supreme Court. For example, the proceedings filed in the Supreme Court, Dean and Ashdown v. Garsed clearly, prove the Attorney General, Mr. Bailey, filed an information against me for perjury contrary to common law, and the law provides no remedy in my case.

## No. 82.

## Mr. J. Garsed to The Under Secretary for Lands.

Subject:—Crown land at the Corner of Bridge and Pitt streets, Sydney.

324, Liverpool-street, Darlinghurst, Sydney, 13 October, 1876.

To the Honorable Thomas Garrett, Esq., M.L.A., Minister for Lands,—

Sir,

I have the honor to inform you—after having carefully examined the papers—also three (3) plans deposited in your Department, relating to the above subject, that I am now of opinion that the trustees in the estate of Jobbins had no legal title to Crown land sold to John Terry Hughes on the 15th August, 1839.

It appears from the papers that John Terry Hughes, on the 15th August, 1839, purchased an allotment of Crown land (6 perches) having a frontage to Bridge-street of 38½ links; to Pitt-street, 139 links; on the south boundary 25 links; on the west by a reserved lane 11½ feet wide, dividing it from allotment No. 1 of the old lumber yard. He purchased upon the express condition that he should construct an archway over the Tank Stream, and on further condition that he should erect a first-class building on the land, within two years of the day of sale. Note.—He could not carry out this last condition until after he had carried out the first condition (see plan of allotment), and having failed to carry out either condition the land reverts to the Crown, unless those claiming a title under J. T. Hughes had carried out the express conditions of sale.

See Appendix 1.  
Sale note.

I presume, after reading the papers, that the Crown did not issue to John Terry Hughes a grant of this 6 perches of Crown land, purchased 15th August, 1839. Appendix 1 is merely a sale of the land to J. T. Hughes upon certain conditions, and it is not likely a grant would be issued to the purchaser until after the fulfilment of those conditions. The papers afford me no information on what ground the Honorable the Colonial Secretary on the 20th November, 1848, rescinded the building conditions; therefore, I presume, that Mr. Hughes was not at that date in a position to carry out both conditions, but that he intended to carry out the first express condition provided the building condition was rescinded; but ultimately the first condition was carried out at the expense of the country.

I address a letter, dated 28th March, 1857, to the Honorable Surveyor General (copy of this letter Appendix 2).

See No. 13.  
Appendix 2.  
Copy letter 28th  
March, 1857.

The correspondence in the year 1857, and subsequent to date of my letter, between the officers of the Survey Department and Lands and Public Works Department, confirms my statement in previous letter to you, viz., that Mr. Surveyor Burrowes marked out the boundary of land upon which, at an expense of about £1,500, I erected my Commercial Chambers. But previous to this marking out Mr. Burrowes had made some arrangement with the trustees in Jobbins's estate about an exchange of land, which arrangement the Government could not carry out; therefore it was the duty of Mr. Burrowes to see that I did not commence building my Commercial Chambers.

The trustees in Jobbins's estate granted to me a lease of said Crown land marked out by Mr. Surveyor Burrowes; this lease gives me power to remove buildings erected, at the end of the lease. But no doubt the trustees at the time of granting this lease were of opinion that the suggestion in 2nd paragraph of Messrs. Nichols and Williams' letter of March 31st, 1857, would be carried out (letter Appendix 3).

See No. 14.  
Appendix 3,  
copy of Nichols  
and Williams'  
letter, March  
31st, 1857, to  
M. E. L. Bur-  
rowes, Esq.  
See No. 15.

"Assistant Surveyor Burrowes to the Surveyor General, reporting on Mr. Jobbins's allotment, corner of Bridge and Pitt streets, Sydney, under date 6th April (extract from this report):—

"Sir,

"With reference to your letter dated 14th October, 1856, and its enclosures, and No. 57,375, dated 31st March last, relative to Mr. Jobbins's (formerly John Terry Hughes's) allotment of 6 perches, at the corner of Bridge and Pitt streets, I have the honor to forward you a letter, addressed to me by Messrs. Nichols and Williams. (See Appendix 3.)

2. I have had frequent interviews with Mr. Williams, one of the trustees, on the subject, and it has been arranged (subject to your sanction) that they should occupy the ground as described in the deed [what deed?] commencing from the present corner of Bridge and Pitt streets, so that the lane will be the width of 24 feet 3 inches, until the necessary Act for the exchange be obtained. I have re-marked out the allotment in accordance therewith on the ground.

Width of lane 11  
feet 4 inches  
wide, but now  
reduced, owing  
to Mr. Wolfen's  
new building to  
6 feet 10 inches  
wide. See plan  
of Mr. Surveyor  
Smith's, with  
papers.

3. Mr. Garsed, who has leased the land from the trustees, is anxious to commence building, but cannot do so until the Tank Stream is covered over."

I respectfully say that it is beneath the dignity of the Crown that I should suffer any loss owing to the erroneous opinion of Mr. Surveyor Burrowes in this matter.

The following is the Honorable Solicitor General's opinion respecting this exchange of land in Pitt-street:—

"COPY, OPINION.

"An Act of Council is clearly requisite, for the trustees could not act without; and as at present advised, the Crown lands could not be exchanged in the way proposed. The Bill should be prepared by the Parliamentary Draftsmen.—EDWARD WISE, S.G., Sept. 4/57."

I must presume that the grant, also conditions of sale, were not, on the 4th September, 1857, before the Solicitor General, that is, presuming J. T. Hughes had a grant.

No. 6666.—Assistant Surveyor Burrowes in his letter, under date 2nd July, 1857, to the Surveyor General, reporting relative to arrangements made with Jobbins's trustees for the exchange of land in Bridge-street, states:—"Sir,—With reference to your letter dated 30th ultimo, requesting to know by what authority I had made an agreement with the trustees of the late Mr. Jobbins for an exchange of land in Bridge-street, I have the honor to state that no agreement has been made by me.

"Arrangements were made by me, in accordance with your instructions dated 14th October, 1856."

Extract from the Honorable Attorney General and Solicitor General's opinions, on the 2nd October, 1856:—

"We are of opinion that the Crown has no power to change the position of the allotment sold, unless the consent of the purchaser or his representatives be first obtained. The land was described by boundaries in existence at the time of the grant [what grant?] and the subsequent change in the position of a street which forms its eastern boundary does not alter the position of the soil which passed by the grant.

I must presume that the grant, also express condition of sale note (appendix) that John Terry Hughes should construct an archway over the Tank Stream, were not brought under the notice of the Crown Law Officers on the 2nd October, 1856, on the ground at that date, and the Tank Stream was not covered in or Crown land sold to John Terry Hughes on the 15th August, 1859.

It appears to me that in 1857 Mr. Surveyor Burrowes was anxious to widen the lane from 11 feet 6 inches to 25 feet, and the trustees wish that the Government be at the expense of covering in the Tank Stream, and I to carry out second condition as regards building, and for them to have a grant by Act of Council of this piece of land marked out by Mr. Surveyor Burrowes.

See 15th June, 1857—the Surveyor General to the Under Secretary for Lands and Public Works, respecting the stoppage of the erection of certain buildings at the corner of Bridge and Pitt streets undertaken by Jobbins's trustees.

I respectfully call your attention to the handwriting "undertaken by J. Jobbins's trustees;" it appears to me a different handwriting.

I will put a case: I conditionally purchase Crown lands under the provisions of the "Crown Lands Alienation Act of 1861," but make no attempt to improve the land. Is it likely that I should receive a grant from the Crown?

Surveyor General's Office, 18 October, 1862. This is an application by Mr. William Robert Smart.

See No. 28.

Conveyance in a letter under date 18th September, 1862. That he may be permitted, on ground of improvement, to purchase the said Crown land corner of Bridge and Pitt streets, Sydney.

See No. 27.

Messrs. Holden & Smith for trustees of will of late John Jobbins. To the Honorable the Secretary for Lands. Letter dated 6th August, 1862.

Extract from letter.

"Sir,

"We beg to apply, on behalf of the trustees of the will of the late Mr. John Jobbins, for the sanction of the Government, to our client's being permitted to avail themselves of the name of the Crown in proceedings about to be instituted by them, for the purpose of recovering possession of a piece of land at the corner of Bridge-street and Pitt-street, of which they have been wrongfully dispossessed, under the circumstances which we proceed to detail.

"5th paragraph:—The land so fenced in was leased by Mr. John Jobbins's trustees to Mr. John Garsed, who erected the buildings now standing upon it, known as the "Commercial Chambers." That lease expired about two years ago. A Mr. Smart came into possession as it appears under Garsed.

"6th. No rent whatever has been paid to the trustees either by Mr. Garsed or Mr. Smart.

"7th. Under these circumstances we venture to hope that the Government will see no objection to assist our clients in ejecting the parties in possession of the property, who have no title, either under the Crown or Mr. John Jobbins, and are now trespassers."

I wonder if A. Ashdown, late Railway Accountant, obtained the sanction of the Government to prosecute me for perjury. After the Attorney General, Mr. Bailey, refused to prosecute in August, 1859, and after I had pleaded before the late Mr. Justice Milford, on or about the evening of the 4th August, 1859; and after this tried on another charge in August, 1859, "Mutilation of a deaf." See No. 20.

See No. 27.

Same to same, 30th October, 1862. Extract.

"Referring to our letter of the 6th of August last, and referring also to the reply thereto of the 24th ultimo, suggesting an application under the 11th clause of the "Crown Lands Alienation Act of 1861," we beg to say that such an application will not meet the whole exigencies of the case, inasmuch as our clients seek not only to recover the land but also the mesne profits accruing during the wrongful occupation of the parties in possession, to which a new grant will afford no title."

Minute. Mr. Williams being personally interested in the matter, perhaps the Attorney General may be asked whether he sees any objection to a compliance with this request. I was released from confinement, 19th May, 1862, and had to thank the Honorable Attorney General for my release; he was of my opinion, if I had been guilty of perjury it would not have taken seven days to prove it.

(Copy.)

"It appears to me that there is no legal objection, under the circumstances mentioned in these papers, to the request of Messrs. Holden & M'Carthy being complied with; but whether such request should be complied with is for the Minister for Lands, or possibly for the Executive Council.

"JOHN F. HARGRAVE,  
"Attorney General."

Query:—Where the papers I now refer to, together with Appendices 1, 2, 3, also grant from the Crown, and lease granted to me by Jobbins's trustees, before the Attorney General (62/6,048.)

I am under the impression the papers I refer to were not before the Attorney General, on the following ground (R. W. Robberds for T'os. Gale), respecting land derived by him through the late Mr. Jobbins.

See No. 60.

Copy of Mr. Robberd's letter, dated 27th November, 1865. (*Appendix 4.*)

See No. 61. (*Appendix 4.*) Mr. Robberds' letter, 27th November, 1865. (*Appendices 5 and 6.*)

Crown Solicitor's letter of the 8th December, 1865, to the under Secretary for Lands. (*Copy—Appendix 5.*)

Same to same—letter dated February, 8th, 1866. (*Copy—Appendix 6.*)

See No. 62.

You will observe, the Crown Solicitor in his letter, under date 8th December, 1865, says,—“I should mention that I was, until recently, the trustee of the late Mr. Jobbins's estate, and that I am aware that Mr. Garsed claims to have some interest in the land referred to in the present application.”

Copy of Crown Solicitor's letter of December 8th, 1865, and February 8th, 1866.

You will observe, the Crown Solicitor, in his letter under date February 8th, 1866, says,—“That before I can take the necessary steps to carry out the contract, so far as the Government is concerned, that I suppose to prepare a formal surrender from Mr. Gale of the land which the Government has resumed, it is necessary that it should be shown that Mr. Gale is in a position to execute such a surrender, and this should be done before the papers are submitted to the Crown Law Officers for their advice as to the mode in which the land to be given by the Crown shall be granted.

See plan.

Strange, in 1856 and '7, the Surveyor General appears anxious to widen this reserved lane from 11 feet 6 inches to 25 feet, and in 1876 buildings are erected on 4 feet 8 inches, thus reducing the width to 6 feet 10 inches.

See No. 16.

Extract from the Honorable Secretary for Lands and Public Works (minutes 57/1,402, April 25/57), on letters from Surveyor General to the Under Secretary, dated 24th April, 1857:—

“I do not see much is to be gained by the public in this matter, because all the width of the lane will be increased; its uniformity will not.

“The

"The only way in which the lane could be improved would be by widening it on its present western side so as to align with Hamilton-lane.

"It strikes me that the arrangement proposed is exceedingly imperfect to justify us asking an Act of Parliament. Scarcely any advantage will be derived from the proposed widening of the lane by any one except the legal representative claiming of J. T. Hughes.

"It is desirable that the present occupants should not proceed with improvements on the faith of a proposal which may not be sanctioned."

In this communication I but briefly refer to a few of the many letters written on this subject in the year 1857; but I am anxious in writing this letter to prove to you, the proper Minister of the Crown in this matter,—

1. That in my humble opinion the trustees in Jobbins's estate never had a legal title to this piece of Crown land sold to John Terry Hughes under express conditions on the 15th of August, 1839.

2. Had I been aware of this official correspondence in 1857, owing to my letter of March 28th, 1857 (Appendix 2), I most certainly should not have expended one shilling on this piece of Crown land; but after having expended £1,500, or thereabouts, I therefore trust that under circumstances disclosed in paper writings and plans deposited in your Department in this matter, that I may be permitted to purchase without competition, under the provisions of the "Crown Lands Alienation Act of 1861," this piece of Crown land, corner of Bridge and Pitt streets, marked out by Mr. Surveyor Burrowes previously to 28th March, 1857, the date of my letter to the Honorable Surveyor General—a copy of which is sent with this letter.

I have, &c.,  
JOHN GARSED.

To improve this lane it no doubt would have been the best plan in 1866 to have increased the width from 11½ feet to 25 feet by purchase of land on the western side.

P.S.—Having noticed, written in blue pencil (Records, 21 August, 1876), under July 7th, 1876, date of my letter addressed to you, I therefore shall feel obliged if you will acknowledge receipt of this letter, also my letter of 7th July, 1876.

In the Supreme Court.

In the matter of the Attorney General v. Willbank.

W. R. Smart and others—relating to said Crown lands, yesterday, 12th instant.

The papers filed in the above matter, not in the Prothonotary's Office; if not in your Department, most likely in the Honorable Attorney General's Office.

J.G.

NOTE.—On the 20th November, 1848, the building condition is rescinded, but not the express condition that John Terry Hughes should construct an archway over the Tank Stream; therefore, if previously to November 20th, 1848, the purchaser had a grant from the Crown without conditions, then why write this letter?—and if John Terry Hughes had previous to 20th November, 1848, received a grant, then in that case I must presume the grant will read subject to conditions. This may explain the following words in Crown Solicitor's letter under date February 8th, 1866:—"It is necessary that it should be shown that Mr. Gale is in a position to execute such a surrender, and this should be done before the papers are submitted to the Crown Law Offices."

No doubt the Crown Solicitor meant Crown Law Officers only report, or papers before them.

APPENDIX 1.

(Copy.)

County of Cumberland, parishes of St. James and St. Phillip, City of Sydney.

Allotment 11 of section 46.

6 perches, bounded on the north by Bridge-street, being a line bearing east 16 degrees north 38½ links; on the east by the continuation of Pitt-street, being a line bearing south 4 degrees 30 minutes east 139 links; on the south by a line bearing west 16 degrees south 25 links; and on the west by a reserved lane, dividing it from allotment No. 1 of the old lumber-yard, purchased by John Terry Hughes, being the allotment sold as lot 48, in pursuance of the advertisement of 15th July, 1839, but upon the express condition nevertheless that the said John Terry Hughes should construct an archway over the Tank Stream, according to a plan deposited in the office of the Town Surveyor, and on the further condition that he should erect a first-class building on the said land within two years from the 15th day of August, 1839, the day of sale thereof.

Purchase money ..... £413 sterling.

The building conditions attached to this allotment have been rescinded; vide Colonial Secretary's letter herewith dated 20th November, 1848.

Sale note as above.

	ft.	in.
Frontage to Pitt-street, 139 links—writ of intrusion .....	92	3
South " 25 " " .....	16	8½
West reserved lane " .....	92	0
Frontage to Bridge-street 38½ ,, " .....	20	0

The above description will not agree with plans.

Mr. E. Deas Thomson to The Surveyor General.

Colonial Secretary's Office, Sydney, 20 November, 1848.

Sir, I do myself the honor to inform you that His Excellency the Governor has been pleased to release the allotments of land sold by the Government in Bridge-street from the building condition attached to them.

I have, &c.,  
E. DEAS THOMSON.

APPENDIX 2.

(Copy.)

Mr. J. Garsed to The Surveyor General.

Willow Lodge, Glebe, 28 March, 1857.

Sir, I have the honor to inform you that I have leased the allotment of land, late Jobbins', situate at the corner of Bridge and Pitt streets, and as I am desirous of putting up buildings thereon on piles, without filling up, I am desirous of calling the attention of the proper authorities to the fact, in order that some arrangement might be made respecting it.

Lane 11 ft. 6 in. Reduced 4 ft. 8 in. see plan, 6ft. 10 in. width. Hamilton-lane, nearly 25 ft., next Bridge-st. writ of intrusion: Commencing on the west side of Pitt-st. at the angle formed by the intersection of that street with Bridge-street, frontage to Pitt-street 92 ft. 3 in.; on the south by a line bearing west 17 degrees south 16 ft. 8½ in.; on part of the west by the east side of Hamilton-lane being a line bearing north 43 ft. 9 in., and north 20 degrees west 23 ft. 3 in.; and on the remainder of the west by part of the east boundary of J. T. Hughes's grant, being a line bearing north 25 ft. to Bridge-street; and on the north by that street 20 ft. to the point of commencement.

See No. 13.

See No. 75.

See No. 62.

I presume very shortly the Government will cover over this part of the Tank Stream, and as the buildings I should erect might create an obstacle, or cause much greater expense than it would at present, I beg to suggest the advisability of some arrangement being made respecting the covering in of the Tank Stream previous to my commencing operations in building.

JOHN GARSED.

APPENDIX 3.

(Copy.)

Messrs. Nichols & Williams to Mr. Burrowes.

Sir,

Sydney, 61 Pitt-street, 31 March, 1857.

This letter speaks of a grant.

In reply to your communication of 19th November last, we beg to inform you that we have deferred answering the same on the expectation of the termination of certain proceedings in Equity respecting Mr. Jobbins's property, and now in reply thereto we beg to inform you that the trustees of the will of the late Mr. Jobbins have no power or authority to surrender the present grant, and accept another grant of the land however beneficial as no doubt it will be to the estate.

It appears the only course will be to obtain an Act of Council to enable the Government and trustees to do what is required, in which we can see no possible objection.

NICHOLS & WILLIAMS.

APPENDIX 4.

(Copy.)

Mr. R. Robberds to The Secretary for Lands.

Sir,

159, Castlereagh-street, Sydney, 27 November, 1865.

Twelve years ago, date of Messrs. Nichols and Williams' letter, March 31st, 1857.

Some twelve years ago, a piece of land situate at the corner of Bridge and Pitt streets, Sydney, was given up to the Government by the late Mr. Jobbins, at the instance and for the accommodation of the Government in existence, for a piece of land belonging to the Crown on the other side of Mr. Jobbins's property, but no deeds were executed for giving effect to the arrangement.

Mr. Jobbins's interest in the property has since passed to and is now vested in my client, Mr. Thos. Gale, who has instructed me to take the necessary steps on his part to get the matter completed.

I have the honor to request that you will be pleased to instruct the Crown Solicitor to do what is necessary on behalf of the Government for carrying out the arrangement in question.

R. W. ROBBERDS.

APPENDIX 5.

(Copy.)

The Crown Solicitor to The Under Secretary for Lands.

Sir,

Crown Solicitor's Office, Sydney, 8 December, 1865.

I have the honor to return to you herewith the papers relating to Thos. Gale's application respecting land derived by him through the late John Jobbins, and to request that you will favor me with specific instructions as to what I am to do thereupon.

I should mention that I was until recently the trustee of the late Mr. Jobbins's estate, and that I am aware that Mr. Garsed claims to have some interest in the land referred to in the present application. I therefore, under these circumstances, think it desirable that I should only act under direct instructions; the present reference to me is in general terms.

JOHN WILLIAMS,  
Crown Solicitor.

The question it was thought would be solved by reference to the Crown Solicitor.

1. Who are now the legal representatives of J. T. Hughes's grant, the allotment in Bridge-street?

2. How can they procure a legal title to the portion of land intervening between the allotment so granted and the new line of Pitt-street, which strip of land they are entitled to in exchange for the land taken on the other side, by the widening of the lane?

If the present or former interest of Mr. Williams in this matter renders it embarrassing for him to deal with the case, the papers might, as on a former occasion, go to the Attorney General direct.

APPENDIX 6.

(Copy.)

The Crown Solicitor to The Under Secretary for Lands.

Sir,

Crown Solicitor's Office, 8 February, 1866.

I have the honor to return herewith the papers relating to the land near Pitt-street, taken from the late John Jobbins for the purpose of increasing the width of a lane, and with reference to the application of Mr. Robberds, as solicitor for Mr. Gale, to state that before I can take the necessary steps to carry out the contract so far as the Government is concerned—that is, I suppose to prepare a formal surrender from Mr. Gale of the land which the Government has resumed—it is necessary that it should be shown that Mr. Gale is in a position to execute such a surrender, and this should be done before the papers are submitted to the Crown Law Officers for their advice as to the mode in which the land to be given by the Crown shall be granted.

At the time the arrangement referred to in the papers was made with Mr. Jobbins, it was not to the best of my recollection agreed that a formal surrender should be made by him of the land required by the Government, and the land given in exchange be granted as is now requested; but that as the land of which Mr. Jobbins took possession answers to the description in the deed of grant, both in quantity and boundaries, although in fact it is not the land granted, it should be considered included in that deed.

If the Minister should be of opinion that this arrangement was an agreement that the Crown should perfect Mr. Jobbins's title to the land taken by him in lieu of the land the Government has taken possession of it will be necessary to refer to the Crown Law Officers upon the question as to the way in which this arrangement shall be carried out; before doing this it will be as well, as I before suggested, that Mr. Gale should show that he is in a position to act in the matter.

JOHN WILLIAMS,  
Crown Solicitor.

My case is surrounded in mystery: For example, on the 18th February, 1857, I purchased at Mort & Co.'s auction sale twelve small houses in my own name, but on the joint account of A. Ashdown, late railway accountant, and myself.

Copy from account sent to Messrs. Nichols & Williams.

Messrs. Nichols and Williams Dr. to Mort & Co.

February 18th—To paid advertising property, Chippendale ... .. £10 16 3

2½ per cent. commission on sale, lots 1 to 3, per advertisement, to John Garsed, per £925 ... 23 2 6

£33 18 9

I and Ashdown sold five, which left seven houses which we repaired.

In terms of a certain indenture or deed of trust, dated 18th March, 1857, but not registered—prepared and attested by John P. Roxburgh, solicitor.—(Signed) John Garsed. (Signed) A. Ashdown—"I held in trust for A. Ashdown and his heirs one half undivided share in said seven houses, and the other half undivided share for myself and my heirs. You have among the papers a printed copy of A. Ashdown and C. P. Pritchard's joint affidavit, filed in the Supreme Court, 2nd March 1858.

If you read this joint affidavit you will then learn A. Ashdown, on oath, states the only joint transaction he had with me being the purchase of a place called Rosherville, and the erection of certain buildings thereon.

Appendix 1.  
Writ of intrusion land frontage to Bridge-street, 20 feet.  
Sale note frontage to Bridge-street, 38½ links.

Rosherville, situated on the North Shore, Chippendale, in the City of Sydney.

No. 83.

Mr. J. Garsed to The Secretary for Lands.

Subject: Crown Land, corner of Bridge and Pitt streets.

324, Liverpool-street, Darlinghurst, Sydney, 30 October, 1876.

Sir,

I most respectfully call your attention to my letter "A," of the 13th instant, relating to the above subject. See No. 82.

An early reply to my said letter will greatly oblige.

I have, &c.,  
JOHN GARSED.

No. 84.

Mr. J. Garsed to The Secretary for Lands.

324, Liverpool-street, Darlinghurst, 8 November, 1876.

Sir,

In a few days I shall leave Sydney for Lithgow Valley and not return for a fortnight; therefore you will oblige in answering my letter "A", dated 13th October, 1876, some day this week. See No. 82.

I will briefly again refer to Mr. Thomas H. Smith, surveyor's, plan of allotments, and his report. Mr. Smith states in his report, dated 16th August, 1875,—“ In compliance with verbal instructions of the chief draftsman (I presume Mr. Adams), I have the honor to transmit herewith the plan, showing the change of part of the south side of Bridge-street, between Bridge-lane and Hamilton-lane, the position of buildings erected with regard to boundaries of the allotments determined by the lengths given on against plan, cat. s. 842.

Between the eastern boundary of allotment No. 7 and the outside edge of wall of Mr. Wolfen's building, the actual measurement is 4 ft. 8 in. in excess of the lengths given on the plan.

The 4 ft. 8 in. of land applied for to purchase by Mr. Wolfen, to include his improvements, would have to be taken from width of this lane (meaning Hamilton-lane), reducing it to 6 ft. 10 in. wide, thus rendering it useless for a thoroughfare.

On the assumption the purchaser of allotment 11 of section 46, sold under express conditions, 15th August, 1839, received a grant from the Crown, the legal owner, on claiming the land, would reduce Hamilton-lane to 6 ft. 10 in. in width.

The owner of allotment 11, next Bridge-lane, has the same legal right to increase his frontage to Bridge-street in building on 4ft. 8 in. Bridge-lane, and thus reduce the width of this lane from 10 ft. to 5 ft. 4 in., and it appears that both said lanes were reserved for access to back of allotments shown on plan.

Mr. Wolfen informs me that he had purchased this 4 ft. 8 in. of land from frontage to Bridge-street to depth of allotments.

I before said that it is beneath the dignity of the Crown I should sustain any loss on grounds disclosed in my letter "A."

If Mr. Wolfen actually purchased this 4 ft. 8 in. Crown land, portion of Hamilton-lane, then in that case I suggest you sell to me this piece of Crown land corner of Bridge and Pitt streets, upon which I, at a cost of about £1,500, erected my Commercial Chambers, or convey to me other Crown land, equivalent in value to loss I sustained (that is provided John Terry Hughes or John Jobbins did actually receive a grant of said allotment 11 of section 46, sold 15th of August, 1839, upon the express condition the purchaser should construct an archway over the Tank Stream.)

"The papers do not prove the payment of £413. See Appendix 1, letter A."

I have, &c.,  
JOHN GARSED.

## LAND AT CORNER OF PITT AND BRIDGE STREETS.

---

**PROGRESS REPORT.**

---

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 12th April, 1878,—“with power to send for persons and papers, to inquire into and report upon certain land at corner of Pitt and Bridge streets,”—and to whom was referred, on 17th April, 1878, “the Return to Order in reference to ‘Land at corner of Pitt and Bridge Streets,’”—have agreed to the following Progress Report:—

Your Committee having examined the witnesses named in the List\*, have • Vide List, p. 5. resolved, owing to the advanced period of the Session, to report the evidence to your Honorable House and to recommend that the inquiry be resumed next Session.

JOHN HURLEY,  
Chairman.

No. 3 Committee Room,  
Sydney, 17th May, 1878.

---

PROCEEDINGS OF THE COMMITTEE.

WEDNESDAY, 17 APRIL, 1878.

MEMBERS PRESENT :—

Mr. Hurley (*Hartley*), | Mr. McElhone,  
Mr. Murphy.

Mr. Hurley called to the Chair.

Entry from Votes and Proceedings appointing the Committee, *read* by the Clerk.

Committee deliberated.

Ordered,—That His Honor Mr. Justice Hargrave be requested and C. A. Thurlow, Esq., be summoned to give evidence next meeting.

Re-assembling the Committee to be arranged by the Chairman.

[Adjourned.]

TUESDAY, 30 APRIL, 1878.

MEMBERS PRESENT :—

Mr. Hurley (*Hartley*), in the Chair.  
Mr. Coonan, | Mr. Charles.

Entry from Votes and Proceedings, referring Return to Order in reference to the subject, *read* by the Clerk.

His Honor Mr. Justice Hargrave called in and examined.

Witness withdrew.

Charles Alston Thurlow, Esq. (*Deeds Branch, Lands Department*), called in and examined.

Certain documents *handed* in and ordered to be appended. (*See Appendices A 1 and 2.*)

Witness withdrew.

Committee deliberated.

Ordered,—That E. G. Ward, Esq., and Thomas Lewis, Esq., be summoned to give evidence next meeting.

[Adjourned to Thursday next at *Eleven o'clock.*]

THURSDAY, 2 MAY, 1878.

In the absence of a quorum, the meeting called for this day lapsed.

FRIDAY, 3 MAY, 1878.

MEMBER PRESENT :—

Mr. Hurley (*Hartley*.)

In the absence of a quorum, the meeting called for this day lapsed.

TUESDAY, 7 MAY, 1878.

MEMBERS PRESENT :—

Mr. Hurley (*Hartley*), | Mr. McElhone.

In the absence of a quorum, the meeting called for this day lapsed.

WEDNESDAY, 8 MAY, 1878.

MEMBERS PRESENT :—

Mr. Hurley (*Hartley*), in the Chair.  
Mr. McElhone, | Mr. Coonan,  
Mr. Charles.

Charles Alston Thurlow, Esq. (*Deeds Branch, Lands Department*), called in and examined.

Witness withdrew.

Thomas Lewis, Esq., called in and examined.

Witness *handed* in plans of the land in question which were ordered to be appended. (*See Appendices B, C, and D.*)

Witness withdrew.

Edward Grant Ward, Esq. (*Registrar General*), called in and examined.

Witness withdrew.

Committee deliberated.

[Adjourned to Friday next at *Two o'clock.*]

FRIDAY, 10 MAY, 1878.

MEMBERS PRESENT :—

Mr. McElhone, | Mr. Hurley (*Hartley*.)

In the absence of a quorum, the meeting called for this day lapsed.

TUESDAY,

TUESDAY, 14 MAY, 1878.

MEMBER PRESENT :—

Mr. Hurley (*Hartley*.)

In the absence of a quorum, the meeting called for this day lapsed.

WEDNESDAY, 15 MAY, 1878.

In the absence of a quorum, the meeting called for this day lapsed.

THURSDAY, 16 MAY, 1878.

In the absence of a quorum, the meeting called for this day lapsed.

FRIDAY, 17 MAY, 1878.

MEMBERS PRESENT :—

Mr. Hurley (*Hartley*), in the Chair.

Mr. McElhone, | Mr. Coonan.

Letter from His Honor Mr. Justice Hargrave *handed in* by Chairman and ordered to be appended. (*See Appendix E.*)

Chairman submitted Draft Progress Report.

Same read and agreed to.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

## LAND AT CORNER OF PITT AND BRIDGE STREETS.

TUESDAY, 30 APRIL, 1878.

Present:—

MR. COONAN, | MR. CHARLES.  
MR. HURLEY (*Hartley*),

JOHN HURLEY, ESQ., IN THE CHAIR.

His Honor John Fletcher Hargrave, Esquire, one of the Puisne Judges of the Supreme Court, examined:—

1. *Chairman.*] You are one of the Judges of the Supreme Court? Yes, I have been since 1865.
2. You were Attorney General in the Robertson Administration in 1862? Yes, I was Attorney General of Her Majesty the Queen in 1862 and before that date, and afterwards till 1865 occasionally.
3. Have you any recollection as to issuing a writ of ejectment on behalf of the Queen with reference to some land at the corner of Pitt and Bridge streets? I have no recollection of the matter, except from the document you showed me just now, which, as it is signed by me, I have no doubt was issued. The papers on which I signed that writ of intrusion must have been laid before me at the time, or else I must have signed it on the authority of the Crown Solicitor for the time being. The papers should be in the Crown Solicitor's Office at the present moment. I signed the writ as Attorney General. Whenever the Attorney General signs any document of that kind it is brought into his room by the Crown Solicitor or one of his clerks; he sees what he signs no doubt, but the authority for doing so must be some information previously laid before him. I cannot recollect the reasons now which induced me to sign that document. The papers remain at the office, and they are the authority on which I used Her Majesty's powers as Attorney General.
4. I suppose the writ of intrusion would be based on the ground that the reservations and conditions in the deed of grant had not been complied with? I can hardly tell you upon what grounds this writ was based; but I can speak generally as a lawyer, that if a grantee of land does not fulfil the conditions on which Her Majesty grants the land a writ of intrusion would be issued.
5. And the property would revert to the Crown? Yes, in law it is so; but as this matter might come before me as a Judge I can only give you general information as to the law. A breach of conditions is a ground of forfeiture and writ of intrusion, just as much as if a man having no legal claim had gone upon the land.
6. If you will refer to page 4 of the printed papers (*Enclosure B to No. 6*), you will find the description of the grant set out, and it goes on to say, "but upon the express condition, nevertheless, that the said John Terry Hughes should construct an archway over the Tank Stream, according to a plan deposited in the office of the Town Surveyor; and on the further condition that he should erect a first-class building on the said land within two years from the 15th August, 1839." As a lawyer, would you say that that condition having failed in being carried out, of course the property would then revert to the Crown? It would seem so; if the grantee did not fulfil that condition the Crown would have a right to issue a writ of intrusion. You must understand that I only speak in the most general way possible as a lawyer, for as a Judge I have no right to give extra-judicial opinions at all. It is something like a lease. If a man takes a building lease on certain conditions, and the lessor's surveyor certifies that the conditions have not been fulfilled, the lessor takes re-possession.
7. There is a note at the bottom of the description I have read to this effect:—"The building conditions attached to this allotment have been rescinded (*Vide Colonial Secretary's letter, dated 20th November, 1848*)";—have the Crown power to rescind after the expiration of the term of the contract? I am not prepared

His Honor  
J. F. Hargrave,  
Esq.

30 April, 1878.

His Honor J. F. Hargrave, Esq. 30 April, 1878. prepared to say the Crown has not; I should think the Crown has, like any other landlord. The Crown might have rescinded the conditions eight or nine years afterwards, to make the holder's title good. The Crown may do these things like any other landlord would if they have not taken any steps to turn the parties out. It is a rule of law, or rather of equity, that anyone taking advantage of the non-fulfilment of conditions must come early. I have always maintained that the Crown in this country may deal with forfeitures as any other good landlord would—that the Crown has power to waive forfeiture.

8. It is not in the power of the Crown to sell land within the boundaries of the City unless by auction? I cannot say; they have no power to sell, except under the "Crown Lands Alienation Act of 1861," which abolished thenceforth all powers of sale existing up to that time. It can only be done under the provisions of the Alienation and Occupation Acts—the Acts will speak for themselves.

9. I suppose this writ was issued under the 115th clause of the Real Property Act? My apprehension is that this was a writ of intrusion, which is a totally different thing from a writ of ejectment. It was issued by my authority under the common law of England. In Queensland they have altered that; they have made the Crown's real property subject to writ of ejectment; whereas in this Colony we have always kept it subject to the old common law writ of intrusion.

Charles Alston Thurlow, Esq., called in and examined:—

C. A. Thurlow, Esq. 30 April, 1878. 10. *Chairman.*] You are in charge of the Deed Branch of the Lands Department? Yes.

11. You received instructions from the Under Secretary for Lands to forward a copy of a deed and this letter to myself? Yes. (*See Appendix A 1.*)

12. Is that a copy of the deed? That I cannot say. It is furnished by the Registrar General, but I presume it is. I have a copy of the description in my Crown Purchase book (*produced*) only giving the name of the grantee, the date, the quit-rent, and the conditions of the grant. (*Description read and compared with copy of deed.*)

13. Is that a correct entry? Quite so. The purchase money was £413, subject to quit-rent of one farthing.

14. Is there any note there that the building conditions were rescinded in reference to this land? Yes. It is written across the page in the handwriting of the late Mr. G. J. Armytage, of the Surveyor General's Department:—"The building conditions attached to this allotment have been rescinded. (*Vide Colonial Secretary's letter dated 20th May, 1848.*)" I have had a careful search made, and I cannot find the letter-book which should contain this letter. No doubt it was from the Colonial Secretary to Mr. Hughes. The deed is dated in 1839; Mr. Hughes received it in 1841; and the conditions were rescinded, according to this note, in 1848.

15. Between eight and nine years after the contract had been entered into? Yes.

16. That record was written by the late Mr. Armytage? Yes. The letter-book must be about the office somewhere. We have been hunting for it all day yesterday and this morning again, but we have not yet found it. Strange to say the copy of the grant in the Registrar General's Office has no memo. upon it of the rescission of the conditions. It is always the custom, when restrictions are removed, to note it on the back of the deed. In this case there is nothing of the kind.

17. You know the conditions were not complied with? I cannot answer that. I believe they were not.

18. If the conditions were not fulfilled would not the land revert to the Crown? The Crown seldom exercises its right in that way. Look at the thousands and thousands of pounds outstanding for quit-rent which ought to have been paid within twenty years. They have not been paid for fifty years.

19. Are you quite sure that is Mr. Armytage's handwriting? Yes, quite.

20. Do you know anything in reference to a certain sale of land a short time ago to Mr. Wolfen, near this same property? Yes, I have brought the papers. Mr. Wolfen's application appears to have been dated in June, 1875.

21. Do you hand in all the papers in that case? Yes. (*Papers handed in. See Appendix A 2.*)

22. Is it not generally understood that Crown lands in the City of Sydney shall not be sold unless by public competition? There are exceptional cases, as you will see by these papers. The sale to Mr. Wolfen was sanctioned by the Surveyor General without being put up to public competition. That was an application under the eleventh clause, in virtue of improvements, and it did not go to auction in consequence.

WEDNESDAY, 8 MAY, 1878.

Present:—

MR. CHARLES,	MR. COONAN,
MR. HURLEY (HARTLEY),	MR. McELHONE.

JOHN HURLEY, ESQ., IN THE CHAIR.

Charles Alston Thurlow, Esq., further examined:—

C. A. Thurlow, Esq. 8 May, 1878. 23. *Chairman.*] You desire the Committee to postpone your examination, in order that you may make a further search for the enclosure B to No. 6, referred to in the printed papers before us? Yes.

24. Is that letter dated 20th December, 1848? Yes. I think if you will allow the matter to stand over for a couple of days we may be able to find it. Great search has been made for it without success; but Mr. T. Lewis, to whom I have just been speaking, thinks he may be able to trace it. In this book (*producing a register*), which was found in the office by accident, there is a memorandum, as follows:—"Bridge-street allotments, Sydney—release from building conditions."

25. What date is that? 20th November, 1848. That was the time when these conditions were released. The deed was dated in 1839, and Mr. Hughes received it in 1841.

26. You must be mistaken. The deed was made out three months and seven days after the conditions were entered into;—are you aware of that? I could not give you the exact month of the year, but I know it was in 1839 the deed was dated. Mr. Hughes received it in 1841, and the conditions were released in 1848. Then it says here (*referring to the book*) opposite—"Informing the surveyor that His Excellency has been pleased to release the allotments of land sold by the Government, in Bridge-street, from the building conditions attached to them."

27. Does it refer to any particular allotments? No. It simply says "allotments"; it does not state what they are.

28. You are not positive as to its referring to this particular allotment at the corner of Pitt and Bridge streets? No, I cannot say. It is most important to find this document, and Mr. Lewis, upon looking at this book just now, thinks, if a day or two were allowed, he would be able to trace it. C. A. Thurlow, Esq.
29. This particular record may not have any particular bearing upon the record in the register you produced a short time ago? It may not. 8 May, 1878.
30. Will you bring up the other book when you come again? Yes.
31. Mr. Coonan.] We want all the papers connected with the matter, and that book contains only the record? Only the record of the papers, and these papers we believe we shall be able to find if the inquiry be postponed a few days.
32. Chairman.] If the deed were issued on certain conditions, and these conditions were not complied with within the time prescribed in the deed, would the land revert to the Crown again, and the deed be null and void? It shows, according to the sanction in 1848, that it was not null and void, as the conditions were merely rescinded.
33. The grantee is stated in the deed to have entered into certain conditions; those conditions he failed to comply with for seven years after the deed was issued, and the conditions were then rescinded; was it competent to rescind the conditions? It is a Government act.
34. You are supposing a case—you have no record of it; you are only supposing it may be so. You have no evidence to prove it is so? I have not.
35. You are merely supposing it is so? Upon the face of the record here.
36. That entry is in the plural, we are dealing with the singular? Yes, this may not refer to the particular allotment.
37. Mr. Coonan.] Did you not bring a book on the last day you were here, in which you read almost the same description? Yes.
38. Did not that book refer to this? There was written across in red ink "Conditions rescinded—vide,"—that was a memorandum across it, it was not the authority.
39. It referred to the authority which you cannot find? Yes, but which we hope we shall be able to find in a few days.
40. Would not that authority be also published in the *Gazette*? Yes, that would be published in the *Gazette* some time in 1848.

Thomas H. Lewis, Esq., examined:—

41. Chairman.] You were under examination some time ago in reference to the production of certain plans and papers relating to land at the corner of Pitt and Bridge streets? Yes.\* T. H. Lewis, Esq.
42. Do you produce those plans now? Yes. (*The Witness handed in the same. Vide Appendix B.*) 8 May, 1878.
43. Will you give us any information you have in your possession in reference to this land? Yes, the plan I hold in my hand is of a piece of land applied for by William Alexander Wolfen to purchase half a perch of land under the 11th clause of the Act of 1861, 2½ perches, &c., having 5 feet frontage to Bridge-street.
44. Do you know of your own knowledge whether that permission was granted? Yes, of my official knowledge.
45. Is that permission notified on the plan? It is notified on the plan as being alienated to William Alexander Wolfen.
46. That is the original plan? That is the original plan.
47. Wolfen has encroached upon this land how much? You cannot call it encroached; it has been done by authority.
48. Did he not build these premises before making application? I cannot say.
49. On what date was the application made to purchase this land? The deed is noted in 1875. See 75/4100 misc.
50. The buildings have been there many years? Yes.
51. Do you not know that these buildings had been there previous to that application? I am doubtful as regards new buildings, but I think they were.
52. Mr. McElhone.] Is not your office in those buildings? Yes, a branch.
53. How long have you been there? I think about three years in old building, the additional is nearly a new building. I don't think it has been erected above three years.
54. Chairman.] How long is it since your Department took possession of rooms in that buildings? In the old building 16th February, 1875, and in the new building 1st July, 1876.
55. So that the encroachment must have been prior to the application? That may have been, but the 11th clause provides for such cases.
56. What other plans do you produce? A plan showing John Terry Hughes 6 perches, sold to him on the 15th August, 1839. (*The witness handed in the same. Vide Appendix C.*)
57. Have you any other? This is one of Pitt-street, showing the alignment.
58. That will have no reference to this case? This other plan is that showing the position of the Commercial Chambers, and of the old stone wall in 1860. (*The witness handed in the same. Vide Appendix D.*)
59. You have no other papers? No.

Edward Grant Ward, Esq., examined:—

60. Chairman.] You are Registrar General? I am. E. G. Ward, Esq.
61. Will you look at this deed (*handing a deed*) and say whether that is your signature? Yes, that is my signature, and this is the seal of my office. (*Witness handed in the same. Vide Appendix A4.*) 8 May, 1878.
62. Have you any knowledge of your own of the person to whom this deed was issued, or of his failing to comply with the conditions of the deed? I have not.
63. A person entering into an agreement to fulfil the conditions of such a deed as this should be held to the conditions, should he not? I should think so.
64. In the event of his failure to comply with the conditions what would become of the deed? That would depend upon the terms of the deed; if the deed says that the title to the land is absolutely void if the conditions are not complied with, I should suppose the conditions would be carried out.

\* Yes. This answer refers to my attendance a week previously.

- E. G. Ward, Esq.  
8 May, 1878.
65. In the conditions here it is stated that two years are allowed in order to erect certain buildings upon land granted to certain persons; the two years having expired, and they having failed to carry out the conditions, would not the land revert to the Crown? I should say so.
66. Supposing seven years to have expired after the failure of the conditions, would the deed then be valid, and the land become the property of the person to whom it was first granted? That is a question I think I am hardly able to answer; it is a question rather for the decision of a legal man than of myself.
67. Do you not believe, that after the expiration of two years, the conditions not having been carried out, that the deed as originally granted would become null and void? I should think so, as far as the grant was concerned.
68. So that the land would actually revert to the Crown? I should say so if the conditions were not complied with within the period, unless the original conditions were rescinded.
69. If the building conditions were rescinded should not the original deed bear an endorsement to that effect? It is usual when conditions are rescinded for the deed to bear an endorsement to that effect.
70. Would not that endorsement be upon the original deed? Yes.
71. And also upon the copy in your office? It ought to be.
72. That is not so in this case? It is not. This is a certified copy of the original copy enrolled in my office. Any variation in any grant is made by an endorsement upon the original grant, and that endorsement ought to be referred to my office for registration on the copy.
73. *Mr. Coonan.*] Supposing the conditions were revoked, who would be the person who would do that? I should think the Governor.
74. Do you know of any cases that have come under your notice where the reservations in a grant have been revoked? I do not think I have ever seen one.
75. If you have never seen one why do you arrive at the conclusion that if the conditions were revoked it would appear upon the copy of the grant in your office? I come to the conclusion that any alteration that is made under the seal of the Governor would appear on the copy registered in my office.
76. There is no revocation so far as you can see? No.
77. But this is merely the copy of a copy? It is a certified copy of a copy.
78. Still there is an office copy? Yes.
79. And that office copy is the same as the deed that is in the hands of the grantee? Yes.
80. As far as you know then, looking at that document and looking at the evidence you have in your office, you have nothing to show that the reservations in that deed have been revoked? Nothing whatever.
81. *Mr. Charles.*] Is it not the fact that certain grants were made with the reservation of coal, and that though these reservations have been revoked no endorsement to that effect has been made in the original deeds, or in the copies in your office? I have not seen any.
82. Are you not aware that there was a reservation of all coal lands a few years ago? I am not.
83. By the Governor-in-Council in Sir Charles Fitz Roy's time? There may have been, but it does not appear upon the grants. All the old grants contain reservations of all kinds—timber, coal, mines, minerals, and so on.
84. *Chairman.*] This is a condition, not a reservation? This is a grant to a certain person upon condition that he shall do something; if he neglects to fulfil the condition the question is whether the land reverts to the Crown or not.

## LAND AT CORNER OF PITT AND BRIDGE STREETS.

## APPENDIX.

[To the evidence of Charles A. Thurlow, Esq., 30 April, 1878.]

A1.

The Under Secretary for Lands to J. Hurley, Esq., M.L.A. (Hartley).

Sir,

I have the honor to acknowledge your letter of the 25th ultimo, requesting to be furnished with a copy of a deed of grant prepared in favour of John Terry Hughes for 6 perches, allot. 11, sec. 46, parishes of St. James and St. Phillip, and in compliance therewith beg to enclose copy of such grant this day received from the Registrar General.

1 enclosure.

I have, &amp;c.,

C. A. THURLOW,

(For the Under Secretary.)

## TOWN PURCHASE.

Grantee—John Terry Hughes.  
Date—23rd December 1839.  
Town—Sydney.  
6 p.

VICTORIA by the grace of God of the United Kingdom of Great Britain and Ireland  
Queen Defender of the Faith and so forth.

TO ALL TO WHOM THESE PRESENTS SHALL COME, GREETING :

WHEREAS at a public auction held in conformity with the regulations made for the sale of Crown lands in our territory of New South Wales John Terry Hughes of Sydney has become the purchaser of the allotment or parcel of land hereinafter described for the sum of four hundred and thirteen pounds sterling Now know ye that for and in consideration of the said sum of four hundred and thirteen pounds sterling by the said John Terry Hughes to the Colonial Treasurer of our said territory for and on our behalf well and truly paid before these presents are issued And in further consideration of the quit rent hereinafter reserved we have granted and for us our heirs and successors do hereby grant unto the said John Terry Hughes his heirs and assigns subject to the conditions reservations and provisos hereinafter mentioned All that allotment or parcel of land in our said territory containing by admeasurement six perches and situated in the town of Sydney parishes of Saint James and Saint Phillip county of Cumberland allotment No. 11 of section No. 46 bounded on the north by Bridge-street being a line bearing east sixteen degrees north thirty-eight and a half links on the east by the continuation of Pitt-street being a line bearing south four degrees thirty minutes east one hundred and thirty-nine links on the south by a line bearing west sixteen degrees south twenty-five links and on the west by a reserved lane dividing it from allotment No. 1 of the old lumber-yard purchased by John Terry Hughes being the allotment sold as lot 48 in pursuance of the advertisement of 13th July 1839 but upon the express condition nevertheless that the said John Terry Hughes should construct an archway over the Tank Stream according to a plan deposited in the office of the Town Surveyor and on the further condition that he should erect a first-class building on the said land within two years from the fifteenth day of August eighteen hundred and thirty-nine the day of sale thereof with all the rights and appurtenances whatsoever thereto belonging To hold unto the said John Terry Hughes his heirs and assigns for ever yielding and paying therefore yearly unto us our heirs and successors the quit rent or sum of one farthing for ever if demanded On condition that the said John Terry Hughes his heirs or some of them do and shall within zero years from the date hereof erect or cause to be erected a permanent dwelling-house store or other suitable building upon the said land of the full value of zero pounds sterling or upwards And that he and they do and shall construct proper drains through and from the same land to the nearest common drain or sewer And also that he and they do and shall in every respect and at all times hereafter conform to the Government Regulations for the time being and to the laws and regulations now or hereafter to be in force for the better regulating the alignment of the streets in the said town of Sydney Provided nevertheless and we do hereby reserve unto us our heirs and successors full power for us or our successors or for the Governor for the time being of our said territory to resume and take possession of all or any part of the said land which may be required at any time or times hereafter for the improvement of the said town or for any public purpose three calendar months notice of its being so required being previously given in the Government Gazette or otherwise and the value of the said land or of so much thereof as shall be so required and of any building standing on the said required land being paid by the Government to the party entitled thereto at a valuation fixed by arbitrators chosen as hereinafter mentioned And we do also reserve unto us our heirs and successors and to the Governor for the time being of our said territory by such person or persons as shall be duly authorized in that behalf full power to make and conduct through the said land all common or public drains and sewers which may be deemed expedient three calendar months notice being previously given to the occupier or owner thereof and the damage which any building may sustain thereby being paid for by the Government to the party entitled thereto at a valuation fixed by arbitrators as aforesaid And we do hereby declare that in every case of arbitration which may arise under and by virtue hereof one arbitrator shall be chosen by the Governor for the time being of our said territory and one by the then owner or owners of the said land which two arbitrators (before they enter upon the said arbitration) shall elect a third as umpire who shall determine any disagreement between the two said arbitrators But if the owner or owners of the said land shall refuse or neglect to choose an arbitrator on his her or their part within one calendar month after being required so to do by public advertisement in the Government Gazette or otherwise then both arbitrators shall be chosen by the Governor for the time being of our said territory which arbitrators shall also elect an umpire in the manner above mentioned Provided always that if the conditions reservations and provisos herein contained or any part thereof be not duly observed and performed by the said grantee his heirs and assigns then the said land shall be forfeited and revert unto us our heirs and successors And these presents and every matter and thing herein contained shall cease and determine and become absolutely void to all intents and purposes and it shall be lawful for us our heirs and successors by our Governor for the time being of our said territory or other person duly authorized in that behalf to re-enter upon and take possession of the said land or any part thereof and the said grantee his heirs and assigns and all occupiers thereof therefrom wholly to remove In testimony whereof we have caused this our grant to be sealed with the seal of our said territory.

Given under the hand of Sir George Gipps Knight our Captain-General and Governor-in-Chief of our said territory and its dependencies at Government House Sydney in New South Wales aforesaid this twenty-third day of December in the third year of our reign and in the year of our Lord one thousand eight hundred and thirty-nine.

Signed and Sealed in the presence of—  
HY. WATSON PARKER. }

(L.S.) GEO. GIPPS.

ENTERED on record by me in the register of town purchases, No. 57, page 9, this twenty-fourth day of March one thousand eight hundred and forty.—E. DEAS-THOMSON, Colonial Secretary and Registrar.

I certify the above and preceding page to be a true copy of the entry or copy of the original deed of grant from the Crown kept as of record or for public or official purposes in the office of the Registrar General of the Colony of New South Wales.

Registrar General's Office, Sydney, 3rd day of April, 1878.

E. G. WARD,  
Registrar General.

## A 2.

Mr. W. Wolfen to The Surveyor General.

Sir,

I beg to intimate that I observed in the *Herald* that Mr. Hurley put questions to the Colonial Secretary referring to my Bridge-street property, and, though you will be able from public documents to show the whole circumstances respecting the measurements of the land, I beg to point out that the strip of land, 4 feet 8 inches, had been occupied by the former proprietors and myself since the year 1839, and that nevertheless, when I came to an agreement with the Government for the demolition of the substantial buildings erected by me about ten years since, at a considerable cost, the whole having been built of Pyrmont stone, and otherwise of a most durable description, and that in their place I erected new buildings, and in accordance with the plans submitted to the Government, under a lease of five years, I applied for the purchase of the 4 feet 8 inches which had already been in occupation for at least thirty-five years; and I also agreed to abide by the Government appraiser's decision, and subsequently paid the amount as appraised, and obtained the grant for the 4 feet 8 inches of land accordingly.

The dimensions of the new buildings are exactly the same as they were previous to the erection of the new structure, and it stands on the same old foundations.

With regard to the rentals the Government pay, I have to observe that the space occupied by the Government would show that, in comparison with my other tenants, I receive £1,250 per annum for what any other tenants pay £1,780 per annum; thus:—

Space occupied by other tenants.			
No. 1 Bridge-street Chambers pay me .....	£300	The Government pay.....	£225
No. 2 Bridge-street Chambers, for what other tenants pay ...	320	" " .....	225
" " " " .....	320	" " .....	200
" " " " .....	230	" " .....	150
" " " " .....	230	" " .....	150
" " " " .....	230	" " .....	150
Extensive basement.....	150	" " .....	150
	£1,780		£1,250

showing that the Government pay £530 per annum less for a like space for which my other tenants occupy.

At the expiration of the lease held by the Government I shall have to make considerable alterations in the building at my expense, having agreed to erect the buildings in accordance with the requirements of the Government, which will not be suitable for the occupation of future tenants.

I have, &c.,

WILLIAM WOLFEN.

Mr. T. Lewis. Perused.—T.H.L., 5 Feb., 1877. Chief Draftsman. Is any action necessary? J.E., 6 Feb., 1876. Mr. T. Lewis. The letter may be of use to the Hon. the Minister for Lands if he should ever be asked to reply to any questions relative to the alienation of the portion to Mr. Wolfen.—T.H.L., 7 Jan., /77.

The Under Secretary for Finance and Trade to The Under Secretary for Lands.

Sir,

The Treasury, New South Wales, 20 September, 1875.

I am directed to inform you that William Wolfen paid into this office, on the 15th September, 1875, the sum of £50, being the amount of purchase-money for an allotment of land at Hamilton-lane, Bridge-street, Sydney, containing 2½ perches, under the 11th clause of the "Crown Lands Alienation Act of 1861."

2. The fee on the deed, £1, has also been paid.

I have, &c.,

W. NEWCOMBE,  
(Pro Under Secretary.)

The Treasury, 15 September, 1875.

RECEIVED from William Wolfen the sum of £51 sterling, for land under the 11th clause Land Act, Hamilton-lane, Bridge-street, City of Sydney, 2½ perches.—£50 land, £1 deed.

R. A. CANTOR,  
Pro Treasurer.

£51.

## (B.)

## Appointment of Appraiser by Government.

WHEREAS William Wolfen, of Sydney, in the Colony of New South Wales, has applied to purchase, under the 11th clause of the Crown Lands Alienation Act, certain Crown land, situate in the City of Sydney, a description whereof is set out in the Schedule hereinafter written: Now I, the Under Secretary for Lands, having been duly authorized by the Minister for Lands, in pursuance of the powers vested in him under and by virtue of the "Crown Lands Alienation Act of 1861," do hereby appoint John Williams Deering, of Ashfield, in the Colony of New South Wales, to be the appraiser on behalf of the Crown, to appraise the value of the said land, and the price to be paid by the said William Wolfen for the purchase thereof.

In witness whereof I have hereto set my hand, this 30th day of June, 1875.

W. W. STEPHEN.

## SCHEDULE REFERRED TO:—

Section 46, containing 2½ perches in Hamilton-lane, Bridge-street, in the City of Sydney.

I, the within-named John W. Deering, do solemnly and sincerely declare, that I am not directly or indirectly interested in the matter referred to me, and that I will faithfully and honestly, and to the best of my skill and ability, hear and determine the matters referred to me, under the "Crown Lands Alienation Act of 1861."

Subscribed and declared this 14th day of }

August, A.D. 1875, before me,— }

MICHAEL FITZPATRICK, J.P.

JOHN W. DEERING.

## (A.)

WHEREAS I, William Wolfen, of Sydney, in the Colony of New South Wales, have made application to purchase certain unoccupied Crown lands, situate at Hamilton-lane and Bridge-street, a description whereof is set out in my letter to the Minister for Lands, bearing date 22nd May; and the Minister for Lands has intimated that he is willing to appoint John William Deering, Esq., of Ashfield, in the Colony of New South Wales, to appraise the value of the said land on behalf of the Government: And whereas I am desirous of concurring in the appointment of the said John William Deering, Esq., as such appraiser as aforesaid: Now, therefore I, the said William Wolfen, do hereby nominate and appoint the said John William Deering, Esq., to be appraiser on my behalf, to the intent that upon his being appointed by the Minister for Lands, as appraiser on behalf of the Government, he may, as sole appraiser, determine the matters aforesaid.

In witness whereof I have hereunto set my hand, this 30th day of June, A.D. 1875.

WILLIAM WOLFEN.

Minute

Minute Paper for the Executive Council.  
Application to purchase land under the 11th clause.

Department of Lands, Sydney, 8 September, 1875.

THE application specified in the schedule annexed, for the purchase, under the 11th clause of the Crown Lands Alienation Act of 1861, of certain land, the value of which has been appraised as by law required, is recommended for the approval of His Excellency the Governor and the Executive Council, the claim being regular and in accordance with the provisions of the Act referred to.

His Excellency the Governor and Executive Council. Approved.—H.R., 13/9/75.

The Executive Council advise that the application to purchase in terms of the 11th clause of the "Crown Lands Alienation Act of 1861," specified in schedule, be approved.—ALEX. C. BUDGE, Clerk of the Council. Min. 75/44, 11/9/75. Confirmed, 17/9/75. Gazetted 14 Sept., 1875.

THOS. GARRETT.

The Schedule referred to.

Registration Nos.	Name of Applicant.	Area.	Section.	Situation of Land.	Appraised Value, inclusive of Deed Fee.
Nos. 75, 5920	William Alexander Wolfen	2½ perches	46	Hamilton-lane, Bridge-street, City of Sydney	£51.

Mr. Bennett.—This case is *very urgent*; the deed is to be prepared in the name of William Alexander Wolfen, Mr. Wolfen's second Christian name being as here stated.

Memo. Chief Draftsman.—The deed for this case being urgently required may go on without being noted on Sydney section, No. 46, which is at the present time missing.—L.G.J.B., 21/9/75.

W. A. Wolfen.—11th clause.

Description.

2½ perches, county of Cumberland, parish of St. Phillip, city of Sydney: Commencing on the southern building-line of Bridge-street, at the north-eastern corner of W. A. Wolfen's property, formerly J. T. Hughes', and bounded thence on the north by that building-line bearing N. 75° E. 5 feet; on the east and south by Hamilton-lane and Bridge-lane being lines bearing S. 15° 18' E. 42 feet 9 inches, S. 1° 18' E. 43 feet 6 inches, S. 28° 45' W. 10 feet, S. 43° W. 12 feet 6 inches, S. 59° W. 4 feet 8 inches, and thence S. 68° 50' W. 17 feet; on the west by the eastern boundary of W. A. Wolfen's 1½ perch, purchased under the 11th clause, bearing N. 15° 40' W. 11 feet 6 inches; again on the north and again on the west by lines dividing it from W. A. Wolfen's first-mentioned property bearing N. 74° 30' E. 22 feet, N. 63° 56' E. 5 feet, N. 50° E. 4 feet, N. 26° 20' E. 10 feet, N. 4° 21' W. 40 feet; and thence N. 15° 18' W. 40 feet to the point of commencement.

Diagram ppd. 24/9/75.

SCHEDULE of land applied for under the "Crown Lands Alienation Act of 1861," 11th clause, Hamilton-lane, Bridge-street, City of Sydney.

Allotment.	Section.	Applicant.	Area.	Remarks.
—	46	William Wolfen .....	a. r. p. 0 0 2½	It is recommended that the two small portions* of Crown land, containing respectively 1 perch and 1½ perch, situate in Hamilton-lane, Bridge-street, in the City of Sydney, be sold to Mr. W. Wolfen (the owner of the adjoining land) under the 11th clause, as Crown lands, lying between land already granted and a street.

\* Treat this as one portion of 2½ perches.

Approved.—W.W.S., 29 June.

Under Secretary. The enclosed is Mr. Wolfen's case for approval of Deputy Surveyor General's memo. Mr. Wolfen is pressing, 30/8/75. The case can go on as suggested; but I do not know whether pencil memo enclosed is official.—W.W.S.

Government Surveyor Deering to The Surveyor General.

PLAN of a portion of land containing 1½ perch, on the western side of Hamilton-lane, Bridge-street, in the City of Sydney, applied for to purchase under the 11th section "Crown Lands Alienation Act of 1861," by Mr. William Wolfen.

22 June, 1875. Mis. 71/4,100. Sydney section, No. 46. S. 63,907. S. 63a, 907.

In compliance with the Surveyor General's instructions to me, No. 75-21, of 11th June, 1875, I have the honour to report that there is no objection to the sale of the above described land to Mr. Wolfen.

2. The circumstances connected with this land are precisely the same as with the adjoining area of 1 perch, dealt with in my late report, No. 75/32, of 5th instant (Mis. 75/3,573.) 75/3,978 Mis.

3. The land now applied for contains an area of 1½ perch (1.52,640), and adjoins the property of the applicant.

JOHN W. DEERING,  
Government Surveyor.

No plan received by me.—H.P.B., 23 June. The information has been given on plan S. 63,907. Schedule herewith for applicant. 26th June, 1875. 75/5,920.

Mr. W. Wolfen to The Secretary for Lands.

Sir,

With reference to my previous application, dated 22nd ultimo, for the purchase of a small strip of land in Bridge-lane, I am informed that there is also a small strip of land on the western side of Hamilton-lane, adjoining my property, and I now have the honor of applying for the purchase of the same, under clause 11 of the Land Act, as shown in the accompanying sketch.\*

Sydney, 9 June, 1875.

I have, &c.,  
WILLIAM WOLFEN.  
Mr.

\*Appendix E.

Mr. Surveyor Deering, for report or measurement, if unobjectionable.—G.L. (for Surveyor General), 11 June, 1875. Urgent. Plan, with report No. 75/34, of 22 June, 1875.—JOHN W. DEERING.

Misc., 75/3,573.  
Sydney section  
No. 46.  
S. 63/907.  
S. 63A/907.

\*Plan of a portion of land containing one perch, at the intersection of Bridge-lane and Hamilton-lane (Bridge-st.), in the City of Sydney, applied for to purchase under the 11th section "Crown Lands Alienation Act of 1861," by Mr. William Wolfen.

(No. 75/32.) 5th June, 1875.  
In compliance with the Surveyor General's instructions to me, No. 75/20, of 22 May last, I have the honor to report on the above application.

2. I can see no objection to the sale of the land applied for by Mr. Wolfen; on the contrary, I think it very advisable for Mr. Wolfen to purchase the land upon which he is about erecting Government Offices, in order to complete his title.

3. The area of the land applied for is 1 perch (1.16320 perches by calculation).

4. As the plan "S. 63-907" clearly and accurately shows the land applied for, and also other corresponding cases, I have adopted this plan, and have placed thereon the dimensions, &c., necessary for the description of the proposed grant.

5. I beg to invite the Surveyor General's attention to the circumstance of a strip of land about 5 feet wide, on the western side of Hamilton-lane, adjoining Mr. Wolfen's property, still remaining unsold. I think Mr. Wolfen is unaware of this, and I was not aware of it myself at my late interview with him, or I would have pointed out the circumstance. I have not been very closely into the matter, but it seems to me that it is a fact.

6. I should add that the land adjoining that now applied for is the property of the applicant.

JOHN W. DEERING,  
Government Surveyor.

Schedule herewith for appraisement, G.L.—26 June, 1875. 75/4440.

\*The information has been given on plan S. 63/907.

Mr. W. Wolfen to The Secretary for Lands.

Sir,

Sydney, May 22, 1875.

I have the honor of applying for the purchase of a small strip of land at the rear of my property, on which I am on the point of erecting premises on lease to the Government. The strip of land refers to allotments Nos. 1 and 2, as per accompanying sketch.\*

I have, &c.,

WILLIAM WOLFEN.

Urgent.—22 May. Mr. Long.—22 May. Sydney section No. 46. S. 63/907. S. 63A 907.—JOHN W. DEERING. Mr. Surveyor Deering, for report or to measure if unobjectionable.—G.L. (for Sur. Genl.), 22 May, 1875. No. 20. Reported on. Report No. 75/32 of 5th June, 1875.—JOHN W. DEERING.

Department of Lands, Sydney, 14th September, 1875.

It is hereby notified, that the person whose name is hereunder mentioned will be permitted to purchase, under the 11th clause of the "Crown Lands Alienation Act of 1861," the portion of land specified against his name.

2. The purchase-money must be paid into the Colonial Treasury, Sydney, within three months from the date of the publication of this notice, under a penalty of an addition to the appraised value of 10 per cent.; and should that increased price not be paid within a further period of three months the claim to purchase will lapse, and the land will be brought to auction.

THOMAS GARRETT.

Registration No.	Name of Applicant.	Area.	Situation of Land.	Appraised value, inclusive of Deed Fee.

Appraisement by single Appraiser.

To all to whom all these presents shall come—I, John Williams Deering, of Ashfield, in the Colony of New South Wales, send, greeting:—

WHEREAS on the 30th day of June, in the year of our Lord one thousand eight hundred and seventy-five, I was duly appointed by the Minister for Lands, and on the same day by William Wolfen, of Sydney, in the Colony of New South Wales, as the sole appraiser to fix and determine the price or value to be paid by the said William Wolfen, for certain unoccupied Crown lands situate at Bridge-street, Hamilton-lane, a description whereof is set out in the Schedule in the paper writing hereto annexed, marked "B": And whereas I have entered upon the consideration of the value of the said land, and have heard and considered the evidence produced before me, by or on behalf of the Minister for Lands and the said William Wolfen: Now I, the said John William Deering, do hereby declare the sum of fifty pounds to be the value of the said land, and do appraise and fix that sum as the amount to be paid by the said William Wolfen for the purchase thereof from the Crown; and I assess and fix the costs of this appraisement payable to me at the sum of one pound one shilling, which said sum I direct shall be paid by the Minister for Lands.

In witness,—

JOHN WILLIAMS DEERING,  
14 August, 1875.

Before any further action is taken in this matter I would respectfully refer you to my report, dated 16th August, No. 75-26.—THOS. H. SMITH, Jun., 17th Aug., 1875. The error being in favour of Mrs. Gale, the owner of the land on the other side of the lane, there does not appear to me to be any objection to the completion of the sale to Mr. Wolfen.—P.H.W., 26 Aug., /75.

E.

[Handed in by Chairman, 17 May, 1878.]

Dear Sir,

Supreme Court, Sydney, April 27, 1878.

In reply to your note as to land at corner of Pitt and Bridge streets, I really am not aware of anything relating thereto, except that I have always heard that Mr. Garsed claims it.

Will attend, however, at the Committee Room, as requested by you, on Tuesday, the 30th instant, at 11 o'clock.

Yours truly,

F. W. Webb, Esq.

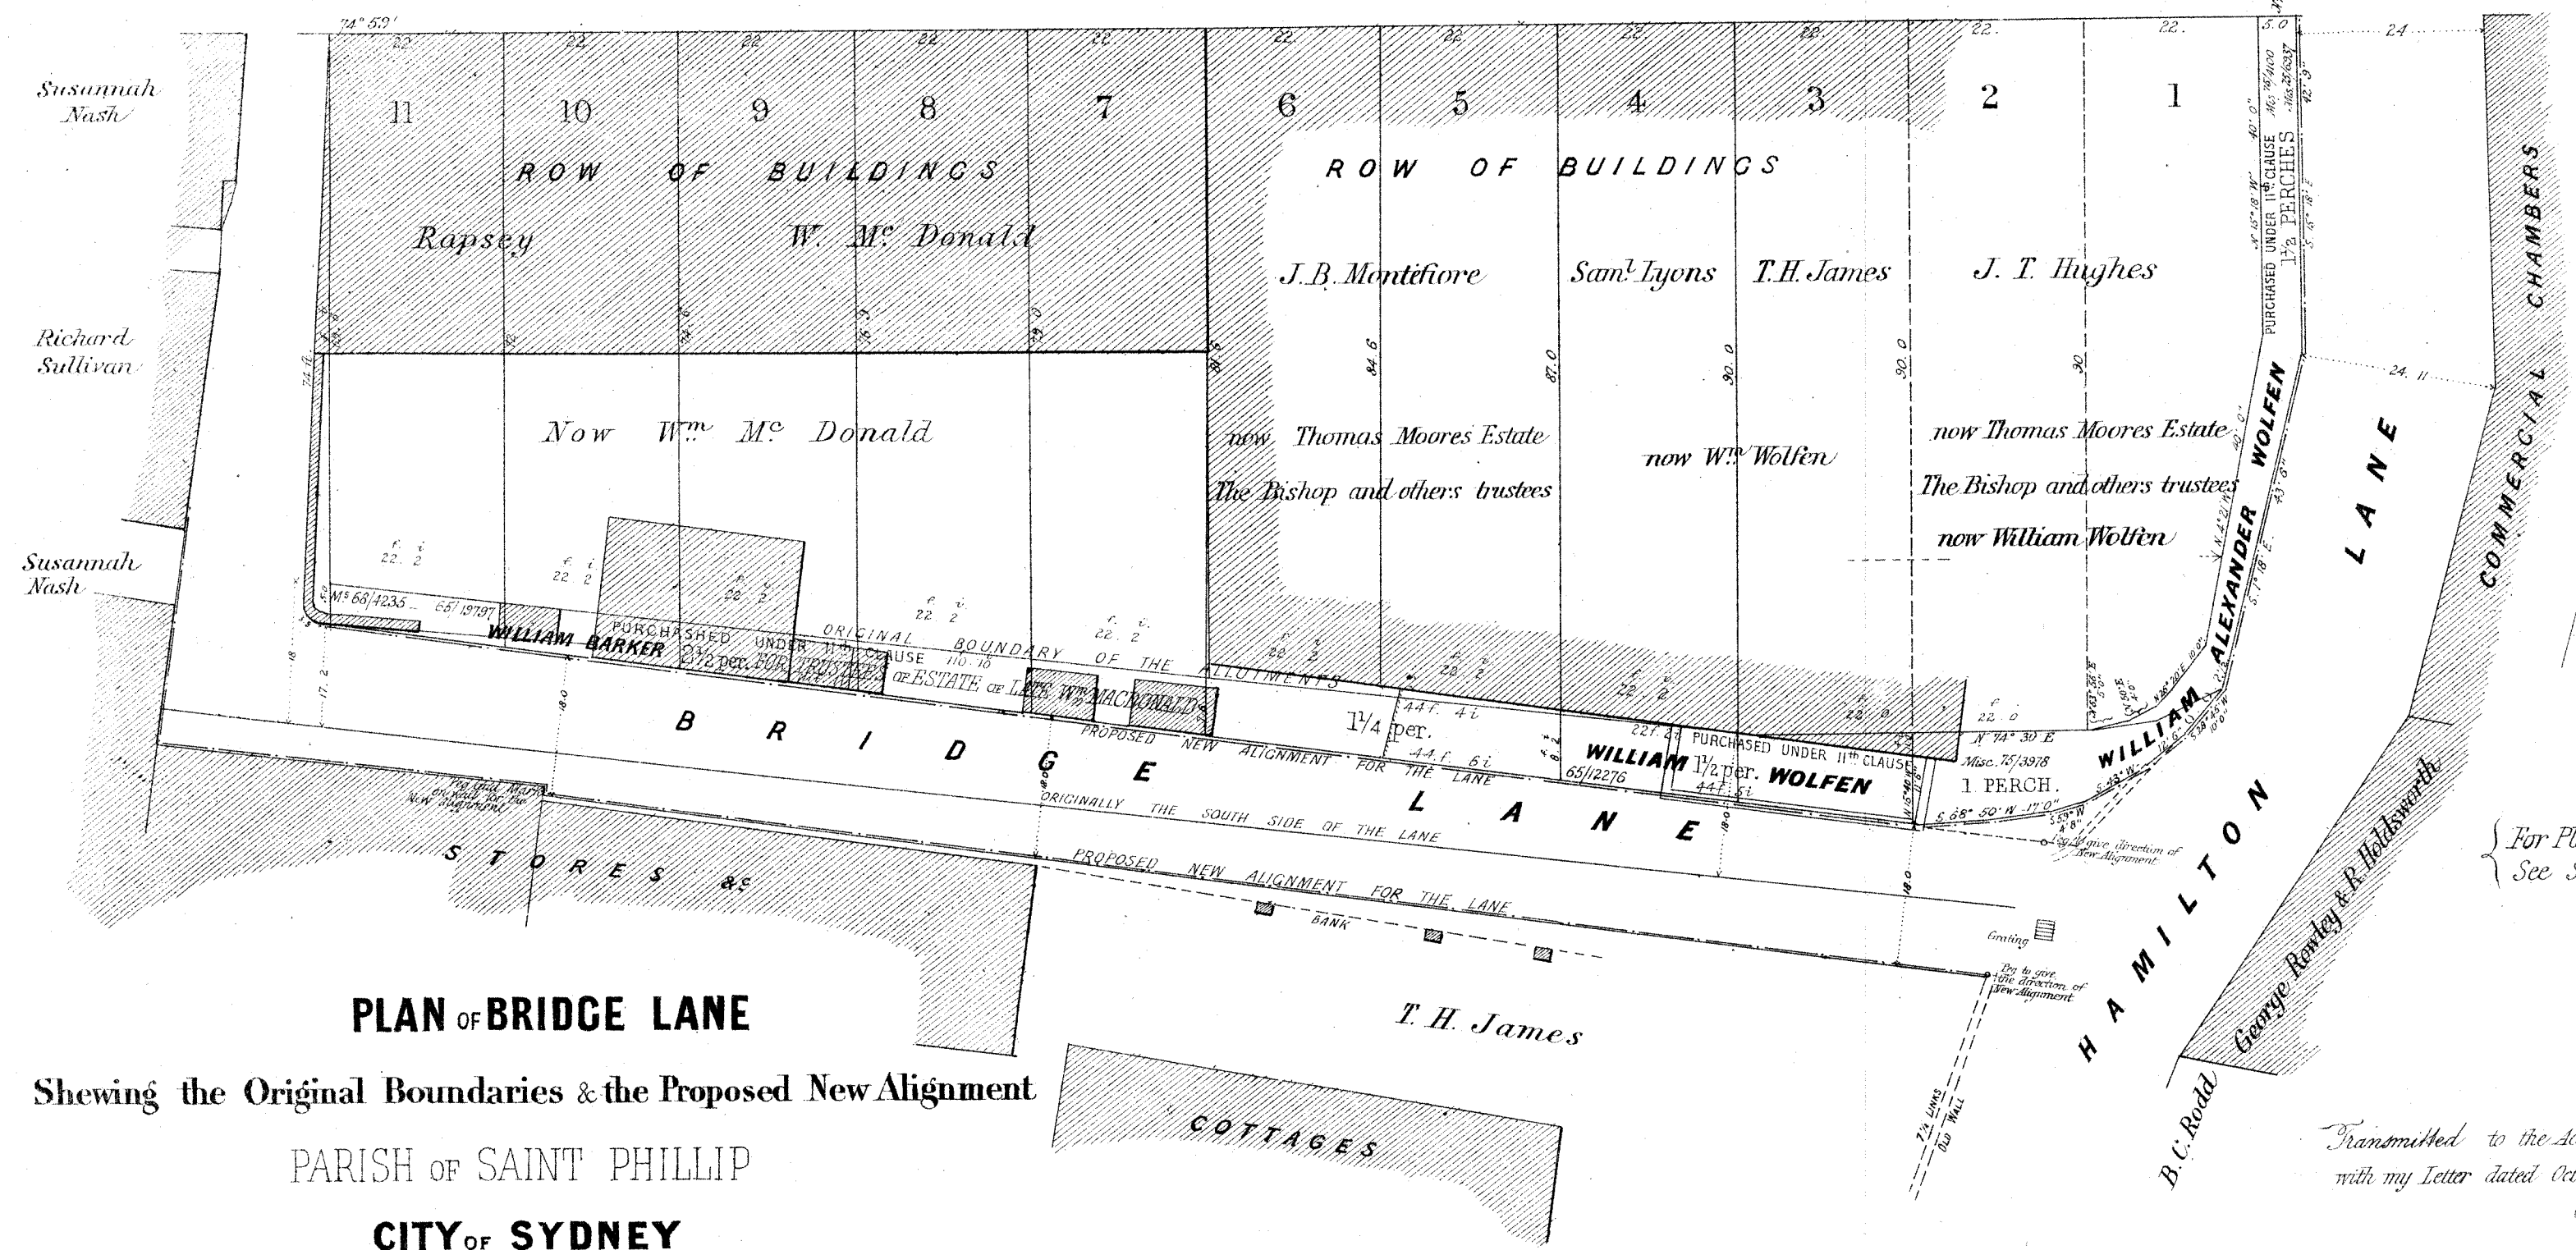

JOHN F. HARGRAVE.

## LIGHT-HOUSE AT SOUTH HEAD.

### No. 1.

The Secretary, Marine Board, to The Under Secretary for Finance and Trade.

Sir, Sydney, 16 September, 1875.  
I have the honor, by direction of the Marine Board, to invite your attention to page 11 of the accompanying "Report of the proceedings of the Principal Officers of the Marine Departments of the Australian Colonies," and to inform you the Board concurs in the opinion that the power of the Macquarie light should be increased.

Under these circumstances, it is submitted that the attention of the Colonial Architect may be directed to the subject, with the view of taking the necessary steps for carrying out the work.

I have, &c.,  
GEO. S. LINDEMAN,  
Lieut., R.N., Secretary.

This proposal, before being determined upon, had better be submitted to the Colonial Architect, with a view to some estimate being obtained of the probable cost, and likewise of its being placed before the Government in a more definite form.—W.F., 22/9/75.

The Under Secretary for Public Works.—G.E., B.C., 23/9/75. Colonial Architect.—B.C.,  
24/9/75, J.R.

### No. 2.

EXTRACT from Report of proceedings of the Conference of the Principal Officers of the Marine Departments of the Australian Colonies, held in Sydney, in January and February, 1873.

"Having visited the Macquarie and Hornby lights, the Conference came to the conclusion that the former is not sufficiently powerful for so important a position. Captain Hixson mentioned that the light was exhibited as early as the year 1817; and although it has been classed a first-order light, the apparatus is not of equal power and quality with modern lights. It was resolved to recommend that the power of this light should be increased."

### No. 3.

The Colonial Architect to The Under Secretary for Public Works.

Sir, Department of Public Works, Colonial Architect's Office, Sydney, 27 December, 1876.

In returning the enclosed communication respecting the Macquarie Light, and inviting attention to page 11 of the Report of the Conference of the Marine Departments, annexed thereto—wherein "It was resolved to recommend that the power of the light should be increased," forwarded to me under blank cover, on 24th September, 1875,—

2. I do myself the honor to report that very considerable alterations to the lantern and lantern-chamber will be necessary before a larger light can be put into position; and although much of this work could be performed before the removal of the lantern, the necessity of not allowing the light to be extinguished for one night must be kept in view; and to attempt its removal, even if a temporary tower were erected and prepared to receive it, would be attended with considerable uncertainty and risk, as some unforeseen contingency might prevent the transfer being made within the required time. The only way that appears practicable for making the change would be to erect a temporary tower and fit it with a spare light before attempting to remove the present one, but this would be attended with great expense.

3. As the present light-house and buildings have from recent inspection been found to be very defective and badly constructed, and the quarters insufficient and unhealthy, I would under the circumstances named suggest the advisability of erecting a new building of suitable dimensions for a larger light, together with quarters containing sufficient accommodation for the people in charge. With this view, I have included in my draft Estimates for 1877, recently submitted to the Minister, the sum of £15,000, the estimated cost of the work.

I have, &c.,  
JAMES BARNET,  
Colonial Architect.

Under Secretary for Finance and Trade, B.C., 29/12/76.—J.R.

### No. 4.

Minute of Colonial Treasurer.

THIS matter is of too large a nature to be dealt with suddenly. The papers seem to have been with the Colonial Architect for fifteen months, and only now are submitted as a reason for having put so large a sum upon the proposed Estimates without a word of explanation. In absence of that explanation I omitted the items from the Estimates, and now it must be considered by the Cabinet as to the policy of building a new light-house, and whether the money for that purpose should be placed on the Additional Estimates.—A.S., 4/1/77.

The Minister for Works.—A.S., 4/1/77. The Under Secretary for Public Works.—G.E., B.C.,  
5/1/77. Cabinet, 5/1/77.—J.R.

Recommended

## 3

Recommended by the Colonial Architect that £15,000 be placed on the Estimates for 1877, for the erection of a new light-house at South Head for a larger light, and with sufficient quarters for the people in charge, with Mr. Stuart's minute of 4/1/77, referring the matter to the Cabinet.

Before this matter is referred to the Cabinet I think a report from the Marine Board would be advisable.—J.H., 2/4/77. Under Secretary for Finance and Trade, B.C., 4/4/77.—J.R. The President of the Marine Board.—W.R.P., 10/4/77. G.E., B.C., 11/4/77.

## No. 5.

## Minute of Marine Board.

THE Marine Board concurs in the opinion expressed by the Principal Officers of the Marine Departments of the Australian Colonies, to the effect that the Macquarie light is not sufficiently powerful for so important a position. It is of about 3rd order catoptric, and occupies the space of the small lantern from which it is now exhibited. The proposed light would probably be of the 1st order dioptric, and it would be so large as to require more space than the top of the present tower affords. The proposal of the Colonial Architect would therefore seem to be the best course to pursue under the circumstances which surround the difficulty of the undertaking in contemplation.—By order, G.S.L., 2/5/77.

The Under Secretary for Finance and Trade. The sum of £15,000 voted on Estimates. Colonial Architect, B.C., 21 March, '78.—J.R.

## No. 6.

## The Colonial Architect to The Under Secretary for Public Works.

Sir, Department of Public Works, Colonial Architect's Office, Sydney, 8 April, 1878.

With reference to the sum of £15,000 voted on the Estimates this year for erection of a new light-house and quarters to replace the present old Macquarie Light-house at South Head, as recommended by the Marine Board,—

2. I do myself the honor to suggest, in order that the light to be exhibited in the proposed new light-house may be of the best and most approved kind, and superior to present lights on the Australian coast, that the Agent General in London be asked to make inquiries of the Trinity Board and other light-house authorities respecting the use of the electric light, which I understand has been adopted in some of the light-houses on the English coast and elsewhere, and if this system has been attended with satisfactory results, that I may be furnished with all necessary particulars and information in regard to the arrangements, appliances, &c., required to be provided in the new light-house for reception of the light in question.

3. I would also suggest that, as experiments in lighting by electricity are, I understand, to be made at the Paris Exhibition, the results of these experiments be ascertained if possible, as I have no doubt they would afford useful and valuable information in the matter.

I have, &c.,  
JAMES BARNET,  
Colonial Architect.

Approved.—J.S., 11/4/78. Colonial Architect, B.C., 14/4/78.—J.R.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

SERVICE OF SUMMONSES UNDER THE MASTERS AND  
SERVANTS ACT.

(CIRCULAR LETTER.)

*Ordered by the Legislative Assembly to be printed, 12 March, 1878.**[Laid upon the Table in accordance with promise made in answer to Question 9, Votes No. 35, 5 March, 1878.]*

Circular.—78-1,431.

Department of Justice and Public Instruction, Sydney, 23 February, 1878.

Gentlemen,

With reference to a Circular letter from the Colonial Secretary's Office, dated 6th July, 1870, to the several Benches of Magistrates throughout the Colony, intimating that except in special cases the Police were no longer to be expected to serve Summonses for the recovery of wages under the "Masters and Servants Act of 1857,"—I am now directed by the Minister of Justice and Public Instruction to inform you that the Police will in future be required to serve Summonses under the said Act when practicable, in accordance with a Resolution passed by the Legislative Assembly on the 6th instant—that the serving of such Summonses is a legitimate function of the Police, and may properly be performed by them, there being nothing under the said or any other Act to prohibit it, of which the Inspector General of Police has been apprised in due course. Please to acknowledge receipt hereof.

I have, &amp;c.,

W. E. PLUNKETT,

Under Secretary.

The Bench of Magistrates,

## MR. G. H. REID'S "ESSAY ON THE MOTHER COLONY OF THE AUSTRALIAS."

## No. 1.

Mr. G. H. Reid to The Colonial Secretary.

Sir,

Sydney, 15 March, 1876.

After considerable trouble and personal inquiry, and with the assistance of many kind authorities, I have prepared "An Account of the Progress and Resources of New South Wales," which would form a pamphlet of less than 80 pages. Too long for general distribution, it would, I believe, turn out to be a valuable work of reference, that might be presented to public men, editors of the Press, and libraries in Great Britain and the United States, with advantage to the Colony. Whilst anxious to carry out this proposal, I have not the means to do so without the help of the Government Printer.

Under these circumstances I respectfully ask you to authorize Mr. Richards to cause the work to be set up in type (the cost is estimated at about £15). In that event I would feel great pleasure in presenting it to the Government for the distribution alluded to, which, I may be allowed to remark, could be easily effected by the agencies at present in London (Trübner & Coy.) and Philadelphia. If, on the other hand, you should see fit to decline the essay when printed, I engage to defray the expense incurred.

Believe me, Sir, I make this offer from a sincere desire to promote the public interest, in taking advantage of the progress of the past few years, to give to the world a careful, well supported, and comprehensive view of the condition and resources of this country.

I have, &c.,  
G. H. REID.

We beg to recommend Mr. Reid's offer to the favourable consideration of the Government.

W. M. Manning	S. C. Brown
G. Wigram Allen	Richard Driver
Saul Samuel	Micl. Fitzpatrick
J. Smith	John Macintosh
Jacob L. Montefiore	John Davies
John B. Watt	James Watson
John Hay	Julian E. Salomous
James S. Farnell	R. Jones
Geo. A. Lloyd	M. Metcalfe
John Sutherland	F. H. Dangar.

I have not seen the pamphlet alluded to, and for this as well as for other reasons I cannot join in the foregoing recommendation. I know Mr. Reid however to be a gentleman of literary ability, and I believe him to be quite competent to write an accurate and a valuable account of the Colony.

HENRY PARKES,  
17 Mar., /76.

Submitted, 20/3/76. Consult.—Cannot approve.—JOHN R., 18/4/76. Mr. Reid, 19 Ap., 1876.  
The Under Secretary for Finance and Trade.—H.H., B.C., 17/8/77.

My dear Halloran,

30 March.

Having been out of Sydney, I did not sign Mr. Reid's application to the Colonial Secretary respecting the printing by Government of his pamphlet on N. S. Wales. I am entirely in favour of the solicitation. But what I now write to ask is, that you would kindly move Mr. Robertson to give his decision if possible at an early date, Mr. Reid informing me that such would be of great value to him.

I know how much Mr. Robertson is occupied with far more important matters, and therefore I write to you only, knowing that you will take exclusively a convenient moment for making the request.

Yours, &c.,  
ALFRED STEPHEN.

## No. 2.

Minute of The Colonial Treasurer.

SUBJECT:—Printing of Mr. Reid's pamphlet on the Colony.

The Treasury, New South Wales, Sydney, 13 April, 1876.

PERMISSION is given for the setting up of a pamphlet upon the Colony, by Mr. G. H. Reid, at the Government Printing Office, on the condition that if in the opinion of the Treasurer, or such person as he may appoint, it is not of sufficient value to justify its free publication, the expense shall be recouped by Mr. Reid.

A.S.,  
13/4/76.

The Government Printer, B.C., 18 April, 1876.—J.T., for U.S.

## No. 3.

## Memorandum by Mr. G. H. Reid.

DISTRIBUTION of Mr. Reid's work on New South Wales.

To leading Newspapers, Reviewers, Libraries, Emigration Societies, Financiers, and Public Men in Europe and America.	
In the United Kingdom, through Trübner & Co. ....	1,500 copies
Agent General ... ..	500 "
In the United States, through the Executive Commissioner for N. S. Wales, at Philadelphia, assisted by Trübner & Co., New York ... ..	1,000 "
On the Continent, through Trübner & Co., London ... ..	500 "
Intercolonial, through Sydney Printing Office ... ..	250 "
New South Wales, through Sydney Printing Office (Schools of Art, Newspapers, Members of Parliament, &c.) ... ..	500 "
For stock ... ..	450 "
Author's copies,—for distribution by author ... ..	300 "
	5,000 "
Total edition... ..	5,000 "

The expense of printing off the edition, as per sample, would be about £137 10s.

It is proposed to add a skeleton map of the Colony, and a frontispiece giving view of the Sydney University.

The foregoing suggestions are the result of a careful consultation with the Acting Government Printer, who suggests and recommends with me, that as it is intended to present the book to public and press libraries to a large extent, it is very desirable that a portion of the edition—say 2,000 copies—be printed off on good paper and be inexpensively bound in cloth covers.

G. H. REID,  
Sydney, 21 September, 1876.

I approve of this, with exception that 1,000 copies only be bound as proposed.—A.S., 21/9/76.  
The Government Printer.—G.E., 22/9/76, B.C.

## No. 4.

## The Acting Government Printer to Messrs. Trübner &amp; Co., London.

Gentlemen, Government Printing Office, Sydney, 28 October, 1876.

I have the honor to hand you enclosed herewith bill of lading for four cases of books to be forwarded by the outgoing Suez Mail to your address.

The cases contain 196 copies bound in cloth, and 1,250 copies in pamphlet form, of an "Essay on New South Wales, the Mother Colony of the Australias, by G. H. Reid, author of Five Free Trade Essays, and Honorary Member of the Cobden Club," which has been published by authority of the Government of this Colony for a special distribution amongst leading newspapers, reviews, magazines, periodicals, libraries, institutions, and public men in Great Britain and Ireland, on the Continent, and in the United States. The copies for America will go forward to your New York house direct by next San Francisco Mail.

The distribution on the Continent need not be very extensive; but the English Consuls at the principal ports might be furnished with a copy.

By the next Suez Mail a further issue of 354 bound copies and 200 pamphlet copies will be sent to you, making in all 2,000 copies. I may mention, that 500 copies will be sent, in addition, to the Agent General for circulation amongst bankers, capitalists, financiers, and prominent men of that class.

All the bound copies sent by this opportunity are intended for the British Press and literary men. The intention is that the Press copies should be distributed at once.

When these run out in that service recourse can be had to the pamphlet copies.

Please furnish, as far as possible, a list of the distribution, and also copies of such notices of the work as may appear.

Upon receipt of your memorandum of expenses incurred, the amount will be remitted.

I have, &c.,  
CHARLES POTTER,  
Acting Government Printer.

## No. 5.

## The Acting Government Printer to Messrs. Trübner &amp; Co., New York.

Gentlemen, Government Printing Office, Sydney, 17 November, 1876.

By the R.M. Steamer "Zealandia" which leaves to-day, I have shipped to Messrs. Parrott and Company, San Francisco, four cases addressed to you, containing 249 bound copies and 750 copies in wrappers, of an "Essay on New South Wales, the Mother Colony of the Australias, by G. H. Reid, author of Five Free Trade Essays, and Honorary Member of the Cobden Club."

The Government has approved of your being entrusted with the free distribution of the book to editors of leading newspapers, reviews, libraries, clubs, societies, and leading public men in the United States and Canada; and upon receipt of a memorandum of expenses incurred the amount will be remitted to you.

It is very desirable that you should forward copies of any notices of the book that may appear, as these would tend to show the good the circulation has done, and to encourage similar undertakings in the future.

I have, &c.,  
CHARLES POTTER,  
Acting Government Printer.

## No. 6.

M. Petit Jean to The Colonial Treasurer.

*(Translation.)*

Monsieur Le Ministre,

Geneva, 25 November, 1876.

I read in several papers that your Excellency proposed to spend in 1877 a sum of £100,000 in bringing a large number of colonists to Australia.

On this matter I take the liberty to address you, because from the contact of ideas rises the spark which draws from its birth fruitful operations. Allow me to explain: Hitherto the means employed to promote colonization have excited the hostility of the Governments of Europe instead of encouragement, because the emigrants on their arrival are often embarrassed themselves as well as becoming a burden to the colony they come to inhabit. This is mainly due to their ignorance of the manners, the climate, the quality of the land which they come to cultivate.

Would it not be more advantageous for all parties interested to alter a mode of action proved to have been both defective and useless—by the establishment in Europe of a central Australian Agency, whose business should be to make known the riches to be drawn from the soil of Australia by means of a permanent exhibition of its products. This exhibition agency, completed by the addition of a banking establishment and a journal disseminated profusely throughout the whole country, and putting forth prominently plans and maps showing the forests, mountains, lakes, watercourses, and frontage of lands offered for sale in lots.

The prospectus should afford the most detailed information on—

The quality of the land.

The seeds and fruit-bearing trees which can be cultivated to the best advantage.

The animals which can be most readily acclimatized.

To put forth on the other hand the difficulties the emigrant will have to overcome, as well as the means, if not to overcome them entirely, at least to obviate them or enable him to overcome them.

In all classes of society, rich or poor, having thus a thorough knowledge of the land they require, would, even before purchasing any, be able to calculate what machinery and tools they would have to provide themselves with, what number of hands, and what capital would be required to bring to a profitable issue the intended speculation.

Thus the purchaser knows the property even before he sees it. During the voyage out he can pore over his plans, his combinations, and when he ultimately takes possession everything is already organized, having in advance settled in his mind the best course to adopt in order to create an income promptly.

By this scheme Australia, instead of receiving ordinary emigrants, who remain for years unproductive, would receive back at once, in the capital produced, and in moral capital, the money spent in bringing out intelligent and practical citizens, capable of entering at once upon the paths of progress, in which your country is travelling with gigantic strides.

Instead of £100,000, one-fourth of that amount (£25,000) would suffice to establish in Geneva, one of the principal cities in Switzerland—a neutral country—Geneva situated in the midst of the large cities of European population,—the agency of an Australian Exhibition, to which could be annexed the temporary or permanent agency, and which could be utilized for the sale of land and colonization.

The Exhibition, the credits open by the Bank, and the universal publicity given by the journal, would originate a demand, ever increasing, for the purchase of your land, or a demand for information having for its object the directing towards the Australian Colonies various industries, more particularly those which require large space, and in the development of which human activity and intelligence can be most profitably utilized.

I hope that your Excellency, having fully considered the scheme, will favor me with a reply, authorising me to furnish him with the name of my bankers, and I beg to remain.

I append to this letter my pamphlet on the Exhibition, upon which I beg to call the attention of your Excellency and also the copy of our Journal, which is as yet in an embryo state.

## MINUTE OF THE COLONIAL TREASURER.

THIS to be translated and copy forwarded to the Colonial Secretary, with the view of my hon. colleague considering whether it would be worth while causing an abridged translation of the recently published Essay by G. H. Reid to be made and circulated on the Continent. Translation might be in French and German.—A.S., 2/2/77.

## No. 7.

The Acting Government Printer to Messrs. Trübner &amp; Co.

Gentlemen,

Government Printing Office, Sydney, 8 December, 1876.

I beg to advise the transmission by steamer "Whampoa," leaving here to-morrow, of 306 copies of Reid's Essay on New South Wales, bound, and 200 copies in wrappers, in three cases, numbered from 1 to 3 in O, and consigned to you; and I beg to hand you herewith b/l for same.

You will please apply to the Agent General of the Colony in London for twenty-one additional copies bound, and for fifty copies of Rae's Railway Report, which are in cases consigned to him.

I have, &amp;c.,

CHARLES POTTER,

Acting Government Printer.

## No. 8.

The Under Secretary for Finance and Trade to the Agent General for New South Wales, London.

Original, per s.s. "Whampoa."

Sir,

The Treasury, New South Wales, Sydney, 9 December, 1876.

I have the honor, by desire of the Colonial Treasurer, to advise you of the shipment of three cases, per s.s. "Whampoa," containing 100 bound and 400 wrapper copies of an essay on this Colony by Mr. G. H. Reid, published at the Government Printing Office for a special distribution abroad.

This shipment is made to you for circulation of the books amongst leading bankers, capitalists, financiers, and mercantile men, including Chambers of Commerce; and Messrs. Trübner and Company, to whom the general literary distribution has been entrusted, have been requested to acquaint you with what they have done.

The cases are included in a bill of lading, which will be forwarded to you from the Department of the Colonial Secretary.

I have, &c.,

JAMES THOMSON,

For the Under Secretary.

## No. 9.

Messrs. Trübner & Co. to The Acting Government Printer.

Sir,

57 and 59, Ludgate Hill, London, E.C., 18 January, 1877.

We have the honor to acknowledge the receipt of your letter of the 28th October (reaching us Dec. 29), with accompanying bill of lading of four cases of books, and instructions as to the disposal of the same.

The boxes arrived a few days ago, but on opening them we found a slight discrepancy in the number of pamphlets. Instead of 196 copies in cloth and 1,250 in paper of Mr. G. H. Reid's "Essay on New South Wales" we found only 195 in cloth and 1,245 in paper.

We have already distributed copies among the leading members of the English, Scotch, and Irish Press. Those for the Continental Press, and for the Libraries, Institutions, and public men of this country and Europe generally will be prepared and despatched as quickly as possible. By next mail we hope to advise you that all have been distributed and send you lists of the same.

To the editor of each newspaper, periodical, and magazine, we have made a special request that copies of any notice of the "essay" may be sent to us, and we will take care that all we can possibly obtain are sent to you.

The copies advised by you as coming by the "next Suez mail" have not yet reached us.

Your letters of the 16th and 17th November, addressed to "Trübner & Co., New York," have been forwarded to us by the postal authorities of that city.

We have several agents in that city intimately connected with our business but have no house actually trading under our own name. We have, therefore, sent copies of both your letters to Messrs. Wiley & Son (the house most identified with us), with instructions to follow out your wishes as if they came from ourselves, and report to us as quickly as possible. We have told them to enquire of and obtain from the agents in New York of Messrs. Parrott & Co., of San Francisco, the four cases shipped to our name, so as to save as much inconvenience and delay as possible. In fact we expect that the boxes in the natural course of events will have found their way into Messrs. Wiley & Co.'s hands. They are well known in all the literary world of America as being our special agents.

We have, &c.,

TRÜBNER & CO.

P.S.—The copy enclosed for the Agent General was forwarded to him directly the cases reached us.

## No. 10.

Messrs. Trübner & Co. to The Acting Government Printer.

Sir,

57 and 59, Ludgate Hill, London, E.C., 16 February, 1877.

We beg to acknowledge the receipt of your letter of the 8th December, advising us of despatch of three cases per the "Whampoa," and enclosing b. l. of same.

The "Whampoa" has not yet arrived, but will doubtless before long.

The copies both of Mr. Reid's work and "Rae's Railway Report," advised as coming through the Agent General, have not reached England yet, but will be delivered to us by him as soon as they arrive.

In the distribution of Mr. Reid's essay we have arranged with the Agent General that we shall not send, but that he will send copies to the "leading bankers, capitalists, financiers, and mercantile men, including Chambers of Commerce."

We have sent you partly by Southampton and one or two, *via* Brindisi, copies of the following papers containing notices of the work:—

Daily Telegraph, Feb. 8.  
Morning Post, Feb. 13.  
Scotsman, Feb. 15.  
United Service Gazette, Jan. 20.  
Mark Lane Express, Jan. 29.  
Railway News, Jan. 27.  
Sunday Times, Feb. 1.  
Geographical Magazine, Feb. 1.  
Liverpool Mercury, Feb. 8.  
Exeter Western Times, Jan. 30.  
Aberdeen Free Press, Jan. 30.  
Blackburn Times, Jan. 27.  
Leeds Mercury, Jan. 31.  
Irish Times, Jan. 29.  
Staffordshire Advertiser, Jan. 27.

Newcastle Chronicle, Jan. 25.  
Cambridge Express, Jan. 27.  
Walsall Free Press, Jan. 27.  
Northampton Mercury, Jan. 27.  
Norfolk News, Jan. 27.  
Norwich Weekly Press, Jan. 27.  
Hereford Times, Jan. 27.  
Midland Counties Herald, Jan. 25.  
Shrewsbury Chronicle, Jan. 26.  
Newry Telegraph, Feb. 1.  
Wakefield Express, Feb. 3.  
Salford Weekly News, Feb. 3.  
Merthyr Express, Feb. 3.  
Northern Whig, Feb. 1.  
Armagh Guardian, Feb. 9.

We

We expect others to arrive from day to day, and shall duly forward them.  
We are proceeding with the general distribution as quickly as possible, and if the cases per the "Whamboa" arrive soon, we shall hope to finish before the next mail, and send you a full report.

We have, &c.,  
TRÜBNER & CO.

## No. 11.

Messrs. Trübner &amp; Co. to The Acting Government Printer.

Sir, 57 and 59, Ludgate Hill, London, E.C., 16 March, 1877.  
We have the honor to inform you that since the date of our last letter (Feb. 16), the "Whamboa" has arrived, and we have received the three cases. On opening them, however, we found the contents to be somewhat different from your advice. We counted only

219 Reid's essay cloth.  
199 do paper.  
66 addressed parcels.

We have also received from the Agency General the  
21 Reid's essay, cloth,  
50 Railways Report, Rae,  
advised in your letter of the 8th December.

Since our last letter we have sent a copy of Mr. Reid's essay to every Member of the House of Commons, and a large proportion of the Peers.

We have news from our agents in New York to the effect that they have received the cases sent there, and are proceeding quickly with the distribution according to your instructions.

We have collected a quantity of periodicals and papers containing notices of the work, but they are too heavy to send *via* Brindisi. We therefore propose to send them to you enclosed in a box, which we shall be sending by the next mail steamer to the Sydney Free Public Library.

We hope to be able to send a final report by next mail.

We have, &c.,  
TRÜBNER & CO.

P.S.—We have delivered all the addressed parcels sent us in the cases per the "Whamboa."

## No. 12.

M. Petit Jean to The Colonial Treasurer, Sydney.

[Translation.]

Sir, Geneva, 20 March, 1877.  
I have received with pleasure the book "An Essay on New South Wales, the Mother Colony of the Australias," which you have been good enough to forward me. By this mail I wrote to Messrs. Trübner & Co., in order to have the work published in Switzerland.

Permit me to recall to your recollection the proposal which I submitted to your Excellency, that of establishing an agency in Switzerland for advertising the Colonies of Australia; and also of holding an exhibition of the products of your territory, at present so wealthy and to be still more so in the future.

Hoping that you will take this combined scheme into your earnest consideration.

I remain your humble servant,  
PETIT JEAN.

Not deemed necessary.—W.R.P., 28/6/77.

## No. 13.

The Acting Government Printer to The Under Secretary for Finance and Trade.

Sir, Government Printing Office, Sydney, 1 June, 1877.  
I have the honor to enclose herewith a letter received from Messrs. Trübner & Co., London, by the last mail, and would beg to call your attention more particularly to that portion of it referring to the proposed translation of Mr. Reid's work into German, for free distribution in Germany.

I have, &c.,  
CHARLES POTTER,  
Acting Government Printer.

[Enclosure.]

Trübner &amp; Co., London, to The Acting Government Printer.

Sir, 57 & 59, Ludgate Hill, London, E.C., 13 April, 1877.  
Confirming our letter of the 16th ult., we have now the honor to inform you that we have forwarded to you (in a box which we despatched to the Free Public Library, Sydney, on the 5th inst., per the P. & O. s.s. "Bokhara") a parcel containing various newspapers as per list on the other side. All the papers contain notices of Mr. Reid's work of more or less length.

Further notices are still coming in and we shall have more to send you by next mail.

We have heard again from New York to the effect that the distribution there has nearly been finished, and we are promised lists with note of charges, &c., by an early mail.

An idea has struck us which may or may not be worth your consideration.

There are always a large quantity of working people in Germany desirous of emigrating, and since many of their friends are returning from America, dissatisfied with that country, they are in doubt where to go to. Would it not be worth while to have Mr. Reid's work translated into German and largely distributed gratis, in Germany. It might be sufficient to produce  
in

in perhaps a less expensive style than its present shape. Probably the translation could be done in Sydney, or if not we could undertake to get it done here and cheaply printed, and we have no doubt we should be able to make proper arrangements for its distribution in Germany.

Substantially our own distribution here is finished, but we have not been able to copy out the lists in time for this mail. We hope to send by next. We have, &c.,

TRÜBNER & CO.

First list of Papers attached.—C.P.

List of papers containing notices of Mr. Reid's work, forwarded to Chas. Potter, Esq., 5 April, 1877.

#### No. 14.

Mr. G. H. Reid to The Under Secretary for Finance and Trade.

Sir,

Sydney, 4 June, 1877.

I have the honor to submit for the information of the Government, through the Honorable the Colonial Treasurer, a book containing all the notices of my essay on New South Wales, published from the Government Printing Office, for distribution abroad, which have reached me up to this time. The English publishers, Messrs. Trübner & Co., advise that notices in the Home papers continue to come in. The New York agents report that the American distribution was at the date of the letter nearly completed. The notices in the American press have not yet arrived.

Messrs. Trübner & Co. report that full particulars of the British and American distribution would probably be furnished by next mail.

It is with great pleasure I respectfully invite attention to the remarkable success which has attended the publication, as evidenced by the Press reviews, of which I submit all that have reached me. The prominent manner in which the British Press have taken up the book, and the distinction they unanimously accord the "Mother Colony of the Australias" must I am sure be satisfactory to the Government and gratifying to the public.

I have, &c.,

G. H. REID.

Seen by Minister, 9/6/77.

(200 Press Notices enclosed.)

#### No. 15.

The Acting Government Printer to Messrs. Trübner & Co., London.

Gentlemen,

Government Printing Office, Sydney, 31 May, 1877.

I beg to acknowledge the receipt of your letter of the 18th ultimo, forwarding certain newspapers containing notices of Mr. Reid's work.

Your suggestion as to the translation of the work into German, for free distribution in Germany, will be at once brought under the notice of the Government of this Colony.

I have, &c.,

CHARLES POTTER,

Acting Government Printer.

#### No. 16.

The Acting Government Printer to Messrs. Trübner & Co., London.

Gentlemen,

Government Printing Office, Sydney, 27 June, 1877.

With reference to the distribution by you in Europe and America of Mr. Reid's essay on New South Wales, pursuant to your instructions as agents for this Department in London and New York, I do myself the honor to acknowledge the receipt, per P. & O. Co.'s mail, on the 25th instant, of your communication of the 11th May last, detailing what you had done in relation to the book, and submitting the following accounts up to that date, viz. :—

- (1.) Account of expenditure, amounting to £104 0s. 4d.
- (2.) Summary of receipt and distribution.
- (3.) Detailed list of distribution in classes.

And the parcel mentioned in your letter, containing prints having Press notices of the book; for which I beg to thank you, is also to hand.

I have this day submitted your communication and accounts for the information and approval of the Honorable the Colonial Treasurer, and in doing so could not forbear adverting to the very excellent and comprehensive distribution of the book which you have effected, and the highly satisfactory way in which you have so far executed the commission.

I have, &c.,

CHARLES POTTER,

Acting Government Printer.

No. 17.

## No. 17.

Messrs. Trübner &amp; Co., London, to The Acting Government Printer.

Sir,

57 &amp; 59, Ludgate Hill, London E.C., 11 May, 1877.

Confirming our previous letters in reference to the distribution in this country of Mr. Reid's essay on New South Wales, we have now the honor to hand you our account for the same, and for our agent's expenses in America.

We also beg to hand you a summary of the distribution of those which reached us, with detailed lists of the various classes amongst whom they have been circulated.

Having had inquiries from people desirous of purchasing it, we have placed some on sale at our counters, fixing 1s. as the publication price, with the usual allowance to the trade. You will be pleased to hear that it is asked for every day. We thought it best to fix a low price for it in order to ensure its not being obtained by any except those who really desired information on the subject. We trust this course will meet with your approbation.

Attached you will find a list of papers containing notices which we have sent to you, in the same way as last month (through the kindness of the Sydney Free Library).

We have, &amp;c.,

pro TRÜBNER & CO.,  
J. H. EDWARDS.

## No. 18.

The Acting Government Printer to Messrs. Trübner &amp; Co.

Gentlemen,

Government Printing Office, Sydney, 6 July, 1877.

I beg to inform you that the Honorable the Colonial Treasurer has intimated to me that in his view it seems scarcely desirable to adopt the suggestion contained in your letter of the 13th April last, as to translating into German Mr. Reid's essay on New South Wales.

But I have to thank you, nevertheless, for the interest in the welfare of the Colony manifested by you in proposing the translation.

I have, &amp;c.,

CHARLES POTTER,

Acting Government Printer.

## No. 19.

The Under Secretary for Finance and Trade to Messrs. Trübner &amp; Co.

Gentlemen,

The Treasury, New South Wales, Sydney, 6 July, 1877.

The Acting Government Printer has forwarded to this office your letter of the 11th May last, enclosing statements showing the distribution made by you of the copies of Mr. Reid's essay on New South Wales, sent by this Government to London and New York, and enclosing also a memorandum of

First. a/ 60,000. the expenses incurred, amounting to £104 Os. 4d.

I have now the pleasure of handing you herewith a bill of exchange in your favour for the amount; <sup>Three days sight.</sup>  
and I am directed to convey to your firm the thanks of the Colonial Treasurer for the successful manner  
in which the work has been distributed.

P.S.—Please send an acknowledgment.

I have, &c.,  
G. EAGAR.

No. 20.

Trübner & Co. to The Acting Government Printer.

Sir,

57 & 59 Ludgate Hill, London, E.C., 5 July, 1877.

We have the honor to inform you that we have forwarded to you a parcel of newspapers enclosed in a box, which we shipped on the 28th ultimo, per the mail steamer "Mongolia" to the Sydney Free Public Library.

On the other side we append a list of the newspapers, each containing a notice of Mr. Reid's Essay on New South Wales.

We have, &c.,  
TRÜBNER & CO.

Northern Ensign, May 24.  
Hawick Advertiser, May 26.  
Dumbarton Herald, May 24.  
Dumfries Journal, June 2.  
Stirling Journal, June 8.  
Carlisle Gazette, May 26.  
Newark Advertiser, June 13.  
Banffshire Journal, June 12.

Falkirk Herald, June 14.  
Kirkcudbright Advertiser, June 15.  
Herapath's Railway Journal, Jan. 27.  
Grocer, June 2.  
Furniture Gazette, June 9.  
Bookseller, May 2.  
Scholastic Register, June 1.  
Tanners Journal, June 1.

Perhaps these documents may now be returned to the Acting Government Printer.—F.K., 30/10/77.  
The Acting Government Printer.—B.C., G.E.

No. 21.

Trübner & Co. to The Acting Government Printer.

Sir,

57 & 59 Ludgate Hill, London, E.C., 5 July, 1877.

We have the honor to hand you herewith the following documents:—

- A. A copy of letter from our agents (Messrs. Wiley & Son) in New York, in reply to our request for a list of persons to whom copies of Mr. Reid's Essay had been sent to in America, and in reference to the subject of the recovery of the American Import Duty which they had been compelled to pay.
- B. Copy of the "partial" list referred to by Messrs. Wiley & Son.
- C. Copy of the reply of the Treasury Department at Washington to Messrs. Wiley & Son's application for the return of duty paid.
- D. Copy of the Treasury Report to their own collector at New York.

As a consequence of the refusal of the American Government to refund the duty we are compelled to send you the enclosed additional account of charges.

We have, &c.,  
TRÜBNER & CO.

London, 6 July, 1877.

The Government Printing Office, Sydney, New South Wales, to Trübner & Co., Ludgate Hill, E.C.

		£	s.	d.
Feb. 2...	Duties paid on four cases of books, ex "Zealandia," \$ 53.14 gold.....	11	1	5
	Warehouse charges at San Francisco, general order charges, agent's commission, &c.....	3	19	2
		£15	0	7

A.

COPY of letter from Messrs. Wiley & Son to Messrs. Trübner & Co., dated New York, 21 May, 1877:—

"We enclose a *partial* list of places. Some were distributed to professional men in this country. We have sent you many acknowledgments,\* but the papers, although requested, sent very few copies of announcements. We have seen the notices from time to time, and have had inquiries and letters referring to such notices.

"In regard to the duties, as we advised you, they had to be paid, *under protest*, and we have the matter of obtaining a rebate in hand. The duties came to about \$90 gold. We shall, if foiled in recovering the whole, at least make oath that a certain number were for Public Libraries, and feel sure we can obtain that amount. We have made no charge of the duties thus far, nor will we till the matter is decided."

\* These we shall send you by next mail.—T. & Co.

Copy of the Reply of the Treasury Department to Messrs. Wiley &amp; Son.

Gentlemen,  
I am directed by the Treasury to acknowledge the receipt of your appeal, No. 3,600E, dated 5th March, 1877, from the decision of the Collector of the Port of New York, assessing duty on certain books imported by you from New Zealand\*, and intended for distribution among the Public Libraries and Institutions of the United States; and to say that, on full consideration of the case, the Department has affirmed the decision of the said Collector, who has been advised accordingly, and to whom you are referred for particulars.

Very respectfully,

T. B. SANDERS,

for Acting Chief Clerk.

\* Error for "New South Wales."

(D.)

The Treasury, Washington, to The Collector at New York.

Sir,  
The Department is in receipt of your letter of the 23rd instant, respecting an appeal of Messrs. Wiley & Son, from your decision refusing the free entry of certain books imported by them from New Zealand, and which they allege are intended for distribution in the United States.

The laws exempt from duty books specially imported, not more than two copies in any one invoice, in good faith, for the use of any Society incorporated or established for philosophical, literary, or religious purposes, or for the encouragement of the fine arts, or for the use or by the order of any college, academy, school, or seminary of learning in the United States, but it does not appear that the books in question were so specially imported for any such incorporation for the uses therein mentioned.

Your decision therefore is hereby affirmed.

(By order)

Respectfully,

R. M'CROW,

Assist. Secretary of Treasury.

No. 22.

Messrs. Trübner &amp; Co. to The Acting Government Printer.

Sir,

57 &amp; 59, Ludgate Hill, London, E.C., 28 September, 1877.

We have the honor to acknowledge the receipt of your letter of the 6th July, informing us of the decision of the Colonial Treasurer in reference to the proposed translation of Mr. Reid's work.

In a parcel enclosed in our shipment to the Sydney Free Library last week, *per* "Poonah," we beg to hand you a few more papers containing notices of Mr. Reid's essay.

Labour News, July 14.

British Mercantile Gazette, April 15.

Builder, September 15.

Engineer, August 31.

Farmer's Herald, September.

In the same parcel we have also enclosed a quantity of acknowledgments that have reached us from time to time. Many people and Institutions do not think it necessary to acknowledge the receipt in such cases.

We have, &amp;c.,

TRÜBNER &amp; CO.

Forwarded to the Under Secretary for Finance and Trade, with parcel containing papers referred to.—C. POTTER, B.C., 19 Nov., /77. Seen.—G.E., 26/11/77.

1877-8.

---

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

---

MR. WILLIAM CHAMBERLAIN.

(PETITION OF.)

---

*Ordered by the Legislative Assembly to be printed, 17 April, 1878.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of William Chamberlain, of Hobart Town, in the Colony of Tasmania  
master mariner,—

RESPECTFULLY SHOWETH :—

That William Chamberlain, my late grandfather, was entitled and held, by a letter of promise, a grant of fifteen perches of land, situate in Pitt-street, Sydney, Colony of New South Wales, being No. 20 of sec. 31.

That my said grandfather died suddenly on or about the year 1824, intestate, leaving two sons and two daughters, lawful issue. His eldest son, my father, being heir-at-law to the said land, was then a resident of Hobart Town, a master mariner, the eldest daughter being resident in Sydney, and married to John Jobbins.

It is believed that Jobbins, through his wife, obtained unlawful possession of the said letter of promise of grant; and the said Jobbins, secretly and by fraud, sought and obtained the grant of land in his own favor on the 7th March, 1839. And your Petitioner humbly prays your Honorable House will consider these premises, and deal in the matter according to justice and right.

And your Petitioner, as in duty bound, will ever pray.

WILLIAM CHAMBERLAIN.

Sydney, 16th April, 1878.

---

1877-8.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

---

MRS. ISABELLA BALDOCK.

(LETTERS, REPORTS, &c.)

---

*Ordered by the Legislative Assembly to be printed, 30 January, 1878.*

---

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 22nd January, 1878, That there be laid upon the Table of this House,—

“Copies of all Letters, Statements, Reports, and Documents relating to a  
 “claim made on behalf of Mrs. Isabella Baldock for a recognition of the  
 “bravery displayed by her on the occasion of the residence of Mr.  
 “Keightley being attacked by Bushrangers in October, 1863.”

(*Mr. Coonan, on behalf of Mr. Driver.*)

MRS. ISABELLA BALDOCK.

No. 1.

The Hon. J. Bowie Wilson to The Colonial Secretary.

My Dear Robertson, 227, George-street, Sydney, 7 February, 1876.  
 Allow me to draw your attention to the claims of Mrs. Baldock, who was Mr. Keightley's servant when his house was attacked by the bushrangers, to some recognition at the hands of the Government for the courage and bravery displayed by her on this occasion.

If you referred the matter to the Inspector General I am sure he would so report as to leave no doubt but that it was owing to Mrs. Baldock—she alone—that Keightley was saved.

I am, &c.,  
 J. BOWIE WILSON.

No. 2.

The Inspector General of Police to The Principal Under Secretary.

Inspector General's Office, Sydney, 7 February, 1876.

THE Hon. the Colonial Secretary verbally desired me to make some inquiry into this matter, and when recently at Bathurst I questioned Mrs. Baldock as to the circumstances. From all I can learn she behaved in a very courageous manner, but her statement was disparaging of Mr. Keightley, who she alleged never shot the bushranger, Burke, at all. She also stated that she would not accept anything but a gold medal.

Perhaps it would be as well that it should be suggested to Mrs. Baldock (through Mr. Wilson) that she should herself make a written representation of the circumstances, if she considers that she has a claim to a medal.

EDMUND FOSBERY.

No. 3.

The Principal Under Secretary to The Hon. J. Bowie Wilson.

Sir, Colonial Secretary's Office, Sydney, 14 February, 1876.

In acknowledging the receipt of your letter of the 7th instant, calling attention to Mrs. Baldock's claim to recognition at the hands of the Government for the courage displayed by her when Mr. Keightley's house was attacked by bushrangers, I am directed by the Colonial Secretary to suggest that Mrs. Baldock be invited to make for herself a written representation of the circumstances on which she bases her claim to such recognition.

I have, &c.,  
 HENRY HALLORAN.

No. 4.

The Hon. J. Bowie Wilson to The Colonial Secretary.

Sir, 227, George-street, Sydney, 29 February, 1876.

In accordance with the request contained in the letter of the Principal Under Secretary, of the 14th instant, for a written representation by Mrs. Baldock of the circumstances connected with the attack by armed bushrangers on the house occupied by Mr. Gold Commissioner Keightley, in October, 1863, I have now the honor to transmit such statement by Mrs. Baldock. I feel convinced that its perusal will place her claim for some recognition at the hands of the Government in a favorable light.

I have, &c.,  
 J. BOWIE WILSON.

[Enclosure to No. 4.]

STATEMENT of Mrs. W. S. Baldock, respecting the attack made by armed bushrangers on the premises of Mr. Wm. Bowman, situate at Dunn's Plains, the occupier at the time of the said attack being Mr. Hy. M. Keightley, Gold Commissioner. ON the evening of October 24th, 1863, I saw Mrs. Keightley run across the yard into the dwelling-house, crying out as she went, "The bushrangers have come at last"; Mr. Keightley immediately bolted the back door, after which I saw Burke firing his revolver; thinking that I might be shot I stooped under the kitchen-dresser until Burke had ceased firing; I then went into a bed-room occupied by the nurse, looked through the window and saw another bushranger, Vane, with Robert M'Cullum, an employé of Mr. Keightley; Vane said "Open the door"; I replied that the house was open, and that he could come in if he thought proper; Vane again shouted "I tell you to open the door"; I made him the same reply as before; I then went into the verandah, where I saw another of the gang—Gilbert; I begged him not to hurt anyone; while I was talking to Gilbert I heard some one calling to Mr. Keightley, telling him to come down or the house should be set on fire, but that if he came down he should not be hurt; Mr. Keightley exclaimed "honour"; one of the bushrangers said "honour"; Mr. Keightley, accompanied by Dr. Peechy, who all the time had been with him in the loft over the house, then came down from the roof into the garden; Hall immediately rushed towards them, exclaiming "One of my mates has been shot," and, addressing Mr. Keightley, said "I will blow your bloody brains out"; I instantly jumped between Mr. Keightley and Hall, saying to the latter as I threw up my arms before him, "for God's sake don't hurt him; if you have no pity for him, consider Mrs. Keightley and the dear baby"; Hall then lowered his revolver; Vane then came into the garden; he rushed up to Dr. Peechy and knocked him down; I said to Vane "Don't hurt the poor little doctor, I'm sure he never hurt you"; Vane replied "The

"The doctor!—then which is Keightley?" the latter gentleman immediately said "I am Keightley"; Vane shouted "You bloody wretch, you have shot my mate, and I'll blow your bloody brains out"; Mr. Keightley answered "On my soul, men, I did not mean to do it"; Vane replied "You're a bloody liar—if you did not mean to shoot us what did you fire for?" Hall then said "You did not do it; I did it by accident when firing at you"; I then went out of the garden, thinking I might get some one to go to Rockley for the troopers; when I got outside the gate I saw a man lying on the ground, and another standing by looking at him; the latter said to me "Look what the bloody wretch has done"; I asked him why he did not fetch the doctor to him; he replied "The doctor—where am I to get a doctor?" I told him that the gentleman who had been knocked down in the garden was the doctor; the man went into the garden and I proceeded towards the house, or rather hut, on the hill, to try and get some of the men to go for the troopers; they said it would be useless for anyone to attempt doing so, as there was a man watching from behind a tree; I remained on the hill near the hut until Mrs. Keightley and Ben Hall came up; I asked her where the baby was, and should I fetch it to her; she replied "do so"; I returned towards the house, and when I got to the yard I saw Mr. Keightley and Gilbert sitting close to the well; some one ordered me to get a pillow and place it under the head of the wounded man, Burke; Mr. Keightley said "Yes, do, Isabella, get a pillow and put it under the poor fellow's head"; after I had obeyed this command I went into the house and got the baby, by which time Mrs. Keightley had returned; she wrapped the infant in a shawl; I took it into the yard, and asked Gilbert to allow me to go away with it; he said "Yes, you can go, but don't go away from the huts, for if you do we'll soon bring you back again"; I remained at the hut with Mrs. McDonald (wife of Mr. Bowman's overseer) until I was told that Mrs. Keightley wanted me; I went immediately, taking the baby with me; Mrs. Keightley then informed me that she was going to Bathurst to procure £500, with which to ransom her husband; I assisted her in making preparations for the journey; she did not return to Dunn's Plains; Mr. Rotton and Dr. Peechy returned on Sunday morning with the money; my husband, Wm. S. Baldock, was away at Rockley for letters, &c., until late in the evening; when the bushrangers were leaving Dunn's Plains, Ben Hall said to him, "Had it not been for your wife I should certainly have shot Keightley."

I wish it to be distinctly understood that I have no notion of claiming any reward for simply doing my duty, and acting as I trust most other women would have done under the circumstances. At one time a subscription list was opened, headed by the Reverend Roman Catholic Clergyman to whom Vane surrendered himself, and who, from his position as confessor to that person, was more likely than any other party not immediately concerned in the transaction to know the truth of the matter. My husband refused to have the list circulated.

ISABELLA BALDOCK.

Sir, Colonial Secretary's Office, Sydney, 29 September, 1877.

I am directed by the Colonial Secretary to request that you will favor him with a report upon the enclosed paper, a copy of a letter from the Honorable J. Bowie Wilson, forwarding a statement by Mrs. Isabella Baldock in support of a claim set up on her part to recognition of the courage that she displayed when your house at Dunn's Plains was attacked by bushrangers, in October, 1863. 29 Feb., 1876.

I have, &c.,  
HENRY HALLORAN.

### No. 6.

#### The Police Magistrate, Wellington, to The Principal Under Secretary.

Sir, Court House, Wellington, 31 October, 1877.

I have the honor to acknowledge the receipt of your communication of the 29th September last, having reference to a claim by one Mrs. Isabella Baldock for services rendered in October, 1863, during an attack of bushrangers on myself at Dunn's Plains.

Without entering into all the detail as described in her report, I will briefly state that when I descended from the loft of the house to meet the bushrangers on the understanding that no further violence would be used, I believe Mrs. Baldock did then come into the garden, and that she used in substance the expressions she has stated, and was in the yard for a short time after the pillow had been brought for Burke.

Subsequent to that period she was not present, having been sent by Mrs. Keightley with the baby to Mrs. McDonald's house, some distance away, and did not return until all negotiations had been completed for my release by Mrs. Keightley with the bushrangers alone; she then requiring the baby to take with her to Bathurst, sent for Mrs. Baldock and the child.

I have, &c.,  
HENRY M. KEIGHTLEY, P.M.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## MRS. MARIA CHARLOTTE PLUNKETT.

(PETITION OF.)

*Ordered by the Legislative Assembly to be printed, 14 March, 1878.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of Maria Charlotte Plunkett, of Sydney,—

RESPECTFULLY SHOWETH :—

1. That your Petitioner is the widow of the late Honorable John Hubert Plunkett, who, from the year one thousand eight hundred and thirty-one until the end of the year one thousand eight hundred and thirty-five, held the office of Solicitor General, and from the year one thousand eight hundred and thirty-six, until the passing of the new Constitution Act in the year one thousand eight hundred and fifty-six, held the office of Attorney General of New South Wales.

2. That Mr. Plunkett departed this life on the ninth day of May, one thousand eight hundred and sixty-nine, and after payment of his liabilities your Petitioner found that she was left totally unprovided for.

3. That your Petitioner is in delicate health and in consequence of an injury to her right hand is now almost helpless.

4. That your Petitioner has lately been compelled to sell almost everything she possessed and is now in a very destitute condition.

5. That your Petitioner's husband having rendered faithful public services, and in many cases performed onerous and responsible public duties without remuneration, she respectfully approaches your Honorable House in her great distress, believing that her appeal will not be in vain.

6. That Mr. Plunkett performed the duties of Acting Judge at Norfolk Island, and also in Sydney during the illness of the late Mr. Justice Milford.

7. That for many years Mr. Plunkett as Chairman of the National Board gave his gratuitous services in the cause of public education.

8. That during the years one thousand eight hundred and fifty-seven and a portion of fifty-eight he discharged the duties of President of the Legislative Council without salary, his pension being in abeyance during that period.

9. That in the year one thousand eight hundred and sixty-three he became Vice-President of the Executive Council and Representative of the Government in the Upper House and discharged the duties of these high offices without remuneration.

10. That in the month of August, one thousand eight hundred and sixty-five, at the special request of Sir John Young he accepted office as Attorney General, and represented the Government in the Legislative Council, and continued to discharge the functions of this responsible office until the month of March, one thousand eight hundred and sixty-six. During this period his pension was in abeyance.

Your Petitioner therefore humbly prays that the arduous, important, and in many instances gratuitous public services of her late husband in the interest and welfare of the Colony which he so long and faithfully served, and her own advanced age and distressing position may be taken into consideration, and that such steps may be taken in the premises as may commend themselves under the circumstances to the sympathy of your Honorable House.

And your Petitioner, as in duty bound, will ever pray.

M. C. PLUNKETT.

1877-8.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## OYSTER BEDS.

(REPORT OF INSPECTOR.)

*Ordered by the Legislative Assembly to be printed, 23 January, 1878.*

REPORT of the Inspector of Oyster Beds, dated 6th September, 1877, laid on the Table of the House, in accordance with the reply given by the Minister for Lands to the question asked by Mr. Lucas, M.P.

## The Inspector of Oyster-beds to The Honorable the Minister for Lands.

Sydney, 6 September, 1877.

IN compliance with your instructions to make a general inspection of the oyster beds of Broken Bay and its tributaries, I beg to state most respectfully as follows:—

The Hawkesbury River, a tributary of Broken Bay, is the principal natural oyster-bearing portion, at present under lease to Mr. F. Gibbins. The beds are almost chiefly confined to the fore-shores, and at present in charge of Mr. Lloyd for the lessee, to whom, on my arrival here, I called for the purpose of being shown over the beds; but that gentleman declined doing so, making the excuse that he was too busy and had no time to spare. I may here state that I only asked him to accompany me one day, and that I would make any day convenient within a week or ten days; but he never came, so I had to conclude my inspection without his assistance.

I also inspected Mullet Island, Mooney Mooney Creek, Porter Bay, Cowan Broler Creek, and what is known as the Main River, the whole of which places, with the exception of Mooney Mooney Creek, are worked out, in which creek some still remain, but could be worked out in a month or six weeks by four men in that time; and from my general knowledge and inspection of the place, I am of opinion that this river requires from two to three years rest, and if not closed within a short time will become almost totally devoid of the oyster, as during about nine months of the year I estimate there cannot be less than forty persons, big and little, collecting the oysters for market, and taking them, without any respect to age or size; while there is only one or two persons occasionally employed by the lessee to lay any on the banks, which system, by the way, only amounts to storing, as they are up again and sent to market before coming to maturity, if required—that is, if the price suits. At the same time I estimate, that if placed in its former position by rest, that it would support at least one hundred persons in employment. And wherever I go I hear a general complaint as to the present system of leasing. One gentleman, Mr. Greer, an old resident on the river, told me of a small bay in Broler Creek, where he knew of a small vessel to be loaded in three days by two men with the oysters taken out of it, not more than twenty years ago; whereas, I do not think that one hundred bags, *i.e.*, of three bushels, of a fair-sized marketable oyster could be obtained in the whole of the creek at the present time. The catchers also inform me that where they could get from ten to twelve bushels per day three years ago, they cannot now get more than two to three with much more labour.

I was informed whilst making my inspection that the lessee was on the river, and stayed two days. This, I am well informed, makes his second visit since coming into his possession, in a period of about four years, thus showing that so long as they get supplied with the oysters they do not trouble as to the condition the beds are left in.

Brisbane Water is also a tributary of Broken Bay, situated about three miles north of the Hawkesbury River, and quite a distinct port. I am of opinion it was an error to have included it with the before-mentioned river, it being also claimed by Mr. Gibbins, the lessee of Broken Bay. I made a careful examination of the beds, which are principally confined to the shores; and, so far as I was able to ascertain, there is no person in charge of the river on his behalf.

On Cockle Creek there are large mangrove swamps with good clay on the banks, as also on Erena and Narrama Creeks, which from their natural position, being well sheltered from the wash caused by strong winds, would make fine clairs for the culture of the oyster, as on the banks where the ballast is discharged from the vessels the spat adheres very quickly and thick, in fact too thick for the oyster to come to any large size. In former years this place was the principal of Sydney and other towns to get supplied with lime; at present vessels load with the dead shells taken from the banks. This has caused the drift oyster banks to become entirely worked out.

I herewith respectfully enclose two letters, one I received from Mr. Cole, the other is from Mr. Cain, of Brisbane Water.

I have, &c.,  
WM. J. LANGHAM,  
Inspector of Oyster Beds.

[Enclosures.]

Mr. J. Cole to The Inspector of Oyster Beds.

My dear Sir,

In compliance with your request relative to the present state of the natural oyster beds in this vicinity, and seeking my opinion as to whether they have been improved or otherwise since they were leased by the Government, I must certainly say that since your last visit to this place on a tour of inspection they have very much deteriorated; for as you are aware the whole of the banks were well and thickly clothed with oysters, whereas at the present time there are (except in odd places in Mooney Mooney Creek) very few to be seen; nor whilst so many are taken without any corresponding return, are matters likely to improve. I may mention that speaking to an old oyster-fisher the other day, he declared that when he first commenced some two years ago he could gather three bags a tide; whereas at the present time he is busily employed to catch half a bag, but as you say you are coming to give the whole field a thorough overhaul, you will not fail to detect a very material difference for the worse since your former inspection.

Peat's Ferry.

Trusting I shall shortly see you.—

J. COLE.

M. W. N. Cain to The Inspector of Oyster Beds.

Sir,

Gosford, 24 August, 1877.

When I resided on Wy Wy Creek, in November of the year 1873, I had a load of oyster spawn for the Honorable Minister, being the last of three; when the present lessee prevented me from shipping them to Botany. He threatened to prosecute me should I attempt to remove them, causing me a loss of £20. I subsequently saw him in Sydney, when he gave me permission to remove them, but before then they were all spoiled, causing me the above loss.

I am, &c.,  
WM. N. CAIN.

1877-8.

**LEGISLATIVE ASSEMBLY.**  
**NEW SOUTH WALES.**

**OYSTER FISHERIES.**

(PETITION FROM OYSTER-DREDGERS AND OTHER RESIDENTS OF THE CLARENCE.)

*Ordered by the Legislative Assembly to be printed, 20 February, 1878.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Oyster-dredgers and residents of the Clarence River Fishery District,—

RESPECTFULLY AND HUMBLY SHOWETH:—

1. That your Petitioners have read with deep interest the Report of the Commissioners appointed to inquire into the best mode of cultivating the oyster, and utilizing and maintaining the natural beds of the Colony, in order to recommend to the Government the necessary legislation to secure these objects.

2. That your Petitioners believe fresh legislation necessary to preserve the oyster-beds and to prevent a valuable reproductive property from further misuse and perversion, merely to benefit six residents of Sydney, to the entire exclusion of local residents and general public.

3. That your Petitioners cannot estimate the incalculable loss sustained by the Colony owing to the monopoly held by said persons, more especially when they take into consideration the high estimated value of the American oyster-fisheries.

That of the Chesapeake oyster-fisheries, said to amount to nearly £4,000,000 sterling, of which the City of Baltimore alone exports £2,500,000 sterling, whilst the immense progress in oyster culture of late years has greatly increased the production of the fisheries of New York and Rhode Island; and the export trade of New Orleans is over £1,000,000 sterling.

The remarkably successful results achieved of late years by both enterprise and by the Government of France in restocking long exhausted natural beds and the culture of new ground. Then the yearly sales of the Whitstable Oyster Company alone averages close on £300,000; indeed the price, £36,000, paid for spat by this Company in years in which their own spat crop fails, nearly equals the largest yearly production in value of the whole of our extensive fisheries, although the fishery itself is nothing equal in size or fecundity to the natural beds of the Clarence, held by only one person—a non-resident.

What then might reasonably be expected if the whole of our grossly mismanaged fisheries were vested in a respectable and industrious body of tenantry under sound and suitable regulations, wisely administered. Surely the very prolific natural beds and extensive fertile oyster ground of the Clarence would comfortably support as many families as those we read of of much less fertility, or, with all its natural advantages for such a trade, supply at least the £68,000 yearly demand for American tinned oysters, without speculating on the demand for the article in both its fresh and preserved state, which speedier means of transit is daily opening for our encouragement in foreign markets.

4. That your Petitioners respectfully submit "The Oyster Fisheries Act, 1868," sanctions two things only:—1. To lease ground on which to make new oyster-beds. 2. To shut up for three years natural beds by Proclamation in the *Government Gazette*. Hence it follows when natural beds, as in the Clarence, are not shut up, the public possess an unquestionable right to dredge and sell the oysters off any natural bed within the fishery, as if no so-called lease existed. Yet, notwithstanding the clearly expressed meaning of the Act, the Government has most inexplicably granted to one person the exclusive and pernicious privilege to dredge and sell every oyster within the fishery—in fact to exterminate the oyster, and destroy the beds if he sees fit; for there is neither restriction or supervision of any kind,—and also supports him in obstructing the public right of free dredging; and although well marked improvement of the fishery could be the only motive for this grant the privilege is still continued, though just as when dredging was free to the public, culture has not been attempted, the beds are duly skinned as the oyster grows immature, breeding oyster alike are sent to market, and the amazing quantities of spat which settle yearly in the season betwixt high and low water-mark about the beds and cover every stone of the breakwater, are allowed to perish, though it would be profitable employment to scores of children and youths to collect and relay; indeed were it not for the extraordinary fecundity of the beds the fishery ere this would have been exhausted. Surely then the several hundreds a year spent on oyster-bed inspection is worse than wasted.

5. That your Petitioners believe cause shown to repeal at once the present Act, and that great public benefit would ensue without inflicting on any injustice, or giving just cause of complaint—if this glaring one-sided and unjust privilege were forthwith determined.

6. That your Petitioners believe the Bill recommended to the Parliament by the Oyster-culture Commission would of itself fail to accomplish the object intended—the development of the fisheries by means of culture; for though the plan of regulation proposed by the Bill seems in every respect suitable and complete, excepting in some minor particulars, which can hardly escape notice during the discussion of the Bill, nevertheless, save the bare term of lease no provision whatever is made of a nature calculated either to facilitate the establishment of an entirely new fishery on sound principles, or to carry on the necessary work of systematic oyster-culture, that is, in a manner calculated to benefit either the lessee or to develop the fishery. We therefore venture to ask that the following additions be embodied in the Bill, as indispensable to the achievement of the object in view, and no more than a reasonable and proper measure of encouragement to a respectable and industrious class of men to engage in that pursuit, namely,—

1. That granting licenses as proposed in the Bill would encourage the skinning of natural beds as practised heretofore and create a hulking thriftless class of men, who would prowl about the fisheries to plunder the cultured beds, and whose interests it would not be to preserve and develop the natural beds. We would therefore ask that licenses to dredge on natural beds should be restricted to persons residing in the locality of the beds, who are also lessees of oyster ground, and as an encouragement to take up such leases, and as an assistance in improving the leasehold.
2. That reserves be made for fishery townships convenient to the beds and otherwise suitable for lessees dwellings, and the various operations of the fisheries, such allotments to be part of the leasehold; thus congregating the lessees besides affording the social advantages of life in a township, and greatly facilitating the ordinary work of culture, would render the work of supervision more efficient and useful to both lessees and Government, and afford the best means to introduce and establish the co-operative system so desirable in oyster culture, and so successfully carried out at Whitstable oyster-fishery, and at several other oyster, pilchard, and herring fisheries in Britain.
3. That all dry-shell banks be reserved, and those alienated be resumed for the sole use of the fisheries, being incomparably the best material for the purpose of forming new beds and for fixing the spawn on the mother bed.
4. That in order to place lessees on a sound footing in respect to market, and render them independent of the barbarous oyster trade system which has grown into a fixed custom in Sydney, an oyster market should be built on a fit spot in the harbour and properly fitted for the storage and sale of oysters by public auction.
5. That a salesman be appointed yearly, first term by the Government, but each year thereafter elected by the lessees, subject to the veto of Government.
6. That all oysters, excepting direct consignments by lessees to other Colonies, be consigned by lessees direct to the salesman; and every transaction relating to any such consignment entered duly in proper books, kept therefor and open in working hours for inspection by a consignor and an officer appointed by Government for that purpose, and after deducting a sufficient per-centage to cover the expenses of any such consignment the balance of auction sales to be forthwith submitted to the consignor.
7. That in all cases the sale and transfer of any such lease should be subject to the approval of the Governor or Executive Council.
8. That your Petitioners respectfully submit on the foregoing grounds the question relating to the fisheries of the Colony; and when they take into consideration the care and attention bestowed on the preservation and culture of the oyster in other countries, and the direct and collateral substantial advantages which flow therefrom, we cannot but hope and humbly pray that your Honorable House will take immediate steps to put a stop to and remedy the respective evils complained of.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 219 signatures.]

1877-8.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## OYSTER FISHERIES.

(PETITION FROM RESIDENTS OF THE SHOALHAVEN FISHERY DISTRICT.)

*Ordered by the Legislative Assembly to be printed, 14 March, 1878.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned residents of the Shoalhaven Fishery District,—

RESPECTFULLY AND HUMBLY SHOWETH:—

1. That your Petitioners have read with deep interest the Report of the Commissioners appointed to inquire into the best mode of cultivating the oyster and utilizing and maintaining the natural beds of the Colony, in order to recommend to the Government the necessary legislation to secure these objects.

2. That your Petitioners believe fresh legislation necessary to preserve the oyster-beds, and to prevent a valuable reproductive property from further misuse and perversion, merely to benefit six residents of Sydney, to the total exclusion of local residents or the general public.

3. That we cannot estimate the incalculable loss sustained by the Colony owing to the monopoly held by said individuals, more especially when they take into consideration the high estimated value of the several American Oyster Fisheries. That of the Chesapeake Fishery amounts yearly to nearly £4,000,000, of which the City of Baltimore exports £2,500,000 sterling, New York and Rhode Island together, nearly as much, while the oyster trade of New Orleans equals £1,000,000 sterling. The remarkably successful results achieved of late years, by private enterprise, as well as the Government of France is restocking exhausted beds, and in the culture of new ground the total sales yearly of the Whitstable Oyster Company, which alone averages close on £300,000; indeed this Company, sometimes when their own spat-crop fails, pays in one year £36,000 for spat to keep up the stock; yet the fishery itself is much less in size and possesses fewer natural advantages than that of the Shoalhaven, held by only one person. What then might be reasonably expected if our grossly mismanaged fisheries were vested in a respectable and industrious body of tenantry, under sound and suitable regulations? Surely the prolific natural beds and extensive oyster-ground of the Shoalhaven and adjacent districts would comfortably support many families, and the annual product go far at least to supply £68,000 Colonial demand yearly for American preserved oysters, without speculating on the demand for the article in both its fresh and preserved state, which speedier means of transit is daily opening up for our encouragement in Foreign markets.

4. That your Petitioners respectfully submit the "Oyster Fisheries Act of 1868" sanctions two things only:—

(1.) To lease ground on which to make new oyster-beds.

(2.) To shut up for three years natural-beds by Proclamation in the *Government Gazette*.

Hence it follows when natural beds, as in the Shoalhaven, are not so shut up, the public have an unquestionable right to dredge for sale the oyster on any natural bed within the limits of the fishery, or any other fishery similarly situated, as if no such privilege or so called lease existed. Yet, notwithstanding the clearly expressed meaning and words of the Act, the Government has most inexplicably conferred on one person the exclusive and obnoxious privilege to dredge and sell every oyster within the fishery, in fact to exterminate the oyster and destroy the natural beds if he sees fit,—for there is neither restriction nor supervision; also, in direct violation of the Act, supports him in obstructing the people's right of free-dredging. And although well marked improvement of the fishery could be the only motive for granting the same, the privilege is still continued, though as when free to the public the beds are kept "skinned," as bare breeding and immature oysters are alike sent to market, and the like enormous quantities of spat which in the season yearly settle on every stone, mangrove, and rock, to the extremity of the Heads, are allowed to perish; yet scores of young people, more profitable than at any other occupation, could be employed in collecting and laying them on suitable ground. Surely then the several hundreds a year spent on oyster-bed inspection is worse than wasted.

5. That your Petitioners believe sufficient cause has been above shown for repealing at once the aforesaid Act; also that great public gain would be effected without inflicting injustice or giving any reasonable cause of complaint if this glaringly one-sided arrangement were forthwith determined.

6. That your Petitioners believe the Bill recommended to the Parliament by the Oyster Culture Commission would of itself fail to accomplish the object intended—viz., the development of the fisheries by means of cultivation. For though the plan proposed by it to regulate the management of the fisheries seems in every respect well suited for the purpose (excepting some minor particulars which hardly can escape notice during the discussion of the Bill)—nevertheless, save the bare term of lease, no provision whatever is made of a nature calculated to facilitate either the establishment of an entirely new fishery, or to carry on the necessary or ordinary work of systematic oyster culture—that is in a manner calculated to benefit either the lessee or to develop the fishery. We therefore venture to ask that the following additions be embodied in the Bill as being indispensable to the achievement of the object in view, and only a reasonable and proper measure of encouragement to a respectable and industrious class of men to engage in that pursuit, namely :—

- (1.) That granting licenses as the Bill proposes would encourage the skinning of natural beds as practised heretofore, and create a hulking thriftless class of men, who would prowl about the fisheries to plunder the cultured beds, and whose interest it would not be to preserve and develop the natural beds. We would therefore ask that licenses to dredge on natural beds should be restricted to persons residing in the locality of the beds, who are also lessees of oyster ground, as an encouragement to take up such leases, and as an assistance in improving the leasehold.
- (2.) That reserves be made for fishery townships convenient to the beds and otherwise suitable for lessees dwellings, and the ordinary operations of the fishery, such allotments to be part of each leasehold. Thus congregating the lessees, besides affording the social advantages of life in a township, and greatly facilitating the onerous work of oyster culture, would render the work of supervision more efficient and useful to both lessees and Government, and also afford the best means to introduce and establish the co-operative system so desirable in oyster culture, and so successfully carried out at the Whitstable Oyster Fishery, and several other oyster, pilchard, and herring fisheries in Britain.
- (3.) That all dry-shell banks be reserved, and those alienated resumed for the sole use of the fisheries, being incomparably the best material for the purpose of forming new beds and for fixing the spawn on the mother-bed.
- (4.) That in order to place lessees on a sound footing in respect to market and render them independent of the barbarous oyster trade system which has grown into a fixed custom in Sydney, an oyster market should be erected on a fit spot in the harbour, and properly fitted for the storage and sale of oysters by public auction.
- (5.) That a salesman be appointed yearly, first term by the Government, but each year thereafter elected by the lessees, subject to the veto of the Government.
- (6.) That all oysters, excepting direct consignments by lessees to other Colonies, be consigned by the lessees direct to the salesman, and every transaction relating to any such consignment be duly entered on proper books therefore, and kept open in working hours for inspection by any consignor, and an officer appointed by the Government for such purpose, and after deducting a sufficient percentage to cover the expenses of any such consignment the balance of auction sales be forthwith remitted to the consignor.
- (7.) That in all cases the sale and transfer of any such lease should be subject to the approval and the signature of the Governor or Executive Council.
- (8.) That your Petitioners respectfully submit on the foregoing grounds the question relating to the fisheries of the Colony; and when they take into consideration the care and attention bestowed on the preservation and culture of the oyster in other Countries, and the direct and collateral material advantages which flow therefrom, they cannot but hope and humbly pray that your Honorable House will take immediate steps to put a stop to and remedy the evils complained of.

[Here follow 39 signatures.]

1877-8.

## LEGISLATIVE ASSEMBLY.

## NEW SOUTH WALES.

## OYSTER FISHERIES.

(PETITION FROM RESIDENTS OF CAMDEN HAVEN.)

*Ordered by the Legislative Assembly to be printed, 20 March, 1878.*

To the Honorable the Legislative Assembly, in Parliament of New South Wales assembled.

The humble Memorial of the undersigned, acting with the concurrence and on behalf of the residents of Camden Haven,—

## RESPECTFULLY SHOWETH:—

That the said Camden Haven is the site of valuable oyster-beds, the products of which have for some time past held the premier place in the Metropolitan markets, and that notwithstanding their present neglected condition these beds extend over a considerable area of the said Haven.

That your Memorialists have read with satisfaction the Report of the Oyster Commission, appointed to inquire into the best mode of cultivating the oyster, so as to be able to suggest to the Government a comprehensive scheme of legislation in furtherance of such cultivation.

That, as has been already pointed out to you in other Petitions, there is a general belief that legislation is necessary to preserve the oyster-beds of the Colony, and to save a productive source of public income from further misuse, or from utter destruction, at the hands of the five or six persons, who are in irregular possession thereof, and who are by their worldly callings and waste of specific experience, wholly unfit for such a charge.

That your Memorialists are unable to estimate the incalculable loss sustained by the Colony owing to the monopoly held by the said five or six individuals, this inability becoming more patent in face of the fact that, according to an official report from Baltimore, U.S., issued in 1870, and addressed to Lord Clarendon, the value of an annual export of oysters from that city alone amounted to £2,500,000 sterling, a statement fairly indicating that our fisheries under careful supervision would yield an immense revenue.

That although the oyster-beds at Camden Haven do not cover a surprisingly large area, they are noted on account of the superior character of their yield; and that under the present monopoly their capabilities never have been, and never will be, sufficiently tested.

That in the old days, when a more liberal system was in vogue, it was quite common for a couple of Camden Haven oyster-dredgers to get from 14 to 20 bags per diem; but that owing to the waste and destruction now going on, a return of three bags in the same period of time is considered good work for two or even three men.

That next to nothing has been done to increase the fertility of these oyster-beds; that notwithstanding the advantages possessed by the half-dozen persons above-mentioned in being allowed latitude of an absolute character, the fisheries are positively perishing through want of ordinary care, and a shameful failure to use easily accessible means of preservation.

That in face of the fact that they are favored by climate—abundance of spat always at hand; and beds capable of producing oysters at least equal in quality to any in the world—these monopolists have, instead of increasing the revenue flowing from the fisheries, actually diminished it; that in consequence of their mismanagement oyster-dredgers are becoming scarcer every year; and that the Colony which ought to be exporting the fish is obliged to pay forwards an average of £68,000 per annum for preserved oysters coming in from America.

That your Memorialists believe you will see the force of the foregoing statements, and they therefore hope that you will repeal the Act now in force and destroy the monopoly herein so reasonably complained of.

That while they admit the excellence of many features in the programme recommended to you by the Oyster Commission, your Petitioners feel sure that the Bill of itself would fail to accomplish the object in view, for while the proposed plans to regulate the management of the fisheries seems suitable and complete, save in minor matters, which cannot well escape your attention, yet, excepting the bare terms of lease, the Bill entirely omits any measure calculated to afford the necessary encouragement to take up

leases and cultivate oyster ground. Therefore your Memorialists venture to ask you to adopt the following additional features to the Bill, additions which we believe are necessary, for the end is prospect, and which are substantially the same as those suggested to you in a recent powerfully signed Petition, emanating from the people of the Hunter, namely:—

1. That granting licenses as proposed in the Bill would encourage the skinning of natural beds and create a thriftless class of men, who would prowl about the fisheries to plunder the cultured beds, and whose interests it would not be to preserve and develop the natural beds. We would therefore ask that licenses to dredge on natural beds should be restricted to persons residing in the locality of the beds, who are also lessees of oyster-grounds, as an encouragement to take up such leases, and as an assistance in improving the leasehold.
2. That reserves should be made for fishery townships convenient to the oyster-grounds and otherwise suitable for lessees' dwellings, and the various operations of a fishery, which might otherwise be unattainable, such allotments to form part of the leasehold. This bringing together of the lessees would in effect greatly facilitate the necessary work of a fishery. It would moreover render supervision more efficient and useful to both lessees and Government, and likewise afford the best means to introduce and establish the co-operative system so successfully carried out at many of the principal oyster fisheries in the old country.
3. That all dry-shell banks should be reserved, and those already alienated resumed for the sole use of the fisheries, as incomparably the most useful material for the purpose of forming new beds and fixing spawn.
4. That in order to place lessees on a sound footing in respect to market, and independent of the barbarous oyster-trade system which has grown into a fixed custom in Sydney, an oyster market should be erected on a suitable spot in the Metropolitan harbour, fitted with the necessary modern improvements for the storage and sale of oysters by auction.
5. That a salesman should be appointed yearly, first term by the Government, but each year thereafter to be elected by the lessees, subject to the veto of the Government.
6. That all oysters, excepting direct consignments by lessees to other Colonies, be consigned by lessee direct to the salesman; and every transaction relating to any such consignment be duly entered in proper books, kept therefor, and in working hours open for inspection by any consignor and an officer appointed by the Government for such purpose, and after deducting a sufficient per-centage to cover all the expenses of such consignment, the balance of auction sales be forthwith remitted to the consignor.
7. That in all cases both the sale and transfer of any lease should be subject to the approval and signature of the Executive Council or the Governor.

And in submitting the foregoing suggestions for your consideration, your Memorialists wish you to take into view the care and attention bestowed on oyster culture in other countries, and the material advantages thereby conferred on the people generally by the increased and cheapened supply of a wholesome food; and your Memorialists pray that your Honorable House will take immediate steps to remedy the evil from which they and their constituents are suffering.

And your Petitioners will, as in duty bound, ever pray.

[Here follow 30 signatures.]

1877-8.

NEW SOUTH WALES.

PARIS EXHIBITION OF 1878.  
(CORRESPONDENCE RESPECTING SPACE FOR NEW SOUTH WALES.)

Presented to Parliament by Command.

No. 1.

The Secretary of State for the Colonies to Governor Sir Hercules Robinson.

Sir, Downing-street, 26 September, 1877.

I have the honor to transmit to you the accompanying copy of a letter which I have received from His Royal Highness the Prince of Wales, with plans indicating the amount and position of the space which His Royal Highness will be able to allot to the Colony under your Government at the Exhibition to be held at Paris in 1878.

I request that I may be informed by telegraph whether your Government is prepared to occupy with a suitable grand trophy the important space in the Tower which His Royal Highness proposes to place at their disposal, and in that event, that I may be furnished at the earliest possible date with a description of the manner in which they propose to deal with it.

I have, &c.,  
CARNARVON.

[Enclosure.]

The Prince of Wales to The Earl of Carnarvon.

My Lord, Marlborough House, Pall Mall, S.W., 24 September, 1877.

The Duke of Manchester's Committee of Her Majesty's Commissioners for the Paris Exhibition have had under their consideration the arrangements proposed for the distribution of space for the various Colonial Governments at the Paris Exhibition.

I have therefore to request your Lordship to have the kindness to communicate the proposed allotments of space, which after matured consideration it has been found possible to make to the several Colonial Governments named in the margin.

I now furnish your Lordship with plans of the space allotted to each Government, and I may add, that generally throughout the Empire the demands for space have been five times more than the total amount granted by the French authorities.

The space allotted to Great Britain and the Colonies adjoins a vestibule and tower which had been reserved for international trophies of which only a small share would have been allotted to the British Empire.

The French authorities, however, upon my personal application, gave me permission for the exclusive use of this Tower for exhibiting a series of trophies representing the produce and manufactures of the various Colonies of the British Empire.

This Tower forms the main entrance to the Foreign Machinery Department, and is 115 feet by 115 feet, by 142 feet high.

I have placed the various trophies from the Colonies in close proximity to the space I secured for India, wishing that the Colonial Governments should have this prominent situation in addition to the space which is now granted to the main building, of which the Tower and vestibule form the entrance.

I am anxious to submit at an early period to the French Commission my proposals for dealing with the important space above alluded to, and shall be glad if your Lordship will be good enough to invite the Colonial Governments named in the margin to inform you whether they see their way to the erection of suitable grand trophies in the spaces marked in the annexed plan.

The height available for this purpose is 35 feet; the dimensions of the space available are marked in the plan.

The centre space will be occupied by the Dominion of Canada, which, as your Lordship has informed me, has through the Governor General gratefully availed themselves of the offer made to them.

The French Commission have only granted this Tower, which is in a most important position abutting on the Seine, and the principal entrance to the Exhibition, on the condition that the manner in which I propose to deal with it is submitted for their final approval.

I shall, therefore, be glad to learn at the earliest possible date whether the Colonies named above will be prepared to do justice to this important part of the Exhibition, if I allot it to them as part of the portion of the available space placed at their disposal.

Canada.  
Jamaica.  
British Honduras.  
British Guiana.  
Trinidad.  
Cape of Good Hope.  
Natal.  
Ceylon.  
Mauritius.  
Straits Settlements.  
New South Wales.  
Victoria.  
Queensland.  
South Australia.  
Western Australia.  
New Zealand.

New South Wales.  
Victoria.  
Queensland.  
South Australia.  
New Zealand.

I may take this opportunity to state that the demands from Great Britain and the Continental States have been so largely in excess of what they were in 1867—that it has been found impossible to assign to the Colonies a larger aggregate space than was assigned to them in the Philadelphia main building alone.

I have, &c.,

ALBERT EDWARD,

Presiding to the Royal Commission for the Paris Universal Exhibition of 1878.

No. 2.

The Principal Under Secretary to The President, Paris Exhibition Commission.

Sir,

Colonial Secretary's Office, Sydney, 7 December, 1877.

I am directed by the Colonial Secretary to transmit to you the inclosed copy of a Despatch from the Principal Secretary of State for the Colonies, inclosing a copy of a letter from His Royal Highness the Prince of Wales, with plans indicating the amount and position of the space which His Royal Highness will be able to allot to this Colony at the Exhibition to be held at Paris in 1878; and I am to request that Sir John Robertson may be informed as soon as possible of the wishes of the Commissioners in the matter treated of in the second paragraph of Lord Carnarvon's Despatch, in order that the communication desired by His Lordship may be made to him by telegraph.

I have, &c.,

HENRY HALLORAN.

No. 3.

The Secretary, Paris Exhibition Commission, to The Principal Under Secretary.

Sir,

Commissioners' Office, Free Public Library, Sydney, 7 December, 1877.

I have the honor by request of the Commissioners to acknowledge the receipt of your letter of this day's date, together with the enclosures noted in the margin.

I am directed to request that you will have the goodness to inform the Honorable the Colonial Secretary that the Commissioners gratefully accept the space which His Royal Highness proposes to place at the disposal of New South Wales in the Grand Tower, and that they are preparing to occupy the same with grand trophies, illustrating the mineral resources of New South Wales. The Commissioners desire that an intimation of their acceptance of His Royal Highness' offer may be sent by telegraph to-morrow. They will be prepared at an early date with a description of the manner in which they propose to deal with the space.

Referring to the space which His Royal Highness has caused to be allotted to New South Wales, the Commissioners desire me to intimate that they fear the area allotted will not be sufficient to meet the requirements of this Colony, and they request that His Royal Highness may be invited to consider whether contiguous space to the extent of half the area now granted cannot be added.

I have, &c.,

CHAS. ROBINSON,

Secretary.

No. 4.

Telegram from Governor Sir Hercules Robinson to The Secretary of State for the Colonies.

8 December, 1877.

PARIS Exhibition. Government gratefully accept space in Tower, and intend to occupy it with grand trophies illustrating mineral resources of Colony.

No. 5.

The Principal Under Secretary to The President, Paris Exhibition Commission.

Sir,

Colonial Secretary's Office, Sydney, 11 December, 1877.

With reference to Mr. Charles Robinson's letter of the 7th instant, in answer to mine of the same date, concerning the space which His Royal Highness the Prince of Wales proposes to allot to this Colony at the Paris Exhibition of 1878, I am directed by the Colonial Secretary to state, for the information of the Exhibition Commissioners, that the substance of their reply has been communicated to the Secretary of State by His Excellency the Governor by a telegram of the 8th instant, and by his despatch No. 174 of the 10th instant.

I have, &c.,

HENRY HALLORAN.

1877-8.

## LEGISLATIVE ASSEMBLY.

## NEW SOUTH WALES.

## REAL PROPERTY ACT.

(PETITION FROM LANDOWNERS AND OTHERS OF SYDNEY AND SUBURBS.)

*Ordered by the Legislative Assembly to be printed, 12 February, 1878.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of Landowners and others of Sydney and its Suburbs, whose names are hereunto subscribed,—

SHOWETH :—

That your Petitioners are desirous of bringing under the attention of your Honorable House the manner in which Titles submitted to be brought under the provisions of the Real Property Act, 26 Victoria No. 9, are investigated.

That most vexatious delays occur in the examination of Titles, and to such an extent that property-owners are as a rule deterred from applying to bring their properties under the provisions of the Act, preferring to put up with the inconveniences of the old system rather than submit to the great loss and injury, such as an application under the provisions of the Act would involve.

That the method adopted by the Examiners of furnishing objections to Titles is seriously injurious to applicants, it being a matter of frequent occurrence to receive certain requisitions or objections, which when complied with or removed, often at great expense and inconvenience, are followed by further requisitions and objections involving great delay, expense, and trouble, which would be avoided by a thorough investigation at the outset, and also that frequently such requisitions are repeated in other applications under the same Title after having been satisfied in previous cases.

That in some cases requisitions and objections are taken to Titles that have been accepted by the ablest professional men of the Colony after the most scrupulous and searching investigation at their hands.

That the want of business capacity invariably displayed in dealing with applications in the Examination Branch is antagonistic to the interests of the public, and nullifies to a very great extent the advantages which the Act was intended to confer upon those persons who desire to avail themselves of its provisions; and, what is even of more importance, capital lies unproductive for a long period, purchasers fearing to make improvements pending the report of the Examiners.

That the operation of the Act in reference to the transmission of Titles already certified by the Act is especially defective, and is again tedious and expensive, usually requiring months for completion where, under a properly organized system, a single week at the utmost should be necessary.

That applications sometimes remain, as your Petitioners have reason to believe, in the hands of the officers for months before being subjected to examination.

That an average time or delay of fully nine to twelve months is involved between the time of lodging an application and the issue of certificate.

That upon inquiry your Petitioners have ascertained that in the neighbouring Colonies Titles under similar Acts of Legislature are dealt with in a manner which gives perfect satisfaction to applicants, in not being attended with the needless delay, trouble, and expense, which attaches to the operation of the Act in this Colony, and which has necessitated this Petition to your Honorable House.

Your Petitioners therefore humbly pray that your Honorable House will be pleased to allow the matter to be referred to a Select Committee, to be by your Honorable House appointed for inquiry, and to grant leave to your Petitioners to appear before such Select Committee either in person or by Counsel, and that they may be at liberty to produce and give evidence before such Select Committee with reference to the matters aforesaid.

And your Petitioners will ever pray, &c.

Dated at Sydney, this eighteenth day of December, A.D. 1877.

[Here follow 480 signatures.]

1877-8.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

CASE OF JAMES R. POWELL.  
(REPORTS OF EXAMINERS OF TITLES.)

*Ordered by the Legislative Assembly to be printed, 12 March, 1878.*

The Registrar General to The Under Secretary, Colonial Secretary's Department.

Sir, Registrar General's Department, Land Titles Office, Sydney, 28 February, 1878.  
In reply to your memo. of the 15th instant, stating that Mr. Driver, in his place in Parliament, after complaining generally of delay in the passing of certificates of title, mentioned a particular case in which he was professionally interested (James R. Powell), which, he said, had been detained for nine months. I have the honor to submit herewith the report of the Examiners of Titles on this case.

I have, &c.,  
E. G. WARD,  
Registrar General.

February 19, 1878.

MEMO. for Examiners of Title, who are engaged in investigating the title of James R. Powell.  
I HAVE received a memo. from the Colonial Secretary to the effect that Mr. Driver, in his place in Parliament, after complaining generally of the delay in the procuring of certificates of title, mentioned a particular case in which he was professionally interested (James R. Powell), which he said had been detained for nine months. Will the Examiners be good enough to afford me the information which is required.

E. G. WARD,  
R.G.

Application, 4433—Powell.

WE dealt with this case so long ago as July last.

Our mode of disposal of it was communicated on the 31st of that month to Mr. Driver, he being the Solicitor in charge of the case. That communication was by letter, of which the following is a copy:—

4433—Application of Powell—Preliminary.

Sir,

The draftsman reports that the subject of this application is the same as that applied for in case 3929—applicant Thomas Rose. Although the present applicant alleges that the land is "unoccupied," yet the applicant in the former case declared that on 26th April, 1875 (the date of application), it was in his own occupation, and that he resided thereon. Under the circumstances it seems that the proper course is for the adverse claimants to determine their respective rights by process in the Supreme Court.

I have, &c.,  
C. J. MUDDLE,  
Deputy Registrar General.

Richard Driver, Esq., Solicitor, Sydney.

Mr. Driver thereupon sought to re-open the conclusion at which we had arrived. His arguments for that purpose are contained in the following letter:—

Case No. 4433—Application of Mr. J. R. Powell.

Sir,

In reply to yours of the 31st July, I do myself the honor to state that my client was quite right in stating in his application that the land was unoccupied at that time; this I know of my own knowledge to be correct. Rose may have resided upon the land at the date of his application, but since that date the rights of my client have been decided in the Supreme Court, under the following circumstances:—Rose having trespassed upon the land, my client commenced an action against him, and amongst other pleas filed, Rose denied that the land was Powell's, and further that it was his own freehold.

The case was tried 1st and 2nd August, 1876, before Sir W. Manning, and a jury of four, and a verdict returned for plaintiff on all the issues. Powell's execution for damages and costs is now in the Sheriff's Office.

C. J. Muddle, Esq., Deputy Registrar General.

Yours, &c.,  
RICHARD DRIVER.

We may here furnish some further particulars concerning the conflicting or cross application for the same land—applicant, Thos. Rose. That application, although dealt with by this office long ago, still remained with the D. R. G.'s letter of February, 1876, wholly unanswered, until the 26th instant, in which state of the evidence adduced in support of either case it was impossible to say which of the contending parties had the better title; and under any circumstances it seemed to us that it might be no part of the duty of the Examiners to take upon themselves the determination of conflicting claims such as these.

We bore in mind, however, that the office letter in Rose's case had remained unanswered for more than two years, and we thought on the whole that this office should endeavour to obtain either an admission of abandonment of that case or else a further step in it.

With this view the Examiners in charge of Rose's application advised letters to be sent to him, and to the successors to his original Solicitors, one of whom is now dead, in order to enable us, unless a reply to one or other of those letters should be received before this day (the 27th instant) to sign then such a report on Powell's application as in our opinion would do justice to all parties.

The letter to Rose, for reasons which appear in the correspondence, was addressed to the care of A. H. McCulloch, Esq., and on the 26th instant the following reply was received from that gentleman:—

Case 3929—Rose.

165, Pitt-street, February 26, 1878.

Sir,

I have to acknowledge receipt of yours of the 23rd instant, and in answer thereto I beg to inform you that Mr. Rose has requested me to act as his Solicitor in this case.

Mr. Rose has no intention of abandoning his application and has every objection to your disposing of any cross case before his own has been settled.

As to your fixing the 26th instant as the last day open to my client to reply to your letter, I am at a loss to understand your authority for so doing.

In reply to the second paragraph of your letter my client's grandfather, from whom he claims, is identical with the Thomas Rose mentioned.

I have, &c.,

A. H. McCULLOCH, JUN.

The Registrar General, Sydney.

It appears obvious that we must now give Mr. McCulloch a fair opportunity of urging what he may think fit on Rose's behalf.

E. BURTON.

W. B. JONES.

Land Titles' Office, 27 February, 1878.

1877-8.

## NEW SOUTH WALES.

## SYDNEY BRANCH ROYAL MINT.

(DESPATCH.)

Presented to Parliament by Command.

The Secretary of State for the Colonies to Governor Sir Hercules Robinson.

(New South Wales—No. 103.)

Sir,

Downing-street, 3 November, 1877.

I have the honor to transmit to you, for the information of your Government, a copy of a letter and report addressed to the Lords Commissioners of the Treasury by the Deputy Master of the Mint, upon the weight and fineness of the gold coins struck at the Sydney Branch Mint during the twelve months from July, 1876, to June, 1877, both inclusive.

I have, &c.,  
CARNARVON.

[Enclosure.]

Royal Mint to Treasury.

Sir,

Royal Mint, 23 October, 1877.

I have the honor to acquaint you, for the information of the Lords Commissioners of Her Majesty's Treasury, that the following returns have been duly transmitted to this Department by the Deputy Master of the Sydney Branch of the Royal Mint, in conformity with the Order in Council of the 19th May, 1853.

1. Twelve monthly returns, showing the transactions in bullion of the Sydney Branch of the Royal Mint, from July, 1876, to June, 1877, both inclusive.

The amount of coin issued to the public during these months was as follows:—

	1876.	Sovereigns. oz.	Half-sovereigns. oz.
In July	...	36,469·35	...
August	...	26,966·17	...
September	...	35,183·52	...
October	...	42,632·65	...
November	...	28,249·74	...
December	...	31,588·43	...
	1877.		
January	...	43,145·07	...
February	...	23,369·82	...
March	...	40,320·49	...
April	...	17,463·47	...
May	...	33,643·18	...
June	...	38,780·72	...

The amount charged for coining was 3d. per oz. standard.

2. Four returns of waste in coining gold, for the quarters ending 30th September and 31st December, 1876, and 31st March and 30th June, 1877.

I have also to request you to submit to their Lordships the report enclosed, being the forty-fourth, on the weight and fineness of the gold coins produced at the Sydney Branch of the Royal Mint during the twelve months from July, 1876, to June, 1877, both inclusive, that report being based on the assay of pyx pieces, transmitted by the Deputy Master for examination, in accordance with the provisions of the Order in Council before referred to.

A copy of the report has been forwarded as usual to the Deputy Master at Sydney, for his information.

I have, &c.,  
C. W. FREEMANTLE.

[Sub-enclosure.]

FORTY-FOURTH Report, addressed to the Lords Commissioners of Her Majesty's Treasury on the weight and fineness of gold coins struck at the Sydney Branch of the Royal Mint, and transmitted by the Deputy Master for examination, in accordance with the provisions of Her Majesty's Order in Council of the 19th August, 1853.

PIECES taken without preference by the Colonial Treasurer, at the deliveries of the Sydney Mint.

Quarter Ending	Denomination of Coin.	Number of Pieces.	Total Weight.	Average Weight of a Piece.	Average proportion of Gold in 1,000 parts.
30 September, 1876.....	Sovereigns.....	78	oz. 20·029	oz. ·25678	916·698
31 December, 1876 .....	Do. ....	81	20·799	·25678	916·630
31 March, 1877 .....	Do. ....	85	21·831	·25684	916·698
30 June, 1877 .....	Do. ....	73	18·748	·25682	916·689

The standard weight of the sovereign is oz. 0·25682; the standard fineness (in 1,000 parts) is 916·666.

Royal Mint, 23 October, 1877.

C. W. FREEMANTLE,  
Deputy Master and Comptroller.

REPORT FROM THE SELECT COMMITTEE

ON THE

SUNDAY SALE OF LIQUORS PREVENTION BILL;

TOGETHER WITH THE

PROCEEDINGS OF THE COMMITTEE,

MINUTES OF EVIDENCE,

AND

APPENDIX.

---

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED,  
16 *May*, 1878.

---

SYDNEY: THOMAS RICHARDS, GOVERNMENT PRINTER.

1878.

1877-8.

**EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE  
LEGISLATIVE ASSEMBLY.**

VOTES NO. 46. FRIDAY, 22 MARCH, 1878.

13. SUNDAY SALE OF LIQUORS PREVENTION BILL:—The Order of the Day having been read,—Mr. J. Davies moved, "That" this Bill be now read a second time.  
Debate ensued.  
Mr. Driver moved, That the Question be amended, by the omission of all the words after the word "That," with a view to the insertion in their place of the words "this Bill be referred to a Select Committee for consideration and report."  
"That such Committee consist of Mr. J. Davies, Mr. Eckford, Mr. Roseby, Mr. Cameron, Mr. Greenwood, Mr. Stuart, Mr. Charles, Mr. Merriman, and the Mover."  
Question proposed,—That the words proposed to be omitted stand part of the Question.  
Debate continued.  
Question,—That the words proposed to be omitted stand part of the Question,—put and negatived.  
Question,—That the words proposed to be inserted in place of the words omitted be there inserted,—put and passed.  
Question then,—That this Bill be referred to a Select Committee for consideration and report. That such Committee consist of Mr. J. Davies, Mr. Eckford, Mr. Roseby, Mr. Cameron, Mr. Greenwood, Mr. Stuart, Mr. Charles, Mr. Merriman, and the Mover,—put and passed.

VOTES NO. 51. TUESDAY, 2 APRIL, 1878.

15. SUNDAY SALE OF LIQUORS PREVENTION BILL (Members of Legislative Council as Witnesses):—  
Mr. Driver (*by consent*) moved, without Notice, That the following Message be carried to the Legislative Council:—  
MR. PRESIDENT,  
The Legislative Assembly having appointed a Select Committee on the "Sunday Sale of Liquors Prevention Bill," and that Committee being desirous to examine the Honorable Sir Alfred Stephen, C.B., K.C.M.G., and the Honorable William John Foster, Members of the Legislative Council, in reference thereto, requests that the Legislative Council will give leave to its said Members to attend and be examined by the said Committee, on such day and days as shall be arranged between them and the said Committee.  
*Legislative Assembly Chamber,  
Sydney, 2nd April, 1878.*  
Question put and passed.

VOTES NO. 52. WEDNESDAY, 3 APRIL, 1878.

5. SUNDAY SALE OF LIQUORS PREVENTION BILL (Members of Legislative Council as Witnesses):—  
Mr. Speaker reported the following Message from the Legislative Council:—  
MR. SPEAKER,  
In answer to the Message from the Legislative Assembly, dated the 2nd instant, requesting leave for the Honorable Sir Alfred Stephen, C.B., K.C.M.G., and the Honorable William John Foster, Members of the Legislative Council, to attend and be examined before a Select Committee of the Legislative Assembly on "Sunday Sale of Liquors Prevention Bill," the Council acquaints the Assembly that leave has been granted to its said Members to attend and be examined by the said Committee if they think fit.  
*Legislative Council Chamber,  
Sydney, 3rd April, 1878.*  
JOHN HAY,  
President.

VOTES NO. 74. THURSDAY, 16 MAY, 1878.

7. SUNDAY SALE OF LIQUORS PREVENTION BILL:—Mr. Driver, as Chairman, brought up the Report from, and laid upon the Table the Minutes of Proceedings of, and Evidence taken before, the Select Committee for whose consideration and report this Bill was referred on 22nd March, 1878; together with Appendix.  
Ordered to be printed.

 REPORT.
 

---

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred, on 22nd March, 1878,—the “*Sunday Sale of Liquors Prevention Bill*,”—beg to report to your Honorable House:—

That your Committee having examined the witnesses named in the \*See List, page 6. List,\* desire to express their regret that the approaching close of the present Session does not permit a more extended inquiry; but being of opinion that any additional evidence will prove a mere reflex of that already obtained, your Committee recommend that a Bill be introduced, as early as possible after the re-assembling of Parliament, for the amendment of the present Publicans Act, and that such measure make provision,—

1st—For the closing of Public-houses on Sundays.

2nd—For the appointment of Licensing Boards.

3rd—For the inspection and supervision by superior officers of the Police.

RICHARD DRIVER,

Chairman.

No. 1 Committee Room,

Sydney, 16th May, 1878.

---

PROCEEDINGS OF THE COMMITTEE.

WEDNESDAY, 27 MARCH, 1878.

In the absence of a quorum, the meeting called for this day lapsed.

TUESDAY, 2 APRIL, 1878.

MEMBERS PRESENT:—

Mr. Merriman,		Mr. Driver,
		Mr. J. Davies.

Mr. Driver called to the Chair.

Entry from Votes and Proceedings, appointing the Committee, *read* by the Clerk.

Printed copies of the Bill referred, before the Committee.

Motion made (*Mr. J. Davies*) and Question,—That the Chairman move the House that a Message be sent to the Legislative Council, requesting leave for the Honorable Sir Alfred Stephen, C.B., K.C.M.G., and the Honorable John Foster, Members of the Legislative Council, to attend and be examined by this Committee,—put and passed.

*Ordered*,—That Mr. H. Wager, The Reverend J. Barnier, and The Reverend Dr. Steel, be summoned to give evidence next meeting.

[Adjourned to To-morrow, at half-past *Two* o'clock.]

WEDNESDAY, 3 APRIL, 1878.

MEMBERS PRESENT:—

Mr. Driver in the Chair.

Mr. Cameron,		Mr. J. Davies,
Mr. Charles,		Mr. Eckford,
Mr. Roseby,		Mr. Merriman.

Mr. Henry Wager (*Inspector of Police*), called in and examined.

Witness withdrew.

The Reverend J. Barnier called in and examined.

Witness withdrew.

Committee deliberated.

*Ordered*,—That Sub-inspectors Anderson, Rush, and Johnson, be summoned to give evidence next meeting.

[Adjourned to To-morrow, at half-past *Two* o'clock.]

THURSDAY, 4 APRIL, 1878.

MEMBERS PRESENT:—

Mr. Driver in the Chair.

Mr. Cameron,		Mr. Eckford,
Mr. J. Davies,		Mr. Greenwood.

Mr. Robert Anderson (*Sub-inspector of Police*), called in and examined.

Witness withdrew.

Committee deliberated.

*Ordered*,—That the Hon. Sir Alfred Stephen, C.B., K.C.M.G., M.L.C., and the Hon. William John Foster, M.L.C., be requested, and the Reverend Dr. Steel be summoned, to give evidence next meeting.

[Adjourned to Tuesday next, at *Two* o'clock.]

TUESDAY, 9 APRIL, 1878.

MEMBERS PRESENT:—

Mr. J. Davies,		Mr. Eckford.
----------------	--	--------------

In the absence of a quorum, the meeting called for this day lapsed.

TUESDAY,

TUESDAY, 16 APRIL, 1878.

MEMBERS PRESENT:—

Mr. Driver in the Chair.

Mr. Charles,  
Mr. Eckford,

Mr. J. Davies,  
Mr. Roseby.

The Hon. Sir Alfred Stephen, C.B., K.C.M.G., M.L.C., called in and examined.  
Witness withdrew.

The Reverend Dr. Steel called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That Sub-inspectors Rush and Johnson, and Mr. J. B. Oliffe, be summoned to give evidence next meeting.

[Adjourned to To-morrow, at Two o'clock.]

WEDNESDAY, 17 APRIL, 1878.

MEMBERS PRESENT:—

Mr. J. Davies, | Mr. Eckford.

In the absence of a quorum, the meeting called for this day lapsed.

THURSDAY, 25 APRIL, 1878.

MEMBERS PRESENT:—

Mr. Eckford, | Mr. Driver.

In the absence of a quorum, the meeting called for this day lapsed.

WEDNESDAY, 1 MAY, 1878.

MEMBERS PRESENT:—

Mr. J. Davies, | Mr. Eckford,  
Mr. Roseby.

In the absence of the Chairman, Mr. Davies called to the Chair *pro tem*.  
Committee deliberated.

[Adjourned to Friday next, at half-past Two o'clock.]

FRIDAY, 3 MAY, 1878.

MEMBERS PRESENT:—

Mr. J. Davies, | Mr. Eckford.

In the absence of a quorum, the meeting called for this day lapsed.

TUESDAY, 7 MAY, 1878.

MEMBERS PRESENT:—

Mr. Roseby, | Mr. Greenwood,  
Mr. Charles, | Mr. Eckford,  
Mr. J. Davies.

In the absence of the Chairman, Mr. Roseby called to the Chair *pro tem*.

Mr. Samuel Johnson (*Sub-inspector of Police*), called in and examined.

Witness withdrew.

Mr. James Rush (*Sub-inspector of Police*), called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That J. B. Oliffe and Mr. Edmund Fosbery be summoned to give evidence next meeting.

[Adjourned to To-morrow, at Two o'clock.]

WEDNESDAY, 8 MAY, 1878.

MEMBERS PRESENT:—

Mr. J. Davies, | Mr. Charles,  
Mr. Eckford.

In the absence of the Chairman, Mr. Davies called to the Chair *pro tem*.

Edmund Fosbery, Esq. (*Inspector General of Police*), called in and examined.

Witness

Witness *handed in* paper containing suggested Amendments to the Bill, which was ordered to be appended. (*See Appendix A.*)  
 Witness withdrew.

1877-8.

LÉGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

## SUNDAY SALE OF LIQUORS PREVENTION BILL.

WEDNESDAY, 3 APRIL, 1878.

Present:—

MR. CHARLES,  
MR. CAMERON,  
MR. J. DAVIES,MR. DRIVER,  
MR. ECKFORD,  
MR. MERRIMAN,

MR. ROSEBY.

RICHARD DRIVER, Esq., IN THE CHAIR.

Mr. Henry Wager called in and examined:—

Mr. H.  
Wager.

1. *Chairman.*] What are you? An Inspector of Police.
2. You have held that position for many years? I have been in the police here for some years.
3. During that time has your attention been directed to the working of the present Publicans Act? It has not; I have not had anything to do with the supervision of public-houses. It 3 April, 1878.
4. Not in your official capacity? No.
5. As a citizen, have you noticed the opening of the different public-houses on the Sabbath-day? I believe the public-houses are open on the Sabbath-day.
6. But you have not noticed it yourself? In passing I have sometimes seen the side-doors open.
7. Do you know of your own knowledge whether the opening of these houses on the Sunday is fraught with any mischief or annoyance to the general public? I think it would be a good thing to have them closed on the Sunday.
8. Can you give any reason for thinking so? I am under the impression that there is more drunkenness on the Saturday and Sunday than on other days.
9. The drunkenness on Saturday could not be caused by opening public-houses on Sunday? No.
10. You have not given the matter any attention at all? No.
11. *Mr. Cameron.*] You have said you believe it would be better if the public-houses were closed all day on Sunday; of course you are aware that under the present law they are closed on Sunday, with the exception of two hours—that as a matter of fact they do not open their front doors and conduct business openly, except during these two hours? I have never seen the front doors open—I have seen the side doors open occasionally when I have been passing.
12. The opening of the side doors to which you allude is evidently a breaking of the existing law? I could not say that; they might have their side doors open without breaking the law.
13. It is against the present Act, is it not? I do not think it is against the Act for them to open the side doors.
14. *Mr. Charles.*] During the hours the law now permits public-houses to be open, do they open the front doors? I have not seen the front doors open.
15. Do you think drinking is carried on during the prohibited hours as well as during the permitted hours? I think it is.
16. *Mr. Davies.*] I suppose the police are powerless under the present law? I have always regarded it so, although I have not myself had anything to do with the supervision of public-houses.
17. Do you think that if the police could go into public-houses, with the view of enforcing the law, it would prevent the illicit sale of drink? I should think so.

Mr. H.  
Wager.  
8 April, 1878.

18. *Mr. Charles.*] Do you think it would be safe for your own Force that they should have power to go into public-houses during prohibited hours, both as regards the law and giving them an excuse for entering, probably for the purpose of drinking? I think I would restrict the visitation to officers and non-commissioned officers—I think they could be safely trusted with that power.
19. *Chairman.*] Do you recollect the case of Mr. Smith, of the "Glasgow Arms," where Inspector Read insisted on forcing his way upstairs? I think that must have been seventeen or eighteen years ago; I am only in my sixteenth year of service; it occurred before my time.
20. Do you think the closing of public-houses between 1 and 3 o'clock on the Sunday would be inconvenient to persons who are in the habit of getting their dinner beer from public-houses? It might be inconvenient to some people.
21. Do you know, as a matter of fact, that very many respectable people do send for their dinner beer during those hours? Yes, I believe they do.
22. *Mr. Cameron.*] Take the case of a man who works all the week out in the sun, and never has a hot dinner with his family except on Sunday,—do you not think it would be a hardship to prevent him from getting beer for his dinner? I should be sorry to deprive any man of his beer, or inflict anything like hardship upon him.
23. Are you not aware, as a citizen, that a large number of the working classes send for their beer in that way—men who are never convicted of any breach of the law against drunkenness? No doubt they do.
24. *Mr. Davies.*] You think it would be better for the morals of the people to have public-houses closed on Sunday? Yes.
25. *Mr. Cameron.*] The class of men who send for their dinner beer in the way I have alluded to are not those who loaf about the public-houses all day on Sunday? I believe not.
26. *Chairman.*] Can you give any reason for thinking public-houses should be closed on Sunday? I think it would tend generally for the public good.
27. Why? Probably there might be less disorder.
28. *Mr. Cameron.*] Do you think there is much disorder consequent upon the fact that public-houses are permitted to be open for two hours on Sunday? There is a good deal of drunkenness which may be attributable to that.
29. *Chairman.*] Have you visited any other cities besides Sydney? Yes.
30. Is there more drunkenness in Sydney, taking the population into consideration, than in other cities you have visited? That is a question I cannot answer.
31. Do you attend many of our large public gatherings? Yes.
32. Have you found in any part of the world any more orderly people? I should wish to speak with great respect of them; I think they are very orderly.
33. *Mr. Eckford.*] Do you think we should legislate for the greater number or the few—In reference to Mr. Cameron's question in regard to people getting their dinner beer on Sunday; I would ask whether you think the few people who want their dinner beer should be compared with the greater number who go into public-houses getting drunk and annoying people? I think legislation should be for the benefit of the larger number.
34. Do you think the larger number are those who get their dinner beer on Sunday, or the people who go about drinking from one house to another? It is rather a difficult question; but I think those that go drinking from one house to another would be the larger number.
35. *Mr. Cameron.*] Do you think so as the result of observation? It is my impression. Passing along one sees these side doors open, which leads one to infer that drinking is going on.
36. *Mr. Charles.*] Do you consider that the greatest amount of drunkenness takes place in the permitted or in the prohibited hours? I think within the prohibited hours.
37. *Mr. Davies.*] If the public-houses were not open at all on Sunday, and the police had power to go in, there would be scarcely any drunkenness at all? I should think it would tend to check it.
38. *Mr. Cameron.*] I suppose the evasion of the present law, which is glaringly carried on, could be equally carried on under any new Act? I do not think it could be equally so.
39. For what reason? Because if the police had power to enter public-houses they could prevent the evasion of the law.
40. Would you be in favour of giving power to the officers you have mentioned to enter at any hour of the day or night? They would have sufficient discretion not to go at any hour that would be offensive to the family of the publican; for instance, they would not call the publican out of bed to inspect his house.
41. We have heard that on one occasion when a publican—a very respectable man—had a birthday party in his house, the police, seventeen years ago, setting aside every kindly feeling, insisted upon going into the place where the guests were, and broke up the social gathering? I do not think that would happen again under proper restrictions.
42. Still you must admit the liability? I do not think there would be much complaint if the visitation were confined to officers and non-commissioned officers.
43. *Mr. Davies.*] Do you think that too many licenses are granted? I think there are too many public houses—they are much too close together.
44. Do you know anything of the general character of the publicans? I believe the general character of the publicans to be respectable.
45. *Mr. Eckford.*] Do you think that if the accommodation required by law was made more than it is at the present time it would tend to put down disorderly houses—that the houses would be kept by more respectable persons, and in a more reputable manner if larger accommodation were required? It might have that effect.
46. *Mr. Davies.*] Do you know the number of convictions that took place last year for Sunday selling? No.
47. Your duties do not bring you into direct contact with the publicans? No.
48. Your business is more with the detectives? Yes.

The Reverend Joseph Barnier called in and examined:—

Rev. J.  
Barnier.  
3 April, 1878.

49. *Chairman.*] You are a clergyman of the Church of England, and incumbent of St. Barnabas's, Parramatta-street? Yes.
50. Are you acquainted with the objects of the Bill recently introduced into Parliament for the amendment of the Licensing Law? Yes, I have read it.

Rev. J.  
Barnier.

3 April, 1878.

51. Has your attention been at all directed to the traffic in drink on the Sabbath-day? Yes.
52. Do you think the entire closing of public-houses on that day would be attended with benefit to the community generally? I do decidedly.
53. For what reason? A large number of persons are led to drink just according to the facilities put in their way. Many who now go into public-houses to drink would amuse themselves otherwise if the public-houses were closed.
54. Do you say that of your own knowledge, or is it merely your opinion? My opinion based upon observation of the young men and labouring men amongst whom I move very freely—a great many of them; and I may add one fact, that I see every Sunday a large amount of drinking in the public-houses past which I walk.
55. At all hours? Certainly at the hours I pass them.
56. That is during the prohibited hours, not between 1 and 3? Principally in the evening, going to evening service and coming from it.
57. Do large numbers of persons frequent the public-houses you have spoken of? As well as I can judge without going into them, they do; judging by the numbers that pass in and out, if you stand a few minutes, and the noises you hear inside.
58. Have cases been brought under your notice showing the evil effects of this Sunday drinking? I very frequently on Sunday night meet men who are the worse for drink, and large knots of men who, if not drunk, are behaving as if they were slightly drunk, at the corners where the public-houses are situated.
59. Outside the public-houses? Yes.
60. Of course you could not say whether these men have been supplied with drink inside these particular public-houses or not? I could never swear to anything I do not know, but I firmly believe they have. They go in, and come out wiping their mouths.
61. How long have you been in the Colony? Since 1849.
62. Before arriving in the Colony where were you stationed? I was only a lad in Dublin—sixteen years of age.
63. Then you have no knowledge of the licensing laws in any other country? Personally none. I have been on the Lachlan, at Forbes, and Currajong, now Parkes, and down the river, as well as in Sydney.
64. Do you think many persons are led to the non-observance of the Sabbath-day by reason of public-houses being open? I think so few persons who keep the Sabbath go into them that it would be right to say they are. Young people are met by companions who bring them in to drink.
65. You have seen that? I have seen that. I know some of the adult members of the Sunday School who are led away in that way.
66. Do you know of any cases where young men have been led on to destruction, as far as worldly matters are concerned, by reason of this practice? You mean by reason of the actual drink taken on Sunday?
67. Yes? That question could scarcely be answered, because drinking once a week could hardly destroy any man or boy.
68. Then, according to that, you do not object to drinking once a week? That is quite another thing. I am asked whether I know of any case where Sunday drinking has destroyed any man or boy; I cannot attribute such a result merely to Sunday drinking; but Sunday drinking may confirm a habit of drinking at all times. I do not myself drink at all.
69. You object to the use of intoxicating liquors of any kind? Yes, except medicinally. I object to the gathering of people about the doors of the public-houses. Parramatta-street is unpleasant to walk through on Sunday, owing to the groups that gather round the public-houses. They pass in and out freely on Sunday the same as on a week-day.
70. You object to the licensing of public-houses in any locality, do you not? I would not like to say that—that is quite another matter. I suppose hotels will be necessary. I would like to banish them from my own immediate neighbourhood if I could, from personal tastes and habits; and I proved my sincerity in that by spending ten guineas, which I could not well afford, to try and stop the opening of a public-house, but I was defeated.
71. Do you think the example set by people lounging about the doors of these public-houses is fraught with danger to the rising generation? I do, emphatically.
72. *Mr. Cameron.*] Of course you are aware that the present law only allows public-houses to be open two hours on Sunday? I am.
73. You have had a large amount of dealings with people in the humbler classes of life—working men and others—in your parish? Yes.
74. I suppose you are aware that many of these men in the building and iron trades never get home to a warm meal except on Sunday? Yes.
75. Is it not the fact that a large number of these men, who are by no means addicted to intoxication, send out for a pot of beer to have on their dinner table on Sunday? It is generally asserted to be the case. As far as I can see, the jug trade is nearly as active on a week-day as on a Sunday.
76. Would you imagine that the class of men to whom I allude are the class of men who violate the existing law by frequenting public-houses on Sunday? No; you may make a distinction between the two classes.
77. Would you favour or recommend any scheme of legislation which would, in an arbitrary manner, deprive the sober subject of that benefit? I think the right-minded men to whom you allude would give way on account of the evil influence on the rising generation resulting from the sale of liquors on that day. I make a very wide distinction between the respectable artisan and the class of people who frequent public-houses on the Sabbath.
78. Still it is a fact that many respectable artisans act, so far as the liquor traffic is concerned, in the way I have indicated, but go no further? I will not say no further. I do not say they would loaf about public-houses; but if they had nothing particular to do they would go in to drink; whereas if drinking facilities were not put before them they would not trouble about it.
79. Alluding to the nuisance of people congregating at the street corners on your route to and from church on the Sabbath,—you are aware that I know the locality you speak of pretty well. At the corner of Bay-street a number of people are in the habit of congregating in front of the public-house there, and conversing in louder tones than they ought; but is it not so also on the opposite side of the street where

Penny's

Rev. J.  
Barnier.  
3 April, 1878.

Penny's chemist's shop was, now occupied by a Bank—are you aware that a number of youths stand there on the Sabbath evenings and joke and laugh, conducting themselves not altogether in a quiet manner? They stand there certainly, but they are largely recruited from the opposite side.

80. Is it not the fact that at one time the authorities of St. Barnabas had occasion to complain of people congregating outside the church and causing annoyance? Yes; wherever there is a large congregation you will always find numbers who will take advantage of a public gathering to do a little "chatting and flirting" and so on.

81. Is it not the fact, sometimes, that whether there are public-houses there or not, the street corners are the rendezvous for knots of people? Yes, but without the blasphemy and reeling men and accompaniments of that sort which I assert I have seen and heard at the corner of Bay-street. There is nonsense and joking going on at the other side, but at the public-house side there is worse.

82. Is this mostly confined to the evening—is it worse in the evening? It is; but I say that in the morning I see the passing in and out of the house. Of course there is not so much noise and bustle and outward appearance of the evil in the day-time as in the night.

83. Looking at this matter from a theological point of view, so far as Sabbath observance is concerned, is it not a fact that people attending your own and other churches have been annoyed by barbers' and butchers' shops being open on Sunday? Yes, decidedly.

84. Would not the same argument require the arbitrary closing of these places? There is this difference,—the one to a large extent is obtruded upon the public notice; but in the other the business is conducted in-doors, and does not offend the eye or the ear—it is not obtruded upon one's notice as in the other case.

85. Have you noticed groups of young men standing outside the hairdressers' shops in the immediate locality of your church? I have not. I have paid particular attention to the houses on some occasions, and if the shutters had been up I would not have known the business was going on.

86. With reference to the granting of licenses, are you of opinion that too many licenses are granted on the one hand, and that injustice is sometimes done on the other hand, by the mode in which licenses are at present granted? I believe so; there are too many licenses granted.

87. Are you of opinion that the present mode of granting licenses, by the Courts of Petty Sessions, is a bad one? I think so—it is liable to great abuses.

88. Could you suggest anything to the Committee as an improvement upon the existing system? I have hardly made up my mind about that. I would like to have a Licensing Board; but whether that Licensing Board should be elected by the people or appointed by Government nomination I confess I have not made up my mind. I would like some plan by which the people would have some voice in regulating the number of houses in a given district; but I confess I see that the matter is surrounded with great difficulty.

89. Are you of opinion, from what has come under your personal observation, that a good deal of the drink sold in some of the public-houses is adulterated? I only suppose so from observing the very bad effect it has upon the men who drink it.

90. Do you think that the appointment of an Inspector of Liquors to see that the people are actually getting what they buy, would have a good effect? Decidedly.

91. You think that would tend to prevent drunkenness and immorality? I believe so.

92. With reference to the power proposed to be given in this Bill to the police—you will find a clause empowering the police to enter, at any hour of the day or night, into licensed public-houses, to see that the Act is being complied with; and where admission is not promptly given, the police are to be armed with power to break in—Do you not think that, where a respectable publican carries out the law, this power in the hands of the police might be very liable to abuse? As every power is liable to abuse—but how is the police officer to know that the law is being carried out without this power is given to him?

93. Do you think it would be well to give this power only to such special officers of police of a certain grade as would hedge it round from the probability of abuse? I was going to say it would be better to excise the words "any constable" from the clause.

94. Do you not think it would be wise to limit this power to officers of police? I think so.

95. Of course you are perfectly aware that a large amount of Sunday selling takes place in violation of the Act, outside the permitted hours, from 1 to 3? Yes.

96. Do you think the provisions put forward in this Bill would be much less likely to be abused than those of the existing law? That is a very nice question—that would depend greatly upon the Executive—it is a question of administration.

97. *Mr. Eckford.*] Do you consider that closing the public houses on Sunday would add to the morals and well-being of the people? Yes.

98. Do you think that keeping them open from 1 to 3 is an injury to the morals and well-being of the people, or, in other words, do you think that during those permitted hours people go and get drink who would not otherwise think of it? I believe so.

99. If the public-houses were closed they would never think of getting drink at all? I think not—only in exceptional cases.

100. *Mr. Cameron* put it to you just now with regard to mechanics and others getting their dinner beer on Sunday: do you think the injury done to other people by allowing the public-houses to be open is not far more than the little benefit these people may derive in the way spoken of by *Mr. Cameron*? Yes.

101. Do you think that if the law required that the accommodation afforded by public-houses should be larger than what it is—for instance, more rooms—supposing a house gets licensed now with six rooms, do you think that if no house were licensed without ten or twelve rooms that would tend to do away with mere drinking shops and add to the number of the better class of houses? It would certainly lessen the number of houses licensed; many of those at present licensed have not the necessary number of rooms.

102. You think it would do away with many of the drinking shops? Yes, it would lessen their number.

103. *Mr. Davies.*] Have you anything to suggest with reference to the subject of intoxicating liquors, with a view to mitigate the evils that accrue from the Sunday traffic in drink? To enforce the present law would lessen them very largely, I think.

104. You think that if the present law was enforced it would confine the traffic and sale of drink to two hours in the day? It ought to—that is the law. The publicans are said to be law-abiding members of the community.

105. Do you not think that to open the doors of public-houses at all on Sunday, even for dinner beer, gives an

Rev. J.  
Barnier.

8 April, 1878.

an opportunity for people to get in and remain there? Yes, decidedly. A great deal depends upon opportunity.

106. As a rule, people go in during the two hours the houses are open and remain about the public-house afterwards? Yes.

107. *Mr. Cameron.*] Have you noticed that from your own observation? I have in this way, as matter of complaint to me from wives and others interested in the welfare of the men.

108. *Mr. Davies.*] Do you know of any cases where persons have become addicted to habits of intemperance in consequence of Sunday drinking? It would be hard to decide between the effects of Sunday drinking and week-day drinking. I have known of many sad cases of intemperance, but I could scarcely say they originated in Sunday drinking. In many cases persons disappear from their homes on Saturday night and are not found again until found in the lock-up on Monday morning.

109. Do you know of cases where mechanics and others have spent all their money in drink on Saturday and Sunday, or on Sunday only? I could not trust my memory with individual cases of that sort.

110. With reference to the inspection of public-houses by the police, you think it will be necessary, in order to carry out the law in respect of Sunday closing, to give the police power to enter public-houses? Yes, guarded by some restrictions.

111. *Chairman.*] What would you consider proper restrictions? I think a written order from a Justice of the Peace would be a sufficient safeguard. I have seen constables going into public-houses, but I do not know for what purpose. My impression is that they had been drinking, some of them; and I have it from pretty good authority, from a person whose back premises overlooked a public-house, that it happened very frequently that constables were seen to go in.

112. *Mr. Davies.*] As far as your observation goes, have you any knowledge whether the Sunday traffic in drink is the means of producing crime and immorality? I think the Police Office reports tend to prove that crime does come from the Sunday traffic.

113. Are you aware that Monday's police records prove that there is a great deal more drunkenness on Sunday than on any other day in the week? Yes.

114. In your position as a clergyman, have you seen the ill effects from Sunday drinking in the families of those who drink? I am afraid to trust myself to speak of it for fear it should be said I indulged in parson's declamation. My heart aches every day that I get up. Not a day passes but I have one or more heart-breaking cases brought under my notice; not amongst the worse class of people either, but some of the cleverest artisans in Sydney. A man has told me he scarcely dare take off his boots lest his wife should pawn them for drink; and I know of another case of a stonemason which is nearly as bad.

115. *Chairman.*] Are these cases brought about by Sunday drinking alone? By drinking habits which I contend are fostered by drinking on the Sabbath.

116. The case you speak of now is the case of a female? They are both given to drinking. She gives just the same account of him. He is a favourite with his overseer, or he would have been dismissed from his employment long ago. In that house there is literally not three-penny worth of anything.

117. *Mr. Davies.*] Do you think public-houses in Sydney are in excess of the requirements of the people? I think so, certainly.

118. What is your opinion of the present mode of granting licenses? It is very bad.

119. Do you think the appointment of a Licensing Board would be the means of mitigating the evils that accrue? I wish I had given that matter more attentive consideration than I have done; I feel that I have not read this most important clause as carefully as I should have done.

120. *Chairman.*] Have you made yourself familiar with the police reports in the cases to which you have referred, as to the crime resulting from the use of drink on the Sabbath? I read it in the *Herald*, but I have not taken any other notice of it.

121. You have no personal knowledge of it? No.

122. Do you know, as a matter of fact, that under the law as it at present stands a publican is not entitled to supply any one with liquor to be consumed on the premises at any time on the Sabbath-day? I have heard that that is the law, but in my innocence I never could get it to fit in with what I have seen every Sunday.

123. Do you think that if the law in that respect were honestly carried out there would be much reason to complain? It would go a long way to the attainment of my object.

124. A very long way indeed? Yes, especially with the inspection of drink.

125. Do you not know that the law provides a penalty for any person selling adulterated drink? I believe it does; but I am a plain honest man—I do not understand the law, because I see that it is broken. I suppose the law in these respects is in the Statute Book, but the law written and the law administered are so different that they puzzle me.

126. *Mr. Davies.*] Supposing the law is as stated by the Chairman,—would it not pay publicans to break it, and carry on the sale of liquor all day on Sunday, when the fine, on conviction, is so low as not to exceed 10s.? No doubt it would.

127. *Mr. Merriman.*] What is your reason for thinking that if public-houses were closed all day on Sunday there would be less drinking—are you not aware that there are lots of small houses or shops about the city that on Saturday night get stocked with liquor to sell to people who want it on Sunday. I allude to private houses. Is it not better that public-houses should be used for that purpose than private houses? I was not aware of that.

128. *Mr. Charles.*] In regard to the inspection of drink, do you think the inspection should extend to the stores of the spirit merchants as well as the public-houses? I have always understood that that is done to some extent now.

129. *Chairman.*] No, not in any way? Decidedly it ought to be so.

130. I suppose you know nothing personally of the trade in drink—of the mode in which liquors are supplied to publicans? No.

131. You do not know that a very large number of the public-houses at the present time are entirely in the hands of the brewers and spirit merchants? That I am credibly informed is the case. The statement appeared in the report of the Licensed Victuallers' Association.

Sub-inspector Robert Anderson called in and examined :—

Sub-inspector  
R. Anderson.  
3 April, 1878.

132. *Chairman.*] You are a Sub-inspector of Police? Yes.
133. And have been a member of the Police Force for many years in this city? Twenty-four years.
134. During that time has your attention been directed to the working of the present Publicans Act? Yes.
135. You have had large experience in the workings of that Act, have you not? Yes.
136. Has your attention been directed in any manner to a Bill now before Parliament, with reference to an amendment of that Act? Yes.
137. Have you considered the question in its various bearings? I have looked into it as far as I could in the little time I have had.
138. I suppose you are aware that a large number of public-houses are open on the Sabbath-day? Yes. I have 174 public-houses in my sub-division, and of these only five or six are closed entirely on the Sabbath.
139. That is, they do not open at all? No, not even during the time allowed by law.
140. Can you say that many of them openly violate the law? They do, a great many of them; there are some worse than others.
141. Is it not possible with the means in your power to check it? I have done my very utmost to check it; but the police not having the power to demand admission, I cannot do much.
142. Do you not know as a matter of fact, that, without permission, many members of the Force enter when they see the doors open? They do; but they do what they have no power to do.
143. But they do do it? They do do it. During the past year I have had 188 convictions under the Publicans Act in my division, most of them for Sunday selling.
144. What is the general character of the houses that openly violate the law in that respect? The worst of the houses, in my opinion, are those that keep open most part of the night; I have about fifteen of that class.
145. And you find it impossible in the present state of the law to check it? Utterly impossible; I have tried every means in my power to do it.
146. Then in your opinion there is not so much harm done by opening on the Sunday as there is by keeping open late on the Saturday night? I think there is more harm done by their being open after 12 o'clock on Saturday night than by being open on Sunday.
147. You know, as a matter of fact, that large numbers of persons are brought before the Police Courts on Monday morning charged with drunkenness? Yes. In my division there were 4,347 persons brought before the Court for drunkenness, 632 for being drunk and disorderly, and 328 for riotous behaviour, chiefly arising from drunkenness; making a total for the year of 5,307. About half of these had been arrested between the hours of 10 p.m. and 2 a.m.
148. Are we to understand that a far larger number are arrested on the Saturday night, or between 10 p.m. on the Saturday night and 2 a.m. on the Sunday morning, than during the remainder of the entire Sabbath? I would not say that. Taking all the year round, I think about half the number of drunkards are locked up between 10 p.m. and 2 a.m., that is, during four hours of the twenty-four.
149. Not on the Saturday night? I am not speaking specially of the Saturday night.
150. Can you give any idea of the number arrested on Saturday night? There is a very large number; I did not examine that particularly—Saturday night more than any other night.
151. How are these persons usually dealt with? They are fined in sums varying from 5s. to about 20s., with the alternative of going to gaol.
152. As a rule do not most of them go to gaol? Not all of them.
153. A great many of them? Yes. Out of the number I have mentioned there are 152 females and 54 males who are incorrigible drunkards, and on the average have been locked up nine times in the year; so that they would account for 1,854 convictions out of the number stated.
154. You find these persons are arrested over and over again for drunkenness? Yes.
155. Do you consider that the opening of the public-houses between 1 and 3 o'clock on Sunday is a nuisance? I do not know that there is much complaint to be made about that. I do not see any practical difference between the front doors being open and the side doors being open. They do as much business during the rest of the day as between 1 and 3 o'clock.
156. Have you not frequently seen numbers of respectable people sending to the public-house between 1 and 3 o'clock on Sunday for their dinner beer? Yes; they sell more for out-door consumption between those hours; but I question whether there is more drinking in the public-house then than what there is during other hours.
157. As a matter of fact, as the law stands at present, a publican is not permitted to sell, at any time on Sunday, drink to be consumed on the premises? No, he is not.
158. In your opinion, is the number of public-houses in Sydney in excess of what is required? Very much so.
159. I suppose you are tolerably well acquainted with the characters of the publicans in your division? Yes.
160. As a rule, are they respectable men? Yes, there are a large number of highly respectable men.
161. Whose houses are conducted with very great credit? Yes.
162. On the other hand, do you consider that there are a number of them who are totally unfit to be licensed? Totally unfit to be licensed, and they keep disreputable houses.
163. *Mr. Cameron.*] Do you mean that they are houses where immoral practices are carried on? Perhaps I would not be able to prove that; but there is very little doubt that it is so with many of them.
164. *Chairman.*] You have strong grounds for suspecting them? I have.
165. Is there not a number of them frequented by prostitutes of the very lowest class? Yes.
166. Have you used every exertion in your power to put such houses down? I have.
167. And without effect? Without effect. I think they are better than they were. They know the police have not the right to enter. In some cases they keep a watch upon the movements of the police. I know one house where they employ three watchmen—two in the street and one looking out of the window—to watch the police. When I could spare them, I have sent a sergeant and a man occasionally to watch that place. One Sunday morning, between 1 and 2 o'clock, I stood near that house, and nineteen prostitutes and seventeen men came up to it while I was standing there.
168. Do you think the opening of the public-houses on the Sunday leads to the commission of crime in any way? No doubt a deal of drunkenness arises from it. I speak more particularly of the lower class of

of public-houses. I classify the 174 public-houses in my division something like this:—13 large family hotels, with splendid accommodation for travellers; 28 good hotels, well conducted; 75 very fairly conducted, 43 badly conducted, and 15 very badly conducted.

Sub-inspector  
R. Anderson.

3 April, 1878.

169. Do you think the entire closing of public-houses on Sunday would lead to any inconvenience to persons arriving by steamer or otherwise from a distance? If the whole of them were closed it possibly might; no doubt it would lead to inconvenience in that way if the whole of them were closed, but persons arriving in that way would be travellers under the Act.

170. Are not some of the class you speak of as incorrigible drunkards, both male and female, included in the list of petty thieves? Yes.

171. In your opinion, what amendments are necessary in the present system? The most important is to give the police power to demand admission.

172. Would you propose conferring that power on all members of the Force? Certainly not.

173. If it were so, is it not likely it would be abused? Yes, I believe very likely it would. I would give it to all officers and sergeants specially authorized by the Inspector General.

174. To enter at any time by day or night? Yes, having reasonable grounds to believe the law was being broken.

175. Not upon hearing any disturbance or anything of that kind? I would give them the power of entry if they had reasonable grounds for believing the law was being broken—that gambling or any other breach of the Act was going on.

176. Do you think that if the law as it at present stands were carried out in its integrity there would be no great reason to complain? We cannot carry out the law.

177. If it were possible to carry it out? If we had power to demand admission a great deal could be effected under the present Act.

178. Have you at any time heard complaints as to the quality of the drink sold in some of these houses? I have.

179. Have you any means of judging whether these complaints are well or ill founded? I believe the quality of the liquor sold in many of the houses is bad, but I do not think that adulteration is practised as much as is generally supposed.

180. I suppose these bad liquors are sold in the lower class of houses? Yes; damaged beer and Queensland rum, which has a very pernicious effect upon those who drink it, being new.

181. Have you heard any complaints at all about the liquors being adulterated? I have heard complaints of that kind; I have heard men saying that one single glass of liquor has made them quite stupid.

182. I suppose you have no reason to doubt the truth of the statement? No, but that might have been administered for a purpose—probably it would be.

183. You are acquainted with the mode in which licenses are obtained: could you suggest any improvement? I think it would be a great improvement to have a Licensing Board elected by the Magistrates themselves at the beginning of each year, then there would be some uniformity of action.

184. What guarantee would there be for that? If the same Magistrates had all the licensing business, it might be expected that all their decisions would be more uniform than they are at present.

185. *Mr. Cameron.*] Have you had occasion to interfere between the hours of 1 and 3 on Sundays, so far as drunkards are concerned—do you notice any large amount of drunkenness between the hours during which publicans are now allowed by law to sell on Sundays? No.

186. I suppose a good many of the working class reside in the division over which you have control? Yes.

187. A considerable number of these people, who very seldom get a dinner at home with their families except on Sundays, are in the habit of sending for their dinner beer during the permitted hours? Yes.

188. They are not the class of people who loaf about public-houses on Sunday and get into a state of intoxication? No. From my own observation I believe four times the quantity of colonial beer is brewed and sold now that there was four or five years ago.

189. The drunkenness you alluded to, in answer to the Chairman, is carried on during the hours prohibited by the existing law? Yes.

190. Are you of opinion that the mere fact of shutting the public-houses for an additional two hours on Sunday would materially influence the drunkenness of these people? No, I do not think it would, as the law stands at present.

191. As the law stands at present, the mere passing of a clause to shut the public-houses during these two hours would not have much effect? It might have effect in this way, that the sending of beer out of doors could be stopped, because under the present Act the delivery is proof of sale.

192. That would operate against a class of people who, as a rule, are not addicted to drunkenness? Yes.

193. By doing this we should simply be depriving them of their right to get their dinner beer on Sunday? Yes.

194. Without having much effect otherwise upon the Sunday traffic in drink? I do not think it would put a stop to what goes on now in prohibited hours.

195. With reference to the power of entry—you have already said you would not advocate granting it to every member of the Force? I would not.

196. I suppose it would be likely to have a pernicious influence upon the men themselves? It might; at all events I would not give it to them.

197. Why—from its liability to abuse? Some of them might go in without sufficient reason, and that would be likely to cause a very bad feeling against the police.

198. Alluding to the convictions for drunkenness: do you find more people drunk between 10 o'clock on Saturday night and 2 o'clock on Sunday morning than between 10 o'clock on Sunday night and 2 o'clock on Monday morning? Yes.

199. Is the number apprehended for pure Sunday drinking, not Saturday night drinking, very large? Yes; there are more drunkards apprehended from 12 o'clock at night on Sunday till 12 o'clock at night on Monday, than during any other similar period in the year; but a great many of them get drunk on Saturday night.

200. *Chairman.*] By far the larger portion of them? I think it would be a great advantage, and do more good, if a great many of these houses were compelled to shut at 10 o'clock. In my division there are 174 houses, and I think at all events more than 100 of them ought to shut at 10 o'clock. I have not the slightest doubt that that would effect a better reform than anything you could do.

201. *Mr. Cameron.*] Have you ever had the opportunity of observing the public-house system in any other large city? No.

Sub-inspector  
R. Anderson.  
3 April, 1878.

202. Would you advise that a classification of houses should take place with a different scale of licenses? Yes, I think it would do good.
203. Under the present system a small house in the suburbs pays as much as the "Royal Hotel?" Yes. The thirteen large hotels I have mentioned require no supervision at all, and the twenty-eight I have classed as good hotels scarcely any.
204. *Mr. Eckford.*] How would you draw the line when making some of the houses close at 10 o'clock? That should be a question for the Magistrates chiefly—whether they were required to be open till 12 o'clock.
205. Do you think more accommodation should be required in licensed houses than at present. For instance, if, instead of licensing a small house of six rooms, the number of rooms were brought up to ten, do you think that would bring about a more respectable class of public-houses? Unquestionably it would.
206. Do you think that any house containing only six rooms ought to be licensed? No, it ought not.
207. Do you think, so far as your observation and experience extend, that there is more drunkenness on Sundays than on other days in the week? By some of the low class of people I have mentioned drunkenness is more indulged in on Sundays than on other days; in fact, I have had so many complaints about these drunken vagabonds lying about the streets on Sundays, when people are going to church, that I have had occasion to bring out some of my night-duty men at 10 o'clock on the Sunday morning to apprehend them and clear them off the streets; but I do not think, speaking generally, that there is more drunkenness on Sundays than on other days.
208. Which do you think the greater evil of the two, to allow drunkenness to the extent you have spoken of, or to deprive the temperate man of his dinner beer on Sunday? I could hardly say; it would require some consideration. I think drunkenness could be suppressed, and still time might be allowed for the working man to get his dinner beer. I have often thought it would be better to have the houses open only from 1 to 2, instead of 3, and from 9 to 10 in the evening. Many of the working class have complained that they are unable to get their supper beer lawfully on Sunday evening, and I think that while, by giving the police the power of entry, the prohibited hours might be strictly enforced, still the public-houses might be allowed to open for an hour in the evening to meet complaints of this kind.
209. *Chairman.*] Does that complaint emanate from respectable temperate men? Yes. I remember a case in particular where a stonemason, employed at Manly Beach, and only home on the Sunday, went to church with his wife, who afterwards went with a jug to the public-house for some beer, when a constable saw her, and summoned her. The husband made a complaint to me that it was very hard not to be allowed to get a glass of beer for supper.
210. *Mr. Eckford.*] Have you not the power now to go into public-houses? No, not unless we hear a disturbance.
211. Is there not a clause in the present Licensing Act giving the Justices the power to refuse a license if they choose? There is some doubt about the interpretation of the clause.
212. What is your own opinion? The word "may" is employed, and I think that gives them power to grant or refuse.
213. *Chairman.*] The Justices very often act upon that view? Yes, some of them do.
214. *Mr. Eckford.*] In the course of your experience do you recollect that any innkeeper has ever been brought up for allowing people to get drunk upon his premises? Yes. I have had some cases myself.
215. And have got convictions? Yes.
216. In the same way have you known the parties who got drunk to be likewise summoned? Yes, when drunk and disorderly.
217. On the premises? Yes.
218. A publican is punishable for permitting drunkenness upon his premises? Yes.
219. Do you think the law is sufficiently stringent in that respect? Yes, if the police had the power to go in and see what condition the people were in.
220. *Mr. Davies.*] Is it not a fact that there are more convictions on the Monday for drunkenness and minor offences than on any other day in the week? Yes, that includes all apprehended on Saturday and Sunday.
221. More than any other two days in the week? I could not say.
222. What is the general average? I have not got that with me. The number of cases at the Central Police Court ranges from fifty to seventy.
223. I understood you to say that many of those locked up on Sunday are old vagrants? Yes.
224. Is it not a fact that many of the public-houses are doing a roaring trade on Sunday, when the shutters are up and the doors are closed? Yes.
225. In direct violation of the law? Yes.
226. And the police are powerless to enforce the law? Yes, as the law with respect to the power of entry stands at present.
227. Has your attention been called by the public to the inconvenience and nuisance occasioned by these public-houses doing this trade on Sundays? Yes, I have had most complaints with respect to these drunken vagabonds I have spoken of, in my division—the central division.
228. Is there not a large amount of drunkenness, apart from these vagrants, on Sunday? Yes, there is a good deal of drunkenness.
229. If the large number of public-houses of the lower class in your division were depending solely on the vagrants, do you think it would be worth their while to keep open on Sunday? All the money the vagrants have they get.
230. The habitual drunkards are comparatively few? No; there are more than I have got here; but there are 206 in my division, the west side of the city—152 women and 54 men, on an average convicted nine times a year. That would reduce my list of drunkards very considerably.
231. If the police had power to inspect and find out violations of the law, that would be the means of checking drunkenness on Sundays? Yes, unquestionably.
232. Do you know of your own knowledge that, where the police have objected to applicants for licenses on the ground of their immoral character and being unfit persons, the Magistrates have nevertheless frequently granted licenses to such persons? They have done it sometimes where they have been objected to.
233. In the face of objections raised by the police, licenses have been granted? Yes.

234. Do you think a Licensing Board would be the means of remedying a good deal of the evil? Yes, if the same Justices were to hear all cases it would be a great improvement. Sub-inspector  
R. Anderson.
235. You think it would be the means of preventing improper persons getting licenses? Yes.
236. Do you know the gross number of convictions that have taken place for Sunday selling during last year? No, I do not. 3 April, 1878.
237. What is the number in your division? 188 under the Publicans Act.
238. What is the average fine? From 10s. to 40s. Sometimes for permitting drunkenness or allowing prostitutes to assemble there have been higher fines. I think it would be a great advantage if the public-houses were inspected annually. I may just mention one case. About six months ago I had a complaint about immoral conduct being carried on in a public-house in Clarence-street. I went and visited it myself between 8 and 9 o'clock. I went into a side apartment; there was a young girl of about twenty years of age behind the bar, and two men standing drinking at the counter; there were some other persons about the place also; one of the men turned round towards the window and made water in the bar of the house. I found that others had been doing the same, and the place was covered with urine, and the stench most abominable. I went through the house, and there was not £10 worth of furniture in it.
239. And still that is a licensed house? There were two children rolling in human excrement up-stairs. The place was something abominable. I laid an information against the publican and his wife for keeping a bawdy-house, and they were both convicted.
240. How long ago was this? About six months ago. There is a house at the corner of Pitt-street and Market-street, where nineteen persons were seen to enter and fourteen to come out in the course of ten minutes. The publican was standing at the door and admitted them all himself. The constables saw two men go into the side parlour, and the girl come from the bar with a tray and two glasses, and one of the men put something into her hand. That evidence was given, but the case was dismissed.
241. *Chairman.*] Who were the Magistrates? Mr. Chapman, Mr. M'Beath, and Mr. Solomon. We have done all we can under the present law to stop Sunday selling.
242. *Mr. Davies.*] Are you of opinion that the absolute closing of public-houses on Sunday would be the means of preventing a good deal of drunkenness? No doubt it would.
243. The opening of public-houses from 1 to 3 o'clock gives an opportunity for people to go in and remain drinking all day and night? It does, but there are not many that go in and sit and drink in public-houses between these hours.
244. Is it not a fact that the public-houses are full on Sunday evenings? Yes.
245. *Mr. Cameron.*] But not between the hours of 1 and 3? No, they sell beer over the counter then; but there is not so much drinking in the house at that time.
246. *Mr. Davies.*] If the public-houses were closed altogether there would not be so much opportunity? There would not, of course; but I doubt if that would cure drunkenness.
247. Why? Because the love of drink is so strong in some people that they will have it somehow. If you were to close the public-houses altogether it might lead to people drinking in private houses, which is worse than drinking in public-houses. I have been told there is a good deal of private drinking.
248. Do you know of any large amount of private drinking? No, but I am saying that if you completely close the public-houses in all probability there would be a great deal of private drinking.
249. Is it not the fact that there is more drunkenness arising from public-house drinking than from private drinking? Yes.
250. Have you frequently seen people coming out of public-houses drunk on Sunday night? I have seen many the worse for drink, and some drunk.
251. And using bad language? Yes. I am alluding to the low houses I have mentioned.
252. Drinking is pretty general on Sunday night? Yes, there is a good deal of it.
253. The bars, as a rule, are crowded? I would not say they are crowded in all of them.
254. The house at the corner of Market and Pitt-street—do you consider that a low house? No, that is one I would class as fairly conducted.
255. Nineteen persons went in and fourteen came out in ten minutes? Yes, that house might have been doing more than usual that evening.
256. If so many persons passed in and out in ten minutes, the natural inference would be that a very large trade was done in that public-house? Yes, no doubt there was.
257. A fine of 10s. for a conviction in such a case would be a very small punishment? No doubt it would.
258. Even though you see people going in and out in such cases, you have no power to go in and enforce the law? No.
259. Even though the Legislature were to pass a law for compulsory closing on Sunday, it would be ineffectual unless the power were vested in the police to enter and inspect these houses? It would.
260. In several cases, I understand you to say, there have been objections raised by the police to granting licenses to improper persons, and still the Magistrates have granted licenses? Yes; they have sustained the objections in other cases.
261. *Chairman.*] When the objections have been proved? Yes.
262. *Mr. Davies.*] I understand you to say that some Magistrates have an impression that they have not discretionary power to grant or refuse licenses? Some Magistrates say they have not.
263. Do you think it would be well for the Legislature to make the matter clear by giving discretionary power to licensing Magistrates? Yes.
264. Are you clear that some amendment of the present Act is necessary? I think there should be a right of entry by the police. We could do a vast deal of good if we had that power. I should not like to see the large hotels and well-conducted houses interfered with at all—the family hotels or houses where there are a great many lodgers.
265. With reference to the dinner beer, you have stated it is colonial beer that is obtained between the hours of 1 and 3? Yes, latterly.
266. Do you not know that there is now a very large quantity of colonial beer bottled? Yes.
267. And as cheap as draught beer? No, not as cheap.
268. What is the difference? Bottled colonial beer is about 9d. a bottle; but the same quantity can be got for about 3d. on draught.

TUESDAY, 16 APRIL, 1878.

Present:—

MR. CHARLES,  
MR. J. DAVIES,MR. ECKFORD,  
MR. ROSEBY.

RICHARD DRIVER, ESQ., IN THE CHAIR.

The Honorable Sir Alfred Stephen, K.C.M.G., C.B., a Member of the Legislative Council, examined:—

The Hon.  
Sir A. Stephen,  
K.C.M.G.,  
C.B.  
16 April, 1878.269. *Chairman.*] You were for many years Chief Justice of this Colony? Yes.

270. Are you aware of the objects of the Bill now before this Committee? I am.

271. The object is one that has received your attention for many years? It has—more than any other subject that I know of, of a public kind.

272. You are acquainted with the provisions of the present Publicans Act? In a general way I am.

273. In your opinion is an amendment of that Act desirable? I think it is.

274. In what particulars? In the first place, I think the Magistrates as a body ought not to have the licensing of public-houses.

275. Why not? They are too numerous; some of them are incompetent; and those who grant licenses or refuse them one day are not the same who are called upon to adjudicate in similar or the same cases very shortly afterwards; the consequence of which is that a man rightly refused a license in one month is, upon no new evidence, granted a license a month or two afterwards, when perhaps all the witnesses against him and all his opponents have gone. My opinion is that there ought to be no fluctuating body for such an important duty as this, but that the power of licensing or refusing should be vested in a small select body who would be more directly responsible to the public. I should have no objection to a selection from the Magistrates, elected by themselves, provided the Police Magistrate were added, and possibly one or two more—

276. Added by whom? By the Government, the Government being responsible for the preservation of due order, and, as far as may be, of morals.

277. Then you would have a mixed Board, selected from among the Magistrates, partly nominated by the Government and partly elected by the Magistrates themselves? Yes.

278. A mixed Board consisting of how many? About seven—not more; I think five would be enough.

279. How many would you propose should form a quorum? Three; the Police Magistrate being one in all cases.

280. Suppose the case of the illness of the Police Magistrate—It is a fact that the Police Magistrate of Sydney is away on leave now? That would be easily provided for; there might be a Vice-Chairman.

281. Do you know of any case where a license has been refused by one Bench of Magistrates and granted by another shortly afterwards? Personally I know of no such case; but I have heard, on good authority, of several.

282. Can you give the name in any one case? I cannot, for the reason stated; but if there were no such case, I should still say that the system is of necessity a bad one. There can be no system where a body is so largely fluctuating as the Magistrates who attend on these occasions.

283. I suppose you have also heard that some Magistrates seldom or never refuse to grant an application? I do not know that; but I know that there is a great conflict of opinion among the Magistrates; some being of opinion that it is their duty to grant a license whenever the mere requisites of the Act are established, without any reference whatever to the wants of the neighbourhood or the unquestionable evils that arise from the injudicious granting of a license, while other Magistrates are of opinion that they have the power as well as the duty thrown upon them of considering how far the granting of a license will be beneficial to the public or otherwise.

284. Have you also heard that there are a number of gentlemen who never consent to grant a license? I do not know that; I have never heard so; but I should think they err in the opposite direction, although a far better one.

285. That after all is mere matter of opinion? I do not think it can be mere matter of opinion. The evils of drunkenness are so frightful, so extensive, that there can be no two opinions about them; and there cannot be a doubt that if there were no such thing as a public-house in the Colony, and no such thing as the possibility of getting drunk, the face of things in this Colony would change so much for the better, that it would be all the difference between paradise and pandemonium.

286. Do you think it possible to bring so desirable a state of things about? I do not say that in the present state of uneducated opinion it is—with so many persons of drinking habits about us in all directions—some of them persons of position, official and unofficial.

287. Then I gather from your remarks that you are in favour of limiting the number of licensed houses in the city? Yes, very extensively. If you could diminish them two-thirds, I am sure the health, prosperity, and happiness of hundreds of men, women, and children, would be promoted largely by the change. The enormous number of public-houses, according to the statement of the publicans themselves—among whom, beyond all doubt, and to my knowledge, there are many respectable persons—as respectable as any other class—makes it impossible, with the present amount of competition, for all to conduct their houses honestly.

288. Can you furnish the Committee with the name of any one of the publicans who could give evidence of that? I do not know that I can; my acquaintance does not lie so much amongst them as to enable me to do so. I know publicans (without naming them) who are themselves total abstainers, and who would not allow a person to get drunk on their premises on any consideration, and who, I know, have, in some instances, given men water and kept good water for them in order to lessen the effects of drink.

289. This Bill, amongst other things, provides for the closing of the public-houses on the Sabbath—do you think that would be an improvement? My opinion is that it would be an improvement; but I am bound to say that I think there is more difficulty on that question than there is on the others I have spoken of. I have, however, evidence before me, taken before the Committee of the Convocation of Canterbury, to the effect that wherever the system of abstaining from spirit-selling on Sunday prevails, there there is a most wonderful and almost incredible change in the habits of the people. I could quote them; I have the passages lying before me—overwhelming testimony to that effect; the testimony of governors and chaplains

The Hon.  
Sir A. Stephen,  
K.C.M.G.,  
C.B.

16 April, 1878.

chaplains of prisons, superintendents of police, chief-constables, governors of workhouses, and other persons, having the best opportunities of knowing the fact. I could send in a statement on this particular point.

290. *Chairman.*] The Committee will feel obliged by your doing so? I shall be glad to do so. I wish to say that I am President of a Society which advocates the total closing of public-houses on Sundays; and also the transference of the power of licensing from the Magistrates in general to the people. I am in favour of both these objects; but it is proper for me to say that I do not think either of them is likely for the present, or perhaps for a long time, to be carried; and therefore, at present, I advocate a more practicable measure.

291. Then what do you propose with regard to the Sunday traffic? I think, with respect to the Sunday traffic, that no spirits whatever should at any hour be sold, but that, between 1 o'clock and 3, beer and light wines might be obtained; and I think it quite possible that by proper arrangements the publicans could be made to abide by such a regulation. I have reason to believe, from very credible testimony, that scores, if not hundreds of people are admitted to drink and tittle, and to remain tipping in public-houses in spite of the police, or possibly by their culpable indifference, at all hours of the day on Sundays.

292. You have reason to believe this from statements made to yourself? I have reason to believe so from unimpeachable testimony.

293. Not from actual observation? Yes; I may say from actual observation, but not recently, because of a change of residence. A few years ago I was in the habit of passing by four or five public-houses in going to and returning from church, and I myself have heard sounds of revelry—obvious drinking—going on inside some of them. I have seen men going in and coming out; and in one or two instances I have seen what I have had no doubt was a keeping watch to see if anybody was on the look-out. I will state this as to Sunday closing. On other days in the week in this city you have at the Central Police Office, upon an average—I have a great number of returns with me on this point—eight or ten people punished for drunkenness; on Monday the average is sixty. I can state that as a fact.

294. Then you have no objection to public-houses, being open for the sale of fermented liquors between 1 and 3 o'clock on Sunday, which is the law as it now stands? Is it not the law that they may sell spirits also during those hours? We know that a drunkard from beer is more generally a mere sot; a drunkard from wine is a very rare example; a drunkard from spirits is an infuriated beast or fiend, and more generally the latter. In 1864 I was examined as a witness before a Committee of the Legislature on this very subject of intemperance. I entered then very fully into the entire subject, and I must say that, notwithstanding all I have read since, I do not find that there is anything new; but I believe I then stated every point that has been insisted upon by teetotalers since.

295. You have no desire to amend the evidence you then gave? I have read it through very recently, for the purpose of giving evidence here, and I see nothing to change, nothing to recede from, but everything to confirm me in the advocacy of all I then said. I have there given returns of my own as to the effects of drunkenness upon crime, and especially crimes of violence—a very important question; and I find there was on the same occasion the evidence of Mr. Rutter upon the effects of drunkenness upon insanity, either temporary or permanent.

296. Do you mean the late Dr. Rutter, formerly Surgeon to the Police? Yes. I find that in the then preceding eight months the number of males and females committed for mental delusions of various kinds—*delirium tremens*, confirmed lunacy, violent mania, and the like—are very great.

297. In what year? In the year 1864. Confirmed drunkenness is an unbappy state which is scarcely ever curable.

298. You have had a very large experience in the Criminal Courts of the Colony? I have had a larger experience, I believe, than any man now living.

299. *Mr. Davies.*] Have you any returns of a more recent date? I have not. I have, however, recent information from the Gaol of the number of persons who are committed there, utterly irreclaimable from drunkenness. And I would say that I think the Legislature should interfere in respect of persons habitually intoxicated.

300. *Chairman.*] That refers to a class of people who are seldom out of gaol? Yes, who are very frequently sent to gaol, and who are habitual drunkards. The law is most inadequate to provide for cases of this kind. My remedy is a very simple one. I would punish severely every individual found guilty of drunkenness, unless he could prove that it was casual or accidental. Such cases happen. A drunkard should be punished not by a fine, but by being sent to gaol; and if he were drunk above a certain number of times within two or three years, he should be shut up for a very considerable period, as being useless to society, and a nuisance to the public and to every person connected with him; whereas now a person sent to gaol for the thirtieth time is sent only for a month or two, or at most for two or three months—a period utterly insufficient for reclaiming him—and he comes out again as bad as ever. I have a list here of persons (whose names I will not mention), some of whom have been within three or four years sent to gaol sixty and more times. Of what use is it to send these people so often? There is one man, formerly in the Army, who for twelve years has been almost continuously sent to the gaol, and during that period there are fifty-two convictions recorded against him for various offences.

301. Petty thefts or what? Very probably petty thefts.

302. As a rule do you consider the criminal population of the country drunkards? No.

303. Are the cattle-stealers, the bushrangers, or the forgers of the country drunkards as a rule? As a rule the forgers are drunkards, within my experience; the bushrangers, very many of whom commence as cattle-stealers, are not drunkards—they could not carry on their trade if they were; but I believe that the love of drink, in the case of very many cattle-stealers, is the incentive to crime. The Court cannot trace the cause and effect there so easily.

304. Would not these men obtain drink in the absence of public-houses? Almost every man can obtain drink without reference to a public-house; but we know as a fact that ninety-nine men out of every hundred who become habitual drunkards are drunkards at public-houses or from public-houses.

305. After all, that is mere matter of opinion? It is not mere matter of opinion—it is matter of proved fact.

306. How can that fact be proved? Simply by the general knowledge one has of a man's position. When I see a prisoner in the dock before me, I can tell whether he is a man likely to have spirits in his house, or to get them from a public-house, and I find on inquiry where such men get spirits. They get spirits

The Hon.  
Sir A. Stephen,  
K.C.M.G.,  
C.B.  
16 April, 1878.

in the public-house, and if they do not drink there they take them away and drink in their own houses. I will not weary the Committee with all these details of habitual drunkards sent to gaol, but a few I should like to mention, in addition to the one man I have referred to. Here is a person who, since 1869, eight or nine years, has been convicted of habitual drunkenness and sent to gaol sixty-seven times.

307. In this city? In this city. I have his name before me, which I forbear to mention. This is a quotation from the Gaoler's report:—"When he comes back to gaol, he always does so in a filthy state, and bordering on *delirium tremens*. But for the interposition of the police, and his imprisonment in gaol, he must have been dead long before this." The returns before me include all classes of people, and my point, that I wish to urge strongly upon the Committee, is that for habitual drunkenness the law is at the present moment in a most discreditable state, and that a distinct and violent remedy ought to be afforded. If you talk of the liberty of the subject, as applicable to such cases, I should say you are using a very misapplied term. A man has no right to get drunk to the injury of society, to his own injury, and to the injury of all who are connected with him. I deny it. Here is another instance I have before me. A man, aged thirty-five, an immigrant, has been, since 1863, convicted of drunkenness sixty-three times, besides committals for other offences perpetrated while intoxicated. Here is another man, aged sixty-six, an excellent tradesman, who has been convicted since 1850 fifty-two times. I have the case of one woman, nearly seventy years of age, who has been an habitual drunkard for thirty years, during which she has been in gaol 127 times. "On each occasion, when received, she is terribly emaciated, scarcely able to articulate. She recovers her strength in gaol, only to undertake another debauch."

308. Has the woman you refer to been sent to gaol for drunkenness alone, or for acts of vagrancy? Drunkenness alone. I think these are all convictions for drunkenness. Here is another woman, nearly seventy, who has been twelve times convicted of stealing, and 144 times convicted of drunkenness. Another woman, since 1851, has been convicted of drunkenness no less than 181 times.

309. Have you any further information you desire to supply to the Committee? I would say generally that the effects of drunkenness, which I attribute, in the vast majority of cases, to the facilities for getting drink and the indulgence in drink obtained in public-houses, operate in every way to the disadvantage of the public and of the individual; they increase crime—they increase pauperism; they lead to wretchedness of families—to neglect of duties in every relation of life, as masters, or as servants, or workmen, to waste of labour, to the increase of the public expenditure upon the maintenance of criminals or their punishment for crime; and therefore it is the duty of the Legislature to address themselves with the utmost vigour to the repression of the evil.

310. Then the amendments I understand you are desirous of making would be—first, to limit the number of licensed houses? Yes.

311. Secondly, to have a Licensing Board appointed as you have already described? Yes.

312. Are there any other amendments you desire to see effected? I would permit the superior class of constables to enter public-houses when they shall have reasonable ground for supposing that unlawful tipping is going on within, or that the law is in any other respect infringed. However, in blaming publicans, as I do, a large proportion of them, for permitting tipping—mere tipping—in their houses, I think drunkards, or those who get drunk in public-houses, should also be punished. If the publican is to blame for allowing a man to tipple, I think the man that goes and tipples is just as bad, or worse.

313. *Mr. Davies.*] Both should be punished? Yes; I think also that the law should be infinitely more stringent than it is on the subject of adulterated liquors. There is no adequate provision for finding out when liquor is adulterated or for punishing the person who adulterates it, or allows adulterated liquor to be sold in his house.

314. *Chairman.*] Does not the present Act provide for that? The present law is not stringent enough. A man, on a first conviction, should be severely punished, and on a second should lose his license. Also there should be provision for enabling constables to detect adulteration.

315. I presume you mean adulteration with some noxious ingredient? Yes; I do not call mixing spirits with water adulteration. I mean mixing with them tobacco juice, *Cocculus indicus*, and other deleterious drugs.

316. You said just now you would allow the superior class of policemen to enter public-houses—What do you mean by the superior class of policemen? I mean the sergeants of police. I do not know what their ranks are. I mean persons superior to a common constable. I would say also any petty constable authorized specially in writing so to act. Many petty constables are quite fit for that duty, but they should be authorized in writing.

317. Would you punish a police officer for demanding admission to a public-house without having reasonable grounds for supposing that the law was being broken? Undoubtedly I would, in the same way as he is responsible now for any other act on unreasonable suspicion. Let me add yet a few words. The effects of drunkenness upon crime appear to me not sufficiently to be considered. It is not merely the injury done by the crime to the victim, nor to society by the expense incurred, but there are the consequences in wretchedness to the family. Crime also is often induced by the drunken state of the person injured. I was to have been examined here last Tuesday, and I looked at the newspaper for the two previous working days, Saturday and Monday:—and I find that on the 6th of April, the Saturday, one man robbed another while in a drunken slumber, no conviction; the crime is committed because the victim is drunk. Another prisoner, a woman, endeavouring to kill herself while under the influence of drink. Another found guilty of embezzlement, having got into drinking habits. Another person charges a man at the police office with garrotting him, but he was so drunk that he could not describe the circumstances. Another is admitted to the Infirmary, convulsed and insensible through excessive inebriety. These are all reported in one day in the newspaper. On Monday, the 8th, sixty-nine persons were fined at the Central Police Office for drunkenness. I maintain that probably two-thirds of these persons ought to have been committed to gaol, and that fining is useless and worse than useless. Another man is charged with an assault upon a constable, he being drunk and disorderly. Another man is tried for attempting suicide; his defence was that he was so drunk as not to know what he was doing. Another was a case of larceny from the person; the prosecutor and the prisoner both drinking; one falls asleep, and the other robs him. Another—all on the same day, the Monday—is indicted for feloniously wounding, but he was so overcome with liquor, he said, as to know nothing of the matter. The prosecutor, when stabbed, was "in a sort of temporary insensibility" from drink. All these are public-house cases. In the same newspaper there is an inquest on a man found drowned. When last seen he was sober, but he was a man reported as "given to

The Hon.  
Sir A. Stephen,  
K.C.M.G.,  
C.B.

16 April, 1878.

to excessive drinking." Then I find that last year there were eighty-one persons received into the Infirmary suffering under the effects of drunkenness, requiring medical treatment, fifty-nine of these labouring under *chronic alcoholism*, which is a very fine term for habitual drunkenness, and twenty-two actually under *delirium tremens*.

318. I suppose you are acquainted with a large number of the mechanics of the country? I have known many.

319. Are they not as a body very abstemious? I believe that they are. I do not at present call to mind one mechanic I have known who has been a drunkard.

320. Have you attended many of our large public gatherings—sports at the cricket ground, and occasionally at Randwick? Yes, several, though rarely.

321. Are not the people there as orderly and as well conducted as any body of people in the world? I think the state of sobriety of the people generally on all these occasions is highly creditable to the Colony. I have rarely seen drunkenness on such occasions, but I have seen frightful quantities of liquor consumed on the ground at the public bars and in the neighbourhood; and I think you will find that the results the next morning were a larger amount of drunkenness than on other days. But, as a general rule, I think the conduct of the inhabitants of Sydney is on almost all public occasions highly creditable.

322. Are not all these cases of drunkenness, to which reference has been made, confined to only a very few of the population? I do not think so. I know that it is commonly said of these returns that they show that the same people are committed over and over again, and that the committals therefore are simply committals of habitual drunkards. I investigated that fact, and I found that the proportion of habitual drunkards committed over and over again is very small indeed—remarkably small.

323. I suppose that the gaol and police authorities will be in a better position to give evidence on that point than yourself? If they took the same pains to prepare evidence as I have done, they would be; but I have investigated the fact, and found it to be as I have stated.

324. *Mr. Davies.*] Have you any information with reference to the Coroner's inquests that have been held? I have not. I had intended to have got a return, but I have not done so. But I have observed repeatedly that death is attributed simply to accident where the accident itself has been fairly attributable to drink.

325. With reference to Sunday closing. You stated in the first portion of your evidence that you thought it would be an advantage to the people if the public-houses were closed on Sunday absolutely? Yes.

326. But you thought there would be some difficulty in carrying that out at present? I think it will not be carried at present. I know it has been done in Scotland, and the returns from Scotland show a perfect success. I have some here—overpowering testimony on that point.

327. Do you believe that the same success would attend it here? Yes, I am strongly disposed to think so.

328. You are also in favour of giving superior officers of police power of entrance into public-houses? Yes.

329. And you say certain Justices should be appointed as a Licensing Board? Yes. I would transfer the licensing at the present time to a Board, but if it were practicable I would transfer it to the people. The present practicability I do not see.

330. Have you anything further to suggest to the Committee with a view to carrying out the object this Bill has in view? No. But not being a teetotaler myself I wish to say a few words about teetotalers—in other words persons who totally abstain from all intoxicating liquors. I have, in the evidence which was taken some few years ago before Parliament, and in the evidence recently taken before the Committee of the Convocation of Canterbury, the most overwhelming testimony that as a class teetotalers may be described almost as entirely free from crime and disorder. The evidence of very many persons in charge of gaols and workhouses is that they have never known one teetotaler committed either for crime or for incapacity to maintain himself. That is a most remarkable thing. That goes only to the question of the moral effects of abstinence. As far as health is concerned I have the most undoubted testimony of medical men and of travellers, especially travellers in cold countries and in hot, that abstinence from intoxicating liquors is in the highest degree beneficial. Captain Burnaby, for instance, the recent traveller in Asia Minor, says he drinks nothing, and he has gone through more fatigue and cold than almost any traveller we have heard of. He has said that he has known men to sink under fatigue who have taken intoxicating drink; but that he, as a total abstainer, drinking tea while they were drinking hot gin and water, has borne fatigues and cold under which they were utterly knocked up. But this relates only to the effects of abstinence on health.

331. *Chairman.*] Speaking of teetotalers, do you think it would be fair to appoint, as members of the Board of which you have spoken, teetotalers, who refuse upon principle to grant licenses? I do not know why teetotalers should be supposed not to obey the law as well as other people; and they would have the law to guide them.

332. *Mr. Charles.*] You have stated that the reduction of public-houses would cause a reduction in drunkenness—do you not think that if one-half of them were cut off, the other half could supply double the accommodation if required? The supposition is that a certain given quantity of liquor is consumed and will continue to be consumed, and that the effect of the reduction in the number of public-houses would be merely to make that quantity be retailed by fifty instead of one hundred. I think the mistake lies in, the stated premises. I think that the same quantity of liquor would not be sold if there were a reduction in the number of public-houses; and I think further that if the number of public-houses were reduced in the way proposed, there would be less temptation on the part of the publican to supply bad liquor and to encourage tipping. There would be a better and a higher class of publicans. I would add to my testimony that I think the prices of licenses should be varied. There should be a superior class of houses to be called hotels, and another class mere public-houses. I think one great evil of the present state of things is that undue competition makes it almost a matter of necessity for many of these men to sell bad liquor and to encourage the undue consumption of drink; but I think further, that very many men will drink if they encounter three or four public-houses, who would not go half a mile to get drink.

333. Does your experience go back to the time when no public-houses were on any of the rivers, where sawyers and men of that class were employed—Do you not think more rum was used then in proportion to the number of inhabitants, although there were no public-houses, than there is now when public-houses are to be found all over the country? I know from observation and from evidence that a great deal of drunkenness

The Hon. Sir A. Stephen, K.C.M.G., C.B.  
16 April, 1878.

drunkenness prevails even in cases where there are no public-houses. That I think is the result of sly grog selling and laxity or inability on the part of the police. That could be prevented. No doubt there are men who will drink whether they are in public-houses or not; just as there are men who will commit murder whether you hang them or not; but with the mass of the people that is not so; the mass of the people drink according to the opportunities that come in their way.

334. Do you think there is an increase of crime through drunkenness—has crime increased in a greater ratio than the population? That I cannot tell you—I am unable to say whether crime has increased relatively in a greater ratio than the population.

335. *Mr. Eckford.*] Do you think that if the law required more accommodation in licensed houses than at present, that would be the means of putting down the small drinking houses that exist now? Beyond all doubt it would. It would be a highly desirable object indeed to provide that there should be no public-houses that had not ample accommodation. I could state now scores of instances in town where there is no accommodation of any kind except for drinking. That is one of the great mischiefs of the present system.

336. You would not make it compulsory on publicans to open their houses on Sundays against their own desire? No; I would allow every man to close his house on Sunday if he pleased; at all events, for the mere supply of drink. I can understand that a man travelling requires food and shelter, and I think that it would be hard if the publican were permitted to refuse to open his house in such a case; but he should not be compelled to open it to any but *bonâ fide* travellers. There is one observation I would make with respect to *bonâ fide* travellers, and with respect to lodgers. In many cases the police have been defeated by the pretence that the persons drinking were lodgers. Now the law should step in there, and make the publican prove that they were lodgers.

337. *Chairman.*] Is not that the law now? I do not know that it is, but I would make it the law. In the Bill providing for the sale of colonial wine I drew a clause, which was passed by the Legislative Council, making it punishable to allow tipping, but in your House that clause was struck out. It was as follows:—"Any person found on the premises in a state of intoxication shall be presumed to have been there unlawfully drinking, unless the contrary be shown by the defendant." I also drew a clause, which was passed, to punish the tipplers themselves, defining such to be persons remaining on the premises tipping or drinking during two hours or upwards. The principle is the sound and ancient and proper one—that houses of refreshment are not meant to be places for tipping merely—that is to say, drinking for simply drinking's sake.

The Reverend Robert Steel, D.D., called in and examined:—

The Rev. R. Steel, D.D.  
16 April, 1878.

338. *Chairman.*] You are a clergyman of the Presbyterian Church? A minister of the Presbyterian Church of New South Wales.

339. Do you know the nature of the Bill now before this Committee? Yes, I have examined it.

340. I believe you are desirous of giving evidence before the Committee upon the subject? I am very willing to give any information I possess, as I am anxious to see some amendment in the present Licensing Act.

341. What amendment do you really consider advisable or necessary? First of all, shorter hours of opening every day; secondly, police inspection, under the orders of any Magistrate or the Inspector-General of Police, by officers of or above the grade of sergeants of police; thirdly, more ample accommodation for the public than is generally provided in public-houses all round Sydney and in many in the country; inspection of liquors by a qualified analyst from time to time, that character should be got for publicans, and that those that have been convicted should not be held worthy of receiving a license for a certain definite time.

342. Convicted of what? Of transgression of the law—any part of the Act, that is to say.

343. Do you think that a publican, for one solitary breach of the provisions of the Act, should be disqualified from holding a license? I would not absolutely say that some clause of the Act broken should lead to that, but, generally, that being convicted of serious breaches of the Act he should be disqualified for a certain time.

344. For one breach of an important clause of the Act, or for many? In inflicting a fine it might be necessary to threaten with a larger fine in case of another breach. I would not profess to say how you are to weigh it in that way, but I wish a stricter application of the law than there is now.

345. Would you require a publican to furnish certificates of character at every licensing meeting? No, I do not think that is necessary, if it is a renewal of license, but in starting he ought to be well testified to by persons of thorough respectability.

346. Do you not know that evidence of character is required at the present time before a person can obtain a license as a publican? I am aware of that, but I wish that more stringent requisition should be made.

347. Do you know from your own knowledge what inquiries are made at the present time as to character? I cannot say that I do, because I have not been at licensing meetings; but I am aware what is the minimum required at present, and I am aware too that a great many licenses have been granted to persons of doubtful reputation. Publicans themselves confess it. I do not think licenses should be given to females that are unmarried in any case whatever.

348. In case of the death of a person holding a license, would you refuse to transfer the license to the widow? I am not disposed to say that. I do not look upon a widow as an unmarried person in the sense in which I used the expression before. Still I am not favourable to that, as a rule; but there are exceptions to all rules.

349. Do you know cases where licenses have been granted to young ladies who have not been married? There have been some even in Sydney.

350. Do you know of any at the present time? I will not specify as to names.

351. Do you know of any so granted, where they have not been respectably conducted? It is the principle I contend for,—that young women should not be allowed to have the charge of public-houses as a rule.

352. Can you give any reason for it? The reason is that it is not proper to the sex—it exposes them to temptation. It is admitted there are so many temptations connected with the business that a very large proportion of publicans die early.

353. By whom is that fact, or alleged fact, admitted? It is admitted on medical evidence.
354. Do you say it is admitted on medical evidence that young ladies in public-houses are open to temptation? I beg your pardon. The latter part of my answer referred to the evidence as to the number of publicans who die early.
355. I referred to your statement that young ladies are more open to temptation in public-houses than elsewhere? I am satisfied the temptation is there and is dangerous, and would, if the practice be allowed, be destructive of their morals and the morals of those who frequent the houses.
356. You are not speaking now of anything you know from your own knowledge, but from statements and reports made to you? Certainly; but as a member of the community I have opportunity of learning what happens without going to places myself. If I have this evidence reported to me I am perfectly entitled to draw the conclusion.
357. Then, after all, it is a mere matter of opinion, founded upon testimony that you consider reliable? No, it is a fact that publicans, as a class, are admitted to die early from the effects of the trade upon themselves—that is an established fact on medical evidence.
358. Have you any further amendments you desire to suggest to the Committee in this Bill? I am in favour of the entire closing of public-houses on Sunday.
359. And you consider that would be a great advantage to the public? I do.
360. In what respect? It would prevent drunkenness to a large extent on that day. Whatever prevents drunkenness prevents a great many crimes to which that directly or indirectly leads. It has been beneficial wherever it has been tried.
361. Where has it been tried with success? It has been tried in Scotland for twenty-four years. In the first few years of its operation it reduced crime 14 per cent. It saved the erection of additional prison accommodation in Edinburgh, which had been necessitated and resolved upon, but which the reduction of the number of prisoners, shortly after that Act was passed, made unnecessary. Crime was reduced there 25 per cent. The consumption of spirits in Scotland for five years before the passing of the Act was 36 millions of gallons; during the five years after the passing of the Act the consumption fell to 29 millions; during the next five it fell further to 25 millions. Meanwhile the population had considerably increased. During ten years of the closing of public-houses one day in seven, the consumption of spirits fell one-third, or equal to two days supply of drink. Taking the city of Glasgow in relation to the crime before and after the passing of the Act, these are the figures:—For three years previous, prisoners for drunkenness were 34,972; for three years after, 19,370; a decrease of 15,602, or 6,200 a year. The cases under the old law were 84 per cent. higher than under the new. The cases of Sunday drinking for three years before the Act was passed were 4,083; for three years after, 1,468; while the population had increased 62,000. In the holiday week at the new year of 1873 there were 1,054 cases of drunkenness in Glasgow, and on the one Sunday in that week only 23. At the fair holiday the cases were 1,021, and of these the Sunday cases were 43. Comparing Saturdays and Sundays in October, 1873, the number of persons brought to the Police Office was 767; and on the four Sundays of the same month, 64. In August, 1874, there were 925 cases, and on the five Sundays of that month, 30 cases. There has been no wish to have the Act repealed. All the Scotch Members of Parliament, except two, voted in favour of extending the Sunday closing to Ireland. A majority even voted in favour of Sir Wilfrid Lawson's Bill for permitting entire closing where the people voted in favour of it. In Edinburgh, a year before the Act came into operation, careful and accurate observations were made, that in the city 41,796 visits were made to public-houses on one Sunday; and of these, 7,663 were by children under fourteen years of age. In Leith and Newhaven, 17,818 visits, of which there were 3,170 by boys and girls. Taking both, 59,614 visits, and 10,833 by children. In the latter case the liquor was bought to be consumed at home. These cases disappeared under the new Act. In reference to what I said before about fining the publican, let me also say I should like to see, as an amendment, a more severe fining of the drunkard. By the Intoxicating Liquors Licensing Act of 1872, in England, any one found drunk on a highway or public place, or in a licensed house, is liable to a fine of 10s.; and on a repetition of the offence within twelve months, 20s. or imprisonment for a month. By the Police and Improvement Act of Scotland, 25 and 26 Vict., c. 101 and 254, persons found drunk on the streets were subjected to a fine of 40s. or fourteen days imprisonment, wherever that Act has been adopted.

The Rev. R.  
Steel, D.D.  
16 April, 1878.

TUESDAY, 7 MAY, 1878.

Present:—

Mr. CHARLES,  
Mr. J. DAVIES,

Mr. ECKFORD,  
Mr. GREENWOOD,

Mr. ROSEBY,

JOHN ROSEBY, Esq., IN THE CHAIR.

Sub-inspector Johnston was called in and examined:—

362. *Chairman.*] What is your name? Samuel Dillon Johnson.
363. You are an Inspector in the Police Force? Yes.
364. I presume you have had considerable experience of the liquor traffic and its effects in this city? Yes, I have had about twenty-four years' experience in the Colony.
365. Have you been all that time in Sydney? No, only about four years in Sydney, and twenty years in the country.
366. Do you consider the present mode of licensing public-houses a proper and desirable one? No, I do not.
367. Then you think that the power now vested in the Magistrates does not work satisfactorily? I think not.
368. What are your reasons for that opinion? I think, in the first instance, that the monthly licensing by Petty Sessions ought to be done away with. It is very seldom that there are more than two Magistrates present.
369. Have you found sometimes that licenses have been granted to improper persons—to houses that you have thought ought not to be licensed? Yes; I have made objections both in Sydney and the country, which were not sustained.

Sub-inspector  
Johnson.  
7 May, 1878.

- Sub-inspector Johnson. 370. Have you ever known licenses which were refused by one Bench of Magistrates granted by another? Yes, I have known them to be granted shortly afterwards.
- 7 May, 1878. 371. Have you known licenses granted to persons whose character you thought rendered them utterly unfit to be publicans? Yes, I have; I have objected to a person myself on that ground, and she afterwards got a license. Many who have been fined six or eight times in the year have got their license.
372. What is your opinion as to the houses that are licensed—do you think there ought to be greater restrictions as to their size and accommodation? Yes; I did duty in the district in Sydney, which I now have charge of twenty-four years ago, and there was a better class of houses in it then than there is now.
373. Better accommodation was provided then? Yes. The competition now is too great, and the publicans cannot afford to keep their houses respectably furnished.
374. The number of licenses granted is so great that you think it is impossible that these houses should be respectably conducted? I do. I know several of these houses in which you cannot get a clean bed, or scarcely a meal of victuals.
375. With reference to the Sunday sale of liquor, do you think it desirable that public-houses should be closed altogether on Sundays? If it were possible to carry that out, it would be better. The houses that I speak of—and I do not speak of the respectable class of houses—you may pass at any hour and hear the hum of voices nearly the whole day until 10 or 12 o'clock at night, when a lot of drunken men are turned out upon the street at that hour. Some are arrested by the police. This is of constant occurrence, and I find Sunday night worse than any other.
376. Under the present law the police have no power to enter a public-house and see what the lights and the noise they hear from without mean? No; excepting under the 43rd clause, under which a constable may be called in; unless the officer is called in, there must be a fight or a disturbance before he can enter. I could not go in to detect a publican in the act of selling during prohibited hours; I have no power whatever.
377. Do you think that a large amount of liquor is sold during prohibited hours? I believe Sunday is the best day that class of public-houses have.
378. Do you think the majority of houses evade the law? No; I know some that are shut up all day—that do not open during the authorized hours.
379. Do you know if the proportion of drunkards arrested on Sunday and tried on Monday is greater than on other days? Yes; I have a return of my own division.
380. Will you inform the Committee of the facts? When I was summoned to appear before this Committee I made a memorandum from the records which enables me to give you the particulars. The total number of public-houses in my division, bounded by Margaret-street, Hunter-street, and including Balmain, North Shore, North Willoughby, and Manly Beach, is 124.
381. What is your division? No. 4 division.
382. What further information have you in that memorandum? The number of publicans convicted of Sunday selling in the year 1877 was forty-three; not forty-three out of the whole, but forty-three convictions.
383. Convicted for what offence? Selling liquors on Sunday during prohibited hours. We rarely have a conviction except for Sunday selling, and these have been obtained under the greatest difficulties. Sometimes a sergeant finds a side door open and goes in, and in one or two instances our sergeants have been assaulted for going in. The number of persons arrested for protection, being found in a state of *delirium tremens* or other forms of mental aberration, the stated or known result of drunkenness or drinking habits during 1877, was 44. Twenty-nine of these had to be remanded to the Receiving House, and the remainder were remanded to gaol for a fortnight and recovered. The total number of drunkards arrested in the Division during 1877 was 1,179. Out of that number 317 were arrested between 12 o'clock on Saturday night and 12 o'clock on Sunday night. The total number of drunkards arrested in Balmain was 144, and they were irrespective of the 317 arrested in Sydney. There are thirty public-houses in Balmain, and there are three applications pending. With regard to the furnishing of public-houses we have no supervision at all, because after a house is once licensed the publican can do away with the beds and everything else. Under the old Act there used to be an annual inspection made by the Magistrates and the police to see that the house was properly furnished.
384. That is not the practice now? No; it is done away with under the present law.
385. What would you recommend should be done to carry out the law prohibiting the sale of liquors on Sunday—would you invest the officers of police with power to enter? If well-known officers of police were named for the purpose of entering public-houses, with the assistance of men who could be trusted, I think nothing could ever arise that would give offence to the publican, and the Act could be carried out without complaint.
386. You think the officers of police would be sufficiently intelligent and prudent not to abuse their privilege? Yes.
387. *Mr. J. Davies.*] You mean superior officers, of course? Yes, senior-sergeants and men who could be trusted.
388. *Mr. Charles.*] In the country, where there are no superior officers, what would you do—would you give the same privilege to the officer in charge of the district or station? Nearly every district has a senior-constable. They are generally picked men, and no doubt they could be trusted. Greater precaution would have to be taken in Sydney, so as to entrust this duty to officers who would know how to exercise it.
389. You know that the law as it now stands permits publicans to supply liquors to travellers? Yes.
390. Do you think that power is abused now in any way? Lately I have found it one of the great difficulties in getting a conviction, that the publican generally says that those persons are travellers who come from the North Shore or some of the suburbs, and it appears that the onus rests on the prosecutor to prove that they are not travellers.
391. You think that the onus of proving that they are travellers should rest with the publican if he is charged with a breach of the law? I think it should. In the same way, under the Dog Act, it would be impossible to prove that the dog actually belonged to the man in whose yard he was found.
392. You say, as I understood, that the number of licenses granted is far in excess of the number required. Do you think it would be desirable to stop issuing any more licenses? I believe it would be for the benefit of the public to stop the issue of licenses in my division for some years. The competition is entirely too great.

393. Does it induce them to sell bad liquor as a consequence of over-competition? That is the only conclusion that I can come to, from the number of people brought up for *delirium tremens*.
394. If genuine drinks only were sold they would not have the terrible effect you see? Not unless drunk to excess.
395. You think it would be desirable to suspend the granting of any more licenses for some years? I do. I could point to one place at Miller's Point where there are fourteen public-houses, and there is not more than 40 yards between them. In the same area you cannot find more than four or five grocery stores altogether.
396. In any new legislation would it be desirable to cancel the publican's license if he has been convicted several times for breach of the law? It might be hard to do so for one or two convictions, but after a publican had been convicted three or four times it would probably be a good thing if the law were strictly enforced.
397. You think it would not be advisable to give a common constable the right to enter public-houses? No; we have men in the Force whom I would not trust to go into a public-house except under the control of a superior officer.
398. In the case you have referred to where the license was refused at your objection, was that in consequence of the parties being improper parties—of bad character—or was it because the house was not suitable? In one or two instances the applicant was a bad character, and the license was afterwards granted. The woman had been living apart from her husband. In the first instance it was the man who was living with her who applied for a license; then she was allowed to apply again under a Judge's order, and she got the license in her own name. I could name an instance in which a man was several times convicted, in fact I succeeded once in having his license refused at a general licensing meeting; but he got it again after a short time.
399. You are decidedly of opinion that no house should be licensed as a public-house which could not accommodate a reasonable number of strangers? Yes; the great fault in the present Act is that it does not require sufficient accommodation. The accommodation required is two sitting-rooms and two bedrooms. That is too small for any licensed house. Twenty years ago there was a better class of houses on the Northern Road than we have in Sydney now.
400. During the week of the late Exhibition, have you seen that country people have had difficulty in finding a place to stop at? Yes, in a great many cases.
401. Do you think that if the licensed houses had had proper accommodation there would have been any difficulty? I saw a number of gentlemen looking the other night for accommodation; they had to go to a small house, and they had great difficulty. Many of the houses have no beds at all, and could not accommodate any one; and twenty years ago I have known them to be well furnished, clean, and respectably kept; I do not suppose that I have got more than half-a-dozen houses which have any accommodation at all; you can get better accommodation at the ordinary lodging-houses; the public-houses are the worst places we have.
402. *Mr. Eckford.*] You say that a party was refused a license for living in a state of adultery—that afterwards she got a Judge's order and she obtained the license? Yes.
403. Was her license objected to? I objected to the license myself; but she assured the Bench that she was a widow. The accommodation of the house she was living in was pretty good; the man had gone away, and she said that she had expended all her money in furnishing the house, and she said that the man would not be allowed there again. She got her license.
404. That would not do away with the fact of her being an improper character? She is an improper character—I am satisfied of that.
405. How do you think that houses ought to be licensed—by what body of people? I think that there are many excellent Magistrates in Sydney. I think it would be a good thing if there was a Licensing Board appointed annually by the whole of the Magistrates themselves. I believe we have some excellent Magistrates, who would discriminate well before granting or refusing licenses. The attendance at these monthly Benches sometimes consist of only two; and licenses are granted in an off-hand manner, and with very little inquiry. The police cannot urge the objection that the house is not required—they can only object to the character of the applicant, and to the want of accommodation in the house.
406. You expressed an opinion just now with regard to the closing of public-houses on Sunday. Are you of opinion that they should be closed entirely, with the exception of the sale to *bonâ fide* lodgers? I think the opening of the public-house from 1 till 3 is an accommodation to the public. It is generally from 7 till 12 o'clock at night that harm is done.
407. Perhaps what they get from 1 till 3 o'clock is the foundation of what follows afterwards? There are thousands of people who do not drink anything more than a glass of ale for dinner; to them it is an accommodation.
408. What distance ought persons to travel before they can be considered travellers under the Act? I think they should reside at least 10 miles away; that is what we look upon as a traveller up the country.
409. Suppose a man came 5 miles from the suburbs into town, and wanting refreshment, he went into an hotel for it, do you think that he ought to be considered a traveller? A man may feel as much exhausted and in need of refreshment after walking 5 miles as after riding 10.
410. Do you think that it would be a good thing if a clause were inserted in the Act, that public-houses or hotels should be licensed according to the population of the city or large towns? I think that ought to be a guide.
411. In proportion to what number do you think houses should be licensed: supposing there are 120,000 persons in the city, what number do you think would be sufficient to allow as the basis on which to license a public-house, 500, 1,000, 2,000, or what? Where there was a population of 200, I think they would be sufficient to support a public-house.
412. That would only apply to large towns and cities? Yes.
413. What do you think as to the road-side houses—what accommodation ought they to have? They require still greater accommodation than houses in the city; but it depends on the traffic and the number of people travelling. There ought to be stabling and all that sort of thing, which is not required in the city.
414. *Mr. Greenwood.*] What are the boundaries of your district? My district is bounded by Hunter-street to George-street, and by Margaret-street to the water. Then I have got all north of that.

- Sub-inspector Johnson.  
7 May, 1878.
415. Do you cross the harbour? Yes, I have got Balmain.
416. Not Pyrmont? Not Pyrmont. All Balmain, and West Balmain as well. Then across the harbour again over to North Shore, including North Willoughby, North Sydney, and Manly Beach; following the water again back to Dawes Point, I take in Government House.
417. Have you any idea of the population of your district? I have not come prepared to say exactly, but I could give you a very close estimate. I know that there are 10,000 in Balmain, and 30,000 in Sydney.
418. In your district alone? Yes. Then including North Willoughby, taking all the farms down the Hawkesbury and Broken Bay back again to Manly, we estimate that there are 6,000.
419. *Mr. J. Davies.*] Including St. Leonards? Yes.
420. *Mr. Greenwood.*] 46,000 then, you think, is the population of your district? About that.
421. How long is it since that estimate was made? About twelve months ago.
422. Have you any idea of the total number of dwelling-houses in your district? I cannot tell you exactly, but I could make an estimate. I generally divide five into the whole number, giving five persons to every dwelling-house; that is about the average of the Census.
423. We understand then that out of 9,000 dwelling-houses in your district there are how many licensed houses? 124, and applications pending for four or five more; and they can scarcely be refused.
424. Up to what date was that? Up to the date when I was summoned to give evidence before this Committee.
425. Could you give us any idea of these 124 licensed houses within your district—are they within Sydney proper, that is from Margaret-street and Hunter-street northwards to the water? The number of new licenses granted last year within your district—I did not mention that before. I can hardly tell you the total number of houses in Sydney. I have a list of them at the station-house. There are about thirty in Balmain, about twenty in North Shore, North Willoughby, and Manly Beach; and the rest would be within Sydney proper.
426. That would give you seventy-four in Sydney. You said seventeen new licenses had been granted? The most of them were in Balmain. There has not been many new licenses granted in Sydney lately. They have been granted for Balmain, North Shore, and one at Manly Beach.
427. A few minutes ago I understood you to say that about 200 inhabitants would be able to support a public-house. You estimate the population of your district at 46,000. Divide that by 200, and it will give you 230 public-houses. The number of public-houses in your district is 124, and you say they are too many? When I gave that answer a while ago, I was considering the country districts as well.
428. When you say 200, do you mean that that should be the minimum for Sydney and the suburbs? Yes; and including the whole country—the little towns.
429. Are you aware that an Act was passed in England some time since, and is now the law, providing that in the boroughs the public-houses should be in the proportion of one for every one thousand persons? No, I am not aware of that.
430. You understand that there should be a difference in the proportion which public-houses bear to the population in large centres as compared with scattered districts? Decidedly.
431. When you spoke of one public-house to every 200 inhabitants, you did not mean that that was the proportion that should obtain for Sydney and the large cities of New South Wales? Certainly not; I had reference to the whole country, and I could name a town—Young for instance—where the inhabitants are not more than 200 to every public-house.
432. What instructions have you in regard to the supervision you have to exercise in the execution of your duties over public-houses? We have been told that we have no right to enter public-houses except acting under the 43rd clause. I would not enter a public-house under that clause unless I observed a disturbance actually taking place.
433. It applies to week-day as well as Sunday—to night as well as day? Certainly.
434. Have you any special instructions with regard to observing the Sunday traffic of these public-houses? Yes.
435. What are you instructed to do? I generally instruct my sergeants when I go round to see what number of people go in, and sometimes we see them come out. At one house, two Sundays ago, we counted twenty-seven men put out of the house after church on the Sunday evening.
436. In what street was that? In Argyle-street, near George-street.
437. *Chairman.*] Was that during the prohibited hours? Yes; between 7 and 9 o'clock on the Sunday evening.
438. Twenty-seven men? Yes; twenty-seven men were counted by one of my sergeants and a senior-constable.
439. Were any of them intoxicated? Some were not so. I think two or three were locked up for riotous behaviour.
440. *Mr. Greenwood.*] Did you report the result of these observations of this house in regard to Sunday selling, and to whom? Yes; to the Superintendent, Mr. Read.
441. Do any prosecutions arise out of reports of this kind? Yes; we prosecute where we can. Where the policeman finds a door open he goes in, but he runs a risk in doing so; if he sees the publican selling spirits during prohibited hours he summons him.
442. You go in only when the door is open? Only when the door is open.
443. If you heard any disturbance which, as a man of common sense, you thought clearly indicated a row in a public-house, could you go in except summoned by the publican? I or a sergeant could go in by virtue of our rank, without being called by the publican.
444. You could demand admittance, or break open the door? That is if a disturbance took place.
445. Whether summoned by the publican or not? Yes; but no one below the rank of a sergeant could do that.
446. Though you might believe that the publican was selling liquor during prohibited hours—reasonably believe that from knowing that the place was crowded for the sake of drinking—you could not enter unless called upon by the publican? No; it has been decided by the Water Police Bench that if a constable enters a public-house and is assaulted he has no redress. Some time ago a constable brought a charge of assault, but the Bench decided that he exceeded his duty in attempting to go in. There was an altercation between the policeman and the publican, who laid his hands on the constable to put him out, that constituting the assault.

Sub-inspector  
Johnson.  
7 May, 1878.

447. I understood you to say that the licensed houses in Sydney were better twenty years ago than they are now? I was speaking of a certain low class of houses in Sydney which once were good houses.
448. In what respect, in your opinion, were the houses better then than they are now? You could go in and get a clean meal and a clean bed; you could get good accommodation whether you drank or not. They were more like hotels then; now they are simply low pot-houses.
449. Out of the 124 houses in your district are there any which, in your judgment, do not fulfil the provisions of the Act? I am certain we could find between forty and fifty that would not come up to the requirements of the Act.
450. You mean that they have not bed-room and parlour accommodation? Yes.
451. One-third of the whole? I am certain there would be one-third of the whole. We very frequently have men come to the watch-house seeking lodgings, and I send a sergeant or a senior-constable with them. They may go to ten houses and the landlord will in every case say that he has no accommodation.
452. In your opinion houses of this class existing simply for the sake of the profits from drink? Decidedly, that is the only thing that they live by; they would not even take a boarder.
453. During the present crowded state of Sydney, in consequence of the Exhibition, is it now difficult for visitors to obtain a bed? It is.
454. But at ordinary times how is it? At ordinary times this class of houses have no accommodation. If a man wants to board in a public-house he cannot do it.
455. With regard to the other eighty houses in your district, do you think that at ordinary times they have sufficient accommodation for the average number of visitors? I certainly could not say that the whole eighty houses would have accommodation such as I experienced in them twenty years ago; but there is a number out of the eighty which have excellent accommodation, as good as could be expected in any part of the world.
456. When these hotels fail to be inns what becomes of the surplus visitors, as far as you know? They have to go into some of these very low lodging-houses—sixpenny and shilling houses. They are turned out of the public-houses at a late hour, when they cannot get a bed. The street is silent, and they are noisy, and they get locked up, or find a bed as best they can.
457. Have you any reason to think that any considerable number of these lodging-houses supply drink to the people they take in, either directly or indirectly, by some arrangement that interferes with the publicans? I have never heard a single complaint of that. There is such facility for getting drink, and so many public-houses to get it at, that it would not pay a lodging-house keeper to have it.
458. How many did you say were arrested within your district between 12 o'clock on Saturday night and 12 o'clock on Sunday night? 317; that is in the city part, not including Balmain.
459. Then for the seventy-four houses within the city in your district there are arrested between 12 o'clock on Saturday and 12 o'clock on Sunday 317 persons? Yes.
460. Can you say how many are arrested within that same district between 12 o'clock on Sunday night and 12 o'clock on Monday night? 125.
461. 317 between Saturday and Sunday, and 125 between Sunday and Monday? Yes.
462. In noticing the traffic of these public-houses on Sundays, do you pay special attention to the number of visits made between 1 o'clock and 3? The hours of sale authorized?
463. Yes? You scarcely ever see any tipplers in the public-houses at such times. There is only what is called the bottle and jug trade. People are then generally getting their dinners.
464. Have you ever made returns as to the number that go and return between those hours on Sunday? I have not.
465. In your opinion would it be a great inconvenience to the working men who live in the city if they could not go or send to the public-house for their dinner beer between 1 and 3 on Sundays? I think there would be a great deal of complaint, because the people have been accustomed to it for a number of years. It would be almost impossible to stop it unless the law were very strict.
466. Do they usually send for the beer in draught or bottle? I think the working people generally get their beer in draught.
467. Have you any means of knowing whether, if the beer were bought on Saturday and kept till Sunday, it would be considerably deteriorated? As far as I am concerned, I always get it on Saturday night and bottle it.
468. Would it be held by the people to be a grievance if they could not get their beer on a Sunday between 1 and 3? I have no doubt the people would fall in with that custom.
469. Would it cost them any more to get the same quantity? The people buy their vegetables on a Saturday night, and they could as well buy their beer, but the people have been schooled to getting their beer on a Sunday, and they would not like the change for some time. It would not be a popular clause to introduce in any Act.
470. I understand you to say that if a license is once issued, the accommodation provided by the publican need not be kept up so far as inspection is concerned? Yes.
471. When the time comes for renewing the license, could you not object if the accommodation was then insufficient? I have no means of inspecting a house. Under the old Act the Magistrates of the district and the chief constable went round and made an inspection, and they made the inspection at an uncertain period, so that they could see whether the house then had the accommodation or not.
472. That was a sort of casual inspection? Yes, not a regular visitation.
473. But it was done every year? Yes.
474. And it is not done now? It has not been done since the Act of 1861 was passed.
475. I understand you to say that when a house is once licensed, it is taken as a matter of fact at the annual licensing meeting that the license shall be renewed, and the police are not expected to offer any opposition? It can go on from year to year, and there is no inspection. That in my belief is one of the reasons why public-houses have degenerated.
476. When a license is first issued are you instructed to report on the house? Yes, and I do.
477. But never afterwards? Never afterwards.
478. *Mr. J. Davies.*] But you do frequently object? We might go into a house, but under this Act we have really no power to do it.
479. But you do frequently object on account of bad character? Yes, if there have been a number of convictions, but we do not for the want of accommodation.
480. Do you know of any case in which Justices of the Peace have sat on the Bench to grant or renew licenses

Sub-inspector  
Johnson.  
7 May, 1878.

licenses for houses in which they are interested as brewers—the house selling their beer—or as the owners of the house, or as wine and spirit merchants? If the Committee would excuse me from answering that question I would rather not answer it. I have had experience which has led me to believe that influence was brought to bear, but I would sooner questions on that point would not be pressed.

481. Do you know the gross number of public-houses in Sydney? I did hear lately that it was 700; I could not exactly say what it is now.

482. Is it a fact that a number of licenses are held by unmarried women? The number of licenses held by unmarried males and females is fourteen, and by married women living apart from their husbands, seven, in my division.

483. You do not know the gross number in the police district of Sydney? No; I could furnish it if necessary.

484. Do you know the number of objections taken in June last year to the issue of publicans' licenses in the metropolitan police district? I think the number was furnished some time ago; I had only three last year.

485. Were they sustained? Two were refused, and one was granted.

486. Do you remember the grounds of objection? One was want of accommodation, and the other that the parties were living in a state of adultery.

487. You do not know the gross number of convictions and the gross number of arrests? I could only speak for my own district.

488. I understood you to say that it would be a public advantage if public-houses were closed absolutely on Sundays? I think it would be an advantage—a great advantage.

489. You know that there is a great deal of drinking carried on, especially on a Sunday evening? Yes, between 7 o'clock and 12.

490. And that there is a larger number of arrests made for drunkenness and minor offences on that than on any other day in the week? Yes.

491. Would it be an advantage to change the present system of granting licenses, and to appoint a Licensing Board? I think it would be a great advantage, and that the meetings should only be held quarterly, as they are in the old country.

492. In order to carry out the law, you think it is desirable that the superior officers of police should have power to enter public-houses at all times? I think officers of police ought to be invested with that power.

493. To enter at all times? Yes; it would not be abused.

494. Would it be an advantage to stop the granting of any more licenses for a period of three or five years? It would be a great public advantage. The competition now is too great; and that is one of the reasons why public-houses have deteriorated so much.

495. A large number of the houses in your division are of a very low class? Yes.

496. And have not sufficient accommodation? Not even the small accommodation required under the present Act.

497. And many of them are kept by persons of bad character? Yes.

498. *Mr. Charles.*] You have stated that you think there is a great deal of tipping now during prohibited hours? Yes.

499. Do you think that if the houses were closed altogether there would not still be a great deal of tipping? Yes, there would, unless officers of police and their assistants had the power to enter. I think that eventually it would be done away with. It is only a certain class—a certain low class—who loaf about public-houses, who would be interfered with. There are a great many of them young men. The natives of the Colony, when I first came to Sydney, were a very temperate class, but now there are many of them who form the large class that go into the public-houses, and are what are called the larrikin element.

500. Suppose the law allowed public-houses to be opened for two hours during the day, and that the police had full power to enter public-houses during the prohibited hours, how would that act? That would be better than the present system. The two hours in the middle of the day are not the worst hours. The worst time is between 7 and 12 o'clock on Sunday nights.

Inspector Rush was called in and examined:—

Inspector  
Rush.  
7 May, 1878.

501. *Chairman.*] What is your name? James Rush.

502. You are an Inspector of the City Police Force? Yes.

503. How long have you been in the Force? About twenty-six years; about twenty-three in this Colony.

504. Has that time been spent mostly in the city? Partly in the city and partly in the country.

505. How long have you been in the city? I was about fourteen years in the country.

506. You have had a great deal of experience as to the result in the traffic in drink? Yes.

507. What is your opinion with reference to the present state of the licensing law—do you think the present mode of granting licenses a desirable one? I do not think so, as far as my personal opinion goes.

508. Do you think that under the present system licenses are often granted to improper persons and to unsuitable houses? I think that licenses are often granted to improper persons; I think private interest and influence often tend to operate against those who have a better knowledge of the matter than the parties who grant the license.

509. Have you known instances where the police have objected to the granting of a license, and where the license has still been granted? It is very seldom that the objections of the police are sustained.

510. Do you think that the transference of the power to grant licenses to some Board would be preferable to the present system? I should think some better arrangement might be introduced than the present.

511. Have licenses been granted to a larger number of houses than are really required for the city? That I do not know. They all seem to be getting a living, but I think it is putting temptation in the way of the people.

512. Do you think the present number of public-houses is really legitimately required by the people? I think the drinking habits of the people would be lessened if the number of houses were lessened.

513. Would the public suffer in any way if there was a less number of houses? I think they would benefit.

514.

Inspector  
Kush.

7 May, 1878.

514. Is there much drink consumed on the Sunday in these houses? I think a great deal more than on any other day of the week.
515. Is there much drink consumed during the prohibited hours on the Sunday? More than at any other time no doubt.
516. Are there very many houses in your division which you believe break the law in that respect? I only know of one that does not do so. My division is larger than the other three put together. I have got 232 or 235 houses in the city and seventy-five in the district, and I only know of one house that closes entirely on the Sunday.
517. Do you believe that the majority of these houses sell drink at other times than during the two hours permitted? Speaking from suspicion, I do not think there is one exception. I cannot say that I know it, but where you see people go into a house sober and come out drunk, and you see so many drunkards on a Sunday to what you do on the week-day, it must be so.
518. Do you often hear noises in these houses? Yes; and generally speaking you will see the house lighted up brightly—as much so as on a week-day. The bar doors will be closed, and there will be somebody standing at the other door watching.
519. You have no power to go in and lay an information against them? No power whatever. There is one clause in the Act under which you may enter, but that is not to catch the publican selling liquor, but in case of a fight, and then the constable cannot go in without the written permission of the Magistrate, or unless he is called in by the publican.
520. Would it be desirable to close these houses entirely on the Sunday? Looking at the welfare of the people, I should think so.
521. Would the public suffer any serious inconvenience? Not any.
522. Would it be possible for those who drink moderately to get their usual supply on the Saturday? There would be nothing to prevent them. If they have the money on Sunday, they must have it on Saturday night.
523. Do you make a larger number of arrests on the Sunday? I think so. From 6 o'clock on Saturday night until 12 o'clock on Sunday night there are more arrests than during any other part of the week.
524. You have no return to show that? Not with me; but I have no doubt of the fact.
525. *Mr. Charles.*] You stated that it would be no inconvenience for people to have to get their beer on the Saturday instead of the Sunday. Are you not aware that draught beer deteriorates very much on exposure to the air? I do not use it; but I should imagine it would not if you bottled the beer up.
526. Are you not aware that bottled beer is more expensive than draught beer? I meant that people should buy their beer on Saturday, and cork it up and keep it until Sunday. There is a way which publicans have of keeping it turned upside down.
527. Do you think that the opening of public-houses for two hours on the Sunday has an evil effect upon the public generally? I think so.
528. Do you not think that the greatest amount of evil to the public generally is during the prohibited hours? I do. As a rule I notice on Sundays—and it applies to all classes of the people—that at those houses which fling their bar doors wide open you seldom see any one go in; but if the bar doors are closed, and the outer door only is kept open, the people will go in. They do not like to be seen going in.
529. Would you recommend that strangers or travellers should still be allowed the privilege of getting refreshment, in any Bill that might be introduced? I think travellers should have that privilege, but it would not apply to Sydney, where they can get refreshments in all kinds of houses; but as a rule you cannot get refreshments at public-houses in Sydney. Generally speaking you cannot get dinner, breakfast, or bed. It is not an unusual thing for people to come to the police and say that they have been to such and such houses, and the publicans say they are full, and they ask the police if we cannot make them give them accommodation.
530. These people have no accommodation? Unless in the case of hotels, they do not care about lodgers.
531. What distance should a man travel before he has a right to demand refreshment of a publican? If a man were to walk ten miles he ought to have the right to get refreshments; but if he rode ten miles after breakfast he would not need anything.
532. You are aware that the existing law gives a man a right to ask for refreshment without infringing the law, if he has gone from one suburb to another? Yes; but that is very greatly abused. If the police catch a publican selling liquor, the parties sleep in the house for a night or two and say they are lodgers.
533. *Mr. Greenwood.*] What are the boundaries of your district? I commence in Liverpool-street, go along Oxford-street to Riley-street, along Riley-street to Mount Carmel, right down to Botany. Crossing the Cook's River, away round by the Warren, up as far as Saltpan Creek, down to the Parramatta Electorate; down by Parramatta River until you come to Liverpool-street again.
534. Have you any idea of the population of that district? I cannot say exactly; but I think there must be 100,000 people there. When I say 100,000, that would not be at all times, day and night. The greater portion of the inhabitants of the city live there in the evening.
535. I mean the resident population? The greater part of that would be in the city.
536. What proportion do you hold to be within the city proper of that 100,000? I have no means of telling that.
537. The number of licensed houses you say is 310; and of those what proportion is within the city? 235 in the city and 75 in the district.
538. Do you consider that the city is provided with too many of these houses? That I cannot say; the publicans all seem to be getting a living. It is a traffic one scarcely knows how it is carried on. I believe the greater part of these houses belong to two or three brewers.
539. Is any regard paid to the distribution of these houses through the district, so that they should not be too close to each other, so as to meet what are supposed to be the legitimate demands of the resident population? The police only object to the houses on two grounds—where there is not the accommodation required by the law, and where the character of the applicant is not good. If we oppose the granting of a license on the ground that the house is not required, the Bench of Magistrates say that that does not concern us—that it concerns the inhabitants only.
540. As far as you can judge yourself, do the people wish to have these houses so close to them, or would they prefer to have them further off? I cannot say. It is very seldom the people oppose them. I have only known one or two instances where people have made a great stand against the licensing of a public-house,

Inspector  
Rush.  
7 May, 1878.

house, and in those cases the publicans got the license. At Redfern there were a great many people connected with St. Paul's Church and with the Wesleyan Church, Chippendale. They opposed the granting of the license applied for the house in Regent-street, nearly opposite the church. However, the license was granted in spite of all objections. Then there was another case in Parramatta-street, where Mr. Barnier and a great number of gentlemen interested objected, but in that case also the license was granted.

541. Have you noticed any effect in the appearance of property, in the way of deterioration or otherwise, consequent upon the opening of a public-house in a particular neighbourhood? I do not think so.

542. Does it affect the length of the tenancy or the character of the tenants, as far as you know, who settle there? It would affect the character of the tenants, no doubt, but as far as the deterioration of property is concerned I do not think it would affect it. If people have property they also build public-houses.

543. Do you recollect any instance in which a large owner of property in a particular neighbourhood places a public-house at the corner? Yes; as a rule where a man builds a terrace he usually reserves the corner for a public-house or a grocer's shop; and in nine cases out of ten it is a public-house.

544. Do you know any cases where owners or leaseholders of property when they sell or sublet their property expressly stipulate that a public-house shall not be built upon it? Yes.

545. *Mr. J. Davies.*] Do you know what is the gross number of public-houses in the police district of Sydney? I do not.

546. Do you know the number of unmarried women holding licenses in the city? I do not. I think but very few in my district.

547. How many? I cannot tell you now. We sent in a return of the number. I do not think I have got five single women holding licenses in my district.

548. Do you know the gross number of arrests made between 12 o'clock on Saturday night and 12 o'clock on Sunday night? No, but I could get it.

549. I understood you to say that it would be a great public advantage if public-houses were closed on Sundays? I think it would.

550. No inconvenience could arise, as far as you know? I do not think so.

551. Does the opening of public-houses between 1 and 2 o'clock on Sundays give facilities for people to get into public-houses and remain there drinking on Sundays? No, I do not think so. Some of them commence with the daylight, and at present there is not the least restriction upon them. They do more business in the public-houses at other times of the day than when people send for their beer in jugs.

552. Is it not a fact that there is a great deal of drinking carried on in public-houses on Sunday evenings? There cannot be a doubt of it.

553. In many cases a large number of persons have been seen going in and coming out of public-houses intoxicated on a Sunday night? Yes. I have frequently heard men who have been publicans say that they would have been glad if the public-houses one and all could be closed on Sundays. While one breaks the law the others must, or they would lose their trade.

554. If public-houses were closed on Sundays, would that be the means of stopping a great deal of drunkenness and reducing crime? I think it would. Three parts of the crime of the Colony is caused by drinking.

555. Do you think the superior officers of the police should have power to visit the public-houses at all hours? I think it would have a good effect.

556. Do you think a Licensing Board would be an improvement on the present system? I do. There is no one from the Inspector General down who has any power to enter public-houses, any more than a private person.

557. In many cases where the police have filed objections on account of persons of bad repute, or that the houses are defective, have the licenses still been granted? Yes.

558. Would it be an advantage to stop the granting of any more licenses for a period of three or five years,—the licenses now in existence to continue? It would be better for the publicans, but I do not see how the public would benefit by that except in districts where population springs up.

559. Is it necessary to have any more licenses granted in Sydney? No; I think there are quite enough for the next five years.

WEDNESDAY, 8 MAY, 1878.

Present:—

MR. J. DAVIES, | MR. CHARLES,  
MR. ECKFORD.

JOHN DAVIES, ESQ., IN THE CHAIR.

Edmund Fosbery, Esq., called in and examined:—

E. Fosbery, Esq. 560. *Chairman.*] You are Inspector General of Police? Yes.

561. Have you seen or read the Bill which has been referred to this Committee? I have.

562. You have noticed one of the clauses of the Bill which provides for Sunday closing? Yes.

8 May, 1878.

563. What is your opinion in regard to the absolute closing of public-houses on Sundays? My own opinion has always been that under certain restrictions, the public should be able, at certain specified hours, to obtain liquor to carry away from the premises, and that greater efforts should be made to keep the houses closed during the other portions of the day.

564. Has it come under your observation, or has it been reported to you by your officers, that a great deal of drinking and drunkenness is carried on in public-houses on the Sunday? It is a matter which I have observed myself, and it has frequently been reported to me.

565. That is, drinking during prohibited hours? Yes.

566. Have the police at present any power to enforce obedience on the part of publicans to the law, that is, with regard to prohibited hours? They have certain powers—imperfect powers.

567. In what way are they imperfect? I think they are imperfect, inasmuch as it is now very difficult to obtain

obtain evidence sufficient to convict. Only certain members of the Police Force have any power to obtain the necessary evidence. I think, moreover, that the light penalties inflicted upon publicans for a breach of the law in this respect are of no moment compared to the large profits which publicans make by breaches of the law.

E. Fosbery,  
Esq.

8 May, 1878.

568. Do you not think that if public-houses were absolutely closed on Sunday, there would be nothing like the drinking and drunkenness there is now under the present law? I do not think the closing of public-houses altogether would in itself have the effect of preventing improper sales being made to people who congregate together in public-houses for the especial purpose of passing the Sunday in drinking, because the publicans would still evade the law in that respect.

569. Provided that superior officers of the Police Force had power to enter public-houses at all times, do you think it would be a means of preventing a great deal of crime and drunkenness which is now caused by the opening of public-houses on Sunday? It would have a tendency to prevent it.

570. In any future legislation on the subject, do you think it would be advisable to make provision for giving superior officers of the Police Force power at any time to enter a public-house? I certainly do. It would perhaps be better for me to explain in what manner I think future legislation should provide for the management of public-houses. It would not do simply to consider Sydney or other thickly populated districts. There is a large amount of drunkenness, particularly at country inns; and at many of the country places there are no sergeants of police, or officers of a superior rank, within perhaps 100 miles of a public-house. And I think that members of the Force of certain grades might have a general authority from Magistrates, or from a Licensing Board, to perform functions that can only be performed by sergeants in large towns.

571. Do you think it would be an advantage if the present system of granting licenses to publicans was changed, and Licensing Boards established in lieu thereof? Most decidedly.

572. Will you give the Committee your reasons for thinking so? My reasons are simply these:—In the first place, the law as it at present stands does not specify absolutely the Court at which a license may be obtained; the consequence is, that an intending publican having failed to get his license at one Court will sometimes apply at another where the whole of the circumstances may not be so well known, and may obtain his license.

573. Has any case of the kind come under your own observation? I have known such cases, but I cannot specify them at the present moment. I think, moreover, and it must be apparent to every one, that local influences will have some effect in inducing Magistrates to grant licenses in favour of those whom they know to be struggling and deserving men, and who have invested all their means perhaps in the erection and fitting up of premises for the purpose of carrying on the business of a licensed publican.

574. Have you read the sixth clause of the Bill now before the Committee, which provides for the licensing of Boards? I have.

575. Do you think it would work? I do not.

576. Will you point out in what way you think it will not work? I think the clause is wrongly constructed. I do not think it provides for any failure on the part of one or two of the members of a Licensing Board to meet on the day fixed. I think it should provide that two members of a Board should be sufficient to form a quorum, and it should also provide for filling up vacancies on a Board arising from unforeseen circumstances. I think also it should provide for a Police Magistrate acting as member of a Licensing Board at more Courts than one—that is, latitude should be allowed as regards time; and I also think it is very important that districts should be named, at the head Licensing Court, in which alone persons could obtain licenses. There should be one place only in each district where licenses could be obtained.

577. Are those the only particulars in which you consider it would be necessary to amend that clause? There are some minor details which I have embodied in a written memorandum I have with me.

578. Not bearing on the sixth clause? Bearing slightly on that clause. (*Memorandum was handed in by witness.*)

579. What is your opinion with reference to the issue of new licenses, that is additional licenses—do you think it would be an advantage not to issue any more licenses for a period of (say) three or five years? No, I do not. In the aggregate probably there are double the number of licensed houses that are required for the Colony; but at the same time I think that the extension of population in new districts, the opening of new gold-fields and new lines of road would require that new licenses should occasionally be granted.

580. Would you make an exception in regard to new districts, and not grant any more licenses for a certain period to large centres of population? I am firmly of opinion that in all large centres of population more licenses are granted than are requisite.

581. *Mr. Eckford.*] Of course it would be wrong to refuse licenses where new roads are opened up? That is what I say—it is necessary to grant them in new districts.

582. *Chairman.*] You think the present number of licensed houses is far in excess of what the public require? Undoubtedly. I may mention a case in point. When travelling recently, I came to a roadside place, within ten miles on either side of a township, where there were four licensed public-houses, and where I did not think one was wanted.

583. I gather from what you have said in evidence that you are strongly in favour of substituting a Licensing Board for the present method of granting licenses, and that you are also strongly in favour of superior officers of the Police Force having power to enter public-houses at all times? Certainly; but I wish to qualify that in this way: I see in this Bill a provision for breaking open doors. I am entirely opposed to giving the police any such power. I think it would result in serious affrays, disputes, and violence, which it would be very hard to check.

584. Suppose a case where a publican refuses admission to a superior officer of the Police Force—you would not be able to obtain admission without resorting to force? I should prefer to leave him to the administration of the law as it at present stands, even though there should be a failure in that respect. The police officer would probably have to get the assistance of the Magistrates before he could proceed to such an extent.

585. Then, if armed with authority from the Magistrates, you think he might break in? Certainly, the law would allow him that; and then if the police officer was wilfully obstructed, he would have remedy by summons against the person obstructing.

586. Do you know the gross number of prosecutions that took place last year for breaches of the Publicans Act? There were 394 prosecutions for Sunday trading in Sydney.

587.

- E. Fosbery,  
Esq.  
8 May, 1878.
587. Do you know the amount of fines that were inflicted for such breaches of the law? In 266 cases the fines did not exceed 10s.
588. Do you think a fine of 10s. is a sufficient penalty upon a publican who violates the law and does a great trade on Sundays? Certainly not, even for a first offence. I have sometimes devoted the Sunday morning to a lengthened walk through the city and suburbs, and I may state as a matter of personal observation that I have passed many public-houses that were full of men of all ages, who were obviously passing their Sabbath in drinking.
589. During prohibited hours? During prohibited hours. I regret to observe another thing, which may be of some moment to the Committee to know. I used to notice not many years ago that the youth who were growing up were very temperate; but I have regretted to notice since that intemperance is a vice which is growing upon the youthful population of this Colony.
590. Do you know how many public-houses there are within the city of Sydney, the city proper? There are 592 in the city alone.
591. Do you know the number of unmarried persons, especially females, who hold licenses? There are ninety-six.
592. Is it in accordance with the present law for single women to hold publicans' licenses? I should say it was obviously not the intention of the Act that licenses should be granted to unmarried persons.
593. Have you any knowledge generally of the character of the unmarried women who hold publicans' licenses? I have a general knowledge.
594. And what is their general character? The character of some of them is certainly not such as to make it desirable they should hold publicans' licenses.
595. Has it come under your observation that a number of the holders of publicans' licenses, especially unmarried women, are persons who have been placed in public-houses by brewers? It is more or less the case with regard to a very large number of public-houses; they are, I believe, rapidly passing into the hands of the brewers.
596. Do you know how many objections were lodged against the granting of licenses last year? Twenty-nine.
597. The objections in many instances were raised, I suppose, on the ground of the bad character of the applicants? Some were on the ground of bad character, some because the premises to be licensed were unsuitable.
598. In how many cases were the objections sustained? In eleven out of twenty-nine.
599. These objections were filed by the police? Yes.
600. In some cases where the police have filed objections on the ground of immorality, the application has been granted? Yes.
601. If there was a Licensing Board constituted as you have suggested, do you think that such a state of things could exist? I think it highly improbable they could exist.
602. Do you know the number of arrests for drunkenness made on week-days, other than Sundays and Mondays, during 1877? 6,415.
603. Can you tell the Committee the number of arrests made on Sundays—that is between 12 o'clock on Saturday night and 12 o'clock on Sunday night, during last year? 1,962.
604. Can you tell the number of arrests made on Mondays, between 12 o'clock on Sunday night and 12 o'clock on Monday night, last year? 1,238.
605. Can you tell the Committee how many arrests were made on week-days, other than Sundays and Mondays, for *delirium tremens* or other forms of mental aberration, the result of drunkenness or drinking habits? 192.
606. And between 12 o'clock on Sunday night and 12 o'clock on Monday night? Fifty.
607. And between 12 o'clock on Saturday night and 12 o'clock on Sunday night? Twenty.
608. Have you anything further to offer to the Committee? I think that one of the most important points to be dealt with in any new enactment would be to provide for the cancellation of licenses. At the present time they are liable to be cancelled for conviction for felony and for abandonment of a licensed house. I think myself that any person who has been convicted of misdemeanour involving a term of imprisonment should forfeit his license.
609. Is that not so under the present Act? No. I also think that after a certain number of penalties for breaches of the Act, a publican should be liable to be summoned before a Licensing Board to show cause why his license should not be withdrawn. The only other suggestion I have to offer is this, and it is one to which I think too much importance cannot be attached:—It is now a common practice in the country for persons to build houses expressly for hotel purposes. When the buildings are completed, the proprietors apply to the Magistrates for licenses. The Magistrates, knowing that to refuse them would entail ruin upon the applicants, grant the licenses; but if the intention of the applicant was made known earlier, and the premises inspected and reported upon, the owner might be warned in time that his application would be opposed and probably refused. I also think that a system of public-house inspection should be reverted to. I know, from my own personal observation in the country, that many road-side inns, which are barely fit for licensing when the application for a license was first made, have subsequently to the granting of a license been allowed to fall into a state of squalor and wretchedness incompatible with the proper entertainment of the travelling public. Indeed, I know as a matter of fact that in many of the country inns travellers are considered rather a nuisance than otherwise, as the proprietors prefer to depend upon the bar trade for their profits.
610. You have been through the country recently I believe? I have travelled nearly all over the Colony, at various times; and I could not help noticing, in all parts of the Colony, increasing habits of drinking and intoxication amongst the people.
611. Do you attribute that to the greater facilities now offered for drinking than existed in former years, or to what cause do you think it is attributable? I attribute it partly to the greater facilities to drink thrown in the way of working men; I am also sorry to say I attribute it to the larger means at the disposal of the public for indulging in liquor; but, from whatever cause it comes, the fact undoubtedly remains that drunkenness is on the increase. Of course, the greater the number of public-houses there are, the more must landlords devise means for attracting custom, otherwise they would not be able to make their business pay.
612. The greater the facilities, the greater the amount of drinking? Yes.
613. Do you know what the population of Sydney proper is? Between 80,000 and 90,000.

614. Do you think that the public convenience requires 592 public-houses in Sydney? Certainly not.
615. Of the 592 public-houses in the city proper, how many have ordinary accommodation for lodgers or for persons who may seek accommodation? They are all bound to have such accommodation before they get their licenses; but as regards the accommodation they provide, I should think that, in very many instances, it was not in accordance with the requirements of the Act. But I cannot say what number of houses are without the requisite accommodation.
616. Do you think it would be possible to obtain accommodation for families at nine-tenths of these public houses? I should think so; I think the majority have got accommodation for lodgers, however indifferent it may be.
617. Has it come under your observation, within the past few weeks, that a large number of persons have sought accommodation in the public-houses of Sydney and could not obtain it? It has not come to my knowledge, for I have been away from Sydney for some little time.
618. It has not been reported to you by your officers? No. But, as I have already remarked, the tendency of the trade is to care less for the accommodation of travellers, and depend more upon the bar trade for profits.
619. Has it come under your observation that a large number of public-houses in the city are kept open very nearly the whole of the night? I am aware that although the outer doors are nominally closed, many publicans continue their trade late into the night.
620. And such houses are the resort of common prostitutes and thieves? Many of them are the resort of prostitutes. The thieves, of course, will go anywhere.
621. And these persons are drinking in these houses all night? I believe so.
622. *Mr. Eckford.*] Have you noticed whether drunkenness has increased or otherwise since colonial wine licenses were granted? I cannot establish any connection between the increase of drunkenness I have spoken of and the granting of wine licenses. I think the holding of wine licenses is very frequently only a cloak for the sale of spirituous liquors.
623. What is your opinion with regard to the granting of licenses in large centres of population such as Sydney or West Maitland—should they be granted according to the number of the population, or otherwise? I think it would be better left to the discretion of the Licensing Board; because in some sparsely populated place a public-house might be more necessary than three public-houses in a place of three times the population.
624. I am speaking now of large centres of population such as Sydney, not of road-side places? I think that population would form a very fair basis.
625. What is your opinion with regard to licensed houses—do you consider they should be licensed to sell as much grog as possible, or for the general accommodation of the public, as places where the public might obtain moderate refreshment? I think what is contemplated by the law is that they should exist for the convenience of the public, and not as inducements to people to drink, that landlords may make fortunes out of the sale of drink.
626. You are aware that under the present law a landlord is liable to punishment for allowing a drunken man on his premises? Yes.
627. And the man is punishable for getting drunk? Certainly, if he is drunk in the public streets.
628. And that bears out the opinion you have just expressed, that the public-houses are not licensed for the purpose of leading people to drink as much as possible, but for the accommodation of the general public? Yes. There is one thing worthy of notice in regard to this matter. In some very thinly populated districts, where there are long stretches of road between one place and another, there are accommodation houses, some of them extremely well kept, the owners of which would never lend themselves to a breach of the law by the illicit selling of liquor. It has been represented to me that the proprietors of such houses could not afford to pay £30 a year for a license, and yet it would be a great convenience to the travelling public if they could get refreshments at such places, by licenses being granted at a less rate than that charged in more populous places. I do not say that I am prepared to recommend it; but I think the matter is well worthy of consideration by the framers of any new law.
629. In the case of a person going to an hotel and seeking refreshments as a traveller, on Sunday, when he is really not a traveller in the eye of the law, upon whom do you think the onus of proof should rest—upon the innkeeper or upon the prosecutor? I do not see how you could hope to get a conviction unless you threw the onus of proof upon the man who sold the liquor.
630. Suppose you go to an hotel where you are not known, and represent yourself as a traveller when you are not one, how is the innkeeper to find out who you are? In ninety-nine cases out of a hundred the landlord knows best whether the visitor is a person living in the neighbourhood or not. The landlord is not likely to make a mistake if he does not wish to make one.
631. Suppose a man came from the Glebe to my house and called for refreshment, and said he was a traveller and had come a considerable distance, and neither I nor any person in the house knew him, do you think the onus of proof should rest with me? I think your barman ought to refuse to serve him unless he had luggage with him, or some evidence of his being a traveller.
632. But persons very often travel without luggage—you could not expect a person, for instance, to bring luggage with him if he only came from Parramatta? Legislation is not aimed against those who wish to abide by the law, but against those who wish to evade it, and such a case as you suppose is scarcely likely to occur. I know there is more drinking on the Sunday than on any other day of the week, and that is what the law aims at suppressing. And I think it can only be done by increasing the penalties for breaches of the law, and increasing the power of the authorities to enforce obedience to it. I know that with regard to many hotel-keepers in Sydney, the law cannot be made too severe; because, what they wish to prevent is the unfair competition to which they are now subjected. They do not care what amount of supervision is provided, because it cannot harm them, whilst it will increase their profits by putting a stop to unfair competition.
633. Do you think that if the law provided for more extensive accommodation than at present, it would tend to decrease the number of little drinking shops? You could scarcely pass such a law as that, for the simple reason that the amount of business done in some of the country places would be so small that it would not warrant much accommodation being provided.
634. I mean in the city of Sydney and other large centres of population: how would it be with Sydney? I do not see why, in a city like Sydney, licenses should not be granted to places where persons could go and obtain their lunch and a glass of beer. I do not see why you should refuse licenses to restaurants to

E. Fosbery,  
Esq.  
8 May, 1878.

E. Fosbery,  
Esq.  
8 May, 1878.

be open during certain specified hours. Many of these places, like the cafés, do a great business at luncheon time, and they cannot be said to promote drinking habits. They are more of luncheon shops than drinking houses. And it would be unfair to expect the proprietors of such establishments to provide accommodation that would not be required. I should prefer to leave such matters to the decision of an intelligent Board, who would deal with each case *per se*, and upon its merits.

635. *Mr. Charles.*] In any new law that may be passed for licensing public-houses, you would recommend that provision be made for inspection of the premises before the license was granted? Certainly.

636. Also an annual inspection? Certainly.

637. And, in connection with such inspection, you would recommend that cleanliness be a part of the condition? Decidedly.

638. Then you would also recommend a provision for giving the police the right of entry? Certainly—for the police to have certain defined powers.

639. And in the case of their being refused admittance, you would recommend larger penalties? I would recommend a heavy penalty for refusing admission.

640. And you would also recommend larger penalties for the sale of liquor during prohibited hours? Certainly I would.

641. And then, I think, you have said that you would recommend that, after several convictions, the licenses should be forfeited? I would give power to the Licensing Board to cancel the license.

642. You have stated in your evidence already that in country places you would give power to common constables to enter public-houses? I would, provided they obtained that power from some competent authority.

643. Are you not in the habit generally of appointing men of a rather superior character to stations where there are no police officers in the immediate neighbourhood? We strive as much as we can to get men of intelligence and character for such places, and I think we succeed.

644. And you do that because of the absence of superior officers? In a village there are generally two men—one would probably be in charge with the rank of a senior-constable or first-class constable, after some years service, and upon whom we could depend as much as we could upon sergeants. The second man would perhaps be a new hand, and I would not give him authority, lest he should abuse it.

645. But in some places you have only one man? Yes, and he is always selected from men who have one grade of rank at least.

646. *Chairman.*] What do you think should constitute a *bonâ fide* traveller—what distance should men be compelled to travel on Sunday to constitute them travellers? I should think seven or eight miles would be sufficient. It is reasonable to suppose that a man going from Sydney to the South Head would be entitled to refreshment.

647. *Mr. Charles.*] Would you recommend an inspection of liquors? I am glad that question has been asked, because it enables me to give the Committee some information. Some time ago, thinking it would be desirable to have some kind of a test applied for the inspection of liquors, I had samples of liquors purchased from all the inferior houses in Sydney, and at the hours of night when they are usually supposed to sell the worst kind of liquor. All these samples I placed in the hands of the Government Analytical Chemist, and the result was that although they were not good, there was nothing seriously deleterious in them. I was surprised at the result.

648. *Chairman.*] I suppose crime is keeping pace with the increase of drinking? Certain kinds of crime are very rife indeed, but the most serious class of crime has almost ceased. Ordinary kinds of crime I think are keeping pace with the population.

649. And with excessive drinking? I suppose drink is the root and cause of a great majority of the crimes committed in the Colony—there is very little doubt of that.

## SUNDAY SALE OF LIQUORS PREVENTION BILL.

## APPENDIX.

## A.

[To the Evidence of Edmund Fosbery, Esq., 8 May, 1878.]

## PUBLICANS ACT AMENDMENT BILL.

## SUGGESTIONS.

Section 1. It is suggested that public-houses should not be altogether closed on Sundays.

Section 2. Burden of proof—add "lodger."

Section 5. In many country districts there are only constables stationed. After the words "special instance," add "or any constable holding a general authority in writing under the hands of the Licensing Magistrates hereinafter referred to." Omit from "And if" on 18th line to "appurtenances" on 23rd line. Doubtful if powers of police to break open doors should be enlarged.

Section 6. This would be unworkable. There are several "places of Petty Sessions" in proclaimed "Police Districts." It would not be advisable to issue licenses at all, nor would it be practicable—better proclaim in Gazette Licensing Courts.

In some Police Districts there are no Police Magistrates, in others there are several, acting at several Benches; could not therefore attend all on the same day.

Better to fix licensing day in April by notice in Gazette and on Court-house doors.

Provide when no Police Magistrate in district, nearest shall act.

*Proposed alteration of Clause.*

The 11th section of "The Sale of Liquors Licensing Act of 1862" is hereby repealed, and the only persons authorized hereafter to grant publicans' licenses or packet licenses shall be a "Board of Licensing Magistrates," who shall be nominated in the manner following, viz. :—The Colonial Secretary shall cause to be notified in the Government Gazette from time to time the Courts of Petty Sessions at which Licensing Boards shall be elected and sit. If more than one such Court be appointed in any Police District, then applications for publicans' licenses shall be made to the Court nearest to the house proposed to be licensed. In the month of April in each year the Clerk of Petty Sessions for each proclaimed Licensing Court shall (by notice to be published in the Government Gazette and posted on the Court-house door) call a general meeting of the Justices acting for or usually residing in each district, to be holden in the Court-house, at noon, on the day specified in the notice, and such Justices then assembled, &c., &c., to end of clause, when add—Provided that should there be no Police Magistrate present in or appointed for such district, the nearest resident Police Magistrate shall attend and act as a member of the Licensing Board.

To follow section 7. Should any member of any Licensing Board fail to attend any meeting of the Board duly convened by the Clerk of Petty Sessions, the remaining two members shall legally form a quorum to consider applications for licenses, and other business; and should any vacancy occur in such Board by death, resignation, or otherwise of either of the two elected Justices, the Clerk of Petty Sessions shall forthwith call a meeting of Justices in the manner prescribed by the 6th section of this Act, and such Justices shall in like manner elect one of their number to fill such vacancy.

Section 9. This would be perhaps injurious to the public interests, as many suitable houses have been built for the public accommodation, and some are required, especially in parts of the country newly settled.

Section 11. This clause is too severe; it would have the effect of deterring Magistrates from convicting for many trivial offences, such as not keeping lamps alight, not having name painted over door, &c.

*Suggested Clause.*

If any licensed publican shall hereafter be duly convicted of a (third?) offence under either the 29th, 30th, 34th, 38th, 40th, 42nd, or 45th sections of the "Sale of Liquors Licensing Act of 1862," or under the 1st or 5th section of this Act; or if it shall be proved to the satisfaction of such Licensing Board that any licensed publican is by reason of intemperate habits unfit to conduct the business of his licensed house, or should any such licensed publican be convicted at any Assizes or Quarter Sessions of any misdemeanour involving a sentence of imprisonment for any term exceeding one month, then in either of such cases such Licensing Board is empowered to cancel the license of any publican so offending.

*New Clauses.*

It shall be lawful for any Licensing Board to inspect or direct the inspection by any member of the Police Force of any licensed premises before the annual renewal, or any premises for which an application has been received for license.

Should any person intend to apply for a license for premises not completed or fit for occupation, the Licensing Board may grant a certificate for license conditional upon such house and premises being duly completed, to fulfil the requirements of "The Sale of Liquors Licensing Act of 1862," the license not to issue until a further certificate is granted that the house is fit for occupation.

N.B.—This clause is suggested to prevent people from building and furnishing houses as inns and then being ruined by licenses being refused. Licenses have been granted which would otherwise have been refused, to save the owners from loss or ruin.

EDM. FOSBERY,  
I. G. Police.

1877-8.

## LEGISLATIVE ASSEMBLY.

## NEW SOUTH WALES.

## SUNDAY SALE OF LIQUORS PREVENTION BILL.

(PETITION AGAINST, J. B. OLIFFE, PRESIDENT OF THE COUNCIL OF THE LICENSED VICTUALLERS' ASSOCIATION, SYDNEY.)

*Ordered by the Legislative Assembly to be printed, 20 March, 1878.*

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in  
Parliament assembled.

The humble Petition of the Licensed Victuallers of the City of Sydney,—

RESPECTFULLY SHOWETH:—

That your Petitioners having carefully perused and considered the provisions of the Bill now before your Honorable House entitled "*A Bill to amend the sale of Liquors Licensing Act of 1862, and to make provision for the closing of all public-houses on Sundays,*" respectfully submit to your Honorable House that many of the principles laid down therein are calculated to inflict serious injury on the licensed victuallers generally without in any way benefiting the community at large.

That the powers proposed to be conferred on the licensing Magistrates are calculated to do incalculable injury to the licensed victuallers, inasmuch as it is proposed to allow private judgment to govern their actions.

That whilst additional and arbitrary enactments are contemplated no corresponding protection or security is extended to the licensed victuallers.

Your Petitioners respectfully submit that they are not as a body amenable to the many injurious and painful slanders that have from time to time been promulgated against them by ignorant or illadvised people, and that if any persons have been permitted to obtain licenses, who in public opinion ought not to have been licensed, the fault does not rest on the licensed victuallers.

That your Petitioners are perhaps the largest contributors to the Public Revenue of the Colony—have expended vast sums in the erection of buildings necessarily required for the accommodation and convenience of the public—and have with but few exceptions conducted themselves as good citizens.

Your Petitioners therefore pray,—

That your Honorable House will not by hasty legislation enact a law that must result in great public injury to the licensed victuallers generally, but that your Honorable House will wait till a well considered and digested Bill has been submitted for consideration by the Government for the time being, when the anomalies of the existing law can be rectified and justice done to all.

And your Petitioners, as in duty bound, will ever pray.

J. B. OLIFFE, JUNR.,

President of the Council of the Licensed Victuallers' Association,  
Sydney.

SUNDAY SALE OF LIQUORS PREVENTION BILL.

(PETITION IN FAVOUR OF—RESIDENT CHAPLAIN AND STUDENTS OF CAMDEN COLLEGE.)

---

*Ordered by the Legislative Assembly to be printed, 21 March, 1878.*

---

The Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Resident Chaplain and Students of Camden College,—

HUMBLY SHOWETH :—

That your Petitioners believe that the Sunday traffic in intoxicating drink is a fruitful source of crime, misery, drunkenness, and immorality, as proved by the records of our Police Courts, whose Monday business chiefly consists of cases arising from this cause, and that it is therefore necessary to the welfare of the community that publicans should be compelled to close their houses on Sundays, as other tradesmen.

And your Petitioners humbly pray that the House will pass a Bill to close all such houses on the Sabbath.

And your Petitioners will, as in duty bound, ever pray.

The Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition from 1,405 Residents of Sydney,—

HUMBLY SHOWETH :—

That your Petitioners believe that the Sunday traffic in intoxicating drink is a fruitful source of crime, misery, drunkenness, and immorality, as proved by the records of our Police Courts, whose Monday business chiefly consists of cases arising from this cause. And that it is therefore necessary to the welfare of the community that publicans should be compelled to close their houses on Sunday, as other tradesmen are.

The citizens as above humbly pray that the Honorable House will pass the Bill introduced by Mr. J. Davies, now before the Assembly.

And your Petitioners, as in duty bound, ever pray.

[Here follow 1,405 signatures.]

SUNDAY SALE OF LIQUORS PREVENTION BILL.

(PETITION IN FAVOUR OF—REVEREND T. GAINFORD, CHAIRMAN OF PUBLIC TEMPERANCE MEETING.)

---

*Ordered by the Legislative Assembly to be printed, 26 March, 1878.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of a Public Temperance Meeting, held in the Reading Room of the Mariners' Church, Sydney, on Wednesday evening, 20th March, 1878,—

HUMBLY SHOWETH:—

That this meeting deplores the vast amount of drunkenness and its concomitant evils, resulting from the traffic in drink, and would humbly pray your Honorable House to pass the Bill to be introduced by Mr. John Davies, M.L.A.

And your Petitioners will, as in duty bound, ever pray.

On behalf of the meeting,

THOMAS GAINFORD,  
Chairman.

SUNDAY SALE OF LIQUORS PREVENTION BILL.

(PETITION IN FAVOUR OF, MINISTERS AND OTHERS OF METHODIST CHURCH, NEW SOUTH WALES.)

---

*Ordered by the Legislative Assembly to be printed, 27 March, 1878.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the Ministers and Lay Representatives assembled at the Annual Conference of  
 the Wesleyan Methodist Church in New South Wales,—

RESPECTFULLY SHOWETH:—

That your Petitioners are deeply impressed with the fact, as proved by the indisputed testimony of Ministers of the Gospel, Judges, Medical Men, and others, that the large consumption of intoxicating liquors in this Colony is the chief cause of the drunkenness, immorality, lunacy, crime, and pauperism that prevail; and believe that these evils are for the most part promoted by public-houses for the common sale of such intoxicating liquors.

That your Petitioners are of opinion that the evils arising from public-houses are greatly increased by the facilities afforded for obtaining licenses, and by the vast number of such houses already licensed, thereby causing all classes of the community to suffer from a traffic that is debasing numbers of our fellow-colonists.

That it appears to your Petitioners to be highly desirable that the people should be empowered to protect themselves from this demoralizing system, and that a thorough reform of the Licensing Laws is imperatively and immediately required.

Your Petitioners, therefore, humbly pray your Honorable House to enact a Bill for suspending the granting of any more licenses for some considerable time, and for closing public-houses on the Sabbath-day, and that such provisions be enacted as will place the granting of licenses in the hands of a responsible Board, to whom the residents of any district may appeal, if they so desire, to restrict the common sale of intoxicating liquors within the bounds of that district.

And your Petitioners, as in duty bound, will ever pray, &c.

[Here follow 74 signatures.]

SUNDAY TRAFFIC IN INTOXICATING LIQUORS.

(PETITION AGAINST—GEORGE FULLERTON, M.D., AND JAMES FULLERTON, LL.D.)

---

*Ordered by the Legislative Assembly to be printed, 12 February, 1878.*

---

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned,—

HUMBLY SHOWETH:—

That the Sunday traffic in intoxicating drinks is a fruitful source of drunkenness, crime, and misery. The records of our Police Courts prove that on Mondays the chief business consists of cases arising from intemperance; that it is therefore necessary for the welfare of the community that publicans as well as other dealers be compelled to close their houses on Sundays.

Your Petitioners pray respectfully that your Honorable House will be pleased to take the premises into consideration, and adopt such measures as may in future prevent the opening of public-houses on Sundays.

And your Petitioners will, as in duty bound, ever pray.

GEORGE FULLERTON, M.D., Oatley-street, Woollahra.

JAMES FULLERTON, LL.D., Minister, Oatley-street, Woollahra.

NEW SOUTH WALES.

## PUBLICANS LICENSING ACT.

(PETITION FROM PRESBYTERIAN GENERAL ASSEMBLY.)

*Ordered by the Legislative Assembly to be printed, 12 February, 1878.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the General Assembly of the Presbyterian Church,—

HUMBLY SHOWETH:—

That the Publicans Licensing Act as at present administered is fraught with many evils which are damaging to the morals of the people.

That Magistrates on the Bench are for the most part satisfied with applications without inquiry as to the character of the applicants, or the accommodation of the places for which the licenses are asked, and especially without regard to the need or desire of the neighbourhood in which those places are situated.

That the Act is frequently and systematically broken by "Sunday selling," the great majority of the public-houses being open on Sunday at other times than those provided in one of the clauses of the Act. The fact is notorious that if the police were strict in the discharge of their duty almost every publican in Sydney would be indicted for Sunday selling; and this other fact is equally patent,—that without the Sunday selling at present allowed most of the publicans in the lower localities of the city would not subsist. The result of those breaches of the Act are seen in the Police Court on the Monday morning, in the numerous drunkards that are then waiting to be dealt with.

Under these circumstances, and in view of the dreadful demoralization of the people directly traceable to the present administration of the Publicans Act, the General Assembly of the Presbyterian Church hereby pray your Honorable House to pass amendments to the following effect:—

First. That for the granting of licenses the present method be abolished, and that arrangements be made that districts shall have direct power to control the issue and renewal of licenses within their bounds by the vote of the inhabitants.

Second. That Sunday selling be absolutely abolished and prohibited, exception being made in favour of *bonâ fide* travellers, and lodgers in hotels and public-houses, who for the time being should be regarded as belonging to the licensee's household.

And your Petitioners, as in duty bound, will ever pray.

Signed on behalf of the Presbyterian Church, New South Wales,—

JAMES ADAM, M.A.,  
Moderator.

**PUBLICANS LICENSING ACT.**

(PETITION FROM INHABITANTS OF THE TOWN AND DISTRICT OF WELLINGTON.)

*Ordered by the Legislative Assembly to be printed, 30. April, 1878.*

To the Honorable Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Inhabitants of the Town and District of Wellington,—

RESPECTFULLY SHOWETH:—

That your Petitioners are aware of the many evils arising from the sale of intoxicating liquors on the Sabbath Day, as practised under the Act now in force, and are desirous that the law should be amended so as,—

First. To absolutely prohibit the sale of all intoxicating liquors on the Sabbath Day, excepting to *bonâ fide* travellers and lodgers in any licensed house.

Secondly. To define what should constitute a *bonâ fide* traveller and lodger within the meaning of the Act.

Your Petitioners therefore humbly pray that the law may be amended accordingly.

And your Petitioners, as in duty bound, will ever pray, etc.

[Here follow 141 signatures.]

1877-8.

NEW SOUTH WALES.

VACCINATION.

(REPORT FOR 1877.)

Presented to Parliament by Command.

The Medical Adviser to the Government to The Under Secretary, Colonial Secretary's Department.

Sir,

24 April, 1878.

I do myself the honor herewith to inclose the annual returns of vaccinations performed during the year 1877, which have been received from the Government Vaccinators in the country districts, from the Vaccine Institution in Sydney, and from the Public Vaccinators in the suburbs.

Table A includes the returns from the country districts, and shows that 1,708 children under 1 year of age, 5,692 children from 1 to 5 years of age, and 4,245 children from 5 to 10 years of age were successfully vaccinated in the country.

Table B gives the number of successful vaccinations in Sydney and the suburbs, as follows:— 1,079 children under 1 year of age, 2,928 children from 1 to 5 years of age, and 1,229 children from 5 to 10 years of age, making a total for the whole Colony of 16,881.

No returns have as yet been received from many districts, but the number of successful vaccinations reported during the year has been 12,520 more than in 1876.

The temporary success which has attended the exertions of the Vaccinators is, however, to be attributed solely to the great alarm which was felt in the early part of the year in consequence of the existence at that time of several cases of small-pox in Port Jackson, and is no evidence of the value of our system, or that the work of vaccinating is remunerative to the operators. With one exception, all of the Vaccinators who have remarked on the quality of the lymph supplied to them from the Vaccine Institution in Sydney have reported it as having been good, producing well-marked vesicles, running a regular course, and attended with the usual constitutional disturbance, and in no instance has it been reported that any ill effects have followed vaccination.

I have, &c.,

H. G. ALLEYNE, M.D.
