NEW SOUTH WALES.

RAILWAYS OF NEW SOUTH WALES.

(REPORT FOR 1878.)

*The Commissioner for Railways to The Honorable the
Secretary for Public Works.*

Department of Public Works,
Railway Branch,

Sir,

Sydney, 28th August, 1879.

I have the honor to submit the following Report, showing the transactions of this Department for the year 1878, and embodying Returns of the progress made with works of construction, together with accounts of revenue and expenditure.

1.—RAILWAY CAPITAL AUTHORIZED.

No alteration was made in the Debenture Capital during the year. The amount of loans authorized remained at £12,298,161, of which sum £9,087,300 had been raised. The balance—£3,483,352—was not placed upon the market during 1878. The expenditure in excess of the sales, was temporarily charged to the surplus revenue fund at the disposal of the Government.

Railway debt.
Appendix
Nos. 7-8,
p. 53-57.

Since the close of the year, however, Debentures to the amount of the available balance of the Loan Votes have been sold at prices in excess of the limit placed upon them.

The following additional sums were authorized to be raised by Loan in July last, increasing the Railway capital to £17,939,161, viz. :—

Loan Act of
July, 1879.

For the construction of additional Lines	£4,921,000
For the completion of Lines under construction, &c...	100,000
For Rolling Stock	620,000
		£5,641,000
Total	£5,641,000

The Railway capital bears interest as under.

£7,110,800—5 per cent. annual interest	£355,540
£5,187,361—4 per cent. annual interest	£207,494
£5,641,000—4 per cent. (still to be raised) annual interest...	£225,640

The average interest being 4.39 per cent.

2.—RAILWAY CAPITAL EXPENDED.

Appendix
Nos. 9-10,
p 58-59.

At the close of 1878, there had been expended on lines open for traffic £9,784,645, and on lines in course of construction £493,206—in all £10,277,851—of which amount the sum of £963,351 was expended during the year 1878, as under :—

Construction	£776,802
Rolling stock and machinery	171,662
Trial surveys	14,887
						<u>£963,351</u>

3.—LINES OPEN AND IN PROGRESS.

Of the £776,802 expended in 1878 for construction, the sum of £407,228 was expended on lines open for traffic, and the balance £369,574 invested in unproductive lines in course of construction.

In the following statement is given the length of Railway Lines opened for traffic during the year 1878.

*Southern Line.*See Appendix
No. 3, p. 41.

	Miles.
In operation—At the close of 1877—Sydney to Cootamundra	255
Opened on the 15th April, 1878—Cootamundra to Bethungra	15
Opened on the 6th July, 1878—Bethungra to Junee	18
Opened on the 3rd September, 1878—Junee to North Wagga Wagga	18
Total opened on 31st December, 1878	<u>306</u>
Average for the year	281

Western Line.

	Miles.
In operation—At the close of 1877—Parramatta Junction to Orange, including Richmond Branch	195

No additional mileage was opened on this line during 1878.

Northern Line.

	Miles.
In operation—At the close of 1877—Newcastle to Quirindi, including Morpeth Branch	148
Opened on the 2nd April, 1878—Bullock Island Branch	1½
Opened on the 14th October, 1878—Quirindi to Tamworth	38
Total opened on 31st December, 1878	<u>187½</u>
Average for the year	157

Lines open.

The above statement shows that (in the year 1878) the Southern Line was extended 51 miles to North Wagga Wagga, and the Northern Line 39½ miles, viz., 38 miles Quirindi to Tamworth, and 1½ mile Newcastle to Bullock Island. With these additions, amounting to 90½ miles, the total mileage open for traffic at the end of 1878 was 688½ miles. The openings, however, having taken place at different times in the year, the average mileage in operation equalled only 633 miles.

Lines in progress.

The following extensions were in progress on the 31st December, 1878 :—

South—North Wagga Wagga to Albury	81 miles 50 chains.
West—Orange to Wellington and Dubbo	85 „ 18 „
North-western—Werris Creek to Gunnedah	41 „ 14 „

making a total of 208 miles 2 chains.

There

There was also in progress, at the end of the year, a temporary line from North to South Wagga Wagga, including a low level bridge over the Murrumbidgee. The construction of this line was decided upon by the Government in October, 1878, in order to facilitate trade between Sydney and the Murrumbidgee District, there being reason to fear that trade was being hampered and traffic diverted elsewhere, in consequence of the cost of road carriage between North and South Wagga Wagga and the high rates of toll charged at the Company's bridge.

Temporary line, North to South Wagga Wagga.

The work was undertaken by Messrs. A. & R. Amos, the contractors for the permanent line, for the sum of £9,000, of which £2,000 was contributed by Messrs. Cornwell, Mixner, & Co., the contractors for the railway extension to Albury, in consideration of the facilities which the temporary line would afford them in carrying out their works. It was considered also that the completion of these works, by the facilities afforded, would be expedited, and that some portion of the length between South Wagga Wagga and Albury would be opened for traffic before the expiration of the contract time, viz., 31st December, 1880.

Work undertaken by A. & R. Amos.

The construction of the line from Junee to Narrandera, for which Parliament in 1876 voted £384,000, has at length been decided upon. The delay was caused by the diversity of opinion that existed as to the best route to adopt for connecting the town of Hay with the Great Southern Railway. The Engineer-in-Chief for Railways was in favour of a line diverging from the Great Southern Line at Hanging Rock, and thence *viâ* Urana and Jerilderie to Hay; while others, principally a committee consisting of gentlemen resident at Wagga Wagga, advocated the adoption of the route suggested by the Honorable William Macleay, M.P., viz., from Wagga Wagga in a direct line to Hay, keeping as near to the southern bank of the river Murrumbidgee as the formation of the country would, with advantage, admit of. Other alternative routes—all however diverging from the railway at Wagga Wagga—were proposed, and advocated with considerable energy, manifesting the great interest which the public took in the matter.

Delay in construction of line Junee to Narrandera.

Different routes advocated.

With a view to the settlement of the question you wrote, on the 14th March last, the following Minute to Cabinet:—

Minute by Secretary for Public Works.

Cabinet.

IN view of opening the country of the Darling and the South-western interior, by connecting the central town of Hay with our railway system, and in order to put to a practical test the conflicting opinions held by public men of influence and experience in that part of the Colony, and by other persons interested in its prosperity, and in conformity to a pledge given to the Legislative Assembly by the Government, I consider it expedient that the route from Junee to Hay *viâ* Narrandera and the line of country between Wagga Wagga and Hay, be traversed by two or more officers in whose report the country would have confidence. I think the Commissioner for Roads (Mr. W. C. Bennett) and the Surveyor General (Mr. P. F. Adams) might be asked to perform this work and I have no doubt that the opinion of two officers of their experience and integrity, while affording information for the guidance of the Government, would be accepted as a settlement of the conflicting opinions on the subject which naturally exist in the South-western District.

Minute to Cabinet. Country to Hay from Southern Line to be reported upon.

J.L., 14/3/79.

The report of these officers was received on the 3rd April; their recommendations (briefly stated) were, that the line from Junee to Narrandera should at once be proceeded with, and that the extension to Hay should follow as soon as possible—on the north bank of the river—if it were decided to construct a railway from Hanging Rock to Urana and Jerilderie—otherwise on the south bank.

Line, Junee to Narrandera recommended.

This

This report was laid on the table of the Assembly on the 30th April last, and before the close of the Session, the plans, &c., of the extension from Junee to Narrandera were approved by both Houses of the Legislature. The sum of £735,000 was also voted for the further extension of the line from Narrandera to Hay (105 miles), but the plans, &c., indicating the route which it is proposed to follow, have not yet been submitted for the approval of Parliament, as required by the provisions of the Railway Act.

Narrandera to Hay.

Werris Creek to Gunnedah.

Since the close of the year, 15 miles of the North-western Extension have been opened for traffic. The contract time for the completion of this line—Werris Creek to Gunnedah—was 30th June, 1879. In consideration of the contractor consenting to the opening, on the 25th of March last, of 15 miles of the line from Werris Creek to Breeza, the time for the completion of the remaining portion to Gunnedah, 26 miles, was extended three months, viz., to 30th September. From the progress made, however, there is every reason to believe that the line will be ready for traffic before that date.*

Appendix No 3, p. 41.

Following is a tabulated statement of the railways authorized, showing the mileage opened during 1878, the total mileage opened on the 31st December of that year, the extent of double line, and the lengths remaining to be constructed.

Railway.	Length of Line sanctioned.	Length opened during 1878.	Total length opened.	Portion laid with double rail.	Length remaining to be finished.
	Miles.	Miles.	Miles.	Miles.	Miles.
Great Southern	450	51	304	13½	146

Collingwood, Haslem's Creek, &c....	2	2	1¼
Total	1,163½	90½	688½	24½	475

Extent of lines authorized.

In addition to the above, provision has been made in the Loan Act, 43 Victoria, No. 11, passed on the 24th July last, for the following lines:—

From Dubbo to the vicinity of Bourke	227 miles.
From Gunnedah to a point opposite Narrabri	60 "
From Wallerawang to Mudgee	85 "
From Narrandera to Hay	105 "

477

making a total of 1,640½ miles in operation, in course of construction, authorised, or preliminarily authorised.

4.—LAND TAKEN FOR RAILWAY PURPOSES.

Land taken for Railway. Appendix No. 4, p. 42.

A return is furnished in Appendix No. 4 of the total quantity and cost of land taken for railway purposes to the 31st December, 1878.

As

* NOTE:—The line from Breeza to Gunnedah was opened on the 10th September, three weeks prior to the expiration of the extended time.

As the lines are extended into the interior, the cost of land resumed for the railway of course decreases; the price paid for the 8,080 acres resumed to the present time averages £44 15s. 9d. per acre; in 1877 the average cost per acre was £46 5s. 4d., which shews a reduction in the twelve months of £1 9s. 7d. per acre on all the land resumed for railway purposes. Decrease in cost of land.

The cost of land on the various extensions varies very considerably; the lowest price paid was for the extension from Murrurundi to Tamworth, which averaged £13 0s. 6½d. per acre, while the highest price per acre averaged £2,717 7s. 7¼d. for the 16 acres 2 roods and 38 perches taken for the Darling Harbour Branch. The prices quoted include the cost of buildings and compensation for severance, and, although, no doubt, the maximum value was given at the time of purchase, the railway has so increased the value of land in its immediate vicinity that much higher prices could now be obtained. For instance, for the 240 acres of railway land between the Redfern Terminus and Parramatta Junction, the average price paid was £98 2s. 9½d. per acre, aggregating to the sum of £23,601; a like quantity of land could not now be obtained for five times that price. Variation of prices paid for land.

Immunity from litigation, in regard to the amounts demanded by claimants and those offered in conformity with the estimates of the Land Valuer, continued, during the past, as in former years, to be a marked feature in the adjustment of the railway land claims, and recourse to arbitration was had only to the extent of 1 in every 41 cases dealt with. The claims outstanding on the 31st December, 1877, were 294, to which were added 128 claims during the year. Of these 422 claims, 124 were settled in 1878, leaving at the close of that year, 298 in various stages of adjustment. Immunity from litigation.

5.—IMPORTATION OF RAILWAY MATERIAL.

In the Appendix will be found a return of the permanent way materials, locomotives, and miscellaneous articles imported during the year under review. Appendix No. 5, p. 43.

The following is an abstract of the return :—

Number of Ships employed.	Number of Tons of Goods Shipped.	Value of Goods Shipped.	Amount paid for Freight and Insurance.	Average rate of Freight and Insurance per ton.	Supply and cost of railway material.

6.—EXISTING LINES.

*Maintenance of Way and Works.*Appendix
No. 1, p. 11.

In Appendix No. 1, will be found the Report of the Engineer for Existing Lines on the condition of the lines of railway in his charge. The whole of the works have been maintained in good working order during the year, and very large additions have been made to improve the accommodation, and to facilitate the conduct of the traffic.

Improvements
and additions
on Southern
Line.

The improvements and additions, which are detailed in the Report of the Engineer, may be summarised as under :—

On the Southern Line, from Darling Harbour to North Wagga, including the Suburban Stations, the number of new works completed amounted to 131.

In addition to the above, twenty-nine bridges and culverts were put in ; 6,969 sleepers used for renewals ; 39½ chains of the Main Line relaid with steel rails ; and 3 miles 15¾ chains of sidings constructed.

Western Line.

On the Western Line (from Parramatta Junction to Orange), there were 108 new works completed ; 5,792 sleepers used for renewals ; 3 miles 23 chains of main line relaid with steel rails ; and 2 miles 8½ chains of sidings constructed. The work of doubling the line between Parramatta Junction and Parramatta was also commenced.

Windsor and
Richmond
Line.

On the Windsor and Richmond line, considerable progress was made in the work of improving gradients and strengthening bridges, for the purpose of increasing the train loads and thereby reducing the number of goods trains and consequently working expenses.

Advantage
gained by
reducing
gradients.

The advantage gained in the haulage by these improvements is shown in the following statement :—

	Previous to reduction of gradients.	Subsequent to reduction of gradients.	Increase of load.
	No. of loaded trucks.	No. of loaded trucks.	No. of trucks.
Blacktown to Riverstone	10	16	6
Riverstone to Mulgrave	10	14	4
Mulgrave to Richmond	10	18	8

Seven additional works were carried out on this branch during the year ; 3,893 sleepers used for renewals ; one half mile of main line relaid with steel rails ; and 20 chains of sidings constructed.

Northern
Line.Double way
Wallsend
Junction to
Hexham.Should be
extended to
West Mait-
land.

The most important work carried out on the Northern Railway was the construction of the double way between Wallsend Junction and Hexham—a distance of 6 miles 55 chains. The increase of traffic on this portion of the Northern system rendered the undertaking of the work imperative, and its completion has afforded the much-required facilities for the conduct of the business. Permanent relief, however, from the difficulty of working the traffic between Newcastle and West Maitland, will not be afforded until the double line is extended from Hexham to the latter station—a distance of 8 miles 55 chains.

There

There were 49 new works carried out on the Northern Line in 1878. New works, &c.
 228 Sleepers used for renewals, 48 chains of main line relaid with steel rails,
 and 1 mile 59 chains of sidings constructed.

The working expenditure, for the maintenance of way and works on Expenditure for maintenance of way and works. Appendix No. 14, p. 62.
 all the railways, exceeded that for 1877 by the sum of £24,623. This excess
 is partly accounted for by the increase of mileage and the cost of repairing
 damages caused by floods, but principally by the increased cost of maintaining
 the new lines, occasioned by their less perfect construction. The causes of these
 imperfections were remarked upon in my Report for 1877, and I will now only
 again quote from the Report of the Engineer-in-Chief of 4th November, 1872,
 in his allusion to the result which would follow the departure, in certain
 particulars, from the mode of construction adopted previous to that time.
 Mr. Whitton says—

“These alterations I propose with a view to greater economy in the first cost of construction—not because I believe the alterations to be judicious, but solely to meet the almost universal call for cheap railways—which simply means that what has been left undone by capital in the first instance must be paid for hereafter out of revenue.”

Locomotive and Carriage Division.

In the re-organization of the Railway Department in 1878, the Govern- Separation of permanent way from Locomotive Branch.
 ment decided to separate the superintendence of the Permanent Way from
 that of the Locomotive Branch. The services of an engineer, competent to
 undertake the duties of the latter branch, were sought for in England, and
 Mr. R. H. Burnett, C.E., was appointed, on the recommendation of Mr. John Appointment of Mr. Burnett.
 Fowler, C.E. (Inspecting Engineer for the Colony), whose advice in the matter
 was obtained by the Agent General. Mr. Burnett assumed the duties of the
 position on the 1st September, 1878, and in Appendix No. 2 will be found his Appendix No. 2, page 22.
 Report on the working of his branch of the department.

Mr. Burnett's predecessors have repeatedly brought under attention the
 excessive cost incurred in the working of this division of the Railway Service,
 in consequence of the absence of adequate workshop accommodation. The Insufficiency of workshop accommodation largely increases expenditure.
 present Locomotive Engineer makes the same representation, and adds—

“To recover lost ground a largely increased expenditure on repairs and renewals in the future
 must result, and as suitable workshops to enable these renewals and repairs to be coped with can-
 not at best be got into operation for a considerable time—while in the meantime the quantity of
 rolling stock to be maintained is growing at a greater ratio than the means available for dealing
 with it, during which time its condition must deteriorate rather than improve—the process of
 recovery to a state of efficiency, when taken in hand, will necessarily be felt for some years
 to come.”

Rolling Stock and Machinery.

The total expenditure on rolling stock has been £1,147,406, and the Expenditure on rolling stock.
 proportion it bears to the total capital expended on lines open for traffic is
 11·73 per cent. The expenditure in new stock, during 1878, was £166,693,
 which was charged to capital account. A sum of £91,742 was expended in
 repairing and renewing the existing stock and charged to the revenue vote
 for the year.

The

The following is an abstract of the rolling stock which was on hand on 31st December, 1877, and the number and description of vehicles supplied in 1878.

Expiration of first five years contract for rolling stock.

Evils of system of obtaining supply of vehicles in small quantities.

In the year 1869, contracts were taken for the supply of the rolling stock required in the succeeding five years. Messrs. P. N. Russell & Co.'s tender was accepted for carriages and waggons, and the tender of Mort, Vale, & Lacy for the supply of locomotives. These contracts expired in June, 1874, and from that time till July, 1878, the rolling stock (other than engines) was obtained in small quantities as required from various local contractors (with the exception of three American cars imported from New York, and eight composite carriages ordered from the Ashbury Carriage Company of Manchester). The evils of this system of obtaining the supplies were soon made manifest, for, while the prices charged were comparatively high, the timber used in the vehicles was found to be insufficiently seasoned, the manufacturers admitting that, owing to the uncertainty of securing further orders, they did not feel justified in incurring the expense of storing an adequate supply of seasoned timber, or of erecting the requisite buildings for carrying out the contracts on a larger scale and consequently at more moderate prices.

Locomotives obtained from England and America.

The locomotives were, subsequent to the termination of Mort, Vale, & Lacy's contract, ordered from England and America—62 from the former and 13 from the latter country.

Tenders obtained for five years supply of rolling stock.

In the belief that, if reasonable facilities were given as regards time for completion and extent of orders, the rolling stock could be obtained in this colony as cheaply and as well constructed as it could be imported, the Government decided to invite tenders for five years supply. For a portion, however, of the 100 locomotives required within that period, the immediate demand was so great, as to necessitate a comparatively early date being fixed for their supply, and for these—22 engines—it was scarcely expected that local manufacturers would be able to submit offers. The result proved the correctness of this view. Three tenders were received for the supply of locomotives, and four tenders for the supply of the other rolling stock. In the following table are given the names of the successful tenderers, the number of vehicles they contracted for, and the amounts of their respective contracts.

7. REVENUE AND EXPENDITURE.

The financial result of the year's transactions under the above heading has not been so satisfactory as the transactions of several previous years have been—in part, owing to the causes stated in the preceding section of this Report—in part, to the increase of wages consequent upon the decision that the minimum wages paid to workmen should be 7s. instead of 6s. a day, but mainly to the large reductions in the rates of freight which were made in September and December, 1877. The object of the Government, in making these reductions, was to stimulate production; and it was stated in the Report of 1877, which was written before their effect could even partially be ascertained, that if this result should follow to an appreciable extent, the increased traffic over the lines would compensate for the lesser rates charged. So far, however, this anticipation has not been realized, and although it may be premature to say conclusively, even now, after an experience of some fifteen months, that it was unwise to make the reductions—the following table shows, that notwithstanding 31,598 additional tons of the articles reduced were carried, the earnings derived from the carriage of the total quantity were less in 1878 than in the previous year by the sum of £19,742. If the rates in force previous to the reductions had been maintained, the net revenue would have been increased by the sum of £37,454.

In Appendix No. 19 will be found a statement in detail of the above return, showing each item of traffic separately.

The gross earnings in 1878 were £902,989, the working expenses £536,988, and the net earnings £366,001.

Of the gross earnings the sum of £306,308 was derived from coaching traffic, and £596,681 from goods traffic; the proportion of the latter to the former was 66·08 to 33·92.

The following table shows the particulars of the coaching traffic for 1878, compared with 1877. The increase of earnings over those of 1877 amounted to £87,069.

COACHING

Increase of tonnage.

In the tonnage carried there was a gross increase of—

19,862 in merchandise.

162,258 in minerals.

2,255 in wool.

11,470 in live stock.

195,845 total increase.

Tonnage decrease per mile of line.

Per average mile of line open, the result shows—

A decrease of 53 tons in merchandise.

An increase of 19 " minerals.

A decrease of 2 " wool.

An increase of 14 " live stock.

22 tons total decrease.

Increase of receipts.

The receipts show an increase of—

£2,410 in merchandise.

9,773 in minerals.

5,740 in wool.

25,787 in live stock.

8,638 for miscellaneous.

£52,348 total increase.

Per

Per average mile of line open, the receipts show—

	£	s.	d.	
A decrease of	86	7	3	for merchandise.

„	1·53	for wool.
An increase of	2·80	for live stock.
„	<u>1·28</u>	for miscellaneous.
	20·48	total decrease.

Decrease in receipts per train mile.

It will be seen that the most remarkable feature in the above return is the increase, which has taken place in the live stock traffic on the Southern and Western Lines. On the Northern Line, there was a decrease, by which the earnings were reduced from £10,099 to £6,941; on the Western Line the increase from this service amounted to £2,650 only; but on the Southern Line the sum realized was £34,870, being £26,295 in excess of the revenue of 1877, or over 400 per cent. It is not difficult to account for this large increase. The tax on stock passing over the Border, imposed by the Victorian Government, coupled with the low rates for the carriage of live stock on our lines, and the prevalence generally of a favourable market during the year, induced the stock-owners of the Murrumbidgee and the Murray River Districts to send their live stock to Sydney for sale, instead of, as formerly, to Melbourne. That this increase was due to a diversion of the traffic is shown by the decreased number of live stock carried on the Deniliquin railway, and on the Victorian railways for 1878.

Increase in live stock traffic on Southern and Western Lines.

Diversion of live stock traffic from Victoria to New South Wales.

The modifications, however, recently proposed to the Government of Victoria in the application of the impost referred to, under which live stock, intended for the meat-preserving establishments, are to be exempted from the tax, will, no doubt, if carried into effect, lead to a re-diversion, to the Victorian lines, of the larger portion of this traffic.

WORKING EXPENDITURE,

The amount expended for working the traffic in 1878, exceeded that for 1877, by the sum of £118,003. The increased traffic, the greater number of miles opened, and the extra train mileage run, account for the larger portion of the increase, but a considerable amount is due to the causes referred to on pages 11 and 13 of this Report, viz., repair of flood damages, the comparatively excessive cost of maintenance of the new lines, the expense attending the disadvantageous working of the locomotive division owing to inadequate workshop accommodation and the increase in the men's wages. There is another item of increase, viz., the compensation paid for personal injuries, which is to be regretted on other than economical grounds. Of the £6,304 under this head, which, as compared with the compensation paid in 1877, shows

Working expenditure. Appendix No. 14, p. 62.

Causes of increase.

shows

Amount for compensation for personal injuries really chargeable to 1877.

shows an increase of £5,724, the sum of £4,457 was paid for an accident which took place in November, 1877. As, however, the amounts due to the persons injured were not ascertained until after the books of that year were closed, they have formed a charge against the working expenses of 1878.

Particulars of working expenditure.

In the following table are given the particulars of the whole of the expenditure :—

Appendix No. 14, p. 62.			1878.			1877.		
			S. & W.	North.	Total.	S. & W.	North.	Total.

Increase in cost.

The total working expenditure compared with 1877, increased—
 £92,643 or 29.98 per cent. for South and West lines.
 25,360 or 23.06 „ North line.
 118,003 or 28.16 „ all lines.

Increase in cost per mile of line.

The expenditure per average mile of line open increased—
 £107 for South and West lines.
 35 for North line.
 89 for all lines.

Increase in cost per train mile.

The expenditure per train mile shows as follows :—
 A decrease of 0.56d. for South and West lines.
 An increase of 6.68d. for North line.
 An increase of 0.81d. for all lines.

Cause of increase of proportion of expenditure to gross receipts explained.

The proportion of expenditure to gross receipts from all sources shows—
 60.85 per cent. for South and West lines.
 55.71 „ for North line.
 59.47 „ for all lines.

For the year 1877 the proportion of expenditure to gross receipts was 51.35. The increased expenditure of 8.12 per cent., for 1878, is in a great part explained by the loss sustained in the earnings proportionate to the work done, as shown on page 13, for, although, the total earnings in 1878 largely increased, the earnings per train mile, through the reductions in the rates of carriage, fell from 7s. 9d. to 6s. 9¼d.

Net

Net earnings.

The per-centage of net earnings to capital invested in 1878, as against Net earnings. 1877, was as under :—

	1878.			1877.		
	No. of miles.	Capital invested.	Per-centage of interest.	No. of miles.	Capital invested.	Per-centage of interest.
South and West	501	7,467,408	3.46	450	6,889,416	4.26
North	187½	2,317,237	4.64	148	1,993,761	5.21
All Lines	688½	9,784,645	3.74	598	8,883,177	4.47

The subjoined abstract furnishes the per-centages, which the gross earnings, the working expenditure, and the net earnings bear to the capital expended on lines in operation for 1878, as compared with 1877. Per centages of gross earnings, expenditure and net earnings to capital.

		1878.			1877.		
		S. & W.	North.	Total.	S. & W.	North.	Total.

The proportion of expenditure to capital

Increased 0.90 on S. & W. Lines.

„ 0.33 on North Line.

„ 0.78 on all Lines.

Expenditure to capital.

The proportion of net earnings to capital

Decreased 0.80 on S. & W. Lines.

„ 0.57 on North.

„ 0.73 on all Lines.

Net earnings to capital.

The

Summary of gross earnings, expenditure, and net earnings, 1878, compared with 1877.

The following is a summary of the gross earnings, working expenditure, and net earnings of the Railways for 1878, as against 1877 :—

	South & West.	North.	Total.
	£	£	£
Gross earnings, 1878	660,050	242,939	902,989
Do. 1877	602,111	213,809	815,920
Increase for 1878	57,939	29,130	87,069
Working expenditure, 1878... ..	401,647	135,341	536,988
Do. 1877... ..	309,004	109,981	418,985
Increase for 1878	92,643	25,360	118,003
Net earnings, 1878	258,403	107,598	366,001
Do. 1877	293,107	103,828	396,935
Decrease for 1878	34,704	30,934
Increase for 1878	3,770

£.—TON MILEAGE.

Gross ton mileage.

In the following tabulated statement are shown the average distance each passenger travelled and each ton of goods was conveyed, and the amount received per passenger and per ton for every mile carried :—

	South & West.	North.	Total.
Average mileage per passenger Miles.	11·82	17·41	12·55
Average mileage per ton, goods and live stock	82·87	14·40*	36·06
Average receipts per mile per passenger... ..	1·33	1·58	1·37
Average receipts per ton per mile, coaching traffic	18·26	19·93	18·59
Average receipts per ton per mile, goods traffic	2·36	2·65	2·44
Average receipts for coaching traffic per ton per mile, including tare.	·546	·677	·570
Average receipts for goods traffic per ton per mile, including tare.	·492	·590	·520

Importance of finding out net and tare of a train load.

In the Report for 1877, attention was drawn to the importance of ascertaining the cost of conveying a definite load for a definite distance. In no other way can it be ascertained, whether the charges made for the conveyance of passengers, merchandise, minerals, agricultural and pastoral produce, and for other leading items forming portion of the general traffic, are adequate, excessive, or insufficient; or whether one description of traffic is not placed at a disadvantage, by having to bear charges unduly increased so as to compensate for the deficient charges on some other description of traffic. The subject has been

* Due to short distance coal is carried on the Northern Line.

been receiving considerable attention in the mother country from railway economists, and the reports on the railways of New South Wales, contributing as they have done to a solution of the problem as to the mode in which the required particulars are to be ascertained, have met with considerable and gratifying commendation. Mr. Rae, who was credited by an acknowledged English railway authority with being the first official who had presented the public with a true distribution not only of railway income but also of railway earnings, is now on a visit to England, and has been requested by the Board of Trade to explain the system we have adopted, as they are desirous, Mr. Rae writes to say, "to profit by our experience."

Testimony of
English
Railway
authorities.

In the appendix to this Report, will be found the ton mileage returns of our lines for 1878, and in continuation of the course adopted in the Report for 1877, details of the net earnings of the different description of goods traffic are afforded in the following tables:—

Appendix
No. 44, p. 94.

The amount which each item contributes to the net earnings is shown as under:—

GREAT SOUTHERN, WESTERN, AND RICHMOND LINES.

Goods conveyed on Northern Line contribute more largely than those on Southern and Western Lines.

A careful study of the above figures will show the cost of earning, and the net revenue derived from each considerable item of the goods traffic. It will be seen that the goods conveyed on the Northern line, contributed proportionately more largely to the net earnings, than those conveyed on the Southern and Western* lines, and that this result is owing to the shorter distance the goods were carried, the charge, per ton per mile, being higher for short than for long distances.

Ton mileage of Coaching Traffic on Southern and Western Lines. Contribution to net savings of Western section.

In the following table is given, for the first time, the ton mileage of the Coaching Traffic, on the different sections of the Southern and Western Lines, and the revenue derived therefrom. The Western section shows, in a marked degree, its superiority as a revenue earning line. From the statement it will be seen that the gross earnings of that line for Coaching Traffic were £98,035, equal to £506 per mile, and that they contributed to the net earnings £39,854 or 73·68 per cent.

Contribution of Suburban section.

The Suburban section takes rank next. The gross earnings were £47,406 or £3,386 per mile, and contributed to the net earnings the sum of £10,105 or 18·68 per cent.

Contribution of Southern section.

The Southern section, with the longest mileage and earning in the gross the largest revenue, contributed to the net earnings the sum of £4,136 only, or 7·64 per cent. The gross earnings were £94,948, equal to the comparatively

* The net earnings for coal must be debited with interest on capital invested in appliances for shipping the coal at Newcastle and Bullock Island.

comparatively small return of £338 per average mile of line in operation. This result was owing to the small number of passengers travelling between Goulburn and Wagga Wagga.

Cause of the small contribution from Southern section.

SUBURBAN, SOUTHERN, AND WESTERN LINES.

Contribution of each section to net earnings.

9.—WOOL TRAFFIC.

The following is a return of the wool carried on the railways for the years 1877, and 1878.

	South and West.	North.	Total.
No. of bales in 1878	104,789	43,111	147,900
Do. 1877	87,382	46,215	133,597
Increase in 1878	17,407	14,303
Decrease in 1878	3,104
Revenue in 1878	36,222	15,854	52,076
Do. 1877	29,827	16,509	46,336
Increase in 1878	6,395	5,740
Decrease in 1878	655

Returns for 1878 compared with 1877. See Appendix No. 22, p. 77.

It will be seen that, although there was a total increase of 14,303 bales carried in 1878, there was a decrease in the quantity of wool brought down by the Northern line of 3,104 bales, equal to 7 per cent., notwithstanding that, in consequence of the extension of the railway to Tamworth, some portion of the wool, which had previously been sent to Brisbane as the nearest shipping port, was, in 1878, sent to Sydney. This decrease, however, is not surprising, in view of the fact, that the effect of the droughts of 1876-7, which destroyed

Decrease in wool conveyed by Northern line.

14·83 per cent. of sheep in the Colony, was more severe in the Northern than any other district. The per-centage of loss in the Northern District amounted to 21·67.

Increase in wool forwarded from Western and Southern Districts.

From the Western District the quantity of wool forwarded was 52,540 bales, giving an increase, as compared with the quantity sent in the previous year, of 2,293 bales. From the Southern Districts, however, where the drought was least felt, the increase in the number of bales carried amounted to 13,972, and of these, 10,000 were from stations in the Riverina country, the wool grown on which had, previously to 1878, been sent to Melbourne.

Wool grown in New South Wales sent to Victoria and South Australia.

About 150,000 bales of wool, the produce of sheep depastured in New South Wales, still find their way to the shipping ports of Victoria and South Australia, and may be divided approximately as under—Victoria, 116,000 bales; South Australia, 34,000 bales. The extension of our Railways to Bourke on the Darling River, and to Hay on the Murrumbidgee River, should afford the means of diverting—with a considerable saving in the cost of carriage, to the producers—the greater portion of this traffic to Sydney.

Will be sent to Sydney as extensions are opened.

The following is a summary of a return, showing the number of sheep in the Colony, at the close of the years 1877 and 1878 :—

Districts.	Number of Sheep, 1 January, 1878.	Number of Sheep, 1 January, 1879.	Increase on 1 January, 1879.	Decrease on 1 January, 1879.	Per-centage of Increase or Decrease.	
					Increase.	Decrease.
Border	10,046,662	12,781,858	2,735,196	27·22
Northern	4,623,005	4,526,526	96,479	2·08
Southern	2,950,313	3,486,777	536,464	18·18
Western	3,901,702	4,964,323	1,062,621	27·24
Total	21,521,682	25,759,484	4,334,281	96,479	19·69

Increase in number of sheep.

10.—COAL TRAFFIC.

Appendices Nos. 25 to 33, pages 80—85.

The returns of the Coal trade, which will be found in the Appendix Nos. 25 to 33, afford the gratifying information, that notwithstanding the disarrangement at Newcastle of the conditions, and consequent partial disorganization of the system, of winning the coal—the disturbing influences of which are still agitating a portion of the mining community—the coal traffic has considerably increased. The exports to the neighbouring Colonies—Victoria taking the lead with 288,666 tons—have increased from 530,693 to 588,249 tons, while those to Foreign ports—San Francisco leading with 80,711 tons—have increased from 250,809 to 283,736 tons. The coal shipped coastwise has also increased by 17,263 tons—the quantity in 1878 having been 276,201 tons, as against 258,938 shipped in 1877.

Increase in coal traffic.

Increase in coal shipped at Newcastle. Appendix No. 26, p. 81.

The total quantity and value of coal shipped from the port of Newcastle during the last two years, and the increases in 1878, were as under :—

	Coasters.		Foreign and Intercolonial.	
	tons.	£	tons.	£
1878	276,201	187,587	871,985	602,557
1877	258,938	175,682	781,502	540,560
Increase in 1878	17,263	11,725	90,483	61,997

In the Appendix will be found monthly and yearly details of the quantity of coal carried, and the amount of freight received from each of the collieries during 1877 and 1878. The following is a summary of the return of the Northern Collieries :—

Year.	Tonnage.	Freight.	Per Ton.
	No.	£	s. d.
1877	848,999	41,948	0 11½
1878	953,558	46,484	0 11½

Appendix No. 31, p. 84.
Increase in quantity carried on Northern Railway.

For the Western Collieries the returns give the following :—

Year.	Tonnage.	Freight.	Per Ton.
	No.	£	s. d.
1878	52,487	19,590	7 5½
1877	45,288	16,989	7 6
Increase in 1878	7,199	2,601
Decrease in 1878	0 0½

Appendix No. 18, p. 66.
Increase in quantity carried on Southern and Western Railways.

In addition to the above there were 58,228 tons conveyed on the Southern and Western, and 4,938 on the Northern line, the total freight on which amounted to £21,829. This sum has not been included in the revenue return of traffic, as the coal was used for railway purposes.

11.—TARIFF.

Goods Rates.

The reductions that were made in September, 1878, in the goods charges, applied for the most part to goods that were carried long distances. A reduction from 4d. to 2½d. per ton per mile was made in the carriage of copper, for the purpose of inducing the proprietors of the Cobar Mines to send their produce to Orange, for transmission by rail to Sydney, instead of to Melbourne by the Darling and Murray Rivers and Northern Railway of Victoria. A reduction of 20 per cent. was also made for all goods of the 1st, 2nd, 3rd, and 4th classes carried a greater distance than 300 miles. The tendency of these alterations was to secure additional traffic, and as, by the incidence of the charges, they could not affect the existing traffic, no unfavourable result could follow the reductions made. The rates for the carriage of cattle were found to be high for long distances, while those for sheep were unduly low. A rectification of this inconsistency followed, with satisfactory results. The parcels rates for long distances and for small parcels were largely reduced. The minimum freight for a parcel, which had been fixed at 7 lbs., was reduced to 3 lbs., and the rates of carriage were reduced from 4d. for the shortest, and 2s. for the longest distance, to 3d. and 1s. respectively. Altogether, the alterations made in the parcels rates amounted to a reduction of 25 per cent.

Reduction in rates for goods—see Appendix No. 45, p. 107.

Reduction in cattle rates for long distances.
Reduction in parcels rates.

Effect on the revenue by a reduction of rates.

Establishment of Central Booking, Parcels, and Inquiry Office, Appendix No. 24, p. 79.

The immediate effect of a reduction in railway rates, is, necessarily, a falling off in the returns, but this ought only to prevail until the public become aware of the alteration and can take advantage of it, when, if the reduction has been judiciously made, an increase of revenue should follow. As the amended rates were in operation only for the last five months of 1878, it might fairly have been anticipated that the returns for parcels traffic would have been considerably lower than those for 1877, when the old rates were charged; but they were, on the contrary, augmented by the sum of £956, the revenue having been increased from £28,731 to £29,687. The establishment in November last of the Central Booking, Parcels, and Inquiry Office, in George-street, Sydney, largely contributed to this result. The convenience this office afforded to the public for booking parcels, resulted in a considerable increase of this business, as shown in the return which will be found in the Appendix. Since the close of the year, the Central Office—becoming better known—has been even more largely availed of for booking parcels, obtaining tickets, and acquiring information on all matters affecting the Railway business, and may be pronounced to be a great public convenience and financial success.

Passenger Fares.

Abolition of system of return tickets.

The principal alteration made in the passenger fares has undoubtedly been the abolition of the system of return tickets. It is difficult to understand why this system should have been introduced in connection with the Railways of this Colony, unless it was thought desirable to follow the practice which obtained on English Railway lines. The conditions of traffic, however, on those lines are altogether different. In England, as in other countries, where the Railways are conducted by private enterprise, a system more or less competitive prevails. For instance, a resident in London, could go to Edinburgh either by the Great Northern Railway, or the Midland Railway, and if single fares only were issued he could go by one line and return by the other without disadvantage. To secure him for both the down and up journey, the inducement of a return ticket, at a reduction in the double fare, varying in amount with the advantages proffered by the competitive Company, is offered. But in this Colony, and other countries where Railways are constructed and managed by the State, the like conditions do not apply. There are, as a rule, no other means of travelling to and returning from a place but the one railway line, and as the railway affords *per se* the cheapest and quickest mode of conveyance, there is no reason for offering special inducement to a traveller to make use of it for both journeys. The system of return tickets was not abolished until the last month of the year with which the Report deals, and the effect of its abolition and of the reduction made in the single fare by way of compensation, cannot, for the present, be shown.

Reduction of fares on certain sections.

At the same time that the alteration referred to was made, the fares on the sections between Emu Plains and Bathurst, Picton and Goulburn, and Singleton and Murrurundi (which had been fixed at the comparatively high rate of 3½d. per mile 1st class, and 3d. per mile 2nd class, on account of the increased cost of working these portions of the lines and the comparatively small number of people travelling thereon) were reduced to 3d. and 2d. respectively. It was anticipated that these modifications would result in an immediate loss of £15,000 a year, unless the diminished charge was recouped by a greater number of passengers being induced to travel in consideration of the lower fares charged, but the result cannot be ascertained until the statistics of the present year are obtained and analyzed.

12.—RAILWAY ACCIDENTS.

The usual tabulated statement of the accidents, resulting in death or personal injury, which occurred during the year, will be found in the Appendix. It may be summarized as under :—

	Passengers.				Servants.				Trespassers.	
	Beyond their own control.		Miscconduct, or want of caution.		Beyond their own control.		Miscconduct, or want of caution.		Miscconduct, or want of caution.	
	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Suburban	4	...	2	3	...	2	...
Southern	2
Western	7	1	1	4	5	1	...
Northern	1	1	3	1
	...	7	1	5	5	9	3	1	6	1

Return of railway accidents.
See Appendix No. 47, p. 129.

It will be seen that no passenger was killed, and only seven injured and those very slightly, from causes beyond a passenger's control, or to which he in no way contributed through his own carelessness. Two train accidents (one at Emu Plains and the other at Orange on the Western Line) call for special remark.

Accidents at Emu Plains and Orange.

The accident at Emu Plains occurred on the night of the 30th January, 1878, and was caused by a collision between two goods trains, both having been overthrown by the force with which they met. The driver and guard of the up train and the fireman of the down train were killed, and the driver of the down train and the fireman of the up train were severely injured. The enquiry, which followed, showed that the Guard of the up train brought his train from Wascoe's Siding in the expectation that he would be able to reach the siding at Emu Plains before the down train was due there, having miscalculated the time within which the running could be performed. He was charged with manslaughter, convicted, and sentenced to imprisonment for two years. The staff and ticket system under which the trains on the single lines have since been worked has made the repetition of such a collision impossible.

Accident at Emu Plains.

Guard convicted of manslaughter.

Staff and ticket system prevent the repetition of such an accident.

The accident at Orange occurred to the mail train, due to arrive there on the 28th May at 3.55 a.m. The train had passed the distance signal at Orange and was slowly approaching the station, when it left the main line, and, entering a siding on which some empty carriages were standing, came into collision with them. Six passengers were injured—one more so than the others—but none seriously. The force with which the train came in contact with the empty carriages must have been very slight, as no damage, except of the most trifling character, was done to the rolling stock. A searching inquiry into the cause of the train leaving the main line, was instituted, and the conclusion arrived at was, that it was due to the malicious act of some person or persons unknown. The points for the siding, which had been set for the main line and locked, were thrown over, the lock broken, and the fastenings removed. A reward of £200 and a free pardon to any accomplice, not being the actual offender, who would give information, were offered by the Government, without, however, any result.

Accident at Orange.

due to the malicious act of some person unknown.

Reward offered by Government.

13.—MISCELLANEOUS.

Rules and Regulations.

Rules and regulations for staff revised.

In the early part of 1878, the Rules and Regulations, for the guidance and conduct of the staff in working the traffic, were revised with great care and re-issued. Provision was made therein for working the single lines on the staff and ticket system, and the double lines on the absolute block system.

Lighting Railway Carriages.

Lighting carriages with gas.

The inadequacy of the light, afforded in the railway carriages by the use of oil lamps, has long been felt by the travelling public to be a great inconvenience. Arrangements were made during last year for lighting the carriages with gas, and this has been successfully accomplished. Forty-three carriages, out of a total of 180, on the South and West Lines, have been supplied with the requisite apparatus; the remainder of the carriages are being rapidly fitted, and the system will be extended to the Northern Railway as early as possible.

Conditions of Employment.

Conditions of employment established.

The character and capacity of the men employed in the Railway Department are matters of so much importance to the efficient working of the traffic and the proper conduct of the general business of the lines, that it was considered essential to establish conditions under which employment would for the future be given and those, already in the service, promoted. A copy of these conditions will be found in the Appendix. They propose to effect the following objects, which are held to be necessary to the proper organization of an efficient staff:—

Appendix marked A, p. 5.

- (1.) The establishment of a service having, in case of good behaviour, all the elements of permanence.
- (2.) A gradual and reasonable increase of wages during active employment, based upon good behaviour and the length of continuous service in any one grade.
- (3.) The right to a hearing before a committee, in the cases of those once enrolled on the permanent staff, before being finally dismissed at the will of a subordinate official.

Returns.

In addition to the Returns referred to in the Report, the following will be found in the Appendix:—

Appendix No. 11, page 59.

1. Table of mileage opened annually.

Appendix No. 17, page 65.

2. The rolling stock manufactured during 1878, with names of contractors, &c.

Appendix No. 18, page 66.

3. The particulars of the various classes of merchandise carried, its tonnage, and freight value.

Appendix No. 20, page 72.

4. The revenue and expenditure at each of the Stations.

Appendix Nos. 35 and 36, pages 86, 87.

5. Particulars of the suburban passenger traffic.

Appendix No. 21, p. 76.

6. The number of sheep in Border Districts.

Appendix No. 23, p. 78.

7. Statement of the value of the live stock and wool, &c., exported over the Border.

Appendix No. 45, p. 107.

8. Merchandise traffic rates from 1876 to 1878.

9. Comparative statement of the rates of railway carriage in each of the Australian Colonies. Appendix No. 46, p. 116.
10. Number and classification of railway employés, and the scales of, and total amount paid for, salaries and wages. Appendix Nos. 49-50, pp. 131-136.
11. Table of the progress and financial position of the railways, from 1855 to the end of 1878. Appendix No. 48, p. 130.
12. Return of free passes issued during 1878. Appendix No. 51, p. 137.

Annexed to the appendix are thirteen coloured diagrams, showing the following particulars of the Railway transactions for each of the twenty-four years from 1855 to the end of 1878.

1. Length of line opened on 31st December in each year.
2. Number of passengers.
3. Tonnage of goods.
4. Earnings from coaching traffic.
5. Earnings from goods traffic.
6. Gross and net earnings and working expenses.
7. Working expenses.
8. Earnings per train mile.
9. Working expenses per train mile.
10. Percentage of working expenses to gross earnings.
11. Net earnings.
12. Capital invested in lines open.
13. Interest on capital.

RECAPITULATION.

The transactions during the year are thus summarized:—

The expenditure for construction was £10,277,851, upon which the interest was £482,222, or 4·69 per cent.

The capital expended on lines open for traffic, was £9,784,645, upon which the interest was 4·73 per cent.

The working expenses were increased by £118,003, and the net earnings decreased by £30,934.

The net earnings were £366,001, yielding 3·56 per cent. to the total capital expenditure, and 3·74 per cent. to the capital expended on lines open for traffic. The interest paid by Government was therefore 1·13 and ·99 per cent. in excess of the percentage of net earnings to total capital, and to capital reproductively employed respectively.

At the close of the year, 688½ miles of line were open for traffic, and 208 miles were in the course of construction, to be completed by 31st December, 1880.

The rolling stock consisted of 154 locomotives, 378 coaching, and 3413 goods vehicles.

The number of employés was 5,156, and the wages paid £415,075 7s. 8d.

The cost of the railway materials, in the conveyance of which 95 vessels were employed, amounted to £283,543, and the freight and insurance to £26,495, making a total of £310,038.

During

During the year, 37,967 passenger trains and 28,681 goods trains were run a distance of 2,655,176 miles. The earnings amounted to £902,989, and the working expenditure to £536,988, or 59·47 per cent of the earnings. The number of passengers who travelled was 3,705,733, of whom 898,693 were first class, and 2,807,040 were second class; included in these figures are 8,590 season-ticket holders, representing 1,123,508 journeys. The proportion percentage of these classes is for first class passengers 13·59, second class 56·09, and for season-ticket holders 30·32.

The merchandise traffic consisted of 718,608 live stock, 147,900 bales of wool, 1,186,669 tons of minerals, and 380,794 tons of general goods.

The average earnings per mile open were £1,426, the average expenditure was £848, the net earnings were £578.

The average earnings per train mile were 81·62d., the expenses 48·54d., and the net earnings 33·08d.

There was an increase of 95,173 in the number of first class passengers, of 397,526 second class, and 255,890 in the journeys made by season-ticket holders, an increase in the receipts of £34,721 from coaching traffic, and of £52,348 from goods traffic—making a total increase of £87,069.

The decrease in the per centage of net earnings to capital invested is a salient point, which must necessarily attract public attention, and it is therefore satisfactory to have shewn that this decrease has principally arisen from reductions in rates advisedly made by the Government in the interest of the public. The rapid extension of the lines and the large increase in the traffic are good evidences of the growing prosperity of the Country; and I may fairly conclude this review of the transactions of the Railway Department during last year, by observing, that the facts and figures given therein furnish ample grounds upon which the Colony may justly congratulate itself.

I have the honor to be,

Sir,

Your obedient Servant,

Commissioner for Railways.

The Honorable John Lackey,
Secretary for Public Works, &c., &c.

APPENDIX TO REPORT ON RAILWAYS—1878.

A.

Conditions of Employment in the Government Railway Service of New South Wales.

THE character and capacity of the men employed in the Railway Department are matters of so much importance to the efficient working of the traffic, and the proper conduct of the general business of the Lines, that I consider it essential to establish conditions under which employment will in future be given and those at present in the Service promoted.

Under these conditions advancement in the Service will be by promotion from one grade to another (according to seniority, capacity, and general conduct); the Staff have, therefore, recently been classified, and the rates of wages revised, and the number of classes in each position, with the wages pertaining thereto, will be found under the different headings.

THE following are the conditions for each Branch:—

LOCOMOTIVE BRANCH.

WORKSHOPS.

Only competent workmen will be employed in the Locomotive shops; they will be paid the average rates of wages found to be prevailing in private establishments for work similar to that which they are required to perform.

Lads will be taken into the shops as required, to learn the trades of fitter, turner, &c. They must be of good constitution, and able to read and write with facility; they will not be bound apprentice, but will be able to resign, and will be liable to dismissal, in the same way as the men; they will also be subject to the same rules and regulations as the men. The remuneration for their services will be as follows:—

1st six months	no pay.
2nd	„	8d. per day.
2nd year	1s. 2d. „
3rd	„	1s. 6d. „
4th	„	3s. „
5th	„	5s. „

At the end of five years they will be paid wages proportionate to the value of their services.

THE following will be the conditions for acquiring the positions of Cleaner, Fireman, and Engine-driver:—

CLEANERS.

Only young men between 17 and 22 years of age will be eligible for appointment as Cleaners. Each man must undergo a medical examination, and produce a certificate from the Railway Medical Board to the effect that he is free from bodily or mental infirmity, possesses good eyesight and hearing, and is not afflicted with colour blindness either by day or night; he must also produce satisfactory testimonials of character, and be able to read and write.

The rates of wages will be as follows:—

	s.	d.	
5th class—1st 6 months	5	0	per diem.
4th class—6 to 12 months	5	6	„
3rd class—12 to 18 months	6	0	„
2nd class—18 to 24 months	6	6	„
1st class—after 2 years (maximum rate)	7	0	„

6d. per day additional will be allowed for night work.

When required, 1st class Cleaners will be promoted to Firemen, according to seniority and efficiency, provided their general conduct has been satisfactory, and that they are eligible in all other respects.

FIREMEN.

FIREMEN.

All Firemen must have served as Cleaners, and as vacancies occur eligible men from the Cleaning Staff will be promoted. Before being appointed as Fireman each man who has not previously passed a medical examination will have to produce a certificate from the Railway Medical Board similar to that required under these conditions from Cleaners when entering the service. He must also undergo an examination in the Rules and Regulations applicable to Enginemen, especially those relating to the working of trains, signalling, &c.

The rates of wages will be as follows :—

3rd class.—1st 18 months	8s. per diem.
2nd „ 2nd „	9s. „
1st „ After 3 years service (maximum rate)	10s. „

New Firemen must always commence in the 3rd class.

As vacancies for Drivers occur, Firemen who have been not less than twelve months in the 1st class will be promoted according to seniority and efficiency, provided their general conduct has been satisfactory.

ENGINE DRIVERS.

No person will be allowed to undertake the duties of Engine Driver unless he has previously served as Fireman, and is eligible for promotion. Before being appointed as Driver each man must produce a certificate from the Locomotive Foreman or Overseer, showing that he has passed an examination, and is competent to take charge of a Locomotive Engine.

The subjects of examination must embrace a knowledge of the road, gradients, approaches to stations and sidings, positions of signals, &c., the examination of engine before joining a train, firing, trimming of syphons, oiling, testing of valves and pistons, and the various modes of uncoupling engines when they fail on the road, and the methods to be adopted to surmount any slight breakdown, &c., &c.

The rates of wages will be as follows :—

5th class—For first 12 months	11s. per diem
4th „ From 12 to 24 months	12s. „
3rd „ From 24 to 36 „	13s. „
2nd „ From 36 to 60 and upwards	14s. „

The position of 1st class Driver will only be obtainable as vacancies in that grade occur, and after serving as a Driver at least five years ; wages, 15s. per diem.

New Drivers must always commence in the 5th class.

Enginemen will be expected to qualify themselves for the higher grades, not alone by serving the required periods, but by acquiring such a knowledge of the principles, construction, and operation of the Locomotive Engine, of steam, and the principle of its expansion, of natural science and mechanics, &c., as will enable them to advance with credit to the highest position on the foot plate, and to take rank as mechanical engineers.

PERMANENT WAY BRANCH.

MECHANICS, &c.

None but competent workmen will be employed in the shops or elsewhere ; the wages will be at the same rates as paid in private employ for similar kinds of work.

LABOURERS.

The Permanent-way labourers must be strong able-bodied men, in good health, and capable of performing rough hard work. They must have perfect eye-sight and hearing, be of good character, and able to read and write. Promotion and increase of wages will be in accordance with merit.

These conditions will not apply to temporary men such as are employed in the flying gangs (except as to their ability to perform the work required of them), but qualified temporary men will be eligible for the permanent staff as vacancies occur.

GANGERS.

When gangers are required suitable men will be selected from the labourers. They must be steady and reliable, thoroughly understand the work, and be quite competent to undertake all the duties of the position.

INSPECTORS.

Gangers will be promoted to Sub-Inspectors, and Sub-Inspectors to Inspectors as required, in cases where they are qualified to fill such positions.

TRAFFIC

TRAFFIC BRANCH.

The following will be the conditions for acquiring the positions of Station-master, Goods' Clerk, Station Clerk, Telegraph Operator, Guard, Signaller, Foreman, Shunter, Porter, and Watchman :—

STATION-MASTERS.

Only persons having general railway experience will be eligible for promotion to Station-masters. It is desirable that these officers should possess a knowledge of all the outside duties, such as signalling, shunting, and general yard work, loading and unloading of all descriptions of traffic, and the working of trains, &c., as well as be able to perform the inside or office work. The position of Station-master is therefore one which guards and others who have gained such knowledge by working their way up from the lowest grades, and are qualified in other respects, may justly aspire to. A practical acquaintance with Morse telegraphy (which should be acquired by every employé in the Traffic Branch) will also be greatly conducive to such promotion, and good conduct will always be indispensable.

The stations are divided into six classes, and the salary attached to each class will be as follows:—

6th class—	£140 a year, with house.
5th class—	£150 do.
4th class—	£175 do.
3rd class—	£200 do.
2nd class—	£225 do.
1st class—	£250 do.

Station-masters will be paid according to the class of station they are in charge of, and increase of salary will only be obtainable by promotion to stations of a higher class, such promotions to take place as vacancies occur, and according to seniority, efficiency, and good conduct, and eligibility in all other respects.

The above classification does not include small wayside stations and platforms which are in charge of porters.

Should it be considered necessary, before any person is appointed as Station-master, he may be called upon to pass an examination in general railway matters, rules and regulations, accounts, correspondence, &c., &c.

CLERICAL STAFF.

It being considered undesirable to appoint as Station-master persons who have chiefly been accustomed to clerical duties, and as goods and station clerks are generally too much confined to their offices to admit of their acquiring a practical knowledge of outside work, it is deemed advisable to give them a separate classification, which will be as follows:—

3rd class ...	{ Minimum salary, £50 a year. Maximum ,, £110 ,,
2nd class ...	{ Minimum salary, £120 a year. Maximum ,, £165 ,,
1st class ...	{ Minimum salary, £175 a year. Maximum ,, £250 ,,

The maximum salary in each class to be obtained by yearly increases of £15 a year; promotions from one class to another will be made according to seniority, but only when vacancies in a higher class occur.

Increases of salary and promotion will always be dependent upon efficiency and good conduct.

In exceptional cases, when it is found necessary to accept the services of clerks who have had previous experience, the position they are to occupy in the classification will be regulated by the degree of proficiency they may have acquired; but the rule to be observed as closely as possible will be to receive into the Service lads between 15 and 17 years of age, whose competency will be ascertained by a probationary term of service of three months, after which they will commence at the lowest rate of remuneration, viz., the minimum of the third class. Before any lad will be appointed he will be required to produce a certificate from a schoolmaster that he can read and write with facility, and is acquainted with the rules of arithmetic.

TELEGRAPH

TELEGRAPH OPERATORS.

Lads of not less than 15 years of age will be received into the Service, as required, to learn the duties of Telegraph Operator. In all cases it will be necessary to produce a certificate from a Schoolmaster that they can read and write with facility, and are acquainted with the rules of arithmetic.

While on probation they will receive a nominal salary of 2s. 6d. per week, but when they have learned to operate and are appointed to stations they will come under the following classification, viz. :—

3rd class ...	{	Minimum salary, £60 a year.
	{	Maximum ,, £108 ,,
2nd class ...	{	Minimum salary, £120 a year.
	{	Maximum ,, £144 ,,
1st class ...	{	Minimum salary, £156 a year.
	{	Maximum ,, £180 ,,

The maximum salary in each class to be obtained by yearly increases of £12 a year.

Probationers will not be appointed as Operators unless the Telegraph Inspector reports that they are competent to take charge of an office, and they must always commence on the lowest pay in the 3rd class.

Promotions from one class to another will be made according to efficiency, seniority, and good conduct, but only when vacancies in a higher class occur.

Telegraph Operators will frequently be required to perform general railway work in addition to operating; it will, therefore, be to their advantage to acquire a thorough knowledge of passenger and parcels booking, and the duties of General Station Clerk, &c., as on the efficiency they attain in these matters will their promotion to a great extent depend.

GENERAL OUT-DOOR STAFF.

The employés comprised in the General Out-door Staff will be classified and paid as follows:—

Foremen (Goods and Coaching).—From 10s. to 12s. per day.

Head Goods Guards.—9s. per day, for first six months; after six months and up to eighteen, 9s. 6d.; after eighteen months and up to five years, 10s.; after five years and up to ten years, 10s. 6d.; after ten years, 11s.

Head Passenger Guards.—9s. per day for first year; 9s. 6d. for the second year; after two years and up to seven years, 10s.; after seven and up to twelve years, 10s. 6d.; after twelve years, 11s.

Assistant Guards.—8s. per day for first six months; after six months, 8s. 6d.

Brakesmen.—£2. 2s. per week.

Shunters and Signalmen.—Probationers (three months), 6s. per day.

3rd class, 7s. per day.

2nd ,, 7s. 6d. per day.

1st ,, 8s. to 9s. per day.

Head Shunters, 10s. to 11s. per day.

Porters (Goods and Coaching).—3rd class, including labourers, to receive 6s. per day for the first six months; second six months, 6s. 6d.; after twelve months to receive 7s.

2nd class, 7s. 6d. per day.

1st ,, 8s. ,,

Head Porters, 10s. per day.

Porters-in-charge.—£2 8s. per week, with house.

Watchmen (Goods Branch).—£2 2s. to £2 5s. per week.

Good conduct and efficiency will in all cases be necessary to entitle men to the benefits of this classification.

No one will be admitted into the Service for any position in the foregoing classification, whose age exceeds 35 years, or who is unable to read and write.

Every applicant must undergo a medical examination, and produce a certificate from the Railway Medical Board that he is free from all bodily and mental infirmity, is physically able to perform the duties of the position he seeks, and that his eyesight and hearing are perfect. He must also produce approved certificates of good character.

Porters will be appointed as Brakesmen when required; they must thoroughly understand the working of brakes, signalling, and how to protect trains, &c.

Vacancies

Vacancies for Guards will be filled by promoting the most suitable men from the Shunting Staff and Porters. Every Guard must run as Assistant for at least twelve months before being allowed to take independent charge of a train. Every man must also pass an examination in the duties, &c., before being appointed Assistant Guard, and also before being promoted to Guard. The chief subjects of the examinations will be as follows :—

ASSISTANT GUARDS.

Education.
 Knowledge of Rules and Regulations, especially those relating to train working.
 Shunting.
 Signalling.
 Working of brakes.
 Securing of loading.
 Single and double line working under the different systems.
 Protection of trains.
 Steep gradient working.

GUARDS

Will be carefully re-examined on the subjects for Assistant Guards.

Knowledge of road, gradients, &c.
 Knowledge of positions and descriptions of signals.
 Knowledge of approaches to stations and sidings.
 Knowledge of station yards.
 General railway working.

Men who have not previously undergone a medical examination—such as those who joined the Service before these conditions came into operation—must be examined as to their sight and knowledge of colours before being allowed to run as Brakesmen, or being promoted to Assistant Guard or Guard.

A good address and respectful bearing will be indispensable qualifications for Passenger Guards.

GENERAL.

APPOINTMENT OF EXPERIENCED MEN.

The foregoing conditions, except as to medical examination, moral character, ability to read and write, &c., will not apply to persons who can produce certificates that they have served on other Railways in any of the capacities mentioned, and are considered by the Head of the Branch competent to undertake the duties without any probationary career. Such persons, however, after being appointed will not be promoted to a position higher than that for which they hold certificates, except under the same conditions as men trained in the Colony.

RULES AND REGULATIONS.

Every person in the Railway Department will hold his situation conditionally on his being subject to, and strictly observing the Rules and Regulations established from time to time for his guidance, whether published with the General Rules and Regulations or otherwise; and every employè must consider all rules of general application equally as binding upon him as those specially pertaining to his own particular position or duties.

PROMOTION.

It must be distinctly understood, that in every case promotion will chiefly depend upon the person's capacity to perform the duties of a superior class or position, combined of course with general fitness and good conduct. To merely serve the prescribed time in any class or position will not of itself qualify any one for promotion.

LEAVE.

Every servant, except Station-masters and the clerical staff, will be entitled to a day's leave on full pay for each proclaimed Government holiday. Those servants who cannot take such leave on the proclaimed holidays, in consequence of being required to work, will, on making application, be allowed the same number of days at a future time, provided the Head of the Branch decides that they can be conveniently spared. Should, however, the exigencies of the Service not admit of the whole or any of the holidays being taken before the 31st of March of the year following that for which they are due, an equivalent in cash will be paid.

In

In addition to the above, Engine Drivers and Firemen will be allowed from three to six days' leave of absence each year, on full pay, the exact number of days to be regulated in each case according to the general conduct of the person and the amount of work he has performed. This leave will only be granted at times most convenient to the Department, and the Locomotive Superintendent will have the power to disallow it altogether in cases where he considers the person unworthy of the indulgence.

Station-masters and the Clerical Staff, if they can be conveniently spared, will be allowed two weeks' leave of absence in each year. Any such leave not taken when due will only be cumulative to four weeks.

Except for proclaimed holidays, no remuneration will be allowed in lieu of leave.

FREE PASSES.

Holiday free passes will not be granted to any employés who, through misconduct, are not deserving of such indulgence, nor at times when there is likely to be any difficulty in providing sufficient carriage accommodation for the public.

Employés whose duties prevent their living in a town will be allowed the privilege of having their children conveyed to and from school by the rail free of charge, provided there be no objection to stopping trains at the point where they are required to be picked up and set down.

INVESTIGATION OF CHARGES.

To secure to the employés a fair investigation of the charges brought against them from time to time, such as carelessness or misconduct in working the traffic, causing accidents, &c., a Board will be appointed consisting of representatives from the Traffic, Locomotive, and Permanent-way Branches, one from each Branch, whose duty it will be to thoroughly inquire into cases referred to them, take evidence, decide who is at fault and to what extent, and recommend punishment accordingly.

Every case in which employés in more than one Branch appear to be implicated, and it is uncertain with which Branch the fault lies, or where there is any difficulty in deciding as to the degree of culpability of the persons in each Branch when the blame is divided, will be dealt with by the Board; the Board will also be called upon to inquire into and report on any other cases, should it be considered that the officers of the Branch concerned have not made a proper investigation, or there is any doubt as to the justice of the punishment recommended.

In all cases, however, whether investigated by the Board or otherwise, employés in any Branch of the Service will have the right of appeal to the Commissioner, should they consider themselves unfairly dealt with.

CHA^s. A. GOODCHAP,
Commissioner for Railways.

Railway Department,
Sydney, 10 July, 1878.

Approved,—
JOHN SUTHERLAND,
Secretary for Public Works.

No. 1.

The Engineer for Existing Lines to The Commissioner for Railways.

Department of Public Works, Railway Branch, Engineer's Office,

Sir,

I have the honor to report on the condition of the existing Lines of Railways for the year ending 31 December, 1878.

GREAT SOUTHERN RAILWAY.

Sydney to Parramatta Junction—Double line—Length, 13 miles 16 chains.

The whole of the works on this length, as well as those on the Darling Harbour, Haslem's Creek Cemetery, and Collingwood branches, have been maintained in good working order during the year.

Various alterations, as well as additional new works, have been carried out on this length during the year, a list of which is given hereafter.

Parramatta Junction to Cootamundra—Single line—Length, 239 miles 56 chains.

The whole of the works and permanent-way on this length have been kept in good safe repair.

Cootamundra to Bethungra—Single line—Length, 15 miles 10 chains.

This section of the line was opened for public traffic on the 15th April, 1878, and the whole of the works throughout have been kept in good repair.

Bethungra to Junee—Single line—Length, 18 miles 28 chains.

This portion was opened for public traffic on the 6th July, 1878, and has been kept in good running order.

Junee to North Wagga—Single line—Length, 17 miles 38 chains.

This length was opened for public traffic on the 3rd September, 1878, and has been kept in good order throughout.

Early in February last that portion of the line between Binalong and Cootamundra was severely damaged by floods, owing to sufficient water-ways not having been provided in constructing the line.

In consequence of this it was found necessary to put in a great number of additional culverts, also one additional span of 20 feet to the viaduct over Murrumburrah Creek, the embankment at each end having been washed away,—the particulars of which will be found in the list of works carried out during the year.

In connection with the above it was found necessary to cut various side drains and inlet and outlet drains, so as to effectually carry off the flood waters, and I do not anticipate that any serious damage will arise in future from this cause.

The subsidence of the new embankments in various parts has caused great expense in keeping them to their proper level; but notwithstanding this the permanent-way has been kept in good running order.

The following works have been completed during the year, viz. :—

- At Sydney*, weigh-bridge at goods-shed fixed.
- New signal erected.
- Gas laid on in lamp-room at goods-shed.
- Buffer stops, northern end of George-street siding, erected.
- Entrance gates to goods-shed removed and re-erected.
- Fence bounding Prince Alfred Park, eastern side of yard, renewed.
- Hay gauge erected at goods-shed.
- Alterations, Audit Office, new office for foreman, permanent-way, erected.
- Two additional forges erected.
- Crane at blacksmith's shop removed and re-erected.
- New arrival platform.
- Additions to store offices.
- New office for check clerk erected.
- New lamp-room erected.
- New office for pay clerk and draftsman erected.
- New machinery erected, carpenters' shop.
- Alterations to booking office.

At Darling Harbour distance signal erected.
 Goods office erected.
 10-ton crane erected on wharf.
 5-ton crane erected on wharf.
 Improvements, Dixon-street.
 New foot over-bridge erected.
Eveleigh, retaining-wall built on western side of railway, south of Wells-street.
 Booking office erected.
 Two turnstiles erected.
 New block signal-box erected.
 Two new platforms erected.
At Macdonald Town, booking-office erected.
 Gas laid into platform.
At Newtown, new foot over-bridge erected.
 New goods office erected.
 New block-signal box erected.
 Up and down platforms lengthened.
At Stanmore, two new platforms erected.
 Closet and urinal erected.
 Booking-office erected.
 New distance signals erected.
At Petersham, platforms lengthened.
 New booking-office erected.
 Ladies' waiting-room erected.
 New foot over-bridge erected.
 New semaphore erected.
 New block-signal box erected.
 Over-bridge, Crystal-street, widened, nearly completed.
At Ashfield, wicket-gate erected.
 Booking-office erected.
 New stockyard erected.
 New culvert built at Alt-street.
 Over-bridge partially renewed.
At Croydon, lamp fixed on platform.
 Stove fixed in office.
 New semaphore erected.
 Watercloset and urinal erected and fenced in.
At Burwood, gate-house erected.
 New station erected.
At Redmyre, stove fixed.
 New turnstiles erected.
 New road approach fenced.
At Homebush, yard from Station-master's house to railway line fenced.
 Sheep-yard paled.
At Auburn, ticket-office erected.
At Parramatta Junction, new signal erected at Dogtrap Road.
At Merrylands, platform erected.
 Waiting-shed erected.
 New signal erected.
At Fairfield, new booking-office erected.
 New ladies' waiting-room erected.
 New parcels-office erected.
At Cabramatta, two lamps and posts erected.
 Gate-house rebuilt.
At Menangle, new waiting-shed erected.
At Douglass Park, new platform erected.
At Big Hill, staff and ticket-box erected.
Mittagong, dockwall extended.
 Culvert lengthened 13 feet.

New repeating distance signal erected.
Bowral, Station-master's house fenced in.
At Moss Vale, tank fixed at gate-house.
At Jordan's Crossing, office removed from Amos siding and re-erected.
 New signals erected.
At Barber's Creek, additional tank stand for water supply erected.
At Marulan, buffer stops fixed.
At Goulburn, new blacksmith's shop and forge erected.
 Footpath made on bridge.
 Signal erected.
 Roof of Mrs. Phillips' house repaired.
 Office for Locomotive Inspector erected.
 Gate-house, Monday-street, fenced.
 Goods-shed office altered.
 New gates erected.
 New office for Inspector Lewton erected.
At Breadalbane, tank fixed at gate-house.
 Two lamps and posts erected.
 Station-master's house fenced in.
 Hay gauge erected.
At Fish River, railway fence bounding Mr. Kennedy's land wired.
At Gunning, railway fence bounding Glebe land wired.
 Railway fence bounding Mr. Reynolds' land wired.
 Stock-yard altered and additional rail put on.
 Road from station fenced.
 Crane removed from Binalong and re-erected.
At Jerrawa, Telegraph Office erected.
 Buffer stops erected.
 Two distance signals erected.
Yass, tank for water supply erected.
 Buffer stops erected.
At Bowning, water-closets altered.
 New water-closet, Station-master's house.
 Stock-yard enlarged and altered.
 Tank fixed at gate-house.
At Galong, waiting-shed erected.
At Rocky Ponds, two distance signals erected.
At Murrumburrah, office lined.
 Lamp-room erected.
 Two lamps and posts erected.
 Coal stage erected.
 Partition between station-master's office and parcels office removed.
 Addition made to bridge.
At Wallendbeen, two distance signals erected.
At Cootamundra, stock-yard erected.
 New gates erected.
 New viaduct constructed.
 New lamp-room erected.
 Station drained.
 Gate erected at Burke-street.
 Station-master's house separated from approach road by a paled fence.
At Bethungra, distance and semaphore signal erected.
 Enginemen's house and coal stage removed from Cootamundra and re-erected.
At Junee, new wool stage erected.
At North Wagga, enginemen's house removed from Bethungra and re-erected.

Bridges,

Bridges, culverts, &c., put in during the year :—

Main line, at 68 miles	952	952
Total	3,512	2,607	6,119

The following sleepers have been used for renewals during the year :—

Sydney to Parramatta Junction	380
Parramatta Junction to Campbelltown	1,865
Campbelltown to Picton	4,038
Picton to Barber's Creek	586
Marulan to Bowning	100
Total	6,969

GREAT WESTERN RAILWAY.

Parramatta Junction to Orange—Single line—Length 178 miles 49 chains.

The whole of the permanent-way and works on this length are in good state of repair.

The work of taking out the excessive super-elevation given to the outer rail in curves during the construction of the line between Bathurst and Orange has been completed at a cost of £51.6 6s. 6d., exclusive of engine power, &c., which I estimate at £100, making a total of £61.6 6s. 6d.

The work of laying down a second line of rails between Parramatta Junction and Parramatta was commenced in August last.

Drawings, plans, sections, and specifications are being prepared for laying down a second line of rails between Lithgow Zigzag and Bowenfels, together with extensive coal sidings, new station buildings, goods-shed, &c., at Lithgow.

The completion of these works will greatly facilitate the working of the traffic.

The following works have been completed during the year, viz. :—

At Blacktown, semaphore signal erected.

At Rooty Hill, goods-shed erected.

Tank fixed.

Penrith, underground tank constructed at Gate-house, Cross Roads.

2 lamps erected.

Floor of engine-shed, asphalted.

Catch-pit for water crane constructed.

Foundation for Tangye pumping-engine.

New shed at station-master's house erected.

At Emu Plains, goods-shed erected on platform.

Lamp erected.

New buffer-stops erected.

At Brookdale (Wascoe's-siding), new gate erected.

Lamp and post erected.

New house for porter-in-charge erected.

Wicket-gate erected in fence at Lapstone.

At Wascoe's, new ticket-office erected.

At Springwood, ticket and telegraph office erected.

Wicket-gate erected.

Signal removed and re-erected.

At The Valley, new tank fixed.

At Falconbridge, hand-gate erected in fence.

At Alphington, level-crossing made.

At Blue Mountain, new station nearly completed.

At Katoomba, new telegraph office erected.

At Blackheath, waiting-shed erected.

At Mount Victoria, fence at station-master's house removed.

Urinals roofed in.

At

At Mount Wilson, new signals erected.
 Loading stage erected.
 Stock-yard erected.
 New gates erected.
 New steps for platform fixed.
 Telegraph Office erected.
 Level crossing laid in.
At Vale of Clwydd, box for signalman erected.
At Clarence Siding, house for porter in charge erected.
 Gate erected.
 Steps and hand-rail fixed to platform.
At Lithgow, lamp fixed.
 Distance signal altered.
 Culverts for new sidings lengthened.
 New gates erected.
 New distance signal erected.
 Parcel office partitioned off.
 Gate erected at platform.
 Staff and ticket-box erected.
At Bowenfels, level crossing laid in.
 Signals altered.
Wallcrawang, cattle-yard altered.
At Rydal, two wicket gates erected.
 Turnstiles erected.
 New signal erected.
 Railway fence bounding Mr. M'Laughlan's land wired.
 Loading stage erected.
At Tarana, room for telegraph operators erected.
 Addition built to Station-master's house.
 New signal erected.
At Locke's platform, new signals erected.
At Macquarie Plains, turnstile erected.
 Verandah erected.
 New lamp-room and parcels-office erected.
 Fence at Station-master's house removed.
 Station yard levelled.
 Loading stage removed from Raglan, re-erected, and lengthened.
At Raglan, hay gauge erected.
 New tank fixed.
At Kelso, turnstiles made and fixed.
 Cattle stage made cattle-proof.
 New kitchen and verandah built to Station-master's house.
 Pump fixed to tank.
 Station-master's house fenced in.
At Bathurst—Coal-stage lengthened 30 feet. Additional coal-stage erected.
 Turnstiles erected at goods-shed and Lambert-street gates.
 New kitchen to refreshment rooms erected.
 Blacksmith's shop erected.
 Cattle-yards altered.
 Gate-houses at Vale Road, and Russell-street fenced in.
 Signals altered.
 New cesspit constructed.
 New tool-house erected.
 Railway fence bounding Glebe land paled.
At Perth, new semaphore erected.
 Distance signal erected.
At George's Plains, new semaphore erected.
 New hay gauge erected.

At New Bridge, urinals erected.
 Verandah added to Station-master's house.
 New station built.
At Blayney, hay gauge erected.
 Gate to new siding made and fixed.
 New verandah erected.
At Spring Grove, signals erected.
 Hay gauge erected.
 Station-master's house fenced in.
 Lamp erected.
 Alterations to station.
At Spring Hill, alterations to station.
 Semaphore signal erected.
 Two lamps erected.
 Hay gauge erected.
At Orange, hay gauge erected.
 Lamps erected.
 New stock-yards erected.
 Goods office erected.
 Gas lamps erected at entrance to station.
 Additions made to loading stage.
 Station-master's house drained.

The following sidings have been laid in during the year :—

	feet.
Sidings at Seven Hills extended	216
Sidings, Brookdale	1,745
New block siding, Springwood	351
Through road, Springwood	169
Loop siding, Springwood, lengthened	308
Loop siding, Katoomba	800
Loop siding, Blackheath	896
Block siding, Lithgow	479
Block siding, Lockes	213
Coal sidings (2), Bathurst	961
Siding west of engine-shed, Bathurst	204
Siding made into loop, and extended, Bathurst	424
New through road, Bathurst	181
Siding over turntable, Bathurst	42
Loop and block sidings, Wimbledon	1,014
Block siding, New Bridge, lengthened... ..	242
Siding to limekiln, Blayney	644
Block siding, Spring Hill, extended	116
Block siding, Orange	402
Block siding, Orange, extended... ..	534
New cattle siding, Orange	1,182
Total	11,122

Penrith to Springwood	188
Springwood to Mount Victoria	20
Total... ..	5,792

Branch Line, Blacktown to Richmond—Single line—Length, 16 miles 11 chains.

The whole of the permanent-way and works on this branch line are in good repair.

Considerable progress has been made during the year with the work of improving the gradients, strengthening the bridges, &c., &c.

The advantage gained in the haulage by these improvements is very clearly shown in the following statement :—

STATEMENT showing loads drawn by small engines on the Richmond line, before and after the gradients were reduced.

	Previous to gradients being reduced.		After the gradients were reduced.		Increase of load after the gradients were reduced.	
	Loaded.	Empty.	Loaded.	Empty.	Loaded.	Empty.
Blacktown to Riverstone	10	14	16	21	6	7

Mulgrave to Richmond	10	18	25	8	25
Richmond to Mulgrave	10	15	5
Mulgrave to Riverstone	10	11	1
Riverstone to Blacktown	10	12	2

and these advantages will be still further increased when the improvements in the gradients shall have been finished as far as Mulgrave Station, which I estimate will be about April next.

The following works in connection with these improvements have been completed during the year :—

- 106 chains of cuttings, embankments, and road lifted.
- 139 chains of cuttings, embankments, and road lowered.
- 245 chains of road ballasted with stone ballast.
- 4,992 cubic yards of stone ballast put on the line.
- One level crossing shifted and remade.

The following works have been completed during the year :—

- At Mulgrave*, new goods-shed erected.
- New waiting shed erected.
- At Windsor*, kitchen erected.
- Station improved.
- At Clarendon*, passenger platform partially covered in.
- Horse-dock constructed.
- Loading platform erected.

The following sidings have been laid in during the year :—

Siding at Schofield's	feet.	651
Through road to do.		174
Siding at Riverstone extended... ..		74
Siding at Clarendon		402

Blacktown to Richmond	16 11	1 Dec., 1864	13 10	467	139

NOTE.—This statement does not include the relaying of the line from Sydney to Parramatta Junction, laid originally with Barlow rails, and renewed with double-headed rails; nor those portions of the Southern and Western lines which have been relaid with steel rails.

The following shows the number of men per mile of single line, engaged in the maintenance of the permanent-way :—

GREAT SOUTHERN, WESTERN, AND RICHMOND RAILWAYS.

	Men per mile.
Sydney to Parramatta Junction, including Haslem's Creek Cemetery Branch, Darling Harbour Branch, and Sidings, Head of Darling Harbour	1'30
Parramatta Junction to Goulburn, including Collingwood Branch	'77
Goulburn to North Wagga	1'10
Parramatta Junction to Bathurst	'76
Bathurst to Orange	1'00
Richmond Branch	'99

LIST OF MACHINERY IN WORKSHOPS ON 31ST DECEMBER, 1878.

- 1 12-horse power Portable Engine.
- 1 Wood Turning Lathe.
- 1 Wood Planing Machine.
- 1 Morticing and Boring Machine.
- 1 Circular Saw and Bench.
- 1 Cross-cut Saw and Bench.
- 1 Band Saw Machine.
- 1 Tenoning Machine.
- 1 Horizontal Boring Machine.
- 1 Variety Wood Working Machine.

GREAT NORTHERN RAILWAY.

Newcastle to Hexham.

Double line—Length, 10 miles.

Hexham to Quirindi.

Single line—Length, 134 miles 22 chains.

Quirindi to Tamworth.

Single line—Length, 37 miles 23 chains.

This section was opened for public traffic on the 15th October, 1878..

The permanent-way between Newcastle and Murrurundi is in very good order.

Between Murrurundi and Quirindi the road is in good running order. Some parts are rather difficult to maintain after rainy weather, in consequence of the soft nature of the formation.

From Quirindi to Tamworth the greater part of the permanent-way is yet in an unfinished state, but notwithstanding is kept in very good running order.

Station buildings, bridges, and culverts, are in very good state of repair.

The fencing between Newcastle and East Maitland, with the exception of a small portion which is now being renewed, is in good condition.

From East to West Maitland it is getting bad, and arrangements will shortly be made for its renewal.

Between West Maitland and Singleton it is getting rather weak in places.

Beyond Singleton the whole is in very good condition.

The following additional works have been carried out during the year :—

At Newcastle, two sidings 1,890 feet long have been laid in for the accommodation of the coal traffic.

A coloured lamp for guidance of steamers fixed.

Siding for timber loading, lengthened 300 feet.

Weighbridge erected for weighing the Newcastle Coal Company's coal, and siding connected therewith, lengthened 360 feet.

Three sidings, 2,100 feet long, laid in for the accommodation of goods and passenger traffic.

At Honeysuckle Point, a traverser line laid in at end of carriage-shed.

Two waiting-rooms for drivers, &c., built.

Additional boiler fixed in machine-shop.

Gas lamp fixed at Bullock Island Road crossing.

At Bullock Island, offices for wharfinger erected.

Siding, 240 feet long, laid in for supplying coal to hydraulic engine.

At the Waratah Coal Junction, a junction and siding, 1,188 feet long, laid in for the accommodation of the Ferndale Coal Company.

The second line from Wallsend Junction to Hexham Station laid in and completed.

At Hexham, new booking-office, ladies' room, and kitchen to Station-master's house erected.

At Victoria-street, East Maitland, waiting-shed erected.

At East Maitland Goods-yard, sheep wharf lengthened 80 feet.

At Morpeth Junction, station buildings taken down and rebuilt on an enlarged scale.

At Morpeth, sidings in connection with the H.R.N.S.N. Company's yard extended 90 feet.

Goods shed erected.

River wharf constructed near Northumberland-street platform.

At High-street, West Maitland, level crossing widened and improved.

Galvanized iron fence erected round Station-master's house and grounds.

A siding, 180 feet long on Commissioner's land and 378 feet outside fence, laid in for discharging road metal.

At Elgin-street, West Maitland, hay stage enlarged.

Verandah, 12 feet wide, added to front of goods-shed.

An additional siding, 660 feet long, laid in for goods traffic.

Approach road made *via* Devonshire-street, and goods-yard enlarged and improved.

At Wollombi Road, sheep wharf constructed, and siding 996 feet long laid in.

At Lochinvar, ladies' room and booking-office erected.

At Greta, ladies' waiting-room erected.

Complete set of signals fixed.

At Branston, a ladies' waiting-room, and kitchen to Station-master's house, erected. At

At Singleton, refreshment-rooms extended and improved.
 Siding 2,154 feet long laid in.
At Muslebrook, wicket gates fixed at level crossings.
 Culvert under approach road lengthened 20 feet.
At Scone, level crossing constructed.
At Wingen, weatherboard residence for signalman erected.
At Blandford, closet and urinal accommodation provided.
At Murrurundi, sand furnace erected.
 Booking office erected, and parts of existing buildings fitted up as refreshment rooms.
At Temple Court, platform constructed.
 Gatekeeper's house erected.
At Quirindi, six small cottages for station employés erected.
 Guard's room erected.
At McKay (between Willow-tree and Quirindi), platform constructed.
At Tamworth, stable for shunt horses erected.
 Wool stage constructed.
 Guard's room erected.

Line relaid with steel rails during the year :—

						feet.
Between 1 and 5 miles	2,748
Between 16 and 18 miles	402
						3,150
					Total	3,150

ACCOUNT of Permanent-way Rails turned, renewed, and broken, during the year 1878.

W. MASON.

No. 2.

The Locomotive Engineer to The Commissioner for Railways.

Department of Public Works, Railway Branch, Locomotive Engineer's Office,

Sir,

Referring to your minute of the 22nd instant, relative to the report required from me for the Locomotive and Carriage Departments for 1878, which pressure of other work has prevented my preparing in the comprehensive form indicated in the minute paper of July 15/78, I have now the honor to submit the following brief report:—

Although the matter affecting the locomotive and carriage departments requiring my attention and consideration on newly taking charge of these branches of the service could not be otherwise than numerous, yet, owing to my connection with the railway having commenced near the close of the year, viz., 1st September, 1878, my report could not, under any circumstances, embrace from personal knowledge more than a comparatively brief portion of that year.

Many of the principal matters connected with the locomotive branches have already been dealt with by me in the various reports that I have submitted from time to time. Amongst the principal the following may be briefly enumerated:—

1. The inadequate workshop accommodation and plant for maintaining the engines, carriages, and other rolling stock;
2. The absence of adequate running sheds, water supply, and other appliances at the various depôts throughout the lines;
3. The defective condition of the rolling stock;
4. The want of adequate engine power; and
5. The great diversity in type of the engines and other vehicles.

(1.) The workshop question is one which for several years past has been brought prominently forward by my predecessors as a matter of vital importance to the safe and economical working of the railway.

Every year during which this matter has remained in its unsatisfactory condition has increased the evils that result, and added to the difficulties which will be experienced in dealing with the subject when the work of providing new workshops shall be taken in hand, owing to the gradual increase in the meantime of the rolling stock.

The various points bearing on this important question have already been fully dealt with in my report of 24th May last, and I would now again urge the necessity for early action being taken to provide adequate workshops, as essential not only to efficiency and economy, but to safety in the working of the department.

(2.) The need for enlarged engine-sheds and improved water supply and other appliances at the various depôts throughout the lines, is only of secondary importance to that of the main workshops in its bearing on the efficient and economical working of the department, and is one which has been already dealt with in my report of May last.

(3.) The maintenance of the rolling stock during the year 1878, so far as my limited acquaintance with the department for that period warrants an expression of opinion—based in great measure on the reports appended—appears to have been conducted with care and economy, as far as the inadequate appliances available for the purpose would permit; but the actual condition of the stock and plant generally, including specially engines and vehicles, has been, in my opinion, far from satisfactory for a considerable time past.

Considering the inadequate workshops and appliances with which the locomotive and carriage departments have been conducted for years past, a better state of things could not reasonably be expected.

As regards the locomotives—to which I have specially directed my attention, as being the source from which the more serious consequences of too long-continued a postponement of adequate repairs might be anticipated—my minute of July, 17/79, showed that there were then no less than thirty-five engines on the Southern and Western Lines alone waiting to come in for thorough examination and repair (besides those actually in the workshops and others waiting minor repairs), but which could not be taken in hand, owing to the want of shop-room and plant.

To recover lost ground a largely-increased expenditure on repairs and renewals in the future must result, and as suitable workshops to enable these renewals and repairs to be coped with cannot at best be

got

got into operation for a considerable time—while, in the meantime, the quantity of rolling stock to be maintained is growing at a greater ratio than the means available for dealing with it, during which time its condition must deteriorate rather than improve—the process of recovery to a state of efficiency when taken in hand will necessarily be felt for some years to come.

(4.) The want of adequate engine power, under which the department has long suffered, has contributed largely to the present backward state of repairs by frequently compelling engines requiring to come into the shops to be continued at work for too long a period, resulting in undue wear and tear, besides causing other well-known inconveniences in working, by which the measures necessary to secure proper care in the running of the engines are rendered impossible.

In the course of 1878 six passenger and twelve goods engines were added to the stock, and since then seven passenger, eleven goods, and three light tank-engines for the Richmond line have been delivered, in addition to the two goods engines ordered to replace those destroyed last year in the accident at Emu Plains, while the various orders now in hand will go still further to meet the difficulty in which the department is placed by inadequate engine power.

As regards other rolling stock, large contracts, extending over five years, have been entered into with Messrs. Hudson Brothers, Messrs. Moyes and Donald, and Mr. Ritchie, to meet the deficiency in carriages and waggons.

It must, however, be borne in mind that addition to the rolling stock in the absence of proper means for accommodating and repairing them is not an unmixed advantage, for, while it enables defective engines and vehicles to be stopped, pending the opportunity for repairing them, it adds proportionately to the already overcrowded state of the workshops and sheds.

(5.) The great variety in the types of the engines and carriages invites attention, as tending largely to increase the difficulties as well as the cost of maintenance.

Out of a total of 180 engines there are no less than twenty-three different patterns, and the carriages are almost equally diversified, while four or five types of engines, and probably as many types of carriages, ought to be sufficient to meet all requirements of the traffic.

To secure proper efficiency and economy in the working of the Railway every effort should be directed, not only to keep down but to reduce the number of types at the earliest possible date.

As a further means of promoting the efficiency of the Service, I would recommend as worthy of consideration the advisability of providing house accommodation for the drivers and firemen, and other workmen employed at the outlying stations, where houses are not otherwise available.

I attach reports to the 31st December, 1878, which I have received from the locomotive overseers, together with a list of pumping engines, machinery, and plant added during the year.

I have, &c.,

ROBT. H. BURNETT,

Locomotive Engineer.

GREAT SOUTHERN, WESTERN, AND RICHMOND RAILWAY.

Report from the Locomotive Overseer to the Locomotive Engineer on the condition of the Rolling Stock, Machinery, and Pumping Engines, to 31st December, 1878.

LOCOMOTIVE ENGINES AND TENDERS.

No. 2. Nearly worn out, but is still serviceable for shunting, for which purpose it is constantly in use in Sydney yard.

No. 5. In working condition, but requires to come in for the turning up of wheels, and other repairs of a general character. The boiler is in good condition.

No. 6. In working order, but not in use, being unsuitable for general use; the tender is running with No. 2 engine.

No. 7. In working condition, and employed running Darling Harbour coal trains.

No. 8. In fair working order. Used for shunting purposes at Goulburn. The tank has been repaired and the boiler is in a perfectly safe condition, the pressure being reduced to 90 lbs. to the inch.

No. 9. Out of repair and recommended to be broken up.

No. 10. In fair condition generally.

No. 11. In working order, but is still unemployed, being unsuited for ordinary traffic. Cylinders are nearly worn out.

No. 12. In fair working condition. Employed as emergency engine at Bathurst, but seldom used.

No. 13. In good working order; used as a ballast engine. The boiler is in sound condition.

No. 14. In working order but requires to come in for the turning up of wheels and a general repair. The boiler and cylinders are defective, as explained in my report on the condition of rolling stock, on 31st August last, but are yet quite safe for running.

No. 15. Still running, but is at once to be taken in for a thorough repair, including the taking of the boiler out of the frames and renewing those portions that are defective. The imported duplicate cylinders put in early in 1878 have to be replaced with new ones, as one of them has a crack in it extending the whole of its length.

No. 16. In fair running order, but the boiler and cylinders are defective as stated in last report. The duplicate boiler for the 14 to 16 class of engines not having been indented for as recommended by me in September last, these engines will be delayed a long time in the shop while the necessary renewals are being effected to the boilers.

No. 17. Undergoing a general repair. The boiler is in a satisfactory state.

No. 18. In good order but the tires on engine wheels are wearing thin.

No. 19. In fair general condition, except that a flaw in the corner of copper fire-box will shortly have to be attended to.

No. 20. In fair general condition. The boiler is now in a sound state, having recently had the defective corners cut out of copper fire-box, and corner plates screwed on in the usual way, also a patch put on the fire-door ring.

No. 21. In good condition, having just left the shop after a general repair.

No. 22. In fair general condition. The leading wheel tires of tender are, however, wearing thin. The boilers of the above six goods engines, Nos. 17 to 22, are all in sound condition, except that of No. 19. While No. 21 was last in the shop for repairs seven additional copper screw stays were put in the tube-plates below the tubes in consequence of the bulging of the plate. Three duplicate boilers were imported for this class (available also for 44 to 47 class). One of these was put into No. 17 and one into No. 47, and one remains yet in the store. The old boiler belonging to the above class (from No. 18) has not yet been taken in hand for repairs. The cylinders and faces of steam ports of the above engines are generally much worn.

No. 23. In good running order, and the boiler, though patched in the corners of the copper fire-box, is in a sound state.

No. 24. In first class order, having just left the shop after undergoing a thorough repair,—the defective boiler having been replaced with that taken from No. 35 engine, which had in the meantime been renewed in the copper fire-box.

No. 25. In fair general condition, but is chiefly used for shunting, pending an opportunity of changing the wheels, two of the tires being loose.

No.

No. 26. In good running condition. Underwent a general repair in October last, but the copper fire-box is not in a satisfactory state, although kept tight and quite safe as previously reported.

No. 27. In fair general condition, but will soon require to come in for turning up wheels and a general repair.

No. 28. Undergoing a general repair. It is being found necessary also, in consequence of flaws in the corners of copper fire-hole plate, to cut away the same and screw on angle patches as usual in such cases. This fire-box was renewed in September, 1876; it was therefore unusually early for it to become defective. After the repairs to No. 28 the boilers of the above engines, 23 to 28, will be in fairly satisfactory condition—except No. 26, which will have its boiler changed at an early date. The cylinders of the above engines are generally much worn, and several are cracked and secured with bolts.

No. 29. Will require to come in early for a general repair.

No. 30. In fair running order, but the barrel of boiler and fire-box are defective, as explained in last report, but are still quite safe for use.

No. 31. In first rate order, having just left the shop after a thorough repair, when the new boiler (stated in last report as being made for No. 30) was put in, it being found necessary to remove the defective boiler from the frames. The latter boiler has not yet been taken in hand to see whether it is capable of being repaired for No. 30 engine, but it will be done as early as practicable.

No. 32. In good general condition.

No. 33. In fair working order, but will soon require to come in for a general repair.

No. 34. In running order, but will be taken in at once for a thorough repair, when the old duplicate boiler from No. 32 will be put in after being renewed as required.

No. 35. In fair working order, but will soon have to come in for a general repair.

The boilers of the foregoing four bogie engines Nos. 32 to 35 are all in good condition except that in No. 34.

There are three spare old duplicate boilers belonging to this class along with 23 to 28 class, two of which (those from Nos. 24 and 25 engines) are being fitted with entirely new copper and iron fire-boxes.

No. 36. In good running order.

No. 37. In fair general condition.

No. 38. In safe working order, but is employed at Wagga principally shunting, pending an opportunity for taking it in, turning up of wheels and a general repair.

No. 39. In good general condition.

The boilers of the foregoing engines for mixed traffic Nos. 36 to 39 class have given general satisfaction, no defects of a serious nature having exhibited themselves.

No. 40. In working order, but used principally for shunting, pending its being taken in for new boiler as per previous report.

No. 41. In safe working order, but will soon require a general repair and new boiler.

No. 42. In fair working order but the boiler is defective.

No. 43. In good working order having recently received a general repair, but the boiler is defective, similar to those of the three preceding engines of the same class as reported previously. The new duplicate boilers for these engines are now coming to hand, and No. 40, which has the worst boiler, will be taken in at once.

No. 44. About to leave the shop after a thorough repair, when it was fitted with the old boiler removed from No. 47, which had been renewed in the fire-box and fitted with crown stays, as explained in last report.

No. 45. In running order but will soon have to come in for a general repair. Boiler is defective.

No. 46. In good running order, except the inefficiency arising from the defectiveness of boiler.

No. 47. In good condition having recently been under a general repair.

In my last report the defect in the construction of the fire-boxes of the above class of goods engines Nos. 44 to 47 was duly explained. Nos. 45 and 46 are still running with the original defectiveness in the stays of fire-box. The old boiler, however, from No. 44 is being altered for one of these engines.

No. 48. In the shop for changing wheels (in consequence of breaking of crank axle), and is also receiving a general repair.

No. 49. In fair running order, but will require shortly to come in for turning up of wheels and a general repair.

No.

No. 50. In good condition. Received a general repair in November last.

No. 51. In fair general condition.

No. 52. Destroyed at Emu Plains accident. The old boiler has not yet been taken in hand for repairs, having other work more pressing.

No. 53. In fair general condition. Left the shop in November after a general repair. There is, however, a slight flaw in the crank axle, but not such as to be dangerous to run at present; but the engine will be taken in early to have a strap fitted to flawed axle.

No. 54. In fair running order, but will soon have to be taken in for a general repair.

No. 55. Just stopped from running; about to be taken in for a general repair.

No. 56. In good condition, having left the shop in November after a general repair.

No. 57. Just taken in for a general repair.

No. 58. Will shortly require to be taken in for a general repair. A flaw was discovered in the crank axle in October, when a strap was put on to prevent the extension of same.

No. 59. In fair condition.

The foregoing twelve goods engines, 48 to 59 class, are all in good condition with respect to the boilers—no flaws or defects of great importance have as yet manifested themselves. Only one improved cast-iron draw frame has been fitted as yet in the above engines, as the original draw frames have answered better since being strengthened by the addition of angle pieces.

No. 60. In running order, but requires to come in for a general repair.

No. 61. Undergoing a general repair.

No. 62. Undergoing a general repair.

No. 63. In good condition—received a general repair in October last.

No. 64. In good condition.

No. 65. In good condition. Received a general repair in September last.

The foregoing six 5-ft. wheel passenger engines, 60 to 65 class, have given general satisfaction as regards the boilers; no serious defects having yet shown themselves.

No more engines have been fitted with improved cast-iron draw frames, as the original draw frames have answered better since being strengthened by the addition of angle pieces, and of course the frames will not be removed while they continue to give satisfaction.

No. 66. Requires to be taken in for sundry minor repairs, otherwise in good condition; the boiler being in good order.

No. 67. In working order, but will soon have to come in for a general repair.

No. 68. In working order, but will soon require to come in for a general repair.

No. 69. In safe working condition, but will be taken in as early as possible for a general repair. A piece is broken out of the exhaust port, causing a slight "blow" through, but not sufficient to call for the taking out of the cylinders at present.

No. 70. In safe working order, but will be taken in the first opportunity for a general repair. This engine is running with a piece broken out of the steam port, an additional piece of metal having to be cast on the valve in order to cover the port.

No. 71. In fair general condition.

No. 72. In fair general condition.

No. 73. In working condition, but will soon require to come in for turning up of wheels, &c.

No. 74. In fair general condition. None of the above 8 suburban tank engines Nos. 67 to 74 class, have been in the shop for general repair more than once, but the most of them will shortly have to come in for that purpose. The boilers of these engines have given general satisfaction. The cylinder castings have not been so satisfactory, especially in Nos. 69 and 70 (supplied by Mort and Co.), which have defective steam ports, and the faces of steam chests are honeycombed.

No. 75. In fair running order, but will soon require to come in for turning up wheels and other repairs. When engines 75 to 78 were built at the Railway Works to replace worn out engines 1 to 4, the old tender, frames and wheels of 1 to 4 were utilized, and new tanks made for them. The old tender having the best tanks (No. 1) was, however, run with No. 75, previous to the renewal of tank. The tender formerly belonging to destroyed 103 engine has now been temporarily attached to 75, to allow of the tender of 75 being fitted with the new tanks.

No.

No. 76. In good running order, but will shortly require wheels turned up and other repairs.

No. 77. In good general condition.

No. 78. In fair general condition. The above four engines, Nos. 75 to 78, for mixed traffic, have given general satisfaction.

No. 79. In good running order, having just left the shop after a general repair. No extra trouble has been caused through leaky copper stays since last report.

No. 80. In safe running order, but requires to come in for turning up wheels and a general repair. The bulging of copper plates in fire-box has not become worse, and the boiler is in a tight and safe condition.

No. 81. In fair working condition. Since the repairing of the stays in fire-box the boiler has been maintained in a tight and safe state.

No. 82. In good condition, having undergone a general repair in November last.

No. 83. In fair general condition, but the wheels require turning up.

No. 84. In working order, but must soon be taken in for turning up wheels, and a general repair.

No. 85. In good order, having just left the shop after a general repair.

No. 86. In good order, having received a general repair in September last.

No. 87. In running order, but the wheels will soon have to be turned up.

No. 88. In good general condition.

No. 89. In the shop for turning up of wheels and sundry repairs.

No. 90. In fair general condition, but the wheels require turning up.

No. 91. In good general condition.

No. 92. In good general condition.

The tubes and stays in the fire-boxes of the foregoing fourteen bogie engines, Nos. 79 to 92, have not, since last report, required much more than ordinary attention to keep them tight.

Nos. 93 and 94. In fair general condition, but the wheels require turning up.

No. 95. In fair general condition, but wheels will soon require turning up.

No. 96. In good condition. A second flaw was discovered in the crank axle in October last, when it was taken out and condemned. The opportunity was taken at that time for giving the engine a general repair.

No. 97. In fair general condition, but the wheels require turning up.

No. 98. In fair condition, but will soon have to come in for turning up of wheels and other repairs. The flaw in axle has not extended since last report.

No. 99. In good order. Received a general repair in September last.

No. 100. In fair general condition, but the wheels will soon require to be turned up.

No. 101. In good condition, having just left the shop after a general repair.

No. 102. In fair general condition, but will soon require wheels turned up and other repairs.

No. 103. Destroyed. The repairs to old boiler have not yet been commenced, but the tender is completed, and has been attached temporarily to No. 75.

No. 104. In good order. Received a general repair in October last.

The tubes and stays in the fire-boxes of the foregoing twelve goods engines, Nos. 93 to 104, have required a little more than ordinary attention in keeping them tight, but no very serious defects have exhibited themselves.

No. 105. Will shortly be taken in for turning up wheels and other repairs. This American engine has so far given satisfaction in the way it has run, and the boiler has caused no trouble, but this engine has not been employed beyond Picton or Penrith, not being provided with efficient brake power.

Nos. 106 and 107. In good condition.

No. 108. In working condition, but will have early to come in for turning up of wheels and sundry repairs, including the re-ferruling or caulking of some of the tubes in fire-box.

No. 109. In good condition.

Nos. 110 and 111. In fair running order, but will soon have to come in for turning up wheels and sundry repairs.

No. 112. In good condition.

No. 113. In good condition.

Nos. 114, 115, 116, and 117. In good condition.

The foregoing twelve goods engines, Nos. 106 to 117, have given general satisfaction.

No. 118. In good condition.

No. 119. In good condition, except that there is a leak in the outer shell of fire-box, between it and the engine frames, which probably will require the boiler taken out of the frames in order to stop it.

No. 120. In good condition, except that it is leaky—in the same manner as No. 119 engine.

Nos. 121, 122, and 123. In good condition.

With the exception of Nos. 119 and 120, these six engines have given satisfaction.

From the foregoing statement it will be seen that there are over thirty engines requiring more or less urgently to come in for turning up wheels and other repairs—in some cases of a very extensive character. The engines during the past year have been maintained in a safe condition, and as efficient as possible, under the circumstances of the limited number available and the extreme deficiency of workshop accommodation for repairing them. With the increase of work, consequent on the extension of lines and the additional traffic and rolling stock, the question of further workshop accommodation is assuming serious proportions, and will not longer admit of delay; otherwise, I fear considerable interference with the traffic will be the result. I therefore strongly recommend that the proposed new workshops, embodying all modern appliances, be at once provided. I understand that money was voted last year for the erection of workshops at Penrith, Bathurst, and Goulburn. If these were provided it would afford considerable relief in the matter of carrying on the work at Sydney, as at present there are urgent orders arriving every morning from the South and West Lines for work that must be forwarded the same night, in order to keep engines from being laid up waiting for the same. Such work could, in the majority of cases, be far more economically performed in the districts where required than at Sydney, provided the necessary accommodation were furnished.

CARRIAGES, BRAKE VANS, WAGGONS, ETC.

Sleeping Carriages—(1 in number).

No. 1. Requires painting and slight repairs. Was recently supplied with new duplicate bogies and wheels.

First Class Carriages—(32 in number).

^{Nos.}

- 1, 2. Will shortly require repairs and painting.
- 3, 4. In good condition.
- 5, 6. In good condition.
- 7, 8. In fair condition.
9. Requires repairs and painting.
10. In good condition.
11. In good condition; just retrimmed.
12. Requires retrimming.
13. In fair condition.
- 14, 15. In good condition.
- 16, 17. In good condition.
18. Requires repairs and painting.
19. In first-class order, having just been repaired and painted.
20. Requires painting and retrimming.
21. Requires painting.
- 22, 23. Require painting and slight repairs.
24. In fair condition, but painting somewhat shabby.
25. Requires varnishing and retrimming.
26. Will soon require repairs and painting.
27. Will soon require repairs and painting.
28. Requires painting outside and inside renovated; wheels are much worn.
29. Will soon require painting.
30. In fair condition.
- 31, 32. In good condition.

Composite Carriages—(35 in number).

^{Nos.}

1. Requires repairs and painting.
2. Will soon require repairs and painting.
3. In first-rate order, having just been repaired and painted.
- 4, 5. In good condition.

12. In fair condition.
13. Will shortly require repairs and painting.
14. In fair condition.
- 15, 16, 17, 18, 19, 20. In good condition.
21. Requires retrimming.
22. Requires slight repairs and revarnishing.
23. In fair condition.
- 24, 25. In good condition.
26. In shop, being repaired and painted.
- 27, 28. Will soon require repairs and painting.
- 29, 30. do. painting.
- 31, 32, 33, 34, 35. In good condition.

Composite Smoking Carriages—(6 in number).

Nos.

1. In good condition.
2. About to be taken in for painting.
3. In fair condition.
- 4, 5. In good condition.
6. In fair condition.

Composite Break Vans—(20 in number).

Nos.

- 1, 2. In good condition.
3. Requires repairs and painting.
4. Requires painting.
5. In good condition.
6. Will soon require repairs and painting.
- 7, 8. In good order.
- 9, 10. Require repairs and painting.
11. Recently repaired and painted.
- 12, 13, 14, 15. In good order.
16. In fair order.
17. Requires repairs and painting.
18. In fair condition.
19. In shop, being repaired and painted.
20. Requires repairs and painting.

Second Class Carriages—(68 in number).

Nos.

1. Requires repairs and painting.
2. Vacant number, transferred to G. N. R.
3. Do. do. to mail vans.
- 4, 5.
6. Requires slight repairs and painting.
7. Vacant number, converted to 1st class.
8. Do. do. mail van.
9. Do. do. 1st class.
- 10, 11, 12, 13. In fair condition.
14. Requires repairs and painting.
15. Undergoing repairs and painting.
16. In good condition.
17. In fair condition.
18. Just repaired and painted.
- 19, 20. In fair condition.
21. Just repaired and painted.

Second Class Carriages—(68 in number)—contd.

- Nos.
 22. In fair order.

A. Low-sided Waggon (72 in number)—

3 of these are now undergoing repairs—several require more or less extensive renewals, but the great majority are in good condition.

B. High-sided Waggon (105 in number)—

5 of these are undergoing repairs. Several others require repairs, but the most of them are in good order.

C. Covered Goods Vans (98 in number)—

2 of these are under repairs. A few others will shortly require repairs and painting, but they are generally in good condition.

D. Medium-sided Waggon (1,834 in number)—

20 of these are in the shop for repairs. A number of others will soon have to be taken in, but the great majority is in good order.

E. Timber Waggon (162 in number)—

5 of these are undergoing repairs. With a few exceptions the others are all in good order.

Powder Vans (6 in number)—

These are in good general condition, except one undergoing repairs.

Sheep Vans (114 in number)—

4 are undergoing repairs, and several others will shortly require to come in the shop, but the great majority is in good order.

Cattle Vans (131 in number)—

4 are undergoing repairs, but with a few exceptions the others are in good order.

Composite Cattle and Goods Van (1 in number)—

New vehicle, not yet tried.

Meat Vans (10 in number)—

1 is undergoing repairs, and 1 requires renewing; the others are all in fair or good condition.

Ballast Waggon (42 in number)—

Several require repairs of a more or less extensive nature, but they are generally in good order.

The passenger and goods stock have been maintained in a thoroughly safe and efficient state, especially with regard to those portions, the good condition of which is essential to safety, such as wheels, springs, break and draw-gear, &c. Repairs to bodies of carriages, however, such as painting, trimming, &c., have not in all cases been carried out as early as desirable, partly in consequence of the deficiency of vehicles; but latterly this evil has not been quite so much felt, owing to the receipt of new stock. The want of workshop accommodation, however, as previously reported, is still felt to be a great bar to economy and thorough efficiency in carrying on the work in question. The deficiency of accommodation and appliances is experienced equally in all branches of the carriage and waggon department, excepting perhaps the smith's shop; but special mention might perhaps be made of the painting. In addition to the

the

the unsuitability of the existing paintshop (as explained in last report), I may state that in very many cases a coat of varnish applied to a carriage beginning to appear shabby has such a reviving effect as to make the painting appear like new work. But owing to the want of room in the shop such cannot be done, and the vehicles have to run until the painting becomes so bad that it has all to be burned off to the bare wood, thus involving a large unnecessary expense for painting. The whole of the goods and passenger stock have always been maintained by the entire or partial renewal of same as found necessary.

During the past year the undermentioned vehicles have been entirely rebuilt, viz. :—

Heavy break-van, No. 40.

C van, No. 29.

D waggons, Nos. 137, 641, 592, 419, 154, 594, 638, 1111, 1491, 1492, 1493.

Meat-van, No. 5.

There are, however, still a number of D waggons laid up awaiting an opportunity for rebuilding them.

MACHINERY IN WORKSHOPS.

94	Tube-cleaning machine	do.
	Shafting, pulley, &c., for foregoing	do.
<i>Pattern Shop.</i>		
52	14-in. Pattern-makers' lathe	In good order.
53	Small wood-turning do.	do.
54	Wardell saw bench	do.
<i>Blacksmith Shop.</i>		
64	Fire bending machine, with furnace	In good order.
65	Fire stretching do. do.	do.
66	Iron crane for wheels	do.
67	Do. do.	do.
68	45-cwt. steam hammer and furnace	do.
69	3-ton crane for do.	do.
70	Vertical boiler with donkey engines for do.	do.
71	15-cwt. steam hammer	In working order, but the cylinders will soon require re-lining, when new piston, &c., will also be required.
72	20 cwt. crane for foregoing	In good order.
73	5 cwt. steam hammer	do.
74	Blast fan	do.
75	20 cwt. crane for tires	do.
<i>Carriage Shop.</i>		
97	14 horse-power portable engine and boiler	In good order.
98	Vertical saw for brake blocks	do.
99	Band saw	do.
100	General joiner	do.
101	Vertical drilling machine	do.
102	Screwing machine	do.
103	Grindstone and trough	do.
104	5½ scroll saw	do.
105	3½ morticing and boring machine	do.
	Shafting, pulleys, &c., for foregoing	do.
<i>General at Sydney.</i>		
76	Locomotive engine weighing machine	In good order.
77	Travelling crane	do.
78	Do.	do.
79	Oil tester	do.
80	Small turntable	do.
81	Do.	do.
82	Do.	do.
83	Do.	do.
84	Do.	do.
85	Traverser	do.
86	Do.	do.
87	Crab winch for lifting engines	do.
88	Do. do.	do.
89	Do. do.	do.
90	Do. do.	do.
91	5 ton jib crane	do.
92	Hand fire-engine	do.
95	10 ton jib crane	do.
<i>Penrith.</i>		
106	4 horse-power vertical engine and boiler	In good order.
107	10-in. screw cutting lathe	do.
108	5-in. do.	do.
109	10-in. shaping machine	In fair order.
110	Drilling machine	In good order.
111	Screwing do.	do.
112	Portable punching and shearing machine	do.
	Shafting, pulleys, &c., for foregoing	do.

APPENDIX TO REPORT ON RAILWAYS—1878.

35

No.	Description.	Remarks.
<i>Bathurst.</i>		
116	Large vertical drilling machine ...	Not yet erected.
117	Small do. do. ...	In good order.
118	10-in. screw cutting lathe ...	} Not yet erected.
119	Small shaping machine ...	
<i>Goulburn.</i>		
113	2 horse-power vertical engine and boiler ...	In good order.
114	10-in. screw cutting lathe ...	do.
115	Small drilling machine ...	do.

ENGINES AND PUMPS FOR SUPPLYING WATER.

No.	Place.	Description.	Remarks.
1	Sydney ...	6 horse-power engine and two pairs 7" pumps with two tubular boilers.	In good order.
2	Duck River ...	3½" hand-pump ...	do.
3	Liverpool ...	4 horse-power engine and boiler, and pair 5½" pumps.	In fair condition. New foot-valve required.
4	Do. ...	Windmill pump ...	Out of repair. The hole in frame in which the centre shaft works is worn, and allows the sweeps to catch the frame. Not worth repairing.
5	Menangle ...	6 horse-power engine and boiler and pair of 7" pumps.	In good order.
6	Bargo ...	4 horse-power engine and two boilers and 7" double acting pump.	do.
7	Wingecarribee ...	4 horse-power Garrett and Marshall's pumping engine.	do.
8	Barber's Creek ...	4 horse-power engine and boiler and 4" double acting pump.	do. except that chimney requires renewing.
9	Goulburn ...	Tank, supplied by gravitation ...	In good order.
10	Mulwarree Ponds ...	Tangye Bros. steam pump ...	} do.
11	Do. ...	do. do. ...	
12	Do. ...	Vertical boiler for above ...	
13	Fish River ...	4 horse-power Garrett and Marshall's pumping engine and vertical boiler.	do.
14	Yass ...	Tangye Bros. steam pump ...	} do.
15	Do. ...	do. do. ...	
16	Rocky Ponds ...	do. do. ...	
17	Illalong Creek ...	Pair of 4" hand pumps ...	do.
18	Cootamundra ...	4 horse-power vertical engine and boiler, and pair of 5" pumps.	do.
18½	Bethungra ...	Tangye Bros. steam pump ...	do.
18¾	Wallacetown ...	2½" double acting force pump ...	do.
19	North Wagga ...	Tangye Bros. steam pump ...	do.
20	Penrith ...	6 horse-power portable engine and boiler, and two pairs 3½" pumps.	Working barrels in bad order.
20½	Do. ...	Tangye Bros. steam pump ...	In course of erection.
21	Wascoes ...	Tank supplied by gravitation ...	In good order.
22	Blue Mountain ...	4 horse-power Garrett and Marshall's pumping engine.	} Coupled and worked together.
23	Do. ...	do. do. ...	
24	Blackheath ...	4 horse-power engine and boiler, and 4-in. double acting pump.	In good order.
25	Mount Victoria ...	Pair 3-in. hand pumps ...	do.
26	Lithgow ...	Tank supplied by gravitation ...	do.
27	Rydal ...	2 horse-power engine and vertical boiler, and pair 3-in. pumps.	do.
28	Tarana ...	4 horse-power engine and boiler, and 4-in. double acting pump.	do.
29	Bathurst ...	3 horse-power vertical engine and boiler, and Tangye Bros. deep well pump.	Not yet in use.
30	Do. ...	Tangye Bros'. 5-in. steam pump ...	In good order.
31	Do. ...	do. 4-in. do. ...	do.
32	Macquarie River ...	3½-in. hand pump ...	do.
33	Reedy Creek ...	Tangye Bros'. 5-in. steam pump ...	do.
33	Blayne ...	Tangye Bros'. 5-in. steam pump ...	do.

ENGINES, &c.— <i>continued.</i>			
No.	Place.	Description.	Remarks.
34	Blayney	Tangye Bros'. 4-in. steam pump	In good order.
35	Orange	4 horse-power portable engine and boiler, and 6-in. single lift pump.	do.
36	Mulgrave	2 horse-power engine, vertical boiler, and pair 3½-in. pumps.	do.
37	Richmond	2 horse-power engine and boiler, and pair 3-in. pumps.	do.
<i>Pumping Machinery added to stock during the year 1878.</i>			
18½	Bethungra... ..	Tangye Bros'. steam pump.	
18¾	Wallacetown	2½-in. double acting force pump	Purchased of A. & R. Amos.
19	North Wagga	Tangye Bros'. steam pump.	
20½	Penrith	do. do.	Required in addition to previously existing appliances.
29	Bathurst	3 horse-power vertical engine and boiler, and Tangye Bros'. deep well pump.	Not yet erected.
31	Do.	Tangye Bros'. steam pump... .. .	This will not be required after completion of erection of No. 29.
34	Blayney	do. do.	do.

The existing pumping machinery has been maintained in efficient repair.

Additional appliances are, however, urgently required, viz., new watering stations established at Mittagong and Weatherboard, an additional tank at Yass, and a pumping engine at Goulburn, reports and recommendations on each case having been duly forwarded. Two watering stations are also required in connection with the two additional locomotive depôts about to be established at Murrumburrah and in the Bowenfels District respectively.

There are also questions relating to a supply of water for Picton, the deficiency of pumping power at Bargo, Blue Mountains, and Blackheath, shifting pump at Rydal, additional reservoirs at Tarana and Springdale, and the re-arrangement of pumps at Bathurst and Blayney, the whole of which, with more or less urgency, claim attention.

The early part of the year 1878 being very dry considerable difficulty was caused, and extraordinary means had to be resorted to to ensure a sufficient supply of water for working the traffic on the Western Line, and additional steam pumps were erected at Blayney and Bathurst. One of the steam pumps, however, at Bathurst, will be removed when the deep well pump there has been erected. It was also found necessary to erect additional tanks at Barber's Creek and Penrith, and at the latter place an additional steam pump is being erected. The hand pump and tanks formerly belonging to Messrs. A. & R. Amos, at Wallacetown, were purchased as it is necessary for some of the engines to take water between Bethungra and Wagga. The Tangye Bros'. steam pump temporarily erected at Reedy Creek was returned into store in June last, the hand-pump there being found sufficient for the requirements.

An additional jib crane is being fixed to the water-tank at Wascoe's, one crane being found to be insufficient.

W. SCOTT,

2/4/79.

GREAT NORTHERN RAILWAY.

Report from the Locomotive Overseer to the Locomotive Engineer on the condition of the Rolling Stock, Machinery, and Pumping Engines, to 31 December, 1878.

LOCOMOTIVE ENGINES AND TENDERS.

Nos. 1 & 2 Engines and Tenders.—Are in fair working order.

No. 3 Engine and Tender.—Is laid up for a general repair to engine and new boiler.

No. 4 Engine and Tender.—Is in fair working order with the exception of its wheels. The tires are thin and will not stand turning up again.

No. 5 Engine and Tender.—Is in fair working order with the exception of the boiler. A new boiler was ordered for this engine 20 July, 1878.

No. 6

No. 6 Tank Engine.—Is in first-class working order.

No. 7 Tank Engine.—Was laid up 4/11/78 for thorough repairs to engine, also examination of boiler. The boiler has been examined and found to be in a very bad state of grooving and corrosion.

From the monthly report for November it will be seen that I ordered a new boiler for this engine in July, 1878.

No. 8 Engine and Tender.—Laid up 17/12/78 for thorough repairs to engine and new boiler.

No. 9 Tank Engine.—Requires laying up for a pair of new cylinders as early as practicable. A new pair ready in the shop to put in.

No. 10 Engine and Tender.—Laid up 3/9/78 for thorough repairs to engine and examination of boiler. This engine and boiler was finished on 14/12/78.

Nos. 11 & 12 Engines and Tenders.—Are in fair working order.

No. 13 Engine and Tender.—Is in fair working order with the exception of tires; they are thin and will not stand turning up again.

No. 14 Engine and Tender.—Requires laying up for thorough repairs to engine and tender. The old boiler taken out of frame of No. 16 is being thoroughly repaired, and will be used for No. 14 as early as practicable.

No. 15 Engine and Tender.—Requires laying up for thorough repairs to engine and tender, and boiler, as early as practicable.

No. 16 Engine and Tender.—Was laid up for thorough repairs, on the 3/9/78, to engine and tender. The new boiler ordered for No. 14 was used for this engine. Finished and commenced to run on the 14/11/78.

No. 17 Engine and Tender.—Requires laying up for thorough repairs as early as practicable.

No. 18 Engine and Tender.—Was laid up 18/11/78 for thorough repairs to engine and boiler. (See Monthly Report for November, 1878, for repairs effected.)

No. 19 Engine and Tender.—Requires laying up for thorough repairs.

No. 20 Tank Engine.—This engine was laid up for thorough repairs to engine and boiler in October, 1878. Finished, and commenced to run 31/12/78. Is now in good working order.

No. 21 Engine and Tender.—Is in good working order, with the exception of the tires; they are very thin and will not stand turning up again.

No. 22 Engine and Tender.—Is in first-class working order, with the exception of the slide valves; and tires require turning up.

No. 23 Engine and Tender.—Was laid up in August, 1878, for thorough repairs. Finished, and commenced to run October, 1878; and is now in first-class working order.

No. 24 Engine and Tender.—Requires laying up for thorough repairs to engine and examination of boiler. This engine was used for ballasting the extension between Quirindi and Tamworth from June 30, 1878, to September 10, 1878.

No. 25 Engine and Tender.—Is in first-class working order.

No. 26 Engine and Tender.—Is in first-class working order. The cylinders of engines Nos. 23, 24, 25, and 26, where they are jointed together, are all leaking; they require taking apart and the joints planed and scraped as early as practicable. These joints never were a good job.

Nos. 27 and 30 Engines and Tenders.—Are in good working order. New slide valves were put into these two engines December, 1878.

Nos. 28 and 29 Engines and Tenders.—Are in good working order, with the exception of the slide valves; they require new ones as early as practicable.

Nos. 31, 32, 33, 34, 35, and 36 Engines and Tenders.—Are all in fair working order.

CARRIAGES, BRAKE VANS, WAGONS, &c.

First class Carriages.

Nos. 1 to 7, 10, 12 to 16 are all in good working order. Nos. 8 and 9 are now undergoing thorough repairs, painting, and trimming. No. 11 requires laying up for thorough repairs, painting, and trimming.

Composite Carriages.

Nos. 1 to 8 are all in good working order.

Second

Second class Carriages.

Nos. 1 to 4, 6 to 9, 12 to 22, 27, 28 to 30, 32 to 34, 36 to 40, 42 to 48, are all in good working order. No. 5 is now undergoing renewal to body. No. 10 requires the body to be renewed as early as practicable, it has been in use about twenty-two years. Nos. 11, 31, 35, and 41 require laying up for thorough repairs and painting. Nos. 23 to 26 and 29 are all in good working order, but require to be fitted up with Venetian blinds to side lights as early as practicable.

Post Office Vans.

Nos. 1 to 4 are all in good working order.

Horse-boxes.

Nos. 1 to 5, 7, 8, 10 to 19, are all in good working order. No. 6 is now undergoing thorough repairs and painting. No. 9 requires laying up for repairs and painting.

Carriage Trucks.

Nos. 1 to 5, 7 to 12 are all in good working order. No. 6 requires laying up for thorough repairs and painting.

Brake Vans.

Nos. 1 to 7, 9 to 16, 19 to 34, are all in good working order. No. 17 is now undergoing thorough repairs and painting. Nos. 8 and 18 are laid up for thorough repairs and painting. No. 8 has been in use eleven years. No. 18 about eight years.

A Trucks.

Nos. 1 to 12, 14 to 16, 19, 21 to 40, are all in fair working order. Nos. 18 and 20 laid up for ordinary repairs. Nos. 13 and 17 require laying up for renewals as early as practicable, they have been in use about twenty-two years.

B Waggon.

Nos. 1 to 6, 8 to 16, 18 to 24, 26 to 39, are all in good working order. Nos. 7, 17, 25, and 40 are laid up for thorough repairs and painting.

C Vans.

Nos. 1, 2, 4, 6, 8 to 41 are all in good working order. Nos. 3, 5 and 7 converted into powder vans.

D Waggon.

Nos. 1 to 3, 6, 8, 10 to 12, 15, 16, 19 to 21, 23 to 30, 32 to 38, 40 to 50, 52, 54 to 72, 74 to 82, 84, 86 to 88, 90, 92 to 95, 98 to 100, 102 to 107, 109 to 115, 117, 119 to 121, 123 to 125, 128 to 131, 133 to 136, 138 to 143, 146 to 148, 150 to 152, 154, 155, 161 to 169, 171 to 173, 176, 177, 179 to 186, 189, 191, 193 to 201, 203 to 447, are all in good working order. Nos. 9 and 157 laid up for ordinary repairs. No. 202 was broken to pieces on Messrs. J. and A. Brown's line, 21/11/75.

The following D waggon are in possession of Mr. Wakeford, ballasting Tamworth Extension:—Nos. 4, 5, 7, 13, 14, 17, 18, 22, 31, 39, 51, 53, 73, 83, 85, 89, 91, 96, 97, 101, 103, 116, 118, 122, 126, 127, 132, 137, 144, 145, 149, 153, 156, 158, 159, 160, 170, 174, 175, 178, 187, 188, 190, and 192. These waggon will require a thorough overhauling and lifting when returned by Mr. Wakeford.

Timber Trucks.

Nos. 1 to 44 are all in good working order.

Powder Vans.

Nos. 1 to 3 are in good working order (formerly Nos. 3, 5, and 7 C Vans).

Sheep Vans.

No. 1 laid up for a thorough repair and painting. Nos. 2 to 13, 15 to 22, 24 to 34, 36 to 64, are all in good working order. Nos. 14, 23, and 35 are laid up for ordinary repairs.

Cattle Vans.

Nos. 1 to 32, 34 to 52, are in good working order. No. 33 laid up for ordinary repairs.

Meat Van.

No. 1 is in good working order (formerly No. 6 Cattle Van).

Ballast Waggon.

Nos. 1 to 7, 9 to 30, 32 to 43, are all in good working order. Nos. 8 and 31 are laid up for ordinary repairs.

MACHINES AND TOOLS.

No. 1.—One 25 h.-p. horizontal engine and boiler for driving machinery and tools in machine shop at H. S. Point. The boiler is 20 ft. long by 5 ft. 6 in. in diameter, in first class working order.

No. 2.—A new duplicate boiler made at the works, and of the same dimensions as the one in use. This boiler is set in brickwork, with the exception that the flues are not connected with the chimney; the mountings and connections are not yet finished.

No.

- No. 3.—One 10 h.-p. diagonal engine-boiler that was used for driving machinery and tools in old machine shop; this engine and boiler will require a thorough repair before being used again. It is my intention to use this engine and boiler after being thoroughly repaired, to drive the tools and fan in the new boiler-shop.
- No. 4.—One self-acting slide, brake and bar, facing lathe movable bed 20 ft. long; base plate 30 ft. long, used for turning wheels. This lathe is in first-class working order.
- No. 5.—One 5-ft. double-headed wheel lathe, in first-class working order.
- No. 6.—One self-acting screw-cutting gap lathe, 17-in. centres, bed 25 ft. long. This lathe had been some years in use before it came here; is now in fair working order.
- No. 7.—Self-acting screw-cutting lathe, 12-in. centres, bed 15 ft. long; in fair working order.
- No. 8.—Lathe, 10-in. centres, bed 12 ft. long (not self acting). This lathe is in fair working order.
- No. 9.—Self-acting screw-cutting lathe, 9-in. centres, bed 10 ft. long. This lathe is in first-class working order.
- No. 10.—Self-acting screw-cutting gap lathe, 9-in. centres, bed 10 ft. long; in first-class working order.
- No. 11.—Self-acting screw-cutting lathe, 6-in. centres, bed 6 ft. long; in fair working order.
- No. 12.—Lathe, 8-in. centres, wooden bed 6 ft. long, used for turning patterns and cutting tube; in fair working order.
- No. 13.—Self-acting planing machine to plane work, 6 ft. long, 3 ft. 6 in. wide; in fair working order.
- No. 14.—Self-acting planing machine to plane work, 6 ft. long, 3 ft. 6 in. wide; in first-class working order.
- No. 15.—Self-acting slotting machine, 12-in. stroke; in first-class working order.
- No. 16.—Self-acting double-headed shaping machine, 18-in. stroke; in first-class working order.
- No. 17.—Bolt and nut-screwing machine, to screw from $\frac{1}{2}$ in. to 2 in. diameter. This machine is in first-class working order.
- No. 18.—Boring machine for boring out cylinders. This machine was made at the works, and is fixed on bed of No. 4 lathe. This machine is in first-class working order.
- No. 19.—Radial drilling machine, in first-class working order.
- Nos. 20 and 21.—Vertical drilling machines, to drill holes 2 in. diameter in centre of work 2 ft. 8 in. diameter; in first-class working order.
- No. 22.—Punching and shearing machine, arranged so that both operations can go on at once to punch holes $\frac{3}{4}$ in. diameter in $\frac{5}{8}$ -in. plate. This machine is in fair working order.
- No. 23.—Punching and shearing, arranged so that both operations can go on at once, to punch holes $\frac{3}{4}$ in. diameter in $\frac{5}{8}$ -in. plate. This machine was purchased from Messrs. Vale & Lacy in August, 1875, and has not been used at the works; it will require considerable repairs before it can be used.
- No. 24.—Small hand-punching press, for punching holes in sheet iron; in fair working order.
- No. 25.—Plate-bending machine; was purchased from Vale & Lacy in August, 1875; had been in use some years before it came here. In fair working order.
- No. 26.—Hand-punching bears, in fair working order.
- No. 27.—Fan blast, in first-class working order.
- No. 28.—Circular saw bench, in fair working order.
- No. 29.—Slide-valve facing machine. In first-class working order.
- Nos. 30 and 31.—Grind-stones with wooden frames. In fair order.
- No. 32.—Small hand-machine, for making bolts and nuts. This machine is now useless.
- No. 33.—Weighing-machine for weighing engines. This machine is not used as it does not weigh correctly; each time an engine is moved off and on the weights vary.
- No. 34.—Hydraulic press for drawing wheels off and on their axles. In first-class working order.
- Nos. 35 and 36.—Portable cranes. In fair working order.
- No. 37.—Crab-winch used for lifting waggons and carriages. In first-class working order.
- No. 38.—Crab-winch fixed on top of gantry for lifting engines, boilers, tenders, &c. In first-class working order.

No. 39.—Crab-winch with malleable frames. In fair working order.

No. 40.—Crab-winch with cast-iron frames. In fair working order.

No. 41.—Hydraulic test pump, by Tangye Bros., for testing boilers. In first-class working order.

PUMPING ENGINES AND PUMPS.

Nos. 1 and 2. *Bullock Island Junction*.—There are two of Tangye Bros' special steam pumps at this place, and are in first-class working order.

I may state for your information that the works at Honeysuckle Point are supplied from this pumping station, also the hydraulic cranes for shipping coals at the dyke.

No. 3. *Morpeth*.—There are a pair of hand-pumps 4-in. diameter, and 5½-in. stroke, worked by crank and fly-wheel at this place, and are in first-class working order.

No. 4. *West Maitland*.—One pumping engine 3 horse-power, made by Garrett & Marshall. The engine requires a thorough repair; the boiler belonging to this engine is at the works, Honeysuckle Point and has been thoroughly repaired, and now ready for fixing in brickwork.

The engine is at present worked by a vertical boiler I had in stock.

The pumping engine that was used at Honeysuckle Point has been thoroughly repaired, and will be taken to West Maitland to replace the one at present in use there while being repaired.

This work will be done as early as practicable.

No. 5. *Anvil Creek*.—One hand-pump, 4-in. diameter, 5½-in. stroke. In first-class working order.

No. 6. *Singleton*.—One 3 h.-p. table engine, working a pair of 4-in. pumps, and is in first-class working order.

No. 7. *Ravensworth*.—The double-acting pump, with engine fixed on boiler, made by Messrs. P. N. Russell & Co., Sydney, is now at the works, H. S. Point, undergoing a thorough repair to engine, boiler, and pumps, which I expect will be finished in about 6 weeks.

No. 8. *Aberdeen*.—The pumping engine at this station is a 4 h.-p. horizontal engine, driving three pumps, 4 in. diameter, 9 in. stroke.

The pumps are fixed down the well, and are driven with gearing. In good working order.

No. 9. *Wingen*.—One 4-in. hand pump, 5½ in. stroke, in good working order.

No. 10. *Murrurundi*.—This pumping engine is the same class as at Ravensworth, a double-acting pump with engine fixed on boiler.

The engine and pump in fair working order; the boiler requires repairing and new tubes.

No. 11. *Page River*.—There is one of Tangye Bros' special steam pumps at this place, and is in first-class working order.

This engine and pump was formerly in use at Throsby's Creek, and was fixed at the Page River during the drought, while the water was scarce at Murrurundi.

I purpose to fix this engine and pump at Chilcott's Creek, where at present there is a 3-in. hand pump.

No. 12. *Chilcott's Creek*.—One 3-in. hand pump, in good working order, also a cast-iron tank fixed at this creek, which will hold 8,000 gals. of water.

No. 13. *Quirindi*.—There is one of Tangye Bros' special steam pumps at this place, and in first-class working order.

No. 14. *Ravensworth*.—The engine at present in use at this station is a small special steam pump by Tangye Bros.

This steam pump is intended to be moved from one station to another, while the other pumps and engines are being repaired.

No. 15.—Pumping engine made by Garrett & Marshall. This engine was formerly used at H. S. Point and has had a thorough repair.

I propose to fix this engine at West Maitland, while the one at present in use is being repaired.

No. 16. *Tamworth*.—One Tangye Bros' special steam pumps. In first-class working order.

THOS. BOAG.

27/2/79.

* Of the engines used for goods and passengers half their number is added to the passenger and half to the goods engines.

† The mileage does not include ballast waggons, but merely vehicles used for traffic purposes; and as many of them were in use for only a part of the year their average number and weight are taken as the factors in the above calculations.

Other distances to be charged—For the first 40 miles, 10d. per Truck per mile; for every mile exceeding 40 and not exceeding 100, 6d. per Truck per mile; for every mile exceeding 100 and not exceeding 150, 4½d. per Truck per mile; for every mile exceeding 150 and not exceeding 200, 4d. per Truck per mile; for every mile over 200, 3½d. per Truck per mile. For single decked Truck, only half these rates will be charged. Minimum charge, 15s.

HORSES.

HORSES.

The Commissioner will carry Horses in Cattle Trucks if requested to do so, but only under special contract, relieving him of all responsibility. The charge for Horses so carried will be the same as for Cattle in full Truck loads. For the Rates for Horse Boxes, see Coaching Rate Sheet.

PIGS.

8d. per Truck per mile for the whole distance. Minimum, 15s.]

Under the foregoing rates for Cattle, Sheep, Horses, and Pigs, no less charge than for one full Truck will be made for each and every Truck used.

SMALL CONSIGNMENTS.

$\frac{1}{2}$ Truck, i.e., 4 Cows or Oxen, or 10 Calves, or 40 Sheep, or 80 Pigs.	$\frac{1}{4}$ Truck, i.e., 2 Cows or Oxen or 5 Calves, or 20 Sheep, or 15 Pigs.	Single Cow or Ox.	Sheep or Pigs, when less than $\frac{1}{4}$ Truck.	Calves, when less than $\frac{1}{4}$ Truck.
6d. per mile	4d. per mile.....	3d. per mile.....	$\frac{1}{2}$ d. each per mile ...	1d. each per mile.
Minimum, 10s.....	Minimum, 7s. 6d.	Min., 7s. 6d. each ...	Min., 1s. 6d. each ...	Minimum, 2s. each.

When the number of animals or the space occupied exceeds the limit for a $\frac{1}{2}$ Truck, the rate for $\frac{1}{2}$ a Truck will be charged; and when the limit of $\frac{1}{4}$ a Truck is exceeded, a full Truck will be charged for at the rate for herds, flocks, &c.

In ascertaining what portion of a Truck is to be charged for, i.e., $\frac{1}{2}$, $\frac{1}{4}$, or full Truck, regard will be had to the space actually occupied more than to the number of animals; but in no case must the number of animals stated above be exceeded.

Mixed stock will be carried together in the same Truck, provided the whole consignment belongs to one person, and the Commissioner is relieved of all responsibility. When mixed stock cannot be loaded together, each kind will be charged for separately.

When the charge per head for Live Stock exceeds that for a $\frac{1}{4}$ Truck, or when the charge for a part Truck exceeds that for a full one, only the lesser amount will be collected.

Bulls.

The charge for Bulls is 7d. each per mile; if more than one in a Truck, 4 $\frac{1}{2}$ d. each per mile. Minimum, 12s. 6d.

Valuable Rams and Ewes.

If less than half a Truck load, will be charged 2d. each per mile; for half a Truck and upwards, Sheep rates. Minimum, 5s.

Horses.

See full Truck rates. No less charge than for a full Truck load will be made for any number.

GENERAL CONDITIONS AND REGULATIONS.

The Commissioner will not receive Live Stock on Sunday, Good Friday, Christmas Day, or any proclaimed Holiday. Live Stock will be conveyed only from and to such stations as have accommodation for loading and unloading, and herds and flocks only at convenient times to be previously arranged with the Traffic Manager.

The Commissioner does not guarantee arrival at any particular time or for any particular market.

Persons forwarding Live Stock must give at least twenty-four hours' notice of the number of Trucks they will require, at the same time paying a deposit of ten shillings per truck, such deposit money to be forfeited to the Commissioner for Railways in the event of the Trucks not being used by the person ordering them. The acceptance of this deposit will in no way bind the Commissioner to supply the Trucks by any particular time, it being merely intended as a guarantee of the *bond fide* nature of the order.

All Live Stock must be loaded and unloaded by the senders and consignees respectively, by whom also the Truck doors must be secured and opened, fastenings attended to, &c.

All Live Stock must be unloaded within three hours after arrival, otherwise it will be unloaded by the Commissioner, and a charge made of 2s. per Truck.

All Live Stock must be removed from the Railway premises immediately after unloaded; or if left, will remain at the owner's risk and expense, and may be sent to agistment or livery, the cost of which shall be paid by the owner, and such cost must be paid on demand as part of the authorised charges; and such stock, if not removed within seven days, may be sold by auction, by order of the Commissioner, within the Railway premises, and the proceeds applied in payment of all expenses incurred, and the balance thereof handed over to the owner on demand.

When a Truck is only partly occupied by a consignment, the Commissioner will have the right to fill it up to its full carrying capacity with other stock.

One or more *bond fide* Drivers will be allowed to accompany each consignment, travelling distances over 60 miles, to give the stock whatever attention may be necessary during transit. They will be furnished with return free passes, available for three days, and must ride either in the Guard's Van or a 2nd Class Carriage. The number allowed will be regulated by the following scale:—

1 to 5 Trucks (full Trucks only)	1 Driver
6 to 15 ,,	2 Drivers
16 and upwards	3 ,,

The following are the Rates at which Live Stock can be insured:—

NEAT CATTLE (INCLUDING BULLS).

1 to 50 miles, 2 per cent. on the declared value above £15.
51 to 100 ,, 3 ,, ,, ,,
101 to 150 ,, 4 ,, ,, ,,
151 and upwards, 5 ,, ,, ,,

The same percentage charge to be made for Pigs and Sheep (including valuable Rams and Ewes) on the declared value above £2.

Under no circumstances will the Commissioner be responsible for loss or injury to Live Stock, insured or uninsured, occurring during loading or unloading, whether such services be performed by either the servants of the Department or the owner. Nor will he under any circumstances be responsible for loss of or injury to any Live Stock during transit, arising from fear or restiveness, or through any of the animals being suffocated or trampled upon.

Minimum, 10s.	Minimum, 7s. 6d.	Min., 7s. 6d. each.	Min., 1s. 6d. each.	Min., 2s. each.

SHEEP.

Sheep Trucks.

	Per mile.
1 to 150 miles	-/9 per truck.
Over 150 miles	-/7 " "

GOODS TRUCKS.

1 to 150 miles	-/6 " "
Over 150 miles	-/5 " "

In the event of the Department not being able to supply Sheep Trucks, it does not undertake to provide Goods Trucks.

Every Sheep or Lamb, up to 3, carried any distance not exceeding 24 miles, by Goods Trains only 2/-

And for each mile beyond that distance /1

Over 3 and up to 10 animals, half Truck rate ; over 10 animals, full Truck rate.

Minimum Charge :—Sheep Truck, 40/- ; Goods Truck, 20/- ; exclusive of a Terminal Charge of 2/- per Truck for Sheep Trucks, and 1/- per Truck for Goods Trucks, to be added to the above rates in all cases.

Horses, Cattle, or other Animals to be carried must be at the Stations One Hour before the departure of the Train by which they are intended to be forwarded ; and the Board do not undertake to forward Horses, Cattle, or other Animals at or by any particular time or Train. Not less than twenty-four hours' notice must be given when a Horse-box is required, and 50% of the Fare must be deposited when making the requisition, such deposit to be forfeited if the Horse or other Animal does not arrive in time to be forwarded by the train appointed.

PIGS IN TRUCKS.

-/6 per waggon per mile.
-/3 per half waggon per mile.

No. 46—continued.

NEW SOUTH WALES.	VICTORIA.	QUEENSLAND.	SOUTH AUSTRALIA.
<p>When the number of animals or the space occupied exceeds the limit for a quarter Truck, the rate for half a Truck will be charged; and when the limit of half a Truck is exceeded, a full Truck will be charged for at the rate for herds, flocks, &c.</p> <p>In ascertaining what portion of a Truck is to be charged for, <i>i.e.</i>, quarter, half, or full Truck, regard will be had to the space actually occupied more than to the number of animals; but in no case must the number of animals stated above be exceeded.</p> <p>Mixed Stock will be carried together in the same Truck, provided the whole consignment belongs to one person, and the Commissioner is relieved of all responsibility. When Mixed Stock cannot be loaded together, each kind will be charged for separately.</p> <p>When the charge per head for Live Stock exceeds that for a quarter Truck, or when the charge for a part Truck exceeds that for a full one, only the lesser amount will be collected.</p> <p style="text-align: center;"><i>Bulls.</i></p> <p>The charge for Bulls is 7d. each per mile; if more than one in a Truck, 4½ each per mile. Minimum, 12s. 6d.</p> <p style="text-align: center;"><i>Valuable Rams and Ewes.</i></p> <p>If less than half a Truck load, will be charged 2d. each per mile; for half a Truck and upwards, Sheep rates. Minimum, 5s.</p> <p style="text-align: center;"><i>Horses.</i></p> <p>See full Truck rates. No less charge than for a full Truck load will be made for any number.</p> <p style="text-align: center;">GENERAL CONDITIONS AND REGULATIONS.</p> <p>The Commissioner will not receive Live Stock on Sunday, Good Friday, Christmas Day, or any proclaimed Holiday.</p> <p>Live Stock will be conveyed only from and to such stations as have accommodation for loading and unloading, and herds and flocks only at convenient times to be previously arranged with the Traffic Manager.</p> <p>The Commissioner does not guarantee arrival at any particular time or for any particular market.</p> <p>Persons forwarding Live Stock must give at least twenty-four hours' notice of the number of Trucks they will require, at the same time paying a deposit of 10s. per Truck, such deposit money to be forfeited to the Commissioner for Railways in the event of the Trucks not being used by the person ordering them. The acceptance of this deposit will in no way bind the Commissioner to supply the Trucks by any particular time, it being merely intended as a guarantee of the <i>bond fide</i> nature of the order.</p> <p>All Live Stock must be loaded and unloaded by the senders and consignees respectively, by whom also the Truck doors must be secured and opened, fastenings attended to, &c.</p> <p>All Live Stock must be unloaded within three hours after arrival, otherwise it will be unloaded by the Commissioner, and a charge made of 2s. per Truck.</p> <p>All Live Stock must be removed from the Railway premises immediately after unloaded; or if left, will remain at the owner's risk and expense, and may be sent to agistment or livery, the cost of which shall be paid by the owner, and such cost must be paid on demand as part of the authorised charges; and such stock, if not removed within seven days, may be sold by auction, by order of the Commissioner, within the Railway premises, and the proceeds applied in payment of all expenses incurred, and the balance thereof handed over to the owner on demand.</p> <p>When a Truck is only partly occupied by a consignment, the Commissioner will have the right to fill it up to its full carrying capacity with other stock.</p>

Horses.

Will be conveyed only to such stations as have accommodation for loading and unloading.
IN BOXES :—Full horse-box (3 horses), one owner, 1s. per mile, minimum charge, 15s. ; one horse, 5d. per mile ; two horses, 9d. per mile, minimum charge 7s. 6d. each ; stud horses, 1s. per mile each, minimum charge 15s. Mares, with foal at foot, rate and a half. Horses to be at the station thirty minutes before the departure of the train by which they are to be despatched, but their despatch will not be guaranteed by any particular time or train.

A reduction of 25 per cent. on the above charges will be made on every mile beyond 150 and up to 200, and over 200 miles 50 per cent. per mile will be allowed.

When possible, horses will be conveyed by Passengers' Trains.

Return tickets at rate and a half, available for three days, for distances not exceeding 45 miles (those issued on Friday and Saturday, available for return until Monday and Tuesday following), and for distances over 45 miles, available for one week. Notice of day for return is requested to be given to station-master at return station.

Carriages.

Will be conveyed to and from such stations only as have accommodation for loading and unloading.

Carriages, gigs, and dog-carts, 4d. per mile ; two vehicles, one owner, if on one Truck, 6d. per mile ; 4-wheeled waggons and bullock drays (empty), 6d. per mile ; minimum charge, 7s. 6d. Vehicles to be at the station thirty minutes before the departure of the train by which they are to be despatched, but their despatch will not be guaranteed by any particular time or train.

A reduction of 25 per cent. on the above charges will be made for every mile beyond 150 and up to 200 ; and over 200 miles, 50 per cent. per mile will be allowed.

NOTE.—No guarantee can be given to convey horses or vehicles by Passenger Trains ; but when practicable this will be done, those for the longest journey having the preference.

Dogs.

Carriage to be prepaid. One half-penny per mile each for distances up to 50 miles, and 4d. additional for every 30 miles or portion of 30 miles thereafter ; minimum charge, 6d. Dogs must be provided with chains or other sufficient means to secure them, and in all cases they will only be carried at owner's risk, who must load and unload if required by station-master.

Gold Dust and Bullion, and Gold and Silver Coin.

The Commissioner for Railways will not be responsible for the safe conveyance of gold dust and bullion, or gold and silver coin, as the following charges are made, and the gold dust and bullion and coin carried, on condition of its being in charge of owners and at their risk.

Distance not over 55 miles. Distance not over 100 miles. Distance not over 150 miles. Distance not over 200 miles. Distance not over 250 miles. Distance not over 350 miles.

Gold dust and bullion, £ 100 ozs.	2/-	3/6	4/3	5/-	5/6	6/-
Gold coin, £ 100	-/6	-/10	1/3	1/8	2/-	2/3
Silver coin, £ 100	1/-	1/9	2/6	3/3	3/6	3/9

Fractions over 100 and under 50 will not be charged, but fractions of 50 and over will be charged as 100.

Rates for Milk.

In quantities of not less than 300 gallons, less than 300 gallons double rates.

15 miles and under	1d. per gallon.
40 "	1d. "
90 "	2d. "
Beyond 90 miles	1d. "

Horses.

Each mare, gelding, or filly, not exceeding 40 miles... 20/-
 Each mile beyond 40 miles... -/6

Each entire horse not exceeding 20 miles... 20/-
 Each mile beyond 20 miles... 1/-

Horse-box (3 horses), 1/3 per mile ; minimum... 40/-

In Goods Trucks and by Goods Trains, on either Up or Down Journey, 1/- per truck per mile. By Passenger Trains, 1/6 per truck per mile.

Not more than 8 horses to be put in each truck. For each mare with foal at foot, rate and a half.

The minimum charge for a truck with horses is 20/-, exclusive of a terminal charge of 2/- per truck to be added to the above rate in all cases.

Carriages.

-/6 per mile ; minimum, 20/-.
 2 vehicles, same owner, -/9 per truck per mile.

3 vehicles, on same terms, 1/- per truck per mile ; minimum, 20/-.

Vehicles for repairs, return tickets for four weeks ; 50 per cent. added.

Dogs.

APPENDIX—

- A and B to Locomotive Engineer's report on Workshops, &c.
Plan of Chisholm Estate, purchased by Government.

RAILWAY WORKSHOPS.

No. 1.

Locomotive Foreman to The Engineer-in-Chief.

I BEG respectfully to call your attention to the fact that our workshops have not the requisite accommodation for the increasing work of repairing locomotives, &c. I would strongly urge the necessity for providing workshops on a larger scale as early as possible, otherwise it will not be possible to keep pace with the work. It is a serious matter to be both short of engines and also of accommodation to carry out the required repairs. At present I am erecting one of the new engines (to replace one of the 1 to 4 class) outside, under a tarpaulin without a pit, having no room inside the shops. This is building engines under great disadvantages.

The boiler for the second engine of the above class is in a forward state; but those for the third and fourth engines are only just put together, in which state they have been lying since August last year, when the men were taken off to put together new engines, since which they have been employed on heavy repairs to the old goods engines, No. 17 class, and latterly to the old bogie engines, No. 23 class; so that it has not been possible to keep many men on the new engines. Five of the latter (bogies) yet remain to be renewed in the fire-boxes, cylinders, &c.

I have in hand, for fixing on No. 23 engine, the Westinghouse dee breaks, and I have also commenced with the American chimneys for spark-catching, in both of which jobs there is a great deal of boiler-makers' and other work.

W. SCOTT, 8/10/75.

Additional accommodation will be recommended in a short time.—J. W., 13/10/75. Mr. Scott,—
To be returned. Seen.—W. SCOTT, 18/10/75.

No. 2.

The Engineer-in-Chief to The Commissioner.

Subject: Proposed Improvements, Sydney Station.

Department of Public Works, Railway Branch, Engineer's Office, Sydney, 22 November, 1875.

I FORWARD, for the consideration of the Commissioner, three plans on one sheet, showing proposed arrangements for goods warehouses and workshops at the Redfern terminus of the Southern and Western Railways, and the removal of the locomotive shops to a site beyond the tunnel at Redfern, upon land belonging to Mrs. Chisholm.

Plan No. 1 shows existing arrangements of locomotive, carriage, and goods sheds at Redfern, also proposed goods-shed in Prince Alfred Park and extension of the present locomotive shops.

Plan No. 2 shows proposed goods arrangements at Redfern, without encroaching upon Prince Alfred Park, should the removal of the present locomotive shops be sanctioned.

Plan No. 3 shows re-arrangement of locomotive shops on land belonging to Mrs. Chisholm, if removed from the present station yard.

After having given this matter the greatest consideration, I am forced to the conclusion that the present Redfern station yard is much too small even for the existing traffic, and the only way in which this yard can be made to accommodate the existing and prospective traffic will be by removing the whole of the locomotive, carriage, and waggon repairing and painting shops to the position shown on plan No. 3.

Plan No. 1. Upon this plan is shown a proposal to construct a second tunnel under Botany-street, and to carry the junction of the goods line from the north end of the Botany-street tunnel up to Wells-street, so as to enable the shunting in the station yard to be carried on without blocking the main line, as at present. Also the erection of a new goods warehouse and the construction of the necessary sidings in Prince Alfred Park, and the removal of the Exhibition building. The enlargement of the existing running-shed, machine shop, coal stage, and the construction of an erecting shop and all necessary roads in connection therewith. A new carriage-shed is also shown, and a new store, tarpaulin store, and permanent-way workshops.

On looking over this plan it is abundantly clear that the yard is much too small for the future of the locomotive department, as the proposed enlargement of the running shed would only give accommodation for eight engines in addition to the old shed, which provides for sixteen, making twenty-four engines altogether. The total number of engines now on the Southern, Western, and Richmond Railways is 74, and as the number will soon be increased to 100 it is absolutely necessary that accommodation far exceeding that which can be given in the Redfern yard must be provided.

Plan No. 2 shows an arrangement for goods warehouses, sidings, &c., with the locomotive buildings removed, and the encroachment upon Prince Alfred Park shown on plan No. 1 abandoned. This arrangement would give the following accommodation for goods traffic:—

One shed, 400 feet by 103, with two outside platforms—one 450 feet by 15 feet—and a second one 200 feet by 20 feet.

Two goods sheds, each 350 feet by 48 feet.

One „ 300 feet by 117 feet.

One „ 350 feet by 50 feet, with two lines of way through for wool traffic.

There is also a small shunting engine-shed and carriage-shed, with all the necessary sidings complete.

A tarpaulin-shed, 200 feet by 40, and the permanent-way workshops are also provided for in this arrangement.

Plan

- Plan No. 3. This plan shows an arrangement for the locomotive department only, including—
- Engine running-shed, 350 x 128 feet, to hold 56 engines.
- Shed for tenders, 300 x 40 feet.
- Engine painting shop, 200 x 40 feet.
- Carriage painting shop, 200 x 40 feet.
- Carriage and waggon repairing shop, 220 x 68 feet.
- Engine erecting shops, one 200 x 55 feet, and a second shop 340 x 55 feet.
- Engine lifting shop, 150 x 55 feet.
- Two machine shops, each 200 x 50 feet, with engine and boiler house between them.
- Blacksmiths' shops, iron foundry, copper-smiths, brass founders, and boiler shop, stores, &c.
- There are also two coal stages, one 250 x 25, the other 200 x 25, with sheds for storing wheels, offices, &c.

The goods arrangement shown on plan No. 2 will not all be required for many years ; but I am satisfied they will eventually be demanded by the great increase in traffic which will take place on the completion of the different extensions South and West, and the proposal now made will, I think, be sufficiently extensive for many years.

Additional land must be had near to Sydney, even should the locomotive shops not be immediately removed, as it is only a question of time when the Government must have sufficient accommodation for building all rolling-stock required for the railways, engines, carriages, and waggons.

The cost of carrying out this proposal will, no doubt, be great, but it must be done ; if not now, in the course of a very few years, and the cost will be considerably increased by delay.

The land alone will not cost less than £30,000, and the new buildings, tunnel, sidings, &c., will cost about £170,000. This expenditure might extend over several years, as a portion of the buildings only will be at once required, and the additions can be made as they are demanded by the traffic.

JOHN WHITTON.

No. 3.

The Locomotive Overseer to The Engineer-in-Chief.

I BEG respectfully to call your most serious attention to my reports of July 22nd, 1874, M.P. 74/2,138, and October 10th last, M.P. 75/3,663, respecting the deficiency of workshop accommodation at Sydney. The work of repairing rolling-stock is rapidly increasing, not only in proportion to the additions to our rolling-stock and increase of mileage run, which is very considerable, but also in consequence of many of our engines and other rolling-stock, which have now been a long time in use, requiring to undergo very extensive repairs and renewals of a much heavier character than they have hitherto required.

The above causes, combined with the introduction of the eight-hour system, make it impossible to prevent the work of repairs to engines and other rolling-stock from falling into arrears, so much so that unless I am able to employ more hands, through being provided with increased shop-room, I feel that I cannot much longer be answerable for supplying in safe running order the requisite engines and vehicles for working the traffic. In addition to the impossibility of maintaining the rolling-stock in an efficient condition from the want of workshop space, I should also call attention to the fact that the work of nearly all the branches of the department is carried on at very great disadvantage and loss to the Commissioner through the same cause.

The promised new machine-shop, and a repairing shop for locomotives, are equally urgently required. The former is wanted to afford room for additional lathes and other machines, and also to give space required to work the present machines to advantage. The latter is required to enable the work of repairing engines to be carried on conveniently, and to afford the necessary accommodation for the requisite number of engines to be lifted at one time, which is impossible at present. Our appliances for lifting engines are to a great extent of a temporary character, and were designed for engines of a lighter class than those now chiefly in use. The erecting of engines and other mechanical work of a superior nature have now to be carried on exposed to all the weather, or under temporary canvas covers, in consequence of want of room inside the building, which, of course, is working under great obstacles. There is also a great deal of labour and inconvenience involved in shunting engines, which would be altogether obviated were more space available under cover. At present a large number of engines have to remain outside, exposed to the weather and the effect of dust and grit, with which they become smothered, and consequently damaged to a considerable extent.

An additional waggon repairing-shop is also badly required at present ; the work, to a great extent, has to be carried on under great inconveniences, and loss, owing to its having to be done in the open air.

The additional accommodation for lathes and for lifting engines is, however, the most urgently required, and I trust that steps will at once be taken to provide the same. I should be glad if the Minister could spare time to come and inspect the works with you.

W. SCOTT, 17/12/75.

I quite agree with Mr. Scott, that additional accommodation is required for the locomotive and carriage branches, and I desire to call the Commissioner's serious attention to my proposal to remove the above branches to the south of the Redfern tunnel.—J.W., 14/12/75. The Commissioner.

No. 4.

The Locomotive Overseer to The Engineer-in-Chief.

Government Railways, Engineer-in-Chief's Branch, 10 December, 1875.

I BEG respectfully to call attention to the great degree of inconvenience and danger occasioned by the awkward position of the railway store relatively to the workshops, it being commonly necessary to pass under or over a half-dozen lines of waggons in passing from one to the other, and causing sometimes a great loss of time.

This morning, as Edward M'Grath and striker (of permanent-way blacksmith's-shop) were coming across with a bar of iron, the engine moved the waggons under which they were passing the bar. The iron

iron

iron was bent greatly, and the men had a narrow escape. This, however, is not altogether an unusual occurrence, and I may say that there are many narrow escapes, some happening every week, as all the heavy and awkward boiler-plate castings, &c., have to be transported across the lines.

W. SCOTT.

I hope the Commissioner will take into his serious consideration, at the earliest possible time, my proposal to remove the locomotive shops from the Sydney yard.—J.W., 14/12/75. Memo.—75/627 of 22/11/75. To Commissioner.

No. 5.

Minute of The Traffic Manager.

The attention of the Minister was drawn, I perceive, by *Sydney Morning Herald* of 16/12/75, and to complaints made respecting irregularities in delivery of wool from Redfern station.

I am not aware to what cases Mr. Stuart refers, but it is quite possible that it is to certain balances of consignments which get buried upon the shed being packed. It cannot be avoided, unless consignees were prepared to take delivery as fast as the wool comes down, and release contractors' drays, &c., within reasonable time. If we cannot get rid of it as fast as it comes the shed soon becomes blocked up, and there is no getting at odd bales and small consignments.

We have, of course, no platform accommodation, and cannot, therefore, pretend to sort brands.

I am now pushing the delivery faster than is agreeable to the consignees, and in addition to the shed being full have over 150 trucks not yet unloaded.

Our facilities in the way of shed and platform accommodation are utterly absurd for so large a traffic. All our general merchandise has to be taken in and delivered in the open yard, and it is a matter of serious moment that we should be provided with something like the means of carrying on the rapidly increasing work of this department.

Being unable to release the larger number of loaded trucks before-mentioned from want of shed and platform, I am unable to supply the demand of stations for either trucks or sheets. Traffic is impeded, revenue lost, and disappointment and loss entailed upon our customers.

Commissioner for Railways.

D.V., 17/12/75.

Mr. Whitton,—Can anything be done to remedy this inconvenience?—J.R., 22/12/75. See my report, 75/627, of 22nd November, with reference to the removal of the locomotive shops from the station yard, and suggesting increased facilities for the traffic branch.—J.W., 22/12/75. Commissioner.

No. 6.

The Locomotive Overseer to The Engineer-in-Chief.

Government Railways, Engineer-in-Chief's Branch, 21 February, 1876.

I BEG respectfully to call your serious attention to my previous reports respecting the deficiency of work shop accommodation at Sydney.

I find the work of maintaining the rolling stock to be increasing so rapidly that it has become absolutely necessary for carrying on the work to have additional engine pits and appliances for lifting engines. The new machine-shop also, that was promised a long time ago to be erected, is still remaining in abeyance, although so badly required.

As before stated, an additional carriage and waggon and repairing shop is urgently required.

I sincerely trust that no time will be suffered to elapse before the erection of new shops is taken in hand.

W. SCOTT.

I quite agree with Mr. Scott as to the necessity for increased accommodation for the locomotive department, and desire to call the Commissioner's attention to my memo., dated 22nd November, 1875 (75/627).—J.W., 24/2/76. The Commissioner.

No. 7.

The Locomotive Overseer to The Engineer-in-Chief.

Government Railways, Engineer-in-Chief's Branch, 20 April, 1876.

I BEG again to call your most serious attention to the want of room in our repairing shops, for taking in all the engines requiring repairs. When the new engines arrive space will also be required for putting them together.

Unless something is done in this matter at once I cannot be held responsible for supplying sufficient engine power for working the traffic.

W. SCOTT.

I again call the Commissioner's attention to my minute, No. 627, of 22nd November, 1875, with reference to the increased accommodation so urgently required at the Sydney station. Urgent and important.—J.W., 21/4/76. Commissioner.

No. 8.

Minute of The Commissioner.

I CAN do no more than urge on the Minister the necessity for an immediate settlement of this question. If a lease of the premises offered by Messrs. P. N. Russell and Co. were taken for one or a series of years, with the option of purchase, we could relieve the locomotive shops and at once commence the manufacture of passenger carriages and other stock so much wanted.

J.R., 27/4/76.

No. 9.

No. 9.

The Locomotive Overseer to The Engineer-in-Chief.

Government Railways, Engineer-in-Chief's Branch, 18 July, 1876.

I BEG respectfully to again call your serious attention to the imperative necessity for the proposed new workshops. The train mileage is being increased both by the opening of new extensions and increased number of trains, and still the long promised increased workshop accommodation, with additional machines, are not being provided. The way our shop is crowded with machines is excessively inconvenient, and entails very great expense, and considerable danger in shifting heavy pieces of machinery in and out of the shop. I may cite the case of the cylinders (to replace the cracked ones in No. 50 engine) being planed by Shaw at the time of the accident, reported yesterday, which weigh $2\frac{1}{2}$ tons, and for which our planing machine is too small and ill-adapted—involving the necessity of taking out all the screws and feeding gear to allow the cylinders to pass between the standards and cross-bridge.

I trust that something will be done in this matter at once, as it will not admit of much further delay.

W. SCOTT.

No. 10.

Minute of The Engineer-in-Chief.

I HAVE repeatedly called the Commissioner's attention to the necessity of providing additional accommodation at Sydney both for locomotive and traffic branches.

J.W., 7 August, 1876.

Commissioner.

No. 11.

Minute from The Secretary for Public Works to The Engineer-in-Chief.

[Very urgent.]

The Site for the New Railway Workshops.

THERE is a sum of money on the Loan Estimates for 1877, namely, £130,000, to be appropriated to the erection of workshops, for the repairs of rolling stock, &c., and there is also a sum of money on the Supplementary Estimates for 1876, namely £3,429 10s., for the purchase of land at Duck Creek, for railway workshops; indeed I have been informed that this land has been bought by the Government.

I likewise observe that one of the principal advantages claimed as justifying the purchase of this land, was that all heavy loading, such as boilers, castings, &c., could be lightered to it.

As the Engineer of Existing Lines has reported to me that there is so little room at the Redfern Station for the workmen employed in repairing the rolling stock, that some of the men are working under canvas (which certainly appears very objectionable), and that there exists, at the present time, the most urgent need for additional accommodation, I am desirous of obtaining, at as early a date as possible, the opinion of the Engineer-in-Chief for Railways upon the following subjects:—

First.—Does he approve of the land at Duck Creek being used for the erection of workshops, and could heavy castings, boilers, &c., be lightered to the workshops if they were erected on the land purchased by the Government at Duck Creek?

Secondly.—If the Engineer-in-Chief for Railways does not approve of the land at Duck Creek being used for the railway workshops, in what locality would he recommend that the Government should obtain land for the purpose, and would Mr. Whitton, in his report, please state the reasons which have led him to recommend any special or particular locality for this object?

J.H., 14/5/77.

Mr. Whitton for report, B.C., 14/5/77.—J.R. See report herewith.—W.H.Q., 31/5/77. A similar minute was sent to the Engineer for Existing Lines. (See report. No. 13.)

No. 12.

Minute from the Engineer-in-Chief to The Commissioner.

Department of Public Works, Railway Branch, Engineer-in-Chief's Office, 31 May, 1877.

Subject: New Railway Workshops.

REFERRING to the Minister's memo. of the 14th instant on the subject of the proposed workshops for the locomotive department, I have to state that on the 22nd November, 1875, I forwarded for the consideration of the then Minister for Works a report and plans for the removal of the workshops from the station yard at Redfern to land belonging to Mrs. Chisholm, a short distance from the present station. The shops to be erected on the same level and close alongside the main line of railway.

I also proposed to construct a second short tunnel under the Botany Road for the shunting of goods trains, and to use the present Redfern yard exclusively for goods traffic.

I selected the site I have named as one offering special advantages, being of considerable length and width, and generally favourable for the foundations of buildings, and could be connected with the main line at both ends, or at any intermediate point.

I proposed to erect upon it the following building:—Shed for tenders, engine painting shop, carriage painting shop, carriage and waggon repairing shop, engine erecting shops, engine lifting shop, two machine shops, with engine and boiler house between them, blacksmiths' shops, iron foundry, copper-smith's, brass-founders', and boiler shop, stores, &c.

A running shed to hold fifty-six engines was also included in the arrangement with coaling stages, engine turn-table, &c. For dimensions of buildings see my report previously referred to.

It is a matter of considerable importance to have the running shed and workshops together, so that one Superintendent can overlook both the engines under construction or repairs and the engines in work, and I know of no site where this arrangement can be carried out so efficiently as that recommended by

me

me on the land belonging to Mrs. Chisholm. If this land be purchased it will afford sufficient accommodation for workshops and running-sheds for a long time to come, and although the cost may appear great I consider this of little moment when compared with the great advantages of the position.

The land purchased at Duck River, about 12 miles from Sydney, for the locomotive workshops, is not, in my opinion, suitable for the purpose intended, and for the following reasons:—

The land is considerably below the main line of railway near to Duck River, and can only be connected with it at one end, which is in itself a serious disadvantage.

That the rails of the main line at Duck River are 16 feet above the surface of the ground, and if the lines of rails for the workshops be laid in on the level (which they should be from that point), they would be 17 feet below the level of the main line at the northern boundary of the land, which is 37 chains north of Duck River.

That the highest flood known at Duck River since the construction of the railway extended over the land purchased for the workshops a distance of 30 chains, and an average depth of more than 4 feet.

That to keep the workshops above flood level the buildings and sidings would have to be constructed for 30 chains out of 37 chains, the total length of the ground, upon an embankment of at least 6 feet in height.

That if the land had been otherwise suitable for workshops the whole of the raw material from England required for the construction and repairs of the rolling stock would have to pay freight upon 12 miles of railway before such material could be used.

That all imported engines and rolling stock generally would have to pay freight for a like distance before they could be erected for use in the traffic branch.

That to erect the workshops at Duck River would render running-sheds, sidings, and machinery for temporary repairs absolutely necessary at Sydney, and additional land would have to be provided for this purpose.

Duck River, I am informed, is only navigable at high water for boats drawing about 4 feet, and at low water it is useless for purposes of navigation.

It is full of snags and mudbanks, and could not, under existing circumstances, be used for the purpose of taking heavy machinery from Sydney Harbour to the proposed site for the workshops.

Notwithstanding the additional price which would have to be paid for the land near to Sydney, I strongly recommend that it be purchased for the erection of the workshops and running-sheds, and that the arrangement proposed by me in my report dated 22nd November, 1875, be carried out in its entirety, as I know no other place so suitable for the requirements of the department.

JOHN WHITTON.

No. 13.

Minute from The Engineer for Existing Lines to The Commissioner.

Department of Public Works, Railway Branch,

Existing Lines, Engineer's Office, Sydney, 21 May, 1877.

Subject: Site for Railway Workshops.

I do not approve of the land referred to at Duck River as the best place for building the railway workshops; neither do I think that heavy articles such as those named could be conveyed by this river in its present state. But supposing they could be conveyed by this means it would be no advantage to do so, as it would be more costly than to lighter them at Darling Harbour, if it were necessary to lighter them at all. I see no advantage to be gained by this means of communication.

The principal objections to this land as a site for the railway workshops are:—

1st. Its distance from Sydney (12 miles), from which place all stores would have to be conveyed, involving a constant and permanent expense, besides the inconvenience that would be experienced in various ways by being removed such a distance from the terminal station.

2nd. The land is divided by the main line which is on a high embankment, and on a gradient of 1 in 120, into two portions, and although sufficient in area the form and position of it are not calculated for making convenient arrangements for shops and sidings. It is also subject to floods, and the sidings and shops would have to be constructed on an average of at least 3 feet 6 inches or 4 feet above the surface of the ground to place it above the highest known flood level.

3rd. The water in Duck River in dry seasons is of bad quality and not suitable for locomotive purposes.

The land which I consider most suitable for a site for railway workshops, sidings, &c., is situated at 1 mile from the Redfern station, and is known as Chisholm's and Slade's Paddocks.

The main line of railway which passes through this land is on an embankment from 10 to 12 feet high; on the level and straight for about $\frac{1}{2}$ of a mile. It is approached at the north end by a gradient of 1 in 106 from the Chippendale tunnel, and if chosen as a site for workshops, the above gradient could be greatly improved by lowering the embankment to about the level of the ground, and the workshops and sidings could all be placed on the same level, making communication easy with main line at any point, and reducing the foundations to a minimum depth.

The great length of continuous straight line would be a great advantage in many respects. Being so close to Sydney and the terminal station, no inconvenience would be felt or extra expense incurred in obtaining stores, &c., &c. This is of great importance.

A permanent supply of good water could be obtained.

A large number of the workmen now engaged in the workshops reside near the place, some of them in houses of their own.

Taken altogether, I know of no other place so convenient and suitable as a site for the railway workshops.

WILLIAM MASON.

No. 14.
Site for Railway Workshops.

Précis of case.

PROPOSED sites upon which to erect new railway workshops ; also offer of Messrs. P. N. Russell & Co. to sell or lease their property in Barker-street, Sydney.

The following sites have been suggested, and for easy reference may be numbered from 1 to 7 :—
No. 1, at Liverpool ; No. 2, at Picton ; No. 3, at Penrith ; No. 4, at Dogtrap Road, near Parramatta Junction ; No. 5, beyond Redfern tunnel, being that recommended by the Engineer-in-Chief ; No. 6, at Duck River, in the district of Liberty Plains, near Parramatta Junction ; No. 7, Barker-street, Sydney, being the property of Messrs. Russell & Co.

1.—LIVERPOOL.

In June, 1873, a resolution was passed by the Liverpool Municipal Council, appointing a deputation to wait upon Mr. Secretary Sutherland and bring under his notice the advantages Liverpool offered as a site for establishing a branch rolling stock manufactory. The deputation were informed that their request would be considered when any alteration in the site of the present workshops was contemplated, and they were desired to put their proposition in writing, this they did in July following, when the Council, ratepayers, and inhabitants of Liverpool expressed their willingness to resign to the Government the recreation reserve, contiguous to the railway paddock, for the purpose of erecting workshops thereon. Nothing further appears to have been done in this case.

2.—PICTON.

In January, 1874, a petition was received through Captain Onslow, M.P., from the residents of Picton, pointing out that Picton would be a suitable place ; on referring the petition to the Engineer-in-Chief, he wrote : " I was not aware that it was in contemplation to remove the workshops for the railways from Sydney, but if they were removed I do not think Picton would be a suitable place for them."

On the 9th of February, 1874, Captain Onslow was informed that nothing had been determined as to the removal of the workshops.

3.—PENRITH.

In April, 1875, a memorial was received from the inhabitants of Penrith, suggesting that Penrith was the most advantageous site for the workshops to be removed to, as land could be obtained cheap, the water was inexhaustible and of the best quality, coal and billet wood obtainable at reduced cost, and that already Penrith was the place where the lighter locomotive engines were changed for the heavier ones to work the steep inclines over the western mountains. The Engineer-in-Chief on being referred to, drew attention to his minute on the petition relating to the site at Picton.

Excepting that the receipt of the memorial was acknowledged, nothing further took place.

4.—DOGTRAP ROAD, NEAR PARRAMATTA JUNCTION.

On 29th December, 1875, Mr. A. T. Holroyd wrote recommending this site ; it abuts 20 chains on the Dogtrap Road, and is about 2 miles from Parramatta Junction station.

No action appears to have been taken on this letter.

5.—PROPOSED IMPROVEMENTS, SYDNEY STATION.

(By Engineer-in-Chief.)

On the 13th March, 1877, a return was laid upon the Table of the Legislative Assembly in reference to the purchase by the Government of certain land at Duck River for workshops, and it was found necessary in connection therewith to introduce into that return the propositions submitted by the Engineer-in-Chief, but as we are dealing seriatim with each proposed site, the minute of the locomotive foreman calling attention to the urgent necessity for providing workshops on a larger scale, and the minute of the Engineer-in-Chief submitting his propositions, are here inserted :—

The Locomotive Foreman to The Engineer-in-Chief.

I beg respectfully to call your attention to the fact that our workshops have not the requisite accommodation for the increasing work of repairing locomotives, &c. I would strongly urge the necessity for providing workshops on a larger scale as early as possible, otherwise it will not be possible to keep pace with the work. It is a serious matter to be both short of engines and also of accommodation to carry out the required repairs. At present I am erecting one of the new engines (to replace one of the 1 to 4 class) outside, under a tarpaulin without a pit, having no room inside the shops. This is building engines under great disadvantages.

The boiler for the second engine of the above class is in a forward state ; but those for the third and fourth engines are only just put together, in which state they have been lying since August last year, when the men were taken off to put together new engines, since which they have been employed on heavy repairs to the old goods engines, No. 17 class, and latterly to the old bogie engines, No. 23 class ; so that it has not been possible to keep many men on the new engines. Five of the latter (bogies) yet remain to be renewed in the fire-boxes, cylinders, &c.

I have in hand, for fixing on No. 23 engine, the Westinghouse dee breaks, and I have also commenced with the American chimneys for spark-catching, in both of which jobs there is a great deal of boiler-makers' and other work.—W. SCOTT, 8/10/75.

Additional accommodation will be recommended in a short time.—J. W., 13/10/75. Mr. Scott,—
To be returned. Seen.—W. SCOTT, 18/10/75.

The Engineer-in-Chief to The Commissioner.

Subject: Proposed Improvements, Sydney Station.

Department of Public Works, Railway Branch, Engineer's Office, Sydney, 22 November, 1875.

I FORWARD for the consideration of the Commissioner, three plans on one sheet, showing proposed arrangements for goods warehouses and workshops at the Redfern terminus of the Southern and Western Railways, and the removal of the locomotive shops to a site beyond the tunnel at Redfern, upon land belonging to Mrs. Chisholm.

Plan No. 1 shows existing arrangements of locomotive, carriage, and goods sheds at Redfern, also proposed goods-shed in Prince Alfred Park, and extension of the present locomotive shops.

Plan No. 2 shows proposed goods arrangements at Redfern, without encroaching upon Prince Alfred Park, should the removal of the present locomotive shops be sanctioned.

Plan No. 3 shows re-arrangement of locomotive shops on land belonging to Mrs. Chisholm, if removed from the present station yard.

After having given this matter the greatest consideration, I am forced to the conclusion that the present Redfern station yard is much too small even for the existing traffic, and the only way in which this yard can be made to accommodate the existing and prospective traffic will be by removing the whole of the locomotive, carriage, and waggon repairing and painting shops to the position shown on plan No. 3.

Plan No. 1. Upon this plan is shown a proposal to construct a second tunnel under Botany-street, and to carry the junction of the goods line from the north end of the Botany-street tunnel up to Wells-street, so as to enable the shunting in the station yard to be carried on without blocking the main line, as at present. Also the erection of a new goods warehouse and the construction of the necessary sidings in Prince Alfred Park, and the removal of the Exhibition building. The enlargement of the existing running-shed, machine-shop, coal stage, and the construction of an erecting shop and all necessary roads in connection therewith. A new carriage-shed is also shown, and a new store, tarpaulin store, and permanent-way workshops.

On looking over this plan it is abundantly clear that the yard is much too small for the future of the locomotive department, as the proposed enlargement of the running-shed would only give accommodation for eight engines in addition to the old shed, which provides for sixteen, making twenty-four engines altogether. The total number of engines now on the Southern, Western, and Richmond Railways is 74, and as the number will soon be increased to 100 it is absolutely necessary that accommodation far exceeding that which can be given in the Redfern yard must be provided.

Plan No. 2 shows an arrangement for goods warehouses, sidings, &c., with the locomotive buildings removed, and the encroachment upon Prince Alfred Park shown on plan No. 1 abandoned. This arrangement would give the following accommodation for goods traffic:—

One shed, 400 feet x 103, with two outside platforms—one 450 feet x 15 feet—and a second one 200 feet x 20 feet.

Two goods sheds, each 350 feet x 48 feet.

One „ 300 feet x 117 feet.

One „ 350 feet x 50 feet, with two lines of way through for wool traffic.

There is also a small shunting engine-shed and carriage-shed, with all the necessary sidings complete.

A tarpaulin-shed, 200 feet x 40, and the permanent-way workshops are also provided for in this arrangement.

Plan No. 3. This plan shows an arrangement for the locomotive department only, including—

Engine-running shed, 350 x 128 feet, to hold 56 engines.

Shed for tenders, 300 x 40 feet.

Engine painting shop, 200 x 40 feet.

Carriage painting shop, 200 x 40 feet.

Carriage and waggon repairing shop, 220 x 68 feet.

Engine erecting shops, one 200 x 55 feet, and a second shop, 340 x 55 feet.

Engine lifting shop, 150 x 55 feet.

Two machine shops, each 200 x 50 feet, with engine and boiler house between them.

Blacksmiths' shops, iron foundry, copper-smiths', brass foundry, and boiler shops, stores, &c.

There are also two coal stages, one 250 x 25, the other 200 x 25, with sheds for storing wheels, offices, &c.

The goods arrangement shown on plan No. 2 will not all be required for many years; but I am satisfied they will eventually be demanded by the great increase in traffic which will take place on the completion of the different extensions South and West; and the proposal now made will, I think, be sufficiently extensive for many years.

Additional land must be had near to Sydney, even should the locomotive shops not be immediately removed, as it is only a question of time when the Government must have sufficient accommodation for building all rolling stock required for the railways, engines, carriages, and waggons.

The cost of carrying out this proposal will, no doubt, be great, but it must be done; if not now, in the course of a very few years, and the cost will be considerably increased by delay.

The land alone will not cost less than £30,000, and the new buildings, tunnel, sidings, &c., will cost about £170,000. This expenditure might extend over several years, as a portion of the buildings only will be at once required, and the additions can be made as they are demanded by the traffic.—JOHN WHITTON.

It will be seen from a minute dated 31st May, 1877 (attached hereto), that the Engineer-in-Chief strongly recommends that the proposal made by him to remove the workshops to the land belonging to Mrs. Chisholm, a short distance from the present Redfern station, be carried out; and the Engineer for Existing Lines in his report of 21st May, 1877 (also attached hereto), also considers this site the most suitable.

6.—DUCK RIVER.

The following printed return shows what has taken place up to 4th January, 1877, subsequent minutes thereon are appended to the printed matter—both the Engineer-in-Chief and the Engineer for Existing Lines strongly disapprove of Duck River as a site for workshops.

7.—P. N. RUSSELL & Co.'s OFFER TO SELL OR LEASE THEIR PROPERTY IN BARKER-STREET, SYDNEY.

On the 9th December, 1875, Messrs. P. N. Russell & Co. addressed a letter to the Government, offering to sell their freehold property, with the whole of the plant and machinery thereon, for £50,000, or £3,000 per annum if let on lease for seven or ten years.

They state that the property has a water frontage to Darling Harbour of 320 feet, and is only about 200 yards distant from the rails of Darling Harbour Railway. It consists of their iron and brass foundries, engineering or fitting and blacksmith's shops, and the large shop recently constructed by them for the manufacture of railway rolling stock. They also include in their offer all patterns, drawings, plans, templates, &c.

On the 13th April, 1876, Mr. Secretary Lackey asked the Engineer-in-Chief for his opinion on this offer, and Mr. Whitton reported as follows:—

* * * * *

"The price asked for the land, machinery, and buildings does not appear to me excessive, though I have had no opportunity of inspecting either the machinery or buildings; but I am informed they are in good order.

"I think it would be possible, in the event of the Government purchasing this property, to connect the works with the Darling Harbour sidings; but I have not had my attention particularly directed to this matter. If it be resolved to take the works, it might probably be advisable, in the first instance, to lease the property for five years, with the right of purchase at the present price at the end of that time. This would give sufficient time to fully try the experiment of the manufacture of rolling stock by the Government.

* * * * *

"I may mention that the purchase of this property will in no way supersede or change my proposal for the removal of the locomotive shops from the Redfern terminus."

The Engineer-in-Chief having, on the 21st April following, called the Commissioner's special attention to the want of increased accommodation at Redfern, the Commissioner wrote as follows:—

"I can do no more than urge on the Minister the necessity for an immediate settlement of this question. If a lease of the premises offered by Messrs. P. N. Russell & Co. were taken for one or a series of years, with the option of purchase, we could relieve the locomotive shops, and at once commence the manufacture of passenger carriages and other stock so much wanted.—J.R., 27/4/76."

On the 27th November, 1876, Messrs. Russell again wrote (having never received any reply to their first letter), and offered the property in a different form, viz., to lease it for three to seven years, instead of seven to ten years, giving the Government the option of purchasing the plant at the end of the lease, at a valuation.

The matter was referred to Cabinet by Mr. Alex. Stuart, on 1st December, 1876; but nothing appears to have been decided, as the papers are marked "For our successors.—JOHN ROBERTSON, 21/3/77."

On the 10th May following, Messrs. Russell asked for an interview with Mr. Secretary Hoskins. They saw Mr. Hoskins on the 30th of May, and were informed by him that he declined to entertain their offer at present.

On the 20th February, 1878, Messrs. Russell wrote to Mr. Secretary Sutherland, asking for an interview respecting their offer. There is nothing on the papers to show that an interview took place, although they were informed that Mr. Sutherland would see them on the 8th of March. However, on the 14th March a letter was sent to them by direction of the Minister, informing them that he would consider the matter, and lay it before the Cabinet for their decision.

This completes the whole of the transactions as regards the sites for new workshops, and has been compiled in accordance with the Minister's and Commissioner's instructions of July last.

D. VERNON, 23/9/78.

Continue this to show the action taken by Mr. Sutherland in regard to the premises offered by P. N. Russell & Co.—CH. A. G., 6/1/79. Continuation attached.

Précis continued.

On the 2nd July, 1878, a further communication in reference to Messrs. P. N. Russell & Co.'s premises at Darling Harbour was addressed to the Minister by Mr. W. Pritchard, who stated that the property had been placed in his hands for lease or sale, and that he again offered it to the Government.

Mr. Sutherland ordered the Engineer for Existing Lines to make a careful inspection of the whole of the premises, plant, machinery, &c., and submit an inventory of same, together with a report as to their value at that time, and whether they were calculated to meet the necessities of the increasing business of the railways.

The report of the Engineer for Existing Lines was received in September last. His valuation of the property is as follows:—

Land	£24,143
Buildings, shops, sheds, &c.	10,255
Machinery, tools, stores, &c.	15,054
Miscellaneous items	200
Total value	£49,652

He reports that the premises could not be availed of for the purposes for which additional accommodation is needed, owing to their form being unsuitable and their position too isolated from the railway, communication being interrupted by valuable waterside property which could not be purchased except at great cost; and that the plant and machinery being chiefly adapted for marine and general work very little of it could be utilized for railway shops.

In a minute dated 11/11/78, Mr. Sutherland writes that the price asked by Messrs. P. N. Russell & Co., would appear from the Engineer of Existing Lines' valuation to be a reasonable one, but that having before him the objections set forth in Mr. Mason's report, he must decide to abandon the proposal to purchase this otherwise very valuable property, and directed that Mr. Pritchard be so informed, which was done.

G.B., 6/1/79.

Subsequently

Subsequently to the date of this *précis* applications were received from several inland towns to have the workshops erected in their respective localities, viz., No. 1, from Bathurst, presented by a deputation which interviewed the Minister on the 24th October, 1878, No. 2, from Blayney, presented by a deputation on 31st October, 1878, No. 3, from Orange, presented by a deputation on 6th November, 1878, No. 4, from Murrurundi, on 19th June, 1879, and No. 5, from Dubbo, on 1st September, 1879.

No. 15.

T. R. Smith, Esq., M.P., to The Secretary for Public Works.

Dear Sir,

675, George-street, 6 March, 1879.

There was granted last year the sum of £7,000 for workshops for Penrith and other places. I find that very little, if any, of this money has been laid out in Penrith. I was at Penrith last week, and my attention was drawn to several engines being out in the rain with men cleaning them. These men are compelled to work out in the rain all night cleaning these engines, as there is only room in the engine-shed for, I think, four engines, and there are at Penrith mostly from eight to twelve. Hoping you will have placed on Supplementary Estimates a sum of money to carry out these works,

Yours, &c.,

T. R. SMITH.

Mr. Mason,—B.C., 7/3/79.—C.R.A.G. The accommodation required at Penrith in additional shops, &c., is a matter for Mr. Burnett's consideration.—W.M., 10/3/79. Commissioner. Where is paper authorizing amount to be placed on Estimates?—C.R.A.G., 17/3/79. The amount on Estimates was £10,000, not £7,000. It was placed on Engineer for Existing Lines' Estimates, but there were no papers.—G.B. The following are the items voted on the Estimates:—Extension of present machine shops and engine-sheds, Sydney, £5,000; additional engine-sheds and machine shops at Penrith, Bathurst, and Goulburn, £10,000; and the amount is now available. Mr. Burnett should consider, and report on the best means of appropriating the amount in the most effective manner. He will deal with the question, no doubt, in connection with the wider one already referred to him on the subject of railway workshop accommodation generally.—C.R.A.G., 21/3/79. Locomotive Engineer,—B.C., 22/3/79.—G.B. See report on workshops.—R.H.B., 30/5/79. Commissioner.

No. 16.

Minute of The Commissioner.

Subject: Railway Workshops.

THE question of the most suitable site for the railway workshops is under the consideration of the Government.

Accompanying this are the papers on the subject.

The Locomotive Engineer, who is charged with the administration of this branch of the department, is necessarily from his position largely interested in the question, and will probably be able to offer some suggestions which may assist the Government in arriving at a decision.

The papers are forwarded to him for this purpose.

C.R.A.G., B.C., 17/3/79.

This matter should be viewed not only as regards the present, but the future requirements of the department, and Mr. Burnett's attention is drawn to the railway map attached to Railway Report of 1877, indicating the probable direction the further extension of the railways will take.—C.R.A.G., 17/3/79. Report herewith.—R.H.B., 30/5/79. Commissioner.

No. 17.

Minute from The Locomotive Engineer to The Commissioner.

Department of Public Works, Railway Branch,

Locomotive Engineer's Office, Sydney, 24 May, 1879.

Subject: Workshops and Running-sheds.

HAVING given careful consideration to the question of the site for the railway workshops, as disclosed in the previous papers on the subject, accompanying the Commissioner's M.P. 79-4, 134, and having inspected the various places which have been proposed from time to time, as well as those which appear at all suitable for the purpose, I have now the honor to submit the following report:—

The general considerations which may be regarded as governing this important question may be briefly stated as follows:—

- (1.) That the site selected shall be as near as possible to the point of delivery of the heavy material used in the manufacture and repair of the rolling stock and plant.
- (2.) That it shall be as near as possible to the natural centre of labour.
- (3.) That it shall be in a central position, and readily accessible from each of the three trunk-lines of railway, in view of their being ultimately connected.
- (4.) That it shall be as nearly level as possible, and on the same level with the railway lines.
- (5.) That it shall be wholly on one side or other of the railway.
- (6.) That it shall be capable, if possible, of being connected with the main line at both ends or at any intermediate point.
- (7.) That it shall be of sufficient extent to enable the machinery and plant to be laid out, not only for present requirements, but with sufficient margin of space to meet any probable future extensions; and
- (8.) That it shall have a sufficient supply of good water.

In the above list the question of the price of the land has been excluded, being, as seems to me, a matter of secondary consideration: because under all, but very exceptional, circumstances, it cannot amount to a vital element, when the much larger cost of buildings and machinery is taken into account.

An examination of the position of the main workshops of the English railways (particulars of which are given in the Appendix B) will illustrate this, and show the importance attaching to the first two of the foregoing considerations, viz., (1) the facility of delivery of the heavy materials used, and (2) proximity to the centre of skilled labour.

From

From the particulars given in the Appendix it will be seen that, except in the several instances where the site of the workshops has been determined by the pre-existence of centres of iron manufactures and of skilled labour away from the principal terminus, they have been fixed, in the immediate vicinity of the metropolis, or principal town of the district served, notwithstanding that the cost of land must have been, as a matter of course, much greater there than if the site had been selected by reference to that consideration alone.

In dealing with the case of the New South Wales railways, now under consideration, the question arises whether there is any certainty, or reasonable probability, of manufacturing industries being established at any point on the railway system which would justify the placing of the workshops there in preference to Sydney.

In the immediate future, at all events, the port of Sydney must continue to be, as it has been in the past, the point of supply of the great bulk of the heavy material used in the locomotive branches, and I am not aware that it can be determined with any degree of certainty what point on the railway will become in the future a great manufacturing centre, able, with the present scale of wages in the Colony, to compete on equal terms with the markets of Europe or America, for which the port of Sydney will always be the natural and most suitable place of delivery.

In any case the matter is, as it seems to me, too uncertain at present to warrant the placing of the workshops (which will, with the growth of traffic and extensions, eventually involve an expenditure of probably little short of a quarter of a million sterling), in any one or other of the three mineral districts of the Northern, Southern or Western lines, in preference to the Sydney district.

The various places which have been suggested at different times as affording suitable sites are as follows:—

- (1.) Picton, 53 miles from Sydney,
- (2.) Penrith, 34 miles from Sydney,
- (3.) Liverpool, 22 miles from Sydney,
- (4.) South-east of the Southern line, between the railway and the Dog-trap Road, about 14 miles from Sydney,
- (5.) East of the Duck River, near Parramatta Junction, 12 miles from Sydney,
- (6.) Chisholm's property, on the north side of the line, 1 mile from the Redfern terminus, and,
- (7.) Barker-street, Sydney, the property of Messrs. P. N. Russell & Co.

1. Picton is, in my opinion, quite unsuitable. It is too far from Sydney, is on a single line, and from the very limited extent of level ground could not be made available.

2. Penrith is likewise too far from Sydney, and is on a single line.

3. Liverpool is likewise unsuitable, being too far from Sydney, and is on a single line.

4. The land near the Dog-trap Road would be suitable as regards its extent, its evenness, and the levelness of the line which passes it, provided a proper water supply could be obtained. Its proximity to Parramatta Junction would enable double lines to be continued up to it without great expense, but its distance (viz., 14 miles) from Sydney renders it unsuitable.

5. The site near the Duck River is unsuitable for the reasons given in the report of Engineer-in-Chief, dated 31st May, 1877, and in that of the Engineer for Existing Lines, dated 21st May, 1877, and because of its distance from Sydney.

6. Chisholm's property possesses in a marked degree the requisite features, and if about 30 acres in addition to that embraced in the plan No. 3, accompanying the report of the Engineer-in-Chief, could be secured on the same side of the line no better place on the railway could be selected; but I believe the great increase in the value of the property which has taken place in the long interval since it was originally recommended by the Engineer-in-Chief may stand in the way of its being made available for the purpose.

7. Barker-street, Sydney, is not available for the reason given in the report of the Engineer for Existing Lines, dated 9th September, 1878.

The site which I believe will be found most suitable, if Chisholm's property proves not available, is

- (1) On the north side of the line, about $2\frac{1}{2}$ miles from Sydney, near the Stanmore platform.

Failing this, there are several others more or less suitable near Sydney, viz.:—

- (2.) On the north side of the line, about $4\frac{1}{2}$ miles from Sydney.
- (3.) On the north side of the line, about 7 miles from Sydney, near the Redmyre station; or,
- (4.) In the vicinity of the Homebush station.

Of these four sites, the one near the Stanmore platform will be found, I think, by far the most suitable; but as this can only be determined by making an accurate survey of the ground, I would recommend that it, as well as the other three sites named, be at once surveyed, and the water supply proved, so that their relative suitability may be correctly determined.

By fixing the site for the workshops as near to Sydney as possible, the following important advantage would be gained, viz.: that it would admit of its embracing the running-shed for the Sydney district, which, on account of the large number of engines stationed there, must always be a specially important one, as it must provide for the accommodation of all the engines required in working the suburban traffic, as well as those required for the through trains which start and terminate in Sydney, and which in a couple of years will number about 75 engines in use daily, of which 50 will leave and return in steam each day and which, with the extension of the proposed suburban lines, will be from time to time largely increased.

It is important that this large establishment should be on the same site with the workshops, so as to admit of its being placed under the direct supervision of one and the same head.

By placing both within the Sydney suburban district the advantage of proper supervision would be secured, while at the same time the engines of that district would be enabled to go to shed at night, and start therefrom in the morning, with the least amount of "empty" running.

If on the other hand, the workshops were placed 12 or 14 miles from Sydney, either a distinct and separate running-shed would have to be erected in the vicinity of Sydney, or the Sydney engines would have to run a large amount of extra "empty" mileage, amounting (according to the position selected) to between 200,000 and 250,000 miles per annum.

Any site beyond the suburban district is therefore not admissible, except in the event of suitable land nearer Sydney being unavailable.

The

The area that should be secured for the purpose of the workshops and sheds should not be less than from 50 to 60 acres, or even more. Although only a portion will be utilized at first, the advantage of securing the means of unlimited extension cannot be overated, and even as an investment it is advisable, as it will at any time well repay the interest on the purchase money by the re-sale of any surplus land, on account of the increase in its value which the building of the workshops in the locality will create.

The proposed scheme for supplying Sydney with water from the Nepean would, if carried out, afford an abundant supply to the workshops and running-sheds, in the event of any deficiency being found at any of the sites recommended.

NEWCASTLE.

The present isolation of the Northern lines from those of the South and West renders it necessary that the requirements of Newcastle, in respect to workshop appliances, should be considered in connection with this subject.

As it will doubtless be several years at least before the Northern and Southern lines are connected by railway, and as the present workshops and plant at Honeysuckle Point are quite inadequate to maintain the rolling stock in an efficient manner and at reasonable cost, I recommend that the shops and running-sheds there be at once remodelled, and made adequate to accommodate and repair all the engines and stock required to work that system up to the date at which railway connection shall have been made between it and the Southern lines.

After that date it will probably be best to confine to the Sydney workshops any subsequent additions necessary for carrying on the work; but I would recommend that there be no delay in providing at once at Newcastle whatever is necessary in the meantime to properly work the line, because, even after that connection shall have been made, the shops and plants at Newcastle can, with advantage, be kept fully at work on the lighter repairs, which would otherwise have to be sent to Sydney, by which the cost of transit will be avoided.

The site available at Honeysuckle Point is sufficient to enable suitable shops and shed-room to be provided, without any additional outlay for land.

LOCOMOTIVE DEPÔTS.

In addition to the main repairing and running sheds at Sydney, and those just referred to for Newcastle, suitable accommodation and appliances should be provided without delay at the various locomotive depôts, to enable the work to be conducted economically.

I append a Statement, A, showing the nature and probable extent of the accommodation required for efficiently maintaining and working the locomotive department.

To enable the arrangement of buildings, sidings, &c., to be determined in the way best calculated to secure economy in construction and working, it is recommended that the land available at each of the stations in the list should be surveyed, and plans thereof prepared as early as possible.

The accommodation named in the attached statement is what I estimate to be sufficient to meet the requirements of the traffic during the next four or five years, and which will doubtless be sufficient at several of the stations for many years to come. Care should, however, be taken in laying out the sheds and shops to place them so that any subsequent extensions can be made without alteration of the then existing buildings.

The sheds and sidings required by the traffic department for the accommodation of the carriages and other stock in their charge at the various stations, together with the goods-shed and station accommodation, might with advantage be considered and plotted on the said plans, so that in laying out the locomotive sheds and sidings the requirements of the traffic department may be kept in view, and thus the best and most convenient arrangement of buildings and sidings for carrying on the service, taken as a whole, may be secured.

Although increased accommodation is urgently required at the whole of the depôts named in the accompanying list it is of vital importance that it should be provided without delay at Goulburn, Picton, Penrith, Lithgow, Bathurst, and Singleton, as well as at the more important depôts of Sydney and Newcastle.

The £10,000 already voted for sheds at Penrith, Bathurst, and Goulburn will enable a start to be made at these stations as soon as the necessary plans are prepared.

The providing of accommodation for the workmen employed at outlying stations where houses are not available is deserving of careful consideration as a means of promoting the economy and efficiency of the Service.

In conclusion, I cannot too strongly urge the necessity for early action being taken in this matter, as the present buildings and appliances are quite inadequate to meet the requirements of the railways.

ROBT. H. BURNETT.

This had better be brought up again in, say, a fortnight, when I will submit to Cabinet.—J.L., 18/6/79. Re-submit end of month. Re-submitted.—4/7/79.

No. 18.

Messrs. Hardie & Gorman to The Colonial Secretary.

Sir,

Bell's Chambers, 175, Pitt-street, Sydney, 3 October, 1879.

Adverting to our interview some time since, and also to a representation made to us on account of the Government by Mr. A. H. McCulloch, M.P., we have now the pleasure to submit herein a tracing of the Chisholm Estate at Redfern, containing an area of 62 acres 35 perches of land, on both sides of the railway land, between Eveleigh and Macdonald Town stations.

As you are aware this property is in our hands for sale, and understanding that the Government would entertain the purchase of the whole estate at a fair price, we now beg to submit and place under offer this estate to the Government for the sum of (£100,000) one hundred thousand pounds cash, or a little over sixteen hundred pounds (£1,600) per acre for the land; this offer to remain open for a period of (21) twenty-one days.

In

See 79-9,046, memo. to Engineer for Existing Lines to furnish Mr. Burnett with plans and designs of new buildings already authorized to be carried out at Honeysuckle Point for workshops. Ch.A.G., 4/6/79.

Memo. sent to Mr. Mason to have these surveys put in hand and plans prepared as soon as possible. Ch.A.G., 5/6/79.

13

In submitting this property to the Government, permit us to say that it was with difficulty we secured the consent of our clients to this course, they (as gentlemen of means) rather preferring to take the full advantages by subdividing the property, on our showing of between £2,500 to £3,000 per acre. We may also remark that notwithstanding overtures being made us by speculators for the purchase of the property, no price has been named to anyone excepting the price named to the Government.

We should not have troubled you by submitting the purchase for your consideration, had it not been for the overtures made to us as we understand for the Government, and perhaps we may be forgiven for proffering the remark that the Government would act wisely for purchasing this property previous to further action being taken, which no doubt would enhance considerably its value.

Our clients had always expected a sum equal to £2,000 per acre cash for the land, and it was only by careful showing that we could secure their approval and consent to offer only to the Government at the price hereinbefore named, viz., a little over £1,600 per acre.

As our course is shaped for other action in the event of the Government not purchasing, and further, as this offer is open for twenty-one days, allow us to press for your early consideration and reply.

We have, &c.,
HARDIE & GORMAN.

No. 19.

The Principal Under Secretary to Messrs. Hardie & Gorman.

Gentlemen, Colonial Secretary's Office, Sydney, 10 October, 1879.

I have the honor, by direction of the Colonial Secretary, to acknowledge the due receipt of your letter of the 3rd instant, placing under offer to the Government for a period of twenty-one days the Chisholm Estate at Redfern, containing 62 acres 35 perches, for the sum of £100,000. 21 days.
62a. Or. 35p.
£100,000.

The Colonial Secretary has instituted such inquiries as it was his duty to make as to the value of this property in a transaction transferring the whole for cash without trouble or loss of time to the vendors, and the result of his inquiries does not reach the price you have asked.

I am, however, directed to say that the Government is prepared to purchase the property at £90,000, £90,000. the money to be paid as soon as your clients can complete the conveyance.

I have, &c.,
CRITCHETT WALKER.

No. 20.

Messrs. Hardie & Gorman to The Colonial Secretary.

Sir, Bell's Chambers, 175, Pitt-street, Sydney, 21 October, 1879.
"Calder House Estate, Redfern."

Replying to Mr. Walker's letter of the 10th instant, offering us £90,000 cash for this property, we have now the honor to state that after submitting this offer to our clients (who write us that they have carefully considered it), we are instructed in reply to decline with thanks the offer of £90,000, and further to say the lowest cash price for the whole property of over 62 acres is £100,000 (one hundred thousand pounds sterling). At this price our clients instruct us to ask the Government to reconsider their offer, and to give fourteen days for further deliberation.

We are also justified in saying that when the estate was offered to the Government at £100,000 our clients affixed the very lowest price they were prepared to accept, and which on our showing appeared to them to be a fair price for the estate if sold in "one line," either to the Government or speculators.

Awaiting an early reply.

We have, &c.,
HARDIE & GORMAN.

No. 21.

The Principal Under Secretary to Messrs. Hardie & Gorman.

Gentlemen, Colonial Secretary's Office, Sydney, 31 October, 1879.

I am directed by the Colonial Secretary to say that your letter of the 21st instant, declining to accept the offer of £90,000 for the Chisholm property at Redfern, and placing the said property under offer for fourteen days at £100,000 as the lowest price, has been under the consideration of the Government. £90,000.
£100,000

2. I am to inform you that the Colonial Secretary, on behalf of the Government, agrees to purchase the property as first submitted by you for the sum of £100,000, and that the Crown Solicitor will be instructed to act for the Government in completing the purchase. £100,000.

I have, &c.,
CRITCHETT WALKER.

No. 22.

Messrs. Hardie & Gorman to The Colonial Secretary.

Sir, Bell's Chambers, 175, Pitt-street, Sydney, 31 October, 1879.

We have the honor to acknowledge receipt of Mr. Walker's letter of even date, agreeing to purchase "The Chisholms' Estate, Redfern," for the sum of one hundred thousand pounds (£100,000) cash sterling.

Messrs. Norton and Smith will act as attorneys for our clients.

We have, &c.,
HARDIE & GORMAN.

Minute by the Colonial Secretary.

The Crown Solicitor will take the necessary steps to complete purchase.—H.P., 3/11/79.

The Crown Solicitor, B.C., 3rd November, 1879.—C.W.

Received, 4 November, 1879.—J.W.

APPENDIX A.

Appendix to the Locomotive Engineer's Report on Workshops and Running-sheds, referred to in M.P. 79/2,239.

Running-sheds, &c., required at the various Locomotive Depôts.

SOUTHERN LINES.

Pielon.—Running-sheds to accommodate 6 engines, with water columns and washing-out appliances. At present there is accommodation for only 4 engines, but no water or appliances for washing out the engines.

Mittagong.—Water tanks and columns, for supplying engines with heavy trains. It is specially important that a water supply at this station should be provided without delay (or the Bargo supply increased), because, at present, the engines are wholly dependent on Bargo, where there is only one pump and tank. If anything happened to the Bargo pump, the traffic of the Southern line would be seriously interfered with.

Goulburn.—Running-sheds to accommodate 12 engines, with a suitable workshop and tools to do the principal portion of the lighter repairs of the Southern lines, which are not worth sending to Sydney. At present there is shed accommodation for only 4 engines.

Yass.—Enlarged water supply.

Murrumburrah.—Running-shed accommodation for 6 engines, with water supply and washing-out appliances, with turn-table and enlarged coal stage, &c. At present there is no accommodation for engines.

Wagga Wagga.—Running-shed accommodation for 10 engines, with washing-out appliances, &c. At present there is shed accommodation at North Wagga Wagga for 4 engines.

Albury.—Running-shed accommodation for 8 engines, with water columns, coal stages, and washing-out appliances.

WESTERN LINES.

Penrith.—Running-shed accommodation for 12 engines, with a small tool-shop for light repairs, and enlarged turn-table for the American engines, which have now to be run tender first, as the present tables are too short. At present there is shed accommodation for 6 engines.

Wentworth Falls.—Water-tank and pumps, &c. The supplying of water here is required to relieve Blue Mountain, where the supply is often too precarious to be relied on.

Lithgow.—Running-shed accommodation for 6 engines, with water columns, coal stages, and washing-out appliances, together with enlarged turn-table for the American engines. At present there is no accommodation.

Bathurst.—Running-shed accommodation for 8 engines, with workshop and tools to do the principal portion of the lighter repairs of the Western lines which are not worth sending to Sydney. At present there is shed accommodation for 4 engines.

Orange.—Running-shed accommodation for 4 engines, with water columns, coal-stage, and washing-out appliances. At present there is no shed accommodation.

Dubbo.—Running-shed accommodation for 6 engines, with water columns, coal-stage, and washing-out appliances.

NORTHERN LINES.

Singleton.—Running-shed accommodation for 10 engines. At present there is shed accommodation for 4 engines.

Gunnedah.—Running-shed accommodation for 4 engines, with water columns, coal-stage, and washing-out appliances.

Tamworth.—The present running-shed is sufficiently large for the present traffic, but will doubtless have to be increased when the line is extended to Armidale, as it will then be the base from which a very heavy portion of railway will be worked. The exact accommodation that will then be required can be, however, best determined at a later period, as also the running-shed accommodation, &c., required at Armidale and the intermediate stations. It is, however, very desirable that suitable accommodation should be provided for the drivers and firemen of the engines that rest all night at Tamworth, and who, from not being permanently stationed there, are without houses in the district.—R.H.B.

APPENDIX B.

Appendix to Locomotive Engineer's Report on Workshops and Running-sheds, referred to in M.P. 79/2,239.

In considering the position of the main workshops of the English railways, relatively to that of the principal terminus of the railways to which they severally belong, they may be divided into two distinct groups, viz., those north of London, and those in the metropolitan district, and to the south of it.

Of those north of London there are four main trunk lines, which have their principal terminus in London. Of these four lines three of them, viz., the North-western, the Midland, and the Great Northern, run through mineral districts, which, in the earlier history of these railways, were already, as they are now, centres of great manufacturing industries and population. In the case of these three lines the main workshops have therefore been located away from the principal terminus, London, and are at Crewe, Derby, and Retford, respectively.

But in the case of the fourth line (the Great Eastern), whose main line and branches lie in a non-mineral and non-manufacturing district, the principal workshops are situated in the suburbs of London.

Having no centres of manufacture or of skilled labour within its territory, apart from the metropolis, to determine the position of the workshops, they have been situated in the London district as being, for it, the principal seat of labour, and the one most accessible for the materials used.

With respect to the Southern lines, owing to the districts they serve being almost purely agricultural, and therefore without centres of manufactures or of skilled labour, distinct from that of the metropolis itself, the position of the railway shops has been determined, in the case of these Southern lines, by the same considerations as in the case of the Great Eastern. In the majority of cases (as, for instance, in that of the London and South-western, the London, Chatham, and Dover, and other lines) the workshops are actually within the suburbs of the metropolis itself. The chief exception to this rule is in the case of the Great Western Railway, whose principal workshops are at Swindon, in Wiltshire, that position being more accessible than London to the centres of skilled labour, and the iron manufactures of South Wales and Shropshire; but even in its case there is a large branch repairing and running establishment in the immediate vicinity of the London terminus at Paddington.

In the case of the two important lines in the north of England, which do not extend to London, but which have their principal terminus in Manchester, viz., the Lancashire and Yorkshire, and the Manchester, Sheffield, and Lincolnshire. The workshops of the former are situated within the city of Manchester, and those of the latter within a couple of miles of it. Again in the case of the only other important trunk line in England, viz., the North-eastern, the principal workshops are situated in Gateshead, which is, in fact, part and parcel of the capital town of that district, viz., Newcastle-upon-Tyne.

From the foregoing it will be seen, as has been stated in the body of the report, that, except in the several instances where the site for the workshops has been determined by the pre-existence of centres of iron manufactures and of skilled labour away from the principal terminus, they have been fixed in the immediate vicinity of the metropolis, or principal town of the district served, notwithstanding that the cost of land must have been, as a matter of course, much greater there than if the site had been selected by reference to that consideration alone.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

RAILWAYS.

(SPRINGS FOR ENGINES AND CARRIAGES.)

Ordered by the Legislative Assembly to be printed, 25 November, 1879.

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated the 18th February, 1879, That there be laid upon the Table of this House,—

“Copies of all Correspondence between the Government, the Agent General, and others, respecting the Tenders of Osborn & Co., and others, manufacturers for springs for railway engines and carriages.”

(Captain Onslow.)

SCHEDULE.

NO.	PAGE.
1. Letter from M'Brair & Co. to Commissioner for Railways, asking that Messrs. Osborn's name may be inserted in list of tenderers. 5 June, 1877	2
2. Letter from Commissioner to M'Brair & Co.—their request of 5 June, 1877, acceded to. 23 June, 1877	2
3. Letter from Secretary for Public Works to Agent-General, informing him of above circumstance. 25 June, 1877...	2
4. Letter from M'Brair & Co. to Commissioner, acknowledging receipt of letter of 23 June, 1877. 27 June, 1877 ...	3
5. Letter from M'Brair & Co. to Commissioner, with extracts from letters of Messrs. Osborn's <i>re</i> quality of steel to be used in springs. November, 1877.....	3
6. Letter from Commissioner for Railways to Agent General, that Messrs. Osborn's proposal <i>re</i> specification for tenders be adopted. 20 December, 1877	4
7. Letter from Agent-General with reference to above letter and enclosing specification for springs. 15 March, 1878...	4
8. Minute of Secretary for Public Works, deciding that specifications are to be made on the basis of tests. 26 August, 1878	5
9. Letter from M'Brair & Co. to Commissioner, complaining that Messrs. Osborn were not asked to tender for springs. 31 July, 1878	5
10. Letter from Commissioner for Railways to M'Brair & Co., informing them that inquiry will be made. 12 August, 1878	6
11. Letter from Secretary for Public Works to Agent General inquiry respecting report made by Messrs. M'Brair & Co. 29 August, 1878	6
12. Letter from Agent General to Secretary for Public Works, forwarding letter from Mr. Fowler, respecting foregoing letter, and also to the proposed specification for tenders. 20 December, 1878	6
13. Minute of Commissioner—that Agent General's letter be forwarded to Mr. Mason. 6 February, 1879	8
14. Mr. Mason's report. 12 February, 1879	8
15. Letter from M'Brair & Co. to Commissioner, complaining that all tenders from Messrs. Osborn had been refused by Agent General. 11 February, 1879	10
16. Minute of Mr. Mason—that springs be tested here. 14 February, 1879	10
17. Letter from Mr. Selfe to Commissioner, respecting the testing of springs. 21 July, 1879	10
18. Letter from Commissioner to Mr. Selfe, instructing him to test the springs. 22 July, 1879	11
19. Minute of Commissioner, asking for particulars of indent of springs. 28 July, 1879	11
20. Letter from Mr. Selfe to Commissioner, forwarding result of test. 15 August, 1879	11
21. Letter from Secretary to Agent General—to call upon Inspecting Engineer for explanation why he approved of springs. 29 August, 1879.....	12

For exhibit only.

One drawing, showing result of tests.

RAILWAYS.

No. 1.

Messrs. M'Brair & Co. to The Commissioner.

Sir, 70, King-street, Sydney, 5 June, 1877.

We, the undersigned, sole Agents for Messrs. Samuel Osborn & Co., Clyde Steel and Iron Works, Sheffield, who are manufacturers of railway springs, buffers, best cast-steels of all kinds, spring steel, &c., &c., have the honor to bring under your notice that Messrs. Samuel Osborn & Co. are desirous of supplying the New South Wales Government with their goods.

The following is an extract from their letter to us, dated Sheffield, 29 March, 1877, with reference to springs.

"Our present prices are as under, for cash payments, less 2½ %.

No. 2 springs	24/ per cwt.
No. 5 "	19/ "
No. 7 "	18/ "

Volutes, 4½d. per lb.

English spring steel, 3 × 1¼ and over 14/ per cwt., under 3 × 1¼ 15/6 per cwt., exclusive of any packing, but d/d Liverpool. We have just received an order from the North British Railway Company for 100 buffing springs and for 1,000 bearing springs, and we know that both the Midland and Great Western Railway Companies consider our springs better than those of any other maker. We now make between 50 and 60 tons per week.

Mr. William Meikle, Esq., late Superintendent of the Victorian Railways, always indented for Messrs. Samuel Osborn & Co.'s steels, and said that we might use his name as a reference, and we should also be glad to refer you to the A.S.N. Company, Mort's Dry Dock and Engineering Company, Chapman & Co., Atlas Works Company, and many others using our steels, all of whom speak very favourably of it.

We have handed to the Secretary for Government Railways one of Messrs. Samuel Osborn & Co.'s illustrated lists of springs which the above numbers in our quotations refer to.

We beg respectfully to request that Messrs. Samuel Osborn & Co.'s name may be included with those who are called upon to tender; and if they will not have an opportunity of tendering for the springs lately ordered, we are willing to pay the expense of a telegram so that they may be enabled to do so.

We have, &c.,

LAWRENCE M'BRAIR & CO.

Mr. Mason.—J.R., 6/6/77. Seen.—W.M., 11/6/77. Commissioner. What reply is to be given? Applicant requests that the firm of Samuel Osborn & Co. may be added to the list of those firms which are asked to tender.—CH.A.G., 13/6/77. No objection.—J.R., 14/6/77. Inform, and also Agent General.—15/6/77. Messrs. Lawrence M'Brair & Co. and Agent General informed, 26/6/77.

No. 2.

The Commissioner to Messrs. M'Brair & Co.

Gentlemen, Department of Public Works, Railway Branch, Sydney, 23 June, 1877.

In acknowledging the receipt of your letter of the 5th inst., forwarding an illustrated list of railway carriage springs and buffers, from Messrs. S. Osborn & Co., Clyde Steel and Iron Works, Sheffield, and requesting that as this firm are desirous of introducing their goods into this Colony, their names may be added to the list of those firms which are asked to tender, I have the honor to inform you that we shall be glad to receive tenders from Messrs. S. Osborn & Co., when a further supply of springs and buffers are required, and the Agent General in London will be informed.

I have, &c.,

JOHN RAE,

Commissioner for Railways.

No. 3.

The Secretary for Public Works to The Agent General.

Sir, Department of Public Works, Railway Branch, Sydney, 25 June, 1877.

Messrs. Lawrence M'Brair & Co., agents in this Colony for Messrs. S. Osborn & Co., of the Clyde Steel and Iron Works, Sheffield, having brought under the notice of this Government the carriage springs and buffers manufactured by that firm, and expressed a hope that an opportunity may be afforded them of competing for future orders, I have the honor to state that Messrs. Lawrence M'Brair & Co. have been informed that we shall be glad to receive tenders from Messrs. Osborn & Co. when further carriage springs and buffers are required.

I have, &c.,

JAMES HOSKINS,

Secretary for Public Works.

No. 4.

3

No. 4.

Messrs. M'Brair & Co. to The Commissioner.

Sir,

70, King-street, Sydney, 27 June, 1877.

We have the honor to acknowledge receipt of yours dated 23rd instant, referring to permission having been granted to our friends Messrs. Samuel Osborn & Co., manufacturers, of Sheffield, to tender for supply of springs and buffers, and trust that they will have the pleasure of supplying your Government with them.

We have, &c.,

LAWRENCE, M'BRAIR, & CO.

No. 5.

Messrs. M'Brair & Co. to The Commissioner.

Sir,

70, King-street, Sydney, November, 1877.

We beg to call your kind attention to the accompanying letter which we lately received from Messrs. Samuel Osborn & Co., manufacturers, Sheffield, with regard to a specification and form of tender they received from the Agent General of New South Wales for a large quantity of railway springs for your Government; also a copy of letter dated 23rd August, 1877, from the same firm to the Agent General, in which they particularly draw the attention of that gentleman to the expensiveness of the brands of iron required to be used in making the steel as per his specification.

Our friends are desirous that the steel required for making the springs may be left to the manufacturer's judgment, allowing the test to which they may be subjected to be the guarantee of its quality; this would put the manufacturers on a fair footing with each other, and give you a much cheaper and better spring.

Praying that the above may have your esteemed consideration,—

We are, &c.,

LAWRENCE, M'BRAIR, & CO.

Mr. Mason.—J.R., 10/11/77. I see no advantage in this case of specifying the brands of steel to be used, provided that which may be used will stand the required test. If S. Osborn & Co. can supply them much cheaper, I think their springs ought to be tried.—W.M., 12/11/77. Ascertain their prices.—J.R., 14/11/77. They say that if allowed to exercise their judgment as to the steel to be used, their price would be 1½d. per lb. less.—C.H.A.G., 3/12/77. Inform Agent General of Mr. Mason's opinion.—J.R., 13/12/77. Agent General.—20/12/77.

[Enclosure 1 to No. 5.]

EXTRACT of letter from Messrs. Osborn & Co. to Messrs. M'Brair & Co., Sydney.

Dear Sirs,

Clyde Steel and Iron Works, Sheffield, 22 August, 1877.

We yesterday received from the Agent General for New South Wales specification and form of tender for a large lot of springs. We shall make up the tender to-morrow and send you a copy of our prices, &c., by Brindisi. We now however send you a copy of the specification for your information, and we will send by Brindisi a copy of the drawings. You will observe that crucible steel is specified, and that the mixture is also specified. We (as you know) think this very absurd and antiquated. In this instance the tests alone will secure the springs being made of good steel, for no inferior steel will stand these tests; but we can make steel much cheaper than the specified mixtures and quite as good.

If we faithfully adhere to this specification we do not anticipate receiving the order,—we feel quite certain that the brands of iron specified will not be used. It is notorious that specified brands are seldom or never used; this is well known to directors and engineers here, and we are happy to say the practice of specifying certain brands is being given up by some of the leading Railway Companies. The Midland Company abandoned it some time ago, and chiefly on account of representations we made to them. They now specify certain tests, leaving the manufacturer to find out the best and cheapest material; and this is the only way in which manufacturers can be put on an equal footing.

Besides, the rapid development of the steel trade latterly, and the application of steel to varied uses never previously thought of, has proved beyond question that cheap steels can now be used for many purposes (springs included) for which expensive brands were formerly employed, and with better results in every way.

We will write you again by Brindisi.

Yours, &c.,

SAML. OSBORN & CO.

[Enclosure 2 to No. 5.]

Messrs. Osborn & Co. to The Agent General.

Sir,

23 August, 1877.

In compliance with your esteemed invitation of the 20th instant, we now beg to enclose our tender for the supply of springs.

The tender has been made up strictly in accordance with the specification, and especially in regard to the brands of iron to be used in making the steel.

If our prices seem high, it is due to the expensiveness of the brands alluded to; and we take the liberty of saying that if the manufacture of the steel were left to our discretion, we would undertake to supply you with the whole of the springs you require at 1½d. per lb. (= £11 13s. 4d. per ton) less than the several prices quoted. We would further undertake that the springs should stand the tests specified, in every respect, as well as though the more costly materials had been used.

As we have not supplied you with any springs, we may mention that amongst our largest customers are the Great Western Railway Company (Loco. Dept., Swindon), and the Midland Railway (Carriage and Waggon Dept., Derby), and we have no doubt either of these Companies would give you their opinion of our goods. Besides these, we supply the North-eastern, Caledonian, and North British Companies, and all the leading carriage and waggon building firms.

We are anxious to obtain your orders; and assuring you of our careful attention to anything you may place in our hands,—

We are, &c.,

SAMUEL OSBORN & CO.

No. 6:

No. 6.

The Commissioner to The Agent General.

Sir, Department of Public Works, Railway Branch, Sydney, 20 December, 1877.

I have the honor to inform you that I am in receipt of a communication from the Sydney representatives of the firm of Samuel Osborn & Co., of the Clyde Steel and Iron Works, Sheffield, relative to a letter addressed to you by that firm respecting the quality of iron to be used in the manufacture of carriage and waggon springs required by this department, and pointing out that if not restricted to any special description of steel, that they would be enabled to considerably reduce the amount of their tender, and to state that the Engineer for Existing Lines reports that he sees no objection to allow Messrs. Osborn & Co. to exercise their judgment as to the steel to be used in making the springs, provided that it will stand the requisite test, and that if Messrs. Osborn & Co. can supply them at a cheaper rate, their springs might be tried.

I have, &c.,

JOHN SUTHERLAND,
Commissioner for Railways.

No. 7.

The Agent General to The Secretary for Public Works.

Sir, London, 3, Westminster Chambers, Victoria-street, S.W., 15 March, 1878.

In reply to your despatch of the 20th December last, No. 77-7554, relative to a communication which you had received from Messrs. Samuel Osborn & Co., respecting the quality of iron which they would propose to use in the manufacture of carriage and waggon springs, I have the honor to inform you in the first place, that even if, in the tender to which I believe Messrs. Osborn refer, they had been permitted to depart (as they suggest) from the specification (a copy of which I enclose), they would not have taken the order at the price under the specification of the firm to whom the order was given. Messrs T. Turton & Sons was lower than that quoted by Messrs. Osborn, on the conditions that they should exercise their discretion in the manufacture of the steel.

But apart from this consideration, I venture to urge that the dependence on tests only, independently of specified quality of material, may often be misleading, as it may fail to ensure the essential element of durability, which cannot as a rule be ensured by test only, and which therefore to a great degree depends on carefully prescribed and selected quality of material. In confirmation of these views, which have a general application as well as a special reference to the matter in question, I have the honor to refer you to the annexed copy of a letter on the subject from Mr. Fowler, C.E., with the terms of which I entirely agree.

I have, &c.,

WILLIAM FORSTER.

The Under Secretary for Public Works, B.C., 27/4/78. Commissioner for Railways, B.C.,
30 April, 1878.—J.R. Mr. Mason, B.C., 6/5/78.—CH. A.G.

Seen. I am still of the same opinion as expressed in my memo. 12/11/77.—W.M., 8/5/78.
Commissioner.

[Enclosure 1 to No. 7.]

Captain Jopp to Mr. Fowler.

Dear Sir, 3, Westminster Chambers, S.W., 25 February, 1878.

I enclose herewith a copy of a letter dated Sydney, 20 December, 1877, from the Secretary for Public Works, relative to a letter addressed to the Agent General by Samuel Osborn & Co., respecting the quality of iron to be used in the manufacture of springs.

I send you all the papers in connection with the contract, F. 241d., for bearing and draw springs, in which the letter referred to appears, and I am directed by Mr. Forster to request that you will favour him with your opinion on the question now raised.

Yours faithfully,

A. A. JOPP, Captain R.E.,

Secretary.

[Enclosure 2 to No. 7.]

Mr. Fowler to The Agent General.

2, Queen's Square Place, Westminster, S.W., 28 February, 1878.

Sir, Quality of spring steel.

I beg to acknowledge receipt of your letter of the 25th instant, together with copy of communication from the Department of Public Works, Railway Branch, dated Sydney, 20 December, 1877.

With regard to Messrs. Osborn's letter accompanying their tender of August 23, 1877, I may observe that, though Messrs. Osborn & Co. are a most respectable firm and produce excellent work, I think it would not be the interest of the Government to carry out their suggestion.

In the manufacture of springs a great temptation is offered to use cheap materials, which, if not controlled, is often Bessemer steel; and it is by insisting that the best iron for the purpose shall be used that we insure the steel being of the quality required—this course is pursued by the Home Government, and in the Indian railways.

It is also necessary to place all the manufacturers on the same terms, which can only be done by defining the quality of iron from which the steel is to be made, modifying the specification as may be necessary when spring steel is required for special purposes.

Spring steel is a peculiar material, and second rate quality may be made to withstand tests of considerable severity, the difference in the lasting properties becoming manifest only in actual work. Great care is required under our specifications in maintaining the present high standard, and I am unable to concur

concur in the proposal of Messrs. Osborn & Co. to use any material they please in the manufacture. Similar proposals are frequently made by manufacturers. If it were conceded to Messrs. Osborn & Co. it must be conceded to all, and it would inevitably lead to the substitution of an inferior quality of springs.

I return herewith the documents.

I am, &c.,
JOHN FOWLER,
p. J. D. BALDRY.

[Enclosure 3 to No. 7.]

New South Wales Railways.—Specification for Carriage and Waggon Bearing Springs.

THE springs required under the specification are shown in the accompanying drawing.

The plates are to be made of crucible cast steel, produced from a mixture of half Low Moor iron and half Swedish charcoal bar iron, of the brands—

L arrow D, C B over AM conjoined in dotted circle, or harpoon in diamond.

The steel to be thoroughly and uniformly converted before being cast into ingots from small crucibles; the plates, when rolled, to be perfectly sound, and without flaws or defects of any kind whatever.

The whole of the iron in the bolts, clips, and buckles, to be of S. C. Crown or other brand, to be approved in writing by the Engineer.

The manufacturer must, when requested, produce the invoices of the various materials which are being used in the work, or any other documents required, to show that the steel is being made from the specified brands of iron.

The tests to be applied are as described under the different heads.

250 springs for four-wheel carriages, 5 feet 2 inch centres, 10 inch camber.

Each spring to be subjected, during a period of not less than 15 minutes, to such a load as shall bend it 18 inches in the centre from its present form, giving a reverse camber of 8 inches; when the weight is removed, the spring to return to its original form without any set.

20 springs for six-wheel carriages, 4 feet 10½ inches centres, 6½ inches camber.

To be bent as above, during the same period of time, a total amount of 16½ inches, giving a reverse camber of 10 inches without any set.

170 horse box, carriage truck, and centre break van springs, 3 feet 9½ inch centres, 6¼ inch camber.

To be bent as above a total amount of 11 inches, giving a reverse camber of 4¾ inches without set.

110 draw and buffer springs, 5 feet 4 inches outside, 1 foot 5 inches camber.

To be bent as above, a total amount of 17 inches, giving a slight reverse camber without set.

1,450 waggon and break van springs, 2 feet 9 inches centres, 6 inches camber.

To be bent as above, 6 inches, without set.

The tests to be made in the presence of the Inspector, who shall also subject the springs to any other reasonable test which he may be directed by the Engineer to apply, to insure the springs being of the highest quality for strength and endurance.

The ironwork of the springs to be neatly forged and fitted, and after inspection they must receive two coats of Ellam & Jones' anticorrosive paint, to protect them from injury during transit.

Each spring to have the letters N. S. W. G. stamped on the side of the buckle, together with the maker's name and year and month of manufacture.

The contract to be executed in every respect to the satisfaction of the Engineer, and the whole of the work, in its various stages, to be subject to his inspection or that of his assistants, the expense of the tests, &c., being borne by the manufacturer, who shall, when requested, furnish all labour and appliances to assist and afford every facility for testing; but, notwithstanding such tests and inspection, any springs may be rejected on delivery which are in his judgment defective in any respect; and if labour is required for turning over and examining the springs at the port of delivery, the manufacturer is to supply it.

If any questions arise as to the terms of this specification or compliance therewith, the decision of the Engineer is to be final and binding, the said Engineer being Mr. John Fowler, or the Consulting Engineer for the time being of the New South Wales Government.

No. 8.

Minute of Secretary for Public Works.

Seen.—J.S., 27/5/78.

Under Mr. Mason's opinion, I decide that the specifications for springs are for the future to be made on the basis of tests—without stipulation as to the material to be used.—J.S., 26/8/78.

No. 9.

Messrs. M'Brair & Co. to The Commissioner.

Sir,

70, King-street, Sydney, 31 July, 1878.

We beg to refer you to your letter of the 23rd June, 1877, M. R. No. 7443, which in you kindly accede to our request of the 5th June, 1877, asking that Messrs. Samuel Osborn & Co.'s name may be included with those who are called upon to tender for railway springs, buffers, &c.

Messrs.

Messrs. Samuel Osborn & Co. inform us that they were called upon to tender for the first order for springs after your favour above referred to, but there have been one or more orders given out by the Agent-General since for which they were not asked to tender, and they wish us to inquire the reason why they were left out.

We have, &c.,

M'BRAIR BROS. & CO.

Inform that inquiry will be made of the Agent General why they were not asked to tender.—
7/8/78.—CH. A. G. M'Brair & Co., 12/8/78; Agent General, 27/8/78.

No. 10.

The Commissioner to Messrs. M'Brair & Co.

Gentlemen,

Department of Public Works, Railway Branch, Sydney, 12 August, 1878.

Referring to your letter of the 31st ultimo, stating that Messrs. Samuel Osborn & Co., of Sheffield, to whom permission was granted to tender for railway springs, buffers, &c., have informed you that, although they were called upon to tender for the first order for springs, there have been one or more orders given out since by the Agent General for which they were not asked to tender, and requesting, on behalf of Messrs. Samuel Osborn & Co., to be informed why they were left out, I have the honor to inform you that inquiry will be made of the Agent General by the next outgoing mail why this firm was not asked to tender.

I have, &c.,

CHAS. A. GOODCHAP,

Commissioner for Railways.

No. 11.

The Secretary for Public Works to The Agent General.

Sir,

Department of Public Works, Railway Branch, Sydney, 29 August, 1878.

Adverting to my letter of the 25th June, 1877, informing you that there would be no objection to receive tenders from Messrs. Samuel Osborn & Co., of Sheffield, for the supply of carriage springs and buffers, and requesting you to add the name of that firm to the list of those firms which are asked to tender, I have the honor to inform you that Messrs. M'Brair Bros. & Co., who are the agents here for Messrs. S. Osborn & Co., state that they have been informed by the Messrs. Osborn that, although they were called upon to tender for the first order for springs, there have been one or more orders given out for which they were not asked to tender.

I have noted the contents of your letter of the 15th March last, as to the undesirability of departing, as proposed by this firm, from the principles of stipulating for the use of certain material in the construction of springs, and depending on tests to ascertain their value after manufacture.

I may state however, that the Engineer for Existing Lines still adheres to the opinion that it would be more economical to allow manufacturers to use their own processes (patented or otherwise), and that safety would be secured by the strict observance of the test, and I have therefore decided that for the future the specifications are to be made on this basis, and that the firm of Messrs. Osborn & Co. are not to be excluded from the privilege of tendering.

I have, &c.,

JOHN SUTHERLAND,

Secretary for Public Works.

No. 12.

The Agent General to The Secretary for Public Works.

Sir,

3, Westminster Chambers, Victoria-street S.W., 20 December, 1878.

I have the honor to request your consideration of the following suggestions with reference to the instructions contained in your letter No. 787842 of the 29th August last, relative to Messrs. Samuel Osborn & Co., and the supply of carriage and waggon springs.

Before doing so, however, I desire to state that since my receipt, on the 15th August, 1877, of your letter of the 25th June, 1877, informing me that you would be glad if tenders were received from Messrs. Osborn & Co. for carriage springs and buffers, I have on every subsequent occasion included Messrs. Osborn among the firms invited to tender for laminated springs. I also invited them, on one occasion, viz., on the 14th September, 1877, to tender for volute springs and buffers; but they then wrote to me, "We regret we are not in a position to tender for *volute* and *conical* springs; our plant is for the manufacture of *laminated* bearing and buffing springs"; and I have been guided by this intimation on all subsequent occasions. The statement of Messrs. Osborn & Co.'s Sydney agents, Messrs. M'Brair Brothers & Co., who you inform me have intimated to you that I have given out one or more orders for springs for which Messrs. Osborn & Co. have not been asked to tender, is therefore contrary to, and without foundation, in fact, unless it be intended to have reference to orders for which Messrs. Osborn & Co. have themselves informed me that they are not in a position to tender.

It may now be convenient that I should recapitulate the various proceedings throughout in connection with this matter, subsequently to my receipt, on the 15th August, 1877, of your first letters quoted above, of the 25th June, 1877. On my receipt of this letter I at once arranged, as above explained, to include for the future Messrs. Osborn & Co. with the manufacturers to be invited to tender for springs. On the first occasion on which I did so, Messrs. Osborn addressed to me a letter (dated 23rd August, 1877), suggesting that, in place of being compelled to use certain brands of iron prescribed in the specification upon which they were invited to tender, they should be allowed to use their discretion as to the brands to be used. To this proposition I did not accede. Messrs. Osborn's tender, on the specification as it originally stood (and also their alternative tender on the condition that they should use their discretion as to materials), was higher than that of a firm who adhered to the conditions of our specifications, and Messrs. Osborn therefore did not receive the order. My decision in this matter then

apparently

apparently formed the subject of a letter from Messrs. Osborne or their Sydney agents to you; for on the 18th February last I received from you a letter dated 20th December 1877, informing me that the Sydney agents had communicated with you about the quality of iron, in the sense which I have just indicated, and adding that "the Engineer for Existing Lines had reported that he saw no objection to allowing Messrs. Osborne & Co. to exercise their judgment as to the steel to be used in making the springs, provided that it will stand the requisite test, and that if Messrs. Osborne & Co. could supply them at a cheaper rate, their springs might be tried." I communicated your letter, as usual, to our Consulting Engineer; and Mr. Fowler in consequence addressed to me the letter, dated 28th February last, of which a copy was submitted to you under cover of my letter No. 24/78 of the 15th March last, in which he reported as follows:—

"With regard to Messrs. Osborne's letter accompanying their tender of August 23rd, 1877, I may observe that though Messrs. Osborne & Co. are a most respectable firm and produce excellent work, I think it would not be to the interest of the Government to carry out their suggestion.

"In the manufacture of springs a great temptation is offered to use cheap material, which if not controlled is often "Bessemers" steel, and it is by insisting that the best iron for the purpose shall be used that we ensure the steel being of the quality required: this course is pursued by the Home Government and in the Indian railways.

"It is also necessary to place all the manufacturers on the same terms, which can only be done by defining the quality of iron from which the steel is to be made, modifying the specification as may be necessary when spring steel is required for special purposes.

"Spring steel is a peculiar material, and second rate quality may be made to withstand tests of considerable severity; the difference in the lasting properties becoming manifest only in actual work. Great care is required under our specifications in maintaining the present high standard, and I am unable to concur in the proposal of Messrs. Osborne & Co. to use any material they please in the manufacture. Similar proposals are frequently made by manufacturers; if it were conceded to Messrs. Osborne & Co., it must be conceded to all, and it would inevitably lead to the substitution of an inferior quality of springs."

In my above quoted covering letter of 15th March last, I mentioned, in the first place, that Messrs. Osborne's tender, on the condition that they should use their discretion as to material, was higher than that of the firm who took the order under the conditions of using the material prescribed in the specification; and I further urged, apart from this consideration, that "the dependence on tests only, independently of specified quality of material, may often be misleading, as it may fail to insure the essential element of durability, which cannot as a rule be ensured by tests only, and which therefore to a great degree depends on carefully prescribed and selected quality of material."

In reply to the above representations, I have now received from you the letter of the 29th August last now under reply, in which you inform me that you "have noted the contents of my letter of the 15th March last, as to the undesirability of departing, as proposed by Messrs. Osborne & Co., from the principle of stipulating for the use of certain material in the construction of springs, and depending on tests to ascertain their value after manufacture;" but that "the Engineer for Existing Lines still adheres to the opinion that it would be more economical to allow manufacturers to use their own processes (patented or otherwise), and that safety would be insured by the strict observance of the test"; and that you "have therefore decided that for the future the specifications are to be made on this basis, and that the firm of Messrs. Osborne & Co. are not to be excluded from the privilege of tendering."

With regard to Messrs. Osborne's "privilege of tendering" I have already fully explained what has taken place.

With regard to the general question of the nature of our future specifications for springs, I enclose a copy of a letter, dated 6th ultimo, from our Consulting Engineer—to whom on the 31st October I communicated your letter now under reply—in which Mr. Fowler, after confirming what I have already told you about Messrs. Osborne's opportunities of tendering for springs, goes on to say:—"The Minister of Public Works having decided that the specification for steel springs shall in future omit the usual clauses respecting the quality of iron to be used in the manufacture of the steel, all the tenders will be received in future in accordance with those altered conditions."

Having thus recapitulated the various steps which have been taken in this matter, I venture to suggest that, in view of all the circumstances, which perhaps may not have been under notice or fully considered in a collected form, when your letter now under reply was written, it should receive re-consideration by you, in order that, if hereafter you should think it right to modify the opinion you have formed, I may receive such amended instructions as may appear to you to be proper under the circumstances.

I venture to urge that the decision as it now stands is open to at least two objections: (1) that on general principles it is not desirable to compel the Consulting Engineer in this country, to whom you entrust the inspection and approval of your work, to depart from any reasonable rules which he has laid down as essential or important in order to ensure efficiency in the work which he is called upon to pass; and (2) that the departure, in this particular case, from the rules hitherto in force, which Mr. Fowler is now required to take, is one which on its own merits is most undesirable, if not indefensible.

With regard to objection (1), I think it will be conceded that a very wide latitude ought to be given to a Consulting Engineer, in whom we place every confidence, and whose experience in the inspection of railway materials is very extensive, on any point on which he lays such stress as is done by Mr. Fowler in his letter of the 28th February, 1878.

But, whatever may be said upon the first or general aspect of the question—and I only refrain from enlarging on it because I think it is obviously unnecessary that I should trouble you with opinions on what is after all an abstract question, and one on which I think I may reasonably assume that you will agree with me—the matter is at once shown to be of vital importance when, as in objection (2), the particular case at issue is carefully examined and considered.

Your letter seems to adopt the principle that, in endeavouring to ensure the production of a given article required to be manufactured for railway purposes, no provision as to the quality of the materials to be used is necessary, and that entire reliance may be placed on tests. Now I venture to assert that such a principle, whether applied to springs or to almost any other manufactured railway appliance, will not be accepted by any engineer of experience in the inspection of manufactured articles. I believe it to

be

be almost universally admitted that it is most difficult, if not impossible, to devise tests which shall of themselves in all cases ensure the highest standard of durability in the articles examined, and that this can only be done by careful provision as to the nature and quality of the materials from which it is to be manufactured, without which—as well as, in some cases, observation of the process of manufacture—it is most difficult to devise tests which shall be exhaustive, and which shall disclose the fact that bad materials have been used. The defect of bad materials is frequently not disclosed until the test of wear and tear has been applied by time, the effect of which cannot be anticipated by any test at the time of manufacture.

Accordingly, to ensure the durability of the article, it has been found necessary always to fix in the specification the nature and quality of the materials to be used, as well as the manner in which the tests shall be applied.

If this be not done, an article may be produced which will stand severe tests when first used, but which will be liable to break down after a certain lapse of time and use of the article.

And if the above precautions be necessary under ordinary circumstances, I need hardly remind you how important it is, in view of the great difficulty, if not impossibility, of obtaining a proper remedy in the event of articles being found to be imperfect after delivery in the Colony, that we should omit nothing in this country which can in any degree, however small, tend to ensure efficiency. It is in this direction that I have anxiously endeavoured to work ever since the question was forced upon my consideration in the matter of the Park Gate iron; and I need now only again refer to Mr. Fowler's letter of the 28th February, 1878, for proof, as I venture to submit, of the necessity of our being allowed to continue our efforts in this direction in the case at issue.

It is perhaps right that I should add that I write this letter rather on my own behalf, and in the interests of the Colony, than upon any suggestion or urgency of Mr. Fowler, who, after stating his professional opinion in his letter of the 28th February, has now, in his letter of the 6th November, written after perusal of yours now under reply, accepted your decision as to the omission in future of the usual clause respecting quality of iron in specifications for spring steel. I cannot but feel, however, that Mr. Fowler is placed in a most difficult position in being called upon to inspect and pass certain articles without being at the same time permitted to exercise all the precautions which he thinks desirable in order to ensure their efficiency.

I now leave the matter in your hands, in the hope that you will be of opinion that I have submitted sufficient reasons for its reconsideration.

I have, &c.,
WILLIAM FORSTER.

[Enclosure.]

Mr. J. Fowler to The Agent General.

Sir,

2, Queen Square Place, S.W., 6 November, 1878.

I beg to acknowledge receipt of your letter dated 31st October, enclosing copy of letter dated 15th March, addressed to the Secretary of Public Works, Sydney, and also the reply of the Minister, dated 29th August, 1878.

Referring to the allegations of Messrs. Osborne's Agent in Sydney, that one or more orders for springs have been given out in which they were not asked to tender, I have gone through the correspondence, and do not find that Messrs. Osborne have been excluded from the lists of firms recommended to tender for laminated springs in any instance, and Messrs. Osborne are not manufacturers of volute or conical springs.

The Minister of Public Works having decided that specifications for steel springs shall in future omit the usual clauses respecting the quality of iron to be used in the manufacture of the steel, all the tenders will be received in future in accordance with those altered conditions.

I am, &c.,
JOHN FOWLER.

No. 13.

Minute of The Commissioner.

BEFORE this letter is submitted to the Minister it may be forwarded to Mr. Mason, upon whose report Mr. Sutherland decided that the "test principle" was to be depended upon without stipulation as to the material to be used.—CH.A.G., B.C., 6/2/79.

See my reply herewith.—W.M., 12/2/79.

No. 14.

Mr. Mason's Report.

I HAVE carefully read and considered the Agent General's letter, dated 20th December, 1878, and still see no reason whatever to alter the opinion I expressed in my minute, 12/11/78 on the same subject.

As it appears from the papers now before me that the Minister was guided by my opinion in deciding upon the course to be pursued in future in obtaining steel springs on the basis of tests, instead of having the brands of iron specified of which the steel for the springs was to be made, and as the Agent General as well as the Inspecting Engineer offer strong objections to this course, it is necessary I should offer some remarks on those objections.

The opinions expressed in the letters of the Agent General and the Inspecting Engineer are to the effect that springs of a reliable quality cannot be ensured by tests, unless the steel of which they are made be manufactured from certain specified brands of iron.

I do not concur in such opinions, as it would necessarily follow that they could not be made of equal quality from any other composition or mixture of material than those specified.

Now, as Messrs. Osborne & Co. offer to make springs at a less cost, which shall bear the specified tests, if allowed to use their own formulæ of composition, and as may be inferred from their letter of the 22nd August, 1877, that the springs so made give better results in every way, it yet remains to be proved that these springs are not equal in every respect to those manufactured under specified brands of iron.

It

It is a well known fact that owing to the many and various purposes to which steel is now put that manufacturers have been induced to make numerous experiments on the best methods of producing it of the cheapest and best qualities, and are therefore the best able to say which combination of materials gives the best results, and engineers as a rule have to depend upon the experiments, as they seldom or never make them for themselves; and on these grounds I defer to the opinions expressed by established manufacturers who have made such experiments, rather than depend upon the opinion of those who have never made such experiments.

The strongest argument adduced by the Inspecting Engineer is, that by insisting upon the best iron being used in the manufacture of the steel its quality is best insured. True, and this no doubt would be the safest course to adopt if no other composition were known, or if the results from its use were doubtful; but this is not the case, consequently there is no force in such argument, as other compositions which can be produced at a less cost are known, and, according to Messrs. Osborne, have been adopted by some of the leading Railway Companies in England, with the best results, as the following extracts from their letters will show.

"We have proved it to be impossible to make the springs to the New South Wales tests with anything but genuine good crucible steel; but we have also proved that by using our own selected steel we can make the springs to stand a much severer test than any springs they buy are tested to. We are speaking within our knowledge—it is not mere opinion. * * * It is notorious that specified brands are seldom or never used; this is well known to directors and engineers here, and we are happy to say the practice of specifying certain brands is being given up by some of the leading Railway Companies. The Midland Company abandoned it some time ago, and chiefly on account of representations we made to them. They now specify certain tests, leaving the manufacturer to find out the best and cheapest material, and this is the only way which manufacturers can be put on an equal footing. Besides, the rapid development of the steel trade latterly, and the application of steel to varied uses never previously thought of, has proved beyond question that cheap steels can now be used for many purposes (springs included) for which expensive brands were formerly employed, and with better results in every way. * * * We have just received an order from the North British Railway Company for 1,000 bearing and 100 buffing springs, and we know that both the Midland and Great Western Railway Companies consider our springs better than those of any other maker. We now make between 50 and 60 tons per week. Wm. Meikle, Esq., late Superintendent of the Victorian Railways, always indented for Messrs. Samuel Osborn & Co.'s steels, and said that we might use his name as a reference; and we should also be glad to refer you to the A.S.N. Co., Mort's Dry Dock and Engineering Co., Chapman & Co., Atlas Works Co., and many others using our steels, all of whom speak very favourably of it."

Now, as the Inspecting Engineer says that "Messrs. Osborn & Co. are a most respectable firm, and produce excellent work," and as their springs which they say can be supplied at a cheaper rate than those under the specification, and have given satisfaction to leading Railway Companies in England, I think, contrary to the opinion expressed by the Inspecting Engineer, that it would be to the advantage of the Government to give their springs a trial.

The Inspecting Engineer states the course he recommends "is pursued by the Home Government and on the Indian railways," but says nothing about it being adopted by English or other Railway Companies. Railway Companies, unlike Governments, are expected to pay dividends, and in consequence their Directors and Engineers are keenly alive to adopt any improved means of reducing their working expenses; and if this be the case with Companies, I see no reason why Governments should not as a matter of economy adopt the same course.

It has always been my aim to economize working expenses by adopting any improvements, either in design or manufacture, which will give that result with safety.

I believe it is the practice in America of large manufacturing firms of railway appliances to supply articles made under their own specifications, they guaranteeing certain results. I know that this is the case with one large firm in Philadelphia, and I have every reason to believe that it is the general practice.

In these days of experiments improvements are constantly being made in the design and manufacture of every description of articles, and why should Government not reap the advantages of this as well as private Companies?

The Inspecting Engineer says:—"Spring steel is a peculiar material, and second-rate quality may be made to withstand tests of considerable severity, the difference in the lasting properties becoming manifest only in actual work."

I consider it next to impossible that steel springs manufactured to withstand the severe tests described in the Inspecting Engineer's specification could be of second-rate quality; and the correctness of my opinion in this matter, as well as the "lasting" quality of the springs, is borne out by the statements of Messrs. Osborne & Co., and as long as such tests are insisted upon there is no danger that "it would inevitably lead to the substitution of an inferior quality of springs." I contend that by allowing manufacturers to make articles under their own formulæ, subject to well-devised specified tests, would put them on equally as good a footing, if not better, than by adhering to certain prescribed forms of specification, as each manufacturer would then be able to reap the advantage of his experiments, which would also be shared by the purchaser in getting the articles of the desired quality at a lower price.

With reference to the Agent General's objections (1 and 2), I may remark that I was not aware that the "Inspecting" Engineer was also "Consulting" Engineer, or that he was empowered to decide on what specifications articles should be supplied. If this be so, then the Engineer of Existing Lines here loses all control over the expenditure of articles manufactured in England for his department. I have always understood that his duty was only that of inspecting materials during their process of manufacture, so as to ensure their being made in accordance with the specification.

The opinions expressed by the Agent General on professional matters have already been answered in my reply to the objections of the Inspecting Engineer; but the general tenor of his remarks lead distinctly to the conclusion that the quality of springs, or almost any other manufactured railway appliances, cannot be depended upon if left to the discretion of the manufacturer, or made under his own formulæ, subject to specification tests.

It has been clearly proved beyond doubt that there is no absolute certainty or guarantee of always obtaining the best quality of manufactured articles by the most carefully drawn specifications and inspection.

inspection. In proof of this assertion I need only instance the case of the Park Gate iron rails, to which the Agent General has referred, which were obtained under a carefully drawn specification and inspection, the result of which is too well known to have been anything but satisfactory.

Past experience has led me to the conclusion that numerous articles required for railway purposes could be best procured by holding the manufacturer responsible for their quality, and this ought to be done in all such cases where inspection is dispensed with. If this practice were adopted, the cost of inspection during the process of manufacture would at least be saved, whatever other advantages might be derived from the system. In the event of failure in the materials supplied, the Government would have the manufacturer to fall back upon for redress. Under the present system the manufacturer, after he has obtained the Inspecting Engineer's certificate, is free from all responsibility, then from whom shall the Government seek redress?

I submit I have shown that the course I recommended is not only defensible, but a desirable one to adopt, and that I have fully answered all the objections raised on this question, and have shown good and sufficient grounds for the opinion I expressed, and upon which the Minister based his decision in this matter.

Commissioner.

Wm. M.,

12/2/79.

No. 15.

Messrs. M'Brair & Co. to The Commissioner.

Sir,

70, King-street, Sydney, 11 February, 1879.

We have received a letter from Messrs. S. Osborne & Co., Sheffield, stating that all their tenders for springs have been refused by the Agent General and do not know the reason why. They based their quotations strictly adhering to your specifications.

They have been making a number of trials with springs, and say, "We have proved it to be impossible to make the springs to the New South Wales tests with anything but good crucible steel; but we have also proved that by using our own selected steel we can make the springs to stand a much severer test than any springs they buy are tested to. We are speaking within our knowledge—it is not mere opinion."

In a letter accompanying their last tender to the Agent General, they said, "We have taken the liberty of adding thereto our prices for springs of our ordinary make, and such as we regularly supply to the Great Western, Midland, Manchester, Sheffield, and Lincolnshire Companies, and all the leading rolling stock manufacturers, and we guarantee the springs against defective material or workmanship for three years of ordinary wear and tear.

In another letter we have just received from Messrs. S. O. & Co., they say, "Last week we received an order from the Great Western Railway Co. for 1,700 springs, and this week 100 from the Midland Railway Company, and we believe these Companies prefer our springs to those of any other manufacturers."

They ask us to inquire if you will favour them with an order for a few sets of their springs as a trial.

Hoping that you will be pleased to give us a favourable answer,—

We are, &c.,

M'BRAIR, BROS., & CO.,

Sole Agents for Messrs. S. Osborn & Co.

Mr. Mason.—CH. A. G., B.C., 11/2/79.

No. 16.

Minute of Mr. Mason.

I RECOMMEND that the springs obtained under the specification be tested here.—W.M., 14/2/79.—Commissioner.

I agree with Mr. Mason's suggestion that the springs be tested here. I would like to hear from Mr. Mason, however, in what way he proposes that the test should be made.—J.L., 7/3/79. I recommend that they be tested by some competent person not connected with the department.—W.M., 12/3/79. I concur in this. Would Mr. Selfe be a suitable man to perform the test?—J.L., 21/3/79. Mr. Mason.—G.B., B.C., 16/7/79. I consider Mr. Selfe quite competent to make the test.—W.M., 16/7/79. Commissioner. Will Mr. Mason let me know the springs which are referred to for testing.—CH. A. G., 17/7/79. A requisition was sent to Commissioner, 18/7/79, showing the springs required.—W.M., 21/7/79. Commissioner.

No. 17.

Mr. Selfe to The Commissioner.

Sir,

183, Pitt-street, Sydney, 21 July, 1879.

I have received from Mr. Mason, Engineer for Existing Lines, a list of springs and the tests to which they are to be subjected. I have made arrangements to carry out the tests by hydraulic power at the Pacific Foundry, the foot of Drutt-street, if you will be good enough to have the springs delivered there. I will commence the trials immediately, or I can send for the springs if you will forward me the necessary order to get them.

Your obedient servant,

NORMAN SELFE.

Send the springs to the Pacific Foundry, and ask Mr. Selfe to test these springs in the presence of Mr. Mason and Mr. Burnett. Write memo. to Mr. Burnett and Mr. Mason accordingly.—CH. A. G., 22/7/79. Springs sent.—23/7/79.

No. 18.

The Commissioner to N. Selve, Esq.

Sir,

Department of Public Works, Railway Branch, Sydney, 22 July, 1879.

In reply to your letter of yesterday's date, I have the honor to inform you that the springs for railway carriages and engines have been forwarded to the Pacific Foundry, and to request that you will be good enough to test them in the presence of Mr. Mason and Mr. Burnett, who have been instructed to attend, and with whom you will please communicate and appoint a day for testing the springs in question.

I have, &c.,

CHAS. A. GOODCHAP,
Commissioner for Railways.

No. 19.

Minute of The Commissioner.

Springs.

PARTICULARS of indent must be given, and by what ships they arrived, in order to identify springs.—
CH. A. G., 28/7/79. This has reference to the two springs bearing the name of Cammell, and three of Turton, recently tested by Mr. Selve. Storekeeper must let me have the information by 12 o'clock.—G. B.

Particulars of springs to be tested by Mr. Selve.

One 4-wheel carriage spring, 5 ft. 2 in. centre, 10 in. camber; T. Turton & Sons' indent, 11/5/77; received, ex "Earl Dalhousie," 22/7/78.

One 6-wheel carriage spring, 4 ft. 10½ in. centre, 6½ in. camber; Cammell's indent, 13/5/78; received, ex "Brodie Castle," 20/4/79.

One horse-box, carriage truck, and centre break van spring, 3 ft. 9½ in. centre, 6½ in. camber; Turton & Sons' indent, 13/5/78; received, ex "Earl Dalhousie," 22/7/78.

One draw and buffer spring, 5 ft. 4 in. outside, 1 ft. 5 in. camber; Cammell's indent, 13/5/78; received, ex "Brodie Castle," 20/4/79.

One waggon and break van spring, 2 ft. 9 in. centre, 6 in. camber; Turton & Sons' indent, 11/5/78; received, ex "Earl Dalhousie," 22/7/78.

No. 20.

N. Selve, Esq., to The Commissioner.

Sir,

183, Pitt-street, Sydney, 15 August, 1879.

In accordance with the instructions conveyed in yours of the 22nd ult., 79-12,692, I have applied the tests prescribed by the specification to the five (5) springs forwarded to the Pacific Foundry, and have the honor to forward herewith a tabular statement and full-sized *drawing describing and showing the results obtained. I need only say here that none of the springs fulfilled the conditions required of them.

* Laid on Table as exhibit only.

Mr. Mason witnessed the trials, but Mr. Burnett was unable to attend.

I am, &c.,

NORMAN SELFE.

SPRINGS for Rolling Stock, New South Wales Government Railways—Table showing the results of applying tests required by specifications.

Date of Trial.	Maker's Name.	Description of Spring.	Length of Spring.		Camber.		Deflection to which Springs are to be subjected by Specification.	Duration of Test.	Result of Test.	Remarks.
			By Specification.	As made.	By Specification.	As made.				
August 1..	Turton	Four-wheeled carriages.	5 2	5 2	0 10	0 10½	18 inches, or 8 inches reverse.	15 minutes	Took permanent set of 2 inches.	The trials were all made in a hydraulic press, and the pressure applied gradually. The ends of the springs were held by links, giving them free play.
July 31..	Cammell	Six-wheeled carriages.	4 10½	4 10½	0 6½	0 7½	16½ inches, or 10 in. reverse.	"	Broke third plate from bottom at 2 inches reverse, and again on opposite side at 6½ inches, reverse took permanent set of 4½ inches.	
August 1..	Turton	Horse-box, carriage, truck, and centre brake van.	3 9½	3 9½	0 6½	0 6½	11 inches, or 4½ inches reverse.	"	Took permanent set of 1½ inch.	
August 1..	Cammell	Draw and buffer springs.	5 4	5 3½	1 5	1 5½	17 in. or slightly reverse.	"	Took permanent set of ¾ of an inch.

NORMAN SELFE,

August 15th, 1879.

The Agent General will be written to, asking him to call upon Inspecting Engineer for an explanation of the circumstances under which he approved of the springs referred to.—J.L., 26/8/79.

No. 21.

12.

No. 21.

The Secretary for Public Works to The Agent General.

Sir, Department of Public Works, Railway Branch, Sydney, 29 August, 1879.
I have the honor to inform you that two springs, bearing the name of "Cammell," being portion of indent dated 13/5/78, received ex "Brodie Castle," and three of the name of "Turton," being portion of indent dated 11/5/79, received ex "Earl Dalhousie," were taken indiscriminately from those in stock and subjected to the test prescribed by the specification, but the results, as will be seen from the enclosed copy of Mr. Norman Solfo's (Consulting Engineer) report thereon, show that none of these springs fulfilled the conditions.

As it is presumed that these springs were inspected in accordance with terms of specification before delivery from the manufacturers, I shall be glad if you will have the goodness to call upon the Inspecting Engineer for an explanation of the circumstances under which he approved of the springs referred to.

I have, &c.,

JOHN LACKEY,
Secretary for Public Works.

1879-80.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

RAILWAY RAILS.

(PARTICULARS OF, SHIPPED BY AGENT GENERAL, FROM 1ST JANUARY, 1877, TO 30TH SEPTEMBER, 1879.)

Ordered by the Legislative Assembly to be printed, 4 May, 1880.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated the 20th January, 1880, That there be laid upon the Table of this House,—

“A Return showing the quantity of Rails shipped by the Agent General
“for New South Wales by each vessel, from 1st January, 1877, to the
“30th September, 1879; the rate per ton for freight, and the gross amount
“of freight in each case, with the port of shipment and the port of
“arrival; also, the shipping and insurance charges on each shipment
“given separately.”

(Mr. Roseby, for Mr. Greenwood.)

RETURN of Rails, &c., shipped by Agent General.

1879-80.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

RAILWAY STATION, LITHGOW.

(FURTHER PAPERS, &c.)

Ordered by the Legislative Assembly to be printed, 1 April, 1880.

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated the 9th April, 1879, That there be laid upon the Table of this House,—

“Copies of all Reports, Petitions, Minutes, and other Documents not
“already printed, having reference to the site of a Railway Station in
“Lithgow Valley.”

(Mr. Sutherland.)

SCHEDULE.

NO.	PAGE.
1. Memo. from L. J. Windsor to Inspector Higgs—platform at Lithgow inadequate for requirements. 15 May, 1878.	2
2. Minute from Traffic Manager to Commissioner for Railways—report on requirements, &c., at Lithgow. 17 September, 1878	2
3. Minute from Engineer for Existing Lines to Commissioner, forwarding plans for station arrangements, &c. 19 October, 1878	2
4. Letter from Commissioner to Mr. Thos. Brown, asking whether he will grant or sell land at Lithgow. 31 October, 1878	3
5. Letter from J. Loneragan and others to Minister for Public Works, asking when he will receive deputation. 21 October, 1878	3
6. Extract from <i>Sydney Morning Herald</i> —report of deputation. 2 November, 1878	3
7. Letter from Mr. T. Brown to Commissioner—reply to letter of 31/10/78. 4 November, 1878	4
8. Letter from Mr. Loneragan and others to Minister for Public Works, that they were prepared to provide land free for station at Lithgow. 8 November, 1878	4
9. Letter from Commissioner to Mr. Loneragan and others, asking for plan of above land. 16 November, 1878	5
10. Letter from Mr. Loneragan and others furnishing tracing. 19 November, 1878	5
11. Report of Engineer for Existing Lines on suitability of land for station arrangements, &c. 27 November, 1878	5
12. Extract from <i>Sydney Morning Herald</i> —report of deputation. 21 November, 1878	5
13. Memorial from 116 residents and others interested in Lithgow, with reference to choosing of site for station. 21 November, 1878	5
14. Minute of Mr. Secretary Sutherland, deciding that station is to be erected at Eskbank. 29 November, 1878	7
15. Letter from Commissioner to Mr. T. Brown and Mr. Gray and others, informing them of Minister's decision. 23 December, 1878	7
16. Letter from Mr. T. Brown to Commissioner, referring to deed for land required for Station at Eskbank. 28 December, 1878	7
17. Letter from Mr. R. P. Abbott to Commissioner, forwarding copy of grant of land to Mr. T. Brown. 30 December, 1878	8
18. Letter from Commissioner to Mr. T. Brown, forwarding plan of land required. 9 January, 1879	8
19. Minute of Mr. Secretary Lackey, requiring papers in connection with Lithgow and <i>précis</i> . 17 January, 1879	8
20. <i>Précis</i> of case. 24 January, 1879	8
21. Letter from Mr. P. Higgins to Minister, in reference to station being erected at Eskbank. 7 February, 1879	9
22. Extract from <i>Sydney Morning Herald</i> ; report of deputation. 21 March, 1879	10
23. Letter from Messrs. J. and T. Loneragan, offering to grant land free for station at Lithgow. 28 March, 1879	10
24. Letter from Commissioner to Messrs. Loneragan, asking for plan of land. 9 April, 1879	10
25. Letter from Jas. Loneragan to Commissioner, in reply to Commissioner—request of 9 April. 17 April, 1879	11
26. Extract from <i>Sydney Morning Herald</i> —report of deputation. 5 April, 1879	11
27. Letter from Mr. J. Hurley, M.P., to Minister—that a deputation wished to call upon him. 7 April, 1879	11
28. Extract from <i>Sydney Morning Herald</i> ; report of deputation. 11 April, 1879	11
29. Letter from Mr. D. Mackie to Minister—account of meeting held at Lithgow. 17 April, 1879	12
30. Commissioner for Railways to Secretary for Public Works, asking if site for Lithgow Station had been decided. 3 December, 1879	12

RAILWAY STATION, LITHGOW.

No. 1.

Memo. from Mr. L. J. Windsor to Inspector Higgs.

Memorandum to Inspector Higgs, Wallerawang.

Lithgow, 15 May, 1878.

I BEG to call your attention to the platform here, which is a great deal too short for the purpose for which it is intended. Both mail and passenger trains are greatly delayed in consequence of having to stop the first part of the train to let out passengers that may be there, and then to draw up afterwards to let others out of the other part of the train, also to get luggage out, thus causing great delay.

L. J. WINDSOR.

I must strongly recommend that this platform be made at least twice the length it is at present. It should also be fenced at both ends, to prevent people from falling over and hurting themselves.—E. Higgs, West Inspector, 21/5/78. Manager.

Forwarded for Commissioner's information. I think it is intended to make extensive alterations and improvements at Lithgow.—THOS. CARLISLE, 6/6/78. Commissioner.

Yes. This may await the general plan, which I should be glad to get as early as possible.—CH. A. G., B.C., 16/6/78. Mr. Mason. The platform could be lengthened now without interfering with doubling the line between this place and Lithgow. As I am so short of office assistants, I am unable to say when the plans for the Lithgow Station, &c., arrangements will be completed.—W.M., 19/6/78. Commissioner.

No. 2.

Minute from Traffic Manager to Commissioner.

HAVING visited Bowenfels and the various sidings at Lithgow, for the purpose of ascertaining the additional accommodation required for the more efficient and economical working of the coal traffic, I find that there is much greater difficulty, danger, and expense, in working this traffic than I anticipated, owing to the want of suitable sidings and weighbridge accommodation I have therefore prepared a rough sketch of the requirements which are urgently wanted.

1st. A loop line about 330 yards long, on the northern side of the main line, opposite the Vale of Clwydd siding, also a short siding off the loop, about 80 yards in length, on which a 14-ton weighbridge should be erected.

2nd. A loop line on the northern side of the main line, opposite the Lithgow Valley Company's siding, about 400 yards long, and a siding off same about 80 yards long, with a 14-ton weighbridge as marked on the attached plan.

3rd. The safety siding at the Vale of Clwydd might be extended 100 yards, on a gradient of 1 in 40, and so constructed that in case an engine or waggons running into the siding, the main line would not be blocked or the rolling stock damaged.

4th. A semaphore signal is required at Lithgow. If the additional accommodation proposed be approved of, I would suggest that the work be commenced and completed without delay. The proposed sidings will not touch on either viaduct, and the removal of two or three feet of earth-work might be done by the end of October.

The Commissioner.

THOS. CARLISLE,
17/9/78.

Will Mr. Mason report as to what is being done in the matter of station arrangements and improvements at Lithgow, and how far the arrangements he is to propose will render unnecessary that suggested by Traffic Manager.—CH. A. G., B.C., 22/9/78. Eng. for Existg. Lines.

A plan is now being prepared of proposed additional sidings, station, and station arrangements, at Lithgow, which I hope to submit in about a week.—W.M., 25/9/78. Commissioner. Traffic Manager to see and return at once.—CH. A. G., B.C., 2/10/78. Seen.—THOS. CARLISLE, 4/10/78. Commissioner.

No. 3.

Minute from Engineer for Existing Lines to Commissioner.

Department of Public Works, Railway Branch, Existing Lines,

Engineer's Office, Sydney, 19 October, 1878.

Station arrangements, &c., at Lithgow, G.W.R.

I FORWARD herewith two plans, marked A and B respectively, showing proposed station arrangements and coal sidings at Lithgow Valley, Great Western Railway.

The plan marked A possesses the following advantages over that marked B, viz., a greater length of sidings for conducting the goods traffic and for forming a coal depôt, being situated about the centre of the present coal mines, and could be done more expeditiously and at a less cost in comparison with the accommodation given.

The passenger station would also be central, as the township appears to be extending in that direction, and when built, the Eskbank platform would not be required. Extra land would have to be purchased in both cases for carrying out the work.

The Commissioner.

WM. MASON.

Ask the owners of the land at site marked B at what price they will sell to the Government the land required for station.—J.S., 31/10/78.

No. 4.

Commissioner to T. Brown, Esq.

Sir, Department of Public Works, Railway Branch, Sydney, 31 October, 1878.

I have the honor to inform you that there have been submitted, for the consideration of the Secretary for Public Works, two sites for the proposed Railway Station in the Lithgow Valley,—one on the site of the present Lithgow platform, the other at a point on the other side of the bridge crossing the railway.

It will be necessary to obtain private land for station purposes at both of these places; and with a view to determine the more eligible site, I have the honor to request that you will say whether you are prepared to grant a conveyance of three or four acres of land on the opposite side of the present Lithgow platform, in the same liberal spirit in which you have offered to convey free of cost the land that may be required, should the other site be chosen for the station. If you will not convey such land free, will you inform me of the terms upon which you are willing to sell same for the purpose indicated.

I have, &c.,

C. A. GOODCHAP,

Commissioner for Railways.

No. 5.

Mr. Loneragan and others to The Secretary for Public Works.

Dear Sir,

Lithgow, 21 October, 1878.

We have the honor to address you, asking you to be good enough to appoint a day to receive a deputation representing the commercial interests of this place, relative to the erection of railway station and goods shed.

We have, &c.,

JAS. LONERAGAN.

W. GRAY.

And thirteen others.

Friday next the 1/11/78, at 11 o'clock.—J.S., 24/10/78.

No. 6.

Extract from *Sydney Morning Herald*, 2nd November, 1878.

Deputation.—Requirements at Lithgow.

Messrs. Higgins, P. A. Jennings, Jamieson, John See, Hogg, J. Loneragan, W. Gray, D. Brethaur, T. Loneragan, A. Anderson, W. Ryall, T. Crow, T. Hilton, John Connell, J. Porter, and Henderson waited on the Honorable the Minister for Works yesterday, with reference to the erection of a station at Lithgow. The deputation were accompanied by Messrs. Hurley (Hartley), Dillon, and O'Connor, M's.L.A.

Mr. Hurley introduced the deputation, which he said consisted of gentlemen who represented the various interests in the Valley of Lithgow, and they desired that the Minister would arrive at some definite decision with regard to the station in the town of Lithgow. They were all people who were interested in the various properties in and around Lithgow. He believed himself that the site of the present platform was the best situation for a goods shed and station; but perhaps it might be satisfactory to all parties if the selection of the site were left in the hands of the Engineer-in-Chief and the Inspector of Permanent Ways.

Mr. Higgins read the printed correspondence on the subject, including the promises made by the various Ministers, and pointed out the inconvenience that many gentlemen were subjected to who had erected buildings and purchased land there, and had not at present proper railway accommodation.

Mr. J. Loneragan stated that when he first went to Lithgow there was no mention of any station accommodation being required, but the traffic had increased so much since then that such accommodation was urgently demanded. He himself had laid out £3,000 on the supposition that a passenger and goods station would be erected at the present site, and he had latterly also been thinking of spending more on the erection of stores which he purposed letting. Other people too who were here could certify that they were waiting for the station that had been promised now nearly two years.

Mr. Anderson said if the station were erected on the site of the present platform it would be nearey to Bowenfels, so that the department might reduce the cost, because Mr. Andrew Brown was about the only one who required the Bowenfels Station, and the staff might be removed to the new Lithgow Station, which would then only cause an expense to the department of the cost of the buildings.

Mr. Gray complained of the present accommodation, and said that goods were a good deal knocked about. He had spent £10,000 at Lithgow, and would likely spend £10,000 more if this matter were settled quickly. Besides that he had given two roads to the railway. The way in which men, women, and children were now put together at the platform, sometimes without a light, was not at all pleasant. Any one in the darkness there might be guzzled and robbed in a minute.

Mr. P. A. Jennings said he had not a local knowledge of the place, but he had become the purchaser of some allotments, taking into consideration that railway accommodation would be provided. He had purchased land there in the view of the place becoming populous, and he could enforce no further the arguments that had been used, except by saying that he represented persons who bought land on the strength of the promise made by the Minister that a station would be built on the site of the present platform.

Messrs. J. Loneragan, Gray, and Brethaur having also spoken,

Mr. Sutherland replied:—He said he might as well inform them at once that there was no dispute with reference to the necessity for a station, and that the only difficulty was where to put the station. A few days ago he called for reports, because he would not make himself a party to erecting a station anywhere except with reports approving of it by the proper officers. These reports had come to him a few days since, and stated that land was required at both the places. He had accordingly caused letters to be written

to

to the owners of the two properties, the one at Eskbank, and the other at Lithgow, and he could give no decision until it was seen whether or not the land could be procured. He could not on any account think of giving a hasty decision about a station which was to be a permanent one, and which should be erected in the most suitable position for the population. They had a splendid station at Bowenfels, but there was very little trade doing there now. When it was built it was supposed that it was in the most central situation, and he would have to be careful now with regard to Lithgow not to make another mistake. He had some knowledge of Lithgow, and he believed it was a place where there would be a great deal of traffic, and even now it was greater than Parramatta, except as regarded passengers. He promised them the matter would not be delayed much longer.

Mr. Higgins said he was instructed to say that an acre of land would be given for the station-master's house.

Mr. Sutherland said it was not for the station-master's house that the land was wanted, but for traffic accommodation.

The plans for the two proposals were then examined and suggestions made by the deputation, which Mr. Sutherland promised to consider.

The deputation then retired.

No. 7.

Mr. T. Brown to Commissioner.

Sir,

Eskbank, 4 November, 1878.

I do myself the honor to acknowledge receipt of your letter of the 31st ultimo, and in reply to inform you that I am not prepared to grant a conveyance of three or four acres (or of any land) on the opposite side of the present Lithgow platform, as in case of the choosing of the site at a point on the other side of the bridge crossing the railway.

That when I made the offer to convey, free of cost, the land that might be required at the site near the bridge, I did so in the interest of a large majority of the inhabitants of Lithgow Valley, and with a view of inducing the Government to at once proceed with the work so urgently required. The last mentioned site has been, I am informed, approved of by the railway officials as the more central and as otherwise suitable, and were I now to consent to your proposal I feel that I should be assisting in what would be, if carried out, an act of injustice. I have already conveyed to the Commissioner for Railways for the time being all the lands authorized to be compulsory taken by him, and I am not willing to sell, and I will neither sell nor grant without payment any other land in addition, and thus assist in carrying out the views of interested persons to the injury of the majority.

I have, &c.,

THOMAS BROWN.

No. 8.

Mr. J. Loneragan and others to The Secretary for Public Works.

Sir,

Lithgow, 8 November, 1878.

Referring to the conversation which took place between you and the deputation from Lithgow on the 1st instant, on the subject of additional land for station buildings on the proposed site of the Lithgow platform, we, the undersigned, have the honor to state that we are prepared to provide, free of expense to the Railway Department, the land which may be required for the erection of a goods-shed and approaches thereto on the south side of the line, which we humbly submit is the position which would be the most convenient for the inhabitants and for the requirements of the present and future traffic, and in keeping with all former practice, for we believe we are correct in stating that in no single case on all the lines in New South Wales is the goods-shed not built on the township side of the line (where the township as in this case is all on one side of it); and we are at a loss to understand what object the engineer could have had in placing the shed on the north side (as per proposed plan of station yard shown by you to the deputation), to or from which there is neither exit nor entrance except by level crossing—the use of which at a station where so much business will necessarily be carried on would be a constant source of danger.

We have, &c.,

Jas. Loneragan.	Hy. Porter.
Ed. Burns.	Wm. Gray.
J. J. Ryall.	J. Connell.
T. F. Loneragan.	T. Crow.
D. Breathour.	R. Blackford.

The Commissioner to write and ask for a plan and description of the land offered for this purpose; and Mr. Mason as to position of goods-sheds, &c.—J.S., 11/11/78. Write at once then to Mr. Mason.—Ch. A. G., B.C., 11/11/78.

The goods-sheds have always been placed where they would best suit the general station arrangements and give the most convenience for working the traffic, whether on the township side of the railway or not. When the Western line was made through Lithgow Valley the township of Lithgow was not then in existence, and now that a goods-shed is required it ought to be put in such a position as will suit other part of the station arrangements, and with this in view it was placed on northern side of the line, where it will fairly answer all reasonable purposes. The road approach to the shed is not by level crossing, and will have both entrance and exit as convenient as at any other station.—W.M., 18/11/78. Commissioner.

No. 9.

Commissioner to Mr. J. Loneragan.

Sir, Department of Public Works, Railway Branch, Sydney, 16 November, 1878. Referring to the communication, dated the 8th instant, signed by yourself and nine others interested in the choice of a site for the station arrangements at Lithgow, and offering to convey to this department free of expense the necessary land required on the south side of the line, I have the honor to request that you will be good enough to forward to this office as early as possible a plan and description of the land those interested offer for this purpose, and the area thereof.

I have, &c.,
C. A. GOODCHAP,
Commissioner for Railways.

No. 10.

Messrs. Gray, Loneragan, & Higgins, to Commissioner.

Sir, Sydney, 19 November, 1878. Referring to our conversation this morning respecting the land which may be required for station purposes on the present site of the Lithgow platform, we now beg to hand you a tracing showing the land we are prepared to let you have should you require as much, and we also bind ourselves to convey the same to you when called upon to do so.

We have, &c.,
WILLIAM GRAY,
J. & J. LONERAGAN,
P. HIGGINS,
(For the Lithgow Valley Colliery Co.)

Mr. Mason, for report. Very urgent.—CH. A. G., 19/11/78.

No. 11.

Report of Engineer for Existing Lines.

I FORWARD herewith a tracing of plan showing an arrangement for goods-shed and sidings on the land proposed to be conveyed to the Commissioner for this purpose.

It will be seen from the plan that to get a goods-shed, &c., on this land it will be necessary to remove the site of the present station at A to that at B. This is very objectionable, as the station buildings and platforms would have to be placed in the middle of the existing drainage, which would involve the building of a long culvert to carry off the water in its present course. The goods-shed would be in about six to nine feet of cutting, and a large quantity of excavation would have to be done to form approaches to the shed and sidings. The siding accommodation would be very limited and awkward to work, requiring facing points to be fixed on the down line and a cross-over road into carriage dock. There is also the objection, as previously named, of having the goods shed separated from the general siding arrangements.

Tracing of Mr. Gray's property returned herewith.
Commissioner.

W.M., 27/11/78.

No. 12.

Extract from *Sydney Morning Herald*, 21 November, 1878.

Railway Station at Lithgow.

YESTERDAY afternoon a deputation, consisting of Messrs. J. Loneragan, J. Burns, and W. Gray, waited upon the Hon. Minister for Works in reference to the site for the proposed railway station at Lithgow. The deputation presented to the Minister a petition, very largely signed, from inhabitants of the district interested, praying that the station might be erected at the spot which had been decided upon by a previous Minister for Works. They had forwarded to the Minister a plan and description of the land that was available, some two and a half acres, and more could be had if required. They pointed out that the spot now proposed was in the very centre of population, and that persons had been induced to buy land there and build, on the strength of the promise that the railway station should be at that place. Mr. Sutherland told the deputation that he would look over their petition, but in a matter of this kind he would have to be guided a great deal by the report of his officers. He did not feel himself to be a good judge in this case, as he was interested in land near the site which they proposed, and which would thereby be much enhanced in value. He would get all the information he could and lay the matter before his colleagues in the Cabinet for their advice upon it. The deputation thanked the Minister and retired.

No. 13.

Memorial as to site.

The Honorable the Minister for Works, Sydney.

Sir, We, the undersigned residents and others commercially and locally interested in the prosperity of Lithgow, earnestly request your consideration of this memorial before finally giving your decision upon the locality to be chosen as a site for the proposed railway station in Lithgow Valley.

Your memorialists respectfully beg to premise that it is their misfortune that an impartial consideration of the merits of their case has constantly been endangered by reason of the conflicting interests of a very large number of influential persons; but we beg to point out as a circumstance entitled to much weight—that two Ministers for Works who have held office of late years, and who could not be said to be in any way interested

interested in the site of the proposed station (Messrs. Lackey and Hoskins) at once admitted the reasonableness and fairness of the test proposed on our behalf by Mr. Higgins; the first gentleman sanctioning the erection of the present Lithgow platform (and ordering an account of the traffic between that and the Eskbank platform to be kept, in order to decide the proper site for the station), and the latter gentleman pointedly declining to interfere with that arrangement until a definite result was ascertained.

Your memorialists earnestly direct your attention to the letter written by Mr. P. Higgins, dated 27th February, 1877, to the then Secretary for Public Works, and to the minute of Mr. Lackey thereupon, the terms contained in which, your memorialists submit, constitute a contract as binding upon the Government as upon those for whom Mr. Higgins acted, and which contract cannot be ignored by either party without a direct breach of faith. It is further urged for your consideration that, relying upon the sincerity of Mr. Lackey's minute (which broadly states that he looked upon the proposed test as a means of arriving at a fair settlement of the question in dispute, and therefore to be final in its result), many of your Memorialists, finding the vicinity of the present Lithgow platform to be the business centre of the Valley (and which fact is undeniably borne out by the accounts kept), have expended large sums in the purchase of land in the neighbourhood and in the erection of buildings thereon, and some have so devoted the entire savings of years.

It is respectfully submitted that Mr. Lackey's minute admits of no doubt as to its finality. A direct offer was made to him as Minister for Works by which a thoroughly unbiassed decision could be arrived at—a decision not to rest upon the arguments of interested persons, but upon the simple logic of facts, and accepting the offer he wrote, "This seems to me a *fair settlement* of the question. *Mr. Higgins' offer will therefore be accepted*, with this condition, however, that whichever site is eventually chosen, sufficient land will be provided by the proprietors for a future station-master's residence, say an acre at least."

Your memorialists beg to state that they are prepared to carry out their part of the contract in providing the stipulated quantity of land—even without cost to the Government should such a demand be made—and they now respectfully call upon the Government to keep faith with them. They also desire to intimate that, in the opinion of competent authorities, who have taken into consideration the extensive siding accommodation (amounting to many acres in extent) attached to all the collieries except that of Eskbank (which latter ought to be enlarged at private rather than public expense), the land your memorialists are ready to provide, together with that already in possession of the Government between the fences, is ample for all possible requirements at the proposed station.

Your memorialists regret that they should have to express dissatisfaction with the drawings and plans of the Engineer for Existing Lines lately exhibited to a deputation, which if carried out, no matter what site is chosen, will prove a lasting inconvenience to the public, by reason of the goods shed being placed on the north side of the line, where there is not a single place of business, and to gain access to which at the Lithgow site a dangerous level crossing will have to be made or an expensive bridge be built. Further, your memorialists respectfully submit that the facts ascertained by the six months' trial given, ought in all good faith to be considered final; but the plans lately prepared by Mr. Mason seem to ignore this settlement, and to re-open a dispute which three of your predecessors in office have affirmed should be held as settled. Further, your memorialists are at a loss to understand how anything contained in the minute of Mr. Combes, directing the station to be erected at Lithgow, can be taken as a warrant for the survey of a site in the practically condemned neighbourhood of Eskbank, for your memorialists contend that the proper locality for the station was fairly tested and settled before Mr. Mason was called upon to prepare his plans.

Your memorialists respectfully but strenuously protest against their being shut out from all voice in the matter of the selection of the station site, as it appears they are to be, if they rightly understand the answer given to a deputation which waited on you on the first of November instant, when you stated that communications respecting the area required, according to Mr. Mason's plans, were to be addressed to the proprietors of land in the neighbourhood. For it is the peculiarity of the plans in question that no other land is dealt with than that belonging to Mr. T. Brown, and those interested in leases under him, which peculiarity we are informed by competent authorities arises not so much from all other methods of arrangement being exhausted as from their being apparently ignored. Therefore, as the land in each of the directions pointed out by Mr. Mason is the property of Mr. Brown, we submit that to write to him asking which site he and the lessees under him will part with is virtually to subject our opinions, rights, and interests (after they have been fairly settled and affirmed by contract with the Government) to reversal and denial, at the dictation of the very persons who have been most active in their antagonism to us, and whose pecuniary interests are heavily concerned in denying the justice of our claims.

Your memorialists beg to direct your attention to the fact that, long before any contention arose as to the site for the future station, the existing township began to develop itself on the elevated plateau on which it now stands; that the natural features of the surrounding country point this locality out as the best site for a township; that except a public-house a mile and a half distant, not a single store or place of business exists eastwards of it; and they unhesitatingly affirm that if an inquiry be instituted, it will be found that nearly all, if not the whole, of the general merchandise consumed by the inhabitants of the district is delivered by permission of the Company at the siding of the Lithgow Valley Colliery, which is close to the present platform, and that scarcely anything is delivered at the Eskbank siding, but ores and material for plant in course of construction, which traffic would go there all the same and without the slightest inconvenience to any one concerned if there were no station within 20 miles of it. And further, your memorialists beg to draw special attention to the signatures attached hereto, as comprising more than nine-tenths of those who are in business and directly interested in the general commercial pursuits of Lithgow Valley.

In conclusion, your memorialists pray that since the plans submitted by Mr. Mason show the practicability of erecting a station in the immediate vicinity of the present Lithgow platform, that that site may alone be dealt with, as they conceive the Government is bound by every moral obligation to keep faith in the performance of the contract entered into by Mr. Lackey.

We are, &c.,

[Here follow 116 signatures.]

To be placed with other papers on this subject.—J.S., 22/11/78.

No. 14.

Minute of Secretary for Public Works.

Station accommodation, Lithgow.

THERE has been considerable difficulty in fixing upon the most suitable site for this station and siding accommodation, in consequence of the conflicting interests of those persons at Lithgow, owners of property (coal-mines, &c.) who have erected buildings and made other improvements at the opposite and extreme ends of the township. The Vale of Clwydd Coal-mining and Copper-smelting Company and Brewery, and Messrs. Mort & Company's establishment at the eastern end. Mr. Gray and the Lithgow Valley Coal-mining Company, and Brick and Pipe Manufactory, and the Lithgow Iron Company at the western end (and Brown's Platform) the centre.

The Engineer for Existing Lines has prepared two plans, one showing the station arrangements on the site at the western end of the township (Lithgow Valley Platform), and the other near the bridge over the railway between eastern and western end, which latter site he considers the most suitable, as it gives greater facility for traffic and for forming a coal depôt, it being situated about the centre of the present coal mines, because the work could be done more expeditiously and at less cost in comparison with the accommodation given, and because the township is extending in that direction. See our Court-house and Time Public School, now erecting near the proposed site.

Mr. Thomas Brown, the owner of land at the western end of the township, has declined to sell or give any portion of it to the Department, as he believes that the best interests of the public will be met by the erection of the station at the bridge site, at which place he has offered any land that may be required free of charge.

Persons who are interested in the platform site thereupon offered to the Department, free of charge, land on which it is possible, at considerable expense, to provide a portion of the accommodation required; but Mr. Mason reports that the siding would be very limited and awkward to work, necessitating facing points to be fixed on the down line and a cross-over road into carriage dock; and further, that there is also the objection of having the goods shed separated from the general siding arrangements.

The proposed station at Lithgow platform must always be at the extreme end of the township, and none of the objections urged by Mr. Mason against it apply to the bridge site.

I, therefore, for the reasons above appearing, approve of the acceptance of the land offered by Mr. Thomas Brown to the Department as a site for station buildings, &c., and of the erection of such buildings with as little delay as possible.

The expense to be charged to the vote.

JOHN SUTHERLAND.

29/11/78.

Mr. Mason.—B.C., CH. A.G., 12/12/78. Noted.—W.M., 16/12/78. Commr. Inform Mr. Gray and others—see their offer of land—and also Mr. Thomas Brown. Then ask Mr. Mason to supply plan and description of land required from Mr. Brown.—CH. A.G., 18/12/78. Plan forwarded, 3 January, /79.—W.M., 6/1/79.

No. 15.

Commissioner to T. Brown, Esq.

Sir,

Department of Public Works, Railway Branch, Sydney, 23 December, 1878.

Adverting to your proposal to convey to this Department, free of charge, the land required for the erection of the station arrangements at Lithgow, I have the honor to inform you that it has been decided to erect the station, &c., on the site indicated by you near the bridge, and I have therefore to request that you will at once make the necessary arrangements for conveying the land you promised for the purpose.

I have, &c.,

CHAS. A. GOODCHAP,

Commissioner for Railways.

Commissioner to Mr. W. Gray and others.

Gentlemen,

Department of Public Works, Railway Branch, 23 December, 1878.

Referring to your letter of the 19th ultimo, enclosing a tracing showing the land you are willing to convey to the Department free of charge in the event of the new station arrangements at Lithgow being erected at the end of the town, further from Sydney, I have the honor to inform you that it will not be necessary for me to avail myself of your offer, as it has been decided to erect the station, &c., at the site near the bridge.

I have, &c.,

CHAS. A. GOODCHAP,

Commissioner for Railways.

No. 16.

Mr. T. Brown to Commissioner.

Sir,

Eskbank, 28 December, 1878.

I do myself the honor to acknowledge the receipt of your letter of 23rd instant (only received to-day), and in reply, beg to inform you that the deed of the portion of land intended to be transferred to the Railway Department is now in the office of R. P. Abbott, Esq., solicitor, 117, King-street, Sydney, who will furnish you with abstract of title on application.

I should much like to have the land required by you marked out, so that I could commence to build for the convenience of the general public.

I have, &c.,

THOMAS BROWN.

Mr. Mason, B.C., 30/12/78.—CH. A. G.

No. 17.

No. 17.

Mr. R. P. Abbott to Commissioner.

Sir, King-street, Sydney, 30 December, 1878.
According to instructions received from Mr. Thomas Brown, I do myself the honor to forward a copy grant from the Crown to him of 320 acres of land at Lithgow Valley, portion of which he has agreed to convey for railway purposes. This title has already been dealt with by the Government.

I have, &c.,

R. P. ABBOTT.

If Mr. Mason will furnish a description of the land required, conveyance can be prepared.—
Ch. A. G., 31/12/78. Plan herewith, showing in red colour land required.—W.M., 6/1/79. Commr.,
Sec Mr. Brown's letter of 28/12/78 herewith; forwarded plan to him (to be returned).—Ch. A. G., 8/1/79.

No. 18.

Commissioner to Mr. T. Brown.

Sir, Department of Public Works, Railway Branch, Sydney, 9 January, 1879.
Referring to your letter of the 28th ultimo, I have the honor to forward herewith plan (to be returned) showing the land—coloured red—required for railway purposes at Lithgow Valley, Great Western Railway.

I have, &c.,

CHAS. A. GOODCHAP,

Commissioner for Railways.

No. 20.

Précis of case.

Lithgow Station.
ONE of the points advocated as the most desirable position for the new station was at the township of Lithgow, on or near the site of the present Lithgow Platform, and the other was little more than a mile to the eastward of this, near the bridge which crosses the line on the Sydney side of the Eskbank platform.

It would have been necessary to have obtained additional land for the station buildings and yard at either place.

The most suitable land at the point first mentioned belongs to Mr. T. Brown, who refused to either sell or give any portion of it, he being of opinion that Lithgow was not the proper place for the station. A few of the persons chiefly interested in the selection of this part of the Valley offered a piece of land free of charge; but it was awkwardly situated, and would not have afforded sufficient accommodation.

Mr. Brown believed that it would be more generally advantageous to have the station further east, near the bridge, and, conditionally on its being erected at this point, agreed to present the Government with as much land there as may be necessary for the purpose.

The Engineer for Existing Lines, after inspecting both places, and preparing plans of the two stations, reported that the eastern or bridge site was better adapted to the requirements of the traffic. He stated that this position possesses the following advantages over that at Lithgow township:—

“A greater length of sidings for conducting the goods traffic, and for forming a coal dépôt, being situated about the centre of the present coal mines, and could be done more expeditiously and at less cost in comparison with the accommodation given. The passenger station would also be central, as the township appears to be extending in that direction, and when built the Eskbank platform will not be required.”

In regard to the proposed position at Lithgow township, he said that to provide a goods shed, &c., the station buildings and platform would have to be placed in the middle of the drainage, which would be very objectionable and involve the construction of a large culvert; that the goods shed would be in about 6 to 9 feet of cutting; that a large quantity of excavation would have been necessary to form approaches to the sheds and sidings; that the sidings would not only have been limited, but awkward to work, as they would require facing points to the down line, and a cross-over road to the carriage dock, and there would also have been the drawback of the goods shed being separated from the general siding arrangements.

In a minute dated 29th November, 1878, the late Minister for Works, the Hon. J. Sutherland, goes fully into the whole subject, and, after considering all the advantages and disadvantages of the respective positions, decided that the station should be erected on the proposed site near the bridge, and directed that Mr. Brown's offer be accepted and the work carried out.

From attached printed returns it will be seen that the freight for inward and outward goods and mineral traffic at Lithgow, during the six months ending 31st October, 1877, amounted to £5,515, and that during the six months ending 31st December, 1877, the coaching traffic at Lithgow platform exceeded that at Eskbank platform by 779 passengers and £344.

Notwithstanding, however, the large traffic done at Lithgow, the prevailing opinion seems to be that the vicinity of Eskbank is the most suitable and generally convenient position for the station.

At

At the time the Lithgow platform was applied for, there appears to have been an impression in some quarters that the Eskbank platform was to be removed to Lithgow, and several strong protests were made against this being done. The late Mr. Thomas Mort objected to its removal, as he believed the land at Eskbank possesses advantages that will in the course of a few years bring about it a population far in excess of that which will be found in the more westerly portion of the Valley, and that it is at this point that manufactories are more likely to extend. A petition signed by 235 of the inhabitants of the Valley and neighbourhood, opposing the removal of the platform further west, was also sent to the Minister for Works.

In 1877 the Directors of the Vale of Clwydd Coal Company objected to the Bowenfels goods station being removed to Lithgow, the site of Eskbank platform being considered by them a more eligible position, and Mr. D. Williams, on behalf of the Lithgow Valley Iron Company, recommended the site now selected near the bridge.

Among the papers there is also a memorial, signed by 416 persons, approving of the station being erected at the point decided upon. (There is no date to show when this document was received, but from its position in the file it would appear to have been during the last few months.)

It may be added that a Court-house and Public School are being erected in the neighbourhood of the position chosen for the station.

I must have the plans and original papers in this case.—J.L., 24/1/79. All papers and plans herewith.—Ch. A. G., 24/1/79.

No. 21.

Mr. P. Higgins to The Secretary for Public Works.

Sir,

Reform Club, Sydney, 7 February, 1879.

In reversing the directions of two previous Ministers, the Hon. Messrs. Lackey and Hoskins, and the decision of the Hon. E. Combes, as to the Lithgow Railway Station, the ex-Minister, The Hon. Mr. Sutherland, alleges reasons of a nature that will not bear examination and are unsupported by facts. Mr. Sutherland, in deciding the Eskbank site for a station, gives as his reason that it would be nearer the late Mr. Mort's slaughtering establishment, a brewery lately built in the Valley, and the Vale of Clwydd Colliery. I shall deal with each separately.

The slaughtering establishment was erected by Mr. Mort in connection with his project for the export of frozen meat.

It is unnecessary for me to remind you that this scheme has broken down, the place is occupied by a caretaker pending the sale and distribution of the machinery and other effects.

The local brewery is instanced as an institution whose importance ought to turn the scale, but the extreme improbability of a considerable export from that establishment could easily be tested by an inquiry into the character of the article produced there.

As to the Vale of Clwydd Colliery it is difficult to see how the interests of that Company are affected. They have a siding of their own, and by that means are in direct communication with the main line. They can always have their goods delivered (as at present) on their own premises.

Having stated his reasons for overthrowing the action of three preceding Ministers, Mr. Sutherland omits the numerous and forcible claims of the people of the town of Lithgow, whose interests are completely ignored and set aside.

Nothing to an unprejudiced mind could be more fair, more straightforward, or a more honest mode of settling conflicting claims than was adopted in ordering an account of the traffic to be taken for six months, to test in an absolutely practical manner the position the public most approved. The result of this trial has placed the question beyond doubt, and for which I refer you to return No. 8 of the papers in this case, ordered to be printed 24 April, 1878.

Since this time (about two years ago) the town of Lithgow has increased wonderfully in size and population centred itself in close proximity to the site of the station as decided on by Mr. Sutherland's predecessors.

The churches, the Commercial Bank, the telegraph station, the principal stores and private residences, the hotels (four in number), all have grouped themselves in this immediate locality, and the greater number of these have been erected on the faith of the decision arrived at by the Ministers who preceded Mr. Sutherland.

It should form no small element in the consideration of the case, that the interests of those who have bought land and built substantial houses under the idea that the question of the site had been settled, and who really form three-fourths of the population should be completely ignored, and their convenience made subservient to the selfishness of a few individuals (see amongst the papers a petition numerously signed by real property holders in the township in favour of the Lithgow site, dated 30 November, 1878).

They have offered to give the area of land necessary for station buildings free of cost to the Government, and in doing so they have carried out their portion of the contract with Mr. Lackey, see minute No. 10, of the Secretary for Public Works.

The site selected by Mr. Sutherland is not alone inconvenient and opposed to the unanimous wish of the people of Lithgow, but is from its position totally unfit for a railway station.

The platform is intended to abut on to a bridge over the line, which on account of the obstruction of the view would be a sure source of frequent and serious accidents.

A most unsightly view would always present itself from the fact that a coal-pit and copper-smelting works are within a chain of the railway and facing the intended station buildings and platform. These with their concomitants of dust and smoke would make it a most undesirable site.

The land in the neighbourhood is low and swampy and totally unfit for a township.

For these and many other reasons, all of which would be perceptible to a person visiting the respective sites, I hope that you will re-consider the decision of Mr. Sutherland, and order the station buildings to be erected on the site originally fixed upon, and let right be done.

I have, &c.,
P. HIGGINS.

No. 22.

Extract from *Sydney Morning Herald*, 21st March, 1879.

Messrs. Hurley (H.), O'Connor, Dillon, and Barbour, M.L.A.'s, and Messrs. Higgins, Loneragan, Burns, Gray, Wilton, and Jamaeson yesterday afternoon waited on the Hon. the Colonial Secretary with reference to a railway station being erected at Lithgow, and not at Eskbank as had been decided upon by Mr. Sutherland, the late Minister for Public Works.

Mr. Hurley said they had come in order to point out the necessity that existed for building a station at Lithgow. Of those who composed the deputation several gentlemen were personally interested in Lithgow, and others had come to see that justice was done to all parties and not to individuals. He read the documents on the subject, which had been printed, and said that they thought Mr. Mason's opinion had been allowed to obtain too much permanence, and take precedence of every other opinion that had been expressed. All they wished was that Mr. Lackey should maintain the opinion he held some time ago, when he was Minister for Works. If the station were erected at Eskbank a great deal of inconvenience would be caused to the people of Lithgow. They were aware that the Minister had been there himself, and was in possession of facts which would lead him to see that justice was done to all parties.

Mr. Higgins said that there was one thing that Mr. Hurley had forgotten, and that was that Mr. Lackey had stated that Lithgow was the proper place to build a station, but that there was not enough land. Land might be taken possession of by the Government under the powers they possessed, and he was authorized to say that the people would pay the cost of the land.

Mr. Wilton said that it had been stated that the opinion of the Engineer for Existing Lines was that there was not room enough for a station, and that they could not take more land under the powers they possessed. That was a difficulty which was constantly cropping up, and this might be urged as a reason why Government should possess further powers. The land at Eskbank was swampy, and unfit for station purposes.

Mr. Loneragan pointed out that they had a good claim to the notice of the Minister, as they had spent so much money at Lithgow.

Mr. Higgins said they would pledge themselves to pay for all the land that was required on the other side of the line.

Mr. Burns said they had only been asked for 1 acre in the first instance, and now they offered 4 acres.

Sir Henry Parkes said in reply that he really did not know much about the matter, but he did know that most of the buildings were in the position where it was now asked that a station might be erected. He assumed that Mr. Lackey had merely confirmed the action of his predecessor. That was a course which was usually followed unless there was some good reason for taking a different one. They had now represented to him that if the platform were erected in the place where it had been decided to do so it would be a serious affair. As far as he had knowledge, Eskbank was not a place where a station ought to be, but he did not know what he could do beyond getting the case reopened.

In reply to Sir Henry Parkes, Mr. Higgins stated that no tenders had yet been called for the work. They had come, he said, in consequence of the speech made by Mr. Lackey to the effect that though Lithgow was the best place there was not enough land there.

Sir Henry Parkes said that all he thought he could do would be to bring the matter before the Cabinet, with the representations that had been made to him.

Mr. Hurley said that Mr. Sutherland was largely interested in property at Eskbank.

The deputation retired, after having thanked the Minister for his courtesy.

No. 23.

Messrs. J. and T. Loneragan to Commissioner.

Lithgow, 28 March, 1879.

We, the undersigned, undertake to convey to the Railway Department, all that piece of land as herein described free of all or any claim, and we pledge ourselves to execute a legal deed of transfer of said piece of land when called upon to do so.

Land referred to.

From the boundary on the eastern side of Mr. Gray's property to the end or corner on the western end of the Lithgow Valley Company's land. Measures 924 feet, with a depth of 90 feet, the full length of line, and running parallel to the railway fence on the southern or township side.

J. & T. LONERAGAN.

Forward to Mr. Mason to say whether this offer of additional land will enable him to provide the requisite accommodation at the Lithgow site.—CH. A. G., B.C., 29/3/79.

I shall require a plan showing the portion of the land proposed to be conveyed before I can give an opinion on this subject.—W.M., 1/4/79. Commissioner. Write for this at once—a small sketch will do.—CH. A. G., 5/4/79.

No. 24.

Commissioner to Messrs. J. and T. Loneragan.

Department of Public Works, Railway Branch,
Sydney, 9 April, 1879.

Gentlemen,

In reply to your letter of the 28th ultimo, offering to convey to this Department all that piece of land which is described in your letter, free of all or any claim, as a site for the railway station at Lithgow, I have the honor to inform you that a plan showing the position of the land proposed to be conveyed will be required before any decision can be given in the matter. I may mention that a small sketch will be sufficient.

I have, &c.,

CH. A. GOODCHAP,

Commissioner for Railways.

11

No. 25.

Mr. J. Loneragan to Commissioner.

Sir,

Lithgow, 17 April, 1879.

Acknowledging receipt of yours of 9th instant, I have the honor to place before you the required plan of the ground available at Lithgow on the township side of line, in length 924 feet and 90 feet, making an area of $3\frac{1}{8}$ acres.

I am desired to inform you I am prepared to convey this land, as shown on plan, to the department for the purposes required.

Your obedient servant,

JAS. LONERAGAN.

No. 26.

Extract from *Sydney Morning Herald*, 5th April, 1879.

Railway station at Eskbank.

MESSRS. D. Williams, Abbott, Farquhar, W. J. Weston, Garratt, Saywell, Way, Wilson, and Schneider, yesterday waited upon the Minister for Works with respect to the railway station at Eskbank.

Mr. Williams produced a plan of the station, which it was intended should be on the eastern side of the bridge, and urged that this was a better site than the one at Lithgow. It had been stated that the site was a swamp, but that was not the case.

Captain Farquhar supported what had been said, contending that the site indicated by Mr. Williams was the most convenient.

Mr. Abbott said a test had been made of the receipts at the two places, which was in favour of the station at Lithgow; but it really amounted to this,—that there was a public-house at Lithgow and there was none at Eskbank, and the whole of the arguments against the site that had been fixed were based on that.

Mr. Saywell pointed out that more coal was raised on the eastern side than there was on the western side. Mr. Lackey, himself believed that the best site was the one the deputation wanted, and the previous Minister thought the same thing.

Mr. Lackey said there had been a few features of the case brought under his notice, to which his attention had not been previously called. So many conflicting opinions had been given that he had gone up himself to inspect the place, and he quite agreed that the test that had been made was not altogether fair, because there were facilities at the one place, with regard to the issue of tickets, that there were not at the other, and there might be something in the reason that the business people were attracted to Lithgow through an hotel being there, where they could transact any business they wanted. These two reasons had been sufficient to show him that the test had not been made on equal terms. It appeared to him that the station at Eskbank would be most suitable, and the Engineer for Existing Lines had informed him that there was greater accommodation available at Eskbank, and that it would be more suitable for the coal trade. He would consider the whole matter, and he hoped that the place that was ultimately decided upon would be the one that would prove most suitable for all requirements.

No. 27.

J. Hurley, Esq., M.P., to The Secretary for Public Works.

Sir,

Sydney, 7 April, 1879.

I beg to give notice that a number of my constituents desire to meet you on Thursday at 11 a.m. at your office, in regard to railway site, Lithgow. If the hour and day is convenient to you, please to send an answer to Mr. John Wilson, Manager, Vale of Clwydd Co., Lithgow, and oblige,—

Yours,

J. HURLEY.

P.S.—The deputation are persons who advocate Eskbank.—J.H.

Write and state that as next Friday will be Good Friday, that I will meet the deputation at the time named.—J.L., 8/4/79.

No. 28.

Extract from *Sydney Morning Herald*, 11th April, 1879.

Deputations,—Railway station at Eskbank.

A DEPUTATION, consisting of Mr. Robinson, Mr. Wilson (Manager of the Vale of Clwydd Colliery), Mr. Pitt (Manager of the Eskbank Colliery), Mr. Schroder, Mr. Moore, Mr. Hutchinson, and Mr. Ebbelwhite, waited upon the Minister for Works (the Hon. John Lackey) yesterday, to urge upon him the desirableness in the public interest of erecting the proposed new railway station at Eskbank, in preference to Lithgow Valley. The deputation was introduced by Mr. John Hurley M.L.A., who said he had come by request for that purpose. He did not intend to say anything himself, but he hoped that whatever might be done eventually would be done in the interests of the future as well as of the present welfare of the Valley.

Several members of the deputation pointed out to the Minister that, on account of the larger number of industries, the larger population, and the probable increase of both, Eskbank was a much more suitable place for a railway station than Lithgow.

Mr. Lackey said the subject was not new to him, for this was the third deputation that had waited upon him in reference to it since he had been in office this time. It was from representations made by people who took an interest in the site of the station in the neighbourhood of Lithgow that he was induced to give instructions for the action proposed by the late Government to be stayed. He found, from representations made, that considerable dissatisfaction existed as to the site on which the proposed permanent station was to be erected, and, as the deputation were aware, representations were urgently made in behalf of both Eskbank and

and Lithgow. He confessed, from the way in which the case was put before him, that he thought the most desirable plan to follow would be to inspect the locality himself, in order to come to what he hoped would be a proper and fair conclusion. He went accordingly with the Traffic Manager and the Engineer for Existing Lines, who had the plans of the proposed alterations and the works which would require to be carried out. From all that he saw, and all the information that he obtained, he formed an opinion in favour of the proposal of the Engineer for Existing Lines, and he was glad now to have the weight of the present deputation in accordance with his opinion. It appeared to him that Eskbank was the most central place, and the site best suited to give proper accommodation for the enormous traffic which must grow up there within the next few years; and he could only say now that he would be very glad to consider carefully the representations made to him, and which would greatly guide him in the decision he should come to. In reply to Mr. Hurley, Mr. Lackey stated that as soon as the site had been determined on the work would be commenced without delay.

No. 29.

Mr. D. Mackie to The Secretary for Public Works.

Sir,

Lithgow Valley, 17 April, 1879.

As Chairman of a public meeting, called by advertisement and held at Lithgow on Saturday, the 12th instant, it was proposed by Mr. F. Raymond—"That this meeting of the residents of Lithgow Valley is of opinion that the Eskbank site for the proposed railway station is the most central, and therefore the most convenient for the inhabitants and the public generally,"—which resolution having been seconded by Mr. G. Hall, was carried unanimously.

A second resolution was proposed by Mr. W. Wilson—"That the foregoing resolution be embodied in an address and conveyed to the Honorable the Minister for Works at Sydney,"—seconded by Mr. G. Donald and carried unanimously.

I have also to inform you that there were about 150 of the residents of Lithgow Valley present at the meeting.

I have, &c.,

DAVID MACKIE,

Chairman.

No. 30.

Memo. by Commissioner.

Lithgow station arrangements.

If a decision has been arrived at in regard to the site for this station, will the Minister be good enough to say whether the work can be proceeded with, as it will be necessary to get a conveyance of the land.

CH. A. G., 3/12/79.

It has been decided to erect the station at the bridge site as recommended by the Engineer for Existing Lines.—J.L., 3/12/79. Mr. Mason.—CH. A. G., B.C. Noted.—W.M., 10/12/79. Commissioner.

No. 8.

The Engineer for Existing Lines to The Commissioner for Railways.

Analysis of Tenders:—

James Pritchard... ..	£7,770.
William Cains	7,795.
Henry Noad	7,865.
John M'Donald	7,857.

Mr. James Pritchard's tender is the lowest, but I cannot recommend its acceptance, for the following reasons:—1st. It is £199 above his first tender, and £1,100 1s. in excess of my estimate, in which I allowed 15 per cent. profit in the work. I recommend that the work be carried out by this department, as there seems no probability of obtaining a satisfactory tender,—W.M., 17/1/79.

No. 9.

Memorandum of The Secretary for Public Works.

I CONCUR in recommendation of the Engineer for Existing Lines; at the same time, after so much delay having taken place, caused by the difficulty of obtaining eligible tenders, I think it desirable, in the interest of the public, as well as the department, that the work should be done within the time specified in the contract.—J.L., 20/1/79.

Mr. Mason, B.C., 20/1/79.—Ch. A. G. Noted.—W.M., 22/1/79. Commissioner.

1879-80.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

RAILWAYS.

(ACCIDENT AT PARRAMATTA STATION.)

Ordered by the Legislative Assembly to be printed, 13 January, 1880.

SCHEDULE.

NO.	PAGE.
1. Evidence taken at inquiry held on the 27th December, 1879, at Parramatta Station	1
2. Secretary of Railways' Report	4
3. Minute of Secretary for Public Works	6
4. Secretary to Commissioner for Railways, in explanation of the action taken by him	7
5. Plan showing locality of accident

No. 1.

Inquiry held by Secretary of Railways at Parramatta Station, on 27th December, respecting the accident which occurred at that Station on the 26th December, 1879.

PRESENT:—

D. Vernon, Secretary of Railways.
 W. Mason, Engineer for Existing Lines.
 R. H. Burnett, Locomotive Engineer.
 W. Scott, Locomotive Overseer.

Witnesses examined:—

H. Richardson, Traffic Inspector.
 J. R. Thompson, Station-master, Parramatta.
 W. Price, Head Porter, Parramatta.
 John Winfield, Porter and Signaller, Parramatta.
 George E. Young, Resident of Parramatta.
 Thos. Carlisle, Traffic Manager.
 E. Harrison, Engine-driver.
 Walter Hambly, Engine-fireman.
 W. H. Chandler, Guard.

*Inspector Richardson:—*I was engaged on the Parramatta Station directing the running of the trains during the afternoon of yesterday; I had a printed notice of the running of the specials from Hawkesbury Racecourse, which showed the first one due to leave Blacktown at 5.40 p.m.; I had arranged for this train to run through No. 2 loop-siding at 6.0 p.m., passing a special which I had arranged to leave the platform at 6.5 p.m.; at 5.34 p.m. a telegram was handed to me by Mr. Thompson from the Traffic Manager, Blacktown, saying—"Let us go in front of 5.40 train"; I understood this to refer to the first special from the Racecourse; at the moment I received the telegram the train from Sydney was drawing into the platform; the station-master asked me if he should get the engine round at once, or wait until special alluded to in telegram had passed; I told him that if signals were at "danger" to get engine round at once, which was done immediately; Mr. Thompson, the station-master, then went towards the Sydney end of the platform to see, I believe, the engine brought round and attached in its proper place;

as I turned to go to the opposite end of platform the telegraph operator handed me another telegram from the station-master, Blacktown, which stated that first special had left at 5.30 p.m.; head-porter Price was standing near me at the time, and I said—"Get down to No. 2 points at once, as special has left Blacktown"; he started at once, but before he could get away the up-train was in sight; he ran as hard as he could to get to points, but could not reach them in time; I saw him the whole time; we were standing just at the end of the covered portion of platform; I saw at the rate special was coming on that it would be impossible for Price to reach the points in time to turn it on to No. 2 loop, and I shouted to the passengers who had filled the carriages—"Leave the train at once, or you'll all be killed"; I saw the up-train immediately I had ordered Price to get to the points, and when I saw it it was then as near as I could judge at the "distance" signal; Price started at once, without any hesitation—he did not lose a moment; the train was approaching at a very fast pace, so much so that I at once saw it would be impossible for the man to get to the points in time; the signals were all at "danger"; I had occasion to examine them just before, in connection with getting the engine of the Sydney train round; the "distance" signal is about 727 yards from the end of the platform; the points of No. 2 are distant 45 yards from the end of the platform; the distance from the end of the platform to where Price and I were standing was about 45 yards; the up-train was just coming on to the No. 2 points when I noticed the engine wheels suddenly reversed; the train appeared to me to be running free until this took place; the sudden reversing evidently checked the train; when the engine struck it must have been travelling about 6 or 7 miles an hour; any one approaching from Blacktown would see the distance signal from a distance of 350 yards; I have always looked upon Harrison, the driver of the up-special, as one of our best men, both steady and careful—I have never seen him the worse for drink, and I saw and spoke to him on this occasion; Harrison was evidently very much upset, suffering apparently from the shock to his nerves; when I saw him again, about 45 minutes after the accident had happened, he was entirely different, and appeared to have recovered himself; it was 5.38 p.m. when the collision took place; my attention, after this time, was devoted to working the trains; my orders during the day were given through the station-master, with the exception of the order I gave to porter Price to go to the points; when I threw up my hands I ran towards the end of platform, and was standing just clear of the brake of the train, which was standing at platform.

H. RICHARDSON, 27/12/79.

John R. Thompson:—I am Station-master at Parramatta, and was engaged carrying on the duties of the station yesterday, under Inspector Richardson's supervision; I received a printed notice of the running of the Hawkesbury specials; I received a telegram from Blacktown, which I handed to Mr. Richardson immediately, at 5.36 p.m.; I looked at my watch just after I handed him the telegram; it was arranged that engine of train which had just come in from Sydney should be got round, and this was done; I then went across Nos. 1 and 2 roads towards semaphore, for purpose of giving porter Price a signal when to let the up-special through No. 2 road; I heard Mr. Richardson order Price to go to the points, and this was immediately after I caught sight of the engine approaching from Blacktown; my signals were at "danger"; I don't think more than a minute could have elapsed from the time I saw the engine until the collision took place; when I first saw the approaching engine she was just coming out of the cutting beyond the Park platform; when I left Inspector Richardson and Price we were as near as possible opposite the lamp-room door; I was standing at the semaphore when collision took place; I noticed that the up-special was not pulling up, but coming on; I should say train was travelling about 12 miles an hour over Church-street Bridge; it is not usual to have a man standing at No. 2 points; the points are kept under lock, and a man is only sent to attend to them when a train or engine is expected and has to be let through the loop; I do not consider it necessary to keep a man there on special occasions.

JOHN R. THOMPSON.

William Price, Head Porter, Parramatta:—I remember receiving instructions from Mr. Richardson and the station-master to get the engine of the train which had come in from Sydney shunted round as quickly as possible; I had the engine cut off and run into No. 2 road; the station-master told me to stand by, and he would give me a signal when the No. 2 loop was clear; I was standing on the platform within 2 or 3 yards of Mr. Richardson when I saw the special coming; she was then between the two bridges nearest the station; I then started to run for the points, but the crowd of passengers somewhat interfered with my progress at first; when I got to the end of the platform the up special was just over No. 2 points; I then turned back, and called to the passengers to get out; as far as my knowledge of the traffic of the station serves me, the special was coming in at a greater speed than I have ever seen a train coming in with signals against her; she was coming at a great speed when I first saw her—much quicker than when she got to No. 2 points; the signals were all at "danger"—I examined them before I had the engine shunted; Charles Roberts turned the engine of the train from Sydney into No. 2 points; I think if I had seen the train immediately it came out of the cutting, that I might have reached the points first, but I could not possibly do so as it was, for I didn't see the train until she was between the two bridges.

W. PRICE.

John Winfield:—I am Platform Porter, and in charge of the signals—I was in charge of them yesterday afternoon; the signals were at "danger" at the time of the accident; they were put at "danger" when the No. 8 up Western passenger arrived, and remained at "danger" until after the accident had happened.

JOHN WINFIELD.

George E. Young:—I was standing in the balcony of my house immediately opposite the station when my attention was drawn to Mr. Richardson and the head porter, Price, who threw up their hands, when almost immediately I saw a train approaching coming across the Church-street Bridge at what I considered a very rapid pace; I am constantly in the habit of seeing trains come into Parramatta, but never saw one come at such a pace across the bridge; I ran across to the station, and on my way the collision took place; my attention was particularly drawn to the driver by two or three residents of Parramatta, and my first impression was that he was under the influence of drink, but after seeing the man, and conversing with him this morning, I am satisfied that the impression was an erroneous one, and that the expression on his face which led me to infer that he was not sober is a natural one.

Mr.

Mr. Carlisle :—We arrived at Blacktown at 5:24, left Blacktown at 5:25 p.m., changed engines at Blacktown, and No. 15 engine was attached to the train; before leaving Blacktown I instructed the officer in charge, Mr. Fitzsimmons, to send telegram to Parramatta that special would run in front of the 5:40 p.m. up-suburban, which was in accordance with previous practice; after leaving Blacktown at 5:25 p.m., we ran at about the rate of 40 miles per hour, until we reached the viaduct, about a mile from Parramatta; steam was shut off there and tender brake applied, but rails were slippery, and brakes did not appear to hold; when we reached the Park platform I observed the train standing at station, and no one at the points leading into the No. 2 loop siding; at this time driver and fireman were using every means to pull up; the driver reversed at the Domain platform; as soon as we reached the second bridge from station I observed Mr. Richardson on the platform holding up his hands, but no more could be done to stop our train; driver had whistled for guards' brakes I think about the Domain platform; the train I was on consisted of nine first-class carriages, inclusive of a composite brake; I remember the driver asking me whether I thought there would be any special train at the Domain platform—this was two or three miles back; I consider Harrison, who was driving the train I was with, one of the most careful men in the department; he was, I consider, sober and fit to take charge of a train—there was no sign of intoxication about him; after the accident had occurred, Mr. Fosbery, Inspector General of Police, spoke to me, and said that some people were remarking that the driver was not sober, and wished me to see; I went again on to the engine, but I could detect no sign of intoxication about him, and I instructed him to take his train on to Sydney; Mr. Fosbery himself expressed his opinion that the driver was sober; after train had started for Sydney, Mr. Evans also came and informed me that some people were objecting to his having charge of the train, and suggested that Mr. Driver, M.P., should be requested to see Harrison; Harrison was called off his engine, and Mr. Driver stated that he considered him sober; I then got on the engine and accompanied the train to Sydney; it was as near as possible 5:39 p.m. when we struck the carriages at a speed, I should say, of about 5 miles per hour.

THOS. CARLISLE.

Mr. Carlisle further examined, 28/12/79 :—Left Clarendon at 4:50, engines attached were Nos. 5 and 129; I was not looking out for signals; I do not think that guard's brake was whistled for until after distance signal was passed; before coming to Domain platform I noticed that the fireman and driver were aware of the signal being against them, from the manner in which fireman applied his brake; to the best of my recollection the engine was reversed between the two bridges nearest Parramatta.

Driver Edward Harrison :—I was driver of the up special which left Blacktown at 5:29 p.m. yesterday afternoon; the Traffic Manager was on the engine with myself and fireman; the Traffic Manager asked me to make Parramatta before the 5:40 p.m. up suburban train left; the time to leave Blacktown, according to time-table received from Mr. Cobb, was 5:40 p.m. I told Mr. Carlisle I could do it, and ran accordingly; when within 200 yards from "distance" signal, I saw it "danger"; I was not running prepared to pull at "distance" signal, but at the station; after passing "distance" signal had brakes more tightly screwed on; I also whistled for guard's brake, but found that brakes could not hold the train, on account of the greasy state of the rails from a shower of rain; finding brakes could make no impression on train, I reversed engine and had the sand running; this was between the two bridges nearest the station; this made some, but very little impression on the train; I then noticed a train standing at platform and no one at points; my engine was single-wheeled with brakes on the tender—no brake on engine; in consequence of being requested to make Parramatta by a certain time, I did not approach the "distance" signal at such a speed as to allow me to pull up at it; I did not expect it to be against me, and I understood my train to have been telegraphed on from Blacktown; the Traffic Manager told me that he wanted to make Parramatta, and asked me if I could make it, and I said "Yes;" I have run the same train on previous race occasions, and have always found the station clear for me to run through; from this time until I struck the carriages standing at platform I had the whistle open; when my engine struck I was going at not less than seven miles an hour—not more than eight; I can only say I did all I possibly could to stop my train, and afterwards in assisting to clear the wreck away; I was perfectly sober, having had a glass of beer for dinner at 2 p.m., and nothing after that; I had eight six-wheeled and two smaller four-wheeled carriages, one of which was furnished with a brake; this comprised the whole of the train; I know the rule that requires a driver to stop at the "distance" signal; I shut off steam coming under the overhead bridge, from which the gradient is a descending one to Parramatta station; when I said I could make Parramatta, I calculated upon the station being clear; I looked at my time passing over Domain viaduct and it was then 5:38 p.m.; I have driven the same class of engine before, but not with so heavy a train; I was aware that there were ten vehicles on my train (which amounted to fourteen ordinary vehicles) before leaving Blacktown; I did not reverse before passing Marsden-street bridge because I did not perceive until then that there was a train standing at the platform; I did not consider it necessary to reverse before because I reckoned to be passed through one of the loops; I have often run specials through Parramatta, but have always found some one at the points either to steady or to pass me through the loop; I do not run through Parramatta on an average about three times a month; I did not think it necessary to use every means to stop my train when I first saw the "distance" signal at "danger," as I reckoned upon finding a man at the points; I saw the semaphore at "danger," and thought I could approach that far; it is not my usual practice to bring in a train in this manner, but I considered this to be an exceptional occasion, and that having to pass the 5:40 up at Parramatta the station would be prepared for me.

EDWARD HARRISON.

Harrison further examined, 28 December, 1879 :—Did not whistle for guard's brake until after passing distant signal, as I did not think it necessary; reversing is generally the last expedient a driver uses; I did not reverse before, because I did not think it necessary; I thought I should be able to pull up even after passing the distant signal, and before reaching the main signal.

To Mr. Carlisle: Mr. Carlisle did not say anything to me about the signals—he did not tell me to disregard them; I remember crossing over from my side to the fireman's about the Domain platform, with the object of getting a better view of the station.

Walter Hambly, fireman to Harrison :—I do not know the exact time we left Blacktown yesterday afternoon; I remember the Traffic Manager was on the engine, and before leaving Blacktown he said to Harrison, "Push on Ned—we must get to Parramatta to leave before the 5:40"; coming round the cutting, at about

about 20 or 25 miles per hour, I saw the distant signal against us, when I put the brake on and opened the sand gear; I said, "Wo! Ned," and my mate immediately whistled for guard's brakes; finding brakes took no effect, my driver reversed his engine, when he was between the two bridges nearest the station, and kept the engine in that position until we came to a standstill; we cannot see the distant signal from any great distance, and we did not approach it at any greater speed than from 20 to 25 miles per hour; steam was shut off, I believe, before we came to the overhead bridge, which is the spot at which most men shut off.

WALTER HAMBLY.

William H. Chandler, Guard:—I was guard of the first up special leaving Clarendon platform yesterday afternoon; we left Clarendon at 4:55 p.m., arrived at Blacktown at 5:28 p.m., and left at 5:30 p.m.; we made a very quick run until we came within sight of the distant signal; I had my brake hard on at the time; it is usual to apply the brake at that spot; immediately after passing distant signal the driver whistled for the brake, which was hard on at the time, and I strained it with all my might upon hearing the whistle; the brake was a light one (four wheels), and without sand gear; I used every exertion in working the brake, but it did not seem to check the speed of the train much; I looked at my time after the accident and found it to be 5:39 p.m.; my train was composed of ten vehicles—eight of them six-wheeled and two four-wheeled, one of which made the van.

WM. H. CHANDLER.

Telegrams.

From Station-master, Blacktown, to H. Richardson, Parramatta.
First special just left at 5:30. Your message understood.

Memo. from Traffic Manager, Blacktown, to Station-master, Parramatta.
Let us go in front of 5:40 train.
The above received at Parramatta at 5:33 p.m.—26/12/79.

From Station-master, Parramatta, to Secretary of Railways. December 31/79.
The No. 8 up Western train left this station on Friday last, 26th inst., at 5:33 p.m.

From Station-master, Junction, to Secretary, Redfern. December 31/79.
Western train arrived at 5:40 p.m., and left at 5:43, thirteen minutes late.

No. 2.

Secretary of Railways' Report.

Accident at Parramatta, 26th December, 1879.

I HAVE respectfully to submit for the Minister's information the result of the investigation held respecting the collision which occurred at Parramatta on Friday evening last, the 26th instant, through a special passenger train, which was returning from the Hawkesbury Racecourse, running into a train partially filled with passengers, which was standing at the Parramatta platform.

At the outset I may remark that I was on the spot as soon as possible after receiving information of the accident; as far as lay in my power I saw that everything was done for those who had sustained injuries, and at the same time arranged to hold an inquiry on behalf of the Commissioner on the following morning. This was done, but I did not consider it necessary to employ a shorthand reporter, as it would have tended to make the evidence unnecessarily voluminous and delayed my report to the Minister, which would have been inadvisable in view of the very natural and great anxiety on the part of the public to have information as to the cause of so serious and unfortunate an accident. Mr. Mason, Engineer for Existing Lines,—Mr. Burnett, Locomotive Engineer,—and Mr. Scott, Locomotive Superintendent,—kindly assisted me in conducting the inquiry.

After hearing the evidence of the several witnesses examined, I deemed it necessary that the driver of the Hawkesbury special train should be suspended pending the decision of the Minister, and gave instructions accordingly on Saturday evening.

The particulars of the accident, as elicited at the inquiry, are as follows:—Inspector Richardson was engaged on the 26th in superintending the traffic arrangements between Sydney and Parramatta, and was at the latter station on the afternoon and evening of that day. He had been supplied with a printed notice from the Traffic Manager's office of the times at which the specials would return from the Hawkesbury Racecourse, and according to this notice the first was timed to leave the course at 4:55 p.m., Blacktown at 5:40 p.m., and to pass through Parramatta at 6 p.m., for which Mr. Richardson arranged accordingly.

At 5:34 p.m. a train from Sydney arrived at the Parramatta platform, and about the same time a telegram from the Traffic Manager—who was then at Blacktown with the first return special—was handed to Mr. Richardson, by the station-master (Mr. Thompson), the latter officer says at 5:36 p.m. This telegram said, "Let us go in front of the 5:40 p.m. train." An arrangement was then made between Mr. Richardson and the station-master, and immediately carried out, to uncouple the engine of the train just arrived from Sydney and get it round to the other end of the carriages. It was further arranged that head-porter Price should go to the points leading into the loop through which the special would require to be passed, and open them when signalled to do so by the station-master, who had himself to go over to the semaphore, so that he would be able to see when the engine was clear of the loop, and then signal to Price to open the points for the expected special.

Immediately after these arrangements were made and the three officers named had just separated, another telegram was handed to Inspector Richardson by the telegraph operator; this telegram was from the station-master at Blacktown, and stated that the special left Blacktown at 5:30 p.m. Mr. Richardson therefore at once ordered Price, who was at the time within a few yards of him, to lose no time in getting to the points, as the special had left Blacktown.

It

It is, I think, necessary to remark here, that the Parramatta distant and main signals being at "danger," whatever orders were issued or arrangements made in connection with the reception and passing through of this special train were not given with any other idea than that of avoiding delay to the said train, and to allow of the signals being lowered at the proper time, for while they remained at danger the train, according to all rules of railway working, must be regarded as shut out. It would not, therefore, occur to a railway servant that under such circumstances the question of the safety of a train was involved.

To resume, however: Mr. Richardson had only just read the second telegram and given direction to porter Price, when he caught sight of the train running into the yard at such a speed as to render it, in his opinion, impossible for Price to get to the points in time, and he therefore at once shouted to the passengers, who were crowding into the carriages at the platform, to leave them or they must be killed.

Before Mr. Thompson could get off the platform to proceed to his post at the semaphore, he also caught sight of the special running in rapidly, and before more than another minute had elapsed the accident had taken place—not later, according to both Mr. Richardson and Mr. Thompson, than 5:38 p.m.

In porter Price's case, it would appear that he had not gone many yards in the direction of the points, after getting directions from Mr. Richardson, when, as he states, he too saw the train approaching at a speed he never saw equalled by a train coming into Parramatta. When first he saw the train it was between the Marsden and Church Streets bridges, or about a distance of 200 yards from the points leading into the loop to which Price was going. He states that he ran for the points, considerably impeded at first by the passengers crowding the platform, but he had not got beyond the end of the platform when the train was over the points, and all he could then do was to run back and to do what he could to get the passengers out of the carriages.

I shall now proceed to state the particulars as regards the special train which, according to the printed notice, was timed to leave Blacktown at 5:40 p.m. Having arrived there from the course earlier than was anticipated, the Traffic Manager (who accompanied it) determined to proceed to Parramatta at once and get ahead of the train that leaves that station daily at 5:40 p.m.

Having instructed that a telegram to that effect was to be dispatched to Parramatta, and after asking the driver if he could make Parramatta in time, and receiving a reply in the affirmative, the train left Blacktown at 5:29 or 5:30 p.m.—the driver says the former, but the guard and station-master at Blacktown give the latter; Mr. Carlisle says 5:25 p.m., but this I consider must be an error, because if the train had left Blacktown at 5:25 p.m. and arrived at Parramatta at 5:39 p.m., which Mr. Carlisle states was the case, it could not have run at the speed which he states that it did run, viz., 40 miles per hour, the two statements being inconsistent. I have little doubt that Mr. Carlisle must be mistaken in giving the time as 5:25 p.m.

Upon arriving at the overhead bridge at a distance of $1\frac{1}{4}$ mile from Parramatta, steam was shut off and brakes applied, and, upon sighting the distant signal (which is 770 yards from the station buildings, and can be seen 350 yards from the western side), both driver and fireman observed it to be at danger, and the latter appears to have screwed the brake hard down. The guard's brake had also been put hard on before then, but the brakes, it was perceived, had little effect. There was evidently no pretence of stopping at the distant danger signal, and it was not until after passing it that the guard's brake was whistled for by the driver. This being, however, as I have stated already, hard on, the guard could only strain it again, and subsequently worked it as he states, to the best of his judgment and power. When the train was at a distance of about 200 yards from the loop points the driver states that he reversed his engine, and it was then observed that a train was standing on the platform, that no one was at the points, that Inspector Richardson was making hand signals for the approaching train to stop, and that the danger into which they were running became apparent to those on the engine.

There can be no doubt that from this time the driver left no means untried to stop his train, and attract by whistling, the attention of the station officials to the danger of the position. The speed of the train could not, however, be reduced to less than seven or eight miles an hour when it struck the carriages at the platform. The station officials say at 5:38 p.m., and those on the engine 5:39 p.m.; I prefer to take the former as the more correct time, so that if the train left Blacktown at 5:29 p.m. it took only nine minutes to run $7\frac{1}{2}$ miles. These are the simple facts of the case as revealed by the inquiry, and as I believe they occurred.

From the facts already stated, there appears to me no ground whatever for blaming or reflecting upon the officials at Parramatta. There can be no doubt that in the face of all the danger signals the special train ran into Parramatta at a most unusual and unwarrantable speed, precluding altogether the possibility of any provision being made to avert the consequences of so flagrant a breach of the rules. Apart from porter Price's own positive assertion as to the impossibility of his reaching the points in time to turn the special into the loop, his statement is confirmed by the fact that when Inspector Richardson first caught sight of the train, an immediate and certain impression was made upon his mind that Price had not the remotest chance of reaching them in time, and that an accident was inevitable. That such was the impression made is evident by his (Mr. Richardson's) instant efforts to get the passengers out of the carriages standing at the platform.

The very fact that all the up signals were at danger was, or should have been, all that was required to secure the perfect safety of everything standing in the station-yard. The statement alluded to in the evidence, that on previous race occasions a corresponding train had always run through and found a man at the points is entirely beside the question. On these occasions it was distinctly signalled and authorized to pass through, but on this occasion it was as distinctly signalled not to approach.

With respect to those in charge of the engine the case is very different. The person upon whom the responsibility of the accident principally and directly rests is, in my opinion, driver Harrison, who admits in the most truthful and straightforward manner that the way in which he ran his train into Parramatta was contrary both to the rules and his usual practice.

"Rule 359. When a train or an engine approaches an advanced signal at danger or any other danger signal, the engineman must come steadily so as to stop at the danger signal, and having first ascertained that there is no obstruction, he is immediately to move his train cautiously within the protection of such signal, and draw very slowly on so far as the circumstances will allow. If at a station, the main or station signal, if maintained at danger, must however be approached in strict conformity with rule 360."

"Rule 360. When an engine or train approaches any main or station signal set at danger, the driver must take care to keep his train in command, so as to stop, if necessary, at the outside shunting points of the station; and he must not in any case foul such points or come up to the platform until he has

has ascertained that the line is clear, and that it is perfectly safe for him to do so. The driver must in all cases approach cautiously any station where his view of the line throughout the entire station-ground is obstructed, in consequence of the line being on a curve, gradient, or from any other cause."

"Rule 373. The driver, on receiving the distance danger or any other danger signal when approaching a station or junction, must stop his train outside of that signal; but immediately he has ascertained that the line is clear beyond such signal, he must, if possible, go on very slowly to the station or junction, so as to be perfectly secure from any following engine or train. Should he be compelled to remain outside, the guard, or, in his absence, the fireman, or some other competent person, shall immediately go back 800 yards with a red signal, to stop any coming trains."

"Rule 382. In approaching junctions, and before arriving at stations, the driver must reduce his speed in proper time, so as to have the engine completely under his command, and enable him to stop altogether, if necessary, before arriving at a junction, or before entering a station, and he must at all times be careful to stop exactly at the proper part of the platform; and to do this properly engineers in bringing up their trains are to pay particular attention to the gradients, state of the weather, and condition of the rails, as well as to the length of the train; and these circumstances must have due weight in determining when to shut off steam. If necessary, he must use the signals ordered for the guard to apply his brake."

He confesses that both distant and main signals were against him, and gives as his reasons for running his train within sight of the distant signal at such a speed as not to permit of its being obeyed in the event of its being at danger, his anxiety to meet what he no doubt considered were the wishes of the Traffic Manager, and having been given to understand by the Traffic Manager that his train had been telegraphed out from Blacktown to Parramatta he expected a clear road. Harrison evidently did not expect to have to contend with a danger signal, hence his reasons for not reducing speed to a greater extent than was the case before sighting the distant signal. After passing that signal he still considered that he would, if necessary, be able to pull up his train before reaching the platform, and so did not reverse his engine as soon as he would otherwise have done.

He found also, when too late, that he had not sufficiently calculated for the unusual weight of his train, the limited amount of brake power at his disposal, or the greasy state of the rails. These points should be taken into consideration in fairness to Harrison, although they cannot be accepted as an excuse for his serious error.

While, however, it appears perfectly clear that the principal offender is the driver, the Traffic Manager must to some extent be regarded as having been in charge of the train; and the presence of such an officer is generally supposed to constitute an additional guarantee that the train he accompanies will be safely and properly worked, and that, at all events, his presence will act as a check to anything in the shape of a breach of the rules. Having while at Blacktown determined upon making a change in the running time of the special, every precaution should have been taken to prevent such change from resulting in any harm. It is evident, however, that when the train left Blacktown nothing was known as to whether or not the telegram respecting the altered arrangements had been received at Parramatta, and consequently, it could not have been known whether or not Parramatta would be either ready or able to let the special pass through. Under such circumstances as these, it is much to be regretted that no word of warning or caution was given to the driver which would have had the effect of checking the speed at which he was driving when so close to Parramatta station.

There is another matter also which cannot be overlooked, viz., the amount of brake power attached to the special train. It would only have been prudent, considering the number and weight of the vehicles on the train, to have attached another brake-van and guard; and, seeing the Traffic Manager accompanied the train, it is to be regretted that this also escaped attention.

I see no alternative, notwithstanding his previous very excellent character, than to recommend the dismissal of driver Harrison.

In the Traffic Manager's case, I can only repeat what I have before stated,—it is very much to be regretted that, under all the circumstances of the case, greater prudence was not exercised on his part.

As far as I can ascertain, the following are the names of those who received any injury from the collision:—Joseph Murphy, Enmore; Robert Turkington, St. Peter's; Annie Bradshaw, "Captain Cook Hotel"; Josephine Harris, "Captain Cook Hotel"; Mrs. Gardiner, Abercrombie-street; Mr. Gardiner, Abercrombie-street; Mr. Broughton, Scone; Mr. Frankfort, 619 George-street; Mr. Goldsmith, Vine-street, Eveleigh.

With the exception of two of these cases the injuries are, as far as can be gathered, not of a serious nature, and in the other two cases the injuries, I have every reason to hope, will not prove so grave as was feared.

The consequences of the collision to the rolling stock are as follows:—Two second-class vehicles completely destroyed, one ditto ditto materially injured, one engine very slightly injured.

The total cost of replacing and repairing is estimated at £836.

The witnesses examined at the inquiry were:—Mr. Carlisle, Traffic Manager; engine-driver Edward Harrison; fireman Walter Hambley; guard William H. Chandler, travelled from Blacktown with the special train; inspector Richardson; station-master Thompson; head porter William Price; and porter Winfield; officials at Parramatta; Mr. G. E. Young, resident of Parramatta.

I enclose the notes of evidence which I took at the inquiry.

D. VERNON,
(For Commissioner for Railways).

No. 3.

Minute of Secretary for Public Works.

Railway accident at Parramatta, December 26, 1879.

I HAVE read over carefully the papers in the above case, and cannot help expressing a feeling of deep regret that, on an occasion such as the holiday of the 26th December last, when so many people were seeking recreation on our railways, an accident should have occurred which might have resulted in most terrible death to a large number of passengers; and it is painful to have to come to the conclusion that this was brought about principally by the want of care of the driver of the engine and the Traffic Manager.

Manager. As it was determined at Blacktown to alter the running time of the special, it was the duty of the Traffic Manager to have exercised the greatest possible caution regarding the approach to Parramatta, particularly considering the very short space of time which would elapse between the period of the telegram from Blacktown being dispatched and the time of arrival of the train at Parramatta station, which the evidence shows amounted altogether to only 9 minutes.

This circumstance alone shows the necessity for the most abundant caution, and in the face of the possibility of the telegram not having reached its destination, or from other causes the Parramatta station not being open to receive the special, it does not appear that the Traffic Manager in any way suggested to the engine-driver the necessity of exercising that caution which should have been shown on the occasion. Driver Harrison, who it appears was working under the directions of the Traffic Manager, started from Blacktown at 5.29 p.m., with the view of passing the train arranged to leave the Parramatta station at 5.40 p.m., and to do this, ran at what must have been an unusually rapid pace; he shut off steam on approaching the distant signal, when it was found that the brakes had very little effect upon the velocity of the train. The driver asserts that he had a greater number of carriages than is usual with that engine, also that the rails were greasy from a recent shower; all these, I take it, are contingencies which it was the duty of the driver to be prepared for, especially when travelling at so fast a rate as he must have been travelling some part of the distance between Blacktown and Parramatta, nor does it appear to me at all to palliate the circumstance by stating that he expected the station to be clear. He ought to have regarded the signal, which it was his duty to do.

I regret having to perform the duty of visiting with censure and punishment two officers of the department who, in their respective spheres, have, up to the present time, merited well of the Railway Service, and it is the more to be regretted that in this case they did not exhibit the same care and prudence which they have been remarkable for hitherto. The Traffic Manager, who was on the engine with the driver, should have warned the latter of the necessity for extra caution, with a train heavier than was usual for the engine to work, and in view of the possibility of his telegram not arriving at all, or of the station being closed to them from other causes. All these circumstances ought to have pointed out to the Traffic Manager the necessity of the greatest possible caution. It is, moreover, more than probable that the driver would, in some measure, feel partially relieved of his responsibility by the presence on the engine of the Traffic Manager, and not be found showing the same caution as if on his engine alone, when his responsibility would have been undivided.

Under the circumstances, I feel it to be necessary to express my strong sense of disapprobation of the conduct of the Traffic Manager, Mr. Carlisle, who will be mulcted in the penalty of one month's salary.

Driver Harrison will be, and is hereby, disgraced to the position of third-class fireman.

I avail myself of the opportunity of expressing my warm approval of the conduct of Inspector Richardson, to whose prudence and readiness in giving alarm is due the fact of so many lives having been saved.

J. L.

No. 4.

The Secretary, Railway Department, to The Commissioner.

Parramatta accident papers.

In handing the papers connected with this case to the Commissioner, I think it desirable, in view of the criticisms which have appeared in the public Press, to avail myself of the opportunity of offering a few words of explanation with respect to my action in the matter.

In the *Sydney Morning Herald* of the 29th December, it is stated that a reporter presented himself at the office where the inquiry was being held, and was refused admission, on the ground that the matter was one of no "public interest," &c. As far as I am concerned I can most emphatically pronounce this to be a misstatement, nor do I know that any foundation exists for asserting anything of the kind. I explained to some gentlemen of the Press the purpose of the inquiry, and the reason why it was out of place, as well as out of my power, to make public information which it was my duty to lay before the Minister for Works, from whom, if they would wait upon him, they would be able to obtain all the information they could desire. It is an equally mistaken assertion, so far as my knowledge extends, that any witness was cautioned against communicating any information to the Press, although I am glad to find they had the good sense to act as they did.

The accident being of so serious a kind, I considered that no time should be lost in placing before the Minister such information as would enable him to understand and deal with the case. Hence my reason for holding an immediate investigation.

From personal inquiries made by me on the evening of the accident, the reason and explanation of what had occurred appeared so obvious that I considered it would be a waste of time to hold a more formal and lengthened inquiry than was necessary to make plain the cause of the accident, and upon whom the responsibility lay. Hence the comparatively brief notes of evidence taken down. Each man's statement was, however, carefully read over to him before his signature was attached. I do not hesitate in saying that half a dozen questions were all that were really required to enable a practical man to arrive at a clear and just decision on the subject.

For example, in seeking to determine the cause of the accident, we are met at once by the undisputed fact of the *Parramatta signals being at danger*, which at once relieves that station of all direct responsibility, and fixes it upon those in charge of the special train. Then we have another indisputable fact, that this was the *proper* position for the signals, seeing that trains were arriving and departing in quick succession.

A long and heavy train had left Parramatta for Sydney at 5.33 p.m. (which only reached the Junction at 5.40, and left there at 5.43), while another train had arrived at the platform from Sydney at 5.34. Rule 73 (*vide* book of Rules and Regulations) orders that on double lines signals must be kept at danger for five minutes after an engine or train has proceeded on its journey, and it follows, therefore, that even if the yard could have been cleared, the signals should not have been lowered until 5.38, by which time the accident had happened.

As far as the Parramatta staff is concerned, the only question, therefore, which remains to be answered is—Could anything have been done more than was the case to avert or mitigate the consequences in such an emergency? A very little consideration will, I think, settle this question. An examination of the

the telegraph tapes shows that the instruments could not very well have ceased working before 5:34 p.m. By the time the messages were transferred to paper and delivered in the first instance to the station-master, read and taken by him to Inspector Richardson, it may well have been, as Mr. Thompson states from an examination of his watch it was, 5:36 p.m. Mr. Thompson had consulted and left Mr. Richardson before the other message announcing the departure of the train from Blacktown reached the latter officer's hands, and it must then have been fully 5:37 p.m. After opening and reading the message, and giving porter Price instructions to be off to the points, Mr. Richardson looked up and saw the special sweeping into the yard, by which time the 38th minute past 5 (the time of the collision) must have been half or three-quarters spent.

Porter Price states he did his best, but could not get beyond the end of the platform. The train, when he first caught sight of it, he says, was between the two bridges, and from where Price started he must have had 80 or 90 yards to run, as against about 200 yards which the train had to travel before reaching the points.

It is not difficult to imagine which would win the race.

It has been suggested that if Inspector Richardson had rushed for the points immediately he perceived the train coming, time would have allowed of his reaching them soon enough to turn the special into the loop road. Apart from the fact that a man was already running for these points, Mr. Richardson states that there was no time for doing anything of the kind. He did, in my opinion, a much more sensible thing in warning the passengers and clearing the rear carriages of the train standing at the platform. This he succeeded in accomplishing. Had he attempted the other course and failed, the fate of the passengers, who, unaware of the danger, were pressing into the carriages, would, I fear, have been a terrible one. The propriety of having on holiday occasions a man stationed at the points, as a provision against accidents, has been hinted at, but such an idea is perfectly unreasonable. If accidents are to be anticipated to such an extent as this, and a man is required at one set of points, a man must be stationed at every set, and *signals* being recognized as no proper protection might as well be dispensed with.

Of course, had the officials at Parramatta known that a train was going to break through their signals and rush into the yard at such a rate—that a life and death matter was impending,—why of course a little more might possibly have been accomplished; but they neither knew nor anticipated anything of the kind, and all such speculations are idle. If railway servants are not to be justified in depending upon their signals for protection, no one can say where their responsibility ends.

There can be no difficulty, therefore, in answering the last question.

The staff at Parramatta cannot reasonably be expected to have done more than they did in the sudden emergency, for the bringing about of which they were in no way responsible.

The case as against Parramatta may therefore be dismissed, and the most lengthened inquiry could result in nothing more. The responsibility for what occurred rests clearly with those in charge of the special train, and no one with the slightest knowledge of the rules and necessities for safe and efficient railway working will for a moment dispute that the *driver* is directly and principally responsible for the accident. He is not, like the guard, an employé of the Traffic Manager's staff; he has his own rules, which clearly define his duties and responsibilities, and he is required to take no instructions from either a guard or a Traffic Manager which in his opinion are inconsistent with the proper and safe working of his engine;—the entire control of the train is in his hands (not excluding the guard's brake). Harrison's evidence is straightforward and truthful, but it is perfectly plain that he paid little or no attention to the distant signal, and altogether miscalculated what he could do between that and the main semaphore. I have no hesitation in saying that if Harrison's case were submitted to a Jury composed of twelve of our best drivers they would unanimously pronounce the same verdict in his case as I have done.

Although the presence of a Traffic Manager in no way lessens a driver's own responsibility (which is to the Locomotive Engineer and not to the Traffic Manager), it should certainly have been of greater service to a driver than appears to have been the case in the present instance. A Traffic Manager takes his stand on the engine for the purpose of being able to communicate directly, instead of through the guard to the driver, all information respecting the road in advance of him, &c., and which would be serviceable to him in working his train. In a secondary degree, I fully admit that the Traffic Manager must accept a share of the responsibility for what took place. With regard to the question of brake power,—while I consider another van and guard should have been attached to so heavy a train, their absence in no way relieves the driver.

When a driver takes charge of a train he sees the brake power he has to depend upon, and should be guided accordingly. The Traffic Branch is, however, responsible for the making up of the train, and it would have been better, in my opinion, had another van formed a part of it.

Had the inquiry extended over a month no other verdict could have been arrived at than that the responsibility for the accident rested upon those in charge of the special train, the driver being the principal offender, and the Traffic Manager being also responsible, but in a much lesser degree.

D. VERNON,
10/1/80.

No. 1.

The Traffic Inspector to The Traffic Manager.

Extract from Traffic Inspector's Report on Moss Vale, dated 9/6/79.

THERE is a large quantity of heavy timber shipped at this station. The present approach to the siding for loading is not sufficient. There is a space between the goods shed and dock 240 feet by 30 feet requires pitching and ballasting; at present the timber waggons are sinking axle deep all along this place.

There is a bank on the north end of the goods shed 130 feet by 20 feet by 4 feet requires removing. This will give additional room for ten trucks to be discharged or loaded.

The quantity of goods in and out has so much increased that these additional improvements are necessary.
Traffic Manager. A.C.

On personal inquiry and examination of the above station, I found that the alterations, additions, and improvements suggested by Mr. Crawford are necessary.—THOS. CARLISLE, 27/6/79. Commissioner.

In approving of this, I think it would be well to consider the proposal made some time since to obtain a road from the Old South Road to the goods-shed. This would be a great improvement.—J.L., 11/7/79. Mr. Mason, B.C., 18/7/79.—CH. A. G. I will instruct Inspector Lewton to carry out the work recommended by Traffic Manager. Cost will be charged to Schedule G.—W.M., 21/7/79. Commissioner. Traffic Manager to see.—G.B., B.C., 23/7/79. Inspector Crawford to see.—T.C., 24/7/79. Seen.—A.C., 25/7/79. The Commissioner.—T.C., 26/7/79.

No. 2.

Petition from Residents of Burrawang, &c., respecting approach to Moss Vale Railway Goods-shed.

To the Hon. John Lackey, Esq., M.L.A., Minister for Works.

The Petition of the undersigned landholders, principally residents of Burrawang, Robertson, and Kangaroo Valley,—

RESPECTFULLY SHOWETH:—

That for some time past your petitioners have laboured under serious disadvantages through the want of a second approach near the cattle yards to the goods-shed at Moss Vale.

That the traffic with produce from the districts abovenamed to Moss Vale has nearly doubled within the last two years. Hitherto the whole of the produce was brought in by carriers, but now most of it is delivered by farmers themselves, hence there are five vehicles arriving now for one a year or two ago.

That since the establishment of Barrett, Hayter, & Co.'s saw-mills and oatmeal mills at Burrawang there are several teams of bullocks engaged conveying timber, &c., to and from these mills. These drays convey 8 tons at a load, and are drawn by sixteen bullocks. Turning one of these teams round the very sharp turn to the present approach is attended with the greatest difficulty, and through them accidents have nearly occurred to those in buggies or lighter vehicles visiting the station.

Your petitioners would also point out that on the arrival and departure of trains the roadway at the station is often blocked up with buggies, carriages, &c., making it extremely dangerous to have heavy teams passing through them.

That your petitioners are all consignors of produce by railway from Moss Vale, and that nearly three-fourths of the produce goes from the eastern portion of the district; that to get to the goods shed they have at present to travel 26½ chains further down a steep hill and round a sharp turn, making in the return trip a distance of 53 chains more than if an approach to the shed was made direct from the old south road near the railway stockyards, which is only one and a quarter (1¼) chains distant.

Your petitioners therefore humbly pray that on account of the narrowness and inconvenience of the present approach—the increase of traffic to the goods-shed—the shortness of the proposed road—the avoidance thereby of the hill to the present approach—and the very small cost of forming the proposed new roadway—you will be pleased to take these premises into your earnest consideration, and grant their request.

And your petitioners, as in duty bound, will ever pray, &c.

Dated at Burrawang, this 24th June, 1879.

J. CAMPBELL, J.P.

D. MOFFITT, J.P.

And 107 others.

The Commissioner will recollect that I called his attention to this matter (verbally) a few days ago. Perhaps it would be well that the facility were given. I have no doubt it would be a great convenience to the residents of the districts named within, and would give much more direct and easy access to the goods shed.—J.L., 22/7/79.

Will Mr. Mason say what he proposes to do. The Minister's views were expressed on Minute Paper re extra siding at Moss Vale sent to Mr. Mason on 18/7/79.—CH. A. G., B.C., 22/7/79.

I have no proposal to make about this. As far as I can see, this second approach might be dispensed with. It would sever our land and only save a distance of 15 chains, and the estimated cost is £563 13s. It might also prove inconvenient if any further siding accommodation had to be put in on that side of the goods-shed.—W.M., 5/8/79. Commissioner.

The representations made show that the present approach is inadequate, and even dangerous. I should like to have the Traffic Manager's report.—CH. A. G., 14/8/79.

Additional

Additional approach to Moss Vale Goods-shed.

With reference to the enclosed petition for an additional approach to the Moss Vale Goods-shed, I find on inspection that I would not be justified in recommending such a large expenditure without some more substantial benefit resulting either to the department or the public.

On reference to the enclosed plan it will be seen that not more than 250 yards can be saved in the distance by making the proposed road; the gradients in each case will be about the same, say 1 in 20.

As to the danger in turning round the sharp angle of the present approach to the station, this is more imaginary than real, and nothing short of reckless and careless driving could cause accidents. The approach might be improved by removing a small portion of the fence, which could be done by three or four of the permanent way men in a few hours.

The proposed road would be about 6 chains long and half a chain wide, with a gradient of about 1 in 20; there will be about 5 feet of earth to be removed at the deepest part, reduced to nil at 70 or 80 yards.

It is possible that it may be necessary to put in a siding on the eastern side of the yard; if so the proposed road would be in the way.

I think under the circumstances it would not be desirable to incur the large expenditure and possible inconvenience without very careful consideration.

THOS. CARLISLE,
25/8/79.

The Commissioner.

No. 3.

Captain Onslow, M.P., to The Under Secretary for Public Works.

Sir, Camden Park, Menangle, 1 November, 1879.

I am informed that some time ago a petition was sent to the Secretary for Public Works from certain residents at Burrawang, praying that a new road might be opened to the goods-shed at the Moss Vale Railway Station; will you kindly inform me if anything has been done in the matter.

Yours truly,
ARTHUR ONSLOW.

Captain Onslow has called to know what answer he can have to this petition.—D.V., 6/11/79. The Minister, after making full inquiry, does not consider it desirable that the road approach referred to should be made, but steps will be taken to improve the present approach.—CH.A.G., 7/11/79.

Inform Captain Onslow. Mr. Mason, B.C., 8/11/79.—G.B. I should like to know in what respect it is desired to have the existing approach improved.—W.M., 14/11/79. The Commissioner. The approach, as shown in accompanying sketch, is at a very acute angle at point marked A—this is to be rounded off a little.—CH.A.G., 24/11/79. Mr. Mason, B.C. Mr. Lewton to carry out improvement as shown in sketch.—W.M., 28/11/79.

No. 4.

The Commissioner for Railways to Captain Onslow, M.P.

Sir, Department of Public Works, Railway Branch, Sydney, 7 November, 1879.

I have the honor, by direction of the Secretary for Works, to acknowledge the receipt of a petition from the landholders and the residents of Burrawang, Robertson, and Kangaroo Valley, praying for an additional approach to the Moss Vale goods-shed, and to inform you that Mr. Secretary Lackey after making full inquiry does not consider it desirable that the road approach referred to should be made, but instructions will be given to improve the present approach.

I have, &c.,
CH. A. GOODCHAP,
Commissioner for Railways.

No. 5.

Capt. Onslow, M.P., to The Under Secretary for Public Works.

Sir, 26 November, 1879.

I have received the enclosed letter from Mr. Battye, relative to the opening of a second road to the goods-shed, Moss Vale, on which subject I wrote to you some ten days or a fortnight ago. If the Secretary for Works thinks proper to give any reasons, I shall be glad to forward such reasons to my constituents.

Your obedient servant,
ARTHUR ONSLOW.

Railways.—G.H., B.C., 27/11/79.

[Enclosure to No. 5.]

Mr. J. R. Battye to Captain Onslow, M.P.

Burrawang and West Camden Farmers Club and Agricultural Society,
Burrawang, 21 November, 1879.

Dear Sir,

Yours received in reference to the petition for the second approach to the Railway Station, Moss Vale, and beg to state that the petitioners think the Secretary's answer scarcely satisfactory, and they wish you kindly to ask his reasons for considering the second approach not desirable. If they deem his objections reasonable they will let the matter drop, but not otherwise, as it is generally admitted that what is asked for would be a public benefit.

Hoping that you will see the Secretary for Works as soon as convenient to yourself, and thanking you for the interest you have already taken in the matter,—

I am, &c.,
J. R. BATTYE.

Minutes on No. 5.

Let me have the papers relating to the proposed new road to goods-shed, Moss Vale.—J.L., 10/12/79. Commissioner for Railways. Submitted for the Minister's information, as requested by him in his minute of 10/12/79.—CH. A.G., 12/12/79.

No. 6.

No. 6.

Minute of Mr. Secretary Lackey.

Moss Vale.—Additional approach to Station.

I HAVE had several interviews with the Members for the district, who strongly urge the great convenience that it would be to the residents of Burrawang, Robertson, and others in this district if the road approach asked for were made. I have examined the spot myself, and find that the distance of new road is very small, and that the present approach is very inconvenient. Under these circumstances Mr. Mason will be requested to have an outlet from the Moss Vale goods-shed to come out near the entrance to the cattle-yards made. I think where pencil-marked the gradient is not so great. Captain Onslow and Mr. Garrett to be informed. J.L., 7/1/80.

Engineer for Existing Lines.—D.V., 7/1/80. Urgent. Will be carried out as directed.—
W.M., 12/1/80. Comr. Seen.—CH. A. G., 14/1/80.

No. 7.

The Commissioner for Railways to Mr. Garrett, M.P., and Captain Onslow, M.P.

Sir, Department of Public Works, Railway Branch, Sydney, 16 January, 1880.

In reference to your personal representation respecting the additional approach required at the Moss Vale Station, I have the honor by direction of Mr. Secretary Lackey to inform you that the Engineer for Existing Lines has been instructed to have an outlet made from the goods-shed, near the entrance to the cattle-yards, and the work will be carried out without delay.

I have, &c.,

CHAS. A. GOODCHAP,
Commissioner for Railways.

1879-80.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

RAILWAY TRAFFIC.

(WOOL RECEIVED AT SYDNEY STATION FROM 1ST OCTOBER, 1879, TO DATE—WITH NAMES OF CONSIGNEES.)

Ordered by the Legislative Assembly to be printed, 27 January, 1880.

[Laid upon the Table of the Honorable the Legislative Assembly, in pursuance of answer given to Question No. 2 of the Orders of the Day, dated the 27th January, 1880.]

RETURN showing the number of Bales of Wool received daily at Sydney Station from 1st October, 1879, to date, with names of Consignees and Quantity consigned to each.—20/1/1880.

WOOL RETURN.—October, 1879.

30. Reply to Parliamentary Question	9

MR. DANIELS, RAILWAY TRIAL SURVEYOR.

No. 1.

Mr. A. M. Daniels to The Engineer-in-Chief for Railways.

Sir, Railway Survey Camp, Doyle's Receiving House, near Bungendore, 18 July, 1879.
In forwarding to you by this post my account books, I have the honor to explain that the cheques numbered 303, 304, 305, 308, and 309, and deposited with me after payment by the men in whose favour they were drawn, were lost or stolen in transmission through the post. Payment of them was stopped, and cheque No. 138,310, drawn in favour of myself, substituted.

The bank pass-book, if not returned to your office, is still in the hands of the bank, forwarded on the 24th ult.

I have, &c.,

A. MANNING DANIELS.

No. 2.

The Chief Clerk to Mr. A. M. Daniels.

29 July, 1879.

REFERRING to your letter of the 18th inst., relative to certain cheques lost in course of post, I have to request you to forward your private cheque to cover the Public Account cheque, No. 138,310, amounting to £35 9s.

Your Public account must be drawn upon for men's wages and contingent expenses only. Any other claim must be submitted for consideration to the Engineer-in-Chief, and dealt with upon its merits in due course.

W. H. QUODLING.

Books returned under separate cover.

No. 3.

Mr. A. M. Daniels to The Engineer-in-Chief for Railways.

Sir, Railway Survey Camp, near Tarago, 2 August, 1879.

I have the honor to acknowledge receipt of memorandum No. 79/781, dated the 29th of July, 1879, in which the Chief Clerk, referring to my letter to you of the 18th ult., requests me to forward my private cheque to cover the Public Account cheque No. 138,310, amounting to £35 9s.

The second paragraph of the memorandum states: "Your Public Account must be drawn upon for men's wages and contingent expenses only. Any other claim must be submitted for consideration to the Engineer-in-Chief, and dealt with upon its merits in due course."

As I have not drawn upon my public account for other than the objects specified, and have no claim to prefer, I can only conclude that the memorandum quoted was written under some misapprehension of the facts of the case as stated in my letter of the 18th ult.

I am not aware of any circumstance that could be added to the explanation to which I beg to refer you as accounting fully for the item of £35 9s. drawn in my own favour upon cheque No. 138,310 on my public account.

I am, &c.,

A. MANNING DANIELS.

Minute by Engineer-in-Chief for Railways.

From Mr. Daniels' letters it appears that he paid the wages of his men for the month of June by cheques from his public account, and afterwards the men deposited these cheques with him for, I presume, safe keeping. Mr. Daniels afterwards sent these cheques through the Post-office, and they appear to have been lost. He then draws another cheque from his public account to reimburse himself for the loss of the former cheques. In fact Mr. Daniels becomes banker for his men, and then expects the Government to pay his losses. If Mr. Daniels had left the cheques in possession of the men he would have had no occasion to draw a second cheque, and not having done so he must be responsible for the loss, should the first cheques be presented.—J.W., 11/8/79.

Copy of Engineer-in-Chief's memo. to be forwarded to Mr. Daniels.—W.H.Q., 11/8/79.

No. 4.

The Chief Clerk to Mr. A. M. Daniels.

12 August, 1879.

WITH reference to your letter of the 2nd instant, relative to lost cheques, I enclose herewith a copy of the minute made thereon by the Engineer-in-Chief, and have to request a prompt compliance with my memo. 79/781 of the 29th ult.

W. H. QUODLING.

No. 5.

Mr. A. M. Daniels to The Engineer-in-Chief for Railways.

Sir, Railway Survey Camp, Tarago, via Goulburn, 16 August, 1879.

I have the honor to acknowledge the receipt of copy of the minute made by you upon my letter of the 2nd instant, in reply to the Chief Clerk's memorandum, No 79/781. In reply to that minute, I beg to draw your attention to the fact that the original cheques, being crossed to the credit of my account with

with the Bank of Australasia, were unnegotiable, and that therefore the second cheque was merely a duplicate of the first, which remained and must remain unpaid, seeing that their loss was advertised, and payment of them stopped at the Bank of New South Wales.

It is now more than two months since these cheques were stolen, and any probability, if indeed it ever existed, of their being presented is now infinitesimal.

Had the first cheques been cashed before my second was presented and honored, you would have been perfectly justified in charging me with having drawn "another cheque from my public account;" as it is, the latter cheque was simply a duplicate—a second of exchange, the first unpaid.

Your repeated charge, that I have sought to reimburse myself for private losses at the expense of the Government, has been made, I feel sure, without due reflection upon its gravity, and I need scarcely request you to take an early opportunity of withdrawing it.

I have never sought nor do I propose to evade any responsibility in this matter as between the Government and myself, but I must hold myself at liberty to contest any liability towards a person who has to prove that he became honestly possessed of my property.

In any event the Government can sustain no loss, as any action the holder might take would be against me, the drawer, either directly or indirectly through the Bank, which is instructed by me to refuse payment.

I am, &c.,

A. MANNING DANIELS.

Minute on No. 5.

Mr. Daniels appears to me so painfully obtuse on this matter that it is hardly wise to reply to his letter. In the first place, Mr. Daniels had no right to pay his men with crossed cheques; nor had he any right to take these cheques into his possession. Having received these cheques and lost them, he had no right to draw a second cheque from his public account to reimburse himself for the loss of the cheques which he had himself taken possession of from the men. Mr. Daniels must carry out the instructions conveyed to him by memo. No. 781, of the 29th July last. I may add that Mr. Daniels is forgetting his position in writing to me, requesting that I will withdraw some remark made by me in my memo. of the 11th instant.—J. W., 19/8/79. Copy sent to Mr. Daniels.—19/8/79.

No. 6.

The Chief Clerk to Mr. A. M. Daniels.

19 August, 1879.

I FORWARD herewith for your information a copy of the Engineer-in-Chief's minute upon your letter of the 16th instant, having reference to the loss of cheques drawn upon your public account.

W. H. QUODLING.

No. 7.

Mr. A. M. Daniels to The Engineer-in-Chief for Railways.

Sir,

Railway Survey Camp, near Tarago, 23 August, 1879.

I have the honor to acknowledge receipt of copy of the minute made by you upon my letter of the 16th instant.

The terms upon which that minute is couched do not permit me to reply to it in detail; I therefore forward by this mail a copy of the correspondence to the Honorable the Commissioner for Railways, requesting him at the same time to cause an inquiry to be held upon the subject of the correspondence.

I am, &c.,

A. MANNING DANIELS.

No. 8.

The Engineer-in-Chief for Railways to The Assistant Engineer for Trial Surveys.

Mr. Palmer,—

26 August, 1879.

When Mr. Daniels has completed the survey upon which he is now employed, and formed a junction with Mr. Stephens, I have to request that you will instruct him to break up his camp, dismiss his chainmen, and report himself in Sydney.

In the meantime, I shall be glad if you will prepare for me a short report upon the manner in which he has discharged his duties during the time he has been in this department.

JOHN WHITTON.

No. 9.

The Assistant Engineer for Trial Surveys to Mr. A. M. Daniels.

26 August, 1879.

I AM directed by the Engineer-in-Chief to instruct you to break up your camp, and report yourself in Sydney as soon as you have completed your present length of trial survey to a junction with Mr. Stephens' work from Goulburn. You will then discharge all men engaged in the district, and bring to Sydney only such as you may have taken up with you.

HERBERT PALMER.

No. 10.

Mr. A. M. Daniels to The Engineer-in-Chief for Railways.

Sir,

Railway Camp, Tarago, *via* Goulburn, 28 August, 1879.

I have the honor to acknowledge receipt of Mr. Palmer's memorandum, No. 79/877, and to inform you that, in replying to a letter of the Honorable the Commissioner for Railways, received by the same mail, I have to-day tendered to him the resignation of my appointment.

I am, &c.,

A. MANNING DANIELS.

No. 11.

No. 11.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief for Railways.

1 September, 1879.

In accordance with the instructions contained in your memo. 79/872, I have directed Mr. Daniels to break up his party and to return to Sydney on completing his present survey to a junction with Mr. Stephens' work, and I submit the following report upon the nature of the work completed by Mr. Daniels since he has been in the department, and the manner in which he has discharged his duties.

Mr. Daniels' first employment was on the Suburban trial surveys; he commenced work on the 25th June, 1877, at Randwick, and was engaged until the 18th of February, 1878, at Randwick, Waverley, and the Glebe. All the details of this work were carried out under my supervision, and with the exception of the rate of progress I was satisfied with the manner in which the work was performed.

The next survey entrusted to Mr. Daniels was from Bungendore to Queanbeyan. This he commenced on the 25th of February, 1878, and completed on the 8th of the following October. The result of this work was by no means satisfactory, and the letter book contains complaints written by me to Mr. Daniels, both as to the very slow rate of progress and the waste of time spent in staking out an impracticable line, where a few traverses and cross levels would have given similar information in far less time.

Mr. Daniels then spent the last three weeks of October in exploring, and the following three months (to January 31st, 1879) in making a trial survey of an utterly impracticable route, from Queanbeyan towards Michelago. I had then to recall Mr. Daniels, and on the earliest opportunity visited the district, and in two days thoroughly examined the possible exits from Queanbeyan southwards, and started Mr. Randall on the survey of a route which has given a very good section. Mr. Daniels was next employed from February to the middle of June in making a trial survey from Bungendore to the Queanbeyan River, *via* Molonglo Station, to join Mr. Warren's survey, *via* Bworah Creek, to Michelago, and since that date he has been working from Bungendore to meet Mr. Stephens' trial line from Goulburn and Tarago.

On the two surveys last mentioned Mr. Daniel's progress and work generally has been much more satisfactory.

HERBERT PALMER.

No. 12.

The Chief Clerk to Mr. A. M. Daniels.

28 August, 1879.

I AM directed by the Engineer-in-Chief to ask whether it has been your practice to pay your chainmen by crossed cheques, and if so to request you will be good enough to explain why you have adopted this method.

W. H. QUODLING.

No. 13.

Mr. A. M. Daniels to The Commissioner for Railways.

Sir,

Railway Camp Tarago, *via* Goulburn, 30 August, 1879.

I have the honor to acknowledge the receipt of memo. No. 79/888 from the office of the Engineer-in-Chief, asking whether it has been my practice to pay my chainmen by crossed cheques, and, if so, why I have adopted the practice.

In connection with that inquiry, I subjoin a copy of declaration made by my chainmen on the method of their monthly payments.

I have, &c.,

A. MANNING DANIELS.

Inform Mr. Daniels that he must address his letters to the head of his Department.—CH. A. G., 1/9/79. Mr. Daniels informed. Mr. Whitton.—B. C. CH. A. G., 1/9/79. This reply of Mr. Daniels to the question asked in memo. 79/888 from my office is not only impertinent but insolent.—J. W., 23/9/79.

Railway Camp, near Tarago, 30 August, 1879.

We the undersigned, hereby declare that since we have been engaged on Mr. Daniels camp, he always tendered us our pay in open public officers' pay cheques.

HUGH O. BLACKWELL,
HENRY SMITH,
J. C. HUNTER,
JONAS NELSON,
GEORGE INNES.

Witness,

W. H. O. M. Wood, Government Surveyor.

No. 14.

The Commissioner for Railways to Mr. A. M. Daniels.

Sir,

Department of Public Works, Railway Branch, Sydney, 1 September, 1879.

In reply to your letter of the 30th ultimo, I have the honor to inform you that you should address your communications to the head of your Department.

I have, &c.,

CH. A. GOODCHAP,
Commissioner for Railways.

No. 15.

No. 15.

Mr. A. M. Daniels to The Commissioner for Railways.

Sir, Railway Camp, near Tarago, *via* Goulburn, 23 August, 1879.

I have the honor to forward to you with this, copies of a correspondence with the Engineer-in-Chief, the last of which from myself to the Engineer-in-Chief goes by this mail; and to request the favour of your attention to it.

The tenor of the last minute of the Engineer-in-Chief is such that, had the subject matter been other than a money question, I should not have hesitated a moment to resign the appointment I hold as railway trial surveyor.

But since the Engineer-in-Chief has felt it his duty to charge me with re-imbursing myself for private losses at the expense of the Government, and considers my request that he should withdraw that charge as made in forgetfulness of my position, I can only refer the matter to you as his immediate superior, and I beg you to institute an inquiry into the facts which led to the correspondence.

Either the charge of the Engineer-in-Chief is just, in which case I should be unfit to be entrusted longer with my present duties, or it is unjust, and, in fairness to my good name, should be unequivocally withdrawn.

I regret that the arbitrary tone adopted by the Engineer-in-Chief has made it impossible for me to explain this question satisfactorily with him, and forced me to request you to cause an inquiry to be held as soon as you conveniently can into the charge made against me by the Engineer-in-Chief.

I have, &c.,

A. MANNING DANIELS.

No. 16.

The Secretary for Railways to Mr. A. M. Daniels.

Sir, Department of Public Works, Railway Branch, Sydney, 25 August, 1879.

I have the honor, by direction of the Commissioner for Railways, to acknowledge the receipt of your letter of the 23rd instant, in which you request that an inquiry may be instituted with reference to a correspondence that has taken place between yourself and the Engineer-in-Chief on the subject of your public account, and I am to enclose herein a copy of a minute which the Commissioner has written after perusing the correspondence alluded to.

I have, &c.,

DONALD VERNON,

Per G.B.,

Secretary.

"Inform Mr. Daniels that having perused the correspondence, I can see no reason for instituting an inquiry. There can be no question that having drawn against his public account for the wages of his men, he could not again draw upon that account for the same service without first obtaining special authority to do so, and he should have without demur at once complied with the request made in the Chief Clerk's letter of 29th July, 1879, and covered the amount of his second cheque on the Public Account by forwarding his private cheque, leaving the adjustment of the account to subsequent arrangement under competent authority. I do not place upon the minute of the Engineer-in-Chief the same construction as Mr. Daniels has done; in fact, if Mr. Whitton conveyed the imputation which Mr. Daniels supposes he does, he would have accompanied it with a direction for his suspension, for, as Mr. Daniels himself admits, if it were true he would be unfit to be entrusted any longer with his present duties. Mr. Whitton's minute conveys nothing more than an intimation that Mr. Daniels had unwittingly pursued an improper course, in which decision I concur, and I think he would do well to place himself in a proper position towards the head of his department by offering an apology for his conduct, and at once observing the directions given to him.—CH.A.G., 25/8/79."

No. 17.

Mr. A. M. Daniels to The Commissioner for Railways.

Sir, Railway Camp, Tarago, *via* Goulburn, 28 August, 1879.

I have the honor to acknowledge receipt of the Secretary's letter of the 25th instant in reply to mine of the 23rd to you, and of the copy of your minute on the letter enclosed therewith.

I am glad to learn from that minute that you do not understand the Chief Engineer to charge me with appropriating Government money to the amount of the cheque in question; although, as you concur in his censure as construed by you, viz., that I had pursued an improper course; in drawing out of my public account money that belonged to myself in order to prevent it falling into the hands of a thief, I am only partially benefitted by your interpretation of the Chief Engineer's minute.

It is with regret that, in the face of you declining to hold an inquiry into this matter, I find it impossible to place myself in a proper position towards the head of the department in the way you suggest, for the following reasons, viz. :—

That upon my monthly vouchers, duly certified, the corresponding amount is paid to my credit with the Government bank, and becomes my property to be dealt with as indicated in the vouchers.

That the signatures of the various claimants on my pay sheets acquits me of all responsibility as far as regards the sums set against their names credited to me.

That the Government has no further claim upon me in respect of such sums so dealt with.

That having fulfilled these conditions I have not laid myself open to any censure or claim on the part of the head of the department.

That the position taken up by the Chief Engineer in his minute on my letter of the 16th inst. proves that I have no justice and less courtesy to expect at his hands.

For these reasons I must respectfully decline to comply with the memo. No. 79/781 or again approach the Chief Engineer on this subject.

In my previous letter to you of the 23rd, I stated that the tenor of the last minute of the Engineer-in-Chief is such that, had the subject matter of the correspondence been other than a money question, I would

not

not have hesitated a moment to resign. But the imputation conveyed, as it appeared to me, being withdrawn in your letter of the 25th inst., I have now the honor to tender to you my resignation, which I beg you to accept at the earliest moment compatible with the interests of the department. In furtherance of this wish, I may mention that I can conclude the work upon which I am actually engaged from this camp in about ten days, and that there remains only a short distance, under 10 miles I believe, from that to Mr. Stephens' work.

In conclusion, I beg to thank you for your prompt and courteous reply to my letter of the 23rd instant.

I have, &c.,

A. MANNING DANIELS.

No. 18.

The Commissioner for Railways to Mr. A. M. Daniels.

Sir,

Department of Public Works, Railway Branch, Sydney, 1 September, 1879.

In reply to your letter of the 28th ultimo, I have the honor to inform you that you should have tendered your resignation as a Trial Surveyor to the Engineer-in-Chief for Railways. I have therefore forwarded your letter to him, and should he recommend it, your resignation will be accepted.

I have, &c.,

CH. A. GOODCHAP,
Commissioner for Railways.

No. 19.

Telegram from Mr. A. M. Daniels to Engineer-in-Chief for Railways.

Bungendore, 12 September, 1879.

I HAVE finished work at present camp; await acceptance of resignation.

A. M. DANIELS.

[Reply.] Carry out instructions to connect with Mr. Stephens.—J.W.

No. 20.

Telegram from Mr. A. M. Daniels to Engineer-in-Chief for Railways.

12 September, 1879.

I REPEAT my resignation, unless minute upon which I resigned is withdrawn.

A. M. DANIELS.

[Reply.] Am I to understand that you refuse to carry out my instructions.—J.W.

Minutes on No. 20.

The enclosed telegram is from Mr. Daniels. Has he finished the work upon which he was engaged, and met Mr. Stephens? If so, have his plan and section been received by you, and are they satisfactory?—J.W., 12th September, 1879.

My last instructions to Mr. Daniels were to complete the trial survey, upon which he was engaged to a junction with Mr. Stephens, and then to return to Sydney and report himself at this office. Mr. Daniels' report in his August journal states that the survey of his length was nearly completed, and that the plotting of the plan and section of the length would be completed by the middle of the following week. Mr. Daniels, however, says nothing about joining Mr. Stephens, and Mr. Stephens' journal makes no mention of joining Mr. Daniels.—H. PALMER.

No. 21.

Telegram from Mr. A. M. Daniels to Engineer-in-Chief.

Bungendore.

WILL act on instructions if minute is withdrawn, otherwise I refer resignation to Minister for Works.

DANIELS.

Minutes on No. 21.

As Mr. Daniels refuses to carry out my instructions, I recommend that he be dismissed from the Department.—J.W., 15/9/79.

I saw the Minister on this matter to-day, and he approved of Mr. Daniels' dismissal.—J.W., 15/9/79.

No. 22.

The Engineer-in-Chief for Railways to Mr. A. M. Daniels.

15 September, 1879.

As you have refused to carry out my orders, the Minister for Works has approved of your immediate dismissal from the Service, and you are hereby dismissed accordingly.

Discharge your men and forward to this office all plans, books, and other Government property in your possession.

JOHN WHITTON.

No. 23.

Mr. A. M. Daniels to The Engineer-in-Chief for Railways.

Sir,

Railway Camp, Tarago, 17 September, 1879.

I have the honor to acknowledge receipt of your memorandum dated 15th instant, which reached me late yesterday evening. In that memorandum, dated eighteen days after my resignation, you inform

7

inform me that I am dismissed the Service for having refused to carry out your orders. I shall protest against that step upon my arrival in Sydney, and now beg to inform you that I have to-day paid off my men, and enclose pay vouchers under separate cover.

Yours, &c.,
A. MANNING DANIELS.

No. 24.

Mr. A. M. Daniels to The Engineer-in-Chief for Railways.

Sir,

Tarago, via Goulburn, 19 September, 1879.
I beg to advise you that by to-day's post I forward to your office one roll, containing plan and section of trial line from Bungendore to Fairy Meadow, and tracings of work at the Queanbeyan River; and one packet, containing three field books, eleven level books, and two unused level books.

Yours, &c.,
A. MANNING DANIELS.

No. 25.

The Chief Clerk to Mr. A. M. Daniels.

30 September, 1879.

You will oblige by forwarding to this office, as soon as possible, your public account book, cheque books, and bank pass book.

W. H. QUODLING.

No. 26.

Mr. A. M. Daniels to The Engineer-in-Chief for Railways.

Sir,

"Imperial Hotel," Wynyard Square, 2 October, 1879.

Referring to the Chief Clerk's memo., No. 79/992, requesting me to forward to your office my public account, cheque, and bank pass books, I beg to inform you that up to the present I have received no intimation of the payment to the credit of my public account of the sum of twenty-three pounds five shillings (£23 5s.) for men's wages for the early part of September, and have therefore still those cheques to draw and enter in the account books.

On this account I did not forward the books with my plans from Tarago as I should otherwise have done.

I have, &c.,
A. MANNING DANIELS.

No. 27.

Mr. A. M. Daniels to The Minister for Works.

Sir,

Petersham, 14 October, 1879.

The Engineer-in-Chief for Railways having forwarded to me a memorandum in which he informs me that I am dismissed the Service with your approval, for refusing to carry out his orders, I have the honor to enclose to you with this, copies of the correspondence which led up to that memorandum, and to beg your attention to an act which I cannot believe would have received your sanction had you been in possession of the particulars of the case.

These are briefly as follows:—

On the 12th of June last I received at my camp at Molonglo, notice of the payment into my public account of the amount of my May wages voucher, and paid my men as usual in public account cheques. Three of these were returned to me in deposit by three of the men, as well as another cheque from the previous month's pay, which, together with one in my own favour for rations, &c., I closely crossed "to the credit of A. M. Daniels with the Bank of Australasia," and posted to that Bank.

Not getting advice of receipt in the ordinary course, I inquired of the Bank and learned that the letter had miscarried. I immediately telegraphed to the Bank of New South Wales stopping payment of the lost cheques, advertised their loss three times in the *Sydney Morning Herald*, drew the public cheque No. 138,310, for £35 9s. (the value of the lost cheques) in my own favour, and paid it into my private bank. This transaction was entered in full in my public account books, and explained when I remitted them to the office on the 18th July.

On the 29th July the Chief Clerk returned my book initialed with memorandum No. 79/781, in which he requested me to forward my private cheque to cover the public account cheque No. 138,310, value, £35 9s., and inferred that I had drawn upon my public account for other than mens' wages and contingencies.

In reply to that memorandum under date August 2nd, I expressed my belief that the Chief Clerk had misapprehended the case as put in my letter of the 18th July, to which I referred the Chief Engineer in explanation of the transaction.

In a minute made upon that letter, the Chief Engineer apparently under the impression that the lost cheques were negotiable, alludes to me as drawing another cheque from my public account to reimburse myself for the loss of the former cheques, and as expecting the Government to pay my losses incurred while acting as banker for my men. Under date 16th August, I again attempted to make it clear to the Chief Engineer that I had only drawn out of my public account money to which I was fully entitled, accepted for myself all responsibility should the stolen cheques be presented, and requesting him to withdraw his statement that I was seeking to reimburse myself at the expense of the Government.

To Mr. Whitton's minute upon that letter commencing with an insult, and ending with an injury, I declined to reply, and on the 23rd October forwarded copies of the correspondence to the Commissioner for Railways, at the same time requesting him to cause an inquiry to be held into the origin of the correspondence as the money question involved precluded me from resigning at once, as I should otherwise do

do. The Commissioner did not accede to my request for an inquiry, but virtually withdrew the Chief Engineer's charge, although agreeing with the latter that I had acted inadvisedly in drawing the second cheque upon my public account without special authority.

Upon receipt of that letter, I forwarded on the 28th August, my resignation to the Commissioner, with a request to be relieved of my duties at the earliest moment compatible with the interests of the department, and stating that I expected to conclude the work from my then camp in about ten days. My resignation was forwarded by the Commissioner to the Chief Engineer, by whom it has been to this day ignored.

In my progress report for August, I again mentioned that I expected to finish work from that camp early in September, and on 12th September having finished up as far as I could work from that camp, and still having received no reply to my resignation, I telegraphed to the Chief Engineer. Copies of this telegram with several that followed will be found on page 13.

Late in the evening of the 16th September, nineteen days after sending in my resignation, I received notice of my dismissal from the Service for refusing to carry out the orders of the Chief Engineer, and instructions to pay off my men.

Under these circumstances I beg to submit to your consideration the following points.

That in drawing the cheque which originated this correspondence, I acted in perfect good faith and entered the transaction in my account books.

That the statement of the Engineer-in-Chief that I drew a second cheque from my public account is calculated to mislead, the amount having been only drawn out once.

That as the amounts of my vouchers *only* are paid to my credit it is impossible I should draw for *more* than those amounts.

That the Chief Engineer is in no way justified in his remarks "that I sought to reimburse myself at the expense of the Government, that I had no right to pay my men with crossed cheques, nor any right to take these cheques into my possession."

That in receiving in deposit the men's pay I acted quite as much in the interest of the department as in that of the men, and cannot therefore be said to have acted unwisely in so doing.

That putting aside the abuse bestowed upon me by the Chief Engineer in his minute on my letter of the 16th August, the position taken up by him in his concluding paragraph is quite sufficient grounds for my resignation.

That though the want of courtesy and harsh treatment of the Chief Engineer would have justified me in retiring at once from my position in the department, I continued to carry on the work to a point where it could be taken up by another without detriment to the interests of the Service.

That my resignation forwarded by the Commissioner for Railways to the Chief Engineer was entirely ignored by the latter.

And that my dismissal from the department eighteen days after I had resigned, on the grounds that I had refused to obey orders, especially in the absence of any agreement as to notice between the Chief Engineer and myself, is unjust and calculated to affect me prejudicially.

For these reasons I beg you will do me the justice to cancel my dismissal and accept my resignation, and give instructions for the payment of my last month's vouchers still outstanding.

I have, &c.,

A. MANNING DANIELS.

P.S.—Since the above was written, I have received notice of the payment into my public account of the amount of mens' wages to the 17th September.—A.M.D.

Has the Engineer-in-Chief any observations to make in reference to this cause?—J.L., 23/10/79.

No. 28.

Engineer-in-Chief for Railways to The Minister for Works.

29 October, 1878.

Mr. M. A. Daniels—Protest against Dismissal.

THE Minister having referred to me the accompanying papers from Mr. Daniels for any remarks I may desire to offer upon them, I will take up the various points submitted by Mr. Daniels in his letter of the 14th October, 1879.

1. "That in drawing the cheque which originated this correspondence I acted in perfect good faith and entered the transaction in my account books."

No one has ever stated that Mr. Daniels did not act in good faith, nor that the transaction was not entered in his account books, but I did say that he had acted very improperly and unwisely.

2. "That the statement of the Engineer-in-Chief that I drew a second cheque from my public account is calculated to mislead, the amount having been only drawn out once."

I never stated that the amount for men's wages had been drawn out twice, but I said that after Mr. Daniels had drawn once from his public account for his men's wages, and having paid the men and received their signatures to the vouchers the Government transaction was complete. That taking the cheques from the men and afterwards crossing them, as appears by the correspondence, to forward through the post was an entirely private transaction with which this department had nothing to do and could not recognize. These cheques having been lost in passing through the Post Office, as stated by Mr. Daniels, he had no right whatever to draw a second cheque to reimburse himself for the loss. Had these cheques not been handed to Mr. Daniels, but been lost by the men or by storekeepers to whom they might have been paid, would Mr. Daniels have been justified in drawing a second cheque to reimburse them? If not, how can the accident of his position justify so objectionable a course?

3. "That as the amounts of my vouchers only are paid to my credit, it is impossible I should draw for more than those amounts."

I see no reason whatever why Mr. Daniels could not draw for any amount he pleased, but those cheques only would be paid for which funds had been provided. Lost cheques or duplicates, however, might be paid out of subsequent credits before the proper cheques could be presented.

4. "That the Chief Engineer is in no way justified in his remarks that I sought to reimburse myself at the expense of the Government—'That I had no right to pay my men with crossed cheques nor any right to take these cheques into my possession.'"

This

This has been partly replied to in No. 2. Mr. Daniels left it to be inferred that he had paid his men by crossed cheques, and on the question being directly asked he intentionally evaded it.

5. "That in receiving on deposit the men's pay I acted quite as much in the interest of the department as in that of the men, and cannot therefore be said to have acted unwisely in so doing."

Receiving the cheques from the men was an entirely private transaction, under what arrangements I am unable to say, and was no part of his public duty, and therefore his public account should not have been used to replace the cheques when lost except under special authority. I fail to see that the men derive any benefit from the course pursued by Mr. Daniels, and certainly the department does not; but I can see how it might be made a source of considerable profit to the surveyor.

6. "That putting aside the abuse bestowed upon me by the Chief Engineer in his minute on my letter of the 16th August, the position taken up by him in his concluding paragraph is quite sufficient grounds for my resignation."

Requires no reply.

7. "That though the want of courtesy and harsh treatment of the Chief Engineer would have justified me in retiring at once from my position in the department, I continued to carry on the work to a point, where it could be taken up by another without detriment to the interests of the service."

I can hardly understand what particular attention Mr. Daniels thought himself entitled to. He had instructions to carry on his work to meet Mr. Stephens, which he refused to do.

8. "That my resignation, forwarded by the Commissioner for Railways to the Chief Engineer, was utterly ignored by the latter."

Mr. Daniels never forwarded his resignation to me; but had he done so I should have declined to accept it until he had completed the work he was ordered to perform.

9. "And that my dismissal from the department eighteen days after I had resigned, on the grounds that I refused to obey orders, especially in the absence of any agreement as to notice between the Chief Engineer and myself, is unjust and calculated to affect me prejudicially."

Mr. Daniels had no right to assume that his resignation would be accepted at any moment it might be convenient to himself to leave the department, as by doing so it might have seriously interfered with the work he had in hand.

The system of paying men's wages from a public account was adopted to prevent the surveyors paying by private cheques, which when lost or destroyed the wages so paid went to the credit of the surveyor. It was also done to prevent any excuse by the surveyor for dealing with the money belonging to the men in any way whatever, and also that the department might know when and how the men's wages were paid.

Mr. Daniels has frustrated this intention by collecting the public cheques and paying them into his private account in the Bank of Australasia, and although the vouchers are signed by the men there is nothing to show how they are eventually paid the value of the cheques drawn in their favour from the public account.

I acted in Mr. Daniel's case as I should in that of any other officer who refused to carry out my instructions, and I consider that he was very properly dismissed for insubordinate conduct.

JOHN WHITTON.

Mr. Daniels to be informed that I cannot see my way to take any further action in this case.—J.L.

No. 29.

Acting Under Secretary for Works to Mr. M. A. Daniels.

Sir,

Department of Public Works, Sydney, 3 December, 1879.

In reply to your letter of the 14th October, remonstrating against your having been dismissed from your appointment as a Railway Trial Surveyor, and requesting that your resignation may be accepted, I am directed to inform you that the Secretary for Public Works cannot see his way to interfere in the matter.

I have, &c.,

GERALD HALLIGAN,
Acting Under Secretary.

No. 30.

Reply to Parliamentary Question.

Parliamentary Question—Tuesday, 2nd December, 1879—Mr. Hurley (*Hartley*).

Question respecting Mr. Daniel's Dismissal:—

Mr. Hurley (*Hartley*),—Was Railway Trial Surveyor Daniels dismissed eighteen days after he had resigned his appointment, and upon what grounds?

Mr. Lackey answered,—Yes; for refusing to carry out the instructions of the Engineer-in-Chief for Railways.

1879-80.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

RAILWAY EXTENSION—BLAYNEY TO MURRUMBURRAH.

(PETITION FROM RESIDENTS OF COWRA.)

Received by the Legislative Assembly, 4 February, 1880.

To the Legislative Assembly of New South Wales.

The Petition of the undersigned Residents of the Town and District of Cowra,—

RESPECTFULLY SHOWETH :—

That on the completion of the Western and Southern Railway extensions in progress, the traffic will be so enormously increased as to necessitate the provision of further railway accommodation.

That the necessary accommodation can only be provided either by doubling the lines to Goulburn and Bathurst respectively, or by constructing the line herein advocated.

That the former project would be utterly unproductive, as no new country would be opened up or fresh traffic obtained by it, and would be very costly, while the line herein suggested would afford a large increased revenue.

That the proposed line would traverse for its whole length about 100 miles of country of great richness and fertility, quite equal to any yet opened up by railway extension in any part of the Colony.

That the goods and passenger traffic to and from the districts interested is considerable, and that the proposed line in its operations would largely increase this traffic, and therefore become a highly profitable portion of the railway system of the country.

That the proposed line is on the direct route from Blayney to Murrumburrah.

That the various towns and districts along the proposed route would be largely benefited and improved by having railway communication with the metropolis, and that an immense quantity of rich land thus opened up would thereby be rendered available for the settlement of a large agricultural population.

That the vast deposits of iron, and particularly copper, with which the country between Murrumburrah and Blayney is known to abound, while now unproductive and undeveloped, owing to the want of a cheap and ready mode of transit, would, by railway communication, be rendered not only a source of local wealth but would afford a handsome revenue to the Railway Department.

That from the known level character of the route indicated, your Petitioners respectfully submit that no engineering difficulties would be encountered, and the cost of construction will be considerably below the average.

In support of the foregoing statements the following statistics have been compiled from authentic sources in connection with the districts interested :—(1878) one thousand eight hundred and seventy-eight : population, (21,500) twenty-one thousand five hundred ; sheep, (1,246,008) one million two hundred and forty-six thousand and eight ; cattle, (51,838) fifty-one thousand eight hundred and thirty-eight ; horses, (19,038) nineteen thousand and thirty-eight ; swine, (4,126) four thousand one hundred and twenty-six. Acres under cultivation, (37,340) thirty-seven thousand three hundred and forty ; acres enclosed not cultivated, (825,233) eight hundred and twenty-five thousand two hundred and thirty-three ; acres unenclosed, (292,244) two hundred and ninety-two thousand two hundred and forty-four ; total acreage of holdings, (2,097,717) two millions ninety-seven thousand seven hundred and seventeen ; wheat, (354,943) three hundred and fifty-four thousand nine hundred and forty-three ; bushels oats, (43,264) forty-three thousand two hundred and sixty-four ; maize, (52,420) fifty-two thousand four hundred and twenty ; bushels barley, (8,234) eight thousand two hundred and thirty-four ; hay, (9,500) nine thousand five hundred tons ; potatoes, (5,000) five thousand tons ; wine, (4,000) four thousand gallons.

Your Petitioners therefore humbly pray that your Honorable House will take the foregoing facts into your favourable consideration.

And your Petitioners, as in duty bound, will ever pray, &c.

[Here follow 882 signatures.]

1879-80.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

RAILWAY EXTENSION FROM HAY TO MENINDIE OR
WILCANNIA.

(PETITION FROM INHABITANTS OF NEW SOUTH WALES.)

Received by the Legislative Assembly, 14 April, 1880.

To the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Inhabitants of New South Wales,—

HUMBLY SHOWETH :—

That your Honorable House having wisely made provision for the construction of a railway from Juneë *via* Narrandera to Hay, it is highly desirable that the line referred to should be extended as speedily as possible, from Hay to Menindie or Wilcannia, on the river Darling.

The distance from Hay to Menindie is about two hundred and eight miles, and the country being almost a dead level presents no engineering difficulties, and the projected line could therefore be constructed for less than three thousand pounds per mile. It would place an immense area of New South Wales in direct railway communication with Port Jackson, and secure the sending to that port, as the place of shipment, the wool of fourteen millions of sheep, which wool is at present sent either to Victoria or South Australia. This result can be confidently predicted, because the wool could be conveyed by rail from Menindie or Wilcannia to Sydney at a lower rate than it can be carried to either Melbourne or Adelaide, even although its freight per railway was charged for at a rate which would allow a profit of eight pounds per cent. per annum on the cost of the projected line.

A great impetus would be given to the trade of Sydney by this immense quantity of wool being sent yearly to Port Jackson, because as the wool-growers invariably purchase their station supplies at the sea-port where they dispose of their wool, a large and lucrative trade, at present lost to the Colony, would be secured by our own merchants, and profitable employment for our railways in conveying supplies and passengers to Menindie or Wilcannia.

Your Petitioners therefore pray that your Honorable House will take into your consideration the desirability of extending the projected line of railway from Juneë to Hay, to Menindie or Wilcannia.

And your Petitioners as in duty bound, will ever pray, &c.

[Here follow 613 signatures.]

1879-80.

—
LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

—
SITE FOR RAILWAY PASSENGER STATION, ALBURY.

(PETITION FROM PROPERTY-HOLDERS, RATEPAYERS, AND RESIDENTS OF ALBURY.)

—
Received by the Legislative Assembly, 19 May, 1880.
 —

To the Honorable the Speaker and the Honorable Members of the Legislative Assembly of New South Wales.

A Petition having been sent to your Honorable House praying for the removal of the Railway Passenger Station at this town from the site chosen by the Government facing Smollett-street, to a site facing Dean-street,—

Now this Petition of the undersigned property-holders, ratepayers, and residents of Albury,—

RESPECTFULLY SHOWETH:—

1. That the site chosen by the Government is in every way more eligible than that proposed to be substituted,—
 - (a.) Because the situation is more central.
 - (b.) The ground is more elevated.
 - (c.) The proposed alteration would cause an additional depth of from 8 to 10 feet for foundations, and an extensive embankment to bring the adjacent ground to the level of the line.
 - (d.) The proposed alteration would shorten the "straight run" approaching the station and therefore make it dangerous to life and property.
 - (e.) The goods and passenger stations if the proposed alteration be adopted would be brought into too close proximity, and render them inconvenient and dangerous both to the employés and the general public.
2. The Petition for the alteration has been got up by a few persons who have property in Dean-street, and are consulting the individual interests, rather than those of the public in general.
3. Any change now would occasion a large additional outlay for fresh surveys, plans, specifications, &c., for the station buildings, and delay the completion thereof for at least six months.
4. The site at present fixed upon is most suitable to the majority of the residents of the Town and District, and if at any time the line should be connected with that of Victoria it will be found especially convenient for that purpose.
5. Your Petitioners respectfully pray that the present site may be adhered to.
6. And as in duty bound, will ever pray.

[Here follow 164 signatures.]

1879-80.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MRS. SARAH ROBINSON.

(PETITION OF.)

Received by the Legislative Assembly, 14 May, 1880.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of Sarah, the widow of the late Edward Robinson, of Petersham,—

MOST RESPECTFULLY SHOWETH :—

That Petitioner's late husband was in the employ of the Government as foreman painter at the Railway Workshops, Redfern, for the period of seventeen years prior to his death—which resulted from his being crushed between the buffers of two railway carriages or trucks at the Redfern Terminus on the thirty-first day of August, A.D. 1876.

That Petitioner was thus left with eight children totally unprovided for, and none of whom were in a position to obtain a livelihood by reason chiefly of their tender age.

That a Petition was presented to your Honorable House by John McElhone, Esquire, a Member of your Honorable House, in which the matter of the accident which occasioned the death of her late husband was fully set forth, and the aid of your Honorable House prayed for to enable Petitioner to bring up her family.

That in answer to the prayer of that Petition your Honorable House agreed to the sum of two hundred and fifty pounds being awarded Petitioner, which said sum Petitioner received.

That Petitioner has expended the said sum in her endeavour to bring up her fatherless children respectably, and has likewise exhausted all her otherwise slender means, and is in necessitous circumstances.

Petitioner therefore prays that in view of the circumstances attending the death of her deceased husband, and his long service in the Government employ, as well as the indigent position to which she is reduced, your Honorable House will again take her case into your favourable consideration, and afford her such relief as you in your wisdom shall deem fit, or the exigencies of the case require.

And your Petitioner, as in duty bound, will ever pray.

Signed at Sydney, this twelfth day of May, A.D. 1880.

SARAH ROBINSON.

1879.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

JOADJA CREEK RAILWAY BILL.

FRIDAY, 12 DECEMBER, 1879.

Present :—

MR. COPELAND, | MR. GARBETT,
CAPT. ONSLOW.
THOMAS GARRETT, ESQ., IN THE CHAIR.

George Knox, Esq., appeared as Counsel for the Promoters of the Bill.

James Walter Fell, Esq., examined :—

1. *Mr. Knox.*] You are the Manager of the Australian Kerosene Oil and Mineral Company? Yes.
2. Do you know certain large tracts of land situate on and near Joadja Creek, in the parish of Joadja, in the county of Camden, occupied by the Company? I do.
3. Do these lands contain valuable deposits of coal and kerosene mineral? Yes.
4. To what extent? We have a proved seam of upwards of a million and a half tons of kerosene mineral, besides very large quantities of common coal, and there are other seams which contain many more millions of tons of common coal besides the boghead mineral.
5. What is the extent of the land occupied by the Company? The land occupied under various conditions is 1,944 acres.
6. What works have the Company erected there? Apart from the tram originally laid down, there have been expensive works for the manufacture of kerosene; a large stationary engine has been erected for winding the mineral out of the valley.
7. A very large sum has been expended? Yes, I think upwards of £30,000 has been sunk in plant *in situ*.
8. What is the length of the tramway you have made? Two miles through the Company's own land, and seven miles through Crown land principally held under lease, and two small portions through private land.
9. That is 9 miles altogether? Yes.
10. The proposed railway is 16 miles in length? Yes, 16 miles in all, that is including this 9 miles.
11. That is 7 miles in addition? Yes.
12. Part of this is part of the proposed railway? Yes, that is the 7 miles of railway covered by this Bill. (*The witness produced a plan.*)
13. Is that a correct plan of the proposed line of railway? Yes.
14. *Chairman.*] What is the gauge of your proposed railway? 3 feet 6.
15. And of the tramway? 3 feet 6 throughout.
16. *Mr. Knox.*] What amount do you estimate the works will turn out? Do you refer to the oil works?
17. Yes. The present plant is capable of producing 200,000 gallons a year of burning oil, 100,000 gallons of lubricating oil, and 80 tons of solid paraffine.

J. W. Fell,
Esq.
12 Dec., 1879.

- J. W. Fell, Esq. -
12 Dec., 1879.
18. *Chairman.*] What would be the total tonnage of that? Upwards of 1,500 tons for oil, but there is a large quantity of mineral used for gas, making besides perhaps from ten to fifteen thousand tons annually.
19. *Capt. Onslow.*] Is there also a quantity of other coal? Yes.
20. *Chairman.*] Can you give us a reasonable estimate of the total tonnage by which the Government line would be benefited? Upwards of 20,000 tons to begin with.
21. *Mr. Knox.*] You see on the plan before the Committee, and in the Bill, the names of a number of persons mentioned through whose land the railway passes? Yes.
22. Have you personally made arrangements with some of these persons on behalf of the Company? Yes, I have arranged with John Manion, with Edward Cahill, with Archibald Sharp, Matthew Butler, the representatives of the late Edward Butler, deceased, with the representatives of the late Mr. Breen, and others.
23. These are the names of some of the persons mentioned in the first clause? Yes.
24. Have you arranged with all the parties whose names are mentioned there? We have not dealt with the Fitzroy Iron Company, as some of the proprietors are in England, but we are assured of their consent.
25. Without this railway, is it at all practicable for the Company either to carry on their operations with any success, or to carry their coals, shale, and other produce to market? No, it cannot be done. In fact, during the wet season last winter, it was a physical impossibility to take our produce over the roads—it could not have been done if we had paid £100 a ton for it.

John de Villiers Lamb, Esq., examined:—

- J. de V. Lamb, Esq.
12 Dec., 1879.
26. *Mr. Knox.*] You are Chairman of the Australian Kerosene Oil and Mineral Company? I am.
27. Do you produce the certificate of Registration of the Company? I do. (*The witness produced the same, and handed in certified copy. See Appendix.*)
28. That Company is possessed, or you as trustee for that Company are possessed of large tracts of land on Joadja Creek, in the parish of Joadja? Yes.
29. What is generally the extent of the land in your possession? 1,944 acres held as freehold, leasehold, and as mineral conditional purchases.
30. Have large sums of money been expended by the Company upon this property? Yes.
31. Can you state roughly to what extent? Upon the works, tramway, and locomotive, about £56,000.
32. *Chairman.*] That is upon the works and tramway? Upon the tramway, the opening of the mine, engines, and locomotive.
33. *Mr. Knox.*] At present you have contracts for the supply of quantities of shale and oil, have you not? Yes, both shale and oil.
34. Can you form any idea of the consumption of the oil in the Colony? I estimate the consumption of the oil in the Colony at about 2,000,000 gallons annually.
35. And there is an export trade also? Yes, the shale is largely exported.
36. It is also used for gas manufacture here? Yes.
37. In fact you have a contract with the Gas Company for the supply of some of it? Yes, we have a contract for 1881 and 1882; we have not for 1880.
38. Is the Company desirous of constructing the railway proposed by this Bill? Yes, in fact we cannot carry on our operations without it. Last winter, although we had a large number of horses, they were almost useless to us, owing to the state of the roads.
39. The Company employ a large number of men upon their works? Yes.
40. I believe there is a school there, is there not? We were in treaty to have one put up. I am not sure whether it is yet erected.
41. There is almost a township there, is there not? Yes, there is a large number of people there.
42. There is no proper means of communicating with the place at present? No.
43. The Schedule attached to the Bill before the Committee mentions the names of a number of private individuals through whose land the proposed line of railway must pass; have you been in treaty with all those persons? With every one of them.
44. Have any of them threatened or shown any opposition whatever? None whatever.
45. From many of them you have bought the land? Yes.
46. Most of them? Yes; and we have the approval of others to pass through their lands. The Fitzroy Company have granted it as far as they could give it, but there is some difficulty in the way. They have, however, accepted notice, and have intimated that they would put no obstacle in the way.
47. From some you have an express consent to the provisions of the Bill? Yes.
48. *Chairman.*] It is absolutely necessary for your purposes that you should be connected with the Great Southern Railway? Yes.
49. That is your real purpose in submitting the Bill? Yes.
50. Have you submitted your connection to the railway authorities? Yes; we are entitled by the Railway Act to connect with them. I saw the Commissioner for Railways, and he pointed out to me the clause under which he said he could not prevent us from joining the line. The only thing necessary for us was to submit it for his approval.
51. He did not express any objection? No; on the contrary, it would add a valuable feeder to the railway.
52. Was that his opinion? Yes.
53. He did not point out any practical objection? No; he is ready to put down a loop line whenever we give him notice.
54. And they are consenting parties as far as he is concerned? They are quite.
55. I see the third clause gives the public the right to use your line upon certain terms? Yes, we wish to fix the maximum rate at 3d. per ton per mile after the first 5 miles, and 2s. per ton for that distance and under.
56. Have you a clause prepared for that? I think it is not. I think it is usual on all railways that there should be a fixed minimum rate.
57. Of course you are willing to take the Bill with any conditions the Committee may impose? I suppose we cannot help ourselves.
58. *Mr. Copeland.*] What is the number of men you have employed upon the mine at present? Including the miners? I suppose between sixty and seventy men.

59. What is the average out-put of shale and coal? We have turned out I think up to the present time about 15,000 tons. We are not working coal. J. de V. Lamb, Esq.
60. What is the average tonnage per week? About 70 tons a day.
61. What is the value of the shale? The last contract we made was with the Gas Company. That was the lowest price at which we have sold—40s. a ton; but we have entered into a two years' contract with them. 12 Dec., 1879.
62. What is the cost at present of bringing the shale from the mine to the Gas Company? The miner's charge comes to about 7s. 7d.
63. *Chairman.*] Do you know what rate per ton the railway people charge? £2 a truck—about 6s. 8d. a ton.
64. *Mr. Copeland.*] 1d. a mile, but then you have to pay the cost of carriage from the railway to the Gas Company's Works? Yes.
65. Will they take an unlimited quantity from you? 1,500 tons a year.
66. Are you exporting any? Yes; We shipped 986 tons to Liverpool, and we had a report upon it that it was satisfactory. That was 75s., and we paid freight at 27s. 6d. a ton.
67. Have you any knowledge of the average quantity of this shale contained in the land per acre? 2,400 tons per acre.
68. That is averaging the seam at how thick? 18 to 21 inches. It is estimated that a cubic foot contains 84 lbs.
69. How many acres have you? The out-crop extends over 700 acres. We calculate there is about a million and a half tons of shale, and nearly two million tons of common coal; but there are many other seams of common coal which have not been tested or proved yet.
70. You observe that the third clause of the Bill before the Committee provides that the public who may use this railway shall provide their own locomotive? Yes.
71. That does not appear to be the case in other Railway Bills? I am not aware of that.
72. Does the opening of the railway to the public, as stated by the third clause, refer to goods traffic merely, or also to passenger traffic? We have no convenience for passenger traffic, and there is no population beyond our own people.

JOADJA CREEK RAILWAY BILL. ^z

APPENDIX.

New South Wales } *[To the Evidence of John de Villiers Lamb, Esq., 12 December, 1879.]* [Certified copy.]
to wit. }

IN the matter of "The Australian Kerosene Oil and Mineral Company, Limited," and in the matter of the Company's Act.

I CERTIFY that the Company styled "The Australian Kerosene Oil and Mineral Company, Limited," is incorporated, and that the said Company is a limited Company.

Dated at Sydney, this seventeenth day of October, in the year of our Lord one thousand eight hundred and seventy-eight.

E. G. WARD, (L.S.)
Registrar General,
Acting as Registrar of Joint Stock Companies.

WE certify that the writing contained above is a true copy of the original certificate of incorporation, the same having been examined and compared therewith by us, this sixteenth day of December, A.D. 1879.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

STEAM TRAMWAYS.

(PETITION—CHAIRMAN OF SYDNEY TRAMWAY AND OMNIBUS COMPANY.)

Received by the Legislative Assembly, 18 November, 1879.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Omnibus Proprietors in the City of Sydney and Suburbs,—
RESPECTFULLY SHOWETH:—

That your Petitioners have for many years carried on the business of carriers of and for the public by means of omnibuses.

That they have invested large sums of money in the purchase of plant, horses, and land to carry on the said business.

That the said business has been recognized by and carried on under the control of the State, in accordance with an Act of Parliament to that effect.

That hitherto they have met satisfactorily the wants and requirements of the public in regard to safety, regularity, and cheapness of transit, and are now in a position to meet all probable demands in that respect.

That therefore your Petitioners learn with concern and apprehension that the Government have determined to propose to Parliament a scheme to carry out a system of steam tramways in the city and suburbs of Sydney, by which your Petitioners' business as public carriers will be entirely destroyed.

That your Petitioners most earnestly protest against the proposed action of the Government, as an uncalled for interference with private interests and enterprise.

Your Petitioners therefore humbly pray your Honorable House to take the foregoing into your favourable consideration, and grant to your Petitioners such relief as to your Honorable House may seem meet.

And your Petitioners, as in duty bound, will ever pray, &c.

Dated this fourteenth day of November, in the year of our Lord one thousand eight hundred and seventy-nine.

Signed and sealed, on behalf of the Sydney Tramway and Omnibus Company, Limited,

(L.S.)

By order,

JOHN YOUNG,
Chairman.

1879.

—

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

—

STEAM TRAMWAYS.

(PETITION—MAYORS OF SUBURBAN BOROUGHS.)

—

Received by the Legislative Assembly, 25 November, 1879.

—

To the Honorable the Speaker and the Members of the Legislative Assembly, in Parliament assembled.

The humble Petitioner of the undersigned Mayors of the Suburban Boroughs,—

RESPECTFULLY SHOWETH:—

That your Petitioners are convinced that the adoption of a system of steam tramways in order to afford means of communication between Sydney and the suburbs thereof is highly desirable, and that such a system would afford great conveniences to the residents of Sydney and such of the suburbs as cannot be connected with Sydney by means of the railway, and would at very reasonable charges pay a large return on the expenses of construction and maintenance.

That the system of steam tramways is in successful operation in most of the cities of Europe and America.

That your Petitioners have learned that it is intended to introduce into your Honorable House a Bill for the purpose of granting to a private Company, called "The Sydney Tramway and Omnibus Company (Limited)," the sole right to construct, maintain, use, and work lines of tramway to and from Sydney and the suburbs.

That your Petitioners have had experience of the manner in which the omnibus traffic to and from the city of Sydney and its suburbs has been managed by the several Omnibus Companies, and that such experience has been exceedingly unsatisfactory, and such as to convince your Petitioners of the great inconvenience which would result to your Petitioners and the public if the said Bill should be passed into law.

That your Petitioners desire respectfully to urge upon your Honorable House that a system of tramway communication from and to the city of Sydney and the rapidly rising suburbs thereof is of too important a character to be entrusted to private enterprise, and that such a system should be under the direct authority and control of the Government of the Colony, inasmuch as (besides other reasons) it is more than probable that a private Company would only construct and work such lines as in its opinion would be immediately and individually payable, whereas the Government would run the various lines more equitably and as a whole.

Your Petitioners therefore earnestly pray that your Honorable House will not grant to any private Company the right to construct or maintain tramways as above mentioned, but that your Honorable House will support and pass into law a measure for the construction and maintenance of a system of tramways which shall be under the direct authority and control of the Government of the Colony.

And your Petitioners, as in duty bound, will ever pray, &c.

[Here follow 20 signatures.]

1879-80.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

TRAMWAYS EXTENSION BILL.

(MESSAGE No. 22.)

Ordered by the Legislative Assembly to be printed, 25 February, 1880.

AUGUSTUS LOFTUS,
Governor.

Message No. 22.

In accordance with the 54th section of the Constitution Act, the Governor recommends for the consideration of the Legislative Assembly the expediency of making provision to meet the requisite expenses in connection with the Bill to authorize the construction and maintenance of Tramways along certain streets and highways in the City and Suburbs of Sydney and elsewhere.

Government House,
Sydney, 25 February, 1880.

1879-80.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

TRAMWAYS EXTENSION BILL.

(MESSAGE No. 26.)

Ordered by the Legislative Assembly to be printed, 10 March, 1880.

AUGUSTUS LOFTUS,

Governor.

Message No. 26.

In accordance with the 54th section of the Constitution Act, the Governor recommends for the consideration of the Legislative Assembly the expediency of making provision to meet the requisite expenses in connection with the construction and maintenance of Tramways along the streets and highways in the City and Suburbs of Sydney and elsewhere, mentioned in the first Schedule of a Bill now before the Assembly to authorize the construction of Tramways, and the construction and maintenance of any other Tramways which may hereafter be made under the provisions of the said Bill, and to meet any other necessary expenses connected therewith.

Government House,

Sydney, 10 March, 1880.

1879-80.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

TRAMWAYS EXTENSION BILL.

(PETITION AGAINST—DIRECTORS OF THE SYDNEY TRAMWAY AND OMNIBUS COMPANY.)

Received by the Legislative Assembly, 2 March, 1880.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Omnibus Proprietors in the City of Sydney and Suburbs,—

RESPECTFULLY SHOWETH:—

That your Petitioners presented to your Honorable House a humble Petition, on the eighteenth day of November last, setting out the effect of a measure then proposed, but now before your Honorable House, authorizing the Government to construct and work certain lines of Tramway on and over the streets of the City of Sydney and Suburbs, would be to seriously damage the interests of your Petitioners, who have been hitherto engaged in carrying on the business of Omnibus Proprietors within the said City and Suburbs.

That your Petitioners would respectfully draw the attention of your Honorable House to the allegations and prayer of their former Petition.

And further, your Petitioners would humbly pray your Honorable House to grant them permission to appear at the Bar of your Honorable House, by Counsel learned in the law, and so to be heard in support of the allegations and prayer of your Petitioners' former Petition, and otherwise in defence of the interests of your Petitioners, as proposed to be affected by the Bill alluded to hereinbefore, prior to the said Bill receiving the final sanction of your Honorable House.

And your Petitioners, as in duty bound, will ever pray, &c.

Dated this 2nd day of March, in the year of our Lord one thousand eight hundred and eighty.

Signed, and the Seal of the Sydney Tramway and Omnibus Company "Limited" affixed hereto by

WM. SHENSTONE, Secretary.

In the presence of—

JOHN WOODS, }
 WILLIAM CAIN, } Directors.
 A. W. GILLES, }

1879-80.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

TRAMWAYS.

(LINE FROM REDFERN TO HUNTER-STREET—REPORT OF COMMISSIONER FOR RAILWAYS.)

Ordered by the Legislative Assembly to be printed, 3 March, 1880.

Commissioner's Report on state of Line—Wear and tear of Rolling Stock—
Revenue and Expenditure and net results, for the period 28th September to
31st December, 1879.

State of Line—inspected 24th February, 1880.

THE Tramway has been opened for traffic for five months and one week.

The weight of our own traffic over the line has amounted to 360,000 tons.

The weight of ordinary street traffic that has passed over it cannot be computed, but it must have been very great; during the wool season an immense quantity of wool was hauled along the line.

Notwithstanding this unexampled traffic on a street tramway, the rails and road wear beyond expectation. Some of the rails show no signs whatever of wear. A proportion (not a large proportion) give indications of wear, but still there has been no necessity for relaying a single rail, and there is no immediate prospect of such necessity. The Engineer states—"I do not anticipate having to relay any of the rails for some time to come, and then only a few."

The annual depreciation will not exceed 20 per cent., and £1,200 a year will be deducted from the net revenue to meet the cost of relaying.

The paved way gives no indication whatever of wear, nor is it likely to do so for some years.

Rolling Stock.

The number of motors is four; they have run to the present time 21,550 miles, or an average of 5,386 miles for each motor; they are all in good working order; the expense of keeping them so is estimated at £480 per annum, and an amount equal to 10 per cent. per annum on their capital cost should be written off for depreciation; this will amount to £75 a year for each motor.

Cars.

The number of cars is eight—two horse cars and six for steam traction, imported from America. Although these latter have been built very light, and subjected repeatedly to more than twice the load they were constructed to carry, they have stood the strain remarkably well. The wheels, which are of chilled cast-iron, show no perceptible signs of wear, and the same brake-shoes have done their work continuously without any renewals.

The cost of keeping them in repair will be £25 each per annum, and it is proposed to write off for depreciation 16 per cent. per annum of their capital cost, equal to £80 a year for each car.

The total amount therefore to be deducted from the net revenue each year for depreciation, and to provide a fund for renewals will be as under:—

Rails, fastenings, &c., &c.	£1,200
Steam motors...	300
Cars	480
Total...	<u>£1,980</u>

Revenue and Expenditure.

The Revenue and Expenditure from 28th September to 31st December 1879 show as under:—

Receipts	£4,168
Expenditure	1,825
Net profits...	<u>£2,343</u>
From which deduct depreciation for three months as above	495
Balance...	<u>£1,848</u>

The capital expenditure has been £22,000, upon which, for three months, the above result shows a return of about 33½ per cent.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES, No. 21. TUESDAY, 2 DECEMBER, 1879.

13. SYDNEY CITY AND SUBURBAN TRAMWAY AND OMNIBUS COMPANY'S BILL:—Mr. Driver moved, pursuant to Notice,—
- (1.) That the Sydney City and Suburban Tramway and Omnibus Company's Bill be referred to a Select Committee for consideration and report, and that such Committee have power to send for persons and papers.
- (2.) That such Committee consist of Mr. Lackey, Mr. Farnell, Mr. Lucas, Mr. Gray, Mr. Greenwood, Mr. Harris, Mr. Hurley (*Hartley*), Mr. Combes, and the Mover.
- Debate ensued.
- And Mr. McElhone requiring that the Committee be appointed by Ballot,—
- Question put,—That the Sydney City and Suburban Tramway and Omnibus Company's Bill be referred to a Select Committee for consideration and report, and that such Committee have power to send for persons and papers.
- And Division called for,—
- But there being no Tellers on the part of the *Noes*, no Division could be had,—and Mr. Speaker declared the Question to have passed in the *affirmative*.
- And the House proceeding to the Ballot,—
- Notice was taken that there was not a Quorum present.
- Mr. Speaker counted the House, and there being only sixteen Members present, exclusive of Mr. Speaker, namely,—Mr. Badgery, Mr. Baker, Mr. Cameron, Mr. Cohen, Mr. J. Davies, Mr. Driver, Mr. Farnell, Mr. Gray, Mr. Hoskins, Mr. Kerr, Mr. Lackey, Mr. O'Connor, Sir Henry Parkes, Mr. Roseby, Mr. Suttor, and Mr. Watson,—
- Mr. Speaker adjourned the House at twenty-six minutes after Nine o'clock, until To-morrow at Four o'clock.

VOTES, No. 29. TUESDAY, 16 DECEMBER, 1879.

7. SYDNEY CITY AND SUBURBAN TRAMWAY AND OMNIBUS COMPANY'S BILL:—Mr. Driver moved, pursuant to Notice, That this House do "now" proceed to ballot for the Select Committee to consider and report upon the Sydney City and Suburban Tramway and Omnibus Company's Bill.
- Mr. McCulloch moved, That the Question be amended, by the omission of the word "now," with a view to the insertion in its place of the words "this day six months."
- Question put,—That the word proposed to be omitted stand part of the Question.

The House divided.

Ayes, 21.

Sir Henry Parkes,	Mr. Greenwood,
Mr. Suttor,	Mr. Gray,
Mr. Wisdom,	Mr. Barbour,
Mr. Baker,	Mr. Lynch,
Mr. Lackey,	Mr. Jacob,
Mr. Watson,	Mr. Garrett,
Captain Onslow,	Mr. W. Davies,
Mr. Driver,	<i>Tellers.</i>
Mr. Hoskins,	
Mr. Cameron,	Mr. Copeland,
Mr. Teece,	Mr. W. C. Browne.
Mr. O'Connor,	

- Noes, 8.

Mr. J. Davies,
Mr. Charles,
Dr. Bowker,
Mr. Johnston,
Mr. Beyers,
Mr. Dangar,
<i>Tellers.</i>
Mr. McCulloch,
Mr. Macintosh.

And so it was resolved in the affirmative.

Original Question then put and passed.

Whereupon the House proceeded to the Ballot, and Mr. Speaker declared the following to be the Committee duly appointed:—Mr. Driver, Mr. Lackey, Mr. Combes, Mr. Farnell, Mr. J. Davies, Mr. Lucas, Mr. Macintosh, Mr. Greenwood, and Mr. Gray.

VOTES, No. 44, TUESDAY, 3 FEBRUARY, 1880.

6. SYDNEY CITY AND SUBURBAN TRAMWAY AND OMNIBUS COMPANY'S BILL:—Mr. Driver (*by consent*) moved, without Notice, That the Report from the Select Committee on the Sydney and Suburban Street Tramways Bill, brought up on the 19th December, 1878, and the report from the Select Committee on the Sydney Tramway and Omnibus Company (Limited) Bill, brought up on the 20th March, 1878, be referred to the Select Committee now sitting on Sydney City and Suburban Tramway and Omnibus Company's Bill.
- Question put and passed.

VOTES,

VOTES, No. 58. THURSDAY, 26 FEBRUARY, 1880.

2. SYDNEY CITY AND SUBURBAN TRAMWAY AND OMNIBUS COMPANY'S BILL :—Mr. Driver, as Chairman, brought up the Report from, and laid upon the Table the Minutes of proceedings of, and Evidence taken before the Select Committee for whose consideration and Report this Bill was referred on 2nd December, 1879; together with Appendix, and a copy of the Bill as agreed to in the Committee. Ordered to be printed.

**SYDNEY CITY AND SUBURBAN TRAMWAY AND OMNIBUS
COMPANY'S BILL.**

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred, on 2nd December, 1879,—“*the Sydney City and Suburban Tramway and Omnibus Company's Bill,*” and to whom were referred, on the 3rd February, 1880, “*the Report from the Select Committee on the Sydney and Suburban Street Tramways Bill,*” brought up on the 19th December, 1873, and the Report from the Select Committee on the Sydney Tramway and Omnibus Company (Limited) Bill, brought up on the 20th March, 1878,”—beg to report to your Honorable House,—

That they have examined the witnesses named in the List (whose evidence See List, page 7 will be found appended hereto); and that the Preamble having been satisfactorily proved to your Committee, they proceeded to consider the clauses and schedules of the Bill, in which it was not deemed necessary to make any amendment.

Your Committee now beg to lay before your Honorable House the Bill without amendment.

RD. DRIVER,
Chairman.

No. 3 Committee Room,
Sydney, 26th February, 1880.

PROCEEDINGS OF THE COMMITTEE.

FRIDAY, 16 JANUARY, 1880.

MEMBER PRESENT:—

Mr. Driver.

In the absence of a quorum, the meeting called for this day lapsed.

TUESDAY, 3 FEBRUARY, 1880.

MEMBERS PRESENT:—

Mr. Driver,		Mr. Macintosh,
Mr. Greenwood,		Mr. Farnell.

Mr. Driver called to the Chair.

Entries from Votes and Proceedings, appointing Committee, *read* by the Clerk.

Printed copies of the Bill referred, together with original Petition to introduce the same, before the Committee.

Committee deliberated.

Ordered—That John Young, Esq., and William Shenstone, Esq., be summoned to give evidence next meeting.

[Adjourned to Thursday next, at half-past *Two* o'clock.]

THURSDAY, 5 FEBRUARY, 1880.

MEMBERS PRESENT:—

Mr. Combes,		Mr. Driver.
-------------	--	-------------

In the absence of a quorum, the meeting called for this day lapsed.

FRIDAY, 6 FEBRUARY, 1880.

MEMBERS PRESENT:—

Mr. Driver,		Mr. Farnell.
-------------	--	--------------

In the absence of a quorum, the meeting called for this day lapsed.

TUESDAY, 10 FEBRUARY, 1880.

MEMBERS PRESENT:—

Mr. Farnell,		Mr. Combes.
--------------	--	-------------

In the absence of a quorum, the meeting called for this day lapsed.

THURSDAY, 12 FEBRUARY, 1880.

MEMBERS PRESENT:—

Mr. Driver in the Chair.		
Mr. Gray,		Mr. Combes,
		Mr. Farnell.

Entry from Votes and Proceedings, referring Reports from the Select Committees on the Sydney and Suburban Streets Tramways Bill and the Sydney Tramway and Omnibus Company (Limited) Bill, *read* by the Clerk.

Printed copies of the Reports before the Committee.

John Young, Esq., called in and examined.

Witness withdrew.

William Shenstone, Esq. (*Secretary to the Company*), called in and examined.

Witness *produced* Minute Book of the Company, and *handed in* a copy of the Minutes, which was ordered to be appended. (*See Appendix.*)

Witness withdrew.

Committee deliberated.

Ordered,—That Edward Combes, Esq., C.M.G., M.P., be requested, and Alfred W. Gilles, Esq., be summoned, to give evidence next meeting.

[Adjourned to Thursday next, at half-past *Two* o'clock.]

THURSDAY, 19 FEBRUARY, 1880.

MEMBER PRESENT:—

Mr. Farnell.

In the absence of a quorum, the meeting called for this day lapsed.

TUESDAY,

TUESDAY, 24 FEBRUARY, 1880.

MEMBERS PRESENT :—

Mr. Driver in the Chair.

Mr. Combes, | Mr. Farnell.
 Alfred W. Gilles, Esq. (*a Director of the Company*), called in and examined.
 Witness withdrew.
 Edward Combes, Esq., C.M.G., M.P., a member of the Committee, examined in his place.
 Committee deliberated.

[Adjourned to Thursday next, at half-past *Two* o'clock.]

THURSDAY, 26 FEBRUARY, 1880.

MEMBERS PRESENT :—

Mr. Driver in the Chair.

Mr. Farnell, | Mr. Combes,
 Mr. Gray, | Mr. Macintosh.

Preamble considered.

Question,—“That this Preamble stand part of the Bill,” put and passed.

Clauses 1 to 162 read and agreed to.

Schedules read and agreed to.

Chairman to report the Bill without amendment to the House.

LIST OF WITNESSES.

	PAGE.
Combes Edward, Esq., C.M.G., M.P.	13
Gilles Alfred W., Esq.	11
Shenstone William, Esq.	11
Young John, Esq.	1

1879-80.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

SYDNEY CITY AND SUBURBAN TRAMWAY
AND OMNIBUS COMPANY'S BILL.

THURSDAY, 12 FEBRUARY, 1880.

Present:—

MR. COMBES,
MR. DRIVER,MR. FARNELL,
MR. GRAY.

R. DRIVER, ESQ., IN THE CHAIR.

John Young, Esq., examined:—

1. *Chairman.*] You are one of the promoters of this Bill? Yes.
2. You are aware of the general nature and objects of this Bill? Yes.
3. Has a Company recently been formed called the Sydney City and Suburban Tramway and Omnibus Company? Yes.
4. What is the proposed capital of the company? £500,000.
5. In shares of what? 50,000 shares of £10 each.
6. How many shares have been applied for or allotted? £50,000 worth at present.
7. Who are the principal promoters of the Bill? Myself, the Chairman, Patrick Alfred Jennings, Daniel Williams, Charles Carlton Skarratt, Patrick Higgins, Walter Russell Hall.
8. In fact all the persons named in the preamble? Yes, and many more.
9. These persons are all well-known residents of Sydney? Yes.
10. You yourself have had very considerable experience, have you not, in the working or construction of tramways? Yes.
11. And the gentlemen named desire this Act? Yes.
12. In order to enable them to carry out the objects of this Bill? Yes.
13. In your opinion would the laying down of the tramways proposed in this Bill be a great public convenience? Yes.
14. Have you paid any attention to the working of tramways in other parts of the world? Yes.
15. Where, particularly? In London, Paris, New York, and other places.
16. And in those places they have proved a success? Yes.
17. Are they in the hands of private individuals, or of the Government in other places? Of private individuals invariably. There are several exceptions in England where the tramways have been laid down by the Corporations of certain towns.
18. Those cases are the exception? They are the exception.
19. *Mr. Gray.*] Do you know how many instances there are of that kind? The tramways of Bristol and of Dundee are instances which I know. These were put down by the Corporation, but let to private individuals.
20. To private individuals or to companies? I do not know whether to private individuals or to companies, but they were worked separately from the Corporations.
21. Can you assign any reason for that—why they were worked by private individuals? I know that when I was in Bristol in 1875, seeing the tramways laid and not at work I made inquiries why they did not run

J. Young,
Esq.
12 Feb., 1880.

J. Young,
Esq.

12 Feb., 1880.

the tram and I was informed that it was because the Corporation could not get the amount of rental they had anticipated for it.

22. I suppose you are aware that the Government have proposed to lay down tramways in the city and suburbs? Yes.

23. In your opinion is that a duty properly pertaining to Government? I think not.

24. Has any portion of the capital of the proposed Company been paid up as yet? About £60,000 that belongs to the Company would be available for this work at any moment.

25. Then the whole amount of the proposed capital could be made available almost immediately after the passing of the Bill? Within three months.

26. I think you have already said that in your opinion the laying down of the proposed tramways would be a great convenience to the public? Yes.

27. They have been in other parts of the world? Yes.

28. *Mr. Gray.*] What is the motive power you would propose—steam or horse? Both.

29. *Chairman.*] I suppose tramways could be so constructed as not to interfere with the ordinary carriage traffic or to cause any impediment or obstruction in the streets? Yes.

30. What rails do you propose laying down? That is not decided; it is a matter of consideration which is the best rail.

31. You have not come to any determination upon that point? Only that it will not be the Larsen rail for locomotive traffic.

32. Why not? It is not considered now the best rail. There are better rails than the Larsen rail. They are largely used for horse traffic because they are flat, whereas the rail best suited to a locomotive is deeper and more conformed to the railway rail. The Larsen rail is made expressly for horse traffic.

33. At all events you would decide upon having the best rail procurable and so constructed as not to interfere with the ordinary traffic? Precisely. Where horse traffic was intended I do not think you could beat the Larsen rail, but that would not be suited for locomotives.

34. *Mr. Farnell.*] Is there ample provision made in the Bill for the convenience and safety of the public in the construction of these tramways? Yes; the public are taken care of in every shape and form.

35. Are you aware that some time ago—in the year 1878 I think—the inhabitants of the suburbs of Sydney petitioned in favour of the construction of a tramway by a Company? Yes; those of Paddington, Woollahra, and Waverley particularly.

36. Are you aware that a resolution was passed by the Legislative Assembly in 1876, I think, affirming the principle that the Government should construct a system of suburban railways? Yes, I remember that.

37. Do you think what the Government now propose to substitute in lieu thereof—namely, tramways—would be as conducive to the interests of the public? I think there is no connection between the two. I think suburban railways should be the business of the Government to carry out; and I am very much afraid that tramways are held out merely as a sop to prevent this being done. I am one of those who believe in suburban railways, but these in no way interfere with tramways. Tramways take the place of omnibuses and feed the railways, but they should not be substituted for railways.

38. Suppose the Government were to construct a tramway to the populous suburbs, do you not think they would ultimately be compelled to have a railway? Yes, certainly they would, as the population and traffic increased.

39. Are tramways worked by steam motive power much more economical than or as economical as railways? No; they are more expensive than railways, and I will explain why. The ground having been purchased, and of course remaining in the hands of the Government, the construction of the railroad is simply metal which is put between the rails and sleepers. This is all that is necessary, because there is only the traffic of the trains along it. But tramways in addition to its own trains along them have the ordinary street traffic passing along and over them; it is necessary to pave them much better indeed than has been done in the present tramway to Redfern, with at least an 8-inch pinch instead of a 4-inch. The cost of that paving, together with that of laying the rails, I do not think would come to any less than £10,000 a mile, whereas the cost of railways, apart from the land—that is, the cost of construction itself—would not be more than half the money.

40. It is your opinion that tramways proper simply superseded the 'bus traffic? Omnibus traffic.

41. As a superior means of locomotion to omnibuses? Yes, it takes the place of the omnibus traffic. Those who have been to Europe, and have seen the method with which suburban trams run to the principal stations in a few minutes, will feel that Sydney must follow the example eventually or be content to be behind the age. At stated intervals the line is cleared, and persons from fixed stations are run into the central station in a very few minutes. I will instance Chesterhurst station in Kent where the line is cleared at the time when business men are going into the City in the morning, and the train runs to London Bridge, a distance of somewhere about 12 miles in 8 minutes. Now omnibus or tramway traffic could never do that. Railways enable business men to live at a distance from town, and to get in at a given fixed time, as tramways could never do.

42. Do you know the present motor connected with our tramway? Yes.

43. Do you know what is the steepest gradient that engine would have the power of hauling the carriages over? I should say one in twenty-five, or perhaps one in twenty-two; but we have gradients in our city, for instance at Brickfield Hill, of one in eighteen, and there would be an immense waste of motive power to get up that hill.

44. *Mr. Combes.*] Are you aware that the portion of the Paris system of tramways that was run for some considerable time by steam motors is now drawn by horses? Yes.

45. *Mr. Farnell.*] Has a similar change been made in other places? Yes.

46. For instance in America? You can scarcely compare American with European tramways. In America horses are generally used for haulage of tram-cars. In fact Mr. Stephenson, of New York, the largest maker of tram-carriages in the world, told me distinctly that nothing could beat horse traction for tramways, and when you come to consider the matter you will see why we run at the present moment omnibuses in George-street every 3 minutes. If motors were to do that work they must be motors that would not stop the traffic, that is to say, they must move as quickly as omnibuses, and necessarily it follows that if, as we actually do, we ran an omnibus every 3 minutes, which takes fifteen passengers, and also sets down the same number. Now, a steam-motor might take double the number of passengers, but would take double the time of the omnibuses in taking up and setting them down, and as you must necessarily

necessarily have a double or up and down line that would stop the traffic. On the other hand, if you had a horse-motor the carriages could be constructed upon precisely the same principle as omnibuses, to carry the same number. They would run and fill as quickly, and need not stop the traffic longer than omnibuses. It would be impossible to have steam-motors in George-street, but in Elizabeth-street the objection does not apply, as that goes at longer intervals. People who are in the habit of getting an omnibus every 3 minutes would not wait 10 minutes for a steam-motor, and if such long intervals as these were run by the cars there would soon be opposition omnibuses, which would take the intermediate traffic. In New York, where they have carried out the tramway system better than in any part of the world, there they have double and single horse-cars which run one after another as fast as possible, and take the quick traffic. Then comes the question as to whether Government should interfere with the horse traffic of the city, and I am of opinion that it is beneath the dignity of Government. If they did so in this instance they might take the ordinary coaches and omnibuses throughout the length and breadth of the country, or do the whole of the horsing business.

J. Young,
Esq.
12 Feb., 1880.

47. Upon the same principle they might take the steamer traffic? Yes.

48. Comparing the two modes of transit, steam motive power and horse traction, which is the quicker? Steam is no doubt the quicker, but a steam motor is much more likely to get off the line than a horse-tram, because you cannot make the points of a tramway to be movable as in a railway; they must be fixed points, and an engine cannot be worked with the same ease at these points as a horse.

49. Although you propose by this Bill to use steam motive power, you intend to use it only under special circumstances? Yes, only where applicable, as for instance on a certain main road. I do not say in what direction. The main road may be worked by steam, and the branches that feed it by horses. I do not say that the Government could not do the same. Whether they intend to do so I do not know, but if they do intend to interfere in this business it seems to me to be a species of paddling outside the duties of Government.

William Shenstone, Esq., examined:—

50. *Chairman.*] You are Secretary to the proposed Company? Yes.

51. Do you produce the minute-book? Yes. This is the minute-book of the Sydney City and Suburban Tramway and Omnibus Company. (*The witness produced the same.*)

W.
Shenstone,
Esq.

52. Do you produce the minutes of the first meeting of the proposed Company? Yes; the first meeting was held by a number of gentlemen for the formation of the Company, and these are the minutes of the resolutions under which the Company was formed and the amount of capital determined upon.

12 Feb., 1880.

53. What was the capital determined upon? £500,000 divided into 50,000 shares of £10 each.

54. Other meetings have been held since then? Yes, at which these resolutions were confirmed and other business was done in connection with them, up to the preparation of this Bill.

55. Will you furnish a copy of those minutes to the Committee? I will. (*See Appendix.*)

56. Have you had any experience at all in connection with tramways? None whatever, except in a clerical capacity.

57. You have been Secretary to the Omnibus Company for some time? Yes, and I was secretary to the Deniliquin and Moama Railway during its construction, and have a general knowledge of the financial business and management of such undertakings.

58. Do you know Mr. Gilles, one of the promoters of this Bill? I do.

59. He is a gentleman of very large experience, is he not? He is a director of our Company; how far his experience outside of that extends I cannot say.

TUESDAY, 24 FEBRUARY, 1880.

Present:—

MR. COMBES,

MR. DRIVER,

MR. FARNELL.

R. DRIVER, ESQ., IN THE CHAIR.

Alfred William Gilles, Esq., examined:—

60. *Chairman.*] You are one of the promoters of this Bill? I am.

61. Have you given any attention to the subject of tramways? Yes; I have read up largely upon the subject, and have gathered information from any quarter that I thought likely to furnish me with correct information.

A. W. Gilles,
Esq.

62. Have you seen the practical working of any tramways? Of steam tramcars only in this colony.

24 Feb., 1880.

63. You have not seen the practical working of any other? Not by steam. Some years ago I saw them worked by horse traction in New Zealand and also in South Australia, but not upon the present system of sunken rail.

64. The present system is an improved system, is it not? It is.

65. By whom are the tramways worked in the two colonies you have mentioned? By private enterprise.

66. Not by Government? No; I never heard of Government working tramways.

67. Neither there nor elsewhere? Neither there nor elsewhere.

68. Are the two colonies you have named the only colonies, with the exception of New South Wales, in which tramways are being worked? No; they are working tramways in South Australia.

69. Is that tramway in the hands of the Government? I believe not.

70. Are the gentlemen interested with you in promoting this Bill men of means? They are—of undoubted means.

71. Should the present Bill pass there will be no difficulty whatever in carrying out the objects of the Company, either from want of capital or any other causes as far as you know? None whatever, so far as I know.

72. I suppose it is now pretty generally admitted that tramways are a great public convenience? Yes; are a public necessity.

- A. W. Gilles, Esq.
24 Feb., 1880.
73. In your opinion, is it the duty of the Government to undertake such works? Decidedly not.
74. Why not? Because where Government might run a line which would be a profitable investment to a private company it would be a serious loss to the State.
75. Can you assign any reason for that? My experience has always shown me that what it would cost the Government a pound to do a private Company could do at a large discount. There would be more economy in the working, more facility in carrying out the business. Having a direct interest in the matter causes private individuals to look after its management more closely.
76. That has always been the case in matters which have come under your notice? Yes, always.
77. The Company asking for this Bill has been regularly formed? Yes.
78. And the application for this Bill to Parliament is *bond fide*? It is a *bond fide* application. Perhaps I may be permitted to say that I have watched the working of the tramway here, which is generally accepted as a success in every way, both as regards the convenience of the public, and commercially. Now, I contend that while it is a public convenience it is undoubtedly not a financial success. On the contrary, and I am prepared to prove it in a few words, it is a financial failure.
79. How can you show that? From the evidence that is before your House, as furnished by the Commissioner for Railways, I understand, which states that the receipts upon your tramway average £12,600 a-year, and that the expenditure is £7,500; that apparently shows a profit of £5,100, which would be a large dividend upon the capital as represented in the cost if I recollect rightly, of £22,000 or £23,000 for a mile and thirty-five chains. But as it is contemplated in this Bill that my friends are asking for to make a rate of a penny per mile, it stands to reason that that is not running on its merits, inasmuch as they are receiving for less than a mile and a half a twopenny and threepenny fare. If you reduce that to a penny halfpenny that sweeps away more than £5,100, and it must come to that as soon as tramways are established at a penny a mile. Then again, there is no provision in the amount of £7,500 for wear and tear, and so far as I have understood, and indeed as I know positively, there is very serious wear and tear going on.
80. To what estimate are you now referring? To the estimate of the Commissioner of Railways. It is published in a Blue Book that the whole cost will stand at £7,500 a-year, but no provision is made for wear and tear for maintenance. Now, I know upon the evidence of people working the tramway, that for some time past the boilers or motors began to give in, and that the Government have had to send to Europe to obtain copper tubes to repair the present one; the rails too are giving way, and I know the road is sinking. I therefore conclude, and my opinion is backed up by the best evidence in the world, contained in the leading scientific journals, that the calculation of the cost is incorrect. In the works to which I refer it is shown that the working expenses of railways in all parts of the world are 50 per cent. upon the receipts, whereas upon tramways the working expenses average 85 to 95 per cent. If you apply that rule to this tramway you will find it a seriously losing instead of a gaining affair, and that is practically the outcome of it.
81. Do you attribute that solely to the fact that the matter is in the hands of the Government? Not altogether partly to that, but in a greater measure to the employment of steam-motor. Steam throughout the world is condemned in the working of tramways. It is not the proper system, is not convenient for the requirements of the citizens or inhabitants of a place, nor is it profitable in a financial way.
82. Have you any farther remarks to make? One of the main reasons of the failure of this system is the weight of the motor—the motor kills the road, and exceeds the weight of the carriages when loaded by three to one. Then, too, you have to provide a road specially to carry the motor, and not to carry the people. Then again, the road laid down to provide for the motor is a convenience to the general traffic of the city, the heavily laden vehicles make use of it, and thus they destroy it, whereas with a lighter road they cannot do so. It would be of no use to them.
83. Do you propose to adopt a different state of things in your Company? We propose to follow the latest experience in Paris, in Belgium, in Scotland, in England, and in other parts of the world, as well as to avail ourselves of our experience from watching the working of the tramway here. I may add that for long distances, when the traffic is not interrupted, and where the tramway can go through by-streets, in those cases our Company would think of using steam.
84. Mr. Farnell.] You have referred to some articles in leading scientific journals;—do you allude to “The Engineer”? I do refer to that as one.
85. Is there not reference in some of those articles to two Committees of the House of Commons upon this subject? To one Committee—I am not aware of a second. The report of the Committee is in one of the papers I have read, of the 21st April I think.
86. Is steam power for tramways condemned by that Committee? Yes it is, as I read it.
87. In that report is there not a statement to the effect that steam or other mechanical power should not be allowed to be used upon tramways for a period beyond seven years? Yes.
88. Do you know the reason why the Committee reported against the use of steam power upon tramways within towns? The traffic has never been carried on successfully under steam; there have been so many conditions that have interfered with its success: the breaking down of a portion of machinery, the breaking of a wheel, the bursting of a tube, the giving way of the rails, or the sinking of the road would disarrange the whole of the traffic of the city for hours; because the weight of the motor—unless it were much lighter than the one we use here—is so great that a considerable time must be occupied before it could be got off the street, and meanwhile the whole of the traffic would be interrupted.
89. Is it not found to be the fact that horse traction affords greater convenience and more expedition than steam for tramways? Yes; the most successful way of working short distances in public places is by horses. Lines that have been, as the Americans say, “operated upon” for years with steam, and have failed even with two-horse power, have, when reduced to one-horse cars, been profitable lines.
90. If you use steam motors you require to have the road specially constructed for them? It must be so constructed.
91. Is it not the fact that the construction of a road or tramway for steam traction costs more than a railway? Far more, as a general rule.
92. I think you stated that the present tramway was not a financial success? Undoubtedly not, I think.
93. I think you propose under your Bill to adopt steam, do you not? In some parts. I may say that when the matter was first proposed our feeling was very strongly in favour of steam; but from observation and information we have changed our views very much.

94. Steam might be applied in cases where the journeys were rather long, and where the traffic was not so frequent? Only where the traffic is not frequent. A. W. Gillies,
Esq.
95. You think where a tramway may not be a financial success under Government management it may become so under a private Company? Yes, we have experience of that every day,—what Government would lose money by would yield a Company a good dividend. 24 Feb., 1880.
96. I suppose you are aware of the proposal of Government to carry out a system of tramways to the suburbs? Yes.
97. Do you not think that in a very short time, in consequence of the increase of population in these suburbs, it would be necessary to supersede these tramways by a system of suburban railways? I have always maintained that the only system which could successfully accommodate the population of the suburbs is one of suburban or circular railways.
98. Then the tramway would answer as a mere feeder? Yes, or to relieve the railways of their passengers, to take them to their homes or places of business.
99. In many ways the tramway would be useful for intersecting lines throughout the city? Yes.

Edward Combes, Esq., M.P., C.M.G., examined:—

100. *Chairman.*] What is your profession? I am a civil engineer, member of the Institution of French Engineers, and an associate of the Institution of Civil Engineers in England. E. Combes,
Esq., M.P.,
C.M.G.
101. I believe you have paid considerable attention to the formation and working of tramways? Yes, I have paid particular attention to the construction and working of tramways, and during my late visit to Europe I examined, from an engineering point of view, all the tramways that were established in the cities I visited—that is to say, in England, France, and Belgium, but more especially in Paris and Brussels. 24 Feb., 1880.
102. They are now almost universally looked upon as a great convenience? They are looked upon as a public necessity.
103. Do you happen to know what is now considered the best rail for the purpose? The best class of rail for a town where carriages run in the streets is a rail with a sunken groove, commonly known here as the Larsen rail, or rather a modification of that rail. It is so called from the method of fastening. Nearly all the rails that had been laid down from the formation of the first Liverpool tramway have been of this class. These rails had been fastened with a spike through the bottom of the groove. The Larsen invention was to fasten the rail at the side without weakening it by boring; that is all the difference. There are other kinds of rails, all modifications of this, with the exception of one, which is the only one I know in use that is made on a different principle—this is the Beloe rail, invented by Mr. E. H. Beloe. That rail is made in this manner:—It is in two pieces, like a double-headed rail split in two and kept apart with the chair coming between the two pieces through which it is bolted, the space between forming a groove in which the flange of the tram-wheels run. It is put on transverse sleepers in the same way as a common railway-line is laid. But for all purposes where there is considerable carriage traffic in streets, where carriages have to run over rails, a modification of the Larsen rail I think to be much the best, and further that it is absolutely necessary that the space between the rails and a portion of the street should be paved with granite, so that the wheels when they come against a portion of the line to cross the rails they will go over it without difficulty. I may mention here that in America, where there are more tramways than in any other part of the world, where, in fact, tramways took their start, and whence, although the term "tramways" is now beginning to be employed, they generally take their name. Thus, in France they were termed "Chemins de fer Americaines;" in America they use a tram-rail which stands above the level of the road, which of course causes considerable obstruction to the carriage traffic. These tramways are put down through the business parts of the city for the convenience of the public, and the people say that those who have private carriages must either use the avenues and less frequented streets, or put up with the inconvenience. Almost every American town is chequered with tramways. The towns are usually divided into square blocks, in the same way as our modern towns—Bathurst, Orange, and other Australian towns. The tram-carriage goes up and down every alternate street both ways, so that knowing the number of the street to which you want to go—the streets being all numbered—you need not walk more than half a block, say from 80 to 100 yards, if you want to go into any of the transverse streets to get an up or down tram. They run every few minutes, and afford a very easy and economical mode of transit to any part of the town.
104. Is horse or steam traction employed upon these trams? Almost invariably horse traction. Where there is a long length of road, that is to say, where you run a considerable distance without a stoppage it is cheaper to use steam, or a mechanical motor of some kind, than horses, but where you have to stop every few yards to take up or set down passengers it is found that horse is much more economical than steam traction. Accordingly in Paris the Tramway Companies on several of the lines which they worked with steam motors have now taken them off and are running horses again. Where the length is sufficiently great between the stations steam motors are still employed. Where these are used the tram is to all intents and purposes a light railway, and the streets are generally very wide, as modern streets are now invariably made. For instance, in Washington, where the streets are from 2 to 3 chains wide, and have not only a wide pavement but a carriage-way for common carriages on both sides, the streets are planted with trees, and in the centre a space is left on which this double-line of tramway or light railway is laid down. Carriages are not allowed to cross except where granite paving is laid down, and the crossings made perfect, and these they must cross at a slow pace. In laying down a tramway in a town it is this granite paving which makes it so expensive.
105. Are the tramways in the cases you have referred to usually constructed by Government or Municipalities? I have never heard of one single case where the Government or Municipalities have constructed anything of the sort. There are instances where they have guaranteed or subsidized a line by a certain interest, but the money for constructing the line has been found by Companies. I would like to point out that where the granite paving of a street costs from some £7,000 to £8,000 a mile it is impossible to make a tramway as cheaply as a railway, where no paving is wanted, and nothing but a little ballast. Not only must this be done, but in order to prevent the tramway sinking, the sleepers must be laid in concrete—a sufficient depth of concrete made of gravel and the best Portland cement—in order to prevent the line from sinking or shifting; otherwise you would soon have the streets out of repair.
106. You do not know what the promoters of the present Bill intend doing? I know nothing of the intentions of the promoters of the present Bill, excepting what I see in the Bill itself. From that I see that it is intended

E. Combes,
Esq., M.P.,
C.M.G.
24 Feb., 1880.

intended to work both by steam and horse traction, and that I consider perfectly right; in fact I think any Company should provide in a Bill for the running of motors either by steam or compressed air, which I think will come into general use in a short time, especially where they do not often stop to pick up passengers.

107. *Mr. Farnell.*] In reference to the cost of paving narrow streets that would apply to nearly every street in Sydney? I think it would. In fact, in reference to the streets in Sydney, it would be wise, where a tramway was laid down, to thoroughly pave the street from one side to the other; for if a portion were paved with granite and the other macadamized, then, having a differential rate of wear and tear, the street would be uneven; the macadamized portion being worn down, the edges of the granite would form as much bar to the passage of carriages driving across as the tramway.

108. One side of the street would be more cut up than the other? Yes, on both sides of the street where the paving did not exist, unless the line were constructed on one side.

109. Is there not a good deal of difference between the working expenses of steam and horse power for short journeys? Yes. They say everything can be shown by figures, and during last year, when I was in Paris, there was a very exhaustive paper read on the subject of tramways, in which it was shown that steam was the cheapest motor of any. Another paper was read immediately after to show that horse-power was the cheapest. The whole thing depends upon the cost of horses and horse-feed; where we have to pay 6s. a bushel for corn the cost of horse-traction must be very considerably more than where the cost is half-a-crown. The same remark applies to hay and other fodder. Where a horse can be bought and kept moderately cheap nothing is so cheap for the traction of tramway carriages. The horse can be easily stopped, but when a steam-motor is stopped you have to put brakes on and consume a considerable amount of power in pulling up. Then in starting again you have all the difficulties incidental to starting steam-engines to overcome before you can move off; whereas it is the easiest thing to stop a horse and to put him in motion again, and little power is lost.

110. What is your opinion in reference to connecting the suburbs with these tramways? If the suburb is any distance from town no doubt there is nothing like a proper railway, upon which you can travel at great speed; otherwise the distant suburbs cannot be made use of for business men. In England and Europe large numbers of people reside at considerable distances from the towns where they conduct their business; for instance, many merchants and others of the City of London reside as far away as Brighton, 50 miles from London, and the train brings them up to town in an hour to their business. It would be impossible for business men to reside at such great distances from town if their means of transit was at the rate of 8 or 10 or perhaps only 5 miles an hour, instead of by means of a powerful engine running at the rate of 40 or 50.

111. Do you think, supposing it were intended to connect South Head, Waverley, Cook's River, Ashfield, and Canterbury, by a circular system with the City, it would be desirable to have a tramway? I am of opinion a railway should be constructed to do that, and I am sure that if at the present time a tramway were made to those places, within half-a-dozen years it would still be necessary to make a railway.

112. They would be superseded by railways? Yes, or would simply become auxiliaries to the railways. They will not be able to do the work quick enough. I may mention here, with reference to the necessity for steam in connection with these circular railways, the underground line of London, and the overhead line of New York, I have myself witnessed and timed, watch in hand, trains coming in and going out every minute and a half. I have sat for half an hour watching and timing them. The train has come in, set down its passengers, taken up others, and gone again in one minute and a half. In London the Metropolitan trains run every two and a half or three minutes; of course there can be no attention paid by porters on this line, everything is done by the passengers themselves. The English carriages are similarly constructed to ours, every door is opened when they come to the station, the people get out, others get in. There are three classes, and lads are placed at different parts of the station to indicate the first, second, and third classes. At these several points the different classes of passengers collect, so that when the train stops they at once step into their proper carriages, which stop opposite to them, and the train proceeds without a delay of more than a few seconds. In the American carriages there are openings at both ends, and at the stations as the people stream out at one end others pass in at the other, and there is a delay of not more than thirty seconds. The trains follow as quickly as I have stated during portions of the day, and so great is the passenger traffic that at times there is an accumulation which cannot be taken by the ordinary train, and additional trains are brought out of sidings purposely constructed on to the line immediately following the other carriages taking up the passengers so as to avoid any block.

113. You are now referring to railways? To the overground railway in New York I am referring in this particular instance. I may remark here that where steam power is used in cities I have never seen it used in the shape employed here; that is to say, I have never seen it used except by a proper steam motor, that is a motor of a more or less silent character. Here we have simply a little steam locomotive, nothing more and nothing less, which is eminently calculated to frighten everything that comes in its way. Now the motors that have been used on the Continent and in a good many different places I have visited have been so constructed as to be as silent as possible, that is to say, there are means provided on the locomotive that prevents the escape of steam in the puff, puff, puffing manner common to the steam-engine. This is done by condensing or partially condensing the steam and in contracting the exhaust, so as to make the steam leave in a continuous stream when leaving the exhaust. The motors I saw employed at Rowen and at Paris, and, I think, also in Belgium, were Mereweather motors, or a modification of the Mereweather motor by Mr. Holt, of the Paris tramway. Mr. Holt is one of the sub-editors or principal correspondents of the *Engineer*, and everything that has been written in that paper with reference to motors and tramways in Paris and on the Continent has been written by him. He is a very great authority, and I have his opinion and also that of Mr. Larsen—who you will recollect was examined before a Committee of this House, and at one time thought highly of steam motors—that wherever fodder could be got at all cheaply it was far cheaper to employ horse than steam traction.

114. *Chairman.*] I gather from your evidence that you are not particularly favourable to the present motor? I am not at all favourable to the present motor; I never saw a worse; and I think the carriages themselves the greatest possible abortions. Much more could be done with a better carriage and a better motor than the present, although, I think, that the work of that line could be as well done by horses as by steam.

SYDNEY CITY AND SUBURBAN TRAMWAY AND OMNIBUS COMPANY'S BILL.

APPENDIX.

[To the Evidence of William Shenstone, Esq., 12 February, 1880.]

MINUTES of a Meeting held at 72 King-street, Sydney, on Thursday, the 23rd October, 1879.

Present :—Messrs. John Young, John Woods, Alfred W. Gilles, Daniel Williams, Patrick Higgins, and Walter R. Hall.

Business.

To promote the formation of a Company for the purpose of making Tramways and otherwise providing for the traffic in the City of Sydney and Suburbs.

Resolved,—That a Company be formed to be called "The Sydney City and Suburban Tramway and Omnibus Company (Limited)," and the capital of the said Company be £500,000 sterling, divided into 50,000 shares of £10 each.

Resolved,—That the object of the said Company be to construct Tramways in the City of Sydney and Suburbs. To purchase the plant and interests of existing omnibus companies, and therewith to provide for the traffic during the construction of the main lines of Tramway, and also as feeders to the same.

MINUTES of a Meeting of the Promoters of the Sydney City and Suburban Tramway and Omnibus Company (to be incorporated by Act of Parliament) held at 72 King-street, Sydney, on Tuesday, October 28, 1879.

Present :—Messrs. John Young (Chairman), J. S. Jamieson, John Woods, A. W. Gilles, Daniel Williams, Chas. C. Skarratt, Patrick Higgins, and John R. Carey.

Minutes of meeting, held October 23, 1879, were read and confirmed.

MINUTES of a Meeting of the Promoters of the Sydney City and Suburban Tramway and Omnibus Company (to be incorporated by Act of Parliament) held at the "Royal Hotel," George-street, Sydney, on Tuesday, November 4, 1879.

Present :—Messrs. John Young (Chairman), A. W. Gilles, Daniel Williams, John Taylor, John Pope, J. R. Carey, J. S. Jamieson, and John Woods.

Minutes of meeting, held October 28, read and confirmed.

Business.

To appoint a sub-committee to adopt a draft of a Bill to be prepared for presentation to Parliament.

Moved by Mr. A. W. Gilles, seconded by Mr. J. S. Jamieson,—

"That the following gentlemen be a Committee to adopt a draft of a Bill, and to instruct the Company's solicitor in the preparation of the same, viz. :—Messrs. John Young, John Pope, J. R. Carey, and J. Woods."

Carried.

1879-80.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

SYDNEY CITY AND SUBURBAN TRAMWAY AND
OMNIBUS COMPANY'S BILL.

(PETITION AGAINST—MUNICIPAL COUNCIL OF SYDNEY.)

Received by the Legislative Assembly, 14th January, 1880.

To the Honorable the Speaker and the Members of the Legislative Assembly of New South Wales, in
Parliament assembled.

The humble Petition of the Municipal Council of Sydney,—

RESPECTFULLY SHOWETH :—

That your Petitioners observe that a Bill has been introduced into your Honorable House for the purpose of placing in the hands of a private Company the power to construct and maintain Tramways in this city and its suburbs.

That your Petitioners are of opinion that however desirable it may be to extend the system of Tramways, it would be inadvisable to give such privileges as those sought by the proposed Bill to any Company, but that the public interest would be best secured by such works being carried out and maintained by the Government of the Colony.

Your Petitioners therefore humbly pray that the said Bill may not pass into law.

And your Petitioners will ever pray, &c.

ROBT. FOWLER, Mayor.

[L.S.]

CHAS. H. WOOLCOTT, Town Clerk.

1879-80.

NEW SOUTH WALES.

TWENTY-FIFTH ANNUAL REPORT

OF THE

POSTMASTER GENERAL,

ON THE DEPARTMENTS UNDER HIS MINISTERIAL CONTROL,

BEING THAT FOR THE YEAR

1879.

Presented to Parliament by Command.

SYDNEY: THOMAS RICHARDS, GOVERNMENT PRINTER.

1880.

THE POSTMASTER GENERAL TO HIS EXCELLENCY THE GOVERNOR,

TRANSMITTING THE

ANNUAL REPORT FOR THE YEAR 1879 ON THE DEPARTMENTS OF THE POST OFFICE,
MONEY ORDER, GOVERNMENT SAVINGS' BANK, AND ELECTRIC TELEGRAPH.

Sir,

I have the honor to transmit to your Excellency the Twenty-fifth Annual Report on the Departments under the Ministerial control of the Postmaster General.

I.—POST OFFICE DEPARTMENT.

INLAND SERVICE.

The new postal route opened during the year 1879 amounted to 1,664 miles, viz. :—

In the Western Country.

- From Bathurst to Hill End, *via* the Bridle Track (re-established), three times a week.
- „ Bathurst to White Rock, six times a week.
- „ Eauabalong to Cobar, once a week.
- „ Gulgong to Cobbora, twice a week.
- „ Mandurama to Walli, twice a week.
- „ Mount Harris to Carinda, twice a week.
- „ Mungunyah to Yantabullabulla, once a week.
- „ Newbridge to Mount Macquarie, once a week.
- „ Wellington to Comobella, once a week.

In the Southern Country.

- „ Adelong to Mount Adrah, once a week.
- „ Boro to Mayfield, twice a week.
- „ Broken Dam to Wallandry, once a week.
- „ Brown Mountain to Bega, once a week.
- „ Bulli to Clifton, six times a week.
- „ Camden to Mount Hunter Creek, three times a week.
- „ Candelo to Mogilla, once a week.
- „ Canterbury to Belmore, three times a week.
- „ Cobargo to Wandella, twice a week.
- „ Coolac to North Gobarralong, twice a week.
- „ Dalton to Blakney Creek, once a week.
- „ Deniliquin to Cochran Creek, once a week.
- „ Eden to Timbilica, once a week.
- „ Gnalta to Mount Poole, once a week.
- „ Hay to Gunbar, once a week.
- „ Little Billabong to Tumberumba, twice a week.
- „ Moama to Perricoota, six times a week.
- „ Moama to Womboota (Edwards's), once a week.
- „ Murraguldrie to Carabost, twice a week.
- „ Muttama Reef to Mail Coach, between Cootamundra and Coolac, twice a week.
- „ Perricoota to Womboo (Rogers's), once a week.
- „ Pyree to Greenwell Point, six times a week.
- „ Robertson to Kiama, six times a week.
- „ Wagga Wagga to South Wagga Railway Station, six times a week.

In the Northern Country.

- „ Armidale to Inverell, *via* Tingha and Gilgai, once a week.
- „ Belmont to Catherine Hill Bay, twice a week.
- „ Bingera to Bundarra, once a week.
- „ Bonshaw to Texas (Queensland), once a week.
- „ Bridgeman to St. Clair, twice a week.

From

- From Copeland North to Bowman, twice a week.
 „ Copeland North to Copeland South, three times a week.
 „ Glen Innes to Red Range, once a week.
 „ Grafton to Southgate, twice a week.
 „ Hanging Rock to Glen Morrison, once a week.
 „ Manly to Gosford, twice a week.
 „ Narrabri to New Oriel, once a week.
 „ Quirindi to Tally Ho, *via* Walhollow, twice a week.
 „ Quirindi to Pine Ridge, *via* Warrah Ridge, twice a week.
 „ Scone to Woodlands, once a week.
 „ Tamworth to Moor Creek, once a week.
 „ Wallabadah to Nundle, twice a week.

472 miles of postal route were abolished, viz. :—

Western Roads.

- Between Checseman's Creek and Meranburn, once a week.
 „ Checseman's Creek and Molong, three times a week.
 „ Hill End and Brumbin, three times a week.
 „ Irvistone and Carr's Creek, six times a week.
 „ Mount Harris and Wammerawa, twice a week.
 „ Newbridge and Teesdale, once a week.
 „ Richmond and Castlereagh, three times a week.

Southern Roads.

- „ Jugiong and North Gobarralong, twice a week.
 „ North Wagga Railway Station, and Post Office, Wagga Wagga, six times a week.

Northern Roads.

- „ Bunnan and Merriwa, once a week.
 „ Colly Blue and Tally Ho, twice a week.
 „ Cooranbong and Catherine Hill Bay, twice a week.
 „ Goorangoola and St. Clair, once a week.
 „ Gosford and Blackwall, twice a week.
 „ Quirindi, Walhollow, and Pine Ridge, twice a week.

In the Suburbs of the Metropolis.

- „ Marrickville and Forest Hill, three times a week.

Increased accommodation on existing lines was afforded during the year 1879 as follows, viz. :—

Western Roads.

- Between Castlereagh and Bringelly, from three to six times a week.
 „ Condobolin and Eauabalong, from twice to thrice a week.
 „ Emu Ferry and Emu, from six to twelve times a week.
 „ Gulgong and Coolah, from once to twice a week.
 „ Gulgong and Mudgee, from six to eight times a week.
 „ Hartley and Hartley Vale, from five to seven times a week.
 „ Hill End and Tambaroora, from six to seven times a week.
 „ Meranburn and Parkes, from three to six times a week.
 „ Molong and Meranburn, from once to six times a week.
 „ Oberon and Gingkin, from once to twice a week.
 „ Orange and Molong, from three to six times a week.
 „ Quambone and Carinda, from once to twice a week.
 „ Rylstone and Mudgee, from twice to thrice a week.
 „ Taralga and Curraweela, from once to twice a week.

Southern Roads.

- Between Bateman's Bay and Moruya, from twice to thrice a week.
 „ Bombala and Pambula, from once to twice a week.
 „ Candelo and Kameruka, from twice to thrice a week.
 „ Cootamundra and Coolac, from two to six times a week.

Between

- Between Crookwell and Tuena, from twice to thrice a week.
- „ Eurobodalla and Wagonga, from once to twice a week.
- „ Euston and Wentworth, from once to twice a week.
- „ Goulburn and Crookwell, from twice to thrice a week.
- „ Goulburn and Currawang, from twice to thrice a week.
- „ Goulburn and Middle Arm, from once to twice a week.
- „ Goulburn and Taralga, from twice to thrice a week.
- „ Goulburn and Wheeo, from twice to thrice a week.
- „ Gunning and Lower Gundaroo, from three to six times a week.
- „ Jereelderie and Wilson, from once to twice a week.
- „ Laggan and Peelwood, from twice to thrice a week.
- „ Marsden's and Wollongough, from once to twice a week.
- „ Marulan and Bungonia, from six to seven times a week.
- „ Moss Vale and Robertson, from three to six times a week.
- „ Murrumburrah and Grenfell, from six to seven times a week.
- „ Peelwood and Tuena, from once to twice a week.
- „ Taralga and Golspie, from once to twice a week.
- „ Wagga Wagga and Ariaah, from once to twice a week.
- „ Young and Grenfell, from five to six times a week.

Northern Roads.

- Between Aberdeen and Rouchell Brook, from once to twice a week.
- „ Armidale and Glen Innes, from three to six times a week.
- „ Bonshaw and Tenterfield, from once to twice a week.
- „ Breeza and Gunnedah, from four to six times a week.
- „ Bulahdelah and Forster, from once to twice a week.
- „ Coonabarabran and Gunnedah, from once to twice a week.
- „ Glen Innes and Tenterfield, from three to six times a week.
- „ Gloucester and Copeland North, from three to four times a week.
- „ Muswellbrook and Merriwa, from three to six times a week.
- „ Paterson and Gresford, from three to six times a week.
- „ Quirindi and Wallabadah, from three to six times a week.
- „ Scone and Bunnan, from once to twice a week.
- „ Singleton, Bridgeman, and Goorangoola, from once to twice a week.
- „ St. Leonard's and Hornsby, from once to seven times a week.
- „ Stroud and Gloucester, from three to four times a week.
- „ Tamworth and Moor Creek, from once to twice a week.
- „ Tinonee and Taree, from three to six times a week.

The communication existing on the following lines was decreased during the year 1879 :—

Western Roads.

- Between Cowra and Grenfell, from six to three times a week.
- „ Eauabalong and Lake Cudgellico, from thrice to twice a week.
- „ Millamurra and Quartz Ridge, from twice to once a week.
- „ Sofala and Hill End, from six to three times a week.

Southern Roads.

- Between Bowning and Coolac, from six to three times a week.
- „ Brown Mountain and Kameruka, from twice to once a week.
- „ Daysdale and Corowa, from thrice to twice a week.

Northern Road.

- Between Hornsby and Kincumber, from twice to once a week.

The extent of postal route traversed in the Colony on the 31st December, 1879, was 21,368 miles,

viz. :—

On horseback	12,987 miles.
By coach	7,605 „
By railway	776 „

The extension of mail route by railway during 1879 was as follows :—

North Wagga Wagga to South Wagga	5 miles.
Werris Creek to Gunnedah	41 „
Total	46

The

The number of miles travelled in the year 1879 was 4,776,925, being an increase of 387,000 miles on the mileage of the previous year.

Official offices (*i.e.*, in charge of persons unconnected with private business) for the transaction of the combined Postal, Telegraphic, Money Order, and Government Savings' Bank business were created at the following places :—

Boggabri...	On 1st September.
Bourke	„ 18th July.
Breeza	„ 22nd November.
Broughton Creek	„ 28th July.
Brush Grove	„ 15th September.
Bulli	„ 25th August.
Burrawang	„ 12th March.
Clifton	„ 16th June.
Copeland North...	„ 10th April.
Copmanhurst	„ 1st September.
Coraki, Richmond River	„ 1st September.
Gosford	„ 1st November.
Hillston	„ 23rd May.
Marsden's	„ 1st April.
Moss Vale	„ 30th June.
Nelligen	„ 10th October.
North Wagga Railway Station	„ 1st September.
Nowra	„ 1st June.
Tingha	„ 14th June.
Wardell	„ 1st September.
West Tamworth...	„ 21st February.
Woodburn	„ 1st August.

The number of Post Offices established was 51, viz. :—

Belmore	Mount Murray
Ben Lomond	Mount Poole
Blakney Creek	Mount Wilson
Boolambayte	Mungunyah
Boorook	Nangribone
Brocklehurst	Newpark
Chatswood	Park Village
Clear Creek	Pelican Flats
Clifton	Perricoota
Comobella	Southgate
Conjola	Spring Hill
Copeland South	Spring Ridge
Cumnock	Timbilica
Dalwood, Richmond River	Urawillkie
Davis Town	Wagra
Gilgai	Walli
Greenwell Point	Wanaaring
Gunbar	Wandella
Mayfield	Warrah Ridge
Merribung	West Tamworth
Merrygoen	White Rock
Mogilla	Whittingham
Moira	Wollomombi
Moor Creek	Woodlands
Mount Adrah	Yammatree
Mount Hunter Creek	

The number of Post Offices re-established was 3, viz. :—

Drake
Heifer Station
Murrumbidgee.

The number of Post Offices discontinued was 14, viz. :—

Borenore	Mount Murray
Brumbin	Nangribone
Carr's Creek	Rexcourt
Catherine Hill Bay	Teesdale
Falconer	Tichborne
Forest Hill	Wammerawa
Lunatic Reefs	Yullundry

The Post Offices at Gullen, Shepherd's Creek, and Turlinjah were converted into Receiving Offices.

It was found desirable to change the designations of the following Post Offices, viz. :—

Back Creek	to	Copeland North
Bowenfells	to	South Bowenfells
Eskbank	to	Lithgow
Lane Cove	to	Gordon
Lewinsbrook	to	Allynbrook
Lithgow	to	Bowenfells
Wagga Railway Station	to	North Wagga Railway Station

In the Appendix will be found a list of the 884 Post Offices in the Colony on the 31st December, Appendix A 1879.

A Post and Telegraph Office was established at the Garden Palace on the day the International Exhibition was opened (17th September), and two months later arrangements were made for the issue and payment of Money Orders there. A glance at the appended return of the business transacted up to the 31st March, 1880, will show that the accommodation was largely availed of by the public.

Number of Letters posted	17,692
" Packets	"	4,360
" Newspapers	"	4,484
" Telegrams issued	1,050
" " transmitted	3,500
" Money Orders issued	63
" " paid	2
The revenue derived from the—				£	s. d.
Sale of Postage Stamps was	304	0 0
Transmission of Telegrams	105	0 0
Issue of Money Orders	3	8 6
Total	£412	8 6

Receiving Offices were established at the following places during the year 1879, viz. :—

Angledool	Numbugga
Bald Nob	Puddledock
Bellmount Forest	Red Range
Bindle	Rock Flat
Bowman	Sandy Creek
Carabost	Shepherds' Creek
Cochran Creek	Stanmore
Collingullie	The Pinch
Coolongolook Gold Field	Trevallyn
East Gosford	Turlinjah
Gerilgambeth	Vale of Clwydd
German Creek	Wanaaring
Gullen	Willawillingbah
Halton	Winburndale
Hickey's Creek	Wollomombi
Hobby's Yards	Womboo (Rogers's)
Illabo	Womboota (Edwards's)
Katoomba	Wyagdon
Morago	Wyndham
Mount Pleasant	Yellow Water-hole
New Oriel	

The Receiving Offices at the undermentioned places were discontinued, viz. :—

Annan Vale	Gol Gol
Carrowobity	Hickey's Creek
Dulladulladerry	Waddai
Fairy Meadow	Yarra Mundi

The Receiving Offices as Boolambayte, Mount Wilson, Spring Hill, Wagga, Wanaaring, and Wollomombi, were converted into Post Offices.

The Appendix contains a list of the 101 Receiving Offices in existence at the end of the year. Appendix B.

There were 144 changes of Postmasters during the year 1879.

In the Appendix is given a return showing in what parts of the Colony the Government possess Appendix C. buildings for the transaction of the Postal, Money Order, Savings' Bank, and Telegraph business, as well as the places where premises are rented for the purpose. Government buildings at the following places were completed and occupied during 1879, viz. :—

Bingera	Murrumburrah
Carcoar	Narrabri
Cooma	Scone
Coonabarabran	Urana
Gulgong	West Kempsey
Jereelderie	

A large iron letter-receiver was erected at the Windsor Railway Station.

A small iron letter-receiver was removed from Richmond Road, Windsor, it being no longer required. Small iron letter receivers were placed as follows, viz. :—1 at the corner of Harris and Quarry Streets, Ultimo; 1 outside Australasian Steam Navigation Company's gates, Sydney; 1 at Callan Park; 1 at the Newtown Railway Station, near Wagga Wagga; 1 at Bruce's store, North Wagga Wagga; 2 at the Glebe, viz., 1 at the corner of Ross-street and St. John's Road, and 1 at the corner of Pyrmont Bridge Road and Woolley-street; 1 at the corner of Johnston and Collins Streets, Leichhardt; 2 at Singleton, viz., 1 opposite the Court House and 1 at the Railway Station; 2 at Wollongong, viz., 1 opposite the hospital, Para Meadow Road, and 1 opposite the Court House; 1 at the corner of Kendall and Lachlan Streets, Cowra; 1 at the corner of Bathurst and Flint Streets, Forbes; 1 at the corner of Pyrmont Bridge and Camperdown Roads, Sydney; and 1 at each of the following Railway Stations, viz., Gunnedah, Spring Hill, and Murrumburrah.

On

On the 31st December the number of iron letter-receivers erected in the Colony (including both large and small) was 198; the number of other kinds of receiving boxes was 6, and the number of newspaper receivers 12.

At Albury, Ashfield, Bathurst, Deniliquin, Newtown, Orange, Redfern, Richmond Road, St. Leonards, Wagga Wagga, and Wollongong, the letter-receivers are cleared by special messengers, who are respectively paid an annual sum for the performance of this work; at other places this duty is fulfilled by persons regularly attached to the staff of the Department.

Appendix D.

The number of licenses for the sale of postage stamps issued in 1879 to persons other than postmasters or receiving-office-keepers was 55. In the Appendix is given a return of the number of persons holding these licenses throughout the Colony.

There were 8 additional letter-carriers employed during the year 1879. There were at the end of the year 113 letter-carriers distributed throughout the Colony as follows:—

Sydney and Suburbs	78
Albury	1
Armidale	1
Bathurst	2
Deniliquin	1
East Maitland	1
Forbes	1
Goulburn	3
Grafton	2
Hay	1
Hill End	1
Morpeth	1
Mudgee	1
Newcastle	3
Orange	1
Parramatta	3
Parramatta Suburbs	1
Singleton	1
Tamworth	2
Wagga Wagga	2
Wallsend	1
West Maitland	2
Wickham and Hamilton	1
Windsor	1
Young	1

Under special arrangements with persons who are expected to devote only part of their time to the work, a free delivery of correspondence is also afforded in the following localities, viz. :—

Anvil Creek	Liverpool
Ashfield	Macdonald Town
Botany	Manly
Braidwood	New Lambton
Burwood	Oakhampton Road, West Maitland
Dubbo	Onebygamba
Five Dock	Penrith
Gladesville	Petersham
Hamilton	Richmond
Hunter's Hill	Richmond Road
Kiama	Ryde
Lambton	St. Peter's
Leichhardt	Waratah
Lithgow	Wollongong

The number of persons employed in connection with the Postal Department, for the year 1879, is as follows:—

Postmaster General	1
Secretary	1
Chief Clerk, Post Office	1
Accountant	1
Superintendent, Mail Branch	1
Cashier	1
Clerks	71
Probationary Clerks	14
Postal Inspectors	4
Mail Guards	12
Railway Mail Sorters	11

Stampers,

Stampers, Letter-carriers, &c.	188
Postmasters	884
Assistant Postmasters	119
Clearing receivers and delivering letters... ..	41
Detective	1
Receiving Office Keepers	101
	1,452
Mail Contractors	456
Total	1,908

The following comparative return will afford some idea of the sanitary condition of officers attached to the Head Establishment:—

No. of Officers absent.			Aggregate period of absence.		Average period of absence for each officer.	
1878.	1879.		Days.		Days.	
			1878.	1879.	1878.	1879.
40	43	Clerks	439	474	11	11
12	17	Sorters	191	442	16	26
20	26	Letter-carriers	317	494	16	19
19	18	Messengers, Guards, Grooms, &c.	252	342	13	19

The Postal Inspectors travelled over and inspected 19,016 miles of mail route, and visited the undermentioned Post Offices:—

†Aberdeen	†Bulli	*Crookwell
Albion Park	Bungowannah	*Cudgegong
†Albury	*Burrawang	Cullenbone
Alstonville	†Burrowa	Cullen Bullen
Amosfield	†Burwood	Curban
*Appin	*Cambewarra (2)	*Currabubula
Apple Tree Flat	†Camden	Dalton
†Armidale	†Campbelltown	*Dapto
†Ashfield	Canadian Lead	Darby's Falls
Attunga	Canberra	Darlington Point
†Ballina	†Cannonbar	Deepwater
*Balranald	Capertee Camp	†Deniliquin
Bankstown	†Carcoar	Denison Town
*Barraba	Carlisle Gully	†Denman

28 days are allowed for the conveyance of mails to and from Sydney and San Francisco, by way of Auckland.

Average number of days occupied in the conveyance of mails to and from Sydney and London, *via* San Francisco:—

<i>Inward.</i>	
London to Sydney	46 $\frac{1}{2}$
<i>Homeward.</i>	
Sydney to London	44 $\frac{1}{2}$

It is gratifying to mention that the Directors of the Pacific Mail Steamship Company, as well as the Commanders of the Mail Packets, have manifested much zeal in making the passages as expeditiously as possible, and they are now making special endeavours to further shorten the time for the conveyance of mails along the whole of this route.

The

The performance of the service *via* Melbourne and Point de Galle will be seen by the following return, viz. :—

Arrival at Sydney.				Departure from Sydney.			
Name of Vessel.	Actual date.	Actual number of days.		Name of Vessel.	Actual date.	Actual number of days.	
		Via Brindisi.	Via Southampton			Via Brindisi.	Via Southampton
Tanjore	6 Jan. ...	45	53	Tanjore	22 Jan. ...	45	55
Siam	1 Feb. ...	43	51	Siam	19 Feb. ...	46	55

Homeward, <i>via</i> Brindisi	55 $\frac{1}{3}$
Do. Southampton	63 $\frac{2}{3}$

The

The returns already given relate entirely to the performance of mail services under regular mail contracts. During the year, however, very quick passages between the Mother Country and the Colony have been accomplished by steam vessels of large size and power, not under any mail Contract arrangement. The following returns will show what these vessels have done, and I have only further to remark on the subject that the fact of such a fine class of vessels running without any subsidy from Government is a gratifying indication of the increased trade and importance of the Australian Colonies:—

STATEMENT showing the dates of Receipt and Despatch of the Mails per Orient and other Steamers during the year 1879; also, the amount of correspondence conveyed by each vessel:—

Inward.

LETTERS,

LETTERS, NEWSPAPERS, PACKETS, AND POSTAL CARDS POSTED THROUGHOUT THE COLONY.

The following is an estimated return of the number of Letters, Newspapers, Packets, and Postal Cards posted in the Colony during the year 1879, as compared with the number posted in the preceding year, viz:—

LETTERS.		1878.	1879.
Posted for Town delivery		3,156,400	3,192,000
„ Country delivery		12,782,900	13,772,600
„ Australian Colonies and New Zealand		720,900	794,400
„ Foreign despatch		353,500	397,200
Total number of Letters posted.....		17,013,700	18,156,200
NEWSPAPERS.			
Posted for Country delivery		7,811,600	9,447,100
„ Australian Colonies and New Zealand		628,800	807,100
„ Foreign despatch		376,100	445,500
Total number of Newspapers posted.....		8,816,500	10,699,700
PARCELS, &c.			
Posted for Country delivery		403,700	459,200
„ Australian Colonies and New Zealand		24,200	20,800
„ Foreign despatch		11,100	10,800
Total number of Parcels, &c., posted.....		439,000	490,800
Total number of Postal Cards posted		123,720	155,920

The increase during 1879 in the number of letters posted is at the rate of about 6 $\frac{2}{3}$ per cent., on the number of newspapers about 21 $\frac{1}{3}$ per cent., on the number of packets about 11 $\frac{1}{3}$ per cent., and on the number of postal cards about 26 per cent.

The average number of letters posted in 1879 in proportion to the population of the Colony is estimated at twenty-five to each person.

The following returns show the number of letters despatched and received by the mail packets on the respective routes *via* San Francisco, *via* Melbourne and Suez, and *via* Torres Straits and Suez.

Year.	Route.	Despatched.						Received.					
		*Intercolonial.			†Foreign.			*Intercolonial.			†Foreign.		
		Letters.	Packets.	News-papers.	Letters.	Packets.	News-papers.	Letters.	Packets.	News-papers.	Letters.	Packets.	News-papers.

*The term "Intercolonial" applies to Australian and New Zealand correspondence.

†The term "Foreign" in this return applies to all correspondence other than that for the Australian Colonies and New Zealand.

DEAD LETTER BRANCH.

Year.	Number of letters returned to writers as unclaimed.					Number of registered letters returned as unclaimed.	Number of letters unregistered but containing articles of value returned as unclaimed.	Letters received from and returned to the following places as being unclaimed.				Number of letters returned as unstamped.
	Originally addressed to places within the Colony.	Originally addressed to the neighbouring Colonies.	Originally addressed to the United Kingdom.	Originally addressed to other places not mentioned in the preceding columns.	Total.			Neighbouring Colonies.	United Kingdom.	Other places not mentioned in preceding columns.	Total.	
1878	93,468	7,397	1,577	578	103,010	1,088	880	12,149	5,128	741	18,018	27,937
1879	103,869	7,336	2,091	587	113,883	1,046	886	14,165	6,409	1,962	22,530	36,657
Increase	10,401	514	9	10,873	6	2,016	1,281	1,221	4,512	8,720
Decrease	61	42

In 886 unregistered letters which were opened in the Dead Letter Branch during the year 1879 there was found an amount of money equal to £16,346.

The number of letters, &c., delivered by the letter-carriers attached to the head office during the years 1878 and 1879 was as follows :—

	1878.	1879.
Unregistered letters	3,818,262	4,478,740
Registered letters	24,110	24,672
Books	47,040	44,336
Newspapers	520,274	564,172

The above figures do not include letters, &c., for Newtown or Balmain, as correspondence for those places is enclosed in direct mails and sent to the Newtown and Balmain Post Offices for delivery by letter-carriers.

REGISTRATION BRANCH.

The number of Registered Letters which passed through the General Post Office in 1879 was 170,195, against 152,549 in 1878, giving an increase of 17,646.

NUMBER OF MAILS RECEIVED AND DESPATCHED.

The following return shows the number of Mails received at and despatched from the General Post Office during the years 1878 and 1879.

Year.	Received.		Despatched.		Total number of Mails which passed through the Office.
	Inland.	Foreign.	Inland.	Foreign.	
1878	78,216	8,281	72,661	6,045	165,203
1879	80,510	7,709	74,331	5,594	168,144
Increase	2,294	1,670	2,941
Decrease	572	451

The number of written communications received from the public during 1879, intimating changes of address or requesting letters, &c., to be forwarded, was 9,389, against 8,663 in 1878.

The number of communications addressed to the Secretary to the Post Office relating to the extension and improvement of the Service, to irregularities connected with the performance of mail contracts, and to the transit of letters, &c., through the Post, and recorded in the year 1879, was 24,448 against 22,936 in 1878.

REVENUE

REVENUE AND EXPENDITURE.

The following statement will show the revenue and its resources for the year 1879 :—

Revenue.

The amount collected in the Colony for the year 1879 was obtained as under, viz. :—

Sale of Postage Stamps	£151,659 13 4
Fees for Private Boxes	458 13 6
Postage on Unpaid Letters	4,033 9 8
Total collected in the Colony	£156,151 16 6

To which should be added the following :—

One-half of amount due by the non-contracting Colonies for use of the San Francisco Mail Line	£3,046 13 0
*United States Sea Postages	328 1 10
United Kingdom for Mails received in the Colony by San Francisco, Galle and Melbourne, and Torres' Straits Mail Lines	11,809 14 1
	<u>15,184 8 11</u>
	<u>£171,336 5 5</u>

In 1878 the revenue amounted to £155,621 19s. 6d., showing an increase for the year 1879 of £15,714 5s. 11d.

The amounts chargeable to the non-contracting Colonies for the use of the San Francisco Mail Service in the year 1879, are :—

Victoria	£3,753 6 10
Queensland	1,099 19 11
South Australia	838 18 6
Western Australia	48 18 9
Tasmania	352 2 0
Total... ..	£6,093 6 0

Distributed as follows :—

New South Wales	£3,046 13 0
New Zealand	3,046 13 0
	<u>6,093 6 0</u>

The contribution from the non-contracting Colonies towards the San Francisco Service is larger for the year 1879 than for the previous year by the sum of £351 16s. 5d.

*Revenue derived from Ocean Mails for the year 1879.**Via San Francisco—*

On Outward Mails—estimated	£8,970 17 7
On Inward Mails, per United Kingdom	7,584 5 2
Half-share non-contracting Colonies	3,046 13 0
	<u>£19,601 15 9</u>

Via Melbourne and Suez—

On Outward Mails	£8,012 3 4
On Inward Mails, per United Kingdom	3,622 7 9
	<u>£11,634 11 1</u>

Via Brisbane and Torres Straits—

On Outward Mails	£357 8 0
On Inward Mails, per United Kingdom	603 1 2
	<u>£960 9 2</u>
	<u>£32,196 16 0</u>

The

* This revenue though collected in 1879 accrued in the period from October, 1874, to November, 1875.

The following return shows the number, description, and value of Postage Stamps issued at the General Post Office during the years 1878 and 1879 :—

Number.		Description.	Value.	
1878.	1879.		1878.	1879.
8,085,240	8,902,980	Penny	£ 33,688 10 0	£ 37,085 15 0

			£145,524 0 4	£156,653 11 8

In the year 1879 a special description of Postage Stamps was introduced for the use of the various Government Departments. These stamps are distinguishable by the letters "O.S." printed thereon in black, and are only available for official correspondence; and letters having Postage Stamps of this character affixed thereto are liable to be intercepted by the Post Office, unless the envelopes bear the endorsement "O.H.M.S.," with the name of the Department from which they are sent in the corner, or, in the case of letters addressed to a Department, the name of the sender written in the corner. Under no pretext whatever are these stamps purchased by, or exchanged for other postage stamps at the Post Office.

The following return shows the number, description, and value of Postage Stamps exchanged for the public for cash, less a discount of 5 per cent., during the year 1879 :—

Number.	Description.	Value.
		£ s. d.
6,356	One-penny	26 9 8
51,909	Two-penny	432 11 6
82	Three-penny	1 0 6
423	Four-penny	7 1 0
1	Five-penny	0 0 5
2,271	Six-penny	56 15 6
33	Eight-penny	1 2 0
117	Nine-penny	4 7 9
191	Ten-penny	7 19 2
301	One-shilling	15 1 0
8	Five-shillings	2 0 0
378	Post cards	1 11 6
		556 0 0
		less 5% 27 16 0
		£528 4 0

The following comparative Return will show to what extent the revenue of the Postal Department has been affected by the reduction of the Postage on Intercolonial Letters at various times :—

Year.	No. of Letters posted.	At per ½-oz.	Revenue.
1869	305,000	6d.	£ 8,387
1870	303,800	6d.	8,354
1871	334,000	3d.	4,592
1872	380,500	3d.	5,225
1873	419,600	3d.	5,768
1874	438,600	2d.	4,479
1875	537,200	2d.	4,924
1876	583,600	2d.	5,350
1877	647,600	2d.	5,936
1878	720,900	2d.	6,608
1879	794,400	2d.	7,282

It was determined in April to levy the Town Rate of Postage, viz., 1d. the ½ ounce upon letters posted at Bathurst, addressed to Esrom, and also upon letters posted at Esrom addressed to Bathurst, instead of the higher Inland Rate of 2d. per ½ ounce.

Expenditure.

The expenditure of the Department for 1879, compared with that for 1878, is as under, viz. :—

	1878.	1879.
Salaries	£68,733 7 10	£74,364 11 4
Contingencies	14,005 6 4	15,145 6 8
Conveyance of Mails	165,477 17 6	173,313 13 0
	£248,216 11 8	£262,823 11 0

The expenditure on Conveyance of Mails for 1879 is distributed as follows, viz. :—

Mails <i>via</i> San Francisco	£40,263	0	4
" " Melbourne and Suez	14,395	0	11
" " Brisbane and Suez	1,644	4	6
" " Sydney and Levuka	2,600	0	0
" Horse, stage, and rail...	102,267	9	3
" Steam and sailing vessels	8,672	15	3
" to and from Railway Stations, and portorage	3,471	2	9
	<u>£173,313</u>	<u>13</u>	<u>0</u>

Ocean Mails.

The expenditure on account of Ocean Mail Services for 1879, *via* San Francisco, *via* Melbourne and Suez, *via* Torres Straits and Suez, and between Sydney and Levuka, is as follows, viz. :—

<i>Via</i> San Francisco—			
Subsidy	£39,999	18	4
Cablegrams	68	2	0
Special trips with Victorian Mails between Sydney and Albury	195	0	0
	<u>£40,263</u>	<u>0</u>	<u>4</u>
<i>Via</i> Melbourne and Suez—			
Amount paid to Victoria	£13,283	18	5
Overlanding Mails by Special Trains and Coach, and agent's expenses in Melbourne	494	12	0
Gratuities to P. & O. Co. for conveying letters between Sydney and Melbourne	616	10	6
	<u>14,395</u>	<u>0</u>	<u>11</u>
<i>Via</i> Brisbane and Suez—			
Amount paid to Queensland, including conveyance between Brisbane and Sydney	1,644	4	6
	<u>1,644</u>	<u>4</u>	<u>6</u>
Fiji and Levuka—			
Contribution for twelve months	2,600	0	0
	<u>£58,902</u>	<u>5</u>	<u>9</u>

The cost to the Colony for Ocean Mail Services for 1879 is as under :—

San Francisco Service—			
<i>Dr.</i>			
To subsidy, &c.	40,263	0	4
<i>Cr.</i>			
By Postage on Outward Mails	8,970	17	7
" do. Inward Mails per United Kingdom	7,584	5	2
" Half-share from non-contracting Colonies	3,046	13	0
	<u>19,601</u>	<u>15</u>	<u>9</u>
	<u>£20,661</u>	<u>4</u>	<u>7</u>
Melbourne and Suez Service—			
<i>Dr.</i>			
To amount paid to Victoria	13,283	18	5
" Overlanding Mails by Special Trains and Coach, and Agent's expenses in Melbourne...	494	12	0
" Gratuities to P. & O. Co. for conveying letters between Sydney and Melbourne	616	10	6
	<u>14,395</u>	<u>0</u>	<u>11</u>
<i>Cr.</i>			
By Postage on Outward Mails	8,012	3	4
" do. Inward Mails per United Kingdom	3,622	7	9
	<u>11,634</u>	<u>11</u>	<u>1</u>
	<u>£2,760</u>	<u>9</u>	<u>10</u>
Brisbane and Suez Service—			
<i>Dr.</i>			
To amount paid to Queensland	1,644	4	6
<i>Cr.</i>			
By Postage on Outward Mails	357	8	0
" do. Inward Mails per United Kingdom	603	1	2
	<u>960</u>	<u>9</u>	<u>2</u>
	<u>£683</u>	<u>15</u>	<u>4</u>

Appendix B.

In the year 1879 the average cost per mile of the inland Mail Conveyance was about 5½d. against 5¼d., the price per mile paid in the year 1878. The particulars as to the Mail Contracts for the conveyance of Inland Mails during the year 1879 will be found in the Appendix.

II.—

II.—MONEY ORDER DEPARTMENT.

The following return shows the increase in the number and amount of Money Order transactions during 1879, as compared with the year 1878:—

Year.	Number of Offices.	Orders Issued.		Orders Paid.		Total Transactions.	
		Number.	Amount.	Number.	Amount.	Number.	Amount.
1879	319	159,897	£ s. d. 582,422 14 8	142,201	£ s. d. 515,075 17 11	302,098	£ s. d. 1,097,498 12 7
1878	299	142,025	538,799 17 8	129,143	487,458 6 3	271,168	1,026,258 3 11
Increase	20	17,872	43,622 17 0	13,058	27,617 11 8	30,930	71,240 8 8

The system was extended during the year to the following places, viz.:—

Bungwall Flat	Hartley Vale	Tighe's Hill
Candelo	Jugiong	Tingha
Canowindra	Junee Railway Station	Wagra
Colly Blue	Lake Cudgellico	West Tamworth
Charlestown	Mangrove Creek	Wilton
Cudgegong	Mossgeil	Woodburn
Garden Palace	Spring Grove	
Hamilton	Swanbrook	

The offices at Amosfield and Eugowra were abolished.

In the Appendix is given a detailed return showing the number and amount of Money Orders issued and paid at each office in the Colony during the year. Appendix F.

The following returns are given for the purpose of showing the relative amount of business transacted between this Colony and the United Kingdom, and between this Colony and the various Australasian Colonies, viz.:—

RETURN showing the number and amount of Money Orders issued in New South Wales and made payable in the United Kingdom and the adjacent Colonies during the year 1879, compared with the year 1878.

Where payable.	Issued in 1878.		Issued in 1879.		Increase in 1879.		Decrease in 1879.

1874	25,186	9,372 6 9	232,522 7 1	7,530	144,851 8 4	303,113 2 11
1875	34,043	12,067 18 3	268,079 3 8	11,497	228,831 1 11	354,429 2 11
1876	38,592	13,364 5 1	285,039 12 0	14,694	251,535 8 3	401,297 11 9
1877	47,948	15,413 13 2	323,273 11 6	17,871	278,532 5 7	467,452 10 10
1878	59,932	16,999 18 2	360,704 10 2	22,594	365,132 1 9	480,024 17 5
1879	67,444	17,544 4 10	393,771 19 2	27,612	379,983 18 6	511,357 2 11
Total to 31 Dec., 1879	299,663	91,481 1 6	2,163,473 4 1	107,755	1,743,597 2 8

The following return will show the increase in the business of the Government Savings' Bank for the year 1879, compared with the transactions of the year 1878, viz.:—

Year.	Number of Government Savings' Banks in the Colony.	Number of Accounts opened.	Number of Accounts closed.	Number of Accounts remaining open on 31st Dec.	Total Deposits, including Interest.		Total Withdrawals.		Balance at credit of Depositors on 31st Dec.
					Number.	Amount.	Number.	Amount.	
						£ s. d.		£ s. d.	£ s. d.
1878	166	9,853	6,961	18,957	59,932	377,704 8 4	22,596	365,132 1 9	480,024 17 5
1879	174	10,780	8,170	21,567	67,444	411,316 4 0	27,612	379,983 18 6	511,357 2 11
Increase..	8	927	1,209	2,610	7,512	33,611 15 8	5,016	14,851 16 9	31,332 5 6

The amount of interest, at 4 per centum, added to depositors' accounts, was £17,544 4s. 10d.

The average amount of each deposit is about £5 16s. 9d., and of each withdrawal £13 15s. 2½d.

The average amount at the credit of each depositor's account at the close of the year was £23 14s. 2d.

During the year 1879 the system was extended to the following places, viz.:—

Charlestown	Spring Grove
Jordan's Crossing	West Tamworth
Maryland	Wilcannia
Nowra	Woodburn

Appendix G & H.

A detailed return, showing the business transacted at each branch in the Colony, will be found in the Appendix, as also a statement of the Liabilities and Assets, with the Auditor General's certificate thereon.

IV.—ELECTRIC TELEGRAPH DEPARTMENT.

The following Return shows the extent of and the business transacted on the Electric Telegraph Lines of this Colony during the year 1879 as compared with the year 1878:—

Year.	Extent of Electric Telegraph Line Wire in actual use on 31st December.	Number of Electric Telegraph Stations on 31st December.	Number of Telegraph Messages transmitted during the Year.	Total Revenue of Electric Telegraph Department for the Year.	Total Expenditure of Electric Telegraph Department for the Year, exclusive of interest on cost of construction of Lines.
	Miles. chs. links.			£ s. d.	£ s. d.
1878	11,760 39 56	236	1,132,287	76,226 18 11	95,797 18 7

Kiama to Shellharbour, Jamberoo, and Gerringong	1	30	0	19	0	0	262	13	1
Total No. of Miles of line completed during the year 1879	439	40	35
Total No. of miles of additional wire erected during the year 1879	226	16	2
Total	665	56	47
Total cost	£23,862	1	1

The total cost of the whole extent of Telegraphic communication in the Colony on the 31st December, 1879, viz., 12,426 miles 16 chains 3 links, was £437,120 5s. 3d.

The following Stations were opened during the year 1879:—

Burrawang	Marsden's
Bowrall	Nowra
Bungwall Flat	Robertson
Brecaza	Rookwood
Copeland North	Ravensworth
Croki	Rockley
Coraki	Spring Grove
Copmanhurst	Shellharbour
Douglas Park	St. Albans
Glebe Island	Tathra
Gerringong	Tingha
Ginninderra	Wolumla
Gladstone	Wingham
Gongolgon	West Tamworth
Hamilton	Werris' Creek
Hillston	Wardell
Jamberoo	Woodburn
Lochinvar	Parramatta Junction
Menangle	

The following lines were in course of construction during the year 1879:—

Bathurst to Goulburn, <i>via</i> Rockley and Crookwell
Barraba to Bingera
Hillston to Condoblin
Louth to Cobar
Orange to Wellington
Wallsend Junction to Singleton (iron poles)

Estimated distance of above lines:—

New line, 497 miles 73 chains 60 links
Additional wire, 497 miles 73 chains 60 links

The following is a Return showing the Number and Value of MESSAGES sent from each Station in the Colony during the Year 1879.

Station.	Messages.		Amount.		Station—contd.	Messages.		Amount.	
	No.	£ s. d.	No.	£ s. d.		No.	£ s. d.

In my last Annual Report I referred to the arrangements that had been made for duplicating the telegraphic communication with Europe. The formal agreement between the Governments of New South Wales and Victoria and the Eastern Extension Australasia and China Telegraph Company was executed in London on the 6th May, 1879 (copy of which is appended). A short delay occurred in consequence of the Imperial Government desiring to establish telegraphic communication between Aden and Natal in connection with the Zulu war, to effect which without loss of time they requested that the cable which had been manufactured for the Australian duplicate line might be used for the Natal line. This request was acceded to by the Governments of this Colony and Victoria. The Eastern Extension Telegraph Company, in consequence of this concession agreed that the reduced rates for telegrams should come into operation from the date of signing the contract instead of from the time stated in the agreement.

In accordance with this arrangement Press messages between Sydney and England were reduced in May, 1879, from ten shillings and ten pence (10s. 10d.) per word to six shillings and five pence (6s. 5d.) per word.

With reference to a practice which had prevailed of allowing the use free of charge of the Telegraph Wires for messages connected with Agricultural or other Societies, Shows, or in the interest of any Public Demonstration, it was deemed necessary in August, 1879, to intimate that all such messages should be paid for at current rates, as it was found, in consequence of the great increase in the transmission of Messages for the public, impracticable to continue the concession hitherto granted.

I have, &c.,
SAUL SAMUEL,
Postmaster General.

General Post Office,
Sydney, 22nd June, 1880.

APPENDIX.

A.

F. W. HILL, Controller.
Money Order and Savings' Bank Department, Sydney, 10 February, 1880.

SAUL SAMUEL,
Postmaster General.

I certify that the foregoing Statement of all Deposits received and paid from 1st January to 31 December, 1879, has been examined and found to correspond with the Books and Accounts of the Government Savings' Bank.

17th March, 1880.

C. ROLLESTON,
Auditor General.

I.

ARTICLES OF AGREEMENT entered into this sixth day of May, in the year of our Lord 1879, between Her Most Gracious Majesty the Queen of the one part, and the Eastern Extension Australasia and China Telegraph Company Limited (hereinafter called "the Company"), of the other part.

1. The contract created by these presents is entered into on behalf of Her Majesty by the authority of the respective Governments of the Colonies of New South Wales and Victoria.

In consideration of the subsidy or payment hereinafter mentioned, the Company for itself and its successors agrees with Her Majesty and her successors as follows :—

2. The Company will construct, or cause to be constructed, in accordance with the specification contained in the Schedule hereto, and within eight calendar months from the 1st day of July, 1879, unless prevented by the act of God, or the Queen's enemies, inevitable accident, or other contingencies over which the Company shall have no control, or if so prevented within a period to be computed from the expiration of such eight calendar months equal to that during which the Company shall have been so prevented, lay, or cause to be laid, a Submarine Telegraph Cable or Cables from Penang to Singapore, and thence direct to Banjoewangie, and thence direct to Port Darwin, and erect and provide any stations, instruments, and apparatus, and provide and employ any operators, clerks and other persons which or who may be necessary for properly working and making use of such Cable or Cables, so that messages may within such period be transmitted by such Cable or Cables, and will keep the same open and ready for being used for the transmission of messages.

3. The Company will at all times during a period of twenty years, to be computed from the day when the Cable or Cables hereby agreed to be laid shall be laid and be ready and in proper working order and open for use as aforesaid, unless prevented by the act of God, or the Queen's enemies, inevitable accident, or other contingency over which the Company shall have no control, or if so prevented so soon afterwards as shall be reasonably practicable, or unless Her Majesty shall have purchased under the right to purchase hereinafter given to her, maintain and keep such Cable or Cables, and also the present Telegraph Cables of the Company between Madras and Batavia by way of Penang and Singapore, and between Rangoon and Penang, and between Banjoewangie and Port Darwin, and all stations, instruments, and apparatus necessary for properly working and making use of all the said Cables in good working order and condition, and provide and employ all such operators, clerks, and other persons as shall be necessary properly to attend to, keep and work the said stations, instruments, and apparatus in the usual course of business, and will keep all the said Cables open and ready to be used for the transmission of messages.

4. The Company will at all times from and after the date of these presents transmit by the Cable or Cables belonging to it and take all proper and necessary steps for procuring the transmission by the Cable or Cables or Telegraph line or lines belonging to other Telegraph Companies or to Governments of all telegraphic messages between England and the Colonies of New South Wales, or Victoria, or any other Australasian Colony or Colonies as to which it shall at any time hereafter be notified to the Company by the Agent-General of New South Wales that by virtue of any agreement or arrangement with the Governments of the Colonies of New South Wales and Victoria, it or they is or are entitled to take advantage of the rates fixed hereby, and will not until the subsidy hereinafter mentioned shall finally cease to be payable, charge for its own

own proportion of the charges for such telegraphic messages beyond the rates following, that is to say: For any Government message, 2s. 10d. per word; for any press message, 1s. 5d. per word; and for any other message, 5s. 8d. per word. And in case the Company shall at any time hereafter reduce its existing tariff of charges below the rate of 5s. 8d. per word, it will not during such reduction charge more than one-half of such reduced rate for any Government message, nor more than one quarter thereof for any press message. And the Company further agrees that any excess over the above stipulated rates charged at the date of these presents by any telegraph administration on behalf of the Company, shall be allowed to the sender of any Government or press message by way of discount. Any moneys which may be charged for Government or press messages, as hereinafter respectively defined, in excess of the rates hereby agreed upon, may be deducted out of the subsidy hereinafter agreed to be paid.

5. By "Government Messages" are meant messages sent from or to Her Majesty, Her Majesty's Principal Secretary of State for the Colonies, or any Government department in the United Kingdom, or the respective Agents-General for the Colonies of New South Wales, Victoria, or any other Australasian Colony or Colonies as to which it shall be notified as hereinafter mentioned, on the one hand, and the Governors, or Chief or Colonial Secretaries, of or any Government department of the various Colonial Governments on the other, or any of them, on matters relating to the administration of the Governments.

6. By "Press Messages" are meant messages addressed to newspapers duly published in accordance with the respective laws relating to the publication of newspapers in force in the United Kingdom, or the Colonies or Countries in which they are respectively published, and intended in good faith for publication in full in such newspapers, and shall include only such as are intelligible and written in English, in plain language, and without the use of cypher, code, groups of figures, or letters or words of concealed meaning.

7. The Company will at all times give priority in transmission to Government Messages as above defined.

In consideration of the premises, Her Majesty, for herself and her Successors, agrees with the Company and their Successors as follows:—

8. Her Majesty will, subject to the provisos and conditions hereinafter contained, cause to be paid out of the Consolidated Revenue fund of the Colony of New South Wales, and out of the Consolidated Revenue of the Colony of Victoria, to the Company in London, the annual subsidy or sum of £32,400, free of all deductions, by equal quarterly payments, for the period of twenty years, to be computed from the day when the said Cable or Cables shall be laid and be open for use, so that messages shall be capable of being continuously transmitted thereby, or if such last-mentioned day shall happen within eight calendar months from the said 1st day of July, 1879, then to be computed from the expiration of four calendar months after such last-mentioned day: Provided, nevertheless, and it is hereby agreed and declared, that if, at any time hereafter, the Governments of the said Colonies of New South Wales and Victoria shall agree with each other as to the proportions in which the said annual subsidy shall be paid by the said Colonies respectively, and shall give notice of such agreement to the Company, then, out of the said Consolidated Revenue fund of the Colony of New South Wales, shall thenceforth be paid such portion only of the said annual subsidy, as it shall have been so agreed between the said Governments, shall be paid by the Colony of New South Wales, and out of the Consolidated Revenue of the Colony of Victoria shall thenceforth be paid such portion only of the said annual subsidy as it shall have been so agreed shall be paid by the Colony of Victoria.

9. If the Company shall within eight calendar months from the said 1st day of July, 1879, have laid, or caused to be laid the cable or cables hereby agreed to be laid, and the same shall be open for use so that messages shall within such period be capable of being continuously transmitted by such Cable or Cables, the first of such quarterly payments shall be deemed to have become due at the expiration of seven calendar months from the said 1st day of July, 1879, but shall not be paid until the Cable or Cables shall be laid and open for use as aforesaid, and in any other event the first of such quarterly payments shall become due and be made at the expiration of three calendar months after the Company shall have laid the Cable or Cables hereby agreed to be laid, and opened the same for use so that messages shall be capable of being continuously transmitted thereby.

10. If there shall at any time or from time to time be a total interruption of telegraphic communication between Singapore and Port Darwin arising otherwise than by reason of war or any such like cause, a deduction at the rate of one 365th part of the said subsidy of £32,400 for every day exclusive of the day on which the interruption occurs, but inclusive of the day on which it ceases, during which there shall be such total interruption shall from time to time be made from the quarterly payment becoming due next after such interruption: Provided, nevertheless, that if such total interruption shall be caused by war or any such like cause, the Company will, if requested, restore communication with all possible despatch, the costs of so doing being borne and paid by Her Majesty.

And in further consideration of the premises, Her Majesty for herself and her successors, and the Company for itself and its successors, hereby further agree each with the other as follows:—

11. If the Agent General of New South Wales shall hereafter notify to the Company that any other Australasian Colony entitled to take advantage of the rates fixed hereby has agreed to contribute to the said subsidy, to an amount to be specified in the notice, the Company will thenceforth from time to time accept the payment of the agreed contribution by such Colony, if made with reasonable punctuality, in satisfaction of *pro tanto* of the subsidy hereby agreed to be paid.

12. Her Majesty may at any time during the period during which the said subsidy shall be payable (whether under these presents or under any Articles of Agreement in addition or supplemental to them) cause to be given to the Company notice of her intention to purchase on a day not less than 12 calendar months thereafter, and the Company, after receiving such notice, and upon payment of the price to be paid, in accordance with the provisions hereinafter contained, shall be bound to execute on such day, or on the day of payment of the said price which shall last happen, such instrument or instruments as may be necessary for conveying and assigning to Her Majesty, or to such persons or bodies corporate as she shall direct, the Cable or Cables by these presents agreed to be laid, and the Company's present Cables between Singapore and Batavia, and between Banjoewangie and Port Darwin, and any Cable or Cables which the Company may hereafter lay, or cause to be laid, between Singapore and Port Darwin, or between either of them, and any intermediate point, or between any intermediate points, and all the stations, instruments, and apparatus, and all other property which at the time of such notice shall be used by the Company in connection with the working and making use of such Cables, or any of them, and upon payment of the said price the said subsidy shall cease to be payable: Provided always that Her Majesty shall not be entitled to cause such notice to be given unless the Company shall for five years have paid a dividend of not less than £10 per centum for the year, or passed not less than £10 per centum for the year to its reserve or other accumulated fund.

13. The price to be paid to the Company shall be such an amount as taking into account the cost of construction, the probable duration of the Cables, and cost of repair and renewal, the profits earned by the Company, and other circumstances shall be equitable, and the other terms of the said purchase shall be fixed on an equitable basis, and if Her Majesty and the Company shall not be able to agree as to the amount which ought to be paid to the Company, or as to any other terms for the purchase, the matter in difference shall be determined by arbitration as follows:—

(a) The parties to the said arbitration shall be deemed to be the Governors for the time being of the said Colonies of New South Wales and Victoria, on behalf of Her Majesty, on the one side, and the Company on the other, and any request or notice which may have to be given to or served upon the said Governors shall be given to or served on the Agents General for the time being of the said Colonies on their behalf.

(b) Unless the Governors for the time being of the Colonies of New South Wales and Victoria on behalf of Her Majesty and the Company shall concur in the appointment of a single Arbitrator, each party on the request of the other party shall nominate and appoint an Arbitrator to whom such dispute, question, difference, or controversy shall be referred, and every such appointment of an Arbitrator shall be made on the part of the Governors under their hands or under the hands of the Agents-General of the said Colonies respectively, and on the part of the Company under their Corporate seal, and such appointment shall be made in duplicate and be delivered as to one part to the other party and as to the other part to the Arbitrator appointed on behalf of the party by whom the same shall be made, and after any such appointment shall have been made, neither party shall have power to revoke the same without the consent of the other, nor shall any vacancy or change in the office of Governor of either of the said Colonies operate as a revocation, and if for the space of one calendar month after a request in writing shall have been served upon the said Agents-General or the Company respectively or given to either of the said Agents-General or the Company as the case may be, by the one party or the other party to appoint an Arbitrator, such last-mentioned party fail to appoint an Arbitrator, then upon such failure the party making the request, and having appointed an Arbitrator, may appoint such Arbitrator to act on behalf of both parties, and such Arbitrator may proceed to hear and determine the matters which shall be in dispute, and in such case the award or determination of such single Arbitrator shall be final. (c)

(e) If before the matters so referred shall be determined, any Arbitrator appointed by either party die or become incapable the party by whom such Arbitrator was appointed, or the successor in office, or successors or assigns, of such party, may nominate and appoint, in writing, some other person to act in his place, and if for the space of one calendar month after notice in writing from the other party for that purpose he fail to do so, the remaining or other Arbitrator may proceed *ex parte*, and every Arbitrator so to be substituted as aforesaid shall have the same powers and authorities as were vested in the former Arbitrator at the time of such his death or disability as aforesaid.

(d) Where more than one Arbitrator shall have been appointed such Arbitrators shall, before they enter upon the matters referred to them, nominate and appoint, by writing under their hands, an Umpire, to decide on any such matters on which they shall differ or which shall be referred to him, and if such Umpire shall die or become incapable to act, they shall forthwith, after such death or incapacity, appoint another Umpire in his place, and the decision of every such Umpire on the matters so referred to him shall be final.

(e) If, in either of the cases aforesaid, the said Arbitrators shall refuse, or shall, for one calendar month after the request of either party to such arbitration, neglect to appoint an Umpire, the Secretary of State for the Colonies shall, on the application of either party to such arbitration, appoint an Umpire, and the decision of such Umpire on the matters in which the Arbitrators shall differ, or which shall be referred to him, shall be final.

(f) If, when more than one Arbitrator shall have been appointed or shall be proceeding *ex parte* under any of the provisions herein contained, such Arbitrator shall die or become incapable to act before he shall have made his award, the matters referred to him shall be determined by arbitration in the same manner as if no such Arbitrator had been appointed.

(g) If, where more than one Arbitrator shall have been appointed, either of the Arbitrators refuse, or for one calendar month neglect to act, the other Arbitrator may proceed *ex parte*, and the decision of such other Arbitrator shall be as effectual as if he had been a single Arbitrator appointed by both parties.

(h) If, when more than one Arbitrator shall have been appointed, and when neither of them shall refuse or neglect to act as aforesaid, such Arbitrators shall fail to make their award within six calendar months after the day on which the last of such Arbitrators shall have been appointed, or within such extended time (if any) as shall have been appointed for that purpose by both such arbitrators under their hands, the matters referred to them shall be determined by the Umpire to be appointed as aforesaid, and the Umpire shall make his award within three calendar months after the time when his duties shall commence, or within such extended time (if any) as shall have been appointed for that purpose by the Umpire under his hand.

(i) The said Arbitrator or Arbitrators, or their Umpire, may call for the production of any documents in the possession or power of either party which they or he may think necessary for determining the question in dispute, and may examine the parties or their witnesses on oath, and administer the oaths necessary for that purpose.

(j) The costs of every such arbitration and of the Award shall be in the discretion of the Arbitrator, Arbitrators, or Umpire, who may direct to and by whom and in what manner the same or any part thereof shall be paid.

(k) The arbitration shall take place and be conducted in London, and the Arbitrator or Arbitrators or the Umpire, as the case may be, shall deliver his or their award in writing to the said Agents-General, and the Agents-General shall retain the same and shall forthwith on demand, at their own expense, furnish a copy thereof to the Company, and shall at all times on demand produce the said award, and allow the same to be inspected or examined by the Company or any person appointed by them for that purpose.

(l) This submission to arbitration may be made a rule of the Supreme Court of Judicature in England or Ireland respectively, or of any division thereof on the application of either of the Agents-General or the Company.

14. Nothing in these presents contained shall prejudice or affect the Articles of Agreement dated the 24th day of July, 1875, and purporting to be made between His Excellency, the Marquis of Normanby, the Governor of the Colony of New Zealand, for and on behalf of the said Colony of the first part, His Excellency Sir Hercules Robinson, the Governor of the Colony of New South Wales, for and on behalf of the said Colony of the second part, and the Company of the third part, but the subsidy hereby granted is not to be taken to be a subsidy within the meaning, or to be a subsidy granted as contemplated by the 18th and 19th Articles of the said Agreement.

IN WITNESS whereof, William Forster, Esquire, the Agent-General of the Colony of New South Wales, and Graham Berry, Esquire, the Premier of the Colony of Victoria, have hereunto set their hands (but not so as to make themselves or either of them in any way individually liable under or in respect of these presents), and the Eastern Extension Australasia and China Telegraph Company, (Limited), has hereunto set its Common Seal the day and year first above written.

THE SCHEDULE ABOVE REFERRED TO.

SPECIFICATION.

The following are the Lengths and Types of Cable that are to be furnished by the Contractors, viz. :—

	34,119	

Banjoewangie to landing place of third Section 1,014 yards of Cable B or D.

CORE.

- Conductor.** (A.) The conductor to be a strand of seven copper wires weighing 107 lbs. per nautical mile, or within 5 per cent thereof, and the resistance at 75° Fahrenheit shall not be more than 12·13 ohms.
- Insulator.** (B.) The conductor is to be insulated with three coatings of gutta-percha of improved inductive capacity, prepared according to Mr. Willoughby Smith's system, alternating with three coatings of Chatterton's compound, and to weigh 140 lbs. per knot, or within 5 per cent. thereof. The resistance of the completed core to be not less than 150 megohms per nautical mile when tested at a temperature of 75° Fahrenheit, after twenty-four hours' immersion in water fourteen days after manufacture.
- Sheathing.** (C.) The types A, E, B¹ and B to be covered with Clifford's patent sheathing for the protection of the core against the ravages of insects.
- Serving.** (D.) The core of all the types to be served with a good and sufficient serving of jute yarn, steeped in cutch or other preservative mixture, and applied wet.

OUTER COVERINGS.

- Outer coverings.** (E.) *Type A.* The served core to be covered with ten galvanised BB iron wires, each to gauge No. 00 B.W.G. equal to .375 of an inch when galvanised, or within 2½ per cent. thereof.
- (F.) *Type B.* The served core to be covered with ten galvanised BB iron wires, each wire to gauge No. 6 B.W.G. equal to .200 of an inch when galvanised, or within 2½ per cent. thereof.
- (G.) *Type B¹.* The served core to be covered with twelve galvanised iron wires, the diameter of each wire to be No. 9 B.W.G., equal to .148 of an inch when galvanised, or within 2½ per cent. thereof.
- (H.) *Type D.* The served core to be covered with eleven galvanised homogeneous iron wires, each wire being taped and compounded. The homogeneous wires to be No. 13 B.W.G., equal to .099 of an inch when galvanised, or within 2½ per cent. thereof, and to bear a breaking strain of not less than 52 tons per square inch, with an elongation of not less than 3 per cent.
- (I.) *Type E.* The served core to be covered with ten BB galvanised iron wires, the diameter of each wire to be No. 2 B.W.G., equal to .270 of an inch when galvanised, or within 2½ per cent. thereof.

OUTSIDE SERVING.

- Outside serving.** (J.) The cable manufactured as above to be covered with two of Johnson and Phillips' patent tapes, laid on spirally in opposite directions, and two coatings of Clark's compound.
- Cables to be kept under water.** (K.) The cable when completed shall be coiled in suitable water-tight tanks and be kept, as far as practicable, constantly under water.

GENERAL CLAUSES.

- Electrical tests.** (L.) The standard of insulation for the completed cable with either current, before being submerged, to be not less than 250 megohms per nautical mile, when reduced to a temperature of 75° Fahrenheit after five minutes electrification, the tests to be taken at the actual natural temperature, and to be reduced by calculation to the standard specified.
- Tanks on board ship.** (M.) The completed cable shall be coiled on board ship in water-tight tanks, and be kept, as far as practicable, under water until submerged.
- Final electrical condition of cable.** (N.) The electrical condition of the cable when laid shall be such, as having regard to its previous condition, and making due allowance for the mean actual temperature of the water, as shown by the resistance of the conductor, to give no good grounds for believing that any fault exists in the insulator or conductor.

WILLIAM FORSTER,
As Agent-General for New South Wales.
GRAHAM BERRY,
As Premier of Victoria.

Witness to the signature of the above-named WILLIAM FORSTER and GRAHAM BERRY,
JNO. MACKRELL, Solicitor,

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

PROPOSED ABANDONMENT OF THE SOUTHAMPTON MAIL ROUTE
BETWEEN GREAT BRITAIN AND AUSTRALASIA.

Ordered by the Legislative Assembly to be printed, 31 October, 1879.

Telegram from Secretary of State for the Colonies to Governor of South
Australia. (Received about the 8th September, 1879.)

INFORM the whole of the Australian Colonies, Fiji included, of proposed abandonment of Southampton mail after January, sending all mails Brindisi; charging seven-pence for letters, three halfpence for newspapers four ounces, and three halfpence for book packets and patterns of two ounces weight. Letters and newspapers specially addressed by private ship liable to present Southampton rates.

The opinion of the several Governments is desired.

Telegram from Governor of New South Wales to Secretary of State for the Colonies,
dated 10th October, 1879.

THIS Government has no objection to Brindisi rates being reduced to seven-pence, provided Continental transit rates be reduced to such amount as will be met by the proposed arrangement, not otherwise.

1879.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

PROPOSED ABANDONMENT OF THE SOUTHAMPTON MAIL ROUTE
BETWEEN GREAT BRITAIN AND AUSTRALASIA.
(FURTHER PAPERS.)

Ordered by the Legislative Assembly to be printed, 18 November, 1879.

The Secretary of State for the Colonies to Governor Lord Loftus.

Sir,

Downing-street, 26 August, 1879.

On the 25th instant I communicated to you by telegram, through the Governor of South Australia, the arrangement proposed for the transmission *via* Brindisi, after January next (when the existing contract with the Peninsular and Oriental Company will expire), of the Eastern and Australian mails, and the proposed abandonment of the service *via* Southampton.

I now enclose, for the information of your Government, copies of a correspondence between the Treasury and this Department, upon which that telegram was founded.

I have, &c.,

M. E. HICKS-BEACH.

The Treasury to The Colonial Office.

Sir,

Treasury Chamber, 23 July, 1879.

I am directed by the Lords Commissioners of Her Majesty's Treasury to transmit to you herewith, for the information of the Secretary of State for the Colonies, copy of a letter from the Postmaster General, dated the 17th instant, respecting future arrangements for the conveyance of the portion of the Eastern mails now carried *via* Southampton; and I am to request you to move Secretary Sir Michael Hicks-Beach to favour my Lords with any observations he may have to offer in regard to the proposals contained therein, so far as they affect the correspondence with the Australian Colonies, New Zealand, Ceylon, the Straits Settlements, and Hongkong.

I am, &c.,

H. SELWIN IBBETSON.

The Under Secretary of State, Colonial Office.

The Post Office to The Treasury.

My Lords,

General Post Office, 17 July, 1879.

When the arrangements were made last year for the sea conveyance of the Eastern mails after the 1st February next, when the existing contract with the Peninsular and Oriental Company will expire, it was determined to make no provision for a service between Southampton and Suez, and accordingly that line is omitted in the new contract.

It remains now to consider by what means the correspondence, which is at present being forwarded by the Southampton route, shall be sent after February.

In the early part of this year I put myself in communication with the Post Offices of France and Italy, for the purpose of ascertaining what abatement they would respectively be willing to make in the amount of the transit rates now paid to those offices for the special weekly conveyance between Calais and Brindisi of the accelerated portion of the Eastern mails, provided the whole of the correspondence of every description was forwarded by that route.

It is only very recently that I have received a definite reply from Italy.

The following is the result:—

The French office will agree to reduce its transit rates from—

15 frs. 52c.	per kilo.	for letters.
60½c.	„	for newspapers.
1 fr. 21c.	„	for books.
to 10 frs.	„	for letters.
50c.	other articles.	

And the Italian Post Office will reduce its rates of—

100 frs. per kilo for letters, 50c. other articles, by about 35 per cent.

These concessions would reduce the special transit charges on letters by about 9 francs per kilogramme, leaving payable about 16½ francs per kilogramme; and after full consideration I have come to the conclusion that it will be desirable to accept the offers made, and to send the entire mail by the route of Brindisi and by the weekly mail.

In a correspondence which I have had with the Director General of the Indian Post Office, he expressed an opinion that when the Southampton mail packets are withdrawn, all letters, &c., paid at the Southampton rate of postage should be forwarded *via* Brindisi, by the ordinary mail trains of France and Italy, so as to obtain the benefit of the ordinary union transit rates.

But I cannot advise such an arrangement, which could not fail to give rise to much dissatisfaction.

In the case of the outward mails, supposing the accelerated mail to be despatched from London on the evening of every Friday, as at present, and a packet to leave Brindisi early on Monday morning, letters sent by the ordinary trains might be posted in London up till the evening of a previous day (Thursday) and reach Brindisi in time to catch the packet.

In the opposite direction, the mails for England reaching Brindisi from the East would, if sent through Italy and France by the ordinary trains, arrive in London only about twenty-four hours after the express mail; or if a Sunday intervened, both portions of the mails might be delivered together.

The consequence of this would be that the bulk of the letters would assuredly be diverted from the quick to the slow mail, seeing that the difference in time would be so trifling.

If such were the case, there would be a risk that on the one hand the payments to France and Italy for the accelerated service might be diminished to an extent which would lead to a demand for higher transit rates, and that on the other hand the weight and bulk of the correspondence sent by the ordinary trains might become so great as to impose extraordinary charges for its conveyance, and thus induce the French and Italian offices to decline to accept the ordinary union transit rates.

The right course in my opinion is, as I have said, to send the whole of the Eastern mails by the accelerated service.

At the same time, I propose that the single rate of postage to be levied on letters to or from India, China, &c., should not exceed five-pence, which is one penny less than the present Brindisi rate, and one penny more than the Southampton rate, which was reduced from sixpence to fourpence on the 1st of April last.

In the case of letters to Australia the rate would be 7d.

The amount derived from the supplementary charge of 1d. per half-ounce will not be quite sufficient to cover the payments to France and Italy, but the loss which will fall upon the department will probably be less than we should have to pay to the Peninsular and Oriental Company, or any other Company by whose vessels the slow portion of the mails might be sent between England and Suez.

I have accordingly to request the authority of your Lordships to adopt the arrangements which I have here proposed.

Before coming to a decision, your Lordships will no doubt consult the Secretary of State for India, as the Indian Government bears a portion of the expense of the Eastern Mail contract, and will also refer to Sir Michael Hicks-Beach the proposal, so far as it affects the charge on letters exchanged with the Australian Colonies and New Zealand, or with Ceylon, the Straits Settlements, or Hong Kong.

I have, &c.,

JOHN MANNERS.

1879-80.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

PROPOSED ABANDONMENT OF THE SOUTHAMPTON MAIL ROUTE
BETWEEN GREAT BRITAIN AND AUSTRALASIA.

(FURTHER PAPERS.)

Ordered by the Legislative Assembly to be printed, 22 January, 1880.

Telegram from Chief Secretary, Victoria, to Colonial Secretary, New South Wales.

5 January, 1880.

SOUTHAMPTON and Suez contract being abandoned by the Imperial Government, this Government purpose to send all mails after January *via* Brindisi and charge present Southampton rates on letters, packets, and newspapers; division of postage between Imperial and Colonial Governments to be matter of future arrangement. For the present, other Colonies to account to Victoria same rates as now. Your concurrence invited in transmission of mails by fortnightly service *via* Brindisi in accordance with foregoing. Favour of early reply requested.

The Postmaster General.—H.P., 6/1/80. The Secretary to the Post Office.—B.C., 6/1/80, C.W. Cabinet.—S.S., 8/1/80. Cabinet are of opinion that for the present the charge by the P. & O. Company's Service should continue to be 8d. *via* Brindisi.—H.P., 8/1/80. I would suggest to the Colonial Secretary that the following reply be sent by telegram to the Chief Secretary, Victoria:—"If we are to continue to pay your present charges on correspondence both ways, and the amount retained by England on correspondence coming this way, besides Continental transit rates, we cannot consent to reduce our present rates from here on correspondence *via* Brindisi."—S.S., 9/1/80. Urgent.—The Principal Under Secretary.—S.H.L., B.C., 9/1/80. Approved.—H.P., 9/1/80. Telegram sent, 9/1/80.

Telegram from Postmaster General, Melbourne, to Postmaster General, Sydney.

14 January, 1880.

IN reply to your telegram of 9th instant, I would beg to point out that the proposed reduction in postage rate on correspondence sent *via* Brindisi under new fortnightly contract will be no special advantage to Victoria. The public of each Colony adopting the reduced rate will derive the benefit. The question of transit rates to be accounted for to Victoria by other Colonies can be better considered when sufficient data are obtained upon which to base an equitable arrangement, as it is not the object of this Government to make a profit out of the contract at the expense of the other Colonies. You are probably aware that Italian transit rates have been reduced. Southampton route having been abandoned, it is believed that Imperial Government is prepared to reconsider arrangements as to division of postage.

Telegram from Postmaster General, Sydney, to Postmaster General, Melbourne.

15 January, 1880.

Send following telegram to the Postmaster General, Victoria, in reply to his message of the 14th instant:—

Re your telegram of yesterday, we can only deal with the present position of matters. If we reduce to 6d., and have to pay you that amount on all letters both ways and have to pay England 2d. on inward letters besides Continental rates, we shall sustain a further loss on ocean mail services; and, as we are not prepared to do this, cannot consent to any reduction of Brindisi rates.

S.S.

Telegram sent.

Extract from *Sydney Morning Herald*.

"THE Chief Secretary has received a telegram from the Agent General stating that a conference of the Imperial authorities is to be held to consider the proposal of the Victorian Government that Southampton rates shall in future be charged on Brindisi letters, and says he hopes to obtain the concession asked for."

Referring to the above telegram from Victoria in the *Sydney Morning Herald* of this day, I suggest to the Colonial Secretary that the following message be at once sent to Sir Daniel Cooper, the acting Agent General:—

"Last September Imperial Government notified proposed abandonment Southampton route and reduction Brindisi postage to seven-pence. We replied,—No objection, provided penny would meet Continental rates. Victoria has since proposed reducing to sixpence, to which we have objected. Now rumoured Imperial Government favourably considering Victorian proposal. Strongly protest against any reduction that will prevent our receiving the fourpence already agreed to be allowed on every half-ounce letter."

SAUL SAMUEL.

POSTAGES ON OUTWARD AUSTRALIAN AND NEW ZEALAND MAILS.

No. 1.

The Agent General to The Colonial Secretary, Sydney.

Sir, 3, Westminster Chambers, Victoria-street, S.W., 9 May, 1879.

With reference to your telegram of the 2nd instant, I have the honor to forward herewith, in continuation of previous communications, and in explanation of my telegram of the 2nd inst., copy of further correspondence in the matter of the proposed changes in the division between the Imperial and Colonial Governments of the postages on the Australasian mails, and to draw your particular attention to the Colonial Office letter of the 29th April, and to my reply thereto of the 5th instant, relating to this question, and to the arrangements to be made at the expiration of the present contracts, for the conveyance of the mails between this Country and the Australasian Colonies.

I have, &c.,

WILLIAM FORSTER.

[Enclosures.]

The Colonial Office to Mr. W. Forster.

Sir, Colonial Office, Downing-street, 29 April, 1879.

With reference to previous correspondence respecting the Australian postal question, I am directed by the Secretary of State for the Colonies to inform you that he has received a letter from the Lords Commissioners of the Treasury, intimating that, on being informed by Mr. Berry that he had reason to believe that a fresh contract might be made with the Peninsular and Oriental Company for a fortnightly service both to Melbourne and Sydney, touching at King George's Sound and South Australia, on terms which would be advantageous as compared with the existing rate, they are prepared under such circumstances so far to modify their previous decision on the subject as to agree that the Australian mails shall, as at present, be conveyed free of charge to the Colonies between this Country and Point de Galle or Colombo (in the event of the latter port being made the port of call for Ceylon), on the condition that the Imperial Post Office shall after the 1st of February next, when the present arrangement will expire, receive two-pence in lieu of one penny, as at present, on the outward correspondence, which may be considered as equivalent to the inland rate on both the homeward and the outward correspondence.

This arrangement would, of course, apply equally to the correspondence conveyed under other contracts *via* Singapore and San Francisco.

I have, &c.,

ROBERT GEO. W. HERBERT.

Telegram, 2 May, 1879—"Forster to Secretary, Sydney."

TREASURY propose fortnightly service by Galle impounding two-pence upon all services after February. Graham Berry stating his belief of approval from Sydney. Have protested, Vogel concurring." * * *

Telegram, dated Sydney 2 May, received London, 2 May, 1879.—"Secretary to Forster, London."

Re Secretary of State's despatch seventeenth January you fully empowered to represent this Government, letter of instructions twenty-fourth April contend for continued assistance to American service during contract.

Mr. W. Forster to The Colonial Office.

Sir, 3, Westminster Chambers, S.W., 5 May, 1879.

In reply to your letter of the 29th ultimo, in which you inform me that the Secretary of State for the Colonies has received a communication from the Lords Commissioners of the Treasury, intimating that on being informed by Mr. Graham Berry that he had reason to believe that a fresh contract might be made with the Peninsular and Oriental Company, for a fortnightly service both to Melbourne and Sydney, touching at King George's Sound and South Australia, on terms which would be advantageous as compared with the existing rate, they are prepared under such circumstances so far to modify their previous decision on the subject as to agree that the Australian mails shall, as at present, be conveyed free of charge to the Colonies between this Country and Point de Galle or Colombo (in the event of the latter port being made the port of call for Ceylon), on the condition that the Imperial Post Office shall after the 1st of February next, when the present arrangement will expire, receive two-pence in lieu of one penny, as at present, on the outward correspondence, which may be considered as equivalent to the inland rate on both the homeward and the outward correspondence, and that this arrangement would of course apply equally to the correspondence conveyed under other contracts *via* Singapore and San Francisco,—I have the honor to state that I am not aware that Mr. Berry has any authority to act for or represent the Government of New South Wales in this or any other matter; and not having been informed by him or having any means of ascertaining what he may consider reason to believe anything, I cannot avoid entertaining very strong doubts whether Mr. Berry has any grounds whatever for assuming or believing—and I myself do not believe—that the Government of New South Wales would be likely to approve of or accede to any arrangement which would seriously interfere with or place them in a less favourable position than they enjoy in common with the Government of New Zealand, under the existing arrangement, which includes and was made pursuant to their contract with the Pacific Mail Company for conveyance of mails between Sydney and San Francisco.

There

There can be no doubt that the virtual renewal and extension of this contract to November, 1883, was agreed to by these two Governments under an impression that the arrangement of which it formed a part would be adhered to by the Imperial Government until the termination of the contract. And there is reason to fear that the benefits and effectiveness of the arrangement would be impaired by the alteration of terms suggested in your letter.

I think it my duty therefore, and I have the honor, on behalf of the Government which I represent, to protest against the proposal embodied in your letter, and to express my hope that, so far as the Colonies of New South Wales and New Zealand are concerned, the new arrangement may not take effect before the termination, in the year 1883, of the contract above referred to.

I have the honor to add that this letter is written, and protest made, with the concurrence of the Agent General for New Zealand.

I have, &c.,

WILLIAM FORSTER.

Copy of this letter sent to the Agents General for Victoria, New Zealand, South Australia, and Queensland.

Mr. W. Forster to The Colonial Office.

3, Westminster Chambers, Victoria-street, 5 May, 1879.

Sir,

With reference to previous correspondence, and in particular to your letter of the 17th January last, respecting the Australian postal question, I have the honor to notify, for the information of the Secretary of State for the Colonies, that on the 2nd instant I received from the Chief Secretary of New South Wales the following telegram of that date:—

"Re Secretary of State's despatch, seventeenth January. You fully empowered to represent this Government; letter of instructions twenty-fourth April contend for continued assistance to American service during contract."

I have, &c.,

WILLIAM FORSTER.

Mr. S. Yardley to Sir Julius Vogel.

3, Westminster Chambers, Victoria-street, S.W., 5 May, 1879.

Sir,

I am directed by the Agent General for New South Wales to annex hereto, for your information, copy of a telegram, dated Sydney, 2nd instant, which he has received from the Chief Secretary for New South Wales, relating to the Australian postal question, and with reference especially to the Secretary of State's letter of the 17th January last, regarding the representation of the Colonies for the purpose of negotiating and concluding whatever agreements may be arrived at with Her Majesty's Government in regard thereto.

I have, &c.,

S. YARDLEY,

Secretary, N.S. Wales Government Agency.

Sir Julius Vogel to Mr. W. Forster.

7, Westminster Chambers, S.W., 6 May, 1879.

Sir,

I have the honor to acknowledge the receipt of Mr. Yardley's letter of 5th instant, transmitting copy of a telegram received by you from the Chief Secretary of New South Wales, relating to the Australian postal question, and I have to thank you for the same.

I beg at the same time to enclose, for your information, a copy of a cablegram which I received from my Government, authorizing me to negotiate with the Imperial Government on this subject, and also copy of a communication which I addressed to the Secretary of State for the Colonies.

I have, &c.,

JULIUS VOGEL,

Agent General for New Zealand.

Telegram, received 9 April, 1879, Wellington, dated 9th. To Vogel.

POSTAGE—Agent-General authorized negotiate "Imperial Government." Advocate generally views letter July twenty-four with most liberal terms possible and maintaining present payment during 'Frisco contract.

GREY.

Sir Julius Vogel to The Colonial Office.

7, Westminster Chambers, S.W., 16 April, 1879.

Sir,

I have the honor to inform you that I have received from the Honorable the Premier of New Zealand a cablegram authorizing me to negotiate with the Imperial Government on the subject of the division of postages between the Mother Country and New Zealand.

This is, I presume, in response to your circular letter inviting the Colonies to name a representative. I shall be glad therefore to know when you wish to see me, or what steps you may desire I shall take in the matter.

I have, &c.,

JULIUS VOGEL,

Agent General for New Zealand.

Sir Julius Vogel to The Colonial Office.

7, Westminster Chambers, S.W., 30 April, 1879.

Sir,

I have the honor to acknowledge the receipt of your letter of the 29th instant, in which you intimate to me that on Mr. Berry informing the Lords Commissioners of the Treasury that a fresh contract might be made with the Peninsular and Oriental Company for a fortnightly service both to Melbourne and Sydney, they have agreed to modify their previous decision so far as to be willing to carry the mails between this country and Ceylon for double the rate now charged, namely, two-pence instead of a penny, and that this proposal would equally apply to the Colonial mails carried by way of San Francisco.

In reply, I have to say that I doubt if Mr. Berry has any authority to act for the Government of New South Wales. Until November, 1883, New South Wales and New Zealand are jointly concerned in a contract for the carriage of mails *via* San Francisco. By an arrangement which has been made between the several

several Colonies, each has been able to use the various mail routes without necessarily being a party to the contracts. Victoria has thus used the San Francisco route, whilst New South Wales and New Zealand have used the monthly service *via* Ceylon. A fortnightly service by the latter route would throw on the two last-mentioned Colonies a heavier cost for the San Francisco service, inasmuch as it would lessen the use of it made by Victoria. It is exceedingly improbable that pending the continuation of the San Francisco service, the Government of New South Wales would entertain any arrangement for the establishment of a fortnightly service by Suez.

In any case however I have to urge most earnestly the claim of my Government and that of New South Wales to a continuance of the present arrangement, so far as relates to the carriage of mails by San Francisco until that contract expires in November, 1883.

The two Governments when they entered into the contract did so with the full persuasion that the Imperial Government would not increase the charge for which they had agreed to make the connections with San Francisco.

In my letter of July 24th last, to the Secretary of State for the Colonies (copy enclosed), I showed at length that the transit of the mails to and from San Francisco did not cost the Imperial Government a larger sum of money than when the agreement was entered into with the Colonies to carry those mails. On the other hand, the two Colonies interested pay a very large sum for the service, and they will feel it to be a want of consideration to them that the terms should be increased during the currency of the service. I trust therefore, without reference to the arrangements made for other services, or those to follow the conclusion of the present San Francisco contract, that until the present contract expires the present arrangement will be allowed to continue.

I am happy to state that the Agent General for New South Wales concurs in these views.

I have, &c.,

JULIUS VOGEL,

Agent General for New Zealand.

Telegram sent 2nd May, 1879, Vogel to Postmaster, New Zealand.

TREASURY consequent upon Graham Berry stating fortnightly Suez Service Melbourne Sydney probable intimate impound two-pence all services after February. Have expressed doubt Berry authority act Sydney or that Sydney favour fortnightly Suez service. Protested also against charge during present Frisco contract, Forster concurring.

The Colonial Office to Sir Julius Vogel.

Sir,

Downing-street, 5 May, 1879.

I am directed by the Secretary of State for the Colonies to acknowledge the receipt of your letter of the 30th April, requesting that the present arrangements for the carriage of mails *via* San Francisco may be continued until the contract for their service expires in November, 1883.

In reply, I am to inform you that a copy of your letter has been forwarded to the Lords Commissioners of the Treasury, and that a further communication will be addressed to you upon the subject.

I have, &c.,

JOHN BRAMSTON.

Submitted.—19/6/79. The Postmaster General.—H.P., 19/6/79. The Secretary to the Post Office, B.C., 19 June, 79.—C.W.

No. 2.

Circular Despatch from The Secretary of State to The Officer Administering the Government of New South Wales.

Sir,

Downing-street, 17 May, 1879.

I informed you by my telegram of the 13th instant, that the Lords Commissioners of the Treasury would continue the present arrangement for the carriage of the Australasian Mails, but after the 1st of February next would retain two-pence instead of a penny on the outward correspondence; and I have now the honor to transmit to you, for the information of your Government, a copy of a letter, in which I caused their Lordships' decision to be communicated to the Agents General, and to Mr. Graham Berry, as the representative of the Government of Victoria, who was then in this country.

I have, &c.,

M. E. HICKS-BEACH.

[Enclosure.]

The Colonial Office to Mr. Graham Berry and the Agents General for the Australasian Colonies.

Sir,

Downing-street, 29 April, 1879.

With reference to previous correspondence respecting the Australian postal question, I am directed by the Secretary of State for the Colonies to inform you that he has received a letter from the Lords Commissioners of the Treasury, intimating that on being informed by [Mr. Berry] [you] that [he] [you] had reason to believe that a fresh contract might be made with the Peninsular and Oriental Company for a fortnightly service both to Melbourne and Sydney, touching at King George's Sound and South Australia, on terms which would be advantageous as compared with the existing rate, they are prepared, under such circumstances, so far to modify their previous decision on the subject as to agree that the Australian Mails shall, as at present, be conveyed free of charge to the colonies between this country and Point de Galle or Colombo (in the event of the latter port being made the port of call for Ceylon), on the condition that the Imperial Post Office shall, after the 1st of February next, when the present arrangement will expire, receive two-pence in lieu of one penny as at present on the outward correspondence, which may be considered as equivalent to the inland rate on both the homeward and the outward correspondence.

This arrangement would of course apply equally to the correspondence conveyed under other contracts *via* Singapore and San Francisco.

I am, &c.,

R. G. W. HERBERT.

Colonial Secretary, 10/7/79. The Postmaster General.—H.P., 19/7/79. The Secretary to the Post Office, B.C., 21 July, 1879.—C.W. Seen.—S.S., 25/7/79.

Vessels to be equipped and manned, and subject to approval.

3. That the vessels to be employed under this agreement shall be always furnished with all necessary and proper machinery, engines, apparel, furniture, stores, tackle, boats, fuel, lamps, oil, tallow, provisions, anchors, cables, fire-pumps, and other proper means of extinguishing fire, lightning-conductors, charts, chronometers, nautical instruments, and whatsoever else may be requisite for equipping the said vessels and rendering them constantly efficient for the service hereby agreed to be performed, and also manned and provided with competent officers with appropriate certificates, granted pursuant to the Act or Acts of the Imperial Parliament of Great Britain and Ireland in force for the time being relative to the granting of certificates to officers in the merchant service, and with a sufficient number of efficient engineers and a sufficient crew of able seamen and other men, to be in all respects, as to vessels, engines, equipment, officers, engineers, and crew, subject in the first instance and from time to time and at all times afterwards to the approval of the Postmaster General or of such person or persons as he shall at any time or times or from time to time authorize to inspect and examine the same.

As to mail and sorting rooms.

4. The Company shall at their own cost provide on each of the vessels to be employed under this agreement, a separate and convenient room, for the convenient and secure deposit of the mails, under lock and key, and shall also at the like cost (if and when they shall be required so to do by the said Postmaster General) erect and provide on each of such vessels employed under this agreement a separate and convenient room for sorting and making up the said mails, and shall provide in such room all such furniture, lamps, fittings, and other conveniences as shall be necessary or convenient for the purpose of sorting and making up the said mails; and all such furniture, lamps, fittings, and other conveniences, shall be from time to time cleansed and kept in repair, and the oil for the lamps supplied by the servants and at the cost of the Company, and the services of the crew of every such vessel shall from time to time be given in the conveyance of the mails between the mail-room and the sorting-room. The Company shall also, if required by the Postmaster General so to do, convey free of cost on such parts of the voyage as he may direct one or two Mail Agents, to be berthed and messed as first-class passengers.

Times of starting.

5. That one of such vessels so approved, equipped, and manned as aforesaid shall, once in every fourteen days, and on such days and at such hours as shall be fixed by the Postmaster General upon or after the day hereinafter appointed for the commencement of this agreement (until and unless any other days or hours shall, under the proviso herein in that behalf contained, be substituted instead thereof), and immediately after the mails are embarked, put to sea from the ports of Melbourne and Point de Galle, or Colombo, as the case may be, respectively, and the Company shall convey in such vessels to and from and cause to be delivered and received at such of the ports or places hereinbefore mentioned all such mails as shall or may be tendered or delivered to or received by the Company or any of their agents, officers, or servants by or from or under the direction of the Postmaster General or any of his officers or agents.

Power to alter time.

6. That if at any time or times the Postmaster General shall desire to alter the particular days, times, or hours of departure from and arrival at any of the ports or places to or from which mails are to be conveyed under this agreement, he shall be at liberty so to do on giving three calendar months' previous notice in writing of such his desire to the Company, and the Company shall observe, perform, fulfil, and keep such altered days, times, and hours.

Postmaster General may delay starting for twenty-four hours.

7. That should it be deemed by the Postmaster General requisite for the public service that any vessel to be employed under this agreement should at any time or times delay her departure from any port from which the mails are to be conveyed under this agreement beyond the period appointed for her departure therefrom, the Postmaster General, his officers or agents, shall have power to order such delay (not however exceeding twenty-four hours), by letter addressed by him or them to the master of any such vessel or person acting as such, and which shall be deemed a sufficient authority for such detention; and the said Postmaster General, his officers or agents shall have power, to be exercised in writing as aforesaid, to delay the departure of any vessel employed under this agreement, from Point de Galle or Colombo, as the case may be, until the mails from England are placed on board.

Duration of voyages. Point de Galle or Colombo to Melbourne.

8. All mails conveyed by the Company in pursuance of this agreement from Point de Galle or Colombo, as hereinafter provided, to Melbourne, shall be conveyed by way of King George's Sound and also by way of Glenelg or the Semaphore as the Postmaster General may direct, and the voyage from Point de Galle or Colombo, as the case may be, to Melbourne shall be completed in four hundred and fifty-six hours, inclusive of the stoppages at King George's Sound and Glenelg or the Semaphore, which stoppages shall not together exceed twenty-four hours.

Melbourne to Point de Galle or Colombo.

9. All mails conveyed by the Company in pursuance of this agreement from Melbourne to Point de Galle or Colombo, as the case may be, shall be conveyed by way of Glenelg or the Semaphore as the Postmaster General may direct, and also by way of King George's Sound, and the voyage from Melbourne to Point de Galle or Colombo shall be completed in four hundred and fifty-six hours, inclusive of the stoppages at Glenelg or the Semaphore and King George's Sound, which stoppages shall not together exceed twenty-four hours.

Penalties.

10. The Company further agree that, so long as Her Majesty's mails are conveyed from Brindisi to Point de Galle or Colombo, under the provisions of the contract of the seventh day of February, one thousand eight hundred and seventy-nine, the Company will convey the mails from Brindisi to Melbourne in eight hundred and ninety-five hours, inclusive of stoppages, and from Melbourne to Brindisi in nine hundred and ten hours, inclusive of stoppages, except during the prevalence of the south-west monsoon, when forty-eight hours additional shall be allowed for the conveyance of the mails from Melbourne to Brindisi. And if the Company shall fail to convey the said mails from Brindisi to Melbourne, and from Melbourne to Brindisi, in the periods respectively above stipulated, then in every such case, and so often as the same shall happen, the Company shall forfeit and pay to Her Majesty, Her Heirs and Successors, the sum of one hundred pounds for every complete period of twenty-four hours consumed on the respective voyages beyond the periods hereinbefore respectively specified: Provided always that the full amount of such sums payable on any one voyage shall never exceed the portion of the sum of the subsidy hereinafter agreed to be paid by the Postmaster General as applicable to such voyage; and provided further that the payment of any such sum shall not be enforced against the Company if it be shown by them to the satisfaction of the Postmaster General that the delay has arisen from causes over which they had not and could not have had any control.

Premium for time saved.

11. The Postmaster General doth hereby agree to pay to the Company a premium of fifty pounds for every complete period of twenty-four hours by which the time occupied in the conveyance of the mails from Brindisi to Melbourne and from Melbourne to Brindisi shall be less than the times stipulated in clause 10.

12.

12. Should the Postmaster General desire so to do, he may, by notice in writing under his hand, to be given at any time before the first day of February, one thousand eight hundred and eighty, substitute for the stipulation in clause 10 as to penalties the following stipulation, that is to say—That if the Company shall fail to convey the said mails from Point de Galle or Colombo, as the case may be, to Melbourne in four hundred and fifty-six hours, or from Melbourne to Point de Galle or Colombo, as the case may be, in four hundred and fifty-six hours, under the conditions specified in clauses 8 and 9, then in any of such cases, and so often as the same shall happen, the Company shall forfeit and pay to Her Majesty, Her Heirs and Successors, the sum of one hundred pounds for every complete period of twenty-four hours consumed on the respective voyages beyond the periods hereinbefore respectively specified: Provided always that the full amount of such sums payable on any one voyage shall never exceed the portion of the sum of the subsidy hereinafter agreed to be paid by the Postmaster General as applicable to such voyage: And provided further that the payment of any such sum shall not be enforced against the Company if it be shown by them to the satisfaction of the Postmaster General that the delay has arisen from causes over which they had not and could not have had any control.

And in case the Postmaster General shall decide to adopt the system of penalties specified in this clause, then and in that case there shall be substituted for the stipulation in clause 11 as to premiums the following stipulation, that is to say,—that the Postmaster General shall pay to the Company a premium of fifty pounds for every complete period of twenty-four hours by which the time occupied in the conveyance of the mails from Point de Galle or Colombo to Melbourne, and from Melbourne to Point de Galle or Colombo, shall be less than the time stipulated in clauses 8 and 9 respectively.

13. That if the Company fail to provide an efficient vessel at Point de Galle or Colombo, as the case may be, or Melbourne, in accordance with the terms of this agreement, ready to put to sea on and at the appointed day and hour, then and so often as the same shall happen the Company shall forfeit and pay unto Her Majesty, Her Heirs and Successors, the sum of five hundred pounds, and also the further sum of one hundred pounds for every successive twenty-four hours which shall elapse until such vessel actually proceeds to sea on her voyage in the performance of this agreement: Provided always that the aggregate amount of the penalties to be recoverable under this clause in respect of any one voyage or contemplated voyage shall not exceed by more than the sum of two thousand pounds the proportion of the subsidy hereinafter agreed to be paid by the Postmaster General as applicable to such voyage.

Penalties for failing to provide vessels.

14. That during the continuance of this agreement the commanders of the vessels to be employed for the time being in carrying the mails under this agreement shall take due care of, and the Company shall be responsible for, the receipt, safe custody, and delivery of the said mails; and each of such masters or commanders shall make such oath or declaration or declarations now lawfully required or which may hereafter be lawfully required by the Postmaster General in such and similar cases, and furnish such journals, returns, and information to and perform such services as the Postmaster General may require: And every such master or commander or officer duly authorized by him having the charge of mails shall himself, immediately on the arrival at any of the said ports or places of any such vessel, deliver all mails for such port or place into the hands of the Postmaster or other person at such port or place as the Postmaster General shall authorize to receive the same, receiving in like manner all the return or other mails to be forwarded in due course.

Masters of vessels to take charge of mails.

15. That the Company shall not, nor shall any of the masters of any of the vessels employed or to be employed under this agreement, receive or permit to be received on board any of the vessels carrying the mails under this agreement any letters for conveyance other than those carried under this agreement in charge of the said commander or other person authorized to have charge of the said mails, or which are or may be privileged by law, nor shall any mails be conveyed by the Company between Point de Galle or Colombo, as the case may be, and any of the Australasian Colonies or New Zealand, for or on behalf of any colony, province, or foreign country, save those carried under this agreement, without the consent in writing of the Postmaster General.

No letters to be received on board but Her Majesty's mails.

16. So long as Point de Galle continues to be the port in the island of Ceylon to and from which the mails are conveyed under the contract between the Imperial Government and the Company, the Company's steamers employed under this present agreement shall run to and from Point de Galle, but as soon as Colombo shall have been substituted for Point de Galle as the port of call under the Imperial Contract, the Company's steamers employed under this agreement shall run to and from Colombo instead of Point de Galle.

Substitution of Colombo for Point de Galle.

17. That the Postmaster General shall have full power whenever and as often as he may deem it requisite, to survey by any of his officers or agents all or any of the vessels employed and to be employed in the performance of this agreement and hulls thereof; and the engines, machinery, furniture, tackle, apparel, stores, equipments, and the officers, engineers, and crew of every such vessel, and any defect or deficiency that may be discovered on any such survey, shall be forthwith repaired or supplied by the Company; and if any of such vessels, or any part thereof, or any engines, machinery, furniture, tackle, apparel, boats, stores, or equipments shall on any such survey be declared by any of such officers or agents unseaworthy or not adapted to the service hereby agreed to be performed, every vessel which shall be disapproved of or in which such deficiency or defect shall appear shall be deemed insufficient for any service hereby agreed to be performed, and shall not be again employed in the conveyance of mails until such defect or deficiency has been repaired or supplied to the satisfaction of the Postmaster General.

Postmaster General may survey vessels.

18. That the Company and all commanding and other officers of the vessels employed in the performance of this agreement, and all agents, seamen, and servants of the Company shall at all times punctually attend to the orders and directions of the Postmaster General, his officers or agents, as to the mode, time, and place of landing, delivering, and receiving mails.

Orders as to the landing, &c., of mails to be attended to.

19. That all and every the sums of money hereby stipulated to be forfeited or paid by the Company unto Her Majesty, Her Heirs and Successors, shall be considered as stipulated or ascertained damages, whether any damage or loss have or have not been sustained, and shall and may be retained and deducted by the Postmaster General out of any moneys payable or which may thereafter become payable to the Company.

Penalties to be considered as ascertained damages and may be retained by the Postmaster General.

20. And in consideration of the due and faithful performance by the said Company of all the services hereby agreed to be by them performed, the said Postmaster General doth hereby agree that there shall be paid at Melbourne to the said Company by Her Majesty's Government of Victoria, so long as the Company

Subsidy.

Company perform the voyages and services herein contracted to be performed, a sum of money after the rate of eighty-five thousand pounds per annum (£85,000), in equal quarterly payments, on the first day of April, and the first day of July, the first day of October, the first day of January in each year, and shall accrue due from day to day; and the said payments shall be received by the said Company as full compensation for all costs and expenses which they may incur or be put unto by reason or on account of all and singular the services hereby contracted to be performed, subject however to the abatement or deduction of any sums of money in respect of forfeitures which the said Company may have incurred, or to the addition of any sums in respect of premiums as the case may be, as herein provided.

Contractors to have no claim to postage except as herein provided. Commencement and duration of contract.

21. The Contractors shall have no claim to any postage nor to any payment on account thereof for mails carried under this contract except as herein provided.

22. That this agreement shall commence on and from the first day of February, one thousand eight hundred and eighty, and shall continue until the thirty-first day of January, one thousand eight hundred and eighty-eight, and shall then determine if the Postmaster General shall by writing under his hand have given to the Company, or if the Company shall have given to the Postmaster General, twenty-four calendar months' notice that this agreement shall so determine; but if neither the Postmaster General nor the Company shall give any such notice, this agreement shall continue in force after the said thirty-first day of January, one thousand eight hundred and eighty-eight, until the expiration of a twenty-four calendar months' notice in writing as aforesaid, which may be given by either of the said parties hereto to the other of them, and which last-mentioned notice may be given on or at any time after the thirty-first day of January, 1886. This agreement shall then determine accordingly, without prejudice nevertheless to any right of action or other proceeding which shall then have accrued to either party for any breach thereof.

Penalties for failing to commence service on 1st February, 1880.

23. And it is hereby further agreed that in case the Company shall fail to commence the performance of the services herein agreed to be by them performed on the first day of February, one thousand eight hundred and eighty, or the first day thereafter which the Postmaster General may fix as the day of sailing, then and in such case the Company shall forfeit and pay unto Her Majesty, Her Heirs, and Successors, the sum of five hundred pounds, and also the further sum of one hundred pounds for every successive period of twenty-four hours which shall elapse until the actual and *bonâ fide* commencement of the performance by the Company of the services herein agreed to be by them performed: Provided always that the total amount of the penalties to be incurred by the said Company by reason of such failures as aforesaid respectively shall not exceed the sum of fifteen thousand pounds.

On determination, voyages begun to be completed.

24. That if on the determination of this agreement any vessel or vessels should have started or should start with the mails, in conformity with this agreement, such voyage or voyages shall be continued and performed and the mails be delivered and received during the same as if this agreement had remained in force with regard to any such vessels and services; and with respect to such vessels and services as last aforesaid, this agreement shall be considered as having terminated when such vessels and services shall have reached their port or place of destination and been performed.

Postmaster General may delegate powers.

25. It shall be lawful for the Postmaster General, by writing under his hand, at any time and from time to time to delegate any of the powers vested in him by virtue of this agreement to such person or persons as he may think fit.

Company not to convey dangerous articles.

26. The Company shall not convey in any vessel employed by them in pursuance of this agreement, any nitro-glycerine or any other article which shall have been legally declared specially dangerous either in England or Victoria.

Quarantine.

27. The Company shall undertake for themselves all arrangements relative to quarantine.

As to notices.

28. That all notices or directions which the Postmaster General, his officers, agents, or others, are hereby authorized to give to the Company, their officers, servants, or agents, other than any notice of termination of this contract, may, at the option of the Postmaster General, either be delivered to the master of any of the said vessels or other officer or agent of the Company in the charge or management of any vessel employed in the performance of this agreement, or left for the Company at their office or house of business in Melbourne, or at their or any of their last known places of business or abode in Melbourne; and any notices or directions so given or left shall be binding on the Company: Provided always that any notice of termination of this contract shall be served on the Company, their officers, servants, or agents, at their office or last known office in Melbourne.

Company not to assign, &c., agreement.

29. The Company shall not assign, underlet, or dispose of this agreement or any part thereof without the consent of the Postmaster General signified in writing under his hand, and in case of the same or any part thereof being assigned, underlet, or otherwise disposed of, or of any great or habitual breach of this agreement, or any covenant, matter, or thing herein contained on the part of the Company, their officers, agents, or servants, it shall be lawful for the Postmaster General, if he shall think fit, and notwithstanding there may or may not have been any former breach of this agreement, by writing under his hand, to determine this agreement without any previous notice to the Company or their agents, nor shall the Company be entitled to any compensation in respect of such determination, and such determination shall not deprive the Postmaster General of any right or remedy to which he would otherwise be entitled by reason of such breach or any prior breach of this agreement; and in case any difference shall arise between the parties hereto as to the sufficiency of any such breach as aforesaid to justify the Postmaster General in determining this agreement, such difference shall be referred to and determined by arbitration in manner hereafter provided: Provided always that in case within seven days after service on the Company of a notice determining this agreement on the ground of any great or habitual breach or breaches thereof, the Company or their agents give a notice in writing to the Postmaster General that they dispute the sufficiency of such breach or breaches to justify the Postmaster General in determining this agreement, such dispute shall be referred to arbitration in manner hereinafter provided, and in such case this agreement shall notwithstanding such notice of determination continue in force unless and until an award shall be made to the effect that such breach or breaches was or were sufficient to justify the Postmaster General in giving such notice of determination as aforesaid.

Disputes to be referred to arbitration.

30. If at any time during the continuance of this agreement, or after the determination thereof, any dispute shall arise between the parties to these presents or their successors respectively, concerning any of the covenants, matters, or things hereinbefore contained, or in anywise relating thereto, such dispute shall be referred to and determined by arbitration in manner hereinafter provided.

31. All matters which in pursuance of the provisions hereinbefore contained are to be determined by arbitration shall be referred to two arbitrators, one to be chosen from time to time by the Postmaster General and the other by the Company; and if such arbitrators should at any time or times not agree on the matter or question referred to them, then such question in difference shall be referred by them to an umpire to be chosen by such arbitrators before they proceed with the reference to them, and the joint and concurrent award of the said arbitrators, or the separate award of the said umpire, when the said arbitrators cannot agree, shall be binding and conclusive upon both parties: Provided that in case of either party failing to choose an arbitrator within two months of receipt of notice to arbitrate, or in case of the chosen arbitrators failing to choose an umpire within two months of their failure to agree, then the Chief Justice of the Colony of Victoria for the time being shall nominate an umpire, by writing under his hand, whose award shall be final and conclusive on all parties; and every such arbitration shall be held in Melbourne aforesaid. Arbitration.

32. Any submission to arbitration in pursuance of this agreement shall be made a rule of the Supreme Court of the Colony of Victoria, pursuant to the statute in that case made and provided, on the application of either party. Any reference to be made a rule of Court.

33. And for the due and faithful performance of all and singular the covenants, conditions, provisoes, clauses, articles, and agreements hereinbefore contained, and which on the part and behalf of the said Company, their officers, agents, or servants are or ought to be observed, performed, fulfilled and kept, the said Company do hereby bind themselves and their successors unto Her Majesty in the sum of fifteen thousand pounds sterling, to be paid to Her Majesty, Her Heirs and Successors, by way of stipulated or ascertained damages, hereby agreed upon between the Postmaster General and the said Company, in case of the failure on the part of the Company in the execution of this contract, or any part thereof. Bond clause.

34. The words "Postmaster General" herein shall mean the Postmaster General of the Colony of Victoria for the time-being, or the responsible Minister of the Crown for the time-being administering the Post Office Department. Interpretation.

In witness, &c.

Colonial Secretary.—A.L., 16/8/79. The Postmaster General.—H.P., 22/3/79. The Secretary to the General Post Office, B.C., 22 August, 1879.—C.W. Submitted—S.H.L., 27/8/79. Seen.—S.S., 1/9/79.

No. 5.

The Secretary of State for the Colonies to The Officer Administering the Government of New South Wales.

Sir,

Downing-street, 4 June, 1879.

With reference to my telegram of the 13th May, and to my circular despatch of the 17th of the same month, in which I informed you of the decision at which the Lords Commissioners of the Treasury had arrived in respect of the division of postal receipts between this Country and the Australasian Colonies after the 1st February next, I have the honor to transmit to you, for the information of your Government, copies of further correspondence with the Agent General representing your Government in this Country upon the subject.

I have, &c.,

M. E. HICKS-BEACH.

[Enclosures.]

The Agent General for New South Wales to The Colonial Office.

Sir,

3, Westminster Chambers, Victoria-street, S.W., 5 May, 1879.

In reply to your letter of the 29th ultimo, in which you inform me that the Secretary of State for the Colonies has received a communication from the Lords Commissioners of the Treasury, intimating that on being informed by Mr. Graham Berry that he had reason to believe that a fresh contract might be made with the Peninsular and Oriental Company for a fortnightly service both to Melbourne and Sydney, touching at King George's Sound and South Australia, on terms which would be advantageous as compared with the existing rate, they are prepared under such circumstances so far to modify their previous decision on the subject as to agree that the Australian mails shall as at present be conveyed free of charge to the Colonies between this Country and Point de Galle or Colombo (in the event of the latter port being made the port of call for Ceylon), on the condition that the Imperial Post Office shall after the 1st of February next, when the present arrangement will expire, receive two-pence in lieu of one penny as at present on the outward correspondence, which may be considered as equivalent to the inland rate on both the homeward and the outward correspondence, and that this arrangement would of course apply equally to the correspondence conveyed under other contracts *via* Singapore and San Francisco,—I have the honor to state that I am not aware that Mr. Berry has any authority to act for or represent the Government of New South Wales in this or any other matter; and not having been informed by him, or having any means of ascertaining what he may consider reason to believe anything, I cannot avoid entertaining very strong doubts whether Mr. Berry has any grounds whatever for assuming or believing, and I myself do not believe, that the Government of New South Wales would be likely to approve of or accede to any arrangement which would seriously interfere with or place them in a less favourable position than they enjoy in common with the Government of New Zealand under the existing arrangement, which includes and was made pursuant to their contract with the Pacific Mail Company for conveyance of mails between Sydney and San Francisco.

There can be no doubt that the virtual renewal and extension of this contract to November, 1883, was agreed to by these two Governments under an impression that the arrangement of which it formed a part would be adhered to by the Imperial Government until the termination of the contract; and there is reason to fear that the benefits and effectiveness of the arrangement would be impaired by the alteration of terms suggested in your letter.

I think it my duty therefore, and I have the honor, on behalf of the Government which I represent, to protest against the proposal embodied in your letter, and to express my hope that, so far as the Colonies of New South Wales and New Zealand are concerned, the new arrangement may not take effect before the termination, in the year 1883, of the contract above referred to.

I have the honor to add that this letter is written and protest made with the concurrence of the Agent General for New Zealand.

I have, &c.,

WILLIAM FORSTER.

The Colonial Office to The Agent General for New South Wales.

Sir,

Downing-street, 4 June, 1879.

Treasury,
13th May, 1879.
Treasury, 27.

With reference to your letter of the 5th of May, and to the reply from this Department of the 20th of May, I am directed by the Secretary of State for the Colonies to transmit to you, for your information, copies of the replies which he has received from the Lords Commissioners of the Treasury to the representations which [you] and the Agent General for New Zealand have made on behalf of the Governments of New South Wales and New Zealand, that the present arrangement respecting the division of postal receipts may continue in force as regards the San Francisco service until the termination in November, 1883, of the contract for that service by which New South Wales and New Zealand are now bound.

A similar letter has been addressed to the Agent General for New Zealand.

I am, &c.,

JOHN BRAMSTON.

The Treasury to The Colonial Office.

Sir,

Treasury Chambers, 27 May, 1879.

The Lords Commissioners of Her Majesty's Treasury have had before them your letter of the 20th instant, transmitting, with reference to previous correspondence, copy of a letter from the Agent General of New South Wales, requesting that the present arrangement respecting the division of postal receipts between the Australian Colonies and New Zealand may continue in force as regards the San Francisco service until the termination of the contract for that service in November, 1883.

I am commanded to acquaint you, for the information of Secretary Sir Michael Hicks-Beach, that my Lords see no reason to come to any other conclusion on this subject than that which was communicated to the Secretary of State in their letter of the 13th instant, with reference to a similar application from the Agent General of New Zealand.

I am, &c.,

H. SELWIN IBBETSON.

The Treasury to The Colonial Office.

Sir,

Treasury Chambers, 13 May, 1879.

The Lords Commissioners of Her Majesty's Treasury have had before them Mr. Bramston's letter of the 5th instant, transmitting copy of a letter from the Agent General for New Zealand, in reply to one in which he had been informed in common with the other Agents General, of the arrangements which my Lords were prepared to agree to for the conveyance of the Australian mails after the 1st of February next, wherein Sir Julius Vogel urges the claim of the Government of New Zealand and that of New South Wales to a continuance of the present arrangement so far as relates to the carriage of mails by San Francisco until the contract which those Governments have for the conveyance of such mails expires in November, 1883.

I am commanded to request that you will state to Secretary Sir Michael Hicks-Beach that the whole question as respects the postal arrangements with the Australian Colonies and New Zealand is so clearly set forth in the circular letter which the Secretary of State addressed to the Governors of those Colonies on the 17th January last that my Lords have little to add thereto.

The Agent General for New Zealand is fully aware that when the arrangements to which he refers were made they were expressly limited to a period of five years; and my Lords, in lately agreeing to extend such period to the 1st February, 1880, the date when the present Imperial contract with the Peninsular and Oriental Steam Navigation Company comes to an end, cannot but feel that they have acted in a very liberal spirit towards the Colonies concerned.

The 1st February, 1880, on which date a new contract which the Imperial Post Office have entered into with the Peninsular and Oriental Company will come into operation, must therefore be considered a fresh starting point.

The presence in this country of Mr. Berry, the Premier of Victoria, afforded the opportunity of his having personal communication with me on the subject of the arrangement to be made for the division, after 1st February, 1880, between the Imperial and Colonial Post Offices of the postage accruing on the correspondence with Victoria and other Colonies whose mails are carried *via* King George's Sound; and after some discussion with that gentleman I felt myself warranted, on the part of this Board, having reference to what I understood was the intention of the Victorian Government, to enter into a contract for the conveyance of mails once every fortnight between Ceylon and Melbourne and probably Sydney, in consenting to the present arrangement under which the Victorian and other Australian mails are carried free of cost to the Colonies between this Country and Ceylon, [excepting of course the mails sent *via* Brindisi, on which the foreign transit rates will have to be paid as at present], being continued on the understanding however that in lieu of the inland rate of one penny per half-ounce letter on the outward correspondence, which is all that the Imperial Post Office now receives, two-pence as an equivalent to the inland rate on the outward and homeward correspondence should be retained on the outward correspondence, leaving four-pence on the outward and the whole of the postage on the homeward correspondence to accrue to the Colonies.

Having agreed to this arrangement with Mr. Berry, my Lords intimated to the Secretary of State that it would be equally applicable to Queensland, whose mails are now conveyed between this Country and Singapore free of cost to the Colony and New Zealand and New South Wales, the mails for which Colonies

are

are now carried at a considerable expense to the Home Government between this Country and San Francisco.

My Lords cannot but think that the arrangement to which they have agreed is one by which the Colonies will be dealt with very liberally. The Home Government will merely retain that which may be considered equivalent to its inland postage, whilst the remainder of the postage on the outward and the whole of the postage on the homeward correspondence will accrue to the Colonies concerned.

My Lords have now only to request that you will state to Sir Michael Hicks-Beach that they are decidedly of opinion that they would not be warranted on the part of the Home Government in acceding to the request preferred by Sir Julius Vogel.

I have, &c.,
H. SELWIN IBBETSON.

Colonial Secretary.—A.L., 16/8/79. The Postmaster General.—H.P., 22/8/79. The Secretary to the General Post Office, B.C., 22 August, 1879.—C.W Submitted.—S.H.L., 29/8/79. Seen.—S.S., 1/9/79.

No. 6.

The Secretary to the Post Office to The Under Secretary, Colonial Secretary's Department.

Sir, General Post Office, Sydney, 23 July, 1879.

With reference to the letter from the Agent General, dated 22nd May last, with enclosures forwarded by you under blank cover, on the 9th inst., relative to the division of postage on correspondence between the United Kingdom and the Australian Colonies, I am directed by the Postmaster General to point out that as no instructions have been yet given to the Agent General since the receipt of Sir Michael Hicks-Beach's telegram of the 13th May last, containing what appears to be the decision of the Imperial Government to retain 2d. instead of 1d., and as Mr. Forster, in the absence of such instructions, may assume that we are content with such an arrangement, and not follow up his protest of the 5th May, it might be advisable to communicate further with him on the subject. Mr. Samuel would suggest that a telegram as per draft enclosed should be sent to London.

Perhaps you will be so good as to bring the matter under the consideration of the Colonial Secretary at the earliest possible moment.

I have, &c.,
S. H. LAMBTON.

[Enclosure.]

Draft Telegram to Agent General, London.

HAVE you received reply to protest against alteration of existing arrangements until termination of Frisco contract? This Government can scarcely think decision to alter this arrangement can be a final one, in view of its having been arrived at before Colonies had time to appoint and instruct representatives to discuss the question, as invited in Secretary of State's despatch of seventeenth January.

Submitted.—26/7/79.

The Agent General to The Colonial Secretary, Sydney.

Sir, 3, Westminster Chambers, Victoria-street, S.W., 1 August, 1879.

In continuation of my letter of the 22nd May last, regarding the postal question, I have the honor to forward for your further information copy of a Colonial Office letter, addressed to me on the 4th June last, and of my minute thereon. I have replied to the Secretary of State in terms of my minute down to the end of paragraph 10.

I have, &c.,
WILLIAM FORSTER.

The Colonial Office to The Agent General.

Sir, Colonial Office, Downing-street, 4 June, 1879.

With reference to your letter of the 5th of May, and to the reply from this Department of the 20th May, I am directed by the Secretary of State for the Colonies to transmit to you, for your information, copies of the replies which he has received from the Lords Commissioners of the Treasury to the representations which you and the Agent General for New Zealand have made on behalf of the Governments of New South Wales and New Zealand, that the present arrangement respecting the division of postal receipts may continue in force, as regards the San Francisco service, until the termination in November, 1883, of the contract for that service by which New South Wales and New Zealand are now bound.

A similar letter has been addressed to the Agent General for New Zealand.

I am, &c.,
JOHN BRAMSTON.

The Treasury to The Colonial Office.

Sir, Colonial Office, Treasury Chambers, 27 May, 1879.

The Lords Commissioners of Her Majesty's Treasury have had before them your letter of the 20th instant, transmitting, with reference to previous correspondence, copy of a letter from the Agent General of New South Wales, requesting that the present arrangement respecting the division of postal receipts between the Australian Colonies and New Zealand may continue in force as regards the San Francisco service until the termination of the contract for that service in November, 1883.

I am commanded to acquaint you, for the information of Secretary Sir Michael Hicks-Beach, that my Lords see no reason to come to any other conclusion on this subject than that which was communicated to the Secretary of State in their letter of the 13th instant, with reference to a similar application from the Agent General of New Zealand.

I have, &c.,

H. SELWIN IBBETSON.

The Treasury to The Colonial Office.

Sir, Colonial Office, Treasury Chambers, 13 May, 1879.

The Lords Commissioners of Her Majesty's Treasury have had before them Mr. Bramston's letter of the 5th instant, transmitting copy of a letter from the Agent General for New Zealand, in reply to one in which he had been informed, in common with the other Agents General, of the arrangements which my Lords were prepared to agree to for the conveyance of the Australian mails after the 1st February next, wherein Sir Julius Vogel urges the claim of the Government of New Zealand and that of New South Wales to a continuance of the present arrangement, so far as relates to the carriage of mails by San Francisco, until the contract which those Governments have for the conveyance of such mails expires in November, 1883.

I am commanded to request that you will state to Secretary Sir Michael Hicks-Beach that the whole question as respects the postal arrangements with the Australian Colonies and New Zealand is so clearly set forth in the circular letter which the Secretary of State addressed to the Governor of those Colonies on the 17th January last, that my Lords have little to add thereto.

The Agent General for New Zealand is fully aware that when the arrangements to which he refers were made, they were expressly limited to a period of five years; and my Lords, in lately agreeing to extend such period to the 1st of February, 1880, the date when the present Imperial contract with the Peninsular and Oriental Steam Navigation Company comes to an end, cannot but feel that they have acted in a very liberal spirit towards the Colonies concerned.

The 1st February, 1880, on which date a new contract which the Imperial Post Office have entered into with the Peninsular and Oriental Company will come into operation, must therefore be considered a fresh starting point.

The presence in this country of Mr. Berry, the Premier of Victoria, afforded the opportunity of his having personal communication with me on the subject of the arrangement to be made for the division, after 1st February, 1880, between the Imperial and Colonial Post Offices, of the postage accruing on the correspondence with Victoria and other Colonies whose mails are carried *via* King George's Sound; and after some discussion with that gentleman I felt myself warranted, on the part of this Board, having reference to what I understand was the intention of the Victorian Government, to enter into a contract for the conveyance of mails once every fortnight, between Ceylon and Melbourne, and probably Sydney, in consenting to the present arrangement, under which the Victorian and other Australian mails are carried free of cost to the Colonies, between this Country and Ceylon (excepting of course the mails sent *via* Brindisi, on which the foreign transit rates will have to be paid as at present) being continued, on the understanding however that in lieu of the inland rate of one penny per half-ounce letter on the outward correspondence, which is all that the imperial Post Office now receives, two-pence, as an equivalent to the inland rate on the outward and homeward correspondence, should be retained on the outward correspondence, leaving four-pence on the outward and the whole of the postage on the homeward correspondence to accrue to the Colonies.

Having agreed to this arrangement with Mr. Berry, my Lords intimated to the Secretary of State that it would be equally applicable to Queensland, whose mails are now conveyed between this Country and Singapore, free of cost to the Colony, and New Zealand and New South Wales, the mails for which Colonies are now carried at a considerable expense to the Home Government between this Country and San Francisco.

My Lords cannot but think that the arrangement to which they have agreed is one by which the Colonies will be dealt with very liberally. The Home Government will merely retain that which may be considered equivalent to its inland postage, whilst the remainder of the postage on the outward and the whole of the postages on the homeward correspondence will accrue to the Colonies concerned.

My Lords have now only to request that you will state to Sir Michael Hicks-Beach that they are decidedly of opinion that they would not be warranted, on the part of the Home Government, in acceding to the request preferred by Sir Julius Vogel.

I am, &c.,

H. SELWIN IBBETSON.

MINUTE on Colonial Office letter of 4th June, and enclosures from the Treasury in regard to postal services.

THIS letter communicates what practically amounts to a decision on the part of Her Majesty's Government to retain twopence (2d.) upon every half-ounce letter out of the postal rates upon correspondence by the Ocean Steam Postal Services between Great Britain and the respective Colonies concerned. As this decision is pronounced by the Lords Commissioners of the Treasury, and appears to be considered by Her Majesty's Government liberal to the Colonies, it may be as well to remark at the outset that questions of liberality are matters of opinion, and that the Colonies would naturally prefer in this, as in other matters, that the mutual interests and relations between themselves and the Mother Country should be dealt with upon generally recognized and easily intelligible principles of right and justice than by reference to what may happen to be regarded as liberality by Her Majesty's advisers for the time being. 2.

2. The circumstances under which the negotiations in this matter appear to have been conducted, and the decision arrived at, are somewhat peculiar, while the decision itself involves grave considerations in connection with the Ocean Steam Postal Services generally and the system of subsidies by which they have been hitherto supported.

3. By the circular despatch from the Secretary of State to the Governors of Australian Colonies, dated January 17, a desire was expressed on behalf of Her Majesty's Government that "the Agent General" for each Colony concerned, or "some other person," should "be instructed and fully empowered to conduct the subsequent negotiations upon the subject" of Ocean Steam Postal arrangements "with Her Majesty's Government, and to conclude whatever agreement may be arrived at."

4. Pursuant to the desire so expressed, Sir Julius Vogel and myself, Agents General for New Zealand and New South Wales, were appointed to represent these Colonies respectively.

5. And of these appointments Her Majesty's Government were duly advised.

6. But in letters from the Colonial Office, dated 29th April last, Sir Julius Vogel and I were surprised by the information that after consultation with Mr. Graham Berry, and upon his assurance of having reason to believe that the Governments of the neighbouring Colonies would co-operate in a new arrangement with the P. and O. Company, which Mr. Berry thought might be made on advantageous terms, the decision of Her Majesty's Government now communicated to me was in contemplation.

7. In reply to the letter containing this information, Sir Julius Vogel and myself, acting separately, but otherwise in complete concert and understanding, addressed our respective protests, mine bearing date 5th May.

8. And now, without further intimation, or any other notice to, or consultation with either Sir Julius Vogel or myself, we are informed that the decision in the matter of Her Majesty's Government above adverted to has been consummated, apparently upon the advice of and in consultation with Mr. Graham Berry, who certainly had no manner of authority or right to act or speak in the matter on behalf of either the Governments of New Zealand or New South Wales.

9. The course taken appears the more extraordinary when considered in connection with the statement made by a Minister of the Crown (Lord John Manners), on June 12th, 1879, in the House of Commons, as reported in the *Times* of June 13th, 1879, to the effect that "the charge of the carriage of the Australian mails would be borne by the Mother Country under the postal arrangements, assisted by the Government of Australia" (*sic*), which seems to imply an expectation or intention on the part of Her Majesty's Government of obtaining from other Colonies some assurance of co-operation in the new arrangement.

10. With regard to the questions of subsidies and other arrangements for steam postal services, the apparent disposition of Her Majesty's Government to deal only with one Company, and to confine the assistance and co-operation of Great Britain to the Eastern route to India and China, is scarcely reconcilable with justice to other Companies and Colonies, and seems as if it must inevitably lead to the secession of most of the Australian and other Southern Colonies from such arrangements, and to their establishing separate routes for themselves independent of the Mother Country, possibly with more or less of irritation and disappointment on both sides. The success and growing predominance of other Companies, and the increased relative importance of the Colonies interested in other routes make it now difficult to justify these exclusive preferences. Supposing the system of subsidies to Companies necessary or desirable for the purpose in question, it is not by any means obvious why Her Majesty's Government should select either one Company or one route in order to keep up a postal or commercial connection with the rest of the Empire. And even admitting for the sake of argument that for financial reasons, which are the only probable ones, Great Britain cannot afford a wider or more liberal assistance or co-operation for the purpose, it still remains to be shown why the Peninsular and Oriental Company is entitled to the preference, or why the interests of India and China should prevail to the neglect of those of the Australian and neighbouring Colonies? If, in the interests of the Empire generally it be considered expedient that Great Britain and the Southern Colonies should co-operate in this matter, it would seem to follow that the said Colonies ought to be allowed a voice in the settlement of important details.

11. Whether in the interests of the Colony the Government of New South Wales determines to accept the proposal of Her Majesty's Government or to secede altogether from the arrangement with the Peninsular and Oriental Company for a postal service by way of Suez and Galle, it may be well to call attention to the relations between the Colony and the Pacific Mail Company in connection with the San Francisco route, which can scarcely be considered in every respect satisfactory. The most important part of their contract has been well performed by the Company so far as the delivery of mails is concerned; but what I allude to are the difficulties which have arisen in procuring the substitution of another surety in place of Mr. Macgregor, and also in the negotiations for and completion of the late alteration of the contract, which would seem to imply a possible disposition or willingness on the part of the Pacific Mail Company to withdraw from their engagements in the matter, provided it could be amicably arranged.

12. This supposition corresponds with information which has reached me otherwise.

13. The question may also be suggested for the consideration of the Government whether the time may not have arrived, or be near, when it might be possible to abandon altogether the system of subsidies for ocean postal services.

14. On these several points I do not venture nor am I called upon to pronounce an opinion.

WILLIAM FORSTER.

The Postmaster General.—H.P., 13/9/79. The Secretary to the General Post Office, B.C., 13 September, 1879.—C.W. Seen—S.S., 22/9/79.

No. 8.

Minute of the Postmaster General upon the decision of the Imperial Government respecting the future arrangements for the division of postage.

It would appear from letters from the Agents General for New South Wales and New Zealand, enclosing the correspondence which has taken place between themselves and the Imperial Government in reference to the future arrangements for the division of postage, that the matter may be considered at an end

so far as the Agents General are concerned. They appear to have put the case on behalf of the Colonies of New Zealand and New South Wales as strongly as possible, and to have done all in their power to procure a fair recognition of the claims of these Colonies to a continuance of the existing arrangements until the termination of the San Francisco contract. I think, however, that the proper time has now arrived for a remonstrance to be sent, through His Excellency the Governor, to the Secretary of State for the Colonies, against the action of the Imperial Government. The Colonies of New South Wales and New Zealand have very just ground for complaint that the Imperial Government should have decided, at an interview with the Honorable Graham Berry, of Victoria, upon retaining 2d. from February next, being one-third of the postage collected in England, in lieu of 1d. as at present, without affording the representatives, appointed at the express invitation of the Secretary of State, an opportunity of discussing the question on behalf of the other Colonies. I consider that the Colonies of New South Wales and New Zealand have a very just claim, for the reasons which have been already so strongly urged by the Agents General, and also in my former minute dated the 22nd April last, and which need not be repeated here, that the present arrangements for the division of postage on mail matter conveyed by the San Francisco route should be continued until the termination of the existing mail contract in 1883, and I suggest that the matter be again submitted to the Imperial Government, with an urgent request that it may yet be reconsidered.

SAUL SAMUEL,
30/9/79.

The Principal Under Secretary.—B.C., S.H.L., 30/9/79. Submitted—30/9/79. Letter to His Excellency, forwarding copy of this minute for transmission to the Secretary of State, sent 9 Oct., /79.—C.W. The Secretary to the Post Office, B. C., 14 Oct., 79.—C.W.

No. 9.

Telegram from Postmaster General, New Zealand, to Postmaster General, New South Wales.

7 Oct., 1879.

GOVERNOR will be asked to forward memorandum to Secretary of State, urging reconsideration postal question, and claiming that two Colonies have every right to expect continuance present payments until termination Frisco contract. Exception will be taken to the question having been closed without the Agents General having been heard after having been specially appointed to represent Colonies at request of Colonial Office.

This accords with what has been done here, and this message may be sent for the perusal of the Colonial Secretary.—S.S., 8/10/79. The Principal Under Secretary,—B.C., 8/10/79.—S.H.L.

No. 10.

The Secretary of State for the Colonies to The Governor of New South Wales.

My Lord,

Downing-street, 26 August, 1879.

I have the honor to transmit to you, for your information and for that of your Government, a copy of a letter from the Treasury, with its enclosures, respecting the contract which has been entered into for a period of eight years between the Peninsular and Oriental Company and the Government of Victoria, for a fortnightly mail service between Ceylon and Melbourne, calling at King George's Sound and Adelaide, to commence on the 1st February next.

I have, &c.,
M. E. HICKS-BEACH.

[Enclosure No. 1.]

The Treasury to The Colonial Office.

Sir,

Treasury Chambers, 18 August, 1879.

I am commanded by the Lords Commissioners of Her Majesty's Treasury to transmit to you, herewith, for the information of Secretary Sir M. E. Hicks-Beach, copies of a letter from the Postmaster General, dated the 14th instant, and of the letter from the Peninsular and Oriental Steam Navigation Company enclosed therein (with two of the printed enclosures) respecting the contract which has been concluded between that Company and the Government of Victoria for the conveyance of mails between Ceylon and Melbourne, calling at King George's Sound and Adelaide.

I am, &c.,
WILLIAM LAW.

[Enclosure

[Enclosure No. 2.]

The General Post Office to The Treasury.

My Lords,

General Post Office, 14 August, 1879.

I have received from the Peninsular and Oriental Steam Navigation Company a letter announcing that a contract has been concluded between that Company and the Government of Victoria for the conveyance of mails between Ceylon and Melbourne, calling at King George's Sound and Adelaide, by a fortnightly service, commencing on the 1st February next.

The directors have sent me some copies of a letter which they addressed, with their tender, to the Agent General for the Government of Victoria, and have expressed a wish that copies might be placed in your Lordship's hands and those of Her Majesty's Secretary of State for the Colonies.

I have the honor accordingly to send your Lordships a copy of the Company's letter, together with four copies of the enclosures referred to.

I have, &c.,

JOHN MANNERS.

[Enclosure No. 3.]

The Secretary, Peninsular and Oriental Steam Navigation Company, to The Secretary, General Post Office.

Sir,

Peninsular and Oriental Steam Navigation Company,

Offices 122, Leadenhall-street, London, 6 August, 1879.

I have the honor to acquaint you, for the information of the Postmaster General, that the directors have received a telegram from the Company's agent at Melbourne, to the effect that the Government of Victoria have signed a contract with this Company for the conveyance of mails between Ceylon and Melbourne, calling at King George's Sound and Adelaide, by a fortnightly service, commencing on the 1st February next. This contract is for a period of eight years, and as you are already doubtless aware, it is to be worked in connection with the new contract for the India and China mail services.

As soon as the directors receive the contract from Australia, they will hand you a copy of the same for the information of your department. Meantime, in view of the fact that there seems to have been an attempt made by some of the Company's opponents to misrepresent the position both of the Government and the Company, in reference to the Eastern mail contracts, the directors think it may perhaps be useful to you to be put in possession of the reasons upon which the Company based their tender to the Government of Victoria, as you are already fully acquainted with those which actuated them in tendering for the India and China services from the letter addressed to you which accompanied these tenders.

I am therefore desired to hand you the enclosed copy of a letter addressed by the directors to the Agent General of the Government of Victoria, on the occasion of transmitting their tender to that Government for the Australian mail service for which the contract has just been signed; and you will observe that the directors therein not only explain the grounds on which they made their proposals for a fortnightly service between Ceylon and Australia, but they also dealt with the whole question of mail communication with that country, about which, as you are aware, there has been from time to time much controversy.

The directors need scarcely remind you that great jealousy and diversity of opinion has existed between the different Colonies on this question of mail communication,—a state of things which has hitherto been prejudicial to the regular and periodic movement of correspondence, inasmuch as some of the routes employed have succeeded in dovetailing with each other, so as to effect exact fortnightly services. It was the desire of the directors to make such a proposal for a new service as would have the effect of harmonizing the postal interests of all the Australian Colonies; and they venture to believe that by the regular fortnightly service which is now contracted for, this object will certainly be effected, to the great advantage of commercial as well as general interests.

It will be perceived that in their desire to carry out this improvement, which they also consider necessary to the consolidation of the Company's business with Australia, the directors offered the Government such terms as could not be found financially satisfactory. But in doing this the directors simply offered the same conditions which they would have submitted to the Imperial Government had this service been combined with the India and China contract.

The directors would ask the favour of your transmitting a copy of this letter and its enclosure to the Treasury and the Colonial Office.

I have, &c.,

A. M. BETHUNE,

Secretary.

[Enclosure No. 4.]

The Secretary, P. & O. Steam Navigation Company, to The Agent General for Victoria.

Sir,

Peninsular and Oriental Steam Navigation Company, 122, Leadenhall-street, E.C.,

London, 12 February, 1879.

In compliance with the invitation of the Government of Victoria, the directors of this Company now request me to submit for consideration the accompanying tender to perform a fortnightly mail service between Colombo and Melbourne for a period of eight years, commencing on the 1st February, 1880, for the annual subsidy of £85,000.

2. In submitting this tender, the directors deem it advisable to explain their reasons for confining themselves to this single offer, instead of availing of the opportunity of putting forward alternative proposals, which your Government have notified their willingness to consider.

3. In the first place, the directors would state, that having regard only to the present position of the Company's business in connection with the Australian Colonies, it would be more to their interest simply to maintain the existing monthly mail service upon fair terms of remuneration than to aim at the immediate extension of the Company's operations.

But in looking forward to a contract of eight years' duration the directors must necessarily consider many future contingencies; and in doing so it appears to them sufficiently clear that the Company cannot hope to maintain their present revenue and prestige by means of a monthly communication only.

Under these circumstances, if their invitation to tender had been limited to that point, the directors would have found it extremely difficult to decide what would have been in the future a suitable subvention for the present monthly service. On the other hand, the directors may reasonably hope that, by converting the monthly into a fortnightly communication, the Company will command increased receipts, and it is under this expectation that the directors have framed the estimates upon which the tender now before you is based.

In the very low price which the directors ask for the new service, it will at once be seen that in their calculations they have credited your Government, by anticipation, with a very considerable share of the additional income, which they hope to realize by doubling the line.

In availing themselves therefore of the permission accorded by the conditions of tender to offer for a fortnightly service, the directors venture to believe that they are doing their utmost to afford the Colonies the most efficient and economical service which it is in their power to obtain.

4. In giving the preference to the route from Colombo instead of Aden, the directors have carefully considered the question of connecting the mail service directly with the latter port. They admit that geographically there is a saving of distance (though not important in proportion to the length of the voyage from Australia to England), but this saving would practically be only in favour of the run from Australia, while the advantage thus gained would be neutralized by the fact that the mails would not arrive any sooner at Brindisi than if they were carried *via* Ceylon.

As regards the outward service, the steamers leaving Aden during the south-west monsoon would shape a course so close to Ceylon that their calling at Colombo would then hardly amount to a deviation, while by lying at Aden some three weeks the steamers would certainly become covered with grass to such an extent as would considerably affect their rate of speed.

It

It must be remembered there is no dry dock at Aden in which to clean and repair steamers; and though the same may be said of Colombo, yet from that port the steamers can, if necessary, proceed to Bombay for the purpose of being docked, as you are aware they do at present, so that the mails may be delivered in Australia as quickly as possible.

5. The directors have therefore no hesitation in saying that Aden would not be so advantageous a termination as Colombo for the Australian mail service.

But, apart from the reasons for this opinion just expressed, they fear that the additional expense of such an arrangement would be a fatal disadvantage.

The directors estimate that the additional cost of the Aden as compared with the Colombo line, if carried out once a fortnight, would amount to something like £55,000 per annum, and the subsidy would therefore not only require to be increased by that amount, but by the sum which would be necessary to compensate for the loss of the present Indian traffic, as that traffic would certainly not be secured by the Aden route.

This would add an additional £25,000 to the cost of the Aden line.

Opinions seem to differ in Australia as to the advantage of a direct connection between that Country and so important a part of the Empire as India, but the directors feel confident that the intercourse arising between those Countries by means of a convenient postal communication must prove of the utmost value to both.

Moreover, should any contingency arise involving the Mother Country in war, the mail line would certainly prove of the highest political importance to both India and Australia.

In expressing their opinion on this subject, the directors do not imply that a connection with India should be allowed to overpower the advantage of the speediest communication with Great Britain, but they submit that the Colombo route possesses both advantages.

Equal celerity, infinitely greater cheapness, and the advantage of close contact with India can, in the opinion of the directors, be claimed for the Colombo line when compared with a service to Aden, and these advantages are not diminished when the comparison is made with the other route by which your Government has invited tenders.

6. The question of tendering for a through mail line between Great Britain and Australia is one to which the directors have devoted the greatest consideration for some time past, and it may be expected that they should explain the reasons which have induced them to prefer the development of their present lines to embarking upon any other scheme.

7. The first consideration weighing with the directors is the fact that your Government evidently desires to establish a sound fortnightly postal scheme, the demand for which is so constantly reiterated, both in England and the Colonies. They had therefore to apply themselves to the solution of this problem in the most successful and economical form.

To show how the through monthly service would, in their opinion, have jarred with the scheme of an efficient and economical fortnightly line, the directors can most easily explain their views by means of an hypothesis.

8. For this purpose, suppose that your Government, instead of advancing the somewhat exigent scheme of a through line for which tenders are now invited, had been content to put forward proposals for a line at the speed of 11 knots (which is the speed under the new contract for the Indian Mail Service), and the conditions had also permitted the steamers to load at other ports as well as at Melbourne, the question the directors put to themselves is, for what sum they would, with their experience, have undertaken such a service under all the stringent conditions of a mail contract.

In very general terms, the reply would be not less, and probably more, than they now ask for a fortnightly service. But in the event of tendering for such a line the directors would have had to complete the fortnightly service by tendering also a monthly line from Colombo.

Looking at the present tender for the fortnightly line from Colombo, it might then be supposed that the cost of half this work would be the half of £85,000, and thus that the through line would cost about £85,000, and the Colombo line £42,000, making altogether £127,000 for the complete work, or £42,000 more than they now ask for a service which, for postal purposes the directors contend would be even more efficient.

9. This assumption would not, however, be correct. The additional cost of the service arranged in two separate divisions would have to be computed at considerably more than £42,000 above the present tender. The reason of this is that these two services, being arranged on different bases, would be certain to clash with each other in their earning power, and, that being so, it would be necessary to protect the interest of the Colombo line by a higher rate of subsidy than would be required if the line were not interfered with by another mail service, which, even in the Company's hands, would still be a rival undertaking.

Such a sum as £42,000 for a monthly line between Colombo and Melbourne would, under these circumstances, be out of the question, although the directors are willing to give the fortnightly service in that ratio of payment when the whole work is carried out on the same basis. The cost of the alternative services from Southampton and Colombo would therefore be considerably more than £50,000 in excess of the tender for the fortnightly mail line now submitted.

But another important point to notice in connection with the plan of two services differently arranged is, that they would lack that exact comparative regularity which is the very essence of a satisfactory mail service. The directors need hardly lay stress on this point, because it is one to which your Government must feel keenly alive, viz., that if two mail services are laid along the same route and for the same object, there should not be a hair's-breadth of difference between them in their arrivals and departures.

But, if one-half of a fortnightly communication is carried out on one plan and the other half upon a different plan, the same absolutely successful working cannot be attained as when the two divisions are exact counterparts of each other, which will be the case in a fortnightly line between Colombo and Melbourne.

10. These observations will serve to explain why the directors have not thought it wise to complicate the simple and direct offer which they are now making, by any proposals of a more expensive, and, as they believe, less effectual kind. It must be admitted that it would be impossible to formulate any combination between two different services, which would compare in cheapness and regularity with the work which the directors offer to undertake.

This being explained on the theory of a through line, similar in speed to that which the Company have recently contracted to perform in their Indian Service, and with liberty to earn freight and passage money by loading at more than one Australian port, it will not be difficult for you to understand that the directors, as prudent men of business, and having a long experience of such matters, could not see their way to make a tender on the basis of an eight years contract, for a service of so exceptional a character as that proposed by the Victorian Government at the present moment, the speed of which is nearly 11½ knots, the sole loading port in Australia being that of Melbourne.

The directors cannot see that the large outlay which would be required to provide the vessels necessary for this service (which would be vessels of nearly 5,000 tons and enormous power), and the expense of working these vessels at a very high rate of speed, could be recouped by anything less than an extravagant subsidy and a long period of contract. If it be supposed that such a line would carry everything before it in the Australian trade (especially with only one port to load in), and would thus overwhelm competition so as to be able to work successfully and permanently under the stringent conditions of a mail contract, for a moderate rate of subsidy,—the directors venture entirely to dissent from such an opinion. There is certain to be plenty of competition in the Australian carrying trade, and such a mail line as this, limited to one Australian port for its commercial sustenance, would be opposed very successfully.

Such a line would essentially be an extravagant one, and the directors regret to say that among the travelling public cheapness seems to rank almost before quality. Hence there would be plenty of steamers running at a modest speed, and with two or three ports to engage freight and passengers in they could more easily make a profit without a subsidy.

Beyond all this, there would arise the necessity of providing the fortnightly mail communication, and the difficulty already stated of accurately dove-tailing two different systems of postal conveyance.

11. The directors have seen in the Australian newspapers that great stress is sometimes laid upon the advantage of what is called a through mail service, but they venture to assert that the service which they are now offering to perform is superior for that particular purpose to a through line.

What is required in carrying mails, is to approach as nearly as possible to absolute certainty and regularity, and this result is more likely to be secured, throughout a continuous period, when a voyage of 12,000 miles is divided in two or more sections, than when performed by one vessel.

The break in the Company's mail service at Ceylon places a fresh steamer on the line, and renders the work more efficient than if the Southampton steamer proceeded to Australia; while, as far as passengers are concerned, the directors believe that the transshipment at the new port, which is being made at Colombo, will not be an unpleasant change.

But the directors submit with confidence that their experience of the work which can be prudently obtained from mail steamers can hardly be questioned. It is in no spirit of boastfulness that they point to the fact that their steamers have run, during the last few years about 13,000,000 of miles, not only without serious accident, but scarcely delivering a mail late, so that the India, China, Japan, and Australian mails have been delivered at their respective destinations with almost the same regularity as the Dublin or Paris mails are delivered in London. This result is achieved not by chance, but by the most careful supervision, and particularly by dividing the work which each steamer has to perform. Less public attention than it deserves may have been bestowed on the Company's work, from the very certainty with which it has been performed, while the admirable passages and occasional mishaps of other steamers have probably given rise to more curiosity and higher expectations.

But, in looking at the working of any steam line, it will be well to have regard to the slow as well as the exceptional voyages, and to remember that casualties and irregularities are fatal to the commercial interests which a mail service is chiefly instituted to promote.

12. These observations will serve to explain the views of the directors of this Company on a question to which they have given much attention, and which your Government is now called on to decide.

That question really is the principal future mail route between Australia and Great Britain.

When the directors look back at the history of mail communication with Australia, and the money wasted in promoting postal services, comparatively valueless, *via* the Cape of Good Hope, by Panama, San Francisco, and even on the route now occupied by the Company, when the service was placed in the hands of the European and Australian Steam Company, they feel some satisfaction in believing that the Company's performances compare most favourably with these experiments.

They are, therefore, the more confident that the offer now submitted for the continuance and expansion of their work will be viewed as a liberal and enterprising effort on the part of the Company to meet the future postal requirements of the Colonies in the most reliable and satisfactory manner, more particularly as the amount of the tender seems to assure to the Government of Victoria an absolute profit on the postage which such a line must secure.

I have, &c.,

A. M. BETHUNE,
Secretary.

No. 11.

The Secretary of State for the Colonies to The Governor of New South Wales.

My Lord,

Downing-street, 8 September, 1879.

With reference to my despatch of the 4th June, respecting the decision of the Lords Commissioners of the Treasury in regard to the division of the postal receipts between this Country and the Australian Colonies, I have the honor to transmit to you the enclosed copies of a correspondence between this Department and the Agent General representing your Government upon this subject.

It will be perceived that the fullest attention has been paid to the representations made in the interests of the Colony under your government, although the decision of Her Majesty's Government, to grant much more favourable terms than those originally proposed, rendered unnecessary that conference with the Colonial representatives which I suggested in the first instance.

I have, &c.,

M. E. HICKS-BEACH.

[Enclosure No. 1.]

The Agent General for New South Wales to The Colonial Office.

Sir,

3, Westminster Chambers, Victoria-street, S.W., 25 July, 1879.

I have the honor to acknowledge the receipt of Mr. Bramston's letter of the 4th ultimo, and its enclosures, which communicates to me what practically amounts to a decision on the part of Her Majesty's Government to retain twopenno (2d.) upon every half-ounce letter out of the postal rates upon correspondence by the Ocean Steam Postal Services between Great Britain and the respective Colonies concerned. As this decision is pronounced by the Lords Commissioners of the Treasury, and appears to be considered by Her Majesty's Government liberal to the Colonies, it may be as well to remark at the outset that questions of liberality are matters of opinion, and that the Colonies would naturally prefer in this, as in other matters, that the mutual interests and relations between themselves and the Mother Country should be dealt with upon generally recognized and easily intelligible principles of right and justice, than by reference to what may happen to be regarded as liberality by Her Majesty's advisers for the time being.

The circumstances under which the negotiations in this matter appear to have been conducted and the decision arrived at are somewhat peculiar, while the decision itself involves grave considerations in connection with the Ocean Steam Postal Services generally, and the system of subsidies by which they have been hitherto supported.

By the circular despatch from the Secretary of State to the Governors of Australian Colonies, dated January 17th, a desire was expressed on behalf of Her Majesty's Government that "the Agent General" for each Colony concerned, or "some other person," should "be instructed and fully empowered to conduct the subsequent negotiations upon the subject" of ocean steam postal arrangements "with Her Majesty's Government, and to conclude whatever agreement may be arrived at."

Pursuant to the desire so expressed, Sir Julius Vogel and myself, Agents General for New Zealand and New South Wales, were appointed to represent these Colonies respectively; and of these appointments Her Majesty's Government were duly advised; but in letters from the Colonial Office, dated 29th April last, Sir Julius Vogel and I were surprised by the information that after consultation with Mr. Graham Berry, upon his assurance of having reason to believe that the Governments of the neighbouring Colonies would co-operate in a new arrangement with the P. and O. Company, which Mr. Berry thought might be made on advantageous terms, the decision of Her Majesty's Government now communicated to me was in contemplation.

In reply to the letter containing this information, Sir Julius Vogel and myself, acting separately, but otherwise in complete concert and understanding, addressed our respective protests, mine bearing date 5th May.

And now, without further intimation or any other notice to or consultation with either Sir Julius Vogel or myself, we are informed that the decision in the matter of Her Majesty's Government above adverted to has been consummated, apparently upon the advice of and in consultation with Mr. Graham Berry, who certainly had no manner of authority or right to act or speak in the matter on behalf of either the Governments of New Zealand or New South Wales.

The

The course taken appears the more extraordinary when considered in connection with the statement made by a Minister of the Crown (Lord John Manners), on June 12th, 1879, in the House of Commons, as reported in the "Times" of June 13th, 1879, to the effect that "the charge of the carriage of the Australian mails would be borne by the Mother Country under the postal arrangements, assisted by the Government of Australia" (*sic.*), which seems to imply an expectation or intention on the part of Her Majesty's Government of obtaining from the other Colonies some assurance of co-operation in the new arrangement.

With regard to the questions of subsidies and other arrangements for steam postal services, the apparent disposition of Her Majesty's Government to deal only with one Company, and to confine the assistance and co-operation of Great Britain to the eastern route to India and China, is scarcely reconcilable with justice to other Companies and Colonies, and seems as if it must inevitably lead to the secession of most of the Australian and other Southern Colonies from such arrangements, and to their establishing separate routes for themselves independent of the Mother Country, possibly with more or less of irritation and disappointment on both sides. The success and growing predominance of other Companies, and the increased relative importance of Colonies interested in other routes, make it now difficult to justify these exclusive preferences. Supposing the system of subsidies to Companies necessary or desirable for the purpose in question, it is not by any means obvious why Her Majesty's Government should select either one Company or one route in order to keep up a postal or commercial connection with the rest of the Empire. And even admitting, for the sake of argument, that for financial reasons—which are the only probable ones—Great Britain cannot afford a wider or more liberal assistance or co-operation for the purpose, it still remains to be shown why the Peninsular and Oriental Company is entitled to the preference, or why the interests of India and China should prevail, to the neglect of those of the Australian and neighbouring Colonies. If, in the interests of the Empire generally, it be considered expedient that Great Britain and the Southern Colonies should co-operate in this matter, it would seem to follow that the said Colonies ought to be allowed a voice in the settlement of important details.

I have, &c.,

WILLIAM FORSTER.

[Enclosure No. 2.]

The Colonial Office to The Agent General for New South Wales.

Sir,

Downing-street, 8 September, 1879.

The Secretary of State for the Colonies caused to be communicated to the Lords Commissioners of the Treasury, a copy of your letter of 25th July, respecting their Lordships' decision in regard to the division of the postal receipts between this Country and the Australasian Colonies.

I now enclose a copy of the reply received from the Treasury, together with the copy of a previous letter referred to therein, which was received in reply to a representation made by the Agent General for New Zealand upon the same subject.

I am also to enclose a copy of a letter addressed to Sir Julius Vogel, in which the last-mentioned Treasury letter was sent to him.

Sir Michael Hicks-Beach has communicated this correspondence to the Governor of New South Wales, and has called his attention to the fact that the fullest attention has been paid to the representations made in the interest of the Colony, although the decision of Her Majesty's Government to grant much more favourable terms than those originally proposed had rendered unnecessary that conference with the colonial representatives which had been suggested in the first instance.

I am, &c.,

R. H. MEADE.

[Enclosure No. 3.]

The Treasury to The Colonial Office.

Sir,

Treasury Chambers, 17 July, 1879.

In acknowledging the receipt of Mr. Bramston's letter of the 11th instant, enclosing copy of a letter from the Agent General of New Zealand relative to the decision arrived at by this Board as to the future division of postal receipts from correspondence passing between the Australian Colonies and this Country,—I am commanded by the Lords Commissioners of Her Majesty's Treasury to request that you will state to Secretary Sir Michael Hicks-Beach that my Lords regret that the arrangement in question does not appear to meet with Sir Julius Vogel's approval.

My Lords feel it incumbent on them to repeat that, on the termination of the present British Post Office contract with the Peninsular and Oriental Steam Navigation Company, the postal arrangements hitherto existing with the Australian Colonies and New Zealand would as a matter of course come to an end, and that they have at no time in any way implied that the arrangements at present in existence would be continued beyond that date. Such being the case, it was no doubt in contemplation that there should be discussion with representatives from the Colonies as referred to by Sir Julius Vogel, but the presence in this Country of the Premier of Victoria afforded an opportunity of learning at any rate the views of that important Colony. My Lords must here remark that the question of doubling the packet service between this Country and the Australian Colonies *via* King George's Sound has been one which the Board of Treasury have on different occasions expressed themselves desirous of seeing carried out; when, therefore, Mr. Berry, in discussing the matter with me, informed me that he had reason to believe that a fresh contract might be made by his Government with the Peninsular and Oriental Company for a fortnightly service, both to Melbourne and Sydney, touching at King George's Sound and South Australia, I consented, in that event, on the part of their Lordships, so far to modify their previous decision in regard to the division of postage, &c., as to agree to convey the mails as at present free of charge to the Colony, as far as Ceylon, and *vice versa*, on the condition that in lieu of the inland rate of 1d. on the outward correspondence the British Post Office should receive 2d. on such outward correspondence as an equivalent to the inland rate on the outward and homeward correspondence.

I am further to state that my Lords, on agreeing to this arrangement with Mr. Berry, thought it but fair to the other Australian Colonies and New Zealand that it should be made equally applicable to them, and they therefore requested the Secretary of State to inform the respective Governments; and I am to add, with reference to the concluding paragraph of Sir Julius Vogel's letter, that my Lords cannot but regret that he should think there was any intention on their part of not recognizing his position as the representative of his Government as respects the postal question.

I am, &c.,

H. SELWIN IBBETSON.

[Enclosure No. 4.]

Treasury to Colonial Office.

Sir,

Treasury Chambers, 26 August, 1879.

I am commanded by the Lords Commissioners of Her Majesty's Treasury to acknowledge the receipt of Mr. Meade's letter of the 18th instant, transmitting, with reference to previous correspondence respecting the postal arrangements agreed on by Her Majesty's Government in respect to the Australian Colonies, copy of a letter on the subject from the Agent General of New South Wales; and I am to request that you will call the attention of Secretary Sir Michael Hicks-Beach to the observations contained in their letter of the 17th ultimo on a somewhat similar representation from the Agent General of New Zealand, to which it appears to them unnecessary to make any addition.

I am, &c.,

WILLIAM LAW.

[Enclosure

[Enclosure No. 5.]

Colonial Office to The Agent General for New Zealand.

Sir,

Downing-street, 13 August, 1879.

The Secretary of State for the Colonies caused to be forwarded for the consideration of the Lords Commissioners of the Treasury a copy of your further letter of the 25th of June, in reference to the decision arrived at by their Lordships respecting the proposal that no change should be made as regards the division of postal receipts till the expiration of the mail contract for the conveyance of the mails to and from New Zealand and New South Wales and this country, which expires in 1883; and I am now directed to transmit to you for your information a copy of a letter which has been received at this department in reply.

Sir Michael Hicks-Beach desires me to observe, in connection with this correspondence, that as the decision of their Lordships as to the amount of the postal receipts to be retained by the Imperial Government is a very considerable modification of their original proposal, and was arrived at after full consideration of your letter of the 31st July, 1878, among other communications, he doubts whether any prolonged consideration of the question or further advocacy of the views of the Colonies concerned would have been of advantage. After Her Majesty's Government had consented to reduce by so large a proportion as one-half the amount of postage which it had proposed to retain, the general proposal for negotiations on this point with the Colonial Governments was, in Sir M. Hicks-Beach's opinion, no longer applicable to the circumstances; but the Lords Commissioners of the Treasury have not failed to consider the representations conveyed in the letters which you have from time to time addressed to this department.

I am, &c.,

R. G. W. HERBERT.

29 Aug., 1879.
8 Sept., 1879.

Sir,

3 Westminster Chambers, Victoria-street, S.W., 26 September, 1879.

With reference to the correspondence which has taken place relating to the postal question, I have the honor to transmit for your information copies of two letters received by me from the Colonial Office, dated as in the margin, which I have simply acknowledged without comment.

I have, &c.,

WILLIAM FORSTER.

[Enclosure 1.]

Mr. Meade to Mr. Forster.

Sir,

Colonial Office, Downing-street, 29 August, 1879.

I am directed by the Secretary of State for the Colonies to transmit to you, for your information, a copy of a letter from the Treasury with its enclosures, respecting the contract which has been entered into for a period of eight years between the Peninsular and Oriental Company and the Government of Victoria, for a fortnightly mail service between Ceylon and Melbourne, calling at King George's Sound and Adelaide, to commence on the 1st February, 1880.

Copies of these papers will be forwarded to the Governors of the Australian Colonies.

I am, &c.,

K. H. MEADE.

1879-80.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

POST AND TELEGRAPH OFFICES, BATHURST.

(LETTER FROM COLONIAL ARCHITECT, *RE* DRAINAGE, &c.)*Ordered by the Legislative Assembly to be printed, 24 February, 1880.*

The Colonial Architect to The Under Secretary for Public Works.

Department of Public Works, Colonial Architect's Office,

Sydney, 23rd February, 1880.

Sir,

In attention to the request contained in your letter of 21st instant, asking for information on the state of the drainage of the Post and Telegraph Offices at Bathurst,—

2. I do myself the honor to report that the drainage of these buildings is taken into Jordan Creek; the drains are trapped, but they are useless unless flushed by fresh water, which should be attended to by the occupants of the buildings.

3. There is no public system of sewerage at Bathurst, neither is there any water supply; consequently it is not possible to provide water-closets, and as it has been found by experience that officers occupying public buildings as quarters will not properly attend to earth-closets; it has been found necessary to use, as in this case, watertight cesspits, such as provided for by the Sydney Sewerage and Water Pollution Prevention Acts, by which the night-soil has necessarily to remain on the premises sometime. The position also of these offices necessitated enclosing the small yard space with walls, consequently any bad smells there may be do not escape as freely as they otherwise would.

4. The stable being in the same yard adds no doubt to the unpleasantness, although stable smells are not, I believe, considered unwholesome. Plans are however being prepared for erection of a new stable on the vacant ground at the rear of the Court-house, and when the work is carried out any nuisance in connection with the stable will be removed.

5. With the view of remedying the evil complained of, in regard to the smell from the cesspits a contract has been taken for filling them up, and converting the privies into earth-closets, and also for emptying the pans and keeping the closets in order.

6. With regard to the statement that the water had become contaminated by the cesspits, I would remark that as the water is in an impervious tank and the cesspits are also impervious, and being 10 feet apart, I cannot see how it is possible this can be the case. I may also add that my officer having visited the premises the week before last, no complaint of the kind was made.

7. Although the closets and stables are spoken of as being close to the house, I would state that for town buildings they are not at all unusually so, the direct distance between the back door of the house and the nearer of the two closet-doors being 30 feet, and I think it will be found that there are few houses in Sydney, say in Macquarie-street between the new Public Offices and the Free Library, that have the same amount of yard space or as great distance between the stables and the house.

8. The room occupied by the night clerk, in which the case of typhoid fever is said to have originated is 60 feet from the closets, and the only way by which foul air from the back yard could reach it would be by a tortuous passage of over 70 feet, passing through five doors and crossing two lobbies, which are generally open to the external air; the room is 14 feet by 12 feet and 12 feet high, lighted by two windows, opening on to the lane at the rear of the Town Hall, and having a large open space in front of them.

In conclusion I would mention the prevalent opinion that typhoid fever is capable of being conveyed from place to place, and that it by no means necessarily originates where it appears; it is quite possible also in a post office to receive contagion by means of a letter or packet, as it is impossible to take the precautions adopted when vessels are quarantined.

I have, &c.,

JAMES BARNET,
Colonial Architect.

1879.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

DUPLICATION OF TELEGRAPHIC COMMUNICATION
BETWEEN AUSTRALIA AND EUROPE.

(PROPOSAL MADE BY COLONEL FIELDING AND JACOB L. MONTEFIORE, ESQ.)

Ordered by the Legislative Assembly to be printed, 4 November, 1879.

RETURN (*in part*) to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 17 July, 1879, That there be laid upon the Table of this House,—

- “ (1.) Copies of all Correspondence, papers, or documents having reference to any proposal by or from Colonel Fielding or Mr. J. L. Montefiore or others, conveying or containing a proposal for the establishment of a new and separate Telegraph Line from England to Australia.
- “ (2.) Copies of any recommendation, proposal, or request for the increase of any salary of any Officer or Clerk in the Department of the Agent-General.
- “ (3.) Copies of any request or recommendation for increase of or additional grant for the expenses of the office of Agent-General.
- “ (4.) Copies of any letter, minute, or other document having reference to the question of application made by captains of emigrant ships to be allowed to carry their wives with them.”

(*Captain Onslow.*)

DUPLICATION OF TELEGRAPHIC COMMUNICATION BETWEEN AUSTRALIA
AND EUROPE.

No. 1.

The Agent-General to The Colonial Secretary.

Sir,

London, 21 December, 1877.

I have the honor to forward and submit for special notice the enclosed memorandum, dated December the 14th, embodying a new project for telegraphic communication between England and the Australian Colonies, which was placed in my hands on the 18th instant by the subscribers, the Hon. J. L. Montefiore and Colonel W. Fielding, for early transmission to the Government, and to be accompanied by whatever comments or suggestions I might consider it advisable to append; and, as I am given to understand that immediate steps will be taken to endeavour to obtain for the project the sanction of the Indian Government, or of the Imperial Government on behalf of that of India, I think it best, notwithstanding the short time at my disposal, to forward the memorandum by the outgoing mail, together with an expression of such opinions as occur to me after a necessarily brief and cursory consideration, reserving to myself the right or duty, as the case may be, of supplementing on some future occasion the contents of this letter.

The great public benefit which would arise from additional telegraphic communication between England and Australia, whether in the shape of duplication of existing lines or from entirely new lines, is too obvious to require to be insisted on; nor can it be denied that the existing line has failed to satisfy either public expectation or the public demand for telegraphic communication. I take it for granted that the Government, neither of New South Wales nor of any Australian Colony, would refuse to consider any reasonable proposition for supplying the necessity that accordingly exists; and whether the project now submitted is entitled to favourable consideration must of course depend upon its merits. The public interest and importance of the question are shown by what is generally known of the proceedings and results of the Conference recently held in Sydney, and by a joint memorandum addressed to the Governments of Victoria and New Zealand by their respective Agents-General in England, dated August 1, 1877, lately published in the *Victorian* and *New Zealand* newspapers. I have no official knowledge of either proceeding, and have only within the week become acquainted with the substance of the memorandum referred to from the *New Zealand Mail* of October 6th, 1877. This latter document, however, furnishes me—were it necessary—with a precedent for submitting the memorandum enclosed, and an opportunity for making comparison of the two projects.

It may appear extraordinary that, with reference to a project so deeply affecting the interests of the Colony of New South Wales, in which not only was her co-operation so obviously desirable, if not essential, but towards which she was expected, and doubtless would be invited, to contribute a considerable sum of money, the two Agents-General above alluded to should have deliberately avoided consulting me or in any way seeking to obtain my concurrence; and moreover, that in their preliminary memorandum the very name of the Colony of New South Wales should have been only once incidentally mentioned. I make no complaint, however, of these peculiarities, since I have no reason to believe that any discourtesy either to the Colony or to myself was intended; but I think I am entitled to infer from the course taken, that the co-operation of the Government of New South Wales was assumed as a matter of course, and in short inevitable, either upon the merits of the project or in view of the arguments by which it can be supported. I am accordingly the more surprised to find in the project of the two Agents-General certain questionable features, which incline me to the opinion that a general comparison of the two projects must be greatly to the advantage of the one herewith submitted.

The earlier project appears to have been conceived and is now recommended with an avowed and perhaps not quite unjustifiable bias in favour of the interests of the Eastern Extension Company, on behalf of which the two Agents-General claim that "the same consideration should be given * * * as that which the government of a city would give to existing water and gas works after it had determined that the city should in future take the charge of supplying the inhabitants with gas and water." The parallel is not very exact, for two (among other) reasons: First—the government of a city has it in its power to prevent competition, and to secure to itself whatever profits or advantages the previously established works had already conferred or were calculated to confer upon the city; and, secondly—the means of estimating such profits or advantages with absolute certainty are within reach of the government of a city in such a case; whereas it is obvious that the Australian Governments would have neither the security nor the means of estimating profits or advantages in dealing with the Eastern Extension Company. But admitting that the Company deserve consideration and even liberal treatment, the preliminary question of course arises, in any such transfer of works or recognition of services as is contemplated in the case of either gas or water works or telegraphic lines, whether the general public interests or the special public interests involved in the transaction may or may not be irreconcilable with such transfer or recognition, as, for instance, might be the case if an attempt were made to enlist the co-operation of a Government, and consequently involve the expenditure of public funds upon works open to objection for defective construction or injudicious choice of locality, or liable to become obsolete or comparatively unavailable by the progress of invention or variations of traffic and communication. This question applies with greater force to telegraphic lines, which, if open to any of these objections might prove to be an actual public injury, or at any rate rather injurious than beneficial, not only by reason of the waste of money and trouble involved, but because they might stand in the way of the establishment of better lines. Now the numerous disasters which have befallen the existing line between England and the Australian Colonies leave it at least very questionable whether upon the whole the public have reaped from its establishment benefits commensurate with its expenditure, while at any rate it is perfectly clear that these benefits have not been such or so ample as might have been reasonably expected; and I am not surprised to learn that in well-informed quarters

quarters a grave suspicion is entertained that the cable employed is not of such a character as can be safely relied upon for future and permanent use. The very appeal made by the two Agents-General on behalf of the Company shows how powerful may be the antagonism of vested interests to new projects. Now, as the earlier project proposes and involves constant connection with and dependence upon the existing line, it appears to me that in this very respect it compares unfavourably with the project herewith submitted. It is clear that in the matter of telegraphic communication the paramount question in the long run will be that of the route selected, including of course its practicability for securing the safety and permanence of the cable. Of the five routes foreshadowed in the earlier project, No. 1 does not require to be discussed, as the projectors themselves pronounce it impracticable, for the present at least. No. 2 may be passed over on similar grounds, although from what has been said above, the special reason given by the projectors for its abandonment will be perceived to tend, in my opinion, to a contrary conclusion. Routes 3, 4 and 5, of which the last is regarded with most favour by the projectors, stand much upon the same footing for purposes of comparison with the project herewith submitted. The comparison becomes still more favourable for the latter when we glance at possible causes of the comparative failure of the existing line, irrespective of any supposed organic defects of construction. The marine portions of this line are laid for the most part in shallow seas. Experience of ocean cables has established the conclusion that the injuries they receive from the attacks of marine animals and attrition of rocks and storms are chiefly confined to shallow waters. It will be seen that along any of the three routes selected by the earlier project the cables will be similarly laid. The new project tends to escape this danger, and offers a corresponding safety from interruption, and greater economy in expenditure, by the superior depth of water through which it is proposed that the line shall pass.

The two Agents-General remark that "it would be superfluous to dilate on the advantages of having the telegraph in Government hands," and I can myself testify from my own experience to the inconveniences constantly arising from delays and repetitions of messages and misconception of the meaning of words which appear unavoidable under the manipulation of foreign officials and foreign Governments. I may therefore amend the above observation by making it apply to British Governments; and in this respect again the new project compares favourably with that of the two Agents-General, inasmuch as while the former proposes to merely touch foreign territory at two points where the manipulation will be simple, the latter adopts the passage through Java, with all the difficulties of which we have already had experience. The obvious superiority of the new project in point of economy, so far at least as two such projects are capable of fair comparison in this respect in their initiatory stages, needs scarcely to be pointed out. But I am quite aware that details of outlay and annual expenditure, as well as of reduction of rates, must be always more or less matters of future arrangement, and are susceptible of large modifications. Again, the satisfactory character of any such arrangement must mainly depend upon the efficient working and judicious selection of the line. Both projects will of course require to be more fully explained before their merits and demerits can be properly understood or compared. It appears, however, another point in favour of the new project that the Government will have it so much in their power to control the management and regulate the rates; and considering the evident popular tendency to the acquisition or retention in the hands of Governments of railways and telegraphs, and other machinery for internal communication, some importance will probably be attached to the provision for the ultimate acquisition of the line by the Government at their own option. Some points in the memorandum herewith are perhaps a little ambiguous; for instance, it is not clear whether the reserve fund, of which the amount is not specified, is intended to be included in the annual working expenses, after due provision for which the receipts of the Government are to accrue.

I have been requested by the subscribers of the memorandum to treat the two concluding paragraphs as confidential, so far as may be practicable consistently with official and parliamentary relations. To the rest of the document they desire every possible publicity to be given.

I have, &c.,

WILLIAM FORSTER.

[Enclosure.]

Memorandum for Mr. W. Forster.

IT is now patent that the existing cable cannot be relied on for permanent telegraphic correspondence with the Australian Colonies, and that, whether from inherent defects, from being laid in shallow waters, or from both causes combined, it will always be liable to interruption.

The necessity of a duplicate cable has long been recognized, and the rapidly increasing importance of Australasia and its growing interests would appear to render such imperative.

The undersigned believe that a cheap and at the same time a good cable is not likely to be obtained from manufacturing contractors, who seek their own profit in the undertaking; but believe that by the competition which they can ensure, they would be able to secure a permanent telegraphic line of the very best quality, and a new course would be selected which, by laying the cable in deeper waters, would render it safe from the liability of interruption.

There would also in the line they propose be the great advantage that, by communicating direct with the Indian Government lines, the Colonies would be independent of the onerous charges which must ever be attendant upon forwarding messages along the wires or cables of private Companies, and that thus the existing tariff might be very considerably reduced.

The undersigned propose to lay down a line to leave Ceylon at Kirindi, near the light-house of the Great Brassas off the south-east coast of Ceylon, and after landing at the island Pulo Brasse off the northern point of Sumatra, where there is a light-house and a detachment of Dutch soldiers, reaches Java, at the western light-house in the Straits of Sunda. Leaving Java at its south-east corner, the cable would pass south of Sandalwood and the other islands to land on the southern shore of Timor not far from Koepang, and make its easternmost terminus in the Cape York Peninsula near the mouth of the Jardine River.

To carry out this scheme the undersigned desire to treat with the Government of New South Wales only. Not alone as the oldest and wealthiest of the Australian Colonies, but also because to bring the affair to a speedy conclusion, it appears to them more advisable to treat with a single Government, leaving it to the contracting Colony to make such sub-arrangements as it may deem advisable.

Experience having shown that the public will more readily become shareholders in telegraphic Companies upon being guaranteed a moderate minimum interest on their outlay, instead of receiving a bonus in the way of subsidy, although the latter may really prove more advantageous,—the undersigned propose, in lieu of asking for a subsidy, that the Government of New South Wales shall guarantee to them or to their assigns the sum of £48,000 per annum, payable as follows:—£24,000 on the day when the first message of not less than thirty words is telegraphed from London to Sydney along the cable now proposed to be laid, and a further sum of £24,000 on each and every succeeding six months, the entire net revenue earned from the cable

to

to be paid over to the Government of New South Wales (or to any person duly authorized to receive it on their behalf) up to and in extinction of the said guaranteed sum of £48,000, and all amounts earned by the cables over and above the said guaranteed sum shall at the end of each financial year be divided equally between the Government of New South Wales and the undersigned, their administrators or assigns.

The undersigned undertake that the Government of New South Wales shall have the option of becoming the absolute proprietors of the proposed cables at the end of fifty years from the date of the first payment, upon payment by them of a further sum of £10,000 annually during a period of ten consecutive years; or upon payment of an immediate sum of £90,000 at their option, such sums and the interest arising therefrom being invested from time to time in the names of trustees to be agreed with the Government of New South Wales. The right shall be secured to the undersigned or their assigns of sending telegraphic messages by the telegraph lines throughout the Colony of New South Wales at the same rate as that charged to the public generally in that Colony.

The right shall be secured equally of transmitting at half of the above tariff all messages in transit between places outside of the Australian Colonies and places in the Colonies of Western Australia, South Australia, Victoria, Tasmania, and New Zealand.

The Government of New South Wales shall undertake to construct, if necessary, and to keep in good working order up to its own boundaries, telegraphic communication with the several other Australian Colonies, and to make all the necessary arrangements with the Government of the Colony of Queensland to keep the tariff rates as low as possible for through cable messages in transit, and for the construction of land line if necessary to meet the cable.

In assenting to the above proposals, the following advantages would be secured to the Government of New South Wales:—

- 1st. The right of claiming one-half of the net earnings of the cables beyond the amount guaranteed, which guarantee it is anticipated with much confidence will be merely nominal, as it should be far exceeded by the net receipts.
- 2nd. A tariff considerably lower than the existing rate.*
- 3rd. The power of regulating such rate as the Government may deem advisable.
- 4th. The right of transmitting Government messages along the cables free of charge.
- 5th. The right of becoming ultimately the absolute proprietors of the cables on easy terms of payment.

It will have however to be borne in mind that if the Government of New South Wales should elect not to pay the £10,000 annually for ten consecutive years towards a fund for the purchase of the line, the undersigned or their assigns shall be at liberty to set aside an amount equal to £3,000 per annum towards a sinking fund in addition to any sum which may be considered necessary as a reserve fund for repairs, renewals, &c., and that these sums shall be deducted from the gross earnings before declaration of the amount of net earnings which may be available for dividend.

In conclusion the undersigned would point out,—

Firstly.—That the proposal now laid before the Government of New South Wales necessitates an early reply, as the changing position of European politics renders possible now that which may be quite impossible at a distant date; and secondly, that it is not advisable in the interests of the undersigned that this proposal should be made a subject of public discussion at all, should it be declined by the Government, nor until after the assent of the Government to the scheme, should it meet with their approval.

JACOB L. MONTEFIORE.
W. FIELDING, Colonel.

December 14, 1877.

Postmaster General, B.C., 5/2/78.—M.F. The Secretary to the Post Office, B.C., 5/2/78.—M.R.A. Submitted.—S.H.L., 6/2/78. Refer to Mr. Craeknell for his report.—J.F.B., 7/2/78.

No. 2.

The Secretary of State for the Colonies to The Governor of New South Wales

Sir,

Downing-street, 3 January, 1878.

I have the honor to transmit to you, for the consideration of your Government, in connection with other schemes for the improvement of telegraphic communication between Australasia and the rest of the world, a copy of a letter which has been addressed to me by Mr. Jacob Montefiore and Colonel W. Fielding, submitting proposals for a line of cable between Ceylon and Australia, by way of Java, Timor, and Torres Straits, and having its terminus in Cape York Peninsula.

I have, &c.,
CARNARVON.

[Enclosure.]

Mr. Montefiore and Colonel Fielding to The Earl of Carnarvon.

My Lord,

5, Great Winchester-street, E.C., London, 12 December, 1878.

Herewith we forward for your favourable consideration a proposal for the duplication of telegraphic communication between Ceylon and Australasia, and soliciting the views of your Lordship thereupon.

We have, &c.,
JACOB L. MONTEFIORE.
W. FIELDING, Colonel.

[Sub-enclosure.]

Proposal to the Right Honorable the Secretary of State for the Colonies.

It is now a notorious fact that the telegraphic communication has broken down between Europe and the Australasian Colonies so often that but little dependence can be placed on it from a commercial point of view.

The Colony of Ceylon is also practically, by reason of the high tariff, segregated from the telegraphic lines connecting with Singapore, Penang, China, Java, and the Australasian Colonies.

Such being the case, it is suggested that the Colonial Governments of Ceylon and Australasia, and the Government of India, should be urged by the Imperial Colonial Secretary to further to the utmost in their power any scheme having for its object the following:—

1. The establishment of a duplicate line of telegraph, connecting Europe with the Australasian Colonies by means of the telegraph lines under the control of the Government.
2. The establishment of such a line at such cost as will permit of a lower tariff of charges against the senders of telegrams and the sending of telegrams of an official character, at an even lower rate.
3. The connection by telegraphy of various important headlands used by the merchant shipping, mail steamers, and Imperial vessels navigating the eastern waters, so as to enable them to signal their passage to their owners in Europe, or wherever they may happen to be.
4. For these reasons, the line now suggested leaves Ceylon at Kirindi, near the light-house of the Great Brassas, off the south-east coast of Ceylon, and, after landing at the island (Pulo Brasse) off the northern point of Sumatra, where there is a light-house and a detachment of Dutch soldiers, reaches Java at the western light-house in the Straits of Sunda. Leaving Java at its south-east corner, the cable would pass south of Sundaalwood and the other islands to land on the southern shore of Timor, not far from Koepang, and make its easternmost terminus on the Cape York Peninsula, near the mouth of the Jardine River.
5. By such a line news of the passage through the Straits of Malacca, Sunda, and Torres, could be telegraphed to those interested in the movements of vessels, and orders to change their routes could thus be sent by telegram at points which must be passed both in their voyages outwards and homewards.
6. The traffic along the Government telegraph lines in Ceylon and India would receive a very great increase, and therefore become a source of income, where hitherto the profits have been swallowed up in the expenses.

It

It is therefore suggested:—

1. That the Secretary of State for India will recommend the scheme for the consideration of His Excellency the Viceroy's advisers.
2. That the Secretary of State for the Colonies will approve of the Governor of Ceylon being asked to sanction the laying down and keeping in repair of suitable land lines to connect Kirindi with the remaining lines of the telegraphic system of the Island of Ceylon.
3. That the Secretary of State for the Colonies will forward to His Excellency the Governor of New South Wales, for his favourable consideration and report, the above proposal, and give an active support to a work of such public utility to the Colonies of New South Wales, Queensland, and New Zealand, more especially since, by reason of their being further removed from the point of contact with Australia of the existing cable, their telegrams by the cable are now more expensive than those despatched from the other Australian Colonies.
4. By the proposed route telegrams could be sent so as to overtake the European mails at two points along their route, and by both lines, viz., at Batavia and Ceylon. At present, except by a circuitous route, and at a considerable expense, the mails *homeward* bound can only be overtaken by telegrams at Singapore and Batavia, whilst the cost of overtaking the mails *via* the Peninsular and Oriental Steamship Company's route at Galle or Aden, is, at the present tariff, almost prohibitive.

With a view to carry out the proposed scheme, the undersigned request the sanction of the Imperial Government to their applying to the Government of New South Wales in order to obtain from that Colony such financial support, in the form of a guarantee of an annual subsidy, as will enable the necessary capital to be raised on exceptionally easy terms.

The undersigned are impressed with the belief that a favourable arrangement is more likely to be arrived at speedily by treating with the Government of the Colony of New South Wales only, than by seeking to apportion to each of the Colonies interested the relative amounts which should be attributed to them as their individual share in the enterprise.

Moreover, the Colony of New South Wales is likely to obtain more advantages from the alteration from the present route than any other of the Australian Colonies, excepting Queensland.

The history of submarine telegraphy teaches us that in order to get a reasonably cheap tariff, or, in other words, to keep the capital expenses at a low figure, either of the cables should be, *ab initio*, the property of the Governments interested, or that they should offer to the contractors such financial aid by subsidies or guarantees as will enable the necessary capital to be raised by them without the heavy expenses usually incurred in the promotion and formation of a Telegraph Company.

Acting under these impressions, the undersigned propose that the Government of New South Wales should guarantee to them (the concessionaries), their executors, administrators, or assigns, the payment of—

1. £25,000, in London, on the day when the first message of not less than thirty words is telegraphed from London to Sydney *via* the telegraphic communication now proposed to be made.
2. A similar sum of £25,000, in London, on each and every other succeeding six months from the above-mentioned date.

The entire net revenue earned from the cables to be paid over to the Government of New South Wales (or to any person duly authorized by that Government to receive it on their behalf) up to and in extinction of the said guaranteed sum of £50,000 to be paid by it annually to the concessionaries, their executors, administrators, or assigns. All amounts earned by the cables over and above the said guaranteed sum of £50,000 shall be divided equally by the Government of New South Wales and the concessionaries at the end of each financial year.

3. The undersigned parties undertake that the Government of New South Wales shall have the option of becoming the absolute proprietors of the cables at the end of fifty years from the date of the first payment, upon payment of a further sum of £10,000 annually during a period of ten consecutive years; these sums, and the interest arising therefrom, being securely invested from time to time as the payments are made.
4. The right shall be secured to the concessionaries, their executors, administrators, and assigns, to send telegraphic messages by the telegraph lines throughout the Colony of New South Wales at the same tariff as that charged to the public generally in that Colony.
5. The right shall be secured equally of transmitting, at half the above tariff, all messages in transit between places outside of the Australian Colonies and places in the Colonies of Western Australia, South Australia, Tasmania, Victoria, and New Zealand.
6. The Government shall undertake to construct, if necessary, and to keep in good working order, at its expense and risk, up to its own boundaries, proper telegraphic communication between the Colonies of South Australia, Queensland, and Victoria, so that a complete telegraphic communication may exist at all times between the landing-place of the cable on the Cape York Peninsula and the towns of Adelaide and Melbourne.
7. The Government of New South Wales to make all necessary arrangements with the Government of the Colony of Queensland, with a view to keep the tariff rates as low as possible for through messages in transit for the cable.

In consideration of the above, the following advantages would be secured to the Government of New South Wales:—

1. The construction of a duplicate telegraphic communication with Europe of an infinitely superior quality to that now existing.
2. A tariff considerably lower than the present rate.
3. The power of regulating the tariff according to the requirements of the public.
4. The right of sending Government telegrams free from the Colony to Europe, and *vice versa*.
5. The right of claiming one-half of the net earnings of the cable beyond the annual subsidy guaranteed.
6. The right of becoming proprietors of the cable, &c., at the end of fifty years on very easy terms of payment.
7. The use of a cable laid in a track so chosen as to minimize the danger of interruption and to facilitate its repairs, as well as to afford to the mercantile community exceptional advantages for the signalling of vessels, and for communication with them at various important points on their voyages.

Memorandum.—It is confidently expected that the net receipts earned by the cables will exceed the amount of subsidy guaranteed annually, so that the guarantee will, in the opinion of the concessionaries, be absolutely nominal.

With reference to articles 2 and 3 (*vide* folios 6 and 7), it will have to be borne in mind that if the Government of New South Wales should elect not to pay the £10,000 annually for ten consecutive years towards a fund for the purchase of the line, the concessionaries shall be at liberty to set aside an amount equal to £3,000 per annum towards a sinking fund, in addition to any sum which may be considered mutually as a necessary contribution towards a reserve fund for repairs, renewals, and unforeseen disbursements, and that these sums shall be deducted from the gross earnings before a declaration of the amount of net earnings which may be available for dividend.

JACOB L. MONTEFIORE,

Late Chairman of Chamber of Commerce of Sydney, N.S.W.

W. FIELDING, Colonel.

No. 3.

Jacob L. Montefiore, Esq., to The Colonial Secretary.

Sir,

London, 3 January, 1878.

The Agent-General of the Colony has done me the honor to communicate to me the tenor of his advices to you by the last mail, referring to the proposition of Colonel Fielding and myself respecting a duplicate telegraphic cable to the Australian Colonies.

Mr. Forster has informed you that we should not object to as wide a notoriety as possible to our proposal, but I must entreat you to understand this as meaning, as explained in the last paragraph of the proposal, *after* it shall have received the assent of your Government. There are so many now who are seeking

seeking to pirate the ideas of others (as exemplified in the proposed International Exhibition of 1879) that there is every reason to fear that the scheme which we have had the honor to lay before you would not long remain our property were it laid before the general public.

I have, &c.,

JACOB L. MONTEFIORE.

Postmaster General, B.C., 20/2/78.—M.F. The Secretary to the Post Office, B.C., 21/2/78.—

No. 4.

The Agent-General to The Colonial Secretary.

Sir, London, 3, Westminster Chambers, Victoria-street, S.W., 16 January, 1878.

Adverting to my despatch of the 21st ultimo, submitting a memorandum from Mr. J. L. Montefiore and Colonel the Honorable W. Fielding, on the subject of telegraphic communication with Australia, I have the honor to enclose herewith a copy of a letter, dated 8th instant, which I addressed to the Agent-General for Queensland, to whom I communicated the memorandum in question, to be by him submitted to his Government, if he thought it desirable to do so.

I also enclose a copy of a memorandum on this subject which I have received from Sir Daniel Cooper, Bart., to whom, as a former representative of the Colony in telegraphic matters (in 1875), I thought it right to communicate the memorandum from Mr. Montefiore and Colonel Fielding. I have also sent a copy of Sir Daniel Cooper's memorandum to the Agent-General for Queensland (under cover of letter of 16th instant, of which a copy is enclosed), with a suggestion that it should accompany Mr. Montefiore's and Colonel Fielding's memorandum, in the event of that document being submitted by him to his Government.

I have, &c.,

WILLIAM FORSTER.

[Enclosure 1 to No. 4.]

The Agent-General for New South Wales to The Agent-General for Queensland.

Sir, London, 3, Westminster Chambers, S.W., 8 January, 1878.

I have the honor to enclose herewith a copy of a memorandum, dated 14th ultimo, which I have received from Mr. J. L. Montefiore and Colonel the Honorable W. Fielding, respecting telegraphic communication with Australia, together with a copy of my letter of the 21st ultimo, under cover of which I submitted the memorandum to the Chief Secretary of New South Wales; and I desire to express my hope that you may be able to concur in the action I have taken, by submitting the papers in question for the consideration of your Government.

I have, &c.,

WILLIAM FORSTER.

[Enclosure 2 to No. 4.]

The Agent-General for New South Wales to The Agent-General for Queensland.

Sir, London, 3, Westminster Chambers, S.W., 16 January, 1878.

Adverting to my letter to you of the 8th instant, respecting telegraphic communication with Australia, I have now the honor to enclose herewith a copy of a memorandum which I have received from Sir Daniel Cooper, Bart., who, as you are probably aware, represented New South Wales in the telegraph negotiations which took place in this country in 1875, and to whom I sent a copy of the recent memorandum on this subject from Mr. J. L. Montefiore and Colonel the Hon. W. Fielding.

I propose to send a copy of Sir Daniel Cooper's memorandum to my Government by the mail of the 18th instant, and should you think it desirable to submit to your Government the papers which were enclosed with my letter to you of the 8th instant, you may perhaps think it right that they should also include a copy of the memorandum, which I now enclose.

I have, &c.,

WILLIAM FORSTER.

[Enclosure 3 to No. 4.]

MEMORANDUM from Sir D. Cooper, on the proposition of Mr. J. L. Montefiore and Colonel Fielding to lay telegraph cables from S.E. coast of Ceylon to north end of Sumatra; there to Straits of Sunda; and from thence to the Norman or Erskine Rivers, in Gulf of Carpentaria, Queensland.

1. At present the Eastern Company have a telegraph line from Falmouth to Suez, and a duplicate line from Suez to Bombay, instead of duplicating the single line across the Bay of Bengal to Pulo Penang and Singapore. I believe they are now laying a cable from Rangoon to the Andaman Islands, and from thence to Pulo Penang.

2. The Indo-European Company send messages from England *via* Berlin, South Russia, and Persia, to Kurachee, where they join the Indian lines in the same way as the Eastern Company join at Bombay.

3. The Russian line, starting at London, goes to Berlin, then St. Petersburg, through Russia and Siberia to China, and in China joins the Eastern Company, which gives communication with Singapore.

4. Thus a person in London can communicate with Singapore:—

(a.) By the Eastern Company to Bombay, Madras, and Pulo Penang.

(b.) By the same Company to Bombay, and then over the Indian lines to Rangoon, and from there to the Andaman Islands and Pulo Penang.

(c.) By the Indo-European lines to Kurachee, then over the Indian lines to Rangoon, the Andaman Islands, and Pulo Penang.

(d.) By the Russian lines to Shanghai, and from there to Singapore, by the Eastern Company's line.

5. Mr. Montefiore and Colonel Fielding propose starting their cables from the light-house on the south-east coast of Ceylon, where the currents are very rapid, and the bottom is a coral formation—both bad things for a cable. The present line from Madras to Singapore used to terminate at Point de Galle, but was always breaking in consequence of the coral and rapid currents there.

6. The distance from Ceylon to north end of Sumatra is nearly 1,000 miles; from there to Straits of Sunda about the same distance; and from Straits of Sunda to the Norman River, or Erskine River, 2,500 miles.

7. A cable should never exceed 1,200 miles, as beyond that the cost of the cable increases as to the square of the distance. I therefore estimate—

The two first cables at £400,000 each	£ 800,000
And the long cable at	1,000,000

Cable.....	£1,800,000
------------	------------

And if money raised by debentures	£2,000,000
---	------------

8. These cables will have to contend with a coral formation the whole way, and the long cable will rest on a very bad bottom most of the way.

9. The expression that the proposed line will have great advantages in being connected by the Indo-European Company's lines is a misleading statement, as any one reading the above can see. I have no doubt that this proposal of Mr. Montefiore's and Colonel Fielding's originates with Messrs. Siemens Bros., as they put up the Indo-European lines, and receive a percentage on the work of the lines, and they are interested in inducing more messages to pass over that line, as well as getting profits out of the new cables.

Messrs. Siemens Bros. have been successful with land lines, but their cables have always been unsuccessful. The cables proposed by them in 1875, when myself, Sir Julius Vogel, and Mr. Daintree were negotiating the duplication of the lines from Singapore to Normanton, were reported on by Mr. Fleming Jenkins as "starved down to the lowest degree, and quite unfit for the work and place proposed."

10. When Mr. Montefiore and Colonel Fielding propose to do the work of the cables for £48,000 a year, they show that they do not understand the subject, as Siemens Bros., the Telegraph Construction and Maintenance Company, and the India-rubber and Gutta Percha Company in 1875 indicated £80,000 a year as the working expenses and maintenance cost of a shorter line.

To this sum must be added £80,000 as interest at 4 per cent. on £2,000,000, making £160,000, leaving a deficiency of £112,000.

To me the whole thing appears utterly absurd.

Postmaster General, B.C., 4/3/78.—M.F. The Secretary to the Post Office, B.C., 4/3/78.—M.R.A.
May be referred for the report of the Superintendent of Telegraphs.—J.F.B., 9/3/78.

No. 5.

The Agent-General to The Colonial Secretary.

Sir, London, 3, Westminster Chambers, Victoria-street, S.W., 23 January, 1878.

Adverting to my despatch of the 16th instant, respecting telegraphic communication with Australia, I have the honor to enclose herewith a memorandum which I have to-day received from Colonel the Hon. W. Fielding in reply to the memorandum from Sir Daniel Cooper, which was submitted to you under cover of my above quoted despatch, together with a minute thereon by myself.

I also enclose a copy of a letter which I have to-day addressed to the Agent-General for Queensland, communicating to him Colonel Fielding's memorandum.

I have, &c.,
WILLIAM FORSTER.

[Enclosure.]

REMARKS on the memorandum of Sir Daniel Cooper on the proposition of the Hon. J. L. Montefiore and Colonel Hon. William Fielding.

With respect to the latter part of paragraph 1, I now learn for the first time that there is any decided intention of laying a cable on the circuitous route of Rangoon, Andaman Islands, and Pulo Penang. I have made every inquiry, and cannot learn that this project is at all in an advanced state from a financial point of view. This would not, however, serve to duplicate the communications further than Penang.

2. The same observations may apply to 4 c.

3. The proposed line is not to start absolutely from the light-house but from Kirindi, a sheltered bay, where the bottom is favourable and the cable route sheltered from the effects of the currents in the monsoons by natural obstacles. For these reasons Point de Galle was specially avoided, and on account of the coral and rocky nature of the bottom.

4. The cable distance along the route chosen between Ceylon and Sumatra is 955 knots, inclusive of 15 per cent. slack, and the longest section, viz., between Timor and Cape York, is, including slack, only 1,235 knots.

5. I regret that Sir D. Cooper should, in the face of the success of the transatlantic cables, make the statement that cables should never exceed 1,200 miles in length. There is no reason why a cable should not exceed even 2,000 knots, provided a great speed, more than twelve words per minute, be not required.

6. Sir Daniel Cooper's estimates are so far beyond the mark that I deem it useless to attempt to analyze them. I can, however, quite believe that cable contractors and cable company promoters have induced him to credit the facts advanced by them, and upon which he has perhaps based his calculations. I shall be prepared when the time comes to justify my statements; but until the principle of the new proposal is accepted, I must decline to give my figures and calculations in detail.

I have this day verified at the Hydrographic Department of the Admiralty, that the course throughout the whole proposed lengths of the cables will never touch on coral or rock formations—the soundings giving either fine white clay, white clay, clay, soft brown mud, mud, or ooze; moreover, the soundings are so deep that even if a cable were laid on a coralline or rocky bottom it would suffer no injury from contact with it.

Neither Mr. Montefiore nor Colonel Fielding have any knowledge of or connection with Messrs. Siemens.

The latter gentlemen are only known professionally to Colonel Fielding from the fact that one of the brothers is President of the Society of Telegraph Engineers, of which Colonel Fielding is a member.

The reasoning of Sir D. Cooper throughout his memorandum shows so clearly that he is not only, from want of technical knowledge but also from false premises, misled, and that he has written his memorandum hastily and without sufficient consideration.

W. FIELDING,
Colonel.

I deem it right to forward this memo. in justice to the proposers of the new project, and in order that the Government may be acquainted with whatever is to be said on all sides.—W.F., 28/1/78.

Postmaster General, B.C., 14/3/78.—M.F. The Secretary to the Post Office, B.C., 14/3/78.—M.R.A.

May be referred to Mr. Cracknell.—J.F.B., 18/3/78.

No. 6.

Report of Superintendent of Telegraphs.

DUPLICATION of telegraphic communication with Australia, as proposed by Mr. J. L. Montefiore and Colonel Fielding.

I AM quite of the Agent-General's opinion, "that a great public benefit would arise from additional telegraphic communication between England and Australia;" and as the Colonies, combined, can secure this (no longer a luxury, but a necessity), we should at once contribute either to new lines entirely or the duplication of those now merely affording intermittent communication.

The joint memorandum referred to by Mr. Forster must have been the one recommending the purchase of the Port Darwin cable by Sir Julius Vogel and Mr. Michie, the cable to be worked on joint account, by the Colonies becoming responsible. How such astute colonists could have conceived such an idea with any prospect of its being ratified in Australia I cannot understand, and I do not believe that any such proposal was really submitted by them to the Eastern Extension Company.

I do not propose to discuss the points in reference to the quality and durability of the existing cables. These are matters we have no right to question, as the cables have been constructed and laid at the entire cost of the Company without Government subsidy or Colonial aid, and if they are faulty, or the routes ill-chosen, the Company alone have to bear the loss.

I cannot see how the Colonial Governments, if this offer be entertained, can control the management and regulate the rates. This is impossible, as the line is only a partial one, extending from Australia to India, from whence we must work into the Eastern Company's lines; the Indo-European lines being now worked on joint account, and the combined Company control the rates for Australian messages.

I will now deal with the memorandum submitted to Mr. Forster by Mr. Jacob Montefiore and Colonel Fielding. As regards the existing cables south of Singapore, every one must be satisfied that we should no longer depend on the present means of communication, and nothing further need be said in reference to that portion of the memorandum.

The allusion in paragraph 3, that the cable proposed by the subscribers would be of the very best quality, and by laying the cable in very deep waters would render it safe from the liability to interruption. The Port Darwin line runs over a tolerably even bottom, varying from 600 to 1,700 fathoms, and the shore ends are landed in very good positions, so there is nothing to fear as regards soundings over this section, and the proposed line from Banjoewangie to Singapore would, it is understood, be in a very good position as to bottom and depth of water.

As regards direct communication with India, there are now two direct lines from Penang to India, and there is no necessity for another, more particularly if Java, as proposed by this memorandum, is to form part of the scheme. Australia requires two distinct lines throughout, which would not be secured by this proposal, as they would still have to depend on the Eastern Company to forward their messages from India, as that and the Indo-European Company are now virtually one.

I do not think New South Wales should be called upon to treat with the promoters of this undertaking on its own responsibility as requested, as the only other Colony which would be likely to assist is Queensland, and the contributors, either on the basis of population, or from actual international business, would be very small.

The annual sum to be guaranteed to the Company, £48,000, I do not consider excessive for the length of line they propose to lay; but why New South Wales should be responsible for the whole of this amount, when they can insure perfect duplication and harmonious working the whole distance to Europe for an annual subsidy of £32,400, I cannot understand.

The projectors may safely promise to divide with the Government of New South Wales all sums received as revenue over and above the £48,000 referred to.

The undersigned undertake also, at the end of fifty (50) years, to make the New South Wales Government absolute proprietors of the cables by a payment of a further sum of £10,000 per annum for ten (10) years (making the annual payment £58,000), less the amount of receipts, or by the payment of an immediate sum of £90,000, such sums, and the interest arising therefrom, being invested from time to time in the names of trustees, to be agreed upon with the Government of New South Wales. This amount I presume is intended as a sinking fund for renewal when necessary, but if present experience is any guide the Government of New South Wales would have very little left at the end of fifty (50) years to become absolute proprietors of, so that the extra £10,000 per annum for ten (10) years or the £90,000 down, need not be very seriously entertained.

The advantages said to be secured to the Government of New South Wales if these proposals are entertained are as follows:—

1st. The right of claiming one-half of the net earnings of the cables beyond the amount guaranteed, which guarantee it is anticipated with much confidence will be merely nominal, as it should be far exceeded by the net receipts.

In my opinion the probable result has been very much overstated. The whole of the receipts at present over the Port Darwin Cable do not exceed £50,000 per annum, and if there should be competing lines they must necessarily become very much reduced.

2nd. A tariff very much less than the existing one.

This no doubt can be arranged, but not with due regard to the cable paying the smallest interest on the capital and its working expenses, and should the Company beyond India think proper to raise their charges to this Company there could be no reduction at all.

3rd. The power of regulating such a rate as the Government may deem advisable.

This will apply to the line only as far as India—the Eastern Company can alone regulate the rate beyond India.

4th. The right of transmitting Government messages along the cable free of charge.

There is no doubt this would be a great boon if it applied to the whole distance to Europe, instead of which all messages on the Government Service must be paid for beyond Ceylon.

5th. The right of ultimately becoming the absolute proprietors of the cables on easy terms of payment.

After fifty (50) years of wear and tear the cables of the Company would not, in my opinion, be worth the purchase. The average existence of a first-class cable does not, according to present experience, exceed fifteen (15) years, and I am afraid that this would not prove a very profitable investment.

After a very careful perusal of these papers I cannot recommend the Government to commit itself to the proposals of the gentlemen who have appended their names thereto, certainly not until more complete information has been submitted as to the nature and manufacture of the cables, and what arrangements are proposed for the transmission of the Australian business beyond India.

E. C. CRACKNELL, 18/3/78.

No. 7.

The Colonial Secretary, Queensland, to The Colonial Secretary, New South Wales.

Sir,

Colonial Secretary's Office, Brisbane, 16 March, 1878.

This Government has received from its Agent-General in London a copy of certain correspondence addressed to your Government by Mr. William Forster, in reference to a proposition made by Mr. Jacob Montefiore and Colonel William Fielding, offering to lay a telegraphic cable between British India and Australia on certain specified conditions.

This proposal has received my careful attention, and on the part of this Government I beg to assure you that the Government of New South Wales may depend upon our hearty support in giving effect to this proposition, or to such a modification as may be agreed on.

The

The primary condition which this Government considers should be kept in view is the establishment of direct communication with the telegraphic system of British India, in perfect freedom from any obligation to the Eastern Extension Cable Company.

In order to prevent a monopoly of intelligence dangerous to the public interests this is considered essential.

The question of route to be adopted, whether from Ceylon or elsewhere, should be an open one, dependent on the best professional opinion which can be obtained.

Subject to the arrangement of details, and to the assent of Parliament, of which I have no doubt, this Government is prepared to accept the general outline of the proposal made through Mr. Forster.

With a view therefore to bring the matter to an issue as soon as possible, I make the following offer on behalf of this Government:—

1st. That this Government will undertake to construct a telegraphic line connecting its present lines with the proposed point of Australian contact on the Jardine River; and

2ndly. That this Government will share in the responsibilities, profits, and losses of the contract, relatively with New South Wales, in proportion to our respective populations.

In the event of this offer being accepted, we shall require to be paid at the rate of 3d. per word for the transmission of all oceanic messages over the lines owned by this Government.

I have, &c.,

JOHN DOUGLAS.

Postmaster General.—M.F., B.C., 20/3/78. The Secretary to the Post Office, B.C., 20/3/78.—M.R.A. Forwarded to the Supt. of Telegraphs, B.C., 21/3/78.—S.H.L.

I have already reported very fully on this proposal (*vide* accompanying papers). There is an insuperable difficulty in the matter which does not appear to have struck Mr. Douglas, viz., that the lines from India to Europe are now worked on the joint purse system with the Eastern Company, which alone would be detrimental to Messrs. Montefiore and Fielding's scheme.—E. C. CRACKNELL, 22/3/78.

The Secretary to the Post Office, B.C.

No. 8.

Telegram from Colonial Secretary, Brisbane, to Colonial Secretary, Sydney.

8 April, 1878.

BE good enough to let me know by wire the decision of your Government in reference to Montefiore and Fielding's proposal. See my letter of the 16th ultimo. We have copies of all correspondence, including Fielding's reply to Cooper objections. If you decline proposal, I propose to negotiate direct on behalf of this Government. We trust, however, that you will not hesitate to accept in conjunction with us the basis of agreement proposed. Australian interests of paramount importance demand that there should be direct telegraphic communication with British India, independent of any control by the present Cable Company, or of any duplication under their auspices.

JOHN DOUGLAS,

Col. Secy.

Postmaster General, B.C., 8/4/78.—M.F. The Secretary to the Post Office, B.C., 8/4/78.—M.R.A.

I recommend that the following reply be sent by wire to the Col. Secretary, Queensland:—"We have your letter 16th ultimo, and also papers relative to Montefiore and Fielding's proposals, which we think cannot be entertained in view of fact that satisfactory duplication can be obtained for about thirty-two thousand as against their forty-eight thousand pounds."—J.F.B., 10/4/78. The Principal Under Secretary, B.C., 11/4/78.—S.H.L. Telegram 11th April, 1878, to Colonial Secretary of Queensland. The Secretary to the Post Office, B.C., 11th April, 1878.—M.R.A.

DUPLICATION OF THE TELEGRAPH CABLE BETWEEN AUSTRALASIA AND EUROPE.

No. 1.

The Agent General for New South Wales to The Colonial Secretary.

Sir,

3, Westminster Chambers, Victoria-street, S.W., 27 December, 1878.

I have the honor to enclose herewith the copy of the "Agreement for a duplicate cable to Australia," received from the Eastern Extension Australasian and China Telegraph Company, which was inadvertently omitted from the correspondence forwarded to you under cover of my letter of the 20th instant.

I have, &c.,

WILLIAM FORSTER.

[Enclosure.]

AGREEMENT FOR DUPLICATE CABLE TO AUSTRALIA.

1. That the Company shall, subject to the approval of the shareholders, contract with the Governments for the construction of a second cable from Singapore direct to Banjoewangie, thence direct to Port Darwin, for an annual subsidy of £32,400, and shall sign the contract and necessary conditions on or before 1st July, 1879.

2. That the subsidy shall be payable for a period of twenty years, subject to the provisions hereinafter contained.

3. That the Company shall, throughout the whole of the period during which the subsidy shall be payable, maintain in full working order (the act of God or the Queen's enemies excepted) such second cable, and also its present lines of cable between Singapore and Batavia, and Banjoewangie and Port Darwin.

4. That the Company shall, before such subsidy shall become payable, lay a second cable between Singapore and Penang, and thereafter in like manner maintain the same (the act of God or the Queen's enemies excepted), and its first lines of cable between Singapore and Penang, and Penang and Madras, Penang and Rangoon, in full working order.

5. That the Company shall, in consideration of the subsidy hereby agreed to be paid, and whilst that subsidy is payable, allow a rebate for Government messages hereinafter defined exchanged between England and Port Darwin, reducing their own proportion of the charge to the extent of 50 per cent. upon the present rates, and on Press messages exchanged between England and Port Darwin, as hereinafter defined, will reduce their own proportion of the charge to the extent of 75 per cent. upon the present rate, provided that such reductions shall not be extended to any Colony other than such as may contribute towards the subsidy.

6. That the Company shall complete and open for communication the second cable above-mentioned between Singapore and Port Darwin, and Singapore and Penang, within eight months from the date of the signing of the contract, provided always that the Company shall not be held liable for any loss or damage which the Colonies may sustain in consequence of delay in completing the said cables, in the event of such delay being caused by war, inevitable accident, or other contingency over which the Company can have no control.

7. That in the event of the Company completing and having the duplicate cables above mentioned open for communication within the period herein contracted for, the subsidy payable by the Governments shall commence and accrue four months after the signing of the contract, but the Company shall not be entitled to any payment under this clause until the said cables shall have been actually completed and are open for communication as above stated.

8. That the said subsidy shall be payable quarterly in London to the Company, in sterling money, free of all deductions.

9. That in the event of any total interruption in the communication between Port Darwin and Singapore, the subsidy shall cease *pro rata* for the period of such interruption, provided that if the interruption be caused by reason of war, or any such like cause, the subsidy shall continue, but the Company shall be bound to restore such communication at the request and cost of the Governments so soon as the war or other contingencies shall have terminated.

10. The Company shall at all times hereafter give priority in transmission through the said cables to all Government messages, Government messages being such as are exchanged between Her Majesty's Principal Secretary of State for the Colonies, and the various Agents-General on the one side, and the Governors or Chief Secretaries of the various Colonial Governments on the other, on matters relating to the administration of the Governments.

11. Press messages must be addressed to registered newspapers only, and shall be for *bonâ fide* publication, in full; they must be in English, in plain language and intelligible, no cypher, code, groups of figures or of letters, or words of concealed meaning to be used.

12. The Company shall not during the currency of the agreement increase its own proportion of the charges for messages exchanged between Port Darwin and London beyond the rates provided for herein—for Government messages per word, 2s. 10d.; for Press messages per word, 1s. 5d.; and for all other messages per word, 5s. 8d.

13. That the Government shall have the right during the currency of the subsidy aforesaid to purchase the Company's cable lines and other property between Singapore and Port Darwin on equitable terms, to be fixed, in case of difference, by arbitration, twelve months' previous notice to be given to the Company of the intention to exercise this right: Provided always that the right shall not be exercisable till the Company shall for five years have paid a dividend equal to 10 per cent. per annum, and shall for that period have passed 10 per cent. per annum to its reserve or other accumulated funds.

The Postmaster General.—H.P., 20/2/79. The Secretary to the Post Office, B.C., 20/2/79.—
M.R.A. Seen.—S.S., 24/2/79.

No. 2.

The Agent General for New South Wales to The Colonial Secretary.

Sir,

3, Westminster Chambers, Victoria-street, S.W., 14 February, 1879.

I have now the honor to forward herewith, in continuation of my letter of the 2nd ultimo, copy of further correspondence relative to the duplication of the telegraph line to Australia.

On my receipt of your letter of the 20th December last, instructing me to co-operate with the Agent General for Victoria in having the necessary agreement put into legal form and executed in London, I communicated with Sir Archibald Michie, and arranged with him that this matter be intrusted to our solicitors, Messrs. Mackrell and Company, by whom the Australian and New Zealand cable contract was drafted, and Messrs. Mackrell and Company were instructed accordingly on the 10th instant.

I have, &c.,

WILLIAM FORSTER.

[Enclosures.]

Mr. F. E. Hesse to Captain Jopp.

The Eastern Extension, Australasia and China Telegraph Company (Limited),
66, Old Broad-street, London, E.C., 4 February, 1879.

Dear Sir,

I have the pleasure to send you herewith, for the use of the Agent General, half a dozen printed copies of the signed agreement for the duplication of the Australian cable.

Yours, &c.,

F. E. HESSE,

Secretary.

Captain

Captain Jopp to Mr. F. E. Hesse.

Dear Sir,

I am directed by the Agent General to acknowledge the receipt of your letter of the 4th instant, sending him six printed copies of the signed agreement for the duplication of the Australian cable.

3, Westminster Chambers, S.W., 5 February, 1879.

Yours, &c.,

A. A. JOPP, Capt., R.E.

Secy. N. S. Wales Govt. Agency.

MEMORANDUM of agreement between the Governments of New South Wales and Victoria, on behalf of the Australasian Colonies and New Zealand (hereinafter called the Governments), on the one part, and the Eastern Extension, Australasia and China Telegraph Company, Limited (hereinafter called the Company), on the other :—

1. That the Company shall, subject to the approval of the shareholders, contract with the Governments for the construction of a second cable from Singapore direct to Banjoewangie, and thence direct to Port Darwin, for an annual subsidy of £32,400, and shall sign the contract and necessary conditions on or before 1st July, 1879.

2. That such subsidy shall be payable for a period of twenty years, subject to the provisions hereinafter contained.

3. That the company shall, throughout the whole of the period during which such subsidy shall be payable, maintain in full working order (the act of God or the Queen's enemies excepted), such second cable, and also its present lines of cable between Singapore and Batavia, and Banjoewangie and Port Darwin.

4. That the Company shall, before such subsidy shall become payable, lay a second cable between Singapore and Penang, and thereafter shall in like manner maintain the same (the act of God or the Queen's enemies excepted), and its present lines of cable between Singapore and Penang, and Penang and Madras, Penang and Rangoon, in full working order.

5. That the Company shall, in consideration of the subsidy herein agreed to be paid, and whilst that subsidy is payable, allow a rebate on Government messages hereinafter defined, exchanged between England and Port Darwin, reducing their own proportion of the charge to the extent of 50 per cent. upon the present rate, and on press messages exchanged between England and Port Darwin, as hereinafter defined, will reduce their own proportion of the charge to the extent of 75 per cent. upon the present rate, provided that such reduction shall not be extended to any Colony other than such as may contribute towards the subsidy.

6. That the Company shall complete and open for communication the second cables above-mentioned between Singapore and Port Darwin, and Singapore and Penang, within eight months from the date of the signing of the contract : Provided always that the Company shall not be held liable for any loss or damage which the Colonies may sustain in consequence of delay in completing the said cables, in the event of such delay being caused by war, inevitable accident, or other contingency over which the Company can have no control.

7. That in the event of the Company completing and having the duplicate cable above-mentioned open for communication within the period herein contracted for, the subsidy payable by the Government shall commence and accrue four months after the signing of the contract, but the Company shall not be entitled to any payment under this clause until the said cables shall have been actually completed and are open for communication as above stated.

8. That the said subsidy shall be payable quarterly in London to the Company, in sterling money, free of all deductions.

9. That in the event of any total interruption in the communication between Port Darwin and Singapore, the subsidy shall cease *pro rata* for the period of such interruption, provided that if the interruption be caused by reason of war, or any such like cause, the subsidy shall continue, but the Company shall be bound to restore such communication at the request and cost of the Governments.

10. The Company shall at all times hereafter give priority in transmission through the said cable to all Government messages, being such as are exchanged between Her Majesty's Principal Secretary of State for the Colonies, or the various Agents-General on the one hand and the Governors or Chief Secretaries of the various Colonial Governments on the other, on matters relating to the administration of the Governments.

11. Press messages must be addressed to registered newspapers only, and shall be for *bonâ fide* publication, in full ; they must be in English, in plain language and intelligible, no cypher, code, groups of figures or of letters, or words of concealed meaning, to be used.

12. The Company shall not during the currency of this agreement increase its own proportion of the charges for messages exchanged between Port Darwin and London beyond the rates provided for herein, viz. :—

For Government messages, per word 2s. 10d.

For press messages, per word 1s. 5d.

For all other messages, per word 5s. 8d.

13. That the Government shall have the right during the currency of the subsidy aforesaid to purchase the Company's cable lines and other property between Singapore and Port Darwin on equitable terms, to be fixed, in case of difference, by arbitration, twelve months previous notice to be given to the Company of the intention to exercise this right, provided always that the right shall not be exercisable till the Company shall for five years have paid a dividend equal to 10 per cent. per annum, or shall for that period have passed 10 per cent. per annum to its reserve or other accumulated fund.

New South Wales.
GRAHAM BERRY,
Victoria.

T. G. GLOVER,
Eastern Extension Australasia and China Telegraph Company.

The Hon. Graham Berry to Sir Archibald Michie.

Sir,

I now enclose copy of the agreement for the second submarine cable, and request that you will, in conjunction with Mr. Forster, take steps to have the contract prepared with the Company in conformity therewith.

There should I think be three counterparts, one for each of the Governments of New South Wales and Victoria, and one for the Company.

I have, &c.,

GRAHAM BERRY.

4th December,
1878.

Captain Jopp to Mr. F. E. Hesse.

Sir,

I am directed by the Agent General to inform you that he received, on the 8th instant, from the Chief Secretary of New South Wales, the papers in the matter of the cable duplication, and that they have been placed in the hands of our solicitors, with a view to the agreement being put into force for execution here.

I have, &c.,

A. A. JOPP, Capt., R.E.,

Secy. N. S. Wales Govt. Agency.

Mr. F. E. Hesse to Captain Jopp.

Sir,

I beg to acknowledge the receipt of your letter of the 10th instant, respecting the formal completion of the cable duplication agreement, and to state that this Company's solicitors, Messrs. Bischoff, Bompas, & Co., of 3, Great Winchester-street Buildings, E.C., have been instructed to co-operate with yours in carrying out the arrangement.

Yours, &c.,

F. E. HESSE,

Secretary.

No. 3.

The Agent General for New South Wales to The Colonial Secretary.

Sir, 3, Westminster Chambers, Victoria-street, S.W., 11 April, 1879.

I have the honor to inform you that on the 4th instant I sent you a telegram as follows:—
“Eastern Extension Company make difficulties; impression they will not sign before July. Solicitors advise our demands embody agreement.” The matter being still in the hands of our solicitors, I made no further communication to the Company. However, on 7th instant, I was honored with a visit from Sir James Anderson and Alderman Macarthur, M.P., both directors of the Company. They represented themselves as anxious to explain the position in which the Company stood in the matter. Sir James Anderson pointed out that the Company were not bound to sign the bond or contract in fulfilment of the printed memorandum agreed to in Melbourne before July 1st, which I at once admitted, and have never denied, but he added that the Company were unwilling to avail themselves of the privilege of delay thus accorded to them, without explaining their reasons, and endeavouring to obtain the assent of the respective Governments concerned to a certain modification of the terms. The Company were perfectly willing, he assured me, to sign and complete the contract immediately upon the basis of the negotiations entered into and arrangements made with our solicitors, but, inasmuch as the eight months allowed for the construction and laying down of the cable was to run from the completion of the contract, the Company desired completion, though immediate, to be yet subject to the understanding that the eight months should still run from July 1st. Sir James Anderson admitted that the Company had made a contract with the Imperial Governments for the laying down of a cable to the Cape, which would probably render it necessary to use the cable which had been intended for duplication of the cable in fulfilment of the contract made by the Company with the Governments of New South Wales and Victoria; but he had every reason to believe that another cable could be completed in time for the Australian line, with some slight extension of the time, and he had no doubt that under the circumstances, and considering the extraordinary emergency, the Colonial Governments in question would be prepared to make all allowances, and to submit to a certain delay, for which moreover the Company were prepared to offer another consideration in the shape of reduced rates, to commence from the signature of the contract. I said that if the interests of the whole British Empire were at stake it was not in my power, since I had no authority to consent to any modification of the contract, or to accept its completion by the Company, subject to any understanding inconsistent with its provisions; but I recommended immediate application to be made through the Imperial Government to the two Governments concerned, and offered to be the medium of communication, though I suggested that a direct communication from the Imperial Government to the Colonial Governments, as being less round-about, would be the most convenient method. I further expressed my opinion that if the Imperial Government were to set forth the difficulties in which they were placed, and the importance of the crisis involved by the late disastrous occurrences at the Cape, the Colonial Governments would cordially respond to such an appeal, and agree to meet in any reasonable way the wishes and apparent necessities of the Imperial Government; but as regarded the concession of letting the reduced rates run from the execution of the contract, I stated that I had been given to understand that this concession, though not embodied in the agreement, had been personally promised to Mr. G. Berry, and the other co-signatories to the agreement by the agents or representatives of the Company in Melbourne. Sir James Anderson seemed to think that such an application as I suggested should have and had been already made by the Imperial Government, and on my informing him that such was not the case expressed his surprise, as he had understood from the Right Honorable the Secretary of State for the Colonies, that the Imperial Government had intended to make such an application. The result of the interview was that the two directors arranged that the Company should communicate with the two Colonial Governments, and accordingly undertook to send me the substance of a telegram which they wished me to forward immediately to Sydney, and which, as well as the reply, they promised to transmit free of charge.

I have, &c.,

WILLIAM FORSTER.

Submitted, 26/5/79.

No. 4.

The Agent General for New South Wales to The Colonial Secretary.

Sir, 3, Westminster Chambers, Victoria-street, S.W., 11 April, 1879.

In continuation of my letter by this mail, in regard to the contract for the duplication of the telegraph cable, I have the honor to inform you that yesterday I received from the Eastern Telegraph Company copies of letters from the Treasury to John Pender, Esq., M.P., of 26th March last, and of the Eastern Extension Company to the Secretary of State for the Colonies of the 2nd instant, both of which I enclose for your information.

In accordance with the arrangement made between Sir J. Anderson, Alderman Macarthur, and myself, on the 7th instant, I forwarded yesterday to the Company a telegram (copy herewith), to be transmitted to you. I regret to learn by a subsequent communication from the Company (copy herewith) that they took upon themselves to add certain words to the telegram, as will be seen by comparison of the telegram actually sent with the copy I forwarded to them for transmission. Though the words added are of no great importance, and such, probably, as would have obtained the assent of Sir Archibald Michie and myself had they been submitted to us beforehand, I cannot but regard this proceeding on the part of the Company as an extreme liberty, and as little calculated to impress those with whom they transact business with any great confidence in their good faith or exact observance of the obligations they incur. My opinion, it will be seen, is shared by Sir Archibald Michie, as is shown by his minute appended to my own minute upon the letter in question, of both of which copies are appended.

I have, &c.,

WILLIAM FORSTER.

[Enclosures.]

[Enclosures.]

The Secretary, Eastern Telegraph Company, to The Agent General.

Dear Sir,

66, Old Broad-street, London, E.C., 8 April, 1879.

I am directed by Sir James Anderson to forward you copies of the letters he promised to send you yesterday, viz., one from the Treasury, dated 26th ultimo, and Sir James' letter to the Colonial Office of April 2nd.

He also desires me to say that we shall be happy to forward as a free service message any telegram (no matter how long) that you may wish to send to Australia, and the reply shall also be franked.

Yours, &c.,

F. E. HESSE, Secy.

H. S. Ibbetson, Esq., to J. Pender, Esq., M.P.

Sir,

Treasury Chambers, 26 March, 1879.

The Lords Commissioners of Her Majesty's Treasury have had before them your letter of the 24th instant, representing, with reference to the proposed establishment of telegraph communication between Aden and Natal, that the Eastern Telegraph and Telegraph Construction and Maintenance Companies are prepared to accept an Imperial subsidy of £35,000 in lieu of £37,500, with a participation in profits, after certain receipts, as proposed in your previous communication.

You state, however, with regard to the question of time to be allowed for repairs before the subsidy should cease, that the Companies cannot accept a lesser time than six months. Upon this point I am desired to observe that although my Lords cannot accede to this proposal, they are prepared so far to modify their previous condition as to agree to six months being allowed for repairs in the event of their being required on that portion of the line of cable to be laid between Aden and Zanzibar; three months, as proposed by them, to be still the period allowed for making repairs on the other sections of the line; but in both cases the periods may be extended, on the Government being satisfied that more time is required.

My Lords see no reason to object to the proposed tariff for messages between this country, the South African Colonies, and the several stations on the line, the charges for Government messages (both Imperial and Colonial) being, as already agreed, half those made to the general public.

My Lords likewise agree to the rate of speed—14 words per minute—at which it is intended that the cables shall work, and also to the proposed arrangements for keeping the stations on the line open from morning until night, and throughout the night when there is any traffic to forward.

I am further to state that my Lords will urge the Secretary of State to induce the Crown Agents to make, on the part of the Colonies interested, as far as they are able to do so, arrangements with the Companies analogous to those to which my Lords have given sanction.

In conclusion, my Lords direct me to add that they will request Sir Michael Hicks-Beach to communicate with the Governments of Victoria and New South Wales, with the view of obtaining their concurrence in postponing the duplication of the Australian cable for a short period.

I am, &c.,

H. SELWIN IBBETSON.

Sir J. Anderson to Sir Michael Hicks-Beach.

The Eastern Extension, Australasia and China Telegraph Company (Limited),

66, Old Broad-street, E.C., London, 2 April, 1879.

Sir,

With reference to the conversation which Lord Tweeddale had with you this morning on the subject of the cable to be laid for the Australian Colonies, it has been well understood in Australia that the Company were making the cable, and were prepared to lay it considerably within the contract time.

In newspaper reports which have gone out it has been stated that 2,000 miles of the cable intended for the Australian Colonies were being diverted, in order to be laid to the Cape of Good Hope.

We learn that this announcement has occasioned some annoyance to the representatives of the Colonies, who feel that their convenience has been sacrificed, without their sanction being elicited.

Our contract with the Australian Colonies stipulates that the agreement shall be signed on or before 1st July next, and that the cable shall be laid in eight months from the date of signing the contract, which has not yet been signed. All the details are, however, agreed.

What we ask is that the eight months for laying the cable shall count from the 1st July, instead of from the date of signing the contract, and that one or two weeks further grace may be given if such delay prove unavoidable.

In consideration of this we agree, on behalf of the Eastern Extension Telegraph Company, that the half rates for Government telegrams and quarter rates for Press messages over that system shall commence from the date of signing the contract, instead of from the date of the subsidies commencing to be paid.

I am, &c.,

JAMES ANDERSON,
Managing Director.

Mr. S. Yardley to Mr. F. E. Hesse.

Sir,

3, Westminster Chambers, S.W., 9 April, 1879.

Referring to the last paragraph of your letter of the 8th instant, I am directed by Mr. Forster to say that, in accordance therewith, he will thank you to be so good as to send the within message to the Honorable the Chief Secretary, Sydney.

Sir Archibald Michie, the Agent General for Victoria, has agreed to the terms of the message.

Yours, &c.,

S. YARDLEY,
Secretary, New South Wales Government Agency.

"Bond, in pursuance of agreement for duplication of cable, ready for signature. Company willing to sign immediately, subject to understanding that eight months, allowed for completion of cable, shall run from July 1, instead of from date of bond, and provided also that at most three weeks shall be added to the eight months, if required, and in consideration Company offer to make the reduced tariff for Government and for Press messages take effect immediately upon signature of bond. Cable, already partly prepared for Australian line, now required for Cape. Imperial Government intend appealing to Colonial Governments to make concession accordingly, to which, perhaps, in the present emergency, there may be no objection. Shall Agents General accept proposal? Will it vitiate agreement? Reply franked."

The Eastern Extension, Australasia and China Telegraph Company (Limited),

66, Old Broad-street, London, E.C., 9 April, 1879.

Sir,

I beg to acknowledge receipt of your favour of this date, and to inform you that the telegram enclosed therein has been despatched to the Hon. the Chief Secretary, Sydney, as requested.

At Sir James Anderson's request I have added a few words to the message (as shown in red ink* on the enclosed copy). * Shown in to convey the arrangement made by him with the Honorable Mr. Berry.

Yours, &c.,

F. E. HESSE,

Secretary.

"Bond, in pursuance of agreement for duplication of cable, ready for signature. Company willing to sign immediately, subject to understanding that eight months, allowed for completion of cable, shall run from July 1, instead of from date of bond, and provided also that at most three weeks shall be added to the eight months, if required, and in consideration Company offer to make the reduced tariff for Government and for Press messages take effect immediately upon signature of bond, or from this date if bond ultimately signed. Cable, already partly prepared for Australian line, now required for Cape. Imperial Government intend appealing to Colonial Governments to make concession accordingly, to which, perhaps, in the present emergency, there may be no objection. Shall Agents General accept proposal? Will it vitiate agreement? Reply franked."

Minuto

Minute by Mr. W. Forster.

As the Company have thought proper to alter the telegram without my consent, I disclaim it altogether, and shall write to the Government to that effect, and in future shall take care to avoid any further negotiations of the sort with the Company.—W.F., 10/4/79.

Minute by Sir Archibald Michie.

I CONCUR entirely in the above observations of Mr. Forster, as the Company had no right to alter our telegram by a single word.—A.M., 10/4/79.

Mr. S. Yardley to Mr. F. E. Hesse.

9/4/79.
10/4/79.

Sir,

I have the honor, by direction of the Agent General for New South Wales, to acknowledge the receipt of your letter of yesterday's date, stating that the joint telegram of the Agent General for Victoria and Mr. Forster had been sent to the Honorable the Chief Secretary, Sydney, but with an addition, to convey the nature of the arrangement made between Sir James Anderson and Mr. Graham Berry.

I am to forward for your information copies of minutes on your letter, made respectively by Sir Archibald Michie and Mr. Forster.

3, Westminster Chambers, S.W., 10 April, 1879.
I have, &c.,
S. YARDLEY,
Secretary, New South Wales Government Agency.

Submitted, 26/5/79. See also 79/3,951, herewith. The Postmaster General.—H.P., 9/7/79.
The Secretary to the Post Office, B.C., 9 July, /79.—C.W.

No. 5.

The Secretary of State for the Colonies to The Governor of New South Wales.

Sir,

Downing-street, 25 April, 1879.

I have the honor to acknowledge the receipt of your telegram of the 15th April, conveying the assent of your Government to the terms proposed in my telegram of 7th April, by which the cable which was about to be used for the duplication of the Australian telegraph service could be made available for the immediate construction of a cable to South Africa.

The Government of New Zealand and Mr. Graham Berry, on behalf of the Government of Victoria, have also assented to the proposed arrangement, and I enclose, for the information of your Government, copy of the correspondence which has passed on the subject.

I also enclose a copy of a letter from the Eastern Extension Australasia and China Telegraph Company on which my telegram of the 7th April was founded, together with a copy of the reply, in which I have communicated to the Company the decisions of the Australasian Governments in the matter, and I have to request that you will convey to your Government the thanks of Her Majesty's Government for their ready acquiescence in the arrangement proposed by the Company.

I have, &c.,
M. E. HICKS-BEACH.

[Enclosures.]

TELEGRAM from the Governor of New Zealand to The Secretary of State for the Colonies.

TENTH April—your message of 7th April received—this Government consents to duplicate Australian cable being used for South Africa under terms named.

HERCULES ROBINSON.

Sir James Anderson to Sir Michael Hicks-Beach.

Sir,

The Eastern Extension, Australasia and China Telegraph Company,
66, Old Broad-street, London, E.C., 2 April, 1879.

With reference to the conversation which Lord Tweeddale had with you this morning on the subject of the cable to be laid for the Australian Colonies, it has been well understood in Australia that the Company were making the cable and were prepared to lay it considerably within the contract time.

In the newspaper reports which have gone out it has been stated that 2,000 miles of the cable intended for the Australian Colonies were being diverted in order to be laid to the Cape of Good Hope.

We learn that this announcement has occasioned some annoyance to the representatives of the Colonies, who feel that their convenience has been sacrificed without their sanction being solicited.

Our agreement with the Australian Colonies stipulates that the contract shall be signed on or before 1st July next, and that the cable shall be laid in eight months from the date of signing the contract, which has not yet been signed; all the details are however agreed.

What we ask is that the eight months for laying the cable shall count from the 1st July instead of from the date of signing the contract, and that one or two weeks further grace may be given if such delay prove unavoidable.

In consideration of this we agree, on behalf of the Eastern Extension Telegraph Company, that the half rates for Government telegrams and quarter rates for Press messages over that system shall commence from the date of signing the contract instead of from the date of the subsidies commencing to be paid.

I am, &c.,
JAMES ANDERSON,
Director.

The Colonial Office to The Hon. Graham Berry.

Sir,

Downing-street, 7 April, 1879.

In the course of the negotiations which have recently taken place between Her Majesty's Government and Mr. Pender, acting on behalf of the Eastern Extension Australasia and China Telegraph Company, for the laying of a submarine cable between Aden and Natal, Mr. Pender solicited the good offices of Her Majesty's Government in obtaining the concession of the Governments of Victoria and New South Wales to the postponement of the duplication of the Australian cable for a short period, and I am now directed by Sir Michael Hicks-Beach to inclose for your information a copy of a letter which Sir J. Anderson has addressed to this Department on the subject.

Her Majesty's Government would be much obliged if the Government of Victoria would assist them by making such arrangements with the Eastern Telegraph Company as would permit of the use for the South African Line of the cable now ready; and he trusts that you may feel yourself able to consent on the part of your Government to what is proposed.

I am to add that a similar request has been addressed by telegraph to the Governments of New South Wales and New Zealand.

I am, &c.,
R. G. W. HERBERT.
Mr.

7

Mr. Graham Berry to The Colonial Office.

Sir, I am directed by the Hon. Graham Berry to acknowledge the receipt of your letter of the 7th instant, and of the enclosure from Sir James Anderson, Director of the Eastern Extension Australasia and China Telegraph Company; and to inform you that the Government of Victoria willingly consent to the proposed extension of time within which the second cable is to be laid to Port Darwin; and it is with satisfaction they are thus able to co-operate in assisting to secure safety and peace for that portion of Her Majesty's dominions at present in greatest need of such help.

I have, &c.,
H. H. HAYTER.

The Colonial Office to The Hon. Graham Berry.

Sir, I am directed by the Secretary of State for the Colonies to acknowledge the receipt of your letter of the 9th instant, and to convey to you the thanks of Her Majesty's Government for the ready acquiescence which you have expressed on behalf of the Government of Victoria in the proposed extension of the time to be allowed to the Eastern Extension Australasia and China Telegraph Company for the laying of the duplicate Australian cable.

Sir Michael Hicks-Beach desires me at the same time to enclose for your information copies of the replies which have been received by telegraph from the Governments of New South Wales and New Zealand; and I am to say that copies of these telegrams and of your letter have been communicated to the Company in reply to their letter of the 2nd instant.

I am, &c.,
R. G. W. HERBERT.

The Colonial Office to The Eastern E. & A. and C. T. Co. (Limited).

Sir, In reply to your letter of the 2nd instant, I am directed by the Secretary of State for the Colonies to transmit to you, for the information of the Eastern Extension Australasia and China Telegraph Company (Limited), copy of the correspondence which has passed by telegraph with the Governments of New South Wales and New Zealand, and with Mr. Graham Berry as representing the Government of Victoria, with respect to the request contained in your letter that the Company should be allowed to count the eight months for the laying of the duplicate Australian cable from the 1st of July next instead of from the date of signing the contract with the representatives of the Colonies in this country.

I have, &c.,
R. G. W. HERBERT.

No. 6.

The Agent General for New South Wales to The Colonial Secretary.

Sir, 3, Westminster Chambers, Victoria-street, S.W., 24 April, 1879.

I have the honor to express my regret that I have been unable to satisfy the solicitude felt by the Government, and expressed by yourself in several letters and telegrams, for the speedy signature of their respective contracts by the Eastern Extension Telegraph Company and the Pacific Mail Company.

Nevertheless, I have the honor to assure you, and the various correspondence on the subjects of these contracts will partially, but only partially, disclose, that the delay in either case has not been caused by any failure or neglect in myself, or in this department, to press the matter upon the other Colonial Agencies, or parties to the respective contracts. As regards the contract for duplication of the cable, conferences between myself and the Agent General for Victoria, and our solicitor, Mr. John Mackrell—at one of which Mr. Graham Berry was present—have been repeatedly proposed, not generally by myself, and have taken place, to which, of course, under the circumstances, I could not refuse to be a party. And on the understanding, which was generally accepted, that the preliminaries had been arranged with the concurrence of the respective solicitors, I have, through ours, repeatedly signified my readiness to sign the contract at any time and place the other parties might agree to appoint. And upon the arrival of your last telegram, dated the 18th instant, I lost no time in pressing both upon the Company and Sir Archibald Michie, the desirability of an immediate signature of the contract. But even now, all the assurance I am able to obtain from Mr. Mackrell is of a probability that the signatures will be appended in about a week. I have some reason to believe that Mr. Graham Berry, doubtless with the best intentions, has thrown obstacles in the way by criticisms on the phrasology. Of course Mr. Graham Berry has no control over me, but he has over the Agent General for Victoria; and I cannot but fear that the change which is about taking place in the Victorian Agency of another Agent General in lieu of Sir Archibald Michie—a change which I very much regret on other grounds—may cause further delay in the completion of the business.

As regards the contract with the Pacific Mail Company, I have no reason to believe that the delay is caused by any other reason than the usual difficulties of communication with a number of parties dispersed in different parts of the United States.

In conclusion, I have the honor to express my hope that before this reaches you you may have been previously informed by telegram of the signature of both contracts.

I have, &c.,
WILLIAM FORSTER.

Please advise New Zealand and Taylor.

Send this on to La Perouse and New Zealand.—E.C.C

No. 12.

Telegram from Chief Secretary, Adelaide, to The Colonial Secretary, Sydney.

5 June, 1879.

I HAVE sent following telegram to Honorable Chief Secretary, Victoria:—"It is understood the reduced rates for cable messages are now in force, but only extend to those colonies which contribute to subsidy. As your Government and that of New South Wales conducted negotiations and signed contract, will you please give Board of Directors, London, the necessary information."

This information has already been furnished to the agent of the Company in Adelaide. The contributing colonies—Victoria, South Australia, New Zealand, and this Colony—have signified their assent. Colonial Secretary, South Australia, might be informed. Information has been furnished to Company.—S.S., 9/6/79. The Principal Under Secretary.—S.H.L., 10/6/79. Submitted.—9/6/79.

The Colonial Secretary, New South Wales, to The Chief Secretary, South Australia.

Sir,

Colonial Secretary's Office, Sydney, 18 June, 1879.

With reference to your telegram of the 5th instant, communicating to me the terms of a telegram sent by you to the Chief Secretary of Victoria, in the matter of the reduced rates of charge for cable messages, I have the honor to inform you that my colleague, the Postmaster General, intimates to me that information on the subject has already been given to the Agent of the Telegraph Company in Adelaide,—the contributing Colonies, namely, Victoria, South Australia, New Zealand, and New South Wales, having signified their assent to the new arrangement.

I have, &c.,

HENRY PARKES.

No. 14.

No. 14.

The Chief Secretary, Victoria, to The Colonial Secretary, New South Wales.

Sir, Victoria. Chief Secretary's Office, Melbourne, 7 June, 1879.

I have the honor to suggest that a deed should be prepared for the signature of the several Governments of Australia and that of New Zealand, whereby each will bind itself under the authority of the Governor in Council, and the seal of the Colony in each case, to pay during the currency of the contract lately entered into with the Eastern Extension Telegraph Company its due proportion of the subsidy guaranteed to the Company after the completion of the second cable, and for which guarantee New South Wales and Victoria are, as you are aware, primarily liable. If you approve of this suggestion being carried out the document can be drafted by the Law Department of this Government, and forwarded for perusal by the Crown Law Officers of New South Wales before being engrossed.

I take the opportunity of noticing that the Government of Tasmania has not yet consented to join in the payment of the guarantee, and that the Honorable the Colonial Secretary of Western Australia, under date March 17th, has formally intimated that that Colony does not consider itself liable to contribute to it for the reasons stated in his letter, of which I enclose a copy for your information. I cannot think, however, that either the latter Government will adhere to that wholly unexpected decision, or that Tasmania will stand aside, and allow the other Colonies to bear the weight of an obligation incurred for the common good, and from which she will benefit *pro tanto* as much as they, on its being represented to each that it was only in the fullest reliance and good faith that we (New South Wales and Victoria) should be sustained in our action by the whole of the other five Colonies that we jointly undertook the liability in the manner we have done.

If you take the same view I would strongly suggest that a representation should be made to the two abovenamed Governments, urging them to undertake their respective shares of the liability. A joint letter might perhaps be the most forcible method of conveying our sentiments to them.

There are several matters of detail which still require settlement, but I will defer entering upon them until this, which is the most important branch of the subject, is first removed out of the way.

I have, &c.,
BRYAN O'LOGHLEN.

[Enclosure.]

The Colonial Secretary, Western Australia, to The Chief Secretary, Victoria.

Sir, Western Australia.—Colonial Secretary's Office, Perth, 17 March, 1879.

I have the honor to acknowledge the receipt of your letter, numbered and dated as in the margin, informing this Government of the terms agreed upon for the proposed contract for the second sub-marine cable between Port Darwin and Java, and showing the proportions in which it is proposed that the subsidy to be paid to the Eastern Extension Telegraph Company should for the present be divided amongst the various Colonies. Deer., 1878.

I am directed to state in reply that this Government, having failed at the first Conference held at Sydney, N.S.W., in January, 1877, in getting the support of the other Colonies to the construction of a cable from its shores either to Java or Ceylon (undertaking to complete the extension of the land lines necessary itself), refrained from sending a representative to the last Conference at Melbourne for the reason that the scheme then to be submitted was one in which Western Australia was not interested.

This Government cannot therefore be expected to participate in sharing liabilities for carrying out a scheme which has not its concurrence, and which was accepted without its assent.

I have, &c.,
LAWRENCE S. ELIOT,
For Colonial Secretary.

Submitted.—10/6/79.

No. 15.

Telegram from The Chief Secretary, Melbourne, to The Colonial Secretary, Sydney.

9 June, 1879.

Will be glad to have reply by telegram to a letter posted Saturday regarding cable subsidy arrangements.

Postmaster General.—Mr. Samuel will be good enough to favour me with his views on this matter to enable me to reply to letter from Chief Secretary of Victoria.—H.P., 17/6/79. The Secretary to General Post Office, B.C., 17 June, 1879.—C.W.

I can see no objection to a deed as suggested being prepared and signed by the Governments of the Colonies of Australia and New Zealand, agreeing to pay their due proportion of the subsidy guaranteed to the Company for the duplication of the cable, though I should have thought an exchange of letters between the Chief Secretaries of the contracting colonies would have been sufficient. I quite concur in the proposal to send a joint letter to the Governments of Tasmania and Western Australia, urging them to take their respective shares in the liability. If the Colonial Secretary concurs he will, perhaps, send a telegram to the Chief Secretary, Victoria, as requested.—S.S., 20/6/79. The Principal Under Secretary, B.C.—S.H.L., 20/6/79. Submitted, 20/6/79.

In reply to your telegram of the 3rd instant, asking me to undertake the preparation of the joint letters which it was proposed to address to the Governments of Tasmania and Western Australia, to urge them to undertake their respective shares of liability in respect of the subsidy payable to the Eastern Extension Telegraph Company after the completion of the second telegraph cable, I have the honor to forward to you the letters which have now been prepared in pursuance of your suggestion, and to which I have affixed my signature.

I have, &c.,

HENRY PARKES.

[Enclosure.]

The Colonial Secretary, Sydney, and Chief Secretary, Victoria, to The Colonial Secretary, Western Australia.

Sir,

15 July, 1879.

We have had under consideration your letter, addressed to the Chief Secretary of Victoria, of the 17th March last, on the subject of the proposed apportionment of the subsidy to be paid to the Eastern Extension Telegraph Company for the duplication of the cable between Singapore and Port Darwin.

2. We regret to learn the decision which your Government has arrived at in this matter, and would strongly urge your reconsideration of the question. The whole of the Australasian Colonies being in telegraphic communication with each other, we submit that it is of secondary consideration at what point the submarine cable, which enables them to communicate with the rest of the world, connects with the line of the Australian coast.

3. That question having been decided, and a contract made, it appears to us that this consideration hardly affects the proposal which we again make, viz. :—That you should join in paying your quota of the subsidy in proportion to population, in consideration of which your Colony will have, in common with the other Australasian Colonies, the advantage of uninterrupted communication and reduced rates for Government and press messages.

4. Doubtless, had the cable started from your shores your messages would not have had to be repeated over your own and the South Australian land lines, but the Colonies of New South Wales, Victoria, and New Zealand labour under the same disadvantage.

5. We trust that on reviewing the matter your Government will see its way to a reversal of its decision, and will contribute to the subsidy.

We have, &c.,

HENRY PARKES,

Colonial Secretary of New South Wales.

Chief Secretary of Victoria.

The Colonial Secretary, Sydney, and Chief Secretary, Victoria, to The Colonial Secretary of Tasmania, Hobart Town.

Sir,

15 July, 1879.

Negotiations having, as you are aware, been now finally completed with the Eastern Extension Company for the duplication of the cable between Singapore and Port Darwin, and the contract having been signed, it becomes necessary to ascertain which of the Colonies purpose contributing towards the subsidy on the basis of population as proposed at the Conference held in Melbourne, in May, 1878.

2. Queensland, for reasons which it is not necessary now to enumerate, declined at the Conference to join. Victoria, South Australia, New Zealand, and New South Wales are in agreement; and your Colony not having yet consented to join, we are induced in the interests of the whole of the Australasian Colonies to seek your co-operation.

3. We note that the representative of your Colony, Sir James Wilson, at the Conference alluded to, stated, in a minute appended to the report of the Conference, that the decision "declining to entertain the suggestion that the cables which connect Tasmania and New Zealand with the Continent should be dealt with as forming with the lines of telegraph from Port Darwin to England, a common system of communication between Australasia and Europe" would in all probability preclude the co-operation of Tasmania in the proposed duplication of the telegraph from Port Darwin to Singapore.

4. We hope that your Colony will not stand aside and allow the other Colonies to bear the burden of an obligation incurred for the common good, and from which you will benefit. It is almost needless to state that it was only in the fullest reliance that the Colonies of Victoria and New South Wales would be sustained in their action by the other five Colonies, that they jointly undertook the liability they have incurred.

5. The Governments of Victoria and New South Wales recently consented, on the application of the Secretary of State for the Colonies, that the Australian duplicate cable which was then being manufactured should be used for the Cape Line, to meet the exigencies of the Zulu war; this consent being given on the understanding that the reduced rates, which were under the contract to come into operation on the completion of the cable, should take effect immediately, and they have consequently been in operation since the 16th May, 1879.

6. In paying your quota of the subsidy in proportion to population, your colony will in common with the others have the advantage of uninterrupted communication, as well as of the reduced rates for Government and Press messages.

7. We trust, therefore, under all the circumstances, to receive an intimation from you that you will consent to contribute on the same terms as the other Colonies.

We have, &c.,

HENRY PARKES,

Colonial Secretary of New South Wales.

Chief Secretary of Victoria.

No. 20.

The Agent General for New South Wales to The Colonial Secretary.

Sir,

3, Westminster Chambers, Victoria-street, S.W., 9 May, 1879.

I have the honor to forward the remainder, which I trust may be the last, of the correspondence in London in the matter of the duplication of the cable between London and Australia, consisting of the letters detailed in the margin, accompanied by a minute of mine, from all which you will easily gather that the signature of the contract has been delayed, almost at the eleventh hour, by a change in the Victorian agency, and by alterations in the deed proposed on behalf of the Company. I did not think it safe or expedient to accept Mr. Graham Berry, not being Agent General, as accredited representative of the Government of Victoria, without special authority from the Governor and Executive Council; and many of the alterations proposed seemed to me of very doubtful propriety. My objections have been sustained by the advice of our solicitors, and justified by the result.

On the 6th instant I signed the contract, and left the documents in Mr. Mackrell's hands to procure the other signatures. But this was done upon an understanding that the deeds should not be parted with, so as to have legal effect, until intimation of the required authority having been given to Mr. Berry should be received from Victoria. Most of the alterations proposed were withdrawn, and so the matter stands at this moment.

I have, &c.,

WILLIAM FORSTER.

[Enclosures.]

The Agent General for New South Wales to Messrs. Mackrell & Co.

Gentlemen,

3, Westminster Chambers, Victoria-street, S.W., 28 April, 1879.

I have the honor to call your attention to the time which has already elapsed since my receipt and immediate communication to you orally of the last telegram from the Government of New South Wales, having reference to our negotiations with the Eastern Extension Telegraph Co. in the matter of duplication of the cable between London and Australia, of which the concluding words expressly enjoined "contract to be immediately signed." I have accordingly the honor to request that you will take whatever steps may be necessary to obtain the appointment of an early day for having the signatures appended, or that if any further delay should occur, that you will kindly inform me of the reasons, not only for such delay, but for that which has already occurred since the receipt of the telegram.

I have, &c.,

WILLIAM FORSTER.

Messrs. Mackrell & Co. to The Agent General for New South Wales.

New Cable,

Dear Sir,

21, Cannon-street, London, E.C., 29 April, 1879.

In reply to your letter of yesterday's date we have the honor to inform you that although you were good enough to inform us of the receipt of the telegram sent you by your Government, assenting to the conditions proposed by the Company for the use of the cable for the Cape line, we were not able to proceed with the matter until we had the necessary assent on the part of the Victorian Government.

Some delay has arisen in obtaining this, in consequence of Sir Archibald Michie's term of office as Agent General having expired, and no one having been appointed to succeed him, and of the illness of the Chief Secretary for Victoria.

We have, however, to-day received the authority of the Chief Secretary to assent to the conditions on the part of the Victorian Government, and we hope to-morrow to be able to forward to the Company the draft as approved by yourself and by Sir Archibald Michie.

You will remember that the agreement provides that the cable should be constructed according to a specification mentioned in the schedule. We have been urging the Company to let us have the specification to attach to the draft.

No time shall be lost on our part in completing the matter, and we will report to you further thereon without delay.

We have, &c.,

JOHN MACKRELL & CO.

The Colonial Office to The Agent General for New South Wales.

Sir,

Colonial Office, Downing-street, 29 April, 1879.

I am directed by the Secretary of State for the Colonies to acknowledge the receipt of your letter of the 22nd instant, and I am to transmit to you, for your information, copy of the correspondence which has passed with the Government of New South Wales respecting the terms on which the cable which was about to be used for the duplication of the Australian Telegraph Service has been made available for the immediate construction of a cable to South Africa.

I have, &c.,

JOHN BRAMSTON.

The Colonial Office to The Hon. Graham Berry.

Sir,

Colonial Office, Downing-street, 7 April, 1879.

In the course of the negotiations which have recently taken place between Her Majesty's Government and Mr. Pender, acting on behalf of the Eastern Extension Australasia and China Telegraph Company, for the laying of a submarine cable between Aden and Natal, Mr. Pender solicited the good offices of Her Majesty's Government in obtaining the concession of the Governments of Victoria and New South Wales to the postponement of the duplication of the Australian cable for a short period, and I am now directed by Sir Michael Hicks-Beach to enclose, for your information, a copy of a letter which Sir James Anderson has addressed to this department on the subject.

Her Majesty's Government would be much obliged if the Government of Victoria would assist them by making such arrangements with the Eastern Telegraph Company as would permit of the use for the South African line of the cable now ready, and he trusts that you may feel yourself able to consent on the part of your Government to what is proposed.

I am to add that a similar request has been addressed by telegraph to the Governments of New South Wales and New Zealand.

I have, &c.,

R. G. W. HERBERT.

The Hon. Graham Berry to The Colonial Office.

Sir, "Alexandra Hotel," London, 9 April, 1879.
I am directed by the Honorable Graham Berry to acknowledge the receipt of your letter of the 7th instant, and of the enclosure from Sir James Anderson, Director of the Eastern Extension Australasia and China Telegraph Company, and to inform you that the Government of Victoria willingly consent to the proposed extension of time within which the second cable is to be laid to Port Darwin, and it is with satisfaction they are thus able to co-operate in assisting to secure safety and peace for that portion of Her Majesty's dominions at present in greatest need of such help.

I have, &c.,
H. H. HAYTER.

The Colonial Office to The Hon. Graham Berry.

Sir, Colonial Office, Downing-street, 17 April, 1879.
I am directed by the Secretary of State for the Colonies to acknowledge the receipt of your letter of the 9th instant, and to convey to you the thanks of Her Majesty's Government for the ready acquiescence which you have expressed on behalf of the Government of Victoria in the proposed extension of the time to be allowed to the Eastern Extension Australasia and China Telegraph Company for the laying of the duplicate Australian cable.

Sir Michael Hicks-Beach desires me at the same time to enclose for your information copies of the replies which have been received by telegraph from the Governments of New South Wales and New Zealand, and I am to say that copies of these telegrams and of your letter have been communicated to the Company in reply to their letter of the 2nd instant.

I have, &c.,
R. G. W. HERBERT.

Sir James Anderson to Sir Michael Hicks-Beach.

The Eastern Extension Australasia and China Telegraph Company (Limited),
66, Old Broad-street, London, E.C., 2 April, 1879.

Sir, With reference to the conversation which Lord Tweeddale had with you this morning on the subject of the cable to be laid for the Australian Colonies, it has been well understood in Australia that the Company were making the cable, and were prepared to lay it considerably within the contract time.

In the newspaper reports which have gone out it has been stated that 2,000 miles of the cable intended for the Australian Colonies were being diverted in order to be laid to the Cape of Good Hope.

We learn that this announcement has occasioned some annoyance to the representatives of the Colonies who feel that their convenience has been sacrificed without their sanction being solicited.

Our agreement with the Australian Colonies stipulates that the contract shall be signed on or before 1st July next, and that the cable shall be laid in eight months from the date of signing the contract, which has not yet been signed. All the details are, however, agreed. What we ask is, that the eight months for laying the cable shall count from the 1st of July instead of from the date of signing the contract, and that one or two weeks further grace may be given if such delay prove unavoidable.

In consideration of this we agree, on behalf of the Eastern Extension Telegraph Company, that the half rates for Government telegrams and quarter rates for Press messages over that system shall commence from the date of signing the contract, instead of from the date of the subsidies commencing to be paid.

I am, &c.,
JAMES ANDERSON,
Director.

The Colonial Office to The Eastern E. A. & C. T. Co. (Limited).

Sir, Colonial Office, Downing-street, 17 April, 1879.
In reply to your letter of the 2nd instant, I am directed by the Secretary of State for the Colonies to transmit to you, for the information of the Eastern Extension Australasia and China Telegraph Company (Limited), copy of the correspondence which has passed by telegraph with the Governments of New South Wales and New Zealand, and with Mr. Graham Berry as representing the Government of Victoria, with respect to the request contained in your letter that the Company should be allowed to count the eight months for the laying of the duplicate Australian cable from the 1st of July next instead of from the date of signing the contract with the representatives of the Colonies in this country.

I have, &c.,
R. G. W. HERBERT.

Messrs. J. Mackrell & Co. to The Agent General for New South Wales.

Australian Cable.

Dear Sir, 21, Cannon-street, London, E.C., 2 May, 1879.
We have to-day had an interview with the solicitors to the Eastern Extension, &c., Telegraph Company, and discussed with them the revisions which, as instructed, we made in the draft contract, and they now write us a letter of which we enclose you copy.

We send with this a print of the contract as it was settled by you, with the alterations which they have made in manuscript.

It appears that the Company are satisfied to accept the execution of the agreement on behalf of Victoria by Mr. Graham Berry, there being no Agent-General appointed in Sir Archibald Michie's place.

Mr. Berry leaves on Tuesday next, and it is therefore necessary if this is to be done that the contract should be settled on Monday, so that it may be signed on that day.

We have sent a duplicate of the copy letter enclosed, and also a duplicate print of the agreement to Mr. Hoey, to submit to Mr. Berry, and shall be glad to have your views upon the matter as early as may be convenient, to-morrow if possible.

We have, &c.,
JOHN MACKRELL & CO.

Messrs. Bischoff & Co. to Messrs. Mackrell & Co.

Australian Cable.

Dear Sirs, 4, Great Winchester-street, London, 2 May, 1879.
We return this agreement which we have had reprinted as revised by you, and in which we have made some few alterations.

Art. 2. We explained in our letter of 31st March that we could not arrange for a pecuniary penalty. The contractors have undertaken payment of interest during construction, which constitutes a heavy penalty which they decline to increase, and the postponement of the subsidy would be in itself a heavy penalty.

Art. 4. By the existing agreement the rebate is expressly confined to messages "exchanged between England and Port Darwin"; the words we have struck out are not applicable to Government messages. The tariff of messages to China from Australia is higher than the stipulated rate.

Art. 11. We have framed a clause as arranged with you which we think will meet the convenience of the Colonies without affecting the position of the intended debenture holders.

Art. 15 and 16. We have added two clauses from the New Zealand Agreement, by which New South Wales and New Zealand are already bound, but which should apply equally to the Government of Victoria and any other Government taking the benefit of this agreement.

It is important the contract should be signed before Mr. Berry leaves; any delay in signature might seriously prejudice the fulfilment of the contract.

Yours truly,
BISCHOFF, BOMPAS, BISCHOFF, & CO.

We will alter and return your original draft. We send some plain print for your convenience.

Minute

Minute by The Agent General for New South Wales.

Duplication of Australian Cable.

I HAVE before me Messrs. John Mackrell & Co.'s letter of May 2, enclosing one from Messrs. Bischoff, Bompas, Bischoff, & Co. of same date, and accompanied by print of contract as last settled by and between Sir Archibald Michie and myself, with further alterations made in said print by the solicitors last named, and moreover informing me "that the Company are satisfied to accept the execution of the agreement on behalf of Victoria by Mr. Graham Berry, there being no Agent General appointed in Sir Archibald Michie's place;" and that "Mr. Berry leaves on Tuesday next, and it is therefore necessary if this is to be done that the contract should be settled on Monday, so that it may be signed on that day."

This letter causes me some difficulty and hesitation as to what course I ought to pursue. I have hitherto throughout this transaction acted on the most cordial terms with Sir Archibald Michie, and have had, and consequently I cannot avoid regretting that I shall have no longer the benefit of his eminent talents for business, as well as of his well-known legal ability and experience. And now I am not quite certain, even though "the Company are satisfied to accept the execution of the agreement on behalf of Victoria by Mr. Graham Berry," whether my instructions enable me to recognize in Sir Archibald Michie's place either Mr. Graham Berry or any other person who is not actually Agent General for Victoria, or who, so far as I am aware, has no legal power or right to act in this matter for the Government of Victoria. But I am quite certain that in performance of the functions entrusted to me I am neither required nor authorized to take any step in a matter so important with undue haste or precipitation, and that I should not be justified in proceeding to sign the agreement off-hand, or in accepting either the substitution of Mr. Graham Berry for Sir Archibald Michie, or the further alterations in the contract now proposed by the Company's solicitors, without full consideration, merely because Mr. Graham Berry leaves on Tuesday next. Accordingly with every desire to meet Mr. Graham Berry's convenience, and to throw no unnecessary obstacles in the way of his immediate departure from England and return to Victoria, I feel that I am both entitled and bound, before signing the contract, to have the strongest possible legal assurance upon the questions involved, that is to say, upon Mr. Graham Berry's legal rights and position, as representing one of the parties to the contract, as well as upon the propriety or necessity of the new provisions proposed on behalf of the Company, and the more so, not only because it is plain at a glance that these provisions are of considerable significance, but also because I had been led to believe, and the result of the last interview and consultation on the subject between Sir Archibald Michie, Mr. John Mackrell, and myself, that the preliminaries then arranged had been or would surely be assented to by the Company, and that no further difficulties were to be apprehended from that quarter, though some delay might occur from the change in the Victorian Agency. I note that upon none of the legal points above mooted Messrs. John Mackrell & Co. have as yet favoured me with any opinion.

As our solicitors name Monday for what they term settlement of the contract, which of course involves, and I suppose means, consultation, and it is now Saturday it will be obviously impossible to fix an earlier time, and I positively cannot undertake to be satisfied upon the several questions in issue in one day or any number of days.

I shall be glad to meet Mr. John Mackrell at my office on Monday at the earliest possible moment with a view to a preliminary consultation.

I append below a brief notice of what seem to me the most important points for consideration in the draft agreement as proposed to be altered by the solicitors for the Company, taking the clauses in their order.

Clause 1. The omission no doubt leaves it in the power of anyone duly authorized to sign for Victoria, but the legal right or authority of Mr. Graham Berry in that behalf is still open to question.

Clause 2. The relaxation in favour of the Company, by which the eight months for construction are to run from July instead of, as originally intended, from the date of signature was, I thought, to be only a matter of understanding, left to the good faith of the Governments. But here it is made a part of the contract, whereas the equivalent guarantee or benefit to the Governments in the shape of a penalty, and of reduction of rates from the date of signature, do not so appear, the former being now proposed to be omitted, and the latter not expressly included in clause 4 or any other clause relating to rates. I question therefore if it be right to assent to the one alteration unless accompanied by the others.

Clauses 3, 4, 5, 10, 11. I consider the alterations proposed immaterial.

Clause 12. I feel inclined to insist upon the original words "in any" rather than the word "for" in substitution.

Clauses 13 and 14. The alterations appear to me unimportant.

To the two new clauses proposed, and numbered respectively 15, 16, there is probably no great objection in principle, but I object to them as variations from, or additions to, the original memorandum, and obviously in favour of the Company.

I must add that whatever objections I entertain to the alterations proposed are greatly strengthened by the circumstances under which they are submitted to me, with only a limited time for consideration, and without any opportunity of consultation with, or of testing the authority of, the assumed attorney or representative of the Government or Colony of Victoria.

W. F., 3/5/79.

The Agent General for New South Wales to The Colonial Office.

Sir,

3, Westminster Chambers, S.W., 5 May, 1879.

I have the honor to acknowledge the receipt of Mr. Bramston's letter of the 29th ultimo, under cover of which he has been good enough to transmit to me for my information copy of correspondence which has passed with the Government of New South Wales, respecting the terms on which the cable, which was about to be used for the duplication of the Australian Telegraph Service, has been made available for the immediate construction of a cable to South Africa.

I have, &c.,

WILLIAM FORSTER.

Messrs. Mackrell & Co. to The Agent General for New South Wales.

Duplicate Cable.

Dear Sir,

21, Cannon-street, London, E.C., 5 May, 1879.

We have seen Mr. Berry, and arranged that he should send out a message as follows:—

"Berry to Chief Secretary, Melbourne.—Will sign contract for duplication of cable before I leave. It is thought authority should be given by Governor in Council. Take necessary steps, and reply when done."

He wishes that before he leaves the contract should be signed by you both, and that the exchange should not be made with the Company until the reply message is received.

As your name appears first in the document Mr. Berry wishes you to sign first, and he will then sign and leave it with us.

We have communicated with the Company, and we believed settled the draft with them, and they seem satisfied with this arrangement.

We will therefore call upon you to-morrow with the prints for signature as soon after half-past 2 as possible.

We return your minute, and will report fully upon the whole matter to you.

We have, &c.,

JOHN MACKRELL & CO.

The Postmaster General.—H.P., 19/6/79. Secretary to the Post Office, B.C., 19 June, 1879.—
C.W. Supt. of Telegraphs, for remarks.—S.S., 26/6/79.

No. 21.

The Agent General for New South Wales to The Colonial Secretary.

Sir,

3, Westminster Chambers, Victoria-street, S.W., 22 May, 1879.

My letter of the 9th instant, *via* Brindisi, informed you of all that had taken place up to the time of its despatch in regard to the contract for the duplication of the telegraph cable. I have now the honor to enclose for your information a copy of our solicitor's report of the 16th instant, which sets forth the steps taken from time to time in the settlement of the terms of this contract.

I trust that the Government will be satisfied with the contract, which, after very considerable negotiation, was duly executed on the 9th instant, as intimated in my telegram to you of the 12th [10th] instant.

I have, &c.,

WILLIAM FORSTER.

[Enclosures.]

Messrs. Mackrell & Co. to The Agent General for New South Wales.

Australian Cable.

Dear Sir,

21, Cannon-street, London, 16 May, 1879.

We have now to report the completion of the contract for the duplication of the lines of cable of the Eastern Extension, Australasian, and China Telegraph Company (Limited), and in doing so it may be of use if we report to you fully as to the steps which have been taken in the matter.

The only instructions which were received by you were the prints of the correspondence which had passed between your Government and the Government of Victoria and the Company, and of the preliminary agreement which had been entered into by them.

By the terms of this agreement the Company were to sign a contract "with all necessary conditions," and it was felt by yourself and Sir Archibald Michie, acting on behalf of the Colony of Victoria, that it was your duty to require, amongst other stipulations, that such conditions should be inserted in the contract as would secure the duplication of the lines of cable within the time stipulated.

Besides this, different views were entertained by yourselves and by the Company with reference to the meaning of certain clauses in the preliminary agreement, and entailed upon you and Sir Archibald the necessity of having many conferences together and with ourselves, and necessitated a rather protracted negotiation between ourselves and the solicitors to the Company.

Proposals were then made on behalf of the Company for an extension of time within which to lay the cable, in order that the cable which was being manufactured for the purposes of the contract might be made use of to open communication with the Cape of Good Hope; and, acting on further instructions which you received from your Government by cable, the contract had to be varied, to give the further time desired; and the Company then desired to introduce other stipulations into the contract which had not been referred to in the preliminary agreement.

Pending these negotiations, the term of office of Sir Archibald Michie as Agent General for Victoria expired, and a question then arose as to how the contract should be executed on behalf of the Government of that Colony. The Company prepared to accept the execution of the contract by Mr. Graham Berry, the Prime Minister of that Colony, who was in England, on behalf of his Government; but you felt that it was your duty to be satisfied that he had authority to bind his Government as contributors to the subsidy, and you were good enough to send us a copy of the minute which you made, under date the 3rd instant, upon this subject, and with reference to the new stipulation desired by the Company.

After a conference with you upon your minute, we had, as you know, a conference with Mr. Berry, and also with the solicitors for the Company, which resulted in arrangement that the alterations desired by the Company were given up, and in Mr. Graham Berry undertaking to communicate with his Government and get a Minute in Council passed authorizing the execution of the agreement by him on behalf of the Colony of Victoria. Accordingly a message was despatched by him to his Government, requesting such a minute to be passed.

There still, however, remained a difficulty as to the security which the contract should afford for the execution of the work within the stipulated period, to secure which you and Sir Archibald Michie had required that the Company should come under a daily penalty for default. It was urged, however, by the Company that this should not be insisted upon, as by the terms of the arrangement they would be under a heavy penalty if they failed to complete within the stipulated time, inasmuch as they would lose the bonus of £10,000 which was to be given to them by allowing the subsidy to run from the expiration of four months from the 1st July if they laid the cable within the eight months.

The Company also expressed themselves willing to come under terms to reduce their proportion of the rates for Government and press messages immediately, and they explained the arrangement which they had made with the Telegraph Construction and Maintenance Company whereby the latter Company have undertaken to pay interest on the amount of the capital raised for the cables from the time when the cables ought to be laid. You thereupon considered that by the arrangement proposed by the Company you would secure to your Government and to the Colony the immediate advantages which were to result from the arrangement, and this without any payment of subsidy for the present, subject only to the risk of the existing cables being interrupted before the new cables should be laid; and you therefore felt that you had practically obtained as much security for laying the cables which could be fairly insisted, and you authorized us to assent to the contract being modified as proposed.

The draft contract was then finally settled, and as Mr. Graham Berry was leaving England before a reply to the message to his Government as to the minute by the Governor in Council could be received, the contracts were executed by you and him on the 6th instant, but as escrows only, as you did not consider you were justified in assenting to the exchange of the contract executed by Mr. Berry on the part of the Government of Victoria until the proposed minute in Council should have been passed.

On the 9th instant a message was received by Mr. Cashel Hoey, who is now representing the Government of Victoria, to the following effect:—

"Received by Mr. Hoey from the Acting Chief Secretary of Melbourne.

"Forward this telegram to Berry. Order in Council authorizing you to sign contract for duplication of cable with intended [extended?] time passed to-day."

On submitting this telegram to you you felt yourself justified in authorizing us to complete the contract, which we did by getting the Company to affix their seal to the same in pursuance of a minute which had been previously passed, authorizing such seal to be affixed, and the contracts were exchanged.

We now send herewith one part of the contract executed by all parties, together with a certified extract from the minutes of the Company, and a certified copy of the message received by Mr. Hoey, and we will forward for use of yourself and your Government prints of the contract which are now being struck off.

Although by the contract the reduced rates for Government and Press messages are stipulated to commence as from the 6th instant, you will see by the letter from Mr. Graham Berry to the Company, of which we append a copy, that the reduced rates are to be allowed as from the 9th of April last, and your Government and the Press are entitled to be allowed for any charges made in excess of the reduced rates as from that day.

The matter has required very careful consideration and attention on your part, and entailed upon you a considerable amount of trouble, and we feel sure that your Government will be satisfied with the contract which you have succeeded in securing for them.

We have, &c.,

JOHN MACKRELL & CO.

The

The Eastern Extension Australian and China Telegraph Company (Limited).

66, Old Broad-street, London, E.C., 12 May, 1879.

EXTRACT of minute passed at a special Board meeting of the Directors of the above Company, held on Thursday, May 1st, 1879:—

"The draft contract with the Governments of Victoria and New South Wales for duplicating the Australian cable, as altered by Mr. Mackrell, was then considered and approved as amended, and ordered to be sealed with the Company's seal when settled by the respective solicitors."

True copy,—P. E. HESSE, Secretary.

S, Victoria Chambers, Westminster, S.W.

EXTRACT from telegram received this day at the office of the Agent General for Victoria from the Acting Chief Secretary, Melbourne:—

"Forward this telegram to Berry. Order in Council authorizing you to sign contract for duplication of cable with intended [extended?] time passed to-day."
9th May, 1879.

J. CASHEL HOEY.

The Hon. Graham Berry to Sir James Anderson.

Dear Sir James,

"Alexandra Hotel," London, 9 April, 1879.

I am in receipt of your communication of yesterday's date, and also of a letter from the Colonial Office to the same effect. I have already replied to the latter in the affirmative, and I now express my concurrence on behalf of the Government of Victoria in your proposal, viz., that the eight months for laying the cable should count from the 1st July instead of from the date of signing the contract, and that one or two weeks further grace may be given if such delay prove unavoidable.

This is on the express condition that the reduced rates for Government and Press messages provided for in the agreement shall commence on and from this day, the 9th April, providing the contract is eventually agreed to and carried out.

Very faithfully yours,

GRAHAM BERRY.

The Postmaster General.—H.P., 9/7/79.

The Secretary to the Post Office.—C.W., 9/7/79.

No. 22.

The Agent General for New South Wales to The Colonial Secretary.

Sir,

3, Westminster Chambers, Victoria-street, S.W., 22 May, 1879.

In continuation of my letter of this date I have the honor to inform you that I have this moment received from Messrs. Mackrell & Co. prints of the contract for the duplication of the telegraph cable, and I now forward ten copies for your use.

I have, &c.,

WILLIAM FORSTER.

The Postmaster General.—H.P., 9/7/79. The Secretary to the Post Office.—C.W., B.C., 9 July, 1879. Forwarded for the perusal of the Superintendent of Telegraphs.—S.H.L., 11/7/79.

No. 23.

Telegram from Colonial Secretary, Perth, to Colonial Secretary, Sydney.

Perth, 19 July, 1879.

THE lengthened continuousness of the interruption of telegraphic communication with Europe inflicts such serious injury upon the Australian colonies that this Government deem it right to invite your attention to the cause, which, it cannot be doubted, is to be traced to the adherence to an objectionable sea route, which it is actually proposed to duplicate. My telegram to you of the 6th April, 1878, specified the arrangement on which the Government of Western Australia was willing to enter upon terms with the rest of the Continent for the construction of a line of telegraphic communication with Europe, independent of and in addition to that now existing. The Government believe that the adoption of the course it has recommended is best calculated to secure safe and constant communication with India and Europe, and at any time will be very glad to learn that your Government is disposed to consider the question on the basis of the scheme it has submitted.

ROGER TUCKFIELD GOLDSWORTHY,

Colonial Secretary.

Submitted.—21/7/79. Postmaster General,—Perhaps Mr. Samuel will favour me with his view upon this message.—H.P., 21/7/79. The Secretary to the Post Office.—C.W., B.C., 21 July, 1879.

No. 24.

Minute of the Postmaster General.

I suggest that the Colonial Secretary of Western Australia be informed, in reply to this telegram, that a contract having been entered into, with the concurrence of a majority of the Australasian Colonies, for a duplicate cable over the existing route, and such cable being now in course of construction, this Government is not prepared to entertain a proposal for another cable by a different route.

S.S., 31/7/79.

The Principal Under Secretary.—S.H.L., 1/8/79. Submitted, 5/8/79. Prepare telegram accordingly.—H.P., 5/8/79. Telegram sent, 6 Aug., 1879. The Secretary to the Post Office, B.C., 8 Aug., 1879. Read.—S.H.L., 14/8/79.

No. 25.

No. 25.

Minute of The Superintendent of Electric Telegraphs.

I HAVE carefully read through the attached papers, also the agreement, and can see nothing objectionable, except, perhaps, in clause 8, by which this Colony and Victoria are made entirely responsible for the whole of the subsidy, £32,400, although this is made more clear by clause 11, where provision is made to the effect that should any other Australian Colony agree to contribute to the subsidy the Company will accept payment of the agreed contribution by such colony.

It appears from the despatches that the date of the proposed reduction in the rates for Government and Press messages was to take effect from the 9th April, 1879, and not the 9th May, as telegraphed by the Company. Such being the case, I have given directions for a list of the Government messages to be prepared, so that the 50 per cent. reduction may be adjusted.

E. C. CRACKNELL, 6/8/79.

No. 26.

The Colonial Secretary, Perth, to The Colonial Secretary, Sydney.

Sir, Western Australia. Colonial Secretary's Office, Perth, 26 September, 1879.

I have the honor to acknowledge the receipt of letter of the 15th July last, from yourself and the Chief Secretary of Victoria, and in conveying to you the thanks of His Excellency Major General Sir Harry St. George Ord for the courteous manner in which you have urged this Government to contribute towards the subsidy to be paid to the Eastern Extension Telegraph Company for a second cable from Singapore to Port Darwin, I am directed to inform you that the question has been submitted for the consideration of the Legislature, and the result of the deliberations is that His Excellency has been requested to make provision for the £367 which has been laid down as the *quota* payable by this Colony towards the subsidy to the Company.

Under such circumstances this Government will be prepared to contribute from the date on which it has been agreed that the arrangement should commence.

I have, &c.,
ROGER TUCKFIELD GOLDSWORTHY,
Colonial Secretary.

The Postmaster General.—H.P., 9/10/79. The Colonial Secretary will please direct that the receipt of this despatch be acknowledged.—S.S., 13/10/79.

51. Minute of Superintendent of Telegraphs. 31 October, 1879	24
52. Telegram, Postmaster General to Colonel Glover, London. 3 November, 1879	24

ELECTRIC TELEGRAPH STATION-HOUSE AT LA PEROUSE FOR THE NEW ZEALAND
CABLE SERVICE.

No. 1.

Memorandum.

Already printed
by order of the
Legislative
Assembly on 21st
December, 1875.

It is hereby agreed that the period of fourteen days in article 3 of the Agreement dated 24th June, 1875 (a print of which is hereunto annexed), shall be read and construed as if the 30th July, 1875, were in lieu thereof therein asserted, and that the specification for the cable contained in the contract dated the 30th July, 1875 (a print of which is hereunto annexed), shall be the specification for the cable contracted by the said agreement to be laid, and that the terminal point of the cable in New Zealand shall be in that part of Blind Bay there known as Wakapuake Bay, and that the New South Wales end of the sub-marine portion of the cable may be laid in Botany Bay: Provided that this stipulation shall not relieve the Eastern Extension Australasia and China Telegraph Company of their obligation to carry the cable to the terminal point agreed upon there, viz., the Telegraph Station at Sydney. And that any agreement which may be come to between the Boards of the respective companies, parties to the said agreement of the 30th July, 1875, under clause 22 of the said contract of that date, shall not be binding upon the Governors of the Colonies of New Zealand and New South Wales, or either of them, without their written assent.

In witness whereof, Sir Julius Vogel has signed this memorandum, in the name and on behalf of George Augustus Constantine, Marquis of Normanby, and Sir Daniel Cooper has signed the same in the name and on behalf of Sir Hercules Robinson, and the Eastern Extension Australasia and China Telegraph Company (Limited) have hereunto affixed their Common Seal this 6th day of September, 1875.

The Common Seal of the Eastern Extension Australasia and China Telegraph Company (Limited) was affixed hereto in the presence of,—

JOHN PENDER,
Chairman.

GEORGE LYONS,
Secretary.

We have compared the above with the original, of which we declare it to be a true copy, 20th September, 1875.

THEO. GODLEE.
CHAS. BENNETT.

Clerks to Messrs. John Mackrell & Co.,
of 21, Cannon-street, London, Solicitors.

MEMO.—Duplicate of the above, signed on behalf of His Excellency the Governor of New Zealand by the Honorable Sir Julius Vogel, K.C.M.G., and on behalf of His Excellency the Governor of New South Wales by Sir Daniel Cooper, Baronet, and handed over to the Eastern Extension Australasia and China Telegraph Company (Limited), in exchange for the above.

Articles of Contract made the 30th day of July, 1875, between the Eastern Extension Australasia and China Telegraph Company, Limited (hereinafter called the Company), of the one part, and the Telegraph Construction and Maintenance Company, Limited (hereinafter called the Contractors), of the other part.

Whereby it is agreed as follows:—

1. The contractors shall, subject to the due performance by the company of the agreements and conditions hereinafter contained, and on their parts to be observed and performed, and for the consideration and upon the terms hereinafter expressed, manufacture for the Company a telegraphic cable of the total length of 1,370 nautical miles of the types mentioned and described in the specification hereunto annexed.

2. The cable shall be manufactured and constructed throughout of thoroughly good materials and workmanship, and in all respects in strict accordance with the specification hereunto annexed (which is to be deemed part of this contract), to the reasonable satisfaction of the engineer of the company (hereinafter called the Engineer), but subject to arbitration as hereinafter provided.

3. After the cable shall have been made and tested by the Engineer, the contractors shall cause the same to be coiled on board a suitable steamship or ships, and shall send the said cable to sea, and by means of apparatus and fittings to be approved by the engineer, or in case of difference between him and the contractors, by Mr. John Penn, and under charge of officers of approved skill and experience, use their best endeavours to lay the same between Australia and New Zealand on or before the 30th April, 1876.

4. The terminal point of the cable in New Zealand shall be at such part of the coast of Blind Bay or Golden Bay as shall be determined by the engineers of the company and the contractors before the departure of the expedition, and the terminal point of the cable in Australia shall be at such part of the coast at or near Sydney as the said engineers shall so determine. At each terminal point the company shall, before the arrival of the vessel or vessels containing the cable, erect a suitable cable-house, and the contractors shall, to the satisfaction of the engineer, supply each cable-house with proper instruments for the testing of the cable, until the expiration of the thirty days mentioned in article 15; such instruments to remain the property of the contractors.

5.

5. Previous to the departure of the expedition, the engineer and the contractors shall agree upon the course over which the cable shall be laid, and the positions in which the various types of cable shall be placed, and such agreement shall (unless the engineer consents to alteration thereof) be adhered to by the contractors as nearly as practicable.

6. It is hereby expressly agreed and declared that, after the said cable shall have been manufactured and coiled on board ship ready for sailing, and shall have been duly tested by the engineer and found to be in accordance with this contract, and the apparatus and fittings of the said ship or ships have been approved in writing by the engineer or the said John Penn as aforesaid, the contractors shall not be responsible in damages for any injury or breakage occurring to, or loss of the cable or any part thereof, or for failure or delay in laying the same, unless the same arise from the culpable neglect or default of the contractors or their agents, the true intent and meaning of these presents being that, the contractors shall be bound to take all reasonable precautions and use their best endeavours and make every reasonable effort in accordance with this contract to lay the whole line of cable between the points aforesaid, in good working order, in accordance with the said specification, so that the same shall give good and efficient electrical connection between the points aforesaid, but that they shall not be responsible in damages for failure or delay, if *bonâ fide* using their best endeavours as aforesaid.

7. Every facility, including batteries for testing, shall be afforded to the engineer and his assistants to test every part of the cable during manufacture, shipment, and transport. During the laying of the cable the testing shall be in the hands of the contractors, but shall be open to the continual inspection of the engineer or his assistants on board ship and on shore. The principle of testing shall be the same as adopted in laying the Atlantic Cable of 1874, or any improvement that may be mutually agreed upon. The engineer shall have the right of inspecting the charts and observations made during the laying of the cable, and also of having communications on the business of laying the cable forwarded from the ship to the cable-house on shore, and *vice versâ*, through the cable, at reasonable times, while the same is being laid.

8. The contractors shall provide victualling and accommodation for the engineer and his staff (not exceeding in the whole, five persons) on board the vessel or vessels during the laying of the cable, and until the return of the expedition.

9. The company shall obtain, at their own expense, all wayleaves and Government and other authorities required for landing the cable and connecting the same with the cable-houses, and the company shall procure possession of any land required for the purposes of this contract.

10. The contractors shall connect the shore ends with the cable-houses to be provided by the company at or near the landing places, in the most efficient manner, so that there shall be good and efficient electrical telegraphic connection between the two cable-houses.

11. The contractors shall effect insurances on the cable in the sum of £176 per mile, against fire, and river, and sea risks, until laid, by policies similar in form to those on the British Indian Telegraph Cable, and shall deliver such policies to the company, to the full amount of the payments from time to time made to the contractors.

12. The company shall pay to the contractors, for the works and matters hereinbefore undertaken by the contractors under this contract, and for the transfer of the ship hereinafter referred to, the total sum, or contract price, of £300,000, but subject to such reduction as hereinafter mentioned.

The said contract price shall be paid at the times and in manner following, that is to say,—

- (a.) Thirty thousand pounds upon the execution of this contract.
- (b.) One hundred and eighty-five thousand pounds, by weekly payments, as mentioned in Article 13.
- (c.) Twenty-five thousand pounds upon the certificate of the engineer of the shipment of the whole of the cable, and that the condition thereof is in accordance with this contract.
- (d.) Fifteen thousand pounds on the certificate of the successful laying and completion of the cable in accordance with this contract.
- (e.) Fifteen thousand pounds upon the transfer to the company of the steamship "Edinburgh," in manner hereinafter provided.
- (f.) And thirty thousand pounds, the balance of the contract price (subject to reduction as mentioned in Article 16), upon the Engineer's certificate mentioned in Article 15.

13. The payments in respect of the sum of £185,000 mentioned in Article 12, paragraph B, shall be subject to the following regulations, that is to say,—the contractors shall deliver, at the principal office of the company, a certificate signed by the engineer, and the contractor's engineer or electrician, stating the length of cable made up to the day of the date of the certificate, and certifying that the same is in perfect working order, and in all respects up to the conditions required by these presents, and on every Monday morning after that day, until the manufacture of the cable shall be completed, the contractors may deliver a like certificate, stating the length of the cable made during the week ending on the Saturday preceding, and also the total length manufactured up to the same date, and that the same total length of cable is in perfect working order, and in all respects up to the condition required by these presents; and on receipt of the above certificates respectively the company shall, not later than the Saturday next following every Monday after the date on which the certificate is duly delivered as aforesaid, pay over to the contractors or their agent authorized in writing to call for the same, at the office of the company, in respect of the said sum of £185,000, the sum of £135 per mile for every nautical mile of cable manufactured during the period to which the certificate bears reference. The balance of the said sum of £185,000 shall be paid upon the certificate of the engineer of the completion of the manufacture of the said cable.

14. The engineer of the company accompanying the expedition shall examine and test the line when laid, and as soon as practicable thereafter, telegraph to Messrs. Clarke, Forde, and Co., in London, and also write by the next post to them the results of his examination and testing, and shall forthwith deliver a copy of the telegram and letter to the contractor's agent, and upon the receipt by the engineer in England of such telegram or letter, he shall give his certificate that the cable has been successfully laid and completed in accordance with this contract, or shall state in writing his reasons for not giving such certificate, and shall forward a duplicate of such certificate or statement in writing, as the case may be, to the company and the contractors respectively.

15. The £30,000 mentioned in Article 12, paragraph F, shall (subject to the provisions of Article 16) be paid to the contractors, upon the certificate of the engineer in England that, for thirty consecutive days

days after the completion of the laying of the cable, the same has continued in good electrical condition, and the provisions of Article 14 shall (*mutatis mutandis*) apply to the examination and testing and certifying of the condition of the cable during the said thirty days.

16. If the contractors successfully complete the contract, and obtain the certificate referred to in Article 15, without disaster, delay or accident, occasioning damage to the contractors to the amount of £10,000, the sum of £30,000, mentioned in Article 12, paragraph F, shall be reduced to £20,000; and if any such disaster, delay, or accident shall occur, but shall occasion damage to an amount less than £10,000, then the difference between the amount of the damage so occasioned and £10,000 shall be deducted from the said sum of £30,000 and retained by the company.

17. Any surplus cable remaining out of the length specified, after the completion of the contract, shall belong to the company, and shall be delivered at Sydney or New Zealand as the company or their engineers shall, before the sailing of the vessels from England, direct.

18. The company shall, subject to the directions of the engineer, be at liberty to work the cable from the time when it is laid until finally certified under Article 15, and the receipts from working the same shall belong to the company, who shall bear the expense of working; but the contractors shall, until the final certificate is given, have full liberty to inspect and examine the line and its connections, and the working and testing thereof, and to test the same at reasonable times, under the supervision of the engineer.

19. The engineers, for the purposes of this contract, shall be Josiah Latimer Clark, Esquire, Henry Charles Forde, Esquire, Charles Hockin, Esquire, and Herbert Arnaud Taylor, Esquire, or any one or more of them acting in the name of their firm of Clark, Forde, & Co., and several members of the firm may act as engineer at the same in different places. The engineer in England shall, subject as hereinbefore provided, duly sign and give every certificate to which the contractors are entitled under this contract when the provisions of the contract upon the performance of which the contractors are entitled to the same respectively shall have been performed.

20. The contractors shall, after the engineer's certificate referred to in Article 15, transfer to the company, for a nominal price, and as the company's absolute property, the steamship "Edinburgh" (which is intended to be employed by the contractors for the purposes of this contract), together with her tanks, machinery, fittings, and stores; and shall deliver the said vessel at the place indicated, under Article 17, for the delivery of surplus cable as soon as practicable after the expiration of the thirty days mentioned in the said certificate. The contractors engage that before leaving England the said ship shall be placed in efficient order and condition as a cable-repairing ship, well found in all requisite tanks, fittings, machinery, and stores, to the reasonable satisfaction of a competent surveyor, to be appointed by the company for the purpose, but subject to arbitration in case of difference. The contractors shall make good any damages to the said ship after leaving England, and deliver her to the company in good order and condition, fair wear and tear and use of stores during her employment for the purposes of this contract being allowed.

21. If any dispute or difference shall arise between the company or their engineer and the contractors as to the meaning of these presents, or anything herein contained, or with reference to the manufacture and testing, shipment or laying of the cable, or any other matter or thing to be done hereunder, then, and in every such case, the matter in difference shall be referred to the arbitration of some person to be appointed by the President for the time being of the Institution of Civil Engineers at the instance of the party first applying for the appointment, and any arbitrator so appointed shall have the same powers in relation to such reference as an arbitrator appointed under the Railway Companies' Arbitration Act, 1859, has in relation to a reference under that Act, and the arbitration and award shall have all the legal effect and consequence of arbitration and award under the last-mentioned Act.

22. This contract may from time to time be varied by agreement between the Boards of the respective companies, parties hereto.

THE SPECIFICATION ABOVE REFERRED TO.

The following are the lengths and types of cable that are to be furnished by the contractors, viz. :—

	Knots.
Type A. Shore end	10
" B. Intermediate	59
" C. Main cable, No. 1	300
" C ¹ . Main cable, No. 2	1,001
Total	<u>1,370 knots.</u>

CORE.

Conductor. (a.) The conductor to be a strand of seven copper wires weighing 107 lbs. per nautical mile, or within 5 per cent. thereof, and the resistance at 75° Fahrenheit shall not be more than 12.13 ohms.

Insulator. (b.) The conductor is to be insulated with three coatings of gutta percha of improved inductive capacity, prepared according to Mr. Willoughby Smith's system, alternating with three coatings of Chatterton's compound, and to weigh 140 lbs. per knot, or within 5 per cent. thereof. The resistance of the completed core to be not less than 150 Megohms per nautical mile when tested at a temperature of 75° Fahrenheit, after twenty-four hours' immersion in water fourteen days after manufacture.

Serving. (c.) The core to be covered with a good and sufficient serving of jute yarn, steeped in cutch or other preservative mixture, and applied wet.

OUTER COVERINGS.

Outer coverings. (d.) *Type A.* (Shore End).—The served core to be covered with ten galvanized BB iron wires, each to gauge No. 00 B.W.G. equal to .375 of an inch when galvanized, or within 2½ per cent. thereof.

(e.) *Type B.* (Intermediate).—The served core to be covered with ten galvanized BB iron wires, each wire to gauge No. 6 B.W.G. equal to .200 of an inch when galvanized, or within 2½ per cent. thereof.

(f.) *Type C.* (Main Cable, No. 1).—The served core to be covered with fifteen galvanized homogeneous iron wires, the diameter of each wire to be No. 13 B.W.G. equal to 0.099 of an inch when galvanized, or within 2½ per cent. thereof, and to bear a breaking strain of not less than 53 tons per square inch, with an elongation of 1 per cent. (g.)

(g.) *Type C*¹. (Main Cable, No. 2).—The served core to be covered with nine galvanized homogeneous iron wires and nine Manilla yarns in alternate order. The homogeneous wires to be No. 13 B.W.G., equal to .099 of an inch when galvanized, or within 2½ per cent. thereof, and to bear a breaking strain of not less than 52 tons per square inch, with an elongation of not less than 3 per cent.

OUTSIDE SERVING.

The Cable C¹ manufactured as above to be covered with two layers of jute yarn, laid on in opposite directions, and two coatings of Clark's compound.

(h.) The cables A B and C, manufactured as above, are then to be covered with two layers of jute yarn, laid on in opposite directions, and three coatings of Clark's compound, the first coating being cool, and put on next the iron wires. Clark's compound.

(i.) The cable, when completed, shall be coiled in suitable water-tight tanks, and be kept as far as practicable constantly under water. Cable to be kept under water.

GENERAL CLAUSES.

(k.) The standard of insulation for the completed cable with either current, before being submerged, to be not less than 250 Megohms per nautical mile, when reduced to a temperature of 75° Fahrenheit after 5 minutes' electrification, the tests to be taken at the actual natural temperature, and to be reduced by calculation to the standard specified. Electrical test.

(l.) The completed cable shall be coiled on board ship in water-tight tanks, and be kept, as far as practicable, under water until submerged. Tanks on board ship.

(m.) The electrical condition of the cable when laid shall be such, as having regard to its previous condition, and making due allowance for the mean actual temperature of the water, as shown by the resistance of the conductor, to give no good grounds for believing that any fault exists in the insulator or conductor. Final electrical condition of cable.

In witness whereof the said parties hereto have caused their respective Common Seals to be hereunto affixed the day and year first written.

The Common Seal of the Eastern Extension Australasia and China Telegraph Company (Limited) was affixed hereto in the presence of,—

JOHN PENDER,
Chairman.

GEORGE LYONS,
Secretary.

The Common Seal of the Telegraph Construction and Maintenance Company (Limited) was hereto affixed in the presence of—

G. W. CAMPBELL,
Director.

W. SHUTER,
Secretary.

No. 2.

Minute of Superintendent of Telegraphs to Under Secretary for Public Works.

I BEG to recommend for the approval of the Honorable the Secretary for Public Works that the line of Telegraphs to connect the New Zealand Cable from the Bunnerong Road to La Perouse Monument, Botany Bay, be erected at a cost not exceeding (£11) eleven pounds sterling per mile, the Department finding all material necessary for the construction of such line.

E. C. CRACKNELL.

Approved.—J.L., 21/1/76.

No. 3.

The Superintendent of Telegraphs to The Secretary to the Post Office.

Sir,

Chief Telegraph Office, Sydney, 22 February, 1876.

As it is urgently necessary to erect suitable premises for the use of the officers in connection with the New Zealand Cable at La Perouse Monument, Botany Bay, I have the honor to request that you will be good enough to cause the necessary instructions to be given to the Colonial Architect to erect a building in accordance with the accompanying plan,* and to proceed with the work without delay.

I have, &c.,

E. C. CRACKNELL,
Superintendent, Electric Telegraphs.

*Plan not published.

The Colonial Architect should give particulars and furnish an estimate, so that provision may be made for this on the Estimates.

No. 4.

No. 4.

Messrs. Hudson Bros. to The Superintendent of Telegraphs.

Sir,

Redfern Saw Mills, Sydney, 12 April, 1876.

Herewith I beg to forward you detailed accounts of the cost of the several buildings erected by us at the Botany Station. I confess that I am surprised to see how much it has cost, but I hope it will not displease you. Since I have seen the account I have been considering how it happens that it has so far exceeded the amount I expected when you first spoke about it, but you will remember it was then proposed to make the building 50 ft. x 20 ft., and when a rough sketch was submitted and the rooms marked out, it was found that it would be necessary to make it 50 x 40—just double the size—and since the building was erected we have had two more additional rooms by enclosing a portion of the verandahs. I may also remind you that we have to erect a separate detached building to be used as a kitchen, besides painting the whole of the buildings with three coats best oil paint, also supply and fixing four iron tanks, each 400 gallons, with eaves, gutters, and down-pipes with all the necessary connections for laying on the water, and, besides that, no mention was made of any masonry being required for the operating room. I have simply charged for the money actually paid away, and have not charged a single penny for our own time in superintending the work, as you will see by the detailed account herewith, as I am afraid you will be surprised to see the cost has amounted to so large a sum.

I am, &c.,

HENRY HUDSON.

The Superintendent of Telegraphs, Dr. to Messrs. Hudson Bros., 1 April, 1876.

No. 5.

W. G. Taylor, Esq., to The Superintendent of Telegraphs.

The Eastern Extension Australasia and China Telegraph Company (Limited).

Sir,

La Perouse, Sydney Station, 21 April, 1876.

With reference to the accompanying papers from Messrs. Hudson, with regard to the buildings for the Cable Station at La Perouse, I have to remark:—

1. That the building as originally designed and agreed on was to be 50 feet x 30 feet, with verandah all round. When we came to consider the space necessary for both cable and land line offices, the alteration to a breadth of 40 feet was made, and this space gained, was at one end subdivided into two small rooms, one as the Government office, and one as my own office. As it is, the accommodation is limited enough, and the work of the station could scarcely have been satisfactorily performed with less space. In addition, I had three rooms for servants made on the verandah, and a platform of a few yards length from the house we use as kitchen to the quarters.

2. The four tanks have been fixed near the station and piping led to them from the roof. This was absolutely necessary as we were, during the first two months after opening, obliged to cart water from a great distance and at a great cost.

3. The block of masonry in the cable-house, to which I presume Hudson refers in last paragraph of his letter, was necessary for the instruments used for testing, and was the table from which we worked for the first month after opening.

I ought to mention to you that the only course I took in suggesting any alterations was to instruct the foreman of carpenters, leaving it to him to acquaint Messrs. Hudson, and them to get authorization for it.

If you would do us the honor of a visit some day, I am sure you will see that our accommodation is meagre enough, and that there are some alterations of a trifling nature which would add greatly to our comfort during the approaching winter, which you must know is our first in this colony.

I am, &c.,

W. GRIGOR TAYLOR,

Manager, N.Z. & N.S.W. Section, Eastn. Teleg. Co.

P.S.—Messrs. Hudson's papers are returned herewith.—W.G.T.

No. 6.

Minute of Superintendent of Telegraphs to The Secretary to the Post Office.

MESSRS. HUDSON BROTHERS, who undertook to erect the temporary offices and quarters at La Perouse for the New Zealand cable staff and our officers, have discovered that the buildings in question have cost them a very large sum over and above their estimate, and they are anxious that the whole matter should be brought under the notice of the Honorable the Postmaster General, with a view to an equitable adjustment of their claim; they are willing to take the cost of the material and labour and submit the items to any one in the trade competent to judge of the amount charged.

An account with the items is forwarded herewith, and if the Honorable the Postmaster General approves, I would recommend that Mr. John Young be requested to check the amounts in question.

E. C. CRACKNELL,
1/5/76.

Submitted.—S.H.L., 2/5/76.

No. 7.

Minute of Superintendent of Telegraphs to The Secretary to the Post Office.

THE temporary quarters at La Perouse are still incomplete, and require an addition to the kitchen, the front under the verandah boarding in, an extension of the verandah near the kitchen, an enclosure for the battery room, steps and railing round the verandah, and some other minor matters, in all amounting to about £100, which I have to request the authority of The Honorable the Postmaster General to expend.

E. C. CRACKNELL,
3/5/76.

Submitted.—S.H.L., 5/5/76.

Approved.—J.F.B., 5/5/76.

B.C., 6/5/76—S.H.L.

No. 8.

Messrs. Hudson Brothers to The Postmaster General.

Sir,

19 May, 1876.

Hearing that there is some difficulty in paying our account for the buildings erected at "La Perouse" for the New Zealand Cable, through the amount being so much in excess of the sum authorized, we beg most respectfully to request you will be pleased to pay us on account the sum sanctioned, viz., £387 14s.; and we also beg to point out to you that the sum named as being the probable cost of the quarters did not include the cable-house, which cost about £120, and is included in the account rendered. As we were entirely ignorant that we were to blame in doing work as pointed out as necessary and urgent, but which it now appears was not specially authorized, we trust the Government will not cause us to suffer, as we should not have done it had we not been ordered.

We are, &c.,

HUDSON BROTHERS.

No. 9.

Minute of Postmaster General.

The total amount which I have authorized for the temporary building at La Perouse is £387 14s., which amount can be paid. The cable-house was of course necessary, though not authorized by me, and the cost of erecting it can be estimated by the Colonial Architect.—J.F.B., 29/5/76.

No. 10.

Messrs. Hudson Brothers to The Postmaster General.

Sir,

Sydney, 30 May, 1876.

Will you kindly inform us when we shall be able to get some money on account of the buildings erected by us at La Perouse Station, Botany. We are very seriously inconvenienced for the want of it; our engagements to provide money to carry on contracts, pay wages, &c., will not admit of any postponement, and having paid away so much on the above work, we are now somewhat embarrassed to meet our engagements, and most respectfully beg to urge you to authorize the payment of at least a portion of our account.

We are, &c.,

HUDSON BROTHERS.

Submitted. This paper might be forwarded to the Supt. Telegraphs, as it bears upon the communication on the subject addressed to him by this Department on the 1st instant.—S.H.L., 8/6/76. £300 was paid Messrs. Hudson Brothers on account of this work yesterday.—P.B.W., 8/6/76. Read.—J.F.B., 8/6/76.

No. 11.

The Secretary to the Post Office to Messrs. Hudson Brothers.

Gentlemen,

General Post Office, Sydney, 1 June, 1876.

In reply to your letter, dated the 19th ultimo, I am directed to inform you that the Postmaster General has approved of the payment to you of the sum of £387 14s., being on account of the erection of temporary telegraphic buildings at La Perouse, and that instructions have been given for the necessary steps to be taken in the matter.

With respect to the cable-house, which has also been erected, I am to state that although not authorized by Mr. Burns it appears to be required; and that the Colonial Architect has now been referred to with a view to the cost of its erection being estimated.

I have, &c.,
S. H. LAMBTON,
Secretary.

No. 12.

The Secretary to the Post Office to The Superintendent of Telegraphs.

Sir,

Sydney, 1 June, 1876.

With reference to the temporary telegraph building at La Perouse, I am directed to inform you that the Postmaster General has approved of the payment to Messrs. Hudson Brothers, of Redfern, of the sum of £387 14s., being on account of the erection of such building, and to request that you will be good enough to have the necessary steps taken in the matter accordingly.

I have, &c.,
S. H. LAMBTON.

Accountant.—P.B.W., 3/6/76. Seen. Voucher made out for £300 on account.—A.M'C., 5/6/76.

No. 13.

The Secretary to the Post Office to The Under Secretary for Public Works.

Sir,

Sydney, 1 June, 1876.

With reference to the cable-house which has been erected at La Perouse, Botany, I am directed to inform you that before sanctioning the payment of a claim of Messrs. Hudson Brothers, Redfern, for £120, on account of the building in question, the Postmaster General is desirous that the cost of erection should be estimated by the Colonial Architect.

I am, therefore, to request that the Secretary for Public Works will be so good as to cause Mr. Barnet to be instructed accordingly.

I have, &c.,
S. H. LAMBTON.

Colonial Architect is requested to make estimate accordingly.—B.C., 3/6/76.—J.R. I have had the building examined by an officer of my department, who reports its value to be about £175.—J.B., 7 Aug., 76. Secretary to the Post Office, B.C., 10/8/76.—J.R.

No. 14.

Minute of Postmaster General.

THE further sum of £120 can be paid to Messrs. Hudson Brothers.—J.F.B., 12/8/76. The Acting Superintendent of Telegraphs, B.C., 14/8/76.—S.H.L. Accountant.—P.B.W., 15/8/76. Seen.—A.M'C.

No. 15.

The Assistant Superintendent of Telegraphs to The Under Secretary for Finance and Trade.

Sir,

Chief Telegraph Office, Sydney, 5 June, 1876.

With reference to the temporary telegraph building at La Perouse, I have the honor to forward herewith Messrs. Hudson Brothers' voucher for £300, and to request, as they are in urgent need of the money, that you will be good enough to approve of the amount being paid out of the Treasurer's Advance Account until it is voted on the Additional Estimates for 1876.

I have, &c.,
P. B. WALKER,
Assistant Superintendent, Electric Telegraphs.

Approved as regards the £300, on the distinct understanding that the Government is in no way pledged thereby to acknowledgment of the correctness of the claim for additional cost of the buildings, which are stated at £1,050 instead of the £300 as originally estimated. The £300 may be paid from the Treasurer's advance account.—A.S., 13/6/76.

Examiner.—Messrs. Hudson Brothers are to concur in the above, in writing, say by signing the memorandum herein, before payment of the £300 is made.—G.E., 13/6/76.

We hereby accept the above understanding.—HENRY HUDSON (for Hudson Brothers). Witness—Chas. Pinhey.

[Enclosure

[Enclosure to No. 15.]

New South Wales.

[Series B.—Contingency Form No. 1.]

Pay Voucher No. 2,302.

Head of Service—Treasury Advance Account; Appropriation Act of 1876. Contingent expenses—Department of Electric Telegraphs.

[Departmental No., 3,355. Sub-head of Estimate—Temporary telegraph building, La Perouse.]

HUDSON BROTHERS, Sydney, for the supply of the undermentioned articles or service, under authority of the Hon. the Postmaster General, 1/6/76.

Date or period of supply or service.		Amount.
1876.		£ s. d.
May 30	To amount due on account, for the erection of temporary telegraph buildings for the use of the New Zealand and New South Wales Cable and Electric Staff at La Perouse	300 0 0
	Total.....	£ 300 0 0

Treasury, New South Wales, Examining Branch, 6 June, 1876.

I certify that the amount charged in this voucher as to computations, castings, and rates is correct, that the service has been faithfully performed, and that the expenditure is duly authorized in terms of the Audit Act.

P. B. WALKER,
Acting Superintendent of Telegraphs.

Received, on the 14th day of June, 1876, the sum of £300 sterling.

HUDSON BROTHERS.

No. 16.

Messrs. Hudson Brothers to The Acting Superintendent of Telegraphs.

Sir,

Sydney, 25 August, 1876.

We beg most respectfully to draw your attention to our account for buildings erected at Botany for the New Zealand cable, and trust you will be good enough to order the account to be paid, as it is now some months since the work was performed.

We are, &c.,

HUDSON BROTHERS.

Accountant to see to this matter at once.—P.B.W., 25/8/76.

Hudson Bros.' claim amounts to £983 5s. 3d., for work performed by them at La Perouse. Of this £300 has been paid, and £120 more is authorized to be paid, leaving a balance of £563 5s. 2d. still due to them, and for which there is no authority.—A.M.C., 29/8/76.

A voucher forwarded to the Treasury, for £207 14s., on 5th September, making the balance now due, as per Messrs. Hudson's account, £475 11s. 3d.—A.M.C., 5/9/76.

I certify that the amount charged in the voucher as to computations, castings, and rates is correct, that the service has been faithfully performed, and that the expenditure is duly authorized in terms of the Audit Act.

P. B. WALKER,
Acting Superintendent of Telegraphs.

Received, on the 7th day of September, 1876, the sum of two hundred and seven pounds fourteen shillings sterling.

HUDSON BROTHERS.

No. 17.

W. G. Taylor, Esq., to The Superintendent of Telegraphs.

The Eastern Extension Australasia and China Telegraph Company (Limited),

Sir,

La Perouse, Sydney Station, 18 December, 1876.

Cable Station at
La Perouse.

I have the honor to bring to your notice the subject of the accommodation of this Company at the La Perouse end of the New Zealand and New South Wales Cable, and beg to refer you to paragraph 8 of the agreement made in London, June 24th, 1875.

From the 7th clause of this agreement your Colony departed, and refused to allow me to construct a line from the end of the cable to Sydney Office. This communication was effected, and is now worked by your Department.

You will also remember that for about two months the officers of this Company lived and worked in tents erected in the enclosure close by the landing-place. In March of this year a temporary wooden building was provided for the Company's and your officers' working and accommodation, and as this building is still in an unfinished state, and as I see no preparations for the erection of the necessary permanent offices and quarters, I beg to point out to you that the chance of spending another winter in this house is naturally viewed with considerable alarm, and will be attended with loss to the Company, and with considerable risk and personal loss and discomfort to the employés here.

You know, sir, the difficulties that attended our working when the line opened; you and the Honorable the Postmaster General have seen how meagre and unsatisfactory is the accommodation we now have; and knowing as you do the disappointing revenue this section of the Company's cable has yielded, I trust you will soon provide a suitable station for the working and administration of this end in the place where, by your objections to paragraph 8, the officers of the Company are doomed to be located and where the business of the line must be transacted.

You will pardon me for mentioning that at the New Zealand end the offices and quarters are finished, furnished, and occupied.

For the information of the Managing Director, I should be glad to know from you when we may be able to move the instruments and property now here and in Sydney into the permanent station buildings.

I am, &c.,

W. GRIGOR TAYLOR,
Superintendent and Electrician.

No. 18.

The Acting Superintendent of Telegraphs to W. G. Taylor, Esq.

Sir,

Electric Telegraph Office, Sydney, 21 December, 1876.

I have to acknowledge the receipt of your communication of the 18th instant, and to inform you that it will be submitted for the consideration of the Honorable the Postmaster General.

I have, &c.,

P. B. WALKER,
Acting Superintendent Telegraphs.

No. 19.

W. G. Taylor, Esq., to The Superintendent of Telegraphs.

The Eastern Extension Australasia and China Telegraph Company (Limited).

Sir,

Sydney Station, 20 January, 1877.

It is now more than a month since I addressed you on the subject of the accommodation provided at La Perouse for the working of the New Zealand section of this Company's cable, and I must beg again to urge this matter on your notice.

The information elicited by my last letter was so very unsatisfactory, that I am compelled to ask you to instruct me to what department of the Government I am to apply, in order that the terms of our contract may be fulfilled.

I am, &c.,

W. GRIGOR TAYLOR,
Superintendent and Electrician.

No. 20.

The Acting Superintendent of Telegraphs to The Secretary to the Post Office.

Sir,

Chief Telegraph Office, Sydney, 24 January, 1877.

I have the honor to forward, herewith, the correspondence relating to the permanent buildings required by the Eastern Extension Australasia and China Telegraph Company, at La Perouse, for the New Zealand Cable offices, and to request that instructions may be given to the Colonial Architect to proceed in the matter, as the Company's Superintendent is pressing for the premises to be completed in accordance with the terms of contract.

I have, &c.,

P. B. WALKER,
Acting Superintendent Electric Telegraphs.

Submitted.—S.H.L., 25/1/77. Approved.—J.F.B., 27/1/77. Referred to Mr. Cracknell (*vide* Postmaster General's minute on papers herewith), B.C., 28/2/77.—S.H.L. *Vide* minute and *plan of building herewith.—E.C.C., 28/2/77.

* Plan not published.

13

No. 21.

Minute of Superintendent of Telegraphs to The Secretary to the Post Office.

I beg to submit, for the approval of the Honorable the Postmaster General, a rough *plan of the proposed Cable-station at La Perouse, and to request that the Colonial Architect be directed to prepare plans, so that tenders may be called for without delay, as the present building will be quite unfit for use unless extensive repairs are made before the winter sets in. * Plan not published.

I may further remark that the Cable Company's officers were promised suitable quarters at the cable landing, which at present they do not possess.

E. C. CRACKNELL,
28/2/77.

Submitted.—S.H.L., 1/3/77. Approved.—J.F.B., 2/3/77.

No. 22.

The Secretary to the Post Office to The Under Secretary for Public Works.

Sir, General Post Office, Sydney, 2 March, 1877.

With reference to the permanent buildings agreed to be provided for the Eastern Extension Australasia and China Telegraph Company at La Perouse, for the New Zealand Cable Offices, I am directed to forward a rough plan, and to request that the Secretary for Public Works may be moved to instruct the Colonial Architect to proceed with the erection of the premises as early as possible, in order that the buildings in question may be completed in accordance with the terms of contract with the Company.

I am to mention that it is represented that the buildings at present in use will be quite unfit for occupation unless extensive repairs are made before the winter sets in.

I have, &c.,
S. H. LAMBTON.

Colonial Architect. B.C., 2/3/77 (with plan).—J.R. I have had an approximate estimate made of the buildings in accordance with the plan furnished, and find they will cost from £5,000 to £6,000. I am not aware of any fund from which the expense can be defrayed.—J.B., 26 March, /77. How many persons are stationed at Botany in connection with the Telegraph Office?—J.H., 28/3/77. Mr. Cracknell. B.C., 29/3/77.—G.H., for U.S.

The number of persons at present to be provided with suitable quarters are as under:—1 superintendent and electrician for the cable, 5 cable clerks, 1 battery-man, 2 domestic servants, 1 clerk for the land line, and 1 more to be provided for. The superintendent and electrician will require at least four rooms in his private quarters. The Under Secretary, Public Works. B.C.—E.C.C., 6/4/77.

As there is plenty of stone for building purposes at Botany, I am of opinion that the Colonial Architect can provide suitable accommodation for a smaller amount than the sum named—£5,000.—J.H., 11/4/77. Colonial Architect. B.C., 12/4/77.—J.R. Urgent.

No. 23.

The Secretary to the Post Office to The Superintendent of Telegraphs.

Sir, General Post Office, Sydney, 28 March, 1877.

With reference to your B.C. minute, dated the 28th ultimo, submitting for the approval of the Postmaster General a rough plan of the proposed cable station at La Perouse, and requesting that steps might be taken to expedite the erection of the same, as the buildings at present occupied by the Cable Company's officers are much out of repair, I am directed to inform you that on the 2nd instant the Public Works Department was requested to issue instructions to the Colonial Architect to proceed with the erection of the proposed new buildings as early as possible, in accordance with the terms of contract with the Company, your plan being at the same time forwarded to the Works Office.

I have, &c.,
S. H. LAMBTON.

No. 24.

Messrs. Hudson Brothers to The Postmaster General.

Sir, Sydney, 17 March, 1877.

We beg most respectfully to request you will be good enough to have our account for the erection of buildings at La Perouse, Botany, examined and settled; it is now over twelve months since the work was finished, and now the Superintendent of Telegraphs has returned we trust the matter will be settled.

We have, &c.,
HUDSON BROTHERS.

Referred to the Superintendent of Telegraphs for report, B.C., 22/3/77.—S.H.L. The papers connected with this matter are before the Hon. the Postmaster General.—E.C.C., 23/3/77. The Secretary General Post Office.—B.C. Submitted.—S.H.L., 26/3/77.

No. 25.

Minute of Superintendent of Telegraphs to The Secretary to the Post Office.

I beg to request the authority of the Honorable the Postmaster General to obtain the sanction of the Honorable the Minister for Public Works to pay Messrs. Hudson Brothers the sum of £475 11s. 3d., for erection of telegraph buildings at Botany Bay, out of the vote to connect the shore end of the New Zealand Cable with the Electric Telegraph Department of New South Wales.

E. C. CRACKNELL.

New

New South Wales.

[Series B.—Contingency Form No. 1.]

Pay Voucher No. 9,408.

Head of Service—Electric Telegraphs. Payable from vote of £2,500; Item No. 573 of Appropriation Act of 1876.
Contingent Expenses.—Department of Electric Telegraphs.

[Departmental No. 1,590. Sub-head of Estimate to connect shore end New Zealand Cable, &c., &c.]

HUDSON BROTHERS, Sydney, for the supply of the undermentioned articles or services, under authority of the Postmaster General, 27/4/77, and Secretary for Works, 9/5/77.

Date or period of supply or service.		Amount
1876. August 25	To balance due for the erection of offices to connect the shore end of the New Zealand Cable with the chief office, Sydney	£ s. d. 475 11 3
	Total	475.11 3

Treasury, New South Wales, Examining Branch, 16th May, 1877.

I certify that the amount charged in this voucher as to computations, castings, and rates is correct, that the service has been faithfully performed, and that the expenditure is duly authorized in terms of the Audit Act.

E. C. CRACKNELL,
Head of the Department.

Received on the 17th day of May, 1877, the sum of £475 11s. 3d. sterling.

HUDSON BROTHERS.

During 1876 no charge was made against item 573 of Appropriation Act of that year. The former payments were charged against item 565 of 1876 for erection of temporary offices for New Zealand Cable New South Wales Operators, at La Perouse. Can the charge in attached voucher be allowed against item 573, as the balance on item 565 is only £92 6s. ? Submitted.—D.W.G., 28/5/77. The Inspector of Accounts. Any contract registered against the vote 573? Mr. G., 29, E.A.R. No contract registered.—D.W.G., 29. The Inspector of Accounts. The service being one, I don't think that objection need be raised, there being Ministerial authority for the payment.—C.R., 30.

I see no alternative but to pay the balance claimed by Messrs. Hudson Brothers, as they appear to have performed the work, which I understand was sanctioned by my predecessor, and it does not appear by the papers that any objection was raised to the additional work while it was being proceeded with.—S.S., 27/4/77.

Superintendent Telegraphs, B.C., 27/4/77.—JAS. D., for Secy.

No. 26.

Minute of Superintendent of Telegraphs to The Under Secretary for Public Works.

THE Honorable the Postmaster General having approved of the balance due for the erection of offices to connect the shore end of the New Zealand Cable with the chief office (£475 11s. 3d.) being paid to Messrs. Hudson Brothers, I beg to request the authority of the Honorable the Secretary for Public Works, to charge the amount in question against the vote taken for this work—item 573, Estimates 1876.

E. C. CRACKNELL, 7/5/77.

Approved.—J.H., 9/5/77. Mr. Cracknell, B.C., 10/5/77.—J.R.

No. 27.

The Colonial Architect to The Superintendent of Telegraphs.

Sir, Colonial Architect's Office, Sydney, 10 May, 1877.

With reference to proposed buildings at La Perouse for the Eastern Extension Telegraph Company, I do myself the honor to request you will be good enough to furnish me with particulars of the smallest amount of accommodation that will answer for the requirements of the service, in order that plans may be prepared accordingly.

I have, &c.,

JAMES BARNET,

Colonial Architect.

This has already been done through the Works Department.—E.C.C.,—11/5/77.

The Superintendent of Telegraphs to The Colonial Architect.

Sir, Chief Telegraph Office, Sydney, 11 July, 1877.

I have to request that you will be good enough to inform me if anything has been done in the matter of the proposed new premises for a telegraph station at La Perouse, as the present building is now in a dilapidated state, and not in a proper condition for the cable officers to live in.

I have, &c.,

E. C. CRACKNELL,

Superintendent Electric Telegraphs.

No. 29.

No. 29.

W. G. Taylor, Esq., to The Superintendent of Telegraphs.

The Eastern Extension Australasia and China Telegraph Company (Limited).

Sir,

La Perouse, Sydney Station, 5 July, 1877.

I beg your indulgence in again drawing attention to the question of the accommodation at this end of the New Zealand and New South Wales section of this Company's cables, with reference to my letters of December 18th, 1876, and January 20th, 1877.

The number and size of the rooms are utterly inadequate. The instruments, batteries, and stores are being damaged by exposure, and the Company's employes put to very great inconvenience and extra expense by this imperfect building.

In February, last year, I was informed that the necessary station buildings would be erected in eight months; I do not yet see any preparations for the work.

May I beg some information on the subject?

I am, &c.,

W. GRIGOR TAYLOR,

Superintendent and Electrician, N.Z. and N.S.W. Cable.

This should be forwarded to the Colonial Architect, who will, I am sure, see the necessity for pushing on the plans for the new building at La Perouse.—E.C.C., 5/7/77. The Secretary, General Post Office.—B.C. Submitted.—S.H.L., 9/7/77. Has any vote been taken for these buildings?—S.S., 10/7/77. £3,000 have been placed on the Additional Estimates for this year.—E.S.T., 11/7/77. This may go on to the Colonial Architect.—S.S., 12/7/77. The Under Secretary for Works, B.C., 12/7/77.—S.H.L. Col. Architect to expedite work, B.C., 13/7/77.—J.R.

No. 30.

Minute of the Secretary of Public Works.

An estimate of £3,000 was voted by the Legislative Assembly to provide for the erection of permanent buildings at Botany for the officers, &c., of the Eastern Extension Australasia and China Telegraph Company; but the vote was assented to on the clear understanding that I should ascertain from the Post and Telegraph Department whether there was a covenant or agreement between the Government of this Colony and the Company, by which the former undertook to erect permanent buildings for the officers of the said Company at Botany. It was pointed out by Mr. A. Stuart and Mr. H. C. Dangar, M.P.'s, that buildings had already been erected at Botany for the use of the Company's staff of officers, and that there was not any covenant in the agreement between this Government and the Company which required the Telegraph Department of this Colony to provide any other accommodation for the officers of this Company, except at the head office in Sydney. I shall be glad to be favoured with the views of the Postmaster General upon this subject, and likewise to be furnished with all the papers relating thereto, with the view of obtaining the opinion of the Attorney General in respect to the liability of the Government of this Colony in respect to erecting buildings for the officers of this Company at Botany.—J.H., 2/8/77. Secretary to the Post Office. B.C., 3/8/77.—J.R.

The Superintendent of Telegraphs will please furnish the information asked by the Secretary for Public Works, and also inform me in what way the Government of this Colony engaged to erect permanent or any buildings at Botany for the Cable Company. The 8th clause of the agreement provides that the Government of the Colonies of New Zealand and this Colony shall give office accommodation, the 7th clause providing that the Company and not the Government should carry their wires into the Telegraph Station at Sydney. Instead of the Company doing this, the Government of this Colony has constructed a line from this office to Botany, and have at considerable cost erected temporary offices and living accommodation for officers, and are asked to erect permanent buildings. The reason for the change from the original agreement requires explanation; it appears to have been sanctioned by my predecessor.—S.S., 6/8/77.

Urgent.—The Supt. of Telegraphs, B.C., 6/8/77.—S.H.L.

No. 31.

Minute of Superintendent of Telegraphs to The Secretary to the Post Office.

HEREWITH I beg to submit **précis* in reference to the erection of permanent buildings for the accommodation of the cable officers at La Perouse.

The facts of the case are as follow:—

The agreement signed in England arranged for bringing the cable into Sydney, the terminal point being the telegraph station. This, of course, was found to be impracticable, as it would have been certain destruction to the cable if it were brought into Sydney harbour, and at any rate it could not be brought to the Sydney telegraph office; it was therefore found more desirable to land the cable at Botany Bay, and construct a land line to connect it with Sydney—a sixpenny rate for ten words being charged for the land line. This of course altered the conditions of the agreement, and it was arranged to build suitable offices at the junction of the cable with the land line.

It will also be seen by clause 8 of the agreement that we are bound to give accommodation in the "telegraph stations at the terminal points of the said cable which the Company shall use for the transmission of messages through the said cable." Now, as it was necessary to make Botany Bay the landing place, it was also necessary to provide a suitable building, and a temporary wooden structure was erected, at the expense of the Government.

Permanent

*See enclosure to letter to Crown Solicitor, No. 32.

Permanent buildings have now been erected by the New Zealand Government at the cable landing in Blind Bay, near Nelson, at a cost of £3,170; but no steps have yet been taken with a view to calling for tenders for the permanent building at La Perouse, although a sum of £3,000 was voted for the purpose.

The erection of the permanent building was approved of by the Honorable the Postmaster General in February, 1877, and the Colonial Architect was directed to prepare the necessary plans, that tenders might be called for without delay. It is therefore quite clear that the Government is bound to provide office accommodation in accordance with clause 8 of the agreement, and that the erection was decided upon by a previous Government, and orders were given for the plans to be prepared for the erection of the building, which, it must be remembered, is as much for the accommodation of our own officers as those of the Company.

The Company's superintendent was informed that the building would be proceeded with without delay, and as the present building is quite unsuitable, I beg to recommend that the permanent building be erected without further delay.

E. C. CRACKNELL, 19/9/77.

Submitted.—S.H.L., 21/9/77.

I think this matter might be referred to the Crown Law Officers, to ascertain if there is any agreement between the Company and the Colony for the erection of permanent and expensive buildings as recommended. It appears from the papers, that it was part of the agreement with the Company to bring the cable into Sydney harbour, and then we were to provide office accommodation—which might have been done without any great expense—but as it seems it was necessary for the protection of the cable and in the interests of the Company, to land the cable at Botany Bay, I am at a loss to understand why we should be asked to incur such a large expenditure.—J.D., 24/9/77.

No. 32.

The Secretary to the Post Office to The Crown Solicitor.

Sir,

Sydney, 4 October, 1877.

I am directed to enclose papers concerning the proposed erection of permanent buildings for the Cable Company at La Perouse, Botany, at an estimated cost of £3,000, including a copy of the agreement entered into with the Cable Company, under which it is considered that the Government of this Colony should incur such expense.

I am to state that the Legislative Assembly has (in Committee of Supply) voted the money required for this purpose, but on the understanding that before it is spent, the Government shall be fully satisfied that in terms of the agreement it was really necessary to incur so large an outlay for the erection of permanent buildings for office and residence accommodation for the Cable Company.

Amongst the papers will be found a *précis* of the case; a minute of the Superintendent of Telegraphs, dated the 19th September, 1877; a minute of Mr. Hoskins, the late Secretary for Works, dated 2nd August, 1877; and a minute of the Postmaster General, dated 24th September, 1877, to which your attention is specially directed.

I am to request that you will be so good as to advise Mr. Davies, whether in your opinion, under the circumstances of the case, the terms of the agreement really require the expenditure of any further sum for the accommodation of the Cable Company's officers.

I have, &c.,

S. H. LAMBTON.

[Enclosures to No. 32.]

By His Excellency Sir Hercules George Robert Robinson, Knight Commander of the Most Distinguished Order of Saint Michael and Saint George, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies, and Vice-Admiral of the same.

To Sir Daniel Cooper, Baronet, of No. 20, Prince's Gardens, South Kensington, London.

GREETING:—

WHEREAS certain Articles of Agreement were on the fourteenth day of February, one thousand eight hundred and seventy-three, made and entered into between the Honorable Henry Parkes and the Honorable Saul Samuel, on behalf of New South Wales, and the Honorable Julius Vogel and the Honorable William Hunter Reynolds, on behalf of New Zealand, and the Honorable Arthur Hunter Palmer and the Honorable J. Malbon Thompson, on behalf of Queensland, which articles are as follows, that is to say:—

(1.) The three Colonies shall jointly enter into an arrangement for the construction of an electric cable, to be laid between some point in New Zealand and some point in New South Wales, and also a cable to be laid from Normanton, in Queensland, to Singapore; the latter to be a through cable, touching only at such points as may be agreed on, and to be entirely distinct the whole distance from the line between Port Darwin and Singapore.

(2.) The arrangement to be for a guarantee of five per centum for a term not exceeding thirty-five years upon a sum not exceeding one million pounds for the cost of the two lines.

(3.) Twelve thousand pounds per annum to be allowed to cover in full all expenses. All receipts above twelve thousand pounds to pass in reduction of the guarantee. The contractors to retain receipts in excess of the guarantee, but if the profits are more than ten per centum the Governments may require that the rate shall be lowered to amounts calculated to reduce the profits to ten per centum.

(4.) The guarantee to be paid only whilst the lines are in working order. Provided that four weeks in each year will be allowed for repairs. If the New Zealand line only be in order, one-third of the guarantee to be paid; if the Singapore line only be in order, two-thirds of the guarantee to be paid. If the lines are not kept in order with due diligence, or if communication should permanently fail, the guarantee to cease.

(5.) The two lines to be commenced and constructed simultaneously.

(6.) The cost per message of twenty words from New Zealand to New South Wales not to exceed fifteen shillings, the charge for each word above twenty being ninepence; and the cost per twenty words from Normanton to Singapore not to exceed forty shillings for the first two years, and thirty-five shillings afterwards, the charge for each word above twenty being two shillings.

(7.)

(7.) Queensland to undertake to keep the land line to Normanton open for the use of the other contributing Colonies, at rates not to exceed at any time seven shillings for twenty words.

(8.) The three Governments to act in unison, and to jointly arrange the details.

(9.) This agreement after being approved of by the respective Governments to be subject to ratification by the respective Parliaments, and the details to be arranged in London by representatives appointed by the three Colonies.

(10.) The Governments will require to be satisfied that the contractors have made proper provision for the use of a through line of communication between Singapore and London.

And whereas the said agreement has been approved of by the Governments and Parliaments respectively of New South Wales, New Zealand, and Queensland. Now, know you that having full confidence in your integrity, ability, and discretion, I, the said Sir Hercules George Robert Robinson, Governor of the Colony of New South Wales, as aforesaid, have thought it fit with the advice of the Executive Council of the said Colony, to and do hereby appoint you, the said Sir Daniel Cooper, Baronet, to act as agent for the said Colony, in England, in co-operation with the duly appointed representatives of the said Colonies of New Zealand and Queensland, in making the necessary contract or contracts for the laying and constructing electric telegraph cables between the said Colonies of New Zealand and New South Wales, and between Normanton in the Colony of Queensland aforesaid, and Singapore, and to act in that capacity under such instructions as you shall from time to time receive.

Given under my hand and the seal of the said Colony, at Government House, Sydney, in New South Wales, aforesaid, this twenty-first day of November, in the year of our Lord one thousand eight hundred and seventy-four, and in the thirty-eighth year of Her Majesty's reign.

HERCULES ROBINSON.

By His Excellency's command,
HENRY PARKES.

EXTRACT from the proceedings of conference conducted by telegraph, on Saturday, the 29th January, 1876, between the Honorable Sir Julius Vogel, K.C.M.G., of New Zealand, at Melbourne, and the Honorable John Robertson, Colonial Secretary, and the Honorable J. F. Burns, Postmaster General of New South Wales, at Sydney. (Ordered by the Legislative Assembly to be printed, 9th August, 1876.)

No. 6.—NEW CABLE CHARGES.

FROM SIR JULIUS VOGEL.

WHAT do you propose about charges for telegrams at Sydney? Cooper agreed to make a charge of sixpence a telegram for delivery, the contractors to deliver them to your messengers at Sydney. You have, I understand, objected to the contractors going to Sydney. What do you propose about charge for telegrams to Sydney?

Answer.

TELEGRAPH Act would not permit line Botany to Sydney in hands Company. We are constructing a line, and propose charge sixpence each way for messages ten words, which will barely cover expenses. This will include delivery charges. Do you approve?

FROM SIR JULIUS VOGEL.

HAD I known at the time I was negotiating with Cooper, that there was an impediment to going to Sydney with line I would have agreed to place Sydney on same footing as elsewhere. I think the compromise you now propose very reasonable, but would suggest half-penny a word, for reasons which apply to all telegrams, and which I have prepared to bring before you as follow:—

The cable charge between New South Wales and New Zealand will include address and signature, whilst ordinary charges do not. Would it not be better therefore to make the land charge for these messages one penny a word, getting other Colonies to do the same? Of course, when messages go past Sydney, I understand the penny rate only is to be charged, and not the additional half-penny. And the rate for English messages is to be the same as that charged from Melbourne to Adelaide.

Answer.

As the cable rate is a ten-word tariff, it would cause confusion in accounts to charge a word rate on land and a ten-word rate for the cable. Would prefer the sixpenny rate, unless Company will consent to word by word tariff, when will be prepared to adopt your suggestion. Hope you will agree to this. The Company could not bring the cable into Sydney, and it would not be safe to lay a subterranean line. The through rate to other Colonies, including Darwin, will not be altered.

FROM SIR JULIUS VOGEL.

I do not think you see the point of their ten words including address and signature whilst Colonial rates do not. However, we can always communicate when line is laid. Meanwhile, you might telegraph Company, suggesting word rate of nine-pence. In any case I will agree to your proposal, sixpence ten words Sydney, and I presume half-penny a word additional. Say if this is so, and also that you do not propose to charge the Sydney rate on messages going past Sydney. That would be contrary to agreement in every way.

Answer.

QUITE understood point. Ten words, including address, sixpence; ten words and half-penny for additional word, satisfactory. This does not apply to messages going past Sydney.

Précis of correspondence, &c., relating to the erection of permanent buildings for the accommodation of the Cable officers at La Perouse, the shore end of the New Zealand Cable.

On the 21st November, 1874, Sir Daniel Cooper was empowered by His Excellency Sir Hercules Robinson, Governor of New South Wales, to act as agent for this Colony in England, in co-operation with the duly

appointed representatives of New Zealand and Queensland, in making the necessary contract or contracts for the laying and constructing electric telegraph cables between the Colonies of New Zealand and New South Wales, and between Normanton (in Queensland) and Singapore.

Subsequently, on the 27th April, 1875, a telegraphic communication was received by the Colonial Secretary of this Colony from Sir Daniel Cooper, London, stating that the "Eastern Extension Company has agreed with Vogel to lay cable from Australia to New Zealand, tariff 7s. 6d. for ten words, and 9d. each additional word, for subsidy of £7,000 yearly, for ten years. Company agree to reduce rate from Port Darwin to London to £3 for ten words, and 6s. for each additional word, for £20,000 a year for ten years; New Zealand to pay all the £7,000 if Australian Colonies will make up the £20,000 for reducing English messages. Vogel suggests you £7,500, Victoria £7,500, South Australia £5,000, reducing also cost of messages to Darwin, Queensland, and Tasmania free. Vogel asks you to pay one-third of £7,500 subsidy; failing £20,000 arrangement, or until it is arranged, he will land cable at Sydney, if you agree, as per yesterday's telegram, not to charge for messages at Sydney, nor more than Victoria rate to Adelaide, and to give Company office room at Sydney."

In a minute referring to the above communication from Sir Daniel Cooper, dated 5th May, 1875, the Superintendent of Telegraphs, Sydney, expressed his opinion that the £7,000 subsidy for laying the cable, with tariff at rate of 7s. 6d. for ten words, and 9d. every additional word, one-third of subsidy to be paid by New South Wales Government, was a fair offer, and that the £2,333 to be paid by this Colony as its share of subsidy was a very fair amount for the probable benefits which would accrue to the Colony; but considering that nearly the whole of the business of the Colony with New Zealand would emanate from Sydney, he urged that a fair charge should be made for all messages transmitted between Sydney office and the cable, to cover clerical and other expenses necessary for working the New Zealand business, which must be repeated from the land lines to and from the cable. He also anticipated that the cable business would not be very large—certainly not more than 100 messages daily, which at the proposed tariff would not exceed £12,000 per annum; and the £7,000 subsidy would make a gross revenue of £19,000 per annum, or about 6 per cent. on cost, leaving no margin for working expenses, which he thought unusually liberal.

On the 24th June, 1875, an agreement was entered into between the Government of New Zealand, the Government of New South Wales, and the Eastern Extension Australasia and China Telegraph Company, relative to the laying of a submarine cable between New Zealand and New South Wales, in which the following clauses appear:—

"Clause 6. The Governors respectively shall afford to the Company all proper and reasonable facilities to enable the Company to lay the said cable and to keep the same in repair, and to acquire any land necessary for their terminal stations in the respective Colonies, and in the event of the Governors having at their respective disposal and in possession lands not being land in a town suitable for such purpose, the Governors respectively shall and will make a free grant thereof to the Company.

"Clause 7. Before the time hereinbefore appointed for opening the said cable, the Governor of New Zealand shall cause to be constructed such land line or lines of telegraph wires as it shall be necessary to construct, to enable messages to be transmitted from the said terminal station of the said cable in New Zealand to and over the existing system of telegraph wires in that Colony, and the Governor of New South Wales shall afford to the Company the necessary facilities for enabling the Company to carry their wires into the telegraph station at Sydney, and the Governors respectively shall provide such operators, clerks, apparatus, instruments, appliances, and materials as shall be requisite or necessary for enabling messages which are to be or have been transmitted through the said cable to be transmitted over the telegraph systems of New Zealand and New South Wales respectively.

"Clause 8. With a view to the more speedy transfer and transmission of messages, the Governors respectively shall until the said subsidy shall cease to be payable and for a period of ten years afterwards, and for so long thereafter as the tariff shall not be in excess of the charges mentioned in clause 11 of these presents, give to the Company accommodation in their telegraph stations respectively at the terminal points of the said cable which the Company shall use for the transmission of messages through the said cable."

On the 29th January, 1876, Sir Julius Vogel, Postmaster General of New Zealand, being in Melbourne, a conference by telegraph was arranged to take place between him and the Hon. John Robertson and the Hon. J. F. Burns, the Colonial Secretary and Postmaster General respectively of this Colony, respecting the San Francisco Mail Service, and the telegraph cable charges, when the following agreement was made in reference to the cable charges:—As the Telegraph Act would not permit a line of telegraph from Botany to Sydney in the hands of a company, the New South Wales Government had to construct a line and proposed to charge sixpence each way between Sydney and Botany for messages of ten words, and for messages going beyond Sydney to charge the ordinary rate, which Sir Julius Vogel agreed to. No mention was made in this conference respecting the erection of building for station at Botany.

On the 22nd February, 1876, the Superintendent of Telegraphs, in a letter to the Secretary, General Post Office, Sydney, requested that the Colonial Architect be instructed to erect a building at La Perouse, in accordance with a plan which was forwarded.

On the 18th December, 1876, Mr. Taylor, the Superintendent of the New Zealand Cable, addressed a communication to the Superintendent of Telegraphs, Sydney, drawing attention to clause 8 of the agreement with the Company, which provided that accommodation should be given the cable officers in the head office at Sydney, and also drawing attention to the fact that the Government departed from the 7th clause of agreement in constructing a line from Sydney to Botany, as this clause provided that every facility should be afforded the Company to enable them to carry the wires into Sydney, and thus have the Sydney station as their terminus, where the accommodation was to be given them, in accordance with the spirit of clause 8. He urged that permanent buildings should be proceeded with immediately, as the officers were then in a very uncomfortable predicament, owing to the dilapidated state of the temporary wooden structure in which they were then quartered, although there does not appear to be any specific agreement whatever between the Government of this Colony and the Company in regard to the erection of buildings at La Perouse.

In reply to the above communication from Mr. Taylor, he was informed that the matter would be referred to the Postmaster General; and accordingly, on the 24th January, 1877, the Superintendent sent a communication to the Secretary, General Post Office, Sydney, requesting that instructions might be given

given to the Colonial Architect to proceed with the erection of buildings at Botany, as the Company's Superintendent was pressing for a completion of the premises in accordance with the terms of contract, which request was approved of by the Hon. the Postmaster General. Subsequently, on the 28th February, 1877, in a minute to the Secretary, General Post Office, a rough plan of the proposed buildings was submitted, with the request that the Colonial Architect be requested to prepare plans, so that tenders might be called for without delay. This minute was approved of, and duly forwarded. On the matter being referred to the Colonial Architect, he estimated that the cost of the buildings, according to plans suggested, would be from £5,000 to £6,000.

In a minute (12/4/77) referring to this matter, the Hon. the Secretary for Public Works intimated his opinion that the Colonial Architect could provide the required accommodation for a much smaller sum than that mentioned, as there was plenty of stone for building purposes at Botany, and £3,000 has been voted, which will be quite sufficient for the purpose.

P.B.W., 20/8/77.

No. 33.

The Colonial Architect to The Superintendent of Telegraphs.

Sir,

Colonial Architect's Office, Sydney, 15 October, 1877.

With reference to proposed buildings at La Perouse for the Eastern Extension Telegraph Company, I have to request I may be furnished with the information asked for by my letter of 10th May last, in order that plans may be prepared.

I have, &c.,

JAMES BARNET,
Colonial Architect.

No. 34.

Minute of Postmaster General.

LET me have all the papers connected with the proposed erection of buildings at La Perouse for the accommodation of the cable officers.—J.F.B., 25/1/78.

The papers on this subject were sent to the Crown Solicitor on the 4th October, 1877.—S.H.L. 25/1/78.

I think the agreement was modified to some extent by the Government fixing the terminus at Botany instead of the head office. Mr. Cracknell might get the papers, and let me have his report in relation to this matter.—J.F.B., 28/1/78.

No. 35.

The Crown Solicitor to The Secretary to the Post Office.

Crown Solicitor's Office, Sydney, 10 June, 1878.

I HAVE the honor to transmit copy of the advising of the Hon. the Attorney General upon the papers respecting the proposed erection of permanent buildings at La Perouse for the Cable Company.

The papers are returned herewith.

I have, &c.,

JOHN WILLIAMS,
Crown Solicitor.

Opinion.

As a bare question of legal construction there is no covenant or agreement between the Governor and the Company to erect permanent or any buildings at Botany for the accommodation of the Company's officers. The terminal station of the Company is by the agreement to be the telegraph station at Sydney (see clause 2). Why this has been departed from is best known to those immediately concerned. I am not aware of any irremovable objection to it. Though the Company could not erect posts and fix wires in this Colony by law, a private Act could have been passed enabling them to do so, as would be necessary in the case of any company passing through land not their own; or still more simply, the Government might have done the work for them, and allowed them the use of the wires from Botany to Sydney. The Government have in fact made the line to Sydney, but for some reason they have not given the accommodation in the telegraph office in Sydney, but instead thereof have built temporary offices at La Perouse. I think the Government are bound to give accommodation in Sydney, or failing that to make such other arrangement as may be reasonably satisfactory to the Company. It is no matter of law, but a simple question of policy whether the erection of premises at a cost of £3,000 is such a reasonable arrangement. I do not see that the erection of the cable at Botany, in lieu of bringing it into Sydney Harbour, can affect the case at all; for if landed on the shores of Port Jackson, it would still have had to be brought to the telegraph office.

The Colonial Architect to The Secretary to the Post Office.

Sir,

Colonial Architect's Office, Sydney, 24 September, 1878.

With reference to the vote of £3,000 for permanent buildings at La Perouse to accommodate New Zealand Cable officers, I do myself the honor to inquire if it is intended to erect these buildings; and if so, that the information asked for by my letters of 10th May and 15th October, 1877, may be furnished, in order that plans, &c., may be prepared for the work.

I have, &c.,

JAMES BARNET,
Colonial Architect.

Submitted.—S.H.L., 25/9/78.

No. 37.

No. 37.

Minute of Postmaster General.

THERE is no doubt that there is nothing in the contract rendering it obligatory on the Government to erect buildings at La Perouse, but it is clearly bound to afford the Company every facility for carrying the wires into the telegraph station at Sydney, and to provide clerks, instruments, &c., to connect the cable messages with the telegraphic systems of New South Wales and New Zealand. It is also bound, under the 8th clause of the agreement, to give the Company reasonable accommodation at the terminal station, *i.e.*, at Sydney, for the transmission of its messages. I understood from Mr. Cracknell, when I dealt with this matter on a previous occasion, that he was unable to give the necessary accommodation in the Sydney office, which was his reason for recommending the establishment of the terminal station at La Perouse; and that the receipts for messages sent over the line between there and Sydney would, in all probability, more than cover the interest on the sum which would be required for the erection of an office and officers' residence at La Perouse. I believe that the arrangement then made was a good one, and that it would not have excited dissatisfaction in any quarter if there had not been some blundering in erecting the temporary building, which is altogether too large, and in the estimate of the cost of the permanent one, which is too high.

I should like, before now finally deciding, to be furnished with a return of the business on the Sydney and La Perouse Line. J.F.B., 2/12/78.

No. 38.

Minute of Superintendent of Telegraphs to The Secretary to the Post Office.

IN compliance with the request contained in the Postmaster General's minute of the 2nd instant, respecting the La Perouse Line, &c., I beg to state that the revenue derived from that line for the year ending June, 1878, was £944, less £454 for salaries, leaving a net balance in favour of the line of £490, equal to 14 per cent. on the cost of line and the proposed buildings.

There is no doubt that permanent buildings should be erected as soon as possible, as the present temporary erection is becoming very leaky, and in wet weather the syphon recorder cannot be worked on the cable, through which great inconvenience is felt. It has also become absolutely necessary that quarters should be provided for our own staff stationed at La Perouse, the present building being most unsuitable in every respect. E. C. CRACKNELL, 10/12/78.

Plans for the proposed new building can be prepared in accordance with the estimate proposed by Mr. Cracknell, and the matter be brought under the early consideration of my successor.—J.F.B., 11/12/78.

Under Secretary for Works, B.C.—S. H. LAMPTON, 12/12/78. Colonial Architect.—W.F. for U.S., B.C., 16/12/78.

No. 39.

Legislative Assembly.

Answers to Questions, Tuesday, 17 June, 1879.

(8.) Messrs. Hudson Brothers:—Mr. McElhone asked the Colonial Treasurer,—

- (1.) What amount did Hudson Brothers render account for, or claim, for building the telegraph station at La Perouse, Botany?
- (2.) What amount did Mr. Stuart arrange to pay them for this work when he was Treasurer?
- (3.) Has any money since been paid to Hudson Brothers for above work, and what Treasurer sanctioned it?
- (4.) Was not the sum paid to them when Mr. Stuart was Treasurer paid them in full settlement for building the above telegraph station?
- (5.) If any further sum has been paid them for above work since Mr. Stuart left office, on what grounds was it so paid to them, and on whose recommendation?

Mr. Watson answered,—

- (1.) £983 5s. 3d.
- (2.) £300.
- (3.) Yes; the balance of their claim.
- (4.) No.

(5.) The balance was paid—part on the authority of Mr. Burns, the late Postmaster General, on the 7th September, 1876, and payment of the remainder was authorized by Mr. Samuel, when Postmaster General, on the 27th April, 1877, on the certificate and recommendation of the Superintendent of Telegraphs.

No. 40.

Minute of Postmaster General.

THE papers relating to the erection of temporary buildings at La Perouse for the accommodation of officers connected with the working of the New Zealand Cable, and the land line between Sydney and Botany, for the production of which Mr. Burns has moved in the Legislative Assembly, cannot be separated from those relating to the proposed erection of permanent buildings, as they both relate to the question of the liability of the Government to provide any accommodation at La Perouse.

There seems to be a considerable amount of ambiguity in the early part of the correspondence, and having been carefully through it, I fail to find any information on some very important points. The principal agreement with the Company, dated the 24th June, 1875, distinctly provides for the terminal point of the Sydney and New Zealand Cable to be the "Sydney Telegraph Office."

What

What may be called the supplementary agreement, dated the 6th September, 1875, leaves it optional with the Company to lay the cable in Botany Bay, instead of Sydney Harbour; but at the same time it distinctly states that the Company will not be relieved of their obligation to lay the cable to the terminal point, viz., the telegraph station at Sydney. I observe the Superintendent of Telegraphs in his reports states, in effect, that it was decided that the terminal station should not be at Sydney, as provided by these two agreements, but at Botany. It is further stated that it was decided to erect a temporary building at Botany, and to construct a land line thence to Sydney; and Mr. Cracknell also states that the reason for this land line being constructed by the Government was that the Telegraph Act would not permit of the Company constructing the line.

All these reports and statements, however, appear to have been made after the terminal station had been fixed at Botany, and after the temporary buildings had been constructed, and also after the land line had been erected. I can find no documents containing any Ministerial decision authorizing the alteration of the terminal station, the erection of the temporary building, or the construction of the land line, *prior to the execution of the works*. Possibly there may be documentary evidence in support of these important deviations from the original contract, and before further action is taken Mr. Cracknell will be good enough to make any remarks he may have to offer in explanation of these points.

Further information seems to be doubly necessary at the present juncture, as, in connection with the papers which Mr. Burns more particularly requires to be produced, there was a very serious excess of the estimate for the present temporary building at La Perouse. According to a minute of Mr. Stuart, when Treasurer, the original estimate for this work by Messrs. Hudson Brothers (for which no formal tenders appear to have been sent in) was £300; but for some reason or other, which does not seem as yet to have been clearly explained, a large quantity of additional work was permitted to be done, bringing up Hudson Brothers' bill to £983 odd, which the Government had to pay. The questions now raised are also important as bearing on the liability of the Government to erect additional buildings of a permanent character at a cost of some £3,000, which buildings are to take the place of the temporary ones erected by Hudson Brothers three years ago at the cost above stated (£983). It is very important that before incurring this large additional expenditure, it should be made quite apparent that the Government are really obliged to provide these buildings.

When the vote of £3,000 for these permanent buildings was before the House in Committee of Supply, in August, 1877, the question was raised as to the liability of the Government, and the Minister for Works then promised that the money should not be expended until the Government had satisfied itself in respect of such liability (see Mr. Hoskins' minute of the 2nd August, 1877). With a view of getting information on this point, Mr. Davies, when Postmaster General, asked for the opinion of the Attorney General; and Mr. Foster subsequently gave it as his opinion that the Government were not legally bound to provide this accommodation. Mr. Foster pointed out, with reference to the land line to Botany, that if the Telegraph Act did not permit of the Company constructing it, the Government might have done it for them (presumably at the Company's cost), and allowed the Company to use it. That Mr. Foster was in some doubt as to the early arrangements in this matter, will be seen from the following extract from his opinion:—"The Government have in fact made the line to Sydney, but for some reason they have not given the accommodation in the telegraph office in Sydney, but instead thereof have built temporary offices at La Perouse. I think the Government are bound to give accommodation in Sydney, or, failing that, to make such other arrangement as may be reasonably satisfactory to the Company. It is no matter of law, but a simple question of policy, whether the erection of premises at a cost of £3,000 is such a reasonable arrangement. I do not see that the landing of the cable at Botany, in lieu of bringing it into Sydney Harbour, can affect the case at all, for if landed on the shores of Port Jackson it would still have had to be brought to the telegraph office."

The whole matter may be summarized as follows:—Admitting, as has been alleged, that it was not desirable or practicable to bring the cable into Sydney Harbour as contemplated by the agreement, was the permission to take it to Botany intended as a concession to the Company? If the Company had been permitted to erect their own land line, or if the Government had done it for them as suggested by the Attorney General, Mr. Foster, at the Company's expense, would they not in that event have had themselves to provide accommodation at Botany, the Government providing the stipulated accommodation in the Sydney station? And if so, why, in making these important concessions to the Company—viz., permitting them, for the protection of their own cable, to bring it into Botany, and constructing a land line for them to the head office—should the Government be asked to incur the large additional expenditure of nearly £1,000 for temporary buildings, and £3,000 for permanent buildings, besides, if I am correctly informed, maintaining a staff of officers at La Perouse for the purpose of attending to the land line? I understand that the revenue derived from this land line more than pays interest on the cost; but as there is no population at La Perouse, it occurs to me that this revenue can only be obtained from an addition to the charge made by the Company for messages by the New Zealand cable, to the extent of an additional sixpence per message, a charge, I conceive, we ought in fairness to have been permitted to make, if the wire *had* been carried into the Sydney station; indeed, I thought this was provided for by the agreement.—S.S., 25/6/79.

The Superintendent of Telegraphs.—S.H.L., 25/6/79. Noted.—B.C. Retd., 1/11/79.

No. 41.

W. G. Taylor, Esq., to The Secretary to the Post Office.

The Eastern Extension Australasia and China Telegraph Company, Limited.

Sir,

New Zealand Cable, Sydney Station, 30 June, 1879.

I beg to be permitted to address you on the question of the cable station here. I have seen by the report of the proceedings in Parliament on Thursday, the 26th instant, that the vote of £3,000 for this work has been withdrawn. I understand this to mean that the work is not to be taken in hand this year.

Permit me to point out to the Honorable the Postmaster General that the present building is utterly inadequate for the work of the station, for the accommodation of the staff of the New South Wales

Wales Government, and of the Cable Company, or for the safe and proper working of the cable. The roof leaks, the stationery, instruments, stores, and furniture are exposed to great damage and waste, and the injury and decay to which all wooden buildings are subject is already making matters worse.

More than three years ago, when the decision was arrived at that the cable should be landed here and worked from here, the then Postmaster General (the Honorable J. F. Burns) told me that a temporary building would be provided, and promised me that proper and substantial offices and quarters should be erected without delay. This I communicated to the Board of Directors of this Company.

The temporary building was at our disposal a month after the cable was laid, but nothing further was done for the next two years.

When Colonel Glover, the managing director of this Company was here, in September last, the question was revived, and Mr. Burns again assured Colonel Glover that the cable offices and quarters should be erected at once. This assurance was taken by Colonel Glover and myself as final and reliable. On these two occasions the word of a Minister of the Crown was given that the New South Wales Government should carry out its part of the negotiations respecting this cable, and was accepted in all good faith. The cable has been laid and been working for three and a half years, while no adequate buildings have been erected.

I have the honor, therefore, to draw your attention again to these facts, and to request that you will submit them to the Honorable the Postmaster General. I would also respectfully desire that I may be informed what further steps it may be necessary for me to take, and whether it is the intention of the New South Wales Government to erect the buildings this year.

I have, &c.,
W. GRIGOR TAYLOR,
Superintendent and Electrician of the N.Z. and N.S.W. Cable.

No. 42.

W. G. Taylor, Esq., to The Secretary to the Post Office.

The Eastern Extension Australasia and China Telegraph Company, Limited.

Sir,

La Perouse, Botany, Sydney Station, 24 July, 1879.

I beg most respectfully to again draw your attention to my letter of 30th ultimo, on the subject of the cable station here, and to request that I may be favoured with a reply thereto. While I write the rain now falling is coming through the roof in many places.

May I ask what the intentions of the Government are, or will you kindly instruct me what steps I am to take, or to whom I am to apply to ascertain this.

I have, &c.,
W. GRIGOR TAYLOR,
Superintendent and Electrician of the N.Z. and N.S.W. Cable.

Submitted.—S.H.L., 26/7/79.

[For reply to this letter see enclosure to No. 44.]

No. 43.

Telegram from Colonel Glover, London, to Postmaster General.

OBSERVE Parliament have rejected vote for telegraph office, Botany. Hope no delay may take place; new office absolutely necessary, and was unreservedly promised by late Government at time laying cable; present building temporary and most inconvenient. GLOVER.

Let a copy of our letter to Mr. Taylor be at once sent to Superintendent Telegraphs with a request that he will report as to the amount of accommodation really necessary.—S.H.L., 9/9/79.

No. 44.

The Secretary to the Post Office to The Superintendent of Telegraphs.

Sir,

General Post Office, Sydney, 10 September, 1879.

I am directed to enclose herewith a copy of a letter recently addressed to the Superintendent and Electrician at the Cable Company's station at La Perouse, and to request that you will report, at your earliest possible convenience, the amount of accommodation really necessary at the cable station.

I have, &c.,
S. H. LAMBTON.

[Enclosure to No. 44.]

The Secretary to the Post Office to W. G. Taylor, Esq.

Sir,

General Post Office, Sydney, 31 July, 1879.

In reply to your letters of the 30th ultimo and 24th instant, I am directed to state that the vote of £3,000 to which you refer, was only withdrawn because there seemed no possibility of the work being carried out this year, even had the Government determined to recognize the Company's claim for the erection of buildings of such a costly character.

The Postmaster General is surprised that the present building should be in the very unsatisfactory condition in which you represent it to be, as it is not three years since it was erected at a cost of nearly £1,000, and he does not admit that wooden buildings are, as you state, liable to injury and decay in so short a period.

Mr. Samuel thinks that all the repairs that can be necessary might be made at a moderate cost.

There is no record in this department of any promise having been made by the late Postmaster General, Mr. Burns, "that proper and substantial offices and quarters should be erected without delay," in addition to the temporary ones; nor does it appear that at any time there was any arrangement of this kind between the Government of New Zealand, your Company, and this Colony.

But

But as there is an implied pledge that these works should be carried out, by the amount having been placed upon the Estimates, the Postmaster General will cause an amount to be placed on the next Estimates-in-Chief, for the erection of suitable premises, after due inquiry as to the actual requirements of your establishment and our own, and the obligations of the Government.

I have, &c.,
S. H. LAMBTON,
Secretary.

No. 45.

The Superintendent of Telegraphs to The Secretary to the Post Office.

Sir, Chief Telegraph Office, Sydney, 16 October, 1879.

In acknowledging the receipt of your communication of the 10th instant, I have the honor to inform you that the amount of accommodation which is really necessary at La Perouse is as follows:—Four rooms for the Superintendent and Electrician; six bedrooms for the operators, 16 x 14; two bedrooms for servants, 16 x 14; one mess-room, 24 x 16; kitchen and scullery, water tanks, stable and buggy-shed; battery-room and store, 20 x 16; two instrument rooms, 16 x 14; Superintendent's office, 16 x 14.

I have, &c.,
E. C. CRACKNELL,
Superintendent of Telegraphs.

The New Zealand Govt. provided 19 rooms at the cable station, Cable Bay, near Nelson.—E.C.C., 16/10/79. Submitted.—S.H.L., 16/10/79.

£3,500 may again be placed upon the Estimates for these buildings.—S.S., 16/10/79.

No. 46.

The Secretary to the Post Office to The Under Secretary for Public Works.

Sir, General Post Office, Sydney, 17 October, 1879.

With reference to an amount of £3,000, which was voted on the Additional Estimates for 1877, for the erection of permanent buildings at La Perouse, Botany, for the accommodation of the New Zealand Cable officers, but which was allowed to lapse, I am directed by the Postmaster General to request that a sum of £3,500 for the same purpose may be placed on the Estimates for the ensuing year.

I have, &c.,
JAS. DALGARNO,
Pro Secretary.

No. 47.

Telegram from Colonel Glover, London, to Postmaster General.

WITH reference to my message of 1st September, would inquire if any arrangements have been made, or are in contemplation, regarding office at La Perouse? It was part of agreement of your Government, when altering scheme for terminus of New Zealand cable.

COL. GLOVER,
18/10/79.

No. 48.

Telegram from Postmaster General to Colonel Glover, London.

THERE is no record of any such agreement as you mention. Have, however, again placed a sum on Estimates, as was done before.

Sydney, 20 October, 1879.

S.S.

No. 49.

Telegram from Colonel Glover, London, to Postmaster General.

ORIGINAL proposal was to carry Company's line into Sydney, but Government objected, and then it was agreed to build an office at La Perouse; if you will ask Burns, Cracknell, and Taylor they will confirm this and give full information. Hope no delay will occur. Burns it out had he remained in office; it was promise of Government; as such, we relied on its being done. (Query? Should probably read, Burns would have carried it out, &c.)

GLOVER,
28/10/79.

No. 50.

Minute of Postmaster General.

IT will be necessary to afford some explanation to Parliament with regard to the item placed on the Estimates for the buildings at La Perouse. Col. Glover's last message should also be answered, and the papers prepared to be laid before Parliament, ordered on the motion of Mr. Burns. This cannot be done, not having received a reply to my minute of the 25th June last, from Mr. Cracknell, whose attention should be called to the matter, which is urgent.

S.S., 29/10/79.

Supt. Telegraphs.—S.H.L., 29/10/79.

No. 51.

No. 51.

Minute of Superintendent of Telegraphs to The Secretary to the Post Office.

THE arrangement in the original agreement, that the New Zealand cable should terminate at the Sydney office, having been found impracticable—and should never have been decided upon—it became necessary to modify the arrangements to meet the difficulty, which was done by landing the cable at Botany and constructing a land line, and as this line cannot be worked in direct circuit with a long subterranean cable for technical reasons, and a submarine line would have been very unsafe and unreliable, it was necessary to erect offices and quarters at La Perouse, not only for the accommodation of the Company's officers, but for our own. Even if it had been practicable to work the line from Sydney (and the Company's electricians were quite of my opinion that it was not), there was not sufficient office accommodation in this building to be spared for the Company.

It will be seen by the printed telegraphic correspondence between Sir Julius Vogel, Sir John Robertson, and Mr. Burns, that this difficulty was seen and dealt with, and the tariff over the land line arranged.

The Ministerial authority for the erection of the land line was given by Mr. Lackey on the 21st January, 1876—*vide* minute marked “*A” —one month previous to its completion; and Mr. Burns authorized me to arrange with Messrs. Hudson Bros. for the erection of temporary quarters, as the work could no longer be carried on in tents at La Perouse.

I am not responsible for the excess in the estimate, which was rendered necessary through additional accommodation being required. Mr. Burns some time afterwards went with me to La Perouse to meet Mr. Taylor and Mr. Hudson, and signified his approval of the extra accommodation, and directed that some £30 or £40 more should be expended upon the place—this can be verified both by Mr. Hudson and Mr. Taylor.

I have already stated in a previous minute that the Government promised to erect the permanent buildings, and this promise was renewed to Colonel Glover by Mr. Burns when the former gentleman was in Sydney, and instructions were given to the Colonial Architect to proceed with the plans.

If the Company had worked their own land line, which they never contemplated, it would have been a different matter, but they would not have done this, as they had the seventh clause of the agreement to fall back upon. The fact is, the whole of the difficulty arose through the want of sufficient local knowledge when the original agreement was prepared in London, and in my opinion the best thing was done to correct the errors referred to; there is no concession that I can see in favour of the Company, and the Government are amply compensated for the work they have performed by the extra work the New Zealand business passing through the Colony brings to our lines, and the special rate over the line to Botany.

I may add that the Government of New Zealand provided accommodation consisting of nineteen rooms at the cable terminus in that Colony.

E. C. CRACKNELL,
31/10/79.

Submitted.—S.H.L., 1/11/79. Send a message to Col. Glover, and say that an amount has been placed upon the Estimates, and the buildings will be proceeded with when it is voted.—S.S., 3/11/79.

1879.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

ROAD FROM BARRABA TO GUNNEDAH.

(CORRESPONDENCE, &c.)

Ordered by the Legislative Assembly to be printed, 4 November, 1879.

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated 6 May, 1879, That there be laid upon the Table of this House,—

“ Copies of all correspondence (with tracings, if any) that has taken place
 “ between the Government, the District, or any other Surveyors, or any
 “ other person, including Surveyor M’Master’s Report, respecting the
 “ opening up of the road from Barraba to Gunnedah, including both the
 “ one *viâ* Weetalibah to Rangira and Borah, and the one *viâ* Carroll and
 “ the Peel and Namoi Crossings.”

(Mr. Dangar.)

NO.	SCHEDULE.	PAGE.
1.	T. G. Dangar, Esq., M.P., to the Minister for Mines, <i>re</i> the advisability of opening up a road from Barraba to Gunnedah direct. 30 June, 1877	2
2.	Mr. Surveyor C. J. M’Master’s report thereon (10 January, 1878), with minutes and copy of plan	2
3.	Mr. Road-Superintendent Stilwell’s memo. with reference to roads Gunnedah to Barraba, and Coonabarabran, with minutes. 6 May, 1878	3
4.	Mr. A. W. Stilwell’s report for July, with minutes. 3 August, 1878	3
5.	Mr. Road-Superintendent Stilwell’s report for August (3 September, 1878), with minutes	3

ROAD FROM BARRABA TO GUNNEDAH.

No. 1.

T. G. Dangar, Esq., M.P., to The Secretary for Lands.

Sir,

Butlerawa, Namoi River, Wee Waa, 30 June, 1877.

I have the honor to submit for your decision the advisability of opening up a road from Barraba to Gunnedah direct. The increasing importance of the Gwydir District, and the want of speedy communication with Gunnedah and its neighbourhood, I consider warrant this road being thrown open for public use. The road between Barraba and Gunnedah is for a considerable distance fenced in, only 1 chain wide, to the great detriment of travelling stock and teamsters generally. Therefore, if the above road were opened, it would very materially benefit the inhabitants of the Lower Barwon and Namoi Rivers.

I have, &c.,

T. G. DANGAR.

Forwarded to Mr. District-Surveyor Dewhurst for report.—R. D. FITZGERALD (for the Surveyor General), 17 August, 1877.

No. 2.

Mr. Surveyor M'Master to The Surveyor General.

Sir,

Narrabri, 10 January, 1878.

I have the honor to inform you that I have examined the country lying between Barraba and Gunnedah, and I have arrived at the conclusion that a direct road is very necessary between these two towns.

According to paragraph No. 75 of the surveyor's instructions I have the honor to report—

1. The road would not interfere very much with existing measurements, as roads have been reserved through most of them in suitable positions.
2. No other surveyed roads could be utilized, but the reserved roads through portions would most likely be adhered to.
3. The only other available routes from Gunnedah to Barraba are by Tulcumbah, about 10 miles round, and by Carrol and Keepit, about 14 miles longer than the proposed direct road.
4. There are not many people on the Gunnedah end of the proposed road, owing to nearly the whole of the land being purchased by two or three capitalists; but on the Barraba end of the road, and about Borah Creek, there are a considerable number of free-selectors and farmers who require means of access both to Barraba and Gunnedah. Access would be provided to nearly 100,000 acres of alienated land.
5. No serious injury would be sustained by the proprietors of adjacent lands, or to the lessees of the runs through which the proposed road would pass.
6. The natural obstructions to traffic are very trifling, and could be removed at a very small cost. The artificial obstructions consist of fences, in which are left narrow gates that can only be used by horsemen and foot passengers.
7. There are no enclosures along the proposed road.
8. The principal traffic would be "through traffic" from the Gwydir and Upper Barwon to the proposed railway line at Gunnedah. I believe this traffic would be very considerable, as it would be considerably nearer to go to the railway at Gunnedah than it would be to go to the railway at Tamworth.
9. Tracks have been in existence from Bangari and Borah to Gunnedah for at least thirty years. There is no track from Barraba towards Gunnedah, except by Carrol.
10. The best part of the land has already been alienated, and the land now vacant consists of mountainous and ridgy country, well adapted for sheep farming, and is being rapidly secured.

There is always a scarcity of water on this route in the summer time.

I do not think any cuttings will be required to make the road available for traffic, nor are there any bridges wanted.

The estimated distance of the proposed new road is about 47 miles.

I have, &c.,

COLIN J. M'MASTER.

To the Surveyor General.—The great drawback to this route is the scarcity or rather total want of water. I think the course of the railway might be determined on prior to action being taken.—A. DEWHURST, 15 January, 1878.

This report should be sent to the Railway Department, and they be asked to furnish a tracing, illustrative of the course the railway will take relatively with Barraba and Gunnedah.—R. D. FITZGERALD (for Surveyor General), 4 May, 1878.

Under Secretary, Public Works.—L.G.T. (for U.S.), B.C., 6 May, 1878.

Commissioner of Railways.—J.R., 13 May, 1878. There is no intention, so far as I know, of connecting Gunnedah and Barraba by railway. A railway is being constructed from Werris Creek to Gunnedah.—J.W. (*pro* W.H.Q.), 10 June, 1878. Inform Under Secretary for Lands, B.C., 11 June, 1878. Submitted to the Deputy Surveyor General.—O.R., 19 June, 1878.

No. 3.

3.

No. 3.

Mr. Road-Superintendent Stilwell's Memo. to the Commissioner for Roads.

MEMO.—I have sums to expend on both of these roads, but as they are not defined, and in both cases there are, I understand, several tracks in use at present, I am at a loss how to proceed. Shall I select the best route in each case and improve that?
Narrabri, 6/5/78.
A. W. STILWELL.

Examine and report on both routes after conference with surveyor, and when other duties admit. This road will not be urgent until rail is opened to Gunnedah.—W.C.B., 8/5/78. Mr. Stilwell, B.C.
Note.—A.W.S., 13/5/78.

No. 4.

Extract from Mr. Road-Superintendent Stilwell's Report.

Road—Barraba to Gunnedah.

"I HAVE gone over this road, but cannot decide as to best line for new road until I hear from Mr. Surveyor Dow, who, I understand, is to survey this line; I have written to him for information."

A. W. STILWELL,
3/8/78.

Are there not altogether too many roads being surveyed here?—W.C.B., 9/8/78. Barraba is 60 miles from Tamworth, but I am told it will be possible to make Gunnedah by the road proposed in 45 miles. Both Tamworth and Gunnedah are the same distance from Newcastle, so that when railway is opened to Gunnedah this should be an important road. £1,125 is at present available for it.—A.W.S., 12/8/78.

No. 5.

Extract from Mr. Road-Superintendent Stilwell's Report.

Road—Barraba to Gunnedah.

"I FIND that I have been misinformed as to the distance between these two places. The road is not yet surveyed, but I have gone through twice by different routes—the last time taking a man to point out the most direct line, and my opinion as to the importance of this road is quite altered. I had been given to understand by the P.M. and others at Gunnedah, that a good road not more than 45 miles in length could be obtained, but the distance is nearly 60 miles, over high country for 6 or 7 miles, and a very badly watered line. The distance from Barraba to Tamworth is 60 miles by a fair road, already improved, so that for through traffic the line to Gunnedah would be superfluous, and the expense of constructing it a waste of public money. The road will be useful for the first 25 miles out of Gunnedah, where it crosses good level country on which there is a good deal of settlement, and I propose to expend this year's vote in improving the approach to the town across the river flat, doing as much metalling there as funds will admit of; but I think that instead of being advanced to first-class, as I recommended on amended schedule sent in, it should next year be reduced to third-class. I will submit estimate and specification for the work I propose, with your approval, as soon as possible."

I have, &c.,
A. W. STILWELL.

Be more careful in recommending again.—W.C.B., 4/9/78. Noted.—A.W.S., 7/9/78.

No. 6.

T. G. Dangar, Esq., M.P., to The Commissioner and Engineer for Roads.

Sir,

I do myself the honor to bring under your notice

Sydney, 2 December, 1878.

* * * * *

4. Road—Barraba to Gunnedah.

This road wants surveying without delay; it is 20 miles shorter than from Barraba to Tamworth; when surveyed it should be proclaimed 20 chains wide and withdrawn from lease.

Mr. Goodwin, licensed surveyor, is in the locality, knows the country well, and might undertake the survey.

A great quantity of stock, and the chief part of the traffic, will travel by this road much better than Tamworth, and it passes through unalienated land.

* * * * *

I have, &c.,
THOS. G. DANGAR.

Mr. Stilwell to report on this in connection with the road asked for from Bingera to Narrabri.—W.C.B., 13/12/78. Mr. Stilwell, B.C.

I have inspected the country on the line of the proposed road, and have reported, 78-5,394 unfavourably upon it. I found the distance much greater than given in Mr. Dangar's letter herewith. There is high broken country to be crossed, and the line is very badly watered throughout, and therefore not well suited for travelling stock, for which a route will be opened to the Namoi, by the road which is to be opened from Bingera to Narrabri. Taking the nature of the country into consideration, I do not think it will be possible to make a road from Gunnedah to Barraba in less than 55 miles, or nearly 5 miles shorter than the present improved road from Barraba to Tamworth, and I think it very unadvisable to endeavour to make this the route for through traffic. For some 25 miles from Gunnedah the country is good and level, and this portion of the road should be improved, and the Namoi bridged at Gunnedah, as I have already recommended in report above referred to.—A. W. STILWELL, 20/12/78.

Mr.

Mr. Stilwell reports that he cannot recommend this road—Gunnedah to Barraba—as it is nearly as long as, and much more badly watered than the present route—Barraba to Tamworth—on which considerable expenditure has been made. He, however, recommends that a bridge be put across the Namoi at Gunnedah, and 25 miles of the road next Gunnedah be improved and classed as third class. I concur.—W.C.B., 31/12/78.

Appd.—J.L., 10/1/79. Roads, B.C., 13/1/79.—J.R. Mr. Lackey to note for schedule. Noted.—J.G.L., 14/1/79. Mr. Eames, note bridge for estimates.—W.C.B., 13/1/79. Bridge already noted.—G.C.E.

No. 7.

The Under Secretary for Public Works to T. G. Dangar, Esq., M.P.

Sir, Department of Public Works, Sydney, 13 January, 1879.
Referring to your letter of the 2nd ultimo, respecting the road Gunnedah to Barraba, I am directed to inform you that it has been decided to erect a bridge across the Namoi at Gunnedah, and a length of 25 miles of the road in question will be improved and classed as a third class road.

I have, &c.,
JOHN RAE.

No. 8.

Mr. Licensed-Surveyor Loder to The Surveyor General.

Sir, Tamworth, 31 March, 1879.
I have the honor to transmit plan of road through portion No. 2, parish of Rangira, county of Nandewar, to be opened as a parish road under Act of Council, 4 William IV No. 11, and surveyed by me in accordance with instruction No. 78,426, of 26th July, transferred to me by Mr. District-Surveyor Dewhurst.

The road proposed to be opened is over level country, and there are no improvements in the way.
The road proposed runs through land, the property of Irving Winter.
The road at present is very little used, and I do not think there will ever be much traffic on it.
The instrument used was a theodolite, and date of survey, February, 1879.

I am, &c.,
GEORGE LODER, L.S.

No. 9.

Mr. Licensed-Surveyor Loder to The Surveyor General.

Sir, Tamworth, 31 March, 1879.
I have the honor to transmit plan of road through portion No. 3, parish of Weetalibah, county of Nandewar, proposed to be opened as a parish road under the Act of Council, 4 William IV No. 11.

The road proposed runs through level forest country, and there are no obstacles or improvements in the way.

The road proposed runs through land now the property of T. P. Willsallen.
The road is seldom or ever used by the public.
The instrument used was a theodolite, and date of survey, February, 1879.

I am, &c.,
GEORGE LODER, L.S.

No. 10.

Mr. Licensed-Surveyor Loder to The Surveyor General.

Sir, Tamworth, 31 March, 1879.
I have the honor to transmit plan of road through portion No. 4, parish of Tulcumbah, county of Mandewar, proposed to be opened as a parish road under the Act of Council, 4 William IV No. 11.

The road proposed runs through level forest country, and there are no obstacles or improvements in the way.

The road proposed runs through land the property of Irving Winter.
The road is seldom or ever used by the public.
The instrument used was a theodolite, and date of survey, February, 1879.

I am, &c.,
GEORGE LODER, L.S.

No. 11.

Mr. Licensed-Surveyor Loder to The Surveyor General.

Sir, Tamworth, 31 March, 1879.
I have the honor to transmit plan of road through portions No. 29, 30, 31, 82, and 86, in parish Rangira, county of Nandewar, to be opened as a parish road under Act of Council, 4 William IV, No. 11.

The road proposed runs through level forest country, and there are no obstacles or improvements in the way.

The land proposed for a road is the property of Irving Winter.
The road is seldom or never used by the public.
The instrument used was a theodolite, and date of survey, February, 1879.

I am, &c.,
GEORGE LODER, L.S.

No. 12.

No. 12.

Mr. Licensed-Surveyor Loder to The Surveyor General.

Sir,

Tamworth, 31 March, 1879.

I have the honor to transmit a plan of road through portion No. 119, parish of Yarrari, Appendix F. county of Nandewar, proposed to be opened as a parish road under the Act of Council, 4 William IV, No. 11.

The road proposed runs through level forest country, and there are no obstacles or improvements in the way.

The road proposed runs through land the property of Irving Winter.

The road is seldom or ever used by the public.

The instrument used was a theodolite, and date of survey, February, 1879.

I am, &c.,

GEORGE LODER, L.S.

No. 14.

Mr. A. G. Martin to The Secretary for Mines.

Sir,

287, George-street, 8 April, 1879.

I have the honor to inform you, that an application has been made for the opening of a road from Barraba to Gunnedah, in the counties of Darling and Nandewar, and instructions have been issued to survey the said road.

In ordinary cases it is usual to await the notification in Gazette inviting objections to the opening of a road, but the extraordinary character of the application is such that I deemed it expedient in the public interest, and in the interest of my clients, to place the objections to the opening of this road before you at the earliest possible period.

The following facts and information is submitted for your consideration, with a view to prevent what would be a most serious injury to the owners of the lands through which the proposed road would pass, and also to prevent the substitution of a road for the road now in use, and which has for many years afforded all the necessary facilities for transit, and is more suitable in every respect than the proposed road.

The grounds upon which the road is asked for are understood to be:—

First.—That the public require it.

Second.—That it is shorter and more direct than the existing road.

Replying to the first ground—The public do not require and have not asked for it; two or three persons only, viz., land speculators, have put the matter in motion.

Replying to the second—The proposed road would from Barraba to Borah Station, on Borah Creek, take the present existing road, but from this point to Gunnedah, about 35 miles, would go nearly the whole distance through alienated lands, owned by two persons; and, although 4 miles shorter than the present road, yet along its whole distance there is no water, nor are there any inhabitants, except an out-station or two.

A considerable distance would be unsuited for road-making, for from Gunnedah for the first 7 miles it would pass through flooded country, or subject to being frequently flooded, 3 or 4 miles being across the current, the next 12 miles over rotten and black soils, would have to go over Borah range by steep, difficult, and long gradients. The natural obstructions to traffic would therefore be great and useless, at a cost not likely to be gone to, could not well be overcome, and certainly not by ordinary road expenditure. In addition, a bridge would have to be erected across the Namoi, at Gunnedah, for in times of fresh or flood the river is for long periods not crossable.

The injury to the owners of land through which the proposed road would pass would be of the most serious nature; it would go through several costly enclosed paddocks.

It may be said that the proposed and present roads would, to a large extent, run somewhat parallel to each other.

The proposed road will for the most part pass through the alienated land of two persons only. The vacant Crown land along the route and adjacent thereto is comparatively of limited area, and consists of ridgy country and mountains, none of which is available for agricultural settlement, and therefore will not probably be occupied by any considerable population.

Settlers

Settlers and selectors at the Barraba end of the road and in the neighbourhood of Borah Creek (at which latter place, however, are scarcely any, the land being nearly all the property of one person) have the same means of access to Barraba as would exist should the proposed road be made, inasmuch that it would be the present line to that extent, and they have also a much easier access to Gunnedah if they require it by the existing road; their traffic, however, is to Tamworth.

There is scarcely any direct traffic between Barraba and Gunnedah, nor is it likely that ever the railway reaching Gunnedah would cause any such, inasmuch that Tamworth is the direct and natural outlet for all the traffic from Barraba, or which passes through that town from the great country and places beyond, viz., Cobbedah, Bingera, Warialda, Yetman, the Gwydir, Upper Barwon, and the Macintyre Rivers; for, although the distance from Barraba to Gunnedah by the proposed route is some 4 or 5 miles shorter than from the former to Tamworth, yet the great superiority of the Barraba-Tamworth road to that of the proposed road, no matter how well made it might be, will always cause it to be used for the traffic in preference to any other line that could be made.

It is a most important mail-coach line, upon which a large expenditure has been regularly made, is of a comparatively level nature, and along its whole distance is settlement.

The existing road between Barraba and Gunnedah is the route which was chosen by the public, both for stock and travellers, when the country was open to them to take any road they thought proper. It utilizes 25 miles of existing made roads—viz., 8 miles of that between Barraba and Tamworth, and 17 miles of that from Gunnedah to Tamworth, leaving only about 26 miles to be made; is well watered throughout its whole length; crosses the Namoi and the Peel Rivers at excellent fords; passes through the town of Carrol—previously making a junction with the Tamworth and Gunnedah road; and thence by the Gunnedah side of the Namoi to that town.

It is the old travelling stock route (being part of the main stock route to the Maitland and Sydney, by Breeza, &c.) in use, perhaps, more than forty years; is, for a large distance, surveyed and laid out as such and along it; has numerous and well-known reserves for travellers' use; it is well adapted for good road making, passes through the heart of a trace of country on which is a numerous and densely settled farming population—mostly selectors—and very much used by them for local traffic; whereas, between these settlers and the proposed road is a long line of hills or range, over which it would be most difficult to take vehicles or drays. There is also a considerable settlement farther on towards Gunnedah.

* If the principal object be to connect Barraba with the railway at Gunnedah, I submit that it is untenable, because it will be seen, on reference to the projected extension of the railway from Tamworth, the proposed route is to Warialda, *via* Manilla and Barraba; this line when carried out will render the proposed road unnecessary, so far as the proposal is involved to connect Barraba with the railway at Gunnedah.

It is now trusted that it has been shown that the proposed road is unnecessary and uncalled for, and would if granted be unsuitable even for the existing insignificant direct or through traffic—that a much more suitable and better road exists already, which, although 4 miles longer, is more than compensated for by its great advantages—and that for a "stock route" (as is also proposed) it would be impracticable, seeing it is utterly waterless for so great a distance, and, perhaps an equally cogent reason, that it would pass through alienated lands where travelling stock would be likely to trespass, consequently the owners thereof would subject themselves to liability, to litigation, and legal proceedings.

I therefore, on behalf of my clients, Mr. T. W. Allen and others, trust that after considering the facts and circumstances herein set forth, that you will see a sufficient reason to stay further action in the matter, and that you will refuse to open the road in question.

I am, &c.,
ALEX. G. MARTIN.

Urgent.—The Surveyor General, B.C., 9/4/79.—H.W. Mr. District-Surveyor Dewhurst for report. From Mr. Licensed-Surveyor Rotton's progress journals it appears that the road has been laid out only through alienated land, in the county of Nandewar.—ROBT. D. FITZGERALD (for Surveyor General), 24 April, '79.

No. 15.

Mr. Surveyor Dewhurst to The Surveyor General.

Sir,

Tamworth, 29 April, 1879.

In reporting on the protest made by Mr. A. G. Martin, in behalf of his clients, I may simply observe that it is desirable that all the towns in the district should be connected in the most direct possible manner by roads, and, therefore, it has been considered expedient to open short lengths along this line through a few alienated portions of land where no right-of-way existed previously.

I entirely coincide with the writer in all that he has stated, with the exception of one paragraph which I have noted.

I may state that, notwithstanding the very laudable desire of a few residents and property owners of Gunnedah to force traffic to their town, by what is really an impossible route, the residents of Barraba and the county of Darling generally will take their stock and loading along the splendid and well-watered reserve that leads to the Tamworth terminus, from which the railway freight will be considerably less than at Gunnedah.

I sincerely hope that no large sum of public money may be expended on this Barraba-Gunnedah Road, which can only be available at any time to horsemen and light vehicles.

I consider that no proclamation of the road is necessary, but, at the same time, that gates should be erected wherever the reserved roads are intersected by fences, to prevent anything like obstruction.

I have, &c.,
A. DEWHURST.

No. 16.

* The writer is quite wrong here—this road would connect Barraba with Gunnedah and the railway station there; but as neither teams nor stock could travel along it, the connection would be almost useless.—A. DEWHURST.

No. 16.

Messrs. J. O'Neill, J. Crotty, and others, to The Secretary for Mines.

Sir,

We, the undersigned, farmers and others, resident in the vicinity of the road now in use from Barraba to Gunnedah, respectfully beg to submit to you the following statements, to show that the opening of the proposed new road from Gunnedah to Barraba will not be of general public utility and is not required:—

1. That between the River Namoi and Borah Creek, a distance of 33 miles, there is no water to be had on the proposed line of road.
2. That the proposed road would be only about three miles (3) shorter than the present one, and that about five miles (5) of the former would, in its natural state, be impassable in winter, and could not be made passable unless at a very great expense.
3. That there are a number of reserves and a plentiful supply of water on the present line of road—neither of which are procurable on the proposed road—therefore showing the superiority of the present road over that of the proposed road, both for ordinary traffic and travelling stock.
4. That there is very little settlement along the line of the proposed road, and the fact of the land being in the hands of a few persons there probably will be no settlement of population for many years to come.
5. That there is a large area of Crown land available for selections adjacent to the road now in use, whereas the land through which the proposed road would pass—and the greater part of the adjacent land is, we believe, in the hands of not more than two owners thereof, and the Crown land on the proposed road and vicinity is not adapted or suitable for selections or settlement, because of its sterility.
6. That there is scarcely any direct traffic between Gunnedah and Barraba, nor is it likely when the railway is opened to Gunnedah that the direct traffic will increase, because Tamworth is so situated that it is at present the natural outlet of all traffic from Barraba, and, in view of future railway extensions, the inhabitants, present and future, located on the intermediate country lying between Barraba and Gunnedah, will be more favourably circumstanced for the transit of products, either by road or rail, than they can possibly be by connecting Gunnedah with Barraba by the proposed road.

Trusting that you will take the above facts and circumstances into your favourable consideration,

We have, &c.,

JAMES O'NEILL,
JOHN CROTTY,
JAS. HODDLE,
W. TATTAM,
MICHL. TATTAM,
AARON CHAPMAN,
And 172 others.

The Surveyor General.—H.W., B.C., 3/5/79.

No. 17.

Mr. J. Higgins to T. G. Dangar, Esq., M.P.

Dear Sir,

Gunnedah, 30 May, 1879.

Referring to the Barraba Road, I have found out more particulars of the different routes lately, and, on comparison, find that a great mistake is being made in bringing the road the route that is intended. In the first instance the road, as now being surveyed, is for the greater part of the way through alienated lands, consequently cannot be available as a stock route, which is a great mistake. In the second, the distance by proposed route is 55 miles, and the first and only water on the route after leaving Gunnedah is 35½ miles, and this is a tank on purchased land of Irving Winters', which he intends closing, consequently you may say there is no available water on the whole line. The distances are as follows:—

Gunnedah to Weetalibah	3 miles.
Weetalibah to Rangari	22 "
Rangari to Borah	10½ "
Borah to Barraba	20 "
Total	55½ "

And the first water is at Borah. The route has another drawback—that in a heavy flood time it is out of the question to get from Weetalibah to the proposed bridge here. The route that should have been adopted is as follows:—From Gunnedah to Burburgate, from there to Wean, thence to Milli Creek, from there to Connor's Gap, then to Barraba, in all 45 miles; and all the way after you leave Burburgate (8 miles from here) it is Crown lands, and well watered, and in any flood time the bridge here will be approachable. You will therefore see it is not only shorter, but in every sense a preferable route, and the nature of the country is much better for a road, being decidedly smoother country.

The road now being surveyed will be almost useless, except for a horseman.

I do not know if it is too late to mend the matter; if not you would do the residents of both places a service if you would kindly inquire into the matter.

I am afraid the constant rain we are having will interfere very much with the opening of the line here in September; however I hope not. At the present time the engine runs within 9 miles of here.

J. E. HIGGINS.

This letter is submitted by Mr. Dangar, M.P., for the consideration of the Minister for Mines, who will perhaps forward same to the surveyor, who has charge of the work, for his report. It is from the proprietor of the *Namoi Independent*, Gunnedah, and seems so important, that a special report should be obtained as to the best route, and save going through alienated land, and thus giving a stock route before the survey of road is further proceeded with.—4/6/79.

For action see No. .—A.J.S., 27 June, 1879.

No. 18.
Legislative Assembly.
Questions and Answers.

QUESTION.—Road from Barraba to Gunnedah:—Mr. Cameron, (for Mr. Dangar), asked the Secretary for Mines,—

1. Has any progress been made in the survey of the road from Barraba to Gunnedah; if so, what, and the name of the surveyor who has charge of the work?

2. By which route is this road at present being surveyed?

3. Is it a fact that it goes mostly through alienated land, and therefore cannot be availed as a stock route, the distance by the proposed route being 55 miles, and the first and only water after leaving Gunnedah being at Borah, 35 miles, and this tank belonging to the lessee of the run, which he intends to close, and no other available water on this line, the distance being as follows:—Gunnedah to Weetalibah, 3 miles; Weetalibah to Rangari, 22 miles; Rangari to Borah, 10 miles; Borah to Barraba, 20 miles; total, 55 miles; and that in heavy floods it will be impossible to approach the Gunnedah Bridge?

4. Is the Minister aware that the better route would be from Gunnedah to Burburgate, thence to Wean, Mili Creek, Connor's Gap to Barraba, the distance being only 45 miles, and all the way after leaving Burburgate, 8 miles from Gunnedah, through Crown lands well watered, and in flood time approachable to the bridge—shorter, preferable, and smoother country, the road being surveyed useless except to horsemen?

5. Will the Minister, before the survey of this road is proceeded with any further, cause a special report to be obtained as to which is the better route, and act accordingly?

Mr. Baker answered,—

1 and 2. Survey of parts of a road from Gunnedah to Barraba has recently been made by Mr. Licensed-Surveyor Loder through a few measured portions where a road had not previously been provided.

3 and 4. The District Surveyor reports that residents of Barraba and county of Darling generally, will take their stock and loading along the well-watered reserve that leads to the Tamworth terminus, from which the railway freight will be considered less than at Gunnedah.

4. A copy of Mr. Dangar's questions will be sent to the District Surveyor for a further report on the road in question.

Date of Question, 20th June, 1879.

Date of Answer, " "

Mr. District-Surveyor Dewhurst.—In accordance with the reply (No. 5) given by Minister for Mines to questions asked by Mr. Dangar, M.P., Mr. Dewhurst's attention is also drawn to the accompanying petition—Roads, 79/1,481.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

ROAD FROM BARRABA TO GUNNEDAH.
(FURTHER CORRESPONDENCE, &c.)

Ordered by the Legislative Assembly to be printed, 2 June, 1880.

FURTHER RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated 6 May, 1879, That there be laid upon the Table of this House,—

“ Copies of all Correspondence (with tracings, if any) that has taken place between the Government, the District or any other Surveyors, or any other person, including Surveyor M'Master's Report, respecting the opening up of the road from Barraba to Gunnedah, including both the one *via* Wectalibah to Rangira and Borah and the one *via* Carroll and the Peel and Namoi Crossings.”

(*Mr. Dangar.*)

SCHEDULE.

NO.	PAGE.
1. Questions asked in the Legislative Assembly by Mr. Cameron, for Mr. Dangar, with respect to the road Barraba to Gunnedah. Replies thereto; minutes, &c., thereon. 23 April, 1879	2
2. Question asked in the Legislative Assembly by Mr. Bennett—"When will tenders be invited for bridge over River Namoi, and new line of road Gunnedah to Barraba, be notified in Government Gazette, &c.?" Reply thereto. 6 November, 1879	2
3. Mr. Irving Winter to the Honorable the Minister for Mines (presented by T. G. G. Dangar, Esq., M.P.), advocating old road <i>via</i> Carroll, and objecting to proposed new road which passes through his run and freehold land, Tulcumbah Station, and enclosing tracing; minute thereon. 21 November, 1879	2
4. Mr. District-Surveyor Dewhurst to the Surveyor General, reporting in compliance with memo. of 20th instant, with tracing; minute thereon. 29 November, 1879	3
5. T. G. G. Dangar, Esq., M.P., to the Honorable the Minister for Mines, with respect to above road, and <i>précis</i> of action taken. 9 December, 1879	3
6. The Under Secretary for Mines to T. G. G. Dangar, Esq., M.P., acknowledging receipt of Mr. Irving Winter's letter (see No. 3), and informing him that action on proposed new line of road will be stayed until a report upon the "pencil line" (see plan) shall have been obtained. 9 December, 1879	4
7. Same to same, returning tracing. (See No. 3.) 22 December, 1879	4
8. T. G. G. Dangar, Esq., M.P., to the Honorable the Minister for Mines, asking name of surveyor who had been charged to report on the roads. 22 December, 1879	4
9. The Under Secretary for Mines to T. G. G. Dangar, Esq., M.P., in reply to above, informing him Mr. District-Surveyor Dewhurst has been so instructed. 23 December, 1879	4
10. Memorial from residents of Barraba, Bingera, and Gwydir Districts, requesting that a survey of the road may be ordered, and that Mr. Goodwin, a local surveyor, may be instructed to make such survey, presented by T. G. G. Dangar, Esq., M.P. 5 January, 1880	5
11. Extract from letter, Mr. Irving Winter to T. G. G. Dangar, Esq., M.P., objecting to road marked in pencil (see plan), as it is, in his opinion, quite impracticable. 18 January, 1880	5
12. Memo. of the Under Secretary for Mines. 4 February, 1880	5
13. The Under Secretary for Mines to T. G. G. Dangar, Esq., M.P., acknowledging receipt of memorial presented by him on 5th January, 1880 (see No. 10), also extract from letter of Mr. Irving Winter's (see No. 11), and informing him matter shall receive immediate attention. 6 February, 1880	5
14. Mr. A. G. Martin to the Honorable the Minister for Mines, objecting, on behalf of Mr. E. Vickery, to the proposed road, as if carried out it must pass through his alienated land and fenced paddocks; minute thereon. 23 February, 1880	5
15. Question asked in the Legislative Assembly by Mr. Dangar, with respect to above road, and replies thereto. 27 February, 1880	6
16. Questions asked in the Legislative Assembly by Mr. Coonan, for Mr. Dangar, to the same effect, and also if there is not more correspondence connected with this matter not included in previous Return, such as petition from Barraba residents, asking for opening of road &c. (see No. 10); and if so, will the same be produced and printed? Replies thereto. 16 March, 1880	6
17. Questions asked in the Legislative Assembly by Mr. Barbour, for Mr. Dangar, with respect to above road, and replies thereto. 31 March, 1880	6
18. Questions asked in the Legislative Assembly by Mr. Dangar with respect to the above road, and replies thereto; minutes thereon. 31 March, 1880	7

ROAD FROM BARRABA TO GUNNEDAH.

No. 1.

Legislative Assembly.—Questions and Answers.

Question.

ROAD from Barraba to Gunnedah:—*Mr. Cameron*, for *Mr. Dangar*, asked the Secretary for Mines,—

1. In view of the speedy opening of the Railway to Gunnedah, which is 20 miles nearer Barraba than Tamworth, and money having been voted to expend on this road—Have any instructions been issued; and if so, when, and to what surveyor, and the date of such, for marking and surveying a road from Barraba to Gunnedah?

2. Has the work been commenced; if so, what progress has been made; if not, when will it be?

Mr. Baker answered:—

1. Yes; to *Mr. Licensed-Surveyor Loder*, in October, 1878.

2. Yes; the road has been laid out through measured portions in the county of Nandewar.

Date of question, 23/4/79; date of answer, 23/4/79.

Mr. Landers,—Obtain papers by telegram.—*R.D.F.*, 25/9/79.

Telegram from the Surveyor General to *Mr. Licensed-Surveyor G. Loder*, Tamworth.

Return paper, Roads 78/159, transferred by *Mr. Dist.-Sur. Dewhurst* to you at once.—*J. F. LANDERS*, Secretary and Cashier, for Surveyor General, 25/9/79.

Reply:—Papers 78/159 were transferred by me to district-surveyor in April last; they will be transmitted to you to-morrow.—*GEORGE LODER*.

No. 2.

Legislative Assembly.—Question and Answer.

Question 3.

Mr. Bennett to ask the Secretary for Public Works,—When will tenders be invited for the erection of a bridge over the River Namoi, at Gunnedah; and the new line of road from Gunnedah to Barraba be notified in the Government Gazette, and opened for general traffic?

Mr. Lackey answered:—

Tenders for the bridge over the Namoi, at Gunnedah, will be invited in about a month from this date.

Date of question, 6th November, 1879; date of answer, 6th November, 1879.

No. 3.

Mr. I. Winter to The Secretary for Mines.

Sir,

Sydney, 21 November, 1879.

I have the honor to place before you the following case, which I respectfully ask be dealt with as I suggest, if, upon reference to the proper officer, the matter be found to be as I herein state.

The facts are as follows:—

A main road has been in existence for many years from Gunnedah to Barraba, by way of Carroll; it is also a stock road, and is freely used.

Recently a road has been surveyed from Gunnedah to Barraba, and which passes through my run and freehold land, "Tulcumbah" Station.

The late survey, if carried out, will be only about two miles shorter, but it passes through no settlement or population, and will do me an injury without benefiting the public, whereas the road by way of Carroll is fairly peopled by small farmers, who have there a ready market for their produce to carriers and others on the road. I therefore ask that only the old road be allowed. Of course I am writing in my own interest, and do not wish my unsupported statement to be believed without due inquiry.

I therefore respectfully urge that no further steps be taken until after report on the subject be received.

I may add that the new proposed road will be more expensive to keep in order, and in time of floods is impassable for many miles: this also can be proved.

I have, &c.,

IRVING WINTER.

The Minister wishes a copy of the enclosed tracing to be made, showing the position of the line of road marked thereon in pencil, in order that the enclosed tracing may be returned to *Mr. Dangar*, M.P. The Minister also wishes action in respect to the line of road marked on the tracing as "Proposed new line of road" to be stayed till a report upon the pencil line shall have been obtained, and that such report be obtained with the least possible delay.—*The Surveyor General*, B.C., 8/12/79.—*H.W.*

The Surveyor General, B.C., 10/12/79.—*G.E.H.*, p. U.S.

Tracing now to be sent to *Mr. Dangar*, M.P., as directed by the Minister for Mines, copy having been made and placed with papers.—*A. J. Storrs*, 19/12/79.

Please return for further action.

It

It is recommended that Mr. Winter be informed that there is no intention of closing the road *via* Carroll; also that the road shown on the tracing accompanying his letter, and described thereon as "proposed new line of road," is in fact a road in existence provided in the subdivision of Crown Estate, and forming boundaries of alienated lands in some cases, and reserved through them in others, the continuity of which it has been considered necessary to complete recently by survey of a road through a few portions of land where it did not previously exist.—ROBERT D. FITZGERALD, for Surveyor General, 22 January, 1880.

No. 4.

Mr. District-Surveyor Dewhurst to The Surveyor General.

Sir,

Tamworth, 29 November, 1879.

In compliance with your memorandum dated 20th November, 1879, I have carefully considered the questions asked in the Assembly, that appear on Paper, Roads 79/1,481, the Ministerial replies to which are strictly in accordance with fact.

Referring however to question 4, which appears to require special notice, I have to report that a road from Gunnedah *via* Burburgate to Barraba could be obtained suitable for traffic of all kinds, but that it would equally with that from Gunnedah direct to Rangari be far inferior to the road *via* Carroll, as the line is so very badly watered.

2. The statement that this line would be shorter than the one previously applied for by the residents of Gunnedah is obviously incorrect, as you will readily perceive by inspection of the tracing I now enclose, for with Gunnedah as a starting point the road would be taken to Burburgate or the reserve near it 7 miles (a "board" in which about 1 mile of direct distance would be made), thence to portion No. 20, parish of Vickery; thence to portions 92, 91, parish of Mihi; and thence along the track leading to Rangari, where it meets the road previously petitioned for with such apparent force, but now condemned by the petitioners with equal reason.

3. I may observe, however, that care will be taken in all future surveys not to close the track from Burburgate to Rangari, so that it may always be available for future traffic, if any should arise.

You have been pleased to draw my attention to the petition on Roads 79/1,481. The statements there advanced are substantially correct. There is positively no public expression to be found in the numerous letters that have been written on this subject. There is at present no traffic between Barraba and Gunnedah of any consequence, nor is it all likely that it will increase to any great extent. The natural outlet for Barraba produce is by the main road to Tamworth, which as I have before observed is suitable and convenient from every point of view, while a branch road exists leading from the main road at Oakey Creek *via* Keepit and Carroll to Gunnedah that promises advantages as to extensive reservations, soil, and water, no other route can offer.

4. In conclusion, it is my duty to submit that, in my opinion, a survey from Burburgate towards Barraba would be an utter waste of time and public money, so far as present public convenience is concerned and in view of action proposed in paragraph 3 of this letter. I have, &c.,

A. DEWHURST.

Under this report I cannot recommend the survey of a road from Gunnedah towards Barraba *via* Burburgate. A travelling stock route *via* Carroll has been established, and there is another road in existence, viz., that which has been left in the subdivision of the Crown Estate (now alienated) in the parishes of Weetalibah, Yarrari, Tulcumbah, Willuri, Rangari, &c., the continuity of which has recently been completed by survey in some five (5) places of a road through portions where it had not previously been reserved.—ROBT. D. FITZGERALD (for Surveyor General), 22 January, 1880.

No. 5.

T. G. G. Dangar, Esq., M.P., to The Secretary for Mines.

Re making and proclaiming of road from Gunnedah to Barraba.

Sir,

Sydney, 9 December, 1879.

Respecting our interview a few evenings ago at Assembly with reference to above subject, and my handing you various papers connected therewith, I will feel obliged if you will kindly have made in the office a copy of Mr. Winter's map which I handed you, and cause his to be returned to me, as I wish to return the same to Mr. Winter, as it bears a record of his purchased land.

I feel sure this subject will receive your earliest attention, as the opening up and marking of this road is much desired by Gunnedah and Barraba people, and will prove much nearer than Tamworth.

I may state that the people wish for and have every confidence in Mr. Surveyor Goodwin to do this work, and would wish you to instruct him to perform it, first examining all the proposed routes and determining the best and most practicable way, the nearest and well-watered, and route for stock. Mr. Goodwin is acquainted with the country, and can make a road less than 30 miles; a stock route should also be proclaimed on this road when decided, passing through Crown and unalienated land, otherwise it will only be a fenced lane.

Parliament has voted money for a bridge over Namoi River at Gunnedah, but site cannot be determined until Barraba and Gunnedah road marked.

I shall be glad to hear from you Mr. L.-S. Goodwin has been specially instructed in the matter.

Yours faithfully,

THOS. G. G. DANGAR.

Road Barraba to Gunnedah.

30/6/77.—T. G. Dangar applied to have above opened to the public.

Reply received Lands, No. 77/1,316. Sept. 27th, 1877, referred to District-Surveyor Dewhurst for report.

See Votes and Proceedings of Assembly, 1878. Report received. Instructions issued to lay out road through alienated land. F.

F. Bacon, Gunnedah, May 2nd, 1879.—The present proposed Barraba road is no good, as it is only 7 miles shorter than going round by Carroll, and goes through 30 miles of alienated land. A good road could be made by going down 3 or 4 miles, and striking out by Mick's dam, Bell's selection, and Connor's Gap to Barraba, through Crown Lands, and water at several places, and about 46 miles, would not injure Mr. Wills Allen who is objecting to the present road.

Wants proclaiming half-a-mile on each side, and withdrawn from lease for travelling stock road Gunnedah to Barraba, and then scheduled as a 3rd class road and cleared. Road has been marked through measured portions; it is through Crown Lands it is wanted. A mistake is made bringing road as intended. The road is at present being surveyed mostly through alienated land, and therefore cannot be availed as a stock route. Distance by proposed route is 55 miles, and the first and only water on it after leaving Gunnedah is 35½ miles, and this a tank on purchased land of Irving Winters, which he intends closing. No available water on the whole line.

The distances are as follows:—

Gunnedah to Weetalibah	3 miles.
Weetalibah to Rangari	22 "
Rangari to Borah	10½ "
Borah to Barraba	20 "
Total	55½ "

First water at Borah.

Route suggested by "Prudence" is objected to; would necessitate two bridges, one over Namoi, one over Peel, and not reduce distance. The main object is to make the distance from Barraba to Gunnedah less than to Tamworth.

It is proposed to adopt the route Gunnedah to Burburgate; then to Ween; then to Mihi Creek; then to Connor's Gap; then to Barraba, 45 miles; and all the way after leaving Burburgate, 8 miles from Gunnedah is Crown Lands, well watered, and in flood-time the bridge at Gunnedah will be approachable; the other route, it is said, it will not be so. This way is shorter and preferable, and nature of country better for road and smoother. The road at present being surveyed is almost useless, except for a horseman. Survey of parts of this road were made by Surveyor Loder, but only through alienated land.

No. 6.

The Under Secretary for Mines to T. G. G. Dangar, Esq., M.P.

Sir,

9 December, 1879.

See No. 3.

With reference to the letter of Mr. I. Winter, presented by you, in which he objects to the road recently surveyed from Gunnedah to Barraba, which passes through his Tulcumbah Station, I am directed to inform you that the Minister for Mines has requested that a copy of the tracing be made showing the position of the line of road marked thereon in pencil, so that your tracing may be returned, and also that the action on the line of road marked as "Proposed New Line of Road" be stayed until a report upon the pencil line shall have been obtained. Such report has been requested to be furnished with the least possible delay.

I have, &c.,

HARRIE WOOD,
Under Secretary.

No. 7.

The Under Secretary for Mines to T. G. G. Dangar, Esq., M.P.

Sir,

22 December, 1879.

See No. 3.

Referring to my letter of the 9th instant, respecting Mr. I. Winter's objection to the road recently surveyed from Gunnedah to Barraba, which passes through his Tulcumbah Station, I have the honor to return you the tracing as stated therein.

I have, &c.,

HARRIE WOOD,
Under Secretary.

No. 8.

T. G. G. Dangar, Esq., M.P., to The Secretary for Mines.

Sir,

22 December, 1879.

You will recollect making a note in the House, and kindly promising to inform me the name of surveyor who had been charged to report upon roads Barraba to Gunnedah, and if it was Mr. L.-S. Goodwin. I shall be thankful for the information.

Yours faithfully,

THOS. G. G. DANGAR.

Urgent. Let Mr. Dangar, M.P., be informed to-day.—H.W., 23/12/79.

No. 9.

The Under Secretary for Mines to T. G. G. Dangar, Esq., M.P.

Sir,

23 December, 1879.

With reference to your letter of the 22nd instant, requesting to be apprised if Mr. Licensed-surveyor Goodwin has been charged to report on the road Barraba to Gunnedah, I have the honor to inform you that Mr. District-surveyor Dewhurst has been instructed to report on the road in question.

I have, &c.,

HARRIE WOOD,
Under Secretary.

No. 10.

No. 10.

Messrs. A. Brown and others to The Secretary for Mines.

The Memorial of the undersigned residents of Barraba, Bingera, and Gwydir Districts,—
Respectfully sheweth:—

1. That your memorialists are persons residing in the Liverpool Plains and Gwydir Districts.
2. That they have several times expressed their anxiety to have a road opened from Gunnedah to Barraba. As yet but little notice has been taken of their requests.
3. That they believe that a good road could be surveyed without interfering much with alienated lands.
4. That the advantages derivable from this road being opened would be greatly felt by your memorialists and residents of the above-named districts, inasmuch as it would bring the railway traffic some 20 miles nearer, and over a country not much settled. It would tend to open up the country, and teamsters and travelling stock would avail themselves of the advantages of this road, as the present road to Tamworth is nearly all fenced in. This alone would be a great consideration to travellers, and again the mails would have a quicker transit.
5. Your memorialists would respectfully request that a survey may be ordered, and that Mr. Goodwin, a local surveyor, who has a thorough knowledge of the country, may be instructed to make a survey of said road without delay.

And your memorialists will ever pray, &c.

A. BROWN,
WM. ETHERIDGE,
JOSEPH ARCHIBALD,
And 121 others.

Presented by T. G. G. Dangar, Esq., M.P., 5/1/80.

No. 11.

Extract from letter, Mr. I. Winter to T. G. G. Dangar, Esq., M.P.

Dear Sir, Tuleumbah, 18 January, 1880.

I am in receipt of your favour of 24th ultimo, referring to the Gunnedah-Barraba Road, and have to thank you for the interest you have taken in the matter in placing the same in a proper light before the Minister for Mines.

I note the proposed road marked in pencil on the plan, and must inform you that in my opinion that route is quite impracticable, as it runs the greater part of the distance along and over a range of mountains with cliffs averaging 100 to 150 feet in height, and so steep that they are almost impassable on horseback, and there being no water except in the low-lying country, and there only in flood-times when the road would be impassable.

I have not the least doubt but that the surveyor's report, when sent in, will confirm my statement in every particular.

No. 12.

Memo. of Under Secretary for Mines.

RETURN papers to the Deputy Surveyor General.

Sir John Robertson, M.P., will see the Deputy Surveyor General on the subject.

H.W., 4/2/80.

No. 13.

The Under Secretary for Mines to T. G. G. Dangar, Esq., M.P.

Sir, 6 February, 1880.

I have the honor to acknowledge the receipt of the memorial from certain residents of Barraba, Bingera, and Gwydir Districts, for the opening of a road from Gunnedah to Barraba, and also a letter from Irving Winter, Esq., respecting the same road, and to inform you the matter shall receive immediate attention. See No. 10.
See No. 11.

I have, &c.,
HARRIE WOOD,
Under Secretary.

No. 14.

Mr. A. G. Martin to The Secretary for Mines.

Sir, 23 February, 1880.

Mr. E. Vickery has informed me that instructions have been issued for the survey of a road from Gunnedah to Barraba, which road would, if carried out, pass through his alienated land and his fenced paddocks. I beg first to call your attention to the fact that some few months since a road was marked from Gunnedah to Barraba about eight (8) miles easterly of the route now proposed and nearly parallel to it. It appears to be the desire and intention, not of the department, but of some persons pecuniarily interested in the opening of a road to Barraba, to separate the existing road from Barraba to Tamworth,—a road which is in every respect superior to either of the proposed roads, and the character and position of which is naturally more suitable for the connecting of Barraba with Tamworth railway terminus. In the northern extension of the railway from Tamworth, it is certainly very probable that Barraba will be tapped by this extension to our northern border. If this should occur, as it probably will within a few years, neither one or the other of the roads so proposed to connect Gunnedah with Barraba would be required, and should they ever by any mischance obtain an existence they would be rendered useless and unnecessary by the aforesaid extension.

The route of the proposed road herein specially referred to is some 8 miles westerly of the previously marked road, and for some considerable distance parallel to it, and would pass through Mr. Vickery's

Vickery's Burburgate Run, at the back of which there is a range between Gunnedah and Barraba almost impassable. It may safely be asserted that this proposed road would be impracticable, and in every respect inferior to the previously marked road. If the road formerly marked has been found to be unsuitable and impracticable unless by the expenditure of unreasonable amounts of money, and if its position was such that it would not attract a large traffic, how much less justifiable would be the making of a road under less favourable circumstances, and in a position less likely to attract traffic because further removed from a settled population, and because there is but a small number of persons settled between the townships of Gunnedah and Barraba on the proposed line of road.

I therefore have the honor to request, on behalf of Mr. E. Vickery, that you will not only not open the road referred to, but that you will stay all preliminary proceedings in the matter.

I have, &c.,

The Surveyor General, B.C., 24/2/80—G.E.H., p. U.S.

A. G. MARTIN.

It is recommended that applicant be informed that at present there is no intention of opening a road from Gunnedah to Barraba, *via* Burburgate. The district surveyor has reported most favourably of the existing road *via* Carroll, and shortly a road will be available through the parishes of Boorobil, Gunnebene, Yarrari, Tulcumbah, Willuri, and Rangari, between and through alienated lands, when a few short pieces which have recently been surveyed through alienated land (where no road previously existed) have been proclaimed.—ROBT. D. FITZGERALD (for Surveyor General), 10 March, 1880.

Submitted.—H.W., 12/3/80.

No. 15.

Legislative Assembly.—Questions and Answers.

Department of Mines, Parish Roads Branch, 27 February, 1880.

Question No. 4.

ROAD from Barraba to Gunnedah:—Mr. Dangar asked the Secretary for Mines,—

1. Has the district or any other surveyor's report been received upon the several suggested lines of road from Barraba to Gunnedah; if so, the nature thereof; and if not, when is it likely to be, and will the report be expedited?

2. Has (or will) the district surveyor, or other surveyor deputed by him, personally inspected and travelled over these routes?

Mr. Baker answered:—

1. Yes; Mr. District-Surveyor Dewhurst has reported favourably of the line *via* Carroll.

2. Yes. Answer, 27/2/80.

No. 16.

Legislative Assembly.—Questions and Answers.

Question No. 2.

ROAD from Barraba to Gunnedah:—*Mr. Coonan*, for Mr. Dangar, asked the Secretary for Mines,—

1. With reference to Papers, "Road Barraba to Gunnedah," ordered by this House to be printed 4th November, 1879,—Will there be any objection to place upon the Table of this House, and have printed, a copy of the whole of the original document marked No. 5, therein alluded to?

2. Are not the words "100,000 alienated" in the fourth paragraph of Mr. Surveyor M'Master's report meant for "100,000 unalienated," and printed wrongly?

3. Is there not more correspondence connected with this road matter not included in this Return in Mines or Works Departments, such as Petition from Barraba residents, asking for the opening of this road, &c.: if so, will the same be produced and printed?

See No. 11.

Mr. Baker answered:—

1. The original document (No. 5) is the general report of the Road Superintendent for the month of August, 1878, and includes the whole of the roads and bridges in his charge. The extract given respecting the Barraba and Gunnedah road is complete, and the report contains no other reference to it.

2. The words in Mr. Surveyor M'Master's report have been correctly printed—they are "one hundred thousand alienated."

3. There are papers of a later date than the printed Return, and with them is a Petition of the residents of Barraba, Bingera, and the Gwydir Districts, asking for a road between Barraba and Gunnedah, the precise route of which they do not indicate. They will be laid upon the Table of the House.

Date of question, 16/3/80; date of answer, 16/3/80.

No. 17.

Legislative Assembly.—Questions and Answers.

Question.

ROAD from Barraba to Gunnedah:—Mr. Barbour, for Mr. Dangar, asked the Secretary for Mines,—

1. The dates of the several instructions given by the Mines, Works, or Survey Departments (see Votes and Proceedings No. 59, of 27th ultimo, question No. 4, and reply thereto), calling for reports on the different suggested roads from Barraba to Gunnedah, and to what Surveyor issued, particularly the date of the latest instructions so issued?

2. Was District-Surveyor Dewhurst's favourable report upon the road *via* Carroll made previous or subsequent to the date of last instructions for a special report upon the several lines suggested for road Barraba to Bingera?

3. Has the district or any other surveyor reported upon the three suggested roads since they were last instructed; if so, name of surveyor, and date of inspection?

4. Have not three routes been suggested—one "*via* Carroll," one by Burburgate, and an intermediate one—does the reply infer these three routes have been travelled over and reported upon by the district

district or other surveyors appointed by him, with a view to deciding the best road; and, if so, has the whole length of lines been gone over, or merely parts; and if so what portions. If not, will instructions issue to make a thorough inspection of all these lines before deciding the one to be surveyed and opened to the public, having in view a travelling stock road and water for public use.

Mr. Baker answered:—

1. Instructions were sent from the Surveyor General's Office as follows:—District-Surveyor Dewhurst, 22nd August, 1877, transferred to Surveyor M'Master, 28th August, 1877; District-Surveyor Dewhurst, 29th July, 1878, transferred to Licensed-Surveyor Loder; District-Surveyor Dewhurst, 24th April, 1879; District-Surveyor Dewhurst, 28th June, 1879; and the last instructions to District-Surveyor Dewhurst on 20th November, 1879. On the 8th December, 1879, instructions were issued by me to the Surveyor General, but were not sent to the district-surveyor, because he had already reported under date 29th November, 1879.

2. The report referred to was made subsequent to the latest instruction on the subject sent to Mr. District-Surveyor Dewhurst (namely that of 20th November, 1879), which was in connection with a previous instruction to him, issued 28th June, 1879, in compliance with a reply given in Parliament to question asked by Mr. Dangar on 20th June, 1879, relative to road Barraba to Gunnedah, to which questions and the replies thereto Mr. Dewhurst's attention was especially directed, but was prior to my instruction to the Surveyor General of the 8th December last.

3. No report has been received from the district-surveyor since 29th November last.

4. The three routes named have been suggested. I am not in a position to state that all the lines have been inspected throughout, but will cause an inquiry to be made, and if not already completely inspected, I will cause a complete inspection to be made.

Date of question, 16 March, 1880; date of answer, 31 March, 1880.

No. 18.

Legislative Assembly—Questions and Answers.

Question 1.

Mr. Dangar to ask the Secretary for Mines,—

1. The dates of the several instructions given by the Mines, Works, or Survey Departments (see Votes and Proceedings, No. 59, of 27th ultimo, Question No. 4, and reply thereto), calling for reports on the different suggested roads from Barraba to Gunnedah, and to what surveyor issued, particularly the date of the latest instructions so issued?

2. Was District-Surveyor Dewhurst's favourable report upon the road *via* Carroll made previous or subsequent to the date of last instructions for a special report upon the several lines suggested for road Barraba to Bingera?

3. Has the district or any other surveyor reported upon the three suggested roads since they were last instructed; if so, name of surveyor, and date of inspection?

4. Have not three routes been suggested,—one *via* Carroll, one by Burburgate, and an intermediate one; does the reply infer these three routes have been travelled over and reported upon by the district or other surveyors appointed by him, with a view to deciding the best road; and if so, has the whole length of lines been gone over, or merely parts; and if so, what portions; if not, will instructions issue to make a thorough inspection of all these lines before deciding the one to be surveyed and opened to the public, having in view a travelling stock road and water for public use?

Referring to Mr. Dangar's question No. 1 to be asked on the 31st instant, will the Surveyor General be good enough to obtain from Mr. District-Surveyor Dewhurst, if necessary, the information requisite to answer that part of paragraph 4 as to whether the whole or what portions of the three routes referred to have been travelled over and inspected by the district or other surveyor.

The Surveyor General, B.C. 25/3/80, H.W. Received 3 o'clock, Thursday, 25 March.

Such information as the office materials afford was supplied to Mines a week since, copies of which can be made if necessary. Should anything further be desired, a telegram might be sent to Mr. District-Surveyor Dewhurst.—A. J. STORRS, for Surveyor General (in absence of Surveyor General and Deputy Surveyor General).

Please supply copy and send telegram.—H.W., 25/3/80. Copy of replies sent to Mines, and telegram sent 3:55 p.m.—A.J.S., 25 Mar.

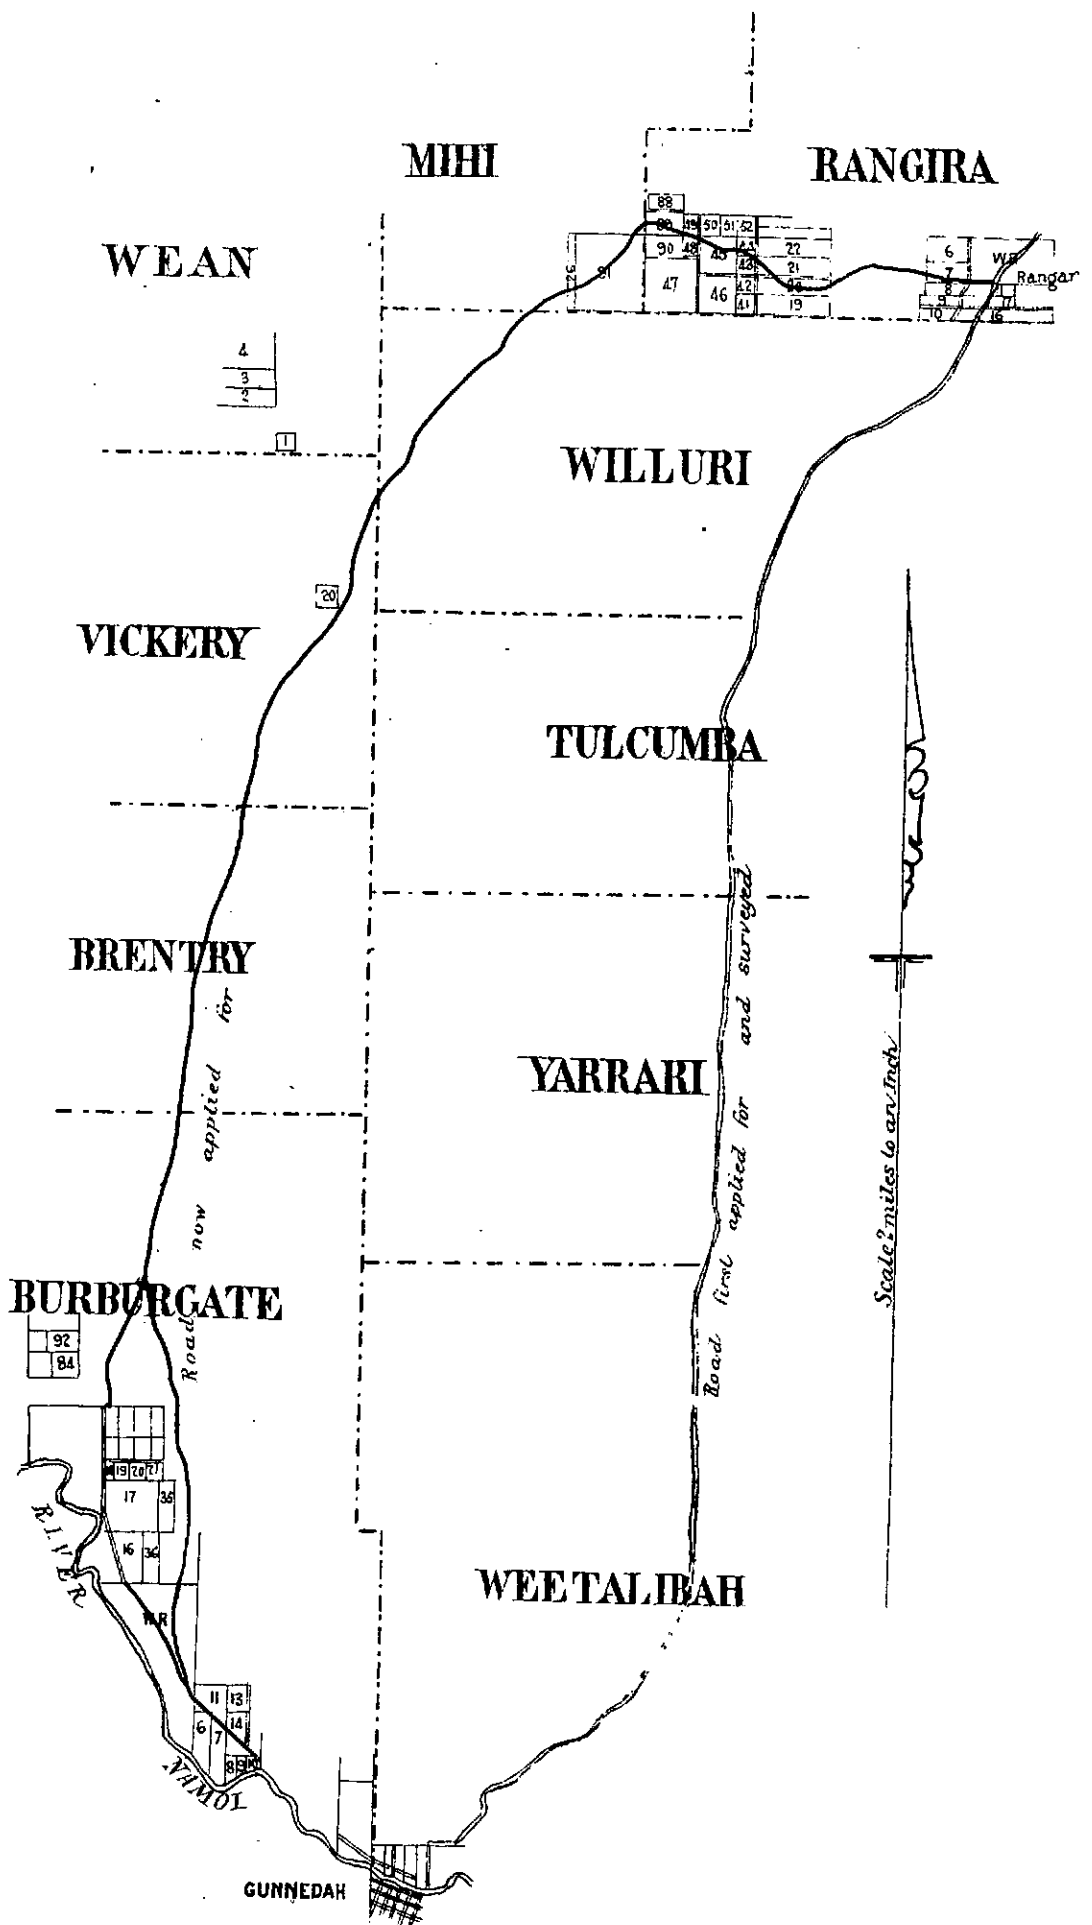

Replies to questions have been previously supplied; the following reply to question No. 4 should, however, be substituted for that given some days since:—4. Three routes have been discussed, viz.: the present travelling stock route *via* Carroll, a proposed route *via* Burburgate, and an intermediate route through and between alienated lands. This last road was visited and reported on by Mr. Surveyor McMaster, and portions of it that remained unsurveyed have lately been laid out by Mr. Licensed-Surveyor Loder. Mr. District-Surveyor Dewhurst reports that he has inspected throughout the road Barraba to Gunnedah, *via* Borah and Tulcumbah; also the road *via* Borah, Keepit, and Carroll; only partly the road *via* Connor's Gap, but sufficient to justify his report. He is about to inspect the short length through Connor's Gap, over which he has not yet ridden; but the sudden rise of altitude indicated by Mr. Licensed-Surveyor Loder's survey of the Nandewar range shows its impracticability. Licensed-Surveyors Loder and Dowe know the country well and agree with Mr. District-Surveyor Dewhurst.—ROBT. D. FITZGERALD, for Surveyor General, 31st March, 1880.

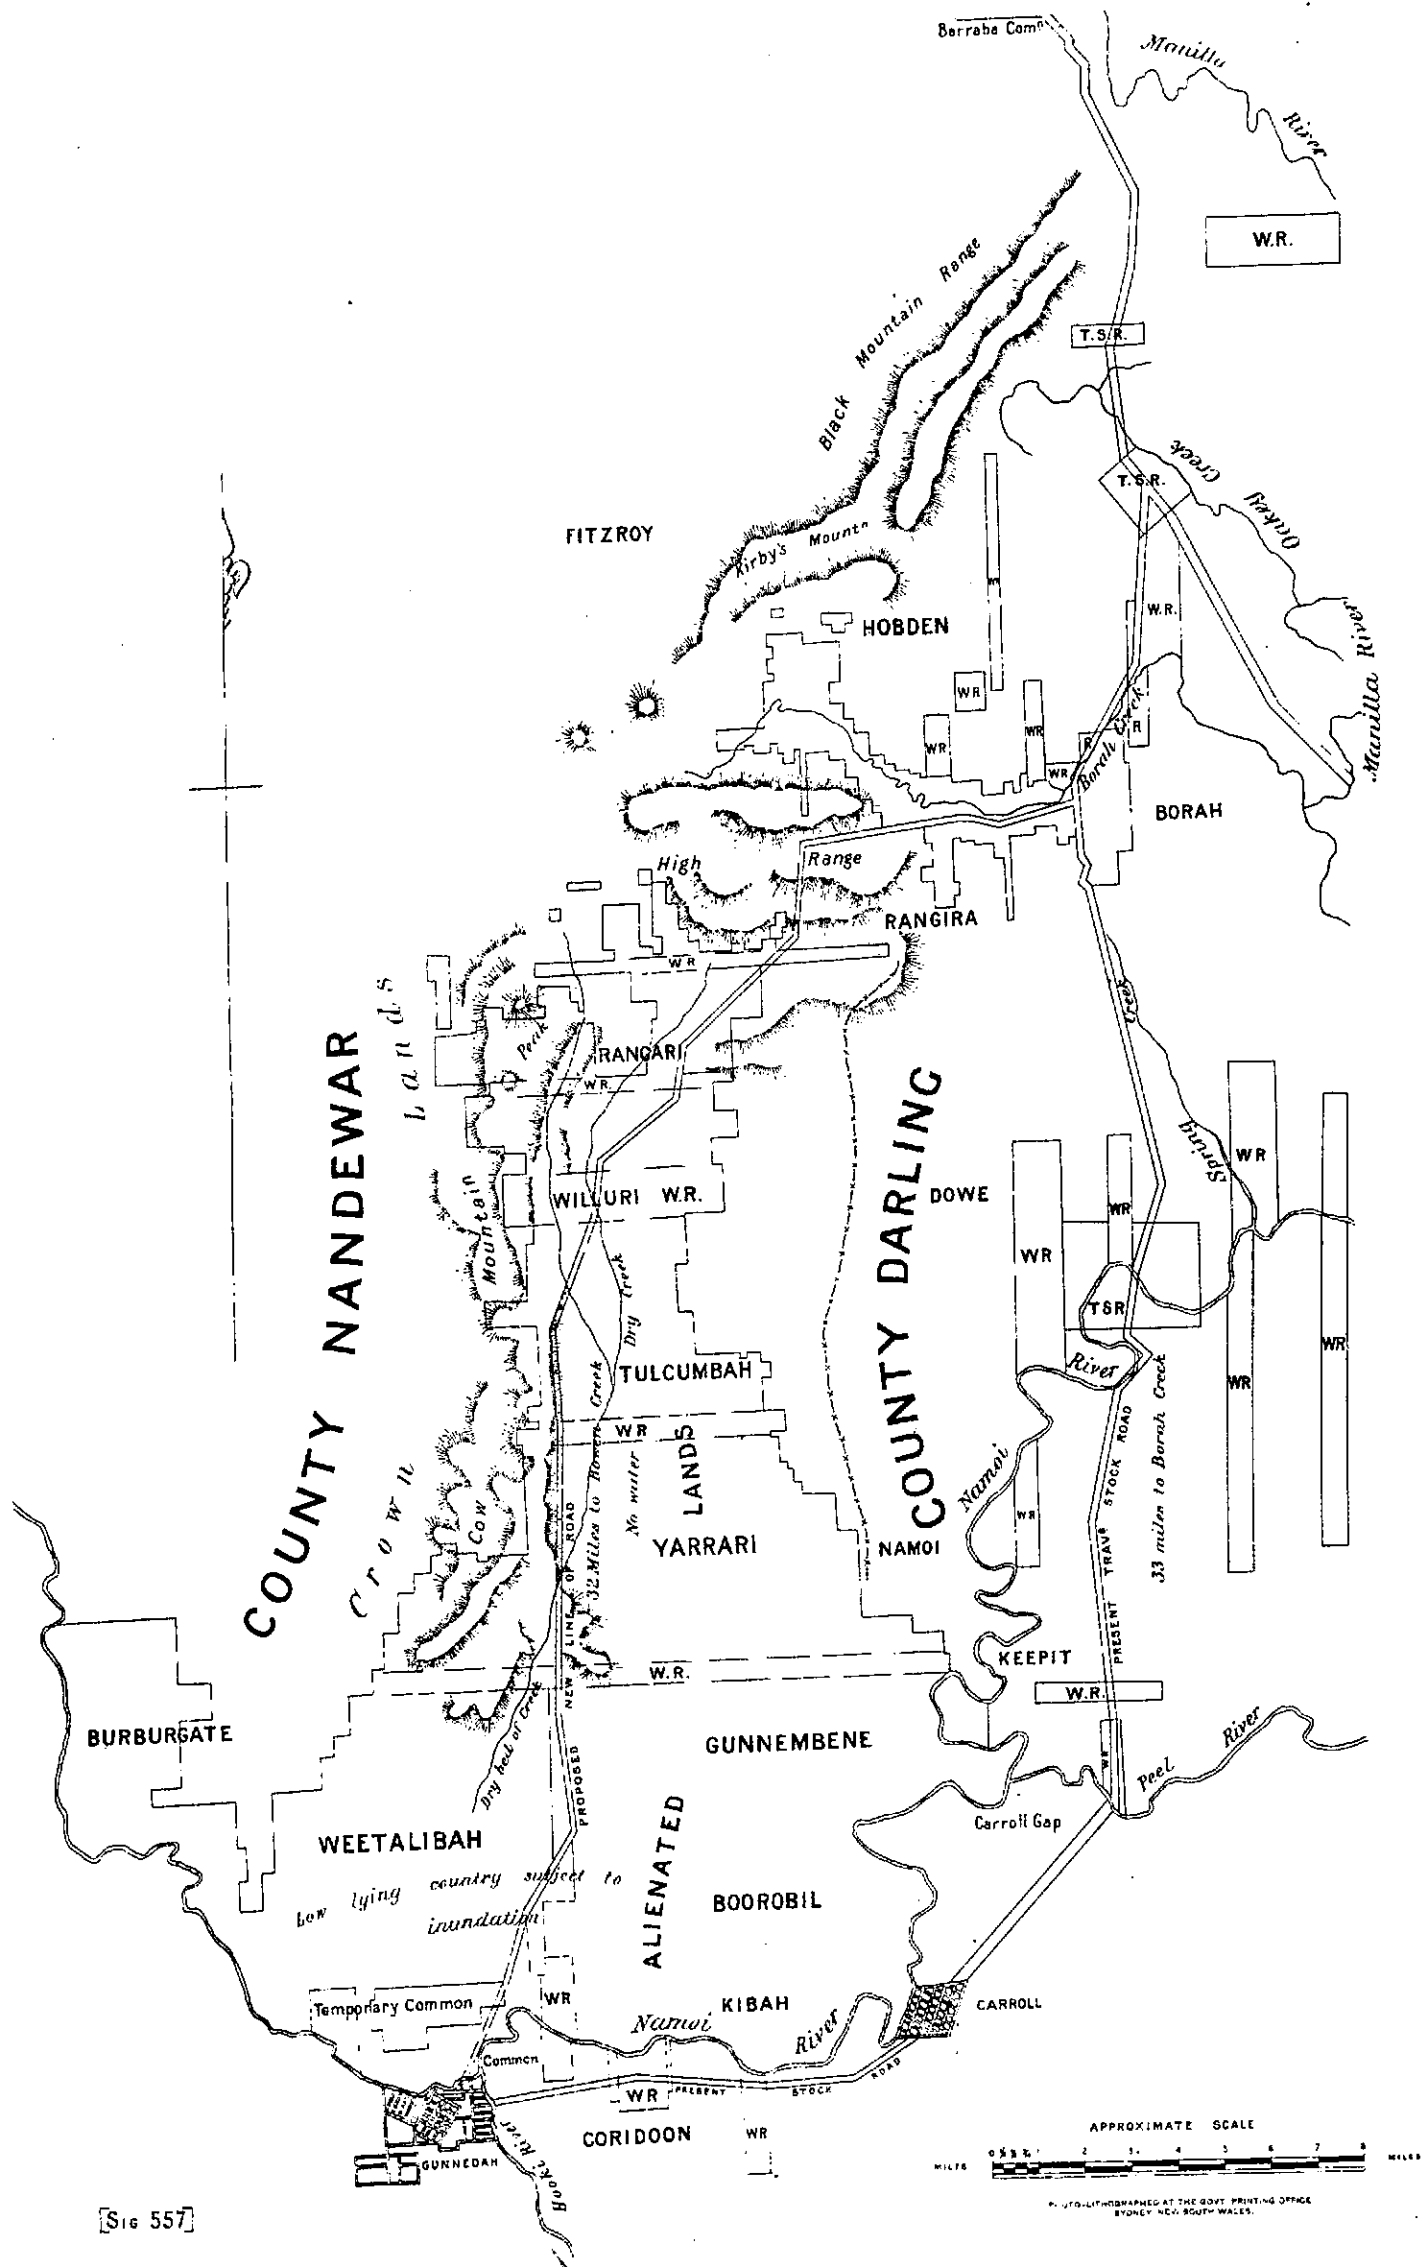

The Surveyor General may be asked to cause a complete inspection of the routes to be made, and the results to be reported fully.—E.A.B., 31/3/80. The Surveyor General, B.C., 31/3/80.—G.E.H., p. U.S.

It will be observed on reference to the amended reply to question 4 (see above) that two of the routes have been thoroughly inspected, the third only partly, a short length of it *via* Connor's Gap, being about to be inspected by the District Surveyor, who has this day been instructed to carry out the proposed inspection.—ROBT. D. FITZGERALD, for Surveyor General, 2nd April, 1880.

Scen.—H.W., 3/4/80.

[Two plans.]

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

ROADS.

(IN THE QUEANBEYAN ELECTORATE.)

Ordered by the Legislative Assembly to be printed, 29 January, 1880.

RETURN in reply to a question asked by Mr. James B. Thompson, dated 20th January, 1880,—

With reference to applications for roads in the Electorate of Queanbeyan, during the period from the 1st November, 1877, to the above date, will the Minister for Mines particularize the several roads applied for, and in each case supply the following information:—

- 1st. Date and mode of application.
 - 2nd. Action taken.
 - 3rd. Those not finally dealt with.
-

ROADS.

RETURN in reply to a question asked by J. B. Thompson, Esq., M.P., as to applications for Roads in the Electorate of Queanbeyan, during the period from the 1st November, 1877, to the 20th January, 1880.

Name of Roads applied for.	Date and mode of application.	Action taken.	Those not finally dealt with.
For opening of road closed by —, Campbell Majura towards Queanbeyan.	24 October, 1878—Petition from inhabitants of Majura, per J. B. Thompson, Esq., M.P.	Surveyor Smith reports, with plan and book of reference; recommended for preliminary notification.	Not finally dealt with.
For opening of road north of J. Hosking's portion 43, and through portion 48, parish of Majura.	Received 6 November, 1878—J. & M. Nash and T. Rutledge.	Sent to District Surveyor Twynam for report.	do.
For alteration of road along the Woodbury line, being part of main road from Gunning to Gundaroo, parish of Goorooyarroo, county Murray.	25 March, 1878—R. C. Rowley.	On Surveyor Smith's report, Mr. Rowley was informed that there was no objection to the alteration of the road, and stating method of doing it.
For road from Queanbeyan, <i>vid</i> Burra Creek, towards Micaligo.	8 January, 1879—Surveyor Smith, re-opening.	Sent to Surveyor Smith and returned; now with District Surveyor Betts.	Not finally dealt with.
For road Cooma to Micaligo	6 May, 1878—Inhabitants of Burra.	Surveyor Smith reported, which was sent to District Surveyor Betts, with an application for extension.	do.
For road for access to water from certain conditional purchases to Gininderra Creek and Murrumbidgee River.	31 January, 1878—Inhabitants, parish Weetangera, and J. B. Thompson, Esq., M.P.	Surveyor Smith's report sent to District Surveyor Twynam; also, petition of inhabitants of Gininderra Creek, sent to District Surveyor Twynam.	do.
For road to G. F. Dixon's 264½ acres, on Canberra Plains.	7 April, 1879—G. F. Dixon.	Reported on by District Surveyor Twynam; no further action yet taken.	do.
For road through Krawarric Estate, county of Murray.	25 July, 1879—Frank Mason.	Sent to District Surveyor Twynam for report.	do.
For road to James Donoghoe's conditional purchase, Green Meadows to Fox's line to Bungendore.	14 June, 1879—James Donoghoe.	Reported on by Surveyor Smith, per District Surveyor Betts, now with Executive Council for preliminary notification.	do.
For road through T. A. Murray's (now Beit's 640 acres), Lake George, parish of Collector, from Gundaroo Road to Lake George Road.	17 March, 1879—Sampson Ranger.	Reported on by Surveyor Schleicher, and Mr. Ranger informed road cannot be granted.
For road to connect Upper and Lower Boro with Goulburn and Braidwood and Marulan and Braidwood.	10 June, 1878—W. Davies	Report of Surveyor Schleicher to District Surveyor Twynam.	Not finally dealt with.
For road from Braidwood, <i>vid</i> Ballalaba, towards Cooma.	29 July, 1879—District Surveyor Twynam, recommending road.	Sent to District Surveyor Twynam	do.
For road Round Hill to intersection of Yarralumla Road.	Received 14 November, 1879—Inhabitants of Round Hill, per J. B. Thompson, Esq., M.P.	Sent to District Surveyor Twynam for report.	do.
For road from Richard Elliott's conditional purchase to main road, Gunning to Gundaroo.	21 October, 1878—Richard Elliott, per M. Fitzpatrick, Esq., M.P.	On Surveyor Schleicher's report, Mr. Elliott was informed that road could not be granted.	do.
For road to Canberra and Dunganon Waterholes.	29 October, 1878—Inhabitants of Canberra.	Surveyor Smith reported; now under consideration as to survey of roads.	do.
For road from A. Carter's land on Yass River, in the parish of Morumbateman.	12 November, 1877—H. Carter.	On Surveyor Nash's report, Mr. Carter informed—"Traffic of insufficient importance to warrant road being laid out."	do.
For resurvey of road from Micaligo to Queanbeyan.	3 August, 1878—Surveyor Smith, recommending resurvey.	Sent to District Surveyor Betts for report.	do.
For road from Queanbeyan to Uriarra, through the Yarralumla Estate.	Received 15 April, 1878—Petition from Inhabitants of Queanbeyan, Uriarra and Yarralumla, per J. B. Thompson, Esq., M.P.	Surveyor Smith's report sent to District Surveyor Twynam.	do.
For road from Joseph Armstrong's land, through Davis' 650 acres, to the Main Road, Yass to Gundaroo.	21 October, 1878—Joseph Armstrong.	Reported on by Licensed Surveyor Nash, and notice of preliminary notification appeared in Gazette of 23rd January, 1880.	do.
For road through Canberra Plains	7 April, 1879—Richard Hill.	See above application of Inhabitants of Canberra.	do.
For road, <i>vid</i> Canberra Church, by a Ford on south side of Molonglo River, to Queanbeyan.	20 November, 1879—J. B. Thompson, Esq., M.P.	District Surveyor Twynam has reported, which is now under consideration.	do.
For survey of northern approach to Bridge over Yass River to Goulburn.	4 April, 1879—Works ...	Road preliminarily notified, and Clerk of Executive Council reports no objections received.	do.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

PUBLIC GATE ON ROAD FROM COLLECTOR TO BREADALBANE
RAILWAY STATION.

(LETTERS, MINUTES, &c.)

Ordered by the *Legislative Assembly* to be printed, 27 May, 1880.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 12th May, 1880, That there be laid upon the Table of this House,—

“Copies of all Letters, Minutes, Petitions, and other Documents, having reference to the erection of a Public Gate on the Road from Collector to Breadalbane Railway Station.”

(*Mr. Badgery.*)

NO.	SCHEDULE.	PAGE
1.	The Chairman of the Trustees of the Collector Common to the Honorable the Minister for Lands, applying for permission to erect a public gate where the road from Collector to Pomeroy intersects the northern boundary of the Collector Common; minutes thereon. 2 October, 1875	2
2.	Mr. District-Surveyor Twynam to the Surveyor General, reporting on above, and tracing showing position of gate. 16 February, 1876	2
3.	The Surveyor General to the Honorable the Minister for Lands, recommending that preliminary notice be inserted in Government Gazette. 17 March, 1876	2
4.	Preliminary Notice in Government Gazette. 28 March, 1876	3
5.	Memo. from Commissioner and Engineer for Roads to Mr. Road Superintendent Chauncy, for report as to whether there is any objection to the erection of the gate; minutes thereon. 13 April, 1876	3
6.	E. Butler, Esq., M.P., to the Honorable the Minister for Lands, enclosing a letter from Mr. J. Hannan and a petition from inhabitants of Breadalbane and surrounding districts, objecting to the erection of the gate. 2 May, 1876	3
7.	Mr. John Macaulay to the Honorable the Secretary for Lands, praying that the above petition be rejected and the gate granted; minutes thereon. 29 May, 1876	3
8.	The Under Secretary for Lands to John J. Waddell, Esq., Chairman to the Board of Trustees of Collector Common, in reply to his application for permission to erect gate, of 2nd October last. (See No. 1.) 16 June, 1876	4
9.	The Under Secretary for Lands to E. Butler, Esq., M.P., in reply to his letter of 2nd ultimo. (See No. 6.) 16 June, 1876	4
10.	The Under Secretary for Lands to John Macaulay, Esq., in reply to his letter of 29th ultimo (see No. 7), and referring him to a letter from this department to J. J. Waddell, Esq. (See No. 8.) 26 June, 1876	4
11.	Mr. John Macaulay to the Honorable the Secretary for Lands, enclosing petition from inhabitants of Collector and surrounding districts, praying for permission to erect a public gate; minutes thereon. 10 October, 1877	4
12.	The Under Secretary for Lands to Messrs. J. J. Waddell, Francis Poidevin, John Sheridan, and others, in reply to petition. (See No. 11.) 24 January, 1878	5
13.	Mr. John J. Waddell to the Honorable the Minister for Lands, further urging that permission be granted to erect a gate; minutes thereon. 8 April, 1878	5
14.	William Davies, Esq., M.P., to the Honorable the Minister for Lands, advocating erection of gate. 16 April, 1878	5
15.	Mr. Acting District-Surveyor Schleicher to the Surveyor General, reporting according to instructions (see No. 13), with tracing showing position of gate applied for; minute thereon. 23 September, 1878	5
16.	Preliminary notice of intention to grant permission to erect gate, inserted in Government Gazette, in lieu of notice gazetted 28th March, 1876; minutes, &c. 22 November, 1878	6
17.	Petition from inhabitants of Collector and surrounding districts to the Honorable the Minister for Lands, protesting against the erection of the gate. 14 December, 1878	6
18.	The Surveyor General to the Under Secretary for Lands, recommending that (notwithstanding the objections raised) notice of intention to grant permission to erect gate be inserted in Government Gazette; minutes, &c. 3 Jan., 1879	7
19.	Notice in Government Gazette. 4 February, 1879	7
20.	The Under Secretary for Mines to Messrs. J. V. Cooper, Edward Graham, J.P., W. O. Cooper, and others, in reply to petition (see No. 17), stating that the erection of the gate has been authorized. 5 February, 1879	7
21.	Mr. John F. Kenny, J.P., to the Honorable the Minister for Lands, protesting against erection of the gate; minute. 17 February, 1879	7
22.	Same to the Hon. Minister for Mines, further protesting against the gate; minutes thereon. 17 March, 1879	8
23.	William Davies, Esq., M.P., to the Honorable the Minister for Mines, asking that Trustees be officially informed of permission to erect gate having been granted. 23 April, 1879	8
24.	Mr. District-Surveyor Twynam to the Surveyor General, further report (see No. 22); minute thereon. 7 July, 1879	8
25.	The Under Secretary for Mines to Mr. J. J. Waddell, informing him of Mr. John F. Kenny's protest (see No. 21), and that the papers in the matter have been sent to the District Surveyor for report. 27 September, 1879	9
26.	The Under Secretary for Mines to John F. Kenny, Esq., J.P., in reply to letter of 17th March last. (See No. 17.) 17 November, 1879	9
27.	The Under Secretary for Mines to John J. Waddell, Esq., Chairman of the Board of Trustees of the Collector Common, informing him that, notwithstanding objection (see No. 22), the Minister for Mines has decided not to withdraw permission to erect gate. 17 November, 1879	9
28.	Henry S. Badgery, Esq., M.P., to the Honorable the Minister for Mines, urging that the gate be not erected until further inquiry is made. 2 March, 1880	9
29.	Petition from inhabitants of Collector and surrounding districts to the Honorable the Minister for Mines, stating that the gate is not required; minute thereon	10

PUBLIC GATE ON ROAD FROM COLLECTOR TO BREADALBANE RAILWAY STATION.

No. 1.

The Chairman of the Trustees of the Collector Common to The Secretary for Lands.

Sir,

Collector, 2 October, 1875.

On behalf of the Trustees of the Collector Common, I have the honor to request your permission to erect a public gate, where the road from Collector to Pomeroy intersects the northern boundary of the above common, passing through Patrick Byrne's 104 acres. I may state that for several years past there has been a slip-panel at the point referred to, but as parties passing through were not bound to put up the rails, they were frequently left down, thereby causing much vexatious annoyance, both to the commoners and the owners of land along the above line of road, through the trespassing of stock, &c. We propose to erect a gate 10 feet 6 inches wide.

I have, &c.,

JOHN J. WADDELL,
Chairman of the above Board of Trustees.

[Enclosure to No. 1.]

Department of Lands, Sydney, 24 August, 1875.

PUBLIC GATES.

Every applicant for permission to erect a gate or gates, under the Act of Council 39 Victoria, No. 10, must forward to the Minister for Lands, together with his application, the sum of three pounds three shillings (£3 3s.) for one gate, and one pound one shilling (£1 1s.) for every other gate on the same property or run, to cover cost of the surveyor's report.

If the road is considered of sufficient public importance to warrant the payment for erection of gate or gates by the Government, the money will be refunded.

THOMAS GARRETT.

(Min. 73-1,528.)

Minutes on No. 1.

It is submitted that this is scarcely a case in which the fee of £3 3s. should be demanded, but see notice of 24th August, copy herewith.—O.R., 6/10/75.

Deputy Surveyor General, B.C., 8/10/75.—A.O.M. This ought not to be demanded.—R.D.F., 23/11/75. Mr. District-Surveyor Twynam is requested to report, in accordance with paragraph No. 85 of surveyor's instructions.—ROBT. D. FITZGERALD (for Surveyor General), 25/11/75. Report accordingly herewith, 16 Feb., 1876, No. 30.—E.T., D.-S.

No. 2.

Mr. District-Surveyor Twynam to The Surveyor General.

Tracing,
Appendix A.

THE road mentioned is that leading from Collector to the platform on the Southern Railway, near Mutt-billy, on the Third Breadalbane Plain, and thence to Pomeroy; it has been dedicated as a parish road, is maintained as a road of the V class out of the annual Parliamentary Vote for Subordinate Roads, and it is travelled by a mail thrice a week. The traffic from Collector to the railway platform is, and must continue to be, insignificant for several years, and in my opinion public gates would not at present be found to be a hindrance or obstruction to traffic; nevertheless, it must be borne in mind that the road is now a public thoroughfare, also that a common opinion prevails that the fact of maintenance at public cost is evidence of traffic sufficient to prohibit the use of gates, which undoubtedly do cause some inconvenience, and incur some risk under certain conditions of travelling; moreover, the proposed gate is to be erected on the boundary of the town reserve, at Collector, a place of course where there will be more traffic than elsewhere on the road.

Under all the circumstances of the case, I cannot recommend the application to be entertained; but as my reluctance to recommend it is based solely on general grounds, and not on special objections, perhaps as the public gate is sought to be obtained as a convenience to the commoners at Collector, it might be considered expedient to publish the usual preliminary notification, with a view of eliciting objections from those concerned.

Submitted. E. TWYNAM, D.-S.

Goulburn, 6 February, 1876. No. 30.

No. 3.

The Surveyor General to The Secretary for Lands.

Gates—Preliminary Notice.

It is recommended that a notice be inserted in the Government Gazette and in some local newspaper (if any) to the effect that a gate in the position hereunder described has been applied for under the Act 39th Victoria No. 10, by the Trustees of Collector Common; and all persons interested are invited to state within thirty days from the date of such notice their objections (if any) to such application, the propriety of granting it being under consideration.

17 March, 1876.

P. F. ADAMS,
Surveyor General.

Situation of Gate.

Gate No. 34.

Gate (not less than 11 feet wide) on the road from Collector to the third Breadalbane Plain, at the north boundary of the Collector Common, being the south boundary of P. Byrnes's 104 acres, parish of Collector, county of Argyle.

For notice, 18/3/76; notified, 28/3/76; for advertising, 30/3/76; advertised, 10/4/76.

No. 4.

No. 4.

Preliminary Notice in Government Gazette.

Department of Lands, Sydney, 28 March, 1876.

Public Gates.

NOTICE is hereby given that a public gate, as hereunder described, has been applied for under the provisions of the Act 39 Victoria No. 10, and all persons interested are invited to state within thirty days from this date their objections (if any) to the granting of such application.

THOMAS GARRETT.

Gate No.	R. S. B. No.	Applicant.	Description.
76-34...	76-442 ...	The Trustees of Collector Common...	Gate (not less than 11 feet wide), on the road from Collector to the Third Breadalbane Plain, at the north boundary of the Collector Common, being the south boundary of P. Byrnes's 104 acres, parish of Collector, county of Argyle.

No. 5.

Memo. from Commissioner to Mr. Road Superintendent Chauncy.

Sydney, 13 April, 1876.

You are requested to report whether there is any objection to the erection of the gates referred to in the accompanying notice.

If you are unacquainted with the locality, you need not visit but make the best inquiries possible.
B.C. (For Commissioner and Engineer),

G.C.E.

Minutes on No. 5.

I think under the circumstances—this being for the convenience of the public generally—the request might be granted. I therefore see no objection at the present time.—W. S. CHAUNCEY, 14/4/76. Forward to Surveyor General.—W.C.B., 15/4/76. To be placed with papers 76-442 R.S.B.—E.G., 21/4/76. To be submitted to the Surveyor General with objections (if any) after expiration of the thirty days' notice.—R.D.F., 29/4/76.

No. 6.

E. Butler, Esq., M.P., to The Secretary for Lands.

Dear Garrett,

2 May, 1876.

Will you kindly consider the *pros* and *cons* of the enclosed matter, and send me an answer?

Faithfully yours,

E. BUTLER.

I do not think the gate should be granted.—T.G., 22/5/76.

[Enclosure to No. 6.]

Mr. John Hannan to E. Butler, Esq.

Dear Sir,

Breadalbane, 24 April, 1876.

You will please present this petition I now send you concerning the public gate between Collector and Breadalbane as early as possible, as I am afraid of its being late.

I am, &c.,

JOHN HANNAN.

Breadalbane, 22 April, 1876.

Petition of the Inhabitants of Breadalbane and surrounding District to the Honorable the Minister for Lands.

The humble petition of the inhabitants of Breadalbane and surrounding District,—

RESPECTFULLY SHOWETH:—

That having observed that the Trustees of the Collector Town Common have applied for a public gate at the north boundary of Collector Common, your humble petitioners request that such gate shall not be granted, on the following grounds, viz.:—

1. That the erection of such gate on the main road leading to Collector would inconvenience your petitioners attending places of worship on Sunday.
 2. The erection of this gate on the road to the nearest police station and Police Court.
- That your humble petitioners consider the erection of this gate would be a public nuisance on a road leading to a public pound.
4. That the erection of such gate could only benefit one landowner, whose land is unfenced, where all other holdings are fenced on both sides of road.

That your humble petitioners have showed sufficient cause not to have this gate erected; and as in duty bound, will ever pray.

JOHN HANNAN,
JOHN PURCELL,
JOHN WOODS,
And 17 others.

No. 7.

Mr. J. Macauley to The Secretary for Lands.

Hon. Sir,

Some time since, J. J. Waddell, Esq., as Chairman of the Trustees of the Collector Commonage, applied for a public gate on the north side of the said common, on the road from Collector to Breadalbane. Now the inhabitants of Collector find that a man named James Purcell—a man that has no fixed place of abode, but has got the contract to carry the mail from Collector to Breadalbane for nine months—has got up a petition against the said gate. Most of those that have cattle on the common have been with me since,

since, as one of the trustees of this road, requesting me to write to you, stating that none that have cattle (with the exception of one or two of his friends) have ever signed the said petition, and if their names are at it they are forgeries, as Purcell went about the public-houses for eight or ten days forcing every one that he met to sign; and from what I am told, the most of those that signed were children or persons that had nothing to do with the road.

Mr. Waddell informs me that he would never have applied for the gate if he did not know that it was absolutely necessary to save so much impounding of cattle and horses, as of the nine miles of this road there is only three of it fenced, and the common being overstocked, the cattle, and especially horses, stray for many miles along this road, and are constantly taken to the pound, which causes a deal of ill-feeling among neighbours, and this still will be the case till such time as a gate is put on at this place. There is a slip-panel where the gate is applied for, but not one in ten put it up, so that the inhabitants would most respectfully ask of you, Hon. Sir, that you would reject the petition and grant the gate where it is so much needed.

29 May, 1876.

I have, &c.,

JOHN MACAULEY.

Minutes on No. 7.

The Honorable the Minister for Lands has recently decided that permission to erect the gate in question should not be granted.—ROBT. D. FITZGERALD (for Surveyor-General), 7 June, 1876. Refer to the intimation thereof.—A.O.M., 9/6/76.

No. 8.

The Under Secretary for Lands to The Chairman to the Board of Trustees of Collector Common.

Sir,

Department of Lands, Sydney, 16 June, 1876.

With reference to your application of the 2nd October last, on behalf of the Trustees of the Collector Common, for permission to erect a public gate on the road from Collector to the Third Breadalbane Plain, I am directed to inform you that, for the reasons given in a petition received from certain inhabitants of Breadalbane and the surrounding district (of which an extract is herewith enclosed), objecting to the erection of such gate, the Minister for Lands cannot approve of the permission to erect the same being granted.

See petition,
No. 6.

I have, &c.,

A. O. MORIARTY,

Pro Under Secretary.

No. 9.
