The Under Secretary for Lands to E. Butler, Esq., M.P.

Sir,

Department of Lands, Sydney, 16 June, 1876.

In reference to your letter of 2nd ultimo, enclosing a petition from certain inhabitants of Breadalbane and the surrounding districts, objecting to the erection of a public gate on the road from Collector to the Third Breadalbane Plain, as applied for by the Trustees of Collector Common, I am directed to inform you that, under the circumstances disclosed in the said petition, the Minister for Lands considers that permission to erect the gate in question should not be granted, to which effect the Trustees have been apprised.

I have, &c.,

A. O. MORIARTY,

Pro Under Secretary.

No. 10.

The Under Secretary for Lands to J. Macauley, Esq.

Sir,

26 June, 1876.

With reference to your letter of the 29th ultimo, in regard to an application for permission to erect a public gate on the north side of the Collector Common, on the road from Collector to Breadalbane, I am directed to refer you to a letter from this department, dated the 16th instant, addressed to J. J. Waddell, Esq., Chairman of the Board of Trustees of Collector Common, stating "that for the reasons given in a petition received from certain inhabitants of Breadalbane and the surrounding districts, objecting to the erection of such gate, the Minister for Lands cannot approve of the permission to erect the same being granted."

See No. 7.

See No. 8.

I have, &c.,

A. O. MORIARTY,

Pro Under Secretary.

No. 11.

J. Macauley, Esq., to The Secretary for Lands.

Sir,

Milbang, 10 October, 1877.

I have the honor herewith to enclose petition for leave to erect a public gate, * * *

Trusting they shall receive your favourable consideration,

I have, &c.,

JOHN MACAULEY.

[*Enclosure to No. 11.*]

Petition of the Inhabitants of Collector and surrounding districts to the Honorable the Secretary for Lands.

Sir,

Collector, 8 September, 1877.

The Petition of the inhabitants of Collector, Milbank, and Bohara, humbly sheweth.—That in consequence of there being a very large quantity of unenclosed land on each side of the road from Collector to Gunning, *via* Bohara, and from Collector to Mutbilly respectively, your petitioners suffer constant annoyance and loss, from their horses, cattle, and other stock being impounded, &c., &c. That a public gate on the verge of the town common, where both roads unite in one, would prevent much of the annoyance and loss your petitioners now suffer from. Your petitioners therefore pray that they may be allowed to erect a public gate, 11 feet wide at the point named, *viz.*, at the junction of the two roads with the north boundary of the Collector town common. And your petitioners, as in duty bound, will ever pray.

JOHN J. WADDELL,
FRANCIS POIDEVIN,
JOHN SHERIDAN,

And 25 others.

The

The Secretary for Lands (Mr. Garrett) having personally decided upon a letter from, and a petition presented by Mr. Butler, M.P. (76-723, R.S.B.), that this gate should not be granted, it is submitted whether it is desirable to take any action upon this renewal of the application.—ROBT. D. FITZGERALD (for Surveyor General), 24 November, 1877. Sec No. 6.

Approved.—J.S.F., 3/1/78.

The approval in this case was intended to apply to the decision already given, viz., that the gate ought not to be granted. The applicants have been so apprised.—W.W.S., 3/4/78.

No. 12.

The Under Secretary for Lands to Petitioners.

Gentlemen,

Department of Lands, Sydney, 24 January, 1878.

With reference to your petition dated 8th September last, praying that you may be allowed permission to erect a public gate at the junction of the road from Gunning to Collector, *via* Bohara, and the road from Collector to Mutbilly, with the north boundary of the Collector Town Common, I am directed to inform you that the late Minister for Lands (Mr. Garrett) having personally decided upon a letter from and a petition presented by the Honorable Edward Butler, M.L.C., that this gate should not be granted, Mr. Secretary Farnell does not consider it desirable to take any further action upon this renewal of the application for the gate in question. Sec No. 11.

I have, &c.,

W. W. STEPHEN,
Under Secretary.

No. 13.

Mr. J. J. Waddell to The Secretary for Lands.

Sir,

Collector, 8 April, 1878.

Referring to an application recently made to you by the inhabitants of Collector and surrounding district for leave to erect a public gate onto the north boundary of the Collector Town Common, I have the honor to state the following particulars for your information:— Sec No. 11.

Early in October, 1875, an application was made by letter to the then Secretary for Lands, by the trustees of the above common, for permission to erect a public gate where the roads from Gunning (*via* Bohara), from Mutbilly, and from the railway platform at Breadalbane united in one come out on the Collector Common. This application was recommended by Mr. District Surveyor Twynam, and gazetted in the usual way; but one James Purcel having got up a petition against the application of the trustees, Mr. Garrett declined to allow the erection of the gate. Sec No. 1.

As already stated, the roads from Gunning, from Mutbilly, &c., from the Breadalbane railway platform united in one come out on the Collector Town Common; and as these roads each pass through a large area of unenclosed land, the consequence is that horses and cattle from off the common frequently trespass on the unenclosed lands, and stock from these lands is frequently trespass on the common, causing constant annoyance and loss to their respective owners. It is to put an end to this vexatious state of things that the application for leave to erect a gate has been made.

I have already stated that one James Purcel got up a petition against the erection of the above gate, and I think it right to further state that, having seen a copy of that petition, I am prepared to prove that almost all the statements it contained were untrue; that most of the signatures to it were obtained by false representations or forgeries, and that his reason for getting up a petition at all was because the trustees for the common prevented him from running a small flock of sheep he has (he has not 1 acre of land of his own) on the Common.

I have, &c.,

JOHN J. WADDELL.

These papers are now forwarded to Mr. Acting District Surveyor Schleicher, for report upon the point raised by Mr. D.-S. Twynam on his memo. attached, and generally as to the advisableness of granting the gate in question.—ROBT. D. FITZGERALD (for Surveyor General), 15 May, 1878. Acted on by letter 78/111 of 23 Sept., 1878.—A. SCHLEICHER, A.D.-S.

No. 14.

W. Davies, Esq., M.P., to The Secretary for Lands.

Dear Sir,

16 April, 1878.

I have reason to believe that the gate asked for would be a great advantage to the people of Collector, and shall be glad if you can sanction it.

I am, &c.,

WILLIAM DAVIES.

No. 15.

Mr. Acting District-Surveyor Schleicher to The Surveyor General.

Sir,

Referring to the above instructions, I do myself the honor to state that I have visited Collector, and made every inquiry in regard to the gate desired, and have to report as follows:—

The accompanying *tracing shows the position of the gate applied for, and by brown tint the two roads mentioned by Mr. Waddell. These roads from Gunning, *via* Bohara and Breadalbane platform respectively, it will be observed, meet a little more than a mile from the gate applied for, and then the one road runs to Collector on which the gate is sought. The two roads were mentioned by applicant, as cattle straying from Collector Common along the road were just as apt to take the Gunning Road as the one to Breadalbane. *Appendix B.

It

It will be observed that, properly speaking, the gate applied for is not on the Collector Common, but as the whole of the suburban allotments shown on tracing are only lately measured, and are unsold, the Commons Trustees doubtless look upon the unsold suburban land as temporary commonage, and treat it accordingly.

With regard to the expediency of granting a gate at this place, I have to state that if the fact of the gate applied for not being situated in the Common is no bar, otherwise I do not see any objection to the granting of the request of the trustees, and in fact a public gate appears already to exist on this road to Breadalbane Platform, not far from the Wet Lagoon.

The mail thrice a week from the Platform to Collector, mentioned by Mr. District-Surveyor Twynam, is a mail on horseback only, to which a gate would prove no obstacle; and as it would doubtless prove an advantage to the Collector commoners, who would by this means be able to prevent their cattle straying along the road mentioned, I can see no objection to its being granted, other than that it may not be situated within the jurisdiction of the Commons Trustees.

The required information, according to the heads under paragraph 85 of surveyor's instructions, is briefly as follows:—

1. The present traffic is almost wholly to the Breadalbane Platform; I suppose there may be on the average about two vehicles a day and half-a-dozen horsemen. Very little travelling stock.
2. I think future traffic will be about the same as at present.
3. A horse mail only travels this way three times a week.
4. Under Road Trustees.
5. This road has been improved, and is likely always to be the one in use.
6. Good firm land, and quite level at the gate.
7. Single gate, 12 feet wide, if allowed.
8. I do not think any other gates will be applied for on this road.
9. The fencing on this road is generally split fencing of good character, but there is also brush fencing in places.
10. The road from Breadalbane to Collector is to a great extent fenced; but, as before stated, the object of the petitioners is to prevent stock on the common straying on this road.
11. The position applied for is the only one where a gate would be of use, and can in my opinion, injure no one.
12. I believe this road has been in general use about three years—since opening of Railway to Gunning.

In conclusion, if the Commons Trustees are held to be justified in asking for the gate, in regard that the unsold suburban lands are a sort of temporary commonage, I do not think there is any objection to grant their request provisionally, pending alienation of the suburban land, and the fencing of the common proper by the Trustees.

Goulburn, 23 September, 1878.

Submitted.

A. T. SCHLEICHER,

Acting District-Surveyor.

On this report from Mr. Acting District-Surveyor Schleicher, it is recommended that gate No. 34, described on R. S. B. 76-442 enclosed, be again preliminarily notified, &c.—ROBT. D. FITZGERALD (for Surveyor General), 7 November, 1878. Submitted.—H.W., 12/11/78. Approved.—W.S., 12/11/78.

No. 16. Gazette Notice.

Department of Lands, Sydney, 22 November, 1878.

Public Gates.

NOTICE is hereby given that a public gate, as hereunder described, has been applied for under the provisions of the Act 39 Victoria No. 10, and all persons interested are invited to state within thirty days from this date their objections (if any) to the granting of such application.

JAMES S. FARNELL.

Gate No.	R. S. B. No.	Applicant	Description.
34	78-2,397	The Trustees of Collector Common	Gate (not less than 11 feet wide), on the road from Collector to the Third Breadalbane Plain, at the north boundary of the Collector Common, being the south boundary of P. Byrne's 104 acres, parish of Collector, county of Argyle.

N.B.—This is in lieu of the notice which appeared in the Government Gazette of the 28th March, 1876.

Minutes on No. 16.

Advertised and slip forwarded to the Commissioner and Engineer for Roads for any objections.—GERARD E. HERRING (for the Under Secretary), Mines, 25/11/78. Mr. Wood.—W.C.B., 26/11/78. I doubt if this should be allowed. This application was referred to the Acting District-Surveyor, for report by his department; and after visiting the ground and examining into the question thoroughly he reported in favour of it. From the evidence he furnishes I can see no objection to the application being granted.—A. P. WOOD, 29/11/78. Commissioner for Roads—B.C. Surveyor General,—W.C.B., B.C., 30/11/78.

No. 17.

Petition from Inhabitants of Collector and surrounding districts.

To the Honorable the Minister for Lands,—

The humble petition of the inhabitants of Collector and surrounding districts against the erection of a public gate on the road from Collector and Breadalbane, applied for by the Trustees of Collector Common.

Your petitioners respectfully show that the erection of a public gate on the above-named road will inconvenience the public, viz. :—

1. It being the main road from Collector to Breadalbane Railway Station.

2.

- 2. The mails are conveyed between Collector and Breadalbane six times a week, between the hours of 8 o'clock p.m. and 4 o'clock a.m.
 - 3. All land for 3 miles from Collector on this road is enclosed on both sides of road, with the exception of one small holding.
 - 4. That this gate was applied for 1876, and refused by the then Minister for Lands.
- Trusting that the foregoing facts will be taken into your honorable consideration; and your petitioners, as in duty bound, will ever pray.
Dated at Collector, this 14th day of December, 1878.

J. V. COOPER,
EDWD. GRAHAM, J.P.,
W. O. COOPER,
J. F. KENNY, J.P.,
and 56 others.

The Surveyor General.—H.W., B.C., 19/12/78.

No. 18.

The Surveyor General to The Under Secretary for Lands.

Gates.—Notice of intention to grant notwithstanding the objections raised. Gate No. 34.
It is recommended that, in accordance with the third clause of the Act 39 Victoria, No. 10, notice of intention to grant permission to erect the gate preliminarily notified and described in the Government Gazette See No. 16. of 22nd November, 1878, folio 4,675, applied for by the Trustees of Collector Common, be now published in the Government Gazette and in some local newspaper (if any).

ROBT. D. FITZGERALD,
(For Surveyor General),
3rd January, 1879.

Submitted.—H.W., 9/1/79. Approved.—E.A.B., 9/1/79. Advertised.—6/2/79.

As objection has been taken to the granting of the gate, in spite of the petition, will the Surveyor General be good enough to cause further inquiry to be made into the matter, with a view to see whether the objections are well grounded and general? B.C., 19/2/79.—H.W.

No objection has been received since the last notification in the Government Gazette, and the objections to the former recommendations have been fully reported upon and considered.—R.D.F., 24/2/79.

Kindly point out the report upon the petition, vide R.S.B., 78-3,350.—H.W., 27/2/79.

The objections in the petition referred to are in effect the same as those contained in the former petition, which have been reported upon and considered, and were again considered by me before making this last recommendation, and were alluded to in the words "notwithstanding the objections raised."—R.D.F., 3/3/79.

No. 20.

The Under Secretary for Mines to Mr. J. V. Cooper and others.

Gentlemen, 5 February, 1879.

With reference to your petition against the erection of a public gate on the road from Collector and Breadalbane, as applied for by the Trustees of Collector Common, I am directed to inform you that, notwithstanding the objections raised, the Minister for Mines has authorized the erection of the gate in question. See No. 17.

I have, &c.,
HARRIE WOOD,
Under Secretary.

No. 21.

Mr. J. F. Kenny, J.P., to The Secretary for Lands.

Honorable Sir, Kenny's Point, Currawang, 17 February, 1879.

Observing by an advertisement in the *Goulburn Herald* of the 15th instant that it is intended to authorize the erection of a public gate across the road leading to the Breadalbane Railway Station from Collector, I have the honor, as I deem it my duty on behalf of the public who have petitioned against such authorization, to point out to you that such gate will, if erected, prove a serious obstruction and inconvenience to travellers to and from the above-named station.

Such

Such travellers consist in a great part of females driving carts laden with the produce of their dairies and fowl-yards to the railway, and often returning after night, having come to Breadalbane by the 5 p.m. train; and to these in particular it is a serious matter to be forced to alight from their carts to open and shut a gate, besides the risk of accident, if the horse, which under the circumstances is likely, should become restive.

The public, as I said, will be seriously inconvenienced by the erection of this gate, and in effect only one person, who to a great extent monopolizes the grass of the Collector Common, will be materially benefited. There is no private land trespassed upon where this gate is asked for.

It would appear that the few people of the small village of Collector (not enough in fact to entitle it to the smallest population boundary) are extremely well favoured in having a common of such vast extent without depriving the public of reasonable facility of access to the railway. The granting of this gate will inevitably lead to the erection of at least two more on the same road through the property of Messrs. Chisholm, and thus that facility of access to the rail, which I respectfully submit should be the first principle to be considered and established on these minor roads, is wholly lost sight of and ignored.

Not for a moment doubting that your consent to this public injustice has been obtained by specious representations, I have the honor on behalf of the public to request you to withhold your final confirmation until you can make further inquiry, when I have little doubt that, in your interest for the public welfare, you will find sufficient reason for the reversal of your decision to allow the erection of an obstruction so obnoxious and inconvenient to the public.

I have, &c.,

JOHN F. KENNY, J.P.

A recommendation that the gate in question be granted, notwithstanding the objections raised, was made by me on 3rd January, 1879, on 79-18, R.S.B.—ROBT. D. FITZGERALD (for Surveyor General), 3rd March, 1879.

See No. 18.

No. 22.

Mr. J. F. Kenny, J.P., to The Secretary for Mines.

Honorable Sir,

Kenny's Point, 17 March, 1879.

Noticing that it is again advertised, that it is intended to sanction the erection of a gate on the road between Collector and Breadalbane Railway Station, I have the honor again to call your attention to the fact that this is not a case that should come under the operation of the Public Gates Act, inasmuch as that Act was only intended to provide for cases when roads were proclaimed through private land, and principally to save the State the expense of fencing. I have the honor further to point out that it scarcely could have been intended by the framers of the Act that obstructions should be placed across roads in the immediate vicinity of a railway station, used by the people of a populous neighbourhood. In this case there is no private land trespassed upon in the immediate vicinity of the gate applied for, and the road is used frequently daily by people travelling to and from the railway station. In addition to this, I have the honor further to call your attention to the fact that the mail is carried six (6) times a week in the night along this road, and a gate or any other obstruction must add considerably to the risk of loss, for which the contractor is heavily responsible.

A petition numerously signed, I know, was prepared on this subject, protesting against the gate and praying for its refusal, but whether it ever reached its destination I know not; but I have the honor to state that I have little personal interest in the matter, as it is not the road I travel, and it is only in consequence of the expression of disapproval by those who do use it, and their desire I should write you on the subject, added to my own desire to see the greatest possible facility of intercourse established, which have induced me thus to venture to address you.

Trusting most respectfully that you will re-consider this matter favourably for the public interest,—

I have, &c.,

JOHN F. KENNY, J.P.

Minutes on No. 22.

Before dealing with this matter, I should like to have a report from the District Surveyor on the objections raised by Mr. Kenny and others to the granting of this gate.—E.A.B., 13/6/79.

The Surveyor General.—H.W., B.C., 18/6/79. Forwarded to Mr. District Surveyor Twynam, as directed by the Secretary for Mines.—ROBT. D. FITZGERALD (for Surveyor General), 23rd June, 1879. Report herewith accordingly, No. 34.—E. TWYNAM, D.-S., 8 July, 1879.

No. 23.

W. Davies, Esq., M.P., to The Secretary for Mines.

Dear Sir,

23 April, 1879.

Gates have been allowed on roads from the Common, at Collector, to Gunning and Pomeroy, but the trustees inform me that they have not received official notification. Will you kindly see to this?

Faithfully,

WILLIAM DAVIES.

No. 24.

Mr. District-Surveyor Twynam to The Surveyor General.

Further report under B.C., 79/359.

1. The gate in question is applied for by the Trustees of the Collector Town Common, and is situated upon the north boundary of an area appropriated to temporary commonage, but subdivided for sale as suburban land.

2. I think that such an application by trustees of a common does not come within the scope of the Act 39 Victoria, No. 10, the preamble of which runs—"Whereas it is expedient to make provision for the erection of public gates by the occupants of inclosed lands through which any unfenced public road may pass, &c." Now the trustees are not occupants, *i. e.*, in lawful possession of the land, and the common, permanent and temporary, is certainly not enclosed land.

3. The application for public gate is urged solely on the grounds of preventing the cattle on the Collector Common from straying along the road to Breadalbane, whence it is alleged they are impounded; and to prevent the cattle belonging to settlers along that road from trespassing on the common, where they are impounded by order of the trustees; such straying and trespass might be prevented by the employment of a herdsman on the part of the commoners. The same reasons might be advanced for public gates on all the other public roads radiating from Collector, viz.:—To Goulburn, to Currawong, to Bungendore, to Gundaroo, to Gunning. Assuming their erection, no doubt it would be found by the inhabitants a serious inconvenience to have direct communication on all sides hindered by public gates, and their town within an enclosure. Moreover, it will be observed that the road to Breadalbane station is that which may reasonably be supposed to convey the most traffic, especially that of a light character, to which gates are the greatest inconvenience.

4. It is remarkable that the parties most concerned—the inhabitants at Collector—have not complained, the opposition arising from those without the township and commoners boundaries; which is evidence of the insignificant character of the traffic, and the value attached to the commonage.

5. The Government town of Collector comprises but few houses and inhabitants, the greater settlement being at the private township, within T. A. Murray's 1,280 acres; the total population is about a hundred souls, for whose use is appropriated an area of 1,965 acres as commonage, say about 20 acres per head.

6. As a matter of fact, the inconvenience resulting from the public gate is of the least harassing character, and the assertions to the contrary appear somewhat exaggerated, when it is known that up to the present time there are two other gates not authorized on the road to the railway station. The contention which has for some time been carried on originates partly from local and party differences.

7. Taking into consideration the doubtful position of the trustees as applicants for a public gate, the aspect and importance of the road, the position of the gate relatively to the town, and the opposition by a large number of inhabitants of the locality, I am of opinion that it would be expedient to revoke the permission granted for this gate.

Goulburn, 7th July, 1879, No. 34.

Submitted.

E. TWYNAM,

District Surveyor.

Minutes on No. 24.

In my opinion the trustees of the common have the power as "occupants" in lawful possession of the land, to apply for the gate; and in view of the fact that the inconvenience caused by the gate is (according to this report from Mr. D.-S. Twynam) of the "least harassing character," I am of opinion that the permission which has been granted should not be cancelled.—ROBT. D. FITZGERALD, for Surveyor General, 9th October, 1879.

Submitted.—H. W., 1/11/79.

Approved.—E.A.B., 17/11/79.

No. 28.

H. S. Badgery, Esq., M.P., to The Secretary for Mines.

Sir,

2 March, 1880.

I am informed that public gates are being erected on the main road from Collector to Breadalbane; and as a large number of the inhabitants are much opposed to this as a great public inconvenience, I am requested to respectfully urge that you will not permit the gates in question to be erected till further inquiry is made and till sufficient time has been allowed for an expression of public opinion, supplied on either side, to be made.

I have, &c.,

HENRY S. BADGERY.

No. 29.

Petition from Inhabitants of Collector and surrounding Districts.

Petition from inhabitants of Collector, Currawang, Breadalbane, Lake George, Spring Valley, and Tarago, to the Honorable the Minister for Mines.

WE, the undersigned inhabitants of Collector, Currawang, Breadalbane, Lake George, Spring Valley, and Tarago, seeing that a public gate is now erected on the road from the Collector Common to the Breadalbane Railway station, beg respectfully to state that the gate is not required, on the following grounds:—

1. That the road from Collector Common to Breadalbane is fenced on both sides nearly the whole way, the portion unfenced being Government land.

2. That the gate is of benefit to only two persons whose stock are running on the common; and that there are other persons whose stock are running on this common, and they object to this gate being erected.

3. That there is a great deal of traffic from the surrounding districts to the Breadalbane platform, and this gate causes great inconvenience to persons going to and from the platform, more especially persons travelling with buggies, carts, &c.; women also travelling with carts, &c., with children, find it particularly inconvenient and dangerous getting down to open and shut this gate.

4. That a petition against this gate was presented to the Honorable the Minister for Mines, signed by a number of the inhabitants, who promised that the wishes of the petitioners would be considered.

We now request that you will reconsider the matter and have this gate removed.

And your petitioners will ever pray.

COOPER BROTHERS,
ROBERT BEIT,
EDWARD GRAHAM, J.P.,
And 81 others.

The Surveyor General, B.C., 19/3/80.—H.W. In my opinion there is nothing in this petition to warrant any departure from the decision of the Secretary for Mines, on the 17th November, 1879, on 79-2,466 Rds., viz., that the permission to erect the gate, which has been granted should not be revoked.

—ROBT. D. FITZGERALD, for Surveyor General, 14 May, 1880.

27. Mr. Road-Superintendent Chauncy to the Commissioner for Roads—further report and estimates; minutes thereon. 26 November, 1877	14
28. The same to the same, reporting according to instructions (see No. 27); minute thereon. 28 November, 1877	16
29. Under Secretary for Lands to the President of the Argyle and Georgiana Roads Association, in reply to letter of 8th ultimo (see No. 25), and informing him tracing applied for cannot be supplied. 14 December, 1877	16
30. Under Secretary for Works to Wm. Davies, Esq., M.P., in reply to letter of 8th ultimo (see No. 26), and transmitting to him (as Member for the District) the tracing applied for. 14 December, 1877	15
31. The Argyle and Georgiana Roads Association to the Honorable the Minister for Lands—further application for tracings; minutes thereon. 24 December, 1877	15
32. Under Secretary for Lands to the Argyle and Georgiana Roads Association, in reply to letter of 24th ultimo (see No. 31), and informing them the case has not yet reached the point at which objections from the public are invited. 24 January, 1878	16
33. Memo.—Mr. Road-Superintendent Chauncy to the Commissioner for Roads—further report on road and the erection of gates, minutes thereon. 1 February, 1878	16
34. Minute for Executive Council—confirmation of road; minute thereon. 27 February, 1878	16
35. Government Gazette Notice—confirmation of road. 26 March, 1878	17
36. Under Secretary for Lands to the Principal Under Secretary, drawing his attention to Gazette Notice (see No. 35), and requesting him to have the goodness, at the end of forty days from date thereof, to state whether any claims for compensation have been made. 5 April, 1878	17
37. The Under Secretary for Lands to the Honorable James Chisholm, M.L.C., in reply to letter of 18th October, 1876 (see No. 17), and advising him His Excellency the Governor and the Executive Council have approved of the confirmation of the road. 30 April, 1878	17
38. Mr. Surveyor Schleicher to the Surveyor General, reporting according to instructions of 5th March (see No. 33), with plan and book of reference. 8 May, 1878	17
39. Principal Under Secretary to Under Secretary for Lands, in reply to letter of 5th ultimo (see No. 36), and stating that no claim for compensation has been received; minute thereon. 8 May, 1878	18
40. Mr. Road-Superintendent Chauncy to the Commissioner for Roads, stating inquiries are being made with respect to new line of road, and asking when it is desired to have it opened; memo. thereon. 21 May, 1878	18
41. Minute Paper, Department of Roads and Bridges, with regard to road, and objecting to compensation for fencing, when gates are allowed; memo. thereon. 27 June, 1878	19
42. Memo. Commissioner for Roads to Mr. Wood—to report on matter, in consequence of decease of Mr. Road-Superintendent Chauncy; memo. thereon. 21 November, 1878	19
43. The Commissioner for Roads to the Honorable James Chisholm, informing him that Mr. Wood has arranged for a meeting on the ground to go into the question of the road. 23 November, 1878	19
44. Telegram, Commissioner for Roads to Assistant Engineer for Roads, or District Surveyor, Goulburn, stating Mr. Chisholm going up by train, and to arrange meeting. 28 November, 1878	19
45. Mr. Acting District-Surveyor Schleicher to the Commissioner for Roads, in reply to telegram (See No. 44), and stating he had written Mr. Chisholm arranging meeting. 28 November, 1878	19
46. The Commissioner for Roads to Mr. Acting District-Surveyor Schleicher, acknowledging receipt of letter of 28th instant (See No. 45). 29 November, 1878	20
47. The Honorable James Chisholm to the Commissioner and Engineer for Roads, stating that he and Messrs. Wood, Waddell, and Schleicher inspected the road; minute, &c., thereon. 10 December, 1878	20
48. Mr. Acting District-Surveyor Schleicher to the Surveyor General, reporting meeting on the ground, &c., and further reporting upon the road; minutes thereon. 14 December, 1878	20
49. Mr. Assistant Engineer for Roads Wood to the Commissioner for Roads, on the same subject; minutes thereon. 20 December, 1878	21
50. The Commissioner for Roads to the Honorable James Chisholm, informing him it is considered advisable to proceed in the ordinary legal way with the proclamation of the line at present in use. 8 January, 1879	22
51. The Honorable James Chisholm to the Commissioner and Engineer for Roads, in reply to letter of 8th instant (see No. 50), and concurring therein, also trusting Mr. Chauncy's recommendation with regard to amount of compensation be carried out in its integrity, &c.; minute thereon. 14 January, 1879	22
52. The Commissioner and Engineer for Roads to the Honorable James Chisholm, in reply to letter of 14th instant (see No. 51), and informing him there is no record in the office of promise having been made to pay compensation. 17 January, 1879	22
53. The Surveyor General to the Under Secretary for Lands, forwarding plan and book of reference (see No. 38), with a view to opening the road; minutes thereon. 29 January, 1879	22
54. Minute for Executive Council—preliminary notification of road; minutes thereon. 6 February, 1879	23
55. The Under Secretary for Mines to the Benches of Magistrates, Goulburn and Collector, enclosing plans and books of reference (see No. 38) for deposit in the respective Police Offices, &c. (see No. 53). 14 February, 1879	23
56. Preliminary notification of road inserted in Government Gazette. 21 February, 1879	23
57. The Under Secretary for Mines to the Clerk of the Executive Council, drawing attention to notice in Government Gazette (see No. 56), &c. 22 February, 1879	23
58. The Clerk of the Executive Council to the Honorable the Secretary for Mines, in reply to letter of 22nd ult. (see No. 57), and stating no objection has been lodged; minute thereon. 27 March, 1879	24
59. The Under Secretary for Mines to the Benches of Magistrates, Goulburn and Collector, asking if plans, &c., enclosed in letter from this office of 14th February last (see No. 55) have been exhibited, &c.; memo. thereon from Clerk of Petty Sessions, Goulburn. 13 October, 1879	24
60. Clerk of Petty Sessions, Collector, in reply to letter of 13th (see No. 59). 18 October, 1879	24
61. Minute for the Executive Council—confirmation of road; minutes, &c., thereon. 25 October, 1879	24
62. Government Gazette Notice—confirmation of road. 2 December, 1879	24

70. The Honorable James Chisholm to the Commissioner for Roads, acknowledging receipt of letter of 22nd inst. (see No. 68), and stating as he selected the Crown Lands as additional selections, that did away with the Surveyor General's objections (see No. 69); minutes thereon. 26 January, 1880	26
71. The Commissioner and Engineer for Roads to the Honorable James Chisholm, acknowledging receipt of letter of 26th inst. (see No. 70), and informing him that the whole question would be dealt with by the Survey Department. 28 January, 1880	26
72. The Under Secretary for Public Works to the Honorable James Chisholm, with reference to his letter of 9th December last (see No. 64), and forwarding copy of report from the Commissioner for Roads (see No. 65). 23 February, 1880	27
73. The Honorable James Chisholm to the Honorable the Secretary for Public Works, further urging his claim for compensation (minutes thereon). 27 February, 1880	27
74. The same to the same, to similar effect (memo., minute, &c., thereon). 5 March, 1880.....	27

ROAD THROUGH THE HONORABLE JAMES CHISHOLM'S LAND, FROM
BREADALBANE PLATFORM TO THE COLLECTOR ROAD.

No. 1.

Mr. Road-Superintendent Chauncy to The Commissioner for Roads.

Road, Collector to Mutbilly.

Sir,

Goulburn, 21 August, 1875.

In visiting Collector on the 19th instant I took occasion to pass over and examine the above road. I found three-fourths of it to be fairly good. A side cutting of about $\frac{1}{2}$ a mile will be required along the shores of an extensive lagoon, and there is from one mile to a mile and a-half passing over low flats. These have had about $\frac{1}{4}$ mile of metalling done; but about a mile still remains to be executed—when this is done the road will be very good. But as the siding (railway platform) proposed will be about 1 mile north of this road, I think a deviation will have to be made.

I am still of opinion, however, that the traffic on this line will never be very great, as the great bulk of it will still go to Goulburn, or even to the platform near 6 (six) mile post, rather than to Mutbilly.

I have, &c.,

W. S. CHAUNCY,

Road Superintendent.

Will Mr. Chauncy state amount available. It is clear the road should go to the Railway station. How will this platform be connected with the main road? I wish a sketch or tracing. County map showing in "blue" line of railway and position of Mutbilly platform.—F.A.F., 10/9/75.

Mr. Wickham,—Return for further report.—W.C.B., 10/9/75.

Mr. Chauncy,—B.C. with plan, to be returned.—W.W., 10/9/75.

This road being in the hands of trustees I cannot tell the amount available, but the sum voted for this year was £63 (recommended for increase to £91 in 1876). The present road comes out in main road, opposite Hannon's, and I should say about $1\frac{1}{2}$ mile south of the proposed platform. The plan is not to hand as stated.—W. S. CHAUNCY, 11/9/75.

Telegram sent to Mr. Chauncy as to plan.—14/9/75.

Mr. Eames,—Have the plan looked up and forwarded; be very careful that when enclosures are mentioned in letters or papers that they are sent. Mr. C. will please mark siding and platform at Six-mile post on plan.—W.C.B., 14/9/75. Mr. Eames.—B.C. Now to Mr. Chauncy.—B.C. 15/9/75. Done.—W. S. CHAUNCY, 16/9/75.

Should not some steps be taken to get this deviation made to the station? Is the road *via* Walero-gang Lake subsidized? Is there any road in this vicinity which could be omitted?—W.C.B., 18/9/75. Mr. Chauncy, B.C., 18/9/75.

I do not precisely understand whether the Commissioner refers to the 16-mile station or the 6-mile. If to the former, I may say that there would be no difficulty to make a deviation so as to bring the road out at the station, and it would be a great improvement; but at present it is impossible to get surveyors here to do anything, as they appear to be all sent away to Young, Cootamundra, &c. The road is subsidized, but no improvements have yet been made on the part which would have to be abandoned.—W.S.C., 20/9/75. Re-submit.—W.C.B., 21/9/75.

It is clear I refer to the 16-mile station. I think the change should be made; there will be no difficulty as to engineering. But who owns the land? Will there be compensation for severance or fencing? Ask proprietors.—W.C.B., 22/9/75. Mr. Chauncy.—B.C., 24/9/75.

I was on the ground yesterday, and now find they are putting in the siding about $\frac{1}{4}$ mile north of 15-mile post. The proposed deviation will pass over fairly good country for road purposes, and will extend to the Wet Lagoon about 3 miles, thereby saving about 3 miles for those travelling from Collector. The land belongs to Mr. John Chisholm, who will doubtless require to be paid for the fencing; but I do not think he can legally claim compensation for land. I have not yet seen him on the subject, but will endeavour to do so shortly.—W. S. CHAUNCY, Road Superintendent, 25/9/75.

I wish Mr. Chauncy to go thoroughly into this question with Mr. Chisholm and Mr. Twynam, so that the road may be opened without delay.—W.C.B., 27/9/75. Mr. Chauncy, B.C., 27/9/75. Seen.—W. S. CHAUNCY, 30/9/75.

No. 2.

Memo. from Commissioner for Roads to Mr. Road-Superintendent Chauncy.

WHAT has Mr. Chauncy done about railway approach at Mutbilly? The line will be open before anything is done.

16/10/75.

W. C. BENNETT.

Mr. Chauncy, B.C.—Reply by return post.

I made an appointment with Mr. Twynam for 9th instant which he was unable to keep, and has made another appointment for to-day; but as I have other engagements which must be attended to I am sending Mr. Allman to go over the ground with him, who will then be able to communicate with me as to any information received from Mr. Twynam. I will then go over the ground myself. It may be necessary to state that I have already indicated the direction the line should take, and if no objection should be offered by Mr. Twynam after he has examined it we shall be in a position to apply for a survey. As for Mr. Twynam, he is about leaving Goulburn for a time, and is in fact seldom here now, so that I cannot depend upon him to meet Mr. Chisholm except at long intervals, and I presume that the negotiation of this affair must be carried out by myself alone. I have seen a letter from Mr. Chisholm, in which he expresses his willingness to have the line opened as proposed by me, but objects to the longer one recommended

recommended in the first instance by Mr. Twynam. He is, however, at present only willing to give his consent conditionally upon the road at present in use to Hannon's being given up; but Mr. Twynam says this cannot be done, as it is a cross road at Mutbilly and numerous interests are involved.—W. S. CHAUNCY, 16/10/75.

I will hasten matters as much as possible.—W.S.C. This sketch will afford some idea of the position of the respective roads named in this memorandum. I will shortly forward a correct plan or tracing of the locality.—W.S.C. Sketch

Mr. Chauncy should have made an effort to meet Mr. Twynam. I should prefer the negotiation to be carried on by him. Mr. Chauncy had better only select the line of road and allow Mr. Twynam to negotiate.—W.C.B., 18/10/75. Mr. Chauncy, B.C., 18/10/75.

I had a prior appointment to visit Taralga, from which I have just returned. I find it impossible to visit all the roads in the month. I propose going to the Abercrombie next week, and am doing all I can to get over as much ground as possible in the meantime. I shall be very glad to leave this to Mr. D.-S. Twynam. I merely thought it might be desirable that the Roads Department should be represented, but I had no thought of arranging anything definitely without the full concurrence of the Commissioner. By making several turns at right angles parish roads may be availed of; but the road in that case would not only be much longer but very hilly, whereas the direct road will be free from all impediments, and I think in every way much better. Mr. Twynam has been over the road with Mr. Allman, who will be able to point out to me the line proposed by Mr. Twynam; but I am, I believe, to hear first from Mr. Twynam as to his final determination; if not, I expect to see him on Monday. Mr. Twynam does not appear to consider the matter as in any way urgent. It is probable that Mr. Chisholm will oppose the passage of the road through his land except on the conditions named in my former communication. I will report again as soon as I possibly can, as it appears to me to be very important.—W. S. CHAUNCY, 21/10/75.

P.S.—I intend to go over the ground myself with Mr. Allman on Monday, after which I shall be in a better position to judge of Mr. Twynam's recommendation.—W.S.C.

The road must not be sacrificed for any land considerations.—W.C.B., 22/10/75. Mr. Chauncy, B.C., 22/10/75. I have seen Mr. Twynam this morning, and he has shown me a plan by which he proposes to take about five (5) miles without infringing on private property. I am to go over it on Tuesday and will report further. Mr. Twynam is about to submit a plan to the Surveyor General.—W. S. CHAUNCY, 23/10/75. This will not materially increase the distance.—W.S.C. File.—W.C.B., 25/10/75.

No. 3.

Mr. District-Surveyor Twynam to The Surveyor General.

Application by James Chisholm for the opening of a deviation in the road from Pomeroy to Collector, at the Wet Lagoon, near Mutbilly, county of Argyle.

MR. CHISHOLM proposes a diversion of the road, with the object of providing more direct access from Collector to the platform on the Southern Railway at Mutbilly, and desiring that such diversion, if approved, shall be opened in lieu of a part of the present road, which intersects the Southern Road at Hannon's Inn. The effect of such a diversion would be to break the continuity of the road, and increase the distance for through traffic by about 2 (two) miles; such traffic is at present insignificant, and confined to the moving of a few cattle, but it may probably soon increase as the facilities offered by railway communication improve and develop the resources of the locality. At the intersection of the two roads there has been established for many years an inn kept by J. Hannon, who informed me that he would oppose the deviation suggested, on the grounds that it would divert traffic from his licensed house, to the material damage of his interest therein; and moreover that he and others required the present road for convenient access to water in the Wet Lagoon.

The Wet Lagoon offers a fine harbour for wild fowl, and is at present easily accessible from the Pomeroy and Collector Road, which runs along the strand of this small lake for about half-a-mile, and thus to a certain extent it is available to public recreation for shooting; it also affords abundant and wholesome water supply, and it is represented that for this reason alone there should be no alteration in the present course of the road.

Under these circumstances, it appears to me that it would not be desirable to open the deviation proposed by Mr. Chisholm.

The matter of convenient approach from Collector to the platform is dealt with by a separate letter. Submitted.

E. TWYNAM,
District Surveyor.

Goulburn, 26 October, 1875.

No. 4.

Mr. Road-Superintendent Chauncy to The Commissioner for Roads.

Sir,

Goulburn, 27 October, 1875.

I have the honor to enclose a tracing showing the lines of proposed deviation to meet the railway platform 10 to 15 chains north from 15-mile post. Tracing.

Mr. Twynam is about forwarding a report to the Surveyor General on the subject. He did not inform me precisely as to the nature of the recommendation he intends to make, but gave me to understand that I might perhaps be further advised before the report goes off. I have reason, however, to believe that it is likely he will recommend the adoption of the line C to D, as this can be taken through without interfering with private property. I have carefully examined this line, which is $5\frac{1}{4}$ miles in length, and (as nearly as I can ascertain from scaling the plan) one-quarter mile longer than the line C A D. But there are other disadvantages attending the adoption of the line C D. The entire road is more or less hilly throughout, the ascents and descents being numerous, and several of them very steep; say from 1 in 9 to 1 in 10. Some of these hills are very rough, being covered with quartz rock. The road is also very scrubby and densely timbered, and will cost at least £250 to clear. Two expensive causeways and from 20 to 30 chains of metalling would be required at once to render the road passable, and

and as the distance by this way as compared with going round by B would save only two miles and thirty chains, I am of opinion that the public would prefer the old road to the new one, and that the journey could be performed as quickly under ordinary conditions.

For the above reason I would beg to recommend that no thought be entertained of adopting the line C D.

On the other hand, I think that the line A D would be in all respects a better one for the public. It is open forest country, only slightly undulating, and fully a quarter mile shorter than the line C D.

The ground is for the most part tolerably firm, and this was the line recommended by Mr. Chisholm, though tacked to a proviso for the cancelling of road A B.

This proviso, however, cannot be entertained, as the vested interests would suffer by such an arrangement; but nevertheless I can hardly think that Mr. Chisholm would refuse his consent if an offer were made to fence in the road. This, I think, under the circumstances, ought to be done. At 5s. per rod this would amount to £220 for one side only, or double the amount for both sides. I think the equity of the case would be met by offering to fence one side only, as there is but one side fence on the road A D. Such an arrangement might, I think, be shown to conduce to the advantage of Mr. Chisholm; as, if the line C D be taken, he will in that case be under the necessity of doing the fencing himself over at least four miles of ground. As soon as I can do so, I intend to make a survey of the line A D, and will then report again.

I have, &c.,

W. S. CHAUNCY,

Road Superintendent.

Mr. Chauncy has not marked B on plan. I do not think it likely Mr. Chisholm would be content with the fencing on one side. Mr. Chauncy not to take further steps until Mr. Twynam's report is to hand.—W.C.B., 28/10/75. Mr. Chauncy, B.C. The Commissioner will perhaps be so good as observe the letter B on diagram below the general plan.—W. S. CHAUNCY, 1/11/75. Re-submit when Mr. Twynam's report is to hand.—W.C.B., 2/11/75. Will Mr. Chauncy state what has been done in this case.—W.C.B., 24/3/76. Mr. Chauncy, B.C. Please see report herewith.—W. S. CHAUNCY, 3/4/76.

No. 5.

Mr. District-Surveyor Twynam to the Surveyor General.

REFERRING to correspondence touching a proposed deviation at Mutbilly in the road from Pomeroy to Collector, from which it appears desirable to provide for direct communication from Collector to the Mutbilly platform on the Southern Railway, I would now suggest the opening of the road indicated by the red band in the accompanying sketch, which will secure a suitable approach to the railway.

The road proposed to be opened* would resume land belonging to Mr. James Chisholm in quantity amounting to about 1½ acre.† The severance would not inflict much damage, inasmuch as the adjacent lands all belonging to Mr. Chisholm are separated from the portion severed by a reserved road, which would be superseded by the proposed parish road, and thus being unnecessary might be alienated to him.

I have prepared a sketch annexed‡ illustrative of the question of providing communication from Collector to the Southern Railway, on which a deviation in an existing road, suggested by Mr. Chisholm, is indicated approximately by a black dotted line;§ and the road provided in the subdivision of surrounding country is shown in the usual manner, the extension of the same to the railway platform now suggested being coloured red. The latter would be about a quarter of a mile longer, and rather more costly in construction¶ than the before-mentioned deviation. I may add my opinion that all works necessary to place the road provided and its extension in a state suitable for present traffic might be effected at a cost of about £200. Submitted.

E. TWYNAM,

District Surveyor.

Goulburn, 25 November, 1875.

Forwarded to Mr. District-Surveyor Twynam, who is requested to have the road recommended laid out.—ROBT. D. FITZGERALD (for the Surveyor General, 7th December, 1875). Transferred to Mr. Licensed-Surveyor Deane, for survey.—E.T., D.-S., 17th December, 1875.

No. 6.

Mr. Licensed-Surveyor Deane to The Surveyor General.

Goulburn, 1 March, 1876.

Sir, I have the honor to transmit herewith the plan, accompanied by book of reference of part of the road from Collector to the Great Southern Road at the Breadalbane platform, in the parish of Mutbilly, in the county of Argyle, which I surveyed and marked on the 7th of January last, in accordance with instructions received from the district surveyor, and in compliance with your B.C. instructions No. 75/1,038, of the 7th December, 1875.

No expenditure is required on this road to render it fit for traffic.

I have, &c.,

E. R. DEANE.

Book of reference of road from a reserved road at the north-east corner of James Chisholm's 320 acres conditional purchase to the Main Southern Road within James Chisholm's 640 acres, being part of the road from Collector to the Southern Railway at the Breadalbane platform, parish of Mutbilly, county Argyle, to be opened as a parish road under the Act of Council 4 William IV No. 11.

Portion of road.	Reputed owner and occupier.	Character of land.	Bearings.	Length in chains.	Enclosures.	Character and state of preservation of fencing.	Cultivation.	Breadth of road.	Area.
From a reserved road at the north-east corner of John Povey, now James Chisholm's 320 acres conditional purchase, to the Main Southern Road, within James Chisholm's 640 acres, in the parish of Millbang, in the county of Argyle.	James Chisholm	Forest land, unimproved, adapted for grazing.	Northerly	21.06	Enclosed	Good hardwood 2-rail fence.	None	1 chain ..	a. r. p. 2 0 16

Copy to be sent by the Department of Lands to the Police Offices at Goulburn and Collector.

¶ Very much more costly in construction.—W.S.C.

Plan.

No. 7.

Mr. Road-Superintendent Chauncy to The Commissioner for Roads.

Sir,

Goulburn, 3 April, 1876.

I beg to return with this the papers relating to road from Collector to railway platform, Mutbilly, also copy of two reports from Mr. Twynam to the Surveyor General, with reference on margin of same to my own original sketch. From the report dated 25th November, 1875, it will be seen that Mr. Twynam reports that the road recommended by him will be more costly in construction and of greater length than the road proposed by Mr. Chisholm and myself. ce No. 4.

It must nevertheless be admitted that a considerable saving would be effected in respect of compensation for the purchase and fencing of land by the adoption of Mr. Twynam's line.

Notwithstanding this, however, I am of opinion that the road is so bad, and the expense of construction would be so great, that it will, on the whole, be most advantageous to the public interest to adopt the line A D, which is naturally a good road.

I cannot hear that any further action has been taken by the Department of Lands in reference to this matter.

I have, &c.,

W. S. CHAUNCY,
Road Superintendent.

Mr. Chisholm proposes the red road, with the understanding that Hannon's road should be shut up. He will no doubt demand a large sum for compensation and fencing. Will Mr. C. say probable amount. In what is the difficulty of construction on Mr. Twynam's road? Give estimate of the two, showing amounts for compensation (indispensable), fencing, and construction in each case.—W.C.B., 5/4/76. Mr. Chauncy, B.C. Report herewith.—W. S. CHAUNCY, 10/4/76.

No. 8.

Mr. Road-Superintendent Chauncy to The Commissioner for Roads.

Estimate—Line A.D.

	£	s.	d.
Three-rail fence 480 rods @ 5s.	210	0	0
Clearing 105 chains (66 feet wide) @ 10s....	52	10	0
Metalling—say 5 chains @ £10	50	0	0
Drains, 20 chains, @ say £40	10	0	0
	£322	10	0

N.B.—If the road be fenced on both sides Mr. Chisholm would not, I think, be entitled either by law or custom to any further compensation. I believe this was so decided in the case of Mr. Shepherd, of Wheeo.

Estimate—Line CD.

	£	s.	d.
Clearing 20½ chains @ 15s., the timber thick and scrubby in places, and the work more expensive in consequence of standing fences	157	0	0
Metalling, say 15 chains, @ £10	150	0	0
Causeways, lin. yds., 58½, @ 13s. 4d.	39	0	0
Drains, 1 mile, @ (say) £40... ..	40	0	0
	£386	0	0

N.B.—The above sum of £386 would, in my opinion, be the least sum to be expended in order to render this road even moderately passable; but it is ¼ mile longer than the other road, and would in other respects be a much worse road than the shorter line, as there are not only several very steep hills upon it, but also several flats which would ultimately require metalling in order to meet the fair requirements of traffic during the wet season.

W. S. CHAUNCY,
Road Superintendent.

Goulburn, 10/4/76.

Is Mr. Chauncy aware that we have no power at all to enter on this land, with or without payment of compensation, except by consent, unless the road is proclaimed, and Mr. C. knows the length of time that will take. I wish him to state if he thinks we should go through the routine of proclamation.—W.C.B., 11/4/76. Mr. Chauncy, B.C.

Yes. I think it better that the matter should be delayed a year or two rather than the public be permanently inconvenienced.—W. S. CHAUNCY, 12/4/76. Under the circumstances detailed in papers herewith, the Surveyor General might be asked to have the road in question proclaimed with as little delay as possible.—W.C.B., 13/4/76. Under Secretary, B.C. Under Secretary for Lands, B.C. 18/4/76.—J.R.

Forwarded to Mr. District-Surveyor Twynam, who is requested to report whether the wishes of the Works Department, and his own objections of depriving the public of access to the Wet Lagoon might not be met by laying a road from the existing road (at a point which would still afford access to the Wet Lagoon) to the railway platform, to be proclaimed in lieu of the remaining portion of the existing road from such point to the Main Southern Road (as shown upon accompanying tracing in blue dotted lines).—ROBT. D. FITZGERALD, for the Surveyor General, 8th May, 1876.

No. 9.

Mr. District-Surveyor Twynam to The Surveyor General.

Further report under B.C., 76/271.

FURTHER particulars are requested as to whether the objection to the deviation proposed by Mr. Chisholm, on the grounds of intercepting access to the Wet Lagoon, may not be met by diversion at a more northerly point, thus affording ample access along the eastern margin of the lagoon.

To this suggestion I would rejoin that, although access to the lagoon would be preserved by the road from Collector to the Breadalbane Platform, still direct approach from the Main Southern Road, near Hannan's, would be stopped. Moreover, I would point out that the question of access to water is not of such salient importance as to make it the chief point of consideration in dealing with this matter. I am aware that any deviation of the Pomeroy and Collector Road will meet with strenuous opposition; and putting aside general objections which may be advanced, I think it will be found difficult to meet Hannan's objection to any deviation of the road which would divert traffic from his licensed house.

It will be observed that the Roads Superintendent concurs in this view, and recommends the opening of the deviation as a separate road for approach to the Breadalbane Platform on the Southern Railway. Thus the question is brought to the consideration of the importance of the traffic for which provision is to be made.

The town of Collector comprises a population of about 100 souls, a monthly Court of Petty Sessions has been established, and lately a Court-house has been built; the local trade is of the most insignificant character and not likely to improve, and it is simply absurd to suppose that the traffic for many years to come will assume such importance as to warrant the expenditure incurred in the opening of the deviation, or as it may really be treated the new road, irrespective of the damage by severance of valuable private estate.

Touching Road Superintendent's report on the comparative cost of necessary works on the road provided to the platform, CD., and the proposed road AED, I think that without presumption I may state that the works he recommends are greatly in excess of the requirements of probable traffic, and I am convinced that the sum I have named, £200, would be ample for all necessary work. Also, it is evidently supposed by the Road Superintendent that the road CD can be closed; this road cannot be closed at present, inasmuch as it affords access to land in possession of several proprietors, and to Crown Land; moreover, it must not be overlooked that, in respect of heavy traffic, there is another road, viz., from Collector *via* the Goulburn Road, maintained as of the 2nd class, to the Collector Platform at the point where the railway crosses the Southern Road (near Kinghorne's 1,000 acres). This route is about 5 miles longer than that *via* the Pomeroy Road, but saves 9 miles of haulage by railway, and therefore will probably be adopted as the depôt for produce brought from the neighbourhood of Collector.

It may also be as well to point out that the question of providing direct approach to the Breadalbane platform originates with Mr. Chisholm, who is desirous of securing a more convenient arrangement of his paddocks, and not with the inhabitants of Collector, who do not appear to have moved in the matter, and therefore at present the question is discussed between the Road Superintendent who would sacrifice private interests for what at present cannot be held as other than imaginary public requirements, and the district surveyor, who suggests a road practicable for all present and probable requirements now partly used, and which may be made quite passable for all ordinary traffic at a comparatively small cost, without involving serious damage by severance of alienated land.

Mr. Chisholm has not lately moved in the matter, and probably will take no further steps, but if he is desirous that it should proceed, the Surveyor General might authorize the survey of the new road, with a view to eliciting formal objections; but I need scarcely point out that, in event of the road not being treated as a deviation, any survey will be detrimental to Mr. Chisholm's interests.

Submitted.

Goulburn, 23 May, 1876.

E. TWYNAM,
District Surveyor.

On this report from Mr. District-Surveyor Twynam, it is *not* recommended that the road required by the Commissioner for Main Roads be laid out, and it is suggested that these papers be forwarded to him for his information.—ROBT. D. FITZGERALD (for Surveyor General), 29th June, 1876. Approved.—T.G., 3/7/76. Under Secretary for Public Works, B.C., 5/7/76. Roads, B.C., 7/7/76, J.R. Mr. Chauncy, B.C., W.C.B., 8/7/76.

I am still of opinion that private interests ought to give place to public requirements. However, I do not see how the division of the paddock by the line AD can prove injurious to Mr. Chisholm. I should have supposed it would have a contrary effect. I am satisfied that my estimate for the repair of line CD is moderate, if rendered available for heavy traffic. In one thing I agree with Mr. Twynam; the amount of traffic at present is so small as to render the entire question unimportant, except as regards future and undeveloped requirements.—W. S. CHAUNCY, 8/7/76.

I concur with Mr. Twynam that further action is unnecessary.—W.C.B., 10/7/76. Surveyor General, B.C.

These papers may be forwarded to Mr. District-Surveyor Twynam for his information, and when returned by him re-transmitted to Works Department, as they all (with the exception of Mr. Twynam's report) belong to that department.—ROBT. D. FITZGERALD (for Surveyor General), 18th July, 1876.

Noted and returned as requested.—E.T., D.-S., 24/7/76.

These papers should now perhaps be returned to the Works Department, as they all, with the exception of this report from Mr. District-Surveyor Twynam, belong to that department.—ROBT. D. FITZGERALD (for Surveyor General), 23rd August, 1876. Under Secretary for Public Works, B.C., 24/8/76, A.O.M., for U.S.

No. 10.

The Surveyor General to The Under Secretary for Lands.

THE accompanying plan and book of reference of road from a reserved road at the north-east corner of James Chisholm's 320 acres conditional purchase, to the Main Southern Road within James Chisholm's 640 acres, being part of the road from Collector to the Southern Railway, at the Breadalbane Platform, parish of Mutbilly, county of Argyle, are forwarded with the view to the opening of the line as a parish road, under the Act of Council 4 William IV, No. 11.

For plan and book of reference, see No. 8. Sec No. 12.

B.C., 29th June, 1876.

ROBT. D. FITZGERALD,
(For Surveyor General).

Minute, 8 July, 1876, T.G. The Executive Council has authorized the proclamation of this road.
Min., 76/34.—Confirmed, 17/7/76.

No. 11.

Minute for Executive Council.

Preliminary notification of road.

Department of Lands, Sydney, 8 July, 1876.

THE authority of His Excellency the Governor and the Executive Council is sought for the opening of the undermentioned line of road, as shown by the accompanying plan and book of reference, in accordance with the provisions of the Act 4th Wm. IV, No. 11, viz. :—Road from a reserved road at the north-east corner of James Chisholm's 320 acres conditional purchase to the Main Southern Road, within James Chisholm's 640 acres, being part of the road from Collector to the Southern Railway, at the Breadalbane platform, parish of Mutbilly, county of Argyle.

THOMAS GARRETT.

THE Executive Council advise that the intended formation of the line of road, herein specified, be notified in the manuer prescribed by the Act 4th William IV, No. 11.—ALEX. C. BUDGE, Clerk of the Council.

Min. 76-34, 10/7/76.—Confirmed, 17/7/76. Approved.—H.R., 10/7/76.

No. 12.

The Under Secretary for Lands to The Bench of Magistrates, Collector.

Gentlemen,

Department of Lands, Sydney, 28 July, 1876.

I have the honor to forward, for deposit in the Police Office at Collector, for public inspection and information, copies of a plan and book of reference of a road which is about to be opened as a parish road, under the Act of Council 4th William IV, No. 11, from a reserved road at the north-east corner of James Chisholm's 320 acres conditional purchase to the Main Southern Road, within James Chisholm's 640 acres, being part of the road from Collector to the Southern Railway, at the Breadalbane platform, parish of Mutbilly, county of Argyle.

For plan and book of reference see No. 8.

I have, &c.,

A. O. MORIARTY,
Under Secretary.

No. 13.

The Under Secretary for Lands to The Bench of Magistrates, Goulburn.

Gentlemen,

Department of Lands, Sydney, 28 July, 1876.

I have the honor to forward, for deposit in the Police Office at Goulburn, for public inspection and information, copies of a plan and book of reference of a road which is about to be opened as a parish road, under the Act of Council 4th William IV, No. 11, from a reserved road at the north-east corner of James Chisholm's 320 acres conditional purchase to the Main Southern Road, within James Chisholm's 640 acres, being part of the road from Collector to the Southern Railway, at the Breadalbane platform, parish of Mutbilly, county of Argyle.

Plan and book of reference same as No. 12.

I have, &c.,

A. O. MORIARTY,
Under Secretary.

No. 14.

Memo. by Commissioner for Roads.

MR. WADDELL, of Collector, called at office to-day, and represents that there is an old road from Collector to the platform at Breadalbane Plains which is three miles shorter than the road now being made by trustees (M'Caulay and others). The traffic by rail would be greatly facilitated if the old road was adopted, and the convenience of a large number of inhabitants would be insured. Instead of branching off at top of hill towards Gunning, it should go straight across to the platform, leaving the Wet Lagoon to the left.—W.C.B., 15/9/76.

Mr. Chauncy, for report.—B.C., 15/9/76.

Mr. Waddell is quite mistaken in supposing that any road that could be laid down would shorten the distance by 3 miles; I do not think that 1 mile could be saved by any possible alteration. Such line as Mr. Waddell refers to must of necessity pass through private lands, and would be objectionable on that account; besides which, much useful work in the present road would be rendered almost valueless. There was an excellent track in use for many years, from the Wet Lagoon to the present site of railway station; and, as I have often pointed out, I think this deviation should be adopted.—W.S.C.

I had a conversation with Mr. John Chisholm on the subject a day or two since, and he quite concurs with me in opinion, and in particular is quite satisfied that the public would never adopt the line recommended by the district surveyor. The deviation might be shortened considerably by turning off from the corner of lagoon nearest the main road, and Mr. J. Chisholm does not think it would injure his brother's property.—W.S.C., 18/9/76.

This minute was written under a misapprehension of the request made by Mr. Waddell. The track referred to herein is, I find, identical with the old road referred to by Mr. Waddell, and if adopted, would have the effect of shortening the distance by nearly 3 miles.—W.S.C.

Will Mr. Twynam be good enough to favour me with his opinion on this matter.—W.C.B., 19/9/76.

Will Mr. Chauncy please give a hand sketch of roads as referred to.—G.C.E., for Commissioner, B.C. Mr. Chauncy.—B.C., 21/9/76.

I have seen Mr. Twynam. He says he has nothing to add to previous reports on the same subject. We examined the map together, and find the distance in a *direct* line from centre of Collector township to railway station to be $8\frac{1}{2}$ miles. By either of the roads recommended by us the distance would not exceed 9 miles; by the present circuitous track it is about, or very nearly, 10 miles.—W.S.C., 22/9/76.

No. 15.

Gazette Notice.

Preliminary notification of a parish road.

Department of Lands, Sydney, 22 September, 1876.

His Excellency the Governor, with the advice of the Executive Council, having deemed it expedient to open and make the parish road mentioned in the Schedule appended hereto, to be maintained at the expense of the parish through which it passes, notice is hereby given that, in accordance with the provisions of the Act 4th William IV No. 11, plans and books of reference, showing the intended line of the road in question, are now deposited at the office of the Surveyor General in Sydney, and at the police offices mentioned.

It is requested that any well-grounded objections that may exist to the formation of the road in question may be transmitted in writing to the Clerk of the Executive Council within one month from this date.

By His Excellency's Command,
THOMAS GARRETT.

Schedule referred to.

Roads No.	Description of Road.	Names of reputed Owners or Occupiers through whose properties the Road passes.	Police Offices at which the Plans and Books of References have been lodged.
76-1,152; R 1,300...	Road from a reserved road at the north-east corner of James Chisholm's 320 acres conditional purchase, to the Main Southern Road, within James Chisholm's 640 acres, being part of the road from Collector to the Southern Railway, at the Breadalbane platform, parish of Mutbilly, county of Argyle ...	James Chisholm	Goulburn and Collector.

No. 16.

The Under Secretary for Lands to The Clerk of the Executive Council.

Sir,

Department of Lands, Sydney, 30 September, 1876.

In drawing your attention to the notice in the Government Gazette of the 22nd inst., respecting the intended formation of a parish road, viz., from a reserved road at the north-east corner of Jas. Chisholm's 320 acres conditional purchase to the Main Southern Road, within James Chisholm's 640 acres, being part of the road from Collector to the Southern Railway, at the Breadalbane platform, parish of Mutbilly, county of Argyle, I am directed to request that you will have the goodness, at the end of one month from the date thereof, to inform me whether any objections have been received by you in respect of the said road, in pursuance of the notice alluded to.

I have, &c.,
W. W. STEPHEN,
Under Secretary.

No. 17.

The Hon. J. Chisholm, M.L.C., to The Clerk of the Executive Council.

Kippilaw, Goulburn, 18 October, 1876.

Protest of James Chisholm, Member of the Legislative Council, against the road notified in the Government Gazette of the 22nd September, from the Breadalbane platform, on the Great Southern Extension Railway.

See No. 15.

I OBJECT to the said road passing through my land, for the following reasons:—

About the time the railway was opened to Goulburn I gave the Government a road to enable the people of Collector and intermediate country having free access to the railway platform and the Main Southern Road. I received no compensation for this road, although it passes through my land for three miles, and runs parallel with the road it is intended to proclaim, and through the same paddock. At the time I gave this road the inhabitants of Collector had no access to the railway or the Main Southern Road. The road was of no advantage to myself, but on the contrary, my property was very much injured by it.

This road is nearly level the whole way to Collector, and is kept in repair by money voted by Parliament, and can be travelled in about one and a half hours from the platform to Collector.

The

11

The road it is in contemplation to proclaim will pass mostly through a scrubby hilly country, and will cost several hundred pounds to clear and make it, and then it will not be so good a road as the one I have given.

All the owners of land between the platform and Collector have access to the road now in use, and as all the land on both sides of the road is purchased, it is the most central and convenient for the parties mostly interested.

Two roads I submit are not required, as the traffic from the platform to Collector is so insignificant it does not, so I am informed, pay a railway porter's salary.

JAMES CHISHOLM.

No. 18.

The Clerk of the Executive Council to The Secretary for Lands.

Sir,

Executive Council Office, 26 October, 1876.

In compliance with the request contained in the Under Secretary's letter of the 30th ultimo, No. , I do myself the honor to forward to you the objection lodged with me to the formation of the proposed parish road noted in the margin.*

I have, &c.,

ALEX. C. BUDGE,
Clerk of the Council.

See No. 16.

* From a reserved road at the north-east corner of J. Chisholm's 320 acres conditional purchase, to the Main Southern Road, within J. Chisholm's 640 acres, being part of the road from Collector to the Southern Railway.

Forwarded to Mr. District-Surveyor Twynam, who is requested to report upon the enclosed objection of Mr. Chisholm.—ROBT. D. FITZGERALD (for Sur. Genl.), 8th Feby., 1877. Report accordingly under B.C. memo. dated 13th February, No. 77-24.—E. TWYNAM, D.S.

No. 19.

Mr. Road-Superintendent Chauncy to The Commissioner for Roads.

MEMO.—As I happen to have the enclosed tracing in my possession, I forward it to the Commissioner, in order that he may have it placed with the other papers. It shows the line which I think would be the best to adopt; it is, I believe, nearly identical, and it agrees with that suggested to me by Mr. John Chisholm.

Should the Commissioner desire me to confer at any time with the Hon. James Chisholm on the subject, it would be desirable to return me this tracing with the papers, or forward a copy.

W. S. CHAUNCY,
Road Supt., 2/11/76.

Put all these papers together to take with me to-night.—W.C.B., 3/11/76. A further action required. If Mr. Chauncy thinks further conference advisable he can see Mr. Chisholm, but I think Mr. Twynam is the man to deal with in the first instance.—W.C.B., 15/11/76. Mr. Chauncy, B.C. Please see my letter of this date.—W. S. CHAUNCY, 27/11/76.

No. 20.

Mr. Road-Superintendent Chauncy to The Commissioner for Roads.

Sir,

Goulburn, 27 November, 1876.

At an interview had this morning with the Hon. James Chisholm, he authorizes me to state that he is willing to grant the use of a road for public purposes between the points C and D on the accompanying tracing, provided he be allowed at the rate of .5s. per rod for the fencing, which, for 3 miles of single fence, would amount to £240.

My own opinion is that it will be desirable to consent to this arrangement, as it will save 2½ miles in the distance to the platform over ground naturally good, and which will require little or nothing in the way of repair.

This is the only condition insisted on by Mr. Chisholm, except that he would stipulate to be allowed to erect a gate at points A and C, to which I believe that there would be no objection.

A compliance on the part of the Government will be the means of removing all existing difficulties, and I have no doubt will afford entire satisfaction to the public.

I have, &c.,
W. S. CHAUNCY,
Road Superintendent.

See tracing No. 4.

The proposal is that the line CD be substituted for the line XC, and that £240 be paid for fencing, and permission be given to put a gate at the railway station. Mr. Chauncy reports, and it appears to me that the road C to D would answer the purpose, but I do not know enough of the case to make any recommendation as to the payment for fencing, more particularly at I have always understood that the Gates Act was passed to obviate the necessity for the Government paying for fencing of new roads. The paper should be sent on to Lands, to be dealt with by the Survey Department. Mr. Chauncy also explains that the outlay of this £240 now will save thousands in keeping up a bad road for the future. Mr. Chauncy explains that a gate will be required, as a single line of fence only is proposed.—W.C.B., 11/12/76.

Under Secretary for Lands.—B.C., 21/12/76, J.R. Forwarded to Mr. District-Surveyor Twynam, who is requested to report on this new proposition.—ROBT. D. FITZGERALD (for Surveyor General), 3rd January, 1877.

No. 21.

Mr. District-Surveyor Twynam to The Surveyor General.

Report under B.C. 77/4.

MR. JAMES CHISHOLM, the proprietor whose interests are affected by the diversion of road proposed, has intimated that he is willing to consent to the opening thereof, provided compensation be made in the sum of £240, as for fencing through an enclosure. It would not be becoming in me to oppose the opening of roads through private estate, even where the probable utility of the road is more remote than in this case. My reluctance to concur in the Road Superintendent's views arises from disinclination to advise the sacrifice of private estate to supposititious and improbable requirements of traffic—certainly possible, but under present circumstances altogether improbable.

The traffic from Collector is insignificant, and I have no hesitation in stating that it does not demand the expenditure involved in the opening and construction of the new road; indeed, in support of this opinion I may refer to Mr. Chauncy's minute endorsed upon my previous report, viz.:—"In one thing I agree with Mr. Twynam—the amount of traffic is at present so small as to render the question unimportant, except as regards future and undeveloped requirements."

The statement that the immediate outlay in constructing the diversion of road will save thousands of pounds in maintaining a bad road, and therefore implying the economy of adopting the diversion, appears to me to be rather unreasonable, inasmuch as the necessary works on the road provided will not cost more than £250 and a small sum annually for maintenance, whilst the traffic is of such casual, insignificant character that a first-class road is unnecessary.

I have nothing further to add to the previous reports, except the relative lengths of the three routes mentioned therein, viz.: By the road provided in subdivision of adjacent land, 9½ miles; by the diversion proposed by Mr. Chisholm, 9½ miles; and the distance from Collector to the Collector Platform, on Railway, 14½ miles, of which 2 miles are common to the Southern Road. Submitted.

E. TWYNAM, D. S.

Goulburn, 23 January 1877.

It is recommended that this report from Mr. District-Surveyor Twynam be referred to the Commissioner and Engineer for Roads, with a view to his consideration whether the road proposed by Mr. Road-Superintendent Chauncy should be laid out, in which case the cost of fencing and any claims for compensation should be dealt with by the Works Department. I am of opinion that the necessity for a road must be very great that would warrant the forcing the acceptance of gates in lieu of fencing, upon the proprietors of land through which a road may be taken, as suggested by the Commissioner and Engineer for Roads, in his minute of the 11th Dec., 1876, on 77/25, R.S.B., herewith.—ROBT. D. FITZGERALD (for Surveyor General), 2 July, 1877.

Under Secretary for Public Works.—W.W.S., B.C., 23 July, /77. Roads.—B.C., 27/7/77, J.R. Report herewith.—W. S. CHAUNCY, 2/8/77. Before dealing with this case I wish Mr. Chauncy to reply to Mr. Twynam's objections. Mr. Chauncy, B.C.—W.C.B., 21/8/77.

No. 22.

Mr. District-Surveyor Twynam to The Surveyor General.

Report under B.C. No. 77/53.

MR. JAMES CHISHOLM objects to the opening of this road, on the grounds that there is another road, affording sufficient means of thoroughfare, between the village of Collector and the nearest platform (Breadalbane) on the Southern Railway. The map annexed to my report fully illustrates this case, and the principal reason on which I base my recommendation for the opening of this small portion of road, 25 chains long, through Mr. James Chisholm's land, is that thereby the distance from Collector to the nearest station on the Southern Railway is shortened by 2½ miles; and putting aside relative merits of the two routes, which are fully discussed in other papers (Roads 77/25), and assuming that foot passenger and horse traffic alone are to be provided for, I submit that the gain to public convenience in respect of distance is sufficient to warrant the action taken. I may also point out that the road proposed supersedes that along the north boundary of portions 132 and 134; and I may add my opinion that the opening of this road causes no damage to the occupation or value of Mr. James Chisholm's estate.

Submitted.

Goulburn, 13 February, 1877.

E. TWYNAM, D.S.

It is recommended that, notwithstanding the objections which have been raised, this road be now confirmed.—ROBT. D. FITZGERALD (for Surveyor General), 21 January, 1878.

Approved.—J.S.F., 14/2/78.

No. 23.

Mr. Road-Superintendent Chauncy to The Commissioner for Roads.

MEMO.—Mr. Twynam's disinclination "to advise the sacrifice of private estate" appears to be his chief reason for declining to endorse my recommendation, but in the present case we have the consent of the proprietor freely given; and I would suggest that he must be the best judge as to how far his interests are affected by it. My own opinion is that it will be highly beneficial to him, and in this view I am supported by his brother, who stated that if the case were his own he would be glad to give his approval of it.

I have already stated my reasons for my opinion as to the economy to result from the adoption of the line proposed; and although I am free to admit that the traffic is small at present, it is nevertheless far more considerable than I had anticipated.

But when I compare the distance by this line with that by way of Hannan's, and consider the thousands of miles of needless travelling which will be saved to the public throughout all time, I cannot hesitate for a moment in pressing upon the Government the acceptance of Mr. Chisholm's offer.

W. S. CHAUNCY,

Road Superintendent, 2/8/77.

On the payment of £240 I am inclined to take Mr. Twynam's view; if the public want the road they will move further about it; until then I think it might remain in abeyance.—W.C.B., 3/8/77.

Mr. Chauncy, B.C.

I

I think it would be a good thing to have the line surveyed, even if no further action be taken at the present time. I have been requested by several of the inhabitants to recommend such a course as might best serve to secure for them the advantage of a direct line to the platform; but as I have communicated nothing to them as to the steps already taken, they are simply waiting to know what has been done.—W. S. CHAUNCY, 4/8/77.

As a question of survey only, this matter now comes under the Survey Department—its officers are the best judges in such questions.—W.C.B., 7/8/77. Under Secretary, for transmission. Under Secretary for Lands, B.C., 8/8/77.—J.R.

No. 24.

Mr. J. Macauley to The Secretary for Lands.

Sir,

Milbang, near Collector, 10 October, 1877.

I have the honor herewith to enclose petitions for leave to erect a *public gate, and for the opening of a branch line of road from the north side of the Wet Lagoon to the Breadalbane platform respectively.

Trusting they shall receive your favourable consideration,—

I have, &c.,
JOHN MACAULEY.

* I have not seen the papers in this case.—W. S. CHAUNCY, 28/11/77.

Petition from residents of Collector district to The Honorable the Secretary for Lands.

8 September, 1877.

THE petition of the inhabitants of Collector and the surrounding district humbly sheweth:—

That your petitioners are to a great extent debarred from the many advantages they might derive by forwarding their farm produce, &c., to market by rail from the Breadalbane platform, for want of a suitable road.

That whilst the distance from Collector to the platform is only nine miles, the only road available to your petitioners (viz., the Collector and Pomeroy Road as far as Hannon's public-house, and from there back to the platform) increases the distance to at least twelve miles, thereby adding six miles to the journey to and from the said platform.

That a branch line from the north end of the Wet Lagoon to the platform would obviate the difficulty your petitioners have now to contend with, and would cost but a small sum to put it in order for general traffic.

Your petitioners therefore humbly request that the said branch line may be opened for public use with the least possible delay.

And your petitioners, as in duty bound, will ever pray.

John J. Waddell,
Francis Poiderin,
Thomas Hincksman,
William Bode,

John Sheridan,
E. J. Reardon,
James Gale,
E. Kershaw,

And thirty-six others.

It is recommended that this petition be referred to the Commissioner and Engineer for Roads, as to whether he is now prepared to pay the cost of fencing to Mr. Chisholm, amounting to £240, in which case the road will be laid out and proclaimed. Upon the reports of Mr. D.-S. Twynam I cannot recommend the survey of the road unless the Works Department are willing to pay the cost of fencing, as being more economical than the formation of the road recommended by Mr. Twynam.—ROBT. D. FITZGERALD (for Sur. Genl.), 13 November, 1877.

I am very reluctant to recommend £240 to be given to a large landed proprietor for permission to open a road which will be a benefit to himself, and for the opening of which I can gather from the papers he is himself anxious. Neither is it clear that Mr. Chisholm will be content with this amount, but will want to close up the old road to the Main Southern Road near Hannon's, and in addition he requires a gate, which may involve a further demand for another line of fencing at no distant date, should the traffic on the road increase.

Messrs. Waddell, Reily, and Mr. Davies, M.P., have been to this office to press this matter. They represent that the alternative road proposed by Mr. Twynam has no water on it, and is very broken and intersected by gullies. As all roads must ultimately be metalled, will Mr. Chauncey state what the probable ultimate cost of each would be, taking the facilities for drainage into account, and also the cost of the second line of fence. If the result would be in favour of the line recommended by Mr. Chauncey I would advise its adoption.

Will Mr. Chauncey confer with Mr. Twynam on this, and let him see this minute and discuss all the bearings, as to what fencing, &c., Mr. Chisholm is entitled to by law, taking road by proclamation.

Mr. Chauncey, B.C.

W.C.B., 13/11/77.

I regret being unable to meet Mr. Twynam, but may I request that he will refer to the last clause in the minute of the Commissioner for Roads (herewith), and reply thereto by minute. I refer to the question as to the legal claim of Mr. Chisholm, in the event of the road being forced on for proclamation.—W. S. CHAUNCY, 26/11/77.

I believe that Mr. Chisholm would be entitled to compensation for fencing both sides of the road, inasmuch as the land for practical purposes, in respect of occupation, would be considered as an enclosure. On reference to my minute endorsed upon roads 77-2,084, the special circumstances of this case will be seen as to the question of fencing.—E. TWYNAM, D.-S., 26 Nov. Mr. Chauncey. Seen.—W.S.C., 26/11/77.

This matter has been fully dealt with by me in previous reports (papers Roads 77-1,586), and I have no further particulars to supply. Touching the inquiry by the Commissioner and Engineer as to the fencing required, under the administration of the Parish Roads Act, I have to state that the land severed being for all practical purposes an enclosure, probably the road would have to be fenced throughout, amounting to about 960 rods, which, at £80 per mile, would cost £240. I should point out that, under the strict application of the practice previous to recent enactment, this land would not be considered as an enclosure, inasmuch as it is intersected by a parish road which is not fenced, and as there are several reserved roads within such enclosure; but public gates have been authorized on the parish road, and the reserved roads were designed merely to afford access to portions now belonging to one and the same proprietor, Mr. James Chisholm.—E. TWYNAM, D.S., 26 November, 1877. Seen and submitted.—W. S. CHAUNCY, 26/11/77.

No. 25.

The President, Argyle and Georgiana Roads Association, to The Secretary for Lands.

Sir,

Goulburn, 8 November, 1877.

I have the honor, on behalf of the above Association, to request that you will be good enough to have prepared and transmitted to me a tracing showing the present road from the Breadalbane Platform to Collector; also the deviation therein suggested by the Survey Department, and that proposed by the local Roads Superintendent.

I have, &c.,

WILLIAM DAVIES,

President.

The papers in this case and all the tracings, showing the different routes suggested, are at present under reference to the Works Department; but in any case I cannot recommend that the tracings as here applied for be supplied to the Argyle and Georgiana Roads Association. If any line is determined upon and surveyed for proclamation, a copy of the plan will be for public exhibition at the nearest police office.

ROBT. D. FITZGERALD (for Surveyor General), 24 November, 1877.

No. 26.

The President, Argyle and Georgiana Roads Association, to The Secretary for Public Works.

Sir,

Goulburn, 8 November, 1877.

I have the honor, on behalf of the above Association, to request that you will be good enough to have prepared and transmitted to me a tracing showing the present road from Breadalbane Platform to Collector; also the deviation therein suggested by the Survey Department and that proposed by the local Roads Superintendent.

I have, &c.,

WILLIAM DAVIES,

President.

There can be no objection to Mr. Davies getting this information, which I attach; but I think it should be sent to him as the Member for Argyle, and not as President of this Association, which has no official or legal existence.—W.C.B., 1/12/77. Under Secretary, B.C. Approved.—J.R., 12/12/77.

No. 27.

Mr. Road-Superintendent Chauncy to The Commissioner for Roads.

1. It is to be noted that, though Mr. Chisholm was in the first instance desirous of promoting the deviation to Breadalbane Platform, it was only on condition that the road to Hannon's should be closed. When he came to understand that this road could not be closed under any condition his views were entirely altered, and it was with some difficulty I obtained his consent to accept the proposed compensation of £240 for fencing, as in full of all demands, should the same be offered him.

2. It is true he desires to have a public gate at each end of the road, and as these will be 3 miles apart I presume it would be granted in the usual course; but this cannot possibly give him a claim to the closing of the road to Hannon's, or to additional compensation for fencing. The gates, I presume, could only be granted in terms of the Act. All I should undertake therefore in this case would be, not to oppose the application for gates when submitted for my report.

3. It is to be observed further that the line as recommended by me is from 16 to 20 chains shorter than Mr. Twynam's line, which in itself is a great consideration. As desired by the Commissioner, I have furnished below an approximate estimate of the cost of completely macadamising each route; but I have not estimated anything additional for a double fence, as the sum of £240 proposed to be granted is calculated for the double fence on the entire deviation E D, which is 1½ mile in length, and therefore gives 3 miles of fencing, at £80. If Mr. Chisholm, to suit his own convenience, thinks proper to extend the fence as a single line, I do not think we have anything to do with that; as, after receiving the money, he will be at liberty doubtless to dispose of it at his pleasure.

4. In the present instance it may be desirable to allow Mr. Chisholm to put up the fence before the road is opened, and after this the survey could be made.

5. Estimate of cost by Mr. Twynam's line:—

420 lin. chains, clearing and draining, at 20/	£420
420 do. forming and metalling, at 200/	4,200
50 do. compensation for fencing, at 20/	50

Total £4,670

There will be also some cuttings required, which I cannot well estimate here.

6. Estimate of cost by Mr. Chisholm's deviation:—

Say 400 lin. chains, forming and metalling, at 200/	£4,000
120 do. clearing, at 10/	60
300 do. draining, at 10/	150
240 do. compensation for fencing, at 20/	240

Total £4,450

This does not take into account any metalling which may have been done on portion of road under charge of trustees, and which would go to reduce this estimate; but I think that I have already shown sufficient, especially if we take into consideration that by the line proposed by me 3½ miles of the distance are common to both roads, and therefore so much less to keep up.

W. S. CHAUNCY,

26/11/77.

Mr.

Mr. Chauncey has not complied with my request that he would confer with Mr. Twynam. I wish Mr. C. to go carefully through my minute and deal with every point in it.—W.C.B., 27/11/77.
 Mr. Chauncey, B.C. Please see memo. herewith.—W.S.C., 28/11/77.
 Get at Lands Mr. Twynam's paper, Roads 77-1,586; I wish to see it before deciding.—W.C.B., 29/11/77. Mr. Eames.

No. 28.

Mr. Road-Superintendent Chauncey to The Commissioner for Roads.

MEMO.—I regret to say I have been unable to confer with Mr. Twynam personally, but submitted to him the Commissioner's minute of 13th instant, as also my own of the 26th. In reply we have Mr. Twynam's minute of the 26th at back of the Petition, in which he deals with the question of gates and fencing, and refers to previous correspondence in regard thereto, which I have not yet seen. See No. 24

Mr. Twynam states generally that this matter has been fully dealt with in his previous reports, and that he has "no further particulars to supply."

From Mr. Twynam's minute it will be seen that he agrees with me in my estimate for the fencing, and is of opinion that if the deviation were carried out Mr. Chisholm would be legally entitled to the compensation I propose to award.

Will the Commissioner also be good enough to observe that in my minute of the 26th I have carefully referred to all the points referred to by him in his minute of the 13th instant, and (as I hope) in a way to meet his approval.

W. S. CHAUNCY,
 Road Superintendent, 28/11/77.

At an interview with Messrs. Davies, M.P., and Waddell it was pointed out that, in addition to payment for fencing Mr. Chisholm wanted gates; this, both gentlemen stated, could not be admitted; it was suggested that the difficulty might be met by altering position of station to cross road near Hannon's.

Will Mr. Chauncey give me his view of this change—would the probability of it alter Mr. Chisholm's views.—W.C.B., 31/11/78. Mr. Chauncey, B.C.

No. 29.

The Under Secretary for Lands to The President of the Argyle and Georgiana Roads Association.

Sir,

14 December, 1877.

With reference to your letter of the 8th ultimo, requesting on behalf of the Argyle and Georgiana Roads Association that a tracing showing the present road from Breadalbane Platform to Collector, also the deviation therein suggested by the Survey Department and that proposed by the local Road Superintendent, may be prepared and transmitted to you, I am directed to inform you that the papers in this case and all the tracings showing the different routes suggested are at present under reference to the Works Department; but that, in any case, the tracings as applied for by you cannot be supplied to the Association. If any line is determined upon and surveyed for proclamation, a copy of the plan will be for public exhibition at the nearest police office. See No. 25.

I have, &c.,
 W. W. STEPHEN,
 Under Secretary.

No. 30.

The Under Secretary for Public Works to William Davies, Esq., M.P.

Sir,

14 December, 1877.

Referring to your letter of 8th ultimo, making application for a tracing of the road from Collector to Breadalbane Platform, also showing the proposed deviations,—I am directed to transmit to you, as Member for the district, the tracing in question. See No. 26.

I have, &c.,
 JOHN RAE,
 Under Secretary.

No. 31.

The Argyle and Georgiana Roads Association to The Secretary for Lands.

Sir,

Goulburn, 24 December, 1877.

Referring to your letter of the 14th instant, No. 77/2,300, Roads, wherein you state, in reply to ours of the 8th November, that tracings of the roads present and proposed from Collector to the Breadalbane Platform are under reference to the Works Department, we have the honor to state:— See No. 29.

1. That the Association are anxious to have these tracings before any decision shall be arrived at, in order that from their local knowledge they may be enabled to make such recommendations to the Works and to your Department as possibly may influence the decision of the matter.

2. With reference to your statement that these tracings cannot in any case be supplied to the Association, we beg to remark that we have on previous occasions had no trouble in obtaining plans, tracings, and maps; and it affords us pleasure to say our representations have been treated with that consideration which, seeing that we are acting gratuitously for the public good, and without any personal objects of our own, it will be admitted they deserve. We are therefore anxious to know on what grounds it is now stated that the tracings cannot be supplied to the Association.

We have, &c.,
 WILLIAM DAVIES, President.
 WM. TEECE, JUN., Vice-President.
 H. J. PEARD, Secretary.

Mr.

Mr. Teece called on me and explained the matter. I think, under the circumstances, the tracings should be furnished.—J.S.F., 2/1/78.

It appears that the tracings asked for are only explanatory suggestions from the officers of the departments, and that the case has not yet reached the point at which objections from the public are invited by proclamation, at which stage the tracing sent to the police office will be open for inspection, and any objection from the Association will be considered.—J.S.F., 15/1/78.

No. 32.

The Under Secretary for Lands to The Argyle and Georgiana Roads Association.

Gentlemen,

24 January, 1878.

See No. 31.

Adverting to your letter of the 24th ultimo, with reference to your application, on behalf of the Argyle and Georgiana Roads Association, for tracings of the present and proposed roads from Collector to the Breadalbane Platform, I am directed by the Minister for Lands to inform you that it appears that the tracings asked for are only explanatory suggestions from the officers of the Survey and Works Departments, and that the case has not yet reached the point at which objections from the public are invited by proclamation, at which stage the tracings sent to the police office will be open for inspection, and any objection from the Association will then be considered.

I have, &c.,

W. W. STEPHEN,

Under Secretary.

No. 33.

Mr. Road-Superintendent Chauncy to The Commissioner for Roads.

MEMO.—When negotiating with the Hon. Mr. Chisholm regarding the opening of a new line of road through his land leading from Collector to the Breadalbane Platform, I distinctly informed him that the question as to the erection of gates must not be mixed up with matters affecting the proposed opening of the road, but must be considered solely upon its merits. I can see no very strong objection to the gates at present, as they will be three (3) miles apart, and the traffic is not likely to be very great for some time to come.

If the station were removed as proposed to the crossing-place of railway with existing road—Collector to Hannon's—it would remove the difficulty in a great measure; but the removal of the station would, I should think, involve an expense of £1,000 at least, while it would have the effect of removing it a mile away from the Main South Road, which I think would be objectionable, especially as being very inconvenient for the Parksburn people.

I have only to add that I promised Mr. Chisholm, if the matter regarding the erection of gates should be referred to me for report, I should be inclined to recommend the application for acceptance, and I am inclined to think that Mr. District-Surveyor Twynam would take the same view.

W. S. CHAUNCY,

Road Superintendent.

1/2/78.

On what grounds, when Mr. Chisholm is paid for fencing?—W.C.B., 1/2/78. Mr. Chauncy, B.C.

The case is somewhat peculiar, as one of these gates will be at least a mile away from the new line as shown (being common to Hannon's road and this), and the other opposite the railway station. As a further inducement, Mr. Chisholm offered to bring the new line to a point on south side of Wet Lagoon at or near the spot marked "A" on plan, which will shorten the distance to Collector considerably and enable us to use an old track passing over the best ground. It will also enable us to avoid a very bad piece of road along the shores of the Wet Lagoon. But to effect all this the money will only suffice to fence one side in place of two, and to this Mr. Chisholm is willing to consent if the gates be allowed.—W. S. CHAUNCY, 8/2/78.

I think it is much better to deal with this case without complicating it by any agreement with Mr. Chisholm. The proposal to fence one side and allow him gates, adopting the route suggested by him, A to D, seems to me unreasonable, and likely to lead to further complications by Mr. Chisholm ultimately fencing both sides, and thereby cutting the people off from water. I think it better that the people should wait until the road can be taken through by proclamation from E to D, and to pay Mr. Chisholm the amount he is entitled to for compensation. There will then be an end of the matter, and Mr. Chisholm will have to fence the road AEB with access to the lagoon at one point.—W.C.B., 9/2/78. Under Secretary, B.C.

Approved.—J.S., 11/2/78. Should now be sent to Lands, with a request that the road in question be proclaimed and opened.—W.C.B., 11/2/78. Under Secretary, B.C. Under Secretary for Lands, B.C., 14/2/78.—J.R. Forwarded to Mr. District-Surveyor Twynam, who is requested to have the road laid out as desired by the Works Department (*vide* decision of the Secretary for Works upon the other side). ROBT. D. FITZGERALD (for Surveyor General), 5 March, 1878. To Mr. Surveyor Schleicher, for survey on the first convenient opportunity.—E. TWYNAM, D.-S., 15 March, 1878.

No. 34.

Minute for Executive Council.

Department of Lands, Sydney, 27 February, 1878.

Confirmation of road.

It is recommended, for the approval of His Excellency the Governor and the Executive Council, that the undermentioned line of parish road, which has been duly advertised in the Government Gazette, be now confirmed, in accordance with the provisions of the 4th Wm. IV, No 11, viz. :—Road from a reserved road at the north-east corner of James Chisholm's 320 acres conditional purchase, to the Main Southern Road, within James Chisholm's 640 acres, being part of the road from Collector to the Southern Railway at the Breadalbane Platform, parish of Mutbilly, county of Argyle.

JAMES S. FARNELL.

THE

THE Executive Council advise that the line of road herein specified, the intended formation of which has been duly notified in the Gazette, be now confirmed in terms of the Act 4th Wm. IV, No. 11.—
ALEX. C. BUDGE, Clerk of the Council.

Min. 78-11, 11/3/78.—Confirmed, 18/3/78. Approved.—H.R., 11/3/78.

No. 35.

Government Gazette Notice.

Department of Lands, Sydney, 26 March, 1878.

Confirmation of a parish road.

NOTICE is hereby given, in conformity with the provisions of the Act 4 Will. IV, No. 11, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to confirm the road mentioned in the annexed Schedule (notwithstanding any objections that might have been urged); and it is hereby declared expedient to open and make the road referred to, according to the plans and books of reference to be seen at the police offices mentioned.

Any persons intending to claim compensation in respect of the said line are reminded that notice must be served on the Colonial Secretary within forty days from the date hereof, as are provided by the sixth section of the Act above referred to, or they will be forever foreclosed from such claim.

By His Excellency's Command,
JAMES S. FARNELL.

Schedule referred to.

Roads No.	Description of Road.	Date of Gazette of previous notice of intended opening of road.	Plan, &c., lodged at the Police Offices at
77-302; R. 1,300 ...	Road from a reserved road at the north-east corner of James Chisholm's 320 acres conditional purchase to the Main Southern Road, within James Chisholm's 640 acres, being part of the road from Collector to the Southern Railway at the Breadalbane Platform, parish of Mutbilly, county of Argyle.	22nd September, 1876; folio, 3,780.	Goulburn and Collector.

No. 36.

The Under Secretary for Lands to The Principal Under Secretary.

Sir,

Department of Lands, Sydney, 5 April, 1878.

In drawing your attention to the notice in the Government Gazette of the 26th ultimo, folio 1,259, respecting the confirmation of the line of road, viz., road from a reserved road at the north-east corner of James Chisholm's 320 acres conditional purchase to the Main Southern Road, within James Chisholm's 640 acres, being part of the road from Collector to the Southern Railway at the Breadalbane Platform, parish of Mutbilly, county of Argyle, I am directed to request that you will have the goodness, at the end of forty days from the date thereof, to state whether any claims to compensation have been made in respect of the said road, in pursuance of the notice alluded to. See No. 35.

I have, &c.,
W. W. STEPHEN,
Under Secretary.

No. 37.

The Under Secretary for Lands to The Hon. J. Chisholm, M.L.C.

Sir,

30 April, 1878.

With reference to your letter of the 18th October, 1876, objecting to the proposed road from a reserved road at the north-east corner of your 320 acres (conditional purchase) to the Main Southern Road within your 640 acres, being part of the road from Collector to the Southern Railway at the Breadalbane Platform, parish of Mutbilly, county of Argyle, I am directed to inform you that, as notified in the Government Gazette of the 26th ultimo, His Excellency the Governor and Executive Council have approved of the confirmation of this road, notwithstanding the objections raised thereto. See No. 17.

I have, &c.,
OSBORNE RICH,
(For the Under Secretary).

No. 38.

Mr. Surveyor Schleicher to The Surveyor General.

1. REFERRING to your instructions 78-148 of 5th March, 1878, and which were transferred to me for action, I now do myself the honor to transmit herewith plan and book of reference of the above-mentioned road, as surveyed by me in accordance with those instructions. See No. 33.

2. The course of the road now laid out was selected before survey by Mr. Twynam, in company with myself, and though it does not follow the present track, it embraces the most practicable and at the same time the soundest country for the road. As the road has been carefully chosen, very little expenditure will in my opinion be required to make it fit for traffic. The description of country passed over is generally undulating, with gravelly or stony soil, and it is not at all thickly timbered, and is suitable for pastoral purposes.

3. There are no enclosures or fences severed by the proposed road, with the exception of the fence on the Main Southern Road near the platform, and no other improvements of any kind are embraced by it.

4. I would beg to remark that it does not appear to me that this road need be considered as one severing enclosed lands, and as such liable to be fenced by the Government, for though the lands severed by it form part of a large area enclosed by Mr. Chisholm, he has included within it portions of Crown Land such as the Wet Lagoon, and at other places.

5. In my opinion, considering the limited amount of traffic which is ever likely to obtain on this road, it would be quite sufficient to permit Mr. Chisholm to erect public gates at the points where this road intersects his fences.

Goulburn, 8 May, 1878.

A. T. SCHLEICHER,
Acting D.-S.

[Enclosures to No. 38.]

Road from the Collector and Pomeroy Road, at the Wet Lagoon, within Jas. Chisholm's 1,200 acres to the Main Southern Road, near the Breadalbane platform, within Jas. Chisholm's 640 acres, parishes of Milbang and Mutbilly, county of Argyle.

In consequence of the above road passing through the conditional purchase referred to below, it is necessary that the question of refund of deposit to the present owner for the quantity of land taken for the road should be considered, and that the plan, general maps, catalogue, &c., should be altered as to area. No. 39.

The Principal Under Secretary to The Under Secretary for Lands.

Sir,

Colonial Secretary's Office, 8 May, 1878.

See No. 38.

In reply to your letter of 5th ultimo (No. 77/302, Rds.), I am directed by the Colonial Secretary to state, for the information of the Secretary for Lands, that no applications have been received in this office for compensation in respect to the line of road, viz., road from a reserved road at the north-east corner of James Chisholm's 320 acres conditional purchase to the Main Southern Road, within James Chisholm's 640 acres, being part of the road from Collector to the Southern Railway, at the Breadalbane Platform, parish of Mutbilly, county of Argyle.

I have, &c.,

H. HALLORAN.

The road R 1,589-1,603 having been proclaimed in lieu of this road, no further action is required to be taken upon these papers, and they should therefore be placed with the papers of R 1,589-1,603, 78-3,353 Rds.—R.D.F., 31/1/79.

No. 40.

Mr. Road-Superintendent Chauncy to The Commissioner for Roads.

Sir,

Goulburn, 21 May, 1878.

Inquiries are being made with reference to the opening of new line of road recently marked by Mr. Atchison, under direction of the Surveyor General, between the Wet Lagoon and Breadalbane Railway Station, on road from thence to Collector, and I am now anxious to know when you desire to have it opened. Mr. Twynam has given his opinion to the effect that Mr. Chisholm is legally entitled to claim compensation for the fencing of this road, so that it is of small consequence, in a financial point of

of view, whether the money be paid now or after issue of the proclamation. At any rate, if the money (£200) is paid *now*, Mr. Chisholm is willing to have the road opened *at once*, which will be a great boon to the public. The road, as marked, covers the same line as that recommended by me and approved by Mr. Chisholm.

I have, &c.,

W. S. CHAUNCY.

Re-submit with papers. I think this was dealt with in Messrs. Davies & Waddell's presence here.—W.C.B., 22/5/78.

No. 41.

Minute Paper—Department of Roads and Bridges.

THIS is a very vexed question, and one that can only be settled by the meeting of all the persons interested on the ground. I would suggest that the Acting District Surveyor and the Road Superintendent be requested to arrange with Mr. Chisholm, Mr. Davies, M.P., and Mr. Waddell, the representative of the applicants for the road, for a meeting on the ground, when the question might be settled. I think the proposal to pay £200 for fencing and still allow gates objectionable. Whatever rights the public obtain by the arrangement should be clear and without any doubt; but at the same time any useless road should, if possible, be allowed to revert to Mr. Chisholm, in consideration of the land now to be taken.

W.C.B., 27/6/78.

Surveyor General, returning papers. Forwarded to Mr. Acting District-Surveyor Schleicher, who is requested to carry out the suggestion of the Commissioner and Engineer for Roads.—ROBT. D. FITZGERALD (for Surveyor General), 6 August, 1878. Reported on by letter 78/151, of 14 December, 1878.—ADELBERT SCHLEICHER, A.D.-S.

No. 42.

Memo.—Commissioner for Roads to Mr. Wood.

THERE is a case now under reference to the district surveyor on papers; he was requested to meet Mr. Chauncy on the ground. This may have fallen through on account of Mr. Chauncy's death. Would Mr. Wood see to the matter, and report by return of post. Mr. Chisholm's compensation, Road Collector to Breadalbane Platform.

W.C.B., 21/11/78.

Mr. Wood, B.C. Have seen Mr. Acting D.-S. Schleicher, and arrangements will be made at once to meet Mr. Davies, M.P., and Messrs. Chisholm and Waddell on the ground.—A. P. Wood, 22/11/78. Commissioner for Roads, B.C. Inform Mr. Chisholm.—W.C.B., 23/11/78.

No. 43.

The Commissioner for Roads to The Hon. J. Chisholm, M.L.C.

Sir,

23 November, 1878.

Referring to personal representations made by you at this office respecting the deviation through your land from Collector to Breadalbane railway platform, I have to inform you that the Assistant Engineer for Roads at Goulburn has arranged with Acting District-Surveyor Schleicher to meet yourself, Wm. Davies, M.P., and — Waddell on the ground, and go into the question.

I have, &c.,

WILLIAM C. BENNETT,
Commissioner for Roads.

No. 44.

Telegram from Commissioner for Roads to Assistant Engineer for Roads or District Surveyor, Goulburn.

MR. JAMES CHISHOLM goes up by the morning train on Saturday, and would like to meet either, to arrange to meet at Breadalbane station on the next week.

W. C. BENNETT, 28/11/78.

No. 45.

Mr. Acting District-Surveyor Schleicher to The Commissioner for Roads.

Sir,

Goulburn, 28 November, 1878.

I have to acknowledge receipt of your telegram of to-day—Mr. Wood being out of town—and see No. 44. in reply thereto, beg to state that I have written to-night to the Hon. James Chisholm, in Sydney, informing him that we shall both be in attendance to meet him on Saturday afternoon at this office to arrange a meeting on the ground, *re* road Wet Lagoon to Breadalbane platform.

Mr. Wood will, I believe, have returned by that time.

The delay in arranging this matter has been partly owing to the death of the late road superintendent, and latterly to pressing business in the field requiring my absence from Goulburn for many weeks together. I had, however, taken steps to arrange a meeting during the early part of this week, but found that Mr. Chisholm was in Sydney.

I have, &c.,

ADELBERT SCHLEICHER,
Acting District Surveyor.

P.S.—Notice will also be sent to Messrs. W. Davies, M.P., and J. Waddell to attend the meeting on the ground, which will probably take place next week.

No. 46.

The Commissioner for Roads to Mr. Acting District-Surveyor Schleicher.

Sir,

29 November, 1878.

See No. 45.

I have to acknowledge receipt of your letter of yesterday in reply to my telegram respecting the deviation on road from Collector to Breadalbane railway station, and to thank you for your prompt attention in the matter.

I have, &c.,

WILLIAM C. BENNETT,
Commissioner for Roads.

No. 47.

The Hon. James Chisholm, M.L.C., to The Commissioner and Engineer for Roads.

Dear Sir,

Kippilaw, Goulburn, 10 December, 1878.

On Saturday last, the 8th instant, I went by appointment to inspect the road recommended by Mr. Schleicher, District Surveyor, and met at the Breadalbane Station Mr. Wood, Superintendent of Roads, Mr. Waddell, of Collector, and Mr. Surveyor Schleicher.

We rode along the line some distance, and Mr. Waddell agrees with me in condemning the road. It would cost a considerable sum of money to clear and open the road, and then it would not be so good a road as the one now used by the public, which branches off from the Collector Road, at the north end of Wet Lagoon, and which I have allowed the public to use for the last eighteen months on sufferance.

Mr. Waddell stated that the people of Collector and Lake George would never agree to the road recommended by the district surveyor being opened, and that every endeavour would be made to prevent it.

As I agreed with the late Mr. Chauncy, Superintendent of Roads, to give the road now used by the public on the terms recommended by Mr. Chauncy, and as this road will satisfy all the parties interested and prevent any further agitation on the subject, I would recommend that it be granted, and that the track now used, which in fact is a beaten road, be proclaimed, as about £20 would make it as good as the Collector Road, and it would take at least £150 to clear and make the road that has been marked by the district surveyor. I think that both Mr. Waddell and Mr. Wood will confirm my statement.

I have, &c.,

JAMES CHISHOLM.

I have been waiting for Mr Wood's report on this troublesome matter. Has it been received? If not, send this paper to Mr. Wood for immediate report.—W.C.B., 20/12/78. No report has been received by me.—J.G.L., 20/12/78. Mr. Wood, B.C., 20/12/78. Report forwarded.—A. P. Wood, 21/12/78. Commissioner for Roads, B.C. Resubmit with report.—W.C.B., 23/12/78.

No. 48.

Mr. Acting District-Surveyor Schleicher to The Surveyor General.

Sir,

1. I do myself the honor to inform you that, in obedience to your instructions as above (B.C., 78/517), a meeting on the ground was arranged to consider the question of the route to be finally adopted from Collector to the Breadalbane Railway platform, through Mr. James Chisholm's property. This meeting took place in due course, at which Mr. James Chisholm, Mr. J. J. Waddell, Mr. Wood, Assistant Engineer for Roads, and myself were present. Mr. Wm. Davies, M.P., was duly invited, and promised to attend, but did not appear.

2. As a preliminary to this meeting, Mr. Wood and myself took a previous opportunity of carefully inspecting the various lines of road as suggested at different times—including the road CD, originally recommended by Mr. District-Surveyor Twynam, with the view of being fully prepared at the meeting. I think I may state that Mr. Wood to a great extent holds Mr. Twynam's view that the line CD, viz., the old road, is thoroughly practicable and would meet all present and prospective requirements of traffic. There is no doubt however that this road could not be used in its present state, being very scrubby in places, and would probably require a preliminary expenditure in clearing, &c., to the cost of about £200.

3. When the question of this road was incidentally raised at the meeting, Mr. Waddell, on behalf of the Collector people and local residents generally, however, protested most strongly against this road; and in view of the great local opposition to be expected, I do not think it expedient that the matter of this route should again be opened up, though personally I believe that this road, with the expenditure above quoted, would suffice all present and more especially future requirements of traffic, in view of the great probability that the projected railway to Cooma will be constructed within the next few years, and that as far as it is possible to say at present this line will pass through and have a station at Collector, which will inevitably have the effect of reducing the traffic from Collector to Breadalbane Platform to a minimum.

4. As this line CD would however meet with the greatest opposition, I do not think it need be again referred to, especially as it has undoubtedly the drawback of passing for the most part along stony, gravelly ridges, which are greatly disliked by country people, whose animals are mostly unshod, and the present line the advantages of better country in this and other respects, and also that it is cleared and otherwise improved the whole way from Collector to the Wet Lagoon, thus requiring only 1½ mile more of improving, as against 5 miles on the CD line.

5. The only matters therefore to be settled at the meeting were,—the line of route to be adopted from the Wet Lagoon to the platform, and the questions of public gates on the road and compensation to Mr. Chisholm. With regard to the first, Mr. Waddell, on behalf of the Collector people, was in favour of the present track as used, and Mr. Chisholm also said that was the road he had arranged with the late Roads Superintendent, Mr. Chauncy, should be adopted; but after discussion Mr. Waddell and Mr. Chisholm both expressed themselves satisfied with the road surveyed (plan transmitted with my letter 78/32, of 8th May). This road runs to the westward of the present track, and was laid out by me under the personal direction of Mr. District-Surveyor Twynam. Mr. Chisholm agreed that it would suit the
subdivision

See plan.

subdivision of his property into paddocks better, and Mr. Wood, I believe, estimates that from a professional point of view there is nothing to choose between it and the present track. I would therefore recommend that proceedings be now commenced to formally open this road under the Parish Roads Act.

6. As to what roads could be alienated to Mr. Chisholm in lieu of the road now to be opened, I cannot recommend this course with regard to any of the roads at present reserved for traffic in the neighbourhood; certainly not the road from the Wet Lagoon towards Pomeroy nor any part of the CD line, which is reserved as a frontage road in the measurement of the adjacent lands.

7. Referring to the question of public gates on the portion of road now to be opened, Mr. Chisholm stated that it is a misconception that he requires any public gates in addition to those already granted to him on the road Collector to Pomeroy as shown on sketch (Mr. Chisholm assured us that these gates had been formally granted. I can, however, find no other evidence to prove this statement). One of these is on the line of road Collector to Breadalbane Platform; but as I have stated in previous reports, I do not think that traffic on this road is sufficient to make the existence of public gates thereon objectionable, and would in fact have no hesitation in recommending a gate on this road near the platform, if applied for.

8. With regard to the compensation to be given to Mr. Chisholm by the Works Department in respect of this road from the Wet Lagoon to the platform, Mr. Chisholm stated that if the road were adopted the agreement made in writing ought to be adhered to, and was unwilling to discuss this matter further. I would only remark that, though it is not probable that Mr. Chisholm, if paid this amount (ostensibly for fencing), will fence this road for some time to come, and probably looks upon the sum more as compensation for severance, &c., still there is no doubt but that the fencing of the road will be eventually carried out, and at the cost of the proprietor. Meanwhile, viewing the present traffic, I do not see any objection to the public gate at present maintained by Mr. Chisholm on the boundary of this enclosure, which moreover may be withdrawn at any time, should circumstances demand it, by the Government.

9. I might again state that the road can hardly be considered as passing through enclosed lands, as not only the Wet Lagoon but other Crown Lands (south of portions 95 and 175) are within the same enclosure, and a proclaimed and formally opened road, unfenced from Pomeroy to Collector, passes through it.

10. I may add that, in my opinion, even allowing that Mr. Chisholm may claim compensation to the extent arranged, it would be preferable to pay this money than to adopt the line CD, which would require an expenditure of nearly that amount before it could be used for traffic, and would not then meet the wishes of the inhabitants, who are greatly prejudiced against it. The present road has also the advantages of touching permanent water at the Wet Lagoon, and requiring very little further improvement.

11. Mr. Assistant-Engineer Wood proposes to send a report on this matter to his department.

I have, &c.,

Goulburn, 14th Dec., /78.

ADELBERT SCHLEICHER,
A.D.S.

Papers may be sent to the Commissioner for Main Roads.—R.D.F., 3/1/79.

This is a misapprehension of Mr. Wood's opinion. He states that were both roads metalled—and one must be ultimately—the surveyed line, or that in use, would be the best. After conference with the Deputy Surveyor General it was considered advisable that this road be proclaimed. I now request that the proclamation be proceeded with.—W.C.B., 8/1/79. The Surveyor General, B.C., 9/1/79.

No. 49.

Mr. Assistant Engineer-for-Roads Wood to The Commissioner for Roads.

Sir, Road Office, Goulburn, 20 December, 1878.

In conjunction with Mr. Acting D.-S. Schleicher I examined the rival routes from the Breadalbane platform to the Collector and Mutbilly Road near the Wet Lagoon on the 30th of last month, and on the following Saturday, the 7th instant, we met Messrs. Chisholm and Waddell there by appointment.

There are three lines to choose from,—

1st. The existing track now being used by the Collector people.

2nd. The new surveyed line proposed by Mr. Chauncy, and laid out by Mr. Schleicher under instructions from Mr. Twynam.

3rd. The old surveyed line known in the correspondence as the CD road.

The existing track is the route advocated by Mr. Waddell on the part of the Collector people, and is stated by Mr. Chisholm to be the line promised by him to Mr. Chauncy. It is about the same length as the new surveyed line, has the advantage of being consolidated by traffic, and the disadvantage of passing over a long flat which would require metalling to stand heavy traffic during the wet weather, but which could be made sufficiently sound for the description of traffic now on the road by draining. The natural grades are good, and no fault can be found with them.

The new surveyed line avoids the low-lying ground, has very easy grades, is sound, lightly timbered, and would, if consolidated by traffic, be a preferable line to the existing track.

The old surveyed road is that advocated by Mr. Twynam, and opposed by Mr. Chauncy. It is about $\frac{1}{4}$ of a mile longer than either of the other routes, being about 5 miles as against $4\frac{1}{4}$ by the new surveyed road, only $1\frac{1}{2}$ mile of which would be new, the balance being common to this and the Mutbilly road.

It passes for the greater portion of its length along a leading ridge, the formation of which is slate with occasional veins of quartz. In places it is rather rough, and would require the out-cropping rocks cleared away. The timber is rather thick, and would require clearing for the entire length of 5 miles. The gradients are not as good as those on either of the other lines, but there is nothing objectionable on this score, and for heavy traffic I am most decidedly of opinion that this would make a better natural road than either of the others.

This line would be very strongly opposed by the inhabitants of Collector.

I am therefore of opinion that, under the circumstances I have noted, and under the existing conditions in regard to traffic and the requirements of the Collector people, either the existing track or the new surveyed line should be adopted, which is, in my opinion, a question that might, as their merits are so evenly balanced, be left to the choice of the Collector people, and they, as represented by Mr. Waddell, would prefer that now in use.

The

The amount claimed by Mr. Chisholm for fencing is £240. If fencing is to be paid for by the department would it not be a better plan to pay for the actual fencing erected, the gross amount not to exceed £240 nor the price per rod 5s., which is the base of the claim made?

The question also crops up whether, according to the practice of the department, which is only to pay for fencing through enclosed lands, Mr. Chisholm can make any claim, as the so-called enclosure contains Crown Lands on the eastern side, and a large reserve (the Wet Lagoon) for watering purposes. It is also traversed by an unfenced public road.

Whether Mr. Chisholm has to be paid or not I am of opinion that, under the circumstances, the road should be opened from the platform to the Wet Lagoon.

ARTHUR P. WOOD,
Assistant Engineer.

Re-submit with papers.—W.C.B., 21/12/78. All papers relating to this are at Lands, with the exception of a communication from D.-S. Schleicher and one from Mr. Chisholm, both of which were sent to Mr. Wood on 20th inst.—J.G.L. Apply for papers.—W.C.B., 21/12/78. Papers obtained from Lands, and now submitted.—J.G.L., 3/1/79. Inform Mr. Chisholm this day that, after conference with the Deputy Surveyor General, it is considered advisable to proceed in the ordinary legal way with the proclamation of this road, and with that view the papers have been sent to the Surveyor General.—W.C.B., 8/1/79.

No. 50.

The Commissioner for Roads to The Hon. J. Chisholm, M.L.C.

Sir,

8 January, 1879.

Referring to previous correspondence on the subject of the deviation on road from Collector to Breadalbane Railway Platform, I have to inform you that, after conference with the Deputy Surveyor General, it is considered advisable to proceed in the ordinary legal way with the proclamation of the line at present in use from the Wet Lagoon to the platform, and with that view the papers in the case have been sent to the Surveyor General.

I have, &c.,
WILLIAM C. BENNETT,
Commissioner for Roads.

No. 51.

The Hon. J. Chisholm, M.L.C., to The Commissioner and Engineer for Roads.

Sir,

Kippilaw, Goulburn, 14 January, 1879.

See No. 50.

On my return home from Sydney I was favoured with your letter of the 8th instant, No. 78-999, informing me that, after conferring with the Deputy Surveyor General, it is considered advisable to proceed in the ordinary legal way with the proclamation of the line now in use from the Wet Lagoon to the Breadalbane Platform, &c.

I am glad this decision has been arrived at, as it will give satisfaction to the public, and is carrying out the recommendation of the late Mr. Chauncy, Superintendent of Roads, who agreed with the trustees of the Collector Road, that a saving of several hundred pounds would be effected if the present track were proclaimed in lieu of the one recommended by the district surveyor.

I trust, however, that Mr. Chauncy's recommendation will be carried out in its integrity, and that the amount he recommended I should receive for fencing in the road will be paid to me at the proper time.

Both Mr. Davies, the Member for Argyle, and Mr. Waddell, road trustee, told me that a distinct promise was made to them to pay the amount recommended by Mr. Chauncy, should the road in question be proclaimed.

I have, &c.,
JAMES CHISHOLM.

Acknowledge, and inform that there is no record of any promise, and that the legal procedure adopted is with a view to determine the amount in accordance with the terms of the Act.—W.C.B., 16/1/79.

No. 52.

The Commissioner and Engineer for Roads to The Hon. J. Chisholm, M.L.C.

Sir,

17 January, 1879.

See No. 51.

I have to acknowledge the receipt of your letter of the 14th instant, respecting the deviation near the Wet Lagoon on road from Collector to Breadalbane Platform, and stating that you hoped the recommendation of the late Mr. Chauncy as regards the amount to be paid to you for fencing would be carried out in its integrity. I have to inform you that there is no record in this office of any promise having been made, but the legal procedure adopted is with a view to determine the amount in accordance with the terms of the Act.

I have, &c.,
WILLIAM C. BENNETT,
Commissioner and Engineer for Roads.

Department of Mines, Sydney, 2 December, 1879.

Confirmation of a parish road.

NOTICE is hereby given, in conformity with the provisions of the Act 4th William IV, No. 11, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to confirm the road mentioned in the annexed Schedule (notwithstanding any objections that might have been urged), and it is hereby declared expedient to open and make the road referred to, according to the plans and books of reference, to be seen at the police offices mentioned.

Any persons intending to claim compensation in respect of the said line are reminded that notice must be served on the Colonial Secretary, within forty days from the date hereof, as is provided by the sixth section of the Act above referred to, or they will be for ever foreclosed from such claim.

By His Excellency's Command,
E. A. BAKER.

Schedule

Schedule referred to.

Roads No.	Description of Road.	Date of Gazette of previous notice of intended opening of road.	Plan, &c., lodged at the Police Office at
79-4,172	Road from the Collector and Pomeroy Road, at the Wet Lagoon, within J. Chisholm's 1,200 acres, to the Main Southern Road, near the Breadalbane Platform, within Jas. Chisholm's 640 acres, parishes of Milbang and Mutbilly, county of Argyle, in lieu of road within Jas. Chisholm's 640 acres, confirmed in Government Gazette of 26th March, 1878, folio 1,239.	21st February, 1879; folio 832.	Goulburn and Collector.

No. 63.

The Under Secretary for Mines to The Principal Under Secretary.

Sir,

Department of Mines, Sydney, 4 December, 1879.

In drawing your attention to the notice in the Government Gazette of the 2nd instant, folio 5,318, respecting the confirmation of the line of road, viz., from the Collector and Pomeroy Road at the Wet Lagoon, within J. Chisholm's 1,200 acres, to the Main Southern Road near the Breadalbane Platform, within J. Chisholm's 640 acres, parishes of Milbang and Mutbilly, county of Argyle, in lieu of road within J. Chisholm's 640 acres, confirmed in Government Gazette 26 March, 1878, folio 1,239, I am directed to request that you will have the goodness, at the end of forty days from the date thereof, to state whether any claims to compensation have been made in respect of the said road, in pursuance of the notice alluded to.

I have, &c.,

HARRIE WOOD,
Under Secretary.

No. 64.

The Hon. J. Chisholm, M.L.C., to The Principal Under Secretary.

Sir,

Kippilaw, Goulburn, 9 December, 1879.

In the Government Gazette of the 2nd instant it has been notified that a road has been opened through my enclosed land to the Breadalbane platform on the Great Southern line, in lieu of a road confirmed in the Government Gazette of 26th March, 1878, now cancelled.

When it was first contemplated by the Government to proclaim a road through my land from the north end of the Wet Lagoon to the platform, I protested against, it as the people of Collector and Lake George who petitioned for the road had access to the platform and the Main Southern Road by a proclaimed road through the same enclosure. After a good deal of correspondence on the subject, and several interviews with the late Superintendent of Roads, Mr. Chauncy, who reported against the road that has been cancelled, and in favour of the road that is now proclaimed in the Gazette, I withdrew my objection to the two roads being granted, as Mr. Chauncy informed me he had recommended that I should receive the usual allowance for fencing in the road from where it branches off from the Wet Lagoon to the platform, which he estimated would be about £240.

I have now, therefore, the honor to apply for the amount estimated by Mr. Chauncy for fencing in the road, and

Have, &c.,

JAMES CHISHOLM.

No. 65.

The Principal Under Secretary to The Under Secretary for Mines.

Sir,

Sydney, 14 January, 1880.

In reply to your letter of the 4th ultimo (No. 79/4,172), I am directed by the Colonial Secretary to state, for the information of the Secretary for Mines, that an application has been received in this office for compensation in respect to the line of road, viz., from the Collector and Pomeroy Road at the Wet Lagoon, within J. Chisholm's 1,200 acres, to the Main Southern Road, near the Breadalbane platform, within J. Chisholm's 640 acres, parishes of Milbang and Mutbilly, county of Argyle, from Mr. J. Chisholm, which is forwarded herewith.

I have, &c.,

CRITCHETT WALKER.

The Surveyor General, B.C., 16/1/80.—G.E.H. (p. U.S.)

This is a case in which it was understood the compensation and cost of fencing (if any) was by agreement to be met by the Works Department; it is therefore recommended that the enclosed claim from Mr. Chisholm be referred to the Commissioner and Engineer for Roads. It may be added that, under the practice of this department, Mr. Chisholm would not be entitled to any cost of fencing; his claim therefore depends upon how far it was recognized by the Works Department, *vide* decision of Secretary for Works on 78/382. Rds., enclosed.—ROBT. D. FITZGERALD (for Surveyor General), 31 January, 1880.

Submitted.—H.W., 4/2/80. Approved.—E.A.B., 4/2/80. The Under Secretary for Public Works, B.C., 4 Feb., 1880. Roads, B.C.—H.H., 5 Feb., 1880.

Compensation is only made by this department when a concession is made by the landowner to allow immediate opening of road and save delays in proclaiming. No concession was made in this case, so I cannot recommend any compensation for land or fencing. The point raised by Mr. Chisholm in paper herewith, that he subsequent to the initiation of this matter secured all the land within the enclosure cannot, I should think, affect the decision, which deals with the case as it stood when first steps for opening road were taken.—W.C.B., 5/2/80.

Under Secretary, B.C. Inform to effect of minute of Commissioner for Roads.—J.L., 19/2/80. Commissioner for Roads, B.C., 23/2/80.—H.H. File.—W.C.B., 23/2/80.

No. 66.

The Principal Under Secretary to The Hon. J. Chisholm, M.L.C.

Sir,

Colonial Secretary's Office, Sydney, 14 January, 1880.

See No. 64

I am directed by the Colonial Secretary to acknowledge the receipt of your letter of the 9th ultimo, applying for compensation on account of a road passing through your land, and to inform you that your communication has been brought under the notice of the Secretary for Mines.

I have, &c.,

CRITCHETT WALKER.

No. 67.

Office Memo. by Commissioner for Roads.

MR. Chisholm has applied to know what about the compensation for road, Wet Lagoon, now proclaimed, Breadalbane Platform to Collector Road. Inquire at Lands, and advise Mr. Chisholm this day, Australian Club. W.C.B., 19/1/80.

No. 68.

The Commissioner and Engineer for Roads to The Hon. J. Chisholm, M.L.C.

Sir,

22 January, 1880.

Referring to personal inquiries made by you at this office respecting compensation claimed for land taken near the Wet Lagoon, leading from Collector and Pomeroy Road to Breadalbane Platform, I have the honor to transmit herewith copy of minute received from Deputy-Surveyor General, having reference to the payment in question.

I have, &c.,

WILLIAM C. BENNETT,

Com. and Engineer for Roads.

No. 69.

Memo.—Deputy Surveyor General.

THE Deputy Surveyor General has seen the Commissioner and Engineer for Roads with reference to this case, and they are of opinion that the road should be confirmed, and that if a claim for compensation be made by Mr. Chisholm, that it be referred to the Works Department. Mr. Chisholm would not legally be entitled to compensation, as his deeds of grant contain the usual reservation of way or ways, and he is not, according to the practice of this department, entitled to cost of fencing, as his enclosure embraces Crown Lands, &c.

No. 70.

The Hon. J. Chisholm, M.L.C., to The Commissioner for Roads.

Sir,

Kippilaw, Goulburn, 26 January, 1880.

See No. 68

See No. 69

I have the honor to acknowledge the receipt of your letter of the 22nd instant, enclosing a minute of the Surveyor General, in which he states that as there is no Crown Land in my paddock at Breadalbane, through which a road has recently been proclaimed, I am not entitled according to the practice of the department to compensation for fencing in the road.

I am aware that about two years back there were Crown Lands in my paddock, but I have selected these lands as additional selections under the provisions of the Land Act, which does away with the Surveyor General's objection.

I also wish to point out that, when the road from Collector to the Main Southern Road was proclaimed through the same enclosure, I was not allowed compensation for fencing in the road, although it runs for 3 miles through the same enclosure.

On all former occasions, whenever a road was proclaimed through my purchased land, I have been allowed payment for fencing it in. I therefore respectfully request that my case may be reconsidered, and that the usual allowance may be granted for fencing in the road.

I have, &c.,

JAMES CHISHOLM.

Acknowledge receipt, and inform Mr. Chisholm that the whole question is one to be dealt with by the Survey Department, to which office his letter has been forwarded.—W.C.B., 28/1/80. Forward letter to S.G.O. Under Secretary, B.C., 28/1/80.—G.C.E., for Commissioner. The Under Secretary for Mines, B.C., 30 Jan., 1880.—H.H. The Surveyor General, B.C., 30/1/80.—G.E.H., p. U.S.

A report upon this matter has recently been made by me (on 80-157 Rds.) to the effect that this claim is one which should be dealt with by the Works Department.—ROBT. D. FITZGERALD (for Surveyor General), 3rd Feby., 1880.

No. 71.

The Commissioner and Engineer for Roads to The Hon. J. Chisholm, M.L.C.

Sir,

28 January, 1880.

See No. 70.

I have to acknowledge receipt of your letter of the 26th instant, respecting compensation for fencing a road through your paddock at Breadalbane, and to inform you that the whole question is one to be dealt with by the Survey Department, to which office your letter has been forwarded.

I have, &c.,

WILLIAM C. BENNETT,

Commissioner and Engineer for Roads.

No. 72.

27

No. 72.

The Acting Under Secretary for Public Works to The Hon. J. Chisholm, M.L.C.

Sir,

23 February, 1880.

Referring to your letter of the 15th* December last, addressed to the Department of the Colonial Secretary, requesting compensation in respect to road from the Collector and Pomeroy Road to the Main Southern Road near the Breadalbane platform, I am directed by the Secretary for Public Works to forward herewith for your information copy of a report which has been received from the Commissioner for Roads on the subject.

I have, &c.,

GERALD HALLIGAN,
Acting U.S.

No. 73.

The Hon. J. Chisholm, M.L.C., to The Secretary for Public Works.

Sir,

Hippilaw, Goulburn, 27 February, 1880.

I have the honor to acknowledge the receipt of your letter of the 23rd instant, No. 807-601, enclosing a minute from the Commissioner of Roads, in which he states, "That compensation is only made by this department when a concession is made by the landowner to allow of immediate opening of road, and save delay in proclaiming; no concession was made in this case, so I cannot recommend compensation for land or fence."

The Commissioner has evidently confounded my objection to another road with the road now proclaimed. The road I objected to and protested against was marked before the recently proclaimed road, and was reported against by the late Mr. Chauncey, Superintendent of Roads, and Mr. Waddell, Trustee of the Collector Road. Subsequently I was officially invited to meet the present Superintendent of Roads, Mr. Wood, the District Surveyor, and Mr. Waddell, which I did, and examined both roads, when the first marked road was condemned and the road recently proclaimed approved of. It was not my fault that the recently proclaimed road was not proclaimed eighteen months ago, for I always approved of it, and allowed the public to use it for more than two years before it was proclaimed, and it was as beaten a road when proclaimed as the main road to Collector.

The reason the road was not proclaimed sooner was owing to the road I protested against being proclaimed first. This road had to be, and was, cancelled before the other road could be proclaimed, for it was impassable and was never used, and Mr. Waddell estimated that it would cost £1,500 to make it passable for teams.

In contradiction to what the Commissioner of Roads has stated with respect to the practice of granting compensation for fencing in roads proclaimed through private property, I may state that when the Hon. J. B. Wilson was Minister for Lands he authorized a road to be surveyed and marked through my land at Breadalbane, which I protested against on the ground that the petitioners who asked for the road had already access to Goulburn by another parish road, which they were using, and that two roads were not required.

After some considerable delay my objections were overruled and the road proclaimed, but I received full compensation for fencing it in.

Although the road from the Breadalbane platform was not proclaimed when it might have been, the public sustained no inconvenience from it; and I submit that I am entitled to the compensation usually allowed for fencing in roads proclaimed through private property.

I have, &c.,

JAMES CHISHOLM.

NOTE.—I respectfully request that this letter be sent to the head of the department, for his consideration.—J.C.

Roads, in reference to previous papers on this subject. B.C., 1 March, 1880.—H.H. Re-submit with papers.—W.C.B., 1/3/80. Papers herewith.—5/3/80.

Mr. Chisholm misapprehends the purport of my minute. I point out that compensation is not made by this department unless to obtain a special concession and access to the land for the public before proclamation; this was not done, though the public may have used the road, consequently it is for the Surveyor General's Department to determine whether the case comes within the limits laid down by the department for granting compensation. The Deputy Surveyor General states that Mr. Chisholm should be referred to them.—W.C.B., 9/3/80.

I presume it is now too late to refer to the Survey Office, as the papers have been ordered by Parliament to be laid on Table of the House. Mr. Bennett; for returns. B.C., 15/3/80.—H.H. Mr. Eames.—W.C.B., 15/3/80.

No. 74.

The Hon. J. Chisholm, M.L.C., to The Secretary for Public Works.

Sir,

1, Bridge-street Chambers, Sydney, 5 March, 1880.

In reference to my letter of the 27th ultimo, in reply to yours of the 23rd (No. 807), on the subject of my claim for compensation for fencing of the public road from the Collector and Pomeroy Road to the Main Southern Road, near the Breadalbane platform, I would wish to invite attention to the statement of the Vice-President of the Executive Council during the recent debate on the Land Bill, which is contained in the annexed extract, as absolutely supporting my claim; and I would also urge that, in fencing the whole of the paddock, the greater part of which was then, and the whole of which is now, my property, I did fence my property (the greater containing the less), and that any objection to the contrary will, I submit, want logical or sufficient force.

I trust that the money to which I claim to be entitled may not be longer withheld.

I have, &c.,

JAMES CHISHOLM,
(By HENRY HALLOMAN.)

Sir

Sir John Robertson said that the Government could not be compelled to fence the parish roads. Government had not been in the habit of fencing them under his administration ; years ago it was resolved that where the Government went through land that was fenced, they then fenced both sides of the road, and asked Parliament to meet the expense ; but when the land was not fenced, the Government in making the road did not fence it. That course had been followed by succeeding administrations.

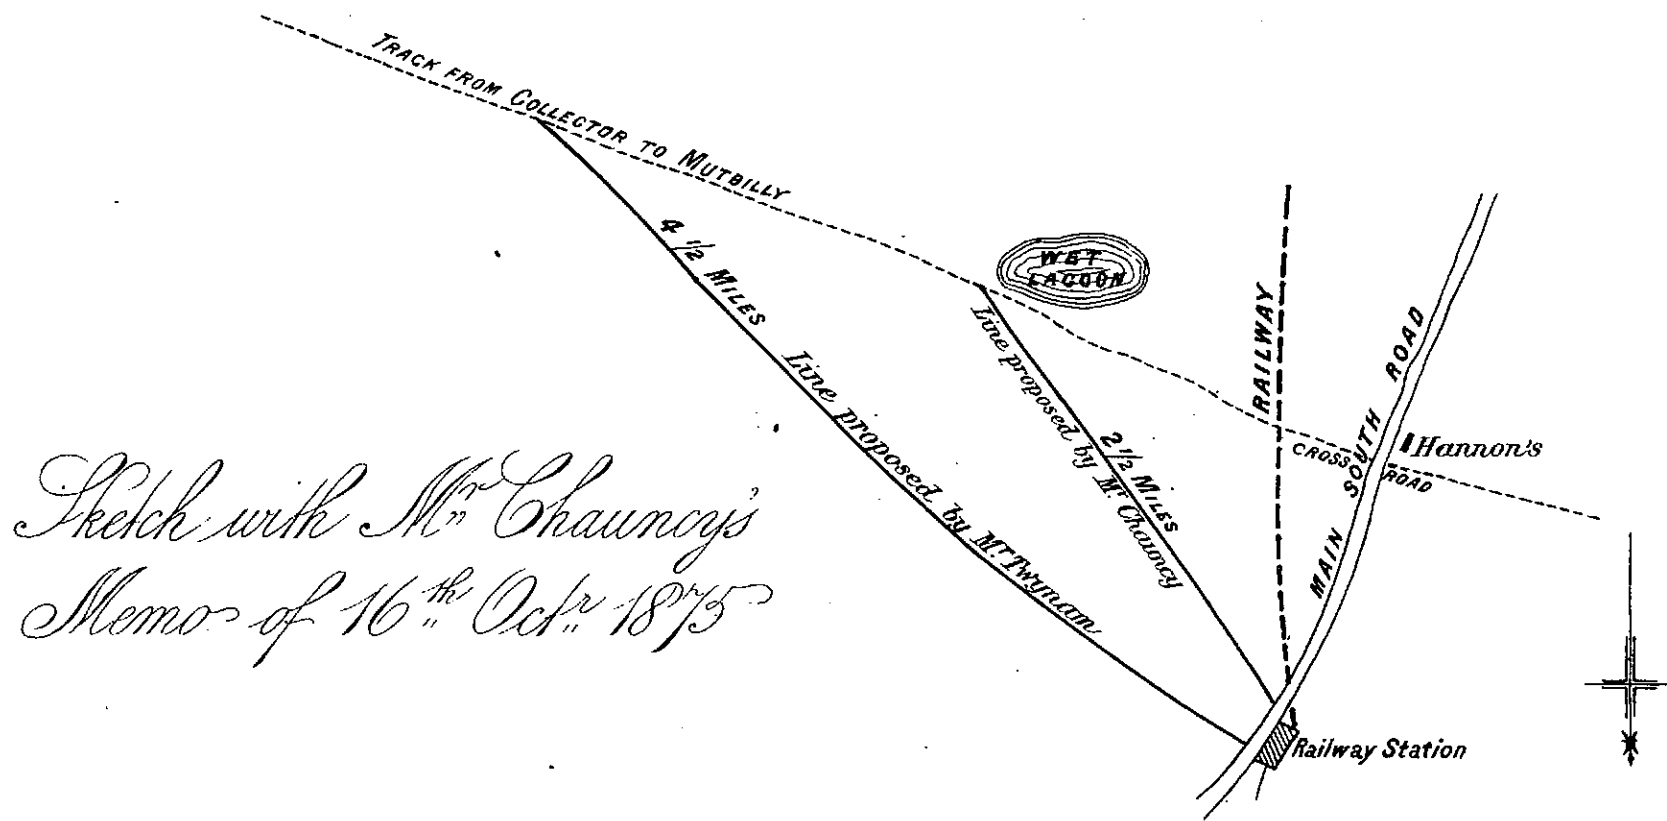

Roads, in reference to previous correspondence, B.C., 5 March, 1880.—H.H. Papers,—W.C.B., 6/3/80. Roads.—8/3/80.

My dear Fitzgerald,—I have brought down Wood, in *re* Chisholm's Breadalbane road case, and would like to have a final interview with you on the matter. Will you be disengaged at 12? We will go down, bringing the papers we have, as we want to refer to documents in your office.—Yours truly, W. C. BENNETT.

See minute herewith.—9/3/80, W.C.B.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

WATER SUPPLY AND SEWERAGE FOR SYDNEY AND SUBURBS.

(MESSAGE No. 20.)

Ordered by the Legislative Assembly to be printed, 25 February, 1880.

AUGUSTUS LOFTUS,
Governor.

Message No. 20.

In accordance with the 54th section of the Constitution Act, the Governor recommends for the consideration of the Legislative Assembly the expediency of making provision to meet the requisite expenses in connection with a Bill to provide for the Water Supply and Sewerage of the City of Sydney and its Suburbs.

Government House,

Sydney, 25 February, 1880.

1879-80.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

WATER SUPPLY AND SEWERAGE FOR TOWNS.

(MESSAGE No. 21.)

Ordered by the Legislative Assembly to be printed, 25 February, 1880.

AUGUSTUS LOFTUS,
Governor.

Message No. 21.

In accordance with the 54th section of the Constitution Act, the Governor recommends for the consideration of the Legislative Assembly the expediency of making provision to meet the requisite expenses in connection with a Bill to establish a system of Water Supply and Sewerage for certain Towns.

*Government House,
Sydney, 25 February, 1880.*

1879-80.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

WATER SUPPLY, DENILIQVIN.

(PETITION FROM THE MAYOR AND ALDERMEN OF THE MUNICIPAL COUNCIL OF DENILIQVIN.)

Received by the Legislative Assembly, 11 May, 1880.

To the Honorable the Speaker and Members of the Legislative Assembly of the Colony of New South Wales, in Parliament assembled.

The Petition of the Municipal Council of Deniliquin, in the Colony of New South Wales,—

RESPECTFULLY SHOWETH:—

That the Town of Deniliquin contains a population of upwards of 3,000 souls, or thereabouts.

2. That no suitable provision whatever has as yet been made for supplying the residents with water, and as a consequence their health and the prosperity of the town is seriously affected.

3. That the wells sunk in the town for the most part produce salt or brackish water unfit for domestic purposes, and the residents are compelled to buy water for household use at an average cost of 2/6 per cask.

4. That the Town of Deniliquin is one of rapidly increasing importance, and the want of an adequate water supply is becoming daily more severely felt.

5. That in order to show the importance of the town, your Petitioners would respectfully remind your Honorable House that it is the chief centre of population in the Electoral District of The Murray, and that during the last five years no less an area than one million two hundred and sixty-four thousand acres of land have been sold by the Government through the local lands office either by auction or conditional purchase, besides large areas alienated under the 2nd and 31st sections of "The Lands Act Amendment Act of 1875."

6. That the amount of money derived from the sale of such land during the period mentioned, with rents on leases, interest on conditional purchases, &c., is upwards of one million two hundred and twenty-five thousand pounds (£1,225,000), as a reference to the Lands Office returns will show, and in addition to this a very large and increasing annual revenue is derived by the Government from other sources.

7. That a very small sum is expended annually on public works in the district—an amount out of all proportion to the revenue derived.

8. That some 12 months ago Mr. J. W. James (civil engineer) was employed by the Government to advise upon the best means of supplying the town with water and the disposal of sewage, and a very exhaustive report from actual survey was sent in, which the estimate for the work is set down at a cost (in rough figures), of £26,000.

9. That since the report was furnished nothing has been done in furtherance of the matter, and the inhabitants continue to be severely taxed in being compelled to supply themselves with this necessary of life in the primitive and costly manner mentioned, the revenue of the Municipal Council being barely sufficient to carry on the necessary public works in the town, and quite inadequate to provide any proper means of supply.

10. Your Petitioners would also respectfully point out that, owing to the small annual rainfall and the severe heat experienced during the greater part of the year, a very abundant supply of pure water to the town is an absolute sanitary necessity; and your Petitioners, being fully alive to the importance and urgency of the matter, desire to approach your Honorable House with this Petition in the confident hope that the great want will be met without delay.

Your Petitioners therefore on behalf of the residents of the Town of Deniliquin pray that the matter will receive your favourable consideration, and that immediate steps will be taken to have the works recommended by Mr. James carried out, or such like measures effected for water supply and drainage of the town as to your Honorable House may seem meet.

And your Petitioners will ever pray, &c.

[Here follow 6 signatures.]

1879.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

SEWAGE OF SYDNEY AND SUBURBS.
(PARTICULARS OF.)

Ordered by the Legislative Assembly to be printed, 18 November, 1879.

7. MR. LUCAS *to ask* THE SECRETARY FOR PUBLIC WORKS,—

- (1.) At what height above high-water is the city sewage to be discharged into the sea near Ben Buckley's Point?
- (2.) At what height above high-water will proposed sewers drain each of the following places, viz.:—Glebe, Parramatta-street, Prince, Gloucester, Cumberland, York, George, Pitt, Castlereagh, Elizabeth, Phillip, and Macquarie Streets; also Hyde Park, Woolloomooloo, and Darlinghurst?
- (3.) What will be the length of the proposed sewers from the outlet to the places abovementioned?
- (4.) Is it intended that the whole of the silt and other matter collected by the new sewers shall be discharged at the outlet, or will silt-pits be constructed to catch the most solid and heavy matter; if the latter, how many are to be constructed, and in what localities?
- (5.) How is it proposed to deal with the sewage of the city and suburbs below the action of the proposed new sewers?

- (1.) The Sewage Board proposed 10 feet—Mr. Clark reduced this to 8 feet.
- (2.) The heights proposed on sections of Sewage and Health Board are shown in Return now laid on Table. Working surveys are in progress to determine in detail the exact heights. Every effort will be made to connect at as low a level as possible.
- (3.) The distances from Sewage Board sections are also shown in Return laid on Table.
- (4.) A great portion of the silt will be intercepted by the present silt-pits; in storms some of it will run into the harbour—the remainder will be discharged by the intercepting sewers. More silt-pits will be provided if required, but it is at present impossible to state where they will be constructed.
- (5.) The 55 and 56 paragraphs of the Final Report of Sewage and Health Board deals with this question. All portions of the city below the 25-feet contour will be allowed to discharge into the harbour, and if ever it is necessary can be pumped; but as the low-lying portion is chiefly used for purposes of trade stores and wharves, except at Woolloomooloo Bay and southern parts of Darling Harbour, the sewage will be insignificant and inoffensive, but if it does become necessary its discharge is provided for in intercepting sewer.

The Southern Division of the City.

- (1.) Is it intended to take the sewage from above 1,000 acres of the southern portion of the city to the head of Shea's Creek for filtration?
 - (2.) Is it intended to purchase 100 acres of the Waterloo Estate, into which the more solid portion of sewage is to be dug, when the effluent water has passed into Shea's Creek?
 - (3.) What will be the approximate quantity of solid matter, also the quantity of fluids, which it is expected will be run on to the proposed receptacle of the sewage of the southern portion of the city?
- (1.) It is intended to take the sewage for the present to head of Shea's Creek, for reasons stated in 15th paragraph, Second Report, Sewage and Health Board.
 - (2.) Yes, as a temporary measure pending extension to land at Webb's Grant, and ultimate extension seaward as the requirements of the district demand.
 - (3.) It is impossible to state approximate quality of solid matter, which will vary with weather and local circumstances, but the area proposed to be taken has been found far more than sufficient to purify such amount of sewage in England.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

DEODORIZATION OF SEWAGE MATTER.
(CORRESPONDENCE.)

Ordered by the Legislative Assembly to be printed, 22 June, 1880.

RETURN to an Order made by the Honorable the Legislative Assembly of New South Wales, dated 11th June, 1880, That there be laid upon the Table of this House :—

“Copies of all papers, documents, and reports of any Board or Boards
“relative to the deodorization of human excreta and other offensive matter
“which have been submitted for the consideration of the Government by
“any person or persons whatever.”

(Mr. Farnell.)

SCHEDULE.

NO.		PAGE.
1.	Mr. J. L. Nicholls to the Colonial Secretary. 11 February, 1880	2
2.	The Principal Under Secretary to Professor Smith, Professor Liversidge, and Mr. Charles Watt. 19 March, 1880	2
3.	Professor Smith, Professor Liversidge, and Mr. Charles Watt to the Principal Under Secretary, with enclosures and minutes thereon. 8 May, 1880.....	2
4.	The Principal Under Secretary to Mr. Nicholls. 15 May, 1880	4

DEODORIZATION OF SEWAGE MATTER.

No. 1.

Mr. J. L. Nicholls to The Colonial Secretary.

Sir,

Sydney, 11 February, 1880.

I beg leave to bring under your notice the discovery of a most effective deodorizer of night-soil and other offensive matter.

This deodorizing agent is obtainable in superabundant quantities in the Colony, and can be applied with great economy in regard to labour and cost.

Its faculty, whilst effectually removing the offensive odour, is to fix all the volatile salts in the soil, and to preserve all its qualities as the most valuable of manures.

The discoverer of this invaluable agent (who acts with me in conjoined interests) is desirous of submitting the discovery to the consideration of your Government, and is willing to comply with any request made for its examination, or for testing the same by competent authority which the Government may require for their satisfaction, having also due regard to the protection of the discoverer's rights and interests therein.

I have, &c.,

JAMES LANDER NICHOLLS.

No. 2.

The Principal Under Secretary to Professor Smith, Professor Liversidge, and Mr. Charles Watt.

Gentlemen,

Colonial Secretary's Office, Sydney, 19 March, 1880.

I am directed by the Colonial Secretary to request that you will have the goodness to jointly examine the samples herewith forwarded to you, and furnish him with a report as to the properties of the product in question and the practical uses of the process by which it is produced, and its application to the question of sewerage.

I have, &c.,

CRITCHETT WALKER.

Under separate cover, addressed to Professor Liversidge.

No. 3.

Professor Smith, Professor Liversidge, and Mr. Charles Watt to The Principal Under Secretary.

Sir,

Sydney, 8 May, 1880.

We have the honor to forward herewith the results of the analyses of the three samples submitted to us for examination, in accordance with your letter of March 19th.

1. All three samples were inodorous, dry, and portable. Estimating by the current market value of the constituents useful for manurial purposes, Nos. 1 and 3 are worth about 35s. per ton and No. 2 about 38s. per ton.

2. But we have to point out that the above values, calculated upon the percentages of the useful constituents present, *i.e.*, the ammonia, phosphoric acid, potash, and organic matter, must be considerably reduced on account of the large proportion of useless matter through which the useful constituents are diffused. In order to arrive at the fair market value of these "pondrettes" we have consulted Messrs. Elliott Brothers., who have large experience in the manufacture and sale of artificial manures, and they have kindly furnished us with the following memorandum:—"We are of opinion that manures containing these proportions (*vide* analyses) would only be saleable in very limited quantities, as they would not bear any expense of transport. We doubt whether, even in small quantities, 30s. per ton could be obtained for them."

3. The commercial aspect of the question is further illustrated by the following extract from a report by the Town Clerk of Melbourne to the Central Board of Health there, on the subject of the disposal of cesspit matter:—"The fact of the manure giving a return equal only to less than one-third of the expenses of its collection and disposal proves the fallacy of the notion that a profit could be realized by its sale. If it could be stored and treated by one of the patent processes, or kiln-dried, and by admixture with street sweepings, as at Rochdale in England, made comparatively inodorous and tolerably portable, it might to some extent be purchased for back cartage from market in market gardeners' carts, which now carry stable manure; but in that case the cost of manipulation would be added to that collection, and as the stuff must be got rid of, and not allowed to accumulate at the depôt, the sales would always be forced, and the price be consequently kept down."

4. In order to obtain accurate information from the manufacturer of the samples we had an interview with Mr. Nicholls upon the subject, and further requested him to supply us with details upon certain matters. In reply we received a letter from him, which we append, from which it appears that Mr. Nicholls has treated cesspit matter only, and that he has not yet applied his process to the liquid sewage matter, and we are of opinion that the large quantity of water present in such sewage matter, and the additional expense which its removal would entail, must necessarily raise the cost of treating it much greater than the 6s. to 8s. per ton quoted by Mr. Nicholls.

5. We are not in a position to give an opinion, as requested by you, as to the "practical uses of the process" by which the samples have been produced, since the manufacturer declines to make the details of the process known to us at present.

We have, &c.,

J. SMITH.

A. LIVERSIDGE.

CHAS. WATT.

Minutes

Minutes by the Colonial Secretary.

Submitted, 12/5/80. Inform Mr. Nicholls that this report is not of a character to justify the Government in entertaining his proposal.—H.P., 14/5/80. Mr. Nicholls can read the report.—H.P. Mr. Nicholls has seen this report.—C.W., 15/5/80.

[Enclosure No. 1.]

CESSPIT MATTER. SAMPLE No. 1. A dark brown coloured powder; dry and inodorous.

Moisture driven off at 100° C.....	6.55
Woody fibre.....	15.00
Organic matter (by loss on ignition)	24.21
Sand	40.80
Inorganic substances soluble in hydrochloric acid	9.34
" " insoluble " consisting chiefly of clay, traces of sulphate of lime, &c.	4.10
	100.00

COMPLETE ANALYSIS.

Moisture driven off at 100° C.....	6.55
Sand	40.80
Woody fibre.....	15.00
Carbon in addition to that in the woody fibre	15.79
Nitrogen other than as ammonia.....	.87
Matter insoluble in hydrochloric acid	4.10
Alumina56
Iron sesquioxide82
Phosphoric acid (P ₂ O ₅)	2.41
Lime	1.67
Magnesia47
Potash (K ₂ O)35
Soda (Na ₂ O)44
Ammonia (NH ₃)27
Sulphuric Acid (SO ₃)44
Undetermined constituents such as oxygen, hydrogen, chlorine, carbonic acid, silicic acid, &c. (about 7.5% of this consists of oxygen and hydrogen combined with the 15.79% of carbon)	9.46
	100.00

CESSPIT MATTER. SAMPLE No. 2. Same colour as No. 1, but in coarse pellets; dry and inodorous.

Moisture driven off at 100° C.....	6.34
Woody fibre.....	18.00
Organic matter (by loss on ignition)	25.61
Sand	35.20
Inorganic substances soluble in hydrochloric acid	9.67
" " insoluble " consisting chiefly of clay, sulphate of lime, &c.	5.18
	100.00

COMPLETE ANALYSIS.

Moisture driven off at 100° C.....	6.34
Sand	35.20
Woody fibre.....	18.00
Carbon in addition to that in woody fibre.....	14.34
Nitrogen other than as ammonia.....	.99
Matter insoluble in hydrochloric acid	5.18
Alumina62
Iron sesquioxide	1.07
Phosphoric acid (P ₂ O ₅)	2.67
Lime	1.50
Magnesia66
Potash (K ₂ O)34
Soda (Na ₂ O)45
Ammonia (NH ₃)25
Sulphuric Acid (SO ₃)44
Undetermined constituents such as oxygen, hydrogen, chlorine, carbonic acid, silicic acid (about 10% of this consists of oxygen and hydrogen combined with the 14.34% of carbon).....	11.95
	100.00

CESSPIT MATTER. SAMPLE No. 3. Of almost the same colour as Nos. 1 and 2, but pressed into the form of a brick dry; and inodorous.

Moisture driven off at 100° C.....	13.13
Woody fibre	15.00
Organic matter (by loss on ignition) in addition to woody fibre	24.31
Sand	38.70
Inorganic substances soluble in hydrochloric acid	7.12
" " insoluble " consisting chiefly of clay, sulphate of lime, &c.	1.74
	100.00

COMPLETE

COMPLETE ANALYSIS.

Moisture driven off at 100° C.....	13.13
Sand	38.70
Woody fibre	15.00
Carbon in addition to that in the woody fibre.....	13.53
Nitrogen other than as ammonia	1.07
Matter insoluble in hydrochloric acid	1.74
Alumina26
Iron sesquioxide75
Phosphoric acid (P_2O_5)	1.83
Lime.....	1.41
Magnesia53
Potash (K_2O)28
Soda (Na_2O)37
Ammonia (NH_3)23
Sulphuric Acid (SO_3)39
Undetermined constituents such as oxygen, hydrogen, chlorine, carbonic acid, silicic acid (about 9.5% of this consists of oxygen and hydrogen combined with the above 13.53% of carbon)	10.78
	<hr/>
	100.00

The specific gravity of the brick was found by calculation to be 1.08.

[Enclosure No. 2.]

Mr. J. L. Nicholls to Professor Smith, Professor Liversidge, and Mr. Charles Watt.

Gentlemen,

79, Castlereagh-street, Sydney, 30 March, 1880.

1. Having been informed by the Honorable the Colonial Secretary of your appointment to examine and report upon certain samples of deodorized excrement or night-soil submitted by me to the consideration of the Government, accompanying my letter dated 11th February last,—

2. I have the honor, at your expressed desire in my interview with you hereon, further, and in addition to the propositions already submitted to the Government, to state that the three several samples delivered by me in the form of fine powder, small broken pieces, and a compressed solid mass in brick-shape, respectively, and placed in your hands for examination, are the products of the ordinary contents discharged from the Sydney cesspits, which contains the usual sand and gravel and matter other than human excreta, but which is not used in this process of deodorization. The matter thus operated upon was immediately deodorized upon application of the agents employed.

3. The cost of deodorization will not exceed 3s. per ton, and the cost of labour and mechanical appliance to prepare and bring the same into the marketable shape presented to the Board will be about 3s. more, that is 6s. in all.

4. The deodorizing agents exist in the Colony in inexhaustible quantities, and will in bulk form about 4 or 5 per cent. in the manure produced. This manufactured product can be transmitted to any part of the world with or without package with all its volatile salts fixed in it and free from any offensive odour whatever.

5. The urinary fluids can be deodorized in like manner, and the ammonia and other salts therein also fixed and rendered perfectly inodorous, or condensed for exportation, or may otherwise be applied as a surface manure, and in dry weather of inestimable value.

6. The process is capable of illimitable extension. Its test application on a larger scale is proposed by the Government on about 30 tons of cesspit matter, which I have consented to undertake; and after consulting with a competent engineer in reference to the necessary works a lump sum of cost has been submitted by me and approved by the Government.

7. It is proposed that the output of the city cesspits for one night shall be delivered at some convenient locality and there immediately deodorized, the solids with fluid separated, made ready for delivery on the following morning in condition as per sample now in your charge.

8. In like manner I shall be prepared to treat any quantity of ordinary sewage matter, separating the solids from the fluids, and rendering them in similar condition as stated in regard to the city cesspits.

I have, &c.,

JAMES LANDER NICHOLLS.

No. 4.

The Principal Under Secretary to Mr. J. L. Nicholls.

Sir,

Colonial Secretary's Office, Sydney, 15 May, 1880.

Referring to the samples of deodorized excrement or night-soil submitted by you for the consideration of the Government, I am directed by the Colonial Secretary to inform you that the report furnished by the Board to whom the samples were referred is not of a character to justify the Government in entertaining your proposal regarding the product in question.

I have, &c.,

CRITCHETT WALKER.

BOROUGH OF ASHFIELD—SUPPLEMENTARY BY-LAW.

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 28th July, 1879.

BOROUGH OF ASHFIELD.

SUPPLEMENTARY BY-LAW.

THE following Supplementary By-law relating to Sewerage, made by the Council of the Borough of Ashfield, having been confirmed by His Excellency the Lieutenant-Governor, with the advice of the Executive Council, is published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

SUPPLEMENTARY By-law, made by the Council of the Borough of Ashfield, under the provisions of the Municipalities Act of 1867.

Disposal of Sewage.

The Council shall have power from time to time to enforce the adoption or alteration of any system, which to them may appear necessary, for the better regulation, disposal, or treatment of night-soil, sewerage, or other drainage, and may suspend the use or further extension of any system which may seem detrimental to public health.

Made and passed by the Council of the Borough of Ashfield, this nineteenth day of May, 1879.

(L.S.) **DANIEL HOLBOROW,**
Mayor.

W. R. MUIR, Council Clerk.

MUNICIPALITIES.

(BOROUGH OF GULGONG—FREE LIBRARY BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 158.

Department of Justice and Public Instruction,
Sydney, 2nd August, 1879.

BOROUGH OF GULGONG.

THE following By-laws, made by the Council of the Borough of Gulgong, for the regulation of the Gulgong Free Library, having been confirmed by His Excellency the Lieutenant-Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities' Act of 1867.

F. B. SUTTON.

BY-LAWS FOR REGULATING THE GULGONG FREE PUBLIC LIBRARY.

- 1. The Library and Reading-room shall be open every Monday, Tuesday, and Friday from 7 to 10 p.m.; on Saturdays from 2 to 6 p.m., and from 7 to 10 p.m.; and on Wednesday mornings from 10 to 12 a.m.
- 2. Every person who shall enter the Library or Reading-room shall immediately on entering the same write his or her name and address in a book to be kept for such purpose at such Library or Reading-room, and to be called the "Visitors' Book," and if such person shall be unable to write, then such name and address may be written by any other person or shall be so written by the proper officer of the Council, at such Library or Reading-room, at the request of such person; and no person who shall refuse to comply with this regulation shall be permitted to remain in such Library or Reading-room; and it shall be the duty of the officer of such Library or Reading-room to enforce this by-law.
- 3. Any person who, being intoxicated, shall enter such Library or Reading-room, shall be at once removed from the premises. Any person who shall use therein any abusive, improper, or unbecoming language, or who shall, by unnecessarily loud talking, or by any noise, or otherwise, disturb or annoy the persons using or resorting to such Library or Reading-room, or who shall without lawful excuse, but without felonious intent, remove any property from such Library or Reading-room, shall forfeit and pay any sum not less than ten shillings, nor more than ten pounds; and any such person may be forthwith removed by any officer of the Council in charge of such Library and Reading-room.
- 4. Any society or class for mutual improvement or instruction, or for study, or experiments, may, with the consent of the Council, be formed in connection with, or may hold its meetings, or carry on its studies or experiments at the said Library or

- Reading-room, provided that the general free access to and use of the said Library or Reading-room by persons who are not members of such society or class be not thereby interfered with: Provided, however, that no rule made by the members of any such society or class for the management of the same shall conflict in any way with these Regulations made by the said Council hereinafter.
- 5. Any person who shall wilfully damage any "Visitor's Book," Catalogue, copy of Regulations, or other book or record kept at the Library or Reading-room for the general uses thereof, shall for every such offence forfeit and pay any sum not less than ten shillings, or more than ten pounds.
- 6. It shall be the duty of the Librarian to report at every meeting of the Library Committee any infraction of the rules, or any injury to the books.
- 7. A copy of these By-laws shall be suspended in the Library-room for the information of visitors.
- 8. Any ratepayer may propose books for addition to the Library on entering the titles, price, and other particulars in a book to be kept for that purpose.
- 9. The Library shall be closed annually from the 15th to 30th November inclusive.

Reading-room Regulations.

- 10. Newspapers shall not be detained more than a quarter of an hour, or periodicals more than half an hour, if required by another visitor, he having intimated his wish to the person reading the same.

These By-laws were confirmed at a special meeting of the Council of the Municipality of Gulgong, held 4th June, 1879.

(L.S.) WILLIAM SELFF,
W. M. HOPPER, Council Clerk. Mayor.

(BOROUGH OF SHELLHARBOUR—BY-LAWS OF THE ALBION PARK FREE LIBRARY.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 158.

Department of Justice and Public Instruction,
Sydney, 21st January, 1880.

BOROUGH OF SHELLHARBOUR.

THE following By-laws made by the Council of the Borough of Shellharbour for the regulation of the Albion Park Free Library, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

F. B. SUTTOR.

BY-LAWS FOR REGULATING THE ALBION PARK FREE LIBRARY.

1. The Municipal Council of Shellharbour shall appoint a Librarian, who shall make out and keep a catalogue of all the books in the Library.
2. The Library shall be open to the public from the hour of 6 p.m. to 9 p.m. each day, excepting Saturday, on which day it shall be opened from the hour of 2 p.m. to 5 p.m., subject to the provisions of the 141st section of the Municipalities Act of 1867.
3. Persons making use of the Library shall enter their names in a book to be kept for that purpose.
4. Any person damaging a book shall pay to the Librarian on behalf of the Municipal Council of Shellharbour the cost of such damaged book.
5. The Library shall be kept in a room under the control of the Municipal Council of Shellharbour.
6. No person shall be admitted into the Library while in a state of intoxication.
7. Any person behaving in a disorderly manner while in the Library or on the premises, or damaging any property in such Library or on the premises, shall for every such offence be liable to a fine of not less than (5s.) five shillings, and shall make good and replace any such damaged property.

Made and passed by the Municipal Council of Shellharbour, this 22nd day of November, 1879.

RICHARD HALL, Council Clerk.

JOHN FRASER, Mayor.

1879-80.

(BOROUGH OF WOOLLAHRA—AMENDED BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 12th January, 1880.

BOROUGH OF WOOLLAHRA.

AMENDED BY-LAWS.

THE following amended By-laws, made by the Council of the Borough of Woollahra, for regulating the proceedings of the Council and the duties of the officers and servants thereof; for collection and enforcement of rates; relating to roads and streets and encroachments thereon; for suppressing nuisances and houses of ill-fame; for restraining noisome and offensive trades; for providing for the health of the Municipality; for regulating sewerage and drainage; for preventing and extinguishing fires; for regulating public amusements; for regulating the supply of water; for regulating public jetties, &c., and for generally maintaining the good rule and government of the Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

BY-LAWS OF THE BOROUGH OF WOOLLAHRA.

PART I.

By-laws repealed.

1. The By-laws of the said Council of the Borough of Woollahra, dated the 8th day of December, 1868, and published in the Government Gazette of the 2nd April, 1869, No. 78, are hereby repealed.

Proceedings of the Council and Committees—Preservation of Order at Council Meetings—Duties of Officers and Servants, &c.

Meetings of the Council.

Ordinary Meetings.

2. The Council shall meet for the dispatch of business on the second Tuesday in each month, at the hour of quarter to eight p.m., unless such day shall be a public holiday, in which case the meeting shall be held on the day following.

Adjournment for want of quorum.

3. Whenever there shall be an adjournment of any meeting for want of a quorum, the names of the members present shall be taken down, and recorded in the minute-book.

Course of procedure.

4. The following shall be the course of procedure at such meetings, viz:—

1. The reading and confirmation of the minutes of the proceedings of the previous meetings.
2. Questions and complaints.
3. Statement of accounts, showing the moneys received and paid since last meeting, with the balance in the Bank to the credit of the Municipality.
4. The presentation of reports and petitions.

5. The reading of correspondence.
6. Adjourned motions and motions of which notice has been given.
7. Such other business as may lawfully be brought before the Council.

Business at Special Meetings.

5. At special meetings of the Council the business shall be taken in such an order as the Mayor, or in his absence, the Aldermen at whose instance such special meeting shall have been called, may direct.

Motion to be seconded.

6. No motion shall be discussed until it be seconded.

Motions to be in writing and not withdrawn without leave.

7. Every motion shall be in writing—shall be signed by the mover, and no motion when seconded shall be withdrawn without leave of the Council.

Amendments may be moved.

8. When a motion shall have been moved and seconded, any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed until it be seconded.

Petitions.

9. The Council may at any meeting resolve, without previous notice, that any petition be received, and that the same, or any correspondence read, be referred to a Committee for report [or that the requests therein contained be granted].

Mayor to preserve order.

10. The Mayor shall preserve order, and may at any time call to order any Aldermen who may appear to him to be out of order.

Calls to order.

11. Any Alderman may at any time call the attention of the Mayor to any Alderman being out of order, or to any other point of order.

Mayor's decision on points of order final.

12. Every point of order shall be taken into consideration immediately upon its arising, and the decision of the Mayor thereon shall be conclusive.

Mayor may take part in proceedings.

13. The Mayor may take part in all the proceedings of the Council or Committees thereof.

Questions put by Mayor.

14. The Mayor shall put all questions, first in the affirmative and then in the negative, and may do so as often as may be necessary to enable him to determine the sense of the Council thereon, and thereupon he shall declare his decision, which shall be final, unless a division be called for.

Mayor to decide as to pre-audience of Aldermen.

15. If two or more Aldermen rise to speak at the same time, the Mayor shall decide which of them shall be entitled to pre-audience.

No Alderman to speak twice on the same question or amendment, except in Committee.

16. No Alderman shall speak twice on the same question, unless in Committee, or in explanation, where he shall have been misrepresented or misunderstood: Provided that any Alderman, although having previously spoken, may speak once on every amendment, and that the mover of every question shall always have a right of final reply.

No Alderman to make personal reflections.

17. No Alderman shall digress from the matter under discussion, or make personal reflections on, or impute motives to, any other Alderman.

No Alderman to speak for more than fifteen minutes.

18. No Alderman shall speak upon any motion or amendment for a longer period than fifteen minutes, without the consent of the Council.

Alderman using offensive expression to apologize.

19. When any member of the Council shall make use of any language or expression offensive, or capable of being implied offensively, to any Alderman, the member so offending shall be required to withdraw such language or expression, and to make an apology satisfactory to the Council or Committee thereof.

Debate may be adjourned.

20. A debate may be adjourned to a later hour of the same day or to another day.

Alderman adjourning debate entitled precedence on resumption.

21. The Alderman upon whose motion any debate shall be adjourned shall be entitled to precedence on the resumption of the debate.

Adjournments.

22. Any motion for adjournment, if seconded, shall be immediately put without discussion; but if such motion be negatived, it shall not be competent for any Alderman to make a similar motion until thirty minutes have elapsed thereafter.

Any Alderman may divide Council.

23. It shall be competent for any Alderman to divide the Council on any question, both in full Council and in Committee of the whole Council.

Divisions to be entered on minutes.

24. All divisions of the Council shall be entered on the minutes of the proceedings.

Questions to be read when required.

25. Any Alderman may require the question or matter under discussion to be read for his information, and upon such request the question or matter under discussion shall be read.

Suspension of By-laws.

26. Any By-law relating to or affecting proceedings at meetings of the Council may by resolution of the Council be suspended *pro tempore* in cases of emergency.

Standing and Special Committees.

Standing Committees.

27. There shall be a Committee of Works for each Ward, and a Finance Committee. These Committees shall be re-appointed every year at the first meeting of the Council which shall be holden after the election of the Mayor.

Constitution of Standing Committees.

28. The Committees of Works shall consist of the Aldermen for their respective Wards. The Finance Committee shall consist of three members.

Committees of Works.

29. The Committees of Works shall have the general direction of all works ordered or sanctioned by the Council, and the general inspection of all streets, roads, ways, bridges, public reserves, and other places under the care and management of the Council in their respective Wards. They may also report from time to time upon such improvements, repairs, or other matters as they may think necessary.

Finance Committee.

30. The Finance Committee shall examine and check all accounts, and shall watch generally over the collection and expenditure of the Municipal revenues. They shall inquire and report from time to time as to all matters which they may consider to affect the finances of the Borough.

Rules to be observed in Committee.

31. The rules of the Council shall be observed in Committee, except the rule limiting the number of times of speaking.

Reports of Committee to be signed.

32. Every report of a Committee shall be signed by the Chairman thereof.

Protection of Funds and Records.

Member or officer of Council not to be surety.

33. In cases where surety is required by the Municipalities Act, it shall not be competent for the Council to accept as surety any of their members, or any person holding office under the Council.

Custody of records, seal, &c.

34. The common seal and all charters, deeds, muniments, books, papers, and records of the Council shall be kept in the Council Chambers or office of the Council in the custody of the Council Clerk, unless the Council shall otherwise order for any purpose; and the common seal shall not be used, except with the signature of the Mayor.

Records, &c., not to be defaced or altered.—Nor removed.

35. Any person who shall deface, alter, or destroy, or attempt to deface, alter, or destroy any such common seal, charter, deed, muniment, book, paper, or record shall on conviction thereof forfeit and pay for the first offence a penalty not exceeding fifty pounds nor less than five pounds, and upon every subsequent conviction a penalty of not less than twenty pounds.

36. Any person who shall remove or attempt to remove (except for the purposes of evidence in any legal proceedings) any such seal, charter, deed, muniment, book, paper, or record from the Council Chamber, without leave from the Council or Mayor, shall on conviction thereof forfeit and pay a penalty of not more than twenty pounds nor less than two pounds, and for every subsequent offence a penalty of not less than five pounds.

Expense of proposed works to be first ascertained—Accounts to be examined by Finance Committee.

37. No work except as hereinafter provided shall be undertaken until the probable expense thereof shall have been ascertained by the Council; and all accounts to be paid by the Council shall be examined by the Finance Committee before any warrant shall be issued for the payment thereof.

Outlay in urgent cases.

38. In cases of emergency arising between meetings of the Council, it shall be lawful for necessary works to be ordered without vote of the Council, as under, viz.:—By the Mayor, to the extent of twenty pounds. By the Chairman of any Committee of Works, to the extent of ten pounds. By any Alderman, to the extent of five pounds.

Levying Rates, &c.

Due dates for rates—Defaulters.

39. The rates and taxes levied by the Council shall be held to be due and payable on such day or days as the Council shall, by resolution, from time to time appoint. Every person not paying his or her rates or taxes at the office of the Council, or to the Council Clerk or other proper officer of the Council, within thirty days after any of the days so appointed for payment thereof, shall be deemed a defaulter: Provided that due notice of such rate shall have been given in manner as required by the Municipalities Act of 1861.

Rates on damaged premises.

40. In the event of any premises being wholly or partially destroyed by fire or other accident, the Council shall have power to accept an equitable proportion of the assessed rates of such premises for the remainder of any municipal year.

Streets and public places, &c.

New roads to be reported upon.

41. No new public road, street, way, park, or other place proposed to be dedicated to the public, shall be taken under the charge and management of the Council until after such road, street, way, or park shall have been examined by a Committee for Works and reported upon to the Council by such Committee.

Plans of proposed new road, &c., to be deposited.

42. Whenever any proprietor or proprietors of land within the said Borough shall open any road, street, or way, or lay out any park or other place for public use or recreation through or upon such land, and shall be desirous that the Council shall undertake the care and management of such road, street, way, park, or other place, he or they shall furnish the Council with a plan or plans, signed by himself or themselves, showing clearly the position and extent of such road, street, way, park, or other place as aforesaid. And he or they shall execute any instrument dedicating such road, street, way, park, or other place, as the Council may consider necessary.

Roads and streets, and encroachments thereon, &c.

43. The Surveyor of the Borough, or other officer or person duly authorized by the Council in that behalf, shall be the proper officer for making out, and shall fix, mark, and lay out, when and where necessary in the opinion of the Council or Committees of Works, the levels of all public roads, streets, lanes, and thoroughfares, and the carriage and foot ways thereof, which now are or shall hereafter be under or subject to the control, construction, care, or management of the Council. And it shall be the duty of such surveyor or officer to place posts at the corners or intersections of such streets, roads, lanes, and thoroughfares whenever the same may be deemed necessary or desirable by the Council, so as to give a width of 42 feet for the carriage and 12 feet for the foot way on each side, where the road, street, lane, or thoroughfare shall be sixty-six feet wide, and in proportion, and in the discretion of the Council, of any such road, street, lane, or thoroughfare, or other public place of other width than 66 feet: Provided that there shall be no change of level in any such public road, street, lane, thoroughfare, or public place until the same shall have been submitted to and adopted by the Council as hereinafter provided.

Change of street levels.

44. Whenever it may be deemed necessary to alter the level of any such public road, street, or way as aforesaid, the Committee of Works shall cause a plan and section, showing the proposed alterations, to be exhibited at the Council Chamber for fourteen days, for the information and inspection of rate-payers, and shall notify, by advertisement in some newspaper circulating in the Borough, that such plan is so open to inspection. At a subsequent meeting of the Council the said plan and section shall, if adopted, be signed by the Mayor or Chairman, and countersigned by the Council Clerk.

Footways may be levelled, &c.

45. The Surveyor may cause all footways to be levelled, and made as nearly as practicable of equal height and breadth and with an equal slope and inclination; and for this purpose may remove any flagging, steps, or other matter, thing, or obstruction that may injure or obstruct the said footway, or render it unequal or inconvenient, and which now is or may hereafter be erected or placed on the space marked out for any of the said footways.

Temporary stoppage of traffic for repairs, &c.

46. The Committees for Works, or any officer or person acting under the authority of such Committees, may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same or for any necessary purpose; and any person or persons offending against this By-law, either by travelling on such street, lane, or thoroughfare, or by removing or destroying any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty of any sum not exceeding five pounds for every such offence.

No encroachment allowed on streets, &c.

47. Whenever any road, street, lane, or thoroughfare has been marked out in manner herein provided, no house, shop, fence, or other structure shall be allowed, except as hereinafter mentioned, to project or encroach on any part thereof; and it shall not be lawful for any person, unless for any temporary or other purpose permitted by the Council, to erect or put up any building, erection, obstruction, fence, or enclosure, or make any excavation or hole on, under, or near such road, street, lane, or thoroughfare, unless due notice of the same shall have been given to the Council of the Borough at least one week before any such building, erection, obstruction, fence, or enclosure, excavation or hole, as aforesaid, shall be commenced to be erected or put up or made, and the assent of the Council first obtained. Any person or persons offend-

ing against this By-law shall forfeit and pay for every such offence a sum not exceeding five pounds nor less than forty shillings; and on every successive conviction for a similar offence, shall forfeit and pay a penalty of not less than five pounds.

Obstructing public pathways.

48. If the owner or occupier of any premises situate on the side of any street or road in this Borough shall permit any tree, shrub, or plant, kept for ornament or otherwise, to overhang any footway, street or road, and on demand made by the Council or their overseer or inspector shall not cut or cause to be cut, lop or cause to be lopped, all such trees, shrubs, or plants, the said Council and their servants and workmen may cut or cause to be cut or lopped, all such overhanging trees, plants and shrubs, and to remove or burn any portion of such trees, plants, or shrubs so cut or lopped without being deemed a trespasser or trespassers; and the Council may recover the cost of such work from the owner of the premises; and in case any person or persons shall resist or in any manner forcibly oppose the said Council or their servants or workmen in carrying out this By-law, every person so offending shall on conviction for every such offence forfeit and pay any sum not exceeding ten pounds.

No balcony, &c., to project more than 18 inches.

49. It shall not be lawful for any awning, verandah, portico, balcony, coping, parapet, overhanging eaves, cornice, windows, string-cornice, stringcourse dressing, or other erection or construction of any kind, to project more than eighteen inches beyond the alignment of any street, road, or thoroughfare, except with the consent of the Council first obtained, under a penalty not exceeding five pounds nor less than one pound.

Encroachments must be removed on notice.

50. The Surveyor or other officer of the Council may at any time, on the order of the Council, give seven days notice in writing directing the removal of any building, fence, sign-board, obstruction, encroachment, or erection of any kind, in and upon any reserve, road, street, lane, footway, thoroughfare, or place under the charge of the Council, and such notice shall be served either personally or at the usual or last known place of abode of the person to whom such erection, obstruction or encroachment belongs, or who has erected the same, or caused it to be erected; and shall state that in the event of such notice not being complied with in ten days, the work will be done at the risk and expense of the person served with such notice. And in any case where, after service of notice as aforesaid, the person served shall not comply therewith, it shall be lawful for the Council to direct the removal of the same under the superintendence of its officer, and the cost thereof to be recovered from the person so served as aforesaid; and the person neglecting to comply with such notice shall, in addition to the cost of removal, be liable to a penalty not exceeding twenty-five pounds nor less than one pound; and in case of every successive offence, the penalty on conviction shall not be less than five pounds.

Or may proceed by action.

51. Notwithstanding the above By-law the Council shall be at liberty to proceed by action for trespass in respect of any such excavation, obstruction, or encroachment.

To apply also to obstructions by digging, &c.

52. The provisions, remedies, and penalties contained in the last two By-laws shall apply in all cases of obstruction, injuries, or encroachments by excavating under, digging, or taking away any portion of any reserves, road, fence, street, lane, footway, thoroughfare, or place within the Borough or under the charge of the Council.

Persons obstructing Overseer, &c.

53. Any person who shall wilfully obstruct or interfere with the Surveyor or other officer of the Council, or any person acting for or under him or them, in the exercise of any of the duties or powers by these By-laws imposed, shall on conviction forfeit and pay a penalty of not less than two pounds nor more than twenty pounds.

Offences, nuisances—General good order of the Borough.

Damaging public buildings, jetties, &c.

54. Any person who shall damage any public building, wall, parapet, bridge, road, street, kerbing, sewer, watercourse, gutter, stone steps, footway, fence, posts, rails, wharf, jetty, truck, rails, implement, or other property of the Municipality, shall pay the cost of repairing the same; and if the same be wilfully done shall also forfeit and pay a penalty not exceeding fifty pounds.

Injuring public fountains, washing thereat, &c.

55. Any person who shall wilfully injure any public fountain, well, pump, cock, tap, jet, or water pipe, or any part thereof, shall pay the cost of repairing the same; and if the injury be wilfully done, or pollute the water thereof, shall forfeit a sum not exceeding twenty pounds nor less than one pound; and any person who shall have in his possession any

private key for the purpose of opening any cock, tap, or pump, or who shall in any manner clandestinely or unlawfully appropriate to his own use any water from any public fountain, well, or pipe, shall forfeit a sum not exceeding twenty pounds nor less than one pound; and any person who shall use, open, or leave open any cock, tap, or pump of any public fountain or well, so that the water shall or may run to waste, shall forfeit a sum not exceeding two pounds nor less than five shillings; and any person who shall wash any clothes, omnibus, carriage, cart or other vehicle, or any horse, animal, or thing, at any public fountain, well, or pump, shall forfeit and pay a sum not exceeding five pounds nor less than five shillings.

Injuring or extinguishing lamps.

56. Any person who shall wantonly or maliciously break or injure any lamp or lamp-post, or extinguish any public lamp set up in the said Borough, shall, over and above the necessary expense of repairing any injury committed, forfeit and pay for every such offence a penalty of not less than one pound, nor more than five pounds.

Damaging trees.

57. Any person who shall wilfully, and without the authority of the Council, cut, break, bark, root up, ring, or otherwise destroy or damage the whole or any part of any tree, sapling, plant, scrub, or underwood growing in or upon any street, reserve, or place under the management of the Council, shall forfeit any sum not exceeding ten pounds nor less than ten shillings.

Throwing dead animals, &c., into any watercourse, &c.

58. Any person who shall throw or cast any filth, rubbish, or any dead animal, or any living animal with intent to drown the same, into any watercourse, waterhole, river, creek, or canal, or who shall permit or suffer slops, suds, or filth of any kind to flow from his or her premises into any such watercourse, waterhole, river, creek, or canal, or shall permit or cause by means of pipes, shoots, channels or other contrivances, filth, refuse, or offensive matter of any kind whatsoever to flow into any watercourse, waterhole, river, creek, or canal, or shall obstruct or divert from its channel any sewer or watercourse, river, creek, or canal, shall forfeit any sum not exceeding five pounds nor less than one pound, and shall, in addition to any such penalty, pay the cost of removing such filth or obstruction, or of restoring such watercourse or canal into its proper channel: Provided that such cost and penalty shall not together exceed the sum of fifty pounds.

Throwing filth on roadway, &c.

59. If any person shall, in any street, road, lane, reserve, or public place, throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid any ashes, rubbish, offal, dung, soil, dead animal, blood, or other filth, or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other animal, in or so near to any such street, road, lane, reserve, or public place as that any blood or filth shall run or flow upon or over, or be on any road, reserve, lane, footway, or public place, he shall forfeit and pay a penalty not exceeding five pounds, nor less than one pound.

Allowing filth to flow from premises.

60. Any person or persons allowing any filth or offensive matter to flow or come from his, her, or their premises, shall be liable to a penalty of not less than forty shillings nor more than twenty pounds.

Driving or riding on footway.

61. Any person who shall run, roll, drive, draw, place or cause, permit or suffer to be run, rolled, driven, drawn, or placed upon any footway any wagon, omnibus, cart, dray, stage, bicycle, carriage, wheelbarrow, truck, cask, or vehicle, or shall lead, drive, ride, or place any horse, cattle, or other beast upon any footway, shall forfeit and pay a penalty not exceeding five pounds nor less than one pound.

Placing goods, &c., on roadway, &c.

62. If any person shall set or place, or cause or permit to be set or placed, any stall, show-board, sign-board, basket, or goods of any kind whatsoever, or shall hoop, place, wash, or cleanse, or shall cause to be hooped, placed, washed, or cleansed any cask or vessel in or upon or over any road, footway, or public place within the said Borough: Or shall set out, lay, or place, or shall cause or procure, permit or suffer to be set out, laid, or placed, any coach, cart, dray, barrow, truck, or other carriage, upon any footway: Or shall allow any vehicle, goods or property, to remain in or obstruct any road, street, lane or way: Or if any person shall set or place, or cause to be set or placed, in, upon, or over, any of the said carriage or foot ways, any timber, stones, bricks, lime, or other materials or things for building whatsoever (unless the same shall be enclosed as hereinafter directed), or any other goods or things whatsoever: Or shall hang out or

expose, or shall cause or permit to be hung out or exposed, any meat or offal or other commodity or thing whatsoever, from any house or premises, over any part of such footways or carriageways, or over any area of any house or premises, over or next to any such street, road or public place; in every such case every person so offending shall forfeit and pay a sum not exceeding forty shillings nor less than ten shillings: And it shall be lawful for any constable, without any warrant or other authority than this By-law, to seize any such stall, show-board, basket, goods, coach, cart, dray, barrow, truck, or other carriage, together with the horses or other animals, if any shall be thereunto belonging, with the harness, gear, and accoutrements thereof, or any such timber or other materials or other matters or things aforesaid, or any of them: And in case any of the goods, wares, or merchandize so seized shall be perishable, or shall be articles of food, then the same shall be immediately forfeited and the person or persons who shall seize the same shall deliver the same or cause the same to be delivered to the Superintendent for the time being of the Benevolent Asylum, and the same shall and may be distributed for the benefit of the inmates of the said Asylum; but otherwise, such constable shall cause the stall, basket, cask, goods, coach, cart, dray, barrow, truck, or other carriage, horses or other animals, materials or other things so seized, and not being of perishable nature, to be removed to any place appointed for the reception thereof (if there be any such), or otherwise to such place or places as he or they shall judge convenient, giving verbal notice of such place unto the owner, driver, or person having interest in the things so seized or removed, if he shall be then there present, and the same shall be there kept and detained until such owner, driver, or other person interested therein aforesaid, shall cause to be paid the penalty in which he shall be convicted together with the charges for taking and removing the same, and of keeping such horses or other animals (if any); and in case the animals or other things so removed shall not be claimed and the said penalty and charges be paid within five days next after such removal, it shall be lawful for any Justice to order the same to be sold and the overplus of the money arising from such sale (if any) shall be paid to the owner thereof.

Drawing or trailing timber, &c.

63. If any person shall haul or draw, or cause to be hauled or drawn, upon any part of the streets, roads, or public places, any timber, stone, or other thing otherwise than upon wheeled conveyances, or shall suffer any timber, stone, or other thing which shall be carried principally or in part upon wheeled carriages, to drag or trail upon any part of such street or public place to the injury thereof, or to project or hang over any part of such conveyance so as to occupy or obstruct the street or road beyond the breadth of the said conveyance, every such person so offending shall forfeit and pay for every such offence a penalty of not less than ten shillings, nor more than five pounds, and shall also pay any damage occasioned thereby.

No turf, gravel, &c., to be removed from streets without leave, &c.

64. Any person who from any part of the roads, streets, thoroughfares, reserves, footways, or public places shall remove or cause to be removed any turf, clay, sand, soil, gravel, stone, or other material, without leave first had and obtained from the Council, or who shall wantonly break up or otherwise damage any part of the said roads, streets, thoroughfares, reserves, footways, or public places, shall, on conviction, forfeit and pay for every such offence any sum not exceeding ten pounds, nor less than five shillings, and for every subsequent offence shall forfeit and pay a sum of not less than one pound.

As to riding or driving improperly through streets, &c.

65. Any person who shall ride or drive through any road, street, or public place so negligently, carelessly, or furiously, that the safety of any other person shall be actually endangered, shall on conviction forfeit and pay a sum not exceeding ten pounds, nor less than five shillings.

Loitering in streets, &c.

66. Any person or persons remaining or loitering in or obstructing any road, street, footway, or other public place within the Borough shall be liable to a penalty of not less than ten shillings nor more than ten pounds; and for any subsequent conviction shall be liable to a penalty of not less than five pounds, nor more than twenty pounds.

Gambling in streets, &c.

67. Any person playing or betting at any unlawful game, or playing or betting at or with any cards, money table, implement or instrument of gaming, in any street, road, footway, reserve, or other open or public place, shall be liable to a penalty of not less than forty shillings nor more than ten pounds; and for every subsequent conviction shall be liable to a penalty of not less than five pounds, nor more than twenty pounds.

Affixing placards on walls, and chalking thereon.

68. It shall not be lawful for any person to paste or otherwise affix any placard or other paper or notice upon any wall, fence, post, stone, pillar, railing, house, or building; nor to deface or mark any such wall, fence, post, pillar, railing, house, or building by chalk or paint, or in any other manner, unless with the consent of the owner thereof; and any person who shall be guilty of any such offence shall forfeit and pay a sum not less than ten shillings, nor more than ten pounds.

Cattle, &c., not to wander about streets, &c.

69. It shall not be lawful for any person to suffer any kind of cattle, horse, ass, mule, sheep, swine, or goat belonging to him or under his charge, to stray or to be depastured in any road, street, lane, reserve, or public place in this Borough; and any person who shall so offend shall forfeit and pay in respect of every such offence, a sum not exceeding forty shillings, nor less than five shillings.

Swine, &c., not to be kept within fifty yards of a dwelling-house &c.

70. It shall not be lawful for any person to breed, feed, or keep any kind of swine in any house, building, outhouse, yard, garden, or other tenement or hereditament situate and being in or within fifty yards of any street, way, or public place or dwelling-house now erected or hereafter to be erected within the limits of this Borough; and every person who shall so offend shall on conviction forfeit and pay for every such offence a sum not exceeding five pounds, nor less than ten shillings.

Allowing filth to remain on premises.

71. Any person or persons allowing any filth or offensive matter to be or remain on his or their premises, shall be liable to a penalty of not less than forty shillings, nor more than twenty pounds.

Stables and nuisances not removed on complaint, &c.

72. In case any privy, stable, cow-yard, pig-stye, or any other enclosure, place, or thing within the said Borough shall be or become a nuisance, or shall be so close to a dwelling-house as to become a nuisance or injurious to the health of the inhabitants, it shall be lawful for the Council by notice in writing, to order that such privy, stable, cow-yard, pig-stye, or other place or thing, being a nuisance or injurious to health, be remedied or removed within fourteen days after such notice shall have been given to the owner or occupier of the premises wherein such nuisance shall exist, or shall have been left for such owner or occupier at his or her last or usual place of abode, or on the said premises; and every such owner or occupier neglecting to remedy or remove such nuisance, shall for every such offence forfeit and pay a penalty not exceeding twenty pounds.

Weeds.

73. Any person permitting Bathurst burs, Scotch thistles, or other noisome or obnoxious plants and weeds to grow in his or her enclosed or unenclosed lands in the said Borough, so that the said plants or weeds shall spread or be likely to spread to the injury or detriment of any resident in the said Borough who shall not remove and burn the same within seven days after receiving notice to that effect from the Council or its officer shall forfeit and pay a sum of not more than five pounds, nor less than ten shillings.

Removal of Night-soil.

74. It shall not be lawful for any person or persons to deposit night-soil, ammoniacal liquor, or other offensive matter nearer to any street, road, or dwelling-house, than shall be directed by the said Council or its officer; and all night-soil and other offensive matter shall be removed within the hours hereinafter prescribed, in properly covered and water-tight carts or other vehicles; and no vehicles used for this purpose shall be allowed to stand on any premises nearer to any road, street, or dwelling-house than shall be directed by the said Council or its officer; and every person offending against this By-law or neglecting to comply with any directions given them shall for every such offence forfeit and pay a sum not exceeding ten pounds nor less than ten shillings.

Hours for removing night-soil, ammoniacal liquor, or other offensive matter.

75. If any person shall take away night-soil, ammoniacal liquor, or other offensive matter from any house, place or premises within the said Borough, or shall come with carts or carriages for that purpose except within the hours of 11 at night and 5 in the morning, or if any person or persons shall cast, or permit to leak or slop out of any cart, bucket, tub, or otherwise, any night-soil, ammoniacal liquor, or offensive matter in or near any of the streets or public places, he shall forfeit and pay a penalty of not less than forty shillings nor more than ten pounds for every such offence; and in case the person or persons so offending cannot be found, then the owner or owners of such cart, carriage, or other vehicle employed in and about emptying and removing such night-soil, and also the employer or employers of the person or persons so offending shall be liable to and forfeit and pay such penalty as aforesaid.

Cleansing butchers' shambles, slaughter-houses, &c.

76. It shall be lawful for the Inspector of Nuisances or for any other officer appointed by the Council, when and as often as he or either of them shall see occasion, to visit and inspect any butchers' shambles, shops boiling-down establishments, tanneries, fellmongering establishments, breweries, or places of a like nature in the said Borough, and to give such directions concerning the cleansing of the said shambles, shops, tanneries, breweries, and establishments, both within and without, as to him shall seem needful; and any butcher, or the occupier of any such premises as aforesaid, who shall refuse or neglect to comply with such directions within a reasonable time (not exceeding 14 days) after being so directed shall forfeit and pay a sum not exceeding ten pounds nor less than twenty shillings.

Slaughtering.

77. Any person slaughtering or causing to be slaughtered any cattle, sheep, swine, or other beast, in any house, enclosure, or place, the same being not less than three miles from the city of Sydney, without the written sanction of the Council, shall be liable to a penalty of not less than two pounds nor more than ten pounds for every animal so slaughtered.

Inspection of premises, &c.

78. The Inspector of Nuisances or other officer appointed by the Council, shall make an inspection of any premises, yards, closets, or drains in the Borough, and shall have full power, without any other authority than this By-law, to go upon such premises for the purpose of such inspection, and any person obstructing any Inspector or officer in the execution of his duty shall be liable to a penalty not exceeding ten pounds.

Discharging firearms, &c.

79. Any person who shall discharge any firearms within the Borough without lawful cause, shall forfeit and pay a sum not exceeding five pounds nor less than ten shillings.

No rock to be blasted without notice to the Surveyor.

80. Any person who shall be desirous of blasting any rock within the distance of 150 feet of any dwelling house, street, road, or other public place, shall give notice in writing twenty-four hours previously to the said Council or Surveyor thereof, and they shall be at liberty either to prohibit such blasting, or may appoint in writing a time when the same may take place, and give such other directions as they or he may deem necessary for the safety of life and property, and if any person shall blast or cause to be blasted any rock within the limits aforesaid without giving such notice, or shall not conform to the directions given to him by the said Council or Surveyor, he shall forfeit and pay for every such offence a sum not exceeding twenty pounds nor less than one pound, and for every subsequent offence shall pay a penalty of not less than five pounds.

Entrance to cellars, &c., to be covered, &c.

81. If the owner or occupier of any premises, having any rails, bars, or covers over the areas or openings to any kitchen or cellars or other part of the said premises beneath the surface of the footway of any streets or public places, or having any doorway or entrance into the basement or cellar story thereof, shall not either keep the same, or the rails or cover of such kitchens, cellars, or other parts, in sufficient and good repair, or constantly keep the same securely guarded by rails or otherwise, or cover the same over with a strong flap or trap-door according to the nature of the case, and so as to prevent danger to persons passing and re-passing; or, if any such owner or occupier shall leave open, or not sufficiently or substantially kept covered and secured, any coal or other hole, funnel, trap-door, or cellar-flap, belonging to or connected with his premises; or, if such owner or occupier shall not repair, and from time to time keep in good and substantial repair, all and every of such rails, guard-rails, flaps, trap-doors, and other covering, then and in every such case he shall for every such offence forfeit and pay a sum not exceeding five pounds nor less than one pound.

Wells to be covered over, &c.

82. Every person who shall have a well, sunken tank, or pit, situated between his dwelling-house or the appurtenances thereof, and any public place, road, street, or footway, within the limits of the said Borough, or at the side of such public place, road, street, or footway, shall cause such well to be securely and permanently covered over; and if any person having such well, tank, or pit, as aforesaid, shall fail to cover and secure the same within twenty-four hours after notice in writing shall have been given to him or her by any officer of the said Council, or shall have been left at such person's usual or last known abode or at the said premises, in the manner and with such materials as the Council or its officer shall direct and to their satisfaction, such person shall forfeit and pay a sum not exceeding ten shillings for every day that such well, tank, or pit, shall remain open or uncovered contrary to the provisions hereof.

Holes made for vaults, &c., to be enclosed, &c

83. If any person shall dig or make, or cause to be dug or made, any hole, or leave or cause to be left any hole in or adjoining any street, road, lane, or public place, for the purpose of making any vault, cellar, or basement, or the foundation or foundations to any house or other building, or for any other purpose whatsoever, and shall not forthwith enclose the same in a good and sufficient manner, and keep up or cause to be kept up and continued any such enclosure, and shall not, when thereunto required by the said Council or officer thereof, well and sufficiently fence or enclose any such hole, within the time and in the manner provided by the preceding By-law, and shall not place a light upon the said enclosure, and keep the same constantly burning, from sunset to sunrise, during the continuance of such enclosure, then and in every such case the person so offending shall forfeit and pay for every such offence and for every such refusal or neglect, any sum not exceeding five pounds nor less than ten shillings; and on conviction for every subsequent offence a sum not less than one pound.

Excavation, &c., to be protected by fence or wall.

84. It shall not be lawful for any person to make any quarry, excavation, or opening in the ground, on any premises adjoining or near to any public road or footpath within the limits of this Borough, until the owner or occupier of the said property shall have erected a good substantial fence or wall at the least four feet high around such parts of the said property as adjoin such public road or footpath; and any person neglecting to enclose any premises upon which any such quarry or excavation shall be made, shall forfeit and pay for every such offence a sum not exceeding five pounds nor less than ten shillings; and all existing quarries, excavations, or precipices situated within the limits of this Borough shall be enclosed and protected in the manner aforesaid, within one month after due notice to that effect shall have been given by the said Council, and in the event of the failure or neglect of the owner or occupier of any such last-mentioned premises to enclose the same, after notice as aforesaid, such person so offending shall be subject to the penalty before-mentioned.

Bathing prohibited within certain limits.

85. It shall not be lawful for any person to bathe in any waters exposed to view from any inhabited house, public wharf, jetty, bridge, road, street, reserve, or other place of public resort, in or near to the said Borough, between the hours of six in the morning and eight in the evening; and any person who shall offend against this By-law shall forfeit and pay a sum not exceeding five pounds.

Indecent exposure of person.

86. Any person who shall offend against decency by the exposure of his or her person or by indecent behaviour or by committing a nuisance, in any street or public place or unenclosed land within the said Borough or in view thereof or in any public conveyance, shall forfeit and pay a sum not exceeding ten pounds nor less than ten shillings.

Houses of ill-fame.

87. Upon representation to the Council that any house or premises within the Borough is of ill-fame, it shall be lawful for the Council to cause the residents of such house or premises to furnish to the Council a list of names, ages, sexes, and occupations of all the inmates of the said house or premises; and upon non-compliance with such request, or if, upon consideration, the Council consider the house to be one of ill-fame, they shall declare the same to be a nuisance, and shall cause a notice in writing to be served upon the holder of such house or premises, or any person resident or being therein, to discontinue or abate the said nuisance within forty-eight hours after the receipt of such notice; and if such nuisance be not so abated, the holder of such house or premises, or person residing or being therein, shall be liable to be proceeded against for such nuisance, and shall on conviction thereof, forfeit and pay any sum not less than two pounds nor more than twenty pounds; and if such nuisance shall not be abated within forty-eight hours after such conviction, the holder of the house, or person residing or being therein as aforesaid, shall forfeit and pay for such second offence a sum of not less than five pounds nor more than fifty pounds; and if a further period of forty-eight hours shall elapse after such second conviction, without the abatement of such nuisance, the holder of such house or other person residing or being therein as aforesaid, shall for such third offence forfeit and pay any sum not less than ten pounds nor more than fifty pounds.

Various obstructions and annoyances.

88. Every person who, in any street or other public place or passage within the said Borough, to the obstruction, annoyance, or danger of the residents or passengers, shall commit any of the following offences, shall on conviction for any and every such offence, forfeit and pay a penalty of not more than five pounds nor less than five shillings:—

Every person who shall hoist, or cause to be hoisted, or lower, or cause to be lowered, goods of any description from any house fronting any street or public place, and close to the footway thereof, without sufficient and proper ropes and tackling.

Every person who shall carry or convey, or cause to be carried or conveyed in any street or public place the carcase, or any part of the carcase, of any newly slaughtered animal, without a sufficient and proper cloth covering the same, for the concealment from public view, or shall hawk or carry about butchers' meat for sale without covering the same as aforesaid.

Every person who shall place any wire, line, cord, or pole across any street, lane or passage, or hang or place clothes thereon to the danger, obstruction or annoyance of any person.

Every person who shall place any flower-pot, vase, or utensil in any upper window, near to any street or public place, without sufficiently guarding the same from being thrown down.

Every person who shall throw or cast from the roof, or any part of any house or other building, any slate, brick, wood, rubbish, or other material, or thing (unless within a board or enclosure when any house or building is erected, pulled down, or repaired).

Every blacksmith, metal-founder, lime-burner, brick-maker, potter, or other person using a forge, furnace, fire, or kiln, and having a door, window, or aperture fronting or opening into or towards any street, lane, or passage, and not enclosing such door, or not fastening the shutters or other fastenings of such window, and closing such aperture, or placing a screen before the same every evening, within one hour after sunset, so as effectually to prevent the light from showing through the doorway, window, or aperture next or upon such street, lane or passage.

Every person who shall, within the distance of one hundred yards from any dwelling-house, burn any rags, bones, cork, or other offensive substance (garden refuse excepted) to the annoyance of any inhabitant.

Every person who shall carry goods or any frame to the annoyance of any person upon any public footway.

Every person who shall be the keeper of or have any dog or other animal which shall attack or endanger the life or limb of any person in any street, or other public place within the said Borough.

Noisome or offensive trades.

No noisome or offensive trades to be carried on to injury of any inhabitants.

89. No person shall carry on any noisome or offensive trade or calling within the said Borough so as to injure or be a nuisance as hereinafter stated to any of the inhabitants thereof; and the business of a soap-boiler, tallow-melter, boiler-down, glue-maker, blacksmith, tanner, currier, or cowkeeper, or any other business, manufacture, trade, calling, or operation, in the conducting, following, or carrying on of which, or in connection wherewith, or from the premises where the same is conducted, followed, or carried on, any gas, vapour, effluvia, liquid, or any large quantities of smoke shall be evolved or discharged, which gas, vapour, effluvia, liquid, or smoke, shall be calculated to injure animal or vegetable life, or in any other way to injure or be a nuisance to any of the inhabitants of the said Borough, shall be considered a "noisome and offensive trade or calling" within the meaning of these By-laws. And if the Council or Mayor shall, after such inquiry as may be necessary, be of opinion that any manufacture, trade, calling, so being conducted, followed, or carried on as aforesaid, is a "noisome or offensive trade or calling" within the meaning of these By-laws, it shall be lawful for the said Council or Mayor to give to the person or persons conducting, following, or carrying on such trade or calling, notice to cease and discontinue the same in such reasonable time, not being less than twenty days nor more than sixty days, as the said Council or Mayor may direct, or so to conduct, follow, or carry on his, her, or their manufacture, trade, calling, or operation, as that in such reasonable time as aforesaid the same shall wholly and permanently cease to be noisome and offensive within the meaning of these By-laws to any resident within the said Borough; and if such manufacture, trade, calling, or operation, shall not be discontinued or shall not be so conducted as that it shall wholly cease to be noisome and offensive, by the end of the time named in such notice as aforesaid, any person thereafter conducting, following, or carrying on such manufacture, trade, calling, or operation as aforesaid, shall for the first offence forfeit and pay a sum of not less than forty shillings, nor more than five pounds; for a second offence, a sum of not less than five pounds nor more than twenty-five pounds; and for a third and every subsequent offence, a sum of not less than ten pounds nor more than fifty pounds,

Mode of proceeding when "noisome or offensive trade" is about to be commenced—Penalty.

90. The like proceedings, as in the last By-law, may be taken whenever any manufacture, trade, calling, or operation is about to be commenced or entered upon which is likely to prove "noisome and offensive" within the meaning of these By-laws, and notice may be given to the person or persons about to commence or enter upon such manufacture, trade, calling, or operation, and shall require him, her, or them, not to commence or enter upon the same; and any person who shall, after such notice, commence, enter upon, or continue any such manufacture, trade, calling, or operation, so that the same shall be in any way "noisome or offensive" within the meaning of these By-laws, shall for every such offence forfeit and pay a sum of not less than ten pounds nor more than fifty pounds.

Service of notice—Liabilities.

91. Service of any such notice as aforesaid upon the occupier or owner of any premises or land wherein or whereon such manufacture, trade, calling, or operation is being conducted, followed, or carried on, or is about to be commenced or entered upon, or at the last known place of abode of such occupier or owner, or upon any person on the said premises or land, shall be a good and sufficient service of such notice for all the purposes of these By-laws. And every person who shall be actually engaged in superintending, directing, or managing, or who shall be in any other way actually engaged or employed in any such manufacture, trade, calling, or operation as aforesaid, or on any premises where the same is about to be established, shall be liable to be regarded and treated as a person conducting, following, or carrying on such manufacture, trade, calling, or operation, within the meaning and for all the purposes of these By-laws.

Closets, Stables, &c.

Privies or closets to be provided for every building.

92. Every building already built or hereafter to be built shall be provided with sufficient privy or closet accommodation for the sole use of the occupants of such building, and no closet or privy shall be built except in such place as shall be approved in each case by the Inspector of Nuisances.

Insufficient privy accommodation.

93. If the Inspector of Nuisances shall be of opinion that there is not sufficient privy or closet accommodation to meet the requirements of the occupants of any building or premises or of the persons employed therein, he shall cause a notice to such effect to be served upon the owner or occupier of such building or premises, together with full particulars of the extra accommodation in his opinion necessary; and if any such owner or occupier shall not within thirty days from the service of such notice cause the accommodation therein specified to be provided he or she shall, for every day after the said time during which such building or premises shall remain occupied or such person be employed therein, be liable to a penalty of a sum not exceeding twenty pounds and not less than two pounds; and in all cases the onus of proving that such building or premises are not occupied or that such persons are not employed therein shall be upon the said owner or occupier.

Closets, stables, &c., not built in conformity with this Act or being a nuisance to be altered or removed.

94. If any stable cow-shed or other out house or any closet privy and cesspit is or shall be in the opinion of the Council or Mayor and the Inspector of Nuisances a nuisance from its too close proximity to any adjoining premises or from any other cause or is not kept in repair and clean, the Council or Mayor may by notice in writing given to the owner or occupier order the same to be taken down, altered, repaired, or cleaned as the case may require; and if any such order be not obeyed within seven days from the service of such notice the Council or Mayor may without any further notice cause the same to be pulled down, destroyed, altered, repaired or cleaned and shall be entitled to recover all expenses that may be incurred from the owner in a summary way at the suit of the Council.

Stables to be erected only on site chosen by officer.

95. No stable cow-shed or other out-house shall be erected except upon a site approved of by the Inspector of Nuisances and every stable cow-shed or other out-house already built or hereafter to be built shall be drained, paved, ventilated, and provided with a properly constructed pit for the receipt of manure and drainage therefrom to the satisfaction of the Council and Inspector of Nuisances.

Power of entry for inspection, &c.

96. The Mayor, Surveyor, Health Officer, Inspector of Nuisances or any person authorized by them or either of them shall be entitled at any time between the hours of nine a.m. and five p.m. to enter upon any premises for the purpose of inspecting any portion of the said premises in the Borough or for the better carrying into effect these By-laws.

Alignment, Streets, Encroachments, New Buildings, &c.

Powers under section 123 delegated to Council Clerk.

97. The Council by this By-law hereby delegates to the Council Clerk for the time being, all the powers and obligations vested in the Council by virtue of the 123th section of the "Municipalities Act of 1867."

Public Health.

Houses to be purified on certificate of two medical practitioners.

98. If, upon the certificate of any two duly qualified medical practitioners, it appear to the Council or Mayor thereof, that any house, or part thereof, or the premises occupied in connection therewith, within the limits of the said Borough, is in such a filthy or unwholesome condition that the health of any person is or may be liable to be affected or endangered thereby, and that the whitewashing, cleansing, purifying, or fumigating of any house or part thereof, or the premises occupied in connection therewith would tend to prevent or check infectious or contagious disease, the said Council or Mayor shall give notice, in writing, to the owner or occupier of such house or part thereof or the premises occupied in connection therewith, to whitewash, cleanse, purify, or fumigate the same, as the case may require; and if the person to whom notice is so given shall fail to comply therewith within the time specified in the said notice, he or she shall be liable to a penalty not exceeding ten shillings for every day during which he or she continues to make default: Provided that no such penalties shall collectively amount to any greater sum than fifty pounds.

Sale or letting of infected premises or goods.

99. If any person shall sell, let, or cause to be sold or let any dwelling house or part thereof or premises occupied in connection therewith in the said Borough which then is or shall have been within thirty days prior to the date of such sale or letting occupied by any person suffering from any infectious or contagious disease, without giving due notice thereof to the person or persons purchasing, renting, or hiring any such house or premises, the person so selling, letting, or causing to be sold or let, shall be liable to a penalty not exceeding fifty pounds nor less than ten pounds. And any person who shall sell, let, or cause to be sold or let, in the said Borough any article of furniture, bedding, household, or personal effects, knowing the same to have been within three months prior to the date of such sale or letting, used by any person or persons suffering from any infectious or contagious disease, shall forfeit and pay a sum not exceeding fifty pounds nor less than ten pounds.

Exposing infected articles.

100. Any person who shall expose or cause to be exposed in any road, street, public place, or unenclosed land adjacent to any dwelling, road, street, or public place, any article whatsoever, knowing the same to have been in the use or occupation of any person suffering from any infectious or contagious disease within thirty days prior to the date of such exposure as aforesaid, shall forfeit and pay a sum not exceeding fifty pounds nor less than ten pounds.

Sewerage and Drainage.

No private sewers to be made to communicate with the public sewer without notice.

101. It shall not be lawful for any person, without permission from the Council, or otherwise than according to such plans and directions as such Council may make and give, to make or branch any private drain or sewer into any of the public drains or sewers, or into any drain or sewer communicating therewith; and in case any person or persons shall make or branch any private drain or sewer communicating or to communicate therewith without such permission, or otherwise than as aforesaid, every person so offending shall for every such offence forfeit and pay any sum not exceeding fifty pounds nor less than forty shillings, and shall, at his own expense, make good all roads, streets, kerbing, &c., which shall have been injured by or through any such work; and all such repairs shall be performed to the satisfaction of such officer as the Council shall appoint to superintend such work; and any person who shall do or perform anything contrary to this clause or shall neglect to make good all such damage as aforesaid, shall on conviction thereof forfeit and pay any sum not exceeding fifty pounds nor less than one pound.

Proprietors of private sewers, &c., to repair and cleanse same.

102. All drains or sewers communicating with any public drain or sewer shall from time to time be repaired and cleansed by the occupiers of the houses, buildings, lands, and premises to which the said private sewers or drains shall respectively belong; and in case any person shall neglect to repair and cleanse or cause any such private drain or sewer to be repaired and cleansed according to the direction of the said Council, he shall forfeit and pay for every such offence a sum not exceeding five pounds nor less than ten shillings.

Water from roofs, &c.

103. Every owner or occupier of any dwelling-house, shop, or other building who shall permit rainwater to fall down from any roof, spout, balcony, or other projection, upon or over any street, road, lane, or footway, or shall cause or permit any such roof or rainwater to be discharged by any pipe upon any such street, road, lane, or footway, shall, if such nuisance be not abated within seven days after written notice to abate the same shall have been given by the Council or its officer, forfeit and pay for every such offence a sum not exceeding five pounds nor less than one pound. Provided that any tenant of such premises who shall erect any spouting or pipe in accordance with any such notice may deduct the cost thereof from the rent of the said premises.

Drains in footpaths and slopes, &c.

104. No surface-drain shall be made in any footpath, nor any pipes laid under or across the same without the authority of the Council, and no such pipe or drain shall be used for the discharge into any street or roadway of any offensive liquid or matter of any kind whatsoever; and any person who shall so offend, or shall permit or suffer any slops or filth from his or her premises to flow over or on any footway or street, shall forfeit and pay any sum not exceeding twenty pounds nor less than one pound.

Drains for discharge of surface water from land.

105. Every owner or occupier of land so situated that surface or storm water from or upon the same shall overflow or shall tend naturally, if not otherwise discharged, to overflow any road, lane, or footway, shall, within fourteen days next after the service upon him of notice in writing by the Council or its officer, abate such nuisance; and in default of compliance with any such notice within the period aforesaid, such owner or occupier shall forfeit any sum not exceeding five pounds; and if within fourteen days after such conviction such owner or occupier shall still have failed to comply with such notice or be otherwise in default as aforesaid, he shall forfeit and pay any sum not less than one pound nor more than ten pounds, and for every further such offence he shall forfeit and pay any sum not less than two pounds nor more than twenty pounds: And every such owner or occupier who shall still have made default as aforesaid for more than fourteen days after such second or any further conviction shall be held guilty of a further offence within the meaning of this By-law.

Natural water-courses.

106. Any person who shall close or intercept any natural watercourse, by building or otherwise, shall provide another outlet for the surface-water with pipes or sewers of a size, and in a manner to be approved of by the Council, and any person closing or intercepting any such watercourse and failing to comply with the provisions of this By-law, shall forfeit and pay a sum not exceeding fifty pounds nor less than five pounds.

*Preventing and Extinguishing Fires.**Fire or combustible materials, &c.*

107. Every person who shall place or light, or knowingly permit to be placed or lit, in any house, yard, workshop, out-offices, or other premises, fire, gunpowder, or combustible or inflammable article of any kind, in such a manner as to endanger contiguous buildings, fences, or erections, shall on conviction for every offence forfeit and pay a penalty of not more than twenty pounds nor less than one pound; and shall forthwith remove or extinguish such fire, gunpowder, or combustible or inflammable article; and any person allowing such fire, gunpowder, or combustible or inflammable article to remain as aforesaid for twenty-four hours after any such conviction shall be deemed guilty of a further offence against this By-law.

Inflammable fences, &c.

108. Every person who shall erect any fence of brushwood, bushes, or other similar inflammable material, or shall make or place any stack of hay, corn, straw, or other produce, or place as or for the covering of any such stack, any inflammable material, or shall place, keep, or store any hay, straw, or other inflammable material in any building, so as to endanger contiguous buildings or properties, or any trees, shrubs, or other produce of such properties, or any chattels in or upon such buildings or properties, shall forfeit on conviction for every such offence a penalty of not more than five pounds, nor less than one pound, and also shall remove such fence, stack, covering, or inflammable material within forty-eight hours after such conviction; and any person failing to remove such fence, stack, covering, or inflammable material within forty-eight hours after any such conviction as aforesaid shall be deemed guilty of a further offence against this By-law.

Fires in yards.

109. Any person having or lighting any open or other fire in any yard or premises so close to the neighbouring premises as to be a nuisance or dangerous thereto shall be liable to a penalty of not less than twenty shillings nor more than twenty pounds.

Burning shavings, &c., in streets.

110. Any person burning any shavings, or other matters or things, in any street, road, or public place, shall forfeit and pay a sum not exceeding forty shillings nor less than five shillings.

Fireworks.

111. Every person who shall light any bon-fire open fire, tar barrel, or fire-work upon or within sixty feet of any building, public or private street, or any public place, or shall sell gunpowder, fireworks, or other combustible matter by any artificial light other than gas, shall forfeit a sum not exceeding five pounds nor less than five shillings.

Wilfully setting fire to chimneys.

112. Every person who wilfully sets or causes to be set on fire any chimney, flue, smoke-vent, or stove-pipe, herein called in common a "chimney," or if the chimney of any building or premises shall take fire by reason of the occupants having neglected to cause such chimney to be sufficiently swept or cleansed or from any other neglect of such occupant, then such person or occupant shall forfeit a sum not exceeding five pounds; and in every case the proof that such chimney did not take fire through the neglect of such occupant shall rest upon such occupant.

Manufacture of substances liable to sudden explosion.

113. It shall not be lawful for any person to establish or to carry on either in any building or vault or in the open air any business for the manufacture of gunpowder or detonating substances or of matches ignitable by friction or otherwise or other substances liable to sudden explosion, under a penalty not exceeding twenty pounds.

Manufacture of inflammable substances. Penalty.

114. It shall not be lawful for any person to establish or to carry on either in any building or vault or in the open air at a less distance than forty feet from any public way or than fifty feet from any other building or any vacant land belonging to any other person than the landlord any business for the manufacture of vitriol, or turpentine, or naphtha, or varnish, or fireworks, or oil, or oil-cloth, or other things dangerous on account of the liability of materials or substances employed therein to cause sudden fire or explosion; and if any person shall establish or carry on any such business contrary to this By-law he shall be liable, for every day during which such business shall be so carried on, to a penalty of a sum not exceeding twenty pounds nor less than ten pounds.

Subsidy reserves to Fire Brigades.

115. For the purpose of protecting life and property in the Borough, the Council may from time to time pay to the funds of any Fire Brigade established in the Borough, or to any other Brigade or person or persons as may assist in extinguishing any fire, such sum or sums of money as shall be determined by resolution of the Council. And further, the Council shall pay to any Fire Brigades as shall, with an engine, have first and second in order attended at any fire within the Borough, such sums of money by way of reward as the Council may, by similar resolutions have fixed, but no such rewards shall be paid for attendance at bush fires, unless the safety of buildings shall have been thereby endangered.

Appointment of Inspector.

116. For the better carrying out of the By-laws relating to the preventing and extinguishing of fires, the Council may appoint an Inspector of Fires, and shall if necessary, pay to such Inspector a salary.

Inspector's duties.

117. It shall be the duty of such Inspector to attend all fires, maintain order thereat, inspect and report upon the appliances of any Fire Brigade established in the Borough, and generally see to the proper carrying out of the By-laws relating to fires; and the Inspector shall have full power without any other authority than this By-law to enter and go upon any premises within the Borough to extinguish fire, and for the purpose of carrying into effect these By-laws, and any person hindering or molesting such Inspector in the discharge of his duties shall forfeit and pay a sum of not less than one pound or more than twenty pounds.

*Public Amusements.**Unlawful games.*

118. No games with dice or other games of chance for money, prize-fighting, or any dog-fighting, cock-fighting, or other exhibition or entertainment opposed to public morality, or involving cruelty to animals or likely to cause a breach of the peace, shall be established, held, or given within this Borough, and any person or persons who shall establish, hold, give, or cause to be established, held, or given, or be present at or concerned in any such game, exhibition, or entertainment shall for every such offence forfeit and pay a sum of not less than five pounds or more than fifty pounds.

Places of amusement to be licensed.

119. No dancing saloon, bowling, or skittle alley, shooting gallery, public billiard or bagatelle table, or similar place of amusement (other than entertainments requiring to be licensed by law) shall exist or be established within the Borough, unless and until such place of amusement shall have been licensed by the Council as hereinafter provided, and in the event of any such licensed place of amusement being improperly conducted or becoming a nuisance, or an annoyance to any inhabitant, or violating public decency, or endangering the public peace, the Mayor shall on representation to that effect being made forthwith suspend the said license, and the Council at its next meeting shall by resolution cause the said license to be cancelled or otherwise as may appear necessary or desirable, and any person or persons having already established such places of amusement, who shall not within thirty days after these By-laws come into force, apply for such license, or any person or persons who shall open, establish, or maintain any such place of amusement as aforesaid without having obtained such license, shall forfeit and pay a sum of not less than ten pounds and not more than fifty pounds.

Mode of granting licenses.

120. Applications for licenses as aforesaid must be in writing addressed to the Mayor and Aldermen, and must be endorsed by two responsible householders, testifying to the respectability of the applicant. The application must describe clearly the nature of the entertainment for which the license is sought, and the premises in which it is to be held.

License fees.

121. Licenses shall be granted by resolution of the Council upon payment of license fees as follows:—For every license granted between the 1st January and 1st July, one pound one shilling, and between the 1st July and 31st December, ten shillings and sixpence. All licenses shall expire on the 31st December in each year, and may be renewed by resolution of the Council upon written application, and on payment of the annual fee of one pound one shilling.

Water Supply.

Polluting water, reservoirs, &c.

122. Whosoever shall bathe in any stream, reservoir, conduit, aqueduct, or other waterworks belonging to or under the management or control of the Council, or shall wash, cleanse, throw, or cause to enter therein any animal, whether alive or dead, or any rubbish, filth, or thing of any kind whatsoever, or shall cause or permit to suffer to run, or to be brought therein, the water of any closet, sink, sewer, drain, engine or boiler, or other filth, unwholesome, or improper liquid, or shall wash any clothes, in or at any such stream, reservoir, conduit, aqueduct, or other waterworks as aforesaid, or shall do anything whatsoever whereby any water or waterworks belonging to the said Council or under their management or control, shall be fouled, obstructed, or damaged, shall for the first offence forfeit and pay any sum not exceeding five pounds; for a second offence, any sum not less than one pound nor more than ten pounds; and for a third and every subsequent offence, any sum not less than five pounds nor more than twenty pounds.

Wilful waste of water.

123. Whosoever, being supplied with water by the Council, from any waterworks, fountain, pump, well, tank, or reservoir, or of belonging to, or under the control or management of the said Council, or having access to any such waterworks, fountain, pump, well, tank, or reservoir, for the taking of water therefrom, shall wilfully or negligently suffer any water to run to waste from any pipe, pump, or conduit, from or by which he shall be so supplied, or to which he shall have such access, shall forfeit and pay for the first offence any sum not exceeding five pounds; for a second offence any sum not less than one pound nor more than twenty pounds; and for a third and every subsequent offence any sum not less than five pounds nor more than twenty pounds.

Damming up water without consent.

124. Whosoever shall, without the consent in writing of the Council, construct or place any dam or embankment in or across any river, creek, or natural water-course, shall forfeit and pay any sum not less than one pound nor more than twenty pounds, and shall remove such dam or embankment within a reasonable time after such conviction, or shall forfeit and pay any sum not less than five pounds nor more than fifty pounds; and if after such second conviction, such person shall fail to remove such dam or embankment within a further reasonable time, he shall forfeit and pay a sum of not less than twenty pounds nor more than fifty pounds; and if within a reasonable time, after a third or any further conviction, he shall fail to remove such dam or embankment, he shall for every such offence forfeit and pay a sum of fifty pounds.

223—B

Diverting water from reservoirs of Council in certain cases.

125. In any case in which the Council shall have the exclusive right of collecting for the supply of any reservoir or waterworks belonging to the said Council or under their management or control, the storm-water on any gathering ground, whosoever shall by any means whatsoever divert any such water from the course of its natural flow, so that the same shall tend to flow elsewhere than to such reservoir or waterworks or some watercourse leading thereto, or to flow to the same respectively in a foul state, shall forfeit and pay for the first offence any sum not less than one pound nor more than twenty pounds; for a second offence, any sum not less than two pounds nor more than forty pounds; and for a third and every subsequent offence, any sum not less than five pounds nor more than fifty pounds.

Supply of water in time of drought.

126. In time of drought or scarcity of water, the Council may, by resolution to that effect, cause water to be supplied to the inhabitants of this Borough by water-carts or otherwise, and shall, by such resolution as aforesaid, fix a price to be charged for water so supplied.

Public Jetties, &c.

Vessels not to make fast to jetties except to load or unload.

127. No ship, steamer, punt, or vessel of any kind, shall be allowed to be made fast to the Double Bay, Darling Point, or Rose Bay jetties or any other jetty or wharf under the control of the Council, by any lines, warps, or chains, or lie alongside thereof, except for the purposes of loading or unloading. Any person who in any way shall make fast or cause to be made fast, any vessel to the said jetties or any of them otherwise than for the purposes herein provided, shall for every such offence forfeit any sum not exceeding ten pounds.

Notice to be given to Council before goods placed on jetties.

128. No person shall place any goods or matter on any of the said jetties or wharves without first informing the Council Clerk or other officer of the Council in charge of such jetties of such intended placing of such goods. Any person committing a breach of this section shall for every such offence forfeit and pay any sum not exceeding ten pounds.

Jetty dues.

129. The master of every ship, steamer, punt, or vessel, which shall lie or be moored or laid at or alongside any of the said jetties or wharves for the purpose of loading or unloading goods, or which shall load or unload goods from or upon the said jetty or wharf, by means of lighters or otherwise, or for the loading or unloading of which the said jetty or wharf shall be in any way used, shall pay dues according to the scale set out in Schedule B, and the Council shall be entitled to demand and receive the tolls and dues set out in the said schedule from all persons using the said jetties or wharves or any other jetty or wharf under the control of the Council or any part thereof.

Master.

130. Every person who shall act or shall assume to act, as the master of any ship, steamer, punt, or vessel, or shall be apparently in charge thereof, shall for all the purposes of this "Part" of these By-laws be deemed and taken to be such master.

Drays only to remain on jetty while loading or unloading.

131. No dray, cart, or other vehicle shall be allowed to remain on the jetties or any of them, or on any jetty or wharf under the control of the Council longer than the time actually occupied in loading and unloading the same, and no such vehicle shall at any time be left upon any of the said jetties or wharves or entrance thereto, unless in charge of a person competent to manage the same. Any breach of this By-law shall be punishable by a penalty not exceeding ten pounds.

Goods not to remain on jetty.

132. No goods, merchandise, produce, live stock, or property of any kind shall be allowed on any of the said jetties or wharves for any longer time than may be necessary for ship or cart away the same, and shall only be deposited for such immediate removal upon such part of the jetty or wharf as shall be indicated by the Council or its officer. And any person allowing any such property so to remain in breach hereof, or shall otherwise break this By-law, shall be liable to a penalty not exceeding twenty pounds.

Chains, &c., not to remain on jetty.

133. No buoys, chains, anchors, ropes, gear, or boats shall be allowed to remain on any jetty or wharf except such as may be in immediate use. And any person committing a breach of this By-law shall be liable to a penalty not exceeding twenty pounds.

May be extended to any jetties, &c.

134. The provisions of these By-laws may, by resolution of the Council, be extended to any jetty or wharf now or hereafter to be under the control of the Council.

SCHEDULE B.

Charges on Double Bay, Darling Point, and Rose Bay jetties, and any other jetties now or hereafter under the control of the Council:—

	£	s.	d.
Bricks, tiles, and slates, per 1,000	0	2	6
Sawn timber and timber in logs, per 1,000	0	2	0
Laths and shingles, per 1,000	0	0	3
Hay, per ton	0	1	6
Coal, per ton	0	1	0
Firewood, per ton	0	1	0
Potatoes or other vegetables, per bushel or less quantity	0	1	0
Lime, charcoal, or ashes, per bushel or less quantity	0	0	1
Posts and rails, per 100	0	1	0
Palings, per 100	0	0	3
Blue metal, ballast, stone, or earth, per ton	0	1	0
All unmentioned articles, per ton	0	1	0

Recreation Grounds.

135. Parks or places of a like nature for the purpose of public recreation may be established by the Council either within the boundaries of the said Borough or in any public reserve adjacent thereto, which, or the use of which, may be granted to the Council for the purpose of public recreation, upon such terms as the Council shall by resolution approve; and the Council may make rules and regulations for the management and maintenance of such places of recreation, and any person breaking any of such rules and regulations shall be liable to a penalty not exceeding twenty pounds nor less than one pound.

Cricket, &c., only to be played by permission.

136. No person shall be permitted to play cricket, football, baseball, or any game in any public reserve or park in this Borough, except by and with the written consent of the Mayor or Council, and any person offending against this By-law shall be liable to a penalty not exceeding ten pounds.

Trees in Streets.

137. The Council shall have power to plant trees, shrubs, and plants in the streets, reserves, and public ways of this Borough, and any person wilfully injuring or destroying any of such trees or any railing, fence, or thing protecting the same, shall on conviction forfeit and pay a penalty of not more than ten pounds nor less than two pounds, in addition to the value of the trees, railing, fence, or thing so injured.

Penalties where no special penalty mentioned and for obstructing enforcement of By-laws.

138. Every person committing a breach of any of these By-laws, shall, where no penalty is mentioned for such offence, be liable to a penalty of a sum not exceeding twenty pounds. And any person obstructing any person in the discharge of any duty imposed, or in the exercise of any privilege conferred by any of these By-laws, shall be liable to a penalty of a sum not exceeding twenty pounds.

Passed by the Municipal Council of the Borough of Woollahra this twenty-third day of September, one thousand eight hundred and seventy-nine.

(L.S.) W. J. TRICKETT,
Mayor of Woollahra.

1879-80.

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF NORTH WILLOUGHBY—ADDITIONAL BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 30th December, 1879.

BOROUGH OF NORTH WILLOUGHBY.

ADDITIONAL BY-LAWS.

THE following additional By-laws, made by the Council of the Borough of North Willoughby, for the protection of public buildings, works, reserves, boundary marks, &c., and for the better control and management of the reserves, roads, &c., within the Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the "Municipalities Act of 1867."

HENRY PARKES.

BOROUGH OF NORTH WILLOUGHBY—BY-LAWS.

ADDITIONAL By-laws made by the Council of the Borough of North Willoughby, for the protection of public buildings, works, reserves, boundary marks, &c., and for the better control and management of the reserves, roads, &c., in the Borough.

Protection of public buildings, works, &c.

1. Any person who shall damage any public building, wall, parapet, fence, bridge, culvert, sewer, well, watercourse, pump, gate, or other public property within the Borough, shall pay the cost of repairing the same, and if the damage be wilfully done shall forfeit and pay not less than one pound and not exceeding twenty pounds.

Damaging, trees, shrubs, &c.

2. Any person who shall wilfully or without authority of the Council, cut, break, bark, or root up, or otherwise damage, destroy, or remove any tree, sapling, shrub, flower, hedge, or underwood, growing in or upon any reserve or enclosed place, road, or path, under the management of the Council, shall forfeit and pay not less than five shillings and not exceeding five pounds.

Not to cross fences of reserves.

3. Any person who shall cross or pass, or attempt to cross or pass, any fence, or hedge on or enclosing the reserves, or any of them, otherwise than by the gates or other openings intended for passage, shall forfeit and pay not less than five shillings and not exceeding two pounds.

Animals not to be put in the reserves.

4. Every person who shall wilfully let in, or knowingly suffer to enter upon the enclosed reserves or public recreation grounds any animals without due authority shall be deemed guilty of wilful trespass, and shall be liable for every such offence to a penalty of not less than two pounds and not exceeding twenty pounds.

Damaging or pulling up alignment marks or posts, &c.

5. Any person pulling down, or pulling up, destroying or injuring any alignment or other boundary marks, or stones, notice boards, public notices, or other erection on any reserve, public place, or road, without the authority of the Council, shall forfeit and pay any amount not less than one pound and not exceeding ten pounds.

Stop roads for repairs.

6. The Committee for Works may at any time cause the traffic on any roadway or portion of roadway to be stopped for the purpose of repairing the same, or for any other necessary purpose, and any person or persons wilfully travelling thereon, or removing or destroying any obstruction that may have been placed thereon for the purpose of suspending or diverting the traffic, shall forfeit and pay any sum not less than five shillings and not exceeding five pounds.

Unwholesome or offensive liquid not to flow over paths.

7. No person or persons shall allow any liquid which is unwholesome or offensive to flow from premises over any footpath to the water tables in the streets; any person offending against this By-law shall be liable to a penalty of not less than ten shillings and not exceeding ten pounds.

No culvert, bridge, crossing, &c., to be put across any water-table, without the consent of the Council.

8. No culvert, bridge, crossing, or drain, shall be constructed or commenced across any water-table, water-course, or footpath in this Borough until the consent of the Council has been obtained; and any person offending against this By-law shall forfeit and pay any sum not less than one pound and not exceeding five pounds.

Council may accept the minimum fine without instituting legal proceedings.

9. In all cases where, by any By-laws of this Borough, a minimum fine shall be stated for any offence, the Council may, before instituting legal proceedings, give notice of such intention to the person chargeable with such offence, and if such person shall pay to the Council Clerk or other officer on behalf of the Council, within twenty-four hours after receiving such notice, the minimum fine named in the said By-law, the Council may accept the same, and may refrain from taking further proceedings in respect of such offence.

Passed by the Borough Council of North Willoughby, on the 20th day of September, 1879.

(L.S.)
JAMES ANDERSON,
Council Clerk.

RICHARD SELDON,
Mayor.

MUNICIPALITIES.

(BOROUGH OF PADDINGTON—AMENDED BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 6th May, 1880.

BOROUGH OF PADDINGTON.

AMENDED BY-LAWS.

THE following Amended By-laws, made by the Council of the Borough of Paddington, for regulating their own proceedings and the duties of their officers and servants; for determining the times and modes of collecting and enforcing payment of rates; for the care and management of streets; for regulating the blasting of rock; for regulating the use of public pumps; for the suppression of nuisances and the preservation of decency; for the suppression of houses of ill-fame, and generally for maintaining the good rule and government of the Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

PART I.

By-laws repealed.

1. The By-laws of the said Council of the Borough of Paddington, dated 14th June, 1870, and published in the Government Gazette of the 10th August, 1870, No. 188, are hereby repealed.

*Meetings of Council.**Ordinary Meetings.*

2. Unless otherwise ordered, the Council shall meet for the dispatch of business at the hour of half-past seven p.m., on every fourth Tuesday, unless such day shall happen to be a public holiday, in the latter case the meeting shall be held on such other day as the Mayor shall appoint.

Election of Chairman in the absence of the Mayor.—Adjournment for want of quorum.

3. If at any meeting of the Council the Mayor be absent at the expiration of fifteen minutes after the time appointed for holding such meeting, the Aldermen then present shall choose from among themselves a Chairman for such meeting. Whenever there shall be an adjournment of any such meeting for want of a quorum, the names of the members present shall be entered in the minute-book.

*Order of Business.**Course of procedure.*

4. The following shall be the order of business at all meetings of the Council, other than special meetings:—

- (1st.) The reading and confirmation of the minutes of previous meeting.
- (2nd.) The reading of correspondence.
- (3rd.) The presentation of Petitions.
- (4th.) Reports from Committees and minutes from the Mayor (if any) to be presented and ordered upon.

(5th.) Questions as to any matter under the jurisdiction or within the official cognizance of the Council to be put and replied to, and statements as to any facts, matters, or circumstances requiring attention by the Council or any of its Committees or officers to be made.

(6th.) Motions of which notice has been given.

(7th.) Orders of the day.

(8th.) The question for confirming the minutes of the previous meeting shall be put by the Mayor (or other Chairman) immediately upon their being read, and no discussion shall be allowed except upon the point of accuracy.

(9th.) Orders of the day shall comprise all business set down for the day by any previous meeting or necessarily arising out of the proceedings of a former meeting.

Business at Special Meetings.

5. At special meetings of the Council the business (after the minutes shall have been read and confirmed, which shall be done in the same manner as at an ordinary meeting) shall be taken in such order as the Mayor or Alderman at whose instance such special meeting shall have been called may have directed.

Business paper for Ordinary Meetings.

6. The business paper for every meeting of the Council other than a special meeting shall be made up by the Council Clerk not less than two days nor more than three days before the day appointed for such meeting. He shall enter on such business paper a copy or the substance of every notice of motion, and of every requisition or order as to business proposed to be transacted at such meeting, which he shall have received, or shall have been required or directed so to enter in due course of law and as hereinafter provided. Every such

entry shall be made (subject to the provisions of Section 4 of this part of the By-laws) in the same order as such notice, requisition, or direction shall have been received.

Business paper for Special Meeting.

7. The business paper for each special meeting shall contain only such matters as shall have been specially ordered to be entered thereon by the Mayor or Aldermen calling such meeting.

Summons to Members.

8. The summons to members of the Council for every meeting thereof shall be prepared from the business paper for such meeting, and shall embody the substance of such business paper and be served not less than twenty-four hours before the time for holding such meeting.

Notices of motion.

9. All notices of motion and all requisitions from Aldermen and directions from the Mayor as to the entry of any particular matter of business for the consideration of the Council at its then next or any future meeting shall be numbered by the Council Clerk as they are received, and each notice, requisition, and direction shall be preserved by such clerk until after the matter to which it relates shall have been disposed of, and the record in the minute-book of the manner in which such matter has been so disposed of shall have been duly verified as required by section 4 of this part of these By-laws. Provided, however, that the person giving or forwarding any such notice of motion, requisition, or direction to the Council Clerk, shall be at liberty to withdraw the same at any time before the making up of the business paper.

Withdrawal of motions and notices of motion.

10. After the business paper shall have been made up as aforesaid, all the said notices of motion, requisitions, and directions as to which entries have been made thereon shall be the property of the Council, and shall not be withdrawn, altered, or amended without leave having been first obtained from the Council for such withdrawal, alteration, or amendment.

Motions to be in writing.

11. No member shall make any motion (except when otherwise provided by the Act) but in pursuance of notice in writing delivered to the Council Clerk four days before the day of meeting for which such motion is intended with his signature thereto.

Order in which motions shall be moved.

12. Except by leave of the Council, motions shall be moved in the order in which they stand on the business paper, and if not so moved or postponed shall be struck from such business paper, and be considered to have lapsed.

Conditions under which motion shall be moved in the absence of Alderman giving notice, &c.

13. No motion of which notice shall have been entered on the business paper, shall, except as hereinafter provided, be proceeded with in the absence of the Aldermen by whom such notice shall have been given unless, by some other Alderman producing a written authority for that purpose from such first-named Alderman.

Motion to be seconded.

14. No motion in Council shall be discussed unless and until it be seconded.

Amendment may be moved.

15. When a motion in Council shall have been made and seconded, any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed unless and until it be seconded.

Subsequent amendments.

16. No second or subsequent amendment shall be taken into consideration until the previous amendment shall have been disposed of.

Amended motions.

17. If an amendment be carried the question as amended thereby, shall become itself the question before the Council, whereupon any further amendment upon such question may be moved.

Amendments negatived, &c.

18. If any amendment either upon an original question or upon any question as amended as aforesaid shall be negatived, then a further amendment may be moved to the question to which such first-mentioned amendment was moved, and so on, provided that not more than one question and one proposed amendment thereof shall be before the Council at any one time.

Motion for Adjournment.

19. No discussion shall be permitted upon any motion for adjournment of the Council, and if upon the question being put on any such motion the same be negatived, the subject then under consideration, or the next in order on the business paper or any other on such paper that may be allowed precedence shall be discussed before any subsequent motion for adjournment shall be receivable.

Call of the Council to rescind, &c.

20. No motion, the effect of which if carried would be to rescind or be repugnant to any resolution which has been passed by the Council, shall be entertained during the same municipal year unless a call of the whole Council be made for that purpose, and no such motion if negatived shall be again entertained during the same municipal year.

Petitions.

Alderman presenting Petition.

21. It shall be incumbent on every Alderman presenting a Petition to acquaint himself with the contents thereof, and to ascertain that it does not contain language disrespectful to the Council.

Council may deal with Petitions.

22. The Council may at any meeting resolve, without previous notice, that any petition be received, and that the same or any correspondence read be referred to a Committee for report, or that the request therein contained be granted.

Reports from Committees and Minutes from the Mayor.

Reports, &c., to be written on foolscap, &c.

23. All reports from Committees shall be written on foolscap paper with a margin of at least one-fourth of the width of such paper, and shall be signed by the Chairman of such Committee, or in his absence by some other member of the same.

Upon Report being adopted, &c.

24. Upon any report being submitted to the Council for adoption any Alderman may claim to have the items taken *seriatim*.

Order of Debate.

Member to stand when speaking.

25. Every member shall stand when speaking, and shall address the Chair.

Times of speaking, &c.

26. Except in Committee no member shall speak more than once upon the same question unless in explanation when misrepresented or misunderstood. Provided, however, that the mover of every motion shall be allowed the right of reply, and provided further that any member shall be allowed to speak once on every amendment as well as on the original motion, but the right of reply shall not extend to the mover of an amendment.

Time allowed for speaking upon Motion, &c.

27. No member shall speak upon any motion or amendment for a longer period than fifteen minutes unless by permission of the Council.

Member not to digress from the subject, &c.

28. No member shall digress from the subject under discussion, nor make personal reflections on members, nor impute motives.

Member using offensive expression.

29. When any member shall use any expression which the Mayor shall think capable of being applied offensively to any other member the member so offending shall be required by the Mayor or other Chairman to withdraw the expression, and to make a satisfactory apology to the Council.

Questions of Order.

30. When any question of order arises it shall be taken into consideration immediately, and upon a member rising to order he shall be heard, and the member who was speaking shall sit down until the question of order has been decided.

Member may require question to be read, &c.

31. Any member may require the question under discussion to be read for his information at any time during a debate, but not so as to interrupt any other member when speaking.

Adjournment of Debate.

32. A debate may be adjourned to a later hour of the day, or to another day specified, and the member upon whose motion the debate is adjourned shall be entitled to pre-audience on the resumption of the debate.

Questions of Order.

Mayor to preserve order.

33. The Mayor or other Chairman shall preserve order, and his ruling upon disputed points shall be final.

Member how out of order.

34. Every member of the Council who shall commit a breach of any section of this part of these By-laws, or who shall move or attempt to move any motion or amendment embodying any matter as to which the Council has no legal jurisdiction, or who shall in any other way raise or attempt to raise any question, or shall address or attempt to address the Council upon any subject which the said Council has no legal right to entertain or

discuss, or who shall use any other language which, according to the common usage of gentlemen, would be held disorderly, or who shall say or do anything calculated to bring the Council into contempt, shall be out of order.

Mayor to call to order.

35. The Mayor or Chairman may without the interposition of any other member of the Council call any Alderman to order whenever in the opinion of such Mayor or Chairman there shall be a necessity for so doing.

Member may call the attention of the Mayor to irregularities.

36. Every member of the Council shall have the right of calling the attention of the Mayor or Chairman to any motion, amendment, statement, argument, or observation, moved, used, or made by any other member, which such first-named member may consider out of order.

Aldermen dissatisfied with the decision of the Mayor

37. Any Alderman who is dissatisfied with the decision of the Mayor or Chairman on any such question of order or of practice, may by motion on notice respectfully worded invite the Council to lay down a different rule or principle for the determination of any similar question of order or of practice which may thereafter arise, any rule or principle thus laid down shall be binding upon all parties unless and until it be rescinded, but shall have no retro-active operation. Provided however, that nothing herein contained shall be held to bind any Mayor or Chairman to put any motion to the Council which in his opinion is contrary to law.

Mode of voting.

Mayor to put questions, &c., as often as necessary, &c.

38. The Mayor or Chairman shall put to the Council all questions on which it shall be necessary that a vote be taken, and shall declare the sense of such Council thereon, and he shall be at liberty to put any such question as often as may be necessary to enable him to form and declare his opinion of the majority.

Divisions.

39. It shall be competent for any member to divide the Council upon any question put from the Chair, whether in Council or in Committee of the whole Council, and upon such division, those who are on the affirmative side shall place themselves upon the Mayor's or other Chairman's right hand, and those who are on the negative shall place themselves on his left hand, and shall so remain until the names of all the members then present shall be taken down by the Clerk then officiating.

Divisions to be entered on minutes, &c.

40. All divisions of the Council shall be entered on the minutes of proceedings.

In divisions member to vote.

41. In divisions every member present shall be compelled to vote.

Protests.

Member may protest.

42. Every member of the Council (the Mayor included) may protest against any resolution or vote by the Council. Notice of the intention so to protest must, however, be given at the meeting when such resolution is passed, or such vote is arrived at, and the protest itself must be handed or sent to the Council Clerk not later than seven days after such notice. The Council Clerk shall enter such protest in the minute-book.

Committees.

Committee of the whole, &c.

43. In a committee of the whole Council the general rules of the Council shall be observed with the exception of the rule limiting the number of times of speaking, and that motions shall be seconded.

Chairman of Committees.

44. Every Committee of which the Mayor is not an elected member shall choose its own Chairman. The Chairman of every Committee shall be the convener thereof, and may direct the Council Clerk to call meetings whenever he shall think fit.

Report of Committee.

45. When the report of a Committee is presented to the Council, the question as to its reception may be moved and put at once, but it shall not be adopted or taken into consideration without notice of motion as hereinbefore provided.

Standing Committee.

46. There shall be four standing Committees, to be called respectively the By-laws Committee, the Finance Committee, the Improvement Committee, and the Committee for General Purposes. These Committees shall be re-appointed every year at the first meeting of the Council which shall be holden after the election of the Mayor, any vacancies occurring therein during the year shall be filled up by the Council.

Committee for General Purposes.

47. The Committee for General Purposes shall consist of the Chairmen of the three said first named Committees.

By-laws Committee.

48. The By-laws Committee shall prepare for the consideration of the Council drafts of all such By-laws as may be required for the good government of the Borough, they shall also watch over the administration of the By-laws, and of any statute of which the operation has been or may be extended to the Borough, and shall take such steps as may be necessary for the prevention or punishment of offences against such By-law or statutes, and for the preservation of public health, order, and decency.

Finance Committee.

Mayor to be Chairman of the Finance Committee.

49. The Mayor of the Borough shall be *ex-officio* Chairman of the Finance Committee.

Accounts how disposed of.

50. No accounts shall be disposed of by the Council until they have been examined and reported upon by the Finance Committee.

Payments to be authorised by vote of Council, &c.

51. No payment out of the funds of the Corporation shall be made but such as are authorised by a vote of the Council: Provided always that the Finance Committee may at its own discretion authorise disbursements for current expenses to any amount not exceeding five pounds in any one week; and provided further that in case of emergency the Mayor, with the assent of any two Aldermen, may authorise the expenditure of any sum not exceeding twenty-five pounds in all during a recess, but all such discretionary payments, whether by the Finance Committee or by the Mayor, shall be reported to the Council at its next meeting.

Drafts to be signed by the Mayor, &c.

52. All drafts upon the funds of the Borough shall be signed by the Mayor and one or more Alderman or Aldermen authorised from time to time by the Council, and countersigned by the Council Clerk.

Improvement Committee.

Committee to report upon probable cost, &c.

53. No public works involving a probable expenditure of more than twenty-five pounds shall be undertaken until the Improvement Committee has reported to the Council an estimate of the probable cost thereof.

Improvement Committee to examine accounts for works, &c.

54. All accounts against the Corporation relating to works shall be examined by the Improvement Committee. Such as are found to be correct shall be certified and passed to the Finance Committee.

Committee for General Purposes.

Matters for consideration of Committee for General Purposes, &c.

55. The Committee for General Purposes shall take cognizance of every matter, subject, or question within the jurisdiction of the Council not coming within the province of one or other of the before-mentioned Standing Committees, and shall from time to time inquire into and report upon any such subject, matter, or question as they may think necessary, or as they may be directed by resolution of the Council to inquire into and report upon.

Special Committees.

Special Committees may be appointed, &c.

56. Special Committees may consist of any number of members, and may be appointed for the performance of any duty which may be lawfully entrusted to a Committee, and for which in the opinion of the Council a Special Committee ought to be appointed; and no Standing Committee shall interfere with the performance of any duty which may for the time have been entrusted to any such Special Committee. The appointment of every such Special Committee shall be made by resolution of the Council, and it shall be incumbent on the mover of such resolution to embody therein a statement of the duties proposed to be entrusted to such Special Committee. The mover of any such resolution may name therein such members as in his opinion ought to constitute such Committee, or he may propose that such Committee consist of a certain number of members to be appointed by the Council.

Calls of the Council.

Call of the Council may be ordered by resolution of Council, &c.

57. A call of the Council may be ordered by any resolution of which due notice shall have been given for the consideration of any motion or matter of business before such Council.

Call of the Council shall be made without special order, &c.

58. There shall, without any special order to that effect, be a call of the Council for the consideration of every motion which may be made under section 37 of this part of these By-laws, and of every motion for the rescission of any resolution, order, or decision of such Council.

Call of the Council to be made alphabetically, and members to answer their names, &c.

59. The call shall be made immediately before the motion or business for which such call has been ordered, or is required to be made by the last preceding section, shall be moved or considered. Such call shall be made as follows:—The Council Clerk shall call the names of all the members in their alphabetical order; each member present shall answer to his name as so called, and if any members are absent a record shall be made of such absence; but if leave of absence to any such member shall have previously been granted, or if such an excuse in writing shall have been forwarded to the Mayor or Council Clerk as a majority of the Council then present shall consider satisfactory such absent member shall stand excused, and a record shall be made of such excuse, and of the reasons for the same.

Miscellaneous.

Adjournment for want of quorum, &c.

60. Whenever the Council is adjourned for want of a quorum, the names of the members then present, and the hour at which the adjournment takes place shall be entered on the minutes.

Custody of Seal, &c.

61. The common seal, all charter deeds, muniments, and records of the Corporation, shall be kept in the office of the said Corporation, in custody of the Mayor and Council Clerk, unless for any special purpose the Council shall order otherwise.

Seal not to be affixed without the authority of the Council, &c.

62. The common seal shall not be affixed to any document without the express authority of the Council; and every impression thereof shall be verified by the signatures of the Mayor and Council Clerk.

Documents, &c., not to be shown, &c.

63. No member or officer of the Council shall be at liberty to show, lay open, or expose any of the books, papers, or records, of the Council to any person other than an Alderman without leave first had from the Council, except as provided by the Municipalities Act of 1867.

Security from officers how accepted, &c.

64. In cases where security is required by the Municipalities Act of 1867, no securities shall be accepted otherwise than by a vote of the Council; and it shall not be competent for the Council to accept as security any of its members or officers.

Bonds—care of, &c.

65. All bonds given by officers or servants of the Council for the faithful performance of their duties, shall be deposited with the Attorney or the Bankers of the Corporation as the Council may order, and not be withdrawn unless by an order signed by the Mayor and one other Alderman.

Leave of absence, &c.

66. No leave of absence shall be granted to the Mayor or any Alderman otherwise than by a resolution of the Council adopted after due notice.

By-laws may be suspended, &c.

67. Any one or more of this part of these By-laws may be suspended *pro tempore* in case of emergency if a majority of the Council then present shall deem such suspension necessary.

PART II.

Collection and enforcement of Rates.

Due dates for rates—Defaulters, &c.

1. All rates levied or imposed by the Council under the provisions of section 164 of the Municipalities Act of 1867, and for the purposes mentioned in the said section shall be held to be due and payable at the Council Chambers within thirty days after service of notice: Provided half the amount due by any ratepayer together with all arrears of rates (if any), be paid within the said period of thirty days after notice the same shall be received as payment on account, and a further period of three months shall be allowed for payment of the residue: Provided further that if any person shall fail to make such payment within the thirty days aforesaid or on account as aforesaid, legal proceedings be forthwith taken for the recovery of the whole amount due from such person, that is to say for the recovery of the present year's rates, and of all arrears (if any), and where a payment on account as aforesaid shall have been made within the period allowed for such payment, and a further period of three months shall have elapsed without payment of the balance, legal proceedings be forthwith taken for the recovery of the same.

Payments to be made at the Council Chambers, &c.

2. All persons liable to pay any rates as aforesaid, shall pay the amount thereof within the time or times prescribed in the foregoing By-law into the office of the Council Clerk during office hours, that is to say, on Mondays between the hours of nine (9) a.m. and one (1) p.m., and on Wednesdays, Thursdays, and Fridays, between the hours of 2 p.m. and 6 p.m.

Council Clerk to furnish list of defaulters, &c.

3. It shall be the duty of the Council Clerk to furnish the Mayor with a list of the names of all persons whose rates are unpaid at the expiration of the times fixed for payment of the same as aforesaid.

Distress warrants to be issued, &c.

4. It shall be the duty of the Mayor to issue distress warrants against all such persons, and to cause such warrants to be enforced, or cause such defaulters to be sued for the amount of such rates in a court of competent jurisdiction.

Enforcement by distress.

Bailiff, how appointed.

5. The Bailiff shall be appointed by resolution of the said Council, and shall be at any time removable by a like resolution.

Bailiff to find sureties.

6. The Bailiff shall find two sureties to the satisfaction of the Mayor to the extent of fifty pounds each for the faithful performance of his duties.

Bailiff to make levies.

7. It shall be the duty of the Bailiff to make all levies by distress for the recovery of the rates in the manner hereinafter provided.

Levies, &c., to be made under warrant.

8. All levies and distresses shall be made under warrant in the form of Schedule A hereto under the hand of the Mayor.

Bailiff to sell goods, &c.

9. If the sum for which any such distress shall have been made shall not be paid with costs as hereinafter provided on or before the expiration of five days, the Bailiff shall sell the goods so distrained, or a sufficient portion thereof, by public auction, either on the premises or at such other place within the said Borough as the Bailiff may think proper to remove them to for such purpose, and shall pay over the surplus (if any) that may remain after deducting the amount of the sum distrained for and costs as hereinafter provided to the owner of the goods so sold on demand of such surplus by the owner.

Bailiff to make written inventory, &c.

10. At the time of making a distress the Bailiff shall make out a written inventory in the form of Schedule B hereto, which inventory shall be delivered to the occupant of the land or premises or the owner of the goods so distrained, or to some person on his or her behalf, resident at the place where the distress shall be made, and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress is made; and the Bailiff shall give a copy of the inventory to the ratepayer on demand at any time within one month after the making of such distress.

Bailiff to impound goods, &c.

11. The Bailiff in making a distress as aforesaid may impound or otherwise secure the goods or chattels so distrained, of what nature or kind soever, in such place or places or in such part of the land or premises chargeable with rates as shall be most fit and convenient for the purpose, and it shall be lawful for any person whomsoever after the expiration of five days hereinafter mentioned to come and go to and from such place or part of the said land or premises where such goods or chattels shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

Owner of goods distrained may appoint mode of sale.

12. The owner of any goods or chattels so distrained upon may, at his or her option, direct and specify the order in which they shall be successively sold, and the said goods or chattels shall in such case be put up for sale according to such direction.

Bailiff to hand proceeds to Council Clerk.

13. The Bailiff shall hand over to the Council Clerk all proceeds of every such distress within forty-eight hours after having received the same.

Payments to Bailiff.

14. There shall be payable to the Bailiff, for the use of the Council for every levy and distress made under these By-laws, the costs and charges hereto annexed, marked C.

SCHEDULE A.

Warrant of Distress.

I, _____, Mayor of the Borough of Paddington, do hereby authorize you, _____, the Bailiff of the said Borough, to distrain the goods and chattels in the dwelling-house or in and upon the land and premises of _____, situated at _____, for _____, being the amount of Municipal rates due to the said Borough to the day of _____, for the said dwelling-house (or land or premises, as the case may be), and to proceed thereon for the recovery of the rates according to law.—Dated this _____ day of _____, 18 _____.

Mayor.

SCHEDULE B.

Inventory.

I have this day, in virtue of the warrant under the hand of the Mayor of the Borough of Paddington, dated _____, distrained the following goods and chattels in the dwelling-house (or in upon the land and premises) of _____, situate at _____, within the said Borough, for _____, being the amount of rates due to the said Borough to the day of _____.—Dated this _____ day of _____, 18 _____.

Bailiff.

SCHEDULE C.

Fees to Bailiff.

	s.	d.
1st. For making every entry and inventory in the execution of warrant	5	0
2nd. If in possession more than five hours.....	5	0
3rd. For every other day and part of a day	5	0
And 5 per cent. on the net amount of sale.		

PART III.

Care and management of Streets.

Change of Street Levels.

1. Whenever it may be deemed necessary to alter the level of any street, road, or way, the Council shall cause a plan and section, showing the proposed cuttings and fillings to be exhibited at the Council Chamber for fourteen days, for the information and inspection of ratepayers, and shall notify by some newspaper circulating in the Borough that such plan is so open to inspection. At a subsequent meeting of the Council the said plan and section shall if adopted, be signed by the Mayor or Chairman and countersigned by the Council Clerk, and such plan so signed and countersigned shall be a record of the Council.

Persons not to open drain or remove soil, &c. without leave, &c.

2. Any person who shall form, dig, or open any drain or sewer, or remove or cause to be removed any turf, clay, sand, soil, gravel, stone, or other material, in or from any part of the carriage or foot way of any street or other public place within the said Borough without leave first had and obtained by a written order from the Mayor, or who shall wantonly break up or otherwise damage any such carriage or foot way, shall on conviction forfeit and pay for every such offence any sum not exceeding five pounds nor less than ten shillings.

Persons not to dig holes, &c.—Persons to enclose buildings and building material, &c.—Lights to be provided, &c.

3. Any person or persons who shall dig or make or cause to be dug or made any hole, or leave or cause to be left any hole adjoining or near to any street or public place within the said Borough for the purpose of making any vault or vaults, or the foundations of any house or other building or for any other purpose whatsoever, or shall erect or pull down any building, and shall not forthwith enclose the same and keep the same enclosed in a good and sufficient manner to the satisfaction of the Council of the said Borough, or who shall keep up or cause to be kept up and continued, any such enclosure for any time which shall be longer than shall be absolutely necessary in the opinion of the said Council, and shall not place lights upon each side of the said enclosure, and keep the same constantly burning from sunset to sunrise during the continuance of such enclosure shall forfeit and pay for every such refusal or neglect any sum not being less than forty shillings nor more than five pounds.

Persons not to leave dangerous openings exposed or obstructions on public ways, &c.

4. Every owner or occupier of any house, building, premises, or land within the said Borough having any entrance, area, garden, or other open space, or any vacant building lot, water-hole or excavated space adjoining the footway of any street or public place in such Borough shall protect and guard the same by good and sufficient rails, fences, or other enclosures so as to prevent danger to persons passing and repassing; and every

such owner or occupier of any such house, building, premises, or land having any steps adjoining the footway of any such street or public place, shall in like manner protect and guard the same by fences, rails, or other enclosures, so as to prevent the like danger to persons passing and repassing, and on failure thereof every such owner or occupier shall as often as he shall be convicted of such offence forfeit and pay any sum not being less than forty shillings nor more than five pounds; and every such owner or occupier as aforesaid who shall fail to erect such rails, fences, or other enclosures as aforesaid within fourteen days after any such conviction as aforesaid, shall be deemed guilty of a further offence against this By-law.

Improvement Committee may cause thoroughfares to be stopped, &c.

5. The Improvement Committee or any officer or person acting under the authority of such Committee, may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof to be stopped for the purpose of repairing the same or for any necessary purpose, and any person or persons offending against this By-law either by travelling on such street, lane, or thoroughfare, or by removing or destroying any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty of any sum not exceeding five pounds or less than one pound for every such offence.

Careless riding or driving.

6. Any person who shall ride or drive through or upon any street or public place within the said Borough, so negligently carelessly, or furiously that the safety of any other person shall or may be endangered shall on conviction forfeit and pay a sum not exceeding one pound nor less than five shillings.

Riding and driving round corners, &c.

7. Any person who shall ride or drive round the corner of any road, street, or lane, within the said Borough, at a faster pace than a walk, shall on conviction forfeit and pay any sum not exceeding ten shillings nor less than five shillings.

Rolling and driving on footways, &c.

8. Any person who shall run, roll, drive, draw, place, or cause, permit, or suffer to be run, rolled, driven, drawn, or placed upon any footway any waggon, omnibus, cart, dray, stage, bicycle, carriage, wheelbarrow, truck, cask, wheel, or vehicle of any kind, or shall lead, drive, ride, or place any horse, cattle, or other beast upon any footway shall forfeit and pay a penalty not exceeding five pounds nor less than one pound.

Placing obstructions on footways, &c.

9. If any person shall set or cause or permit to be set or placed any stall, show-board, sign-board, basket, or goods of any kind whatsoever, or shall hoop, place, wash, or cleanse, or shall cause to be hooped, placed, washed, or cleansed, any cask or vessel in or upon or over any road, footway, or public place within the said Borough, or shall set out, lay, or place, or shall cause or procure, permit or suffer to be set out, laid, or placed, any coach, cart, dray, barrow, truck, or other carriage upon any footway; or shall allow any vehicle, goods, or property to remain in or obstruct any road, street, lane, or way; or if any person shall set or place or cause to be set or placed in, upon, or over any of the said carriage or foot ways, any timber, stones, bricks, lime, or other materials or things for building whatsoever (unless the same shall be enclosed as hereinafter directed), or any other goods or things whatsoever, or shall hang out or expose, or shall cause or permit to be hung out or exposed, any meat or offal or other commodity or thing whatsoever from any house or premises, over any part of such footways or carriage ways, or over any area of any house or premises over or next to any such street, road, or public place,—in every such case every person so offending shall forfeit and pay a sum not exceeding forty shillings nor less than ten shillings.

PART IV.

Blasting rock.

Persons blasting rock to give notice, &c.

1. Any person who shall be desirous of blasting any rock within one hundred yards of any street or public place within the said Borough shall give notice in writing previously to the Council Clerk, who shall appoint a time when the same shall take place, and give such other directions as he may deem necessary for the public safety; and if any person shall blast or cause to be blasted any rock within the limits aforesaid without giving such notice, or shall not conform to the directions given to him by the said Council Clerk, he or she shall on conviction forfeit and pay for every such offence any sum not less than five pounds nor more than twenty pounds.

Careless use of gunpowder, &c.

2. Every person who shall place or knowingly permit to be placed in any house, yard, workshop, outoffices, or other premises, fire, gunpowder, or combustible, or other inflammable material of any kind, in such manner as to endanger contiguous buildings, shall on conviction of such offence forfeit and pay a

penalty of not more than five pounds nor less than one pound, and shall forthwith remove such fire, gunpowder, or combustible or inflammable material, and every such person who shall suffer any fire, gunpowder, or combustible or inflammable materials to remain as aforesaid for seven days after any such conviction shall be deemed guilty of a further offence against this By-law.

PART V.

Public Pumps.

Negligent use of public pumps and water, &c.

1. Whosoever, having access to any or either of the public pumps within the said Borough belonging to the said Council for the taking of water therefrom or otherwise, who shall wilfully or negligently suffer any water to run to waste from any pump, from or by which he or she shall be supplied, or to which he or she has access, or shall by himself or herself, or by any of his or her employées, supply water in any quantity to contractors or others for building purposes, or shall use the said water from said pumps for the purpose of washing horses or carriages, or shall use the said water for any purpose excepting for household purposes, or who shall in any way injure any or either of the said pumps, shall on conviction forfeit and pay for every such offence a sum not exceeding forty shillings nor less than ten shillings, in addition to the amount of damage that might be occasioned.

PART VI.

Nuisances.

Casting filth or rubbish into streets, &c.

1. Any person who shall cast or cause to be cast any filth, rubbish, or any dead animal into any street, lane, public watercourse, sewer, or waterhole, or who shall suffer any dead animal to remain upon his or her land or premises to become a nuisance or otherwise offensive, or who shall permit any filth to flow from his or her premises, or shall permit or cause by means of pipes, channels, or other contrivances filth from closets to flow into any street, lane, public watercourse, sewer, or waterhole, or shall obstruct or divert from its channel any such sewer or watercourse, shall forfeit any sum not exceeding five pounds nor less than one pound, and shall pay the cost of removing such filth or obstruction, or of restoring such sewer or watercourse to its proper channel.

Keeping swine and straying animals, &c.

2. Any person who shall breed, feed, or keep any kind of swine in any building, yard, garden, or other hereditament situate and being in or within 120 feet of any street or public place in the said Borough, or shall suffer any kind of swine, or any horse, ass, mule, sheep, goat, or other cattle belonging to him or her, or under his or her charge, to stray or go about, or to be tethered or depastured in any street or public place, shall on conviction forfeit and pay for such offence a sum not exceeding forty shillings nor less than two shillings and sixpence.

Premises and private avenues to be kept clean, &c.

3. Any owner or occupier of any house or place within the said Borough who shall neglect to keep clean all private avenues, passages, yards, and ways within the said premises, so as by such neglect to cause a nuisance by offensive smell or otherwise, shall on conviction forfeit and pay a sum not exceeding forty shillings nor less than ten shillings for every such offence.

Inspector of Nuisances to visit and inspect butchering establishments, &c.

4. For preserving the cleanliness of the said Borough and the health of the inhabitants thereof, it shall be lawful for the Inspector of Nuisances or for any other officer or officers appointed by the Council from time to time, and when and as often as he or either of them shall see occasion to visit and inspect the butchers' premises, boiling-down establishments, tanneries, and fellmongering establishments in the said Borough, and to give such directions concerning the cleansing of the said premises, tanneries, and establishments both within and without, as to him shall seem needful; and any butcher, or the owner or occupier of any such tannery or establishment who shall refuse or neglect to comply with such directions within forty-eight hours, shall forfeit and pay a sum not exceeding ten pounds nor less than ten shillings.

Premises to be inspected upon the complaint of any householder, &c.

5. Upon the reasonable complaint of any householder, that the house, premises, yards, closets, or drains of the neighbouring or adjoining premises are a nuisance or offensive, the Inspector of Nuisances or any other person appointed by the Council shall make an inspection of the premises complained of, and the officer of the Council shall have full power without any other authority than this By-law, to go upon the said premises for such purpose.

Persons committing offences, &c.

6. Every person who in any street or other public place or passage within the said Borough to the obstruction, annoyance, or danger of the residents or passengers, shall commit any of the following offences, shall on conviction for any and every such offence forfeit and pay a penalty of not more than five pounds nor less than ten shillings:—

Hoisting goods, &c.

(1.) Every person who shall hoist or cause to be hoisted, or lower, or cause to be lowered, goods of any description from any opening in any house fronting any street or public place and close to the footway thereof without sufficient and proper ropes and tackling.

Conveyance of meat.

(2.) Every person who shall carry or convey or cause to be carried or conveyed in any street or public place, the carcase or any part of the carcase of any newly-slaughtered animal without a sufficient and proper clean cloth covering the same for the concealment from public view, or shall hawk or carry about butcher's meat for sale without covering the same as aforesaid.

Placing lines across the streets, &c.

(3.) Every person who shall place any line, cord, or pole across any street, lane, or passage, or hang or place clothes thereon, to the danger or annoyance of any person.

(4.) Every person who shall place any flower-pot in any upper window near to any street or public place without sufficiently guarding the same from being thrown down.

Casting building material from roofs, &c.

(5.) Every person who shall throw or cast from the roof or any part of any house or other building, any slate, brick, part of a brick, wood, rubbish, or other material or thing (unless within a hoard or enclosure), when any house or building is being erected, pulled down, or repaired.

Blacksmiths, &c., to close establishments after sunset, &c.

(6.) Every blacksmith, whitesmith, anchor smith, nail-maker, metal-founder, limeburner, brickmaker, potter, or other person using a forge, furnace, or kiln, and having a door, window, or aperture fronting or opening into or towards any street, lane, or passage, and not closing such door, or not fastening the shutters or other fastenings of such window and closing such aperture or placing a screen before the same every evening within one hour after sunset, so as to effectually prevent the light from shining through the doorway, window, or aperture next or upon such street, lane, or passage.

Persons burning bones, or rags, &c.

(7.) Every person who shall within the distance of one hundred yards from any dwelling-house, burn any rags, bones, corks, or other offensive substance to the annoyance of any inhabitant.

Carrying goods on frames, &c.

(8.) Any person who shall carry goods on any frame to the annoyance of any person upon the footway of any street or other public footway.

Keeping ferocious animals, &c.

(9.) Every person who shall be the keeper of or have any dog or other animal which shall attack or endanger the life or limb of any person who may have the right of way or the use of any private road, yard, alley, street, or other place within the said Borough.

Filthy premises injurious to public health.

7. If upon the certificate of any two duly qualified medical practitioners, it appear to the Council that any house or part thereof, or the premises occupied in connection therewith within the limits of the said Borough, is in such a filthy or unwholesome condition that the health of any person is or may be affected or liable to be affected or endangered thereby, and that the whitewashing, cleansing, or purifying of any house or part thereof, or the premises occupied in connection therewith, would tend to prevent or check any infectious or contagious disease, the said Council shall give notice in writing to the owner or occupier of such house or part thereof, or the premises occupied in connection therewith, to whitewash, cleanse, or purify the same, as the case may require; and if the person to whom notice is so given shall fail to comply therewith within such time as shall be specified in the said notice, he or she shall be liable to a penalty not exceeding ten shillings for every day during which he or she continues to make default. Provided that no such penalty shall collectively amount to any greater

sum than twenty pounds; and the said Council shall, if they shall think fit, cause such house, building, or part thereof, or the premises occupied in connection therewith, to be white-washed, cleansed, or purified, and for such purpose the proper officers, servants, and workmen of the said Council shall have power to enter the same, and the expense incurred by the Council in so doing shall be paid by the owner or occupier.

Bathing in public places.

8. Any person who shall bathe near to or within view of any public wharf, quay, bridge, street, road, or other place of public resort within the limits of the said Borough between the hours of six o'clock in the morning and eight in the evening, shall on conviction forfeit and pay a sum not exceeding one pound for every such offence.

Offending against decency.

9. Any individual who shall offend against decency by the exposure of his or her person in any street or public place within the said Borough, or in the view thereof, shall on conviction forfeit and pay for every such offence a sum not exceeding five pounds nor less than one pound.

Persons keeping cows to provide sufficient space, &c.

10. Any person who shall keep cows on any premises within the said Borough, and shall not provide a space for each cow of seven feet by five feet, shall on conviction forfeit and pay any sum not less than ten shillings nor more than forty shillings for each offence.

Connecting drains with sewers, &c., without permission.

11. Any person who shall connect any pipe or drain with any sewer belonging to the said Council without permission first obtained from the said Council, shall on conviction forfeit and pay any sum not exceeding twenty pounds nor less than five pounds.

PART VII.

Houses of ill-fame.

By-laws Committee to deal with houses of ill-fame.

Upon representation by any respectable ratepayer that any house or premises within the Borough, and near to the residence of such ratepayer, is of ill-fame, it shall be lawful for the

By-law Committee to cause the residents of such house or premises to furnish to the Council a list of names, ages, sexes, and occupation of all the inmates of the said house or premises, and upon non-compliance with such request, or if upon consideration the said Committee consider the house to be one of ill-fame, they shall, with the sanction of the Council, declare the same to be a nuisance, and shall cause a notice in writing to be served upon the holder of such house or premises or any person resident or being therein to discontinue or abate the said nuisance within forty-eight hours after the receipt of such notice, and if such nuisance be not so abated the holder of such house or premises or other person residing or being therein and acting as such holder shall be liable to be proceeded against for such nuisance, and shall on conviction thereof forfeit and pay any sum not less than two pounds nor more than twenty pounds; and if such nuisance shall not be abated within forty-eight hours after conviction such holder of such house or such other person residing or being therein as aforesaid shall forfeit and pay for such second offence a sum not less than five pounds nor more than fifty pounds; and if a further period of forty-eight hours shall elapse after such second conviction without the abatement of such nuisance such holder of such house or other person residing therein as aforesaid shall for such third offence forfeit and pay any sum not less than ten pounds nor more than fifty pounds.

Penalties where no special penalty mentioned, and for obstructing enforcement of By-laws.

Every person committing a breach of any of these By-laws shall, where no penalty is mentioned for such offence, be liable to a penalty of a sum not exceeding twenty pounds; and any person obstructing any person in the discharge of any duty imposed, or in the exercise of any privilege conferred by any of these By-laws, shall be liable to a penalty of a sum not exceeding twenty pounds.

Passed by the Municipal Council of the Borough of Paddington, this sixth day of January, one thousand eight hundred and eighty.

MUNICIPALITIES.

(BOROUGH OF ALEXANDRIA—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 24th June, 1880.

BOROUGH OF ALEXANDRIA—BY-LAWS.

THE following By-laws, made by the Council of the Borough of Alexandria, for the establishment of a Toll-gate on the Henderson Road, and the collection of Tolls thereat, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

BY-LAWS for the establishment of a Toll-bar on the Henderson Road and the collection of Tolls thereat, passed by the Municipal Council of Alexandria, on the 7th day of April, 1880.

WHEREAS it has been deemed expedient by the Municipal Council of Alexandria to place a Toll-gate on the Henderson Road, for the purpose of collecting tolls for the maintenance and repairs of the said road, they, the said Municipal Council, have agreed to the following By-laws for establishing and regulating the same, for the scale of tolls to be levied, and for the collection of said tolls :—

- 1st. That a gate be created on the Henderson Road.
 - 2nd. That the following scale of tolls be levied on every vehicle or animal passing through the said gate each time, the said vehicles being allowed to return without such toll being demanded :—
- | | s. | d. |
|--|----|----|
| For every sheep, goat, or pig | 0 | 0½ |
| For every ox or head of neat cattle | 0 | 1 |
| For every horse, mare, gelding, ass, or mule | 0 | 1 |
| For every cart, dray, or other such vehicle with two wheels, drawn by one horse or other animal..... | 0 | 2 |
| If drawn by two horses or other animals | 0 | 3 |
| And for every additional horse or other animal | 0 | 1 |
| And for every wain, waggon, or other such carriage with four wheels drawn by two horses or other animals | 0 | 4 |
| And for every additional horse or other animal drawing such carriage..... | 0 | 1 |

- | | s. | d. |
|---|----|----|
| For every gig, chaise, or other such carriage with two wheels, drawn by one horse or other animal | 0 | 3 |
| If drawn by two horses or other animals | 0 | 4 |
| For every coach, chariot, or other such carriage with four wheels, and drawn by one horse or other animal | 0 | 5 |
| If drawn by two horses or other animals | 0 | 6 |
| And for every additional horse or other animal | 0 | 1 |

3rd. That for every vehicle with four wheels, usually drawn by two or more horses, affixed, tied, or secured to any other vehicle, there shall be paid for such vehicle the same rate of toll as if drawn by two horses.

And for every vehicle with two wheels the same rate of toll as if drawn by one horse.

Provided always that if any such vehicle so tied or secured to any other vehicle, shall contain any goods other than the harness thereto belonging, and such articles of package as may be necessary for the protection of such carriage or passengers, the same shall be liable to double the toll hereby imposed.

4th. The said Toll-gate, with the power of levying tolls, shall be sold by auction on the first day of July in every year, but the Council will reserve the right of disposing of the said Toll-gate in any manner they shall deem expedient

(L.S.) CHARLES B. HENDERSON,
Mayor.

JAS. JONES, Council Clerk.

MUNICIPAL DISTRICT OF TENTERFIELD.

BY-LAWS.

THE following By-laws, made by the Council of the Municipal District of Tenterfield, for the preventing of fires, having been confirmed by His Excellency the Lieutenant-Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

TENTERFIELD MUNICIPAL BY-LAWS.

1. Every person who shall erect or repair or knowingly permit to be erected or repaired within the said Municipality any building or portion of a building, any portion of which shall be constructed of bark or other dangerously inflammable materials, shall on conviction of every such offence pay a penalty of not more than twenty pounds; and every person who shall suffer any such building or portion of a building to remain as aforesaid for twenty-four hours after such conviction shall be guilty of a further offence against this By-law: Provided that this By-law shall only be enforced within that portion of the said Municipality, bounded on the west by the Tenterfield Creek, on the north by Naas-street, on the east by Wood-street, and on the south by Douglas-street.

2. Every person who shall, within that portion of the Municipality named in the preceding By-law, erect any fence of brushwood, bushes, or other inflammable material, or shall make or place or cause to be made or placed any stack of hay, corn, straw, or other produce, or place as or for the covering of any such stack any inflammable material, so as to endanger contiguous buildings or properties, or any trees, shrubs, or other produce thereof, or any chattels therein, shall on conviction of every such offence pay a penalty of not more than ten pounds; and shall also remove such fence, stack, or covering within seven days after such conviction; and any person failing to remove such fence, stack, or covering within the time specified after such conviction as aforesaid shall be deemed guilty of a further offence against this By-law.

Made and passed by the Municipal Council of the Municipal District of Tenterfield, on the 5th day of May, 1879.

(L.S.) EDWARD B. WHEREAT,
Mayor.

GEO. KENNEDY, Council Clerk.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF MOLONG—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 31st July, 1879.

MUNICIPAL DISTRICT OF MOLONG.

BY-LAWS.

THE following By-laws, made by the Council of the Municipal District of Molong, for regulating the proceedings of the Council, the collection of rates, for the prevention and abatement of nuisances and other matters, and for the general good rule and government of the Municipality, having been confirmed by His Excellency the Lieutenant-Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

MUNICIPALITY OF MOLONG.

BY-LAWS to regulate by means of Standing Orders the proceedings of the Municipal Council of Molong for the general good rule and government of the Municipality, and for the collection of rates, the prevention and abatement of nuisances and other matters.

The following shall be the By-laws of the Municipality of Molong:—

Meetings of Municipal Council, and duties of Mayor and Aldermen.

1. The Council shall meet at the School of Arts or other place that may hereafter be appointed within the Municipality of Molong, at half-past seven o'clock p.m. on every alternate Tuesday, for the transaction of business, unless otherwise adjourned, subject however to the provisions of the Municipalities Act of 1867.

2. There shall be two half-yearly meetings of the Council, in the months of March and September in each Municipal year, for the purpose of making up the accounts of the Municipality for the half-years respectively expiring in the preceding months of February and August in such year.

3. The Mayor or presiding Alderman shall preserve order, and his decision on disputed points of order shall be final.

4. The Mayor or presiding Alderman may take part in all the proceedings of the Council.

5. When the Mayor or presiding Alderman is called upon to decide upon a point of order or practice, he is to state the rules applicable to the case without argument or comment.

6. The Mayor or presiding Alderman shall put all questions and declare the sense of the Council thereon.

7. If two or more members rise to speak at the same time the Mayor or presiding Alderman shall decide which member is entitled to pre-audience.

8. The Mayor or presiding Alderman may, without waiting for the interposition of any member of the Council, call to order any member proceeding to speak a second time on the same subject, except in the way of explanation only or of reply by the mover of any motion then under consideration.

9. The Mayor or presiding Alderman shall on every motion made put the question first in the affirmative and then in the negative, and he may do so as often as may be necessary to enable him to form and declare his opinion from the show of hands as to which party has the majority.

10. Every Alderman shall enter his name and address in a book kept by the Council Clerk, where summonses and other papers may be left for him.

11. Every Alderman present shall record his vote openly upon all subjects.

Order of Business.

12. The business of the Council shall be taken in the following order:—

1. Reading and signing minutes of last meeting.
2. Reading of copies of letters sent by authority of Council.
3. Reading of letters received, and considering and ordering thereon.
4. Reception and reading of petitions and memorials, but without discussion.
5. Reception and reading of reports from Permanent and Select Committees, and ordering thereon.
6. Order of the day and adjourned motions.
7. Motions according to notice.
8. Payment of accounts and special payments.
9. All motions shall be made, and petitions presented by Aldermen in their places, and every Alderman shall stand when speaking and address the Chair.

13. The order of the day shall include business, of which due notice has been given, and all matters arising out of former meetings of the Council.

14. Any motion entered on notice paper, and the Alderman having given notice of the same being absent, and no other Alderman having been deputed to bring forward such motion when the business is called on, shall be struck out.

15. Any number of amendments may be proposed on a motion before the Council, and when more than one amendment is moved the question shall first be put on the last amendment and then on the next, and so on in the reverse order in which they were moved, except when such motion or amendment shall relate to the acceptance of tenders, the fixing of salaries, or other matters of finance, in which case the lowest sum shall be put first, then the next lowest, and so on to the highest.

16. It shall not be necessary for any motion to be seconded.

17. Motions for adjournment shall be put without discussion, and if negatived it shall not be competent for any Alderman to make a similar motion until half-an-hour shall have elapsed.

18. Motions to rescind or to vary a former vote of the Council shall not be moved without express notice, and a call of the Council on a particular day to be named for the purpose.

Notices of Motion.

19. The Council Clerk shall enter in a book to be kept for that purpose, to be called the "Notice Book," all notices of motion in the order in which they are received.

Petitions.

20. No discussion shall take place on the presentation of any petition without notice of motion given after its reception.

21. It shall be incumbent on any Alderman presenting a petition to acquaint himself with the language thereof, and to report to the Council that he considers it unobjectionable in that respect.

22. All petitions shall be received only as the petitions of the parties signing the same.

Committees and their Reports.

23. No Committee shall consist of less than three members of the Council, which number shall form a quorum.

24. The mover of any motion for a Committee shall be a member thereof, and at all meetings of such Committee the Mayor, if a member, shall preside; or, if he be not a member, then such Alderman shall preside as a majority of the members of the Committee shall have appointed permanent Chairman thereof; and in the absence of the Mayor or permanent Chairman respectively, such Chairman as the members present shall appoint shall preside.

25. No report of any Committee shall be adopted unless due notice of motion for that purpose be given after its reception.

26. The rules of the Council shall be observed in a Committee of the whole Council except ruling limiting the number of times of speaking.

Order of Debate.

27. Any Alderman proposing a motion or amendment or discussing any matter shall not be interrupted unless by a call to order, when he shall sit down; the Alderman calling to order shall then be heard and the question of order decided before the subject is resumed or any other business proceeded with.

28. Any Alderman proposing a motion or any amendment must state the nature of it before addressing the Council.

29. Except in Committee no Alderman shall speak twice on the same question, unless in explanation when he has been misrepresented or misunderstood: Provided however that the mover shall be allowed to reply, and that every Alderman shall have the liberty of speaking once on every amendment as well as on the original motion.

30. No Alderman shall digress from the subject under discussion, nor shall he speak upon any motion or amendment for a longer period than fifteen minutes without the consent of the Council.

31. A debate may be adjourned to a later hour of the same evening, or to another day to be specified.

32. The Alderman upon whose motion any debate shall be adjourned by the Council shall be entitled to pre-audience on the resumption of the debate.

33. It shall be competent for any Alderman to divide the Council on any question both in full Council and Committee, and the Mayor or presiding Alderman shall take the division in the usual way by show of hands, and the names given by the Mayor or presiding Alderman to the Council Clerk shall be taken down by him and recorded.

34. All divisions of the Council shall be entered in the minute-book.

35. Any Alderman using offensive or abusive language towards any other Alderman, or persisting in speaking when requested by the Mayor or presiding Alderman to desist, or refusing to sit down when called to order by the Mayor or presiding Alderman shall forfeit and pay for every such offence a sum of money not being less than five shillings nor exceeding five pounds.

36. No work affecting the expenditure of the funds of the Municipality shall be undertaken until an estimate of the expense shall have been laid before the Finance Committee, reported thereon at the next meeting, and approved of by the Council.

37. A Committee or Surveyor shall in all cases be appointed to inspect the work performed as soon as completed, and on the written approval of such Committee or Surveyor the same shall be paid for.

38. It shall be lawful for any ratepayer at any time previous to any tender for work being accepted to petition the Council in support of or against the expenditure on account of such contract.

Officers.

39. The Council Clerk shall have the custody of the Common Seal, and of all books, charters, deeds, muniments, and records of the Corporation or relating to the property thereof.

40. The Treasurer's cash-book and the Banker's pass-book shall be laid before the Council at all its meetings.

By-laws.

41. That no new By-law shall be proposed at any meeting unless notice in writing has been duly given, and no new By-law, amendment, or repeal shall be finally passed at the meeting at which it is first proposed.

42. That no less than seven days shall intervene between the meeting at which the new By-law, amendment, or repeal shall be proposed and the meeting at which the same shall be passed by the Council.

43. That any proposed new or amended By-law or repeal of any existing law shall be filed in the Council Clerk's office, for the inspection of the Aldermen or inhabitants of the Borough, from the time at which it is proposed until the meeting at which it is to be finally adopted.

Miscellaneous Regulations.

44. All contracts for Municipal works shall be by tender or otherwise, as the Council may see fit.

45. No Alderman or officer of the Council shall be surety for any contractor or officer of the Municipality.

Collection of rates.

46. That if necessary a duly qualified person shall be appointed for the collection of the Municipal rates, and the remuneration shall be an agreed per-centage upon the actual amount collected by such officer from the ratepayers.

47. That such rates be collected by half-yearly instalments.

48. The Collector of such rates for the time being, if appointed, shall be the Bailiff for the Municipality, and in the meantime until such Collector be appointed a proper person shall be appointed as Bailiff.

49. The Collector if appointed shall, in accordance with the provisions of the Municipalities Act of 1867, collect the rates when made from the ratepayers, and shall from time to time report the result of his collection to the Council, and shall execute all warrants for distresses or take such proceedings for enforcing payment of the said rates if in arrear, as the Mayor or any person who may for the time being be duly authorized to perform the duties of that office, shall direct.

50. The Collector if appointed shall keep such books required for the collection of rates as shall be furnished him by the Council Clerk, and shall produce the same for the inspection of any ratepayer at any reasonable time.

51. All levies and distresses shall be made under warrant in the form of the Schedule hereunto annexed and marked with the letter "A," under the hand of the Mayor or any person who may for the time being be duly authorized to perform the duties of that office.

52. The Bailiff shall be paid for every levy made by him under these By-laws the fees mentioned in the Schedule hereunto annexed and marked "B."

SCHEDULE A.

I, _____, Mayor of the Borough of Molong, do hereby authorize you, _____, the Bailiff of the said Borough, to distrain the goods and chattels in the dwelling-house (or in and upon the land and premises) of _____, situate at _____, for _____, being the amount of rates due to the Corporation of the said Borough to the _____ day of _____, for the said dwelling-house (or premises, as the case may be), and to proceed thereon for the recovery of the said rates, according to law.

Dated this _____ day of _____, 187 .

Mayor.

SCHEDULE B.

Fees to Bailiff.

For making entry and inventory, three shillings; if in possession more than five hours, three shillings additional, and for every subsequent day whilst in possession, five shillings per day, and five per cent. upon the net proceeds of the sale.

By-laws for the care and management of the public roads and streets and the general good rule and government of the Municipality.

53. No cattle intended for slaughter and sale in the town shall be driven through any street or public thoroughfare of the Municipality between the hours of 8 in the morning and 6 in the evening, and every person who shall drive or cause to be driven, any such cattle through any street or public thoroughfare of the Municipality between such hours, shall on conviction forfeit and pay for every such offence a sum of money, not being less than five shillings nor exceeding five pounds.

54. That any person who shall drag any logs, stump, or any kind of rubbish on to any of the reserves within the Municipality, or take loam, sand, or stone from off of any of the streets within the said Municipality without the permission of the Mayor, shall on conviction for every such offence forfeit and pay a sum of money, not being less than five shillings and not exceeding five pounds.

(L.S.) W. TANNER, JNR., Mayor.

Made and passed by the Municipal Council of Molong this 25th day of March, A.D. 1879.

MICHAEL THOMAS PHILLIPS,
Council Clerk.

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF LAMBTON—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 1st August, 1879.

MUNICIPAL DISTRICT OF LAMBTON.

BY-LAWS.

THE following By-laws, made by the Council of the Municipal District of Lambton, for regulating the proceedings of the Council and the duties of its officers and servants; for preserving order at its meetings; for determining the times and modes of collecting and enforcing the payment of rates; for preventing and extinguishing fires; for suppressing nuisances; for compelling residents to keep their premises free from offensive or unwholesome matters; for restraining noisome and offensive trades; and for generally maintaining the good rule and government of the Municipality, having been confirmed by His Excellency the Lieutenant-Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

BY-LAWS OF MUNICIPAL DISTRICT OF LAMBTON.

PART I.

Proceedings of the Council and Committees—Duties of Officers and Servants, &c.

Ordinary Meetings.

1. The Council shall meet for the transaction of business on such days and at such hours as the Council may from time to time appoint.

Election of Chairman in the absence of the Mayor.

2. If at any meeting of the Council the Mayor be absent at the expiration of fifteen minutes after the time appointed for holding such meeting, the Alderman then present shall proceed to elect a Chairman from themselves for such meeting.

Business of Ordinary Meetings.

3. The following shall be the order of business at all meetings of the Council, other than special meetings:—

1. The minutes of the last preceding meeting to be read, corrected, if erroneous, and signed by the Mayor or other Chairman. No discussion to be permitted on such minutes, except as to whether they are correct.
2. Correspondence to be read, and order made thereon if expedient.
3. Petitions (if any) to be read and dealt with.
4. Reports from Committees and minutes from the Mayor (if any) to be presented and orders made thereon.
5. Questions as to any matters under the jurisdiction or within the official cognizance of the Council to be put and replied to, and statements as to any facts, matters, or circumstances requiring attention by the Council, or any of the Committees or officers to be made.
6. Motions of which notice has been given to be dealt with in the order in which they stand on the business paper.
7. Orders of the day to be disposed of as they stand on the business paper.

Business may be taken out of regular order.

Provided, that the Council may, by resolution without notice, entertain any particular motion or deal with any particular matter of business out of its regular order on the business paper without any formal suspension of this section, and may in like manner direct that any particular or matter of business may have precedence at a future meeting.

General duties of the Mayor or presiding Alderman.

Order.

4. The Mayor or presiding Alderman shall preserve order, and his decision on all disputed points shall be final, but he is to give his decision without argument or comment.

The Mayor may take part in proceedings.

5. The Mayor or presiding Alderman may take part in all proceedings of the Council.

Putting questions.

6. The Mayor or presiding Alderman shall put all questions and declare the sense of the Council thereon.

Pre-audience.

7. If two or more members rise to speak at the same time, the Mayor or presiding Alderman shall decide which Member is entitled to pre-audience.

Not to speak a second time.

8. The Mayor or presiding Alderman may, without waiting for the interposition of any member of the Council, call to order any member proceeding to speak a second time on the same question (except in explanation, and without introducing any new matter). The member introducing the motion to have the right of reply, and every member shall have the liberty of speaking once on every amendment as well as on the original motion.

Questions put by Mayor.

9. The Mayor or presiding Alderman shall on every motion made and seconded put the question first in the affirmative and then in the negative, and he may do so as often as may be necessary to enable him to form and declare his opinion from the show of hands as to which party has the majority.

Not speaking to question.

10. No member shall deviate from the subject under debate, or make personal reflections upon any other member.

Time for speaking.

11. No member shall speak on any motion or amendment longer than ten minutes.

Offensive expressions.

12. No member shall make use of any expression capable of being applied offensively to any other member.

Adjournment of debate.

13. A debate may be adjourned to a later hour of the same day or to another day specified.

Member entitled to pre-audience.

14. The member upon whose motion any debate shall be adjourned shall be entitled to pre-audience on the resumption of the debate.

Calls to order.

15. Any Alderman may at any time call the attention of the Mayor to any Alderman being out of order, or to any other point of order.

Motion for adjournment.

16. Any motion for adjournment if seconded shall be immediately put without discussion, but if such motion be negatived it shall not be competent for any member to make a like motion until the lapse of a quarter of an hour.

Motions must be seconded.

17. No notice shall be taken by the Mayor or presiding Alderman of any motion unless it be seconded.

Notices must be in writing.

18. All notices of motion shall be in writing, dated and signed by the Alderman proposing the same, previous to being handed to the Council Clerk, and shall not be withdrawn from the business paper unless a call of the whole Council has been duly made and granted for that purpose.

Call of the whole Council.

19. No motion, the effect of which if carried would be to rescind any motion which has already passed the Council, shall be entered on the business paper unless a call of the whole Council has been duly made and granted for that purpose.

How ordered.

20. A call of the Council may be ordered by any resolution of which due notice has been given for the consideration of any motion or matter of business before such Council.

How voting determined.

21. The Council shall vote by show of hands, but any Alderman may divide the Council on any question both in full Council or in Committee of the Whole, in which case every Alderman there present shall be compelled to vote, and divisions shall be entered in the minute book.

Questions to be read when required.

22. Any member may require the question under discussion to be read for his information at any time during the debate, but not so as to interrupt any other member whilst speaking.

How amendments to be put.

23. When a motion in Council shall have been made and seconded, any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed unless and until it be seconded. No motion or amendment shall be discussed until it shall have been reduced to writing.

Council Clerk to give notice of Committee meetings.

24. The Council Clerk shall call a meeting of any Committee when requested to do so by the Chairman or any two members of such Committee.

Petitions—No debate.

25. On the presentation of a petition no debate shall take place until notice has been given in the usual manner, and the only question that can be entertained by the Council on the day of its presentation shall be that the petition be received, or that it be referred to a Committee.

Language of Petitions.

26. It shall be incumbent on any Alderman presenting a petition to acquaint himself with the language thereof, and to report to the Council that he considers it unobjectionable.

Petition of parties signing.

27. All petitions shall be received only as the petitions of the parties signing the same.

Committees.

28. Besides such special Committees as from time to time shall be found necessary, there shall be a standing Finance Committee, which shall examine and check all accounts, and shall watch generally over the collection and expenditure of the Municipal revenues. They shall enquire and report from time to time as to all matters which they may consider to affect or be likely to affect the finances of the Municipality, and as to such matters or subjects of the like nature as they may be directed by resolution of the Council to enquire and report upon. Such Committee shall be appointed by resolution of the Council within thirty days after the election of the Mayor for the Municipal year.

Chairman of Committees.

29. The Mayor shall be Chairman of all Committees of which he shall be a member, and every Committee of which the Mayor shall not be a member shall elect a permanent Chairman of such Committee; and such Chairman may direct the Council Clerk to call meetings whenever he shall think it expedient.

Report to be signed.

30. Every report of a Committee shall be signed by the Chairman thereof.

Funds of Municipality.

31. No work affecting the funds of the Municipality shall be undertaken until the probable expense be first ascertained by the Council, and all accounts to be paid by the Council shall be examined before any warrant shall be issued for the payment thereof. Provided that in cases of emergency the Mayor with the assent of any two Alderman may authorize the expenditure of any sum not exceeding five pounds, and such expenditure shall be reported to the Council at its next sitting.

Security.

32. In cases where security is required by the Municipalities Act of 1867, no security shall be accepted otherwise than by a vote of the Council.

Books and papers not to be shown.

33. No officer or servant appointed by the Council shall be at liberty to show, lay open, or expose any of the books, papers, or records of the Council to any person not a member of the Council without leave from the said Council, except as provided by law.

Common Seal.

34. The common seal shall not be affixed to any document without the express authority of the Council, and every impression thereof shall be verified by the signatures of the Mayor and Council Clerk.

Seal, Charter, &c., where kept.

35. The seal of the Municipality, and all charters, deeds, and records of the Council shall be kept in the custody of the Council Clerk, unless the Council shall otherwise order.

PART II.

Collection and enforcement of Rates.

Times and modes of collection.

36. All rates levied or imposed by the Council under the provisions of the Municipalities Act of 1867, and for the purposes mentioned in the said Act, shall be collected once a year, and such rate shall be held to be due and payable on and after such days as the Council may from time to time appoint.

Rates to be paid at office of Council Clerk.

37. All rates made and authorised by the Council, shall be paid within the time prescribed by the Act on such hours and days, and at such places as the Council may from time to time appoint.

Unpaid rates.

38. The Council Clerk shall prepare at such times as may be ordered by resolution of the Council or the Mayor, a list of the names of all persons whose rates are unpaid at the expiration of the time fixed for the payment of the same; and the Mayor may take immediate proceedings either by summons or by the issue of distress warrants against defaulters.

Bailiff.

39. The Bailiff shall be appointed by resolution of the Council, and shall be at any time removable by a like resolution, and shall give such security as the Council shall approve of for the faithful performance of the duties of the office.

Levies and distress.

40. The Bailiff shall make all levies and distresses for the recovery of rates under the warrant of the Mayor, such warrant to be made in accordance with the form in Schedule hereto annexed, marked A.

Entry and levy.

41. The Bailiff shall be paid for entry and levy made under these By-laws, according to the Schedule annexed, marked C.

Making a distress.

42. At the time of making a distress, the Bailiff shall forthwith make out a written inventory in the form, or to the effect of the Schedule annexed, marked B, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person in his or her behalf resident in the place where the distress has been made, and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted in some conspicuous part of the land or premises on which the distress has been made, and the Bailiff shall deliver a copy of such inventory to the Council Clerk for the information of all parties concerned.

Bailiff to enter upon land.

43. It shall be lawful for the Bailiff, and such assistance as he may require, to enter into any part of the land, building, tenement or other property, in respect of which a warrant has been issued for the recovery of any rate or rates as aforesaid, and to distrain the goods therein or thereon, and to remain in such tenement, building, or other property in charge thereof; and if the sum for which such distress shall have been made or taken shall not be paid on or before the expiration of five days, it shall be lawful to sell the goods so distrained, or a sufficient portion thereof, by public auction either on the premises or at such places within the Municipal District as the said Bailiff may think fit to remove them to for such purpose; and the surplus (if any) that may remain after deducting the sum distrained for, together with the expenses attendant upon such distress, shall be paid over on demand to the owner of the goods so sold: Provided always that nothing herein contained as to the time of sale shall apply to any crops of cereals, fruit, or vegetables which may be growing at the time when such distress shall be made.

The Bailiff may impound.

44. The Bailiff, when making a distress as aforesaid, may impound or otherwise secure the distress so made of what nature or kind soever it may be in such places, or in such part of the land or premises chargeable with the rate as shall be most fit and convenient for that purpose; and it shall be lawful for any person whatsoever, after the expiration of the five days hereinbefore mentioned, to come and go to and from such place or part of the said land and premises where any distress shall be impounded and secured as aforesaid, in order to view and buy, and to carry off and remove the same on account of the purchases thereof.

Goods, how to be sold.

45. The owner of any goods so distrained upon may, by writing direct and specify the order in which they shall be successively sold, and the said goods and chattels shall in such case be put up for sale according to such direction.

Proceeds of sale to be paid to Council Clerk.

46. The Bailiff shall hand over to the Council Clerk all proceeds of such distresses within twenty-four hours after such sale, also the copy of every inventory and account of every such sale or sales.

Bailiff may appoint deputy.

47. The Bailiff, with the sanction of the Mayor, may authorize any person to act temporarily as his deputy, and the person thus authorized shall have and exercise for the time being, all the powers of the Bailiff himself; but the Bailiff and his sureties shall, in such case, be held responsible for the act of such deputy.

SCHEDULE A.

Warrant of Distress.

I, _____ Mayor of the Municipal District of Lambton, do hereby authorize you _____, Bailiff of the said Municipal District, to distrain the goods and chattels of _____, which are in the dwelling-house, or in and upon the land and premises of _____, situate at _____, for the sum of £ _____, being the amount of Municipal rates, due to the said Municipal District, for the Municipal year ending _____ 18 _____, for the said dwelling-house, land, or premises, as the case may be, and to proceed thereon for the recovery of the said rates according to law.

Dated this _____ day of _____ 187 _____ Mayor.

SCHEDULE B.

Inventory.

I have this day, in virtue of a warrant under the hand of the Mayor of the Municipal District of Lambton, dated _____, of which a copy is attached hereto, distrained the goods and chattels set forth at foot hereof, in the dwelling-house, or in and upon the land and premises of _____, situate at _____ within the said Municipal District, for the sum of £ _____, being the amount of rates due to the said Municipal District for the Municipal year ending _____ 18 _____.

Dated this _____ day of _____ 187 _____ Bailiff.

SCHEDULE C.

Costs.

	s.	d.
For every warrant of distress	2	0
For serving every warrant and making levy ...	2	0
For making and furnishing copy of inventory	2	0
For man in possession, each day or part of a day	6	0
For sale and delivery of goods, one shilling in the pound on the gross proceeds of the sale, in addition to the costs of advertisements, if any.		

PART III.

Preventing and extinguishing fires.

Fire or combustible materials, &c.

48. Every person who shall place, or knowingly permit to be placed, in any yard, house, workshop, out-offices, or other premises, fire, gunpowder, or combustible or inflammable materials of any kind, in such a manner as to endanger contiguous buildings, shall on conviction of every such offence forfeit and pay a penalty of not more than five pounds; and shall forthwith remove such fire, gunpowder, or other combustible and inflammable materials. And every such person who shall suffer any such fire, gunpowder, or combustible or inflammable materials to remain as aforesaid for forty-eight hours after such conviction, shall be deemed guilty of a further offence against this By-law.

Fireworks.

49. Every person who shall discharge any firearms without lawful cause, or who shall light any bonfire, tar-barrel, or fireworks, upon or within ten yards of any public or private street, or any public place, shall forfeit a sum not exceeding five pounds.

Negligently allowing Chimney to be on fire.

50. If any chimney accidentally catch or be on fire, or if a chimney emits sparks to endanger the property of persons within this Municipal District, the person occupying or using the premises in which such chimney is situated, shall forfeit a sum not less than five shillings nor more than forty shillings.

PART IV.

Suppression of Nuisances.

51. No householder or resident in the said Municipal District shall be allowed to permit his or her premises, yards, closets, or drains to be offensive or a nuisance to the adjoining householders or residents.

Offensive Trade.

52. No noisome or offensive trade shall be permitted to be carried on in any premises to the inconvenience of the residents of adjoining or other houses.

Notice to proprietor.

53. Upon complaint being lodged at the Council Chamber with the Council Clerk that the yards, closets, or drains of any premises is or are a nuisance or offensive, and after inspection such shall be found to be the case, notice shall be given in writing to the proprietor or tenant to remove or abate such nuisance within forty-eight hours after such notice, and if after such notice the nuisance shall not be removed or abated, the proprietor or tenant of the said premises shall be liable to a penalty not exceeding forty shillings nor less than ten shillings,

Wells to be covered over.

54. Every person who shall have a well situated between his or her dwelling-house or the appurtenances thereof and any road, street, or footway within the limits of the said Borough, or at the side of or in any yard or place open or exposed to such road, street, or footway, shall cause such well to be securely and permanently covered over, and if any person having any such well as aforesaid shall fail to cover and secure the same within twenty-four hours after notice in writing shall have been given to him or her by any officer of the said Council, or shall have been left for such person at his or her usual or last known place of abode, or on the said premises, shall on conviction forfeit

and pay not less than two shillings and sixpence nor more than twenty shillings, and for every twenty-four hours after such notice that such well shall remain open and uncovered contrary to the provisions hereof, such person shall be deemed guilty of a separate offence against this by-law.

Drawing or hauling timber.

55. Any person who shall haul or draw, or cause to be hauled or drawn, upon any part of any street or public place within the said Municipal District, any timber, stone, or other thing, otherwise than upon wheeled vehicles or barrows, or shall suffer any timber, stone, or other thing, which shall be carried principally or in part upon a wheeled vehicle or barrow, to drag or trail on any part of such street or public place to the injury thereof, shall upon conviction forfeit and pay for every such offence a sum of not more than forty shillings nor less than five shillings over and above the damages occasioned thereby.

Conveying animals slaughtered.

56. Every person who shall carry or convey, or cause to be carried or conveyed, in any vehicle, in any street or public place, the carcass or any part of the carcass of any newly-slaughtered animal without a sufficient and proper cloth covering the same for the concealment thereof from public view, or shall hawk or carry about butcher meat without covering the same as aforesaid, shall be liable on conviction to a penalty of any sum not exceeding two pounds for every such offence.

Rubbish not to be thrown on streets.

57. No person shall be allowed to throw rubbish sweepings, broken glass, dead animals, or other offensive matter or thing, or deposit of any kind whatever on the streets, pathways, or channels, or in any public place within this Municipal District.

Injury to curbstones, guttering, &c.

58. No driver, carter, or other person shall wilfully or negligently do or suffer, or cause to be done, any damage or injury to the curbstones, gutters, or pathways of any street or roadway; and no person shall be at liberty to ride on horseback or to drive a wheeled-vehicle of any kind on the footways.

Cattle straying.

59. It shall not be lawful for any person whomsoever to suffer any horses, cattle, swine, or goats belonging to him or under his charge to stray in any public road or thoroughfare within the said Municipal District.

Careless riding or driving.

60. No person shall ride or drive through or upon any street or public place so negligently, carelessly, or furiously, that the safety of any other person shall or may be endangered.

Destroying pathways or roads.

61. No person shall be allowed to alter, cut up, or destroy the pathways or roads, or to remove loam, sand, or gravel from any of the streets or roads of the Municipality without the authority of the Council, and for such authority a fee of one shilling shall be paid.

Placing material on streets or pathways.

62. No person shall be allowed to place on the streets or pathways building materials otherwise than is absolutely necessary, and by the sanction, in writing, of the Mayor or Council Clerk; and no person shall be allowed to have water-holes or excavations for cellars or other purposes in or adjoining any public place unfenced, or in such manner as to be dangerous to passers-by; and all places where buildings are being carried on, or where any obstruction to the danger of the passer-by exists, the person causing such obstruction shall be required to place lights on either side, and keep the same lighted from sunset to sunrise.

Damaging trees and shrubs.

63. No person shall destroy or damage any shrub or tree growing in any street or thoroughfare or other public place within this Municipality, or injure any hedge, fence, gate, or building in such street, thoroughfare, or public place; or to set fire to any shrubs or trees, or to cut or remove any timber from any such street, thoroughfare, or public place aforesaid; or to destroy, tear, deface, or otherwise injure any notice, proclamation, or other document purporting to be under the authority of the Council, or of any officer of the said Council, which shall be affixed in any public place.

Exposing goods for sale.

64. No person shall place or expose for sale on the pathways or streets, carts, goods, parcels, or produce of any kind whatever, to the obstruction of the public.

Made and passed at a meeting of the Municipal Council of the Municipality of Lambton, this 24th day of June, 1879.

THOMAS JOHNSON,
Council Clerk.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF GLEN INNES—BY-LAW.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 28th October, 1879.

MUNICIPAL DISTRICT OF GLEN INNES.

AMENDED BY-LAW.

THE following By-law, relating to the erection of Bark Buildings, made by the Council of the Municipal District of Glen Innes, in substitution of By-law No. 52 of part III of the By-laws of that Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

The following By-law being No. 52 Part 3 of the By-laws of the Municipal Council of Glen Innes was altered and amended by the said Municipal Council at a Regular Monthly Meeting, held on the 19th day of May, 1879, as hereinafter specified.

ERECTION OF BARK BUILDINGS.

All persons are prohibited from erecting buildings any portion of which shall be constructed of bark or other dangerously inflammable material; and any person or persons erecting such buildings shall forfeit on conviction of every such offence a penalty of not more than twenty pounds: Provided that this By-law shall only be enforced within the now populous portion of the Municipality, that is to say, within the following boundaries: Commencing on the west by Guy-street; on the north by Herbert-street; on the east by East-street; on the south by Oliver-street, inclusive of frontages by both sides of the streets named.

THE ALTERATIONS SPECIFIED ARE AS FOLLOWS.

After the words "All persons are prohibited from erecting." The following is the alteration specified "Or in any way making good or repairing."

Passed the Municipal Council at Glen Innes, 19th May, 1879.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF WENTWORTH—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 28th October, 1879.

MUNICIPAL DISTRICT OF WENTWORTH.

THE following By-laws made by the Council of the Municipal District of Wentworth for regulating their own proceedings and the duties of their officers and servants, and preserving order at meetings of the Council,—for determining the times and modes of collecting and enforcing payment of rates,—for restraining noisome and offensive trades,—for suppressing nuisances, &c.,—for compelling residents to keep their premises free from offensive and unwholesome matters,—opening new public roads and streets,—aligning and cleansing roads and streets,—the killing of cattle,—for preventing and extinguishing fires,—preserving trees and shrubs,—preserving public decency,—preventing or regulating and licensing exhibitions or places of amusement, and generally maintaining the good rule and government of the Municipality,—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

BY-LAWS made by the Council of the Municipal District of Wentworth for regulating their own proceedings and the duties of their servants and officers,—for preserving order at Council meetings,—for determining the terms and modes of collecting and enforcing payment of rates,—for suppressing nuisances,—for compelling residents to keep their premises free from offensive and unwholesome matters,—the slaughter of cattle,—opening new public roads, ways, and streets,—aligning and cleansing roads and streets,—preserving trees and shrubs,—preserving public decency,—restraining noisome and offensive trades,—and generally maintaining the good rule and government of the Municipality.

Meetings of Council.

1. The Council shall meet at such place as a majority of the Council shall from time to time appoint for the dispatch of business at 7 p.m. on every alternate Tuesday unless such day shall happen to be a public holiday. In the latter case the meeting shall be held on such other day as the Mayor may appoint.

2. If at any meeting of the Council the Mayor be absent at the expiration of fifteen minutes after the time appointed for holding such meeting, the Aldermen then present shall proceed to elect from among themselves a Chairman for such meeting. Whenever there shall be an adjournment of any such meeting for want of a quorum, the names of the members present shall be taken down and shall be recorded in the minute book.

Order of Business.

3. The following shall be the order of business at all meetings of the Council other than special meetings:—

- (1.) The minutes of the last preceding meeting to be read, corrected (if erroneous), and to be signed by the Mayor or presiding Alderman. No discussion to be permitted on such minutes except as to whether they are correct.
 - (2.) Petitions (if any) to be presented and dealt with.
 - (3.) Correspondence to be read and (if necessary) ordered upon.
 - (4.) Reports from Committees and minutes from the Mayor (if any) to be presented and ordered upon.
 - (5.) Questions as to matters under the jurisdiction or within the official cognizance of the Council to be put and replied to, and statements as to any facts, matters, or circumstances requiring attention by the Council or any of its Committees or officers to be made.
 - (6.) Motions of which notice has been given to be dealt with in the order in which they stand on the business paper.
 - (7.) Orders of the day to be disposed of as they stand on the business paper: Provided that it shall be competent to the Council at any time by resolution without notice to entertain any particular motion or to deal with any particular matter of business out of its regular order on the business paper without any formal suspension of this section; also and in like manner to direct that any particular motion or matter of business shall have precedence at a future meeting.
4. At special meetings of the Council the business, after the minutes shall have been read and verified, which shall be done in the same manner as at an ordinary meeting, shall be taken in such order as the Mayor or the Alderman at whose instance such special meeting shall have been called may have directed.

5. The business paper for every meeting of the Council other than a special meeting shall be made up by the Council Clerk not less than one nor more than three days before the day appointed for such meeting. He shall enter on such business paper a copy of the substance of every notice of motion and of every requisition or order as to business proposed to be transacted at such meeting which he shall have received or shall have been required or directed so to enter in due course of law and as hereinafter provided. Every such entry shall be made (subject to the provisions of section 3 of this Part of these By-laws) in the same order as such notice, requisition, or direction shall have been received.

6. The business paper for each special meeting shall contain only such matters as shall have been specially ordered to be entered thereon by the Mayor or Alderman calling such meeting.

7. The summons to members of the Council for every meeting thereof shall be prepared from the business paper for such meeting, and shall embody the substance of such business paper.

8. All notices of motion and all requisitions from Aldermen and directions from the Mayor as to the entry of any particular matters of business for the consideration of the Council at its then next or any future meeting shall be numbered by the Council Clerk as they are received; and each such notice, requisition, and direction shall be preserved by such clerk until after the matter to which it relates shall have been disposed of, and the record in the Minute Book of the manner in which such matter has been disposed of shall have been duly verified as required by section 3 of this Part of these By-laws: Provided however that the person giving or forwarding any such notice of motion, requisition, or direction to the Council Clerk shall be at liberty to withdraw the same any time before the making up of the business paper.

9. After the business paper shall have been made up as aforesaid, all the said notices of motion, requisitions and directions as to which entries have been made thereon shall be the property of the Council, and shall not be withdrawn, altered, or amended without leave having been first obtained from the Council for such withdrawal, alteration, or amendment.

Motions and Amendments.

10. Except by leave of the Council motions shall be moved in the order in which they stand on the business paper, and if not so moved or postponed shall be struck from such business paper and be considered to have lapsed.

11. No motion of which notice shall have been entered on the business paper shall, except as hereinafter provided, be proceeded with in the absence of the Alderman by whom such notice shall have been given, unless by some other Alderman producing a written authority for that purpose from such first-named Alderman.

12. No motion in Council shall be discussed unless and until it be seconded.

13. When a motion in Council shall have been made and seconded, any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed unless and until it be seconded.

14. No motion or amendment shall be discussed until it shall have been reduced into writing.

15. No second or subsequent amendment shall be taken into consideration until the previous amendment or amendments shall have been disposed of.

16. If any amendment be carried, the question as amended thereby shall become itself the question, and the Council shall to all intents and purposes be bound by such amendment as if it were the original question.

17. If any amendment—either upon the original question, or upon any question amended as aforesaid—shall be negatived, then a further amendment may be moved to the question to which such first-mentioned amendment was moved and so on: Provided that not more than one question and one proposed amendment thereof shall be before the Council at any one time.

18. No discussion shall be permitted upon any motion for adjournment of the Council; and if upon the question being put on any such motion the same be negatived, the subject then under consideration or the next in order on the business paper or any other on such paper that may be allowed precedence, shall be discussed before any subsequent motion for adjournment shall be receivable.

19. Every requisition by an Alderman that any particular matter of business be brought before the Council shall be regarded and treated as a notice of motion by such Alderman that such business be taken into consideration by the Council; and he shall be called upon in due order to move that such business be so considered, or to make any other motion which he may think fit in reference thereto, which shall be consistent with the notice of such business and with good order; and if such Alderman be absent, or if being present and so called upon he shall make no such motion, then it shall be open to any other Alderman to make such motion. And when any such motion shall have been made, it shall be dealt with in precisely the same manner as if notice thereof had been given, subject

however to any objection which may exist as to its not being in accordance with the notice actually given of such business or with good order. And if no motion shall be made in reference to such business, the entry relating thereto shall be struck from the business paper.

Orders of the day.

20. The orders of the day shall consist of any matter other than motions of notice which the Council shall at a previous meeting thereof have directed to be taken into consideration, or which the Mayor or any Committee of the Council shall have directed to be entered on the business paper for consideration.

21. Section 19 of this Part of these By-laws shall be considered applicable to orders of the day; and the Alderman who has the usual charge of, or who has previously moved in reference to the particular business to which any such order of the day relates shall be the person called upon to move: Provided that as to any order of the day entered as aforesaid by direction of the Mayor, such Mayor may arrange with any Alderman to move, and may in such case call upon the Alderman with whom he has so arranged.

Petitions.

22. It shall be incumbent on every Alderman presenting a petition to acquaint himself with the contents thereof, and to ascertain that it does not contain language disrespectful to the Council. The nature and prayer of every such petition shall be stated to the Council by the Alderman presenting the same.

23. All petitions shall be received only as the petitions of the parties signing the same.

24. No motion shall, unless as hereinafter provided, be permissible on the presentation of a petition except that the same be received, or that it be received or referred to one of the permanent Committees hereinafter mentioned, or that it be received and that its consideration stand an order of the day for some future meeting: Provided, however, that if any Alderman shall have given notice of a motion, in reference to any petition, and such petition shall have been presented before such Alderman shall have been called upon to move such motion, the said motion shall if otherwise unobjectionable, be considered in order.

Correspondence.

25. The Mayor shall have the same duty in reference to letters addressed to the Council before directing the same to be read as by section 22 of this Part of these By-laws is imposed upon Aldermen presenting petitions. The Mayor shall direct as to the order in which all correspondence shall be read, and no letter addressed to the Council shall be presented or read by any Alderman. If the Mayor be absent and shall not have examined any such letters addressed to the Council, or have given any such directions as aforesaid, then the duties imposed by this section shall devolve upon the presiding Aldermen.

26. Section 24 of this Part of these By-laws shall be considered as fully applicable to letters addressed to the Council as to petitions.

27. No discussion shall be permitted in reference to any letters which have been written and sent by the Mayor, or by any officer of the Council, and copies of which may be read to such Council: Provided, however, that any notice of motion consistent with good order may be entertained with reference to any such letters, whether read or not, or with reference to any letters addressed to the Council which the Mayor or presiding Alderman may not have ordered to be read as aforesaid.

Reports from Committees and Minutes from the Mayor.

28. All reports from Committees shall be written on foolscap paper, with a margin of at least one-fourth of the width of such paper, and shall be signed by the Chairman of such Committee, or in his absence by some other member of the same.

29. The Mayor shall have the right of directing the attention of the Council to any matter or subject within its jurisdiction or official cognizance by a minute in writing. Every such minute shall be written upon paper of the same kind and with the same margin as a report from a Committee, and shall be signed by such Mayor.

30. No motion shall (unless as hereinafter provided) be permissible on the presentation of a report from a Committee or a minute from the Mayor, except that the same be received, or that it be received and that its consideration stand an order of the day for some future meeting: Provided, however, that if any Alderman shall have given due notice in reference to any such report or minute, or if an order for the consideration of such report or minute shall have been entered among the orders of the day, such motion or order may, if otherwise unobjectionable, be moved or considered in due course. And whenever any such report or minute embodies any recommendation which cannot legally be carried out without due notice, and it is nevertheless desirable that such report or minute shall be definitely ordered upon during the meeting of the Council at which such report or minute is presented, it shall be the duty of the Chairman or member of such Committee signing such report, or of such Mayor, as the case may be, to give or transmit to the Council Clerk such a notice of motion, requisition, or direction as aforesaid as will enable such Council Clerk to make the necessary entry on the business paper and to give such due notice.

Questions and statements.

31. No question or statement shall be allowed to be put or made which is inconsistent with good order or is not in strict accordance with the requirements of section 3 of this Part of these By-laws.

32. Sufficient notice of every question shall be given to the person who is expected to reply thereto, to allow for the consideration of such reply, and if necessary for a reference to other persons or to documents.

33. It shall not be compulsory upon any person questioned as aforesaid to answer the question so put to him.

34. Every such question must be put categorically without any argument or statement of fact.

35. Every such statement must be made without argument.

36. No discussion shall be permitted as to any such question, or as to any reply or refusal to reply thereto, or as to any such statement, at the time when such question is put, or such reply or refusal to reply is given, or such statement is made: Provided, however, that nothing herein contained shall prevent the taking of any objections to any such question or statement being out of order, or shall prevent the discussion, after due notice, as hereinbefore provided, of any matters properly arising out of or relating to any such question or reply, or refusal to reply, or any such statement as aforesaid.

Order of debate.

37. Every Alderman who shall make or second any motion, or shall propose or second any amendment, or shall take any part in any debate or discussion, or shall put or reply to any question, or shall make any statement, or shall in any other way, or for any other purpose, address observations to the Council, shall while so doing stand up in his customary place (unless he shall be prevented from so doing by reason of some bodily infirmity) and shall address himself to the Mayor or other Chairman then presiding: Provided that in the case of a question, such question may, by permission of such Mayor or Chairman, be put directly to the Alderman or officer to be questioned, and may be replied to in like manner; but in every such case the question so put, and the answer thereto, shall be subject to every legal objection on the ground of disorder or irrelevancy. And all members of the Council shall on all occasions when in such Council address and speak of each other by their official designations, as Mayor, Chairman, or Alderman, as the case may be.

38. No Alderman shall be interrupted while thus speaking, unless for the purpose of calling him to order, as hereinafter provided.

39. Every mover of an original motion shall have a right of general reply to all observations which may have been made in reference to such motion, and to any amendments moved thereon, as well as a right to speak upon every such amendment. Every Alderman, other than the mover of such original motion, shall have a right to speak once upon such motion and on every amendment thereon. No Alderman shall speak oftener than once upon any question other than a question of order unless when misrepresented or misunderstood, in which case he shall be permitted to explain, without adding any further observations than may be necessary for the purposes of such explanation.

40. An Alderman who has moved any motion or amendment shall be considered to have spoken thereon; but an Alderman who shall have seconded any such motion or amendment without any further observation than that he seconded the same, shall be at liberty to speak on such motion or amendment.

41. No Alderman shall digress from the subject under discussion, or shall make personal reflections on nor impute improper motives to any other Alderman.

42. A debate may be adjourned to a later hour of the day or to any other day specified, and the Alderman upon whose motion such debate shall have been so adjourned shall be entitled to pre-audience on the resumption of the same.

43. If two or more Aldermen rise to speak at the same time the Mayor or Chairman shall decide which of such Aldermen shall be first heard.

44. Any Alderman may request the question or matter under discussion to be read or stated for his information, or may require the production of any records of the Council bearing upon such question or matter which are readily accessible: Provided however that no such request or requisition shall be so made as to interrupt any other Alderman when speaking, or materially to interrupt the discussion; also, that if such request or requisition shall appear to the Mayor or Chairman not to have been made *bona fide* it shall not be complied with.

45. The Mayor or Chairman shall not move nor second any motion or amendment, nor put any question as provided for by section 3 of this Part of these By-laws, except as is further provided for by section 37 of the same; but such Mayor or Chairman shall have the same right as any other Alderman to speak once upon every such subject or amendment. The Mayor or Chairman shall rise when so speaking (unless prevented by some bodily infirmity from so doing), but shall be considered as still presiding.

Questions of order.

46. The Mayor or Chairman shall preserve order, and his decision on disputed points of order or practice shall be final, except in so far as the same may be questioned as in the manner hereinafter provided.

47. Every member of the Council who shall commit a breach of any section of this Part of these By-laws, or who shall move or attempt to move any motion or amendment embodying any matter as to which the Council has no legal jurisdiction, or who shall in any other way raise or attempt to raise any question, or shall address or attempt to address the Council upon any subject which the said Council has no legal right to entertain or discuss, or who shall use any other language which, according to the common usage of gentlemen, would be held disorderly, or who shall say or do anything calculated to bring the Council into contempt, shall be out of order.

48. The Mayor or Chairman may, without the interposition of any other member of the Council, call any Alderman to order whenever in the opinion of such Mayor or Chairman there shall be a necessity for so doing.

49. Every member of the Council shall have the right of calling the attention of the Mayor or Chairman to any motion, amendment, statement, argument, or observation moved, used, or made by any other member which such first-named may consider out of order.

50. A member called to order shall withdraw while the question of order is being discussed and decided upon, unless specially permitted to offer an explanation, retraction, or apology; but on obtaining such special permission such member may explain, retract, or apologize for the matter or remark alleged to have been out of order: And if such explanation, retraction, or apology be deemed satisfactory, no further discussion on the question of order shall be permitted. If any member on being called to order shall ask such permission to explain, retract, or apologize as aforesaid, the Mayor or Chairman may of his own authority grant or refuse such permission as he may think fit, unless any member shall require the sense of the Council to be taken on this question. In such case it shall be the duty of the Mayor or Chairman to take the sense of the Council at once, and without discussion as to whether such permission shall be granted. And when any such explanation, retraction, or apology shall have been made or offered by permission of the Mayor or Chairman, the latter shall in like manner decide, or if required so to do, shall take the sense of the Council as to whether such explanation, retraction, or apology is considered sufficient. If such permission be refused, or if such explanation, retraction, or apology be considered insufficient, the question of order shall be considered and decided before any further business is proceeded with: Provided that if such Mayor or Chairman shall have decided the question of order before any member shall have required the sense of the Council to be taken in reference thereto, such question of order shall not be re-opened; and provided further that nothing herein contained shall be held to affect the right of such Mayor or Chairman to decide finally as hereinbefore provided upon any such point of order after the same shall have been discussed.

51. The Mayor or Chairman when called upon to decide points of order or practice shall state the provision, rule, or practice which he shall deem applicable to the case, without discussing or commenting upon the same.

52. Whenever it shall have been decided as aforesaid, that any motion or amendment or other matter before the Council is out of order, the same shall be rejected; and whenever anything said or done in Council by any Alderman shall be similarly decided to be out of order, such Alderman shall be called upon by the Mayor or Chairman to make such explanation, retraction or apology as the case may require.

53. Any member of the Council who shall have been called to order, and who shall, after having been twice directed to withdraw as aforesaid, refuse to do so, or who shall persist in any line of conduct or argument, or of observations, which shall have been decided as aforesaid to be disorderly, or who shall refuse to make such explanation, retraction, or apology as aforesaid, when required so to do, or who shall be guilty of any other act of disorder as defined in section 47 of this Part of these By-laws, and shall refuse to make such explanation, retraction, or apology, as a majority of the Aldermen then present shall consider satisfactory, shall be liable on conviction for the first offence to a penalty of not less than ten shillings nor more than five pounds; and on the second conviction for the like offence, he shall be liable to a penalty of not less than one pound nor more than ten pounds; and on a third conviction for the like offence, he shall be liable to a penalty of not less than two pounds nor more than twenty pounds.

54. Any Alderman who is dissatisfied with the decision of the Mayor or Chairman on any such question of order or of practice may, by motion on notice respectfully worded, invite the Council to lay down a different rule or principle for the determination of any similar questions of order or practice which may thereafter arise. Any rule or principle thus laid down shall be binding upon all parties, unless and until it be

rescinded, but shall have no retrospective operation: Provided, however, that nothing herein contained shall be held to bind any Mayor or Chairman to put any motion to the Council which in his opinion is contrary to law.

Mode of voting.

55. The Mayor or Chairman shall put to the Council all questions on which it shall be necessary that a vote be taken, and shall declare the sense of such Council thereon; and he shall be at liberty to put any such question as often as may be necessary to enable him to form and declare his opinion as to the opinion of the majority.

56. Any Alderman shall be at liberty to call for a division. In such case the question shall be put first in the affirmative, and then in the negative; and the Aldermen shall vote by show of hands, and the names and votes of the Aldermen present shall be recorded. Any Alderman who shall be present when a division is called for, and shall not vote in such division—not being disabled by law from so doing—shall be liable for every such offence to a penalty of not less than ten shillings nor more than five pounds.

Protests.

57. Every member of the Council (the Mayor included) may protest against any resolution or vote by the Council. Notice of the intention so to protest must, however, be given at the meeting when such resolution is passed or such vote is arrived at, and the protest itself must be handed or sent to the Council Clerk not later than seven days after such notice. The Council Clerk shall enter every such protest in the Minute Book; but if in the opinion of the Council it be inconsistent with the truth or disrespectfully worded it may, by resolution on notice, be ordered to be expunged. In such case the expunction shall be made by drawing a particular line with the pen through the entry of such protest, with a reference in the margin to the resolution ordering such expunction.

Committees of the whole Council.

58. The following sections of this Part of these By-laws shall (except as is herein excepted) be taken to apply to the conduct of business in Committee of the whole Council, namely:—Sections 13 (except that it shall not be necessary that any motion or amendment in Committee shall be seconded), 14, 15, 16, 17, 37, 38, 41, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 55, and 56.

59. Whenever any member of the Council shall, while the Council is in Committee of the whole, be considered guilty of an offence against good order within the meaning of section 53 of this Part of these By-laws, it shall be competent to any Alderman to move that the Council resume its sitting and that such matter be reported; and if such motion be carried, such matter shall be reported accordingly, and an entry of such report shall be made in the Minute Book. And whenever any Alderman shall have failed to vote on any occasion in Committee of the whole Council as required by section 56 of this Part of these By-laws, the facts shall be reported to the Council, and such report on such facts shall be duly recorded in the Minute Book: Provided that in the case of an Alderman failing to vote as aforesaid, no special motion that the Council resume its sitting shall be necessary; but it shall be the duty of the Chairman of such Committee of the whole, in making his report of the proceedings in such Committee, whenever such report may be made to include in such report a statement of such failure to vote as aforesaid, and of the question as to which such Alderman has so failed to vote.

60. Whenever a decision upon any question of order shall have been given by the Chairman of a Committee of the whole Council under the provision of section 46 of this Part of these By-laws, any Alderman may move that such decision be embodied in the report to the Council of the proceedings in such Committee; and if such motion be carried, such decision shall be so embodied in such report whenever the same shall be made.

61. Any Alderman may at any time during the sitting of the Committee of the whole Council move that the Chairman report "progress," (or "no progress" as the case may be), and that leave be asked to sit again at a later period of the same day, or on any future day, or that no leave be asked to sit again. And if any such motion be carried, the Council shall resume its sittings, and a report shall be made accordingly, but no discussion shall be permitted on any such motion; and if the same be negatived, the subject then under consideration shall be discussed before another such motion shall be receivable.

62. All reports of proceedings in Committee of the whole Council shall be made to the Council *visa voce* by the Chairman of such Committee, and a report of such proceedings shall be made in every case, except when it shall be found on counting the number of members during the sitting of any such Committee that there is not a quorum present. In the latter case the sitting of the Council shall be resumed without any motion for that purpose, and the proceedings in Committee shall be considered to have lapsed: Provided that, in making of any such report as aforesaid, it shall not be necessary to report any such proceedings *in extenso*, but only to state the result, general effect, or substance of such proceedings.

63. All such reports of proceedings in Committee of the whole Council shall be recorded in the minute book, but except as hereinafter mentioned, no such report shall be considered as adopted by the Council, nor shall any such application, as aforesaid, for leave to sit again be considered to have been granted by such Council, until a motion shall have been made and passed for such adoption, or for the granting of such leave. And every such motion for the adoption of a report, or for the granting of leave, as aforesaid, and the order of debate on such motion shall be subject to all the same rules as other motions in Council, and the order of debate on such other motions. Provided however, that where a report shall have been made under section 59 of this Part of these By-laws, of disorderly conduct in Committee, or, under section 56 of this Part of these By-laws, of failure to vote on division, or of any decision in Committee upon any question of order, such report shall, so far as it relates to such facts, be regarded and recorded as a statement thereof, and to that extent shall not, unless for the correction of a manifest error, be interfered with upon any pretext whatever.

Calls of the Council.

64. A Call of the Council may be ordered by any resolution, of which due notice shall have been given, for the consideration of any motion or matter of business before such Council.

65. There shall, without any special order to that effect, be a Call of the Council for the consideration of every motion which may be made under section 54 of this Part of these By-laws, and of every motion for the rescission of any resolution, order, or decision of such Council.

66. The Call shall be made immediately before the motion or business for which such call has been ordered or is required to be made, by the last preceding section, shall be moved or considered. Such Call shall be made as follows:—The Council Clerk shall call the names of all members in their alphabetical order; each member present shall answer to his name as so called, and if any members are absent a record shall be made of such absence. But if leave of absence to any such member shall have previously been granted, or if such an excuse in writing shall have been forwarded to the Mayor or Council Clerk as a majority of the Council then present shall consider satisfactory, such absent member shall stand excused, and a record shall be made of such excuse, and of the reasons for the same.

67. Any member of the Council who having had notice of such Call of the Council shall not answer to his name as aforesaid, or who being absent shall not be legally excused as aforesaid, or who if absent, and not so excused shall fail to show that, by reason of extreme illness, or any other sufficient cause, he has been unable to send a sufficient excuse in writing, as aforesaid, or who having answered to his name as aforesaid, shall not be present when a vote is taken on the motion or business as to which such call has been made as aforesaid, shall for every such offence be liable to a penalty of not less than ten shillings nor more than five pounds: Provided that if the consideration of every such motion or matter of business be adjourned to a future day, there shall be a further Call on the resumption of such consideration; and the provisions herein, as to penalties for absence, shall have reference to such further Call. And if there shall be more than one adjournment, this proviso shall be taken to extend to the resumption of the consideration of such motion or matter of business after every such adjournment.

Standing and Special Committees.

68. A Committee of the whole Council shall have the functions of a By-law Committee, a Committee for Works, a Finance Committee, and a Committee for general purposes, to be appointed every year, at the first meeting of the Council which shall be holden after the election of Mayor, and shall exercise the following powers—that is to say:—

- (1) The By-law Committee shall prepare for the consideration of the Council drafts of all such By-laws as may be required for the good government of the Municipality.
- (2) The Committee for Works shall have the direction of all works ordered and sanctioned by the Council, and the general inspection of all streets, roads, ways, bridges, public reserves, and other public places under the care and management of the Council.
- (3) The Finance Committee shall examine and check all accounts, and shall watch generally over the collection and expenditure of the municipal revenue, and may during the interval of regular meetings expend any sum not exceeding five pounds.
- (4) The Committee for general purposes shall take cognizance of every matter, subject, or question within the jurisdiction of the Council, and not hereinbefore reserved.

69. Special Committees may consist of any number of members, and may be appointed for the performance of any duty which may be lawfully entrusted to a Committee, and for which, in the opinion of the Council, a special Committee ought to be appointed.

Common seal and records of the Council.

70. The common seal shall be in custody of the Mayor, or if found more convenient it may, by resolution of the Council, be placed in charge of the Council Clerk, and shall be kept in such secure form as the Mayor may direct.

71. The common seal shall not be attached to any document without an express order of the Council. In every case where such common seal has been ordered to be attached to any document, such document shall also be signed by the Mayor; or, in case of the absence or illness of such Mayor, by two Aldermen, and countersigned by the Council Clerk.

72. The Treasurer shall keep such books of account and such records, statements, and memoranda of receipt and expenditure in such manner and form as the Council may from time to time direct. It shall be the duty of the Finance Committee to inspect all such books of account, records, statements, and memoranda from time to time, to ascertain that the same are properly kept, and to report at once to the Council any act of neglect or appearance of inefficiency which they may have discovered in the keeping of the same; also to report to the Council, from time to time, any changes which such Committee may think advisable in the mode of keeping the accounts.

73. The Minute-book, Letter-book, and all Rate and Assessment books, books of account, records, statements, and memoranda of receipts and expenditure, electoral rolls, and other records relating to elections, business papers, reports from Committees, minutes from the Mayor, petitions, letters on municipal business addressed to the Council or to the Mayor, or to any officer or servant of the Council, orders, reports, returns, and memoranda relating to municipal business, drawings, maps, plans, contracts, specifications, agreements, and all other books and papers connected with the business of the Council, shall be deemed records of the Council. All such records, other than the Minute-book and other books, and other than electoral rolls, and other records relating to elections, shall be numbered and filed in due order, and shall be duly registered by the Council Clerk in a book to be kept by him for that purpose. Upon the face of every document thus registered to which there is any reference in the Minute-book, there shall be a note of the page wherein it is so referred to. And when any order has been made by the Council, or a report has been brought up by any Committee thereof in reference to any document so registered as aforesaid, a note of such order or report shall be made upon such document. It shall be the duty of the By-law Committee to inspect the records from time to time, to ascertain that the same are properly kept as aforesaid, and to report at once to the Council any act of neglect or appearance of inefficiency which they may discover in the keeping of such records.

74. No member or officer of the Council shall be at liberty to take any impression of the corporate seal, or to show, lay open or expose any of the books or records of the Council to any person other than a member of the same without leave from such Council, except as otherwise provided by law. Any member or officer of the Council who shall be guilty of a breach of this section shall be liable, on conviction for the first offence, to a penalty of not less than five shillings nor more than two pounds; for a second offence, to a penalty of not less than one pound nor more than ten pounds; and for a third and every subsequent offence, to a penalty of not less than five pounds nor more than twenty-five pounds.

75. Any person removing any such book or other record of the Council as aforesaid from the Council Chamber, or the place where by direction of the Council such book or other record is usually kept, without leave for such removal having been first obtained from such Council, or without other lawful cause for such removal as hereinafter provided, shall for every such offence be liable to a penalty of not less than ten shillings nor more than ten pounds. And nothing herein contained shall be held to affect the further liability of any person who shall have removed such book or other record as aforesaid, and shall not have returned the same, to prosecution for stealing such book or record, or to an action at law, for detention of the same, as the circumstances of the case may warrant: Provided that leave for temporary removal of a book or other record may be granted to the Council Clerk or the Treasurer by the Mayor, in order that such Clerk or Treasurer may post up entries, prepare returns, or perform any other duty which it may be necessary that he should perform; also that the Mayor or the Chairman of any Committee, or any Alderman acting for any such Chairman, may temporarily remove any record necessary for the preparation of a minute or a report, or for the purpose of any prosecution or suit at law, by, against, or at the instance of the Council. But in all such cases such Clerk, Treasurer, Mayor, Chairman, or Alderman, as the case may be, shall give a receipt under his hand for every document so removed, and every such receipt shall be carefully preserved among the records until the book or other record to which it refers shall have been returned, when such receipt shall be destroyed; and provided also that the Mayor, Council Clerk, or other officer of the Council who may be subpoenaed to produce any book or other record of the Council in a Court of law, shall have the right to remove such book or other record for the purpose of obeying such summons, but shall return such book or

record as speedily as may be, and shall before removing the same leave at the Council Chamber a receipt for such book or other record as aforesaid. And every such person so temporarily removing any book or other record of the Council as aforesaid shall be legally responsible for the safe keeping and return of the same.

76. Any person destroying, defacing, or altering any record of the Council, shall for every such offence be liable to a penalty of not less than five pounds nor more than fifty pounds.

Officers and Servants.

77. No appointment to any permanent office at the disposal of the Council shall take place until public notice shall have been given, as hereinafter provided, inviting applications from qualified candidates for the same.

78. Every such appointment shall be made by ballot, in such mode as may at the time be determined on by the Council.

79. Nothing herein contained shall be held to prevent the appointment by the Council, without advertisement, of any salaried officer or servant of the Corporation to any other permanent office or employment at the disposal of such Council, to which no further salary is attached, or to prevent the appointment in like manner of any such officer or servant to any other office or employment of which the duties require only occasional attention, and are to be paid for by allowance proportionate to the extent of such duties, or to prevent any similar appointment or employment by the Mayor, or by any Committee or officer of the Council, or of any such officer or servant under the authority of any by-law, or to prevent the employment as may be from time to time found necessary and as may be ordered by the Council, of any workmen or labourers on the public works of the Municipality.

80. All bonds given by officers or servants of the Council for the faithful performance of their duties shall be deposited with the attorney or the bankers of the Corporation as the Council may order, and no officer or servant of the Council shall be received as surety for any other such officer or servant.

81. The Council Clerk, in addition to the duties which by the Municipalities Act of 1867 or by the present or any other by-law thereunder he may be required to perform, shall be the clerk of all Revision Courts held in the Municipality under the provisions of the said Municipalities Act. He shall also, under the direction of the Mayor, conduct all correspondence which may be necessary on the part of the Council. He shall likewise have charge of all the records of such Council, except such books or documents as may (as hereinafter provided) be entrusted to any such officer, and shall be responsible for the safe keeping of such records. He shall generally assist the Mayor in carrying out the orders of the Council and the duties of such Mayor.

82. The Treasurer shall have charge of such books of account and other records of the Council as are mentioned in section 72 of this "Part" of these By-laws, and shall be responsible for the safe keeping of the same. Any other officer of the Council may have any other records thereof committed to his charge by an order of the Council, and in such case shall be responsible for the safe keeping of such records.

83. The duties of all officers and servants of the Corporation other than the Council Clerk and Treasurer, shall be defined by such regulations as may from time to time and in accordance with law be made by the Council.

84. The Mayor shall exercise a general supervision over all officers and servants of the Corporation, and may order the preparation of any such return or statement, or the giving of any such explanation or information by any such officer or servant as he may think necessary, unless such return or statement shall have been already prepared or such explanation or information already given and such return statement explanation or information is on record as hereinbefore provided, or unless the Council shall have expressly forbidden or dispensed with the preparation of such return or statement or the giving of such explanation or information. All such returns or statements as aforesaid shall be in writing and shall be recorded. All such explanation or information may, except as hereinafter provided, be either rendered *vis à voce* or put into writing as the Mayor may direct.

85. All complaints against officers or servants of the Corporation must be in writing, and must in every case be signed by the person or persons complaining. And no notice whatever shall be taken of any complaint which is not in writing or is anonymous. All such complaints may be addressed to the Mayor, who immediately upon the receipt of any such complaint, and without laying the same before the Council, shall have power to investigate the same. And if any such complaint be made to the Council, or to any member or officer thereof, it shall be referred to and investigated by the Mayor before it shall be in any way (otherwise than by such reference) ordered upon or dealt with by such Council: Provided that every report, explanation, and information which may be made or rendered in reference to every such complaint shall be in writing. And such Mayor shall state in writing the result of every such investigation, and his opinion as to what order (if any) ought to be made in connection therewith. And such

complaint, with all reports, explanations, and information as aforesaid thereon, shall be laid before the Council at the next meeting thereof which shall be holden after the Mayor shall have made such statement and shall be duly recorded: Provided further that nothing herein contained shall be held to affect in any way the special powers conferred on the Mayor by section 152 of the Municipalities Act of 1867, or any other special power which now is or hereafter may be conferred by statute upon such Mayor.

Miscellaneous.

86. No leave of absence shall be granted to the Mayor or to any Alderman otherwise than by a resolution of the Council adopted after due notice.

87. Whenever it is decided that any work shall be executed or any materials supplied by contract, tenders for the execution of such work, or the supply of such materials, shall be called for by public notice, as hereinafter provided.

88. A draft of any future by-law shall be in the office of the Council for at least seven days before such draft shall be taken into consideration by such Council, and shall be open to the inspection of any ratepayer who may desire to inspect the same, and public notice shall be given, as hereinafter provided, that such draft is so lying for inspection.

89. Whenever a motion for the rescission of any order, resolution, or vote of the Council shall have been negatived no other motion to the same effect shall be permissible until a period of three months shall have elapsed from the time of negativing such first-mentioned motion: Provided that nothing herein contained shall be held to prohibit the reconsideration and amendment of any proposed by-law which may have been submitted to the Governor for confirmation, and may have been remitted to the Council with suggested amendments of the same, or the passage after due notice as hereinbefore provided, and in due course of law by any by-law for the repeal or amendment of any other by-law.

90. Whenever the consideration of any motion or matter of business shall have been interrupted by reason of a quorum not having been present, the resumption of such consideration may be ordered by resolution of the Council after due notice, and such consideration shall in such case be resumed at the point where it was so interrupted as aforesaid.

91. Such suits or informations for the enforcements of penalties for or in respect of breaches of the Municipalities Act of 1867, or of any by-law made thereunder, or of any statute, the operation of which may have been extended to the municipality, as may have been directed by the Council, or by the by-law committee, or by the Mayor, to be commenced or laid, shall be so commenced or laid as follows, namely:—When against a member of the Council, or an Auditor, or any officer of the Corporation, by the Council Clerk, unless such Council Clerk shall be the officer to be proceeded against, and in such case by any other officer named by the Council for that purpose. When against any other person, by the officer to whom the carrying out of the statutory provision or by-law imposing the penalty sought to be enforced has been entrusted, and if there shall be no such officer then by any such officer or person as shall be appointed for that purpose by the Council or the By-law Committee, or the Mayor, as the case may be, on directing such suit or information as aforesaid. And no such suit shall be brought or information laid as aforesaid against any member of the Council or Auditor, except by order of such Council, nor any similar proceeding be taken against any officer of the Council, except on the order of such Council or of the Mayor, nor against any other person, except upon the order of the Council or of the Mayor or of the By-law Committee. And no such suit shall be directed to be brought, nor shall any information be directed to be laid as aforesaid, except on an express resolution of the Council in any case when the bringing of such suit or the laying of such information will be adverse to any previous direction by such Council or where on the trial or hearing of any such suit or information the same shall have been dismissed on the merits: Provided that in any such case the conduct or prosecution of any such suit or information may on the order of the Council be entrusted to an attorney.

92. In all cases where public notice is or shall be required to be given by any by-law of any appointment, resolution, act, order, or regulation done, made, or passed, or proposed to be made, done, or passed by the Council, or by any Committee thereof, or by the Mayor or any officer of the said Council, such notice shall be given and published by posting the same on or near the outer door of the Council Chambers for the space of seven days, and by advertising the same in some newspaper circulating in the Municipality.

Collection and enforcement of rates.

93. All rates levied or imposed by the Council under the provisions of section 164 of the Municipalities Act of 1867, and for the purposes mentioned in the said section, shall be collected by half-yearly instalments. Each such instalment shall as to every such rate and every such instalment thereof be held to be due and payable on and after such days as the Council shall by resolution appoint at the time of making or imposing such

94. All rates levied or imposed by the Council under sections 165, 166, and 167 of the said Municipalities Act of 1867, and for the purposes mentioned in the said sections, or under the provisions of any of the said sections, or for any of the purposes mentioned therein, shall be collected in such manner, and shall be held to be due and payable on and after such day or days as the Council may by resolution at the time of making or imposing such rates or any of them, have appointed.

95. All persons liable to pay any rates as aforesaid shall pay the amount thereof, within the time prescribed by the Act, into the office of the Council Clerk during office hours, or to any person that may be appointed to collect the said rates.

96. It shall be the duty of the Council Clerk to furnish the Mayor with a list of the names of all persons whose rates are unpaid at the expiration of the time fixed for payment of the same as aforesaid.

97. It shall be the duty of the Mayor to issue distress warrants against all such persons, and to cause such warrants to be enforced, or to cause such defaulters to be sued for the amount of such rates in a Court of competent jurisdiction.

Enforcement by distress.

98. The Bailiff shall be appointed by resolution of the said Council, and shall be at any time removable by a like resolution.

99. The Bailiff shall find two sureties to the satisfaction of the Mayor to the extent of fifty pounds each for the faithful performance of his duty.

100. It shall be the duty of the Bailiff to make all levies by distress for the recovery of rates in the manner hereinafter provided.

101. All levies and distresses shall be made under warrant in form of Schedule A, under the hand of the Mayor or any Alderman who may for the time being be duly authorized to perform the duties of that office.

102. If the sum for which any such distress shall have been made shall not be paid with costs as hereinafter provided on or before the expiration of five days, the Bailiff shall sell the goods so distrained, or a sufficient portion thereof, by public auction, either on the premises or at such other place within the said Municipality as the said Bailiff may think proper to remove them to for such purpose, and shall pay over the surplus (if any) that may remain after deducting the amount of the sum distrained for and costs as hereinafter provided to the owner of the goods so sold on demand of such surplus by such owner.

103. At the time of making a distress the Bailiff shall make out a written inventory in the form of Schedule B hereto, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person on his or her behalf resident at the place where the distress shall be made, and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress is made, and the Bailiff shall give a copy of the inventory to the ratepayer on demand at any time within one month after the making such distress.

104. The Bailiff, on making a distress as aforesaid, may impound or otherwise secure the goods or chattels so distrained of what nature or kind soever, in such place or places, or in such part of the land or premises chargeable with rates as shall be most fit and convenient for this purpose; and it shall be lawful for any person whomsoever, after the expiration of the five days hereinbefore-mentioned, to come and go to and from such place or part of the said land or premises where such goods or chattels shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

105. The owner of any goods or chattels so distrained upon may at his or her option direct and specify the order in which they shall be successively sold, and the said goods or chattels shall in such case be put up for sale according to such direction.

106. The Bailiff shall hand over to the Council Clerk all proceeds of every such distress within forty-eight hours after having received the same.

107. There shall be payable to the Bailiff for the use of the Council for every levy and distress made under this By-law, the costs and charges in the Schedule hereunto annexed marked C.

SCHEDULE A.

Warrant of Distress.

I, _____, Mayor of the Municipal District of Wentworth, do hereby authorize you _____, the Bailiff of the said Municipality, to distrain the goods and chattels in the dwelling-house, (or in and upon the land and premises) of situate at _____, for _____, being the amount of rates due to the said Municipality to the day of _____, for the said dwelling-house (or land or premises), and to proceed thereon for the recovery of the said rates according to law.

Dated this _____ day of _____ 18 _____

Mayor.

SCHEDULE B.

Inventory.

I have this day, by virtue of the warrant under the hand of the Mayor of the Municipal District of Wentworth, dated _____, distrained the following goods and chattels in the dwelling-house, (or in and upon the land and premises) of _____, situated at _____ within the said Municipality, for £ _____, being the amount of the rates due the said Municipality to the _____ day of _____ Dated this _____ day of _____ 18 _____ Bailiff.

SCHEDULE C.

Bailiff's fees.

	s.	d.
1. For making entry into or upon the premises on executing a warrant with or without inventory	2	6
2. If more than one hour in possession (additional)	2	6
3. For every other day or part of a day	2	6
4. Five per cent. on the net proceeds of sale.		

Suppression of nuisances.

108. It shall be lawful for any Inspector of Nuisances or other officer appointed by the Council in cases where he has reasonable grounds for believing that any nuisance exists to enter upon and inspect any premises within the Municipality between sunrise and sunset, and upon the reasonable complaint of any householder or occupier of land or premises that the house or premises, yards, closets, or drains of the neighbouring or adjoining premises, are a nuisance, or are kept in an offensive condition, such inspector or other officer as aforesaid shall and is hereby empowered to enter upon and inspect the same; and if upon any such inspection as aforesaid, the said Inspector of Nuisances or other officer as aforesaid shall be of opinion that a nuisance exists on any such premises as aforesaid, or that the said complaint is well founded, notice shall be given in writing to the owner or occupier; of such premises to abate or remove such nuisance within ten days after service of such notice upon such owner or occupier; and if such nuisance shall not be abated or removed within the time aforesaid, such owner or occupier shall be liable to a penalty of not more than ten pounds nor less than one pound.

109. No offensive trades or occupations shall be carried on within the limits of the Municipality so as to be a nuisance to the residents of adjoining or neighbouring premises, or to the public in general, under a penalty of not more than twenty pounds nor less than two pounds.

110. Any officer appointed by the Council to inspect nuisances shall be the person to whom any complaint as to nuisances shall be made in the first instance; and such officer shall have power to enter and inspect the premises complained of, and to order the same to be abated; and any person hindering such officer in the discharge of his duty shall be subject to a penalty of not more than ten pounds nor less than one pound.

111. Any person casting filth, rubbish, or any dead animal into any public watercourse, sewer, waterhole, drain, or reservoir, or who shall suffer any dead animal to remain on his, her, or their land or premises so as to be or become a nuisance, or who shall suffer filth of any kind whatever to flow from their premises over the foot-ways of the streets or roads within the Municipality, shall be subject to a penalty of not more than ten pounds nor less than two pounds.

112. Upon the representation of any respectable resident or owner of property within the Municipality that any house near to or adjoining his premises is a house of ill-fame, it shall be lawful for the Mayor and any two Aldermen to take such legal steps for the removal of the same as may be found necessary; and upon conviction the owner of such establishment shall be liable to a penalty of not more than twenty pounds nor less than five pounds.

113. Any individual who shall offend against decency by the exposure of his or her person in any street or public place within the said Municipality shall on conviction forfeit and pay for every such offence a sum not exceeding ten pounds nor less than five pounds.

Public roads and streets.

114. No new road, street, lane, or park, or other place, to be dedicated to the public, shall be taken under the control or management of the Council until after it shall have been examined and reported upon to the Council by the Committee of Works.

115. Whenever it shall become necessary to alter the levels of any street, road, or lane above or below the depth or height of six inches, the Council shall cause a plan and sections of such alterations which shall be exhibited at the Council Chambers during the period of twenty-one days or on inspection of rate-payers, and notification of such plan and section shall be given by advertisement in some newspaper circulating in the locality, and by notice written in a plain hand in front of the Council Chambers. If during the said period of twenty-one days no

valid objection against such alterations of levels is made, the Council may alter or adopt the same as they see fit, but such alterations (if any) shall in no case increase the depth or height as marked on such plan, and when adopted it shall be signed by the Mayor and countersigned by the Council Clerk, and be a record of the Council.

116. The Works Committee, or the Surveyor (if any), or any person acting for him, shall when necessary mark out any roads, streets or lanes in actual public use, or such as have been dedicated to the public by any plan of sale or lease of land within the boundaries of the district. And it shall be lawful for the Council, or any of its officers appointed for that purpose, to have recourse to any such plans or correct copies thereof for the purpose of defining the point of entrance and point of exit of such road, street or lane.

117. When any street, road or lane has been definitely marked off, the Works Committee or the Surveyor shall cause posts to be placed at the corners of the intersection thereof, leaving for every street of one chain wide a carriage-way of forty-two feet, and for every road or street other than sixty-six feet wide such width of carriage-way to be in the same proportion.

118. Any person who shall open any drain or sewer, or remove or cause to be removed any turf, clay, sand, soil, gravel, stone, or other material in or from any part of any road or footway, or other public place within the municipality without leave from the Council, or who shall in any way wantonly damage any such road or footway, shall forfeit and pay for every such offence a sum not exceeding ten pounds, nor less than five shillings.

119. If any person after the publication of these By-laws shall erect or cause to be erected any building or other structure on any part of any road, street, or way, such person or persons shall be compelled to remove such building or structure or any part of the same, which may be found to obstruct or prevent the even alignment of such street, road, or way. And if the same be not removed within seven days after notification from the Council, the person or persons to whom such obstructions belong shall pay all costs and charges incurred by the Council in removing the same, in addition to a penalty of not more than ten pounds, nor less than five pounds.

120. The Works Committee, or any person acting under their authority, may at any time stop the traffic on any road, street, or lane, for the purpose of repairing, or making the same or any part thereof, or for any necessary purpose, and any person who shall offend against this By-law either by riding or driving thereon, or by removing or destroying any fence or other obstruction which may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty not exceeding ten pounds.

121. Any driver or rider who shall negligently or wilfully injure or cause to be injured any kerb, whether of wood or stone, or any properly aligned pathway, or lead, ride, or drive any horse or other animal, or permit any horse or other animal to stand on any pathway, or cause, permit, or suffer to be run, drawn, driven, or placed upon any of the said pathways any waggon, cart, dray, sledge, or other vehicle, shall forfeit and pay a penalty not exceeding two pounds, nor less than one shilling. Provided always that the provisions of this By-law shall not apply to any person's right of ingress and egress to premises occupied by them.

122. Any person damaging any road, street, or lane, or any portion thereof, by trailing stone or timber thereon, or who shall suffer any timber or stone to trail over the sides of any wheeled vehicle, so as to occupy a greater space than the breadth of the cart or dray upon which it may be drawn, shall forfeit and pay a sum not exceeding two pounds, nor less than one shilling.

123. Any person riding on the shaft of any waggon, dray, or other carriage whatsoever, or the driver of any waggon, cart, dray, or other carriage whatsoever meeting any other waggon, cart, dray, or carriage whatsoever, and not keeping his waggon, cart, dray, or any other carriage whatsoever on the left or near side of the road, or any person in any manner wilfully preventing any other person from passing him, or any carriage, waggon, dray, or cart under his care upon any street, road, public place, or by negligence or misbehaviour preventing, hindering, or interrupting the free passage of any carriage, waggon, dray, or cart whatsoever, or any person in, or upon the same, shall be subject to a penalty of not less than ten shillings, nor more than two pounds.

124. Any person driving any waggon, dray, cart, or other carriage whatsoever, in any water-table of any street or road, or in any other way damaging such street or road, shall be liable to a penalty of not less than ten shillings nor more than two pounds.

125. When any road, street, or lane has been formed, and the pathways put in order, the owners of all houses or other structures abutting thereon shall so arrange the roofs of such structures by spouting or otherwise, as shall prevent the rain from flowing therefrom on to such pathway, and any owner or occupant who shall refuse or neglect to carry out the provisions of this By-law, shall forfeit and pay for every such offence after due notice given, any sum not exceeding five pounds.

126. Nothing contained in any of these By-laws shall be taken to refer or be applied to the driving of any travelling flocks or herds of cattle or other animal, provided the same be not negligently driven.

127. Whenever the word "Mayor" occurs in these By-laws as directing to be done or as being directed to do any matter or thing, the same shall apply to and be understood to mean any Alderman appointed by the Council to act as Mayor for the time being.

128. All fines and penalties for any breach of these by-laws shall be recoverable only by process as directed by section 193 of the Municipalities Act of 1867.

129. All drains or sewers communicating with any public drains or sewers shall from time to time be repaired and cleansed under the inspection and direction of the Council, at the costs and charges of the occupiers of houses, buildings, lauds, and premises, to which the said private sewers or drains shall respectively belong, and in case any person shall neglect to repair and cleanse or cause any such private drain or sewer to be repaired or cleansed according to the directions of the said Council, he shall forfeit and pay for every such offence any sum not exceeding five pounds.

130. Any person who shall wilfully, and without the authority of the Council, cut, break, bark, root-up, or otherwise damage or destroy the whole or any part of any tree, sapling, shrub, or underwood, growing in or upon any street, footpath, or other place, under the management of the Council, shall forfeit any sum not exceeding ten pounds, nor less than one pound.

Slaughter-houses.

131. Every person who may from time to time be in that behalf appointed by the said Council shall be the inspector of Slaughter-houses and of animals intended to be slaughtered within the said Municipality: Provided that if any such inspector shall have been appointed by the Governor for the said municipality, or for any district including the same under the provisions of the Act Fifth, William the Fourth, number One, such last-named inspector shall be considered as the Inspector of Slaughter-houses and of animals intended to be slaughtered within the municipality, for all the purposes of these by-laws.

132. The inspector shall only inspect animals for slaughter in the yards adjoining licensed slaughter-houses.

133. Such inspector shall from time to time enter into and examine all such slaughter-houses, and shall examine the milks or spleens, and lungs, and carcasses of all animals slaughtered, or any animals intended to be slaughtered therein.

134. The owner or occupier of any or every such slaughter-house used for the slaughter of animals intended for human food shall keep the milks or spleens and lungs of all animals slaughtered in the said slaughter-house, for a period of six hours after the animals have been slaughtered, unless the Inspector of Slaughter-houses shall have previously examined the milks or spleens and lungs of such slaughtered animals. And any such owner or occupier as aforesaid who shall neglect or refuse so to do shall forfeit and pay a penalty of not less than forty shillings nor more than twenty pounds.

135. If the owner or occupier of any such slaughter-house shall knowingly cause, permit, or suffer any animal infected with any disease affecting the milt, or spleen, or lungs, to be slaughtered in any such slaughter-house, or if after the slaughter of any animal it shall be found to be diseased, and such owner or occupier as soon as the animal is inspected and condemned shall not immediately thereupon cause the entire carcass to be destroyed by fire in the presence of the inspector, such owner or occupier shall for every such offence forfeit and pay any sum not exceeding fifty pounds nor less than ten pounds: Provided however that should the owner of any animal which may be condemned by the inspector, object to the decision of that officer, such owner shall be at liberty to appoint some veterinary surgeon or other competent person as arbitrator in his behalf, and in the event of the inspector and such veterinary surgeon or other competent person not agreeing, it shall be lawful and incumbent upon them under a penalty of ten pounds each, to appoint an umpire whose decision shall be final.

136. The blood, offal, and filth of all such animals as may be slaughtered in any such slaughter-house, shall be removed at least once in every twelve hours, and any owner and occupier of any such slaughter-house who shall fail, neglect, or refuse to comply with this By-law shall for every such offence forfeit and pay a penalty not less than forty shillings nor more than ten pounds.

137. Nothing herein contained shall extend to or affect any person or persons slaughtering at his, her, or their own residences within the said municipality, animals for his, or her, or their family, servants, or labourers.

138. The word "animal" shall for the purpose of this part of these by-laws be held to include cattle, sheep, pigs, calves, lambs, and goats; and the words "slaughter-house" shall be held to mean any building or place wherein or whereat animals are slaughtered.

Preventing and extinguishing fires.

139. Every person who shall place, or knowingly permit to be placed, in any house, yard, workshop, out-offices, or other premises, fire, gunpowder, or combustible, or inflammable materials of any kind, in such a manner as to endanger contiguous buildings, shall, on conviction for every such offence, forfeit and pay a penalty of not more than five pounds, and shall forthwith remove such fire, gunpowder, or combustible or inflammable materials. And every such person who shall suffer any such fire, gunpowder, or combustible or inflammable materials to remain as aforesaid, for three days after any such conviction, shall be deemed guilty of a further offence against this by-law.

140. Every person who shall erect any fence of brushwood, bushes, or other inflammable material, or shall make or place any stack of hay, corn, straw, or other produce, or place as or for the covering of any such stack any inflammable material, so as to endanger contiguous buildings or properties, or any trees, shrubs, or other produce thereof, or any chattels therein, shall forfeit, on conviction, for every such offence, a penalty of not more than five pounds, and shall also remove such fence, stack, or covering, within a reasonable time after such conviction. And any person failing to remove such fence, stack, or covering within a reasonable time after any such conviction as aforesaid, shall be deemed guilty of a further offence against this by-law.

141. Every person who shall wilfully set fire to any inflammable matter whatsoever in the open air without having given notice in writing to the occupiers of the land adjoining to the land upon which such matter shall be, and also to the Council Clerk, of his intention so to do, or within twenty-four hours after giving the last given of such notices, or between the hours of four in the afternoon of any day and eight in the morning of the following day, shall forfeit a sum not exceeding five pounds.

142. Every person who shall light any bonfire, tar-barrel, or firework upon or within sixty yards of any public or private street, or any public place shall forfeit a sum not exceeding five pounds.

143. Every person who wilfully sets, or causes to be set on fire any chimney-flue, smoke-vent, or stove-pipe, herein called in common "chimney," shall forfeit a sum not exceeding five pounds: Provided always that nothing herein contained shall exempt the person so setting or causing to be set on fire any chimney from liability to be informed against, or prosecuted before any Criminal Court for such act as for an indictable offence.

144. If any chimney accidentally catch or be on fire, the person occupying or using the premises in which such chimney is situated, shall forfeit a sum not exceeding forty shillings.

Public Exhibitions, &c.

145. No exhibition—other than exhibitions licensed by the Colonial Secretary, under the provisions of the Act 14th Victoria No. 23, or exhibitions of a temporary character hereinafter specially provided for—shall be held, or kept for hire or profit, within the said municipality, nor shall any bowling alley or other place of public amusement—other than a place licensed as aforesaid, or a place for temporary amusement hereinafter specially provided for—be used as such for hire or profit within the said municipality, unless and until the same shall be duly registered as hereinafter prescribed.

146. It shall be lawful for the Mayor by writing under his hand, and without charge to permit any such exhibition as aforesaid, other than an exhibition requiring to be licensed by the Colonial Secretary under the said Act, and which shall not be held or kept for more than seven days, and in like manner, to allow any place within the said municipality to be used for purposes of public amusement, other than entertainments requiring to be licensed as aforesaid, for not more than seven days: Provided that it shall be incumbent upon such Mayor to inquire strictly as to the nature of such proposed exhibition or amusement, before granting such permission, and to refuse such permission if it shall appear that such proposed exhibition or amusement is of such a nature as to require to be licensed by the Colonial Secretary, as aforesaid, or if there shall be reasonable cause for believing that such such exhibition or amusement will be likely to entail any violation of public decency, to endanger the public peace, or to be a nuisance to any inhabitant of the municipality. Every person holding or keeping any such exhibition, or using any place within the said municipality for public amusement as aforesaid, or causing or permitting such place to be so used without the permission of such Mayor, shall forfeit and pay a sum of not less than five shillings nor more than forty shillings for every day that such exhibition shall be so held or kept, or such place shall be so used for public amusement as aforesaid.

147. Every occupier of any building or ground in which any exhibition is held or kept, or any public amusement conducted as aforesaid, shall, in each year, register at the office of the Council, such building or ground, together with the situation and description thereof, and of the exhibition proposed to be held or kept, or the public amusement proposed to be conducted as aforesaid in or upon such building or ground, and the name of such occupier. And every person who causes, and every occupier of any such building or land who permits any such exhibition to be held or kept, or any public amusement to be conducted, for a longer period than seven days, in or on any

such building or land not being registered for the purpose, or without such certificate of registration as hereinafter mentioned having been obtained for the same, shall forfeit for every such offence any sum not less than one pound nor more than twenty pounds.

148. The Council upon the written application of any such occupier as aforesaid stating the particulars aforesaid, and if upon inspection by the proper officer, the building or land shall have been found to be secure and proper for the purpose stated, and if the proposed exhibition or amusement shall not be such as to require a license from the Colonial Secretary, as aforesaid, and shall not be thought likely to entail any violation of public decency, or to endanger the public peace, or to be a nuisance to any inhabitants of the said municipality, the said Council shall cause the aforesaid penalties to be registered in a registry book to be kept for that purpose; and shall thereupon grant to the applicant a certificate of such registration of such premises. And the said Council may at any time and for any of the causes hereafter mentioned, suspend for a stated period the effect of, or cancel any such registration, and shall forthwith give notice of such suspension or cancellation to the occupier of the registered building or land; and during such suspension, or after such cancellation, such premises shall be deemed to be unregistered in respect of the purpose mentioned in the certificate of registration, and such certificate shall be of no force or virtue.

149. The proper officer of the Council may, at all reasonable times, enter into or upon, and inspect any such registered building or land.

150. No such exhibition or place of public amusement as aforesaid, shall be held or kept open or used for the purpose of such public amusement on Sunday, Christmas Day, or Good Friday. And every person offending against this By-law in this behalf shall on conviction forfeit and pay a sum not exceeding five pounds nor less than two pounds for every such offence.

151. For every such registration as aforesaid, the occupier of the building or land so registered, shall pay to the Council Clerk, for the benefit of the said Municipality, a fee of one pound; and every such registration, whenever the same may be made, shall be in force until the thirty-first day of December, then next ensuing, and no longer.

152. The certificate of registration aforesaid shall be regarded as a license from the Council for the holding or keeping of the exhibition, or for carrying on of the public amusements therein mentioned, but for none other. Any occupier of such building or land who shall hold or keep therein or thereon any exhibition, or shall use such building or land for any public amusements other than such exhibition or amusements mentioned in such certificate or license shall, for every such offence, forfeit and pay any sum not less than ten shillings nor more than ten pounds.

153. No license shall be granted as aforesaid to or for any building or land wherein or whereon any games with dice, or other games of chance for money, or any bull-baiting, dog-fighting, cock-fighting, or other exhibitions or amusements, opposed to public morality, or involving cruelty to animals, or likely to cause any breach of the peace, are proposed to be had, held, or carried on. And the occupier of any building or land so registered as aforesaid, who shall permit any such game of chance or exhibition, or amusement, as are in the section before mentioned, to be had, held, or carried on, in or upon such building, shall, for every such offence forfeit and pay a sum of not less than ten shillings nor more than ten pounds.

154. The effect of any such registration as aforesaid may be suspended, or such registration may be cancelled, as the Council shall think fit for any of the following causes, namely;— Whenever the occupier of the registered building or land, or the manager of any such exhibition or amusement as aforesaid, held, kept, conducted, or carried on in or upon such building or ground, shall have been twice convicted of offences against these by-laws within a period of twelve months, or whenever it shall be shown to the satisfaction of the said Council that the superintendent, director, manager, or other person in charge of any such exhibition or amusement is a confirmed drunkard, or that any such exhibition or amusement is being conducted in such a manner as to violate public decency, to endanger the public peace, or to become a nuisance to any inhabitants of the said municipality: Provided that before any such suspension or cancellation as aforesaid, the occupier of such registered building or land shall have notice of the fact that the said Council is about to consider whether there shall be any such suspension or cancellation, and of the causes for this proceeding; and shall be allowed to show cause against such suspension or cancellation before the same shall be ordered.

155. Any person who shall superintend, direct, or manage, or shall be otherwise in charge of any such exhibition or public amusement as aforesaid; or who shall reside in or upon any such building or land wherein or whereon any such exhibition or public amusement shall be held, kept, or carried on; or who, being the owner, lessee, or tenant of any such building or land, shall permit the same to be used for the purpose of any such exhibition or public amusement, shall be deemed the "occupier" of such building or land for all the purposes of these by-laws. And the said by-laws shall be held to be as applicable in every case to any number of such occupiers as to any single occupier. And every such occupier whose name shall have been so registered as aforesaid, shall be deemed and taken to be and continue such occupier for all the purposes of these By-laws: Provided that in the event of any change in the occupancy of any such building or ground as aforesaid, it shall be competent for the parties concerned to notify the same, by writing under their hands, to the said Council Clerk, who shall lay such notification before the Council at its next meeting; and if, after such enquiry as such Council may deem necessary, there shall seem to be no valid objection to such change of occupancy, a corresponding entry shall be made in the register aforesaid, and a new certificate shall be issued, which shall be in force until the then next ensuing 31st day of December, and no longer. And for every such new certificate a fee of five shillings shall be paid to the said Council Clerk for the benefit of the said municipality. And any person who shall make any false statement in any such application or notice as aforesaid as to any of the facts or particulars required by these By-laws to be stated in such application or notice shall for every such offence forfeit and pay any sum not less than one pound nor more than twenty pounds.

Made and passed at a meeting of the Municipal Council of
the Municipal District of Wentworth, this 12th day of
August, 1879.

(L.S.) WILLIAM GUNN,
Mayor.
JOSEPH HIGGINS,
Council Clerk.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF MUSCLEBROOK—BY-LAW.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 11th December, 1879.

MUNICIPAL DISTRICT OF MUSCLEBROOK—AMENDED BY-LAW.

THE following Amended By-law, made by the Council of the Municipal District of Musclebrook, relating to Swine, &c., wandering about the Streets, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

MUNICIPAL DISTRICT OF MUSCLEBROOK.

AT a meeting of the Council of the above district, held on Wednesday, the 23rd of July, 1879, a resolution was adopted for amending section 27, Part 6, of the Municipal By-laws, by inserting after the words "shall forfeit and pay," in respect of every such animal, and after the words "for every such offence," a sum not exceeding twenty shillings nor less than two shillings and six pence.

Swine, &c., not to wander about Streets.

37. Any person who shall breed, feed, or keep any kind of swine in any house, yard, or enclosure, situate and being in or within forty yards of any street or public place in the Municipality, or who shall suffer any kind of swine, or any horse, ass, cattle, mule, sheep, goat, or any other animal of like nature, belonging to him or her, or under his or her charge, to stray or to go about, or to be tethered or depastured in any street, road, or public place within the said Municipal District, shall forfeit and pay in respect of every such animal for every such offence, a sum not exceeding twenty shillings nor less than two shillings and sixpence.

(L.S.) ROBT. GEO. D. FITZGERALD,
Mayor.J. STAFFORD, Council Clerk,
Municipal Council Chamber, Musclebrook,
4th November, 1879.

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF WELLINGTON—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 2nd January, 1880.

MUNICIPAL DISTRICT OF WELLINGTON.

BY-LAWS.

THE following By-laws, made by the Council of the Municipal District of Wellington, for regulating the proceedings of the Council and the duties of the officers and servants thereof; for determining the times and modes of collecting and enforcing payment of rates; for preventing and extinguishing fires; for licensing public vehicles; for suppressing nuisances and houses of ill-fame; and generally for maintaining the good rule and government of the Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

BY-LAWS FOR THE MUNICIPAL DISTRICT OF WELLINGTON.

PART I.

Ordinary and Special Meetings.

1. The Council shall meet for the transaction of ordinary business on every alternate Thursday, at 7 o'clock p.m., unless such day shall happen to be a public holiday. In the latter case the meeting shall be held on such other day as the Mayor may appoint. Special meetings may be called by the Mayor, or, in his absence, by any two Aldermen.

Election of Chairman in absence of Mayor.

2. If at any meeting of the Council the Mayor be absent, at the expiration of fifteen minutes after the time appointed for holding such meeting, the Aldermen then present (being a quorum) shall proceed to elect for themselves a Chairman for such meeting.

Business of Ordinary Meetings.

The following shall be the order of business of all meetings of the Council, other than Special Meetings:—

1. The minutes of the last preceding meeting to be read, corrected, if erroneous, and signed by the Mayor or other Chairman. No discussion to be permitted except as to whether the minutes are correct.
2. Correspondence to be read and orders made thereon, if expedient.
3. Petitions, if any, to be read and dealt with.
4. Reports from Committees and minutes from the Mayor to be presented, and orders made thereon.
5. Questions as to matters under the jurisdiction or within the official cognizance of the Council to be put and replied to, and statements as to any facts, matters, or circumstances requiring attention by the Council or any of the Committees or officers to be made. Sufficient notice of questions to be given. Answers not compulsory.

6. Motions of which notice has been given to be dealt with in the order in which they stand on the business paper.

7. Orders of the day to be disposed of as they stand on the business paper.

Provided that the Council may, by resolution without notice, entertain any particular motion out of its regular order on the business paper, and may in like manner direct that any particular motion or matter of business shall have precedence at future meetings.

Business at Special Meetings.

3. At special general meetings of the Council, the business—after the minutes shall have been read and signed, which shall be done in the same manner as at ordinary meetings—shall be taken in such order as the Mayor, or the Aldermen at whose instance such special meeting shall have been called, may have directed; and no other business shall be transacted.

Business paper for Ordinary Meetings.

4. The business paper for every meeting of the Council, other than special meeting, shall be made up by the Council Clerk not less than one nor more than three days before the day appointed for such meeting.

He shall enter on such business paper a copy or the substance of every notice of motion, and of every requisition or order as to business proposed to be transacted at such meeting, which he may have received or shall have been required or directed so to enter, in due course of law, and as hereinafter provided. Every such entry shall be made (subject to the provisions in section 3 of this "Part" of these By-laws) in the same order as such notice, requisition, or direction shall have been received, and a copy of such business paper shall be served or posted to all members of the Council.

Business paper for Special Meeting.

5. The business paper for each special meeting shall contain only such matters as shall have been specially ordered to be entered thereon by the Mayor or Aldermen calling such meeting.

How business paper to be disposed of.

6. The business paper for each meeting of the Council shall at such meeting be laid before the Mayor or Chairman, who shall make a note upon such business paper of the mode in which each matter entered thereon has been dealt with, and such business paper so noted shall be a record of the Council.

Notices, &c., to be the property of the Council.

7. After the business paper shall have been made up as aforesaid, all notices of motion, requisitions, and directions to which entries have been made thereon, shall be the property of the Council, and shall not be withdrawn, altered, or amended without leave having been first obtained from the Council for such withdrawal, alteration, or amendment.

Motions—how to be made.

8. Except by leave of the Council, motions shall be moved in the order in which they stand on the business paper, and if not so moved or postponed, shall be struck from such business paper, and shall be considered to have lapsed.

Absence of mover.

9. No motion of which notice shall be entered on the business paper shall be proceeded with in the absence of the Alderman by whom such notice shall have been given, unless by some other Alderman producing a written authority for that purpose from such first mentioned Alderman.

Motion to be seconded.

10. No motion in Council shall be discussed unless and until it be seconded.

Amendment may be moved.

11. When a motion or amendment shall have been made or seconded, any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed unless and until it be seconded.

Motions and amendments to be in writing.

12. No motion or amendment shall be discussed until it shall have been reduced into writing.

Only one amendment at a time.

13. No second amendment shall be taken into consideration until the first amendment shall have been disposed of.

Amended questions—further amendment may be moved thereon.

14. If an amendment be carried, the question amended thereby shall become itself the question before the Council, whereupon any further amendment upon such question may be moved.

How subsequent amendments may be moved.

15. If an amendment either upon an original question or upon any question amended as aforesaid, shall be negatived, then a further amendment may be moved, and so on: Provided that not more than one question and one proposed amendment thereof shall be before the Council at any one time.

Motions for adjournment.

16. Any motion for adjournment, shall, if seconded, be put at once without discussion. If negatived, a similar motion shall not be made until half an hour has elapsed after moving the one that has been negatived.

Orders of the day.

17. The orders of the day shall consist of any matters other than motions on notice which the Council shall at a previous meeting thereof have directed to be taken into consideration, or which the Mayor shall have directed to be entered on the business paper for consideration.

How they are to be dealt with.

18. The Alderman who has the usual charge of, or who has previously moved in reference to the particular business to which any such order of the day relates, shall be the person called upon to move: Provided that the Mayor may, as to any order of the day entered by his direction, move the same.

Petitions to be respectfully worded.

19. It shall be incumbent on every Alderman presenting a petition to acquaint himself with the contents thereof, and to ascertain that it does not contain language disrespectful to the Council; the nature and prayer of every such petition shall be stated to the Council by the Alderman presenting the same.

Petitions—How received.

20. All petitions shall be received only as the petitions of the parties signing the same.

Petitions—No debate.

21. On the presentation of a petition no debate shall take place until notice has been given in the usual manner, and the only question that can be entertained by the Council on the day of its presentation shall be that the petition be received, or that it be referred to a Committee.

Correspondence.

22. The Mayor shall have the same duty in reference to letters addressed to the Council before directing the same to be read, as by section 19 of this "Part" of these By-laws is imposed upon Aldermen presenting petitions—if not read to be returned to the writer and reported to the Council. The Mayor shall direct as to the order in which all correspondence shall be read, and no letters addressed to the Council, or any of its officers, shall be presented or read by any Alderman. If the Mayor be absent, and shall not have examined any such letters, or have given any such directions, or have given any such directions as aforesaid, then the duties imposed by this section shall devolve upon the presiding Alderman.

Section 19 to apply to letters.

23. Section 19 of this "Part" of these By-laws shall be considered as fully applicable to letters addressed to the Council or any of its officers as to petitions.

Reports from Committees.

24. Every report from a Committee shall be in writing, and signed by the Chairman of such Committee, or in his absence by some other member of the same.

Mayor's Minutes.

25. The Mayor shall have the right of directing the attention of the Council to any matter or subject within its jurisdiction or official cognizance, by minute in writing, signed by him.

How reports, &c., are to be dealt with.

26. No motion shall, unless as hereinafter provided, be permissible on the presentation of a report from a Committee or a minute from the Mayor, except that the same be received, or that it be received and its consideration stand an order of the day for some future day: Provided that if any Alderman shall have given due notice in reference to any such report or minute, or if the consideration of any such report or minute shall have been entered among the orders of the day, such order of the day or such motion, if otherwise unobjectionable, may be moved and considered in due course; and whenever any such report or minute embodies any recommendation which cannot legally be carried out without due notice, and it is desirable that such report or minute should be ordered upon during the meeting of the Council at which such report or minute is presented, it shall be the duty of the Chairman, or member of such Committee signing such report, or of the Mayor, as the case may be, to give or transmit to the Council Clerk such a notice of motion, as will enable the Council Clerk to make the necessary entry on the business paper, and to give such due notice.

Questions and statements.

27. No question or statement shall be allowed to be put or made which is inconsistent with good order.

Questions to be put without argument.

28. Every question must be put categorically, without any argument or statement of fact.

Mode of addressing the Council.

29. Every Alderman who shall make or second any motion, or shall take part in any debate or discussion, or shall put or reply to any question, or shall make any statement, or shall in any other way or for any other purpose address observations to the Council, shall, while doing so, stand up in his customary place, unless he shall be prevented from so doing by reason of some bodily infirmity, and shall address himself to the Mayor or other Chairman then presiding: Provided that in the case of a question, such question may by permission of such Mayor or Chairman be put directly to the Alderman or officer to be questioned, and may be replied to in like manner. But in every such case, the question so put and the answer thereto, shall be subject to every legal objection on the ground of disorder or irrelevancy. And all members of the Council shall on all occasions, when in such Council, address and speak of each other by their official designations, as Mayor, Chairman, or Alderman, as the case may be.

Speaker not to be interrupted

30. No Alderman shall be interrupted while thus speaking, unless for the purpose of calling him to order, as hereinafter provided.

Limitation as to number of speakers.

31. Every mover of an original motion shall have a right of general reply to all observations which may have been made in reference to such motion, and to any amendments moved thereon, as well as a right to speak upon every such amendment. Every Alderman, other than the mover of such original motion, shall have a right to speak once upon such motion and once upon every amendment thereon. No Alderman shall speak oftener than once upon any question other than a question of order, unless when misrepresented or misunderstood, in which case he shall be permitted to explain without adding any further observation than may be necessary for the purpose of such explanation.

Mover and Seconder.

32. An Alderman who has moved any motion or amendment shall be considered to have spoken thereon, but an Alderman who shall have seconded any such motion or amendment without any further observations than that he seconded the same, shall be at liberty to speak once again on such motion or amendment.

Speaker not to digress, &c.

33. No Alderman shall digress from the subject under discussion, or shall make personal reflections on, or impute improper motives to, any other Alderman.

Adjournment of debate.

34. A debate may be adjourned to a later hour in the day, or to any other day specified, and the Alderman upon whose motion such debate shall have been so adjourned shall be entitled to pre-audience on the resumption of the same.

Mayor to decide as to pre-audience.

35. If two or more Aldermen shall rise to speak at the same time, the Mayor or Chairman shall decide which of such Aldermen shall be first heard.

Mayor to decide points of order.

36. The Mayor or Chairman shall preserve order, and his decision upon points of order or practice shall be final.

Mayor may address the Council.

37. The Mayor shall have the same right as any other Alderman to speak upon every subject or amendment.

Mayor may call a member to order.

38. The Mayor or Chairman may, without the interposition of any other member of the Council, call any Alderman to order whenever in opinion of such Mayor or Chairman there shall be a necessity for so doing.

Decision of points of order.

39. The Mayor or Chairman when called upon to decide points of order or practice shall state the provision, rule or practice which he shall deem applicable to the case, without discussing or commenting on the same.

Motions out of order to be rejected.

40. Whenever it shall have been decided as aforesaid that any motion, amendment, or other matter before the Council is out of order the same shall be rejected.

How questions to be put.

41. The Mayor or Chairman shall put to the Council all questions on which it shall be necessary that a vote be taken, and shall declare the sense of the Council thereon.

Divisions—Penalty for refusing to vote.

42. Any Alderman may call for a division and the vote shall be taken by a show of hands, and the names and votes of the Aldermen present shall be recorded. Any Alderman present when a division is called for who shall not give vote on such division, not being disabled by law from so voting, shall be liable for every such offence to a penalty of not less than five shillings nor more than two pounds.

How call of Council to be made.

43. A call may be made by any resolution of which due notice has been given, for the consideration of any motion or matter of business before the Council.

Such call to be compulsory in certain cases.

44. No motion, the effect of which if carried would be to rescind any resolution, order, or decision of the Council, shall be entered on the business paper unless a call of the Council has been duly made and granted for such purpose.

Mode of proceeding.

45. The call shall be made immediately before the motion, or business for which such call has been ordered, shall be moved or considered. The Council Clerk shall call the names of all the members in alphabetical order; and if any members are absent, a record shall be made of such absence; but if leave of absence to any such member shall have been previously granted, or if such an excuse shall have been received in writing by the Mayor or Council Clerk as the majority of the Council then present shall consider satisfactory, such absent member shall stand excused, and a record shall be made of such excuse and of the reason for the same.

Penalty for absence.

46. Any member of the Council who, having had notice of the call, shall be absent without having been legally excused as aforesaid, and shall fail to show that, by reason of illness or other sufficient cause, he was unable to send an excuse in writing as aforesaid, or, who, having answered to his name, shall not be present when a vote is taken on the motion or business as to which such call was made, shall for every such offence be liable to a penalty of not less than five shillings nor more than two pounds.

Standing and Special Committees.

Standing Committee.

47. Besides such special Committees as may from time to time be found necessary there shall be three standing Committees of the Council, each consisting of not less than three members, namely:—A Finance Committee, an Improvement (or Works) Committee, and a General Committee.

Finance Committee.

48. The Finance Committee shall examine and check all accounts, and shall watch generally over the collection and expenditure of the municipal revenues. They shall inquire and report from time to time as to all matters which they may consider to affect the finances of the said Municipality, and as to such matters or subjects of the like nature as they may be directed by resolution of the Council to inquire and report upon.

Improvement Committee.

49. The Improvement Committee shall have the general direction of all works ordered or sanctioned by the Council, and the general inspection of all streets, roads, ways, and other public places under the care and management of the Council. They shall also inquire and report from time to time as to such improvements or repairs as they may think necessary or as they may be directed by resolution of the Council to inquire and report upon.

Chairman of Committees.

50. Every Committee of which the Mayor shall not be a member shall elect a permanent Chairman of such Committee, who may direct the Council Clerk to call meetings whenever he shall think it desirable.

Cost of works to be estimated before undertaken.

51. No works affecting the funds of the Municipality, except as hereinafter is mentioned, shall be undertaken until the probable expense thereof shall have been first ascertained by the Council.

Cases of emergency and current expenses.

52. For emergent matters and for necessary current expenses during the intervals which may elapse between the meetings of the Council, outlays to the following extent may be incurred:—

1. By order of the Improvement Committee, or of Mayor and one member of such Committee, for repairs or emergent works, to the extent of three pounds.
2. By order of the Mayor for necessary current expenses, to the extent of two pounds.

Completion of works to be reported by Improvement Committee.

53. No works undertaken by the Council shall be deemed to have been completed, and no order shall be made for the payment in full of the same, except upon a report or certificate to that effect from the Improvement Committee, except for emergent works as provided for in section 52 of this "Part" of these By-laws.

Common Seal—how secured.

54. The Seal shall be secured by a cover or box, which shall be kept at the Council Clerk's Office in the custody of the Council Clerk. There shall be duplicate keys to the lock of this cover or box, of which keys one shall be kept by the Mayor, and the other by the Council Clerk.

When and how Common Seal to be used.

55. The Seal of the Council shall not be affixed to any document without the express authority of the Council, and every impression thereof so authorized shall be verified by the signature of the Mayor, or in case of illness or absence of the Mayor, by two Aldermen, and countersigned by the Council Clerk.

How books of account, &c., are to be kept.

56. All books, deeds, memorials, letters, documents, and other records of the Council, except as hereinafter mentioned, shall be kept at the Council Clerk's Office in the custody and care of the Council Clerk, who shall be responsible for the safe custody of the same; but the Mayor may for any special purpose, authorize their removal.

Books, &c., not to be shown or exposed without leave.

57. No member or officer of the Council shall be at liberty to show, lay open, or expose any of the books, papers, or records of the Council to any person not a member of the Council, without the written permission of the Mayor, unless as otherwise provided by law. Any member or officer who shall commit a breach of this section shall be liable on conviction to a penalty of not less than five shillings nor more than two pounds.

Records not to be removed.

58. Any person removing any such book, paper, or record from the Council Clerk's Office without leave of the Mayor in writing first obtained, shall be subject to a penalty of not less than ten shillings or more than ten pounds. And nothing

herein contained shall be held to affect the further liability of any person who shall have removed such book, paper, or record, and shall not have returned the same, to any action at law for the detention of such book, paper, or record, or to prosecution for stealing the same, as the case may warrant.

Penalty for defacing or destroying records.

59. Any person destroying, defacing, or wilfully or improperly altering any book, paper, or record, shall for every such offence be liable to a penalty of not less than five pounds nor more than twenty pounds.

Bonds for good conduct.

60. All bonds given by officers or servants of the Council for the faithful performance of their duties, shall be deposited in such custody as the Council may order; and no member, officer, or servant of the Council shall be received as a surety for any officer or servant.

Duties of the Council Clerk.

61. The Council Clerk shall perform all duties which, by the Municipalities Act of 1867, or by the present or any other By-laws hereunder he may be required to perform. He shall be Clerk of all Revision Courts held in the Municipal District under the provisions of the Municipalities Act. He shall also under the direction of the Mayor conduct all correspondence which may be necessary on part of the Council, and shall generally assist the Mayor in carrying out the orders of the Council, and the duties of such Mayor.

Special powers of Mayor.

62. The Mayor may from time to time define the duties of all officers and servants of the Council, and shall exercise a general supervision over all such officers and servants; and may order the preparation of any such return or statement, or the giving of any such explanation or information, by any such officer or servant as he may think necessary; unless the Council shall have expressly forbidden or dispensed with the preparation of such return or statement or the giving of such explanation or information.

Drafts of intended By-laws.

63. A draft of any intended By-law shall lie in the office of the Council at least seven days before such draft shall be taken into consideration by the Council and shall be open to the inspection of any ratepayer who may desire to inspect the same.

Motions for rescission of previous orders.

64. Whenever a motion, the effect of which, if carried, would be to rescind any order, resolution, or vote of the Council shall have been negatived, no other motion to the same effect shall be permissible until a period of three months shall have elapsed from the time of negativing such first mentioned motion.

Suits and prosecutions for penalties.

65. Suits or informations for the enforcement of penalties for or in respect of breaches of the Municipalities Act of 1867, or of any By-law made thereunder, or of any Statute, the operation of which may have been extended to the Municipality, shall be commenced or laid as follows, viz.:—When against a member of the Council or any Auditor or any officer of the Corporation, by such officer as shall be named for that purpose by the Council; when against any other person, by the officer to whom the carrying out of the statutory provision or By-law imposing the penalty sought to be enforced has been entrusted; and if there shall be no such officer, then by such officer or person as shall be appointed for that purpose by the Council or the Mayor as the case may be, on directing such information as aforesaid. And no such suit shall be brought or information laid as aforesaid against any member of the Council or Auditor, except by order of such Council; nor shall any similar proceeding be taken against any officer of the Council, except on the order of the Council or of the Mayor. And the conduct or prosecution of any suit or information may, on the order of the Council, or of the Mayor, be entrusted to an attorney.

Power to suspend temporarily, any portion of these By-laws.

66. Any of the foregoing By-laws which relate to or affect the proceedings at meetings of the Council may be suspended *pro tempore* without notice in a case of emergency, if all the members of the Council then present shall deem such suspension necessary.

PART II.

Collection and enforcement of Rates.

Rate when due and payable.

1. All rates levied and imposed by the Council shall be held to be due and payable on and after such day or days as the Council shall by resolution from time to time appoint.

Time and place of payment.

2. All such rates shall be paid at the Council Clerk's office during the hours appointed by the Council for that purpose.

Defaulters.

3. Every person not paying his or her rates as aforesaid, within thirty days after the day so appointed for payment thereof, shall be deemed a defaulter, and it shall be the duty of the Council Clerk to furnish the Mayor from time to time with a list of the names of all persons so in default.

Mayor to enforce payment.

4. It shall be the duty of the Mayor to take proceedings to enforce the payment of all rates in default, either by action at law or by issuing warrants of distress upon the goods and chattels of the defaulter.

Bailiff how appointed.

5. The Bailiff of the Municipal District shall be appointed by the Council, and may from time to time be removed by them.

Bailiff to find sureties.

6. The Bailiff shall find two sureties to the satisfaction of the Mayor, to the extent of (£50) fifty pounds each for the faithful performance of his duty.

Duties of Bailiff.

7. It shall be the duty of the Bailiff to make levies by distraint for the recovery of rates in the manner hereinafter provided.

Warrant of distress.

8. All levies and distresses shall be made under warrant under the hand of the Mayor or any Alderman who may for the time being be authorized to perform the duties of that office, such warrant to be in the form or to the effect of the Schedule hereunto annexed and marked A.

Inventory.

9. At the time of making a distress warrant the Bailiff shall make a written inventory in the form or to the effect of the Schedule marked B, which inventory shall be delivered to the occupant of the land or premises or the owner of the goods so distrained, or to some person resident in the place where the distress shall be made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted in some conspicuous part of the land or premises on which the distress is made; and the Bailiff shall deliver a copy of such inventory to the Council Clerk.

Distress and sale, &c.

10. It shall be lawful for the Bailiff or his deputy and such assistants as he may take with him to enter into any part of the land, building, tenement, or other property in respect of which such rate or rates shall have been made as aforesaid, and to distrain the goods therein or thereon, and to remain in such building, tenement, or other property in charge thereof. And if the sum for which any such distress shall have been made or taken, together with the costs of such distraint, shall not have been paid on or before the expiration of two clear days, the Bailiff or his deputy may, between the hours of eleven in the morning and two in the afternoon, on the next day thereafter, cause the goods so distrained, or a sufficient portion thereof, to be sold by public auction, either on the premises or at such other place within the Municipal District as the Bailiff may think proper to remove them for such purpose, and shall pay over the surplus (if any) that may remain after deducting the amount of the sum distrained for and costs of such distraint, to the owner of the goods so sold on demand by such owner.

Goods may be impounded.

11. The bailiff on making a distress as aforesaid may impound or otherwise secure the goods and chattels so distrained of what nature and kind soever, in such part of the land or premises chargeable with rate, or in such other place as shall be most fit and convenient for that purpose; and it shall be lawful for any person whomsoever, after the expiration of the clear days as hereinbefore mentioned, to come and go to and from such part of the said land and premises where such goods or chattels shall be impounded and secured as aforesaid in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

Owner to direct order of sale.

12. The owner of any goods or chattels so distrained upon may, at his or her option, direct and specify the order in which they shall be successively sold, and the said goods or chattels shall in such cases be put up for sale according to such directions.

Proceeds of distress.

13. The Bailiff shall hand over to the Council Clerk all proceeds of every such distress within twenty-four hours after having received the same.

Deputy.

14. The Bailiff may, with the sanction in writing of the Mayor, or in his absence with the sanction of any two Aldermen of the Municipal District, authorize by writing under his hand any person to act temporarily as his deputy; and the person so authorized shall have and exercise all the powers of the Bailiff himself, but the Bailiff and his sureties shall in every such case be responsible for the acts of such deputy.

Costs.

15. There shall be payable to the Bailiff for every levy and distress made under these By-laws, the costs and charges in the Schedule hereunto annexed, marked C.

SCHEDULE A.

Warrant of Distress.

I, _____, Mayor of the Municipal District of Wellington, do hereby authorize you, _____, the Bailiff of the said Municipality, or your deputy, to distrain the goods and chattels in the dwelling-house or in or upon the land or premises of _____, situate at _____, for _____, being the amount of rates due to the said Municipality to the _____ day of _____, for the said dwelling-house, land, or premises (as the case may be), together with the costs of this distraint, and to proceed thereon for the recovery of the said rates and costs according to law.—Dated this _____ day of _____, 18 _____.

Mayor.

SCHEDULE B.

Inventory.

I have this day, by virtue of the warrant under the hand of the Mayor of the Municipal District of Wellington, date _____, 18 _____, of which a copy is attached hereto, distrained the following goods and chattels, in the dwelling-house or in or upon the land or premises of _____, situate at _____, within the said Municipality for _____, being the amount of rates due to the said Municipality to the day of _____, and also the costs of this levy.—Dated this day of _____, 18 _____.

Bailiff.

(List to be appended.)

SCHEDULE C.

Costs.

	s.	d.
For making an entry and inventory.....	2	6
For man in possession for period of not longer than two hours	5	0
For man in possession for every other day or part of day	5	0
For sale and delivery of goods one shilling in the pound on the gross proceeds of the sale, in addition to cost of advertisements (if any).		

PART III.

Preventing and extinguishing fires.

Fire or combustible material.

1. Every person who shall place, or knowingly permit to be placed, in any house, yard, workshop, out-office, or other premises within the said Municipality, fire, gunpowder, or combustible or inflammable materials of any kind, in such a manner as to endanger any buildings, shall, on conviction thereof, for every such offence forfeit and pay a penalty of not more than five pounds, and shall forthwith remove such fire, gunpowder, or combustible or inflammable materials; and for each and every period of twenty-four hours after such conviction, that such person shall suffer fire, gunpowder, or combustible or inflammable materials to remain as aforesaid, such person shall be deemed guilty of a further offence against this By-law.

Setting fire to matter without notice.

2. Any person who shall wilfully set fire to any inflammable matter whatever in the open air, within five yards of any dwelling house or other building or boundary or dividing fence within the said Municipality, without having given notice in writing to the occupiers of the land adjoining the land upon which such matter shall be of his intention so to do, or between the hours of six in the afternoon of any day and six in the morning of the following day, shall, for every such offence, forfeit a sum not exceeding five pounds.

Erecting brushwood fences, &c.

3. Every person who shall erect any fence of brushwood, bushes, or other inflammable material, or shall make or place any stack of hay, corn, straw, or other produce, or place as or for the covering any such stack any inflammable materials, so as to endanger any contiguous buildings or properties, or any trees, shrubs, or other produce thereof, or any chattels therein, shall forfeit, on conviction for every such offence, a penalty of not more than five pounds, and shall remove such fence, stack, or covering within a reasonable time after such conviction, and

any person failing to remove such fence, stack, or covering within a reasonable time after any such conviction as aforesaid, shall be deemed guilty of a further offence against this By-law.

Burs, &c.

4. The Council shall have power in the Municipal District where the land is for the most part under cultivation to order and compel the extirpation of the Bathurst burr and other noisome weeds, and generally to make By-laws for preventing the growth of weeds detrimental to good husbandry.

Wilfully setting fire to chimneys.

5. Any person who shall wilfully set or caused to be set on fire any chimney, flue, smoke-vent, or stove-pipe, herein called in common "chimney" within the said Municipality, shall forfeit a sum not exceeding five pounds: Provided always, that nothing herein contained shall exempt the person so setting or causing to be set on fire any chimney from liability to be proceeded against or prosecuted before any Criminal Court for such act as for an indictable offence.

Negligently suffering chimneys to be set on fire.

6. If any chimney accidentally catch or be on fire, the person occupying or using the premises in which such chimneys are situated, shall forfeit a sum not exceeding forty shillings: Provided always that such forfeiture shall not be incurred if such person prove to the satisfaction of the Justices before whom the case be heard that such fire was in nowise owing to the omission, neglect, or carelessness, whether with respect to cleansing such chimneys or otherwise, of himself or his servants.

Water-carts attending fires.

7. There shall be paid out of the funds of the said Municipality to the owner of every licensed water-cart, who shall have attended with any water at the place of any fire as herein provided, and deliver the same as required for the extinguishing such fire, such reasonable compensation as the Council shall by resolution have appointed in that behalf; and also to such owners of such carts as shall have first and second in order attended with loads of water, such further sums by way of reward as the Council may by similar resolution have fixed.

PART IV.

Licensing public vehicles.

1. From and after the 1st day of July, one thousand eight hundred and seventy-nine, no vehicle shall ply for hire, nor shall any person act as driver or conductor of any such vehicle within the Municipal District of Wellington until and unless licensed for such purpose in the manner hereinafter mentioned, nor during the suspension or after cancellation of such license as hereinafter provided.

2. Before any license for plying any vehicle or for driving or conducting the same shall be granted, the party requiring such license shall obtain from the Council Clerk, free of charge, a requisition in the form of Schedule A hereto, or to the like effect, and shall duly fill up and sign the same and deliver it to the Council Clerk, and shall also insert in such requisition, in addition to the particulars set forth in Schedule A hereto, tables of rates and fares proposed to be charged by such party for any such vehicle.

3. The Mayor for the said District for the time being shall be and is hereby authorized to issue all such licenses in the name and on behalf of the said District Council, and the Mayor shall, by indorsement on such license, signify his approval of the scale of rates proposed to be charged for the hire of any such vehicle so licensed.

4. Licenses for proprietors, drivers, or conductors of vehicles shall be in the form of Schedule B hereto, or to the like effect, and shall be made out, numbered, and registered by the Council Clerk.

5. Every license granted by the Mayor shall be signed by the Mayor and countersigned by the Council Clerk, and shall be in force until the thirty-first day of December next ensuing the date thereof, and no such license shall include more than one vehicle, and shall state the number of passengers such vehicle shall be permitted to carry.

6. For every vehicle license, and for every renewal thereof, there shall be paid to the said District Council the sum of two pounds annually if the license be granted on or after the 1st day of January and on or before the thirty-first day of March in every year, and if after that day then in the following proportions:—If on or before the thirtieth day of June, the sum of thirty (30) shillings; if on or before the thirtieth day of September, the sum of twenty (20) shillings; and if after that date, the sum of ten (10) shillings.

7. For every conductor's or driver's license, and for every renewal thereof, there shall be paid to the said District Council the sum of five shillings annually.

8. The person or persons in whose name or names a license shall have been obtained shall be deemed the proprietor of the vehicle in respect of which such license shall have been taken out.

9. No license shall be granted to any person to drive any vehicle unless he be above seventeen years of age, nor to act as conductor unless he be fourteen years of age.

10. Any proprietor transferring or selling his licensed vehicle shall immediately give notice thereof to the Council Clerk, and the transferee or purchaser shall thereupon apply to have the license transferred to him, and shall sign his name in the books of the said District Council and on the license, and until this By-law shall have been complied with the transferor or seller shall remain liable as owner for breach of any of these By-laws, and no transferee or purchaser shall use such vehicle or allow it to ply for hire until the By-law shall have been so complied with.

11. No driver or conductor of any licensed vehicle shall lend or part with his license, nor shall the proprietor of any such vehicle employ an unlicensed person as the driver or conductor thereof.

12. Every proprietor, driver, or conductor of any vehicle, and every vehicle shall be deemed to be licensed under these By-laws on the production by the Inspector of the License Register Book containing a copy of any such license; and it shall not be necessary to call upon the person prosecuted to produce the original license to enable the prosecutor to give secondary evidence of its contents.

13. The license of the proprietor, driver, or conductor of any vehicle may be cancelled or suspended by the Mayor for the time being of the said District Council as he shall deem right (after three days notice in writing signed by the Council Clerk and served upon such proprietor, driver, or conductor, or left at his usual place of abode, calling upon him to show cause why such license should not be cancelled or suspended, and opportunity given such proprietor, driver, or conductor, to show such cause), in case either the proprietor, driver, or conductor shall have been convicted of two offences against these By-laws committed within a period of six months next preceding.

14. Such person or persons as may from time to time be appointed by the said District Council shall be the Inspector or Sub-Inspector of all licensed vehicles plying for hire within the said District, and such Inspector or Sub-Inspector shall as often as he or they may deem necessary inspect all licensed vehicles, and also the harness and horse or horses or other animal or animals used in drawing the same; and if such vehicles, horse or harness, animal or animals shall in his or their opinion be unfit for public use he shall report the same in writing to the Mayor who shall have power to suspend the license of such vehicle until such vehicle, harness, horse or horses, or other animal or animals used in or drawing the same shall be in a fit state for public use, and it shall be the special duty of such Inspector at all times to see that as far as possible these By-laws are duly observed and enforced.

15. No proprietor, driver, or conductor of any vehicle, nor any other person, shall hinder or obstruct such Inspector or Sub-Inspectors in the execution of any of his or their duties.

16. The number of the license granted for every omnibus or car in figures not less than four inches in height, and for every hackney carriage, cab, or buggy, in figures not less than two inches in height, and of proportionate breadth, white upon a ground of black, shall be printed or painted outside on the panel of the door or doors of such vehicles, or on a plate or plates fixed thereon, and also upon each lamp used upon such vehicle as the Inspector may direct, and the proprietor of such omnibus or car, hackney carriage, cab, or buggy shall keep such number on such panel of the door or doors or on such place or places as aforesaid legible and undefaced during the time such vehicle shall ply or be used for hire.

SCHEDULE A.

Requisition for License.

To the Municipal Council of Wellington.

I, _____, residing in _____ street, do hereby request that a license may be granted to me to _____ No. _____ within the said Municipality.

Dated _____, 18 _____.

SCHEDULE B.

Licenses.

This is to certify that _____ is hereby licensed to a certain No. _____ within the Municipality of Wellington, from the date hereof to the thirty-first day of December next, subject nevertheless to all and every the By-laws, Rules, and Regulations in force relating thereto.

Given under the Common Seal of the Municipal Council of Wellington, this _____ day of _____, 18 _____.

(L.S.) _____ Mayor.

Council Clerk.

Carters, &c.—Licenses for carts.

1. The Council may, from time to time, license to ply for hire within the said Municipality, carts approved of by the By-law Committee for any or either of the following purposes, namely: drawing wood, water, wash-dirt, quartz, earth, stone, gravel, timber, bricks, or for any other purpose, whether hired by the day or by the load, and whether driven by the owner or by any person in the owner's employ. Licenses may also be granted for the drivers of such to such persons as may be approved of by the By-law Committee, such licenses to be personal to the guarantee and not transferable, but the license for the cart may be transferred with the cart to any person upon approval as aforesaid, and for every such license, &c.

Application for license.

2. Every such license shall be granted on the written application for the same of the owner, or if there be more owners than one, of some one owner of the cart to be licensed; and in every such application shall be set forth truly the name and surname and place of abode of the applicant, and the like shall be set forth in the license when granted, which should be in the form of Schedule D hereto, or to the like effect; and any person who shall wilfully omit from any such application any particular hereby required to be stated therein, or shall wilfully state anything falsely touching any such particular, shall forfeit a sum not exceeding five pounds.

Numbering, &c., of license and carts.

3. Every such license for cart shall be numbered and registered by the Council Clerk, and shall be in force from the date thereof until the 31st day of December then next ensuing; and the owner named in any such license shall cause to be painted or marked, and to be kept so painted or marked, on some conspicuous place on the right or left side of the cart thereby licensed, the name of the Municipality, with the number of such license, in legible letters and figures one inch in length and of a proportionate depth, and the words "Licensed cart" in the like letters; and every such owner who shall omit or fail to comply with the provisions of this section shall forfeit a sum not exceeding forty shillings; and every such license for a driver shall be made out in the form of Schedule E, and shall be exhibited on demand to any person authorized for that purpose by the Council.

Plying for hire, &c., without license, &c.

4. If any owner of any cart permit the same to stand or ply for hire within the Municipality without having a license in force for such cart, licensing or authorizing such standing, plying for hire or use respectively within such Municipality, or if any person be found within such Municipality standing or plying for hire with any cart for which no such license is in force, or without having the name of the Municipality and the number of such license and the words "Licensed cart" displayed upon such cart openly and in manner herein provided; and every person acting as driver of any licensed cart so plying as aforesaid without holding a driver's license,—every such person so offending shall, on conviction, forfeit a sum not exceeding forty shillings.

Leaving carts unattended, &c.

5. If the driver of any cart shall leave the same unattended in any street, whether public or private, or shall go for a distance of more than two yards from the side of such cart, being in any such street, without passing through the rear wheel or wheels thereof a suitable chain or chains so as effectually to prevent the rotation of such wheel or wheels, whether in any such case such cart be hired or not, such driver shall in every such case forfeit a sum not exceeding forty shillings for such offence.

Lights for carts.

6. The driver of every cart which shall, during the hours after sunset of any day and before sunrise of the following day, be in any street or public place within the said Municipality, shall keep a light attached to or suspended from the off or right side of such cart so as to be plainly visible to the driver of any carriage proceeding along or through such street or place in a contrary direction to that in which such first-mentioned cart shall be directed; and every driver who shall fail to comply with this section shall forfeit a sum not exceeding forty shillings.

Interpretation.

7. The word "cart" shall for the purpose of this "Part" of these By-laws include every waggon, dray, or other carriage, whatever be its construction, drawn by horses or other animals, used for any of the purposes hereinbefore described in section 1 of this Part.

SCHEDULE C.

PART V.

*Suppression of Nuisances.**Careless riding or driving.*

1. No person shall ride or drive through or upon the streets or any public place so negligently, carelessly, or furiously, that the safety of any other person shall or may be endangered.

Riding on drays, careless driving, &c.

2. If the driver of any waggon, cart, or dray of any kind shall ride upon any such carriage in any such street as aforesaid, not having some person on foot to guide the same (such carts as are drawn by one horse and driven or guided with reins only excepted), or if the driver of any carriage whatsoever shall wilfully be at such a distance from such carriage, or in such a situation, whilst it shall be passing upon such street, that he cannot have the direction and government of the horse or horses or cattle drawing the same, or if the driver of any waggon, cart, dray, or coach, or other carriage whatsoever meeting any other carriage shall not keep his vehicle on the left or near side of the road, or if any person shall in any manner wilfully prevent any other person or persons from passing him or her or any carriage under his or her care upon such street, or by negligence or misbehaviour prevent, hinder, or interrupt the free passage of any carriage or person in or upon the same, every such driver or person so offending shall upon conviction forfeit and pay any sum not exceeding forty shillings.

Washing vehicles or animals.

3. Any person who shall wash any description of vehicle, horse, or other animal, in any public water or in any way pollute the same shall forfeit and pay for the first offence not more than twenty shillings nor less than five shillings, and for every subsequent offence not more than forty nor less than ten shillings.

Nuisances.

4. Every person who, in any street or other public place or passage within the said District, to the obstruction, annoyance, or danger of the residents or passengers, shall commit any of the following offences, shall on conviction for any and every such offence forfeit and pay a penalty of not more than two pounds:—

Every person who shall hoist or cause to be hoisted, or lower or cause to be lowered, goods of any description from any opening in any house fronting any street or public place, and close to the footway thereof, without sufficient and proper ropes and tackling.

Every person who shall carry or convey, or cause to be carried or conveyed in any street or public place, the carcass, or any part of the carcass, of any newly slaughtered animal without a sufficient and proper cloth covering the same for its concealment from public view, or shall hawk or carry about butcher's meat for sale, without covering the same as aforesaid.

Every person who shall place any line, cord, or pole, across any street, lane, or passage, or hang or place clothes thereon to the danger or annoyance of any person.

Every person who shall place any flower-pot in any upper window near to any street or public place, without sufficiently guarding the same from being thrown down.

Every person who shall throw or cast from the roof or any part of any house or other building any slate, brick, part of a brick, wood, rubbish, or other material or thing (unless within a hoard or enclosure when any house or building is being erected, pulled down, or repaired.)

Every person who shall keep any kind of swine within forty yards of any street or public place in the said District, or shall suffer any swine, horse, ass, mule, sheep, goat, or other animal belonging to him or her, or under his or her charge, to stray or go about, or to be tethered or depastured in any street or public thoroughfare.

Every person who shall carry goods or any frame to the annoyance of any person upon the footway of any street or other public footway.

Every person who shall be the keeper of, or have any dog or other animal which shall attack or endanger the life or limb of any person who may have the right of way, or use of any private yard, alley, street, or any other place within the said District.

Persons bathing.

5. No person shall bathe within two hundred yards of any public road or place, unless in some enclosed place, or otherwise in such manner as not to offend against common decency.

Notice to Proprietor.

6. Upon complaint being lodged at the Council Clerk's office that the yard, closets, or drains of any premises is or are a nuisance or offensive, and after inspection, such shall be found to be the case, notice shall be given in writing to the proprietor or tenant of such premises to remove or abate such nuisance within 24 hours after such notice; and if, after such notice, the nuisance shall not be removed or abated the proprietor or tenant of the said premises shall be liable to a penalty not exceeding forty shillings nor less than five shillings.

Injury to curbstones, guttering, &c.

7. No driver, carter, or other person shall wilfully or negligently do or suffer, or cause to be done, any damage or injury to the curbstones, gutters, or pathways of any street or roadway.

Destroying pathways or roads.

8. No person shall be allowed to alter, cut up, or destroy the pathways or roads, or to remove loam, sand, or gravel, from any of the streets or roads of the Municipality without the authority of the Council, and for such authority a fee of one shilling shall be paid.

Placing materials on streets, &c.

9. No person shall be allowed to place on the streets or pathways building materials otherwise than is absolutely necessary, and by the sanction in writing of the Mayor or Council Clerk, and no person shall be allowed to have water-holes or excavations for cellars or other purposes in or adjoining any public place unfenced, or in such a manner as to be dangerous to passers by; and all places where buildings are being carried on, or where any obstruction, to the danger of passers by exist, the person causing such obstruction shall be required to provide lights on either side, and keep the same lighted from sunset to sunrise, under a penalty of not exceeding five pounds nor less than two pounds.

Damaging trees and shrubs, &c.

10. No person shall destroy or damage any shrub or tree growing in any street or thoroughfare, or other public place within this Municipality, or injure any hedge, fence, gate, or building in any such street, thoroughfare, or public place, or set fire to any shrubs or trees, or to cut or remove any timber from any such street, thoroughfare, or public place aforesaid, or to destroy, tear, deface, or otherwise injure any notice, proclamation, or other document purporting to be under the authority of the Council, or of any officer of the said Council, which shall be affixed in any public place, under a penalty of not more than two pounds nor less than five shillings.

Exposing goods for sale.

11. No person shall place or expose for sale on the pathways or streets, carts, goods, parcels, or produce of any kind whatever to the obstruction of the public.

Injuring or extinguishing lamps.

12. Any person who shall wantonly or maliciously break or injure any lamp or lamp-post, or extinguish any lamp set up for public convenience in the said Municipality, shall, over and above the necessary expense of repairing the injury committed, forfeit and pay for every such offence any sum not less than one pound nor more than five pounds.

Houses of ill-fame.

13. Upon representation by any respectable ratepayer that any house or premises within the Municipality and near to the residence of such ratepayer is of ill-fame, it shall be lawful for the By-law Committee to cause the residents of such house or premises to furnish to the Council a list of names, ages, sexes, and occupation of all the inmates of the said house or premises, and upon non-compliance with such request, or if upon consideration the said Committee consider the house to be one of ill-fame, they shall, with the sanction of the Council declare the same to be a nuisance, and shall cause a notice in writing to be served upon the holder of such house or premises or any person resident or being therein, to discontinue or abate the said nuisance within forty-eight hours after the receipt of such notice. And if such nuisance be not so abated, the holder of such house or premises, or other person residing or being therein and acting as such holder, shall be liable to be proceeded against for such nuisance, and shall on conviction thereof forfeit and pay any sum not less than two pounds nor more than twenty pounds.

And if such nuisance shall not be abated within forty-eight hours after such conviction, such holder of such house, or such other person residing or being therein as aforesaid, shall forfeit and pay for such second offence a sum of not less than five pounds nor more than fifty pounds. And if a further period of forty-eight hours shall elapse after such second conviction without the abatement of such nuisance, such holder of such house, or other person residing or being therein as aforesaid, shall for such third offence forfeit and pay any sum not less than ten pounds nor more than fifty pounds.

Deposit of refuse.

14. Any person who shall throw, cast, or lay any refuse or rubbish within the boundaries of the town, except at the depôts proclaimed for that purpose by the Council, shall forfeit and pay a sum not exceeding forty shillings nor less than five shillings.

Buildings not to be erected beyond the building line of any street.

15. Should any person erect any building, verandah, or fence, other than an awning, beyond or outside the building line of any street within the Municipality, without the consent of the Council, he or she shall be liable to a penalty of not less than one pound nor more than five pounds, and should he or she neglect to remove the same, upon receiving notice in writing from the Council so to do, the Council shall have power to remove the building, verandah, or fence, or other erection or obstruction, at the expense or charge of the person so offending.

Driving cattle, &c.

16. No cattle, except milkers, or working bullocks drawing a dray or other vehicle, shall be driven within the boundaries of the Town of Wellington, between the hours of 8 and 10 in the

morning and 4 and half-past 5 in the afternoon. And all cattle driven through the said town at any time shall be kept under proper control. For a breach of this law the driver or owner of the cattle shall be liable to a penalty not exceeding three pounds and not less than five shillings.

Offensive trades.

17. No noisome or offensive trade shall be permitted to be carried on in any premises to the inconvenience of the residents of adjoining or other houses.

Boiling down establishments, &c.

18. Every person who shall have a boiling down establishment, a slaughter-house, or other premises in such a state as to be a nuisance or injurious to health, or any pool, ditch, gutter, watercourse, privy, urinals, cesspool, drain, or ashpit, so foul as to be a nuisance or injurious to health, or any animal, or the carcase of any animal, or any part thereof, in such a state or so kept or left as to be a nuisance or injurious to health, or any accumulation or deposit which is a nuisance or injurious to health, shall, upon conviction of the same by any two Justices in Petty Sessions upon information or complaint made before them, be liable to a penalty not more than two pounds nor less than five shillings for the first offence, and for every subsequent offence not more than five pounds nor less than ten shillings.

The foregoing are the By-laws of the Municipal District of Wellington, passed at a meeting of the Municipal Council held the 25th September, 1879.

(L.S.) JOSEPH AARONS,
Mayor.

W. H. FORWOOD,
Council Clerk.

1879-80.

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF CARCOAR—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 30th January, 1880.

MUNICIPAL DISTRICT OF CARCOAR.

BY-LAWS.

THE following By-laws made by the Council of the Municipal District of Carcoar, for regulating the proceedings of the Council,—for the collection and enforcement of rates,—for the management of roads and streets,—for preventing fires, and for the suppression of nuisances,—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

BY-LAWS for regulating the proceedings of the Council of the Municipal District of Carcoar, for the collection and enforcement of rates, for preventing and extinguishing fires, for the suppression of nuisances, and for the care and management of the public roads and streets.

General duties of the Mayor or presiding Alderman.

1. The Mayor, presiding Alderman, or Chairman at any Committee meeting, shall preserve order, and his ruling upon all matters shall be final, and no argument or discussion shall ensue thereon; but he shall state his reasons for such decision.

2. The Mayor, presiding Alderman, or Chairman shall put all questions, and declare the sense of the Council or Committee thereon.

3. The Mayor, presiding Alderman, or Chairman shall decide as to pre-audience of members where two or more desire to speak, and may call any member to order for refusing to comply with his decision, or speaking a second time upon the subject unless in explanation.

4. Every Alderman introducing a motion shall have the right of reply, and of speaking once on every amendment.

5. Every motion duly put and seconded shall be put first in the affirmative and then in the negative, and the Mayor, presiding Alderman, or Chairman may, if he thinks fit, call upon the members to divide, in order that the correct sense of the meeting may be ascertained.

Meetings of the Council.

6. The Council shall meet for the dispatch of business at seven o'clock p.m. on every alternate Tuesday; but when such day shall be a holiday the Mayor shall appoint such other day for holding the meeting as he may think fit, not exceeding four days earlier or later than the said holiday.

7. In the event of a quorum not being present within half-an-hour after the time appointed for such meeting of the Council, the names of the Aldermen present shall be taken down and entered into the minute-book by the Council Clerk.

8. Every Alderman being absent from three consecutive meetings of the Council shall be liable to a fine of five shillings sterling for every successive meeting thereafter until he resume his attendance; and all such fines and penalties so incurred shall be paid to the Council Clerk within ten days after the person so fined shall have received, or had left at his residence, a notice of such fine; and, in case of default, the Mayor shall enforce the payment thereof under the provisions of the Municipalities Act of 1867. All such fines to be carried to the credit of the Borough funds.

Order of Business.

9. The minutes of the last meeting shall be read, and if no objection be taken as to their correctness the Mayor or presiding Alderman shall thereupon sign the same; but if any objection be made as to their correctness, or any part thereof, the question shall be put to the Council, and if the Council shall so decide the alteration shall be made, and such alterations shall be signed in the margin by the Mayor or presiding Alderman and the Council Clerk.

10. After the confirmation of the minutes of the preceding meeting, the order of business shall be as follows:—

11. Reading of correspondence.

12. The presentation of petitions.

13. Reports of Committees.

14. Motions of which notices have been given.

15. Questions of which notice had been given at the last meeting of the Council.

Conduct of Business.

16. Every Alderman shall stand while speaking, and shall address the Mayor or Chairman.

17. Every Alderman shall confine his remarks to the subject before the Council.

18. No Alderman shall make any remarks of an offensive or personal nature upon any Alderman or officer of the Council.

19. No member shall speak longer than ten minutes on any subject under debate, except it be the mover of any motion; and he shall not speak for a longer period than twenty minutes, unless by consent of the Council previously obtained.

20. A debate, by motion, may be adjourned at any time.

21. All petitions shall be presented by an Alderman, and read by him to the Council; and no petition shall be received unless its reception be moved, seconded, and carried.

22. All notices of motion shall be in writing, signed by the mover, and delivered to the Council Clerk four clear days before the day of meeting.

23. The Council shall vote by show of hands, and every Alderman present shall be compelled to vote, excepting the Mayor or Chairman.

24. No member shall interrupt another while speaking, by any acclamation or other expressions of approval or dissent.

25. No motion in Council shall be discussed unless and until it be seconded.

26. When a motion in Council shall have been made and seconded, any Alderman shall be at liberty to move an amendment thereon; but no such amendment shall be discussed unless and until it be seconded. No motion or amendment shall be discussed until it shall have been reduced into writing. No second or subsequent amendment shall be taken into consideration until the previous amendment or amendments shall have been disposed of. If an amendment be carried, the question as amended thereby shall become itself the question before the Council; whereupon any further amendment upon such question may be moved. If any amendment, either upon an original question or upon any question amended as aforesaid, shall be negatived, then a further amendment may be moved to the question to which such first mentioned amendment was moved, and so on, provided that not more than one question and one proposed amendment thereof shall be before the Council at any one time.

27. No motion to rescind a resolution or to affect it in any way, shall be put upon the business paper, unless by consent of a majority at a call of the whole Council.

28. A call of the whole Council may be ordered by resolution of which due notice has been given.

29. Whenever any matter of order arises, it shall be taken into consideration immediately; and upon a member rising to order, he shall be heard, and the member who was speaking shall sit down until the question of order has been decided; but in case any Alderman called to order, or requested to sit down, refuses to obey the ruling of the Mayor or Chairman, he shall pay a fine of five shillings.

30. The Council Clerk shall make out a paper, to be called the Business Paper, which shall contain all matters to be considered, and all such papers shall be filed and become records of the Council.

31. All such business papers shall be indorsed in the margin by the Mayor or Chairman, specifying the manner in which each matter has been disposed of.

Committees.

32. There shall be four permanent Committees, viz.:—The Finance, the By-law, the Works, and the Committee for General Purposes, and all reports of Committees shall be signed by the Chairman.

33. No expenses shall be incurred until the probable cost is first ascertained.

34. The Mayor may in cases of emergency authorize the expenditure of any sum not exceeding five pounds, and by request of not less than three Aldermen given him in writing, under their signatures, may for a like reason authorize the expenditure of a sum not exceeding ten pounds; but no further expenditure shall be permitted until the Council shall have met and approved of the outlay.

Collection of Rates.

35. All rates made by the Council may be paid half-yearly—viz., within fourteen days after the expiration of the thirty days allowed by law, and the balance within six months thereafter in each year, and shall be paid to the Council Clerk at the Council Chambers during office hours.

36. The Council Clerk shall, at the expiration of the dates beforementioned, lay before the Council a list of all persons whose rates are in arrear.

37. The Mayor shall take immediate steps to enforce payment of all rates due as aforesaid, either by summons or distress warrant, by resolution of the Council.

38. The Council may appoint a Bailiff, who shall make all levies of distresses for the recovery of any rates, under the warrant of the Mayor, according to Schedule A hereto annexed.

39. The Bailiff shall be paid for all levies, entries, distresses, and warrants made under these By-laws, according to Schedule B hereto annexed.

40. The Bailiff shall, at the time of making any distress, make out an inventory of all goods, live stock, land, houses, or other property; and shall deliver a copy thereof to the owner of the property or goods so distrained thereon, or the occupier thereof, or to some person on his or her behalf; or in the absence of any such owner or occupier, then such inventory shall be posted on some part of the premises, and a like copy shall be delivered to the Council Clerk.

41. It shall be lawful for any Bailiff, and such assistants as he may require, to enter into and upon any land, buildings, or other property in respect of which a warrant has been issued, for the recovery of rates as aforesaid, and to distrain goods therein and thereon, and to remain in charge of such building or other property; and if the sum for which such distress shall have been made or taken be not paid on or before the expiration of five days, it shall be lawful to sell the said goods, or any part thereof, by public auction, either on the premises or at any other place within the Municipal District of Carcoar; and the surplus, if any, that may remain after deducting the costs, in addition to the sum distrained for, shall be paid over to the owner of the goods so sold.

42. The Bailiff shall, within forty-eight hours after such sale, deliver to the Council Clerk the proceeds thereof, as also the inventory of the effects so sold.

43. In the temporary absence of the Bailiff through illness or business, the Mayor may appoint a substitute.

Management of Roads and Streets.

44. No person shall erect any house or other building in any street, road, or lane in the Municipal District of Carcoar without giving notice thereof in writing to the Council Clerk, describing the nature and situation of the intended erection.

45. No person shall be permitted to encroach beyond the building-line in any road, street, or lane under the control of the Council, by the erection of houses, verandahs, steps, fences, or any other obstruction, under a penalty of one pound.

46. Any person erecting such obstruction as aforesaid, and not removing the same within fourteen days from the date of notice served on the premises or ground complained of, shall be liable to a penalty of not less than forty shillings, nor more than five pounds.

47. All houses within the Municipality, having frontages to a main thoroughfare, being kerbed and guttered, shall be sufficiently spouted with down piping, to be laid under the footpath and kerb into the gutter, under a penalty of five shillings.

48. No person shall throw or deposit any rubbish, dead fowls, or animals of any description, or offensive matter, into any road, street, lane, footpath, gutter, or any ground near to a public way, under a penalty of five shillings.

49. No driver or other person shall wilfully or negligently do, or cause to be done, any damage or injury to the kerbstones, gutters, or footpaths, or to drive any horses, cattle, or other animals, or wheeled vehicles of any description, on the footpaths, under a penalty of ten shillings.

50. No person shall be allowed to place any building materials on the footpaths, unless by the sanction of the Mayor in writing, countersigned by the Council Clerk; and any building materials so placed, or any open cutting or excavations, shall be protected by two lights, to be kept burning from dark until daylight; and for every such authority as aforesaid the sum of two shillings and sixpence shall be charged.

51. No person shall place on the footpath, or in the gutter, any cart, barrow, goods, or produce of any kind to the obstruction of the public, under a penalty of ten shillings.

Prevention of Fires.

52. No person shall place or permit to be placed in any house, workshop, or other building, fire, gunpowder, or combustible or inflammable material of any kind so as to endanger contiguous buildings.

53. The Inspector of Nuisances shall, upon receiving a representation in writing that fire is being used, or combustible matter stored, to the danger of adjoining buildings, proceed to the premises complained of, and shall, if he thinks necessary, cause the danger to be removed immediately.

Nuisances.

54. No person residing within the Municipality shall be allowed to permit his or her premises, closets, or drains to be offensive to the neighbours.

55. No offensive trade shall be permitted to the inconvenience or annoyance of any resident in the Municipality.

56. No person shall breed or keep swine in any house, yard, building, or enclosure of any description, situate within forty yards of any public road or thoroughfare, under a penalty of not less than forty shillings nor more than £5 for every offence.

SCHEDULE A.

I, **Mayor of the Municipal District of Carcoar**, do hereby authorize you, **Bailiff of the said Municipal District**, to distrain the goods and chattels in the dwelling-house, or in or upon the land and premises of situate at _____ for the sum of _____ being the amount of Municipal rates due to the said Municipality, to the _____ day of _____ for the said dwelling-house, land, or premises, and to proceed thereon for the recovery of the said rates according to law.

Dated this _____ day of _____ 18 _____ Mayor.

SCHEDULE B.

Fees of Bailiff.

	s.	d.
For every warrant	3	6
For making every entry and inventory in the execution of a warrant.....	3	0
If in possession five hours.....	5	0
For every other day or part of a day	6	0
And 5 per cent. on net amount of sale.		

Inventory.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF GULGONG—AMENDED BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 13th February, 1880.

MUNICIPAL DISTRICT OF GULGONG.

AMENDED BY-LAW.

THE following By-law, made by the Council of the Municipal District of Gulgong, in substitution of clause 6 of Part I of the By-laws of that Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the requirements of the "Municipalities Act of 1867."

HENRY PARKES.

GULGONG MUNICIPALITY.

BY-LAW No. 6.

A Member called to order shall withdraw while the question of order is being discussed and decided upon, unless specially permitted to offer an explanation, retraction, or apology, but on obtaining such special permission such Member shall explain, retract, or apologise for the matter or remark alleged to have been out of order; and if such explanation, retraction, or apology be deemed satisfactory no further discussion on the question of order shall be permitted. If any Member on being called to order shall ask such permission to explain, retract, or apologise as aforesaid, the Mayor or Chairman may, of his own authority, grant or refuse such permission as he may think fit, unless any Member shall require the sense of the Council to be taken on this question; in such case it shall be the duty of the Mayor or Chairman to take the sense of the Council at once, and without discussion, as to whether such permission shall be granted; and when any such explanation, retraction, or apology shall have been made or offered by permission of the Mayor or Chairman, the latter shall in like manner decide, or, if required so to do, shall take the sense of the Council as to whether such explanation, retraction, or apology is considered sufficient; if such permission be refused, or if such explanation, retraction, or apology be considered insufficient, the question of

order shall be considered and decided before any other business is proceeded with. If any Member of the Council refuses to explain, retract, or apologise after being ruled out of order by the Mayor or Chairman, he shall be liable to a penalty of not less than ten shillings nor more than five pounds (£5): Provided that if such Mayor or Chairman shall have decided the question of order before any Member shall have required the sense of the Council to be taken in reference thereto, such question of order shall not be re-opened: And provided further, that nothing herein contained shall be held to affect the right of such Mayor or Chairman to decide finally, as hereinbefore provided, upon any such point of order after the same shall have been discussed.

This By-law, as amended, was duly passed at a general meeting of this Council held on Wednesday, 17th December, 1879,—a call of the Council having been made for that purpose.

(l.s.) WILLIAM SELFF,
Mayor.

W. M. HOPPER, Council Clerk.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF LISMORE—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 16th April, 1880.

MUNICIPAL DISTRICT OF LISMORE.

THE following By-laws, made by the Council of the Municipal District of Lismore, for regulating their own proceedings and the duties of their officers and servants, and preserving order at Council meetings; for determining the times and modes of collecting and enforcing payment of rates; for preventing and extinguishing fires; for the regulation, management, and preservation of streets and public places, &c.; for promoting and preserving public health; preventing and suppressing nuisances and preserving public decency; for restraining noisome and offensive trades; for preventing or regulating and licensing exhibitions held or kept for hire or profit, bowling-alleys, and other places of amusement; and generally for maintaining the good rule and government of the Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

By-Laws made and adopted by the Council of the Municipal District of Lismore for regulating the proceedings of the said Council and of the Committees connected therewith, for the preservation of order and the conducting of business at all the meetings of such Council and Committees; for defining and regulating the powers and duties of the officers and servants of the said Council; for determining the times and modes of collecting and enforcing payment of rates; for preventing and extinguishing fires; the regulation, management, and preservation of the streets and public places; regulations for promoting and preserving public health; for the prevention and suppression of public nuisances, and for preserving public decency; for dealing with and abating public annoyances and obstructions; for preventing or regulating and licensing exhibitions, bowling-alleys, and other places of amusements held or kept for hire or profit, with miscellaneous regulations for generally maintaining the good rule and government of the said Municipality.

PART I.

PROCEEDINGS OF THE COUNCIL AND COMMITTEES—DUTIES OF OFFICERS AND SERVANTS.

Meetings of the Council.

Ordinary Meetings.

1. The Council shall meet for the transaction of business on every alternate Monday, at the hour of 7 o'clock p.m., unless such day shall happen to be a public holiday. In the latter case the meeting shall be held on such other day as the Mayor may appoint.

Election of Chairman.

2. If at any meeting of the Council the Mayor be absent at the expiration of twenty minutes after the time appointed for holding such meeting the Aldermen then present shall proceed to elect from among themselves a Chairman for such meeting.

Order of Business.

Business of Ordinary Meetings.

3. The following shall be the order of business at all meetings of the Council other than special meetings :—
1. The minutes of the last preceding meeting to be read, corrected if erroneous, and signed by the Mayor or other Chairman. No discussion to be permitted on such minutes, except as to whether they are correct.
 2. Petitions (if any) to be presented and dealt with.
 3. Correspondence to be read and orders made thereon, if expedient.
 4. Reports from Committees and minutes from the Mayor (if any) to be presented, and orders made thereon.
 5. Questions as to any matters under the jurisdiction or within the official cognizance of the Council to be put and replied to; and statements as to any facts, matters, or circumstances requiring attention by the Council or any of the Committees or officers to be made.
 6. Motions of which notice has been given to be dealt with in the order in which they stand on the business paper.
 7. Orders of the day to be disposed of as they stand on the business paper.
 8. Consideration of tenders and acceptances.

Business may be dealt with out of regular order.

4. It shall be competent for the Council at any time by resolution, without notice, to entertain any particular motion or to deal with any particular matter of business out of its regular order on the business paper without any formal suspension of this section; or such particular motion or business

may be adjourned to a later hour of the day, or to any other day specified; and the Alderman upon whose motion such debate shall have been so adjourned shall be entitled to pre-audience on the resumption of the same.

Business paper—Ordinary meetings.

5. The business paper for every meeting of the Council shall be made up by the Council Clerk or substitute, and delivered to the Mayor and Aldermen, or left at their respective residences, at least twenty-four hours before the time appointed for such meeting. The Council Clerk shall enter on such business paper a copy or the substance of every notice of motion proposed to be entertained at such meeting which he shall have received.

Business paper—How disposed of.

6. The business paper for each meeting of the Council shall, at such meeting, be laid before the Mayor or Chairman, who shall make a note upon such business paper of the mode in which each matter entered thereon has been dealt with. And such business paper so noted shall be a record of the Council.

Business paper—Special Meeting.

7. At special meetings of the Council the business after the minutes shall have been read and verified, which shall be done in the same manner as at an ordinary meeting, shall be taken in such order as the Mayor, or the Alderman at whose instance such special meeting shall have been called, may have directed.

Petitions.

Petitions to be respectfully worded.

8. It shall be incumbent on every Alderman presenting a petition to acquaint himself with the contents thereof, and to ascertain that it does not contain language disrespectful to the Council. The nature and prayer of every such petition shall be stated to the Council by the Alderman presenting the same.

Petitions—how received.

9. All petitions shall be received only as the petitions of the parties signing the same.

Petitions—How to be dealt with.

10. No motion other than for the reception of a petition shall, unless as hereinafter provided, be permissible on the presentation of such petition, except that the same be referred to a Committee, or that its consideration stand an order of the day for some future meeting. Provided however that if any Alderman shall have given due notice of a motion in reference to the subject of any petition, or of the consideration of the subject of any petition shall have been made an order of the day, and such petition shall have been presented before such motion or order of the day shall have been called on, such order of the day, or the said motion, if otherwise unobjectionable, shall be considered in order.

Correspondence.

11. The Mayor shall have the same duty in reference to letters addressed to the Council before directing the same to be read as by section 8 of this part of these by-laws is imposed upon Aldermen presenting petitions. If not read, to be returned to the writer and reported to the Council. The Mayor shall direct as to the order in which all correspondence shall be read, and no letter addressed to the Council or any of its officers shall be presented or read by any Alderman. If the Mayor be absent, and shall not have examined any such letters, or have given any such directions as aforesaid, then the duties imposed by this section shall devolve upon the presiding Alderman.

Letters sent not to be discussed, but every letter may be subject of motion:

12. No discussion shall be permitted in reference to any letters which have been written and sent by the Mayor or Town Clerk, and copies of which may be read to the Council; provided however that any notice of motion consistent with good order may be entertained with reference to any letters, whether read or not, or with reference to any letters addressed to the Council which the Mayor or presiding Alderman may not have ordered to be read as aforesaid.

Reports of Committees.

13. All reports from Committees shall be written on foolscap paper with a margin of at least one-fourth of the width of such paper, and shall be signed by the Chairman of such Committee, or in his absence by some other member of the same.

Mayor's Minute.

14. The Mayor shall have the right of directing the attention of the Council to any matter or subject within its jurisdiction or official cognizance by a minute in writing. Every such minute shall be written on paper of the same kind and with the same margin as a report from the Committee, and shall be signed by such Mayor.

Reports—how to be dealt with.

15. No motion shall, unless as hereinafter provided, be permissible on the presentation of a report from a Committee, or a minute from the Mayor, except that the same be received, or that it be received, and that its consideration stand an order of the day for some future meeting: Provided that if any Alderman shall have given due notice in reference to any such report or minute, or if the consideration of such report or minute shall have been entered among the orders of the day, such order of the day, or such motion, if otherwise unobjectionable, may be moved and considered in due course. And whenever such report or minute embodies any recommendation which cannot legally be carried out without due notice, and it is desirable that such report or minute should be ordered upon during the meeting of the Council at which such report or minute is presented, it shall be the duty of the Chairman or member of such Committee signing such report, or of the Mayor, as the case may be, to give or transmit to the Council Clerk such a notice of motion, requisition, or direction as aforesaid, as will enable the Council Clerk to make the necessary entry on the business paper, and to give such due notice.

Questions and statements.

Limitation as to questions and statements.

16. No question or statement shall be allowed to be put or made which is inconsistent with good order or is not in strict accordance with the requirements of section 4 of this part of these By-laws.

Notice to be given.

17. Sufficient notice of every question shall be given to the person who is expected to reply thereto, to allow for the consideration of such reply, and, if necessary, for a reference to other persons or to documents.

Answer not compulsory.

18. It shall not be compulsory upon the Mayor or upon any Alderman so questioned as aforesaid to answer the question so put to him.

Questions to be put without argument.

19. Every such question must be put categorically without any argument or statement of fact.

Similar provision as to statements.

20. Every such statement must be made without argument.

No discussion on questions, &c.—Right of objection and of subsequent motion reserved.

21. No discussion shall be permitted as to any such question, or as to any reply or refusal to reply thereto, or as to any such statement at the time when such question is put, or such reply or refusal to reply is given, or such statement is made: Provided however that nothing herein contained shall prevent the taking of any objection as to any such question or statement being out of order, or shall prevent the discussion, after due notice as hereinbefore provided, of any matters properly arising out of or relating to any such question or reply, or refusal to reply, or any such statement as aforesaid.

Motions.

Notices of motion to be numbered as received, and preserved until matter disposed of.

22. All notices of motion, &c., for the consideration of the Council at its next meeting shall be numbered by the Council Clerk as they shall be received, and entered on the business paper according to their number, and each notice shall be preserved by such clerk until after the matter to which it relates shall have been disposed of.

Motions and amendments.

23. All notices of motion shall be in writing, dated and signed by the Alderman proposing the same previous to being handed to the Council Clerk, and shall not be withdrawn from the business paper without the leave of the majority of the Council.

24. No motion the effect of which if carried would be to rescind any motion which has already passed the Council shall be entered on the business paper, unless a "call of the whole Council" has been duly made and granted for that purpose.

25. A call of the Council may be ordered by any resolution of which due notice shall have been given for the consideration of any motion or matter of business before such Council.

Motions.

How to be moved.

26. Except by leave of the Council motions shall be moved in the order in which they stand on the business paper, and if not so moved or postponed shall be struck from such business paper and be considered to have lapsed.

Absence of mover.

27. No motion of which notice shall have been entered on the business paper shall be proceeded with in the absence of the Alderman by whom such notice shall have been given, unless by some other Alderman producing a written authority for that purpose from such first-named Alderman.

Motion to be seconded.

28. No motion in Council shall be discussed unless and until it be seconded.

Amendments may be moved.

29. When a motion in Council shall have been made and seconded any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed until it be seconded.

Motions and amendments to be in writing.

30. No motion or amendment shall be discussed until it shall have been reduced into writing.

Amendments—only one at a time.

31. No second or subsequent amendment shall be taken into consideration until the previous amendment or amendments shall have been disposed of.

Amended question further amended may be moved thereon.

32. If an amendment be carried the question as amended thereby shall become itself the question before the Council, whereupon any further amendment upon such question may be moved.

Amendments—how subsequent ones may be moved.

33. If any amendment either upon an original question or upon any question amended as aforesaid shall be negatived, then a further amendment may be moved to the question to which first-mentioned amendment was moved, and so on, provided that not more than one question and one proposed amendment thereof shall be before the Council at any one time.

Adjournments—motions for.

34. No discussion shall be permitted on any motion for adjournment of the Council, and if upon the question being put on any such motion the same be negatived, the subject then under consideration, or the next in order on the business paper, or any other on such paper that may be allowed precedence, shall be discussed before any subsequent motion for adjournment shall be receivable.

Orders of the Day.

35. The orders of the day shall consist of any matters other than motions on notice which the Council shall at a previous meeting thereof have directed to be taken into consideration, or which the Mayor shall have directed to be entered on the business paper for consideration.

How they are to be dealt with.

36. The Alderman who has the usual charge of, or who has previously moved in reference to the particular business to which any such order of the day relates shall be the person called upon to move; provided that the Mayor may as to any order of the day entered by his direction arrange with and call upon any Alderman to move the same.

*Order of Debate.**Mode of addressing the Council, &c.*

37. Every Alderman who shall make or second any motion, or shall propose or second any amendment, or shall take any part in any debate or discussion, or shall put or reply to any question, or shall make any statement, or shall in any other way, or for any other purpose, address observations to the Council, shall while so doing stand up in his customary place (unless he shall be prevented from so doing by reason of some bodily infirmity), and shall address himself to the Mayor or other Chairman then presiding. And all Members of the Council shall on all occasions when in such Council address and speak of each other by their official designations, as Mayor, Chairman, or Alderman, as the case may be.

Speaker not to be interrupted if in order.

38. No Alderman shall be interrupted while thus speaking, unless for the purpose of calling him to order as hereinafter provided.

Number of Speeches—limitation of.

39. Every mover of an original motion shall have a right of general reply to all observations which may have been made in reference to such motion, and to any amendments moved thereon, as well as a right to speak upon every such amendment. Every Alderman, other than the mover of such original motion, shall have a right to speak once upon such motion, and on every amendment thereon. No Alderman shall speak oftener than once upon any question other than a question of

order, unless when misrepresented or misunderstood, in which case he shall be permitted to explain, without adding any further observations than may be necessary for the purposes of such explanation.

Mover and Seconder.

40. An Alderman who has moved any motion or amendment shall be considered to have spoken thereon, but an Alderman who shall have seconded any such motion or amendment without any further observation than that he seconded the same shall be at liberty to speak on such motion or amendment.

Speaker not to digress, &c.

41. No Alderman shall digress from the subject under discussion, or shall make personal reflections on nor impute improper motives to any other Alderman.

Adjournment of Debate.

42. A debate may be adjourned to a later hour of the day, or to any other day specified, and the Alderman upon whose motion such debate shall have been so adjourned shall be entitled to pre-audience on the resumption of the same.

Pre-audience—Mayor to decide.

43. If two or more Aldermen rise to speak at the same time the Mayor or Chairman shall decide which of such Aldermen shall be first heard.

Points of Order—Mayor to decide.

44. The Mayor or Chairman shall preserve order, and his decision upon disputed points of order or practice shall be final.

Mayor may address the Council.

45. The Mayor shall have the same right as any other Alderman to speak upon every subject or amendment.

Mayor or Chairman may move or second motion.

46. The Mayor or Chairman may move or second any motion or amendment, or put any question, as provided for by section three of this part of these By-laws; and such Mayor or Chairman shall have the same right as any other Alderman to speak once upon every subject or amendment. The Mayor or Chairman shall rise when so speaking, unless prevented by some bodily infirmity from so doing, but shall be considered as still presiding.

Mayor may call Members to order.

47. The Mayor or Chairman may, without the interposition of any other Member of the Council, call any Alderman to order whenever in the opinion of such Mayor or Chairman there shall be a necessity for so doing.

Mayor's authority in deciding points of order.

48. The Mayor or Chairman when called upon to decide points of order or practice shall state the provision, rule, or practice which he shall deem applicable to the case without discussing or commenting upon the same.

Mode of voting—how questions to be put.

49. The Mayor or Chairman for the time being shall put to the Council all questions on which it shall be necessary that a vote be taken, and declare the sense of the Council thereon.

Divisions—Penalty for refusing to vote.

50. Any Alderman may call for a division, and the votes shall be taken by a show of hands. In such case the question shall be put first in the affirmative and then in the negative, and the names and votes of the Aldermen present shall be recorded. Any Alderman present when a division is called for who shall not vote on such division, not being disabled by law from so voting, shall be liable for every such offence to a penalty of not less than five shillings nor more than two pounds.

Rules applicable to business in Committee.

51. Sections 29, 30, 31, 32, 33, 37, 38, 41, 43, 44, 45, 47, 48, 49, 50 of this part of these By-laws shall be taken to apply to the business in Committee of the whole Council, except that it shall not be necessary that any motion or amendment in Committee shall be seconded.

Calls of the Council—how Calls may be ordered.

52. A call of the Council may be ordered by any resolution of which due notice shall have been given for the consideration of any motion or matter of business before such Council.

Calls compulsory in certain cases.

53. No motion the effect of which if carried would be to rescind any resolution, order, or decision of the Council shall be entered on the business paper unless a call of the Council has been duly made and granted for such purpose.

Mode of proceeding.

54. The call shall be made immediately before the motion or business for which such call has been ordered shall be moved or considered. The Council Clerk shall call the names of all the Members in alphabetical order, and if any Members are absent a record shall be made of such absence. But if leave of absence to any such Member shall have been previously granted, or if such an excuse in writing shall have been received by the Mayor or Council Clerk as the majority of the Council then present shall consider satisfactory, such absent member shall stand excused, and a record shall be made of such excuse and of the reasons for the same.

Penalty for absence.

55. Any Member of the Council who having had notice of the call shall be absent without having been legally excused as aforesaid, and who shall fail to show that by reason of illness or other sufficient cause he was unable to send an excuse in writing as aforesaid, or who having answered to his name shall not be present when a vote is taken on the motion or business as to which such call was made, shall for every such offence be liable to a penalty of not less than ten shillings nor more than five pounds.

Protests—Mode of proceeding.

56. The Mayor shall exercise a general supervision over all officers and servants of the Corporation and may order the preparation of any such return or statement or the giving of any such explanation or information by any such officer or servant as he may think necessary.

Standing and Special Committees.

57. Besides such Special Committees as may from time to time be found necessary, there shall be two standing Committees of the Council, each consisting of not less than three Members, viz., a Finance Committee, and an Improvement Committee.

Improvement Committee.

58. The Improvement Committee shall have the general direction of all works ordered or sanctioned by the Council, and the general inspection of all streets, roads, ways, bridges, public reserves, and other public places under the care and management of the Council. They shall also inquire and report from time to time as to such improvements or repairs as they may think necessary, or as they may be directed by resolution of the Council to inquire and report upon.

Finance Committee.

59. The Finance Committee shall examine and check all accounts, and shall watch generally over the collection and expenditure of the Municipal revenues. They shall inquire and report from time to time as to all matters which they may consider to affect, or to be likely to affect, the finances of the Municipality, and as to such matters or subjects of the like nature as they may be directed by resolution of the Council to inquire and report upon.

Committee of the whole Council.

60. The Council may at any time resolve itself into a Committee of the Whole for the consideration of any matter affecting the Municipality, and the business of such Committee of the whole Council shall be conducted in accordance with the rules hereinbefore provided, as near as the same shall apply, except that it shall not be necessary that any motion or amendment in Committee shall be seconded.

Records of transactions in Committee.

61. The Chairman of each standing Committee shall make, or cause to be made, in a book kept by him for that purpose, memoranda of all the transactions of such Committee, which book he shall on ceasing to be such Chairman hand over to his successor.

Chairman of Committees.

62. Every Committee of which the Mayor shall not be a Member shall elect a permanent Chairman of such Committee, who may direct the Council Clerk to call meetings whenever he shall think it desirable.

Expenditure—Cost of works to be estimated before undertaken.

63. No works affecting the funds of the Municipality, except as hereinafter is mentioned, shall be undertaken until the probable expense thereof shall have been first ascertained by the Council.

Cases of emergency and current expenses.

64. In cases of emergency the Mayor may authorize the expenditure of any sum not exceeding fifteen pounds, and such expenditure shall be reported to the Council at the next meeting. And the Mayor may order the payment of wages of labour for officers, servants, and labourers employed at fixed rates of payment, such rates being fixed by order of the Council.

Completion of work to be reported by Improvement Committee.

65. No works undertaken by the Council shall be deemed to have been completed, and no order shall be made for the payment in full of the same, except upon a report or certificate to that effect from the Improvement Committee.

Common Seal—how secured.

66. The common seal shall be secured by a cover or box which shall be kept at the Council Chambers, in the custody of the Council Clerk. There shall be duplicate keys to the lock of this cover or box, of which keys one shall be kept by the Mayor and the other by the Council Clerk.

Common Seal—when and how used.

67. The seal of the Corporation shall not be affixed to any document of the Municipality without the express authority of the Council; and every impression thereof so authorized shall be verified by the signature of the Mayor, or in case of the illness or absence of the Mayor, by two Aldermen, and countersigned by the Council Clerk.

The custody of books of accounts, deeds, and other records.

68. All books, deeds, memorials, letters, documents, and other records of the Council, except as hereinafter mentioned, shall be kept at the Council Chambers, in the custody and care of the Council Clerk, who shall be responsible for the safe custody of the same; but the Mayor may for any special purpose authorize their removal.

Books, &c., not to be shown or exposed to view without leave.

69. No member or officer of the Council shall be at liberty to show, lay open, or expose any of the books, papers, or records of the Council to any person not a member of the Council without the written permission of the Mayor, unless as otherwise provided by law.

Records not to be removed.

70. Any person removing any such book, paper, or record from the Council Chambers without leave from the Mayor in writing, first had and obtained, shall be subject to a penalty of not less than ten shillings, nor more than ten pounds, and nothing herein contained shall be held to affect the further liability of any person who shall have removed such book, paper, or record, and shall not have returned the same, to prosecution for stealing such book, paper, or record, or to an action at law for detention of the same, as the circumstances of the case may warrant.

Receipt for documents.

71. Every person removing any document or record with such consent as aforesaid shall give a receipt under his hand for every such document, which receipt shall be carefully preserved among the records until the document or other record to which it refers shall have been returned, when such receipt shall be destroyed.

*Records.**Penalty for defacing or destroying.*

72. Any person destroying, defacing, or wilfully or improperly altering any books, papers, or records shall for every such offence be liable to a penalty of not less than five pounds, nor more than twenty pounds.

*Officers and Servants.**Mode of appointment.*

73. Every permanent appointment shall be made by ballot, in such mode as may at the time be determined upon, whenever there is more than one candidate for such permanent office.

Exceptional cases.

74. Nothing herein contained shall be held to prevent the employment, as may be from time to time found necessary, and as may be ordered by the Council, of any workmen or labourers on the public works of the Municipality.

Bonds for good conduct.

75. All bonds given by officers or servants of the Council for the faithful performance of their duties shall be deposited in such custody as the Council may order; and no member, officer or servant of the Council shall be received as a security for any officer or servant.

Council Clerk—duties of.

76. The Council Clerk shall perform all the duties which the Municipalities Act of 1867, or by the present or any other by-laws hereunder, he may be required to perform. He shall be the clerk of all Revision Courts held in the Municipality under the provisions of the Municipalities Act. He shall also, under the direction of the Mayor, conduct all correspondence which may be necessary on the part of the Council, and shall generally assist the Mayor in carrying out the orders of the Council and the duties of such Mayor.

Complaints against officers.

77. All complaints against officers or servants of the Corporation must be in writing, addressed to the Mayor, and must in every case be signed by the person or persons complaining; and no notice whatever shall be taken of any complaint which is not in writing, or which is anonymous. And such complaint as aforesaid shall be laid by the Mayor before the Council at the next meeting thereof which shall be holden after the Mayor shall have received the same, and shall be duly recorded.

Special powers of Mayor.

78. The Mayor may from time to time define the duties of all officers and servants of this Corporation, and shall exercise a general supervision over all such officers and servants, and may order the preparation of any such return or statement or the giving of any such explanation or information by any such officer or servant as he may think necessary, unless the Council shall have expressly forbidden or dispensed with the preparation of such return or statement or the giving of such explanation or information.

Miscellaneous.

Drafts of intended additional By-laws.

79. A draft of any intended By-law shall lie in the office of the Council for at least seven days before such draft shall be taken into consideration by the Council, and shall be open to the inspection of any rate payer who desires to inspect the same.

Lapsed business.

80. Whenever the consideration of any motion or matter of business shall have been interrupted by reason of a quorum not having been present the resumption of such consideration shall in such case be resumed at the next meeting, at the point where it was so interrupted.

Public notices—how published

81. In all cases where public notice is or shall be required to be given by any By-law, such notice shall be given and published by advertising the same in some newspaper circulating in the Municipality.

By-Laws.

Powers to suspend temporarily certain portions.

82. Any of the foregoing By-laws which relate to or affect the proceedings at meetings of the Council may be suspended *pro tempore* without notice in cases of emergency if all the members of the Council then present shall deem such suspension necessary.

PART II.

Collection and Enforcement of Rates.

1. All rates levied and imposed by the Council shall be held to be due and payable on and after such day or days as the Council shall by resolution from time to time appoint.

Time and place of payment.

2. All such rates shall be paid at the Council Chambers during the hours appointed by the Council for that purpose.

Defaulters.

3. Every person not paying his or her rates as aforesaid within thirty-seven days after the day so appointed for payment thereof shall be deemed a defaulter, and it shall be the duty of the Council Clerk to furnish the Mayor from time to time with a list of the names of all persons so in default.

Mayor to enforce payment.

4. It shall be the duty of the Mayor to take proceedings to enforce the payment of all rates in default, either by action at law or by issuing warrants of distress upon the goods and chattels of the defaulters.

Bailiff.

How appointed.

5. The Bailiff of the Municipality shall be appointed by the Council, and may from time to time be removed by them.

Duties of Bailiff.

6. It shall be the duty of the Bailiff to make levies by distraint for the recovery of rates in manner hereinafter provided.

Warrant of Distress.

7. All levies and distresses shall be made under warrant in the form of Schedule A hereto, under the hand of the Mayor or any Alderman who may for the time being be duly authorized to perform the duties of that office.

Distress and sale, &c

8. It shall be lawful for the bailiff, or his deputy, and such assistants as he may take with him, to enter into any part of the land, building, tenement, or other property in respect of which such rate or rates shall have been made as aforesaid,

and to distraint the goods therein or thereon, and to remain in such building, tenement, or other property in charge thereof; and if the sum for which any such distress shall have been made or taken, together with the costs of such distraint, shall not have been paid on or before the expiration of three clear days, the bailiff or his deputy may, between the hours of eleven in the morning and two in the afternoon on the next day thereafter, cause the goods so distrained, or a sufficient portion thereof, to be sold by public auction, either on the premises or at such other place within the Municipality as the bailiff may think proper to remove them for such purpose, and shall pay over the surplus (if any) that may remain after deducting the amount of the sum distrained for and the costs of such distraint to the owner of such goods so sold on demand of such owner; and any person interfering with the said bailiff in the execution of any of the duties devolving upon him under these By-laws, or hindering or preventing him from delivering to the purchaser thereof any property so sold by the said bailiff shall be liable to a penalty of (£5) five pounds.

Inventory.

9. At the time of making a distress the bailiff shall make out a written inventory, in the form of Schedule B hereto, which inventory shall be delivered to the occupant of the land or premises, the owner of the goods so distrained, or to some person on his or her behalf resident at the place where the distress shall be made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress is made, and the bailiff shall give a copy of the inventory to the Council Clerk.

Goods may be impounded.

10. The bailiff, on making a distress as aforesaid, may impound or otherwise secure the goods or chattels so distrained of what nature or kind soever, in such place or places, or in such part of the land or premises chargeable with rates as shall be most fit and convenient for this purpose; and it shall be lawful for any person whomsoever, after the expiration of three days as hereinbefore mentioned, to come and go to and from such place or part of the land or premises where such goods or chattels shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

Owner may direct order of sale.

11. The owner of the goods or chattels so distrained may at his own option direct and specify the order in which they shall be successively sold, and the said goods or chattels shall in such case be put up for sale according to such direction.

Proceeds of distress.

12. The bailiff shall hand over to the Council Clerk all proceeds of every such distress within forty-eight hours after having received the same.

Bailiff's deputy.

13. The Bailiff, may with sanction in writing of the Mayor, or in his absence with the sanction of any two Aldermen of the Municipality, authorize by writing under his hand any person to act temporarily as his deputy, and the person so authorized shall have and exercise all the powers of the bailiff himself, but the bailiff and his sureties shall in every case be responsible for the acts of such deputy.

Costs.

14. There shall be payable to the bailiff for the use of the Council for every levy and distress made under this By-law the costs and charges in the Schedule hereunto annexed marked C.

SCHEDULE A.

Warrant of Distress.

To and his assistants.

WHEREAS The premises comprised in the Schedule hereunder written have been rated by the Municipal Council of Lismore in the sum of £ as for general rates. And whereas the said sum was due and payable on account of such rates by the said on the day of And whereas default has been made in payment of the same, and the same is still due and owing; and whereas due notice demanding payment of the said sum of £ has been duly served: These are therefore to authorize you forthwith to make distress of the goods and chattels of the said and if within three days after the making of such distress the sum of £ and also all costs thereon, payable according to the Schedule of costs hereunder written, shall not be paid, that then you do sell the goods and chattels of the said so by you distrained, and out of the money arising by such you retain the said sum of £ rendering to the said the surplus,

if any, after deducting the costs as aforesaid, and that you certify to me on or before the day of , what you shall have done by virtue of this warrant.

Name of occupier.	Description of property.	Situation of property.	Rates Municipal Year ending.	Costs.	Total.

Given under my hand, and the common seal of the Municipal Council of Lismore this day of

SCHEDULE B.

	s.	d.
For every warrant of distress	2	6
For every levy	2	6
For men in possession, each day or part of a day	6	0
Inventory, sale, commission, and delivery of the goods, 5 per cent. on the net proceeds of the sale.		

PART III.

Preventing and extinguishing fires.
Fire or combustible materials, &c.

1. Every person who shall place or knowingly permit to be placed in any house, yard, workshop, out-offices, or other premises, fire, gunpowder, or combustible or inflammable materials of any kind in such a manner as to endanger any buildings shall on conviction for every such offence forfeit and pay a penalty of not more than five pounds, and shall forthwith remove such fire, gunpowder, or combustible or inflammable materials; and every such person who shall suffer any such fire, gunpowder, or combustible or inflammable materials to remain as aforesaid for twenty-four hours after any such conviction shall be deemed guilty of a further offence against this By-law.

Inflammable fences, &c.

2. Every person who shall erect any fence or brushwood, bushes, or other inflammable material, or shall make or place any stack of hay, corn, straw, or other produce, or place as or for the covering of any such stack any inflammable material as to endanger contiguous buildings or properties, or any trees, shrubs, or other produce of such properties, or any chattels in or upon such buildings or properties, shall forfeit on conviction for every such offence a penalty of not more than five pounds; and if he also shall fail to remove such fence, stack, or covering within a reasonable time after such conviction as aforesaid shall be deemed guilty of further offence against this By-law.

Setting fire to matter without notice.

3. Any person who shall wilfully set fire to any inflammable matter whatever in the open air within five yards of any dwelling-house or other building, or boundary or dividing fence, within the said Municipality without having given notice in writing to the occupiers of the land adjoining the land upon which such matter shall be of his intention so to do, or between the hours of six in the afternoon of any day and six in the morning of the following day, shall for every such offence forfeit a sum not exceeding five pounds.

Fireworks.

4. Every person who shall light any bonfire, tar-barrel, or firework upon or within ten yards of any public or private street or any public place, or shall discharge any firearms without lawful cause within one thousand yards of any dwelling within the boundaries, shall forfeit a sum not exceeding five pounds.

Wilfully setting fire to chimneys.

5. Every person who wilfully sets, or causes to be set, on fire any chimney, flue, smoke-vent, or stove-pipe, herein called in common a chimney, shall forfeit a sum not exceeding five pounds. Provided always that nothing herein contained shall exempt the person so setting or causing to be set on fire any chimney from liability to be informed against or prosecuted before any Criminal Court for such act as for an indictable offence.

Burning shavings and other offensive matter.

6. Any person who shall burn any shavings, rubbish, or other inflammable substance in any road, street, lane, or public place within this Municipality, or shall burn rags, bones, corks, or other offensive matter in any yard within the precincts of the township of Lismore shall for every such offence forfeit and pay a sum not exceeding forty shillings nor less than five shillings.

PART IV.

Streets and public places. Public health and decency. Holes, wells, &c.

New roads to be reported on.

1. No new public road, street, way, reserve, or other place proposed to be dedicated to the public shall be taken under the charge and management of the Council until such road, street, way, or reserve shall have been examined by the Improvement Committee and reported upon to the Council by such committee.

Plans of proposed new road &c., to be deposited.

2. Whenever any proprietor or proprietors of land within the said Municipality shall open any road, street, or way, or lay out any park or other place for public use or recreation through or upon such land, and shall be desirous that the Council shall undertake the care and management of such road, street, way, reserve, or other place, he or they shall furnish the Council with a plan or plans, signed by himself or themselves, showing clearly the position and extent of such road, street, way, reserve, or other place as aforesaid.

Dedications of new roads, &c.

3. If the Council determine to take charge of any such road, way, or other place as aforesaid, the plan or plans so signed as aforesaid shall be preserved as a record or records of the Council, and the proprietor or proprietors aforesaid shall execute such further instrument dedicating such road, way, reserve, or other place to public use or recreation as aforesaid as may be considered necessary by the Improvement Committee, and such further instrument of dedication shall also be preserved as a record of the Council.

Improvement Committee to fix street-levels, &c.

4. The Improvement Committee, or any officer or person acting under the supervision of such Committee, shall, subject to such orders as shall from time to time be made by the Council on that behalf, fix and lay out the levels of all public roads, streets, and ways within the Municipality, and the carriage and foot ways thereof; and it shall be the duty of such committee, officer, or person to place posts at the corners or intersections of any such public roads and streets wherever the same may be considered necessary or desirable by the Council. Provided that there shall be no change of level in any such public road, street, or way until the same shall have been submitted to and adopted by the Council, as hereinafter directed.

Change of street-levels.

5. Whenever it may be deemed necessary to alter the level of any such public road, street, or way as aforesaid the Improvement Committee shall cause a plan and section showing the proposed cuttings and fillings to be exhibited at the Council Chambers for fourteen days, for the information and inspection of ratepayers, and shall notify by advertisement in some newspaper circulating in the Municipality that such plan is so open to inspection. At a subsequent meeting of the Council the said plan and section shall, if adopted, be signed by the Mayor or Chairman and the proposer and seconded of the motion for such adoption, and countersigned by the Council Clerk; and such plan and section so signed and countersigned shall be a record of the Council.

Placards not to be affixed on walls without consent.

6. It shall not be lawful for any person to paste or otherwise affix any placard or other paper upon any wall, house, fence, or other erection, nor deface any such wall, house, fence, or erection with chalk, paint, or other matter, unless with the consent of the owner thereof; and every person who shall be guilty of any such offence shall pay a sum not exceeding twenty shillings nor less than five shillings.

Turf, gravel, stone, &c., not to be removed from streets without permission.

7. Any person who shall form, dig, or open any drain or sewer, or remove, or cause to be removed, any turf, clay, sand, soil, gravel, stone, or other material, or any road scrapings, or sweepings in, or from any part of the carriage or foot way of any street or any other public place within the said Municipality, without leave first had and obtained from the Council, or who shall wantonly break up or otherwise damage any such carriage or foot way, shall on conviction forfeit and pay for every such offence any sum not exceeding five pounds nor less than one pound.

8. No person shall be allowed to remove loam, sand, gravel, or other material from any reserve or other lands of the Municipality without authority in writing of the Council, or their duly authorized officer, under a penalty not exceeding

two pounds. Any person offending against this By-law shall be liable to a penalty of not less than one pound or more than forty shillings. The driver of any vehicle shall, for the purposes of the By-law, be held and taken to be the owner thereof until the contrary be shown.

Holes to be enclosed.

9. Any person or persons who shall dig or make, or cause to be dug or made, any hole, or leave, or cause to be left, any hole adjoining or near to, any street or public place within the said Municipality, for the purpose of making any vault or vaults, or the foundation or foundations to any house or building, or for any other purpose whatsoever, or shall erect or pull down any building and shall not forthwith enclose the same and keep the same enclosed in a good and sufficient manner to the satisfaction of the Improvement Committee of the said Municipality, or shall keep up, or cause to be kept up and continued, any such enclosure for any time which shall be no longer than shall be absolutely necessary in the opinion of the said Committee, and shall not place lights upon each side of the said enclosure, and keep the same constantly burning from sunset to sunrise during the continuance of such enclosure, shall forfeit and pay for every such refusal or neglect any sum not being less than forty shillings nor exceeding five pounds.

Open spaces and steps adjoining footways to be enclosed

10. Every owner or occupier of any house, building, or premises or land within the said Municipality having any entrance area, garden, or other open space, or any vacant building lot, waterhole, or excavated space adjoining the footway of any street or public place in such Municipality, shall protect and guard the same by good and sufficient rails, fences, or other enclosures, so as to prevent danger to persons passing and repassing; and every such owner or occupier of any such house, building, premises, or land having any steps adjoining the footway of any such street or public place shall in like manner protect and guard the same by fences, rails, or other enclosures, so as to prevent the like danger to persons passing and repassing, and on failure thereof of every such owner or occupier shall, as often as he shall be convicted of such offence, forfeit and pay a sum not being less than forty shillings nor more than five pounds. And every such owner or occupier as aforesaid who shall fail to erect such fences or other enclosures as aforesaid shall be deemed guilty of a further offence against this By-law.

Wells to be covered over.

11. Every person who shall have a well situated between his or her dwelling-house, or the appurtenances thereof, and any road, street, or footway within the limits of the said Municipality, or at the side of or in any yard or place open or exposed to such road, street, or footway within the limits of the said Municipality, or at the side of or in any yard or place open or exposed to such street, road, or footway, shall cause such well to be securely and permanently covered over; and if any person having such well as aforesaid shall fail to cover over and secure the same within twenty-four hours after notice in writing shall have been given to him or her by any officer of the said Council, or shall have been left for such person at his or her usual or last place of abode, or on the said premises, shall on conviction forfeit and pay a sum of ten shillings; and for every day after such notice that such well shall remain open or uncovered, contrary to the provisions therein, such person shall be deemed guilty of a separate offence against this By-law.

Temporary stoppage of traffic for repairs.

12. The Improvement Committee, or any officer or person acting under the authority of such Committee, may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same, or for any necessary purpose; and any person or persons offending against this By-law, either by travelling on such street, lane, or thoroughfare, or by removing or destroying any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty of any sum not exceeding five pounds for every such offence.

Drawing or trailing timber.

13. Any person who shall haul or draw or cause to be hauled or drawn upon any part of any street or public place within the said Municipality any timber, stone, or other thing otherwise than upon wheeled vehicles or barrows, or shall suffer any timber, stone, or other thing which shall be carried principally or in part upon any wheeled vehicle or barrow to drag or trail upon any part of such street or public place to the injury thereof, or to hang over any part of any such vehicle or barrow so as to occupy or obstruct the street beyond the breadth of the said vehicle or barrow, shall upon conviction forfeit and pay for every such offence a sum not more than forty shillings nor less than five shillings over and above the damage occasioned thereby.

Driving carriages, horses, &c., on footways, and throwing filth, &c.

14. Any person who shall throw, cast, lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or to remain, any ashes, rubbish, offal, dung, soil, dead animal matter, or other filth, or annoyance, or any matter or thing, in or upon the carriage-way or footway of any street or other public place in the said Municipality, or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other animal in or so near to any such street or other public place as that any blood or filth shall run or flow upon or over or be on any or either of any such carriage or foot way, or shall run, roll, drive, draw, place, or cause, permit, or suffer to be run, rolled, driven, drawn, or placed upon any of the said footways of any such street or public place any waggon, cart, dray, sledge, or other carriage, or any wheelbarrow, handbarrow, or truck, or any hogshead, cask, or barrel, or shall wilfully lead, drive, ride, or allow to remain, any horse, ass, mule, or other beast upon any such footway, or do, or cause to be done, any damage to the kerbing, streets, pathways, roads, lanes, or gutters of the Municipality, shall upon conviction forfeit and pay, for the first offence a sum not exceeding forty shillings nor less than five shillings for the second offence a sum not exceeding five pounds nor less than ten shillings and for a third and every subsequent offence a sum not exceeding ten pounds nor less than one pound for each such offence.

Throwing or allowing slops, &c., on carriage and foot ways not allowed.

15. Any person who shall cast or throw, or shall cause, suffer, or permit to be cast or thrown upon any footway, or carriage-way, any soapsuds, slops, or refuse water, or any refuse vegetables, or any other matter or thing, or shall cause, or suffer, or permit the same to run or flow from any premises in his or her occupation over any such footpath or carriage-way shall for every such offence suffer and pay a sum not exceeding two pounds nor less than five shillings.

Placing carriages, goods, &c., on footpath—Not removing when required—Replacing same.

16. Any person who shall set or place, or cause or permit to be set or placed, any stall-board, chopping-block, show-board (on hinges or otherwise), basket, wares, merchandise, casks, or goods of any kind whatsoever, or shall hoop, place, wash, or cleanse, or shall cause to be hooped, placed, washed, or cleansed, any pipe, barrel, cask, or vessel in or upon or over any carriage or foot way in any street or public place within the said Municipality, or shall set out, lay, or place, or shall cause or procure, permit or suffer to be set out, laid, or placed, any coach, cart, wain, waggon, dray, wheelbarrow, handbarrow, sledge, truck, or other carriage upon any such carriage-way except for the necessary time of loading and unloading such cart, wain, waggon, dray, sledge, truck, or other carriage, or taking up or setting down any fare, or waiting for passengers when actually hired, or harnessing or unharnessing the horses or other animals from such coach, cart, wain, waggon, dray, sledge, truck, or other carriage, or if any person shall set or place, or caused to be set or placed, in or upon or over any such carriage or foot way any timber, stones, bricks, lime, or other materials or things for building whatsoever (unless the same shall be enclosed as herein directed), or any other matters or things whatsoever, or shall hang out or expose, or shall cause or permit to be hung out or exposed, any meat or offal, or other thing or matter whatsoever, from any house or other building or premises, or any other matter or thing from and on the outside of the front or any house or other building or premises over or next unto any such street or public place, and shall not immediately remove all or any such matters or things being thereto required by the Inspector of Nuisances or other proper officer of the Council, or if any person who having in pursuance of any such requisition as aforesaid removed or caused to be removed any such stall-board, show-board, chopping-block, basket, wares, merchandise, casks, goods, coach, cart, wain, waggon, dray, wheelbarrow, sledge, truck, carriage, timber, stones, bricks, lime, meat, offal, or other matters or things, shall at any time hereafter again set, lay, or place, expose or put out, or cause, procure, permit, or suffer to be set, laid, placed, exposed, or put out the same or any of them, or any other stall-board, show-board, chopping-block, basket, wares, merchandise, goods, timber, stones, bricks, lime, coach, cart, wain, waggon, dray, truck, wheelbarrow, handbarrow, sledge, meat, offal, or other things or matters whatsoever (save and except as aforesaid) in, upon, or over any such carriage or foot way or next unto any such street or public place as aforesaid shall upon conviction for every such offence forfeit and pay for the first offence a sum not exceeding forty shillings nor less than five shillings, for the second offence a sum not exceeding five pounds nor less than ten shillings, and for a third and every subsequent offence a sum not exceeding ten pounds nor less than one pound.

Verandahs and awnings may be erected subject to approval of Council.

17. Nothing in these by-laws contained shall be deemed to prevent any person from placing or fixing a movable awning or erecting a verandah in front of his or her shop or house. Provided that such awning shall be at least eight feet, and

that such verandah shall be at least ten feet above the proper level of the footways, and according to plans and specifications of the Council for the time being; and that the posts of the said awning and verandah together with all framework connected therewith shall be prepared and erected to the satisfaction and approval of the Council, as they may from time to time direct.

Riding on drays—Careless driving, &c.

18. If the driver of any waggon, wain, cart, or dray of any kind shall ride upon any such carriage in any street as aforesaid, not having some person on foot to guide the same (such carts as are drawn by one horse and driver or guided with reins only excepted), or if the driver of any carriage whatsoever shall wilfully be at such a distance from such carriage or in such a situation whilst it shall be passing upon such street that he cannot have the direction and government of the horse or horses or cattle drawing the same, or if the driver of any waggon, cart, dray, or coach, or other carriage whatsoever meeting any other carriage shall not keep his waggon, cart, dray, or coach or other carriage on the left or near side of the road, street, or thoroughfare, or if any person shall in any manner wilfully prevent any other person or persons from passing him or her or any carriage under his or her care upon such street, or by negligence or misbehaviour prevent, hinder, or interrupt the free passage of any carriage or person in or upon the same, every driver or person so offending shall upon conviction forfeit and pay any sum not exceeding forty shillings.

Riding or driving furiously, &c.

19. Any person who shall ride or drive through or upon any street or public place within the said Municipality so negligently, carelessly, or furiously that the safety of any other person shall or may be endangered shall on conviction forfeit and pay a sum not exceeding ten pounds nor less than one pound.

Vehicles driven after sunset to carry light.

20. Every person driving any vehicle within the Municipality between sunset and sunrise shall carry a light on such vehicle in a conspicuous place. Any one offending against this By-law shall be liable to a penalty not exceeding one pound.

Blasting rock not allowed without notice to Council Clerk.

21. Any person who shall be desirous of blasting any rock within one hundred yards of any street or public place or dwelling-house in the said Municipality shall give notice in writing twenty-four hours previously to the Council Clerk, who shall appoint a time when the same may take place, and give such other directions as he may deem necessary for the public safety; and if any person shall blast or cause to be blasted any rock within the limits aforesaid without giving such notice, or shall not conform to the directions given to him by the said Council Clerk, he or she shall on conviction forfeit and pay for every such offence any sum not less than one pound nor more than ten pounds.

Public property.—Injuring or extinguishing lamps.

22. Any person who shall wantonly or maliciously break or injure any lamp or lamp-post, or extinguish any lamp set up for public convenience in the said Municipality, shall, over and above the necessary expense of repairing the injury committed, forfeit and pay for every such offence any sum not less than one pound nor more than five pounds.

Damaging buildings.

23. Any person who shall damage any public building, punt, boat, toll-gate, toll-bar, toll-board, wall, parapet, fence, sluice, bridge, culvert, sewer, watercourse, or other public property within the said Municipality, shall pay the costs of repairing the same; and if such damage be wilfully done shall forfeit and pay a sum not exceeding twenty pounds nor less than five pounds.

Damaging trees.

24. Any person who shall wilfully and without the authority of the Council, cut, break, bark, root up, or otherwise destroy or damage the whole or any part of any tree, sapling, shrub, or underwood, growing in or upon any street or place under the management of the Council, shall forfeit any sum not exceeding ten pounds nor less than one pound.

Obstructing public pathways.

25. That the owner or occupier of any land situate on the side of any street or road in this Municipality who shall permit any tree, shrub, or plant, kept for ornament or otherwise, to overhang any footpath or footway on the side of any such street or road so as to obstruct the passage thereof, and who on demand made by the Council, or their Overseer or Inspector, shall not cut or cause to be cut, lopped or cause to be lopped, all such trees, shrubs, or plants to the height of eight feet at the least, the said Council and their servants, labourers, and workmen, may cut or cause to be cut or lopped all such overhanging trees, plants, and shrubs, and to remove

or burn any portion of such trees, plants, or shrubs so cut or lopped without being deemed a trespasser or trespassers; and in case any person or persons shall resist, or in any manner forcibly oppose the said Council, or their servants, labourers, or workmen in the due execution of the powers given in this behalf by virtue of the Municipalities Act of 1867, every person so offending shall on conviction for every such offence forfeit and pay any sum not exceeding ten pounds.

Injuring public fountains, &c.

26. Any person who shall injure any public fountain, pump, cock, waterpipe, or any other thing connected with the preservation or supply of water to the Municipality, or to any portion thereof, shall forfeit and pay the amount of such damage, and any further sum not exceeding twenty pounds nor less than one pound; and any person who shall bathe and wash himself, or shall wash any clothes or other article at or in any reservoir, channel, fountain, or basin provided for public use, or who shall in any other way foul the water preserved or used for the purpose aforesaid, shall forfeit and pay any sum not exceeding one pound nor less than five shillings.

Erection of houses, &c., to be notified.

27. No person shall be permitted to erect any house, shop, or other building in any street, lane, or place in the Municipality without first serving notice in writing on the Mayor or Council Clerk, on any lawful day between the hours of nine a.m. and four o'clock p.m., stating such intention and describing the proposed situation of the building or erection, and without having received any authority from the Mayor or Council Clerk, who will give the required level and alignment, if in a proclaimed street, on a payment of a fee of five shillings. No person shall be at liberty to encroach beyond the building line in any street or lane by the erection of houses, verandahs, door-steps, fences, or any other obstruction whatever. Any person offending against this By-law shall pay for the first offence a sum not exceeding five pounds nor less than one pound, for a second offence a sum not more than ten pounds nor less than five pounds, and for every subsequent offence not more than fifty pounds nor less than ten pounds.

Houses to be properly spouted.

28. All proprietors of houses and other buildings within this Municipality having a frontage to any main thoroughfare shall be required to have the roofs of the said buildings sufficiently spouted and connected with suitable down-pipes and conductors, to be carried under the surface of the footpaths into the gutters, or away from the public streets, to the satisfaction and approval of the Council, under a penalty of ten shillings on conviction; and if not remedied at the expiration of one day after such conviction the offender shall be again liable for a like penalty for every day or part of a day that the same shall not be remedied, and together with the cost of repairing all damage to such footpaths resulting from such neglect.

Houses and erections not to be encroached on footpaths.

29. Whenever any road, street, or lane has been marked out in manner herein provided, no house, shop, fence, or other structure shall, except as hereinafter mentioned, be allowed to project or encroach on any part thereof. And, it shall not be lawful for any person to erect or put up any building, erection, obstruction, fence, or enclosure, or to make any excavation, hole, &c., or opening in, under, upon, or near to any such road, street, lane, or thoroughfare, unless the consent of the Council or Mayor has been obtained to the erecting or making of any such building, erection, obstruction, fence, or enclosure, excavation, hole, or opening as aforesaid; and every person offending against this By-law shall forfeit and pay for the first offence a sum not exceeding five pounds nor less than forty shillings, and for the second and every subsequent offence a sum not exceeding ten pounds nor less than three pounds.

No balcony to project more than five feet.

30. No balcony shall be erected so as that the same or any part thereof shall project or hang over the footway of any street, road, or thoroughfare which shall be less than forty feet in width, and no balcony which shall project or hang over any street, road, or thoroughfare shall be more than five feet wide nor less than ten feet in height from the bottom of the floor joists to the proper level of the footway; and every person who shall offend against this By-law shall on conviction forfeit and pay a sum not exceeding five pounds nor less than one pound for every day that such balcony shall be allowed to remain after such conviction.

Footways may be levelled.

31. When any footway shall have been marked out in manner herein directed, the Surveyor or other person as aforesaid may cause the same to be levelled and made as nearly as practicable of equal height and breadth and with an equal slope and inclination, and may remove any flagging, steps, or other matter, thing, or obstruction that may injure or obstruct the said footway or render it unequal or inconvenient, and which now is or may hereafter be erected or placed on the space marked out for the said footway.

Encroachments to be removed on notice.

32. The Surveyor or such other officer or person as aforesaid may at any time, on the order of the Council and upon due notice of thirty days, direct the removal of any building, fence, or other obstruction or encroachment in or upon any road, street, lane or thoroughfare under the charge of the Council. Notice shall in this case be served either personally or at the usual or last known place of abode of the person to whom such obstruction or encroaching structure belongs, or who has erected the same or caused it to be erected.

Council may remove at expense of offender or proceed for breach of By-law.

33. In any case when after service of notice for the removal of any obstruction or encroachment as aforesaid the person causing or permitting the same shall not remove it within thirty days after the service of the said notice, it shall be lawful for the said Council to direct the removal of the same under the superintendence of its own proper officer and at the cost of the person so offending (provided that the expenses hereby incurred shall in no case exceed the sum of ten pounds); or at the option of the Council to proceed against the offender for breach of By-law; the penalty for the first offence not to exceed twenty-five pounds nor to be less than twenty shillings, and for a second and every subsequent offence a sum not exceeding twenty-five pounds nor less than five pounds.

Or may proceed by action.

34. In any case where the obstruction or encroachment cannot be removed unless than at a greater cost than ten pounds it shall be open to the Council either to direct such removal and to pay all the costs thereof above ten pounds from the funds of the Municipality, or to proceed by action of trespass against the person causing such obstruction or encroachment.

To apply to obstructions by digging, &c.

35. The foregoing provisions shall be equally applicable to all obstructions by digging or excavation.

PART V.

Nuisances, annoyances, obstructions, &c.

Swine not to be kept.

1. Any person who shall breed, feed, or keep any kind of swine in any house, building, yard, garden, or other, hereditament, situate and being in or within forty yards of any street or public place or any dwelling-house in the said Municipality shall on conviction forfeit and pay for every such offence a sum not exceeding forty shillings nor less than five shillings.

Swine, &c., not to wander about streets.

2. Any person who shall breed, feed, or keep any kind of swine, in any house, yard, or enclosure situate and being in or within forty yards of any street or public place in the Municipality, or who shall suffer any kind of swine or any horse, ass, cattle, mule, sheep, goat, or any other animal of like nature belonging to him or under his charge to stray or to go about or to be tethered or depastured in any street, road, or public place within the Municipality shall forfeit and pay for every such offence a sum not exceeding forty shillings nor less than five shillings. Provided that if after due inquiry shall have been made and the owner thereof cannot be discovered it shall be lawful for the said Council to cause to be destroyed any swine or goats so straying or injuring property of any description.

Hog-styes and nuisances not removed on notice.

3. In case any privy, hog-sty, or any sink, cesspool, yard, or enclosure, or any matter or thing which shall at any time be in any place within the Municipality, shall be or become a nuisance, it shall be lawful for the Council after due investigation, by notice in writing, to order the removal of the said nuisance within seven days after such notice shall have been given to the owner or occupier of the said premises wherein such nuisance is situated or shall have been left for such owner or occupier, at his or her last or usual place of abode, or on the said premises, and every such owner or occupier refusing or neglecting to remove or abate such nuisance pursuant to such notice, and to the satisfaction of the Council, shall forfeit and pay a sum not exceeding ten pounds nor less than forty shillings. And it shall be lawful for the Council to indict, or cause to be indicted, for such nuisance such person so neglecting or disobeying any such notice at the then next Court of General or Quarter Sessions to be held nearest the Municipality; and on such person or persons being found guilty thereof such nuisance or nuisances shall be removed, taken down, and abated according to the law with regard to public or common nuisances; and the person so offending shall be subject to such punishment for the misdemeanour as the Justices assembled at such Sessions shall direct.

466—B

Dead animals not to be thrown into public places, reserves, or water-courses.

4. Any person who shall cast any filth, rubbish, or any dead animal, or any animal, with intent of drowning such animal, into any public watercourse, waterhole, bay, creek, or canal, or shall obstruct or divert from its channel any sewer, canal, or watercourse, shall forfeit a sum not exceeding five pounds, nor less than ten shillings, and shall in addition to such penalty, pay the costs of removing such filth or obstruction, or of restoring such watercourse, sewer, or canal to its proper channel.

Suppression of nuisances, &c.

5. In case any privy, hog-sty, or any other matter or thing whatsoever which shall at any time be or become a nuisance, by causing unwholesome smells to arise within any part of this Municipality, it shall be lawful for any two Justices, upon complaint thereof by any person, to investigate such complaint and to order that such privy, hog-sty, boiling-down establishment, or other matter or thing, being a nuisance as aforesaid, to be cleansed, removed, or discontinued, as the case may be, within seven days after such order has been made, and notice given to the owner or occupier of the premises whereon such nuisance shall exist; and every such owner or occupier neglecting to remedy or remove such nuisance, pursuant to such notice or order and to the satisfaction of such Justices, shall forfeit and pay a sum of ten pounds for every such neglect or disobedience; and also it shall be lawful for such Justices to indict, or cause to be indicted, for such nuisances such person or persons so neglecting or disobeying any such notice or order at the then next Court of General or Quarter Sessions to be held nearest to the said Municipality; and the person or persons being found guilty shall be subject to such punishment and such further order as the Justices assembled at such Sessions shall lawfully decide.

Cleansing private avenues, yards, &c.

6. Any owner or occupier of any house or place within the said Municipality who shall neglect to keep clean any private avenues, passages, yards, and ways within the said premises so as by such neglect to cause a nuisance by offensive smell or otherwise, shall on conviction forfeit and pay a sum not exceeding forty shillings nor less than ten shillings for every such offence.

Placing dead animals on premises.

7. Any person who shall place or shall cause or suffer to be placed upon any land or premises within the Municipality any dead animal, blood, offal, night-soil, or any other offensive matter so as to become a nuisance to the inhabitants thereof, shall on conviction suffer and pay a penalty not exceeding five pounds nor less than ten shillings for every such offence.

Allowing dead animals to remain on premises.

8. Any owner or occupier of any land or premises who shall suffer or permit any dead animal, blood, offal, night-soil, or any other offensive matter to remain upon the said land or premises after notice shall have been given to remove the same shall be subject to a penalty not exceeding two pounds nor less than ten shillings for every day that the same shall so remain.

Butchers' shambles, slaughter-houses, &c., to be cleansed.

9. For preserving the cleanliness of the said Municipality and the health of the inhabitants thereof it shall be lawful for the Inspector of Nuisances, or for any other officer or officers appointed by the Council from time to time, and when and as often as he or either of them shall see occasion to visit and inspect the butchers' shambles, slaughter-houses, butchers' carts, casks, baskets, and other utensils used by them, boiling-down establishments, tanneries, and fellmongering establishments in the said Municipality, and to give such directions concerning the cleansing the said shambles, slaughter-houses, tanneries, and establishments both within and without as to him shall seem needful; and any butcher, or the owner or occupier of any such shamble, slaughter-house, tannery, or establishment who shall refuse or neglect to comply with such directions within a reasonable time shall forfeit any pay a sum not exceeding ten pounds nor less than ten shillings.

Inspection of offensive premises.

10. Upon the reasonable complaint in writing of any householder that the house, premises, yards, closets, or drains of the neighbouring or adjoining premises are a nuisance or offensive, the Inspector of Nuisances, or any other person appointed by the Council, shall make an inspection of the premises complained of, and the officer of the Council shall have full power, without any other authority than this By-law, to go upon such premises for the aforesaid purpose.

Various obstructions and annoyances.

11. Every person who in any street or other public place of passage within the said Municipality, to the obstruction, annoyance, or danger of the residents or passengers, shall commit any of the following offences shall on conviction for any and every such offence forfeit and pay a penalty of not more than two pounds:—

1. Every person who shall hoist or cause to be hoisted, or lower or cause to be lowered, goods of any description from any opening in any house fronting any street or public place and close to the footway thereof without sufficient and proper ropes and tackling.

2. Every person who shall carry or convey, or cause to be carried or conveyed, in any street or public place the carcass or any part of the carcass of any newly slaughtered animal without a sufficient and proper clean cloth covering the same for the concealment from public view, or shall hawk or carry about butchers' meat for sale without covering the same as aforesaid.

3. Every person who shall place any line, cord, or pole across any street, lane, or passage, or hang or place clothes thereon to the danger or annoyance of any person.

4. Every person who shall place any flower-pot in any upper window near to any street or public place without sufficiently guarding the same from being thrown down.

5. Every person who shall throw or cast from the roof or any part of any house or other building any slate, brick, part of a brick, wood, rubbish, or other material or thing, unless within a hoard or enclosure, when any house or building is being erected, pulled down, or repaired.

6. Every blacksmith, whitesmith, anchormith, nailmaker, metal-founder, limeburner, brickmaker, potter, or other person using a forge, furnace, or kiln, and having a door, window, or aperture fronting or opening into or towards any street, lane, or passage, and not enclosing such door, or not fastening the shutters or other fastenings of such window, and closing such aperture and placing a screen before the same every evening within one hour after sunset so as effectually to prevent the light from showing through the doorway, window, or aperture next or upon such street, lane, or passage.

7. Every person who shall be the keeper of or have any dog or other animal which shall attack or endanger the life or limb of any person who may have the right-of-way or use of any private yard, alley, street, or any other place within the said Municipality.

Premises in state to endanger public health. Houses to be purified on certificate.

12. If upon the certificate of any two duly qualified medical practitioners it appears to the Council that any house or part thereof, or the premises occupied in connection therewith, within the limits of the said Municipality is in a filthy or unwholesome condition that the health of any person is or may be liable to be affected or endangered thereby, and that the whitewashing, cleansing, or purifying of any house or part thereof, or the premises occupied in connection therewith, would tend to prevent or check infections or contagious disease, the said Council shall give notice in writing to the owner or occupier of such house or part thereof, or the premises occupied in connection therewith, to whitewash, cleanse, or purify the same, as the case may require, and if the person to whom such notice is so given shall fail to comply therewith within such time as shall be specified in the said notice he shall be liable to a penalty not exceeding ten shillings for every day during which he continues to make default. Provided that no such penalties shall collectively amount to any greater sum than twenty pounds.

Offences against Public Decency.

Bathing prohibited within certain limits.

13. Any person who shall bathe near or within view of any inhabited house, or of any public wharf, quay, bridge, street, road, or other place of public resort within the limits of the said Municipality between the hours of six in the morning and eight in the evening shall on conviction forfeit and pay a sum not exceeding one pound for every such offence.

Indecent exposure of the person.

14. Any individual who shall offend against decency by exposure of his or her person in any street or public place within the said Municipality, or in the view thereof, shall on conviction forfeit and pay for every such offence a sum not exceeding ten pounds nor less than five pounds.

Earth-closets.

15. Every earth-closet shall be built with walls seven feet high, and shall not be less than three feet six inches wide and four feet six inches long, and must not be less than fifteen feet from any dwelling-house or public street, and shall be provided with a door capable of being fastened from the inside, and shall be ventilated; and every person having or building any earth-closet contrary to this By-law shall be liable to a penalty of not less than one pound nor more than five pounds.

Other closets.—Privies not being proper water-closets.

16. Any person who shall dig, form, or make any earth-closet within fifteen feet of any dwelling-house, or any other closet within thirty feet of any dwelling-house, or within thirty feet of any well used for supplying any dwelling-house with water, shall on conviction forfeit and pay any sum not exceeding two pounds nor less than five shillings, and if not removed within forty-eight hours after such conviction it shall be dealt with as a fresh offence.

Emptying cesspits and removing nightsoil.

17. Every closet shall be built in such a position that the same may be emptied without the contents being carried through any dwelling-house; and every person having or building a closet contrary to this By-law shall be liable to a penalty of not less than one pound nor more than five pounds.

How nightsoil to be disposed of.

18. Until and unless otherwise provided by the Council all nightsoil shall be disposed of by burying it in the earth at such places as the Council may from time to time appoint.

Hours for removing nightsoil.

19. Any person who shall remove any nightsoil, or ammoniacal liquor, bones, or other offensive matter, or shall come with carts or carriages for that purpose between the hours of six o'clock in the morning and eleven o'clock at night, or shall at any time remove any such nightsoil or ammoniacal liquor otherwise than in properly covered and water-tight carts or vehicles, or in such a manner so as to upset, cast, spill, or strew any of the said nightsoil, ammoniacal liquor, slop, urine, or filth, in or upon or near to any of the streets, roads, public places, or footways of the Municipality, or shall deposit or throw nightsoil, ammoniacal liquor, bones, or other offensive matter nearer to any street, road, or dwelling-house than shall from time to time be directed by the Council, or by the Inspector of Nuisances, or shall allow vehicles used for this purpose to stand on any premises nearer to any road, street, or dwelling-house than shall from time to time be directed by the Council or Inspector, shall upon conviction forfeit and pay for every such offence a sum not exceeding five pounds nor less than one pound; and in case the person or persons so offending cannot be found, then the owner or owners of such carts, carriages, or other vehicles employed in and about emptying or removing such nightsoil, bones, or other offensive matter, and also the employer or employers of the person or persons so offending shall be liable to and forfeit and pay such penalty as aforesaid.

Noisome and Offensive Trades.

No noisome and offensive trades allowed.

20. No person shall carry on any noisome or offensive trade within the said Municipality so as to injure or be a nuisance, as hereinafter stated, to the inhabitants thereof.

Definition of noisome and offensive trades.

21. Any manufacture, trade, calling, or operation in the conducting, following, or carrying on of which, or in consequence of or in connection therewith, or from the premises where the same is conducted, followed, or carried on, any gas, vapour, or effluvia, or any large quantities of smoke shall be evolved or discharged, which gas, vapour, effluvia, or smoke shall be calculated to injure animal or vegetable life, or in any other way to injure or be a nuisance to the inhabitants of the said Municipality, shall be considered a noisome and offensive trade within the meaning of these By-laws.

Complaint.

Inquire and Report—Orders of Council thereon—Notice to discontinue, &c. Penalty.

22. Upon the complaint in writing of any householder that any noisome or offensive trade is being so followed, conducted, or carried on in the vicinity of his or her residence or property, as to injure his or her health or the health of any member of his or her family, or to be a nuisance to such householder, and to his or her family, the Inspector of Nuisances, or any other person or persons appointed by the Council, shall make an inspection of the premises where such trade is alleged to be so conducted, followed, or carried on as aforesaid, and of the premises or property of the complainant, and shall inquire into the grounds for such complaint, and shall report thereon to the said Council; and if the said Council shall on the consideration of such report, or after any such further inquiry as may be deemed necessary, be of opinion that the said complaint is well founded, and that any manufacture, trade, calling, or operation so complained of, and so being conducted, followed, or carried on as aforesaid is a noisome or offensive trade within the meaning of these By-laws, notice shall be given to the person or persons conducting, following, or carrying on such trade to cease and discontinue the same within such reasonable time, not being less than thirty days nor more than sixty days, as the said Council may direct, or so to conduct, follow, or carry on his, her, or their manufacture, trade, calling, or operation as that within such reasonable time as aforesaid, the same

shall wholly and permanently cease to be noisome or offensive within the meaning of these By-laws, either to the said complainant or to any other resident within the said Municipality; and if such trade shall not be discontinued as aforesaid, or shall not be so conducted as that it shall wholly cease to be noisome and offensive as aforesaid within the time named in such notice as aforesaid, any person conducting, following, or carrying on such trade as aforesaid, shall for the first offence forfeit and pay a sum not less than forty shillings nor more than five pounds, for a second offence a sum not less than five pounds nor more than twenty-five pounds, and for a third and every subsequent offence, a sum not less than ten pounds nor more than fifty pounds.

Mode of proceeding, &c.

23. The like proceeding shall be taken as aforesaid whenever there shall be a complaint as aforesaid that any manufacture, trade, calling, or operation is about to be commenced or entered upon which is likely to prove noisome and offensive within the meaning of these By-laws, save and except that the notice to be given as aforesaid shall be given to the person or persons about to enter upon such manufacture, trade, calling, or operation, and shall require him, her, or them not to commence or enter upon the same, or take such measures as shall effectually prevent the same from becoming noisome and offensive within the meaning of these By-laws to any resident within the Municipality. And any person who shall in such case commence, enter upon, or continue any such manufacture, trade, calling, or operation, so that the same shall in any way be noisome and offensive within the meaning of these By-laws, shall for every such offence forfeit and pay a sum not less than ten pounds nor more than fifty pounds.

Service of notice of liability.

24. Service of any such notice as aforesaid upon the occupier or owner of any premises or land wherein or whereon any such manufacture, trade, calling, or operation is being conducted, followed, or carried on, or is about to be commenced or entered upon, or at the last known place of abode of such occupier or owner, or upon any person on the said premises or land, shall be a good and sufficient service of such notice for all the purposes of these By-laws. And every person who shall be actually engaged in superintending, directing, or managing, or who shall be in any other way actually engaged or employed in any such manufacture, trade, calling, or operation as aforesaid, shall be liable to be regarded and treated as a person conducting, following, or carrying on such manufacture, trade, calling, or operation, within the meaning and for all the purposes of these By-laws.

PART VI.

MISCELLANEOUS.

1. No exhibition other than exhibitions licensed by the Colonial Secretary under the provisions of the Act 14 Victoria No. 23, or exhibitions of a temporary character specially provided for, shall be held or kept for hire or profit within the said Municipality; nor shall any bowling-alley, skittle-alley, or other place of public amusement other than a place licensed as aforesaid, or a place for temporary amusement, be used as such for hire or profit within the said Municipality unless and until permission in writing be granted by the Mayor.

2. No such exhibition or place of public amusement as aforesaid shall be held or kept open, or used for the purposes of such public amusements, on Sunday, Christmas Day, or Good Friday; and every person offending against this by-law in this behalf shall on conviction forfeit and pay a sum not exceeding five pounds nor less than two pounds for every such offence.

3. Every person who shall wilfully let in or knowingly suffer to enter upon the reserves or public recreation ground any animals without due authority shall be deemed guilty of wilful trespass, and shall be liable for every such offence to a penalty not exceeding twenty pounds nor less than two pounds.

4. Any person pulling down, destroying, defacing, or injuring any marks, or any fence, or other erection thereon, without the authority of the Council, shall forfeit and pay any sum not exceeding ten pounds nor less than one pound.

5. Any person or persons riding or driving into or out of any yard or alley abutting on any street or road within the Municipality shall do so at a walking pace, and any one offending against this By-law shall on conviction be liable to a penalty of not less than five shillings nor more than two pounds.

6. Any person wantonly or maliciously breaking or injuring any lamp-post, or street name-plate, or extinguishing any light set up for public convenience, or damaging any Corporation property whatsoever, shall be liable to a penalty of not less than twenty shillings nor more than five pounds, to be recovered in a summary way before two Justices in Petty Sessions.

Council Clerk or other officer may take legal proceedings.

7. The Council Clerk or other officer, under the authority of the Council may take legal proceedings against any person or persons committing any offence or offences against any of the By-laws of the said Municipality.

Penalty for interfering or obstructing Council.

8. Any person who shall obstruct or interfere with any officer of the Council, or other person doing or performing any duty or act under any of the By-laws of the said Municipality shall forfeit and pay a penalty not exceeding twenty pounds nor less than two pounds.

Passed and adopted by the Municipal Council of the Municipal District of Lismore this twenty-second day of September, in the year of our Lord one thousand eight hundred and seventy-nine.

(L.S.) - JAMES STOCKS,

Mayor.

By order of the Council,

WM. OSBOURNE HARMAN,

Council Clerk.

1879-80.

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF HAMILTON—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 26th April, 1880.

MUNICIPAL DISTRICT OF HAMILTON.

BY-LAWS.

THE following By-laws, made by the Council of the Municipal District of Hamilton, for the regulating and licensing of vehicles plying for hire within the Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

MUNICIPAL DISTRICT OF HAMILTON.

BY-LAWS.

THE following By-laws, made by the Municipal Council of Hamilton, for the regulating and licensing of vehicles plying for hire within the Municipal District, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

1. By-laws for regulating and licensing vehicles plying for hire within the Municipal District of Hamilton:—The word vehicle in these By-laws shall include and apply to every omnibus, car, hackney carriage, cab, buggy, waggonette, or dray; and an "omnibus" shall mean a vehicle upon four wheels, drawn by one or more horses, and a "car" shall mean a vehicle upon two wheels for which an omnibus license has been taken out, and a "hackney carriage" shall mean a vehicle upon four wheels drawn by two or more horses, and a "cab" shall mean a vehicle upon two wheels drawn by one horse, and a "buggy" shall mean a vehicle upon four wheels drawn by one or more horses, a "waggonette" shall mean a vehicle upon four wheels drawn by two horses, and a "dray" shall mean any vehicle used exclusively for the carriage of goods and plying for hire within the Municipal District of Hamilton.

2. From and after the day of one thousand eight hundred and eighty, no vehicle shall ply for hire nor shall any person act as a driver or conductor of any such vehicle within the said Municipal District of Hamilton, until licensed for such purposes.

3. Before any license for plying any such vehicle or for driving or conducting the same shall be granted, the party requiring such license shall obtain from the Council Clerk free of charge a requisition in the form of Schedule "A" hereto or to the like effect, and shall duly fill up and sign the same and deliver it to the Council Clerk, and shall also insert in such requisition in addition to the particulars set forth in Schedule A hereto, the table of rates and fares proposed to be charged by such party for any such vehicle; and in the case of drivers and conductors, not being the proprietor, shall obtain a certificate

from the proprietor as to his competency to act as such driver or conductor; and shall obtain from the Inspector hereinafter named a certificate that the vehicle for which a license is applied for is fit for the accommodation and conveyance of passengers.

4. The Mayor of the said Municipal District for the time being, shall and is hereby authorized to issue all such licenses in the name and on behalf of the said Municipal Council; and the Mayor shall by endorsement on such license signify his approval of the scale of rates proposed to be charged for the hire of any such vehicle so licensed, not exceeding the rates set forth in Schedule F hereto.

5. Licenses for proprietors, drivers, or conductors of vehicles shall be in form of Schedule B hereto or to the like effect, and shall be made out, numbered and registered by the Council Clerk.

6. Every license granted by the Mayor shall be signed by the Mayor and countersigned by the Council Clerk, and shall be in force until the thirty-first day of December next ensuing the date thereof, and no such license shall include more than one vehicle, but shall extend to any vehicle which shall bear the same number, and shall be used in substitute for any vehicle already licensed and subject to all necessary certificates, any such substituted vehicle being first certified as aforesaid.

7. For every such license or annual renewal thereof there shall be paid to the Council Clerk the several rates set forth in the Schedule hereunto annexed, marked "C."

8. For the license of driver or conductor which license may be transferred to the successor of such driver or conductor, and for every renewal thereof there shall be paid to the said Municipal Council the sum of ten shillings for driver—conductor, five shillings.

9. The person or persons in whose name or names a license shall have been obtained, shall be deemed the proprietor of the vehicle in respect of which the same shall have been taken out.

10. No license shall be granted to any person to drive any vehicle unless he be eighteen years of age, or to act as conductor unless he be fourteen years of age.

11. Every proprietor of a licensed omnibus or omnibus car shall provide a driver for the same, and shall be held responsible for the good conduct of the driver and also for the conductor, if a conductor be employed by him, and shall also be liable for all penalties which such driver or conductor may incur under these By-laws.

12. No proprietor shall be at liberty to part with or lend his license, nor sell or dispose of his licensed vehicle to any person without the knowledge of the Mayor, and if sold shall cause the name of the purchaser, with the approval of the said Mayor, but not otherwise, to be registered on the book of the said Municipal Council, whereupon the purchaser shall become amenable to these By-laws to the same extent as the original licensee; and the purchaser of such vehicle who shall allow the same to be used or to ply for hire without such knowledge, approval, and registry shall be considered as plying such vehicle for hire without a license, and liable under these By-laws accordingly.

13. No driver or conductor of any licensed vehicle shall lend his license, nor shall the proprietor of any such vehicle employ any unlicensed person as the driver or conductor thereof.

14. Every person driving or conducting any vehicle and every vehicle shall be deemed to be licensed under these By-laws, on the production of the license-book containing a copy of any such license.

15. The license of the proprietor, driver, or conductor of any vehicle may be cancelled by the Municipal Council of Hamilton in case such proprietor, driver, or conductor shall have been convicted of three offences against these By-laws committed within a period of six months next preceding, or for such other cause as to the said Municipal Council may seem sufficient.

16. Such person or persons as may from time to time be in that behalf appointed by the said Municipal Council shall be the Inspector or Inspectors of all licensed vehicles plying for hire within the said Municipal District, and such Inspector or Inspectors of all licensed vehicles shall as often as he or they deem necessary inspect all licensed vehicles and also the harness and horse or horses or other animals used in drawing the same; and if such vehicles, horse or horses, animal or animals shall, in his or their opinion, be unfit for public use, he shall report the same in writing to the Mayor, who shall have power to suspend the license of such vehicle until such vehicle, harness, horse or horses, or other animal or animals used in drawing the same shall be in the opinion of the said Mayor in a fit state for public use; and it shall be the special duty of such Inspector or Inspectors at all times to see that as far as possible these By-laws are duly observed and enforced, and the owner of every such vehicle shall upon receipt of a notice in form of Schedule G hereto forthwith put such vehicle in repair.

17. No owner or driver of any vehicle nor any other person shall hinder or obstruct such Inspector or Inspectors in the execution of his or their duty.

18. Proprietors of every licensed vehicle shall cause to be painted or printed thereon the number of the license granted for every omnibus or car in figures not less than four inches in height, and for every hackney carriage, cab, or buggy, in figures not less than two inches in height, and of proportionate breadth, white upon a ground of black on the panel of the door or doors of such vehicle, or on a plate or plates affixed thereon, and also upon each lamp used upon such vehicle or as the Inspector may direct, any such number shall be kept legible and undefaced during all times such vehicles shall ply or be used for hire; and the rate of fare chargeable under license granted for such inside in figures of not less than two inches in height and of proportionate breadth.

19. No proprietor or driver of any licensed vehicle shall demand or take more than the several fares endorsed on the license of such vehicle.

20. The place specified in Schedule D hereto annexed is hereby appointed a public stand for licensed vehicles, provided that the Council may from time to time, as they shall see fit, by resolution abolish or alter the number and situation of the said stand.

21. The proprietor or driver of any licensed vehicle shall not permit the same to stand for hire except at an appointed stand, and shall drive on to such stand before commencing to ply for hire.

22. No driver or conductor of any vehicle while standing at his proper stand (or on Sunday in any part of the said Municipal District), shall endeavour to attract notice by shouting, ringing of bells, blowing of horns, or other noise, nor shall deceive any person in respect to the route or destination of such vehicle by word or sign.

23. The first omnibus or car that arrives at any public stand shall be the first to start therefrom, and the others in due rotation in the order at which they arrive at such stand at intervals of not less than eight minutes and not more than twelve.

24. At every second vehicle on every stand there shall be left a space of at least eight feet, and not more than twelve.

25. Every vehicle on its arrival at any such public stand shall be drawn at the end of, and be the last of the rank of, any vehicle that may be then on such stand. All vehicles shall be arranged only in single rank.

26. No driver of any vehicle other than such as shall be hired by the then occupant for a specific purpose shall suffer the same to loiter in any street or alongside any other vehicle, nor allow his vehicle to remain stationary, except at any appointed stand, longer than it may be necessary for passengers to alight from or enter such vehicle, nor shall the driver of any vehicle obstruct the driver or conductor of any other vehicle in taking up or setting down any person, or wilfully, or wrongfully, or forcibly prevent or endeavour to prevent the driver of any other vehicle from taking a passenger or fare.

27. No driver or conductor of any vehicle shall whilst driving, loading, or unloading, or attending any vehicle, or whilst on any public stand, wilfully or negligently do or cause or suffer to be done, any damage to the person or property of any one, or be guilty of any breach of the peace, misconduct, or ill-behaviour, or make use of any threatening, obscene, profane, abusive, or insulting language or gesticulation.

28. Every driver, whilst engaged in taking up or setting down any passenger, shall, if required during such taking up or setting down, place his vehicle as near as conveniently may be to that side of the street (and at a line with the kerb-stone or edge of the foot-path), at which the taking up or setting down is required.

29. No omnibus shall pass any other omnibus proceeding in the same direction if the latter be proceeding on its journey at a pace faster than a walk.

30. No licensed vehicle shall be drawn at a pace faster than that commonly known as trotting, and in the event of the conviction of any driver for a breach of this By-law his license may be cancelled by the Municipal Council.

31. No driver or conductor shall carry or knowingly permit to be carried in any licensed vehicle except to some Police Office or Watch-house, any deceased human body, or any person behaving or noisily conducting himself or herself, or otherwise so misbehaving as to occasion any annoyance to any occupant of such vehicle or disturb the public peace.

32. The proprietor of every licensed vehicle shall at all times when plying or employed for hire have the same in good order, with harness perfect and in good condition, and the glasses and frames of such vehicle whole, and the leathers attached to the frames of sufficient strength, and the inside clean and in good repair, and the whole ready and sufficient for duty, with driver and horses competent to perform the journey of such vehicle in due and reasonable time.

33. No driver of any vehicle shall carry more passengers than his vehicle is licensed to carry on the report of the Inspector, nor shall the driver of any cab carry any passenger or person on the driver's box or step behind the same, nor shall the driver or conductor of any omnibus or omnibus car permit or suffer any person except the conductor to be on the foot-step at the back of any omnibus or omnibus car.

34. No driver or conductor shall smoke any pipe or cigar whilst driving or conducting any licensed vehicle engaged on any fare, nor shall any passenger smoke inside or on any vehicle other than a cab without the permission of the driver or against the wish of any passenger.

35. The driver, and conductor, if any, of every licensed vehicle shall be constantly attendant upon the same whenever standing or whilst plying or engaged for hire.

36. Every licensed vehicle plying or engaged after sunset shall be provided with a lamp on each side, and the same shall be kept by the driver thereof properly lighted until sunrise if so long plying or engaged.

37. The driver of every omnibus or omnibus car shall provide and keep a lamp properly lighted in such a position inside of every such vehicle as the Inspector may direct whenever such vehicle is plying or engaged at any time between sunset and sunrise.

38. Every lamp used on the outside of any vehicle shall be such and so disposed as to appear white on the front and outer sides and red behind.

39. No vehicle which shall be let to hire by special agreement only, or only when bespoke at the stables or residence of its owner, shall be deemed a licensed vehicle within the meaning of the By-laws, nor shall the owner or driver or conductor of such vehicle be subject to the provisions thereof in any respect whatever.

40. No proprietor or driver or owner of any licensed vehicle shall feed his horse or horses while standing on such stands except with nose bags.

41. No proprietor or driver of any licensed vehicle shall put or allow to be put into any vehicle any horse that is not thoroughly quiet and broken into harness.

42. The driver of any licensed carriage and conductor of every omnibus shall carefully examine his vehicle immediately after setting down his fare, and in every case of property having been left in any vehicle by any person having used or hired the same, such property if found by such driver or conductor, shall be delivered within eighteen hours after such finding to the Council Clerk at the office of the Council, and there deposit it, under a penalty not exceeding twenty pounds.

43. In the event of any vehicle licensed by any other Municipality plying for hire within the Municipality of Hamilton, or of any vehicle licensed by the Municipality of Hamilton plying for hire into any other Municipality, it shall be lawful for the Council of the Municipality of Hamilton to reduce the license fee prescribed by these By-laws.

Dray Regulations.

44. No owner, driver, or any other person having the care and charge of any dray drawn by one or more horses or other animals, shall ride thereon unless he shall be provided with sufficient reins, and no block dray shall be allowed to proceed out of a walking pace.

45. In every case of goods or merchandise being left on any licensed dray or with the driver thereof, by any person having hired or used the same, such property shall be delivered up to such person, or shall within eighteen hours be taken in the state in which it shall have been found to the Council's office, and thence deposited with the Council Clerk.

46. No owner or driver shall at any one time carry on any licensed dray having only two wheels and drawn by one horse, a greater weight than one ton.

47. Whenever any dray hired by the load or distance having taken up a load shall be detained with the same more than fifteen minutes, the hirer shall pay for every fifteen minutes after the first, sixpence, and so on in proportion for any longer period.

48. The number of the license granted for every dray shall be painted white on a ground of black or the reverse on the sides thereof in a conspicuous place in figures not less than three inches in height and of proportionate breadth, with the letters H.M.C. of the same colour immediately above the figures, and the driver or owner of such dray shall at all times keep the same legible and undefaced.

49. No owner or driver of any dray shall demand, receive, or take more than the several fares and amounts which may from time to time be fixed by the said Municipal Council, and no owner or driver of any dray shall permit or suffer any person to be carried therein as a passenger.

50. Any person calling or sending for any licensed dray and not further employing the same, shall pay the sum of two shillings or the fare or hire from the stand or place where the dray was engaged at the driver's option, he shall further for any time the dray may be detained not exceeding a quarter of an hour, pay the sum of one shilling, and for any time not exceeding a second quarter of an hour the sum of sixpence, and any further time at the rate of sixpence for every quarter of an hour.

51. Any person having hired a licensed dray shall pay the legal fare when demanded, and any person neglecting or refusing to do so shall upon conviction before any two Justices of the Peace pay a penalty of ten shillings.

52. When the hiring of any dray shall be by distance, then such distance shall be computed from the stand or place where the dray was hired.

53. The place enumerated in the Schedule hereto marked E are hereby appointed public stands for drays.

54. No driver of any licensed dray shall suffer the same to stand for hire across any street except so directed by the Inspector, or alongside any other vehicle, nor obstruct the driver of any other dray in loading or unloading any goods or merchandise, or wilfully, wrongfully, or forcibly prevent or endeavour to prevent the driver of any vehicle from taking a fare or hiring.

55. Every offender against any of these By-laws to which no specific penalty has been attached shall be liable to a penalty not exceeding twenty pounds.

56. All proceedings for any offence against any of these By-laws shall be taken in the name of the Inspector of Vehicles of the Municipality of Hamilton, in a summary way as provided by the Municipalities Act of 1867.

SCHEDULE A.

To the Municipal Council of Hamilton, I _____ residing in _____ street, do hereby request that a license be granted to me to No. _____ within the said Municipality.

SCHEDULE B.

THIS is to certify that _____ is hereby licensed to a certain _____ number _____ within the Municipal District of Hamilton, from the date hereof to the thirty-first day of December next, subject nevertheless to all and every one of the By-laws, Rules, and Regulations in force relating thereto.

(MUNICIPAL DISTRICT OF INVERELL—AMENDED BY-LAW.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 26th May, 1880.

MUNICIPAL DISTRICT OF INVERELL—AMENDED BY-LAW.

The following By-law, made by the Council of the Municipal District of Inverell in substitution of section 14 of part VI of the By-laws of the Municipality, relating to the throwing of filth on roads, &c., having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

By-law No. 14 of part VI, as amended.

THROWING FILTH ON ROADS, DRIVING CARRIAGES AND LEADING HORSES ON FOOTWAYS.

14. Any person who shall throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or remain any dead animal, offal, dung, soil, ashes, rubbish, or any other filth or annoyance, or any matter or thing, in or upon the footway or carriageway of any street, road, lane, or other public place within the said Municipal District, or shall kill, slaughter, dress, scald, or cut up any swine, calf, sheep, lamb, or other animal in or so near to any such street or other public place as that any blood shall run or flow upon or over, or be on any such carriage or foot way, or shall run, roll, drive, draw, place, or cause, permit, or suffer to be run, rolled, driven, drawn, or placed upon, along, or across the footway of any street, road, or public place, any waggon, cart, dray, sledge, or other carriage, or any wheelbarrow, wheel, or truck, or any hogshead, cask, or barrel, or shall wilfully lead, drive, ride, or stand any horse, ass, mule, or other beast upon, along, or across any such footway, shall upon conviction forfeit and pay for the first offence a sum not exceeding forty shillings nor less than five shillings, and for the second and every subsequent offence a sum not less than ten shillings nor more than forty shillings. Provided always that this By-law shall not extend or be taken to extend to or include persons seeking ingress to or egress from any premises within the said Municipality by the usual back or side entrance.

Passed by the Municipal Council of Inverell this fifth day of April, 1880.

HENRY PLUMLEY, Council Clerk.

(L.S.) JAS. H. HINDMARSH, Mayor.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF LEICHHARDT—AMENDED BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 2nd June, 1880.

MUNICIPAL DISTRICT OF LEICHHARDT.

AMENDED BY-LAWS.

The following By-laws made by the Council of the Municipal District of Leichhardt, for regulating their own proceedings and the duties of their officers and servants; for determining the times and modes of collecting and enforcing payment of rates; for the management of roads, streets, and public places; for regulating the blasting of rock; for preventing the damaging of public property, trees or shrubs, &c., and the suppression of nuisances; for regulating the keeping of swine; for compelling residents to keep their premises free from offensive or unwholesome matters; for preserving public decency; for suppressing houses of ill-fame; for regulating the interment of the dead; for restraining noisome and offensive trades; for regulating the erection of buildings; and generally for maintaining the good rule and government of the Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

BY-LAWS FOR THE MUNICIPAL DISTRICT OF LEICHHARDT.

All the By-laws now in force are hereby repealed.

PART I.

1. If at any meeting of the Council the Mayor be absent at the expiration of fifteen minutes after the time appointed for holding such meeting, the Aldermen then present, if they be a quorum, shall proceed to elect from among themselves a Chairman of such meeting. Whenever there shall be an adjournment of any such meeting, for want of a quorum, the names of the members present shall be taken down, and shall be recorded in the minute book.

2. The following shall be the order of business at all meetings of the Council other than special meetings:—

1. The minutes of the last preceding meeting to be read, corrected (if erroneous), and verified by the signature of the Mayor or other Chairman. No discussion to be permitted on such minutes, except as to whether they are correct.
2. Petitions (if any) to be presented and dealt with.
3. Correspondence to be read, and, if necessary, ordered upon.
4. Reports from Committees and minutes from the Mayor (if any) to be presented and ordered upon.
5. Questions as to any matters under the jurisdiction or within the official cognizance of the Council to be put and replied to, and statements as to any facts, matters, or circumstances requiring attention by the Council or any of its Committees or officers to be made.
6. Motions of which notice has been given to be dealt with in the order in which they stand on the business paper.
7. Orders of the day to be disposed of as they stand on the business paper.

Resolution without notice.

Provided that it shall be competent for the Council at any time, by resolution without notice, to entertain any particular motion, or to deal with any particular matter of business out of its regular order on the business paper, without any formal suspension of this section; and also in like manner to direct that any particular motion or matter of business shall have precedence at a future meeting.

Special Meetings, &c.

3. At special meetings of the Council the business, after the minutes shall have been read and verified—which shall be done in the same manner as at an ordinary meeting—shall be taken in such order as the Mayor or the Aldermen, at whose instance such special meeting shall have been called, may have directed; and in default of such direction, in such order as the Aldermen present may determine.

Business for Special Meetings.

4. The business paper for each special meeting shall contain only such matters as shall have been specially ordered to be entered thereon by the Mayor or Aldermen calling such meeting.

Papers property of Council.

5. After the business paper shall have been made up as aforesaid, all the said notices of motion, requisitions, and directions, as to which entries have been made thereon, shall be the property of the Council, and shall not be withdrawn, altered, or amended, without leave having been first obtained from the Council for such withdrawal, alteration, or amendment.

6. No motion or amendment in Council shall be entertained until the same shall have been committed to writing, nor shall any such motion or amendment be discussed until it be seconded. Any number of amendments may be moved, but

no second or subsequent amendments shall be taken into consideration until all previous ones are disposed of. If any amendment be carried, the question, as amended thereby, shall become itself the question before the Council. No discussion shall be permitted on any motion for adjournment of the Council, and if upon the question being put on any such motion, the same be negatived, the subject then under consideration, or the next in order on the business paper, or any other on such paper that may be allowed precedence, shall be discussed before any subsequent motion for adjournment shall be receivable.

7. Every requisition by an Alderman that any particular matter of business be brought before the Council, shall be regarded and treated as a notice of motion by such Alderman that such business be taken into consideration by the Council; and he shall be called upon in due order to move that such business be so considered, or to make any other motion which he may think fit in reference thereto which shall be consistent with the notice of such business and with good order. And if such Alderman be absent, or if being present and so called upon he shall make no such motion, then it shall be open to any other Alderman to make such motion. And when any such motion shall have been made, it shall be dealt with in precisely the same manner as if notice thereof had been given, subject however to any objection which may exist as to its not being in accordance with the notice actually given of such business or with good order. And if no motion shall be made in reference to such business, the entry relating thereto shall be struck from the business paper.

8. The orders of the day shall consist of any matters other than motions on notice which the Council shall at a previous meeting thereof have directed to be taken into consideration, or which the Mayor or any Committee of the Council shall have directed to be entered on the business paper for consideration.

9. Section 7 of this Part of these By-laws shall be considered applicable to orders of the day; and the Alderman who has the usual charge of, or who has previously moved in reference to the particular business to which any such order of the day relates, shall be the person called upon to move: Provided that as to any order of the day entered as aforesaid by direction of the Mayor, such Mayor may arrange with any Alderman to move, and may, in such case, call upon the Alderman with whom he has so arranged.

10. It shall be incumbent on every Alderman presenting a petition to acquaint himself with the contents thereof, and to ascertain that it does not contain language disrespectful to the Council. The nature and prayer of every such petition shall be stated to the Council by the Alderman presenting the same. All petitions shall be received only as the petitions of the parties signing the same. No motion shall, unless as hereinafter provided, be permissible on the presentation of a petition, except that the same be received or that it be received and referred to one of the permanent Committees hereinafter mentioned, or that it be received and that its consideration stand an order of the day for some future meeting: Provided however, that if any Alderman shall have given due notice of a motion in reference to any petition, and such petition shall have been presented before such Alderman shall have been called upon to move such motion, the said motion shall, if otherwise unobjectionable, be considered in order.

11. The Mayor shall have the right of directing the attention of the Council to any matter or subject within its jurisdiction or official cognizance, by a minute in writing. Every such minute shall be written upon paper of the same kind and with the same margin as a report from a Committee, and shall be signed by such Mayor. And the consideration of such minute shall have precedence next after the reading of correspondence and order made thereon mentioned in By-law No. 2, Part 1.

12. Every Alderman who shall make or second any motion, or shall propose or second any amendment, or shall take any part in any debate or discussion, or shall put or reply to any question, or shall make any statement, or shall in any other way or for any other purpose address observations to the Council, shall while so doing stand up in his customary place, unless he shall be prevented from so doing by reason of some bodily infirmity, and shall address himself to the Mayor or other Chairman then presiding: Provided that in the case of a question, such question may, by permission of such Mayor or Chairman, be put directly to the Alderman or officer to be questioned, and may be replied to in like manner, but in every such case the question so put, and the answer thereto, shall be subject to every legal objection on the ground of disorder or irrelevancy. And all members of the Council shall on all occasions when in such Council address and speak of each other by their official designations as Mayor, Chairman, or Alderman, as the case may be, nor shall any Alderman be interrupted while thus speaking, unless for the purpose of calling him to order as hereinafter provided.

13. Every mover of an original motion shall have a right of general reply to all observations which may have been made in reference to such motion, and to any amendments

moved thereon, as well as a right to speak upon every such amendment. Every Alderman other than the mover of such original motion shall have a right to speak once upon such motion and on every amendment thereon. No Alderman shall speak oftener than once upon any question other than a question of order, unless when misrepresented or misunderstood, in which case he shall be permitted to explain without adding any further observations than may be necessary for the purpose of such explanation. And no Alderman shall be allowed to speak at any one time longer than fifteen minutes. An Alderman who has moved any motion or amendment shall be considered to have spoken thereon, but an Alderman who shall have seconded any such motion or amendment without any further observation than that he seconded the same shall be at liberty to speak on such motion or amendment. No Alderman shall digress from the subject under discussion or shall make personal reflections on, nor impute improper motives to, any other Alderman.

14. A debate may be adjourned to a later hour of the day or to any other day specified, and the Alderman upon whose motion such debate shall have been so adjourned shall be entitled to pre-audience on the resumption of the same. If two or more Aldermen rise to speak at the same time the Mayor or Chairman shall decide which of such Aldermen shall be first heard.

15. Any Alderman may request the question or matter under discussion to be read or stated for his information, or may require the production of any records of the Council bearing upon such question or matter which are readily accessible: Provided however, that no such request or requisition shall be so made as to interrupt any other Alderman when speaking, or materially to interrupt the discussion; also that if any such request or requisition shall appear to the Mayor or Chairman not to have been made *bona fide* it shall not be complied with.

16. The Mayor or Chairman shall not move or second any motion or amendment, nor put any question as provided for by section 2 of this Part of these By-laws, except as is further provided for by section 12 of the same; but such Mayor or Chairman shall have the same right as any other Alderman to speak once upon every such subject or amendment. The Mayor or Chairman shall rise when so speaking (unless prevented by some bodily infirmity from so doing) but shall be considered as still presiding.

17. A Call of the Council may be ordered by any resolution of which due notice shall have been given, for the consideration of any motion or matter of business before such Council. There shall, without any special order to that effect be a Call of the Council for the consideration of every motion which may be made, and of every motion for the recession of any resolution, order, or decision of such Council. The Call shall be made immediately before the motion or business for which such Call has been ordered or is required to be made by the last preceding section shall be moved or considered. Such Call shall be made as follows: The Council Clerk shall call the names of all the members in their alphabetical order, each member present shall answer to his name as so called, and if any members are absent, a record shall be made of such absence; but if leave of absence to any such member shall have previously been granted, or if such an excuse in writing shall have been forwarded to the Mayor or Council Clerk as a majority of the Council then present shall consider satisfactory, such absent member shall stand excused, and a record shall be made of such excuse, and of the reasons for the same. Any member of the Council who, having had notice of such Call of the Council, shall not answer to his name as aforesaid, and shall not be legally excused as aforesaid, and shall fail to show that by reason of extreme illness, or any other sufficient cause, he has been unable to send an excuse in writing as aforesaid, or who, having answered to his name as aforesaid, shall not be present when a vote is taken on the motion or business as to which such Call has been made as aforesaid, shall, for every such offence, be liable to a penalty of not less than ten shillings nor more than five pounds: Provided that if the consideration of every such motion or matter of business be adjourned to a future day, there shall be a further Call on the resumption of such consideration; and the provisions herein, as to penalties for absence, shall have reference to such further Call; and if there shall be more than one adjournment, this proviso shall be taken to extend to the resumption of the consideration of such motion or matter of business after every such adjournment.

18. There shall be four Standing Committees, viz., a By-law Committee, a Committee for Works, a Finance Committee, and a Committee for General Purposes. The By-law Committee shall prepare for the consideration of the Council, drafts of all such By-laws as may be required for the good government of the Municipal District; they shall also watch over the administration of the By-laws, and of any Statute of which the operation has been or may be extended to the said Municipal District, and shall take such steps as may be necessary for the prevention or punishment of offences against such By-laws or Statutes, and for the preservation of public health,

order, and decency. The Committee for Works shall have the general direction of all works ordered or sanctioned by the Council, and the general inspection of all streets, roads, ways, bridges, public reserves, and other public places under the care and management of the Council; they shall also inquire, and report from time to time, as to such improvements or repairs as they may think necessary, or as they may be directed by resolution of the Council to inquire and report upon. The Finance Committee shall examine and check all accounts, and shall watch generally over the collection and expenditure of the Municipal revenues; they shall inquire and report, from time to time, as to all matters which they may consider to affect, or to be likely to affect, the finances of the Municipal District, and as to such matters or subjects of the like nature as they may be directed by resolution of the Council to inquire and report upon. The Committee for General Purposes shall take cognizance of every matter, subject, or question within the jurisdiction of the Council, not coming within the province of one or other of the before-mentioned Standing Committees; and shall from time to time inquire into and report upon any such subject, matter, or question as they may think necessary, or as they may be directed by resolution of the Council to inquire into and report upon.

19. Every Committee of which the Mayor shall not be a member shall elect a permanent Chairman of such Committee, within seven days after their appointment. The Council Clerk shall call a meeting of any Committee when requested so to do by the Chairman or any two members of such Committee. The Chairman of each Standing Committee shall make, or cause to be made, in a book to be kept by him for that purpose, memoranda of all the transactions of such Committee, which book he shall, on ceasing to be such Chairman, hand over to the Council Clerk, and by him to the succeeding Chairman.

20. With the exception of emergent matters hereinafter specially provided for, no work affecting the funds of the said Municipal District shall be undertaken until the probable expense thereof shall have been first ascertained by the Council. For emergent matters, and for necessary current expenses during the intervals which may elapse between the meetings of the Council, outlays to the following extent may be incurred:—1. By order of the Committee for Works, or of the Mayor and one member of such Committee, for repairs or emergent works to the extent of five pounds. 2. By order of the Mayor and any two Aldermen, or without the Mayor, of any four Aldermen, for any emergent purpose, to the extent of five pounds. 3. By order of the Mayor, for necessary current expenses, to the extent of two pounds: Provided that in every case a detailed report, in writing, of every such outlay, shall be laid before the Council at its next meeting,—such report to be signed by the Chairman of the Committee of Works, or the Mayor, or the Mayor and Aldermen, or the Aldermen without the Mayor, as the case may be, by whom such outlay shall have been authorized. Also, that such outlay shall only be permissible in reference to matters coming strictly within the jurisdiction or functions of the Council, and that no outlay involving a disobedience or evasion of any order or resolution of such Council shall on any pretence be thus authorized.

Accounts or demands for money, &c

21. All accounts and demands of money against or from the Council shall be examined and reported on by the Finance Committee, before any order shall be made for payment of such accounts or demands. No payment shall be so ordered unless there shall be a certificate or memorandum from the Committee, from the Mayor, or from the officer of the Council to whom the direction or guardianship of such expenditure properly belongs, showing that the demand is a legitimate one, and has been duly authorized or inquired into. It shall be the imperative duty of the Finance Committee to see that this requirement is fulfilled, or to report specially as to the reasons for its non-fulfilment, before recommending payment: Provided however, that such special report as last herein mentioned, may be embodied with the report by which payment of the amount in question is recommended: Provided also, that in cases of special expenditure under section 20 of this Part of these By-laws, the report directed by that section to be laid before the Council shall, if the outlay shall have been lawfully incurred be deemed a sufficient certificate; and provided further, that in regard to salaries and wages of labour, for officers, servants, and labourers employed at fixed rates of payment by order of the Council, the certificate of the Mayor of the amount due to any such officer, servant, or labourer, and the order of such Mayor for payment of such amount, shall be sufficient authorization for such payment; and such certificate, memoranda, and authorization shall be attached respectively to the reports from the Finance Committee on the payments or outlays to which such certificates, memoranda, or authorizations have reference.

Destroying records.

22. Any person destroying, defacing, or altering any record of the Council shall, for every such offence, be liable to a penalty of not less than five pounds nor more than fifty pounds.

Bonds.

23. All bonds given by officers or servants of the Council for the faithful performance of their duties shall be deposited with the attorney or the bankers of the Corporation as the Council may order, and no officer or servant of the Council shall be received as surety for any other such officer or servant.

Council Clerk's duties, &c.

24. The Council Clerk, in addition to the duties which by the Municipalities Act of 1867, or by the present or any other By-laws thereunder he may be required to perform, shall be the Clerk of all Revision Courts held in the Municipal District under the provisions of the said Municipalities Act. He shall also, under the direction of the Mayor, conduct all correspondence which may be necessary on the part of the Council. He shall likewise have charge of all the records of such Council, except such books or documents as may (as hereinafter provided), be entrusted to any other officer, and shall be responsible for the safe keeping of such records. He shall generally assist the Mayor in carrying out the orders of the Council and the duties of such Mayor.

Treasurer.

25. The Treasurer shall have charge of such books of account and other records of the Council as the Council shall from time to time order to be kept by him, and shall be responsible for the safe-keeping of the same; and any other officer of the Council may have other records committed to his charge by order of the Council; and in such case shall be responsible for the safe keeping thereof.

Leave of absence, &c.

26. No leave of absence shall be granted to the Mayor or to any Alderman otherwise than by a resolution of the Council adopted after due notice.

Tenders.

27. Whenever it is decided that any work shall be executed, or any materials supplied, by contract, tenders for the execution of such work, or the supply of such materials shall be called for by public notice as hereinafter provided.

Draft of intended By-laws.

28. A draft of every intended By-law shall lie in the office of the Council for at least seven days before such draft shall be taken into consideration by such Council, and shall be open to the inspection of any ratepayer who may desire to inspect the same, and public notice shall be given as hereinafter provided that such draft is so lying for inspection.

Recission of orders, &c.

29. Whenever a motion for the recission of any order, resolution, or vote of the Council shall have been negatived, no other motion to the same effect shall be permissible until a period of three months shall have elapsed from the time of negativing such first-mentioned motion: Provided that nothing herein contained shall be held to prohibit the reconsideration and amendment of any proposed By-law which may have been submitted to the Governor for confirmation, and may have been remitted to the Council with suggested amendments of the same, or the passage after due notice as hereinafter provided, and in due course of law, of any By-law for the repeal or amendment of any other By-law.

Quorum not present.

30. Whenever the consideration of any motion or matter of business shall have been interrupted by reason of a quorum not having been present, the resumption of such consideration may be ordered by resolution of the Council, after due notice, and such consideration shall in such case be resumed at the point where it was so interrupted as aforesaid.

Suits and informations—how laid.

31. Any suits or informations for the enforcement of penalties for or in respect of breach of the Municipalities Act of 1867, or of any By-law made thereunder, or of any Statute, the operation of which may have been extended to the Municipal District, which may have been directed by the Council, or by the By-law Committee, or by the Mayor, to be commenced or laid, shall be so commenced or laid as follows, namely: When against a member of the Council, or an Auditor, or any officer of the Corporation, by the Council Clerk, unless such Council Clerk shall be the officer to be proceeded against, and in such case by any other officer named by the Council for that purpose; when against any other person, by the officer to whom the carrying out of the statutory provision or By-law imposing the penalty sought to be enforced has been entrusted; and if there shall be no such officer, then by any such officer or person as shall be appointed for that purpose by the Council or the By-law Committee, or the Mayor, as the case may be, on directing such suit or information as aforesaid; and no such suit shall be brought or information laid as aforesaid against any member of the Council or Auditor, except by order of such Council; nor shall any similar proceeding be taken against any officer of the Council except on the order of such Council or of the Mayor, nor against any other person, except upon the order

of the Council, or of the Mayor, or of the By-law Committee. And no such suit shall be directed to be brought, nor shall any such information be directed to be laid as aforesaid, except upon an express resolution of the Council, in any case where the bringing of such suit, or the laying of such information will be adverse to any previous direction by such Council, or where on the trial or hearing of any such suit or information the same shall have been dismissed on the merits. Provided that in any case the conduct or prosecution of any such suit or information may on the order of the Council be entrusted to an attorney.

Public Notice.

32. In all cases where public notice is or shall be required to be given by any By-law of any appointment, resolution, act, order, or regulation done, made, or passed, or proposed to be made, done, or passed by the Council or by any Committee thereof, or by the Mayor or any officer of the said Council, such notice shall be given and published by posting the same on or near the outer door of the Council Chambers for the space of seven days, and by advertising the same once in some newspaper circulating in the said Municipal District.

Persons liable to pay rates, &c.

33. All persons liable to pay any rates shall pay the amounts thereof within the time prescribed by the "Municipalities Act of 1867" into the office of the Council Clerk, during office hours. And it shall be the duty of the Council Clerk to furnish the Mayor with a list of the names of all persons whose rates are unpaid at the expiration of the times fixed for the payment of the same. And it shall be the duty of the Mayor to issue distress warrants against all such persons, and to cause such warrants to be enforced, or to cause such defaulters to be sued for the amount of such rates in a Court of competent jurisdiction.

PART II.

Bailiff, how appointed.

1. The Council may from time to time appoint a Bailiff to the said Municipal District, and such Bailiff before entering on the duties of his office shall enter into a bond for the faithful performance of his duty—himself in the sum of fifty pounds and two sureties in the sum of twenty-five pounds each, such sureties to be approved of by the Mayor. All distresses for rates in arrear in respect of any premises shall be made by the Bailiff for the time being on the goods and chattels on the said premises while in the occupation of the person on whom the notice of assessment and rate was served, under warrant, in the form of Schedule A hereto, under the hand of the Mayor or any Alderman who may for the time being be duly authorized to perform the duties of that office. If the sum for which any such distress shall have been made shall not be paid, with costs, as hereinafter provided, on or before the expiration of five days, the Bailiff shall sell the goods so distrained, or a sufficient portion thereof, in the manner pointed out by the Act 15 Vic. No. 11, and shall pay over the surplus (if any) that may remain, after deducting the amount of the sum distrained for and costs as hereinafter provided, to the owner of the goods so sold, on demand of such surplus by such owner. The inventory on making every such distress shall be in the form set forth in the Schedule B. And the person distraining and the person distrained on shall respectively be entitled to the like advantages as are conferred on either by the said Act: Provided nevertheless that the fees chargeable and recoverable shall be those set forth in the Schedule C. And the Bailiff shall hand over to the Council Clerk all proceeds of every such distress within forty-eight hours after having received the same, less the costs and charges in said Schedule C.

SCHEDULE A.

Warrant of Distress.

I, _____, of the Municipal District of Leichhardt, do hereby authorize you, _____, the Bailiff of the said Municipal District, to distrain the goods and chattels in the dwelling-house (or in and upon the land and premises) in the occupation of _____, situate at _____, for _____, being the amount of rates due to the said Municipal District to the day of _____, for the said dwelling-house (or land or premises as the case may be), and to proceed thereon for the recovery of the said rates according to law.
Dated this _____ day of _____, 18 _____.

SCHEDULE B.

Inventory.

I have this day, in virtue of the warrant under the hand of the _____ of the Municipal District of Leichhardt, dated _____, distrained the following goods and chattels in the dwelling-house (or in and upon the land and premises) in the

occupation of _____, situate at _____, within the said Municipal District, for _____, being the amount of rates due to the said Municipal District to the day of _____, 18 _____.

List of Goods and Chattels distrained on:

Dated this _____ day of _____, 18 _____.

SCHEDULE C.

Costs.

	s.	d.
For every warrant of distress	2	0
For serving every warrant and making levy where the same is not more than £20	2	0
Above that sum in addition for every £10.....	1	0
For making and furnishing copy of inventory	2	0
For man in possession each day or part of a day	5	0
For sale, commission, and delivery of goods per pound, &c. on proceeds of the sale	1	0

PART III.

New roads, &c.

1. No new public road, street, lane, way, park, or other place less than forty feet in width proposed to be dedicated to the public, shall be taken under the charge and management of the Council until after such road, street, lane, way, or park, shall have been examined by the Committee for Works and reported upon to the Council by such Committee

New streets, roads, &c.

2. Whenever any proprietor or proprietors of land within the said Municipal District shall open any road, street, or way, or lay out any park or other place for public use or recreation through or upon such land, and shall be desirous that the Council shall undertake the care and management of such road, street, way, park, or other place, he or they shall furnish the Council with a plan or plans, signed by himself or themselves, showing clearly the position and extent of such road, street, way, park, or other place as aforesaid.

New road, street, &c.

3. If the Council shall determine to take charge of any such roadway or other place as aforesaid, the plan or plans so signed as aforesaid shall be preserved as a record or records of the Council; and the proprietor or proprietors aforesaid shall execute such further instrument dedicating such road, way, park, or other place to public use or recreation as aforesaid as may be considered necessary by the Committee for General Purposes, and such further instrument of dedication shall also be preserved as a record of the Council.

Entrance to premises.

4. In all cases where access is necessary from a street or road to any yard, private way, lane, or premises, the person or persons requiring and using the same shall form and maintain at his or their own cost a crossing over the footpath through the full depth thereof, to be formed and constructed as the Council or their Surveyor shall direct, under a penalty not exceeding twenty pounds nor less than ten shillings: Provided in all cases where the Council shall consider crossings necessary, and the person or persons interested shall fail to make application for the construction thereof, the Council shall have power to form any such crossings.

Levels.

5. The Committee for Works, or any officer or person acting under the supervision of such Committee, shall, subject to such orders as shall from time to time be made by the Council in that behalf, fix and lay out the levels of all public roads, streets, and ways within the Municipal District, and the carriage and foot ways thereof; and it shall be the duty of such Committee, officer, or person, to place posts at the corners or intersections of any such public roads and streets, and of the carriage-ways and foot-ways of such roads and streets, wherever the same may be considered necessary or desirable by the Council: Provided that there shall be no change of level in any such public road, street, or way until the same shall have been submitted to and adopted by the Council as hereinafter directed.

Alteration of levels.

6. Whenever it may be deemed necessary to alter the level of any such public road, street, or way as aforesaid, the Committee for Works shall cause a plan and section showing the proposed cuttings, to be exhibited at the Council Chamber for fourteen days, for the information and inspection of rate-payers, and shall notify by advertisement in some newspaper circulating in the Municipal District, that such plan is so open for inspection. At a subsequent meeting of the Council the said plan and section shall, if adopted, be signed by the Chairman of such meeting, and countersigned by the Council Clerk; and such plan and section so signed and countersigned shall be a record of the Council.

Gravel, &c., not to be removed.

7. Any person who shall form, dig, or open any drain or sewer, or remove or cause to be removed any turf, clay, sand, soil, gravel, stone, or other material, in or from any part of the carriage or foot way of any road or street or other public place within the said Municipal District, without leave first had and obtained from the Council, or who shall wantonly break up or otherwise damage any such carriage or foot way, shall on conviction forfeit and pay for every such offence any sum not exceeding five pounds nor less than one pound.

Holes, &c., not to be made Obstructions.- Fences.

8. Any person or persons who shall dig or make, or cause to be dug or made, any hole or excavation, or leave, or cause to be left any hole or excavation, or any unenclosed or insufficiently enclosed land adjoining or near to any street or public place within the said Municipal District, for any purpose whatsoever, and shall not forthwith enclose, and keep the same enclosed in a good and sufficient manner, to the satisfaction of the Committee for Works of the said Municipal District, or shall keep up, or cause to be kept up and continued any enclosure upon any public street, thoroughfare, or other public place for any time which, in the opinion of the said Committee, shall be longer than is absolutely necessary, or shall not place lights upon each side of any such enclosure, and keep the same constantly burning from sunset to sunrise during the continuance of any such enclosure, shall forfeit and pay for every such refusal or neglect any sum not being less than forty shillings nor exceeding five pounds. If any person or persons shall fence across, or fence in, or in any way obstruct any public street, or road, thoroughfare, or highway, within the said Municipal District, such person or persons so offending shall upon conviction forfeit and pay a sum not exceeding five pounds nor less than two pounds for every such offence.

Stoppage of Traffic.

9. The Committee for Works, or any officer or person acting under the authority of such Committee, may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same, or for any necessary purpose; and any person offending against this By-law, either by travelling along such street, lane, or thoroughfare, or such portion thereof, or by removing or destroying any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty of any sum not exceeding five pounds for every such offence, and not less than two pounds.

Trailing of timber, &c.

10. Any person who shall haul or draw, or caused to be hauled or drawn, upon any part of any street or public place within the said Municipal District, any timber, stone, or other thing, otherwise than upon wheeled vehicles or barrows, or shall suffer any timber, stone, or other thing which shall be carried principally or in part upon any wheeled vehicle or barrow, to drag or trail upon any part of such street or public place, to the injury thereof, or to hang over any part of any such vehicle or barrow, so as to occupy or obstruct the street beyond the breadth of the said vehicle or barrow, shall upon conviction forfeit and pay for every such offence a sum of not more than forty shillings nor less than five shillings.

Filth on road—Drawing on footways.

11. Any person who shall throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or to remain, any ashes, rubbish, offal, dung, soil, dead animal, blood, or other filth, or annoyance, or any matter or thing, in or upon the carriage-way or foot-way of any street or other public place in the said Municipal District, or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other animal, in or so near to any such street or other public place, as that any blood or filth shall run or flow upon or over, or be on any or either of any such carriage or footway, or shall run, roll, drive, draw, or place or cause, permit, or suffer to be run, rolled, driven, drawn, or placed upon any of the said footways of any such street or public place, any waggon, cart, dray, sledge, or other carriage, or any wheel-barrow, hand-barrow, or truck, or any hogshead, cask, or barrel, or shall wilfully lead, drive, or ride, any horse, ass, mule, or other beast, upon any such footway, shall upon conviction forfeit and pay, for the first offence, a sum not exceeding forty shillings, nor less than five shillings; for the second offence a sum not exceeding five pounds nor less than ten shillings; and for the third and every subsequent offence, a sum not exceeding ten pounds nor less than one pound for each such offence.

Obstruction of footways.

12. Any person who shall set or place, or cause, or permit to be set or placed any stall-board, chopping-block, show-board (on hinges or otherwise), basket-ware, merchandise, casks, or goods of any kind whatsoever, or shall hoop, place, wash, or cleanse, or shall cause to be hooped, placed, washed, or cleansed, any pipe, barrel, cask, or vessel, in or upon, or over any carriage or footway, in any street or public place within the said Municipal District, or shall set out, lay, or place, or shall cause or procure, permit, or suffer to be set out,

laid, or placed, any coach, cart, wain, waggon, dray, wheel-barrow, hand-barrow, sledge, truck, or other carriage, upon any such carriage-way, except for the necessary time of loading or unloading such cart, wain, waggon, dray, sledge, truck, or other carriage, or taking up or setting down any fare, or waiting for passengers when actually hired, or harnessing or unharnessing the horses or other animals from such coach, cart, wain, waggon, dray, sledge, truck, or other carriage,—or if any person shall set on, place, or cause to be set or placed in or upon or over any such carriage or footway any timber, stones, bricks, lime, or other materials or things for building whatsoever (unless the same shall be enclosed as herein directed), or any other matters or things whatsoever, or shall hang out or expose, or shall cause or permit to be hung out or exposed, any meat or offal, or other thing or matter whatsoever, from any house or other building over any part of any such footway or carriageway, or over any area of any house or other building or premises, or any other matter or thing from and on the outside of the front or any other part of any house or other building or premises over or next unto any such street or public place, and shall not immediately remove all or any such matters or things being thereto required by the Inspector of Nuisances or other officer appointed by the said Council,—or if any person who, having in pursuance of any such requisition as aforesaid, removed or caused to be removed any such stall-board, show-board, chopping-block, basket-ware, merchandise, casks, goods, coach, cart, wain, waggon, dray, wheel-barrow, hand-barrow, sledge, truck, carriage, timber, stones, bricks, lime, meat, offal, or other matters or things, shall at any time thereafter again set lay or place, expose, or put out, or cause, procure, permit, or suffer to be set, laid, placed, exposed, or put out, the same or any of them, or any other stall-board, show-board, chopping-block, basket-ware, merchandise, goods, timber, stones, bricks, lime, coach, cart, wain, waggon, dray, truck, wheel-barrow, hand-barrow, sledge, meat, offal, or other things or matter whatsoever (save and except as aforesaid), in, upon, or over any such carriage or foot way of or next unto any such street or public place as aforesaid, shall, upon conviction, for every such offence forfeit and pay—for the first offence a sum not exceeding forty shillings nor less than five shillings, for the second offence a sum not exceeding five pounds nor less than ten shillings, and for a third and every subsequent offence a sum not exceeding ten pounds nor less than one pound: Provided that nothing herein contained shall be deemed to prevent any person from placing an awning in front of his or her shop or house in such manner as that such awning shall be at least seven feet above the height of the footway, and that the posts be placed close to the kerbstone or outer edge of such footway.

Carrying offal, &c.

13. Any person or persons who shall convey, carry, or cause to be conveyed or carried, in any cart, carriage, or other vehicle, or by any other contrivance, any slaughter-house refuse, offal, night-soil, bones, ammoniacal liquor, or other offensive matter, through, or in any street, road, or public place within the said Municipal District, between the hours of nine o'clock in the morning and six o'clock at night, or who shall fill any cart or other vehicle so as to turn over or cast any slaughter-house refuse, offal, night-soil, ammoniacal liquor, slop, mire, or channel dirt, or filth in or upon any street, road, or public place, or who shall deposit any slaughter-house refuse, offal, night-soil, ammoniacal liquor, blood, or other offensive matter nearer to any street, road, public place, or dwelling-house than one hundred yards, or who shall remove slaughter-house refuse, offal, bones, night-soil, or other offensive matter except between the hours of six o'clock at night and nine o'clock in the morning, and then not otherwise than in properly covered and water tight carts, or who shall cause or suffer any vehicle used for this purpose to stand on any premises within one hundred yards from any such street, road, or dwelling-house, shall for every such offence pay any sum not exceeding ten pounds nor less than two pounds, and for every subsequent offence any sum not exceeding twenty pounds nor less than five pounds, and the Inspector of Nuisances shall have power to inspect the contents of all vehicles carrying or used for conveying such offensive matters as aforesaid,

Furious driving and riding.

14. Any person who shall ride or drive furiously so as to endanger the life or lives of any person or persons within any streets, roads, or ways of the said Municipal District, or shall break in any horse, or shall drive any carriage for the purpose of breaking in such horse or horses to the danger of the passengers in any street, road, or way within the said Municipal District shall for every such offence pay any sum not exceeding ten pounds nor less than two pounds.

Driving cattle, &c.

15. Any person or persons driving cattle, excepting working bullocks, milch cows, or horses on any road, street, or public place within the boundaries of the said Municipal District, unless between the hours of ten o'clock at night and eight o'clock in the morning, shall on conviction forfeit and pay any sum not exceeding five pounds nor less than forty shillings for every such offence.

Drafting cattle, &c.

16. Any person or persons drafting cattle upon any road, street, or public place within the boundaries of the said Municipal District, shall upon conviction be fined in any sum not exceeding five pounds nor less than two pounds.

Blasting, &c.

17. No person shall blast, or cause to be blasted, any stone or rock within one hundred yards of any public street or road in the said Municipal District, without the permission of the said Council, or Council Clerk, or other person appointed by the Council for that purpose; and any person contravening this By-law, shall on conviction forfeit and pay a sum not exceeding five pounds nor less than two pounds.

Lamp, &c.

18. Any person who shall wantonly or maliciously break or injure any lamp or lamp post, or extinguish any lamp set up for public convenience in the said Municipal District, shall forfeit and pay for every such offence any sum not less than two pounds nor more than five pounds.

Damaging toll or other public building, &c.

19. Any person who shall damage any public building, toll-gate, toll-bar, toll-board, wall, parapet, fence, sluice, bridge, culvert, sewer, water-course, or other public property within the said Municipal District, shall forfeit and pay a sum not exceeding ten pounds nor less than two pounds.

Damaging trees or shrubs, &c.

20. Any person who shall wilfully and without the authority of the Council, cut, break, bark, root up, or otherwise destroy or damage the whole or any part of any tree, sapling, shrub, or underwood, growing in or upon any street or place under the management of the Council, shall forfeit any sum not exceeding ten pounds nor less than one pound.

Animals thrown in water, &c.

21. Any person who shall cast any filth, rubbish, or any dead animal, or any animal with intent of drowning, into any public watercourse, sewer, waterhole, river, creek, or canal, or who shall suffer slops, suds, or filth of any kind to flow from his or her premises over any of the footways or streets of the Municipal District, or permit or cause by means of pipes, shoots, channels, or other contrivances, filth of any kind whatsoever to flow into any public watercourse, waterhole, river, creek, or canal, or shall obstruct or divert from its channel any sewer or watercourse, river, creek, or canal, shall forfeit any sum not exceeding five pounds nor less than one pound.

Dead animals, mode of removal.

22. If any animal shall die in any part of the said Municipal District, and the owner of such animal or the occupier of the place, if private property, where such animal shall have died, shall not cause such animal to be immediately destroyed by fire, or so effectually removed and disposed of that no nuisance can possibly result therefrom in any part of the said Municipal District, he shall for every such offence forfeit and pay any sum not exceeding fifty pounds nor less than ten pounds.

Dead animals on road or street, &c.

23. If any animal shall die on any road, street, or public place within the said Municipal District, or within half a mile of any road, street, or public place, or of any dwelling-house, and the owner of such animal, or the occupier of the place, if private property, where such animal shall have died, shall not immediately cause such animal to be effectually removed and disposed of as aforesaid, or destroyed as aforesaid on the spot where it shall have died, if a quarter of a mile from any dwelling-house, or if such spot shall not be a quarter of a mile from any dwelling-house, if such owner or occupier shall not immediately cause such animal to be effectually removed as aforesaid, or to be removed to some place not less than a quarter of a mile from any dwelling-house and there destroyed as aforesaid, every such owner or occupier shall for every such offence forfeit and pay any sum not exceeding ten pounds nor less than two pounds.

Power of Inspector as to dead animals on private premises.

24. The Inspector of Nuisances, or any other officer appointed by the said Council of the said Municipal District, with his assistant, may at any hour enter upon any premises or place within the said Municipal District where any animal has died, and require the owner or occupier of such premises or place immediately to destroy such animal by fire, and if necessary to remove the same for that purpose as such Inspector of Nuisances or other officer appointed by the said Council shall direct, or otherwise forthwith effectually to remove and dispose of the same as aforesaid, in default of which it shall be lawful for any one or more of such officers to cause such animal to be removed for that purpose, and every owner or occupier of such premises or place failing, neglecting, or refusing to comply with such requisition, shall forfeit and pay any sum not exceeding thirty pounds nor less than three pounds.

Dead animals in certain cases to be removed at cost of Municipality.

25. If any animal shall die in any public street or place within the said Municipal District, and the owner or any person having charge of such animal cannot at the time be found or ascertained, it shall be immediately removed by the Inspector of Nuisances or other officer appointed by the said Council, and destroyed in the manner aforesaid, at the cost of the said Municipal District.

Hog-sties to be forty yards from streets, and animals suffered to stray, &c.

26. Any person who shall breed or keep any kind of swine in any house, building, yard, garden, or other place situated and being within forty yards of any street or public place in the said Municipal District, or shall suffer any kind of swine or any horse, ass, mule, sheep, goat, cow, or any other animal of a like nature belonging to him or her, or under his or her charge, to stray or go about, or to be tethered or depastured in any street, road, or public place, shall on conviction forfeit and pay any sum not exceeding forty shillings nor less than five shillings for such and every animal so bred, kept, suffered to stray, or go about, or to be tethered, or depastured in any such street, road, or public place as aforesaid: Provided that if after due inquiry shall have been made the owner thereof cannot be discovered, it shall be lawful for the said Council to cause to be destroyed any swine or goats so straying, tethered, or depastured. And the owner or occupier of any house or premises or other place within the said Municipal District, wherein any such swine, horse, ass, mule, sheep, goat, cow, or other animal is kept, fed, milked, or used in any way whatsoever, shall, within the meaning of those By-laws, be deemed the owner of every such animal so bred, kept, suffered to stray, or to be tethered, or depastured in any such street or public place as aforesaid, and the words "any house," "building," "yard," "garden," or "other place" wherein any kind of swine shall be bred or kept as aforesaid, shall respectively be deemed hog-sties within the meaning of those By-laws, and the word "horses" shall be sufficient designation for any entire, geldings, mares, or foals, and the word "cattle" for any bulls, oxen, cows, or calves, when more than one is the subject of any information and summons under the provisions of these By-laws.

Power to impound.

27. The Inspector of Nuisances or any other person duly authorized by the said Council shall have the power to impound, in the public pound of the said Municipal District, all animals of every description found straying within the said Municipal District.

Premises and offal, &c.

28. Any owner or occupier of any house, premises, or place within the said Municipal District who shall neglect to keep clean all private avenues, passages, yards, and ways, within the said premises, so as by such neglect to cause a nuisance by offensive smell, or who shall suffer any slaughter-house refuse, offal, bones, or any decomposed substance under any process or otherwise to remain in or upon any premises in the said Municipal District, or who shall allow the remains of any boiled carcass or boiled slaughter-house refuse, bones, offal, or liquid, to remain in any cart, boiler, trough, cask, tub, in any shed, house, yard, paddock, or other place within the said Municipal District, until it shall become a nuisance by causing an offensive smell or otherwise, shall for every such offence pay any sum not exceeding fifty pounds nor less than two pounds, and for every subsequent offence any sum not exceeding fifty pounds nor less than five pounds. And the Inspector of Nuisances, or any other officer appointed by the said Council, for the purpose of abating those nuisances, may, when and as often as he shall see occasion, with any assistance he may deem fit, visit and inspect all private avenues, passages, yards, ways, premises, butchers shambles, slaughter-houses, tannery, sties, boiling-down, and fellmongering establishments in the said Municipal District, and any proprietor or proprietors of such establishments who shall suffer soup or other offensive liquid to run through any drain sewer, or pipes into any creek, or cause to pollute any creek or other place in a like manner, shall forfeit and pay a similar penalty as aforesaid.

Complaints respecting dirty premises, &c.

29. Upon the complaint of any householder that the house, premises, yards, closets, or drains of the neighbouring or adjoining premises are a nuisance or offensive, the Inspector of Nuisances, or any other officer appointed by the said Council, shall make an inspection of the premises complained of. And the officer of the said Council shall have the full power, without any other authority than this By-law, to go upon such premises for the aforesaid purpose. And any person who shall personally, or by any person in his employment or under his control, suffer any waste or stagnant water, or any muck, filth, soil, or other offensive matter to remain in any cellar or place within any dwelling-house or premises within the said Municipal District for the space of twenty-four hours after written notice to him from the Inspector of Nuisances, or officer of the Council, to remove the same, or shall in like manner suffer the contents of any water-closet, privy, or cesspool

to overflow or soak therefrom, shall for every such offence forfeit and pay a sum not exceeding two pounds nor less than five shillings, and the like sum for every day that the same shall remain after such notice; and the Council may remove or abate the nuisance.

30. Every person who in any street or other public place or passage within the said Municipal District, to the obstruction, annoyance, or danger of the residents or passengers, shall commit any of the following offences, shall on conviction for any and every such offence, forfeit and pay a penalty of not more than two pounds nor less than ten shillings—

Every person who shall carry or convey, or cause to be carried or conveyed in any street or public place the carcass or any part of the carcass of any newly slaughtered animal without sufficient and proper cloth covering the same for concealment from public view, or shall hawk or carry about butcher's meat for sale without covering the same as aforesaid.

Every blacksmith, whitesmith, anchorsmith, nail-maker, metal-founder, lime-burner, brick-maker, potter, or other person using a forge, furnace, or kiln, and having a door, window, or aperture fronting or opening into or towards any street, lane, or passage, and not enclosing such door, or not fastening the shutters or other fastenings of such window, and closing such aperture, or placing a screen before the same every evening within one hour after sunset, so as to effectually prevent the light from showing through the doorway, window, or aperture next or upon such street or lane or passage.

Every person who shall within the distance of one hundred yards from any dwelling-house burn any rags, bones, cork, or other offensive substance, to the annoyance of any inhabitant.

Every person who shall carry goods, tools, implements, ladders, scaffolding, or any frame, to the annoyance of any person upon the footway, of any street or other public footway.

Every person driving any cart, waggon, dray, coach, hackney-carriage, omnibus, gig, or other carriage whatsoever who shall not keep to the near or left-hand side of such street, road, thoroughfare or public place, or passage, except when passing any other carriage or other vehicle which is stationary or going in the same direction, or shall in any manner prevent wilfully any other person from passing him or any carriage under his care, upon such street, road, thoroughfare, or public place, or passage, or by negligence or by misbehaviour prevent, injure, or interrupt the free passage of any carriage or person in or upon the same, and every person leaving the care or charge of any cart, waggon, dray, wain, or van, which shall be drawn by two or more horses or other beasts, who shall ride on the same without sufficient reins to guide the animals drawing the same

Every person driving or having the care or charge of any wain, waggon, van, cart, or dray, which shall be drawn by any horse or other animal, and driven or guided by reins, who shall wilfully allow the horse or other animal drawing the same to proceed out of walking pace.

The owner of every such wain, waggon, van, cart, dray, as last above mentioned, who shall allow the same to be driven through the said Municipal District without having his name and place of abode painted in full length on the off side legibly, at least two inches high and proportionably broad, in white letters on a black ground.

The driver or person in charge of any such cart as aforesaid who shall refuse to give his and the owner's name and address, or shall give a false or fictitious name of himself or the owner, or of the place of abode of either of them.

Placards, &c.

Every person who shall paste or otherwise affix any placard or other paper upon any wall, house, building, fence, or enclosure, or who shall chalk or paint, or in any other manner mark or disfigure such wall, house, building, fence, or enclosure, unless with the consent of the owner thereof.

Offences against decency, &c.

31. Any person who shall offend against decency by exposure of his or her person, in any street or public place within the said Municipal District, or in the view thereof, shall on conviction forfeit and pay for every such offence a sum not exceeding ten pounds nor less than five pounds.

Houses of ill-fame.

32. Upon representation of any respectable ratepayer that any house or premises within the said Municipal District, and near to the residence of such ratepayer, is of ill-fame, it shall be lawful for the By-law Committee to cause the residents of such house or premises to furnish to the Council a list of the names, ages, sexes, and occupations of all the inmates of the

said house or premises, and upon non-compliance with such request, or if upon consideration the said Committee consider the house to be one of ill-fame, they shall, with the sanction of the Council, declare the same to be a nuisance, and shall cause a notice in writing to be served upon the holder of such house or premises, or any person resident or being therein, to discontinue or abate the said nuisance within forty-eight hours after the receipt of such notice. And if such nuisance be not so abated, the holder of such house or premises, or other person residing or being therein and acting as such holder, shall be liable to be proceeded against for such nuisance, and shall on conviction thereof forfeit and pay any sum not less than two pounds nor more than twenty pounds, and if such nuisance shall not be abated within forty-eight hours after such conviction, such holder of such house, or such other person residing or being therein as aforesaid, shall forfeit and pay for such second offence, a sum of not less than five pounds nor more than fifty pounds. And if a further period of forty-eight hours shall elapse after such second conviction without the abatement of such nuisance, such holder of such house or other person residing or being therein as aforesaid, shall for such third offence pay any sum not less than ten pounds nor more than fifty pounds.

New cemeteries.

33. No person or persons shall open any new cemetery or burial ground within a distance of one hundred yards from any existing cemetery or burial ground within the said Municipal District.

Graves and vaults.

34. Every grave or vault shall be of the depth of seven feet at least, and not less than seven feet distant from any other grave or vault, and not more than two adults shall be interred in one grave within the said Municipal District.

Bodies not to be interred within certain distances, &c.

35. No body shall be interred in any existing cemetery now opened for burials within the distance of one hundred feet from any public building, place of worship, school-room, dwelling-house, public pathway, street, road, or place whatsoever, within the said Municipal District, and no body shall be interred in any new cemetery that may be hereafter opened within the said distance of one hundred feet from any such public building, place of worship, school-room, dwelling-house, public pathway, street, road, or place whatsoever, within the said Municipal District.

Hours for interments.

36. No interment shall take place before the hour of 8 a.m. nor after the hour of 5 p.m., within the said Municipal District.

Burials contrary to By-laws, &c.

37. Any person or persons having the charge of any cemetery, or other person or persons who shall knowingly inter, or cause to be interred, any body within the said Municipal District contrary to the provisions of those By-laws, or otherwise commit a breach of any of them, shall for every such offence be liable to a penalty not exceeding fifty pounds nor less than five pounds, and for every subsequent offence to any penalty not exceeding the first mentioned amount nor less than ten pounds.

Noisome and offensive trades.

38. No person shall carry on any noisome or offensive trade within the said Municipal District, so as to injure or be a nuisance, as hereinafter stated to the inhabitants thereof.

Boiling-down establishments, &c.

39. Any manufacture, trade, calling or operation, in the conducting, following, or carrying on of which, or in consequence of, or in connection therewith, or from the premises where the same is conducted, followed, or carried on, any gas, vapour, or effluvia, or any large quantities of smoke shall be evolved or discharged, which gas, vapour, effluvia, or smoke shall be calculated to injure animal or vegetable life, or the boiling-down or steaming of a carcass or part of a carcass of any animal, slaughter-house refuse, offal, bones, or the keeping of stacked bones under ammoniacal process, or the letting off of any liquid, steam, or vapour from any boiling-down whereby any such manufacture, trade, calling, operation, steaming, boiling-down of any carcass, part of a carcass, refuse, offal, the letting off of any gas, liquid, steam, or effluvia from bones, or other vapour emanating from any process, liquid, or decomposed matter or substance whatsoever, shall cause an offensive smell, or in any other way to injure or be a nuisance to the inhabitants or to any portion of the inhabitants of the said Municipal District, or to people passing through the said Municipal District, shall be considered a noisome and offensive trade within the meaning of those By-laws and, generally, anything that by definition of law can be held or construed to be a nuisance within the meaning of the Municipal Act of 1867, or otherwise according to the principles of common law on which the Municipal law is based, shall be deemed a nuisance, and it shall be in the power of the Council to cause inquisition,

and the Inspector of Nuisances or other officer appointed by the Council for that purpose may take legal proceedings for the abatement of the same, and the party or parties offending therein, for every such offence as aforesaid, shall be liable to any penalty not exceeding fifty pounds nor less than twenty-five pounds.

Boiling-down, hog-sties, &c., Council may indict.

40. In case any boiling-down, privy, hog-sty, sink, cess-pool, yard or enclosure, or any matter or thing which shall at any time be in any place within the said Municipal District shall be or become a nuisance, it shall be lawful for the Council, after due investigation, by notice in writing, to order the removal of the said nuisance within seven days after such notice shall have been given to the owner or occupier of the premises wherein such nuisance is situated, or shall have been left for such owner or occupier at his or her last or usual place of abode, or on the said premises, and every such owner or occupier refusing or neglecting to remove or abate such nuisance pursuant to such notice and to the satisfaction of the Council, shall forfeit and pay any sum not exceeding fifty pounds nor less than five pounds.

PART IV.

Erection of house, fee for permission, &c.

1. No person shall be permitted to erect any house, shop, or other building, in any street, lane, or place within the said Municipal District, without first serving seven days notice in writing on the Mayor or Council Clerk before commencing the same, stating his intention, and describing the proposed situation of the building or erection, and every owner of, and every contractor for, such house, shop, or other building, or any part thereof, commencing to build or work thereon without such notice having been given, and shall at the time the said notice is given as aforesaid, pay unto the Council Clerk a fee of five shillings for permission to erect any fence or any such house, shop, coach-house, stables, or other detached buildings to be so erected on any premises, street, lane, or other place within the said Municipal District, shall forfeit and pay for every such offence any sum not exceeding forty shillings nor less than five shillings.

Pipes, gutters, &c.

2. It shall not be lawful for any person to carry by means of pipes, gutters, or other contrivances, any rain water from the roof of his or her premises or house upon any of the footways of any street or public place within the said Municipal District, and any owner or occupier of any such house or premises who shall neglect or refuse to remedy or remove any such pipes, gutters, or contrivances when required to do so by any officer of the said Council, shall on conviction forfeit and pay any sum not exceeding two pounds nor less than five shillings: Provided that the owner or occupier of any such premises or house may convey any such rain water by means of pipes laid under the surface of any such footways into the gutter adjoining the same, subject to the approval of the Improvement Committee.

Private drains, &c.

3. It shall not be lawful for any person without notice to the Council, or otherwise according to such plans and directions as such Council may make and give, to make or branch any private drain or sewer into any of the public drains or sewers, or into any drain or sewer communicating therewith, and in case any person or persons shall make or branch any private drain or sewer into any of the said drains or sewers, or into any drain or sewer communicating or to communicate therewith, without such notice or otherwise than as aforesaid, every person so offending shall for every such offence forfeit and pay any sum not exceeding fifty pounds, nor less than two pounds.

Drains to be kept clean.

4. All drains or sewers communicating with any public drain or sewer shall from time to time be repaired and cleansed under the inspection and direction of the Council, at the costs and charges of the occupiers of the houses, buildings,

lands, and premises to which the said private sewers or drains shall respectively belong, and in case any person shall neglect to repair and cleanse, or cause any such private drains or sewers to be repaired and cleansed according to the direction of the said Council, he or she shall forfeit and pay for every such offence any sum not exceeding five pounds nor less than one pound.

Storm water overflowing on pathways, &c.

5. Every owner or occupier of land in, adjoining to, or near to any street, if such land shall be so situated that surface or storm water from or upon the same shall overflow, or shall tend naturally, if not otherwise discharged, to overflow any footway of any such street, shall within seven days next after the service of notice by the Council for that purpose, construct and lay from such point upon such land being near to the footway as shall be specified in such notice by plan appended or otherwise, and higher in level than the bottom of the channel at the outer edge of the footway, to the said channel, and through, under, and transversely to the footway, and keep in good condition a good and sufficient covered drain or trunk, subject to the inspection of the Council or its proper officers, and in default of compliance with any such notice within the period aforesaid, or with the provisions of this section, such owner or occupier shall forfeit and pay a sum not exceeding five pounds nor less than forty shillings. And if within seven days after such conviction such owner or occupier shall still have failed to comply with such notice or otherwise in default as aforesaid, he or she shall forfeit and pay any sum not less than one pound nor more than ten pounds, and for every further such offence he shall forfeit and pay any sum not less than two pounds nor more than twenty pounds. And every such owner or occupier who shall still have made default as aforesaid for more than seven days after such second or any future conviction, shall be held guilty of a further offence within the meaning of this section.

Horses fastened to back or sides of vehicles, &c.

6. Any person who shall fasten, tie, or allow to be fastened or tied, any horse or horses to the back or sides of any dray, cart, or other vehicle, while moving or otherwise in any street, road, or public place within the said Municipal District, shall forfeit and pay any sum not exceeding two pounds nor less than five shillings for every such horse so fastened or tied as aforesaid, and for every subsequent offence, any sum not exceeding five pounds nor less than ten shillings; and the person found in charge of such horses, dray, cart, or other vehicle, shall be the person against whom proceedings shall be taken under these By-laws.

PART V.

Interfering with officer.

Any person or persons who shall obstruct any officer of the said Council while in the performance of his duty, or who shall interfere with any officer of the said Council doing, or performing, or going to perform, or returning from the performance of any duty or act under these By-laws, by using any threats, offensive language, hinderance, or insulting language towards the said officer, in any street, road, or other place within the said Municipal District, shall forfeit and pay for every such offence a penalty not exceeding twenty pounds nor less than two pounds.

Construction of Terms.

In the construction of the foregoing By-laws the provisions of the Act 16 Victoria No. 1, shall be applied so far as the same may be applicable.

Made and passed by the Municipal Council of the Municipal District of Leichhardt, in Council assembled, this 18th day of December, 1879.

(L.S.) JOHN YOUNG,
Mayor.

WALTER BEAMES, Council Clerk.

1879-80.

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF HAY—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 5th June, 1880.

MUNICIPAL DISTRICT OF HAY.

By-Laws.

THE following By-laws, made by the Council of the Municipal District of Hay for the prevention of fires, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

MUNICIPAL DISTRICT OF HAY.—BY-LAWS FOR THE PREVENTION OF FIRES.

1st. No person shall make or knowingly permit to be made any fire in the open air nearer than 25 feet to any building or fence, except in properly constructed fireplaces or furnaces, under a penalty not exceeding ten pounds nor less than one pound.

2nd. Any person throwing hot ashes or live coals nearer to any buildings or fences than 25 feet, shall be liable to a penalty not exceeding five pounds nor less than one pound.

3rd. Any person who willingly sets or causes to be set on fire any chimney-flue or stove-pipe shall be liable to a penalty not exceeding five pounds nor less than one pound.

4th. If any chimney accidentally catch or be on fire, the person occupying or using the premises in which such chimney is situated, shall forfeit a sum not exceeding forty shillings, provided always that such forfeiture shall not be incurred if such person prove to the satisfaction of the Justices before whom the case is heard, that such fire was in no wise owing to the omission, neglect, or carelessness, whether with respect to cleansing such chimney or otherwise, of himself or his servant.

Agreed to at a meeting of the Municipal Council held on the 29th day of January, 1880.

L.B.) ALLEN LAKEMAN,
Mayor.

1879-80.

NEW SOUTH WALES.

MUNICIPALITIES ACT OF 1867 AND NUISANCES
PREVENTION ACT, 1875.

(BOROUGH OF ORANGE—AMENDED BY-LAWS.)

Presented to Parliament, pursuant to Acts 31 Vic. No. 12, sec. 158, and 39 Vic. No. 14, sec. 18.

Colonial Secretary's Office,
Sydney, 29th May, 1880.

BOROUGH OF ORANGE.

AMENDED BY-LAWS.

THE following amended By-laws, made by the Council of the Borough of Orange, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867, and the Nuisances Prevention Act, 1875.

HENRY PARKES.

BY-LAWS to regulate, by means of Standing Orders, the proceedings of the Municipal Council of Orange, for the general good rule and government of the Municipality, and for the collection of rates, the prevention and abatement of nuisances, under the powers conferred by the "Nuisances Prevention Act of 1875," and other matters.

1. That the By-laws made and passed by the Municipal Council on the third day of November, 1868, under the powers for that purpose given by the "Municipalities Act of 1858," and those made and passed by the said Council on the twenty-eighth day of November, 1876, under the powers for that purpose given by the "Municipalities Act of 1867," so far as the same may now be in force, except as to any portion of such By-laws as repealed, any former By-laws made and passed under the said first mentioned Act shall be and the same are hereby repealed, and in lieu thereof the following shall be the By-laws of the Municipality of Orange.

Meetings of Municipal Council, and Duties of Mayor and Aldermen.

2. The Council shall meet at the Court House, or other place that may hereafter be appointed, within the Borough of Orange, at 7 o'clock p.m. on every alternate Tuesday, for the transaction of business, unless otherwise adjourned, subject, however, to the provisions of the Municipalities Act of 1867.

3. There shall be two half-yearly Meetings of the Council in the months of March and September, in each Municipal year, for the purpose of making up the accounts of the Municipality for the half-year respectively expiring in the preceding months of February and August in such year, and auditing the same.

4. The Mayor or presiding Alderman shall preserve order, and his decision on disputed points of order shall be final.

5. The Mayor or presiding Alderman may take part in all the proceedings of the Council.

6. When the Mayor or presiding Alderman is called upon to decide upon a point of order or practice he is to state the rules applicable to the case, without argument or comment.

7. The Mayor or presiding Alderman shall put all questions and declare the sense of the Council thereon.

8. If two or more Aldermen rise to speak at the same time the Mayor or presiding Alderman shall decide which alderman is entitled to pre-audience.

9. The Mayor or presiding Alderman may, without waiting for the interposition of any Alderman, call to order any Alderman proceeding to speak a second time on the same subject, except in the way of explanation only, or of reply by the mover of any motion then under consideration.

10. The Mayor or presiding Alderman shall on every motion made put the question first in the affirmative and then in the negative, and he may do so as often as may be necessary to enable him to form and declare his opinion from the show of hands as to which party has the majority.

11. Every Alderman shall enter his name and address in a book to be kept by the Council Clerk where summonses and other papers may be left for him.

12. Every Alderman present at any meeting shall record his vote openly upon all subjects.

Order of Business.

13. The business of the Council shall be taken in the following order:—

1. Reading, confirming, and signing minutes of last meeting.

2. Reading of copies of letters sent by authority of Council.

3. Reading of letters received, and considering and ordering thereon.

4. Reception and reading of petitions and memorials, but without discussion.

5. Reception and reading of reports from permanent and select committees, and ordering thereon.

6. Order of the day and adjourned motions.

7. Motions according to notice.

8. Payment of accounts and special payments.

14. All motions shall be made and petitions presented by Aldermen in their places, and every Alderman shall stand when speaking and address the chair.

15. The order of the day shall include all business of which no notice has been given and all matters arising out of former meetings of the Council.

16. Any motion entered on the notice paper, and the Alderman having given notice of the same being absent, and no other Alderman having been deputed to bring forward such motion when the business is called on, shall be struck out of the paper.

17. Any number of amendments may be proposed on a motion before the Council, and when more than one amendment is moved, the question shall first be put on the last amendment, and then on the next preceding, and so on, in the reverse order in which they were moved; except when such motion or amendment shall relate to the acceptance of tenders, the fixing of salaries, or other matters of finance, in which case the lowest sum shall be put first, then the next lowest, and so on to the highest.

18. It shall not be necessary for any motion to be seconded.

19. Motions for adjournment shall be put without discussion, and if negatived it shall not be competent for any Alderman to make a similar motion until half an hour shall have elapsed.

20. Motions to rescind or to vary a former vote of the Council shall not be moved without express notice for the purpose given in writing at least four days previous to the meeting at which it is intended to move the same.

Notices of motion.

21. The Council Clerk shall enter in a book, to be kept for that purpose, to be called the "Notice Book," all notices of motion in the order in which they are received.

Petitions.

22. No discussion shall take place on the presentation of any petition without notice of motion given after its reception.

23. It shall be incumbent on any Alderman presenting a petition to acquaint himself with the language thereof, and to report to the Council that he considers it unobjectionable in that respect.

24. All petitions shall be received only as the petitions of the parties signing the same.

Committees and their reports.

25. No Committee shall consist of less than three members of the Council, which number shall form a quorum.

26. The mover of any motion for a Committee shall be a member thereof, and at all meetings of such Committee, the Mayor, if a member, shall preside, or if he be not a member then such Alderman shall preside as a majority of the members of the Committee shall have appointed permanent Chairman thereof, and in the absence of the Mayor or the permanent Chairman respectively, such Chairman as the members present shall appoint shall preside.

27. No report of any Committee shall be adopted unless due notice of motion for that purpose be given after its reception.

28. The rules of the Council shall be observed in a Committee of the whole Council except the rule limiting the number of times of speaking.

Order of debate.

29. Any Alderman proposing a motion or amendment, or discussing any matter, shall not be interrupted, unless by a call to order, when he shall sit down, the Alderman calling to order shall then be heard, and the question of order decided before the subject is resumed or any other business proceeded with.

30. Any Alderman proposing a motion or any amendment must state the nature of it before addressing the Council.

31. Except in Committee, no Alderman shall speak twice on the same question unless in explanation, when he has been misrepresented or misunderstood: Provided, however, that the mover shall be allowed to reply, and that every Alderman shall have the liberty of speaking once on every amendment as well as on the original motion.

32. No Alderman shall digress from the subject under discussion, nor shall he speak upon any motion or amendment for a longer period than fifteen minutes without the consent of the Council.

33. A debate may be adjourned to a later hour of the same evening, or to another day to be specified.

34. The Alderman upon whose motion any debate shall be adjourned by the Council, shall be entitled to pre-audience on the resumption of the debate.

35. It shall be competent for any Alderman to divide the Council on any question, both in full Council and Committee, and the Mayor or presiding Alderman shall take the division in the usual way, by show of hands; and the names given by the Mayor or presiding Alderman to the Council Clerk shall be taken down by him and recorded.

36. All divisions of the Council shall be entered in the Minute Book.

37. Any Alderman using offensive or abusive language towards any other Alderman, or persisting in speaking when requested by the Mayor or presiding Alderman to desist, or refusing to sit down when called to order by the Mayor or presiding Alderman, shall forfeit and pay for every such offence a sum of money not being less than five shillings nor exceeding five pounds.

The Estimate.

38. No work affecting the expenditure of the funds of the Municipality shall be undertaken until an estimate of the cost thereof shall have been laid before the Finance Committee, reported thereon at the next meeting, and approved of by the Council.

39. A Committee or Surveyor shall in all cases be appointed to inspect the work performed, as soon as completed, and on the written approval of such Committee or Surveyor the same shall be paid for.

40. It shall be lawful for any ratepayer at any time previous to any tender for work being accepted, to petition the Council in support of or against the expenditure on account of such contract.

Officers.

41. The Council Clerk shall have the custody of the Common Seal and of all books, charters, deeds, muniments, and records of the Corporation, or relating to the property thereof.

42. The Treasurer's cash-book and the Banker's pass-books shall be laid before the Council at all its sittings.

By-laws.

43. That no new By-law shall be proposed at any meeting unless notice in writing has been duly given, and no new By-law, amendment, or repeal shall be finally passed at the meeting at which it is first proposed.

44. That not less than seven days shall intervene between the meeting at which the new By-law, amendment, or repeal shall be proposed and the meeting at which the same shall be passed by the Council.

45. That any proposed new or amended By-law, or repeal of any existing By-law, shall be filed in the Council Clerk's office, for the inspection of the Aldermen or inhabitants of the Borough, from the time at which it is proposed until the meeting at which it is to be finally adopted.

46. Any one or more of the By-laws of the Council may be suspended *pro tempore* in cases of emergency, if notice of the intended motion for that purpose be given to the Council Clerk four days previous to the day of meeting at which such motion shall be intended to be made, and the majority of the Aldermen present agree thereto, or, without such notice, if the whole of the Aldermen present at such meeting agree thereto.

Miscellaneous Regulations.

47. All contracts for Municipal works shall be by tender, or otherwise, as the Council may see fit.

48. No Alderman or officer of the Council shall be surety for any contractor or officer of the Municipality.

Collection of Rates.

49. That if necessary a duly qualified person shall be appointed for the collection of the Municipal rates, and the remuneration shall be an agreed per centage upon the actual amount collected by such officer from the ratepayers.

50. That such rates shall be collected by half-yearly instalments.

51. The Collector of such rates for the time being, if appointed, shall be Bailiff for the Municipality, and, in the meantime, until such Collector be appointed, a proper person shall be appointed as Bailiff.

52. The Collector, if appointed, shall, in accordance with the provisions of the Municipalities Act of 1867, collect the rates, when made, from the ratepayers, and shall from time to time report the result of his collection to the Council, and shall execute all warrants for distress, or take such proceedings for enforcing payment of the said rates, if in arrear, as the Mayor, or any person who may for the time being be duly authorized to perform the duties of that office, shall direct.

53. The Collector, if appointed, shall keep such books required for the collection of rates as shall be furnished him by the Council Clerk, and shall produce the same for the inspection of any ratepayer at any reasonable time.

54. All levies and distresses shall be made under warrant in the form of the schedule hereunto annexed, and marked with the letter A, under the hand of the Mayor, or any person who may for the time being be duly authorized to perform the duties of that office.

55. The Bailiff shall be paid for every levy made by him under these By-laws, the fees mentioned in the schedule hereunto annexed, and marked B.

SCHEDULE A.

Warrant of Distress.

I, _____, Mayor of the Borough of Orange, do hereby authorize you _____, the Bailiff of the said Borough, to distrain the goods and chattels in the dwelling-house (or in and upon the land and premises) of _____, situate in _____ street, Orange for _____, being the amount of rates due to the Corporation of the said Borough to the _____ day of _____, for the said dwelling-house (or other premises, as the case may be), and to proceed thereon for the recovery of the said rates according to law.

Dated this _____

18

Mayor.

SCHEDULE B.

Fees to Bailiff.

For making entry and inventory, three shillings; if in possession more than five hours, three shillings additional; and for every subsequent day while in possession, five shillings per day, and five per cent, upon the net proceeds of sale, with actual costs of advertisements (if any).

Prevention and Extinguishing Fires.

56. It shall be lawful for the Mayor, upon the representation of one or more householders, that fire is being used to the danger of contiguous buildings, to cause a notice in writing to be served upon or left at the residence of the owner or occupier of the premises on which any such fire may exist, and direct (if the urgency of the case should require it) that the said fire should be extinguished at once, or within any reasonable time afterwards which he might deem expedient.

57. In every case in which it shall be made to appear to the satisfaction of any two Justices of the Peace that the chimney of any house or building within the limits of the Municipality has taken fire from the occupier of any such house or building having omitted to cause the chimney of such house or building to be regularly and sufficiently swept and cleaned, or from any other neglect of such occupier, or of his or her servants or servant, such occupier shall, on conviction before any two Justices of the Peace, forfeit and pay for every such offence any sum not exceeding forty shillings, to be recovered as provided by section 193 of the Municipalities Act of 1867, and in every such case the proof that any such chimney did not take fire through the neglect of such occupier in not having the same regularly and sufficiently swept or cleaned, shall be upon such occupier.

Care and management of the public Roads and Streets and public thoroughfares of the Borough.

58. Whenever any footways shall have been marked out, the Surveyor or person acting for him may, with the sanction of the Council, cause the same to be levelled and made as nearly as practicable of equal height and breadth, and with an equal slope and inclination, and for this purpose may remove any flagging, steps, or other matter, or thing that may injure or obstruct the said footway, or render it unequal or inconvenient, and which now is or may hereafter be erected or placed on the space marked out for any of the said footways.

59. The Surveyor or person acting for him may at any time by order of the Council cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same, or for any necessary purpose, and any person or persons offending against this By-law, either by travelling on, or by removing or destroying any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty not exceeding five pounds for every such offence.

60. No person shall be allowed to obstruct any pathway, road, street, or public thoroughfare within the Municipality by building materials, drays, carts, goods, merchandise, or anything whatsoever calculated to obstruct or hinder free passage, without the sanction of the Mayor, in writing; and no person shall be allowed to leave waterholes or excavations for cellars or other purposes unfenced, or in such a manner as to be dangerous to passers-by; and at all places where buildings are being carried on, or where any obstruction to the danger of passers-by exists, the person causing such obstruction shall be required to provide lights on either side, and keep the same lighted from sunset to sunrise.

Trespassers and removal of Nuisances, &c.

61. No person shall form, dig, or open any drain or sewer, in any public road, street, lane, or thoroughfare, or shall cut up the surface of any such road, street, lane, or thoroughfare upon any pretence whatever, without leave in writing from the Mayor.

62. No person shall be allowed to throw rubbish, sweepings, or deposits of any kind whatsoever on the streets, pathways, or gutters of the Municipality.

63. No driver, carter, or other person shall wilfully or negligently do or suffer, or cause to be done, any damage or injury to the kerb-stones, gutters, or pathways of any street or roadway; and no person shall be at liberty to drive a wheeled vehicle of any kind, or ride or drive, lead or stand, any horse or horses, or other animals, on the pathways within the Municipality.

64. Any person who shall form, dig, or open any drain or sewer on any part of the reserves, roads, streets, or thoroughfares of the Municipality, or who shall remove, or caused to be removed, any turf, loam, clay, sand, soil, gravel, stone, or other material from any reserve, creek, road, street, or thoroughfare within the Municipality, without leave in writing first had and obtained from the Council, or who shall break up or otherwise damage any part of the said reserves, roads, streets, or thoroughfares, shall, on conviction before any two Justices of the Peace, forfeit and pay for every such offence a sum not exceeding two pounds.

65. Any person who shall damage any building or other public property belonging to, or in possession of, the Council shall pay the costs of repairing the same, such costs to be recovered summarily in the manner provided for the recovery of penalties under these By-laws; and, if the same be wilfully done, shall, on conviction before any one or more Justices of the Peace, forfeit and pay a sum not exceeding ten pounds. And it shall be lawful for any Constable to seize any person whom he shall find in the act of wilfully committing any such offence, and to convey such person to the nearest watch-house, there to be detained until he or she can be brought before a Justice of the Peace to be dealt with according to law.

Throwing filth on carriage or footway, driving, nuisances, &c., on footways.

66. If any person shall, on any street or road, throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or to remain, any ashes, rubbish, offal, dung, soil, dead animal, blood, or other filth or annoyance, or any matter or thing, in or upon the carriage-way or footway of any such street or road, or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other cattle in or so near to any of the said streets or roads as that any blood or filth shall run or flow upon or over, or be on, any such carriage or footway, or shall run, roll, drive, draw, place, or cause, permit, or suffer to be run, rolled, driven, drawn, or placed upon any of the footways of such streets or roads any waggon, cart, dray, or other carriage, or any wheelbarrow, or any truck or cask, or shall wilfully lead, stand, drive, or ride any horse or other beast upon any of the footways aforesaid: Every person so offending, upon conviction before any two Justices of the Peace, or upon the view of any such two Justices, shall forfeit and pay a sum not exceeding forty shillings for every such offence.

Suppression of nuisances and houses of ill-fame.

67. No householder or resident shall be permitted, under a penalty of a sum not exceeding two pounds, to allow his or her premises, yards, closets, or drains, to be offensive or a nuisance to the neighbouring householders or residents.

68. No noisome or offensive trade shall be permitted, under a penalty of a sum not exceeding ten pounds, to be carried on in any premises to the inconvenience or annoyance of the residents of neighbouring or adjoining houses or premises.

69. Any owner or occupier of any house or place who shall neglect to keep clean all private avenues, passages, yards, and ways within the said premises, so as by such neglect to cause a nuisance by offensive smell or otherwise, shall forfeit and pay upon conviction before any two Justices of the Peace, a sum not exceeding forty shillings for every such offence.

70. For preserving the cleanliness of the said Municipality and the health of the inhabitants thereof, it shall be lawful for the Inspector of Nuisances or any other officer appointed by the Council, by any writing under the hand of the Mayor from time to time, or when as often as he or the Council shall see occasion, to visit and inspect the butcher's shops or shambles, and to give such directions concerning the cleansing such shops and shambles, both within and without, as to him or the said Council shall seem needful, and any butcher and the owner or occupier of any shops or shambles who shall obstruct or molest any such officer in the inspection thereof, or who shall refuse or neglect to comply with such directions within a reasonable time, shall, upon the view of any two Justices of the Peace, or on conviction on the complaint of any such officer, for every such offence forfeit and pay a sum not exceeding two pounds.

Swine, horses, goats, &c., not suffered to wander about the streets.

71. It shall not be lawful for any person whatsoever, to suffer any kind of swine, or any horse, ass, mule, sheep, or goat, or other animal belonging to him or her, or under his or her charge, to stray or go about, or to be tethered or depastured in any road, street, or public place, and any person who shall so offend, shall forfeit and pay in respect of every such animal a sum not exceeding two pounds.

Hog-sties and nuisances not removed on complaint.

72. In case any hog-sty, boiling-down, or any other matter or thing, which shall at any time or times hereafter be in any place within the said Municipality, shall be or become a nuisance, it shall be lawful for the said Council upon complaint thereof to them made by any of the inhabitants, and after due investigation of such complaint, by notice in writing, to order that such hog-sty, boiling-down, or other matter or thing being a nuisance, shall be remedied and removed within fourteen days after such notice shall have been given to the owner or occupant of the said premises wherein such nuisance shall exist, or shall have been left for such owner or occupier at his or her last or usual place of abode, or on the said premises, and every such owner or occupier neglecting to remedy or remove such nuisance pursuant to such notice, and to the satisfaction of the Council, shall on conviction forfeit and pay a sum not exceeding ten pounds for every such neglect or disobedience.

Drawing and trailing timber, &c.

73. If any person shall haul or draw, or caused to be hauled or drawn, upon any part of the streets, roads, or public places within the said Municipality, any timber, stone, or other thing otherwise than upon wheeled carriages, or shall suffer any timber, stone, or other thing which shall be carried principally or in part upon wheeled carriages, to drag or trail upon any part of such streets or public places, to the injury thereof, or to hang over any part of such carriage so as to occupy or obstruct the street or road beyond the breadth of the said carriage; every person so offending shall upon conviction forfeit and pay for every such offence a sum not exceeding two pounds over and above the damages occasioned thereby.

Wells to be covered over, &c.

74. Every person who shall have a well situated between his dwelling-house or the appurtenances thereof and any road, street, or footway within the limits of the said Municipality, or at the side thereof, or in any yard or place opened or exposed to such road, street, or footway, shall cause such well to be securely and permanently covered over; and if any person having such well as aforesaid shall fail to cover and secure the same within twenty-four hours after notice in writing shall have been given to him or her by any officer of the said Council, or shall have been left for such person at his or her usual or last known place of abode, or on the said premises, shall, on conviction before any two Justices of the Peace, forfeit and pay the sum of two shillings and sixpence for every day that such well may remain open or uncovered contrary to the provisions hereof.

Enclosures around scaffolding.

75. If any person shall dig or make, or cause to be dug or made, any hole, or leave, or cause to be left, any hole in or adjoining to any street, road, or public place, for the purpose of making any vault or vaults or the foundation or foundations of any house or other building, or for any other purpose whatsoever, and shall not forthwith enclose the same in a good and sufficient manner, or shall keep up, or cause to be kept up and continued any such enclosure for any time which shall be longer than shall be reasonably required, or shall not when thereunto required by the said Council or its officer well and sufficiently fence or enclose any such hole within twenty-four hours after he shall be required to do so by the said Council or officer, and in the manner and with such materials as they or he shall direct, and to their or his satisfaction, and shall place a light upon the said enclosure, and and keep the same constantly burning from sunset to sunrise, during the continuance of such enclosure, or shall fail to place or erect a fence, rail, or boarding around any scaffolding or ladder that may be required during the repairs or erection of any building (such fence, rail or boarding, not to extend beyond the footway of any street), or fail to keep during the existence of such fence, rail, or boarding, a light burning from sunset to sunrise at each corner of the same; then and in every such case the person so offending shall, on conviction before any two Justices of the Peace, forfeit and pay for every such offence, and for every such refusal or neglect, a sum not exceeding five pounds.

Erections &c., in front of public streets, roads, &c.

76. No person shall build, erect, put up, or remove or cause to be built, erected, put up, or removed, any building, house, shop, warehouse, wall, or fence fronting any public street, road, or thoroughfare, unless he shall have previously given notice of his intention to commence such works to the Mayor or the Council Clerk of the Municipality; and any person so offending shall, upon conviction before a Justice of the Peace, pay for every such offence a sum not exceeding ten pounds.

Slops, Nightsoil, &c., to be conveyed away at certain hours, &c.

77. It shall not be lawful for any person or persons to drive, or cause to be driven, any cart or other carriage with any nightsoil or ammoniacal liquor therein, through or in any of the streets or roads of the Municipality between the hours of five o'clock in the morning and ten o'clock at night, or to fill any cart or other carriage so as to turn over or cast any nightsoil, ammoniacal liquor, slop, mire, or channel dirt, or filth in or upon or near to any of the said streets or public places, and in order to prevent nuisances it shall not be lawful for any person to deposit nightsoil, ammoniacal liquor, or other offensive matter, nearer to any street, road, or dwelling-house, than shall be directed by the said Council or their officer, and all nightsoil or other offensive matter shall be removed within the hours before prescribed in properly covered and watertight carts or other vehicles; and no vehicles used for this purpose shall be allowed to stand on any premises nearer to any road, street, or dwelling-house than shall be directed by the Council or their officer; and every person offending against this By-law shall for every such offence forfeit and pay a sum of five pounds. And in case the person so offending cannot be apprehended, then the owner of such cart or carriage in which such nightsoil,

ammoniacal liquor, slop, filth, mire, or channel dirt, shall be put or placed, and also the employer of the person so offending shall be liable to, and forfeit and pay such penalty as aforesaid.

Interrupting free passage, &c.—Driving on wrong side of the road &c.

78. If the driver of any waggon, wain, cart, or dray, of any kind shall ride upon any such carriage in any street as aforesaid, not having some person on foot to guide the same (such carts as are drawn by one horse and driven or guided with reins only excepted), or if the driver of any carriage whatever shall wilfully be at such a distance from such carriage or in such a situation whilst it shall be passing upon such street that he cannot have the direction and government of the horse or horses or cattle drawing the same; or if the driver of any waggon, cart, dray, coach, or other carriage whatsoever, meeting any other carriage, shall not keep his waggon, cart, dray, coach, or other carriage, on the left or near side of the road, street, or thoroughfare, or if any person shall in any manner wilfully prevent any other person or persons from passing him or her, or any carriage under his or her care, upon such street, or by negligence or misbehaviour, prevent, hinder, or interrupt the free passage of any carriage, or person in or upon the same; every such driver or person so offending shall, upon conviction before any Justice of the Peace, forfeit and pay a sum not exceeding two pounds, and it shall be lawful for any constable to seize and convey any person so offending, before any Justice of the Peace, to be dealt with according to law.

Furious or careless driving, &c.

79. Any person who shall ride or drive through or upon any road, street, or public place, negligently, carelessly, or furiously, so as to endanger the life or limb of any person, or to the common danger of foot passengers, shall, on conviction before any Justice of the Peace, forfeit and pay a sum not exceeding ten pounds.

Leading animals on footpaths, &c.

80. Any person who shall lead, drive, or stand, or permit to stand, or ride any horse or other animal upon any of the footways of any of the streets or roads of the Municipality, shall on conviction for every such offence before any Justice of the Peace, forfeit and pay a sum not exceeding two pounds.

Affixing placards on walls, &c., and chalking thereon.

81. It shall not be lawful for any person to paste or other, wise affix any placard or other paper upon any wall, house, building or fence, or by chalk or paint, or in any other manner, unless with the consent of the owner or occupier thereof; and every person who shall be guilty of any such offence shall, on conviction before any two Justices of the Peace forfeit and pay a sum of ten shillings.

Hours for cattle driving.

82. No person shall drive through any street or public thoroughfare of the Municipality any live stock between the hours of eight o'clock a.m. and six o'clock p.m. during the months of May, June, July, and August, nor between the hours of six o'clock a.m. and eight o'clock p.m. during the other months of the year, except any such as may be sent to the Orange Cattle Sale Yards for sale, and removed therefrom between the hours appointed by the By-laws made and passed and for the time being in force for the maintenance, regulation, and management of the said yards, and except calves and foals under the age of one year, quiet milch cows, horses, or cattle broken to draft or saddle and known as such, and pigs and goats; and any and every person or persons who shall drive or cause to be driven any live stock except those above enumerated, through any street or public thoroughfare of the Municipality between such hours, shall, on conviction for every such offence before any two Justices of the Peace, forfeit and pay a sum not exceeding five pounds.

Swine not to be kept.

83. It shall not be lawful for any person whomsoever to breed, feed, or keep any kind of swine in any house, building, yard, garden, or other hereditaments, situate and being in or within forty yards of any street or public place in the Municipality; and any person who shall so offend shall, on conviction before any two Justices of the Peace forfeit and pay for every such offence a sum not exceeding two pounds.

Open spaces and steps adjoining the footways to be enclosed.

84. Every owner or occupier of any house, building, or premises having an entrance area, garden, or other space open adjoining the footway of any street or public place within the Municipality beneath the level of the kerbstone or exterior edge of such footway, shall protect and guard the same by good and sufficient rails, fences, or other enclosures, so as to prevent danger to persons passing and repassing; and further, that every such owner or occupier of any such house, building, or other premises, having any steps adjoining or upon the footway of any street or public place, shall in like manner protect and guard the same by rails or other enclosures, so as to prevent the like danger to persons passing and repassing; and in failure thereof every such owner or occupier shall, upon conviction for every such offence before any two Justices of the Peace, forfeit and pay a sum not exceeding five pounds.

Carrying carcases of newly slaughtered meat, &c.

85. Every person who shall carry or convey, or cause to be carried or conveyed, in any street or public place within the said Municipality, the carcase or any part of the carcase of any newly slaughtered animal without a sufficient and proper cloth covering the same for the concealment from public view, shall, upon conviction for every such offence before any two Justices of the Peace, forfeit and pay a sum not exceeding two pounds.

Rain not to be carried to footways.

86. It shall not be lawful for any person whomsoever to carry by means of pipes, gutters, or other contrivances, any rainwater from the roof of his or her premises or house, nor permit or suffer any rainwater to drop from the roof of his or her premises or house upon the surface of any part of the footways of any street or public place within the Municipality; and any owner or occupier of any such house or premises who shall neglect or refuse to remedy or remove any such pipes, gutters, or contrivances when required to do so by any Municipal officer, shall, on conviction before any two Justices of the Peace, forfeit and pay any sum not exceeding five shillings for every day that the same shall not be remedied or removed: Provided that the owner or occupier of any such house or premises may convey any such rainwater by means of pipes laid under the surface of any such footways into the gutters adjoining the same; and provided also that all such pipes shall be laid down to the satisfaction and under the superintendence of the Town Surveyor or some other person appointed by the Council.

Penalty for interference with servant of Council removing obstructions or encroachments.

87. Any person who shall wilfully obstruct or interfere with the Surveyor or other officer as aforesaid, or with any person or persons acting for or under him in the exercise of any of the duties or powers by these By-laws imposed or cast on the said Surveyor or officer, or who shall wilfully obstruct or interfere with any servant or servants of the Council in the exercise of the powers given to the Council, or in carrying out any orders lawfully given by the Council under the provisions of section one hundred and forty of the "Municipalities Act of 1867," shall, on conviction before any two Justices of the Peace forfeit and pay a penalty of not exceeding ten pounds.

Placing carriages, stalls, goods, &c., on footways.

88. Any person who shall set or place, or cause or permit to be set or placed, any erection or other obstruction of any kind whatsoever in or upon any carriage or foot way in any street or public place within the said Municipality; or shall hang out or expose, or shall cause or permit to be hung out or exposed, any meat or offal, or other thing or matter whatsoever, from any house or other building or premises, over any part of any such footway or carriageway, and shall not immediately remove all or any such erections, obstructions, matters or things on being thereunto required by the Inspector of Nuisances, or other proper officer of the Council, shall, upon conviction before any two Justices of the Peace, for every such offence, forfeit and pay a sum not exceeding two pounds: Provided that nothing herein contained shall be deemed to prevent any person from placing an awning by permission of the Council in front of his or her shop or house in such manner as that such awning shall be at least nine feet above the height of the footway, and that the posts be placed close up to the kerbstone or outer edge of such footway.

Damaging public buildings, &c.

89. Any person who shall damage any public building, or other public property, shall pay the costs of repairing the same, such costs to be recovered in a summary manner before any two Justices of the Peace, and if the same be wilfully done, shall, in addition to such cost of repair, forfeit and pay a penalty of not exceeding twenty pounds.

Discharging firearms.

90. Any person discharging firearms without lawful cause, or letting off fireworks in any street or public place, shall, on conviction before any two Justices of the Peace, forfeit and pay a penalty of not exceeding five pounds.

Indecent exposure.

91. Any person who shall offend against decency by the exposure of his or her person in any street or public place, within the said Municipality, or in the view thereof, shall, on conviction for every such offence, before any two Justices of the Peace, forfeit and pay a sum not exceeding ten pounds.

Injuring or extinguishing lamps.

92. Any person who shall be convicted of wantonly or maliciously breaking or injuring any lamp or lamp-post, or extinguishing any lamp set up for public convenience within the limits of the said Municipality, shall, over and above the necessary expense of repairing the injury committed, to be estimated by the Justices before whom such offender shall be brought, forfeit and pay upon conviction before any two Justices of the Peace, for every such offence, a sum not exceeding five pounds.

Carrying goods, &c., on footway.

93. Every person who shall carry goods or any frame to the annoyance of any person upon the footway of any road, street, lane, or thoroughfare, or other public footway, within the Municipality, shall, on conviction before any two Justices of the Peace, forfeit and pay a sum of money for every such offence not exceeding two pounds.

Inspector of Nuisances may enter shop, &c., for certain purposes.

94. The Inspector of Nuisances for the said Borough may, and he is hereby empowered at all reasonable times, with or without assistants, to enter into and inspect any shop, building, stall, or place kept or used for the sale of butchers' meat, and to examine any animal, carcase, meat, or flesh which may be therein, and in case any animal, carcase, meat, or flesh, appear to him to be intended for food of mankind, and to be unfit for such food, the same may be seized; and if it shall be made to appear to any two Justices of the Peace, upon the evidence of a competent person, that any such animal, carcase, meat, or flesh, is unfit for the food of mankind, he shall order that the same be destroyed, or be so disposed of as to prevent its being exposed for sale or used for such food; and the person to whom such animal, carcase, meat, or flesh belongs, or in whose custody the same is found, shall, on conviction thereof before any two Justices of the Peace, be liable to a penalty not exceeding ten pounds for every animal or carcase, piece of meat, or flesh so found.

Slaughtering in unlicensed premises.

95. If any person or persons shall slaughter or cause to be slaughtered any animal in any house or place within the Municipality not licensed for such purpose according to law, such person or persons shall, on conviction before any two Justices of the Peace, forfeit and pay a sum of money not exceeding ten pounds for each and every animal so slaughtered.

Animals slaughtered for home consumption.

96. Nothing in these By laws contained shall extend to or affect any person or persons slaughtering at his, her, or their own residences within the said Municipality, animals for the personal consumption of himself, herself, or themselves, or for his, her, or their family, servants, or labourers: Provided that the place where any such animal so slaughtered be not less than fifty yards from any street or other public place, or from any residence other than the residence of the person or persons so slaughtering as in the By-law aforesaid mentioned.

Public reserves, gardens, or other public places of amusement or recreation

97. The gardens and other public places of amusement and recreation under the management or control of the Council and herein called "The Gardens," shall be open every day.

98. No person shall pluck any of the flowers, or walk on the beds or borders, or climb upon or get over the fences, or remove any of the tallies, or disturb, damage, or destroy any property or thing in the gardens.

99. No person shall carry firearms through the gardens, or shoot, snare, or destroy any wild fowl either in the gardens or in or on any water adjacent thereto, or bathe in any such water.

100. No cart or other vehicle used for the conveyance of goods shall, without the authority of the proper officer of the Council, be driven through the gardens.

101. Such plants, seeds, or cuttings as are commonly purchasable at nurseries in New South Wales, shall not be supplied from the gardens to any person unless in exchange, or for public institutions, or for benevolent purposes.

102. No visitor shall interrupt the gardeners or labourers by conversation or otherwise, or shall use any abusive, improper, or unbecoming language to any person in the gardens, or otherwise annoy any such person.

103. Children under the age of ten years not being under the control of some competent person, shall be removed from the gardens.

104. All dogs and goats and all poultry found within the gardens shall be destroyed, and the owner shall make compensation for any damage done.

105. Any person offending against By-laws numbered from 98 to 105, both inclusive, shall on conviction before any two Justices of the Peace for the first offence, forfeit and pay any sum not exceeding five pounds; for the second offence, any sum not exceeding ten pounds; and for a third and every subsequent offence any sum not exceeding twenty pounds; and any person may on committing any such offence be forthwith removed from the gardens by the proper officer of the Council, or by any of the gardeners or labourers employed in such gardens, without affecting the liability of such person so offending to be subsequently prosecuted for such offence.

By-laws under the "Nuisances Prevention Act of 1875."

106. Every person about to erect a closet or form a cesspit shall before he commence any such work, give to the Council Clerk seven days notice in writing of his intention and of the proposed position of such closet or cesspit, and in default thereof, or in case of his commencing such work without such notice, he shall be liable to a penalty not exceeding twenty pounds nor less than one pound.

107. No closet shall be erected, or cesspit formed, except in such position as shall be approved of by the Council or their authorized officer, such closet or cesspit to stand at least twenty feet from any dwelling-house or factory, where practicable.

108. All the closets where the dwelling-house consists of more than (3) three rooms shall be built with cesspits of not less than (4) four feet by (3) three feet clear, internal measure, and not less than (4) four feet or more than (6) six feet below the ground surface, and the top of every cesspit shall not be less than (6) six inches higher than the highest part of the ground immediately adjoining it. Every such closet shall be provided with a flue or ventilating shaft at least (9) nine inches by (6) six inches, and shall reach from the cesspit to the roof.

109. Every closet shall have a manhole of the clear internal dimensions (2) two feet (3) three inches by (2) two feet outside the walls of the closet, and connected with the pit as shown on the drawing exhibited at the Council Chambers, and constructed of the same material specified for the construction of the soil pit, and covered closely with such material as the Council may approve of.

110. The walls of every cesspit shall be built of brick or stone laid in cement, of a thickness if of brick, not less than (9) nine inches, and if of stone, not less than (12) twelve inches, and shall be cemented ($\frac{3}{4}$) three-quarters of an inch thick inside at the bottom and on the walls, and the walls and bottom shall be puddled with clay on the exterior surface to the depth of (6) six inches at least, in such a manner as to make it watertight to the satisfaction of the Council or their authorized officer.

111. Every closet shall be built (7) seven feet high from the floor to the wall-plate of the roof, and shall not be less than (3) three feet (6) six inches wide, and (4) four feet (6) six inches long, and shall be provided with a door capable of being fastened from the inside, and shall have ventilating holes ($4\frac{1}{2}$) four and a-half inches wide, or a window that will open.

112. When two or more closets adjoin each other, there shall be a brick or stone dividing-wall of not less than (9) nine inches in thickness between every two closets, and each wall shall extend from the bottom of the cesspit to the roof of the closets, so as to affect a complete separation.

113. A separate closet shall be provided for each tenement, and a breach of this By-law shall make the owners or occupiers of any premises upon which there shall be a joint closet, liable to a penalty not exceeding (£20) twenty pounds, nor less than (£1) one pound.

114. The place of deposit for night-soil shall be upon land to be obtained by the Council for the purpose.

115. That all night-soil shall be removed in a water-tight vehicle by the servants of or contractors with the Council, between the hours of eleven o'clock in the evening and five o'clock in the morning.

116. The Inspector of Nuisances or other officer appointed by the Council may visit or inspect any premises, or do any work authorized by the "Nuisances Prevention Act of 1875," on all days except Sundays and public holidays, betwixt the hours of ten o'clock in the morning and four o'clock in the evening, and he shall at once report to the Council of any existing nuisance coming under his notice.

117. Any person desirous of erecting an earth closet, or any other improved plan of closet, shall be at liberty to do so after giving notice of his intention to the Council or authorized officer, subject to the Council's approval, but all night-soil shall be removed therefrom at least once in four days, and buried in the earth.

118. Every person shall be at liberty to use on his own premises all night-soil collected thereon from any earth closets, but if any nuisance shall arise therefrom he shall be liable to a penalty not exceeding twenty pounds, nor less than one pound.

119. No person shall be at liberty, without the permission of the Council, to use on his own premises any night-soil brought from elsewhere.

120. If any alteration shall be requisite in the opinion of the Inspector of Nuisances or other officer appointed by the Council, for preserving public health or decency in the case of any existing cesspit or closet, he shall report the same to the Council, and if they consider such cesspit or closet injurious to health, or through soakage, drainage, or otherwise opposed to decency by exposure or otherwise, the same shall be altered, within fourteen days of notice being given, by the owner or occupant of such premises. Should they neglect or refuse to do so, the same shall be done by the Inspector of Nuisances, or other person or persons authorized by the Council, and the cost of such alteration shall be paid by the owner or occupier of such premises whereon the same may be.

121. The Council may recover, and the owner or occupier of the premises shall pay, such sums for the emptying of cesspits as may be decided upon from time to time by resolution of the Council.

Interpretation Clauses.

122. The words "Municipality" or "Municipality of Orange" (where necessary) shall be deemed to apply to, and shall be taken to be included in every clause of these By-laws, whether the same shall be expressly mentioned or not, and no objection shall be taken or allowed by reason of the absence of such words or any or either of them in any part of these said By-laws. And where anything is directed to be done, or prohibited from being done, whether in any road, street, lane, or thoroughfare, or other public place, or in any manner whatsoever, howsoever, or by whomsoever, the same shall be taken to mean within the Municipality of Orange, anything herein contained to the contrary notwithstanding.

123. Any words in these By-laws appearing in the singular number shall be taken to include the plural number, and any words in the plural number shall be taken to include the singular number, and any words in the masculine gender shall be taken to include the feminine gender, and *vice versa*.

124. The word "animal" shall for the purpose of these By-laws be held to include cattle, sheep, pigs, calves, and lambs, and the words "die of any disease" shall be held to apply to all cases of death, other than death caused by killing or slaughtering.

125. All penalties imposed under these By-laws may be sued for, and recovered in a summary way before any two Justices of the Peace.

126. All words occurring in the foregoing By-laws made and passed under the "Nuisance Prevention Act of 1875," which also occur in that Act, shall have the like meanings assigned to them as are provided in the 4th Section of the same Act.

Made and passed by the Municipal Council of Orange, this sixth day of January, in the year one thousand eight hundred and eighty.

(L.S.) JAMES TORPY,
Mayor,

GEORGE TOWSON,
Council Clerk.

1879-80.

NEW SOUTH WALES.

MUNICIPALITIES ACT OF 1867 AND NUISANCES
PREVENTION ACT OF 1875.

(BOROUGH OF BATHURST—BY-LAWS.)

Presented to Parliament, pursuant to Acts 31 Vic. No. 12, sec. 158, and 39 Vic. No. 14, sec. 18.

Colonial Secretary's Office,
Sydney, 21st October, 1879.

THE following By-laws, made by the Council of the Borough of Bathurst, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867 and the Nuisances Prevention Act of 1875.

HENRY PARKES.

THAT the owners or occupiers of all enclosed lands within the Municipality shall keep such lands free from the Bathurst burr, the Scotch thistle, and other noisome weeds, failing which after notice the said owners or occupiers shall be subject to a penalty of not more than £5 nor less than 10s.

Standing Committees.

30. Besides such Special Committees as may from time to time be found necessary, there shall be four standing Committees, viz.—a By-Law Committee, a Finance Committee, an Improvement Committee, and a Lighting Committee.

Rates to be paid at Office of Council Clerk.

54. All persons liable to pay any rates as aforesaid, shall pay the amount thereof within the time prescribed by the Act into the office of the Council Clerk during office hours, that is to say, every Monday, Tuesday, and Thursday, between the hours of 10 a.m. and 1 p.m. and 2 p.m. and 4 p.m.

Bailiff to appoint Deputy.

62. The Bailiff, with the permission in writing of and signed by the Mayor or any Alderman who may for the time being be duly authorized to perform the duties of that office, may employ any person or persons to act temporarily as his deputy or deputies and assistant or assistants in carrying into effect any distress warrant: Provided always that in such case the Bailiff shall be held responsible for the acts and omissions of all and any such persons so employed by him.

Cost of distress.

63. There shall be payable to the Bailiff for the use of the Council, for every levy and distress made under these By-laws, the costs and charges as follows:—

	s.	d.
Distress warrant	1	0
Levying distress and making inventory	1	6
Man in possession each day or part of a day ...	5	0
Advertising (whatever amount has been paid) and 5 per cent. on the net proceeds of the goods.		

Driving carriages or throwing filth on footways.

81. Any person who shall throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or to remain, any ashes, rubbish, offal, dung, soil, dead animal, blood, or other filth, surface water, or annoyance, or any matter or thing, in or

upon the carriage-way or foot-way of any street or other public place in the said Borough; or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other animal, in or so near to any such street or other public place as that any blood or filth or surface water shall run or flow upon, or over, or be on any or either of any such carriage or foot way; or shall run, roll, drive, draw, place, or cause, permit, or suffer to be run, rolled, driven, drawn, or placed upon any of the said foot-ways of any such street or public place, any carriage, buggy, gig, dog-cart, waggon, cart, dray, sledge, or other carriage, or any wheel, wheel-barrow, hand-barrow, or truck, or any hogshead, cask, or barrel; or shall wilfully lead, drive, or ride any horse, ass, mule, or other beast upon any such foot-way, shall upon conviction forfeit and pay for the first offence a sum not exceeding forty shillings nor less than five shillings, for the second offence a sum not exceeding five pounds nor less than ten shillings, and for a third and every subsequent offence a sum not exceeding ten pounds nor less than one pound for each such offence.

Passed at a meeting of the Bathurst Borough Council, held on Friday, March 21st, 1879.

(L.S.) WM. BUTLER,
Mayor.

JNO. R. DURHAM,
Town Clerk.

BY-LAW respecting the Lighting of Vehicles.

That all vehicles plying for hire within the Borough of Bathurst after sunset shall be provided with a light on each side, and shall keep the same lighted till sunrise, if so long being driven. Every driver of any such vehicle shall, if he disregard the provisions of this By-law, be liable to a penalty not exceeding five pounds (£5), and not less than ten shillings (10s.)

Passed at a meeting of the Bathurst Council, held on March 21st, 1879.

(L.S.) WM. BUTLER,
Mayor.

JNO. R. DURHAM,
Town Clerk.

BY-LAWS under the powers conferred upon the Bathurst Borough Council by the "Nuisances Prevention Act of 1875."

1. Every person about to erect a closet or form a cesspit shall, before he shall commence any such work, give to the Council Clerk seven days' notice in writing of his intention, and of the proposed position of such closet or cesspit, and in default thereof, or in case of his commencing such work without such notice, he shall be liable to a penalty not exceeding £20, nor less than £1.

2. No closet shall be erected or cesspit formed, except in such position as shall be approved of by the Council or their authorized officer, such closet or cesspit to stand at least 20 feet from any dwelling-house or factory where practicable.

3. All closets where the dwelling-house consists of more than (3) rooms shall be built with cesspits not less than (4) four feet by (3) three feet clear, internal measure exclusive of the manhole hereafter mentioned, and not less than (4) four feet nor more than (6) six feet below the ground surface, and the top of every cesspit shall not be less than (6) six inches higher than the highest part of the ground immediately adjoining it.

4. Every closet shall have a man-hole of the clear internal dimensions (2) two feet (3) three inches by (2) two feet outside the walls of the closet, and connected with the pit as shown on the drawing exhibited at the Council Chambers, and constructed of the same material specified for the construction of the soil-pit, and covered closely with such material as the Council may approve of.

5. The walls of every cesspit shall be built of brick or stone of a thickness of not less than (9) nine inches, and shall be cemented (1) three-quarters of an inch thick inside at bottom and on the walls in such a manner as to make it perfectly watertight, to the satisfaction of the Council or their authorized officer.

6. Every closet shall be built (7) seven feet high from the floor to the wall-plate of roof, and shall not be less than (3) three feet (6) six inches wide, and (4) feet (6) inches long and shall be provided with a door capable of being fastened from the inside, and shall have ventilating holes (4½) four and a half inches wide, or a window that will open.

7. When two or more closets adjoin each other, there shall be a brick or stone dividing wall of not less than (4½) four and a half inches thickness between every two closets, and each wall shall extend from the bottom of the cesspit to the roof of the closets, so as to effect a complete separation.

8. A separate closet shall be provided for every tenement, and a breach of this By-law shall make the owners or occupiers of any premises upon which there shall be a joint closet liable to a penalty not exceeding (£20) twenty pounds or less than (£1) one pound.

9. The place of deposit for night-soil shall be upon (10) ten acres of land, situate on the town common and set aside by the Government for that purpose, or on any other place where the Council may appoint.

10. That all night-soil shall be removed in watertight covered vehicles by the servants of or contractors with the Council, between the hours of eleven o'clock in the evening and four o'clock in the morning. (See By-law No. 83).

11. The Inspector of Nuisances or other officer appointed by the Council may visit or inspect any premises, or do any work authorized by the "Nuisances Prevention Act of 1875" on all days except Sundays and public holidays, betwixt the hours of (10) ten o'clock in the morning and (4) four o'clock in the evening and he shall at once report to the Council of any existing nuisance coming under his notice.

12. Any person desirous of erecting an earth closet or any other improved plan of closet, shall be at liberty to do so after giving notice of his intention to the Council or authorized Officer, subject to the Council's approval, but all night soil shall be removed therefrom at least once in four days, and buried in the earth.

13. Every person shall be at liberty to use on his own premises all nightsoil collected thereon from any earth closets, but if any nuisance shall arise therefrom he shall be liable to a penalty not exceeding (£20) twenty pounds nor less than (£1) one pound.

14. No person shall be at liberty without the permission of the Council, to use on his own premises any nightsoil brought from elsewhere.

15. If any alteration shall be requisite, in the opinion of the Inspector of Nuisances or other Officer appointed by the Council for preserving public health or decency, in the case of any existing cesspit or closet, he shall report the same to the Council, and if they consider such cesspit or closet injurious to health, or through soakage, drainage, or otherwise, opposed to decency, by exposure or otherwise, the same shall be altered within fourteen days of notice being given by the owner or occupier of such premises. Should they neglect or refuse to do so, the same shall be done by the Inspector of Nuisances or other person or persons properly authorized by the Council; and the cost of such alteration shall be paid by the owner or occupier of such premises whereon the same may be.

16. The Council may recover, and the owner or occupier of the premises shall pay, such sums for the emptying of cesspits as may be decided upon from time to time by resolution of the Council.

17. All words occurring in these By-laws, and which also occur in the "Nuisances Prevention Act, 1875," shall have the like meaning assigned to them as are provided in the 4th section of the same Act.

Passed at a meeting of the Bathurst Borough Council, held on Wednesday, the 13th November, 1878.

(L.S.) F. HALLIDAY,
Mayor.

J. STANLEY,
Acting Council Clerk.

1879-80.

NEW SOUTH WALES.

MUNICIPALITIES ACT OF 1867 AND NUISANCES
PREVENTION ACT 1875.

(BOROUGH OF TAMWORTH—BY-LAWS.)

Presented to Parliament, pursuant to Acts 31 Vic. No. 12, sec. 158, and 39 Vic. No. 14, sec. 18.

Colonial Secretary's Office,
Sydney, 3rd December, 1879.

The following By-laws made by the Council of the Borough of Tamworth, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867, and the Nuisances Prevention Act, 1875.

HENRY PARKES.

PART I.

Ordinary and Special Meetings.

1. The Council shall meet for the transaction of ordinary business on every alternate Tuesday, at 7-30 o'clock p.m., unless such day shall happen to be a public holiday. In the latter case the meeting shall be held on such other day as the Mayor may appoint. Special meetings may be called by the Mayor, or, in his absence, by any two Aldermen.

Election of Chairman in absence of Mayor.

2. If at any meeting of the Council the Mayor be absent, at the expiration of fifteen minutes after the time appointed for holding such meeting, the Aldermen then present (being a quorum), shall proceed to elect for themselves a Chairman for such meeting.

Business of Ordinary Meetings.

3. The following shall be the order of business of all meetings of the Council, other than Special Meetings :—

1. The minutes of the last preceding meeting be read, corrected if erroneous, and signed by the Mayor or other Chairman. No discussion to be permitted except as to whether the minutes are correct.
2. Correspondence to be read and orders made thereon, if expedient.
3. Petitions, if any, to be read and dealt with.
4. Reports from Committees and minutes from the Mayor to be presented, and orders made thereon.
5. Questions as to matters under the jurisdiction or within the official cognizance of the Council to be put and replied to, and statements as to any facts, matters, or circumstances requiring attention by the Council or any of the Committees or officers to be made. Sufficient notice of questions to be given. Answers not compulsory.
6. Motions of which notice has been given to be dealt with in the order in which they stand on the business paper.
7. Orders of the day to be disposed of as they stand on the business paper.

Provided that the Council may, by resolution without notice, entertain any particular motion out of its regular order on the business paper, and may in like manner direct that any particular motion or matter of business shall have precedence at future meetings.

Business at Special Meetings.

4. At special general meetings of the Council, the business—after the minutes shall have been read and signed, which shall be done in the same manner as at ordinary meetings—shall be taken in such order as the Mayor, or the Aldermen at whose instance such special meeting shall have been called, may have directed; and no other business shall be transacted.

Business paper for Ordinary Meetings.

5. The business paper for every meeting of the Council, other than special meeting, shall be made up by the Council Clerk not less than one nor more than three days before the day appointed for such meeting.

He shall enter on such business paper a copy or the substance of every notice of motion, and of every requisition or order as to business proposed to be transacted at such meeting, which he may have received or shall have been required or directed so to enter, in due course of law, and as hereinafter provided. Every such entry shall be made (subject to the provisions of section 3 of this "Part" of these By-laws) in the same order as such notice, requisition, or direction shall have been received, and a copy of such business paper shall be served or posted to all members of the Council.

Business paper for Special Meeting.

6. The business paper for each special meeting shall contain only such matters as shall have been specially ordered to be entered thereon by the Mayor or Alderman calling such meeting.

How business paper to be disposed of.

7. The business paper for each meeting of the Council shall at such meeting be laid before the Mayor or Chairman, who shall make a note upon such business paper of the mode in which each matter entered thereon has been dealt with, and such business paper so noted shall be a record of the Council.

Notices, &c., to be the property of the Council.

8. After the business paper shall have been made up as aforesaid, all notices of motion, requisitions, and directions as to which entries have been made thereon, shall be the property of the Council, and shall not be withdrawn, altered, or amended without leave having been first obtained from the Council for such withdrawal, alteration, or amendment.

Motions—how to be made.

9. Except by leave of the Council, motions shall be moved in the order in which they stand on the business paper, and if not so moved or postponed, shall be struck from such business paper, and shall be considered to have lapsed.

Absence of mover.

10. No motion of which notice shall be entered on the business paper shall be proceeded with in the absence of the Alderman by whom such notice shall have been given, unless by some other Alderman producing a written authority for that purpose from such first mentioned Alderman.

Motion to be seconded.

11. No motion in Council shall be discussed unless and until it be seconded.

Amendment may be moved.

12. When a motion or amendment shall have been made or seconded, any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed unless and until it be seconded.

Motions and amendments to be in writing.

13. No motion or amendment shall be discussed until it shall have been reduced into writing.

Only one amendment at a time.

14. No second amendment shall be taken into consideration until the first amendment shall have been disposed of.

Amended questions—further amendment may be moved thereon.

15. If an amendment be carried, the question amended thereby shall become itself the question before the Council, whereupon any further amendment upon such question may be moved.

How subsequent amendments may be moved.

16. If any amendment either upon an original question or upon any question amended as aforesaid, shall be negatived, then a further amendment may be moved, and so on: Provided that not more than one question and one proposed amendment thereof shall be before the Council at any one time.

Motions for adjournment

17. Any motion for adjournment, shall, if seconded, be put at once without discussion. If negatived, a similar motion shall not be made until half-an-hour has elapsed after moving the one that has been negatived.

Orders of the day.

18. The orders of the day shall consist of any matters other than motions on notice which the Council shall at a previous meeting thereof have directed to be taken into consideration, or which the Mayor shall have directed to be entered on the business paper for consideration.

How they are to be dealt with.

19. The Alderman who has the usual charge of, or who has previously moved in reference to the particular business to which any such order of the day relates, shall be the person called upon to move: Provided that, the Mayor may, as to any order of the day entered by his direction, move the same.

Petitions to be respectfully worded.

20. It shall be incumbent on every Alderman presenting a petition to acquaint himself with the contents thereof, and to ascertain that it does not contain language disrespectful to the Council; the nature and prayer of every such petition shall be stated to the Council by the Alderman presenting the same.

Petitions—How received.

21. All petitions shall be received only as the petitions of the parties signing the same.

How petitions to be dealt with.

22. No motion, other than for the reception of a petition, shall, unless as hereinafter provided, be permissible on presentation thereof, except that the same be referred to a Committee, or that its consideration stand an order of the day for some future meeting: Provided, however, that if any Alderman shall have given due notice of a motion in reference to the subject of any petition, or if the consideration of the subject of any petition shall have been made an order of the day, and such petition shall have been presented before such motion or order of the day shall have been called on, such order of the day or the said motion, if otherwise unobjectionable, shall be considered in order.

Correspondence.

23. The Mayor shall have the same duty in reference to letters addressed to the Council before directing the same to be read, as by section of this Part of these By-laws, is imposed upon Aldermen presenting petitions—if not read to be returned to the writer and reported to the Council. The Mayor shall direct as to the order in which all correspondence shall be read, and no letters addressed to the Council, or any of its officers, shall be presented or read by any Alderman. If the Mayor be absent, and shall not have examined any such letters, or have given any such directions as aforesaid, then the duties imposed by this section, shall devolve upon the presiding Alderman.

Section to apply to letters.

24. Section of this part of these By-laws shall be considered as fully applicable to letters addressed to the Council or any of its officers as to petitions.

Reports from Committees.

25. Every report from a Committee shall be in writing, and signed by the Chairman of such Committee, or, in his absence, by some other member of the same.

Mayor's Minutes.

26. The Mayor shall have the right of directing the attention of the Council to any matter or subject within its jurisdiction or official cognizance, by a minute in writing, signed by him.

How reports, &c., are to be dealt with.

27. No motion shall, unless as hereinafter provided, be permissible on the presentation of a report from a Committee or a minute from the Mayor, except that the same be received, or that it be received and its consideration stand an order of the day for some future meeting: Provided that if any Alderman shall have given due notice in reference to any such report or minute, or if the consideration of any such report or minute shall have been entered among the orders of the day, such order of the day or such motion, if otherwise unobjectionable, may be moved and considered in due course. And whenever any such report or minute embodies any recommendation which cannot legally be carried out without due notice, and it is desirable that such report or minute should be entered upon during the meeting of the Council at which such report or minute is presented, it shall be the duty of the Chairman or member of such Committee signing such report, or of the Mayor, as the case may be, to give or transmit to the Council Clerk such a notice of motion requisition as will enable the Council Clerk to make the necessary entry on the business paper, and to give such due notice.

Questions and statements.

28. No question or statement shall be allowed to be put or made which is inconsistent with good order.

Questions to be put without argument.

29. Every question must be put categorically, without any argument or statement of fact.

No discussion on question, &c., right of objection and of subsequent motion reserved.

30. No discussion shall be permitted as to any question, or as to any reply or refusal to reply thereto, or as to any statement at the time when such question is put, or such reply or refusal to reply is given, or such statement is made: Provided, however, that nothing herein contained shall prevent the taking of any objection as to any such question or statement being out of order, or shall prevent the discussion after due notice as hereinafter provided, of any matters properly arising out of or relating to any such question, or reply or refusal to reply, or any such statement as aforesaid.

Mode of addressing the Council.

31. Every Alderman who shall make or second any motion or shall take part in any debate or discussion, or shall put or reply to any question, or shall make any statement, or shall in any other way or for any other purpose address observations to the Council, shall, while doing so stand up in his customary place, unless he shall be prevented from so doing by reason of some bodily infirmity, and shall address himself to the Mayor or other Chairman then presiding: Provided that in the case of a question, such question may by permission of such Mayor or Chairman be put directly to the Alderman or officer to be questioned, and may be replied to in like manner. But in every such case, the question so put and the answer thereto, shall be subject to every legal objection on the ground of disorder or irrelevancy. And all members of the Council shall on all occasions when in such Council, address and speak of each other by their official designations, as Mayor, Chairman, or Alderman, as the case may be.

Speaker not to be interrupted.

32. No Alderman shall be interrupted while thus speaking, unless for the purpose of calling him to order as hereinafter provided.

Limitation as to number of Speakers.

33. Every mover of an original motion shall have a right of general reply to all observations which may have been made in reference to such motion, and to any amendments moved thereon, as well as a right to speak upon every such amendment. Every Alderman, other than the mover of such original motion, shall

have a right to speak once upon such motion and once upon every amendment thereon. No Alderman shall speak oftener than once upon any question other than a question of order, unless when misrepresented or misunderstood, in which case he shall be permitted to explain without adding any further observation than may be necessary for the purpose of such explanation.

Mover and Seconder.

34. An Alderman who has moved any motion or amendment shall be considered to have spoken thereon, but an Alderman who shall have seconded any such motion or amendment without any further observations than that he seconded the same shall be at liberty to speak once again on such motion or amendment.

Speaker not to digress, &c.

35. No Alderman shall digress from the subject under discussion, or shall make personal reflections on, or impute improper motives to, any other Alderman.

Adjournment of debate.

36. A debate may be adjourned to a later hour in the day, or to any other day specified, and the Alderman upon whose motion such debate shall have been so adjourned shall be entitled to pre-audience on the resumption of the same.

Mayor to decide as to pre-audience.

37. If two or more Aldermen shall rise to speak at the same time, the Mayor or Chairman shall decide which of such Aldermen shall be first heard.

Mayor to decide points of order.

38. The Mayor or Chairman shall preserve order, and his decision upon points of order or practice shall be final.

Mayor may address the Council.

39. The Mayor shall have the same right as any other Alderman to speak upon every subject or amendment.

Mayor may call a member to order.

40. The Mayor or Chairman may, without the interposition of any other member of the Council, call any Alderman to order whenever in opinion of such Mayor or Chairman there shall be a necessity for so doing.

Decision of points of order.

41. The Mayor or Chairman when called upon to decide points of order or practice shall state the provision, rule, or practice which he shall deem applicable to the case, without discussing or commenting on the same.

Motions out of order to be rejected.

42. Whenever it shall have been decided as aforesaid that any motion, amendment, or other matter before the Council is out of order the same shall be rejected.

How questions to be put.

43. The Mayor or Chairman shall put to the Council all questions on which it shall be necessary that a vote be taken, and shall declare the sense of the Council thereon.

Divisions—Penalty for refusing to vote.

44. Any Alderman may call for a division and the vote shall be taken by a show of hands, and the names and votes of the Aldermen present shall be recorded. Any Alderman present when a division is called for who shall not vote on such division, not being disabled by law from so voting, shall be liable for every such offence to a penalty of not less than five shillings nor more than two pounds.

Rules applicable to business in Committee.

45. Sections 12, 13, 14, 15, 16, 31, 32, 35, 37, 38, 39, 40, 41, 42, 43, and 44, of this part of these By-laws shall be taken to apply to the business in Committees of the whole Council, except that it shall not be necessary that any motion or amendment in Committee shall be seconded.

How call of Council to be made.

46. A call of the Council may be made by any resolution of which due notice has been given, for the consideration of any motion or matter of business before the Council.

Such call to be compulsory in certain cases.

47. No motion, the effect of which if carried would be to rescind any resolution, order, or decision of the Council, shall be entered on the business paper unless a call of the Council has been duly made and granted for such purpose.

Mode of proceeding.

48. The call shall be made immediately before the motion, or business for which such call has been ordered, shall be moved or considered. The Council Clerk shall call the names of all the members in alphabetical order; and if any members are absent, a record shall be made of such absence; but if leave of absence to any such member shall have been previously granted, or if such an excuse shall have been received in writing by the Mayor or Council Clerk as the majority of the Council then present shall consider satisfactory, such absent member shall stand excused, and a record shall be made of such excuse and of the reason for the same.

Penalty for absence.

49. Any member of the Council who, having had notice of the call, shall be absent without having been legally excused as aforesaid, and shall fail to show that, by reason of illness or other sufficient cause, he was unable to send an excuse in writing as aforesaid, or who, having answered to his name, shall not be present when a vote is taken on the motion or business as to which such call was made, shall for every such offence be liable to a penalty of not less than five shillings nor more than two pounds.

Standing and Special Committees.

Standing Committee.

50. Besides such special Committees as may from time to time be found necessary there shall be three standing Committees of the Council, each consisting of not less than three members, namely:—A Finance Committee, an Improvement (or Works) Committee, and a General Committee.

Finance Committee.

51. The Finance Committee shall examine and check all accounts, and shall watch generally over the collection and expenditure of the municipal revenues. They shall inquire and report from time to time as to all matters which they may consider to affect the finances of the said Municipality, and as to such matters or subjects of the like nature as they may be directed by resolution of the Council to inquire and report upon.

Improvement Committee.

52. The Improvement Committee shall have the general direction of all works ordered or sanctioned by the Council, and the general inspection of all streets, roads, ways, and other public places under the care and management of the Council. They shall also inquire and report from time to time as to such improvements or repairs as they may think necessary or as they may be directed by resolution of the Council to inquire and report upon.

Chairman of Committees.

53. Every Committee of which the Mayor shall not be a member shall elect a permanent Chairman of such Committee, who may direct the Council Clerk to call meetings whenever he shall think it desirable.

Cost of works to be estimated before undertaken.

54. No works affecting the funds of the Municipality, except as hereinafter is mentioned, shall be undertaken until the probable expense thereof shall have been first ascertained by the Council.

Cases of emergency and current expenses.

55. For emergent matters, and for necessary current expenses during the intervals which may elapse between the meetings of the Council, outlays to the following extent may be incurred:—

1. By order of the Improvement Committee, or of Mayor and one member of such Committee, for repairs or emergent works, to the extent of three pounds.
2. By order of the Mayor for necessary current expenses, to the extent of two pounds,

Completion of works to be reported by Improvement Committee.

56. No works undertaken by the Council shall be deemed to have been completed, and no order shall be made for the payment in full of the same, except upon a report or certificate to that effect from the Improvement Committee, except for emergent works as provided for in section 58 of this "Part" of these By-laws.

Common seal—how secured.

57. The seal shall be secured by a cover or box, which shall be kept at the Council Chambers in the custody of the Council Clerk. There shall be two locks to this cover, the key of one shall be kept by the Mayor, and the key of the other by the Council Clerk.

When and how Common Seal to be used.

58. The seal of the Council shall not be affixed to any document without the express authority of the Council, and every impression thereof so authorized shall be verified by the signature of the Mayor, or in case of illness or absence of the Mayor, by two Aldermen, and countersigned by the Council Clerk.

How books of account, &c., are to be kept.

59. All books, deeds, memorials, letters, documents, and other records of the Council, except as hereinafter mentioned, shall be kept at the Council Chambers in the custody and care of the Council Clerk, who shall be responsible for the safe custody of the same; but the Mayor may for any special purpose, authorize their removal.

Books &c., not to be shown or exposed without leave.

60. No member or officer of the Council shall be at liberty to show, lay open, or expose any of the books, papers, or records of the Council to any person not a member of the Council, without the written permission of the Mayor, unless as otherwise provided by law. Any member or officer who shall commit a breach of this section shall be liable on conviction to a penalty of not less than five shillings nor more than two pounds.

Records not to be removed.

61. Any person removing any such book, paper, or record from the Council Chambers without leave of the Mayor in writing first obtained, shall be subject to a penalty of not less than ten shillings or more than ten pounds. And nothing herein contained shall be held to affect the further liability of any person who shall have removed such book, paper, or record, and shall not have returned the same, to any action at law for the detention of such book, paper, or record, or to prosecution for stealing the same, as the case may warrant.

Penalty for defacing or destroying records.

62. Any person destroying, defacing, or wilfully or improperly altering any book, paper, or record, shall for every such offence be liable to a penalty of not less than five pounds nor more than twenty pounds.

Bonds for good conduct.

63. All bonds given by officers or servants of the Council for the faithful performance of their duties, shall be deposited in such custody as the Council may order; and no member, officer, or servant of the Council shall be received as a surety for any officer or servant.

Duties of Council Clerk.

64. The Council Clerk shall perform all duties which, by the Municipalities Act of 1867, or by the present or any other By-laws hereunder, he may be required to perform. He shall be Clerk of all Revision Courts held in the Municipal Borough under the provisions of the Municipalities Act. He shall also under the direction of the Mayor conduct all correspondence which may be necessary on part of the Council, and shall generally assist the Mayor in carrying out the orders of the Council and the duties of such Mayor.

Special powers of Mayor.

65. The Mayor may from time to time define the duties of all officers and servants of the Council, and shall exercise a general supervision over all such officers and servants; and may order the preparation of any such return or statement, or the giving of any such explanation or information, by any such officer or servant as he may think necessary; unless the Council shall have expressly forbidden or dispensed with the preparation of such return or statement or the giving of such explanation or information.

Drafts of intended By-laws.

66. A draft of any intended By-law shall lie on the table in the office of the Council at least seven days before such draft shall be taken into consideration by the Council, and shall be open to the inspection of any ratepayer who may desire to inspect the same.

Motions for rescission of previous orders.

67. Whenever a motion, the effect of which, if carried, would be to rescind any order, resolution, or vote of the Council, shall have been negatived, no other motion to the same effect shall be permissible until a period of three months shall have elapsed from the time of negativing such first mentioned motion.

Suits and prosecutions for penalties.

68. Suits or informations for the enforcement of penalties for or in respect of breaches of the Municipalities Act of 1867, or of any By-law made thereunder, or of any Statute, the operation of which may have been extended to the Municipality, shall be commenced or laid, as follows, viz.:—When against a member of the Council or any Auditor or any officer of the Corporation, by such officer as shall be named for that purpose by the Council; when against any other person, by the officer to whom the carrying out of the statutory provision or By-law imposing the penalty sought to be enforced has been entrusted; and if there shall be no such officer, then by such officer or person as shall be appointed for that purpose by the Council or the Mayor as the case may be, on directing such suit or information as aforesaid. And no such suit shall be brought or information laid as aforesaid against any member of the Council or Auditor, except by order of such Council; nor shall any similar proceeding be taken against any officer of the Council, except on the order of the Council or of the Mayor. And the conduct or prosecution of any suit or information may, on the order of the Council, or of the Mayor, be entrusted to an attorney.

Power to suspend, temporarily, any portion of these By-laws.

69. Any of the foregoing By-laws which relate to or affect the proceedings at Meetings of the Council may be suspended *pro tempore* without notice in cases of emergency, if all the members of the Council then present shall deem such suspension necessary.

PART II.

Collection and enforcement of Rates.

Rate when due and payable.

1. All rates levied and imposed by the Council shall be held to be due and payable on and after such day or days as the Council shall by resolution from time to time appoint.

Time and place of payment.

2. All such rates shall be paid at the Council Chambers during the hours appointed by the Council for that purpose.

Defaulters.

3. Every person not paying his or her rates as aforesaid within thirty days after the day so appointed for payment thereof, shall be deemed a defaulter, and it shall be the duty of the Council Clerk to furnish the Mayor from time to time with a list of the names of all persons so in default.

Mayor to enforce payment.

4. It shall be the duty of the Mayor to take proceedings to enforce the payment of all rates in default either by action at law or by issuing warrants of distress upon the goods and chattels of the defaulter.

Bailiff how appointed.

5. The Bailiff of the Municipal Borough shall be appointed by the Council, and may from time to time be removed by them.

Bailiff to find sureties.

6. The Bailiff shall find two sureties to the satisfaction of the Mayor, to the extent of (£50) fifty pounds each for the faithful performance of his duty.

Duties of Bailiff.

7. It shall be the duty of the Bailiff to make levies by distraint for the recovery of rates in the manner hereinafter provided.

Warrant of Distress.

8. All levies and distresses shall be made under warrant under the hand of the Mayor or any Alderman who may for the time being be authorized to perform the duties of that office, such warrant to be in the form or to the effect of the schedule hereunto annexed and marked A.

Inventory.

9. At the time of making a distress warrant the Bailiff shall make a written inventory in the form or to the effect of the schedule marked B, which inventory shall be delivered to the occupant of the land or premises or the owner of the goods so distressed, or to some person resident in the place where the distress shall be made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted in some conspicuous part of the land or premises on which the distress is made; and the Bailiff shall deliver a copy of such inventory to the Council Clerk.

Distress and sale, &c.

10. It shall be lawful for the Bailiff or his deputy and such assistants as he may take with him to enter into any part of the land, building, tenement, or other property in respect of which such rate or rates shall have been made as aforesaid, and to distrain the goods therein or thereon, and to remain in such building, tenement, or other property in charge thereof. And if the sum for which any such distress shall have been made or taken, together with the costs of such distraint, shall not have been paid on or before the expiration of two clear days, the Bailiff or his deputy may, between the hours of eleven in the morning and two in the afternoon, on the next day thereafter, cause the goods so distrained, or a sufficient portion thereof, to be sold by public auction, either on the premises or at such other place within the Municipal Borough as the Bailiff may think proper to remove them for such purpose, and shall pay over the surplus (if any) that may remain, after deducting the amount of the sum distrained for and the costs of such distraint, to the owner of the goods so sold on demand by such owner.

Goods may be impounded.

11. The Bailiff on making a distress as aforesaid may impound or otherwise secure the goods and chattels so distrained of what nature and kind soever, in such part of the land or premises chargeable with rate, or in such other place as shall be most fit and convenient for that purpose; and it shall be lawful for any person whosoever, after the expiration of two clear days as hereinbefore mentioned, to come and go to and from such part of the said land and premises where such goods or chattels shall be impounded and secured as aforesaid in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

Owner to direct order of sale.

12. The owner of any goods or chattels so distrained upon may, at his or her option, direct and specify the order in which they shall be successively sold, and the said goods or chattels shall in such cases be put up for sale according to such directions.

Proceeds of distress.

13. The Bailiff shall hand over to the Council Clerk, all proceeds of every such distress within twenty-four hours after having received the same.

Deputy.

14. The Bailiff may, with the sanction in writing of the Mayor, or in his absence with the sanction of any two Aldermen of the Municipal Borough, authorize by writing under his hand any person to act temporarily as his deputy; and the person so authorized shall have and exercise all the powers of the Bailiff himself, but the Bailiff and his sureties shall in every such case be responsible for the acts of such deputy.

Costs.

15. There shall be payable to the Bailiff for every such levy and distress made under these By-laws, the costs and charges in the Schedule hereunto annexed, marked C.

SCHEDULE A.

Warrant of distress.

I, _____, Mayor of the Municipality of the Borough of Tamworth, do hereby authorize you, _____, the Bailiff of the said Municipality, or your deputy, to distrain the goods and chattels in the dwelling-house or in or upon the land or premises of _____, situate at _____, for _____, being the amount of rates due to the said Municipality to the day of _____, for the said dwelling-house, land, or premises (as the case may be), together with the costs of this distraint, and to proceed thereon for the recovery of the said rates and costs according to law.—Dated this day of _____, 187 _____.

Mayor.

SCHEDULE B.

Inventory.

I have this day, by virtue of the warrant under the hand of the Mayor of the Municipality of the Borough of Tamworth, date _____, 187 _____, of which a copy is attached hereto, distrained the following goods and chattels, in the dwelling-house, or in or upon the land or premises of _____, situate at _____, within the said Municipality for _____, being the amount of rates due to the said Municipality to the day of _____, and also the costs of this levy.—Dated this day of _____, 187 _____.

Bailiff.

(List to be appended.)

SCHEDULE C.

Costs.

	s.	d.
For making an entry and inventory.....	2	6
For man in possession for period of not longer than two hours	5	0
For man in possession for every other day or part of day	5	0
For sale and delivery of goods one shilling in the pound on the gross proceeds of the sale, in addition to cost of advertisements (if any).		

PART III.

Preventing and extinguishing fires.

Fire or combustible material.

1. Every person who shall place, or knowingly permit to be placed, in any house, yard, workshop, out-office, or other premises within the said Municipality, fire, gunpowder, or combustible or inflammable materials of any kind, in such a manner as to endanger any buildings, shall, on conviction thereof, for every such offence forfeit and pay a penalty of not more than five pounds, and shall forthwith remove such fire, gunpowder, or combustible or inflammable materials; and for each and every period of twenty-four hours after such conviction, that such person shall suffer fire, gunpowder, or combustible, or inflammable materials to remain as aforesaid, such person shall be deemed guilty of a further offence against this By-Law.

Setting fire to matter without notice.

2. Any person who shall wilfully set fire to any inflammable matter whatever in the open air, within five yards of any dwelling-house or other building or boundary or dividing-fence within the said Municipality, without having given notice in writing to the occupiers of the land adjoining the land upon which such matter shall be of his intention so to do, or between the hours of six in the afternoon of any day and six in the morning of the following day, shall, for every such offence, forfeit a sum not exceeding five pounds.

Erecting brushwood fences, &c.

3. Every person who shall erect any fence of brushwood, bushes, or other inflammable material, or shall make or place any stack of hay, corn, straw, or other produce, or place as or for the covering any such stack any inflammable materials, so as to endanger any contiguous buildings or properties, or any trees, shrubs, or other produce thereof, or any chattels therein, shall forfeit, on conviction for every such offence, a penalty of not more than five pounds, and shall remove such fence, stack, or covering within a reasonable time after such conviction, and any person failing to remove such fence, stack, or covering within a reasonable time after any such conviction as aforesaid, shall be deemed guilty of a further offence against this By-law.

Fireworks.

4. Every person who shall discharge any firearms without lawful cause, or who shall light any bon-fire, tar-barrel, or fireworks upon or within ten yards of any public or private street or any public place, or shall sell gunpowder, squibs, rockets, or any other combustible matter by gas, candle, or other artificial light within the said Municipality, shall forfeit a sum not exceeding five pounds.

Wilfully setting fire to chimneys.

5. Any person who shall wilfully set or cause to be set on fire any chimney, flue, smoke-vent, or stove-pipe, herein called in common "chimney" within the said Municipality, shall forfeit a sum not exceeding five pounds: Provided always, that nothing herein contained shall exempt the person so setting or causing to be set on fire any chimney from liability to be proceeded against or prosecuted before any Criminal Court for such act as for an indictable offence.

Negligently suffering chimneys to be set on fire.

6. If any chimney accidentally catch or be on fire, the person occupying or using the premises in which such chimneys are situated, shall forfeit a sum of not exceeding forty shillings: Provided always, that such forfeiture shall not be incurred if such person prove to the satisfaction of the Justices before whom the case be heard that such fire was in nowise owing to the omission, neglect, or carelessness, whether with respect to cleansing such chimneys or otherwise, of himself or his servants.

Water-carts attending fires.

7. There shall be paid out of the funds of the said Municipality to the owner of every licensed water-cart, who shall have attended with any water at the place of any fire as herein provided, and deliver the same as required for the extinguishing such fire, such reasonable compensation as the Council shall by resolution have appointed in that behalf; and also to such owners of such carts as shall have first and second in order, attended with loads of water, such further sums by way of reward as the Council may by similar resolution have fixed.

PART IV.

Licensing Public vehicles.

1. From and after the 1st day of July, one thousand eight hundred and seventy-nine, no vehicle shall ply for hire, nor shall any person act as driver or conductor of any such vehicle within the Borough of Tamworth until and unless licensed for such purpose in the manner hereinafter mentioned, nor during the suspension or after the cancellation of such license as hereinafter provided.

2. Before any license for plying any vehicle, or for driving or conducting the same shall be granted, the party requiring such license shall obtain from the Council Clerk, free of charge, a requisition in the form of Schedule A hereto, or to the like effect and shall duly fill up and sign the same and deliver it to the Council Clerk, and shall also insert in such requisition in addition to the particulars set forth in Schedule A hereto, tables of rates and fares proposed to be charged by such party for any such vehicle.

3. The Mayor for the said Borough for the time being shall be and is hereby authorized to issue all such licenses in the name and on behalf of the said Borough Council, and the Mayor shall by indorsement on such license signify his approval of the scale of rates proposed to be charged for the hire of any such vehicle so licensed.

4. Licenses for proprietors, drivers, or conductors of vehicles shall be in the form of Schedule B hereto or to the like effect, and shall be made out, numbered, and registered by the Council Clerk.

5. Every license granted by the Mayor shall be signed by the Mayor and countersigned by the Council Clerk, and shall be in force until the thirty-first day of December next ensuing the date thereof, and no such license shall include more than one vehicle, and shall state the number of passengers such vehicle shall be permitted to carry.

6. For every vehicle license, and for every renewal thereof, there shall be paid to the said Borough Council the sum of two pounds annually, if the license be granted on or after the first day of January and on or before the thirty-first day of March in

every year, and if after that date, then in in the following proportions:—If on or before the thirtieth day of June the sum of thirty (30) shillings, if on or before the thirtieth day of September the sum of twenty (20) shillings, and if after that date the sum of ten (10) shillings.

7. For every conductor's or driver's license, and for every renewal thereof, there shall be paid to the said Borough Council the sum of five shillings.

8. The person or persons in whose name or names a license shall have been obtained shall be deemed the proprietor of the vehicle in respect of which such license shall have been taken out.

9. No license shall be granted to any person to drive any vehicle unless he be above seventeen years of age, nor to act as conductor unless he be fourteen years of age.

10. Any proprietor transferring or selling his licensed vehicle shall immediately give notice thereof to the Council Clerk, and the transferee or purchaser shall thereupon apply to have the license transferred to him, and shall sign his name in the books of the said Borough Council and on the license, and until this By-law shall have been complied with the transferor or seller shall remain liable as owner for breach of any of these By-laws, and no transferee or purchaser shall use such vehicle or allow it to ply for hire until the By-law shall have been so complied with.

11. No driver or conductor of any licensed vehicle shall lend or part with his license, nor shall the proprietor of any such vehicle employ an unlicensed person as the driver or conductor thereof.

12. Every proprietor, driver, or conductor of any vehicle, and every vehicle shall be deemed to be licensed under these By-laws on the production by the Inspector of the License Register Book containing a copy of any such license; and it shall not be necessary to call upon the person prosecuted to produce the original license to enable the prosecutor to give secondary evidence of its contents.

13. The license of the proprietor, driver, or conductor of any vehicle may be cancelled or suspended by the Mayor for the time being of the said Borough Council as he shall deem right (after three days notice in writing signed by the Council Clerk and served upon such proprietor, driver, or conductor, or left at his usual place of abode, calling upon him to show cause why such license should not be cancelled or suspended, and opportunity given such proprietor, driver, or conductor to show such cause), in case either the proprietor, driver, or conductor shall have been convicted of two offences against these By-laws committed within a period of six months next preceding.

14. Such person or persons as may from time to time be appointed by the said Borough Council shall be the Inspector or Sub-Inspector of all licensed vehicles plying for hire within the said Borough, and such Inspector or Sub-Inspector shall as often as he or they may deem necessary inspect all licensed vehicles, and also the harness and horse or horses or other animal or animals used in drawing the same; and if such vehicles, horse or horses, animal or animals shall in his or their opinion be unfit for public use he shall report the same in writing to the Mayor, who shall have power to suspend the license of such vehicle until such vehicle, harness, horse or horses or other animal or animals used in or drawing the same shall be in a fit state for public use, and it shall be the special duty of such Inspector at all times to see that as far as possible these By-laws are duly observed and enforced.

15. No proprietor, driver, or conductor of any vehicle, nor any other person, shall hinder or obstruct such Inspector or Sub-Inspectors in the execution of any of his or their duties.

16. The number of the license granted for every omnibus or car, in figures not less than four inches in height, and for every hackney carriage, cab, or buggy, in figures not less than two inches in height and of proportionate breadth, white upon a ground of black, shall be printed or painted outside on the panel of the door or doors of such vehicles, or on a plate or plates fixed thereon, and also upon each lamp used upon such vehicle as the Inspector may direct, and the proprietor of such omnibus or car, hackney carriage, cab, or buggy, shall keep such number on such panel of the door or doors, or on such plate or plates as aforesaid, legible and undefaced during the time such vehicle shall ply or be used for hire.

17. The number of the license of every omnibus or car, or hackney carriage, or cab, or buggy, on a card or plate six inches by three inches, printed or painted in clear legible figures, and the table of fares so indorsed by the Mayor upon such license as aforesaid, shall be affixed at the upper part of the front panel, or in such other place inside of such omnibus or car, or hackney carriage, or cab, or buggy, as the Inspector may direct, and the proprietor of such omnibus or car, hackney carriage, cab, or buggy, shall keep such card or plate so affixed and legible and undefaced during all the time the omnibus or car, hackney carriage, cab, or buggy shall ply or be used for hire.

18. No proprietor or driver of any licensed vehicle shall demand more than the several fares indorsed on the license of such vehicle.

19. No driver or conductor of any vehicle shall, whilst driving, loading, or unloading, or attending any vehicle, or whilst on any public stand wilfully or negligently do, or cause or suffer to be done, any damage to the person or property of any one, or be guilty of any breach of the peace, misconduct, or ill-behaviour, or be intoxicated, or make use of any threatening, obscene, indecent, profane, abusive, or insulting language, sign, or gesticulation, but shall at all times be sober and careful in the discharge of his duties.

20. Every driver whilst engaged in taking up or setting down any passenger, shall during such taking up or setting down place his vehicle as near as conveniently may be to that side of the street (and at a line with the kerbstone or edge of the foot-path) at which such taking up or setting down is required.

21. Every driver of any vehicle shall keep the same on the left or near side of the road, and shall permit any other vehicle to pass, having the right so to do, and when about to stop such driver shall raise his whip straight up so as to warn the driver of any vehicle that may be behind.

22. No omnibus shall pass another omnibus proceeding in the same direction if the latter be proceeding on its journey at a pace faster than a walk.

23. No licensed vehicle shall be drawn at a pace faster than that commonly known as trotting. And in the event of the conviction of any driver for a breach of this By-law his license shall be cancelled by the Mayor.

24. The proprietor of every vehicle shall, at all times when the same is plying or employed for hire, make and keep it clean, strong, and in good order in all respects, and if with windows they shall be sound and unbroken, with the leathers or lifts suitably attached to the frames. The horse or horses shall be able and sufficient for their work, free from disease, and properly broken in to harness; the harness for each horse shall be perfect, good, and sufficient for the purpose; and every driver or conductor shall be clean in his person, and wear a good hat and other clean and respectable clothes, and conduct himself in a proper and decorous manner.

25. No person suffering from an infectious or contagious disease shall ride in or upon any licensed vehicle, and no driver or conductor shall knowingly carry, or permit to be carried, any such person, or (except to some police office or watch-house) any corpse or any person in a state of intoxication, or who is so noisily or violently conducting himself, or otherwise so misbehaving as to occasion any annoyance or to disturb the public peace. And no passenger shall carry inside any vehicle any animal or any substance of an offensive character, or that might soil or damage the vehicle, or the apparel of other passengers; and no driver or conductor shall sleep in or upon any licensed vehicle, or use the same for eating his meals therein.

26. No driver of any vehicle shall carry more passengers than his vehicle is licensed to carry, nor shall the driver of any cab carry any passenger or other person on the driver's box or step behind the same, nor shall the driver or conductor of any omnibus or omnibus car permit or suffer any person, except the conductor, to be on the footsteps at the back of any such omnibus or omnibus car.

27. No driver or conductor shall smoke tobacco, cigars, or other thing, whilst driving or conducting any licensed vehicle engaged on any fare, nor shall any passenger smoke inside or on any vehicle without the permission of the driver, or against the wish of any passenger.

28. The driver and conductor of every licensed vehicle (if such vehicle has a conductor) shall be constantly attendant upon the same whenever standing, or whilst plying or engaged for hire.

29. Every licensed vehicle shall be provided with a lamp on each side of the same outside, and the driver of such vehicle, when plying for hire, between sunset and sunrise, shall light and keep such lamps lighted.

30. The driver of every omnibus and omnibus car, shall provide and keep a lamp properly lighted in such a position inside of every such licensed vehicle as the Inspector may direct, whenever such vehicle be plying for hire or engaged at any time between sunset and sunrise.

31. Every lamp used on the outside of any vehicle shall be such and so placed as to appear white on the front and outside and red behind.

32. When an application is made for a license for any other omnibus than those in use at the time of the passing of these By-laws, it shall be the duty of the Inspector to see that the fittings and furniture are complete, as detailed and provided for in the last preceding By-law, are properly affixed to such omnibus, and the Inspector shall not grant a certificate to any such omnibus unless it shall be of the dimensions set out in such By-law.

33. Any person having engaged any licensed vehicle and not paying the charge so endorsed as aforesaid upon the license of such vehicle when demanded, shall on conviction forfeit and pay the proprietor or driver of such vehicle such charge, together with such further sum for damages, costs, and expenses for loss of time or otherwise as the convicting Justices shall in their discretion think proper.

34. No vehicle which shall be let to hire by special agreement only, or only when bespoken at the stables or residence of its owner, and which shall never publicly ply for hire off the premises of its owner, shall be deemed a licensed vehicle within the meaning of these By-laws; nor shall the proprietor, driver, or conductor of such vehicle be subject to the provisions thereof in any respect whatever.

35. The word "vehicle" in the forgoing By-laws shall include and apply to every omnibus, car, hackney carriage, cab, or buggy. An omnibus shall mean a vehicle upon four wheels drawn by one or more horses, and a car shall mean a vehicle upon two wheels, for which omnibus licenses have been taken out, and a hackney carriage shall mean a vehicle upon four wheels drawn by two or more horses, and a cab shall mean a vehicle upon two wheels drawn by one horse, and a buggy shall mean a vehicle upon four wheels, drawn by one or more horses, plying for hire within the Borough of Tamworth; and in the construction of these By-laws any word importing the singular number shall be understood to include several persons or things as well as one person or thing, and any word importing the plural number, shall be applied to one person or thing, and every word importing the masculine gender shall extend and be applied to a female as well as a male.

36. For every offence against the provisions of these By-laws the offender shall be liable to and shall pay a penalty not exceeding ten pounds nor less than five shillings; and such penalty shall be recoverable before any two Justices in Petty Sessions according to the provisions of the Act fourteen Victoria number forty-three and the Acts therein adopted.

SCHEDULE A.

A Requisition for License.

To the Borough Council of Tamworth.

I, _____ residing in _____ Street do hereby request that a license may be granted _____ within the said Borough.

Dated the _____ day of _____, 187 .

SCHEDULE B.

License.

This is to certify that _____ is hereby licensed to _____ within the Borough of Tamworth, from the day of the date hereof to the thirty-first day of December next, subject nevertheless to all and every the By-laws, Rules, and Regulations in force relating thereto.

Given under the Common Seal of the Borough Council of Tamworth, this _____ day of _____ 187 .
Mayor.

PART V.

Public Exhibitors.

Exhibitions &c. to be licensed.

1. No exhibitions other than such as may be licensed under the provisions of the Act 14 Vic. number 23, or exhibitions of a temporary character, hereinafter especially provided for, shall be held or kept for hire or profit within the said Municipality, nor shall any bowling-alley or other place of public amusement, other than a place licensed as aforesaid, or a place for temporary amusement hereinafter specially provided for, be used as such for hire or profit within the said Municipality unless and until the same shall be duly registered as hereinafter prescribed.

Temporary license by Mayor - Penalty for exhibiting, &c., without license.

2. The Mayor may, by writing under his hand, permit any such exhibition as aforesaid, other than any exhibition requiring to be licensed under the said Act, for not more than one week, and in like manner and for a like time may allow any place to be used for purposes of public amusement other than for entertainments requiring to be licensed as aforesaid; and any person holding or keeping any such exhibition or using any place within the said Municipality for public amusement as aforesaid without such permission of the Mayor, shall forfeit and pay a sum of not less than one pound nor more than five pounds for every day that such exhibition shall be so held or kept at such place, shall be so used for public amusement as aforesaid.

Buildings, &c., to be registered.

3. Every occupier of any building or ground in which any exhibition is held or kept, or any public amusement conducted as aforesaid, shall in each year register at the office of the Council such building or ground, and a description of the exhibition or public amusement proposed to be kept, held, or conducted as aforesaid; and the name of such occupier, and every person who causes, and every occupier of any building or land who permits, any such exhibition or public amusement to be held, kept, or conducted for more than one week in or upon such building or land not registered for the purpose, or without having obtained a certificate of registration as hereinafter mentioned, shall forfeit and pay for every offence a sum not less than one pound nor more than ten pounds.

Certificate of registration, &c.

4. The Council, upon the written application of any such occupier as aforesaid stating the particulars aforesaid, may cause the aforesaid premises to be registered, and grant to the applicant a certificate of such registration, unless upon inspection the building or land shall be found to be unsuitable for the purpose of exhibition or amusement, or unless it shall appear to the Council that such exhibition is likely to entail any violation of public decency or endanger the public peace, or be a nuisance to any inhabitant of the Municipality.

Inspection.

5. Any officer or person appointed for that purpose by the Council may at all reasonable times enter into or upon and inspect any such building or land.

No exhibitions, &c., on Sunday, &c.

6. No such exhibition or place of public amusement as aforesaid shall be held or kept open or used for such public amusements on Sunday, Christmas Day, or Good Friday; and every person offending against this By-law shall on conviction forfeit and pay a sum not exceeding five pounds nor less than one pound for every such offence.

Registration fee, &c.

7. For every registration as aforesaid the occupier of the building or land so registered shall pay to the Council Clerk, for the benefit of the Municipality, a fee of one pound; and every such registration, whenever the same may be made, shall (subject to the power of suspension or cancellation herein contained) be in force until the 31st day of December thence next ensuing and no longer.

Suspension or revocation of license.

8. The effect of any such registration as aforesaid may be suspended, or such registration may be cancelled, as the Council shall think fit, for any of the following causes, namely:—

Whenever the occupier of any registered building or land, or the manager of any such exhibition or amusement as aforesaid held, kept, conducted, or carried on, in, or upon such building or ground, shall have been twice convicted of offences against these By-laws within a period of twelve months; or whenever it shall be shown to the satisfaction of the Council that the superintendent, director, manager, or other person in charge of any such exhibition or amusement is a confirmed drunkard; or that any such exhibition or amusement is being conducted in such a manner as to violate public decency, to endanger the public peace, or become a nuisance to any inhabitant of the said Municipality: Provided that before any such suspension or cancellation as aforesaid such occupier shall have notice that the Council is about to consider whether there shall be any such suspension or cancellation and of the causes for this proceeding, and shall be allowed to show cause against the same.

Gaming, cruelty to animals, &c., prohibited.

9. No license shall be granted as aforesaid to or for any building or land wherein or whereon any games with dice or other games of chance for money, or any bull-baiting, dog-fighting, cock-fighting, or other exhibitions or amusements opposed to public morality, or involving cruelty to animals, or likely to cause a breach of the peace, are proposed to be had, held, or carried on; and the occupier of any building or land so registered as aforesaid who shall permit any such game of chance, or exhibition, or amusement as are in the section beforementioned to be had, held, or carried on, in, or upon such building or land, shall for every such offence forfeit and pay a sum of not less than ten shillings or more than ten pounds.

Construction of term "Occupier." Change of occupancy.

10. Any person who shall superintend, direct, or manage, or shall be otherwise in charge of any such exhibition or public amusement as aforesaid in or upon any such building or land as aforesaid, or who shall reside in or upon any such building or land wherein or whereon any such exhibition or public amusement shall be held, kept, or carried on, or who, whether resident or not, shall use any such building or land for the purposes of any such exhibition or public amusement, shall be deemed the occupier of such building or land for all the purposes of these By-laws, shall be held to be as applicable in every case to any number of such occupiers as to any single occupier; and every such occupier whose name shall have been so registered as aforesaid shall be deemed and be taken to be and continue such occupier for all purposes of these By-laws: Provided that in event of any change in the occupancy of any such building or land as aforesaid the parties concerned shall notify the same in writing to the Council Clerk; and if after such inquiry as the Council may deem necessary an entry thereof shall be made in the Registry and a new certificate shall be issued, which (subject as aforesaid) shall be in force until the then next thirty-first day of December, and no longer; and for every such certificate a fee of five shillings

shall be paid to the Council Clerk for the benefit of the Municipality; and any person who shall make any false statement in any such notice or application as aforesaid as to any of the facts or particulars required by these By-laws to be stated in such application or notice shall for every such offence forfeit and pay a sum not less than one pound nor more than ten pounds.

PART VI.

Streets and Public Places, Public Health, Decency, &c.

New roads to be reported upon.

1. No new public road, street, way, or other place proposed to be dedicated to the public shall be taken under the charge or management of the Council until after such road, street, way, or place shall have been examined by the Improvement Committee or other Committee appointed for this purpose, and reported upon to the Council by such Committee.

Plan of proposed new road, &c., to be deposited.

2. Whenever any proprietor or proprietors of land within the Municipality shall open any road, street, or way, or lay out any place for public use or recreation through or upon such land, and shall be desirous that the Council shall undertake the care and management thereof, he or they shall furnish the Council with a plan or plans, signed by himself or themselves, showing clearly the position and extent of such road, street, way, or other place as aforesaid.

Dedication of new roads.

3. If the Council shall determine to take charge of any such road, way, or place as aforesaid, the plan or plans signed as aforesaid shall be preserved as a record of the Council, and the proprietor or proprietors shall execute such further instrument, dedicating such road, way, or place to public use or recreation as aforesaid as may be considered necessary by the Council, which said instrument shall be preserved as a record of the Council.

Who to mark out roads, &c.

4. The Surveyor of the Municipal Borough or other officer or person duly authorized by the Council in that behalf, shall be the proper officer for marking out when and where necessary the roads, streets, lanes, and thoroughfares, which now are, or shall hereafter be under or subject to the care, construction, or management of the Council, and the carriage or foot ways in each of such roads, streets, lanes, or thoroughfares.

No encroachment, &c.

5. No person shall be at liberty to encroach beyond the building-line in any street or lane by the erection of houses, verandahs, doorsteps, fences, or any other obstruction whatever, and all proprietors or lessors of houses within the Borough having a frontage to any main thoroughfare shall be bound to have the same sufficiently spouted with down-pipe to carry under the surface of the footway in the street gutter.

No balcony, &c.

6. No balcony shall be erected, unless the construction of the same shall have been approved by the Council.

Footways may be levelled.

7. When any footway shall have been marked out in manner herein directed, the surveyor or other person as aforesaid may cause the same to be levelled and made as nearly as practicable of equal height and breadth, and with an equal slope and inclination, and may remove any flagging steps or other matter, thing, or obstruction that may injure or obstruct the said footway or render it unequal or inconvenient, and which now is or may hereafter be erected or placed on the space marked out for the said footway.

The Improvement Committee to fix street level.

8. The Improvement Committee or any officer of the Council acting under the supervision of such Committee shall, subject to such orders as may from time to time be made by the Council in that behalf, fix and lay out the level of all public roads, streets, and ways, within the Municipality, and the carriage-ways and footways thereof: Provided that there shall be no change of levels in any such public road, street, or way, until the same shall have been submitted to and certified by the Council as hereinafter directed.

Change of street levels.

9. Whenever it may be deemed necessary to alter the level more than one foot of any such public road, street, or way as aforesaid, the Improvement Committee shall cause a plan and section showing the proposed cuttings and fillings, to be exhibited at the Council Chambers fourteen days for the information and inspection of the ratepayers, and shall notify by advertisement in some newspaper circulating within the Borough that such plan is open for inspection. At a subsequent meeting of the Council the said plan and section shall, if adopted, be signed by the Mayor or Chairman of such meeting and countersigned by the Council Clerk; and such plan and section so signed and countersigned shall be a record of the Council.

No turf, gravel, &c., to be removed from streets without permission.

10. Any person who shall form, dig, or open any drain or sewer, or remove, or cause to be removed, any turf, gravel, sand, loam, or other material in or from any part of the carriage or footway of any street or road, or any reserve or other public place within the Municipality, without leave first had and obtained from the Council or from the Mayor, or who shall wantonly break up or damage any such carriage or footway, shall on conviction forfeit and pay for every such offence a sum not exceeding five pounds nor less than one pound.

Temporary stopping of traffic for repairs, &c.

11. The Mayor or any officer or person acting under the authority of the Council may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same, or for any necessary purpose; and any person or persons offending against this By-law—either by travelling on such street, lane, or thoroughfare, or by destroying or removing any obstruction that may be placed thereon for the purpose of suspending the traffic—shall forfeit and pay a penalty and sum not exceeding five pounds.

Cellars or openings beneath the footways prohibited.

12. Any person who shall make any cellar or opening, door or window in or beneath the surface of the footway of any street or public place, unless the plans thereof have been previously submitted to and approved by the Council, and the erections and openings made to the satisfaction of the Council, shall on conviction forfeit and pay the sum of five pounds over and above the expense of filling up, remedying, or removing such cellar, opening, door, or window, so as the same shall not exceed fifty pounds.

Holes to be enclosed.

13. Any person who shall dig or make, or cause to be dug or made, any hole, or leave or cause to be left any hole adjoining or near to any street or public place within the said Municipality, for the purpose of making any vault or vaults, or the foundation or foundations of any other building or house, or for any other purpose whatsoever, or shall erect or pull down any building, and shall not forthwith enclose the same, and keep the same enclosed in a good and sufficient manner, to the satisfaction of the surveyor or other officer or person as aforesaid, or shall keep up, or cause to be kept up and continued, any such enclosure for any time longer than shall be necessary in the opinion of the surveyor or other officer or person aforesaid, and shall not place lights upon each side of the said enclosure, and keep the same constantly burning between sunset and sunrise during the continuance of such enclosure,—shall forfeit and pay for every such refusal or neglect any sum not less than forty shillings nor exceeding five pounds.

Open spaces and steps adjoining the footways to be enclosed under penalty.

14. Every owner or occupier of any house, building, premises, or land within the said Municipality having any entrance area, garden, or other open space adjoining the footway or public place in such Municipality, or any quarry, excavation, or opening in the ground, or any premises within six feet of any such footway or public place, shall protect and guard the same by good and sufficient fences, rails, or other enclosures, so as to prevent danger to persons passing and repassing; and any such owner or occupier of any house, building, premises, or land having any steps adjoining the footway of any such street or public place shall in like manner protect and guard the same by fences, rails, or other enclosures, so as to prevent danger to persons passing and repassing; and on failure thereof of any such owner or occupier, as often as he shall be convicted of such offence, forfeit and pay any sum not being less than forty shillings nor more than five pounds. And every such owner or occupier as aforesaid who shall fail to erect such rails, fences, or other enclosures as aforesaid within one week after any conviction as aforesaid, shall be deemed guilty of a further offence against this By-law.

Wells to be covered over.

15. Every person who shall have a well situated between his or her dwelling-house, or the appurtenances thereof, and any road, street, or footway, or at the side thereof, or in any yard or place open or exposed to such road, street, or footway within the said Municipality, shall cause such well to be securely and permanently covered over; and if any person having such well aforesaid shall fail to cover and secure the same within twenty-four hours after notice in writing shall have been given to him or her by any officer of the Council, or shall have been left for such person at his or her last known place of abode or the said premises, shall on conviction forfeit and pay a sum of ten shillings; and for every day after such notice that such well shall remain open or uncovered, contrary to the provisions hereof, such person shall be deemed guilty of a separate offence against this By-law.

Throwing filth on roads, driving carriages and leading horses on footways.

16. Any person who shall throw, cast, or lay, or shall cause permit, or suffer to be thrown, cast, or laid or remain, any dead animal, offal, dung, soil, ashes, rubbish, or any other filth or annoyance, or any matter or thing in or upon the footway or carriage-way of any street, road, lane, or other public place within the said Municipality, or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other animal in or so near to any street or other public place as that any blood shall run or flow upon or over, or be on any carriage or footway, or shall run, roll, drive, draw, place, or cause, permit, or suffer to be run, rolled, driven, drawn, or placed upon the footway of any street, road, or public place, any waggon, cart, dray, sledge, or other carriage, or any wheelbarrow, wheel, or truck, or any hogthead, cask, or barrel—or shall wilfully lead, drive, ride, or stand any horse, ass, mule, or other beast upon any such footway, shall upon conviction forfeit and pay for the first offence a sum not exceeding forty shillings nor less than five shillings, and for the second and every subsequent offence a sum not less than ten shillings nor more than forty shillings.

Disposal of rubbish.

17. Provided that rubbish of an innocently decaying nature may be deposited on the following localities, viz. :—

Bourke Ward.

1. On one-tenth part of an acre being a square block, the boundaries whereof, being one chain each, are indicated by four posts painted white, and lettered T.M.C., situated near the police paddock.
2. On two-tenth parts of an acre, the boundaries whereof are respectively, two lines one chain long, and two lines two chains long, and indicated by four posts painted white, and lettered T.M.C., situated near the incidence of Brisbane-street with the Peel River.

Cohen Ward.

3. On four-tenth parts of an acre, the boundaries whereof are respectively two chains each, and indicated by four posts painted white, and lettered T.M.C., situated near the incidence of Fitzroy-street and the Peel River.
4. On about four-tenths of an acre, the boundaries whereof are respectively, two of two chains and fifty links, and two of one chain and seventy-seven links long, indicated by four posts painted white, and lettered T.M.C., situated near the incidence of Hill-street with Peel River.

King Ward.

5. On one-tenth part of an acre, the boundaries whereof are each one chain long, and indicated by four posts painted white, and lettered T.M.C., situated near the incidence of Church-street and ana-branch of Goonoo Goonoo Creek.

Throwing filth into watercourses.

18. Any person who shall cast any filth, rubbish, or any dead animal, or any animal with intent of drowning such animal, into any public watercourse, waterhole, river, creek, or canal, or shall obstruct or divert from its channel any sewer, canal, or watercourse within the said Municipality, shall forfeit a sum not exceeding five pounds nor less than ten shillings, and shall in addition to such penalty pay the cost of removing such filth or obstruction, or of restoring such watercourse, sewer, or canal to its proper channel, so as the same shall not exceed fifty pounds.

Throwing slops on carriage or footways.

19. Any person who shall cast or throw, or shall cause, suffer, or permit to be cast or thrown, upon any carriage-way or footway, any soapuds, slops, or refuse water, or any refuse vegetables, or any other matter or thing, or shall cause, suffer, or permit the same to run or flow from any premises in his or her occupation, over any such footpath or carriage-way, within the said Municipality, shall for every such offence forfeit and pay a sum not exceeding two pounds nor less than five shillings.

Rain not to be carried on to footpaths.

20. It shall not be lawful for any person whomsoever to carry by means of pipes, gutters, or other contrivances, any rainwater from the roof of his or her premises or house upon any of the footways of any street or public place within the said Municipality; or any owner or occupier of any such house or premises who shall neglect or refuse to remedy or remove any such pipes, gutters, or contrivances, when required to do so by any officer of the Council, shall, on conviction, forfeit and pay any sum not exceeding ten shillings, and a like sum for every day or part of a day that the same shall not be remedied or removed: Provided that the owner or occupier of any such house or premises may convey any such rain water by means of pipes laid under the surface of such footways into the gutters adjoining the same: And provided also that all such pipes shall be laid down to the satisfaction and under the superintendence of the Town Surveyor or any other person appointed by the Council.

Placing carriages, goods, etc., on footways—not removing them when required—replacing the same after removal.

21. Any person who shall set or place, or cause to be set or placed, any stall, board, chopping-block, show-board, basketwares, merchandise, casks, or goods of any kind whatsoever; or who shall hoop, place, wash or cleanse, or who shall cause to be hooped, placed, washed or cleansed, any pipe, barrel, cask, or vessel, in or upon any carriage or footway in any street, road or public way within the said Municipality, or shall set, lay out, or place, or shall cause to be set, laid out, or placed, any coach, cart, waggon, wain, dray, sledge, truck, or other carriage, upon any such carriage-way except for the purpose of loading or unloading the same, or taking up or setting down any fare, or waiting for passengers when actually hired, or when actually engaged in harnessing and unharnessing the horses or other animals from such coach, cart, wain, waggon, dray, sledge, truck, or other carriage; or if any person shall set or place, or cause to be set or placed, in, upon, or over such carriage-way or footway, any stone, brick, lime, timber, or other material or things for building (except as hereinbefore provided); or who shall hang out or expose, or shall cause or permit to be hung out or exposed, any meat or offal, or any other matter or thing whatsoever, from any house or premises, over any part of such footway or carriage-way, or over any area of any house or other building or premises, or any other matter or thing, from and on the outside of the house or front or any other part of any house or houses or other buildings or premises over or next unto any such street, road, or public place and shall not immediately remove the same upon being required so to do by the Council or any officer thereof; or if any person who, having in pursuance of any such requisition as aforesaid, removed, or cause to be removed, any such stall, board, show-board, chopping-block, basketware, merchandise, barrow, sledge, truck, carriage, timber, stones, bricks, lime, meat, offal, or other matter or thing, shall at any time thereafter again set, lay, place, expose, or put out, or cause, procure, permit, or suffer to be set, laid, placed, exposed, or put out, the same or any of them, or any other stall-board, show-board, chopping-block, basketwares, merchandise, goods, timber, stones, bricks, lime, coach, cart, wain, waggon, dray, truck, barrow, sledge, meat, offal, or other things or matters whatsoever (save and except as aforesaid), in or upon or over any such carriage or footway, of or next unto any such street, road, or public place as aforesaid, shall, on conviction for every such offence, forfeit and pay for the first offence a sum not exceeding forty shillings nor less than five shillings; and for every second and every subsequent offence, a sum not exceeding forty shillings nor less than ten shillings.

Not to prevent the erection of awnings.

22. Nothing in these By-laws contained shall be deemed to prevent any person from placing a movable awning in front of his or her shop or house; Provided that such awning be at least eight feet high above the proper level of the footway, and the posts be kept close up to the curbstone or outer edge of such footway, and that the said posts or any framework be erected to the satisfaction of the Council, and as may from time to time be directed.

Damage to public buildings.

23. Any person who shall damage any public building, lamp, wall, parapet, sluice, bridge, road, street, sewer, watercourse, or other property of the Council of the said Municipality, or improperly extinguish any lamp set for public or private convenience, shall pay the cost of repairing the same; and if the same be wilfully done, shall forfeit and pay a sum not exceeding twenty pounds, nor less than five pounds, in addition to the cost of repairing the same, so as the same shall not exceed fifty pounds.

Drawing or trailing timber, &c.

24. Any person who shall haul or draw, or shall cause to be hauled or drawn upon any of the streets, roads, or public ways or places within the said Municipality any timber, stone, or other material or thing which shall be carried principally or in part upon any wheeled carriage or barrow to drag or trail upon any part of any such street, road, or public place, to the injury thereof, or to hang over any part of such carriage or barrow so as to occupy or obstruct the street or road, shall upon conviction, forfeit and pay for every such offence a sum not exceeding forty shillings nor less than ten shillings over and above the damage occasioned thereby.

Riding in drays, careless driving, &c.

25. If the driver of any waggon, wain, cart or dray of any kind shall ride upon any such carriage in any street, road, or thoroughfare within the said Municipality, not having some person on foot to guide the same (such carts as are drawn by one horse and driven or guided with reins only excepted), or if the driver of any carriage whatsoever shall negligently be at a distance from such carriage or in such situation whilst it shall be passing along such street, road, or thoroughfare that he cannot have the direction and government of the horse or horses or cattle drawing the same; or if the driver of any waggon, cart, dray, or coach or other carriage whatsoever, meeting any other carriage, shall not keep his waggon, cart,

dray, or coach or other carriage on the left or near side of the road, street, bridge, or thoroughfare, or if any person shall in any manner wilfully prevent any other person or persons from passing him or any carriage under his care upon such street, road, or thoroughfare; or by negligence or misbehaviour prevent, hinder, or interrupt the free passage of any carriage in or upon the same, every such driver or person so offending shall upon conviction forfeit and pay for every such offence a sum not exceeding forty shillings nor less than ten shillings.

Riding or driving furiously.

26. Any person who shall ride or drive through or upon any street, road, or public place within the said Municipality so negligently, carelessly, or furiously that the safety of any other person shall or may be endangered, shall on conviction forfeit and pay a sum not exceeding five pounds nor less than two pounds.

Breaking horses, &c.

27. It shall not be lawful for any person or persons in any street, road, or public place within the Municipality to drive any carriage or carriages for the purpose of breaking, trying, or exercising horses, or to ride, drive, or lead any horse, mare, or gelding for the purpose of airing, exercising, trying, breaking, showing, or exposing for sale any such horse, mare, or gelding otherwise than by passing quietly through such streets or public places: Provided further, that no person or persons shall be allowed within the said Municipality to furiously or carelessly drive any horse, mare or gelding to or from any public watering place, creek, or river, or pasturage, or elsewhere; and the person or persons in charge thereof shall be *prima facie* presumed to be the owner of the said animal or animals, and shall be liable accordingly; and every person so offending shall forfeit and pay for every such offence any sum not exceeding forty shillings nor less than five shillings.

Hours for driving cattle.

28. No person shall drive or cause to be driven, through any street or public thoroughfare of the said Municipality any live stock, between the hours of 8 o'clock a.m. and 10 o'clock a.m., or between the hours of 12 o'clock a.m. and 2 p.m., or between the hours of 4 o'clock p.m. and 9 o'clock p.m., except calves and foals under the age of one year, quiet milk cows, horses or cattle broken to saddle or draught, and pigs, sheep, and goats. And any person or persons who shall drive or cause to be driven any live stock except those above enumerated, through any street or public thoroughfare of the Municipality between the hours above mentioned, shall on conviction before any Justice or Justices of the Peace forfeit and pay a sum not exceeding five pounds for every such offence.

Horses, Cattle, &c.

29. Any person who shall breed, feed, or keep any kind of swine in any house, yard, or enclosure, situate and being in, or within forty yards of any street or public place within the Municipality, or who shall suffer any kind of swine, or any horse, ass, cattle, mule, sheep, goat, or any other animal of the like nature belonging to him or her, or under his or her charge, to stray or to go about or to be tethered or depastured in any street, road, or public place within the said Municipality, excepting on the permanent and temporary commons, shall forfeit and pay for every such offence a sum not exceeding forty shillings nor less than five shillings.

Inspector may impound.

30. The Inspector of Nuisances, or any other person duly authorized by the Council, shall have power to impound in the Tamworth Public Pound, all animals of every description found straying in any street, roadway, or thoroughfare within the said Municipality of Tamworth, and shall also have power to destroy all goats found straying in any street, roadway, or public place within the said Municipality.

Burning shavings, &c., in the streets.

31. Any person who shall burn any shavings, rubbish, or any other matter or thing in any road, street, lane, or public place within the said Municipality, or who shall within ten yards of any dwelling-house burn rags, bones, corks, or other offensive substance, shall for every such offence forfeit and pay a sum not exceeding forty shillings nor less than five shillings.

Placards not to be affixed on walls nor bridges without consent.

32. It shall not be lawful for any person to paste or otherwise affix any placard or other paper upon any wall, house, fence, or other erection, nor deface any such wall, house, fence, bridge, or erection with chalk, paint, or other matter, unless with the consent of the owner thereof; and every person who shall be guilty of any such offence shall forfeit and pay a sum not exceeding twenty shillings nor less than five shillings.

Any person or persons who shall wantonly or maliciously break or injure any lamp or lamp-post or injure or extinguish any light set up for public safety and convenience within the said Borough, shall, over and above the necessary expense of repairing the injury committed, forfeit and pay any sum not less than one pound nor more than five pounds.

No rock to be blasted without notice to the Mayor, &c.

33. Any person who shall be desirous of blasting any rock within fifty yards of any road, street, public place, or private dwelling within the said Municipality, shall give notice in writing twenty-four hours previously to the Mayor or any two Aldermen, who shall appoint a time when the same shall take place, and give such directions as he or they may deem necessary for the public safety; and if any person shall blast, or cause to be blasted, any rock within the limits aforesaid, without giving such notice, or shall not conform to the directions given to him by the Mayor or any two Aldermen aforesaid, he shall on conviction forfeit and pay for every such offence any sum not less than one pound nor more than ten pounds.

Cleansing private avenues.

34. Any owner or occupier of any house or place and premises who shall neglect to keep clean all private avenues, passages, yards, and ways within the said premises, so as by such neglect to cause a nuisance by offensive smell or otherwise, shall forfeit and pay a sum not exceeding forty shillings nor less than ten shillings for every such offence.

Placing dead animals on premises.

35. Any person who shall place, or who shall cause or suffer to be placed, upon any land or premises within the said Municipality any dead animal, blood, offal, night-soil, or other offensive matter, shall on conviction suffer and pay a penalty not exceeding five pounds nor less than ten shillings for every such offence.

Allowing dead animals to remain on premises.

36. Any owner or occupier of any land or premises who shall suffer or permit any dead animal, blood, offal, night-soil, or any other offensive matter to remain upon the said land or premises, after notice shall have been given by the Inspector of Nuisances to remove the same, shall be subject to a penalty of not exceeding two pounds nor less than ten shillings for every day that the same shall so remain.

Hog-styes and nuisances not removed on notice, &c.

37. In case any privy, hog-stye, any sink, cesspool, yard, or enclosure, or any matter or thing which shall at any time be in any place within the said Municipality, shall be or become a nuisance, it shall be lawful for the Council, after due investigation, by notice in writing to order the removal of the said nuisance within seven days after such notice shall have been given to the owner or occupier of the premises wherein such nuisance is situated, or shall have been left for such owner or occupier at his or her last or usual place of abode or on the said premises; and every such owner or occupier refusing or neglecting to remove or abate such nuisance pursuant to such notice, and to the satisfaction of the Council, shall forfeit and pay a sum not exceeding ten pounds nor less than forty shillings.

Penalty for not removing offensive matter on notice—Council may abate nuisance—Right of entry for such purposes.

38. Any person who shall suffer any waste or stagnant water, or any muck, filth, soil, or other offensive matter to remain in any cellar or place within any dwelling house or premises within the said Municipality for the space of twenty-four hours after written notice to him or to her from the Inspector of Nuisances or other officer of the Council to remove the same, or shall allow the contents of any water-closet, privy, or cesspool to overflow or soak therefrom, shall for every such offence forfeit and pay a sum not exceeding forty shillings nor less than ten shillings, and a further sum of ten shillings for every day the offence shall be continued; and the Council may remove or abate, or cause to be removed or abated, every such nuisance, and do what shall be needful for preventing a continuation or recurrence thereof; and the officers of the said Council shall for such purpose have power from time to time to enter any house or premises, and the expense incurred in carrying out the provisions of the By-law shall be paid to the said Council by the occupier or owner of the premises upon which the same exists, in addition to the penalty aforesaid, so as the same do not exceed fifty pounds in the whole.

Cleansing butchers' shambles, &c.,

39. For preserving the cleanliness of the said Municipality and the health of the inhabitants thereof, it shall be lawful for the Inspector of Nuisances or for any other officer appointed by the Council from time to time, and when and as often as he or either of them shall see occasion to visit and inspect the butchers' shops, soap and candle manufactories, fellmongering establishments and tanneries, private avenues, passages, yards, and ways within the premises of any owner or occupier within the said Municipality, and to give such direction with respect to the cleansing of the same respectively both within and without as to him shall seem needful. And any owner or occupier of any such premises aforesaid who shall refuse or neglect to comply with such directions within a reasonable time, shall forfeit and pay a sum not exceeding five pounds nor less than one pound.

Damaging trees, &c.

40. Any person who shall wilfully, or without the authority of the Council, cut, break, bark, root-up, or otherwise destroy or damage, the whole or any part of any growing or live tree,

sapling, shrub, or underwood, growing in or upon any reserve or place under the management of the Council, shall forfeit and pay a sum not exceeding ten pounds nor less than one pound.

Extirpation of noxious weeds.

41. Any owner or occupier of land within the said Municipality who shall permit or suffer to grow and ripen seed on the said land the weeds known as the Bathurst burr and thistle, and who shall fail to extirpate, remove, or destroy the same within ten days after the receipt of a notice in writing, by post or otherwise, from the Council so to do, shall, for every such offence, forfeit and pay a sum not exceeding five pounds nor less than one pound. Provided that if no owner nor occupier can be proceeded against the Municipal Council shall incur the necessary expense.

Newly-slaughtered carcass.

42. Every person who, within the said Municipality shall carry or convey, or cause to be carried or conveyed, in any public street or place, the carcass or any part of the carcass, of any newly-slaughtered animal, without sufficient and proper cloth or covering to conceal the same from public view, shall be liable on conviction to a penalty of any sum not exceeding forty shillings for every such offence.

Bathing prohibited within certain limits.

43. Any person who shall bathe near to, or within view of, any inhabited house, public bridge, street, road, or other place of public resort within the limits of the said Municipality, between the hours of seven o'clock in the morning and half-past six in the evening shall, on conviction, forfeit and pay for every such offence a sum not exceeding twenty shillings.

Indecent exposure of person.

44. Any person who shall offend against decency by exposure of his or her person in any street or public place within the said Municipality, or in view thereof, shall on conviction forfeit and pay for every such offence a sum not exceeding five pounds nor less than one pound.

Inspector of Nuisances may take legal proceedings.

45. The Inspector of Nuisances or other person appointed by the Council may take legal proceedings against any person or persons committing any offence or offences against any of the By-laws of the said Municipality.

Penalties to be paid over to Treasurer.

46. All penalties under any of these By-laws shall be paid over to the Treasurer of the said Municipality, to be appropriated as the Council may direct.

Interpretation of "Mayor" and "Municipality."

47. Whenever in any of these By-laws the word "Mayor" is made use of, it shall, unless a context shall indicate a contrary distinction, be construed also to signify and include any Alderman lawfully acting for the time being in the place or stead of the Mayor; and whenever the word "Municipality" is made use of in the said By-laws, it shall be understood to signify the "Municipality of the Borough of Tamworth."

As to interference with officer of the Council in enforcing By-laws.

48. Any person who shall obstruct or interfere with any officer of the Council or other person doing or performing any duty or act under any of the By-laws of the said Municipality, shall forfeit and pay a penalty of not exceeding twenty pounds nor less than two pounds.

PART VII.

Closets and night-soil.

1. Notice in writing shall be given to the Inspector of Nuisances by every person about to construct new or alter existing closets or cesspits seven days before the commencement of such work, so as to enable the Inspector of Nuisances to visit and determine the situation of any proposed new closet or cesspit, and approve or otherwise the alteration of any existing closet or cesspit, and every closet or cesspit constructed or altered without such notice having been given shall be removed or altered, if judged necessary by the Council, by the owner or occupant of the premises whereon such closet or cesspit shall be within such time as the Council shall by written notice to such owner or occupant appoint; and if any new closet or cesspit or any existing closet or cesspit shall be constructed or altered or shall be commenced to be constructed or altered without such notice as aforesaid having been given, the owner or occupant of the premises whereon such closet or cesspit shall have been constructed or altered or commenced to be constructed or altered shall be liable to a penalty not exceeding twenty pounds nor less than two pounds, and also to a further penalty not exceeding one pound nor less than shillings for every day that such closet or cesspit shall remain unremoved or unaltered after notice to remove or to alter the same as aforesaid.

2. No new closet or cesspit shall be made or placed upon the premises of any person excepting in a spot thereon authorized by the Inspector of Nuisances or by the Council or by such officer other than the Inspector of Nuisances as the Council may for that purpose appoint.

3. All closets hereafter to be made shall be constructed as follows:—Each closet shall be built with a cesspit not less than 4 feet long by 3 feet wide clear internal measurement, exclusive of the man-hole hereafter mentioned, and not less than 4 feet nor more than 6 feet below the surface of the ground, and the top shall be built at least 6 inches above the surface of the ground, and if from the nature of the ground a greater depth or a greater height above the surface of the ground shall be required, the same shall be determined by the Council, or such officer as they may appoint. The walls of every cesspit shall be constructed of brick not less than 9 inches thick. Each closet shall have a man-hole of the clear internal dimensions of 3 feet by 2 feet outside the walls of the closet, constructed of brick and covered closely with planking of hardwood 2½ inches thick. And any person refusing or neglecting to comply with this by-law or any part thereof, shall be liable to a penalty not exceeding twenty pounds nor less than two pounds.

4. A separate closet shall be provided for every tenement, and in dwellings where the ordinary number of inmates exceeds 10, the capacity of the cesspit shall be increased by three cubic feet for every person beyond such number, or a separate closet provided for every 10 persons. In schools and factories where a number of persons exceeding 12 shall reside or be engaged, one closet shall be provided for every 30 persons, with a cesspit of a capacity of 80 cubic feet, and separate closets shall be provided for each sex. In the case of schools, closets may be erected containing not more than 10 seats each, and at least one seat shall be provided for every 40 children attending school. Closets shall have walls not less than 7 feet high to the wall-plate, and not less than 3 feet 6 inches wide and 4 feet 6 inches long, and be provided with a door to fasten on the inside. Where two or more closets adjoin each other, there shall be a dividing wall between each, 9 inches thick, from the bottom of the cesspit to the roof, so as to effect a complete separation. And any person offending against the provisions of this By-law or any of them, shall be liable to a penalty not exceeding twenty pounds nor less than two pounds.

5. If in the opinion of the Inspector of Nuisances any alteration be required in any existing closet or cesspit he shall report the same to the Council, who shall determine what alteration is necessary for the preservation of health or decency, and such alteration shall be made by the owner or the occupant of the premises within one month after notice to do so shall have been given by the Inspector of Nuisances to such owner or occupant, who shall be liable to a penalty not exceeding five pounds nor less than one pound for every week's neglect or delay in effecting such alteration.

Hours for removing night-soil.

6. Any person who, within the said Municipality, shall remove any night-soil or ammoniacal liquor, bones, or other offensive matter, or shall come with carts or carriages for that purpose, between the hours of six o'clock in the morning and eleven o'clock at night, or shall at any time remove any such night-soil or ammoniacal liquor otherwise than in properly covered and watertight carts or vehicles, or in such a manner as to upset, cast, spill, or strew any of the said night-soil, ammoniacal liquor, slop, urine, or filth in or upon or near to any streets, roads, public places, or footways of the Municipality, or shall deposit or throw night-soil, ammoniacal liquor, bones, or other offensive matter nearer to any street, road, or dwelling-house than shall from time to time be directed by the Council or by the Inspector of Nuisances; or shall allow vehicles used for that purpose to stand on any premises nearer to any road, street, or dwelling-house than shall from time to time be directed by the Council or Inspector of Nuisances, shall upon conviction forfeit and pay for every such offence a sum not exceeding five pounds nor less than one pound; and, in case the person or persons so offending cannot be found, then the owner or owners of such carts, carriages, or other vehicles employed in and about emptying or removing such night-soil, bones, or other offensive matter; and also the employer or employers of the person or persons so offending shall be liable to and forfeit and pay such penalty as aforesaid.

7. The night-soil shall be deposited in the places hereafter appointed for the purpose, and covered with soil 6 inches thick.

8. The Inspector of Nuisances shall have power to visit and inspect any closet or cesspit on all days except Sundays and public holidays between the hours of 10 a.m. and 4 p.m., and any person refusing admittance to or obstructing or hindering such Inspector in the discharge of his duty shall be liable to a penalty not exceeding five pounds nor less than one pound.

9. The owner or occupant of any premises requiring any cesspit which may be included in his premises to be emptied shall send a written notice thereof to the Council or the Inspector of Nuisances.

10. Earth closets may be used on intimating to the Council the plan and arrangements for their construction and management, and on obtaining the Council's approval thereto.

11. Every person offending against any of these By-laws shall unless otherwise herein specially provided be liable to a penalty not exceeding twenty pounds nor under two pounds.

12. The following sites are appointed for the deposit of night-soil, viz.—On one acre in Pine-scrub, bounded by a line commencing at a peg bearing north 72 degrees east 32 chains from the intersection of Carthago-street and Murray-street, and running south 3°33 chains; thence west 3 chains; thence north 3°33 chains; thence east 3°00 chains, to the point of commencement. One acre, bounded by a line commencing at a peg near the south boundary-line of the permanent common, bearing about north 35 chains from the intersection of Jewry and Marius-streets, and running south 3°33 chains; thence west 3°00 chains; thence north 3°33 chains; thence east 3°00 chains, to the point

of commencement. One acre, bounded by a line commencing at a peg bearing south-west by south from intersection of Belmore and Gipps Streets, in the township laid out by the Peel River Land and Mineral Company (Limited), and running south 3°33 chains; thence west 3°00 chains; thence north 3°33 chains; thence east 3°00 chains, to the point of commencement, for which arrangements have been made with the said Company.

Adopted by the Municipal Council, August 5, 1879.

PHILLIP GIDLEY KING,
Mayor.

The Corporate Seal was affixed by order of the Council, on the 14th October, 1879.

(L.S.) PHILLIP GIDLEY KING,
Mayor.

D. F. W. VENESS,
Council Clerk.

1879-80.

NEW SOUTH WALES.

MUNICIPALITIES ACT OF 1867 AND NUISANCES
PREVENTION ACT, 1875.

(BOROUGH OF CAMPERDOWN—AMENDED BY-LAWS.)

Presented to Parliament, pursuant to Acts 31 Vic. No. 12, sec. 158, and 39 Vic. No. 14, sec. 18.

Colonial Secretary's Office,
Sydney, 24th April, 1880.

BOROUGH OF CAMPERDOWN.

AMENDED BY-LAWS.

THE following amended By-laws, made by the Council of the Borough of Camperdown, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867, and the Nuisances Prevention Act of 1875.

HENRY PARKES.

BOROUGH OF CAMPERDOWN.

BY-LAWS of the Borough of Camperdown, made under the Municipalities Act of 1867, and Nuisances Prevention Act, 1875, respectively.

PART I.

By-laws repealed.

1. That all existing By-laws of the Council of the Borough of Camperdown, save and except such as refer to the Free Public Library, and published in the Government Gazette from time to time prior to the adoption of the following, be and are hereby repealed.

Proceedings of the Council and Committees, preservation of order at Council's meetings, duties of officers, and servants, &c.

Meetings of the Council.

Ordinary Meetings.

2. Unless otherwise ordered, the Council shall meet for the despatch of business on every alternate Tuesday, at the hour of half-past seven p.m., unless such day shall happen to be a public holiday. In the latter case the meeting shall be held on the day following.

Election of Chairman in absence of Mayor.—Adjournment for want of quorum.

3. If at any meeting of the Council the Mayor be absent at the expiration of fifteen minutes after the time appointed for holding such meeting, the Aldermen then present shall proceed to elect from among themselves a Chairman for such meeting. Whenever there shall be an adjournment of any such meeting for want of a quorum, the names of the members present shall be taken down, and recorded in the minute-book.

Course of Procedure.

4. The following shall be the course of procedure at such meetings, viz. :—

1. The reading and confirmation of the minutes of the proceedings of the previous meetings.
2. Questions and complaints.

3. Statement of accounts, showing the moneys received and paid since last meeting, with the balance in the Bank to the credit of the Municipality.
4. The reading of correspondence.
5. The presentation of reports and petitions.
6. Adjourned motions and motions of which notice has been given.
7. Such other business as may lawfully be brought before the Council.

Business at Special Meetings.

5. At special meetings of the Council the business, after the minutes shall have been read and verified, which shall be done in the same manner as at an ordinary meeting, shall be taken in such order as the Mayor or the Alderman at whose instance the special meeting shall have been called, may have directed.

Absence of proposed mover.

6. No motion, of which notice shall have been entered on the business paper, shall be proceeded with in absence of the Alderman by whom such notice shall have been given, unless by some other Alderman producing a written authority for that purpose from such first-named Alderman.

Motion to be seconded.

7. No motion shall be discussed unless and until it be seconded.

Motion to be in writing and not withdrawn without leave.

8. Every motion of which notice has been given shall be in writing—shall be signed by the mover, and no motion when seconded shall be withdrawn without leave of the Council.

Amendments may be moved.

9. When a motion shall have been moved and seconded, any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed unless and until it be seconded.

Only one amendment at a time.

10. No second or subsequent amendment shall be taken into consideration until the previous amendment shall have been disposed of.

Petitions.

11. The Council may at any meeting resolve, without previous notice, that any petition be received, and that the same, or any correspondence read, be referred to a Committee for report, or that the requests therein contained be granted.

Mayor to preserve order.

12. The mayor shall preserve order, and may at any time call to order any Alderman who may appear to him to be out of order.

Calls to order.

13. Any Alderman may at any time call the attention of the Mayor to any Alderman being out of order, or to any point of order.

Mayor's decision on points of order final.

14. Every point of order shall be taken into consideration immediately upon its arising, and the decision of the Mayor thereon shall be conclusive, except as hereinafter provided.

Power of Council as to laying down general rules, &c.

15. Any Alderman who is dissatisfied with the decision of the Mayor or Chairman on any such question of order or of practice may, by motion on notice, respectfully worded, invite the Council to lay down a different rule or principle for the determination of any similar question of order or of practice which may thereafter arise. Any rule or principle thus laid down shall be binding upon all parties, unless and until it be rescinded, but shall have no retrospective operation.

Mayor may take part in proceedings.

16. The Mayor may take part in all the proceedings of the Council or Committees thereof.

Questions put by Mayor.

17. The Mayor shall put all questions, first in the affirmative and then in the negative (provided that where an amendment is moved to any motion the amendment shall be first put), and may do so as often as may be necessary to enable him to determine the sense of the Council thereon, and thereupon he shall declare his decision, which shall be final, unless a division be called for.

Mayor to decide as to pre-audience of Aldermen.

18. If two or more Aldermen rise to speak at the same time the Mayor shall decide which of them shall be entitled to pre-audience.

No Alderman to speak twice on same question or amendment, except in Committee.

19. No Alderman shall speak twice on the same question, unless in Committee or in explanation, where he shall have been misrepresented or misunderstood: Provided that any Alderman, although having previously spoken, may speak once on every amendment, and that the mover of every question shall always have a right of final reply.

No Alderman to make personal reflections.

20. No Alderman shall digress from the matter under discussion, or make personal reflections on, or impute motives to, any other Alderman.

No Alderman to speak for more than ten minutes.

21. No Alderman shall speak upon any motion or amendment for a longer period than ten minutes without the consent of the Council.

Alderman using offensive expressions to apologise.

22. When any member of the Council shall make use of any language or expression offensive, or capable of being applied offensively, to any Alderman, the member so offending shall be required to withdraw such language or expression, and to make an apology satisfactory to the Council.

Debate may be adjourned.

23. A debate may be adjourned to a later hour of the same day, or to another day.

Alderman adjourning debate entitled to precedence on resumption.

24. The Alderman upon whose motion any debate shall be adjourned shall be entitled to precedence on the resumption of the debate.

Adjournments.

25. Any motion for adjournment, if seconded, shall be immediately put without discussion; but if such motion be negatived, it shall not be competent for any Alderman to make a similar motion until thirty minutes shall have elapsed.

Any Alderman may divide Council.

26. It shall be competent for any Alderman to divide the Council on any question, both in full Council and in Committee of the whole Council; and no Alderman shall leave his seat or place till the names of the Alderman and how voting shall have been taken down by the Council Clerk, or person officiating for him.

Divisions to be entered on minutes.

27. All divisions of the Council shall be entered on the minutes of the proceedings.

Questions to be read when required.

28. Any Alderman may require the question or matter under discussion to be read once for his information, and upon such request the question or matter under discussion shall be read.

Suspension of By-laws.

29. Any of these By-laws relating to or affecting proceedings at meetings of the Council may be suspended *pro tempore* in cases of emergency by resolution of the Council.

Rescinding motion already passed.

30. No motion to rescind any decision of the Council shall be entertained except at a Council of the whole specially called for the purpose.

Standing and Special Committees.**Standing Committees.**

31. There shall be a Committee of Works, a Finance Committee, and a Committee for general purposes. These Committees shall be re-appointed every year at the first meeting of the Council which shall be held after the election of the Mayor.

Committees of Works.

32. The Committees of Works shall have the general direction of all works ordered or sanctioned by the Council; and the general inspection of all streets, roads, ways, bridges, public reserves, and other places under the care and management of the Council. They shall also inquire and report from time to time upon such improvements, repairs or other matters, as they may think necessary, or as they may be directed by resolution of the Council to inquire and report upon.

Finance Committee.

33. The Finance Committee shall examine and check all accounts, and shall watch generally over the collection and expenditure of the Municipal revenues. They shall inquire and report from time to time as to all matters which they may consider to affect the finances of the Borough; and as to such matters or subjects of the like nature as they may be directed by resolution of the Council to inquire and report upon.

Committee for general purposes.

34. The Committee for general purposes shall take cognizance of every matter, subject, or question within the jurisdiction of the Council, not coming within the province of one or other of the beforementioned Standing Committees, and shall from time to time inquire into and report upon any such subject, matter, or question as they may think necessary, or as they may be directed by resolution of the Council to inquire into and report upon.

Special Committees.

35. Special Committees may consist of any number of members, and may be appointed for the performance of any duty which may be lawfully entrusted to a Committee, and for which, in the opinion of the Council, a Special Committee ought to be appointed. And no Standing Committee shall interfere with the performance of any duty which may for the time have been entrusted to any such Special Committee. The appointment of every such Special Committee shall be made by resolution, and it shall be incumbent on the mover of such resolution to embody therein a statement of the duties proposed to be entrusted to such Special Committee. The mover of any such resolution may name therein any such members as, in his opinion, ought to constitute such Committee, or he may propose that such Committee consist of a certain number of members to be appointed by ballot; or an amendment to the effect that such Special Committee be appointed by ballot, may be carried.

Duration of Special Committees.

36. Special Committees shall continue until the specific duty for which they have been appointed shall have been discharged: Provided that such Committees may at any time be dissolved by vote of the Council.

Rules to be observed in committee.

37. The rules of the Council shall be observed in a Committee of the whole Council, except the rule limiting the number of times of speaking.

Reports of committee to be signed.

38. Every report of a Committee shall be signed by the Chairman thereof.

Protection of Funds and Records.**Member or officer of Council not to be surety.**

39. In cases where surety is required by the Municipalities Act, it shall not be competent for the Council to accept as surety any of their members, or any person holding office under the Council.

Custody of records, seal, &c.

40. The common seal and all charters, deeds, muniments, books, papers, and records of the Council shall be kept in the Council Chambers or office of the Council in the custody of the Council Clerk, unless the Council shall otherwise order for any purpose; and the common seal shall not be used, except with the signature of the Mayor.

Records, &c. not to be defaced or altered.

41. Any person who shall deface, alter, or destroy, or attempt to deface, alter, or destroy any such common seal, charter, deed, muniment, book, paper, or record shall, on conviction thereof, forfeit and pay for the first offence a penalty not exceeding fifty pounds nor less than five pounds, and upon every subsequent conviction a penalty of not less than twenty pounds.

Nor removed.

42. Any person who shall remove or attempt to remove (except for the purpose of any legal proceedings) any such seal, charter, deed, muniment, book, paper, or record from the Council Chamber, without leave from the Council first had and obtained, shall, on conviction thereof, forfeit and pay a penalty of not more than twenty pounds nor less than two pounds, and for every subsequent offence a penalty of not less than five pounds.

Expense of proposed works to be first ascertained.—Accounts to be examined by Finance Committee.

43. No work shall be undertaken until the probable expense thereof shall have been ascertained by the Council; and all accounts to be paid by the Council shall be examined by the Finance Committee and reported on by them before any warrant shall be issued for the payment thereof.

Outlay in urgent cases.

44. In cases of emergency arising between meetings of the Council, it shall be lawful for necessary works to be ordered without vote of the Council, viz.: By the Mayor to the extent of £10. Provided that in the absence of the Mayor any three Aldermen shall have that power.

*Levying Rates, &c.**Duo dates for rates.—Defaulters.*

45. The rates and taxes levied by the Council shall be held to be due and payable on such day or days as the Council shall, by resolution, from time to time appoint. Every person not paying his or her rates or taxes at the office of the Council, or to the Council Clerk or other proper officer of the Council, within thirty days after any of the days so appointed for payment thereof, shall be deemed a defaulter: Provided that due notice of such rate shall have been given in manner as required by the Municipalities Act of 1867.

Council clerk to furnish lists of defaulters.

46. It shall be the duty of the Council Clerk to furnish the Mayor and Council, or any Committee as directed, with lists of all persons so in default.

Mayor to enforce payment.

47. It shall be the duty of the Mayor to cause such defaulters to be sued for the amount of such rates in any Court of competent jurisdiction, or to issue distress warrants against all such persons, and to cause such warrants to be enforced.

Rates on damaged premises.

48. In the event of any premises being wholly or partially destroyed by fire or other accident, the Council shall have power to accept an equitable proportion of the assessed rates of such premises for the remainder of any municipal year.

*Streets and Public Places, &c.**New roads to be reported upon.*

49. No new public road, street, way, park, or other place proposed to be dedicated to the public, shall be taken under the charge and management of the Council until after such road, street, way, or park shall have been examined by a Committee for Works and reported upon to the Council by such Committee.

Plans of proposed new road, &c., to be deposited.

50. Whenever any proprietor or proprietors of land within the said Borough shall open any road, street, or way, or lay out any park or other place for public use or recreation, through or upon such land, and shall be desirous that the Council shall undertake the care and management of such road, street, way, park, or other place, he or they shall furnish the Council with a plan or plans, signed by himself or themselves, showing clearly the position and extent of such road, street, way, park, or other place as aforesaid. And he or they shall execute any instrument dedicating such road, street, way, park, or other place as the Council may consider necessary.

Roads and streets, and encroachments thereon, &c.

51. The Surveyor of the Borough, or other officer or person duly authorized by the Council in that behalf, shall be the proper officer for marking out, and shall fix, mark, and lay out the levels of all public roads, streets, lanes, and thoroughfares, and the carriage and footways thereof, which now are or shall hereafter be under or subject to the control, construction, care, or management of the Council. In marking out such roads, streets, lanes, and thoroughfares, recourse shall be had, when practicable, to the plans under which the land, with frontage to the road, street, lane, or thoroughfare in question shall have been sold or let. And it shall be the duty of such surveyor or officer to place posts at the corners or intersections of such streets, roads, lanes, and thoroughfares, whenever the same may be deemed necessary or desirable by the Council, so as to give a width of 42 feet for the carriage way and 12 feet for the footway on each side, where the road, street, lane, or thoroughfare, shall be 66 feet wide, and in proportion, and in the discretion of the Council in any such road, street, lane, or thoroughfare, or other public place, of other width than 66 feet. Provided that there shall be no change of level in any such public road, street, lane, thoroughfare, or public place, until the same shall have been submitted to and adopted by the Council as hereinafter provided.

Change of street levels.

52. Whenever it may be deemed necessary to alter the level of any such public road, street, or way, as aforesaid, the Committee for Works shall cause a plan and section showing the proposed cuttings to be exhibited at the Council Chamber for fourteen days, for the information and inspection of ratepayers, and shall notify, by advertisement in some newspaper circulating in the Borough, that such plan is so open to inspection. At a subsequent meeting of the Council the said plan and section shall, if adopted, be signed by the Mayor or Chairman, and the proposer and seconder of the motion for such adoption, and countersigned by the Council Clerk. And such plan and section so signed and countersigned shall be a record of the Council.

Footways may be levelled, &c.

53. When any footway shall have been marked out in manner hereinbefore directed, the Surveyor or such officer or person so authorized as hereinbefore mentioned may cause the same to be levelled and made as nearly as practicable of equal height and breadth, and with an equal slope and inclination; and for this purpose may remove any flagging, steps, or other matter, thing, or obstruction that may injure or obstruct the said footway, or render it unequal or inconvenient, and which now is or may hereafter be erected or placed on the space marked out for any of the said footways.

Temporary stoppage of traffic for repairs, &c.

54. The Council may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same, or for any necessary purpose; and any person or persons offending against this By-law, either by travelling on such street, lane, or thoroughfare, or by removing or destroying any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty of any sum not exceeding five pounds for every such offence.

No encroachment allowed on streets, &c.

55. Whenever any road, street, lane, or thoroughfare has been marked out in manner herein provided, no house, shop, fence, or other structure shall be allowed, except as hereinafter mentioned, to project or encroach on any part thereof; and in order that the due alignment of the roads, streets, lanes, or thoroughfares within the said Borough shall be observed, and that no encroachment shall be made thereon, it shall not be lawful for any person, unless for any temporary or other purposes permitted by the Council, to erect or put up any building, erection, obstruction, fence or enclosure; or make any excavation or hole on, under, or near such road, street, lane, or thoroughfare, unless due notice of the same shall have been given to the Council of the Borough at least one week before any such building, erection, obstruction, fence or enclosure, excavation or hole, as aforesaid, shall be commenced to be erected or put up, or made, and the assent of the Council first obtained. And in default of the same, the person so offending shall forfeit and pay for every such offence a sum not exceeding five pounds nor less than forty shillings; and on every successive conviction for a similar offence, shall forfeit and pay a penalty of not less than three pounds.

Obstructing public pathways.

56. If the owner or occupier of any land situate on the side of any street or road in this Borough shall permit any tree, shrub, or plant, kept for ornament or otherwise, to overhang any footpath or footway on the side of any such street or road, so as to obstruct the passage thereof, and on demand made by the Council shall not cut, lop, or cause to be lopped, all such trees, shrubs, or plants to the height of eight feet at the least, the said Council, by their servants, labourers, and workmen may

cut or cause to be cut or lopped, all such over-hanging trees, plants, and shrubs, and to remove or burn any portion of such trees, plants, or shrubs so cut or lopped, without being deemed a trespasser or trespassers; and in case any person or persons shall resist or in any manner forcibly oppose the said Council or their servants, labourers, or workmen in the due execution of the powers given in this behalf by virtue of the Municipalities Act of 1867, every person so offending shall, on conviction for every such offence, forfeit and pay any sum not exceeding ten pounds.

No balcony, &c., to project more than 18 inches.

57. With regard to buildings hereafter to be built or rebuilt, it shall not be lawful for any awning, verandah, portico, balcony, coping, parapet, overhanging eaves, cornice, windows, string-cornice, stringcourse dressing, or other architectural decoration forming part of, or attached to, any external wall, to project more than eighteen inches beyond the general line of front in any street or road, except with the consent of the Council first obtained; nor shall any balcony, or any other external projection as aforesaid, which may hereafter be added to any existing building, be allowed to project more than eighteen inches, as aforesaid, under a penalty not exceeding five pounds nor less than one pound, except with the consent of the Council first obtained.

Encroachments must be removed on notice.

58. The Surveyor or other such officer or person may at any time, on the order of the Council, and upon due notice of thirty days, direct the removal of any building, fence, or other obstruction or encroachment in and upon any road, street, lane, or thoroughfare under the charge of the Council. Notice shall, in this case, be served either personally or at the usual or last known place of abode of the person to whom such obstruction or encroaching structure belongs, or who has erected the same, or caused it to be erected.

Council may remove encroachments.

59. In any case where, after service of notice for the removal of any obstruction or encroachment as aforesaid, the person causing the same shall not remove it within a reasonable time, it shall be lawful for the Council to direct the removal of the same under the superintendance of its own proper officer, and at the cost of the person so offending, provided that the expenses thereby incurred shall in no case exceed the sum of ten pounds, or, at the Council's option, to proceed against the offender for breach of by-law, the penalty not to exceed twenty-five pounds, nor be less than one pound; and, in case of every successive offence, the penalty, on conviction, not to be less than five pounds.

Or may proceed by action.

60. In every case where the obstruction or encroachment cannot be removed unless at a greater cost than ten pounds, it shall be open to the Council, either to direct such removal and to pay all the costs thereof above ten pounds from the funds of the Council, or to proceed by action for trespass against the person causing such obstruction or encroachment, or to proceed as for a breach of such by-laws as aforesaid.

To apply also to obstructions by digging, &c.

61. The foregoing provisions shall be equally applicable to all obstructions by digging or excavation; and any person who shall wilfully obstruct or interfere with the Surveyor or other officer as aforesaid, or any person acting for or under him, or either of them in the exercise of any of the duties or powers by these By-laws imposed or cast on the said surveyor or officer, shall, on conviction, forfeit and pay a penalty of not less than two pounds or more than twenty pounds.

Offences, Nuisances—General good order of the Borough.

Damaging public buildings, &c.

62. Any person who shall damage any public building, wall, parapet, sluice, bridge, road, street, sewer, watercourse, or other property of the Municipality, shall pay the cost of repairing the same; and if the same be wilfully done, shall also forfeit and pay a sum not exceeding twenty pounds nor less than five pounds: Provided that such cost and penalty shall not exceed in the whole the sum of fifty pounds.

Injuring public fountains, &c.

63. Any person who shall injure any public fountain, pump, cock, or water-pipe, or any part thereof, shall pay the cost of repairing the same; and if the injury be wilfully done shall also forfeit a sum not exceeding twenty pounds nor less than one pound; and any person who shall have in his possession any private key for the purpose of opening any cock, or who shall in any manner clandestinely or unlawfully appropriate to his own use any water from any public fountain or pipe, shall forfeit a sum not exceeding twenty pounds nor less than five pounds; and any person who shall open or leave open any cock of any public fountain or pump, so that the water shall or may run to waste, shall forfeit a sum not exceeding two pounds nor less than five shillings; and any person who shall wash any clothes, omnibus, carriage, cart, or other vehicle, or any horse, at any public fountain or pump, shall forfeit and pay a sum not exceeding one pound nor less than five shillings.

Injuring or extinguishing lamps.

64. Any person who shall wantonly or maliciously break or injure any lamp or lamp-post, or extinguish any lamp set up for public convenience in the said Borough, shall, over and above the necessary expense of repairing the injury committed, forfeit and pay for such offence any sum not less than one pound nor more than five pounds.

Damaging trees.

65. Any person who shall wilfully, and without the authority of the Council, cut, break, bark, root up, or otherwise destroy or damage the whole or any part of any tree, sapling, shrub, or underwood, growing in or upon any street or place under the management of the Council, shall forfeit any sum not exceeding ten pounds nor less than two pounds.

Throwing dead animals, &c., into any watercourse, &c.

66. Any person who shall throw or cast any filth, rubbish, or any dead animal, or any animal with intent to drown the same, into any watercourse, waterhole, river, creek, or canal, or who shall permit or suffer slops, suds, nightsoil, sewerage matter or filth of any kind to flow or be cast from his or her premises into any such watercourse, waterhole, river, creek, or canal, or who shall permit or suffer any such slops, suds, or filth to flow from his or her premises over any of the footways or streets of the Borough, or shall permit, or cause by means of pipes, shoots, chunnels, or other contrivances, nightsoil, sewerage matter, slops, suds, or filth of any kind whatsoever to flow or be cast into any watercourse, waterhole, river, creek, or canal, or shall obstruct or divert from its channel any sewer or watercourse, river, creek, or canal, shall forfeit any sum not exceeding five pounds nor less than one pound, and shall in addition to any such forfeiture, pay the cost of removing such filth or obstruction, or of restoring such watercourse or canal into its proper channel.

Throwing filth on roadway, &c.

67. If any person shall, in any street, road, lane, or public place, throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid any ashes, rubbish, dung, soil, dead animal, blood, or other filth, or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other animal, in or so near to any of the said streets or roads as that any blood or filth shall run or flow upon or over, or be on any carriage or footway, or shall run, roll, drive, draw, place, or cause, permit or suffer to be run, rolled, driven, drawn, or placed upon any footway, any waggon, cart, dray, sledge, or other carriage, or any wheelbarrow, or truck, or any ca-k, or shall wilfully lead, drive, or ride any horse or other beast upon any footway aforesaid, shall forfeit and pay a sum not exceeding five pounds nor less than one pound.

Placing goods, &c., on roadway, &c.

68. If any person shall set or place, or cause or permit to be set or placed, any stall, show-board, basket, or goods of any kind whatsoever, or shall hoop, place, wash or cleanse, or cause to be hooped, placed, washed, or cleansed, any ca-k or vessel in or upon, or over any road, footway, or public place, within the said Borough, or shall set out, lay or place or, shall cause or procure, permit or suffer to be set out, laid, or placed, any coach, cart, dray, barrow, truck, or other carriage, upon any footway, or if any person shall set or place, or cause to be set or placed, in, upon, or over any of the said carriage or footways, any timber, stones, bricks, lime, or other materials or things for building whatsoever (unless the same shall be enclosed as hereinafter directed), or any other matters or things whatsoever; or shall hang out or expose, or shall cause or permit to be hung out or exposed, any meat or offal, or other thing or matter whatsoever from any house or premises, over any part of such footways or carriage-ways, or over any area of any house, or premises, or any other matter or thing from and on the outside or any part of any house or premises, or over or next to any such street or road, and shall not immediately remove all or any such matters or things, being thereto required by the Council or any officer thereof, and shall not continue and keep the same so removed; or if any person having, in pursuance of any such requisition as aforesaid, removed, or caused to be removed, any such stall, showboard, basket, goods, coach, cart, dray, barrow, truck, carriage, timber, stone, brick, lime, meat, offal, or other matters or things, and shall at any time thereafter again set, lay, or place, expose, or cause, procure, permit, or suffer to be set, laid, placed, or exposed, the same or any of them, or any other article or thing whatsoever (save and except as aforesaid) in, upon, or over any of the carriage or footways of or next unto any streets or roads as aforesaid,—in every such case every person so offending shall forfeit and pay a sum not exceeding forty shillings nor less than ten shillings.

Drawing or trailing timber, &c.

69. If any person shall haul or draw, or cause to be hauled or drawn, upon any part of any street, road, or public place, any timber, stone, or other thing, otherwise than upon wheeled carriages, or shall suffer any timber, stone, or other thing which shall be carried principally or in part upon wheeled carriages, to drag or trail upon any part of such street or public place to the

injury thereof, or to hang over any part of such carriage so as to occupy or obstruct the street or road beyond the breadth of the said carriage, every such person so offending shall forfeit and pay for every such offence the sum of forty shillings over and above the damages occasioned thereby: Provided that such penalty and damages shall not together exceed the sum of fifty pounds.

No turf, gravel, &c., to be removed from streets with leave, &c.

70. Any person who from any part of the roads, streets, thoroughfares, or public places shall remove or cause to be removed any turf, clay, sand, soil, gravel, stone, or other material, without leave first had and obtained from the officers or persons having lawful charge of such roads, streets, thoroughfares, or public places, or who shall wantonly break up or otherwise damage any part of the said roads, streets, thoroughfares, or public places, shall, on conviction, forfeit and pay for every such offence any sum not exceeding five pounds nor less than five shillings, and for every subsequent offence shall forfeit and pay a sum of not less than one pound.

No driver to ride on vehicle without a person to guide his beasts (vehicles with reins excepted), or go to a distance from his vehicle, or drive on wrong side, &c.

71. If the driver of any waggon, cart, dray, or vehicle of any kind, shall ride upon the same in any street, road, or thoroughfare, not having some person on foot to guide the animals drawing the same (such vehicles as are drawn by horses driven or guided with reins only excepted), or if the driver of any carriage or vehicle whatsoever shall wilfully be at such a distance from such carriage or vehicle, or in such a situation whilst it shall be passing upon such street, road, or thoroughfare, that he cannot have the direction or government of the horse or horses, or cattle drawing the same; or if the driver of any waggon, cart, dray, coach, carriage, or other vehicle, shall not drive on the left or near side of any such road, street, or thoroughfare; or if any person shall in any manner wilfully prevent any other person or persons from passing him or her, or any vehicle under his or her care, upon such street, road, or thoroughfare, or by negligence or misbehaviour prevent, hinder, or interrupt the free passage of any person or vehicle, or carriage, in or upon the same—every such driver or person so offending shall forfeit and pay for every such offence any sum not exceeding forty shillings nor less than ten shillings.

As to riding or driving improperly through streets, &c.

72. Any person who shall ride or drive through any road, street, or public place negligently, carelessly, or furiously, or so as to endanger the life or limb of any person, or to the common danger of the passengers, shall forfeit and pay a sum not exceeding ten pounds, nor less than two pounds.

Affixing placards on walls, and chalking thereon.

73. It shall not be lawful for any person to paste or otherwise affix any placard or other paper upon any wall, fence, house, or building, nor to deface any such wall, fence, house, or building by chalk or paint, or in any other manner, unless with the consent of the owner thereof. And any person who shall be guilty of any such offence shall forfeit and pay a sum not exceeding ten shillings.

Cattle, &c., not to wander about streets, &c.

74. It shall not be lawful for any person to suffer any kind of cattle, horse, ass, mule, sheep, swine, or goat belonging to him, or under his charge, to stray or go about, or to be depastured in any road, street, or public place, in this Borough; and any person who shall so offend shall forfeit and pay, in respect of every such offence a sum not exceeding forty shillings nor less than five shillings.

Restrictions on certain trades, &c.

75. It shall not be lawful for the business of soap-boiler, tallow-melter, tripe-boiler, tanner, carrier, or pig-keeper, or any other occupation, trade, or manufacture of an obnoxious or unwholesome nature, prejudicial to the health of or otherwise offensive to any of the inhabitants thereof, to be commenced or established within the limits of this Borough; and that from and after the first day of May, in the year of our Lord one thousand eight hundred and eighty, the business of a soap-boiler, tallow-melter, tripe-boiler, tanner, carrier, or pig-keeper, or any other obnoxious, offensive, or unwholesome occupation, trade, or manufacture, as aforesaid, which has been already commenced or established shall not be continued or carried on within the limits of this Borough; and whosoever shall offend against this By-law shall forfeit and pay, on conviction, a penalty not exceeding fifty pounds nor less than ten pounds; and a further sum of two pounds for each and every day during which he continues to offend: Provided that notice in writing shall be given to the person engaged in any such trade, manufacture, or occupation, and if he shall discontinue the same within six months from the day on which he receives such notice, he shall not be liable to any penalty in that regard.

Removal of nightsoil.

76. It shall not be lawful for any person or persons to drive, or cause to be driven, any cart or carriage of any kind with any night-soil, ammoniacal liquor, slop, urine, or channel dirt or filth, in or upon or near to any of the said streets, roads, or other public places; and in order to prevent nuisances it shall not be lawful for any person to deposit night-soil, ammoniacal liquor, or other offensive matter, nearer to any street, road, or dwelling-house than shall be directed by the said Council or its officer; and all night-soil and other offensive matter shall be removed within the hours hereinafter prescribed, in properly-covered and water-tight carts or other vehicles; and no vehicles used for this purpose shall be allowed to stand on any premises nearer to any road, street, or dwelling-house than shall be directed by the said Council or its officer; and every person offending against this By-law shall for every such offence forfeit and pay a sum not exceeding five pounds nor less than ten shillings.

Hours for removing nightsoil, &c.

77. If any person shall take away night-soil from any house or premises within the said Borough, or shall come with carts or carriages for that purpose, except between the hours of 10 at night and 5 in the morning, or if any person or persons shall cast, or permit to leak or slop out of any cart or tub, or otherwise, any night-soil in or near any of the streets or public places, he shall forfeit and pay a penalty of five pounds for every such offence; and in case the person or persons so offending cannot be found, then the owner or owners of such cart, carriage, or other vehicle employed in and about emptying and removing such night-soil, and also the employer or employers of the person or persons so offending, shall be liable to and forfeit and pay such penalty as aforesaid.

Inspection of premises. Yards, &c., to be kept clean.

78. Upon the reasonable complaint of any householder, that the house, premises, yards, closets, or drains of the neighbouring or adjoining premises, are a nuisance or offensive, the Inspector of Nuisances, or any other person appointed by the Council, shall make an inspection of the premises complained of; and the officers of the Council shall have full power, without any other authority than this By-law, to go upon such premises for the aforesaid purpose. Any owner or occupier of any house or place within the said Borough who shall neglect to keep clean all private avenues, passages, yards, paddocks, and ways within, attached to, or occupied in conjunction with the said house or place so as by such neglect to cause a nuisance by offensive smell, shall forfeit and pay a sum not exceeding forty shillings and not less than ten shillings.

Discharging firearms, &c.

79. Any person who shall discharge any firearms without lawful cause, or let off any fireworks or other explosive matter in or near to any road or street, shall forfeit and pay a sum not exceeding five pounds nor less than ten shillings.

No rock to be blasted without notice to the Surveyor, &c.

80. Any person who shall be desirous of blasting any rock within the distance of 100 feet of any dwelling-house, street, road, or other public place, shall give notice in writing twenty-four hours previously, to the said Council or Surveyor thereof, who shall appoint in writing a time when the same may take place, and give such other directions as they or he may deem necessary for the public safety; and if any person shall blast or cause to be blasted any rock within the limits aforesaid, without giving such notice, or shall not conform to the directions given to him by the said Council or Surveyor, he shall forfeit and pay for every such offence a sum not exceeding twenty pounds nor less than one pound, and for every subsequent offence shall pay a penalty of not less than five pounds.

Entrance to cellars, &c., to be covered, &c.

81. If the owner or occupier of any premises, having any rails or bars over the areas or openings to any kitchen or cellars or other part of the said premises beneath the surface of the footway of any streets or public places, or having any doorway or entrance into the basement or cellar story thereof, shall not either keep the same, or the rails of such kitchen, cellars, or other parts, in sufficient and good repair, or constantly keep the same securely guarded by rails, or cover the same over with a strong flap or trap-door, according to the nature of the case, and so as to prevent danger to persons passing and re-passing; or if any such owner or occupier shall leave open, or not sufficiently or substantially keep covered and secured, any coal or other hole, funnel, trap-door, or cellar-flap, belonging to or connected with his premises (save and except only during reasonable time for use, alteration, or repair); or, if such owner or occupier shall not repair, and from time to time keep in good and substantial repair, all and every or any such rails, guard-rails, flaps, trap-doors, and other covering, then and in every such case the person neglecting so to do shall, for every such offence, forfeit and pay a sum not exceeding five pounds nor less than forty shillings.

Cellars or openings beneath footways prohibited.

82. It shall not be lawful for any person to make any cellar, or any opening, door, or window in or beneath the surface of the footway of any road, street, or public place, within the said Borough, except by permission of the Council; and if any person shall so offend, he shall forfeit and pay any sum not exceeding five pounds over and above the expense of remedying or removing any such cellar, opening, door, or window, such expense to be assessed and allowed by the convicting Justice or Justices: Provided that such expense and penalty shall not together exceed fifty pounds.

Wells to be covered over, &c.

83. Every person who shall have a well situated between his dwelling-house or the appurtenances thereof, and any public place, road, street, or footway, within the limits of the said Borough, or at the side of such public place, road, street, or footway, or in any yard or place open and exposed to such public place, road, or footway, shall cause such well to be securely and permanently covered over; and if any person having such well as aforesaid shall fail to cover and secure the same within twenty-four hours after notice in writing shall have been given to him or her by any officer of the said Council, or shall have been left at such person's usual or last known abode, or at the said premises, in the manner and with such materials as the Council or its officer shall direct, and to their satisfaction, such person shall forfeit and pay a sum not exceeding ten shillings for every day that such well shall remain open or uncovered contrary to the provisions hereof: Provided that, with respect to wells open at the time when this By-law shall come into operation, such penalty shall not be recoverable if the same be properly covered within one week thereafter.

Holes made for vaults, &c., to be enclosed, &c.

84. If any person shall dig or make, or cause to be dug or made, any hole, or leave, or cause to be left, any hole in or adjoining any street, road, lane, or public place, for the purpose of making any vault or vaults, or the foundation or foundations to any house or other building, or for any other purpose whatsoever, and shall not forthwith enclose the same in a good or sufficient manner, and keep up or cause to be kept up and continued, any such enclosure, or shall not, when thereunto required by the said Council or officer thereof, well and sufficiently fence or enclose any such hole, within the time and in the manner provided by the preceding By-laws, and shall not place a light upon the said enclosure and keep the same constantly burning, from sunset to sunrise, during the continuance of such enclosure, then and in every such case the person so offending shall forfeit and pay for every such offence and for every such refusal or neglect, any sum not exceeding five pounds nor less than ten shillings, and on conviction for every subsequent offence not less than one pound.

Excavation, &c., to be protected by fence or wall.

85. It shall not be lawful for any person to make any quarry, excavation, or opening in the ground, on any property adjoining or near to any public road or footpath within the limits of this Borough, until the owner or occupier of the said property shall have erected a good substantial fence or wall at the least four feet high around such parts of the said property as adjoin such public road or foot-path; and any person neglecting or refusing to enclose any premises upon which any such quarry or excavation shall be made, shall forfeit and pay for every such offence a sum not exceeding five pounds nor less than ten shillings; and all existing quarries, excavations, or precipices situated within the limits of this Borough shall be closed and protected in the manner aforesaid, within one month after due notice to that effect shall have been given by the said Council; and in the event of the failure or neglect of the owner or occupier of any such lastmentioned property to enclose the same, after notice as aforesaid, such persons so offending shall be subject to the penalty beforementioned.

Various obstructions and annoyances.

86. Every person who, in any street or other public place or passage within the said Borough, shall commit any of the following offences, shall on conviction for any and every such offence forfeit and pay a penalty of not more than two pounds:—

Every person who shall hoist, or cause to be hoisted, or lower, or cause to be lowered, goods of any description from any opening in any house fronting any street or public place, and close to the footway thereof, without sufficient and proper ropes and tackling.

Every person who shall carry or convey, or cause to be carried or conveyed in any street or public place, the carcase, or any part of the carcase of any newly slaughtered animal, without a sufficient and proper cloth covering the same, for the concealment from public view, or shall hawk or carry about butchers' meat for sale, without covering the same as aforesaid.

Every person who shall place any line, cord, or pole across any street, lane, or passage, or hang or place clothes thereon to the danger or annoyance of any person.

Every person who shall place any flower-pot in any upper window, near to any street or public place without sufficiently guarding the same from being thrown down.

Every person who shall throw or cast from the roof, or any part of any house or other building, any slate, brick, wood, rubbish, or other material or thing (unless within a hoard or enclosure, when any house or building is being erected, pulled down, or repaired).

Every blacksmith, metal-founder, lime-burner, brick-maker, potter, or other person, using a forge, furnace, or kiln, and having a door, window, or aperture fronting or opening into or towards any street, lane, or passage, and not enclosing such door, or not fastening the shutters or other fastenings of such window, and closing such aperture, or placing a screen before the same every evening, within one hour after sunset, so as effectually to prevent the light from showing through the doorway, window, or aperture next or upon such street, lane or passage.

Every person who shall, within the distance of one hundred yards from any dwelling-house, burn any rags, bones, cork, or other offensive substance (garden refuse excepted), to the annoyance of any inhabitant.

Every person who shall carry goods or any frame to the annoyance of any person upon any public footway.

Every person who shall be the keeper of or have any dog or other animal which shall attack or endanger the life or limb of any person in any street or other public place within the said Borough.

Noisome and offensive trades.

No noisome or offensive trades to be carried on to injury of any inhabitant.

87. No person shall carry on any noisome or offensive trade within the said Borough, so as to injure or be a nuisance as hereinafter stated to the inhabitants thereof.

Definition of "noisome and offensive trades."

88. Any manufacture, trade, calling, or operation, in the conducting, following, or carrying on of which, or in consequence of, or in connection wherewith, or from the premises where the same is conducted, followed, or carried on, any gas, vapour, effluvia, liquid, or any large quantities of smoke shall be evolved or discharged, which gas, vapour, effluvia, liquid, or smoke, shall be calculated to injure animal or vegetable life, or in any other way to injure or be a nuisance to the inhabitants of the said Borough, shall be considered "a noisome and offensive trade" within the meaning of these By-laws.

Complaint—Inquire and report—Order of Council thereon—Notice to discontinue, &c.—Penalty.

89. Upon complaint, in writing, by any householder that any noisome or offensive trade is being so followed, conducted, or carried on in the vicinity of his or her residence or property, as to injure his or her health, or the health of any member of his or her family, or to be a nuisance to such householder, and to his or her family, the Inspector of Nuisances, or any other person or persons appointed by the Council, shall make an inspection of the premises where such trade is alleged to be so conducted, followed, or carried on, and of the premises or property of the complainant, and shall inquire into the grounds for such complaint, and shall report thereon to the said Council; and if the said Council shall, on the consideration of such report, or after any such further inquiry as may be deemed necessary, be of opinion that the said complaint is well founded, and that any manufacture, trade, calling, or operation so complained of, and so being conducted, followed, or carried on as aforesaid, is a "noisome or offensive trade" within the meaning of these By-laws, notice shall be given to the person or persons conducting, following, or carrying on such trade, to cease and discontinue the same within such reasonable time, not being less than thirty days, nor more than sixty days, as the said Council may direct, or so to conduct, follow, or carry on his, her, or their manufacture, trade, calling, or operation, as that within such reasonable time as aforesaid, the same shall wholly and permanently cease to be noisome and offensive within the meaning of these By-laws, either to the said complainant, or to any other resident within the said Borough; and if such trade shall not be discontinued or shall not be so conducted as that it shall wholly cease to be noisome and offensive within the time named in such notice as aforesaid, any person conducting, following, or carrying on such trade as aforesaid, shall for the first offence forfeit and pay a sum of not less than forty shillings, nor more than five pounds; for a second offence a sum of not less than five pounds, nor more than twenty-five pounds; and for a third and every subsequent offence, a sum of not less than ten pounds nor more than fifty pounds.

Mode of proceeding when "noisome or offensive trade" is about to be commenced—Penalty.

90. The like proceedings shall be taken whenever there shall be a complaint as aforesaid that any manufacture, trade, calling, or operation is about to be commenced or entered upon which is likely to prove "noisome and offensive" within the meaning of these By-laws, and the notice to be given as aforesaid shall be given to the person or persons about to commence or enter upon such manufacture, trade, calling, or operation, and shall require him, her, or them, not to commence or enter upon the same, and the Council shall take such measures as shall effectually and permanently prevent the same from becoming "noisome or offensive" within the meaning of these By-laws to any resident within the Borough. And any person who shall in any such case commence, enter upon, or continue any such manufacture, trade, calling, or operation, so that the same shall be in any way "noisome or offensive" within the meaning of these By-laws, shall for every such offence forfeit and pay a sum of not less than ten pounds, nor more than fifty pounds.

Service of notice—Liabilities.

91. Service of any such notice as aforesaid upon the occupier or owner of any premises or land wherein or whereon any such manufacture, trade, calling, or operation is being conducted, followed, or carried on, or is about to be commenced or entered upon, or at the last known place of abode of such occupier or owner, or upon any person on the said premises or land, shall be a good and sufficient service of such notice for all the purposes of these By-laws. And every person who shall be actually engaged in superintending, directing, or managing, or who shall be in any other way actually engaged or employed in any such manufacture, trade, calling, or operation as aforesaid, shall be liable to be regarded and treated as a person conducting, following, or carrying on such manufacture, trade, calling, or operation, within the meaning and for all the purposes of these By-laws.

Public Health.

Houses to be purified on certificate of two medical practitioners.

92. If, upon the certificate of any duly qualified medical practitioner, it appear to the Council that any house, or part thereof, or the premises occupied in connection therewith, within the limits of the said Borough, is in such a filthy or unwholesome condition that the health of any person is or may be liable to be affected or endangered thereby, and that the whitewashing, cleansing, purifying, or fumigating of any house, or part thereof, or the premises occupied in connection therewith would tend to prevent or check infectious or contagious disease, the said Council shall give notice, in writing, to the owner or occupier of such house or part thereof or the premises occupied in connection therewith, to whitewash, cleanse, purify, or fumigate the same, as the case may require; and if the person to whom notice is so given shall fail to comply therewith within the time specified in the said notice, he or she shall be liable to a penalty not less than forty shillings nor more than ten pounds. Provided that each day during which such house shall, after such notice as aforesaid, remain uncleansed or unfumigated, shall be a separate offence. Provided also that no such penalties shall collectively amount to any greater sum than fifty pounds.

Sale or letting of infected premises or goods.

93. If any person shall sell, let, or cause to be sold or let, any dwelling house or part thereof, or premises occupied in connection therewith in the said Borough, which then is, or shall have been within thirty days prior to the date of such sale or letting, occupied by any person suffering from any infectious or contagious disease, without giving due notice thereof to the person or persons purchasing, renting, or hiring any such house or premises, the person so selling, letting, or causing to be sold or let, shall be liable to a penalty not exceeding fifty pounds nor less than ten pounds. And any person who shall sell, let, or cause to be sold or let, in the said Borough any article of furniture, bedding, household, or personal effects, knowing the same to have been within three months prior to the date of such sale or letting used by any person or persons suffering from any infectious or contagious disease, shall forfeit and pay a sum not exceeding fifty pounds nor less than ten pounds.

Exposing infected articles.

94. Any person who shall expose, or cause to be exposed, in any road, street, public place, or unenclosed land adjacent to any dwelling, road, street, public place, any article whatsoever, knowing the same to have been in the use or occupation of any person suffering from any infectious or contagious disease within thirty days prior to the date of such exposure as aforesaid, shall forfeit and pay a sum not exceeding fifty pounds nor less than ten pounds.

95. No kind of rubbish or offensive matter shall be thrown upon any public or private property within the Borough without permission first obtained from the Municipal Council and the owner or owners of such property. Persons found guilty of a breach of this By-law shall forfeit and pay for every such offence any sum not exceeding two pounds nor less than ten shillings.

Sewerage and Drainage.

No private sewers to be made to communicate with the public sewers without notice.

96. It shall not be lawful for any person, without notice to the Council or otherwise than according to such plans and directions as such Council make and give, to make or branch any private drain or sewer into any of the public drains or sewers, or into any drain or sewer communicating therewith; and in case any person or persons shall make or branch any private drain or sewer communicating or to communicate therewith without such notice, or otherwise than as aforesaid, every person so offending shall for every such offence forfeit and pay any sum not exceeding fifty pounds, and shall, at his own expense, make good all roads, streets, kerbing, &c., which shall have been injured by or through any such work; and all such repairs shall be performed to the satisfaction of such officer as the Council shall appoint to superintend such work; and any person who shall do or perform anything contrary to this clause, or shall neglect to make good all such damage as aforesaid, shall on conviction thereof forfeit and pay any sum not exceeding fifty pounds nor less than one pound.

Proprietors of private sewers, &c., to repair and cleanse same.

97. All private drains or sewers communicating with any public drain or sewer shall from time to time be repaired and cleansed under the inspection and direction of the Council or officer thereof, at the costs and charges of the occupiers of the houses, buildings, lands, and premises to which the said private sewers or drains shall respectively belong; and in case any person shall neglect to repair and cleanse, or cause any such private drain or sewer to be repaired and cleansed according to the directions of the said Council, he shall forfeit and pay for every such offence any sum not exceeding five pounds.

Water from roofs, &c.

98. Every owner or occupier of any dwelling-house, shop, or other building who shall permit rainwater to fall from any roof, balcony, or other projection, upon any street, road, lane, or footway, or shall cause or permit any such roof or rainwater to be discharged by any pipe, upon any such street, road, lane, or footway, shall, if such nuisance be not abated within seven days after notice to abate the same shall have been given by the Council, forfeit and pay for every such offence a sum not exceeding five pounds nor less than one pound.

Drains in footpaths.

99. No surface-drain shall be made in any foot-path, nor any pipes laid under or across the same, without the authority of the Council; and no such pipe or drain shall be used for the discharge into any street or roadway of any offensive liquid or matter of any kind whatsoever; and any person who shall so offend shall forfeit and pay any sum not exceeding fifty pounds nor less than one pound.

Drains for discharge of surface water from land.

100. Every owner or occupier of land so situated that surface or storm water from or upon the same shall overflow, or shall tend naturally, if not otherwise discharged, to overflow any road, lane, or footway, shall within seven days next after the service of notice by the Council abate such nuisance where possible; and in default of compliance with any such notice within the period aforesaid, such owner or occupier shall forfeit any sum not exceeding five pounds; and if within seven days after such conviction such owner or occupier shall still have failed to comply with such notice, or be otherwise in default as aforesaid, he shall forfeit and pay any sum not less than one pound nor more than ten pounds, and for every further such offence he shall forfeit and pay any sum not less than two pounds nor more than twenty pounds: And every such owner or occupier who shall still have made default as aforesaid for more than seven days after such second or any future conviction, shall be held guilty of a further offence within the meaning of this section.

Natural watercourses.

101. Any person who shall close or intercept any natural watercourse, by building or otherwise, shall provide another outlet for the surface-water with pipes or sewers of a size, and in a manner to be approved by the Council, and any person failing to comply with the provisions of this By-law shall forfeit and pay a sum not exceeding fifty pounds nor less than five pounds.

Preventing and extinguishing fires.

Fire or combustible materials, &c.

102. Every person who shall place, or knowingly permit to be placed, in any house, yard, workshop, out-offices, or other premises, fire, gunpowder, or combustible or inflammable article of any kind, in such a manner as to endanger contiguous buildings (except with the consent of the owners and occupiers thereof), shall on conviction for every such offence forfeit and pay a penalty of not more than five pounds nor less than one pound; and shall forthwith remove such fire, gunpowder, or combustible or inflammable article. And every such person who shall suffer any such fire, gunpowder, or combustible or inflammable article to remain as aforesaid for forty-eight hours after any such conviction shall be deemed guilty of a further offence against this By-law.

Inflammable fences, &c.

103. Every person who shall erect any fence of brushwood, bushes, or other inflammable material, or shall make or place any stack of hay, corn, straw, or other produce, or place as or for the covering of any such stack, any inflammable material or shall place, keep, or store any hay, straw, or other inflammable material in any building, so as to endanger contiguous buildings or properties, or any trees, shrubs, or other produce of such properties, or any chattels in or upon such buildings or properties, shall forfeit, on conviction for every such offence, a penalty of not more than five pounds nor less than one pound, and also shall remove such fence, stack, covering, or inflammable material within forty-eight hours after such conviction. And any person failing to remove such fence, stack covering, or inflammable material within a reasonable time after any such conviction as aforesaid shall be deemed guilty of a further offence against this By-law.

Burning shavings, &c. in streets.

104. Any person burning any shavings, or other matters or things, in any street, road or public place, shall forfeit and pay a sum not exceeding forty shillings nor less than five shillings.

Fireworks.

105. Every person who shall light any bon-fire, tar barrel, or firework upon or within sixty feet of any building, public or private street, or any public place, or shall sell gunpowder, fireworks, or other combustible matter by any artificial light, other than gas, shall forfeit a sum not exceeding five pounds.

Wilfully setting fire to Chimneys.

106. Every person who wilfully sets, or causes to be set on fire, any chimney, flue, smoke-vent, or stove-pipe, herein called in common a "Chimney," shall forfeit a sum not exceeding five pounds.

*Public Amusements.**Unlawful Games.*

107. No games with dice or other games of chance for money, prize fighting, or any dog-fighting, cock-fighting, or other exhibition or entertainment opposed to public morality, or involving cruelty to animals, or likely to cause a breach of the peace, shall be established, held or given within this Borough, and any person or persons who shall establish, hold, give, or cause to be established, held or given any such game, exhibition or entertainment shall for every such offence forfeit and pay a sum of not less than ten pounds or more than fifty pounds.

*Water Supply.**Polluting water, reservoirs, &c.*

108. Whosoever shall bathe in any stream, reservoir, conduit, aqueduct, or other water-works belonging to or under the management or control of the Council, or shall wash, cleanse, throw, or cause to enter therein, any animal, whether alive or dead, or any rubbish, filth, or thing of any kind whatsoever, or shall cause or permit to suffer to run, or to be brought therein, the water of any sink, sewer, drain, engine, or boiler, or other filthy, unwholesome, or improper liquid, or shall wash any clothes at any public fountain or pump, or in or at any such stream, reservoir, conduit, aqueduct, or other waterworks as aforesaid, or shall do anything whatsoever whereby any water or water-works belonging to the said Council, or under their management or control, shall be fouled, obstructed, or damaged, shall for the first offence forfeit and pay any sum not exceeding five pounds; for a second offence, any sum not less than one pound nor more than ten pounds; and for a third and every subsequent offence, any sum not less than five pounds nor more than twenty pounds.

Damming up water without consent.

109. Whosoever shall, without the consent in writing of the Council, construct or place any dam or embankment in or across any river, creek, or natural water-course, shall forfeit and pay any sum not less than one pound, nor more than twenty pounds, and shall remove such dam or embankment within a reasonable time after such conviction or shall forfeit and pay any sum not less than five pounds nor more than fifty pounds, and if after such second conviction, such person shall fail to remove such dam or embankment within a further reasonable time, he shall forfeit and pay a sum of not less than twenty pounds nor more than fifty pounds; and if within a reasonable time after a third or any further conviction he shall fail to remove such dam or embankment, he shall for every such offence forfeit and pay a sum of fifty pounds.

Supply of water in time of drought.

110. In time of drought or scarcity of water the Council may, by resolution to that effect, cause water to be supplied to the inhabitants of this Borough by water-carts or otherwise, and shall, by such resolution as aforesaid, fix a price to be charged for water so supplied.

Trees in streets.

111. The Council shall have power to plant trees in the streets and public ways of this Borough, and any person wilfully injuring or destroying any of such trees, or any railing or fence protecting the same, shall on conviction forfeit and pay a penalty of not more than ten pounds nor less than two pounds, in addition to the value of the tree, railing, or fence so injured or destroyed.

By-laws of the Borough of Camperdown, made under and for carrying into effect the provisions of the Nuisances Prevention Act, 1875.

1. Every person who shall be about to erect a closet, or form, excavate, or make a cesspit, shall, before he shall commence to erect such closet, or to form, excavate, or make any such cesspit, deliver to the Council Clerk of the said Borough of Camperdown a notice in writing of the intention of such person to erect such closet, or form, excavate, or make such cesspit, and of the place or position in which it is intended that such closet shall be erected or such cesspit formed, excavated, or made, and if any person shall commence to erect any closet, or to form, excavate, or make any cesspit within the said Borough, without having given such notice in writing as aforesaid, and before the expiration of seven days after the delivery of such notice (except by the written authority of the Inspector of Nuisances for the said Borough, or other officer for the time being appointed by the Council of the said Borough in that behalf) he shall forfeit and pay a penalty of not less than one pound nor more than five pounds.

2. No person shall erect or commence to erect any closet, or to form, excavate, or make any cesspit, except in such place or position as shall be approved by the said Inspector of Nuisances or other officer as aforesaid; and any person who shall erect or commence to erect any closet or to form, excavate, or make any such cesspit without having obtained the approval of the said Inspector or other officer, or in any place or position other than the place or position approved of by the said Inspector or other officer as aforesaid, shall forfeit and pay a penalty of not less than ten shillings nor more than forty shillings. But any person who shall feel aggrieved by the decision of such Inspector or other officer may appeal against the same to the Council.

3. Every cesspit shall be at least 4 feet long by 3 feet wide by internal measurement, and shall be at least 4 feet (but not more than 6 feet) below the service of the ground, and the top of such cesspit shall be at least 6 inches higher than the highest part of the surface of the ground immediately adjoining such cesspit, and every such cesspit shall have walls on each side of brick or stone of at least 4½ inches thick and such walls shall be built in cement and rendered at least ½ an inch thick inside with cement, in such manner as to make such walls thoroughly watertight, and no cesspit shall be formed, excavated, or made under any dwelling-house, nor at a less distance than 6 feet therefrom; and if any person shall form, excavate, or make any cesspit which shall not be in accordance with the provisions of this By-law, or shall form, excavate, or make any cesspit under any dwelling-house or at a less distance than 6 feet therefrom, he shall forfeit and pay a penalty of not less than one pound nor more than five pounds.

4. Every closet shall be built with walls 7 feet high, and shall not be less than 3 feet 6 inches wide, and 4 feet 6 inches long, and shall be provided with a door capable of being fastened inside; and every person who shall build or erect any closet which shall not be in accordance with this By-law shall forfeit and pay a penalty of not less than ten shillings nor more than forty shillings.

5. Where two or more closets adjoin each other there shall be a sufficient dividing wall not less than nine inches in thickness between every two closets, and such wall shall extend from the bottom of the cesspit through the roof of the closet, so as to effect a complete separation, and if any person shall erect any two or more closets adjoining each other and not in accordance with this By-law, he shall forfeit and pay a penalty of not less than ten shillings nor more than forty shillings.

6. A separate closet shall be provided for each tenement, and any person offending against the provisions of this By-law shall forfeit and pay a penalty of not less than two pounds nor more than five pounds.

7. In schools, factories, or other places of business where a number of persons exceeding twelve shall ordinarily reside, or be occupied, or employed, one closet shall be provided for every twenty persons, with a cesspit of a capacity of not less than 80 cubic feet, and separate closets shall be provided for each sex; and every owner, occupier or tenant of any such school, factory or other place of business, and every other person who shall offend against this By-law or fail to provide the number of closets and of the capacity in this By-law mentioned, shall forfeit and pay a penalty of not less than one pound nor more than five pounds.

8. If any alteration shall be requisite in the opinion of the Inspector of Nuisances or other officer appointed by the Council in their behalf, for preserving public health or decency in the case of any existing cesspit or closet, and the Council shall adjudge such cesspit or closet to be injurious to the health or opposed to decency by exposure or otherwise, and the owner or occupier shall not make the necessary alterations after receiving fourteen days' notice from the Council Clerk, it shall be lawful for the Inspector of Nuisances or other officer appointed by the Council to remove the said nuisance, and any expense incurred thereby may be sued for and recovered in a summary way before any two or more Justices of the Peace.

9. The place of deposit for night-soil shall be in such locality as may be from time to time determined upon by the Council.

10. Until otherwise provided for by the Council all night-soil shall be removed from cesspits, by contract, in watertight covered vehicles, between the hours of 10 o'clock in the evening and five o'clock in the morning, and if any person shall remove from any cesspit any night-soil in any other manner or at any other time than as provided by this By-law he shall forfeit and pay a penalty of not less than one pound nor more than five pounds.

11. In case the Council shall sell or give away any night-soil, the same shall be removed in the same manner and between the same hours as above provided, and on being removed from the vehicles in which it is carried, shall be deodorized by chemicals or in some other effective manner, or covered with earth so as to prevent any offensive smell arising therefrom; and if any offensive smell shall arise therefrom, the person or persons to whom the said night-soil shall be sold or given, shall forfeit and pay a penalty of not less than one pound nor more than five pounds.

12. The Inspector of Nuisances or other officer appointed by the Council, may visit and inspect any premises, or do any work authorized by the Nuisances Prevention Act of 1875 therein, on all days except Sundays and public holidays, between the hours of ten o'clock in the morning and four o'clock in the afternoon; and any person who shall hinder or obstruct any Inspector of

Nuisances or other officer as aforesaid upon any such visitation or inspection, or in the doing or performing of any work, shall forfeit and pay a penalty of not less than ten shillings nor more than forty shillings.

13. Any person desirous of erecting an earth closet, shall be at liberty to do so after giving notice of his intention to the Inspector of Nuisances or other officer appointed by the Council, but all night-soil shall be removed therefrom once in four days or oftener, and buried in the earth; and every person infringing or not complying with this By-law, shall forfeit and pay a penalty not less than one pound nor more than two pounds.

14. No person shall use on his own premises any night-soil other than that taken from the earth closet upon his own premises, and in the event of his so doing he shall forfeit and pay a penalty of not less than two pounds nor more than ten pounds.

15. All expenses incurred by the Council in emptying any cesspit shall be repaid to the Council by the owner or occupant of the premises whereon such cesspit is situated within one week after a written demand of the amount made by the Council or Inspector of Nuisances shall have been served upon him, otherwise the same may be recovered in a summary way before any two Justices of the Peace.

16. The Inspector of Nuisances shall furnish the Council with a monthly return showing the number of cesspits emptied, the amount due and payable for each cesspit, and the amount of arrears due for emptying cesspits. He shall collect the amounts so due and payable, and account therefor to the Council at the least once in every month, or as may be determined upon by such Council.

Passed by the Municipal Council of the Borough of Camperdown, on the fourth day of March, in the year of our Lord one thousand eight hundred and seventy-nine.

NEW SOUTH WALES.

PUBLIC VEHICLES REGULATION ACT OF 1873.

(BY-LAWS UNDER.)

Presented to Parliament, pursuant to Act 36 Vic. No. 14, sec. 15.

Colonial Secretary's Office,
Sydney, 1st September, 1879.

METROPOLITAN TRANSIT COMMISSIONERS BY-LAWS.

THE following By-laws, made by the Metropolitan Transit Commissioners, to amend in certain particulars the By-laws heretofore in force under the Public Vehicles Regulation Act of 1873, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the provisions of the above cited Act.

HENRY PARKES.

WHEREAS it is expedient to amend in certain particulars the By-laws made and passed by the Metropolitan Transit Commissioners, constituted and empowered by the Public Vehicles Regulation Act of 1873, the said Metropolitan Transit Commissioners do by virtue of the powers and authorities in them vested hereby order and declare,—

Repeal of By-laws.

1. That By-laws numbered respectively eighteen and twenty-seven, made and passed on the fourth day of October, in the year of our Lord one thousand eight hundred and seventy-six, shall be and the same are hereby repealed.

Vehicles not to be withdrawn without notice.

2. No owner of any licensed vehicle shall without leave from the Commissioners withdraw the same from hire for two consecutive days or for any two days in any one week, except in case of accident. Any owner desirous of withdrawing his vehicle, may do so on giving five days notice of his intention to the Commissioners, and upon receipt of such notice the Commissioners may cancel the license granted to such vehicle.

Wilfully or negligently damaging property.

3. Any owner, driver, or conductor, who shall whilst driving, loading, unloading, or attending any vehicle, or whilst upon any public stand, wilfully or negligently do or suffer or cause any damage to be done to the person or property of any one, shall upon conviction forfeit and pay to the person whose person or property shall have been damaged such sum for compensation not exceeding ten pounds as the Justices hearing the case may award.

Drivers and Conductors guilty of misconduct.

4. No driver or conductor shall whilst acting as driver or conductor be guilty of any breach of the peace, misconduct or misbehaviour, or be intoxicated, or make use of any threatening, obscene, filthy, indecent, blasphemous, profane, abusive, or insulting language, sign or gesticulation, but shall at all times be sober and careful in the discharge of his duties.

Passengers guilty of misconduct.

5. No person using any licensed vehicle shall be guilty of any breach of the peace, misconduct or misbehaviour, or be intoxicated, or make use of any threatening, obscene, filthy, indecent, blasphemous, profane, abusive, or insulting language, sign or gesticulation, or wilfully or negligently injure or damage such vehicle or the driver or conductor thereof.

Driver to deliver Table of Fares.

6. The driver of any carriage shall immediately upon any person entering the same, give to such person a table of the fares payable for the hire of licensed vehicles, printed in clear and legible characters.

Penalty.

7. For any offence against the provisions of these By-laws the offender shall be liable to, and on conviction shall pay, a penalty not exceeding ten pounds nor less than five shillings.

Passed by the Board of Metropolitan Transit Commissioners, this sixteenth day of July, in the year of our Lord one thousand eight hundred and seventy-nine.

PUBLIC VEHICLES REGULATION ACT OF 1873.

(BY-LAWS UNDER.)

Presented to Parliament, pursuant to Act 36 Vic. No. 14, sec. 15.

Colonial Secretary's Office,
Sydney, 2nd September, 1879.

METROPOLITAN TRANSIT COMMISSIONERS' BY-LAWS.

THE following By-laws, made by the Metropolitan Transit Commissioners, under the Public Vehicles Regulation Act of 1873, for the Regulation of Public Vehicles during the Sydney International Exhibition of 1879, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the provisions of the above cited Act.

HENRY PARKES.

WHEREAS it is expedient that provision be made for the special regulation of Public Vehicles during the International Exhibition of 1879.

And the Metropolitan Transit Commissioners, duly appointed in that behalf, do by virtue of the power and authority vested in them by the Public Vehicles Regulation Act of 1873, hereby make and establish the following Omnibus and Cab Stands.

OMNIBUS STAND.

St. Mary's Road, at the Fountain, to rank east.

CAB STANDS.

Macquarie-street, north of Bridge-street, to rank north.

Phillip-street, east side, north of Bent-street, vehicles to rank north; first cab to stand on north side of Bent-street, west of Free Public Library.

Domain, east road, west side, north of Avenue, to rank north; first cab at north-east corner of Exhibition Ground.

Domain, Central road, east side, one hundred yards north of St. Mary's entrance gate, to rank north; the rank to end 30 yards south from Avenue.

That the Cab Stand in Macquarie-street, at Hunter-street and Legislative Assembly, is hereby repealed during the hours of the Exhibition.

Cabs and carriages only to enter at the near side gate at St. Mary's to put down or take up and leave by keeping to their near side after turning round at entrance to Exhibition Ground, at the south end.

Cabs and carriages to enter and leave by Palmer-street gate to Domain. Vehicles to enter only by way of road out of Macquarie-street, opposite Hunter-street.

Passed by the Board of Metropolitan Transit Commissioners, this twenty-seventh day of August, in the year of our Lord one thousand eight hundred and seventy-nine.

NEW SOUTH WALES.

PUBLIC VEHICLES REGULATION ACT OF 1873.
(AMENDED BY-LAW UNDER.)

Presented to Parliament, pursuant to Act 36 Vic. No. 14, sec. 15.

Colonial Secretary's Office,
Sydney, 31st December, 1879.

METROPOLITAN TRANSIT COMMISSIONERS' BY-LAW.

THE following By-law, made by the Metropolitan Transit Commissioners, amending certain By-laws heretofore in force under the Public Vehicles Regulation Act of 1873, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the provisions of that Act.

HENRY PARKES.

WHEREAS it is expedient to amend in certain particulars the By-laws made and passed by the Metropolitan Transit Commissioners, constituted and empowered by the Public Vehicles Regulation Act of 1873, the said Metropolitan Transit Commissioners, do, by virtue of the powers and authorities in them vested, hereby order and declare:—

That By-law numbered FIFTY, made and passed on the fourth day of October, in the year of our Lord one thousand eight hundred and seventy-six; also, By-law numbered SIX, made and passed on the sixteenth day of July, in the year of our Lord one thousand eight hundred and seventy-nine, shall be, and the same are hereby repealed.

The driver of every licensed carriage shall have the number of the license thereof and the table of fares now or hereafter to be fixed by the Commissioners, printed in large, legible, and conspicuous figures on a card six inches long by three inches wide, affixed to the back panel inside such carriage; and such card shall be kept so affixed, legible, and undefaced during all the time such carriage shall ply or be used for hire; and no owner or driver of a licensed carriage shall demand, receive, or take more than the several fares set forth in the schedule hereunto annexed marked F of the By-laws as passed by the Commissioners on the fourth day of October, in the year of Our Lord one thousand eight hundred and seventy-six.

The driver of every carriage shall whilst plying for hire keep affixed to the right-hand side under the window of his carriage, a leathern satchel of a pattern approved of by the Commissioners, which satchel shall always contain at least two copies of a ticket containing a table of the fares payable for the hire of licensed vehicles, number of vehicle, owners name and residence in the form given in schedule hereto, printed in clear and legible characters; and such satchel shall always be kept in such manner that the hirer may without difficulty obtain and take one such printed table.

For any offence against the provisions of these By-laws the offender shall be liable to, and on conviction shall pay a penalty not exceeding ten pounds nor less than five shillings.

SCHEDULE.

Cab and Hackney Carriages. M. T. C. By-law. No.

No.
Owner
Residence

The owner of every carriage must provide, and the driver is bound to give to every passenger on entering, a printed ticket containing the fares, the No. of the vehicle, and the owner's name and address.

See that the No. corresponds with that on the vehicle.
Keep this ticket—In case of complaint apply at the Metropolitan Transit Commissioners' Office, 164, Phillip-street, Sydney.

RATES AND FARES to be paid for any carriage (not an omnibus) within the limits of this By-law, in the City and Police District of Sydney.

	£	s.	d.
For a cab for any time not exceeding one quarter of an hour, to carry two passengers if required by hirer	0	1	0
For every subsequent quarter of an hour or part thereof	0	1	0
But if engaged for more than one hour, then to be paid at the rate of ninepence for every additional quarter of an hour or part thereof.			
For a hackney carriage for any time not exceeding one half-hour, to carry five persons if required by hirer	0	2	6
For every subsequent quarter of an hour or part thereof	0	1	3

But if engaged for more than one hour, then to be paid at the rate of one shilling, and three half-pence for every additional quarter of an hour or part thereof.

If the vehicle is discharged at any place that is beyond the following boundaries, viz. :—a straight line drawn from the undermentioned places to each succeeding one in the order in which they are placed, viz. :—

Double Bay Wharf ;
 Old South Head Road, at Cowper-street ;
 Randwick Road, at Denison-street ;
 Bunnerong Road, at south-west corner of Raccourse fence ;
 Botany Road, at M'Evoy-street ;
 Newtown Road, at Camperdown Road ;
 Parramatta Road, at Camperdown Road ;
 Abattoir Road, at Crescent-street,—

the driver thereof shall be entitled to his ordinary fare by time back to the City boundary, unless a special arrangement as to fare has been made at the time of hiring.

Vehicles to travel at a speed of not less than six miles an hour, except when otherwise ordered by the hirer.

The drivers of such vehicles respectively shall be bound to take, if required, exclusive of the driver four persons inside and one outside a hackney carriage, or two persons inside a hansom cab. The driver shall not be obliged to take any luggage exceeding fifty pounds in weight, being clean and of such a description as may be placed inside or outside the vehicle without injuring the same ; and the driver shall be entitled to claim one

shilling for every additional fifty pounds weight or portion thereof so carried, but the person hiring such vehicle shall be allowed eighty-four pounds weight of luggage when the number of persons is short of the number aforesaid. Whenever the number of persons carried shall exceed that named for each vehicle respectively, the driver shall be entitled to charge by time or distance, as the hiring may be,—one third more for each adult or two children over five and under fifteen years of age.

Tolls to be paid by the hirer.

Half-fare, in addition to the ordinary fare, after ten p.m. and before 5 a.m.

Passed by the Board of Metropolitan Transit Commissioners this third day of December, in the year of our Lord one thousand eight hundred and seventy-nine.

C. J. ROBERTS, Chairman.

PUBLIC VEHICLES REGULATION ACT OF 1873.

(BY-LAW UNDER.)

Presented to Parliament, pursuant to Act 36 Vic. No. 14, sec. 15.

Colonial Secretary's Office,
Sydney, 30th January, 1880.

METROPOLITAN TRANSIT COMMISSIONERS' BY-LAW.

THE following By-law, made by the Metropolitan Transit Commissioners, amending the Time-table for Omnibuses plying to and from Crescent-street, Enmore, and Erskine-street, Sydney, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the provisions of the "Public Vehicles Regulation Act of 1873."

HENRY PARKES.

THE Board of Metropolitan Transit Commissioners, constituted and empowered by the Public Vehicles Regulation Act of 1873, do, by virtue of the power and authority in them vested by the said Act, declare that the following Omnibus Time-table under By-laws, as adopted on the ninth day of May, in the year of our Lord one thousand eight hundred and seventy-seven, shall be and the same is hereby repealed, viz. :—

TIME-TABLE for Omnibuses plying to and from Erskine-street, Sydney, and Crescent-street, Enmore.

And that the following Time-table shall be adopted in lieu thereof :—

TIME-TABLE for Omnibuses plying to and from Crescent-street, Enmore, and Erskine-street, Sydney.

Omnibuses shall start from the north side of Crescent-street, Enmore, for Erskine-street, Sydney—

From 8 a.m. to 9.30 a.m. every 5 minutes.
 „ 9.30 a.m. to 4 p.m. every 10 minutes.
 „ 4 p.m. to 6.30 p.m. every 5 minutes.
 „ 6.30 p.m. to 10.30 p.m. every 8 minutes;

And shall start from Erskine-street for Crescent-street—

From 8.30 a.m. to 10 a.m. every 5 minutes.
 „ 10 a.m. to 4.30 p.m. every 10 minutes.
 „ 4.30 p.m. to 7 p.m. every 5 minutes.
 „ 7 p.m. to 11 p.m. every 8 minutes.

And each Omnibus shall perform the journey to and from Crescent-street, Enmore, and Erskine-street, Sydney, in 30 minutes, and the parts of the journey as follows :—

From Crescent-street to Fitzroy-street, in 6 minutes.
 „ Fitzroy-street to George-street West, in 5 minutes.
 „ George-street West at Newtown Road, to Railway Bridge, in 5 minutes.
 „ Railway Bridge to Liverpool-street, in 5 minutes.
 „ Liverpool-street to "Royal Hotel," in 5 minutes.
 „ "Royal Hotel" to Erskine-street, in 4 minutes.
 „ Erskine-street to "Royal Hotel," in 4 minutes.
 „ "Royal Hotel" to Liverpool-street, in 5 minutes.
 „ Liverpool-street to Railway Bridge, in 5 minutes.
 „ Railway Bridge to George-street West at Newtown Road, in 5 minutes.
 „ George-street West to Fitzroy-street, in 5 minutes.
 „ Fitzroy-street to Crescent-street by way of Enmore Road around Station-street and up Crescent-street to Stand, in 6 minutes.

Special omnibus accommodation from Newtown Road, south side at Missenden Road, to Erskine-street, Sydney, shall be provided to start at 8.35 a.m., 8.45 a.m., and 9 a.m., and perform the parts of the journey as shown in the above table, to Erskine-street.

Passed by the Board of Metropolitan Transit Commissioners this seventh day of January, in the year of our Lord one thousand eight hundred and eighty.

Sir,

Downing-street, 21 October, 1879.

I have the honor to transmit to you a copy of a Commission passed under the Royal Sign Manual and Signet, appointing the Right Honorable the Earl of Carnarvon, the Right Honorable H. C. E. Childers, M.P., Sir H. T. Holland, Baronet, M.P., K.C.M.G., Admiral Sir Alexander Milne, G.C.B., General Sir J. L. A. Simmons, G.C.B., Sir Henry Barkly, G.C.M.G., K.C.B., Thomas Brassey, Esq., M.P., and Robert George Crookshank Hamilton, Esq., to be Commissioners to inquire into the state of the Defences of the more important Colonial Ports and Naval Stations, and the best mode of placing them in a thoroughly secure condition.

2. The Committee appointed by Her Majesty's Government in the early part of last year, to inquire and report as to the defences of those parts which might stand most in need of defence in any sudden emergency, made considerable progress in the examination of the subject referred to them, and in pursuance of their recommendations much has been already done towards the provision of such temporary defences as appeared to be most urgently required, but the larger questions connected with the permanent defences of each place have, in most cases, yet to be considered. The Royal Commission which is the subject of the present communication has been appointed to deal with these questions, and Her Majesty's Government are confident that you will use every effort to ensure that any information affecting the Colony under your government, which may be necessary to assist the Commission in the prosecution of its labours, shall be promptly and carefully supplied.

3. It is, of course, not the intention of Her Majesty's Government by the appointment of this Commission to interfere in any way with the measures already taken in the Colony under your government for providing an adequate system of defence. They recognize, with great satisfaction, the intelligence and public spirit with which this responsibility has been assumed, and the cordiality with which, in most cases, the recommendations made, after careful inquiry, have been adopted.

4. There are probably, however, many further points in regard to which the Commission, after considering the detailed local information which you may be able to place at its disposal, may render most valuable assistance to your Government; and I am fully satisfied that the ability and special experience of its members will secure for its recommendations and for such proposals as Her Majesty's Government may found upon those recommendations the most cordial and earnest consideration.

I have, &c.,

M. E. HICKS-BEACH.

[Enclosure.]

DRAFT of a Commission appointing the Right Honorable the Earl of Carnarvon, the Right Honorable H. C. E. Childers, M.P., Sir H. T. Holland, Bart., M.P., K.C.M.G., Admiral Sir Alexander Milne, Bart., G.C.B., General Sir J. L. A. Simmons, G.C.B., Inspector General of Fortifications and Director of Works, Sir Henry Barkly, G.C.M.G., K.C.B., Thomas Brassey, Esq., M.P., and Robert George Crookshank Hamilton, Esq., Accountant-General of the Navy and Comptroller of Navy Pay, to be Commissioners to inquire into the state of the Defences of the more important Colonial Ports and Coaling Stations, and to consider the apportionment of the cost of such Defences; and Captain Herbert Jekyll, R.E., to be Secretary to the said Commissioners.

Dated September 8, 1879.

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland Queen, Defender of the Faith, to Our Right Trusty and Right Well-beloved Cousin and Councillor Henry Howard Molyneux, Earl of Carnarvon, Our Right Trusty and Well-beloved Councillor Hugh Culling Eardley Childers, Our Trusty and Well-beloved Sir Henry Thurstan Holland, Baronet, Knight Commander of Our Most Distinguished Order of Saint Michael and Saint George, Our Trusty and Well-beloved Sir Alexander Milne, Baronet, Knight Grand Cross of Our Most Honorable Order of the Bath, Admiral in Our Navy; Our Trusty and Well-beloved Sir John Lintorn Arabin Simmons, Knight Grand Cross of

Our Most Honorable Order of the Bath, General in Our Army, Inspector-General of Fortifications and Director of Works; Our Trusty and Well-beloved Sir Henry Barkly, Knight Grand Cross of Our Most Distinguished Order of Saint Michael and Saint George, Knight Commander of Our Most Honorable Order of the Bath, Our Trusty and Well-beloved Thomas Brassey, Esquire, and Our Trusty and Well-beloved Robert George Crookshank Hamilton, Esquire, Accountant-General of Our Navy and Comptroller of Navy Pay.

WHEREAS we have thought it expedient, for divers good causes and considerations, that a Commission should forthwith issue to inquire into the condition and sufficiency of the means, both naval and military, provided for the defence of the more important sea-ports within Our Colonial Possessions and their Dependencies, and of the stations established or required within Our said Possessions and Dependencies for coaling, refitting, or repairing the ships of Our Navy, and for the protection of the commerce of Our Colonies with the United Kingdom of Great Britain and Ireland, with each other, and with foreign countries:

And whereas it is expedient to consider and determine in which of Our stations and ports it is desirable, on account of their strategical or commercial importance, to provide an organized system of defence, in addition to such general protection as can be afforded by Our Naval Forces; and whether such defence should consist of permanent works manned by garrisons of Imperial or local troops, or both combined, or of any local naval organization or other armaments and appliances:

And whereas it is desirable to consider whether, and in what proportions, the cost of such measures of defence should be divided between the Imperial Government and the Colonies to which they relate, or should be wholly defrayed by the Imperial Government or by the Colonies:

Now know ye that We, reposing great trust and confidence in your zeal, knowledge, and ability, have authorized and appointed, and do by these presents authorize and appoint you, the said Henry Howard Molyneux, Earl of Carnarvon, Hugh Culling Eardley Childers, Sir Henry Thurstan Holland, Sir Alexander Milne, Sir John Lintorn Arabin Simmons, Sir Henry Barkly, Thomas Brassey, and Robert George Crookshank Hamilton, to be Our Commissioners for the purpose of such inquiries as aforesaid, and that you may offer such suggestions as may seem to you meet as to the best means (regard being had to the works completed and in progress, and to the ordinary number of Our Naval and Military Forces voted by Parliament), of providing for the defence and protection of Our Colonial Possessions and commerce as aforesaid, special attention being given to the necessity of providing safe coaling, refitting, and repairing stations in such of Our Colonial Possessions and their Dependencies as you may deem best suited for the requirements of Our fleet and mercantile marine in time of war.

And for the better enabling you to carry these Our intentions into effect, we do hereby authorize and empower you, or any three or more of you, to call for, have access to, and examine, all plans and designs for all works of defence now in progress or under Our consideration, or any other plans or designs that may be laid before you for the same object.

And we do give and grant to you, or any three or more of you, full power and authority to call before you such persons in Our Civil, Military, or Naval Services, or others connected with Our Colonial Possessions, as you shall judge likely to afford you the best and fullest information upon the subject of this Our Commission, and to inquire of and concerning the premises by all other lawful ways and means whatsoever.

And we do by these presents will and ordain that this Our Commission shall continue in full force and virtue, and that you, Our said Commissioners, or any three or more of you, may from time to time proceed in the execution thereof, and of every matter and thing therein contained, although the same be not continued from time to time by adjournment.

And Our further will and pleasure is, that you, Our said Commissioners, or any three or more of you, upon due inquiry into the premises, do report to Us, in writing, under your hands and seals, your several proceedings under and by virtue of this Commission, together with what you shall find touching or concerning the premises.

And We further ordain that you, or any three or more of you, may have liberty to report to Us your proceedings under this Commission from time to time, should you judge it expedient so to do.

And for your assistance in the due execution of these presents, We have made choice of Our trusty and well-beloved Herbert Jekyll, Esquire, a Captain in our corps of Royal Engineers, to be Secretary to this Our Commission, and to attend you, whose services and assistance We require you to avail yourselves of from time to time, as occasion may require.

Given at Our Court at Balmoral, this eighth day of September, 1879, in the forty-third year of Our Reign.

By Her Majesty's Command,
M. E. HICKS-BEACH.

1879-80.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

NEW SOUTH WALES ARTILLERY.

(COMPLAINT AGAINST OFFICERS OF, WHILST STATIONED AT NEWCASTLE—CORRESPONDENCE.)

Ordered by the Legislative Assembly to be printed, 9 July, 1880.

RETURN to an Order made by the Honorable the Legislative Assembly of New South Wales, dated 2 July, 1880, That there be laid upon the Table of this House,—

“Copies of all Correspondence between S. S. Moses and the Colonial Secretary in reference to the complaint of Mr. Moses, made against the Officers of the New South Wales Artillery while stationed at Newcastle in the months of September and October last.”

(Mr. Buchanan.)

NEW SOUTH WALES ARTILLERY.

No. 1.

Mr. S. Moses to The Colonial Secretary.

Dear Sir,

"Great Northern Hotel," Newcastle, 21 April, 1880.

On Thursday last I called at your office to see you, for the purpose of laying a complaint against some of the officers of the N.S.W. Artillery, lately stationed at Newcastle, and after waiting about 30 minutes I was shown into the office of the Principal Under Secretary, who asked me what it was I wished to see you about. I explained my case fully to him, and he gave it every attention, and requested me (as he said you desired it) to lay my complaint in writing before you, when it would receive every consideration at your hands. I therefore now have the honor to submit my case to you as fully as it is possible to do in writing. If there should be any point which you cannot clearly understand, I will, if possible, explain it more fully. I shall therefore now commence, as briefly as the case will admit, to submit my complaint to you.

On Saturday, the 20th September, 1879, a private sitting-room and sleeping accommodation were retained for eight officers of the N.S.W. Artillery, to arrive on the following day (Sunday). They arrived here in due course, but on that day some left to go out to the mines; the others remained here until Monday evening, the 29th September, when they requested me to give them their accounts, which I did. Some paid, as they said they were going to Sydney to a ball; the others remained. However, on the following Thursday they returned from Sydney, and during the day Colonel Roberts came into my office and said, "It is likely we shall be remaining here some time. Some of my officers cannot afford to pay you your charges. Cannot you make some reduction?" I asked the Colonel if he could guarantee any number, as there was only an average of four staying, and less than 15s. a day would not pay me to give them a private sitting-room and provide separate meals. He said he could not give any guarantee, so I told him I could not make the charges any less. He then asked me if I would agree to this proposal, viz.: The officers had paid me 15s. a day,—would I agree to return them the 5s. a day I had charged for private sitting-room and separate meals, and for their subsequent accounts to only charge them 10s., and the other 5s., for private sitting-room, &c., to make out a separate account for, and he would vouch for it. And the reason he assigned was that I could obtain my money at once, whereas the officers might have to wait for theirs. He said he had got the Commandant to allow this 5s. a day. I agreed to this, and everything went on as usual (sometimes some officers were here, at other times they went away and others returned in their places) until Sunday, the 12th October, when Colonel Roberts commenced to be dissatisfied with the meals which I provided on that day, when the cause of dissatisfaction was without any reason whatever, and for your information I give you the *menu* which was provided for lunch and dinner:—

Lunch.—Mock turtle soup, cold sirloin beef, English ham, goose stewed in port wine, calf's feet stewed in lemon, sauce, cheese, and salad.

Cold dinner.—Mock turtle soup, cold duck, cold fowl, cold fore-quarter lamb, cold ribs beef, cold English ham, hot vegetables, pastry and puddings, boiled custard, cheese, salad, and dessert.

The above is a faithful list of what was provided; and I may here remark everything was well cooked and in first-class order, which can be proved by my household, and several gentlemen who saw the remaining part of the lunch which came from their table; and as they grumbled with the lunch I took the precaution to show the dinner to the same gentlemen before sending it up. I asked Colonel Roberts the cause of complaint about the dinner, and he could not give any, but said that during the week the curry had been served up on the same dish as the rice, and that turnips were sent to table whole in lieu of being sliced. I asked if there was anything else to complain of, and he said he had been here three weeks, and during that time had not had a turkey. I replied it was impossible to obtain any—that I had even gone to Maitland to try and obtain some, but that they were not procurable; but fish, ducks, geese, fowls, wild ducks, teal, English ham, and other delicacies had been served, and that it was impossible to provide better. I thereupon wrote the following letter, under cover, to Colonel Roberts:—

To the Officers of the N.S.W.A. forming the Mess,—

"G. N. H.," Newcastle, 12 October, 1879.

Sirs,—As I am informed the accommodation you receive here is not satisfactory, I must request that, from tomorrow, you will seek accommodation elsewhere, as I shall require all the rooms you now occupy. I have done all in my power to give you satisfaction, and it appears you are determined not to be satisfied. In justice to myself I intend to make public the bill of fare I provided for you each day, so that the public may be in a position to judge between us.

Yours truly,

SIMEON S. MOSES.

On the following morning I made out their accounts, and Colonel Roberts paid me his; the other officers paid me part of their account, viz., 10s. per diem; the remaining 5s. they asked me to send in the bill for, to Colonel Roberts, who agreed to vouch for it, and I may say Colonel Roberts told me to do so and he would vouch for it in due course. This step I took by forwarding the following account under cover to Colonel Roberts one week after the officers left:—

"G. N. H.," Newcastle, October 20, 1879.

The Officers of N.S.W.A. stationed at Newcastle, Dr. to Simeon S. Moses,—

To use of private parlour and extra for private meals as follows:—

	£	s.	d.
Sept. 21st to 29, Oct. 2-10—Lieutenant Le Patourel, 18 days, 5s.	4	10	0
" 21 " " Oct. 7th—Major Spalding, 17 days, 5s.	4	5	0
Oct. 12—Major Spalding, 1 day.....	0	5	0
Sept. 21-22, Oct. 6-13—Lieutenant Savage, 8 days, 5s.	2	0	0
" 21, Oct. 2, 6-13—Captain Mackenzie, 18 days, 5s.	4	10	0
" 21-29, Oct. 3-13—Dr. Bedford, 19, 5s.	4	15	0
" 21, Oct. 2, Oct. 9-13—Capt. Murray, 15 days, 5s.	3	15	0
	£24	0	0

On

On October 25th Colonel Roberts returned to me this account with this memo. at foot, viz. :—

I cannot see how you charge officers for use of a private room which I have already paid for in my account.—C.F.R. Col., 25/10/79.

I immediately rendered him a duplicate of the above account, and attached the following memo. at foot :—

Colonel Roberts,—

If this account is not duly and properly vouched for by you as agreed, and returned by to-morrow (Wednesday) evening to me, I shall render each officer his respective account as per account now sent you; and if they are not forthwith liquidated shall place them in the hands of my solicitor for immediate recovery.

Newcastle, October 28/79.

SIMEON S. MOSES.

I awaited a reply from Colonel Roberts until Saturday, November 1st (three days longer than I wrote I would wait), when not receiving one, I made out a separate account for each officer, and attached this memo. to the foot of each :—

As Colonel Roberts refuses to certify to the above as agreed, I must request your immediate attention to the liquidation of this account.

On November 4/79, I received this note from Colonel Roberts in reply to the memo. which I wrote at the foot of the duplicate invoice :—

Sir,

The Camp, Lambton, November 4th, 1879.

On my return to Newcastle District I received a letter from you addressed to Officers of N. S. W. Artillery, stationed at Newcastle, with memo. attached.

As my time has hitherto been fully occupied with military matters, I now write to inform you that I told you I would vouch for a fair charge, but I never supposed that you would in my absence send such a claim as you have forwarded. I therefore decline to vouch for the amount you claim; and should you take the steps you indicate I shall probably, on my next visit to Sydney, lay the whole of your correspondence and claims before the proper authorities for legal advice.

I am, &c.,

Mr. S. Moses, "G. N. Hotel."

CHAS. F. ROBERTS, Col., N.S.W.A.

You will note that in this letter Colonel Roberts states, that "I told you I would vouch for a fair charge," so that he acknowledges he agreed to vouch for a charge; but in his memo. to me of the 25/9/79 (see folio 5) he entirely repudiates it; but when he finds by my memo. of the 28th Oct. (see folio 6) attached to foot of duplicate invoice that I intend to take legal proceedings to recover the accounts he then acknowledges to having agreed to vouch for a "fair" charge. To this I entirely deny that he ever told me he would vouch for a "fair" charge. I told him when he asked me if I could make any reduction that I could not unless he would guarantee me a certain number, and in proof of this he paid me his own account in full, 15s. a day.

I replied to the foregoing letter of Colonel Roberts as follows :—

Sir,

"Great Northern Hotel," Newcastle, Nov. 5, 1879.

I received your note of yesterday's date wherein you now acknowledge to having promised to vouch for use of private parlour and extra for private meals for your officers, but after having denied your liability to me in your memo. of the 25th ult., I again sent you a duplicate invoice, with a memo. attached, and as I waited two days longer than I stated I would wait, I forwarded each officer his account stating you refused to vouch for it, and requested immediate payment of same. I intend waiting for a reply from each one until Monday next, the 10th inst., when, if payment is not made by that date, I shall take the step I indicated to you in my memo. of the 28th ult., attached to my duplicate invoice.

I might add that after your refusing to vouch for the account I sent you, I now look to the officers for payment of their respective accounts, and decline to hold any further correspondence with you on the subject after having denied your liability, and when you find I intended rendering a separate account to each officer, and in the event of it not being responded to to place it in the hands of my solicitor, you then acknowledge to having agreed to vouch for them.

Yours truly,

SIMEON S. MOSES.

Colonel Roberts.

To this letter I received the following :—

Sir,

Camp, Lambton, 9/11/79.

With reference to the second paragraph of your letter of 5/11/79, declining to hold any further correspondence on the subject of your claim for use of private parlour with Colonel Roberts, I am desired to inform you that you evidently do not understand the meaning of either memo., dated 25/10/79, or of the letter dated 4/11/79. It was distinctly pointed out to you that the Colonel would not recommend the charge you made, viz., 5s. per diem for each officer for the use of a room with attendance, for which he had already paid; but he said he would recommend a fair charge.

As you sent in your claim on the full charge of 5s., the memo. 25/10/79 was written; as this claim was again repeated without alteration the letter, 4th November, was written.

Considering that you have declined to hold any further correspondence on the subject, I do not see how the Colonel can now vouch for any account for you, and the papers sent for the Colonel to be vouched for are forwarded direct by him to the proper authorities.

Faithfully yours,

H. D. MACKENZIE,

Capt.-Adj., N.S.W.A.

Mr. S. Moses, "Great Northern Hotel," Newcastle.

I replied to this letter as follows :—

Dear Sir,

"Great Northern Hotel," Newcastle, 11 November, 1879.

I have to acknowledge the receipt of your letter of the 9th instant, in reply to mine of the 5th idem, addressed to Colonel Roberts, wherein you state you are desired to inform me "that I evidently do not understand the meaning of either memo., dated the 25th ult. or 4th inst." In reply, I have to state that I am at a loss to understand upon what hypothesis you base that statement, as the phraseology of each memo. was so explicit it was impossible to misconstrue either. Had there been the slightest ambiguity in reference to them I could understand your letter, but on the contrary, such was not the case. However, it appears to me a useless correspondence now that Colonel Roberts refuses to vouch for my accounts, so therefore I have no alternative but the one I stated I would act upon in reference to the officers if they did not pay me their respective accounts. I find the Court does not sit until the 24th instant, so that I can wait until Saturday next before I take proceedings. I might add that up to the present my application to the officers for their accounts has been treated with silence, and should they compel me to resort to the step which I shall be reluctantly compelled to adopt, I shall make it my duty to lay the whole of the correspondence on this unpleasant subject before the Hon. the Colonial Secretary.

I might state it would have been advisable for you to have perused the memo. of Colonel Roberts of the 25th ult. to me, when you would have seen how utterly impossible it was for me to misunderstand it, and then to look over his letter to me of the 4th instant, when you would find how utterly at variance the latter is to the former.

Faithfully yours,

SIMEON S. MOSES.

H. D. Mackenzie, Esq., Capt. Adj. N.S.W.A.

This closed the correspondence, and I waited four months, giving the officers every opportunity of paying me their accounts, but finding they would not do so I instructed my solicitor to sue them in the District Court, Sydney, for their respective accounts, as he told me I could not do so here. I therefore was obliged to leave my business to go to Sydney, and at the same time employ a solicitor, whose expenses I have to pay, as I cannot recover from them, their respective amounts being under £10, which debar the Court from allowing a solicitor his costs.

The

The cases came on for hearing on Monday, the 5th instant, at the Metropolitan District Court, before his Honor Judge Dowling, when it was agreed that one case should decide the other five, so the one against Captain Murray was called. I proved my case, when Colonel Roberts was called for the defendant. He swore that the officers were not allowed any expenses during their first trip to Newcastle (which was from September 21st to 29th), but that when he went to Sydney he represented the case to the Commandant, who then agreed to allow them 15s. a day from the time he returned (2nd October), and that the officers would have to pay their expenses previous to the latter date out of their own pockets. The Judge asked Colonel Roberts if he ever stayed at the "Great Northern Hotel" under the former management, and what he paid, when he replied, "Yes, I have, and was only charged 12s. 6d. per diem;" to which his Honor said, "Do you not think the present accommodation better worth half-a-crown more?" when Colonel Roberts said, no, he did not, as he could obtain a good meal then, which he could not do now. The Judge then said, "The Bar and I stay there, and we consider it the best hotel in the Colonies, and I have never heard a different opinion expressed to that except yours, and I cannot understand why you should have been treated in the manner you say you have been."

The Judge then said to my lawyer, "Colonel Roberts has sworn that they were not allowed any expenses for their first visit, and that they would have to pay whatever he allowed out of their own pockets, as the Government would not, Colonel Roberts thought, pay anything more, as all vouchers in connection with the late trip had been sent in and paid, and would my lawyer make any compromise?" In reply, my lawyer stated that it had not anything to do with his client what expenses the officers were allowed; if they could not have afforded to have stayed at the hotel they were at liberty to leave, but it was not his client's province to support them at what price they felt disposed to pay, and that I was entitled to my regular and only charge, or none. The Judge replied, as Colonel Roberts swears they were not allowed anything during their first trip, and that the allowance of 15s. per diem did not commence until their second visit, I will only allow one-half the amount sued for in each case, viz., 2s. 6d. a day, and that they will have to pay out of their own pockets, so I lost £12 through Colonel Roberts swearing they were not allowed any expenses from 21st September until he returned the second time, which was the 2nd October.

I felt sure that Colonel Roberts's statement regarding the subsistence allowance was not truthful, and so I find by the replies which you gave in the House on Tuesday, April 13th, in answer to queries asked by Mr. Thompson as to what expenses the officers were allowed during their stay in Newcastle. I find that Colonel Roberts was allowed 21s. per diem, and the other officers 16s. per diem for subsistence during their stay at Newcastle, and unprovided with quarters there, and Colonel Roberts swore they were only allowed 15s. from their second visit. I will now draw your attention to the number of days I charged the six officers for, as they were at my hotel all the while they were at Newcastle, except one day (October 13th) from 10 a.m. until about the same hour October 14th. The following is correct. The intervening dates they were either at Lambton, Raspberry Gully, or Sydney:—

Major Spalding, Sept. 21 to Oct. 7 and Oct. 12—18 days; allowed 27 days.

Lieut. Le Patourel, Sept. 21 to Sept. 29, October 2 to 10—18 days; allowed 26 days.

Lieut. Savage, Sept. 21 to 22, Oct. 6 to 13—8 days; allowed 10 days.

Captain Mackenzie, Sept. 21 to October 2, October 6 to 13—18 days; allowed 21 days.

Dr. Bedford, Sept. 21 to 29, Oct. 3 to 13—19 days; allowed 21 days.

Captain Murray, Sept. 21 to October 2, October 9 to 13—15 days; allowed 23 days.

I cannot see by the foregoing statement how Colonel Roberts's oath can be substantiated, as it clearly appears the officers were allowed 16s. a day for subsistence from the time they arrived here, besides receiving their respective share of £24 9s. 2d. for travelling and contingent expenses.

I have now explained to you my case as clearly as I can possibly do in writing; and I may here remark, that Major Spalding, Captain Murray, and Lieut. A. Le Patourel stayed with me in August last when they were sent up to Newcastle on similar business, when they paid me 15s. per diem for the same kind of accommodation, without making any complaint about price, and on leaving complimented me on the management of the hotel. I quote this to show you they were perfectly cognizant of my charges, and the only reason I have been put to all this trouble is because I was compelled to request them to seek quarters elsewhere. And I might also state that the Regulations of my hotel, with tariff of prices, are in my hall, public rooms, and in every bed-room. The tariff of prices, on a small card, I enclose for your perusal. Those in the rooms are exactly word for word, only on a larger scale. In conclusion, I consider it a great hardship that I should be compelled to leave my business to go to Sydney to sue these officers, when they received a liberal allowance from the Government for the purpose of paying their expenses, and then refuse to do so. Leaving the case in your hands,—

I have, &c.,

SIMEON S. MOSES.

May be referred for report of the Commandant.—H.P., 28/4/80. B.C., 28/4/80.—C.W. The Officer commanding Artillery may desire to offer some remarks on this correspondence prior to my forwarding my report to the Colonial Secretary as desired.—J.S.R., Col., Comdt., 29/4/80, B.C. No. 2.

Mr. S. Moses to The Colonial Secretary.

Dear Sir,

"Great Northern Hotel," Newcastle, 8 May, 1880.

On the 21st ultimo I forwarded for your perusal a letter containing a statement of my complaint against Colonel Roberts and some of the officers of the New South Wales Artillery who were stationed at Newcastle during the months of September and October last, and to which I have not received an acknowledgment of your having received it. I fear it has been miscarried, and should feel obliged by your informing me whether such is the case; if so, I will immediately forward you a duplicate copy.

Yours respectfully,

SIMEON S. MOSES.

The Commandant with reference to previous papers, B.C., 14/5/80.—C.W. The Principal Under Secretary,—See my letter to you of the 12th inst., No. 80/230.—J.S.R., Col., Comdt., 15/5/80, B.C. True copy,—W. B. B. CHRISTIE, Major of Brigade.

No. 3.

The Commandant to The Principal Under Secretary.

(80-230.)

Sir,

Brigade Office, Sydney, 12 May, 1880.

On the 29th of last month a complaint, preferred by Mr. Moses, of the "Great Northern Railway Hotel," Newcastle, against the officers of the New South Wales Artillery, was forwarded to me from your office for my report. The correspondence was duly transmitted to the Officer Commanding Artillery for his remarks. I have now to state, as explanatory of the delay in complying with the Colonial Secretary's instructions, that Colonel Roberts has this day requested permission to further retain the correspondence until he has decided on the steps to be taken in regard to certain statements of Mr. Moses, which more nearly concern himself.

I have, &c.,

JOHN S. RICHARDSON,

Colonel, Commandant.

True copy,—W. B. B. CHRISTIE, Major of Brigade.

No. 4.

The Commandant to The Principal Under Secretary.

(80-241.)

Sir,

Brigade Office, Sydney, 20 May, 1880.

I have the honor to return correspondence embodying a complaint by Mr. Moses, the landlord of the "Great Northern Hotel" at Newcastle, against certain officers of the New South Wales Artillery. I also enclose Colonel Roberts' reply to the same.

In accordance with instructions, I have to report that it seems to me the complaint is to the effect that Mr. Moses' charge of 5s. per diem for the use of a private sitting-room against each officer, in addition to the daily charge of 10s. per diem (making 15s. each per diem) was not paid, and consequently Mr. Moses was obliged to sue the officers in Sydney for the amount due. Mr. Moses also implies that an order for the full amount claimed would have been given by the Court had not Colonel Roberts stated in evidence that the officers had not been granted any special allowance for a certain portion of the time they lived at the hotel, viz., from the 21st September to 2nd October last, whereas in point of fact these officers did receive a special allowance at 16s. per diem not only for that particular period, but also for their entire stay at Newcastle.

Colonel Roberts on the other hand denies he swore that no allowance was made to the officers from the 21st September to 2nd October, but explains that what he stated to the Court was, that no allowance was granted until his second visit to Sydney in October. Neither did he swear that such allowance was not retrospective.

I may here remark that I am not in a position to question the right of Mr. Moses to charge a body of officers 5s. each per diem for one and the same sitting-room. At the same time I think he should in equity have entered into an arrangement such as appears to have been suggested by Colonel Roberts.

The exact nature of the testimony given by Colonel Roberts before the Court can only be authenticated by reference to the records of the Court itself.

It is undoubtedly a fact, as quoted by Mr. Moses, that these officers received a special allowance of 16s. each per diem for the whole time they occupied quarters in the "Great Northern Hotel," which was granted them for the purpose of defraying the cost of actual board and lodging.

It seems to me that if Mr. Moses conceives himself to have unjustly suffered by reason of evidence improperly tendered to the Court by Colonel Roberts, his proper remedy is by an appeal to a civil tribunal, rather than to the Colonial Secretary, in that the original matter has already been adjudicated on by a Court of law.

In conclusion I may mention that I have thought it advisable to call upon Colonel Roberts for explanation in regard to the statements contained on page 13 of Mr. Moses' letter, wherein he implies that the officers have received the special allowance of 16s. per diem for days in excess of those to which they were so entitled. Colonel Roberts' explanation will be duly forwarded for the Colonial Secretary's information.

I have, &c.,

JOHN S. RICHARDSON,

Colonel, Commandant.

Submitted.—21/5/80. True copy,—W. B. B. CHRISTIE, Major of Brigade.

[Enclosure.]

[Enclosure.]

Colonel Roberts to The Commandant.

Sir,

Artillery Brigade Office, May 18, 1880.

In answer to memo. dated 29/4/80, asking if I desire to offer any remarks upon the correspondence *re* Moses' complaint, I cannot but express astonishment that after this case has been tried in the District Court before Mr. Justice Dowling, and settled by him, that any further report should be necessary. As, however, I was occupied at the time of its receipt with an examination of the officers of the Volunteer Artillery for fitness for promotion, I directed that the officers who had been in the Newcastle district should read the correspondence in case it might be necessary to call upon them for any report. However, considering the matter more intimately concerns myself, I will briefly remark upon each page in the form of a statement.

Prior to leaving Newcastle the first time, about the 26th September last, I paid my account, being charged at the rate of 16s. per diem, and on my return, seeing that officers might have to remain in Newcastle for an indefinite time, I asked Mr. Moses to make some reduction in his rate of charges, these, as in my case 16s., being charged for each officer. (His tariff, which was not printed at the time, so he informed us, but is now attached, shows that 15s. is the rate for a private suite, or as may be agreed upon.)

I said I could not agree to officers each paying 15s. (or at the rate of a private suite and meals each person), whereas we only occupied one sitting-room and dining-room in one, but that a fair charge might be made (which unless we obtained an allowance from Government, I would submit for approval and payment by the proper authorities). On the 30th September, 1879, I applied through the Commandant for a special allowance for the Force while in the district, owing to the charges being heavy, as we were frequently away from the hotel, and had to pay elsewhere as well as the daily charge at the hotel; this was allowed by letter of the 10th October, 1879, some time after my having seen Mr. Moses. With regard to the complaint about the food, I need only refer to Lieutenant Nathan, who was present on that day as a visitor to Newcastle, and to the other officers present at the time, as to whether there was not very good grounds for complaint. Excellent food could be obtained elsewhere, but it was necessary to keep the officers together, as we did not know when we might be called upon to move, and thus the "Great Northern Hotel" was best adapted from the point of amount of accommodation required.

I said I would vouch for a fair charge only as I had paid for the sitting-room, and this fair charge I certainly did not consider to be 5s. per diem for each person; my vouching would only have been for the satisfaction of the Government, *prior to the allowance being made*. As I did not think 5s. per head a fair extra charge to be submitted to the Government I did not think it a fair charge to be made against each officer.

At the time Mr. Moses sent his letter of the 28th October I was on duty in Sydney, and replied on my return in letter of November 4th.

The fair charge I expected would be made by Mr. Moses was for extra attendance, certainly not *for use of a room for which I had already paid*, which I pointed out to Mr. Moses, although he conveniently omits to state this on page 2. I paid the charge of 15s., as I considered that having ordered the room, and requiring to use it probably more than any other officer, that by my payment I secured the room and it could be used by others only so long as they did not cause inconvenience to the duties which had to be carried out there.

Again points out that I would only recommend a fair charge. I don't think that Mr. Moses has proved his case, as I was called as first witness for the defence.

Mr. Moses here refers to the trial of the case before Mr. Justice Dowling, who came to a decision after, I feel certain, distinctly understanding all its bearings; and I cannot imagine why this decision is questioned, unless that it is Mr. Moses not gaining his full demands thus feels dissatisfied with the Judge's verdict.

Mr. Moses was allowed some expenses, amounting to £5 or more.

I need only call upon the Commandant to bear me out in my statement, that no allowance was made until after my application on the 30th September, and this allowance was authorized in letter dated October 10th, 1879, and for such days only as we were actually in the Newcastle district. Mr. Moses draws his inference that the allowance would only count from my return. I distinctly said that my application was made for an allowance while in the Newcastle district, and I certainly did not think that Mr. Justice Dowling understood anything else, but that during the days we were in Newcastle the allowance was made, and he calculated the charges accordingly.

My impression is that the Judge's remarks with reference to the "Great Northern Hotel" were that it was one of the best appointed hotels in the Colony, and as everything is new in the hotel this is undoubtedly a fact.

The Judge asked me if I would now vouch for these expenses, and I said it would be no use, as the Government would not pay them, the officers having received their special allowance.

The Judge did not, as well as I remember, say that I had sworn that the allowance did not commence until their second trip; what he said, to the best of my recollection, was, that the allowance was not granted until my second visit to Sydney; this was, I believe, in reference to a remark from Mr. Moses, *that some of the officers had on their first visit paid their accounts without remark*; this visit was on the first occasion of a disturbance in Newcastle.

I did not swear that no allowance was made from September 21st to October 2nd; what I stated (as previously remarked) was, that no allowance was granted until my second visit to Sydney, and I did not swear that it was not retrospective.

The allowance was made, and paid by the paymaster, only on vouchers for such days as the officers were in the Newcastle district, at the rate of 16s. per diem, and the accuracy of the number of days can be ascertained by reference to the pay lists.

The amount, £24 9s. 2d., mentioned as travelling and contingent expenses, I need hardly point out, did not in any way benefit any of the officers, as suggested by Mr. Moses.

I have pointed out that my oath was upon the question of any allowance, and that I stated (as the conversation on reduction of charges took place before any allowance was authorized) that at that time, viz., end of September, '79, no allowance had been made, but that it was eventually made about 10th October, 1879.

The visit referred to by Mr. Moses, of Major Spalding, Captain Murray, and Lieut. A. Le Patourel, was prior to that, when the eight officers went up, and these three officers were under the impression that they would receive £1 per diem each, an expectation I need hardly say was not realized, although according to authorized charges for officers travelling.

I can only add that while at the "Great Northern Hotel" neither myself or any of the officers ever saw a list of prices, and if we were to believe Mr. Moses, they were not printed at the time of our visit; they certainly were not in the rooms we occupied, and Mr. Moses stated that his cards of wines, &c., were at that time being printed.

In conclusion, I must beg to request that as Mr. Moses has taken upon himself to charge me with false swearing, that the matter may be submitted to the higher authorities in order that it may be placed in the hands of the Attorney General, as I claim that protection I consider I am entitled to while performing a duty under Government, and especially as my character has been brought in question, and this through the medium of one of the public offices of the Colony.

I have, &c.,

CHAS. F. ROBERTS,

Colonel, Com. N.S.W. Artillery.

True copy,—W. B. B. CHRISTIE, Major of Brigade.

No. 5.

Colonel Richardson to The Principal Under Secretary.

(80-245.)

Sir,

Brigade Office, Sydney, 21 May, 1880.

In accordance with your minute of 28/4/80, calling for report on certain complaints made against Colonel Roberts and the officers of the New South Wales Artillery by Mr. Moses, proprietor of the "Great Northern Hotel," Newcastle, and as noted in the last paragraph of my letter of yesterday's date (No. 241), furnishing a partial report on the matters submitted to me, I have now the honor to forward an explanation from Colonel Roberts having reference to the discrepancy stated by Mr. Moses to exist between the number of days board for which Mr. Moses was paid, and the number for which the allowance was actually drawn by the several officers of the New South Wales Artillery.

When

When furnishing my last report on the subject (20/5/80, No. 241), which report I understood it was desired should be rendered as soon as possible, it appeared to me that the special matter of the discrepancy in question had not been gone into by Colonel Roberts in such a clear and definite manner as would be required by the Colonial Secretary, and was indeed advisable in the interests of the officers of the New South Wales Artillery themselves; I therefore, as will be seen by my minute of 20/5/80, called Colonel Roberts' attention to this, and indicated the advisability of the allegations being answered with greater detail. It will now be seen that that officer, in his memo. of 21/5/80, gives some further information, but, protesting against doing so, has desired the matter in question may be referred to His Excellency the Governor, which course I have not deemed it proper to pursue, seeing Colonel Roberts' explanation was asked for with reference to a financial matter being inquired into by the Ministerial head of the department, and seeing also that the Colonial Secretary is in a position, should he deem it advisable, to make the reference in question himself.

With reference to the discrepancies noted by Mr. Moses, the following can be accounted for by the fact that the days spent by the officers in question in the "Great Northern Hotel" on their first visit to Newcastle do not seem to have been noted by Mr. Moses, although they were indicated in the answer given by me to the Parliamentary questions as to the number of days for which the allowance of 16s. per officer per day was drawn. This would seem to have occurred through these officers having settled with Mr. Moses on the first visit to Newcastle without any disagreement having taken place, viz. :—

Major Spalding	6 days.
Captain Murray	6 days.
Lieut. A. Le Patourel	6 days.

This leaves a discrepancy in Major Spalding's case of three days; in Captain Murray's of two days; Captain M'Kenzie, three days; Lieutenant Savage, two days; Lieutenant A. Le Patourel, two days; and Dr. Bedford, two days; the explanation as to which, so far as I can gather from Colonel Roberts' memo. 21/5/80, is that the officers stopped when in Newcastle at hotels other than Mr. Moses—Mr. Moses stating, as far as I can recollect in his letter, that when in Newcastle they stopped at no hotel *other* than his. As to what the facts are in this respect I cannot say, nor has Colonel Roberts thought proper to give such detailed information on the subject as will enable me to judge. I may remark that the vouchers referred to by Colonel Roberts are nothing more than the documentary pay-sheets on which the allowance in question for the officers of the New South Wales Artillery has been estimated and drawn. They can therefore furnish of themselves no proof other than that given by the certificate of the commanding officer, that the officers resided for any certain number of days at Newcastle.

I have, &c.,
JOHN S. RICHARDSON,
Colonel, Commandant.

Submitted—8/6/80. True copy,—W. B. B. CHRISTIE, Major of Brigade.

[Enclosure.]

EXTRACT from a letter from Mr. Moses to the Colonial Secretary, dated 21st April, 1880.

I will now draw your attention to the number of days I charged the six officers for, as they were at my hotel all the while they were at Newcastle, except one day—October 13th, from 10 a.m. until about the same hour October 14th. The following is correct; the intervening dates they were either at Lambton, Raspberry Gully, or Sydney.

Major Spalding, Sept. 21 to Oct. 7, and Oct. 12—18 days; allowed 27 days.
Lieut. Le Patourel, Sept. 21 to Sept. 29; Oct. 2 to 10—18 days; allowed 26 days.
Lieut. Savage, Sept. 21 to 22; Oct. 6 to 13—8 days; allowed 10 days.
Captain M'Kenzie, Sept. 21 to Oct. 2; Oct. 6 to Oct. 13—18 days; allowed 21 days.
Dr. Bedford, Sept. 21 to 29; Oct. 3 to 13—19 days; allowed 21 days.
Captain Murray, Sept. 21 to Oct. 2; Oct. 9 to Oct. 13—15 days; allowed 23 days.

I cannot see by the foregoing statement how Colonel Roberts' oath can be substantiated, as it clearly appears the officers were allowed 16s. a day for subsistence from the time they arrived here, besides receiving their respective share of £24 9s. 2d. for travelling and contingent expenses.

True copy,—W. B. B. CHRISTIE, M. of B.

Perhaps Colonel Roberts will be good enough to explain how it is that officers have apparently drawn the special allowance of 16s. a day for days on which they were either at Sydney, Raspberry Gully, or Lambton, and for which they were not charged at the "Great Northern Hotel"?—J.S.R., Colonel, Commandant, 20/5/80, B.C.

The officers have only drawn the 16s. for such days as they were obliged to provide themselves with hotel accommodation in Newcastle, and after the 12th October they found other hotels besides the "Great Northern" where they could stay, but not altogether. Some of the officers were allowed the special grant of 16s. for the time of their previous visit to Newcastle in August, and Mr. Moses seems to forget that he received his full demands for those days. As it appears to me that a certain amount of doubt is cast upon the correctness of the return of number of days for which the officers were granted the special allowance, and I consider it extremely hard that the base statements of Mr. Moses should be weighed against my remarks, especially when I refer to the pay vouchers which have been duly authorized in confirmation, I would respectfully request that the whole of the correspondence on this subject be submitted to His Excellency the Governor and Commander-in-Chief.—CHAS. F. ROBERTS, Col., 21/5/80.

True copy,—W. B. B. CHRISTIE, Major of Brigade.

No. 6.

Mr. S. S. Moses to The Colonial Secretary.

Dear Sir,

"Great Northern Hotel," Newcastle, 19 June, 1880.

At my interview with you on Friday, the 11th instant, you promised that I should have a reply from you in answer to my charges made against some of the officers of the New South Wales Artillery during their stay in Newcastle during the months of September and October last, but up to the present time have not received such. I beg to state that my charges bear date April 21st, and I have been patiently awaiting a reply, and trust that I may now receive one during the coming week. I may state that I wrote a note drawing your attention to my charges of the 21st April, such note bearing date 8th proximo. To this I have also not received a reply.

Yours, &c.,
SIMEON S. MOSES.

True copy,—W. B. B. CHRISTIE, Major of Brigade.

1879-80.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

FORAGE ALLOWANCE TO OFFICERS OF PERMANENT AND
VOLUNTEER MILITARY FORCES.

(CORRESPONDENCE RESPECTING.)

Ordered by the Legislative Assembly to be printed, 12 February, 1880.

SCHEDULE.

5. Same to same, with enclosure. 28 January, 1880.....	4

No. 1.

The Commandant to The Principal Under Secretary.

Sir, Brigade Office, Sydney, 16 June, 1879.
I have the honor to forward, for the consideration of the Colonial Secretary, the accompanying letter from Lieutenant-Colonel Raymond, Commanding 1st Regiment, New South Wales Volunteer Infantry, having reference to the recent vote reducing the forage allowance to Volunteer Officers.

I have, &c.,
JOHN S. RICHARDSON, Col.,
Commandant.

[Enclosure.]

Lieutenant-Colonel Raymond to The Commandant.

Sir, Battalion Office, Sydney, 14 June, 1879.
I have the honor to draw your attention to the recent vote reducing the forage allowance to Volunteer Officers to the sum of £40 per annum each, instead of 3s. 6d. per day.

This sum is £10 less than a late reduction in another part of the Force, where the officers receiving the higher rate have stables found them, and servants at considerably lower rates than private grooms can be hired for.

The Adjutant of my Regiment informs me that the hire of a boy to look after his horse costs him over £50 per annum; he has of course to provide the horse and a stable. I am sure no horse can be properly fed for less than £4 a month, if a groom is ever so careful, irrespective of accident, veterinary expenses, trappings, &c. This makes actual cash expenses in his case £98 per annum, out of which he is paid by present arrangements £40 by the Government.

In my own case I am now paying 35s. a week for a groom (board wages)—I cannot get one for less. I have had to pay more, but as I make him useful in other ways I cannot charge the whole of this expense against my allowance; but it is evident that I should not have to incur that expense unless obliged to keep a horse for military purposes.

Thus a large expenditure has to be incurred by me annually over and above the allowance from the Government.

I have the honor to request, therefore, that you will submit this matter for the consideration of the Government, with a view of affording some relief to my Adjutant and myself.

I have, &c.,
R. PEEL RAYMOND,
Lieutenant-Colonel,
Commanding 1st Regiment N.S.W. Vol. Infantry.

Minute by Colonial Secretary.

All the papers relating to same subject may be submitted together.—H.P., 23/6/79.

No. 2.

The Commandant to The Principal Under Secretary.

Sir, Brigade Office, Sydney, 23 June, 1879.

The reduction recently made by Parliament in the amount of the forage allowance granted to those officers of the Volunteer Permanent Staff who are acting as Adjutants of Regiments, having so affected them as to make it impossible that they can keep horses of their own for use on the Public Service, without being subjected to an annual loss, at the very least, equivalent to the amount now authorized for their forage allowance, viz., £40 per annum, I have the honor to request that in such cases as the officers named may desire to adopt that alternative, I may be authorized to waive their keeping horses of their own, and to issue to them horse allowance, in lieu of forage allowance, at the rate of £25 per annum, to enable them to defray the expenses thrown upon them *for the hire of horses*.

The field duties of these officers, under the system proposed, cannot of course be performed by them in the efficient way possible when they have horses of their own; nor can they be mounted (as I think is desirable) in such a manner as will be creditable to the Military Service of the Colony; but it is manifestly not to be expected that they should, out of their small means, incur the loss contingent on an endeavour to keep a horse upon the inadequate allowance voted.

I have, &c.,
JOHN S. RICHARDSON, Col.,
Commandant.

No. 3.

The Commandant to The Principal Under Secretary.

Sir, Brigade Office, Sydney, 1 July, 1879.

30 June, 1879.

I have the honor to forward, for the consideration of the Colonial Secretary, the accompanying letter from the Officer Commanding Artillery Forces, having reference to the recent vote reducing the forage allowance to officers of the Permanent Artillery.

I have, &c.,
JOHN S. RICHARDSON, Col.,
Commandant.

[Enclosure.]

The Colonel Commanding Artillery Forces to The Commandant.

Sir, Artillery Brigade Office, Sydney, 30 June, 1879.

I have the honor to bring to your notice the manifest injustice under which the officers of the New South Wales Permanent Artillery are suffering. Being required to *provide* and keep horses for the Public Service, they were granted an allowance which enabled them to pay for forage, shoeing, clothing, &c.; this sum has been reduced suddenly by £24 per annum for each horse in the case of the Permanent Artillery; in the case of the Staff, the sum of £12 per annum has been reduced; and in the case of some other officers connected with the Defence Force, no reduction has taken place.

I would beg to request that this case might receive the favourable reconsideration of the proper authorities, as the sum now voted, viz., £40 per annum per horse, is barely sufficient even to provide necessary food and bedding, and it can hardly be intended that one officer should keep a horse upon two-thirds of the amount voted for another to do the same with.

I have, &c.,
CHAS. F. ROBERTS,
Colonel Commanding Artillery Forces.

No. 4.

The Commandant to The Principal Under Secretary.

Sir, Brigade Office, Sydney, 8 January, 1880.

I have the honor to forward herewith a letter from the Officer Commanding the New South Wales Artillery, drawing attention to, and protesting against, certain deductions now made from the pay of officers of this department by the Treasury, as per schedule attached.

In the early part of 1879, payments were made to officers on account of horse allowance on the scale obtaining for many previous years, viz., £64 per annum. Subsequently, on the passing of the Estimates, horse allowance was granted to Captain Strong and Dr. Bedford at the rate of £64 per annum; to the officers of the general staff, at £52 per annum; and to those of the New South Wales Artillery and Volunteer Force, at £40 per annum. It appears to me inequitable that after having until the Estimates for 1879 were passed, been led to believe they would receive the rate heretofore granted, and *incurred actual expense accordingly*, officers should suddenly not only find their horse allowance largely reduced, but such reduction made to operate *retrospectively*, against them. I have therefore urgently to draw the attention of the Colonial Secretary to the matter, feeling assured that he will see the hardship involved on individuals by the course taken, and will, if possible, as I would strongly recommend, sanction the payment of the difference between the rate granted prior to 1879 and that voted in the Estimates for that year, at least up to the date on which the alteration of the rate of the allowance was made by Parliament from the unexpended balance for the Military Department for the year 1879.

I would also urgently and respectfully draw the attention of the Colonial Secretary to the entirely inadequate allowance now given to the officers of the General Staff, and the New South Wales Artillery, and the Commanding Officers and Adjutants of the Volunteer Force, for the maintenance of horses and equipment

equipment for the Public Service. Schedule A attached to this letter will show the actual expenses connected with the keeping of a horse, and the loss incurred by officers even under the old rate on this account will be at once apparent. I feel sure that the Members of the Legislature must have been quite unaware of the actual expenses connected with keeping a horse for military purposes when the change was made, and that it never could have been foreseen or intended that actual loss, and that considerable, should be suffered by a body of officers already in most cases paid on a scale lower than that adopted in the Imperial Army.

Feeling assured that the Colonial Secretary will give a fair and kindly consideration to this communication,—

I have, &c.,
CHAS. F. ROBERTS, Colonel,
pro Commandant.

[Enclosure.]

The Colonel Commanding the Artillery Forces to The Commandant.

Sir,

Artillery Brigade Office, Sydney, 8 January, 1880.

I have the honor to request that the late order issued by the Treasury may be submitted for the consideration of the Honorable the Colonial Secretary, and for the following reasons:—

The order directs that such officers as may have received forage allowance at a rate higher than the allowance of £40 per horse per annum be charged with the difference of the two amounts, viz., £64, the allowance granted for the last thirteen years, and £40, the sum decided upon in June last, on passing the Appropriation Act. The result of this will be, that officers will have to repay the sums opposite their names, as per schedule, marked "B," in addition to other expenses they have already been obliged to incur.

On 30th June last, I forwarded a letter to the Commandant, requesting that it might be submitted to the Honorable the Colonial Secretary, in which I pointed out a manifest injustice under which, unintentionally I felt sure, the officers of the Permanent Artillery had been placed by the sudden reduction of the forage allowance from £64 to £40 per annum for each horse kept.

I would now beg to draw attention to the accompanying schedule, marked "A," explanatory of the allowance granted, and the consequent considerable deficiency or extra charge falling upon officers, as they are obliged to purchase retail:—

	s.	d.
Each horse costs per week for food	17	3
" " for shoeing.....	1	6
	18	9

This amounts alone to £48 15s. per annum, and does not include any charge for medicine in case of illness, or allows any sort of fund for replacing horses lost, either through illness or accident, which cost falls upon an officer's private means, as the Government do not supply the horses; and the supply of the necessary appointments also falls upon the officer.

It will be therefore manifest that the officers who receive an allowance at the rate of £40 per annum are thus £8 15s. per annum out of pocket, while they are at a disadvantage compared with officers of the staff, who receive £52 per annum, and others who receive £64 per annum, to the extent respectively of £3 5s. and £15 5s., and are therefore called upon to maintain a horse for service at their own expense to the extent of the amount £8 15s. named above, to which must be added all costs for horses when sick, the necessary hiring of others to perform the duty, and some sum which might be put aside annually to form a fund to replace any horse becoming unserviceable.

I feel quite sure that it could never have been the intention of the Government that such should be the case, and I trust that the officers may not be called upon to refund the amounts opposite their names in schedule marked "B."

I trust also that, for the above reasons, the forage allowance may be allowed in future to officers at the rate of £64 per annum, as has been the case for thirteen years previous.

I have, &c.,
CHAS. F. ROBERTS, Col.,
Comdg. Artillery Forces.

A.

Weekly.

	£	s.	d.
1½ cwt. straw, at £4 10s. per ton	0	6	9

Minute by Colonial Secretary.

It is quite impossible for me to comply with the request made in this letter. The forage allowance was reduced by the Committee of Supply after the Minister in charge of the Estimate had said all he could in support of it. To supplement the reduced sum which was so voted from any other source would be setting at naught the decision of Parliament and would be extremely improper. If the Commandant thinks his case is sufficiently strong to satisfy the Assembly that the reduction was made without sufficient knowledge or consideration, I am willing to lay copies of these papers on the Table.—H.P., 23/1/80.

The Commandant.—B.C., 23/1/80, C.W.

No. 5.

The Commandant to The Principal Under Secretary.

Sir,

Brigade Office, Sydney, 28 January, 1880.

I have the honor to observe, in reply to the Colonial Secretary's remarks contained in minute 23/1/80 on accompanying correspondence, having reference to various scales of forage allowance granted to mounted officers of the Permanent and Volunteer Military Forces, that I conceive the case of those officers is sufficiently strong to warrant an appeal for reconsideration, and on the grounds disclosed in that correspondence. Accordingly, with that view, I have respectfully to recommend that these papers may be laid on the Table of the House of Assembly. I also enclose an extract of a letter from myself to Principal Under Secretary, bearing on the question, which I beg may be regarded as part of the correspondence, and dealt with as above indicated.

I have, &c.,

JOHN S. RICHARDSON, Col.,
Commandant.

[Enclosure.]

Extract from Commandant's letter, 79/554, dated 20th August, 1879, to Principal Under Secretary, forwarding Estimates for 1880.

"In conclusion, I beg to invite the Colonial Secretary's attention to the question of forage allowance, both as regards increase and the unequal manner in which the officers of the Force are treated in respect thereto. At present some officers receive £64 per annum in place of drawing forage allowance; others receive a forage allowance of £52 per annum; and, again, others of £40 per annum. It seems to me but reasonable that all officers should be treated alike (including Volunteer Majors, who have hitherto been drawing horse allowance). As regards the sum to be allowed, I think that originally granted, viz., £64 per annum, is not excessive, if it is taken into account that a officer who has to keep a superior style of horse for the Public Service, has to meet expenses incidental to the purchase and replacement of horses from time to time, supply food and clothing, shoeing, veterinary charges, groom's wages, the provision and keeping up of appropriate saddlery and appointments, &c., &c.

"I may mention, as illustrative of the serious loss to which officers are subject who have to provide horses for the Public Service, that since my appointment I have had to buy some six horses, varying from £30 to £50 each; and at the present time both my horses are disabled by accident, one of which will probably have to be replaced. The Major of Brigade, through ill luck, is between £300 and £400 out of pocket. Other officers have also in a comparative degree been adversely affected. I trust, therefore, the Colonial Secretary will be good enough to refer to the original rate, viz., £64, as it is obvious that instead of the forage allowance being a source of emolument, it is practically the reverse, and consequently officers can but ill afford the reduction recently carried out.

I have, &c.,

JOHN S. RICHARDSON, Col.,
Commandant."

True extract.—W. B. CHRISTIE, Major of Brigade.

1879-80.

NEW SOUTH WALES.

VOLUNTEER FORCE REGULATION ACT OF 1867.

(AMENDED REGULATIONS UNDER.)

Presented to Parliament, pursuant to Act 31 Vic. No. 5, sec. 50.

Colonial Secretary's Office,
Sydney, 9th January, 1880.

HIS Excellency the Governor, with the advice of the Executive Council, having been pleased to make the following Regulations for the Volunteer Force, in substitution of clauses 25, 27, and 28 of the Regulations published in a Supplementary Government Gazette of the 9th September 1878, directs its publication in accordance with the 50th section of the Volunteer Force Regulation Act of 1867.

HENRY PARKES.

25. In addition to the above, a Subaltern appointed direct must, within one year from the date of his appointment, and a candidate for a commission from the ranks must, prior to his appointment, pass an examination before a Board of Officers in the undermentioned subjects:—

ARTILLERY CORPS.

- (a.) Company drill in close order—Field Exercise, part II.
- (b.) Duties of guards—Field Exercise, part VII.
- (c.) Carbine or short rifle exercises, and the drill of one description of gun used by the Corps.
- (d.) Volunteer Act and Regulations.

ENGINEER CORPS.

- (a.) Company drill in close order—Field Exercise, part II.
- (b.) Duties of guards—Field Exercise, part VII.
- (c.) Short rifle exercises.
- (d.) Military engineering (Sappers Manual):—
 1. Hasty defences—chap. I, sec. 1-12.
 2. Defence of posts—chap. I, sec. 12-33. Field-works, chap. II, sec. 24-32.
 3. Throwing up earthworks—chap. IV, sec. 56-62.
 4. Revetting materials—chap. V.
 5. Revetments—chap. VI.
- (e.) Volunteer Act and Regulations.

TORPEDO AND SIGNAL CORPS.

- (a.) Company drill in close order—Field Exercise, part II.
- (b.) Duties of guards—Field Exercise, part VII.
- (c.) Short rifle exercises.
- (d.) Signalling—flags, lights, electric telegraph, &c., &c.
- (e.) Electricity in connection with submarine warfare, and how applied—batteries required, how constructed, and kind generally used.
Magneto-electricity for exploding submarine mines.
Galvanometers.

- (f.) Torpedoes—electro, contact mines, ground mines mechanical mines, circuit closers—how arranged and exploded.

Aggressive Torpedoes—Harvey's, Whitehead's, outrigger for boats.

Fuzes and detonators—how constructed and applied—charges: powder, gun-cotton, dynamite, and litho-fracteur—relative values.

Cases—Size of cases for certain quantities of explosives and for different depths.

Firing by observation, and cross-bearings by Shutter apparatus.

Testing table.

Cables for submarine mines.

Testing the same.

- (g.) Volunteer Act and Regulations.

Examination for Captains and Field Officers will be of a more extended nature in the above subjects than is required of Subalterns, with the addition of—

- (a.) Battalion drill in close order, and proper mode of route marching—Field Exercise, parts III. and VII.
- (b.) Standing orders of the Volunteer Force.

INFANTRY CORPS.

- (a.) Squad and company drills—Field Exercise, parts I. and II.
- (b.) Duties of guards and outposts—Field Exercise, parts VI. and VII.
- (c.) Short rifle exercises.
- (d.) Volunteer Act and Regulations.

27. Previous to promotion to the rank of Captain, Subalterns will be required to pass an examination before a Board of Officers in the following subjects:—

ARTILLERY CORPS.

- (a.) Company drill and command of a Company in Battalion in close order—Field Exercise, parts II and III.

- (b.) Duties of guards—Field Exercise, part VII.
- (c.) Service of description of ordnance worked by the special branch of the Corps to which they belong.
- (d.) Exercise with or without machines with the same guns.
- (e.) General knowledge of the ordnance served by the special branch of the Corps to which they belong as regards ammunition, stores, and carriages, care of magazines and shell-rooms, flight of projectiles, ranges, and penetration.
- (f.) Volunteer Act and Regulations and Standing Orders of the Volunteer Force.

ENGINEER CORPS.

In addition to the subjects specified in examination for Subalterns:—

- (a.) Command of a Company in Battalion in close order, and proper mode of route marching—Field Exercise, parts III. and VII.
- (b.) Military engineering:—
 1. Defilade and obstacles, &c.—chap. II., sec. 33-45.
 2. Batteries—chap. III.
 3. Execution of the work in connection with throwing up earthworks—chap. IV., sec. 63-68.
 4. Detail of batteries—chap. VII.
 5. Field kitchen—chap. X. Boring and levelling. From instruction.
 6. Trenches. From instruction.
- (c.) Standing orders of the Volunteer Force.

INFANTRY CORPS.

- (a.) Company drill, and Command of a Company in Battalion—Field Exercise, parts II. and III.
- (b.) Duties of guards and outposts, and proper mode of route marching—Field Exercise, parts VI. and VII.
- (c.) Volunteer Act and Regulations and Standing Orders of the Volunteer Force.

28. Captains, before they are eligible for promotion to be Field Officers, will be required to pass an examination in the following subjects:—

ARTILLERY CORPS.

- (a.) Battalion drill in close order, and the command of a Battalion in Brigade—Field Exercise, parts III. and IV.
- (b.) Duties of guards and proper mode of route marching—Field Exercise, part VII.
- (c.) Drill of guns in use in the Corps, and exercise with or without machines with the same.
- (d.) General knowledge of the ordnance used by the Corps—ammunition, stores, carriages, &c., care of magazines, shell-rooms, flight of projectiles, ranges, and penetration.
- (e.) Volunteer Act and Regulations, and Standing Orders of Volunteer Force.
- (f.) Riding.

INFANTRY CORPS.

- (a.) Battalion drill—Field Exercise, part III.
- (b.) Knowledge of movements of Battalion in Brigade—field manoeuvres and tactics—Field Exercise, part IV. and V.
- (c.) Duties of guards and outposts, proper mode of route marching—Field Exercise, parts VI. and VII.
- (d.) Volunteer Act and Regulations and Standing Orders of Volunteer Force.
- (e.) Riding.

They must further be in all respects eligible to take command of the Corps or Regiment in the absence of the Commanding Officer.

All officers will be expected to be practically acquainted with the exercises in which they may have been theoretically examined.

1879-80.

NEW SOUTH WALES.

VOLUNTEER FORCE REGULATION ACT OF 1867.

(MONEYS EXPENDED UNDER, IN 1879.)

Presented to Parliament, pursuant to Act 31 Vic. No. 5, sec. 51.

VOLUNTEER FORCE, NEW SOUTH WALES.

STATEMENT of all moneys paid on account of the above Force during the year ended 31st December, 1879, furnished in accordance with paragraph 51 of the Volunteer Act, 1867.

Sydney : Thomas Richards, Government Printer.—1880.

1879-80.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

NAVAL BRIGADE.
(COMMODORES' REPORTS.)

Ordered by the Legislative Assembly to be printed, 17 March, 1880.

Commodore Goodenough to His Excellency Sir Hercules Robinson.

Sir, Her Majesty's ship "Pearl," Sydney, 1 June, 1874.
The state of the Naval Brigade, which I inspected on the 25th May, at your Excellency's invitation, shows the following numbers as present :—

1 Captain.
2 Commanders.
5 Lieutenants.
1 Surgeon.
6 Sub-Lieutenants.
8 Cadets.
2 Instructors.
175 Petty Officers and A.Bs. (Rifles.)
50 do. (Field pieces.)
12 Warrant Officers.
46 Bands.

308 Total.

I have the honor to inform your Excellency that I consider the appearance and steadiness of these men to be highly satisfactory. They were inspected by me in heavy rain and on rough ground, and executed the movements ordered, with such precision as showed that they had been drilled with care; and the whole state of the Force is very creditable to Captain Hixson, its Commander.

I may remark that, in future drills, care should be taken to impress upon the men the necessity of deliberation in the delivery of their fire, and that no fire should be delivered in exercise without an aim being taken.

I have, &c.,

JAMES G. GOODENOUGH,
Captain and Commodore 2nd-class,
Commanding Australian Station.

Commodore Chapman to His Excellency Sir Hercules Robinson.

Sir, "Dido," at Sydney, 27 November, 1875.

I have the honor to inform your Excellency, that in accordance with the request conveyed in your letter of the 20th instant, I have this day inspected the Naval Brigade under the command of Captain Hixson; and I beg leave to express to your Excellency my satisfaction at the general smartness, activity, and good discipline displayed by the men, which reflect great credit on Captain Hixson and the Officers of the Force.

I would further observe, that the firing of great guns was carried out with care and precision, and the whole of the target practice was eminently satisfactory.

I have, &c.,
W. C. CHAPMAN,
Commodore.

Naval Brigade Office, Sydney 23 November, 1878.

COMMODORE Hoskins inspected the Naval Brigade on the above date. He addressed the Force and expressed himself as being satisfied with the performance and appearance of the men, but no official report of the inspection ever reached this office.

FRANCIS HIXSON,
17/3/80.

Commodore Wilson to His Excellency Lord Augustus Loftus.

My Lord,

"Wolverene," at Sydney, 22 September, 1879.

I have the honor to acquaint your Lordship, that in compliance with your request, I on Saturday the 20th instant, inspected the New South Wales Naval Brigade, in Moore Park, and found the Brigade was formed of (about) 200 small arm men and officers, and half a battery of 12-pound howitzers, each with a crew of sixteen men.

I was informed by Captain Hixson, who commands the corps, that all those comprised in it were men who earned their livelihood either as seamen or boatmen, and judging by their nautical appearance I conclude he is right.

As a Naval Volunteer Force I think their proficiency under arms is most marked, and reflects credit not only on the Officers for the time and trouble they have expended, but on the men, who must have been careful and attentive to have mastered so much infantry drill.

At the same time I thought it right to point out, when speaking to the corps, that their primary duty as a Nautical Force was not that of infantry, but as naval gunners afloat; and that I hoped soon to see such a valuable body of men, whose value is enhanced from the fact that they are exceedingly scarce, showing their proficiency not so much on shore as riflemen, but on their proper element in suitable vessels for home defence.

Whilst expressing this opinion, it must not be supposed that I condemn infantry instruction, which is most valuable, especially as a means of disciplining men.

I have, &c.,

J. C. WILSON,
Commodore.

1879-80.

NEW SOUTH WALES.

IMMIGRATION.

(REPORT FROM AGENT, FOR 1879.)

Presented to Parliament by Command.

The Agent for Immigration to The Principal Under Secretary.

Sir, Government Immigration Office, Sydney, 14 February, 1880.

I have the honor herewith to forward my report on Immigration for the year 1879.

2. Having given a full report of the immigrants on their arrival by each ship, I have only now to summarize the information contained in those several reports.

3. As compared with previous years there has been a considerable increase in 1879 in the number of persons who have been nominated by relatives or friends resident in the Colony. Thus, from 19th September, 1876 (date of issue of the present Immigration Regulations), to December 31st, 1877, a period of 15½ months, there were nominated 2,009 persons; and in 1878 1,798; whilst in 1879 there were nominated 3,692; total nominated in 3¼ years, 7,499. The nominations in 1879 were for residents in England, 1,559; Ireland, 1,690; Scotland, 402; Foreign Countries, 41; total, 3,692. And for the whole period of 3¼ years the nominations were for residents in England, 2,933; Ireland, 3,732; Scotland, 713; Foreign Countries, 121; total, 7,499.

4. There have arrived during the past year 12 ships with 5,731 immigrants. During the voyage there were 96 deaths, being only at the rate of about 1½ per cent. on the total number of emigrants embarked; of these 96 deaths there were 15 above 12 years of age, 44 between 1 and 12, and 37 infants; total, 96.

5. Two ships were placed in quarantine, as noted in the margin. The total amount payable as demurrage on these ships was £605 16s. 8d., in addition to which was a further charge amounting to £751 9s., incurred in provisioning the immigrants whilst at the Quarantine Station. This expenditure (although large), may be considered as having been judiciously incurred, rather than that infectious and contagious diseases should have been allowed to spread had the immigrants not remained in Quarantine until they were convalescent.

"Samuel Plim-
soll," eight
days.
"Pericles,"
thirteen days.

6. Of the total of 1,225 women who were received at the depôt, 1,077 were classed as "domestic servants," 422 left to join their friends, 655 readily obtained engagements from the depôt at an average rate of wages of £23 7s. per annum, the remaining 148 were either wives coming to join their husbands, or were of trades and callings other than domestic servants.

7. Arrangements have been made so as to give an opportunity to the immigrants of obtaining immediate employment, and on each successive occasion the results have been increasingly satisfactory. They are directed to attend at the hiring-room on the second and third days after their arrival, full notice of which have been previously given to employers by advertisements in the daily newspapers. Although not above one half of the male immigrants have been found willing to present themselves for hire, preferring at once to join their relatives or friends, yet a large proportion of the farming and laboring men readily obtained engagements. Of those who did so attend, 183 married couples and 236 single men were hired by employers, while many of those who declined to accept the current wages subsequently proceeded into the country districts in search of employment. Of the 5,731 immigrants who arrived, 2,818 were provided with free passes by railway and by coasting steamers in accordance with the regulations; they proceeded, as shewn in Appendix F, to 154 different localities. Those who went in search of employment were also furnished with orders to obtain (after arrival at their destination), free board and lodging for 48 hours, which however, under certain circumstances and at the discretion of the officer in charge of the Police at that special locality, might be increased to 7 days for married people with their families, and to 4 days for single men; this privilege however has only been claimed on behalf of 25 married couples with their children, and for only 2 single men; doubtless therefore the men must either have obtained employment within the limit of the 48 hours, or have been able and willing to provide for themselves.

8. The most careful investigations have invariably been made by the Board of Immigration into all complaints which have been preferred by the immigrants as to their treatment during the outward voyage. In very many instances such complaints have been found to be most frivolous, and unworthy of further notice; in other cases satisfactory explanations have been given. In three instances however the Board have made certain recommendations, which have on each occasion been upheld, thus:—The chief mate of the

"Northampton"

"Northampton" (arrived 12th January), was, on account of his misconduct, not only deprived of his gratuity but it was notified that he was considered to be unfit to be again employed on board a ship with immigrants. Again, in the case of the ship "Peterborough" (arrived May 4th), the flour issued to the emigrants during a great portion of the voyage was found to be of bad quality, and a fine of £100 was therefore inflicted. And in the case of the Surgeon-Superintendent of the ship "La Hogue" (arrived September 16th), it was found that he had most grossly neglected his duties in many ways; a deduction therefore of £100 was made from the gratuity which would otherwise have been payable to him; and it was further recommended that he should not again be permitted to receive the appointment of a Surgeon-Superintendent in charge of emigrants to this Colony.

9. The Appendices herewith annexed give full information in detail, viz. :—

- Appendix A.—General statistical information.
- „ B.—Nationality of immigrants.
- „ C.—Religious persuasion.
- „ D.—Educational attainments.
- „ E.—Trades and callings.
- „ F.—Distribution of immigrants into the country by steamer and by railway.

10. It has not been found possible to make the very desirable comparison between the number of individuals who have arrived from Europe under the Assisted Immigration Regulations and of those who come hither at their own expense, as, by the Custom-house returns, all persons arriving by the ocean steamers are classified under the head of "arrivals from intercolonial ports."

I have, &c.,
 GEORGE F. WISE,
 Agent for Immigration.

APPENDIX A.

RETURN of Assisted Immigration to New South Wales—1879.

	Name of Vessel.	Date of Departure.	Date of Arrival.	Number of days on the voyage.	Births on the Voyage.		Deaths on the Voyage.				Number landed.				From Great Britain and Ireland. LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

PROGRESS REPORT FROM THE SELECT COMMITTEE

ON

ASSISTED IMMIGRATION;

TOGETHER WITH THE

PROCEEDINGS OF THE COMMITTEE,

MINUTES OF EVIDENCE,

AND

APPENDIX.

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED,
13 *July*, 1880.

SYDNEY : THOMAS RICHARDS, GOVERNMENT PRINTER.

1880.

1879-80.

**EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.**

VOTES No. 77. TUESDAY, 6 APRIL, 1880.

6. **ASSISTED IMMIGRATION**:—Mr. Burns moved, pursuant to Notice,—
 (1.) That a Select Committee be appointed, with power to send for persons and papers, to inquire into and report upon the expediency of continuing Assisted Immigration.
 (2.) That such Committee consist of Sir Henry Parkes, Mr. Cameron, Mr. Greenwood, Mr. Garrett, Mr. Jacob, Mr. Charles, Mr. Day, Mr. Moses, and the Mover.
 Debate ensued.
 Question put and passed.

VOTES No. 79. THURSDAY, 8 APRIL, 1880.

2. **ASSISTED IMMIGRATION**:—Mr. Burns (*by consent*) moved, without Notice, That the name of Mr. Barbour be added to the Select Committee now sitting on "Assisted Immigration."
 Question put and passed.

VOTES No. 91. THURSDAY, 6 MAY, 1880.

3. **ASSISTED IMMIGRATION**:—Mr. Burns (*by consent*) moved, without Notice, That the following Message be carried to the Legislative Council:—

MR. PRESIDENT,

The Legislative Assembly having appointed a Select Committee on "Assisted Immigration," and the Committee being desirous to examine the Honorable George Henry Cox and the Honorable Edward David Stuart Ogilvie, Members of the Legislative Council, in reference thereto, requests that the Legislative Council will give leave to its said Members to attend and be examined by the said Committee on such day and days as shall be arranged between them and the said Committee.

*Legislative Assembly Chamber,
Sydney, 6th May, 1880.*

Question put and passed.

* * * * *

8. **ASSISTED IMMIGRATION**:—Mr. Speaker reported the following Message from the Legislative Council:—

MR. SPEAKER,

In answer to the Message from the Legislative Assembly, dated the 6th instant, requesting leave for the Honorable George Henry Cox and the Honorable Edward David Stuart Ogilvie, Members of the Legislative Council, to attend and be examined before a Select Committee of the Legislative Assembly on "Assisted Immigration," the Council acquaints the Assembly that leave has been granted to its said Members to attend and be examined by the said Committee, if they think fit.

*Legislative Council Chamber,
Sydney, 6th May, 1880.*

JOHN HAY,
President.

VOTES No. 109. THURSDAY, 10 JUNE, 1880.

2. **ASSISTED IMMIGRATION**:—Mr. Burns (*by consent*) moved, without Notice, That leave be granted to the Select Committee now sitting on "Assisted Immigration" to make a visit of inspection to the ship "Camperdown," lately arrived in Port Jackson with immigrants.
 Question put and passed.

VOTES No. 127. TUESDAY, 13 JULY, 1880.

4. **ASSISTED IMMIGRATION**:—Mr. Burns, as Chairman, brought up a Progress Report from, and laid upon the Table the Minutes of Proceedings of, and Evidence taken before, the Select Committee for whose consideration and report this subject was referred on 6th April, 1880; together with Appendix.
 Ordered to be printed.

ASSISTED IMMIGRATION.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly appointed on the 6th April, 1880,—“*with power to send for persons and papers to inquire into and report upon the expediency of continuing Assisted Immigration,*” and to whom was granted on the 10th June “*leave to make a visit of inspection to the ship ‘Camperdown,’*”—have agreed to the following Progress Report:—

Your Committee have examined the witnesses named in the List,* and had * See list page 7. proposed to examine other witnesses in furtherance of the inquiry remitted to them; but as Parliament will in all probability be prorogued on Tuesday, they beg to lay the evidence already taken by them before your Honorable House, and to recommend that the inquiry be resumed next Session.

No. 2 Committee Room,
Sydney, 9th July, 1880.

J. F. BURNS,
Chairman.

PROCEEDINGS OF THE COMMITTEE.

THURSDAY, 8 APRIL, 1880.

MEMBERS PRESENT :—

Mr. Burns,		Mr. Cameron,
Mr. Jacob,		Mr. Charles.

Mr. Burns called to the Chair.

Entry from Votes and Proceedings, appointing the Committee, read by the Clerk.

Committee deliberated.

Ordered,—That George Foster Wise, Esq., be summoned to give evidence next meeting.

[Adjourned to Wednesday next, at half-past Two o'clock.]

WEDNESDAY, 14 APRIL, 1880.

MEMBERS PRESENT :—

Mr. Burns in the Chair.		
Mr. Cameron,		Mr. Day,
Sir Henry Parkes,		Mr. Jacob,
Mr. Moses.		

George Foster Wise, Esq. (*Agent for Immigration*), called in and examined.

Witness handed in certain documents, which were ordered to be appended. (*See Appendices A1 to 8.*)

Committee deliberated.

Ordered,—That Frank B. Treatt, Esq., and Mr. William Roylance be summoned to give evidence next meeting.

[Adjourned to Friday next, at Eleven o'clock.]

FRIDAY, 16 APRIL, 1880.

Mr. Burns in the Chair.

Mr. Barbour,		Mr. Cameron,
Mr. Charles,		Mr. Moses.

Frank B. Treatt, Esq. (*Chief Clerk and Accountant, Immigration Department*), called in and examined.

Witness withdrew.

Mr. William Roylance (*Secretary to the Trades and Labour Council*), called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That Mr. Henry J. Windon be summoned to give evidence next meeting.

[Adjourned to Wednesday next, at half-past Two o'clock.]

WEDNESDAY, 21 APRIL, 1880.

MEMBERS PRESENT :—

Mr. Burns in the Chair.		
Mr. Barbour,		Mr. Cameron,
Mr. Day,		Mr. Jacob,
Mr. Charles.		

Mr. Henry J. Windon (*Secretary to the Amalgamated Society of Engineers*), called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That William Jarrett, Esq., and J. W. Watkin, Esq., be summoned to give evidence next meeting.

[Adjourned to Wednesday next, at Two o'clock.]

WEDNESDAY, 28 APRIL, 1880.

MEMBERS PRESENT :—

Mr. Burns in the Chair.		
Mr. Barbour,		Mr. Greenwood,
Mr. Jacob.		

William Jarrett, Esq. (*Manager of the Industrial and Provident Building Society*), called in and examined.

Witness withdrew.

John Wesley Watkin, Esq. (*Secretary to the Sydney Permanent Freehold Land and Building Society*), called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That Mr. William Davies and Mr. John Dixon be summoned to give evidence next meeting.

[Adjourned to To-morrow, at Two o'clock.]

THURSDAY,

THURSDAY, 29 APRIL, 1880.

MEMBERS PRESENT :—

Mr. Burns in the Chair.

Mr. Barbour, | Mr. Jacob,
Mr. Cameron.

Mr. William Davies (*Chairman of the Miners Union, at Newcastle*), called in and examined.
Witness withdrew.

Mr. John Dixon (*Secretary to the Miners Association, at Newcastle*), called in and examined.
Witness withdrew.

Committee deliberated.

Ordered,—That John Young, Esq., and Mr. Joshua Farr, be summoned to give evidence next meeting.

[Adjourned to Tuesday next, at *Two o'clock*.]

TUESDAY, 4 MAY, 1880.

MEMBERS PRESENT :—

Mr. Burns in the Chair.

Mr. Day, | Mr. Charles,
Mr. Jacob.

John Young, Esq. (*Contractor*), called in and examined.

Witness withdrew.

Mr. Joshua Farr called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That Mr. John C. Glue and Mr. Robert Meicklejohn be summoned to give evidence next meeting.

[Adjourned to Thursday next, at *Two o'clock*.]

THURSDAY, 6 MAY, 1880.

MEMBERS PRESENT :—

Mr. Burns in the Chair.

Mr. Cameron, | Mr. Charles,
Mr. Day.

Motion made (*Mr. Day*), and Question,—That the Chairman take the necessary steps to obtain the leave of the Legislative Council for the Honorable George H. Cox, M.L.C., and the Honorable E. D. S. Ogilvie, M.L.C., to attend and give evidence before this Committee,—put and passed.

Mr. John C. Glue called in and examined.

Witness withdrew.

Mr. Robert Meicklejohn called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That Francis C. Brewer, Esq., and Mr. Herbert V. Wigg, be summoned to give evidence next meeting.

[Adjourned to Tuesday next, at *Two o'clock*.]

TUESDAY, 11 MAY, 1880.

MEMBERS PRESENT :—

Mr. Burns in the Chair.

Mr. Day, | Mr. Charles,
Mr. Jacob.

Entry from Votes and Proceedings, granting leave for the Honorable George Henry Cox, M.L.C., and the Honorable E. D. S. Ogilvie, M.L.C., to attend before this Committee and give evidence, *read* by the Clerk.

Francis C. Brewer, Esq., called in and examined.

Witness withdrew.

Mr. Herbert Valliant Wigg (*Immigrant per "Northbrook"*) called in and examined.

Witness to supply information as to the callings of some of the Immigrants by the ship "Northbrook."

(*See Appendix B.*)

Witness withdrew.

Motion made (*Mr. Day*), and Question,—That a copy of the evidence taken before this Committee be supplied to Mr. Wise by the Clerk,—put and passed.

Committee deliberated.

Ordered,—That the Honorable George H. Cox, M.L.C., and the Honorable E. D. S. Ogilvie, M.L.C., be requested to give evidence next meeting.

[Adjourned to Thursday next, at *Two o'clock*.]

THURSDAY,

THURSDAY, 13 MAY, 1880.

MEMBERS PRESENT :—

Mr. Burns in the Chair.

Mr. Charles, | Mr. Barbour,
Mr. Day.

The Honorable G. H. Cox, M.L.C., called in and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That the Honorable E. D. S. Ogilvie, M.L.C., be requested, and Charles Field, Esq., J.P., be summoned, to give evidence next meeting.

[Adjourned to Tuesday next, at Two o'clock.]

TUESDAY, 18 MAY, 1880.

MEMBERS PRESENT :—

Mr. Burns in the Chair.

Mr. Charles, | Mr. Barbour,
Mr. Day, | Mr. Jacob.

The Honorable E. D. S. Ogilvie, M.L.C., called in and examined.

Witness withdrew.

Charles Field, Esq., J.P., called in and examined.

Witness withdrew.

Committee deliberated.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

TUESDAY, 8 JUNE, 1880.

MEMBERS PRESENT :—

Mr. Burns in the Chair.

Mr. Day, | Mr. Jacob.

Alderman George Withers called in and examined.

Witness withdrew.

John Macintosh, Esq., M.P., called in and examined.

Witness withdrew.

Committee deliberated.

[Adjourned to Thursday next, at half-past Two o'clock.]

THURSDAY, 10 JUNE, 1880.

MEMBERS PRESENT :—

Mr. Burns in the Chair.

Mr. Barbour, | Mr. Day.

Motion made (*Mr. Barbour*), and Question,—That the Chairman take the necessary steps to obtain the leave of the House to make a visit of inspection to the immigrant ship "Camperdown,"—put and passed.

Committee deliberated.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

TUESDAY, 6 JULY, 1880.

MEMBERS PRESENT :—

Mr. Burns in the Chair.

Mr. Day, | Mr. Barbour,
Mr. Jacob.

Entry from Votes and Proceedings, granting leave to the Committee to make a visit of inspection to the immigrant ship "Camperdown,"—*read* by the Clerk.

Committee deliberated.

Motion made (*Mr. Jacob*), and Question,—That this Committee do proceed forthwith to the "Camperdown,"—put and passed.

Committee thereupon proceeded on board the ship "Camperdown," and were received by the Captain and Medical Officer in charge of the immigrants, and were conducted to the saloon.

Henry Hill (*Immigrant*), called in and examined.

Witness withdrew.

Richard Norwood (*Immigrant*), called in and examined.

Witness withdrew.

Alexander

Alexander Goodwin (*Immigrant*), called in and examined.
 Witness withdrew.
 John Wade (*Immigrant*), called in and examined.
 Witness withdrew.
 Stephen Powell (*Immigrant*), called in and examined.
 Witness withdrew.
 Robert Nevin (*Immigrant*), called in and examined.
 Witness withdrew.
 William Anderson (*Immigrant*), called in and examined.
 Witness withdrew.
 Stephen Howell (*Immigrant*), called in and examined.
 Witness withdrew.
 Dr. Charles Henry Gibson (*Medical Officer in charge of the Immigrants*), examined.
 William Cousens (*Immigrant*), called in and examined.
 Witness withdrew.
 John Allmett (*Immigrant*), called in and examined.
 Witness withdrew.
 Committee having returned to No. 3 Committee Room, deliberated.

[Adjourned to Friday next, at *Three o'clock*.]

FRIDAY, 9 JULY, 1880.

MEMBERS PRESENT:—

Mr. Burns in the Chair.

Mr. Cameron, | Mr. Jacob,
 Mr. Barbour.

Chairman laid before the Committee a letter from the Honorable John B. Watt, and also a letter from the Reverend George Sutherland, which were ordered to be appended (*See Appendices. C 1 and C 2.*)

Clerk laid before the Committee the following claims for expenses attending before the Committee as witnesses:—Mr. Herbert V. Wigg, £2 7s. 2d.; Mr. John Dixon, £2 10s.; Mr. William Davies, £2 10s.

Resolved, that expenses be allowed as follows:—Mr. Herbert V. Wigg, £2 7s. 2d.; Mr. John Dixon, £2 10s.; Mr. William Davies, £2 10s.

Chairman submitted Draft Progress Report.

Same read and agreed to.

Chairman to report to the House.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

ASSISTED IMMIGRATION.

WEDNESDAY, 14 APRIL, 1880.

Present:—

MR. BURNS,
MR. CAMERON,
MR. DAY,

MR. JACOB,
MR. MOSES,
SIR HENRY PARKES.

J. F. BURNS, Esq., IN THE CHAIR.

George Foster Wise, Esq., called in and examined:—

1. *Chairman.*] You are, I believe, Immigration Agent in this Colony? I am.
2. How long have you held that office? Since 1st November, 1862.
3. Can you tell the Committee, in general terms, what is meant by the system of assisted immigration? All persons who come to the Colony under our immigration regulations receive assistance from the Government; they only pay £2 per head per statute adult for their passages.
4. The remaining cost of the immigrant's passage is paid by the Government? Yes.
5. Have you a copy of the Immigration Regulations of September 19, 1876? Yes. I hand in a copy.
6. Can you tell us how many assisted immigrants arrived in the Colony during the years 1877, 1878, and 1879—the number of each class, and their professed trades or calling? The total number of adults who arrived during those three years was 12,411, with 4,528 children, making a total of 16,939; they comprised farming and general labourers, miners, builders, ironworkers, makers of clothing, provision manufacturers, manufacturers, &c. I may be allowed to call attention to a fact worth recording, that is, the large difference in the numbers of some of the classes who came out, comparing one year with the other. For instance the number of farming and general labourers who came out during the three years was as follows:—In 1877, 1,295; in 1878, 1,218; in 1879, 1,320; the number of miners who came out was:—In 1877, 337; in 1878, 114; but in 1879 only 33 came out. The immigrants connected with the building trades numbered 394 in 1877, 270 in 1878, and 255 in 1879; in the iron trades the numbers were 329 in 1877, 161 in 1878, and 72 in 1879; in the clothing trades the numbers were 116 in 1877, 58 in 1878, and 37 in 1879; in the provision trades the numbers were 66 in 1877, 38 in 1878, and 15 in 1879; in the manufacturing trades the numbers were 72 in 1877, 45 in 1878, and 38 in 1879; the immigrants classed as miscellaneous (principally boys between 12 and 15 coming with their parents) numbered 283 in 1877, 187 in 1878, and 186 in 1879. The total number of male adults who arrived during those three years was 6,889, that is 2,892 in 1877, 2,091 in 1878, and 1,906 in 1879. The married women who came out as immigrants during the same three years numbered 2,528, domestic servants 2,398, other callings 596—making a total number of females of 5,522.
7. Then there is a less proportion of female immigrants? Yes. I have prepared a return showing the number of immigrants who arrived during the years 1877, 1878, and 1879, specifying their sex and their trades or callings. (*Return handed in. See Appendix A1.*)
8. How many of the total number who came out during the three years named were nominated by their friends in the colony? 7,219 were nominated by their friends in the colony; the depositors on account of these 7,219 nominees numbered 3,270.

G. F. Wise,
Esq.
14 April, 1880.

G. F. Wise,
Esq.
14 April, 1880.

9. Can you name the districts in which the nominators reside? Yes, I have a return prepared showing the districts in which they reside. (*Return handed in. See Appendix A 2.*)
10. Looking at the return, can you say how many of the depositors or nominators reside in Sydney or the suburbs? A large proportion of them reside in Sydney or the suburbs.
11. Can you state now what was the total cost of this immigration to the colony during the three years named? No I cannot, because the account is kept at the Treasury.
12. What is the average cost of each adult immigrant? £15 to £16.
13. Will you explain to the Committee the arrangements that are made for the reception and distribution of the immigrants on their arrival in the colony? Immediately after the arrival of a ship I go on board and inform the immigrants that they have to be examined on the following day by the Immigration Board. Until the Board meets no person can go on board the ship, nor can any person leave it. Those instructions are given to the captain. For fear there should be any misunderstanding as to when the immigrants are to leave the ship, I have a printed notice issued informing them that they can remain on board the ship until I tell them to leave. On the first day after their arrival I give them notice that I shall be there at half-past 8 o'clock on the following morning to take all who wish to go to the hiring-room. All the single women proceed to the Immigration Depot on the day of the arrival of the ship, where they are examined the next morning by the Immigration Board.
14. Of whom does the Immigration Board consist? Dr. Alleyne, the Rev. Dean Sheridan, the Rev. Canon O'Reilly, the Rev. Mr. Wilkinson, Mr. Marsh, Water Police Magistrate, and myself.
15. What are the duties of the Board? It meets at 10 o'clock on the morning following that on which the immigrants arrive at the Depot, and each individual immigrant is asked if she has any complaint to make as to the quality or quantity of the provisions that were issued during the voyage, or any complaint against any officer of the ship, or the matron, or about anything that has occurred during the voyage. These questions are put by the Chairman to each one as they are called up in alphabetical order. After that examination all the single women who have been sent for by their friends, the depositors, are handed to those friends on production by the latter of the deposit receipt. This precaution is taken to ensure the immigrants against being handed over to any but their friends. No matter whether a recommendation is brought or not, I do not allow any immigrant to leave with any one who does not bring the actual deposit paper, or proves that he or she, as the case may be, is the sender for the immigrant. Of course there are many women who paid towards their passages in England, and they remain at the depot until the hiring-day. In no instance, wives who come out to join their husbands excepted, do I allow any one of these women to leave the depot; because, of course, I cannot tell who may be their friends or relatives. On the hiring-day, which is generally about the third day after arrival of the ship, all those who like to engage as domestic servants, and all those who have paid for their passages in England, attend in the hiring-room. The hiring-day is duly advertised, and no person is allowed into the hiring-room without first obtaining a written permission from myself. I never depute that duty to anybody. If I have any doubt at all as to the *bonâ fides* of the individual who asks for an order of admission I decline to give it. By a rule which has existed for many years the Government does not allow any female immigrants to hire with persons who keep inns or public-houses, therefore I am very careful as to who I allow in the hiring-room. Everyone who goes in is supposed to be known to me, or to present to me a letter of introduction from some well-known person. Whatever may be the number of women for hire they are generally hired within half-an-hour after the hiring-room is opened.
16. Do you mean they are open to engagement within half-an-hour? No; they are actually hired within half-an-hour.
17. Has that been your experience throughout the whole of the last three years? Throughout the whole of the three years. I generally give from a hundred to a hundred and thirty passes to employers to enter the hiring-room.
18. Now, explain what is done with regard to the male immigrants? At 12 o'clock on the first day after arrival the Immigration Board proceeds on board the ship, when all the married men, with their wives and children, also the single men, are brought before the Board individually, in alphabetical order, and each is asked whether he or she, as the case may be, has any complaint to make against anybody or anything connected with the ship. If complaints of anything like a serious character are made they are looked into at once. But very often the complaints are of a very trifling character, relating to some loss of clothes, &c., or to some quarrel with other immigrants. Trumpery complaints are passed over; but any serious complaint is at once looked into by the Board. For instance, if the complaint is that the meat is bad, the captain of the vessel is immediately called and required to open the hatches and produce a cask of meat for the Board's inspection. Then the Board selects a cask indiscriminately, and inspects the meat to see if it is good or bad. Any more serious complaint, that cannot be settled in that summary manner, is dealt with by the Board subsequently at a special meeting. The special meeting is held on the day following that on which the complaint is made, or as soon as practicable, and an examination of witnesses takes place. The evidence is given verbally, but not upon oath. The result of the inquiries in many instances has been that the captain has been fined in heavy sums. Fines of £100 or £250 are sometimes imposed; a few years ago a fine of £500 was imposed upon the captain of an immigrant vessel. These fines are generally inflicted for misbehaviour, or on account of the bad quality, or insufficient quantity of the provisions. One captain was fined £200 for not having a sufficient supply of provisions on board. Luckily the vessel came into port all right, and the immigrants were not aware that the supplies for their use were so nearly run out as they were. She had been out one hundred days, and it was only upon examination that I found the supply was short. The captain and doctor admitted that if the vessel had been at sea three or four days more there would not have been sufficient stores on board. They would not have had a single candle, and a few other things ran short. The ship was fined £200; that is to say, the Board of Immigration recommended such a penalty should be imposed. The Colonial Secretary has generally acted upon the Board's recommendation. Until an inspection of the vessel has been made by the Immigration Board no person is allowed to go on board. The inspection generally takes about two hours, from 12 o'clock until 2. I then a second time have all the immigrants collected and address them. I tell them that I am the Agent for Immigration—that I represent the Government, and that they need not leave the ship until I tell them to leave, or until some gentleman from my office tells them—that they need not obey any one else who may tell them to leave. I then inform them they are at liberty to leave the ship at once,
and

and that I am prepared to give free passes to all who wish to go into the country, and that a steamer will convey all who wish to go ashore, together with their luggage. The result is, that about one-third of them immediately go ashore with the steamer, and I never hear anything more of them. I give free passes to those who wish to go to their friends in the country, to Newcastle, or elsewhere. They are at liberty to go where they like and do what they like after leaving the ship; but I warn them that if they come on board again they must not bring any grog with them; and that they will be under the same discipline as they were under on the voyage out. I inform them that on the following morning at half-past 8 o'clock I shall be there with a steamer to bring them on shore. I explain to them that I am then going to take them to the hiring-room, where they may or may not hire, as they please. I always advise them to hire at the first rate of wages offered. I say to them, "Whatever pay is offered, you may depend upon it it will be a fair rate. A master will not attempt to impose upon you, and you will very soon find out if he does." My advice to labouring men is invariably to go up the country and take the first engagement that offers. I tell masons that I cannot advise them to go up the country, but I generally advise rough carpenters with families to go. I tell them there is a difficulty in getting employment in Sydney as carpenters unless they have friends. On the two following days, from 9 to 1 o'clock, the immigrants may remain at the hiring-room, and may engage with any persons who may desire to employ them. That system has been very successfully carried out.

G. F. Wise,
Esq.
14 April, 1880.

19. As to the distribution of the people? As to the hiring alone. For instance, last year, 1879, 183 married couples and 236 single men were hired in the hiring-room. This system of hiring has only been adopted during the last eighteen months. I have thus disposed of three days out of the seven lay-days allowed. I tell those who remain unhired or on board that they will have to leave the ship in three days time, and I offer them free passes into the country if they like to go. Some of them ask advice, which I give them. I do not promise anything. When they tell me what kind of work they can do I advise them to go to such-and-such a place. The return which I hand in (*See Appendix A 3*) shows that during 1877-78-79 I have given free passes to 8,395 individuals out of the 16,939 who arrived, to proceed into the interior of the country; I have sent them to no less than 212 different localities. To the North I have sent immigrants to forty-four localities; to sixty-four localities in the South; to fifty-seven in the West; and I have sent them to forty-seven coast towns.

20. Can you furnish a return showing the rate of wages at which immigrants have hired on their arrival, and of the different trades and occupations of the persons who have hired at those wages? I have a return showing the current prices paid for labor in the colony in May, 1876, March, 1878, and March, 1880.

21. But does that return show the actual rate of wages at which these immigrants were hired? No, it is a return which I send home monthly to the Agent General in London; I also send it to New York, San Francisco, and elsewhere. It is headed: "Statement authorized by the Government of New South Wales of the current rates of wages of labouring people in the colony of New South Wales, and the cost of their house-rent, food, and clothing, to enable officers duly appointed by the Governor and Executive Council to furnish necessary information to persons entering into engagements for service under the Act of the New South Wales Parliament, 39 Vic., No. 29." That return shows, in a comparative form, the rates of wages during the three years specified. There is scarcely any difference between the rates for 1876 and those for 1880.

22. But have you any record of the rates of wages for which immigrants have hired at the barracks here? The average rate of wage at which women have hired is from 8s. to 10s. per week. I refer to domestic servants. Amongst those classed as domestic servants are many children of from 14 to 16 years of age, who obtain wages from 7s. upwards; they of course bring down the average rate.

23. Could you furnish a return, say for last year, showing the actual rate of wages at which immigrants have hired at the barracks in Sydney, or on board ship, in the various descriptions of labour; for instance, farm labourers, mechanics, domestic servants, and so on? The average rate of wages paid to domestic servants in 1877 was £24 18s. a year; in 1878 the average rate was £23 10s. 2d.; in 1879 the average rate was £23 7s.

24. What we wish to know is the rate of wages at which mechanics, farm labourers, and other classes of immigrants have hired after their arrival in Sydney. Could you furnish a return showing the rates at which they hired last year? No; as a matter of fact scarcely any of the mechanics hire at the hiring-room; most of them go into the town and engage in the town. I have often endeavoured to ascertain the rate of wages at which they engaged, but never could; after they leave the ship or the hiring-room they are lost to me. I cannot get at them. The first day on which permission to leave the ship is given more than a third of the immigrants leave, and I never hear of them again. Those who hire at the hiring-room or from the ship obtain from £35 to £45 per annum—that is single men.

25. Farm labourers? Farm labourers.

26. Does that rate include rations? Yes, it includes rations and lodging. Men with wives and families get from £60 to £70 per annum.

27. What class of immigrants have you found to be in most demand? Scarcely any one comes to the hiring-room to engage any but labouring men.

28. But you have, I presume, inquiries for different classes of immigrants;—what class is in most request? Labourers?

29. Of the males you find labourers in most request, and of the females you find domestic servants most in request? Any number of domestic servants are in request, and amongst the males, labouring men and farm labourers are mostly in demand.

30. Has it come to your knowledge that any of the assisted immigrants have been unsuited to the requirements of the colony; have you heard it alleged or observed it yourself, that many of them are aged or decrepid? Never; a decrepid man—a man with only one leg, for instance, would not pass the Agent General in London; he would not be allowed to come. I have never known such a person to come.

31. Have you known any aged or infirm persons to come? An aged person, say one who is about seventy years of age, would have to pay his own passage. During three years eighty aged persons have come to this colony with their children, or with other relatives, but they have had to pay the full passage money, namely £15. They were therefore not immigrants in the ordinary sense of the term—they were not immigrants at the public expense. I hand in a return (*See Appendix A 4*) showing the number of persons of fifty years of age and upwards, who have arrived under the immigration regulations during the years 1877, 1878, and 1879.

- G. F. Wise,
Esq.
14 April, 1880.
32. I observed, from your statement as to the occupations of the immigrants who came during the year 1878, that there was in that year a great decline in the number of miners? Yes, a large decline.
33. Have you any reason to suppose that coal-miners have come out to the colony under the designation of agricultural labourers? I think it is very possible. I have on some few occasions detected such persons; I have found that they did come out under false designations—not miners, perhaps, but engineers. When I detect such a person I say, "You are not a labouring man; you had better tell the truth; I am sure you are not a labouring man." The answer sometimes is, "No, I am an engineer, but I have been obliged to pass as a labouring man." It has been notified in England and elsewhere that miners and men engaged in the iron trades are not in demand in the colony.
34. Can you explain by what process immigrants are selected in the mother country? I have all the documents sent to me by Sir Charles Cowper, when he was Agent General. They show how the immigrants are selected, and what is done with them.
35. Can you state generally in what way they are selected? A detailed nominal list of those who have been nominated in the colony is sent to the Agent General each month with full particulars as to their age, occupation, and residence. On receipt of that monthly account the Agent General communicates with the person who has been sent for. He sends them a form of application, which contains certain questions which they have to answer. They have, for instance, to state their place of residence, where they were born, whether they are married or single, the number of children, and whether any increase is expected within the next four months; they have also to state the name, address, and occupation of their late employer, and the time he worked for him, the rate of wages received, and when they left their employment; the name and address of the minister of the parish in which they reside; whether they have been in receipt of parish relief, and if so, for how long; whether they have been out to any colony before, and if so, they must state to which colony they went, when they went, and by what means they went and returned, and at whose expense. The applicant has to sign the certificate declaring that the statements he has made therein are true. The certificate has then to be signed by two respectable householders. They certify that the form of application was duly filled up before their signatures were attached; that they have perused the statements contained therein, and believe them to be strictly true; that they are well acquainted with the applicant, and know him to be of the calling stated, and believe him to be honest, sober, industrious, and of general good character, and that none of the persons named in the application are deformed, deaf, blind, lame, or idiotic, or likely to become a burden to the colony. The form of application must also be signed by a physician or surgeon, who must certify that he has examined the applicants named therein, and that none of them are deaf, blind, lame, idiotic, or seriously mutilated or deformed in person, or in his opinion afflicted with any disease calculated to shorten life, or to impair physical or mental energy, and that each person appears to be of the age set against his or her name. He has also to certify that the applicants have all had the small-pox, or have been vaccinated and are entirely free from every disease usually considered infectious or contagious; and that all the applicants are capable of labour in their respective callings. The magistrate or clergyman of the parish in which the applicant resides has also to sign the form of application, certifying that he has examined the statements contained therein made by the applicant, and that he has no reason to doubt their truth; and further, he has to certify, to the best of his belief, that the certificates of the two householders, and of the physician or surgeon, who signed the form of application, are authentic, and that the persons whose signatures are affixed to the certificates are worthy of credit. The applicants are informed, on the margin of the form of application, that the sale of such form subjects the party offending to a penalty not exceeding £50 nor less than £2. When the form of application is duly filled up and returned, the Agent General informs the applicant that he must hold himself in readiness to proceed to Plymouth or other place of embarkation. A further letter informs them when they are to be ready to go on board. When the applicants arrive at Plymouth, they go to the emigration depôt for a few days before the ship leaves; they are there placed in charge of the Surgeon-superintendent, who rejects them if he thinks there is disease amongst them, as sometimes is the case. I should say that if the statements in the form of application are not considered satisfactory, the Agent General sends the applicant a printed form, duly filled up, informing him that he declines to grant them a passage. The Agent General subsequently sends out a full account of the transactions, and gives his reasons for what he does, and why the applicants are not accepted. The reasons are various: sometimes they decline to emigrate; sometimes it is found they have been to a colony before; sometimes it is found they wish to get from New South Wales to Melbourne, or some other place not in New South Wales.
36. I believe that you are one of the members of the Board appointed by the Government of this colony to issue passes to the unemployed, to enable them to go into the country districts? I am.
37. Who are the other members of the Board? There are only two members—Mr. Fosbery, Inspector General of Police, and myself.
38. How long has the Board been in existence? Since March, 1878.
39. Can you state in round numbers how many passes have been issued by the Board since its appointment? About 2,350, from March 8, 1878, to April 13, 1880.
40. Are you aware whether any of the newly-arrived immigrants have applied for free passes? It is a very rare occurrence. Perhaps one a week, or possibly two. It is a very rare occurrence indeed. By newly-arrived immigrant I mean an immigrant who has only been in the Colony twelve months or two years. An immigrant is easily recognised by his dress and general appearance. Sometimes they recognise me when I do not recognise them. But it is a very rare occurrence that an immigrant of twelve months' standing or more comes before the Board.
41. Have you taken any trouble to ascertain the Colonial career of those immigrants who have remained in or about Sydney? Yes. I impress upon them all, when on board ship, that I, being representative of the Government, am their best friend; that it is my duty as well as my wish to do everything I can for them; and therefore to let me know if they are in difficulties at any time, and I will do what I can for them. I address these remarks to the whole of the immigrants, including the women and domestic servants. It is too often the case, I am sorry to say, notwithstanding their agreements, that domestic servants are dismissed without their wages. They come and show me their agreement, and I recommend them to some solicitor, who generally obtains the money for them. As for the male immigrants I frequently hear of them, or see them in the streets. When one of them recognises me I stop immediately. Sometimes I am stopped in the street by a man who will tell me he came out as an immigrant and has done very well indeed. I cannot name any individual, but I frequently meet with such persons in Sydney. Yesterday
for

for instance I met a man who came out by the "Earl Dalhousie"; he told me he was living somewhere near Newtown, and has got a large number of cows. I constantly receive letters from immigrants, who tell me they have done very well since they came out; and some of them express a wish to send for their friends. In a letter which I received two or three days ago the writer says:—"I am very proud of this my adopted country, and shall be very sorry to see that door closed that I came through."

G. F. Wise,
Esq.
14 April, 1880.

42. *Mr. Jacob.*] Do you often receive communications of that kind? Very often.
43. *Chairman.*] In your last annual report you state that not above one half of the male immigrants have been found willing to offer themselves for hire; that most of them prefer to go to their relatives or friends; that a large proportion of farming or labouring men readily get engagements; then you go on to state that some of them decline the wages offered them on arrival; can you say what class of persons they were, and what wages were offered them? Labouring men, single men, refusing £40 or £45 a year.
44. Farm labourers? No, labourers, who refuse £40 or £45 at the hiring-room.
45. *Mr. Day.*] With board and lodging? With rations and lodging.
46. *Chairman.*] They prefer to go away on their own account? Yes; perhaps I ought to add that when they do go away into the country the arrangements made on their behalf are these: They receive forty-eight hours board and lodging at the place they go to. I do not order them to go to any particular place; I impress it upon them that they must choose the place they wish to go to, and then I will give them the best advice I can; but they go at their own risk. When they have selected a place I give them an order for maintenance for forty-eight hours after arrival at their destination. They go with that order to the police, who take them to the best inn in the place. The police are authorized at their discretion to grant maintenance for seven days to married couples, and four days to single men.
47. *Mr. Day.*] Should they deem it necessary? Should they deem it necessary. It is at their option. The privilege of this extended maintenance was claimed by only twenty-five married couples during the past year, and by two single men. The immigrants generally have been satisfied with the forty-eight hours.
48. I understood you to say you gave them board and lodging at the best hotels? I believe they are the best hotels. The police send them where they like.
49. What are the charges? One shilling each meal, and one shilling for a bed. There is no contract; the police send first to one inn and then another. The accounts are sent to me from the different inns.
50. *Chairman.*] Have you during the past year or at any time experienced any difficulty in finding employers for the immigrants, or engagements at the current rate of wages, especially with regard to farm labourers and persons accustomed to country pursuits? A great many go up the country who are not engaged. When they go into the country I lose sight of them.
51. What I want particularly to know is this: Is there any difficulty experienced in getting engagements for persons used to country pursuits, whilst they are in Sydney, before they go up the country? A great many who go up the country are disengaged.
52. *Mr. Day.*] Have you found any difficulty in obtaining employment for persons used to country pursuits? Yes, only a portion of those who go to the hiring-room engage.
53. *Mr. Moses.*] But do those who are willing to engage readily get employment? No, because there are not a sufficient number of employers in the hiring-room.
54. *Chairman.*] As farm labourers? As farm labourers.
55. What becomes of them? They go into the country after the two hiring days are over.
56. Do you obtain any knowledge of them afterwards? No, as a rule I never hear of them again; if I do hear of them it is oftener regarding their welfare than their ill success. I do occasionally hear of them coming back to Sydney at their own cost.
57. Who are those immigrants who decline to accept the current rate of wages? They are labouring men.
58. Are they farm labourers? Yes, farm labourers. What I mean may perhaps be best explained in this way. There are say 100 men in the hiring-room; but there are only employers found for about 30 or 40. The others go into the country.
59. How often do you have men who decline to accept the current rate of wages? By every ship. They are often those who come back again and take other engagements.
60. Do many remain about Sydney? Some few; they sometimes come to me for passes, that is how I know. Almost as a rule the labourers go into the country, simply because I tell them there is no employment in Sydney.
61. It has been alleged that many of our newly-arrived immigrants join the ranks of the unemployed;—now so far as your knowledge extends do you think that statement correct? I can only give one instance, and it may be somewhat unfair to mention it. But I met an immigrant not long ago in Sydney, and I asked him what he was doing: He replied, "I am doing very well indeed." I asked him what it was he was doing, and he said, "Oh, I am doing nothing, and am receiving £1 a week for doing nothing."
62. Was he one of the unemployed? He was unemployed, and was receiving £1 a week for not doing anything. There are many men who come to me and say they cannot get work.
63. Are they persons who have remained in Sydney? I can give an instance: On Saturday last a man came to me and said he was a married man and could not get employment, and was very hard up, and wished to be sent into the country. I am only allowed to send them into the country within three or four days after arrival. But if good reason is shown for a relaxation of that rule I use my own judgment in the matter, and to give a free pass even after the specified time has lapsed. The man I speak of said his wife was very ill and could not go into the country at first, I asked him to come again on Monday morning, and I would give him a pass. The man gave me good and sufficient reason for so doing; but I have never seen him since.
64. Was he a farm labourer? Yes.
65. Has it occurred to you that some of the immigrants are of a class not required in the colony, that they follow occupations which have not yet taken root here? Yes, the demand is limited for boiler-makers, engineers, fitters, and brass-finishers. Not many brass-finishers have come, only 21 in three years. These men do experience great difficulty in meeting with employment. After a short time I lose sight of them and I take it for granted that they have obtained employment of some kind.
66. Do you meet with many immigrants who will take only light kind of employment, or who, from their previous habits, are unable to do labouring work? That may apply to some few persons who pay their own passages.

G. F. Wise, Esq. 67. Not to assisted immigrants? You mean men who are not fit for work, who are not fit for hard work as labourers; such for instance as bookkeepers, &c., of whom very few come.

14 April, 1880. 68. But light porters and persons of that character? Several apply for situations as light porters. I hand in a return showing the classification of education of the immigrants who arrived under the Immigration regulations during the years 1877, 1878, and 1879; also, a return showing the classification of religions of the immigrants who arrived under the Immigration regulations during the same years. (*Returns handed in. See Appendices A5 and A6.*)

69. Have any immigrants been landed elsewhere in this Colony than at Sydney? Yes, in the year 1854 one ship, and in 1855 four ships, bringing out 1,195 souls, went to Newcastle and landed them there. Those immigrants are spoken of as railway labourers. At no other place in the colony have any immigrants been landed who came out under Government regulations. From the year 1838 to the present time no such immigrants have been landed in any place in the Colony other than Sydney, except those who came out in the five ships which I have just referred to, and who went to Newcastle. I hand in a return relating to this, and one showing number of deposits under existing regulations of 1876. (*See Appendices A7 and A8.*)

70. *Mr. Day.*] Do you think the present system of assisted immigration works well? It appears to me to work very well indeed, especially for immigrants.

71. You think the immigrants who come here, so far as you are aware, have no complaints to make? As a rule, certainly not.

72. And they have always found employment? I warn them over and over again, and advise them over and over again to communicate with me if they do not find employment. As I rarely receive complaints I take it for granted they are well to do, or at all events that they have got some engagement. As I have already remarked, I do occasionally hear of immigrants returning from the country to Sydney at their own expense.

73. You take great interest in immigration of course? Yes; and I may say I feel a great personal interest in the immigrants.

74. It would be likely to come to your ears if many did not find employment? It ought to do; I have taken every opportunity to find out whether they have obtained employment or not.

75. What has your experience been? On one occasion I recollect a statement made in one of the newspapers that certain immigrants who had been sent up to Yass were very badly treated; that is three or four years ago; there were five or six of them. Sir John Robertson was Colonial Secretary at the time. He sent for me immediately and asked me if I knew anything of the matter complained about. I said I knew nothing more than the fact that five or six immigrants did go to Yass. He replied, I must send some one to ascertain the truth of the case. I sent a clerk from the office to Yass that night, and he found that half of those mentioned in the newspaper had obtained employment; the others obtained employment within two days subsequently. On another occasion a notification was sent to the Colonial Secretary to the effect that a number of immigrants were ill, or dying, from fever at Murrurundi. I think the doctor at Murrurundi confirmed the statement; and it was also said that one of the immigrants named Chapman could not get work. The Colonial Secretary sent for me, and inquiries were at once instituted by Dr. Alleyne as regards the fever. As for the man Chapman, who was said to be wandering about in a destitute condition, unable to obtain employment, I may mention that at that very time a ship had come into port with his brother-in-law on board; and the brother-in-law showed me a letter from Chapman, in which he begged him to come up to Murrurundi as fast as he could, as he could get employment for him. I handed a copy of the letter to the Colonial Secretary.

76. Has the system of sending immigrants up the country and allowing them two or four days board always been in existence? Under the regulations of 1876 people have always been sent into the country; but the system of giving them two or four days board originated about two years ago.

77. Have you ever sent immigrants up the country and turned them out on the railway platform and allowed them to go where they liked or could? Yes, if they were going to employers under engagement.

78. I am speaking of men who have been sent up to get employment. Have any of them been turned out on the platform and allowed to do what they could, without provision being made for their getting a day or two's board until they were able to get employment? No; if such a thing has ever occurred there has been some very good reason for it.

79. On all occasions this system of taking care of these people for a few days after their arrival, at any specified place in the country, has been adopted? Yes, at the places they chose to go to. They hold an order from me to the Superintendent of Police in the district; the police understand that upon the production of that document by the immigrant they have to find him accommodation for two or four days; the time may, under certain circumstances, be increased to seven days at the option of the Police authorities.

80. I think you have stated in evidence that in most instances the immigrants have not availed themselves of the longer period? I gather from the accounts I have had to pay that only two single men have availed themselves of the extended period during the past year, and only twenty-five married people availed themselves of the privilege.

81. Have you found any immigrants who have been sent up the country, come back to Sydney and complain about not being able to obtain employment? Yes, I will not say that it often occurs; but it does occur sometimes. They will perhaps say, "Oh, I was only offered £30 with board and rations, and the work was harder than I expected it would be"; or make some other such statement, and they want perhaps to go elsewhere; but I have no power to give them a pass to go elsewhere, and do not do so.

82. *Mr. Moses.*] What is the amount paid by depositors who send for their friends? £2 per head.

83. There is no charge upon the immigrant when not sent for by his friends here? Depositors nominate the persons whom they wish to have brought out, and pay £2 per head for every adult. When they come out they are handed over to their friends who hold the deposit receipt. Another class of immigrants consists of those chosen by the Agent General, or who apply to the Agent General, and pay £2 each adult in London.

84. What is your experience in regard to the domestic servants who arrive—are they generally experienced persons who have been in service before? Very few of them.

85. If they were experienced the wages they receive would be very much higher? Anything they ask they usually get.

86. Notwithstanding their inexperience? Notwithstanding their inexperience.

87. The majority have not been in service before? The majority have not been in service before.

88. Is the supply of immigrants of that description equal to the demand? Nothing like it. I generally give from 120 to 130 permits to go into the hiring-room on each day immigrants are for hire.

SELECT COMMITTEE ON ASSISTED IMMIGRATION.

7

89. Do you think a larger number of female immigrants could find employment here? Yes.
90. I notice that in 1877 there were 915 depositors, and in 1879 there were 1,532 (*See Appendix A 8.*) a considerable increase;—do you think that shows want of employment for people in the colony? When a person in the colony makes a deposit to send for a friend, it is I consider a proof that he has obtained or will be able to obtain employment for that friend when he comes. The increase in the number of depositors shows, I think, that there is increased employment for those who come.
91. I suppose the people who settle here would not send for their friends unless they could find employment for them? No, the nominees invariably go to their friends on arrival.
92. Have the immigrants on arriving here any means? I always try to discover what means they have.
93. And what is your experience? In one ship that came from America, the immigrants had in their possession drafts on a Sydney mercantile firm to the value of nearly £1,800. That is an exceptional case.
94. But those coming from Great Britain? I always tell them when they arrive that if they have any drafts or cheques, or bank notes, I am the proper person to witness their signature. I have known instances of immigrants bringing £200 or £300 with them.
95. The majority, I suppose, have some means? I do not think very many of them have as much as £20. Some few have larger sums, say up to £100. One man called upon me who possessed £350 when he first arrived. He went to Cootamundra, and is now possessed of two flocks of sheep. He became a free selector, and is doing very well.
96. Do any of the immigrants ship to the other colonies? Occasionally I discover it. But I never give them the slightest assistance. I tell them, when they ask me for passes to go to another colony, that I cannot give them one, and I point out that they have cheated this colony.
97. *Mr. Jacob.*] Have I drawn a correct inference from your answers to the questions put by Mr. Moses, that no immigrants come out to the colony free? None come out free.
98. Each one has to pay £2? £2 is paid by somebody for each adult who comes.
99. I understand you to say that as a rule not more than one or two persons a week come to you for passes to go into the interior? Yes; I allude, of course, to recently-arrived immigrants.
100. Have you any means of ascertaining whether immigrants supplant workmen in Sydney, which induces those workmen to come to you for passes into the interior in the numbers you speak of? I cannot answer that question. I must say that many of the unemployed have said that it is rather hard they cannot get employment, because immigrants are taken on in place of them.
101. You rather roused my curiosity when you said that a newly-arrived immigrant was getting £1 a week for doing nothing? He said he was getting £1 a week from some Union for doing nothing, and that he had been doing so for three months.
102. *Mr. Cameron.*] Did you ascertain what Union was paying him the money? I did not; I rather doubted the statement myself.
103. Are there any immigrants on their way out at the present time? Two ships with immigrants.
104. How many immigrants are those two ships bringing? There are 780 souls in the two ships.
105. Are many of those immigrants who are on their way connected with mechanical trades? The nominal lists of passengers by those ships have not yet arrived.
106. Can you give any idea as to the percentage of mechanics who come out in each ship? The return which I have handed in will give you that exactly, with regard to all who have come within the last three years.
107. Have you any idea of the state of the mechanical trades at the present time in Sydney? Not personally. I know that engineers, fitters, and boiler-makers find it difficult to get work. I send them with a recommendation from place to place, and tell them if they cannot get work to come back to me. It is very rarely they come back.
108. That only refers to immigrants;—have you any idea as to whether or not at the present time there are large numbers of men out of employment in the mechanical lines? No.
109. Have you any knowledge of the state of the building trades at the present time? I understand that builders, more especially at North Shore, cannot get labourers.
110. Would it be asking you too much to inquire from what source your information is derived;—is it from the men or from the employers? From the employers. I am speaking more especially of North Shore. The builders there often ask me to send them men when a ship comes in.
111. Suppose now that trade is dull in Sydney, say in the iron trades, do you know of any other town in the colony which could absorb a number of ironworkers? No.
112. Not at the present time? No; I always tell men of that kind, ironmoulders for instance, when they come to me and tell me they cannot get work in Sydney, that I will send them into the country to do what they can, but that there is no iron moulding to be done in the country.
113. You do not know of any place out of Sydney where that class of men could be employed? I do not.
114. How are emigrants obtained in the mother country—is it by a system of advertising? Yes. Sir Charles Cowper sent out to the Government an explanation of the whole routine.

G. F. Wise,
Esq.
14 April, 1880

FRIDAY, 16 APRIL, 1880.

Present:—

MR. BARBOUR,
MR. CHARLES,

MR. CAMERON,
MR. MOSES.

J. F. BURNS, Esq., IN THE CHAIR.

Frank B. Treatt, Esq., examined:—

115. *Chairman.*] I believe you are employed in the Immigration Department? Yes.
116. In what capacity? As Chief Clerk and Accountant.
117. How long have you been in the department in this colony? I first came to the colony in February in 1870.

F. B. Treatt,
Esq.
16 April, 1880

118.

- F. B. Treatt, Esq.
16 April, 1880.
118. In the department? I have been in the department since May, 1877.
119. I believe you were previously employed in the office of the Agent General in England? I was.
120. Did your duties in that office bring you in contact with intending emigrants? With intending emigrants who were resident in London.
121. I presume you are familiar with the whole system of assisted immigration? I am.
122. It is, I believe, the fact that upon the arrival of immigrants here, those who do not join their friends are open to hire by any one who may desire their services? Yes.
123. What has been the class of immigrants who have been mostly open to engagement with respect to their occupations? I cannot speak statistically, but they have been chiefly farm and other labourers, persons employed in building and other trades.
124. Have you observed any difficulty on the part of immigrants who desired engagement either on board the ship or at the depôt? Those who are not engaged or forwarded up to the various country districts, leave the control of the Immigration Department and disappear among the masses of the community here.
125. Have you at all followed the career of those who have not been engaged upon their arrival? I can speak with greater accuracy with respect to those who came out in the emigrant ship with me, the "Earl Dalhousie." I do not know one of them at the present time out of employment. I have made several inquiries respecting them, inasmuch as I looked upon them as familiar acquaintances, having made the voyage with them, and of only two or three out of the whole number have I heard unfavourable accounts.
126. Was that owing to any fault of their own? Owing to their own fault.
127. Do you recollect from your own memory, or have you any statement of the rates of wages at which the different immigrants were engaged upon their arrival here? Farm labourers, single men, at from £30 to £45 a year; married couples, at from £50 to £65, with rations.
128. As to the demand for farm labourers and persons of that class, is the demand equal to the supply? It seems to me to be increasing every year.
129. Have all the farm labourers been able to get employment at these wages immediately upon their arrival? A large number will not accept employment immediately upon their arrival; they prefer to exercise a little independence, and to see a little of Sydney. Some of them go up the country at once, for which they obtain a pass by rail or water. I know of no farm labourers out of employment.
130. As to persons of other callings, have you observed any difficulty in obtaining engagements for them? Very few engagements among skilled artizans come under my cognizance.
131. I presume, when any immigrants are hired, some part of the work connected with their engagement comes under your personal observation? Yes; in the hiring-room.
132. As a matter of fact, as far as your information extends, how many on an average remain in or about Sydney? I cannot speak statistically; but I should say from two-fifths to one-half go up the country by rail or steamer.
133. What becomes of those who locate themselves here? I cannot speak from personal knowledge.
134. What classes of tradesmen or skilled mechanics find the most difficulty in getting employment? The immigrants hired at the depôt are almost all farm or other labourers. Skilled artizans go out into the town themselves in search of employment. Some come subsequently to the Immigration Office; for example, the day before yesterday, three stonemasons—Yorkshiremen—came and stated that they could not obtain employment. We had heard from Bombala that stonemasons were required there for the erection of a Court-house, and passes were given to them to proceed thither. Subsequently one of them returned, and stated that he had, since applying, obtained employment in town at wages commencing at 10s. a day.
135. Has it been the practice for assisted immigrants to return to the depôt for information or assistance when they have been unable to get employment? It seldom occurs.
136. Have you heard of these assisted immigrants remaining in or about Sydney? Not officially.
137. Of your own knowledge? Of my own knowledge in occupations other than that of an agricultural description.
138. Of what classes were they? In the iron trade, and some in building trades who have been unable to obtain immediate employment.
139. Have you had many of that class come out as assisted immigrants? A few; but by far the larger proportion consist of farm and other labourers. The remainder are men of a great variety of trades.
140. How many skilled mechanics come out as assisted immigrants? The Agent for Immigration brought a paper to the Committee containing the information. I could not speak with any statistical correctness.
141. Has your attention been drawn to persons who have come out under designations different from their actual trades or callings? It occurs sometimes.
142. To any extent? No.
143. Have you heard of coal-miners coming out as farm-labourers? Very seldom.
144. It has occurred? On one or two occasions.
145. Have you found any demand for coal-miners? Yes.
146. On the part of the proprietors of mines? Yes; during the past two years.
147. On the occasion of disagreements between the miners and owners of collicries? Yes, at that time and other occasions. I may be permitted to explain that it occurs frequently in England that a man who has worked as a coal-miner has also been employed as a farm labourer, and if he states that he is a farm labourer, and upon reference it is found that he has been so employed, he is permitted to embark.
148. Have you heard unofficially that any of the assisted immigrants have remained in Sydney and have joined the ranks of what are called "the unemployed?" I have not known of one from my own observation.
149. While you were in the office of the Agent General did you pay any attention to the class of persons who were coming out as immigrants? The class of immigrants who came out then were under the existing regulations of 1873? They were chosen in view of the provisions contained therein.
150. Did they seem to be persons of good character and of industrious habits? The only persons of whom I could speak are those who applied at the counter in the office at London. The others sent in applications on printed forms.
151. Did they appear to be persons whom it was desirable to send out as colonists? Not from London.
152. I presume they were mostly artizans, or persons not likely to be in demand here? Yes, from London.
- 153.

153. But with regard to the people from the country districts of England? I cannot speak from my personal knowledge, because they went direct from their places of residence to join the ship at Plymouth.

F. B. Trentt,
Esq.
16 April, 1880.

154. As to the demand for domestic servants at the depôt in Sydney, have you found it to be in excess of the supply? The demand appears to be inexhaustible.

155. At what rate of wages? Running from 6s. to 14s. or 15s. a week, with board of course.

156. *Mr. Cameron.*] How long were you in the Agent General's office in England? From October, 1875, until within a week of my departure from England in the emigrant ship "Earl Dalhousie."

157. The only emigrants with whom you came into contact were those who applied at the London office? Yes, with the exception of the "Earl Dalhousie" emigrants.

158. There are other agencies, are there not, throughout the United Kingdom? I understand there are none at present.

159. Were there any at the time you were in England? There were throughout England, Ireland, and Scotland.

160. In the principal towns, I suppose? Yes, and elsewhere.

161. Can you give the Committee any idea how those agents were remunerated? They received 10s. per head upon approved adult emigrants. I speak open to correction: I think it was 10s. per adult.

162. Can you give the Committee any idea how many of those agents there were? About 100.*

163. I suppose by far the larger number of emigrants who sailed for New South Wales were those who were sent to the office by those agents? On the contrary.

164. Could you give the Committee any approximate idea of the percentage of emigrants obtained through the agency of these people? I cannot now, but I know it was very small.

165. What class of people did you find, as a rule, applied to the London office; were there more agricultural labourers than mechanics? There were no agricultural labourers—personal applicants.

166. They were mostly mechanics? They were mostly mechanics, who personally applied at the London office.

167. And by far the larger number of persons you say applied at the London office? By far the larger number of persons applied at the London office possibly, but by far the larger number of those who were approved were from the country districts.

168. How did these become the subjects of approval at the London office if they resided in the country—was it not through the medium of the country agents? The Agent General received applications from those in London personally, but the applications from the country came by letter. The gross number of applications is very different from the number of approvals.

169. Of course I am speaking of the applications that were approved. Can you give the relative percentage of the two classes? No, I could not.

170. In your opinion which class preponderated? The agricultural labourers.

171. With reference to the skilled artisans who came here, you say you have not much knowledge of them after landing here? No.

172. They do not wait any considerable time in the depôt for hiring purposes? They do not.

173. Having left the depôt they are lost to your sight altogether? Yes.

174. With reference to agricultural labourers, have you at the present time any coming out in ships now on their way? Yes.

175. I suppose you have no idea of the number? I cannot speak statistically; I know that the far larger number of the immigrants are farm labourers.

176. Have you any documents in your office from any parties in the country expressing their desire to hire these people on their arrival? The hiring-room, since it has been established, has been the means of causing these applications to fall off. The employers of labour now send to their agents, who come to the depôt and make their selections.

177. As a matter of fact, does the Immigration Department make any inquiry prior to the arrival of an immigrant ship, as to the localities where the men are most likely to find employment? Yes, it has done so, but not of late.

178. I am speaking now with reference to the two vessels now expected. Has the Immigration Department made any inquiries with reference to the parts of the colony where these immigrants would be likely to find employment? No.

179. Have you any agents throughout the colony? None.

180. If people who have not been hired at the hiring-room wish to go up the country, I presume they receive free passes? Yes.

181. Are these passes given to certain places upon the advice of any particular person, or at the expressed wish of the immigrant himself? On the expressed wish of the immigrant himself, excepting when they are going to their friends.

182. I am speaking of that class of people who do not come here to their friends. Supposing a man comes to the colony, not knowing much of different localities in the colony or of their requirements, does the Immigration Department make any inquiries or afford any information to these people as to the parts of the colony where they may find employment? Certainly, in every case.

183. If an immigrant were to ask you to day as to the parts of the Colony where he would be most likely to find employment, have you any authentic information in your office that would enable you to form a correct judgment upon the subject? We have no applications at present in the office from employers of labour. Supposing a ship to have arrived here a few days ago, and that I had been instructed this morning to proceed on board and to despatch the immigrants to the country districts, after having disposed of those going to their friends, I would then gather the others around me, and take their names alphabetically. Those who worked at trades not fitted for country pursuits would be instructed to remain for some time and to look about for themselves. Those who were fitted for country pursuits—agricultural labourers, farming men with families, after having had explained to them the capabilities of various parts of the colony—they would then, of their own free will, determine upon the district of the colony to which they would proceed. They would then be provided with free passes and maintenance orders for a limited period, in the first place for forty-eight hours and afterwards to be left to the discretion of the officer of police, to extend the time for a certain period not mentioned to the immigrant; as from our knowledge of human nature we believe that if this were communicated to them they would take the full benefit, even where it was not needed.

184.

* NOTE (on revision):—I find on looking over old papers that the number was close on 100.

- F. B. Treatt, Esq., 184. Out of what fund are these expenses defrayed; are they charged to the Immigration Vote. They are.
185. During the time you were in England I suppose advertising was resorted to very extensively? Yes.
186. In all the papers of the United Kingdom? No; that could not be done, as there are about 1,400 papers in the United Kingdom—in the papers published in the different country towns.
187. Were those advertisements inserted daily? According to the discretion of the Agent General.
188. Could you give the Committee an idea of the sum annually expended upon advertisements during the time you were in the office? I could not say now.
189. Have you any idea of the state of trade in and around Sydney so far as skilled artisans are concerned, either of your own personal knowledge or officially? Officially, no; of my own personal knowledge I should say things are depressed at present.
190. Do you think the supply of labour in the building trade is equal to or greater than the demand? That is a difficult question to answer.
191. You think trade is depressed in that particular line? I do.
192. Do you think it is depressed in the iron trade? I do.
193. What per centage of workmen, either in the iron or building trade, are unemployed? I cannot speak as to the per centage; I do not think it is large.
194. Have you anything to do with the issue of free passes to immigrants who cannot find employment in Sydney? I have nothing whatever to do with the Free Pass Board.
195. Have you brought out many railway navvies? We may have brought out a dozen of thorough English navvies within the last two years, not more.
196. Have you during the last two years heard of men going as railway navvies into the country who have not been able to obtain employment? I have.
197. Have you heard of its occurring to a great extent? Not to any great extent.
198. Did you see a series of articles which were published in one of the daily papers upon the subject by a writer under the *nom de plume* of "The Vagabond"? Yes; in those articles the immigration system was found fault with, and it was said that men could not find employment.
199. Can you remember whether at that time these statements were true or false? I think it is not to be expected that men should invariably obtain employment immediately upon their arrival in a new country; I did not myself when I first came out here in 1870; you can no more expect it than you can expect a tree to send forth its roots into the ground immediately it is transplanted.
200. You spoke, in answer to a question from the Chairman, of some farm labourers who, upon their arrival find difficulty in obtaining employment? Occasionally farm labourers with large families have difficulty in settling down.
201. How long do you think it takes a farm labourer with a large family to settle down? When a man has a large family it is a greater undertaking for him than for a young married couple without encumbrances.
202. Have you known many of these married men to be sent into the country with free passes to places they knew nothing of before? Yes, married couples and their families by every ship.
203. Have such persons returned to Sydney? Yes, but not farm labourers.
204. In a state of destitution? No, not in a state of destitution.
205. Do farm labourers land here with much money in their pockets as a rule? Farm labourers—no.
206. Generally with only a few shillings, I suppose? I cannot say what they possess, as there is often a great deal of reticence on their part, and a desire to conceal what they possess; but I have heard in some cases of as much as £200 being in the possession of an immigrant.
207. Of a farm labourer? No, of a small tenant farmer.
208. I am speaking of farm labourers;—does not a farm labourer receive wages sometimes as low as 12s. or 15s. a week? They used to do so.
209. Even now they do not receive more than £1? No, not more.
210. I suppose very few of these men land here with a couple of hundred pounds in their pockets? No, I should say none.
211. Do they land even with £20 or £10? I should think so, but I am not acquainted with the sums of money they bring. I should say from the general ideas I have formed during the last three years that a large number of them have been frugal and thrifty at home and have saved money.
212. As a matter of fact are there not a great many of this class as well as of artizans who land here with not more than 10s., 15s., or 20s. in their pockets? Yes.
213. Would not the natural result in the case of men like this be, that if they went into the country and were unable to obtain employment they must return to Sydney in a state of destitution? Yes, provided they could return, I suppose it must be so.
214. What would become of such men; would they be out of the cognizance of the Immigration Department? I have never known farm labourers to return to Sydney, unless they have been men who have had some means by them.
215. I am asking whether supposing such a person to come back, he would not be beyond the control or cognizance of the Immigration Department? He would.
216. And would mix with the ranks of the unemployed in Sydney? He would if he returned.
217. You said something about a certain demand for coal-miners, which has been I presume within the last two years? Two and a half years.
218. Have you had any demand for coal-miners lately? Not lately.
219. Are you aware that there has been any distress in the coal-mining community? From hearsay.
220. From the public prints? From the public prints.
221. *Mr. Charles.*] In the case of persons who have gone into the country and who have been unable to obtain employment and who are destitute, do you recommend that free passes should be given them to enable them to return? No second free passes are given.
222. Then it is hardly likely that a farm laborer in the country, with a family, could find his way back to Sydney? It is hardly likely.
223. You have stated that you think Londoners are an unsuitable class to bring out? Yes.
224. That I suppose refers to males? To males only.
225. Are not female immigrants from London likely to make as good servants as those from the country? Yes, for Sydney purposes.

226. And the London office receives London female immigrants on the same terms as those from the F. B. Treant, country? Quite so; my reference just now was to male applicants.
227. *Mr. Barbour.*] Do you think the country agents in England are of any advantage to the Agent General in the way of selecting good emigrants? There are no country agents at present I believe.
228. When they existed do you think they were of any benefit? Some of them were good, but I think there is always a temptation when 10s. a head is offered, to pass over little faults. I should be disposed to keep a sharp look-out over these agents.
229. Would you suggest any arrangement by which these men might be more useful in selecting immigrants for the colony? With respect to any suggestions might I respectfully ask that I may be permitted to incorporate them in any remarks that may be made by the head of my department upon a future day?
230. Do you think these agents are any benefit that they should be continued, or is there any way by which they could be made more useful in the selection of immigrants? I do not think on the whole they are of any further use. I think times have changed, that a wave of depression has passed over England in common with other countries, and that there is a greater disposition towards emigration than there was, and that therefore the assistance of these gentlemen would not be required now, especially in view of the lower rates we now charge immigrants for their passages.
231. Would not a man on the spot where those people reside be better able to select suitable emigrants than the officials in London? The selection is not left in the hands of these local agents.
232. They receive applications and, I suppose, recommend to the head office? The local agents simply receive applications.
233. He is merely the medium of receiving and forwarding—a mere conduit-pipe? Yes.
234. What I want to arrive at is this: whether the agents in the country, who would personally know the greater number of applicants, would not be able to point out the men most suitable for the approval of the Agent General? I do not like agents; I am always suspicious of them because of the 10s. a head.
235. Suppose the 10s. a head did not exist, and a better system were adopted, would they not then be an advantage? I do not see that any other arrangement could be made with sub-agents.
236. Would it not be an advantage to your office if you received periodical reports from various districts of the colony as to their particular wants, the special class of labour required;—would not this be a benefit to the districts themselves, and to your department, as enabling you to supply immigrants with information as to the parts of the colony where their services were required? Yes.
237. Would that be a good or bad plan? It would be a good plan. We have something of that sort at present; but with reference to the last two vessels, we did not get replies from the Clerks of Petty Sessions.
238. How do you get this information. Do you write to the various Benches, or are they instructed to send to the office? A circular is sent to the Clerks of Petty Sessions, inquiring as to the state of the labour market in their respective districts. On receiving this circular they have been in the habit of calling the magistrates together for the purpose of consultation, and the result of the meeting is communicated to us by circular.
239. Have these letters been written by you when you have had a number of immigrants on hand that you have not known what to do with? No, it has been done at intervals.
240. Do you not think it is advisable that it should be done continuously? Not continuously, because that would involve a large amount of work without any result in many instances.
241. What work would it cause? The sending of circulars to all the Benches of Magistrates, from many of which we should never receive any returns, or where, from previous experience, we know we should be unable to satisfy the demand for immigrants; for instance, the clerk of Petty Sessions at Inverell after taking the trouble to collect the information and transmitting it to Sydney has never had any immigrants sent to Inverell.
242. Would it not be better if instead of the vague information you receive from the country districts when a vessel came in with a number of immigrants, the parties were to write definitely, "We can take twenty or thirty of such or such a class in this district"? We know from our repeated communications with the Clerks of Petty Sessions what is the demand for farm labourers, domestic servants, shepherds, and other kinds of labour in the various districts.
243. You know only in a general way? Yes.
244. Would it not be better that you should know in a special way that there were five, ten, or twenty persons required in a particular district; would not immigrants going to places under these circumstances be more certain of employment? Yes; but we have sometimes had special applications for immigrants before the arrival of a ship. The vessel has not arrived at the time expected, and the result has been that the employer has not waited, but has supplied his requirements through other channels.
245. Would it not be beneficial if you had returns as often as possible of the requirements of different districts through the country? It might be a benefit.
246. Would it not be? It could do no harm.
247. Would you not have a greater certainty in saying to an immigrant "You can go to so and so," rather than leaving them in ignorance of the grounds upon which they made their choice, to go to any part of the country they pleased? I think it would be better to send the people in drafts according to the sizes of various agricultural areas and according to their wants.
248. These wants could only be ascertained by information supplied to you from time to time? We know precisely where the agricultural people are needed.
249. You would know better if there were special applications for them? If we had special applications exactly timed to the arrival of a ship we would let the men know at once.
250. Is advice sent to England from time to time as to the class of persons in greatest demand? I cannot answer that question.
251. Do you think it would be any advantage to the colony if you were able to offer to agricultural labourers, either with or without families, farms say of fifty or a hundred acres if they chose to go and settle upon them in different localities? This question opens up a large subject which I could hardly answer, except at considerable length and after serious consideration.
252. Answer it in a simple way: Here are half a dozen farm labourers with large families; you have a difficulty in knowing where to send them. Supposing you could say, "Here are farms of 50 acres each if you choose to settle upon them," would they be likely to accept them? No, for they would have no money upon which to live until they could obtain a return.

F. B. Treant,
Esq.
15 April, 1880.

- F. B. Treatt, Esq.
16 April, 1880.
253. You say some of these men have £200? I was then speaking of tenant farmers.
254. Supposing such an offer were made to a tenant farmer, do you think he would be likely to accept it? I should say yes, speaking from what I have observed.
255. If such an offer were made in the old country, do you think it would be a means of inducing an useful class of people to come out here as colonists? I do.
256. Do you think it would be largely taken advantage of now that you say there is a disposition in the old country to emigrate? The United States, British Columbia, and, more or less, the various Australian colonies are all competing for the class of tenant farmers from the old country, and I think we ought to put out special energies in that direction.
257. Do you think it would be beneficial both to the English people and to this colony to adopt such a plan? I consider the Colonial interests.
258. You think if such an inducement were held out it would be largely taken advantage of? Farming prospects may improve at home, although exceedingly depressed at present; other States may be offering larger inducements. It would depend upon the energy put forth, as to the value of the outcome.
259. All success depends upon the energy put forth. Do you think if this were put forth with energy by this colony, it would be largely taken advantage of? I do.
260. *Mr. Moses.*] How long have you held your present position? Since May or June, 1877.
261. Has the supply of immigrants for the last twelve months been larger or smaller than in the year previous? Smaller.
262. Do you find any more difficulty in obtaining employment for immigrants now than you did in the beginning of your career? Not among the farm-labouring classes.
263. Among what classes do you find greater difficulty in obtaining employment? The tradesmen and skilled artisans leave our control almost immediately after their arrival.
264. You do not find any difficulty in getting them out of the barracks? They do not go into the barracks. The married and single men remain on board ship.
265. Do not the tradesmen come on shore to the hiring-room? Yes, and they return each day to the ship at 1 o'clock.
266. The only barracks you have is the hiring-room? Yes; for married people and single men.
267. They do not hang about depending upon the Government—they get away from the ship within seven days of her arrival? Yes; but by every ship there are a certain number of men who lack self-reliance and who hold on to the ship up to the last moment, and who, if the ship remained here six months would like to stop on board until the last.
268. You have no difficulty in disposing of female immigrants? Not the slightest.
269. Could we absorb a larger quantity with great advantage? Far larger.
270. Persons who nominate their friends are increasing in number? Yes.
271. What class of persons do they generally send for? Mostly farmers and farm labourers, and domestic servants.
272. I suppose that would be a proof that the requirements of the colony are in that direction? Yes.
273. People generally would not send for their friends unless they were likely to obtain occupation when they came? No.
274. Who approves or rejects the applications in the old country? When I was in England it was done by the despatching officer, the emigration agent.
275. Had he any Colonial experience? None.
276. Do you think a person from the colony and who knew the requirements of the colony would be better suited to a position of that kind? Yes.
277. What knowledge of the requirements of the country can a man have who has never been here? He works under certain regulations, but he has no personal knowledge of the colony.
278. *Mr. Cameron.*] Does this emigration agent receive any fees? No, he has a fixed salary. He is an officer in the Agent General's office.
279. Do you remember what salary he receives? It was £300, but it was increased to £350.
280. *Mr. Moses.*] Do you think a person with Colonial experience could be induced to go to London to take the position at that salary? I do not think so, for my own opinion is, the emigration question is such a large one, that it requires for such an office a man possessed of great powers of observation, and of scientific method. I think none of the Australian Colonies have gone into this matter with sufficient thought, energy, and thoroughness.
281. In order to obtain suitable people as colonists should there not be a person appointed who was acquainted with the requirements of the colony to select those who applied for passages? Decidedly.
282. Would it not be better to pay a higher salary to a person so acquainted than to pay a lower salary to one who had no practical knowledge of the colony? Yes.
283. *Chairman.*] How many of the officers who were employed in the office of the Agent General had been in this colony? None.
284. Do you remember how many officers were employed in the office and in connection with emigration? The emigration agent, myself, and when I first entered the office, another clerk. The regulations of 1876 caused an increase in the staff, and three others were taken on.
285. Were they chiefly in connection with emigration? Yes; they had to attend to the ordinary duties of the Emigration Department.
286. What duties had the despatching officer to perform besides those of despatching officer? He at that time examined such applications as came from country and metropolitan districts; and when a certain number of emigrants had been approved, enough to fill a ship, a vessel was chartered and embarkation orders were issued.
287. Upon whom rested the decision as to who should be approved? In any case in which he had any doubt the Emigration Officer would refer to the Agent General.
288. He in the first instance would approve or disapprove? In the first instance he would approve or disapprove.
289. Had he ever been in any of the Australian Colonies? No.
290. Had he ever been out of England? Yes, he had been on board one of Her Majesty's ships of war.
291. In answer to a question of Mr. Barbour you spoke about the desirability of increasing the settlement of farmers in this colony;—do you think that persons having capital at their command would be likely to enter

- enter upon farming in the first instance without previous knowledge of the soil, climate, or markets of the colony? Not persons of small capital—in fact such persons ought not to do so.
292. Do you think persons of large capital would embark in these pursuits without some experience? They would come out and look around them for a time and live economically, as they do in the States of America and in British Columbia.
293. *Mr. Cameron.*] Are the emigrants medically examined before they leave the mother-country? Yes.
294. Since the abolition of these agents what means are employed to get emigrants? I cannot speak from personal knowledge.
295. Do you know officially? No; I believe the applications come direct from the emigrants to the Emigration Office in London.
296. Have you any applications from employers in the building trade at your office for men? Not of late.
297. During the last six or twelve months? We have had some occasionally, not many.
298. You have said that you know now, without consulting the Clerks of Petty Sessions, to what parts of the Colony it is desirable to send these people? Yes.
299. To what locality would you send, say a batch of fifty farm labourers now? Not to any one place.
300. Where would be the more likely places to send them? They would be distributed, and would have their own choice in the matter; but if they were not employed through any of the employers' agents, such as the agents in Sussex-street (for single men might hire outside and be forwarded at the expense of the employers), married couples with grown-up families, of whom some of the children could be employed in milking and other agricultural work, would be sent to the Bega District, some to Orange, Port Macquarie, Grafton, and other places.
301. With respect to tenant farmers, men who come out here with two, three, or four hundred pounds in their pockets, do you think the mere inducement of a free passage would tempt persons of that class to break up their homes and to go to a new and unknown country? No, I should say if a man is doing well at home let him stop there.
302. If a man had four or five hundred pounds were not doing well and wished to go to another country do you think a free passage would induce him to go to a country at so great a distance, or the inducements held out when he got there? If we held out inducements as great as those which lead people now to British Columbia or the United States.
303. Do you think a free passage alone would bring a man to this colony? Not alone to any considerable extent.
304. With respect to the nominations by persons here you say they are on the increase? Yes,—greatly.
305. You say you hold that to be a proof that the country can absorb them and requires the new comers? Yes.
306. Is it not the fact that in many of these cases people here send for their friends from motives of affection, and afterwards employ these new comers where strangers had been employed before? I cannot say.
307. It is quite possible? It is possible, but not probable.
308. *Chairman.*] I think you said you had some observations to make on the subject of colonization generally. You can either make them now or put them into writing and forward them to the Committee? May I respectfully request that any remarks I may have to make may be incorporated in any report that may be made to the Committee by the head of my department, the Agent for Immigration.

F. B. Treatt,
Esq.
16 April, 1880.

Mr. William Roylance examined:—

309. *Chairman.*] I believe you are Secretary to the Trade and Labour Council? I am.
310. What is your occupation? Stonemason.
311. How long have you been in the colony? Between four and five years.
312. I believe the Trade and Labour Council have taken a lively interest in the question of immigration? Yes, we have taken a lively interest in the question so far as it affects the employment of the masses.
313. Could you, on behalf of the Council, furnish the Committee with a statement of the rates of wages prevailing for the different trades and callings in and about Sydney, and as to the demand for men in these several walks of life? I can prepare one and furnish it to the Committee.
314. Can you say of your own knowledge whether any of the assisted immigrants who have been brought out have remained in and about Sydney, and swelled the ranks of the unemployed? Yes, I meet them in the streets frequently. I have known them to leave town and go into the country without obtaining employment. I saw a couple lately who came out in the Wagga Wagga seeking employment, and who had returned unsuccessful. They were big strong fellows who seemed fully equal to a day's work.
315. Of what calling were they? Farm labourers. I believe they were willing to take any work that offered.
316. Are you sure they were farm labourers? Yes, they had been brought up to that at home.
317. How long ago is that? Three weeks or a month since.
318. Have you met with any others in Sydney who have come out as assisted immigrants, and who are now unemployed? I have had them pointed out to me as having come out as assisted immigrants, but I have not cross-examined them.
319. How many of that class have you met? I could not say. I have met them in groups of two or three, and so on in Sydney.
320. Have you met with any at Newcastle? No, I do not know that I have seen them there. I have known them to come there seeking employment as miners and to fail.
321. Were they assisted immigrants? Yes.
322. Are you sure they were not from some of the other colonies? No, you can generally tell the difference from their appearance, their clothing, and general bearing. They generally have a seafaring air about them. You can generally pick them out at once.
323. Have you known many of the assisted class who have been brought out as farm labourers, who were in reality coal-miners? No, I could not speak definitely upon that point, but as to the working of the system generally I know it is done.

Mr.
W. Roylance.
16 April, 1880.

- Mr. W. Boylance.
16 April, 1880.
324. Do you think there are many skilled tradesmen in and about Sydney who are unable to obtain employment? Any amount—their name is legion.
325. In what trades particularly? In all classes of building and iron trades.
326. You think the supply of people in these different trades far exceeds the demand? Far. With respect to myself I may say that I was out of employment nine weeks, although I am well-known in town, and could always obtain work until lately. I did not know where to look for work, as there was none going on.
327. *Mr. Cameron.*] If it has been stated to this Committee that in the vicinity of Sydney gentlemen in the building trades had been unable to obtain labour would you credit that? Decidedly not.
328. Could you, if an application were made to you, supply such a person with men? Yes, of any class at the current rate of wages. In fact I may say with reference to wages that although masons wages have been 11s. a day, Mr. Elphinstone, the contractor for the light-house at South Head, has been paying his men but 10s.
329. Have any cases come under your observation where newly-landed immigrants have been employed at a reduced rate of wages, causing the expulsion of hands who had been previously employed? As a rule, I do not like interfering with these people, but I have been told that those who have come out have been employed at lower rates than older residents.
330. Do you obtain that knowledge officially? Not officially, because my work has been such that I could not go into these matters personally.
331. Have you heard that that has been the case in Government departments or on railways? No, not in Government departments.
332. How many stonemasons are there in and about Sydney? Between four and five hundred.
333. Could you give the Committee a rough percentage of the number that would be out of work at the present time? I should say 300 in and about Sydney.
334. Carpenters and joiners;—what condition are they in? A similar condition.
335. Have they lately suffered any reduction of wages? Among carpenters there is generally what we may call a sliding scale of rates, and I believe they have suffered all round. That they are working for less than they would if trade were in its normal state.
336. Does that remark apply to the whole of the building trades? I believe it does, with the exception of bricklayers. They say they have not suffered any reduction.
337. Are bricklayers at the present time pretty busy? No.
338. Are many of them out of employment? A good few, but not so many as carpenters and stonemasons.
339. Can you tell the Committee the average daily wages of bricklayers? The average is about 9s. 6d. a day.
340. *Mr. Moses.*] Do they get only 9s. 6d. a day? There are some getting 11s.
341. Some of them, you say, get as high as 11s. a day? Yes.
342. Their wages vary from 9s. 6d. to 11s.? They go below 9s. 6d., I spoke of the average. I would explain that a great number of boys are employed in the bricklaying trade, and when a lad arrives at the age of seventeen or eighteen he, if he is a strong smart lad, can often lay as many bricks in a day in straightforward work as a man.
343. Speed is a great element in this trade? Yes.
344. What you wish to convey is that a young man of from 17 to 20 years of age can do as much work as an adult? Yes, but he has not the experience, and would not be trusted with a job that would be confided to a more experienced hand, and there is therefore a sliding scale of wages.
345. These men are unable to work in wet weather? Neither bricklayers nor stonemasons can work in wet weather in this country.
346. That would take from their average earnings? Yes.
347. Masons in the mother country do not lose so much time? No, because the shed system is adopted there—working under sheds. We have endeavoured to introduce it here, but it has met with much opposition owing to the apathy of employers.
348. Do you know anything of the condition of the iron trade? Yes, it is very bad.
349. Is it as bad now as, or worse than, it has been at any time during your experience? It is worse, and those who have been in the country a number of years say it is worse than it has been at any time during the last ten years.
350. You are aware that the Government have let a number of locomotives to two firms here? Yes.
351. Are the contractors not yet ready to take the men on for this work? Yes, but it has not yet made the perceptible difference in the employment that was expected.
352. Is not that attributable to the fact that the manufacturers have not the templates and other patterns of the work ready for active operation? No, I do not think it is so much that. I was told it would be months and months before they would get into going order, but they did not attribute it to want of patterns.
353. What did they attribute it to? I did not hear, but it was stated that so many men would not be employed as was at first expected.
354. Statements have been made in the public prints that skilled artisans were so depressed that they were working under the Corporation as pick and shovel men;—have you had an opportunity of knowing whether that is true? I have heard it officially stated that it was a fact, such as engine-fitters. Some of the delegates who have gone round to inquire into the state of trade have reported that good skilled men have offered themselves for any work, such as dressing, or anything to keep the pot boiling.
355. *Mr. Charles.*] You have stated that a great number of tradesmen are now out of employment;—are the wages here uniform with those of other countries, or are they higher here than in England? They are nominally higher here, but as I stated, in answer to Mr. Cameron's question, in reference to my own trade, that although wages in the old country are nominally not so high the amount earned is made up by more regular employment.
356. Tradesmen, I think, were all pretty well employed about two years ago? I think two years ago that was not the case.
357. Do you think if wages were somewhat reduced it would be an inducement for people to enter more largely upon building? No, I do not think it would.

Mr.
W. Roylance.

16 April, 1880.

358. Do you not think the high rate of wages has some effect in preventing people from building? No, I do not. It may a little, but nothing to speak of, because the higher rents make up for the higher wages. There are now a number of unoccupied houses in Sydney. Rents here are far in excess of those paid in the old country.

359. But if there were more houses rents would go down? I do not know that. I see houses now empty, yet rents do not go down. I believe there has passed a general wave of depression over the industrial world, and New South Wales, in common with other countries, has suffered from this, but I believe the suffering here has been aggravated by the immigration policy of the Government here.

360. Do you know the number of tradesmen that have been brought to this colony during the last twelve months by assisted immigration? I have known some in my own trade.

361. Have there been 300 tradesmen brought in by assisted immigration during the last twelve months? I cannot say. When I spoke of 300 tradesmen I referred to those who were unemployed in my own trade.

362. The majority of immigrants who have been brought here have been farm servants? I do not think they are the majority.

363. You think the majority that come in are tradesmen? Tradesmen and labourers, not farm labourers.

364. Would these labourers be of a class whose introduction would be likely to affect the employment of tradesmen? It would affect the particular class to which they belonged. If they were labourers they would affect the labouring class, and if tradesmen, the class of tradesmen.

365. I am speaking of tradesmen. You say there are about 300 idle in and about Sydney? About 300 masons.

366. The introduction of farm labourers or labourers of any class could not affect their employment? No.

367. You seem to say that the introduction of these assisted immigrants has affected the employment and wages of these men? No, I spoke generally when I spoke of the introduction of immigrants as affecting trade. I spoke of the whole trade of the colony, of farm, building, and iron. All classes complained.

368. Do you know of your own knowledge that there is a superabundance of farm labour throughout the colony? Yes, I know plenty of farm labourers about the city who take to pick and shovel work, or do any labouring work about a building.

369. Do you think the city is a place suitable for farm labourers? Certainly not.

370. Do you think if these men were to go into the country they could not get employment? I am sure they could not.

371. Is there any particular district of the colony where you are sure they could not get employment? From official reports of persons who write to me I know it is so, and these reports come to me from all quarters. I had a letter yesterday from Wilcannia in which my correspondent informed me that station hands were reduced from 20s. to 15s., and from 25s. to 20s. a week, and I have the same information from Armidale, from Bulli, and from other places. Men are wandering about the country with their swags unable to obtain employment.

372. Are you not aware that for years past there have been a number of idlers travelling about the country with their swags—men who have no desire to obtain employment? I know there are idlers in all countries; that class of men is not peculiar to New South Wales; but I know some of these men personally, and they are able and willing to do a day's work if they can get it.

373. Have you seen in local papers advertisements stating that employment could be obtained in the country districts? I have seen such but not many; at the same time I do not think there was any necessity for them.

374. You seem to know better than the employers themselves what their wants were? It is not a question of knowing better what they want.

375. If a farmer wants servants and advertises for them, how can you say there is no necessity for advertising? From my experience in Sydney; I know persons to advertise for hands when at the same time hundreds are going about looking for employment. There are certain trades in Sydney in which employers are constantly advertising for hands when they have no need for or intention of taking on any.

376. *Mr. Barbour.*] As Secretary for the Trade and Labour Council, can you state whether they, as a body, object to all classes of immigration? No, we do not object to immigration at all, if it is necessary—that is, the majority; but we desire that only those shall be brought out who are required by the colony. At the same time we consider that there is a superabundance of all hands at the present time.

377. And for a time you think immigration should be suspended? Decidedly.

378. Would that remark apply to female servants—domestic servants? That is a class I could not speak about.

379. As a body, have the Trade and Labour Council any complaints to make with reference to female immigration? Our information is not explicit enough upon that head.

380. You say if proper regulations were adopted. Do you mean if agents in England, acquainted with the wants of the colony, were appointed to select immigrants that would be a step in the right direction? Yes; if there were proper men appointed who really knew the wants of the colony. I had a letter lately from Mr. Joseph Arch, of the Agricultural Labourers' Union in England, in which it was stated that lecturers went about who were not farming men and who knew very little about farming, and that when these men went into agricultural districts the people paid very little attention to them, because they could not give them the information they required with reference to farming in New South Wales.

381. Then the Trade and Labour Council do not object to immigrants of the farming class? We do not object to them if they are necessary; but at present we do not think they are necessary. We believe there are more here than the country can employ.

382. If facilities were given for additional settlement here, do you think that would be an advantage? Yes; I think that would be a great blessing and a boon to the unemployed.

383. Is it your opinion that the country is large enough to absorb any number of immigrants of a proper class if proper arrangements were made? Yes, for distributing them, and giving the men a start when they got here.

384. Do you think if a system were adopted of giving them a chance of settling upon small farms that would be an inducement to persons of the proper class to come out, and would be a benefit to the colony? I think if a proper system were adopted for placing farm labourers upon the land and maintaining them for the first twelve months, hundreds would be induced to come out.

385. You would give them an opportunity of settling upon the land, instead of entering into the general labour market? Yes.

Mr.
W. Roylance.
16 April, 1880.

386. I suppose, from your own experience, you are aware that immigrants who come out here as farm labourers are induced by the temptations of town-life to remain in Sydney in the first instance, and to seek for employment under the Corporation, rather than to go into the interior to seek occupation in their own avocation? Yes; many would be induced first to seek occupation in town.

387. Is not that the reason you sometimes find farm labourers using the pick and shovel in Sydney? That is one reason, but I have known men who have gone up the country in search of employment as farm labourers, who being unsuccessful have returned to seek work in Sydney.

388. If these persons had an opportunity of settling upon land in the country there would be less inducement to them to remain in Sydney? Yes, the prospect would be much more encouraging.

389. Would it not be an advantage if the Immigration Department received information from the Government officials in the interior as to want of labour in particular districts? Yes, if the information were authentic, and from sources that could be relied upon.

390. If upon the arrival of an immigrant ship the department received information from certain districts, "We can take so many," would there not be less probability of these people returning to Sydney? Yes, provided when they got there work was obtainable.

391. You think some system should be adopted by the department before sending immigrants to a district to ascertain whether they were required there? Yes.

392. I suppose the Trade and Labour Council are not always inclined to grumble at a fall in wages if it becomes necessary by depression in trade? We do not grumble at that. We take it as a matter we cannot alter.

393. Do you not think that concession in wages sometimes induces additional employment? No, we do not think it causes additional employment, but that dire necessity may compel it.

394. Are not concessions made with the view of getting additional employment? Yes, because the men must get some wages upon which to live.

395. When trade becomes brisk again and there is an increased demand for labour of course you look for better wages? Wages come up again as a matter of course; but it is a great mistake to suppose that wages rise and fall just as the price of wool or flour according to the state of the market. Demand and supply does not affect the rate of wages as it does commercial commodities. I think the system the Government adopts in the matter of immigration, of running a ship into Sydney harbour, landing immigrants on the Circular Quay, and leaving them to take their chance either in the country or in town is a most objectionable system. The only provision made for them is that they are given a railway pass to some strange place in the country where they have never been before, and where they have no friend to advise them. I think a Labour Bureau should be formed, and some attention should be paid to these people after they are landed. I know the case of one tradesman who after walking about the town trying to obtain employment at his trade was obliged to take a situation as boots at an hotel.

396. You think some arrangements should be made for supplying the Immigration Department in Sydney with information as to the wants of the interior? I would take it out of the hands of the Immigration Department. I would have a Bureau, whose duty it should be to look after these men who come here.

397. *Mr. Moses.*] I suppose you are aware that Government does make some provision for these people by giving them free passes to enable them to go into the country? Yes.

398. Also that a number of them are sent for by their friends, who are in a position to receive them and to advise them upon their arrival? Yes.

399. Are you aware that the number of depositors who are sending for their friends are increasing very rapidly? I have heard the number has increased.

400. Do you think they would do that if they were aware that the country did not require farm labourers? I do not think that is a criterion, as many of these persons are sent for by their friends or relatives from motives of affection.

401. What parts of the country are you acquainted with? I have said before that I have lived in Sydney and Newcastle.

402. You are scarcely in a position to give an opinion of the requirements of the interior if you have not been out of Sydney or Newcastle? It is not necessary to go to Wagga to know what is wanted there. I have read Government hand-books and reports, and made myself acquainted with the subject in a variety of ways, and we must depend for most of our knowledge upon the information derived from others. I have never been in the United States, and yet I have made myself acquainted with the circumstances of that country through the medium of books and other sources of information.

403. From your personal knowledge you do not know much of the wants of the interior? Perhaps not. I have been to Bathurst and to other places.

404. How are bricklayers engaged; by the day or by rod? By the day.

405. I suppose you are aware that a bricklayer can earn much more than 11s. a day if he takes work by the rod. How much can a first-class workman earn a day taking work by the rod? The prices are not fixed by the Trade and Labour Council; it is a gross error to suppose that they fix or interfere with wages at all.

406. *Mr. Cameron.*] They only collect information and exercise their influence in favour of the men? Yes, and prevent strikes by a system of conciliation.

407. *Mr. Moses.*] You have a current rate of wages I suppose? Yes, we have a current rate of wages; for instance, the current rate of wages for masons is 11s. a day, but we know that a number of men are working for less.

408. For bricklayers? The wages are 11s.

409. At per rod? We do not recognise that system; the contractor takes it at per rod.

410. What are the wages of bricklayers' labourers? 1s. an hour.

411. How many hours do they work in the day? Eight hours.

412. Is that a full eight hours? Yes.

413. From the time of commencing to the time of leaving off? Yes, the meal hours intervening. They work eight hours and are paid for eight hours.

414. Do the men in the iron trade work eight hours? Yes, in most of the branches.

415. Do any work less? No.

416. For instance if the men are employed outside the manufactory? Do you mean jobbing?

417. Yes. Is the time deducted from their leaving the factory until they get their time ticket? The man generally goes to the works and books his time, and then goes to his job.

418. Is the time occupied in going to the job and returning to get his ticket included in the work? Not generally. On the first morning it may be charged but afterwards he charges his usual time. Mr.
W. Roylance.
419. You say there are 400 or 500 masons in and about Sydney and its suburbs? I speak approximately.
420. Of that number about 300 are out of employ? Of course it must be borne in mind that this is a constantly migratory class. 16 April, 1880.
421. That would leave about 200 who are employed? Yes.
422. How do you account for the depression in trade? I account for it partly through over speculation, and partly through the state of the political atmosphere at home and on the Continent.
423. In the iron trade? I attribute all to the same causes.
424. Do you not think that the importation of a large quantity of engines has somewhat caused the dullness in this department of trade? It has intensified it.
425. What are the working hours in your trade in the old country? 48½ hours in some towns, 50 in others, and 54 in others per week.
426. What are the working hours here? 48 hours.
427. Does the same apply to the iron trades? 54 hours at home, 48 hours here.
428. Do you not think if the men here were to come down in the rate of wages, or to increase the number of hours, it would prevent the bringing out of such a quantity of machinery as is now imported? I think it would make matters worse. Suppose eight men were to work nine hours a day instead of eight, it would enable the employer to do without the ninth man.
429. Should we not be in a better position to compete with outside manufacturers? That is a matter of speculation, but the other is a matter of certainty.
430. Do you think there is any chance of improving the present position by still holding out for the rate of wages and for shorter hours? I hardly understand the question.
431. You say that in England the men employed in the iron trade work 54 hours a week at a lower rate of wages than is paid here—do you not think if wages were reduced a little here, and the men worked a greater number of hours employers would be in a better position to compete for the trade which is now sent away? I do not think it would make any perceptible difference.
432. Do you not think it would be better for the men to have full employment at a lower rate of wages than only partial employment at a higher? It is a mere speculation whether they would obtain fuller employment; I have heard this argument in England, where it has been tested, but it has always fallen through; a capitalist would not invest his money in building, for instance, unless he had a prospect of return? He could build at a low rate now—he never had a better opportunity.
433. You say that at the lighthouse the wages of the men have been reduced from 11s. to 10s.? Yes, that is an all round reduction, and I have heard that there has been a reduction made in the wages of the men at Mort's dock; men, as a rule, do not like to say that they are working at lower wages than the ordinary rates, and we do not hear about it.
434. What is your recognized rate? 11s. a day.
435. *Chairman.*] You have stated that there has been a wave of depression over the whole world? Yes.
436. Do you think New South Wales has suffered more from that depression than any other country? I do not think it has, excepting so far as it has been affected by local circumstances; I think the immigration system has aggravated the evil very largely.
437. Have you seen any signs of reaction during the last three or four months? Not a permanent one.
438. Have you seen evidences of greater activity in the building trades? In the building trades there may be signs of a little activity.
439. Do you know that in consequence of the restoration of confidence capital is more abundant than it used to be? The money market is not so tight.
440. Are you aware that the banking and building companies have reduced the rate of interest for deposits? I am not aware.
441. Are you aware that the deposits in the Post Office Savings' Banks and other Institutions of the same spirit indicate the possession of a large amount of money among the industrial classes? Not more than usual.
442. Has your attention been drawn to the fact that as far as returns afford a criterion we have a greater amount of deposits per head for what may be called the industrial classes, than they have in most other parts of the world? You mean comparatively; no.
443. With regard to the reduction in wages, do you find that the cost of living has been at all affected by these changes? I think not—I think it is about the same.
444. Do you think the cost of living is as low here as it is in England? Upon the whole I think it is about the same, taking one thing with another, except with respect to clothing. I think good clothing is much dearer here than at home. What we call slop clothing is about the same price.
445. I think you have stated that you could give a list of houses now to let;—in what locality are they to let in Sydney? I passed two down in William-street, on the east I think.
446. Houses for the working classes? I do not know whether they are called houses for the working-classes—working men often live in houses of six rooms, and let out a portion of them to others. Further up the street I found two or three others.
447. Are you aware that visitors from the other colonies, particularly from Melbourne, have remarked how very few houses there are to let in and about Sydney? No.
448. Have you been in Melbourne at all? No; in reference to house property I had a letter from an official in the Council at Newcastle, stating that there were a large number of houses to be let there.
449. That does not apply to Sydney and its suburbs? No.
450. Are you aware that there is an immense amount of suburban property owned by mechanics wholly or in part, through various building societies? Yes.
451. Are you aware that that class of property is rapidly extending? Yes.
452. *Mr. Cameron.*] Are you aware of the manner in which railway contracts are carried out in the Colony? Yes; I have not been employed upon a railway, but I have received complaints.
453. What has been the nature of those complaints? What has been complained of most bitterly is the system of advertising for hands in the city papers where they have not been required; and the men have found after travelling into the country that they have not been required. Some parties seem to have a system of keeping a standing advertisement in the city papers.
454. Can you name to this Committee any particular railway contract in connection with which there has been this standing advertisement? Yes; both north and south—Junee and Narrandera, and the section between Tamworth and Gunnedah. Persons have told me that they have seen these advertisements in the city papers; when they have gone to these places there have been no such advertisements in the local papers, and upon application at the works they have been told they were not wanted.

WEDNESDAY, 20 APRIL, 1880.

Present:—

MR. BARBOUR,
MR. CAMERON,MR. CHARLES,
MR. DAY,

MR. JACOB.

J. F. BURNS, Esq., IN THE CHAIR.

Mr. Henry J. Windon examined:—

Mr.
H. J. Windon.

20 April, 1880.

455. *Chairman.*] You are secretary to the Amalgamated Society of Engineers? Yes, to the Sydney branch of it.
456. What is your own occupation? I follow the occupation of iron turning principally.
457. Are you in business on your own account? I am working for one of the Sydney firms.
458. Have you been long in the colony? Twenty-eight years.
459. In what part have you spent most of that time? Most of the time in Sydney, very little out of it in fact.
460. Have you seen much of country districts? No, very little, having served my time in Sydney; of course I have been occupied in my business here.
461. *Mr. Cameron.*] How many members have you in the Amalgamated Society of Engineers in Sydney? About 270.
462. Are there branches in other parts of New South Wales? There is one at Newcastle, and there are branches in all the Australian colonies.
463. Are there not in fact all over the world? All over the world; there are over 400.
464. Do you, as Secretary of the Society in Sydney, correspond with the iron-workers of the mother country? Yes, monthly.
465. Could you tell the Committee how many branches of the iron trades are admitted into the Amalgamated Society of Engineers? The turners, fitters, millwrights, pattern makers, planers and borers, and blacksmiths.
466. That comprises the whole of the engineering branches? Yes.
467. You make provision, do you not, in your society's rules, for bringing workmen from one part of the world to another if periods of depression exist in particular places? Yes, we have rules to that effect.
468. If there were a demand for extra hands here you would place yourself in communication with the authorities of the iron trade in the mother country to supply that demand? Yes.
469. Can you tell the Committee what is the state of trade in the various branches of the iron trade just now? It is very bad, and has been for the last twelve months.
470. What is the average rate of wages for the various branches of your Society? So far as our Society men are concerned—into which a man is not admitted unless he is a good average workman—the average wages is 14d. an hour in Sydney; that would be rather above the average paid in Sydney.
471. Is 14d. an hour paid to turners, blacksmiths, millwrights, and all the various branches? I think it would be a little higher if you take all the branches together, and it might be a little below if you take a single branch. For instance, pattern makers, who are few in number, may some of them receive 15d. an hour; perhaps 14½d. would be a fair average to take in their case.
472. Can you give the Committee any idea of the number of iron-workers in Sydney altogether—men who are employed in the iron trade? I think I am within the mark when I say 600 engineers, boiler-makers, from 200 to 230, moulders in Sydney and its suburbs from 120 to 130, pattern makers somewhere from 70 to 100, blacksmiths I could hardly say with any degree of accuracy, but I know there are a considerable number of them.
473. Do you think that the men who are employed in these trades at any time have found fault with the introduction of men of the same trade by assisted immigration? I might almost say that they always find fault with it. For instance, take our own society; it causes a great expense to our society, from the fact that if our members come out here the Sydney branch has to support them before they get employment. They obtain a travelling card in England from their various branches, and on their arrival here these are placed in my hands, and the parties are entitled to the benefit of the society, the same as if they were in England.
474. How does that entail expense? In this wise: It places a larger number on our books while they are waiting for employment, often from three to six months. At the present time there are I think I can count six or seven men who have not done a hand's turn for months together, as far back as the time of the arrival of the "La Hogue." One of these is a man named Hartley.
475. Do you know any number of skilled mechanics who have been compelled from the depression of trade to take employment as ordinary labourers? Yes, several I can name at the present time who are at labouring work and dressing castings in foundries, and as blacksmith's helpers.
476. Statements have been made in the public press, from time to time, that skilled mechanics have been compelled, in order to get a living, to take to pick and shovel work on our railways and under the Corporation. Are you aware of any such cases? I know of two instances under the Corporation. I know too that men go into the country and seek for employment and sometimes write to me that they are compelled to take to the pick and shovel.
477. Have you had any considerable addition to your ranks for the last two years from assisted immigrants? Yes, by almost every vessel there are never less than three or four, and sometimes as many as six; three arrived by the last vessel "Norval," which in the latter case entails an expense of at least £3 a week upon the society.
478. Your society is not so much a *bond fide* trades' union as a society to provide for sickness and distress among its members? Its principal objects are to provide for members out of work, for old age and sickness. I have brought with me a few of our latest annual reports which I shall be glad to give to the members of this committee, and a copy of the rules and the last monthly report I am in receipt of, from which report it will be seen that although this society has been adversely criticised the Honorable W. E. Forster acknowledged that it had been of some advantage to England.
479. Have not the Government at the present time a number of locomotives being constructed in the colony? Yes.

Mr.
H. J. Windon.
20 April, 1880.

480. Will not that have the effect of increasing the amount of employment in the iron trades? I was in hopes it would have done, but from the statements I have received from some of the employers it will not make the difference I had expected. They say it will not increase the numbers of men employed in the various shops by more than four or six fresh men in the different departments in those shops which are confined to this job, because they had previously a sufficient number of hands.
481. If that contract were doubled do you think there are a sufficient number of hands to carry out the work? *That has reference to the engineers; it would require extra hands for boiler-making.
482. I would wish you to speak of the iron trade as a whole. Could you give the Committee any idea of the number of iron-workers at the present time out of work? I feel convinced that there are at least 200 engineers, and I suppose of boiler-makers, who number from 200 to 230, there are half; of moulders, there are a large number out of work, and of pattern-makers also; and of blacksmiths a very large number.
483. You have for some years been connected with the Trades Associations of this city? Yes.
484. Have you any knowledge of the state of trade in the building trade? From all I can learn I believe it is very dull, and has been for some time past.
485. Statements have been made here that out of about 450 or 500 masons in the police district of Sydney some 300 are out of work;—would you think that a correct statement? I should think that rather exceeded the number. I would not like to say there are not so many, but I am about the city every day going to work and to my meals, and I hardly think there can be so many. I know there are a large number, but I do not think it would amount to that.
486. *Mr. Day.*] What are the objects of your society? Principally to assist its members when they are out of work, to provide for sickness and for old age, so that when unable to compete with their fellow-men they may have a superannuation fund to fall back upon.
487. Are you bound by your rules to give assistance to all your members who are out of work? To all our members who are out of work who are entitled to it by keeping their payments up.
488. They would not be members, I suppose, unless they kept their payments up? They can go to a certain limit without ceasing to be members. A man is not entitled to receive the pecuniary benefit if he allows his unpaid contributions to exceed 10s., and some instances 14s. He would then have to go without the benefit for a month. These provisions are made to compel members to keep up their payments and maintain the fund.
489. Are you bound to afford assistance to all members whose names are on the books? Yes, if entitled to it.
490. What assistance do you give them? 10s. a week for fourteen weeks, 7s. for thirty weeks, and 6s. as long as they may be out of work even if it should be for the rest of their lives. Of course while they are in receipt of the benefit they are not expected to pay.
491. Have you any notion of how many are on the books? Within the last fortnight, through the energy of the men in employ, they have decreased a little; but I find this morning on looking at the book they have increased by five. Almost every week we have men who come from the other colonies encouraged by the idea that they will be required in the construction of a large number of locomotives.
492. How many are there on your books who are now getting assistance? Seventeen this week. At the latter part of last year and the early part of this we had twenty-five to thirty, causing an expenditure of £15 or £16 per week for donation benefit alone, as shown by my books for the week ending January 30th; besides these we had the sick and superannuated on the 30th January. We have not so many now. One cause of the decrease in the numbers is that some of those belonging to our society, who have come out as assisted immigrants, after tramping over the country in search of employment, and seeking it in vain, have returned to England. I know two or three who have gone by each trip of the Orient Line of steamers at 1s. a month. I know one who went home by the "Garonne" as a coal-trimmer.
493. Have you any way of finding out whether these men have been offered fair wages? Yes, they would be compelled to take them or to forfeit the benefits of the society if they refused.
494. How do you find out if they have been offered and have refused? Because if they applied at any shops where there were members it would be known and would be sure to come to me.
495. They do not apply to the members but to the employers. Supposing an employer were to offer fair wages and these men were to refuse how would it be known. Have you any means of finding out whether they refuse a fair rate of wages? Sometimes the employer himself will mention that he has offered a man work, and he has refused it. In such a case the man loses the benefit of the society. As an instance: Not above six months ago a man declined to work for the wages offered, and as the rate of wages offered was within the average allowed, he forfeited his donation.
496. Then you have no certainty at all that some of the members on your book who are getting assistance have not refused work at a fair rate of wages? I feel confident from the condition of the men that they would not refuse it—they would be too glad to get it. A man met me no later than this morning, and told me he had got a job to dig a drain at the lower end of Druiitt-street.
497. From your position as secretary to the Amalgamated Society of Engineers are you in a position to give us some notion of the state of the labour market with regard to immigrants when they come in? Yes, I think so.
498. What has been your experience with regard to those people getting employment when they come into this colony;—have you found that large numbers have not been able to get employment? Yes, I have always found it so.
499. Then if the Immigration Agent has said that is not the case he has not stated the truth? Undoubtedly he has not stated the truth if he has said that they get work, for I am in a position to state that they cannot get it.
500. If the Immigration Agent has stated that the whole of the shipments of immigrants who have arrived here lately have not remained above a day or forty-eight hours but have found employment, would that be incorrect? It would be undoubtedly; I have no hesitation in saying so.
501. Is it within your knowledge that those who have not found employment have communicated with the Immigration Agent? I know they have, and that he has given them a pass to the country.
502. I suppose your information would be principally with reference to engineers and those belonging to your association? Yes, principally to those, but our members are scattered about, and are in contact with others

*NOTE (on revision).—This answer is intended as a qualification of the previous one, while the answer to the last question should be simply "Yes."

Mr. H. J. Windon. others who do not belong to us. I am known to a large number of men in and about Sydney in various trades from having been here so long.

503. Did I understand you to say that if work were plentiful here you would communicate with the 400 other branches and tell them to send out men? It would be my duty to do so.

20 April, 1880.

504. You do communicate with these societies and tell them when labour is plentiful? Yes, each of the branches communicates with the head office, and each branch is supplied with these reports.

505. Do you often have occasion to communicate with the head office that labour is plentiful here? Seldom from Sydney, for we have always sufficient hands to do the work. As a sufficient proof of that I do not think any member of the committee can point to an advertisement from any of the Sydney engineering firms for an engineer, excepting perhaps, for one of a second-class on board a small steamboat, within the last two years. I may say that a little while ago, in consequence of the good harvests there, trade was pretty brisk at South Australia, and they were short of hands, and in accordance with the rules of our society the secretary of the branch there wrote to me, and we sent five away. Two of them found employment about a fortnight after, and the others a little later.

506. *Mr. Jacobs.*] Do the members of your society fix the minimum rate of wages? Yes.

507. Periodically, according to the state of the market? Yes.

508. Supposing members refused to receive this minimum rate, would they cease to be members? They would have to show that they were competent and able to earn a higher rate.

509. If these men went to be pick and shovel men would they take a less rate? They could take what they liked.

510. And remain members of your society? Yes.

511. As engineers they are not allowed to take less than a certain amount—as labourers they are? Yes.

512. What they get as labourers is just to keep body and soul together? Yes, that is what they take it for.

513. Just to obtain a mere maintenance? Yes, those who take to labourer's work are employed chiefly in inferior grades connected with their own trade; for instance, dressing—in moulder's shops—the castings. Of course engineers are better able to adapt themselves to work of this kind than unskilled labourers from their general knowledge of engineering.

514. Then your society keeps up the general rate of wages for engineers? For their own members; they do not interfere with any one else. But in saying that they keep up the rate of wages, I wish it to be understood that the rules are not immutable. For instance, now that trade is bad and there is an evident desire on the part of employers to reduce the rate of wages, I believe it will be found that the average is lower now than it was. Six years ago the rate was 14½d. an hour, now it is 14d.

515. *Mr. Barbour.*] Is that your average? That is the minimum.

516. There are higher rates than that paid? Yes, with reference to the rates of wages we find no fault with the Monthly Labour Summary sent away, with this exception, that a larger number is represented as receiving the higher rate than is really the fact.

517. What is the maximum rate at present paid? There is one man to my knowledge getting 17½d. an hour, but he is a brother of his employer. That amount is put down in the Labour Summary, but it is quite an exceptional case. A few get as much as 16d., 15d., 14½d., and some down to 1s. and 11d. an hour.

518. Are these men working in accordance with your rules, who are working for 11d.? The only men who are working at these rates by permission of the Society are young men who have just served their apprenticeship. They are allowed to come in as junior hands at 1s. per hour for a certain term until they have qualified themselves for the higher rate.

519. Is there plentiful work for men as labourers? I should think not.

520. It is dull for labourers as well as for tradesmen? Just so.

521. *Mr. Jacob.*] Of course you speak of Sydney? I speak of Sydney.

522. *Mr. Barbour.*] Supposing your members go into the interior have you any cognizance of what they are doing,—do you control them in any way? Yes, they are bound to correspond with me as secretary to inform me as to their whereabouts. Of course if they are out of work we must have an authentic document to that effect if they apply for assistance.

523. If they go into a district where there are no established engineering shops, and can get only occasional work, would they then be regulated by your rate of wages? No, we do not compel them to adopt any particular line of action when they get into the country, knowing that they can only obtain casual jobs.

524. Your opinion is that at the present time there are plenty of tradesmen in the colony? Yes, I believe so; indeed I am sure of it.

525. Do you think there is an opening in the colony for any description of labour at all? That is a matter of opinion. I believe the colony is large enough to receive a considerable number of people, and as we all live for each other, if the proper kind of people were to come there would be room enough for them, and be a benefit to the country.

526. Then you do not object to immigration of a proper description? No; but so many come out who, according to my ideas, are not of the proper description, but possibly my ideas might not be accepted.

527. It is your ideas we want to get? There is one point upon which I have a strong opinion, and it is this, that there are now such improved means of communication and facilities of transit that people are able to come out here if they desire to do so,—that is, people who would be likely to be a benefit to the colony. The cost is now so trifling that people could come out at their own expense, and that it is a waste of public money to expend it in bringing them here.

528. What I want to know is whether in your opinion there is any class of immigrants who would be beneficial to the colony if we continued to bring them out under a similar system to the present. You think it is not advisable to bring out tradesmen? I am fully of that opinion.

529. For example, do you think it would be advisable to bring out people of the farming class? I am afraid they lack the great thing that is needful—Colonial experience. They would find the circumstances of the colony so different from those of the country they had left that they would be of little service when they arrived. They would also require considerable assistance when they arrived here unless they had means of their own at their disposal for a time to enable them to look about.

530. Is not that a common thing with people of all classes who come here—they cannot jump at once into the position they like? I admit that.

531. With all these conditions do you think there is any class of immigrants who would be useful and beneficial to the colony if they were brought out? I incline to the opinion that the agricultural class would be the most beneficial to the country, provided there were a sufficient inducement, but I do not think the mere fact of an assisted passage being offered would be sufficient; I think it would be necessary to support them for a while after their arrival here.

Mr.
H. J. Windon.
20 April, 1880.

532. Do you think if farms were offered them on their arrival that would be an inducement? I think it would be more useful to give them to those who have come here and have helped to make the colony what it is.

533. Your experience is principally confined to Sydney? Yes.

534. Do you think the country should still bring out female servants? From all I can learn, by bringing them here we are only increasing the people somewhere else. There seems to be the same cry all over the world.

535. What is the cry? That servant girls are scarce. I know as a fact that in my own humble sphere of life it is difficult to get a female servant if I want one.

536. Do you not think the country could absorb a number more of them? I believe there is room for them, and that they could obtain employment.

537. *Mr. Jacob.*] You think we should increase the difficulty in the places whence they came? Yes, I think we should shift the difficulty merely.

538. You think there is a scarcity of female domestic labour. I think so, from what I gather from the public press.

539. *Chairman.*] I think you said you send home a regular report of the state of business in your own particular line, to your societies, which are affiliated throughout England? Yes.

540. In the face of your reports that trade is so bad here, how can you account for a number of men in your trade still coming out to this colony as assisted immigrants? I can to a certain extent by their being induced to believe that the reports are not true.

541. Although you have authenticated them? Just so. They have been told that they could not be sent out as mechanics, but if they liked to apply as farm labourers they could go, and they have so applied, and have come out as farm labourers.

542. Do you know of your own knowledge that any parties in the iron trade have come out as assisted immigrants, as farm labourers or agriculturists? There are three I know who have gone back again. They went back as coal-trimmers.

543. Do you know of your own knowledge that they were in the iron trade, and that they come out as assisted immigrants under the designation of agricultural or farm labourers? From what they told me.

544. You have only their word for it? I have only their word for it.

545. How long ago is that? Within the last eighteen months these three cases have occurred.

546. Have you known men in the iron trade who have had to come to pick and shovel work? Yes.

547. Were they persons who had come out here notwithstanding your reports of the bad state of the trade here? Yes. The first question I put to them when they arrive here is, what brought them out and if they had read my reports.

548. Are you sure that those who have had to take to pick and shovel work have been assisted immigrants? Yes, they have come out in immigrant vessels. There is one notable case which I am sure Mr. Wise would know because the person has given him a great deal of trouble. His name is Robinson, and he came out in the "Nineveh." He was assured he would find an opening upon his arrival, but he has done very little work since he came here.

549. I think you stated in answer to Mr. Barbour that work for labourers in Sydney was dull? Yes.

550. Do you state that from any knowledge of your own? Yes, from my personal knowledge.

551. You also said that the means of communication and transit between England and this colony were now so easy that a person disposed to immigrate could easily do so;—do you know the cost of immigration? From £16 to £20.

552. Is not that a large sum in the estimation of the industrial classes in England? I admit that; but I qualified what I said, and stated that persons who were able to pay for their passages would be of greater value to the colony, as they would more likely be able to provide for themselves for a time while they were getting used to the colony, and obtaining means to subsist afterwards.

553. Is it within your knowledge that most of our successful agriculturists have come out here as assisted immigrants? I am not prepared to say that. I have no definite knowledge on the subject.

554. *Mr. Cameron.*] There are a large number of labourers employed in the iron trade in Sydney? Yes.

555. Can you tell the Committee the rates of wages paid to them? From 28s. to 36s. a week blacksmiths' strikers, boiler-makers' helpers, labourers about the yards, and so on.

556. They average from 28s. to 36s. a week? From 33s. to 36s. a week for the better class of labourers.

557. Are many of them out of work? Yes, a great number.

558. *Chairman.*] Have they been long out of work? I know some who have not done any work this year, beyond a day or two occasional work for the Corporation.

559. Do you know many? Yes, personally, I know twenty.

560. *Mr. Day.*] Who have been out of work all the year? Who have not done anything all the year? I know mechanics who do not belong to our society who would gladly take any wages they could get at labouring.

561. *Mr. Cameron.*] Have you ever heard of cases where Trades Unions have paid immigrants landing here not to go to work, when they were offered good wages? No, never.

562. You are pretty well acquainted with the rules of these several Unions? Yes.

563. Do you know any Union in this city which does this sort of thing at all? No, I am not aware of any.

564. If you heard a statement made that that had been done by any Trades Unions, would you say that that statement was untrue? I would unhesitatingly say it was untrue, for this reason, that none of the Trades Unions have been in such a position as that they could keep men from work.

565. *Mr. Day.*] I suppose you have plenty of experience among immigrants who arrive in this colony? Yes, particularly those connected with our line, but I see a great deal of those outside, many of whom come in contact with me, and are introduced to me as shipmates by those belonging to our society.

566. I suppose you make it a practice to learn all you can in regard to assisted immigration? I do not make

Mr.
H. J. Windon.
20 April, 1880.

make it a special duty, but I glean casually, from the men with whom I come into contact, a good deal of information, and knowing as I do that so much money is spent, I have taken the matter into consideration.

567. Do you hear any complaints among those men with whom you have come into contact, as to their having been deceived by the Agent General with regard to the rate of wages in this colony? Not as to the rate of wages, as to the prospect of employment I have.

568. Have any of the men complained that the Agent General has misled them? Yes, they have said that the Agent General told them they would have no difficulty in obtaining employment.

569. Although when they said this they were out of employment and had been seeking it for some time? Yes.

570. Have you many complaints of that kind? Perhaps as many as a dozen or fifteen. I had one only a week back from a man who was induced to come out. He is a German, and he told me that before he came out he went and saw the Agent General, Mr. Forster, whose name he mentioned and told him that he was a locomotive engineer. Mr. Forster told him that he was just the man we wanted, that he would readily obtain work, and gave him a letter to Mr. Wise. He also gave him his credentials copied from the German into English.

571. *Chairman.*] Did he get employment? He is now employed, but not by the Government; he is a first-class workman.

572. *Mr. Day.*] From what you have heard from the immigrants who have come into communication with you, have you reason to believe that the Agent General has misled them with regard to the rate of wages or the prospect of employment? I should not like to say as to the rate of wages, but with regard to the prospect of employment I have reason to believe they have not found it exactly as they have been told.

573. Have you ever heard a report in Sydney that some of these men who are walking about without employment have said that they did not want any work because the Society is keeping them? No. I know that no member of the Society dare do it. It could not be done without my hearing of it from some one, and the parties would soon be punished, as according to the rules no member is allowed to be insolent to an employer, or to boast of his independence as a member of the Society, either to his employer or to any one else.

574. *Mr. Jacob.*] Have I drawn a correct inference from your answer to Mr. Barbour, that from your practical experience, reading, and knowledge of the labour market, it is not desirable to continue assisted immigration? Yes, that is my opinion.

575. Have you any objection to labourers coming out if they have the means of paying their passages and of providing for themselves for a short time after their arrival. Do you not think that the field is wide enough? Yes.

576. Do you not approve of assisted immigration as at present carried out? No, I do not.

577. *Chairman.*] Your objection has special reference to mechanics because you think the market is fully supplied? Yes, and to labourers generally.

578. You have no knowledge of the demand for labour in the country districts? No personal knowledge exactly, but I learn from our members who go into the country.

579. Your members are mechanics? Yes, but they are prepared to take other labour in many cases. I have an instance in my mind of a first-class mechanic who is now employed as a labourer at Messrs. Brown's City Iron Works. He went up to work as a labourer on the railway extension at Hanging Rock, and had not been at work above a fortnight when one of the contractors came up, and in a fit of anger discharged him and over fifty others. This is only three weeks back. The consequence was that these men had nothing to fall back upon.

580. These were all railway labourers? Yes, but the man to whom I refer was a mechanic who had gone up seeking work.

581. *Mr. Day.*] Have you endeavoured to obtain correct information as to whether that statement was true. Did you seek any confirmation of the statement? No.

582. It might not be true? It might not, but I have every reason to believe it is.

583. Did you make any effort yourself to find out whether it was true or not? I did not.

584. Is the man in Sydney now? Yes, his name is William Riddell, and he is working as a labourer at Brown's City Iron Works. I know he is a man who would not tell an untruth with reference to this case. He is a married man with a wife and children.

585. *Chairman.*] You think the labour market is well supplied both with mechanics and labourers? Yes, we always have an influx from the other colonies.

586. An influx both of labourers and of mechanics? Chiefly of mechanics; labourers are hardly in a position to bear the expense, unless they are single men.

587. How can you account for this migration of mechanics from other colonies if trade is so bad here. Would they be likely to come to New South Wales unless they thought there was a better prospect of obtaining employment here than in the colonies they were leaving? I have asked the men when they have brought their travelling card to me why they had come here, and they have said it was because they thought they had a better chance of getting back to England from Sydney.

588. You say there are a large number of mechanics constantly arriving from other colonies—how long has that been the case? During the last 12 or 18 months. The report that we were about to construct 100 locomotive engines brought engineers, boiler-makers, moulders, and others connected with the iron trade; and the Exhibition brought carpenters, bricklayers, and others in the building trade.

589. The cessation of work at the Exhibition must have caused some disturbance in the market both for persons in your own trade, and labourers also? Yes, it did.

590. From an answer you have given I infer that before the Exhibition building was commenced people were coming from other colonies to New South Wales? Yes, trade was declining to some extent, but it seems to have got much worse since such a large amount of machinery has been imported.*

591. Are you aware that trade has been dull all over the world? Yes.

592. Must it not have been somewhat better in New South Wales than in other colonies to account for the large number who arrive here from those colonies? I am of opinion that New South Wales has been better for trade generally.

593.

* NOTE (on revision):—This answer refers to the state of trade prior to the commencement of the Exhibition, and is in no sense an answer to the question as quoted.

593. Now, at the present time? No, I think they are all on a par just now.

594. It has been better here, you think? Yes, the majority of our manufactories are better, have had better trade, no doubt.

595. When do you think the decline in the prosperity of this Colony as compared with others took place? I am not prepared to say there has been a decline in the prosperity of the Colony to such an appreciable extent as there has been in the particular trades lately.

596. Do you think that all the demand for skilled mechanics can be supplied from the other colonies? Yes, and from the surplus labour within this Colony.

597. Do you think there will be still a tendency on the part of mechanics to come to New South Wales from other colonies? Yes, I do, because the colony has been in existence longer than the other colonies. It is generally thought there are more avenues of employment in the various departments of trade, and there is an opinion very general that men can obtain work more readily here.

598. If there had been this general opinion, and time had proved it to be false, would not this have led to the cessation of this immigration? I can hardly say that, because we have constantly in our report to England tried to prove that there was no work here—still assisted immigrants come.

599. Are you aware that the men who are now walking about Sydney unemployed are assisted immigrants? Yes, those whom I know are principally mechanics.

600. How many mechanics do you suppose have been brought out as assisted immigrants during the last 18 months? I am hardly in a position to say, but from six to ten by each vessel.

601. *Mr. Cameron.*] Of your particular trade? In the iron trade I think the "La Hogue" brought out ten in the last batch.

602. Did they come out as mechanics? I do not know whether they came out as mechanics, but they announced themselves as mechanics when they came.

603. Do you think the depression in your trade arises from the influx of these assisted immigrants or from persons coming from other colonies? From immigrants principally, for this reason, that they are not so well prepared to hold out as those who come from the colonies; they do not know the rates of wages and are glad to take anything that offers. Besides, when immigrants arrive by the same ship, two or three families will live together at first until they are able to get separate homes.

604. *Mr. Barbour.*] Did I understand you to say that the wages of labourers in iron yards was 28s. a week? From 28s. to 36s. a week.

605. Does the 28s. a week include board and lodging? No.

606. 28s. a week is only 4s. 8d. a day? Yes, and many a man thinks himself lucky to get five shillings a day. These are unskilled labourers.

607. Do you know what is the usual rate of wages for labourers at pick and shovel work on the road? From 6s. to 6s. 8d. I think.

608. Is not about 7s. the average? I think not. From the reports I have seen I believe the Corporation pay to hands who have been some time in their employ 7s. a day, to others 6s. 6d.

609. How do you account for labourers in iron yards being satisfied with 4s. 8d. a day when labourers at work outside in the open air get 7s.? I do not wish you to understand that the majority get only 4s. 8d.

610. The highest rate you say is 36s., so that the average would be about 33s. or 5s. 6d. a day? Yes.

611. Are these men who are working alongside tradesmen who get a much higher rate of pay satisfied to remain as labourers at 5s. 6d. a day, when people outside are getting 7s. a day as labourers? They would gladly take 7s. a day, but the men who are employed by the Corporation are only those principally who are known to the aldermen or officers. Besides there is not a large number employed by the Corporation.

612. Are these rates of wages paid to youths or to men who are capable of doing a man's work? 4s. 8d. a day would be given to young men of from 20 to 22.

613. These rates are paid only to lads not to men? There are plenty of men, married men with large families, who are in receipt of not more than 5s. a day.

614. Is it likely that these men whom you describe as tradesmen would be willing to work as labourers in an iron yard at 36s. a week when they could claim assistance from your society as mechanics? They would have to prove their right to assistance before they could get it.

615. If the assistance had not been there, and the big wages had not been there, would they not have been satisfied with the small ones? They would not have worked at the trade for it.

616. Not if the big wages were not there? If those were the only wages to be had. But if a workman knew that his fellow-craftsman received higher wages he would be likely to ask for the same.

617. There is the probability that these men came out intending to be satisfied with the labourers' wages, and when they found tradesmen's wages were so big they determined to rank themselves as tradesmen? I do not think that line of argument exactly the thing, for they may have represented themselves as labourers in order to get here; thinking we had got the work in our own hands they have when they have come here determined to take their stand as tradesmen.

618. They are satisfied with small wages when they cannot get big ones? They are mechanics; but in order to get here they have deceived those in power, as they would not obtain passages as mechanics.

619. Suppose you had a brother in the old country who was a good mechanic, he had a difficulty in getting employment, and had sufficient means of his own to keep him for three months after his arrival in this colony, I ask you whether, under these circumstances, you would advise him to stay at home or to come out here? I should, seeing he was my brother, certainly advise him to come here if he could show me that he had the money to keep him for some time after his arrival.*

620. Then I infer that you think if immigrants could get over the first three months from the time of their arrival, there is a better field for their labour here than in the old country? Not if mechanics are brought out here pell-mell.

621.

* NOTE (on revision) :—Owing to the rapidity and directness of the questions put by Mr. Barbour, I must confess that I was unable to make myself clearly understood in the answer given, which conveys a wrong impression, and I would wish to alter the answer in order to be clearly understood, which would be thus:—"I should possibly, through the ties of relationship as a brother, be inclined to advise him to come here upon the distinct understanding that he could assure me that he had sufficient means to keep him for some time after arrival, and also with the knowledge that he was a single man, as under no consideration would I be a party to inducing or advising a brother who was married to come here under the present circumstances connected with the labour market."

Mr.
H. J. Windon.
20 April, 1880.

- Mr. H. J. Windon. 621. But being properly selected? Yes.
- 20 April, 1880. 622. Not too many of one sort, you think then this would be a better field for their labour than the old country? Not in particular industries.
623. Do you not think there is an impression upon the minds of many in the old country, who are pretty hard up, and have difficulty in keeping the wolf from the door, that if they could get away to a new country, if they did not get one job they would get another? I believe there is that feeling.
624. Do you not think it is better for such men to come here? I believe there is a better chance here of being kept from starvation; but it is upon the working men who are already here that the burden falls when they come. These people generally have some friends here of their particular class, and the burden of keeping them falls upon them. It is no unusual thing to go round in the workshops to make collections for new arrivals under such circumstances,* to enable them to return home.
625. Have you in those cases known people want to go home, preferring the old country to this, or from some peculiar circumstances, such as a desire to see their friends or an unfitness to adapt themselves to the colony? No; they have desired to go back because, after walking about the streets in search of employment, they have been unable to get away.
626. These are only exceptional cases; they do not often occur? By every one of the Orient line steamers there are some who return as coal-trimmers or oilers at a shilling a month. By the last there were two men, one named Macintosh and the other Macdonald.
627. Were there any special circumstances connected with those men that induced them to go? The only circumstance was that these men had been out of work a very long time, and they believed there was a better chance for them in the mother-country. There are more shops to go to.
628. *Chairman.*] Were these men assisted immigrants? Several of those who have gone home have been. I am not prepared to say whether those particular two I have just mentioned were.
629. You have said that some went back by the "Garonne"? Yes; I know some of those were assisted immigrants.
630. How many? Two.
631. How long had they been here? Eight or ten months.
632. Were they iron-workers? Yes, both engineers.
633. Had they come out as iron-workers? That I could not say.
634. They could not succeed in their own calling here? No.
635. Had they any special reason that led them to return to England except want of employment? That was the only reason.
636. *Mr. Day.*] Are you quite sure, from your own knowledge, that that was the reason? I feel confident it was.
637. Why do you feel confident? From the distress they seemed to be in. They appeared to be in great poverty.
638. What wages were they getting on board the "Garonne"? They had a shilling a month, to comply with the law, as they were required to sign articles. They were working their passage home.
639. Then they were working for nothing? Yes; and were glad to get home at that.
640. Are you quite sure that two engineers went on board the "Garonne," and worked on board for a shilling a month? I am sure there were four.
641. On what date? I forget the date; the last time the "Garonne" went out.
642. You are quite sure that the last time the "Garonne" left here there were four engineers who went on board, and worked there for nothing? They did not work as engineers, but were glad to do any menial work as coal-trimmers or in any other capacity, in order to get home.
643. *Mr. Cameron.*] Is employment more fluctuating in its character here than in England? No, I cannot say that it is more fluctuating, but that the demand here does not increase to the extent of the people who come here.
644. *Chairman.*] Have you known any of your trade to nominate their friends to come out here as assisted immigrants? I am not aware of any.
645. I suppose you are aware that a large number of persons of different callings have come out under such circumstances? I am not aware that any of our particular trade have come out on the nomination of their friends. I have no knowledge of any.
646. *Mr. Charles.*] Are you aware of engineers going home at a shilling a month to see their friends with the intention of coming out again? No.
647. Do you know a man of the name of Waugh, an engineer in the city of Sydney? I know him by name but am not personally acquainted with him.
648. Do you know that he went home at a shilling a month? I was not aware of it.
649. Is he one of the four you spoke of just now? No.
650. Did he not deliver a lecture on his experience of his voyage home and out? Yes, I saw an account of it as read to the Engineering Association of Sydney. I know him by sight.

WEDNESDAY, 28 APRIL, 1880.

Present:—

MR. BARBOUR, | MR. GREENWOOD,
MR. JACOB.

J. F. BURNS, ESQ., IN THE CHAIR.

William Jarrett, Esq., examined:—

- W. Jarrett, Esq. 651. *Chairman.*] You are Manager of the Industrial and Provident Permanent Building Society? Yes.
- 28 April, 1880. 652. In what year was your Society established? In January, 1871.
653. How long have you held the office of Manager? Since the commencement.
654. Can you tell us the amount in round numbers advanced by the Society for building and the like purposes since it was first established? About £591,000. 655.

* NOTE (on revision):—Many of whom say they would be only too glad to return home.

W. Jarrett, Esq.
23 April, 1880.

655. What amount was still due to your Society on mortgages on the 1st of January last? £298,865 2s. 5d.

656. To what class has your advances for the most part been made? Principally among the working classes, or to those who have raised themselves a little above their fellows, and who require houses of their own.

657. Were the properties upon which you made advances chiefly in the suburbs? Yes, or within 5 or 6 miles of the city.

658. For the most part in the suburbs? Yes, in the city and suburbs.

659. What has been your experience as to the fulfilment of their obligations on the part of the borrowers? They have paid up very well; we have not had £100 loss since the Society first started. We have sold very few properties, and those we have sold belonged to parties who never do pay well and cannot be coaxed into paying—people who probably give way to drink, some of them. I do not suppose we have sold ten properties since we have started.

660. Has your experience led you to the conclusion that the industrial classes of the city and suburbs are of thrifty habits and in a prosperous state? Certain classes are not so well off—clerks for instance—but so far as mechanics are concerned in the building trade they have generally been well off during the last few years, until within about five or six months.

661. What amount did you advance upon mortgage in 1878? £78,500.

662. In 1879? £132,874 in round numbers.

663. I believe that like other Societies of the kind your business was curtailed to a large extent by the stringency of the money market? In 1878 we could have lent a great deal more; also during the first few months of 1879 we could have lent one-fourth more than we did; we could have easily lent £50,000 more.

664. From what class do the applications chiefly come? They are for suburban properties; most of our applications are for houses from £200 to £450 or £500.

665. You could have lent much more last year if you had had a sufficient supply of capital at your command? Yes.

666. Have you experienced a change in the condition of the money market during the present year? There has been a great difference during the last two or three months.

667. Have you not also reduced the rate of interest on deposits? Yes, we have reduced that 1 per cent., and we shall reduce that still more.

668. In consequence of your supply of capital being so much greater than formerly? Yes.

669. I believe the reduction is common to all Building Societies? Yes; I think so.

670. And banks also? And banks also.

671. What amount did you hold on deposit on the 1st of January last? £174,000; that is simply deposits.

672. From what class do you get these deposits? Although some of the working classes who are very thrifty make them by far the larger portion comes from capitalists.

673. Could you give the Committee some idea of the amount advanced by all the Building Societies of this city upon buildings or for building purposes in 1878 or 1879? In 1879 I should think about a third of a million. I think we lent one-third of a million in 1879, which is as much as the three leading Building Societies put together, perhaps a little more.

674. You are aware that the Savings Bank also advances upon mortgages? Yes; but they do not lend so large a proportion upon buildings as the Societies, although they charge less for interest, and therefore people generally cannot avail themselves of the advantages that Savings Banks offer.

675. I presume that your duties bring you largely into contact with architects, builders, and persons connected with the building trade in Sydney and its suburbs? Yes, to a considerable extent.

676. If you were told that there were at the present time two or three hundred masons unemployed in Sydney would you believe it? I believe there are more masons unemployed than any other workmen in the building trade. Their trade has not been very brisk for some years. They are not like some others, as plasterers, carpenters, and bricklayers; plumbers it has been difficult to get, but I think the market is overstocked with masons.

677. What is the impression you have formed from your intercourse with professional architects and builders as to the present condition of the building trades in Sydney and its suburbs? For the last five or six months it has generally been slack, but for the five or six years previously the trade was very brisk, you could hardly get mechanics at the building trades. Indeed a plasterer would not undertake a job out of town, at a place like Ashfield, unless the employer paid for their carriage, or sent them by a spring cart.

678. What is the present position of persons in the building trades? It is not so good. Now if a job is advertised in an architect's office there is a great deal of competition for it, and the consequence is that houses are built very cheaply. Indeed in many cases I believe the contractors are losing. Last year you could hardly get men to tender.

679. To what do you attribute the excessive competition? There must be an excessive supply for immediate requirements.

680. Owing to assisted immigration or to immigration from other colonies? I could not say. I dare say a great many come from other colonies. People have been building very largely in the suburbs of Sydney lately, and it may be overdone. There are many more houses now empty than there were.

681. Since when? The last four or five months. I have had five empty out of six in a good position at the Glebe.

682. How do you account for so many houses being empty? In my case I attribute it to the fact that there have been so many houses built on Pymont lately, and many people like to go into new houses, perhaps too it may be because they are a little nearer to Sydney.

683. Do you think people prefer living at Pymont on account of its being nearer to Sydney, and that therefore houses beyond are left empty? If there are many houses built nearer to Sydney people who are living at a greater distance from the city naturally take them, and leave the outside houses empty; but I do not think it is general. I cannot account for mine being empty as the rent is not excessive, still several of them have been for the last five or six months.

684. Do you not find the demand for advances for building still as active as ever? Yes.

685. And are mechanics and others still building in the suburbs? Yes, faster than ever as far as our Society is concerned.

W.
Jarrett, Esq.
28 April, 1880.

686. What is your general observation as to the demand for persons in the building lines, such as carpenters and others? I think it is rather slack now.

687. Have you ever heard of any newly-arrived immigrants remaining about Sydney and competing unduly with other mechanics? I do not think they can come into competition with them to any extent; they may work for a little less, but there is less work going on than there was a year or two ago. At that time we could scarcely get a contractor to tender for a house that would be worth £500 or £600 without tendering £100 more than it should be. Now if an architect has a job he has sixty applicants for it, where before he would not have six. That I think shows that there must be less buildings going on, for a man just arrived here as an immigrant would hardly become a contractor at once; he must have a little experience before he can tender.

688. *Mr. Greenwood.*] You have said that one out of six of your houses were empty? Yes.

689. Is that at the present time? I think I have now about six empty.

690. Out of how many? Out of thirty-four. They are houses suitable for working men.

691. Then you mean that you have one out of six empty? I have had five out of six in one row.

692. Does that apply to all your houses? I have had one-third empty, or twelve out of thirty-four.

693. Have you now? I have now about six or seven. They are houses on the Glebe, not far from the Glebe Road.

694. Are these houses the Society's houses or your own? My private property.

695. Have you any means of knowing what proportion of the Society's houses, or houses upon which the Society has lent money, are occupied, and what are unoccupied? I presume they are occupied, because we get the returns from the parties. Generally the people who borrow money from the Society live in the houses themselves, or where they have five or six houses they live in one of them, and are in a better position to look after, and to let any that may be unoccupied, they themselves being upon the spot. They are more likely to get good tenants, while I, not being able to look after the property myself, may get bad ones, which I often do.

696. What is the average rent of these thirty-four houses? 12s. and 13s. a week—they have four rooms and a kitchen.

697. They are in the Glebe? In the Glebe.

698. When had you the largest number of houses unoccupied? Within the last twelve months. Just now they are beginning to be occupied again. Three or four weeks ago I dare say there were ten empty.

699. When so many were empty did you reduce the rent at all? Yes, they were 14s. a week, and I reduced them to 13s. and 12s.

700. How long is it since they were 14s.? Seven or eight weeks ago. Mine are by no means high rented, because there are houses almost within a stone's throw, which are no larger, which are let at 15s., while I am getting 12s. These are new houses, but mine are not old, some of them having been built within the last two years. Houses exactly opposite some of mine are letting for 14s. a week, while I am getting 13s.

701. How do you explain that? I really cannot tell.

702. Do you find neighbouring houses vacant to the extent of yours? No, I do not.

703. How would you explain that? I cannot explain it.

704. Judging from your knowledge as Secretary of a Building Society, would you not imagine that if a house is vacant more than others of a similar description in the same locality, it must be due either to its being in a worse situation or to higher rent? That mine are not. It may be due perhaps to their not having been so well looked after, as I have not been able to attend to them myself, but it is not to the high rent.

705. Speaking of the suburbs generally, are there many houses vacant now? No, I do not think there are many houses empty.

706. And yours are better occupied now than they were previously? Yes, just lately; a few have been let lately—the last two or three weeks.

707. At lower rents? I have reduced them from 13s. to 12s. These are on the main road, leading from Sydney to the Glebe, the Pyrmont Bridge Road, where five out of six were empty near the Park which has been laid out between the City and the Glebe.

708. In the suburbs generally do you think buildings are progressing and still there are not many houses empty? Yes; they are still building, perhaps not as fast as formerly.

709. You are lending money more than ever on new buildings? Yes; still that might not prove that more houses are going on. We have a run that probably no other Building Society has; perhaps we may be a little more favourable to the borrower, though I cannot say there is much difference in that respect. However, we have a run and we are likely to keep it.

710. You believe that buildings are erected more cheaply now than they were some time ago? Yes.

711. About when would you fix the date of the change? During the last six months.

712. Building is cheaper than it was formerly? Yes, a great deal.

713. What means have you of knowing that? Only from a knowledge of the tenders that come in. We have an architect's office above in connection with our Society, and I get information from the architect and others.

714. Are the tenders for buildings on which you advance submitted to your Society? No; we have the architect's and valuator's reports.

715. Does the architect or valuator tell you what is to be the cost of the building on which you make an advance? I see all the valuations, and have myself generally a good idea of the value of property, and I know from my own knowledge that a few years ago you could scarcely get mechanics to tender for a job; and as I have said, if plasterers were required to do a job at Petersham or some other place a short distance from Sydney, they would require the employer to find them a spring cart or some other conveyance to take them there. It may be so now with respect to plasterers, for they have been very busy, and I have heard that they intended to strike for more wages.

716. In the building trades which of them are now fully employed as far as you know? Bricklayers and plasterers chiefly; I think they are the only two classes in the building trade.

717. What about carpenters? There are more carpenters than are required just now. Carpenters as a class do more in the way of tendering for the entire building of a house than either bricklayers or plasterers. They are in a better position to get a knowledge of the value of the whole work. There are more contractors among carpenters than among any other branch of the building trade. 718.

W. Jarrett, Esq.
28 April, 1880.

718. So that they are very often masters and not merely labourers? They become masters if they have any tact or management, that is, the best of them. (Of course there are also bricklayers who undertake to do the whole work, and there may be masons, but I think there are more carpenters than any others.)

719. What hours do builders work at present in Sydney? Eight hours.

720. Plasterers the same? Yes.

721. Carpenters the same? Yes.

722. What is the ruling price of labour per hour or day of men engaged in the building trades? 10s. and 11s. for most of the building trades. I dare say you could get as many as you wanted just now at 10s. a day.

723. How long has that been the ruling price? I think it has been the ruling price for a considerable time—four or five years perhaps.

724. Do you remember it to have been either higher or lower? Yes, I remember mechanics getting 35s. a day.

725. That was a long time ago, I presume during the gold mania? In 1853 and 1854, I think.

726. Were they working the same hours then? I think they worked a little longer then; ten hours for some time after that, perhaps eight or nine years, and they then struck for eight hours.

727. Have you any recollection of what was the price of provisions when wages were so high? Provisions were very little higher than they are now. Rent was higher. For a short time bread was up, I think to 1s. for a 2-lb. loaf, but only for a little time, it then came down to 4d.

728. This was about the time the gold mania was at its height? Yes.

729. How long did these high wages continue? It is a long time back to think about. They were 10s. a day in 1852, and gradually went up to 35s. and even 38s. a day. Of course I cannot be positive as to the time these high wages were maintained, but I think for a couple of years, and then wages gradually went down to about 8s. I do not think they ever went lower than 8s. or 9s.

730. You consider that due to the exceptional state of the Colony at that time in consequence of the gold mania? Yes, the great demand for mechanics at that time caused it.

731. How has assisted immigration affected the building trade so far as you have had the means of observing during the last two or three years? So far as the building trades are concerned I do not think it has done a great deal of injury. Those who have come here seem to have obtained employment. I am speaking only of the building trades. If I were to speak of clerks I should tell another story altogether.

732. What trades do you think are overdone in New South Wales, so far as you can judge? I have not much knowledge of any other class of tradesmen than those in the building trades. There are certainly too many masons just now, and I think from what I can see the same will soon have to be said of carpenters, but I do not think that will be for long. You might bring from any country or from any class of labourers a number into the country that might at first be too great for the demand, but they would soon be absorbed.

733. *Mr. Barbour.*] What do you mean by overdoing—that the supply may become greater than the demand, or that building may be stopped for a time? If too many houses were built, as a natural consequence people would stop building.

734. Do you think there is at present a tendency to build more than there is a demand for? Yes, I think so; and that people will cease to build.

735. The consequence would be that shortly the labour which is now employed would be unemployed? I think so. That is what seems looming in the future to me; building has been going on at so rapid a rate that I think it must soon quite exceed the demand. Hundreds of houses must have gone up on Pymont within the last two or three years.*

736. Do you think there has been an extraordinary influx of tradesmen during the last two or three years which has exceeded the ordinary demand? That I cannot say.

737. Do you think there is any depression at the present time in the Colony, that it is any less prosperous than it has been in times past? No; I think it has been an excellent time lately for the Colony.

738. How do you account for the greater supply of buildings at the present time than the usual demand in the Colony? It must have been in consequence of an influx of population from somewhere, probably from the old country.

739. That would require more houses? Yes; if there were not a demand houses would not be built.

740. Do you think there is anything indicating that the demand will stop? Yes, I think so. From the knowledge I have I should say we have been building too fast for the population.

741. Do you think to make good the extraordinary demand from the extraordinary influx of people, there has been an extraordinary addition to the tradesmen of the Colony? Yes, I think so.

742. Where have these generally come from? That I could not tell you. I do not know.

743. Do you think they have come from the old country? I do not know. I have not taken particular notice; but I know there must have been a great accession to the population of the Colony during the last two or three years, and consequently there has been a greater number of houses built than hitherto.

744. Can you say whether it is owing to the depressed state of trade in the adjoining colonies, or to immigration from the old country? I cannot say. I could only speak from hearsay of Victoria.

745. From your own knowledge you cannot tell us in what way immigration, assisted or other, has affected the building trades? No, I cannot.

746. If contracts are taken at a lower rate now than formerly, does that indicate a reduction in the workman's wages? No, that might not, an immediate reduction. The contractor has his hands and a certain number of jobs going on, and probably he might take a job to-day at less than its value to keep his men going, in the hope of getting a better price for the next contract he took.

747. Would not that be a very exceptional circumstance—it could not continue for any length of time? It would not continue; nor have I said that this depression has existed more than five or six months. It is only recently that jobs have been taken at these low rates.

748. You gave us to understand that the time was when the workmen were very saucy, and had to be driven out to Newtown in a spring cart, or to have their fares paid;—is that state of things removed? I cannot say that it is. I believe that now if an employer had a job at Ashfield for a plasterer he would either have to pay the man's fare or to take him to the job in a spring cart.

749.

* ADDED (on revision):—We have made advances on some two to three hundred of houses in the last two or three years.

- W. Jarrett, Esq.
28 April, 1880.
749. Then the extraordinary prices that contractors demand for their contracts were not due to exceptional circumstances, as I understood you to say? I am speaking of from two to four years ago, when it was a difficult matter to get contractors to tender for a job—now there are more contractors than jobs.
750. What is the cause of that—is it from any ease he has received in the reduction of wages, or from better bargains made with the workmen? No, I think he has to pay the same wages.
751. Then are we to understand that at the present time the competition is unhealthy? It is just now.
752. And if persisted in will end in ruin both to the contractor and to the workmen? Yes, I think it will. Of course you will understand that I am now referring to general building contracts, not to large Government contracts.
753. You have no knowledge yourself of the influence of immigration upon anything else than the building trades? No.
754. Do you know yourself of any class of immigrants that could be beneficially to the Colony brought here, and that the Colony could absorb? I do not know of my own knowledge.
755. For example, do you think it would be beneficial to continue to import female immigrants? Yes, I think we could take some thousands.
756. With that exception, is there any class that you think could be beneficially brought to the colony? I cannot say that there is.
757. Do you know anything of the iron trade? No, I do not. Trade here seems to be too much restricted—only just the same line of work over and over again. There are no industries that would absorb mechanics.
758. Do you think if any industries were established here it would be beneficial to the Colony? Yes; industries and immigration should go hand in hand together. We could scarcely have too many immigrants if we had local industries.
759. Those industries would have to be payable industries? Yes.
760. Do you know any such industries in the Colony that are payable? No, I do not.
761. Then of course you could not say whether an accession of population would be beneficial, either of mechanics or of others? No.

John Wesley Watkin, Esquire, examined:—

- J. W. Watkin, Esq.
28 April, 1880.
762. *Chairman.*] You are manager of the Sydney Permanent Freehold Land and Building Society? Yes.
763. When was the Society established? This is our fifth financial year.
764. Can you tell us what amount has been advanced by the Society to its members for building purposes since it was first established? £109,000.
765. What amount was due upon mortgages on the 1st January last? £72,000.
766. What has been your experience with respect to the repayment of advances by members? We have never had to sell any one off.
767. You find the payments made by way of redemption regular? Yes, that can be answered pretty well by the amount of fines. We inflict fines if the parties do not keep their payments up to the mark, and the whole of our fines last year was £70.
768. What class has chiefly availed itself of the privilege of borrowing from your Building Society? Chiefly what we may call the artisan and middle class, such as clerks, warehousemen, and others. Most of our transactions have been in the suburbs.
769. The properties upon which advances have been made have been for the most part in the suburbs? Yes; occasionally we have made advances upon outside city properties at Surry Hills and Woolloomooloo.
770. What amount was advanced last year upon mortgage? It was a bad year—£22,300.
771. Was that in consequence of the state of the money market? Yes; the previous year we advanced £30,000.
772. Since the opening of the present year have you experienced a greater supply of capital? A marked change is beginning to be felt; up to to-day we have paid £16,722.
773. The Society has of course been in a better position to make advances to those who have required them for building purposes? Yes; there has been a better supply of money.
774. I believe one of the consequences of a greater supply of capital has been a reduction in the rate allowed by this and other building societies for deposits? Yes; a reduction of 1 per cent.
775. The banks also have made a reduction in the interest upon deposits? Yes.
776. Your business has brought you in contact with architects and persons in the building trades? Yes.
777. What is your impression of the condition of the building trades at the present time? I should say it is very good; far better than it was last year.
778. Owing to the great amount of building that is going on? Yes, through the building societies of houses ranging from £100 to £2,000.
779. The building is chiefly in the suburbs? Yes.
780. Are you aware whether there are many houses unoccupied in the suburbs? Very few indeed, so far as my observation has extended on the railway suburbs.
781. You live at Ashfield? Yes; and I do not believe there are half-a-dozen now to let in that borough.
782. The Society with which you are connected is in the habit of purchasing land in large blocks, subdividing it and selling it to its members? Yes.
783. Your business leads you to travel about a good deal, and to see the different suburbs? Yes.
784. Looking at lands offered to the Society for sale, and giving instructions for subdividing the lands after their purchase? Yes.
785. Have you been travelling much lately? Yes.
786. And your observation leads you to the conclusion that there are very few places to let? Yes; in the railway suburbs.
787. Have you been about the Glebe at all? I know very little about the Glebe.
788. Redfern and Pyrmont? No; I do not know much about those places, as we do not lend on leasehold properties to any extent.
789. Paddington? No.
790. There are a number of freeholds at Paddington? Yes; still I have not an intimate knowledge of that locality.
791. Do you think building has been carried on in excess of the requirements of the Colony? Certainly not, so far as I can see.

J. W.
Watkin, Esq.
28 April, 1880.

792. Is it your opinion that there has been a large increase in the population of the city and its suburbs to require these buildings? Yes; the natural increase alone is very great.

793. Is there not also an increase from immigration? Yes, although I do not see many new-chums about.

794. You do not meet many persons who have newly-arrived? No, I do not.

795. You know them from the style of their clothing? Yes, from their general appearance and conversation.

796. Have you met in the building trades with many newly-arrived immigrants? Very few. The men I meet seem almost all to be men with some Colonial experience. I come mostly in contact with the contractors and not with the men.

797. Still your business leads you to see what is going on in the trade? Yes.

798. Have you heard of greater competition in the trade for building contracts? Yes; when there is any work a greater number of people come to look at the plans and specifications than formerly. I think there are more small contractors, and that is evidence that some of the men are getting on better. Many of these men who have been employés become employers; they make a few pounds and then become contractors, and the employers of others.

799. Does your experience as the manager of this Society lead you to form the opinion that the industrial classes of Sydney and its suburbs are fairly well off? I certainly think so. As a seller of land I think I may say I am in a position to form some judgment. I had a sale about a fortnight since at Ashfield, at which a large number of people attended, and I sold land to the amount of £4,500 to 60 buyers, mostly of the artisan class. I do not think any of them were new arrivals.

800. You also act as auctioneer for the sale of land for the Society of which you are the Manager? Yes.

801. Who are the principal purchasers of the land sold by you on behalf of the Society? The lands we have sold hitherto have been in the suburbs at Ashfield, Petersham, and some between Newtown and Sydney; the purchasers have been persons chiefly of the middle class and artisans.

802. Have you met with any newly-arrived immigrants about Sydney seeking employment? No.

803. Have you heard of any of them competing unduly with artisans and others in different trades for employment? No, I recollect the other day a man came to me who said he was a stonemason, and I sent him to Mr. Elphinstone, the builder, but he said that for the work he had he required a man with Colonial experience.

804. Have you heard that many masons are out of employ? I have heard so, but I do not know it of my own knowledge.

805. *Mr. Barbour.*] You say that contracts are now more easily let than formerly? There are more tenderers for small jobs—there is greater competition.

806. What do you think is the cause of this? Many men who have been journeymen have saved a few pounds, and have become contractors.

807. Is it likely that such a great change should take place in a few months? Yes, I think so. At this time last year there were few jobs out.

808. Is it likely to have occurred from the influx of immigrants from the old country? I think not; the men I have met with have been men with Colonial experience. Whether they were men who had come from other colonies I had no chance of knowing.

809. "New chums" do not jump into the position of contractors at once? No.

810. Nor do they take leading positions among tradesmen, or even among labourers? No.

811. But if they are on the lower rungs of the ladder they still press those above them still higher up? Yes, I should think so.

812. I suppose that the influence of new-arrived immigrants in the Colony will be more indirect than direct upon the working population? Yes.

813. Do you think that the immigrants we have been bringing out the last year or two have been acting in this way? I can hardly say—I have not given the subject consideration.

814. Do you know any class of immigrants that the Colony could profitably absorb at the present time? We want brickmakers. I know half-a-dozen jobs standing still for want of bricks. Notwithstanding all the brick-making machinery that has been imported the supply of bricks does not come up to the demand.

815. Is there any reason why if there is an excessive supply of masons, masons should not become bricklayers? I should hardly think masons could become good bricklayers—the trades are quite distinct, and there is a general unwillingness on the part of tradesmen to undertake jobs not connected with their own trades.

816. *Mr. Jacob.*] Does not a sort of freemasonry among the trades prevent that sort of thing? Very likely it does in Sydney. I dare say in the country a man who is a mason may also act as a bricklayer.

817. *Mr. Barbour.*] Do you attribute the large demand for houses at Ashfield by the middle class and artisans to their leaving the more immediate suburbs? Yes, and to the facilities the Building Societies afford them of becoming their own landlords. The people swarm out of the city to the suburbs—along the railway-line.

818. Their coming there would have a tendency to cause empty houses in the Glebe and Pyrmont? Yes, it is likely; besides we do not lend money on leasehold property, as that at the Glebe and Pyrmont is for the most part.

819. Is there any want in the Colony of female immigration? As far as they are concerned there is plenty of room for two or three thousand.

820. There is no surplus of female servants? No.

821. Do you know whether there is any surplus of tradesmen? People in the iron trade complain of being short of work. I know a pattern-maker who has complained to me that he has been out of work a long time, and also a boiler-maker, but I know it only from what they have told me.

822. *Mr. Jacob.*] With reference to Mr. Barbour's question as to female servants, you state that there is plenty of room in this Colony for several thousands;—are you aware from reading the newspapers that there is the same want of female servants in the old countries, and especially in England? Yes.

823. Then if we were to bring out servants from England at the public expense we should be increasing the difficulty there? No doubt we should only shift the difficulty. What is wanted is that these girls should learn the dignity of labour instead of seeking to become fine ladies by working at sewing-machines or serving in shops.

824. What is your opinion from reading and observation as to assisted immigration;—do you think assisted immigration

J. W.
Watkin, Esq.
28 April, 1880.

immigration should be continued, or that all classes of people should be allowed to immigrate at their own expense? I think one volunteer is worth a dozen pressed men, and I fancy if we make the Colony attractive enough we should draw people here. Under the present system we get all sorts—some good men, and a great many of the other kind.

825. *Mr. Barbour.*] You do not approve of assisted immigration? I do not believe in people being shipped out here at so much per head, as I believe has been done.

826. You believe it would be beneficial if the people were properly selected? Yes, certainly; what would the Colony be without population?

827. Would you bring out population at the public expense? That is a question for a politician rather than for me. If we could get the right sort I should certainly say bring them here, but I hardly believe we have been getting the right sort.

828. *Mr. Jacob.*] You say you have not come in contact with many newly-arrived immigrants? No, I have not.

THURSDAY, 29 APRIL, 1880.

Present:—

MR. BARBOUR,

MR. CAMERON,

MR. JACOB.

J. F. BURNS, ESQ., IN THE CHAIR.

Mr. William Davies, called in and examined:—

Mr.
W. Davies.
29 April, 1880.

829. *Chairman.*] You are Chairman of the Miners' Union of the county of Northumberland? I am.

830. I believe you are yourself a miner? I am.

831. How long have you resided in the county of Northumberland? Twenty-four years.

832. Have you been all that time engaged in mining pursuits? Yes.

833. I believe that what may be called a crisis in mining affairs has lately arisen in your district, owing to the breaking up of what is known as the vend scheme? No; it is not owing to the vend scheme that the crisis has been brought about.

834. To what do you attribute it? To the falling off of trade and the great amount of surplus labour in the district.

835. In consequence of the falling off of trade, the vend scheme is at an end, is it not? It is at an end so far as the miners are concerned.

836. I want you to carry back your mind to the period before this disagreement, I suppose we may call it, between the masters and the men, and to ask you whether the number of miners in your district was then in excess of the requirements of the district itself? They were even then in excess; there was a great deal of short-time-work even at that time—in 1874. In 1874 there 1,450 miners in the district; in 1879 there were 2,700; an increase of 1,250. Taking the output of coal for 1874, and the output for 1879 there was somewhere about 60,000 tons of increase.

837. Of the number of miners you have in your district, what number do you suppose are regularly in receipt of wages? I may answer the question in this way: The number of days per fortnight worked by the various collieries in 1879 was as follows:—Newcastle Company, 4½ days; Ferndale Company, 5¼ days; Wallsend Company, 5¾ days; Greta Company, 4¾ days; Borehole Company, 6¾ days; Minmi Company, 5½ days; New Lambton Company, 6¾ days; Co-operative Company, 5 days; Lambton Company, about 9¼ days; averaging a fraction over 5¾ days per fortnight for the whole year.

838. The average employment at the mines was 5¾ days per fortnight? Yes.

839. What was the average rate of wages earned by those who worked during that time? About 10s. a day.

840. Were there at that time—I am still speaking of the period before the late disagreement—many miners in the district who were unemployed? There were some unemployed even in 1874, but nothing to what there are now; say in 1872 there were some. I have not the number then unemployed, but that was the year in which the agreement was entered into—the early part of 1873.

841. In 1872 the vend scheme was arranged? No, not the vend scheme; the agreement between the masters and the miners; that was when the sliding scale was arranged—in 1872.

842. When you came to this understanding in 1872 do you think there were many men unemployed after you had completed your agreement? Not many after the agreement was come to.

843. Now as to 1873 and subsequent years, will you tell the Committee what your observation is with regard to the supply of men in proportion to the demand? The supply has been in excess of the demand; I may say that for the first year or two of the agreement the collieries worked pretty regularly—say for the first two years.

844. The miners were pretty regularly employed then? Yes. I do not know that ever I saw the district in such a prosperous state as it was then—say in 1873 and 1874.

845. What was the price of coal then? 14s.

846. What did the miners get for cutting the coal? They received then 5s. a ton when it was at 14s. It went to 14s. I think in July, 1873.

847. In what year did you first notice that the miners were to any extent in excess of the demand? More particularly in 1876, 1877, and 1878.

848. During those years did you observe that there were very many wanting employment? Very many.

849. How do you account for that? A number of miners arrived in the Colony at the expense of the Government.

850. In what years? In 1877, 1878, and 1879.

851. Do you know the number of miners that arrived in 1877? I could not say.

852. The number of coal-miners, according to the report of the Immigration Agent, was 337 in 1877, 114 in 1878, and 33 in 1879;—Do you think the numbers set out in the report of the Immigration agent included all the miners who really arrived as assisted immigrants? Nothing like it.

853. Do you know of your own knowledge whether any of the parties who came out as farm labourers, and under other designations, were in reality miners? Yes.

854. *Mr. Jacob.*] Many? Yes, many.

855.

Mr.
W. Davies.

29 April, 1880.

855. *Chairman.*] Where did these persons locate themselves? About Newcastle.
856. Are many of them there now? Yes.
857. In what years did they come out? They came out about 1877, 1878, and the early part of 1879. I may say this, that I had occasion during the Anvil Creek strike to be in Sydney, and I visited nearly every immigrant ship that came in during that time.
858. In what year was that strike? About 1878, and the early part of 1879.
859. What did you learn with regard to these immigrant ships? I was trying to hire miners sometimes. I do not know that I am obliged to say what I was down upon at that time.
860. Did you learn that there were many, or any parties who had come out under other designations who were really coal-miners? Yes.
861. Do you know it of your own knowledge? Yes. Some came as labourers, some came as quarrymen.
862. What became of these men? They are at Newcastle. They did not engage here.
863. They left here to go to work as coal-miners? Yes; they are working now as coal-miners.
864. Are there some of these people in your district now? Yes.
865. How many do you suppose? I could not say how many, but I know there are a great number of them. I know that in the Newcastle Company's pit, where I am working, half of them are newly arrived.
866. Of course you have observed that there has been a great falling off in the number brought out as coal-miners since 1877? Yes; I may account for that. We interviewed Sir John Robertson, and he promised that no more coal-miners should be brought out, believing they were not required. We also interviewed Mr. Fitzpatrick, when he became Colonial Secretary, and he wrote a memo. that a telegram should be sent to the Agent General to send out no more miners; but I know parties that came out after that as coal-miners.
867. Do you know whether any have come recently? Not as coal-miners; but I know some coal-miners who have come out.
868. How recently? As recently as the "Northbrook."
869. What became of them? Some went to Newcastle and some to Wollongong; there were also some who came in the "Ellora," and I know they are working at the present time at Wollongong.
870. I would like to ask you whether in your experience miners as a class become attached to their occupation and do not care to go to other pursuits? They do not care to go to other pursuits.
871. Have you noticed that men brought up to other pursuits, who cannot get profitable engagements in their own particular callings, are willing to take other employment? Yes.
872. It is not so with miners? No.
873. Are miners as a class provident? Yes, as a class they are.
874. Do you see any prospect of any improvement in mining at the present time? Not the slightest.
875. Do you think we have in the Colony an ample supply of miners for all the work to be done in that particular line? I think we have a great many more than are needed. I have a note here that there are about two men for one or five for every three required, and I do not exaggerate when I make that estimate. We are working even less this year than in 1879.
876. *Mr. Barbour.*] Did I understand you to say that when things were prosperous with the coal-miners they only made five and three-quarter days per fortnight as an average? No; the number of days I gave you were for 1879.
877. *Mr. Jacob.*] When there was a surplus of labour? Yes.
878. *Mr. Barbour.*] That would leave less than 30s. a week at an average rate of 10s. a day? Yes; I think I have gone beyond the average.
879. Why did these men go on working at that rate, when by going as navvies on the railway they would have made a great deal more? Will you point out any section of railway where they were required.
880. *Chairman.*] You do not know any place where they were wanted? No, I do not.
881. *Mr. Barbour.*] Were not lots of men wanted for the extension of the Northern Railway on Amos's contract? It was stated so; but I know that men returned back from there because they could not get employment. At a time when there was great distress among the miners, when men did not know where to turn for a loaf, men have gone to the railway and found there were hundreds of men in camp in the vicinity waiting to get taken on, and then these men returned back. I judged by their returning back that it was something like Noah's dove with them—that they could not find a resting place, otherwise they would not have returned to starvation.
882. Was there not plenty of work to be done on the railway? No, they could not get employment.
883. Was it that they could not get the wages they wanted? No, it was because they could not get employment; that was the statement of the men when they came back.
884. Did they report that there was no work at all going on at the railway? No, they did not report that; they reported that every morning when they went up there would be perhaps a hundred men seeking to get on; some were put on for a day or two and discharged, and another lot put on.
885. Did that arise from the incompetency of the men? I could not say. I should judge that coal-miners would make as good navvies as could be found.
886. Did the men consider the wages sufficient? I could not say what the wages were.
887. If the contractors put a man on to-day and discharged him to-morrow would not that indicate his unfitness for the work? Not always.
888. As a rule? Not even as a rule either.
889. Speaking of the large influx of immigrants during the three years you mention—1877, 1878, and 1879—are you aware that a large number of these were sent for by friends among the coal-miners of Newcastle? I believe they were; I believe many of them were sent for by their friends.
890. Do you know that the largest number were sent for in 1879? I could not say whether the largest number were sent for in 1879.
891. The returns show that in 1877 there were 165, in 1878 there were 186, and in 1879 there were 504. Are you aware that a large number of these, if not the whole, were sent for by coal-miners? That may be. I think I remember Mr. Wise telling me once that 75 per cent. of the moneys paid were paid out of our own district. I also know this, that some of the men that came out in 1879 sent for by their friends have not got work yet—they are lying idle.
892. Would you not think it a very cruel thing of their friends to send for them from England and assist to pay their passages, when they knew there was no work for them when they came here? I think it was cruel and very injudicious of them to do so.

Mr.
W. Davies.
29 April, 1880.

893. Do you think it is usual for persons here to send for their friends at home when they know there is no work for them? It is usual in our district.

894. How do you account for that principle of action, so different from human nature generally? They want their friends to be with them I suppose. But you must remember that during the last two years things have been fearfully depressed in the mining districts of England, and therefore miners there have been glad to leave.

895. Do you think this depression in England induced their friends here to pay part of their passage-money in order to bring them out? Yes.

896. And that although the men who have come out are badly off here they would have been a great deal worse off in England? I do not know that they would be worse off; they would have some kind of employment; there is none here. I know of one family especially who spent a lot of money to get their friends out, with the clear understanding that when they came they should pay the money back, but they have not got work yet—four of them. They arrived here soon after last Christmas, 1879.

897. Then you believe that a large number of these people that came out came out of their own free will and accord, knowing trade was bad in the Colony? Yes; they knew trade was bad.

898. And yet they preferred coming here to staying in England? Yes; they thought things might turn out better, perhaps—that things might improve.

899. And as a further proof of their anxiety to come out here they represented themselves as farm-labourers? Yes.

900. When in reality they were coal-miners? Yes.

901. Do you know anything about work generally about Newcastle;—is there anything but mining depressed? Yes; all trades are to a greater or less extent depressed; they depend entirely on the coal trade. When that is depressed they are all depressed.

902. Has the Miners' Union done anything to try to induce the miners to go into the interior? Not as an association we have not.

903. Has there not been any desire to find out how the labour market could be relieved at Newcastle—has there been no attempt made by the Society to try to find out how the excess of miners could be relieved? No, I do not know of any steps being taken. I may say that during the distress about fifty men from the colliery I am working at left to go to different parts, and within a few weeks their places were filled up by new hands.

904. Is that the reason why the men hang on, though they do so badly, the fear that if they go away their places will be filled by other workmen? No; the reason they do not go away is that they do not know where to go.

905. Has the Society, acting on behalf of the miners, endeavoured to find out what part of the Colony they might go to with advantage to themselves? Not as an association. The reports that men bring back, after being away some considerable time, are that there is no employment to be obtained.

906. How do you account for the great difference in the demand for coal—for the falling off of the coal business? There are various causes. Perhaps I am not so well up as to give a definite answer.

907. Has the price of coal had anything to do with it? It may have had.

908. Do you think irregularity in getting supplies, caused by strikes and other such causes, has been the cause of sending the trade to other ports? There have been no strikes lately.

909. Have there not been interruptions in getting supplies of coal for ships that come there? Not that I know of.

910. Have you not heard it reported? No, not that ships could not obtain coal; and I think I would be very likely to know.

911. You said there were no strikes—Was there not a time when there was a long strike, and nearly all the coal held in reserve was exhausted? That was in 1872. We have had no general strike since 1872.

912. Was there not a strike in 1878 or 1879, when almost all the coal was exhausted that was held in reserve? No, there has been no strike since January, 1873, with the exception of the strike at Anvil Creek, where they employed about thirty men, and a strike at Lambton for about a fortnight last August.

913. I remember myself being told, by steam-boat proprietors I think, that owing to a strike at Newcastle their stock of coal was nearly exhausted, and that the steamships would have to be stopped unless the men went to work;—was that true? No, it was not. There was no strike except those I have named since 1873.

914. Was there no scarcity? No, not at all. The Lambton Colliery was idle for about a fortnight.

915. Was that caused by a strike? Yes; but there was no general strike.

916. Was that strike not sufficient to cause a scarcity of coal? No; one-half of the collieries were idle a great part of their time at the same time those men were idle.

917. Would not that make the supply still more scarce? No, they were idle for want of trade; there was no work for them to do. Does not the return I have given of the number of days work in a fortnight for 1879 speak for itself?

918. You think strikes and interruptions in the supply were not the cause of the trade leaving the district? No, there was no interruption of the supply at all—no interruption whatever.

919. *Mr. Jacob.*] The miners who sent for their relations and friends from home nominated them in this Colony? Yes.

920. And represented them as being other than miners? Yes.

921. Then the authorities at home were not blamable for allowing them to ship as labourers—they would not know they were miners? No.

922. You said there was an indisposition on the part of miners to undertake other work? No, I do not know that I said that; I said they became attached to their work, and unwilling to leave it as long as there was work for them to do; but they would take any work they could obtain if they could not get employment in their own trade.

923. They have gone up north to get work, and are as capable to work as navvies as they are as miners? Yes.

924. You state that the depression has been owing to surplus labour? Yes.

925. Chargeable to those sent for by their friends under the Government system of immigration? Yes.

926. Do these men supplant the older hands? No, they do not.

927. They come there and remain idle? No, they take a share of the loaf—a share of the work that is going.

928. Do they work for less or for not so many days? No, they have the same wages as the others.

929. Then they are absorbed? No, not exactly. Through there being so much surplus labour each man has less work to do. This is where we have a difficulty to make outsiders understand mining matters. The thing works in this way: Say there is a certain amount of trade, which sixty men are capable of supplying; perhaps next week seventy men are put on, with no additional trade to supply; and then the same amount of work has to be shared among the seventy as among the sixty; consequently each man gets less pay; instead of being divided amongst the sixty it is divided amongst the seventy. The same amount of work is done for the same amount of money, but in less time, and the pay being divided among a larger number there is a reduction in the receipts of all. The new arrivals do not get less pay than the others.

Mr.
W. Davies.
29 April, 1880.

930. You have stated that because of some interviews with Sir John Robertson and Mr. Fitzpatrick, a stop was put to sending out miners from home? Yes, as coal-miners.

931. How could that be done if miners have been sent for by their friends—how has a stop been put to it? A stop has not been put to the sending out of labourers, and miners now come out as labourers.

932. You say less miners have come out as a result of these interviews? No, I say a promise had been given to us that they should not be sent out under the head of coal-miners, and therefore they have now to come out under the head of agricultural labourers, or other designations.

933. Then, being miners, they do still come under other designations? Yes. I know that on board the "Northbrook" there were twenty or thirty coal-miners; I would say within bounds there were thirty.

934. Do you blame the Agent General or the emigration officers at home for this? I have gone on board immigrant ships to inquire for coal-miners, and I discovered that it was sometime before they would acknowledge themselves as coal-miners, though I was sure from the marks on their hands and faces that they were so. I have gone up to them and said, "Are you not a coal-miner?" and they have said "No;" and then afterwards, when I got a little bit more acquainted with them, I was told that the reason why they did not like to acknowledge themselves as coal-miners was that they had come out as farm labourers; they had gone to the Emigration Agent at Home, and were told they would not be taken as coal-miners; but it was said, "Can you do nothing else; can you not use a pick and shovel, or do farm work, and then they could come out as labourers?"

935. Though to the knowledge of the agent they were coal-miners? Yes.

936. And when they come out do they come to the coal-mines? Yes, they come where their friends are.

937. I suppose their real position is not always known to the agent. Do you think they could be detected as being miners by the authorities at Home? Yes, undoubtedly by anyone who had lived in a colliery district, by the marks on their faces and hands; and there is a freshness in the appearance of a farm labourer that is not seen in a miner.

938. *Mr. Barbour.*] An experienced miner would be able to tell whether a workman was a miner or not? Yes, anyone living in a colliery district.

939. If a man had been a coal-miner, and then for the last ten years a farmer, could you tell then that he had been a miner? No, I could not. If you were to put a hundred miners and a hundred free selectors together you would soon see the difference.

940. *Mr. Cameron.*] You said in answer to the Chairman that the average rate of wages the miners could earn was about 10s.? That was about the average they have earned.

941. I would like this to be thoroughly understood;—do you mean 10s. for every day they work, or 10s. a day on an average? 10s. for each day they work. Of course I do not mean that they earn £3 a week at 10s. a day, but when they work say two days a week they earn £1.

942. The 10s. merely applies to those days when they work? Yes. Do not misunderstand me. That was the rate they earned when the price for cutting coal was 5s. a ton. Of course I do not take one colliery only; at some collieries they may earn more, where less men are employed; but I take an average, all the pits through.

943. Which colliery employs the largest number of hands in your district? The A. A. Company.

944. Next to that? The Lambton Company, I think. I have here a list of the number of hands employed by each colliery, taken from the last mining reports:—

	Number of men employed,—		Total.
	Above ground.	Below ground.	
A. A. Co.	105	696	801
Waratah Co.... ..	52	196	248
Wallsend Co.	103	490	598
Co-operative Co.	66	384	450
Lambton Co.... ..	36	400	436
New Lambton Co.	40	256	296
Duckenfield } Minmi {	60	186	246
Brown's }	25	166	191
Newcastle Co.	25	239	264
Ferndale Co.... ..	19	133	152
Greta Co.	94	155	249
Total			3,931

945. Could you give the Committee any idea how many days per week on the average the coal-miners have worked during the last six months? I have given that—a fraction over five and three-quarter days per fortnight for the whole year 1879. I may say it is less than that this year, so far as we have gone. The number of days worked by the various collieries during 1879 has been:—A. A. Company, 174½ days; Wallsend, 149½ days; Ferndale, 139½ days; Glebe, 120 days; Greta, 112 days; Minmi, 140 days; New Lambton, from 23rd December, 1878, to 23rd December, 1879, 173¼ days.

946. With reference to the miners who came out as agricultural labourers—had you any knowledge of mining in the mother country? Yes, I was brought up as a miner.

947. Is it a fact that coal-miners in certain districts work part of the year as agricultural labourers in addition to being miners? In some of the very small collieries they do. In the Forest of Dean I know that some of them do farm during part of the year, and they may go into the pit during the winter.

948. Do you think that state of affairs to any extent represents the average coal-mines of England? Not at all.

949. It is merely in exceptional cases? Yes. I may say that in the large mining centres of England, such as the North and South Wales, there are no farms at all about the mines to employ the men.

Mr.
W. Davies.
29 April, 1880.

950. You said to the Chairman that some of the miners here had sent for their friends, owing to the very depressed state of things amongst the coal-miners of England during the last two years? A good number have.

951. Do you find any unwillingness amongst them to accept employment elsewhere in other lines? I do not.

952. Does your experience lead you to believe they would take other work if they could get it? Yes.

953. Do you recollect that, a year or two ago, one of your district officers, in conjunction with myself and Mr. Sweet, of Newcastle, waited upon Mr. Watkins, the railway contractor, with a view to getting employment on the railway works for miners for whom there was not sufficient employment at the coal-mines? Yes.

954. Did any number of them go seeking work on the railway? Yes.

955. What sort of reception did they meet with—did they obtain employment? They did not.

956. Did they stop such a time as they might expect to get employment? They stopped as long as their funds allowed it.

957. Mr. Barbour asked you whether they could not earn better wages on the railway contracts than they were doing at the collieries; do you think that if inducements were offered to these men they would go now to work on the railways? Yes, if they were *bonâ fide* offers.

958. Did you hear any complaints from the men who went to Mr. Watkins's contracts as to the prevalence of the truck system? Yes, I did. What the men complained of most was that tools were not supplied as they expected; they had to purchase barrows, shovels, and planks, without which they could not go to work, and they could not get them; they also complained—those few that did stop—that they had to take slops instead of cash for their work.

959. Did you hear anything at that time about certain persons having the right to sell food to the men on the line? Yes.

960. They were compelled to take out the result of their labour from the storekeepers? Yes.

961. Did you hear this in many instances? Yes.

962. Did you ever meet men in your district, who having been at work as railway navvies, came looking for work as coal-miners? Yes.

963. Among the collieries at Newcastle there are, I understand, certain of them associated and certain non-associated collieries? Yes.

964. How many collieries are there associated? Five now.

965. These associated collieries are at the present time not working? They are not.

966. The non-associated collieries are working? Yes.

967. Is it true, as has been alleged through certain sections of the Press, that these non-associated collieries can supply the whole trade, if the associated collieries do not work at all? They can supply the whole trade.

968. What are the rates of wages now in the non-associated collieries? 4s. and 4s. 6d. per ton.

969. Then so far as the present strike among the associated collieries is concerned, people who want coal will not suffer inconvenience? None at all.

970. Mr. Barbour.] Referring again to these men who went up to the railways to seek for work—you said they could not accept the terms of the contractors? I did not say so.

971. I will put it in another way: You said that the reason why they did not stop to work was because they were made to buy their barrows and shovels, and they could not do that, and therefore they could not commence to do the work? Yes.

972. Were these terms which were submitted by the contractors to these coal-miners different from what the workmen on the works were subject to? Yes, they were different.

973. Then the navvies that were regularly employed on the work were not made to buy their barrows and shovels? No, they were not. I may say, in explanation, that a promise had been made, I think, that these things should be supplied when they got on to the work. We made an offer to supply 500 men anywhere where they could find employment for them, and the men found there were not tools on the work for them. The old hands had their tools found, but the new hands had to purchase what they required to start them.

974. Mr. Cameron.] Is it a fact that more men went than could be employed? Yes, considerably more than could be employed.

975. Mr. Barbour.] The reason was the want of tools? There were other reasons besides that.

976. Mr. Cameron.] If they had all had tools, more men went than could be employed? Yes, they would not have come back to starvation if they could have been employed.

977. Mr. Barbour.] You have given certain numbers of miners that are employed at certain mines;—are those the numbers that are employed now? Those figures are taken from the last mining report.

978. What date does that refer to? The number of men I have given is for 1879.

979. Do I understand you to mean that all these men were in full work? No; I have just put in a statement that they were working only so many days a fortnight.

980. I asked was I to understand that the numbers you have given were men in full work? Not at all.

981. Then there was another matter. You said there was great misunderstanding about in the public mind, that was as to the share of the loaf—I do not understand it yet? We will say there are £60 of wages to be earned, and sixty men are earning it, that will be £1 a man; but if seventy men are put on to earn the £60, it will be so much less to each.

982. Mr. Cameron.] What you mean is that the men in work will employ their fellow-men rather than see them starving? Yes.

983. Mr. Barbour.] Who puts on these extra men? The manager.

984. Why does he put on 70 men when there is only 60 men's work to do? That is what we cannot understand.

985. If you had a certain amount of work you wanted a workman to do, and no more than one man could do, would you put on two men to do it? No, I would not.

986. Is that done in the coal-pits? Yes.

987. Is it because they are asked to do it? Yes; it is because men come seeking employment.

988. Supposing there was work for 50 miners, and 100 men came asking employment, would the 100 men be put on? It has been done, and is done now.

989. Mr. Cameron.] The 100 men would work half-time? Yes.

990.

990. *Chairman.*] After all it is piece-work—the employer pays by the piece? Yes, it is no loss to the employer.

991. *Mr. Barbour.*] Supposing fifty men only were employed to do the work during a fortnight, if 100 men were employed the pit would work only one week? No, it would work just the same. There must be some misunderstanding between you and me.

992. I want you to explain this: Supposing there are fifty miners to do certain work, and it requires that they should work two weeks in the fortnight, but 100 miners are put on, is the work then done in a week and the pit left idle the other week? It is this way. Let me put it my own way: Say the A. A. Company has two ships, and they are going to take 700 tons each, instead of spreading that over four days, at 350 tons each day, they would do it in two days; they would draw out 700 tons each day.

993. Then it keeps the pit working half the time if there are double the quantity of miners; the pit is idle the other week? Yes, the pit lies idle then; they work two days in the fortnight instead of four.

994. Is the object of employing double the number of workmen to save money to the owner of the mine by working half the time? No doubt it saves time.

995. Is that course adopted by the owners of the mines of their own will, or is it adopted at the suggestion of the miners? Of their own accord. The miners have on more than one occasion asked the masters not to employ any more labour till those they have already employed get seven days in a fortnight.

996. You said the wages a miner earned were 10s. a day—I suppose that is if he puts out 2 tons of coal? Yes, 2 tons at 5s.; that was the price in 1879.

997. If he puts out 3 tons of coal? He gets 15s.

998. Are there any rules of the Society which limit him to 2 tons? Not at all.

999. Can he put out as much as he likes? He can put out his turn. Say there are six working places, each one takes his turn, the man with the waggon turns into each man in his turn; if a man's skip is not full he loses his turn; but as long as he can fill it he can do as much as the others.

1000. But he cannot do more—he must keep his turn? He must keep his turn.

1001. Do I understand that each one of the whole six has to do the same amount of work? Yes, because the waggons only come round at certain intervals. I know it is alleged against us that we prevent men earning what they can, but it is not the case.

1002. *Mr. Cameron.*] As a matter of fact does the Coal-miners' Association restrict any man from producing as much as he can? It does not.

1003. From every coal-pit there is a line laid down on which trucks or skips are run into each man's working place, and if a man is behind-hand the skips cannot wait for him, so that it is to every man's interest to produce as much as he can, in order not to lose his turn? Yes.

Mr. John Dixon, called in and examined:—

1004. *Chairman.*] You are secretary to the Miners' Association of the county of Northumberland? Yes. *Mr. J. Dixon.*

1005. How long have you held that position? Three years and seven months.

1006. How long have you resided in the district? I have been 23 years in the district.

1007. Have you been all the time a miner? Yes; all my life, since I was 11 years of age.

1008. *Mr. Cameron.*] Were you set to work as young as that? Yes.

1009. *Chairman.*] Have you any personal knowledge of any persons in your district, now working as miners, who arrived here in 1878 and 1879 as assisted immigrants? I have.

1010. Do you know it of your own knowledge? I do.

1011. Do you know whether they arrived under the designation of coal-miners? They came under the designation of some other occupation, not as coal-miners.

1012. Do you know in what year they came? In 1878, and the commencement of 1879, especially.

1013. Have you any knowledge of the return by the Agent for Immigration showing the number of miners brought out in 1877, 1878, and 1879. The numbers are stated to have been 337 in 1877; 114 in 1878; and 33 in 1879. Are you sure the miners you speak of did not come out as miners? I am sure by what they told me themselves.

1014. *Mr. Cameron.*] Were you ever coal-mining in the mother country? Yes.

1015. How old were you when you left there? Fourteen; I did not have much of an experience.

1016. You would not know what the practice was in other parts of England? No.

1017. Do you think that if inducements were offered to miners in your district to work at anything else they would take it? They would jump at the chance to-morrow.

1018. Are there a good many single men among them? Yes.

1019. Suppose some of these single men were offered positions as farm labourers at £30 or £40 a year, and rations, do you think they would go? Yes.

1020. Any considerable number? I could not say for any considerable number; I might say for perhaps fifty or sixty.

1021. Suppose any squatter in the country is prepared to give the wages I have named, do you think there would be any difficulty in his being supplied with labour from your district? I do not think so.

1022. Do you think you could find the men in three or four days? I do.

1023. If any railway contractor wants men do you think he could be supplied? Yes.

1024. How many men could you send to a railway contractor at the present time? If anything like a reasonable wage were offered 500 men could now be got in our district before this week is out. That is my firm conviction.

1025. What would they work for—8s. a day at the railways? They would.

1026. Do you know what generally are the wages of a navvy? It depends on how he is put on. There is so much contracting and sub-contracting that a man is screwed down sometimes till he scarcely knows what he is going to get;* but 8s. a day I reckon a good day's wage for a good man.

1027. A year or two back do you recollect going with me and Mr. Sweet, of Newcastle, to Mr. Watkins, the railway contractor? I do.

1028. Mr. Watkins was then constructing the line from Werris Creek to Gunnedah? Yes.

1029. He offered to take on a certain number of men? Yes.

1030. Could you give the Committee any idea how many men availed themselves of Mr. Watkins' offer? I can say of my own knowledge about thirty went up to spy out the promised land. 1031.

* Revised:—But for 8s. a day I reckon good men could be got.

- Mr. J. Dixon. 1031. What you mean to convey is that these thirty men went to see what it was like in order to let their fellow workmen know? Yes; just so.
- 29 April, 1880. 1032. What was their report? The report of those that came back—and I could name some of them that came back blind.
1033. That would be no fault of Mr. Watkins? No; it was like this: Going out of a pit where a man is not used to the sun, on to that clay in hot weather, they got disease of the eyes, and some of them are suffering now.
1034. I am not so much concerned in finding out the effects of the trip as whether they found employment? They did not—not according to the promise given to us by Mr. Watkins.
1035. As a matter of fact, did any men go from your district to Mr. Watkins' contract and find themselves unable to obtain any employment at all? They did.
1036. Did you ever come across railway navvies who, being out of employment themselves, came to the Northumberland coal district looking for work as coal-miners? Yes.
1037. Does it frequently occur? I have not seen them lately, but during the last year I know of several instances.
1038. Do you ever hear any complaints from people who have come out here by immigrant vessels, of having been deceived by false representations in the mother country? Bitter complaints.
1039. Do they at any time throw the blame on any particular person—do you hear any name mentioned as that of the person who has deceived them? I cannot say I do; they only complain of the emigration agents.
1040. Have you seen any immigrants who have been sent from Sydney up country as farm labourers;—have you seen them as they passed through your district or come back? I cannot say for farm labourers.
1041. Anything else? Yes, I am well acquainted with some in our district at the present time, who were sent up to Orange from here, and promised constant work, but how they got to Newcastle they scarcely knew themselves. There was no work for them when they got there, and after various wanderings they found themselves in the coally regions after all; they scabbled or begged their way somehow.
1042. I am alluding more particularly to the Northern districts—Murrurundi, Tamworth, and so on—have you seen immigrants who have been sent there? I have.
1043. Have you at any time heard complaints made by those who have gone up there, relative to the difficulty of finding employment? I have.
1044. Can you mention any specific case that came under your more immediate observation? Not through having conversed with any one on it, but by letters; I have had letters sent me during the past year by men I knew well, stating that there were scores of men up the line waiting for a chance to get work, and amongst these scores were some recently arrived in the country; they could not get a day's work, though they were anxious to take anything they could lay their hands on.
1045. There is considerable distress in your district just now, is there not? There is.
1046. Is it true that some men have worked as little as 27 days in so many weeks? It is.
1047. There is a disagreement just now, is there not, between the colliers and the Associated Masters? Yes.
1048. Before this disagreement was it as bad then? The work?
1049. Yes? Yes.
1050. Then the present disagreement has but little to do with the existing distress? It can have nothing to do with it yet; the disagreement is of only three days duration, and the probabilities are that the collieries would not have worked above half a day out of the three if there had been no disagreement.
1051. The non-associated collieries are still working? Yes.
1052. Are they sufficient just now to supply the demand? Yes, amply sufficient.
1053. Then, as a matter of fact there are too many men in the district? Yes.
1054. *Mr. Barbour.*] How many of these men went up to look at the railway works? About thirty.
1055. How many returned? I saw three of them coming down in the train. I came down with them one night.
1056. The three men that had the bad eyes? Yes.
1057. Three out of thirty? Yes.
1058. Were the others put to work? The others got scattered abroad. They travelled their way round, and got work where they could. They found their way home again to the district.
1059. Their finding their way back to the coal-pits would be an indication that they were fonder of that kind of work than of any other? No, no indication whatever.
1060. *Mr. Jacob.*] It might be because they could not get work? It was simply because they could not get work, and they came down amongst their friends, where they were sure of getting a share of the loaf that was going instead of starving.
1061. *Mr. Barbour.*] That was not a very large proportion—three out of thirty? Those men had the blight, and it showed determination on the part of the men to go up there to try and get something to do in preference to remaining in Newcastle.
1062. You said the coal-miners would accept 8s. a day at navy's work;—would they accept less than 8s.? There are coal-miners now—good men—napping slag that comes from the copper works, all along the road, wherever the Government has let the road to be made. I can go and pick miners out—good men—napping away from early morn to late at night, and earning perhaps 6s. a day.
1063. Then they would take less than 8s. if they could get the work? Yes.
1064. Are you aware that a large number of the miners that came out last year were nominated by their friends who were miners at Newcastle? I have every reason to think so by reports I have heard.
1065. And owing to representations from the miners' societies to the Government the immigration of miners having been stopped, do you know whether their friends nominated them as farm labourers? I could not say.
1066. Had they been nominated as miners, would they have been sent? I do not think they would. I give the Government credit for having kept their word to us that no more miners should be sent.
1067. *Mr. Jacob.*] We have been told that an experienced miner, or a person who has been accustomed to see miners, could detect a miner from other people? Yes, that is quite true.
1068. Could an ordinary emigration agent be capable of doing that? No, I do not think so, unless he had been brought up amongst coal-miners.

1069. Then you would hardly blame the agent at home for allowing them to come out under other designations? I would not; but I blame the agent for sending them out when, on their own confession, he knew they were miners. For instance, a man would go to the agent and say, "I want to go out to New South Wales." "Well, what are you?"—"A coal-miner"—and the agent would return the papers and tell him to put on farm labourer. Mr. J. Dixon.
29 April, 1880.

1070. Have you known people who have come out in that way? I have. The Government agent told them to put on anything but coal-miners; I know people who have told me that has been done with them.

1071. *Mr. Cameron.*] Is there a strong feeling against assisted immigration in the district where you reside? Yes, throughout the district, from one end to the other.

1072. Do the miners, as a body, complain that they have suffered through immigration? Yes, they do.

1073. *Chairman.*] I presume the miners would not object to the continuance of immigration of the really farming class, which does not in any degree interfere with their own pursuits? Well, the miners look at it in a broad light; they cannot see room for immigrants of any class in the way they are brought out, for eventually it tells on any class of people when the country is flooded with labour; it is bound to; if men do not get work at one thing they must turn to another.

1074. Do you think it is a broad view to say new hands are not required? I cannot see how it can be otherwise when men are out of work in other pursuits besides coal-mining.

1075. In your district? Yes.

1076. Have you lived anywhere besides in Northumberland? Yes, I have lived in the Hartley district, and in the Fitzroy district.

1077. You have always been confined to mining districts? Yes.

1078. *Mr. Jacob.*] Your objection would apply to all immigration assisted at the public expense? Yes.

TUESDAY, 4 MAY, 1880.

Present:—

MR. CHARLES,

|
MR. JACOB.

MR. DAY,

J. F. BURNS, ESQ., IN THE CHAIR.

John Young, Esq., examined:—

1079. *Chairman.*] I believe you are an old colonist? Yes.

1080. You have, I think, been a resident of Sydney for many years, though you previously resided in Melbourne and Hobart Town? I have been in Australia five and twenty years.

1081. And you have carried out contracts for important buildings in the Colonies of Victoria, Tasmania, New Zealand, and New South Wales? Yes.

1082. I believe you were the contractor for the Exhibition Building at the Prince Alfred Park, the General Post Office, and the Lands Office, and that you superintended the building for the Sydney International Exhibition, known as the Garden Palace? Yes.

1083. You have consequently had extensive transactions with architects and other professional gentlemen, and have been a large employer of stonemasons, carpenters, and others in the building trades? In all the skilled trades nearly.

1084. I think you are a Director of the Operative Building Society, of the Annandale Freehold and Investment Company, and also of the Civil Service Building Society? Yes.

1085. Would you then be good enough to tell the Committee your opinion of the state of the building trade in this Colony at the present time, more particularly in the city of Sydney, stating first the prevailing rate of wages in each line, and next what relation the supply of hands bears to the demand? The present state of the building trade is very fair, neither excessively brisk nor yet dull—about medium.

1086. Are there many hands out of employment at the present time in Sydney? Not a great many.

1087. Do you suppose that there are as many as 200 or 300 masons out of employment. If that has been stated do you think it is the fact? It is not true.

1088. Do you suppose that at any time during the last twelve months so many as 200 masons could not find employment in Sydney? No; I should say such a statement was quite wrong.

1089. Have many masons at any time during that period been seeking for employment, and been unable to obtain it? A few have been, but I should say the buildings about to be commenced and in hand will absorb all the masons to be obtained, and I would say that had I to carry out the extension of the Post Office I believe I should have greater difficulty in getting really good masons now than I had at the time I erected the original building. This work alone will require from 150 to 200 men, and it will be hard to find men to carry out the good work required upon it.

1090. You think there is a scarcity of good masons at the present time as compared with the time when you took the contract for building the Post Office? I think there was a much better class of masons then than now, although there are still some good tradesmen among them. But I speak of them as a class.

1091. What has become of these good workmen? They are either dead, have left the Colony, or have gone from the business. I speak from experience, and I know we cannot get men to do the work as they did formerly.

1092. In other branches of the building trade, for instance among carpenters, painters, and others, is there a fair demand? A very fair demand.

1093. Do you think mechanics in these and other trades, if they are good workmen, need wait long for employment? No, if there is any distress among mechanics I think, as a rule, it is in consequence of their being inferior workmen.

1094. It has been stated to the Committee that New South Wales has, during the last eighteen months, been indebted to the other colonies for a large number of mechanics who came on their own account;—has that been your experience in the building trades? Yes, a great number have come from Victoria, New Zealand, Queensland, and Tasmania.

1095. How do you account for this voluntary immigration? Because of the additional work that has been doing here during the last year.

J. Young,
Esq.

4 May, 1880.

- J. Young,
Esq.,
4 May, 1880.
1096. Have you observed any reflux of this tide of immigration? Some of those who came here have returned.
1097. Have many returned? I should think about one-third. The rest have settled down in New South Wales.
1098. You think they have found employment? Yes, they have fallen into something suited to them.
1099. I presume that the new Lands Office and the Garden Palace were your latest works in this Colony? Yes.
1100. Were many of those you employed in connection with these buildings persons who had come from other colonies? I employed a very large number, and some no doubt came from other colonies. I could not say how many.
1101. Must not the demand for skilled labour have been greater here than in those other colonies to have induced this voluntary immigration? Certainly.
1102. What is your opinion of the financial condition of the industrial classes of this city? I think it is very comfortable; and I wish to say with respect to the working classes of Sydney that they are much more sober and steady than the same class in England. I do not think they drink so much.
1103. Do you think the cost of living here is greater than it is in England? With the exception of house rent I think it cheaper.
1104. Would your experience as a director of various building societies lead you to the conclusion that the working classes are frugal, and able to meet their engagements for advances for building from those societies? Yes, in fact there are very few defaulters in any of the societies with which I am connected.
1105. I suppose you are aware that a large portion of suburban property is owned by what may be called the industrial classes? Yes. I think the great majority are careful and saving.
1106. You are no doubt aware that the building societies and banks have, during the present year, reduced the rate of interest upon deposits? Yes. I may say in reference to one of the societies to which I belong that there is a large increase in the number of applicants for advances in consequence of the change in the money market.
1107. Then there is greater liberality shown by the building societies in making advances in consequence of the greater supply of capital? Yes.
1108. Is there much building now proceeding in the city and suburbs? A considerable amount of suburban property is now being erected. As a proof of this I may mention that, although at the time the Exhibition building was going on, when sometimes 50,000 or 60,000 bricks were laid in a day, the price of bricks delivered was only £2 10s. a thousand—the price now is £3.
1109. *Mr. Charles.*] With new brickworks in operation? Yes. This too at a time when the weather is fine for making bricks.
1110. *Chairman.*] Your private residence is at Annandale? Yes.
1111. Are there any empty houses there? No; there are not a great many upon the estate.
1112. Have you observed any signs of over-building in the suburbs? No, and for many years I think Sydney has had scarcely sufficient buildings for the demand.
1113. You think then there is not a probability of over-building? No, not for many years to come.
1114. Have you at any time employed any assisted immigrants? Yes, frequently.
1115. Shortly after their arrival? Yes.
1116. Have you known these immigrants to compete unduly with other persons who have preceded them here in the city? No, I think it has been quite the reverse; people who come here require to reside here some time to get Colonial experience before they can compete with older residents.
1117. Do you find notwithstanding their want of Colonial experience that they look for as good wages as those who have been here before them? Precisely the same.
1118. As a matter of business I suppose you prefer persons who have had some experience in the country to new hands? Yes, that is natural; still I have found some good tradesmen among the new arrivals.
1119. Have you ever known any assisted immigrants to loiter in and about the city instead of looking for employment? No doubt some of those who come out do loiter about the city; they are not always the best fitted for the Colony who are selected.
1120. Have you met with many who did not seem fitted for the Colony? No, very few; still there must be some.
1121. Do you think the requirements of the Colony with reference to skilled labour would be sufficiently met if assisted immigration were to be discontinued? No, while work is at all brisk or in its usual state. Of course if work were very dull less men would be required; but that is not the case at the present time nor has it been for a good while.
1122. Do you not think the seasons with which the Colony has been favoured, the high price of wool in the English market, the ease with which the New South Wales loans are floated on low terms in London, and the public works projected on Governmental and private account, afford a good outlook for the industrial classes of the community? Yes, I do think so, undoubtedly.
1123. *Mr. Day.*] I suppose you understand the regulations under which assisted immigration to this Colony is conducted? I believe I do; a certain amount is paid by persons here to bring out their friends, that is the usual rule.
1124. Do you think from your experience in the building trades that there is profitable employment in this Colony for immigrants at the present time? I think a certain number can be absorbed with benefit to the Colony.
1125. Supposing we were to have a ship-load of 300 or 400 a month, do you think that would be too much? No, not if they were properly selected.
1126. If we were to have ship-loads of from 300 to 400 once a month, of different trades, you do not think that would be too many to find profitable employment in the Colony? No; but if men are badly selected in the first instance, that is to say, if they know nothing in England, when they come out here they know nothing more. Such men must learn, and will have a difficulty in falling into their proper places. I do not think it desirable that we should have clerks or people of that description sent out here; I think there are quite enough of them here already.
1127. I think I understood you to say that you knew artisans to be out of employ, such as masons and carpenters? I have known them sometimes to be out of employ. There are always some men out of employ; inferior hands for instance are refused if you can get better ones.
1128. Have you known the same parties to be out of employment for a length of time together? Not very long; I think it is generally their own fault if they are very long out of employment. 1129.

1129. You have had I suppose more experience than any man in Sydney in the building trade;—will you have the goodness to state what rate of wages you pay to masons and carpenters? The average rate for carpenters is 10s., sometimes we pay 9s., but very seldom. The rate is 10s. a day for eight hours. For masons it was formerly the same, but when I was doing the Lands Office they struck for 11s., and they have continued at that rate since.

J. Young,
Esq.,
4 May, 1880.

1130. Does that rate of wages apply to masons, carpenters, painters, bricklayers, and plasterers? Bricklayers get 12s. a day, of eight hours, plasterers according to quality—10s., 11s., and 12s.

1131. That is the rate you have been paying for a long time? Yes.

1132. You never employ tradesmen at lower rates than those you have named? No.

1133. What rate do you pay to labourers? What are termed pick and shovel men get 6s., 7s., and 8s. a day, according to quality.

1134. How many hours do they work? Eight hours. Bricklayers and plasterers' labourers get 9s. and 10s. a day for eight hours work; painters get 9s. a day as an average; plumbers get from 10s. to 12s., according to quality.

1135. *Mr. Charles.*] You have stated that you knew in some of the building societies with which you were connected that there were large sums of money available for carrying out buildings? Yes.

1136. Is that capital or any part of it the accumulated savings of the working class? Yes; it is their money.

1137. You say that there are some men generally out of employment;—do you believe that industrious men, good tradesmen, could find employment within a reasonable time? Yes; good tradesmen could.

1138. And that it is from other causes than scarcity of work that these men are out of employment? Yes, various causes; some men may not like to take work far from home, others may be given to drink, or may be known as inferior workmen. Masters do not care to employ men who are inferior, unless they are compelled to do so; good men soon become known, and are naturally preferred.

1139. If the building trade continues to be carried on as briskly as it has been during the last two or three years will a steady supply of good tradesmen be needed to maintain the supply, or would the demand be met by apprentices in the usual way? I do not think the apprentices here are sufficient to make up the deficiency.

1140. Therefore you think a steady influx of a moderate number of good tradesmen will be required? Yes. There seems a little disinclination among Colonial youths to apply themselves to handicraft; they seem to lack the application necessary to make them good tradesmen; of course there are exceptions to that rule, for I have some apprentices of my own who are as good as any tradesmen in the world; but I am speaking generally, and I think it would be better both for themselves and for the Colony if more of our Colonial youth would learn trades, and become good tradesmen, but they seem to prefer something lighter, and have not the plodding application necessary to success.

1141. Is there a sufficient supply of female domestic servants in the Colony, or is it necessary that we should import them? There can be no doubt that female domestics are greatly required here, but there again the difficulty I have alluded to with regard to our youths come in; young girls instead of devoting themselves to house or domestic duties take to sewing, or to other employment which they think more genteel. It would be better for them, as well as for the Colony, if they would learn to perform domestic work.

1142. *Chairman.*] Have you observed that for any kind of light employment there is always a large supply in excess of the demand? Yes, for all light employment.

1143. For porters? Yes, or watchmen. I had a hundred applications for the situation of a watchman.

1144. There will always be a large floating population looking out for employment of a light character as porters, doorkeepers, and so on? Any kind of light work where no skill is required, we can get any number of such persons. As an instance of the great number of certain classes that require employment I may mention that at the Town Hall the other day there were five clerks required, and for these situations we had over 500 applications. The highest remuneration offered was £300 for audit clerk, for which there were seventy-nine applications; for a situation of £200 a year we had 179; for one of £180 a year we had, I think, 160 or 170; and for the other two of £120 a year each, upwards of 150.

1145. It is not then, I infer, desirable to assist any of that class to immigrate? No.

1146. *Mr. Day.*] I understood you to say that there were over 500 applications for these positions at the Town Hall? Yes, the reason I mentioned the number for each is that some applicants applied for two or three, thinking perhaps if they failed to get one they might obtain another.

1147. These were all clerks? Yes.

1148. And they understood no other business? That I do not know; but they all had testimonials as clerks.

1149. I suppose these offices were advertised, and persons were invited to send in applications? Yes, to the City Council.

1150. Suppose you were to take a large contract to-morrow and to call for applications for artisans, say masons, bricklayers, and others in the building trade, how many applicants do you think you would have? I cannot say, for if the work were in town and nearer their own residences than the job on which they were employed they would leave their old work and come to the new.

1151. Do you ever advertise for tradesmen? Very seldom. The men know me so well, and in fact we know how to go about getting all the men we require for any work.

1152. I suppose you have a lot of tradesmen who follow you wherever you go? Yes, if I had a contract 1,000 or 2,000 miles away I could get as many men as I wanted.

1153. They would knock off other work to go to you? Yes, many would in a minute.

1154. *Chairman.*] You generally have large jobs on hand, and that I suppose is one reason why men would prefer going to you, knowing that the work would continue for a long time? Yes, I have a very large staff, and they can depend upon me.

1155. You are clearly of opinion that if Government continue assisted immigration and bring out a proper class such as good masons, carpenters, bricklayers, and plasterers, they can find profitable employment here? Yes, some of the people who are brought here are quite unsuitable; for instance, when I was carrying on the Exhibition building I had application for employment from two Manchester weavers. I did employ these two, but of course they are not the class we require. They cannot earn their wages properly. Still, any self-reliant man who comes to this Colony can do well, no matter what his trade or calling.

1156.

- J. Young, Esq.
4 May, 1880.
1156. If he is willing to adapt himself to any occupation that may offer? Yes, and has a genius for it. He must have the genius and be able to settle down to it. But, unfortunately, there is an outcry against emigration, and it arises in a great measure from the fact that the men who come out and do not succeed are those who have been relying at home upon steady work upon one single thing, going through one little routine in a certain way; and when they come to Australia, circumstances being different, they cannot accommodate themselves to the change.
1157. *Mr. Day.*] Have you had any experience at all in the farming line? Not a great deal.
1158. Do you think the Colony is fully supplied with farm labourers such as ploughmen, horse-drivers, and others? I should think not. I think they are wanted.
1159. You think this class of men and tradesmen could find plenty of employment in this Colony? Yes.
1160. Do you think we could absorb 400 a month if they were sent out? Yes. I think there is an unlimited extent for farming men, if they were self-reliant and would settle down; but they are not generally willing to do that at once.
1161. *Chairman.*] Have you found a general unwillingness on the part of the people you have employed to go into the country? Yes. If a contract were taken at a place like Armidale it might be difficult to get workmen to go there.
1162. They show great reluctance to leave the city? Yes; they would require more wages to go. In fact they do not care about leaving, and the reason in many cases is that the good workmen, who of course are the men we want, are settled in Sydney, and they do not care to go away and leave their wives and families.
1163. *Mr. Charles.*] Do you consider that these persons who applied for offices under the City Corporation were all out of employ, or that a portion of them were in other employment? I should think, judging from the references I read, about one-fourth were out of employment, and the remaining three-fourths were employed, but that they sought to improve their positions.

Mr. Joshua Farr examined:—

- Mr. J. Farr.
4 May, 1880.
1164. *Chairman.*] I believe you have been a resident of the Colony for many years? Twenty-five years.
1165. And that at the present time you are in business as a builder at Redfern? Yes.
1166. How long have you been in business on your own account? About twelve or fourteen years.
1167. On your first arrival in the Colony what kind of employment did you obtain? I took employment as a carpenter and joiner, to which trade I served an apprenticeship at home, in England.
1168. Have you taken any interest in the question of immigration? Only on this side—I have always been an advocate for it.
1169. Can you tell us the present condition of the building trades; you say you have taken an interest in immigration. Will you have the goodness to state why you have taken that interest? Because I have often thought in a young country like this the more people come here the better it will be for those who are. Being about so much among the working classes I hear what is said on both sides of the question; but I take my stand on my own side, and I believe that the increase of population of the right description will be for the benefit of all.
1170. To those who come? That I am quite sure about.
1171. Since your arrival here have you been the means of inducing any of your friends to come out? Soon after I arrived I sent home for my brother, and paid his passage out; he is a bricklayer by trade, and has done very well by coming, even better than myself.
1172. I think you have done very well in your business? I have no cause to complain.
1173. You are what is called a prosperous man? Yes, I think so.
1174. Has your brother done as well as yourself? Yes.
1175. How long has he been here? About twenty-two years.
1176. May I ask you whether, when you embarked in business on your own account, you had much capital of your own? Perhaps £200 or £300—scarcely that.
1177. Which you had made here by your own labour? Yes; when I came here I had nothing.
1178. Do you know whether at the present time there are many persons in the building trade unable to obtain employment? From what I hear there are a pretty good number, but I can hardly say whether that is true. If you wish me to state my own opinion I will do so, and it is this, that in a large city like Sydney there will always be a number of men out of employment; and we can hardly wonder at it, when we know that a good tradesman can do as much in one day as some of these people who are wandering about will do in two. Some of these are good tradesmen but slow, and an employer will only give them work to suit his own convenience, and when he cannot get others. The consequence is that there are a good many of this sort of men in and out of employment; and there are some who keep in work just long enough to earn a little money, and then remain for some time unemployed.
1179. You think there are many of this sort about Sydney? Yes, I know many myself.
1180. You think that these men, although good workmen, are slow, and therefore have a difficulty in getting continuous employment? Yes, that is exactly what I mean.
1181. Do you think that at any one time these are long out of employment? No, not for any length of time.
1182. *Mr. Jacob.*] Do you think they would obtain employment if they were willing to take less wages? They will not take less wages; a bad mechanic expects the same wages as a good one. A good mechanic is honestly better worth 12s. a day than many of those men are worth 7s.
1183. *Mr. Day.*] Still you say these men are good tradesmen? Yes, but they are men who always have pipes in their mouths, will not push on with their work, and all they seem to think of is to get the day's work over.
1184. *Chairman.*] Have you many men now in employment? At the present moment I have about fourteen.
1185. You reside at Redfern? Yes.
1186. You have some property of your own there? Yes.
1187. Do you know of any empty houses in and about Redfern? No, empty houses are almost unknown.
1188. Has it come within your knowledge that in any of the suburbs of Sydney there are many houses to let?

let? At the present time I think there are very few. There may be a few more now than there were twelve months ago, but they are very few. I may state that I am not only the owner of a good bit of property myself, but I am also the agent of a gentleman who is away from the Colony who has considerable property. Mr. J. Farr.
4 May, 1880.

1189. Do you think there is any probability of buildings being erected for residences in the suburbs in excess of the demand? I do not think so.

1190. When you have a house vacant in Redfern do you experience much difficulty in re-letting it? None whatever.

1191. Have you any connection with building societies? No, I have never had any.

1192. If you were told that at the present time there were 300 masons in Sydney unable to obtain employment, would you think that statement reliable? I should think it most unreliable—I should not think it correct. I discharged two masons the other day, having finished the job on which they were employed, and I saw them working the second day after.

1193. Assuming it were said there were 200? I should not think it true.

1194. Do you think many masons have been unable to obtain employment for any length of time? I certainly should think not.

1195. Do you find the cost of living in this Colony any greater than it was in England? No, I think, to speak truthfully, it is not, and I was in England nine months ago.

1196. Did you when you were in England endeavour to induce any of your friends to come to the Colony? Certainly I did.

1197. Of what class were they? I offered to pay the passages of two or three, but they were frightened at the water.

1198. You thought so well of the Colony that you were desirous of inducing friends to come with you? Yes, and I told many persons at home that the best thing they could possibly do was to come out.

1199. Were they principally mechanics? Yes.

1200. And you thought they would be better off here than in England? I am positive of it.

1201. Did you call at the office of the Agent General when you were in England? I did.

1202. Did you make inquiry as to the terms upon which your friends could come out? I know that two or three made application at the emigration office, Park-street, Westminster, and they were told that instructions had been sent from New South Wales to send out no more mechanics. They did not meet with the respect they thought they were entitled to, considering what I had told them, that mechanics were in great demand, which was the case when I left, twelve months ago.

1203. When did you leave here? Last April twelve months.

1204. At what time did you call at the office in London? About last July.

1205. What description of mechanics do you speak of? Good carpenters and joiners.

1206. From your experience as a man of business do you think these men would have been likely to do well here? I should have been glad to have had them in my employ.

1207. Did you while you were in England come in contact with other classes who were desirous of emigrating? Yes, many came to ask me about immigration, and I told them it was an easy matter; but while I was in England a *Sydney Morning Herald* came with a letter in it, written I think by Mr. Cameron, through remarks made by him in the Legislative Assembly, and that set people against emigrating.

1208. Your business is chiefly among artisans and mechanics? Yes.

1209. Is it within your knowledge that during the last eighteen months we have had a large accession to our population by arrivals from the other colonies? I have heard so; but I was away during the greater part of last year. I believe a great number came here during the Exhibition.

1210. Were they not coming for sometime prior to that? Yes, they were coming before that from Melbourne, and as a builder I was glad to see them come, because it enabled us to get some good men.

1211. I presume they would not have come unless they had heard a good report as to the state of business here? The business was very brisk in Sydney, and good mechanics were not obtainable.

1212. Have you heard of many of these tradesmen returning? No, I think most of them have located themselves here.

1213. Have you found an unwillingness on the part of new arrivals to go into country districts? I have. I have had one of my carpenters who came out in the ship with me, who has been working for me ever since I came from England; but some of the passengers returned by the same ship that brought them out, because they could not get employment.

1214. What were they? Weavers and tailors; and I did not wonder that they returned.

1215. Have you met any newly-arrived immigrants loitering about the streets of Sydney unable to obtain employment? I certainly have not.

1216. You have spoken of some men returning to England by the ship which brought them out. You say some of these were tailors, and that they could not obtain employment? I heard this from others—I know positively that some of them did return.

1217. Were there many? No, there might have been three or four.

1218. Out of one ship? Yes.

1219. *Mr. Day.*] What is the rate of wages generally ruling for masons, bricklayers, and carpenters? From 10s. to 11s.—a great number are getting 11s., not less than 10s. I am paying that myself, and to one of my carpenters 11s., and he is worth more than that.

1220. For how many hours? Eight, and not a minute more if they can help it.

1221. And you think there is profitable employment for men at these trades? Yes, for really good mechanics.

1222. You do not think the market is overdone in consequence of assisted immigration? Not for really skilled tradesmen, but there are many who call themselves mechanics who know very little of the trade they profess? At the Exhibition Building there were a number of men at work who had never used a tool before. These got on a little by degrees, and they call themselves carpenters now. This is the class of men I complain of. If you were to put one of them to make a door or window they would only spoil the timber.

1223. Still they call themselves tradesmen? Still they call themselves tradesmen, and it is this that is doing the Colony harm.

1224. From your knowledge of the wants and requirements of this country do you not think we could absorb 300 or 400 immigrants a month, provided they were well selected? That is my firm and honest belief.

1225.

- Mr. J. Farr. 1225. Will you be kind enough to state what class of people would be most likely to succeed here, having regard to their own good and to that of the country? The only class I could recommend would be skilled labour.
- 4 May, 1880. 1226. What do you mean by skilled labour? Carpenters, joiners, masons, bricklayers, plasterers, first-class skilled men not afraid to work.
1227. Then it would be useless to bring needle-makers, weavers, pin-makers, iron-moulders, or persons of that kind? I believe it would be a waste of money.
1228. Have you had any experience in the farming line in this country? Not the slightest.
1229. Have you had any experience as to the wants and requirements of the people of this country with regard to domestic servants? I think the want is very great for good domestic servants; I tried to induce some respectable young females to come out, and told them what an excellent chance there was for them here, but the same thing frightened them as had alarmed the men—the water.
1230. Do you know what is the rate of wages for domestic servants, cooks, housemaids, and laundresses? I should say from 10s. to 14s. a week.
1231. You think there is plenty of employment for them? I am sure gentle people would be too glad to get a good class of servants.
1232. Have you found any difficulty yourself in obtaining domestic servants? If I must be candid my wife would not be troubled with them; she would rather do the work herself.
1233. Have you a large family? Yes.
1234. Does your wife do the whole of the work? No, I have a daughter just about twenty-one.
1235. Then your family is grown up? My youngest child is now six years of age. I have seven in all; and my second eldest daughter and her mother do the whole work.
1236. I suppose during your experience you have heard many persons exclaim against assisted immigration? Yes, I have continually.
1237. What class of people were they? Persons of all classes, even in the building trade.
1238. Labourers and artisans? Yes; they run away with the idea that if immigration continues it will tend to reduce wages, but I have endeavoured to convince them that the more people come here the more work there must be, for every person who comes must be a consumer—he must have a house to live in, in, food to eat, and clothes to cover him. The more people come the better it will be for those who are here, and for the colony at large.
1239. Have you had many applications for employment in your own line of business, when you have had work going on? No, I have not; twelve months ago I could not get men, but for the last three months I have been away from Sydney doing some work for the Honorable Mr. G. H. Cox, at Mulgoa.
1240. Being connected with the building trade if many people had been out of employment they would have been likely to have applied to you? They would have been sure to.
1241. And you have not had many applicants? No; I have been troubled two or three times with a class of men who as soon as they get a few shillings to spend get on the drink, and do not care for work or for anything else.
1242. What prospect is there in this country for a good tradesman, who is sober, and will keep diligently to his work? I consider that there is the same prospect for him as there was for myself. When I came here I had scarcely £1 in my pocket, and I worked at the bench for years and years as hard as any man. I was never particular about its being early or late. After I had been a few years at journey work I thought I might better myself by taking jobs myself. I have done so, and have always endeavoured to give satisfaction, and I have prospered.
1243. And now you are a large employer? Not a very large employer, and I do not intend to be. If you offered me work just now I should decline it, whatever it might be, because I do not want to be bothered with too many men.
1244. I think you said you had fourteen men at work? Yes; I have just now, because I am now doing some work for Mr. Cox at Mulgoa, but as soon as that is done I shall go on in my own quiet way.
1245. What do you mean by your own quiet way? Keeping on only six or seven men.
1246. If you had a number of friends in England—artisans, such as masons, bricklayers, and others in the building trade,—would you strongly advise them to come to the colony? Yes; if they could not get on well at home I should certainly say come.
1247. You think if they came here and were careful and industrious they would be bound to succeed? I have no doubt whatever of it.
1248. Mr. Charles.] You have stated that you have a job in the country; from your observation and knowledge of working men would you say that a number of these could find employment in the country? I have my doubts about it.
1249. Do you not think they are required in the country—upon farms? I could not say much about that; I am not in a position to speak positively upon that point, but I may say that I was at Tamworth about two years ago, when I was asked by a builder there to send him up some good men as he wanted them badly, and could not get them.
1250. You think the cause with most of the tradesmen who are out of employ, and who are complaining, is either that they are bad, or slow workmen, or through drunkenness? That is the cause with many of them.
1251. Probably these three causes combined may account for so many being out of employment? They may, but I do not think drunkenness is so prevalent among tradesmen now as formerly.
1252. Mr. Jacob.] From the general tenor of your evidence I infer that you are in favour of an increase of population of the right description? Yes, certainly, if properly selected.
1253. Have you given any attention to the assisted immigration system, or to the regulations under which people are sent out here? I must candidly confess that I hardly know what the rules are.
1254. Do your remarks apply to those who come out at their own expense, or to those who come out under the system of assisted immigration? I was given to understand that any person desirous of coming here from the old country could do so upon the payment of £2.
1255. You have not given the system of assisted immigration sufficient consideration to enable you to speak as to the desirableness of continuing that system? No.
1256. Do you know if there is a great scarcity of bricks? At the present time there is.
1257. Could others take to the trade of brickmaking. For instance, it has been stated that a number of masons are out of employment;—could they readily adapt themselves to the business of brickmaking? I do not think they could.
- 1258.

Mr. J. C. Glue. 1295. Have you seen many newly-arrived immigrants loitering about Sydney unable to obtain employment? No; perhaps they may come to me and make application three or four times, and then they drift off in some other direction. Perhaps I do not see them again, and could not state whether they get work or not.

1296. *Mr. Cameron.*] I suppose your experience is more confined to people open for hire to go into the country than with people whose more immediate calling lies in the city? Yes, generally it is.

1297. As a rule you say you have no difficulty in supplying any demand made upon you, except in one or two cases? Some of the orders are on terms that are not according to their ideas of what the rate of wages should be; or there may be an objection to the locality.

1298. But you have an unlimited demand for female domestic servants? Yes.

1299. For more than you can supply? Yes, of the right sort. A great many women apply for service whom I would not send from my office.

1300. Do you not think that the employment in factories of various kinds, and at sewing-machines, of females, when they have their evenings and Sundays to themselves, has had a great deal to do with the scarcity of female domestic servants? No doubt it creates a great disinclination to domestic drudgery.

1301. With the natural love of liberty common to women as to men, they desire to have their evenings to themselves? Yes.

1302. With reference to farm labourers, what are the ruling rates for healthy farm labourers—single men? Up to within the last six months—I should say for the last five or six years—they have been equal to £40 a year to hire for the country, with rations.

1303. Have you in any marked manner been brought into communication with the class of persons who have been the recipients of this assisted immigration vote? No.

1304. As far as you, as a man of the world, are able to form an opinion, do you think the class we are importing here is the right class at the present time? Of course in a ship-load of immigrants there are a great variety of people. Some of them I have no doubt are very good men, in this way, that they are of industrious habits and want to push on in the world, and as a matter of course they do get on. They find employment and remain in it until they themselves are able to become employers, or work on their own farms. Others are of a careless kind, who do not care whether they have work or not, and they of course begin to condemn the Colony, that they had no business to be brought here, and that the Colony was not what it had been represented.

1305. I am not speaking so much about the moral character of these people—I will put the question in another way: Do you think the class of people sent out under the present system of assisted immigration, having regard to the nature of their previous avocations, the best suited to make enterprising colonists as a rule? I do not see how the difficulty could be got over.

1306. You admit there is a difficulty then? Yes, I think so.

1307. For instance, the result of your observation and long connection with the labour market would not induce you to bring out a large number of the artisan class in the building and iron trades? No, I think they ought not to be brought out so numerous as the others; I do not think there is the same scope for them. Another reason is that it does not give the rising generation a chance.

1308. At the present time you would not be in favour of bringing out coal-miners? No.

1309. In that line the supply is equal to the demand? Yes; I have lately engaged a man and his wife to go to the Richmond River. They have been in the Colony about twenty months. He is an Irishman, and had been engaged as a miner for 14 years in Wales, and on his arrival here he went to Newcastle, where he followed the same occupation for a time, but at length wrote to me to obtain a situation for himself and wife. I told him he had better come to Sydney, and when he had been here about a week I obtained an engagement for them to go to the Richmond River. His statement to me was that he had great difficulty to obtain constant work at Newcastle in consequence of the disturbances with the men there, that he could keep no money in his pocket, and that the district was not suited to him.

1310. Do you find an unwillingness on the part of mechanics out of work—men in the building and iron trades—to go into the country to other avocations? No, not if they are adapted to it. But the difficulty is to engage a man who has been brought up in a fitter's shop or as a moulder to do farm work.

1311. Then you think the present system of immigration could be amended by refusing to bring so many people of these particular avocations? I think so. There is plenty of scope for farming men. Bushmen will find their level here, and will work their way if they have any energy in them.

1312. A man who has served his time in the mother country to a skilled trade is not fit to go into the country to follow farming pursuits? No.

1313. To put the matter in another way, from your experience would you be inclined to think that a man who had served his time to the iron or building trades, or who had been brought up to some manufacturing industry, and who upon coming here could find no employment at his particular trade or avocation would be fit to go into the country and work on a farm? No, unless he had great muscular strength.

1314. He would not command the wages? No.

1315. *Mr. Charles.*] You think that although there might be an odd man here and there who might adapt himself to the work it would not be advisable to bring out this class of men? I do not think the Government of this country has any right to assist that class of persons, as there appears to be at present plenty here. I think labouring men are better adapted to the wants of the colony.

1316. You say you believe many persons could improve their condition by coming here. Do you think if a number of stout robust farm labourers were to come out they would have any difficulty in finding employment upon their arrival? No, I think not.

1317. Have you any knowledge of the assisted immigrants who came out during the past years as to how they have succeeded? I suppose there are few agents whose experience is not similar to mine, and that is that many of those who formerly passed through my hands as servants are now my constituents and the employers of labour themselves. There is a vast number of such in the Southern Districts.

1318. *Mr. Day.*] You have had very great experience in the labour market in this colony? Yes.

1319. From your experience in the labour market of this Colony are you under the impression that the present system of assisted immigration should be continued or abolished? I do not think it should be discontinued for this reason, that a great many people who are poor and needy at home have not the means of coming out here. This is an extensive country, and there is plenty of scope for them here, and they have a better chance to do well here than at home. I do not see because in a number of people who come here there are some bad, that therefore the good should not be allowed to come. 1320.

1320. You are under the impression that if the present system of assisted immigration were carried on properly, the people who came would find remunerative employment? Yes, if they do not come out with too extravagant ideas. Some people when they arrive in the Colony seem to think they shall pick up gold in the streets, that money is to be obtained without working for it. Besides, there is a class who, when they arrive here, fall into bad, dissolute, and drinking habits, and we therefore require a constant supply to renew the stock. Mr. J. C. Glue.
6 May, 1880.

1321. Are there at the present time many men out of employment in and about Sydney? A great number in Sydney.

1322. What class of men are these out of employment? They are generally men who would seek lighter employments, such as driving a horse and cart, or pick and shovel men. The great majority of them appear to be men who have been in a better condition of life.

1323. Are they some of the assisted immigrants who have come to the Colony? I do not know. I could hardly answer that question.

1324. Do you know of many of these assisted immigrants being out of employment? No, I do not know of any particularly.

1325. I suppose you lose sight of them as soon as they get engaged? Yes; when they fulfil their engagements they come back to me.

1326. What is the daily rate of wages now for masons, carpenters, and bricklayers? Bricklayers from 10s. to 11s. a day; masons, I think, 10s.; carpenters are not confined to one rate, it all depends upon their skill; they get from 7s. to 10s.

1327. What is the average rate for carpenters? It is a little less now than it has been—from 9s. to 10s.

1328. That is for eight hours a day? Yes.

1329. I think you said before that farm labourers received about £40 a year on the average? That was up to six months ago.

1330. Do you find that there is plenty of demand for that class of labour in the interior? Not so much for farming men. There seems to be a disinclination to engage just now. I do not know whether it is because there are sufficient people in the districts, or whether the farmers are not in a condition to engage them. One of these two causes it must be. I sent a man to Shoalhaven for Mr. John ———, whom I engaged at £35. About six months ago I engaged a man for the same farm at £40 a year. Men are now easily obtainable, and of course the rate of wages is reduced.

1331. You are clearly of opinion that if assisted immigration were carried on properly it would be beneficial to the country? Yes, and to the people themselves.

1332. What is the average rate of wages for married couples for station hands? It differs a great deal. I engaged a man and his wife at £75; I also engaged the miner I spoke of and his wife at £65; I have just engaged a man and his wife at £65, and am going to engage another couple to-morrow at £70. It depends a good deal upon the experience of the parties engaged; and some squatters give a little more than others.

1333. Are they also allowed rations? Yes.

1334. The last time I went to your place I paid £75? Yes, and I engaged a couple for a neighbouring station at £75 at the same time. I engaged a couple a short time ago at £95 a year, but the man was a skilled carpenter. He had several houses at Woollahra, but they were in a Building Society, and he wanted to pay off the advance upon them; as work was not very plentiful in Sydney he took this engagement.

1335. *Mr. Cameron.*] I suppose you have a great glut of persons seeking for light employment, such as porters and clerks? Yes. With regard to female emigrants, in some of the classes that come out they are not satisfied to remain in one employment; I refer especially to general servants. If these would confine themselves to one thing it would be well both for themselves and for their mistresses, but after they have been here a little while they get into bad habits; they do not like the drudgery of a general servant, and strive to obtain superior situations as parlour maids and upper servants, for which they are unfitted, and as a consequence they go from office to office, idleness creeps upon them, and they fall into bad habits.

1336. *Chairman.*] What are the wages current in Sydney for general female servants? From 12s. to 15s. a week.

1337. *Mr. Cameron.*] Some lower than that? I seldom engage a good servant for less than 12s.; the rule is above 12s. I sent a rough Irish girl to Jerra Jerra at 14s. a week, and if I could get another for ——— I would give her 16s. as cook and laundress, but I cannot induce one to go; they will not go into the country, they like town life, to be among their friends, and to display their finery.

Mr. Robert Micklejohn examined:—

1338. *Chairman.*] You are in business, I think, as a produce and general merchant? Yes.

1339. I believe you are agent for a large number of persons in the coast districts? Yes, I am.

1340. Have you been long in business in Sydney? In connection with that business about twenty years.

1341. Have you ever resided in any country district? No.

1342. Your business brings you closely into association with farmers, graziers, and others engaged in the like pursuits? Yes.

1343. Can you tell the Committee whether in the course of your business you have many applications from your constituents for persons to be sent to them? Yes; we have constant applications from time to time.

1344. For what class? Agricultural laborers.

1345. Recently? Occasionally; perhaps once a month, or something of that sort.

1346. At what rate of wages do you generally engage them? Latterly about £40 a year and rations.

1347. Would that be for farming men? Yes; formerly we used to get them for £30, £31, and £32.

1348. Since when has there been this advance in wages? Within the last few years.

1349. Have you found any difficulty in getting the class of men you have wanted? Yes, very great difficulty; perhaps we do not get one man in five that is any good.

1350. That is, those who have been accustomed to farming? Who say they are when they are engaged, but who, when we send them prove themselves to be absolutely valueless. It is a most difficult matter to get really good agricultural labourers.

1351. Have you engaged many newly-arrived immigrants as farm labourers? Yes.

1352. How have they turned out? Very badly. We lately engaged a very likely-looking family—a man, his

Mr. R.
Micklejohn.
6 May, 1880.

Mr. E.
Micklejohn.
6 May, 1880.

his wife, two daughters, and son—supposed to be agricultural laborers, for Kiama. When our constituent had had them a very short time he was glad to pay their passages back to Sydney to get rid of them.

1353. I suppose the persons whom you find most suitable for the requirements of people in the country are those who have been in the colony some time? Yes.

1354. Can you get many of them? No, not really first-class men. There are always good openings for them in the country.

1355. Do you think if the Colony were to bring out a regular supply of persons experienced in farming they would be able to obtain employment? I am sure they would.

1356. Then, I presume, you are in favour of immigration of that class being assisted? Most decidedly. In fact, a really good man can in three or four years save money, make a selection, and in a short time become an employer of labour himself.

1357. Have you any demand for any other description of people? No; my business is confined entirely to produce and in connection with agriculture.

1358. The price of farm produce, especially with respect to grain, is at present rather low? Yes, it has been, and is likely to be for some time to come; consequently there is, perhaps, not so large a demand for labour at the present time, because farmers are economising as much as they can, and do with fewer servants than usual.

1359. Yet the grazing and agricultural interests are in a prosperous state? Yes.

1360. Mr. Cameron.] You are not brought much into contact with the labour market, so far as it affects artisans and mechanics in Sydney? No.

1361. You do not know whether it is in a prosperous state or not at the present time? I cannot speak from personal experience.

1362. From your experience, what the country wants is first-class agricultural labourers? Yes, they are very necessary.

1363. Mr. Charles.] From what you say I infer that immigrants who are suitable, good agricultural labourers, in a short time take up land and become employers themselves? Yes.

1364. Do you consider that we require a steady supply of others to take their places? Yes, because the demand is gradually increasing. As these people take up land they in a short time require servants, and consequently a constantly increased supply is needed.

1365. You think then that any assistance that might be afforded to immigrants should be given to people brought from the agricultural districts of the old country? Yes; and even in the case of girls, those should be brought out who are acquainted with dairy work—a class hardly to be obtained in Sydney.

1366. You think there would be a good opening for girls who have been brought up on farms in the old country? Yes; I have had orders for them, and have been unable to get them in Sydney.

1367. Do you often get orders to supply female servants for your constituents? Yes.

1368. Is it within your experience that when immigrant ships arrive in Sydney people in the country write to their agents to engage newly-arrived immigrants? Yes; but the girls are seldom willing to go into the country.

1369. Mr. Cameron.] I suppose they prefer working at sewing-machines? Yes; most of the girls do not care about going into the country. If it could be arranged that girls intended for agricultural districts could be sent at once to those districts it would be far better than the present system of allowing them to land and remain in Sydney.

1370. Would you advocate the same course of conduct in reference to farm labourers, that instead of being allowed to remain in Sydney they should be at once sent to the agricultural districts where they were required? Yes, I think that would be a great improvement.

1371. Mr. Day.] Have you had any experience with reference to our assisted immigration regulations? not much.

1372. Do you know anything at all about them? I know that many years ago large numbers came out here under the assisted immigration regulations; many of the present settlers in Illawarra who are now well off were brought out here by their friends.

1373. Mr. Charles.] Are you not aware that a large number of the assisted immigrants who have been brought out for Illawarra were assisted by persons who had themselves come out under that system? Yes.

TUESDAY, 11 MAY, 1880.

Present:—

MR. BARBOUR,
MR. CHARLES,

MR. DAY,
MR. JACOB.

J. F. BURNS, ESQ., IN THE CHAIR.

Francis Campbell Brewer, Esq., examined:—

F. C.
Brewer, Esq.
11 May, 1880.

1374. Chairman.] You are connected with the Press in this city? Yes.

1375. How long have you been in this Colony? Since 1834.

1376. I believe you visited England a short time ago? Yes, in the latter part of 1877.

1377. How long did you remain in England? About a year and nine months.

1378. Where did you reside? I went home in connection with the *Sydney Morning Herald*; my office was in George Yard, Lombard-street, and my private residence at Gloucester Terrace, Kensington Gardens.

1379. While you were in London you acted as agent for the *Sydney Morning Herald*? Yes, in an editorial, and in other capacities.

1380. Were you in the habit of calling at the office of the Agent General for this Colony? Only upon two or three occasions. My first call was just after I arrived there, and I saw Mr. Forster and Captain Jopp—I had some conversation with them with reference to office matters.

1381. Was it your habit at any time to call there to obtain information relative to the Colony? Occasionally—not very often.

1382. Did you meet with persons in the office other than the Agent General who had any personal knowledge of Australia? No. Captain Jopp was there, and I think there were two clerks in another office.

1383. Could they give any information relative to the Colony to those calling at the office, other than they had gained from books and newspapers? I do not think either of them had been to the Colony.

1384. Had you many applications made to you while you were in London for information about New South Wales? Yes.

1385. From intending emigrants? Yes. I may state that I advertised my office in London in the papers, and that brought a number of persons to me asking for information respecting New South Wales.

1386. Could they have obtained the information respecting which they came to you at the office of the Agent General? Unless from Mr. Forster I do not think they could.

1387. What was the nature of the information these intending emigrants wanted? Principally they used to inquire with reference to the modes of employment here, the avenues for industry, the openings for mechanical and other labour, and the price of food, and out of these inquiries several others arose. In several instances I had applications also from clerical persons.

1388. Did they ever send parties from the office of the Agent General to you for information of this kind? That I cannot say, but I referred persons generally to the office of the Agent General, after I had given them any information.

1389. Were they in the habit, or have they at any time sent to you from the Agent General's office for information? Not from the Agent General's office.

1390. Did you find much disposition on the part of the people who called upon you to emigrate? Yes, they were particularly anxious to get information about the Colony. No work seemed to supply them with many of the details of information they required, which they considered of importance.

1391. What class of mechanics was it who desired to emigrate? I did not keep a note of them, but so far as I can recollect among others there were one or two carpenters, two engineers, and two cutlers; the two latter had been employed, I think in Sheffield; they sent letters to me and asked if there were an opening for men of their class out here.

1392. Did you find that there was much or great misconception with reference to this country? I found the most profound ignorance with regard to New South Wales in London, and in other parts that I visited.

1393. Did you travel much while you were in England? Not much, my duties did not permit me, as they required my stay in London, but I went to Yorkshire, Sutton, and Gloucestershire.

1394. Did you go into any of the agricultural districts? I noticed many tenements vacant, good sort of farm-houses, such as would be occupied by what I should call yeoman farmers. These were, I think, upon Sir Richard Phillips's and Lord Redesdale's estates, and I inquired from some persons as to what had become of the tenants, and was informed that most of them had emigrated to New Zealand. One family, consisting of father, mother, and six children, had sold out of their farm and had taken four labourers with them to New Zealand.

1395. Did you make any inquiry as to the cause that had attracted them to New Zealand rather than to New South Wales? There is more known about New Zealand than any other Colony. It is kept more constantly before the public.

1396. You think there is the most profound ignorance with respect to New South Wales? Yes.

1397. Did you find that ignorance pretty general? Yes; I may say that I mixed a good deal with various classes in London, and I also visited some country districts around London, and many persons whom I met hardly knew that such a place as New South Wales existed.

1398. Do you think it would be easy to get parties who have been accustomed to farming to emigrate to this Colony, if agents were to go among them and speak to them in their own language, pointing out the advantages the Colony offered to their class? Yes; I think so. I do not think this class of people can be reached by pamphlets, they do not care about reading them, they want information communicated to them *vis à voce*, or by letter. They ask questions as to a number of details with reference to climate, the cost of settling on the land, the class of land, the cost of clearing, and many others which are not answered in a pamphlet.

1399. I presume you are aware that a very large number of pamphlets, written by Mr. Charles Robinson, were sent to the Agent General for distribution? Yes, I believe I was told that some 50,000 were sent Home, but I have reason to think that they were not distributed, but simply given to persons who called at the office, which is really no distribution at all. I may say that I did not see a single copy, either of that pamphlet or of Mr. Reid's, while I was in England. Of course I could have seen and obtained copies if I had applied for them.

1400. Did the class of persons who were coming out here as immigrants at all come under your observation while you were in England? The only emigrants I saw were the hop-pickers, who were sent out by Sir Julius Vogel to New Zealand.

1401. You saw none of the emigrants who left for this Colony? No, I did not. I know some of those who called upon me came out, for I went with some few of them to Thompson's, the ship-owners in Leadenhall-street, and also to Anderson and Anderson of the Orient Line, and they paid deposits on their passages.

1402. Could you make any recommendation as to the best means of attracting the attention of desirable persons as immigrants to this Colony? I do not think the pamphlet or lecture systems correct ones, for the effect of the lecture is simply local, and does not extend beyond the town where it is delivered, and agricultural labourers are not a class who will read heavy pamphlets, or go through statistics so as to get anything out of them. The best way to get at the British public is through the columns of the newspaper, and if anything is published in any of the leading London papers with reference to Australia it will be republished, not only in other London papers, but in a hundred and fifty newspapers in the provinces. If there were some one in London who would make it his study to get the Colony brought before the public through that medium, I am certain it would do more good than anything else I can possibly imagine, because the British people are a great newspaper reading people, and there are an immense number of papers published in the provinces.

1403. And the provincial papers reprint from the London press? Very largely. I used to go to places where the country papers were received, in fact it was my business to do so, and I have constantly seen many things that had appeared in the London papers, with reference to Australia, Canada, or other colonies likely to attract the attention of persons likely to emigrate, copied into numbers of them.

1404.

F. C.
Brewer, Esq.
11 May, 1880.

F. C.
Brewer, Esq.
11 May, 1880,

1404. Anything about the climate, the soil, the crops, prices, or the experience of others who had come to this Colony, if published in the London Press would be likely to get circulated all over Great Britain? Yes. I visited Dublin and the country just around. I was there about seven or eight days, and I found considerably more was known about New South Wales there than at any other place I visited. This I attributed to the greater number of persons who had gone from that part of the United Kingdom to this Colony, and who communicated with their friends at home.

1405. How do you suppose the getting the Colony noticed by the Press in the way you suggest could be accomplished? It could only be accomplished by a person who understood Press operations.

1406. Who would compile extracts from the Australian press ready for use? Ready for use and brief. I never found any great difficulty myself in getting extracts into the press, provided they were not too long.

1407. Could that work be well done in the office of the Agent General? I think so, but it would require somebody who understood the business.

1408. It would also require some one who had been in the Colony, and who was able to understand local allusions? Yes.

1409. *Mr. Charles.*] You state that in Ireland you found a better knowledge of the state of this Colony than in England? I spoke only of Dublin, and of the country around. I did not go into the interior of Ireland.

1410. You think that any person who might be appointed in the office to perform the duty you mention should have a thorough knowledge of the geography of the Colony? Yes, of its social life, its organization; indeed he should have a thorough knowledge of the Colony all through. I think he should not be confined to the Agent General's office, but that the same person who arranged for the notice of the Colony by the press might take trips in the country, go among the agricultural population, and in a conversational and friendly way mix with the people. In this way a vast amount of information could be disseminated respecting the Colony. I did it myself when I was going about, and think more good can be done in this way than by set lectures. As regards pamphlets, however valuable the information contained in them, the difficulty is to circulate them; but this difficulty is overcome by giving it through the newspapers. Perhaps by no means has information respecting the Colony been so widely circulated as by that adopted at the time of the French Exhibition, when copies of a special supplement of the *Sydney Mail*, containing a great variety of information respecting the capability, productions, and resources of New South Wales, were published in French and English. These papers were given away in the New South Wales Court, and they went all over the continent no doubt, though very few I fear came to England. There is another matter which requires to be watched in England. I mean the misrepresentations often made in the English papers with reference to Colonial matters. Two notable instances of this kind occurred while I was in England. The first was in *The Globe*, which takes perhaps more interest in Colonial matters than any other paper in London. In this paper was published a very elaborate tabulated statement of the imports and exports of the British colonies, and in looking over it I found that for the year 1878 they had given the exports of New South Wales at nine millions, which I knew was wrong, and the exports from Victoria at fourteen millions. I went through the exports myself, and discovered that they had given credit to Victoria for all the border trade, but had omitted the border trade of New South Wales, which brought our exports up to thirteen millions. I wrote to the *Globe*, asking them to correct the statement; but it was not until I had written a second time that they did so. On another occasion, just before the New South Wales loan was put on the market, a very damaging article appeared in the *Investors' Guardian* on the finances of New South Wales. I brought the matter under the notice of Sir Daniel Cooper, who said he thought it was not worth while taking notice of it. I also spoke to Mr. B. L. Lloyd, a gentleman who takes considerable interest in New South Wales, upon the subject, and he advised me, if no more influential person did so, to reply to it; I did so. My purpose was to show that the loans of New South Wales had been expended in works for which loans are intended—that is to say, railroads, roads, bridges, and public buildings, to the extent of the loans. The article of which I am speaking went to show that we were living in a most extravagant manner, and were virtually insolvent. That appeared about three weeks before the tenders for the loan were opened, and I do not think there was anyone in London at the time who thought it worth while to reply to these misstatements, although no doubt they militated greatly against the Colony.

1411. *Chairman.*] I presume Sir Daniel Cooper thought the paper was too insignificant to be noticed? He might have thought so, but I thought I knew as much of the city as Sir Daniel Cooper, as I was there every day, and I knew that the *Investors' Guardian* was a high class financial paper, and had a large circulation among money-investing people; although it would not be likely to do much injury among capitalists who knew the Colony, it would be likely to injure us with those who did not know it.

1412. *Mr. Day.*] From your experience of the office of the Agent General, do you think any person going there would be able to get requisite information as to the Colony? I do not think they could get the information which might be given by a person thoroughly acquainted with the Colony, unless from the Agent General himself.

1413. Did you find any difficulty in getting any information you required? I did not go for information, excepting with reference to something that might have occurred in the Colonial office of interest to New South Wales.

1414. You would be in a better position to get information than an immigrant would? I think I was in as good a position to give general information to emigrants as the Agent General's office.

1415. I am speaking of getting information? I dare say I could have obtained information better than any emigrant could, but I never applied for information upon emigration matters.

1416. I suppose you had no experience with regard to the conduct of the office? No, I called there on one or two occasions; I saw Captain Jopp twice, I think.

1417. From what you saw do you think the office was as well conducted as it might have been? I think the office itself was conducted well enough, but there was not enough energy in it.

1418. Could you suggest to the Committee any alteration in the conduct of the office that would be productive of good? I think the clerks in it ought to have some personal knowledge of the Colony, and certainly the Secretary to the Agent General ought.

1419. But it would be of no use that they should have a knowledge of the Colony if they did not give it to other people? If they had the knowledge I suppose it would be one of their duties to give information to others. In fact there ought to be an inquiry office, and some one appointed whose special duty it should be to give information.

1420. I understood you to say that there was the most profound ignorance in the office with respect to the Colony? Not in the office—in England.

1421. What causes New Zealand to be better known than our own Colony? It is a pet colony with many persons. The establishment of Lyttleton itself kept the Colony before the eyes of the public, and Sir Julius Vogel is very energetic. F. C. Brewer, Esq.
1422. What makes it a pet Colony—ours is richer? That is what we think; they do not think so. New Zealand is considered very wealthy in resources. 11 May, 1880.
1423. What are the causes that have been set in operation to lead people to think New Zealand a more prosperous colony than others? I think it is the fact of New Zealand being kept so continually before the public.
1424. How is it kept so continually before the public? Sir Julius Vogel himself reads papers, and writes in the press on various subjects connected with New Zealand. You will find that in London New Zealand is better known than any other colony.
1425. Why could not other colonies be brought before the public as prominently as New Zealand if the same means were adopted? No doubt they could, but the New South Wales colonists in England are very apathetic. In many places in England, if you speak of Victoria, very little is known of it by name, but almost every one has heard of Melbourne—indeed Melbourne seems to be considered Australia.
1426. From your experience of the Colonies, do you think New Zealand more prosperous than New South Wales? It is simply my opinion—but I do not think so. New South Wales has great resources, and I think is altogether more prosperous than New Zealand.
1427. That is your opinion as a colonist, after having had experience? Yes; at the same time New Zealand is a very great Colony.
1428. Do you think the people of England would desire to emigrate to this Colony if they had a fair opportunity? I think, from the frightfully depressed condition of agriculturists when I was in England, that class would desire to do so.
1429. You have said that a number of people called upon you in England to gain information with regard to New South Wales? Yes.
1430. Did they know anything about the Colony? Very little, excepting what they had gained through letters from their friends, but it was very little.
1431. Did they ask you where they were likely to gain information? I always directed them to the Agent General's office.
1432. Do you know if any went there? I cannot say; I did not see them afterwards generally. There is one gentleman who came to me for information, and who is now here—Mr. d'Avigdor; he was with me about an hour, asking questions respecting the Colony.
1433. From your experience in the Colonies and in England, are you under the impression that we should have no difficulty in getting a sufficient number of agricultural labourers to come here, if we offered inducements, under the assisted immigration system? I think the assisted immigration system is confined principally to those for whom a portion of their passages is paid by their friends.
1434. Do you think there would be any difficulty in getting out this class if the immigration system were carried out properly? I think not; I think a very desirable class might be obtained if proper persons were appointed to go into the agricultural districts and to make the Colony well known. I presume it is from these districts that the class of labourers most required here are to be obtained.
1435. What is your opinion with regard to the assisted immigration regulations? I have not read them carefully through; I had copies of them and gave some away.
1436. From your experience as a colonist do you think it desirable to continue immigration to this Colony? That is a question I should not like to give a decided opinion upon. Immigration is no doubt desirable to a certain extent; but my opinion is, that if this Colony were properly put before the British public we should get a large stream of desirable people—people who would bring small capital with them—men of energy and thrift. Besides these, there would be an addition to the labour market by the natural increase of the population in the Colony.
1437. That is not the question I am asking you; the question I am asking is widely different—it is whether, as a colonist, you think it desirable to continue the system of assisted immigration? I think if a large number of persons could be induced to come here and to pay their own passages there would be no necessity for assisted immigration; the means of communication now are so different from what they were a few years ago—passages are so much cheaper, and the distance is, so to speak, lessened. In the vessel by which I came out there were nearly 500 passengers, 400 of them in the third class and steerage.
1438. Were they persons who would locate themselves in the Colony? I should imagine they were; they seemed to be a class of people who had come out to benefit their position, and who were likely to remain.
1439. You have scarcely answered my question now; I would like to get your opinion as to whether you think it desirable to continue immigration to this Colony? I have no doubt it will benefit the people of England—those who take advantage of the assisted immigration, but I have grave doubts as to whether there is not a sufficient stream of immigration coming here in the ordinary way. I confess it is a question to which I can scarcely answer either yes or no.
1440. Do you know anything about the labour market in this Colony? I know only from the reports.
1441. Simply from your position in connection with the *Sydney Morning Herald*? I know only from their reports—I do not go much among the labouring classes here, it is not among my duties.
1442. Then you do not know of your own knowledge whether the labour market is overdone? I do not think what I would call the rural labour market is, and I would go so far as this, that if we could secure by assisted immigration a large agricultural population, it would be a very good thing.
1443. What about mechanics, such as bricklayers, carpenters, stonemasons, and artisans of that kind, could they find employment here? I cannot say, I am sure. No doubt a few could find employment, but I question whether they could if they came out in large numbers, I know that mechanics get so much a day, and that it is said by some there are a large number out of employment, while on the other hand employers say they cannot get men when they want them.
1444. You mix pretty freely among the people of New South Wales? I see a good deal of them.
1445. Can you state the opinion of the people generally on the subject of assisted immigration? I think as far as mechanics are concerned their opinion is against it.
1446. *Mr. Jacob.*] As to other classes is their opinion in favour of it? A good many are in favour of it because it supplied them with perhaps cheaper labour.

- F. C. Brewer, Esq.
11 May, 1880.
1447. *Mr. Day.*] You find from your experience that the principal opposition comes from mechanics or artisans? Yes; I think so, from miners and what I should call skilled labour.
1448. Have you ever heard employers of labour say they were sufficiently supplied? No; I never did—I have heard great complaints of the want of skilled labour by those who require it, and on the other hand I have heard it said that there was plenty of skilled labour in the country.
1449. Have you heard that from any others than mechanics? No.
1450. It is natural that they would say there is plenty of skilled labour in the Colony? You are as well able to form an opinion upon that point as I am.
1451. But we want your opinion? I say that I have not mixed sufficiently with all classes to give a very decided opinion upon the question of immigration. I have my own opinion upon one point which is that assisted immigration is probably a very desirable thing if you can get the proper class of labour to come here, but an agent would be required who could make a proper selection.
1452. *Chairman.*] I presume that one of the reasons why New Zealand has attracted and sustained so much attention in England, has been the fact that it was colonised at first by an association formed in England and Scotland? No doubt that is one reason.
1453. I suppose you are aware that the Canterbury settlement was formed by an association of shareholders of the leading members of the Church of England, and that Otago was originally settled by an association which had its head quarters in Scotland? Yes.

Mr. Herbert Valliant Wigg examined:—

- Mr. H. V. Wigg.
11 May, 1880.
1454. *Chairman.*] You arrived in this Colony as an assisted immigrant, by the "Northbrook," in the month of August last? I did on the 15th of August.
1455. I believe you now reside at West Maitland? I do.
1456. What pursuit are you following? I am working at the trade to which I was originally apprenticed—that of a wood-carver.
1457. Do you find sufficient employment in West Maitland? No, not sufficient.
1458. You are an Englishman? Yes.
1459. Letters have been placed in my hands in which you state that you can prove that more than half of the immigrants who came out in the vessel with you were really of different trades to those that appeared against their names upon the books? Yes, I think I could prove that to be the fact.
1460. Have you any evidence in support of that statement? Yes; a list of the names of the immigrants, with the occupations filled in, and being schoolmaster on board I learned from the children what were the real trades of their parents; I had also conversations with the parents.
1461. You say you can prove that statement? Yes. If I had the list here I could point out the names of those who were wrongly described. Of course, I am speaking approximately; I am not confining myself to one or ten either way. I think half the married men came out here as belonging to trades different from those they really followed.
1462. How many married men were there on board the ship? I think ninety-two or four. I believe nearly half of these were miners, and only three came out under the calling of miners. One of these had paid his own passage; at least I heard him tell Mr. Wise he had done so. His brother-in-law, who was a miner, came out as a plasterer, and this man wanted to come out with his brother-in-law.
1463. Why did he come out as a plasterer? Because they refused to allow him to come out as a miner, so he told me.
1464. If you had a list of the immigrants could you point out who were miners? Yes. For instance, I could give you the case of a cousin of Mr. Croudace; he applied for a passage as a miner and was refused. A letter was sent to him to the effect that if he has followed any other occupation, and could get a certificate to that effect, he could make a fresh application; he did so, and was accepted; he filled in a fresh paper, and accompanied it with a letter stating that he was a plate-layer, and he came out as a plate-layer or miners' laborer.
1465. Did he shew you the letter stating that he could make a fresh application? He did not show me the letter, but he told me and others, in general conversation on the ship, he had received it. I expressed my surprise that there were so many miners on board, when I was told that they had come out under other designations.
1466. Had not some of these men been sent for by their friends? A few of them had.
1467. From the coal-mining districts? From the coal-mining districts. I know five or six. One who came out as a horsekeeper had been sent for by some one at Wallsend, and he is now employed there as a miner. He was from the county of Durham.
1468. You state that when you left the ship you went to Raspberry Gully with a party of men, each and all of whom were deceived by the agent of the Waratah Coal Company, and also by Messrs. Wise and Treatt? Yes.
1469. Are you a married man? Yes.
1470. Did you bring your wife and family with you? Yes.
1471. You paid the deposit yourself to enable you to come out? Yes.
1472. You were not sent for by any one in the Colony? No.
1473. Under what representations did you leave England for New South Wales? I had a desire to go to New Zealand, but they would not take me there because I was not an agricultural labourer. I had gone to their office in London, and was returning from it when I called in at the office of the New South Wales agent, and asked for forms of application for assisted passages. These were filled up in due course, and were accepted.
1474. As what did you describe yourself? As a wood-carver.
1475. Did you obtain employment immediately upon your arrival in Sydney? I obtained employment in this way: We came in on a Thursday night, and I got on shore for the first time on Saturday. I took a turn round Sydney, and found my trade was actually useless here for the men working at it, and that I had far better been a coal-heaver.
1476. Was any representation made to you that persons in your trade were in demand here? I was told that it was a splendid trade here, and that I had better work at that and nothing else when I arrived.
1477. Who told you so? One of the clerks in the office.
1478. In the office of the Agent General? Yes, a little dark man—I do not know his name. 1479.

1479. Are you quite sure he was an officer of the department? He filled up the papers that I signed, or some of them.

Mr.
H. V. Wigg.

1480. You could not get employment at your own trade in Sydney, and you accepted employment at Raspberry Gully? Yes, a man came on board the ship on Saturday evening—the agent of the Waratah Coal Company—and made inquiries for men as coal-miners. He spoke to a Mr. Ingies, who had come out as a farm labourer, though he was a miner, as I knew, having been acquainted with him in England, through his brother-in-law Mr. Thomas Burt, a member of Parliament. He also afterwards spoke to me, and told me that he wanted men for the pit at Raspberry Gully. As I had no funds beyond what I had received as schoolmaster, £5 I think it was, and £2 17s. besides—I may say that I afterwards had a draft from Home for £20, which I have spent in furnishing a home and other matters, and as I had been so deceived in respect to my own trade I thought I would try. This agent represented to us that men were wanted at this pit, and we had no suspicion then of a strike, nor indeed until the Monday morning, when the newspapers were brought on board by one of the men. On Monday, when we saw the agent at the depôt, he said it was not a strike on the part of the men but simply a dispute on the question of vend as between the masters and men, a term which I did not then understand as applied to the coal trade. Before I was engaged I spoke to Mr. Treatt, and asked him whether I should be doing right with a sick child and young family to go to such a place. He said I had a splendid opportunity. It was men with fair education, as I had, who were wanted, and that I should speedily rise. The end of it was that we were all engaged.

11 May, 1880.

1481. In what capacity did you hire? I hired to act as a kind of overman or clerk for a coal-mine. I was led to believe that I should receive 8s. a day, and have twelve days a fortnight. Mr. Ramsey told me afterwards such would have been my pay had I started.

1482. Had you any experience in regard to coal-mines? No more than that I had gone down a coal-mine—never to work in one.

1483. Did you make any representation to him to that effect? Not the slightest. I put the question to him, "Shall I be of any good to you, as I have never worked in a coal-mine; indeed I have not worked at any manual labour at all for ten years past—shall I be any good to you or to myself?" For fear I should be deceived I put the question to Mr. Wise and to Mr. Treatt; subsequently to the one on board ship and the other at the Depôt.

1484. How could Mr. Wise or Mr. Treatt tell you whether the employment would be suitable for you or not? That I did not know, and have wondered at many times. I have since found out that they had no knowledge of the matter. They told me that coal-mining here was very different from what it was at home.

1485. Who told you that? Mr. Treatt.

1486. In what respects did he say they differed? The pits were not so deep; there was no danger from gases, and they were more easily worked. The same answer was given to me by the agent for the pit, whose name I do not know.

1487. Are they so deep here? I have been in two or three here which are not so deep and not so dangerous, but the coal in Raspberry Gully is far harder to get.

1488. You think you were deceived by Mr. Wise and Mr. Treatt? I do not say I was deceived by Mr. Wise, I was by Mr. Treatt; but others were by Mr. Wise. I think he should have given a fair answer to the questions that were put.

1489. What question was put? They asked first about the position of affairs between the company and their men. I did not hear the answer given; but the answer they told me they received was a far different answer from the one they should have received, which put another complexion upon the state of affairs.

1490. You did not hear Mr. Wise give the answer? No, I did not.

1491. You say here, "Each and all of us deceived by the agent of the Waratah Coal Company, and Messrs. Wise and Treatt"? I heard the questions put to Mr. Wise, but I was not near enough to hear the answer. I should not commit such a breach of good manners as to listen to a conversation I was not wanted to hear, but they informed me of the answer they had received from Mr. Wise. I was not more than a dozen yards away at the time.

1492. Upon that hearsay evidence you charge Mr. Wise with deceiving you and the men? I do not charge him upon hearsay evidence.

1493. Did you write that? Yes, certainly, and as it stands it is correct, I am excepting Mr. Wise from myself, that is all; but I can safely say, with reference to Mr. Treatt, that I was deceived by him, and as regards the other men they were deceived by Mr. Wise, and the two circumstances are incorporated in the same sentence.

1494. You say that Mr. Treatt deceived you? Yes. I went to him, and put the question to him, should I be doing right to go.

1495. What answer did he make to you? Just the answer I gave formerly.

1496. You think he deceived you instead of advising you? Yes. I should be sorry to say he did it purposely, because I can conceive of no motive beyond this, that he desired to get rid of us from off the ship. I think, however, that they were biassed—that their sympathies were with the employers, and against the men.

1497. How do you know that they had any sympathies at all in the matter? Because I afterwards heard Mr. Treatt order one of the men, who was one of the delegates of the Miners' Union, as I afterwards discovered, out of the depôt, while the Waratah Coal Company's agent was allowed to remain.

1498. What was the result of your engagement to go to Raspberry Gully? Before I finally decided to go I again, when receiving my fee as schoolmaster, put the question to Mr. Treatt, "Shall we be perfectly safe—is there likely to be any violence there?" His answer to me was—He and the agent were together—the agent was then waiting for our passes—I am not quite certain whether it was Mr. Treatt or the agent who gave me the answer, but it was to this effect: That Sir Henry Parkes was the head of the Government, and that he was determined to prevent anything like violence, and that we were as safe as we should be in the streets of London. Mr. Treatt was present when that was said, standing on the side of the agent. Whether he said it or the agent I could not tax my memory now after nine months. If he (Mr. Treatt) did not say it he endorsed it by his silence.

1499. Do you think Mr. Treatt was likely to know more than you from report? He would be likely to know better than I. He should not be in that place unless he had some special knowledge of the labour market.

Mr.
H. V. Wigg-
11 May, 1880.

market. Moreover, Mr. Treatt and Mr. Wise both said openly: "Trust no one but us; we will give you the truth; come and ask our advice if you want it," and we took it in good faith.

1500. Who do you think told you you would be safe? I am under the impression that it was Mr. Treatt, but I am not certain.

1501. When you went to Raspberry Gully what was the result of your engagement? We went from the ship on board the Waratah Coal Company's steamer "Waratah," under the promise that they would anchor somewhere near the Circular Quay to allow us to get some necessary refreshments and clothing. There was a woman taken on board who had been confined only* two days before, and my child was not expected to recover. This woman was very ill. However, when we were on board they would not allow us to leave the vessel until we persistently refused to go further unless they did allow one of us to go and get some brandy and milk for this woman and my baby. Mr. Walton, and Mr. Lord, and Mr. Dowson then went ashore. The latter fetched his daughters from the single women's depôt. There were fifty of us altogether.

1502. How many were engaged to go to Raspberry Gully altogether? Twelve men—their wives and families altogether made up fifty souls. Mr. Mood, gas-fitter, wife and no family; Mr. Ingles, who came out as an agriculturist, but who was really a miner, wife and two children; Mr. Dowson, miner, wife and five children; myself, wife, and four children; Mr. Robinson, wife, and one child; Mr. Meredith, wife, and one child; Mr. Brown, wife, and two children; Mr. Garfoot, wife, and four children, or five—I would not be certain which; Mr. Welsh, wife, and two children; Mr. Lord, wife, and three children; Mr. Garfoot, junior, a young man; and Mr. Walton, wife, and five children. The latter was a miner originally, but he had been a butcher for a year previously to his coming out, and he came out as a butcher. We, I think, were all put on board this steamer and landed at daybreak at the Waratah Coal Company's shoots at Waratah, and put into coal waggons. My first suspicion of there being anything wrong was from our being advised to lie down in the coal trucks, so that no one should see us. There were about forty men, chiefly on horseback, waiting at one point of the road for the train, and the moment they saw it they galloped away. We were taken from the train about a quarter of a mile from the pits, with the exception of this woman, Mrs. Meredith, who was seriously ill, and who was left in one of the overseer's houses. We then went on to the village, or rather to where some new houses were; and I should mention that among other things they told us that there were houses already built for us, which we should have rent free—at least for a time. We went to these houses, and found there were six available. Eight had been started, two of which were occupied. Of the rest only one was finished. The others were unfinished—some had not roofs on. The fifty of us were marched to that place, and when we got there we found some hundreds of miners and their wives ready to receive us. Some (young men chiefly) had guns, others pistols, some were blowing cow-horns. Those who had not other arms had sticks. They at once surrounded us, and said that some thousands more were coming from Lambton, but if we liked to come with them to the village everything should be safe; but if we dared to sleep in the cottages they would burn them over our heads, or blow them up. After expostulating with them, some of the miners came to us and advised us, for safety sake, to come to the manager's house or to the township. Some thought it would be safer to go with the miners. My wife heard of this woman's illness, elected to go with her to the manager's house. The manager of the mine and the Secretary of the Waratah Coal Company, who was present, advised us not to go to the cottages at all. A deputation of miners then came and waited upon the manager, and it was subsequently arranged that an interview should take place between the immigrants and some of the deputation at a miner's house, a public-house kept by a Mr. Luke Smith in township Charleston, the next night. However, when the night of the meeting came the miners refused to let any but one man, who had a card of membership from the Associated Miners' Union, Durham, meet them. The result of that interview was that they ordered us all to leave the village or township. The question then was, how we should get away. A number of the people came to me and asked if I would act as spokesman, see the manager, and ask him if he would send us back as far as Newcastle by the train. He refused to do so, and said he would not do anything of the sort. He said, "There is work for you if you like to start; I suppose you would like to be taken to the Barrington, and then you would be satisfied?"

1503. Did you get no employment at Raspberry Gully? Not at all. All the men but two refused to work; one of the two was myself. I suppose it was from obstinacy, because I did not believe in being frightened or coerced. I said, "If you will come with me I will begin to work."

1504. Was it in consequence of intimidation they refused to work? Yes. After a deal of persuasion Mr. Ramsay consented to put the boxes of these people into the trucks. During the discussion—and it was not till 6 in the evening that the boxes, bedding, &c., were carried by some of the miners to the trucks—the boxes with clothing and other effects were in the air being spoiled by the rain that was falling heavily. Some of the people were actually penniless; one had only half-a-crown, and another—Walton—had absolutely no money at all.

1505. As a matter of fact although you were engaged to go to Raspberry Creek, in consequence of the intimidation of the miners, you were never employed there? That is so.

1506. *Mr. Day.*] That was not the fault of the employers but of the miners? Yes; but our complaint is that the real state of things was not represented to us.

1507. *Chairman.*] What is the name of the agent who employed you here? I do not know. I have never seen him from the time he engaged us.

1508. What became of these people afterwards? I will tell you: They were left there on the road; it was getting dark, and it was a Saturday, and the minister saw them in that condition, and on enquiry among the whole lot found they had not enough to pay for their passages and the carriage of their effects to Newcastle. The minister interested himself in the matter, got them taken to Newcastle, and found employment for one man on the line—a Mr. Lord; Brown came up to Sydney, pledged some of his clothing, with the proceeds of which he bought a few tools and obtained employment at the Exhibition Building for a few days; he then went back again to mining, and is at Raspberry Gully now, I think. Ingles and Walton knocked about Newcastle for some time, then went to Woodford and worked there till Woodford pit was closed; I think they are living at the Glebe now. All this was told me by one and

the

NOTE (on revision) :—My wife says now, a week, but that can easily be proved by reference to Doctor's books. I kept them and entered the births at the time.—H.V.W.

Mr. H. V. Wigg.
11 May, 1880.

other of the party subsequently. One man, Mood, a gasfitter, was taken in from charity by the miners, and is still living with them. He has never been able to get work, except for two days or so at Newcastle.

1509. Is he a man of any force of character? Yes, at home he was foreman in the shop where he had been apprenticed.

1510. Is he a young man? Yes, a young man, and a splendid workman I have heard.

1511. Of what trade did he describe himself when he came out? As a gasfitter and plumber I believe. He came up to Sydney later on, and I was with him some days. We went about seeking employment. Were unable to obtain it, and went back together. The other people—that is, myself, wife, and family, and Meredith, his wife and child—who were left at the manager's house, among them this woman and Meredith's wife, who was terribly ill, were peremptorily ordered to leave it. The words were, as brought to me by one of the hands about the pit, "Tell Wigg and the other people to get out at once." I represented to Mr. Ramsay that if this woman were turned out of doors she would be likely to die, and ultimately consented to let us have the cottage that was furnished. We stayed there three weeks, my wife took a fever, my child was taken ill, and in fact we were all ill. We were eventually ordered to leave, which we did, coming up to the Lambton pit in the coal trucks. Robinson, who had stayed in the village, came with us. He had money, and had paid 20s. a week for board.

1512. How came you to locate yourself at West Maitland? *The manager of the mine at Greta wrote down to say he could make room for four men, and offered us employment.

1513. Employment as coal-miners? Yes; there were two who were practical miners, and they agreed to take the two who were not with them; but we had no money to go up, and wrote to Mr. Wise asking for passes to enable us to go. He replied that we had had passes already, and could not have others. Also that work had been found us once at Raspberry Gully, and we had refused it.

1514. What is the distance between Newcastle and Greta? Something like 30 miles. We heard of the work through a Mr. John Williams, at Hamilton.

1515. What would have been the fare to Greta? 4s. and something, and we had not the money; indeed we had not the money for food, except Robinson, and perhaps myself. We got credit for a little, that is, I did, until money came.

1516. Did you get any employment about Lambton or Hamilton? About Hamilton—yes. I wrote back to Mr. Wise, that neither I nor those who were with me had had any pass, that we had been taken in the Coal Company's own steamer, and I asked him if he could give me a pass to Sydney, as I was more likely to get employment there at my own trade. This was before I bought my tools, I got no reply from Mr. Wise. I was knocking about Hamilton for seven or eight weeks, and did about a fortnight's work in that time. I then, as I before stated, came to Maitland. Before that I went back to Raspberry Gully, but the only work I could get was at the Screens. I worked there one day for 6s.; then a letter coming informing me of work I went to Maitland.

1517. Would you not be likely to find more employment at your trade in Sydney than in Maitland? No; when I was in Sydney I went to every shop and found that although at one time there were a good number of wood-carvers here, they had been ousted out by Chinamen, who would do for 1s., and find the wood, work for which an Englishman would charge 3s. It is inferior work, but it answers the purpose of the cabinet-makers, and the public are generally satisfied with it.

1518. I suppose these Chinamen's work does not extend so far as West Maitland? Their work does not stand packing, so Mr. Hyndes told me. The work sent into the country requires to be strong, and able to bear carriage.

1519. You say you are "in a position to prove that Mr. Wise has been repeatedly written to by starving immigrants after they have been sent up country?" Yes. Mr. Mood informed me that he wrote to Mr. Wise, and I wrote to Mr. Wise myself.

1520. Where was Mood living at the time he wrote to Mr. Wise? I think at Raspberry Gully—if not, at Hamilton. He was one of the party hired for Raspberry Gully. I wrote also on behalf of Robinson and Meredith to Mr. Wise.

1521. Were they also of your party? Yes. There was also a man named Peacock. I do not know what has become of him; but I was informed that he had written up to the Immigration Office, whether to Mr. Wise or not I am unable to say, but I assume it was to Mr. Wise.

1522. What did he write for? He was in the same position; he could not get employment.

1523. Where did you meet with him? He was one of the immigrants by the "Northbrook."

1524. Where was he living when he wrote to Mr. Wise? That I could not say. I do not know where he was living, but he was knocking about Wallsend. He was a coal-miner, and could not obtain employment. He went with a cousin of Mr. Croudace, and was told by that gentleman, so I was informed, that if he could knock up another twenty-eight men and start a mine he would give him employment.

1525. You say none of these men could obtain employment? I cannot say with the exception of two.

1526. Are you aware that coal-miners of the district of Northumberland have in many cases been the nominators of their own friends, who have come out as assisted immigrants? I am not aware. I have had no proof given me of any such cases but hearsay.

1527. Were none of the parties on board the "Northbrook" nominated by friends who were living in Northumberland? No, I do not know any except one—a Mr. Lovatt; in fact I am sure that none of the party who came to Raspberry Gully were nominated by their friends; at least they told me so.

1528. Did you hear of any others who went to Newcastle? Yes; there are some who are living there now, or rather who are starving there. But whether brought out by their friends I cannot say. Those who are have a better chance than the others, because having friends they have homes and shelter which the others have not.

1529. Mr. Charles.] You have stated that a gentleman was willing to give work to some of these men if they could get twenty others to join them;—were not twenty men unemployed in the district? That was at a pit where the men had struck at the Lambton Pit. I believe I saw Mr. Croudace with Meredith, but could not get a day's work.

1530.

* ADDED (on revision):—Meredith, Robinson, and I took a house in Hamilton between us. I sold my wife's watch. went up to Sydney, and bought some tools. I got a pair of brackets to carve, then a little polishing, and a little more carving. I eventually did a little work and took it up to Maitland and sold it. Mr. Hyndes and another gentleman then engaged me for a few weeks work on stock, so I came up with my wife and children, and have stayed ever since. While at Hamilton"

Mr.
H. V. Wigg.
11 May, 1880.

1530. Then the want of employment was simply in consequence of the men striking? Yes; the question was put to the manager at Raspberry Gully, when the exact state of affairs was discovered: "Supposing we start the pit and you afterwards make terms with your men, will there be sufficient employment for us as well as for the others?" The answer was—yes there would; the pit had splendid prospects. But the immigrants upon inquiry found that the original staff had had only two days and a-half work a week at the pit for weeks together.

1531. They refused temporary work because they could not get permanent? No; they were afraid to accept it because of the threats held out.

1532. Then it was simply the action of the labouring class that prevented these men getting work? Yes, decidedly, although there was the difficulty that they feared would crop up afterwards, and which has cropped up. For when some of the men who went, and were brought to Raspberry Gully, commenced to work, the old men gave way bit by bit, returned to their work, and the new men had to go. I omitted to state with respect to myself that I got one week's work at the Copper Smelting Works. Three of us were engaged there, but when we had worked two days, we found we were engaged as only temporary men, for when the other men came in we had to wait our turn of work, so that we managed to get only six days real work out of sixteen. I left, the other two stayed; but their earnings up to Christmas, was only about 20s. weekly; then they were off for six weeks right away; they have since left altogether.

1533. *Mr. Jacob.*] You were stating that numbers of persons who applied for passages as miners and who were refused, came out here in other capacities? Yes; so they informed me.

1534. You stated that you knew that at least in one instance a person who had applied as a miner was refused a passage, but told that if he had followed any other occupation not excluded by the regulations, and would apply under that designation, a passage would be granted? Yes, there were two, Peacock and another whose name I forgot.

1535. Were there other instances of that sort which you heard of? I heard of several; it was a matter of common talk.

1536. Were they all told to that effect that if they had worked at other trades they could get passages? Yes; I heard several people state that they had a double set of papers, so that if they failed upon one they might succeed upon another.

1537. If they were miners and had followed other occupations, if they applied as belonging to those other occupations they could get passages? Yes.

1538. The Chairman asked you some questions with reference to your letter in which you charge Messrs. Wise and Treatt with deceiving the immigrants—do I understand you to say that both were there, and one or other was advising the immigrants? The advice was given both by Mr. Wise and by Mr. Treatt. In some instances Mr. Wise gave it, in others Mr. Treatt gave it. Mr. Treatt gave it to me specifically. Mr. Wise gave it to others. I saw them myself go up to Mr. Wise.

1539. And immediately afterwards they told you what he had said? Yes, this Mr. Ingles did.

1540. They would not have had time to make up a long story themselves before they came to you? Not the least. The whole thing was done in a great hurry. We wanted to wait until the next day, and were told by the agent that if we did not go that night very likely they would not be able to take us the next day, and we might lose the opportunity. I asked the doctor did he know anything about it. He shrugged his shoulders and said he did not know, "It looks a fishy thing, but Treatt is a good fellow, and knows better than I."

1541. In reply to a question of Mr. Charles you stated that through the action of the men at the mine you could not get employment? Decidedly.

1542. If the pit had been in its normal condition you would not have been taken up there? No.

1543. You were deceived by not being told the state of things at the pit? Yes, we were actually told by the agent that there were fifty men at work at the pit.

1544. When you arrived at Newcastle you found that the fifty men whom the agent told you were at work at the pit were not there? Not one was there.

1545. When you were told by the doctor that the matter looked "fishy," what do you suppose led him to make use of that expression? I think he was a shrewder man than I, and knew more of this part of the world than I did.

1546. You complain that you were not told of this disagreement about the vend business? It was not fully explained to us. I think gentlemen in the position of Messrs. Wise and Treatt should take unbiassed views of such matters.

1547. *Chairman.*] If a list of the immigrants who came out in the "Northbrook" was placed in your hands could you point out the names of miners who came out as following other trades or occupations? I think so. I will supply a list if you wish it, giving the real callings which these men by repute and their own statements had followed at home. (*See Appendix B.*)

THURSDAY, 13 MAY, 1880.

Present:—

MR. BARBOUR,

MR. CHARLES,

MR. DAY.

J. F. BURNS, ESQ., IN THE CHAIR.

The Honorable George Henry Cox, M.L.C., called in and examined:—

The Hon.
G. H. Cox,
M.L.C.

1548. *Chairman.*] I believe, Mr. Cox, you are a native of the Colony? Yes.

1549. And you reside in the district of Mudgee? Yes, I have resided there for the last 35 years.

1550. I believe you are the owner of extensive property in that district? Yes.

1551. Pastoral and agricultural? Pastoral and agricultural.

1552. And you employ many persons? At the present time I employ very few compared with what I did some few years since. The reason of my employing so few now is that I have all my sheep in paddocks which are fenced, and they require much less care: and nearly all my land is let to tenants. All the agricultural land on the river is let to tenants.

1553.

13 May, 1880.

The Hon.
G. H. Cox,
M.L.C.
13 May, 1880.

1553. Then in what capacity do you now employ men? I have some in the farming way, and I employ a certain number of men as boundary-riders?
1554. You employ some as agricultural labourers and some as boundary-riders? Yes.
1555. Will you tell us, Mr. Cox, the rate of wages you pay? £45 a-year for my farming men, with house accommodation and full rations.
1556. And the boundary-riders? They are all married men. They find their own horses and rations, and I give them from £60 to £65, in accordance with the size of the paddocks.
1557. I presume you find no difficulty in getting boundary-riders? None whatever; if a vacancy occurs I have half-a-dozen applicants.
1558. They belong to a class that I think is to a large extent disappearing? Yes.
1559. Any difficulty as to agricultural labourers? I find it exceedingly difficult to get good farming men. I have advertised sometimes for weeks, but have been unable to get men competent to drive horses or hold a plough.
1560. And you had very few applicants? Very few indeed. Sometimes I have been unable to get one good farming man.
1561. Have you at any time hired newly-arrived immigrants? Yes, at various times I have taken them from the ship.
1562. Persons who came out on their own account or sent for by their friends? Sometimes sent for by their friends, and occasionally—very seldom—on their own account.
1563. Do you think it probable that your part of the Colony is likely to require the services of an increased number of farming labourers? I think when the railway gets near to Mudjee there will be a very large demand for farm labourers.
1564. The soil in and near Mudjee is suitable for farming, I believe? Very suitable.
1565. What are the principal crops? On the rich river flats, grain and lucerne; on the higher lands, wheat.
1566. You had some exhibits of wheat from your district at the Exhibition, had you not? Yes; they took first and second prizes against all the Colony.
1567. Is there a large extent of country that might be made available for agriculture? A very large extent—from Talbragar to Gulgong; it is all very suitable for the growth of wheat. A deep red rich soil.
1568. Have you turned your attention at all to the question of assisted immigration? I have had very strong opinions upon the subject all my life, and I think it would be a very sorry day for this Colony if immigration ceased.
1569. Do you think that in the sense of colonization? Yes, because after immigrants arrive here, if they are steady thrifty men, they become employers of labour in a few years themselves.
1570. Has that been your experience in regard to those in your own employ? Yes.
1571. Do you know many who are now on their own account as farmers? Many men who have been in my service are now on their own account—some as tenants, and some as selectors.
1572. Are they well off? Many of them are very well off.
1573. Do you think there is any prospect of a continuous supply of immigration unless assisted by the State? None whatever; we are too far from the old country.
1574. I believe you paid a visit to England a short time ago? Yes.
1575. In what year? In 1877—the whole of 1877.
1576. Did you travel much when in England? All over Great Britain—England, Ireland, and Scotland.
1577. Did you meet with many persons having any knowledge of the Colony or of its interests? I did in the higher classes of life, but not among the lower classes; they knew very little of the country—they merely got letters occasionally from their friends here, and they seemed to have very indefinite and cloudy views of the Colony.
1578. Do you think if proper arrangements were made we might get a desirable class of immigrants to come out? Those I have seen come here assisted by their friends have been a very desirable class.
1579. I presume those you were acquainted with were sent for by persons who were farming themselves? Yes, and people in my own employment.
1580. They would find employment, upon their arrival here, through the agency of their friends? Yes, through their friends.
1581. Has it occurred to you that a special effort might be made to obtain the immigration of those who have been accustomed to farming in particular? I think there are two classes that we will always have a demand for—a farming class, and domestic servants, and I have never yet seen a plethora of those two classes in all my life.
1582. Do you think by any agency you could get a larger proportion of the classes you speak of? I think if our Agent General was instructed to confine his attention to those two classes efforts might be made to have them out. We all know that latterly the agricultural masses of England have suffered extreme depression and misery; and I have little doubt that if steps were taken we should get a desirable class of immigrants out—men compelled by force of circumstances to leave England. They are going in large numbers to America. By reason of the representations of agents they go to New Zealand, and I think this Colony offers quite as good a field.
1583. *Mr. Charles.*] Have you ever been in New Zealand? I only just called there.
1584. But from what you have heard you give it as your opinion that there is an equally good field for employment here? I think so.
1585. Now I suppose in your district you have the usual number of that class of men commonly called tramps? Yes.
1586. Could those men find steady employment if they were to apply themselves to industrial pursuits as farm labourers? Many of them might do so if they were sufficiently skilful, but I think they are insufficiently skilled as a rule. Many of them have been among the old hands, shepherds, and “rouseabout” men, who do not know how to turn their hands to any useful employment. Some of them are very useful men, and can turn their hands to many kinds of bush work, which is very often much in request, though latterly it has not been so much in request owing to the depressed state of the Colony. Clearing, ring-barking, making tanks and dams—these have been somewhat in abeyance owing to the rather hard times.
1587. Do you not think that those men who generally shear in the season, and do other jobs in station work—do you not think that a great deal of their idle habits is caused by the amount of money that they earn in a short time?

The Hon.
G. H. Cox,
M.L.C.

13 May, 1880.

time? In my part of the country we have no men of that class. To a great extent the men who go as shearers are men who have farms in the neighbourhood; they go to the same sheds year after year. I am aware that in other parts of the Colony men do earn so much in three or four months that they can keep themselves alive for the rest of the year.

1588. These men would have no difficulty in taking up a farm to live comfortably upon if they would expend their money in that way? None whatever.

1589. So that men would have facilities for making a home in this country beyond anything they could possibly find in the old country? I think so most decidedly, and particularly in my neighbourhood, because the climate and soil and general run of things is so good that men would have no difficulty whatever in making a home for themselves, and they could find employment in attending the sheds in the season.

1590. *Mr. Barbour.*] You said the land around Mudgee, or in the neighbourhood of it, is very well suited for agriculture? Yes.

1591. Is much of it open for sale or not alienated? A very large portion is still open for sale. In the earlier days people were under the impression that if they bought the river frontage the rest was useless, but now we find that much of this country has been taken up, and it is better for growing wheat than the river frontages.

1592. Is it heavily timbered? Moderately timbered: box-forest.

1593. There is plenty to be got? A good deal of it is shut up from selection, being a gold-field.

1594. Do you think that those reserves for gold-fields are larger than they ought to be, or should they be kept as large as they are? I think they are a mistake altogether.

1595. And that there is plenty of land within that gold-field that would be fit for agriculture, better than for a gold-field? Much better.

1596. And therefore if the reserve was withdrawn it would be available for settlement? Yes; I do not wish to be misunderstood: When a rich lead is found I think it is desirable that a reserve should be proclaimed, so that no person could take it up and monopolise it for mineral purposes. But the Government hitherto have embraced a very large area of country, more than what was wanted; the consequence has been that men have been on those gold-fields and made money—£4,000 or £5,000 a-piece,—and would have settled down in the neighbourhood if they could have obtained the land.

1597. They could not get it? No, because it was reserved as a gold-field.

1598. You gave your consent partly to the question put to you by Mr. Burns, that if proper arrangements were made in the old Country you think we could obtain the class of immigrants that we require in this Colony? Yes.

1599. Have you any idea of your own as to what those proper arrangements should be? It is a question that requires a good deal of consideration. It strikes me that an agent living only in London would not be able to select the best kind of labour that we should require. I think it very desirable that agencies should be established in the agricultural districts, and particularly where distress is most prevalent, to obtain the kind of labour that would add to our wealth, and get the class of immigrants that we ought to obtain. I think now that the distress is so very great, that many men who would never have dreamed of leaving their country are compelled to leave, and they are the very men we are anxious to get.

1600. And you also said they are going to America and other places;—why do they not come here? The distance is too great.

1601. Why is the distance too great? A three months' voyage to men who have perhaps never seen the sea in their lives seems a terrible undertaking, and unless they were anxious to come —

1602. Exactly? We find that the representations of their friends is sufficient to induce many of them to come over. I think also that the representations of agents who were properly seized with the subject, might be made in those places where the distress is so great, so as to induce them to give up their prejudices against coming to the other side of the world—by showing the feasibility of the step, and the almost certainty of their very much bettering their situation. The very fact of the Agent General being in London, and only attending to the applications made to him, shows that he gets only those who have been informed of the advantages of the Colony, either by their friends who return home, or by letter, and many others if the matter was properly brought before them, would be induced also to come here.

1603. And one mode would be by the establishment of proper agencies through the agricultural districts? Yes.

1604. Perhaps you are aware of the feeling in the minds of people—a sort of vague feeling of people who go to a strange place, and not knowing how they are going to get on? I can quite appreciate that feeling.

1605. Do you think it would fill this void—this craving to know what they would like to be at when they got here; would it be an inducement to these people if we were offering them farms of moderate size—say give them 50 acres for 50s., or 100 acres for £5, and let them go right on to it at once? I am satisfied it would, because we know all humanity has a craving for land.

1606. And these are farming people we are speaking of. You say we require two classes of people—farmers and domestic servants. Well, farming girls often make good domestic servants, and if we get the men the girls will come as domestic servants. You think they would come if we offered them inducements in the way of offering them farms at small rentals? It would be an inducement, but I am afraid it would be tempting them to their hurt. Farming in Australia and farming in England are two very different things, and farmers coming here would be to a very great extent at a loss. A farmer here would have to turn his hand to all kinds of things, and if he had one or two years' apprenticeship he would be all the better for it. I am afraid it would be tempting them to their injury to some extent. Well-to-do men with a small capital might do, but I am not quite sure if a moderate apprenticeship here would not be more desirable.

1607. Then do you think that to offer them nothing at all would be better than to offer them something? I would offer them something in the future, which with a certainty of employment in the meantime would be quite sufficient to bring them.

1608. But it does not bring them out now? We do get them out, but only to a small extent. I think we should get them out to a much larger extent if steps were taken to go into the agricultural districts and induce them to immigrate. There are people who from their isolation have little means of making their wants known; they are not the men to go up to London and see the Agent General. These men want to be looked after in their own locality.

1609. *Mr. Charles.*] You would recommend local agents to be appointed in England, or men who have a knowledge of the Colony? Men who have a knowledge of the Colony. It would be very undesirable to induce

The Hon.
G. H. Cox,
M.L.C.

13 May, 1880.

induce people to come out here by false representations—I do not mean false in the full sense of the word, but coloured representations. People who had not this knowledge might go into those districts, and, without telling an untruth, not give the full truth. A person who was well up in the requirements of the country would be far better.

1610. *Mr. Barbour.*] This is the only alteration in the present system that you would suggest—the appointment of agents in the agricultural districts? I can think of nothing better at present.

1611. Do you not think if they had something to fill the void—to give them some home which they could say was theirs whether they became servants or not: do you not think that the fact of their getting a home at a small rental would be better than nothing at all? I am afraid it would be an inducement very undesirable to offer; it would be an inducement to them to waste a portion of their time which would be better spent in working for others. I am afraid it would be an inducement that would not act properly to the people themselves.

1612. You are speaking now only of labourers? Yes.

1613. But suppose you were to try and get a number of small tenant farmers, do you not think that the offer of farms of small area would be a great inducement to that class? No doubt, and I should very much like this Colony to offer an inducement of that kind.

1614. I think you meant that it was a desirable thing, but you expressed yourself as if you disapproved of it? I was only speaking of immigrants for the purposes of labour, and not to colonize the country. The people you now describe would be exceedingly desirable, and any inducement we could offer would be a very great benefit.

1615. Even if we went the length of paying their passages, and letting them keep their capital? Even that length.

1616. You said you had often advertised for farm servants and could not get them? Yes. They are picked up so quickly that you have little chance of getting them, there is such an enormous demand.

1617. You want any quantity of that class? Yes; the demand is much greater than the supply.

1618. Of course you have not had any experience of the class of immigrants who come out as tradesmen? None whatever.

1619. Can you say of your own knowledge that you have found many of that class of immigrants in the country? No; I think as a rule tradesmen remain in Sydney. Labour no doubt is very high, and tradesmen's wages are very high, but I have never known a case where a person who wanted any work done could not get it done by paying for it. Of course it would not be desirable to discourage these men, because as the Colony increases in size they must all come. We want all classes of society to be drawn into the Colony to meet its requirements. Many of those men, if they are only thrifty and sober, soon become employers of labour—small capitalists, and they employ labour instead of giving it.

1620. *Mr. Day.*] You are one of the oldest residents of the Mudgee district, I believe? One of the oldest.

1621. And you have had an extensive experience in the labour market in the country districts? Yes; very large.

1622. From your experience do you think the labour market in the country districts is overdone? Sometimes; lately on account of the depression of the pastoral interests I think there has been a superabundance of labour. I have known many men going about looking for employment, and could not get it.

1623. That is ordinary labourers? Yes, and sometimes unfortunate diggers. I have had a great many of that class in my district. We are very near the diggings, and we have always had to a small extent a mining population, and many of them who are unfortunate wander about seeking for employment.

1624. Is that the case with a good class of men? No; as a rule I find that good labouring men can always keep their places.

1625. Have you heard many complaints in your district, or anywhere, of the want of remunerative employment in the country districts? I have just mentioned that in my district for a year or two a good many men have been walking about looking for employment, which I attribute to the depression in pastoral pursuits. There is less work going on on stations, such as dam-making, tank-sinking and so on, than there has been for a long time past, and to that I attribute a corresponding superabundance of labour.

1626. Do you think that the present mode of immigration should be continued? Yes.

1627. The present system? Yes; I think it is very desirable. I have never found other than good results from it. Of course occasionally persons do send for their friends, merely because they are their friends and relatives, and sometimes they are not a desirable class. I have known men sent for by their friends who could not turn their hands to anything, but that has been to a very limited extent. As a rule I do not think a person would send for a friend or relation unless he thought they would not be a burden to him when they came out.

1628. Is it your opinion then that the present system could be continued with benefit to the persons themselves, and to the Colony too? Yes.

1629. Why? Because the class of labour we have to employ up the country is exceedingly difficult to obtain. Domestic servants always have been in great demand. In all my experience I never yet knew a sufficiency of that class of servants.

1630. *Mr. Charles.*] Have you ever heard that there was a great dislike by immigrants to go up into the interior—the female servants especially? Yes, and there is another very curious phase, and very likely you may have seen it. Shepherds, who live from hand to mouth, I have known them take a pride in thinking that they would bring up their children in idleness. They say,—“I have had to work myself but my children shall not go out to service.” So it is difficult to get the class of domestic labour; we can only get it by immigration. My wife has generally taken some young girl, and taught her—and then after a while she gets a husband and goes away.

1631. *Mr. Barbour.*] If those tenant farmers were induced to come here, and were induced to go up the country, would not some of their family be the best domestic servants? We could not get better—before they had time to get demoralised, as it were. My tenants—I have a considerable number, good and steady men, well-to-do—many of them are so utterly stupid, and lost to all sense of what is right, that they are bringing up their daughters to ride on horseback, and play the piano, while the men are working on the farms, and the mothers milking the cows.

1632. What is the usual rental? In the immediate neighbourhood of Mudgee from 15s. to 20s. an acre for agricultural land, and from 2s. 6d. to 5s. an acre for grass land attached to the agricultural land. Our lands are on two flats, the river flat, and another flat running towards the mountains; good grass lands.

1633. Has that land been fenced in by you, or is it let on improving leases? All my farms are let on improving leases.

1634.

- The Hon. G. H. Cox, M.L.C.
13 May, 1880.
1634. Then you do not fence them? No.
1635. That land you describe—that red soil—well adapted for wheat when it is in the hands of private parties, and rented in the same way;—what is the usual rent? This red soil was never purchased, and is not now. All the river flats are taken up, but 2 or 3 miles away from the river is never taken up. It is fine grass land, but very dry.
1636. And in your opinion it would make good wheat land? It does now, and grows splendid crops.
1637. *Mr. Day.*] Have you any evidence of an improvement in the pastoral interests of the Colony—the squatting interests? Oh yes; I should think a very great improvement. As a rule squatting now-a-days is carried on in a very different way to what it was in the old times. I can remember when men who were placed in a position of a certain amount of confidence in managing large cattle and sheep stations were living in huts.
1638. I mean in the financial condition of the squatters, which would enable them to employ more hands? I think in a short time we shall have everything prosperous. The financial condition of the squatters is no doubt very much improved.
1639. Has not this been a remarkably fine season? Yes, and there has been a wonderful rise in the price of wool, which makes everything *couleur de rose*.
1640. What difference do you suppose the increased value of wool will make to this Colony? I have made a calculation—a million and a quarter.
1641. Do you not think then there is every probability of the squatters improving their properties to a much larger extent than formerly? I have no doubt of it. This million and a quarter is all surplus money. For instance, we have our sheep run upon ridges rather heavily timbered. We have had to get men to ring-bark it. I am now ring-barking rented land—Government land; and I believe I shall be able to carry twice the number of sheep now.

TUESDAY, 18 MAY, 1880.

Present:—

MR. BARBOUR,
MR. CHARLES,

MR. DAY,
MR. JACOB.

J. F. BURNS, ESQ., IN THE CHAIR.

The Honorable E. D. S. Ogilvie, M.L.C., examined:—

- The Hon. E. D. S. Ogilvie, M.L.C.
18 May, 1880.
1642. *Chairman.*] I believe you are an old colonist? I am; I have been in the Colony nearly all my life; I came to the Colony when a boy; with the exception of an absence of five years, I have dwelt in it ever since.
1643. In what part have you resided? For many years upon the Upper Hunter. I resided there until 1840, and since 1840 on the Clarence River, with the exception of five years, from 1854 to 1859, when I was absent in Europe.
1644. I believe you have some stations in the Clarence District? I have.
1645. And employ a good many hands? Yes; the number of mouths to be fed upon my station, including men, women, and children, and my own family, is from 70 to 90.
1646. In what capacity are you an employer? As a cattle-breeder.
1647. You employ men then as boundary-riders, and in attending cattle? Yes; I employ a good many stockmen, who are all married men—for I always employ family men. My run is divided by fences into several compartments, and I always employ one for each compartment. Then I improve a good deal, and employ gardeners and others. I have also always one or two carpenters, and very often a blacksmith. There is always a great deal of work going on in making improvements and in building in various directions, so that I have had considerable experience in the employment of mechanics as well as of stockmen and shepherds. I have built a house at the cost of some £10,000 or £12,000, which I began about 20 years ago, and employed mechanics of many descriptions in that work; and I have almost always some buildings going on for outstations and improvements of various kinds; so that I employ many men besides those directly engaged in tending cattle.
1648. Did you employ as many last year as you had done in previous years? Not last year, for I have been absent with my family from my own property; consequently there was little or no improvements going on, and the number last year was below the ordinary number.
1649. Is it the fact that owing in some degree to depression caused by drought, fewer men were employed during the last than in previous years? I should imagine it to be so, that the failure of means on the part of owners of stations was the reason for their employing fewer hands in improvements than usual.
1650. Do you think there is a better prospect now opening for persons engaged in pastoral pursuits? Yes, I do; I think there is a considerable revival, and a desire to continue improvements in country properties.
1651. Do you think that will be attended by an increased demand on the part of squatters for men on their stations? Yes; I feel no doubt it will do so. I may mention in my own case that I have lately sent up a carpenter to my property; and four or five other married couples either have been despatched or are going.
1652. You sent them from Sydney? From Sydney.
1653. Have you found any difficulty in getting the people you wanted for your stations? I have always found more or less difficulty in getting people at a rate of wages I considered reasonable. For instance, when I looked round for a tradesman who would be a tolerably good carpenter—and I may mention that the proof of skill I required was whether he could make a wheelbarrow—a rough carpenter—who would also be able to use a paint brush or put in a pane of glass, I was told that I should not get a man to go under 10s. a day for twelve months hiring. When I represented that the man would be found in lodging and in all the meat, bread, tea, and sugar he would require, the response from the man I spoke to was that in that case he might go for 9s. a day. By delaying some time and employing labour agents I ultimately succeeded in getting a man and his wife for £95 a year with two rations, the husband to be wholly employed by me and the wife to assist two days in the week in the laundry. Upon these terms the couple agreed to go for twelve months, and I had to bear the expense of their transit from Sydney to the station.

1654.

The
Hon. E. D. S.
Ogilvie,
M.L.C.
18 May, 1880.

1654. What has been your rate of wages for ordinary hands employed upon the station to tend the cattle? I give my stockmen, who are all married men, £5½ a year and two rations.

1655. And a place to live in? And a place to live in of course; also milch cows for their own use, to supply their families with milk and butter. When I said double rations I alluded to the articles flour, tea, and sugar; of meat my stockmen are allowed to use as much as they require for the feeding their families.

1656. Have you found any unwillingness on the part of the men whom you have met in Sydney to go into the country? Yes; I find generally a disinclination to go into the country on the part of tradesmen particularly. I have also found during all the years I have employed men that servants, particularly tradesmen, whom I have engaged in Sydney for a period, always, or almost always, return to Sydney after they have served their time and taken their money. Sometimes they will re-engage in the country for another period, but they always gravitate back to Sydney. They come down when the hiring is over. They seem to go out of Sydney for a specified time, and take it as a matter of course that they must come back to Sydney at the end of the time; not only tradesmen, but frequently also gardeners, ploughmen, stockmen, and others.

1657. All have a tendency to gravitate towards the capital? Yes; and I have often found that after returning to Sydney they spend their money, exhaust their means, and then engage to go up the country again. All the money earned in the country is exhausted in Sydney.

1658. Have you met with no provident persons among those you have employed? Yes, I have; I have met with some who have saved up considerable sums of money.

1659. Did they remain in employment or go into farming or other pursuits? They have gone into farming. When they have left service they have taken land for themselves, or have gone into business on their own account as small shopkeepers or as butchers, as carriers, and sometimes as publicans.

1660. Do you think they have done well? Some have and some indifferently; the failure to do well has generally been the result of intemperate habits.

1661. Have you found any difficulty in getting the men you wanted for your stations, other than tradesmen? I can always get men by sending to Sydney, and employing an agent, and by paying the expenses of the transit of the men from Sydney to the country; but then in many cases the men turn out to be not at all worth the wages they are engaged for. I have never been able to get men in Sydney for many years past for less than £40 to £45, with rations, lodging, and their expenses paid from Sydney to the place of employment. If a man is industrious and at all able he is worth the money, but it often turns out that he is neither able nor industrious and not worth the money, and I suffer loss. It sometimes turns out that a man is so worthless that after he has been with me a week or so I am glad to pay him his wages and get rid of him.

1662. You would not object to the wages for a good man who was willing to remain? No.

1663. Have you at all turned your attention to the question of assisted immigration? Yes, I have watched the progress of it.

1664. Have you yourself at any time had any of these newly-arrived immigrants? Not for some years past. I do not think I have had an immigrant from the ship.*

1665. What is your opinion as to the capability of the Colony to absorb immigrants aided by the Government to come out? Seeing the large extent of territory that is occupied, and the great amount of work that almost all people either have in hand, or contemplate having in hand, whenever they can procure labour—considering the very limited amount of population existing in the country, I cannot feel a doubt that there must be room for the absorption of a large additional amount of labour. The influx of immigrants causes the demand for work of itself. Immigrants when they come do not bring their houses on their backs; every man who comes requires house-room to be provided for him, and that house-room has to be provided either in anticipation of his coming or as soon as possible after he has come.

1666. Have you known any of these assisted immigrants to become employers of labour? Yes, to a certain extent.

1667. After they have been some time in the Colony? Yes, I have known some very remarkable instances of that kind, where men have come to the Colony without means who are now wealthy and employing numbers of men. My observation has led me to this conclusion: That any able-bodied man who comes to this Colony, if able and willing to work, if thrifty, and especially if sober, can in a comparatively short space of time—in a comparatively small portion of his life-time—accumulate sufficient means to make him independent and enable him to employ labour. I will take the instance of a single man going into the country upon wages of from £40 to £45 a year, with rations. There is nothing at all to prevent that man from saving £25 to £30 a year, because £10 to £15 a year would fully cover all necessary expenses if he were desirous of saving. He has nothing to buy but clothing, and such clothing as is necessary and is worn in the country here is very inexpensive.

1668. Have you known many instances of men under these circumstances becoming their own masters—possessors of farms and employers of labour? Yes, I have had men who while in my employ have saved enough to become independent.

1669. Then you think the country is capable of absorbing a large number of useful immigrants? I feel no doubt of it whatever.

1670. Both male and female? Both male and female—female immigrants particularly. There never was a time within my recollection when female domestic servants were more difficult to procure or to retain than at present, or when their wages were so high; and I have been in the Colony since immigrants began to be drawn to it.

1671. In what year did you visit England? I left the Colony in 1854 and returned in 1859.

1672. Did you travel much while you were there? Yes. I travelled through all Europe; I visited all the principal countries and cities of Europe.

1673. Did you travel much through Great Britain? Yes, through Great Britain and Ireland.

1674. Did you meet with any disposition on the part of persons who would be desirable here as colonists to emigrate to New South Wales? I had not much means of ascertaining. It was a question I did not go into to any extent. When in Europe I was more engaged in sight-seeing. I went home for purposes of

* ADDED (on revision):—The last time I engaged an immigrant from the ship must be about six years past. The person I then engaged is still in my service as a superior overseer, at a salary of £300 a year, with house and food and a servant found him.

The
Hon. F. D. S.
Ogilvie,
M.L.C.
18 May, 1880.

of pleasure more than for business. I may mention that I sent out one Irish family from Ireland. They were related to a man who had been in my service and who came here as an exile. I sent out two lads and their mother to join this man on my property, and they have done very well.*

1675. *Mr. Charles.*] There is now a large population on the Clarence? Yes.

1676. Is there still room for a great many more? I think an increased population makes a demand for a still greater increase. There are more employés and more work to be done.

1677. Is there an open field for new colonists—By extending backwards from the river, would they not then be able to take up land and make homes? Not, I think, until railways are stretched into the country. The land most suitable for agricultural purposes in the valley of the Clarence is already taken up; the whole of the banks of the navigable portion of the river from end to end is occupied by farms, and beneficially cultivated by farmers who were never before in so prosperous a condition. They are mostly engaged in sugar-growing.

1678. I am informed that a considerable quantity of the back country—the higher land—is good agricultural land? That is the case more in the valley of the Richmond than of the Clarence. In the valley of the Richmond a good deal of forest country is good soil of volcanic origin, rich, and capable of settlement, and it is being settled very fast. There is a considerable flow of conditional purchasers into that district. I may, perhaps, be allowed to mention what is my view of the causes of the want of employment of some persons or classes of people: From my experience and all I have been able to see and hear—and when I speak of want of employment I refer to the city, one does not hear of it in the country—want of employment simply means in the vast majority of cases (I do not doubt that there are some cases of real destitution, but I think they are very few), means that employment is not to be had at the arbitrary value which the person who complains has thought fit to fix as the value of his labour; and if he cannot find any person willing to buy his labour at that fixed value he says he cannot get employment, whereas if he were willing to be employed at such a rate of wages as his work is worth to the employer he could be employed. It does not appear to me reasonable to suppose that a fixed value can be placed upon a man's labour to be invariable, any more than a fixed price can be placed upon any commodity which is bought and sold. It would be no more unreasonable for me as a breeder of cattle to say that my fat bullocks are worth a certain price and I will not sell them for less, without reference to the state of the market, than it would be for a man to say his labour is worth a fixed price without reference to the state of the labour market. For instance, a year ago I could sell fat bullocks at £8 a head; therefore at that time I asked and could get £8 for them, but if I had established that as the fixed value of my bullocks, never to vary, of course now I should not be able to sell a single beast. But it would not be just for me to say that there was no market for fat cattle, any more than it would be for a man to say "I cannot get employment," because he could not get the arbitrary value which he himself, or others for him, had fixed as the price of his labour; or, to put it in another way: If a man who is physically or constitutionally incapable, or who is unwilling to work up to his powers, for labour, refuses employment because he cannot obtain wages equal to those obtained by men who are physically capable and are willing to give a good day's work for a good day's pay, it is as unreasonable on his part to say that he cannot find employment as it would be for the breeder of bullocks to say that he could find no market for his inferior cattle, because he was unable to obtain for them a price equal to that which he could command for the superior animals. The price of labour must rise and fall according to the state of the market, according to the demand, and the state of prosperity of the community generally. It must rise and fall like the price of any other commodity. When all classes are prosperous and profits are large wages naturally rise, because employers can afford to pay high wages and make a profit out of them. In times of depression, when profits are small, wages must naturally fall, and the only way then for people who have labour to dispose of, to ensure constant employment, is to accept the wages which represent the value of the men's labour at that particular time. Then, again, there has been a most arbitrary rule established among mechanics, which is this: that the most able and skilled mechanic shall earn no more than the least skilled. According to the rules established among these people (I allude to the rules of the Trades Unions), the men whose services are worth really very little to an employer are not allowed to take lower wages than a man whose services are worth a great deal. The natural consequence of that must be that he goes without employment, and the man who is able and skilful earns less than he could and would do if he were not restricted in this way, while the other being restricted from working for what his labour is worth earns nothing at all.

1679. I presume that these remarks would simply apply to labour required and furnished by the working class in the Colony. Would not the rate of wages here be influenced by the cost of production of goods imported from other countries? That is another circumstance. If an artificial value is placed upon labour, and the artificial value is more than the real value, the result is that the results of labour where it is employed are so expensive that competition with the results of less expensive labour is rendered impossible. Take a piece of furniture or any other article.

1680. An iron ship? Any article produced by means of labour which is remunerated at a rate more than its market value—as value is determined in all other commodities. If a ship or piece of furniture is made by means of labour paid at this artificial rate, which is more than the true value of labour, then that piece of furniture or ship must cost so much as to put it out of the market as compared with other articles or ships made under different conditions where the remuneration of labour is not fixed by artificial means.

1681. Then you think our tradesmen contribute to the causes of want of employment by the artificial price they put upon their labour? Yes; I think the main cause of the absence of employment is the artificial value put upon the commodity to be sold. In nine cases out of ten where men complain that they cannot find work the reason is that they demand for their work more than the employer can find it to his interest to give.

1682. *Mr. Barbour.*] Have you had any experience yourself in regard to town labour, for instance tradesmen—I mean in a large way as a contractor? Not directly, but indirectly I have as a shareholder in a Steam Navigation Company.

1683. You have never come directly in contact with working men I suppose in a large way? No; I cannot say I have directly, but indirectly I have.

1684. But you have had a large experience in the country? Yes, but indirectly, as I have said, I have also

ADDED (on revision):—I also sent out to my property on the Clarence one family from London, and from Hamburg, when I was travelling in Germany, I sent out twenty Germans, chiefly mechanics, but including some women and children. These people were selected from a large number of applicants who desired to emigrate to Australia, but who could not command the means to do so. Most of these people have done well for themselves, though some of them were very unprofitable servants.

The
Hon. E. D. S.
Ogilvie,
M.L.C.

18 May, 1880.

also here as a shareholder in Steam Navigation Company, where large repairs have to be effected in steamships. I find in such cases that the repairs are always excessively costly, and when I look into the causes I find that one cause at any rate is that the men employed to effect these repairs, and who are receiving very high wages, not only work but eight hours but work very badly during those eight hours in which they are supposed to work. They frequently do not perform more honest work in eight hours than ought to be done in five. And I have understood that one cause of that great reluctance to work honestly is the feeling or idea that for a workman to work hard would be to fail in his duty to others of his own class. For if he works hard he performs a certain amount of work, and if he works in a dilatory way, wastes as much time as he can, performs as small a quantity as he can, he leaves the surplus for the employment of some others. The result of all this is to annihilate profit in steamship companies, and to discourage the investment of capital in all enterprises which necessitate the employment of large numbers of men.

1685. Is it usual for capitalists to go into transactions that cause them to lose their money? I think for some time past there has been a general feeling among those engaged in concerns that necessitate the employment of a large number of men if they could get clear of their business without loss they would do so.

1686. Are there not companies of that sort being formed every day; is not capital being put into such companies every day? I cannot say that there are.

1687. Shareholders could sell out if they would take the price offered? They could only sell at a loss.

1688. It is only a question of price, as in the case of labour. You have had a pretty large experience in the country? Yes.

1689. Is there plenty of employment in the country;—it is limited, is it not? I may mention what has occurred in my own experience. Men come on to the station expressing a desire for work; they say they are quite without means, have been looking for work, and cannot find any. Under these circumstances I never turn a man away, but always give him something to do to pass him on his way, and can find him something to do, however little skilled in any occupation. Perhaps I may send him into the garden to hoe weeds, or employ him in some other simple occupation. I often put the question, "Can you use the hoe or spade?" "Yes." "Well, you can go into the garden, and you will find something to do." The man will go to work and after having worked a day or two, he will come to me and ask, "What wages are you going to give me?" "The ordinary wages of 15s. a week and rations." In such cases I almost invariably find that these people, after a week or two, when they have a little money to take, will say, "I cannot go on working any longer at the wages you are giving me; I never work for less than £1 a week; and unless you give me £1 a week I cannot stay." I reply, "I gave you employment to suit your purpose because you said you could not get work. If you are not content with your wages I will pay what is due to you, and you can go." The result generally is that the man takes his money, goes away, and spends it; and when it is all gone goes to some one else with the same tale—that he is without work—and obtains assistance in the same way. Now I do not think any man has a right to say that he is without employment as long as he can earn 15s. a week, with food and lodging added. With respect to the want of employment here, I may mention a circumstance that was recently related to me by a gentleman, upon whose veracity I can rely. My friend lives in the suburbs, and he told me that a man came to his house a few days previously to beg alms. He said he was quite destitute and could not obtain work. My friend, who had some improvements going on upon his grounds, said, "Do you want work; I think I can give you some. I want a man to work upon the grounds here; I can employ you for a fortnight at any rate, and will give you 6s. a day." The man said "No; I will never work for less than 7s. a day." My friend said (I think very properly), "You rascal, you come to me to beg, and you say you cannot get work, yet you refuse 6s. a day. Get off my premises, I will have nothing to say to you." That is a fair sample I think of what is called inability to procure work, or want of work in many cases. As I have said before it is not that work is not to be had, but that employers are not to be found who will give the arbitrary and often excessive amount workmen demand for their labour.

1690. These are the exceptions, are they not—what is called "tramps" or "sun-downers"? To give my candid opinion I think with rare exceptions no good man who is able and willing to work need look far for employment. I believe there is always work for men who will take it at a reasonable rate and do a fair day's work.

1691. Do you think we ought to continue assisted immigration to the Colony? I think it is absolutely necessary to the prosperity and due advancement of the Colony that there should be immigration.

1692. Assisted immigration? Assisted immigration is a very good form of immigration I think, because under the regulations the immigrants are sent for by their friends who are here and who are ready to receive and to assist them.

1693. I am speaking with reference to the selection of immigrants in the old country whose passages are paid by the Government? That opens another question. I start with the assumption that immigration to a new and thinly-peopled country like this is absolutely necessary to its advancement, and that from our peculiar position, being so far distant from all centres of population, we cannot acquire immigration unless we pay for it. The position of this Colony is peculiar in that respect. The increase of population which spontaneously flows into American and to some British Colonies can only be induced to flow into this Colony by being paid for owing to the greater distance and consequentially increased expense. It being determined to be had at all immigration must be paid for; the only question is whether it is better to pay for immigration than to want it. I think it is better to pay for it than to want it. From my own experience from what I have observed I can say that when immigration has been stagnant wages have been lowest and the Colony has been least prosperous, and that with the return of immigration the general prosperity has revived and wages have risen.

1694. What scheme of immigration do you think would attract the best class of men to the Colony;—you have described a class of men who are not useful—these tramps; these, I suppose, were brought out at one time; can we avoid bringing these and secure a more useful class? I do not know that it is possible so to manage in any community as to avoid the existence of tramps; I believe to a certain extent persons of that description will exist in every community; it is a necessary evil that cannot be avoided. I have known instances—very prominent instances—in my own experience of men who have been brought to this country as immigrants who have been most useful immigrants, capital tradesmen, excellent men, who have become tramps in the end; they have become drunkards, lost their self-respect, become worthless vagabonds, and ultimately tramps. So that I do not think it is possible to avoid having to a certain extent an element of that kind in the community. It is one of the evils incident to the foibles of human nature.

1695.

The
Hon. E. D. S.
Ogilvie,
M.L.C.
18 May, 1880.

1695. I suppose the selection might be improved;—you would not say because these people will be found in all communities that we should take them as they come? Certainly not; I think it very desirable that immigrants should be selected with care; as they have to be paid for, we ought to be careful that they are worth paying for. Of course where immigration is spontaneous we cannot regulate it—we must take the bad with the good; but every care should be exercised that every individual selected should be worth the money he is to cost the Colony, so far as that is practicable.

1696. By what class of immigrants do you think the Colony would be most benefited? At the present time I think all kinds of agricultural labourers. I am inclined to think that the number of skilled mechanics in the Colony is sufficient for the requirements of the present population; but I am of opinion that there is a very great dearth of ordinary labour, such labour as is necessary for constructing roads, for forming railway earthworks, for clearing land, agricultural labour, and such labour as any man with a pair of strong arms can perform.

1697. Have you had any experience of tenant farmers in the old country? No, I have not.

1698. Do you not think they would be a desirable class of immigrants to bring out? I think, in the present depressed state of the agricultural interest in England, many would very much better their fortunes by coming out here.

1699. Do you think any attractions should be offered them to come here? I am quite of opinion they will not come unless some attractions are offered; they will rather go to some nearer British colony or to America.

1700. Is there any scheme you could suggest to induce them to come here, instead of going, for instance, to America? I cannot say that I have been able to arrive at any very positive conclusion. In America the chief attraction seems to be cheap land. The facility with which land can be acquired, and the low rate at which it can be bought. That being so, one would be inclined to suppose that the system in operation in Queensland would have had the desired effect; land there was given directly in exchange for immigrants by giving immigrants the right and authority to take up land to the value of their passage money. But it does not appear to have worked satisfactorily there, the land orders received by the immigrants having been used very much in the same way as the land orders given to our Volunteers here were used. They were sold to those already in possession of the land; therefore having seen the difficulty of devising any scheme by which the land of this Colony, and the farming population of England could be brought together, it appears to me that the difficulty is greater in practice than it appears to be in theory.

1701. Suppose instead of giving land or land orders we were to offer to allow these people to have land at a small rental, do you think that would be an inducement to the tenant-farmers of the old country to come out here, as they would not have to spend their capital? Yes, I think if they could obtain land at a small rental, and for a goodlong period, that would be an inducement.

1702. I suppose there can be no doubt that that would be the best class to bring out as they would bring out their families, which are generally large and who would be useful? Yes, they would be a valuable class, but then comes the question whether they would be able to carry on agriculture at a profit.

1703. Have you any tenants on the Clarence? No; I have not more than two agricultural tenants, and some eight or ten tenants in the township. The question is whether they could carry on agriculture at a profit on account of the scarcity of labour I have alluded to, so long as ordinary labour is paid at so high a rate as it can command. I do not think agriculture can be carried on at any profit by persons who would have to employ hired labour. Agriculture now only pays when carried on without the assistance of hired labour. Small farmers cultivate their lands mainly with their own hands, and the hands of their families. If they use hired labour it is only to a limited extent and for a short period, but when we come to the case of the English tenant farmers, who would have to cultivate land mainly by the hands of hired servants, I do not think they could make it pay.

1704. If small tenant farmers who in the old Country cultivate their farms with the labour of their own hands and the hands of their families were to come here would they not make it pay? Yes, farmers of that class do make agriculture pay here. Farmers who do not employ hired labour to any extent; it has been expected that the extension of railways into the country would have the effect of rendering profitable the cultivation of lands in the interior where cultivation has not been profitable hitherto, but I have always felt some doubt of this, and lately have seen some proof that the expectation will not be realized so long as the wages of common agricultural labourers continue as high as it is now. For this reason, that by the construction of a railway the cost of transit is so very much lessened, that such agricultural produce as wheat and flour imported from California or the Western States of America, can, by means of railway transit, reach the interior and be sold at a lower price than would pay the local agriculturist, who complains already of being injured by the American farmer, that imported flour is brought up by railway and is sold at a rate at which he cannot afford to sell his. Hitherto, or before the railway reaches these inland agricultural districts, there has been, or is a certain demand for agricultural produce at a high rate. The principle upon which the agriculturists in the interior have generally acted, has been to add to the Sydney price of their produce the cost, or something near the cost, of bringing similar produce from Sydney. The farmers, for instance, at Inverell, or other of those inland settlements, has been in the habit of charging for his flour the Sydney price with the cost of transport from Sydney, or something approaching it, added, and in that way has been able to obtain for his produce a high price, although the market for its sale was limited. These people have looked forward to the construction of railways as enabling them to find a market for their produce in Sydney at a remunerative rate. But it seems in some cases they are now finding out that the price they would be able to obtain for their produce, after sending it to Sydney, would not be sufficient to make the transaction profitable to them—that they would not be able to obtain in Sydney the price they could obtain in their own neighbourhood formerly, while flour is sent from Sydney and they are undersold in their own district. So that, looking to all these things, it seems to me that the question of success or failure of agriculture in this country is dependent entirely upon the rate of wages of farm-labourers. As long as farm labourers' wages continue at the present prices farming cannot be profitably carried on, as the imported article will always be cheaper than the home produce.

1705. Why should not farmers in this country produce as cheaply as the farmer in California or in other places? I have heard it explained by Americans who have been in this country in this way:—They have said in the first place, "Although we pay our men as high wages as you, our men do twice as much work as yours."

1706. By means of machinery? No, because they work harder. I have known Americans to say they would

would not employ such men if they would work for nothing in their country—that they were not worth their salt. An American farmer would not look at such men, but would discharge them immediately.

1707. Why should an American in America work any better than an Englishman in Australia? I cannot say why. I simply mention what I have heard from Americans.

1708. Is it reasonable to suppose it? Very likely the climate has something to do with it.

1709. Supposing Australia is equally as salubrious, equally as healthy, equally as inviting, why should not our men settle here on the land and produce grain every whit as cheaply as they can in America? It is a question every one can ask, but it is a fact that they do not produce it so cheaply. I think something may be attributed to climate. This is an exceedingly luxurious climate, mere existence is a pleasure, the sun is warm, the air is clear and bright, and possesses an exhilarating quality that makes mere existence a happiness to a certain extent, while in America the climate is much more vigorous, excepting for a few months they have a great deal of cold weather. Altogether it is a less enjoyable climate, but more invigorating, and men are more inclined to exertion than here.

1710. *Chairman.*] In speaking of farming not being remunerative, have you kept in view chiefly the Clarence—you are not speaking generally of New South Wales? In the district of the Clarence—on the navigable parts of the Clarence—agriculture is carried on, and is very remunerative. Its profitableness is mainly attributable to the kind of agriculture carried on there, which is sugar cultivation, conducted by small farmers who employ little hired labour.

1711. You seem to speak as if wheat were the only product of the Colony;—do you not know that in many districts wheat is not cultivated, and yet agriculture is profitable? Yes, sugar pays better than wheat; maize pays better than wheat; but the demand for maize is not unlimited. I may mention now that my attention is called to it, that before the introduction of sugar culture on the Clarence, the farmers there were exceedingly poor as a class, so poor indeed that many scarcely tasted butcher's meat from year's end to year's end, but shot wallabies, wild ducks, and cockatoos for food. The price of maize had fallen so low in consequence of the quantity produced, and that was the result. Since they have turned their attention to sugar growing they have produced less maize, and the price of maize as a rule has been higher. The land devoted to sugar-culture has paid a great deal better than when previously devoted to maize-culture, and those farmers who were so very poor a few years ago are now exceedingly well off.

1712. *Mr. Day.*] Do you employ many men? Yes, for many years—for twenty years after I settled on the Clarence my land was stocked with sheep, and I had often considerably over a hundred persons to whom I issued rations. Of late years, as I have already stated, the number of mouths I have to provide food for is from seventy to ninety.

1713. Have you found that many of those in your service have saved money? Yes.

1714. From your experience do you think there is a fair field in the Colony for a large number of immigrants? Yes, I think so as I have already stated.

1715. Have you had any experience of the labour market in America? No, only from reading, and talking with Americans.

1716. Do you think America a better field for emigrants from the mother country than this Colony? It would be perhaps rash in me to express an opinion, as I have never visited America.

1717. Is there not generally a disposition to go there rather than to come here? No doubt, on account of the greatly diminished expense. There are thousands of persons who can reach America by their own means to whom Australia would be quite out of reach without assistance. I think, speaking from recollection, persons can reach America from the United Kingdom by paying £3.

1718. Do you think it would be advantageous to the Colony and to immigrants themselves to continue the system of assisted immigration? Yes, I think it would be very disastrous to the Colony if immigration should cease. I think immigration can only be obtained by paying for it, and that therefore the moment we cease paying it will cease.

1719. Do you think it is as beneficial to the immigrants themselves as to the Colony—do you think they have a fair chance of succeeding here? I think every strong and healthy man who comes to the Colony has it in his power to gain a competence, if he is only industrious and sober.

1720. You think most of the men who are out of employment are what is called "loafers?" Yes.

1721. From your experience you think any man can find remunerative employment? Yes. I have no doubt that any man capable and willing to work at such rate that his employer can make any profit out of his labour can find employment. If he cannot find it in one place he can in another.

1722. What do you think of Chinese immigration—do you think that ought to be put a stop to? I do not think it ought to be encouraged. I do not think it ought to be put a stop to, unless we find it to be excessive in degree. To put a stop to it unnecessarily would be a grievous violation of our Treaty relations with China. I think it would be undesirable that Chinese should form a large element in the population, and if we saw a danger of that becoming the case it would be a ground for appealing to the mother country to alter the Treaty obligations in such a way as to allow us to prevent any further influx. I have employed Chinese, and have found them excellent servants.

1723. *Mr. Jacob.*] Are there many Chinese on the Clarence? There are a good many in the Clarence district, but I do not know any in service now. There are a good many scattered over the gold mines, generally on mines which have been abandoned by Europeans.

1724. Do large landholders on the Clarence River let farm lands on lease? Those who possess lauds which they do not cultivate themselves and which are fit for the purpose do so.

1725. Are there many farms let on the Clarence? Yes, on the Lower Clarence.

1726. What is the yearly rent paid? I heard from a person upon whose statement I can rely that conditionally purchased land, taken up under the 13th clause—for which the deposit of 5s. an acre had been paid—was now let at £3 an acre per annum.

1727. Is that fully improved? Probably it was taken up at first on a clearing lease; it is now cleared, and the owner is obtaining £3 an acre rent; but this is an exceptional case. The usual rents for farm lands on the lower Clarence is £1 per acre, and the selling price about £20.

1728. That is for agricultural purposes? Yes, for sugar growing.

1729. Would there be any chance at all for immigrants coming to this Colony with small capitals to get one of these farms at small rentals, and so obtain homes at once and settle down? These farms are already rented.

1730. It would be hard to get one of these farms? Yes. When offered for sale they bring very high prices, as much, in some cases, as £30 or £40 an acre.

The

- The
Hon. E. D. S.
Ogilvie,
M.L.C.
18 May, 1880.
1731. Do you know any other parts of the Colony where there are large landed properties let as farms? Yes. I might mention Bodalla, the property of the late Mr. Mort.
1732. It is, generally speaking, pretty difficult to get these farms, is it not? I am hardly sufficiently acquainted with the subject to give an opinion. As a rule men are not inclined to look for farms to rent while the country lies open to them to select.
1733. With reference to the Chinese, do you think it is desirable to include the immigration of Chinese under the Assisted Immigration Regulations? No, I should think not. China being so near to us with such a redundant population we are likely to receive, without any encouragement from us, as large a flow of immigration as it is desirable we should have.

Charles Field, Esq., J.P., examined:—

- C. Field,
Esq., J.P.
18 May, 1880.
1734. *Chairman.*] How long have you been in the Colony? About forty-two years.
1735. I believe that when you first arrived you went into agricultural and grazing pursuits? Yes. I came out as an agriculturist, and employed my first time as an agriculturist. I cleared the stumps and fenced the farm, and worked it for seven years as a farmer.
1736. You have also been in business as a miller? Yes. I had about fourteen years as a miller.
1737. You are now in business in this city as a produce and general merchant? Yes, and have been the last eighteen years.
1738. Has your opinion as a colonist led you to form a decided opinion upon the expediency of immigration being aided by the Government? Yes. I think it should be aided by the Government.
1739. Have you found any difficulty in getting persons of the agricultural class as labourers for your constituents? My constituents are farmers, all of them; and we have had great difficulty in getting suitable immigrants for the parts of the country I have wanted to send them to. I have been restricted to a certain price, generally from £35 to £40 a year with rations and a house, and it has been difficult to get the class of men I have wanted at those wages; that is to say, men that, knowing something of the requirements of the place, I have thought suitable.
1740. Have you generally been able to get them even at a higher rate? I have had very great difficulty in getting agricultural labour that would have suited my constituents or the Colony. When I have gone on board an immigrant ship, or to the hiring-room at the depôt, I have asked men, "Can you plough or sow?" The reply has been, "Yes." I have hired them, and sent them to my constituents, and when they have been set to work they have not suited at all, and perhaps have never had their hands on a plough in their lives.
1741. Do you think the Colony could absorb a large number of persons of the class you refer to that would be suitable for agricultural purposes here? I believe the Colony could employ any number provided we could get the right class of agricultural labourers. There are many places to which I could send labourers at the present time if I could get men of a suitable class.
1742. From what districts do you chiefly receive consignments of produce from farmers? From the Hunter, the Manning, the Richmond—from the north generally, but I also receive some from the south.
1743. From what places in the south? Wollongong and Kiama. Not so much from the south. A large portion of the farming population removed to the Clarence and Manning are old Hunter River residents, and when free selection was permitted many of the tenant farmers left and established farms for themselves. Many of these are now possessed of comfortable homes, have good farms of their own, and are in a good way of business.
1744. Have you known many who when they first came here were hired by others, who afterwards selected land, became farmers themselves, and have done well? I know large numbers of such cases. I know people who came out in the same vessel as myself without a shilling in their pockets, who are now some of the richest men in the Colony.
1745. Do you think there is an ample field in the Colony for a great number of the same class? Yes; I think there is an ample field for really good labourers, but they are not so handy to get at as they were a few years ago. My idea is that immigrants coming to this Colony must always be willing to submit themselves to a certain amount of humiliation at first till they establish themselves. I came out here myself as a farmer's boy, and had to make my own way. For the first few years I had hardships to contend with and poor food to eat very often; and no doubt some deserving men have a great deal to put up with when they first arrive, but if they are steady, sober, and industrious they soon find their level and get on. Drink is the great curse of the Colony; it makes homes unhappy and prevents men getting on.
1746. I believe you visited England a few years ago? I was in England two years ago; I was there only a few months.
1747. Did you spend much of your time in farming districts? Yes; all that are left of my relations are agriculturists in Kent and elsewhere, and I spent a good deal of my time in several of the counties of England. I really felt it a pleasure and thought it a duty to advocate the claims of the Colony as far as my means and ability would allow me. I went among a good many tenant farmers in Kent, Sussex, Devonshire, and Somersetshire, having friends living there, and they understanding that I had been in the Colony many years flocked around me, and I felt a pleasure in extolling the Colony, as the Colony had done so much for me. I thought it my duty and privilege to do something for the Colony.
1748. Did you find much disposition to emigrate to this Colony? It seemed to be beyond the power of many to do so even if they had wished.
1749. How beyond their power? Beyond their means. To come out with a family would cost them £20, £30, or £40 for their outfit and expenses.
1750. Would their outfit cost them so much when the Government contributes so largely towards the cost of the passage? The Government contribute some of it; but they must have an outfit, pay their expenses to the port they sail from, and be at a good deal of expense in that way. But I think if some inducement, some permanent inducement, were offered in the Colony, a good many agriculturists from the old country would find their way here. I say so because I have heard that a few months after I left England as many as 400 went from the county of Kent to New Zealand; and I make no doubt that what I said about the Colonies induced many of these people to go to New Zealand.
1751. What inducement was offered to them? Their passages were paid, and they were rationed.

1752. Paid the whole of their passage money? Paid the whole of their passage money. A great many people have gone from these counties and are doing very well there.

1753. You are aware that there has been great depression in the agricultural interest in England during the last year or so? There has been since I came away. When I was in England the depression was not felt. Agricultural labourers were paid better the year I was in England than they were forty years before when I left the country. Agricultural labourers, when I was in England last, were receiving from tenant farmers 15s. a week.

1754. Exclusive of rent? Yes.

1755. Did they receive anything else? No; but when I left England forty years before they were receiving only 12s. or 13s. a week.

1756. Would not the labourer have to pay for his house out of the 15s. a week? Yes, he would have to pay for everything. The tenant farmer would pay him nothing beyond his week's money on the Saturday night, and he would do his best with them.

1757. No board? Some might be boarded in the house, but they would have only 8s. or 9s. a week. I am speaking of agricultural labourers who are married and have wives and children. As soon as the children are old enough to work they help a little.

1758. Do you think many tenant farmers and their labourers would be induced to immigrate to this Colony if the Government were to pay the cost of their passage? I think a good many of them might; but I must remark that when I was in England things were in a very different condition from what they were when I first left it. The large number of railroads that had been formed, and the building going on in various towns employed the surplus labour, and I was struck, in going through many English villages, by the fact that there were scarcely any young men to be seen. As soon as lads have done their schooling—and I am glad to say that the young people in England now have the benefit of good schools and good education, and are very different from what they were in my time—they go off to work on railroads or obtain employment as porters or in other capacities. This has taken off many who would have been labourers on farms, or have found surplus agricultural labour.

1759. Did you call at the office of the Agent General? Yes; I saw Mr. Forster.

1760. I gave you a letter of introduction to Mr. Forster? Yes.

1761. Did you meet with any one in the office who had been in the Colony, other than Mr. Forster? I do not think I did.

1762. Do you think it desirable that there should be some one in the office who could give information respecting the Colony? I think a really practical man in the office would be very useful indeed.

1763. A man who could give information about the Colony generally? Yes; a man who knows the country and its wants, and who could travel about the country a bit, and address the people. Mr. Forster seemed to be very much employed. He had very little time to chat with anyone he was so taken up.

1764. And there was no one else in the office, so far as you could learn, who could give information? I did not hear of any.

1765. As an agent in Sydney, have you met with any demand for vine-dressers, as well as for farm labourers? I have never been requested to try and get vine-dressers.

1766. *Mr. Charles.*] You have had considerable experience with respect to farms and agriculturists along the coast? Yes.

1767. And you know that there would be no difficulty in good agricultural labourers finding employment either to the south or to the north along the coast? I think there would be no difficulty.

1768. From your knowledge of the rivers to the north as well as of the southern coast, do you think if a few small farmers with their families were to come out they could get homesteads at a rental, or at any rate by putting up temporary buildings themselves. Do you not think they could settle on the southern coast at Illawarra on the Moruya, or to the north on the Manning, the Brunswick, and the Richmond? I think they could, but I would wish to say in the first place that there is no land to be had, or scarcely any to be had upon the river banks; it has generally been taken up by free selectors, and I was surprised to hear Mr. Ogilvie say what he did with regard to large proprietors letting their lands, for to my knowledge there are no large landed proprietors on the river banks; every acre has been taken up by small free selectors. If any of the land has fallen into the hands of speculators or monied men, it has been through the misfortune of free selectors. On the Clarence and Manning, away back from the river banks, in some instances not more than 200 or 300 rods, in others half-a-mile or a mile, there is swamp land which has never been utilised, but if labour could be employed upon it and this back land drained into the river, it would be as good as the land on the river bank. It only wants labour to become productive as it is good rich alluvial soil in some places from 5 to 20 feet deep; so that I have no doubt some years hence when labour can be obtained cheaply that it will all be taken up.

1769. Is that Crown land now? Yes, I dare say a good deal of it is Crown land.

1770. Open to selection? I suppose it is open to selection.

1771. *Mr. Day.*] They could take that up by paying down 5s. an acre if it is Crown land? Yes, I suppose they could.

1772. *Mr. Charles.*] Are you not aware that on the Richmond and the Tweed parties have taken up larger tracts of land than they can occupy themselves? Yes, a great many have taken up land not only for themselves but also for their children and families, and by that means they have become possessed of large tracts. I have no doubt if we had a number of tenant-farmers coming out they would after a little time be able to find homes.

1773. Do you know anything about tradesmen's wages or the employment of tradesmen about town, or about the demand for tradesmen in the country? I do not often have applications to send tradesmen into the country; but living in town myself, and having property here, I have had some experience of tradesmen and labourers in the building trade, and I find the expense of building so excessive that it is better not to do anything with your money than to engage in it. I have been building a couple of houses lately, and I shall derive nothing from them as a speculation. It is better to buy Bank shares than to engage in building.

1774. You think if wages were more moderate there would be a greater amount of employment for tradesmen? I make no doubt of it.

1775. *Mr. Barbour.*] Do you think if we could offer the tenant-farmers of England such an inducement as that you have alluded to, there would be a likelihood of a great number coming here? I think there

C. Field,
Esq., J.P.
18 May, 1880.

would, but I should say with regard to that, that at the present time the young people in the families of the tenant-farmers at Home as they grow up leave their homes and follow other occupations.

1776. If we could induce small farmers to come out and bring their families with them would they be a desirable class of colonists? Yes; very desirable; I know of none more so.

1777. Because they would both be practical farmers themselves, and their sons would be fit to be ploughmen or to fill other useful positions as agriculturists, while their daughters might attend to other duties? Yes.

1778. Do you think it would be a good thing for the Colony to offer to these men in the old country, besides bringing them out free of expense, pieces of land at a small rental; for instance, 100 acres of land for £5 a year, or 200 acres for £10 a year, so that they might have some place to go to when they came;—do you think that would be a great inducement to them to come? I think it would be a great inducement. Why I think so is this: It would give the tenant-farmers an assurance that when he came out here with his family he would have some place to go to. At present those who come out have no such assurance, they float about for a long time unable to find a suitable place, and spend all their means without settling down at all.

1779. I have no doubt you found when you were in the old country, and entered into the feelings of others, that there was a dread of going to a strange country, and a vague feeling as to where they were going on the part of those who desired to emigrate, and as to what they should do. Is not that a usual feeling? That is the usual feeling. I felt it myself when I came here a young man of 21, bringing my wife with me. I had no means when I came here, and I engaged with a gentleman at £30 a year and my rations. I went to work, and I worked like a man for a year, and made acquaintance with my neighbours. In this way I got information that was useful to me, and I became fitted to take a farm of my own.

1780. You were then young and inexperienced? Yes.

1781. But suppose the case of an experienced tenant-farmer in the old country—a 30-acre farmer—such a person to have the opportunity of getting a 100-acre farm for £5 a year, or a 200-acre farm for £10, the Government offering to bring him out and to put him upon the land, would not that be a far greater inducement to him to come out than if he had no such certainty? I think it would be a very great inducement; nothing could be so great as that.

1782. Then do you think it would be worth the while of the country to offer some such inducement as that? I do.

1783. You have said that you have had a great difficulty in getting good farming men when you have had a commission from the country? Yes.

1784. Do you think if these tenant-farmers came out with their families, and they generally have big families, they would bring a large number of people of the farming class with them? Yes, I think they would, for every one who knows anything of the country people of England is aware that they are a little clannish, and if one were disposed to emigrate he would induce others to accompany him, and perhaps twenty or thirty would at last agree to go, under the idea that they would be located together, mutually help and share their burdens alike.

1785. Then there would be likely to be farm servants as well as tenant-farmers come out with that class? Yes.

1786. Do you think it is wise in employers of labour in this country, people who have done well themselves, and are in a good position, to try to get servants at too low wages? No, I do not think it is. I think any labourer is worthy of his hire, and if a man is a good labourer he should have the top wages for his labour.

1787. Have you not sometimes felt, when employers have sent you commissions, restricting you not to give more than £30 or £35 for good labourers that you wished they would come to Sydney to seek for servants themselves? When men do so I often send them their commissions back, and tell them they had better come down themselves and look for servants at the wages they mention.

1788. Is it not often the case that employers of this class expect to get the best men at the lowest wages? It is generally so. No later than yesterday, at the hiring-room, I saw two or three gentlemen (I suppose I must call them gentlemen) who wanted to hire some of the best men, and they said they would not give more than £30 a-year. I told one of them I hoped he would not get what he wanted.

1789. If a man came out as a good farming man, he would be able to drive a cart, to act as a light porter in a warehouse, or to do almost anything in a store? Yes, a good agricultural labourer is fit for any business, he can do anything of that sort of work for the Corporation, or any kind of work with the pick or spade.

1790. If he does so does he not get wages much in advance of what he would receive for farming work? Yes.

1791. Under such circumstances are not men of this class likely to remain in Sydney? Yes, I think so. At the same time I would like to remark that it is not to the advantage of young men to remain in Sydney, as it requires some time for a person to establish his character and to become known in town.

1792. At all events, your experience is that if a man can get 25s. a week in Sydney he is not likely to go into the country to farming for £1 a week? No.

1793. If farmers and people in the country, station-owners, expect good men, they will have to pay good wages? They will—that is my experience.

1794. I suppose your experience is also that good men are better worth good wages than inferior men are worth inferior wages? A good man is better worth £40 a year than a bad man is worth £20.

1795. *Mr. Day.*] Do you know anything about our land laws? I never made myself fully acquainted with them; indeed it has seemed to me that no one else understands them.

1796. Do you know that any man can go upon Crown land upon paying a deposit of 5s. an acre, and that the balance of 15s. can remain for 25 years? Yes, and I know that many of these free selectors have land outside of what they have taken up—lands adjoining them.

1797. That being the case, and having the pick of the whole of the land of the Colony, do you think the tenant-farmers of England would be induced to come here by the prospect of renting land at 10s. or 12s. a year rather than by the prospect of taking up land of their own, upon the payment of 5s.? The English farmers or the agriculturists of England are so confused in reference to this matter that whether they had to pay 1s., 5s., or 10s. would not much matter. They would want to know where the land was located, what was the character of the soil, the expense of bringing their produce to market, and a number of other matters before they would determine upon settling.

1798. If you had your choice to-morrow which would you rather do, become a tenant-farmer at 10s. or take

take up land at 5s., with twenty-five years to pay the balance of 15s. ? With my experience I would take a good horse and look at the country, see what the land was, what market I could convey my produce to. But these men having no practical experience could not do that.

O. Field,
Esq., J.P.

18 May, 1880.

1799. Do you think they know nothing about our land laws in England ? I must say that nothing pained me so much while I was in England as to hear so little about this Colony. I went once from London to Bristol—there were a number of gentlemen in the carriage with me, but we travelled four and twenty miles without speaking a word to each other. I thought it very unlike what I had been accustomed to, and that I would say something so contrary presently that it would call forth some remark. So I opened one of the windows and looked out—"What a stormy, wet day," said I. "This is a beautiful day," said one of the passengers. This broke the ice, and I soon entered into conversation with a gentleman who lived at Clifton. It came out very soon that I was from Australia, and I learned that very little was known of that country, as was proved by the question put to me by him. He said, "I have a brother in Australia and that is the reason I am so interested in it; I do not know whether you may have met him." I said, "I do not know what might be his name." He told me his name. "Where does he live?" "He lives at Perth, Western Australia." I said I had never happened to meet him. "Now," I said, "If I were to tell you how far my home is from your brother's you would be surprised. Perth is more than 1,500 miles from Sydney, and therefore I have not happened to meet him." He said, "You astonish me; is it possible?" I replied, "If I were to put a thousand more to it what would you say?" He could scarcely believe it. Since then I have had several letters from this gentleman, and I think we have done each other good.

1800. Then they seemed to know nothing about our land laws ? They know but very little about the Colony at all. There are some few who have friends here who keep up correspondence, and there are some who have gone back to England, and in that way there may be a little knowledge of the country circulated, but it is very little. When I was in London, being anxious to hear intelligence respecting the Colony, I could not get a paper upon the arrival of the mail from Sydney without going to Messrs. Gordon and Gotch, and if I were three or four days behind the time I could not get one at all. I also went to the Paris Exhibition, and found that in that city the people knew as little of the Colony as they did in London.

1801. *Mr. Jacob.*] You have stated that if a suitable class of immigrants of the agricultural kind could be obtained for this Colony there is any amount of employment for them here ? Yes.

1802. You have been home lately;—can you say whether that suitable class of people is to be had there ? When I was at home there had been a year or two of great prosperity, and I found a very different state of things from that which existed when I left it at first, and I said to my friends, "You are settled down here and have homes of your own, and I cannot seriously advise you to come to Australia, because you would have to work for three, four, or five years before you could get to where you are to-day, with all your comforts around you. You would have to build your houses, get furniture, and make your homes." So that among my own friends I did not insist much upon it.

1803. Then there is not a superabundance of the class of people you speak of ? Not in the counties I have spoken of.

1804. You have had a good deal of experience of the working of our immigration regulations ? Yes.

1805. Do you think it desirable to continue them ? I do not know about the present regulations.

1806. With regard to persons coming of their own accord, do you think it desirable to allow any persons applying to obtain passages on payment of £2 ? I am under the impression that there is not proper care in the selection.

1807. You know that persons nominating their friends can have them brought out upon payment of £2 ? Yes.

1808. Do you think that system is likely to bring out a suitable class of people ? It would if it were done in a different way from the present.

1809. You think then it does not work well under the present system ? I do not find that it does.

1810. With regard to female servants you say there is a scarcity here;—did you not find there was a difficulty in getting good female servants at home ? I do not think there was any abundance of female servants where I was.

1811. There is a great demand for them in this Colony ? Yes.

1812. Supposing then we encouraged the immigration of female servants in the way proposed we should be doing those at the other end an injustice ? If we were to encourage a large immigration we should do them an injury.

1813. We should be "robbing Peter to pay Paul?" Yes; I do not think female servants are very abundant.

1814. If we have been told that the climate of this country disinclines men to work at a remunerative rate to their employer, is that in accordance with your experience ? I think, take it as a whole, they work as well here as in their own country.

1815. Are they inclined to work as well for the wages paid ? I should not think they are.

1816. Do you think the climate has anything to do with it ? I know that no one worked harder than I for 27 years, and I do not think the climate prevented me.

1817. Then how do you account for the disinclination ? My idea of the disinclination is that people get too well off to work hard.

1818. You mean that they get paid too well and are too prosperous ? There is a very near way of getting along that they do not expect at home.

1819. Do you think the gold discovery has had a beneficial effect in that respect, that men are disinclined to work for less wages than formerly ? I think the gold discovery, upon the whole, has been a blessing to the Colony; still it has made plenty of loafers.

1820. Of course we all have our own ideas with regard to farmers coming out to this country under a system of free grants;—do you think people of a desirable class would be induced to come here and settle under a system of that kind ? I think what Mr. Barbour suggests would meet my views to a great extent, to invite them to come here and settle upon the land with the assurance that when they came they would be able to establish homes.

1821. If they came here with their families under that system would they not naturally employ their families upon their own land, rather than allow them to go out to work for others ? No doubt, if they all had means to do so; but if their means were limited, they would have to send out their children. They would

C. Field,
Esq., J.P.
18 May, 1880.

would say, "John, or Thomas, or Mary, go out to work until next year, earn a little money, and when things are settled, I shall be glad of your labour at home."

1822. If they had land leased to them at a low rental it is to be assumed that they would have a certain number of acres? Yet; if they had this land to go upon it would take them at least two or three years to establish themselves before they could produce anything for the market.

1823. Would they not want their families to assist them? They would, and would probably keep them if they had the means. If they had not they would be compelled to let them go out for a year or two, and at the end of that time they could have their families back upon their own farms.

1824. Is it your opinion that this system should be adopted in substitution of the other, or could the two systems be worked together? I should prefer the other system.

1825. *Chairman.*] Would you allow parties here to nominate their friends? Many people do not nominate their friends.

1826. *Mr. Jacob.*] What do they do? Money is paid by various persons into a common fund for sending people to the Colony.

1827. Who nominates them? I cannot say.

1828. Somebody must nominate them? Yes. Yesterday at the hiring-room a young woman wanted to go away with a young man, when it was objected to. The young man said, "She is my sister." The reply was, "You never nominated this young woman; the person who nominated her must put his signature to the paper, and take her away."

TUESDAY, 8 JUNE, 1880.

Present:—

MR. DAY,

MR. JACOB.

J. F. BURNS, ESQ., IN THE CHAIR.

George Withers, Esq., called in and examined:—

G. Withers, Esq.
8 June, 1880. 1829. *Chairman.*] You are, I believe, a native of this Colony, and an Alderman of the City of Sydney? Yes.

1830. You are also one of the trustees of the Sydney Permanent Freehold Land and Building Society? Yes.

1831. I understand you have been in business as builder on your own account for some years in this city? For fully twelve years.

1832. How many men do you generally employ? Directly and indirectly about fifty; sometimes I have as many as 150.

1833. All of them in the building line? Yes, I have about fifty of them all the year round.

1834. What is the condition of the building trade at the present time? There must be a large amount of building going on in the suburbs, and also in the city. The fact that brickmakers are able to obtain any price they like for bricks is an indication that the building trade is brisk, although I know that some in the trade do not consider it so.

1835. But there is an unusual demand for bricks? Yes; the price of bricks is from £3 to £3 5s. per thousand: and they are not to be had always at that price, the demand is considerably above the supply.

1836. To what circumstance do you attribute the present extraordinary demand for bricks? It must chiefly be from the fact that a large area of the suburbs is being built upon, thus absorbing the bricks; I am waiting for bricks myself at the present time.

1837. But bricks can still be bought at the advanced price? Yes, the price ranges from £3 to £3 5s. per thousand.

1838. You say there is a large amount of building going on both in the city and suburbs? Yes, especially in the suburbs.

1839. Altogether what is the condition of the building trades at present? I consider the trade is in a flourishing state. The new Building Act has to some extent checked building in the city. Capitalists have not made themselves acquainted with the provisions and technicalities of the new law, and others are seemingly timid; many persons are building in the suburbs rather than be hampered by the Act. A large amount of work must be going on somewhere, but there is nothing like the extent of work in the city that there is in the suburbs.

1840. There is more activity in the suburbs than in the city, but still there is a large amount of work going on? Yes. There is one feature of the building trade that has been lost sight of to some extent—that is, there are not so many alterations being made in merchant's premises, in business premises generally, and I attribute that to the tightness of the money market during the past twelve months or so.

1841. Have you noticed any change in the condition of the money market within the past few months? Yes; things are much more favourable now for the building trades.

1842. Capital is more plentiful? Yes, more easily obtained by those desirous of building; the Building Societies too have reduced their rates.

1843. You are aware that the banks and building societies have reduced the interest on deposits? I am not quite sure about the banks, but I know that the building societies have studied their constituents; and the banks I think are willing to accommodate their customers with overdrafts to a greater extent than before.

1844. From your experience as a director of a building society you know that such societies have reduced the rates of interest for deposits? Yes.

1845. And that is one indication of there being an increased supply of capital? Yes, and increased capital will tend to increase building operations.

1846. Do you know if building societies are more liberal in consequence of there being an increased supply of capital? Yes, of course they are.

1847. If you were told that at the present time there are some two or three hundred masons in or about Sydney who cannot obtain employment, would you be disposed to think the statement correct? Well, I should scarcely think there are that number out of employ. It is a peculiar branch of the trade;

a number of masons may be thrown out in consequence of the unsettled state of the weather. If I wanted twenty, or thirty, or fifty masons to-morrow to put on a job, I think I should experience some difficulty in obtaining anything like the number. Plenty call themselves masons who are simply scabblers, or who have worked with masons; it would not perhaps be difficult to obtain a number of such men.

G. Withers,
Esq.
8 June, 1880.

1848. Do you think that within the last eighteen months two or three hundred masons, in and about the city, have been continuously unable to obtain employment? There is this fact which might make it possible: Many large first-class public buildings have been completed within that time, and it is possible that some of the men who were engaged on them have been thrown out of employment, first-class masons, that is, masons who would not take such work as laying a foundation. I believe there is work for the whole of the masons in the Colony; but first-class men will not take rough work, and will rather walk about than take a job unsuited to their tastes.

1849. Do you think there is a fair demand for masons generally in the city and suburbs? I think so.

1850. Do you know whether the Colony has gained much accession of population from the other Colonies during the last year or two? I am sure it has; there has been a large accession of mechanics in the different branches of the building trade.

1851. What has attracted those mechanics from the other Colonies? Most of those whom I have encountered came from Victoria, and they came because of a slackness of trade there.

1852. In the special branches of the trade in which you are concerned? Yes. I have never had occasion to employ many strangers. My own impression is that in this Colony, throughout its worst stages, really good mechanics could always get employment.

1853. Do you think that most of those who came from Victoria found employment in this Colony eventually and settled here? Many of them have. I know of one or two of my own knowledge; in fact I may say I know a dozen who have done so. They did not cling to the city altogether, but found employment in the suburbs, or went into the country—to Bathurst and other places—and got employment. A case came under my notice last week: An intelligent fellow, whose father is a builder in Melbourne, had some difference with his family and came to this Colony, and got work here; he is a very good mechanic, and has every prospect of success. He has gone to Bathurst, together with another young man, and has two years work.

1854. The tendency of population has been towards this Colony from the other colonies? Yes, I can speak in regard to the building trades.

1855. I think you reside at Surry Hills? Yes.

1856. Are there many unoccupied houses in that quarter? There are very few vacant houses; as a rule houses are let rapidly enough.

1857. Your business must lead you to travel about a good deal? Yes, I am constantly about.

1858. In all parts of the city and suburbs? Yes, it is part of my business to be about out of doors.

1859. Have you observed many houses to let in the city or suburbs? I think there has been a disposition on the part of city residents to go into the suburbs to live.

1860. What class of residents do you mean? I mean there is a disposition on the part of the working classes to avail themselves of the low rate of travelling on the railways, and build homes for themselves along the line of railway; that to some extent causes houses in the city to be sometimes vacant. I was especially struck with this after a recent visit to Melbourne.

1861. Then you have lately been in Melbourne? Yes.

1862. Are there many houses to let there? Not so many as I expected to have seen; and more building is going on there than I expected to see.

1863. Have you any reason to anticipate that the suburbs here will be overbuilt? No, I think the natural increase of population in this Colony will keep that sort of thing going for a long time.

1864. Have you ever met any of our newly-arrived immigrants loitering about the city unable to get employment? No, I have not. During the time the Exhibition building was being constructed I encountered many men who had no particular trade or capabilities. A number of men who were not mechanics at all had the assurance to go round asking for work as carpenters; many were put on and earned their 10s. a day, who had perhaps nothing at all to do with the trade before. Of course such men could never expect a second job as carpenters. At the time the Exhibition building was being put up I encountered a number of these men, but I never see any about now.

1865. What has become of them? They must have settled down as labourers or got some other work.

1866. Do you think there are many mechanics now about Sydney unable to get employment? I do not think there are. There are a good many labourers, very much worn, looking for work; but if I wanted fifty good mechanics to-morrow I know I should have to be contented with a third of the number—that is, good mechanics.

1867. You say you see many worn men looking for work? Yes; as I am an alderman I suppose they come to me in the hope of being put on the Corporation works.

1868. A class of persons who would not care to leave the city? It would not, perhaps, suit them to leave the city. They have their families here. They form the class of men I feel sympathy for.

1869. *Mr. Jacob.*] When you say worn, do you mean worn from old age? Yes, old age.

1870. *Chairman.*] As an alderman you meet with many persons in search of light employment? Yes.

1871. Do you find a superabundance of that class of persons in the city? Not more than might reasonably be expected in a city like this.

1872. *Mr. Day.*] Do you understand our assisted immigration regulations? I do not know that I am acquainted with them thoroughly.

1873. You know nothing about our immigration system? I am not thoroughly acquainted with the assisted immigration regulations.

1874. Do you think, from your experience, that it would be unwise to bring emigrants to this Colony—such as carpenters, bricklayers, joiners, and other such classes of persons? I am convinced of this, that if such a class of persons as those whom I served my apprenticeship with (mechanics) came here, they would benefit themselves and benefit the country. I refer to thoroughly steady, sensible mechanics.

1875. *Mr. Jacob.*] Mechanics of all kinds? Yes. I am a native of the Colony; but I am thoroughly convinced, from my own experience, I could get £50 premium to take boys as apprentices; but I look upon it as a great responsibility to take a boy myself. Of course if he learns the business well he makes a good man. But there are so many counter-attractions, such as sports, &c., that are detrimental to youths learning their trades. In this Colony youths give too much of their time to sports, and apply themselves too little to business.

- G. Withers, Esq.
8 June, 1880.
1876. You think there is a fair field for the introduction of more labour into this Colony—that is, labourers and artizans of a good class? Well, I am convinced there is for artizans of a good class. The country, I think, should produce a sufficiency of ordinary labourers. I think Melbourne must possess better mechanics than we have in Sydney. There is more artistic work generally introduced into the buildings there.
1877. You have had large experience amongst the labouring classes in the city and suburbs? Yes.
1878. Have you found many of that class out of employment? I have not recently encountered so many as I did at the time the Exhibition building was being constructed, when there was such an influx of persons to the city.
1879. If you wanted a number of tradesmen to-morrow would you have any difficulty in getting twenty or thirty together? I think I should have great difficulty in getting thirty good tradesmen. I should have to advertise for them; I might have thirty applicants, but there would perhaps be only five out of them who would be tradesmen who could be trusted.
1880. Then from your experience, a good workman, a good artizan, can always get employment? Always get employment, and be a benefit to the country.
1881. Such persons need never be out of employment? They need never be out of employment.
1882. What wages do such a class of persons obtain—carpenters, bricklayers, joiners? Masons get 11s. to 12s. per day; carpenters, 10s. to 11s.—10s. would be the standard wages; labourers would get 8s.
1883. That is for eight hours' work? For eight hours' work.
1884. I think I understood you to say that the price of bricks was now very high? Very high.
1885. I suppose the high price of bricks puts a stop to the building trade to some extent? Yes.
1886. What is the reason that bricks are so high at this particular time? One might imagine it was the difficulty of getting labour. I often put the question to myself, seeing so many labourers in want of a job, and hearing the cry about there being so many labourers out of work. But in the winter months there are many things that cause a high price of bricks. There is always a greater difficulty in drying them than in summer, and sometimes there is a want of water. In winter there is generally a scarcity of bricks owing to the difficulty of drying them fast enough.
1887. Have bricks ever been up to £3 5s. per thousand within the past few years? Yes, about two years ago they were up to £3 10s. per thousand.
1888. Then £3 5s. is not an unprecedented price to pay for bricks? No.
1889. Do you know anything about brickmaking? I have had nothing much to do with bricks beyond buying them.
1890. But from what you know, if a man is getting £3 per thousand for his bricks he is doing a very good thing? Yes.
1891. It is a branch of industry that might be gone into with advantage by any one? Whoever has gone into it has done well. There is room in the metropolis for three or four more establishments such as Goodlet & Smith's and others.
1892. *Mr. Jacob.*] Is the need for mechanics in this country sufficiently great to justify their being introduced here at the public expense—do you think the Government of the country is justified in introducing mechanics of all kinds at the public expense? I think it would be unwise for the Government to hold out certain inducements; the class of men I refer to as being useful colonists is that of men requiring little assistance, who can rely on themselves.
1893. You have not thought so much upon the subject as to be able to give a definite opinion upon it? No, I have not.

John Macintosh, Esq., M.L.A., called in and examined :—

- J. Macintosh, Esq., M.L.A.
8 June, 1880.
1894. *Chairman.*] You are one of the representatives in the Legislative Assembly for East Sydney? Yes.
1895. I believe you issued a large number of railway passes on behalf of the Government a year or two ago to parties who wished to go into the country in search of employment? I have never issued a pass in my life; I have never had any power accorded to me to issue passes; but I may explain that about four or five years ago, when the Palmer diggings broke out, a large number of persons went from New South Wales to those diggings. From several causes they were disappointed. When they returned to Sydney they were almost destitute; in fact they were brought back by the steamship companies from the north of Queensland for about £1 each. The Mayor of Sydney, as I understood, was empowered by the Government to recommend to the Commissioner for Railways such of those persons as he thought deserving of a free pass by railway into the country. As the Mayor was not allowed to grant passes I think he declined the work of recommendation or of even making inquiry into the truth of the statements made by the men. From some cause or other the men who were destitute came to me. Happily, at that time New South Wales was in a prosperous state, whilst the neighbouring colonies and New Zealand were in a rather depressed condition. A larger number of public works was being carried on than in the other Colonies; and these people flocked here from the other Colonies. As I was well known and easily comeatable at all hours of the day nearly, these men, or many of them, at all events, came to me. I made strict investigation into their circumstances, and if I believed their statements to be true I gave them a recommendation to the Commissioner for Railways for a free pass into the country. The Commissioner almost invariably granted a pass on my recommendation. So many men came wanting passes that nearly the whole of my time was taken up in investigating their claims. Hundreds of persons who obtained passes at my recommendation and went into the country have written to me. All, or nearly all, obtained employment of some sort or other in the country, and in their letters they express great gratitude to me for the trouble I took on their behalf, and for the advice I was able to give them. I was, however, eventually relieved of the duty, as I may term it. The Inspector General of Police and Mr. G. F. Wise now constitute a Board to consider the claims of persons requiring free passes into the country. I still give a great number of recommendations to strangers and others who I think may be deserving of them, and they are generally complied with. But that is all that I have had to do with granting railway passes, and for which I have been so much abused. Looking at it myself as a colonist—and I have had one or two years to consider the matter—I feel that I never did a better public work than when doing that.
1896. *Mr. Day.*] Do you find many of the newly-arrived immigrants from England require passes? Some few of them do; but independently of those who came from the other colonies, I have found that the greater number of those who required free passes were persons who had come out in steamers, who had paid

paid their own passage money. The steamers coming to the Colony then were not so numerous as they are now; but I used to expect about one-fifth of those persons who came out in the large steamers to call upon me before they had been in the Colony five or six weeks. Many of them, on landing, would have a good stock of clothing, and perhaps from £4 to £10 each in money. They would go into tolerably good lodgings, and as long as their money lasted they were all right; but when their money was exhausted they would go into a poorer class of lodgings, and very frequently before they came to me they had nothing but what they stood upright in; and in some cases they had slept one or two nights in the open air—in one or other of the parks.

J. Macintosh,
Esq., M.L.A.
8 June, 1880.

1897. Were they artizans or labourers? Generally educated persons; some few of them farmers sons who perhaps had been on their fathers' premises, but had not done much work. A few of them had been in regular employment.

1898. Did many artizans apply for free railway passes into the country? A few.

1899. A large number of those persons who applied to you belonged to New South Wales? A large number who applied to me were returned colonists, the larger proportion from the other colonies—especially Northern Queensland. They came back with impoverished means and debilitated in health, some of them suffering from fever and ague. Upon my recommendation the Commissioner for Railways generally considered a case favourably.

1900. You say you have received a number of letters from persons to whom these passes were given;—what was the result of their going into the country; did they succeed in getting employment? Yes; I refer more particularly to educated persons. For instance, one person for whom I obtained a free pass had received a University Education; he went into the country and got employment from a small contractor as cook, near Junec, received 8s. per week and his board; he was there several months; when he was paid his employer was so pleased with him that he gave him at the rate of 10s. per week; the person referred to regretted exceedingly that the contract was finished, because he considered he was obtaining information and experience that would be likely to be of great value to him. He wrote to me at that juncture, and I sent him a few suggestions in a letter; he then went towards Adelong and the Tumut, and joined a survey party, and I think he is with them now.

1901. Did you get any letters from those for whom you procured free passes into the country, stating that they were unable to get employment in the country? No, except from a very few, such persons as I should expect to get such letters from.

1902. Then your impression is that most of those whom you were instrumental in sending into the country found employment? Yes; what they chiefly wanted was a little advice to enable them to look at the Colony as it is, and not as they had pictured it before coming here. I may mention another instance: A person who had received a college education went to Wagga Wagga and took a situation as groom in one of the hotels there; he stayed there several months, receiving 15s. a week; he sent me word he could perform the duties very well, and under the circumstances was very well contented with the situation. Another person of education went towards Cooma and succeeded in establishing a small school there. Several other persons, educated gentlemen as they may be termed, went on to stations and took situations as tutors, or got light work about the station, and many of them are doing very well. Many of those persons out of employment in Sydney are persons who have been accustomed to a better employment than they can get in Sydney.

1903. *Chairman.*] Your house of business is in a part of the city; that makes you easy of access to people generally? Yes.

1904. And as an old resident of the city, and for many years an alderman, you are widely known? It seems so.

1905. That accounts for so many of these persons who could not get employment going to you to consult you as to what they could best do to get work? Yes; I have generally taken an interest in strangers, and have left myself open to be called upon by them. For various reasons I am often enabled to get them employment either in Sydney or in the country. I have a number of friends in different parts of the Colony to whom I can recommend them to go to get information or advice.

1906. You have also travelled a good deal about the Colony? Yes. I may state that last Saturday I visited the works now going on for bringing the water from the Nepean. About 150 men are employed there, and they are getting 7s. and 8s. a day. I have never seen a better class of labourers than they are—I mean the ordinary labourers who use the hammer, the gad, shovel, or pick, not tradesmen. Inferior men, men of inferior strength or ability to do a standard amount of work per day, have little chance of being taken on there. It seems to me there is a great desire on the part of the employers to pay the standard rate of wages and employ the best men; I find that so generally in the Colony, that employers do not care to pay second-rate wages. That of course tends to keep second and third-class men out of employment.

1907. Second- and third-rate men have a far less chance of getting employment? Yes.

1908. Does that apply to mechanics as well as to labourers? Yes, that is my experience amongst mechanics as well as labourers.

1909. Do you know whether there has been any difficulty on the part of stonemasons in obtaining employment in the city during the last year or two? Yes, during the last year or two there has been. For instance, before that time, the buildings for the Works Offices, the Lands Departments, and other large buildings were going on in the city, and in which large quantities of dressed stone were used. A large number of stonemasons were drawn to Sydney. But during the last year or two there have not been so many buildings of that class going on, and there is a number of masons out of employ. People will not leave the city if they can help it. Some few of them have gone into the country, and are doing work about the railways—a rougher kind of work than they were accustomed to in Sydney. By far the greater number of mechanics who have called upon me out of employment are those connected with the iron trades, such as boiler-makers and engineers.

1910. Persons engaged in the iron trades find a difficulty in getting employment in the Colony in their own line of business, at the standard rate of wages? There is not sufficient employment for them. Most of them are brought up to a particular branch of the trade, and are not what may be termed "good all-round men"; and unless they possess very good characters and are very good workmen, and can and are desirous of making themselves useful in a general way, they find it difficult to get employment. At the same time very good mechanics are occasionally out of employ. A large number of what may be termed second-class men have always been found out of employment during the last two or three years—men who get tipsy, or who have debilitated constitutions, or who will not work unless under the eye of an overseer or fore-

man,

J. Macintosh,
Esq., M.L.A.
8 June, 1880.

man, find it difficult to get work. For instance, a great deal of the work done in connection with the building trade is of a confidential character. A master builder has perhaps to send men into some merchant's stores or gentleman's residence, and none but men in whom great confidence can be placed are likely to be employed. Men of second- and third-class qualifications find it very difficult to get employment, and that is the case with mechanics as well as labourers.

1911. They are not worth the standard rate of wages? There is a great desire on the part of employers in Sydney to pay the standard rate of wages. Suppose 8s. or 10s. is the standard rate of a day's pay, there are very few employers who would care to give 5s. or 6s. They prefer to have good men who are worth the higher rate.

1912. A great many in the category of men out of employment are men who, through some deficiency or fault of their own, do not find favour with employers? A considerable proportion. But there are many good men amongst the unemployed. Another class of men who come to me for advice or assistance comprise men who have been overseers for a number of years in large establishments in other countries. When they come here they seem to me to have to walk about more than others. I can hardly give the reason, but it is nevertheless the fact. Many of the persons who come out as immigrants have been brought up altogether to city life, and have been for a considerable time in one employ. Such persons are most helpless when they come here. They do not seem capable of exercising sufficient thought to make their own way; they lean more for assistance than those who have travelled in different places. Eventually, however, they fall into something.

1913. When you speak of immigrants do you refer to those who pay their own passages, or those who are assisted to come here by the Government? Those aided by the Government as well as others.

1914. Have you within the last two or three years had immigrants coming to you in search of employment? Yes, a great many. But I cannot say that they were persons who, upon the whole, were well adapted to the requirements of the Colony. They were often men who had been brought up to some special description of work, and at which there was little or no employment for them here. I have had very few of what may be termed first-class labourers or mechanics coming to me for assistance. They generally get taken up almost immediately on arrival—that is, first-class men, who are determined to succeed and attain to a comparatively independent position.

1915. *Mr. Day.*] You know something about our assisted immigration regulations? A little.

1916. You have had a good deal of experience in the labour market of Sydney? Yes.

1917. Knowing these two things, and knowing also a good deal about the country, do you think it advisable to continue the system of assisted emigration to this Colony? That is a question that requires a good deal of consideration. We want no persons in this Colony but able-bodied healthy people—male and female. The first matter that made me take notice of the assisted immigration system was this: About fourteen or fifteen years ago I lived at Botany; at that time Haslem's Creek Cemetery was being cleared of timber by men who had been put on to the work in consequence of the then depressed state of the Colony. As I was going home one evening I noticed a number of these men get out of the train, and I was surprised to find that the Colony possessed such a number of men so physically unfitted for hard labour as they appeared to be. I followed the thing up, and found that many of them were new arrivals. Many had come to the Colony by the aid of their friends who were already here. I thought that proper supervision had not been exercised in the selection of those persons. When the deposit of £2 is made here I am afraid there is not much inquiry made as to whether the person being sent for is fitted for the Colony or not. He comes out at the recommendation of the person paying the deposit. Many who come out in this way are not suited to the requirements of the Colony; on the other hand many who then come out are well fitted for the Colony. Very frequently those who come displace older colonists from their situations.

1918. The question I should like to put to you, and obtain an answer to, is this: From your experience of the labour market, and the assisted immigration regulations we have in operation at the present time, do you think it beneficial to the country, and to the immigrants who come to it, to bring people to the Colony under our system of assisted immigration—is it likely they will find remunerative employment? Yes, I think so; if there was a proper distribution of them in the country—in the interior, similar to the system adopted in Canada, and even in the United States. What I think is required is the appointment of provincial boards, not composed of Government officials, but of persons elected by the people of the district or selected by the Government, and having an interest in their respective districts, who would advise the Government from time to time as to the requirement of their districts, and see to the distribution of immigrants. Such boards might be established for instance at such towns as Goulburn, Wagga Wagga, Hay, Maitland, and other places. They might even employ the new comers for a short time after their arrival at a lower rate of wages than is prevailing in their districts until the immigrants got familiarised to some extent with the Colony.

1919. Until they became colonized? They should work at low wages, but I should be no advocate for making them depend upon the Government. If they were carefully selected in England for their health, character, and capabilities, such men would get on well.

1920. Do you know anything about the labour market in England, Ireland, or Scotland—I mean as to the rate of wages, and the likelihood people have of getting employment? Not a great deal, nothing beyond what I hear from my friends, and learn from the newspapers.

1921. But from what you know of the labour market there, and what you know of the labour market here, and the likelihood of men succeeding, would you, if you had a friend in England, advise him to come here to seek employment? Yes, I should advise him to come here. I would give him advice, and then if he determined to live by his own work and not lean upon others, I would advise him to come here.

1922. Then from your experience you think there could not be too many come here if they are of the right stamp of men—men who would tuck up their sleeves and go to work? No; I find all our successful men, such as contractors or farmers, in different parts of the country, came to the Colony very poor. They have never done any harm to any person that I am aware of, but by their hard work and frugality they have succeeded, and become in time employers of labour. By almost every steamer that leaves the port a large number of such persons leave the Colony for a visit to the old country. They came here poor and go away in comparatively independent circumstances. (I came myself as an emigrant in 1839, I was then eighteen years of age, and landed without one shilling.)

1923. Have you found much poverty and indigence about Sydney among the labouring classes? Yes, a great deal, but chiefly amongst that class of persons to whom an employer would not give the standard rate of wages.

1924.

1924. That poverty does not exist in the country towns? Not to my knowledge. I was in the western districts a short time ago, and I did not see or on my inquiry hear of any labourers walking about idle. J. Macintosh,
Esq., M.L.A.

1925. Do you think there is any necessity for a strong able-bodied man to want work in this country? 8 June, 1880.

Not for any length of time if he has an aim.

1926. But even without an aim? There are many persons, such as railway labourers or diggers, who occasionally suffer great distress, because they will not take up with other employments. They will hang about the gold-diggings and railway works until they get impoverished. I have not found much poverty with that class of persons who aim at having a home of their own, and the surroundings of a home; but amongst the class who only aim at obtaining daily wages there is occasionally great distress, both in the country and the towns.

1927. And that good class of men you are speaking of, if they were brought here they would assist the men of this Colony instead of being an injury to them? Yes.

1928. They would find avenues for their labour in all directions? Yes; if they are enterprising intelligent men, determined to get on, they will make their own way.

1929. You say you saw a large number of men at work on the Nepcan water scheme works;—did I understand you to say that the men had taken a contract? It was explained to me in this way: Twenty-two miners from Hartley had the No. 3 contract in connection with the waterworks; and two of their number were appointed by the men themselves as leaders, and take the contract.

1930. And the men draw their pay according to the quantity of work they have done? Yes; their work is measured off every fortnight, and then they get their money; they pay the labourers whom they employ and divide the balance amongst themselves. I have every reason to believe that this gives the twenty-two associated labourers 10s. per day, and may eventually give them 11s. per day clear of all expenses. When I was there I found beef equal to the Orange beef, being sold at from 1½d. to 2d. per lb., and mutton at from 1½d. to 2d. per lb.; milk and bread were also selling at a reasonable price; and the men have no rent to pay.

1931. And other parties of labouring men, if they chose to associate themselves together, might obtain a contract? I don't see anything to prevent them. The contracts let at the present time extend about 8 miles, but there is at least 40 miles of similar work to perform, besides the dam and the aqueducts across the creeks and other places along the route taken to convey the water to the distributing reservoir in and near Sydney.

1932. From whom did the men get the contract? From the Government.

1933. Did they send in tenders the same as other contractors? Yes.

1934. And they beat other tenderers? No; they lost their tender for the tunnel, and offered to do the open canal work attached to the tunnel contract at 3s. 6d. a yard, whilst other contractors had tendered to do it at 7s. They were informed that if they liked they could have 2 miles of open canal cutting at their tender. There is a large quantity of similar work to be performed, but it requires good sound sober men to do it.

1935. There is plenty of opening there now for labourers to go to work? Yes, there will be a good deal of labour required in the open canal cuttings. In the tunnel of course only a limited number of men can work at a time.

1936. You say that the twenty-two associated labourers are now employing other labourers? Yes.

1937. They employ other labour, and make a profit out of it? Yes.

1938. *Mr. Jacob.*] Besides getting 10s. a day each they will get an additional share perhaps by employing other labourers? 10s. is the profit of the whole labour.

1939. With the additional profit by employing other labourers? The additional men get 7s. or 7s. 6d. a day. The balance of the draw is divided amongst the twenty-two associated men, and it gives them 10s. a day. But with regard to immigration I strongly suggest that provincial boards should be appointed, composed of men possessing an interest in their respective districts; and they should have some money at their command in order that they might find immigrants work for a short time, say three or four weeks, giving them a lower rate of wages than the wages prevailing in the district. The immigrants could leave that employment whenever they thought proper. But I think if boards were established for this purpose it would be a great inducement to persons to go into the country. A large number of persons, especially those who are married, do not like to venture into the country, but they might be induced to go if some such inducement as that I have suggested were held out to them.

1940. *Chairman.*] Your recommendation would have reference to immigrants who came here on their own account, who had not been sent for by their friends. Many who have been sent for by their friends at once find employment or remain with their friends? Yes, but often those who come out in that way displace others who are already here. The assistance and advice I suggested by the inland Boards should be given to all new comers.

1941. *Mr. Jacob.*] With regard to the system of assisted immigration as it is at present worked, do you think it desirable to continue it or stop it? I do not think it would be advisable to continue it. The practice might be continued.

1942. But as at present worked—as the Government are working it—do you think it beneficial to the country or not? It is beneficial to a large extent, but it might be made a great deal more beneficial if the emigrants were properly selected in Great Britain.

1943. *Mr. Day.*] Do you think £70,000 too much to expend on an immigration system? No, I do not think £100,000 would be too much, if care was exercised in the selection of persons who are to come out, and if such boards as I have proposed were appointed in different parts of the country, in order to secure the immigrants certainty of work for a short time after their arrival I should even like to see the Government more liberal with free passes by railway to those who wished to seek work in the country than they have hitherto been.

1944. But the Government now gives a free pass to every immigrant who requires one? Yes. I also mean to actually destitute persons.

1945. And seven days free board and lodging to an immigrant who requires it in the country? Yes; but I would rather see the Government give them some kind of employment at a low rate of pay.

1946. *Mr. Jacob.*] Do you mean that the Government should send them into the country, and then make employment for them? There is always work in the country that must be done by the Government.

1947. There is always contract work? People coming from a ship are not all fitted for contract work,

J. Macintosh, but there is other work to be done. Take Wagga Wagga for example. There is not a great deal of work there, but there is the embankment of the river, and the drainage of the town requires seeing to.

Esq., M.L.A. 1948. *Chairman.*] You think it advisable that the Government should give immigrants a short period of employment in the country in order to enable them to gain experience, and give them time to look round and find employment elsewhere? Yes, but I would give them less pay than the wages ruling in the district; and I would place them under provincial boards, such as I have suggested the appointment of.*

8 June, 1880.

TUESDAY, 6 JULY, 1880.

Present:—

MR. BARBOUR,

MR. DAY.

MR. JACOB,

J. F. BURNS, ESQ., IN THE CHAIR.

The Committee met and proceeded on board the immigrant ship "Camperdown," lying off Neutral Bay.

Henry Hill examined:—

- H. Hill. 1949. *Chairman.*] What is your name? Henry Hill.
- 6 July, 1880. 1950. What is your business? I am a miner.
1951. Were you sent for by your friends? It is a man out here who nominated me; I do not know the man. He works in a colliery. His name is William Johnson.
1952. Is he a miner? He is a labourer.
1953. Where? He is at Newcastle now.
1954. How came he to nominate you? He nominated his brother-in-law, and I asked his brother-in-law to get him to nominate me, and he did so.
1955. Do you know what William Johnson is doing now at Newcastle? I do not know. At the time he nominated me his brother-in-law told me he was sinking a well at Liverpool.
1956. Where were you at work when you received that nomination? At Brownie Colliery, in the county of Durham.
1957. Were you induced by any representations of Johnson's brother-in-law to immigrate, or did you immigrate on your own account? I immigrated on my own account.
1958. It was from no representations of the condition of the market for miners that you agreed to come out? No; I just came on my own account.
1959. Had you obtained any information as to the condition of business in your line here? Only what I had seen in the papers; and I had seen letters from here. I had seen what were the wages in the papers.
1960. Do you know whether Johnson is acting in the capacity of agent to any person? I do not know; he is a stranger to me.
1961. *Mr. Barbour.*] Did you know Johnson's brother-in-law? I had seen him three or four times.
1962. *Chairman.*] When you were nominated did you state that you were a coal-miner? I did.
1963. *Mr. Barbour.*] You came out here on your own account? Yes.
1964. Why did you come out? Because I thought I should do better here.
1965. Do I understand that you gave Johnson's brother-in-law money? I asked him if he would send the money to his brother-in-law for me, to nominate me. I went to Durham and got a post office order, and gave it to him, and he sent it off straight away.
1966. And in consequence of that you got a paper, and you came out here? Yes.
1967. *Chairman.*] What is the condition of the coal trade in England? It was getting a little brisker when I left. It had been very dull.
1968. *Mr. Jacob.*] Why did you not apply for your passage at the other end yourself: why did you send your money out here; could you not have got your passage by applying to the proper authorities? I was not aware of that. I heard he was nominating persons out. I heard they had stopped all immigration here.
1969. You understood they had stopped all immigration? I understood all immigration of miners was stopped out here, unless they were nominated from this end.
1970. Did you give it to be understood that you were a miner—did you give any description of yourself? I did. I stated what I was.
1971. Did you tell them that you were a miner? I stated I was a miner.
1972. *Mr. Day.*] Do you understand anything about any other kind of work besides coal-mining? I have never worked at any other trade.
1973. You have been working in coal mines all your life? Yes; about sixteen years.
1974. Have you any friends in this Colony? No.
1975. *Mr. Barbour.*] Is Johnson's brother-in-law on board this ship? No, he came out on a passage before this. When he sent my money he was coming then. I am not aware of the name of the ship he came in.
1976. When you get on shore do you intend to search for Johnson? No, I am going to try to find a man of the name of Gilbert Ridley. They tell me he is at Lambton.
1977. Is he a coal-miner too? No; he keeps a public-house.
1978. Has he been a coal-miner? I think so; I am not sure.
1979. *Mr. Day.*] Do you belong to any Trades' Union? I belonged to the Miners' Union.
1980. Did you ever receive any communication from the Societies in this Colony? No, I never received any.
1981. No particulars from the Trades' Unions of this Colony? No; nothing. All I ever received was the nomination paper; nothing else besides the papers I got from home. 1982.

***ADDED (on revision)**:—When duties, such as I have suggested to be done by a provincial board, are cast upon resident Government officials, they are apt to look upon it as an extra gratuitous duty they are called upon to perform, and they are not likely to have sufficient experience, or be zealous and kindly in their manner to those strangers who desire to receive practical advice or assistance when friendless on arrival, and beginning a new career as colonists.

1982. Did you pay anything into that society? I paid something fortnightly.
 1983. What benefit did you get? I got none.
 1984. What did you expect to get? They said 7s. or 10s. a week in the event of accident, but if there was any strike it was 7s. a week; but when they were on strike they only got 4s. 11d. for six weeks.
 1985. Did you understand they were united with any other society in any part of the world? They were simply for the county of Durham, and nowhere else that I am aware of.

H. Hill.

6 July, 1880.

Charles Norwood examined:—

1986. *Chairman.*] What is your name? Charles Norwood.
 1987. Were you sent for by your friends? A relation by the wife's side.
 1988. What was your occupation in England? I was brought up on a farm.
 1989. Any coal-mining in connection with it? Yes, for the last six or seven years.
 1990. Where? Croup colliery, near the farm.
 1991. Where does your friend live who sent for you? At Orange.
 1992. What is he? He has a horse and cart, loading wood about.
 1993. Did he nominate you? Yes, or some of his friends.
 1994. What representation did you make when you left England in the paper to enable you to come out here? Farm labourer.
 1995. You made a representation that you were a farm labourer? Yes. I had been mining for seven years.
 1996. Do you intend to go to Orange? No, I want to go to Tamworth to the wife's brother.
 1997. What is he? He is a road man under the Government.
 1998. What family have you got? Three.

C. Norwood.

6 July, 1880.

Alexander Goodwin examined:—

1999. *Chairman.*] What is your name? Alexander Goodwin.
 2000. From what part did you emigrate? From Stirlingshire, in Scotland
 2001. What is your occupation? I was mining when I left.
 2002. Did you describe yourself as a miner to the agent in England? Yes. My brother did, the nominee.
 2003. Where does your brother reside? At Wallsend.
 2004. Is he a miner? Yes.
 2005. How long had you been mining before you left Scotland? For the last eight years.
 2006. Was it upon the representations of your brother that you were induced to immigrate? Yes.
 2007. You thought you would do better here than in Scotland? Yes.
 2008. Have you brought a family with you? Yes, three—two daughters and a son.
 2009. You are sure your brother is a miner at the present time? Yes.
 2010. Has he any other employment? Only a labourer.
 2011. Not an overseer in the mine or agent? No, I do not think so. I could not exactly give any details of that.
 2012. I suppose there had been a correspondence between you and him for some time? Yes.
 2013. *Mr. Barbour.*] Did your brother recommend you to come? He did.
 2014. What was the inducement he offered—did you think you would do better here? Trade was exceedingly dull in the old country, and he thought I would do better here.
 2015. *Chairman.*] Had you been accustomed to farm labour too? Yes.
 2016. How long? I was always doing a little at it, more or less.
 2017. *Mr. Jacob.*] But you were nominated as a miner? Yes.
 2018. *Chairman.*] Do you intend to go to your brother? For the present, until I see something better.
 2019. *Mr. Jacob.*] Was there any objection to your going on board as a miner? No.
 2020. *Mr. Barbour.*] Were you entered on the paper as a miner? Yes.
 2021. And you can turn your hand to anything? Yes.

A. Goodwin.

6 July, 1880.

John Wade examined:—

2022. *Chairman.*] What is your name? John Wade.
 2023. What part did you emigrate from? Northumberland.
 2024. What occupation did you follow there? Miner.
 2025. *Mr. Barbour.*] Coal-miner? Yes.
 2026. *Mr. Day.*] All your life? Yes.
 2027. *Chairman.*] Had you followed any other pursuit? For a few months. I was at a strange place; but still it was connected with mining.
 2028. Who sent for you? William Johnson.
 2029. Where does he live? At New Lambton.
 2030. Did you know him personally? For five years before he left and came out to the Colony.
 2031. How long has he been in the Colony? About two years I think.
 2032. Is he working as a miner, or is he acting as agent for any one? He is working as a miner.
 2033. Was it owing to correspondence with him that you came out? Yes.
 2034. I suppose he told you that you would do better in the Colony? Yes, that was about what he said.
 2035. Are you a married man? Yes.
 2036. And have a family with you? Wife and five children.
 2037. Did you get any information from any one besides Johnson? Another one who lives in Lithgow Valley.
 2038. He wrote to you and told you what the prospects were out here? Yes.
 2039. And he thought you would do better here than in England? Yes.
 2040. And when you entered your name in the paper did you state what your occupation was? Yes.

J. Wade.

6 July, 1880.

2041.

- J. Wade. 2041. Coal-miner? Yes. In the paper that came out I was entered as a miner.
 2042. *Mr. Jacob.*] Why did Johnson nominate you? I had applied to come out and could not.
 6 July, 1880. 2043. Was any reason given to you? They said emigration was closed.
 2044. Any particular class? They said it was closed, and if I wished to come out I would have to send out to some one to nominate me.
 2045. Who told you that, one of the authorities? I got a letter from London; from the Agent General's Office.
 2046. *Chairman.*] From whom? I could not tell you, it was one of the clerks.
 2047. *Mr. Day.*] Have you got that letter by you? No.
 2048. *Mr. Jacob.*] Were you told that any particular class of emigrants would not be allowed to be nominated? No; they did not make any distinction.
 2049. But you would have to be nominated at this end to enable you to come out? Yes.
 2050. *Mr. Barbour.*] To whom did you send the money? To William Johnson.
 2051. How much did you send? I sent out £9.
 2052. That was for yourself, your wife, and five children? Yes.
 2053. *Mr. Jacob.*] How much delay did that cost you? I sent away in May last year.
 2054. *Mr. Barbour.*] And you got your paper back when? About the 28th or 29th of August.
 2055. *Chairman.*] Do you know of any others besides yourself who came out under the nomination of William Johnson? No; I do not.
 2056. *Mr. Day.*] What wages were you getting at Home coal-mining? Wages used to vary; it was piece-work.
 2057. What did you earn a day? About 4s. 6d. to 5s. a-day.
 2058. *Chairman.*] On an average? Yes.
 2059. *Mr. Barbour.*] How much did you have per ton? According to the thickness of the seam.
 2060. *Mr. Day.*] Was that the average of the district? The average of the district, I think, was about 4s. 4d. a day.
 2061. *Chairman.*] Did you get regular employment? Not in the winter-time.
 2062. What were your average earnings per year as a miner? I could hardly tell that; I do not think the pits would average more than half-time.
 2063. *Mr. Day.*] About £1 a week on the average? Scarcely so much as that.
 2064. *Mr. Barbour.*] In the winter-time did you work at anything else? No, just idle.
 2065. *Mr. Day.*] Then all the men were working by piece-work, and not by day labour? There were some worked by day labour.
 2066. *Mr. Barbour.*] What is the least price they pay for the thin seams? I have worked at 1s. 4d. per ton.
 2067. And what is the highest price you have worked for? You must remember that we had a percentage. It was from 1s. 6d., as high as 4s. 6d.
 2068. *Chairman.*] I suppose Mr. Johnson sent you full information as to the rates of wages paid in the Newcastle district? Yes; he thought a working man had a better chance out here, and I was desirous to come.
 2069. Do you know of any coal-miners on board who entered under other designation? Yes, there is one on board who has come out of Northumberland.
 2070. Have you heard of any coal-miners on board who entered their names under other trades? I do not know how they entered. I know there are some who have worked in mines, but whether they worked in mines all the time I cannot say. My object in coming out was not to stop at the mines; I am going to get other work if possible.

Stephen Powell examined:—

- S. Powell. 2071. *Chairman.* What is your name? Stephen Powell.
 6 July, 1880. 2072. What part of England are you from? About 3 miles from Pontypool, in Monmouthshire.
 2073. What occupation did you follow there? A miner.
 2074. How long have you been coal-mining? All my life-time.
 2075. Who nominated you? My uncle.
 2076. Where does he live? At Lambton.
 2077. *Mr. Barbour.*] What is his name? Stephen Powell.
 2078. *Chairman.*] How long has he been living there? Close upon twenty-five years.
 2079. Did he write and tell you the rate of wages there? No.
 2080. Did he tell you you would be better off there? He would not have nominated me if he had not known that. Trade was very bad at home.
 2081. You thought you would be better off here? Yes.
 2082. Did he write and tell you so? No, he did not write.
 2083. Did he advise you to emigrate? Yes.
 2084. And he paid the deposit for you? Yes.
 2085. You are a single man? Yes.
 2086. Are you entered in the papers as a coal-miner? I am not certain whether he nominated me as a labourer or as a coal-miner.
 2087. Do you know how many miners there are on board? I do not.
 2088. Have you any idea? No.
 2089. You do not know how many were coal-miners and entered as other trades? No.
 2090. *Mr. Barbour.*] We do not want it for anything particular, we only want to make you more comfortable? No, sir, I do not know. I think my cousin gave his statement last night as a labourer.
 2091. What is his name? Stephen Howell. He was not certain whether uncle entered him as a coal-miner or labourer.
 2092. *Mr. Jacob.*] Did you give any description of yourself to any Government agent at home before you embarked? No.
 2093. No particulars were taken from your mouth as to what you were, and what your occupation was? We gave it to the agent at Pontypool.
 2094. What did you give as your occupation? A stone-miner. That means getting coal, or hard ground,
 2095.

2095. *Chairman.*] You have been all your life a coal-miner? Yes.
 2096. *Mr. Jacob.*] Did you understand that as a coal-miner you would not be able to come out here? No.
 2097. *Mr. Barbour.*] Did you send the money out to your uncle? He paid it here.
 2098. You did not send it out to him? No.

S. Powell.
 6 July, 1880.

Robert Nevin examined :—

2099. *Chairman.*] What is your name? Robert Nevin.
 2100. From what part did you emigrate? From the county of Durham.
 2101. You are a married man? Yes.
 2102. Have you any children? No.
 2103. What occupation had you been following before you left England? I was in a mine.
 2104. Coal-mining? Yes.
 2105. Had you been coal-mining long? Four years.
 2106. And what before that? I was in a factory—engine works.
 2107. Who nominated you? Andrew Teasdel, the wife's uncle.
 2108. Where does he live? At times in Newcastle.
 2109. What did you say was your occupation before you came out? I said I was labouring in the mines.
 2110. Do you know whether the wife's uncle is a coal-miner? He is not working in the mines at present.
 2111. Did he send for you? Yes.
 2112. Did he recommend you to come out? He recommended the wife's father; I was not coming at the time.
 2113. Did he send for anyone else? For his father, his sister, and his sister's husband.
 2114. Was his father a coal-miner? Yes; he is on board now.
 2115. What is his name? William Teasdel.

R. Nevin.
 6 July, 1880.

William Anderson examined :—

2116. What is your name? William Anderson.
 2117. From what part did you emigrate? The county of Durham.
 2118. Who sent for you? The wife's brother, my brother-in-law.
 2119. Where does he live? Near Newcastle.
 2120. What is he? He has been a miner; he has been several things.
 2121. Is he at the coal-mines now? He is not now.
 2122. What was he before he came out to the Colony? A coal-miner.
 2123. *Mr. Barbour.*] What is his name? Andrew Teasdel.
 2124. *Chairman.*] Did you describe yourself as a miner? Mining labourer.
 2125. Was it owing to correspondence with Teasdel that you emigrated? Well, it was.
 2126. I suppose you thought you would better your condition? Yes.
 2127. You are aware that you are entered upon the ship's books as a labourer? Yes.
 2128. *Mr. Jacob.*] You described yourself as a mining laborer? Yes.
 2129. To whom? In my papers that I sent up to London.
 2130. Did you hear that miners' labourers would not be selected as immigrants? I did not hear that. I have been close upon five years labouring in the mines.
 2131. You mentioned that in your paper? Yes, I did.
 2132. And no exception was taken to you as a miner? No.
 2133. *Mr. Day.*] Do you understand any other work besides mining? Yes, labouring; just a common labourer.
 2134. You could do any kind of labouring work? Yes.
 2135. Then you have not been all your life in a mine? In and about a mine for 30 years, underground and above, such as labouring on railways, and working down in the mines, and hewing coal.
 2136. I suppose what you mean by labouring is that you can handle a pick and shovel, and dig? Yes.
 2137. Can you do anything on a farm? No, nothing on a farm.
 2138. Only as a general labourer? Yes, an ordinary labourer.
 2139. *Mr. Barbour.*] Would you just mention how many of your relations are on board? My wife's father, and four sons, and a son-in-law, and two daughters. There are ten of us altogether.
 2140. *Chairman.*] What are the ages of your sons? Two are 16, one 18, and the other 19.
 2141. I presume they have also been working at the mines? Yes, in and about the mines.
 2142. But your father-in-law has paid his passage out?
 2143. *Mr. Barbour.*] In the mines, what you call labouring in and about the mines, those are not regular miners? They are common labourers, just knocking about, doing anything. When I say labouring I was kind of responsible. The coal-hewers and the deputy overmen, those are practical miners; but during the last four or five years I have been looking after the work that has been going from the hewers to the ships. That is what I call an ordinary labourer. I have also worked on the railway.
 2144. You mean attending the trucks? Yes.
 2145. And the practical miner is the hewer? Yes.
 2146. *Mr. Day.*] What are you going to do here? I am engaged in a mine, but I do not know at what. My sons and myself.
 2147. *Chairman.*] Who engaged you? Andrew Teasdel. He is at a place called Raspberry Gully.
 2148. Do you know who engaged you for Raspberry Gully? John Barker they call him. He was a neighbour of mine at home.
 2149. *Mr. Barbour.*] What is he now? A miner.
 2150. For himself—on his own account? No, not on his own account.
 2151. *Chairman.*] Does he offer to engage you on behalf of others? He tells me that his master would employ us—all the six—and he will get a house for us with four rooms.
 2152. How did he know you were here? He knew I was coming out. His friends would send him a letter.

W. Anderson.
 6 July, 1880.

Stephen

Stephen Howell examined:—

- S. Howell. 2153. *Chairman.*] What is your name? Stephen Howell.
 2154. From what part of England? From Monmouthshire.
 6 July, 1880. 2155. From a coal-mining district? Yes.
 2156. What pursuit did you follow there? Coal-mining.
 2157. Have you been coal-mining all your life? Yes.
 2158. Where do you intend to go to now? To Lambton.
 2159. Who sent for you? My uncle.
 2160. What is his name? Stephen Powell.
 2161. Stephen Powell sent for you? Yes, he is my uncle. He is my mother's brother.
 2162. What is he? A collier.
 2163. Did he nominate you? Yes.
 2164. Was it owing to anything he wrote to you that you were induced to emigrate? From information from friends in England.
 2165. As to the prospects for coal-miners out here? Yes.
 2166. What description did you give of yourself? A stone-miner.
 2167. What did you mean by a stone-miner? Anything underground.
 2168. Did you work at anything but coal-mining? Only the hard ground, as we call it.
 2169. What does stone-mining comprise? Sinking the pits, or any hard work.
 2170. Are you aware that you are entered as a labourer? Yes.
 2171. Why did you describe yourself as a labourer? The officer in Pontypool told me it would suit best.
 2172. The officer told you it would suit better if you described yourself as a labourer? Yes.
 2173. What was he? The local agent for the Government, Mr. Morgan.
 2174. Did he occupy any other position? No, nothing.
 2175. *Mr. Jacob.*] Did he tell you why? He said it would sound better.
 2176. *Chairman.*] How came you to go to see him? That was the one we had to go and see.
 2177. Did he reside in any town or village there? In Pontypool.
 2178. Did he carry on any other business? No.
 2179. Did he reside there permanently? Yes.
 2180. *Mr. Day.*] Have you made any arrangement as to where you are going? To Lambton.
 2181. You are going to work down there? Yes.
 2182. Have you got any work to go to? We are not sure till we go there and see.
 2183. How were you treated on board ship? Very well.
 2184. Since you started till now? Yes.
 2185. *Chairman.*] Do you know how many coal-miners there are on board? No, I do not.
 2186. Do you know how many are going to the Newcastle district from the ship? About sixty-four, with women and children and all.
 2187. That is males and females; adults and children? Yes, altogether.
 2188. *Mr. Jacob.*] How do you happen to know the number; have you been telling one another? Yes.

Dr. Charles Henry Gibson examined:—

- Dr. C. H. Gibson. 2189. *Chairman.*] Your name? Charles Henry Gibson.
 2190. You are the medical officer of this ship? I am.
 6 July, 1880. 2191. Can you tell the Committee about how many of the immigrants on board have been sent for by friends in the coal-mining districts? About twenty-five.
 2192. Has your attention been called to the fact that a number of the immigrants have been entered under different occupations to what their real ones are? That is my impression, from conversation with the people.
 2193. Do you mean the heads of families? I mean the heads of families—ten or twelve heads of families.
 2194. How many of the immigrants do you suppose will leave the vessel for Newcastle? About eighty souls. That is my impression.
 2195. For the coal-mining districts? Yes.
 2196. Do you know whether the coal-miners on board are in excess of the number entered upon the ship's manifest? I believe they are in excess.
 2197. Is that owing to the department in England checking the emigration of miners? I cannot tell you that; I do not know that they have checked miners. It is out of my province.
 2198. Do you know if any of the immigrants entered as farm labourers are coal-miners? I do not know. It is not within my province to deal with the question of occupation, unless as bearing upon a man's state in illness or disease.
 2199. *Mr. Barbour.*] Do I understand you to say that it is your impression that there are some farm labourers on board who are miners? I have no impression; I have no knowledge that would justify me in giving an opinion.
 2200. *Mr. Jacob.*] What data have you? Conversation among the people; addressing them, and speaking to them. I have fairly good data to go upon.
 2201. *Mr. Barbour.*] On the whole, do you think they are a desirable class of immigrants for a new Colony? I do not; but I would like to qualify that statement. As a whole, you have to take the whole body, and that embraces a percentage of unfit men. In my judgment the percentage of unfit men is larger than what it ought to be. Even under the best system there will be some who are absolutely useless for any purpose whatever; but there are a far larger number of people—15 per cent.—who are not likely to be of any use whatever.
 2202. Have these been nominated in the Colony, or have they been sent out? I believe nearly all the people in this ship are nominated.
 2203. *Chairman.*] Are any of the unsuitable ones in the list of persons nominated by the Agent General? None of those are objectionable.
 2204. Your remarks do not refer to those? No.
 2205. And consequently the 15 per cent. are nominated by parties in the Colony? Consequently. The statement does not apply to the general body; and I except the single women.

William

SELECT COMMITTEE ON ASSISTED IMMIGRATION.

79

William Cousens examined :—

2206. *Chairman.*] Your name is? William Cousens.
 2207. What part of England do you come from? I belong to Scotland, Aberdeen.
 2208. You are a carpenter by trade? A carpenter and joiner.
 2209. What induced you to immigrate to this Colony? A cousin.
 2210. Where does he reside? He is working up at Windsor.
 2211. What is he? A carpenter.
 2212. Did he nominate you? Yes.
 2213. Did he write and tell you the state of business in your trade here? Yes; he said he could give me work.
 2214. Have you a family? Two in family.
 2215. And you think you have better prospects here than in the old country? Yes; or I would not have left.
 2216. How long has your cousin been out here? Six years.
 2217. And is he doing well? Yes.
 2218. Did he come out as an immigrant? Yes.
 2219. On his own account? Yes.
 2220. Have you any more on board sent for by your cousin? I am the only one.
 2221. *Mr. Barbour.*] You say your cousin has sent for you? Yes.
 2222. Did he say he would give you a job? Yes.
 2223. What is he doing, is he working at his trade? Yes.
 2224. Is he a contractor? As far as I can learn.
 2225. *Mr. Day.*] Did he tell you how much you could earn a-day? He said he would give me 12s., but now he said, on Saturday, that wages are down to 11s.
 2226. *Chairman.*] You regard this as good wages? Yes. I was earning 9d. an hour before I left.
 2227. *Mr. Jacob.*] How many hours did you work? Nine.
 2228. *Chairman.*] And did you get regular work? Yes.
 2229. Your position will be improved here; you can live for less? I should think so. Meat is cheaper, and the price of provisions is less.
 2230. *Mr. Day.*] Then you are pretty sure of work at 11s. a-day? Yes; as soon as I get on shore, a house and work are ready for me.

W. Cousens.
 6 July, 1880.

John Allmett examined :—

2231. *Chairman.*] What is your name? John Allmett.
 2232. What part of England do you come from? Bristol.
 2233. What is your trade? Carpenter and joiner.
 2234. By whom were you nominated? By my sister.
 2235. Where does she live? At Marrickville.
 2236. Had you been living long in Bristol? All my life.
 2237. What induced you to emigrate? To better my condition.
 2238. Did you hear from your sister as to the rate of wages here? I saw it in the papers she sent Home.
 2239. Have you had any communication with her since you arrived here? Three letters.
 2240. Have you heard of your prospects of employment here? No.
 2241. Are you a married man? Yes.
 2242. *Mr. Day.*] What were you getting a day in Bristol? I was paid by the hour—7d. an hour.
 2243. How many hours did you work? Fifty-four hours a week in the summer, and forty-eight in the winter.
 2244. That would be 5s. 3d. a day? About that.
 2245. Did you get regular work? Yes; but within the last twelve months trade has been very depressed.
 2246. Was it constant work? No, it was not.
 2247. Did your sister tell you you could get constant work here? No.
 2248. Did she give you encouragement to come? No; she said she would not advise me; I could please myself, but she nominated me.
 2249. *Chairman.*] What led you to emigrate was seeing the rate of wages, and you thought you could better your condition by coming here? Yes.

J. Allmett.
 6 July, 1880.

ASSISTED IMMIGRATION.

APPENDIX.

[To the Evidence of G. F. Wise, Esq., 14th April, 1880.]

A 1.

TRADES and Callings of Immigrants who arrived under the Assisted Immigration Regulations of September, 1876, in 1877, 1878, and 1879.

Trades and Callings.	1877.	1878.	1879.	Total.

[Handed in by Chairman, 9 July, 1880.]

C 1.

The Rev. G. Sutherland to Chairman, Committee on Assisted Immigration.

Sir,

Ross-street, Forest Lodge, June 14, 1880.

Will you permit a citizen, who occupies a public position which affords some means for knowing what our Colony requires in the matter of immigration, to offer some suggestions on the important subject entrusted to your Committee.

1. Assisted immigration cannot yet be dispensed with unless we are content to move slowly, and below the enterprise and requirements of the age.

2. Our immigration should be freed from some of its fetters and prejudices. To give us the best returns for our money we should draw a ship-load of emigrants in rotation from the south of England, the north of Ireland, and the east of Scotland. The thrift, the push, the energy, the enterprise of Scotch emigrants have made Canada and Otago very largely what they are. It is unnecessary to say that the rule of introducing eight Englishmen to one Scotchman, or some such proportion, is so utterly ludicrous that it is high time that it disappeared for ever from the code of regulations. We can afford at this time of day to draw an equal number of Englishmen, Scotchmen, and Irishmen into our Colony without this offensive class legislation. We believe that we are the only Colony in all Australasia where such restriction exists. Certainly the introduction of a large body of Scotch agriculturists would not swell the numbers of those who hang round Sydney looking for work as hewers of wood or drawers of water.

3. The Agents coming to go home from here—one to each of the three countries—with such instructions that we would not have Irishmen from England and Scotland as well as from their own Isle; and without inquiry as to their religion, but with directions that would guard that important element from being worked as it has been for the past periods to the great advantage of one if not two parties.

4. As settlement on the waste lands of our Colony is most desirable, surveyed districts open for purchase should be put within the reach of agricultural or pastoral immigrants, that if possible each ship-load might mark some further stage of occupation and consequent cultivation. Such is now the programme of the Canadian Government in the settlement of their great

great north-western territory. We are well aware that our thin and generally arid soil over much of our upland territory presents difficulties peculiar to our Colony; but we think that maps of every agricultural and fruit-growing section of our country open to selection or purchase could be prepared, furnished to Agents, and shown to immigrants on arrival, and every inducement given to an early occupation of their new homes.

5. Till something of this nature is done, the results of immigration may be more real than perceptible, in being scattered as units from north to south and from east to west.

It will be an immediate gain to New South Wales if every third ship-load of immigrants contains the brains, the energy, the enterprise, the love of independent homes of Scotchmen. If drawn from the right counties few of them will ever enter the police court, the prison, or the pauper asylum.

Hoping that you may give the foregoing remarks any attention to which they may be entitled as coming from one who has seen the results of immigration in America, New Zealand, and Australia, and who has made New South Wales his permanent home,

I am, &c.,
GEO. SUTHERLAND,
Pastor, St. George's Church, Sydney, and Editor of *The Witness*.

C. 2.

Mr. J. W. Watt to Chairman, Committee on Assisted Immigration.

My dear Sir,

Sydney, 16 June, 1880.

Referring to the Inquiry on Immigration, of which you are Chairman, I enclose copy of Chamber of Commerce report, and will be glad if you will consider suggestions as to equalizing cost of passages from the United Kingdom to this Colony with that to America, allowing passengers to choose their own ship, the only condition of Government paying part passage being that the immigrant paid the balance himself.

It is usual to grant free passes by rail to the interior in favour of immigrants at public expense. Would it not be well to give the same privilege to all passengers, second-class or steerage, who pay their own passages to the Colony, and the announcement in England of this privilege would be a great inducement to passengers. For instance, the Orient Company, for which we are agents, would circulate the concession of such a privilege widely, and the concession would cost the Colony nothing while it would aid in bringing here the most desirable class of passengers, viz., those who pay their own passages.

I leave for England to-morrow *via* San Francisco, but hope to return before the end of the year.

Yours, &c.,
JOHN W. WATT.

1879-80.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

IMMIGRATION.

(LETTER FROM COLONIAL SECRETARY TO AGENT GENERAL FOR THE COLONY.)

Ordered by the Legislative Assembly to be printed, 13 May, 1880.

[Laid upon Table in accordance with promise made in answer to Question 10, Votes 94, Wednesday, 12 May, 1880.]

The Colonial Secretary to The Agent General.

Sir,

Colonial Secretary's Office, Sydney, 27 December, 1877.

With reference to your telegram of the 21st, and to mine, in answer, of the 27th instant, concerning the exhaustion of the Immigration Vote, and the consequent need of restricting emigration operations in the United Kingdom, I have now the honor to inform you that, from inquiries made, I learn beyond doubt that by reason chiefly of difficulties arising between the large employers and trade-unions, there is not at present in this Colony any employment, or any prospect of employment, for engineers or moulders, or in fact for any workers in any branch of the iron trade. You would do well therefore to discourage or refuse assistance to persons of this class who propose to emigrate.

2. On the other hand, I am able to assure you that there is good demand for stonemasons, bricklayers, and carpenters, and generally for all persons employed in the building trade; whilst throughout the whole of the interior there is practically an unlimited demand for pick and shovel labourers.

I have, &c.,

MICH. FITZPATRICK.

1879-80.

No. 1.

The Agent for Immigration to The Principal Under Secretary.

Sir, Government Immigration Office, Sydney, 24 January, 1879.

Referring to paragraph No. 5 of my report* of the arrival of the ship "Northampton," I have the honor to bring under the notice of the Colonial Secretary a most important discrepancy which exists between the "contract tickets" issued to the immigrants prior to their embarkation, which purports also to be an acknowledgment of their payment of £2 each towards their cost of passage, and the charter-party of the ship, which gives in several instances a different scale of rations to be issued to the immigrants, and thus on many occasions the immigrants have just cause for complaint, asserting, and with truth, that they were promised to be provided with certain rations which have not been given to them.

Thus:—

	Per contract ticket.	Per charter-party.
Pork,	per week 24 ozs.	16 ozs.
Preserved meat,	" 16 "	24 "
Butter,	" 6 "	9 "
Cheese,	" 6 "	3 "
Biscuit,	" 42 "	28 "
Flour,	" 56 "	90 "
Oatmeal or rice,	" 24 "	20 "
Peas,	" $\frac{3}{4}$ pint.	$\frac{1}{2}$ pint.
Potatoes (preserved),	" 8 ozs.	12 ozs.
Tea,	" 1 "	$1\frac{1}{2}$ "
Sugar,	" 12 "	16 "
Pepper,	" $\frac{1}{2}$ "	$\frac{1}{4}$ "

"A further discrepancy," as stated by the Surgeon-Superintendent of the ship "Northampton," "also exists on the scale of rations issued to children under twelve years of age."

A printed form of the dietary scale as per charter-party is posted up in the ship, and is provided and signed by the Agent General, to which of course the master of the ship is bound to adhere, "whilst the passengers contract ticket" is signed by one of the officers in the department of the Agent General in London, thus H. H. Speed Andrews, R.N., as agent on behalf of brokers.

There is no doubt that these two documents should exactly agree the one with the other, more particularly as both appear to emanate from the office of the Agent General, although I fail to understand why the signature of Mr. Speed Andrews is attached to the passenger contract ticket "as agent on behalf of brokers."

I have the honor to suggest that this very important matter may be brought under the immediate notice of the Agent General.

I have, &c.,
 GEORGE F. WISE,
 Agent for Immigration.

Minute by the Colonial Secretary.

The Agent General's attention should no doubt be invited to this matter.—24. Approved.—H.P., 24/1/79.

* Dated 23 January, 1879, and laid upon the Table of the Legislative Assembly, 24th January, 1879.

No. 2.

The Colonial Secretary to The Agent General.

Sir,

Colonial Secretary's Office, Sydney, 29 January, 1879.

24 January, 1879. With reference to my letter of the 24th instant, enclosing a copy of the report* of the Agent for Immigration, regarding the arrival of the ship "Northampton," &c., I have now the honor to invite your attention to the statements and observations contained in the letter, of which a copy is herewith transmitted, from Mr. Wise, on the subject of a discrepancy between the ship's charter-party and the contract tickets issued to the emigrants, in the matter of the scale of rations.

I have, &c.,

HENRY PARKES.

No. 3.

The Principal Under Secretary to The Agent for Immigration.

Sir,

Colonial Secretary's Office, Sydney, 1 February, 1879.

In reply to your letter of the 24th of last month, reporting on the discrepancy between the charter-party of the ship "Northampton" and the contract tickets issued to the emigrants in the matter of the scale of rations, I am directed by the Colonial Secretary to inform you that the attention of the Agent General in London has been invited to the statements and observations contained in your letter.

I have, &c.,

MAXWELL ALLAN.

No. 4.

The Agent General to The Colonial Secretary.

Sir,

3, Westminster Chambers, S.W., 27 March, 1879.

I have the honor to invite your attention to the fact, that whereas, under the provisions of the Address of the Legislative Assembly, dated the 6th July, 1877, the reports by the Immigration Agent, some of which contain reference to, or criticism on, proceedings taken or arrangements made in this office, are constantly printed as Parliamentary papers, it has not hitherto been the practice to print the replies which I am usually invited or instructed to make to such references or criticisms. I venture therefore to submit, that not only does the above quoted address appear to render necessary the publication of my replies, but that irrespective of any such special reason it is in itself right upon general grounds that the same publicity should be given to the one class of documents as to the other.

I have, &c.,

WILLIAM FORSTER.

Submitted, 13/5/79. Approved.—H.P., 14/5/79.

No. 5.

The Agent General to The Colonial Secretary.

Sir,

3, Westminster Chambers, S.W., 27 March, 1879.

In reply to your letter No. 79/651, of the 29th January last, inviting my attention to the statements and observations contained in the letter from Mr. Wise, dated 24th of January last, on the subject of a discrepancy between the charter-party of the emigrant ship "Northampton," and the contract tickets issued to the emigrants, in the matter of the scale of rations, I have the honor to explain that the contract ticket is a legal document, which the owner of the vessel is obliged to give to the emigrant under the "Passengers' Act, 1855" (copy of which is enclosed), and that the scale of provisions shown therein is, as therein stated, that which, "at least" the master of the vessel is "required by law" to supply; but the charter-party secures to the emigrant a more liberal scale of provisions than that "required by law." Obviously, however, this increased scale cannot, from the nature and purpose of the document, appear in the contract ticket, the form and wording of which it is not in my power in any respect to alter, because it is a schedule to the Act, unless in the case of certain articles for which the substitution of others is expressly sanctioned by the Act. But a notice of the increased scale is posted up in the ship, as mentioned by Mr. Wise, in order that the emigrant may know the extra quantities, which are secured to him by the charter-party, over and above what are required by law. It will thus be evident to you, notwithstanding Mr. Wise's emphatic affirmation that "there is no doubt that these two documents should exactly agree the one with the other," that it is, on the contrary, absolutely impossible that these two documents should agree, unless the actual be reduced to the bare legal scale,—which clearly would not be for the benefit of the emigrant.

Again, with regard to Mr. Wise's remark, that "thus on many occasions the immigrants have just cause for complaint," on account of the difference alluded to, I have the honor to invite your consideration, not of mere extracts from the two scales arbitrarily selected by Mr. Wise, but of the two complete scales placed side by side as hereto appended in columns so as to show the difference in favour of and against the emigrant, and accompanied by brief explanatory remarks. It is difficult to conceive how, from a comparison of the two scales, any emigrant could find cause for complaint, or be otherwise than grateful for the difference in his favour. In order, however, that attention may be specially directed to the fact of the superior liberality of ours over the legal scale, I propose in future to add the following words to the form of dietary scale which is posted in the ship:—"N.B.—This scale, to the benefit of which the emigrant is entitled, is more liberal than the scale required by law as shown on the contract ticket."

The difficulty Mr. Wise feels in failing "to understand why the signature of Mr. Speed Andrews is attached to the passenger's contract ticket as agent on behalf of brokers," is also easily explained. The contract ticket is a legal document which, as I have already remarked, the owner of the vessel is bound to furnish, and which it is absolutely necessary in order to secure to the emigrants, as well as to the Government by whom their passages are paid, the benefits of the Passengers' Act, should be in the precise form required

* Dated 23rd January, and laid upon the Table of the Legislative Assembly, 24th January, 1879.

required by that Act. (I regret two slight clerical errors as explained in the appended table.) But inasmuch as it would be in practice exceedingly inconvenient that the contract tickets should be issued directly to the emigrants by the owners of the vessel, all other transactions with the emigrants or on their behalf being conducted by and through this office, it is arranged, and is accordingly provided in clause 13 of the charter-party, that the owners should authorize our Emigration Officer to act for them in this respect and capacity only, as set forth in a form drawn up for the purpose, a copy of which I have the honor to enclose.

I cannot refrain from concluding this long, but I hope satisfactory, explanation, in a matter, the merits of which are almost obvious upon the face of it, with a suggestion that it might be desirable if the Immigration Agent would in future take a little more pains to examine the documents in his possession before indulging in comments which impute negligence to others, and which, however easily, cannot be even in the most summary way refuted without considerable trouble in examination and correspondence.

I have, &c.,

WILLIAM FORSTER.

[No. 4.]

New South Wales Emigration.—Appointment of Agent to sign and issue Contract tickets for Emigrants.

To Mr.

Sir,

3, Westminster Chambers, Victoria-street, Westminster, 18

Whereas have entered into a contract with Her Majesty the Queen on behalf of Her Colony of New South Wales, and with the Agent General of that Colony to convey from Plymouth to Sydney certain emigrants as therein mentioned, to be selected by the said Agent General, and for the more convenient issue and delivery to the emigrants of the contract tickets and duplicates which it is requisite should be issued and delivered to them desire to appoint you

of to be agent to issue and deliver the same.

do therefore hereby constitute and appoint you to be agent for and in name, or in your own name as such agent to sign, issue, and deliver all such passengers' contract tickets and the counterparts thereof, as it shall be requisite or proper to sign, issue, and deliver in accordance with the Passengers Act to such emigrants as shall be approved by or on behalf of the said Agent General, hereby agreeing to ratify and confirm all or whatsoever you shall lawfully do or cause to be done in the premises, and to hold you harmless and indemnified against all claims, demands, losses, costs, charges, and expenses which may be made upon you or which you may sustain, pay, or incur in consequence of acting as such agent as aforesaid.

Your obedient Servant,

Minute by the Colonial Secretary.

Agent for Immigration for any remarks he desires to make. To be returned and re-submitted.—
H.P., 14/5/79.

The Agent for Immigration, B.C., 14 May, 1879.—C.W.

No. 6.

The Colonial Secretary to The Agent General.

Sir,

Colonial Secretary's Office, Sydney, 19 May, 1879.

In reply to your letter of the 27th of March last, concerning the reports on Immigration, laid before Parliament in pursuance of the Address of the Legislative Assembly, dated 6th July, 1877, I have the honor to inform you that I have approved of your suggestion that such replies as you may have to make

make to any of the Immigration Agent's reports, containing reference to or criticisms on, proceedings taken or arrangements made in your office be printed, and laid before Parliament in the same manner as the reports themselves, and that the necessary instructions have been given accordingly.

I have, &c.,

HENRY PARKES.

No. 7.

The Principal Under Secretary to The Agent for Immigration.

Sir,

Colonial Secretary's Office, Sydney, 19 May, 1879.

I am directed to state for your information and guidance that, in consequence of a representation made by the Agent General in London, concerning the reports on Immigration, laid before Parliament in pursuance of the Address of the Legislative Assembly, dated 6th July, 1877, the Colonial Secretary has approved of a suggestion of Mr. Forster's that such replies as he may have to make to any of your reports containing reference to or criticism on proceedings taken or arrangements made in his office be printed, and laid before Parliament in the same manner as the reports themselves.

I have, &c.,

CRITCHETT WALKER.

No. 8.

Report of Agent for Immigration.

Memorandum.

Immigration Office.

In the letter herewith annexed from the Agent General, dated March 27th, 1879, referring to my communication of the 24th January, 1879, addressed to the Honorable the Colonial Secretary, relative to the difference in the dietary scale as per contract ticket delivered to the emigrant, and to that of the charter-party, in accordance with which provisions are issued to the emigrant during the voyage, it appears to me that my observations, which have originated in consequence of constant complaints from emigrants to the Board of Immigration, have been misunderstood by the Agent General; otherwise, I do not think that my communication would have been interpreted as one in which I had "indulged in comments which impute negligence to others, and which, however easily, cannot be, even in the most summary way refuted without considerable trouble in examination and correspondence."

I am perfectly aware, as stated in my letter of the 24th January, that in many instances the emigrants have a more liberal allowance of provisions issued to them than by their contract ticket they are entitled to receive; of this excess of liberality they do not complain, but they have continually complained that certain rations which, by their contract ticket, they expected would be provided for them have not been so provided.

I readily admit that on the whole emigrants have no cause for complaint, but nevertheless I have considered that I should make known their complaint, so that if possible their contract ticket should be more explicit, and certainly should not show a *larger* quantity of provisions in any one particular than that which the master of the vessel is bound to provide.

If reference be made to my own letter of 24th January it will be seen that the scale of rations therein noted is confirmed by the ration scale furnished by the Agent General, in which it is stated that the following articles are issued as *against* the emigrant, viz.:

8	ozs. pork,	per week.
14	" biscuits	"
4	" rice or oatmeal	"
3	" cheese	"

As such contract ticket is a "legal document," which specifies the provisions which the owner of the vessel is obliged to give to the emigrant under the Passenger Act, and that the scale of provisions therein stated is that which "*at least*" the master of the vessel is required by law to supply, I submit that notwithstanding that extra supplies are given to the emigrants, the fact remains that the legal document which they hold is not carried out in its integrity; and although by the 35th clause of the Passenger Act, referred to by the Agent General, it is incumbent on the master of the vessel, under a very severe penalty, to "set forth in the contract tickets of the passengers a list of the substituted articles which may, at his option, be made in the dietary scale," no such information is given thereon.

I notice that the complaints made are so far acknowledged by the Agent General that he proposes "in future to add the following words to the form of dietary scale which is posted in the ship."

N.B.—"This scale, to the benefits of which the emigrant is entitled, is more liberal than the scale required by law as shown in the contract ticket."

I would respectfully suggest that the "substitutions" should also be entered upon the contract tickets as is positively directed to be done in accordance with the 35th clause of the Passenger Act, and thus, every cause for complaint would then be removed.

To the Principal Under Secretary, B.C., 20 May, 1879.

G.F.W.

No. 9.

The Agent for Immigration to The Principal Under Secretary.

Sir,

Government Immigration Office, Sydney, 24 June, 1879.

Referring to your communication of the 19th ultimo, (79/3,603,) I have the honor to suggest that in compliance with the request from the Agent General, the letter from the Agent General, addressed to the Colonial Secretary, dated 27th March, 1879, relative to the complaints of the emigrants per ship "Northampton" in January last, be submitted to the Legislative Assembly, also that my reply to the said letter, addressed to yourself, dated 20th May, 1879, should be published at the same time. Both of these documents are in your office.

Probably also the subsequent communication from the Colonial Secretary to the Agent General would be published at same time.

I have, &c.,

GEORGE F. WISE,

Agent for Immigration.

Minute by the Colonial Secretary.

Appd.—H.P., 12/2/80.

1879.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

IMMIGRATION.

(REPORTS FROM IMMIGRATION AGENT AND OTHERS—SHIP "NORTHBROOK.")

Ordered by the Legislative Assembly to be printed, 28 October, 1879.

FURTHER RETURN to an *Address* adopted by the Honorable the Legislative Assembly of New South Wales on the 6th July, 1877, That, in the opinion of this House, there should be laid upon the Table of this House,—

“(1.) Copies of all Reports, since 1875 to date, from the Agent General, the Health Officer, and Agent for Immigration, to the Government, relative to the despatch of Emigrants from England or elsewhere, and after their inspection on arrival in the Colony by each ship.

“(2.) That similar reports should henceforward be laid upon the Table of the House as soon as practicable after the arrival and inspection of the Immigrants by each ship.

“(3.) That the above Resolutions be communicated by Address to His Excellency the Governor.”

(*Mr. Macintosh.*)

IMMIGRATION.

The Agent General for New South Wales to The Colonial Secretary, New South Wales.

Sir,

3, Westminster Chambers, S.W., 24 April, 1879.

I have the honor to inform you that the ship "Northbrook," of 1,820 tons register, has been chartered for the conveyance of emigrants from Plymouth to Sydney, New South Wales, to be ready to embark passengers on Monday, the 12th May next.

The rates are as follows, viz. :—

If 325 and under 350	£15 0 0
If 350 " 375	14 15 0
If 375 and upwards	14 9 6

I have, &c.

WILLIAM FORSTER.

The Agent General for New South Wales to The Colonial Secretary, New South Wales.

Sir,

3, Westminster Chambers, 15 May, 1879.

With reference to my letter of the 24th ultimo, announcing the engagement of the "Northbrook" for the conveyance of the emigrants to Sydney, I have the honor to enclose herewith a copy of the charter-party of the vessel.

The ship will sail from Plymouth with the passengers described in the accompanying list.

The undermentioned gratuities have been promised on condition that the several parties shall have performed their duties to the satisfaction of the Government, viz. :—To the surgeon-superintendent, Wm. Dunkley, Esq., seventh voyage, 16s. per head; to the master, the first mate, the second mate, the third mate, or person who served out the provisions, 4s. on each emigrant landed alive, to be divided as the surgeon-superintendent recommends, subject to the approval of the Government; to the schoolmaster, £5; the matron, £40; to the four sub-matrons, £3 each; the cook, £5; the cook's assistant, £3; the baker, £3; the men in charge of the distilling apparatus, £5; the hospital assistant, £3; the water-closet constable, £5; the ordinary and female mess constables, each £3.

I have, &c.,

WILLIAM FORSTER.

The Agent General for New South Wales to The Colonial Secretary, New South Wales.

Sir,

3, Westminster Chambers, S.W., 22 May, 1879.

Referring to my despatch of the 24th April last (No. 34 *Emigration*—79), reporting the chartering of the ship "Northbrook," I have now the honor to advise you of the sailing of that vessel on the 15th instant with 534 emigrants on board, equal to 429 statute adults, and to enclose :—

- 1st. Alphabetical list of emigrants, giving their names, ages, occupations, and the amount received by the Emigration Officer for passages and bedding, and paid into the Bank of New South Wales.
- 2nd. Return of the emigrants embarked, distinguishing the nominations made in the Colony, general assisted, English, Scotch, and Irish.
- 3rd. Certificate of Dr. William Dunkley of his examination of the emigrants before embarkation, as well as of the medicine chest.

I have, &c.,

WILLIAM FORSTER.

The Agent for Immigration to The Under Secretary, Colonial Secretary's Department.

Sir,

Immigration Office, Sydney, 3 October, 1879.

I have the honor to report the arrival, on the 14th August, of the ship "Northbrook," with immigrants. This vessel left Plymouth on 15th May, thus completing the voyage in ninety-one days.

The contract price, as per charter-party, is at the rate of £14 9s. 6d. per statute adult.

2. This vessel arrived in port in a cleanly condition.

With regard to the arrangements for the convenience of the emigrants, the surgeon-superintendent reports that "the accommodation was very good, with the exception of the single women's water-closet and bath-room, which caused inconvenience, particularly at night, through the water-closet being on deck, in lieu of in the 'tween decks, for use of the women and children at night or in very bad weather.

Complaints having been made as to insufficiency of space in the compartment allotted to the female immigrants, the Board of Immigration directed that a measurement of the ship should be made by a marine surveyor. The report from the Board of Immigration thereon is herewith annexed.

3. The immigrants by this vessel consisted of ninety-seven married couples, less one married man and two married women who died on the voyage, with their 178 children, 101 single women, and fifty-four single men. Their nationality is noted in the margin.

In addition to the sum of £158 paid by depositors in this Colony, a further amount of £677 was paid direct to the Agent General in London, thus making a total of £835 paid by the immigrants or by their friends towards the cost of their passage.

4. There occurred during the voyage eighteen deaths, namely three adults and fifteen infants under two years of age; there were also eight births.

5. On examination by the Board of Immigration of the married people and of the single men on board the ship, and of the single women at the depôt, all expressed themselves well satisfied both as to the sufficient quantity and as to the good quality of the provisions issued to them during the voyage.

Annexed herewith is an abstract return of the disposal of the immigrants.

6.

English	293
Irish	166
Scotch	66
Other countries	4

524

6. The larger number of the single women who were received at the depôt were discharged to their friends, leaving forty who, on the hiring day, immediately obtained engagements as domestic servants at an average rate of wages of £23 8s. per annum, equal to 9s. per week.

7. A large number of the immigrants availed themselves of free passes by railway and by steamers to twenty-seven different localities in the country districts, namely, fifty-three married couples with their 119 children, twenty-seven single women and thirty single men, making a total of 232 individuals; of this number, twenty-four married couples and six single men were hired by employers previous to their departure from Sydney.

8. The surgeon-superintendent, William Dunkley, Esq., appears to have given every satisfaction in the performance of his duties; it is therefore recommended that he be paid the gratuity of 16s. per head, as per letter of instructions from the Agent General, for this his seventh voyage in charge of immigrants; also that he receive the usual certificate entitling him to a further sum of £60 towards the cost of his return passage to England.

9. It is further recommended that, in accordance with the letter of instructions, the usual gratuity of 4s. per head on the immigrants landed alive be paid to the master and officers of the ship, namely, 1s. 6d. per head to the master, 1s. per head each to the first mate and to the officer who served out the provisions, and 6d. per head to the second mate.

10. The surgeon-superintendent reports of the matron, Mrs. Cochot, that "she performed her arduous duties very well"; it is therefore recommended that the promised gratuity of £40 be paid to her, also that she receive the usual certificate entitling her to a further sum of £30 towards cost of her return passage to England.

11. Other gratuities are recommended to be paid, as follows:—To the schoolmaster, the baker, the engineer, and the water-closet constable, each £5; £3 each to the surgeon's assistant, the assistant cook, also to the four sub-matrons, and to the twelve constables, and on the special recommendation of the surgeon-superintendent, the sum of £5 to the head nurse, of £3 to the second nurse, and of £2 to an assistant school-mistress.

12. The surgeon-superintendent reports that diarrhoea, pneumonia, and bronchitis were the principal diseases which occurred during the voyage.

I have, &c.,
GEORGE F. WISE,
 Agent for Immigration.

Ship "Northbrook," arrived at Sydney, 15th August, 1879.

					annum.

Government Immigration Office,
 Sydney, 3 October, 1879.

GEORGE F. WISE,
 Agent for Immigration.

Report of the Board of Immigration relative to the measurements of the ship "Northbrook."

Government Immigration Office, Sydney, 3 October, 1879.

THERE having been reason to believe that the area space allotted to the emigrants on board the ship "Northbrook," recently arrived, was less than that to which they were entitled by the conditions of the charter-party, and as the single women had complained that their compartment was overcrowded, the Immigration Board directed that Captain Pockley, marine surveyor, should be instructed to measure the several compartments of the ship, and to furnish his report thereon (copy of which is herewith annexed).

From this report it appears that the area space in the several compartments was sufficient, in accordance with the terms of the charter-party, which allows 17 feet for each statute adult,—

In the single men's compartment, for 51 statute adults.

In the married people's " 263 "

In the single women's " 85½ "

whereas the number embarked and berthed—

In the single men's compartment, 54 statute adults.

In the married people's " 270 "

In the single women's " 105 "

Thus the number embarked in excess of the terms of the charter-party was as follows:—

In the single men's compartment, 3 statute adults.

In the married people's " 7 "

In the single women's " 19½ "

Captain Pockley, however, has stated that "in consequence of the encumbered condition of the ship's 'twixt decks being, as they were, lumbered up with the partially demolished immigrants' fittings, stores, and ship's equipment, it was not possible to obtain exactly accurate measurements."

On reference being made to the master of the vessel relative to these measurements, he stated that he would have the ship measured by his own surveyor. It was not, however, until Monday, the 29th ultimo, that he forwarded for the information of the Board the report of Captain Sustenance (copy of which is herewith annexed).

This report differs from that furnished by Captain Pockley, inasmuch as in the married people's and single men's compartment there is stated to be an excess of space for the number of emigrants embarked; but Captain Sustenance reports there was only superficial area space for 95, in lieu of 105 statute adults who occupied the single women's compartment.

In view of the difference of the measurements given by the two surveyors, neither of which (in consequence of the great delay on the part of the master in furnishing his surveyor's report) can now be verified by a third measurement, the Board are not prepared to recommend the infliction of a fine upon the ship. They think, however, that the attention of the Agent General should be called to the fact that the ship was permitted to sail with more persons on board than was consistent with the terms of the charter-party, and that the Agent General should be requested to give such instructions to the despatching officer as will ensure for the future that the conditions of the charter-party in respect of measurements are positively complied with before the final departure of the vessel.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

IMMIGRATION.

(REPORTS FROM IMMIGRATION AGENT AND OTHERS—SHIP "LA HOGUE.")

Ordered by the Legislative Assembly to be printed, 28 October, 1879.

FURTHER RETURN to an *Address* adopted by the Honorable the Legislative Assembly of New South Wales on the 6th July, 1877, That, in the opinion of this House, there should be laid upon the Table of this House,—

- “(1.) Copies of all Reports, since 1875 to date, from the Agent General, the Health Officer, and Agent for Immigration, to the Government, relative to the despatch of Emigrants from England or elsewhere, and after their inspection on arrival in the Colony by each ship.
- “(2.) That similar reports should henceforward be laid upon the Table of the House as soon as practicable after the arrival and inspection of the Immigrants by each ship.
- “(3.) That the above Resolutions be communicated by Address to His Excellency the Governor.”

(Mr. Macintosh.)

IMMIGRATION.

The Agent General to The Colonial Secretary.

Sir,

3, Westminster Chambers, S.W., 9 May, 1879.

I have the honor to inform you that the ship "La Hogue," of 1,331 tons register, has been chartered for the conveyance of emigrants from Plymouth to Sydney, New South Wales, to be ready to embark passengers on Monday, the 9th June next.

The rates are as follows, viz. :—

	£	s.	d.
If 300 and under 325	14	9	6
325 " 350	14	4	6
350 " 375	13	17	6
375 and upwards	13	15	0

I have, &c.,

WILLIAM FORSTER.

The Agent General to The Colonial Secretary.

Sir,

3, Westminster Chambers, 9 June, 1879.

With reference to my letter of the 9th ultimo, announcing the engagement of the "La Hogue" for the conveyance of emigrants to Sydney, I have the honor to enclose herewith a copy of the charter-party of that vessel.

The ship will sail from Plymouth with the passengers described in the accompanying list.

The undermentioned gratuities have been promised, on condition that the several parties shall have performed their duties to the satisfaction of the Government, viz. :—To the surgeon-superintendent, Mr. C. Pratt, first voyage, 10s. per head; to the master, the first mate, the second mate, the third mate, or person who served out the provisions, 4s. on each emigrant landed alive, to be divided as the surgeon-superintendent recommends, subject to the approval of the Government; to the schoolmaster, £5; the matron, £40; the three sub-matrons, £3 each; the cook, £5; the cook's assistant, £3; the baker, £3; the men in charge of the distilling apparatus, £5; the hospital assistant, £3; the water-closet constable, £5; the ordinary and female mess constables, each £3.

I have, &c.,

WILLIAM FORSTER.

The Agent General to The Colonial Secretary.

Sir,

3, Westminster Chambers, S.W., 19 June, 1879.

Referring to my despatch of the 9th May last (No. 36 Emigration—79), reporting the chartering of the ship "La Hogue," I have now the honor to advise you of the sailing of that vessel on the 12th instant, with 476 emigrants on board, equal to 389 statute adults, and to enclose—

1st. Alphabetical list of emigrants, giving their names, ages, occupations, and the amount received by the Emigration Officer for passage and bedding, and paid into the Bank of New South Wales.

2nd. Return of the emigrants embarked, distinguishing the nominations made in the Colony, general assisted, English, Scotch, and Irish.

3rd. Certificate of Dr. Charles W. Pratt of his examination of the emigrants before embarkation, as well as of the medicine chest.

I have, &c.,

WILLIAM FORSTER.

The Agent for Immigration to The Under Secretary, Colonial Secretary's Department.

Sir,

Immigration Office, Sydney, 6 October, 1879.

I have the honor to report the arrival, on the 16th ultimo, of the ship "La Hogue" with immigrants. This vessel left Plymouth on the 12th June, thus completing her voyage in ninety-six days.

The contract price as per charter-party is at the rate of £13 15s. per statute adult.

2. The "La Hogue" arrived in port in a very good and cleanly condition. This vessel is well adapted for the conveyance of immigrants, the twixt decks being lofty, and the poop affording ample space for the convenience of the female immigrants.

3. The immigrants by this vessel consisted of eighty-two married couples, with their 155 children, fifty-eight single men, and 101 single women. Their nationality is noted in the margin.

In part payment of their cost of passage, and in addition to the sum of £138 paid by depositors in the Colony, a further sum of £601 was paid direct to the Agent General, making a total of £739 paid by immigrants or friends towards their cost of passage.

4. Among the immigrants I have to report that one of the single women named Ellen Russell (passage certificate No. 2,484) was confined on the 22nd August. The depositor, her sister, took charge of her and the child immediately after arrival. I have also to report that an immigrant, Thomas Masterson (passage certificate No. 1,637), was found during the voyage to be of unsound mind; he was on arrival of the ship forwarded to the Reception House for Insane Persons, at Darlinghurst, for treatment.

5. An abstract return of the disposal of the immigrants is herewith annexed.

During the voyage there occurred seven deaths—infants 2½ years of age and under. There were also nine births.

6. On examination by the Board of Immigration, of the married people and single men on board the ship, and of the single women at the Depot, all expressed themselves well satisfied both with the good quality and the sufficient quantity of the provisions issued to them during the voyage.

7.

English	266
Irish	127
Scotch	80
Other Countries	5
	478

7. The single women were as usual received at the Dépôt, the larger number of whom were called for by their friends, leaving forty-six who, on the hiring day, immediately obtained engagements as domestic servants, at an average rate of wages of £24 5s. 4d. per annum, equal to 9s. 4d. per week.

8. A large number of the immigrants availed themselves of the privilege of free passes to proceed into the country districts. There were thus forwarded, at their own request, either by steamer conveyance or by railway, a total of 210 individuals (of the 478 who arrived) to thirty-one different localities; of whom eight married couples, four single women, and two single men, were hired previous to their departure from Sydney; five married couples, fourteen single men, and nine single women, were forwarded to their friends; the remainder proceeded to such localities as they themselves had selected. It is rarely the immigrants will accept advice as to where there would be the greatest probability of their obtaining employment.

9. I am unable at present to give any report relative to the surgeon-superintendent, Dr. Pratt; he left the ship without notifying his intention to do so, and without permission, immediately after the examination had been held by the Board of Immigration. I have not received any communication from him since then. I must necessarily therefore report respecting Dr. Pratt in a further communication.

10. The matron, Miss Chicken, appears to have given satisfaction in the performance of her duties; it is therefore recommended that, in accordance with the instructions contained in the letter of advice from the Agent General, that the gratuity of £40 be paid to her; also, that she receive the usual certificate of £30 towards the cost of her return passage to England.

11. The other gratuities as per letter of instructions are as follows:—To the schoolmaster, the cook, the water-closet constable, and the engineer, the sum of £5 each; the sum of £3 each to two sub-matrons, to the surgeon's assistant, the cook's assistant, the baker, and to the eleven ordinary constables; also, by special recommendation, the sum of £5 to the nurse, of £2 to an assistant baker, and of £2 to a third sub-matron.

12. It is further recommended that the usual gratuity of 4s. per head on the immigrants landed alive should be thus distributed, viz. —To the master of the vessel, 1s. 6d. per head; to the chief officer, and to the officer who served out the provisions, each 1s. per head; and 6d. per head to the second officer.

13. There was one case of scarlet fever on board during the voyage, otherwise the general condition of the immigrants appears to have been very healthy.

I have, &c.,
GEORGE F. WISE,
 Agent for Immigration.

Ship "La Hogue" arrived at Sydney, 16th September, 1879.

(*Mr. Macintosh.*)

IMMIGRATION

The Agent General for New South Wales to The Colonial Secretary, New South Wales.

Sir,

3, Westminster Chambers, 6 June, 1879.

I have the honor to inform you that the ship "Corona," of 1,199 tons register, has been chartered for the conveyance of emigrants from Plymouth to Sydney, New South Wales, to be ready to embark passengers on the 7th July next.

The rates are as follows, viz. :—

If 325 and under 350	£12 12 0
350 " 375	12 9 0
375 and upwards	12 6 6

I am, &c.,

WILLIAM FORSTER.

The Agent General for New South Wales to The Colonial Secretary, New South Wales.

Sir,

3, Westminster Chambers, 9 July, 1879.

With reference to my letter of the 6th ultimo, announcing the engagement of the "Corona" for the conveyance of the emigrants to Sydney, I have the honor to enclose herewith a copy of the charter-party of that vessel.

The ship will sail from Plymouth with the passengers described in the accompanying list.

The undermentioned gratuities have been promised, on condition that the several parties shall have performed their duties to the satisfaction of the Government, viz. :—To the surgeon-superintendent, Mr. C. E. Strutt, sixth voyage, 14s. per head; to the master, the first mate, the second mate, the third mate, or person who served out the provisions, 4s. on each emigrant landed alive, to be divided as the surgeon-superintendent recommends, subject to the approval of the Government; to the schoolmaster, £5; the matron, £40; the sub-matrons, £3 each; the cook, £5; the cook's assistant, £3; the baker, £3; the men in charge of the distilling apparatus, £5; the hospital assistant, £3; the water-closet constable, £5; the ordinary and female mess constables, each £3.

I am, &c.,

WILLIAM FORSTER.

The Agent General for New South Wales to The Colonial Secretary, New South Wales.

Sir,

3, Westminster Chambers, 1 August, 1879.

Referring to my despatch of the 6th June last (No. 39 Emigration—79), reporting the chartering of the ship "Corona," I have now the honor to advise you of the sailing of that vessel on the 10th ultimo, with 454 emigrants on board, equal to 379½ statute adults, and to enclose :—

- 1st. Alphabetical list of emigrants, giving their names, ages, occupations, and the amount received by the Emigration Officer for passage and bedding, and paid into the Bank of New South Wales.
- 2nd. Return of the emigrants embarked, distinguishing the nominations made in the Colony, general assisted, English, Scotch, and Irish.
- 3rd. Certificate of Dr. C. E. Strutt of his examination of the emigrants before embarkation, as well as of the medicine chest.

I am, &c.,

WILLIAM FORSTER.

The Agent for Immigration to The Principal Under Secretary.

Sir,

Immigration Office, Sydney, 23 October, 1879.

I have the honor to report the arrival, on the 9th instant, of the ship "Corona," with immigrants, having left Plymouth on the 10th July, thus completing the voyage in ninety-one days.

The contract price, as per charter-party, is at the rate of £12 6s. 6d. per statute adult.

2. The "Corona" arrived in port in a most excellent condition; the arrangements for the comfort of the immigrants appear to have been in all respects most satisfactory, and on examination by the Board of Immigration of the married people and of the single men on board the ship and of the single women at the Dépôt, all expressed themselves well satisfied with their treatment during the voyage.

3. The immigrants by this vessel consisted of seventy-three married couples, less one husband, who died on the voyage, 120 children, 107 single women, and seventy-four single men.

Their nationality is noted in the margin.

In part payment of their cost of passage, and in addition to the sum of £277 paid by depositors in the Colony, a further sum of £456 was paid to the Agent General, thus making a total of £733 contributed either by depositors or by the emigrants themselves.

4. Annexed herewith is an abstract of the disposal of the immigrants.

During the voyage there were four births and twelve deaths, viz. :—One adult and eleven infants.

5. The single women were received as usual at the Dépôt, the larger number were handed over to their friends, leaving a remainder of forty-one, who readily obtained engagements as domestic servants on the hiring day, at an average rate of wages of £24 5s. 4d. per annum, equal to 9s. 4d. per week.

6. Free passes by railway and by steamers were granted to thirty-three married couples, with their fifty-six children, thirty-seven single men, and eighteen single women. These were forwarded to thirty-six different localities in the country districts. Of those thus forwarded, eleven married couples, eight single men, and one single woman were hired previous to their departure from Sydney; the remainder either proceeded to their friends who had nominated them, or to seek employment in such districts as they themselves had determined upon.

7. The surgeon-superintendent, C. E. Strutt, Esq., appears to have given great satisfaction in the performance of his duties; he is therefore entitled to receive, as per letter of instructions from the Agent General, the sum of 14s. per head on the immigrants landed alive, for this his sixth voyage in charge of immigrants; also, to receive a certificate entitling him to be paid the further sum of £60 towards the cost of his return passage to England.

8. Dr. Strutt reports of the matron, Mrs. Eagar, that "she discharged her duties efficiently"; she is therefore recommended as entitled to receive a gratuity, as per letter of instructions, of the sum of £40; also, to receive a certificate authorizing the further payment to her of the sum of £30 towards the cost of her return passage to England.

9. The surgeon-superintendent reports that every assistance was afforded to him by the master and officers of the ship; it is therefore recommended that the promised gratuity of 4s. per head on the number of passengers landed should be thus distributed—to the master, the sum of 1s. 6d. per head; to the chief mate and to the officer who served out the provisions, each 1s. per head; and to the second officer the sum of 6d. per head.

10. Other gratuities, as per letter of instructions from the Agent General, are payable as follows:—To the schoolmaster, the cook, the man in charge of the distilling apparatus, and the water-closet constable, each the sum of £5; the sum of £3 each to the three sub-matrons, the cook's assistant, the baker, the hospital assistant, and the eleven ordinary constables; also, on the special recommendation of the surgeon-superintendent, the sum of £3 to the chief nurse, and of £2 to the second nurse.

11. The surgeon-superintendent reports that during the voyage the principal diseases which occurred were diarrhoea, dyspepsia, croup, and catarrh.

I have, &c.,
GEORGE F. WISE,
 Agent for Immigration.

Ship "Corona" arrived at Sydney, 9th October, 1879.

(Mr. Macintosh.)

IMMIGRATION.

The Agent General for New South Wales to The Colonial Secretary, New South Wales.

Sir,

3, Westminster Chambers, S.W., 14 March, 1879.

I have the honor to inform you that the ship "Nineveh," of 1,174 tons register, has been chartered for the conveyance of immigrants from Plymouth to Sydney, New South Wales, to be ready to embark passengers on Monday, the 7th April next.

The rates are as follows, viz. :—

If 325 and under 350	£14 19 0
" 350 "	" 375	14 14 0
" 375 and upwards	14 9 0

I am, &c.,
WILLIAM FORSTER.

The Agent General for New South Wales to The Colonial Secretary, New South Wales.

Sir,

3, Westminster Chambers, S.W., 24 April, 1879.

Referring to my despatch of the 14th March last (No. 17 Emigration-79), reporting the chartering of the ship "Nineveh," I have now the honor to advise you of the sailing of that vessel on the 10th instant, with 405 emigrants on board, equal to 331½ statute adults, and to enclose :—

- 1st. Alphabetical list of emigrants, giving their names, ages, occupations, and the amount received by the Immigration Officer for passages and bedding, and paid into the Bank of New South Wales.
- 2nd. Return of the emigrants embarked, distinguishing the nominations made in the Colony, general assisted, English, Scotch, and Irish.
- 3rd. Certificate of Dr. Richard Dawes of his examination of the emigrants before embarkation, as well as of the medicine chest.

I am, &c.,
WILLIAM FORSTER.

The Agent General for New South Wales to The Colonial Secretary, New South Wales.

Sir,

3, Westminster Chambers, April, 1879.

With reference to my letter of the 14th ultimo, announcing the engagement of the "Nineveh" for the conveyance of the emigrants to Sydney, I have the honor to enclose herewith a copy of the charter-party of that vessel.

The ship will sail from Plymouth with the passengers described in the accompanying list.

The undermentioned gratuities have been promised, on condition that the several parties shall have performed their duties to the satisfaction of the Government, viz. :—to the surgeon-superintendent, Mr. R. Dawes, fifth voyage, 14s. per head; to the master, the first mate, the second mate, the third mate, or person who served out the provisions, 4s. on each emigrant landed alive, to be divided as the surgeon-superintendent recommends, subject to the approval of the Government; to the schoolmaster, £5; the matron, £40; the two sub-matrons, £3 each; the cook, £5; the cook's assistant, £3; the baker, £3; the man in charge of the distilling apparatus, £5; the hospital assistant, £3; the water-closet constable, £5; the ordinary and female mess constables, each £3.

I am, &c.,
WILLIAM FORSTER.

The Agent for Immigration to The Principal Under Secretary.

Sir,

Government Immigration Office, Sydney, 26 July, 1879.

I have the honor to report the arrival, on the 9th instant, of the ship "Nineveh," with immigrants, having left Plymouth on the 10th April, thus completing the voyage in ninety days.

The contract price, as per charter-party, is at the rate of £14 19s. per statute adult.

2. The "Nineveh" arrived in good order, her accommodations for the convenience of the emigrants were most satisfactory.

3. The immigrants by this vessel consisted of seventy-five married couples, with their 126 children, fifty-nine single men, and sixty-eight single women.

Their nationality is noted in the margin.

In part payment, and in addition to the sum of £147 deposited by friends in the Colony, a further sum of £492 was paid direct to the Agent General in London, thus making a total of £639 paid by immigrants or their friends towards their cost of passage.

4. An abstract return of the disposal of the immigrants is herewith annexed. During the voyage there occurred three births and six deaths; also, one birth on the day after arrival in port.

5. On examination by the Board of Immigration of the married people and single men on board the ship, and of the single women at the dépôt, complaints were made as to the bad quality of the flour and of bread which on several occasions during the voyage had been issued. On inquiry from the master of the ship, it was acknowledged that the flour was bad on several occasions, but other good flour having been found in tanks, it was subsequently used. The surgeon-superintendent reports in his journal, "the flour is of very indifferent quality and unfit for use; the captain has shown the greatest anxiety in the matter, and has ordered every tank containing flour to be examined in order to procure the best for the use

English ..	256
Irish ..	126
Scotch ..	19
Other countries	3

403

use of the immigrants." Subsequently, he adds, "the captain found in several of the tanks good flour, which was immediately brought into use, and good bread was therefore baked." Complaints as to the very inferior quality of the flour issued for the use of immigrants have of late become very frequent, especially of that which is usually shipped in casks. I am therefore desired by the Board of Immigration to urge that the Agent General be especially invited to warn the representatives of the ships which are chartered that good wholesome flour must be provided, and means must be adopted to prevent its deterioration during the voyage, as it is of the utmost importance that the terms of the charter-party should in every respect be faithfully fulfilled, so as to leave no cause for such repeated complaints.

6. The single women were received at the Depôt, one-half of whom left to join their relatives or friends who had sent for them, leaving thirty-seven, who on the hiring day immediately obtained engagements as domestic servants at wages from 8s. to 12s. per week, averaging £22 6s. 4d. per annum.

Free passes by steamer and by rail were granted to those of the immigrants who elected to go into the country districts; thus a total of 221 out of 403 who arrived were forwarded to twenty-five different localities, of whom twelve married couples and fourteen single men were hired by employers previous to their departure from Sydney. The remainder proceeded either to join their relatives or friends, or to seek employment.

7. The surgeon-superintendent, Richard Dawes, Esq., appears to have given every satisfaction in the discharge of his duties; it is therefore recommended that he be paid the promised gratuity of 14s per head for this his fifth voyage in charge of emigrants; also, that he receive the usual certificate entitling him to a further sum of £60 towards the cost of his return passage to England.

8. The surgeon-superintendent reports of the matron, Miss Matley, that "she discharged her duties to my satisfaction, being very kind and attentive to those placed under her charge"; it is therefore recommended that she be paid the promised gratuity of £40; also, that the usual certificate be granted entitling her to receive the further sum of £30 towards the cost of her return passage to England.

9. Dr. Dawes reports that "the captain and officers of the ship were kind to the emigrants and attentive to my requests"; it is therefore recommended that the usual gratuity of 4s. per head be thus distributed—the sum of 1s. 6d. per head to the master of the ship; of 1s. each to the first mate and to the officer who served out the provisions; and 6d. per head to the second mate.

10. Other gratuities, as per letter of instructions, are recommended to be paid as follows:—To the schoolmaster, the cook, the man in charge of the distilling apparatus, and to the water-closet constable, the sum of £5 each; £3 each to the two sub-matrons, the cook's assistant, the baker, the hospital assistant, and to the ten ordinary constables; also, upon the special recommendation of the surgeon-superintendent, the sum of £5 to the nurse.

11. The surgeon-superintendent reports that the principal diseases which occurred on board during the voyage were bronchitis, rheumatism, diarrhœa.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

IMMIGRATION.

(REPORTS FROM IMMIGRATION AGENT AND OTHERS—STEAM-SHIP "STRATHLEVEN.")

Ordered by the Legislative Assembly to be printed, 13 November, 1879.

FURTHER RETURN to an *Address* adopted by the Honorable the Legislative Assembly of New South Wales on the 6th July, 1877, That, in the opinion of this House, there should be laid upon the Table of this House,—

- “ (1.) Copies of all Reports, since 1875 to date, from the Agent General, the Health Officer, and Agent for Immigration, to the Government, relative to the despatch of Emigrants from England or elsewhere, and after their inspection on arrival in the Colony by each ship.
- “ (2.) That similar Reports should henceforth be laid upon the Table of the House as soon as practicable after the arrival and inspection of the Immigrants by each ship.
- “ (3.) That the above Resolutions be communicated by Address to His Excellency the Governor.”

(*Mr. Macintosh.*)

IMMIGRATION.

The Agent General to The Colonial Secretary.

Sir,

3, Westminster Chambers, S.W., 17 July, 1879.

I have the honor to inform you that the steam-ship "Strathleven," of 2,436 tons gross register, has been chartered for the conveyance of emigrants from Plymouth to Sydney, New South Wales, to be ready to embark passengers on the 1st September.

The rates are as follows, viz. :—

If 425 and under 450	£15	0	0
450 " 475	14	17	6
475 and upwards	14	12	6

I have, &c.,

WILLIAM FORSTER.

The Agent General to The Colonial Secretary.

Sir,

3, Westminster Chambers, 3 September, 1879.

With reference to my letter of the 17th July, announcing the engagement of the "Strathleven" for the conveyance of the emigrants to Sydney, I have the honor to enclose herewith a copy of the charter-party of that vessel.

The ship will sail from Plymouth with the passengers described in the accompanying list.

The undermentioned gratuities have been promised on condition that the several parties shall have performed their duties to the satisfaction of the Government, viz. :—To the surgeon-superintendent, second voyage, 10s. per head; to the master, the first mate, the second mate, the third mate, or person who served out the provisions, 4s. on each emigrant landed alive, to be divided as the surgeon-superintendent recommends, subject to the approval of the Government; to the schoolmaster, £5; the matron, £40; the sub-matrons, £3 each; the cook, £5; the cook's assistant, £3; the baker, £3; the men in charge of the distilling apparatus, £5; the hospital assistant, £3; the water-closet constable, £5; the ordinary and female mess constables, each £3.

I have, &c.,

WILLIAM FORSTER.

The Agent General to The Colonial Secretary.

Sir,

3, Westminster Chambers, S.W., 11 September, 1879.

Referring to my despatch of the 17th July last (No. 48, Emigration—79), reporting the chartering of the steam-ship "Strathleven," I have now the honor to advise you of the sailing of that vessel on the 4th instant with 575 emigrants on board, equal to 501 statute adults, and enclose—

- 1st. Alphabetical list of emigrants, giving their names, ages, occupations, and the amount received by the Emigration Officer for passage and bedding, and paid into the Bank of New South Wales.
- 2nd. Return of the emigrants embarked, distinguishing the nominations made in the Colony, general assisted, English, Scotch, and Irish.
- 3rd. Certificate of Dr. John M. Booth, of his examination of the emigrants before embarkation, as well as of the medicine chest.

I have, &c.,

WILLIAM FORSTER.

The Agent for Immigration to The Under Secretary, Colonial Secretary's Department.

Sir,

Immigration Office, Sydney, 11 November, 1879.

I have the honor to report the arrival, on the 27th ultimo, of the steam-ship "Strathleven," having left Plymouth on the 4th September, thus completing the voyage in fifty-three days.

The contract price, as per charter-party, is at the rate of £14 12s. 6d. per statute adult.

This is the first occasion on which Government immigrants have been brought by steamer to New South Wales, and those by the "Strathleven" have enjoyed many extra advantages.

The accommodation has been more commodious—the voyage performed in a month's less time—the provisions less liable to deterioration than on the longer passage by sailing-ships—and in all respects the present voyage appears to have been a most prosperous one. It is, however, a matter for serious consideration whether or not it be advisable that immigrants should be provided with passages in large steamers in preference, as heretofore, in sailing-vessels. Assuming of course that no other passengers would be permitted to come with immigrants, as is the case in sailing-vessels, there is always the risk of some serious illness occurring, such as would oblige the vessel on arrival to be placed in quarantine. The demurrage of such a detention in the case of the "Strathleven" would have caused an extra charge of 4d. per ton, equal to about £40 per day or £280 per week.

A minor difficulty should also be mentioned, viz. :—That the steamer must necessarily bring her own advices. Consequently, depositors cannot receive any information until after the ship's arrival, and therefore a considerable delay must occur before the depositors can hear of the arrival of their friends and prepare for their reception.

3. On examination by the Board of Immigration, all the immigrants expressed themselves well satisfied with their treatment during the voyage.

4. The immigrants by this vessel consisted of ninety-three married couples, with their 126 children, 106 single men, and 153 single women.

Their nationality is noted in the margin.

In

English	289
Irish	239
Scotch	37
Other Countries	12
	571

In part payment of their cost of passage, and in addition to the sum of £378 paid by depositors in this Colony, a further sum of £636 was paid direct to the Agent General, thus making a total of £1,014 paid by the immigrants or by their friends towards their cost of passage.

5. Annexed herewith is an abstract report of the disposal of the immigrants. During the voyage there occurred three births and seven deaths. Two other deaths of children occurred after arrival and before the expiration of the lay days.

6. The single women were received at the Dépôt immediately after the arrival of the ship, eighty-five of whom were delivered to their friends, leaving sixty-eight, who readily obtained engagements from the Dépôt as domestic servants, at an average rate of wages of £24 5s. 4d. per annum, equal to 9s. 4d. per week.

7. Free passes by rail and by steamers were issued to those who desired to proceed into the country districts. There were thus forwarded to forty-eight different localities a total of forty-two married couples, with their fifty-eight children, sixty-four single men, and twenty-four single women. Of these thus forwarded, twelve married couples, twenty-three single men, and five single women were hired previous to their departure from Sydney; twenty-four married couples, nineteen single women, and forty single men were forwarded to their friends, and the remainder were forwarded to obtain employment in the country; the latter were principally agricultural labouring men.

8. The surgeon-superintendent, J. M. Booth, Esq., appears to have given every satisfaction in the discharge of his duties; he is therefore entitled to receive the gratuity of 10s. per head, in accordance with the letter of instructions from the Agent-General, also to receive the usual certificate entitling him to the further sum of £60 towards the cost of his return passage to England.

9. Dr. Booth reports of the matron, Miss Cullen, that she performed her duties "very well"; she is therefore entitled to receive the promised gratuity of £40, also the usual certificate entitling her to the further sum of £30 towards the cost of her return passage to England.

10. Dr. Booth reports that every assistance was rendered to him by the master and officers of the ship; it is therefore recommended that the usual gratuity of 4s. per head on the number of the immigrants be thus distributed, viz.—1s. 6d. per head to the master of the vessel; 1s. per head each to the first mate and to the officer who served out the provisions; and 6d. per head to the second mate.

11. Other gratuities are payable as follows:—The sum of £5 each to the schoolmaster, the cook, the man in charge of the distilling apparatus, to the water-closet constable; also, by special recommendation of the surgeon-superintendent, to the nurse; the sum of £3 each to the three sub-matrons, the hospital assistant, the thirteen ordinary constables, the baker, the cook's assistant, and the baker's assistant.

12. The surgeon-superintendent reports that "diarrhoea, diphtheria, and gastric complaints were the principal diseases which occurred on board during the voyage."

I have, &c.,

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

IMMIGRATION.

(REPORTS FROM IMMIGRATION AGENT AND OTHERS—SHIP "PERICLES.")

Ordered by the Legislative Assembly to be printed, 16 December, 1879.

FURTHER RETURN to an *Address* adopted by the Honorable the Legislative Assembly of New South Wales on the 6th July, 1877, That, in the opinion of this House, there should be laid upon the Table of this House,—

- “ (1.) Copies of all Reports, since 1875 to date, from the Agent General, the Health Officer, and Agent for Immigration, to the Government, relative to the despatch of Emigrants from England or elsewhere, and after their inspection on arrival in the Colony by each ship.
- “ (2.) That similar Reports should henceforward be laid upon the Table of the House as soon as practicable after the arrival and inspection of the Immigrants by each ship.
- “ (3.) That the above Resolutions be communicated by Address to His Excellency the Governor.”

(Mr. Macintosh.)

IMMIGRATION.

The Agent General to The Colonial Secretary.

Sir,

3, Westminster Chambers, S.W., 4 July, 1879.

I have the honor to inform you that the ship "Pericles," of 1,598 tons registered, has been chartered for the conveyance of emigrants from Plymouth to Sydney, New South Wales, to be ready to embark passengers on the 28th July.

The rates are as follows, viz. :—

If 325 and under 350	£15	9	6
350	"	375	14	14	6
375	"	400	14	9	6
400 and upwards	13	19	6

I have, &c.,

WILLIAM FORSTER.

The Agent General to The Colonial Secretary.

Sir,

3, Westminster Chambers, S.W., 30 July, 1879.

With reference to my letter of the 4th instant, announcing the engagement of the "Pericles" for the conveyance of the emigrants to Sydney, I have the honor to enclose herewith a copy of the charter-party of that vessel.

The ship will sail from Plymouth with the passengers described in the accompanying list.

The undermentioned gratuities have been promised on condition that the several parties shall have performed their duties to the satisfaction of the Government, viz. :—To the surgeon-superintendent, Mr. J. Neylan, first voyage, 10s. per head; to the master, the first mate, the second mate, the third mate or person who served out the provisions, 4s. on each emigrant landed alive, to be divided as the surgeon-superintendent recommends, subject to the approval of the Government; to the schoolmaster, £5; the matron, £40; the (three) sub-matrons, £3 each; the cook, £5; the cook's assistant, £3; the baker, £3; the men in charge of the distilling apparatus, £5; the hospital assistant, £3; the water-closet constable, £5; the ordinary and female mess constables, each £3.

I have, &c.,

WILLIAM FORSTER.

The Agent General to The Colonial Secretary.

Sir,

3, Westminster Chambers, S.W., 11 September, 1879.

Referring to my despatch of the 4th July last (No. 45, Emigration—79), reporting the chartering of the ship "Pericles," I have now the honor to advise you of the sailing of that vessel on the 29th ultimo with 491 emigrants on board, equal to 406½ statute adults, and to enclose—

1st. Alphabetical list of emigrants, giving their names, ages, occupations, and the amount received by the Emigration Officer for passage and bedding, and paid into the Bank of New South Wales.

2nd. Return of emigrants embarked, distinguishing the nominations made in the Colony, general assisted, English, Scotch, and Irish.

3rd. Certificate of Dr. John Neylan, of his examination of the emigrants before embarkation, as well as of the medicine chest.

I have, &c.,

WILLIAM FORSTER.

The Agent for Immigration to The Principal Under Secretary.

Sir,

Immigration Office, Sydney, 11 December, 1879.

I have the honor to report the arrival, on the 14th ultimo, of the ship "Pericles," with immigrants, having left Plymouth on the 29th August, thus completing her voyage in seventy-seven days.

The contract price, as per charter-party, is at the rate of £13 19s. 6d. per statute adult.

2. On arrival, the "Pericles" was placed in quarantine by the Health Officer until the 27th ultimo; all the immigrants then came to Sydney, leaving one family of four individuals and one nurse still at the Quarantine Station.

The ship, when visited by the Board of Immigration, was found to be in most excellent order, all arrangements for the accommodation of the immigrants were very satisfactory, and when examined by the Board the married people and the single men and single women expressed themselves perfectly satisfied both with the quality and with the quantity of the provisions issued to them during the voyage.

3. The immigrants by this vessel consisted of eighty-five married couples, less one wife, who died during the voyage, one hundred and fifty-eight children, one hundred and five single women, and fifty-nine single men.

Their nationality is noted in the margin.

In part payment of their cost of passage, and in addition to the sum of £260 deposited by friends in the Colony on their account, a further sum of £510 was paid to the Agent General in London, thus making a total of £770 paid by the immigrants or by their friends towards their cost of passage.

4. Annexed herewith is an abstract of the disposal of the immigrants. During the voyage there occurred ten births and ten deaths; also one birth and two deaths occurred during the thirteen days that the immigrants were detained at the Quarantine Station.

5. The single women were as usual received at the Dépôt; about one half of these were delivered to their friends, leaving fifty-nine, all of whom readily obtained engagements on the hiring day, at an average rate of wages of 9s. 6d. per week, equal to £24 14s. per annum.

English	222
Irish	169
Scotch	104
Other Countries	6
		491

6. Of the 491 individuals who arrived by this ship, free passes by railway and by steamer were granted to 231. These proceeded to thirty-two different localities; seventeen married couples, eleven single men, and four single women were hired previous to their departure from Sydney; fourteen married couples, thirteen single men, and twenty-one single women were forwarded to their friends, leaving only eleven married couples and seven single men, who proceeded into the country to seek for employment; the remainder of the immigrants, exclusive of the fifty-nine single women who were hired from the Dépôt, did not apply for railway passes; it is therefore to be presumed, as was known to be the case in many instances, that either they obtained employment or that their friends resided in Sydney.

7. The surgeon-superintendent, John Naylen, Esq., appears to have given every satisfaction in the performance of his duties; it is therefore recommended that he receive the promised gratuity of 10s. per head on the immigrants landed alive, also that he receive the usual certificate entitling him to a further sum of £60 towards the cost of his return passage to England.

8. Dr. Neylan reports of the matron, Miss Bant, that "she gave complete satisfaction"; it is therefore recommended that the promised gratuity of £40 for this her sixth voyage in charge of immigrants, should be paid to her, also that she receive the usual certificate entitling her to a further sum of £30 towards the cost of her return passage to England.

9. The surgeon-superintendent reports that every assistance was rendered to him by the master and officers of the ship; it is therefore recommended that the usual gratuity of 4s. per head on the immigrants landed alive, should be thus distributed:—To the master of the ship, 1s. 6d. per head; to the first officer, and to the officer who served out the provisions, each 1s. per head; and 6d. per head to the second officer.

10. Other gratuities are payable as per letter of instructions from the Agent General as follows:—the sum of £5 each, to the schoolmaster, the cook, the man in charge of the distilling apparatus, and the water-closet constable; of £3 each to the three sub-matrons, the hospital assistant, the baker, the cook's assistant, and to the eleven ordinary constables; also, on the special recommendation of the surgeon-superintendent, the sum of £5 to each of the two nurses whom the surgeon-superintendent was obliged to appoint on account of much illness during the voyage.

11. The surgeon-superintendent reports that the principal diseases which occurred during the voyage were diarrhœa and bronchitis.

I have, &c.,
GEORGE F. WISE,
Agent for Immigration.

Ship "Pericles" arrived at Sydney, 14th November, 1879.

(*Mr. Macintosh.*)

IMMIGRATION.

The Agent General to The Colonial Secretary.

Sir, 3, Westminster Chambers, S.W., 29 August, 1879.
I have the honor to inform you that the ship "Northampton," of 1,161 tons register, has been chartered for the conveyance of emigrants from Plymouth to Sydney, New South Wales, to be ready to embark passengers on the 29th November.

The rates are as follows, viz. :—

If 325 and under 350	£13 19 0
„ 350 „ 375	13 15 0
375 and upwards	13 12 6

I am, &c.,
WILLIAM FORSTER.

The Agent General to The Colonial Secretary.

Sir, 3, Westminster Chambers, S.W., 1 October, 1879.
With reference to my letter of the 29th August, announcing the engagement of the "Northampton" for the conveyance of the emigrants to Sydney, I have the honor to enclose herewith a copy of the charter-party of that vessel.

The ship will sail from Plymouth with the passengers described in the accompanying list.

The undermentioned gratuities have been promised on condition that the several parties shall have performed their duties to the satisfaction of the Government, viz. :—To the Surgeon-Superintendent, second voyage, 10s. per head; to the master, the first mate, the second mate, and the third mate, or person who served out the provisions, 4s. on each emigrant landed alive, to be divided as the Surgeon-Superintendent recommends, subject to the approval of the Government; to the schoolmaster, £5; the matron, £40; the sub-matrons, £3 each; the cook, £5; the cook's assistant, £3; the baker, £3; the men in charge of the distilling apparatus, £5; the hospital assistant, £3; the water-closet-constable, £5; the ordinary and female mess constables, each £3.

I am, &c.,
WILLIAM FORSTER.

The Agent General to The Colonial Secretary.

Sir, 3, Westminster Chambers, S.W., 9 October, 1879.
Referring to my despatch of the 29th August last (No. 57 Emigration—79), reporting the chartering of the ship "Northampton," I have now the honor to advise you of the sailing of that vessel on the 3rd instant, with 429 emigrants on board, equal to 360½ statute adults, and to enclose—

1st. Alphabetical list of emigrants, giving their names, ages, occupations, and the amount received by the Emigration Officer for passage and bedding, and paid into the Bank of New South Wales.

2nd. Return of the emigrants embarked, distinguishing the nominations made in the Colony, general assisted English, Scotch, and Irish.

3rd. Certificate of Dr. George Westby, of his examination of the emigrants before embarkation as well as of the medicine chest.

I am, &c.,
WILLIAM FORSTER.

The Agent for Immigration to The Principal Under Secretary.

Sir, Immigration Office, Sydney, 30 January, 1880.
I have the honor to report the arrival from Plymouth, on the 9th instant, of the ship "Northampton" with immigrants, having left that port on the 3rd October, thus completing the voyage in ninety-eight days.

The contract price as per charter-party is at the rate of £13 15s. per statute adult.

2. The "Northampton" arrived in port in a cleanly condition; all the arrangements for the convenience and comfort of the immigrants were very satisfactory.

3. The immigrants by this vessel consisted of sixty-three married couples with their 119 children, ninety single men, and eighty-nine single women.

Their nationality is noted in the margin.

In addition to the sum of £246 paid by depositors in the Colony, a further amount of £461 was paid by the other emigrants to the Agent General in London, making a total of £707 paid by emigrants or their friends towards their cost of passage.

4. Herewith is annexed an abstract account of the disposal of the immigrants. During the voyage there occurred twelve deaths (chiefly infants), there were also seven births.

5. On examination by the Board of Immigration of the married people and of the single men on board the ship, and of the single women at the depôt, satisfaction was generally expressed as to their treatment during the voyage.

6. The single women were as usual received at the depôt, of whom the greater number were delivered to their parents and friends, leaving forty-four who, on the hiring day were immediately engaged as domestic servants, at an average rate of wages of 9s. per week.

English	204
Irish	181
Scotch	34
Other countries	5
	424

7. A large number of the immigrants availed themselves of free passes by railway and by steamers. There were thus forwarded to fifty-one different localities in the country districts a total of 174, viz. :— Twenty-five married couples with their forty-five children, fifty-seven single men, and twenty-two single women, of whom eleven married couples, twenty-three single men, and five single women were hired previous to their departure from Sydney. Ten married couples, twenty-seven single men, and seventeen single women were forwarded to their friends, leaving only four married people and seven single men, who proceeded into the country in search of employment.

No information could be obtained as to the disposal of the remaining 206 immigrants ; it is to be presumed therefore that they either found employment or were provided for by friends or relations in Sydney and its suburbs.

8. The Surgeon-Superintendent, George Westby, Esq., appears to have given every satisfaction in the performance of his duties ; it is therefore recommended that he receive the gratuity of 10s. per head on the immigrants landed alive, as per letter of instructions from the Agent General, for this his second voyage in charge of immigrants to this Colony ; also to receive the usual certificate entitling him to the further sum of £60 towards the cost of his return passage to England.

9. The Surgeon-Superintendent reports of the matron, Mrs. Kent, that she discharged her duties satisfactorily ; it is therefore recommended that she receive the promised gratuity of £40 for this her fourth voyage in charge of female immigrants, also to receive the usual certificate entitling her to the sum of £30 towards the cost of her return passage to England.

It is further recommended that Mrs. Kent receive an additional gratuity of £10, as compensation for services rendered as matron at first appointed to the ship "Pericles," which vessel after leaving Plymouth on 31st July last, grounded on the "Manacle Rocks," near Falmouth, and was subsequently obliged to return to port. Mrs. Kent continued in charge of the female immigrants at the request of Mr. Phillips, the Emigration Officer, until the 22nd August, when on account of serious illness, "caused by anxiety in keeping secret the accident to the ship from the single girls" she was unable to continue the voyage, and another matron was then appointed in her stead.

10. Dr. Westby reports that every assistance was rendered to him by the master and officers of the ship ; it is therefore recommended that the usual gratuity of 4s. per head on the immigrants landed alive be thus distributed :—To the master of the ship, 1s. 6d. per head ; to the chief mate, 1s. ; to the third officer and the steward, who together had the charge of and issued the stores, 1s. per head ; and 6d. per head to the second officer.

It is however to be noted, for the information of the Agent General, that the chief officer, named Alexander Christian, was reported on two occasions during the voyage to have been under the influence of drink. On investigation by the Board of Immigration relative to this charge, and on report of the Surgeon-Superintendent, it was found that some years ago Alexander Christian had a sun-stroke in the West Indies, and therefore that a very small portion of liquor would have an injurious effect upon him. Such being the case, although the Board recommend that he should receive the promised gratuity, it is considered that as he appears to be physically incapable of taking much liquor, he should not again be permitted to hold the appointment of mate on board a ship with immigrants.

11. Other gratuities are payable, as per letter of instructions from the Agent General, as follows :— To the schoolmaster, the cook, the man in charge of the distilling apparatus, and to the water-closet constable, the sum of £5 each ; to two of the sub-matrons, the sum of £3 each, and to the third sub-matron, the sum of £2 ; to the ten ordinary and mess constables, the sum of £3 each ; to two of the constables, £2 each ; and to the baker, the cook's assistant, and the hospital assistant, £3 each ; also the sum of £5 to the nurse, who is reported to have been fully occupied in tending to the sick, and who "discharged her duties to the entire satisfaction" of the Surgeon-Superintendent.

12. The Surgeon-Superintendent reports that the principal disease that occurred during the voyage was diarrhœa.

I have, &c.,

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

IMMIGRATION.

(REPORTS FROM IMMIGRATION AGENT AND OTHERS—SHIP "NORVAL.")

Ordered by the Legislative Assembly to be printed, 31. March, 1880.

FURTHER RETURN to an *Address* adopted by the Honorable the Legislative Assembly of New South Wales on the 6th July, 1877, That, in the opinion of this House, there should be laid upon the Table of this House,—

- “ (1.) Copies of all Reports, since 1875 to date, from the Agent General, the Health Officer, and Agent for Immigration, to the Government, relative to the despatch of Emigrants from England or elsewhere, and after their inspection on arrival in the Colony by each ship.
- “ (2.) That similar Reports should henceforward be laid upon the Table of the House as soon as practicable after the arrival and inspection of the Immigrants by each ship.
- “ (3.) That the above Resolutions be communicated by Address to His Excellency the Governor.”

(*Mr. Macintosh.*)

IMMIGRATION.

The Agent General to The Colonial Secretary.

Sir,

3, Westminster Chambers, S.W., 21 November, 1879.

I have the honor to inform you that the ship "Norval" of 1,427 tons register, has been chartered for the conveyance of emigrants from Plymouth to Sydney, New South Wales, to be ready to embark passengers on the 8th December.

The rates are as follows, viz. :—If 275 and under 300, £17 5s. ; 300 and under 325, £16 12s. 6d. ; 325 and upwards, £16 2s.

I have, &c.,

WILLIAM FORSTER.

The Agent General to The Colonial Secretary.

Sir,

3, Westminster Chambers, S.W., 8 December, 1879.

With reference to my letter of the 21st ultimo, announcing the engagement of the "Norval" for the conveyance of the emigrants to Sydney, I have the honor to enclose herewith a copy of the charter-party of that vessel.

The ship will sail from Plymouth with the passengers described in the accompanying list.

The undermentioned gratuities have been promised, on condition that the several parties shall have performed their duties to the satisfaction of the Government, viz. :—To the Surgeon-Superintendent, Mr. Thomas Harrison, fourth voyage, 12s. on each emigrant landed alive ; the master, the first mate, the second mate, the third mate or person who served out the provisions, 4s. on each emigrant landed alive, to be divided as the Surgeon-Superintendent recommends, subject to the approval of the Government ; the schoolmaster, £5 ; the matron, £40 ; sub-matrons, £3 each ; the cook, £5 ; the cook's assistant, £3 ; the baker, £3 ; the men in charge of the distilling apparatus, £5 ; the hospital assistant, £3 ; the water-closet constable, £5 ; the ordinary and female mess constables, each £3.

I have, &c.,

WILLIAM FORSTER.

The Agent General to The Colonial Secretary.

Sir,

3, Westminster Chamber, S.W., 19 December, 1879.

Referring to my despatch of the 21st November last (No. 44 Emigration), reporting the chartering of the ship "Norval," I have now the honor to advise you of the sailing of that vessel on the 12th instant, with 386 emigrants on board, equal to 340 statute adults, and to enclose—

1st. Alphabetical list of emigrants, giving their names, ages, occupations, and the amount received by the Emigration Officer for passage and bedding, and paid into the Bank of New South Wales.

2nd. Return of the emigrants embarked, distinguishing the nominations made in the Colony, general assisted, English, Scotch, and Irish.

3rd. Certificate of Dr. Thomas Harrison of his examination of the emigrants before embarkation, as well as of the medicine chest, and provisions and stores supplied for the voyage.

I have, &c.,

WILLIAM FORSTER.

The Agent for Immigration to The Principal Under Secretary.

Sir,

Immigration Office, Sydney, 23 March, 1880.

I have the honor to report the arrival from Plymouth, on the 2nd instant, of the ship "Norval" with emigrants, having left that port on the 12th December, thus completing the voyage in 81 days.

The contract price as per charter-party is at the rate of £16 2s. per statute adult.

2. It having been reported that there were some cases of sickness amongst the immigrants, the vessel was placed in quarantine, and remained there until the 11th instant ; the ship was subsequently required for the use of the immigrants until the 16th instant, thereby incurring a charge for demurrage of six days.

3. The "Norval" on her arrival from quarantine was in a cleanly condition, the arrangements for the comfort of the immigrants appear to have been satisfactory, but the Surgeon-Superintendent reports that "the fittings of the ship were in part defective, not being strong enough or firmly put together ; the means of ventilation in the single women's department were insufficient, and the matron's cabin was badly placed" being in such a position that for want of sufficient light the matron was unable to write up her journal whilst in her cabin.

4. The immigrants by this vessel consisted of 45 married couples with their 86 children, 124 single women, and 86 single men.

Their nationality is noted in the margin.

In addition to the sum of £453, deposited by friends in the Colony, a further sum of £236 was paid to the Agent General in London, making a total of £689 paid by immigrants or by their friends towards their cost of passage to the Colony.

5. Herewith is annexed an abstract return of the disposal of the immigrants.

During the voyage there was neither a birth nor a death, but during the time that the vessel was in quarantine one of the single women died.

I have further to report that about seven or eight weeks previous to the arrival of the vessel in port one of the married men showed symptoms of insanity, daily becoming worse, until upon arrival he was declared to be a dangerous lunatic, and upon the certificate of two medical practitioners the man was temporarily placed in the Receiving House for Lunatics at Darlinghurst, and the wife and children were provided for at the Immigration Depôt.

6.

English	175
Irish	181
Scotch	22
Other Countries	86
		386

6. On examination by the Board of Immigration of the married people and of the single men on board the ship, and of the single women at the Dépôt, all declared themselves well satisfied with their treatment during the voyage.

7. The single women were as usual received at the Dépôt, from whence the larger proportion joined their friends, leaving only 36 for hire as domestic servants; these obtained engagements on the hiring day at an average rate of wages of nearly 9s. per week.

8. Free passes by steamers and by railway were provided for all who desired to proceed into the country districts; out of a total arrived of 386 immigrants there were forwarded to 37 different localities 23 married couples, with their 46 children, 42 single men, and 40 single women; the larger proportion of these individuals (namely 105) had been nominated by their friends in the Colony, who therefore were prepared to receive them; 3 married couples, 16 single men, and 5 single women, were hired previous to their departure from Sydney, leaving only 4 married couples and 4 single men who would require to seek for employment, on arrival at their destination.

9. The Surgeon-Superintendent, Thomas Harrison, Esq., appears to have given every satisfaction in the discharge of his duties, and is therefore entitled to receive the promised gratuity of 12s. per head on the immigrants landed alive, for this his fourth voyage in charge of immigrants to this Colony, also to receive the certificate entitling him to the sum of £60 towards the cost of his return passage to England.

A further claim of £6 6s. for continued attendance on board the ship, during the 6 days of demurrage, is also recommended to be paid.

10. The Surgeon-Superintendent reports of the matron, Miss Jones, "I cannot speak too highly of the manner in which her duties were discharged"; she is therefore recommended to receive the promised gratuity of £40; also to receive the further sum of £30 towards the cost of her return passage to England.

11. Dr. Harrison reports that every assistance was afforded to him by the master and officers of the ship, and recommends that the usual gratuity of 4s. per head, of the immigrants landed alive, should be thus distributed:—1s. 6d. to the master, 1s. to the chief officer, 1s. to the officer who issued the provisions, and 6d. per head to the second mate.

12. Other gratuities are recommended for payment as follows:—The sum of £5 each to the school-master, the cook, the man in charge of the distilling apparatus, and to the water-closet constable; of £3 each to the three sub-matrons, to the twelve ordinary constables, to the hospital assistant, to the cook's assistant, and to the baker, and on the special recommendation of the Surgeon-Superintendent the sum of £5 to each of the two men who for a period of seven weeks were required by day and by night to watch over the man who had become insane, also a gratuity of £2 to each of the two women who he found it requisite to appoint as nurses whilst at the Quarantine Station.

13. The Surgeon-Superintendent reports that no sickness could be said to have prevailed at any particular period of the voyage, and on arrival he reported that the general health was good excepting a few cases of chicken-pock.

I have, &c.,

IMMIGRATION.

(REPORTS FROM IMMIGRATION AGENT AND OTHERS—SHIP "CLYDE.")

Ordered by the Legislative Assembly to be printed, 2 June, 1880.

FURTHER RETURN to an *Address* adopted by the Honorable the Legislative Assembly of New South Wales on the 6th July, 1877, That, in the opinion of this House, there should be laid upon the Table of this House,—

- “ (1.) Copies of all Reports, since 1875 to date, from the Agent General, the Health Officer, and Agent for Immigration, to the Government, relative to the despatch of Emigrants from England or elsewhere, and after their inspection on arrival in the Colony by each ship.
- “ (2.) That similar Reports should henceforward be laid upon the Table of the House as soon as practicable after the arrival and inspection of the Immigrants by each ship.
- “ (3.) That the above Resolutions be communicated by Address to His Excellency the Governor.”

(*Mr. Macintosh.*)

IMMIGRATION.

The Acting Agent General to The Colonial Secretary.

Sir,

3, Westminster Chambers, S.W., 1 January, 1880.

I have the honor to inform you that the ship "Clyde," of 1,140 tons register, has been chartered for the conveyance of emigrants from Plymouth to Sydney, New South Wales, to be ready to embark passengers on the 26th instant.

The rates are as follows, viz. :—If 275 and under 300, £16 18s. 9d.; if 300 and under 325, £16 13s. 9d.; if 325 and upwards, £16 8s. 9d.

I have, &c.,

DANIEL COOPER.

The Acting Agent General to The Colonial Secretary.

Sir,

3, Westminster Chambers, 26 January, 1880.

With reference to my letter of the 1st instant, announcing the engagement of the "Clyde" for the conveyance of the emigrants to Sydney, I have the honor to enclose herewith a copy of the charter-party of that vessel.

The ship will sail from Plymouth with the passengers described in accompanying list.

The undermentioned gratuities have been promised on condition that the several parties shall have performed their duties to the satisfaction of the Government, viz. :—To the Surgeon-Superintendent, Mr. James Smith (seventh voyage), 16s. on each emigrant landed alive; the master, the first mate, and the second or third mate, or person who serves out the provisions, 4s. on each emigrant landed alive, to be divided as the Surgeon-Superintendent recommends, subject to the approval of the Government; the schoolmaster, £5; the matron, £40; sub-matrons, £3 each; the cook, £5; the cook's assistant, £3; the baker, £3; the man in charge of the distilling apparatus, £5; hospital assistant, £3; the water-closet constable, £5; the ordinary and female mess constables, each £3.

I am, &c.,

DANIEL COOPER.

The Acting Agent General to The Colonial Secretary.

Sir,

3, Westminster Chambers, S.W., 13 February, 1880.

Referring to my despatch of the 1st January last (No. 1-80 Emigration) reporting the chartering of the ship "Clyde," I have now the honor to advise you of the sailing of that vessel on the 29th ultimo, with 384 emigrants on board, equal to 327 statute adults, and to enclose,—

1st. Alphabetical list of emigrants, giving their names, ages, occupations, and the amount received by the Emigration Officer for passage and bedding, and paid into the Bank of New South Wales.

2nd. Return of the emigrants embarked, distinguishing the nominations made in the Colony, general assisted, English, Scotch, and Irish.

3rd. Certificate of Dr. James Smith of his examination of the emigrants before embarkation, as well as of the medicine chest, and provisions and stores supplied for the voyage.

I am, &c.,

DANIEL COOPER.

The Agent for Immigration to The Principal Under Secretary.

Sir,

Immigration Office, Sydney, 28 May, 1880.

I have the honor to report the arrival from Plymouth, on the 13th instant, of the ship "Clyde" with immigrants, having left that port on the 29th January, thus completing the voyage in 105 days.

The contract price as per charter-party is at the rate of £16 8s. 9d. per statute adult.

2. The ship arrived in port in good order; all arrangements for the comfort and convenience of the immigrants were most satisfactory.

3. The immigrants by this vessel consisted of 35 married couples with their 115 children, 98 single men, and 107 single women.

Their nationality is noted in the margin.

English	172
Irish	201
Scotch	10
Other Countries	7

In addition to the amount of £488, paid by depositors in the Colony, a further sum of £179 was paid to the Agent General in London, making a total of £667 paid by immigrants or by their friends towards their cost of passage to this Colony.

The very large proportion of 308 individuals out of 384 who left England were nominated by friends in this Colony.

4. Herewith is annexed an abstract Return of the disposal of the immigrants. During the voyage there occurred one death and seven births.

5. On examination by the Board of Immigration of the single women at the Dépôt, and of the married people and single men on board the ship, all expressed themselves well satisfied both in respect of the good quality and of the sufficient quantity of all provisions issued to them during the voyage.

6. The single women were received at the Dépôt on the day of the arrival of the ship, the greater number of whom were received by their friends, leaving only 31, who were willing to hire as domestic servants; these found immediate engagements, at an average rate of wages of 9s. 2d. per week.

7.

7. Free passes by railway and by coasting steamers were granted to 189 of the immigrants who wished to proceed into the country districts, as per follows :—

SUMMARY.

Why Proceeding.	Married.	Children.	Single Men.	Single Women.
Hired	1	3	15	2
To or with friends	16	48	39	26
Seeking employment in districts selected by themselves...	4	10	4
General Total 189	21	61	58	28

These proceeded to 47 different localities in various parts of the country.

The remainder of the immigrants, making a total of 70, including children, left the ship within two days after arrival, without any notification as to their proposed destination.

8. The surgeon-superintendent, James Smith, Esq., appears to have given every satisfaction in the discharge of his duties; he is therefore recommended as entitled to receive the promised gratuity of 16s. per head for this his seventh voyage in charge of immigrants; also, to receive the certificate entitling him to the further sum of £60 towards the cost of his return passage to England.

9. The surgeon-superintendent reports of the matron, Miss Matley, that on the whole she performed her duties well. It is therefore recommended that she receive the promised gratuity of £40; also the usual certificate entitling her to the further sum of £30 towards the cost of her return passage to England.

10. Dr. Smith reports favourably of the master, and of the several officers of the ship; the usual gratuity of 4s. per head on the immigrants landed alive, it is recommended should be thus distributed :— To the master, 1s. 6d. per head; to the first mate and to the purser each 1s. per head; and 6d. per head to the second mate.

11. Other gratuities, as per letter of instructions from the Agent General, are recommended to be paid as follows :—To the schoolmaster, the cook, the man in charge of the distilling apparatus, and to the water-closet constable, the sum of £5 each; to each of the three sub-matrons, the ten constables, the hospital assistant, the baker, and the cook's assistant, the sum of £3 each; also £3 on the special recommendation of the surgeon-superintendent to the nurse.

12. The principal diseases as reported by the surgeon-superintendent to have occurred during the voyage were jaundice, acute rheumatism, and bronchitis.

I have, &c.,
GEORGE F. WISE,
 Agent for Immigration.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

IMMIGRATION.

(PETITION AGAINST—INHABITANTS OF ILLAWARRA.)

Received by the Legislative Assembly, 17 March, 1880.

To the Honorable the Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned inhabitants of Illawarra,—

HUMBLY SHOWETH:—

That in consequence of the great number of men unsuccessfully seeking employment in this district, and the still larger number of unemployed in the Colony, your humble Petitioners are of opinion that further assisted immigration is unnecessary at the present time.

Your Petitioners therefore beseech your Honorable House to withdraw the £75,000 (seventy-five thousand pounds) placed on the Estimates for the above purposes.

Also that such immigration be suspended until the surplus labour of the Colony shall be absorbed in employment.

And your Petitioners, as in duty bound, will ever pray, &c., &c.

[Here follow 344 signatures.]

1879-80.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

IMMIGRATION.

(PETITION AGAINST—MARTIN GUEST, CHAIRMAN OF WORKING MEN'S DEFENCE ASSOCIATION.)

Received by the Legislative Assembly, 31 March, 1880.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

May it please your Honorable House,—

The humble Petition of the undersigned Labourers, Artisans, &c., Citizens of Sydney, and Members of the "Working Men's Defence Association,"—

RESPECTFULLY SHOWETH:—

That the voting of £75,000 for semi-pauper Immigration will be fraught with consequences the most disastrous to this Colony; the labour market being flooded to its utmost extent with persons, men and women, scouring the town in search of work and finding none.

Your Petitioners believe that the introduction of more immigrants would lead to more pauperism, crime, and immorality, and would only tend to crowd our already overcrowded gaols and asylums.

Your Petitioners would humbly pray your Honorable House to take the foregoing premises into your earnest consideration, and grant your Petitioners such relief as their case requires.

And your Petitioners, as in duty bound, will ever pray.

Signed on behalf of the Meeting,—

MARTIN GUEST,
Chairman.

No. 1.

The Colonial Secretary, New South Wales, to The Chief Secretary, Victoria.

(Circular.)

Sir,

Colonial Secretary's Office, Sydney, 11 June, 1880.

I have the honor to invite your attention to a question of high concern to all the Australasian Colonies, which, it seems to me, cannot be allowed to remain without legislative interference, and in dealing with which the Colonies might most effectively act in concert.

2. The presence of large numbers of Chinese in our populations is objectionable from the conditions which have at all times marked their influx,—that the immigrants are all of one sex, and that they are for the most part bound to some unknown authority, and are not really free. But experience has shown that many social mischiefs attend their introduction, in whatever form it takes place, not the least of which is that their presence is a constant source of discontent and dissatisfaction to large classes of our own people.

3. There is a certain prospect of the evil being aggravated as time advances if sound remedial and preventive measures are not adopted. The facilities of communication between China and Australasia are daily increasing, and at the same time restrictive legislation and social obstacles are likely to drive the Chinese from the Pacific States of America and from other countries. It is probable that these Colonies will not only attract immigration in larger numbers direct from China, but become the receptacles for Chinese refugees from other parts of the world.

4. In this state of things, I shall be glad to learn the views of your Government on the subject. If you concur with me as to the desirability of the Colonies acting in concert, there are two courses which seem to suggest themselves:—

- (1.) The preparation of a measure to be sent round to the several Australasian Governments for approval, with a view to uniform legislation in all the Colonies; or, what would perhaps be better—
- (2.) A Conference of all the Colonies, with a view to the consideration of the question in all its phases, and to agreement upon a common basis for united action.

I have, &c.,

HENRY PARKES.

No. 2.

The Colonial Secretary, Tasmania, to The Colonial Secretary, New South Wales.

Sir, Colonial Secretary's Office, Hobart Town, 18 June, 1880.
I have the honor to acknowledge the receipt of your circular letter of the 11th instant, suggesting the desirability of the Australasian Colonies acting in concert to prevent the introduction of large numbers of Chinese into the Colonies.

I have, &c.,
J. W. AGNEW,
(For Colonial Secretary, absent).

No. 3.

The Colonial Secretary, Queensland, to The Colonial Secretary, New South Wales.

Sir, Colonial Secretary's Office, Brisbane, 22 June, 1880.
I do myself the honor to acknowledge the receipt of your letter of the 11th instant on the subject of Chinese Immigration, and, in forwarding to you a copy of the Act passed here during the Session of 1877, dealing with the question, to inform you that your proposal in favour of the preparation of a measure to be sent round to all the Australasian group for approval with a view to uniform legislation, appears to be a good one, and if you will prepare such a measure it will receive the careful consideration of this Government.

Neither my colleagues nor myself view with approval the proposal for a Conference; little, if any, good has resulted from previous Conferences, and we do not think the matter of such serious importance as to require one.

I have, &c.,
A. H. PALMER.

[Enclosure.]

[The Chinese Immigrants Regulation Act of 1877. 41 Victoria No. 8.]

No. 4.

The Chief Secretary, Victoria, to The Colonial Secretary, New South Wales.

Sir, Chief Secretary's Office, Melbourne, 23 June, 1880.
In reply to your letter of 11th instant, relative to the best means of checking the immigration of Chinese to the Australasian Colonies, I have the honor to inform you that the Government of Victoria is alive to the importance of the subject, as well as to the difficulties that stand in the way of dealing with a matter that involves, as it does, large questions of international law.

This Government concurs in the suggestion that united action on the part of all the Colonies is necessary in order to put an end to the evil, and it will be glad to co-operate with New South Wales in promoting such action; but, as regards the holding a Conference to deal with the question, it would prefer that a meeting were not held until a measure had been first drafted and circulated for general consideration; and if you cause such a Bill to be prepared it will be carefully discussed by this Cabinet. A Conference held after that stage is reached would be in a position to deal with the subject more effectually probably than at present.

I have, &c.,
ROBERT RAMSAY.

The Chief Secretary, South Australia, to The Colonial Secretary, New South Wales.

Sir, Chief Secretary's Office, Adelaide, 28 June, 1880.
I have the honor to acknowledge the receipt of your letter of the 11th instant, and in reply to inform you that this Government are fully alive to the importance of the subject therein referred to, viz., the necessity for united action on the part of all the Australasian Colonies with reference to the influx of Chinese, and that they will be happy to unite in any Conference you may be able to arrange for the consideration of the question in its several bearings.

I have, &c.,
WILLIAM MORGAN.

No. 6.

Telegram from Colonial Secretary, New South Wales, to Colonial Secretary, Hongkong.

Sydney, 17 June, 1880.
It is reported here that your Government is promoting some scheme for the deportation of Chinese convicted of criminal offences to Australia. Kindly inform what foundation there may be (if any) for this report.

No. 7.

Telegram from Colonial Secretary, Hongkong, to Colonial Secretary, New South Wales.

Hongkong, 18 June, 1880.
No such deportation is now allowed from Hongkong. Governor Hennessy stopped all deportation of Chinese criminals to Australia three years ago. I will write fully by mail.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CHINESE.

(PETITION FROM M. GUEST, CHAIRMAN OF THE WORKING MEN'S DEFENCE ASSOCIATION.)

Received by the Legislative Assembly, 8 April, 1880.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

May it please your Honorable House.

The humble Petition of the undersigned Mechanics, Artisans, Labourers, &c., Members of the Working Men's Defence Association,—

RESPECTFULLY SHOWETH :—

That your Petitioners have heard with alarm and regret of the arrival on our shores of 260 Chinamen in one vessel, and regard it as the beginning of a Mongolian invasion, which, if continued, will lead to the most disastrous results.

To prevent all the horrors of an anti-Chinese war, your Petitioners would pray your Honorable House to take the foregoing premises into your earnest consideration, and grant such speedy relief as in your wisdom you may deem fit.

And your Petitioners, as in duty bound, will ever pray.

Signed, on behalf of Public Meeting held at Bathurst-street Column, April 5th, 1880,—

MARTIN GUEST,
Chairman.

1879-80.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CHINESE.

(PETITION FROM JOHN HARDS, CHAIRMAN OF A PUBLIC MEETING OF CITIZENS OF SYDNEY.)

Received by the Legislative Assembly, 9 April, 1880.

To the Honorable the Speaker and Members of the Legislative Assembly.

The humble Petition of the Citizens of Sydney,—

RESPECTFULLY SHOWETH:—

That your Petitioners now and ever have been opposed to the presence of Chinese in our midst, chiefly because—

1. Of their gross Asiatic immorality.
2. Their introduction of loathsome and incurable diseases among the people.
3. Their competition in the labour market tends to the ultimate degradation of our own poorer class of labourers.
4. Their not contributing to the support of the State in proportion to adult Europeans.
5. And lastly, because they fail to settle down as permanent colonists like persons of other nationalities.

That your Petitioners, lamenting the many abortive attempts at effective legislation in this particular, and feeling the direful necessity of resorting to what at first sight might be deemed un-English and unchristianlike measures (seeing that no other measures are adequate to the requirements of the case), humbly pray your Honorable House to bring in another Chinese Bill forthwith, which shall have for its objects—

1. The imposition of an annual tax of ten pounds a head on every individual of the Chinese race resident in New South Wales (whether from the mainland of China or from the British islands of the Straits Settlement (Singapore, Malacca, Penang, and Labuan), Hong Kong, or elsewhere (but nothing herein said shall be taken to refer to the children of Chinese parents born in New South Wales).
 2. The disabling of any vessel from bringing to these shores any more than thirteen Chinese at any one time; and
 3. The compelling the ship "Brisbane," now in Quarantine, with her 215 Chinamen, some of whom are infected with small-pox, to clear out with all her passengers, and not to land any of them in any part of this Colony under a penalty of twenty thousand pounds.
- And your Petitioners, as in duty bound, will ever pray, &c.

Signed, on behalf of a Public Meeting held at the top of Bathurst-street, Sydney, on the 7th April, 1880,—

JOHN HARDS,
Chairman.

1879-80.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CHINESE.

(PETITION FROM CHAIRMAN OF THE NATIONAL ANTI-CHINESE LEAGUE.)

Received by the Legislative Assembly, 17 June, 1880.

To the Honorable the Speaker and Members of the Legislative Assembly, in Parliament assembled.

The humble Petition of the Members of the National Anti-Chinese League, passed at a Public Meeting held at the Bathurst-street Column, on Wednesday, June 16th, 1880.

HUMBLY SHOWETH :—

Your Petitioners view with alarm the arrival of the steamship "Brisbane," on Sunday last, with 188 Chinese for Sydney, and the arrival this morning of the steamship "Java" with 185 more Chinamen for this port ; the latter vessel having a virulent case of small-pox on board .

Your Petitioners believing that this large influx of Chinese is the beginning of a great invasion of Mongolians to our shores, which, if not restricted by legislative enactment, will lead to great destitution amongst the working classes, and very dangerous results may follow ; more especially if that terrible disease the small-pox should be disseminated amongst us, the consequence would be most appalling.

And your Petitioners humbly pray your Honorable House will take the foregoing premises into your favourable consideration, and grant us relief by legislating on this question before you adjourn this Session.

And your Petitioners, as in duty bound, will ever pray.

Signed on behalf of the Meeting,—

FREDK. BRAINWOOD,
Chairman.

1879.

LEGISLATIVE ASSEMBLY.

GLEBE ISLAND ABATTOIR INQUIRY.

FINAL REPORT

WITH

MINUTES OF EVIDENCE

OF

THE BOARD

APPOINTED TO INQUIRE INTO AND REPORT UPON THE CONDITION
AND MANAGEMENT OF THE PUBLIC ABATTOIR, GLEBE ISLAND.

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED,
28 October, 1879.

SYDNEY: THOMAS RICHARDS, GOVERNMENT PRINTER.

1879.

1—A

[45.]

The Chairman of the Board to The Honorable the Colonial Treasurer.

Sir,

Glebe Island Abattoir Inquiry, Sydney, 22 October, 1879.

I have the honor to forward to you herewith the Final Report, with Minutes of Evidence and Appendices, of the Board appointed to inquire into and report upon the condition and management of the public Abattoir at Glebe Island. A number of separate appendices, which consist of a drawing representing the Philadelphia Abattoir, and of diagrams explaining the system with regard to the slaughtering of cattle and the conveyance of meat in America, are not quite ready, but will be printed, I am informed, in time to be laid upon the Table of the House when Parliament meets.

I have, &c.,

GEO. THORNTON,
Chairman.

GLEBE ISLAND ABATTOIR INQUIRY.

FINAL REPORT.

THE BOARD appointed by the Honorable the Colonial Treasurer for the purpose of inquiring into and reporting upon the condition and management of the Public Abattoir, Glebe Island, had the honor of submitting, on the 23rd June last, for the information of the Minister, a Progress Report, with a printed copy of the evidence taken up to that time. Since that period the Board have held several meetings for the examination of witnesses, and otherwise in pursuance of their inquiry, and now beg to submit their final Report.

Considering it prudent to afford an opportunity for giving evidence on the subject of inquiry to those persons desirous of doing so, and who had not already been examined, the Board issued an invitation to such persons by advertisement in the public newspapers; and the Board are now of opinion that the inquiry may be safely closed, they having, as they believe, collected sufficient information to enable them to make a full report upon the whole subject, and one which they think will be found not only interesting but likely to produce useful and important results.

The Board have given much time and attention to the duty entrusted to them, have held many meetings, visited and inspected the various institutions associated with this matter, examined a great many witnesses, and taken voluminous evidence upon every part of the subject which appeared to be involved in the question, no less than 5,098 questions having been put by the members of the Board, and as many replies obtained.

The Board have also compiled a synopsis of the evidence, which will be found a useful and ready means of reference to any person desirous of being informed upon any point of the subject submitted to the Board for inquiry.

The Board have divided the subject into several parts, under separate headings, not only with the object of keeping the various points involved in the inquiry distinct, but also of stating them with as much order and clearness as it is possible to do.

The duties deputed to the Board were to inquire—

- 1st. As to the truth of certain allegations made in the *Sydney Morning Herald*, in recent articles under the head of "Butchers and Butchers' Meat," as to practices carried on at the Abattoir;
- 2nd. As to the best means of disposing of the blood and offal from the Abattoir, with a view to utilizing the same for the public benefit;
- 3rd. As to the present management of the Abattoir; and

4th.

- 4th. Whether the present position of the Abattoir is the most suitable for the purpose intended, having regard to the requirements of the trade, and the health of the community, and generally on matters relating to the present system as practised at the Abattoir, with a view to an improvement;

and although the language of these written instructions from the Honorable the Treasurer would imply that the inquiry should not extend beyond them, yet in order to make a full investigation and submit a complete Report the Board have thought it undesirable to confine themselves to any limited action, and have endeavoured to make the inquiry a comprehensive one.

GLEBE ISLAND AS A SUITABLE PLACE FOR PUBLIC ABATTOIRS.

The Board reiterate and confirm the statement made in their Progress Report, viz. :—“They have taken the evidence of several witnesses of intelligence and great experience, and have also the evidence of their own inspection of the Glebe Island Abattoir. All the witnesses concur in the opinion that the site is eminently suitable for the purposes of a public Abattoir; and that with necessary additions to the buildings, the paving throughout and perfect draining of the Abattoir, an abundant supply of hot and cold fresh water, and trolly appliances, the site will be found sufficient to meet the wants of the metropolis for many years to come.”

Suitability
of present
site for the
Abattoir.

Cattle-yards

The covering on all the yards attached to the killing-houses requires to be altered and extended so as to protect the animals from rain, and also from the effects of the sun and strong winds. Additional secure yards should also be erected for both cattle and sheep; and the existing yards should be altered to permit of easier drafting, which would result in less cruelty with boat-hooks or similar instruments. Proper provision should also be made for the feeding and watering of stock which remain over the prescribed time in the yards, and that should be reduced from 48 to 30 hours; and the Regulation which requires these yards to be kept clean should be strictly enforced.

Roads for
vehicle traffic.

The roads for the traffic of the vehicles used at the establishment require to be extended and increased in width so as to admit of the passage of at least two carts or drays at all times, and should be properly paved and drained. The present limited space for cart traffic admits of the passage of but one vehicle at a time, causing much delay and inconvenience, and seriously obstructing urgent work required to be done by the men.

Detached gut
and hide
houses.

Detached gut, hide, and skin houses, with trolly and tramway appliances, should be erected for the several killing-houses on sites where the butchers' drays could have free access to take away the hides, skins, fat, and boiling offal without interfering, as they now do, with the removal of the blood and offal from the killing-houses.

Sheep, pig,
and calf
killing-houses

The sheep, pig, and calf killing-houses are too small and inconvenient, and consequently cannot be kept clean. New and properly constructed pig-houses should be erected on another site, and the space now occupied by them thrown into the sheep-houses, which should be altered and enlarged.

Steam
appliances for
hot water.

Steam power appliances for the supply of an abundance of hot, clean water, with large tubs, pans, &c., should be provided for the pig dressing as well as for general purposes.

An

An abundant constant supply of clean, cold water all through the buildings, with hydrants and hose fixed where necessary, is also urgently required; and to secure this the reservoir now in course of construction should be completed.

Abundance of clean, cold water with hydrants and hose.

The whole surface of the establishment should be paved with Caithness flagging or best asphalt, so formed as to constantly drain itself; and the under-ground drains should be enlarged and relaid with proper fall.

Paving of the establishment.

The whole of the establishment should be lighted with gas.

Gas.

Better accommodation should be provided for the Government employes on sites less subject to nuisances than these quarters now are.

Accommodation for employes.

A commodious building, fitted with large open and shower baths, lavatories, and closets, should be erected in a convenient spot, where the men engaged in slaughtering, &c., could take their meals and exchange their clothes as required, and have ever facility for personal cleanliness.

Baths and lavatories.

The Board are of opinion that a chilling-house in close proximity to the slaughtering-houses, with proper and adequate scientific appliances for removing the bodies of meat there from the killing-rooms, and with proper means for suspending and keeping the meat, is absolutely necessary as a part of the Abattoir requirements; and that such a chilling-house, with every requisite appliance, should be erected without any delay. There is abundant evidence to show that, especially in the summer months, meat for consumption is delivered before it can possibly cool, with the muscular action going on and in fact while the meat is in a state which is most unwholesome and such as to render it unfit for food. The meat when dressed, should be taken by machinery to the chilling-house, and there allowed to set before being delivered for consumption. This would improve the flavour and general quality of the meat, and cause it to keep good for at least one or two days longer than it would otherwise do. It would also do away with the starving of the stock in the waiting paddocks, and many other disagreeable things unavoidable under the present system.

Chilling-house.

Necessity for setting the meat.

The Board have obtained and append scientific evidence as to plans and cost of machinery and other material for reducing the atmosphere of a chilling-house to the degree of cold necessary for such purposes, and as to the cost of chilling and setting the meat, which shows that this can be done at an expense at which every one in the trade will gladly patronize the chilling-house.

Cooling machinery.

The Board have also obtained much valuable information, evidence, plans, &c., as to the mode of killing and dressing animals in the United States of America, the utilization of the blood and offal, the transit of live and dead meat, and also as to the refrigerator cars used for such purposes. This information the Board strongly recommend for careful perusal and consideration, and they are of opinion that where practicable the system followed in the United States should be adopted in this Colony.

The system in the United States.

THE TRANSIT OF STOCK TO HOMEBUSH BY THE ROAD AND BY RAIL.

1. *By Road.*

In order to carry out the duty with which the Board were entrusted, they have found it necessary to commence their inquiry with the treatment which the stock receive from the time they leave their pastures, and to follow them till they are delivered in the shape of meat to the consumer.

Extent of inquiry.

This was necessary not only for the sake of ascertaining the treatment to which the stock are subjected during all that time, but it was absolutely necessary in order that the Board might know how the stock had fared for food and water prior to reaching the Abattoir.

Treatment of travelling stock.

The

Effect of
treatment on
meat.

The Board thought it necessary also to take this course in order that the public might be made aware of the hard treatment to which the fat stock have usually been subjected in reaching Sydney and other markets; and to let it be clearly understood why the meat with which they have generally been supplied has been so unpalatable and innutritious.

Treatment of
stock on road.

Going, then, into the heart of the pastoral country, *i.e.*, the districts known as the Bogan, Lower Macquarie, Castlereagh, and Lower Namoi, and following the stock on foot from thence—say from Walgett to Sydney,—the Board find on evidence that for the first hundred miles the stock are not subjected to very great hardship, though every year, through the sale and selection of the land along the road, they are faring worse and worse; and that on that portion of the journey they will lose but little condition if they are carefully driven. After that, however, with almost every stage they approach Sydney their hardships increase; the feeding ground becomes less; the Reserves are in many instances stripped of pasture; the roads begin to be fenced in on both sides, and are frequently metalled; the traffic increases; and the stock are roused and knocked about by teams, coaches, and people on foot and on horseback.

Hardships
travelling
stock undergo.

This is very bad for the stock, but nothing to the hardships which they have to undergo when they reach the mountains forming the Coast Range—say Wallerawang on the one road, and the Bulga on the other. They have then to encounter what to them is absolute torture, for, bred and reared as they have been on plain country, their hoofs are naturally soft and their feet by that time tender from travelling; and when they come to these mountains they are hurried and hustled along the narrow broken stony tracks, weary and foot sore, at about twice the rate they ought to travel, as they can get little or nothing to eat by the way. This state of things is of course aggravated in every case where the drover is not very careful, and continues until the cattle reach the foot of the mountains, on the Sydney side of the Range; and so beat out and tired are the stock by the journey that they will, if allowed, lie for 12 or 15 hours at a stretch at the foot of the mountains, only getting up to drink and lie down again, and not even looking for grass, although they have had little or none for 3 or 4 days previously.

Want of feed
on road.

Although the stock on their journey from thence into Homebush are not punished as they are on the mountains, they are subjected to severe privations and suffering for want of grass. As a rule they do not get a good feed all the way from Kurrajong to Homebush, while they are a good deal knocked about in narrow lanes and on hard roads.

The waste in
meat.

The result of all this is the infliction of a great deal of cruelty on the stock, great waste of meat, and very great deterioration in its quality. On such a journey as the Board have sketched, one gentleman of large experience in these matters puts the waste at an average, all the season through, of 120lbs. a head; another at 200; and a third at 100lbs. Taking the average of the three we have a waste of 140lbs. per head; and the Board themselves are of opinion that this is rather under than over the actual loss on the journey in ordinary seasons and with ordinary drovers. Even at 140lbs. per head this waste is a very serious matter, and especially so when it is borne in mind that it is all the best and most nutritious part of the meat which goes first, and still more serious, as the effect of this hard treatment does not end with the loss in weight and flavour and nutriment of the meat, but fevers the animal and renders its flesh to a large extent unhealthy.

While

While the only real remedy for the evils here pointed at is the extension of our railways to the far interior, it is possible to do a good deal towards alleviating these evils by the proclamation of ample Reserves on all the main droving roads, and protecting these reserves for the sole use of travelling stock, and the Board would recommend that this course be adopted as soon as possible, and a special staff, if necessary, appointed for the work. In some districts ample provision has already been made in the shape of driftways and reserves for the stock traffic; but in others very little has been done in this way, and the stock suffer very much for the want of feeding grounds.

It will, of course, be evident that whenever an owner can avail himself of the railway he ought never to send his fat stock to market by the road; and that this is especially true as regards the travelling of fat stock over the Blue Mountains. Anyone who does so is not only very short-sighted and wasteful but guilty of unnecessary cruelty.

2. By Rail.

We find on evidence that the accommodation for the stock traffic prior to 1876-7 was so very defective that owners were deterred from using the railway. Since then considerable improvements have been made in these respects, but very much still requires to be done in the selection of more suitable sites for trucking and discharging the stock, the erection of larger and better-shaped yards, and the use of more convenient and safer trucks, while the time stock are now on the train without food or water requires to be shortened by at least one-half. The stock trains should be special, and should run through, and be subjected to far less stopping and shunting.

Evidence has also been adduced that considerable losses have occurred through over-crowding the trucks; and the Board would recommend, as some check on this practice, that the regular load of a cattle-truck should be fixed at (say) 8 head of fat cattle, and of half a sheep truck, at (say) 40 unshorn and 45 newly-shorn fat sheep; and that all cattle and sheep put into trucks in excess of these numbers respectively should be charged at (say) from 20 to 50 per cent. higher a rate than that paid per head for the regular numbers, according as the Railway Department may find it necessary.

CATTLE SALE-YARDS.

The site of the present cattle sale-yards at Homebush is too far from the metropolis and the Abattoir. The more such matters are concentrated the better for all concerned. Moreover the sale-yards as they have existed for years past, and are now carried on, are in all respects unsuitable—too small—filthy—unhealthy—the cattle often for many hours up to their bellies in mud and slush;—and the arrangements for the delivery from the railway trucks are defective, wild cattle at times breaking away and getting on the line, endangering life and property.

The Board are of opinion and recommend that the cattle sale-yards should be constructed on Glebe Island, and that all cattle brought by train should be delivered at Glebe Island by a branch railway line. Although the Board are aware that some objections to this course may be raised, yet they think these objections could

Advantages
of Glebe
Island.

could be easily removed, and everything regulated and made to work conveniently and advantageously for the general public. There would be an avoidance of the abominations connected with the present system of having the yards at Homebush; the cruelty and injury to the cattle by their being kept in paddocks several days without food, and then driven furiously, goaded by men, whips, and dogs, to the Abattoir; where they are now killed in a state of fever, would cease; the meat would be greatly improved in quality, whereas under the present system it becomes greatly deteriorated; and the roads along which the cattle are now driven would no longer be dangerous to the public. The nearer and more convenient the yards are to the city the better would it be for the smaller butchers, who could without difficulty attend and purchase their stock at the yards; and while the buyers from Campbelltown, Liverpool, Penrith, Richmond, Windsor, and the Southern Districts would have to come a somewhat longer distance to purchase their cattle, there need be no inconvenience if the cattle are sent from the yards to their destination by train. It is more than probable that there will gradually be a considerable increase in the number of stock killed in the country, and a consequent decrease in the number sent to Sydney, and therefore it is unnecessary, and would be very unwise, to incur the cost of erecting large new yards of a very expensive description. A chilling-house at Glebe Island, in which meat could be stored for as long as a fortnight, would enable purchasers to overcome the difficulties arising from a glutted market, or the stock, if unsold or waiting for slaughter, might remain in the yards at the Island and be fed with hay. No nuisance need occur from having the sale-yards near the Abattoir, and that Glebe Island is a suitable site for the yards is shown by the facts that the Island contains 33 acres of land, which is hard, dry, and easily drained, that the site is isolated and at the same time very convenient, that it has deep water frontage, and that it is a very short distance from the railway, with which it could be connected by a branch line.

Best site for sale-yards.

To recapitulate—the question as to the best site for central sale-yards, shortly stated, stands thus:—

- (1.) That, as the trade is now conducted, a very great deal of cruelty is being continually perpetrated on the stock after they leave the Homebush yards both on the road and while in the waiting paddocks, where they are starved sometimes for a whole week.
- (2.) That this state of things ought not to continue for a day longer than the change can be made.
- (3.) That as it is simply impossible to find grass for a tithe of the stock within 20 miles of Sydney, the only effectual remedy for these evils is to erect the sale-yards at Glebe Island, and give the stock hay while in the yards waiting for sale or slaughter.
- (4.) That an outlay of from 4d. to 5d. a head per day would provide sufficient food for horned cattle, and 1d. to 1½d. for each sheep, and that this would be immeasurably better for the stock than as they now are—very much better for the producer and butcher, and a great deal better for the consumer.

Sale-yards for small stock.

The establishment of central sale-yards on Glebe Island would also meet another very urgent want. It would provide a general metropolitan market for small stock which arrive by steamer and rail, and which are now treated in the worst possible manner for the want of such a market, to the great injury of both the producer and consumer.

DEAD

DEAD MEAT FROM THE COUNTRY.

There can be no doubt that the meat trade is now in a state of transition, and that the interests of the producers, dealers, and consumers are deeply concerned in the recent and advantageous changes brought about by having cattle slaughtered in the interior of the Colony, and conveyed as dead meat to the metropolis. It is self-evident that such a system has immense advantages. A constant supply of meat, better flavoured, of primer quality, and cheaper than hitherto, can be offered to the consumer, and the producer will obtain better prices for his stock—saving the hide, horns, hoofs, bones, tallow, &c., &c., and avoiding the expenses of droving as well as the loss of weight and quality in the animals. This dead meat trade is also a certain means of greatly increased traffic and revenue for the Railway Department, not only in the carriage of the meat but also in the conveyance of the hides, horns, bones, tallow, &c., &c.

Advantage of having cattle killed in the country.

Increased railway revenue.

But to carry out these arrangements effectually there would require to be a number of cool or "non-conducting" trucks, constructed upon the most modern and improved plans. The Board think every facility should be afforded by the Railway Department for the reception, conveyance, and delivery of dead meat from the interior of the Colony, and desire to call the attention of the Railway authorities to the anomaly disclosed in Mr. Dawson's evidence—that the charge for the conveyance of dead meat is 50 per cent. higher than for live stock, while it would seem to the Board that the charge per truck for dead meat should be much less than for live stock; for in the case of dead meat the trucks could always be used to take goods up the country, whereas the sheep trucks could never be used in that way and the cattle trucks very seldom, thereby entailing the expense on the railway of taking them back empty.

Refrigerator cars.

Railway Department.

The Board are of opinion and strongly recommend, that special trains for the conveyance of dead meat, and especially for live stock, should be run through to the metropolis, without stoppages, and at a speed of not less than 20 miles an hour.

Special trains for live and dead stock.

But to make such a system as proposed above perfect it is absolutely necessary that a dead meat market should be erected in a convenient part of the city, for the storing and keeping wholesome, and the sale of meat brought down by railway. The atmosphere of the meat store-rooms should be maintained at a degree of cold not exceeding 50° Fahrenheit, and this can be easily accomplished by the erection of proper machinery for the purpose. [*Vide Appendices, plans, &c., and scientific evidence of Captain Farquhar, Mr. Nicolle, and others.*] A small charge upon the meat would produce a sum which would more than pay good interest upon the cost.

Dead meat market.

Cold store-rooms.

It is necessary only to point to the difference between the quality and general condition of the meat supplied at the present time and for years past to the public, and what it would be if the meat were set by cold appliances in refrigerated stores, to recognise the great advantages of a dead meat market such as the Board suggest. Under the present system the meat delivered in the summer months for consumption is almost alive—hot, unset, and unwholesome; the animals often killed in a state of fever, and many of them cows about to calve or that have just calved;—a state of things that urgently requires a remedy.

Comparison between meat now supplied and meat set in refrigerated stores.

But there is far more involved in the improvement of the general quality and condition of the meat delivered in Sydney than this. The export of preserved meat from Sydney and Melbourne has, on the whole, been carried on at considerable loss. This has arisen almost entirely from the deteriorated condition of the beef

Improvement in meat export trade.

and mutton which have been put up; and if the meat can be laid down at the water's edge, as there is no doubt it now can be, in as good quality as it is in the paddocks in which the stock have fattened, our preserved meats will fetch a different price in the European and other markets; and if only 1d. per lb. more is realized, that would be about 40s. per bullock—a rise which would place our cattle-owners in a very different position from that in which they now are, while it would not affect the consumer here.

UTILIZATION OF THE BLOOD AND OFFAL, AND THE AVOIDANCE OF NUISANCES ARISING THEREFROM.

Present system costly and ineffectual.

The evidence taken by the Board on this portion of the subject of inquiry goes to prove that the present system with regard to the blood and the offal is very costly, defective, and quite ineffectual. It will be seen by the evidence that many nuisances still exist from the present drainage deposit and manner of conveying the blood and offal away from the Abattoir. These have often been allowed to accumulate and become very offensive, and this has arisen largely through mismanagement.

Discharge of blood and offal by punts defective and dangerous.

The system of delivering the blood and offal to the punts and the conveyance and discharge outside the harbour is very defective. The stuff itself becomes exposed and offensive; the men employed in the punts have to discharge some of the worst of the filth with their hands; the offal and filth have sometimes been allowed to return into and float over the harbour and some of the beaches, thereby not only creating an intolerable nuisance, but attracting voracious and dangerous fish, a state of things which of course increase the risks to people engaged on the waters in the harbour.

Punt should be hermetically sealed, and another provided.

For the avoidance of all offensive smells from the punt it should be so constructed as to be hermetically sealed, and as the Board are of opinion that the cheapest and most effectual way of dealing at the present time with the whole of the blood and offal is to have it conveyed outside the Heads, another punt should be provided.

Blood manure manufacture.

Then again, the system of blood coagulating and drying has been a failure in all respects, for while the process has not removed the nuisance arising from bad smells, the drying of the blood for manure and sale is a signal failure. The fact of its costing from 17s. 7d. to £2 12s. 6d. per ton to produce, and that it is sold at 2s. 6d. per ton, needs no comment.

The United States system

The Board are of opinion that the system pursued in the United States of America—not only in relation to the slaughtering of cattle, but also with reference to the utilization of the blood and offal, as shown by the important and valuable evidence of Dr. Williams, Mr. Alex. Stuart, and others—is well worthy of the consideration of the Government; and the Board recommend, as far as can be made practicable, its adoption in this colony.

Offal dealt with at once.

It should be a rule, and the rule should be strictly acted on, that the whole of the blood and offal is dealt with as they come from the animal, or at any rate before decomposition sets in.

MANAGEMENT OF THE ABATTOIR.

Management of the Abattoir.

The Board have taken evidence from various persons connected with the Abattoir, and have also given some personal attention and observation as to the general management of the Establishment; and they have come to the conclusion that

that it does not come up to its requirements with regard to inspection and cleanliness. The hours of attendance by the Chief Inspector are from 9 a.m. to 4 p.m.; but he does not strictly keep this time, having to attend to other duties which require his presence at the Treasury, the Police Courts, &c. Inspection.

The Assistant Inspector is supposed to commence his duties at 6 a.m. and to cease work at from 4 to 5 p.m. There are no other officers but the Inspector and his assistant, and though by far the most important part of their duty is to inspect the killed meat before allowing it to be delivered for consumption, so as to prevent diseased meat from being used for food, yet, as abundant evidence shows, most of the cattle slaughtered for consumption during the summer months are killed, dressed, and delivered to the retail establishments between the hours of 1 and 5 a.m. Consequently for such period of the year as that mentioned there has not been, nor is there now, any sufficient inspection of the cattle or meat—practically no inspection at all during at least one-half of the year. Assistant Inspector.
Inspection of meat.
Cattle slaughtered between 1 and 5 a.m.

It is stated that the spleens of all cattle slaughtered at the Abattoir are examined, to ascertain if any disease has existed in the animals; but that cannot be any sufficient test, inasmuch as it is impossible for a spleen found defective or diseased to be identified as having belonged to a beast which has been many hours before cut up into joints and much of it delivered, and perhaps consumed. Inspection of spleena.

The Board considers the inspection as carried out at the Abattoir a perfect failure. There can be no sufficient inspection where the supervision is not constant and strict; and to be in a position to perform their work thoroughly the Inspectors should reside on the Island, and one of them should be in attendance whenever any work is going on. The gate-keeper should admit no stock nor any article whatever on the premises without a delivery-note, and should see that all the meat leaving the Abattoir bore the Inspector's stamp. He should also see that the conveyance containing the meat, the cloth covering it, the driver and his clothes, were clean as provided for by Regulations. The Abattoir Regulations require to be revised, so as to give the Inspectors such additional powers as the evidence proves to be necessary, more especially for the detection and complete destruction of diseased and unfit meat, and the prevention of cruelty to animals; and with the view to the better suppression of the last-mentioned offence the Board would recommend that the Inspectors on the Island be appointed Inspectors under the Prevention of Cruelty to Animals Act. Inspection a failure.
Revision of Abattoir Regulations.

The whole premises should be white-washed every three months, and the walls of the killing-houses every month. There should be three or four additional labourers and another horse and cart employed at the Island. These are much required, and would be able to keep down and to prevent many of the evils and inconveniences now existing, and the rules laid down for the cleanliness of the Abattoir should be rigidly enforced. Additional labourers and horse and cart.

The Board would also recommend that the powers of the City Inspector of Nuisances and of the City Health Officer should be extended to Glebe Island, so that the Abattoir might come under their supervision. Extension of powers of City Inspector of Nuisances and City Health Officer.

ARTICLES IN THE "SYDNEY MORNING HERALD" UNDER THE HEADING OF
"BUTCHERS AND BUTCHERS' MEAT."

Statements
not over-
drawn.

In their Progress Report the Board briefly referred to that part of the subject of their inquiry which related to the statements contained in the articles published in the *Sydney Morning Herald*. A perusal of the evidence referring to the allegations in those articles will show that the statements of the writer were not over-drawn, and that they fairly described the practices then carried on at the Abattoir, and the condition of some of the retail butchers' shops in Sydney. Amongst other evidence upon this point is that of Mr. Richard Seymour, Inspector of Nuisances, and Dr. Dansey, City Health Officer, whose description of the state of affairs existing in the meat trade generally shows the necessity for immediate and thorough reform. Since public attention was aroused by the *Herald* to the objectionable practices in the trade considerable improvement has been introduced in some directions at the Abattoir and in other places concerned, but much requires yet to be done before the meat supply of the metropolis can be freed from the great abuses which have for so long a period characterised it, and which the Board consider are largely attributable to the lax supervision and want of management at the Abattoir.

Necessity for
immediate
and thorough
reform.

GENERAL.

Registration
of butchers'
shops.

The butchers' shops in the city and suburbs should be licensed and registered—the registration fee being a nominal one; and no unsuitable premises should be registered.

Inspection of
outside killing-
houses.

Inspectors should be appointed for outside slaughter-houses, and the inspection duly carried out.

Knackers'
establishments
registered.

No diseased stock should be allowed to be slaughtered on Glebe Island. They should be disposed of at the knackers' establishments, which should all be registered, and subjected to proper inspection.

Shipping-yards.

The necessary yards, forcing yards, and wharf should be erected at Glebe Island for the shipping of cattle, and a fair charge made for their use.

GEO. THORNTON,
CHAIRMAN.

JOHN STEWART.

ALEX. BRUCE.

EXTRACTS FROM THE MINUTES OF PROCEEDINGS.

WEDNESDAY, 25 JUNE, 1879.

MEMBERS PRESENT:—

The Hon. George Thornton, Esq., M.L.C., Chairman.
John Stewart, Esq., | Alexander Bruce, Esq.

John Wetherill, Esq., examined.
Samuel Dickinson, Esq., examined.

THURSDAY, 3 JULY, 1879.

MEMBERS PRESENT:—

The Hon. George Thornton, Esq., M.L.C., Chairman.
John Stewart, Esq., | Alexander Bruce, Esq.

Minutes of the previous meeting read and confirmed.
Letter read from Mr. E. D. Nicolle as follows:—

To the Hon. George Thornton,—
Sir,

Whiteheath, near Wollongong, 28 June, 1879.

In reply to your letter of the 23rd instant, I beg to inform you that I am willing to give evidence before your Board of Inquiry in reference to the application of artificial refrigeration for the purpose of preserving meat during the hot weather, placed in a reception-house in connection with the Abattoir, and will give you the probable cost for building such establishment; also the expenses to be incurred for maintaining the same in effectual operation. My time will be of short duration in the colony, as I am making arrangements for returning to Europe in February next, but during my stay here I will give you every information in my power in this new and special application of science, which has been the object of my study for many years. I thank you for your kind offer to defray my expenses in coming to Sydney, but I could not accept any remuneration as I shall consider myself well rewarded if the little mite I may be able to give may lead to the improved welfare of this great country, which has been my home during a quarter of a century.

Should you require my evidence immediately please to communicate the time it is to be received, and I will endeavour to come to Sydney. I have, &c.,

E. D. NICOLLE.

Daniel Holborow, Esq., J.P., examined.
Thomas Dawson, Esq., examined.

TUESDAY, 8 JULY, 1879.

MEMBERS PRESENT:—

The Hon. George Thornton, Esq., M.L.C., Chairman.
John Stewart, Esq., | Alexander Bruce, Esq.

Minutes of the previous meeting read and confirmed.

The Board having remained sitting half an hour, waiting for Mr. E. D. Nicolle, who was expected to attend for the purpose of giving evidence, and Mr. Nicolle not appearing the Board adjourned, but first deciding to call a special meeting to examine him if he should arrive in Sydney before the day to which the Board considered it advisable to adjourn.

THURSDAY, 10 JULY, 1879.

MEMBERS PRESENT:—

The Hon. George Thornton, Esq., M.L.C., Chairman.
John Stewart, Esq., | Alexander Bruce, Esq.

Minutes of the previous meeting read and confirmed.
Thomas Dawson, Esq., further examined.
Mr. Frederick Penny examined.
Mr. Henry Woolfe examined.

THURSDAY, 17 JULY, 1879.

MEMBERS PRESENT:—

The Hon. George Thornton, Esq., M.L.C., Chairman.
John Stewart, Esq., | Alexander Bruce, Esq.

Minutes of the previous meeting read and confirmed.

Letter read from Mr. E. D. Nicolle, informing the Board of his inability to attend for examination before the first week in August, but offering to reply to any questions forwarded to him in writing.

The Secretary was instructed to endeavour to obtain from the City Council plans in their possession of the Melbourne Cattle Sale-yards, and to acknowledge the receipt of the letters and documents received from America.

George Maiden, Esq., examined.

MONDAY,

MONDAY, 21 JULY, 1879.

The Board met at the Abattoir, Glebe Island.

MEMBERS PRESENT:—

The Hon. George Thornton, Esq., M.L.C., Chairman.
John Stewart, Esq., | Alexander Bruce, Esq.

Minutes of the previous meeting read and confirmed.

The Secretary read a letter from Mr. Frederick Oatley, the Inspector of the Abattoir, forwarding a report of statements made by Joseph Burrell and Josiah Wickham during an examination of these men by the Inspector, in his office, relative to certain evidence previously given before the Board.

On the motion of Mr. Stewart the Board decided to postpone the consideration of the letter till their next meeting.

Messrs. Joseph Burrell, Constable Carroll, Henry Brisbane Swan, Frederick Oatley, and Joseph Jager, re-examined.

Messrs. Francis Fagan and William Luckett examined.

THURSDAY, 24 JULY, 1879.

MEMBERS PRESENT:—

The Hon. George Thornton, Esq., M.L.C., Chairman.
John Stewart, Esq., | Alexander Bruce, Esq.

Minutes of the previous meeting read and confirmed.

The Board considered the letter and report received from the Inspector of the Abattoir, respecting certain statements in the evidence of Joseph Burrell and Josiah Wickham.

The Secretary was instructed to write to the Inspector, informing him that the Board had received his letter with the statement appended, but that they were not aware by what authority he had made such inquiry, and that they entirely disapproved of his having done so.

Alexander B. Farquhar, Esq., examined.

WEDNESDAY, 30 JULY, 1879.

MEMBERS PRESENT:—

The Hon. George Thornton, Esq., M.L.C., Chairman.
John Stewart, Esq., | Alexander Bruce, Esq.

The Board visited the works of the Fresh Food and Ice Company, Darling Harbour, and carefully inspected one of the refrigerator cars or meat trucks used by the company for the conveyance of meat and milk from the country to Sydney in a chilled condition,—being accompanied by Captain Farquhar, the Superintendent of the works, who elaborately explained everything to the Board.

THURSDAY, 7 AUGUST, 1879.

MEMBERS PRESENT:—

The Hon. George Thornton, Esq., M.L.C.; Chairman.
John Stewart, Esq., | Alexander Bruce, Esq.

Minutes of the two previous meetings read and confirmed.

The Secretary reported that he had written to the Inspector of the Abattoir, in accordance with the instructions at the meeting of the 24th July, and that the Inspector had replied, acknowledging the receipt of the letter, regretting that he should have incurred the Board's displeasure, and intimating that the course he had taken in holding the inquiry seemed to him only common justice to himself.

A letter was read from the Under Secretary for Finance and Trade, enclosing a Treasury Minute having reference to the allegations which had appeared in the public Press as to the intimidation of witnesses, and holding "harmless from blame, or from any ulterior consequences, so far as this department is concerned, any officer employed at the Abattoir who may be called on to give evidence" before the Board, and enclosing also a letter of date 25th instant, wherein the Inspector of the Abattoir reported that in accordance with instructions the minute had been read to the officers and men under him and duly initialled.

The Chairman reported that he had caused an advertisement to be inserted in the *Herald*, and also a paragraph, inviting anyone desirous of giving evidence before the Board to communicate with him, and that up to the present there had been but one response.

Mr. Reuben Woodham examined.

TUESDAY, 12 AUGUST, 1879.

MEMBERS PRESENT:—

The Hon. George Thornton, Esq., M.L.C., Chairman.
John Stewart, Esq., | Alexander Bruce, Esq.

Minutes of the previous meeting read and confirmed.

Letter read from Mr. John Walsh, submitting the names of certain master butchers and salesmen as those of persons it was desirable to examine as witnesses before the Board.

Letter

Letter read from the Inspectors of the Abattoir in further reference to the evidence given before the Board respecting two carcasses said to have been condemned by the Assistant-Inspector and afterwards passed by the Inspector.

Mr. Timothy O'Connor examined.

John Stewart, Esq., examined.

TUESDAY, 2 SEPTEMBER, 1879.

MEMBERS PRESENT:—

The Hon. George Thornton, Esq., M.L.C., Chairman.

John Stewart, Esq., | Alexander Bruce, Esq.

Minutes of the previous meeting read and confirmed.

Letter read from Mr. E. D. Nicholle, conveying to the Board further information respecting the preservation of meat by means of ice and cold air.

John Rennie, Esq., examined.

Mr. Frederick Oatley, re-examined.

TUESDAY, 9 SEPTEMBER, 1879.

MEMBERS PRESENT:—

The Hon. George Thornton, Esq., M.L.C., Chairman.

John Stewart, Esq., | Alexander Bruce, Esq.

Minutes of the previous meeting were read and confirmed.

Alexander Bruce, Esq., examined.

John Walsh, Esq., examined.

Thomas Elliott, Esq., examined.

The Board decided to close the inquiry with this meeting, so far as the taking of evidence, and to meet on an early day for the purpose of considering and agreeing upon their final Report.

TUESDAY, 30 SEPTEMBER, 1879.

MEMBERS PRESENT:—

The Hon. George Thornton, Esq., M.L.C., Chairman.

John Stewart, Esq., | Alexander Bruce, Esq.

Minutes of the previous meeting read and confirmed.

Letter read from Mr. E. D. Nicolle, confirming his previous estimate of the cost of refrigerating works in connection with the Sydney meat supply. The Board decided to publish the letter in the Appendix to the evidence.

The Board considered and adopted with some additions the draft of their Report as prepared by the Chairman.

SUMMARY OF THE EVIDENCE.

I.—TRANSIT OF STOCK BY ROAD.

1.—*Treatment of stock on road.*

About half the stock come to market by road, and half by rail. Fewer would come by the road if the train were available. Mr. Devlin, 2782, 2787.

Cattle suffer excessively coming over the mountains through want of feed and bad, steep, and rugged roads. They are liable to meet with losses coming over the mountains.

Fat stock on foot travel 8 or 10 miles a day.

Cattle from Bourke or from that direction do not begin to suffer till they get to Orange. The cattle are cruelly treated crossing the mountains, and get little or no feed up to Homebush. Mr. Dawson, 177, 188.

2.—*Want of grass by the way and waste on stock.*

Very little grass on the Mountain Road and what there is very rough.

Cattle on a journey of 300 miles will each waste from 100lbs. to 140lbs. on an average trip and in an average season. Mr. Devlin, 2788, 2800, 2795, 2797.

Sufficient attention has not been paid to provide reserves and grass and water for travelling stock.

The wants of travelling stock are not nearly provided for. Sufficient reserves should be made, and then they should be protected. Mr. Malden, 508, to 516.

The waste on cattle would be 200lbs. a head.

This waste would be over 100lbs. each. Taking the average on journey of 300 miles at 130, that, at only 2d. per lb., would make a loss of £1 1s. 8d. per head. Mr. Dawson, 271, 278.
Mr. Malden, 669 to 661.

II.—TRANSIT BY RAIL.

1.—*Accommodation for trucking.*

There has been very great improvement of late in the accommodation for loading stock.

Thinks the trucking accommodation cannot now be surpassed—was at one time very defective.

People were for a long time deterred from trucking stock through defective accommodation.

Everything in connection with this traffic was very defective. There were too few trucking stations, the sites exceedingly ill chosen, the yards, gates, crushes, &c., were badly shaped and badly constructed, the trucks inconvenient and liable to damage, the stock and the arrangements for discharging were as bad as those for loading. Mr. Simpson, 2090,
Mr. Devlin, 2816, 2818,
Mr. Malden, 517, to 558,
Mr. Bruce, 1636, 1648.

There has of late years been considerable improvement in the trucking accommodation, but there is room still for a great deal more.

The providing of proper accommodation for this traffic should be left to the Commissioner for Railways and his staff, not to the engineers.

An Inspector of stock traffic should be appointed under the Commissioner, to supervise and cultivate this branch of railway business.

2.—*Shape, construction, and cleanliness of trucks.*

The cattle-cars in America are 30 feet long and 7 feet wide. They have grated doors, a wooden frame and iron grating, and work with slides, hanging at the top and running in a groove at the bottom, like the doors on N. S. Wales sheep trucks, but hung at the top. Dr. Williams, 247, 250.

The new trucks are boarded round, and the cattle are not now bruised as they were in the old trucks. The old trucks are not used except when there is a rush for trucks. Mr. Simpson, 2085, 2084.

The trucks are now being constructed so as to allow the drippings to fall through and keep truck clean.

He thinks the folding down doors necessary to keep the feet of the cattle from getting in between the truck and the siding, in entering and clearing the truck.

Screw couplings would be an improvement on chains.

Is afraid that the folding down doors could not be dispensed with, as the feet of the cattle might get down. 2130, 2140.
Mr. Devlin, 2819, 2825.

If sliding doors were adopted they should be hung. The doors of new trucks should be made on the sliding principle to try it. 2931, 2936.

The couplings should be screws.

The trucks are now all boarded round.

Thinks the door in the side of the truck should be at one end and not in the middle.

In this way cattle would not be so likely to turn round and come out again, nor so likely to be bruised coming out. Mr. Malden, 625, 661.

The door ought to be a sliding one.

There are not sufficient trucks—though the requirements have been fairly met—of late.

3.—*Loading the trucks.*

Is of opinion that the losses in transit by rail are mainly due to overcrowding and to stock having been over-driven. Mr. Simpson, 2076.

Losses of sheep greatest in wet weather.

Railway officials have no power to stop overcrowding. The shipper engages trucks and loads as he likes. 2125, 2137.

Does

Does not think it would tend to safety of stock to put in a division after the truck is loaded. Eight cattle are quite a sufficient load for a truck ; and 90 to 100 sheep. With proper appliances the wildest cattle can be trucked.

Mr. Maiden, 634,
85.

4.—*Time stock are in train.*

Mr. Simpson,
2112, 2119.

Stock from Wagga Wagga are about 26½ hours on the journey and from Orange 16 to 18 hours. They are carried at about 15 to 16 miles an hour.

Mr. Devlin, 2830,
2831.

Stock are now carried at a rate of about 12 miles an hour. This is much too slow. They should travel at least 20 miles directly through.

Mr. Maiden, 558,
560, 593.

All stock trains should be special trains. There should be as little shunting and stopping as possible. It is that which throws the stock down. It is shunting and delay that causes destruction of stock.

Mr. Bruce.

The trains are too slow. There is too much shunting and stopping, which bruises and throws stock down.

1642.

Stock trains should be run through at 20 to 25 miles an hour.

5.—*Feeding and watering stock.*

Dr. Williams,
188, 217.

On long journeys in America the stock are turned out of the trucks and watered and fed.

Mr. Simpson,
2156, 2158.

Stock on train are never watered nor fed.

Mr. Devlin, 2832,
2833.

If stock are watered before being trucked and the train runs through direct and at proper speed, stock do not require feeding or watering.

6.—*State in which stock reach Homebush.*

Mr. Simpson,
2021, 2124.

Cattle now generally arrive in fair condition. They are sometimes bruised ; not many deaths—only two in last three months. There are more deaths in sheep. These are principally caused by over-crowding and over-driving.

Mr. Devlin, 2821,
2835.

Cattle latterly, especially since drovers have got passes with them, seldom get hurt. Formerly a good many did.

Mr. Dawson, 196
198.

Quicker transit, less shunting, and judicious loading would lessen damage to stock.

Cattle are roused and irritated in loading, and frightened while in the trucks ; and in this way bruise and knock themselves about.

7.—*Convenience for discharging.*

Mr. Simpson,
2097, 2147.

The arrangements at Homebush for discharging are not what they ought to be ; but in view of expected change they answer the purpose with judicious management.

Mr. Devlin, 2837,
2846.

Stock could at one time break away and get on the line, but need not do so now.

The arrangements at Homebush need much improvement. Sheep are made to jump from the upper floor. Stock should not be unloaded at a passenger station.

The fencing is not secure.

It would be very dangerous if stock were to break away and get on the line.

Mr. Maiden, 582,
593.

The accommodation at Homebush is miserably defective ; and there is not room there to do the work. Last Thursday a truck-load of cattle broke on to the line. Another time two truck-loads did so.

The accommodation at Homebush is not only in a very defective but highly dangerous state.

Mr. Bruce, 1645,
1648.

The accommodation is still very defective, and nowhere more so than at Wallerawang and Homebush.

8.—*Charge for live animals and carcasses.*

Mr. Simpson,
2077, 2084,
2148, 2149.

The average charge per bullock from Orange is about 10s. Could not say what the charge per carcass is. Trucks of live cattle are charged less than trucks of dead meat.

Mr. Dawson, 243,
252.

The charge for carcass is about 50 per cent. higher than for live animals, although the Commissioner has always expressed a desire to encourage dead meat trade.

The proportion of offal in a bullock is one-third and one-fourth. (*See statement in appendix.*) The railway in carrying the live animal is thus carrying 220 to 250 lbs. offal that is worse than useless ; for it is an expense and often a nuisance in Sydney.

Mr. Bruce, 1043.

If a low scale of charges had been fixed at first, and if there had been proper accommodation for trucking, owners would seven or ten years ago have been induced to use the train.

9.—*Advantages of rail over road.*

Mr. Devlin, 2806,
2815.

Owners who have seen their cattle in the yards have always said they would truck in future. Travelling knocks the goodness out of them.

Mr. R. Hill, 2601,
2,693.

Trucking cattle is also a great blessing to the consumer.

Mr. Devlin, 2,847,
2848.

If there were proper facilities for trucking all stock-owners would avail themselves of the railway.

Trucking saves time, and risk of loss, gives quicker returns, and saves condition and prime qualities of meat.

Mr. Maiden, 568,
678.

If there were proper accommodation, all the stock that could do so would come by rail and none by the road, meat would be fresh from the pasture, owners would get better prices, and consumers better meat.

It costs less to drove cattle, but the waste in condition far more than counterbalances the saving.

Mr. Bruce, 1643,
1644.

Owners did not find out the advantages of trucking until the drought in 1877 and '78 forced their stock on the line, and compelled the Railway Department to improve the accommodation for stock traffic.

10.—*Revenue from stock traffic.*

Mr. Simpson,
2095.

The live stock has been a considerable and paying traffic to the Department.

Mr. Devlin, 2813,
2814.

The stock traffic could be made a large source of revenue to the Government.

Mr. Maiden,
630, 683.

Mr. Bruce, 1638,
1639.

The Stock Branch of the Railway Traffic has been neglected, and revenue to the extent of £20,000 a year was, for the six years from 1869 to 1876, lost to the Department through the want of proper accommodation, and, although now perhaps nearly £40,000 a year, it might still, with proper management, be much farther increased.

III.—SALE-YARDS.

1.—Yards at Homebush.

The yards are disgraceful. Utterly unfit. Dirty, dusty, muddy, and even boggy in wet weather.

Mr. Playfair,
1951, 2016.
Mr. Hill, 2094,
2737, 2739.
Mr. Devlin, 2849,
2853.
Mr. Dawson, 203,
205.
Mr. Maiden, 590,
601.
Mr. Walsh, 1710,
1711.

They are a disgrace to the Colony.

2.—New site for Yards.

Haslem Creek.

Homebush.

Glebe Island, or near to it.

Mr. Playfair,
2017, 2029.
Mr. Devlin, 2368,
2388.
Mr. Hill, 2740,
2746.
Mr. Flood, 2604
to 2609.
Mr. Maiden, 624,
633.
Mr. Dawson,
206, 254, and
Mr. Woolfe, 477,
496.
Mr. Woodham,
1294, 1266, 1323,
1335.
Mr. Stewart,
1461, 1473, 1474.

Glebe Island is too near.

If cattle were trucked to Glebe Island, and fed when there, it would suit as a site for sale-yards.

Smithfield Market, which covered an area of 6 acres 15 roods, and held 4,000 or 5,000 cattle and 30,000 sheep, has been suppressed; and new yards are erected at Islington, where there are 15 acres within the walls and 12 or 14 outside which can accommodate 7,000 cattle and 40,000 sheep. See also Encyclopedia Britannica, and Sir Francis Head's "Faggot of Sticks" and Reports of Select Committees of the House of Commons, 1828, 1834, 1835, 1847, 1849, 1850, and 1856, on "Transit of Stock by Rail, Markets, and Abattoirs."

Thinks Glebe Island would not do at all for sale-yards, and that the new yards should be somewhere between Homebush and Parramatta Junction.

Thinks it would be the act of a mad man to have sale-yards at Glebe Island. Yards should be where the cattle could get paddocks and water. Cattle require rest, and meat would be bad if cattle were killed without resting in paddocks.

There could be no more convenient site than Homebush for sale-yards.

Glebe Island would not suit as a site unless there were daily sales; any other arrangement would make it necessary to have paddocks.

Mr. Rennie,
1554, 1556.
Mr. Walsh, 1759,
1763.
Mr. Elliott,
1364, 1370.

3.—Tar-marking very objectionable.

It inflames and irritates the skin and damages the hide in hot weather.

Mr. Dempster,
113, 117.
Mr. Oatley, 760,
768.
Mr. Devlin,
2856, 2850.

IV.—ILLTREATMENT OF STOCK IN TRANSIT TO ABATTOIRS.

1.—Illtreatment on road.

The stock are over-driven, dogged, whipped, frightened, maddened, and knocked about on the metalled road. This is more especially the case since the cattle have been prevented by Municipal authorities from travelling between 6 a.m. and 6 p.m.

Mr. Dempster,
80, 89.
Mr. Playfair,
2022, 2028.
Mr. Oatley, 747,
753.
Mr. Carrer, 2591,
2596.
Mr. Devlin, 2360,
2364.
Mr. Wetherill,
1, 49.
Mr. Dickinson,
68, 91.
Mr. Holborow,
92, 127.
Mr. Maiden.

His cattle are not badly treated on the road. They are sent to paddocks containing 200 or 300 acres where there is grass and scrub, and then taken to the Abattoirs as required.

The law which compels the driving of cattle at night is an iniquitous one.

The meat of cattle which have been over-driven is deteriorated, and shows the effects of the bad treatment. In the opinion of medical men of the highest standing, such as the celebrated Professor Owen, meat treated in this manner is unwholesome, less nourishing, and likely to occasion illness; and if it does this in England much more would it do so here.

His stock are not over-driven. He would not keep a stockman an hour who would over-drive his stock.

Mr. Rennie,
1557, 1558, to
1564.

Mr. Stewart,
1457, 1459.

He has his own drover, and so has several other butchers. He does not generally buy cattle at Homebush, but brings them from his own paddocks as required.

Mr. Walsh, 1712,
1714.

1.—Danger to inhabitants.

The driving of the cattle is a source of serious danger, and a very great nuisance to inhabitants of Burwood, Ashfield, and Petersham; several accidents have lately occurred.

Mr. Carnes.
Mr. Wetherill,
38, 49.
Mr. Dickson, 68,
91.
Mr. Holborow,
92, 104.

Mr. Dempster,
106, 110
Mr. Hill, 2769,
2774.
Mr. Wetherell,
17, 131.
Mr. Penny, 391,
395.
Mr. Carnes.
Mr. Devlin, 2365,
2367.
Mr. Dawson, 143,
144, 285, 294.
Mr. Maiden, 662,
665.
Mr. Stewart,
1460, 1461.

Mr. Rennie,
1565, 1582.

Mr. Walsh,
1703, 1709, 1769,
1788.

Mr. Walsh,
1769, 1788.

Mr. Elliott,
1871, 1875.

2.—Treatment of stock in waiting-paddocks.

Stock are starved in these paddocks. No grass in any of them, and in some not even water—while stock are kept in them sometimes a week—never less than two or three days.

Says that the want of water has a very deteriorating effect on the meat. It spoils its appearance. The meat does not keep well, and it will not "take" salt.

Kills about 150 cattle a week. His paddocks contain about 200 acres, and there is good feed in them; but this is not the case with waiting-paddocks generally.

He says there is plenty of land in the Colony where in a good season 1 acre would keep four bullocks, while there is some that 80 acres would not keep one bullock.

He says if cattle were to get 4d. or 5d. worth of hay a day each in a yard on Glebe Island they would be twenty times better than they now are in the paddocks.

The stock would eat the hay if they got it.

He gives hay to cattle which are left over on Saturdays at Glebe Island.

He has large paddocks at Duck River and at Concord for keeping his cattle. Other butchers have also paddocks.

It is not true that his cattle are cruelly treated.

Thinks there are on an average about 200 cattle always in paddocks between Homebush and the Abattoirs. There is not much grass in them.

Would not believe that cattle could be kept for a week in any of the small paddocks at Petersham. There are small paddocks near the Abattoirs with forty or fifty cattle at a time in which there is nothing to eat, but they belong to twenty different owners.

It may be the practice to keep a week's supply on hand, but he likes to kill out.

The cattle eat hay sometimes, and it would be better for them to get 10 or 12 lbs. of hay a day each in the yards at Glebe Island than be as they now are in the waiting-paddocks.

Has a run for his sheep near Canterbury, where they get plenty of grass and scrub.

The cattle paddocks are very bare.

V.—SMALL STOCK IN TRANSIT TO ABATTOIRS.

1.—Arriving by steamer.

Mr. Dempster,
111, 112.
Mr. Seymour,
3112, 3114.
Mr. Dansey,
3202, 3203.

The accommodation for small stock at wharfs is quite unfit. They are starved and otherwise illused.

2.—Central Sale-yards in City for these stock.

Mr. Seymour,
3115 to 3118.

Would be a very great benefit to all concerned,—the producer, the consumer, and the Corporation, and very much better for the stock.

VI.—GLEBE ISLAND AS A SITE FOR ABATTOIRS.

1.—Requisites of proper site.

Mr. Dempster,
159, 143.
Dr. Williams,
161, 170, 252, 255.

Thinks Abattoirs should be up the line.

Gives evidence that Abattoirs in even the centre of large cities can, with proper management, be conducted without creating the least nuisance, as in the case of New York, Philadelphia, and Chicago.

2.—Advantages of Glebe Island as a site for Abattoirs.

Mr. Oatley, 580,
583, 629, 631.
Mr. Flood, 2603,
2605, 2608, 2609.
Mr. Hill, 2709,
2728, 2729.
Mr. Maiden, 717,
718.
Mr. Stewart,
1873, 1874.
Mr. Rennie, 1421,
1424.
Mr. Walsh, 1716,
1722.
Mr. Elliot, 1851,
1856.
Mr. Stewart,
1471.

Every way most suitable; none better. Easily drained, isolated, near to Sydney, very accessible, and with extensive deep water frontage.

Thinks it has both advantages and disadvantages.

Could not find a better site for Abattoirs than Glebe Island.

It is eminently well situated.

It is both convenient and isolated.

In 1849 there were 148 slaughter-houses in London, all registered. The blood was sold at 3d. per bullock, and collected and carried away by purchasers.

3.—Disadvantages.

Mr. Dempster,
122, 131.
Mr. Oatley, 765,
773.
Mr. Dawson, 138,
142.

Thinks it too near the city; causes cruelty to stock and a source of danger to inhabitants.

Sees the inconvenience where stock have to be turned out.

Does not think the site suitable. Thinks slaughtering should be done up the country.

4.—Form and state of buildings.

Mr. Oatley, 553,
569, 632.
Mr. Playfair,
2033, 2040.
Mr. Flood, 2607,
2646.
Mr. Woolfe, 400,
415.
Mr. Gilchrist,
1535, 1593.
Mr. Hill.

They stand on too confined a neck of land, and the room there is has not been turned to the best account.

Buildings though several times enlarged are still too small and badly ventilated. They were badly constructed at first.

Yard-room insufficient and yards insecure.

The yards, sheds, and killing-houses should be altered and enlarged.
The buildings at the Abattoirs are very much superior to those at Melbourne.
The cattle portion—if the yards were better covered—is all that could be desired.

Mr. O'Connor,
1421, 1424.

Mr. Rennie,
1481, 1483.
Mr. Walsh, 1658,
1664.

Is of the same opinion as Mr. Rennie, and adds that there are not, so far as the trade is concerned, in Australia abattoirs better provided or better kept than ours; and he has had a large experience both in these colonies and in America.

5.—Roads, lanes, and drainage.

The lane between the beef and mutton houses is too narrow.

Mr. Maiden, 713,
716.
Mr. Rennie, 1563.
Mr. Walsh, 1726,
1731.

The drainage is defective, and the roads and lanes are not kept clean; while the lane between the houses is too narrow and not well drained.

VII.—STAFF AT ABATTOIRS, POWERS, DUTIES, &c.

1.—Acts, Regulations, and instructions.

The Abattoir Act of 1850.

Mr. Oatley—

Cattle Slaughtering Acts and the Regulations of December, 1877, issued under the Abattoirs Act.

The Inspector's powers are too limited, especially as regards the enforcement of the destruction of condemned meat and the condemnation of stock unfit through poverty for slaughter for meat; as also for enforcing cleanliness and suitable conveyances for meat.

Mr. Jager.

2.—Staff—inspecting, and duties.

Mr. Oatley, Inspector, and Mr. Jager, Assistant-Inspector. Mr. Gilchrist also at times, although not appointed, does duty as Inspector.

Mr. Oatley has been 30 years in the service—non-resident.

Mr. Oatley, 279,
685.

Mr. Jager, 12 years in the service. Assistant Inspector collects all moneys, takes brands, inspects stock, and keeps accounts.

Mr. Jager, 888,
903.

Engineer, acts as Assistant Inspector, collects fees, has charge of labourers, and charge of the water and punt; and sees to cleanliness of abattoirs.

Mr. Gilchrist,
1429, 1433.

Mr. Swan deals with the blood, and sees to the removal of offal.

Mr. Swan.

Complains of obstructions by Mr. Oatley and others on the Island; says that staff is not sufficient to keep abattoirs clean, and deal with blood; two more labourers, and horse and dray are required.

Says more labourers are required, and another horse and dray.

J. Burrell.

Thinks another horse and dray necessary, and two more men.

J. McGall.

Is engaged in removing and preparing blood, and sometimes offal; says that more help is wanted.

W. Johnston.

There are five hands employed at blood constantly.

3.—Accommodation for Government employés.

Is badly lodged, house too small, and out of repair.

Constable Car-
roll, 1654, 1662.
J. Wickham,
1680, 1840.

His house badly placed. It is soaked with drainage from pig yard, and infested with rats.

4.—Attendance of employés.

His office-hours are from 9 to 4. He attends regularly, except when duty takes him to Treasury.

Mr. Oatley, 286,
390.

Does not leave at times till 5, 6, and even 7 p.m.

If not there, assistant always is, except when called to Police Office.

Attends from 6 a.m. in summer, and 7 a.m., in winter, to 8, sometimes 9, and sometimes 9.30. Is away an hour and a-half. There is no one in charge during meal-hours; and matters may be carried on in the absence of Inspectors.

Mr. Jager, 831,
952.

He leaves at 4, while business goes on to 6, and sometimes 7.

He says Mr. Oatley generally leaves at 4, or shortly after it.

Arrives at 6 a.m., and leaves at 5, 5.30, and 6 p.m., and on Saturdays sometimes as late as 11 p.m.

Mr. Swan, 1356.

Says Mr. Oatley arrives from 9 to 11, and sometimes later, and leaves about 4.

Constable Car-
roll, 1776, 1778.

Butchers, employés, and others.

1.—Their habits.

Butchers not so tidy as they should be. They are very dirty.

Mr. Oatley, 871,
877.

They have conveniences for washing, but not for bathing.

They won't make use of rooms for meals.

Washing-room not suitable, and never used.

Mr. Gilchrist,
1640, 1648.

Butchers wash in buckets that they use for washing-down meat.

Would recommend shower-baths and hot water for them.

Proper baths ought to be erected. Hot water should be provided. Cleanliness ought to be enforced.

Mr. Hill, 2720,
2723.

2.—Their conduct.

Very bad in some cases. The Inspector has not the influence he ought.

Mr. Dempster,
79, 82.

Conduct at one time very bad—much gambling—but now better.

Mr. Oatley, 876,
879.

Gambling was bad, but now very rare.

Mr. Gilchrist,
1635, 1639.

Not much trouble with employés now.

Constable
Carroll, 1663,
1667.

3.—*Their accommodation.*

- Dr. Williams, 223, 227. Butchers at Philadelphia have bath-rooms and waiting-rooms; come to work in clean clothes; keep working suits on premises.
- Mr. Shultz, 2363, 2366. The men have to go into empty slaughter-houses alongside pigs to have their meals. Dining-room holds only 14, while there are nearly 100 men at the abattoirs.
- J. M'Call, 2533, 2534. Mr. Swan's men have a room, and keep it tidy. Butchers' men have a room, which he thinks is kept clean.
- Mr. Hill, 2710, 2778. Closet accommodation totally insufficient—only 6—and there are sometimes 500 people on the Island.
- Mr. Maiden, 707, 713. Dining-room for 12 men, when there ought to be room for 100 to 150. Baths cannot be used, and disgraceful. There ought to be shower-baths. The accommodation a disgrace to civilization.
- Mr. Walsh, 1798, 1799. The men have accommodation for washing. Shower-baths would be a great advantage to them.
- Mr. Woodham, 1249, 1250. Some men will not keep themselves clean; but more accommodation is required.

4.—*Inoculation with Cumberland and other disease.*

- Mr. Jager, 1022. Directions for treatment in such cases, recommended by Mr. Stewart:—Washing and free use of lunar caustic, a supply of which should always be kept on the premises.
- F. Fagan, 802, 831. Had been inoculated with Cumberland disease, but not in Sydney.

VIII.—THE CATTLE-YARDS AND BEEF-HOUSES.

(1.) *The Yards.*1.—*Their form, size, construction, and drainage.*

- Mr. Oatley, 774, 788, and Mr. Jager, 1169, 1171. Additional yards would be a great convenience.
- Mr. Maiden, 719, 721. No facilities for drafting. Cattle have to be run backwards and forwards; butchers cannot get particular beast out without knocking others about. There is very insufficient accommodation at back of slaughter-pens, and no room for offal and hides.
- Mr. T. O'Connor, 1425, 1439. The yards should be extended; it would then be possible to go into the yard and drive the cattle into the killing-house. As yards now are this would be dangerous. If yards were altered and crush constructed, the boat-hook could be dispensed with in yarding.
- Mr. Walsh, 17, 22, 1735. Cattle-yards should be enlarged. Now a difficulty in getting a day's supply into them.

2.—*Time cattle remain in yards.*

- Mr. Dempster, 1, 6. Cattle at times look very much tucked up, and as if they were kept too long.
- Mr. Oatley, 784, 791; and Mr. Jager, 1181, 1183. yards. Cattle kept 48 hours. If not killed when time is up they are sent back to paddocks, or get food in yards. They are generally sent back.
- J. Burrell, 2473, 2479. The longest time cattle have been kept in yards is three or four days. The regulations as to forty-eight hours are not always adhered to. In one case a calf was kept five days.
- Mr. Flood, 2045. He is not aware that cattle are frequently sent back to paddocks.
- Mr. Oatley, 971, 978; and Mr. Jager, 1036, 1042. Stock ought not to remain more than twenty-four hours at Abattoirs without food.
- The cow and calf alluded to was kept forty-eight hours and then taken away.

3.—*Food and water to stock, and shelter.*

- Mr. Dempster, 17, 17. Cattle are now supplied with water.
- Mr. Oatley, 444, 563, 569, 746, 747, 784, 786, 979, 989. No food ever given them; never allowed to remain over forty-eight hours; and seldom that time.
- Mr. Jager, 1043, 1048. They are sheltered by roof over yards; but roof would have been better lower.
- Mr. Woodham, 1371, 1380. All cattle kept in yards on Saturday get food. They always eat lucerne hay when it is given them.
- Mr. T. O'Connor, 1426, 1429. If food is good the cattle always eat it.
- Mr. Rennie, 1549, 1550; and Mr. Walsh, 1789, 1790. Thinks the cattle would not eat hay in the yards.
- Thinks the cattle should be provided with lucerne both in paddocks and yards.
- The covering over the cattle-yards should be enlarged and lowered.

4.—*Cleanliness of the yards.*

- Mr. Dempster, 7, 10. Sometimes filthy; can't clean them while occupied by cattle.
- Mr. Oatley, 447, 451, 796, 800. Yards cleaned every other day; drainage might be improved.
- Mr. Jager, 1184, 1185. Men are constantly cleaning yards.
- Mr. Maiden, 721. The floors of the yards should be either flags or asphalt.
- Mr. Walsh, 1791. As the yards are paved with freestone the paving wears, and offensive matter collects in the holes, as also in the lanes. Bluestone paving would be better.
- Mr. Rennie, 1549, 1552. The lanes at the back of the yards, and that between them, should be kept cleaner, and a hose should be provided for washing them out.

5.—*Housing cattle in pithing-house.*

- Mr. Dempster, 18, 37, 144, 153. Great cruelty in housing with boat-hook. Truck for running cattle would be an improvement, but there is not room to work it.
- Mr. Oatley, 792, 807. No facility for drafting; particular beast, and same cattle are driven over and over again into killing-house; sometimes takes 10, sometimes 15 minutes to put in a "fall."
- Mr. Jager, 1172, 1175. It would be a great advantage if plan for drafting out single beast could be got.
- J. M'Call, 2520, 2532. The present yards are not of best shape.
- Could not house with plain poles. Must use boat-hook.

Does

Does not know better plan than present ; sometimes too severe with boat-hook.	Mr. R. Hill, 2702, 2706, 2775, 2776.
Be better, if practicable, to put up convenience for drafting—two ways.	
Would be handy to draft two ways ; as it now is have sometimes to put the same cattle ten times into killing-house.	Mr. Fagan, 852, 863.
Not possible to house without using boat-hook—without losing time.	
If a race were constructed the men could get close to the cattle, and "house" them without using boat-hooks.	T. O'Connor, 14, 39.
In their yards there is no difficulty in housing cattle but there is so where the butchers kill by contract. It would be a great convenience in their case if the yards were enlarged and arranged for drafting two ways.	Mr. Walsh, 1792, 1794, & Mr. Rennie. Mr. Rennie.
The capping of the yards is rotten in several places and dangerous.	

(2.) *The beef-houses.*1.—*The killing-houses.*

There now is ample accommodation for cattle ; could kill 600 more than at present.	Mr. Oatley, 493.
The buildings are suitable enough.	Mr. Penny, 309, 313.
The buildings are very suitable,	Mr. Walsh, 1723, 1725.
The beef-houses should be enlarged.	Mr. Woodham, 1243.

2.—*The cattle gut-houses.*

If running of guts was done at a distance from the killing-house in a separate shed behind the slaughter-house it would be a great improvement.	Mr. Oatley, 812, 824, & Mr. Jager, 1180, 1192
It would be an excellent principle to lay down that everything in the shape of offal should be removed from the killing-house as soon as it comes from the beast. This might be done if trollies were used and detached guts and hide-houses erected as suggested.	Mr. Rennie, 1589, 1593
It would be an improvement to remove the whole of the offal at once on trollies, and to deal with it in some place other than the killing-house. He says however that it is removed now without very much delay.	
If a plan could be devised for removing the offal on a trolley a great good would be done. It would prevent the block between skin and offal drays, and the places would be very much cleaner.	Mr. Walsh, 1795, 1796.

3.—*Killing, pithing, and dressing.*

Considers the practice of "fiddling" a very cruel one.	Mr. Dempster, 61, 64.
Describes the mode of killing at Philadelphia by pithing. Hoisting and catching blood in large pan and conveying it to receptacle in trucks. Not allowing it to run on the floor. "Fiddling" is not practised in America.	Dr. Williams, 202, 207, 272.
"Fiddling" is they say necessary to extinguish life quickly and save the butcher from being hurt by nervous movements of cattle when stuck.	Mr. Oatley, 425, 437, 803, 809, & Mr. Hill, 2695, 2697.
Does not think the plan of killing at Glebe Island could be improved upon.	Mr. Walsh, 1665, 1680.
The sooner a beast is dressed after being pithed the longer the meat will keep ; and the meat of the first beast hung up is worth $\frac{1}{4}$ d. per lb. more than the last.	
Does not think the skinning on the floor among the blood affects the meat, but considers that the hoisting the beast, as in America, immediately when pithed, is an improvement.	
Thinks the Abattoirs comparatively clean. Slaughter-houses are washed down after every fall. Does not think the American plan of slaughtering cattle and catching the blood can be so well carried out as represented.	Mr. T. O'Connor, 1434, 1437.
Does not know of any improvement which can be made on present mode of slaughtering. Has had a great deal of experience in Scotland, England, and Canada. Has not seen or heard of new mode of killing in America.	Mr. Rennie, 1520, 1548.

4.—*Cleanliness of slaughtering.*

The slaughter-houses at Glebe Island are not, as a rule, in a state of cleanliness, but not worse than slaughter-houses generally are.	Mr. Dempster, 31, 35.
Does not see present practice of skinning in blood can be avoided ; slaughter-house cleaned after every "fall."	Mr. Oatley, 294, 308, 810, 813.
Present system does not affect the meat ; there might perhaps be a better system.	Mr. Jager, 982, 983.
Pretty clean. Washing water sometimes dirty. Floors sometimes swept after "fall" and sometimes not.	Constable Carroll, 1683, 1705.
Thinks present the proper mode of killing ; knows of no other.	Mr. Hill, 2099, 2701.
Has seen dirty water, and men in filthy state washing their hands in water with which they washed the meat.	Mr. Seymour, 2963, 2965.
Houses are swept after a "fall."	J. McGill, 2502, 2503.
Houses are washed after each "fall."	Mr. Walsh, 1070.

IX.—SHEEP-YARDS AND MUTTON-HOUSES.

(1.) *The yards.*1.—*Their number, form, and construction.*

Not sufficient yards. Yards not secure. Good sheep changed for bad. There is no watchman.	Mr. Playfair, 1954, 1962.
There are not sufficient yards, but he has recently been provided with one.	Mr. Elliott, 1876, 1879.

(2.)

(2.) *The mutton-houses.*1.—*Size, &c., of killing-houses.*

Mr. Oatley, 494, 849.
Mr. Jager, 1092, 1098.
Mr. Playfair, 1962, 1963.
Mr. Schultz, 2264, 2302.
Mr. R. Hill, 2718.
Mr. Maiden, 700, 702.
Mr. Elliott, 1810, 8834.
Mr. Walsh, 1736, 1768.
Mr. Woodham, 1216, 1223.

Although the mutton-houses are better than they were they are still small, badly lighted, badly shaped, too low in the roof, and not large enough to hang half the sheep when slaughtered. Three houses should be thrown into two and better ventilation provided.

The mutton-houses should be larger and loftier, more airy, more convenient, and better paved.

There is not now sufficient room to do the work. The roof also admits the rain, the houses are unavoidably very dirty, the dressed sheep have to be hung one over the other and the buildings are altogether unfit.

Three houses should be thrown into two, the roof should be raised, the ventilation improved, and the drainage seen to.

2.—*Convenience for running guts.*

Mr. Oatley, 849, 853.
Mr. Jager, 975, 970.

The mutton-houses are now very filthy through being so small and inconveniently shaped, and through the skin drays blocking the lanes and preventing the removal of offal. They would be far cleaner if detached guts and skin houses were provided.

A better arrangement should be made for removing the offal and skins.

Mr. Walsh, 1758.
Mr. Woodham, 1223.

3.—*Cleanliness of mutton-houses.*

Mr. Oatley, 804, 312, and Mr. Jager, 977, 981.

The mutton-houses are very dirty and offensive, but cannot be helped with present system of running guts and the offal left over night.

Uncleanliness occasioned mainly through "jam" between offal and skin drays.

The men used to complain; do not do so now. Heard Schultz complain.

If offal be left over night it is impossible to keep the place clean.

The place should be flagged and have a hydrant and hose, and be cleaned, as in London.

The principal cause of filth is the non-removal of offal.

No killing should be allowed, except between 6 and 6.

Thinks sheep-killing cleanly.

Mr. Playfair, 1964, 1968.
Mr. Schultz, 2266, 2280.

Mr. Hill, 2710, 2711.

X.—CALF AND LAMB HOUSES AND YARDS.

(1.) *Yards.*1.—*Food, water, and shelter.*

Mr. Dempster, 39, 44.

The yards are not clean, and stock are without sufficient shelter, or food.

Calves and lambs are kept too long starving.

Mr. Oatley, 322, 473, and Mr. Jager, 985, 987.

The water in troughs was dirty, through Gilchrist's neglect. The troughs are too high for small calves to reach. When very young the calves are not allowed longer in the yards than forty-eight hours.

Constable Carroll, 1712, 1742.

Calves are very much neglected and starved; sometimes kept seven or eight days without food. They have sometimes died of starvation. Often too young to eat lucerne hay. The calf-sheds are very dirty in wet weather—have little or no protection.

J. Wickham, 1808, 1841, and J. Burrell, 2465, 2478.

Calves and lambs were at one time without proper shelter, but now better treated.

Some calves are too small to reach water-troughs, and get no drink.

XI.—PIG-YARDS AND PORK-HOUSES.

(1.) *Pig Yards.*I.—*Their form, construction, and drainage.*

Mr. Gilchrist, 1578, 1683.
Mr. Schultz, 2347.

The drainage is very defective, and overflows, making the lane dirty and offensive. It could be improved by open gutter and silt-pits.

Constable Carroll, 1753.

2.—*Food, water, and shelter.*

Mr. Jager, 988, 989.

Pigs are fed on corn, potatoes, and offal. They get lots of offal.

Constable Carroll, 1727, 1754.

They get offal and rotten potatoes. Offal is often brought from Sydney for pigs, but not so much recently.

Mr. Woodham, 1251, 1255, 1225, 1226, 1238.

The covering of the pig-pens is badly carried out. The roof is too high, and gives no shelter.

The floors should be asphalted.

He has never fed his pigs on offal.

3.—*Cleanliness of yards.*

Mr. Dempster, 51, 55, 119, 120.

Pig-yards generally filthy and offensive.

Constable Carroll, 1755, 1756.

Pig-yards generally filthy. Pigs never cleaned except when butchers do so. So offensive are they that people passing complain.

J. Wickham, 1826, 1839.

Complained of this to Mr. Oatley, but without effect.

Pig-yards are badly arranged, and so are drains.

Mr. Schultz, 2347, 2348.

The yards badly constructed and dirty. The pigs-yards should be on battens with asphalt underneath.

Mr. Flood, 2644.

The pigs are allowed to remain too long on Island.

They are a great nuisance. Ought to be kept elsewhere and only brought there for slaughter.

The pig-houses should be removed to another site.

(2.) *Pork-houses.*1.—*The killing-houses.*

The accommodation for slaughtering pigs is sufficient, but not a sufficient supply of hot water.

Mr. Woodham,
1224.

2.—*Supply of hot water.*

He thinks it would be better to heat water by steam ; appliances now decidedly defective.

A proper supply of hot water would be a great improvement.

There should be a steam boiler and pipes to each slaughter-house.

The water for scalding the pigs is never changed because there are not sufficient means for obtaining a fresh supply.

There are about 650 pigs killed weekly on Glebe Island.

A considerable number of pigs are sent to Sydney dead in winter.

Mr. Oatley,
315, 316.
Mr. Schultz,
2347, 2351.
Mr. Woolfe,
419, 433.
Mr. Woodham,
1229, 1242.

3.—*Housing and felling pigs.*

Thinks mode of felling and killing pigs cruel. If men miss their blow they only hurt the pig.

Think present system very good.

Mr. Dempster,
56, 57, 59
Mr. Oatley, 313,
314, and Mr. R.
Hill, 2712, 2713.

4.—*Scalding and cleaning.*

Describes American system, where sometimes as many as 15,000 pigs are killed in one day ; but ordinarily only 3,000.

Dr. Williams,
179, and 208, 210.

5.—*Cleanliness of pork-houses.*

If pigs are scalded in dirty water it is the fault of the butchers themselves. Inspectors have no power to prevent the use of dirty water ; but thinks it does not matter much, as the pigs are afterwards washed in clean water.

Mr. Oatley, 409,
416, and Mr.
Jager, 934.

Water dirty sometimes, but could not do it better. Pigs are at times washed with dirty water, and butchers wash the pigs with the same water as they wash their feet in.

The pork-houses are dirty through want of water.

The pigs are sometimes brown through being scalded in dirty water.

The killing is expeditious and cleanly, and the pigs white and clean.

Has been killing 130 or 140 every week, and keeps his slaughter-house quite clean.

The pork-houses were very dirty when he saw them.

Constable
Carroll, 1723,
1740.
Mr. Playfair,
1942.
Mr. Schultz,
2350.
Mr. R. Hill, 2713,
2717.
Mr. Woolfe, 418.
Mr. Maiden, 705
707.

6.—*Removal of pork-houses.*

It would be a great improvement to turn present pork-houses into sheep-houses, and re-erect pork-houses on a proper site and in a proper shape.

Mr. Oatley, 360.
Mr. Gilchrist,
1546, 1584.
Mr. Schultz,
2349.
Mr. Maiden, 705,
706, 707.
Mr. Woodham
1242.

Would not remove the pork-houses. A better site for them could not be found on the Island.

XII.—THE WATER SUPPLY.

1.—*Present supply.*

Cannot speak as to whether there has been waste of water.

There was a waste of water one night, but only for a very short time.

The beef was at one time washed with salt water.

Thinks there is now plenty of water on Island.

There is an abundant supply of water.

American slaughter-houses have an unlimited supply of water.

There should be an unlimited supply of water always available.

Mr. Jager, 1072,
1081.
Mr. Gilchrist,
1547, 1570.
Mr. Schultz,
2294, 2299.
Mr. Burrell,
2416, 2418.
J. M'Gill, 2498,
2501.
Mr. A. Stuart,
1888, 1889.
Mr. Walsh, 1803,
1804.
Mr. Elliott, 1832,
1836.

2.—*Completion of reservoir.*

Strongly urge completion. It would hold 1,000,000 gallons, and provide a supply should anything happen to pipes or works, and give necessary force to the hydrants.

Mr. Oatley, 368,
375.
Mr. Gilchrist,
549, 557, 1547,
1548.

3.—*Hydrant and hose for each house.*

Urge this.

Mr. Playfair,
1969, 1972.
Mr. Schultz,
2346.
J. Burrell, 2419,
2420.
Mr. Walsh, 1804.
Mr. Elliott, 1832,
1836.

XIII.—LIGHTS ON ISLAND.

1.—*Lights now in use.*

All American abattoirs are well lighted, some with gas, one with electric light.

Slush-lamps now used smoke, and give bad light. Gas would be a great improvement, and should be in all the houses.

Thinks there should be no killing after dark, and no occasion for lights.

The slush-lamps make the hands sick ; and work is sometimes carried on all through the night.

Dr. Williams,
228, 230.
Mr. Oatley, 350,
358, 417, 419.
Mr. Schultz, 2274
2293.
Mr. Jager, 1099.

1—D

The Mr. Woodham,
1127, 1228.

- Mr. Walsh, 1805, 1809. The fat used in the slush-lamps costs about four times as much as gas would. Gas is very much wanted all over the buildings.
- Mr. Elliott, 1826, 1831. Now uses kerosene, but would prefer gas.

XIV.—STATE OF ABATTOIRS AS TO CLEANLINESS.

1.—*Generally.*

- Mr. Oatley, 359, 360. The Abattoirs are in want of better drainage.
- Mr. Jager, 969, 981. The Abattoirs are better than they were some years back ; but there is room still for improvement. Complaints are still being made as to non-removal of offal.
- Mr. Swan, 1344, 1340. The buildings have been only once in two years whitewashed. Pig-pens and lambs are not cleaned every day.
- Mr. Gilchrist, 1449. Not so clean as they ought ; but there are too few hands.
- Constable Carroll, 1700, 1705. The houses are very dirty, especially the walls. They were not whitewashed for two years.
- Mr. Playfair, 1941, 1943, 1964, 1908. There are not sufficient scavengers, only four men to keep the whole place clean. It is not properly flagged and drained.
- Mr. Schultz, 2220, 2246, 2303, 2305. Some years ago he lost his health through noxious vapours arising from dirt and filth. The drains were foul, and sheep were up to their bellies in filth. The management was bad, and the lanes, floors, and houses were in a terrible state till the *Herald* articles appeared. Water-troughs not cleaned.
- J. M'Gall, 2430, 2437. Three years ago the state of the Island was very bad. Offal sometimes 48 hours not moved. It has been better since Mr. Swan came.
- J. Burrell, 2380, 2391, 2459, 2408. The Abattoirs are not nearly so bad as they were ; but still not first-rate. Preserved blood smells in wet weather, and there are bad smells from the punt and reservoir.
- Mr. R. Hill, 2724, 2732. The drains in front of beef and mutton houses are very filthy and not fall enough on them. The paunches a terrible nuisance. A stage should be erected for loading. The lane by pig-yard at times very dirty.
- Mr. Seymour, 2951, 2962, 3119, 3124, 2939, 2950, and Dr. Dansey, 3129, 3145. In 1878 the Abattoirs generally were very dirty, and especially where paunches were lying. There was something wrong with the punt. The place was in a frightful state. The blood ran into the bay, and was exposed at low water.
- Mr. Woolfe, 416. The Island is now generally as clean as could be kept.
- Mr. O'Connor, 1340, 1344. Does not think the Abattoirs well managed, but much better than formerly. Would make considerable alterations in the slaughter-houses.
- Mr. Rennie, 1595, 1599. Thinks Mr. Oatley performs his duty well as Inspector, but does not know as regards Mr. Jager.
- Mr. Elliott, 1843. The Abattoirs were never badly managed. Mr. Oatley has had too few labouring men under him—too many "officers" and too few "men."
- Thinks that latterly the place is better kept and that there are more men employed, who seem to try their best to keep it clean.

2.—*On special occasions.*

- Mr. Oatley, 716, 727. Whitewashed about a month ago, and the year before.
- Mr. Gilchrist, 1469, 1461. The men whitewashing worked on Sunday. The buildings were whitewashed about a month ago, and thirteen or fourteen months before, or perhaps two years.
- J. Burrell, 2399, 2435. One month ago, and also two years ago. Special preparation was made for visit of some gentleman some short time since.
- J. M'Gall, 2508, 2525. Twice—once one month ago, and once two years back. No special preparations were made for gentlemen a little time ago.
- W. Johnston, 2557, 2559. Overseers are now more strict in seeing that the place is clean.

3.—*As compared with other Abattoirs.*

- Dr. Williams, 230, 244. The Abattoirs are very good in Paris ; in Russia very crude ; in Paris well lighted, ventilated, and floored ; but better in America.
- Mr. Stuart, 1888, 1839. In Chicago, Abattoirs scrupulously clean ; there is there a full and constant supply of water.
- Mr. Schultz, 2307, 2378. In Tasmania slaughter-houses are better than here.

4.—*Correctness of "Herald's" reports.*

- Mr. Dawson, 160, 169. Consider the statements made in the articles in the *Herald* correct, and free from exaggeration.
- Constable Carroll, 1762, 1773. Mr. Schultz, 2361, 2362. J. Burrell, 2392, 2407. Mr. M'Gall, 2438, 2490. W. Johnston, 2555, 2556. Mr. Seymour, 3012, 3314. Dr. Dansey, 3156, 3164. Mr. Rennie, 1596, 1599.
- The place has been kept cleaner since articles appeared in papers. Houses should be limewashed every three months. The drains should be laid with better fall, and there should be an abundant supply of water.

XV.—INSPECTION.

1.—*Inspection of live animals.*

- Mr. Dempster, 16, 17. Says cattle so poor as to be unfit for food are slaughtered at Abattoirs.
- Dr. Williams, 218, 222. States that inspection is rigidly enforced in America.

Stock always inspected before being slaughtered. If cattle are slaughtered very early in the morning, they have been inspected on the previous day. Never knew of a cow calving in the yards, and being afterwards slaughtered; such cows invariably turned out. Cattle suspected of being diseased are slaughtered at once for inspection. Mr. Oatley, 391, 395, 405, 408, 441, 464, 634, 638.

Have condemned thousands, or rather hundreds, of cattle, which were found to be diseased when killed.

Did not see a very poor cow on a certain Sunday; but his assistant would have done so.

If cattle are killed, say at 2 and 3 in morning, his assistant inspects them.

If cattle are killed after 4 then the lungs and spleens are kept for inspection.

Has known instance of cow which had slipped calf being condemned. 391, 638

It is very rare that the carcase of a cow slipping her calf would go into consumption.

Sows littering in pens would not be slaughtered but sent away. Sows under such circumstances are never slaughtered.

Animals affected with Cumberland or pluro easily detected. Mr. Jager, 904, 907, 1112, 1124.

Cows which calved or slipped calves in yards have been slaughtered and sold for food.

Calves dropped at Abattoirs have been smuggled away to Sydney for slaughter.

Sows littering not interfered with. No clear understanding that there should always be some one in charge at Abattoirs.

Does not make poverty a cause for condemning meat.

His impression is that there is no inspection of cattle killed before 5 o'clock, unless of those that were in the yards the previous day. Mr. Swan, 1323, 1355.

Does not know of his own knowledge of a recently-calved cow, or a sow recently pigged, being killed for food. Mr. Gilchrist, 1517, 1521.

Has seen some very poor cattle killed at Abattoirs.

Has seen Mr. Jager taking the brands in the morning and in the evening and examining the melts.

Does not know of cows which have calved in the yards being slaughtered. Constable Carroll, 708, 710, 1668, 1682, 1732, 1736, 1769.

Has seen cows with very young calves brought in.

Diseased pork might be killed and taken away without inspection for food, as Mr. Oatley seldom goes into pig-houses.

Sows which have pigged are supposed to be killed for food.

Has seen a very wretched cow in the yard for slaughter.

Cannot say what becomes of cows which calve in the yard, but never saw them taken out; have no doubt they would be slaughtered for food; and sows littering in yards are slaughtered for food. J. Wickham, 1810, 1825.

Kills 2,000 sheep a week and Mr. Oatley never comes once to look at them. Mr. Schultz, 2247, 2263.

Has seen dead bullocks brought to Abattoirs.

One beast 4 hours without being dressed. Condemned by Mr. Jager, and afterwards passed by Mr. Oatley, about 2 years ago. 2357, 2318.

Dead animals have been brought, skinned, and taken away, about 18 months ago.

Quite impossible for one Inspector to do all inspection necessary.

Has known old boar pigs killed for pork and sold as sausage-meat.

Cattle are not condemned on account of poverty.

Sows which have had young in pens are slaughtered. J. Burrell, 2451, 2458.

Does not know what becomes of calves dropped in yards.

An Inspector with professional knowledge should be appointed, who would be competent to give proper opinion. Mr. Flood, 2616, 2619.

Questions who examines stock killed early. Chief Inspector should reside on Island. Mr. Hill, 2730, 2731.

Diseased and doubtful animals are kept back till Sunday night and killed on Monday mornings. F. Fagan, 864, 873.

Has to skin diseased animals or leave. One man lost his finger by disease.

Confirms all he formerly stated. A new case of cow with calf in yard with bullocks. Did not call either Mr. Oatley's or Mr. Jager's attention to this cow. Has no instructions to do so. J. Burrell, recalled, 743, 768.

Confirms former evidence. Cow recently in yard with calf. Calf taken away, and calf killed and sent to Sydney for veal. The cow was turned out to paddock, but died. Constable Carroll, recalled, 769, 781.

Saw a very poor cow in yards; but could not stop her slaughter. Had no power to do so. Mr. Oatley, 290, 294.

Saw the poor old cow brought for slaughter and boiling. Mr. Jager, 1017, 1026, 1031, 1035.

Saw cow calving, and Mr. Oatley told owner if she was killed she would be condemned.

Pigs which are too poor to kill are sold as stores. Thinks an Inspector should be appointed for the sale-yards. Mr. Woodham, 1283, 1287, 1366, 1388.

Thinks cattle should be inspected at sale-yards. Suggests that Mr. Bruce or Mr. Yeo should do the duty. Cannot see anything the matter with carcasses of newly-calved cows. Does not think fluke in the liver affects the mutton. Has never seen the carcase of an animal affected with Cumberland, or any other disease, at Abattoirs, fluke in sheep excepted. Has seen cattle apparently diseased sold in the yards. Mr. O'Connor, 1405, 1414, 1456.

2.—Of the carcase.

Has seen signs of pleuro in carcasses in shops in Sydney. Mr. Dempste 60, 63.

Inspection of carcase is rigidly enforced in United States. Dr. Williams, 219, 221.

Judges as to soundness by lungs and spleens, and general character of carcase. Mr. Oatley, 309, 321, 396, 405, 686, 693, 856, 859

Every pig is examined alive and dead by his assistant.

Frequently finds unfit pigs, and sends them away in offal-cart.

No diseased pig could be taken away for food.

Carcasses are sometimes removed on Monday morning without inspection, but lungs and spleens are kept.

It has never happened that his assistant condemned cattle that he has passed, nor that he condemned cattle passed by assistant; but Mr. Oatley has condemned cattle Mr. Jager was in doubts about.

Never knew a dead beast brought in and skinned, except cattle killed at Railway, or in paddock through having broken its leg. Impossible

- Mr. Oatley, 309, 859. Impossible for dead beast which had died of disease to be brought in without his knowledge. He examines lungs and spleens, and would know if they were affected with disease.
- Mr. Jager, 908, 928. He would detect Cumberland or pleuro from spleen and lungs. He would generally also have noticed animal in yard.
- 997, 1009, 1136, 1163. Incipient Cumberland would show in enlarged or rather engorged spleen. It is possible for the carcase of an animal in an incipient stage of Cumberland to pass without detection.
- 908, 1168. Does not think that a beast in the incipient stage of Cumberland would make bad meat. Cumberland disease is detected in carcase through the fat being high coloured and dirty, and the veins engorged with gummy dark blood.
- It is possible by washing and dressing to remove these appearances to a great extent. There was one instance of an animal which had died having been brought in and skinned and dressed for food, but only one. When opened it smelled very badly.
- Condemned and scored two carcasses, and left a third for Mr. Oatley's judgment, but when Mr. Oatley came the third body had been removed.
- Left Mr. Oatley with owners, and afterwards learned that out of the three carcasses two whole ones and the hind quarters of the third were sent to Sydney.
- The fore-quarters of the third animal were in a terrible state. They went to the pots.
- The animal from which a man died was stuck on the road and brought up and skinned. It was badly affected with Cumberland disease.
- He is not certain that the carcase of every animal slaughtered is examined.
- There never was any division of the work of inspection made between him and Mr. Oatley.
- Has seen dead cattle brought in and dressed. Does not know whether they were sold for food.
- Does not know whether every carcase is inspected.
- The carcasses of a few pigs may be taken away without inspection. Also a few calves and lambs but they have been seen before being slaughtered.
- The carcasses of cattle are not often taken away between 4 and 6 a.m., only a few.
- Mr. Oatley comes between 9 and 10 a.m.
- Assistant Inspector comes at 6 a.m. Sometimes carcasses of cattle are taken away before either Inspector or assistant is on the ground, without inspection at all.
- Has recommended to Mr. Oatley to appoint him (Gilchrist) as an Assistant Inspector.
- Pigs are killed at 2 in the morning and no one there to inspect them.
- Has seen bruised meat at Abattoirs—three or four carcasses greatly bruised—recently—and taken to town.
- Thinks the Inspectors saw this meat.
- Very little meat went to pots prior to articles in the "*Herald*."
- The very poor cow alluded to did not go to the pots.
- It would be quite possible to kill and take away carcasses both in the afternoon, after the Inspectors leave, and before they come in the morning—without inspection; as a matter of fact this is done.
- Often has seen cattle come in dead in carts; three came from Homebush. Mr. Jager condemned two which Mr. Oatley afterwards passed. These cattle afterwards went to Sydney for consumption. They were in a terribly bruised state and stank badly. Considered them unfit for food.
- Killed 2,000 sheep a week, and Mr. Oatley did not come near once a week. The Assistant Inspector dare not open his mouth.
- Dead sheep have been brought to Abattoirs as offal; and dead animals have been brought in and skinned and their carcasses taken away without inspection.
- Impossible for Assistant Inspector to take brands and inspect both cattle and sheep.
- Tumours and ulcers have been and are now cut out of stock without being detected by Inspectors, and meat sold for food.
- A few weeks back some very old cows were condemned.
- Sometimes very unfit sheep are sold for food: Bought by retail butchers, who look for cheap mutton.
- Has seen three dead cattle brought in and two of them condemned by Mr. Jager, and he believes they were all passed afterwards. Does not know whether animals brought in had been slaughtered or had died.
- Some cows dropped their calves in yards, and he supposes they were slaughtered like the rest for food.
- Has no orders to report cows or sows slipping young to Mr. Oatley or Mr. Jager.
- Has seen dead animals (those which had been shot) brought in, and Inspectors generally sent for.
- Has seen no diseased meat offered for sale at Abattoirs.
- Says the same; but has seen bruised meat offered for sale.
- Has seen two years ago bullocks badly affected with Cumberland dressed at Abattoirs. Mr. Jager condemned cow affected with Cumberland.
- Condemned carcasses generally sent to pots ten years ago; sometimes went to the shops.
- The meat of cattle slightly affected with pleuro is not injurious, and is sent to market.
- Cattle in last stage are unfit, and has seen Mr. Oatley cut such down.
- Has seen no case of Cumberland of late years; could not pass carcase affected with Cumberland; it is as black as your boots.
- Has seen dead pigs brought in to be dressed.
- The animal referred to had been slaughtered at Homebush, and brought to the Abattoirs to be dressed.
- Told Mr. Oatley it was a great mistake allowing meat he had condemned to pass,—i.e., the two carcasses and two hind quarters alluded to.
- Has seen very few diseased pigs in this Colony, and the ailment was only observable on opening them.
- Mr. Oatley is generally about in and out of the slaughter-houses.
- Has never seen measly pork in the Colony, but has at Home. The flesh has a kind of blotches on it—dark bloody spots. Has never seen typhus fever in pigs. Never heard of people becoming diseased by eating pork.

About the boar pig mentioned by Schultz, sausages could not be made from such a pig. What he said about smelling the boar is nonsense. Mr. Woodham
1288, 1382.

Has known Mr. Jager to take blood in the chest for liver, and Mr. Oatley pointed out his mistake. Has seen and assisted in killing a very great number of pigs. Never saw boar pigs killed and treated as stated by Schultz. The meat could not be chopped up. Mr. T. O'Connor
1389, 1441.

Does not believe the meat of a pregnant cow is unwholesome, and in some countries newly-born calves are used without bad results. Neither does he think ulcers or tumours in the throat affect the flesh. Knows of no disease, except Cumberland, which renders the flesh of stock in this Colony poisonous or dangerous, and is not certain that Cumberland is so when cooked. Mr. Stewart,
1462, 1467.

It is almost universally held in Europe that roasting and boiling destroy poisonous properties in diseased meat; but in Africa Dr. Livingstone found that cooking did not have this effect in cattle affected with peri-pneumonia.

Does not consider it likely that the flesh affected with Cumberland disease would be sold for food, as its appearance would prevent this. But the meat of an animal in an early stage of that disease may have some effect in producing carbuncle which was not known in human subjects in the colony till after Cumberland had spread among our stock.

Experiments should be made on dogs with such meat to test this question.

Desired to be re-examined by the Board in regard to carcasses said by some witnesses to have been passed by him after they were condemned by Mr. Jager, and stated he could prove they were condemned by him and did not pass into consumption. Mr. Oatley, 1600,
1609.

3.—Action in regard to unfit meat.

Unfit meat is scored and slashed. Has condemned thousands or at least hundreds, but kept no record. Three weeks ago condemned fourteen head. Mr. Oatley, 31)
321, 452, 4 8.

Says the same. Does not know what becomes of meat after scoring. Supposes it goes to the offal-cart. Authorities have no power to see it destroyed. It might go into consumption as sausages. Mr. Jager, 920,
1025.

4.—Inspectors' power to prevent cruelty.

Thinks the Inspectors at Abattoirs have power to prevent cruelty; but they do not exercise it. Mr. Dempster,
29, 30.

5.—Appointment of professional inspector.

Thinks a professional Inspector should be appointed. Mr. Jager,
1214, 1225, and
Mr. Flood,
2016, 2019.

XVI.—KEEPING, SETTING, AND DELIVERING MEAT.

1.—Meat stores.

It would be a great improvement if hides, hearts, &c., were taken away and nothing but meat left in meat stores. Mr. Oatley,
825, 827, and
Mr. Jager,
1197, 1198.

2.—Chilling and setting meat.

Meat is always set either naturally or artificially in America. Dr. Williams,
256, 258.

Meat now in summer-time leaves Abattoirs before it is set. It is in some cases even cooked with animal heat in it. It would be an immense benefit to all concerned if it could be set before it leaves the Abattoirs. Mr. Oatley,
829, 840.
Mr. Jager,
1199, 1204.

He believes it would be worth $\frac{1}{4}$ d. per lb. more if set.

Thinks that a room to chill and set the meat would be a grand improvement. Mr. Oatley,
840.
Mr. Swan,
1406, 1409.
Mr. Playfair,
2047, 2058.

Meat set and chilled would keep two days in hot weather.

The trade would all adopt chilling and setting, if done at a reasonable price.

Meat is now sold quite warm on Monday morning—say two hours after animal is killed.

Thinks meat will set better in butchers' shops in the city than at the Abattoirs during the night.

If proper appliances were had, meat could be chilled on Glebe Island better than anywhere else.

Considers a chilling-house should be added to Abattoirs.

Better for all—for wholesale and retail butchers, and also for the public.

If meat were set before being put into the truck it would keep very much longer.

Meat now sent to retail shops is unset, and therefore unwholesome.

If there were proper appliances for chilling and storing meat, cattle might be killed instead of being kept starving and wasting in paddocks. Mr. Shultz,
2328, 2341.
Mr. Flood,
2610.
Mr. Hill,
2707, 2706,
2708.
Mr. Dawson,
236, 242.
Mr. Penny,
320, 323.
Mr. Woolfe
458, 602.

Meat now leaves Abattoirs quite warm, often not more than 10 minutes after it is killed and dressed.

Chilling store at Abattoirs would be a great benefit to the trade.

Meat chilled and set would keep one and a half or 2 days longer.

If meat were chilled and set before being placed in the trucks, and the trucks built on the non-conducting principle, it could be landed in Sydney from Dubbo or Wagga Wagga without any ice even in summer-time; and the temperature of the truck would be only 5° or 6° higher when it reached Sydney than when it left either of these places, if it left late in the afternoon and arrived early in the morning. Mr. Farquhar,
1052, 1169.

The cost of setting and chilling to 48° or 50° would be about 3 $\frac{1}{4}$ d. per 100lbs.

When brought to Sydney, the meat in hot summer weather would keep two days; and if reduced to and kept at 35° or 36° in a cold store it would keep 14 days.

Thinks chilling the meat would increase the price very much but it would be much better if there were a chilling-house to kill stock and store them there than to keep them starving in paddocks; and that if it could be done it would be a great improvement to set all the meat before sending it from Abattoirs. Mr. Woodham,
1267, 1362,
1367.

Slaughters about 140 cattle a week. Has now to send away the meat in summer-time quite warm. Can't help himself. Mr. Rennie
1493 1510.

Thinks the meat would require too much handling to chill it; but if it could be done at slaughter-house it would be an improvement. It would then keep longer and better. Kills

- Mr. Walsh, 1681,
1698. Kills 200 a-week. Has sometimes to send the meat away warm, especially on Monday mornings. In hot weather it never gets cold, and hot meat never cuts up well, nor is it liked by the public. Chilling is not an actual necessity, but it would be a great improvement. If meat could be chilled and set at 3½d. per 100 lbs. he and every other butcher would patronise the chilling-house. In warm weather it would pay to give six times that price.
- 1801.
- Mr. Elliott, 1844,
1850. Does not think a chilling-house would be much advantage unless it could contain a week's supply. He has now at times, and particularly on Monday mornings, to send his meat away quite warm.

3.—*Delivering meat.*

- Dr. Williams,
260, 261.
Mr. Oatley, 841,
846. Meat in America, while being delivered, is hung in waggons. Rennie and Williams have provided waggons of a greatly improved sort, in which the meat is hung. He sees to the cleanliness of carts now used. Has no power to compel butchers to use conveyances of proper sort. Formerly both carts and men were very dirty. They are now greatly improved. Men and carts very dirty. Clothes never changed; the same they have been killing in. Does not exactly approve of delivery, but thinks carts in most cases more convenient than waggons, on account of smallness of orders. The carts not too clean; but they are not so filthy as the clothes of the men and the covering. Rennie and Williams' waggon is a great improvement. Both carts and rags filthy. Has called attention of Town Council to this. Now as bad as ever, except Rennie and Williams. Present mode of packing warm meat into cart, the one piece on top of other, must make meat bad. Thinks there ought to be a reform in the mode of delivering the meat. Their firm have introduced proper waggons, and with the exception of Mr. Richards', theirs is the only proper conveyance in the city for meat. Considers waggons such as used by Messrs. Rennie and Williams the proper conveyances for meat, but there is no room for them at the Island, the lane between the meat-houses being too narrow. Thinks the van introduced by Messrs. Rennie and Williams not so convenient nor so likely to protect meat from dust and dirt on the road as the carts now in use.
- Mr. Gilchrist,
1649, 1653.
Constable Carroll
1717, 1719.
Mr. Playfair,
1841.
- Mr. Hill, 2733,
2736.
- Mr. Seymour,
2966, 3016.
- Mr. Woolfe, 471,
490.
- Mr. Woodham,
1381, 1382.
Mr. Rennie,
1484, 1490.
- Mr. Walsh, 1752,
1766.
- Mr. Elliott, 1857,
1863.

XVII.—DEAD MEAT TRADE.

1.—*Advantages.*

- Mr. Dawson, 170,
263. The great reform would be to kill the meat up the country and send it to a dead meat market. The Corporation or Government should erect a large dead meat market in a central position, say near the Haymarket. Glebe Island would be out of the way as a site. If meat were killed up the country it would be suitable for salting, which now it is not.
- Mr. Maiden, 634,
677. The dead meat trade is likely to increase, and with refrigerating cars could be carried on all summer. This trade will have to contend against old establishments. Butchers will not buy country meat if they can get cheaper at Homebush. Thinks a dead meat market, with proper appliances, would be a very great advantage. It is a necessity—all classes would be benefited. Thinks there should be slaughtering places up the country. That the city should be principally supplied with country-killed meat. That meat as now killed and dealt with is unwholesome. The best beef in Philadelphia market is farmers' beef—country-killed and sent 240 miles. This beef is very much in request. Meat brought 1,500 miles is better than that killed in Philadelphia, but not so good as farmers' beef. No special carriage is required for conveyance of meat 100 or 150 miles; but it is for such long distances as Chicago, 1,000; St. Louis, 1,200; Arkansas City, 1,700. In these cases special carriages with ice are necessary. The temperature is kept at say 30 degrees, or as near it as possible. The air is kept cool and dry. These cars are not very expensive. Large quantities of chilled meat, fruit, &c., are sent regularly to England from America every week by the same means. There is no dead meat market in Sydney, but it would be of great advantage. Would be a great advantage, but might throw the trade into hands of big butchers. Is in favour of dead meat market. Sale-yards should be near the metropolis, and close to Abattoirs. As the sale-yards and Abattoirs now are there is a monopoly, and has been for years. He would send his cattle to Abattoirs for slaughter if there were a dead meat market and proper appliances. He would thus obtain good returns for his meat, and also for hides, tallow, &c. The Abattoirs should of course be connected with the railway. From what he saw at Chicago he would recommend this course. A dead meat market would be an immense advantage. There is nothing so much required. Thinks a dead meat market ought to be a matter for private enterprise more than Government. Glebe Island would make an excellent dead meat market. Thinks a dead meat market would be a very great benefit and convenience. Glebe Island is too far distant as a site for a meat market,—except for wholesale. Arrangements for chilling and keeping meat would be a very great improvement, for it would save the condition and prevent the starving of the stock. Does not think Glebe Island would be a good site for sale-yards, as the butchers would be able to cause a "knock out."
- Mr. Dempster,
132, 133.
- Dr. Williams,
180, 200.
- Mr. Oatley,
584, 680.
Mr. Stuart,
1875, 1876.
Mr. Flood, 2613,
2633.
- Mr. R. Hill,
2768, 2780.
- Mr. Devlin,
2389, 2920.
- Mr. Seymour,
2993, 3081.
- Dead meat market would be most advantageous to all classes, especially with appliances for chilling, setting, and keeping meat. Has no difficulty with fish market, and meat market might be managed the same way.

The fat stock trade is fast coming to be a dead meat one.

Mr. Dawson
132, 297.

When it does the meat will be far superior,—and this trade would also tend to increase railway traffic. The dead meat will some day be the most important branch of the railway traffic. As it now is the stock are very much deteriorated through coming by road and killed while fevered.

Every class would profit by slaughtering up country. The meat would be infinitely better, waste in weight would be saved, and the sending back empty trucks would cease as goods could be carried in meat trucks.

The treatment cattle now get between Homebush and Abattoirs deteriorates the meat very much. Hardly knows stock again after they have been in bare paddocks; and when killed the meat is quite black.

Mr. Punny, 318
375.

Wishes he could always get country-killed meat—must be the best every way.

Thinks that a system of killing up the country would be much the best, and suit retail trade best.

Glebe Island meat will not bear comparison with Orange or Bathurst beef.

Mr. Woolfe, 424,
457.

The reasons are the stock are killed near where they are fed; they are killed cool and are allowed to cool and set.

He thinks that the trade will have to come to a wholesale dead meat market,—which, with cooling appliances, would be a vast benefit to everyone.

Now gets all his meat from Orange; used to buy cattle at Homebush, and slaughter. Present wholesale dead meat market is on Glebe Island.

A dead meat market would work quite a revolution in the trade. Considers such a market absolutely necessary. It would be a great benefit to producer and to consumer.

Mr. Farquhar,
1055, 1115.

It would be cheaper to consumer to pay even 1d. per lb. more for such meat than that he now gets.

Glebe Island is a convenient place for a wholesale dead meat market.

Mr. Woodham,
1336, 1330.

Mr. Walsh, 1704,
1763.

2.—Disadvantages.

Is afraid that the slaughtering up the country would lead to a monopoly. Then there would be the hides and skins also to bring down.

Mr. Stuart, 1875,
1885.

Killing up the country is the best so far as meat is concerned; but thinks it would not be the most economical.

Doubtful also of certainty of cold appliances being always available; and upon that depends practicability of scheme. Large cold storehouses in Sydney also necessary.

A dead meat market would bring the whole trade into one or two people's hands. Everyone would not have refrigerating machines.

Mr. Playfair,
1944, 1950.

Such a market would be an inconvenience for small butchers. It would lead to monopoly.

Mr. R. Hill,
2708, 2730.

Does not think a dead meat market would answer in the summer-time, unless cold appliances were available. If they were it would be a success.

Mr. Rennie,
1511, 1528.

He does not think country-killed meat better than meat killed in Sydney. The report that it is better is only a cry; and unless cattle were killed and chilled at every station the meat would be no better than Sydney meat.

Does not want to see a dead meat market. He would decidedly oppose it. The present supply of country-killed meat is a good thing for the retail butcher, but bad for the wholesale—while the public get no benefit.

Mr. Walsh, 1699,
1707.

The meat will not be cheaper; for although the retail butcher gets his meat cheap that does not oblige him to sell it cheap to consumers.

Country meat is not better; for it is impossible now to find enough of stock at any one station to supply Sydney. If railways were extended from Sydney to Liverpool Plains then a supply might be obtained.

3.—Refrigerating cars.

The American refrigerating waggons are 8½ feet wide, 30 feet long, and 9 feet high, built double, with some non-conductor between, and double doors. Raised box on top along the whole length, 2½ feet wide and 1¼ feet deep as an ice-box. Air goes into box, passes over ice, and only escapes at bottom. Temperature aimed at 35°; meat carried in ordinary goods train; taken from railway cars in waggons lowered in temperature by ice; delivered in stores, looking as if it had only been killed the night before, after coming 1,000 or 1,200 miles.

Dr. Williams
193, 271.

In America there is abundance of natural ice, but ice is made where natural ice cannot be obtained.

The "Tiffany," the newest refrigerating car—a car cooled (by evaporation), *i.e.*, by discharging water over it—the water being raised and distributed over the car by a pump, driven by a fan in front of car—is in use in England, but that plan only reduces the temperature some 8° below the normal temperature of the day.

If cars could be made to carry meat sweet in summer from Orange and Wagga to Sydney it would be a very great benefit.

Mr. Playfair,
1948, 1950.

But he thinks that cattle brought by rail would make as good meat as those killed up the country.

If meat could be conveyed in refrigerating vans in summer it would be a tremendous advantage.

Mr. Hill, 2730

It would be expensive to cool and set meat in refrigerating cars; but that is not necessary, for if the meat were chilled and set at up-country stations where killed, and put into a non-conducting (a double-sided) car, it could be carried in the summer-time from Wagga or Dubbo to Sydney without any ice.

Mr. Farquhar,
1065, 1177.

Carcases have been conveyed in that way from Bowenfells in the hot summer months, and when the truck arrived in Sydney there were only a few degrees difference in the temperature at which it arrived in Sydney from that at which it left Bowenfells.

4.—Cold storage.

In America each Company engaged in the dead meat trade has its own cold stores, and railway-cars are drawn there on tracks, *i.e.*, rails, by mules.

Dr. Williams
273, 274.

It would be very much better to kill cattle and put bodies in cold stores than keep them in starving paddocks. It is not done because there are no such stores, at any rate not open to the public.

Mr. Playfair,
1930 2000.

Wishes the Government would erect such a store on Glebe Island. It would be a great benefit to the trade. Not likely that a private Company would start cold or ice making.

Any

- Mr. Flood, 2634, 2635. Any mode of keeping meat cool would be an immense advantage.
- Mr. Dawson, 255, 256. Thinks it an essential part of railway plant to have refrigerating cars and cold store.
- Mr. R. Hill, 2,708, 2765. Thinks this more a matter for private enterprise than for Government.
- Mr. Seymour, 3044, 3084. A cold room attached to the fish market would be very useful.
- Mr. Farquhar, 1101, 1110. It would be necessary for this trade to have refrigerating power at the central depôt. The meat must either be disposed of instantly or have cold storage.
- It would be necessary to have sufficient chilling power to keep a supply in hand lest anything should interrupt regular supply.
- If meat is kept at a temperature of from 40° to 50° it would be good for eight days, and beyond that if it is subjected to lower temperature, *i.e.*, fourteen days, at 35°.

XVIII.—BUTCHERS' SHOPS.

1.—*Their suitability.*

- Mr. Seymour, 2974, 2979. The shops are as a rule unfit for the business. There are not more than 30 or 40 out of 156 that are suitable.
- Some are exceedingly unsuitable, and their back premises by far too small.
- Mr. Dawson, 173. Butchers' shops are not properly built. The meat is now exposed to dust. It should be hung in a back room.
- Mr. Penny, 298, 298. The shop he then had does not afford the convenience he requires. He is building one on an improved plan, with cool chamber for meat, 26 feet by 23 feet.

2.—*Cleanliness.*

- Mr. Schultz, 2281, 2283. There are some butchers' shops in Sydney which are not fit for a human being to go into.
- Mr. Seymour, 3011, 3043. The butchers' shops are much improved in cleanliness since *Herald's* articles.
- They are now comparatively cleanly. One man has been repeatedly fined for dirty premises.
- Dr. Dansey, 3170. The butchers' back premises in some cases are filthy and dirty, and their sausage-machines in the same state.

3.—*Their Inspection.*

- Mr. Seymour, 2981, 3041. An inspection of these premises is kept up. Has found more than one butcher with unfit meat on his premises—particularly where sausages are made. Meat too poor, thin, and yellow, and unfit for human food is used at these places. There should be an Inspector of Food appointed, with power to enter premises at any time. Inferior and unfit meat is slaughtered illicitly on premises by some town butchers, and veal is blown by others.
- Dr. Dansey, 3045, 3198. Has inspected butchers' shops, and often found blown veal and lamb and stock too poor for food, also sheep with flukes in liver, and with tubercular disease.

4.—*Hawking meat.*

- Mr. Seymour, 3125, 3128. Found the conveyance for carriage and hawking of meat suitable, and meat good, clean, and in nice order.

XIX.—ILLICIT SLAUGHTERING IN THE CITY.

1.—*Its extent and necessity.*

- Mr. Flood, 2636, 2638. A very great deal of this in the city—for 1 calf killed at Abattoirs 100 killed in the city.
- Mr. R. Hill, 2754. A return of calves sold and of those slaughtered at Abattoirs would prove this.
- Mr. Seymour, 3020, 3036. Believes it is carried on all over the city.
- Mr. Penny, 335, 390. Is sure there is much of it—perhaps 1,200 head killed a year. Cannot as the law stands prevent this. The existing law is almost wholly useless. Cannot say that there is any actual necessity to kill in town.
- Admits that lots of calves and lambs are killed in the city.
- It suits better to kill on premises.
- If allowed in the city greater inspection of premises would be necessary.

2.—*Advantages of slaughtering in City.*

- Mr. Playfair, 2059, 2070. Glebe Island too far away to slaughter calves and lambs at it. Butchers could not afford to send there to kill a single lamb or calf, and people do not give their orders for lamb or veal till the last moment.
- Would not advocate licensing places in city unless the premises were suitable—not unless the premises were properly flagged and drained.
- It is not the slaughtering that makes the nuisance, but because butchers now stow away offal somehow.
- Where the butchers have proper places they might be licensed or some central places in the city might be licensed where small stock might be slaughtered.
- In London places are licensed.
- In Melbourne, where nearly ten times as many are killed, some three or four butchers have the whole trade, and small stock are killed at the Abattoirs; but trade differs here. Whichever way is adopted here the places must be fit and the supervision very strict, or we shall have outbreaks of fever.
- Mr. Seymour, 3001, 3091. Giving permission to slaughter on premises would do away with much of the evils of the present system.
- With proper supervision, and the premises being fit, he would allow the slaughter of small stock on premises.
- Would take away a butcher's license, *i.e.* the license for the premises, if he were convicted three times.
- The premises should be open at all hours for inspection.
- Dr. Dansey, 3184, 3204. In one of his reports he spoke of the difficulty of finding room at Abattoirs, and pointed out that if places were to be established for killing in the city they must be under strict supervision.
- There would be no harm in having killing-houses in the city for small stock, but there would be considerable difficulty in keeping them clean.
- If

If proper places were erected, and there were proper supervision, small stock might be slaughtered in the city. Mr. Penny, 337, 373.

This would tend to supply veal and lamb of the best quality. He says that the carrying and handling of meat is prejudicial to it.

Says the same as Mr. Penny. Half the butchers in Sydney have unfit premises. Mr. Woolfe, 445, 505.

Lamb brought over in carts from Abattoirs looks unfit to eat.

Thinks that slaughtering of small stock might be allowed in the city on suitable premises. Mr. Woodham, 1346, 1861.

3.—Disadvantages of killing in city.

Better not to allow killing in city. There is a great risk that the premises would not be kept clean—difficult to enforce the law. Mr. Flood, 2039, 2053.

Would rather refuse to sanction such a law.

The best way to prevent illicit slaughtering would be to prevent stock from being on the premises.

There being a difficulty in supervising such places, killing in the city should be prohibited altogether.

Would keep all killing out of the city, especially as there is so suitable a place at the Abattoirs. Mr. R. Hill, 2755, 2760.

No occasion for killing in the city. Might be done in city if Inspectors did their duty. If they did the Abattoirs might be as clean as this building.

Is sure that, with proper appliances at Abattoirs, and means of cooling and setting the meat, small stock might be killed there, and the veal and lamb would in that case be more wholesome than if killed in the city. Mr. Seymour, 3023, 3111.

The only necessity for killing in town is that the small stock cannot be brought from Abattoirs as wanted. He believes small stock could be brought (without damage) in proper carts from Abattoirs.

He submitted regulations to Town Council, prohibiting the keeping of small stock in city, with a view to stop killing in the city.

If the law prohibited keeping stock on butchers' premises illicit slaughtering could easily be put down.

There is danger of small stock kept on premises being starved; for there is only one butcher's premises (Mr. Playfair's) where proper provision is made for feeding small stock.

Is sure that the practice of killing small stock in the city is detrimental to public health. Proof in case of fever at Croydon, in England. Blood attaches itself to sides of drains and does not wash away. Mr. Danscy, 3182, 3212.

There would be far greater difficulty in getting rid of blood and offal in the city than at the Abattoirs.

More Inspectors would be required. The only difficulty in killing small stock at Abattoirs is that there is not sufficient room.

The butchers say the meat would be deteriorated by being conveyed from Abattoirs; but he is of opinion it would take no harm if properly carried and hung as in the new vans.

Illicit slaughtering could be prevented by prohibiting stock from being kept on premises, and giving Inspectors power of entry. Mr. Dawson, 264, 270.

As it is difficult to enforce inspection, as drainage is bad, and as butchers' premises are in most cases unfit, killing in town should not be allowed.

It would be a great inconvenience to have to go to Glebe Island to kill a calf or lamb. But putting the inconvenience out of view there is nothing to prevent their being slaughtered there and conveyed to the city. Mr. Woolfe, 503, 504.

XX.—DISPOSAL OF BLOOD AND OFFAL.

(1.) *The Blood.*

1. *Former modes of disposing of it.*

1st. Run into Harbour.

2nd. Sent to Callan Park

3rd. Sent to Botany

} very costly.

Mr. Oatley, 475, 489, 495, 644.
Mr. Moore, 1226, 1289.

2. *The present mode of disposing of it.*

The present system of coagulating the blood with caustic soda and lime is a perfect failure and a source of nuisance. He and his assistants have furthered the process as far as possible. It is prepared in two ways, soft and dry; most valued dry; 10s. per ton has been offered for it dry. It is now sold at 2s. 6d. per load, whether one or two horses, while it costs £2 12s.; about one-half of the blood is dealt with in this way; the other half is sent away in the punt. Mr. Oatley, 347, 353.

He suggested to the Treasurer that it should be all sent to sea in a punt, as it would cost only about 1s. per ton to take the quantity now coagulated out to sea, with the rest and offal.

No analysis was ever made of blood manure as prepared by Mr. Swan, so far as he knows.

The only test is the price it brings; could not get 5s. per load, and had to reduce the price to 2s. 6d.

Part of the blood is dealt with by Mr. Swan with lime and chemicals, which in a few hours makes it into a coagulum, manageable with a shovel. Mr. Jager, 1049, 1070.

Portion of this is dried on rocks. If weather is wet this smells badly. The preparation costs about 27s. per ton, and sells for 2s. 6d. The rest of the blood passes into drains and thence to the punt, and is taken to sea at 1s. per ton.

Before the punt came he prepared from 22 to 28 tons per week; since then 16 or 17 tons, at a cost of about 17s. 6d. per ton. The chemicals used are caustic soda and lime. Has tried alum, but that spoils it for manure. Mr. Swan, 1290, 1422.

The lime and caustic soda mixture has been tested and makes the grass grow well.

He had an analysis of blood preparation, but lost it.

The present system of coagulating blood and selling it is attended with considerable loss.

When Treasurer he approved of Mr. Swan's mode of dealing with the blood after full inquiry.

Considers that the caustic soda is prejudicial to the manurial qualities of the blood. But does not consider any evidence he can give of much value. A. Gilchrist, 1597, 1605.
Mr. Stuart, 1858, 1865.
Mr. Elliot, 2225, 2229.

In wet weather the preparation of blood drying on the rocks smells a little.

The blood operated upon by Mr. Swan was offensive, and his preparation did not seem to have the desired effect. J. Burrell, 2459, 2460.
Mr. Danscy, 3165, 3169.

Evidence shows blood could be taken outside the Heads at 1s., while at lowest calculation the coagulum now costs 17s. per ton.

(2.) *The Offal.*1.—*Removal from killing-house.*Mr. Oatley,
345, 309.

There is frequently a block between the offal, and butchers' hide and skin drays. Butchers' drays keep the men from removing the offal. The consequence is the offal is allowed to accumulate and become offensive.

Mr. Jager,
991, 995.

The offal, as a rule, is removed daily—sometimes small portions are not; but always on the following morning.

Mr. Swan,
1317, 1419.
Mr. Schultz,
2209, 2352.

Offal is removed twice a day. What is made after 3 remains until following morning.

It takes skin drays a couple of hours to put on a load of skins, and while the dray is there the men cannot take away the offal.

Mr. Hill,
2777.

The use of trollies for removing offal would obviate the difficulty which now occurs with respect to skin and offal drays, and enable the place to be kept clean.

Mr. Maiden,
713, 716.

There are very bad arrangements at sheep houses for drays to take offal away, and a waste of time.

2.—*Removal by gardeners and others.*Mr. Dempster,
69, 74.

Has seen offal going away in carts to feed pigs—principally paunches.

Mr. Oatley,
808, 870.

Paunches and other offal are taken away principally for feeding pigs. The paunches sometimes accumulate in bad weather and become offensive.

Mr. Carnes,
2578, 2599.

A great quantity of offal is carried through the Municipality of Leichhardt for feeding pigs, and is a very great nuisance.

It is also used for feeding poultry and ducks.

Mr. Hill,
2727 and 2770.
Mr. Flood,
2647.

The paunches are thrown into a very inconvenient place for the gardeners to load—should be put on a stage; if it were, gardeners would take it all away daily.

Mr. Oatley,
1000, 1002.

Very bad smells at times from piggeries and boiling-down establishment at head of bay, to which paunches and offal are largely taken.

Mr. Oatley,
1634, 1635.

Suggests that a receptacle higher up on the hill be made for paunches and offal, to admit of gardeners and others carting away more easily.

(3.) *Both blood and offal.*1.—*Removal by punt.*Mr. Oatley,
528, 865.

Both blood and offal are now sent away by punt. The whole of the blood could be sent away at a very trifling cost. Punt towage and men employed on punt cost about £700 a year.

Offal is carted to a shoot, from there it passes into a truck, and thence into a punt.

He recommended building the punt—the punt should be taken 4 miles outside the Heads before being emptied. There have been complaints made that the contractor did not go proper distance. He does not think offal is allowed to remain so long as to become offensive before sending it away in the punt. Complaints have been made about stench from punt in harbour. The punt goes out four or five times a week. He has made application for a second punt.

The washing water and blood not dealt with by Mr. Swan passes by pipes into a large reservoir, and thence by shoot into the punt.

Mr. Jager,
990, 1001.

Thinks the punt an admirable way of getting rid of offal and blood; but that the arrangements for putting the offal on board are inconvenient. They were made by Harbour and Rivers Department. As a rule the offal is removed daily to the punt. The punt carries offal and blood at about 1s. per ton. It would cost about 20s. a week more to send the whole of the blood to sea.

Mr. Swan,
1357, 1412.
Mr. Gilchrist,
1462, 1609.

Says duties connected with punt are improperly divided between him and Gilchrist.

Sometimes through bad weather the punt cannot be taken outside the Heads. This does not happen often. It has done so half-a-dozen times since punt began to work. When it does, offal and blood are stored on Island.

Mr. Gilchrist,
1462, 1609.

When punt cannot go outside the men are instructed to take it to Watson's Bay or Middle Harbour, or to bring it back to Island.

Although men denied having discharged offal to westward of Sow and Pigs, he had found some of it about Manly.

The mode of discharging offal is not good; but as there is only one punt it cannot be laid up for alterations.

One punt not sufficient.

Have not sufficient towage power; system of towage defective.

The towage of blood and offal now costs about 7s. per ton.

Have only had three complaints about nuisance arising from punt or offal-boxes. These were occasioned by accidents to punt or offal-boxes.

The whole of the blood and offal might be sent out to sea for a trifling additional cost.

Constable Car-
roll, 1743, 1761.

Has known offal kept three days at shoot till it fermented and became a terrible nuisance. On two occasions this happened, and the men had to handle it in this state.

The punt is badly managed; Mr. Swan cannot get it when wanted. He should have charge of it.

When punt is delayed the blood remains in reservoir and becomes very offensive.

The defect in offal-box could be easily remedied.

Mr. Skimmer,
1916, 1917.
Mr. J. Burrell,
2465, 2400.
Mr. H. B. Swan,
943, 946.

The reservoir for blood smelt fearfully lately through not being properly emptied and cleaned out. The nuisance lasted from Thursday to Monday; this was through neglect on the part of Swan or Gilchrist.

Says it costs 1s. 4d. per ton to take blood and offal to sea.

2.—*Desiccation and utilization of blood and offal.*

The Harbour and Rivers Department is preparing a plant for desiccation on a plan submitted by Mr. Swan. It will be ready in about three months. Mr. Oatley, 698, 812, 713, 730, 868, 867.

Thinks the plant he is getting prepared will deal successfully with both blood and offal, and make a valuable manure to sell at about £4 per ton. The price is for dried blood only. £2,000 has been voted for its completion. Mr. Swan 1301, 1427.

He gets, latterly, every assistance in the performance of his duties. Formerly there was jealousy and obstruction.

He thinks the Government would get £8 a ton in the country for the manure he is going to prepare. It is worth £10 or £12 in the North of England.

He described the principle on which his proposed plant is to work. The Harbour and Rivers Department prepared plan of plant under his directions. All his own invention. He has never seen plan of plant used in America.

When plant is prepared he will be able to take all the blood and offal—say 9 or 10 tons weekly. The cost of desiccation will be about £1,000, and the return about £2,500.

Thinks the blood and offal could be more economically dealt with by taking it out to sea than drying it for manure. He approves of plan of drying *blood*, but thinks *offal* can never be dealt with. Has tried drying offal in a small way in his own engine-house without success. Mr. Gilchrist, 1497, 1610, 1618.

£2,000 having been voted, he was then making experiments with the view of carrying out Mr. Swan's suggestion; but had previously suggested sending blood and offal to sea by punt as a temporary means of removing the nuisance. Mr. Skinner, 1904, 1920.

The plant which is preparing is only on a small scale. If successful it can be utilized on a larger. Will be ready in a month or so.

Cannot say if Mr. Swan's plan will succeed. Thinks blood will be dealt with successfully, but is doubtful as to offal.

Complains of obstruction in carrying out his work, and a desire on part of persons on Island to filch credit belonging to him. Mr. Swan, 2569, 2573.

Promised to send in written statement of obstruction.

Submitted plan and specification of plant, which he had laid before Sir John Robertson nearly two years ago. Produced sample of dried blood in powder. Mr. Harrison, 2672, 2681.

Thinks he could deal in the way he proposes with both blood and offal at Abattoirs, and make a profit of £30 a week.

The plant would cost from £1,500 to £2,000.

Plant is self-acting, and requires but little labour.

There did not seem to be sufficient accommodation being erected for Mr. Swan's plant and the storing of prepared blood when desiccated. Mr. Hill, 2700, 2731.

Thinks the Government should long ago have sent to Europe or America and obtained information for suitable plant for desiccating blood and offal. Mr. Flood, 2609.

Thinks Mr. Swan's plan—if his statements be correct—should be carried out, and should have been so before. Mr. Maiden, 680, 699.

The plant now in course of erection is only small, but will make the experiment.

Expects to get £4 per ton for manure, when prepared.

The cost of preparation will be about 19s. 6d.

Will send in statement to Board showing this.

The offal will be conveyed to desiccator by horse and cart.

Expects Mr. Swan's new machinery to be ready for trial to-morrow.

It would deal with about $\frac{1}{3}$ of the whole of the offal and blood.

Mr. Oatley,
1631, 1634.

3.—*System of desiccation followed in America.*

Both at Chicago and Philadelphia blood and offal are removed,—the former in waggons, and the latter in boats—to places to be dealt with, in tight-fitting receptacles. Dr. Williams, 171, 201.

He submitted copy of Mr. A. Morris' report as to this system from Philadelphia Exhibition of 1876.

At Chicago the blood is dried, while the offal is triturated—pulverised—in a mill, dried, and then mixed with dried blood, bagged, and sold to go all over the States. All sorts of offal are treated in this way, even swines'—the hardest to deal with of any; and the Abattoirs are kept thoroughly clean. Mr. A. Stuart, 1890, 1903.

If the same plan were followed here, Government would easily find a market for exportation; but it ought to be retained in the Colony, to help to recuperate land—such as the worked-out soil of the county Cumberland.

Plans and specifications could be got of plant in use in America for dealing with blood and offal.

The result of his inquiries confirmed him in the belief that our blood and offal can be profitably utilized.

It would be best to get plans in America, though in Paris something of the same kind has been successfully carried out.

In Chicago the sale of desiccated blood and offal pays expense of Abattoirs, sold at about £3 3s. per ton.

4.—*Mr. Elliott's statement.*

Dried blood worth here from £6 to £7 per ton.

He cannot say as to value of offal. Offal is difficult to pulverize. If it were pulverized it is worth as much as blood. Mr. Elliott, 2170, 2224.

It is hard to get farmers to purchase and use manure.

His firm tried to dry blood, and did not succeed in a way to pay; but with proper plant and a certainty of tenure and supply of blood he thinks the thing would pay.

There is about 80 per cent. of water in the blood, and the preserved blood would be about $\frac{1}{3}$ th.

A

A ton of dried blood would occupy about the same space as a ton of wheat.
If Government were to guarantee occupation and supply of blood it would pay to erect works.

XXI.—SHIPPING WHARF AND YARD.

Accommodation for shipping cattle from Island to be put on board mail-steamer is urgently required. Cattle now thrown down, tied, and carried on board, and are almost always injured and sometimes

Mr. Playfair,
1921, 1940, 2041,
2043.

killed.

There should be a proper wharf with convenient yards—forcing-yard and crush—from which the cattle could be slung on board the small steamer, tied up, and taken to mail-steamer. Owners would willingly pay a fee for the convenience.

Mr. Flood, 2624,
2628.

Was the first to ship cattle in this way and found it answer.

Mr. Jager, 1049.

Thinks near the old ferry would be a very suitable place for shipping cattle.

XXII.—THE RECEIPTS AND EXPENSES.

1.—*The receipts.*

Mr. Oatley, 570,
648, 886, 887.

Thinks the amounts received for rental of beef-houses £200, and mutton-houses £125, good rentals. Submitted a statement of receipts and expenditure.

His assistants collect money for manure and fees for stock.

Mr. Jager, 1125,
1135.

head.

The receipts of Abattoirs, £3,100. They would be increased 50 per cent. if fees were charged at per

The regulations do not allow credit to be given.

Mr. Swan, 1358,
1366.

It is Mr. Gilchrist's duty to receive price of prepared blood. He called attention to a few cases in which he had doubts as to whether the price was paid for blood.

Mr. Gilchrist,
1434, 1446.

Receives fees for blood, pigs, calves, lambs, and manure.

He counts animals as they come in, and, with two exceptions, received fees as the stock come in there and then. He is strict in enforcing payment of fees.

Has seen pigs brought in of which there was no account, as he found on inquiry afterwards.

Constable Car-
roll, 1724, 1726.

2.—*Expenses.*

Mr. Jager, 1210,
1214.

Statement of annual cost of Abattoirs to be prepared.

XXIII.—OFFENCES, PROSECUTIONS, AND CONVICTIONS.

1.—*Breaches of sanitary laws.*

Mr. Oatley, 332,
342, 621, 622.

Has had from fifty to one hundred prosecutions, but has kept no record of them.

2.—*Starving stock.*

Mr. Oatley, 325,
465, 473.

Has no power to compel owners to feed their stock; can only summon if stock remain more than forty-eight hours.

The rule is to keep stock only forty-eight hours at Abattoirs, but they may be kept longer if they get food. Calves have been kept too long, and their owners fined.

Constable Car-
roll, 1672, 1676.

Has seen stock kept on the Island for three or four days without food.

3.—*Cruelty to stock.*

Mr. Oatley, 295,
296, 438, 440.

Has known instances of cruelty and has prosecuted offenders. Does not think butchers in killing are unnecessarily cruel.

Mr. Jager, 953,
963.
Mr. Gilchrist,
1619, 1634.

Has known cases of great cruelty with boat-hook. It has been driven in some cases into the rectum.

Has seen cases of cruelty and checked the butchers.

Has had to prosecute butcher for illtreating bullock and driving boat-hook into eye; but that form of boat-hook has since been prohibited. Has also prosecuted in other cases for cruelty.

Constable Car-
roll, 1676, 1680.

Has seen men illtreat cattle by thrusting boat-hook into the eye and in other ways.

4.—*Bringing unfit stock and offal to Island.*

Mr. Oatley, 474
Constable Car-
roll, 1754.
Mr. Schultz,
2358, 2360.

Offal is brought on to Island from town; and in some cases given to pigs.

Bruised and unfit sheep have been brought on to Island from steamers.

5.—*Difficulty in securing conviction.*

Mr. Dempster,
45, 160.
Mr. Oatley, 341,
344, 756, 760.

Has had great difficulty at Abattoirs in proving ownership and making out cases.

In his cases never had any difficulty in fixing ownership.

XXIV.—INTIMIDATION OF WITNESSES.

Mr. J. Burrell,
723, 742.

Mr. Oatley called and cross-questioned him before a witness in regard to his evidence before the Board. Mr. Oatley also went to Mrs. Burrell and read the evidence to her, and upbraided us with ingratitude. Has nothing to withdraw in his evidence, but confirms all he said.

Mr. Luckett,
888, 899.

Schultz was discharged for telling the truth. M'Namara did not wish to lose his connection, and retail butchers said they would not deal with him if he kept Schultz.

Mr. Swan, 907,
920.

Has heard that Burrell was to be dismissed, first chance, on account of his evidence. Some of the men were cross-questioned by Mr. Oatley, and one of them has left in consequence.

MISCELLANEOUS.

1.—*Reason of high price (retail) of meat.*

Mr. Penny,
405.

High price only charged for hind-quarter and prime parts, lower price for fore-quarter and inferior cuts.

Dr. Williams,
275, 278.

The retail price of beef in Philadelphia is from 6d. to 7½d.; in Chicago, 3d. to 3½d.

2.—*Island infested with rats.*

Mr. Schultz,
2324, 2326.
Mr. Burrell,
2412, 2417.
Mr. Johnston
2560, 2564.

Rats in very great numbers on Island, nothing done to get rid of them.

GLEBE ISLAND ABATTOIR INQUIRY.

MINUTES OF EVIDENCE.

WEDNESDAY, 25 JUNE, 1879.

Present:—

THE HON. GEORGE THORNTON, Esq., M.L.C., CHAIRMAN.

JOHN STEWART, Esq.,

ALEXANDER BRUCE, Esq.

John Wetherill, Esq., examined:—

J. Wetherill,
Esq.

25 June, 1879.

1. *Chairman.*] You reside at Petersham? Yes, Elswick-street, Petersham.
2. Have you resided there long? A little over twelve years.
3. I suppose you are aware of the object of this Board,—it is to inquire into the condition of the Glebe Island Abattoir, and all matters connected with it? I know nothing about Glebe Island itself; it is only the surroundings that I am acquainted with.
4. I only want to ask if you know why this Board has been constituted? Yes.
5. Can you give us any information as to the mode of bringing cattle from the sale-yards to Glebe Island for slaughter? Yes. We find, as residents, that the cattle-driving is a great nuisance. They come down wild, in mobs, and are driven by dogs and by men on horseback; it is really a great nuisance to the inhabitants, and very dangerous to people passing. About a fortnight ago I had to jump over a fence to get out of the way. It being dark, you merely hear what is coming.
6. At what time are the cattle driven along the road? This must have been between 6 and 7 o'clock.
7. About the time people are returning to their homes? They do not always keep to that time; they drive at different times, earlier and later; it is very uncertain.
8. *Mr. Stewart.*] Never in daylight? Yes, in the morning I have seen them frequently.
9. During the day-time? Yes, particularly when they have been taking them from one paddock to another in the neighbourhood of Petersham.
10. *Chairman.*] Will you describe, for the information of the Board, the objections you have in regard to the driving of the cattle to slaughter from the yards? It is most dangerous; you are often obliged to jump over fences and that sort of thing in order to get out of the way, and if you speak to any of the drovers about coming down the wrong roads—there are certain roads they ought to come down—you get most disgusting language from them, cursing and swearing, and you do not wish to speak to them a second time.
11. You say it is dangerous to life? Very dangerous indeed.
12. Particularly to those persons whose residences are in the district and who have to come to town and return home every day? Yes. There is a bullock road for the drovers to come along, but they use Norton and Elswick-streets frequently so as to get a little nearer cut. There are houses all about there, and in a few years there will be ten houses where there is one now. Most of the paddocks that were used for cattle have been cut up into allotments and sold.
13. There is a road called the bullock road, appropriated for the purpose of driving cattle, but the drovers, instead of keeping to that, drive through other streets—Norton-street and Elswick-street you mentioned—to the danger of people's lives? Yes. Sometimes they use the Balmain Road; that is another street. Those three streets are a little nearer than the bullock road. They are not particular, if they can get the cattle along; they take the first road they come to.
14. As a resident there, you think it a very objectionable and dangerous practice? Very much so indeed. There is another thing which creates a nuisance in the neighbourhood, and that is the bone crushing and boiling-down establishments, which a slaughter-house always gives rise to. We have the flavour of them almost every night, and it is enough to poison you.
15. The Abattoir being so near the city creates boiling-down and other establishments which become a nuisance? Yes, at times we have to shut our doors and windows, particularly on a Sunday.
16. Through the foul smell? Yes, it is a terrible smell. There is another nuisance, and that is the offal which is carted for feeding pigs. They are looking after that a little smarter now. The offal is left to decay, and we have the stink.
17. The offal is carted from the Abattoir to feed pigs, and it is left to putrefy, and becomes a great nuisance? A great nuisance indeed. I have known cattle to be from six to ten days in the paddocks, with scarcely a bit of grass to eat; that is opposite my own place.
18. You have known cattle intended for slaughter to be six and ten days without a particle of food? Without a bit of anything to eat; in fact the cattle actually pull up the roots of grass to eat, and nine-tenths of the paddock will be as bare as that.
19. *Mr. Stewart.*] Whose paddock are you referring to? It is a paddock near my own place, owned by Thomas Stewart.
20. *Chairman.*] Is there any water for the cattle there? Yes. Other paddocks round about near Balmain—from my place to Balmain—are quite as bad, and worse, and we have noticed when there has been a glut that cattle have been kept as long as I say.
21. Kept as long as ten days without food? Yes. I believe they shot two or three that were so weak they were unable to move.

- J. Wetherill, Esq.
25 June, 1879.
22. Had become so weak from starvation that they were unable to move? That I know to be a fact; I think it was within the last two months.
23. *Mr. Stewart.*] Perhaps they were sick? Oh dear no. The poor things walked about the place looking for something to eat. You can easily tell by their appearance. You have no idea of the change that takes place in them in the course of one week; they are reduced to nothing almost.
24. *Chairman.*] The cattle get rapidly thin? Terribly thin.
25. Do you think it would be an advantage, instead of leaving the cattle at Homebush as at present, to have a branch railway to the island, and take the whole lot to the island at once? That would answer for those that travel by rail, but not for those that come by the road. The majority come by road.
26. We are told by people well able to judge that about one half come by road? No doubt there is a larger quantity coming by rail now than there used to be.
27. And the quantity is increasing weekly? Yes.
28. Well, as far as those that come by rail is concerned, do you think it would be an advantage to convey them right on to the island by a railway, instead of leaving them at Homebush, and then driving them? The cattle would be all right if they got something to eat.
29. Would it not avoid the evil you have complained of, namely, the danger to human life by driving them along the roads? It would stop all that, but I am afraid it would not do away with the other evils, the nuisances round the neighbourhood.
30. That is another part of the question? Yes; we suffer very much from the bad smells created by the boiling down; that is our chief complaint.
31. You have a municipality there, have you not? Yes.
32. And they have by-laws for sanitary purposes? Yes.
33. And they have an inspector of nuisances? Yes, but they have been defied, until lately, to do their best, and the butchers hang together very much. If you enter an action against them through the Council they will hang together, and subscribe.
34. But with proper regulations, and those properly carried out, do you not think those nuisances could be kept down? I do not think you could ever keep them down; you are watched too much. We have got a very good man now as Mayor—and that is John Young—he is determined to do his best to put these nuisances down.
35. What municipality is it? Leichhardt—Petersham divided into two.
36. *Mr. Stewart.*] Have you a regulation about driving cattle through your municipality? I believe so.
37. What is the nature of it? I could not tell you, I am sure; I am not very well acquainted with the regulations; I am not an alderman.
38. Do you not think cattle would be less dangerous if driven during daylight? I do not know I am sure; there would be more traffic you see.
39. That is not the question;—is there more danger during daylight or not? I myself would rather meet them by daylight. If you see a mob of wild cattle you can get away in the day-time.
40. You know the direction they are coming, and have more chance of avoiding them, especially if you are driving? Yes.
41. It would be more dangerous to meet them, if you were driving a buggy, at night than in the daylight? Yes. When we meet flocks of sheep we have to pull up and wait 5 minutes sometimes.
42. What is your opinion as to whether it is wise to prevent cattle being removed in the day-time? I, myself, would certainly prefer to have them come by daylight.
43. You complain of the boiling down, the pig-feeding, and other things associated with the Abattoir, as being more or less a nuisance? They are a great nuisance.
44. Has no one taken steps to abate the nuisance? Yes, the Council have just got beaten in another case.
45. The Council prosecuted? Yes; I cannot tell you the ins and the outs of it; I only know that they were beaten. The inspector summoned them, and they went to considerable trouble and expense.
46. What was the nature of the prosecution—for boiling down? I think it was for boiling down fat and causing a nuisance. Sometimes they are a great nuisance—at other times they are as clean as it is possible to be. They are cleaner now than they used to be.
47. *Chairman.*] And they can be clean if they like? Yes.
48. *Mr. Stewart.*] And the Council failed to get a conviction? Yes.
49. Do you know the reason? No, I only know that they entered an action, and lost it.
50. Are there many paddocks such as you describe, in the neighbourhood of the Abattoir, to receive cattle? Very few now; they have mostly been cut into allotments, and people are building houses there, and in a short time the houses will be as thick as they are in Sydney. I myself have sold four blocks behind my own property.
51. There is no Government land there, I suppose? Not a bit that I am aware of.
52. You say that you have seen cattle remain from six to ten days? Yes.
53. That would be two or three cattle? More than that. Sometimes there may be twenty or thirty brought down. They drive them away in the morning, taking perhaps ten at a time, but these particular ones that I spoke of, being more difficult to get out, there were left from time to time; in fact the men would not take the trouble to get them out, and they at last got so weak that the men were compelled to shoot them.
54. They were the dregs of a mob? Weakly ones; they were weak when brought in first.
55. What ground is now occupied as cattle paddocks—what acreage? I could not tell you that. There must be four or five paddocks I should think, and the largest would not be more than 7 or 8 acres; and in wet weather like this they are quite muddy.
56. That is about 30 acres for the whole lot? I should think so, about that, but I have not been there for a long time. I very seldom go to that locality. I should think there is not more than 30 or 40 acres in all; of course there were more before some of the paddocks were cut up.
57. Are there always cattle there? Almost always.
58. What is the largest quantity you have seen at one time? I never took such particular notice as to count them, perhaps ten or twenty in one, and so on, and perhaps there might be a smaller number in another.
59. Have they any stock-yards in those paddocks? I never saw one; they are simply open paddocks.
60. So that they have first of all to drive the cattle in, and then to drive them out? The men go on horseback

horseback with dogs, and drive out what they consider the best, and leave the worst,—just what will go the quickest. That is the usual system. J. Wetherill, Esq.

61. That is because they do not want more than two or three perhaps? They very seldom take two or three; it is generally ten or a dozen. 25 June, 1879.

62. They do not take the whole because they do not want the whole for present supply? Just so, they take them as they want them.

63. If they wanted them they could take them all? I dare say.

64. Suppose they had a cool chamber to put the carcasses in until the market demanded them, would not that be a great improvement? I do not understand how that would be.

65. You are not sufficiently acquainted with the subject to form an opinion? No, I know nothing about it.

66. *Chairman.*] You said something about the cattle paddocks being full of mud? Yes.

67. In a state of bog? Yes, you may say that one half or three-fourths is as muddy as that street.

Samuel Dickinson, Esq., examined:—

68. *Chairman.*] You are a merchant of Sydney, one of the firm of "Learmonth, Dickinson, and Co."? Yes. S. Dickinson, Esq.

69. Where do you reside? At the Hall, Ashfield.

70. Have you resided there long? About 5 years.

71. How long have you resided in that district, about there, altogether? At Annandale about 8 years; and Ashfield 5 years or so. 25 June, 1879.

72. Then you have had good opportunities of noticing the mode of travelling stock intended for slaughter, from the Homebush yards to the Glebe Island Abattoir? Yes, for some years past.

73. Will you kindly inform us as to the result of your observations of that practice, and your opinion on the whole subject? Do you speak of recent date?

74. We will not dictate to you; you can put it in any way you please? I have noticed within the last six months that mobs of cattle have been driven at a furious rate, and, on inquiry, I found that by-laws had been passed to prevent them from going through certain districts or certain municipalities. To avoid that I have constantly seen them driving at a furious rate over the Underwood paddocks—they were then the Underwood paddocks, but they have been recently sold—and on to the Parramatta Road, crossing the Liverpool Road. I am not speaking from hearsay, but what I know of my own knowledge.

75. *Mr. Stewart.*] Was that during the day? Between 5 and 6 in the afternoon, and as I always drive home it is of course attended sometimes with danger. The animals are driven as hard as they can be, panting and groaning, and they scarcely know which way to turn, being chased by the dogs and two or three drovers, following in quick succession. I have frequently remonstrated with the men, and also given orders to the police officer to be on the look out. For the last month it has been better. I think they have been afraid of something like punishment. It was becoming a perfect nuisance, and a great danger.

76. You do not know for what reason they drive so furiously? I believe—I am speaking from hearsay now—that it is because they wish to get the cattle to the Abattoir before dark. I think, as a rule, the sales at Homebush are not over till 3 or 4 o'clock; then there is the branding to be done, and then they have to get the cattle to the Abattoir yards, a distance of 6 or 7 miles. They have been in the habit of congregating at Five Dock until 6 o'clock—I think it is from 6 to 6 that they are debarred from travelling through certain Municipalities—and then they start along the road. But the more daring drovers will not wait. They hurry through Ashfield, along the Parramatta Road, across the Underwood paddocks and the Liverpool Road, and by the time they get to Norton's or Taverner's Hill, they will probably be safe. I believe that is the reason for the furious driving. About five weeks ago as I was driving into town I saw two butchers—one with a cleaver—cutting up a bullock that had been driven into a cutting at the bottom of Taverner's Hill. The mud and wash from the cutting, the soakage and sewerage and other things washed over the beast, which, I suppose, was used for human food. Only last week I saw a sheep lying dead in one of the gutters at Taverner's Hill. The mode of driving is not only dangerous but it is highly injurious to the meat.

77. *Chairman.*] Do you think, from your experience of this matter, that it would be better to allow the cattle to be driven in the daylight, when people could protect themselves? I see great danger in both. In summer-time it is light in the evening when they drive, and the men, being anxious to get through their work, drive rapidly, and if you meet a mob of fifty or 100 bullocks, it is a difficult thing to steer past. They take up the whole of the road and they push and crowd so, and if you have a restive horse there is great danger in getting in the midst of them. Hitherto I have escaped but others have come to grief.

78. What is your opinion as to the position of the Abattoir as a public slaughtering-place for the metropolis? It is a subject I have not given very great thought to; but, considering the growth of Sydney within the last three or four years, it seems to me that the provision is totally inadequate to the wants of the city.

79. In what way? In the accommodation there and paddocks around; in the slaughtering; in removing the offal and getting rid of the blood—the blood is deodorized now—and also in the driving of cattle there and in taking the meat away.

80. Do you not think it would be a great advantage if the cattle which are brought down by rail, instead of being put out at Homebush, were conveyed on by rail to Glebe Island, and there delivered from the trucks, or what is your opinion on that subject? It would certainly be an improvement on the present system, but how far the appliances and the space afforded at the Abattoir would be sufficient I do not know.

81. That is another question? It would certainly be an improvement.

82. Do you not think, to say nothing of the danger you have described and the many nuisances arising from cattle being driven on the highway, that it would be a great advantage to everybody concerned—to the owner of the cattle, the consumer, and also in respect to the quality of the meat? It would, but then the question of selling comes in; the cattle must be exposed and be seen and handled by the butchers.

83. But assuming that there were proper yards at Glebe Island for the purpose of selling? As they have in Melbourne—they have some of their abattoirs there within gun-shot of the sale-yards; I went to see them; they are almost perfect as to the yards, and the handling and selling.

84. You say you have visited the public abattoir at Melbourne? Yes, recently.

- S. Dickinson, Esq.
25 June, 1879.
85. Will you favour the Board with some information as to what you noticed there with regard to this subject? Its cleanliness, its order, the mode of sale, and the handling of the sheep and cattle I considered perfect. The abattoir where the bulk of the cattle were slaughtered seemed to be close to the sale-yards, and as regards the mode of selling, the handling and inspection of the beasts, the lotting of sheep and calves, the arrangements seemed to be excellent, and the place was scrupulously clean; but there is a rich City Council in Melbourne.
86. In comparison with our mode you consider theirs perfection? Yes. I recollect in former years attending at Smithfield. There was great cruelty practised there. They used to drive through the streets of London. That is all done away with, and now there is one large metropolitan market. But we are sadly behind the times.
87. We, in this colony, are sadly behind the times in this particular matter? Yes.
88. *Mr. Stewart.*] Are the slaughter-houses quite close to the selling-yards in Melbourne? I should judge within half a mile. Some perhaps less.
89. They are not closely connected? No, not adjacent.
90. You spoke about the danger of meeting cattle on the road, in consequence of their being so furiously driven, but I do not think you answered the question whether it would be more dangerous or less dangerous to drive during the daytime. The question is whether it is more dangerous during the daylight or during the dark? If properly driven, I should say less danger during the day.
91. Especially in meeting people in carriages or on horseback? On horseback you can always get out of the way; but ladies in our unsophisticated part of the suburbs often drive themselves, and it is not only pleasant but dangerous for them to meet a mob of bullocks.

THURSDAY, 3 JULY, 1879.

Present:—

THE HON. GEORGE THORNTON, Esq., M.L.C., CHAIRMAN.

JOHN STEWART, Esq., | ALEXANDER BRUCE, Esq.

Daniel Holborow, Esq., J.P., examined:—

- D. Holborow, Esq., J.P.
3 July, 1879.
92. *Chairman.*] You are Mayor of Ashfield? Yes.
93. You have been a resident of that district for some years, I think? About eight years, I think.
94. Constantly moving about between there and Sydney, I suppose? Yes, continually.
95. I suppose you are aware that this is a Board appointed by the Government to take into consideration matters affecting the public Abattoir and all things in association with it, with a view to make such suggestions for their amendment as may appear to be necessary? Yes, quite aware of it.
96. And, in association with the subject, I take it that you have had some experience of the matter of driving cattle intended for slaughter from the sale-yards to the slaughter-yards? Yes, it is attended with very great danger.
97. You have had some experience? Yes.
98. I will put a general question, and you can answer it at full length, generally, as you may be disposed. Will you inform the Board as to the result of your observations in respect to selling cattle at the sale-yards, or driving them from the sale-yards to the slaughter-house, or anything that may occur to you with reference to the subject I have named? The only thing I can give you any sort of information upon would be as far as regards the driving, which is attended with very great danger. We took the proper means, according to the Police Act, of preventing them from driving cattle through Ashfield, and they are driven now on to the border of our municipality early in the evening, and left there, causing great danger to ladies or gentlemen driving to Burwood. There have been one or two accidents through mobs being left there. Cattle are driven through our borough, at times, unknown to us when it can be done. We have had several cases at the Police Office, and sometimes we have succeeded in getting a small fine inflicted, and sometimes we have been defeated upon technical points in the Act. Of course, as you are aware, at the Police Court so many technicalities are raised at different times by the lawyers, that the unpaid magistrates get a little bit frightened of prohibitions, and very often no decision is given. We have been put to great expense by the different suits we have instituted against the butchers.
99. What were the suits for? For driving during prohibited hours. We have a prohibition time in our by-laws.
100. Driving cattle intended for slaughter during prohibited hours? Yes. Then again I know of numbers of ladies that will never attempt to go out on Monday or Thursday through fear of meeting the cattle. They say "We cannot go out to-day, it is cattle day."
101. On Mondays and Thursdays, which are the cattle sale days, you say the inhabitants of those districts are afraid to venture out because of the cattle being about? Yes, and children are also kept from going to school from the same cause. The cattle are also a source of great nuisance and expense to us, because they trample our footpaths at whatever hour they pass through. They do very serious injury. It would be a very great blessing if some other place for the Abattoir than Glebe Island could be got, so as to do away with the driving through these municipalities.
102. If some other means of conveying cattle to the Abattoir were appointed it would be a very great advantage to those municipalities? Yes, and save very great expense.
103. And some danger? And danger also. The other day I was on the Parramatta Road, at 10 o'clock in the morning, when a mob of cattle was being driven along. There was a lady driving a buggy on the road, and she did not know what to do, and was in a great state of alarm. Being on horseback, I was able to render her some little assistance.
104. Do you think it would be an advantage to convey the cattle which come by rail to Homebush now right on to the Abattoir by a branch railway? Yes, if you are going to continue the present Abattoir that is the only way. I should imagine that it would be better to have the slaughtering place somewhere about Haslem's Creek, and bring the beef in by rail. I think that is the best plan. If you could have the sale-yards and the slaughtering place within an easy distance, it would be far better than having the slaughtering place

place at Glebe Island, because there is no question that one half of the stuff goes into the harbour one way or the other. In the night, if not in the day, it is got rid of.

105. What are your prohibited hours of driving? From 6 to 6, I think.

106. Winter and summer? Yes.

107. From 6 in the morning till 6 in the evening they are not permitted to drive the cattle intended for slaughter? Not through our borough, although they do so through the back streets.

108. They are constantly breaking the regulation? Yes.

109. And you have often prosecuted them for it? Yes.

110. And for reasons that you do not explain, or do not care to explain, you do not always get a conviction? No, and it costs money always to do it, because we have to employ legal assistance.

111. Then you regard this cattle-driving through your borough as a very great and dangerous evil? I do, so much so —

112. Is that the general impression of the people residing in the borough? Oh yes; in fact it was by a petition from the residents that we were enabled to get a by-law approved for preventing the driving during the hours I have stated.

113. Then, in former times, the cattle were driven at any hour day or night? Yes, it is only during the last two years that the regulation has been in force.

114. *Mr. Stewart.*] Is it your opinion that people are safer during the darkness than during the daylight when cattle are travelling? There are not so many people about.

115. Pardon me, that is not the question. Is there more danger during the day than during the night? Except for the number of people I should imagine that the daylight is best for driving, but the people are about during the day.

116. Then you prohibit the driving during daylight, not because there is less danger than at night, but because there are then fewer people about? Of course, that is the reason. You do not have people riding or children going to school at night. I have heard it argued by those who have cattle to drive, that there is great danger to the drovers in driving cattle at night, but the inhabitants are not in so much danger because there are not so many people on the roads at night. During the day there are a great many.

117. *Chairman.*] Would you not rather meet a mob of cattle in the daylight than in the dark? Yes, because I could see better; but if they were driven during the daylight it would have the effect of preventing people from going out on those days.

118. *Mr. Stewart.*] Then your only reason for prohibiting the driving during the daylight is that there are fewer people on the road at night? Yes, that is it.

119. Not so many people liable to be in danger? Yes.

120. At the same time the few people out at night are in great danger? I suppose so, but where there is one in danger at night there would be a hundred during the daylight. The majority would suffer in daylight. In those suburbs we have no gas, and it would be dangerous to meet a mob of cattle on a dark night.

121. Have you ever seen the Smithfield market? Often.

122. How do they manage there,—do they allow the cattle to come in in the daylight? Smithfield, as a slaughtering place, is done away with now; they found that they required a fresh place, as we require one here, I think. It has been done away with these last thirty years; they have a place now at St. Pancras.

123. *Chairman.*] But Smithfield is the great meat-market of England now? But the meat is taken there. There are no cattle driven through the city. The meat is there, but it is killed somewhere else.

124. *Mr. Stewart.*] Do you know of any accidents through driving cattle? Yes, two within a week of each other. In one place there was a buggy turned over. I was charged myself by a mob of cattle going through our borough. I rode after the men to tell them they were breaking the law, and one of them called out to me "Look out old man, or you will be into that paddock in a minute." I looked, and there was a bullock after me.

125. Might not the same thing happen at night? Oh yes, but where one or two persons might get injured at night there might be hundreds injured during the day, because people are more numerous in the day-time.

126. That depends upon whether people make use of their eye-sight or not. If they were blind there would be great danger, but if they have got their eye-sight there would be fewer accidents? If ladies are driving, and a mob of cattle come along, the road is fenced, they cannot get off the road, and they get frightened, and the danger is great.

127. But this happens at night as well as in daylight? There are not many ladies driving at night.

128. *Mr. Bruce.*] Have you seen the cattle in the paddocks—cattle that have been sold at Homebush, and that are waiting to be slaughtered at the Abattoir? There was a mob pointed out to me at Leichhardt that had been there several days without food or water. That was near Mr. Wetherill's place. A cousin of mine called the attention of the Inspector of the Animals Protection Society to the fact.

129. But you do not know it of your own knowledge? No, only from hearsay. I saw the cattle, but I could not tell how long they had been there. I saw that they had nothing to eat.

130. *Chairman.*] But you could not say how long they had been there? No.

131. *Mr. Bruce.*] Can you say anything as to the food or water in the paddocks? No.

Thomas Dawson, Esq., examined:—

132. *Chairman.*] You are a stock and station agent? Yes.

133. You are aware of the objects of this Board of Inquiry? Yes.

134. You have been engaged for some years in matters connected with the sale of cattle for slaughter and such things, have you not? Nearly thirty years.

135. Can you give the Board any information upon the subject which we are appointed to inquire into and report upon? The working of the Abattoir?

136. In any way that may appear to you to be necessary as connected with the subject? I have taken a very great interest in the subject, inasmuch as you know I am trying to promote a company for the slaughter of cattle in the country, and I believe, before we are five years older, that nine-tenths of the cattle will be slaughtered up the line in different parts, and brought to the market in a dead state, instead of a live state. It is coming about very fast; even this winter there is a great deal of stock being slaughtered in the country.

137. *Mr. Stewart.*] From the north? From the south and west; we have no means of getting it from the north,—do you mean Queensland?

Esq., J.P.

3 July, 1879.

T. Dawson,
Esq.

3 July, 1879.

- T. Dawson,
Esq.
3 July, 1879.
138. *Chairman.*] From Maitland and so on? A good many come from that district by Wallerawang, and a great many also come over the Bulga.
139. Then it is your opinion that Glebe Island is unsuitable? I do not believe that in 5 years it will be used as a slaughtering place—to any extent. That is my firm belief.
140. What causes you to come to that belief? Because in every other part of the world the meat is killed before going into market, and why should we have our cattle driven to market, wasting millions of pounds of meat off their backs, and losing thousands of pounds of money every year.
141. Are you not aware that the largest slaughtering places in the world—in America—are in the heart of cities? Yes, but those are for the slaughter of cattle that are fed and fattened in the district and brought in by train. I was introduced lately to a gentleman from America, and he says they bring their meat hundreds of miles, and that it is the best meat they use.
142. Are you not aware that there are abattoirs in Paris? Yes, and they are most beautifully kept, I believe—and the same in Chicago, and in many other places.
143. Having that knowledge, you are still of opinion that the slaughter-houses here should be considerably inland, and that the carcasses should be brought in and not the animals themselves? I think, from the position we are in, natural events will bring it about, inasmuch as we have no fattening paddocks, nothing to keep a beast within 200 miles of Sydney.
144. That is a very important reason? If you calculate how many cattle come, how many are put into paddocks, and the number of acres in the paddocks, you will find that they are without drink or food for weeks. They cannot possibly have a blade of grass to eat. We know that there are plenty of small butchers who go to the sale-yards and buy two or three pens of cattle when the market is low, and keep them for a week or ten days; and where do they keep them. You know what the paddocks about Sydney are. Many times the cattle will be without water for a week together, because it is impossible to give it to them. Our cattle are of such a nature that they will not drink out of anything you like to give them. If you provide the means of drinking they will not go near it.
145. You think that the fact of driving, and the want of food and water, on the way from the pastures to the metropolis, deteriorate the quality as well as the quantity of the meat? Decidedly.
146. Very much so? Very much so. I have heard a butcher of 30 years experience say—and I can use his name if I like—that cattle that are driven to market are not fit for human food—that is those that are driven far.
147. *Mr. Stewart.*] Say how far? I think the last 200 miles into Sydney are worse than 500 miles before you get to that 200.
148. *Chairman.*] And particularly so during the summer season? Well, I think the one is as bad as the other. In summer the roads are generally pretty sound, but in the winter, between the fences, the roads become bogged, and the cattle suffer from that fact. Their feet get sore, and when they come to the mountains they lose their feet, and I am told that there is one hill where you can go and load drays with the points of the cattle's hoofs. Some cattle get footsore much sooner than others, according to the country they have been fed on. You could not bring cattle from the Clarence or Richmond into Sydney, because they are fattened on the low country, and they get so footsore that they fall off perceptibly. But I am as sure as that I am talking here now, that nine-tenths of the slaughtering will be done up the country before five years have passed.
149. Suppose the Government had a system of conveyance by means of refrigerated railway cars, for the purpose of conveying carcasses of meat to be received into a meat-market in or near the metropolis, in a meat-house also refrigerated, and the temperature kept within a certain limit, do you think that would be a great advantage to the producer and the consumer? That is what it must come to.
150. I suppose you mean that is what it ought to come to? That is what it will come to. If they can do it elsewhere we can do it here, and they are doing it in other parts of the world. The meat will have to be cooled at the slaughtering place and well stiffened, then put into refrigerated carriages for conveyance to Sydney, and the train will have to be run into the meat-market and unloaded there, and the meat put into cooling rooms.
151. The quality of the meat would be very superior to that from cattle driven? Yes, very superior. You can fancy what cattle must be like after being driven over a mountainous road for days and weeks, and then, when they come here, to be knocked about in the sale-yards up to their bellies in mud, and then to be hounded to the slaughter place along a macadamized road, and kept in paddocks a week after that again.
152. And would it not be a means of greatly increasing the revenue of the railway department? Of course it would; I have looked upon it as the grandest thing that could be undertaken.
153. There would be the hides, horns, tallow, bones, &c.—all those things would also be brought? Yes, and the tripe; and the whole of the pigs would be fed at the Abattoir, because it is impossible to do without that. The food for the pigs—all the entrails of the beast—would be cooked.
154. And the prospect of increased traffic to the railway is involved in this suggestion? It would be very great, there is no doubt.
155. *Mr. Stewart.*] Are you aware whether the meat is more apt to decompose when driven? From my experience I should say very much more liable to decompose when the cattle are killed in a heated state, such as they are in after travelling. The best juices come out with the perspiration of the meat, as would be the case with me if I started to walk to Bathurst. There is no doubt that the meat is very much deteriorated in travelling, by road or train.
156. Then you think meat carried by train would keep longer sweet than meat driven on foot? Decidedly; one is killed in perfect health, and cool, and put into the train and brought down in a cool, stiffened state, while the other is brought and slaughtered, perhaps in a high state of fever, then driven through the streets, and mauled about when hot and flabby, so that it is not likely to keep.

THURSDAY, 10 JULY, 1879.

Present:—

THE HON. GEORGE THORNTON, Esq., M.L.C., CHAIRMAN.

JOHN STEWART, Esq., | ALEXANDER BRUCE, Esq.

Thomas Dawson, Esq., further examined:—

T. Dawson, Esq.
10 July, 1879.

157. *Chairman.*] What has been your experience amongst stock? I was brought up as a grazier in England under my father and grandfather, who were also graziers, and have done nothing in this colony for the last forty-one years but follow the same business, being entirely engaged in stock transactions, in various ways. 158. And you are thoroughly conversant with the whole subject matter remitted to this Board to inquire into? I think so, inasmuch as I was with the late John Hamilton, who had the first establishment for boiling down. When that industry was first experimented on here, I was engaged by him to go to Goulburn for the purpose of erecting there the first establishment for boiling down. He then had large contracts for meat for the Government, and he appointed me his buyer in the Southern district where the most of the fat cattle in those days came from. I was also appointed to inspect the stock during the first New Zealand war, before they left this colony, on behalf of the contractors. I bought fat stock for the Tasmanian Steam Navigation Company for several years, and shipped them continuously. I managed the slaughtering establishment, and had control of all the affairs connected with it, at Collingwood, near Liverpool, for the late J. H. Atkinson, and I was the first man who ever brought beef into the city by train for sale at auction. I managed Mr. Blaxland's business for the sale of meat that used to come down the Parramatta River to Sydney from the Newington establishment. It was brought down twice a day. Altogether, from beginning to end, I have had great experience in the slaughter and usage of cattle.

159. As much as any man in the colony? No man more so. I have driven cattle over and over again to market from stations, and have seen the way in which they have wasted day after day on the road.

160. Do you know anything of the Glebe Island Abattoir? I do not.
