it had been found impossible to deal with them in homes; 10 boys and 7 girls have been returned to asylums, and 1 girl was sent to the Refuge for the same reason; 3 boys absconded; and 127 children (89 boys and 38 girls) were discharged to their own resources after serving their terms of apprenticeship; so that on April 5, 1891, there were 2,369 children (1,417 boys and 952 girls) under control. Of these 806 boys and 568 girls are boarded out under payment; 66 boys and 91 girls are adopted without subsidy; and 543 boys and 295 girls are apprenticed. The children paid for include 5 in the hospitals, 116 in the Cottage Homes for Invalid Children, 2 in the Central Home at Paddington, and 4 under three years of age paid for at 7s. per week, 7 children at 6s. per week, 1 of the same class at 7s. per week, and the 19 foundlings and infants already alluded to, who are paid for at the rate of 10s. a week each. The extension of the Board's operations to these foundling and infant children must tend to slightly increase the general average cost, and also the death-rate, but there is no doubt that it will in time largely preserve infant life. Most of the unfortunate little ones of this class are sadly neglected when taken into the institutions, and the only hope of saving them is to pass them as soon as possible into healthy country districts, where they will be able to obtain kindly treatment from sympathetic women and a plentiful supply of wholesome milk. The remainder of the children are paid for at the customary rate of 5s. a week.

The amount received from the Treasury for the expenses of the department during the past year was £27,135, to which is added a balance of £54 8s. 3d. brought forward from the previous year, making in all £27,189 8s. 3d., and there was a balance of this sum in the Bank on April 5, 1891, of £859 16s. 6d. The actual gross expenditure was therefore £26,329 11s. 9d.; £20,423 15s. 11d. was expended in the boarding-out division, as against £20,320 13s. 3d. in 1890. As the average daily number of children under control as boarders during the year was 1,424, the gross average cost was £14 6s. 10d. per head, against £14 7s. 5d. last year. The sum of £720 5s. 7d. was received from parents towards the maintenance cost of their children, and after deducting this from the full cost, the net capitation charge against the Government was £13 16s. 8d., or 1s. 9d. per child less than last year, which is the lowest cost recorded. The charge includes salaries, medical fees, maintenance, travelling expenses, rent (which has to be paid during repairs to the central depôt), and every other charge that could properly be made against this branch. There is no doubt, whatever, that the system is now effecting a saving of £15,000 a year to the State in the difference between charges for boarding-out and maintaining children in asylums.

The small item for medical fees still presents evidence of the philanthropy of the medical gentlemen throughout the Colony who, with one or two exceptions, have not hesitated to respond affirmatively to the Board's request that they should on grounds of benevolence charge half fees in ordinary cases, in order that the economical aspect of the boarding-out system might be a striking feature in its general operation. The aggregate charges for medical attendance on upwards of 1,400 children has been only £207 1s. 7d., which is very little indeed considering the various classes of children now cast upon the Department. This item is also, to some extent, an indication of the good health of the children. It is very gratifying to me to be able to thus draw attention to the benevolence of the medical profession in this particular throughout the Colony year after year; and in many instances the medical attendant has also acted as friendly adviser to the family as well, in its relations to the foster children. The Department has sustained a severe loss since my last report in the death of Dr. Gentle and Mr. Hollis, druggist, of Goulburn, both of whom for nearly nine years gave medical advice and medicines to a very large number.

number of State children without earthly fee or reward. I also desire in this connection to convey the thanks of the Board to the medical and nursing staffs of such of the metropolitan and country hospitals as have had temporary charge of children suffering from severe illness, or sent in for operations, during the year.

It has been usual in these annual reports to draw attention to the moral improvement effected among the children after they have been boarded out. There has been continued cause for satisfaction in that respect last year. It is of course natural to suppose that as the boys and girls advance in years there should be some lapses into immorality, particularly in view of the inherited tendencies of these unfortunate children. The proportion, however, thus far has been very small, indeed; and it is remarkable that it has occurred, in most instances, among the children who were known to be immoral almost from the period of their removal from the Asylums. Whilst this, to some extent, supports the theory of heredity, there are on the other hand very many cases in which such children have under wise training and good influences been reclaimed from the most degrading vices. The operation of the system in this particular may be judged from the fact that while with 300 children there were at one time from 40 to 50 thus unhappily afflicted, the number of known cases at present with 2,369 children, is less than 20; and there is some reason for believing that there are not many cases unknown, as this is one of the features that the Inspectors have been directed to make particular inquiries into. One cause of this improvement, doubtless, is that young children are now not so frequently passed into institutions before being boarded out, and that they are removed as speedily as possible where admission has been necessary before homes could be selected for them.

The following classification of the guardian's occupation continues to afford some guarantee that every possible care is exercised in selecting homes in which there is likely to be full and plenty for the children, so that one of the prime dangers to the success of the system—namely, the pressure of poverty—should be avoided:—
 Accountants, 3; auctioneer, 1; attendants, 4; architect, 1; blacksmiths, 3; booksellers, 2; bushman, 1; butchers, 15; bricklayers, 2; brickmakers, 5; boilermaker, 1; bootmakers, 10; boot-finisher, 1; bakers, 8; builders, 12; bank managers, 3; conductors, 2; coachsmiths, 2; collector, 1; compositor, 1; cutter, 1; coroner, 1; coach proprietors, 3; Civil Servants, 15; confectioners, 4; cordial manufacturers, 3; coach builders, 3; carters, 8; contractors, 17; carpenters, 14; constables, 8; caretakers, 2; commissioner, 1; clergymen, 10; chemists, 3; clerks, 10; Clerks of Petty Sessions, 2; commercial travellers, 2; cabmen, 4; domestics, 170; dressmakers, 11; dairymen, 14; dealers, 3; draper, 1; drill instructor, 1; draftsmen, 2; doctors, 2; engineers, 5; farmers, 593; fishermen, 2; foreman, 1; firemen, 2; fruiterers, 3; fruitgrowers, 12; graziers, 13; gasfitters, 3; gatekeepers, 2; grocers, 15; grooms, 2; gardeners, 15; gunsmiths, 2; glazier, 1; greengrocer, 1; householders, 76; homœopathist, 1; invalid, 1; independents, 30; instrument maker, 1; journalists, 3; labourers, 25; librarians, 3; letter-carriers, 2; laundress, 6; lamp-lighter, 1; lighterman, 1; missionary, 1; millers, 4; miners, 17; machinists, 3; magistrates, 3; moulders, 5; monumental masons, 2; music teacher, 1; merchants, 3; milliners, 2; mail contractors, 3; maintenance men, 2; nurses, 5; orchardists, 20; organist, 1; photographer, 1; painters, 7; postmasters, 7; porters, 4; platelayers, 2; printers, 2; plasterers, 7; plumbers, 6; produce merchants, 3; quarrymen, 2; registrar, 1; railway employees, 22; stonemasons, 5; saddlers, 7; shopkeepers, 17; shipmasters, 4; squatters, 5; shipwrights, 3; selectors, 5; settlers, 7; stationers, 3; solicitors, 4; smelters, 2; stewards, 2; sheriff's bailiff, 1; sailor, 1; teachers, 37; tailors, 10; telegraph masters, 2; vanman, 1; wheelwrights, 2; warehousemen, 2; warders, 8.
 Children

Children are placed out in the undermentioned districts in the numbers stated:—Ashfield, 4; Arncliffe, 1; Annandale, 7; Auburn, 9; Albury, 4; Albion Park, 5; Adamstown, 6; Armidale, 12; Balmain, 99; Botany, 2; Burwood, 14; Bexley, 2; Balmoral, 10; Bowral, 25; Berrima, 3; Bundancon, 2; Bungonia, 3; Braidwood, 7; Binda, 1; Burrowa, 2; Bulli, 3; Berry, 22; Boolong, 3; Burrier, 2; Bega, 8; Bathurst, 10; Burdenda, 2; Branxton, 32; Ballina, 2; Croydon, 4; Camperdown, 13; Canterbury, 1; Campbelltown, 3; Coolamon, 1; Canowindra, 1; Carcoar, 1; Crookwell, 12; Canley Vale, 9; Camden, 19; Cootamundra, 24; Clifton, 1; Cambewarra, 14; Cooma, 1; Cargo, 7; Cudal, 9; Clarencetown, 8; Charlestown, 1; Cessnock, 1; Clarence River, 1; Clunes, 2; Cooranbong, 5; Deniliquin, 1; Dapto, 7; Dungog, 5; Denman, 4; Dubbo, 2; East Maitland, 17; Eureka, 1; Forbes, 12; Farley, 2; Glebe, 27; Gladesville, 8; Granville, 40; Goulburn, 205; Grabben Gullen, 10; Guildford, 1; Gunning, 17; Gerringong, 11; Girilambone, 1; Gunnehah, 1; Glen Innes, 2; Gosford, 3; Greta, 2; Hunter's Hill, 13; Homebush, 1; Hurstville, 12; Hill Top, 4; Harden, 1; Hexham, 8; Hinton, 3; Hornsby, 3; Hawkesbury River, 49; Hay, 1; Hartley, 1; Islington, 3; Jugiong, 2; June Junction, 3; Jamberoo, 19; Kogarah, 8; Kangaloon, 5; Kiama, 22; Kangaroo Valley, 11; Leichhardt, 50; Liverpool, 5; Lambton, 9; Lochinvar, 2; Laggan, 2; Lismore, 1; Marrickville, 35; Manly, 8; Macdonaldtown, 11; Mummel, 12; Menangle, 5; Mittagong, 31; Moss Vale, 13; Marulan, 8; Minmi, 3; Murrumburrah, 3; Milton, 31; Moruya, 7; Mulgrave, 17; Mudgee, 2; Molong, 2; Mary Vale, 3; Miller's Forest, 27; Morpeth, 7; Muswellbrook, 2; Manning River, 2; Macleay River, 2; Newtown, 37; Narrawa, 2; Nowra, 22; Narramine, 2; Newcastle, 55; Nelson's Plains, 10; Oberon, 2; Orange, 3; O'Connell, 5; Pyrmont, 4; Paddington, 23; Parramatta, 89; Petersham, 28; Picton, 40; Pitt Town, 34; Penrith, 13; Parkes, 1; Pyree, 1; Queanbeyan, 14; Rockdale, 7; Rookwood, 18; Redfern, 21; Ryde, 9; Randwick, 2; Riverstone, 24; Richmond, 3; Rooty Hill, 1; Raymond Terrace, 12; Summer Hill, 8; Sydney, 5; Singleton, 9; Surry Hills, 35; St. Leonards, 61; Shellharbour, 2; Sassafras, 2; Stockton, 3; Scone, 6; Swan Bay, 3; Tarlo, 2; Taralga, 7; Tirranna, 1; Thirlmere, 7; Tarago, 4; Tumut, 8; The Valley, 2; Tomago, 2; Tamworth, 3; Teralba, 1; Waverley, 12; Woolloomooloo, 9; Woollahra, 2; Waterloo, 26; Watson's Bay, 11; Wheeo, 30; Windellama, 7; Wagga Wagga, 6; Wollongong, 17; Windsor, 31; Wilberforce, 11; Wellington, 2; Wallsend, 9; Waratah, 10; Wickham, 3; Woodville, 16; William Town, 9; West Maitland, 55; Wollombi, 4; Woy Woy, 1; Yass, 3. It will be observed from this list that the Board is still careful to select country localities when possible for boarding-out districts; and in most instances the town homes have only been chosen to admit of respectable widows living within easy access of their children, or to prevent families from being separated, or for other special reasons.

There have been 906 applications for State children during the year, or an increase of 12 on the figures for 1890. 672 have been from Protestants, including 574 children required as boarders, 278 as apprentices, and 21 for adoption. 234 have been from Roman Catholics, of which 190 were for boarders; 87 as apprentices, and 10 for adoption. 550 of these applications were inquired into by the inspectors, who recommended 444 for approval, and 106 for refusal. It is worthy of remark that the average number of applications refused has been about the same during the past three years. It generally exceeds 20 per cent. of the whole number, although in every instance the recommendations of a clergyman and a magistrate have been attached. Some of the applications refused during the past year have been from persons of most scandalous character, and it is difficult to understand indeed how the necessary testimonials could have been obtained.

obtained. The recurrence of this discreditable state of things year after year has naturally led the Board to attach very little importance to applicants' credentials; and it should be understood that no child is sent to a home unless it is known, or until inquiries have been made by the Inspectors of the Department into the characters of the applicants.

There have been twelve meetings of the Board during the year, at which the attendance was as follows:—The President, 12; Mrs. Garran, 10; Lady Manning, 9; Mrs. Windeyer, 9; Lady Allen, 7; Mrs. Goodlet, 5; Mrs. Austen, 3; Mr. T. M. Slattery, M.P., nil; the Hon. W. J. Trickett, M.L.C., nil.

The following is the usual list of lady visitors, under whose supervision the homes are placed in various parts of the Colony:—
 Armidale, Mrs. Allingham, Mrs. K. H. Donnelly, Mrs. S. A. Kearney, Mrs. M. Patrick, Miss E. Wormersley; Annandale, Mrs. Arquimbau; Albury, Mrs. Adrian; Bowral, Mrs. J. C. Bagot, Mrs. Debenham; Bega, Mrs. Spencer, Mrs. Evershed; Balmain, Mrs. Bellbridge, Mrs. J. Dixon, Mrs. Youll; Branxton, Mrs. J. A. Tulloch, Mrs. Bercini, Mrs. E. Smith; Bundanoon, Mrs. Osborn; Bathurst, Mrs. Webb, Mrs. Marriott; Berrima, Mrs. Geo. Sheppard, Mrs. Wilshire; Bethungra, Mrs. M. Sawyer; Baulkham Hills, Mrs. W. M. Best; Burwood, Mrs. Hy. Frazer, Mrs. Jas. Inglis; Bredalbane, Mrs. J. Cropper; Broughton Creek, Mrs. M'Leay, Mrs. E. Morris, Mrs. English; Boolong, Shoalhaven, Miss Grant; Burrowa, Mrs. Campbell; Barraba, Tamworth, Mrs. Kidd; Braidwood, Mrs. O'Brien; Cootamundra, Mrs. J. Barnes, Mrs. Ed. Barnes, Mrs. W. H. Matthews; Camden, Mrs. Chas. Furner; Cassilis, Mrs. M. Traill; Cooma, Mrs. Druitt; Canterbury, Mrs. Grosvenor; Carlingford, Mrs. F. C. Cox, Mrs. Neil Harper; Cambewarra, Mrs. Brennan; Collector, Mrs. Robt. Beit; Cowra, Mrs. Jobson; Cessnock, Mrs. M'Donald; Deniliquin, Mrs. H. M'Collough, Mrs. J. B. M'Arthur; Mrs. A. H. Noyes, Mrs. J. E. Taylor, Mrs. T. T. G. Watson; Darlinghurst, Mrs. Hughes; Dungog, Mrs. M. Day, Mrs. Waller; Dalton, Mrs. H. T. Beresford; Forbes, Mrs. Raymond, Mrs. Edwards, Mrs. Dunn; Five Dock, Miss Troy; Goulburn, Mrs. de Lauret, Mrs. Morphy, Mrs. Ross, Mrs. Craig, Miss Andrews, Mrs. Oliver, Miss Wallace, Mrs. Barber, Mrs. Gillespie; Grafton, Mrs. M'Dougall; Gladesville, Mrs. Lumsdaine; Guildford, Mrs. F. A. Boyd, Mrs. Barber; Granville, Mrs. E. B. Docker, Mrs. Giles; Gunning, Mrs. Saxby, Mrs. Selwyn Pembroke; Gresford, Mrs. Logan; Greendale, Mrs. J. C. Mayne, Mrs. Whittingham; Gerringong, Mrs. Heighway; Gunnedah, Mrs. Haynes; Hunter's Hill, Mrs. Bailey; Junee Junction, Mrs. Ross; Kangaroo Valley, Mrs. Hetherington; Kogarah, Mrs. Balcombe, Mrs. P. Lacy; Kempsey, Mrs. S. Verge, Mrs. M. A. Verge, Mrs. Minnet; Kingsdale, Mrs. Fred. Sheppard; Lismore, Mrs. M. Barrie; Leichhardt, Miss Troy; Lane Cove, Mrs. P. F. Richardson; Lake Bathurst, Mrs. Badgery; Liverpool, Mrs. Tillett; Maclean, Mrs. M'Innes; Moss Vale, Mrs. Barcroft; Maitland West, Mrs. J. D. Prentice, Mrs. M. Smith, Mrs. Trenchard, Miss A. Wolfe, Mrs. W. G. Lipscombe; Maitland East, Mrs. J. Lamont; Manly, Miss Willis; Menangle, Mrs. Onslow; Morpeth, Mrs. Goddard; Murrumburrah, Mrs. Geo. Barnes, Mrs. C. Cutcliffe, Mrs. Macanish; Mittagong, Mrs. F. C. Williams, Miss Burke, Miss Beaumont, Mrs. Horneman, Mrs. Murray; Mudgee, Mrs. Bentzen, Mrs. Loneragan; Marulan, Mrs. E. A. Mosley; Moruya, Mrs. Archibald; Milton, Miss J. Kendall; Miller's Forest, Mrs. J. Hickey; Merriwa, Mrs. Armstrong; Newcastle, Mrs. Weatherill, Mrs. J. Harris, Mrs. Ireland, Mrs. M'Donnell, Mrs. Cuthbertson; Narrandera, Mrs. L. S. Donaldson, Mrs. Christie; Numba, Mrs. Morton; Nowra, Mrs. J. Best; Nelson's Plains, Mrs. Garland; O'Connell, Mrs. H. T. Holliday; Orange, Mrs. Jas. Dalton, Mrs. M'Laughlin; Oberon, Mrs. Metcalfe; Parramatta, Mrs. W. J. Günther,
 Mrs.

Mrs. Hugh Taylor, Mrs. Hawkins, Mrs. Bowden; Penrith, Mrs. A. Cadden, Mrs. F. E. Lethbridge, Mrs. Shearman, Miss Cox; Paterson, Mrs. Graham; Picton, Mrs. Gibson, Mrs. Sheppard, Mrs. W. R. Antill, Mrs. Noake; Prospect, Mrs. F. Smart; Petersham, Mrs. Dwyer; Queanbeyan, Mrs. George Campbell, Mrs. G. P. Smith, Mrs. Willans, Mrs. Emery; Redfern, Mrs. Boyce, Mrs. J. G. Stoddart; Raymond Terrace, Mrs. Smith, Mrs. John Richardson; Ryde, Mrs. Collingridge; Richmond, Mrs. Onus, Miss Onus; Rookwood, Mrs. E. A. Colvin; Rooty Hill, Mrs. Mackay; Rouse Hill, Mrs. M. Pearce; St. Leonards, Mrs. Atchison, Mrs. T. O'Sullivan, Sutton Forest, Mrs. M. A. Badgery; Stroud, Mrs. M'Kenzie, Mrs. Rushworth; Scone, Mrs. A. C. Thomas; Surry Hills, Mrs. Hargrave, Mrs. E. D. Madgwick; Stockton, Mrs. S. W. Smithe; The Burrier, Mrs. Thompson; Tamworth, Mrs. Middleton, Mrs. T. A. Loder; Tumut, Mrs. Thompson, Mrs. A. K. Josephson, Mrs. A. M. Brown; Woonona, Mrs. M'Case; Windsor, Mrs. J. B. Johnstone, Mrs. Bloomfield, Mrs. Hall, Miss Hall; Wollongong, Mrs. Finlayson; Woollahra, Miss Dean, Mrs. Newton, Mrs. Gerber; Wallsend, Mrs. Neilson; Waverley, Mrs. A. T. Simpson; Waterloo, Mrs. Ballard; Wallerawang, Mrs. Abbott; Wellington, Mrs. D. Herbert, Mrs. Marsh, Miss Marsh; Wollombi, Mrs. Wiseman; Wagga Wagga, Mrs. H. B. Fitzhardinge, Mrs. Lumsdaine, Mrs. G. Coleman, Mrs. G. T. Watt; Windeyer, Mrs. Thacker, Mrs. Mallon; Wiseman's Ferry, Miss Laughton; Watson's Bay, Mrs. Stiles; Yarrunga, Mrs. Throsby, Mrs. P. F. Hart; Young, Mrs. Tucker, Mrs. Heeley.

Whilst giving full credit to those lady visitors who have, during the past year, faithfully discharged the duties they have undertaken on behalf of the children, I regret to say that there has on the whole been no improvement in the voluntary oversight, which is really one of the most important features in connection with the work of the Department. In 1889, the visits paid by these ladies to the children numbered 1,536; in 1890, they paid 1,292 visits; and last year the visits numbered only 1,225. The official oversight has been fully maintained. 5,658 visits were paid by the Board's inspectors, which made a total of 6,883 visits, or an average of about three visits to each child during the year. This is a slight improvement on the figures of 1890, which showed an average of $2\frac{3}{4}$ visits. The observations of the Inspectors have generally been satisfactory, but in two cases it was considered that the punishment of children by guardians was excessive. Legal proceedings were taken, the guardians were fined, and the children were removed.

The Board have hitherto endeavoured to reduce the number of State children in every home, so far as that can be done, without separating members of the same family. The statistics of 1891 show:

1,025	homes with 1 child				
258	" "	2 children, including 112 with children of one family			
112	" "	3 " "	31	" "	
82	" "	4 " "	26	" "	
2	" "	5 " "	1	" "	

1,479 homes, containing 2,215 children (exclusive of 6 Orphan School apprentices), 27 absconders, 3 in hospitals, 116 in cottage homes for invalid children, and 2 in the Dépôt. Total, 2,369.

171 families have thus been prevented from separating by each being placed with one guardian.

Excluding the homes containing one family there are now:

1,025	homes with 1 child		
146	" "	2 children each	
81	" "	3 " "	
56	" "	4 " "	
1	" "	5 " "	

1,309 homes, containing 1,789 children ($1\frac{1}{2}$ average, the same as last year).

ADOPTED

ADOPTED CHILDREN.

One hundred and forty children are now adopted, which shows an increase of 1 over last year. In this division there are 48 Protestant boys and 73 girls; and 6 Roman Catholic boys and 13 girls, thus placed out without payment, which indicates a saving to the revenue under this heading of £1,820 per annum. The number of adoptions might have been largely increased if suitable children could have been obtained; but the Board have to be careful not to place out in this way children who are likely to be reclaimed by guardians subsequently. There are 138 adoption applications recorded, which is an advance of 31 on the figures of 1889. Nearly all the children in this division are of tender years, and they have been placed with persons who are fairly well-to-do. Their future is therefore not a matter of much anxiety, except with regard to any interference from relatives unexpectedly turning up in isolated cases, and of that there is very little probability.

APPRENTICED CHILDREN.

The apprentices have increased from 778 in the year ended April 5, 1890, to 838 in the year 1891. In 1890, there were 35 of the Orphan School apprentices under control—that is, children who had been apprenticed direct from those institutions, and, when the latter ceased to exist, were transferred for supervision to the State Children's Relief Board. All these children have been discharged to their own resources except 6, who have not yet completed their indentures. In the apprentices' division generally, 89 boys and 38 girls have been discharged from their indentures, against 41 boys and 32 girls in 1890. 287 girls are at domestic service, and 522 boys are learning the following occupations:—Boot-makers, 2; bank manager, 1; brick-maker, 1; bakers, 2; butchers, 2; carrier, 1; chemist, 1; coach-builders, 2; carpenter, 1; cordial manufacturers, 5; dairy, 3; farmers, 457; grooms, 7; gardeners, 7; grocer, 1; gunsmith, 1; harness-maker, 1; millers, 3; mason, 1; orchardists, 8; porter, 1; painters, 2; storekeepers, 6; saddletree-makers, 2; tailors, 3; wheelwright, 1. The only charge against the State in connection with the apprentices is for their inspection. In 1890, this was fixed at £1 10s. per head, but it has been deemed wise during the past year to increase the official inspection, in consequence of the falling off in the voluntary oversight, and, as a consequence, the proportion of expenses of official supervision and office management and salaries, &c., has been fairly fixed at £2 per head.

CHILDREN CLASSED AS UNOFFICIAL.

Several years ago the Board was called upon to take charge of a number of children who were too old to be taken over legally, and who were yet willing to place themselves voluntarily under the care of the Department, in order that suitable homes might be provided for them, and that their interests might be protected while they were in service. A number were wayward children, who were removed from very bad influences, which would otherwise undoubtedly have led to their ruin. In 1889, there were 4 boys and 11 girls in this division; in 1890, there were only 2 boys and 9 girls; and on April 5, 1891, the number was 3 boys. The others having reached ages at which they would, if legally bound, have been entitled to seek service on their own account, have been discharged to their own resources, and, so far as inquiries recently made for a special purpose indicate, they are generally doing well.

THE CENTRAL HOME.

Seven hundred and seventy-five children have been dealt with at the Central Home, Paddington, which shows a decrease of 15 on the figures of 1890. These children are only accommodated until suitable

suitable homes can be found for them in one of the other divisions of the Department. The average number of children daily in the Home during the year ending April, 1891, was 7, and their cost per head £9 5s. 8d, or 19s. 10d. less than in the previous year.

COTTAGE HOMES FOR INVALID CHILDREN.

On April 5, 1890, these homes, which are situated at Mittagong and Parramatta, contained 50 boys and 67 girls; total, 117. Thirty-seven boys and 59 girls have been discharged. There were consequently in the homes on April 5, 1891, 43 boys and 73 girls, or a total of 116 children. In consequence of the increased number of sick and physically afflicted children in several of the institutions, it has been found necessary to open another home, making altogether eight now under the care of the Board. I regret to say that no money was voted on the Estimates for 1891 for the erection of homes at Mittagong in place of the premises now rented there. The two homes at Pennant Hills, Parramatta, which were erected according to plans approved by the Board, are serving their purpose admirably; and the children are provided with accommodation far more comfortable than it is possible to provide them with in homes not specially adapted to their various requirements. I trust that on the Estimates of next year some provision will be made for enabling the Board to erect new buildings at Mittagong. On the grounds of economy, as well as in the interests of the afflicted children, such a course is most desirable.

The following is the usual table of particulars:—

	Boys.	Girls.	Total
Total number of children admitted to Cottage Homes up to 5 April, 1891	320	287	607
Total number of children discharged from Homes up to 5 April, 1891	277	214	491
Number in Homes on 5 April, 1891	43	73	116
In Homes on 5 April, 1890	50	67	117
Admitted during year ended 5 April, 1891	37	59	96
	87	126	213
Discharged during last year	44	53	97
In Homes 5 April, 1891	43	73	116
Discharged:—			
To relatives	10	11	21
Boarded-out	30	40	70
Died	2	0	2
George-street Asylum	1	0	1
Deaf, Dumb, and Blind Asylum	1	2	3
	44	53	97

The following return indicates the afflictions from which the children were suffering when they were admitted:—

Abscesses	2	Debility (general) and measles	1
Abscesses and swollen glands	1	Dysentery	1
Bronchitis (chronic)	1	Dirty habits and sore ear	1
"	1	Dropsy and rheumatism	2
Contraction of leg sinews	1	Deaf and dumb (change of air)	4
Chilled feet	1	Diarrhoea	2
Cripples	3	Defective palate	1
Chinese (half)	2	Dirty habits	2
Catarrh	1	Deformed and paralyzed	1
Delicate and lame	1	Eruptions	15
" ophthalmic	5	" scalp and deformed chest	1
" partial paralysis	4	" and bad habits	2
" running ears	8	" and scrofulous	1
" scrofulous	1	" of scalp	13
Debility (general)	113	Epilepsy	3
" and turned eyes	1	Eruptions of scalp and body	4

Enemia	1	One leg	2
Knee-pan, injury to	1	Spinal disease	9
Fractured limb	1	Strumous	1
Hip disease	4	Semi-idiotic	2

The expenditure upon the cottage homes during the year ending April 5, 1891, was £2,763 5s. 6d., which includes £2,457 15s. 6d., as shown in the balance-sheet, and £305 10s. value of clothing supplied from the stores. This expenditure includes charges for maintenance, salaries, travelling expenses, medical attendance, &c., and it represents a capitation charge of £22 2s. 1d., or 7d. per head less than in 1890.

CONCLUDING REMARKS.

There has been no diminution in the practical interest taken in the Department by Mr. Critchett Walker, C.M.G. (Principal Under Secretary); the Hon. Geoffrey Eagar, J.P. (Under Secretary for Finance and Trade); Mr. Edmund Fosbery, J.P. (Inspector-General of Police), and his officials throughout the country; the Benevolent Asylum authorities; Mrs. Mallon of the Sydney Female Refuge; and Mother Gertrude of the Samaritan Refuge at Tempe—to all of whom the thanks of the Board are due for valuable assistance courteously rendered during the past year.

I have the honor to be,

Sir,

Your obedient servant,

ARTHUR RENWICK,

President.

APPENDIX.

LADY VISITORS' REPORTS

Mrs. M. J. Gunther, Parramatta —

In answer to your enquiries as to my experience of the boarding out system, &c My experience has been on the whole very satisfactory. The homes I visit are very carefully selected, and an improvement in the children's appearance and behaviour is soon apparent. In most cases there seems to be great affection shown by the children to their guardians. There is, however, one matter which I should like to draw the attention of your Board, and that is the early age at which both boys and, more especially, girls, are released from control. At seventeen a girl is her own mistress, with a good sum of money to her credit in the Savings Bank. Though her previous guardian and others may still wish to take an interest in her, they have no power to prevent her taking an undesirable situation, squandering her money, or letting other people take it from her.

Mrs.

Mrs. A. M. Bagot, Bowral :—

My experience as a visitor to the boarded-out State children has not been long enough to enable me to give you much information on the subject. Two or three of the homes in Bowral are satisfactory, and the children seem happy and healthy, and in no case have we found any cruelty or neglect. We have been trying to get a home for three children, but have not succeeded so far. The people say the payment is not high enough to be able to dress them properly; yet those people who have already some children, always have them clean and comfortably dressed, so it can be done for the money. Hoping to be able to write in a few months more fully on the subject.

Mrs. Weatherill, Newcastle :—

You wish me to write my experience of the working of the boarding-out system for destitute children. I can only say that I think more highly of it than ever. I have been a lady visitor ever since the inception of this system, and my experience is that the children are in every way better cared for, and far more likely to grow into useful men and women than when they were herded together in asylums and orphanages. I find that the children are on the whole far easier to deal with, and less subject to immoral habits now than those were who were first boarded-out from the orphanages. The guardians who have come under my notice have in all respects faithfully fulfilled their duties except in a very few instances; indeed my complaint is that they are disposed to make too much of the children, and to spoil them by indulgence. I find in nearly all cases, the boarded-out waifs are treated exactly as members of the family by the guardians, and their welfare well-considered. I consider this plan of boarding-out children in good homes, a perfect boon to the poor little waifs and strays of humanity, and the work of supervision well performed by those who are placed at the heads of the Department.

Mrs. R. Beit, Collector :—

I am again asked to report on the boarding-out system. In my district the children all have comfortable homes, are kindly treated, and as they are all living on farms they look healthy and strong, and take great pride in showing plates piled with fresh tempting butter made by themselves. My only regret is that, although the people in the district apply for children, very few can get them.

Mrs. M. E. Morris, Berry :—

In answer to your request, I beg to state that I have noticed with pleasure the good results of the boarding-out system in this portion of the Shoalhaven district. The homes vary in some instances, but on the whole they are very good. Complaints have been made in one or two cases of ill-treatment by the guardians, but those complaints were rectified by the removal of the children, and even then the children appeared loathe to leave their homes.

Mrs. C. E. Archibald, Moruya :—

My opinion is quite in favour of the boarding-out system. The children under my care are placed in christian homes, where they are trained to be truthful and honest, and are kindly treated, and all look happy and content. None want to go back to Sydney.

Mrs. M. O'Brien, Braidwood :—

Absence from home prevented me from answering your letter sooner, and I have much pleasure in stating the children in my district are in good health and happy. Their employers are pleased with them. The boarded-out children also are well cared for, are very happy and comfortable, and I think the boarding-out system excellent.

Mrs. and Miss Hall, Windsor :—

In reply to your circular, *re* our opinion of boarding-out system, it seems to work well in Windsor, for with but few exceptions the children are well and kindly treated.

Mrs. T. Haynes, Gunnedah :—

I have visited the lad C.L., in care of Mrs. C., of this town, and am pleased to say that he is well attended to, and has a very comfortable home. I am of opinion that great good will follow the boarding-out system, and think if it were more generally known that from this district there would be more applicants.

Mr. S. W. Smith, Stockton :—

In reply to yours of the 21st April, I beg to state that from my experience of the boarding-out system in this district is a complete success. All the children under my supervision seem to be quite happy and contented, and without exception they have all good homes.

Mrs. E. Hogan, Trevallyn :—

As far as I am able to judge, the boarding-out system has proved a great success as regards these three children. They seem happy and well cared for.

Mrs. A. Whittingham, Greendale :—

In answer to yours, received some days ago, I beg to say the boarded-out children in this district all present a healthy, happy appearance. I have much pleasure in adding my voice to the many who say the system works admirably. The country life is so beneficial to the children, and the country fare so exactly what children want, that I should like to see a greater number reap the benefit.

Miss E. Deane, Woollahra :—

I can only repeat what I said last time, that I consider the boarding-out system to be working satisfactorily. The homes are comfortable and the guardians kind—in some cases extremely so.

Mrs. J. Hetherington, Kangaroo Valley :—

My experience of the results of the boarding-out system has been very favourable. The children under my supervision are in good homes, are well cared for, and seem quite happy and comfortable. The guardians are mostly farmers, and the children are treated in most cases as members of the family.

Mrs. A. M. Brown, Tumut :—

In compliance with your request, I can state the children in this town under my control are with respectable people, that would look after their interest and comfort. I visit regularly, and always find the children happy and well cared for.

Mrs. F. E. Lipscombe, West Maitland :—

In replying to your circular in reference to the boarding-out system, I think it is an excellent one. Some of the children are in farmers' homes, and others with mechanics and tradesmen in the town. Those whom I visit are in most respects very happy and comfortable, and generally very much attached to their guardians, who also, in many instances, are as fond of them as if they were their own children, and often quite distressed when obliged to part with them.

Mrs. Edwards, Forbes :—

In reply to your letter of the 21st instant, requesting a report from me on the working of the boarding-out system in these districts, as far as the same has come under my notice, I can report in terms of unqualified praise on the whole. I may have had a little trouble in a few instances as to children and homes, but on the whole the result is satisfactory. So well has the system worked, that several suitable homes could now be found for more children.

Mrs. H. Furner, Camden :—

As far as I can judge from my experience of the boarding-out system, I think, if properly carried out, it is an excellent plan. The children under my supervision seem happy and well cared for.

Mrs.

Mrs. J. E. Gibson, Picton:—

Has much pleasure in stating that she has been visiting the State children now for some years, and is of the opinion that the boarding-out system is a complete success. In the homes which she visits the children are made very comfortable and happy, and their guardians treat them in every respect as their own.

Mrs. W. Campbell, Burrowa:—

As far as my limited experience allows me to judge, I think the boarding-out system excellent, especially in country districts, as the children have the benefit of fresh air and more freedom than in town.

Mrs. S. Oliver, Goulburn:—

Through ill-health I have not been able to visit the State children up to the last three months, consequently my experience of the boarding-out system is very limited. So far as I am able to judge, I believe the system to be a good one, and will prove a great benefit to the poor children, with well selected homes and proper supervision.

Mrs. C. Studds, Junee:—

I cannot speak too highly of the boarding-out system. I think it the very best that could be adopted, and I am decidedly of opinion that the boys and girls are well cared for, and are much better off than many who have parents to look after them.

Mrs. Cutcliffe, Murrumburrah:—

Reports for the information of the State Children's Relief Board that she has under her supervision only two children. Her experience of the system is in its favour. The homes of the children are comfortable, and the guardians are faithfully performing their duty towards the children.

Mrs. M. S. Antill, Picton:—

I have the honor to inform you that I think the boarding-out system a very good one. The State children in this district are well brought up, and seem to be as well cared for as the children of the family. The class of home is generally that of small farmers or respectable townspeople. I consider the guardians individually faithfully perform their duty.

Mrs. E. Gerber, Woollahra:—

I am glad to say that I can only report favourably on the boarding-out system. On the whole the children are fairly dealt with, when you consider how difficult some of them are to manage. The homes as a rule are comfortable. I found, with one or two exceptions, that the children have been well treated by their guardians.

Mrs. F. E. Taylor, Parramatta:—

The boarding-out system continues to work, in Parramatta and district, most admirably. The children are well cared for, the guardians are kind to those under their control, and the cottage homes are patterns of cleanliness and comfort.

Mrs. L. Beresford, Dalton:—

I have much pleasure in giving my opinion regarding the boarding-out system, though my experience, being of short duration, is limited. The child under my supervision, I have not the slightest hesitation in saying, is well cared for and happy. I consider the institution an excellent one.

Mrs. M. Youll, Balmain:—

After some years' experience, I have much pleasure in again expressing the opinion that the boarding-out system is the best that could be adopted. As a rule, the guardians appear to treat the children as members of their own families, and the children seem contented in their homes. Some of the children have got into very bad habits through want of previous training, but these, in most cases, are being gradually corrected. I am sorry that I have not been able to visit each family as often as should be, because the whole of Balmain is far too much for one lady visitor to attend to properly, in addition to various other engagements. Before I began, two other ladies undertook it, but one left the district two or three years ago, and the other has given up the visiting. No others have as yet been found to fill their places.

Mrs. E. G. Shearman, Penrith:—

In answer to your letter of the 21st inst., I beg to state that I am of opinion that the boarding-out system is greatly to be commended, provided suitable homes are found for the children.

Mrs. H. M. Richardson, Raymond Terrace:—

Judging by the children and homes in this district, I consider the boarding-out system a very great success. The children are all turning out well. They have been fortunate in getting into good, comfortable homes, with kind and considerate guardians, so that there are no complaints on either side.

Mrs. Brennan, Cambewarra:—

I beg to state, in answer to your letter as to the working of the boarding-out system in my district; the children are all living with farmers, and have to assist generally with farm work, which, judging from the children's appearance on my last visit, must be good for them. They are all, without exception, in perfect health, clean, and well looked after in every way, and I am pleased to say I did not hear even a trifling complaint from either children or guardians. The children here have all the advantages of a good home training. In my opinion, the working of the Act is highly satisfactory.

Mrs. S. Webb, Bathurst:—

As far as I have had opportunity of judging, I think the system of boarding-out adopted by the State works admirably. I think the homes of respectable working people are preferable to the homes of the middle class, as the children are treated as members of the family, and many of the mothers regard the children as their own, and treat them as such, and they are not exposed to the temptations to which they are in the houses of the middle class.

APPENDIX.

SCHOOL TEACHERS' REPORTS.

A. W., Superior Public School, Petersham.

With reference to the above, I have to state that the four children—three boys and one girl—attending this school compare favourably with the other children under my supervision in cleanliness, tidiness, regularity of attendance, and general appearance. In my opinion, the boarding-out system is an admirable system, admirably conducted.

W. C. B., Public School, Forbes.

The State children who have been attending the above school since I have been in charge, viz. during the past twelve months, appear well cared for, and mostly come tidily dressed.

K. H., Public School, Fox Ground:—

In reference to your request about the above, I have the honor to inform you that the two coming to the school in my charge are fairly regular in attendance, clean and tidy, and their general appearance compares favourably with the other children in the school.

E. G. P., Public School, Marrickville:—

I have only one State child in my department. She is very regular in attendance, clean, and seemingly well cared for, and compares favourably with the other scholars.

C.L.C.,

C. L. C., Public School, Marrickville :—

The State children in my department are well cared for, and in most cases attend regularly, testifying to the undoubted merits of the system.

D. T. W., Public School, Marrickville :—

My experience entirely agrees with that given by the ladies above.

A. E. R., Public School, Hoxton Park :—

I hasten to reply to your circular regarding State children. Mrs. S. is the only person here who has had, and has, these children under her care. The children under Mrs. S.'s charge always attended school very regularly, and presented a clean, tidy, and cared-for appearance. From what little I know of the boarding-out system I can do no other than say that it is a decided success.

J. C., Public School, Granville North :—

I have the honor to report that my experience of boarding-out children has been uniformly favourable. Their attendance at school has been in most cases regular, their dress decent, and their general appearance not less pleasing than that of average children who enjoy their parents' care and protection.

J. E. F., Public School, East Kangaloon :—

E. E. was sent to school always clean, neat, and tidy—in fact as well dressed as any of the other boys, and apparently as well fed and cared for as any of them. His attendance was in default; but this was owing to sore feet, and an injury he received from a horse. He is now over 14 years and has left school.

D. T. L., Public School, Pitt Town :—

In reply to circular of 1st instant, I do myself the honor to state, that so far my experience of the boarding-out system goes, I can speak favourably; their attendance on the whole has been regular; and their appearance will bear comparison with the other children. Judging by appearances, they are well fed, comfortably clothed, and are happy.

E. E. B., Public School, Cessnock :—

I have had only one child (girl) which came from the abovenamed society attending this school. Her appearance was neat and clean, and she attended school with fair regularity, and she would compare favourably with any of the other children under my charge.

E. J. W., Superior Public School, Darlinghurst :—

I have the honor to acknowledge the receipt of your favour of the 30th ultimo. My general experience of the system under your charge has confirmed my favourable opinion of its working. Speaking particularly of this school, we have here two children who are regular in attendance, clean and tidy in appearance, and seem to be very well treated by their present guardians. No one could pick them out from the other children, who are a particularly well-dressed and well-fed class.

R. B., Public School, Leichhardt West :—

I have the honor to state that the State children attending the above school are as clean, and tidy as most of the other pupils, and in some instances, more so. They look comfortable and happy and could not be distinguished by a stranger, from the other pupils.

J. H. L., Public School, Cullinga :—

In reply to your request of 30th ultimo, I am pleased to report that the State children attending this school are clean and tidy, and their attendance is regular. They appear to be well cared for by their guardians who are very respectable persons. I believe the boarding-out system to be a success.

K. L. S., Public School, Horseshoe Bend :—

In answer to your circular, I have the honor to state that the children attending this school from your Department are particularly clean, tidy, regular, and punctual. They are most interested in all their lessons, and have every appearance of being happy and comfortable in their present homes. I do not think they could be better cared for, even if they had homes and parents of their own.

J. F., Public School, Cawdor, Camden :—

I have only one of the children boarded out by the State Children's Relief Branch, F. S. He has been attending this school nearly four years. He has attended very regularly (about 100 days each half-year), and compares favourably, both in dress, appearance, &c., with other scholars, who are chiefly children of small farmers.

A. W., Public School, Greendale :—

In reply to your circular of 30th April, I beg to say that I have four State children attending my school. They attend regularly, and appear tidy, clean, and healthy. In these and all other respects they compare very favourably with the other pupils. I think the boarding-out system in the Colony is excellent, providing the children with healthy, happy homes, a good education, and afterwards the means of keeping them respectable and independent.

L. P., Public School, Rookwood :—

I have the honour to state that the State children who attend the Rookwood Public School are well cared for morally and bodily. They are clean, tidy, and regular, comparing favourably with any of the rest, and in these points surpassing some who have their natural guardians.

D. G. R., Public School, Kiama :—

In reply to yours of 30th ultimo, I beg to state that the State children attending this school are apparently well cared for. They are, without exception, decently clad, and are kept clean and tidy. They are fairly regular in attendance at school.

B. C., Public School, Riverstone :—

I have the honor to acknowledge the receipt of your circular of the 1st instant, requesting information as to teacher's experience of the boarding-out system. In reply, I beg to state that it works very well in this district. The boarded-out children attending this school are sent regularly, punctually, and cleanly, and I believe the most critical observer, provided he were a stranger, could not identify one of them from appearance, manners, or comportment.

E. A. S., Public School, Numba :—

I have the honor to report, in reply to your inquiry *re* my observations of the results of the boarding-out system, that only three of the State relief children have come particularly under my notice since I have been in the service, viz., T.B., A.B., and F.M. In each instance the boys referred to had a comfortable home and were kindly treated. Speaking in general terms, my experience of the boarding-out system informs me that the efforts made by your institution to give comfortable homes, under proper supervision, to the State relief children have been highly successful.

D. M. F., Public School, Moorefield, Canterbury :—

My experience of the boarding-out system is very limited, not having had more than one girl, H. D., from your institution, living at the time in Mrs. P.'s house. She attended this school regularly and punctually from the 12th May to 13th June last year, when she left. She was so nicely dressed that I thought she was Mrs. P.'s daughter, until one day her mother called to see her, when I discovered my erroneous impression. In every respect, appearance and dress, she was equal to any in my school.

A. W., Public School, Cordeaux River :—

In answer to your circular of 30th April, in reference to my experience of the operation of the boarding-out system, I may state I have two boys attending the school under my charge, and that they attend

attend school very fair, and that their attainments are equal to other children at this school. They seem well and respectably clothed and well cared for. There are four other boys who have left school who I have opportunities of seeing very often, who also seem to be well cared for. I believe the boarding-out system, in respect to all these boys, to be a good thing for them.

K. H., Public School, Bexley :—

In answer to your letter asking for my experience of the operation of the boarding-out system, I beg to state that there is only one State child attending this school. His attendance is regular. He is clean and tidy in appearance, apparently happy and cheerful, and polite in his address, and he seems to be as well cared for as other children.

J. M., Public School, Kogarah :—

Only one child under the supervision of the State Children's Relief Board attends the above school. Judging from the regularity, cleanliness, and general conduct of the boy, I should think that better care could not be bestowed on him were he a son of his temporary guardian. It will thus be inferred that he is in no respect inferior to the other children of the school. A pleasing feature of the boy's management is the fact that he regularly banks at the school some small amount.

C. J. B., Public School, Lost River :—

In reply to your circular of 30th April, *re* boarding-out system, I have much pleasure in stating that during my short experience of it I consider the results therefrom highly satisfactory. The children (3) attending this school are fairly regular, clean, and well-dressed; in fact, they compare favourably in all respects with the other children under my supervision.

W. F., Public School, Woollahra :—

Two State children attend this school. They attend regularly, and appear to be well cared for. I am pleased to say that State pupils with whom I have come in contact appear to be well treated and happy.

W. B., Public School, Surry Hills, Sydney :—

The number of State children attending this school is somewhat small; but, as far as this limited experience enables me to judge, such pupils are in general well-treated, clothed, and attended to.

J. J. W., Public School, Redfern :—

In reply to your memo. asking me for a report on the State children of this school, I have pleasure to state that those who attend this school seem very fairly looked after. Their appearance is neat and clean, their clothes fairly good, and they seem like children who are well cared for.

J. C., Public School, North St. Leonards :—

With reference to your circular, *re* the boarding-out system, I beg to say that my opinion of it, judging from the State children who attend the above school, is very favourable. The children appear happy and contented, and in other respects compare favourably with those of well-regulated families. They are regular in their attendance and clean and tidy in their habits.

T. McL., Public School, Cobbitty :—

As I stated last year, I have again to report favourably of the operation of the boarding-out system, so far as my experience goes. The four children in this district—two with Mrs. C., and two with Mrs. G.—attend school regularly, are clean and tidy, and their general appearance all that could be desired.

E. H. G., Public School, Canley Vale :—

Seven State children are at present enrolled in this school, and judging from their regular attendance and general appearance, I have good reason for saying that the results in this neighbourhood of the boarding-out system are highly satisfactory.

F. J. G., Public School, Crookwell :—

In reply to your circular of to-day regarding the matter quoted above, I have the honor to forward the following report :—There are four children attending this school from the Children's Relief Department. All the above are punctual and regular in attendance, clean and tidy, giving evidence, both in appearance and conduct, of wholesome and judicious supervision by their guardians. The merits of the boarding-out system and its chief advantages appear to me to result in the complete isolation of the children from the bad influences resulting from the herding together in large numbers. The evils of our old convict system and our present gaol system are directly attributable to the cause stated. Under good guardianship the children have a chance of acquiring a better education, better morals, and greater self-respect than under the former system. My knowledge of the system is limited, and I can only judge of it by its practical results in the children under my supervision. I regard the system as an admirable one, and if its results are as beneficial in every case as in the cases of the children mentioned, untold good must follow. I esteem it a privilege to bear this testimony.

R. B. P., Superior Public School, Canterbury :—

Referring to your circular of 30th April, 1891, *re* working of the boarding-out system in this Colony, with few exceptions I have found that the children, as a general rule, are clean and tidy; their attendance is very fairly regular, and their general appearance always compares favourably with that of the other children under my supervision.

R. C., Public School, Arncliffe :—

Referring to your circular of the 21st instant, I have the honor to state there is only one State child attending this school. She attends school the required number of days, and is clean and tidy, attentive and diligent—is, in fact, a well-behaved girl.

E. R., Public Kindergarten School, Newtown :—

In answer to your circular of 21st instant, with reference to the few State children that have been attending this school, I should say the boarding-out system is a success. Those attending here are regular, clean, and tidy, and appear to be well cared for, their appearance comparing favourably with that of their school-fellows generally.

M. L. A., Public School, Baw Baw, Goulburn :—

Your letter of 21st instant received by me 23rd instant, asking for report *re* State children. In reply, I beg to state that during the twelve months since last report twelve State children have been under my supervision, and I can bear testimony to the faithful way in which the Act is carried out in these parts. The children are well cared for in every respect, and no difference is discernible between them and the remainder of the children. I do not think that the Act could be ameliorated.

J. W., Public School, Baulkham Hills :—

In reply to your circular of 21st instant regarding the results of the boarding-out system, I beg to state that I am not cognisant of any children at present in this district who ought to be attending school (being boarded out). I believe the system has worked well in the case of H.T., who is growing up a fine useful working member of society. While at school he attended the required number of days prescribed by the Act of Parliament, and was always clean and tidy, and his general appearance and behaviour compared favourably with other children.

J. A., Public School, Mummel :—

I am glad to be able to bear testimony to the good results attending the boarding-out system in this neighbourhood. The children are well cared for, clean and tidy, regular in school attendance, and apparently quite happy. Their general appearance, behaviour, and progress are equal to, and in some cases better than, those of the other children under my supervision.

R. A. P.,

R. A. P., Public School, Taralga :—

In reference to my experience of the operation of the boarding-out system, I beg to state it is a boon to many children, who otherwise would in all probability fall into crime, fill our gaols, and become a burden to the state ; but thanks to the Relief Branch they are provided in many cases with comfortable homes, proper food and clothing, kind guardians, and education. I may further state that those with whom I come in contact in this district are, as a general rule, clean and tidy ; that their attendance at school in most cases is fairly regular, and that their general appearance will compare favourably with that of the other children under my supervision.

V. S., Public School, Hartley :—

In reference to a circular from your Department, I have the honor to inform you that one pupil attends this school. This pupil attends here regularly, and comes clean and tidy, also that her general appearance is everything that can be desired.

E. P., Public School, Kellyville :—

I have the honor to acknowledge the receipt of your circular of 30th April. The boarding-out system, I think, is one of the best institutions we have in the Colony, and have taken great interest in it for the last seven or eight years, and from my experience it works admirably in bringing up these poor children to become respectable men and women to be able to earn their own living, and I think that the management deserve the greatest thanks and praise from the community at large. The State children attending my school come regularly, and are clean and tidy, and will bear favourably in comparison with any in this neighbourhood.

W. M., Public School, Wilberforce :—

In reply to yours of the 1st instant, I have the honor to report that two State children have been attending this school, and I must say that they have attended very regularly, that they were always clean and tidy, and on the whole they would compare favourably with the majority of the children attending this school.

J. J. G., Public School, Mittagong :—

The children attending my school, who are boarded out by the State, have, I believe, good homes, are well fed, and comfortably clothed. They attend regularly, are clean and tidy, and in appearance compare favourably with the other children of the school.

J. P. G., Public School, Raymond Terrace :—

In reply to your letter of 1st May instant, asking for my opinion, formed from observation of the children attending my school, upon the merits of the boarding-out system of the Colony, I have the honor to inform you that I believe the system to be the best that could be framed, both for the State and for the neglected children. The State escapes from the necessity of establishing and supporting the numerous homes and the expensive staff of officials to each which would be necessary if the children were kept under the direct control of the Government, and the children escape from the cold, harsh, workhouse-like monotony of the so-called homes, and in nearly every instance obtain instead a real home in some decent family, where they are treated like the children of the family, and are trained up as respectable members of society. As pupils, I have always found these children to compare favourably with the average class of children attending school. They are, as a rule, neat and clean, respectful in demeanour, fairly attentive to their work, and make very satisfactory progress with their studies. Some are exceptionally bright children, but the whole show plain evidence to the attentive observer that they are being gradually improved to a higher status than that which they formerly occupied, as a result of the system by which they are controlled, and an evidence that the system is really doing the work for which it was called into existence.

E. B., Public School, Newcastle East :—

In reply to your circular of 1st instant, I beg to state that at present there are no State children attending this school. My experience of the operation of the boarding-out system has been a favourable one. The children under its control who attended this school were kept very neat and tidy, their attendance was fairly regular, and their general appearance compared favourably with the other pupils of the school, showing that great care had been taken to find suitable guardians and homes for them.

T. McA., Public School, Windeyer :—

Your circular to hand to-day, and it gives me much pleasure to comply with the request contained therein. My experience of the system has been limited, but I am favourably impressed with what I have seen. All the children (State Relief) that I have had under my charge have been fairly regular, and always well-behaved. As regards cleanliness and tidiness they compare very favourably with other children. I am of opinion that, under strict local supervision, the system is decidedly a success.

W. G. M., Superior Public School, Wallsend :—

In reply to your circular, dated 1st May, I have the honor to inform you that there are four children coming to the school who are under the State Children's Relief Branch, and these are clean, tidy, well nourished, and attend school regularly. These children, one of my assistants tells me, who knew them formerly, they are better cared for now than when their parents were alive.

D. A., Public School, Tempe :—

In reply to your memo. of the 1st May instant, I beg to state that the children attending this school from your Department compare favourably with children in a similar rank of life. They attend well and are fairly clean and tidy.

T. S., Public School, Neutral Bay :—

There is only one State child at this school, and judging from her I consider the results of the boarding-out system beneficial. She is regular in her attendance at school, is clean and tidy, and her appearance is in no way different to that of the majority of the pupils.

B. E., Public School, Jamberoo :—

I have the honor to acknowledge the receipt of your circular in which I am requested by your Department to state concisely my experience of the boarding-out system of State children. I still think as highly of both the system itself and its results as I did twelve months ago. I have at present six State children in my school, who without exception, compare favourably with the other pupils. They are evidently well cared for by the guardians, as proved by their personal appearance and happy, contented look. One of these six boys is rapidly becoming leading boy of the school, being now almost equal in attainments with the best boy in the fourth class. The boys are well-behaved and obedient, and give no more trouble to their teachers than children of their age usually do. They are evidently well-liked by their school-mates, and join freely in all the usual games of the school-ground. These boys come invariably in tidy clothes of about the same quality as worn by the children of the farmers in this locality ; in short, they could not be distinguished from the ordinary pupils by any casual observer.

G. B., Public School, Morpeth :—

For the information of the State Children's Relief Board, I beg to report that, as far as my observations extend regarding the boarding-out system, no better method of dealing with such a social problem appears practicable. I, however, think that your Board should take into its consideration the expediency of instituting, say, a quarterly system of bonuses, given subject to three successive monthly good reports from foster-parents and teachers or clergymen. These bonuses should be for good behaviour and obedience, and should not exceed 2s. 6d. or 2s. in value. They might take the form

form of working tools, books, ornaments, &c. They would surely act as incentives to good conduct, and, perhaps, be the means of steadying most of the turbulent spirits among this class of children. The children attending this school are clean and tidy, they attend regularly, and their appearance compares very favourably with the rest of the pupils.

J. A., Superior Public School, Windsor :—

I have the honor to submit the following as my experience on the boarding-out system. Speaking generally, the system is a success, but not entirely so; but the want of success in some cases seems to be attributable to circumstances rather than to any defect in the system itself. The children seem to be kindly treated in the generality of cases. They come to school clean and tidy, are regular in attendance, and can hold their own with the other children. It seems to me that the cause of failure in some cases arises from the fact that the children have become hardened and vicious before they have been removed from the scenes of their earlier associations.

J. W. W., Public School, Merrilla :—

In reply to your circular of the 1st instant, I have to inform you that there is only one State child attending this school, and as far as appearance goes, her own parents might have done less, but could not have done more for her than is being done by those in whose charge she has been placed. She is clean and tidily dressed, and appears to be happy and well cared for. Her attendance at school is not quite to my satisfaction.

T. E. D., Public School, St. Mary's :—

I have much pleasure in answering your queries in reference to the boarding-out system. From careful observation I glean from the cases that have come under my direct notice, that most satisfactory results obtain from this system. The children are wonderfully clean and tidy, and will compare most favourably with most of the 300 children directly under my supervision. The regular attendance at school is all that could be desired.

W. L., Public School, Thirlmere :—

Referring to your circular of the 1st inst., requesting information respecting condition, &c., of State children under my supervision, I beg to state that I have four attending this school. They attend very regularly, are clean and tidy, apparently well fed, and compare favourably with the other children attending the school.

J. W. C., Public School, Tarago :—

I am in receipt of your circular, asking for my observations in reference to the boarding-out system as far as my experience goes; and I have much pleasure in stating that what I have seen and know of children so placed, that branch of the Department of Charitable Institutions is doing a good work. There is one State child, a boy, about 10 years of age, attending this school, and he is truly a very good boy in his behaviour, and appears to be well looked after. His attendance at school is regular and punctual; his clothes are good, and he appears to be no stranger to soap and water: in fact, he has a good home, and he appears to fully appreciate it. This is the only State child attending this school.

A. S. B., Public School, Singleton :—

In reply *re* boarding-out system, I believe the results generally to be satisfactory, depending very largely on the character of persons to whom the children are entrusted. There are two children at this school. They are fairly regular in their attendance, and are as clean and as tidily-dressed as the poorer class of children.

J. S. M., Public School, Greta :—

In reply to your circular of 30th ultimo, asking for a statement of my experience of the operation of the boarding-out system, I have until very recently never come across any of the "boarding-out" children. Those I have had under my charge at school appear to have fallen into good hands, and to have been treated like children of the family in which they have been placed. The female guardian in one case is addressed as "mother," and in another as "aunt." In both these cases the children under notice appeared at school clean and neat, and attended sufficiently regular to avoid falling into default.

D. T., Public School, Gentleman's Halt.

In reply to your memorandum of the 30th ultimo, I have the honor to inform you that I have not had much experience of the boarding-out system of the State children. There are only four attending this school, and as far as I know the guardians of those, I believe, treat them kindly; and their appearance compares favourably with the other children under my supervision. Their average attendance for the last six months was 70 days +.

R. W. G., Public School, St. Peter's :—

There are seven (7) State children attending this. They all appear to be taken good care of. They attend regularly, and are as a rule clean and tidy. In every respect they are quite equal to the other children attending this school.

P. R., Public School, Gunning.

In compliance with the request of the State Children's Relief Board, I beg to state that there are seven State children attending this school, who, without exception, attend with pleasing regularity, are clean and tidy, and compare favourably in their general appearance with the other school children. They all appear happy, and seem to have good homes.

W. S., Public School, Mangrove Creek :—

In reply to yours 30th April, 1891, I beg to state that only one child (a boy) attends this school who is treated very well and attends school regularly.

J. K., Public School, Wollombi :—

I have the honor to inform you that my observations of the results of the boarding-out system leads me to the conclusion that the children are properly treated, and get a very reasonable share of schooling. I have never found them dirty or untidy.

J. F., Public School, North Newtown :—

In reply to your circular of the 1st instant, I beg to state that, as far as I can judge, the boarding-out system works well. The State children who have attended this school, have always compared favourably with other children in dress, cleanliness, contentment, and regularity of attendance.

H. M. M'A., Public School, Jugiong :—

I beg to state that at present there are only two State School children here. One does not attend school, being over fourteen years of age; the other attends regularly. Both those children and others who came under my notice here formerly have as much home comfort and are as well kept and cared for as any children who come to the school. I have not known one instance now, or in the past, of a State School child being neglected or unkindly treated.

E. G. W., Superior Public School, Nowra :—

In reply to your circular of the 1st May, I have to state that the children under the control of the State Children's Relief Department, and attending this school, are as clean and tidy as the majority of those enrolled; indeed, two of them are very well cared for, and occupy places in the highest classes. In country districts like this, the children are well fed, warmly clothed, kept from bad companions, taught to be handy, and grow up sturdy and free from many of the vices that might be contracted in large towns.

1891.
(SECOND SESSION.)

NEW SOUTH WALES.

PROTECTION OF THE ABORIGINES.

(REPORT OF BOARD FOR, 1890.)

Presented to Parliament by Command.

The Aborigines Protection Board to The Principal Under Secretary.

Sir, Office of the Board for the Protection of Aborigines, Sydney, 16 April, 1891.

In accordance with the established practice, we have the honor to transmit, for the Colonial Secretary's information, the following Report of the proceedings of the Board during the year 1890 together with information regarding the present condition of the aborigines throughout the Colony, and a detail of the expenditure of the funds voted by Parliament for their assistance.

The Honorable William Henry Suttor, M.L.C., Vice-President of the Executive Council, accepted a seat on the Board, having been appointed thereto on the 25th July last.

The census returns, which have been collected as usual by the police [*Appendix B*], show a total of 4,693 full-blood aborigines and 3,007 half-castes, making a grand total of 7,700. It will be seen on comparing these figures with those for the previous year, that there has been a total increase of 171 during the year 1890 (41 full-blood and 130 half-castes). This increase has not been caused by an excess of births over deaths; on the contrary, the number of deaths amongst the full-blood aborigines exceeded the births by 46, whilst amongst the half-castes the natural increase falls short of the total by 25. The increase is to be accounted for by the fact that in the border districts the aboriginal population has been augmented by arrivals from the other Colonies, notably in the Barrington, Goodooga, and Mogil Mogil districts on the Queensland border, the Silvertown district on the South Australian border, and the Delegate district on the Victorian border. In the two latter districts alone there has been a total increase of 63 full-blood aborigines by this cause.

The sum expended by the Government during the year on behalf of the aborigines amounted to £12,622 2s. 11d. [*See Appendix D.*] This includes an expenditure of £6,129 18s. 4d. by the Board. £534 8s. 7d. by the Medical Adviser to the Government, £3,139 4s. 11d. by the Aborigines Protection Association, and £2,818 11s. 1d., from Votes of other Departments.

The expenditure by the Board is given in detail. [*See Appendix E.*] It will be seen that during the year 1,324 aborigines have been fed and clothed, and that tents, farming implements, seed, fencing wire, galvanised-iron for dwellings, fishing boats and gear, &c., &c., have been provided, a schoolhouse erected on the reserve at Walaga Lake, and a residence built for the Superintendent placed in charge of the Aboriginal Settlement at Brungle.

The expenditure of public funds by the Aborigines Protection Association, on behalf of the three aboriginal stations at Cumerogunga, Warangesda, and Brewarrina, has far exceeded that expended during any previous year. The subjoined table shows the amounts paid to the Association from the Treasury during the past five years:—

	£
1886	2,010
1887	1,386
1888	2,184
1889	2,252
1890	3,139

446—A

The

The Association have also submitted further claims which have been incurred during the year, amounting in all to £1,574 0s. 1d., with a request, as they are absolutely without funds to meet them, that they be paid by the Government. A detail of this amount, and of that already paid on behalf of the Association during 1890, is given in Appendix H.

The following is a list of the contributions received by the Association from the general public since 1885:—

	£
1885	958
1886	758
1887	1,180
1888	444
1889	512
1890	220

It will thus be seen that these contributions have become merely nominal, and as a consequence the institutions are now almost entirely supported by Government funds. Under these circumstances the Board are now considering the advisability of recommending to the Government that the three Aboriginal Stations managed by the Association be taken over, and placed under the control of the Board.

Full and comprehensive reports have been obtained of the condition and requirements of the aborigines throughout the Colony, under the following headings:—Employment, Aid from the Board, Reserves, Education, Boats, Intemperance, &c., &c. [*See Appendix A.*]

The total number of aboriginal children now receiving instruction is 485—442 at Public Schools, and 43 privately. These figures exhibit a total increase of 57 on the previous year. Every inducement is held out by the Board to induce the children to attend the Public Schools. Where any are found willing to receive instruction, arrangements are made for their being supplied with suitable clothing, and rations are issued to them so long as they keep up a regular attendance at school.

The Board have every reason to be pleased with the results of their efforts for the education of the aboriginal children. Reports are constantly being received which tend to show that they, as a rule, make apt and diligent pupils, and in many instances are equally as advanced as European children of their own age.

During the year the school at the Brungle settlement in the Tumut district has been reopened, and separate schools for the education of aboriginal children have been established at Barrington in the Copeland district, and at Walaga Lake near Tilba Tilba on the South Coast. The Minister of Public Instruction has also decided to open similar schools on Pelican Island in the Macleay River, at Wauchope, Rolland's Plains, and Forster, and arrangements are now being made with a view to the provision of suitable buildings, and for the appointment of teachers at those places.

The Board have made exhaustive inquiries regarding the practicability of establishing an asylum for the benefit of the aborigines on the northern rivers, the Richmond, Clarence, and Tweed, in order that the aged and infirm may be provided with a suitable home, and that the children may have facilities afforded for schooling. This matter has already formed the subject of a representation to the Colonial Secretary in a separate communication.

The appendices accompanying this Report are voluminous, but the Board consider them of sufficient public interest to warrant their publication as an official record.

We have, &c.,

APPENDICES.

APPENDIX A.

REPORTS showing condition of aborigines throughout the Colony.

Tweed River District.

NUMBER of aborigines in district, 120—95 full-blood, and 25 half-castes.

A few of the men earn a livelihood on cattle stations, but the majority are employed stripping cane and cutting timber. Some of the women earn a little by washing and scrubbing for the settlers. Eleven old aborigines are being supported by the Board. The following supplies have been distributed during the year:—3,238 lb. flour, 100½ lb. tea, 809 lb. sugar, 8 lb. currants, 8 lb. raisins, 6 lb. suet, 31 lb. meat, 23 pairs moleskin trousers, 23 crimean shirts, 23 coats, 14 dresses, 14 petticoats, and 130 blankets.

No children are receiving instruction; 4 only of school age live within a radius of 5 miles of a school.

All the aborigines are supplied annually with a blanket by the Government. The issue is necessary, and they are in no way misappropriated.

All are addicted to habits of intemperance. The liquor, as a rule, is supplied at night, by Europeans of low character and kanakas. The camps have been frequently watched by the police, but so far without success.

When ill, which is but seldom, the aborigines attend to one another, preferring their own methods of treatment. All are at present in good health and want for nothing.

Richmond River District.

Number of aborigines in district, 524—413 full-blood, and 111 half-castes.

A number are employed on cattle stations, as stockmen and labourers; others work for farmers and selectors, burning and clearing off scrub, stripping sugar-cane, &c. There are numbers who are too indolent to work, who wander about the bush, living on native animals. Several families residing on Cabbage Tree Island are clearing and preparing the land for cultivation, having been supplied with farming implements by the Board. They have also been furnished with building tools, and a punt to convey their produce and stores between the island and the main land. Application has also been made to the Minister for Lands to have the island set apart as a reserve for their use. Fifteen old aborigines in various parts of the district are being supported by the Board. The following supplies have been distributed during the year:—5,770 lb. of flour, 177 lb. tea, 1,415 lb. sugar, 7 lb. rice, 94 lb. beef, 3 lb. salt, 14 lb. currants, 14 lb. raisins, 13 lb. suet, 30 pairs trousers, 30 shirts, 30 coats, 34 dresses, 34 petticoats, 1 cross-cut saw, 2 handsaws, 4 gimlets, 3 axes, 3 tomahawks, 2 hammers, 1 auger, 6 grubbing hoes, 3 garden hoes, 4 spades, 2 sets maul-rings, 2 sets wedges, 590 blankets, and 2 cwt. seed potatoes.

Five reserves have been set apart in the district for the use of aborigines, to whom every inducement has been held out by the Board to occupy and cultivate them, but without avail. They are as follows:—

1. 3,000 acres, situated about 35 miles from Casino.
2. 28 acres, about 3 miles from Ballina.
3. 39½ acres, 6 miles from Lismore.
4. 40 acres, 2 miles from Cavanba.
5. 90½ acres, situated within the municipal boundary of Casino.

Three children only are receiving instruction, and they have to walk 2 miles to the public school which they attend. A large number, of school age, receive no education; but as their parents are constantly wandering about, it would be useless to endeavour to get them to attend school.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

The majority are addicted to habits of intemperance, but there are a few who do not drink. The liquor is stealthily obtained at public-houses, and from some of the townspeople for whom they do odd jobs. Every attempt is made by the police to check the practice, but great difficulty is experienced in obtaining information to prosecute.

At Casino, Lismore, and Wardell, when the aborigines are ill, they are attended by the Government Medical Officer. At other places in the district they prefer their own methods of treatment.

Clarence River District.

Number of aborigines in district, 415—313 full-blood, and 102 half-castes.

The men are generally employed by farmers and selectors: farming, stripping sugar-cane, cutting timber, burning off scrub, and as stockmen. Some also earn a little by selling fish and honey, and a few by gold-digging. Some of the women wash and scrub for the Europeans. Twenty old aborigines and 1 child are being supported by the Board. A number who were rendered destitute by the flood at Grafton in March were assisted by the Board in the shape of food, &c., for a period of three weeks, and allowed to camp in the police paddock. The following supplies have been distributed in the district by the Board during the year:—6,791 lb. flour, 213½ lb. tea, 1,721 lb. sugar, 66 loaves bread, 10 lb. rice, 15 lb. currants, 15 lb. raisins, 13 lb. suet, 72 lbs. meat, ½ lb. pepper, 1 lb. salt, vegetables at a cost of 9s. 6d., ½ lb. tobacco, 41 pairs trousers, 41 shirts, 41 coats, 37 dresses, 37 petticoats, and 450 blankets.

Ten children are receiving instruction at the public schools. The number living within a radius of 5 miles of a school is 22, but their parents seldom remain in one locality for any length of time.

Nine areas of land have been set apart in the district for the use of the aborigines, but notwithstanding every inducement held out by the Board, none have, up to the present, been occupied except occasionally for camping on. They are as follows:—

1. 150 acres on the Nymboida River, 32 miles from South Grafton, consisting of open forest land, well grassed.
2. 114 acres on the Orara River, 38 miles from Grafton, scrub land, suitable for cultivation.
3. 180 acres, 6 miles from Yamba, part open forest, part sandy scrub.
4. 150 acres, 12 miles from Grafton, open forest land, fairly well grassed.
5. 85 acres, 18 miles from Lawrence, open forest land, suitable for grazing.
6. 100 acres, 1 mile from Iluka, suitable for cultivation.
7. 120 acres, 2½ miles from South Grafton, suitable for cultivation.
8. 80 acres, 9 miles from Grafton, suitable for cultivation.
9. 160 acres, 35 miles from Copmanhurst, suitable for cultivation.

All the aborigines are supplied annually with Government blankets. The issue is necessary and they are in no way misappropriated.

The majority are addicted to habits of intemperance. A number of convictions have been obtained against publicans for supplying them with liquor.

All in the district are in fairly good health. The Government Medical Officer at Grafton receives an honorarium for attending the aborigines in his district when they are ill. At other places in the Clarence they usually attend to one another.

Glen Innes District.

Number of aborigines in district—142—83 full-blood and 59 half-castes.

Some are employed on stations shepherding, &c.; others hunt opossums for their skins which they sell; a few earn a living fossicking for gold. Fifteen old aborigines and 22 children are supported by the Board. The following supplies have been distributed during the year:—8,735 lb. flour, 271½ lb. tea, 2,184 lb. sugar, 17 lb. currants, 15 lb. raisins, 10 lb. suet, 1,216 lb. meat, 15 pairs trousers, 15 shirts, 15 coats, 10 dresses, 10 petticoats, and 160 blankets.

Two children attend the public school at Inverell. Ten only of school age reside within a 5 miles radius of a school. All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

The majority are addicted to habits of intemperance, the liquor being generally obtained from their employers.

When ill they are attended by the Government Medical Officers for the districts.

Tenterfield

Tenterfeld District.

Number of aborigines in the district, 102—73 full-blood and 29 half-castes.

Some are employed on stations as stockmen, boundary-riders, &c.; others ringbark for selectors, whilst a few earn a living fossicking for gold. Four old aborigines and 2 children are being supported by the Board. The following supplies have been distributed during the year:—756 lb. flour, 23½ lb. tea, 191 lb. sugar, 5 lb. currants, 5 lb. raisins, 2½ lb. suet, 6 lb. beef, 21 pairs trousers, 21 shirts, 21 coats, 15 dresses, 15 petticoats, and 110 blankets.

None of the children reside within 5 miles of a school. Two are receiving instruction privately.

All are supplied annually with blankets by the Government.

The majority are temperate. Those who do drink obtain the liquor stealthily from public-houses.

When ill they are treated by the Government Medical Officer for the district.

Armidale District.

Number of aborigines in the district, 132—90 full-blood, and 42 half-castes.

The majority live on sheep and cattle stations—the men as stockmen, &c., the women as domestic servants. Some earn good wages. Four old aborigines are being supported by the Government. The following supplies have been distributed during the year:—1,460 lb. flour, 45½ lb. tea, 366 lb. sugar, 4 lb. currants, 4 lb. raisins, 2 lb. suet, 9 pairs trousers, 9 shirts, 9 coats, 3 dresses, 3 petticoats, and 90 blankets.

An area of 320 acres has been set apart, about 2 miles from Walcha, for the use of the aborigines. It consists of open country, is well grassed, and suitable for cultivation or grazing purposes. For a number of years it was occupied and cultivated by the aborigines, but there are none residing on it at present.

Four half-caste children attend the public school at Walcha, the remainder live too great a distance from any school to attend.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

All are addicted to habits of intemperance. The liquor is generally obtained from public-houses. The police use every effort to check the practice.

When ill, they are attended to by the Government Medical Officer for the district.

Bellinger River District.

Number of aborigines in the district, 57—51 full-blood, and 6 half-castes.

They are generally employed felling timber and farming; 28 old aborigines and 1 child are supported by the Board. The following supplies have been distributed during the year:—5,480 lb. flour, 170½ lb. tea, 1,378 lb. sugar, 4 lbs. currants, 4 lb. raisins, 6 lb. suet, 12 pairs trousers, 12 shirts, 12 dresses, 12 petticoats, and 60 blankets.

One child, only, receives instruction at the public school. Three others of school age, residing within 5 miles of a school do not attend, their parents, however, are constantly roaming from one place to another.

All are supplied with Government blankets annually. The issue is necessary, and they are in no way misappropriated.

Many are addicted to habits of intemperance, the liquor being supplied by the persons who employ them, and by Europeans who visit their camps.

In most instances, when sick, they attend each other; but in serious cases the Medical Officer for the district prescribes for them.

Nothing further can be done by the Board to improve the condition of the aborigines of this district.

Nambucca River District.

Number of aborigines in the district, 114—52 full-blood and 62 half-castes.

Two reserves have been set apart in this district for the use of aborigines. (1) Brushy Island, containing an area of 70 acres, distant about a mile and a half from Nambucca Heads. It consists of fairly open country, is well grassed, and very suitable for cultivation. About 8 acres have been partially enclosed by the aborigines with a wire fence, and are now being cultivated, maize being planted. It is occupied by about 30 aborigines, more than half of them full-blood, who have erected small cottages for themselves. The estimated value of improvements is £150. Seed, maize, and potatoes, fencing-wire, a plough, harrow, and other farming implements have been supplied these aborigines, and for the last three months of the year they received rations from the Board, as an encouragement to further cultivate the land. The other reserve, containing an area of 20 acres, situated 2 miles from Macksville, is at present unoccupied.

A number of half-caste men are permanently employed at local saw-mills, others clearing, &c., for selectors.

Twenty-nine old and infirm aborigines, and 9 children who attend school, are supported by the Board. The following supplies have been distributed during the year:—10,289 lb. flour, 320 lb. tea, 2,590 lb. sugar, 9 lb. currants, 9 lb. raisins, 17 lb. suet, 35 lb. meat, 13 lb. oatmeal, 25 pairs trousers, 20 shirts, 7 dresses, 7 petticoats, 49 yards wincey, 21 yards flannel, 5 boys' suits, 4 boys' coats, 12 packages Epsom salts, 2 bottles St. Jacob's oil, 1 plough, 1 harrow, 3 grubbing hoes, 3 chipping hoes, 3 brush-hooks, 4 cwt. seed potatoes, 8 bushels maize, 6 coils barbed-wire, 14 lb. paint for boat, 2 quarts paint oil, 1 paint brush, and 110 blankets.

They have been provided with a fishing-boat by the Board, which is well cared for, and kept at Worimbi Island. The aborigines catch fish, which they sell to the inhabitants of the district.

Nineteen children receive instruction at the public school. The total number of school age living within 5 miles of a school is 23.

All are supplied annually with blankets by the Government. The issue is necessary, and they are in no way misappropriated.

The majority of the full-blood aborigines are addicted to habits of intemperance. The liquor is generally obtained from Europeans. Many of the half-castes are sober and industrious.

When ill they are attended to by the Government Medical Officer for the district.

Macleay River District.

Number of aborigines in the district, 468—304 full-blood and 164 half-castes.

Eight reserves have been set apart in this district for the use of aborigines. They are as follows:—

1. 11½ acres, situated 9 miles from Gladstone, consisting of rich alluvial land, suitable for cultivation. The whole area has been cleared and is being cultivated by a full-blood aboriginal and his family, maize being grown. Having lost all their last season's crop by the floods, the Board are issuing rations to them until they get their next crop in.
2. 2½ acres, situated on the bank of the Macleay, about 5 miles from Gladstone, consisting of rich alluvial land, suitable for cultivation, in fact will grow almost any crop. The whole area has been cleared, and is being cultivated by a half-caste family.
3. 26 acres, situated 5 miles from Gladstone, consisting of rich alluvial river land, cleared of timber and scrub, well grassed, and very suitable for cultivation. Ten acres have been fenced in for a horse paddock, 26 acres cleared for ploughing, and 16 acres placed under cultivation, maize being grown. It is occupied by a half-caste family who have a barn, with skillion attached, erected on it, where they reside. The estimated value of improvements is £258.
4. 80 acres, Pelican Island, situated about 5 miles from Arakoon, consisting of rich alluvial soil, on which grass grows luxuriantly, and is very suitable for farms, 20 acres have been fenced in, 65 acres cleared and under cultivation, crops—maize. It is occupied by about 30 aborigines, half of them full-blood. The half-castes have built themselves good slab houses, with iron roofs, two full-blood aboriginal families live in bark huts. A number of weatherboard huts, with iron roofs, have been built by the Board on the reserve for the old and infirm, and they have proved a great source of comfort during the winter. The half-castes have liens upon their crops by which they are now obtaining rations, &c., on credit, the full-blood aborigines, with their families are drawing rations from the Board until they get returns from their crops. The police report that the land is as well farmed as Europeans could do it. The estimated value of improvements upon the reserve is £626.

5. 41 acres, Fattorini Islands, situated about a quarter of a mile from Gladstone, consisting of good open country, well suited for cultivation. Thirty-two acres have been cleared and are under cultivation, maize being grown. It is occupied by two half-caste and a full-blood family—14 in all. They have two barns and a hut erected on it. The estimated value of improvements is £300. The half-castes are obtaining rations from a local storekeeper who has a lien upon their crops. The full-blood family is receiving rations from the Board until they get their next crop in.
6. 360 acres, portion of Shark Island, situated 10 miles from Arakoon, consists of rich alluvial land, well grassed and very suitable for farms. About 7 acres have been cleared of scrub and are now being prepared for planting maize. It is occupied by two full-blood aboriginal families who have been supplied by the Board with clothing and are having rations issued to them until they get returns from their first crop.
7. 65 acres, situated 44 miles from Kempsey; about 20 acres open country, well grassed and suitable for vegetables and fruit trees, the remainder is rich scrub land suitable for maize, sugar-cane, and pumpkins. The fence enclosing the land was destroyed by bush fires, but material is being prepared by the aborigines to refence it with a good two-rail fence. About 10 acres have been cleared and more is being prepared for coming crop—maize, pumpkins, and potatoes. It is occupied by 5 aborigines, who have two bark huts erected upon it. Farming and fencing tools have been supplied these aborigines, and they are also receiving rations from the Board whilst engaged fencing, cultivating the land, and building a house for a few old and infirm.
8. 146½ acres, situated 14 miles from Kempsey; about 20 acres open country, well grassed, and suitable for vegetables and fruit trees; the remainder is rich scrub land, suitable for growing maize, sugar-cane, and pumpkins. No portion is fenced in at present, but posts and rails are ready for 33 chains of fencing. About 14 acres have been felled, and are now ready to be burnt off, when maize, pumpkins, and potatoes will be planted. It is occupied by 8 aborigines, who have two bark huts erected on it, and the material being prepared for a large slab house, with shingle roof. Rations are being issued to them by the Board, to encourage them in their work.

A number of aborigines who do not reside on the reserves earn a living assisting farmers planting and harvesting.

The aged, sick, and infirm, orphans, and children attending school, receive all they require in the shape of food and clothing from the Board. The number receiving such aid is 100 adults and 38 children. The following supplies have been distributed during the year:—42,790 lb. flour, 1,329½ lb. tea, 10,759 lbsugar, 30½ lb. raisins, 30½ lb. currants, 61½ lb. suet, 123 lb. beef, 54 lb. rice, 44 lb. arrowroot, 28 lb. sago, 13 lb. oatmeal, 24 pairs moleskin trousers, 24 crimean shirts, 19 wincey dresses, 19 flannel petticoats, 6 hats, 12 yards flannel, 6 axes, 2 maul-rings, 2 adzes, 1 hammer, 2 hand-saws, 1 morticing axe, 4 grubbing hoes, 1 chipping hoe, 2 spades, 1 brush hook, door-hinges, 24 lb. nails, 3 water kegs, and 490 blankets.

The aborigines of this district are provided with three boats, one each being kept at Shark Island, Pelican Island, and Fattorini Island. They are used by the men who are engaged in farming. One has only lately been repaired and painted at a cost of £10 14s. 3d. They are in excellent condition.

Thirty-eight children attend the public schools; 15 others, of school age, residing within 5 miles of a school, receive no instruction whatever.

All are supplied annually with Government blankets, the aged and sick receiving two each. The issue is necessary, and they are in no way misappropriated.

A few of the old aborigines are addicted to habits of intemperance, the liquor being supplied to them by farmers. In the Arakoon portion of the district there has been less drunkenness this year than any of the previous years since 1883.

When ill they are attended to by Dr. Gabriel, of Kempsey.

Hastings River District.

Number of aborigines in district, 100—32 full-blood and 68 half-castes.

Three areas of land have been set apart in this district as reserves for aborigines. They are as follows:—

1. Portion (18 acres) of an island in the Hastings River, situated about 4 miles from Wauchope. It consists of scrub land, the greater portion being suitable for cultivation. Every inducement has been held out to the aborigines to occupy it. They have been provided with tools, rations, and a boat. A number remained on it for a season, brushed about an acre, and planted a little corn. They then left, giving as their reason that there was no water on the island, and were afraid of floods. They cannot be induced to return, and their boat has been sent to Shark Island, in the Macleay district, for the use of the aborigines at that place.
2. 30 acres, situated 14 miles from Port Macquarie. It consists of thick forest country, about 5 acres being suitable for cultivation, the remainder, which is nearly all felled but not yet burnt off, for grazing. The whole area has been enclosed with a sapling fence; 5 acres have been cleared and are under cultivation, maize, pumpkins, and vegetables being grown. It is occupied by 10 aborigines, who make it their home. The entire crop of maize last season was taken by flood, and as an inducement to the aborigines to continue cultivating the reserve, they are being supplied with rations by the Board until they get their next crop in. Two bark huts for dwellings, and a slab barn with bark roof, have been erected on the reserve.
3. 87 acres, situated 23 miles from Port Macquarie. It consists of thick brush country, suitable either for cultivation or grazing purposes. It is occupied by 27 aborigines who have brushed 30 acres, and prepared 8 acres for planting maize and pumpkins. A two-roomed bark hut, several small humpies, and a slab hut are erected upon it. These aborigines are receiving rations from the Board until they get their first crop. They had 8 acres of maize planted last season, but the flood carried it all away. A fresh supply of seed maize and potatoes has been issued to them.

A number of aborigines who do not live on reserves earn a living, working for farmers in the district.

Eight children attend the public schools, 10 others, of school age, living within 5 miles of a school, receive no instruction whatever.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

Twenty-five old and infirm aborigines, and 13 children are being supported by the Board. The following supplies have been distributed during the year:—6,728 lb. flour, 209 lb. tea, 1,695 lb. sugar, 6½ lb. raisins, 6½ lb. currants, 13 lb. suet, 26 lb. meat, 3 pairs trousers, 3 crimean shirts, 18 wincey dresses, 18 flannel petticoats, 3 boys' suits, 2 bushels seed maize, ½ cwt. seed potatoes, 1 pair oars, 3 bottles cough mixture, and 100 blankets.

The majority are addicted to habits of intemperance, the liquor as a rule being supplied them by their employers.

Proceedings were taken by the police against three persons for supplying them with liquor during the year.

When ill they are attended to by the Government Medical Officer for the district.

Manning River District.

Number of aborigines in district, 107—41 full-blood and 66 half-castes.

Two reserves have been set apart for the use of the aborigines of this district—one at Tinonee, containing an area of 6 acres, which is simply used as a camping ground, and the other, 6 miles from Wingham, containing an area of 122 acres, which at present is unoccupied.

Those able to work are generally employed ringbarking, brushing, fencing, &c., for the farmers; a few earn a little cutting firewood and doing odd jobs in the towns.

Twenty-eight old and infirm aborigines and 27 children are being supported by the Board. The following supplies have been distributed during the year:—15,947 lb. flour, 496 lb. tea, 4,007 lb. sugar (ration), 66 lb. white sugar, 19 bags oatmeal, 9½ lb. raisins, 9½ lb. currants, 19½ lb. suet, 40 lb. meat, 35 pairs moleskin trousers, 35 crimean shirts, 28 wincey dresses, 28 flannel petticoats, 8 tins paint for boat, 2 bottles paint oil, 1½ gallon tar, 1 pair oars, and 70 blankets.

They are provided with a boat, which is kept at Taree. It is in good order, and is used for fishing and honey-getting.

Eleven children attend the public schools. Five others, of school age, living within 5 miles of a school, receive no instruction.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

They are all, as a rule, fond of drink. The liquor is generally obtained by half-castes and from Europeans who visit the camps. Two persons were prosecuted during the year by the Taree police for supplying rum to the aborigines, and were sentenced to 14 days imprisonment each.

When ill they are attended to by the Government Medical Officer for the district.

Barrington

Barrington District.

Number of aborigines in district, 52—28 full-blood, and 24 half-castes.

They are all settled on the 50 acres reserved for their use at Barrington, about 5 miles from Copeland and 6 from Gloucester. It is open country, with stony ridges, well grassed; but with the exception of about 2 acres, which have been cleared, it is only suitable for grazing purposes. There is no other Crown land in the locality available. Seven comfortable slab-huts, with iron roofs, have been erected by the Board on the reserve as dwellings for the aborigines.

Those able to work are generally employed by farmers and station-holders. Nine adults and 13 children are being supported by the Board. The following supplies have been distributed during the year;—6,064 lb. flour, 189 lb. tea, 1,521 lb. sugar, 12 lb. raisins, 13 lb. currants, 8 lb. suet, 45 lb. beef, 14 pairs moleskin trousers, 14 crimean shirts, 19 wincey dresses, 19 flannel petticoats, and 48 blankets.

Eighteen children are receiving instruction at the provisional school erected and furnished specially for them on their reserve by the Department of Public Instruction. The school was opened on the 13th October, 1890, under the tuition of Mr. William Griffiths. The following extracts are taken from the report by the school inspector, who visited the settlement on the 6th December:—

Number of pupils in ordinary attendance—9 boys and 9 girls.

Organisation,—

1. Material condition—good.
2. Cleanliness—good.
3. General appearance—pleasing.
4. Lesson guides—fair.
5. Classification—very fair.

Discipline,—

1. Punctuality—excellent.
2. Regularity—very good.
3. Demeanour—properly subdued.
4. Government—firm, appropriate, and effective.
5. Order—very fair to good.
6. Special matters—the results obtained under the heading of discipline are surprising, particularly when it is remembered that these children had not previously been subjected to discipline, and have been attending school only thirty-five days.

Instruction,—

Average proficiency—fair.

The children are making really excellent progress.

The teacher is proving to be the right man for this kind of work; he has gained the confidence of both parents and children.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

With two exceptions only they are not addicted to habits of intemperance.

When ill they are attended to by Dr. Spickett of Copeland.

Cape Hawke District.

Number of aborigines in district, 48—15 full-blood and 23 half-castes.

A few of the men are employed by the settlers, but as a rule they all lead a rambling life. Six old and infirm aborigines are supported by the Board. The following supplies have been distributed during the year:—1,910 lb. flour, 59 lb. tea, 478 lb. sugar, 7 lb. raisins, 7 lb. currants, 3½ lb. suet, 21 lb. beef, 3 pairs moleskin trousers, 3 crimean shirts, 1 wincey dress, 1 flannel petticoat, 14 lb. white lead for boat, 2 tins blue paint, 1 quart paint oil, 1 tin copper paint, 2 pairs oars, and 1 suit of sails, and 50 blankets.

They are provided with a fishing boat and net, which are in good order and well cared for. The boat is kept at Forster.

Eleven children are receiving instructions at the public school at Forster.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

Only a few are addicted to habits of intemperance.

When ill, they are furnished with medicine, &c., by the settlers.

Port Stephens District.

Number of aborigines in district, 48—19 full-blood, and 29 half-castes.

Those able to work are generally employed farming and timber-cutting for the settlers; some also earn a living fishing, having been provided by the Board with a boat, which is kept in fair condition.

Thirteen old and infirm aborigines and 5 children are supported by the Board. The following supplies have been distributed during the year:—5,920 lb. flour, 184 lb. tea, 1,483 lb. sugar, 7 lb. raisins, 7 lb. currants, 10 lb. suet, 28 lb. beef, 7 pairs moleskin trousers, 7 crimean shirts, 7 wincey dresses, 7 flannel petticoats, 3 boys' suits, 1 tent, 4 doz. fish-hooks, 7 fishing-lines, 35 lb. paint for boat, 4 paint brushes, 2 gallons coal-tar, ½ gallon paint oil, 18 lb. rope, 1 pair oars, and 41 blankets.

Three children attend the public school, 7 others of school age, residing within 5 miles of a school, receive no instruction whatever.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

None are addicted to habits of intemperance.

When ill, they are attended to by the Government Medical Officers for the district, or sent to the nearest hospital.

Hunter River District.

Number of aborigines in district, 100—66 full-blood, and 34 half-castes.

A number of the men are employed fencing, ringbarking, clearing, and burning off scrub, and in general farm work, whilst some work on stations, shepherding, stock keeping, &c. Two reserves have been set apart for aborigines in the Singleton portion of the district, one of 230 acres, situated about a mile and a half from the town of Singleton, and the other, 58 acres, on Glennie's Creek, about 15 miles from Singleton. The former consists of open country, well grassed, but only suitable for grazing purposes. It is not occupied. The other is well grassed land, suitable for cultivation; 22 acres have been fenced in, and 12 acres cleared. It is occupied by 3 aboriginal families who cultivate maize, tobacco, and potatoes. They have small temporary huts erected on it, and are now building new dwellings, to be roofed with the galvanised iron supplied them by the Board. They were furnished with a plough and other farming implements in October last, as an inducement to continue in the cultivation of the land.

Twenty-six old and infirm aborigines, and 27 children are supported by the Board. The following supplies have been distributed during the year:—11,558 lb. flour, 367 lb. tea, 2,935 lb. sugar, 5,627 lb. meat, 30 lb. raisins, 30 lb. currants, 5½ lb. suet, 8 lb. oatmeal, 16 pairs moleskin trousers, 17 crimean shirts, 1 boys' suit, 160 yds. wincey, 42½ yds. dress lining, 33 yds. calico, 64 yds. flannel, cotton, hooks, &c., 133 blankets, 4 tents, 4 lb. gunpowder, 14 lb. shot, 4 boxes gun caps, 1 boiler, 19 bars soap, 3 clothes lines, fishing tackle, 1 plough, plough harness, 1 spade, hoe, fencing adze, tomahawk, 2 axes, 23 maul-rings and wedges.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

The majority are addicted to habits of intemperance. The liquor is obtained secretly from public-houses.

When ill, they are attended to by the Government Medical Officers for the district, or treated at the local hospitals.

Lake Macquarie District.

Number of aborigines in the district 14—2 full-blood, and 12 half-castes.

Two old and infirm aborigines, and children, are supported by the Board. The remainder are generally employed as labourers. The following supplies have been distributed during the year :—1,253 lb. flour, 39 lb. tea, 315 lbs. sugar 3 lb. raisins, 3 lb. currants, 2 lb. suet, 6 lb. beef, 1 pair moleskin trousers, 1 crimean shirt, and 14 blankets.

Two children attend the public school at Swansea. There are no others of school age in the district.

All are supplied with Government blankets annually. The issue is necessary, and they are in no way misappropriated.

Only one is addicted to habits of intemperance. She is a half-caste woman, the liquor being obtained for her by her husband who is a European.

When ill they are attended to by the Government Medical Officer for the district.

Hawkesbury River District.

Number of aborigines in the district 79—33 full-blood, and 46 half castes.

The men as a rule are employed on farms during the spring and harvest. The whole receive aid from the Board in the shape of rations. The following supplies have been distributed during the year :—7,745 lb. flour, 321 lb. tea, 525 lb. sugar, 36 lb. raisins, 36 lb. currants, 36 lb. suet, 100 blankets, 3 cwt. 3 qrs. 12 lb. galvanised-iron, 2 lb. screws and washers, 28 lb. paint for boat, 1 gallon paint oil, and 2 paint brushes.

Two reserves have been set apart for the aborigines at Sackville Reach, one of 150 acres, the other 30 acres. Both consist of scrub land and rocks, only a small portion being suitable for cultivation. They are both occupied by aborigines, galvanised-iron having been supplied them to roof their huts.

They are provided with a boat, which is kept at Sackville Reach. It is in good condition, and is used for fishing purposes.

Six children are receiving instruction at the public school at Sackville Reach.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

They are not addicted to habits of intemperance; on the contrary, they are very temperate.

When ill, they are admitted to the Benevolent Asylum at Windsor on the recommendation of the local police officer.

Nepean District.

Number of aborigines in the district, 7—5 full-blood and 2 half-castes.

One of the men is employed as a labourer; 2 of the children are being brought up by Mr. Single; 1 child resides with her aged grandmother, who is supported by the Board. The following supplies have been distributed during the year :—309 lb. flour, 8 lb. tea, 80 lb. sugar, 1 lb. raisins, 1 lb. currants, 2 wincey dresses, 2 flannel petticoats, and 6 blankets.

Three children are receiving instruction, 1 at the public school and 2 privately.

Only 2 apply for and receive blankets, which are not in any way misappropriated.

One only will drink, when he can obtain the liquor; the others are temperate.

Central Cumberland District.

Number of aborigines in the district, 26—5 full-blood and 21 half-castes.

They are generally employed as labourers, and are not in need of any aid from the Board.

Only 1 child attends school.

Three or 4 are addicted to habits of intemperance, the liquor being obtained secretly at public houses.

When ill, some pay for their own medical attendance, whilst others are taken to the local hospitals.

Picton District.

Number of aborigines in the district, 64—7 full-blood and 57 half-castes.

At Camden a number of half-castes are employed as farm servants, and earn fair wages. At Burragorang the aborigines have, for a number of years, been occupying a farm purchased as a home for them by public contributions. They make a fair living on it rearing stock and growing maize. It is in a very good position, being situated about 35 miles from Picton, and contains an area of 70 acres, 15 of which are good land, cleared, and adjoining Cox's River.

Three areas of land have also been set apart as reserves for their use, but they cannot be induced to occupy them.

1. 300 acres, situated on the left bank of Byrnes Creek, about a mile and a half from its junction with the Wollondilly River.

2. 100 acres, situated about $\frac{3}{4}$ mile from the Wollondilly River.

3. 100 acres situated on the Wollondilly.

A number of the aborigines are employed by farmers in the district, whilst some earn a living shooting opossums for their skins.

Seven old and infirm aborigines and 10 children are supported by the Board. The following supplies have been distributed during the year :—4,902 lb. flour, 152 lb. tea, 1,228 lb. sugar, 7 lb. raisins, 10 lb. currants, 7 lb. suet, 54 lb. beef, and 75 blankets.

Fifteen children are receiving instruction at the public schools.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

They are not addicted to habits of intemperance.

When ill they are attended to by the Government Medical Officer for the district.

La Perouse.

Number of aborigines at La Perouse, 27—4 full-blood and 23 half-castes.

They are generally employed fishing; some also make native weapons for sale. The women and children make shell ornaments, and gather and sell wild flowers. Two girls are in domestic service; 5 adults and 7 children are supported by the Board. The following supplies have been distributed during the year :—3,528 lb. flour, 110 lb. tea, 882 lb. sugar, 3,120 lb. meat, 52 blankets, 1 fishing boat and gear, 1 pair oars, and suit of sails.

There are 6 Government boats at La Perouse in use by the aborigines; they are all properly cared for.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

The majority are addicted to habits of intemperance.

When ill they are attended to by the Medical Officer in charge of the Little Bay Hospital, who receives an allowance of £50 per annum for the service.

Illawarra District.

Number of aborigines in the district, 39—5 full-blood and 34 half-castes.

They are generally employed fishing, quarrying, and assisting farmers. One old aboriginal and 5 children are supported by the Board. The following supplies have been distributed during the year :—1,288 lb. flour, 40 lb. tea, 324 lb. sugar, 2 lb. raisins, 2 lb. currants, 2 lb. suet, 19 legs of beef, 40 blankets, 1 tent and fly.

They are provided with 2 boats, which are both kept at Kiama. One is in good order and well cared for, the other is very old and only occasionally used.

Six children attend the public school at Kiama. There are no others of school age residing within 5 miles of a school.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

A few of the half-castes are addicted to habits of intemperance.

When ill, they are attended to by the Government Medical Officer for the district.

Shoalhaven District.

Number of aborigines in the district, 133—40 full-blood and 93 half-castes.

Between 20 and 30 are employed on the Coolangatta Estate at wages ranging from 12s. to 16s. per week, and a weekly ration of 10 lb. flour, 10 lb. beef, 2 lb. sugar, and $\frac{1}{4}$ lb. tea. Others earn a living as farm labourers, and a few by fishing. Nineteen old and infirm aborigines and 32 children are supported by the Board. The following supplies have been distributed during the year :—14,461 lb. flour, 449 lb. tea, 3,597 lb. sugar, 21 lb. raisins, 21 lb. currants, 10 $\frac{1}{2}$ lb. suet, 18 lb. meat, 2 pair moleskin trousers, 2 crimean shirts, 44 yards wincey, 20 yards homespun, 32 yards flannel, 19 knicker suits, 160 blankets, 12 lb. paint for boat, and 2 paint brushes.

Two reserves have been set apart for the use of aborigines in this district, situated as follows :—One of 700 acres on the shores of Jervis Bay, about 8 miles from North Huskisson ; the other, 370 acres, at Kangaroo Valley. The first-named consists of heavily timbered land in some parts, in others undergrowth, is fairly well grassed, and about 50 acres would make good agricultural land if cleared. Good water is procurable on it, and there are splendid fishing grounds in close proximity. It is unoccupied. All attempts to get the aborigines to reside there having proved futile. The reserve at Kangaroo Valley is occupied by two aboriginal families as a camping place.

The number of children of school age, living within 5 miles of a school, is 36. These children are located at Coolangatta, Greenwell Point, Kangaroo Valley, and Jervis Bay, at each of which places there is a public school in close proximity to their homes. At Greenwell Point there are 6 children of school age receiving rations from the Board, and the police have arranged with the pilot to convey them across the Crookhaven Inlet to school each morning with the children from the pilot station. An issue of clothing has just been given them. At Kangaroo Valley 4 children of school age receive rations ; they have not been attending school regularly, alleging as a cause, the want of clothing, but a supply has just been given them. At Jervis Bay 4 children of school age receive rations ; they have not been attending school regularly ; they have recently been supplied with clothing. At Coolangatta there are 22 children of school age, out of these, only 9 attend school ; only 3 are in receipt of rations from the Board ; 7 have recently been supplied with clothing. Every effort is made to get the children of this district to attend school, but the parents, even where the children are properly clad, are quite indifferent, and show a great want of attention to the cleanliness and personal comfort of their children in a great many instances. School teachers state the children are intelligent and apt in their lessons.

In 1889 a boat was supplied to the aborigines at Greenwell Point. It is in good order and well cared for. The aborigines earn a very fair amount by selling fish, which together, with the aid from the Board in the shape of rations and clothing places them beyond want.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

The majority love drink, which is generally secretly supplied to them by Europeans. The aborigines resort to all kinds of artifice to obtain liquor.

When ill, they are attended to by the Government Medical Officers for the district.

Dowling District.

Number of aborigines in the district, 73—24 full-blood and 49 half-castes.

The aborigines at Ulladulla—*i.e.*, the strong and able-bodied—have the means at their disposal to earn a first-class livelihood, having two well-found boats in close proximity to one of the finest fishing grounds in the Colony ; but they will not avail themselves of this to the fullest extent, and this is partly due to their indolent habits, but chiefly to local residents, who nurse them with the idea that the Government ought, without exception, supply them all with rations. The present employment of these aborigines is as follows :—Some earn a livelihood fishing, others work for local farmers, and a few at a saw-mill. Some are occasionally employed stripping wattle bark, whilst others find employment loading and unloading steamers. A few of the single adult females earn a living as domestic servants.

Fourteen old and infirm aborigines and 13 children are supported by the Board. The following supplies have been distributed during the year :—8,414 lb. flour, 262 lb. tea, 2,095 lb. sugar, 17 lb. raisins, 17 lb. currants, 8½ lb. suet, 34 lb. beef, 2 pairs trousers, 2 shirts, 28 yards wincey, 14 yards flannel, 2 knicker suits, 70 blankets, 25 lb. paint for boat, and 2 paint brushes. The camps are frequently visited by the police, and any reasonable complaint is inquired into and reported to the Board.

Five acres have been set apart as a reserve for aborigines about 4 miles from Milton. It consists of good forest land. About ½ acre has been fenced, partially cleared, and placed under cultivation, pumpkins and potatoes being planted.

Eleven children are attending public school.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

The majority are addicted to habits of intemperance, the liquor being secretly supplied them by Europeans.

When ill, they are attended to by the Government Medical Officer for the district.

Yass District.

Number of aborigines in the district, 101—1 full-blood and 100 half-castes.

Five reserves have been set apart in this district for their use :—

1. 2½ acres, distant about a mile from the town of Yass, occupied by 40 half-castes. They have 8 iron houses (two-roomed) and 2 bark huts erected, the material for which was supplied by the Board. The land is not suited for cultivation.
2. 2½ acres, adjoining the above reserve, occupied by 38 half-castes, who have 4 two-roomed iron houses and 2 bark huts erected on it. The land is only suited for building purposes.
3. 80 acres, situated about 7 miles from Rye Park—unoccupied.
4. 160 acres, situated about 11 miles from Rye Park. It consists of good flats with open country, well grassed, and suitable for cultivation or grazing purposes. It is occupied by a half-caste family, who have a three-roomed dwelling erected on it. They have been supplied with a quantity of seed potatoes for cultivation.
5. 160 acres at Blakney Creek, about 12 miles from Dalton. The frontage to the creek is a rich flat with very little timber. The back portion is open country, well grassed, and suitable for cultivation or grazing purposes. The whole area is fenced in, 20 acres have been cleared, and 17 acres are under cultivation—wheat 12 acres, maize 4 acres, potatoes 1 acre. It is occupied by a half-caste family, who have a four-roomed slab house erected on it.

A few of the aborigines are away shearing, others are employed in the town of Yass. Four adults and 40 children are supported by the Board. The following supplies have been distributed during the year :—9,458 lb. flour, 293 lb. tea, 2,390 lb. sugar, 34 lb. raisins, 34 lb. currants, 25½ lb. suet, 25½ lb. lemon peel, 10½ lb. beef, 38 yards dress material, 30 yds. calico, 24½ yds. gambrun, cotton, buttons, 27 pairs boots, 90 blankets, 25 bed ticks, 4 cwt. seed potatoes, and a supply of school requisites.

Thirty-eight children are receiving instruction—10 at the public school at Blakney Creek, and 28 at the convent school at Yass.

All the aborigines are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

A few of the men are addicted to habits of intemperance, but are kept in check by the police.

When ill they are attended to by the Government Medical Officer for the district.

Braidwood District.

Number of aborigines in the district, 35—10 full-blood, and 25 half-castes.

They are generally employed on stations. Four old and infirm aborigines and 4 children are supported by the Board. The following supplies have been distributed during the year :—1,526 lb. flour, 48 lb. tea, 380 lb. sugar, 4½ lb. raisins, 4½ lb. currants, 15½ lb. suet, 209 lb. beef, 3 pairs moleskin trousers, 3 crimean shirts, 1 wincey dress, 1 flannel petticoat, 49 blankets, and 2 loads firewood.

The aborigines at Nelligen are provided with a fishing-boat, which is in good condition and properly cared for.

Two children are in receipt of instruction at the public school at Nelligen.

There are 3 reserves for aborigines in this district :—

1. 140 acres, situated 7 miles from Mongarlowe, consisting of good open country, well grassed, suitable for cultivation or grazing purposes ; occupied by a half-caste woman and her son ; all fenced in ; about 7 acres cleared and 2 acres under cultivation—maize and potatoes being planted. A dwelling of 4 rooms, and a small shed built of slabs with bark roof, is erected on the reserve. The occupants are not in need of any assistance from the Board.
2. 40 acres, situated about ½ mile from Tomakin and 1½ miles from Bateman's Bay ; open country, poorly grassed, part sandy and flat, part suitable for cultivation ; all fenced in, 1 acre cleared, and more being cleared and burnt off ; 1 acre under cultivation—vegetables and maize being planted. It is occupied by an old aboriginal and his wife, who have a 2-roomed weatherboard cottage, with shingled roof, and a small kitchen erected on it.
3. 8½ acres, situated about 2 miles from Mongarlowe—unoccupied.

All are supplied annually with Government blankets, which are not in any way misappropriated.

As a rule the aborigines of this district are very temperate.

When ill they are attended to by the Government Medical Officer for the district.

Moruya

Moruya District.

Number of aborigines in the district, 16—10 full-blood, and 6 half-castes.

Only one is working for wages, being employed ploughing; 7 adults and 7 children are supported by the Board. The following supplies have been distributed during the year:—4,171 lb. flour, 130 lb. tea, 1,048 lb. sugar, 9½ lb. raisins, 9½ lb. currants, 9½ lb. suet, 19 lb. beef, 2 pairs trousers, 2 shirts, 5 dresses, 5 petticoats, 3 boys' suits, 20 blankets, 10 cwt. galvanized-iron for huts, 8 lb. screws, 6 lb. washers, 20 lb. paint for boat, 1 paint brush, 1 pair oars, and 5 cwt. seed potatoes.

There are six reserves for aborigines, in this district; 32 acres at Turlinjah, on the Tuross Lake, 40 acres about 6 miles from Bodalla, 40 acres near Bircoul Lake, about 5 miles from Bodalla, 56½ acres 8 miles from Bodalla, 250 acres near the mouth of the Wagonga River, and 40 acres on the coast about 8 miles from Bodalla. The reserve at Turlinjah is the only one occupied by the aborigines. It consists of good open country, is well grassed, and about 10 acres are suitable for cultivation. About a quarter of an acre is fenced in for a garden, and 2 acres have been cleared. A quantity of seed potatoes were supplied by the Board, and they have been planted by the aborigines. Galvanized-iron has also been furnished them for roofing, and making them more habitable.

They have a fishing boat, which is kept on the Tuross Lake. It is fairly well cared for by the aborigines, but they do nothing with it in the way of earning a living.

Four children are receiving instruction at the public school.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

Very few are addicted to habits of intemperance.

When ill they are attended to by the Government Medical Officer for the district.

Walaga Lake.

Number of aborigines at the settlement, 99—45 full-blood, and 54 half-castes.

Mr. J. D. Reece was appointed Superintendent of the station on the 7th November last, the duties to be performed in conjunction with those of teacher at the school built by the Board for the instruction of aboriginal children on their reserve.

Forty children are attending the school, and the following extracts are taken from the report by the Inspector of Schools, who visited the station on the 3rd September last:—

"No. of pupils enrolled, 26 boys, 14 girls, total 40. No. of pupils present, 12 boys, 10 girls, total, 22. Mark for organization and special remarks—Tolerable. The teacher is much devoted to his duties, which were undertaken originally voluntarily.

Discipline:—

1. Punctuality and regularity—tolerable.
2. Playground supervision—satisfactory.
3. Corporal punishment—none inflicted.
4. Demeanour—submissive.
5. Government kind, and suited to peculiarities of pupils.
6. Order—fair.
7. Special matters and mark for discipline—tolerable. I have pointed out certain defects, which, if remedied, will much improve the discipline of the school.

Instruction:—

Methods and special remarks—somewhat mechanical but attractive. There are a few bright pupils, but the majority are apathetic, and the teacher's task is at times a very trying and almost hopeless one. He is thoroughly devoted to his work, and the pupils are much attached to him. Although even fair results are hardly to be expected, I hope that, now a new school has been built, and when the new stock of material has arrived, they will be up to standard at next regular inspection."

Twenty-seven adults and 33 children are supported by the Board. Some of the men make slight efforts to support themselves by working with farmers in the locality and by fishing. Three females are in private service. The following supplies have been distributed during the year:—16,883 lb. flour, 525 lb. tea, 4,240 lb. sugar, 948 lb. ship biscuits, 39½ lb. raisins, 39½ lb. currants, 39½ lb. suet, 158 lb. beef, 22 pairs trousers, 22 shirts, 22 dresses, 22 petticoats, 12 boys' suits, 154 blankets, and 3 axes.

There are two boats at Walaga Lake, one of which is very old and much decayed, but the other is in fair condition. The aborigines at Wagonga River also have a good centre-board boat. The boats are used for fishing purposes, but very irregularly.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

Very few complaints are made of their drinking habits. Generally speaking, they are much improved in this respect.

When ill, they are almost invariably attended to by Mr. Reece, the Superintendent.

Eden District.

Number of aborigines in the district, 22—11 full-blood, and 11 half-castes.

Two are employed whaling and ferrying at Eden. The others are generally employed as labourers. None are at present supported by the Board, but during the first six months of the year 2 adults at Bega were supplied with rations. The following articles were distributed during the year:—384 lb. flour, 12 lb. tea, 96 lb. sugar, 48 yards wincey, 24 yards flannel, 2 boys' suits, 1 pair oars, anchor and line, and 32 blankets.

One hundred acres, situated 4 miles from Tathra, have been set apart as a reserve for aborigines. It is thickly timbered, but only a few acres are fit for cultivation. About 6 acres have been fenced in, 3 of which have been cleared, none at present under cultivation. It is occupied by one aboriginal family, who have a small hut erected upon it.

At Eden, the aborigines are provided with a good boat, which, however, is not taken proper care of.

Four children are in receipt of instruction at the public school at Cobargo.

When ill, they are attended to by the Government Medical Officer for the district.

Cooma District.

Number of aborigines in the district, 26—24 full-blood, and 2 half-castes.

They are generally employed on stations as labourers and stockmen. None are in need of aid from the Government.

There are 6 children of school age at Delegate who do not receive any instruction, but their parents are from Gippsland, Victoria, and are always going from one Colony to another, never remaining any time in one place.

All are supplied annually with Government blankets, which are not in any way misappropriated.

The majority are very temperate.

They are very seldom ill, but when they are, their employers purchase medicine for them.

Boggabilla District.

Number of aborigines in the district, 76—58 full-blood, and 18 half-castes.

Those men who are able to work, are generally employed in general station work, and the women as domestic servants. At Coppymurrumbilla 9 old and infirm aborigines and 2 children are supported by the Board. The following supplies have been distributed during the year:—4,286 lb. flour, 133 lb. tea, 1,079 lb. sugar, 12 lb. raisins, 12 lb. currants, 5 lb. suet, 50 lb. beef, 2 pairs trousers, 2 shirts, 8 dresses, 8 petticoats, and 60 blankets.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

The majority are addicted to habits of intemperance, but the liquor is difficult to obtain.

When ill, they are attended to by the Government Medical Officer for the district.

Morce

Moree District.

Number of aborigines in the district, 137—103 full-blood, and 34 half-castes.

The men who are able to work get employment on the various stations in the district, shepherding, shearing, &c. The women also are employed by the station-owners, washing and scrubbing. The wages of the men are from 10s. to 15s. per week, with rations. Eighteen old and infirm aborigines and 11 children are supported by the Board. The following supplies have been distributed at Goonal, Moree, and Terry Hie during the year:—7,882 lb. flour, 276 lb. tea, 2,203 lb. of sugar, 11 lb. raisins, 10 lb. currants, 8 lb. suet, 4 pairs trousers, 4 shirts, 5 dresses, 6 petticoats, 1 boy's suit, and 300 blankets.

Fifty-two acres, $1\frac{1}{2}$ mile from the town of Moree, have been set apart as a reserve for aborigines. It is open country, suitable for cultivation, none fenced, nearly all cleared, none under cultivation. It is occupied by 13 aborigines, for whom the Board erected comfortable huts.

Four children are receiving instruction at the Moree Public School.

All are supplied annually with Government blankets, which are in no way misappropriated.

They are all addicted to habits of intemperance, the liquor being supplied them by Europeans. The Police do all they can to check the practice, but it is very difficult to catch people serving liquor, for most of the aborigines reside on stations some distance from police stations.

When ill, they are attended to by the Government Medical Officer of the district.

Nothing more could be done to better their condition.

Wariadda District.

Number of aborigines in the district, 50—20 full-blood, and 30 half-castes.

The men are generally employed on stations, boundary-riding, horse-breaking, &c., for which they receive good wages. At Bingara 3 children received rations from the Board during eight months of the year. The following supplies were distributed:—108 lb. flour, $3\frac{1}{2}$ lb. tea, 27 lb. sugar, and 20 blankets.

Two children are in receipt of instruction at the Bingara Public School.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

They are all addicted to habits of intemperance.

When ill the station-owners and selectors attend to them, and some cases are treated in the local hospital.

Narrabri District.

Number of aborigines in the district, 179—79 full-blood, and 100 half-castes.

Those able to work are generally employed boundary-riding, shearing, and at general station work. Some support themselves hunting kangaroos. Eight old and infirm aborigines are supported by the Board. The following supplies have been distributed during the year:—2,556 lb. flour, 80 lb. tea, 639 lb. sugar, 5 lb. raisins, 5 lb. currants, 3 lb. suet, 6 lb. beef, and 217 blankets.

An area of 5,200 acres has been set apart for their use, 4 miles from Narrabri. It is watered by the Namoi River and Bohena Creek, is mostly open country with occasional belts of scrub, and suitable for grazing purposes only. The aborigines cannot be induced to occupy it.

Four children are receiving instruction at the public school at Narrabri.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

Several are addicted to habits of intemperance, the liquor being obtained, as a rule, from their employers, and from Europeans who visit the camps.

When ill they are attended to by the Government Medical Officers for the district.

Tamworth District.

Number of aborigines in the district, 186—20 full-blood, and 166 half-castes.

Those able to work are generally employed on stations shepherding, shearing, boundary-riding, &c. Some earn a living fencing and at other bush work. Six old and infirm aborigines and 17 children are supported by the Board. The following supplies have been distributed during the year:—6,022 lb. flour, 187 lb. tea, 1,503 lb. sugar, 5 lb. raisins, 5 lb. currants, 5 lb. suet, 10 lb. beef, 3 pairs trousers, 3 shirts, and 115 blankets.

Twenty-three children are receiving instruction at the public schools.

All are supplied annually with Government blankets. They are in no way misappropriated.

Only a few are addicted to habits of intemperance, the liquor being supplied them at their camps by Europeans. The police do all they can to check the practice, and several persons have been prosecuted and fined.

They are very seldom ill, but when such is the case they are either attended to by the Government Medical Officer for the district, or by the station-owners and selectors.

Coonabarabran District.

Number of aborigines in the district, 94—5 full-blood, and 89 half-castes.

Some of the men are employed on stations, whilst others earn a living kangaroo shooting. The single women support themselves in domestic service. None of the aborigines in this district are in need of aid from the Government.

Three children are receiving instruction privately.

Blankets are issued to all who apply for them. They are in no way misappropriated.

Some are addicted to habits of intemperance, the liquor being supplied them by Europeans.

When ill they are sent to the local hospital for treatment.

Murrurundi District.

Number of aborigines in the district, 23—6 full-blood, and 17 half-castes.

They are generally employed on stations at shearing and other station work. Some also earn a living cutting and selling firewood. None are in need of Government aid.

One child is receiving instruction privately.

All are supplied annually with Government blankets. They are in no way misappropriated.

As a rule, they are temperate in their habits.

When ill they are attended to by the Government Medical Officer for the district, who makes no charge for the services.

Coonamble District.

Number of aborigines in the district, 137—118 full-blood, and 19 half-castes.

They are generally employed on the different stations in various kinds of work. Twenty-six old and infirm aborigines and 13 children are supported by the Board. The following supplies have been distributed during the year:—9,152 lb. flour, 286 lb. tea, 2,288 lb. sugar, 24 lb. currants, 15 lb. raisins, 12 lb. suet, 1 sheep, 4 pairs trousers, 4 shirts, 6 dresses, 6 petticoats, 4 boys' suits, and 150 blankets.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

All the adults are more or less addicted to habits of intemperance, the liquor being supplied them by publicans. The police find it very difficult to catch them in the act.

When ill they are either treated by the station managers or taken to the local hospital.

Warren District.

Number of aborigines in the district, 105—78 full-blood, and 27 half-castes.

Those who are able to work are generally employed on stations. Nine old and infirm aborigines and 2 children are supported by the Board. The following supplies have been distributed during the year:—2,580 lb. flour, 80 lb. tea, 648 lb. sugar, 6 lb. raisins, 6 lb. currants, 24 lb. beef, 3 lb. suet, and 150 blankets.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

The

The majority drink whenever they can obtain the liquor, which is, as a rule, supplied by Europeans who visit the camps for immoral purposes.

When ill they are attended by the Government Medical Officer for the district.

Dubbo District.

Number of aborigines in the district, 254—138 full-blood, and 116 half-castes.

The men who are able to work are generally employed on the various stations in the district, boundary-riding kangaroo shooting, and as stockman, &c. Thirty-three old and infirm aborigines and 20 children are supported by the Board. The following supplies have been distributed during the year:—12,612 lb. flour, 400 lb. tea, 3,212 lb. sugar, 15½ lb. currants, 25 lb. raisins, 24 lb. suet, 1,220 lb. beef, 15 pairs trousers, 15 shirts, 13 dresses, 13 petticoats, 40 yards wincey, 16 yards calico, 4 reels cotton, 3 cards hooks and eyes, and 190 blankets.

Five children attend public schools; 34 children camping within 5 miles of a school receive no instruction whatever.

The majority of the aborigines are addicted to habits of intemperance. The liquor is generally obtained at roadside inns, where detection is difficult. The police do their utmost to enforce the law, and are sometimes successful in obtaining convictions.

All are supplied annually with Government blankets. They are in no way misappropriated.

When ill they are, as a rule, given medicine by their employers. Serious cases are taken to the local hospitals.

Mudgee District.

Number of aborigines in the district, 64—23 full-blood, and 41 half-castes.

Those able to work are generally employed on stations and farms. Three old and infirm aborigines and 14 children are supported by the Board. The following supplies have been distributed during the year:—3,352 lb. flour, 104 lb. tea, 833 lb. sugar, 10 lb. raisins, 9 lb. suet, 6 lb. meat, 2 lb. lemon peel, 18 yards wincey, 10 yards flannel, 10 yards calico, and 51 blankets.

Two reserves have been set apart in this district for the use of aborigines, but they have not for some time been occupied, the aborigines having left the locality. They are situated 21 miles from Hill End, and adjoin one another. Their total area is 24 acres.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

Two children attend the Windeyer Public School.

Only a few of the aborigines are addicted to habits of intemperance.

When ill, which is very seldom, their employers give them medicine; serious cases are sent to the Mudgee Hospital.

Bathurst District.

Number of aborigines in the district, 32—7 full-blood, and 25 half-castes.

None are in need of Government aid. Some are employed on stations and farms, others fencing, gold-digging, hunting kangaroos and opossums, &c.

Five children are receiving instruction at public schools.

Only 2 of the aborigines, both full-blood, are of intemperate habits, the liquor being obtained in town. The remainder are hardworking and industrious.

When ill, they are sent to the local hospital.

Wellington District.

Number of aborigines in the district, 62—21 full-blood, and 41 half-castes.

The men who are able to work earn a living farming, shepherding, droving, and at general station work. Occasionally when work is scarce, rations are issued temporarily, constant supervision being kept to compel them to work when employment is offering. Six adults and 9 children are being supported by the Board. The following supplies have been distributed during the year:—3,924 lb. flour, 122 lb. tea, 986 lb. sugar, 4 lb. oatmeal, 3 lb. maizena, 3,345 lb. beef, 5 lb. currants, 5 lb. raisins, 5 lb. suet, 10 pairs trousers, 12 shirts, 6 dresses, 7 petticoats, 1 boy's suit, 16 yards wincey, 4 yards calico, 5 yards flannel, 3 pairs boots, 4 yards tweed, 3 yards twill, 160 blankets, &c.

Three children are receiving instruction privately.

All the aborigines are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

The majority are addicted to habits of intemperance. The police keep a constant watch to prevent them being supplied with liquor.

When ill, they are either attended to by the Government Medical Officer for the district, or taken to the local hospital.

Orange District.

Number of aborigines in the district, 32—15 full-blood, and 17 half-castes.

None are in need of aid from the Government. They are generally employed on stations and farms, a few also earn a living fencing.

Two only are addicted to habits of intemperance, the liquor being supplied them by their employers.

Blankets are supplied annually to all who apply for them.

When ill, they are either treated by the Government Medical Officer for the district or sent to the local hospital.

Forbes District.

Number of aborigines in the district, 151—107 full-blood, and 44 half-castes.

Those able to work are generally employed on stations. Eight adults and 7 children are supported by the Board. The following supplies have been distributed during the year:—1,572 lb. flour, 50 lb. tea, 396 lb. sugar, 5 lb. raisins, 5 lb. currants, 66 lb. beef, 7 lb. suet, ¼ lb. baking-powder, 1 pair trousers, 3 shirts, 1 boy's suit, 17 yards wincey, 8 yards calico, cotton and buttons, 1 pair boots, and 50 blankets.

An area of 80 acres has been set apart 8 miles from Eugowra for the use of aborigines. It is open country, well grassed, and suitable for either cultivation or grazing purposes. Twenty-seven acres have been fenced in, 6 of which have been cleared and placed under cultivation, wheat being grown. It is occupied by a half-caste family, who have erected a slab house and barn on it.

Nine children are receiving instruction at the public schools.

Blankets are supplied annually to all who apply for them. They are in no way misappropriated.

The majority are of intemperate habits.

When ill, the local medical gentlemen attend the aborigines gratuitously in some cases, in others they are treated at the local hospital.

Cowra District.

Number of aborigines in the district, 70—24 full-blood, and 46 half-castes.

A number are employed by selectors and station-owners, but they do not get constant employment. Eleven adults and 26 children are being supported by the Board. The following supplies have been distributed during the year:—9,709 lb. flour, 303 lb. tea, 2,422 lb. sugar, 21 lb. raisins, 21 lb. currants, 21 lb. suet, 4 pairs trousers, 4 shirts, 11 dresses, 11 petticoats, 70 blankets, and 71 10-foot sheets of galvanized-iron.

An area of 32½ acres, about a mile from Cowra, near the railway bridge, has been set apart for the use of aborigines. They intend to use it solely for camping purposes, for which it is well suited, being in an elevated position, and at the same time close to the river for water supply. Galvanized-iron has been supplied them by the Board to improve the condition of their shelter.

There is also a reserve of 40 acres about 17 miles from Canowindra, but it is not now occupied, all the aborigines having left the locality.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

None are addicted to habits of intemperance.

When ill they are attended to by local medical gentlemen, who give their services gratuitously.

The aborigines in this district appear contented and satisfied with the assistance they receive from the Board.

Brungle

Brungle District.

Number of aborigines at the settlement, 89—53 full-blood, and 36 half-castes.

A superintendent has been placed in charge of the Brungle Camp. Mr. J. G. Ussher, a teacher under the Department of Public Instruction, was appointed to the position on the 12th May last.

The average monthly number of aborigines supported by the Board was 38 adults and 28 children. A number of the men work at various stations in the district for a portion of the year; those at the settlement able to work are preparing the ground for cultivation, fencing, and otherwise improving the reserve.

The following supplies have been distributed during the year:—18,949 lb. flour, 589 lb. tea, 4,765 lb. sugar, 3,598 lb. meat, 49 lb. oatmeal, 23½ lb. raisins, 23½ lb. currants, 23½ lb. suet, 24 bars soap, 7 pairs trousers, 7 shirts, 3 dresses, 3 petticoats, 8 boys' suits, 59 yards print, 40 yards silesia, 8 dozen buttons, cotton, needles, 50 blankets, 15 cwt. seed potatoes, 20 cwt. galvanized-iron, 1 ton fencing-wire, plough and dray harness, and sundry articles of ironmongery.

A great improvement has been made in the condition of the aborigines' dwellings. With the roofing-iron supplied by the Board, the huts have been made more tenable, and are now, for the most part, in good order. The fencing of the reserve, which has an area of 77 acres, has been much interrupted by bad weather, sickness, and the absence of the able-bodied during the busy season on the stations. It is, however, now rapidly approaching completion. The seed-potatoes supplied were all planted, and there is every appearance of a good return.

Owing to the excessive rainfall during the last quarter of the year the health of the camp suffered severely, pneumonia, whooping cough, and kindred diseases having been prevalent. Minor cases of sickness are treated by the superintendent, who has been furnished with a supply of simple remedies, but serious cases are either treated by the Government Medical Officer for the district, or sent to the Gundagai Hospital. The births during the year have been 8—males 3, and females 5; deaths 2—1 male and 1 female—both adults.

A cottage has been erected on a small reserve of 3 acres, as a residence for the superintendent, at a cost of £283. This land is now being fenced.

The school building erected by the Board in 1888 has been painted, and proper guttering fixed, and a tank supplied, at the cost of the Department of Public Instruction. Nineteen children are being educated. The following extracts are from a report furnished the Minister of Education, by the District School Inspector, on the 26th January last:—

“Mr. Ussher, the present teacher, was appointed in May last, but, in consequence of floods and the difficulty he had in getting lodgings, work was not regularly taken up until August. The school-house is weatherboard, in good repair, and fairly furnished, but poorly equipped with working material—this defect is now being remedied. A good supply of drinking water has been provided. Of the population, 20 are children, who might be under school training. A little progress has been made in spelling and writing on slates. These children seem to have a great difficulty in grasping the elementary notions of number. No singing had been attempted at the time of my visit. By my directions it has been introduced since. The aborigines take an interest in drill and singing exercises. A supply of copying books has recently been sent. The Aborigines Protection Board has also supplied sewing materials, so that the girls might be taught this useful art. There are reasonable grounds for hope that the school will do some useful work during the current year.”

Some of the aborigines drink whenever they get an opportunity, the liquor being procured for them by Europeans. The Police at Gundagai and Tumut check the practice as far as possible when the aborigines visit those towns.

Narrandera District.

Number of aborigines in the district, 62—15 full-blood, and 47 half-castes.

The men who are able to work earn good wages shearing, rabbiting, and harvesting, by which means they support their families. The women also assist by taking in washing, and the girls take situations as domestic servants. Two old aborigines are supported by the Board. The following supplies have been distributed during the year:—616 lb. flour, 20 lb. tea, 154 lb. sugar, and 55 blankets.

An area of 310 acres has been reserved for the use of aborigines, about 6 miles from Grong Grong. It consists of open forest country, is well grassed, and suitable for agricultural purposes. Fifty acres have been fenced in, 1 acre cleared, and half an acre placed under cultivation. It is occupied by two aboriginal families, who intend further cultivating it. They have erected a slab hut with iron roof on it for themselves.

Two children are receiving instruction at the Narrandera Public School.

All the aborigines are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

The majority are addicted to habits of intemperance. The liquor is, as a rule, supplied them secretly by Europeans. Three convictions have been obtained against persons for supplying them with liquor during the year, the Bench inflicting heavy penalties in each case, which has had a good effect.

When ill, they are attended to by the Government Medical Officer for the district.

Albury District.

Number of aborigines in the district, 4—3 full-blood, and 1 half-caste.

One is employed as a tracker at Albury, another as a boundary rider on Copabella station, and the remaining two are at Walbundrie in private service. None are in need of aid from the Board.

One child is receiving instruction at the public school at Walbundrie.

They are not addicted to habits of intemperance.

Mogil Mogil District.

Number of aborigines in the district, 117—95 full-blood, and 22 half-castes.

The males who are able to work are principally employed on stations, and earn fair wages. Some of the females earn a little by washing and scrubbing at times. Thirty-six old and infirm aborigines and 10 children are supported by the Board. The following supplies have been distributed during the year:—14,399 lb. flour, 449 lb. tea, 3,600 lb. sugar, 90 lb. meat, 19 lb. raisins, 19 lb. currants, 23 pairs trousers, 23 shirts, 43 dresses, 43 petticoats, and 150 blankets.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

The majority are more or less intemperate.

When ill, they are either given medicine by their employers, or use the medicine which they themselves make from herbs, bark, &c.

Walgett District.

Number of aborigines in the district, 278—165 full-blood, and 113 half-castes.

Those able to work are generally employed on stations. Sixteen old and destitute aborigines and 2 children are supported by the Board. The following supplies have been distributed during the year:—4,340 lb. flour, 135 lb. tea, 1,086 lb. sugar, 7 lb. raisins, 7 lb. currants, 7 lb. suet, 30 lb. meat, and 240 blankets.

A reserve of 100 acres has been set apart for the use of aborigines near the town of Walgett. It is used as a camping ground.

Six children are receiving instruction at the public school.

All are supplied annually with Government blankets. They are in no way misappropriated.

The majority are addicted to habits of intemperance. The liquor is usually obtained secretly from public-houses, and Europeans sometimes bring it to their camps.

When ill, they usually attend to one another; serious cases are, however, treated by the Government Medical Officer for the district.

Goodooga District.

Number of aborigines in the district, 307—207 full-blood, and 100 half-castes.

Those able to work are employed on the stations. Thirty-one old and helpless aborigines, and 9 children are supported by the Board. The following supplies have been distributed during the year:—13,651 lb. flour, 426 lb. tea, 3,411 lb. sugar, 20 lb. raisins, 20 lb. currants, 16 lb. suet, 30 lb. beef, 1 sheep, 9 pairs trousers, 9 shirts, 16 dresses, 16 petticoats, and 150 blankets.

All are addicted to habits of intemperance. The liquor is usually taken to their camps by Europeans.

When ill, they attend to one another, preferring their own methods of treatment.

Brewarrina

Brewarrina District.

Number of aborigines in the district, 163—129 full-blood, and 34 half-castes.

About 50 are living at the Aboriginal Station, 9 miles from Brewarrina, which is under the control of the New South Wales Aborigines Protection Association. Those who camp in other portions of the district generally work on sheep stations.

The reserve on which the Aboriginal Station stands contains an area of 5,240 acres. About half is open country, the remainder is thickly timbered with box-scrub; there are also several swamps, comprising an area of 200 acres. About 4,000 acres are fenced in, which are sub-divided into six paddocks, 50 acres have been cleared, and 4 acres are under cultivation, maize, potatoes, and pumpkins being planted. The land is most suitable for grazing purposes. There are about 2,000 sheep on the station, all looking very well, and of which 1,000 are ewes, now in lamb. The buildings consist of a 5-roomed weatherboard cottage used by the Superintendent as a residence, a school-house, girls' dormitory, store, and a number of bark gunyahs occupied by the aborigines. The estimated value of improvements is £550.

Sixteen children are receiving instruction at the school on the station. The following extracts are taken from the report of the School Inspector, who visited the station on the 12th November last:—

“Number of pupils enrolled, 16—10 boys and 6 girls.

Organisation:—

1. Material condition—tolerable.
2. Accommodation—sufficient.
3. Cleanliness—tolerable.
4. General appearance—tolerable.
5. State of records—fair.
6. Lesson guides—fair.
7. Classification—correct.

Discipline:—

1. Punctuality—fair.
2. Regularity—fair.
3. Demeanour—quiet.
4. Government—judicious.
5. Order—fair.
6. School movements—prompt.
7. Drill—indifferent.

Instruction:—

1. Methods—modern.
2. Proficiency—class 1, fair; class 2, tolerable.

Summary:—

1. General efficiency of school—moderate.
2. Practical skill and usefulness of teacher—moderate.”

All the aborigines of the district are supplied with Government blankets. The issue is necessary, and they are in no way misappropriated.

A large number are addicted to habits of intemperance.

Barrington District.

Number of aborigines in the district, 109—100 full-blood, and 9 half-castes.

The men are generally employed as station hands; a number of the women are also employed as laundresses, &c., but the majority of the aborigines camp idly in the bush, and are liberally supplied with rations from the stations. Those who are camped on the rivers catch fish and hunt rabbits, kangaroos, &c. At Enngonia, 12 adults and 1 child who were rendered destitute by floods were supplied with rations by the Board for five months of the year, the following articles being distributed:—1,280 lb. flour, 40 lb. tea, 320 lb. sugar, and 115 blankets.

The majority are addicted to habits of intemperance and opium smoking. The liquor is supplied them by Europeans. In many instances it is purchased direct from the hotels, notwithstanding the vigilance of the police in their efforts to prevent it. The opium is supplied them by the Chinese, and they are much fonder of it than the liquor.

When ill, they are attended to by one of their tribe, who is recognised as a doctor amongst them.

Owing to the abundance of grass and water that there is now throughout the district, there are a great number of aborigines travelling about, and they will not stop long at any particular place. Some of the younger men have horses, which they purchased while working on stations.

All are supplied annually with Government blankets. They are in no way misappropriated.

Bourke District.

Number of aborigines in the district, 24—19 full-blood, and 5 half-castes.

Those able to work are employed on sheep stations. Three old and infirm aborigines are supported by the Board. The following supplies have been distributed during the year:—824 lb. flour, 26 lb. tea, 206 lb. sugar, 1 pair trousers, 1 shirt, 1 dress, 1 petticoat, and 150 blankets.

The majority are addicted to habits of intemperance. The liquor, as a rule, is obtained secretly from publicans and others.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

Wanaaring District.

Number of aborigines in the district, 93—90 full-blood, and 3 half-castes.

All but a few very old ones are employed on stations the greater part of the year. At times they obtain a living fishing and hunting. Four adults are supported by the Board. The following supplies have been distributed during the year:—800 lb. flour, 25 lb. tea, 201 lb. sugar, 6 lb. currants, 12 lb. beef, and 60 blankets.

One child only is receiving instruction at the Wanaaring Public School.

The majority are more or less addicted to habits of intemperance.

All are supplied annually with Government blankets. They are in no way misappropriated.

When ill, they attend to one another, preferring their own methods of treatment.

Louth District.

Number of aborigines in the district, 133—109 full-blood, and 24 half-castes.

Those who are able to work are, as a rule, employed on stations. Their condition compares very favourably with that of the aborigines of any other district. They do not either require or appreciate Government aid. Blankets are supplied to all applicants. They are in no way misappropriated.

Nearly all will drink when they get the opportunity. The liquor is, as a rule, taken to their camps by travellers. During the last twelve months, however, very few complaints have been made respecting this matter.

When ill, they attend to one another, preferring their own methods of treatment.

Nyngan District.

Number of aborigines in the district, 178—130 full-blood, and 48 half-castes.

Those able to work are generally employed on the various stations. A few half-castes are in private employment. Some of them make good servants, and are fairly industrious. Twenty-one old and infirm aborigines and 4 children are supported by the Board. The following supplies have been distributed during the year:—5,712 lb. flour, 178 lb. tea, 1,435 lb. sugar, 15 lb. raisins, 13 lb. currants, 13 lb. suet, 12 lb. beef, 6 wincey dresses, 6 flannel petticoats, and 190 blankets.

A large number are addicted to habits of intemperance, the liquor being generally obtained at bush hotels.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

When ill, they are sent to the local hospitals.

Milparinka

Milparinka District.

Number of aborigines in the district, 220—189 full-blood, and 31 half-castes.
 The men are, as a rule, employed on sheep stations. At times they wander about living on game. Twenty old aborigines (10 males and 10 females) were furnished with clothing during the year.
 All are supplied annually with Government blankets. They are in no way misappropriated.
 The majority are addicted to habits of intemperance. The liquor is generally taken to their camps by Europeans.
 When ill, they generally attend on one another, at times they get medicine through the police.

Wilcannia District.

Number of aborigines in the district, 7 only; all of whom are full-blood.
 They are employed on Mount Murchison station, rabbiting, &c., and are not in need of any aid from the Government. They are, however, supplied annually by the Board with blankets, which are in no way misappropriated.
 They all drink when they can obtain the liquor. They no doubt obtain it at times from the local hotel, but it is very difficult to check the practice.
 When ill, they are given medicine by their employer.

Silverton District.

Number of aborigines in the district, 44; all of whom are full-blood.
 The men are employed on Mundi Mundi and Poolamacca stations mustering sheep, and at general station work, for which they receive fair wages. With the exception of blankets, they do not receive any aid from the Government, and are not in need of any.
 They are all addicted to habits of intemperance, the liquor, as a rule, being obtained at roadside inns.
 When ill, they are supplied with medicine by their employers. Serious cases are sent to the Silverton Hospital.

Menindie District.

Number of aborigines in the district, 50; all full-blood.
 All the men are employed on the surrounding stations, either as rabbiters, dog poisoners, or boundary riders. They all receive a blanket yearly, which is all that they require from the Government.
 All are more or less addicted to habits of intemperance. The liquor is generally given to them by the men on the stations. This practice, however, is being checked by the station-owners, who discharge any employee found conveying liquor on the runs.
 When ill, they are given medicine by their employers.

Pooncarie District.

Number of aborigines in the district, 56—51 full-blood, and 5 half-castes.
 The men are principally employed rabbiting, sheep-mustering, and at general station work about the woolsheds during the shearing season. All are supplied annually with Government blankets; they are not in need of any other aid.
 Some are addicted to habits of intemperance, the liquor being obtained at roadside hotels. The practice is difficult to check.
 When ill, they are supplied with medicine by their employers.

Wentworth District.

Number of aborigines in the district, 26—24 full-blood, and 2 half-castes.
 They are generally employed on stations, rabbiting, boundary riding, &c., and are not in need of any aid from the Government.
 All are addicted to habits of intemperance, the liquor being generally given them by the Europeans who work on the stations with them.
 When ill, which is seldom the case, they are either given medicine by their employers, or sent to the nearest hospital.

Hillston District.

Number of aborigines in the district, 58—49 full-blood, and 9 half-castes.
 Those able to work are employed on stations, rabbiting, &c. Three old and infirm aborigines at Gilgunnia are supported by the Board. The following supplies have been distributed in the district during the year:—1,233 lb. flour, 38 lb. tea, 306 lb. sugar, 3 lb. raisins, 3 lb. currants, 2 lb. suet, 8 lb. meat, 8 pairs trousers, 8 shirts, 9 dresses, 9 petticoats, 16 yards wincey, 7 yards flannel, and 100 blankets.
 All are supplied annually with Government blankets, the aged receiving two each. They are in no way misappropriated.
 They will always drink whenever they can obtain the liquor. The police use every effort to prevent the supply.
 When ill, they are given medicine by their employers.

Lake Cudgellico District.

Number of aborigines in the district, 104—66 full-blood, and 38 half-castes.
 Those able to work are generally employed on sheep stations. Five old and infirm aborigines at Euabalong are supported by the Board; no others are in need of Government aid. The following supplies have been distributed during the year:—2,134 lb. flour, 66 lb. tea, 537 lb. sugar, 7 lb. currants, 7 lb. raisins, 3 lb. suet, 14 lb. beef, 3 pairs trousers, 3 shirts, 4 dresses, 4 petticoats, and 85 blankets.
 Three children are receiving instruction at the public school at Euabalong.
 The majority of the aborigines are very fond of drink. They sometimes obtain liquor from bush hotels.
 When ill, they attend on one another, preferring their own methods of treatment.

Mossgiel District.

Number of aborigines in the district, 98—82 full-blood, and 16 half-castes.
 Those able to work are generally employed on stations, but those who, from age or infirmity, are unable to earn a living, are provided with food and clothing by the Board. During the latter portion of the year the following supplies were distributed:—442 lb. flour, 13 lb. tea, 104 lb. sugar, 40 yards wincey, 12 yards flannel, 3 pairs trousers, and 3 shirts.
 All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.
 The aborigines in this district are very temperate.
 When ill, the station-owners attend to them.

Hay District.

Number of aborigines in the district, 17—15 full-blood, and 2 half-castes.
 They are generally employed on stations, and, with the exception of blankets, are not receiving any aid from the Government, nor are they in need of any.
 They are all addicted to habits of intemperance.
 When ill, they are given medicine by their employers.

Darlington Point District.

Number of aborigines in the district, 141—69 full-blood, and 72 half-castes.
 The men work at the Aboriginal Mission Station at Warangesda, and on the surrounding sheep stations. The families nearly all live at the Mission Station.
 The Warangesda Mission is under the control of the Aborigines Protection Association. It is situated about 2 miles from Darlington Point. The area of the reserve on which it stands is 1,981 acres, 500 of which are good open country, the remainder heavily timbered. The whole is well grassed, parts are suitable for cultivation, the remainder for grazing. 1,950 acres have been fenced, and 120 acres cleared, of which, 70 are under cultivation, wheat and potatoes being grown. The following buildings have been erected by the Association:—Superintendent's residence, four-roomed cottage, a two-roomed cottage for matron, dormitory, teacher's dwelling, school-house, twelve huts, and a few out-buildings. They are nearly all built of weatherboard, with iron roofs.

Thirty-nine children are receiving instruction at the school at Warangesda. The following are extracts from a report by the District School Inspector, who visited the station on 27th August last :—

“ Organisation :—

1. Material condition—very fair.
2. Accommodation—adequate.
3. Cleanliness—very fair.
4. General appearance—very fair.
5. State of records—good.
6. Lesson guides—very fair.
7. Classification—fair.

Discipline :—

1. Punctuality—good.
2. Regularity—good.
3. Appearance of pupils—tolerable.
4. Demeanour—tolerably subdued.
5. Government—firm, fairly effective.
6. Order—fair.
7. School movements—tolerable.
8. General mark for discipline—tolerable to fair.

Instruction :—

1. Methods—Tolerably intelligent and effective.
2. Proficiency of classes—class 1, tolerable; class 2, tolerable to fair; class 3, tolerable.
3. Average proficiency—tolerable.

The teacher is energetic, persevering, and of exemplary character.”

All the aborigines in the district are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

They are very much given to habits of intemperance. The liquor is supplied them by station hands and others.

When ill, they are either sent to the Narrandera hospital, or treated by the Government Medical Officer at that place.

Deniliquin District.

Number of aborigines in the district, 74—45 full-blood, and 29 half-castes.

Those able to work are generally employed on stations, boundary-riding, rabbiting, &c. At Moolpa Station two old aborigines, unable to earn a living, are supported by the Board.

All are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

They all drink when they get the opportunity, the liquor, as a rule, being obtained from station hands during the shearing season.

When ill, they are sent to the nearest hospital for treatment.

Moama District.

Number of aborigines in the district, 189—60 full-blood, and 129 half-castes.

They are generally employed on the Aboriginal Mission Station at Cumeroogunga. Some also earn a living on sheep stations, rabbiting, kangaroo hunting, shearing, &c., &c.

One hundred and fifty aborigines reside at the Mission Station, which is situated about 4 miles from Moama, on the right bank of the river Murray, and about half a mile from the Bamah punt. The area of the reserve on which the station stands is 1,890 acres, of which 400 acres are high sand-hills above flood level, suitable for agriculture, the remainder being low-lying box country, with the usual amount of gum swamp along the river. The whole area is fenced in, a large portion ring-barked, and about 110 acres cleared and being cultivated, wheat being grown. There is also a 3-acre orchard, which has been enclosed with a rabbit-proof fence. The following buildings have been erected by the Association :—Manager's residence, store, butcher's shop, church, school-house, and eighteen cottages, also a store and two huts at the farm.

Fifty-two children are receiving instruction at the school at Cumeroogunga. The following are extracts from the report of the School Inspector, who visited the station on the 23rd July last :—

“ Organisation :—

1. Material condition—fair.
2. Accommodation—barely sufficient.
3. Cleanliness—fair.
4. General appearance—tolerable to fair.
5. State of records—very fair.
6. Lesson guides—fair.
7. Classification—fair.

Discipline :—

1. Punctuality—good.
2. Regularity—very fair.
3. Appearance of pupils—moderate.
4. Demeanour—tolerable.
5. Government—fair and tolerably judicious.
6. Order—tolerable.
7. School movements—tolerable, noisy.
8. Special matters—considering the difficulties the teacher has to contend against the discipline may be considered creditable.
9. General mark for discipline—tolerable to fair.

Instruction :—

1. Methods—tolerable.
2. Proficiency of classes—class 1, tolerable; class 2, tolerable; class 3, tolerable.
3. Remarks—Imparted with zeal and earnestness.

General efficiency of school—tolerable.”

All the aborigines in the district are supplied annually with Government blankets. The issue is necessary, and they are in no way misappropriated.

The majority are addicted to habits of intemperance. The liquor is generally obtained at Echuca and Bamah (Victoria).

When ill, the aborigines at Cumeroogunga are attended to by Dr. Smith, of Echuca, who receives an annual allowance from the Aborigines Protection Association. In other portions of the district they are taken to the nearest hospital.

Balranald District.

Number of aboriginals in the district, 88—80 full-blood, and 8 half-castes.

They are generally employed on stations. None are in need of aid from the Government.

None of the children are receiving instruction. They are living on Yanga and Canally Stations, 10 miles from any school.

All the aborigines are supplied annually with Government blankets. They are in no way misappropriated.

The majority are fond of drink, but they find it difficult to obtain liquor, the police keeping a watch over them when they visit the towns.

When ill, they are taken to the local hospital.

Euston District.

Number of aborigines in the district, 14—12 full-blood, and 2 half-castes.

They are generally employed on sheep stations, and are not in need of any aid from the Government.

All are supplied annually with Government blankets. They are in no way misappropriated.

They are all more or less addicted to habits of intemperance. Every care is taken by the police to prevent them being supplied with liquor.

When ill, they are taken to the nearest hospital.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

ANÆSTHETICS IN METROPOLITAN HOSPITALS.

(RETURN RESPECTING USE OF, DURING 1891)

*Ordered by the Legislative Assembly to be printed, 29 March, 1892.**[Laid upon the Table of this House in answer to Question No. 5, of 1 March, 1892]*

Questions.

(5) USE OF ANÆSTHETICS IN METROPOLITAN HOSPITALS —MR. EDDEN (for DR HOLLIS) asked THE COLONIAL SECRETARY,—

- (1) How many persons were anæsthetised in the hospitals of the Metropolitan District during the year 1891?
- (2) How many of these persons died from the effects of the anæsthetic?
- (3) What anæsthetic was used in the fatal cases?

Answer.

RETURN showing the number of Persons to whom Anæsthetics were administered in the Metropolitan Hospitals of Sydney during the year 1891, and also particulars of the fatal cases

Name of Hospital	Number of persons anæsthetised during the year 1891	Names of persons who died from the effects of the anæsthetic	Date of Death, 1891	Anæsthetic used in the fatal cases	Date of Inquest, 1891	Name of Coroner or Magistrate holding Inquest	Verdict or Finding	Names of Doctors present when the Anæsthetic was administered
Sydney Sydney (Moorcliff Edge Branch)	503 16	No deaths Thomas Monaghan	29 June	Chloroform	1 July	J C Woore	Died from syncope whilst under the influence of chloroform administered to him for the purpose of an operation. We are further of opinion that the chloroform was administered with due care and caution, and when unfavourable symptoms manifested themselves every possible effort was adopted by the medical gentlemen in charge of the case to save deceased's life and avert fatal results.	Thomas Evans, Walter Hull, and — Muria
Prince Alfred	897	Alfred Edward Bawtree	11 June	Mixture of chloroform and ether	13 June	J C Woore	We find that the said Alfred Edward Bawtree, at Prince Alfred Hospital, Camperdown, in the district of Sydney, in the Colony aforesaid, on the 11th day of June, A D 1891, died from fatal syncope whilst under the influence of an anæsthetic administered to him for the purpose of an operation. We further find that the said anæsthetic was administered with due care and caution, and that when unfavourable symptoms manifested themselves every possible effort was used by the medical gentlemen in charge of the case to save life and avert fatal results.	L F F Neill, A M'Cormick, G P Stanley, and W Chisholm
St Vincent's Coast	290 1	No deaths No deaths						
Children's, Glebe Pt	165	No deaths						
Children's, Lewisham	32	No deaths						
North Shore	37	No deaths						
Bulman	15	No deaths						

1891-2.

NEW SOUTH WALES.

SYDNEY HOSPITAL COMPLETION BILL.

(MESSAGE No. 54.)

Ordered by the Legislative Assembly to be printed, 2 March, 1892.

JERSEY,

Governor.

Message No. 54.

In accordance with the provisions contained in the 54th section of the Constitution Act, the Governor recommends for the consideration of the Legislative Assembly the expediency of making provision to meet the requisite expenses in connection with a Bill "To sanction the completion of the Sydney Hospital."

Government House,

Sydney, 29th February, 1892.

1891-2.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

KENMORE ESTATE.

(CORRESPONDENCE RESPECTING PURCHASE OF PORTION OF.)

Ordered by the Legislative Assembly to be printed, 23 February, 1892.

The Inspector-General of the Insane to The Principal Under Secretary.

Sir,

Gladesville, 27 October, 1879.

I do myself the honor to report that in accordance with your verbal instructions, I have visited the estate of Kenmore, near Goulburn, which is to be sold by auction in farms on the 29th instant. As the Colonial Architect was unable to accompany me, I placed myself in communication with Mr. Twynam, the District Surveyor, who knows the estate well, and who accompanied me to the ground, pointed out the subdivisions, and gave me much necessary information. I have since shown the plan to the Colonial Architect, who agrees with me in the following recommendations:—

1. That section 32, consisting of 116 acres, having the advantages of good water supply and facilities for drainage, should, if possible, be purchased for asylum purposes, at a limit as to price of £10 an acre.
2. That section 33, which adjoins section 32 (and with it would form an estate of 300 acres), should be also purchased for grazing purposes in connection with the asylum, at a limit as to price of £5 an acre.*
3. That as Mr. Twynam, the District Surveyor, an experienced public officer, is about to purchase some part of the estate for himself, and has a thorough knowledge of the value of land in this neighbourhood, authority may be granted for him to make the purchases at the sale for the Government.

I have, &c.,

F. NORTON MANNING.

P.S.—The sections recommended for purchase are marked on the accompanying plan with [red] boundaries. Appendix A.

Submitted, 27/10/79. Approved.—H.P., 30/10/79. The Inspector-General of the Insane.
—C.W., B.C., 30/10/79.

* For these purchases the sum of £3,500 is available, being a balance on the Loan Vote of £25,000 for asylum purposes, taken in the year 1865. 29 Vic. No. 9.

The Inspector-General of the Insane to The Principal Under Secretary.

Sir,

Lunacy Department, Inspector-General's Office, Gladesville, 30 October, 1879.

I do myself the honor to forward herewith a letter from Mr. E. Twynam, the District Surveyor for the Government, reporting the purchase of two lots of the subdivision of the Kenmore Estate, at Goulburn, for the Government, in accordance with the instructions of the Colonial Secretary, and requesting immediate instructions as to payment of the purchase money.

The price at which the land was purchased was £3 12s. an acre all round, being well within the limit enjoined by the Colonial Secretary.

As the Kenmore Estate cost the proprietor £3 5s. an acre some years ago, and as the portion now bought for the Government is decidedly above the average value of the estate, I think the purchase may be regarded as a very satisfactory one.

I have, &c.,

F. NORTON MANNING,

Inspector-General.

Submitted, 30/10/79. The Crown Solicitor should be instructed to complete purchase.—H.P., 31/10/79. The Crown Solicitor (to be returned).—C.W., B.C., 31 Oct., 1879.

[Enclosure.]

Sir,

Goulburn, 29 October, 1879.

Lot 32, contain-
ing 116a., at
£4 10s.
Lot 33, contain-
ing 134a. 3r. 39p.,
at £3.
Appendix A.

In compliance with the instructions conveyed by your letters to me of the 27th and 28th October instant, I have purchased, on behalf of the Colonial Secretary, lots 32 and 33 of the Kenmore subdivision, at the prices specified in the margin, and under the terms and conditions of sale herewith enclosed with plan, and I would beg to request further instructions immediately as to payment.

I have, &c.,

E. TWYNAM,

District Surveyor.

The Inspector-General of the Insane.

The Inspector-General of the Insane to Mr. District-Surveyor Twynam, Goulburn.

Sir, Lunacy Department, Inspector-General's Office, Gladsville, 30 October, 1879.

I do myself the honor to acknowledge the receipt of your letter of the 29th instant, reporting the purchase of two lots of the subdivision of the Kenmore Estate, and to inform you that I have forwarded your letter to the Colonial Secretary, with a request that immediate steps may be taken for the payment of the purchase-money.

I have reported to the Colonial Secretary that in my opinion the purchase is a most satisfactory one.

I have, &c.,

F. NORTON MANNING,

Inspector-General.

The Inspector-General of the Insane to The Principal Under Secretary.

Sir, Lunacy Department, Inspector-General's Office, Gladsville, 3 November, 1879.

I do myself the honor to request that authority may be granted to me to take charge of the land recently purchased on the Kenmore Estate, at Goulburn, and to let this land as may seem most desirable (pending its use for hospital purposes), and to pay the proceeds into the Treasury.

The land, as stated in the enclosed communication from Mr. Twynam, is nearly all fenced in, and will bring a rental at once.

I have, &c.,

F. NORTON MANNING,

Inspector General.

Approved.—H.P., 5/11/79.

[Enclosure.]

Sir,

Goulburn, 1 November, 1879.

I have not yet received any communication from the Colonial Secretary relative to the purchase of land at Kenmore sale; possibly he may think it desirable to communicate direct with the auctioneers. My present object in addressing you is to advise immediate payment of the deposit of 25 per cent. pending preparation of deed of conveyance; otherwise it is not unlikely the purchase may be declared forfeited in the hope of securing a better price.

You will observe that the road boundary of the land is fenced, and that the greater part of the land is now an enclosure; there is also an iron hut on the land. I would strongly advise you to let the land at once, whilst the herbage is worth having, otherwise the place will be overrun with stock and the fencing rapidly destroyed; if you do not let the land you should put some one into occupation to prevent damage by trespass, removal of firewood, &c.

I am, &c.,

E. TWYNAM,

D.S.

The Inspector-General of the Insane.

The Principal Under Secretary to The Inspector-General of the Insane.

Sir, Colonial Secretary's Office, Sydney, 12 November, 1879.

In reply to your letter of the 3rd instant, I am directed to inform you that, in compliance with your request, the Colonial Secretary approves of the land recently purchased on the Kenmore Estate, at Goulburn, being taken charge of by you, and let as may seem most desirable pending its use for hospital purposes, and of the proceeds being paid into the Treasury.

I have, &c.,

CRITCHETT WALKER,

Principal Under Secretary.

The Principal Under Secretary to The Under Secretary for Finance and Trade.

Sir, Colonial Secretary's Office, Sydney, 12 November, 1879.

I am directed by the Colonial Secretary to state, for the information of the Colonial Treasurer, that authority has been given to the Inspector-General of the Insane for taking charge of the land recently purchased on the Kenmore Estate at Goulburn, and letting the same as may seem most desirable pending its use for hospital purposes, and for the payment of the proceeds into the Treasury.

I have, &c.,

CRITCHETT WALKER,

Principal Under Secretary.

The Crown Solicitor to The Principal Under Secretary.

Sir, Crown Solicitor's Office, Sydney, 4 November, 1879.

With reference to the papers received by me this morning relating to the purchase of a portion of the Kenmore Estate, near Goulburn, I have the honor to state that it appears by the conditions of sale that a deposit of one-fourth of the purchase money should be paid at once in cash, and I am informed by a gentleman, who called this morning from Dr. Manning, that this has not been done, and that the vendor threatens to sell at your risk. I therefore return the papers, and suggest that arrangements be at once made through the Treasury for the payment of the deposit.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

Approved.—H.P., 4/11/79.

The

The Principal Under Secretary to The Under Secretary for Finance and Trade.

79-8,741.

Sir,

Colonial Secretary's Office, Sydney, 4 November, 1879.

Certain allotments of the Kenmore Estate, near Goulburn, having been purchased by the Government as a site for a hospital for the insane at a cost of £1,076 19s. 8d., I am directed by the Colonial Secretary to request that you will invite the Colonial Treasurer to have the goodness to cause a deposit of £269 4s. 11d., one-fourth of the purchase-money, to be paid to the credit of Messrs. Finlay & Co., auctioneers, Goulburn.

I have, &c.,

CRITCHETT WALKER,

Principal Under Secretary.

To be paid from balance of Loan Vote for Lunatic Asylums of £25,000 (29 Vic. No. 9). The Under Secretary for Finance and Trade.—C.W., B.C., 5 November, 1879.

The Principal Under Secretary to The Crown Solicitor.

Sir,

Colonial Secretary's Office, Sydney, 4 November, 1879.

In reply to your letter of the present date, I am directed by the Colonial Secretary to inform you that the Colonial Treasurer has been invited to have the goodness to cause a deposit of £269 4s. 11d., one-fourth of the purchase-money of the allotments of the Kenmore Estate, near Goulburn, purchased by the Government as a site for a hospital for the insane, to be paid to the credit of Messrs. Finlay & Co., auctioneers, Goulburn.

I have, &c.,

CRITCHETT WALKER,

Principal Under Secretary.

The Inspector-General of the Insane to The Principal Under Secretary.

Sir,

Lunacy Department, Inspector-General's Office, Gladesville, 5 December, 1879.

I do myself the honor to recommend that a contour survey of the land recently purchased at Goulburn for asylum purposes may be made under the direction of the Colonial Architect, as a necessary preliminary to the planning of buildings to be placed thereon.

The land consists of 300 acres, sections 32 and 33 of the subdivisions of the Kenmore Estate, and is coloured red on the plan* herewith enclosed.

I have, &c.,

F. NORTON MANNING,

Inspector-General.

The Crown Solicitor to The Principal Under Secretary.

Sir,

Crown Solicitor's Office, Sydney, 5 February, 1880.

I do myself the honor to return herewith your letter of the 4th November, 1879, number as 79-8,741 in margin, with the previous correspondence respecting the purchase of portions of the Kenmore Estate for the purpose of a site for a hospital for the insane, and to inform you that a transfer has been prepared and forwarded for signature, so that the matter will probably be ready for settlement in the course of a few days. I have therefore to request that you will take the necessary steps at your earliest convenience to have the balance of the purchase money placed to the credit of my public account, to enable me to complete the purchase.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

Sir,

Colonial Secretary's Office, Sydney, 10 February, 1880.

In reply to your letter of the 5th instant, I am directed by the Colonial Secretary to inform you that, as requested by you, the Colonial Treasurer has been invited to have the goodness to cause the balance of the purchase money of portion of the Kenmore Estate, near Goulburn, purchased by the Government as a site for a hospital for the insane, to be placed to the credit of your public account to enable you to complete the transaction.

I have, &c.,

CRITCHETT WALKER,

Principal Under Secretary.

The

The Crown Solicitor to The Principal Under Secretary.

80-549.

Sir,

Crown Solicitor's Office, Sydney, 31 March, 1880.

No 80-1,093.

Referring to your letter of the 10th of February last (No. as in margin), and previous correspondence, having reference to the purchase by the Government of portions of the Kenmore Estate, required as a site for a hospital for the insane, I have the honor to inform you that the transfer having been duly signed, and lodged and accepted in the Land Titles Office, I, on the 23rd instant, paid to the vendors' order the sum of £807 14s. 9d., being, as I was informed, the balance of the purchase money.

On the 30th instant, however, I received a communication from Mr. Betts, the vendors' solicitor, stating that lot 32, which forms part of the purchase, contains 168 acres, instead of 116 acres (for which the vendors have been paid), and claiming for the additional 52 acres the sum of £234, being at the rate of £4 10s. per acre. I shall be obliged by your instructing me what course to pursue in reference to this claim.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

Referred to Inspector-General of the Insane for report.—C.W., B.C., 2/4/80.

The Principal Under Secretary.—Lot 32 is marked as containing 116 acres in the auctioneers' plan, and is so described in the printed list. The auctioneers' account, dated October 29, also charges 116 acres, whereas now this lot is stated to contain 168 acres. *I recommend, as a preliminary step, that this matter be referred to the Surveyor-General, to ascertain what the acreage really is, and that the whole area be then secured for the Government if the purchase as at present made does not cover it.* The price of the land is reasonable, and if this lot is cut up, and part of it sold to private individuals, the value of the remainder will be lessened, and great difficulties arise in applying it to the purpose for which it was purchased.—F. N. M., 8/4/80.

These papers may be referred to the Surveyor-General as suggested by Dr. Manning, in order that the actual acreage may be ascertained.—H.P., 12/4/80. The Secretary for Lands. The Under Secretary for Lands.—C.W., B.C., 12/4/80. Special.—Mr. Peyton, 17/4/80.

The area contained by portion No. 32 is 163 acres, by computation based on data supplied by the enclosed lithograph; the accuracy of the length and bearings on which I am unable to vouch for, the land not having been surveyed by this Department.—J. W. ELLIS (for Surveyor-General), B.C., 28/4/80. The Under Secretary, Lands.

I think the intention of reference to the Survey Office was to ascertain the area by actual measurement.—J.S.F., 8/5/80. Submitted. I should like the Deputy Surveyor-General to see this before submission. I am not sure that Mr. Twynam is right.—W.W.S., 27.

There is no request or direction for remeasurement, but on the above report (signed by Mr. Ellis) I think it is probable that the Minister may order one. In general, it is made before, not after, a private sale to the Government, as carried out in this instance—it is taking the land on a survey by the vendors' surveyor.—P.F.A., 29/5/80.

I am of opinion that a survey should be made of this portion by an officer employed by the Government, when its actual area will be ascertained.—J.A., 29/5/80. Deputy Surveyor-General. Mr. District-Surveyor Twynam accordingly.—ROBT. D. FITZGERALD (for Surveyor-General), B.C., 8/6/80. No. 240.

The Crown Solicitor to The Principal Under Secretary.

Sir,

Crown Solicitor's Office, Sydney, 28 May, 1880.

Referring to my letter to you of the 31st March last, No. 80-549, having reference to the purchase by the Government of certain lands, portion of the Kenmore Estate, a part of the purchase money of which, as the vendors' solicitor asserts, is still unpaid, I have now the honor to forward herewith a further letter from Mr. Betts on the subject, and to request that you will take steps, at your early convenience, to enable me to close the matter.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

The Under Secretary for Lands, with reference to previous papers.—C.W., B.C., 1/6/80. Urgent. Survey Office for papers.—J.H.C.

Papers, Misc. 80-4,982, were forwarded to Mr. Assistant-Surveyor Twynam for survey of portion 32, on the 9th instant, in accordance with the direction of the Secretary for Lands.—J. W. ELLIS (for Surveyor-General), B.C., 14/6/80. The Under Secretary for Lands.

Inform Principal Under Secretary, Colonial Secretary's Department.—J.R., 21/6/80.

[Enclosure.]

Trustees of S. F. Gibson to the Queen.

Dear Sir,

Goulburn, 26 May, 1880.

Referring to your letter of the 31st March, No. 80-553, I beg to say that I advised you of the difference in the area of the land immediately upon the fact being communicated to me, and the difficulty has been caused in consequence of the Commercial Bank having sent to you for the balance of the purchase money. I find that one of the trustees, being in Sydney, called at the bank, and suggested the course which was adopted, and I was certainly no party to it.

However, under the conditions of sale, the vendors are clearly entitled to be paid for the full area, and I shall be glad to learn whether you have received the necessary authority for the payment of the money.

John Williams, Esq., Crown Solicitor, Sydney.

Yours truly,

A. M. BETTS.

Licensed

Licensed-Surveyor G. G. Donaldson to The Surveyor-General.

Sir,

Goulburn, 24 June, 1880.

Acting under the instructions conveyed to Mr. District-Surveyor Twynam by your B.C. memo. of the 8th June, 1880, No. 240, I have measured lots 32 and 33 of the Kenmore Estate, at Goulburn (partly comprising A. Allen's 2,000 acres), which were purchased by the Government for the purpose of a Lunatic Asylum, at the auction sale at Goulburn, 29th October, 1879. The boundaries of these lots were found well defined, and upon remeasurement are found to contain 173 acres and 175½ acres respectively, instead of 116 acres and 184 acres 3 roods 39 perches, as specified upon the published map and sale list. I have connected these portions with W. Skidmore's 44 acres, portion 42, of the parish of Narrangarril, so that if requisite they may be described independently of the adjacent lots.

I am, &c.,

GEO. GIBSON DONALDSON.

In compliance with the request conveyed by the Surveyor-General's B.C. Minute, No. 240, I have caused the two portions of land, being lots 32 and 33 of the Kenmore Estate, as delineated upon the published sale map and plainly and permanently marked on the ground, to be remeasured as shown upon the plan herewith. It will be observed that the difference in lengths between Mr. Donaldson's and Mr. Sawtell's measurements of rectilincal boundaries is insignificant, and the errors which have been discovered in the areas upon the published sale list and map arise only from defective computation. Should the whole area (348 acres) not be required for the purposes of a Lunatic Asylum, any part thereof will readily sell at an advance upon the price paid. Submitted.—E. TWYNAM, District Surveyor, 29/6/80. Appendix B.

The Crown Solicitor to The Principal Under Secretary.

Sir,

Crown Solicitor's Office, Sydney, 30 June, 1880.

I do myself the honor to refer you to my letter of the 28th ultimo, having reference to the purchase by the Government of certain portions of the Kenmore Estate, and to request the favour of a reply at your earliest convenience.

I have, &c.,

JOHN WILLIAMS.

Crown Solicitor.

The Under Secretary for Lands.—C.W., B.C., 9/7/80. Urgent. Memo.:—Surveyor's report has now been received. Inform Colonial Secretary's Department that matter will be finally disposed of in a few days.—J. G. NEALE, 13/7/80.

Urgent. For Mr. Peyton in connection with 80/8,841. The matter is one of extreme urgency and the Colonial Secretary's Department has been informed that a description of the land as let out in surveyor's measurement will be supplied in the course of a few days.—J. G. NEALE, 13/7/80. Mr. Peyton.

Mr. Jensen,—Please deal with this and get it examined at once.—G.D., 15/7/86. Very urgent.

The Under Secretary for Lands to The Principal Under Secretary.

Sir,

Department of Lands, Sydney, 13 July, 1880.

In reference to your B.C. communication of the 9th instant, forwarding a letter from the Crown Solicitor on the subject of the purchase by the Government of certain portions of the Kenmore Estate, and urging a completion of the matter, I am directed to inform you that the surveyor's report of the measurement of the land has now been received, and so soon as practicable you will be supplied with a description of it.

I have, &c.,

W. W. STEPHEN.

Resubmit on receipt.—C.W., 16/7/80.

The Crown Solicitor to The Principal Under Secretary.

80-1,383.

Sir,

Crown Solicitor's Office, Sydney, 20 July, 1880.

Referring to my letters, of dates respectively 31st March, 28th May, and 30th June last, having reference to the additional purchase-money claimed by the vendors of the Kenmore Estate, which has recently been conveyed to the Crown, I have the honor to inform you that I have this day received from the vendors' solicitor the letter which is forwarded herewith, and to invite your special attention to the matter.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

[Enclosure.]

Gibson's Trustees to the Queen.

Dear Sir,

Goulburn, 17 July, 1880.

I am without reply to my two letters of the 25th March, 1880, and the 10th June, 1880, applying for payment of £234, being the sum payable to the vendors on account of the excess in the area of the land sold, and I am now instructed to institute proceedings for recovery of the amount.

Before doing anything further I should be glad to hear from you as to whether there is any chance of a settlement.

Yours, &c.,

A. M. BETTS.

The Inspector-General of the Insane.—C.W., B.C., 20/9/80.

Description.

Site for a Lunatic Asylum.

348 acres. County of Argyle, parish of Narrangarril, portions 32 and 33. Commencing on the left bank of the Wollondilly River, at the south-eastern end of the south-western boundary-line of portion 41 of 172 acres 3 roods 5 perches; and bounded thence on the north-east by that boundary-line bearing north $36^{\circ} 32'$ west 44 chains 80 links; on the north-west by a road 1 chain wide bearing south $44^{\circ} 53'$ west 9 chains and 74 links, south $18^{\circ} 19'$ west 11 chains 80 links, south $24^{\circ} 48'$ west 26 chains 26 links, south $38^{\circ} 42'$ west 10 chains 58 links, south $16^{\circ} 5'$ west 10 chains 70 links, south $14^{\circ} 7'$ west chains 36 links, south $18^{\circ} 31'$ west 16 chains and 98 links, south $30^{\circ} 31'$ west 5 chains 24 links, and thence south $46^{\circ} 7'$ west 9 chains 15 links; on the south-west by a line bearing south 61° east 25 chains to the aforesaid river; and on the south-east by that river downwards, to the point of commencement.

Examined.—R.M.

The Principal Under Secretary to The Under Secretary for Lands.

Sir,

Colonial Secretary's Office, Sydney, 9 September, 1880.

Referring to my letter of the 28th ultimo, and to previous communications, with reference to the purchase by the Government of certain portions of the Kenmore Estate, I am directed by the Colonial Secretary to point out that the matter is one of great urgency, and to request, therefore, that you will invite the Secretary for Lands to have the goodness to cause me to be furnished with the least possible delay with a reply to my communication of the 9th July on the subject.

I have, &c.,

CRITCHETT WALKER,

Principal Under Secretary.

Minute of the Inspector-General of the Insane.

THE area originally purchased and already paid for is 300 acres 3 roods and 39 perches. The measurement on resurvey is shown to be $348\frac{1}{2}$ acres; and the excess is in the lot which was purchased at 90s. an acre. I advise that the additional 48 acres be purchased for asylum purposes at £4 10s. per acre. The price is very reasonable, and, as Mr. District-Surveyor Twynam reports, under date 29th June, 1880, "any part of the land will readily sell at an advance on the price paid." The sum necessary can be taken from the Loan Vote for asylum purposes taken in 1865—29 Victoria No. 9.

F. NORTON MANNING.

23/9/80.

The Principal Under Secretary. Submitted.—25/9/80.

Approved.—H.P., 25/9/80.

The

The Principal Under Secretary to The Under Secretary for Finance and Trade.

Sir, Colonial Secretary's Office, Sydney, 30 September, 1880.

Referring to previous communications I am now directed to state that, it having been shown on resurvey that the measurement of the portion of the Kenmore Estate purchased as a site for a hospital for the insane is 348½ acres, and not 300 acres 3 roods and 39 perches, as already paid for, the Colonial Secretary has approved of the purchase of the additional 48 acres for asylum purposes at the rate of £4 10s. per acre; and to request that you will invite the Colonial Treasurer to have the goodness to cause the necessary amount to be placed to the credit of the Crown Solicitor out of the Loan Vote for asylum purposes (29 Vic. No. 9) to enable Mr. Williams to complete the transaction.

I have, &c.,

CRITCHETT WALKER,
Principal Under Secretary.

The Principal Under Secretary to The Inspector-General of the Insane.

Sir, Colonial Secretary's Office, Sydney, 30 September, 1880.

In acknowledging the receipt of your blank-cover communication of the 23rd instant, stating that the measurement of the portion of the Kenmore Estate purchased as a site for a hospital for the insane has been shown to be 348½ acres, and not 300 acres 3 roods and 39 perches, as already paid for, I am directed to inform you that the Colonial Secretary has approved of the purchase of the additional 48 acres for asylum purposes at the rate of £4 10s. per acre, and that the Colonial Treasurer has been invited to have the goodness to cause the necessary amount to be placed to the credit of the Crown Solicitor out of the Loan Vote for asylum purposes (29 Vic. No. 9), to enable Mr. Williams to complete the transaction.

I have, &c.,

CRITCHETT WALKER,
Principal Under Secretary.

The Principal Under Secretary to The Crown Solicitor.

Sir, Colonial Secretary's Office, Sydney, 30 September, 1880.

Referring to your letter of the 31st March last, I am directed to inform you that it having been shown on resurvey that the measurement of the portion of the Kenmore Estate, purchased as a site for a hospital for the insane, is 348½ acres, and not 300 acres 3 roods and 39 perches, as already paid for, the Colonial Secretary has approved of the purchase of the additional 48 acres for asylum purposes, at the rate of £4 10s. per acre; and that the Colonial Treasurer has been invited to have the goodness to cause the necessary amount to be placed to your credit to enable you to complete the transaction.

I have, &c.,

CRITCHETT WALKER,
Principal Under Secretary.

The Crown Solicitor to The Principal Under Secretary.

Sir, Crown Solicitor's Office, Sydney, 17 March, 1881.

I do myself the honor to return herewith the papers relating to the purchase by the Government of lands, portion of the Kenmore Estate, such purchase having been finally completed, and the papers being, as I am informed, urgently required, in the Department of Lands.

I have, &c.,

JOHN WILLIAMS,
Crown Solicitor.

Forward to Lands Department by letter.—C.W., 19/3/81.

The Principal Under Secretary to The Under Secretary for Lands.

Sir, Colonial Secretary's Office, Sydney, 21 March, 1881.

Referring to previous correspondence, I am directed by the Colonial Secretary to transmit herewith the papers relating to the purchase by the Government of portion of the Kenmore Estate, which papers are understood to be urgently required in the Department of Lands.

I have, &c.,

CRITCHETT WALKER,
Principal Under Secretary.

The Under Secretary for Lands to The Principal Under Secretary.

Sir, Department of Lands, Sydney, 28 May, 1881.

I am directed to return herewith the papers respecting the purchase by the Government of a portion of the Kenmore Estate, which accompanied your letter of the 21st March last, being no longer required by this Department.

I have, &c.,

CHARLES OLIVER.

The Inspector-General of the Insane to The Colonial Architect.

Lunacy Department, Inspector-General's Office, Gladesville, 6 October, 1883.

My dear Barnet,

Have you done anything about contour survey of our Asylum Estate at Goulburn. I should much like to get it done, so that one can think over the plans for the buildings.

Yours, &c.,

F. NORTON MANNING.

Mr. Cooper might be requested to make a survey.—C.W., 12/10/83. Approved.—A.S., 19/10/83. The Surveyor of Parks.—C.W., B.C., 13/10/83.

The

The Surveyor of Public Parks to The Under Secretary for Mines.

Kenmore Estate, Goulburn.

Contour Survey.

Department of Mines, Sydney, 23 May, 1885.

In this case I was instructed by the Colonial Secretary, on 12th October, 1883, to make a contour survey on the ground, with a view of enabling the Inspector-General of the Insane and the Colonial Architect to decide upon the best site and form of buildings for a hospital for the insane, to be erected thereon. The survey was to be made when other engagements permitted; and as that time has not yet arrived, and in view of the survey, which I have lately been instructed to undertake of the Sites for Noxious Trades, &c., Botany, which is of a very urgent character, I submit that it would be well to return the papers to the Colonial Secretary.

W. M. COOPER,
Surveyor of Public Parks.

Papers returned herewith. The Principal Under Secretary.—H.W., B.C., 23/5/85. Submitted. As Mr. Cooper is unable to attend to this, the Colonial Architect might perhaps be asked to have the survey made. The matter has been pending since 1879. Approved.—A.S., 3/7/85. The Under Secretary for Public Works.—J.B. (for P.U.S.), B.C., 4/7/85. The Acting Colonial Architect.—J.R., B.C., 7/7/85.

Not having an officer that I can spare to make the survey, I mentioned the matter to the Surveyor-General, who kindly stated he could undertake the work, and complete it within three months, if instructed. I would therefore suggest that he be asked to prepare a contour survey of the ground, the parallels to run about a chain apart, and the rise 5 feet, except where the ground is flat, and where the ground is tolerably level, rise not to exceed 2 feet, more especially on the probable site of the building.—T. McSHANE (for the Acting Colonial Architect), 22/8/85.

Forwarded to Lands.—F.A.W., 25/1/85. The Under Secretary for Lands.—J.R., B.C., 26/8/85. The Surveyor-General.—J.E., 28/8/85.

Mr. Twynam, at the time Mr. Coles spoke to me, thought it would provide employment for a licensed surveyor while waiting for instructions, hence the three months. Can you spare a surveyor? If not, kindly report as to the amount and character of the work, with view to sending one of the city surveyors.—P.F.A., B.C., 8/9/85.

Transferred to Mr. Dalglish, who will be so good as to act.—E.T., D.S., 15/9/85. Contoured survey effected, and plan submitted to the Surveyor-General under cover of my report, No. 85-13, of 13th November.—J. C. DALGLISH.

Mr. Surveyor Dalglish to The Surveyor-General.

85-13.

Sir,

Goulburn, 13 November, 1885.

Appendix D.

I have the honor to transmit herewith plan, drawn to a scale of 2 chains to an inch, of contoured survey of site for Lunatic Asylum near Goulburn, comprising lots 32 of 173 acres, and 33 of 175 acres of the Kenmore subdivision, being part of A. Allen's 2,000 acres, and W. Lithgow's 705 acres, parish of Narrangarril, county of Argyle, effected by me in compliance with your B.C. memo. of instructions, No. 85-381, to Mr. District-Surveyor Twynam.

2. The site embraces a total area of 348 acres of irregular form, extending in one direction a distance of 1 mile and 30 chains, by an average width of about $\frac{1}{2}$ mile, varying in height from the bed of the Wollondilly River, adopted as datum, to 165 feet, the elevation of the highest hill.

3. Along the slopes and spurs best defining the configuration of the surface, a series of base lines delineated on plan were carefully chosen and aligned, and an accurate surround, as a basis of further survey, was thereby established.

4. With Dumpy level a series of bench marks were next laid down at suitable intervals adjacent to these base lines, to serve as tests of the accuracy of the work, and as starting points of the contour levels, and an accurate close of the whole instrumental work and chainage by means of an entire surround was obtained.

5. Connection was effected with Railway Bench Mark No. 5, Goulburn and Crookwell line, and from the datum plane of the contour levels, the bed of the Wollondilly River at Section 2 was adopted, which is 2,024.38 feet above sea-level.

6. Twenty-two contour levels at vertical intervals of from 4 to 12 feet, and delineated on plan by black lines with small circles at intervals, were traced throughout the entire area by means of a Dumpy level, and the lines so determined were subsequently traversed with theodolite to ensure correct projection.

7. The contour lines are defined on the ground by hardwood stakes (in all 500), driven at intervals, and denoted on the plan by circles; in addition large hardwood stakes (in all 112), bearing the distinguishing contour numbers painted, are conspicuously driven on each of the base lines at every contour line intersection.

8. Three sections, shown on plan, were taken across the Wollondilly River, and over a further distance of about $1\frac{1}{2}$ miles levels were taken to Smith's and Funnel's huts, to ascertain the flood levels of 1870 and 1879; and the approximate position of the flood level of 1870, the highest flood known, is shown by broken blue lines on plan.

9. The total length of survey effected, including contour lines, levels, sections, base lines, and necessary connections, is $33\frac{1}{2}$ miles.

I have, &c.,

J. C. DALGLISH.

The plan has been drawn for photo-lithography, as several copies will be required, viz., by Inspector-General, Colonial Architect, Overseers and others; and I would beg to advise that the plan be forwarded immediately to the Government Printing Office, so that copies may be obtained as soon as possible. I think the copies should be to the same scale as the plan.—E. TWYNAM, D.S., Goulburn, 24/11/85.

Mr.

Mr. Willis,—A photo. should be taken at once, and the original plan forwarded to the Principal Under Secretary without delay. Perhaps the Government Printer will kindly cause the matter to be hastened.—P.F.A. Plan forwarded for photo-lithography.—H.M., 1/12/85.

Mr. Miller,—The plan is herewith returned, to be forwarded to the Principal Under Secretary, as directed by the Surveyor-General. Will you please ascertain how many copies of the plan will be required, and to whom they should be sent when ready.—JAMES A. WILLIS, 9/12/85.

About 30, on strong paper. They will be applied for. One may be sent to Dr. Manning.—P.F.A. Mr. Willis, with roll plan, 11/12/85.

Mr. Miller,—Plan returned herewith for transmitting to Principal Under Secretary.—JAMES A. WILLIS, 14/12/85.

The enclosed papers and roll plan* of contoured survey of site for lunatic asylum near Goulburn * Appendix D. are forwarded to the Under Secretary for Lands, with a view to their being transmitted to the Principal Under Secretary.—P. F. ADAMS, 24/12/85. The Under Secretary for Lands.

Submitted, that the papers and plans be forwarded as suggested. The Principal Under Secretary.—R.H.D. (for the U.S.), Department of Lands, B.C., 28/1/86. May be forwarded to Dr. Manning.—C.W., 3/2/86. The Inspector-General of the Insane.—C.W., B.C., 3/2/86. Noted and returned.—F.N.M., 5/2/86. The Principal Under Secretary.

[Four plans.]

PLAN OF THE SUBDIVISION INTO 43 MAGNIFICENT FARMS & BUILDING SITES

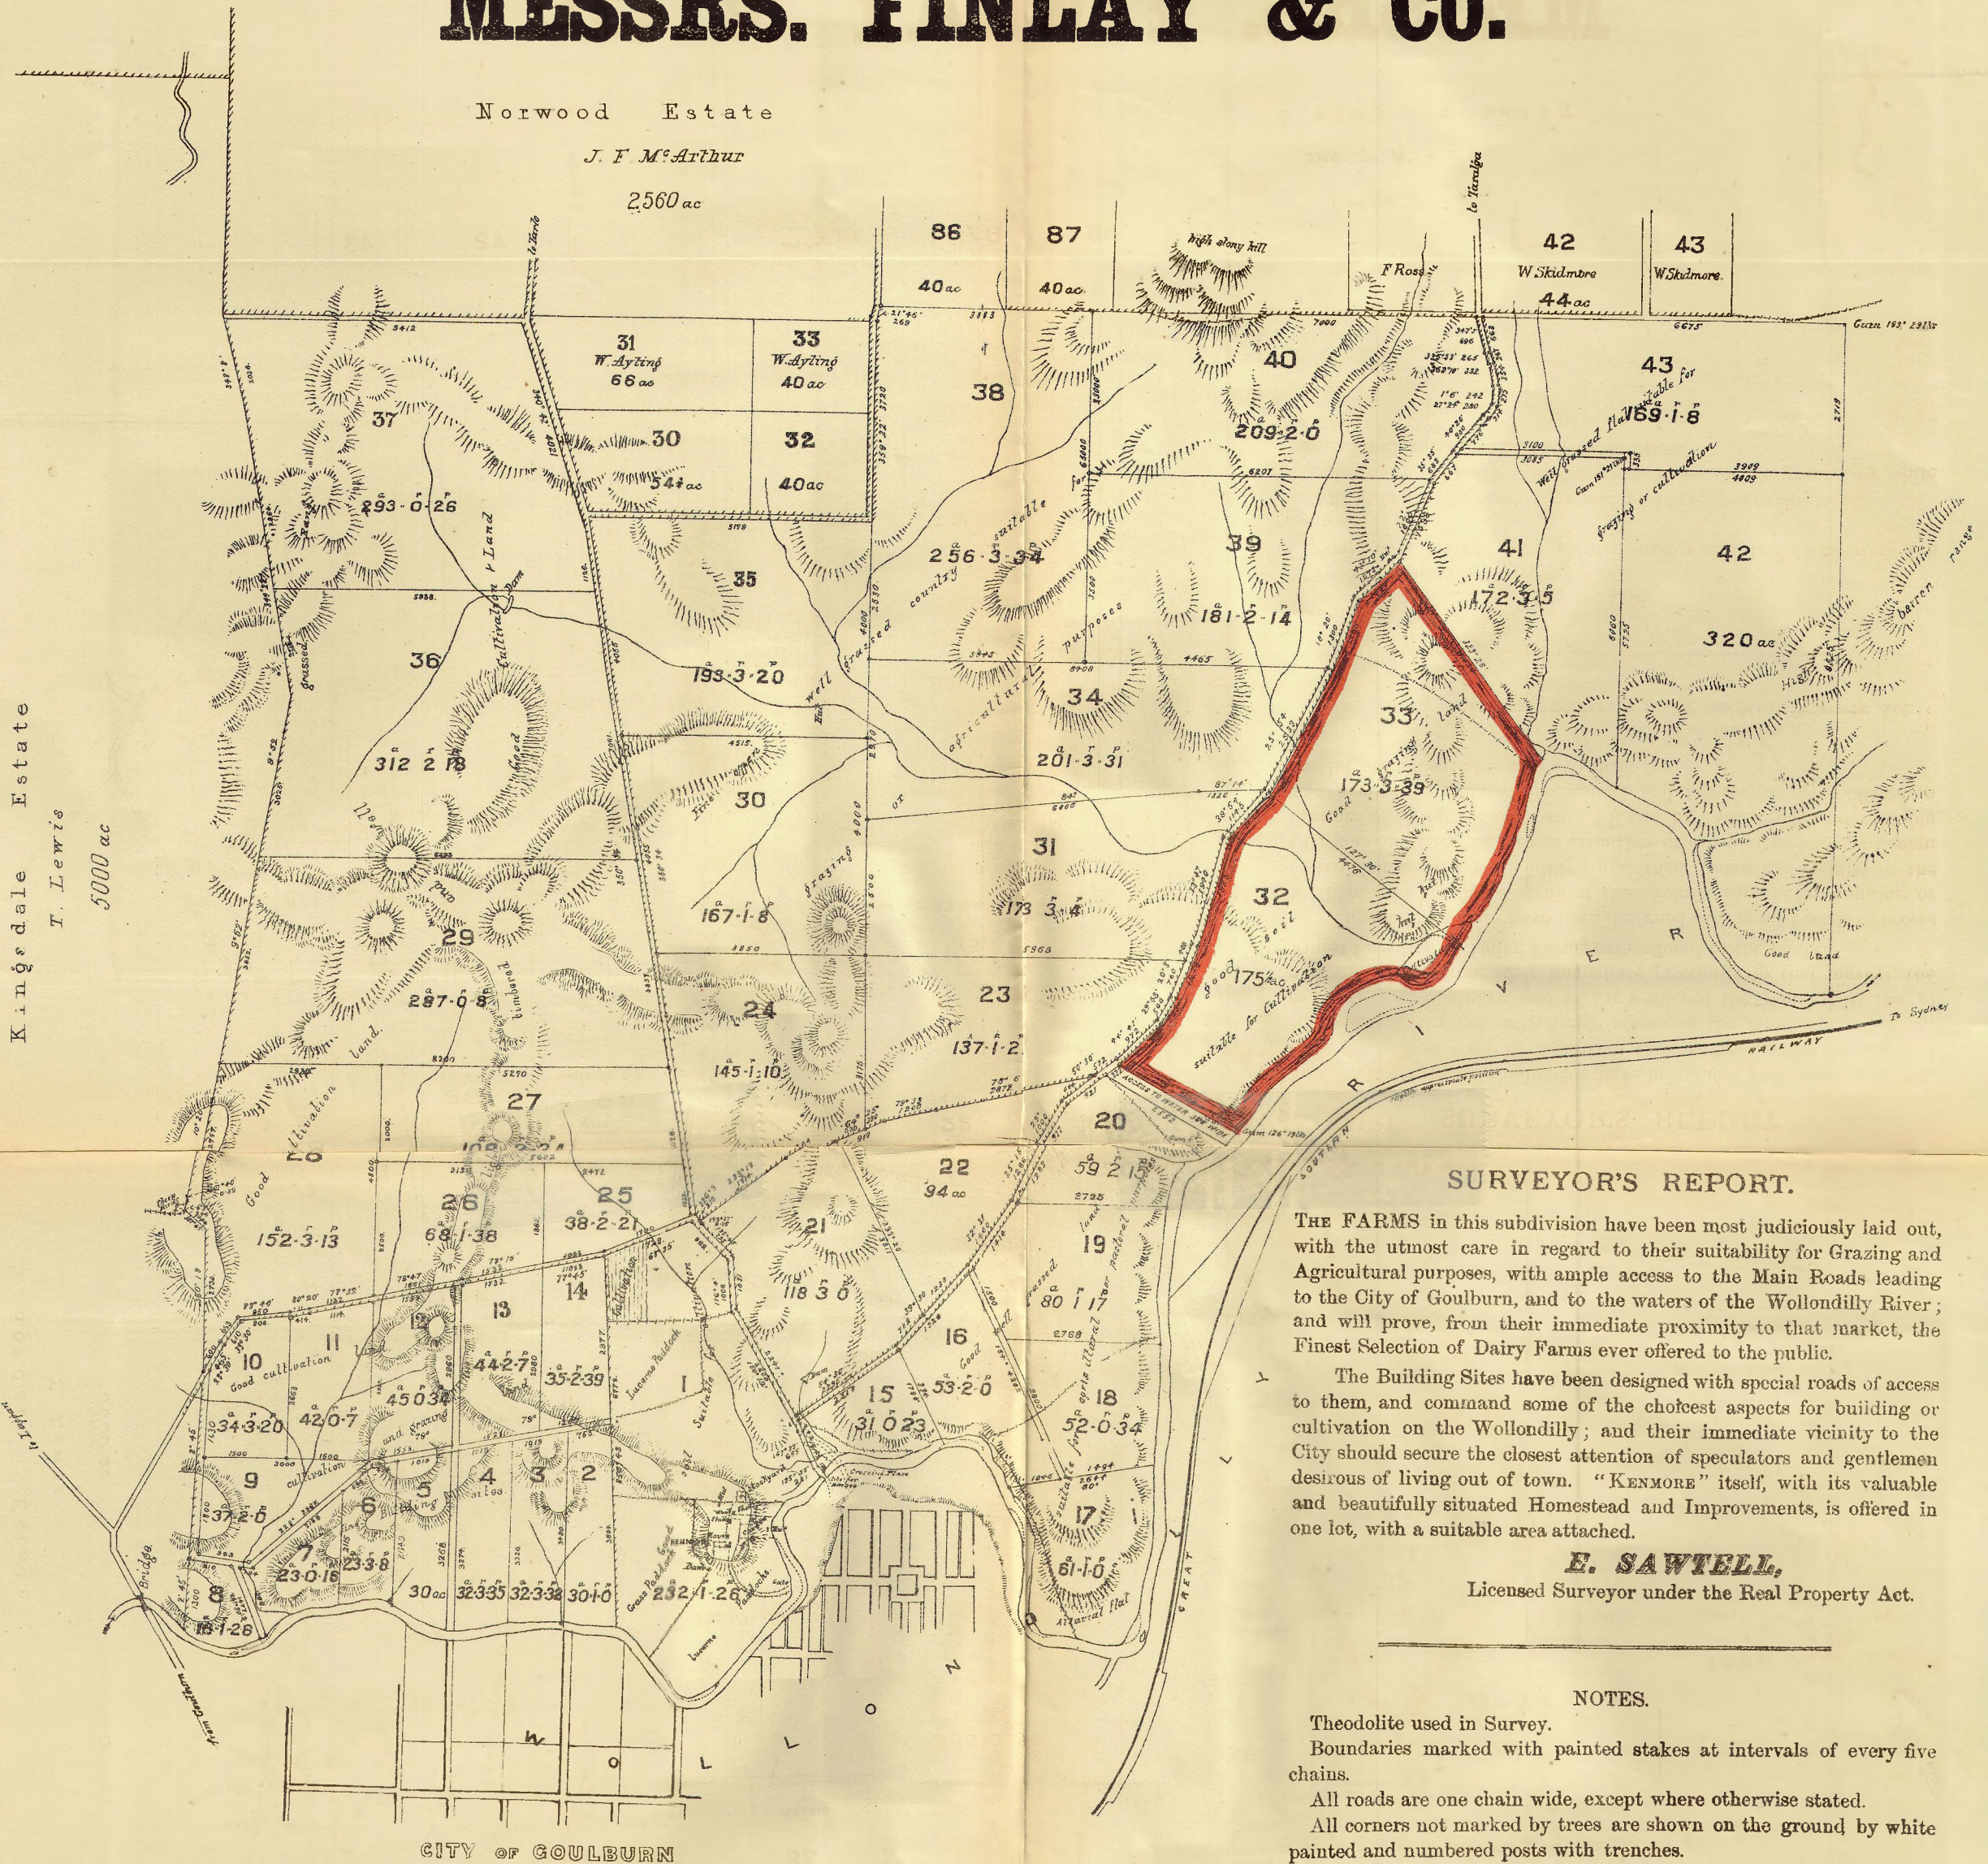

OF THE

KENMORE ESTATE

IN THE PARISH OF NARRANGARRIL, COUNTY OF AGYLE, 1879,

SOLD by AUCTION, at GOULBURN, on the 29th OCTOBER, 1879, by

MESSRS. FINLAY & CO.

SURVEYOR'S REPORT.

THE FARMS in this subdivision have been most judiciously laid out, with the utmost care in regard to their suitability for Grazing and Agricultural purposes, with ample access to the Main Roads leading to the City of Goulburn, and to the waters of the Wollondilly River; and will prove, from their immediate proximity to that market, the Finest Selection of Dairy Farms ever offered to the public.

The Building Sites have been designed with special roads of access to them, and command some of the choicest aspects for building or cultivation on the Wollondilly; and their immediate vicinity to the City should secure the closest attention of speculators and gentlemen desirous of living out of town. "KENMORE" itself, with its valuable and beautifully situated Homestead and Improvements, is offered in one lot, with a suitable area attached.

E. SAWTELL,

Licensed Surveyor under the Real Property Act.

NOTES.

- Theodolite used in Survey.
- Boundaries marked with painted stakes at intervals of every five chains.
- All roads are one chain wide, except where otherwise stated.
- All corners not marked by trees are shown on the ground by white painted and numbered posts with trenches.

Surveyor

1891-2.

NEW SOUTH WALES.

COAST HOSPITAL, LITTLE BAY.

(REPORT FOR 1891.)

Presented to Parliament by Command.

The Medical Adviser to the Government to The Colonial Secretary.

Sir,

Sydney, 29 February, 1892.

I do myself the honor to submit the Annual Report on the working of the Coast Hospital at Little Bay for the year 1891, with appendices containing the usual returns.

The following general statement shows the number of patients under treatment during the year with results :—

Remaining in hospital on 31st December, 1890	151
Admitted during the year	1,748
Total	1,899
Discharged well or convalescent...	1,373
" relieved	276
" unrelieved	28
Died	56
Total	1,733
Remaining in hospital on 31st December, 1891	166
Average number resident daily throughout the year	193*
Mean residence of each patient in days...	40
Rate of mortality over all cases...	3.23

The number of patients admitted during 1891 was greater by 219 than during the previous year, causing the average daily number resident to increase from 178 to 193. The average residence of patients was 40 days, or 2 days less than in 1890, which is partly due to the large number of influenza cases admitted, whose stay in hospital was comparatively short. There were 11 deaths less than during the previous year, and the general death rate was reduced from 4.36 to 3.23.

The channel through which the patients admitted during the year reached the hospital is shown in the following short return :—

	Hospital Admission Depot.	Medical Adviser's Office.	Medical Superintendent.	Total.
General cases	1,500	145	15	1,660
Typhoid fever cases	14	72	2	88
Total	1,514	217	17	1,748

From the following tables it will be seen that 88 cases of typhoid fever were admitted, this number being considerably lower than during any year since the opening of the hospital, the number admitted in 1890 being 140, and in 1889 342. The cause of the reduction was the great falling off in the number of persons attacked with this disease, as shown in the recent report on this subject issued by the Board of Health; the Coast Hospital still continued to receive a larger number of these cases than the other metropolitan hospitals.

Whilst the average stay in hospital of the typhoid cases has increased by 7 days, the mortality has fallen from 15 per cent., the unusually high mortality of the previous year, to 9 per cent. :—

TABLE

* This number includes lepers until the 1st April, 1891, which are not shown in the general statistics.

Table IV shows the age, sex, and other particulars of the general hospital cases admitted during the year. The total number of these was 1,660, being an increase of 271 on the previous year. The number of typhoid cases being much smaller than usual, it was possible by a re-arrangement of the wards to receive a larger number of general cases of disease which otherwise must have been treated at the charge of the Vote for sick paupers in one of the metropolitan hospitals

The deaths amongst these cases numbered 48, giving a mortality at the rate of 2·89 per cent., which is lower than during any former years. The average stay in hospital was 40 days, as against 43 in the previous year.

The cases of leprosy which have in previous years been treated as patients of this hospital, were on the 1st of April transferred to the Leper Lazaret, which was established and set apart in accordance with the provisions of the Leprosy Act. Particulars and statistics respecting these cases will be found in the Report on Leprosy in New South Wales recently presented to Parliament by the Board of Health.

Tables V and VI show the expenditure of the hospital for the year in detail. The working expenses have decreased from £11,141 10s. 5d. to £10,837 8s. 4d., and the cost of maintenance and treatment, exclusive of ambulance service and cost of repairs, has been £46 4s. 1d. per head, as against £51 11s. 11½d. of the previous year, which was unusually high. The cost of treating patients should not be greater than £50 per head, and it is expected that in the future this amount will not be exceeded.

„ amount expended by Government Painter	15	11 0
Total	£ 15,329	12 11

During the year the Government Architect has continued to carry out considerable additions and alterations. The erection of the new bath-rooms, lavatories, and water-closets have now been completed, and some necessary alterations to the water supply have also been carried out. These works were much needed, and have added much to the comfort of the patients and the efficient working of the hospital.

Four cottages for the accommodation of some of the married members of the staff have been erected during the year and are now occupied, and the painting of the hospital buildings, commenced in the previous year, was completed.

Mrs. Mackay, the matron, resigned her office early in the year, and was succeeded by Miss M'Master, from the Prince Alfred Hospital.

No other changes took place among the officers of the institution during the year, and the Medical Superintendent reports favourably of the general efficiency of the staff under his direction.

In Appendices A and B will be found the usual classification of the diseases treated, and particulars relative to the patients who died in hospital.

I have, &c.,
F. NORTON MANNING, M.D.,
 Medical Adviser to the Government.

1891.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

PUBLIC WORKS DEPARTMENT.

(ANNUAL STATEMENT OF WORKS CARRIED OUT BY, DURING THE YEAR 1890.)

Ordered by the Legislative Assembly to be printed, 19 November, 1891.

To the Honorable The Secretary for Public Works.

Department of Public Works,

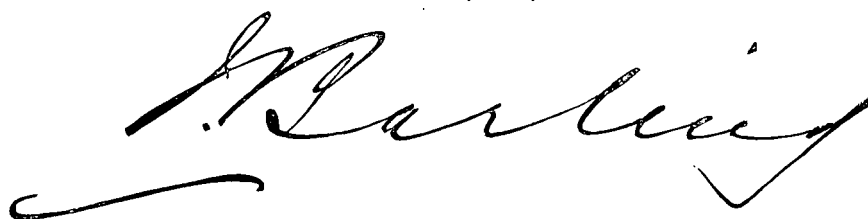

Sir,

Sydney, 3 August, 1891.

I have the honor to submit a Statement of the transactions of this Department for the year 1890, embodying returns showing the progress made with the various works which have engaged the attention of the Branches during the period mentioned. The transactions are thus summarised :—

	£	s.	d.
(1.) Railway and Tramway Construction Branch, amount expended	185,831	7	5
(2.) Land Valuation Branch, amount expended	2,807	3	3
(3.) Harbours and Rivers Branch, „ „	573,789	10	0
(4.) Government Architect's Branch, „ „	267,801	6	6
(5.) Roads and Bridges Branch, „ „	805,308	18	10
(6.) Sewerage Branch, „ „	93,621	5	11
(7.) Military Works Branch, „ „	50,906	10	6
	1,980,066	2	5
Post Office Street, Sydney, „ „	159,658	12	0
Total	2,139,724	14	5

I have, &c.,

Under Secretary.

No. 1.—Railway and Tramway Construction Branch.

Sir,

Sydney, 1 April, 1891.

I have the honor to forward herewith, for the information of the Honorable the Minister, reports showing contracts entered into for the construction of new lines of railway, and permanent and trial surveys made for proposed lines during the year 1890. Also reports showing tramways opened for traffic and in course of construction at the end of the year 1890.

H. DEANE.

Acting Engineer-in-Chief.

The Under Secretary for Public Works.

RAILWAYS.

The only portion of new line opened for traffic during the past year was that from Hornsby to St. Leonards, a distance of 10 miles. This was opened on the 1st January, as stated in last year's Report.

During the year contracts have been let as follows:—

Nyngan to Cobar.

This contract is 81 miles 27 chains in length, and the sum voted for its completion is £209,280, the amount contracted for being £133,312.

The contract was let in August, and up to the end of December the value of work done was £15,000. Considerable improvements have been made on the originally staked line, and at a comparatively very small increase in cost. The gradients have been reduced from 1 in 40 to 1 in 100.

This contract, which forms part of a surveyed line to the South Australian Border at Cockburn, leaves the Great Western Line at about a mile north of Nyngan Station. Curving to the west, the line passes into the travelling stock reserve, and follows it alongside the main road throughout the whole distance to within 4 miles of Cobar, and terminates at the Bourke Road, Cobar, at 459 miles 36 chains from Sydney, and is expected to be finished by May, 1892.

Culcairn to Corowa.

This section leaves the Southern Railway on the south side of the Billabong Creek, near the Culcairn Station, at a point 356 miles from Sydney; thence in a very straight direction to Burrumbuttock; thence to a crossing of the Howlong and Wabundry Roads about 10½ miles north of Howlong; thence passing to the south of Oil-tree Lagoon, and down Water Reserve No. 2,945, to the Albury and Corowa Roads; thence on the northern side of that road to a point at North Wahgunyah, 403 miles 34 chains from Sydney, and about 2 miles to the east of the Government township of Corowa.

This extension having been classed as a light line, it has been necessary to reduce all excavation and other items as much as possible, and by the use of frequent changes of grade, the limit being 1 in 75, to follow the surface of the ground wherever possible. This has been done to such an extent on this line that the section shows a total of 23½ miles of surface formation.

The sum voted for this line is £210,000, and the amount of tender accepted in August, £106,490. Up to the end of the year the value of work completed was £14,900; and the date for completion 31st October, 1891.

Kiama to Nowra.

A contract has been let from Kiama (being a continuation of the South Coast Railway) to the Shoalhaven River, and ending at 92 miles 32 chains from Sydney, being 22 miles 33 chains in length. £381,390 was voted, and the amount of the present contract is £225,322. The tender was accepted in August, and work was done at the end of the year up to £27,000 value.

This proposed extension of the Southern Coast Railway commences at the end of Contract No. 4 of the Illawarra Railway, at 69 miles 79 chains, near the cemetery north of Kiama; thence across Wright's Creek, and by a tunnel 506 yards in length into Kiama, to the junction of Minumurra and Collins Streets; thence in a south-easterly direction to a point 150 links distant from Kiama Bay, crossing Shoalhaven and Terralong Streets by over-bridges, and passing between the Scotch Church and Municipal Council Chambers, thence passing between and parallel to Manning and Shoalhaven Streets; thence along the western side of the South Coast Road, which it crosses at 71 miles 60 chains; thence in a southerly direction, skirting the coast for 1½ miles; thence across a number of small water-courses and the South Coast Road to Miller's Flats, passing by Gerringong at 76 miles 50 chains, and distant about 40 chains from the centre of that village, crossing the Gerringong and Nowra Roads at 76½ miles; thence in a south-westerly direction to Broughton Creek, which it crosses at 83 miles 37 chains, crossing Broughton Mill Creek at 83 miles 77 chains, crossing the Cooloongatta and Broughton Road, passing about 10 chains east of the village of Broughton; thence on the eastern side of the Main South Coast Road to Bomaderry Creek which it crosses at 92 miles 25 chains.

The

The following lines having been laid before Parliament were referred to the Public Works Committee and have been reported on:—

Proposed Line.	Length.		Expenditure.		Remarks.
	Miles.	Chns.	Proposed by Government.	Recommended by Committee.	
Nyngan to Cobar	80	50	£ 207,360	£ 207,360	Recommended and approved by Parliament. Now under construction.
Grafton to the Tweed	140	76	1,728,100	800,000	Recommended the construction of a portion, from Lismore to the Tweed, approved by Parliament.
Marrickville to Burwood Road...	4	40	90,250	90,250	Recommended and approved by Parliament.
Kiama to Nowra	22	46	381,390	381,390	Recommended and approved by Parliament. Now under construction.
Cootamundra to Temora	35	66	138,000	125,400	Recommended that the cost should not exceed £3,300 per mile. Approved by Parliament.
Moss Vale to Robertson	14	20	84,900	The Committee negatived this proposal, preferring another route.
Mudgee to Gulgong	18	68	109,330	Negatived on the ground that any extension from Mudgee should form part of a more comprehensive proposal.
Molong to Parkes and Forbes ...	71	52	430,100	430,100	Recommended to and approved by Parliament.

In connection with the above a large amount of work has been carried out in preparing plans, sections, and estimates for the use of, and information for the Committee, and also in preparing contract drawings and specifications for the contracts let; for the latter and other works now in hand new designs have been made for iron and timber bridges; various schemes, together with estimates, for proposed City Extension, and connection with the North Shore Railway and the Eastern Suburbs. New designs have also been prepared for level crossings, gates and fencing, water-ways, passenger station buildings and goods warehouses and platforms, station-masters' and gatekeepers' houses. These, together with the usual requirements of the Branch, have necessitated the employment of 22 draftsmen, who could not possibly have got through the work had not photography and photo-lithography been adopted to a great extent.

PERMANENT SURVEYS.

Byron Bay to Chinderah (Tweed River).

The permanent staking of this line, commenced in 1889, was completed early in the ensuing year.

Culcairn to Corowa.

Several deviations have been permanently staked, which considerably improve the route.

Cootamundra to Temora.

The permanent staking of this route was commenced in October, and is well in hand.

Goulburn to Crookwell.

The deviations mentioned in last year's report have been completed.

Kiama to Nowra.

The permanent surveys to improve this line have been finished. The permanent staking has been extended from Kiama to the Shoalhaven River at Nowra.

Lismore to the Tweed (Murwillumbah).

A trial survey, 14½ miles long, has been completed, of a deviation near the town of Mullumbimby; this is now being permanently staked. A length of about six miles has been done. Various other deviations, to improve the gradients, &c., have been completed.

Molong to Parkes and Forbes.

The permanent staking of this route was commenced in September, and was about half finished at the end of the year. This survey has been much improved, the ruling grade between Molong and Parkes being now 1 in 60, and between Forbes and Parkes 1 in 100.

Milson's Point Extension.

The permanent staking of this extension of the Pearce's Corner to St. Leonards railway was nearly completed at the end of the year.

Marrickville to the Burwood Road.

The permanent staking of this suburban line has been completed. A deviation has been adopted which brings the line nearer the racecourse at Canterbury, gives a better crossing of Cock's River, and a ruling grade of 1 in 100, as against 1 in 90.

TRIAL SURVEYS.

Chinderah to the Queensland Border.

A trial survey has been made, connecting the permanent staking at Chinderah on the Tweed River with the permanently staked extension of the Queensland Railway, between Brisbane and Nerang to Coolangatta.

Cobar to Wilcannia.

A great portion of the original trial survey has been revised and improved; the revision is still being proceeded with.

Cooma to Bombala, via Nimitybelle.

An alternative trial survey has been made, starting from One Tree Gap on the trial survey of the direct route, *via* Boco Gap, passing through the town of Nimitybelle, to Bombala. This line shows a great improvement on previous lines, and the ruling grade has been altered from 1 in 40 to 1 in 50.

Dubbo

Dubbo to Gulgong.

A trial survey commenced last year, connecting these places, has been completed. The grades are fairly easy.

Dubbo to Werris Creek.

A revision of the original trial survey is in hand, and the deviations surveyed have resulted in the improvement of the gradients, &c.

Guyra to South Grafton.

A trial survey of this line has been continued, and about 40 miles, through thickly timbered country, remained to be done at the end of the year.

Gulgong to Wellington.

A trial survey of a portion of this line has been completed to the Dividing Range, at the head of Uambry and Mitchell's Creeks.

Hay to the South Australian Border.

A trial survey has been made of the extension of the South-Western Railway, at Hay, to the South Australian Border, crossing the Lachlan at Oxley, and crossing the Darling at Wentworth.

North Coast Railway, connecting the Hunter and Clarence Rivers.

Surveys of the deviations and new routes, mentioned in last year's report as having been inspected, are now in hand between Maitland and Taree. The line will be much improved, and, although in many parts rough country has to be traversed, the ruling grade has been kept down to 1 in 60.

Mudgee to Gulgong.

A trial survey of a new route to connect these places has been made, resulting in much improved grades and lessened earthwork.

Necropolis Extension Railway.

A trial survey, extending the existing line through the Necropolis at Rookwood, has been made.

Picton to Mittagong.

An inspection and trial surveys have been completed of several alternative lines, in order to obtain a better gradient than at present exists on that part of the Great Southern Railway connecting these places.

Pennant Hills to Dural.

A trial survey has been made connecting the existing line, Sydney to Newcastle, at Pennant Hills, with the trial survey route, Westmead to Dural.

Deviation, Lapstone Hill, to avoid Zigzag.

A survey has been made and a line permanently staked, giving a grade of 1 in 33 and a tunnel of about 30 chains in length. Plan, section, estimate, and draft specification have been furnished to the Commissioners.

Improvement of the Western Line over the Mountains.

Various alterations were surveyed under my direction; but afterwards, by arrangement with the Railway Commissioners, the services of the Surveyor were temporarily lent for the work of completion.

Improvements of the Mudgee Line.

Various deviations have been designed, and plans, sections, and estimates of cost furnished to the Railway Commissioners, who have been carrying out the alterations with their own staff.

The Field Staff of this Office at the end of the year consisted of twenty-seven Surveyors. The following is a summary of the field work executed by these officers during 1890:—

		<i>Trial Surveys.</i>					
Preliminary Explorations	1,529	miles.
" Traverses	1,103	"
" Levels	653	"
" Cross levels	65	"
Trial Surveys	621 $\frac{3}{4}$	"
" Levels	614 $\frac{1}{2}$	"
" Cross levels	240 $\frac{1}{2}$	"
" Detail Surveys	146 $\frac{1}{4}$	"
		<i>Permanent Staking.</i>					
Permanent Surveys	251 $\frac{3}{4}$	miles.
" Levels	144	"
" Cross levels	251 $\frac{1}{2}$	"
" Check levels	154 $\frac{1}{2}$	"
" Detail Surveys	154 $\frac{3}{4}$	"

The drafting in connection with this field work has been kept well up to date by an Office Staff, consisting on an average of fifteen draftsmen.

A considerable amount of drafting has been done for the Parliamentary Standing Committee on Public Works, and for the Examiners of Public Works Proposals.

TRAMWAYS.

The following tramways have been completed and opened for traffic:—

Leichhardt to Five Dock.

This Branch Line was completed and handed over for traffic on 13th October. Contractors: Gallagher and Nelson, for earthworks; Willmot and Morgan, for bridges, permanent way, &c.

The line branches off the Leichhardt main line at Marion-street, and terminates in the Great North Road, Five Dock, being a distance of 2 miles 38 chains, single track.

Extension

Extension to Waverley Cemetery.

This line is an extension from the old Waverley terminus, to the Cemetery, a distance of 60 chains, single track. It was passed for traffic on the 17th October. Contractors: Gallagher and Duggan.

The following tramway was in course of construction at the end of the year:—

Yass Tramway.

Connecting the Yass Railway Station with the town of Yass, a distance of 2 miles 73 chains, single track. The tender of Messrs. Kerr and Cronin was accepted on the 16th June, 1890, and the work has progressed satisfactorily, although for the first four months, many delays were experienced through wet weather.

O. M. Master's tender for the superstructure of the Yass River Bridge was accepted, on the 2nd August, 1890, but no work was done up to the end of the year.

The construction of the following tramways has been approved, and steps taken to complete the work:—

Redfern to Mocre Park.

1. This line will form a connecting link between the Botany and Randwick lines.

Tenders were invited, but were not accepted before the end of the year, consequently the work was not commenced. The total distance aggregates 1 mile 43 chains, double track.

Ashfield to Drutt Town.

2. The length of this line is 2 miles 21 chains, single track; surveys, plans, and specifications were prepared, and tenders called for in November, and that of Briggs and Company accepted on the 18th December, 1890. Work had not been started before the end of the year.

Forest Lodge to Balmain.

3. Survey, plans, and specifications were prepared and completed, ready for calling tenders. The distance of this line will be 1 mile 58 chains, single track.

North Shore Cable Tramway Extension.

4. Permanent surveys, plans, and specifications were prepared and almost completed; the distance of this extension will be 60 chains, double track.

Newcastle to Merewether.

5. Survey, plans, and specifications were prepared in readiness for tenders being called. The length of this line will be 2 miles 28 chains, single track.

Newcastle to Tighe's Hill.

6. Permanent survey completed, plans in hand, and will shortly be ready. The length is 2 miles 24 chains.

Newcastle City Extension.

7. Permanent survey in hand, and almost completed.

Cook's River Road Tramway.

8. Surveys and estimates were prepared for a double track tramway from Newtown Bridge to Cook's River, a distance of 2 miles 60 chains.

The tender of Willmot and Morgan for the first portion of 55 chains was accepted on 23rd December, 1890, but work was not commenced within the year.

Reports.

A number of reports were prepared during the year, the more important ones being:—"On Cable Tramways;" "on Electric Traction;" on a proposed tramway from Burradoo to Berrima; on a proposed tramway to Buena Vista, North Sydney; on a proposed tramway to Middle Harbour and Manly Beach. And actual survey of a tramway line to South Head and Watson's Bay was made early in the year.

I have, &c.,

H. DEANE,

Acting Engineer-in-Chief.

RAILWAY CONSTRUCTION.

AMOUNT Expended from Revenue Votes by Railway and Tramway Construction Branch during 1890.

Head of Service.	Amount.
	£ s. d.
Salaries of Permanent Staff	6,971 1 6
Salaries of Temporary Office Staff	1,343 17 7
Travelling Expenses	105 1 0
Incidental Expenses	169 1 1
	8,589 1 2

W. H. QUODLING,
Chief Accountant.
No.

No. 2.—Land Valuation Branch.

Sir,

Sydney, 13 February, 1891.

In compliance with your circular instructions of 19/1/91, I have now the honor to furnish a return, for the information of the Honorable the Minister for Public Works, relating to services under this branch for the year 1890. In that year the following claims, valuations, and estimates were made:—

1. Claims for Land for—	£	s.	d.
Railway and tramway purposes	57,284	2	11
Claims for land for other public purposes	1,584,530	1	7
Total claims in 1890	<u>£1,641,814</u>	<u>4</u>	<u>6</u>
2. Valuations of Resumptions—			
Railway and tramway	6,225	5	0
Valuations of resumptions for other public purposes	688,374	12	6
	<u>£694,599</u>	<u>17</u>	<u>6</u>
3. Estimates of proposed resumptions	<u>£3,739,457</u>	<u>18</u>	<u>3</u>

The above statement cannot be given in detail as the business of this branch is of a confidential character, but I beg to state that a large number of cases was comprised under each head; and that, irrespective of my own action, each case involved a considerable amount of office work of great importance, which had to be performed with the utmost care.

I have the honor further to state, in explanation of the large amount set down under No. 3, as estimates of proposed resumptions, that it includes the probable cost of two proposed City Railway Extensions, which swell that amount to the enormous sum shown above.

J. B. THOMPSON,
Land Valuer.

The Under Secretary for Public Works.

LAND VALUATION.

AMOUNT Expended from Revenue Votes during the year 1890:—

Head of Service.	Amount.
	£ s. d.
Salaries of Permanent Staff	2,403 0 0
Travelling and Incidental Expenses	214 12 1
Rent of Office	189 11 2
	<u>2,807 3 3</u>

W. H. QUODLING,
Chief Accountant.

W. H. QUODLING,
Chief Accountant.

1891.
(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CONTRACTS FOR PUBLIC WORKS.
(RETURN RESPECTING.)

Ordered by the Legislative Assembly to be printed, 10 September, 1891.

[Laid upon the Table of the House in answer to Question No. 15, of 26th May, 1891.]

Questions and Answers.

Branch.	(1.) How many contracts for works have been let during the last two years for which tenders were called only once?	(2.) For how many works during the same period have there been tenders called two, three, four, five, and six times respectively, before any were accepted?					(3.) The number of works for which tenders have been called, but none accepted?	(4.) What are the reasons why contractors are required to tender more than once?
		2.	3.	4.	5.	6.		
Railway Construction	50	Various, but principally in consequence of tenderers failing to take up contracts.
Harbours and Rivers.....	160	24	2	3

PIPE CASTINGS.

(RETURN RESPECTING PRICES PAID BY THE GOVERNMENT FOR.)

Ordered by the Legislative Assembly to be printed, 1 March, 1892.

[Laid upon the Table in answer to Question No. 7, Votes No. 88, 18 February, 1892.]

Question.

(7.) Pipe Castings:—Mr. Nicholson asked the Secretary for Public Works,—What is the price paid by the Government for pipe castings from 3 inches diameter up to 4 feet?

Answer.

Harbours and Rivers Branch.

In this Branch the following rates are paid, viz.:—For 3", 4", and 6" pipes, £6 2s. 8d. and £6 10s. 6d. per ton; and for 48" pipes, £6 10s. 10d.

Board of Water Supply and Sewerage

The contract prices are as under:—For straight pipes, 4" to 15" diameter, £6 1s. 9d. per ton; and for special castings, £9 9s. 9d. per ton. There is also a contract for special castings, in which the price is 14 per cent. above rates mentioned in the attached schedule.

Annual Contract—Castings.—Schedule.

Schedule No.	Items.	Rates.
		£ s. d.
1	Iron castings—comprising tees, crosses, angle branches, bends, hydrant pipes (including facing and drilling flanges), and caps, collars, reducing pipes, hydrant risers (including facing and drilling flanges), surface boxes (all kinds, including fitting lids and hinge pins), and all other ordinary castings for water-mains of 3", 4", 6", 8", 9", 10", 12", 15", and 18" diameter irrespective of quantity ordered; castings of any other description when ten or more of a similar kind are ordered; castings made from any pattern in the contractors's stock; all to be coated as specified, and including provision and use of patternsper cwt.	0 13 0
2	Iron castings; patterns supplied to the contractor, including coating, as specified.....per cwt.	0 9 0
3	Iron castings, dry sand—contractor to provide patterns, coated, as specifiedper cwt.	0 15 0
4	Iron castings (special, of any kind—except those included in items No. 1—when less than ten similar castings are ordered), loam castings. Contractor to provide patterns and every requisite, coated as specifiedper cwt.	1 0 0
5	Brass or gun metal castings—patterns to be supplied by the contractorper cwt.	0 1 4
6	Wrought-iron, bar, rod, T.H., angle, or other sections, of approved brands, cut to lengths required per cwt.	0 11 0
7	Wrought-iron, sheet or plate, of approved brand, cut to sizes requiredper cwt.	0 12 6
8	Parts of ball hydrants—Dirt cap, as specified, completeeach	0 0 6
	Upper section ,, ,,	0 2 6
	Lower section ,, ,,	0 5 0

No alteration whatever to be made in the printed prices; the percentage named by the Tenderer to be general on the whole.

1891.

NEW SOUTH WALES.

PARLIAMENTARY STANDING COMMITTEE ON
PUBLIC WORKS.

SUPPLEMENTARY

FIFTH GENERAL REPORT,

TOGETHER WITH

MINUTES OF PROCEEDINGS.

Presented to Parliament in accordance with the provisions of the Public Works Act,
51 Vic. No. 37, section 8.

SYDNEY : GEORGE STEPHEN CHAPMAN, ACTING GOVERNMENT PRINTER.

1891.

[1s.]

82—A

MEMBERS OF THE COMMITTEE.

LEGISLATIVE COUNCIL.

The Honorable JOHN LACKEY, Chairman.
 The Honorable ANDREW GARRAN.
 The Honorable FREDERICK THOMAS HUMPHERY.
 The Honorable WILLIAM JOSEPH TRICKETT.
 The Honorable GEORGE HENRY COX.

LEGISLATIVE ASSEMBLY.

JACOB GARRARD, Esquire, Vice-Chairman.
 HENRY COPELAND, Esquire.
 JAMES EBENEZER TONKIN, Esquire.
 WILLIAM SPRINGTHORPE DOWEL, Esquire.
 EDWARD WILLIAM O'SULLIVAN, Esquire.
 CHARLES ALFRED LEE, Esquire.
 WILLIAM McCOURT, Esquire.
 JAMES PATRICK GARVAN, Esquire.

[On 22nd October, 1890, Mr. Joseph Palmer Abbott, having been appointed Speaker of the Legislative Assembly, resigned his position as Chairman and member of the Committee. The Hon. John Lackey, who at that time was Vice-Chairman of the Committee, was appointed Chairman in Mr. Abbott's place, and Mr. Jacob Garrard was chosen as Vice-Chairman. Mr. William McCourt was appointed a member of the Committee on 16th July, 1890, in the place of Mr. John Hurley, whose seat became vacant by reason of his resignation from the Legislative Assembly; and Mr. James Patrick Garvan was appointed a member on the 6th November, 1890, in the room of Mr. Joseph Palmer Abbott.]

PARLIAMENTARY STANDING COMMITTEE ON PUBLIC WORKS.

SUPPLEMENTARY FIFTH GENERAL REPORT.

To His Excellency the Right Honorable VICTOR ALBERT GEORGE, EARL OF JERSEY, a Member of Her Majesty's Most Honorable Privy Council, Knight Grand Cross of the Most Distinguished Order of Saint Michael and Saint George, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY,—

The Parliamentary Standing Committee on Public Works, appointed during the first Session of the present Parliament, under the Public Works Act of 1888, 51 Vic. No. 37, and the Public Works Act Amendment Act of 1889, 52 Vic. No. 26, have the honor to submit the following Supplementary General Report of their Proceedings since the date of their last General Report, 15 May, 1891 :—

At the date of the last General Report the Committee had concluded their inquiries, and arrived at decisions, respecting all the works which had been referred to them by the Legislative Assembly but three, and in the usual course of procedure they would have dealt with these three works, and before the next session of Parliament, in accordance with the 8th section of the Public Works Act, have made a further General Report. The dissolution of the present Parliament, however, will bring the existence of this Committee to an end, and in order that there may be a complete statement of the inquiries in which they have been engaged up to the day upon which they go out of office, this Report, supplementary to that dated 15 May, 1891, has been prepared.

The three works which were under consideration at the date of the last General Report, 15 May, 1891, were :—

Cable Tramway from King-street, <i>via</i> William-street, to Ocean-street	£80,000
Cable Tramway through George, Pitt, and Harris Streets, Sydney	120,000
Railway from Glen Innes to Inverell	492,000

With the two proposed cable tramways the Committee have since dealt, as far as they are concerned, finally, the inquiry in each case having been brought to a conclusion, and a Report for presentation to the Legislative Assembly adopted. Those Reports will be laid before the Assembly immediately after the opening of the next Parliament. It had been anticipated by the Committee that they would be able to conclude all their inquiries, and present the whole of their Reports to the Legislative Assembly, before the termination of the last Session, and during the existence of the Parliament by which they were appointed, but the prorogation on the 2nd instant with a view to immediate dissolution has prevented this from being done, and the Reports not already presented must, under the circumstances, be held over for the next Parliament.

Respecting

Respecting the proposed cable tramways which have been under consideration the Committee recommend the construction of that from King-street, *via* William-street, to Ocean-street, and the postponement of that through George, Pitt, and Harris streets, Sydney, the latter recommendation being based chiefly upon an opinion that before the expenditure upon a second new tramway on the cable or any other system be incurred it would be well to await the results from the construction of the first.

The inquiry with reference to the proposed railway from Glen Innes to Inverell is incomplete, and will have to be resumed by the Committee appointed by the next Parliament. A Sectional Committee has visited the districts interested in the proposed work, and has inspected the route for the line and other suggested routes, examined a large number of witnesses, and reported to the Committee; and the Sectional Committee's Report and the evidence taken by it will be available to the new Committee.

The present Committee bring their labours to a termination after having been in existence for about two years, during which period, as mentioned in their last General Report, there have been under their consideration thirty-two works, representing a proposed expenditure of £9,237,642. Of these they have dealt with thirty-one, representing an estimated total expenditure as proposed by the Government of £8,745,642, and as recommended by the Committee £6,248,112. Of the thirty-one works the Committee have recommended the construction of fourteen as referred to them, the estimated total cost of these being £3,723,812; and of seven in an amended form, representing a proposed expenditure of £4,150,600, and, as approved by the Committee, an expenditure of £2,524,300. The remaining ten of the thirty-one works, representing a proposed expenditure of £871,230, the Committee, for reasons stated in their Reports, have not recommended for construction. These results, as already indicated, clear the Committee's business-paper of every work referred to them for inquiry but one—the proposed railway from Glen Innes to Inverell, the estimated cost of which is £492,000.

The return giving a statement of the work of the present and of the two preceding Committees, which was published with the last General Report, has been brought up to date, and is republished with this Report, together with a copy of the Committee's Minutes of Proceedings.

JOHN LACKEY,
Chairman.

Office of the Parliamentary Standing Committee on Public Works,
Sydney, 5 June, 1891.

List of Proposed Public Works inquired into by the three Committees, with the results of their inquiries, from 27 August, 1888, the date of the first sitting of the first Committee appointed under the Act, to 5 June, 1891.

Date of inquiry.	Proposed Work	Expenditure proposed by the Government.	Expenditure recommended by the Committee.	Amount in excess of that proposed.	Amount in reduction of that proposed.	Remarks.
1888. 4 Sept. to 22 Oct.	Improvements to the Circular Quay.	£ 120,000	£ 125,000	£ 5,000	The Committee recommended an alteration in the plan of these improvements, by which the total estimated cost would be increased to £125,000.
26 Sept. to 22 Oct.	Storage reservoir at Potts' Hill, and second line of pipes to Crown-street.	120,000	120,000	
13 Sept. to 22 Oct.	New Central Police Court	48,000	48,000	
4 Oct. to 22 Oct.	Drainage works, Manly..	34,114	22,000	12,114	The Committee recommended the adoption of a modified plan of these drainage works, by which the total estimated cost would not exceed £22,000.
10 Oct. to 22 Oct.	Drainage works, North Shore.	77,062	107,000	29,938	The Committee recommended the adoption of the complete scheme proposed in relation to this work, and the estimated cost of which, as shown by the evidence, is £107,000.
31 Aug. to 22 Oct.	Harbour improvements at Newcastle.	112,000	112,000	
19 Sept. to 22 Oct.	Wharfage accommodation, Woolloomooloo Bay.	42,000	42,000	The Committee were of opinion that the proposed expenditure was not justified either by the requirements in connection with the wharfage accommodation of the port, or by the nature of the proposal if regarded as a scheme for the improvement of a very valuable Government property.
16 Nov. to 1889. 11 Jan.	Bridge at the Spit, Middle Harbour.	62,000	62,000	The Committee decided that the proposed expenditure was not justified by the evidence, and that a steam-punt would meet the requirements of the district in the vicinity of the proposed work for some years to come.
1888. 7 Dec. to 1889. 27 Aug.	Drainage works for the Western Suburbs.	830,304	830,304	
26 June to 30 Sept.	Improvements to the entrance of the Richmond River.	326,000	326,000	The Committee recommend that the proposed works be carried out in a certain order, so that the results from the works first constructed may be ascertained before others are proceeded with.
9 Oct. to 11 Dec.	Railway to connect North Shore Railway with Port Jackson, at Milson's Point.	262,000	262,000	The Committee consider, for various reasons stated in their report on the subject, that the work as proposed should not be carried out.
29 Aug. to 12 Dec.	Railway from Culcairn to Corowa.	197,300 (or £4,184 per mile.)	164,500 (or £3,500 per mile.)	32,800	The Committee are of opinion that this line should be constructed at a cost not exceeding £3,500 per mile.
22 Aug. to 19 Dec.	Railway from Goulburn to Crookwell.	198,300 (or £5,984 per mile.)	148,500 (or £4,500 per mile.)	49,800	The Committee consider that the cost of this railway should not exceed £4,500 per mile, and that a saving should also be effected by utilizing a certain portion of the present main line instead of taking the proposed railway through a part of the city of Goulburn.
1890. 22 Jan. to 6 Feb. 1889.	Dredge and plant for Sydney Harbour.	30,000	30,000	The evidence shows that this class of dredge is not required.
25 Sept. to 1890. 18 Feb.	Railway from Nyngan to Cobar.	207,360	207,360	The Committee recommend the construction of this railway as part of a line which should be extended to Wilcannia and Broken Hill.
14 Jan. to 11 Feb. 14 Jan.	Offices for the Board of Water Supply and Sewerage.	50,000	50,000	
6 Feb. 14 Jan. to 11 Feb.	Reticulation of the Western Suburbs Drainage Scheme.	713,592	713,592	
14 Jan. to 11 Feb.	Extension of Sydney Water Supply to Southern Suburbs — Hurstville and Rockdale.	66,000	66,000	This expenditure is rendered unnecessary by reason of a temporary water-supply scheme being sufficient to meet requirements for some years.
19 Nov. to 2 April.	Railway from Marrickville to the Burwood Road.	90,250	90,250	
23 Oct. to 24 April.	Improvements to the entrance of the Clarence River.	580,900	211,900	369,000	In this case the Committee recommend the construction of only a portion of the works proposed, as they are of opinion that when this portion has been constructed it may be found that the remainder will not be required.
31 Oct. to 15 April.	Breakwater at Byron Bay.	241,723	241,723	The original estimate for this work was £162,000; the increase is due to a difficulty in obtaining stone.

List of Proposed Public Works inquired into by the Committee, &c.—*continued.*

Date of inquiry.	Proposed Work.	Expenditure proposed by the Government.	Expenditure recommended by the Committee.	Amount in excess of that proposed.	Amount in reduction of that proposed.	Remarks.
		£	£	£	£	
4 Dec. to 24 April.	Railway from Kiama to Nowra.	381,390	381,390	In this case there was an original estimate of £441,663. The reduction is due to an amended estimate made by the Acting Engineer-in-Chief for Railways since the railway was referred to the Committee.
12 Nov. to 24 April.	Railway from Grafton to the Tweed.	1,728,100	800,000	928,100	The Committee recommend that this railway should be constructed from Lismore to Murwillumbah, instead of from Grafton to Murwillumbah, the Committee's recommendation involving a length of about 60½ miles as compared with 140 miles 76 chains, the length of the line as referred to them by the Legislative Assembly.
15 Jan. to 24 April.	Railway from Cootamundra to Temora.	138,000 (or £3,656 per mile.)	125,400 (or £3,300 per mile.)	12,600	The Committee consider that the cost of constructing this railway should not exceed £3,300 per mile.
23 Jan. to 24 April.	Railway from Moss Vale to Robertson.	84,900	84,900	The Committee negated this proposal because they consider another route, described in their report, is preferable.
23 Jan. to 25 Mar.	Railway from Mudgee to Gulgong.	109,330	109,330	The Committee have decided against this work, on the ground that any extension of the Mudgee Railway should form part of a more comprehensive proposal, the consideration of which should be deferred until after the suggestion for the connection of the Northern and Western systems, by a line between Dubbo and Werris Creek, has been dealt with.
12 Feb. to 24 April.	Bridge over Tarban Creek, Parramatta River.	26,000	26,000	The Committee consider this bridge to be unnecessary.
20 Feb. to 15 April.	Bridge over the Hunter River, at Jerry's Plains.	20,000	20,000	The Committee consider that a less expensive bridge would be sufficient to meet requirements.
25 Feb. to 24 April.	Bridge to connect Bullock Island with the mainland at Newcastle.	33,000	33,000	The Committee consider that this proposed expenditure is premature, pending certain reclamation works.
12 Feb. to 21 May.	Iron Bridge at Cowra	26,537	26,537	The original proposal represented an expenditure of £69,971, which amount was afterwards reduced to £26,537, as the result of a revision of the system of bridge-building in the Colony.
22 Jan. to 21 May.	Railway from Molong to Parkes and Forbes.	433,000	433,000	
23 May to 8 July.	Hospital for the Insane upon the Kenmore Estate, near Goulburn.	120,000	120,000	This proposed work, after being partly considered, was withdrawn from the Committee by resolution of the Assembly.
28 May to 21 Aug.	Railway to connect the North Shore Railway with the deep waters of Port Jackson, at Milson's Point.	231,156	231,156	This proposal was before the Committee on a previous occasion (estimated cost, £262,000), when it was negated; but having been referred to the Committee for further consideration, and circumstances appearing in the second inquiry which justified the construction of the railway, the Committee approved of the proposed work.
10 Dec. to 13 May, 1891.	Hospital Buildings, Macquarie-street.	140,000	56,000	84,000	In this case, two sets of plans for the buildings were submitted to the Committee, one representing a design that was estimated to cost £140,000, and the other a design to cost £56,000, and the Committee approved of the latter.
11 Feb. to 25 Mar.	College for the Training of Teachers of Public Schools.	37,500	37,500	
19 Feb. to 21 April.	Extension of the Kiama to Nowra Railway into the town of Nowra.	75,000	75,000	
24 Feb. to 14 May.	Railway from Cobar to Cockburn.	1,163,000	1,018,000	150,000	The Committee recommend the construction of this railway as far as Broken Hill only, which will reduce the proposed expenditure by £150,000.
22 Jan., 1890, to 19 May, 1891.	Cable Tramway from King-st., via William-street, to Ocean-street.	80,000	80,000	
25 Nov., 1890, to 3 June, 1891.	Cable Tramway through George, Pitt, and Harris Streets, Sydney.	120,000	120,000	The Committee consider that it is not expedient at present, for reasons stated in their Report, that this tramway should be constructed.
		£ 9,360,818	6,782,112	34,938	2,613,644	

[NOTE.—The estimated cost of the railway to connect the North Shore Railway with Port Jackson at Milson's Point was, on the first reference, when the proposal was negated, £262,000; and on the second reference, when the proposal was approved, £231,156; so that the total amount in reduction of the expenditure proposed in connection with the whole of the works which have been considered by the three Committees up to the present date is actually £2,382,488, instead of £2,613,644, as shown in the above return.]

WORK RESPECTING WHICH THE INQUIRY IS PROCEEDING.

Proposed Work.	Expenditure proposed by the Government.	Remarks.
Railway from Glen Innes to Inverell.....	£ 492,000	

PARLIAMENTARY STANDING COMMITTEE ON PUBLIC WORKS.

MINUTES OF PROCEEDINGS.

TUESDAY, 19 MAY, 1891.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

The Honorable John Lackey, Chairman.

The Hon. Andrew Garran,
The Hon. Frederick Thomas Humphery,
The Hon. William Joseph Trickett,
The Hon. George Henry Cox,
Jacob Garrard, Esq.,
Henry Copeland, Esq.,

James Ebenezer Tonkin, Esq.,
William Springthorpe Dowel, Esq.,
Edward William O'Sullivan, Esq.,
Charles Alfred Lee, Esq.,
William McCourt, Esq.,
James Patrick Garvan, Esq.

The minutes of the previous meeting were read and confirmed.

The Secretary read the following correspondence:—

Letter from the Council Clerk of the Borough of Waverley, requesting that the consideration of the proposed Cable Tramway from King-street, *via* William-street, to Ocean-street, be deferred until the Report from the Royal Commission on the Eastern Suburbs Railway had been received by Parliament.

Letter from the Council Clerk of the Borough of North Sydney, to the Under-Secretary for Public Works, and forwarded with accompanying minutes and plan to the Committee for their information, stating the terms of a resolution passed at the last meeting of the Borough Council, recommending the construction of a circular cable tramway on the Sydney side of the harbour for the accommodation of passengers landing from North Shore.

Telegrams from the Committee to the Railway Commissioners, Brisbane, asking for information relative to wheat and flour received at Stanthorpe, Warwick, and Toowoomba Railway Stations during the last five years, and telegram from the Secretary to the Railway Commissioners, in reply, stating that the information could not be furnished within the time mentioned, nor without a guarantee of the expense of preparing it.

The correspondence was received.

Mr. Humphery moved,—“That it is expedient that the proposed construction of a line of Cable Tramway from King-street, *via* William-street, to Ocean-street, be carried out.”

Mr. Copeland seconded the motion.

Mr. Cox moved,—“That the motion be amended by the insertion of the word ‘not’ before the word expedient.”

The amendment was seconded by Mr. Tonkin, and negatived on the following division:—

Ayes, 5.
Mr. Lackey,
Mr. Cox,
Mr. Garrard,
Mr. Tonkin,
Mr. Garvan.

Noes, 7.
Dr. Garran,
Mr. Humphery,
Mr. Trickett,
Mr. Copeland,
Mr. Dowel,
Mr. Lee,
Mr. McCourt.

Mr. Tonkin moved,—“That the motion be amended by the addition of the following words:—‘as far as the Queen’s Statue, King-street, and from thence to Ocean-street that the electric system be adopted.’”

The amendment was seconded by Mr. Garvan, and negatived on the following division:—

Ayes, 2.
Mr. Tonkin,
Mr. Garvan.

Noes, 10.
Mr. Lackey,
Dr. Garran,
Mr. Humphery,
Mr. Trickett,
Mr. Cox,
Mr. Garrard,
Mr. Copeland,
Mr. Dowel,
Mr. Lee,
Mr. McCourt.

Mr. Trickett moved,—“That the motion be amended by the addition of the following words:—‘but that the route should be by way of King-street, then along York-street to Druiitt-street, and then along that street and Park-street to William-street.’”

The amendment was seconded by Mr. Lee, and negatived.

The original motion was then passed, on the following division:—

<p>Ayes, 7.</p> <p>Dr. Garran, Mr. Humphery, Mr. Trickett, Mr. Copeland, Mr. Dowel, Mr. Lee, Mr. McCourt.</p>	<p>Noes, 5.</p> <p>Mr. Lackey, Mr. Cox, Mr. Garrard, Mr. Tonkin, Mr. Garvan.</p>
---	--

Mr. Copeland gave notice that he would move, at the next meeting of the Committee,—“That it is not expedient that a line of Cable Tramway should be constructed through George, Pitt, and Harris Streets, in the City of Sydney. The Committee, however, would recommend that a double line of electric tramway, on the overhead system, be constructed along George and Harris Streets.”

Dr. Garran gave notice that he would move, at the next meeting of the Committee,—“That the further taking of evidence on the Glen Innes to Inverell Railway be deferred until the evidence taken by the Sectional Committee is in the possession of the Committee.”

The Committee adjourned, at 2 minutes to 4, until 2 o'clock p.m. on Wednesday, the following day.

WEDNESDAY, 20 MAY, 1891.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

The Honorable John Lackey, Chairman.

<p>The Hon. Andrew Garran, The Hon. Frederick Thomas Humphery, The Hon. William Joseph Trickett, The Hon. George Henry Cox, Jacob Garrard, Esq., Henry Copeland, Esq.,</p>	<p>James Ebenezer Tonkin, Esq., William Springthorpe Dowel, Esq., Edward William O'Sullivan, Esq., Charles Alfred Lee, Esq., William McCourt, Esq., James Patrick Garvan, Esq.</p>
--	--

The minutes of the previous meeting were read and confirmed.

The Secretary read the following correspondence:—

Letter from the Council Clerk of the Borough of Paddington, expressing the desire of the Council that the proposed Cable Tramway from King-street, *via* William-street, to Ocean-street be constructed without delay.

Telegram from the Secretary to the Queensland Railway Commissioners, stating that the information asked for by the Committee with reference to wheat and flour received at Stanthorpe, Warwick, and Toowoomba railway stations could not be available in less time than a month, and regretting that the Railway Commissioners could not furnish it.

The correspondence was received.

Mr. Copeland moved,—“That it is not expedient that a line of Cable Tramway should be constructed through George, Pitt, and Harris Streets, in the City of Sydney. The Committee, however, would recommend that a double line of electric tramway, on the overhead system, be constructed along George and Harris Streets.”

Dr. Garran seconded the motion.

Mr. Lee moved,—“That the motion be amended by the omission of all the words after the word ‘Sydney’ in the third line.”

Mr. Cox seconded the amendment.

After discussion, it was agreed that the opinion of the Committee with reference to the proposed tramway should first be tested by a vote on the question—“That the word ‘not’ before the word ‘expedient’ in the first line of the motion be omitted.”

The amendment was negatived on the following division:—

<p>Ayes, 5.</p> <p>Mr. Humphery, Mr. Trickett, Mr. Tonkin, Mr. Dowel, Mr. O'Sullivan.</p>	<p>Noes, 8.</p> <p>Mr. Lackey, Dr. Garran, Mr. Cox, Mr. Garrard, Mr. Copeland, Mr. Lee, Mr. McCourt, Mr. Garvan.</p>
---	--

The amendment proposed by Mr. Lee was then negatived on the following division:—

<p>Ayes, 6.</p> <p>Mr. Lackey, Mr. Cox, Mr. Garrard, Mr. Lee, Mr. McCourt, Mr. Garvan.</p>	<p>Noes, 7.</p> <p>Dr. Garran, Mr. Humphery, Mr. Trickett, Mr. Copeland, Mr. Tonkin, Mr. Dowel, Mr. O'Sullivan.</p>
--	---

The original motion was negatived on the following division:—

<p>Ayes, 3.</p> <p>Dr. Garran, Mr. Copeland, Mr. Garvan.</p>	<p>Noes, 10.</p> <p>Mr. Lackey, Mr. Humphery, Mr. Trickett, Mr. Cox, Mr. Garrard, Mr. Tonkin, Mr. Dowel, Mr. O'Sullivan, Mr. Lee, Mr. McCourt.</p>
--	--

Dr.

11

Dr. Garran moved,—“That the further taking of evidence on the Glen Innes to Inverell Railway be deferred until the evidence taken by the Sectional Committee is in the possession of the Committee.”

The motion was seconded by Mr. Trickett, and passed.

Mr. Garrard gave notice that he would move, at the next meeting of the Committee,—“That, in the opinion of this Committee, it is not expedient to construct a cable tramway through George, Pitt, and Harris Streets, in the City of Sydney, until the completion of the proposed Cable Tramway from King-street, *via* William-street, to Ocean-street.”

Mr. Dowel gave notice that he would move, at the next meeting of the Committee,—“That, in the opinion of the Committee, the proposed Cable Tramway through George, Pitt, and Harris Streets, Sydney, as referred to the Committee by the Legislative Assembly, be carried out.”

The Committee adjourned, at 20 minutes past 3, until 2 o'clock p.m. on Wednesday, 27th instant.

WEDNESDAY, 27 MAY, 1891.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

The Honorable John Lackey, Chairman.

<p>The Hon. Andrew Garran, The Hon. Frederick Thomas Humphery, The Hon. William Joseph Trickett, The Hon. George Henry Cox, Jacob Garrard, Esq., Henry Copeland, Esq.,</p>		<p>James Ebenezer Tonkin, Esq., William Springthorpe Dowel, Esq., Edward William O'Sullivan, Esq., Charles Alfred Lee, Esq., William McCourt, Esq., James Patrick Garvan, Esq.</p>
--	--	--

The minutes of the previous meeting were read and confirmed.

The Secretary read the following correspondence:—

Letter from Mr. Thomas Rowe, with reference to the Committee's Report on the proposed Hospital Buildings, Macquarie-street.

Letter from Mr. P. Bedford Elwell, suggesting as a useful witness on the subject of Cable Tramways, Mr. C. E. Shaw, a shareholder in the Birmingham Tramway Co., and now on a visit to Sydney.

Letter and telegram from Mr. Hugh T. Jordan, Treasurer, Melbourne Tramways Trust, Melbourne, with reference to Mr. Thow's Report on Cable and Electrical Tramways in America, and asking whether the Committee would hear further evidence from him on the subject of cable tramways.

The correspondence was received, and it was decided, on the following division, that Mr. C. E. Shaw and Mr. Hugh T. Jordan should be requested to attend before the Committee for examination, on Tuesday, 2nd June:—

<p style="text-align: center;">Ayes, 8.</p> <p>Mr. Lackey, Dr. Garran, Mr. Humphery, Mr. Copeland, Mr. Dowel, Mr. O'Sullivan, Mr. Lee, Mr. Garvan.</p>		<p style="text-align: center;">Noes, 5.</p> <p>Mr. Trickett, Mr. Cox, Mr. Garrard, Mr. Tonkin, Mr. McCourt.</p>
--	--	---

The notices of motions in the names of Mr. Garrard and Mr. Dowel, with reference to the proposed cable tramway through George, Pitt, and Harris Streets, Sydney, were postponed.

Mr. Humphery moved,—“That the consideration of the Committee's Report to the Legislative Assembly on the proposed Cable Tramway from King-street, *via* William-street, to Ocean-street, be deferred until Tuesday, 2nd June.”

The motion was seconded by Mr. Garrard, and passed on the following division:—

<p style="text-align: center;">Ayes, 6.</p> <p>Mr. Lackey, Mr. Humphery, Mr. Garrard, Mr. Tonkin, Mr. McCourt, Mr. Garvan.</p>		<p style="text-align: center;">Noes, 4.</p> <p>Mr. Copeland, Mr. Dowel, Mr. O'Sullivan, Mr. Lee.</p>
--	--	--

The Committee adjourned, at 15 minutes past 3, until 2 o'clock p.m. on Tuesday, 2nd June.

TUESDAY, 2 JUNE, 1891.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

The Honorable John Lackey, Chairman.

<p>The Hon. Andrew Garran, The Hon. Frederick Thomas Humphery, The Hon. William Joseph Trickett, The Hon. George Henry Cox, Jacob Garrard, Esq.,</p>		<p>Henry Copeland, Esq., James Ebenezer Tonkin, Esq., William Springthorpe Dowel, Esq., Edward William O'Sullivan, Esq., William McCourt, Esq.,</p>
James Patrick Garvan, Esq.		

The minutes of the previous meeting were read and confirmed.

The Secretary read the following correspondence:—

Letter from Mr. C. E. Shaw, and telegram from Mr. Hugh T. Jordan, with reference to their giving evidence before the Committee, on the subject of Cable Tramways.

Letter from Mr. Wm. Houston, Under Secretary, Department of Lands, forwarding a statement asked for by the Sectional Committee appointed to inspect, take evidence, and report, with reference to the proposed Railway from Glen Innes to Inverell.

The correspondence was received.

The

The resolution of the Committee, of 14th April, 1891, passing for payment the account of George Baumann—£20—for entertaining the members of the Victorian Parliamentary Standing Committee on Railways, during their visit to Sydney to inquire into the Committee's method of procedure, was rescinded.

The Committee further considered the proposed Cable Tramway through George, Pitt, and Harris Streets, Sydney.

Charles E. Shaw, Esq., and Hugh Thom Jordan, Esq., Treasurer, Melbourne Tramways Trust, Melbourne, were sworn, and examined.

Mr. Garrard, as Chairman of the Sectional Committee appointed to inspect, take evidence, and report with reference to the proposed Railway from Glen Innes to Inverell, brought up the Report of the Sectional Committee, and moved that it be received.

The motion was agreed to.

The Committee proceeded to consider their Report to the Legislative Assembly on the proposed Cable Tramway from King-street, *via* William-street, to Ocean-street.

The Report was adopted, and the Chairman was authorised to sign it for presentation to the Legislative Assembly.

The Committee adjourned, at five minutes past 5, until 2 o'clock p.m. on Wednesday, the following day.

WEDNESDAY, 3 JUNE, 1891.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

The Honorable John Lackey, Chairman.

The Hon. Andrew Garran,
The Hon. Frederick Thomas Humphery,
The Hon. William Joseph Trickett,
Jacob Garrard, Esq.,

Henry Copeland, Esq.,
James Ebenezer Tonkin, Esq.,
William Springthorpe Dowel, Esq.,
Edward William O'Sullivan, Esq.

The minutes of the previous meeting were read and confirmed.

The Secretary read the following correspondence:—

Letter from the Minister for Railways, Brisbane, with reference to a letter from the Committee asking for information as to wheat and flour received at Stanthorpe, Warwick, and Toowoomba railway stations, in connection with the Committee's inquiry respecting the proposed Railway from Glen Innes to Inverell.

The correspondence was received.

Mr. Garrard moved,—“That, in the opinion of this Committee, it is not expedient to construct a cable tramway through George, Pitt, and Harris Streets, in the City of Sydney, until the completion of the proposed Cable Tramway from King-street, *via* William-street, to Ocean-street.”

Mr. Tonkin seconded the motion.

Mr. Dowel moved,—“That the motion be amended by the omission of the word ‘not’ in the first line.”

Mr. O'Sullivan seconded the amendment.

The amendment was negatived on the following division:—

Ayes, 4.

Mr. Humphery,
Mr. Trickett,
Mr. Dowel,
Mr. O'Sullivan.

Noes, 5.

Mr. Lackey,
Dr. Garran,
Mr. Garrard,
Mr. Copeland,
Mr. Tonkin,

With

With the consent of the Committee, Mr. Garrard's motion was amended by inserting after the word "expedient" the words "at present," and omitting all the words after the word "Sydney," so that it should read: "That, in the opinion of this Committee, it is not expedient, at present, to construct a cable tramway through George, Pitt, and Harris Streets, in the City of Sydney."

The amended resolution was passed on the following division:—

Ayes, 5.		Noes, 3.
Mr. Lackey,		Mr. Humphery,
Dr. Garran,		Mr. Trickett,
Mr. Garrard,		Mr. Dowel.
Mr. Copeland,		
Mr. Tonkin.		

Mr. Dowel's notice of motion,—“That, in the opinion of the Committee, the proposed Cable Tramway through George, Pitt, and Harris Streets, Sydney, as referred to the Committee by the Legislative Assembly, be carried out”—was withdrawn.

The Committee adjourned, at 3 o'clock, until 2 o'clock p.m. on Thursday, the following day.

THURSDAY, 4 JUNE, 1891.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

The Hon. John Lackey, Chairman.

The Hon. Andrew Garran,		Jacob Garrard, Esq.,
The Hon. Frederick Thomas Humphery,		Henry Copeland, Esq.,
The Hon. William Joseph Trickett,		James Ebenezer Tonkin, Esq.,
The Hon. George Henry Cox,		William Springthorpe Dowel, Esq.,
		Edward William O'Sullivan, Esq.,

The minutes of the previous meeting were read and confirmed.

The Secretary read the following correspondence:—

Letter from Mr. James Patrick Garvan, with reference to that day's meeting of the Committee.
 Letter from Mr. Eugene F. Rudder, of the Upper Orara Progress Association, asking the Committee to suspend their final Report on the proposed Railway from Glen Innes to Inverell until the survey between Guyra and South Grafton is completed, and bringing under their notice Captain Howard's report on the capabilities of Coff's Harbour as a harbour of refuge and port of shipment.

The correspondence was received.

The following account was passed for payment:—

W. Drake, expenses as shorthand writer and acting-secretary to the Sectional
 Committee on the proposed Railway from Glen Innes to Inverell £25 16 0

The Committee deliberated as to whether, in view of the immediate dissolution of Parliament, a Supplementary General Report should be forwarded to His Excellency the Governor, stating the result of the work of the Committee to date.

Mr. Garrard moved,—“That a Supplementary General Report be prepared and forwarded to His Excellency the Governor.”

The motion was seconded by Mr. Tonkin, and passed.

The Committee proceeded to consider their Report to the Legislative Assembly on the proposed Cable Tramway through George, Pitt, and Harris Streets, Sydney.

The preamble and clauses 1 to 5 were passed.

In clause 6—Decision of the Committee—Mr. Garrard moved,—“That the following words be omitted: ‘Another reason which has influenced the Committee is a doubt whether the tramway as proposed would be successful in meeting public requirements, and proving as profitable as it ought to be. As it is proposed there would be a single line in George-street, north of Bathurst-street, and a single line in Pitt-street, and the traffic would be so arranged that passengers in either of those streets would be able to travel only one way. People in George-street, north of Bathurst-street, wishing to go by tram southwards, would be obliged to travel in a car to the end of George-street North, round by way of Queen-street into Pitt-street, and thence along Pitt-street, and into George-street again by way of Bathurst-street; or walk from George-street into Pitt-street, where they would find the cars going along that street in a southerly direction. In the same manner, persons in Pitt-street wishing to go to any place along that street northwards would be compelled either to walk, take an omnibus or cab, or, after walking into George-street, get into a tramcar and travel round into the north end of Pitt-street, by way of Queen-street. It is very doubtful if people would put themselves to this trouble and delay, and the consequence would probably be that omnibus traffic in George and Pitt Streets would be very much the same as it is now. To catch the traffic which omnibuses otherwise would get it appears to the Committee the tramcars would have to travel both ways in each street, and the question then arises as to whether George or Pitt Street is wide enough for a double line of tramway. If these streets are not sufficiently wide for a double line, a further consideration of the matter by the Acting Engineer-in-Chief for Railways may lead to some change of route which will present greater facilities for laying down a double line, and at the same time be of advantage to the public to the extent expected from running the tramway through George and Pitt Streets. All these reasons suggest the advisableness of postponing for the present the construction of the proposed work, and this postponement the Committee recommend.’”

The

The amendment was seconded by Mr. Humphery, and passed on the following division :—

Ayes, 7. Mr. Humphery, Mr. Trickett, Mr. Cox, Mr. Garrard, Mr. Tonkin, Mr. Dowel, Mr. O'Sullivan.	Noes, 3. Mr. Lackey, Dr. Garran, Mr. Copeland.
--	---

The clause as amended, and the remaining clauses of the Report, were passed.
The Report was adopted on the following division :—

Ayes, 6. Mr. Lackey, Dr. Garran, Mr. Cox, Mr. Garrard, Mr. Copeland, Mr. Tonkin.	Noes, 4. Mr. Humphery, Mr. Trickett, Mr. Dowel, Mr. O'Sullivan.
--	---

The Chairman was authorised to sign the Report for presentation to the Legislative Assembly.

Mr. Trickett moved,—“That the thanks of the Committee be accorded the Chairman and the Vice-Chairman for the manner in which they have carried out the duties of their positions during the time the Committee have been in office.”

The motion was agreed to.

The Committee adjourned, at 3 o'clock, until 2 o'clock p.m. on Friday, the following day.

FRIDAY, 5 JUNE, 1891.

The Committee met at 2 p.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Vice-Chairman.

The Hon. Andrew Garran, The Hon. Frederick Thomas Humphery, The Hon. William Joseph Trickett, The Hon. George Henry Cox,	Henry Copeland, Esq., James Ebenezer Tonkin, Esq., William Springthorpe Dowel, Esq., Edward William O'Sullivan, Esq.
---	---

The minutes of the previous meeting were read and confirmed.

The Committee proceeded to consider their Supplementary Fifth General Report to His Excellency the Governor.

The Report was adopted, and the Chairman was authorised to sign it for presentation to His Excellency the Governor.

On the motion of Mr. Humphery, it was resolved :—“That the Committee desire to place upon record their high appreciation of the very efficient manner in which the Secretary (Mr. Charles Lyne) has performed his important duties.”

The Committee then adjourned.

PARLIAMENTARY STANDING COMMITTEE ON PUBLIC WORKS.

SECTIONAL COMMITTEE.

Railway from Glen Innes to Inverell.

MINUTES OF PROCEEDINGS.

THE Sectional Committee of the Parliamentary Standing Committee on Public Works, appointed on 23rd April, 1891, “to inspect, take evidence, and report with reference to the proposed railway from Glen Innes to Inverell,” met at the Court-house, Glen Innes, at 3'45 p.m. on

FRIDAY, 1 MAY, 1891.

MEMBERS PRESENT :—

The Hon. William Joseph Trickett, William McCourt, Esq.	Jacob Garrard, Esq., Chairman. Edward William O'Sullivan, Esq.
--	---

The following witnesses were sworn, and examined :—Messrs. M. A. Maclean and C. M. Stuart.

SATURDAY, 2 MAY, 1891.

The Sectional Committee met at the Court-house, Glen Innes, at 10 a.m.

MEMBERS PRESENT :—

The Hon. William Joseph Trickett, William McCourt, Esq.	Jacob Garrard, Esq., Chairman. Edward William O'Sullivan, Esq.
--	---

The minutes of the previous meeting were read and confirmed.

The following witnesses were sworn, and examined :—Messrs. M. H. Fitzhardinge, J. F. Utz, C. Legh, Wm. Woods, T. O'Hara, J. A. McIntyre, P. Walsh, J. A. P. Selkirk, P. McCormack, J. Healy, and E. Grover.

MONDAY,

MONDAY, 4 MAY, 1891.

The Sectional Committee met at Tattersall's Hotel, Glen Innes, at 8.30 a.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.	
The Hon. William Joseph Trickett.	Edward William O'Sullivan, Esq.
	William McCourt, Esq.

The minutes of the previous meeting were read and confirmed.

Mr. W. T. Cadell, grazier, was sworn, and examined.

The Committee left Glen Innes at 9.15 a.m. by special coach, for Inverell, stopping on the way at Swanvale, where the following witnesses were sworn, and examined:—Messrs. W. Young, D. S. Anderson, and A. Caldwell.

The Committee arrived at Inverell at 5.30 p.m., where they were joined by Mr. Tonkin.

TUESDAY, 5 MAY, 1891.

The Sectional Committee met at the Court-house, Inverell, at 10 a.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.	
The Hon. William Joseph Trickett,	Edward William O'Sullivan, Esq.,
James Ebenezer Tonkin, Esq.,	William McCourt, Esq.

The minutes of the previous meeting were read and confirmed.

The following witnesses were sworn, and examined:—Messrs. J. P. Pauley, E. Grainger, W. Gilholme, J. Taafe, J. Coggan, Jno. Moore, Jas. Bryden, P. B. Eddy, H. Wyndham, A. McClymont, E. Wyndham, J. W. Moore, T. Harland, G. F. Lewin, H. Pemberthy, H. N. McLean, A. Oliver, and R. Alcock.

WEDNESDAY, 6 MAY, 1891.

The Sectional Committee met at the Court-house, Inverell, at 10 a.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.	
The Hon. William Joseph Trickett,	Edward William O'Sullivan, Esq.,
James Ebenezer Tonkin, Esq.,	William McCourt, Esq.

The minutes of the previous meeting were read and confirmed.

The following witnesses were sworn, and examined:—Messrs. C. C. Loxton, R. Stout, H. P. Baly, W. H. Rowland, J. Sinclair, and A. G. Jenkins.

The Committee in the afternoon drove out and inspected some of the country in the vicinity of Inverell, and next morning visited the site of the proposed railway station for the line from Glen Innes to Inverell.

THURSDAY, 7 MAY, 1891.

The Sectional Committee left Inverell by special coach at 10.15 a.m., and arrived at Tingha at 12.30 p.m. The Committee inspected some tin-mining operations adjacent to the township, and met at the Court-house at 2.30 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.	
The Hon. William Joseph Trickett,	Edward William O'Sullivan, Esq.,
James Ebenezer Tonkin, Esq.,	William McCourt, Esq.

The minutes of the previous meeting were read and confirmed.

The following witnesses were sworn, and examined:—Messrs. R. Buist, W. Litchfield, E. Warland, R. A. Wiseman, T. Jones, and J. Rank.

Subsequently, at the Commercial Hotel, the following witnesses were sworn, and examined:—Messrs. B. C. Martin, C. Bowers, and A. J. Parker; and Mr. W. Litchfield was recalled and further examined.

FRIDAY, 8 MAY, 1891.

The Sectional Committee left Tingha by special coach at 7 a.m., and arrived at Wandsworth at 12.30 p.m.

The Committee met at the Halfway House, Wandsworth, at 1.30 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.	
The Hon. William Joseph Trickett,	Edward William O'Sullivan, Esq.,
James Ebenezer Tonkin, Esq.,	William McCourt, Esq.

The minutes of the previous meeting were read, and confirmed.

The following witnesses were sworn, and examined:—Messrs. E. Everett, D. Stewart, W. Ferguson, W. Wade, W. Willis, J. E. Everett, and A. McCrossin.

The Committee left Wandsworth at 2.30 p.m., and arrived at Guyra at 5.30 p.m.

SATURDAY,

SATURDAY, 9 MAY, 1891.

The Sectional Committee met at the Guyra Hotel, Guyra, at 9.45 a.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.	
The Hon. William Joseph Trickett,	Edward William O'Sullivan, Esq.,
James Ebenezer Tonkin, Esq.,	William McCourt, Esq.

The minutes of the previous meeting were read and confirmed.

The following witnesses were sworn, and examined :—Messrs. A. W. Everett, W. Moore, J. Kirk, M. Kenny, G. Drabsch, R. Sutton, L. Dean, J. Monteith, A. F. Dutton, R. Pearson, and W. Relton.

MONDAY, 11 MAY, 1891.

The Sectional Committee met at the Court-house, Armidale, at 9.30 a.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.	
James Ebenezer Tonkin, Esq.,	Edward William O'Sullivan, Esq.,
	William McCourt, Esq.

The minutes of the previous meeting were read and confirmed.

The following witnesses were sworn, and examined :—Messrs. W. Drew, H. Hogarth, J. Moore, senior, C. Wilson, R. Richardson, F. Brannnd, J. F. French, J. E. Moore, J. Craigie, and E. Lonsdale.

The Committee proceeded by train to Uralla, and met at the Court-house, where the following witnesses were sworn, and examined :—Messrs. M. J. McMahan, W. Cleghorn, J. D. Leece, J. Haines, and J. H. Sandilands.

The Committee proceeded by train to Tamworth.

TUESDAY, 12 MAY, 1891.

The Sectional Committee met at the Royal Hotel, Tamworth, at 11.30 a.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.	
James Ebenezer Tonkin, Esq.,	Edward William O'Sullivan, Esq.,
	William McCourt, Esq.

The minutes of the previous meeting were read, and confirmed.

The following witnesses were sworn, and examined :—Messrs. C. J. Britten and L. H. Hyman.

THURSDAY, 28 MAY, 1891.

The Sectional Committee met at the office of the Parliamentary Standing Committee on Public Works, Bridge-street, Sydney, at 2 o'clock p.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.	
The Hon. William Joseph Trickett,	Edward William O'Sullivan, Esq.,
James Ebenezer Tonkin, Esq.,	William McCourt, Esq.

The minutes of the previous meeting were read and confirmed.

Mr. O'Sullivan moved :—"That the Sectional Committee recommend the construction of a Railway from Glen Innes to Inverell by the amended route, *via* Wellingrove and Swanbrook."

The motion was seconded by Mr. Trickett.

After discussion a division was taken with the following result :—

Ayes, 3.	Noes, 2.
Mr. Trickett,	Mr. Tonkin,
Mr. Garrard,	Mr. M'Court.
Mr. O'Sullivan.	

The motion was consequently carried by a majority of one.

It was resolved that the Draft Report be prepared for consideration at a subsequent meeting.

TUESDAY, 2 JUNE, 1891.

The Sectional Committee met at the office of the Parliamentary Standing Committee on Public Works, Bridge-street, Sydney, at 1.30 p.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.	
The Hon. William Joseph Trickett,	Edward William O'Sullivan, Esq.,
James Ebenezer Tonkin, Esq.,	William McCourt, Esq.

The minutes of the previous meeting were read and confirmed.

The Draft Report was considered and adopted.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

HARBOURS AND RIVERS.

(REPORT ON DREDGING OPERATIONS BY THE ENGINEER-IN-CHIEF FOR.)

Ordered by the Legislative Assembly to be printed, 22 December, 1891.

The Engineer-in-Chief for Harbours and Rivers to The Under Secretary for Public Works.

Department of Public Works, Harbours and Rivers Branch,
Sydney, 22 December, 1891.

Minute Paper.

Subject:—Dredging operations.

I FORWARD herewith, for the information of the Honorable the Minister for Works, a report upon the progress and cost of dredging throughout the colony.

When last submitting a similar report I predicted that very satisfactory results would follow the introduction of dredging by sand pumps, and it is gratifying to know that my expectations have been fully realised.

Early last year the Department's steam hopper barge "Juno," after being converted into a suction dredge, started work excavating the new basin at Bullock Island, Newcastle, and, as will be seen by the Superintendent's report attached, the dual work of dredging and reclaiming has been so successful that 22 acres of land have been added to the area to be used for additional coal shipping appliances, while the necessary deep water has, at the same time, been made for berthing ships for coal freight. The cost of performing this work under the old system of bucket dredging and discharging for reclamation by barrows would have cost four times as much as reclaiming by sand pumping.

A second steam barge, the "Neptune," was altered to a suction dredge for use in Sydney Harbour, and was put to work in August 1890. Since then large areas have been reclaimed at White Bay and Long Cove, and a lesser amount at Snail's Bay, at a cost of less than 2d. per ton, most of the material being conveyed over 1,000 feet.

I have had carried out with much success at the "Neptune" an entirely novel method of utilising the silt lifted by dredges working several miles distant. Instead of attempting to lift the material out of the silt barges it is dumped alongside the suction pipe of the sand pump and pumped on shore, as much as 2,500 tons per day being so disposed of.

A sand pump has been at work for the past three months at the Tweed; another is about commencing work at the Nambucca; and a third will be sent to the Myall in a few days. The hulls of these dredges have all been built at the Fitzroy Dock, where the machinery constructed by local firms has been fitted on board.

The work performed by the fourteen ladder dredges and eighteen grab dredges in the different ports and rivers of the colony, together with the cost of working, is fully dealt with in Mr. Portus' report, and in the tabulated statements submitted herewith.

It will be seen that double-shift work has been carried on to a large extent to remove the extensive flood deposits of the past two years. Newcastle Harbour has suffered more than any other place from this cause, and notwithstanding the improvements being effected to the dredging plant it will probably, in view of increased harbour extension, be found necessary to build an additional dredge for that port.

The Dredge Regulations, first introduced in 1880, have been rigidly adhered to, with the best results. Since my last report I had copies of the classification sheets distributed amongst the employees, giving each employee a month to appeal if dissatisfied with his grade number, and after carefully dealing with objections I have had the amended sheet printed, and it forms part of the report I am now submitting.

C. W. DARLEY,
Engineer-in-Chief for Harbours and Rivers.

Department

Department of Public Works,
Harbours and Rivers Branch,
Sydney, 21 September, 1891.

The Engineer-in-Chief for Harbours and Rivers,—
Sir,

I beg respectfully to submit the following special report upon the progress of dredging throughout the Colony, as the bi-monthly statements placed before you, while recording the quantity of work performed by each dredge, do not give the cost of the dredging herewith furnished.

More than ordinary interest attaches to the operations of the past and present year, owing to the use for the first time in the Australian colonies of sand-pumps for utilising dredged material in reclaiming land. Hitherto the advantages to the State of dredging have been chiefly apparent—notably at Newcastle—in the building up of national wealth by affording facilities for commercial enterprise; but since the successful adaptation of the latest approved appliances for landing sand the work of dredging is becoming a direct source of available revenue. The value of the land reclaimed in cities like Sydney and Newcastle in a year will alone far more than recoup the entire cost of working expenses and interest on plant, leaving the channel-deepening costless to the country.

In illustration of this, I may state that the steam hopper-berge "Juno" was converted into a sand-pump dredge during 1889, and started deepening the new basin behind the Bullock Island dyke early in 1890. Up to the present time it is estimated that in making a deep-water channel for ships to load coal at additional cranes to be erected, 1,130,000 tons of sand have been lifted and pumped on reclaimed land to the extent of 22 acres, to which has been imparted thereby a commercial value of £44,000, at a cost for dredging of about £8,500.

Results not less satisfactory have followed the working of the converted steam-hopper berge "Neptune" in Sydney Harbour. The "Neptune" started work at White Bay reclamation in August, 1890, pumping silt a distance of 1,100 feet to fill the southern part of the reclaimed area, where, owing to the long wheeling distance, hand labour work had cost 14½d. per ton. Speedily the cost of reclaiming fell to about 2¼d. per ton, while a scarcely less important advantage collaterally came about by the increased output from two of the ladder dredges, which were enabled to get rid of their silt by dumping it alongside the "Neptune," to be pumped ashore, instead of the more costly arrangement of having it towed to sea, with attendant delays incidental to punts not going out during stormy weather.

Hitherto the material pumped on shore by the "Neptune" at White Bay, Snail's Bay, and now at Long Cove (Leichhardt) has been chiefly sandy silt, the Dutch type of pump of the "Juno" and "Neptune" not being suited for clay. The negotiations in progress for obtaining a Von Schmidt clay-cutting dredge and pump, similar to the one now working for Mr. Higgins so successfully at Melbourne, will, if carried out, enable the Department not only to utilise for reclamation the clay dredged in Darling Harbour, but also to deal with other material in canal-making, for which the more simple sand-pump is not so suited.

The third sand-pump, "Actor," after being tested in Sydney Harbour, was sent to the Tweed, where it is now doing good service in making a channel for ocean steamers through a long sand-flat about 3 miles from the bar. This dredge, unlike the "Juno" and "Neptune," is only designed for stationary work, either loading barges or pumping sand and delivering it on shore. At the Tweed the sand dredged is forced through floating pipes to a swamp between the river and the sea shore.

A fourth sand-pump dredge, "Alesus," built, as the "Actor" was, at the Fitzroy Dock, is now ready for work, and will be sent in a few weeks to improve the Nambucca River, a sum of money having been specially voted for a dredge for that river. A fifth, the "Dorus," available for the extensive reclamation works projected at the Government Sewage Farm and at Homebush Bay, will in a few weeks be ready for work.

The twin-screw double sand pump "Jupiter," being built by Messrs. Simons, on the Clyde, for the Clarence River, should arrive in the Colony early next year. I look forward with much interest to the trial of this vessel. Carrying 500 tons in the hopper, and being fitted with twin screws, it is hoped that with favourable weather it will be possible (by working from inside and outside) for river bars to be effectually deepened, as vessels of the "Jupiter" type can pump sand when there is a considerable lift of sea.

LADDER

Newcastle Harbour.
Sand-pump "Juno,"
working sixteen hours
daily during 1890,
pumped ashore about
513,000 tons, at cost of
2-1868d. per ton.

Sydney Harbour.
Sand-pump, "Neptune,"
working sixteen hours
daily during 1890,
pumped ashore about
324,440 tons, at cost of
1-9744d. per ton.

Tweed River.
Sand-pump "Actor."

New Plant.
Sand-pump "Alesus."

Sand-pump "Dorus."

Sand-pump "Jupiter."

LADDER DREDGES.

Fourteen ladder dredges, with attendant tugs and barges, have been kept busily at work at various ports between the Richmond and Moruya. Owing to the extensive deposits, due to exceptionally heavy floods, it became necessary to work many of them sixteen hours per day. Six of them were thus working at the beginning of this year, and one twenty-four hours per day.

The harbour of Newcastle has suffered from flood deposits to a much greater extent than any other port or river in the Colony, the penalty, it would seem, for the fine artificial estuary formed by the last sixteen years' dredging. When the harbour was a huge sandbank, with two narrow channels—one near Stockton, the other near Newcastle—but little inconvenience was experienced after the heaviest of the Hunter floods, the river-bank soil being swept seaward with great velocity through the narrow channels, leaving in the harbour upon the subsidence of the flood but a trifling deposit.

The removal, by dredging, of 10,000,000 tons of sand which formed the central bank, while giving a large area of deep water from shore to shore, gave also a relieving basin for the flood-waters of the Hunter and its tributaries. Eddy tides, unknown before, were observed during the subsidence of floods, especially near the Stockton shore, and the deposit of Hunter River soil was so extensive in the northern part of the harbour that, out of 2,000,000 tons of material lifted during 1890, it is estimated that 1,300,000 was mud, the residuum of the floods of 1889-90. If Newcastle is to maintain its supremacy as a coal-shipping port the contingency of having to deal with such deposits after heavy floods must always be reckoned with, and while there is a necessity for increased ladder-dredging power it is worthy of consideration whether it would not be remunerative, instead of sending so much rich soil to sea, to dump it alongside a suction dredge, moored north of Stockton, to be pumped on to the sterile wastes for reclamation and fertilization.

The ladder dredges working in Newcastle are the "Newcastle" and the "Hunter," with the "Vulcan" occasionally (when the river navigation is unobstructed). At present the "Newcastle," after having been lengthened 24 feet, is being fitted with new compound engines and boilers to increase her efficiency. When the "Newcastle" resumes work the "Hunter" will be put under repairs for a short time to effect alterations conducive to more economical and efficient working. The alterations to both dredges include provision for working at a greater depth than heretofore, for, although there is sufficient water at the crane berths and moorings for vessels at present frequenting the port, it is desirable, in anticipation of the Lobnitz rock drill proving successful in deepening the rocky bar at Nobbys, that correspondingly deeper water be given inside the harbour.

For ten months of 1890, and during three months of the present year, the dredge "Vulcan" was employed at the different flats on the Hunter River. Dredging was limited to the immediate requirements of the steamers, owing to the enormous expense incidental to towing the silt from the upper parts of the river to sea. It is to be hoped ere the river again requires deepening that a suction dredge will be available to pump the silt on shore and save the expense of a round tow of 56 miles.

The dredge "Minos" has been employed for a considerable time past at the formidable task, for so small a dredge, of opening a channel through a neck of water over 3 miles in length from Lake Macquarie to the sea. For the first half mile from the bar a straight cutting parallel to the breakwater was made through a bank 3 feet above low-water mark. The bar, nearly dry at low water, was deepened to admit a vessel drawing 10 feet to cross over it, and steamers drawing 7 feet now steam into the lake. The almost entire absence of tidal rise at the lake entrance prevents the deeper water on the bar being yet fully availed of. The proximity of Newcastle Harbour will, doubtless, for a long time to come tell against the progress of Lake Maquarie as a coal port, but its possibilities as an inexpensively upheld harbour, within easy distance of the best coal-fields, encourage the hope that a succeeding generation may see floating in its sheltered waters vessels freighted with coal and wool for distant lands and other climes.

The lessened flow of sewage into Sydney Harbour has enabled the Department to employ some of the dredges to a larger extent than heretofore upon new work. The dredge "Samson" was engaged for a considerable time deepening the area between the new Sutherland Dock and Spectacle Island, and in extending the deep water

Newcastle Harbour.
Dredges working sixteen and twenty-four hours daily. Cost (exclusive of towing):—Dredge "Newcastle" lifted in 1890 665,800 tons; cost of dredging, 2 7957d. per ton. Dredge "Hunter" lifted in 1890, 718,720 tons; cost of dredging, 2 3847d. per ton.

Hunter River.
Dredge "Vulcan" working sixteen hours daily during 1890 lifted 251,110 tons, at cost of 4 7766d. per ton.

Lake Macquarie.
"Minos" working sixteen hours daily during 1890 lifted 325,820 tons, at a cost of 2 6128d. per ton.

Sydney Harbour.
"Samson," working 8 hours daily during 1890, lifted 150,350 tons, at a cost of 6 1395d. per ton.

"Sydney," working 8 hours daily during 1890, lifted 216,690 tons, at a cost of 3-5071d. per ton.

"Hercules," working 8 hours daily during 1890, lifted 155,100 tons, at a cost of 3-3622d. per ton.
"Charon," working 8 hours daily during 1890, lifted 107,260 tons, at a cost of 3-0533d. per ton.

Shoalhaven River.

"Pluto," working 8 hours daily during 1890, lifted 160,960 tons, at a cost of 3-2703d. per ton.

Moruya River.

"Archimedes," working sixteen hours daily from June, 1890, lifted in 1890 153,000 tons, at a cost of 4-2152d. per ton.

Manning River.

"Ulysses," working eight hours daily during 1890, lifted 164,420 tons, at a cost of 3-5084d. per ton.

Macleay River.

"Fitzroy," working sixteen hours daily from June, 1890, lifted in 1890 271,780 tons, at a cost of 2-9586d. per ton.

Bellinger River.

"Titan," working sixteen hours daily during 1890, lifted 137,500 tons, at a cost of 4-6070d. per ton.

water towards the Balmain shore to make the dock available for the heaviest draft vessels visiting the port. Similarly, Sydney Cove, Woolloomooloo Bay, and large portions of Darling Harbour have been deepened by the "Samson" and new ladder dredge "Sydney."

The approaches to, and berths alongside, the two new long jetties stretching northward from Pymont Bridge have been deepened, and the necessary dredging performed to permit of the new wharf along the western shore of Darling Harbour to Darling Island being proceeded with. A deep-water channel has been made to the extensive area recently reclaimed at White Bay, while at Roselle Bay a very extensive area has been deepened north of Annandale by the dredge "Hercules." The sandy silt lifted at Roselle Bay has proved most valuable in conjunction with sand dredged by the "Charon" from the Parramatta River shoals for reclaiming land at White Bay, Snail's Bay, and Long Cove. More than 2,000 tons is being daily dumped alongside the sand-pump "Neptune" at Long Cove, and forced through pipes a distance of over 1,000 feet, converting an insanitary quagmire, the property of the State, into healthy land, suitable for sale for residences or manufactories on the shores of the new canal in course of construction at Leichhardt.

It was hoped that there would have been ere this some prospect of cessation in the dredging of the Shoalhaven River, the "Pluto" having been altered to work more effectively than before; but the floods general throughout the Colony were especially heavy in the southern district, causing much extra work for the dredge. The channels have been maintained without recourse to double shifts, and as a cessation of floods may reasonably be looked for it is anticipated that other work may ere long be undertaken by the "Pluto."

The dredge "Archimedes" has for the past 3 $\frac{3}{4}$ years been employed near Moruya Heads chiefly (with a grab dredge) cutting a new channel parallel to the fascine dyke, constructed by Mr. Williams. There is now a straight channel used by the ocean steamers from the bar to the Illawarra Company's wharf, and the "Archimedes" is being brought to Sydney to receive a new boiler, and to be fitted with new and larger buckets.

The Manning River dredge "Ulysses" has been chiefly engaged during the last two years opening up the navigation to Wingham. It is fortunate that the channel between Taree and the sea maintains itself without much artificial aid, for the services of the dredge, owing to the liability to shoal, will in the future be almost constantly required above Taree. To obtain the best results from the recently dredged channel, the Marine Board should be asked to grant a small sum annually for lighting the channels at night. The Macleay River has been lighted by the Board, and a day is frequently saved to the public and the steamers thereby.

The "Ulysses" is at present undergoing, with the punts, a thorough overhaul, the new dock at Cundletown having been used for the purpose of cleaning and painting.

From May, 1890, to August, 1891, the dredge "Fitzroy," on the Macleay, was worked with two shifts of men sixteen hours daily, the unusually high floods early in 1890 having interfered to such an extent with navigation as to prevent the ocean steamers from going up the river. The worst flats having been sufficiently deepened to admit of the steamers reaching Kempsey, and the river being restored to something like its normal state, the usual eight hours work was reverted to at the beginning of the present month. Three months ago the plant underwent a very complete overhaul in the Government dock at Kempsey, and the "Hector," ineffective as a tug, was converted into a lighter, the screw tug "Athena," being available, replaced the "Hector," with conspicuous benefit to the general work.

The "Titan," the smallest and most expensively worked, relatively, of all the ladder dredges, has been working under favourable conditions for two and a half years on the Bellinger River sixteen hours per day. Were it not that there is such a demand from all the rivers for dredges it would be advisable to put this small machine aside, or work it in conjunction with another dredge at lessened expense. A very large proportion of the work to be done is in the removal of gravel banks in the upper reaches of the river, and the landholders below Fernmount stoutly protest against any assistance being given to their up-river neighbours if such assistance involves depositing silt near their holdings lower down stream. When a Grab dredge is available one might be sent to the shoals above Fernmount, to temporarily relieve the channels.

At

At the Richmond River the ladder dredge "Alcides" has been almost exclusively employed in deepening the many shoals between Ballina and Lismore, and some work has been performed at Emigrant Creek. A little dredging was done between Ballina and the sea, but this is work for which the plant is not well suited. Such a machine as the twin-screw light-draft hopper sand-pump "Jupiter," now building for the Clarence, would, if employed on the Richmond Crossing, speedily give relief to navigation, the sand pumped into the vessel's hopper could either be dumped at sea or near the training walls, and at a second operation be discharged behind them.

STEAM TUGS.

The steam tugs have all been maintained in efficient working order, two of the small iron ones, "Athena" and "Ganymede," have with conspicuous benefit been lengthened and fitted with new and more powerful boilers at the Fitzroy Dock. The "Dione," although of great power, was found, owing to the hull being small, unfitted for sea-towing in moderate weather, and a new tug being required, lighter engines were put in the "Dione," and a large wooden tug has been built for the more powerful machinery thus available. The silt-conveying plant has had during the past year a valuable addition to it in the two hopper barges, each of 640 tons, built by the Atlas Company, and the steam-hopper barge "Castor," built by Mort & Co. It is claimed for the latter vessel that it is the most complete and effective vessel of its kind that has been built. The engines are triple expansion, of 800-horse power. Steam is availed of for lifting the hopper doors, the anchors, and for hauling the tow-ropes. Running free, a speed of $11\frac{1}{2}$ knots is easily maintained, and 10 knots when conveying 1,000 tons silt to sea in the hopper and in the barge towed.

The "Thetis" has during the past three months been lengthened and fitted with new triple expansion engines of 600-horse power. Bilge keels have been fitted, and it is anticipated, from her excellent accommodation and high speed, that trips along the coast, as well as to Lord Howe and Norfolk Islands, will be made with far more comfort and expedition than has hitherto been possible.

GRAB DREDGES.

In addition to the fourteen ladder dredges and three sand-pumps, eighteen Priestman grab machines have been working at the various ports and rivers between Moruya and the Tweed. The first cost and annual expense of working the ladder dredges is so considerable that many of the rivers would have remained unimproved had not the small grab dredges been built. Notwithstanding the floods much good work has been done by them, notably at Camden Haven, the Wallumba, Nambucca, and the Hastings; while at Cook's River and Shea's Creek, where Mr. Williams has been engaged constructing 5 miles of fascine banks, the grabs used by him have done both cheap and effective work, the facility offered for disposing of the silt, by utilising it in the formation of the banks, rendering them specially suited for work of this kind. Used in connection with rock-blasting, both in Sydney Harbour and Newcastle, these machines have also proved invaluable, the ordinary bucket dredge being wholly unsuited for lifting broken-up rock, portions of which often weigh from 3 to 4 tons. Explanatory notes as to varying cost of work are given in the detailed schedule accompanying this report.

No effort has been spared, consistent with upholding the plant in efficiency, to lessen the expense of dredging; and in this connection it should be noted, when comparing the cost of work now with that of ten years back, that during the past decade there has been an increase in wages of 10 per cent. to all employes of fairly long service, and a 20 per cent. reduction in the hours of labour. Despite this, our dredging compares favourably with the cost of kindred work in the neighbouring colonies, and, relatively, in the cheap labour ports of Britain and America.

I have, &c.;

A. B. PORTUS.

Richmond River.
"Alcides," working eight hours daily, lifted 190,140 tons, at a cost of 2·9818d. per ton.

Grab Dredges, 1890.

"Alpha" lifted 45,720 tons, at 9·165d. per ton, working at Clarence River.
"Beta," working at Cape Hawke, lifted 45,140 tons, at 5·771d. per ton.
"Gamma," working at Hastings River, lifted 22,035 tons, at 8·570d. per ton.
"Delta," working at Newcastle, lifted 34,977 tons, at 5·316d. per ton.
"Epsilon," working at Tweed River, lifted 22,191 tons, at 14·385d. per ton.
"Zeta," working at Richmond River, lifted 58,350 tons, at 3·017d. per ton.
"Eta," working at Camden Haven, lifted 42,150 tons, at 5·890d. per ton.
"Theta," working at Sydney and Clarence River, lifted 23,175 tons, at 12·719d. per ton.
"Iota," working at Nambucca River, lifted 56,191 tons, at 8·181d. per ton.
"Sigma," working at Sydney, lifted 20,810 tons, at 8·196d. per ton.

Analysis of Dredge Expenditure and Work for the Year ending 31st December, 1889.

The cost here given does not include inquiry into the Kiama accident, tug "Ajax," £164 14s. Alterations to hopper barge "Neptune," £1,978 8s. 9d. Alterations to hopper barge "Juno," £183 0s 5d. New boiler, "Dione," £383 17s. 10d. "Me-Mel" collision, £5, "Dione" tug. Engines and boilers, special vote, "Little Nell," £1,934 6s 8d

- "Ajax"—Engaged special service 5 months during year; working single shift
- "Thetis"—Engaged special service 3 months during year; working single shift.
- "Neptune"—Engaged special service 2 weeks, working single shift up to 1st September, double shift to end of year.
- "Juno"—Working double shift up to 8th June, being converted into sand pump, June to December.
- "Orestes"—Working double shift, under repairs 2 months
- "Ceres"—Engaged special service 6 weeks, under repairs 2 months, working single shift to 10th August, double shift August to December.
- "Dione"—Engaged special service 2 weeks, under repairs 6 weeks, single shift to 8th June, double shift June to December.
- "Cyclops"—Under repairs 1 month, single shift
- "Rhea"—Engaged special service 5 months, single shift to 27th July, double shift from July to December
- "Achilles"—Under repairs 1 month, trip to Lismore with Messrs Hickson and Ewing; working single shift
- "Little Nell"—Under repairs up to 18th August, worked single shift from August to December.
- "Charybdis"—Under repairs 1 month, working single shift
- "Hector"—Under repairs 3 months; working single shift.
- "Ganymede"—Engaged special service 3 months, under repairs 1 month; double shift 27th July, single shift July to December.
- "Athena"—Under repairs 2 weeks; working double shift.
- "Pearl"—Under repairs 1 month, working single shift.
- "Scylla"—Under repairs 3 months, working single shift
- "Callisto"—Started work 3rd August; under repairs 2 months, working double shift.

Statement of Dredge Expenditure and Work for the Year ending 1890.

Dredges.	Where dredging.	Material dredged.	Tons dredged.	Hours dredging.	Expenditure	Cost per ton	Cost per hour.	Remarks.
"Newcastle"	Newcastle	Sand and mud	653,800	3,036	£ s. d. 7,639 8 8	d. 2 7957	£ s. d. 2 10 3½	Working double shift to March, three shifts from March to December. Sea too heavy for towing 12 days. Under repairs 3 months and 2 weeks.

Grab Dredges.—Quantity of Silt lifted, and Cost of Work for the Year 1889.

Grab dredges.	Tons lifted.	Total cost.	Cost per ton.	Remarks.
"Alpha"	27,065	£ s. d. 1,401 17 5	12·4311	Dredging hard material, principally at Martin's Reach, Clarence River, and Grafton Punt Approach. Amount for repairs, dredge, tugs, and punts, £418 10s. 7d.
"Beta"	30,380	1,307 12 1	10·3299	Dredging sand at Cape Hawke, Wallamba River Crossing; dredging soft rock at Mead's Crossing, hard sand at Manns' Crossing.
"Gamma"	43,501	982 6 7	5·4194	Dredging at Port Macquarie, Telegraph Point, and Wilson River.
"Delta"	18,040	936 15 0	12·4623	Dredging rock at Newcastle, end of Dyke, Larg's Ferry. Amount for repairs, dredge, and punts, £232 15s. 2d.
"Epsilon"	35,505	1,246 7 1	8·4248	Dredging hard sand at Tweed River, Blind Channel, Main River. Under repairs two months.
"Zeta"	31,225	714 17 1	5·4944	Dredging gravel and clay at Richmond River, Wilson's Creek; sand, Emigrant Creek; sand and snags, Willow Bend, Somerville Point, Taylor's Reach, Clancy's Spit, North Creek, Ballina South Arm.
"Eta"	60,900	1,070 18 7	4·2204	Dredging sand and mud at Camden Haven, Watson-Taylor Lake, cutting through lake and Upper Camden Haven.
"Theta"	13,574	909 17 5	16·0872	Dredging rock at New Dock, Circular Quay, and Dawes' Point; and sand and mud at Glebe Island Bridge and Woolloomooloo Bay.
"Iota"	72,000	1,440 7 8	4·8012	Dredging quartz and clay at Nambucca River, Broadwater Flat, Taylor's Arm, Sutton Flat, Wattle Flat, Malony's Flat, Jarret's Flat, The Shuck, Allan's Flat, Mooney's Crossing. Working double shift.

Grab Dredges.—Quantity of Silt lifted, and Cost of Work for the Year 1890.

Grab dredges.	Tons lifted.	Total cost.	Cost per ton.	Remarks.
"Alpha"	45,720	£ s. d. 1,745 19 9	9·165	Dredging mud and sand principally at Eatonsville, Clarence River. Floods in river, 2 months; under repairs, 1 month.
"Beta"	45,140	1,085 11 9	5·771	Dredging mud and sand principally at Godwin's Island, Cape Hawke. Under repairs, 2 months.
"Gamma"	22,035	786 17 2	8·570	Dredging at Andrew's Falls, Hastings River, and at Port Macquarie—rock, gravel, and shingle; under repairs, 2 months.
"Delta"	34,977	774 16 1	5·316	Dredging different places, Hunter River, and at Newcastle Harbour—stone, rock, shells and mud, and timber.
"Epsilon"	22,191	1,330 1 7	14·385	Dredging at Tweed River Heads Island channel and Green Bank—stone and sand; under repairs, 2 months.
"Zeta"	58,350	733 13 7	3·017	Dredging North and South arm, Richmond River, Ballina—sand and snags; under repairs, 4 months; river flooded, 6 weeks.
"Eta"	42,150	1,034 11 0	5·890	Dredging sand Watson-Taylor Lake, Camden Haven—heavy fresh in river 3 weeks; under repairs, 6 weeks.
"Theta"	23,175	1,228 4 11	12·719	Dredging at Cockatoo Island, New Dock, Circular Quay, White Bay, North Arm Clarence River—rock, stone and sand; under repairs 7 weeks; removing to Clarence River and awaiting orders, 3 weeks.
"Iota"	56,191	1,915 10 6	8·181	Dredging at Nambucca River—Quartz, clay, and roots; floods in river, 3 weeks; under repairs, 6 weeks.
"Sigma"	20,810	710 13 11	8·196	Dredging at Fitzroy Dock, Darling Harbour, Circular Quay—clay, stone, rock, and sand; under repairs, 1 week.

Statement giving a List of the Dredging Plant now under Construction, with the Names of the Contractors, amounts of the Contracts, and specified time of Completion.

Particulars of plant now under construction.	Names of contractors.	Amount of contract.	Specified date of completion.
Wooden hull for Priestman's crane	A. Davis	£ s. d. 555 5 5	22 August, 1891
Wooden hull for steamer for general purposes, Sydney Harbour.	P. Callen	1,915 15 0	5 October, 1891
One iron hopper barge, 330 tons	Being built at Fitzroy Dock
Two sand-pump dredges	"

List of Ladder Dredges and Tugs at present attached, and Punts now in commission, with estimated value.

Dredges.	Tugs.	Punts.	Where dredging.	Estimated present value.	Name of Master.	Dredge began to work.
				£		
"Newcastle"	"Orestes"	3 400-ton	Under alterations	43,000	James Rorison	1875
"Samson"	"Ajax"	4 350-ton	Sydney Harbour	37,000	John Laing	1868
"Hunter"	"Ceres"	4 iron and 1 wooden	Newcastle Harbour	28,000	John Carruthers	1859

* Left Service, 6 August, 1878; rejoined, 29 January, 1881. † Left Service, 1 June, 1881; rejoined, 25 February, 1882.

Department of Public Works, Harbours and Rivers Branch, Sydney, 7 July, 1890.

THE classification sheet of Dredge Service employees to 31st December, 1889, having been shown to all the employees, and the appeals having been received and considered, the sheet has now been compiled and printed in accordance with the decisions arrived at in connection with such appeals.

C. W. DARLEY,
Engineer-in-Chief for Harbours and Rivers.

List of appeals received:—

Adams Charles	Ewing Henry	M'Donald John
Aldows Isaiah	Ford Michael	M'Dougall Alexander
Alexander William	Gallachor Daniel	M'Gill Dennis
Atkin Joseph	Gavey Charles	M'Grath Thomas
Atkin Thomas	Gibson Stephen	O'Niell James
Atkin Thomas	Haden Henry	Richardson William
Bracey Robert	Hare Samuel	Robertson Andrew John
Brown Thomas	Harrison Edward	Robilliard Albert
Burnet Lewis	Hutchings Edwin	Rodgers Patrick
Chambers James	Johnson Robert	Routh James
Collins Jeremiah	Kirkwood Robert	Rutherford William
Daley Daniel	Lawrence John	Salvatori Benedetto
Dymock James	Ludeke Francis	Taylor Alfred
Easton George	Morrison John	Thain James
Elder Thomas	Moy John	Thearle Arthur
Evans David	Minchin Joseph	Wynn Michael
Ewen John	Myers Joseph

General Regulations for the Management of the Dredge Service.*

Regulation 1.—The Dredge Service, which will be considered as a whole, shall be divided into the following grades, viz. :—

- 1st. The Engineer's grade, comprising—
- | | |
|---|---------------------------------|
| A. Engineer's, 1st, 2nd, 3rd class (excluding the Chief Engineer's of the Dredge) with wages ranging from... .. | £20 per month to £12 per month. |
| B. Engine-drivers | 13 " 10 " |
| C. Firemen | 12 " 9 " |
- 2nd. Mechanical grade, comprising—
- | |
|--|
| A. Blacksmiths, carpenters, fitters and boilermakers, &c., with wages from £15 per month to £11 per month. |
| B. Strikers, boilermakers' assistants, machine attendants, &c., with wages varying from £10 per month to £6 5s. per month. |
- 3rd. Nautical grade, comprising—
- | | |
|---|---------------------------------------|
| A. Masters of Tugs, from | £20 per month to £12 per month. |
| B. Mates from | 14 " 10 " |
| C. Coxswains and winchmen | 10 " " |
| D. A.B. seamen, including watchmen and cooks | 8 13s. 4d. per month to £8 per month. |
| E. Boys | 4 per month to £6 5s. per month. |

Regulation 2.—The whole of the men at present in the Service shall be classified according to the foregoing grades; the position to be assigned to each particular employee shall be determined by fitness and length of service. As vacancies occur, the senior hands shall be promoted until they reach the top of their respective grades, provided they are competent, and nothing has been recorded against them in the "Conduct Book," referred to in Regulation 3. In the case of Engineers, however, it shall be indispensable that those to be appointed to the 1st class shall hold 1st class certificates; those to the 2nd class, 2nd class certificates; and to the 3rd class, 3rd class certificates. With regard to the nautical grade, all masters shall hold masters' sea-going certificates, and mates shall hold mates' certificates.† On and after the 1st February, 1889, the qualifications of employees to be appointed to positions for which the salaries do not exceed £156 per annum, whether mates of dredges, masters of small tugs, or engineers of small tugs, shall be in the cases of mates or masters, the holding of a master's Harbours and Rivers Certificate from the Marine Board, and for engineers, the holding of a 3rd class engineer's certificate.

The qualification for all positions above £156 per annum to remain as before.

Regulation 3.—There shall be entered in a "Conduct Book" the name of every employee in the Dredge Service, giving the date of his entry therein, age, and such particulars of his service (whether of good or bad conduct) as will determine promotion or otherwise; it being distinctly understood that nothing will be recorded against any employee in such book, except after due inquiry and on the report of the Superintending Engineer, approved by the Engineer-in-Chief, and after an opportunity shall have been afforded the accused of appeal.

Regulation 4.—All new appointees shall enter at the bottom of whichever grade they may be nominated to, except in the case of vacancies which cannot be filled from the Service; but none shall be eligible who are over thirty-five years of age, and who cannot produce a certificate from the Medical Officer of the Department (for which such officer shall be entitled to be paid a fee of 2s. 6d., to be paid by the nominee) that they are physically fit for the position sought, together with satisfactory references from previous employers.

Regulation 5.‡—From the 1st May to the 1st September the working hours shall be from 6.30 a.m. to 5.30 p.m., and during the remaining months of the year from 6 a.m. to 6 p.m. Three-quarters of an hour will be allowed for breakfast, and 1 hour for dinner. Owing to the shortened breakfast hour, work will terminate on Saturdays at 1 p.m. When circumstances render it necessary for the tugs to work continuously from 6 to 6 the meal hours must be taken while the steamers are towing.

Regulation 6.—Should any employee, by reason of accident occurring in the discharge of his duty, and by no fault of his own, be physically incapacitated for work, he shall be entitled (if his absence shall necessarily extend to that time) to two months' pay, or any lesser proportion, as the case may demand. If he is absent more than two months, such case thereafter will be specially dealt with on its merits. In the event of absence through sickness, not being the result of accident as before described, half-pay to the extent of one month will be allowed, if necessary, provided such sickness has not been brought about by misconduct on the part of such employee, to determine which a certificate to that effect shall be required from the Government Medical Officer, if the employee reside in Sydney or Newcastle. If he reside elsewhere, he must furnish from a properly qualified medical practitioner a certificate stating the nature of the disease from which he is suffering, which will be referred to the Government Medical Officer for report. For every examination or report such Officer shall be entitled to a fee of 2s. 6d., which shall be paid from any money due or to become due to the patient, except in case of accidents occurring in the discharge of duty, when the fee shall be paid by the Department. A medical report will be required at least once each week, if absence from duty should extend beyond that time; for a period less than three days the certificate of the Dredge Master, indorsed by the Superintending Engineer, shall be held to be sufficient.

Regulation 7.—Nothing in the foregoing Regulations shall prevent the Minister from dealing in the way of promotion or otherwise with any specially meritorious case which may be brought before him.

Regulation 8.—Any person who has been in the Dredge Service, but whose services have been dispensed with owing to a reduction in the number of hands, shall be eligible for reappointment to any suitable vacancy, anything in these rules to the contrary notwithstanding.

Regulation 9.—In the event of any misbehaviour being proved against any employee, but not of such a serious nature as to demand dismissal from the Service, the Engineer-in-Chief shall have the power to punish, by fine or disratment, as the circumstances of the case seem to him to warrant.

14th January, 1889.

C. W. DARLEY,
Engineer-in-Chief for Harbours and Rivers.

* Nothing in these Regulations shall be held to apply to the Masters of Dredges, respecting whom a wider choice of selection may be necessary.

† In the case of those already in the Service who do not hold such certificates, it shall be considered that they have "Service" certificates; but they will not be eligible for promotion unless they can obtain and produce certificates of "competency."

‡ Since the original Regulations were passed, the summer working hours have, by direction of Mr. Secretary Lackey, been reduced from ten to nine hours per day; and a temporary increase of 10 per cent. on wages, after having been on two occasions voted by Parliament, was submitted during the last Session and passed as a permanent rate. On 10th October, 1885, Mr. Secretary Wright directed that the working hours be forty-eight per week.

CLASSIFICATION of Dredge Service—Permanent Employees—to 31 December, 1889. (Marine Board Certificates noted to 9th July, 1890.)

1891-2.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

**THE TRADE AND RESOURCES OF THE DISTRICTS
SERVED BY THE MORUYA RIVER.**

(REPORT BY STANLEY ALEXANDER, EXAMINER OF PUBLIC WORKS PROPOSALS.)

Ordered by the Legislative Assembly to be printed, 2 February, 1892.

Sydney, December 1, 1891.

THIS investigation into the trade and resources of the districts served by the Port of Moruya was, in the first instance, brought about by an application (3605, April 24, 1890) dated April 20, 1891, by the Broulee Harbour Jetty League "to erect a jetty at Broulee, and to re-establish the communication between the island and the main land," because, as stated in a resolution formed at "a large and representative public meeting" on April 18, 1891, "this part of the South Coast is practically unable to trade fairly outside the boundaries from the absence of proper shipping facilities."

2. On that date, viz., on April 20, 1891, the port, though nominally in the Moruya River, was practically at Bateman's Bay, as the Illawarra Company's steamer "Kiama" could not find depth of water sufficient to enable her to enter the Moruya River. She was, therefore, being waited upon by a small tender, the "Idea," which brought the greater part of the goods round from the Moruya River to Bateman's Bay, but some portion was at the same time being carted direct to Bateman's Bay, a distance of 18 miles further than would have been necessary had the entrance to the Moruya River been navigable.

3. The works which had been designed to produce a permanent deep entrance and a channel in the Moruya River were at the same time in progress, but as they were incomplete the entrance was subject to a fluctuation in depth dependent upon the quantity of water being brought down by the river.

4. This condition of affairs was no novelty. It had practically been in force from time to time during the memory of the oldest inhabitants, at least since the works of improvement had been commenced. Prior to that, the oldest inhabitant has been heard to say that the entrance to the river always carried a good depth of water, and that vessels could make sure of getting up to within a mile of the town, to Mynora, or even up to the town itself. As, however, this state of affairs has passed away with the good old times in which it was supposed to have existed, I have not thought it necessary to verify or disprove the reports concerning it. The variations in the course of traffic, dependent entirely on the condition of the river, fluctuated between the necessity of carting goods to Bateman's Bay in the absence of the tender, and of punting them to the heads when the entrance was good, or, in more favourable times, to the company's wharf, which is about a mile or so inside the river from the heads.

5. It will be observed that as the works in the Moruya River were in progress at the time, the resolution asking for other works to open Broulee as a port, must be taken to have been formed on the assumption that the works in the Moruya would not prove effectual. It so happened that the reply to this petition was made by the Under Secretary on a date when it could hardly have been known that the floods had so seriously damaged the dyke works as to render their resumption on the same design improbable. This afforded an opportunity to the Broulee Harbour Jetty League to deliver, what was perhaps thought to be, a crushing rejoinder, accompanied by a petition to which a large number of signatures was attached. The detailed statements in both of these communications will be noticed further on in this report.

6. About the same time, however, a communication was received by the Department from persons in the district holding views in opposition to those of the Broulee League, and in consequence this inquiry was extended to embrace the trade and resources of the whole district.

7. The facilities offered by Broulee in the old days were confined to those which nature had provided. The island was then connected with the main land by a bank of sand which had seemingly been in position for a very long time. The width of dry land between marks of high water on each side is said to have been fully 300 yards, and this area carried a stunted growth of timber. Moreover, the land-locked

water space enclosed between the island and the mainland was free of sand and of some depth, further indicating that no supply of sand had ever passed between the island and the mainland since the general features of this part of the coast had become settled into their existing positions. There were no loading facilities for shipping of any kind. There was a small settlement both on the island and on the mainland. Some police were stationed here and an official who has been styled the harbour-master. On the island were at least two dwelling-houses, one being a public house and the other probably a signal station, the residence of the harbour-master. These are not now in existence. The settlement on the mainland comprised the police station and residences, the remains of which are standing, but are being rapidly enveloped by the sand which is constantly being drifted northwards through the now open channel.

8. Over a long line of coast between Ulladulla and Bermagui this was the only centre of settlement and the only point by which the natural facilities allowed ready access to the sea to the industries then existing which were in need of such a communication. The farming district was then in the neighbourhood of the Moruya and south of it. The township of Moruya had then no existence at all in any form, even as a nucleus. Cultivation of any sort of crop for export had not been commenced. Shipments were confined absolutely to stock, but imports of course comprised all articles not produced in the district.

9. Among vessels of various sizes that came to Broulee frequently has been named the steamer "Shamrock," of from 250 to 300 tons, which traded between Sydney and Melbourne. The use of this place as a port endured for passenger and cattle traffic for a long time after general traffic had been instituted with the Moruya River. This river came into general use about the year 1847, and was frequented by sailing vessels and an occasional small steamer, and then the growing trade in produce, confined almost entirely to potatoes, brought about the establishment of the township of Moruya on the banks of that river. The traffic, however, still remained until about 1856 sufficient to attract steamers to Broulee. About that time a road was opened to the high land from Nelligen to Braidwood, thus bringing Bateman's Bay and the Clyde River into use as a port, and thereafter, there being no further use for Broulee, it became gradually abandoned.

10. It appears, therefore, that notwithstanding that the trade from the district generally had increased considerably—that large steamers were actually calling at Broulee between 1847 and 1856—that all the natural facilities, including the connection with the mainland, were available as before, this connection having been first cut through in 1873—yet from about 1847 trade gradually deserted Broulee and adopted the Moruya River, and finally, about 1856, traffic from Broulee ceased altogether. Since then the roads of communication that have been opened with other districts have attracted settlement along their courses and the various traffic routes have become evolved, but neither the character of the adjacent country for settlement nor the special advantages possessed by Broulee as a shipping port have been sufficient to call for expenditure in making communications to it, and its final doom descended upon it in 1873, when the connection between the island and the mainland was washed away and sand entered by this channel, filling up the greater part of the anchorage.

11. This is the simple history of Broulee as I have been enabled to elicit it. It has necessarily been written as the facts bear upon the question of its general utility as a port, but the subject of this report being the trade and the resources of the whole of the adjacent country these must now be dealt with inclusively.

12. The following are the main roads of communication in these districts:—The main South-coast road passing from Milton, through Bateman's Bay township, is joined on the east side of the Clyde River, opposite the township, by the road from Braidwood, *via* Nelligen; south of Bateman's Bay the main road passes through Mogo to Moruya, where it is joined by another road from Braidwood which passes down through Araluen and the valley of the Moruya River; southwards again this main road bifurcates at Bodalla. The mail route takes a course nearest to the coast past the head of the Wagonga River passing through Tilba Tilba on the east side of Mount Dromedary to Cobargo. The westerly course from Bodalla passes through Eurobodalla and to the west of Mount Dromedary and joins the mail route at Dignam's Creek, 7 miles south of Tilba Tilba. There are numerous minor branch roads, the principal of which are the following:—A road from Buckenbowra, which joins the main road about half-a-mile south of Mogo. This is the only road connection between the settlements of Buckenbowra Creek and Moruya or Bateman's Bay. The alternative route from the Buckenbowra is by the water of the Buckenbowra Creek to the Clyde River along tidal water for some miles. From Mogo a good road traverses the left bank of the waterway to the entrance of the Tomago River in Broulee Bay. From Moruya there is a good road to the Moruya River Heads, with branches to various settlements. Traffic from the Gulph Creek at Nerrigundah is served by a road to Eurobodalla, and, crossing the main road at that place, a road connects with the coast road near the Wagonga River. From Bodalla there is a very bad road to the Wagonga, at a point opposite Noorooma where a wharf and store have been built by the Bodalla Co. for shipping purposes. The connection with Broulee from the main road has never been formed. In the days when traffic passed to Broulee there were no fences in the country. There are, however, no special difficulties in the existing rights of way to enhance the cost of road-making.

13. The distances between the principal points in these districts may conveniently be given in this place:—

	Miles.		Miles.
Moruya to Mogo	11½	Bodalla to Moruya ...	14
" Bateman's Bay	18½	" Wagonga ...	12
" <i>via</i> Mogo to Buckenbowra...	18	" Punkalla (wharf)	12½

" Buckenbowra	15	" Moruya ...	18½
Bateman's Bay to Nelligen	6	" Nelligen to Braidwood ...	30

14. The existence of the shipping port at Bateman's Bay, in close proximity to Moruya and Broulee, entails some notice of its capabilities. Much of its importance is due to the deep water of the Clyde River enabling steamers to pass up to Nelligen within 32 miles of Braidwood, and delivering there the greater part of the stores for the extensive districts above the ranges at a lower cost for carriage than can be done by the railway through Goulburn. The traffic from this port has for a long time included, and will certainly continue in the future to include, very large quantities of timber, which is, however, all carried by sailing ships. Though its position commands a considerable area of country below the coast range, its traffic is chiefly drawn from the high lands above. Settlement on the eastern slope and on the lands between the Clyde River and the ocean is very sparse. The areas of cultivable or useful land are limited to the alluvial flats in the beds of the water-courses, and have been restricted by the large extent reserved for forest conservancy.

15. The estimated tonnage delivered at Nelligen annually by steamer for the Braidwood district alone being 3,000 tons, it may reasonably be inferred that in point of certainty and regularity the steamer traffic to Bateman's Bay may be relied on. As this has been going on for a long series of years without interruption, the natural features of the river and harbour having been unassisted by works or expenditure of any kind, the suitability of the vessels engaged, both to the trade and to the conditions in force in the bay and the river, may be taken as established, and the reliability of these most important essentials to the prosperity and development of trade, viz., certainty and regularity in the communications, may be accepted as having been proved. Holding this view, I am entirely unable to believe that any diversion of existing traffic from Bateman's Bay is likely to be brought about or is desirable, and am therefore obliged to exclude the whole area from which goods are at present being despatched from Bateman's Bay from consideration as in any way being affected by anything that may be done in the way of harbour improvement, either at Broulee or on the Moruya River. This area I take to be all north of the Tomago and Mogo Creeks, including the districts on the Buckenbowra and Mullendaree Creeks. Thus the northern limits of the area to be dealt with in this report are defined.

16. The valley of the Moruya River is traversed by a good road leading from Araluen directly to Moruya. At Araluen the districts comprised by the parish of Bettowyn, and along the Modong and Deua Rivers are connected with the main road. As has before been pointed out in my report on the proposed railway from Tarago to Braidwood, expansion of any kind in the Araluen valley has been suppressed by the gold-field reservations and extensive common lands, which prohibit settlement of any kind, and retain the land in a state of nature, that is, in a condition of little use for any purpose but to allow of its being grazed by a small number of residents. The stock traffic, which is considerable from these parts, all travels on the railway lines to Sydney or Melbourne, but supplies of all sorts and produce, or such as may be available for export, are sent away by the sea. Production is not, however, up to the requirements of local consumption, and is limited to the stuffs most easily produced or requiring the least technical knowledge, as the population consists of miners and graziers. The situation of this part of the valley in its proximity to the seaboard and the railway, its elevation and climatic conditions, render it eminently suitable for carrying a large population of producers of all kinds of food stuffs, but under existing conditions, and so long as these are maintained, the traffic from this valley will be infinitesimal except in stock. This is capable of considerable expansion if passage by sea were available.

17. The attached map shows that the outlet from those districts on the Araluen and Deua Rivers places them as convenient to Broulee for shipping purposes as to Moruya in point of distance. For the shipping place on the Moruya River is within a mile or so of the Heads, on the south bank, and about 4 miles beyond the town.

18. The southern boundary of the districts to be considered must be taken to be the Wagonga River. The shipping facilities from this port have been described in another report, in which recommendations have been made in support of construction of jetties at two places on that river. That at Punkalla on the main road is within 8 miles of Eurobodalla and 26½ miles from Moruya. It has been shown that the entrance to the Wagonga from the sea is reliable for steamers of small draft, but that the channel thence up the river is not always capable of admitting anything larger than a punt. In the uncertainty obtaining as to the condition of the Moruya River and in view of the facilities in force at the Wagonga for shipping produce, it has been thought that a small expenditure at Punkalla to allow of loading there is justifiable, but the place cannot be looked upon as a permanent outlet for traffic in the sense of being a port. At the best, it will be used for relief of actual necessities only. It follows, therefore, that though this point on the Wagonga is considerably nearer to the districts on the Tuross than the Moruya river, yet all the lands about that river may reasonably be included within the area still requiring to be provided with a port.

19. The letter of the Broulee Jetty Harbour League claims an area of 1,024 square miles, as being the total extent of country to be served, and their figures give an acreage of about 4,000 as used for agricultural purposes, carrying 3,600 horses and 35,000 cattle, and a population of 4,700 persons. These figures have been supplemented from other sources, and are exclusive of the lands taken to be dependent on Bateman's Bay, as settled in paragraph 15 of this report. These show a very sparse settlement. As vast expectations of expansion may be indulged in, the district affords a very good illustration of the capabilities of the country generally from the results of many years of labor and much expenditure of capital on the estate of the Bodalla Company, Limited. The details of this are given in Mr. T. N. Grierson's evidence (page 7). No useful end can be served by taking the averages from these figures and applying them to the whole area to arrive at a possible total return from the whole district, for the process by which the existing state of things has been arrived at in the case of Bodalla will not be applied to the rest of the area, though the course of a very long time may be relied on to produce a similar condition of advancement. As the 22,000 acres of the estate comprise country of all kinds, from the best to the worst, a study of the results obtained from it is useful in giving an idea of the development of which these districts are capable, in comparison with what has actually been done.

20. The total outturn from Bodalla is given at about 450 tons per annum from the total area of 22,000 acres (under 35 square miles), of which 13,000 acres only have been improved. This is the average tonnage despatched. The steamer "Kiama," which has carried all the goods from these districts, is 120 tons register and a possible 200 tons gross tonnage. By a calculation from data that have been supplied to me I estimate that the total outturn of one year's work, as carried by the "Kiama," amounts to less than 1,600 tons, that is to say that the Bodalla estate, from a small portion of the total area, has furnished more than a quarter of the loading.

21. I submit that an example of this kind is very much more useful than any amount of word-painting in illustrating the possibility of development in the district. The area taken is on the average not much, if any, better than the rest of it, but even if very much better, the value of the comparison is but little affected. The tonnage takes note of such exports as are weighable only, but takes no count of the traffic that would be assured in stock of all kinds were it possible to send such away, nor of the stores of timber which have been trenced on only on the very margins as it were. These sources of trade can be indicated only. The existence of the timber throughout extensive ranges where it has been untouched, and the capacity of the soil when cleared of scrub to produce and carry permanently all the foreign grasses, are the bare facts which only can be cited in a report of this kind.

22. In respect to the single item of the grasses carried, I have obtained an opinion (Appendix A, page 15) from Mr. T. N. Grierson, the manager of the Bodalla Estate. The climate of this district is best shown by the fact that though the cultivated grasses do not hold in Illawarra, they are not only permanent pasture about Moruya, but are spreading naturally and supplanting many of the native grasses. As the staple products of these coast districts will always be from dairying and grazing, the value of this qualification cannot be over-estimated.

23. One of the great difficulties experienced in getting produce away has been the uncertainty attending the whole business. Any one route or means of transport, as a tried and reliable course, would gradually be got into working order, and be made the best of, but the shifts and expedients that have been resorted to, making up the history of the traffic from these districts, show a sum total of trouble such as is calculated to produce a demoralising effect on the community. Having all this in view, I have no difficulty in appreciating the significance of the figures comparing the outturn from Bodalla with that of the whole district.

24. I would now revert to the letter by the Broulee Harbour Jetty League (6,873, July 31, 1891), and the petition (H. R. 6,895, July 31, 1891).

25. Apart from the reasons entertained by the League for dissatisfaction with the existing condition of the Moruya River, and their doubts as to its ever being made into a practicable port, the following sentence in their letter of July 25, 1891, indicates the attractions possessed by Broulee, and the general nature of the works for rendering it available:—"At this place, years ago, goods were shipped in large quantities, and the petition is asking for a restoration of the facilities which then did exist, together with further conveniences which the growth of the district entitle it to." Immediately preceding this sentence the radical cause for dissatisfaction with the Moruya River is given in these words:—"But granting that the river was navigable * * * still the trade would be confined to the small coasting steamers, whose excessive freights, bad accommodation, and irregularities have assisted to reduce this district to its present state of depression." "With a jetty at Broulee, at the place indicated, in the smooth water under the lee of the island, large steamers could take in cargo for either Melbourne or Sydney."

26. The original petition, dated April 20, 1891, was drawn up months before the occurrence of the floods in the Moruya River that damaged the works. This mishap has, in the petition and letter of July, been taken advantage of to strengthen the arguments in favour of Broulee being substituted for Moruya. I am not concerned in this substitution, but the character of the conveniences required by the district are necessarily included in this inquiry, and it is also my duty to correct some erroneous points in the petition and letter referred to.

27. Paragraphs 2 and 4 in the petition imply that the works carried out in the Moruya River are responsible for the disappearance of the shipping facilities. This is absolutely incorrect. The facilities afforded by the Moruya River were in the main such as could be availed of only by the small sailing vessels that used the river, and, in fact, have continued to use it up to a very recent date. The occasional entrance of a small steamer or an unusual depth of water was due to some heavy floods having occurred which, for a short time only, produced a clear channel and a deeper entrance. Fluctuations in the bed are shown by the fact that one point on the river, but a short distance below the town, was fordable occasionally, and even for some length of time at a stretch, and was so used before the road bridge was erected.

28. In paragraph 7 of the petition occur the following words:—"The disappearance of the shipping facilities we were once accustomed to has had a most depressing effect on the district." The facilities obtainable in the Moruya River are, and have been all along, identical with, if no better than, those that were in force since the foundation of the town and the spread of population, and the facilities afforded by nature at Broulee were abandoned in favor of those of the Moruya for 17 years prior to the connection of the island with the mainland having been cut away. Before this happened the use of Broulee was confined almost entirely to stock, for the reason that nothing else was produced in the district, and the immediate result of a regular trade in produce springing up was the abandonment of Broulee.

29. Paragraph 8 of the petition refers to large areas of land having been thrown "out of profitable employment." The cause of this is to be found here, as in the Braidwood district, in the decline of the alluvial mining industry, and the consequent dispersment of the population. In both districts the supplies for the crowds of miners engaged on Araluen induced a settlement and cultivation for which there is now no market, and in the Moruya district the Gulph Creek diggings, attended by the influx of prospecting parties all over the country, had the same effect with the same result to the farming industry.

30. As to another point urged:—The immense advantage that would result from the institution of a permanent connection with large sea-going vessels to this or any district may readily be conceded, but that the small coasting steamers which have been mainly instrumental in developing the whole coast south of Sydney are inadequate to the necessities of Moruya is an argument not worth refuting.

31. Numbers of stock are shipped regularly at Eden to other colonial ports, a portion being drawn from this district, and the markets of Sydney and Melbourne are supplied to some extent with stock from here also by way of the inland communications. Considerable extension of this trade would

would undoubtedly result, as it would be recruited from the Araluen valley and the Deua River, and from the extensive wilds on the western mountainous border of the country if a port were provided at which intercolonial steamers could call; but the prediction may confidently be hazarded that a search for such a port would result in attention being concentrated on Bateman's Bay. The advantages and the disadvantages of this place would certainly need to be thoroughly exposed before adoption of Broulee could be held to be justifiable. The distance from the centre of the district is not against it for stock, but its isolation among mountainous surroundings is insuperable, except at great expense, for all other traffic. The needs of the district do not call for such heroic remedies. Another generation may well be allowed to pass away before such a project should be entertained, but the immediate necessities upon which the daily bread of the population depends should undoubtedly be seriously studied.

32. I would point to the complete isolation of the district rendering it dependent practically upon the seaway for all purposes of communication. The routes by road through Braidwood and Goulburn and along the coast to Nowra are available for passengers, but there are long and costly substitutes for the sea passage which should be accessible for such traffic. The advances made by the district to its present condition may be credited to its possession of alternative routes *via* Bateman's Bay and Tuross and Wagonga, which have all been used under the pressure of necessity. As a means to lighten the burden upon the district the two latter should be assisted by expenditure of small amounts on works to enable shipping to be carried out as vessels may be available, but not only the development but the maintenance of the present condition of the district depends upon a reliable outlet being provided for it such as these uncertain rivers do not afford. The amount of business done at Bermagui, where four steamers call weekly, since the opening of that port within the last two years and the great strides made by the district depending on it, as shown about Cobargo, and the actual outturn from the Bodalla Estate, as compared with the rest of the district, are all evidence that the country will respond by expansion of every kind to judicious expenditure in its trade outlets.

STANLEY ALEXANDER, M. Inst., C.E.

The Under Secretary for Public Works.

(1.)

Moruya, September 21, 1891.

Mr. Robert Carnie, representing at the present time a company partly floated, but not yet registered, to be named the South Coast Co-operative Steamship Company, proposing to run a line of steamers to the ports on the South Coast; he considers that the districts that would make use of a harbour in the neighbourhood of Moruya would ship away fully 120 tons per week and receive about 200 tons per week, and with greater facilities for export this tonnage would be considerably increased; has been master of vessels on this coast for a number of years; the steamer he was in command of was the "Emma Pyers," 54 tons register, in 1890, owned by Mr. B. B. Nicoll, chartered by Messrs. Mylott and C. E. Cass, M.P.; the information he can give has been gathered during his inquiries in the interests of the new company now being formed; he knows what was carried away and delivered at the port of Moruya by his steamer and that of the I.S.N. Company then working, and on this he bases the estimate of the traffic above given; the "Kiama" carries about 200 tons, draws about 7 feet of water headed; the steamer the new company propose to put on to the trade would be about 300 tons, and draws 10 feet of water; the "Kiama" has during the last two trips come up to the I.S.N. Company's wharf, about a mile inside the heads; she has never come up farther than this, and now is only able to get up because of the deepening caused by the recent dredging; the proposed steamer could only get as far as the Government wharf occasionally, according to the state of the bar; this wharf is just inside the heads; therefore, in order to get advantage from use of this steamer, which could not cross the bar at all during any period of dry weather, either the deep water on the bar must be preserved, or else some better harbour accommodation must be provided; the depth of water on the bar at Bateman's Bay is now 8 feet, and may be taken at this depth on an average at high water; the depth of water outside the bar under shelter of Snapper Island

Island or of the point on the north side, is 11 feet at low water spring tide; this is exposed to easterly weather; Snapper Island affords some shelter from the east, but it is very small, and a heavy swell always rolls in around it; the proposed steamer could not get inside this bar either; no cargo is ever shipped outside the bar except Mr. Guy's timber, which is brought out from Cullondary Creek and shipped; has several times run into Broulee and lay at anchor there for shelter, which is afforded in all weathers except easterly; in its present condition Broulee can be worked in all weathers except easterly by any ordinary sized steamer; in all light easterly weather, amounting to light gales, Broulee would be regularly worked without any interruption, since the reef affords sufficient shelter; the traffic would be carried on independent of tides, there being no bar or other obstruction as at Moruya, which has always hitherto been impassable to all vessels except of very light draughts during dry weather, when the bar has always had shallow water in it; Broulee will again always be workable at any time when an entrance can be effected into Moruya, as the same weather affects both ports; on account of the larger size of vessels that can be run to Broulee, also because there would be no interruption from the state of the tide, the regularity and certainty with which the traffic could be carried on, would all result in its being done at greatly reduced freights to those now in force; the uncertainty of the traffic results in the freights being kept high; as soon as the freshes run out and dry weather sets in, the bar which now carries plenty of water for the "Kiama," will silt up as has always happened before, and then a small-sized vessel, a tender, has to be put on to communicate between Moruya and Bateman's Bay, and all passengers from and to this district going by sea have to go overland between Moruya and Bateman's Bay, and to be taken to and from the steamer in a small pulling boat; this boat has to be taken over the bar at considerable risk, having resulted once or twice in fatal accidents; cattle trade cannot be carried on under the present conditions from Moruya, because of the unsuitability of the only steamer that can use this port or that of Bateman's Bay, whereas from Broulee the size of steamer would be suitable to this traffic and the certainty and rapidity of transit to Sydney resulting from this superior size and the absence of all the difficulties incidental to working out of ports that are dependent upon the state of the tide, would tend to develop such a trade.

R. CARNIE.

(2.)

Eurobodalla, September 30, 1890.

Mr. Charles Brice, a land-owner in Eurobodalla and resident since 1855; advocates the Broulee project because it is the surest port and will give entrance to larger vessels than any of the other small entrances, and because there is no sand bar or shoal water to hinder vessels coming at any time; recollects Broulee when it was being used as a shipping port, and when large vessels called there; the river at Moruya has deteriorated very much since the days when it was first used after Broulee; the potato growing industry being very lucrative at that time it was necessary to land their produce in the river near the farms; Broulee potatoes grown in the district now called Moruya were celebrated in those days; the freight alone is now against the cultivation; before the "Trident" commenced the "Emma Pyers" ran a few trips with Captain Carnie, but received no encouragement; before this the s.s. "Union," belonging to Spiers, of Cowper's Wharf in Sydney, was running for some years; has known the Wagonga entrance for all the time he has been here, and believes that it has always remained as passable as now, with a varying depth of water down to 6 or 8 feet as a minimum; the crossing inside the bar occasionally silts up and becomes difficult, but this does not last long; remembers steamers coming up to Clow's Wharf as far back as 1862 and 1863, at the time that the Nerrigundah diggings were going ahead; before the "Union," the "Black Swan" was running; she was a paddle boat; all these were about the same size as the "Trident"; small steamers such as these cannot carry passengers or live stock; they can be carried, but no trade can be carried on in such with vessels of 100 tons, and there is no certainty that they will reach Sydney quickly as they cannot travel in anything like bad weather; Lynch's mill has been working on Wagonga for four years or more, and his timber has regularly been taken away by these small steamers or by sailing vessels; he has never known the bar at Wagonga to be closed to these small steamers; has heard of its being a little more shallow than usual at times; from the boundary of Bodalla estate along the Tuross as far as Mr. Byrnes place, "Cadgee," there are 22 selectors, aggregating nearly 10,000 acres; up the Gulph Creek there is a belt of gold-field reserve; no land has been alienated there excepting one block of 160 acres on Nerrigundah; there are nine selectors between the Bodalla property and Wagonga River, holding altogether about 2,000 acres; all the rest of the land here is timber reserve; at the head of Wagonga River there are 12 selections, aggregating between 2,000 and 3,000 acres; the distance from Eurobodalla to Moruya is 22 miles; to Clow's Wharf is 8 miles; cartage to Moruya costs 25s. per ton, and to Clow's wharf 15s.; the produce sent away from here consists of dairy produce, cheese, butter, bacon, also wattle bark; corn is all fed to pigs; they very seldom have to buy corn, but all oats are imported from Sydney; no wheat is grown here, and all flour is imported; the process of dispatching from these districts is this:—produce is sent to Moruya, leaving Eurobodalla on Wednesday morning, is put on the "Drogher" on Thursday morning and taken round to Bateman's Bay, where it is transhipped on to the steamer on Saturday morning, and arrives in Sydney on Tuesday morning if the weather permits; this practice has been going on for the past two years, until recently, when the floods opened the Moruya, and previously when the "Kiama" could get up to the company's wharf; there are no conveniences at Clow's wharf; there is no store or protection of any sort; no produce has been sent by the "Trident" from this district until the last month; she is now running more regularly, having been put on the trade regularly; all stock intended for Melbourne has now to be sent to Sydney to be transhipped into another vessel; the difference in time from Moruya to Sydney or Melbourne is only four or five hours by sea; stock must be taken to Bermagui or to Bateman's Bay to go to Sydney, or else it must be driven to Twofold Bay; there is a considerable trade in fat pigs from Bermagui and from Moruya for Melbourne, and there would be a great increase in this if a direct route could be used.

CHARLES BRICE.

I desire to express my concurrence in the above statement.

WALTER W. COMAN.

(3)

(3.)

Bodalla, October 9, 1891.

Mr. T. N. Grierson is manager of the Bodalla Company's estate; the area of this estate is 22,000 acres; the resident population is about 300; there are now 109 men in employ on the estate, exclusive of persons employed on piece-work and contract; would estimate that there are now all told about 150 in employ; there are 4,500 head of cattle of all ages; horses, about 150; sheep, 444; of pigs there are usually 2,500 on the estate; there are 1,100 cows in milk, producing about 220 tons of cheese yearly, in addition to butter of which about three tons are made for local consumption; the estate is divided into 8 farms, on which there are 5 cheese factories; there is one bacon factory at which 4,400 pigs have been killed to date since January 1st; during this year he hopes to kill 6,000 pigs and produce 220 tons of bacon and hams; all the crops grown on the estate are consumed by the stock and in addition, large quantities of corn are purchased; all is procured in the district except oats, barley, and bran, of which the importation from Sydney may be 20 tons annually; clearing is continually in progress and the area brought under grass and cultivation being increased; of the whole estate about 13,000 acres have been improved; the annual progress in clearing is from 150 to 200 acres; during some years the produce has been sent away from Moruya and Bateman's Bay, but since the floods in June, when the Tuross bridge was destroyed, he has sent it from the Wagonga, *via* Noorooma; to reach this port cartage had to be done along the road to a wharf and store on the Wagonga that had been put up by the Company and punted across the river to Noorooma, whence it has been taken away by the steamer "Trident;" this route is still being used together with another along the main-road to Clows' wharf; the distance from Bodalla to Wagonga wharf is 12 miles, and to Clows' wharf it is 12½ miles; the difficulty at Clows' wharf is that there is no store in which to put the produce and the communication from the main-road to the wharf is very bad; the wharf is also a temporary structure and quite unsuitable for the purpose, being a small jetty out into the water of the river; the Wagonga wharf, opposite Noorooma, would be most suitable for despatching from Bodalla if the road to it were put into passable condition as it is nearer the mouth of the river, giving but a short distance to punt; but this road has been but partially formed, and during the winter it has been in very bad order indeed; when the bridge on the Tuross is re-built a wharf at Tirlingah would be more suitable to Bodalla than any one on the Wagonga, as the distance is only 5 miles from the township and the roads are very good and level; this point can be reached in the present condition of the entrance to the Tuross by the steamer "Trident," which he is informed will be brought in or another of similar tonnage; no vessel has yet taken or brought goods for Bodalla by the Tuross River while he has been in charge; is now building a punt of 60 tons capacity to carry produce from the nearest point from Bodalla, which is where the main road crosses the Tuross, to the heads, in case the steamer does not find water enough on the river crossing to enable her to go up to Tirlingah; but at the same time the channel along the Tuross from the main road crossing to the heads is so crooked, and in places uncertain, that he believes it will be found to be more economical to cart the produce 4 miles further to Turlinjah, and to punt it thence to the heads, as the channel along that route is very good and not uncertain at all; he will now be obliged to punt from the road crossing the Tuross, because the bridge is broken and another cannot be built for some months; the greater part of his produce and supplies are carted by contract; the cost to the Wagonga is 15s. per ton, and to Turlinjah will cost 5s. per ton; cartage by the long route entails a loss of a night to the teams; the cartage to Moruya costs 15s. per ton, and to Bateman's Bay 20s. per ton; all fat cattle sold hitherto have been driven away by the buyers, being intended for the South Coast trade; stores are occasionally sold and driven away also; the only outlet now for large stock is by Eden; there is no other port where steamers such as Howard Smith's call; Eden is 90 miles from here; lately shipped horses to Melbourne from Eden, having driven them down there by road; if a port at which such large steamers could call were made at Broulee it would undoubtedly be of great service to the district generally, but so long as either Tuross or Wagonga is open and attended by steamers of the size of the "Trident" the wants of the estate will be sufficiently met by such a service; the cost of transport by road would be less to either of these places than to Broulee, and the steamer's freight would be the same; for disposal of fat cattle large steamers calling would confer great benefit, but at the same time these districts will ever be devoted to dairying, which is very much better paying than fattening, and for all such produce the small steamers are amply sufficient; the fat cattle produced are mostly all wanted for consumption in the district; stud stock are usually all very quiet, having been handled, and they can be sent away when required by the small steamers also; there cannot be any great numbers of such stock to send away.

T. N. GRIERSON.

The average quantity of goods imported by sea is 6 tons weekly; and the money value of both exports and imports averages £600 weekly.

(4.)

Moruya, October 12, 1891.

Mr. John A. DuRoss—His property is Binge Binge, between Lake Coila and the sea, about ten miles from Moruya; owns a little over 1,000 acres, part freehold, and part conditionally purchased; does dairying altogether; farming is for home consumption only; ships all his produce to Sydney; this consists of cheese only; occasionally sends away butter and bacon; when butter is high-priced it pays to make, but the bacon is made only during the winter; pigs cannot be sent away by the drogher from Moruya, as it takes from Thursday till the Tuesday, as they have to be taken to Bateman's Bay, and they fall away in condition so much as to result in loss; Bateman's Bay is too far to drive pigs to; they can be sent to Sydney when, as now, the steamer comes into the Moruya; in consequence of these difficulties he has almost given up rearing pigs, as the price obtainable locally is not remunerative; occasionally sends a few horses to Sydney by steamer; he has to drive them to Bateman's Bay, and ship on the "Kiama;" of cheese he produces according to the season from 28 to 35 tons yearly; during some dry seasons has had as much as 500 bushels of bran and pollard from Sydney by the steamer. Of the calves produced he rears all he requires, but is obliged to destroy all the rest; if there were communication he might send at least 50 calves annually to Sydney; the freight is high because there is no competition at this port; it is higher than at other ports; but they could not be sent except by some expeditious means as they get no food on the journey; he could ship calves from Broulee, as they could be taken there

there in a spring-cart, as is done in Illawarra and other places; is in favour of Broulee Harbour because larger vessels are required for the trade and for passenger traffic; the accommodation in such a steamer as the "Kiama" for live stock and passengers is very deficient, and no better steamer is ever likely to come into this harbour; Turlinjah wharf, if built, would be 9 miles from his farm, so it would not offer any advantages; he could ship cheeses there if a steamer came up to the wharf; but he would sooner ship from Broulee.

JOHN A. DUROSS.

(5.)

Moruya, October 12, 1891.

Mr. Ernest Hawdon, resident in Moruya and owning properties on the Tuross and Coila Lakes; has resided all his life in these districts, his father having owned the Bodalla property originally; is well acquainted with the Tuross; has known the mouth of the Tuross to have been practicable as a ford for ten years at a stretch; this was as near as he can recollect between 1850 and 1860; about 1860 the entrance was absolutely closed with sand; about this time a great flood occurred during a season of very heavy and continuous rain all over the colony; this cleared out the entrance and left it navigable; the lake was after that used for some time by sailing vessels; this was before Mr. Mort owned Bodalla; much potato cultivation was done on Bodalla then, the crop being taken away by these vessels, but when the entrance suddenly closed the then crop was lost as it could not be got away; during his experience he has known this entrance to have been closed completely three times, and he does not believe that it can be relied on as a navigable channel for any length of time, as during his experience he has known it to have been fordable hundreds of times either on the bar or on the inner crossing; as his property adjoins this lake, his place, Kyla Park, being within half-a-mile of the site of the proposed wharf at Turlinjah, the lake would be of great advantage to him if communication could be obtained by this route, but he is convinced that no dependence can be placed upon it; while the passage is open, if a boat traded to Turlinjah, he would certainly make use of it; in his judgment a jetty is required at Turlinjah for use of the water communication along 15 miles of the Tuross River which is navigable for punts; a deal of fencing stuff is procurable up the river, and bark which would be brought down if there were any facilities for landing it alongside the road; sleepers and other timber which abounds higher up the river could also be brought down; points out also that there are extensive oyster leases on the lake, which was at one time leased throughout its extent, for which facilities for landing are needed; has heard what Mr. Anderson has stated as to the difficulties mentioned in trading from Moruya in the present and the past; considers that the Moruya district is second to none on the coast in fertility and capacity, but is aware that it is a long way behind most parts in production and material prosperity simply because of the want of ordinary facilities for shipping produce; in point of climate it occupies an intermediate position between the hotter parts of the coast to the north and the colder parts southward; almost all kinds of fruit and cereals can be grown here to perfection; the proportion of land brought under cultivation or even cleared is small; there are large areas of land open for selection which, though heavily timbered, are of very good quality; selection is going on; thousands of acres that are cultivable or capable of being made so are in use for rearing cattle only; regarding Broulee Harbour he would say that his father, while Broulee was used by vessels, used to ship some of his produce thence; Bergalia was then his property as a sheep run and Kiora was used as a farm; Bodalla was the cattle run; the despatches used to be of farming produce, wool, and casks of salt meat for the contract held by him for the commissariat department; he shipped thence several cargoes of cattle to New Zealand and to Tasmania; feeling that if no other outlet is given for the productions of this district the place must either stand still or retrograde, as the Moruya River will never afford the required facilities, he is of opinion that something should be done to render Broulee capable of receiving and despatching goods, produce, and live stock; no improvement has been effected by all the outlay on the Moruya for the last twenty years, and a proportion only of the money spent here would be sufficient to convert Broulee into a calling place for vessels; though the district does not now produce enough or require the services of large ocean steamers, yet if facilities were provided there a very few years would suffice to expand and develop the district in every direction.

ERNEST HAWDON

(6.)

Moruya, October 12, 1891.

Mr. Robert Anderson, of Lake View, Bergalia; the staple products of the district are principally from dairying, viz., cheese, and butter; but in addition large quantities of bacon and ham are produced; the crops chiefly grown are potatoes and maize; they cannot be grown for the Sydney markets because the freights for carriage to Sydney are so high, that the competition is prohibitive; considers that parts of the district, comprising a considerable part of it, is well adapted for vine cultivation and production of grapes for wine making; this was the opinion of the late Mr. Mort; at present the maize is principally fed to pigs; it is sometimes exported to Sydney, when the rates are favourable, and there are facilities for getting it away; it has frequently happened that the steamer has not been able to get in at the heads of the Moruya for some months at a time; it is only about three months ago that the drogher, "The Idea," was taken away from Moruya and the "Kiama" resumed running into the river; the "Idea" was used to carry the produce from the steamer wharf belonging to the company, about a mile inside the river from the heads, known as the Illawarra Company's wharf, to Bateman's Bay for transshipment into the "Kiama"; this arrangement obtained for several months at a time, and to his knowledge it has been in force on three different occasions during the last three years; within a couple of years ago a letter was written by the secretary of the Moruya Progress Committee to Capt. Turner, asking him to put on a vessel to take goods from Moruya to Bateman's Bay for transshipment; at that time the Moruya entrance was impracticable, and there was no other way of getting goods away than by carting to Bateman's Bay; this is 20 miles from Moruya; all the Bodalla goods had to be taken over this length of road also; on that occasion this carting to Bateman's Bay was carried on for about a month only; the "Idea" then came and took up the running between Moruya and Bateman's Bay; the ketch "Moses Fletcher," the property of Messrs. J. and W. Emmott, storekeepers, of Moruya, employed in carriage of timber and business of their own was during sixteen or seventeen years frequently taken advantage of by

by settlers for despatching their produce to Sydney ; she was wrecked at Moruya Heads in July last ; her tonnage was under 40 tons register ; this was done when there were no other means of getting goods away ; this was the only sailing vessel that ran regularly to this river ; others came occasionally for timber only ; about 18 months ago the steamer "Greyhound," of about 60 tons, owned by Mr. Cass, M.P., was sent here under representation from the district while the "Idea" was in use for taking goods to Bateman's Bay ; it was anticipated that the "Greyhound" would establish a direct trade with Sydney ; she proved to be unsuitable, as she was too slow and was removed after a month's trial ; the "Emma Pyers," steamer, about 40 or 50 tons, then commenced running ; property of B. B. Nicoll, but chartered by Cass, this was during the strike when for six weeks or two months the Illawarra Co. had no steamer at all trading to this port, though they called occasionally at Bateman's Bay ; this vessel was also unsuitable for the trade ; the "Meandera" steamer was then run along the coast for some time until financial troubles caused her removal also. She only came in to the Moruya Heads, but no farther, once ; prior to the floods in June the "Idea" was running between Moruya and Bateman's Bay, as the "Kiama" could not or was not allowed to enter the Moruya Heads, for probably six months or more ; in fact we believe that during the last three years the "Kiama" has not for more than half the time been able to get in to Moruya ; the account here given generally describes the way in which the struggle to get produce away from this district has been going on for the last 20 years or so ; prior to that there was a succession of floods, three of them which effectually opened the entrance and kept it good for some years, but these same floods brought sand down the river and choked up the channel opposite Moruya. Before this he had known a steamer, the "Minora," come up to the wharf at Moruya. This was a fairly large steamer of 100 tons or so, but since that choking up no vessel at all has got so far up. Regarding the traffic into the Tuross Lake, prior to seven or eight years ago, the "Moses Fletcher" used to trade regularly to the lake for timber and produce for settlers, also bringing back their goods. She belonged to Messrs. Emmett and Goodin. The latter had a sawmill on the Tuross at the time. The mill was removed because the local timber in the neighbourhood was exhausted and an accident happened to the boiler. Some seven or eight years ago the entrance has been closed by sand, but before that, for a long series of years, since about 1870, so far as he knows there was regular traffic into the lake for Bodalla goods and for timber.

ROBERT ANDERSON.

Moruya, October 13, 1891.

Mr. R. H. Barlow, a retired surveyor, resident in this district during 32 years ; in about the year 1854 he was landed at Broulee by a steamer of about 250 tons ; other passengers were landed there also ; was merely passing through ; there was a small settlement there at the time, but there was really little trade being carried through that port, as the Moruya was in use by small coasters ; knows from report only that Broulee ceased to be used as a port for goods about the year 1847, but up to about the year 1856 steamers came weekly to Broulee, landing passengers ; about that time the road from Nelligen to Braidwood was opened by Sir Thomas Mitchell, and then the steamers called at Bateman's Bay and went up to Nelligen, and then Broulee ceased to be used altogether, except occasionally for bark ; goods traffic began to use the Moruya River in 1847, because it then became open to the sea ; it had been open for boat traffic previously, but was very shallow ; believes that freshes in the Moruya River caused the opening of the entrance for sailing vessels ; this is what he has heard ; after 1854 he was in the Eden district and settled in Moruya, or Bodalla, in 1856, from which date his personal knowledge of this district extends ; believes that the first steamer in the Moruya River was the "Black Swan," which was brought right up to the wharf near the present road bridge in the year 1859 ; the "Comerang" was a flat-bottomed boat with paddles which had been built expressly for the river, but she only came as far as Mynora ; about a quarter of a mile below the bridge there was always, as long as he can remember, a crossing-place over the Moruya which was fordable at half tide and was in use as such until the bridge was built ; beyond this there used to be fairly deep water as far as the entrance to the river ; only one steamer ever came up to the wharf opposite the town, and this one only came a few times ; they used to come regularly up as far as Mynora, a point on the south bank of the Moruya, about a mile above the present Company's wharf ; the steamer traffic was not regular or to be depended on in those days, as they did not take the produce, which was carried by sailing-vessels, and only called at Moruya when they had to land a passenger, so people were in the habit of travelling by the sailing-vessels when they did not go overland ; he has known these sailing vessels frequently to have been obliged to shelter in Broulee ; has been in there himself for three weeks in a vessel without being able to get away ; at that time the island was connected with the mainland ; has seen a great number of vessels lying for shelter in Broulee during rough weather ; has not been there during very heavy weather himself ; always found and heard that the masters of the vessels were well satisfied with the shelter afforded by the island ; the principal crop carried away by the vessels in those days was potatoes ; there was no dairy produce then ; has been personally acquainted with the Tuross as a surveyor, from the entrance up to Cadgee, since his residence in the district ; the difficulty in obtaining any information as to the state of the entrance in past years is because there were so very few residents in the country until free-selection commenced ; there was no one living at the Heads, or near it, and it was not anybody's business to go there ; all he can say about the Tuross entrance is, that it is very uncertain ; that for a series of years he has known it, from hearsay, to have been closed and passable ; this was the only way by which bullock drays could go from the north side to the districts on the Tuross as by the ordinary road the Tuross river had to be crossed by swimming ; has known a steamer to have gone into the Tuross several times and has known the river to have been used by sailing-vessels, but at the same time he has known a vessel to have been shut up inside for three months without being able to get out ; he understands that the entrance is better now than it has ever been before ; would add that there is a crossing-place over the Tuross River some distance below the site of the present bridge, by which the local people crossed, but there was no regular road to it and the only one available to the people of Nerrigundah was over the entrance of the Tuross to about 1851 ; at the time of the Nerrigundah rush in 1860 or 1861 the entrance was open to the sea ; then goods were taken by road to Turlingah and punted up the Tuross to Mortfield, opposite Comerang.

Moruya, October 13, 1891.

MEMO *re* Tuross River.

I have known this river for 20 years, having first visited the entrance to it in company of Archdeacon Puddicombe, in August, 1871. A month or two later, during the same year, I was there with the late Mr. T. S. Mort; afterwards was there with the same gentleman on two occasions in reference to a scheme to which he had devoted much time and attention, for cutting through the Southern Headland from the sea into the deep water of the river; I was there on two occasions with Mr. Jas. Evans, the late manager of the Bodalla Estate; on one of those occasions we rode along the coast to the Wagonga heads and examined the entrance to the inlet, which we both decided was a dangerous one—which opinion has been fully justified since by the wrecking of two or three coasting vessels at this entrance; had Mr. Mort's scheme been adopted and carried out at the time, I am persuaded that the navigation of the Tuross River would have been uninterrupted from then until now, by small coasting vessels, steam or sailing; but the cry was then raised against "benefitting a private estate at the public expense," so the matter fell through, and the public interests have suffered ever since; could this scheme be carried out even now, at a moderate cost, a matter which can be easily determined within a week or ten days, by either Mr. Burrows or Mr. Grimshaw, officers of the Harbours and Rivers Branch; I am certain that it would be hailed as a great public benefit by every settler south of Moruya; of course, very great care would have to be exercised in fixing the site of wharf, and also providing easy access to it without let or hindrance of any kind; I was on the northern headland of this river in June, 1885, but there was no trade to it then, and the entrance presented a tortuous and forbidding aspect; the s.s. "Emma Pyers" was taken into the river a short time previous to the late floods which visited this district, and she had to remain there for a week or ten days ere she could get out again; I know nothing whatever of the effect produced by the recent floods upon the entrance to the river; I know that an expensive bridge over it has been swept away to the very serious inconvenience of the public; I am informed that there is a good entrance at present, owing to the recent floods, if so, this state of things may continue for years, and would, I think, justify the erection of an inexpensive wharf, which would afford shipping facilities for farm and dairy produce, and also for the timber trade which is springing up all along the south coast, owing to the demand for railway and bridge material.

J. GRAHAM LOVE.

Moruya, October, 13, 1891.

Mr. T. W. Smith is in possession of a Trinity Board Certificate as sea-going master, issued to him in London in 1843; he worked on the sea for 22 or 23 years, leaving it in January, 1859; entered the police service in November 1861; is now a police pensioner, and has been resident in Moruya since 1857; entered Broulee Harbour as mate of a schooner "Fancy" in 1849, capacity 56 tons, and was there frequently during the same year, and in 1850; the vessel was not trading to Broulee but went there for shelter only; again in 1851 was, as master of the "Nightingale," repeatedly in Broulee Harbour for shelter up to the end of 1852; in 1854 was master of the "Mary Jane," having chartered her himself, 45 tons register; ran her for nearly three years; was frequently in Broulee Harbour for shelter; was master of the brigantine "Vanquish," with 300 tons of coal on board, between 11 and 12 feet draught; took her into Broulee for shelter as the weather was too bad to make Twofold Bay; there was a heavy southerly gale blowing at the time; was under shelter with two other vessels in the "Nightingale" during a very heavy easterly gale of the longest duration he has ever known on this coast; the island, at that time, gave ample shelter from all winds; believes that at that time there was safe anchorage for half-a-dozen small vessels in from 3 to 5 fathoms of water; the connection between the island and the main land was then fully 300 yards wide between high water lines, carrying stunted growth of timber; remembers this connection having been cut through in the early seventies, not later than 1873; he went out to the place to see it early in 1873 and found the place cut through; took the "Mary Jane" into the Tuross in 1856, and was shut in, bar bound, for 7 weeks, but the opening was cut through suddenly and allowed him exit with fully 10 feet of water; never was in the Tuross with a vessel again; the bar is very uncertain and shifts rapidly; has often ridden there when stationed here, and has seen it closed up with firm dry sand; went into Wagonga several times with the "Nightingale," the last time was in 1853; believes it is one of the best and safest bar harbours on the south coast; the north beach reaches out and narrows the entrance, and there is a sharp turn inside which is dangerous for sailing vessels, but for steamers the entrance is safe; has never seen much difference in this entrance except in the beach; there was no channel along the north side during his time; he went up the south bank and the channel crossed over to opposite the fresh water creek; there was plenty of water along this channel; first went there in 1851.

T. W. SMITH.

(10)

Moruya, October, 15, 1891.

Mr. Robert Jeffers is a selector now at Cobargo, having left Moruya some time ago, but has been acquainted with the district for the past 40 years, at one time leased a farm from Mr. Hawden, sen., at Moggendoura, three or four miles from Moruya, and was engaged in butchering and dealing in stock. In former days all the produce from the Moruya was taken to Broulee, because no vessels of any kind called at Moruya. The first vessel that came into the Moruya was one of 15 to 18 tons called the "Industry"; she was followed by others; he has known several vessels to have been bar bound at these Heads on account of the wind being unfavourable and also the state of the water on the bar; the Moruya at that time was good for punting down to the Heads from above Kiora, and consequently when vessels began to call at the Moruya, goods were not sent for shipment to Broulee; the road to Broulee was in a state of nature, no money was ever spent upon it; the people at Kiora and above from Mungerera could send goods right from their doors, as it were, by water in those days, but that state of things has considerably altered; punting has been impossible for some years back from such a distance up the river, much potatoes were grown there then; this cultivation has almost ceased, it was the principal crop in these districts in those days; corn is now chiefly grown and more dairying is done now; all produce sent away from these parts has now to be carted to Moruya. His father was superintendent under Captain Oldry, at Mount Oldry; cattle used to be shipped from Broulee; the advantage from Broulee would be that if it were made suitable people could be sure of getting a passage for themselves and their goods, whereas

from

from Moruya they cannot be sure of being able to get away; finding often that they must either ship in the small vessel and go round to Bateman's Bay or go overland to take the steamer at that place; for himself he knows that he would often go by Broulee as he would be sure of a passage, whereas now he would not attempt to get a passage from Moruya; Broulee would be more certain as a place to ship stock, if he had any quantity to send away, than Bermagui; has known disappointment to result from shipping at Bermagui; young pigs as fat porkers could be sold in Sydney, if they could be sent there, at prices ranging from 22s. 6d. to 27s. 6d. at three months, and at six months old they fetch from 28s. to 32s. 6d; there is so much uncertainty in the transport now that such a trade cannot be relied on; pigs are therefore kept until they are about 10 or 12 months old and sold as stores to local buyers who fatten them and make bacon; these store pigs fetch no more than 20s. to 25s., thus a lower price is obtained for these after having been kept some months longer; facilities of transport would allow of a large trade in this stock alone all over this country; in the matter of calves also, at about two months of age, they might fetch 25s. to 30s. if they could be got to market as soon as they are fit and not kept long on the way, but they become nearly unsaleable if they are kept travelling about for three or four days on the road; a few only are now sent away, but if there was any certainty in the transport three times the number would go; this difficulty renders it necessary to keep the cow feeding the calf a couple of months longer, and loss in this direction is also entailed.

ROBERT JEFFERS.

(11)

Moruya, October 15, 1891.

Mr. Michael Morris, an Alderman of the Municipal district of Moruya, and storekeeper, resident in Moruya about 24 or 25 years; would point out that he does not consider that the Moruya trade offers encouragement for large boats; has known the district for 25 years, and in all that time the Illawarra Co., boats together with some sailing craft, have taken all the produce from this district, and the boats have never been found unequal to the trade; has always been of opinion that a coast railway is the proper way of developing this country, and that no other plan will be efficacious; there is an extent of about 100 miles of good country from Moruya to Bega, along which there would be stations at every 6 or 7 miles, all this country would be developed by a coast railway line; considers that the trade of the Clyde will always be carried by vessels from Bateman's Bay; the sawmills and the Nelligen trade, are now, and have been all along served by that route, and it would not be diverted to Broulee in his opinion. The Mogo traffic and from Buckenbowra would go to Broulee; is of opinion, that even if Broulee were established as a port the Moruya trade would still be carried on the Moruya River so long as it remains open for steamers, and when not accessible for steamers the loading would be taken as now by a drogher whether to Broulee or Bateman's Bay; considers that there is not, nor will there be encouragement for larger steamers than now visit this port, so that these Illawarra steamers only will come here or even to Broulee, and they alone will continue to come here and will continue to come into the Moruya, whether Broulee be instituted as a shipping port or not; has heard experienced men say, that the cost of completing the works at the entrance to the Moruya River would not be heavy; he considers that this is the proper course to adopt rather than to spend money on a new harbour at Broulee; but at the same time he considers that the railway alone will be thoroughly efficacious for development of the district; has known mills in number about 20, in fairly constant work during the last 20 years, between the Wogonga and the Tomago; there are now only about 7 or 8 mills at work; the mills have been shifted about from place to place, and it may reasonably be inferred that a great part of the useful timber in accessible situations has been cut out; the forests have been gone over by sleeper getters several times, going further and farther back into the mountains, and in the matter of sawing timber, the decrease in the number of mills shows that this also has become scarce; is an advocate for the completion of the works at the entrance to the Moruya River rather than of new works at Broulee, because he does not believe that the district can afford encouragement for larger boats than now trade here.

MICHAEL MORRIS.

(12)

Moruya, October 16, 1891.

Mr. James Lynch is a farmer and grazier; his brother has a saw-mill on Moggendoura, and his cousins have mills on the Wogonga; would wish to say regarding the timber available in these districts that there are now in the neighbourhood of the Moruya the following mills cutting timber:—Ball's mill at the Heads; Lynch's at Moggendoura, about 5 miles from Moruya; Goodin in Glen Duart, 1½ miles away; Berriman & Howard in the town, making four mills. The price of timber delivered in town for sawn building timber is not more than 7s. per ton; this price will not admit of the timber for sawing being drawn from a long distance in the bush, consequently the forests at any distance from the town are practically untouched; sailing vessels have never come nearer the town than Mynora, about a mile down the river; timber is loaded there or at the Heads; about Kiora and westwards the whole of the back country is untouched except by sleeper getters; the saw-mills have not touched the iron bark, and spotted gum abounds on lands quite out of reach of the saw-mills at present prices.

JAMES LYNCH.

(13)

Moruya, October 16, 1891.

Mr. Robert Burns is an advocate for Broulee Harbour being made available as a shipping port. He has been a resident in this district over thirty years, during which time expenditure has been going on for improvement of the entrance to the Moruya, which has resulted in the river being brought to a condition inferior to what it was when in a state of nature. He has lost all confidence in the Moruya becoming capable of serving the wants of the district much less of developing it. With reference to the fact that this district is now importing food stuffs and not growing enough of potatoes and hay for its own consumption, he would point out that up to about three or four years ago this state of things did not hold good;

good; the district suffered so much loss and discouragement in endeavouring to supply outside markets, that the cultivation of food stuffs was in great part discontinued altogether and attention given to dairying and production of articles which, being very much lighter and more easily handled, besides representing much greater value for a smaller bulk could be exported at a profit even by the insufficient means available; consequently the result has been, as stated, that agriculture is not receiving the attention of farmers; it is a fact that the district is capable of producing any quantity of all kinds of food stuffs; his contention is that there is a necessity for a harbour to admit of export of produce with certainty and celerity; at present there is no certainty of goods being delivered in Sydney within several days of its despatch; the high freights are not so much against trade as the uncertainty that attends on the operations of transport; goods may be loaded on to the steamer in the river for several trips in succession, but the entrance may not allow of the steamer coming in for several weeks in succession, and then goods are taken round and transhipped at Bateman's Bay or have to be carted there by road; the farmer cannot tell which course he will have to adopt as, at a distance from the Heads, he has no way of being informed as to whether the steamers can come in or not; there being no market for surplus of production, has the effect of curtailing production altogether; a waste of the surplus on a farm discourages the farmer from cultivation of that particular commodity.

ROBERT BURNS.

(14)

Moruya, October 16, 1891.

Mr. William Hawdon owns property at Kiora, on the Moruya River, about three miles from town; knew the Broulee Harbour very well a number of years ago; was landed there several times by the "Shamrock," a steamer of about 500 tons (Captain Gilmore); this vessel traded between Sydney and Melbourne and Tasmania for a good many years; she would call at Broulee when any inducement offered; has often been landed there in the night time; there was ample water space and good anchorage; has not lived there for more than a day or two, while waiting for the steamer; the opening of such a port could bring the district into direct communication with other colonial ports as well as with those of this colony, and lead to production and interchange of a large variety of products, which cannot be cultivated or dealt in now at all; advocates Broulee Harbour because he has lost all confidence in the Moruya River being made good for vessels, having known the river for 40 or 50 years.

WILLIAM HAWDON.

(15)

Moruya, October 16, 1891.

Mr. Robert Speer, farmer and storekeeper, Bergalia; is an advocate for the Broulee Harbour project because the district is in urgent want of improved harbour accommodation, and he has no confidence at all in the works at the Moruya River ever proving efficacious in providing a permanent entrance or a channel for vessels; the present condition of things is worse than it was when he came here in 1864, and he is confident that it cannot be improved in the Moruya; the advocates for completion of these works are those people who will be directly benefitted by the expenditure of money on them, and those who have farms on the river; whereas the sufferers by the lack of a trustworthy entrance and channel are the farmers who are all in favour of Broulee.

R. SPEER.

Moruya, October 16, 1891.

A MEETING was held in the Council Chambers on this date, at which the following members of the Municipal Council were present:—

MR. W. H. SIMPSON, Mayor.
 „ JOSEPH JENNER, Alderman.
 „ MICHAEL MORRIS, Alderman.
 „ M. VAUGHAN, Alderman.

Mr. J. Jenner said that he had lived for years close to the Moruya Heads, and had frequent opportunities of hearing the opinions of Captain Tranent, who was well acquainted with this coast; this gentleman used to say that people who talked about Broulee as a harbour did not know the place; that it was no harbour, and could not be made a sufficient shelter from many of the storms that are experienced on this coast, and that nothing less than a very large expenditure would make it into a harbour; *Mr. Jenner* is of opinion that such a place is not required here; he has frequently known sailing vessels that have been unable to get into Moruya Heads by contrary wind run for shelter into Bateman's Bay, but not to Broulee; as to the works in the Moruya, he points out that they are incomplete; that the dyke was attacked by the highest flood ever known, and severely damaged by the flood-waters getting behind it, and that its condemnation, under the circumstances, is premature; the entrance, he maintains, has, so far, been materially improved by the works; as, before they were undertaken, he knew of vessels not being able to get in, and of being shut in for weeks without being able to get out again; is of opinion that if proper material had been used in construction of the dyke the result would have been entirely different, and that its completion would have proved the works to be sufficient for the object for which they were designed; he considers that if vessels can be brought up as far as the Company's Wharf, the size of the vessels now in use will be amply sufficient for all requirements of the district until a coast railway is constructed; the railway is the desire of the district; a large majority are in favour of continuing these works to completion, as this would not entail so much expenditure as at Broulee, and no large sums should be spent on such works until the railway that is wanted is decided on; the fact that the water in the entrance is becoming shallower since the flood in June is due to that flood having opened out more channels than the one that was being dredged; a channel is now in existence behind the dyke which never was there before; thus the river is not properly directed; he considers that even if Broulee would admit of larger vessels coming in, there is no inducement for them to do so; there is no timber in the near neighbourhood, and it will be a very long time before there would be any trade for larger vessels than do now come here.

Mr.

Mr. Michael Morris considers that the completion of the Moruya River works would entail less expense than the formation of Broulee into a harbour; points out that the steamers of Messrs. Howard Smith do not call at Eden except under a guarantee of a certain amount of freight, and he believes that the same would be the case at Broulee also; he cannot believe that there will be loading for larger steamers than now do the trade of the place; the Nelligen trade will not be diverted to Broulee, nor will the trade of the southern parts of the district, and the remainder of the district is too small to give promise of trade enough for large steamers; he is of opinion that one-third of the expense at Broulee would suffice to complete the Moruya works; as yet, no official examination of the works has been made to decide on the cost of their completion; with regard to the evidence that has been given as to the probable traffic in pigs, he points out that the demand for pigs for killing for curing purposes is greater than can be supplied in the district; that numbers of pigs have been brought into the district from outside for sale to bacon-curers; and, as to an export of cattle, that there are not enough of the kind required for export.

Mr. Vaughan would not wish to be understood to mean that Broulee cannot be made into a good harbour, and it is almost needless to say that Moruya can be made navigable; the question is, which is the most suitable; he is of opinion that the Moruya River is most centrally situated in the district and most convenient; as to the benefit derivable from a port accessible by large vessels, he would point to Eden, which is one of the finest harbours in the colony, but which is, nevertheless, not called at except occasionally, and the country, instead of being greatly benefitted by having it for a port, is in a stagnant state, and the harbour will remain unused until it is connected with the populated and fertile districts by a railway; similarly with Broulee; even if it possessed all the advantages claimed for it, a place of the kind is not wanted by these districts; the land carriage to it from the centre of trade of the districts is long and the steamers would as now continue to trade with the Moruya; there is great difficulties of access to Broulee for the timber; there are no cattle raised in these districts for export, and their will be no inducement for large steamers to call; the Broulee project entailing an expensive tramway, and resumption of property, will require much more money for its construction than can reasonably be expected to be given to the district; he believes that it is the wish of the district that the outlet for the district should continue to be by way of the Moruya River.

Mr. W. H. Simpson pointed out that it is altogether premature for the people of the district to condemn the Moruya River works as being unsuccessful; the Government has not yet sent any engineer to report on them; there has not for many years been any regular vote made for their completion; he is of opinion that an authoritative opinion should be obtained as to these works, and if it is considered that they are likely to prove capable of affording access to vessels of the size that have been trading here all along, they should be completed, as the Moruya is most centrally situated and most convenient of access to all in the district.

(17)

Bateman's Bay, October 19, 1891.

Mr. George Guy.—There is a sawmill at Durras or Beagle Bay, about 8 or 10 miles north of Bateman's Bay, shipping timber, at Beagle Bay, the property of William Gillies, capacity about 20,000 per week; this mill would not under any circumstances send timber to Bateman's Bay; Mr. Francis Guy's mills all dispatch timber from Bateman's Bay at present; these are at Benandra and Cullendulla at head of the creek and on south shore of the bay; their united capacity is about 100,000 feet per week; the last mill on the bay will cease working when a new mill, in course of erection on the northern end of Murrabalang Station, 15 miles south of Ulladulla, is ready; this mill will despatch timber from Borley Point; the despatch of timber from the bay will then, viz, about the beginning of the new year, be reduced to 80,000 feet per week; there are now two mills working on the Clyde, the property of Anthony Vider and Webber, at Nelligen; the output is about 35,000 per week; there is one mill on the Clyde which has not been working for about three years, and another at Buckenbowra or Runnymede Creek which has not worked for some years; the timber still available in this district within reach of the water of Clyde River or of the bay, at a distance, say, of from four to seven miles from the water, is confined to the area between the Clyde River and the ocean; on the west side of the Clyde the timber is deficient in quantity and scattered; at the head of the Clyde the land is nearly all owned by selectors, and there is hardly any timber available; the whole area between the Clyde and the ocean is forest reserve proclaimed seven or eight years ago on which very few areas had been selected; on the Buckenbowra, on the eastern side, at the head of the creek, there is a very fair hill of blackbutt and ironbark, which, however, is not available at Thompson's mill (which is now idle having no timber to work); the timber referred to is in forest reserve; on the eastern bank of the Clyde the timber has been exhausted for 16 or 18 miles above Bateman's Bay, and to a depth of 4 to 6 miles from the river, and along the north shore of the bay for about 5 miles; outside of these areas there is timber enough for another 20 or 30 years, but of this area the timber on the falls to the Clyde only can be brought to the Clyde and thence to the bay; the rest will be taken to Kiola where Goodlet and Smith have a mill, and to Borley Point; both these are on the coast and will serve all the area on the seaside of the divide between the Clyde and the ocean; there are large areas of first-class land on this tract north of the bay, portions of which might be selected if made available, but facilities for shipping are not to be had within 24 miles at present; the spotted gum and blackbutt are the chief timbers about the bay and the Clyde, but there are still several small areas of ironbark fit for piles and girders but not for sleepers; the Kiama to Nowra contract is being supplied from this place with piles and girders and a few sleepers; south of the bay between the sea and the Tomaga River and the main road the timber has all been absolutely exhausted; this tract is all open to selection; two mills on the Tomaga have been idle some two and four years; the mill at Jeremadra has now probably stopped work for good. the only timber now available for this mill is that patch before spoken of on the Blackwater hole at the head of Buckenbowra Creek; between the Tomaga and Moruya River the land is nearly all in private hands; there is no timber left there; this tract has been worked by four or five mills during 15 years and the timber has been completely exhausted; westwards of the main road there is a small area of fairly good timber within four miles of the road accessible to the Jeremadra mill; from this westwards there is no good timber to the foot of the mountains; the Lynch Bros. mill at the north of the Moruya and 2 miles from the town, have a fair quantity of blackbutt and a little ironbark to work on; to the south-west of Moruya there is a good quantity

quantity of good ironbark timber available; the timber from their own mills is sent away by sailing vessels of their own and under charter, and occasionally by steamer from the bay; Mr. Vider sends also by sailing vessel and by steamer; none of this timber, being all cut on lands north of the bay and carried by water, could possibly under any circumstances be shipped at Broulee; the timber spoken of as being at the Blackwater Hole, would be shipped on punts on the Tomaga, and on sailing vessels at the heads of that river; the distance to be carted to Broulee if that port were used, would be about 10 miles, whereas there would be 5 miles cartage only to the water at Tomaga; the trade of this district is supplied by sailing vessels, or by the I.S.N. Co., steamers, delivering at the wharf at the township of Bateman's Bay weekly; has never known this service to fail; occasionally the sailing vessel or steamer may be delayed for a few hours by having to wait for water at the bar; the "Kiama" comes over the bar at about quarter tide of springs and about half tide of neaps; the traffic from Buckenbowra is brought by punt either to Bateman's Bay or Nelligen, both being about the same distance, but some portion is brought by road through Mogo to Bateman's Bay; this is a small portion only, being Mr. Cork's cheese only; all his other produce including butter and wattle-bark, is brought by punt; from Buckenbowra to Nelligen is a little over 10 miles by a good road.

GEORGE GUY.

(18)

Mogo, October 20, 1891.

Mr. Frederick Aird, a storekeeper established in this place for the last seven years, during two of which the business has been his own property; there are about forty dwelling houses in Mogo, two stores, one hotel, three places of worship, a public school with an average attendance of about forty-six scholars; there are two saw-mills near Mogo within a mile—the Jeremadra Mill and that of the Berringer Bros.; the latter is constantly at work with about eight teams engaged; Bateman's Bay is 7 miles away; Moruya is 11½ miles; Buckenbowra is about 8 miles away; the road to this last place turns off at about half-a-mile away towards Moruya; is a good road; the population of Mogo, including Berringer's and the Jeremadra saw-mill, is about 250 people; there is no road in existence to Broulee; there is a track through private property only; the public road to it turns off the Moruya road about 3 miles from Mogo; the distance would be about 8 miles; stores all come to Mogo via Bateman's Bay, and all produce is sent by that route from Mogo and from Buckenbowra; has never sent any loading to Moruya for despatch nor does he ever get any stores thence; on the Tomaga only sailing vessels come into the heads; punts come up the Tomaga to about 1½ miles to the mills; no nearer to Mogo; there are only sailing vessels trading here for timber only; insurance is refused on vessels to Tomaga; the produce required for the store—chaff, corn, and sometimes potatoes—he procures in the district, but the local supply is not equal to the consumption; he has therefore to obtain supplies from Sydney; corn, chaff, potatoes, and onions are constantly to be kept in stock; these are brought by steamer to Bateman's Bay; there is a large amount of produce sent away from the district, but a storekeeper has constantly to have it in hand, and he has to procure from Sydney what he cannot buy when he requires to do so; so the district, though actually producing enough and more than enough for its requirements, has constantly to be supplemented from Sydney where stocks are kept; so there is a constant motion backwards and forwards of produce; Mr. Cork of Buckenbowra sends his cheese by road in his own waggons to Bateman's Bay to avoid handling and possible detention. His other produce he sends by the river in punts; he is a large shipper of wattle-bark; Mr. Cork never sends nor does he receive anything via Moruya; the distance from Buckenbowra to Bateman's Bay by road is 15 miles, and to Moruya about 20 miles, and to Broulee about 15 miles; these are about ten settlers in the Buckenbowra district, owning a large quantity of land; corn is grown; dairy produce and bacon also is produced; some few of them deal with Nelligen by the punt, or by the road direct. None of them deal through Moruya; Runnymede is about 6 miles down the river from Buckenbowra, and thus is nearer still to Bateman's Bay; all these places have water carriage by punt to the Clyde and to Bateman's Bay; they would need to go by road to use Broulee or Moruya; there is a mill on the Buckenbowra Creek, which has not been at work for years; Broulee could not be reached by water from Mogo, as punts could not be worked outside the Tomaga Heads; the mining in Mogo is the Mogo Alluvial Gold Mining Co., working a lead in the flat of Cabbage Tree Creek; there are five parties working reefs within 4 miles of the township; employés of Angus and Co., are getting sleepers in the neighbourhood of Mogo at distances from a quarter of a mile to five miles away; they have produced 9,000 sleepers within the last 6 months; these are shipped by punt on the Tomaga to the heads; these sleepers are being got on the west of the road south of the Tomaga; they are also getting girders and piles here.

FREDERICK AIRD.

(19)

Mogo, October 20, 1891.

Mr. Richard Annetts, a storekeeper established in Mogo for 30 years; obtains all his goods through Bateman's Bay, and sends all his loading away by that route also; has never sent by Moruya; does not consider that Broulee would be convenient as a shipping port, as there is no road at present, and any road to be made would be longer than to Bateman's Bay; he cannot see that a shipping place at Broulee would be of any advantage to this place; he procures corn and chaff locally, when it can be got, but otherwise he obtains from Sydney; as a rule he finds that the prices of produce in Sydney are lower than the local prices, but he has to pay the freight on the carriage into the place; selections are occasionally taken up between Mogo and the coast; he considers that neither Moruya nor Broulee as harbours would have any effect upon Mogo, no matter what sort of a shipping place was produced at either place, traders would continue to use Bateman's Bay.

R. ANNETTS.
APPENDIX

APPENDIX A.

November 15th, 1891.

Bodalla Company, limited, Bodalla, to Mr. Stanley Alexander.

Dear Sir.

I am in receipt of yours of 13th, and beg to state in reply that you will be correct in saying in your report on the Moruya and Bodalla districts that the cultivated grasses are not only permanent pasture, but that they spread naturally and supplant many of the native grasses. The climate is much cooler here than in the Illawarra district, hence the cultivated grasses do better; some of the paddocks at Bodalla have been laid down for 15 years, and are still excellent.

Yours, &c.,

T. N. GRIERSON.

APPENDIX B.

Council Chambers, Moruya, October 15, 1891.

Mr. Stanley Alexander.

Sir,

I have the honor, in answer to yours of the 12th instant, to supply you with the following information, as requested, and trust that the same will be of some assistance to you:—

1. Area of the Municipal District, 19 square miles.
2. Number of dwelling-houses, about 230.
3. Population, about 1,200.
4. Total value of all property in the Municipality, £143,435.
5. Total amount of rates, between £350 to £400.

I have, &c.,

T. GROV. E. BROWN,
Council Clerk,

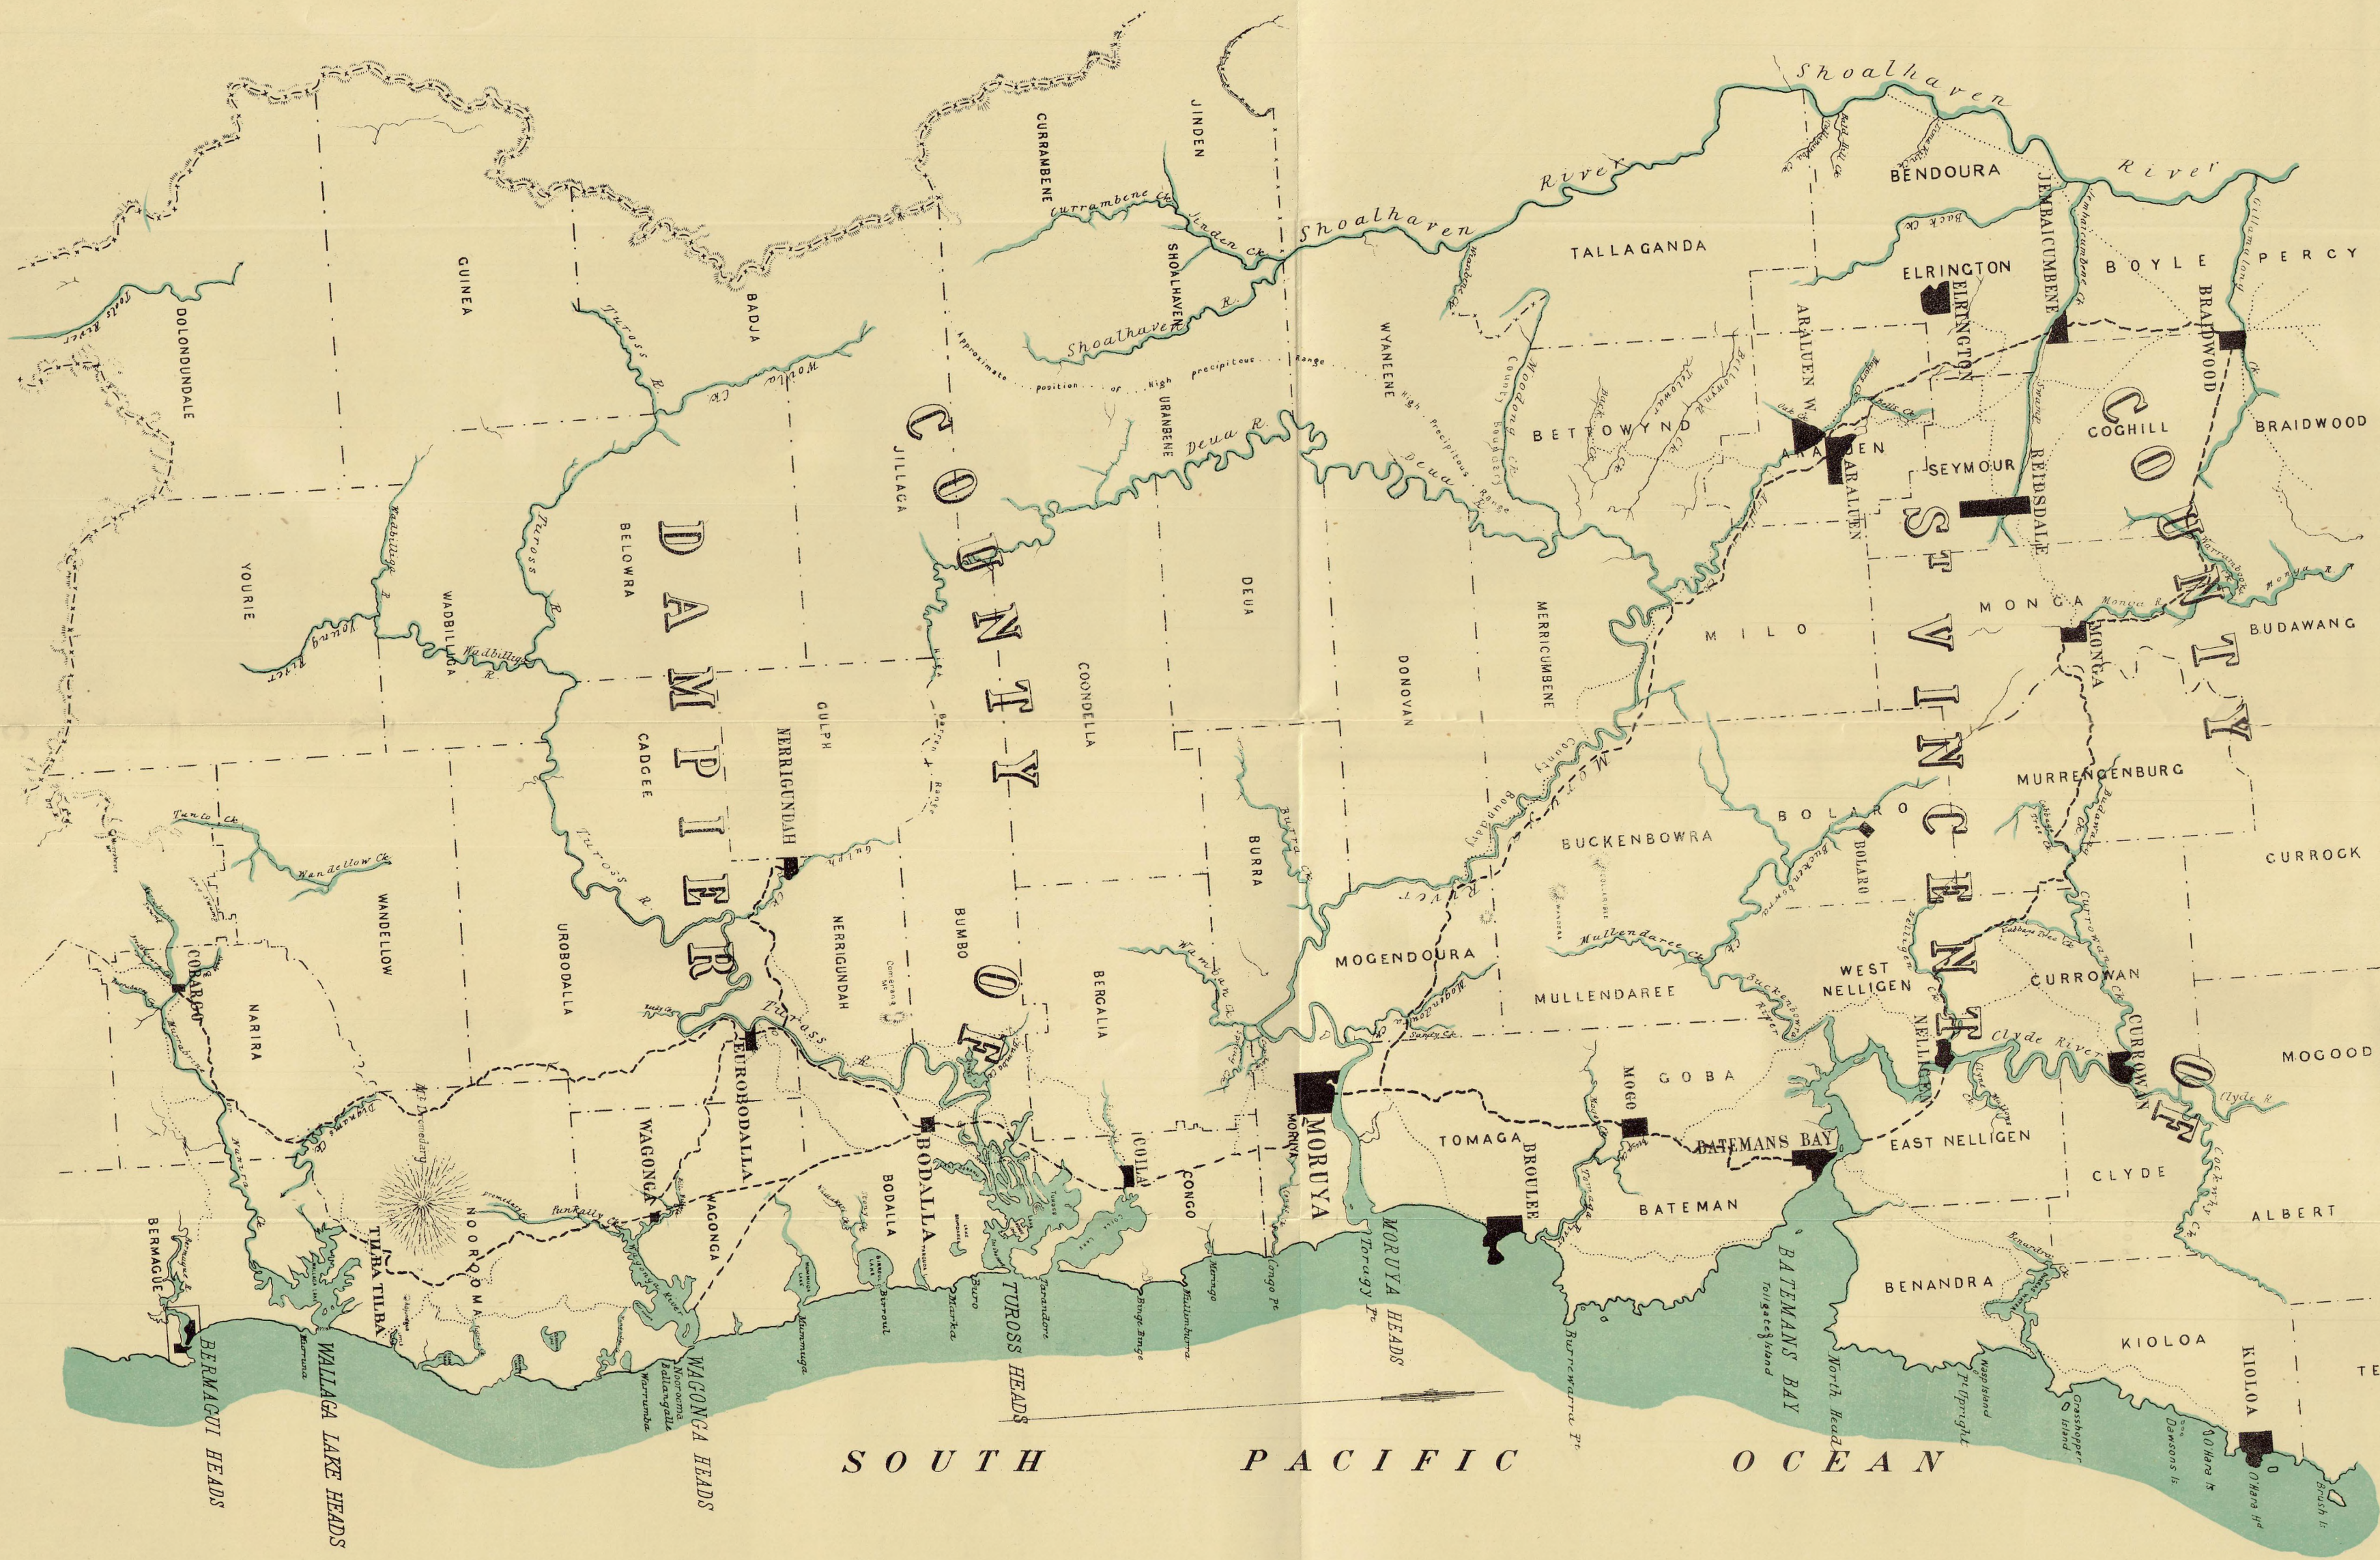

[One map.]

SOUTH PACIFIC OCEAN

1891-2.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

COFF'S HARBOUR.

(REPORT BY COMMANDER F. HOWARD, R.N., MARINE SURVEYOR, TO THE ENGINEER-IN-CHIEF FOR HARBOURS AND RIVERS.)

Ordered by the Legislative Assembly to be printed, 2 February, 1892.

All Bearings are Magnetic (unless otherwise expressed).

THE anchorage known as Coff's Harbour is partially protected by two small islands lying off the coast about N. by E. $\frac{1}{2}$ E., $13\frac{1}{2}$ sea miles from the Bellinger River entrance.

The South Island lies 500 feet to the eastward of a grassy headland, forming the southern boundary of Coff's Harbour. This island is 1,700 feet east and west, and its greatest breadth is 850 feet north and south, tapering at each end. It is very steep all round, except where it faces the headland. The southern face is a continuous broken cliff, in some places overhanging, inside of which the island rises in a rounded form to a height of 136 feet above low water. Above the cliffs, which are jet black, it is covered with a coating of short grass with scarcely a tree or bush to be seen, except a few pandanus low down on the north side. The island is entirely surrounded by a rocky ledge extending at the east end over 200 feet beyond the foot of the cliffs.

The South Island is usually spoken of at Coff's Harbour as the Headland.

The space between South Island and the mainland is filled with numerous rocky patches of all shapes and sizes. These rocks entirely break the force of the heavy sea which usually thunders into the bight from the southward, causing a great flow of water to the northward through the rocks. At times this passage is sanded up so as to be fordable at low-water springs. At such times during fine weather cattle and horses get across to the island which affords good pasture.

The northern island, called Muttonbird Island from the number of those birds which at one time frequented it, is N.N.E. from the South Island, from which it is distant 2,000 feet at the nearest part. Muttonbird Island is 1,800 feet long E. by N. and W. by S. with an average width of 650 feet. Like the south island it is clifty on all sides and surrounded by a rocky ledge, and its surface appears clear of trees or bushes, but is covered with a thick growth of stunted vegetation, beneath which the soil is honeycombed everywhere with holes made by the Muttonbirds (*Onychoprion fuliginosa*). This makes it very fatiguing to walk over as the soil gives way continually. Most of these holes were deserted during the period of our survey, and very few Muttonbirds were seen in the vicinity. The highest point of this island is 148 feet above low water. The northern side is concave, and forms a small bay with a very uneven rocky bottom. In this bay there are a few small patches of sand under the cliffs where landing may be obtained in fine weather, but the cliffs being perpendicular can only be scaled near the point on the east side of the bay. The best landing place is on a small patch of sand at the west end of the island, where the cliff is low.

South-east Islet, which lies E. by S. $\frac{1}{2}$ S. 2,400 feet from the extreme east point of South Island, is a mass of black basaltic rock 500 feet in diameter with a small rounded green summit in the centre, 51 feet above low water. The green mound is 150 feet across and clothed with the same vegetation as Muttonbird Island. South-east Islet in no way assists in protecting the anchorage. It has a rocky ledge extending westward from it towards South Island, near the end of which is a patch with only $6\frac{1}{2}$ feet at low water, which breaks in ordinary weather. The channel between this ledge and the South Island is navigable, having 36 feet of water in the centre, but in bad weather it breaks nearly the whole distance across and makes a high confused sea in the space between the islands. The east side of South-east Islet is steep too, the 10-fathom line being only 350 feet outside the rocks.

The headland inside South Island is clifty on its southern side with a smooth grassy summit, 51 feet above low water. It is the extremity of a narrow ridge which runs inland in a westerly direction, and along the crest of which is the boundary line between the counties of Fitzroy and Raleigh. On the south side, 500 feet from the extreme point, the sandy beach trends away S.W. $\frac{1}{2}$ W., and curves round to Boambe Head. On the north side the rocky coast-line runs westward for over 1,000 feet to the Coff's Harbour Beach, which trends north for 2,800 feet to a small sandy point where a few rocks crop up about the high-water line. On the rock nearest the point is our B.M., which is 10.18 feet above the low-water datum, to which all heights are referred and soundings reduced. The land inside the beach is low and sandy for a short distance inland, and then rises to the spurs of a stony hill. The whole country is a thick forest except where cleared for the telegraph line.

On the above-mentioned beach 500 feet southward of the sandy point is the Government timber jetty now building. Off the sandy point lies a number of detached rocky patches known as "the reef." The reef runs in a $\text{E. by N. } \frac{1}{2} \text{ N.}$ direction from the point, its outer end being 1,850 feet distant on that bearing. All the patches showing were outside the low-water line, which was clean sand, and extended 850 feet out from the point. The width of the reef is from 200 to 300 feet. Only four of the patches show at high water. The outer patch is $\text{N.W. by W. } \frac{1}{4} \text{ W.}$, 1,300 feet from the western end of Muttonbird Island.

From the sandy point the coast trends N. by W. 2,000 feet to the south entrance point of Coff's Harbour Creek, which is a low sandy point with some patches of soft rock, sometimes showing through the sand in the vicinity. From this point the north entrance point bears N.E. distant 1,000 feet. The intervening space is all sea-sand, mostly awash at high water, through which the creek runs to the sea, but at high-water springs, with a good sea on, it becomes a mass of breakers rolling into the creek. The channel through the banks at the entrance is always shifting, and is generally about 100 feet wide at high water, and 40 feet at low water, it is then under a foot deep outside the point, and easily fordable.

There is a rocky islet, very similar in appearance to the South-east Islet, but somewhat smaller, east 1,400 feet from the north entrance of Coff's Harbour Creek. The green mound in its centre is 35 feet above low water. A sand-spit, dry at low-water springs, extends from the north entrance of the creek towards North Islet, a distance of 1,200 feet, leaving only a narrow passage between its extreme and the islet, fordable in fine weather at low-water springs.

Northward from the creek the sandy shore trends N. by W. as far as surveyed.

Soundings.—The Coff's Harbour beach on both sides of the jetty is very flat, the low-water edge being over 600 feet outside the terrace in the bight, and from 1,000 to 1,200 feet outside off the points. The 3-fathom line is about 1,200 feet off high-water line, except between the reef and the west end of Muttonbird Island, where a ridge of sand about 500 feet broad extends across, the ruling depth on which is 16 feet at low water. The 5-fathom line from about 600 feet east of South Island trends across the bay to the west end of Muttonbird Island, and round that island only 200 or 300 feet off shore along the south and N.E. sides of the island. At the bay on the north side it is 500 feet off shore, and from thence trends parallel to the coast a distance of about 2,300 feet. It passes 500 feet east of North Islet.

The 10-fathom line passes about 400 feet east of South-east Islet, and 1,500 feet east of Muttonbird Island, and then continues on in a $\text{N. by W. } \frac{1}{2} \text{ W.}$ direction to the northern limit of the survey.

As a rule the soundings increase regularly from the shore out to the 10-fathom line, over a sea-sand bottom, except in the vicinity of the reef and islands, but out in the deep water, and to the northward of Muttonbird Island, the depths become irregular, and I have reason to think there is a rock covered by a thin coating of sand over a considerable area.

There is a dangerous rocky patch, its shoalest knob having only 15 feet of water over it, E. by N. 2,500 feet from North Islet. This patch, which is 700 feet in extent inside the 5-fathom line, breaks heavily when there is much swell on. The whole of the South-east Islet open of the low rocky extreme of Muttonbird Island, bearing $\text{S. by E. } \frac{1}{2} \text{ E.}$, just clears to the eastward of this patch.

There is a large rocky patch outside the 10-fathom line. The least water we obtained on it was 41 feet. This is E.N.E. , 2,600 feet from the east point of Muttonbird Island; it breaks dangerously in an easterly or south-east gale. North-east of South-east Islet there is much rocky, uneven ground, but it gradually deepens from the islet in that direction. The submerged reef, extending westward from South-east Islet, has already been mentioned. In fine weather it does not show except at low water, when the shoalest spot, which is $\text{N.W. by W. } \frac{1}{2} \text{ W.}$, 800 feet from the islet, breaks at times.

In an ordinary strong south or south-east breeze the sea soon becomes very confused in the channel between South-east Islet and the South Island, and breaks with great force against the south side of Muttonbird Island, whence it is reflected towards the south corner of Coff's Harbour Beach, and in any bad weather there is more surf there than on the more exposed beach nearer the reef and jetty. During a really heavy southerly or south-easterly swell, which has not been uncommon during the years 1890-1, the effect of the sea recoiling from the south side of Muttonbird Island has been to cause heavy breakers over the whole space between the two islands, which then come straight in and break in about 24 feet of water, and turn Coff's Harbour into a seething mass of foam. Anyone who has seen the space south of Muttonbird Island during a S.E. gale could never recommend it as a safe anchorage.

The best anchorage during southerly weather is from 2 to 3 cables north of the west point of Muttonbird Island, in from 5 to 6 fathoms of water for a sailing-vessel. For steamers midway between the reef and island, with the east end of South Island just shut in by the west point of Muttonbird Island, in 5 fathoms.

Jetty.—During strong N.E. winds I have seen several vessels anchor for shelter south of the west point of Muttonbird Island about 1 cable in 29 or 30 feet of water.

With a heavy swell no vessel will be able to lie alongside the jetty, as the sea will then break right out to the proposed end in 18 feet at low water. At present the jetty is finished out to about 12 feet at low water. When complete it will be 1,640 feet in total length and 20 feet broad. Running out E. by S. from the beach, it will be end on to the rollers. At low-water springs the sand dries out for 700 feet of the jetty's length. The 1-fathom line is 900 feet, and the 2-fathom line 1,200 feet out. When finished the jetty will be provided with sheds, cranes, and moorings on each side. A $3\frac{1}{2}$ -feet gauge tramway is to run the entire length.

There is a good road now formed (Oct. 1891) between the jetty and the main north road. The forest has been cleared away for 2 chains on the north side of this road for the telegraph line, so that it dries up quickly after rain. It is $\frac{1}{2}$ a chain wide, and 1.75 miles long from the inner end of jetty to the main road. It passes mostly through forest land. There are three shallow cuttings through red clay hills. The clay is said to be good pottery clay. It passes also through some very rotten ground, and having no metal on it the timber trollies have already cut it up in places. The road makes from the jetty for the southern bend of Coff's Harbour Creek, a small arm of which it crosses below high-water springs. Thence it passes along the south side of the old cemetery, and through the town of Brelford, along High-street to the main road. It is eventually to be carried on to the Orara River, a distance of 8 miles from the main road. At the Orara I hear there is a considerable quantity of maize in small lots awaiting cartage to the jetty.

Coff's Harbour Creek, the entrance to which has already been described, runs first s.w. $\frac{1}{2}$ s. 1,700 feet, and then s. $\frac{1}{4}$ w. 2,400 feet to the narrows. The creek in these two reaches is about 600 feet wide, but most of the space between the banks is occupied by extensive sand-banks, covered at high water only, through which the creek runs in a narrow, ever-shifting channel at low water. Near the entrance the low-water channel is generally along the northern bank, and at the time of our survey there was a rapid over a shingly and rocky bottom, with a fall of about 6 inches at low water. The creek at first ran out over the sand in the direction of North Islet, but before we finished the survey, had shifted southward so far that at low water the channel was amongst the rocky ground north of the reef. I am told that this creek is never entirely closed. The lowest level of water surface we obtained above the rapid was 18 inches above the low-water datum.

At the narrows the creek is 130 feet wide, the channel being across from bank to bank, and 4 to 5 feet deep. The creek then forms a bight and bends round w.n.w. and n.w. for 2,600 feet, with an average width of 150 feet. The deepest water is on the s.e. side, the n.w. side being fronted with mangroves, extending nearly 200 feet back to the high-water bank. At the upper end of the n.w. reach is a small bluff on the s.e. side, and here the creek touches the township of Brelsford, this bluff being at the end of Rookwood-street. Above this the creek opens out into a somewhat wider reach, trending n. by e. 2,200 feet, the average width being 200 feet. There is a large mangrove flat immediately north of the bluff. At the head of the n. by e. reach the creek turns n.n.w. for 2,000 feet, and then bends round sharp to the southward. A small branch keeps the n.n.w. direction for a short distance, but soon becomes blocked with snags, and divides into several smaller arms not navigable. The main creek keeps its southerly direction for 2,400 feet, getting gradually narrower until at the upper end of the reach it is only 75 feet wide. The depth along this reach is from 2 to 5 feet, and it is clear of fallen timber, except near the upper end, where there is also a rocky patch in the centre, the apex of which is dry at low water. The west bank of this reach gradually rises to the upper end, where it turns abruptly to the westward. A short distance above this turn the main creek receives the waters of Carroll's Creek on the south side.

Carroll's Creek, though wide at the mouth, has not more than 1 foot of water at low tide, as far as it is navigable, which is to the northern side of Coff-street, a distance of 800 feet from the entrance. The low-water channel here is not more than 25 feet wide, and above is full of fallen timber. The creek soon divides into several arms, dry at low water, acting as drains to the township, a large portion of which is a swamp in wet weather. The head of the longest branch of Carroll's Creek is about 3,000 feet from its mouth.

The south side of the main creek above Carroll's Creek has long been used as a shipping place for cedar and other timber, which at one time was floated down the creek and rafted out through the surf at the entrance. Above this shipping place the creek forms a sharp point and doubles back to the s.e.; it then becomes very winding up to the bridge across the main road, above which it was not surveyed. The creek is full of fallen timber for 1,200 feet below the bridge, where an immense tree forms a natural foot-bridge, and prevents further navigation. The creek is 4 feet deep and 60 feet broad at this obstruction. The whole distance from the entrance to the bridge, following the course of the creek, is $3\frac{1}{2}$ miles. The bottom in the upper reaches is mostly shingle, with mud, in small patches, and, in the lower reaches, sand. There is not much tidal stream after half-ebb till half-flood, when the stream runs in fast as the tide rises. During spring tides, with a heavy sea outside, the last of the flood comes up the lower reaches in surges with such force that a boat has difficulty in stemming the stream. This is felt as high as the southern bight, where the creek narrows. The banks of Coff's Harbour Creek are thickly wooded, and numbers of large trees overhang the water at all angles; as these come down they are likely to block the navigation of the creek.

The township of Brelsford is laid out east of the main road and extends to Coff's Harbour Creek as its eastern boundary, with an average breadth of 4,000 feet north and south. The largest portion of this area is a swamp in wet weather. The southern end of the township extends over the dividing ridge into the County of Raleigh. Only five sections appear to have been pegged out for sale, and the only two houses in the township are at either end of section No. 22, the post and telegraph office being at the northern end. The innkeeper, butcher, blacksmith, &c., live outside the township, on the western side of the main road, where there is also a steam saw-mill which supplies the jetty works with plank.

All the available land round Coff's Harbour appears to have been selected, but little of it has been cleared and less cultivated. The only signs of cultivation are a few patches of sugar-cane seen from the road to the northward of the bridge over the creek. The nearest sugar-mill is "Hermann's," once "Small's," about 4 miles further along the road, where a considerable area is either cultivated or has been prepared for cultivation. This place is known as "Korora."

The county boundary line between Fitzroy and Raleigh starts from the headland, and going at once over the summit of a densely wooded hill 200 feet above low water, follows the crest of the ridge west of it up into the high range about "Tucker's Nob."

When the jetty was commenced the track to the beach was through the township and under water, so all the timber was brought to the jetty along the boundary line, and most of the pegs were knocked out. The old track to the headland led straight down the face of the thickly wooded high hill before-mentioned, and was very steep and stony.

The currents round the coast at Coff's Harbour are very sluggish in light winds. I have known a dead tree to remain floating about between the islands for four days in nearly the same position. During strong winds the set along the beach is to the northward, and the strongest current we observed was just outside the islands, where the float went north nearly $\frac{3}{4}$ miles per hour, at the same time, well outside the 10-fathom line, the set was to the southward.

If Coff's Harbour could be made a safe shipping port, it would be likely to become of some importance as it would have the trade of the Upper Orara River, that of the Bellinger River, and also that of the newly opened country at the Don Dorigo River. Unfortunately, Muttonbird Island stands in the way; it does not shelter the beach but assists to throw a heavier sea on it. The people of Coff's Harbour have an idea that a rubble stone breakwater could easily be thrown across from the outer point of one island to the outer point of the other, and a land locked harbour be made at once at small expense. The distance across is about 3,000 feet on a bearing of n.n.e. $\frac{1}{4}$ e., which is nearly at right angles with the heaviest sea which rolls in on the coast. Fully 2,000 feet of this length is in from 35 to 40 feet of water. A break-water of rubble stone quarried from the trap rock of South Island, 20 feet wide on top and 20 feet above
high

high water would cost about £150,000 and shelter an area of 135 acres of over 18 feet of water. The great objections to this would be the danger of silting up, and the small depth of water over the entrance left open, only 16 feet. During some seasons it blows from the N.E. nearly every day right through the summer, and it is reasonable to suppose that a quantity of sand would accumulate in the bay; the small opening between South Island and the headland would soon sand up and afterwards the whole bay would gradually decrease in depth. That great changes take place in the depth of Coff's Harbour may be seen from the jetty, where in some places the June gale scoured out the sand fully 5 feet.

In the parish maps supplied to me, and dated 6th December, 1887, is shown a large sand-island, midway between the end of the reef and west end of South Island, this is 10 chains in extent north and south, and 5 chains east and west, and is in a position where there are now from 24 to 27 feet at low water. None of the present inhabitants of Coff's Harbour admit the existence of such an island, but the coast-line of these Lands Office plans is never up to date, and there may have been a sand-island there forty or fifty years back, and in that case there may be one in future years.

I think it would be a better plan should it ever be thought feasible to build a breakwater between the islands, to leave an opening south of Muttonbird Island, by running out 3,000 feet in a N.E. $\frac{1}{4}$ E. direction leaving a navigable channel 1,000 feet wide between its end and Muttonbird Island over 7 fathoms deep. The only sea which could come in would be from the east, and would expand to such an extent inside as not to be dangerous. By having this opening the harbour would be open to vessels of any draught. Although this breakwater would be the same length as that joining the islands the greater depth of water would make it more expensive, and I calculate the cost at £170,000. It would considerably increase the area of deep water protected.

My own idea of a harbour of refuge at Coff's Harbour, is to run a breakwater north from the N.E. point of Muttonbird Island, and let the sea run in between the islands and expand itself there. A breakwater running out N. 1° E. (true) 4,000 feet from the N.E. point of the island in a slight curve (rad. 5,600 feet) convex to seaward would cost about £280,000, and protect a much larger area than any work between the islands. It would give smooth water anchorage over 174 acres of deep water of from 5 to 9 fathoms, and forming as it would a roadstead, would more likely lead to scouring out than silting up. The northern entrance between the end of the work and North Islet would be 2,500 feet wide, and from 5 to 9 fathoms deep. This breakwater would cover the dangerous breaking patch of rocks east of North Islet, and should it be deemed that not enough protection is given from N.E. winds, can be curved round from the neighbourhood of the breaking patch towards North Islet as far as necessary. This breakwater would also make a smooth water entrance for the creek which could then be deepened permanently and become a good inner harbour for coastal trade; the north side of the entrance being further protected by a training-wall between North Islet and the main land a distance of 1,500 feet. I start this breakwater from the N.E. point of Muttonbird Island rather than further out, from having observed how much smoother the sea is off the former point; in ordinary southerly winds it is quite smooth there, and would enable a good start to be made with the work without much danger or fear of damage.

The rock on all the islands here is trap rock and would do very well for a breakwater. Some of the upper strata on Muttonbird Island are soft, but generally the rock is very hard. Specimens have been sent to Sydney.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

PROPOSED JETTY ON THE TUROSS LAKE, AT TURLINJAH.

(REPORT BY S. ALEXANDER, EXAMINER OF PUBLIC WORKS PROPOSALS.)

Ordered by the Legislative Assembly to be printed, 18 January, 1892.

The Examiner of Public Works Proposals to The Under Secretary for Public Works.

Sydney, 12 November, 1891.
THE instructions given to me to report on the proposal to construct a jetty at Turlinjah, on the Tuross Lake, were in consequence of a telegram from Mr. T. Grierson, manager, Bodalla Company (Limited), in which appears the following words:—"Have arranged with steamer call weekly." The information I have obtained on the subject is incorporated with the evidence on the inquiry into the trade and resources of the Moruya District with reference to harbour accommodation generally.

2. On summarising this I find that, though it has not been anybody's business to keep a record of the state of the entrance to the Tuross, the facts ascertainable concerning it being in several instances contradictory as to dates, an opinion as to the extent to which the river and lake can be made use of can very well be formed. The decision as to expenditure being justifiable in connection with it must depend on whether vessels can use this as a port, and whether they can find loading in it.

3. The following extracts from the evidence show some of the contradictions referred to:—Messrs. Halligan and Moriarty report that no vessels have used the Tuross in the four years, from 1881 to 1885, whereas Mr. R. Anderson says that the "Moses Fletcher" traded there regularly prior to 1883 or 1884. Mr. E. Hawdon says that between 1850 and 1860 the entrance was practicable as a ford, but Mr. Smith says that in 1856 he took the "Mary Jane" into the river and was shut in there for seven weeks, but found 10 feet of water in the entrance as soon as it was reopened. Captain Canty, of the s.s. "Trident," stated that, before the floods in June last, the entrance had been closed for seven or eight years, but had been open for twenty years previously; but it appears that the "Emma Pyers," a sailing vessel, had very lately been taken in, but had been shut in for some weeks; and Mr. E. Hawdon says that during his experience he has known the entrance to have been fordable hundreds of times, and absolutely closed with sand three times. Mr. Barton states that across this entrance a route for all kinds of vehicles was in use before the Tuross bridge on the main road was built, and that vessels have used the river, but he has known one to have been shut in for three months.

4. When the Nerrigundah gold-field was in operation in 1860-61 a succession of floods and continued rains kept the entrance open for a length of time, and the river was then regularly in use by sailing vessels for supplies to these parts; and further, it appears that a steamer, the "Union," of about 70 or 80 tons register, made two or more entries with material for Bodalla. A saw-mill also was for some time in operation on the lake, and its outturn was taken away by sailing vessels, but this has long since been closed.

5. The uncertain condition of the entrance is further shown by a project having been at one time under discussion in the district for opening a new channel by cutting through the southern headland, on the assumption that an entrance in this position would remain permanently open.

6. In its present condition the entrance carries a good depth of water in a narrow channel which is maintained by the full state of the Tuross River. This now affords ample scouring power to the ebb tides. The shallows are outside on the bar, which is continually shifting, and on the inner crossing, over which the water is spread to a great width. On this latter place probably 7 feet of water is the maximum that is ever found at the highest tides.

7. The Tuross takes its rise in the main coast ranges at a great distance from its outlet into the sea. Having a course of many miles and draining precipitous country that rises to an elevation of probably 4,000 feet above the sea, the quantity of water carried by its channel during rain must therefore be very considerable. The entrance to the lake at its mouth also admits a very considerable quantity of water by the flood tides. These scouring agencies might be made use of to maintain a channel but for the width of the entrance between the headlands which would necessitate works of great magnitude. There can be no prospect of any such being undertaken, or of success attending any less extensive in character. The conditions must be accepted as they stand.

8. Those conditions undoubtedly preclude the institution of any regular communication. The state of the entrance is entirely dependent upon the amount of water brought down by the river, and the margin of safety is so small that after a continuance of dry weather easterly winds may change the depth in a few hours and shut in any craft that may be in the lake. The traffic can be intermittent only and quite unreliable.

9. As to the amount of traffic that might be carried from the Tuross, experience would seem to show, here as elsewhere, that the lack of a wharf or jetty operates to but a small extent in limiting trade, provided that the waterway for vessels is in existence, admitting them from the sea, and that loading can be provided. It may be taken as certain that so long as steamer carriage can be obtained from Moruya the dairy produce will be carted there in preference to adoption of the uncertain and possibly disastrous route by sailing vessel from the Tuross, and further, that the district from which goods could be brought to Turlinjah do not produce tonnage enough to keep a steamer in work.

10. I estimate that, excepting timber, the produce of the district that could possibly be shipped at Turlinjah would not amount to more than 10 or 12 tons per week, whereas any steamer would require at least 50 tons. (The "Trident" carries 104 tons.)

11. The steamer "Trident" of 72 tons register, was taken into the Tuross, on October 3rd last, *light*. Her draught *loaded* is 7 feet. She is owned by Mr. George Fishburn, who has also lately purchased a scow for use in these inland waters on this coast. The draught of this is considerably less than 7 feet. The steamer traffic now being worked by Mr. Fishburn is in the interests of his contracts for railway sleepers, without which there would be no sufficient inducement to work into the Tuross, and which cannot be expected to supply a permanent source of freight, and there is now no sawmill in the neighbourhood.

12. I conclude, therefore, that the conditions under which traffic can be worked from the Tuross do not justify expenditure of any such sum as has been estimated as the probable cost of providing jetty and store accommodation, but that on the other hand, there being considerable interests on the lake and river to be served by facilities for loading punts, provision of simple and inexpensive loading arrangements should be provided.

13. There are many miles of river and of foreshores of the lake which would be placed in connection with the main road by a jetty at Turlinjah. Though oyster cultivation has been in a depressed condition for some time there was a time when the whole extent of lake foreshore was under lease.

14. As seen in the survey for the site at Turlinjah the bed of the lake is very flat and does not admit of punts being loaded from the dry land. Provision was made in the estimate for a depth of 6 feet of water at the head of the jetty at low-water. If this be reduced to 3 feet, and the jetty be constructed of material from the necessary excavation for a road approach to a width sufficient to allow passage for a trolley, the timber work being restricted to the loading stage only, and the storeshed being omitted altogether, the result would, I am sure, not only meet all the requirements of the case but would satisfy all reasonable people in the district.

STANLEY ALEXANDER,
M. Inst. C.E.

1891.

(SECOND SESSION.)

NEW SOUTH WALES.

PUBLIC WORKS ACT OF 1888.

(RESUMPTION OF LAND IN CONNECTION WITH THE CONSTRUCTION OF FLOOD EMBANKMENTS FOR THE PROTECTION OF THE TOWN OF WEST MAITLAND, PARISH OF MAITLAND, COUNTY OF NORTHUMBERLAND.)

Presented to Parliament, pursuant to Act 51 Vic. No. 37.

NOTIFICATION OF RESUMPTION OF LAND UNDER THE "PUBLIC WORKS ACT OF 1888," 51 VICTORIA No. 37.

NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable VICTOR ALBERT
(L.S.) } GEORGE, EARL OF JERSEY, a Member
of Her Majesty's Most Honourable
Privy Council, Knight Grand Cross
of the Most Distinguished Order of
Saint Michael and Saint George,
JERSEY, } Governor and Commander-in-Chief
Governor. } of the Colony of New South Wales and
its Dependencies.

WHEREAS the Minister for Public Works of the said Colony is desirous of acquiring the land described in the Schedule at the foot hereof, for the purpose of a certain Public Work, that is to say, the construction of flood embankments for the protection of the town of West Maitland, in the said Colony: And whereas it is estimated that the cost of completing such work will not exceed the sum of twenty thousand pounds: And whereas the land described in the said Schedule is in my opinion required for carrying out the said work: Now, therefore, I, VICTOR ALBERT GEORGE, EARL OF JERSEY, the Governor aforesaid, with the advice of the Executive Council, in pursuance of the "Public Works Act of 1888," do hereby direct that the said work shall be carried out under the "Public Works Act of 1888," by the Minister for Public Works aforesaid, who, in respect of the said work, shall be deemed to be the Constructing Authority: And in further pursuance of the said Act, I do hereby direct that the land described in the Schedule hereto shall be acquired and taken for the purpose aforesaid, under the "Lands for Public Purposes Acquisition Act," and I do declare by this notification, to be published in the Government Gazette, and in one or more newspapers published or circulated in the Police District wherein is situated the said land, that the said land described in the said Schedule has been resumed for the public purpose hereinbefore expressed, that is to say, for and in connection with the construction of flood embankments for the protection of the town of West Maitland, in the said Colony, to the intent that upon the publication of this notification in the Gazette, the said land

described in the said Schedule hereto shall forthwith be vested in the said Constructing Authority, on behalf of Her Majesty, for the purposes of the said Public Works Act of 1888, for an estate in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the intent that the legal estate therein, together with all powers incident thereto or conferred by that Act, shall be vested in such Authority as a Trustee: And I declare that the following is the Schedule of land hereinbefore referred to:—

SCHEDULE.

All that piece or parcel of land situate in the parish of Maitland, county of Northumberland, Colony of New South Wales, being part of W. B. Wilkinson's grant of 1,000 acres: Commencing at a point bearing north 31 degrees 21 minutes east, distant 8,664 feet from the south-west corner of said grant; and bounded thence by a line bearing north 1 degree 40 minutes east 1,031½ feet; thence by a line bearing south 68 degrees 21 minutes east 516 feet; thence by a line bearing south 44 degrees 29 minutes east 985½ feet; thence by a line bearing south 44 degrees 34 minutes west 69½ feet; thence by a line bearing north 46 degrees 23 minutes west 834½ feet; thence by a line bearing north 83 degrees 20 minutes west 493½ feet; thence by a line bearing south 1 degree 40 minutes west 680 feet; thence by a line bearing north 88 degrees 20 minutes west 33 feet, to the point of commencement,—containing by admeasurement 5 acres 1 rood and 5·5 perches, and said to be in the possession and occupation of Charles Cummins.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-seventh day of June, in the year of our Lord one thousand eight hundred and ninety-one, and in the fifty-fifth year of Her Majesty's Reign.

By His Excellency's Command,

BRUCE SMITH.

NEW SOUTH WALES.

PUBLIC WORKS ACT OF 1888.

(RESUMPTION OF LAND IN CONNECTION WITH THE CONSTRUCTION OF FLOOD EMBANKMENTS, FOR THE PROTECTION OF THE TOWN OF WEST MAITLAND, PARISH OF MAITLAND, COUNTY OF NORTHUMBERLAND.)

Presented to Parliament, pursuant to Act 51 Vic. No. 37.

NOTIFICATION OF RESUMPTION OF LAND UNDER THE "PUBLIC WORKS ACT OF 1888," 51 VICTORIA No. 37.

NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable VICTOR ALBERT
(L.S.) } GEORGE, EARL OF JERSEY, a Member
of Her Majesty's Most Honourable
Privy Council, Knight Grand Cross
of the Most Distinguished Order of
Saint Michael and Saint George,
Governor and Commander-in-Chief of
the Colony of New South Wales and
its Dependencies.

WHEREAS the Minister for Public Works of the said Colony is desirous of acquiring the land described in the Schedule at the foot hereof for the purpose of a certain Public Work, that is to say, the construction of flood embankments for the protection of the town of West Maitland, in the said Colony: And whereas it is estimated that the cost of completing such work will not exceed the sum of twenty thousand pounds: And whereas the land described in the said Schedule is in my opinion required for carrying out the said work: Now, therefore, I, VICTOR ALBERT GEORGE, EARL OF JERSEY, the Governor aforesaid, with the advice of the Executive Council, in pursuance of the "Public Works Act of 1888," do hereby direct that the said work shall be carried out under the "Public Works Act of 1888," by the Minister for Public Works aforesaid, who, in respect of the said work, shall be deemed to be the Constructing Authority: And in further pursuance of the said Act, I do hereby direct that the land described in the Schedule hereto shall be acquired and taken for the purpose aforesaid, under the "Lands for Public Purposes Acquisition Act," and I do declare by this notification, to be published in the Government Gazette, and in one or more newspapers published or circulated in the Police District wherein is situated the said land, that the said land described in the said Schedule has been resumed for the public purpose hereinbefore expressed, that is to say, for and in connection with the construction of flood embankments for the protection of the town of West Maitland, in the said Colony, to the intent that upon the

publication of this notification in the Gazette, the said land described in the said Schedule hereto shall forthwith be vested in the said Constructing Authority, on behalf of Her Majesty, for the purposes of the said Public Works Act of 1888, for an estate in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the intent that the legal estate therein, together with all powers incident thereto or conferred by that Act, shall be vested in such Authority as a Trustee: And I declare that the following is the Schedule of land hereinbefore referred to:—

SCHEDULE.

All that piece or parcel of land situate in the town of West Maitland, parish of Maitland, county of Northumberland, and Colony of New South Wales, forming part of a grant of 40 acres to Thomas Boardman: Commencing on the south side of Wallis Creek, at the north-west corner of the grant; and bounded thence by part of the western boundary of that grant bearing south 1 chain 3 links; thence by a line bearing south 45 degrees 49 minutes east 10 chains 16½ links; thence by a line bearing south 35 degrees 48 minutes west 79½ links to the northern side of High-street; thence by that street bearing south 54 degrees 12 minutes east 3 chains 99½ links; thence again by High-street bearing north 81 degrees 11 minutes east 50 links to the south side of Wallis Creek; thence by said creek, to the point of commencement,—containing by admeasurement 1 acre 2 roods and 33 perches, and said to be in the possession of G. Parnell and occupation of John Hickling.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-sixth day of May, in the year of our Lord one thousand eight hundred and ninety-one, and in the fifty-fourth year of Her Majesty's Reign.

By His Excellency's Command,

BRUCE SMITH.

NEW SOUTH WALES.

PUBLIC WORKS ACT OF 1888.

[(RESUMPTION OF LAND IN CONNECTION WITH THE RECLAMATION WORKS AT NEUTRAL BAY AND CAREENING COVE, PARISH OF WILLOUGHBY, COUNTY OF CUMBERLAND.)

Presented to Parliament, pursuant to Act 51 Vic. No. 37.

NOTIFICATION OF RESUMPTION OF LAND UNDER
THE "PUBLIC WORKS ACT OF 1888," 51 VICTORIA
No. 37.

NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable VICTOR ALBERT
GEORGE, EARL OF JERSEY, a Member
of Her Majesty's Most Honourable
(L.S.) Privy Council, Knight Grand Cross
of the Most Distinguished Order of
Saint Michael and Saint George,
JERSEY, Governor and Commander-in-Chief
Governor. of the Colony of New South Wales and
its Dependencies.

WHEREAS the lands described in the Schedule at the foot hereof are in my opinion required for the purpose of a certain authorised Public Work, that is to say, the Reclaiming certain low-lying mud flats in the vicinity of Neutral Harbour and Careening Cove, in the said Colony, the estimated cost of which work will not exceed the sum of twenty thousand pounds: Now, therefore, I, VICTOR ALBERT GEORGE, EARL OF JERSEY, the Governor aforesaid, with the advice of the Executive Council, in pursuance of the "Public Works Act of 1888," do hereby direct that the said work shall be carried out under the "Public Works Act of 1888," by the Minister for Public Works aforesaid, who, in respect of the said work, shall be deemed to be the Constructing Authority: And in further pursuance of the said Act, I do hereby direct that the lands described in the Schedule hereto shall be acquired and taken for the purpose aforesaid, under the "Lands for Public Purposes Acquisition Act," and I do declare by this notification, to be published in the Government Gazette and in one or more newspapers published or circulated in the Police District wherein the said lands are situated, that the Crown Lands comprised within the descriptions and boundaries hereinafter in the said Schedule set forth have been appropriated, and the private properties within such boundaries and comprised in such descriptions have been resumed, for the public purpose hereinbefore expressed, that is to say, for and in connection with the reclaiming certain low-lying mud flats in the vicinity of Neutral Harbour and Careening Cove, in the said Colony, to the intent that upon the publication of this notification in the Gazette, the said lands described in the said Schedule hereto shall forthwith be vested in the said Constructing Authority, on behalf of Her Majesty, for the purposes of the said Public Works Act of 1888, for an estate in fee simple in possession, freed and discharged, from all trusts, obligations, estates, interests, contracts, charges, rates, rights-of-way, or

other easements whatsoever; and to the intent that the legal estate therein, together with all powers incident thereto or conferred by that Act, shall be vested in such Authority as a Trustee: And I declare that the following is the Schedule of lands hereinbefore referred to:—

SCHEDULE.

1. All that piece or parcel of land situate at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of a grant of 700 acres to Alfred Thrupp: Commencing at high-water mark, on the northern side of Neutral Harbour, at a point bearing south 2 degrees 32 minutes east $23\frac{5}{8}$ links from the bend in the south-west boundary fence of Mrs. Margaret Thomson's 2 roods, leased from Sir Daniel Cooper,—said point bears north 2 degrees 32 minutes west 17 links from a bend in the building line, as now determined, of Thrupp's Point Road; and bounded thence on part of the east by a line bearing north 2 degrees 32 minutes west $23\frac{5}{8}$ links to the said bend in the said south-west boundary fence of the said 2 roods; thence on part of the north-east by the aforesaid south-west boundary fence bearing north 39 degrees 26 minutes west $147\frac{1}{2}$ links to the north-westerly corner of the 2 roods aforesaid; thence on the remainder of the north-east and the north by lines dividing this 1 rood $6\frac{2}{5}$ perches from the remainder of the said Alfred Thrupp's (now Sir Daniel Cooper's) said 700 acres grant, being lines bearing north 61 degrees 12 minutes west 146 links, north 6 minutes west $207\frac{1}{2}$ links, and south 89 degrees 54 minutes west 58 links to the eastern side of the creek falling into Neutral Harbour; and thence on the south-west by the said eastern side of the said creek and the said high-water mark of Neutral Harbour south-easterly, to the point of commencement,—be the said several dimensions a little more or less, containing 1 rood $6\frac{2}{5}$ perches or thereabouts, and said to be in the possession and occupation of Sir Daniel Cooper.

2. All that piece or parcel of land situated at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of a grant of 700 acres to Alfred Thrupp: Commencing at high-water mark on the northern side of Neutral Harbour, at the most westerly point of its intersection with the southern building line of Thrupp's Point Road; and bounded thence on the north-east by the said building line of the said Thrupp's Point Road, being lines bearing north 87 degrees 28 minutes east $81\frac{1}{2}$ links and south 55 degrees 5 minutes east 14 links to the said high-water mark; and thence by the aforesaid high-water mark south-westerly, westerly, and north-westerly to the point of

commencement,—be the said several dimensions a little more or less, containing $3\frac{3}{10}$ perches or thereabouts, and said to be in the possession and occupation of Sir Daniel Cooper.

3. All that piece or parcel of land situated at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of a grant of 700 acres to Alfred Thrupp: Commencing at high-water mark on the northern side of Neutral Harbour, at a point on the southern building line of Thrupp's Point Road, distant $130\frac{1}{10}$ links, measured along the said building line from the most westerly intersection of the said high-water mark with the aforesaid building line, and which point bears south 55 degrees 5 minutes east 49 links from a bend in the aforesaid building line; and bounded thence on the north-east by the aforesaid building line bearing south 55 degrees 5 minutes east 98 links to the aforesaid high-water mark; and thence on the south and south-west by the aforesaid high-water mark bearing westerly and north-westerly, to the point of commencement,—be the said several dimensions a little more or less, containing $1\frac{3}{10}$ perches or thereabouts, and said to be in the possession and occupation of Sir Daniel Cooper.

4. All that piece or parcel of land situated at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of a grant of 700 acres to Alfred Thrupp: Commencing at high-water mark on the northern side of Neutral Harbour, at a point on the southern building line of Thrupp's Point Road, distant $252\frac{7}{10}$ links, measured along the said building line, from the most westerly intersection of the said high-water mark with the aforesaid building line, and which point bears south 55 degrees 5 minutes east 171 links from a bend in the aforesaid building line; and bounded thence on the north-east by the aforesaid building line bearing south 55 degrees 5 minutes east 125 links to the aforesaid high-water mark; and thence on the south-west by the aforesaid high-water mark bearing north-westerly, to the point of commencement,—be the said several dimensions a little more or less, containing $1\frac{7}{10}$ perches or thereabouts, and said to be in the possession and occupation of Sir Daniel Cooper.

5. All that piece or parcel of land situated at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of a grant of 700 acres to Alfred Thrupp: Commencing at high-water mark on the northern side of Neutral Harbour, at a point on the southern building line of Thrupp's Point Road, distant 442 links, measured along the said building line, from the most westerly intersection of the said high-water mark with the aforesaid building line, and which point bears south 55 degrees 5 minutes east $360\frac{9}{10}$ links from an angle in the aforesaid building line; and bounded thence on the north-east by the aforesaid building line, being lines bearing south 55 degrees 5 minutes east 64 links, south 32 degrees 39 minutes east $310\frac{9}{10}$ links, and south 76 degrees 6 minutes east 151 links to the aforesaid high-water mark; and thence on the south-west by the aforesaid high-water mark bearing north-westerly, to the point of commencement,—be the said several dimensions a little more or less, containing $21\frac{8}{10}$ perches or thereabouts, and said to be in the possession and occupation of Sir Daniel Cooper.

6. All that piece or parcel of land situated at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of a grant of 700 acres to Alfred Thrupp: Commencing at high-water mark on the northern side of Neutral Harbour, at a point on the southern building line of Thrupp's Point Road, distant $1,028\frac{7}{10}$ links, measured along the said building line, from the most westerly intersection of the said high-water mark with the aforesaid building line, and which point bears south 76 degrees 6 minutes east 212 links from an angle in the aforesaid building line; and bounded thence on the north-east by the aforesaid building line bearing south 76 degrees 6 minutes east 49 links to the aforesaid high-water mark; and thence on the south-west by the aforesaid high-water mark bearing north-westerly, to the point of commencement,—be the said several dimensions a little more or less, containing $\frac{7}{10}$ of a perch or thereabouts, and said to be in the possession and occupation of Sir Daniel Cooper.

7. All that piece or parcel of land situated at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of a grant of 700 acres to Alfred Thrupp: Commencing at high-water mark on the northern side of Neutral Harbour, at a point on the southern building line of Thrupp's Point Road, distant $1,243\frac{1}{10}$ links, measured along the said building line, from the most westerly intersection of the said high-water mark with the aforesaid building line, and which point bears south 76 degrees 6 minutes east $426\frac{1}{2}$ links from an angle in the aforesaid building line; and bounded thence on the north-east by the aforesaid building line, being lines bearing south 76 degrees 6 minutes east 29 links, south 31 degrees 54 minutes east $36\frac{7}{10}$ links to the most northerly corner of J. J. Spruson's 5 perches, leased from Sir Daniel Cooper; thence on the south-east by the north-western boundary of that lease bearing south 31 degrees west 16 links to the aforesaid high-water mark; and thence on the south-west by that high-water mark bearing

north-westerly, to the point of commencement,—be the said several dimensions a little more or less, containing $1\frac{7}{10}$ perches or thereabouts, and said to be in the possession and occupation of Sir Daniel Cooper.

8. All that piece or parcel of land situated at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of a grant of 700 acres to Alfred Thrupp: Commencing on the southern boundary of Thrupp's Point Road, at a point distant westerly 556.4 links, measured along the said southern boundary of the said Thrupp's Point Road, from its intersection with the western boundary of Ben Boyd Road; and bounded thence on the south-east by the north-western boundary of R. G. Ennerver's lease of 20 perches bearing south 31 degrees west 50 links to high-water mark; thence on the west by high-water mark bearing northerly to the northern boundary of J. Spruson's lease of 5 perches; thence on the north-west by that boundary bearing north 31 degrees east 16 links to the southern boundary of the aforesaid Thrupp's Point Road; and thence on the north-east by that boundary bearing south 31 degrees 54 minutes east 100 links, to the point of commencement,—be the said several dimensions a little more or less, containing 5 perches, or thereabouts, and said to be in the possession of Sir Daniel Cooper and occupation of Joseph John Spruson.

9. All that piece or parcel of land, situated at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of lot 12, section 15, of a subdivision of a grant of 20 acres to John Crane Parker: Commencing on the northern boundary of William-street at its intersection with the south-western boundary of the 100 feet reservation from high-water mark in the said grant; and bounded thence on the south by part of the northern boundary of the said William-street bearing westerly 11 links; thence on the south-west by other part of the said lot 12 by a line bearing north-westerly 38 links to the aforesaid reservation line; and thence on the north-east by that reservation line bearing south-easterly 45 links, to the point of commencement,—be the said several dimensions a little more or less, containing $\frac{7}{10}$ of a perch or thereabouts, and said to be in the possession and occupation of Montague Younger.

10. All that piece or parcel of land, situated at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of lot 13 of section 14 of a subdivision of a grant of 20 acres to John C. Parker: Commencing on the southern boundary of William-street, at its intersection with the western boundary of a lane; and bounded thence on the east by part of the western boundary of the said lane, separating the said lot 13 from lots 14, 15, and 16, bearing southerly $16\frac{8}{10}$ links; thence on the south-west by other part of the said lot 13 bearing north-westerly 23 links; thence on the west by other part of lot 13 aforesaid by a line bearing northerly 2 links to the southern boundary of the said William-street; and thence on the north by that boundary bearing easterly 20 links, to the point of commencement,—be the said several dimensions a little more or less, containing $\frac{1}{2}$ perch or thereabouts, and said to be in the possession and occupation of Thomas Kavanagh.

11. All that piece or parcel of land situated at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of lot 14 of section 14 of a subdivision of a grant of 20 acres to John Crane Parker: Commencing on the eastern boundary of a lane separating lots 14, 15, and 16 of section 14 from lot 13 of section 14 of the aforesaid subdivision, at its intersection with the south-western boundary of the 100 feet reservation from high-water mark in the said grant; and bounded thence on the north-east by the said reservation line bearing south-easterly to the northern boundary of lot 15 of the said section 14; thence on the south by that boundary bearing westerly 22 links; thence on the south-west by other part of the said lot 14 by a line bearing north westerly 37 links to the eastern boundary of the aforesaid lane; and thence on the west by part of the eastern boundary of the lane aforesaid bearing northerly 25 links, to the point of commencement,—be the said several dimensions a little more or less, containing $1\frac{1}{2}$ perch or thereabouts, owner unknown.

12. All that piece or parcel of land situated at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of lot 15 of section 14 of a subdivision of a grant of 20 acres to John Crane Parker: Commencing on the south-western boundary of the 100 feet reservation from high-water mark in the said grant, at its intersection with the southern boundary of lot 14 section 14 of the aforesaid subdivision; and bounded thence on the north-east by the said reservation line bearing south-easterly to its intersection with the northern boundary of lot 16 section 14; thence on the south by part of that boundary bearing westerly 16 links; thence on the south-west by other part of the said lot 15 by a line bearing north-westerly 83 links to the southern boundary of lot 14 aforesaid; and thence on the north by part of that boundary bearing easterly 22 links, to the point of commencement,—be the said several dimensions, a little more or less, containing $1\frac{1}{2}$ perch or thereabouts, owner unknown.

13. All that piece or parcel of land situated at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of lot 16 of section 14 of a subdivision of a grant of 20 acres to John Crane Parker: Commencing on the south-western boundary of the 100 feet reservation from high-water mark in the said grant, at its intersection with the southern boundary of lot 15 section 14 of the said subdivision; and bounded thence on the north-east by the said reservation line bearing south-easterly to its intersection with the northern boundary of section 13; thence on the south by part of that boundary bearing westerly 13 links; thence on the south-west by other part of the said lot 16 by a line bearing north-westerly 75 links to the southern boundary of the said lot 15; and thence on the north by part of that boundary bearing easterly 16 links, to the point of commencement,—be the said several dimensions a little more or less, containing $1\frac{1}{4}$ perch or thereabout, owner unknown

14. All that piece or parcel of land situated at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of section 13 of a subdivision of a grant of 20 acres to John Crane Parker: Commencing on the south-western boundary of the 100 feet reservation from high-water mark in the said grant, at its intersection with the southern boundary of lot 16, section 14, of the aforesaid subdivision; and bounded thence on the north-east by the said reservation line bearing south-easterly to its intersection with the northern boundary of section 12 of the aforesaid subdivision; thence on the south by part of that boundary bearing westerly 85 links; thence on the west and south-west by other part of the said section 13 by lines bearing northerly 42·8 links and north-westerly 143·1 links respectively to the southern boundary of lot 16 aforesaid; and thence on the north by part of that boundary bearing easterly, to the point of commencement,—be the said several dimensions, a little more or less, containing 9 perches or thereabouts, and said to be in the possession and occupation of Lewin Wiles.

15. All that piece or parcel of land situate at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of sections 11 and 12 of a subdivision of a grant of 20 acres to John Crane Parker: Commencing at the intersection of the southern boundary of section 13 of the aforesaid subdivision with the south-western boundary of the 100 feet reservation from high-water mark in the aforesaid grant; and bounded thence on the north by the aforesaid southern boundary of section 13 bearing south 88 degrees 42 minutes west 85 links; on the south-west by other part of the aforesaid grant by a line bearing south 19 degrees 58 minutes east 2 chains 23 links to the southern boundary of the aforesaid grant; on the south by that boundary bearing north 89 degrees 54 minutes east 6 links to the aforesaid reservation of 100 feet from high-water mark; and on the east by that reservation bearing northerly and north-westerly, to the point of commencement,—be the said several dimensions a little more or less, containing 18 perches or thereabouts, and said to be in the possession and occupation of John F. Loxton.

16. All that piece or parcel of land situate at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of section 11 of a subdivision at Neutral Harbour: Commencing at the intersection of the southern boundary of a grant of 20 acres to John Crane Parker with the high-water mark on the western side of Neutral Harbour; and bounded thence towards the east by that high-water mark, bearing southerly to the boundary line dividing the aforesaid section 11 from section 10 belonging to B. C. Rodd; thence on the south by that boundary bearing south 89 degrees 25 minutes west 83 links; on the south-west by other part of section 11 aforesaid by a line bearing north 19 degrees 58 minutes west $67\frac{1}{10}$ links; and on the north by the southern boundary of the aforesaid grant bearing north 89 degrees 54 minutes east 99 links, to the point of commencement,—be the said several dimensions a little more or less, containing $9\frac{1}{2}$ perches or thereabouts, and said to be in the possession and occupation of John F. Loxton.

17. All that piece or parcel of land situate at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of section 10 of a subdivision at Neutral Harbour: Commencing at the intersection of the high-water mark on the western side of Neutral Harbour with the boundary line dividing section 10 aforesaid from section 11 belonging to John F. Loxton; and bounded thence on the east by the aforesaid high-water mark bearing southerly to the southern boundary of section No. 10 aforesaid; on the south by that boundary bearing north 88 degrees 35 minutes west 70 links; on the south-west by other part of section 10 aforesaid by a line bearing north 19 degrees 58 minutes west 1 chain $43\frac{7}{10}$ links to the aforesaid boundary line dividing sections 10 and 11; thence on the north by that boundary bearing north 89 degrees 25 minutes east 83 links, to the point of commencement,—be the said several dimensions a little more or less, containing $15\frac{1}{2}$ perches or thereabouts, and said to be in the possession and occupation of Brent Clement Rodd.

18. All that piece or parcel of land situate at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of 3 acres 1 rood and $29\frac{3}{4}$ perches, comprised within a grant of 4 acres to Edward Weller: Commencing at the intersection of the northern boundary of the aforesaid grant with the mean high-water mark on the southern side of Neutral Harbour; and bounded thence on the east by that mean high-water mark bearing generally southerly; on the south-west by other part of the aforesaid grant by lines bearing north 51 degrees 9 minutes west 1 chain 3 links, and north 19 degrees 58 minutes west $11\frac{9}{10}$ links to the northern boundary of the aforesaid grant; on the north by that boundary bearing south 88 degrees 35 minutes east 57 links, to the point of commencement,—be the said several dimensions a little more or less, containing 4 perches or thereabouts, and said to be in the possession and occupation of Sydney Burdekin.

19. All that piece or parcel of land situate at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of 3 acres 1 rood and $29\frac{3}{4}$ perches, comprised within a grant of 4 acres to Edward Weller: Commencing at the intersection of the mean high water-mark, on the southern side of Neutral Harbour with the boundary line dividing the aforesaid 3 acres 1 rood and $29\frac{3}{4}$ perches from Henry Deane's 1 acre 3 roods, part of the aforesaid grant; and bounded thence on the south by that boundary line bearing south 69 degrees 51 minutes west 60 links; on the west and south-west by lines bearing north 15 degrees 46 minutes west $74\frac{9}{10}$ links, and north 51 degrees 9 minutes west 62 links to the aforesaid mean high water-mark, and towards the north-east by that boundary bearing generally south-easterly, to the point of commencement,—be the said several dimensions a little more or less, containing $8\frac{1}{2}$ perches or thereabouts, and said to be in the possession and occupation of Sydney Burdekin.

20. All that piece or parcel of land situate at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of 1 acre and 3 roods, comprised within a grant of 4 acres to Edward Weller: Commencing at the intersection of the northern boundary of the said 1 acre and 3 roods with the mean high water-mark of the southern side of Neutral Harbour; and bounded thence towards the east by that mean high water-mark bearing generally south-easterly to the boundary line dividing the said 1 acre and 3 roods from 1 acre 1 rood and 23 perches owned by Lucinda Jane Loxton, comprised within the said grant; on the south by that boundary bearing south 68 degrees 29 minutes west 1 chain 29 links; on the west by other part of the said 1 acre 3 roods by a line bearing north 15 degrees 46 minutes west 1 chain $86\frac{2}{10}$ links to the aforesaid northern boundary of the 1 acre 3 roods; and on the north by that boundary bearing north 69 degrees 51 minutes east 60 links, to the point of commencement,—be the said several dimensions a little more or less, containing $31\frac{1}{2}$ perches or thereabouts, and said to be in the possession and occupation of Henry Deane.

21. All that piece or parcel of land situate at Neutral Harbour, North Sydney, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of Lucinda Jane Loxton's 1 acre 1 rood and 23 perches, comprised within a grant of 4 acres to Edward Weller: Commencing at the intersection of the boundary line dividing the aforesaid 1 acre 1 rood and 23 perches from Henry Deane's 1 acre 3 roods with the mean high water-mark of the southern side of Neutral Harbour; and bounded thence towards the east by that mean high water-mark bearing southerly to the north-western boundary of a grant of 3 acres 3 roods and 30 perches to How & Mitchell; on the south-east by that boundary bearing south 57 degrees 33 minutes west 1 chain 39 links, towards the west by lines bearing northerly $37\frac{1}{10}$ links, and north 15 degrees 46 minutes west 1 chain $28\frac{7}{10}$ links to the aforesaid boundary line dividing the 1 acre 1 rood and 23 perches from the 1 acre 3 roods, and towards the north-west by that boundary bearing north 68 degrees 29 minutes east 1 chain 29 links, to the point of commencement,—be the said several dimensions a little more or less, containing $32\frac{1}{2}$ perches or thereabouts, and said to be in the possession and occupation of Lucinda Jane Loxton.

22. All that piece or parcel of land situate at Careening Cove, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of allotment 17 of a subdivision of Henry Donnison's grant of 8 acres 2 roods and 5 perches, portion 3: Commencing on the south-western boundary of High-street, at the north-eastern corner of the said allotment; and bounded thence on the south-east by the north-western boundary of allotment 18 passing partly along part of the north-western side of a stone wall bearing south 19 degrees 41 minutes west 90 links to the north-eastern boundary of the reservation of 100 feet from high-water mark in the aforesaid grant; on the south-west by that boundary bearing north-westerly to a point thereon distant rectangulary $30\frac{2}{10}$ links from the aforesaid north-western side of the stone wall; on the north-west by other part of allotment 17 aforesaid by a line bearing north 19 degrees 41 minutes east 91 links to the aforesaid building line of High-street; and on the north-east by that line bearing south 69 degrees 54 minutes east $80\frac{2}{10}$

links, to the point of commencement,—be the said several dimensions a little more or less, containing $4\frac{1}{2}$ perches or thereabouts, and said to be in the possession and occupation of Sydney Burdekin.

23. All that piece or parcel of land situate at Careening Cove, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of a grant of 2 roods 12 perches to Edward Lord, registered in the Land Titles Office, Sydney, volume 61 folio 63: Commencing at the south-western corner of that grant; and bounded thence on the north-west by its north-western boundary bearing north-easterly 70 links to the original high-water mark of the northern side of Careening Cove; on the north by that original high-water mark bearing easterly 63 links; on the north-east by a line bearing south-easterly 90 links to the southern boundary of the aforesaid grant; and on the south by that boundary bearing westerly 1 chain 26 links, to the point of commencement,—be the said several dimensions a little more or less, containing $10\frac{1}{2}$ perches or thereabouts, and said to be in the possession and occupation of the executors of the late Edward Lord.

24. All that piece or parcel of land situate at Careening Cove, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of a grant of 2 roods 19 perches to William Williams, registered in the Land Titles Office, Sydney, volume 38 folio 138: Commencing at the south-eastern corner of that grant; and bounded thence on the south-east by part of its south-eastern boundary bearing north-easterly 18 links; on the north-east by other part of the said grant by a line bearing north 77 degrees 45 minutes west 3 chains $96\frac{2}{3}$ links to the north-western boundary of the said grant; on the north-west by part of that boundary bearing south-westerly 61 links to the original high-water mark of the northern side of Careening Cove; and on the south by that original high-water mark bearing generally easterly, to the point of commencement,—be the said several dimensions a little more or less, containing $15\frac{1}{2}$ perches or thereabouts, and said to be in the possession and occupation of Frederick H. Underwood.

25. All that piece or parcel of land situate at Careening Cove, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being the whole of the land comprised in a grant from the Crown of $14\frac{1}{2}$ perches, registered in the Land Titles Office, Sydney, volume 38, folio 137, and said to be in the possession and occupation of Fred. H. Underwood.

26. All that piece or parcel of land situate in the parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of a grant of 2 acres and 1 rood, and of a grant of 1 acre and 38 perches to James Milson, registered in the Land Titles Office, Sydney, volume 38, folio 178, and volume 28, folio 70, respectively: Commencing at the southernmost corner of allotment 14 of section 7 of Milson's Estate belonging to Denis Fether; and bounded thence on the north-west by the south-eastern boundary of that land bearing north 28 degrees 57 minutes east $94\frac{2}{3}$ links; on the south-west by the north-eastern boundary of the said allotment bearing north-westerly 66 links to the south-eastern boundary of Water-street; again on the north-west by that boundary bearing north-easterly 12 links; on the north-east by part of the north-eastern boundary of the 1 acre and 38 perches aforesaid, being lines bearing south 39 degrees 41 minutes east 3 chains 40 links and south 59 degrees 11 minutes east 6 chains 40 links; on the south-east by other part of the said 1 acre and 38 perches by a line bearing south-westerly 90 links; again on the north-east by other parts of the said two grants by a line bearing south 30 degrees 10 minutes east 2 chains 60 links to the northern boundary of Willoughby-street; on the south by that boundary bearing north 88 degrees 32 minutes west $88\frac{2}{3}$ links; again on the south-west by other part of the 2 acres 1 rood aforesaid by a line bearing north 30 degrees 10 minutes west 2 chains; on the remainder of the south-west by the production south-easterly of the south-western side of M'Dougall-street being a line bearing north 54 degrees 31 minutes west 8

chains 67 links; and on the remainder of the north-west by the south-eastern termination of M'Dougall-street aforesaid, being a line bearing north 28 degrees 57 minutes east $76\frac{1}{2}$ links, to the point of commencement,—be the said several dimensions a little more or less, containing 1 acre 1 rood and $29\frac{1}{2}$ perches or thereabouts, and said to be in the possession and occupation of John Milson.

27. All that piece or parcel of land situate at Careening Cove, parish of Willoughby, county of Cumberland, and Colony of New South Wales, being allotment 14 of section 7 on a plan deposited in the Land Titles Office, Sydney, numbered 1,923 comprised in certificate of title registered in the Land Titles Office, Sydney, volume 846, folio 217, containing 11 perches or thereabouts, and said to be in possession and occupation of Denis Fether.

28. All that piece or parcel of land situate in the parish of Willoughby, county of Cumberland, and Colony of New South Wales, being part of a grant of 3 acres 3 roods and 30 perches to How & Mitchell: Commencing on the south-western boundary of that grant, at the north-western corner of allotment 14 of a subdivision of a grant of 3 acres and 10 perches to Thomas Barker; and bounded thence towards the east by 6 chains 76 links of a concave curve of 8 chains 25 links radius, whose chord bears north-easterly 6 chains 55 links to a point on the north-western boundary of the aforesaid grant of 3 acres 3 roods and 30 perches (which point bears south 57 degrees 33 minutes west and is distant $33\frac{6}{10}$ links from the intersection of that boundary with the mean high water-mark on the southern side of Neutral Harbour); on the north-west by the said north-western boundary of grant bearing south 57 degrees 33 minutes west 1 chain $5\frac{4}{10}$ links to its intersection with a convex curve of 7 chains 25 links radius parallel to and distant 1 chain from the first-mentioned curve, towards the west by 5 chains 63 links of the said convex curve, whose chord bears south-westerly 5 chains 45 links to the aforesaid south-western boundary of How & Mitchell's grant of 3 acres 3 roods and 30 perches; thence by that boundary bearing south 56 degrees 19 minutes east 1 chain, to the point of commencement,—be the said several dimensions a little more or less, containing 2 roods and 19 perches, and said to be in the possession and occupation of Lucinda Jane Loxton.

29. All that piece or parcel of land situate in the parish of Willoughby, county of Cumberland, and Colony of New South Wales, being allotment 13 and part of allotment 12 of a subdivision of a grant of 3 acres and 10 perches to Thomas Barker: Commencing on the north-eastern boundary of High-street, at a point bearing north-westerly and distant 2 chains $27\frac{2}{3}$ links from its junction with the north-western boundary of Water-street the said point being the southernmost corner of allotment 13 aforesaid; and bounded thence on the south-east by the north-western boundary of allotment 14 of the aforesaid subdivision bearing north 32 degrees 51 minutes east 3 chains $3\frac{2}{3}$ links to the north-eastern boundary of the aforesaid grant; on the north-east by that boundary bearing north 56 degrees 19 minutes west 1 chain; on the north-west by the remainder of allotment 12 aforesaid by a line bearing south 32 degrees 51 minutes west 3 chains $5\frac{2}{3}$ links to the aforesaid north-eastern boundary of High-street; and on the south-west by that boundary bearing south 58 degrees 13 minutes east 1 chain, to the point of commencement,—be the said several dimensions a little more or less, containing 1 rood and $11\frac{1}{2}$ perches or thereabouts, and said to be in the possession and occupation of John F. Loxton.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed at Government House, Sydney, this thirtieth day of June, in the year of our Lord one thousand eight hundred and ninety-one, and in the fifty-fifth year of Her Majesty's Reign.

By His Excellency's Command,
BRUCE SMITH.

GOD SAVE THE QUEEN!

(SECOND SESSION.)

NEW SOUTH WALES.

PUBLIC WORKS ACT OF 1888.

(RESUMPTION OF LAND IN CONNECTION WITH CERTAIN WORKS OF HARBOUR IMPROVEMENTS, INCLUDING SHIPPING FACILITIES AT NEWCASTLE, PARISH OF NEWCASTLE, COUNTY OF NORTHUMBERLAND.)

Presented to Parliament, pursuant to Act 51 Vic. No. 37.

NOTIFICATION OF RESUMPTION OF LAND UNDER THE "PUBLIC WORKS ACT OF 1888," 51 VICTORIA No. 37.

NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable VICTOR ALBERT
GEORGE, EARL OF JERSEY, a Member
of Her Majesty's Most Honourable
(L.S.) } Privy Council, Knight Grand Cross
of the Most Distinguished Order of
JERSEY, } Saint Michael and Saint George,
Governor and Commander-in-Chief of
the Colony of New South Wales and
its Dependencies.

WHEREAS by an Act of the Parliament of the said Colony 52 Victoria No. 19, intitled the "Newcastle Harbour Improvement Act of 1889," it is enacted that the Public Work more particularly described in the Schedule thereto should be carried out by the Secretary for Public Works or the Member of the Executive Council for the time being charged with the duties of the said Minister, and such Minister or Member should, for the purposes of that Act and the "Public Works Act of 1888," be deemed and taken to be the Constructing Authority authorised to enter into contracts and to exercise all powers, do all acts and things, and be responsible in respect of all obligations and liabilities which could be done or incurred by a Constructing Authority under or pursuant to that Act or the said Public Works Act, so far as might be necessary for the carrying out of the work thereby sanctioned: And whereas the land described in the Schedule hereto is required for the purpose of carrying out and constructing the Public Work authorised to be carried out under the said Act 52 Victoria No. 19, that is to say, "Certain Works of Harbour Improvements including Shipping Facilities at Newcastle": Now, therefore, I, VICTOR ALBERT GEORGE, EARL OF JERSEY, the Governor aforesaid, with the advice of the Executive Council, in pursuance of the provisions of the said "Public Works Act of 1888," do hereby direct that the lands described in the Schedule hereto, which, in my opinion are required for the said authorised work, shall be acquired and taken under the "Lands for Public Purposes Acquisition Act," and I do declare by this notification, to be published in the Government Gazette and in one or more newspapers published or circulated in the Police District wherein the said lands are situated, that the lands described in the Schedule hereto have, so far as the same are Crown Lands, been appropriated, and so far as the same are private property, been resumed, for the public purpose hereinbefore expressed, that is to say "Certain Works of Harbour Improvements including Shipping Facilities at Newcastle," to the intent that upon the publication of this notification in the Gazette, the lands described in the said Schedule hereto shall forthwith be vested in the said Minister as the Constructing Authority, on behalf of Her Majesty, for the purposes of the said Act, for an estate in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, con-

tracts, charges, rates, rights-of-way, or other easements whatsoever; and to the intent that the legal estate therein, together with all powers incident thereto so conferred by that Act, shall be vested in such Authority as a trustee: And I declare that the following is the Schedule of lands hereinbefore referred to:—

SCHEDULE.

1st. All that piece or parcel of land situate in the parish of Newcastle, county of Northumberland, Colony of New South Wales, being allotment No. 1 of section 17 of the Government township of Onebygamba: Commencing at the eastern corner of the section; and bounded thence on the north-east by Gipps-street bearing north 27 degrees 35 minutes west 2 chains 1.1 link; on the north-west by the south-western boundary of allotment No. 2 bearing south 62 degrees 30 minutes west 2 chains 50½ links; on the south-west by a lane bearing south 27 degrees 35 minutes east 2 chains 1.1 link to Smart-street; thence on the south-east by that street bearing north 62 degrees 30 minutes east 2 chains 50½ links, to point of commencement,—containing by admeasurement 2 roods 0.6 perch, and said to be in the possession and occupation of James and Alexander Brown.

2nd. All that piece or parcel of land situate in the parish of Newcastle, county of Northumberland, and Colony of New South Wales, being allotment No. 2 of section 17 of the Government township of Onebygamba: Commencing on the south-western side of Gipps-street at the northern corner of allotment No. 1; and bounded thence on the north-east by that street north 27 degrees 35 minutes west 2 chains 1.1 link; on the north-west by the south-eastern boundary line of allotment No. 3 south 62 degrees 30 minutes west 2 chains 50½ links to a lane; on the south-west by that lane south 27 degrees 35 minutes east 2 chains 1.1 link to the western corner of allotment No. 1; on the south-east by the north-western boundary line of allotment No. 1 north 62 degrees 30 minutes east 2 chains 50½ links, to the point of commencement,—containing by admeasurement 2 roods 0.6 perch, and said to be in the possession and occupation of James and Alexander Brown.

3rd. All that piece or parcel of land situate in the parish of Newcastle, county of Northumberland, Colony of New South Wales, being allotment No. 3 of section 17 of the Government township of Onebygamba: Commencing on the south-western side of Gipps-street at the northern corner of allotment 2; and bounded thence on the north-east by that street bearing north 27 degrees 35 minutes west 2 chains 1.1 link; on the north-west by the south-eastern boundary of allotment No. 4 bearing south 62 degrees 30 minutes west 2 chains 50½ links to a lane; thence on the south-west by that lane bearing south 27 degrees 35 minutes east 2 chains 1.1 link; thence by the north-western boundary line of allotment No. 2 bearing north 62 degrees 30 minutes east 2 chains 50½ links, to the point of commencement,—containing by admeasurement 2 roods 0.6 perch, and said to be in the possession and occupation of James Russell.

4.h. All that piece or parcel of land situate in the parish of Newcastle, county of Northumberland, and Colony of New South Wales, being allotment No. 5 of section 17 in the Government township of Onebygamba: Commencing at the northern corner of the section; and bounded thence by Darvall-street bearing south 62 degrees 30 minutes west 2 chains 50½ links to a lane; thence by that lane bearing south 27 degrees 35 minutes east 2 chains 1·1 link; thence by the north-western boundary of allotment No. 4 bearing north 62 degrees 30 minutes east 2 chains 50½ links to Gipps-street; thence by Gipps-street bearing north 27 degrees 35 minutes west 2 chains 1·1 link, to the point of commencement,—containing by admeasurement 2 roods 0·6 perch, and said to be in the possession of John W. Hay and occupation of J. W. Scott.

5th. All that piece or parcel of land situate in the parish of Newcastle, county of Northumberland, and Colony of New South Wales, being part of allotment No. 1 of section 24 in the Government township of Onebygamba: Commencing at the eastern corner of the section; and bounded thence by Gipps-street bearing north 27 degrees 30 minutes west 2 chains to the eastern corner of allotment No. 2; thence by a line bearing south 7 degrees 2 minutes east 2 chains 13½ links to Darvall-street; thence by that street bearing north 62 degrees 0 minutes east 74 $\frac{9}{10}$ links, to the point of commencement,—containing by admeasurement 12 perches, and said to be in the possession and occupation of J. Brown.

6th. All that piece or parcel of land situate in the parish of Newcastle, county of Northumberland, and Colony of New South Wales, being part of allotment No. 8 of section 17 in the Government township of Onebygamba: Commencing at the eastern corner of allotment 7, on the western side of a lane parallel with Young-street; and bounded thence by the south-eastern boundary of allotment 7 bearing south 62 degrees 30 minutes west $\frac{9}{10}$ of a link; thence by a line bearing south 7 degrees 2 minutes east 2 chains 14 $\frac{7}{10}$ links; thence by the north-western boundary of allotment No. 9 bearing north 62 degrees 30 minutes east 76 links; thence by said lane bearing north 27 degrees 35 minutes west 2 chains 1·1 link, to the point of commencement,—containing by admeasurement 12·32 perches, and said to be in the possession and occupation of Henry Fieldhouse.

7th. All that piece or parcel of land situate in the parish of Newcastle, county of Northumberland, and Colony of New South Wales, being part of allotment No. 9 of section 17 of the Government township of Onebygamba: Commencing at the northern corner of allotment No. 10; and bounded by a lane parallel to Gipps-street bearing north 27 degrees 35 minutes west 2 chains 1·1 link; thence by part of the south-eastern boundary line of allotment No. 8 bearing south 62 degrees 30 minutes west 76 links; thence by a line bearing south 7 degrees 2 minutes east 2 chains 14 $\frac{7}{10}$ links; thence by part of the north-western boundary line of allotment No. 10 bearing north 62 degrees 30 minutes east 1 chain 51·4 links, to the point of commencement,—containing by admeasurement 36·58 perches, and said to be in the possession and occupation of A. Murdock.

8th. All that piece or parcel of land situate in the parish of Newcastle, county of Northumberland, and Colony of New South Wales, being allotment No. 10 of section 17 in the Government township of Onebygamba: Commencing at the southern corner of the section; and bounded on the south-east by Smart-street bearing north 62 degrees 30 minutes east 2 chains 52·4 links to a lane; thence on the north-east by that lane bearing north 27 degrees 35 minutes west 2 chains 1·1 link; thence on the north-west by the south-eastern boundary line of allotment No. 9 bearing south 62 degrees 30 minutes west 2 chains 52·4 links to Young-street; thence by that street bearing south 27 degrees 35 minutes east 2 chains 1·1 link, to the point of commencement,—containing by admeasurement 2 roods 1·21 perch, and said to be in the possession and occupation of George M. Naughton.

Given under my Hand and the Seal of the said Colony, at Government House, Sydney, this twenty-second day of June, in the year of our Lord one thousand eight hundred and ninety-one, and in the fifty-fifth year of Her Majesty's Reign.

By His Excellency's Command,

BRUCE SMITH.

GOD. SAVE THE QUEEN!

1891.

(SECOND SESSION.)

NEW SOUTH WALES.

PUBLIC WORKS ACT OF 1888.

(RESUMPTION OF LAND FOR AND IN CONNECTION WITH RECLAMATION WORKS, AT LONG COVE, PARISH OF PETERSHAM, COUNTY OF CUMBERLAND.)

Presented to Parliament, pursuant to Act 51 Vic. No. 37.

NOTIFICATION OF RESUMPTION OF LAND UNDER
THE "PUBLIC WORKS ACT OF 1888," 51 VICTORIA
No. 37.

NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable VICTOR ALBERT
GEORGE, EARL OF JERSEY, a Member
of Her Majesty's Most Honourable
(L.S.) } Privy Council, Knight Grand Cross
of the Most Distinguished Order of
JERSEY, } Saint Michael and Saint George,
Governor. } Governor and Commander-in-Chief of
the Colony of New South Wales and
its Dependencies.

WHEREAS the lands described in the Schedule at the foot hereof are in my opinion required for the purpose of a certain authorised Public Work, that is to say, the reclaiming certain low-lying mud flats in the vicinity of Long Cove, in the said Colony, the estimated cost of which work will not exceed the sum of twenty thousand pounds: Now therefore, I, VICTOR ALBERT GEORGE, EARL OF JERSEY, the Governor aforesaid, with the advice of the Executive Council, in pursuance of the "Public Works Act of 1888," do hereby direct that the said work shall be carried out under the "Public Works Act of 1888," by the Minister for Public Works aforesaid, who, in respect of the said work, shall be deemed to be the Constructing Authority: And in further pursuance of the said Act, I do hereby direct that the lands described in the Schedule hereto shall be acquired and taken for the purpose aforesaid, under the "Lands for Public Purposes Acquisition Act," and I do declare by this notification, to be published in the Government Gazette and in one or more newspapers published or circulated in the Police District wherein the said lands are situated, that the Crown Lands comprised within the descriptions and boundaries hereinafter in the said Schedule set forth have been appropriated, and the private properties within such boundaries and comprised in such descriptions have been resumed, for the public purpose hereinbefore expressed, that is to say, for and in connection with the reclaiming certain low-lying mud flats in the vicinity of Long Cove, in the said Colony, to the intent that, upon the publication of this notification in the Gazette, the said lands described in the said Schedule hereto shall forthwith be vested in the said Constructing Authority, on behalf of Her Majesty, for the purposes of the said "Public Works Act of 1888," for an estate in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the intent that the legal estate therein, together with all powers incident

thereto or conferred by that Act, shall be vested in such Authority as a Trustee: And I declare that the following is the Schedule of lands hereinbefore referred to:—

SCHEDULE.

1st. All that piece or parcel of land situated in the parish of Petersham, county Cumberland, at Long Cove, being part of lot 20¹ of a subdivision (known as the Dobroyd Estate) of a grant of 430 acres to Nicholas Bayley: Commencing on the northern boundary of Marion-street at a point distant easterly 7 chains 99½ links from its intersection with the north-eastern boundary of Ramsay-street, being the south-eastern corner of lot 17, section D, of a subdivision of the said lot 20¹; and bounded thence on the west by the eastern boundary of lot 17, section D aforesaid, bearing north 14 degrees 40 minutes west 1 chain 83½ links to its intersection with the southern boundary of Edward P. Ramsay's lot 19; thence on the north by part of the said southern boundary of the said Edward P. Ramsay's lot 19 bearing easterly 2 chains 90 links to high-water mark; thence on the east by high-water mark bearing southerly to its intersection with the northern boundary of the said Marion-street; and thence on the south by part of the northern boundary of Marion-street aforesaid bearing westerly 3 chains 60 links, to the point of commencement,—be the said several dimensions a little more or less, and containing 1 rood 9 perches or thereabouts, exclusive of the 100 feet reservation above high-water mark, and said to be in the possession and occupation of Louisa Ramsay.

2nd. All that piece or parcel of land situated in the parish of Petersham, county Cumberland, at Long Cove, being part of lots 18 and 19 of a subdivision (known as the Dobroyd Estate) of a grant of 430 acres to Nicholas Bayley: Commencing on the northern boundary of Louisa Ramsay's lot 20¹ of the said estate, at a point distant easterly 8 chains 9½ links from its intersection with the north-eastern boundary of Ramsay-street, being the north-eastern corner of lot 17, section D, of a subdivision of the said lot 20¹; and bounded thence on the west by other part of lot 19 aforesaid bearing north 14 degrees 40 minutes west 6 chains 2½ links to the southern boundary of the said lot 18; thence on the north-west by other part of lot 18 aforesaid bearing north 6 degrees 53 minutes east 10 chains 42½ links to the southern boundary of lot 17 of the said estate at a point distant easterly 4 chains 27 links from the easternmost corner of lot 20 of the said estate; thence on the north-east by other part of lot 17 aforesaid bearing south-easterly 2 chains 80 links to high-water mark; thence on the east by high-water mark bearing southerly to its intersection with the northern boundary of Louisa Ramsay's lot 20¹ aforesaid; and thence on the south by part of the said northern boundary bearing westerly 2 chains 90 links, to the point of commencement,—be the said several dimensions a little more or less, and containing 1 acre and 27 perches or thereabouts, exclusive of the 100 feet reservation above high-water mark, and said to be in the possession and occupation of Edward P. Ramsay.

3rd. All that piece or parcel of land situated in the parish of Petersham, county Cumberland, at Long Cove, being part of lot 17 of a subdivision (known as the Dobroyd Estate) of a grant of 480 acres to Nicholas Bayley: Commencing on the southern boundary of Waratah-street at a point distant easterly 17 chains from its intersection with the eastern boundary of Dalhousie-street; and bounded thence on the west by other part of the said lot 17 bearing south 2 degrees 11 minutes east 8 chains 45 links, and south 15 degrees 15 minutes west 12 chains 74 links, to the southern boundary of lot 17 aforesaid, at a point distant easterly 4 chains 27 links from the eastern-most corner of lot 20 of the said subdivision; thence on the south-west by part of the north-eastern boundary of lot 18 bearing south-easterly 2 chains 80 links to high-water mark; thence on the east by high-water mark bearing northerly to its intersection with the southern boundary of the said Waratah-street; and thence on the north by part of the southern boundary of Waratah-street aforesaid bearing north-westerly 3 chains 30 links, to the point of commencement,—be the said several dimensions a little more or less, and containing 1 acre 3 roods 34 perches or thereabouts, exclusive of the 100 feet reservation above high-water mark, and said to be in the possession and occupation of John S. Ramsay.

4th. All that piece or parcel of land situated in the parish of Petersham, county Cumberland, at Long Cove, being part of lots 16¹ and 16 of a subdivision (known as the Dobroyd Estate) of a grant of 480 acres to Nicholas Bayley: Commencing on the northern boundary of Waratah-street at a point distant south-easterly 16 chains 89 links from its inter-

section with the production northerly of the eastern boundary of Dalhousie-street; and bounded thence on the north-west by other parts of the said lots 16¹ and 16 bearing respectively north 16 degrees 34 minutes east 7 chains 20 links, north 32 degrees east 4 chains 60 links, north 15 degrees 58 minutes east 4 chains 50 links, north 10 degrees 30 minutes east 10 chains 75 links to a point bearing north 75 degrees 56 minutes west and distant 2 chains 61 $\frac{3}{4}$ links from Trig. Station No. 584; thence north 4 degrees 25 minutes west 5 chains 20 links, and north 59 degrees 45 minutes east 1 chain 50 links, to high-water mark; thence on the north-east and east by high-water mark bearing southerly to its intersection with the northern boundary of the said Waratah-street; and thence on the south by part of the northern boundary of Waratah street aforesaid bearing westerly 2 chains 80 links to the point of commencement,—be the said several dimensions a little more or less, and containing 1 acre 2 roods 11 perches or thereabouts, exclusive of the 100 feet reservation above high-water mark, and said to be in the possession and occupation of David Ramsay.

In witness whereof, I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this fourteenth day of July, in the year of our Lord one thousand eight hundred and ninety-one, and in the fifty-fifth year of Her Majesty's Reign.

By His Excellency's Command,

BRUCE SMITH.

NEW SOUTH WALES.

PUBLIC WORKS ACT OF 1888.

(RESUMPTION OF LAND IN CONNECTION WITH CERTAIN IMPROVEMENTS TO THE ENTRANCE OF THE RICHMOND RIVER, PARISH OF BALLINA, COUNTY OF ROUS.)

Presented to Parliament, pursuant to Act 51 Vic No. 37.

NOTIFICATION OF RESUMPTION OF LAND UNDER THE "PUBLIC WORKS ACT OF 1888," 51 VICTORIA No. 37.

NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable VICTOR ALBERT
GEORGE, EARL OF JERSEY, a Member
(L.S.) } of Her Majesty's Most Honourable
Privy Council, Knight Grand Cross
of the Most Distinguished Order of
JERSEY, } Saint Michael and Saint George,
Governor. } Governor and Commander-in-Chief of
the Colony of New South Wales and
its Dependencies.

WHEREAS by an Act of the Parliament of [the said Colony 54 Victoria No. 9, intituled the "Entrance to Richmond River Improvements Act of 1890," it is enacted that the Public Work more particularly described in the Schedule thereto should be carried out by the Secretary for Public Works or the Member of the Executive Council for the time being charged with the duties of the said Minister, and such Minister or Member should for the purposes of that Act and the "Public Works Act of 1888," be deemed and taken to be the Constructing Authority, authorised to enter into contracts, and to exercise all powers, do all acts and things, and be responsible in respect of all obligations and liabilities which could be done or incurred by a Constructing Authority under or pursuant to that Act or the said Public Works Act so far as might be necessary for the carrying out of the work thereby sanctioned: And whereas the lands described in the Schedule hereto are required for the purpose of carrying out and constructing the Public Work authorised to be carried out under the said Act 54 Victoria No. 9, that is to say, Certain Improvements to the Entrance of the Richmond River as per plans of Sir John Coode: Now therefore, I, VICTOR ALBERT GEORGE, EARL OF JERSEY, the Governor aforesaid, with the advice of the Executive Council, in pursuance of the provisions of the "Public Works Act of 1888," do hereby direct that the lands described in the Schedule hereto which are in my opinion required for the said authorised work shall be acquired by taking the same under the Lands for Public Purposes Acquisition Act as adopted by the "Public Works Act of 1888": And I do declare by this notification to be published in the Government Gazette and in one or more newspapers published or circulating in the Police District wherein the said lands are situated, that the Crown Land comprised within the description set forth in the Schedule hereto has been appropriated and the private property within such descriptions has been resumed for the public purpose aforesaid, to the intent that upon the publication of this notification in the Gazette, the said lands described in the said Schedule hereto shall forthwith be vested in the said Constructing Authority as a corporation sole on behalf of Her Majesty for the purposes of the said "Public Works Act of 1888," for an estate in fee simple in possession, freed and discharged from all trusts,

obligations, estates, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the further intent that the legal estate therein, together with all powers incident thereto or conferred by the said last-mentioned Act, shall be vested in such Constructing Authority as a trustee; and I declare that the following is the Schedule of the lands hereinbefore referred to:—

SCHEDULE.

All that piece or parcel of land situate in the town and parish of Ballina, county of Rous, and Colony of New South Wales, being allotments 2, 3, 4, and 5 of section 12, comprised in Crown grants, registered volume 394, folios 11, 115, 116, and 117: Commencing at the junction of the south boundary of Port-street with the west boundary of Hamilton-street, being the north-east corner of allotment 5 aforesaid; and bounded thence on the north by the aforesaid south boundary of Port-street bearing west 4 chains to the east boundary of allotment 1 of section 12 aforesaid; on the west by that boundary bearing south 4 chains 25 links to high-water mark on the left bank of the Richmond River; on the south-east by that high-water mark bearing generally north-easterly to the aforesaid western boundary of Hamilton-street; and on the east by that boundary bearing north 2 chains 90 links, to the point of commencement,—be the said several dimensions a little more or less, containing 1 acre 1 rood 14 perches or thereabouts, and said to be in the possession and occupation of Thomas Hyndes Green and Thomas Fenwick.

All that piece or parcel of land situated in the town of West Ballina, parish of Ballina, county of Rous, and Colony of New South Wales, being allotment 1, section 1, comprised in certificate of title, registered volume 374, folio 112: Commencing at the junction of the north-western boundary of Norton-street with the south-western boundary of River-street; and bounded thence on the north-east by River-street bearing north-westerly 4 chains to a reserve for wharf; on the north-west by that reserve bearing south-westerly 4 chains 10 links to the high-water mark of the Richmond River; on the south-west by that high-water mark downwards to Norton-street aforesaid; and on the south-east by that street bearing north-easterly 3 chains 60 links, to the point of commencement,—be the said several dimensions a little more or less, containing 1 acre 2 roods 10 perches or thereabouts, and said to be in the possession and occupation of Joseph Bede Kelly.

In witness whereof, I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twentieth day of August, in the year of our Lord one thousand eight hundred and ninety-one, and in the fifty-fifth year of Her Majesty's Reign.

By His Excellency's Command,

BRUCE SMITH.

GOD SAVE THE QUEEN!

(SECOND SESSION.)

NEW SOUTH WALES.

PUBLIC WORKS ACT OF 1888.

(RESUMPTION OF LAND FOR WHARF SITES AT MORTON'S CREEK, HASTINGS RIVER, PARISH OF REDBANK, COUNTY OF MACQUARIE.)

Presented to Parliament, pursuant to Act 51 Vic No. 37.

NOTIFICATION OF RESUMPTION OF LAND UNDER THE "PUBLIC WORKS ACT OF 1888," 51 VICTORIA No. 37.

NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable VICTOR ALBERT
GEORGE, EARL OF JERSEY, a Member
of Her Majesty's Most Honourable
(L.S.) Privy Council, Knight Grand Cross
of the Most Distinguished Order of
JERSEY, } Saint Michael and Saint George,
Governor. } Governor and Commander-in-Chief of
the Colony of New South Wales and
its Dependencies.

WHEREAS I, VICTOR ALBERT GEORGE, EARL OF JERSEY, the Governor aforesaid, with the advice of the Executive Council, have directed that certain Public Work, that is to say, a Wharf at Morton's Creek, Hastings River, in the said Colony, for which public funds are lawfully available, the estimated cost of which does not exceed twenty thousand pounds, shall be carried out under the provisions of the "Public Works Act of 1888," as an authorised work by the Minister for Public Works as Constructing Authority; and that the land described in the Schedule hereto, which is in my opinion required for carrying out the said work, shall be acquired by taking the same under the "Lands for Public Purposes Acquisition Act," as adopted by the "Public Works Act of 1888": Now, therefore, I, the said Governor, with the advice aforesaid, in pursuance of the "Public Works Act of 1888," do declare by this notification, to be published in the Government Gazette, and in one or more newspapers published or circulated in the Police District wherein the said land is situated, that the Crown Land comprised within the description set forth in the Schedule hereto has been appropriated, and the private property within such description has been resumed, for the public purpose aforesaid, to the intent that upon the publication of this notification in the Gazette, the said land described in the said Schedule hereto shall forthwith be vested

in the said Constructing Authority as a corporation sole on behalf of Her Majesty, for the purposes of the said "Public Works Act of 1888," for an estate in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the further intent that the legal estate therein, together with all powers incident thereto or conferred by the said last-mentioned Act, shall be vested in such Constructing Authority as a Trustee; and I declare that the following is the Schedule of land hereinbefore referred to:—

SCHEDULE.

All that piece or parcel of land situate in the parish of Redbank, county of Macquarie, and Colony of New South Wales, being part of T. C. P. Morton's 1 267½ acres: Commencing at the intersection of the eastern side of a road leading from Beechwood to Ennis with the northern side of Morton's Creek; and bounded thence on the north-west by that road bearing north 43 degrees 30 minutes east 193 links, north 1 degree 30 minutes east 717 links, to a peg bearing south 45 degrees 4 minutes west and distant 103 links from a bloodwood tree marked broad-arrow over B; thence on the north by a line bearing east about 650 links to the left bank of the Hastings River; and thence on the south-east and south by that bank and Morton's Creek, to the point of commencement,—containing by admeasurement 4 acres more or less, and said to be in the possession and occupation of M. Kyle.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-second day of October, in the year of our Lord one thousand eight hundred and ninety-one, and in the fifty-fifth year of Her Majesty's Reign.

By His Excellency's Command,

J. H. YOUNG.

GOD SAVE THE QUEEN!

PUBLIC WORKS ACT OF 1888.

(RESUMPTION OF LAND IN CONNECTION WITH A WAY OF ACCESS TO THE LAND RECLAIMED AT SHEA'S CREEK AND COOK'S RIVER, PARISHES OF PETERSHAM, BOTANY, AND ST. GEORGE, COUNTY OF CUMBERLAND.)]

Presented to Parliament, pursuant to Act 51 Vic No. 37.

NOTIFICATION OF RESUMPTION OF LAND UNDER THE "PUBLIC WORKS ACT OF 1888," 51 VICTORIA No. 37.

NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable VICTOR ALBERT

(L.S.)

JERSEY,

Governor.

GEORGE, EARL OF JERSEY, a Member of Her Majesty's Most Honourable Privy Council, Knight Grand Cross of the Most Distinguished Order of Saint Michael and Saint George, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies.

WHEREAS I, VICTOR ALBERT GEORGE, EARL OF JERSEY, the Governor aforesaid, with the advice of the Executive Council, have directed that a certain public work, that is to say, a Way of Access to the land reclaimed at Shea's Creek and Cook's River, in the said Colony, for which public funds are lawfully available, the estimated cost of which does not exceed twenty thousand pounds, shall be carried out under the provisions of the "Public Works Act of 1888," as an authorised work by the Minister for Public Works as Constructing Authority, and that the lands described in the Schedule hereto, which are in my opinion required for carrying out the said work, shall be acquired by taking the same under the "Lands for Public Purposes Acquisition Act," as adopted by the "Public Works Act of 1888": Now therefore, I, the said Governor, with the advice aforesaid, in pursuance of the "Public Works Act of 1888," do declare by this notification, to be published in the Government Gazette and in one or more newspapers published or circulated in the Police District, wherein the said lands are situated, that the Crown Land comprised within the descriptions set forth in the Schedule hereto has been appropriated, and the private property within such descriptions has been resumed, for the public purpose aforesaid, to the intent that upon the publication of this notification in the Gazette, the said lands described in the said Schedule hereto shall forthwith be vested in the said Constructing Authority as a corporation sole on behalf of Her Majesty, for the purposes of the said "Public Works Act of 1888," for an estate in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the further intent that the legal estate therein, together with all powers incident thereto or conferred by the said last-mentioned Act, shall be vested in such

Constructing Authority as a Trustee: And I declare that the following is the Schedule of the lands hereinbefore referred to:—

SCHEDULE.

1. All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being part of section 11 of a subdivision of a grant of 470 acres to Thomas Smyth: Commencing on the south-eastern boundary of the Cook's River Road, at a point distant south-westerly 13 feet 6 inches from its junction with the southern boundary of Bay-street; and bounded thence by a line bearing south 44 degrees 26 minutes east 264 feet 5 inches to the north-western boundary of allotment 9 of section 11 aforesaid; thence by part of that boundary bearing south-westerly 68 feet 9 inches to the high-water mark on the left bank of Cook's River; thence by that boundary upwards to the aforesaid south-eastern boundary of the Cook's River Road; thence by that boundary bearing north 19 degrees 6 minutes east 74 feet 1½ inches, to the point of commencement,—be the said several dimensions a little more or less, containing 1 rood 24 perches or thereabouts, owner and occupier unknown.

2. All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being part of allotments 9 and 10 of section 11 of a subdivision of a grant of 470 acres to Thomas Smyth: Commencing on the north-western boundary of allotment 9 aforesaid, at a point distant 194 feet 5½ inches from its northernmost corner; and bounded thence by a line bearing south 44 degrees 36 minutes east 64 feet 1½ inches to the south-eastern boundary of allotment 10 aforesaid; thence by that boundary bearing south 30 degrees 31 minutes west 69 feet 2½ inches to the high-water mark on the left bank of Cook's River; thence by that boundary upwards to the aforesaid north-western boundary of allotment 9; thence by that boundary bearing north 30 degrees 31 minutes east 68 feet 9 inches, to the point of commencement,—be the said several dimensions a little more or less, containing 15½ perches or thereabouts, and said to be in the possession and occupation of J. W. Flood.

3. All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being part of allotment 11 of section 11 of a subdivision of a grant of 470 acres to Thomas Smyth: Commencing on the north-western boundary of that allotment, at a point distant 174 feet 7¼ inches from its northernmost corner; and bounded thence by a line bearing south 44 degrees 36 minutes east 32 feet and ¾ of an inch to the south-eastern boundary of the said allotment; thence by that boundary bearing south 30 degrees 31 minutes west 69 feet 5 inches to high-water mark on the left

bank of Cook's River; thence by that boundary upwards to the aforesaid north-western boundary of allotment 11; thence by that boundary bearing north 30 degrees 31 minutes east 69 feet 2 $\frac{1}{2}$ inches, to the point of commencement,—be the said several dimensions a little more or less, containing 7 $\frac{3}{10}$ perches or thereabouts, and said to be in the possession and occupation of the Trustees of the estate of the late Henry Osborne.

4. All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being part of allotment 12 of section 11 of a subdivision of a grant of 470 acres to Thomas Smyth: Commencing on the north-western boundary of that allotment, at a point distant 194 feet 8 inches from its northernmost corner; and bounded thence by a line bearing south 44 degrees 35 minutes east 32 feet and $\frac{3}{4}$ of an inch to the south-eastern boundary of the said allotment; thence by that boundary bearing south 30 degrees 31 minutes west 69 feet 7 $\frac{1}{2}$ inches to high-water mark on the left bank of Cook's River; thence by that boundary upwards to the aforesaid north-western boundary of allotment 12; thence by that boundary bearing north 30 degrees 31 minutes east 69 feet 5 inches, to the point of commencement,—be the said several dimensions a little more or less, containing 7 $\frac{3}{10}$ perches or thereabouts, and said to be in the possession and occupation of J. W. Flood.

5. All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being part of allotment 13, section 11 of a subdivision of a grant of 470 acres to Thomas Smyth: Commencing on the north-western boundary of that allotment, at a point distant 194 feet 9 inches from its northernmost corner; and bounded thence by a line bearing south 44 degrees 36 minutes east 32 feet and $\frac{3}{4}$ of an inch to the south-eastern boundary of the said allotment being the north-western boundary of Old-street; thence by that boundary bearing south 30 degrees 31 minutes west 61 feet 11 inches to high-water mark on the left bank of Cook's River; thence by that boundary upwards to the aforesaid north-western boundary of allotment 13; thence by that boundary bearing north 30 degrees 31 minutes east 69 feet 7 $\frac{1}{2}$ inches, to the point of commencement,—be the said several dimensions a little more or less, containing 7 $\frac{3}{10}$ perches or thereabouts, and said to be in the possession and occupation of the Trustees of the estate of the late Henry Osborne.

6. All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being part of allotment 1 of section 10 of a subdivision of a grant of 470 acres to Thomas Smyth: Commencing on the south-eastern boundary of Old-street, at the westernmost corner of that allotment; and bounded thence by Old-street bearing north 30 degrees 31 minutes east 53 feet 3 $\frac{1}{2}$ inches; thence by a line bearing south 23 degrees 1 minute east 38 feet 6 $\frac{1}{2}$ inches to the south-eastern boundary of the said allotment; thence by that boundary bearing south 30 degrees 31 minutes west 106 feet 7 $\frac{1}{4}$ inches to high-water mark on the left bank of Cook's River; thence by that boundary upwards, to the point of commencement,—be the said several dimensions a little more or less, containing 9 $\frac{1}{10}$ perches or thereabouts, and said to be in the possession and occupation of the Trustees of the estate of the late Henry Osborne.

7. All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being part of allotment 2, section 10 of a subdivision of a grant of 470 acres to Thomas Smyth: Commencing on the north-western boundary of the said allotment, at a point distant 191 feet 1 $\frac{1}{2}$ inches from its northernmost corner; and bounded thence by a line bearing south 23 degrees 1 minute east 38 feet 6 $\frac{1}{2}$ inches to the south-eastern boundary of the said allotment; thence by that boundary bearing south 30 degrees 31 minutes west 147 feet and $\frac{1}{2}$ of an inch to high-water mark on the left bank of Cook's River; thence by that boundary upwards to the aforesaid north-western boundary of allotment 2; thence by that boundary bearing north 30 degrees 31 minutes east 106 feet 7 $\frac{1}{4}$ inches, to the point of commencement,—be the said several dimensions a little more or less, containing 14 $\frac{4}{10}$ perches or thereabouts, and said to be in the possession and occupation of J. W. Flood.

8. All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being part of allotment 3, section 10, of a subdivision of a grant of 470 acres to Thomas Smyth: Commencing on the north-western boundary of the said allotment, at a point distant 193 feet and $\frac{1}{2}$ of an inch from its northernmost corner; and bounded thence by a line bearing south 23 degrees 1 minute east 38 feet 6 $\frac{1}{2}$ inches to the south-eastern boundary of the said allotment; thence by that boundary bearing south 30 degrees 31 minutes west 165 feet 8 $\frac{1}{2}$ inches to high-water mark on the left bank of Cook's River; thence by that boundary upwards to the aforesaid north-western boundary of allotment 3; thence by that boundary bearing north 30 degrees 31 minutes east 147 feet and $\frac{1}{2}$ of an inch to the point of commencement,—be the said several dimensions a little more or less, containing 18 $\frac{3}{10}$ perches or thereabouts, and said to be in the possession and occupation of F. J. Dawson.

9. All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being part of allotment 4, section 10 of a subdivision of a grant of 470 acres to Thomas Smyth: Commencing on the north-western boundary of that allotment, at a point distant 196 feet 11 $\frac{1}{2}$ inches from its northernmost corner; and bounded thence by a line bearing south 23 degrees 1 minute east 38 feet 6 $\frac{1}{2}$ inches to the south-eastern boundary of the said allotment; thence by that boundary bearing south 30 degrees 31 minutes west 174 feet 7 $\frac{1}{2}$ inches to high-water mark on the left bank of Cook's River; thence by that boundary upwards to the aforesaid north-western boundary of allotment 4; thence by that boundary bearing north 30 degrees 31 minutes east 165 feet 8 $\frac{1}{2}$ inches to the point of commencement,—be the said several dimensions a little more or less containing 18 $\frac{3}{10}$ perches or thereabouts, and said to be in the possession and occupation of the trustees of the estate of the late Henry Osborne.

10. All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being part of allotment 5, section 10 of a grant of 470 acres to Thomas Smyth: Commencing on the north-western boundary of that allotment, at a point distant 196 feet 10 $\frac{1}{2}$ inches from its northernmost corner; and bounded thence by a line bearing south 23 degrees 1 minute east 38 feet 6 $\frac{1}{2}$ inches to the south-eastern boundary of the said allotment; thence by that boundary bearing south 30 degrees 31 minutes west 179 feet 9 $\frac{1}{2}$ inches to high-water mark, on the left bank of Cook's River; thence by that boundary upwards to the aforesaid north-western boundary of allotment 5; thence by that boundary bearing north 30 degrees 31 minutes east 174 feet 7 $\frac{1}{2}$ inches, to the point of commencement,—be the said several dimensions a little more or less, containing 20 perches or thereabouts, and said to be in the possession and occupation of J. W. Flood.

11. All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being part of allotments 6 and 7, section 10 of a subdivision of a grant of 470 acres to Thomas Smyth: Commencing on the north-western boundary of allotment 6, at a point distant 193 feet 9 $\frac{1}{2}$ inches from its northernmost corner; and bounded thence by a line bearing south 23 degrees 1 minute east 77 feet 1 inch to the south-eastern boundary of the aforesaid allotment 7; thence by that boundary bearing south 30 degrees 31 minutes west 177 feet 9 $\frac{1}{2}$ inches to high-water mark on the left bank of Cook's River; thence by that boundary upwards to the aforesaid north-western boundary of allotment 6; thence by that boundary bearing north 30 degrees 31 minutes east 179 feet 9 $\frac{1}{2}$ inches to the point of commencement,—be the said several dimensions a little more or less, containing 1 rood and 1 perch or thereabouts, and said to be in the possession and occupation of the trustees of the late Henry Osborne.

12. All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being part of allotments 8 and 9, section 10 of a subdivision of a grant of 470 acres to Thomas Smyth: Commencing on the north-western boundary of South-street, at the southernmost corner of allotment 9 aforesaid; and bounded thence by high-water mark on the left bank of Cook's River upwards to the north-western boundary of allotment 8 aforesaid; thence by that boundary bearing north 30 degrees 31 minutes east 177 feet 9 $\frac{1}{2}$ inches; thence by a line bearing south 23 degrees 1 minute east 77 feet 8 inches to the aforesaid north-western boundary of South-street; thence by that boundary bearing south 30 degrees 31 minutes west 110 feet 6 $\frac{1}{2}$ inches to the point of commencement,—be the said several dimensions a little more or less, containing 33 $\frac{1}{10}$ perches or thereabouts, and said to be in the possession and occupation of J. W. Flood.

13. All that piece or parcel of land, situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being part of allotment 16 of a subdivision of a grant of 470 acres to Thomas Smyth: Commencing on the south-eastern boundary of South-street, at a point bearing south 30 degrees 31 minutes west and distant 208 feet 6 inches from its junction with the south-western boundary of Bay-street; and bounded thence by a line bearing south 23 degrees 1 minute east 82 feet and 1 inch to the south-eastern boundary of allotment 16 aforesaid; thence by that boundary bearing south 30 degrees 31 minutes west 86 feet 1 $\frac{1}{4}$ inches to high-water mark, on the left bank of Cook's River; thence by that boundary upwards to the aforesaid south-eastern boundary of South-street; thence by that boundary bearing north 30 degrees 31 minutes east 102 feet 6 inches to the point of commencement,—be the said several dimensions a little more or less, containing 22 $\frac{1}{10}$ perches or thereabouts, and said to be in the possession and occupation of J. W. Flood.

14. All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being part of a grant of 470 acres to Thomas Smyth: Commencing on the south-eastern boundary of allotment 16, at a point distant 3 chains 22 $\frac{1}{2}$ links from its easternmost corner; and bounded thence by lines bearing south 23 degrees 1 minute

east 2 chains 81 links, and south 74 degrees 35 minutes east 2 chains 7 links to the south-eastern boundary of the aforesaid grant; thence by that boundary bearing south 38 degrees 18 minutes west 1 chain 18 links to high-water mark on the left bank of Cook's River; thence by that boundary upwards to the aforesaid south-eastern boundary of allotment 16; thence by that boundary bearing north 30 degrees 31 minutes east 1 chain 30 links, to the point of commencement,—be the said several dimensions a little more or less, containing 1 rood 15 $\frac{1}{2}$ perches or thereabouts, and said to be in the possession and occupation of J. Collins.

15. All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being part of a grant of 39 acres and 23 perches to Patrick and Thomas Maguire: Commencing on the north-western boundary of that grant, at a point distant 16 chains 95 links from its northernmost corner; and bounded thence by a line bearing south 70 degrees 16 minutes west 14 chains 85 links; thence by a concave curve of 25 chains 27 links radius the chord of which bears south 52 degrees 47 minutes west 15 chains 19 links; thence by a line tangent to the said curve bearing south 35 degrees 18 minutes west 6 chains 4 links; thence by a line bearing north 74 degrees 35 minutes west 5 chains 86 links to the north-western boundary of the aforesaid grant; thence by that boundary bearing south 38 degrees 18 minutes west 1 chain 18 links to high-water mark on the left bank of Cook's River; thence by that boundary downwards to the aforesaid north-western boundary of grant; thence by that boundary bearing north 60 degrees 23 minutes west 27 links to the point of commencement,—be the said several dimensions a little more or less, containing 12 acres 1 rood 7 perches or thereabouts, and said to be in the possession and occupation of J. Collins and another.

16. All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being part of a grant of 8 acres 3 roods and 31 perches to Francis Mitchell: Commencing on high water-mark on the right bank of Shea's Creek, at the south-westernmost corner of a recreation reserve of 10 acres; and bounded thence by lines bearing south 11 degrees 23 minutes west 6 chains 96 links and south 29 degrees 25 minutes east 8 chains 64 links to the south-western boundary of the aforesaid grant; thence by that boundary bearing south 60 degrees 28 minutes east 2 chains 80 links to the aforesaid high-water mark; thence by that boundary upwards to the point of commencement,—be the said several dimensions a little more or less, containing 1 acre 1 rood 12 perches or thereabouts, and said to be in the possession and occupation of Arthur John Vause.

17. All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being part of a grant of 4 acres 1 rood and 5 perches to George Talbot: Commencing at the southernmost corner of that grant; and bounded thence by a line bearing north 64 degrees 19 minutes east 9 chains 56 links to the north-eastern boundary of the aforesaid grant; thence by that boundary bearing south 49 degrees 38 minutes east 60 links to the high-water mark on the right bank of Shea's Creek; thence by that boundary downwards, to the point of commencement,—be the said several dimensions a little more or less, containing 3 roods or thereabouts, and said to be in the possession and occupation of George Talbot.

18. All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being part of two grants to Thomas Holt of 8 acres and 15 perches, and 10 acres 3 roods and 7 perches respectively: Commencing at the southernmost corner of the aforesaid grant of 8 acres and 15 perches; and bounded thence by its south-western boundary bearing north 49 degrees 23 minutes west 60 links; thence by a line bearing north 52 degrees 27 minutes east 19 chains 95 links to the eastern corner of the aforesaid grant of 10 acres 3 roods and 7 perches at high-water mark of the right bank of Shea's Creek; thence by that boundary downwards to the point of commencement,—be the said several dimensions a little more or less, containing 1 acre 2 rood 38 $\frac{1}{2}$ perches or thereabouts, and said to be in the possession and occupation of the Holt-Sutherland Estate Company.

19. All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being part of three grants to Thomas Holt of 18 acres and 8 perches, 14 acres and 29 perches, and 4 acres and 1 rood respectively: Commencing at the eastern corner of a grant of 10 acres 3 roods 7 perches to Thomas Holt; and bounded thence by the prolongation of the north-eastern boundary of that grant bearing south 49 degrees 28 minutes east 3 chains 72 links; thence by a convex curve of 29 chains 55 links radius the chord of which bears north 32 degrees 15 $\frac{1}{2}$ minutes east 10 chains 4 $\frac{1}{2}$ links; thence by a tangent to the said curve bearing north 22 degrees 27 minutes east 6 chains 23 links to the south-western boundary of Ricketty-street; thence by that boundary bearing south 46 degrees 58 minutes east 5 chains 40 links and south 69 degrees 43 minutes east 1 chain 10 links to the high-water mark on the right bank of Shea's Creek; thence by that boundary downwards to the point of commencement,—be

the said several dimensions a little more or less, containing 13 acres 1 rood 34 $\frac{1}{2}$ perches or thereabouts, and said to be in the possession and occupation of the Holt-Sutherland Estate Company.

20. All that piece or parcel of land situate in the parish of Botany, county of Cumberland, and Colony of New South Wales, being part of a grant of 12 acres to Thomas Walker: Commencing on the southern boundary of that grant, at a point distant 19 chains 69 links from its south-eastern corner; and bounded thence by a line bearing north 26 degrees 21 minutes east 2 chains 51 links to the southern boundary of Ricketty-street; thence by that boundary bearing north 74 degrees 1 minute west 80 links, and north 69 degrees 43 minutes west to the high-water mark on the left bank of Shea's Creek; thence by that boundary downwards to the aforesaid southern boundary of grant; thence by that boundary bearing south 89 degrees 54 minutes east to the point of commencement,—be the said several dimensions a little more or less, containing 3 roods and 8 perches or thereabouts exclusive of a reserve of 100 feet from high-water mark, and said to be in the possession and occupation of D. Chappelow.

21. All that piece or parcel of land situate in the parish of Botany, county of Cumberland, and Colony of New South Wales, being part of a grant of 13 acres to Edward Flood: Commencing on the southern boundary of that grant, at a point distant 22 chains 32 links from its south-eastern corner; and bounded thence by a line bearing north 26 degrees 21 minutes east 5 chains 96 links to the northern boundary of the said grant; thence by that boundary bearing north 89 degrees 54 minutes west to the high-water mark on the left bank of Shea's Creek; thence by that boundary downward to the aforesaid southern boundary of grant; thence by that boundary bearing south 89 degrees 54 minutes east to the point of commencement,—be the said several dimensions a little more or less, containing 1 acre 3 roods and 22 perches or thereabouts exclusive of a reserve of 100 feet from high-water mark, and said to be in the possession and occupation of the executors of the estate of the late Edward Flood.

22. All that piece or parcel of land situate in the parish of Botany, county of Cumberland, and Colony of New South Wales, being part of a grant of 13 acres to Thomas Walker: Commencing on the northern boundary of that grant, at a point distant 22 chains 32 links from its north-eastern corner; and bounded thence by a curve of 40 chains 65 links radius, the chord of which bears south 28 degrees 16 minutes west 2 chains 70 links to the southern boundary of land said to be in the possession of Robert Middlemass; thence by that boundary bearing north 89 degrees 54 minutes west to the high-water mark on the left bank of Shea's Creek; thence by that boundary upwards to the aforesaid northern boundary of grant; thence by that boundary bearing south 89 degrees 54 minutes east to the point of commencement,—be the said several dimensions a little more or less, containing 2 roods 35 perches or thereabouts exclusive of a reserve of 100 feet from high water-mark, and said to be in the possession and occupation of Robert Middlemass.

23. All that piece or parcel of land situate in the parish of Botany, county of Cumberland, and Colony of New South Wales, being part of a grant of 11 acres and 3 roods to Thomas Harpur: Commencing on the northern boundary of that grant, at a point distant 26 chains 22 links from its north-eastern corner; and bounded thence by a curve of 40 chains 65 links radius, the chord of which bears south 40 degrees 17 minutes west 4 chains 78 links to the southern boundary of the aforesaid grant; thence by that boundary bearing north 89 degrees 54 minutes west to the high-water mark on the left bank of Shea's Creek; thence by that boundary upwards to the aforesaid northern boundary of grant; thence by that boundary bearing south 89 degrees 54 minutes east to the point of commencement,—be the said several dimensions a little more or less, containing 1 acre 19 $\frac{1}{2}$ perches or thereabouts, exclusive of a reserve of 100 feet from high-water mark, and said to be in the possession and occupation of Thomas Tasker.

24. All that piece or parcel of land situate in the parish of Botany, county of Cumberland, and Colony of New South Wales, being part of a grant of 100 acres to Thomas Stubbs: Commencing on the northern boundary of that grant, at a point distant 29 chains 30 links westerly from the south-eastern corner of a grant of 11 acres and 3 roods to Thomas Harpur; and bounded thence by a line bearing south 3 degrees 44 minutes west 18 chains 48 links to the southern boundary of the aforesaid grant of 100 acres, being the northern boundary of rood 1 chain wide; thence by that boundary bearing north 89 degrees 21 minutes west to the high-water mark on the left bank of Shea's Creek; thence by that boundary upwards to the aforesaid northern boundary of the grant of 100 acres; thence by that boundary bearing south 89 degrees 54 minutes east to the point of commencement,—be the said several dimensions a little more or less containing 4 acres 1 rood 24 perches or thereabouts, exclusive of a reserve of 100 feet from high-water mark, and said to be in the possession and occupation of J. Collins and another.

25. All that piece or parcel of land situate in the parish of Botany, county of Cumberland, and Colony of New South Wales, being part of a grant of 46 acres to Thomas Torkington: Commencing on the southern boundary of that grant at the north-western corner of allotment 66 of a subdivision of a grant of 160 acres to Isaac Woodall and Robert Rutledge; and bounded thence by lines bearing north 41 degrees 6 minutes east 9 chains 2 links, north 61 degrees 26 minutes east 5 chains 73 links, and north 33 degrees 52 minutes east 10 chains 28 links to the northern boundary of the aforesaid grant of 46 acres, being the southern boundary of a road 1 chain wide; thence by that boundary bearing north 89 degrees 21 minutes west to the high-water mark of the left bank of the estuary of Shea's Creek; thence by that boundary downwards to the southern boundary of the grant of 46 acres aforesaid; thence by that boundary bearing north 87 degrees 39 minutes east, to the point of commencement,—be the said several dimensions a little more or less, containing 5 acres 2 roods and 5 perches or thereabouts exclusive of a reserve of 100 feet from high-water mark, and said to be in the possession and occupation of Horace Broadbent and Thomas Saywell.

26. All that piece or parcel of land situate in the parish of Botany, county of Cumberland, and Colony of New South Wales, being part of a grant of 160 acres to Isaac Woodall and Robert Rutledge; Commencing at the north-western corner of allotment 66 of a subdivision of that grant; and bounded thence by lines bearing south 20 degrees 56 minutes east 8 chains 94 links south 2 degrees 21 minutes east 13 chains, south 27 degrees 53 minutes west 3 chain 47 links, south 6 degrees 9 minutes west 1 chain 1 link, south 31 degrees 39 minutes west 11 chains 70 links, south 57 degrees 57 minutes east 4 chains 92 links, south 83 degrees 50 minutes east 5 chains 30 links, south 82 degrees 36 minutes east 4 chains 25 links, north 83 degrees 10 minutes east 13 chains 98 links, and south 89 degrees 24 minutes east 13 chains 38 links to an eastern boundary of the aforesaid grant; thence by that boundary bearing south 1 degree 29 minutes west 1 chain to high-water mark of the left bank of Cook's River; thence by that high-water mark being lines bearing respectively north 89 degrees 24 minutes west 13 chains 30 links, south 83 degrees 10 minutes west 14 chains 4 links, north 82 degrees 36 minutes west 4 chains 36 links, north 83 degrees 50 minutes west 5 chains 52 links, north 57 degrees 57 minutes west 5 chains 14 links, north 53 degrees 52 minutes west 3 chains 53 links, north 44 degrees 56 minutes west 5 chains 1 link, north 42 degrees 20 minutes east 4 chains 47 links, north 76 degrees 49 minutes east 5 chains 45 links, north 46 degrees east 5 chains 77 links, north 3 degrees 35 minutes east 11 chains 36 links, and north 32 degrees west 11 chains 93 links to the northern boundary of the aforesaid grant of 160 acres; thence by that boundary bearing north 87 degrees 39 minutes east 4 chains 40 links, to the point of commencement,—be the said several dimensions a little more or less, containing 18 acres 2 roods 20 perches or thereabouts, and said to be in possession and occupation of the trustees of the estate of the late Edward Lord.

27. All that piece or parcel of land situate in the parish of Botany, county of Cumberland, and Colony of New South Wales, being part of a grant of 35 acres 8 roods and 20 perches to Thomas Walker, and of a grant of 30 acres to Andrew Byrne: Commencing at the south-eastern corner of allotment 89 of a subdivision of a grant of 160 acres to Isaac Woodall and Robert Rutledge; and bounded thence by the high-water mark of the left bank of Cook's River, being lines bearing north 73 degrees 33 minutes east 6 chains 17 links, south 85 degrees 34 minutes east 6 chains 75 links, and westerly 10 chains 60 links to the eastern boundary of the aforesaid grant of 30 acres; thence by that boundary bearing north 1 minute west 80 links; thence by lines bearing north 71 degrees 19 minutes west 10 chains 60 links, north 85 degrees 34 minutes west 6 chains 87 links, and south 73 degrees 33 minutes west 6 chains 3 links to the eastern boundary of allotment 89 aforesaid; thence by that boundary bearing south 1 degree 29 minutes west 1 chain 5 links, to the point of commencement,—be the said several dimensions a little more or less, containing 2 acres and 6 perches or thereabouts, and said to be in the possession and occupation of the trustees of the estate of the late Lee Lord.

28. All that piece or parcel of land situate in the parish of Botany, county of Cumberland, and Colony of New South Wales, being part of a grant of 30 acres to Mary Lewin: Commencing at the junction of the western boundary of that grant with the high-water mark of the left bank of Cook's River; and bounded thence by the said boundary of grant bearing north 1 minute west 80 links; thence by a line bearing south 67 degrees 41 minutes east 5 chains 6 links to the western boundary of land resumed for sewer; thence by that boundary bearing south 18 degrees 20 minutes west 70 links to the aforesaid high-water mark; thence by that boundary upwards to the point of commencement,—be the said several dimensions a little more or less, containing 1 rood 12 $\frac{3}{4}$ perches or thereabouts, and said to be in the possession and occupation of Robert Lord.

29. All that piece or parcel of land situate in the parish of St. George, county of Cumberland, and Colony of New South Wales, being part of a grant of 45 acres to Alexander Brodie Spark, and of a grant of 45 acres to John Terry Hughes, and John Hosking: Commencing at the north-eastern corner of land resumed for sewage farm extension by notification in the Government Gazette of July 29th, 1890, the said corner being the intersection of the southern boundary of the aforesaid grant of 45 acres to A. B. Sparke with the high-water mark of the left bank of Muddy Creek; and bounded thence by lines bearing respectively north 35 degrees 39 minutes east 15 chains 9 links, north 20 degrees 30 minutes east 9 chains 38 links, north 11 degrees 48 minutes west 15 chains 15 links, north 81 degree 58 minutes west 6 chains 97 links, and south 14 degrees 7 minutes west 11 chains 45 links; thence by a curve of 10 chains 68 links radius, the chord of which bears south 59 degrees 20 minutes west 15 chains 16 links; thence by a tangent to that curve bearing north 75 degrees 26 minutes west 4 chains 53 links to the south-eastern boundary of Marsh-street; thence by that boundary bearing north 43 degrees 28 minutes east 1 chain 52 links to the high-water mark on the right bank of Cook's River; thence by that boundary and the aforesaid high-water mark of the left bank of Muddy Creek bearing easterly, north-easterly, again easterly, southerly, and south-westerly to the point of commencement,—be the said several dimensions a little more or less, containing 6 acres 3 roods 23 perches and one half of a perch exclusive of a reserve of 100 feet from high-water and said to be in the possession and occupation of Myles M'Rea.

30. All that piece or parcel of land situate in the parish of St. George, county of Cumberland, and Colony of New South Wales, being part of a grant of 100 acres to William Packer: Commencing on the north-western boundary of Marsh-street, at a point bearing north-easterly and distant 41 chains 25 links from its junction with the eastern boundary of West Botany-street; and bounded thence by lines bearing north 75 degrees 26 minutes west 11 chains 10 links, south 46 degrees 48 minutes west 5 chains 67 links, and north 66 degrees 30 minutes west 10 chains 43 links to the south-eastern side of the Rocky Point Road; thence by that boundary bearing north-easterly to high-water mark on the right bank of Cook's River; thence by that boundary downwards to the aforesaid north-western boundary of Marsh-street; thence by that boundary bearing south 43 degrees 28 minutes west 1 chain 57 links, to the point of commencement, be the said several dimensions a little more or less, containing 4 acres and 35 perches or thereabouts, and said to be in the possession and occupation of the representatives of the late John M'Innes.

In testimony whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-ninth day of January, in the year of our Lord one thousand eight hundred and ninety-two, and in the fifty-fifth year of Her Majesty's Reign.

By His Excellency's Command,

WILLIAM JOHN LYNE.

GOD SAVE THE QUEEN!

1891-2.

NEW SOUTH WALES.

PUBLIC WORKS ACT OF 1888.

(RESUMPTION OF LAND IN CONNECTION WITH THE CONSTRUCTION OF FLOOD EMBANKMENTS FOR PROTECTION OF THE TOWN OF EAST MAITLAND, PARISH OF MAITLAND, COUNTY OF NORTHUMBERLAND.)

Presented to Parliament, pursuant to Act 51 Vic. No. 37.

NOTIFICATION OF RESUMPTION OF LAND UNDER THE "PUBLIC WORKS ACT OF 1888," 51 VICTORIA No. 37.

NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable VICTOR ALBERT
GEORGE, EARL OF JERSEY, a Member
of Her Majesty's Most Honourable
(L.S.) Privy Council, Knight Grand Cross
of the Most Distinguished Order of
Saint Michael and Saint George,
JERSEY, Governor and Commander-in-Chief of
Governor. the Colony of New South Wales and
its Dependencies.

WHEREAS I, VICTOR ALBERT GEORGE, EARL OF JERSEY, the Governor aforesaid, with the advice of the Executive Council, have directed that a certain public work, that is to say, the construction of Flood Embankments for the protection of the town of East Maitland, in the said Colony, for which public funds are lawfully available, the estimated cost of which does not exceed twenty thousand pounds, shall be carried out under the provisions of the "Public Works Act of 1888," as an authorised work by the Minister for Public Works as Constructing Authority, and that the land described in the Schedule hereto, which is in my opinion required for carrying out the said work, shall be acquired by taking the same under the "Lands for Public Purposes Acquisition Act," as adopted by the "Public Works Act of 1888": Now, therefore, I, the said Governor, with the advice aforesaid, in pursuance of the "Public Works Act of 1888," do declare by this notification, to be published in the Government Gazette and in one or more newspapers published or circulated in the Police District wherein the said land is situated, that the Crown Land comprised within the description set forth in the Schedule hereto has been appropriated, and the private property within such description has been resumed, for the public purpose aforesaid, to the intent that upon the publication of this notification in the Gazette, the said land described in the said Schedule hereto shall forthwith be vested in the said Constructing Authority as a corporation sole on behalf of Her Majesty for the purposes of the said "Public Works Act of 1888," for an estate in fee simple in possession, freed and discharged from all trusts, obligations, estates,

interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the further intent that the legal estate therein, together with all powers incident thereto or conferred by the said last-mentioned Act, shall be vested in such Constructing Authority as a Trustee; and I declare that the following is the Schedule of land hereinbefore referred to:—

SCHEDULE.

All that piece or parcel of land situate in the parish of Maitland, county of Northumberland, and Colony of New South Wales, being part of J. Smith's original purchase of 140 acres: Commencing at a point on the right bank of Wallis Creek, where the water of the creek intersects the northern side of the Great Northern Road; and bounded thence by the northern side of said road bearing north 79 degrees 4 minutes east 97½ links; thence by lines bearing respectively north 38 degrees 51 minutes west 2 chains 85½ links, north 47 degrees 19 minutes west 2 chains 28½ links, north 45 degrees 32 minutes west 3 chains 67½ links, north 42 degrees 51 minutes west 2 chains 29½ links, north 50 degrees 34 minutes west 2 chains 27½ links, north 49 degrees 57 minutes west 3 chains 3½ links, north 46 degrees 40 minutes west 2 chains 69½ links, north 65 degrees 54 minutes west 4 chains 95½ links to the south-eastern boundary of the Railway Commissioners' land; thence by said boundary bearing south 57 degrees west 2 chains 14½ links to the right bank of Wallis Creek; thence by the waters of the said creek south-easterly to the point of commencement,—containing by admeasurement 2 acres 1 rood 6¾ perches, and said to be in the possession and occupation of the Trustees of the estate of the late J. Smith, and the West Maitland Municipal Council.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this nineteenth day of February, in the year of our Lord one thousand eight hundred and ninety-two, and in the fifty-fifth year of Her Majesty's Reign.

By His Excellency's Command,

WILLIAM JOHN LYNE.

GOD SAVE THE QUEEN!

(SECOND SESSION.)

ALBURY MECHANICS' INSTITUTE ENABLING BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred, on 30th July, 1891, the "*Albury Mechanics' Institute Enabling Bill*,"—beg to report to your Honorable House:—

That they have examined the witness* named in the margin (whose evidence will be found appended hereto); and that the Preamble having been satisfactorily proved to your Committee, they proceeded to consider the several clauses and schedules of the Bill in which it was deemed necessary to make an amendment.

Your Committee now beg to lay before your Honorable House the Bill as amended by them.

J. WILKINSON,
Chairman.

No. 1 Committee Room,
Sydney, 6 August, 1891.

PROCEEDINGS OF THE COMMITTEE.

THURSDAY, 6 AUGUST, 1891.

MEMBERS PRESENT:—

Mr. Barbour,		Mr. Ewing,
Mr. Gormly,		Mr. Gough,
Mr. John Wilkinson.		

Mr. Wilkinson called to the Chair.

Entry from Votes and Proceedings appointing the Committee *read* by the Clerk.

Printed copies of the Bill *referred*, together with original petition to introduce same, before the Committee.

The Chairman having left the Chair,

Mr. Gormly took the Chair *pro tem*.

John Wilkinson, Esq., M.L.A. (*a Member of the Committee*), sworn and examined in his place.

The Chairman resumed the Chair.

Preamble considered.

Question,—“That this Preamble stand part of the Bill,”—put and passed.

Clause 1 read, amended, and agreed to.

Clause 2 read and agreed to.

Clause 3 read and agreed to.

Schedules read and agreed to.

Title read and agreed to.

Chairman to report the Bill with an amendment to the House.

SCHEDULE OF AMENDMENT.

Page 2, clause 1, line 38. *Omit* “four” *insert* “three.”

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

ALBURY MECHANICS' INSTITUTE ENABLING BILL.

THURSDAY, 6 AUGUST, 1891.

Present:—

MR. BARBOUR.
MR. EWING.MR. GORMLY.
MR. GOUGH.

MR. J. WILKINSON IN THE CHAIR.

J. Wilkinson, Esq., sworn and examined, said:—

I am at the present time President of the Albury Mechanics' Institute and School of Arts, and I produce a minute-book showing that at the annual meeting of subscribers, held on 22nd January, 1891, the committee were instructed to take steps to introduce a Bill into Parliament to enable them to borrow money to add to the buildings connected with the institute; and subsequent to that a committee meeting was held on 5th February, 1891, at which the following motion was put and carried:—

That this committee request the trustees to get an Act passed through the Legislature authorising their raising from time to time the sum of £3,000, for building and other purposes, with power to mortgage, such sum to be raised either in one sum, or as it may be wanted, and the committee will pay the necessary funds.

That motion was carried unanimously. Acting upon that motion I have introduced a bill, and a petition has been signed by every one of the trustees, showing that the bill has been introduced at the express desire of the subscribers of the institute, and with the sanction of the committee and the trustees. One matter I would like to mention is that the draft bill gives the sum to be borrowed as £4,000—"with power to borrow £4,000."

1. *Mr. Ewing.*] Not to exceed £4,000? Not to exceed £4,000. The resolution states £3,000. If the committee think necessary they can recommend an amendment.
2. *Mr. Gormly.*] The resolution says £3,000? Yes, and it is a question for the committee whether they will recommend that alteration. I was under the impression that £4,000 was the sum mentioned, and it was only when I got the minute-book that I noticed it was £3,000.
3. Will the committee be justified in going outside the resolution? I think so, for this reason, that the institute committee are not bound to borrow £4,000, but any part of it.
4. *Mr. Gough.*] Would £3,000 be enough? Perhaps it had better be altered to £3,000.
5. I think, for safety sake, I would stick to the £3,000? Very well.
6. *Mr. Barbour.*] Have you proved the preamble of the bill, because that is what you have to do? Yes, I think I have.
7. Your object is to enlarge the buildings, and you desire to pay for their enlargement, and you wish for power to borrow money on mortgage? Yes.
8. To pay the cost of the enlargement? Yes.
9. *Mr. Gough.*] Is the land upon which the building stands a grant from the Crown? Yes; there are two grants referred to in the bill. There is a certificate of title. Part of the land was afterwards resumed by the Government, and we hold a balance certificate, and the balance is practically covered by the building. There is scarcely any yard.
- 10.

- J. Wilkinson,
Esq.
6 Aug., 1891.
10. I suppose the building has, to some extent, been subsidised by the Crown? Yes. I may state that there is a large hall, and a mechanics' institute, and a public theatre, and the committee have already spent nearly £4,000. The object of borrowing this further sum is to pull down the front buildings which were erected over thirty years ago, and which are simply uninhabitable. We want to pull them right down and build a street frontage, enlarging the theatre and the accommodation all round.
11. *Mr. Gormly.*] The position is a very central one? Yes; it is in the main block, between the telegraph office and the post-office.
12. And the buildings proposed to be erected would be productive? Undoubtedly.
13. They would be likely to pay interest and a portion of the principal on the portion of the money raised? Yes, beyond all question. It was remarked by one gentleman at the annual meeting that the returns of the letting of the hall would be equivalent to 10 per cent. on the money spent in erecting. Of course we do not expect to borrow £3,000, but about £2,500.
14. Are you of opinion that a sinking fund could be formed from the rents of buildings which would be likely to pay off this mortgage at some future time? I have no doubt of it whatever. We have already got a sinking fund. We have saved £500 in the last four years, and it is lying in the Bank as the nucleus of this building fund.
15. And the land would be likely to pass out of your hands through this mortgage? I do not see how that could possibly happen, because the mortgage never will at any time represent as much as half the value of the property—that is without the land value. The additions and alterations would represent about one-half the money spent in buildings only.
16. Could you give the Committee some idea as to what the annual income would be likely to be from the rents of the buildings which are now erected and which would be erected? From the present building, which is really the public hall, alone we get about £3 a week. We get £50 for its use during the show week in September, and the average is about £150 per annum.
17. Is it intended that any offices shall be erected in the front? I do not know. There is a provision that plans of buildings have to be submitted to the subscribers for their approval. It may be that, in the plan, provision may be made for shops, but at the present time I do not think there is any intention of doing it.
18. But at the present time there is from the buildings more income received than is likely to be required to pay the interest on the money raised? Yes.
19. *Mr. Gough.*] As your Committee is now placed it is not competent for them to raise a loan? No.
20. I understand that the land was first a grant from the Crown? It is practically a Crown grant now.
21. In the event of your obtaining power to mortgage, and if anything happens, the mortgagees could secure the whole ground? Undoubtedly, if the mortgage is not paid.
22. This is a public grant and the public safety is removed when the mortgage is obtained, and it becomes the same as it would be if it were the private property of trustees? It is hardly that because the trustees are bound by their trust. The terms upon which they hold the land is described. The effect of a mortgage would be that if it were not paid the mortgagee could sell.
23. He could sell the fee-simple? Yes.
24. *Mr. Ewing.*] What is the value of the property you are going to mortgage? The building now standing on the property is worth £3,000.
25. How much is the land worth? About £5,000—it is the pick of the town.
26. So that you would have about £10,000 worth of property, and permission to borrow £3,000? Yes. This bill is really almost a transcript of the Tumut School of Arts Enabling Bill and the Grafton School of Arts Enabling Bill.
27. *Mr. Gormly.*] Another site was procured in Tumut before the Bill was passed? But in the Grafton School of Arts Enabling Bill there is power to mortgage the new site.
28. *Mr. Gough.*] The Young School of Arts passed away from the public with only a debt of £3,500 on a property honestly worth £7,000. The outside subscribers for ever lost their rights? A subscriber to this institute only has rights whilst he remains a subscriber. The main revenue from the hall is derived from professional entertainments. It is situated between Melbourne and Sydney, and hardly a show passes without exhibiting so that there is a certain revenue. It would have been of advantage to the Committee if they had had a statement showing the revenue for two or three years back. I looked at the evidence given in connection with the Grafton School of Arts Enabling Bill, and no evidence of that kind was tendered.
29. *Mr. Ewing.*] As Albury is a growing place I suppose the property in the future will be greater than it is at present? Yes.
30. *Mr. Gormly.*] What is the frontage? It has a frontage to Dean-street, of 1 chain to a reserve, and upon the reserve markets are to be built.
31. What is the frontage worth? From £50 to £100 a foot. Business sites on the other sides have been sold for £50 a foot to my knowledge.
32. *Mr. Gough.*] Is there any debt on the property? Not a penny and there is £500 in the bank.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

AUSTRALIAN BANKING COMPANY OF SYDNEY BILL.

THURSDAY, 13 AUGUST, 1891.

Present:—

MR. STEVENSON, | MR. O'SULLIVAN,
MR. DOWEL.

W. S. DOWEL, Esq., IN THE CHAIR.

Mr. Sydney John Bull called in, sworn, and examined:—

1. *Chairman.*] You are solicitor to the Australian Banking Company of Sydney? Yes.
2. You hand in the ninth report of the company, with a list of shareholders up to date? I do. [*Vide* Appendix A.]
3. Were you present when the report was adopted by the shareholders? Yes.
4. Was it adopted unanimously? It was.

Mr. S. J. Bull.
13 Aug., 1891.

AUSTRALIAN BANKING COMPANY OF SYDNEY BILL.

APPENDIX.

[To the evidence of C. Bull, Esq.]

A.

The ninth report of the Australian Banking Company of Sydney.

(To be presented to the Shareholders at the half-yearly General Meeting, to be held on Monday, 20 July, 1891.)

The Directors have pleasure in reporting another good half-year's business, as will be seen by a perusal of the attached balance-sheet.

The net profit, after deducting expenses of management, stationery, rents, interest due to depositors, rebate on bills current, &c., as per profit and loss account, is £12,802 4s. 7d., which your directors propose to appropriate as follows:—

	£	s.	d.
To dividend at the rate of 10 per cent. per annum...	4,808	19	0
To written off formation expenses at the rate of 20 per cent. per annum as allowed by clause 80 of the Joint Stock Companies Act...	245	2	0
To Reserve Fund (making it now £6,500) ...	2,000	0	0
To Contingency Account ...	3,000	0	0
To Balance carried forward ...	2,748	3	7

The Board, while thanking the shareholders and its many constituents for their past support, trust that no efforts will be spared to advance the progress of the Institution.

It is a matter for regret the late Parliament was closed upon the day our Bill was to have been brought before the House for second reading. Steps will, however, be taken to reintroduce it as soon as possible after Parliament meets.

Branches have been opened at Brisbane and Grafton during the half-year, which give every promise of being successful.

In conclusion, the Directors heartily congratulate all concerned upon the prospects of the Bank.

F. ABIGAIL,
Chairman of the Board of Directors.

BALANCE SHEET to 30th June, 1891. CR.

Liabilities.				Assets.			
	£	s.	d.		£	s.	d.

			2,634 16 7				
„ balance ...			12,802 4 7				
			£18,593 15 1				£18,593 15 1

We have examined the above Balance Sheet, made up to the 30th of June, 1891, and report that we find the balances in the general ledger to conform to such Balance Sheet. We have duly counted the cash and examined the bills on hand and other securities held by the Bank at the head office, on the 30th June, 1891, and certify same to be correct. We further certify that the Balance Sheet is a true and correct view of the Bank's affairs, and that the branch returns as certified by the managers and accountants are correct.

6th July, 1891.

WM. TWIST,
HORACE SALMON, C.A., } Auditors.

1891-2.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

AUSTRALASIAN MINING EXCHANGE OF SYDNEY BILL.

TUESDAY, 23 FEBRUARY, 1892.

Present:—

MR. CARRUTHERS,
MR. EVE,
MR. ROSE,

MR. EDDEN,
MR. O'SULLIVAN,
MR. TONKIN,

MR. FEGAN.

J. H. CARRUTHERS, Esq., IN THE CHAIR.

Edward Percy Simpson, Esq., of Johnson, Minter, Simpson, & Co., appeared as solicitor for the Bill.

William Joyce Hobbs called in, sworn, and examined:—

1. *Chairman.*] Where do you live? In Goulburn.
2. Have you read the Bill before the Committee? Yes.
3. Were you ever a shareholder in the Australasian Mining Exchange Company? Yes.
4. How long since? From the commencement. I was one of its founders.
5. How many shares did you hold? I held 10,000 at first, and sold them out.
6. Do you hold any shares now? No.
7. Have you any interest in the Bill before the Committee? Not any, except that I should like to see it passed.
8. Are you acquainted with the operations of the company from its inception? Yes, I was a director for some time.
9. Up to what time are you acquainted with the operations of the company? Up to the time it stopped work.
10. When did you part with the last of your shares? About fourteen months ago.
11. Are you acquainted with the terms on which the business was purchased from Mr. Samuel Samper? I cannot recollect how many shares he got, but I know that he got a number.
12. For how long were you a director of the company? About twelve months.
13. What was its capital? £100,000 in 100,000 pound shares.
14. Were you a contributing or a paid-up shareholder? Both. I was always buying and selling shares.
15. How much was called up on the contributing shares? 2s. per share I believe.
16. During the period you were a director and shareholder did the company carry on business? Yes, in George-street.
17. What sort of business? Selling shares. There was a "call" every day.
18. How did it make its profits? By commission on sales.
19. Have you any idea whether the company ever did any profitable business? It did when the boom was on—it declared one or two dividends then.

Mr.
W. J. Hobbs.
23 Feb., 1892.

- Mr. W. J. Hobbs.
23 Feb., 1892.
20. And after the mining excitement died out? It did not make much.
21. Were you able to declare a dividend? No; not in my time.
22. Did the company continue to carry on a profitable business? We were losing money for some time when I was on the Board.
23. How long since is it that the business ceased to be profitable? I have been away for twelve months I know that it was losing for a good while before I went. I knew that it would never do anything else I always felt that it would not.
24. Were you a director when the company determined to cease operations? No.
25. Were you a shareholder then? No.
26. Have you had much experience in the share-market? I have; I have been ruined by it.
27. From your experience do you believe that the company could continue to carry on a profitable business? No.
28. You are satisfied that it could not? Yes; we tried hard, we reduced the expenses to their lowest.
29. Do you consider that it would be better in the interest of all concerned to cease operations? Yes. We ought to have done it before we did. It was Mr. Samper, a most energetic man, who inspired us to go on.
30. How much is unpaid on the contributing shares? 18s. per share.
31. Has the company any assets in cash? I think it has about £3,000.
32. Has it any liabilities? There were no liabilities when I left the company beyond a small amount for office rent.
33. Do you consider that if the company were to carry on operations these assets would be fritted away? They would soon go.
34. Do you consider that the assets would be eaten up in expense, or do you think that there would be a sufficient profit to increase the assets? I am sure the assets could not be increased. There is no business doing now. Long before I left the Exchange we saw that prospect ahead. It got a bad name to a certain extent through people buying and selling and then not completing the contracts. This state of things caused the Stock Exchange of New South Wales to be started, and it took away a good many of our members.
35. Are you aware of the scheme of distribution which has been made out by the shareholders? Yes.
36. What is it? It is to divide the assets in the proportion of two-thirds amongst the paid-up shareholders, and the balance of one-third amongst the contributing shareholders. That plan was proposed at one or two meetings when I was on the Board, but we could never come to a decision.
37. Is it a fair scheme, do you think? I think so. I was ready to agree to anything when I was on the Board.
38. If no scheme is agreed upon, are you aware what will take place if the company is liquidated? I do not know exactly.
39. Do you know what shareholders, if any, are standing out against the proposal of the directors? I do not know. I have not had any conversation with them for some time, I have been away.
40. Speaking from the knowledge which you gained as a director, have any of the paid-up shareholders any claim to ask that the contributing shareholders shall pay up the balance of 18s. per share, and that that balance shall be divided between the paid-up shareholders and contributing shareholders? Not that I am aware of. I do not see what claim they can have. I think that two dividends—one of 6d. and another of 4d. per share—were declared during the operations of the company. I recollect Mr. Samper saying that the shareholders had not much to complain about, as they had received back 10d. of the 2s. which they contributed on their shares, and that they had had a lot of business done in the Exchange by which they had either made or lost money. I recollect a very warm debate on this subject, and Mr. Samper who really did all the work for us used that argument, in which I think there was a great deal.
41. *Mr. Tonkin.*] Who originated the idea of the Exchange? Mr. Samper found the brains.
42. What did he get for his brains? I forget whether he received 30,000 or 20,000 shares.
43. Did he get any cash as well as paid-up shares? I do not think so.
44. How much did you give for your paid-up shares? I found a sum of money to start the Exchange.
45. Your shares were bonus shares? Yes.
46. How many paid-up shares did you have? Ten thousand.
47. What money did you find? We found money to fit up the Exchange in George-street.
48. How much did it amount to? One thousand or twelve hundred pounds.
49. Did you find all that money yourself? No; Mr. David Christie and myself went guarantees to the bank for the money.
50. How many shares did Mr. Christie have? I think he had the same number as I had. I think Messrs. M'Dermott and Loughnan got the same number.
51. Were they instrumental in finding the money? They were to have been, but they did not do it; still they got the shares.
52. So that actually 30,000 paid-up shares were given for fitting up the building. Do you know how many shares Mr. Samper received for what he did? I fancy he got 20,000 shares.
53. How many contributing shareholders were there in the company? Fifty thousand.
54. Did they all pay up 2s. a share? Yes.
55. What became of that money? The sum of £3,000 which is left as an asset is a portion of their subscriptions.
56. What became of the rest of the money? Twelve hundred pounds went to the bank to pay off the expense of fitting up the Exchange. At first it was in the hands of Mr. Samper, Mr. Christie, Mr. Loughnan, and myself, and then it was proposed to form a company. There was some talk of a rival company being started, and they got very frightened one day and turned it into a public company.
57. In addition to the calls on the contributing shares were not some tickets issued to gentlemen as members of the Stock Exchange? We all had to pay the annual subscription to entitle us to operate in the Exchange.
58. What did it amount to—will the books of the company show the amount? I think so.
59. To what do you attribute the falling off principally? To the falling off of the mining business, and the operations of the other Exchange.
60. Not to bad management in connection with the transfers and so on? No; that was done very well.

61. Was there not any trouble with persons buying shares and not getting them, and with persons selling shares when they had none to sell? That took place.
62. Do you think that that had a good deal to do with the closing of the Exchange? Something.
63. Do you not know that a large number of persons could not get the shares which they had bought there after paying their deposits? That was one of the great bones of contention. Mr. Samper who was a very easy going man knew every mining man in the Colony. There used to be great disputes as to whether Mr. Brown or Mr. Smith should be permitted to become a member of the Exchange. We generally gave way to Mr. Samper, but at last we adopted the plan of getting a reference from a man's banker, and sometimes the bank declined to give a reference. We were purifying the Exchange when it was too late.
64. You know that a great many members sold shares that they did not have? Yes.
65. It was their membership which gave purchasers a sort of guarantee—they would get their scrip? Yes.
66. *Mr. Rose.*] I understood you to say that you got a certain number of shares for guaranteeing £1,200 to a bank? Yes.
67. And that afterwards the company paid all the money back to the bank? Yes.
68. So that virtually you got your shares for nothing? Yes; but I took the risk. This Exchange was talked about for a month before it was formed. Mr. Samper could get no one to come in and find the money, and then Mr. M'Dermott, Mr. Loughnan, Mr. Christie, and myself took up the thing.
69. Did you lose anything? No; I never lost a penny, except in the Exchange.
70. Did the money subscribed by the contributing shareholders help you to pay off the overdraft of the bank? That went towards it no doubt.

Mr.
W. J. Hobbs.
23 Feb., 1892.

Alfred John Bullock called in, sworn, and examined:—

71. *Mr. Simpson.*] You are the present manager of the Australasian Mining Exchange Company? I am.
72. How many shares are there in the company? 100,000.
73. How many contributing shares? 50,000 paid up to 2s.
74. Have you seen the original prospectus of the company? I have it in my hand.
75. Do you put in a copy of the *Sydney Morning Herald* containing the prospectus of the company? I do. [*Vide Appendix A.*]
76. Under that prospectus do the shareholders get any advantage over the contributing shareholders in the shape of dividend? There is nothing to that effect in the prospectus.
77. Therefore, all dividends would be paid alike? Yes. Three dividends have been paid already.
78. Although the shares of Mr. Samper were paid up to £1 each, you would get exactly the same dividend as a man whose shares were paid up to 2s. each? Undoubtedly.
79. How much did the subscription of 2s. a share yield? £5,000.
80. How much of that sum went for commission? £850, I think, and £147 for legal expenses.
81. Was any other expenditure incurred in connection with the fittings? From £1,000 to £1,200 was spent in altering the premises.
82. What other expenses were defrayed out of that sum? The rent was £72 a week, and there were very heavy salaries to pay. In fact, the whole of the money has gone in salaries and rent.
83. What is the amount in hand now? We have a fixed deposit with the Colonial Finance Company of £1,650, payable in May, but against that amount there is an overdraft of about £200 at the Union Bank. The Union Bank holds the Colonial Finance Company's deposit as security against the overdraft.
84. *Mr. Tonkin.*] You say that the rent was £72 a week;—was there not a great deal of it sublet? There was very little sublet.
85. How much was received from that source? I made a mistake in saying that the rent was £72 a week—it was £22 a week. A sum of £1,129 was received for subletting altogether.
86. How long a period does it cover? About three years.
87. Are you a shareholder in the company? No.
88. How long have you had the position of manager? One month. I superseded Mr. Jones, who is waiting outside to give evidence.

Mr.
A. J. Bullock.
23 Feb., 1892.

John Davey Whitham called in, sworn, and examined:—

89. *Mr. Simpson.*] You are a director of the Australasian Mining Exchange Company of Sydney? Yes.
90. From the inception of the company? No; from about six weeks after it began its operations.
91. You know the history of the Exchange during the last few years? Yes.
92. You know the objects of this Bill? Certainly.
93. An agreement was prepared, under instructions from the company, with the view of bringing about a compromise;—have you seen the agreement before? Yes.
94. Is it not an agreement under which two-thirds of the surplus assets are to go to the paid-up shareholders and a third to the contributing shareholders? Yes.
95. *Chairman.*] What shares on this list does Mr. Hobbs' name represent? Thousands of share have never been transferred. Mr. Samper had 50,000 shares originally. He distributed his shares in different ways to different people, consequently there is no means of knowing who holds his shares.
96. They are part and parcel of the shares mentioned in the schedule? Some of them no doubt are. Mr. Hobbs' shares stand in the name of Thomas Birch in the first schedule to the Bill.
97. *Mr. Simpson.*] Do you recognise these documents as the memorandum and articles of association of the company? Yes.
98. *Mr. Eve.*] What is the expense of the company? The only expense at the present time is the secretary's salary of £1 a week.
99. What salaries were paid when you took office? About eight men were employed in those days, and the salaries ranged from £3 10s. down to 30s. a week.
100. *Mr. Tonkin.*] Has a single contributing shareholder signed this agreement? All the contributing shareholders are thoroughly agreeable to that proposal. I do not know one contributing shareholder who is not.
101. Have all the shareholders whose names are published in the second schedule to the Bill seen this agreement? I believe so.

Mr. J. D.
Whitham.
23 Feb., 1892.

Eustace Edmund Fosbery called in, sworn and examined,—

- Mr. E. E. Fosbery.
23 Feb., 1892.
102. *Mr. Simpson.*] Have you seen the agreement which has been put in? Yes.
103. Have all the fully paid-up shareholders signed the agreement? No.
104. What fully paid-up shareholders have not signed? The men whose names are mentioned in Schedule 2, with the exception of Thomas Birch.
105. *Mr. Edden.*] Has he signed the agreement? He signed the agreement this morning.
106. *Mr. Simpson.*] So that the whole of the fully paid-up shareholders who will be affected by the Bill have signed the agreement, with the exception of those you have just mentioned in the schedule? Yes.
107. *Mr. Edden.*] How many shares stand in Mr. Samper's name? 27,767 shares stand in his name, and of this number 24,554 have been signed for.
108. *Mr. Tonkin.*] Did Mr. Samper transfer his shares before he died? No; 27,767 shares still stand in his name.
109. Who is empowered to sign if they are in his name in the books? The persons who hold his shares with open transfers endorsed.
110. Are they transferred through the books? No.
111. They are not holders of the shares? No.
112. You cannot acknowledge the transfers at all? No; and that is one of the objects in asking for the Bill.
113. *Mr. Simpson.*] How many fully paid-up shares were there? 50,000 originally.
114. How many shares are held by the persons who have not signed this agreement? 7,013 shares have not been signed for.
115. In reality only 7,000 shares out of the 50,000 shares have not fallen in with the agreement? Yes; and some of those would come in. Mr. J. K. Cleeve, for instance, has signified his assent, but has not signed the agreement, because I cannot find him in Sydney. He says he has been to see me at my office several times, but that I was not in. He is the holder of 200 shares.
116. I assume that there is no occasion for contributing shareholders to sign the agreement, as it is practically for their benefit? Yes; at all the large meetings of the company there has never been a dissentient voice raised even amongst the contributing shareholders against the scheme, which in point of fact emanates from that body.
117. What would be the effect of the company going into liquidation without legislation being passed to bring about this compromise? The reason why I would never support any resolution to wind up the company without a compromise was that I knew that under English decisions I should be called upon to pay 18s. on each share, which would go into the pockets of the first robbers—the fully paid-up shareholders.
118. The 18s. a share would be paid into a common fund, and then be distributed amongst all the shareholders alike? Yes; that is the law.
119. The fully paid up shareholders would be making a profit out of the contributing shareholders? They would be fattening upon them.
120. The object of the Bill is to get over the difficulty of the holders of 7,000 shares standing out? Yes.
121. Can the compromise be effected without getting the consent of every shareholder? It cannot.
122. If one stands out it cannot be done? No.
123. *Chairman.*] Have you any good reason for saying that persons who have purchased from Mr. Samper have seen this agreement? I have very good reasons. This morning I examined Mr. T. H. Martin's scrip. I counted 9,000 scrip in his safe with Mr. Samper's endorsement on them.
124. You saw in Mr. Martin's possession scrip for 9,000 shares in Mr. Samper's name, and with the transfer endorsed by Mr. Samper?—
125. Did you see the same with regard to Mr. J. B. Christian's shares? I have not seen his scrip, but I have his direct word that they are endorsed by Mr. Samper.
126. He is a man of good standing in the community? Of particularly good standing.
127. He has signed for 11,554 shares? Yes.
128. Who is Mr. W. H. Armstrong? He is a partner in the firm of Andrew Rowan and Co.
129. Does he hold scrip from Mr. Samper? Two thousand shares.
130. And Mr. Hobbs? His shares go to Birch, and were signed for this morning.
131. Did Mr. Samper leave a will? No; he died intestate, and his widow is his administratrix.
132. Where does she live? Near Sydney, in one of the suburbs.
133. Has any attempt been made to get her to sign this document? She has been asked, through her solicitor, to sign, and she has replied that she could not sign, because, in the first place, this estate of Mr. Samper was insolvent, and secondly, because he had in reality parted with all his shares in his lifetime.
134. Have you a witness to corroborate that testimony? Yes; Mr. Parish, his son-in-law, who is also the family solicitor.
135. You are well acquainted with the law regarding companies? Yes.
136. Has it been decided in the English Courts that the course which is set out in the preamble of this Bill must be followed if the company goes into liquidation? Yes, undoubtedly.
137. Is there any legislation in the Colony which prevents that from being done in certain cases? Yes, the Act known as 40 Victoria No. 3.
138. What is the effect of that Act? The effect is that in the case of a mining company—this is not exactly a mining company—going into liquidation the net assets are divided *pro rata* amongst all the shareholders, paid up and contributing, without making any further calls. The third section of the Act reads, "In the adjustment of such rights the holders of partly paid-up shares shall be deemed contributories only in respect of calls made on their shares beyond the amount agreed to be considered paid-up, and shall to that extent, but not further, be entitled to share in any surplus derived from calls as aforesaid."
139. Under the third section of the Act, if it were applicable to this company, the paid-up shareholders would not be entitled to share in the paying of calls which were made on contributories? Not calls to be made. It would be exactly the same as the Bill provides, only the paid-up shareholders would not be in such a good position.
140. They would not be entitled under this Act to make a call of 18s. on each contributing share and then divide it? No.
141. You are clear on that point? Certainly.

142. The effect of this legislation passed in 1876, in the case of an ordinary mining company, would be to stop this call of 18s. a share, and the distribution of the money amongst the paid shareholders? Without any doubt whatever.

Mr. E. E.
Fosbery.

23 Feb., 1892.

143. This company is not a mining company? It just borders on mining company. It was dependent on mining for its existence, but it is not a mining company.

144. What you claim is a benefit similar to the benefit which is conferred by this Act? An analogous benefit.

145. You are asking that what is the law in regard to one set of companies shall be made the law in regard to other companies? Yes.

146. You are willing to give the paid-up shareholders more than they would get under this Act, that is, a two-thirds of the net assets as against one-half.

147. *Mr. Tonkin.*] Are you a shareholder? I hold paid-up and contributing shares.

148. How did you become possessed of your paid-up shares? I bought them in the open market.

149. What lots did you buy, when did you first buy, and from whom? I bought the first lot soon after the company was started. As an ordinary speculator I bought 1,000 shares at 4d. each.

150. What was the lowest price you paid for your shares? I bought as low as 3d. a share. I became paid-up shareholder, not to fatten on unfortunate contributing shareholders, but to save myself.

151. In anticipation of the company going into liquidation? Yes.

152. You thought that you would be called on as a contributing shareholder to pay 18s. on each contributing share, but that by buying a large number of paid-up shares you would get some portion of that money back again? Exactly.

153. Do you think it is a fair demand to ask the contributing shareholders to pay 18s. on each share? No.

154. How would it affect those who have not paid-up shares? It would go very hard with them.

155. What money has been subscribed up to the present to establish this company and to meet its liabilities? Two shillings a share on 50,000 shares.

156. Do you not think it would be a very great injustice to demand 18s. on each contributing share? A gross injustice.

157. Is not the purpose of the Bill to make that demand? No; it is to stop that demand from being made.

158. Do you, as a shareholder, think that the paid-up shareholders have a right to expect anything from the assets of the company? I think it would be very wrong indeed, but the law is that it can be done.

159. As a shareholder you do not think it is a fair thing? I do not want to see the shareholders called upon to pay 18s. a share.

160. Have not a majority of the paid-up shares been bonus shares? They were all bonus shares.

161. The fact is that none of the paid-up shares have paid anything? Not a penny piece.

162. What was the bonus given for? The goodwill of the business.

163. I suppose there is no possibility of the company going on and paying its way? I am perfectly certain that it could never possibly pay again except during a fictitious and inflated condition of the mining market. When the market was at fever heat it would pay well. Then it would go down for ten years, and we should never see a 6d. out of it.

164. How do you account for it? It is the extraordinary excitement which sometimes occurs.

165. Not through any mismanagement of the company? No.

166. Not through any trickery on the part of the attendants at the sale? No. I attribute the misfortunes of the company very largely to the starting of an opposition Exchange. It took away our members.

167. Was it not doing quite a different business from your Exchange? No; very much the same.

168. *Chairman.*] I suppose the tricks of buyers and sellers may have affected your business? Undoubtedly it did. They got it into very bad odour.

169. That does not account for a total cessation of business? No. The bursting of the mining boom accounts for that.

170. Are you or any of the parties asking for relief responsible for the mismanagement or trickery? No; I was never on the directorate.

171. *Mr. Simpson.*] Did Mr. Samper give anything except the goodwill for his 50,000 paid-up shares? An interest in the subscriptions which had been collected from a few brokers.

172. A mere bagatelle? Yes.

173. *Mr. Eve.*] He gave his brains? He lent them.

174. *Mr. Tonkin.*] In addition to the subscriptions from the contributing shareholders, was not a large amount received from other subscribers? From the brokers who paid the subscriptions.

William George Parish called in, sworn, and examined:—

175. *Chairman.*] Where do you live? At Glebe Point.

176. *Mr. Simpson.*] Did you know Mr. Samper? Yes. He was my father-in-law, and a client of mine.

Mr.
W. G. Parish.

177. *Chairman.*] Is Mr. Samper your father-in-law, the Mr. Samper who is referred to in the Bill as being the holder of a large number of shares in the Australasian Mining Exchange Company? Yes.

23 Feb., 1892.

178. Is he alive or dead? He is dead.

179. Are you well acquainted with his business? Yes.

180. Have you any authority to manage his affairs? Complete authority.

181. Do Mr. Samper's representatives hold any shares in the company at the present time? They do hold some shares, but they are mortgaged. The mortgagees have come in and sold, so that practically they hold none.

182. Is Mr. Samper's estate under administration? It has been administered, but only for the express purpose of obtaining the insurance money for his widow.

183. Has the administratrix been asked to sign an agreement in regard to the distribution of the company's assets? The administratrix was asked to sign some agreement. The estate is insolvent, and as the claims of the creditors had to be considered, I advised her that she could not sign a document of this kind.

184. I suppose you also advised on account of the fact of the mortgagees having the shares? Yes.

- Mr. W. G. Parish.
23 Feb., 1892.
185. She had no legal power to deal with the shares? No.
186. Are you acquainted with the proposals of the company in regard to the distribution of the assets? I know something about the Bill. I understand the proposal is that the paid-up shareholders shall take two-thirds, and the contributing shareholders, one-third of the assets of the company.
187. Is that a fair arrangement for paid-up and contributing shareholders alike? I know that the view of Mr. Samper, was that it was a very fair arrangement. The day before his death he told me the best thing I could do was to get the agreement for him to sign.
188. Do you think it was the best thing? Most certainly. I am a contributing shareholder.
189. You know the alternative course if the Bill does not pass, and the agreement is not signed by all parties? I suppose the alternative course is that the contributing shareholders will have to pay up 18s. a share.
190. Will that be a fair thing? It is a great concession on the part of the paid-up shareholders.
191. *Mr. Tonkin.*] Why do you think the paid-up shareholders should receive more than the contributing shareholders? For this reason, that when the company was floated Mr. Samper was making a profit of £400 a week. It was suggested that he should float the business into a limited company. The suggestion was carried out, and the price paid for the purchase of the good will was £50,000 which was paid in paid-up shares. A proposal was made to Mr. Samper at that time, that he should sell his shares at 10s. a share. Offers were made up to 15s. a share, but he said that he had just floated a company on the market, and he would not sell until success was assured. He really gave value for his shares. There was an asset at any rate capable of valuation. It was not the same as a mine where you see a few specimens knocked about. He had proved what he could do. Ultimately a number of shares were sold at prices ranging from 3s. downwards. It seems to me that it is only fair in view of their legal position that they ought to get something.
192. Did Mr. Samper hold the whole of his paid-up shares at one time in the company? At the time a number of shares were given away under contracts made by him with people for assistance. At the time the company was floated, he was so completely worried that he was incapable of carrying on the business, people took it off his shoulders, and the consideration was so many shares.

Thomas Birch called in, sworn, and examined:—

- Mr. T. Birch.
23 Feb., 1892.
193. *Chairman.*] You are a shareholder in the Australasian Mining Exchange Company? Yes. I hold 575 shares.
194. Are you aware that a proposal has been made for distributing the surplus assets? Yes.
195. It is stated in the Bill that you are against that proposal? Yes.
196. Are you in favour of or against it? Against.
197. Have you not signed an agreement in favour of it? I think not.
198. Is not the signature to this agreement yours? Undoubtedly it is.
199. Do you know that the agreement which you have signed is in favour of distributing the surplus assets on this basis—two-thirds to go to the paid-up shareholders and one-third to the contributing shareholders? Yes; I understood that, and may have signed it.
200. Are you still in favour of that arrangement? Yes.
201. When you stated just now that you were not in favour of it you spoke under a misapprehension? I did not understand your question fully.
202. Now that you understand my question fully you are in favour of the proposed arrangement? Yes.
203. Do you know any shareholders who are really against the agreement? No; I am almost a stranger amongst them.

Alexander Gunning called in, sworn, and examined:—

- Mr. A. Gunning.
23 Feb., 1892.
204. *Chairman.*] Are you a shareholder in the Australasian Mining Exchange Company? I hold 200 shares.
205. Has an agreement been put before you in respect of the distribution of the surplus assets? I was asked to sign an agreement.
206. Is this agreement marked B the agreement which was submitted to you to sign? It was about the distribution of the assets.
207. Having read that agreement, are you in favour of it or not? Not altogether.
208. What objections have you to offer? I want the money to be divided *pro rata*.
209. Are you a paid-up shareholder? Yes.
210. Do you not see that this agreement, which provides that instead of the money being divided *pro rata*, the paid-up shareholders shall get two-thirds, is better than your idea? No; I do not think so.
211. Will you explain what your objection is to this agreement? At the meeting I thought that I was being forced into signing an agreement. I felt that some pressure was being brought to bear in the matter. I did not like the way in which it was put before the meeting.
212. We want to know whether, in your opinion, the agreement is fair or unfair—whether it is one which you will accept or refuse, and if you decline, for what reason? I think that nine-tenths of the money ought to go to the paid-up shareholders, and one-tenth to the contributing shareholders. I was told that many contributing shareholders got their shares for a few pence, and that they have received dividends which almost, if not quite, paid for the shares.
213. Have any dividends been paid? Yes.
214. Have not the paid-up shareholders got their dividends? I received a dividend of 4d.
215. How long have you held your paid-up shares? For a little over three years, I think.
216. *Mr. Fegan.*] How much did you give for your shares? Three shillings.
217. *Chairman.*] Are you aware that if this agreement is not carried out, or if some agreement is not made and carried out, the company may be forced into liquidation? Yes.
218. Do you know that if it goes into liquidation, the contributing shareholders will have to pay 18s. per share, which will be divided equally between the paid-up and the contributing shareholders? I understood that the business would be carried on, and that the contributing shareholders would be liable to the amount of 18s. per share.
219. Are you aware that if the company goes into liquidation, these calls may be, and probably must be made under the law? I have heard so.

220. Is it your object, as a paid-up shareholder, to cause 18s. per share to be paid up by the contributing shareholders, so that the paid-up shareholders may get half of the amount? No.
221. You do not believe in that being done? I do not think it would be altogether fair. I should not go to that extreme.
222. Your simple contention is that instead of getting two-thirds of the assets, the paid-up shareholders should get nine-tenths?—
223. And you base that contention on the fact that some of the contributing shareholders have bought in at a very low price? Yes.
224. Have none of them bought at very high prices? I do not know. I was told that one gentleman paid 4s. for his shares?
225. Do you think it would be fair to those who have paid 4s. for their shares? I do not think it would, but they agreed when they took shares in the company to become liable for that amount on each share.
226. What did you give for your shares? Three shillings.
227. But they agree to become liable for a balance of 18s. when they bought? So I am told.
228. Do you not know that under the articles of association they agreed to become liable to the amount of 18s. a share for the purpose of carrying on the business of the company? Yes.
229. Do you think it is advisable to proceed with the business of the company? I did think so. I do not know whether it would pay now. I am not sufficiently well informed of the state of the company's business. It was started again lately, but I have not been furnished with any particulars.
230. Has any dividend been paid during the last year? Not to my knowledge.
231. During the last two years? I think so.
232. How long is it since the last dividend was paid? During the last two years.
233. Are you aware whether the company has made any profit during the last twelve months? I think the profits have been more than swallowed up by the expenses.
234. Have you any reason to believe that that state of affairs will not continue if they start business again? I do not know.
235. Do you think the prospects of the company have improved? I do not.
236. Or that the business has improved? I do not think so.
237. Do you think it would be wise to cease operations and wind up? I think it would.
238. Better than to continue the company? Yes.
239. Do you think there is any legitimate reason for calling up 18s. on each contributing share? I do not think it is advisable to call up unnecessarily.
240. Have you advanced the best reasons you can in favour of your main contention that the paid-up shareholders should receive nine-tenths instead of two-thirds of the assets? I think so. I may state that when I bought my shares I was told that I was getting shares paid up to £1 each, and that I should get very good interest for my money.
241. Who told you that? Mr. George Henry Smithers.
242. Were you told this by the contributing shareholders? He was a shareholder, but whether he was a contributing shareholder or not I do not know. He held some paid-up shares.
243. Was this put forward officially or authoritatively? I know that I asked Mr. MacDermott, a contributing and paid-up shareholder, and Mr. Speers, and they both told me that it was a very good and safe investment, and the best thing going.
244. *Mr. Edden.*] On your shares, for which you paid 3s., you have received a dividend of 4d., and the contributing shareholders have also paid 2s. for their shares? Not all of them.
245. Because you paid 3s. for your shares and they paid 2s. for their shares, would it be fair to give nine-tenths of the assets to the paid-up shareholders, as against one-tenth to the contributing? The shares which I bought represent £1, and their shares represent 2s.
246. *Chairman.*] Did the 3s. per share, which you paid for your shares, go into the assets of the company or into the pockets of the vendor? Into the pockets of the vendor, I suppose.
247. And did not the 2s. per share, which the contributing shareholders paid as calls, go into the assets of the company? I suppose it did.
248. Have you paid anything at all into the assets of the company? No, because I have not held the shares very long. I was not amongst the original shareholders.
249. *Mr. Tonkin.*] You think that the paid-up shareholders should get nine-tenths of the assets, because you estimate the value of the contributing shares at 2s., and the value of the paid-up shares at £1? Yes.
250. When you purchased your shares as fully paid-up to 3s., did it not strike you that a share on which a man had paid 2s. was worth more than a tenth of what you paid? No.
251. The paid-up shares for which you gave 3s. could not have been worth £1 at the time? No; I was told that some of the contributing shareholders did not pay more than 8d. a share.
252. Do you not know that many of the paid-up shareholders paid nothing? I suppose they got their shares for promoting the company or something of that sort.
253. After fully understanding the agreement and thinking over the matter, do you think that the paid-up shareholders should receive nine-tenths of the assets and the contributing shareholders only one-tenth? I think that a compromise might be effected. I think that the paid-up shareholders are entitled to a little more than the others.
254. How much money is in the hands of the company? About £1,700.
255. Where did it come from? From the profits of the company, I suppose.
256. Would you be surprised to hear that it came from the subscriptions of the contributing shareholders? Then what has become of the profits?
257. Do you not know that two dividends—one of 6d. and the other of 4d. have been paid? I received a dividend of 4d.
258. Do you not know that there has been no profit but an actual loss during the last two or three years? Since Mr. Samper's death I believe there has been.
259. We are told in evidence that the £1,700 which form the assets of the company was derived from the calls on the contributing shares. Are you still of opinion that the paid-up shareholders should receive nine-tenths of the assets and that those who really contributed the assets should get only one-tenth of their money back again? I shall not hold out over that.
260. Do you not think that it would be unfair to those men? I think it would.

Mr.
A. Gunning.
23 Feb., 1892.

- Mr. A. Gunning. 261. *Mr. Fegan.*] It would be useless to carry on the business? I do not know from any practical experience.
- 23 Feb., 1892. 262. Do you not think it is a liberal offer on the part of the contributing shareholders? I think they ought to be content to take a quarter of the assets.
263. At the same time you would not be the only one who would be a bar against coming to an agreement? I should not be the only one.
264. *Mr. Edden.*] You cannot see your way clear to sign the agreement? If all the others sign the agreement I shall sign.

Eustace Edmund Fosbery recalled and further examined:—

- Mr. E. E. Fosbery. 265. *Chairman.*] Have you endeavoured to find W. M. Moore, whose address is given in the schedule as Pitt-street, Sydney? I have; I cannot trace him at all.
- 23 Feb., 1892. 266. And Max Rindskopf and Henry Rindskopf? Max Rindskopf is in an importer's office in Brisbane and Henry Rindskopf has left the country and gone to Austria.
267. And Frank Scarr? He has parted with his shares which are held by somebody who cannot be traced.
268. T. G. Sloane is represented by Gair, Sloane, & Co.? Yes.
269. And J. K. Cleeve? He is bound to sign, because he holds contributing shares.
270. Do you produce the transfer of 2,000 shares from Samuel Samper to Mr. Armstrong? I do.
271. You have seen the transfer of Mr. Martin's shares to Mr. Samper? Yes.

William Sydney Christie sworn and examined:—

- Mr. W. S. Christie. 272. *Chairman.*] You are the Clerk of Select Committees of the Legislative Assembly? I am at present acting as such.
- 23 Feb., 1892. 273. You caused a summons to be sent to Mr. Sloane? Yes.
274. And in reply did you receive this letter? Yes.
275. When you got that letter stating that he was absent from Sydney, and asking you to ask Mr. Gair;—did you summon Mr. Gair? Yes. I gave the summons to the boy who brought the letter to take back to Mr. Gair.
276. And Mr. Gair is not here to-day? He is now entering the room.

William Gair sworn and examined:—

- Mr. W. Gair. 277. *Chairman.*] Do you represent Gair, Sloane, & Co.? I do.
- 23 Feb., 1892. 278. And Mr. T. G. Sloane? I do.
279. Are you holders of shares in the Australasian Mining Exchange Company? We are. We hold conjointly 1,100 paid-up shares, and Mr. Sloane holds 500 contributing shares separately from me altogether.
280. Has an agreement been put before you as a compromise to wind up the company and distribute the assets? Yes. I think the agreement before the Committee is the one which I saw in Mr. Johnson's office.
281. It provides for the payment of two-thirds of the assets to the paid-up shareholders, and the balance to the contributing shareholders—do you refuse to sign the agreement? I do.
282. On what grounds? Because I think that the assets should be divided according to the value of the scrip—that is, that the fully paid-up shareholders should be paid on 20s., and the contributing shareholders on 2s. a share.
283. What did you pay for your shares? One shilling and two-pence.
284. Yet you want to take the value of them as 20s.? They were represented to me as being worth 20s. At the time I bought my shares the articles of association were handed to me, showing that 18s. was due by the contributing shareholders, that it was a sound investment, and that when mining brightened up the shares would brighten up. I did not want the shares. I took the shares because Mr. MacDermott, who is now dead, asked me to take them. He came into the office with them.
285. Were you ever offered a higher price than what you paid for your shares? I never tried to sell them.
286. What are they worth in the market to-day? I do not know.
287. Have you read the articles and memorandum of association? I have.
288. Are you aware that the contributing shareholders are liable to be called on for 18s. per share, for the purpose of carrying on the business of the company? I believe they are.
289. Is it possible to carry on the business of the company? I am guided by the bulk of the shareholders. I am agreeable to wind up the company.
290. You carry on business in Sydney? Yes.
291. You have had a good commercial experience? Yes.
292. Do you dabble in mining? No.
293. Is it booming? No.
294. Is there much sale of scrip? I know very little about it; I have given it best.
295. Do you think it would pay you or anybody else who had a big mining connection to take an office in George-street and pay a large rent? I am a stock and station agent. I have given up mining. I know nothing about it.
296. Candidly, do you think it would be a paying thing to continue this business? No.
297. Do you think it would be honest to ask the shareholders to pay calls to carry on the business? No. I am against asking them to pay a shilling.
298. You do not think it is fair to ask them to pay calls to carry on a business which would be unprofitable? No. I expressed my willingness to wind up long ago and to forego the liability of the 18s. per share.
299. What is the amount of assets to be distributed? About £1,800.
300. The evidence before us is to the effect that, after paying off £200 worth of liabilities, there will be a surplus of £1,400. Are you aware how the money which is now lying to the credit of the company was raised? By the contributing shareholders in the first instance.

301. You say that you paid 1s. 2d. for your shares. Did any of that money go into the assets of the company? I do not know what became of it. Mr. W. Gair.
23 Feb., 1892.
302. Nothing you have paid has gone to the credit of the Company? I was not an original shareholder. I purchased in the market under the articles of association, believing that I was buying shares worth 20s., but which, owing to the depression of the market, I was able to buy at 1s. 2d.
303. You are of opinion that the paid-up shareholders should get nine-tenths of the assets and the contributing shareholders one-tenth, because the latter have only paid one-tenth of their liability, and you hold shares which represent £1? They were sold to me as fully paid up.
304. That is the contention you stand by, good or bad? Yes.
305. On the other hand, if no agreement is arrived at, are you aware that the alternative would be that the contributing shareholders may have to pay up 18s. per share, and that the proceeds of the call will be divided equally between the paid-up and the contributing shares? I do not want the contributing shareholders to pay up 18s. per share. I do not want £45,000 to be raised from the contributing shareholders.
306. You do not go so far as to say that that course ought to be taken? No. My contention is that there is a dividend, and that it should be divided according to the value of the scrip.
307. You do not want to force the shareholders to pay up any more in calls? No.
308. *Mr. Edden.*] Have you received any dividend? A dividend of 4d., I think.
309. That would leave the value of your shares at 10d.; do you not think it is rather hard that you should take nine-tenths of the assets as against one-tenth by those who have paid 2s. per share and are liable to pay 18s. more? £4,200 has been paid in dividends, so that they have received £2,100 in dividends. If you calculate the amount at which their shares now stand you will find that my shares have cost me more than theirs.
310. How long have you held your shares? Over two years.
311. *Mr. Tonkin.*] You say your shares were represented to you as being worth 20s.? They were not, but they were represented as being worth 20s. some day. The solidity of the company was represented by the fact that 18s. was liable to be called on each contributing share. I should not have bought the shares had it not been for that liability of 18s.
312. Do you think no contributing share were represented to be worth a great deal more than 2s.? They may have been sold at that price, but still there was always a liability of 18s. on each share, whereas on the fully paid-up shares there was no liability.
313. Do you know that the surplus is really the residue of what the contributing shareholders paid? The residue of the dividends which have been made by the company. £4,200 was paid in dividends.
314. Did not the paid-up shareholders receive £2,100 out of that sum? That was before I joined the company.
315. But the paid-up shareholders received half of that sum? Yes.
316. Do you think it would not be a fair thing to divide the assets in the proportion of two-thirds to the paid-up shareholders and one third to the contributing, as it is really their own money? I do not see that. It may be fair enough with those who bought in the first instance. A great many of the original promoters received their shares for nothing.
317. Do you know that not a shilling was paid for any of the paid-up shares? I knew nothing at all about the company until Mr. M'Dermott came into my office. On his word I took the shares, and asked no questions.
318. Do you not know that all the paid-up shares were bonus shares? Perhaps that is the reason why they are so liberal in saying that they will accept two-thirds of the assets. If they had bought their shares they might not be quite so liberal.
319. Do you not think it would be a liberal thing for a man who has paid 1s. 2d. for his shares to allow a man who has paid 2s. for his shares to have one-third of the assets? I think that if the contributing shareholders are let off the liability of 18s. they should be very glad. So far as the value of the scrip is concerned, I made a proposal at one meeting to hand it over to the widow of Mr. Samper. It is the principle of the thing to which I look. I think it is dangerous that a company should be allowed to suddenly wind up and say to the shareholders, "You must accept so-and-so." It would prevent persons from going into anything or the sort in future.
320. *Mr. Fegan.*] I suppose, as a shrewd business man, you are aware that the balance of 18s. can only be called upon the condition that the operations of the company are to continue? I quite understand that. When the proposal was made at the first meeting I did not oppose it. Everyone was in favour of the proposal, or else I should have moved an amendment against the contributing shareholders receiving anything. It was decided that they should stand on the same ground as ourselves, and receive *pro rata* according to the value of their scrip.
321. *Mr. Eve.*] You are not in favour of the business going on? No. In the case of the Lewis Ponds Company, Melbourne, a decision was given that the contributing shareholders should pay up, and that the whole should be divided.
322. *Mr. Edden.*] You have no contributing shares? No. Mr. Sloane has 500 contributing shares, and it was he who moved the resolution.
323. If you held 1,000 contributing shares you would look at the thing through very different glasses? I should be very glad to get out of my liability.

AUSTRALASIAN MINING EXCHANGE OF SYDNEY BILL.

APPENDIX.

[To Evidence of Mr. John Bullock, 23rd February, 1892].

A.

PROSPECTUS of the Australasian Mining Exchange of Sydney (Limited). Capital, £100,000, in 100,000 shares of £1 each of which shares 50,000 to be fully paid up and retained by the present proprietor, and the 50,000 contributing shares are offered to the public on the following terms, viz. :—1s. on application, 1s. on allotment, and the balance in calls not to exceed 1s. per share per month; and all shares are sold subject to the articles of association to be hereafter made and agreed to. All the capital subscribed will go to the credit of the company, with the exception of that required for the payment of furniture and fittings now the property of the present proprietor (which is to be taken over at cost price), legal expenses, and those incurred in floating the company.

Provisional Directors :

J. B. Christian, Esq.
M. C. Cowlshaw, Esq. (Messrs. Cowlshaw Bros.)
W. H. Armstrong, Esq. (Messrs. A. Rowan & Co.)
J. W. Cliff, Esq. (late of Messrs. Gardiner & Co.)
G. C. Loughnan, Esq. (Messrs. MacDermott, Loughnan, and Scarr)
S. Samper, Esq. (Australasian Mining Exchange).

Solicitors :

Messrs. Want, Johnson, & Co.

Bankers :

The Commercial Banking Company of Sydney.

Brokers :

Messrs. MacDermott, Loughnan, and Scarr.

The company is being formed for the purpose of purchasing all the right, title, and interest to the business and lease of the present Australasian Mining Exchange, George-street, Sydney, which has lately been established with such extraordinary success, which is apparent to the large numbers of investors and speculators who are doing business through the Exchange. From the opening day the Exchange has been daily crowded with capitalists, whose transactions have been very large and numerous, so much so as to make the profits of the business far exceed the most sanguine expectations of the proprietor, and it has been declared by the general public to supply a want long felt in Sydney. The progress of the business since the opening day has been very rapid, and needs no comment in the prospectus, further than to say that during the first week £25,000 passed through the exchange, the second week £71,339 7s. 11d., and the present week bids fair to surpass the previous weeks.

It is proposed to sell by auction and private contract bank and insurance companies shares, and all other kinds of stock. The following business will also be within the objects of the company :—Reporting upon mines, forming syndicates, floating companies, procuring mining managers and practical miners, effecting assays, obtaining trial crushings, investigating mining titles, purchasing or selling mining machinery, supplying information about mines in general, furnishing information as to the most suitable plant, and the cost of same, for either gold, tin, silver, copper, &c.; purchasing all kinds of ores, and making advances on shipment; treating with prospectors having mining properties, but unable to develop same; undertaking legal management of companies; supplying full particulars as to best mode of procedure for selling properties in England.

Agents in the principal cities of Europe and America will be appointed.

All the profits made up to the time of taking over the business will be retained by the present proprietor; but all moneys received for membership will be handed over to the company.

The shares will be allotted according to priority of application.

The present manager, Mr. Samper, has agreed to undertake the management of the Exchange for six calendar months.

The company was floated within three hours, and the shares over-applied for, and this prospectus is only issued for the information of the public.

Dividends to be declared alike on contributing and paid-up shares.

B.

[To Evidence of Mr. E. E. Fosbery, 23rd February, 1892.]

THE AUSTRALASIAN MINING EXCHANGE COMPANY OF SYDNEY (LIMITED).

Agreement as to terms of winding up.

WE, the undersigned, being the holders of all the fully paid-up shares in The Australasian Mining Exchange Company of Sydney (Limited), do hereby respectively agree that in the event of the winding up of the said company, we will accept a distribution of the net assets of the said company after payment thereof of all the debts of the said company and the costs, charges, and expenses incurred in such winding up on the following basis, namely :—That two-thirds of the said net assets be divided among the holders of fully paid-up shares in the said company *pro rata* according to the number of shares held by each of such shareholders respectively, and that one-third of the said net assets be divided among the holders of contributing shares not fully paid up *pro rata*, according to the number of shares held by each contributing shareholder respectively. And we further agree that on the distribution of the said net assets in such way the said contributing shareholders shall be absolutely absolved and relieved from any liability to contribute any portion of the amount remaining unpaid on their respective shares in the said company, and from the payment of any further calls or sums of money in respect of all shares held by them in the said company. And we do hereby respectively agree to the above terms of the winding up of the company notwithstanding that in the event of the said company being wound up under the Companies Act instead of in terms of the above compromise, the amount remaining unpaid on the contributing shares in the company would have to be paid up in full, and the moneys so produced, together with the other assets of the company, divided *pro rata* equally among all the shareholders in the company. And we do hereby respectively admit and declare that this memorandum is signed by us respectively with the object of inducing the contributing shareholders in the company to support the resolution for the company being wound up.

Dated this day of , one thousand eight hundred and ninety-one.

Witness.	Name of shareholder.	Number of paid-up shares.	Signature.
C. E. Johnson	William Joyce Hobbs	500	W. J. Hobbs.

C.

MEMORANDUM OF ASSOCIATION OF THE AUSTRALASIAN MINING EXCHANGE COMPANY OF SYDNEY (LIMITED).

1. The name of the company is "The Australasian Mining Exchange Company of Sydney (Limited)."
2. The registered office of the company will be situate in Sydney.
3. The objects for which the company is established are :—
 - (a) To purchase for cash or shares in the company, or partly by one mode and partly by the other, or otherwise acquire from Samuel Samper or other the owner or owners thereof the trade business and goodwill of the "Australasian Mining Exchange" (lately carried on by the said Samuel Samper, at No. 335, George-street, in the city of Sydney), together with the benefit of the present lease-book and other debts, subscriptions paid or payable for membership, contracts, furniture, fixtures, and effects of and belonging to the said trade and business or used in or about the same.
 - (b) To carry on the trade or business of a mining exchange in Sydney and elsewhere in the Colony of New South Wales either in continuation of that carried on by the said Samuel Samper or otherwise.
 - (c) To acquire or establish and carry on any other trade or business which the company may consider desirable to be carried on in connection with such last-mentioned business, though of a different nature to that hitherto carried on by the said Samuel Samper.
 - (d) To act as auctioneers or brokers in effecting sales by public auction or private contract of stocks shares and funds of any nature or kind soever and also of any mines, mining properties, or mineral lands, or of any share or interest therein.
 - (e) To act as agents, brokers, or otherwise, in all or any of the following matters :—
 - (1.) In reporting or obtaining reports upon mines, mining properties, or mineral lands in any part of the world.
 - (2.) In forming syndicates for the purpose of purchasing or working, or otherwise dealing with, any mines, mining properties, or mineral lands in any part of the world, or for any other purpose whatsoever.
 - (3.) In forming and floating companies for any purpose or purposes whatsoever.
 - (4.) In transporting or arranging for the transportation to any market or place in Australia or elsewhere for sale of any ores, metals, minerals, or other similar products or substances.
 - (5.) In procuring mine managers, practical miners, mining labourers, and all other employees for or in connection with mines, or mining operations of any kind, in any part of the world.
 - (6.) In obtaining assays of bulk or sample ores or mineral products or substances.
 - (7.) In obtaining or making trial crushings of ores or mineral products or substances.
 - (8.) In investigating or procuring the investigation of mining titles and advising with regard thereto.
 - (9.) In arranging for and effecting purchases or sales of new or second-hand mining machinery or plant of any kind.
 - (10.) In furnishing information with regard to mines, mining properties, and mining or other investments.
 - (11.) In the legal management and supervision of mining and other companies and syndicates.
 - (f) To purchase, take on lease, or in exchange, or otherwise acquire and deal with any real or personal property of any nature or kind, which may be deemed necessary or convenient for the purposes of the company, and in particular and without prejudice to the foregoing generality to purchase, take on lease, or in exchange, or otherwise acquire lands (whether mineral or otherwise) of any tenure, mines, ores, metals, minerals, grants, and other mining rights and privileges in the Colony of New South Wales, or elsewhere, and either to hold or resell the same. To purchase, take on lease, or in exchange, or otherwise acquire personal assets, machinery, plant, goods, chattels, merchandise and effects (either in the Colony of New South Wales or elsewhere), and to hold or resell the same. To erect exchanges offices or other buildings for the objects and purposes of the company. To buy, sell, and deal in mining plant and machinery of any nature or kind, whether new or second-hand or otherwise. To acquire, hold, and exercise any patent or other right or privilege, and generally to sell, lease (whether in connection with the general purposes of the company or independently), exchange, mortgage, pledge, or otherwise deal with all or any of the real or personal property of the company in such manner as may from time to time be deemed expedient, and also (if deemed expedient) to mortgage the uncalled capital of the company.
 - (g) To subscribe for purchase, or otherwise accept and take shares, stock, or debentures, or other securities of any other company, or any society or undertaking whatsoever, and to accept shares, stock, debentures, or other securities of any other company, or any society, or undertaking whatsoever, in payment or part payment of any work performed by the company, or any sale made to any such company, society, or undertaking as aforesaid, and either to hold or to sell such shares, stock, debentures, or other securities with or without any guarantee by the company.
 - (h) To give guarantees by the company in relation to mortgages, loans, investments, and securities, and generally to become guarantee or surety for the performance of any contract, obligation, or agreement.
 - (i) To enter into partnership or into any arrangement for sharing profits or reciprocal concessions or otherwise with any person or persons, partnership, or company, or companies carrying on or engaged in, or about to carry on or engage in any business or transaction which this company is authorised to carry on or engage in or any business or transaction capable of being conducted so as to directly or indirectly benefit the company.
 - (j) To amalgamate with, or promote, or establish any other company or companies for all or any one or more of the objects of the company, and to guarantee the payment of any debentures or securities issued by any such company or companies.

(k)

- (k) To make and carry into effect any arrangement or arrangements for acquiring by purchase or otherwise the goodwill of, or any interest in any business of any kind authorised by this memorandum of association.
- (l) To sell, dispose of, or transfer the business, property, and undertaking of the company, or any branch or part thereof for such consideration as the company may think fit, and in particular for shares, debentures, or securities of any other company, or for cash, or partly in each or any of such modes of payment.
- (m) From time to time to make the shares of capital of the company originally increased or reduced, or any part thereof, ordinary, or preferred, or guaranteed, or deferred shares, and to convert the same into shares of different nominal amount, and in any case, either of one class, and with like privileges, or of several classes, and with different privileges, and of the same or different amounts, and respectively with any fixed fluctuating contingent preferential, perpetual, terminable, deferred, or other dividend or interest, and subject to the payment of calls of such amounts, and at such times as the company may from time to time think fit, and with such rights in the distribution of the assets of the company, and with a special, or without any right of voting, and subject to such other conditions and restrictions as may by the company in general meeting be from time to time determined. And to issue all, or any of such shares, at par, or at a discount, or at a premium, or as paid up, or partly paid up.
- (n) To make, draw, accept, endorse, or negotiate any promissory notes or bills of exchange, drafts, or other negotiable instruments.
- (o) To make advances on the security of property, real and personal, of all descriptions, including shipments of ores, metals and minerals, or upon personal security, or upon open account, or in account current, or otherwise.
- (p) To receive money on deposit at interest.
- (q) To improve, manage, develop, lease, turn to account, or otherwise deal with all or any part of the property of the company.
- (r) To do all such other acts and things as are incidental or conducive to all or any of the above objects.
4. The liability of the members is limited.
5. The capital of the company is £100,000, divided into 100,000 shares of £1 each, of which 50,000 shares are to be issued as fully paid-up shares, and the remaining 50,000 shares are contributing shares.
- We, the several persons whose names and addresses are subscribed, are desirous of being formed into a company in pursuance of this memorandum of association, and we respectively agree to take the number of shares in the capital of the company set opposite our respective names.

Names, addresses, and descriptions of subscribers.	Number of shares taken by each subscriber.

Dated at Sydney, this 15th day of March, A.D. 1888.

Signed in my presence by the above-named Edward Percy Simpson, Joseph Thomas Spears, George Stanley Bosanquet, Cuthbert Fetherstonhaugh, John Jackson, Robert Evans, and Richard Patrick Davys,—

EUSTACE E. FOSBERY,
Solicitor, Sydney.

The Australasian Mining Exchange Company of Sydney (Limited).

NOTICE is hereby given that an extraordinary general meeting of the above company will be held in the Mercantile Mutual Buildings, 118, Pitt-street, Sydney, on Friday, the 13th day of February, instant, at 2:30 o'clock in the afternoon, when the subjoined resolution will be proposed.

Should the resolution be passed by the required majority, it will be submitted for confirmation as a special resolution to a second extraordinary general meeting, which will be subsequently convened.

RESOLUTION.—“That the articles of association of the company be altered by the excision and cancellation of article 109 of the articles of association of the company.”

Sydney, 5th February, 1891.

By order of the Board,

DAVID JONES,
Secretary.

ARTICLES OF ASSOCIATION OF THE AUSTRALASIAN MINING EXCHANGE COMPANY OF SYDNEY (LIMITED).

It is agreed as follows :—

Preliminary.

1. The provisions of table “A” in the first schedule to “The Companies Act” shall not apply to this company except so far as they are repeated, or contained in these presents.

Interpretation.

2. In these presents the following terms shall have the meanings next hereinafter respectively assigned to them if not inconsistent with the subject or context.

“The Company” means “The Australasian Mining Exchange Company of Sydney (Limited).”

“The Statute” means “The Companies Act,” and every other Act from time to time in force in New South Wales, concerning joint stock companies and affecting the company.

“These Presents” means and includes the articles of association and regulations of the company from time to time in force.

“Special Resolution” means a special resolution of the company passed in accordance with the statute.

“Capital” means the capital from time to time of the company.

“Shares” means the shares into which the capital is from time to time divided.

“Dividend” means any sum arising from the division of the profits of the company.

“Shareholders” and “Members” respectively mean and include the holder from time to time of the shares inscribed in the shareholders’ register.

“Attorney” means and includes any person duly appointed by power of attorney, and any duly appointed substitute of any such attorney.

“Directors” means the directors of the company, assembled at, and constituting a board unless the context means obviously the directors in their individual capacity.

“Directors,” “Auditor,” “Secretary,” shall mean those respective officers from time to time of the company, and the word “Secretary” shall also mean and include the “Acting Secretary,” unless such meaning would be inconsistent with the context.

“Meeting” means a meeting of the members duly called and constituted in accordance with these presents, and any adjourned holding thereof.

“Board” means a meeting of the directors duly called and constituted, or as the case may be the directors assembled on a Board, or the majority according to votes so assembled.

“Office” means the registered office for the time being of the company.

The

- “The Shareholders’ Register” or “The Share Register” means the register of members to be kept pursuant to “The Companies Act.”
- “Seal” means the common seal of the company.
- “Month” means calendar month.
- “Business” means the business which the company shall or may from time to time or at any time carry on.
- Words importing the singular number only shall include the plural number.
- Words importing the plural number only shall include the singular number.
- Words importing the masculine gender only shall include the feminine gender.
- Words importing persons shall include corporations and companies *mutatis mutandis*.
- The word “writing” shall include printing except as to signature.

Capital and shares.

3. The capital of the company shall be one hundred thousand pounds divided into one hundred thousand shares of one pound each, which shall be paid as and when the same shall be called up by the Directors in the manner hereinafter provided.

4. Subject to any directions that may be given by special resolution under the powers in these presents contained relating to the issue of new shares any capital raised by the creation of new shares shall be considered as part of the original capital and shall be subject to the provisions with reference to the payment of calls and the forfeiture of shares on non-payment of calls or otherwise hereinbefore contained.

5. With regard to such new shares, they may be issued by the Directors as and when and subject to such terms and premiums as they may determine, provided however that any such shares shall be first offered to the then shareholders in numbers proportionate to their respective holdings and thereafter as the Directors may decide in the interest of the company.

Registration of shares.

6. A proper register of shares with the names and addresses of all shareholders shall be kept by the secretary of the company and the person whose name for the time being shall appear on the Shareholders’ Register as the holder of any share shall for the purposes of these presents be considered as the absolute and beneficial owner thereof and the company or its officers shall not in any case be bound to notice or be affected by or with notice express or otherwise of any trust, charge, or lien imposed upon any share or of any equitable contingent future partial or other interest therein whatsoever other than that of the person or persons in whose name the same shall stand registered.

7. Every person who shall have accepted any share in the company and whose name shall be entered upon the shareholder’s register, and no other person shall be deemed to be a member of the company.

8. The shareholders’ register shall be open for the inspection of members at the office of the company every lawful day between the hours of ten and twelve o’clock except for fourteen days preceding ordinary general meetings of the company, such fourteen days to be inclusive of the day of the ordinary general meeting.

9. If several persons are registered as holders jointly or in common or otherwise of any share, any one of such persons may give effectual receipts for any dividend payable in respect of such share.

10. Every member shall be entitled to a certificate in the form set out in schedule No. 1 to these Articles, or in such form as the Board may prescribe under the common seal of the company, and signed by the secretary or acting secretary and two directors specifying the share or shares held by him and the amount paid thereon, and if such certificate be worn or be proved to the satisfaction of the Board to have been lost it may be renewed on payment of two shillings, and any two or more joint owners of a share shall, for the purpose of this clause, be treated as a single member, and the certificate for any share or shares which may be the subject of joint ownership, shall be delivered to the person first named in the register and such delivery shall be a sufficient delivery thereof. Provided that the directors may if they think fit refuse to renew such lost certificate save upon such indemnity being given to them as they may deem satisfactory.

11. On every transfer of any share or shares the certificate of such share or shares in the possession of the transferrer shall be returned to the company for registration in manner hereinafter provided.

12. A corporation or female may hold shares.

13. The company shall have a first and paramount lien and charge on all the shares of which any person is the holder or one of several joint holders for all moneys due to the company from him either alone or jointly with any other person, whether a shareholder or not, and where a share is held by more persons than one, the company shall have such lien thereon in respect of all moneys so due to the company from all or any of the holders thereof, and the company may, on non-payment of the amount due for twenty-eight days after the demand thereof, absolutely sell and dispose of any shares, the holders or any of the holders whereof shall be indebted to the company as aforesaid, and apply the proceeds, so far as the same will extend, in satisfaction of the amount due to the company and of all expenses incurred by the company in respect thereof, and upon such sale the company may transfer the shares so sold to the purchaser and substitute such purchaser as member of the company in place of the member whose shares shall have been sold, and issue new certificates representing such shares, and such purchaser shall not be affected by any irregularity in the proceedings with respect to such sale and transfer respectively, nor be bound to inquire into the propriety of such sale or the regularity thereof.

14. No member shall be entitled to receive any dividend or to vote until he shall have given to the company particulars of his name and address for the purpose of registration, and no member who shall change his name or place of abode, or who (being a female) shall marry, and no husband of such last-mentioned member shall be entitled to receive any dividend or vote until notice of change of name or abode or of marriage shall have been given to the company for the purpose of registration and reasonable evidence thereof given to the directors, if so required by them.

15. No member shall be entitled to exercise any rights or privileges as a member until he shall have been registered in the shareholders’ register and shall have paid all calls, interest, expenses, and other moneys for the time being due on every share of which he is the holder or one of the joint holders.

Calls on shares.

16. The board may from time to time, by notice in writing, make such calls upon the members in respect of all moneys unpaid on their shares, as the Board shall think fit, and each member shall be liable to pay the amount of calls so made to the persons, and at the times and places appointed in and by such notice. Unless the company in general meeting shall otherwise determine, no call in respect of the shares in the original capital shall exceed one shilling per share, or be made payable within one calendar month after the last preceding call was payable. A call shall be made when the resolution authorising it shall have been passed by the Board: Provided that no call shall be payable until twenty-one days after the giving of the notice of such call. The joint holders of a share shall be jointly as well as severally liable for the payment of all calls in respect thereof.

17. If a shareholder fails to pay any call before or on the day appointed for payment he shall be liable to pay interest thereon at the rate of ten per centum per month from the day appointed for the payment thereof until actual payment.

18. If any member shall fail to pay any call due on the day appointed for payment the board may at any time thereafter, so long as the call remains unpaid, require him, by notice in writing, to pay such call, together with any interest accrued thereon under the last preceding clause, within one month from the date of such notice, and if the said call, together with the interest thereon, be unpaid within the time limited by such notice, all shares in respect of which such notice shall have been given may, without further notice, be forfeited by a resolution of the board to that effect, and a certificate in writing under the hands of two directors, and countersigned by the secretary, that default in payment of any call in respect of any share or shares was made for the period required by these presents shall be sufficient evidence of the facts therein stated against all persons claiming to be entitled to shares and of the right of the company to dispose of the same.

19. For the purposes of the provisions of these presents relating to forfeiture of shares the sum payable upon allotment in respect of any share shall be deemed to be a call payable upon such share on the day of allotment.

20. A member whose shares have been forfeited shall notwithstanding be liable to pay to the company all calls made and not paid on such shares at the time of forfeiture and interest thereon to the date of payment in the same manner in all respects as if the shares had not been forfeited, and to satisfy all (if any) the claims and demands which the company might have enforced in respect of the shares at the time of forfeiture without any deduction or allowance for the value of the shares at the time of forfeiture.

21. The forfeiture of a share shall involve the extinction at the time of forfeiture of all interests in and all claims and demands against the company in respect of the share and all other rights and liabilities incidental to a share, as between the member whose share is forfeited and the company, except only such of those rights and liabilities as are by these presents expressly saved, or as are by the statute given and imposed in the case of past members.

22. All shares forfeited shall be deemed the property of the company and shall be disposed of in such manner as the board may think fit.

23. The board shall, at any time within six months after forfeiture, if the share or shares forfeited shall not then have been disposed of, have the power to remit, at the discretion of the Board, the forfeiture of any share or shares upon the payment of all calls in arrears in respect of such share or shares, together with all interest at the rate aforesaid and expenses due in respect thereof and all legal expenses incurred by the company in consequence of the non-payment of such calls.

24. The board shall have power to receive in advance from any member all or any part of the moneys due upon his shares beyond the amount of calls actually made, and interest at such rate as the board shall determine shall be allowed on the whole of such advance until the making of the next call and thenceforward upon so much thereof as from time to time shall be in excess of the amount of the calls made after the date of such advance at such rate as the Board shall from time to time fix.

Transfer of shares.

25. Registered shares shall be transferable, subject to the provisions herein contained.

26. The board shall have power to refuse to register any proposed transfer of shares without assigning any reason. But in case of refusal the board shall, within seven days after such refusal, post notice thereof to the member desiring to transfer, otherwise they shall be bound to allow the transfer. All transfers shall be in the form No. 2 in the schedule to these articles, or as near thereto as possible, and shall be by way of endorsement on the share certificate, and shall be signed by both the transferrer and transferee in the presence of one witness at the least. A person shall not be registered as the transferee of a share until he has left the instrument of transfer of such share executed in accordance with these presents at the office, to be kept with the records of the company and to be produced on every reasonable request and at the expense (if any) of the transferrer, or transferee, or their respective representatives, but in any case in which, in the judgment of the board, the article ought not to be insisted on, they may dispense with it.

27. Upon the registration of the transfer of a share, and not before, the transferrer shall cease to be a member of the company. Every transferee shall, upon registration, be bound by these presents as fully as the original owner of the share transferred, and be liable to all calls or payments then due or thereafter to become due in respect of such share.

28. A fee of one shilling besides stamp duty may be charged for the registration of each transfer of shares.

29. The transfer books shall be closed during fourteen days immediately preceding ordinary general meetings of the company, such period of fourteen days to be inclusive of the day of meeting.

Transmission of shares.

30. The executors or administrators of a deceased member (not being one of several joint holders) shall be the only persons recognised by the company as having any title to his shares; and if any such executors or administrators shall elect as hereinafter mentioned to be registered as shareholders in the company, their names shall be registered in the order in which they occur in the probate of the will or letters of administration under which they derive their interest.

31. Any parent or guardian of an infant member, or any committee of a lunatic member, or any person who has become entitled to a share in consequence of the death, insolvency, or assignment for benefit of creditors of the estate of any member, or in consequence of the marriage of any female member, or in any other way than by ordinary transfer may be registered as a shareholder upon giving four days' notice in writing in that behalf to the board, and furnishing such evidence as may be from time to time required by the board, or may, instead of being himself registered, elect to have some person, subject to the approval of the board, to be named by him, registered as the transferee of such share. The person becoming entitled shall testify such election by executing to his nominee an instrument of transfer of such shares, which shall be presented to the secretary, accompanied by such evidence as the board may require to prove the title of the transferrer, and thereupon the secretary shall register the transferee as a shareholder.

32. Where any person entitled to claim a share under any transmission of interest, and not having entitled himself according to these presents to be registered as the holder thereof, fails for six calendar months after being thereunto required by notice from the board so to entitle himself, the board at any time after the expiration of that period may declare such share and all sums paid thereon forfeited for the benefit of the company.

General meetings.

33. There shall be two general meetings of the shareholders held in each year.

34. All general meetings of the company shall be held in Sydney. The first general meeting of the company shall be held within four months of the registration of the memorandum of association.

35. Subsequent general meetings shall be held in the months of January and July in each year, at such place and on such day, and at such hour as may be determined by the board. The above-mentioned general meetings shall be called ordinary general meetings. All other general meetings shall be called extraordinary.

36. The business of every ordinary general meeting shall be to consider the report of the board of directors to be then made, and to consult and decide on such other matters and things as shall then be brought forward by the board relating to the affairs of the company, and as may be brought forward by any member who shall have given to the board seven days' previous notice in the manner provided by article 40.

37. The board may, whenever they think fit, and shall upon receiving a requisition in writing signed by not less than ten shareholders, representing in the aggregate not less than one tenth of the shares for the time being in the company, convene an extraordinary general meeting at such time and place as they shall think fit. Every requisition so made by the members shall distinctly express the object of the meeting proposed to be called, and shall be left at the office of the company. If such requisition shall not be complied with within seven days after the same shall have been left at the registered office of the company, it shall be lawful for the requisitionists or any other members holding the required number of shares, of their authority to call an extraordinary general meeting, to be held at the office of the company, or some other convenient place in Sydney, but no business other than that mentioned in the requisition shall be entertained at such meeting,

Proceedings at general meetings.

38. Seven days' notice at least and not more than fourteen days' notice, specifying the place, day, and hour of meeting, and the purpose for which the meeting is to be held, shall be given of all meetings of the company either by not less than two advertisements in one or more of the newspapers in separate issues thereof, or by notice addressed to the several members as hereinafter provided. And the business of such meeting shall be to consider and dispose of all such matters and things relating to the business of the company as may then be brought forward, in accordance with the notice given as aforesaid, and no other, and at every ordinary general meeting of the company or at any adjournment thereof, the accounts and auditor's reports of the business property and effects of the company shall be produced, and a statement of the affairs of the company, and of the assets, debts, investments, liabilities, and credits thereof, shall be laid before the shareholders, and all such other matters and business in any way relating to the company or its affairs shall be transacted as may be necessary, or as occasion shall require. Provided the non-receipt of such notice as above mentioned by any member shall not invalidate the proceedings of any meeting.

39. No business shall be transacted at any general meeting except the choice, when necessary, of a chairman, the declaration of a dividend, or adjournment, unless at the commencement of the business there shall be personally present at least seven members, nor unless the members present represent personally or by proxy not less than one-twentieth of the shares for the time being of the company.

40. No shareholder shall, as regards any special business be at liberty to move, at any general meeting, any resolution not previously approved of by the board unless he has given not less than seven days' previous notice of his intention to move such resolution at such meeting by leaving a copy of the resolution at the registered office of the company.

41. If within half an hour from the time appointed for the meeting a quorum is not present the meeting, if convened upon the requisition of the members, shall be dissolved. In any other case it shall stand adjourned to such day, hour, and place as the Chairman shall appoint. Such adjourned meeting shall have power to proceed only with all the business which

which might but for want of a quorum have been transacted at the original meeting, and no such adjourned meeting shall proceed to any other business than fixing the time for a further adjournment unless the required number of members to form a quorum shall be present at the same.

42. At every general meeting the chairman of the board shall preside as chairman. If he shall be absent the members present shall, before proceeding to business, choose some one of their number to preside as chairman, such chairman to be chosen by the majority in number of the members then personally present and qualified to vote. The chairman who may preside at such meeting shall regulate the proceedings thereat, and may, if he think fit, take part in the discussion of the meeting.

43. The chairman may, with the consent of the meeting, adjourn any meeting from time to time, and from place to place, but no business shall be transacted at any adjourned meeting other than the business left unfinished at the meeting from which the adjournment took place.

44. If any general meeting, except a meeting adjourned for want of a quorum, shall be adjourned for more than fourteen days, notice of such adjournment shall be given by being advertised at least twice in one of the Sydney daily newspapers, in separate issues thereof.

45. At any general meeting, unless a poll is demanded by at least two members, holding in the aggregate not less than one thousand shares, or unless a specified proportion of the votes of the members be required by the Companies Act or by the regulations of the company for the determination of any question the same shall be decided by a majority of the members present on a show of hands, each member being considered for that purpose to have one vote, and a declaration by the chairman that a resolution has been carried or lost and an entry to that effect in the minute-book of the company shall be sufficient evidence of the fact.

46. If a poll be demanded by two or more members holding in the aggregate not less than one thousand shares, or if a specified portion of the votes of the members be required by the Companies Act, or by the regulations of the company for the determination of any question a poll shall be taken at such time and in such manner as the chairman shall direct, and the result of such poll shall be deemed to be the resolution of the company in general meeting. In case a poll be not taken on the day on which it is demanded, notice shall be given by advertisement of the time and place of taking such poll.

47. In case of an equality of votes at any general meeting, or upon the result of any poll, the chairman shall have a casting vote.

48. At all meetings of the company when a poll is demanded, or where a specified proportion of the votes of such members is required by the Companies Act, or by these presents, it shall be taken by ballot, and any member qualified shall be entitled to vote as follows:—

Every holder of twenty-five shares and up to fifty shares shall have one vote.

Every holder of over fifty shares and up to seventy-five shares shall have two votes.

Every holder of over seventy-five shares, and up to one hundred shares, shall have three votes.

For every additional one hundred shares over the first one hundred shares, and up to one thousand shares, every shareholder shall have one additional vote.

For every additional two hundred and fifty shares over the first one thousand shares, every shareholder shall have one additional vote.

Provided that no shareholder holding less than twenty-five shares shall be entitled to vote at all, and no shareholder shall have more than fifty votes.

49. If two or more members are jointly entitled to a share, or shares, the member whose name stands first in the register of members as one of the holders of such share, or shares, and no other shall be entitled to vote in respect of the same.

50. If any shareholder is a lunatic or idiot he may vote by his committee, and if any member is an infant he may vote by his guardian, and a corporation shall vote by its manager, or by any other officer deputed for that purpose by instrument under its common seal.

51. No member shall be entitled to vote at any meeting unless he shall have been registered in the shareholders register, and unless all calls, interest, and expenses whatsoever due from him to the company in respect of every share of which he is the holder, or one of the joint holders, shall have been paid before the advertised time of the meeting.

52. Votes may be given by proxy, such proxy to be appointed in the form given in Schedule 3 to these presents, but no person shall be appointed a proxy who is not a registered member of the company, and entitled to vote in respect of the shares held by him, and the secretary of the company shall not be entitled to vote as proxy. The instrument appointing a proxy shall be left at the office of the company at least twenty-four hours before the time for holding the meeting. Any instrument appointing a proxy given by a member may be revoked by any such member by his transmitting a notice in writing to that effect to the registered office of the company, or by his attending personally in time to vote at such meeting, but until such instrument be revoked it shall be valid.

53. The attorney of any member absent from the Colony of New South Wales holding a general power under seal to attend meetings of companies or a special power to attend meetings of the company may, whether a member or not, attend and take part in the proceedings thereat, and vote or appoint a proxy to vote for such member at such meetings. Provided that the attorney shall first have complied with the provisions of Article 99 of these presents.

54. No proxy shall be available for any meeting other than that for which it is expressly given or any adjournment thereof.

Directors.

55. The number of directors shall be six, including the managing director, until the shareholders shall otherwise determine. Three directors, of whom the managing director may be one, shall form a quorum, or board of directors, and be competent to perform all the acts which the whole could do or perform.

56. The first directors of the company shall be John Bassett Christian, Mahlon Clarke Cowlshaw, William Halbey Armstrong, John William Cliff, George Cumberlege Loughnan, and Samuel Samper, who shall appoint a secretary, and who may pay all expenses incurred in getting up, forming, and registering the company, and exercise all such powers as are herein conferred upon the directors of the company or the board, and who shall continue in office until the first ordinary general meeting of the company. The first managing director of the company shall be Samuel Samper, and the duties of the managing director for the time being shall be prescribed by the board.

57. At the ordinary general meeting of the company, to be held in the month of July, 1888, all the directors shall retire, but shall be all eligible for re-election, and at the ordinary general meeting of the company, to be held in the month of January, 1889, one third of the directors, or if their number is not a multiple of three, then the number nearest to but not exceeding one third shall retire, and at every subsequent ordinary general meeting one third or other number nearest to but not exceeding one third of the directors elected at the first ordinary general meeting shall retire until all the directors elected at the first ordinary general meeting shall have retired. The one third or other nearest number to so retire shall, unless the directors agree among themselves, be determinable by ballot. At every subsequent ordinary general meeting the one third or other nearest number who have been longest in office shall retire. Any director who shall be at any time re-elected shall be deemed to have been in office only from the time of such re-election. All vacancies in the board shall be refilled by ballot at next ordinary general meeting. All retiring directors shall be eligible for re-election, but no member shall be eligible for election or re-election at any general meeting as director unless he shall have left notice in writing at the registered office of the company at least fourteen days before such meeting of his intention to be a candidate for the office of director. And the board shall cause notice to be given to the members by advertisement not less than once in two separate issues of two of the Sydney daily newspapers of the names of all candidates for the office of director as soon as practicable after, but not before, the expiration of the time within which a member is bound under these presents to give notice of his intention to be a candidate, but no election of any director shall be invalidated by the fact that any shareholder has not received notice of such candidature.

58. If at any meeting at which an election of directors ought to take place, the places of the vacating director or directors, or any of them, shall not be filled up, the vacating director or directors, or such of them as shall not have had their places filled up, shall continue in office until the next general meeting for election of directors and so on from time to time until the places are filled up.

59. The continuing directors may act notwithstanding any vacancy in their body. Provided always that in case the directors shall at any time be reduced in number to less than three it shall be lawful for them to act as directors for the purpose of filling up vacancies in their body in manner hereinafter provided, but for no other purpose.

60. The first directors shall continue in office until disqualified, or until they retire as prescribed by these presents.

61. The shareholders in general meeting may from time to time increase or reduce the number of directors, and may determine in what rotation such increased or reduced number is to go out of office, and otherwise amend these presents to accord with the altered constitution of the board.

62. No member shall be qualified to act as director unless he shall have held at least 500 shares in the company in his own right for three calendar months prior to his election, and unless all calls, interest, and expenses due thereon shall have been paid, and the office of director shall be vacated :

If he ceases to hold in his own right at least 500 shares.

If he fails to pay any call within the time limited for payment thereof.

If he holds any office or place of profit under the company except that of managing director.

If he refuses to act in his office as director.

If without previous leave from the board, or such reason as the board shall deem sufficient, he absents himself from the meetings of the board for three successive months.

If he becomes insolvent, or compound with, or executes any assignment for the benefit of his creditors.

If he becomes insane, or is convicted of felony, or misdemeanour.

If without the knowledge and sanction of the board he contracts with the company, or is individually concerned in or participates in the profits of any contract with the company, or in the profits of any work done for the company, or if he is directly or indirectly interested in any loan or proposed loan from the company, or in any property given or proposed to be given to the company as security for any loan, or in any property contracted to be sold by or to the company. Provided that no director shall vacate office by reason of his being a member or shareholder of any incorporated company contracting with, or doing work for, or borrowing from, or buying from, or selling to the company, or participating in the profits of any contract with the company, provided he does not vote in respect of such contract, work, loan, purchase, or sale, and if he does so vote his vote shall not be counted.

63. The remuneration of the directors for their services until the first ordinary general meeting of the company in the month of July, 1888, shall be at the rate of £100 per annum to each director except the managing director, and the remuneration of the managing director shall be at the rate of £12 per week until the first day of September, 1888. The remuneration of the directors after the first ordinary general meeting of the company, and the remuneration of the managing director after the first day of September, 1888, shall be fixed by the company in general meeting.

64. In the event of any unforeseen vacancy occurring, the board may fill up such vacancy from among the members of the company, and such member so appointed shall for all the purposes mentioned in these presents be deemed to stand in the place of the director causing such vacancy.

65. The members at an extraordinary general meeting called for the purpose may, by a resolution passed by two-thirds at least of the members present personally, or by proxy representing at least two-thirds of the capital of the company, remove any director before the expiration of his period of office, and may, by any ordinary resolution, appoint any other person in his stead, but the person so appointed shall hold office during such time only as the director in whose place he is appointed would have held the same if he had not been removed.

66. Any director may at any time retire from office on giving written notice to the board.

67. The board shall have the following powers and authorities (that is to say) :—

- (a) To appoint from amongst their number a managing director upon such terms as the board may deem expedient, save as provided by these presents.
- (b) To conduct and manage generally the business and carry out the several objects of the company, and to exercise all the powers, authorities, and discretions of the company subject to the control of the company in general meeting, but no resolution of the company in general meeting shall invalidate any prior act of the board which would have been otherwise valid.
- (c) To appoint all the officers, agents, clerks, and servants of the company, and at any time to remove or suspend such officers, agents, clerks, and servants, and to fix the rate of their remuneration, and to prescribe their duties.
- (d) To purchase and take in exchange, or on lease, or otherwise acquire, and for any estate or interest therein, any real or personal estate of whatsoever nature which the company is authorised to acquire, and which they may think it requisite or expedient to acquire, and may at their discretion again sell, let, or dispose of any property so to be acquired either for cash or credit, and subject to such terms and conditions in all respects as the board shall think fit.
- (e) To commence, establish, institute, prosecute, and carry on any new business or businesses authorised by the memorandum of association of the company, and to regulate the manner of conducting and managing the same.
- (f) To raise or borrow from time to time, in the name and on behalf of the company, by mortgage, with or without power of sale of any part or parts of the real or personal property of the company, including future calls on shares by way of mortgage, or by terminable debentures, or bond bills or notes of the company, or otherwise such sum or sums of money as may be deemed necessary, and in the case of debentures to confer upon the holders thereof such rights and remedies or securities thereunder upon or against the property of the company as the board may think expedient, and in connection therewith to make such arrangements as may be deemed expedient for vesting any profits of the company in trustees, or otherwise, for the benefit and security of the holders of such debentures, and to accept the surrender of any shares upon such terms as the board may think expedient.
- (g) To enact rules, regulations, and by-laws for the conduct of the business of the company as a mining exchange, and generally to enact rules, regulations, and by-laws for the regulation of the business of the company, provided the same are consistent with the Companies Act and with these presents.
- (h) To declare dividends, or interim dividends, whenever, in the opinion of the board, the financial position of the company will justify such a course.
- (i) To execute generally all such powers of the company as are not by the Companies Act or by these presents declared to be exercisable only by the company in general meeting.
- (j) To draw, make, accept, endorse, on behalf of the company, any cheques, promissory notes or bills of exchange or other negotiable instruments.

68. All acts done at any meeting of the board, or by any person acting as a director, shall, notwithstanding that it shall afterwards be discovered that there was some defect in the appointment of any director or person acting as aforesaid, or that they, or any of them, were disqualified, be as valid as if every such person had been duly appointed and was qualified to be a director.

Secretary.

69. The secretary shall keep the books of the company, in which he shall enter the particulars of all shares and all transfers of shares, the calls paid or due on shares, and a note of such shares as may be forfeited, and such other particulars relative to the accounts of the company as the board may from time to time require. The secretary shall also keep a book or books, in which he shall enter the minutes of proceedings at all meetings of the company and of the board, and all such books shall be kept at the registered office of the company. He shall make out at least twice in every year, and prior to the holding of each of the ordinary general meetings hereinbefore mentioned a fair balance-sheet of the accounts of the company, and also a report of the position of the company, which balance-sheet and report shall be submitted to the ordinary general meeting, which shall be held next to the making out thereof, and shall give forward and publish all necessary notices in reference to meetings, calls, or any business of the company. Shall convene the meetings of the company and of the board. Shall collect and pay the accounts of the company. Shall see that the orders and directions of the meetings of the company and board are properly carried out, and shall make, file, and deposit all accounts and statements, and give all notices, and do all further acts which shall be necessary and ought to be done by a secretary in accordance with the Companies Act, and every amendment thereof, and the articles and regulations for the time being of the company. Provided always that in the management as aforesaid he shall be subject to the direction and control of the board.

70. The directors shall have power from time to time, at their pleasure, to suspend or remove the secretary and appoint a new secretary in his place, and may during the suspension, or temporary absence, or illness of the secretary appoint some person to perform the duties of secretary, who may do all such acts as could be lawfully done by the secretary of the company. Provided always that should the secretary be desirous of resigning his appointment, he shall give fourteen days' notice in writing to the board of his intended resignation. The board shall have full power and discretion to enter into any arrangement or arrangements with the secretary or his substitute as to remuneration for his services.

Common seal.

71. The common seal of the company shall be in the joint custody of the secretary and chairman, or acting secretary and chairman, and shall not (except in the case of share certificates) be affixed to any document, except by order of the board of directors. And to every deed or document to which the said seal shall be so affixed two of the directors, as well as the secretary or acting secretary, shall add their signatures.

Receipts.

72. The secretary, or acting secretary, or any other person authorised by the directors, may give receipts for any money payable to the company, and such receipt shall be sufficient discharge for the same. Subject to such regulations as may be made in that behalf from time to time by the board.

Proceedings of directors.

73. The directors shall elect a chairman from their number, and shall determine the period for which he shall hold office. In the absence of the chairman, the directors may elect one of their number to preside at such meeting.

74. The directors may meet together for the despatch of business, adjourn, and otherwise regulate their meetings as they may think fit, and may make such regulations for their guidance as they may think desirable. Provided they are not inconsistent with the Companies Act or with these presents. Provided that they shall meet at least once in each calendar month. All acts done and resolutions passed at any such meeting shall be considered as the acts and resolutions of the board. Questions arising at any meetings of the board shall be decided by a majority of votes, the chairman or other person presiding having in case of equality of votes a casting as well as a deliberative vote.

75. A director may at any time summon a meeting of the board by giving three clear days' notice thereof, but no resolution passed at a meeting so summoned shall be valid unless confirmed at the next regular meeting of the board except it be on some matter of urgency which requires to be done before such regular meeting is held.

76. The board shall cause minutes to be made in books provided for the purpose :—

Of all appointments of officers made by the board.

Of the names of the directors present at each meeting of the board.

Of all orders made by the board.

Of all resolutions and proceedings at meetings of the company and of the board.

Of all moneys ordered by the board to be paid

The said minutes shall be signed by the chairman, and any such minutes, if signed by the person purporting to be the chairman of any meeting of the company or of the board, shall be receivable in evidence without any further proof.

77. The board may appoint and remove the bankers and solicitors of the company.

78. All cheques and orders for payment, or for the delivery of property upon the bankers of the company, promissory notes, and bills of exchange, shall be signed by two of the directors and countersigned by the secretary or acting secretary for the time being, or shall be signed by such person or persons and in such manner as the board may from time to time prescribe

79. All moneys from time to time received by the board or any officer of the company shall be forthwith paid to the bankers of the company who shall have the custody thereof, and also of such other property of the company as shall from time to time be entrusted to them.

Investment of capital.

80. The capital and other money of the company shall be employed as follows :—

In carrying out the objects referred to in the memorandum of association.

In returning any portion of the capital of the company to the shareholders in proportion to their respective shares if and when the affairs of the company shall warrant the board in so doing.

81. The directors shall settle the form of documents to be used in the business of the company.

82. All dividends on shares shall be payable on all shares alike, both contributing and fully paid shares, and all dividends shall be payable out of profits only, and no dividend shall exceed the sum recommended to the meeting by the board. The board may, before recommending a dividend, set aside out of the profits of the company such sum as they may think proper towards the payment of preliminary expenses or as a reserve fund to meet contingencies or for equalising dividends.

83. The reserve fund shall be carried to a separate account in the books of the company to provide against any contingent demands upon the company and its investment shall be at the absolute discretion of the board, but a full statement relating to the investment of the same shall be laid before the members at every ordinary general meeting. In the event of a dissolution of the company, the fund shall form part of the capital.

84. No dividends or bonuses shall be paid to any member until all claims of the company on account of calls, interest, or otherwise against such member shall have been satisfied in respect of every share of which he is the holder or one of the joint holders.

85. Due notice of any dividend or bonus shall be given to each member, and all dividends and bonuses unclaimed for the period of two years after declaration may be forfeited by the board for the benefit of the company.

86. No dividend or interest shall bear interest as against the company.

Accounts and balance-sheet.

87. The following accounts shall be kept at the office of the company :—

Of the paid-up capital of the company.

Of all moneys received and expended.

Of the assets and liabilities.

Of all mortgages, deposits, debentures, bonds, and other obligations given by or to the company.

88. A balance-sheet, duly audited, which shall contain a true statement of the assets and liabilities of the company arranged under suitable heads, shall be laid before the members at each ordinary general meeting.

89. A printed copy of the balance-sheet shall be posted at Sydney to each member at least three days prior to each ordinary general meeting, but the non-receipt by any member of such balance-sheet shall not invalidate such meeting or the proceedings thereat.

Auditor.

90. There shall be two auditors of the company, one of whom shall be a professional accountant, but neither of whom need be and both of whom may be members of the company, and the accounts of the company shall be audited and verified by the auditors at least once in every calendar month, and oftener if the board shall think fit.

91. The auditors shall be appointed by the members at the ordinary general meetings, to be held in the months of January and July in each year, and shall hold office until the next following ordinary general meeting, when they shall both retire. Provided that every retiring auditor shall be eligible for re-election. Any auditor may at any time retire from office on giving written notice to the board.

92. The first auditors of the company shall be appointed by the board, and shall hold office until the first ordinary general meeting, to be held in the month of July, 1888.

93. No person shall be eligible for the office of auditor who is interested otherwise than as a member in any transaction of the company, and no director or officer of the company shall be eligible during his continuance in office.

94. The remuneration of the auditors shall be in the discretion of the board.

95. If any casual vacancy occurs in the office of auditor the board shall, as soon as conveniently may be, call an extraordinary meeting for the purpose of supplying the same. Provided that any auditor elected at such extraordinary general meeting shall only continue in office until the next ordinary general meeting, but shall be eligible for re-election thereat.

96. Every auditor shall be supplied with a list of all books kept by the company, and he shall, at all reasonable times, have access to such books and the accounts of the company. As soon as the balance-sheet has been prepared for each ordinary general meeting a copy shall be furnished to the auditors.

97. The auditors shall examine the books, vouchers, deeds, and all securities of the company, and shall compare the same with the balance-sheet and statement prepared for their inspection, and shall certify as to the correctness of the same by appending their signatures.

98. A written report shall be made to the members by the auditors, in which they shall declare that they have made a faithful and true investigation of all items contained in the balance-sheet, that they have examined all mortgage deeds and every other deed of security held by the company, and whether in their opinion the balance-sheet is a full and fair balance-sheet, containing the particulars required by these presents, and properly drawn up so as to exhibit a true and correct view of the company's affairs. Such report shall be signed by the auditors, and shall be read, together with the report of the Board, at each ordinary general meeting.

Attorney of member.

99. Any member being absent or about to absent himself from the Colony of New South Wales may appoint an attorney who need not be a member to act on his behalf at all meetings of the company held during his absence, but any such appointment shall be made by power of attorney duly executed and attested by at least one witness, and shall, at least forty-eight hours before the attorney shall be entitled to act thereunder, be deposited with the secretary of the company at the registered office, accompanied by such evidence of the due execution thereof, as the Board may require.

Trusts not recognised.

100. In no case shall the company be bound by or affected with notice express, implied, constructive, or otherwise, of any trust, charge, lien, or encumbrance affecting any share or other property.

Notices.

101. Any notice or other document necessary to be served by the company upon any member may be served either personally or by leaving it for or sending it through the post in a prepaid letter addressed to the member at his registered place of abode or business. And every notice or document sent through the post shall be deemed to have been served at the time at which in the usual course of post it or the letter containing it ought to have been delivered at the place to which it was addressed, and in proving such service by post, it shall be sufficient to prove that the notice or document, or the letter containing it, was properly addressed and put into the post office, and the postage thereon paid.

102. When two or more persons are jointly entitled to a share, any notice given as aforesaid to the person named first in the register of members shall be sufficient notice to all persons entitled to such share.

103. All members resident or going to reside out of the Colony of New South Wales shall name a place in the Colony at which the notices of the company shall be served, and in default of such place being named, a notice addressed to such member at the General Post Office, Sydney, shall be deemed sufficient notice.

104. Notices may be signed by the secretary or by any director or officer of the company by the direction of the board, and need not be under the common seal of the company.

Arbitration.

105. Whenever any difference arises between the company on the one hand, and any of the members, their executors, administrators, and assigns, on the other hand, touching the true intent or construction, or the incidents or consequences of these presents, or touching anything then or thereafter done, executed, or omitted, or suffered in pursuance of these presents or of the Companies Act, or touching any breach or alleged breach of these presents, or any claim on account of such breach or alleged breach, or otherwise relating to the premises, or to these presents, or to the Companies Act, or to any of the affairs of the company. Every such difference shall be referred to the decision of an arbitrator, to be appointed by the parties in difference, or if they cannot agree upon a single arbitrator, to the decision of two arbitrators, of whom one shall be appointed by each of the parties in difference, who, before they enter upon their duties of arbitration, shall appoint a third arbitrator, and the decision of any two of such or three arbitrators shall be binding and conclusive.

106. The costs of and incident to any such reference and award shall be in the discretion of the arbitrator or arbitrators, respectively, who may determine the amount thereof, or direct the same to be taxed as between solicitor and client, or otherwise, and may award by whom and to whom, and in what manner, the same shall be borne and paid.

107. The submission to arbitration shall be subject to the Act 31 Vic. No. 15, intituled, "An Act to make arbitration more effectual," or to any then subsisting statutory modification thereof, and shall be made a rule or order of the Supreme Court of New South Wales, upon the application of either party, and such party may instruct counsel to consent thereto for the other parties.

Power to alter clauses.

108. A general meeting shall from time to time have full power, by special resolution, to alter or repeal all or any of the clauses of these presents, and the laws, regulations, and resolutions which shall from time to time be made in pursuance of any power therein contained, or in force for that purpose, affecting the capital, profits, business or concerns of the company, and may from time to time pass any resolution or resolutions for the better management of the company, and the capital, profits, business, or concerns thereof, and the same shall be as binding and effectual, to all intents and purposes, as if the same were inserted and contained in the original articles of association.

Dissolution.

109. The dissolution of the company may be determined on by the company for any purpose whatever, and whether the object be the absolute and final extinguishment of the company, or the reconstitution or modification of the company, or the amalgamation of the company with any other company, or any other object, such dissolution shall only take place if a resolution in favour of dissolution shall be carried by three-fourths of the votes at an extraordinary general meeting convened with notice of the object, at which members representing at least three-fourths of the capital of the company shall be present in person or by proxy, and confirmed by a similar majority at a second extraordinary general meeting, at which members representing the same proportion of capital are present, convened in like manner, and held not less than one month nor more than three months after such first meeting. At such second meeting the company shall, by ordinary majority, prescribe the time at which the dissolution shall take place, and the manner of such dissolution.

110. Any member, whether a director or not, and whether alone or jointly with any other member or director, and any person not a member, may become the purchaser of the property of the company or any part thereof, in the event of a winding-up or a dissolution, or at any other time when a sale of the company's property or effects or any part thereof shall be made by the board, under the powers hereby or under the Companies Act conferred upon them.

Indemnity.

111. The directors, auditors, secretary, and other officers for the time being of the company acting in relation to any of the affairs of the company, and every of them, and every of their heirs, executors, and administrators, shall be indemnified and secured harmless out of the funds and profits of the company, from and against all actions, costs, charges, losses, damages, and expenses which they, or any of them, their, or any of their heirs, executors, or administrators shall or may incur, or sustain by, or by reason of any act done, concurred in, or omitted in, or about the execution of their duty, or supposed duty, in their respective offices or trust, except such (if any) as they shall incur or sustain by or through their own wilful neglect or default respectively, and none of them shall be answerable for the acts or defaults of the other or others of them, or for joining in the receipts for the sake of conformity, or for any bankers or other persons with whom any money or effects belonging to the company shall or may be lodged or deposited for safe custody, or for the insufficiency or deficiency of any security upon which any moneys of or belonging to the company shall be placed out or invested, or for any other loss, misfortune, or damage which may happen in the execution of their respective offices or trust, or in relation thereto, except the same shall happen by or through their own wilful default respectively.

Preliminary Expenses.

112. All reasonable preliminary expenses incurred on behalf of the company by the provisional committee are hereby confirmed and adopted by the company.

APPENDIX.

23

to wit.

In the matter of the Australasian Mining Exchange Company of Sydney (Limited), and in the matter of the Companies Act.

I CERTIFY that the Company styled the Australasian Mining Exchange Company of Sydney (Limited) is incorporated, and that the said Company is a limited company.

Dated at Sydney, this fifteenth day of March, in the year of our Lord one thousand eight hundred and eighty-eight.

E. G. WARD,
Registrar-General,
Acting as Registrar of Joint Stock Companies.

[To the evidence of Mr. W. S. Christie, 23 February, 1892.]

D.

Dear Sir,
 Re Australasian Mining Exchange of Sydney Bill, your notice addressed to our Mr. Sloane reached us this morning. We regret to say that Mr. Sloane is absent from Sydney (and he has taken no active management in the business for some considerable time), and it will therefore be impossible for him to attend your meeting to-morrow, 23rd instant. The shares held by us are a joint transaction, and belong to the business. Mr. Gair will gladly attend the meeting if invited to do so.
 Yours faithfully,
 GAIR, SLOANE, & CO.

F. W. Webb, Esq., Clerk of Legislative Assembly, Legislative Assembly Offices.

1891.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

REPORT FROM THE SELECT COMMITTEE

ON THE

BOROUGH OF NEWCASTLE ELECTRIC
LIGHTING BILL;

TOGETHER WITH THE

PROCEEDINGS OF THE COMMITTEE

AND

MINUTES OF EVIDENCE.

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED,
3 *September*, 1891.

SYDNEY: GEORGE STEPHEN CHAPMAN, ACTING GOVERNMENT PRINTER.

1891.

1891.

(SECOND SESSION.)

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES No. 17. THURSDAY, 20 AUGUST, 1891.

4. BOROUGH OF NEWCASTLE ELECTRIC LIGHTING BILL (*Formal Motion*):—Mr. Scott moved, pursuant to Notice,—
- (1.) That the Borough of Newcastle Electric Lighting Bill be referred to a Select Committee, with power to send for persons and papers, for consideration and report.
- (2.) That such Committee consist of Mr. Bruce Smith, Mr. Joseph Abbott, Mr. Melville, Mr. Hassall, Mr. Fegan, Mr. Barbour, Mr. Grahame, Mr. Wright, Mr. Langwell, and the Mover.
- Question put and passed.
-

VOTES No. 16. WEDNESDAY, 19 AUGUST, 1891.

16. BOROUGH OF NEWCASTLE ELECTRIC LIGHTING BILL:—Mr. Cullen presented a Petition from C. F. Stokes, Joseph Wood, W. K. Lockhead, Robert B. Wallace, and H. B. Cotton, Directors of the City of Newcastle Gas and Coke Company (Limited), in opposition to so much of the Borough of Newcastle Electric Lighting Bill as would authorise the Council to supply Electric Light for private purposes or to outside Municipalities, or to sell or lease fittings; and praying that leave may be granted them to be heard by counsel or attorney before any Select Committee having the Bill under its consideration.
- Petition received.
- Mr. Cullen (*by consent*) moved, That the prayer of the Petitioners be granted.
- Question put and passed.
-

VOTES No. 18. TUESDAY, 25 AUGUST, 1891.

7. BOROUGH OF NEWCASTLE ELECTRIC LIGHTING BILL:—Mr. Scott (*by consent*) moved, without Notice, That the Reports from, Minutes of Proceedings of, and Evidence taken before, the Select Committees on the "Borough of Newcastle Electric Lighting Bill," and the "Borough of Newcastle Electric Lighting Bill (No. 2)," respectively, of Session 1890, be referred to the Select Committee now sitting on the "Borough of Newcastle Electric Lighting Bill."
- Question put and passed.
-

VOTES No. 23. THURSDAY, 3 SEPTEMBER, 1891.

12. BOROUGH OF NEWCASTLE ELECTRIC LIGHTING BILL:—Mr. Scott, as Chairman, brought up the Report from, and laid upon the Table the Minutes of Proceedings of, and Evidence taken before, the Select Committee for whose consideration and report this Bill was referred on 20th August, 1891; together with a copy of the Bill as amended and agreed to by the Committee.
- Ordered to be printed.

(SECOND SESSION.)

 BOROUGH OF NEWCASTLE ELECTRIC LIGHTING BILL.

 REPORT.

THE SELECT COMMITTEE of the Legislative Assembly for whose consideration and report was referred, on 20th August, 1891, the "*Borough of Newcastle Electric Lighting Bill*," and to whom was referred, on 25th August, 1891, "*the Reports from, and Minutes of Evidence taken before, the Select Committees on the 'Borough of Newcastle Electric Lighting Bill,' and the 'Borough of Newcastle Electric Lighting Bill (No. 2)' respectively, of Session 1890*"—beg to report to your Honorable House:—

That they have examined the witnesses named in the List* (whose *See list, p. 5. evidence will be found appended hereto), and considered the Reports and Evidence referred to them; and the Preamble having been satisfactorily proved to your Committee, they proceeded to consider the several clauses of the Bill, in which it was deemed necessary to make certain amendments.

Your Committee now beg to lay before your Honorable House the Bill as amended by them.

DAVID SCOTT,
Chairman.

No. 2 Committee Room,
Sydney, 2nd September, 1891.

PROCEEDINGS OF THE COMMITTEE.

TUESDAY, 25 AUGUST, 1891.

MEMBERS PRESENT:—

Mr. Barbour,		Mr. Graham,
Mr. Langwell,		Mr. Scott.

Mr. Scott called to the Chair.

Entries from Votes and Proceedings appointing the Committee, and granting leave to the Directors of the City of Newcastle Gas and Coke Company (Limited) to be heard by Counsel or Attorney before the Committee,—*read* by the Clerk.

Printed copies of the Bill *referred*, together with original Petition to introduce same before the Committee; also the Petition from the Directors of the Newcastle Gas and Coke Company (Limited).

Present:—George Wallace, Esq., for W. H. Baker, Esq. (*Solicitor for the Bill*).

Room cleared.

Committee deliberated.

Resolved,—That the Chairman move in the House, That the Reports from, Minutes of Proceedings of, and Evidence taken before the Select Committees on the “Borough of Newcastle Electric Lighting Bill” and the “Borough of Newcastle Electric Lighting Bill (No. 2)” respectively, of Session 1890, be referred to the Committee.

[Adjourned till Thursday next at 10 o'clock.]

THURSDAY, 27 AUGUST, 1891.

MEMBERS PRESENT:—

Mr. Scott in the Chair.

Mr. Barbour,		Mr. Grahame,
Mr. Langwell.		

Entry from Votes and Proceedings referring the Reports from, Minutes of Proceedings of, and Evidence taken before the Select Committees on the “Borough of Newcastle Electric Lighting Bill” and the “Borough of Newcastle Electric Lighting Bill (No. 2)” respectively, of Session 1890,—*read* by the Clerk.

Printed copies of the Reports *referred* before the Committee.

Present:—George Wallace, Esq., for W. H. Baker, Esq. (*Solicitor for the Bill*), W. P. Plunkett, Esq., for H. J. Brown, Esq. (*Solicitor for the Directors of the City of Newcastle Gas and Coke Company (Limited) Petitioners against the Bill*).

Edward Scott Holland (*Newcastle Council Clerk*) called in, sworn, and examined by Mr. Wallace.

Cross-examined by Mr. Plunkett.

Witness withdrew.

John Rollo Rogers (*Alderman of the City of Newcastle*) called in, sworn, and examined by Mr Wallace.

Cross-examined by Mr. Plunkett.

Witness withdrew.

[Adjourned till 2 o'clock this day.]

The Committee re-assembled at the hour named,—

MEMBERS PRESENT:—

Mr. Scott in the Chair.

Mr. Barbour,		Mr. Fegan,
Mr. Grahame,		Mr. Langwell.

Present:—George Wallace, Esq., for W. H. Baker, Esq. (*Solicitor for the Bill*), W. P. Plunkett Esq., for H. J. Brown, Esq. (*Solicitor for the City of Newcastle Gas and Coke Company (Limited) Petitioners against the Bill*).

William Thomas Gibb (*Mayor of Newcastle*) called in, sworn, and examined by Mr. Wallace.

Cross-examined by Mr. Plunkett.

Witness withdrew.

[Adjourned till Wednesday next at 10 o'clock.]

WEDNESDAY, 2 SEPTEMBER, 1891.

MEMBERS PRESENT:—

Mr. Scott in the Chair.

Mr. Barbour,		Mr. Grahame,
Mr. Fegan,		Mr. Langwell.

Present:—George Wallace, Esq., for W. H. Baker, Esq. (*Solicitor for the Bill*), H. J. Brown, Esq. (*Solicitor for the Newcastle Gas and Coke Company, Limited) Petitioners against the Bill*.

Henry Buchanan (*Alderman, of the City of Newcastle*), called in, sworn, and examined by Mr. Wallace.

Cross-examined by Mr. Brown.

Witness withdrew.

Archibald Langwell, Esq. (*Secretary to the Newcastle Gas and Coke Company, Limited*), called in, sworn, and examined by Mr. Brown. Cross-

Cross-examined by Mr. Wallace.

Room cleared.

Preamble considered.

Question,—That this Preamble, stand part of the Bill,—put and passed.

Parties called in and informed.

Clauses 1 to 7 read and *agreed to*.

Clause 8 read, amended,* and *agreed to*.

Clauses 9 to 13 read and *agreed to*.

Clause 14 read, amended,* and *agreed to*.

Clauses 15 to 23 read and *agreed to*.

Clauses 24 read, amended,* and *agreed to*.

Clauses 25 to 40 read and *agreed to*.

Title read and *agreed to*.

Chairman to report the Bill with amendments to the House.

See Schedule of
Amendments.

SCHEDULE OF AMENDMENTS.

Page 3, clause 8, line 52. *Omit* "general municipal fund" *insert* "electric light account."
 " 5, " 14, line 15. *After* "above" *insert* "or below"
 " 6, " 24, line 29. *Omit* "five" *insert* "three"
 " 6, " 24, line 31. *Omit* "two years" *insert* "one year."

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

BOROUGH OF NEWCASTLE ELECTRIC
LIGHTING BILL.

THURSDAY, 27 AUGUST, 1891.

Present:—

MR. BARBOUR,
MR. GRAHAME,

MR. SCOTT.

MR. FEGAN,
MR. LANGWELL,

D. SCOTT, ESQ., IN THE CHAIR.

Mr. George Wallace, appeared for Mr. W. H. Baker, of Newcastle, the Solicitor for the promoters of the Bill.

Mr. Plunkett, appeared for Mr. Brown, of Newcastle, the Solicitor for the Newcastle Gas and Coke Company.

Mr. Edward Scott Holland called in, sworn, and examined:—

1. *Chairman.*] What is your occupation? I am the town clerk of Newcastle.
2. You have given evidence on previous Bills of this character? I have.
3. *Mr. Wallace.*] How long have you been town clerk? Between fifteen and sixteen years.
4. How long is it since the question of introducing the electric light into the city was first brought before the borough council? In May, 1889.
5. In what form was it submitted? It was submitted in the following resolution on the 20th May, 1889:—"That, in view of the early termination of the agreement with the Newcastle Gas Company with the council for the supply of gaslight in streets, it is desirable that some other mode of lighting be considered; and with this object in view, a committee of the whole council be called at an early date for the purpose of inquiring into the best way of lighting with electricity, and that such committee be empowered to obtain all reliable information as to the cost of proper plant, and the benefits derivable therefrom, and the success or otherwise in other places where the light has been tried; and further, that two aldermen be appointed to visit an inland town where its use has been practically illustrated, and report to the committee; and that such committee report the result of its observations to the council at its earliest convenience."
6. Was any report made by the committee on that matter? The committee did not go to any inland town. The council dealt with the question by a substantial motion in April, 1890.
7. Did the council finally deal with the question? They called for tenders, and a tender was accepted at that time.
8. Whose tender was it? That of Messrs. Kirkland & Co.'s (now Wescott, Marshall, and Adams), for £8,529 12s.

Mr.
E. S. Holland,
27 Aug., 1891.

- Mr. E. S. Holland. 9. What was the nature of the agreement with Kirkland & Co.? They were to run the plant for five years, or for any period, for the sum of £1,150 per annum.
- 27 Aug., 1891. 10. Did the council at that time purchase a site for the works? Yes.
11. Within the municipality? Yes.
12. In pursuance of that contract, have electric lighting works been erected? Yes.
13. When was the contract finished? About Christmas last.
14. Has the city been lighted with electricity since that time? It has.
15. That is, only the public lighting of the city? Yes; in addition to that, we have established arc lights in certain streets at an extra cost of £550.
16. Additional to the contract? Yes.
17. How many electric lamps have you for street purposes? 360 at present, that is, outside the arc lights.
18. How many arc lamps? Twenty-two. Orders have been given for forty more street lamps.
19. 400 street lamps were contracted for by Kirkland & Co.? Yes; and they are now erecting the extra forty lamps, in order to complete the contract number.
20. What is the candle power of these lights? Twenty-five-candle power.
21. What will the lighting power of the city represent when the additional forty street lamps are erected? About 10,000 lights, apart from the arc lamps, which are 2,000-candle power each.
22. The arc lamps represent 44,000 lights? Yes.
23. What is the difference between the lighting of the city now, and the lighting of the city under the contract with the Gas Company? The Gas Company supplies only 5,152 candle power nominally for 313 lamps.
24. What do you calculate the candle power of your electric lights to be? About 54,000.
25. Has the lighting, as carried out under this contract, been satisfactory? It has.
26. In your opinion, has the electric light been a success? It has, undoubtedly.
27. And an advantage to the inhabitants of the city? Yes the people think so.
28. You have had opportunities of gauging public opinion on the question? Yes, many.
29. From the knowledge which you have so gained, can you state that it has been a positive advantage to the inhabitants of the borough? Yes; they are very anxious to have the electric light introduced into their premises as quickly as possible.
30. The main objects of this Bill are to enable the borough council to supply private consumers with the electric light? Quite so.
31. Have you had an opportunity of judging of the proportionate cost between the electric lighting and the gas lighting of the city? Yes. The electric light costs £1,944 per annum at the present time.
32. Does that include all the contingent expenses? Yes. When the forty other additional lamps are erected, as they will be within a month, the cost will be the same.
33. The sum of £1,944 will cover the cost of 400 street lamps? Yes.
34. Have you included the cost of the arc lamps in that sum? Yes.
35. From the knowledge you have gained of the operation of the electric light in the city, do you think that if the council obtained the power to supply electricity privately, it could supply private consumers at a less cost than the Gas Company can supply gas? I think it would be about the same to private consumers.
36. If the borough council get the power to supply private consumers, will it increase the cost to the borough council? No; it would still cost £1,944 per annum.
37. The plant which runs the city lighting would also run the private lighting? Yes.
38. Has the establishment of electric lighting for public purposes been a saving to the ratepayers? The lighting rate is the same at present.
39. But you get considerably more light for the same cost? Yes; as soon as we can supply private persons with the electric light, it will reduce that cost very considerably. We expect to get the street lighting done for about 1½d. in the £.
40. In order to obtain the same amount of light for the city from the Gas Company, you would have to pay considerably more than you are now paying for the electric plant? Yes; we had 313 gas-lamps, at £5 10s. per annum, and nine other lamps at £7 15s. per annum. The cost of the lamps was about £1,990. The constant removals and repairs brought the amount up to about £1,900. We had 322 gas-lamps with fifteen-candle power nominally. Now we shall have 400 street lamps of twenty-five-candle power, and twenty-two arc lamps of 2,000-candle power.
41. You get more than double the light at the same cost? Yes.
42. With the reduced rate you expect to get by supplying private consumers, what will be the saving to the ratepayers per annum? £1,020.
43. That saving would still be extended in time to come? It would enable us to reduce the lighting rate to the public generally to about 1½d. in the £. When the council take over the plant altogether from the contractors, we shall be able to save what is now being paid to the contractors. We calculate that we shall be able to run the plant for about £950 per annum.
44. The contractors, under their contract are running the electric works? Yes.
45. Is it proposed by the council to take over the works, under the power given to them in the contract? As soon as it is reported as a going concern—that is when private lighting is supplied, and the extra lamps are erected.
46. You consider that when the plant is taken over from the contractors, there will be a still further saving? Yes, a saving of £1,000 per annum. It will cost us £950 to work the plant ourselves. We are paying £1,944 to the contractors now.
47. Mr. Plunkett.] What is the cost of the electric light as against the cost of gas? I can only speak so far as we have paid for public lighting. I cannot speak of private consumption.
48. What have you paid? For public lighting we have paid the Gas Company £1,769 6s. 3d. per annum.
49. Will the cost of the electric light be less than that? As soon as we are able to supply the electric light privately, it will be one-half £950 per annum.
50. Will the proposed charge be sufficient to pay the council, seeing that it is less than the charge in England? I do not know that it is less than the charge in England.
51. Do you know anything of the charge in England? I have seen papers as to private lighting in England and America.

52. Can you give us any idea of what you have seen? The English rate is from a farthing to $\frac{1}{2}$ d. per light per hour, on a basis of 1,000 hours. Mr.
E. S. Holland.
53. What will be the cost of the extra plant you will require? No extra plant will be required. It is all lying there waiting to be used for the number of lights which we contracted with the contractors. 27 Aug., 1891.
The part required for private lighting is not touched at present.
54. How many extra lights will this plant supply? It will supply forty extra street lights, and 750 private lights; that is what the contract is for.
55. Have the theatre people agreed to take the electric light? They did agree, but the contractors' price for internal fittings was beyond what the directors thought they could pay.
56. How many lights did the theatre want to take? 400.
57. There will be only 300 lights left for private consumers? It comes down to a very small thing if the theatre takes 400 lights.
58. I suppose you have seen the electric light very frequently in Newcastle? Yes.
59. How many times has it been out lately? I have never seen it out.
60. Do you live in Newcastle itself? No; at Waratah.
61. How far away is Waratah? Four miles.
62. Do you frequently come into town at night? My business takes me into town a good deal at night.
63. How many times a week? About twice. I have seen one arc lamp out, but I have never seen the electric light as a whole out.
64. *Mr. Grahame.*] You never saw a city better lighted in your life? I never did, and I have travelled nearly all over the world.
65. *Mr. Plunkett.*] How many private people have agreed to take the electric light? A number of people are sending in letters every day. Some letters go to the council and some go direct to the contractors, but we have more applications now for electric light than we can supply. The "Great Northern Hotel" wants 150 lights, the "Centennial Hotel" wants 100 lights, "Buchanan's Hotel" wants fifty lights, and so on.
66. Have you taken any professional advice in regard to this light? Yes.
67. Whose advice? We had Mr. Erskine as a consulting engineer; he is an electrician.
68. Have you had any independent advice apart from his? His advice was independent—he is an expert.
69. *Mr. Grahame.*] You engaged him specially to report on the electric lighting of the city? Yes.
70. *Mr. Plunkett.*] Do you know anything about electric lighting in other places, in Tamworth, Young, or Lambton? I know Lambton very well, I am frequently there.
71. Has it been a success there? It is a fine light.
72. Has it been a success financially? I do not know about that. It was a very big undertaking for a very small borough to attempt.
73. Do you not know as a matter of fact, that they have lost considerably at Tamworth? I do not know Tamworth at all.
74. Do you know whether they have lost at Young? No.
75. Or at Lambton? I only know that they have gone in for a large expenditure, and had to borrow money. Mr. Dent is firmly convinced of the benefits derived from electric lighting. He told me he thought the electric light was as good in Lambton as in Newcastle.
76. It might be as good, but does it pay up there? I do not know.
77. *Mr. Grahame.*] You are satisfied that your estimate for Newcastle is correct? Yes; it has been proved after six months trial.
78. *Mr. Plunkett.*] Is it not a fact that in Newcastle the electric lights go out constantly? I have never heard of it. One or two did at the start, owing to the circuit not being quite complete. In some cases they have to put four lights on to one post, because the orders have not been given to distribute them. Twenty lights compose a circuit, and if they are not equally distributed, it affects the light sometimes.
79. *Mr. Grahame.*] As town clerk, you have never had any complaints of the city being in darkness? Never.
80. *Mr. Plunkett.*] Are the mayor and aldermen satisfied with the electric lighting of the city? Yes. When the question first arose the voting was not quite even, but now there is a unanimous feeling in favour of the electric light.
81. Do you not know as a matter of fact that the mayor has stated that he has been informed by a competent person that the prices were ridiculously low, and that in the city of London the companies who supplied the light very cheaply were bankrupt? I believe the competent person was the secretary to the Gas Company.
82. You stated that you knew something about the price in England as compared with the price in Australia? We sent for printed documents in connection with electric lighting in England and America. We obtained information from various towns in America, and these printed documents were before the council when they were considering the question of private lighting.
83. Are the prices you intend to charge the same as, or less than the prices in England? They are sufficiently high to pay us a very good interest upon our outlay.
84. *Mr. Langwell.*] How many private lights do you estimate will be required for Newcastle? Newcastle is a very large place. We should have to duplicate the plant to supply Newcastle in accordance with the demand for the light. We have only 750 lights to spare at the present time, and we have applications for the whole of these lights.
85. Is your present plant capable of supplying the whole of Newcastle? No. We should have to get extra plant.
86. What would be the cost of supplying the whole of Newcastle? It would only be the cost of another dynamo. I suppose an expenditure of £350 would give 700 additional lights. We have the engine-power and the boiler-power at the present time.
87. It would cost the company £175 to light the theatre or a building of equal size with 400 lights; a dynamo would not cost £350 to supply 700 lights? The engine-power is there at the present time. All that we would have to purchase would be an additional dynamo which would run into £350 or £400.
88. How many lights would it supply? We should get 700 more lights at the same price as these lights cost.

- Mr. E. S. Holland.
27 Aug., 1891.
89. *Mr. Grahame.*] I suppose the borough council intend to supply the whole of the city if they get this Bill? Yes, as the people request it. We should not force the light upon the people—they would simply write in and ask to be supplied with it.
90. *Mr. Barbour.*] You are lighting the streets with electricity under an Act which you got a little while ago? No, under the Municipalities Act.
91. Has it been satisfactory to the public so far? Quite.
92. Has it also been satisfactory to the borough council? Yes.
93. You want now to supply private lighting as well as public lighting? Quite so.
94. Do you believe from your past experience that you can do that satisfactorily to the public? Yes.
95. And at a price not higher than the cost of gas? Not higher. And it will have the effect of reducing the lighting rate about one half.
96. Your plant is not sufficient to light the whole of Newcastle. Do you wish to make a further trial, and if it is satisfactory to extend your operations in proportion to the applications you receive for the light? Yes.
97. Have you heard of any substantial objections to the electric lighting? Not from private individuals.
98. On the whole it is very satisfactory? It is indeed.
99. *Chairman.*] What is the present lighting rate? 3d. in the £. As soon as everything is in working order—when we have the running of the plant in our hands and pay the working expenses, namely £950—we calculate that with the £1,000 derived from private consumers, we shall be able in a short time to take off the lighting rate altogether.
100. *Mr. Grahame.*] You would only require an extra dynamo to supply the borough? Yes.
101. *Mr. Wallace.*] The motive-power is all there? The motive-power is very high.
102. *Mr. Plunkett.*] Have you not to alter the lines or wires in crossing the streets? There are five places in Newcastle where the wires intersect the telegraph wires rather closely. We should have to alter those wires.
103. What will the cost be? £250 is the Government estimate.
104. *Chairman.*] It is quite probable that it may be less? Probably it will be £200.
105. *Mr. Barbour.*] Will you require to put up any additional wires? Not for public lighting.
106. For private lighting? As long as the matter is in the hands of the contractor he makes his own arrangements with parties.
107. If you get this Bill will you have to extend your wires? No.
108. Has any question arisen between the borough council and the Government as to the points where the wires are to be placed? They have pointed out specifically where the alterations are to be made.
109. Is the council willing to make the alteration? Yes.
110. *Mr. Wallace.*] I understand that some legal proceedings have been taken by the Government which will probably be settled in an amicable manner by the council obviating the difficulties which are represented to exist? It will be settled this week.

Mr. John Rollo Rogers called in, sworn, and examined:—

- Mr. J R. Rogers
27 Aug., 1891.
111. *Chairman.*] What is your occupation? I am a builder and contractor.
112. You are also a ratepayer in the city of Newcastle? I am a ratepayer, and also an alderman.
113. *Mr. Wallace.*] How long have you been an alderman? For the last five years.
114. How long have you resided in Newcastle? Twenty-eight years.
115. Were you a resident of Newcastle prior to the introduction of gasworks? Long prior to that time.
116. Have you seen the Bill introduced on behalf of the borough council to light the city with electricity? Yes.
117. As a matter of fact the city is now lighted with electricity? Publicly.
118. How long has it been so lighted? Since the beginning of the year.
119. Are you residing in the city itself? In the city proper.
120. You have had nightly opportunities, then, of seeing the operation of these lights? Yes.
121. From your knowledge of the lighting of the city with gas, do you think that the lighting of the city with electricity has been an advantage to the city? Personally, I have no doubt whatever about it. From my position as an alderman, coming in contact with the ratepayers, I know that it has given perfect satisfaction.
122. You have heard no expressions of opinion from the ratepayers in the direction of reverting to the use of gas? Quite the contrary. Some of those persons who were in doubt, and blamed the aldermen for experimenting with the ratepayers' money, are now satisfied that the council acted correctly.
123. Under this Bill the council propose to supply private lighting? Yes.
124. Do you think that that would be beneficial to the ratepayers? I do, on the ground that it is a step in the direction of co-operation. Any money which may be made by supplying private lighting will go to reduce the rate for public lighting, and consequently it will be a benefit to the whole of the people.
125. From your experience of the ratepayers, are you prepared to say whether public opinion generally is in favour of the council being empowered to supply private lighting? There seems to be no dissenting voice to the proposal outside those interested in the Gas Company.
126. Those having a pecuniary interest in the Gas Company? Yes; otherwise I do not know a single individual who objects to the Bill.
127. Have you ever known the electric lights in the city to be out? I think on one occasion, within a few months of the electric light being started, something went wrong through the slipping of a belt, and the lights were out for a couple of hours.
128. Do you mean the whole of the lights? Yes, I have a faint recollection of the whole of the lights being out for some two or three hours through the slipping of a belt.
129. Not from any defect in the machinery? No. In fact, during the phenomenally stormy weather lately, there have been very few cases where the electric lamps have been out—one or two solitary instances, I think.
130. That was attributable to the stormy character of the weather? It was most exceptional stormy weather.

131. Do you consider that with electricity a more satisfactory light is given through out the city? A much more satisfactory light. We have 3,000 more candle power than we had previously with gas.
132. That would be without the arc lights? That is with the arc lights. We have twenty-two arc lights of 2,000-candle power and 400 incandescent lights of twenty-five-candle power. I am given to understand that we had 51,520-candle power under the Gas Company. We have 54,000-candle power with the electric light.
133. Have you not ten times the candle power with the electric light than you had with the gas? You are right. I misread the figures. We had only 5,152-candle power with the Gas Company.
134. Are you aware if any petitions have been received by the borough council in favour of the Bill? I have a faint recollection that we did.
135. You do not know the particulars of the petitions? No.
136. *Mr. Plunkett.*] It has been stated that the city has ten times more light with the electric lamps than it had with the gas-lamps; in your opinion is that so? I do not know. I did not think there was ten times the amount of light. But if any previous witness has worked out the figures and said there is, I should not like to say that it is not the case.
137. *Mr. Grahame.*] There is a wonderful improvement in the lighting of the city? There can be no question about that.
138. *Mr. Plunkett.*] Can you tell me anything about the cost of electric light as compared with gas? As the year has not expired yet, we have had no official returns; but I am given to understand that there will be a slight increase of cost as far as the electric light is concerned, but not in comparison with the excess supply of light we get. We hope to remedy that by the amount we derive from private lighting.
139. Do you know if the council has taken any professional advice on the cost of this experiment? We took all the professional advice necessary prior to starting the experiment. But we hold that it is an experiment no longer.
140. Have you taken any trouble to test the statements of experts as to the cost of electric lamps? I have taken no trouble for the simple reason that we have paid officers whose duty it is to perform that work. I am relying upon their statements.
141. Do you know anything about the cost of electric light in England? No; that is not troubling me.
142. Have you seen any figures or statements in regard to the cost in England? No; because I have practical evidence in the statement of our paid officers closer home. I do not want to go to England. Circumstance may be altogether different there.
143. Have these officers ever brought under your notice the cost of the electric light in England? No.
144. As a matter of fact, you do not know whether the cost of the light would be greater in Australia than in England? As a matter of fact I am given to understand by our town clerk, who is our official authority in matters of this kind, that it is going to cost us about £200 more than the Gas Company's account comes to. I know perfectly well that we get a better return for our money in the larger amount of light we get. That perfectly satisfies me without going to England for the comparative costs of the light.
145. Do you not know, as a matter of fact, that the electric lights have been constantly out in the City of Newcastle? I know that it is not the case.
146. *Mr. Grahame.*] You have not heard any complaints from the ratepayers? Certainly not, I would if it were the case.
147. Do you live in the city? Within the bounds of the city, and my business takes me into town every night.
148. You have never heard any complaints about the lights being constantly out? No. I know of my own knowledge that it is not so.
149. Do you know how many private people have agreed to use the electric light? I could not tell the number exactly. I know that the applications are far in excess of the surplus light we have. Our only trouble at present is to know how to divide the light amongst the applicants so as to keep them all satisfied. The only way of solving the difficulty will be to increase our plant.
150. *Mr. Wallace.*] Do you know that the City of Newcastle Gas and Coke Company are the real opponents of this Bill? I believe they are. They are the only persons interested in opposing it that I know of.
151. As matter of fact was not a Bill introduced into the last Parliament by the City of Newcastle Gas and Coke Company for the purpose of obtaining powers to erect a plant to supply the Borough of Newcastle with the electric light? That is a fact and we successfully opposed the Bill.

Mr.
J. R. Rogers.
27 Aug., 1891.

Mr. William Thomas Gibb called in, sworn, and examined:—

152. *Chairman.*] What is your occupation? I am a furniture warehouseman.
153. You are the Mayor of Newcastle? Yes.
154. *Mr. Wallace.*] How long have you been Mayor? Since February last.
155. How long have you been an alderman? I am in my sixth year.
156. How long have you resided in Newcastle? About twenty years.
157. You have seen this Bill empowering the borough council to light the city with electricity? Yes.
158. How long is it since the question of electrically lighting the city was first introduced into the council? Eighteen or twenty months.
159. Were you an alderman at that time? Yes.
160. Were you then in favour of the proposal? No, I was a very strong opponent of it.
161. On what grounds did you base your opposition? As we had gasworks in the city, and as I looked upon electricity as being in its infancy, I thought it was rather rash for a city to rush into an experiment and that it would be better to allow other municipalities to experiment as they liked.
162. You did not approve of the council making an experiment with the electric light? Not then.
163. The borough council resolved to establish a plant for the electric lighting of the city? The council called for tenders for the lighting of the city with electricity.
164. How long has the city been lighted with electricity? Since January last.
165. As Mayor, knowing something about its expense, you have had opportunities of seeing the work of the electric light in the city? Yes.
166. From your observations, have you found any reason to change your views? I believe the electric light is the better light.

Mr.
W. T. Gibb.
27 Aug., 1891.

- Mr. W. T. Gibb.
27 Aug., 1891.
167. From your experience you are in favour of the further extension asked for in this Bill? Yes.
168. You think it will benefit the ratepayers to have the electric light supplied to private dwellings? Yes, it must materially reduce the price of the street lighting.
169. You are fully of the opinion that the introduction of the electric light into private establishments will considerably reduce the cost of lighting the streets to the ratepayers eventually? There is no doubt about it.
170. The electric light plant is now run by the contractors? Yes.
171. The borough council pay an annual sum to the contractors? We pay an annual sum for the running of the plant, and also for the interest on the amount of capital invested.
172. It is proposed in the Bill to take over the plant? We have not yet decided that question.
173. Under your contract you have the power of getting the company to run it for one or five years? Yes.
174. *Mr. Plunkett.*] I suppose you have taken the opinion of experts on the cost of the electric light? Yes.
175. Have you taken any steps yourself to test the accuracy of their statements? No.
176. How many private people have agreed to take the electric light from you? I cannot say. We have been informed by the Electric Light Company that a certain number of persons have applied for the electric light—I think about ten or twelve persons.
177. Will the new theatre company take the light from you? Their name is on the list of applicants.
178. Have they not, as a matter of fact, refused to take the electric light, and decided to take gas because it is cheaper? Not that I know of. If I may be allowed to speak from hearsay, I should certainly say they had not.
179. You have not heard that they have decided to take gas in preference to electricity? The architect for the Victoria Theatre told me only a week ago that they had decided to use the electric light.
180. Can you state the difference between the cost of electricity and the cost of gas at per lamp? The electric light is cheaper.
181. Will it not be necessary to strike a special rate for this electric light? No, nothing more than we had to strike to pay for the gas.
182. It would not be any higher than the present lighting rate? Not at the present price we are paying for it.
183. Have you any knowledge of the charge for the electric light in England? No, except from what has been told to me.
184. From your inquiries, have you not found out that the price you propose to charge is less than what is charged in England? I have been told so.
185. In the face of that, do you mean to say that it will pay you? Of course I am not an expert. I would take the opinion of an expert before my own opinion. I am not an electrician.
186. Surely you can answer the question from what you have heard? From what I have heard I should certainly say no; but the only authority I have for the statement is the secretary to the Gas Company.
187. *Mr. Grahame.*] Do you believe electricity would be better than gas? Yes.
188. *Mr. Plunkett.*] What would be the cost of the plant to supply the electric light to private persons? There will be no additional cost to supply 400 lights.
189. How many more lights do you propose to give? We have the power under our contract to have 400 additional lights.
190. How many more lights will the theatre company take? I cannot say.
191. Are you in favour of the electric light? I am in favour of the electric light being extended for the benefit of the ratepayers.
192. Do you, as Mayor, think it is advantageous to take the electric light over? I think it will be a big benefit to us to get the powers extended to us.
193. Is the electric light installed at Tamworth? I believe it is.
194. Do you know, as a matter of fact, whether it pays there? I do not.
195. Do you know anything about the electric light at Young? I have heard of it being installed there.
196. Does it pay there? I have heard that it is not paying.
197. Have you heard that it has paid at Lambton? I believe it has not. I have not seen the balance-sheets, and I speak only from hearsay.
198. Have you heard whether it pays at Penrith? No, it was only installed there recently.
199. *Mr. Grahame.*] Do you believe, from the demands which have been made for the electric light, that it will pay you well in Newcastle? Yes. There is no comparison between Newcastle and the places which have been named. Newcastle is a thickly populated city, whereas Lambton is only a little bit of a mining township and of course, the miners could not be expected to introduce the electric light into their homes.
200. *Mr. Plunkett.*] Have you heard that in Richmond, Melbourne, they have had to do away with the electric light, owing to its being a failure? No.
201. *Mr. Grahame.*] You are satisfied that it has been a success in Newcastle? So far it has been a success, I think. The ratepayers are well satisfied with it.
202. *Mr. Plunkett.*] Have you had any complaints from the ratepayers that electricity is more expensive than gas? From a few, but they are principally shareholders in the Gas Company.
203. From no other persons? From a few ratepayers, but nine-tenths of them are shareholders in the Gas Company.
204. Do you know, as a matter of fact, that Roberts' Hotel, in Sydney, has done away with the electric light on account of its cost? I have never been in Roberts' Hotel. I have heard that they have done away with electric light in the hotel, but for what reason I do not know. I know that Mr. Hagon the tailor, in King-street, has no desire to do away with the electric light.
205. Does Mr. Hagon run the electric light himself, or does he get the light from the Telegraph Department? I think he runs it himself.
206. You said it would be cheaper for private people to have the electric light than gas? I have not said that.
207. I ask you if it would be? I cannot answer the question.
208. Do you live in the town, or out of the town? Since March last I have lived out of the town.

209. Can you tell me the number of times upon which the whole of the lights have been out? With the exception of the nights when we have given permission to shut off, I am not aware of any.
210. Can you state the number of times individual lights have gone out? One light may go out occasionally here or there.
211. You have never known an occasion when it has been out constantly? I do not remember more than three or four lights being out at one time.
212. As a matter of fact, have not various complaints been made about individual lights going out constantly? There have.
213. Were they written complaints to the council? We have had a few written complaints. I am certain that three-fourths of the complaints, written or verbal, have been from shareholders in the Gas Company.
214. *Mr. Wallace.*] Are you aware that the City of Newcastle Gas and Coke Company, had a Bill introduced into the last Parliament, asking for the very powers for which your council are now asking, namely, to supply private residences with electricity? Of course I am.
215. You have been asked about electric light companies at home. Most of them would be dividend-paying companies, I presume? I do not know much about electric lighting companies at home.
216. *Mr. Barbour.*] As Mayor, I suppose you think it would be a step in the right direction for the municipality to have greater facilities for lighting the city than at present? Yes.
217. You are satisfied that if the Bill is passed, and you are able to supply to the extent of your present power, it will be a great saving to the public generally; and that if you extend your operations, the reduction in the lighting rate will increase in the same proportion? Yes.
218. You are not aware of any substantial opposition by the Newcastle people to this proposal? No; nine-tenths of the ratepayers are in favour of these powers being given to the council.
219. *Mr. Grahame.*] Do you believe that you will have such a demand for the electric light that you will have to increase your dynamos? I am sure we shall, It will be impossible to supply the present applications without increasing the plant.
220. *Mr. Barbour.*] There has been some little friction between the council and the Government electric department? Yes. At the present time the Government are applying for an injunction.
221. Are the council prepared to make the alterations which the Government want? The council are prepared, I believe, to get the contractors to make the alterations and to charge the difference that is required to the cost of the plant for which we are prepared to pay $8\frac{1}{2}$ per cent. This matter has not been definitely settled by the council, but that is the feeling of the majority of the council.
222. *Mr. Grahame.*] The council intend to satisfy the wishes of the Government? We do. We purpose to meet Mr. Cracknell next week, with a view of trying to settle the matter without going to court at all.
223. *Mr. Barbour.*] Has the intention of the council to supply private lighting been communicated to the Government? It has been communicated to the head of the department by asking for an interview, or the purpose of trying to settle the matter.
224. *Mr. Fegan.*] Have you received any applications from private persons for the electric light? About ten or twelve applications have been made to the Electric Light Company.
225. Are the applications made by business people or private residents? By business people, such as the Victoria Theatre Company, Mr. Walter Sydney, Mr. James Dalby, and others.
226. *Mr. Plunkett.*] What professional advice have you taken as to the success of the electric light financially? Nothing more than the advice of Mr. Erskine, the electric engineer in the first instance.
227. Have you taken the opinion of any other gentleman? No.
228. You have simply relied upon what he told you? Yes. Of course the council will take other opinions before it takes the plant over.
229. As a matter of fact, will you not have to largely increase the rates next year in order to pay for this present lighting? No.
230. It would not be any more than the present lighting rate? No. We have now from eighty to one hundred more lights than we had when we used the gas, but the present rate will pay for it all.
231. Have there not been various reports circulated about the present plant being defective—not strong enough for the present lights? No complaints have been made to me in an official manner.
232. Have you heard any complaints privately? I have not.
233. I suppose you go round among the townspeople during the day and discuss the municipal and other matters with them. Has no one told you or suggested that the plant is defective? No. We have certain persons who will express opinions on matters of which they have no knowledge.
234. *Mr. Fegan.*] There are fewer complaints now than there were when the light was first installed? Just so. In fact, we have less complaints about the electric lights going out than we had about the gas lights going out.

WEDNESDAY, 2 SEPTEMBER, 1891.

Present:—

MR. BARBOUR,
MR. FEGAN,

MR. SCOTT.

MR. GRAHAME,
MR. LANGWELL,

D. SCOTT, ESQ., IN THE CHAIR.

Mr. G. Wace, for Mr. Baker, of Newcastle, appeared as the solicitor for the promoters of the Bill.
Mr. Bro, of Newcastle, appeared as the solicitor for the Newcastle Gas and Coke Company.

Mr. Henry Buchanan called in, sworn, and examined:—

235. *Chairman.*] You reside at Newcastle, and are an alderman of the borough? Yes.
236. You have been Mayor of Newcastle? Yes; for the year 1888–9, and the year 1889–90.
237. You have carefully read the provisions of the Bill before the Committee? Yes.
238. You understand the provisions? Yes.
239. Has the lighting of the borough with electricity been before the council for any lengthened period? A little over two years.

Mr. H.
Buchanan.
2 Sept., 1891.

240.

Mr. H.
Buchanan.
2 Sept., 1891.

240. It has been fully discussed by the council during that period? Yes.
241. Were a number of committee meetings held to consider the question? Yes; a large number.
242. As the outcome of those meetings was a resolution passed by the council affirming the desirability of lighting the city with electricity? Yes.
243. And works have been established for that purpose under contract with Messrs. Kirkland and Co.? Yes.
244. And the city is now lighted with electricity? The public streets, and a few private places besides.
245. While the question was being discussed in the council, did you have ample opportunities of gauging public opinion as to the desirability of the council entering into the business? Yes. It was discussed in the public press as well.
246. Was it received favourably by the borough? Yes; by a large majority of the people.
247. You went into the question pretty thoroughly yourself while it was under discussion in the council? Yes.
248. You visited Melbourne and other places where the electric light is in operation? Yes.
249. Did your visits confirm you in your belief that it would be a beneficial thing for the city of Newcastle? Yes.
250. How long has the electric light been in operation in your city? Nine months.
251. Has it been satisfactory? Of course in the establishment of all these works there are little discrepancies, but, as a general rule, it has given satisfaction.
252. An occasional hitch has occurred, but generally it has given satisfaction? Yes.
253. From your experience of its practical operation, are you still of opinion that it is a beneficial thing for the city? Yes; both as regards light and finance.
254. You are aware that under this Bill the borough seek powers to supply the electric light to private persons? Yes.
255. Do you believe that that would be a benefit to the inhabitants? I do.
256. Would it decrease the cost of lighting the borough? Yes; by 50 per cent.
257. What is the present lighting rate? Threepence in the £. It required that amount to pay for lighting the city with gas.
258. Your opinion is that the cost of lighting the city, if these powers be granted, will be reduced to 1½d. in the £? Yes.
259. Can you give us any idea of the lighting power and its cost, under your contract with the Gas Company, and the lighting power with electricity and its cost? I made out a short statement this morning which I will read to the Committee. When the borough was lighted with gas we had 320 lamps of 5,120-candle power, distributed throughout our streets; since we established the electric light we have 400 incandescent lamps of 10,000-candle power, and twenty-two arc lamps of 44,000-candle power. The cost of the gas was nearly £2,000; the cost of the electric light will be £2,200, including 8 per cent. of the outlay. We have 1,100 lights which we can dispose of at 2s. 6d. per light per month. That makes a total of £1,644. To deduct from this amount 50 per cent. for extra work, and allowances to people taking a large supply would leave about £1,100, which would enable the council to reduce our present lighting rate to 1½d. in the £, or one half our present rate.
260. *Mr. Grahame.*] Without increasing the present machinery? Yes.
261. *Mr. Wallace.*] Are you aware of any complaints having been made to the council of lights going out? Some complaints have been made about odd lights being out, but that occurred when gas was used.
262. As regards the electric light there have been complaints about electric lamps going out, but there have also been complaints about gas-lamps going out? Yes.
263. Are the complaints as to quality, power, or what? Both as to quality and power.
264. And also as to the lights going out? Yes.
265. *Mr. Fegan.*] The complaints are not more numerous now than they were when gas was used? Not so much.
266. Are you aware that the city was ever in darkness since the electric light was established? No; not in total darkness, but certain sections have been in temporary darkness. One section was out on stormy night through the connecting wire of that section getting cut by the chafing of the wind.
267. You have large properties in Newcastle, both freehold and leasehold? Yes.
268. If these powers be given to the council, would you introduce the electric light into your own properties? Yes. One of my leasehold properties has twenty lights in now. I have eight lights in my own place.
269. *Mr. Grahame.*] You prefer electricity to gas? Yes.
270. *Mr. Fegan.*] How many applications have you received for the light from private individuals? From a large number.
271. *Mr. Wallace.*] From more persons than you can supply with your present plant? Yes.
272. *Mr. Brown.*] You say that 400 electric lights have 10,000-candle power;—how much candle power has each light? Twenty-five.
273. Are you sure? That is the information which is supplied to us.
274. Have you been to Wickham and compared the electric lights there with the gas-lights on the opposite side of the street? Yes; but there is an explanation attached to that. They put the system there without having converters. They took it direct from the cable, but they are putting on the converters this week. There are only four lights, I think.
275. Do you know how many times the lights on the Terrace have been out? I could not say exactly.
276. Too numerous to mention? Two complaints have come in from different ratepayers to my knowledge.
277. I can fix seven dates besides others which I did not note? I am not aware of the lights being out.
278. Are you not aware that one lamp was out on the 10th July last? I do not know, but that might happen any night. The life of an incandescent lamp is only 1,000 hours. It may run 1,000 hours before it breaks. The engineer cannot possibly know of a break for an hour or two.
279. *Mr. Grahame.*] You are asking for the same permission which the Gas Company asked for? Yes.
280. They asked for power to do what you are asking for power to do? Yes.
281. *Mr. Brown.*] You say that one of your leasehold houses has a number of electric lights? Yes.

282. Are you not aware that unfavourable comparisons have been made between that place and the place adjoining, which is lighted with gas? I have not heard of any.
283. You built a large hotel in Bolton-street;—have you laid on the electric light there? No.
284. Gas? I have laid on the gas pipes, because the plant we have could not supply the electric light. Only one cable has been laid down yet for private lighting, viz., along the main street. The main street would require more lights than the present plant could supply. It would be an indefinite period before I could adopt the electric light in my place.
285. Where does the deficiency in the means of supply arise? From want of power and machinery.
286. I thought you said the machinery you have would be ample to supply all these lights? Not for the whole city. It would take over 100,000 lights to light the whole of the city.
287. You would have to get a great deal more machinery? Yes, if the demand is greater than we are able to supply.
288. In Hunter-street, the main street, you have your electric light poles on one side? Yes.
289. The Government would not allow them to be placed on the other side? They did not object to the poles being on the other side of the street.
290. I thought some legal proceedings were taken against you? Yes, but only in respect of the crossings where something like 2,000 volt wires cross. It is not the low current wires they are fighting against. Only five crossings have been reported against. They want us to go underground at the crossings.
291. In order to supply both sides of the street, it will be necessary to put up a fresh set of poles and fresh wires? Not necessarily.
292. Why? We can take the supply across from the other side.
293. Underground? With the lower current.
294. What is the amount of your contract with Kirkland and Company? I think it is £8,500.
295. You have agreed to pay them a great deal more for the arc lights? Yes, £500; but it gives us 44,000 more candle power.
296. Is not a great deal of that candle power extinguished by the globe around the lamp? I am not aware. It is a subdued light; when the globe is off there is a glare.
297. How much a night does it cost for putting new carbon into these lights? It costs 11s. 6d. per pair.
298. The whole contract with these people is £9,000? Yes.
299. At least, those are all the bills they have sent in yet? That is all we agreed to pay.
300. You have to pay them 8½ per cent. on that? Yes.
301. What interest do you pay on the land you got? The usual bank interest. I think it is 6 per cent. on £1,000.
302. What do you pay these people for managing the work? I think it is about £1,150.
303. Do you know what the cost of renewals will be? Which renewals?
304. Wires to renew, and lamps to renew? They keep it in order for that amount.
305. For that year? For five years.
306. Are you sure? Yes, they keep all the machinery in good order for one or five years.
307. And supply you with lamps and all? Yes. The only extra contract is for the carbons.
308. *Chairman.*] The council can take the work over from the contractor at any time? Yes, on any day.
309. *Mr. Fegan.*] If a large number of applications were made it would pay you to get larger machinery to supply those lights? Yes.
310. *Mr. Grahame.*] You would require to get extra dynamos only? The same amount of labour would work double the machinery.
311. You have quite sufficient power to supply double the lights that you now supply? Quite sufficient boiler and engine-power, we should require to get some dynamos.
312. *Mr. Brown.*] Are you aware that the electric light has proved a failure in Young? No.
313. They have had to stop lighting the streets there in the middle of the night? They may have.
314. *Mr. Grahame.*] The consumption I presume is not sufficient there? I have not had any experience with other installations, except at Lambton.
315. *Mr. Fegan.*] Is it not a fact that your electric lamps are lighted longer than were the gas-lamps? Yes.
316. Is it not also a fact that very often we have the electric light when it is moonlight—when we did not have gas-light? Yes. It is lit every night with the exception of one or two nights at full moon, and then the company has to obtain the permission of the council before it can turn the lights out, and that is only done for the purpose of overhauling the machinery.
317. *Mr. Wallace.*] It has been run every full moon excepting last month? I think we have given permission three times to the company to shut down.
318. Under your contract with the Gas Company there were certain nights prior to full moon and certain nights after full moon on which the company supplied no light at all? Five nights in the month.
319. If on those nights it was cloudy or stormy, the city would be in darkness? Yes. The company offered to light the lamps if we would pay them £5 10s. a night, and give them due notice to do it.
320. That is, above their contract? Yes.
321. *Mr. Barbour.*] Did you include that extra amount in your estimate? Yes.
322. The electric light does not cost you anything extra? No.
323. On the whole, are you satisfied that electricity gives a better light than gas does for the people? Yes. I have had it for nearly six months in my own house and I feel the difference.
324. Are you satisfied with your own experience? Yes.
325. Would you return to gas if you had a choice to-morrow? No. There is no heat from the electric light, especially in the summer time it would be a blessing to the people.
326. Has the council received any general complaints with regard to the electric lights, or has there been just an occasional complaint here or there? Just an occasional complaint—no general complaint is made.
327. Do you think more complaints have been made by the public in regard to the deficient supply of the electric light than were made under the gas system? Not a half.
328. On the whole, you prefer electric lighting to gas lighting? Yes.
329. *Mr. Fegan.*] Did not letters appear in the press condemning gas lighting prior to electric lighting being introduced? Yes.
330. *Mr. Grahame.*] Is it not a fact that we continually received complaints as to the bad quality of the gas supplied by the Gas Company? Yes, that is my experience as an alderman.

Mr.
H. Buchanan.
2 Sept., 1891.

- Mr. H. Buchanan.
2 Sept., 1891.
- 331-2. *Mr. Brown.*] Do you know how far that is owing to defective piping—you know you see gas burning brilliantly in one place, and burning badly in another place? I do not think that applies, for when the light was good on the hill, it was bad in the low parts of the city, showing that the pressure was not sufficient. If it was good it would give a good light in the city as well as on the hill. It is well known that gas ascends to the highest point.
333. *Mr. Fegan.*] Near some of your freehold properties, they are building a court-house and other public buildings? Yes.
334. I suppose they expect the electric light to be used there? I do not know. Unless the council get these powers, they would not go in for the extra expenditure required to light the whole city.
335. *Mr. Wallace.*] Do you know of any concerted opposition of the people themselves to this Bill? No.
336. The only opposition to the Bill is raised—by whom? By the Newcastle Gas Company.
337. *Mr. Barbour.*] Is there any individual opposition? I have heard of none.
338. Has the difference with regard to the crossing of the wires, been arranged with the Government? At its last meeting the council resolved to meet the Government officer and Crown Solicitor, to arrange the difficulty. The Government made certain demands, and the council feel that it would be better to comply with those demands than go to law, as it would cost more to go to law than to make the alterations, whether we win or lose.
339. The council are disposed to meet the wishes of the Government? Yes.
340. *Chairman.*] There is every prospect of a satisfactory settlement being arrived at between the council and the Government? Yes.
341. *Mr. Fegan.*] Do you know who is responsible for calling the public meeting in the School of Arts, to consider the question of electric light? I could not say—no name was attached to the advertisement.
342. *Mr. Barbour.*] Was the public meeting adverse or favourable? It was adverse. The aldermen got a good deal of abuse from the people who attended this meeting. A good many of these persons were interested in the Gas Company.
343. *Chairman.*] Do you remember the names of some of the speakers on that occasion? I remember two names in particular—Mr. Brooks and Mr. Stokes.
344. Are they interested in the Gas Company? I would not swear. It is reported that they are.
345. *Mr. Barbour.*] Has any substantial objection arisen out of that meeting? No; the only objections have come from the Gas Company.
346. *Mr. Fegan.*] You could not ascertain the name of the convener of the meeting? No.
347. *Mr. Barbour.*] Are the Government satisfied with the arrangement which the council has made? As far as I know, and, judging by the report of the Government officer, which has been sent to us, the Government will be satisfied if we comply with their demands.
348. You are not aware of any objections which the Government have to the new Bill? I am not aware of any.
349. *Mr. Brown.*] Has any notice been given to the officers in charge of the water-works? Not that I am aware of.

Mr. Archibald Langwell called in, sworn, and examined:—

- Mr. A. Langwell.
2 Sept., 1891.
350. *Chairman.*] What are you? I am the Secretary to the Newcastle Gas Company.
351. Have you given evidence as to previous Bills of this character? I think not, as regards the last Bill of the council. I think the Chairman gave the evidence then on behalf of the company.
352. *Mr. Brown.*] The Newcastle Gas Company has expended a large sum in erecting works, and distributing gas throughout the Borough of Newcastle and surrounding suburbs? It has.
353. Does it supply gas to private individuals as well as for lighting streets outside the borough? Yes.
354. And within the borough does it supply gas to private individuals? Yes.
355. And for any public purpose? It supplies the railways.
356. Do not the railway people make their own gas? Yes, for lighting the cars, but they come to the company for gas to light the stations and signals.
357. Are you aware of the charges that the council proposes to make for supplying the electric light? Yes, the council has drawn out a sheet of the proposed charge for the electric light.
358. It has been published in the local newspapers? Yes.
359. Have you seen in English newspapers the charges made in England for similar work? I have.
360. How do the English charges compare with the proposed charges of the council? The proposed charges of the council are considerably less than the electric light can be supplied for at home.
361. Have you noticed in the reports how electric companies at home are progressing? I see that none of them are paying a reasonable return upon their outlay.
362. Can you say whether the expenditure in generating and distributing light in Newcastle will be less or more than it is in England? It ought to be considerably more on account of the higher wages, and the greater outlay on plant and machinery.
363. Have you had any opportunity of comparing the electric lighting of the streets of Newcastle with the gas lighting of the streets? Yes. It varies of course, sometimes these incandescent lamps are pretty good, but at other times they are not to be compared with gas-lamps in my opinion. I have heard the same opinion expressed by independent people.
364. In some cases you admit the incandescent lamp gives a superior light to the gas-lamp? Sometimes.
365. They are supposed to be considerably more candle power than the gas-lamps? They are supposed to be.
366. Have you had any opportunity of knowing how they keep alight? I know there is hardly a night but some of them are out.
367. Have you gone into the matter so as to be able to express an opinion as to whether the council could work the electric light profitably to the citizens? Well, comparing it with the English prices, I do not think it could be worked profitably. It cannot be done anywhere else that I am aware of in the Colonies and in other places at home. Barnett, for instance, near London, is the only place at home where the council has given the electric light a fair trial. They had it going for three years, and they were so dissatisfied with it that they have reverted to gas.
368. Were the council supplying the light themselves or getting it from a company? They were supplying it themselves. It is the only council at home which has given it a thorough test.

ON THE BOROUGH OF NEWCASTLE ELECTRIC LIGHTING BILL.

369. *Mr. Wallace.*] Do you mean that the council erected works, or that it took the light from a private company? From its own works.

370. *Mr. Brown.*] Do you know anything about the electric light at Young? I noticed in a newspaper a short time ago that they had to reduce the number of lamps, and also that, owing to the expense, they had to stop the supply after 12 o'clock at night.

371. *Mr. Barbour.*] Do you know anything of your own knowledge with regard to Young? The newspaper is the only thing I go by. This information was published in a newspaper which is in favour of the electric light.

372. *Mr. Fegan.*] Do you know the population of Young? I do not. But there are plenty other instances of its failure. It is a failure in Richmond, Victoria. At Lambton, last half-year, it cost £374 more than it returned.

373. *Mr. Brown.*] That is from their financial statement? Yes.

374. The Newcastle Gas Company are ratepayers? Large ratepayers.

375. And in the event of this scheme proving unprofitable to the council their rates will be increased as well as their profits diminished by the opposition? Yes.

376. *Mr. Wallace.*] So far as you know, has there been any body appointed to oppose this Bill before this Committee outside the Gas Company? Not that I know of.

377. During last Parliament a Bill was introduced on behalf of the Newcastle Gas and Coke Company? Yes.

378. It authorised the Newcastle Gas Company to light private residences with electricity? It did not authorise them—it asked for power to do so.

379. The company asked for power to supply the electric light, or any other light—any other illuminant, such as kerosene, for instance? Yes; anything.

380. May I ask what was the object for the company in asking for power to supply other light besides gas? The company considered that their natural business is lighting. If any other light came into vogue—and we cannot tell what a week may bring forth—of course the whole of their plant would be useless. Under these circumstances they thought they might ask for power to supply the electric or any other light.

381. Had that Bill passed, and the directors of the company thought that public opinion in Newcastle was in favour of that light, I presume they would have adopted that light? If they could have got a fair return for the money they would have.

Mr.
A. Langwell.
2 Sept., 1891.

1891.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

BOROUGH OF NEWCASTLE ELECTRIC LIGHTING BILL.

(PETITION FROM C. F. STOKES, JOSEPH WOOD, W. K. LOCKHEAD, ROBERT B. WALLACE, AND H. B. COTTON, DIRECTORS OF THE CITY OF NEWCASTLE GAS AND COKE COMPANY, LIMITED, IN OPPOSITION TO.)

Received by the Legislative Assembly, 19 August, 1891.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Directors of the City of Newcastle Gas and Coke Company, Limited,—

RESPECTFULLY SHOWETH :—

1. That the City of Newcastle Gas and Coke Company, Limited, was established in the year one thousand eight hundred and sixty-six, and has ever since been carrying on business and supplying gas for lighting the streets of the Municipality of Newcastle and some of the adjoining Municipalities, and also for lighting public and private buildings therein, and for heating and other purposes.

2. That the said Company has expended large sums in erecting the necessary plant, and in laying down several miles of piping, and in doing other work to enable them to supply their customers with gas.

3. That the said Company annually pays a large amount of rates in respect of its works to the Municipality of Newcastle.

4. That the Borough Council of Newcastle have caused to be introduced into your Honorable House a Bill to authorise them not only to light the streets of their own Borough with electric light, but also to supply electricity within or without the limits of the said Borough, and to borrow money, enter into contracts, sell or lease fittings, and do other matters incidental to such lighting and supplying; and also to amend the Municipalities Act and the law generally in other respects.

5. That your Petitioners respectfully urge that it is not desirable that a Borough Council should be authorised to expend Municipal funds in business speculations, and in competing with the private enterprises of ratepayers, not only within, but also outside the boundaries of their own Municipality.

Your Petitioners therefore humbly pray that your Honorable House will be pleased to reject so much of the said Bill as would authorise the said Council to supply electric light for private purposes, or to outside Municipalities, or to sell or lease fittings.

Your Petitioners further pray that leave may be granted to them to be heard by counsel or attorney before any Select Committee of your Honorable House having the said Bill under its consideration.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 5 signatures.]

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

CASINO SCHOOL OF ARTS ENABLING BILL.

WEDNESDAY, 16 SEPTEMBER, 1891.

Present:—

MR. EWING, MR. STEVENSON,
MR. FRANK FARNELL.

T. T. EWING, Esq., IN THE CHAIR.

Mr. George Kilminster sworn and examined:—

1. *Chairman.*] You come here as a representative of the Department of Public Instruction, with reference to a Bill in connection with the Casino School of Arts? Yes.
2. That Bill has been submitted to your Department? Yes.
3. For the protection of public rights you require some alterations made in the Bill? Yes; at the instance of the Minister.
4. Have you the proposed alterations with you? I have. What I have is a rough copy of what I have already communicated to you.
5. An amendment, submitted by your Department to me, is that at the end of clause 5 there should be inserted the following words: "and provided also that prior to any proposed mortgage being completed the consent of the Minister of Public Instruction for the time being shall be obtained in writing, after full statement to him, of the facts relating to such proposed mortgage;"—is that an addition that you want made? Yes.
6. In clause 6 I find that they require this addendum, "and provided that the consent of the Minister of Public Instruction shall be obtained as provided in the last preceding section?" Yes.
7. In clause 8 this addendum is required, "and as the Minister of Public Instruction shall approve?" Yes.
8. In line 47, clause 9, omit the word "elect," and insert the word "nominate?" Yes.
9. In line 48, clause 9, after the word "caused" insert "and if the Governor and Executive Council approve of the person or persons so nominated to be trustee or trustees as aforesaid, a notification to that effect?" Yes.
10. In line 48, clause 10, omit the words, "notice of such election?" Yes.
11. Those are all the alterations which the Department requires? Yes. There was another provision suggested by the Attorney-General, but I find that it is already in the Bill, in clause 7. The Attorney-General advised that for the protection of the purchasers under the Act provision should be made to discharge them from all the former trusts. I find that that is provided for in the clause in these words, "and no person who shall advance money upon the security of any mortgage purporting to be made under the power hereby given shall be bound to inquire as to the advisability or propriety of the raising of such money."
12. With those alterations you consider that the Bill will be all that is necessary for the protection of the public in this matter? Yes.

Mr. G.
Kilminster
16 Sept., 1891.

Mr.

Mr. Frederick George Crouch sworn and examined :—

- Mr. F. G. Crouch,
16 Sept., 1891.
13. *Chairman.*] You have come here with regard to the Bill to “declare the trusts of the site of the Casino School of Arts,” &c. ? I have.
14. What is your position ? I am president of the institution.
15. You have a good knowledge of all the affairs connected with it ? Yes ; I have been connected with it ever since its inception.
16. We should be very glad if you would make a short statement ? The committee of the Casino School of Arts are anxious to add to the present buildings in order to afford greater facilities for the purposes of the institution—to increase its usefulness in many ways, by the erection of class-rooms and other additional rooms which at the present time are very much needed. A portion of the old building is in such a dilapidated state that it must be taken down, otherwise it will very shortly fall down. Utilising the frontage to the main street, we wish to put up an imposing building which will not only afford the facilities that the committee require, but which will also add very much to the revenue of the institution generally. In speaking of the institution itself I may say that there are at the present time 136 members on the roll. We have in the library some 1,700 volumes, and to show the rate of progress of the institution I may mention that in 1881 we had only sixty members on the roll and 600 books in the library. We have erected a new building on the land at a cost of £2,021, and furnishing about £200 extra, on which we have a liability at the present time of about £1,100. By the erection of a new building such as the committee propose, we may add the additional rooms that are now urgently required for the purposes of the institution, and by letting the ground floor for shops or offices we shall have an assured revenue that will considerably more than pay the interest on the entire debt, and enable the committee to pay off the whole capital value not only of the buildings at present erected but also of the additional ones proposed to be erected. The present committee, myself and others, are now personally liable for the debt upon the institution, and have been so from the first. But when I mention that the original debt was some £2,250, and that it has been reduced to something under £1,100 in the course of six years, this Select Committee must see at once that we have not only paid our way but have so reduced the liability of the guarantors that in a very few years the entire debt will be wiped out. There is actually no risk at all. In fact the manager of the bank assured me that he had no better-managed account in his ledger, as it were, than the present School of Arts account. At a committee meeting at which I was present the committee, after going carefully into the particulars of the matter, unanimously decided upon taking steps to get a Bill passed by Parliament for the purposes stated in the preamble of this Bill, and subsequently the members of the institution were called together, at which meeting I was also present, and they were unanimously in accord with the desire of the committee to take the step contemplated. I have here our last balance sheet, if the members of this Select Committee would like to see the figures, to show that my statements are in accord with facts. In reference to the appointment of trustees we ask for power to elect trustees on its becoming necessary to do so, either because of the death or resignation of some of the present trustees, or because of their removal from the district, and because of their becoming incapacitated. At the present time one of the trustees who is very old is unable to leave his home in the outskirts of the district, and is practically of no use at all to the committee. The other two trustees, Mr. Grime and Mr. Barling, have removed from the district some years. The original deed of trust, of course, gives the power of appointing trustees, but only in case of death or resignation. These gentlemen have removed from the district and do not really want to be superseded, or do not want to have their names cancelled and others appointed. I think the Minister objected to the provision in the Bill on the score that the original deed of trust gives power for the appointment of fresh trustees, but that is only in case of death or resignation. We want the power in case the trustees remove from the district or become incapable from any cause. The committee should have the power to nominate, subject to the approval of the Minister.
17. *Mr. Stevenson.*] Is the site central ? It is a very central one ; I know of none better.
18. Are you aware of any objection on the part of any of the members ? No ; on the contrary they are entirely in accord with the action of the committee in this matter.
19. *Chairman.*] This is the only way which you see of utilising your property ? Yes ; it is the only way we have, because there is a part of the present site that is entirely unutilised in any way.
20. *Mr. Stevenson.*] Do you propose to erect a large hall in connection with the institution ? No ; we think our present hall will be sufficient, but we want class-rooms.
21. You have a hall at the present time ? Yes.
22. What rent do you derive from the hall ? About £80 a year.
23. Is the site an elevated one ? Yes ; it is the highest in the town, and free from all floods. It has never been known to have a flood over it.
24. What is the area of the land ? Half an acre, with about 2 chains frontage to the main street, and the land, placing a very low estimate on it, according to the present times—of course there has not been a boom lately—would be cheap at £20 a foot.
25. What frontage is there ? We have about 132 feet frontage, I think, to the main street.
26. *Chairman.*] What limit do you think your mortgage should have ? About £3,000—not certainly to exceed £4,000.
27. *Mr. Stevenson.*] What sum are the committee desirous of borrowing ? About £3,000. That is the sum that it was thought would be sufficient, but in order to keep pace with the progress of the place I think it might be necessary to spend a little more, and I shall like the amount authorised to be a sum not to exceed £4,000.

Mr. Robert Page sworn and examined :—

- Mr. R. Page,
16 Sept., 1891.
28. *Chairman.*] You are one of the vice-presidents of the institution ? Yes.
29. Have you a good knowledge of Casino ? Yes ; a very fair knowledge.
30. And a full knowledge of the working of the institution ? Yes.
31. You believe this Bill is absolutely essential in the public interest ? Yes ; to make the institution more useful to the public.
32. *Mr. Farnell.*] Have you heard anyone make any objection to the Bill ? Nobody at all, so far as either the members or the committee are concerned.

33. You think it will assist materially to make the institution a success if you get the powers asked for under the Bill? I am quite sure it will. Mr. R. Page.
34. *Mr. Stevenson.*] Were you present at the meeting of the committee when it was decided to ask for these powers? Yes; both at the meeting of the members and of the committee. The proposition was adopted by the members unanimously, and by the committee afterwards. 16 Sept., 1891.
35. *Mr. Farnell.*] Do you think it is desirable for this Select Committee to provide a limit in the Bill as to the amount which the committee of the School of Arts may borrow? I do not think so. I think that will be governed to a large extent by the parties who lend the money. I hardly think a limit would be necessary, for the property has a certain marketable value, and I presume we could not go beyond that at any time; but I think that there is no objection on the part either of the committee or of the members to a limit being fixed.
36. *Mr. Stevenson.*] What amount did the committee propose to borrow; was any amount suggested? They do not propose to borrow anything at the present time. The real object of the Bill is to enable them to utilise vacant land. At the present time we have no right to lease the land. We can make no use of it. We can only have, as it were, weekly tenants as regards the rooms let in the institution; that is a couple of shops on the lower storey. We can give no decided tenancy; only one from week to week, and we could get better terms if we could give a lease for one, two, or three years.
37. *Chairman.*] Mr. Crouch has said that the institution is a flourishing concern; you agree with him in that? Yes. In about two years they have cleared off about £900 of the debt.
38. *Mr. Stevenson.*] I suppose the hall is frequently let? Yes; pretty often.

1891-2.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

COLONIAL SUGAR REFINING COMPANY BILL.

(PETITION FROM THE MUNICIPAL COUNCIL OF SYDNEY, AGAINST.)

Received by the Legislative Assembly, 10 March, 1892.

To the Honorable the Speaker and the Honorable Members of the Legislative Assembly of the Colony of New South Wales, in Parliament assembled.

The Petition of the Municipal Council of Sydney,—

HUMBLY SHOWETH :—

1. That your Petitioners notice by advertisement in the New South Wales *Government Gazette* that application is intended to be made by the Colonial Sugar Refining Company (Limited) for a Bill to authorise the said Company to close a roadway terminating at and by the lands of the said Company, and forming part of Chowne-street, Ultimo, in the City of Sydney, and of vesting the land now forming the said roadway in the said Company for an estate in fee-simple in possession, and for other purposes in the said Bill mentioned.

2. That the said roadway is a public way in the City of Sydney aforesaid, and that all public ways in the said City are vested in your Petitioners who are charged with the care, construction, and management thereof.

3. That the said roadway has been vested in your Petitioners for many years past as a public way, and that your Petitioners have expended from time to time large sums of money in forming, ballasting, metalling, kerbing, and guttering, and drainage of the said roadway.

4. That your Petitioners have laid down drainage works under the said roadway, and have connected the same with other drainage works upon private land adjoining thereto, your Petitioners having to pay for the right to place drainage works on such private land.

5. That in the event of the said roadway being closed and vested in the said Company, your Petitioners will have very great difficulty in draining the locality adjacent, and then only by carrying the same through private lands, for which your Petitioners will have to pay large sums of money.

6. That it is in contemplation by your Petitioners to continue the said roadway to Harris-street, which when completed will be a great convenience to the public.

That your Petitioners therefore humbly pray for the foregoing and other reasons that your Honorable House will not pass the said Bill into law.

And your Petitioners, as in duty bound, will ever pray, &c.

W. P. MANNING,
Mayor.

| Mr. Miller.

Present:—Ernest Broad, Esq. (*Solicitor for the Bill*).

The Chairman read a letter which had been addressed to E. P. Capper, Esq., Chairman of Maitland Gaslight Company, by James S. Fitzmaurice, stating that in his opinion the maximum price to be charged for electric light should be one shilling per Board of Trade unit (1,000 volt amperes).

Bill further considered.

Clauses 16 17, 17 18, 18 19, 19 20, 20 21, 21 22, read and *agreed to*.

Clause 22 23 read, amended,* and *agreed to*.

Clauses 23 24, 24, 25, 25 26, 26 27, 27 28, 28 29, 29, 30, 30 34, read and *agreed to*.

New clause to stand clause 2, read, amended, and *agreed to*.

New clause to stand clause 4, read and *agreed to*.

New clause to stand clause 31, read and *agreed to*.

New clause to stand clause 32, read.

Mr. Gillies moved the omission in line 2 of the words "three years," with a view to the insertion of the words "two years."

Question,—That the words proposed to be omitted stand part of the clause,—put.

Committee divided.

Ayes.	Noes.
Mr. Dawson,	Mr. Gillies,
Mr. Kelly.	Mr. Miller.

And the numbers being equal, the Chairman gave his casting vote with the ayes, and declared the question to have passed in the affirmative.

Clause *agreed to*.

New clause to stand clause 33, read, amended, and *agreed to*.

Title read and *agreed to*.

Chairman to report the Bill with amendments to the House.

*See Schedule of Amendments.

SCHEDULE OF AMENDMENTS.

Page 1, clause 1, line 44. *After* "apparatus," *insert* "Before the said Company proceed to open or break up any street, they shall give to the Council, or to their clerk, surveyor, or other officer notice in writing of their intention to open or break up the same, not less than seven clear days before beginning such work, except in cases of emergency arising from defects in any of the electric lines or other works, and then so soon as may be possible after the beginning of the work or the necessity for the same shall have arisen. No such street shall, except in case of emergency, be opened or broken up, except under the superintendence of the Council or of their officer, and according to such plan as shall be approved of by such authority or their officer: Provided always that if the Council or their officer fail to attend at the time fixed for the opening or breaking up of any such street, after having such notice of the Company's intention as aforesaid, or shall not propose any plan for breaking up or opening the same, or shall refuse or neglect to superintend the operation, the Company may perform the work specified in such notice without the superintendence of such Council or its officer."

Notice to be served on the Council before breaking up the streets.

Streets not to be broken up except under the superintendence of the Council unless in case of emergency or of their failing to attend.

Page 2, clause 2, *omit* clause.

Page 2. *Insert* new clause, to stand 2:—

2. When the Company opens or breaks up the road or pavement of any street, they shall, with all convenient speed, complete the work for which the same shall be broken up, and fill in the ground, and reinstate and make good the road, pavement, bridge, sewer, drain, or tunnel so opened or broken up, and carry away the rubbish occasioned thereby, and shall at all times, whilst any such road, pavement, bridge, sewer, drain, or tunnel shall be so opened or broken up, cause the same to be properly guarded, and cause a light sufficient for the warning of passengers to be set up and maintained against or near such road, pavement, bridge, sewer, drain, or tunnel where the same shall be open or broken up every night during which the same shall be continued open or broken up, and shall keep the road, pavement, bridge, sewer, drain, or tunnel which has been so broken up in good repair for three months after replacing and making good the same, and for such further time (if any), not being more than twelve months in the whole, as the soil so broken up shall continue to subside.

Streets broken up to be reinstated without delay.

Page 2. *Insert* new clause, to follow clause 3:—

4. If the said Company open or break up any street without giving notice as aforesaid, or in manner different from that which shall have been approved of or determined as aforesaid, except in the cases in which the said Company are hereby authorized to perform such works without any superintendence or notice, or if the said Company make any undue delay in completing such work, or in filling in the ground or reinstating or making good the road or pavement so opened or broken up, or in carrying away the rubbish occasioned thereby, or if they neglect to cause the place where such road or pavement has been broken up to be properly guarded and lighted, or neglect to keep the road or pavement in repair for the space of three months next after the same is made good, or such further time as aforesaid, they shall forfeit to the Council a sum not exceeding five pounds for every such offence, and they shall forfeit an additional sum of five pounds for each day during which any such delay as aforesaid shall continue and after they shall have received notice thereof. If any such delay or omission as aforesaid take place the Council may cause the work so delayed or omitted to be executed, and the expense of executing the same shall be repaid to such Council by the Company.

Penalty for delay in reinstating streets.

In case of delay Council may reinstate and recover the expense.

- Page 2, clause 56, lines 55 to 57. *Omit* "and to let any such apparatus for hire for such sums as may be agreed upon which sum may be recovered in like manner as any rent or remuneration for the supply of electricity"
- " 3 " 56, line 46. *Omit* "ten" *insert* "five"
- " 4 " 67, " 3. *After* "giving" *insert* "seven days previous"
- " 4 " 67, " 9. *Omit* "eight" *insert* "nine"
- " 4 " 67, " 9. *Omit* "six" *insert* "five"
- " 4 " 67, At end of clause *add* "Provided that the said Company shall make good any damage occasioned by the removal of the said electric main, pipes, burners, fittings, wires, lamps, globes, meters, or other apparatus"
- " 4 " 10 11, line 47. *Omit* "five years" *insert* "one year"
- " 4 " 10 11, " 48. *Omit* "two years" *insert* "one year"
- " 5 " 13 14, " 48. *Omit* "ten" *insert* "thirty"
- " 5 " 13 14, " 52. *Omit* "that sum" *insert* "ten pounds"
- " 7 " 22 23, " 17. *After* "paid" *insert* "by the said Company"
- " 7 " 22 23, lines 18 to 20. *Omit* "at the rate of two guineas for every day on which he is so engaged one moiety to be paid by the said Council, and the other moiety by the said Company"

Page 8, *insert* new clause to stand clause 31:—

Charge for Electricity.

The said Company shall not in making any agreements for a supply of electricity show any undue preference to any person but save as aforesaid they may make such charges for the supply of electricity either by a time meter which simply registers the number of hours during which electricity is consumed. or at so much per lamp per annum, or may make special contracts for the supply of electricity to the said Borough Council, or for motive power as for industrial purposes as may be agreed upon between the said Company and the consumer, but if no agreement is made as to the supply of electricity then the charge for the same shall not exceed one shilling per unit of one thousand volt amperes.

Page 8, *insert* new clause, to stand clause 32:—

Powers of Company to cease in the event of their not completing works within three years.

The said Company shall and are hereby required to bona fide complete their works within "three years" from the passing of this Act, and in the event of their failing to do so and of such failure being certified under the common seal of the Borough Council and published in the *Government Gazette* and a newspaper published in West Maitland, all the powers and authorities conferred by this Act shall thereupon *ipso facto* cease and determine to all intents and purposes whatsoever.

Page 8, *insert* new clause to stand clause 33:—

Power of the Borough Council of West Maitland to purchase at prescribed periods.

The Borough Council of West Maitland may, after the expiration of five years from the date of the passing of this Act, or at any time thereafter by giving six months notice in writing, require the said Company to sell, and thereupon the said Company shall sell, to the said Borough Council the electric lighting apparatus and electric lighting business of the said Company upon the terms of paying to the said Company the then value thereof, such value in case of difference to be determined by three arbitrators, or any two of them, one of whom shall be appointed by the said Borough Council so purchasing, another by the said Company, and the third by such other two arbitrators before they proceed in the arbitration. If either the said Borough Council so purchasing or the said Company shall neglect or refuse to appoint an arbitrator pursuant to the above provision for two calendar months after the other of them shall have appointed an arbitrator and given notice thereof to the other of them, then the arbitrator already appointed shall appoint a second arbitrator, and such two arbitrators shall jointly appoint the third arbitrator. When any such sale has been made all the rights, powers, and authorities of the said Company in respect to the electric lighting apparatus and electric lighting business shall be transferred to, vested in, and may be exercised by the said Borough Council.

As to appointment of arbitrators.

When sale made, rights, &c., of Company to vest in, and may be exercised by Borough Council.

LIST OF WITNESSES.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

MAITLAND ELECTRIC LIGHT BILL.

THURSDAY, 27 AUGUST, 1891.

Present:—

MR. MILLER,		MR. KELLY,
MR. WILLIAMS,		MR. GILLIES,
	MR. DAWSON.	

HENRY DAWSON, ESQ., IN THE CHAIR.

Mr. E. Broad, solicitor, appeared on behalf of the promoters of the Bill.

Edward Peter Capper called in, sworn, and examined:—

1. *Mr. Broad.*] You are Chairman of the Maitland Gaslight Co. (Limited), the promoters of this Bill? I am.
2. Were you chairman at the time the company was incorporated? No.
3. The company was incorporated, I believe, by an Act of 37 Victoria? Yes.
4. For the supply of gas for lighting purposes for the borough of Maitland? Yes.
5. Do the company now propose that they shall have power to use the electric light in conjunction with or separately from gas? In conjunction with gas.
6. Has there been any public demand leading to the promotion of this Bill? There has.
7. By the shareholders of the company, or by the public at large? By both.
8. Has there been any meeting of the shareholders of the company at which the question has been discussed? There has.
9. And their opinion is in favour of proceeding with the Bill? It is.
10. Has there been any objection raised to the Bill on the part of the Borough Council? No.
11. The Bill has been before the public for some considerable time by means of advertisements? Yes.
12. And you have not heard of any serious objection on the part of any body of persons to the company having the powers asked for in this Bill? No.
13. From your knowledge of electric light and of gas, are you of opinion that it would be to the advantage of your borough that the company should have power to supply the electric light? Yes. I am greatly in favour of the electric light myself.
14. And you believe that it would be for the benefit of the shareholders of the company that they should have this power? Yes.
15. I see it is proposed by the Bill that you should complete your works within two years from the passing of the Act;—is not that rather a short time? Yes. We should like a little longer.
16. Would it not be better, in your opinion, if the Bill provided that you should commence your works within two years? I think the company would like that better. They have a good deal of work on hand at the present time.

Mr.
E. P. Capper.
27 Aug., 1891.

- Mr. E. P. Capper. 17. It might be inadvisable for you to attempt to complete the works within the short period named? Yes. We have a contract now with the Borough Council for the supply of gas.
- 27 Aug., 1891. 18. You have recently entered into a contract for the supply of gas to the borough for a period of three years? Yes; the contract has been accepted for three years.
19. There might be some difficulty, having regard to that contract, if you were compelled to complete your electric-lighting works in three years? There might be.
20. *Chairman.*] You state that it is the wish of the Municipal Council and of the shareholders of the company that this Bill should be proceeded with. Do you know whether there has been any express wish by the people outside of the shareholders that the borough should be lit by the electric light? There has.
21. *Mr. Kelly.*] Would the installation of the electric light tend to dispense with any of the labour at present employed by the gas company? Not in the slightest degree.
22. Would it involve any addition to the labour employed? Well, we could not dispense with any of the labour we have now.
23. *Mr. Williams.*] You stated that there had been no serious objection to the Bill;—has there been any objection at all so far as you know? There has not been any objection to it at all that I know of.
24. *Chairman.*] Have there been any letters in the Press objecting to it, or have there been any meetings against it? There may have been letters in the newspapers, but there have been no meetings that I know of.
25. You have not heard of any objection? No.

Charles Edward Crutch called in, sworn, and examined:—

- Mr. C. E. Crutch. 26. *Mr. Broad.*] You are the secretary of the company promoting this Bill? I am.
- 27 Aug., 1891. 27. How long have you been secretary? Nearly ten years.
28. Have you any personal knowledge of electric lighting? No.
29. You have seen it, of course? Yes.
30. Have you heard any opinion expressed in Maitland in regard to this Bill? I have heard the opinion expressed in Maitland that it would be desirable to have the electric light.
31. For the purpose of lighting the streets? Yes.
32. Maitland is a very extensive town? Yes.
33. Do you know from your own personal observation whether the electric light shines further than gas? I could not give you an opinion upon that point.
34. Have any of the shareholders of your company, to your knowledge, made any objection to this application to Parliament? No, none at all.
35. And there has been no objection by any of the townspeople? No.
36. *Chairman.*] Are the townspeople generally in favour of the Bill? They are in favour of the electric light.
37. *Mr. Kelly.*] Are you sure the Borough Council have opposed the Bill in no way? They have agreed to it.
38. You have consulted them? They have been consulted.
39. By communication? Yes.
40. And they have expressed an opinion favourable to it? Yes.
41. *Mr. Broad.*] Do you know whether the Bill already submitted to Parliament has been revised in consequence of the wishes of the Council in certain respects? Yes.
42. To meet the wishes of the Borough Council? Yes.

Thomas Hughes called in, sworn, and examined:—

- Mr. T. Hughes. 43. *Mr. Broad.*] You are Town Clerk of the borough of West Maitland? Yes.
- 27 Aug., 1891. 44. How long have you been Town Clerk? I think about sixteen years.
45. Are you aware that your Council have been communicated with as to this application to Parliament by the Maitland Gaslight Company? I am.
46. Have the Council expressed any formal opinion in the matter;—have they made any minute? The opinion has been expressed in the Council that the electric light would be superior to gas, and surprise has been expressed that it has not been introduced before.
47. But has there been any formal communication by the Council to the promoters of the Bill to the effect that they approve of it? Yes.
48. Did the Council suggest certain amendments they thought desirable? They did.
49. Has the Bill been before the Council in its amended form? Yes.
50. And are the Council satisfied with it? Quite so.
51. Are you aware of any objection being raised by any of the townspeople to the Bill? I am not aware of any.
52. What is the general feeling of the people of Maitland in regard to the electric light? They are strongly in favour of it.
53. *Chairman.*] How is it that the Council themselves did not take up this electric lighting? It might be, perhaps, that the state of their finances had something to do with it.
54. *Mr. Kelly.*] Would it not be more profitable to the ratepayers for the Council to take the matter into their own hands? I could not say that. I have no idea of the cost of working the lighting.
55. Do you not think it would be better for the Council to take over the works for the benefit of the ratepayers—would it not lessen the rates to a certain extent? I could not say that.
56. Could they not have introduced this Bill had they felt disposed, just as well as the gas company? If they had felt disposed.
57. What is their object in not doing it? I could not say. I have no idea what the cost would be.
58. Have the Council ever estimated the cost of it? Not that I know of.
59. The Council left it to the company to estimate the cost, and coincided with their decision. Is that the way in which the thing has been done? I know aldermen have expressed the opinion that the Council was not in a position to start the work and to carry it on.
60. *Mr. Miller.*] Could they not have floated a loan, as other Councils have done? They might have done that, perhaps.
61. *Mr. Kelly.*] Are any members of the Council shareholders in the Company? I am not aware.

ON THE MAITLAND ELECTRIC LIGHT BILL.

62. *Mr. Williams.*] Is it generally known in Maitland that this Committee is sitting to-day? I really do not know.

63. You do not know whether the residents of Maitland have known during the last week or two or whether they know at the present time that this inquiry would be held to-day? No.

*Mr.
T. Hughes.*
27 Aug., 1891.

Charles Webster called in, sworn, and examined:—

64. *Mr. Broad.*] What is your position? I am managing clerk to Mr. Thompson, solicitor of Maitland.

65. How long have you resided there? Fourteen years.

66. During all that time the town has been lighted by gas? It has. I think it was lit with gas the first week I went there.

*Mr.
C. Webster.*
27 Aug., 1891.

67. Has there been any expression of opinion to the effect that the electric light would be preferable to gas? I have always heard people saying so, and judging from the reports of the proceedings of the Council, the Council also are in favour of it.

68. You have no personal knowledge of the difference in expense between the gas and the electric light—you have not considered the subject? No.

69. What is the present lighting rate in Maitland? Fourpence.

70. Is that a high or a low rate? I think it is the lowest in any country town in the Colony.

71. As far as you are able to judge, you do not think that the introduction of the electric light would make the lighting rate higher? Well, it is higher where the electric light is used by the Council merely for the purpose of lighting the streets.

72. That is the case where the municipalities have the work in hand themselves? Yes. The rate is 6d. at Lambton, and it is 6d. at Young.

73. Have you seen the light at Lambton? I have seen it in Newcastle, and in the distance at Lambton.

73½. *Chairman.*] You are a shareholder in the company? Yes. My wife is largely interested in it.

74. *Mr. Kelly.*] Do you know whether the company have made provision in the event of the electric-light machinery breaking down for the supply of light to the borough? The company have not yet completed the expenditure of about £10,000 upon additional work in connection with their gas plant. The new gasometer has just been completed.

75. What I want to know is this: You will run the electric light with perhaps two or three machines, and in the event of that machinery breaking down, would the borough be in darkness—have you made any provision for a contingency of that kind? There would be the gas, I presume. No preparation has yet been made for lighting with electricity.

76. But the difficulty I name would be provided for? I do not know about that. I should imagine that the lamps would be left in the outlying districts.

77. Would not the lamps be left in case of an accident occurring to the machinery? I should think so. I should think the electric light could be used in connection with the gas-lamps.

78. The lamps would not be taken away? No. I see in some places in Sydney the electric light is attached to the gas-lamps.

79. *Mr. Miller.*] In the event of this Bill passing, would it be optional with the ratepayers to use either gas or electricity? I should imagine the gas supply would not be altered, so far as the householders are concerned, unless they desired it.

80. Do you know what is the estimated cost of the work? I believe it was estimated at one time that it would come to between £5,000 and £6,000. There was a report upon the matter by a gentleman who was sent up from the Telegraph Department in Sydney.

81. I suppose you could not foreshadow the profits likely to be derived from it annually? I have not the slightest idea.

82. Surely the company are not going into this matter blindfold—have they made no estimate as to the cost and the result of the experiment? I do not know what the profits would be. I know that a gentleman was sent up from the Telegraph Department in Sydney at the request of the directors. He sent in a report stating what the cost of the work would be. I believe it was about £6,000. The directors may have gone into an estimate of the profits, but I do not know anything about that. If the company can supply the light as cheaply as the Council, I think that, as a matter of justice, they should be allowed to do so. The company are really the townspeople, and they lit the town with gas when it was wanted.

83. *Mr. Gillies.*] As a matter of fact, you know that the gas company have reduced their charge for gas-lamps during the last few months? Since the new gasometer has been completed, and the company have had more storage power, they have reduced the price considerably.

Edward Peter Capper recalled and further examined:—

84. *Chairman.*] You are a shareholder in the company? I am.

85. Have the company estimated the profits that would accrue? We have.

86. Suppose this Bill is passed, and you have all the rights you ask for, will you be able to supply lighting to the general public cheaper than at the rate at which it is supplied at the present time? We got all the particulars and prices, and went into the matter in the first instance. The matter was stopped for a time; but from what we have heard we can supply the electric light more cheaply than we can supply gas. We hope that in another twelve months' time we shall be so able to manipulate the supply that it will be very much cheaper. We know what the cost at Tamworth has been.

87. *Mr. Gillies.*] And you know that the objections that have been raised by the Borough Council have been overcome? Yes.

88. *Mr. Miller.*] Are you a member of the Council? I have not the honor.

89. *Mr. Kelly.*] There appears to be a kind of amalgamation between the Borough Council and the gas company? Not in the least.

90. Are a majority of the Borough Council shareholders in the company? Only two members of the Council, I think, are shareholders.

91. Is there any advantage to be gained by the Borough Council from the gas company having these powers? I think the advantages would be very great—they would get a much finer light in every way.

92. Do the Council get any pecuniary benefit from the gas company having these powers? No; that has never been mentioned.

93. The arrangement is made to make taxation lighter? That is what we are trying to do.

*Mr.
E. P. Capper.*
27 Aug., 1891.

Richard Alexander Young called in, sworn, and examined :—

- Mr. R. A. Young. 94. *Chairman.*] You are Mayor of West Maitland? Yes.
 27 Aug., 1891. 95. *Mr. Broad.*] I believe that the Bill as originally introduced provided that the company's works should be completed within two years from the date of the passing of the Bill? Yes; that was in the original draft.
 96. Are you aware whether it was struck out by the Council in revising the Bill? It appears to have been done.
 97. Was it done by the instructions of the Council? No.
 98. Then it was probably from inadvertence? Yes.
 99. I understand that the promoters have given a pledge to the Borough Council that the work shall be completed within a fixed period? Yes.
 100. In the first instance, when the Bill was before the Council, it unanimously resolved that the work should be done within three years, and that intimation was made to the gas company.
 101. But having regard to the existing contract with the gas company for the supply of gas, do you think three years will be a reasonable time to give to the company for the completion of the works? Yes; as far as I can give an opinion, I am sure of this—that the Council will see that the gas company does its duty.
 102. You, as a member of the Council, might say whether you think that three years would be a reasonable time to give the promoters? The Council decided that three years should be the time.
 103. *Mr. Kelly.*] Are you a shareholder in the company? I am.
 104. *Mr. Gillies.*] Did not the Council decide that the work should be carried out in two years? No—in three years. You are right to a certain extent. When the Council decided upon giving the gas company three years the gas company had a meeting at which it was thought that the company would be able to do the work in two years; but on being further advised, they thought it best that they should be given three years in which to complete the works.
 105. *Mr. Kelly.*] Suppose the gas company are not able to complete the contract within the time allotted by the Bill, is it the intention of the Council to take any action? It is impossible for me to say what they will do in the future.
 106. But it will be a matter for you to determine? Yes; we are only in office for three years.
 107. What was the object of changing the period from two to three years? When the Bill was first submitted to the Borough Council the question of the time within which the works should be completed was under consideration, and the Council, in its wisdom, decided that the period should be three years. That decision was communicated to the gas company; the company held a meeting, and being very anxious to do the work, decided that it could be done in two years. They have since been advised that it would be better to take the extended time the Council were willing to give.
 108. And suppose they cannot carry the works out in that time? Then I take it that the Bill will lapse. I may say that the matter was thoroughly sifted by the Council.
 109. *Mr. Miller.*] Has the Council no intention of purchasing the gas company's right at Maitland? Not that I know of. If the Council had been in a position to purchase the gas company's works at the time they were for sale, it might have been attended with satisfactory results to the public. The gas company may rest assured that the Borough Council will not pay too much for the supply of the light.
 110. Would not it be better, in the interests of the ratepayers, for the Council to have these works in their own hands? The Council have so many things of magnitude to do at the present time that I do not think it would be expedient for them to involve themselves in any further expenditure.
 111. But in the interests of the ratepayers, would it not be better for the Council to take over the works of the company than allow them to remain in the hands of a syndicate? That would depend on the cost to the Council. Possibly the Council would not be able to supply the light at as cheap a rate as that at which it could be supplied by the company.
 112. For what reason would they be unable to supply it as cheaply as a private company? That I do not know. But we consider West Maitland an important town. We saw other towns being lit with the electric light, and we did not see why we should not have it also.
 113. *Mr. Williams.*] Has the company ever made an offer to the Council to sell out? Not that I know of.
 114. The Council never expressed a wish to purchase? Not since I have been an alderman.
 115. *Chairman.*] Would there be any objection to the insertion in the Bill of a clause providing that the Council may purchase at any time, on a valuation? I could not, as mayor of the town, venture to legislate for the gas company.
 116. *Mr. Kelly.*] If the gas company find that the works do not pay they may shift them on to the Council? I should take good care, if I were in the Council at the time, that they did not do that.

1891.

MORT'S DOCK AND ENGINEERING COMPANY (LIMITED) ENABLING BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly for whose consideration and report was referred on 11th August, 1891, the "*Mort's Dock and Engineering Company (Limited) Enabling Bill*," beg to report to your Honorable House:—

That they have examined the witnesses named in the List* (whose *See list, p.4. evidence will be found appended hereto); and the Preamble, as amended, having been satisfactorily proved to your Committee, they proceeded to consider the several clauses and Schedules of the Bill in which it was deemed necessary to make certain amendments.

Your Committee now beg to lay before your Honorable House the Bill as amended by them, with an amended preamble and an amended title.

JAMES JOHNSTON,
Chairman.

*No. 2 Committee Room,
Sydney, 25th August, 1891.*

PROCEEDINGS OF THE COMMITTEE.

TUESDAY, 25 AUGUST, 1891.

MEMBERS PRESENT:—

Mr. Barbour,		Mr. G. D. Clark,
Mr. Cullen,		Mr. Darnley,
	Mr. Johnston.	

Mr. Johnston called to the Chair.

Entry from Votes and Proceedings appointing the Committee *read* by the Clerk.Printed copies of the Bill *referred*, together with original Petition to introduce same before the Committee.Present:—Frederic Curtiss, Esq. (*Solicitor for the Bill*), P. J. Healey, Esq. (*Counsel for the Promoters*).

Frederic Curtiss, sworn and examined.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

MORT'S DOCK AND ENGINEERING COMPANY'S
(LIMITED) ENABLING BILL.

TUESDAY, 25 AUGUST, 1891.

Present:—

MR. JOHNSTONE,		MR. CULLEN,
MR. DARNLEY,		MR. BARBOUR,
	MR. G. D. CLARK.	

J. JOHNSTONE, ESQ., IN THE CHAIR.

Mr. Healey, instructed by Mr. Curtiss, Solicitor for the Bill, appeared on behalf of the Mort's Dock and Engineering Company.

F. Curtiss, Esq., sworn and examined:—

1. *Mr. Healey.*] You are solicitor for the Bill? Yes.
2. Do you produce the certificate of incorporation of the Mort's Dock Company? I do.
3. Do you produce the conveyance of the piece of land mentioned in Schedule A to the Mort's Dock Company? I do. It is a conveyance from W. Eyles and others, to the Mort's Dock and Engineering Company (Limited).

F. Curtiss,
Esq.

25 Aug., 1891.

James M'Donald called in, sworn, and examined:—

4. *Mr. Healey.*] You are a surveyor? Yes.
5. Are you surveyor to the Council? No, but I was formerly.
6. Have you got a map of the proposed alteration in the streets? Yes.
7. Does that show correctly the proposed alterations? It does.
8. Where is the Dock Company's land? The land to the north and to the south of the proposed road is the Dock Company's land. It is the land marked pink on the plan which I put in. [*See Appendix A.*]
9. *Mr. Barbour.*] The plan which you hand in as an exhibit is a correct plan? Yes.
10. Have you surveyed the land according to the description given in Schedule A? Yes.
11. You have seen that Bill before? Yes.
12. And you have examined the description given? Yes. It is a copy of the description which I made.
13. *Mr. Healey.*] Does the description in Schedule A represent the proposed new road? Yes.
14. *Mr. Barbour.*] It describes the proposed new road? Yes.
15. *Mr. Healey.*] Does the description in Schedule B describe the old road as it was forming an angle with the other street? Yes.
16. What streets are they? College-street and Trouton-street.
17. Schedule B represents the portion of College-street forming an angle with Trouton-street on the north-east corner? Yes.
18. *Mr. Barbour.*] Are those two roads now in use? Yes.
19. Leading to public wharfs and the shores of the bay? Yes.
20. Do those portions of those roads meet at right angles? The old road met the other at right angles, but the new one does not.

Mr. J.
M'Donald.

25 Aug., 1891.

Mr. J.
M'Donald,
25 Aug., 1891.

21. And did that interfere to some extent with the free and proper use and enjoyment of the Dock Company's land? The old road interfered considerably with it, but the new road will not.
22. *Mr. Healey.*] Would the new road at all interfere with the convenience of the public? No. The public are very much pleased with the alteration, and consider that it will be a great improvement, the new road being more convenient.
23. It will be a more direct road? Yes; they have been using this road for some time. It is better for the Council, on account of the facilities that it will afford for the drainage.
24. *Mr. Clark.*] There have been no complaints on the part of the public as to the proposed alteration? None whatever.
25. *Mr. Barbour.*] You think that the substitution of the new road for the old one would be a public advantage? It would be.
26. And, as far as you know, the public are of the same opinion? Yes.
27. Are the borough council in favour of this alteration? They are.
28. Have the public had any opportunity of expressing an opinion upon it? Yes.
29. And have the public always been favourable? Yes.
30. *Mr. Healey.*] Was the plan submitted to the borough council? Yes.
31. Has it received the approval of the men? Yes. The signature of the then mayor, Mr. Clubb, is on the plan.
32. *Mr. Cullen.*] Was the approval of the plan by the borough council expressed by a formal resolution? Yes. The council went and had a look at the place.
33. *Mr. Barbour.*] Was there any specific motion expressing approval of it? There was.
34. And it was carried? Yes, unanimously.

James Alexander Brodie called in, sworn, and examined :—

Mr.
J. A. Brodie,
25 Aug., 1891.

35. *Mr. Barbour.*] You are the present mayor of Balmain? Yes.
36. *Mr. Healey.*] You know this proposed road? Yes.
37. How would it be as regards the public advantage or otherwise? It would be to the advantage of the public.
38. Would it be to the advantage of the Council, in connection with the drainage? Yes.
39. In what way? It would shorten the drain to a considerable extent, by rendering it unnecessary to go round the corner.
40. And it would give a better fall, would it not? I understand so, but the difference would be very slight.
41. Would it make a shorter road for the traffic? There is very little traffic there; but for such traffic as there is the new road would undoubtedly shorten the distance to the ferry.
42. Were you present when this matter was submitted to the council and approved? I was.
43. *Mr. Barbour.*] You were an alderman at the time? I was.
44. What was the conclusion arrived at by the council? Ultimately it was unanimously resolved that the request of the Mort's Dock Company should be granted. At first there were objections, myself being one of the objectors, because an attempt was being made to hurry the matter through, without some of the aldermen having sufficient knowledge of the proposed alterations. I, for one, objected then, because I had not sufficient knowledge of what I was asked to vote for. But having viewed the place we were unanimously of opinion that the request of the company should be granted.
45. That it was in the interests of the general public? Yes.
46. Have you heard of any opposition to it by anybody? One man opposed it at first, but seeing that it would be to his own benefit, I believe he withdrew his objection. We advertised for objections, and one gentleman did put in an objection, but afterwards withdrew it.
47. And expressed himself satisfied? Yes.
48. *Mr. Healey.*] That was the only objection raised? That was the only objection that I heard of.

John Broomfield, Esq., called in, sworn, and examined :—

J. Broomfield,
Esq.,
25 Aug., 1891.

49. *Mr. Healey.*] Are you a director of the Mort's Dock and Engineering Company? Yes.
50. You are acquainted with these proposed alterations? Yes.
51. It is proposed to make a road through the land of the company instead of going round by that angle? Yes.
52. There is a great deal of public business transacted at the dock in connection with shipping? Yes.
53. Would it afford the company greater facilities, and enable them to provide better dock accommodation, and so forth, if the proposed new road were made? Yes, undoubtedly.
54. In what respect? We have not sufficient room to carry on our works. We should have more room if the proposed alteration of the road were made. Ships are getting larger, and we have to provide more accommodation. At the present time we are widening the dock up at the point.
55. If you had this land would it enable you to widen the dock still more, or to extend it? It would enable us to do a lot. We could make another dock if we pleased.
56. If you had this corner you could extend the dock further? We could extend the dock if we wished, or we could make a new one. Ships are getting much larger, and it is almost impossible for us to accommodate them.
57. Have you been contemplating alterations of that kind? Yes.
58. The making of a new dock? Yes.
59. I need hardly say that the greater the dock accommodation the better it would be for the public? Yes. We have to make larger accommodation for the ships.
60. *Mr. Barbour.*] I suppose that the company have satisfied the mayor and the town council about it? Yes.
61. You have entered into a mutual arrangement? I am only speaking from hearsay, but I am given to understand that the corporation consider that it will be an improvement. It will give a greater fall to the drainage, and necessitate less work in making the drain.
62. *Mr. Healey.*] And you find it necessary to come to the Legislature to enable you to close up that street? Yes, we could not do it without.

63. *Mr. Clark.*] How long is it since this contemplated work was first proposed? When the ships began to grow bigger we found that we could not accommodate them. J. Broomfield, Esq.
 64. *Mr. Barbour.*] About when? Two or three years ago. 25 Aug., 1891.
 65. *Chairman.*] I have been given to understand that you had to send a ship to Cockatoo dock because your dock could not take it in;—is that true? Yes. There is no doubt that the ships are getting much larger, and the present dock will be of no use by-and-by.

James Peter Franki, Esq., called in, sworn, and examined:—

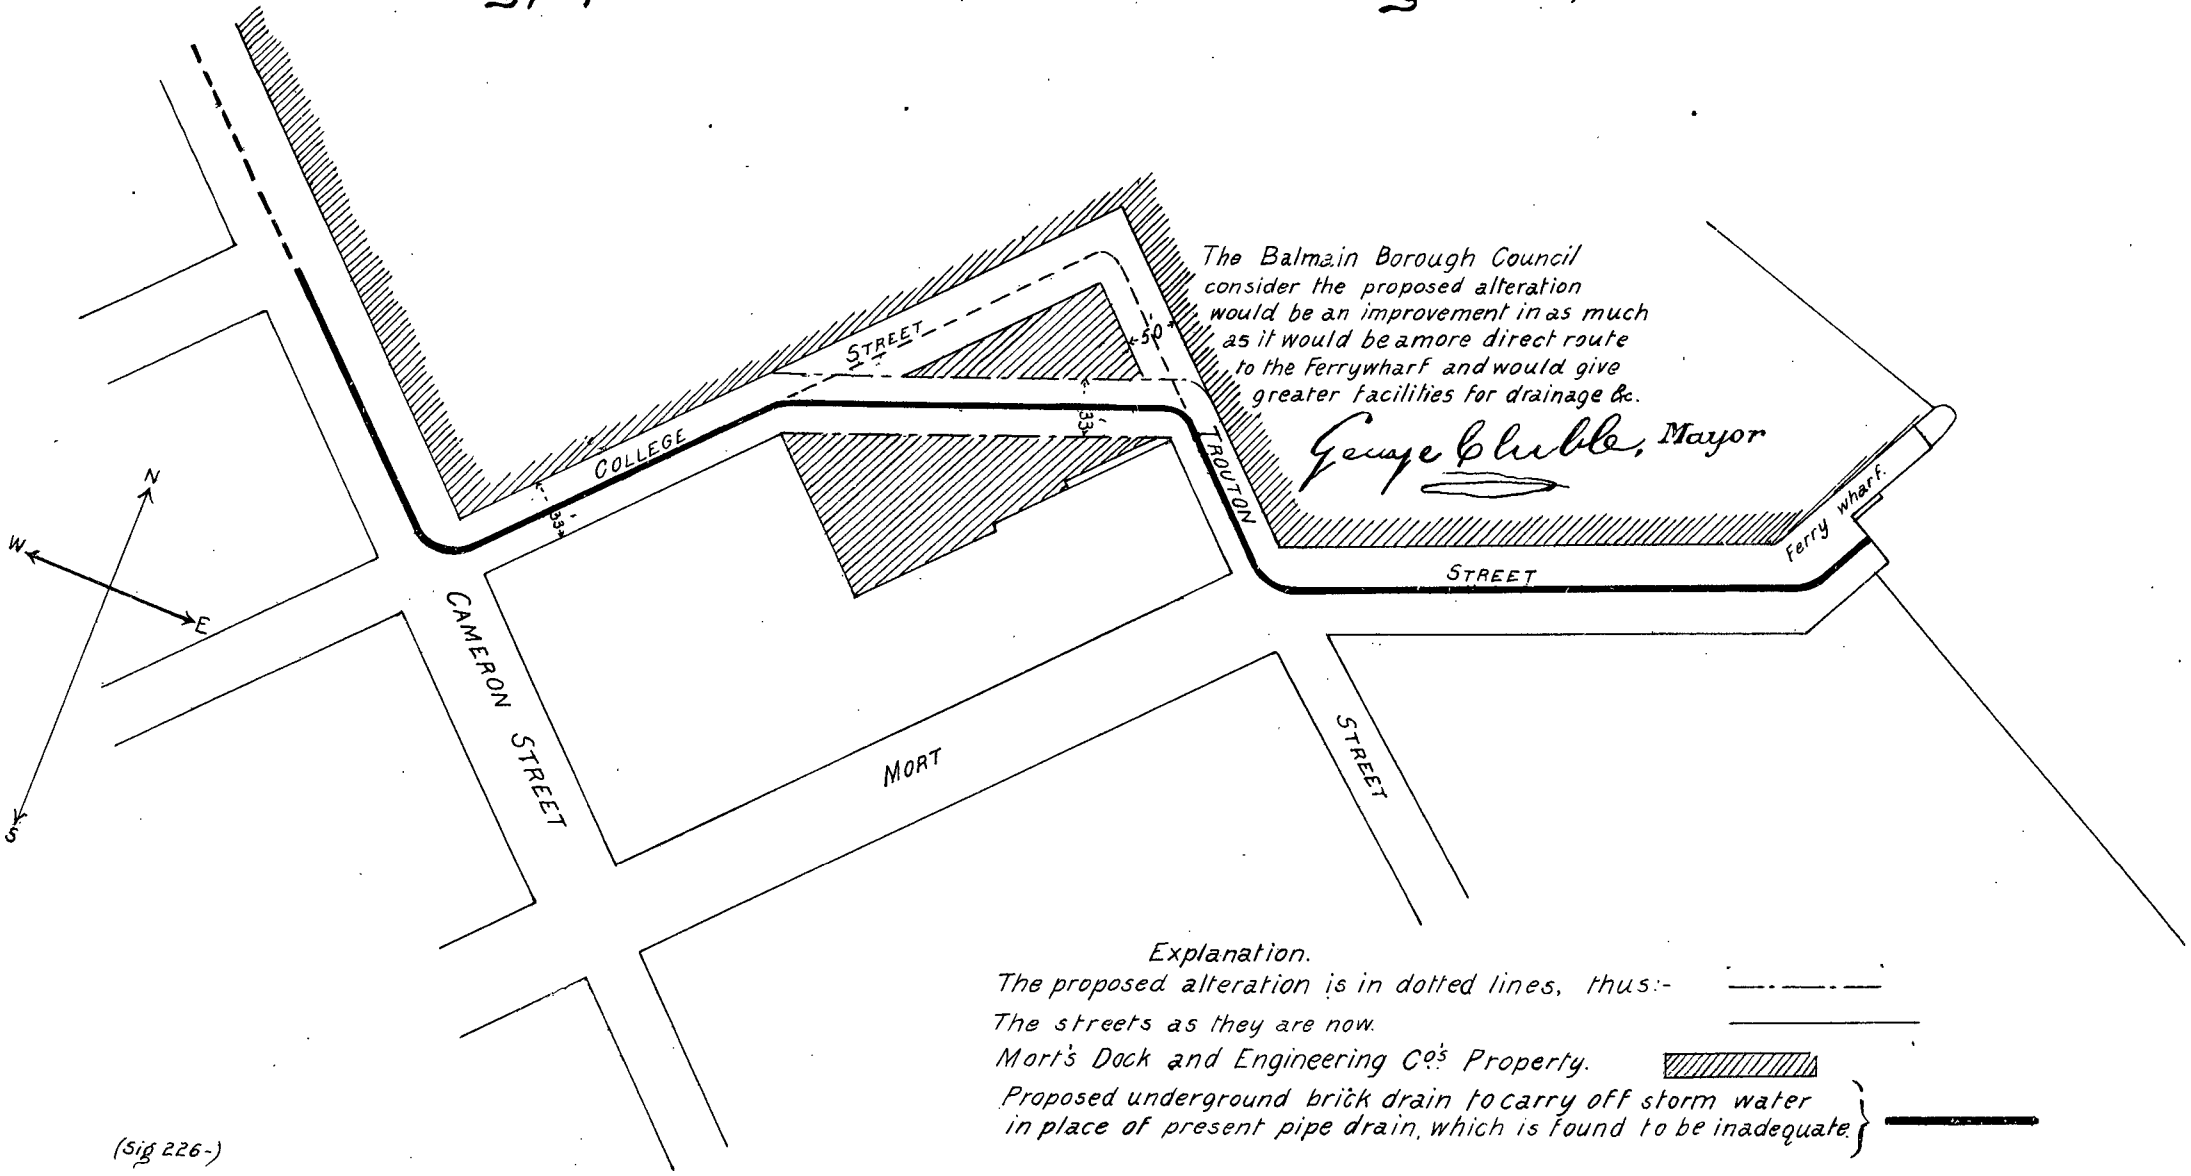

66. *Mr. Healey.*] You are manager for the Mort's Dock Company? Yes. J. P. Franki, Esq.
 67. Do you know the proposed new road? Yes. 25 Aug., 1891.
 68. The company have land on each side of it? Yes.
 69. Will it be better for the company to have the new road with their land on each side of it in substitution for the old one? Yes.
 70. Would it benefit the dock very much? Yes.
 71. Explain how that would be? It would benefit us in the way in which Captain Broomfield has explained. It would enable us either to widen the dock or to make a new dock.
 72. You could not do it without that piece—the angle? We had to purchase more land for that.
 73. I suppose with the increase of business you are rather straitened? Our accommodation is too limited.
 74. And this will give you more scope? Yes.
 75. As a matter of fact it has been in contemplation for some time to make a new dock? Yes, we have been inclined to purchase that land for four years.
 76. You had to come to the Legislature? Yes, to enable us to close the old road. We first made application to the Council, pointing out the advantage the proposed alteration would be to them and the public. It will certainly lessen the lineal feet of sewerage that will have to be put down, and will save the council at least £300 or £400. It will also give a better fall to the sewage by shortening the length of the sewer. The public have used that track with our permission for the last six or seven years. The company gave permission six or seven years ago to the council to make a sewer through their land, after which we bought this piece to make the proposed alterations. The whole council have viewed the site and are unanimously in favour of it.
 77. You have heard of only one objection, and that has been withdrawn? That has been withdrawn. Both the company and the council have letters in their possession to that effect.
 78. *Mr. Barbour.*] The company and the council are mutually agreed to this alteration? Thoroughly.
 79. Are you aware of your own knowledge that there is any objection to this deviation? I am aware of none whatever.
 80. There is a general feeling that it will be an advantage not only to the company but also to the public? Yes, as far as I know. It will give the public a more direct road.
 81. *Mr. Darnley.*] The proposed alteration if carried out will enable you to construct a much larger dock than you have at present? Yes, one nearly double the size.

[One plan.]

Handed in before Select
Committee on Mort's Dock
& Engineering Company,
(Limited) Enabling Bill.

W.E.M.
25/8/91.

Plan showing proposed alteration of north-east end of College-street, Balmain.

Explanation.
 The proposed alteration is in dotted lines, thus: -
 The streets as they are now. - - - - -
 Mort's Dock and Engineering Co's Property. [Hatched Box]
 Proposed underground brick drain to carry off storm water
 in place of present pipe drain, which is found to be inadequate. } [Thick Solid Line]
 Present pipe drain. - - - - -

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

SEGENHOE ESTATE IRRIGATION BILL.

MONDAY, 21 SEPTEMBER, 1891.

Present:—

MR. MORGAN, | MR. PERRY,
| MR. SCOBIE.
J. C. NEILD, ESQ., IN THE CHAIR.

Mr. E. Broad, solicitor, appeared on behalf of the promoters of the Bill.

Mr. William Harris called in, sworn, and examined:—

1. *Chairman.*] You are one of the managing directors of the Land Company of Australasia (Limited)? I am.
2. You have read the preamble to this Bill? Yes.
3. Are you in a position to inform the Committee that your company have acquired a large area of land known as the Segenhoe Estate? They are the owners of the Segenhoe Estate, now comprising over 25,000 acres.
4. How long have they been the owners? A little more than three years.
5. Is the situation of the Estate accurately described in the preamble as between the parishes of Macqueen, Russel, and Rouchel in the counties of Durham and Brisbane? It is.
6. The River Page and the Rouchel Brook intersect the estate? The estate is intersected by three streams, the Hunter, the Page, and the Rouchel Brook.
7. The preamble states that your company is about to acquire other large areas of land;—is that so? Yes, if we obtain the necessary power from Parliament.
8. *Mr. Perry.*] Is the land under offer to the company? Well, there is other land which might be necessary for a large scheme if we could secure the requisite power from Parliament.
9. *Mr. Morgan.*] This land might be secured against the wish of the people? It would be a small portion principally for the storage of water on the higher land.
10. That would require a separate Bill, would it not? No; I think this Bill provides for the acquisition of land.
11. *Chairman.*] Are you in a position to inform the Committee whether the estate is suitable for agricultural or horticultural purposes if provided with a supply of water? It is undoubtedly suitable for those purposes. I regard it as some of the richest volcanic land in the Colony.
12. Have you any grounds for believing that it would be to the advantage of the surrounding district and the country generally to establish a scheme whereby water might be conserved? Well, the productive power of the soils there is very great indeed. We find that during the dry seasons, the soil being of a very porous nature and wonderfully rich, it burns up the crops. Nothing is really required but water. There is a large area of very rich river flats that will employ a large number of people, and which I am sure would give marvellous crops if a sufficiency of water were supplied.
13. You are referring to the company's property? To the estate.

Mr.
W. Harris.
21 Sept., 1891.

Mr.
W. Harris.
21 Sept., 1891.

14. But in what way would this scheme benefit the inhabitants of the surrounding district; would a supply be made available for other estates; would you be able to distribute water to other properties? The company would supply water to any persons in the neighbourhood. We should conserve a large body of water during the wet season—that is to say, water which assists to flood the low-lying land, would be conserved in wet seasons, and when it was distributed over the land in dry seasons the filtration would be so great that a considerable portion of the water would go through right into the main river, the Hunter. The effect would be that in the dry seasons the volume of that river would be increased in consequence of our storage in the high country in the wet seasons. While, on the one hand, we do not interfere with the regular stream of the Hunter, when water is plentiful, we increase the volume of the stream during a dry season. Under the flats, upon which the water would be distributed, there is a great formation of bluestone boulders, and the water would filter through this much more easily than it would filter through many soils.

15. You think the water would make its way through these boulder-beds to the river? Yes; less the quantity consumed in producing crops and by evaporation.

16. Then the Committee are distinctly to understand that the proposed conservation of water could be utilised by the owners of the adjacent properties? Undoubtedly.

17. On suitable terms, of course? Yes.

18. You have spoken of the company's estate of 25,000 acres;—for what area outside the limits of your own estate could the water you state be made available;—have you any idea? It could be conveyed to a large extent down the river on the fall of the country. At the present time there are large flats just below the Segenhoe Estate, and the company propose to put themselves in a position to supply water to any of these should it be wished.

19. Would the area of land owned by persons other than the company that could be supplied from your proposed works be equal to the area of the Segenhoe Estate? It would be greater.

20. Then, putting it briefly, while the proposed works would directly serve to irrigate 25,000 acres of your own land, they could also be made available for the irrigation of a larger area of land owned by other persons? Yes. The 25,000 acres would not all be available for irrigation, because a portion of the estate is mountainous; the height is too great. I think we might say that 12,000 acres of the Segenhoe Estate would be suitable for irrigation, perhaps; not more.

21. But a larger area outside of the estate could be irrigated by the same scheme? Just so.

22. Have you had any communication with neighbouring owners as to whether they approve or disapprove of, or support or oppose this scheme? Those who are adjacent to the estate seem very pleased with the undertaking. I had heard that there would be some opposition at Muswellbrook; but I saw the Mayor, and explained the scheme, and having heard my explanation he told me that he was perfectly satisfied, and would withdraw opposition. He had understood that it was our intention to restrict the flow of the main river, the Hunter, but when I explained our plans he immediately withdrew his opposition. I made the same explanation to several of the Mayor's friends, who also had the same idea that he had had in reference to our intentions, and finally they said they would be very pleased indeed to see the enterprise undertaken by the company.

23. Have you any map or plan of the proposed scheme? Yes.

24. I see in the Bill you speak of conserving "waters and of the said river and brook which now run to waste?" Yes.

25. Do you propose to store waters other than those that now run to waste? No; I think not.

26. Then it would be only in flood-time that you would impound the water? Yes; the flow is very great then. The water would be impounded only during excessive rains. I suppose one heavy thunder-storm would really fill the large reservoir we should have. The water rushes down very rapidly, sometimes to a depth of 14 or 15 feet, to the Hunter River. The flow in the Rouchel Brook is of course not so great.

27. But you do not propose to take water from the Hunter? No; I am merely endeavouring to show you the body of water which comes down the Hunter, the Page, and the Rouchel Brook. They all run in flood after twenty-four hours' rain.

28. You mentioned Muswellbrook;—is this estate in the vicinity of Muswellbrook? Muswellbrook is about 8 miles on this side of the Segenhoe Estate.

29. *Mr. Morgan.*] Does the estate touch Scone? No; it touches the Aberdeen railway station about 4 miles from Scone railway station. It runs from Aberdeen north-east.

30. Does it adjoin a municipality? No. I think Muswellbrook would be the nearest municipality.

31. Has the Municipal Council there objected to the scheme in any way, apart from the objection of the Mayor? In no way that I have heard of. I went up and had a chat with the Mayor, and he seemed very pleased indeed when he found that it was not intended to interfere with the flow in the main river.

32. You have heard of no objection on the part of the adjoining owners? No.

33. No petition has been presented to the House against the Bill? Not that I am aware of.

34. The proposal to apply for the Bill was of course advertised in the local papers? Yes.

35. *Mr. Scobie.*] As I understand the matter you propose to supply the owners below with water without resuming their land? Yes.

36. How far is the irrigation area from the railway? The land just touches the railway station at Aberdeen. The line takes a few acres off the corner of the estate close to the Aberdeen railway station.

37. What crops would be likely to be grown upon the land? I think they would be principally potatoes, maize, tobacco, pumpkins, and straw crop.

38. *Chairman.*] And lucerne I suppose? Yes; especially lucerne.

39. *Mr. Perry.*] In a dry season, how would this scheme interfere with the water rights of the owners of land below your estate? I contend that it would increase their supply, because the water that we should conserve in the high country would in no way affect the flow of the Hunter River. In proof of that I may mention that the Rouchel Brook ceases to flow during a dry season. We store up the bulk of our water in a higher portion above the Rouchel Brook, and the few farms between the point where the reservoir would be and the Segenhoe Estate will have the advantage of our water supply. The company have no wish to resume at the present time only so far as the storage of water in the higher country is concerned. We want to secure the gravitation—that is all we want the power for. We could supply water to other estates. We have no intention of resuming apart from the purpose I have named. The main flats are below, not above, the Segenhoe Estate.

Mr.
W. Harris.
21 Sept., 1891.

40. *Mr. Scobie.*] What is the height of the flats above the river? They would average about 20 feet. I suppose the average would be from 10 to 22 feet.
41. What is the distance from the site of the reservoir to the Hunter? I have not the exact measurement, but it would be from $1\frac{1}{2}$ to 2 miles probably.
42. *Mr. Morgan.*] You say in the Bill that you are about to acquire other large areas of land;—would that be for actual irrigation purposes or merely for the carrying out of your scheme? For the carrying out of our scheme upwards. We propose to supply the lower portion of the lands with water under a mutual arrangement.
43. Instead of acquiring the land? Yes.
44. *Chairman.*] It is not contemplated to give the company power to resume land for any purpose other than the supply of water? No.
45. *Mr. Scobie.*] You say that the Rouchel Brook runs dry in summer time;—is that the case with the Page also? It runs very nearly dry, but not quite. I have heard that it has been dry, but I think that that is very seldom the case.
46. The plan you produce is the plan of the estate with the proposed works? Yes. [*Vide Appendix A.*]
47. *Mr. Broad.*] That has been prepared by Mr. Gipps, C.E., I believe? Yes.
48. *Chairman.*] The portion coloured pink is the Segenhoe Estate? No; I think that is described as agricultural land.
49. The Page joins the Hunter on the estate? Yes.
50. *Mr. Broad.*] Are the shareholders of your company aware of this application to Parliament? Yes.
51. What is their opinion? They passed a resolution authorising the application to Parliament for this Bill.
52. There were no dissentients? None whatever; the resolution was carried unanimously.
53. *Mr. Scobie.*] But is there no possible objection from the inhabitants of the district? I suppose the Page supplies the Hunter, and to some extent the people of Muswellbrook below, with water. Is there not a possible objection on their part on account of the water being withdrawn from the river which would otherwise come down to them. Suppose there were a long-continued drought, you might exhaust the water in the dam above. That would intercept the stream afterwards, because your dam would have to be filled up by any supply which was coming down? Even in very dry seasons I do not think the river has been thoroughly dry, although the stream has been very small indeed. There would be, perhaps, just the slightest flow among the boulders. At many points it apparently ceases to flow, but the water passes through under the boulders and comes up in little ponds further down, showing that there is a flow underneath the surface. But as against that, it must be borne in mind that the driest times would be the periods when we should have to put the largest quantities of water upon the soil, and a large portion of it would certainly filter through into the river. It would follow, therefore, that from our use of the water in a dry season, persons lower down the stream would actually be getting a better supply than they would get under present conditions.
54. *Mr. Perry.*] It is simply the waste water that you store? Yes.
55. *Mr. Scobie.*] I noticed an orchard irrigated from the Lachlan last year; it was only a small place, but a good deal of water was put on to it, the soil being of a very porous nature. The owner told me that in a dry season a year or two before, he had had to cut trenches along the bed of the river to a depth of 4 feet each way, in order to bring sufficient water to pump for even that small area. We propose in our reservoir to retain at least 800,000,000 gallons. That is an enormous body of water, and would serve to irrigate an immense area. The larger the area we irrigated the greater would be the supply lower down from filtration.
56. *Mr. Morgan.*] As a matter of fact, if you did not conserve the water you propose to conserve, the greater portion of it would run to waste under any circumstances? Yes; nearly the whole of it.
57. *Chairman.*] You speak of the water in the Page River being very low in dry weather; but further back in your evidence you said that twenty-four hours' rain created a flood? Yes.
58. How are these reservoirs to be filled—by pumping or from the flow of the river? From the natural flow of the river.
59. Would the water run into the reservoirs when the stream was at summer level, or under what circumstances would they be brought into use? I should explain that the river has a very great fall, and after a storm the water rushes down very rapidly; in fact it is impossible to cross the river when the water is up to the middle of a horse—it would sweep you away. The water rushes down to the lower Hunter in a very rapid manner, and passes to waste. I feel perfectly satisfied that one thunderstorm would be sufficient to completely fill the reservoir. The water comes down the hills with such force that a very little of it sinks into the soil.
60. If you impounded the volume of water you speak of, would it not in your opinion seriously affect the supply of the water channels themselves? In no way to my mind.
61. You would be simply catching the surplus of flood-water without affecting the ordinary useful supply? Yes; I feel sure that if twenty similar schemes were constructed upon different portions of the Hunter they would have the effect of materially lessening the damage from flood in the Maitland district.
62. Without curtailing the useful supply in the river itself? Yes; That is if they were carried out as our company propose to carry out theirs. I think it would also modify the climate and give greater moisture and hence a better rainfall.
63. *Mr. Scobie.*] You think that by storing a large body of water upon the high land, and by distributing it lower down on each side in a dry season the effect would be to give the residents in reality a more constant supply than they would otherwise have? Yes. And it must be borne in mind that the water which they would have in dry seasons would be water which would otherwise have passed away to waste in time of storm.
64. *Mr. Perry.*] And of course when your reservoirs are once full it would make no difference to the supply of water in the river? No, and as I have pointed out in time of storm the quantity of water coming down is quite surprising.

Mr.

Mr. Frederick Bowdler Gipps called in, sworn, and examined:—

Mr.
F. B. Gipps.
21 Sept., 1891.

65. *Chairman.*] You are a civil engineer? Yes.
66. Have you had experience in the matter of water conservation and irrigation? That is my specialty.
67. You have had experience, I believe, in America? I have had experience of all kinds—irrigation and hydraulic.
68. And you have also been connected with similar works in India? I have not been connected with them, but I have studied them. I was at the Ganges Canal at the head works, and at different other large irrigation schemes both in Bengal and Madras. I have studied them on the spot, although I have not had actual experience in connection with them.
69. You have had some experience of irrigation in Australia? I have.
70. The proposed scheme for irrigating the Segenhoe Estate, or a portion of it, has been prepared by you? It has.
71. Was this plan, marked A, which has been put in by the previous witness, prepared by you? Yes.
72. And you now put in your report upon the proposed scheme? Yes. [*Vide Appendix B.*]
73. In your opinion would the proposed scheme be available for any large area of land other than that belonging to the estate? No; it would command only the estate.
74. It would command no other land you say? The plans have been made for the distinct purpose for commanding only the Segenhoe Estate.
75. But I suppose the scheme could be extended to other land? Yes; but not without increasing the water supply and storage.
76. *Mr. Morgan.*] The contemplated storage accommodation would not supply land outside the Segenhoe Estate? The present contemplated storage is only for the supply of the estate. But of course with additional expenditure, flood-waters or waters that would not require to be stored for the special benefit of the estate, could be made available for the whole of the Hunter Valley below.
77. It is not intended by this Bill to deal with land outside the estate—the Bill is simply for the estate itself? Yes; so far as I understand it.
78. Though the scheme might be utilised afterwards to supply people outside? Yes.
79. Does the Bill not provide not only for domestic, but for irrigation purposes outside the estate itself? I am not aware of that. Of course you could increase the capacity of the dams, but under present circumstances they are designed simply for the Segenhoe Estate.
80. *Mr. Scobie.*] The reservoirs are made large enough only for that purpose? Yes.
81. But you think they could be enlarged? Yes; and I think that one effect would be to materially modify the floods in the Hunter River.
82. *Chairman.*] There are provisions in the Bill for entering upon Crown lands for certain purposes;—do the works contemplate any material interference with Crown lands? Not with Crown lands, I think, to any extent. The Page River scheme crosses a portion of a reserve. That is the only interference that I know of. The road up the Page River would have to be diverted.
83. *Mr. Broad.*] What is your estimate of the cost of irrigating the Segenhoe Estate? It is divided into two parts—one for the Page River, and one for Rouchel Creek. In connection with the Page River, my estimated cost of the dam is £13,620. The total cost of the Page works would be £26,000, and of the Rouchel Brook scheme £21,800, or a grand total of £47,800.
84. *Chairman.*] I presume the cost would be increased if the proclamation issued under the seventy-second clause, enlarging the irrigation area, took effect? Not necessarily. It would simply imply that the channel might be made further down the River Hunter to supply a portion of the water not required by the company to other estates. The channel is of sufficient capacity to allow of half as much again of the area provided for being supplied. The storage is distinctly confined to the Segenhoe Estate—that is, apart from the distribution of the water.
85. *Mr. Scobie.*] Is the fall from the reservoir to the Hunter very great? The fall in the river itself is from 10 to 11 feet a mile.
86. *Mr. Broad.*] Have you estimated how many gallons you would require for the irrigation works? I propose a storage of 804,000,000 gallons on the Page River, and 742,000,000 on the Rouchel Brook reservoir, to supply the scheme at all times and seasons with 10,000,000 gallons a day.
87. *Chairman.*] Take the Page River, does your scheme propose to impound water in flood-time only, or when the river is at its ordinary level? Just at its ordinary level.
88. When will the water supply your reservoir, at time of flood, or at all times? At all times. The dams are overshot, so that when we do not require further water it would simply flow over the top of the dam.
89. Going back into the river channel? Yes.
90. So that, when your reservoirs are full, you can take no more from the river channel? Whatever is in the river will run over the weir into the river channel again.
91. Making no further draught upon the river? No.
92. *Mr. Scobie.*] If the ordinary streams will fill the dams, they will be of no help in preventing floods lower down? Not under the proposed conditions, but I think the dams might be so constructed as to materially modify the floods lower down.
93. The dams Mr. Gordon proposed were to hold the water back for a time only? I think Mr. Gordon is correct. I could give sites on the Upper Hunter that would completely modify the floods there.
94. *Mr. Morgan.*] If a system of irrigation were carried out? Yes. We have two different rain systems there, one falling on what we call the coast ranges, and the other upon the main range. You have two different floods, and you can treat them under two different systems of reservoirs.
95. You are sure that this system of yours will not interfere with the supply of water to people lower down the river? Under no circumstances. Take the driest season, when there would be no water running down the stream, even then this scheme would assist rather than prohibit the supply of water. It was proved in the case of the Ganges canal at Hurdwa, near Roarkee. When the water was first let off there were protests against such a large draught from the river. It was said that it would interfere with its normal flow; but instead of that being the case, it was found that the normal flow lower down was higher than it was under ordinary conditions, because the whole of the country irrigated between the canal and the river gave back the soakage water. This water being filtered through the soil kept up a really better flow in the river. So in this instance—the drainage would be far more constant, and therefore, in my opinion, you would see no dry channel at all.

96. *Chairman.*] Underlying the soil of the estate there is a natural drainage strata? Yes; it has been made by the river itself.
97. It is a sort of old river bed? Yes.
98. Through which the water used for irrigation would percolate with fair rapidity back to the river? Yes; as a drainage system it would hardly be equalled, because the drainage takes place in two directions, both north and south and east and west. North and south you have the main drainage of the river itself, and east and west the drainage from the tributaries. They both have such a steep underlie of rocks that the system of drainage is perfected.
99. Would this scheme be available for domestic purposes to any considerable number of people now? I do not know that it would. The people of Muswellbrook have the Hunter River immediately below them, but of course they could be served with water if they required it.
100. This is not in any shape or form a pumping scheme? No; it is distinctly a gravitation scheme.
101. Your engineering leanings are towards gravitation as against pumping? Except where I can get water power to pump with.

Mr.
F. B. Gipps.
21 Sept., 1891.

FRIDAY, 25 SEPTEMBER, 1891.

[At Scone.]

Present:—

MR. MORGAN, | MR. SCOBIE.
J. C. NEILD, Esq., IN THE CHAIR.

Mr. John James Dodd called in, sworn, and examined:—

102. *Chairman.*] You are Mayor of Scone? I am.
103. Have you been resident here for many years? All my life pretty well—forty-six years.
104. You are well acquainted with the district? Yes.
105. And with the flow of the local water-courses? Yes.
106. Are you acquainted with the Segenhoe Estate? Well.
107. Do you know the nature of the works which it is proposed to carry out? I have no knowledge of them except from what I have seen in print. I know nothing whatever of irrigation. I have had no experience at all in that direction.
108. You are not in a position to form an opinion as to whether the conserving of water in reservoirs on the Rouchel Brook and the Page River would have any material effect upon the flow of water in the Hunter? Having had no experience in these matters I do not consider myself qualified to answer that description of question. So far as my own opinion goes, however, I should say it would not have any effect.
109. Has the scheme been discussed among the people hereabouts? Fairly so.
110. Do you think that the carrying out of the proposed works would be for the benefit of the district or the reverse? As I have said, I do not feel qualified to answer that sort of question, but I certainly think that if the scheme did us no good it could certainly do us no harm. I think it would be almost certain to do good in some way or other.
111. By promoting local production, I suppose? Yes.
112. Are you acquainted with public feeling in the matter? I think so.
113. Is that feeling adverse to or favourable to the scheme, or is it neutral? I have not heard any one express a hostile opinion in regard to the irrigation scheme. I am aware, however, that such an opinion was expressed lower down at Muswellbrook.
114. *Mr. Scobie.*] Have you known any occasions when there has been a scarcity of water in the Hunter for cattle and other purposes? Yes, I have; and that applies particularly to the Page.
115. The Page, I understand, supplies the Hunter? It is a tributary of the Hunter. For the first 3 miles of the Page—and it applies to that portion of the Page within the Segenhoe boundary—the water is not held well—it sinks and goes down into the bed. Below that the stream is pretty good.
116. *Chairman.*] Do you know the site of the proposed reservoir on the Page? I have not the slightest idea where it is.
117. Then we have the fact that the Page River, while acting as a feeder to the Hunter, does not act as a continuous feeder? I think it does at the junction. I believe it very rarely stops running there. If the stream goes away at the top you have not to go down far to reach the water. Of course in bad times—that is, in times of drought—the Page and Hunter would both stop running; but the Page would stop first.
118. The supply in the Page is less permanent than that in the Hunter? Yes; it is a much smaller stream, of course.
119. *Mr. Morgan.*] Are you, as mayor, in a position to say that no action has been taken by the council to protest against the scheme? No, none whatever. I think the council would be inclined to support it.
120. I suppose some adverse action would be taken by the council if the scheme were thought objectionable or opposed to the interests of the people? Yes, I have formed my opinion from the fact that at the time some noise was made about the matter at Muswellbrook, no objection was raised here.
121. Has there been any expression of opinion about the scheme here? Oh yes, frequently. I have heard a number of persons express their opinion.
122. Have you heard any expression of opinion in the council? No, none in the council, but outside. The council have taken no action whatever.
123. You think they would have taken some action had the people of the district been opposed to the scheme? Yes, I do.
124. *Mr. Scobie.*] Do you know the Rouchel Brook? Yes.
125. How is it for permanency? The lower portion within Segenhoe is pretty good. Further up it does not stand at all well; but there is plenty of water in all these streams beneath the surface, although they apparently give out.
126. *Chairman.*] You referred to the opposition at Muswellbrook—was that to the present scheme or to the original scheme? That was to the original scheme which included the Hunter. I was present at the meeting held there to protest against it.
127. You do not know of any opposition at Muswellbrook to the present scheme? There is none whatever that I am aware of; in fact, I understand the feeling towards it is quite the reverse.

Mr.
J. J. Dodd.
25 Sept., 1891.

Mr.

Mr. Joseph David Stafford called in, sworn, and examined:—

- Mr. J. D. Stafford.
25 Sept., 1891
128. *Chairman.*] You are manager for Messrs. Campbell & Co., storekeepers? Yes.
 129. Have you been resident here long? Seven years.
 130. Are you acquainted with the Segenhoe Estate? I have been over a part of it a good many times.
 131. Do you know the site of the proposed irrigation works? I cannot say that I do.
 132. Do you know the sites of the proposed reservoirs? I do not.
 133. You know, I suppose, the people who live in the vicinity of the Segenhoe Estate? Yes.
 134. That is to say, the people on the banks of the Page River, and the banks of the Rouchel Brook? Yes.
 135. Have you heard any expression of opinion from these people with reference to the proposed irrigation works? Yes; I have heard favourable expressions from the people north of Muswellbrook.
 136. Then I suppose the people actually in the vicinity of the scheme are not adverse to it? Not that I am aware of. All who have spoken to me have spoken favourably of it.
 137. You are aware that it is not proposed to take any water from the Hunter? I understand that.
 138. The first scheme, by which it was proposed to take water from the Hunter, was objected to by the people of Muswellbrook? Yes.
 139. Are those who were opposed to that scheme opposed to the present scheme? I cannot say of my own knowledge.
 140. Your business is the chief business here? Yes.
 141. And you would be in as good a position as anyone to know the general view taken of the question? I should be in as good a position as any, no doubt. I have taken the trouble to sound a good many people upon the question, in order to obtain their opinions with reference to the proposal, but I have not heard anyone express himself against it.
 142. The increase of production upon the estate would be of benefit to the district I should imagine? Of very great benefit, I should think.
 143. And putting the matter to you as a business man, it would be an advantage to business people in the town, while it would, at the same time, enhance the railway receipts? Yes; I should think it would enhance the railway receipts very much.
 144. Any increase of produce, resulting from the proposed irrigation scheme, would necessarily have to be conveyed upon the railway? Yes.
 145. It could not be consumed here? No.
 146. Then, in whatever direction the produce might go, it would be to the advantage of the Railway Department? Yes.
 147. *Mr. Morgan.*] You say you have not heard a decided opinion either way outside? Oh, yes. Any opinion I have heard here has been in favour of the scheme. I have heard a decided opinion expressed in favour of it. At the time when it was proposed to take water from the Hunter some objection was raised at Muswellbrook, but even then I could not see where the objection came in, provided they were secured against a dearth of water. The people in this district have invariably been in favour of the scheme.
 148. *Chairman.*] Does it frequently happen that the Hunter runs dry at Muswellbrook? Years ago I saw the Hunter stop running. I am a native of Muswellbrook. I have seen the Hunter so dry in the town that there have been only two waterholes, and no running water at all. That is twenty-five years ago. There has never been anything approaching it since. I suppose the ringbarking that has taken place above here has caused more water to run.
 149. I suppose, being a native of Muswellbrook, you have lived in this district all your life? Yes; I know the whole of the district between Muswellbrook, Aberdeen, and Scone.

Mr. Nathaniel Frederick Asser called in, sworn, and examined:—

- Mr. N. F. Asser.
25 Sept., 1891.
150. *Chairman.*] You have been a resident here for many years? I have been here since 1845—forty-six years.
 151. Have you been in business here? I have.
 152. You are well acquainted with the district and its people? Yes.
 153. Do you know the Segenhoe Estate? I have been over it frequently.
 154. Are you acquainted with the proposed irrigation works? I have not gone into the matter at all. I have not seen the plans, but I have heard that irrigation works are proposed.
 155. You do not know the position of the proposed dams on the Page River and the Rouchel Brook? No.
 156. You know the settlers on the two streams? Most of them.
 157. I suppose you have business transactions with many of them? Yes.
 158. You have had opportunities to gain a knowledge of the views they hold in reference to the proposed irrigation works? I do not think the matter has been mentioned by many of them.
 159. Have you heard the matter discussed among the people of the district? Yes.
 160. You know that there was a former scheme which proposed to take water from the Hunter, but that the present scheme does not propose to touch the Hunter? I am told so.
 161. Have you heard of any opposition to the present scheme? I have not.
 162. Have you heard anything in favour of it? Only what has occurred between ourselves in the neighbourhood—that is to say, the people think it would be a very fine thing, not only for Scone, but for Muswellbrook, and the country round here generally.
 163. If these works were carried out? Yes.
 164. The idea, I suppose, is that the increase of production would bring increase of population and increase of trade? Quite so.
 165. If there were an increase of production, would that increase be consumed in the district, or would it be sent away? It would most likely have to go away.
 166. By railway? Yes.
 167. And to that extent there would be an addition to the railway revenue? Yes.
 168. Whether it went north or south? Of course.
 169. *Mr. Morgan.*] You think that if there had been any objection to the scheme on the part of the people here some agitation would have been raised against it? I never heard the slightest idea of any objection

objection. All that has been said has been rather favourable to the scheme. I think it is very desirable that such a scheme should be brought about, and that it would do a great deal of good if the water were backed up in many places; in fact, I do not think it would do any harm to the people down below if the water in all these creeks were backed up and kept for the purpose of summer use. I think it would do a great deal of good to the whole district.

170. *Mr. Scobie.*] During dry seasons you find a dearth of food for cattle, and if irrigation were successful it would help you to tide over those times? I think so. The results which have been obtained by the Chinamen from irrigation have shown me and many others very plainly that if water were generally conserved for the purposes of irrigation not only the farmers, but the residents throughout the entire district would be a good deal better off. I do not think the scheme, from what I can hear of it, could do any harm to the people of Muswellbrook, because they would get a more even flow. An immense quantity of water which now goes to waste would be detained in the reservoirs.

171. *Chairman.*] You think the reservoirs would equalise the flow in the Hunter? Yes; I think so. A certain quantity of the water used for irrigation would percolate and would gradually get into the river again.

172. *Mr. Scobie.*] What do you think the effect the distribution of a quantity of water upon the flats up here would have upon the river-bed below? I do not think the supply in the river below would be very materially affected, seeing that the water that would be stopped by the reservoirs now goes to waste. I think the supply in the stream would be rather improved down below, because a quantity of the water used for irrigation in dry seasons would percolate through the ground, and come out lower down.

173. You think, then, that the effect would be to make the supply in the stream lower down more regular and permanent in dry times? Yes; I think so. I have seen the Page for miles without a drop of water in it in summer time, and the Hunter, too, from below Aberdeen.

174. *Chairman.*] Do you think, if a large number of these dams were constructed in different positions higher up the river that the water there conserved and used for irrigation purposes would increase the flow in a very dry time? I rather think it would.

175. And the water used to fill the reservoirs would otherwise go to waste? We have had as much water this winter as would fill all the dams that could be made from the top of the Hunter to Muswellbrook without any of it being missed.

WEDNESDAY, 30 SEPTEMBER, 1891.

Present:—

MR. MORGAN,		• MR. PERRY,
MR. MOLESWORTH,		MR. ROSE,
	MR. SCOBIE.	

J. C. NEILD, ESQ., IN THE CHAIR.

Mr. E. Broad, solicitor, appeared on behalf of the promoters of the Bill.

Thomas Henry Williams, Esq, M.L.A., called in, sworn, and examined:—

176. *Chairman.*] You are the senior member for the district of the Upper Hunter? Yes.

177. Are you acquainted with the Segenhoe Estate? Yes.

178. You have, I think, some knowledge of the irrigation works it is proposed to carry out? I have.

179. Is it your opinion that the carrying out of these works would tend to increase the productiveness of the estate in question? Most undoubtedly.

180. And the increased production would also tend to an increased railway traffic? There is no doubt about that, I think.

181. Do you think the carrying out of these works would tend to benefit the locality? I do not think there can be two opinions on that point.

182. Do you think the carrying out of the proposed works would inflict any public injury? My present opinion is that it would not. Of course, when I see the way in which the Bill is drawn up I shall be better able to form an opinion.

183. Would the carrying out of these works inflict any private injury? I do not think so.

184. Are you aware that the Bill under consideration provides for the proposed irrigation works being under the authority and provisions of any general irrigation measure which may be passed by Parliament? I was not aware of that.

185. If the Bill does contain such a provision, I suppose you would consider it in the public interest? I think so, most certainly.

186. I suppose you are aware that provision is made for the taking over of the irrigation works by the public? Yes.

187. And that, of course, would conserve the public interest? I think so.

188. From your knowledge of the district and locality, you are aware that a very large volume of water runs to waste? Yes; for about nine months of the year.

189. And the conserving of a portion of that water and its gradual flow over the lands of the estate might have a beneficial effect in this way—that a portion of the water used for irrigation would eventually find its way back to the river channel? That is a point upon which I am not clear.

190. But it would probably be the case? Yes.

191. It is reasonable to suppose that it would be the case? I think so, considering the nature of the ground.

192. And the fact that water always finds its lowest level? Yes. I know there is a limestone bottom under a good deal of the land, and water, of course, would filter through that.

193. Have you, in your public or private capacity, any knowledge of opposition to the Bill. The Committee are most anxious that all interests should be considered, and that all objections should be provided for? As a matter of fact, I am not aware at present of any opposition to the Bill. I was myself opposed to the scheme in the first instance, because I understood that it was intended to interfere with the Hunter River, but, having seen the site of one of the proposed dams, I am not at all opposed to the scheme; on the contrary, I feel inclined to give it my support. There is one thing, however, I would like to point out to the Committee. The Bill is "to authorise the sale and supply of water for irrigation and

Mr.
N. F. Asser.
25 Sept., 1891.

T. H.
Williams,
Esq., M.L.A.
30 Sept., 1891.

T. H.
Williams,
Esq., M.L.A.
30 Sept., 1891.

and domestic use, and to make, construct, and lay dams, weirs, or flood-gates upon and across the River Page and Rouchel Brook." I have heard one or two residents on Rouchel Brook say that if the dam on that brook were at a certain point—I really do not know what the point is—it would interfere with the supply lower down for four or five months of the year.

194. *Mr. Molesworth.*] You are well acquainted with the locality? I am well acquainted with the district. I know the whole of the land, and I am also acquainted with nearly the whole of the residents, but I do not know their situation relatively to this or that point.

195. But you know the rivers and creeks very well? Yes.

196. Do you think the operation of the Bill would interfere at any period of the year with the rights of persons lower down the stream to the use of the water? Speaking of the proposed weir or dam across the Page, I do not think it would interfere with any one lower down.

197. But you cannot give me the same reply with regard to the Rouchel Brook? No; because I do not know where it is proposed to erect the weir. From what I can learn of the proposed works on the Rouchel Brook they would not interfere with any except three or four persons between the site of the proposed weir and the Segenhoe Estate. Those would be the only persons who could reasonably object, because, after the river goes through their land, it takes a course right through the Segenhoe Estate until it enters the Hunter River. I am told by the engineer, Mr. Gipps, that these persons have no objection, and I do not see that any one else on the Rouchel Brook could reasonably urge any.

198. There is a possibility of the three or four persons to whom you refer raising an objection? It is possible; of course, I cannot say.

199. But you think they might be able to offer reasonable objections? That I do not know.

Mr. Frederick Bowdler Gipps, C.E., recalled and further examined:—

Mr.
F. B. Gipps,
C.E.
30 Sept., 1891.

200. *Chairman.*] You are the engineer of the proposed scheme of irrigation? I am.

201. You have heard the evidence just given by the hon. member for the Upper Hunter? Yes.

202. You have heard what he said with reference to the settlers on the Rouchel Brook between the site of the proposed dam and the Segenhoe Estate? Yes.

203. There are three or four of them? Yes.

204. Are you personally acquainted with them? Not with the whole of them. I saw two of them. I saw Mr. McDonald, the person whose land we shall principally cover with the storage reservoir, and also Mr. Cameron, the man whose land we first come upon. They made no objection whatever to the proposed works.

205. Would the proposed works divert the waters of the Rouchel Brook to the injury of the settlers, or do you think the conveyance of the water in irrigation channels would rather have a beneficial effect? I think it would certainly enhance the value of their properties. The scheme would enable the settlers below to get their water by gravitation from the canal if they desired, and so to irrigate their own land.

206. As a matter of fact your irrigation scheme would substitute an artificial water supply at a high level for the existing intermittent stream at a low level? Yes.

207. Assuming, of course, the worse—that the Rouchel Brook should run dry? Yes.

208. If the Rouchel Brook ran dry in time of drought the settlers would be absolutely better off than they are at the present time? Undoubtedly.

209. They would have an artificial and permanent supply in place of a very risky supply? Exactly.

210. And under any circumstances you would be taking the water through their land at a useful level? Undoubtedly.

211. How many settlers are there concerned? Four, I believe. I have seen two. There are some settlers above the dam whom I also saw, and they appeared to have no objection to the scheme. I met a party of them one day, and, as far as I could understand what they said, none of them seemed to object.

212. I presume the Rouchel Brook is less permanent as a source of water supply than the Page River? I believe more so. I believe it is dependent more upon the coast rain. I think it heads in the coast range, and consequently gets a better rainfall than that received by the Page River. I believe it is a more permanent stream.

213. And if it gets the benefit of the coast rains I presume the dam would overflow more frequently than would the dam on the Page River? I think so. There is the area of the water-shed to be taken into consideration. It is very much larger in the case of the Page River, and that probably would about balance the two reservoirs.

214. *Mr. Morgan.*] I see you propose to give £5 an acre for land belonging to other persons which you propose to take? That was my estimate.

215. Do you consider it a fair estimate of the value of the land? Well, it is an estimate I made after an inquiry on the ground as to what persons would take.

216. *Chairman.*] I suppose it would be grazing ground? It would be grazing ground, with the exception of a portion at the head, near the reservoir. They seemed to think that £5 an acre would cover the cost of even the site of the reservoir on the Rouchel Brook.

217. Is it cropping ground? Yes; they grow splendid corn up there, I believe.

218. *Mr. Scobie.*] We saw the site of the proposed dam upon the Page; perhaps you can give us some information as to the nature of the site of the dam on the Rouchel Brook? It is very similar to the site of the dam on the Page River. There is a bar of rock, which completely crosses the river, and goes up on the two banks. In the case of the Rouchel Brook the bar is of hard sandstone, and the dam could be constructed on its bank in the strongest position. The construction itself would be exactly similar to that on the Page River.

219. Supposing you succeed in thoroughly damming the water, and that the stream is conveyed in the proposed ditch lower down, would the persons lower down have to pay for the water they take out of the ditch in case the stream in the bed of the river ceased running? Under present intentions they would have to pay for the artificial supply.

220. Would there be any probability of leakage from the dam and a consequent flow in the bed of the river? There would be always a certain amount of leakage from the dam which might induce springs. There would be a certain amount of leakage into the main channel which would keep a certain flow in the bed itself. In any case I do not think the persons lower down could be put in a worse position than they are in now.

Mr.
F. B. Gipps;
C. E.
30 Sept., 1891.

221. We saw the site of the dam on the Page, and since then I have been somewhat exercised in my mind as to the power of a stone dam in resisting the great body of water that would flow over it. Supposing there were a rise of (say) 25 feet in the river, the dam would require to be constructed very strongly to stand a flow of water over the top, supposing it were 45 feet high? Yes; but the flood-water would be considerably reduced. The height of the flood would not be 18 feet as it flowed over the top of the dam. The sectional area would provide for a reduction to a 4 feet flow.
222. I noticed that no stones, little or big, had been left, pointing to the existence of a very strong current. The flow of the water and the fall would carry off very heavy material? Undoubtedly; but in a matter of this kind it is a question of weight against weight. If you get a heavy weight of rock against a weight of water pressing against it, you account for it, and the only power acting upon your construction is the momentum of the water against the top. It would only pass, as I have explained, to a depth of about 4 feet.
223. I can understand the pressure, but there is another agency which is more destructive—I mean the overflow? There is nothing in the overflow; that comes on to the apron of the dam. The water goes over with such immense velocity that it is carried clean away beyond the dam.
224. *Chairman.*] There is no chance of its undermining the dam? No chance whatever.
225. I suppose you could not put up the dam without the bed of rock there? Well, we could erect a dam, but it would have to be on a different pattern.
226. *Mr. Perry.*] You say there are several farms below each of the reservoir sites—I suppose they are grazing farms? Well, I suppose you might call them grazing farms. There are small cultivation patches.
227. At all events, on each of these farms there are a number of cattle and horses? Yes; there are a few acres under cultivation, but the settlers depend chiefly upon the cattle.
228. Would the works you propose to construct deprive them of the natural supply of water for their cattle? I do not see how they could do that.
229. I take it that when your reservoirs are full the surplus water will come down the natural channel? Yes.
230. Is there anything to prevent the cattle of these farmers from getting to that water? There is nothing to prevent them. We shall have to make bridges and provide for communication in every way.
231. There is a clause in the Bill with regard to defiling the water, and I want to see people protected against actions on account of their cattle getting into the water. They have a right to the natural flow of the river, and I am anxious to protect that right. I want to know if you have made provision for allowing a sufficient quantity of water to flow for the supply of the cattle. Your scheme, of course, would not take the whole of the water that now flows down? We should take the whole of the water at times when it does not run, but we should not take the whole of it when the river is running.
232. *Mr. Molesworth.*] In other words, when there is plenty of water in the river there will be enough for all, but when there is little you take the whole? Where the river runs dry now, of course, it would run dry then.
233. *Chairman.*] Would the cattle of these farmers be allowed to water on the banks of your water-channels? They would not be allowed to do that, but the farmers could invariably construct tanks, and in every instance they would have access to deep holes in the river channels which have never been known to be dry. I should say that if the company were bound to keep these holes filled that would provide for all emergencies.
234. *Mr. Morgan.*] Take a time of drought—where would the water be if your dam were not there? The whole stream would be dried up, of course.
235. So that even if your dam were not there there would be no more water available than there is at the present time? No.
236. *Mr. Perry.*] When once your dam is full the water would run down its natural course? Undoubtedly. I may mention that at Kiandra in damming the creek we found that several springs came out immediately below, increasing the supply in the stream.
237. *Mr. Scobie.*] In that case the absence of a supply was due to the absence of pressure above? Yes.
238. *Mr. Perry.*] You are of opinion that the people below the reservoir will have a better supply of water during dry weather than they have at present? Undoubtedly.
239. There will be no fear of their suffering from the want of water for their cattle? Not the slightest.
240. *Chairman.*] I understand that in time of drought, as matters now stand, while the water has been known to cease running, in the beds of the two rivers the holes have never been known to be dry, so that there would always be abundance of water for cattle? Yes.
241. *Mr. Scobie.*] Are you speaking of the Hunter and the Page? Well, I was referring particularly to the Rouchel Brook.
242. *Chairman.*] Does what you say apply to the Page? I believe so. I know there are holes in the Page.
243. *Mr. Molesworth.*] At what distance beyond the estate is the dam to be fixed? In direct line not more than a mile and a half from the estate, but by the river course it would be about 2 miles.
244. What provision is made for supplying persons between the dam and the boundary of the estate with necessary water? There are large water-holes in the Page River itself.
245. Will not the dam cause the holes to dry up more rapidly than they would otherwise do? I do not think that is likely, because there is an under-current in the river-bed.
246. Do you think there is the slightest prospect of any person being deprived of his rights to the natural water-course? Undoubtedly not.
247. Will the construction of these works deprive persons of the opportunity to water travelling stock? No.
248. In speaking about the Rouchel Brook, you said there were about four farmers who were likely to be affected by the erection of the dam—have you their opinion as to the desirableness or otherwise of constructing it? I have the opinion of only two of them.
249. What would be the effect of the dam upon their properties? I think it would be highly beneficial. The water would command a large quantity of small agricultural flats which could be irrigated.
250. But I was talking of the right of free access to the brook? They would always have that.
251. But would your dams in any way prevent the flow of water for the purpose for which it is now used? I think the effect of the works would be to increase the normal flow.
252. In your opinion there are no other holders whose rights would be liable to invasion or interference? None; especially if the suggestion that the company should be compelled to allow enough water to flow to keep the holes filled were carried out.

- Mr. F. B. Gipps, C.E.
30 Sept., 1891.
253. *Mr. Scobie.*] I see that you put the evaporation down at 3 inches a month? Yes, that is from the observations of the Government Meteorologist at Lake George.
254. It is possible that the evaporation may not be so heavy in the mountains in time of dry weather—I have noticed that large lagoons exposed to the sun have dropped $\frac{1}{2}$ an inch a day by evaporation? That may be because when the water is less than 3 feet in depth the sun acts right through it.
255. *Chairman.*] The deeper the water in the reservoir the less the evaporation? Not only that, but there is the dew fall at night—that is to say, the water drawn up during the day is returned to a greater or less extent at night.

Mr. William Harris recalled and further examined:—

- Mr. W. Harris.
30 Sept., 1891.
256. *Chairman.*] You are one of the directors of the Land Company of Australasia? Yes.
257. You propose to expend about £50,000 upon these works? Yes.
258. You are not asking Parliament for this concession, in order that you may sell it, and possibly make money out of it, but you propose to expend the funds of your company upon these works; in other words, you desire to absolutely carry out these works as an investment on the part of your company, rather than to obtain a concession which you could sell in the public market? We have no intention of selling the water right, but we may possibly sell some of the farms.
259. What I mean is, that if this Bill passed, your company will be in a position to carry out its works with its own funds? Yes. We have already made a call on Sydney and London, which will be more than sufficient for the purpose. We shall of course apply the money to other purposes if we do not secure the rights for which we are asking in this Bill. If we secure the rights, we have the money ready called up to proceed with the works.
260. Then your proposal cannot be compared with applications that have been made to obtain concessions for the purpose of selling a monopoly hereafter? No; we have no intention of doing that.
261. You ask for this concession for the purpose of improving property you now own? Yes.
262. And you propose, when you are in a position to carry out the works, to do so with your own funds? Yes. We have an uncalled capital at the present time of £396,000, the larger portion of which is in England.
263. I believe your company is the largest land company transacting business in Australia? Yes.
264. The Segenhoe Estate is not your only country property? No.
265. These properties are held by you more for investment than for the purposes of speculation? Yes; it is principally English capital. I might mention with regard to the Chaffey Brothers that they have a scheme under which each farmer purchasing a farm takes a certain number of shares in the irrigation works. I believe the idea is that as soon as the whole of the land is disposed of the owners of the land will become the owners of the water scheme, and will control it. It is possible that such a scheme might be carried out in future to the advantage of the farmers who may take up our river flats and rich agricultural areas. If it could be carried out, I think it would be a perfect system, because the persons who would require the water would control its supply, and would derive any benefit which it might be possible to derive from the scheme. That is why we wish a clause inserted giving us the necessary power. Presuming that the whole of the flats are taken up by farmers, it might be possible for them under a system of co-operation to take over the water scheme, and control it for their own purposes.
266. *Mr. Broad.*] And if you were to sell the whole estate you would want the power to sell this scheme with it? Yes.
267. *Mr. Scobie.*] Do you propose to sell any of the property before any of the irrigation works are carried out? We have already sold several farms near Aberdeen. Two of the farms were sold before we applied for this right, and I think two have been sold since. I might state that two of the farmers found it so dry last summer that they threw their farms up. They said that they would have been perfectly satisfied to remain if we could guarantee that they would be supplied with water for irrigation purposes. In the summer season the soil is so porous and rich that you cannot grow anything without water, and it must be artificially supplied.
268. *Mr. Molesworth.*] Do you propose, under your Bill, to borrow any money for these purposes? No; I do not think that is included in the order of leave.
269. Is your company incorporated? Yes; under the Joint Stock Companies Act. The registration and head office are in Sydney.
270. Does your Bill contain any provisions whereby the irrigation scheme must be completed within a given time? I think it does, but I am not sure.
271. Is there any clause under which the Government can, at any time, come in and resume? I think the Bill provides that we are subject to the provisions of any general irrigation legislation, but that is all.
272. You do not understand by clause 3 that it is intended that the Government shall have power to come in and resume if they think fit? No. What I understand by it is that we are to be subject to the provisions of any general Irrigation Act that may be passed.
273. The Bill does not contain a special clause giving the Government the right to resume the works? No.

SATURDAY, 10 OCTOBER, 1891.

[At Muswellbrook.]

Present:—

MR. MORGAN, | MR. NOBBS,
| MR. SCOBIE.
J. C. NEILD, ESQ., IN THE CHAIR.

Mr. Robert Edward Grigson, M.D., called in, sworn, and examined:—

- Mr. R. E. Grigson, M.D.
10 Oct., 1891.
274. *Chairman.*] You are a medical man, and a resident of Muswellbrook? Yes; I have resided and practiced here for the last seventeen years.
275. Are you acquainted with the proposed scheme for the irrigation of the Segenhoe Estate? To a certain extent.
276. You are aware that the present proposal differs from that made previously for the irrigation of the estate? Yes.
- 277.

277. The first scheme proposed to take water from the Hunter River? Yes.
278. And you are aware that the present scheme proposes to avoid the Hunter water? Yes.
279. Taking water from the Page River and the Rouchel Brook? Yes.
280. In your opinion, would the conserving of water upon the Page River and the Rouchel Brook and its subsequent dispersion through the lower watersheds of those rivers upon the Segenhoe Estate have any effect of a prejudicial character upon the interests of the inhabitants of Muswellbrook? The only prejudicial effect we could recognise here would be an interference with our water supply. In every other respect, of course, the irrigation would be beneficial to us.
281. But you are not of opinion that the proposed scheme would interfere with your water supply? I do not think the modified scheme would do so. I may mention that I have seen the Page perfectly dry for a long time—that is to say, nothing but a chain of waterholes for about 2 miles from above the junction as far as I know it; the Hunter at the same time was running strong.
282. Then the Hunter is a much more permanent stream than the Page? Much more.
283. Consequently the Page River might run dry while the Hunter is still giving a full supply of water? Well, a reasonably full supply.
284. Sufficient for all requirements? The river was running very strong for such a season as that I refer to.
285. The supply from the Page River would necessarily terminate long before the supply from the Hunter would terminate? I think so. It is a common thing to see the Page trickling a little bit at places and in other places perfectly dry. The explanation is that the water is running underneath.
286. I suppose you are aware that the proposed scheme would bring the conserved waters of the Page and the Rouchel Brook actually in the direction of the river channel—that is to say, that the water having been used for the purpose of irrigation, would naturally, by gravitation, find its way back to the river channel in its lower parts? I could not speak as to that; I have never studied the subject very much.
287. *Mr. Morgan.*] I suppose there has been a good deal of talk about this matter here—I suppose there has been some expression of opinion with reference to the scheme? Oh, yes; the question has been debated here in a very lively manner.
288. Has there been any opposition? Judging from what I have heard I think that this modified scheme would meet with the approval of a majority of the inhabitants.
289. There has been no meeting in opposition to the scheme? Not in opposition to the second scheme, but there was vigorous opposition to the first scheme.
290. Have you heard from conversation of any opposition to the Bill? Not to the present scheme. Of course, I have only had very limited talk about it.
291. Knowing that there was some opposition to the first scheme, you would presume that if this scheme were prejudicial to the interests of Muswellbrook, opposition would be again offered? I think so. Public meetings were held here and very strong opinions were expressed with reference to the first scheme, but no meetings have been held with reference to this scheme.

Mr. R. E.
Grigson,
M.D.

10 Oct., 1891

Mr. James Cobb White called in, sworn, and examined:—

292. *Chairman.*] You are an old resident of the district? I have lived here all my life.
293. How are you engaged? In pastoral pursuits.
294. You are acquainted with the proposed irrigation scheme of the Segenhoe Estate? Yes; I think so.
295. You are also acquainted with the original proposition to take water from the Hunter? Yes.
296. You know that the present scheme does not propose to take water from the Hunter? Yes.
297. Were you favourable to the first scheme? Yes.
298. Then you have no objection to the second? None whatever.
299. In your opinion would the scheme we are now considering have any unfavourable influence so far as Muswellbrook is concerned? No; I do not think so.
300. It would not unduly interfere with the water supply in the Hunter? I do not think so.
301. You know the Segenhoe Estate? Yes; I was managing it for about ten years.
302. I believe the flats there consist of very good soil? Yes.
303. But in dry weather it is unproductive? Well, I think it is always productive to a certain extent.
304. But the productiveness of the estate will be greatly increased by irrigation? Yes.
305. And there would necessarily be a larger output of produce from the property? Yes.
306. Where would this increased produce go for a market;—would there be a local market, or would it have to be sent away by rail? There would be a local market for some of it, but some of it would have to go away by rail.
307. Then, to a considerable extent, the earnings of the railway would be increased? Yes.
308. I suppose the irrigation of the Segenhoe Estate would not only lead to a greater output of produce, but would also enable it to carry a larger population? Yes.
309. It could, in fact, be made available for a considerable number of settlers? Yes.
310. And that is scarcely the case as matters now stand? No.
311. *Mr. Scobie.*] Do you think the scheme would have a beneficial effect on the townships in the neighbourhood of the estate? I think it would benefit them considerably.
312. What is your experience with reference to dry seasons;—does the estate suffer each year, or only in some years? Only now and then. We have had a lot of dry seasons up to last year, but formerly we used to have good seasons there, and I dare say they will come again.
313. Do you think that the carrying out of this scheme might lead to a better supply of water lower down from soakage? Yes; I do. I think there will be a considerable increase in the supply lower down from soakage.
314. *Mr. Morgan.*] Do you know the site of the proposed dams? Only from what I have read in the newspapers. I know that one is to be near Gundy.
315. Is it likely to flood any of the houses in its immediate vicinity? No; there is no one there to flood. They are all up out of flood reach, I think. It might be necessary, perhaps, to have a bridge across the river where the road crosses it.

Mr.
J. C. White

10 Oct., 1891

- Mr. J.C. White.
10 Oct., 1891.
316. You are aware that there are several other large streams besides the Page and the Rouchel Brook supplying the Hunter? The Page and the Rouchel Brook are the only two about here. The Isis runs into the Page above where it is proposed to make the dam.
317. I mean between Muswellbrook and Aberdeen? Yes; there is Dart Brook.
318. Is that a large stream? It is about as big as the Rouchel Brook.
319. This scheme in no way diverts water from the Hunter? No; not directly.
320. How long have you known the Page and the Rouchel to be dry? I have known the Page to be dry for about six months at times.
321. Have you known the Hunter to be dry? No.
322. What is the lowest stream you have known upon the Hunter? About what you would get through a foot pipe—that is on Segenhoe.
323. *Chairman.*] I suppose the increased produce and population upon the Segenhoe Estate would mean an increase to the trade and business in the townships in its immediate vicinity? Yes; it must do so, I think.
324. And the increased settlement would be a considerable advantage from that point of view? Yes.

Mr. William Clendenning called in, sworn, and examined:—

- Mr. W. Clendenning.
10 Oct., 1891.
325. *Chairman.*] You are mayor of Muswellbrook? Yes.
326. You are an old resident here? I have been here nearly forty years.
327. You are well acquainted with the locality generally? I am.
328. You were, I think, opposed to the original irrigation scheme which proposed to take water from the Hunter? I was.
329. Are you opposed to the present scheme? Not at all.
330. You do not think the scheme we are now considering would be a disadvantage to the locality? I think it would have the opposite effect.
331. You think it would be an advantage? Yes. I think it would benefit Muswellbrook and Aberdeen and every other place about here.
332. Generally, you confirm the opinion which has been expressed by Dr. Grigson and Mr. White? Yes.
333. That there will be an increase of production and settlement, and, consequently, an increase of trade and railway traffic? Yes.
334. You do not think the interests of the inhabitants of Muswellbrook would be interfered with in the matter of water supply by the carrying out of the proposed works? I do not.
335. *Mr. Scobie.*] As mayor of the town, are you aware of any opposition to the present scheme? Not to the present scheme.
336. *Mr. Morgan.*] Has the matter been watched by the Council? We are watching it now both in and out of the Council. The townspeople take a great deal of interest in the matter.
337. And you think there is no opposition to the scheme by the citizens as a body? Not to this scheme.
338. *Mr. Nobbs.*] You do not anticipate any opposition to the scheme? No. I may mention that I have seen both the Page and the Rouchel dry, or pretty nearly dry, during my residence, still water could be found by sinking for it.
339. I suppose you have not seen the Hunter stop running? Yes, in 1854.
340. *Mr. Morgan.*] You know that it is proposed to erect dams across these creeks? Yes.
341. If the dams were not there where would the water come to? It would come into the Hunter, of course.
342. But it would not be retained in the district? No; it would, of course, flow away into the sea and go to waste:

Mr. Thomas Barnes called in, sworn, and examined:—

- Mr. T. Barnes.
10 Oct., 1891.
343. *Chairman.*] You are a resident of the town of Gundy? I am.
344. You are engaged in business there? No, I followed pastoral pursuits in the district for many years, but I have now retired.
345. You are an old resident? I have been in the district fifty years.
346. You know the site of the proposed dam on the Page River? I do.
347. Would the conservation of water above the dam interfere with the interests of the people of Gundy? It would not interfere with the interests of the people of Gundy, provided the quantity of water thrown back did not stop the traffic, and a bridge across the river would be the only means, as far as I can see, of preventing that.
348. It would be absolutely necessary for the promoters of this scheme to provide either a bridge or some other means of transit? It would.
349. If a proper roadway or bridge, as the case might be, were provided, would the proposed dam, and the conservation of water above the town, do any injury to the people of Gundy? The conservation of water would not do any injury if the present traffic were not interfered with. We are on the main Queensland stock route, and as far as I can see it would be impossible to make any deviation that would not interfere with the commerce and business of Gundy, as well as with the stock route.
350. The stock route comes through the village of Gundy? Yes; and by the water side there is a stock reserve which would also be interfered with if there were a deviation. I do not see how you could make a suitable deviation, because you would have to head the water that would be thrown back by the dam, and in getting round it you would have to go through some rocky ranges. The crossing at the Page is the most suitable place for a bridge. I think one span would suffice. The northern bank is 28 feet 6 inches from the gravel to the top, with an angle of 45 degrees. The southern bank is about 40 feet. The approaches would be so short that the expense in that direction would be merely nominal.
351. What do you think would be the length of the span? I have not had an opportunity to measure exactly the breadth of the river, but I should say that a span of from 90 to 110 feet would throw the abutments on both sides clear of the water. They might trespass a little on the water on each side, but that would not matter. We measured the highest flood-level ever attained at that point, and we obtained the height of about 9 feet 6 inches.

Mr.
T. Barnes.
10 Oct., 1891.

352. *Mr. Nobbs.*] The main route is on the north-western side of the river, below Gundy? Yes.
353. And it crosses the river at two or three places, and comes back to the same side? Yes.
354. In flood time how do the cattle get across? They swim, or go round the bend.
355. They have to go round in flood time? They have to go round more to the west trespassing on private property.
356. What they do in flood time they would have to do if the water were conserved there? If there were a dam there driving the water back the cattle would have to go round at all times.
357. So that if the road were deviated to the point to which the cattle would go in flood time, there would be no necessity for a bridge? I do not think you could drive them round the place where the road would have to be deviated.
358. But supposing a deviation were possible? I do not think it is possible.
359. At all events, if it were possible, it would do away with the necessity for a bridge? No; because they must cross the Page before it reaches the Hunter either above or below the weir.
360. *Chairman.*] But it is necessary to cross the Page a great many times is it not? I think the river has to be crossed three or four times before you reach the Segenhoe Estate, and three times on the estate itself. You cross the Page only once between Gundy and the site of the proposed dam.
361. *Mr. Nobbs.*] How far would the water be thrown back by the dam on the east side? At one place I should say about a quarter of a mile.
362. Where do you think a bridge should be erected? At the present crossing.
363. Is that all Government land? Yes. No resumption will be required.
364. *Chairman.*] I suppose the construction of a bridge there would be of considerable benefit to Gundy, dam or no dam? It would benefit the general public, not only the people of Gundy.
365. It would enable the river to be crossed at all times, whereas at present it cannot be crossed in wet weather? You cannot cross it of course if it is flooded without swimming.
366. I suppose application has been made to the Government for a bridge there? Yes; by our late member. *Mr. W. E. Abbott.*
367. For the use of the public in flood time? Yes.
368. Does much stock travel upon this route? Yes.
369. I suppose when the river is up the stock cannot get across without great inconvenience? As a rule they would swim them, and afterwards by keeping on the western side they can manage to work downwards.
370. But in flood time I suppose the route is changed? Yes; but it is necessary to trespass on private property, and if the owners of the property object the stock must remain on the reserve until they can be got off.
371. Suppose you had a bridge which the cattle could cross they would not be able to cross lower down in time of flood? Not without swimming.
372. What reply was made to the application for a bridge? It was shelved for the time being. It was proposed to make a bridge and continue the road on the western side of the river, and to make a deviation from Gundy to Belltrees by way of Wet Creek; consequently two bridges would suffice from Scone to the Upper Hunter.
373. Is the current strong at the crossing you speak of? Not particularly—it is about one of the best crossings in the river.
374. If the water were dammed up at the site of the crossing it would do away with the current largely? Yes.
375. So that if the cattle could be swum now, they could be swum then? Most assuredly.
376. *Mr. Morgan.*] But with a dam they would always have to be swum? Yes.
377. What depth of water would there be there? I do not know.
378. *Chairman.*] What is the population of Gundy? I could not say exactly—it is not large. The population of the village, I presume, would not be more than fifty, perhaps there would be 100, but I do not know.
379. Your only objection to the scheme consists in the obstruction to the traffic? Yes.
380. *Mr. Morgan.*] And a bridge would do away with your objection? Yes, and it would at the same time give general satisfaction to the public.
381. Would not a deviation of the road suit? If a deviation were practicable, it would throw the village of Gundy quite in the rear. It would be very inconvenient to the residents in the neighbourhood, as well as to those using the stock route.
382. *Mr. Nobbs.*] But whether water is conserved at this point or not, a bridge would be absolutely necessary? Yes.
383. *Mr. Scobie.*] How far is Gundy above the site of the proposed dam? About 1 mile and a quarter—that is by the river course. It would not be so far in a direct line.
384. Without a bridge, would there be no practicable route for the stock above the influence of the proposed dam? No, not unless the road were taken through private property, and a considerable amount of compensation were paid. If a bridge were erected no resumptions would be required, and the present stock route would not be interfered with. Apart from the objection to the obstruction of traffic, the irrigation scheme is approved of.
385. *Chairman.*] It would be worth the while of the people of Gundy to approve of this irrigation scheme, if only for the purpose of getting a bridge? I do not know, but that it would. If the road were deviated it would throw the whole of the traffic in another direction, and every place of business would have to be shifted and rebuilt.
386. I suppose the scheme itself is popular enough in the district? Yes. Our only objection to it is that it would interfere with traffic if a bridge were not erected.
387. *Mr. Morgan.*] But there is an objection to the deviation of the road? A general objection.
388. *Mr. Scobie.*] I suppose the village of Gundy has grown up in connection with the stock route? Yes, and in connection with the gold-fields and the Upper Hunter.
389. From your knowledge of the country about Gundy, do you think the proposed retention of water there, would be an advantage to the district? I am not aware that it would be.
390. How is your water supply in dry seasons? We have had the river low, but I do not remember it dry. Lower down the Page the water goes through the gravel.
391. The bed is more rocky in the upper parts? Yes.

- Mr. T. Barnes.
10 Oct., 1891.
392. Is the bridge you suggest a bridge which the Government might be expected to erect for the convenience of the public? Ultimately they would have to erect it, on account of the population of the Upper Hunter and the Isis, quite independently of the stock route.
393. Are there any other places on this stock route where the stock would be prevented from travelling in wet weather or flood time? The stock route crosses at Cronie Pass, from western to eastern waters. It goes right down the River Isis to Gundy. The Isis runs into the Page about 3 miles above Gundy.
394. The rise of the highest flood at the place you speak of is 9 feet 6 inches? Yes.
395. *Mr. Morgan.*] Are we to understand that your evidence represents the wishes of the people of Gundy? Yes.
396. *Mr. Nobbs.*] Were you delegated by a public meeting to give this evidence? No. I was requested in a friendly way by some of the inhabitants to come here.

Mr. Cyrus Edmund Doyle called in, sworn, and examined:—

- Mr. C. E. Doyle.
10 Oct., 1891.
397. *Chairman.*] You are a resident of the district? Yes. I live about 3 miles below Aberdeen.
398. You are engaged in pastoral pursuits? Yes.
399. I suppose you have lived here a long time? Not more than nine years.
400. Are you acquainted with the proposed irrigation scheme in connection with the Segenhoe Estate? Only from what I have read. I have not been over the country at all.
401. You are aware that it is not proposed to take any water from the Hunter River? Yes; I have heard that the scheme has been altered in that respect.
402. Under the scheme as first submitted, it was proposed to take water from the Hunter? Yes; I remember reading that.
403. Do you not know the Segenhoe Estate at all? I have been on parts of it.
404. From your knowledge of the matter, are you of opinion that the carrying out of the proposed scheme would be to the detriment of any person? I do not think so. I was in favour of the original scheme, as I thought it would tend to regulate the flow of water in the river. It comes down with a great rush when we have a thunderstorm.
405. You would support a scheme taking water from the Hunter River itself? Yes; I was in favour of that.
406. Then you have no objection to the present scheme? No. I should have preferred the original one.
407. As regulating to some extent the flow of water in the Hunter itself? Yes.
408. The produce of the estate, I suppose, if it were largely increased, would have to be conveyed by railway? Yes.
409. And there would be an increased population, I suppose, as well as increased production? I think there would be a largely increased population, as well as an increased carriage on the railway line.
410. Giving a larger revenue to the State railways? I think so. I think the scheme would be for the good of the district all round.
411. *Mr. Scobie.*] You said you were in favour of the previous scheme? Yes. I thought it would regulate the flow of water in the Hunter. I thought it would retain a lot of water that now rushes past and goes to waste.
412. You thought the scheme would be beneficial? Yes. If a large dam were erected and water were retained, I think there would eventually be more water in the bed in dry weather than you would have without the dams, because the water conserved would otherwise have gone to waste. The more water you conserve the better, both in dry and in wet seasons. I may say that I have never seen the river stop running at my place.
413. Has the land which it is proposed to irrigate suffered much in dry weather? Very much; so much that it has not been possible to grow anything in dry seasons. I have not gone in for farming, but I know that the farmers have not been successful in dry times.
414. I suppose you think that if a considerable quantity of land were irrigated it would have a beneficial effect in the saving of stock in dry seasons? Yes.
415. *Chairman.*] The probability is that there would be a food-supply for stock in an irrigated locality, and from that standpoint the irrigation would be valuable to the stock-owners for a considerable distance round? I should think so. It would make produce much more reasonable in time of drought.

Mr. John Joseph Minch called in, sworn, and examined:—

- Mr. J. J. Minch.
10 Oct., 1891.
416. *Chairman.*] You are a resident of Gundy? Yes; I keep an hotel there, combined with a butchering business, and a blacksmith's and farrier's business.
417. Is there any other hotel-keeper in the place? No.
418. Any other butcher? No.
419. You have the sole control of the three trades you have named? Yes.
420. What is the population of the village of Gundy? It is a very scattered population. There are a lot of inhabitants, but they are scattered. It is a farming population.
421. But in the village itself, and in the bend of the river? There are very few there.
422. Would there be 100? I suppose there would be from twenty to thirty.
423. Of all ages? Yes.
424. You know the sight of the proposed dam below the village of Gundy? Yes.
425. Do you think the throwing back of the water there would interfere with the road traffic to and from your town? Yes; I think it would stop all traffic.
426. Have you any knowledge of how deep the water would be at the crossing when thrown back? I could not tell.
427. You do not know whether the throwing back of the water would deepen the crossing very much? I have an idea that it would, and that the cattle would have to swim to cross it. It is scarcely a mile from the dam to the crossing.
428. What is the highest flood level at the crossing at Gundy? The highest water mark in eight years has been 9 feet 6 inches.
429. Has that height of water been long retained? No, it runs down. 430.

Mr.
J. J. Minch.
10 Oct., 1891.

430. But I suppose in wet weather the crossing is impassable for a length of time? Yes, for some length of time in wet weather.
431. For a week or two? For two or three days.
432. Does that frequently happen? In wet weather.
433. You have a good deal of wet weather, you are on the high land? Yes.
434. And the Page River has a fairly large watershed? Yes.
435. But the fall of the river being steep the water runs off rapidly? Yes, the current is very strong in wet seasons.
436. Do you know whether the proposed dam would throw the water back to a greater depth than 9 feet 6 inches at the proposed crossing? Oh yes, I think it would make it higher than that.
437. Would it be possible to deviate the road so as to give another outlet to the traffic? I know of no road that would be so suitable to the stock and the inhabitants of the district as the old one.
438. During your residence at Gundy has any application been made to the Government for a bridge at this crossing? Not in my time.
439. I suppose the people want one there? It would be very convenient for the public. In fact with a bridge there you could go into Scone at any time.
440. But there are other fords lower down;—how would you cross them? There are seven altogether.
441. But how would you cross them? Go round them.
442. But there is no road? Of course you could only go round on horseback—not with a vehicle.
443. Are you acquainted with the wishes and feelings of the people of Gundy with respect to this scheme? Judging from the information I have received, they all seem to be in favour of it.
444. You have no personal objection to it yourself? No; all I want is a bridge at the place, so that our business may not be taken away. Of course it is the traffic through the place which brings the business to us.
445. *Mr. Scobie.*] If the bridge were not there the inhabitants of Gundy would lose the trade of the parties who bring stock that way? Yes, and of the travelling public generally. If the water were thrown back and no bridge were built, it would not be possible to make another road to suit the business people.
446. The want of the bridge is the only objection you have to the proposal? Yes; that is the only objection I have heard of.
447. *Mr. Morgan.*] There is a suggested deviation of the road. At what distance would it be from the township? I do not know the proposed deviation.
448. Would it interfere with the business of the town? Yes; if the road went any other way.
449. *Chairman.*] You have examined the copy of the county map? Yes.
450. And you have had pointed out to you the proposed deviation? Yes.
451. Is that a deviation that would meet with your approval? No.
452. But would it not shorten the distance and reduce the number of fords? It would.
453. Would it not shorten the distance to the travelling public? I am afraid they would not all take that road.
454. If that deviation were made, a new stock-road would spring into existence, avoiding the town of Gundy and interfering with the present business arrangements? Yes.
455. But to you it would make a difference of several miles in the length of the journey? Yes.
456. Would not that be to the advantage of travelling stock? Yes; but the road would have to come on to private property.
457. What difference would the short cut make? A difference of about 3 miles.
458. Your chief objection to the proposal is that it would interfere with business? Of course, it would interfere with business.
459. It would leave you rather out in the cold? Of course it would.
460. But it would have been an advantage to the public if the road had been originally laid out the other way? That I could not say.

Mr. Frederick Bowdler Gipps, C.E., recalled, and further examined:—

461. *Chairman.*] You have heard the evidence of Mr. Barnes and Mr. Minch with regard to the interference with the roadway across the river at the town of Gundy? Yes.
462. You have heard these witnesses say that at flood time the water on the crossing is about 9 feet? Yes.
463. Would your proposed dam create as great a depth at that place as 9 feet? It would increase the depth to 32 feet.
464. Would there be a permanent depth of 32 feet? No; that would be the flood depth. The permanent depth would be 27 feet.
465. Making the ford absolutely impassable? Yes.
466. You have laid out a plan of road deviation there? Yes.
467. That would avoid the ford? Entirely, and one other ford also.
468. Would it lengthen or diminish the distance from Gundy to Scone? It would increase it by about 30 chains, but it would avoid two very steep hills, and two crossings.
469. But it would avoid the town of Gundy? No; it would not. It would meet the present cattle track in Gundy itself, right in front of the hotel.
470. Then, so far as Mr. Minch's business is concerned, your deviation would not affect him in the least? Not in the least, as far as I can see.
471. Are there any other businesses in the place that would be affected? Not that I know of.
472. Would it make a difference to any of the land-holders? Not that I know of. But I may add that this deviation was only proposed in the interests of the people of Gundy themselves. As far as the company are concerned, it would be far less trouble and far more economical to construct the bridge than to deviate the road. We deviated the road to avoid the crossing, and to suit the Gundy people.
473. It would be less expensive to the promoters to construct the bridge asked for? A wooden tresselled bridge—not a bridge with a span of 100 feet.
474. But a bridge that would be perfectly serviceable? Yes.
475. Would it be safe as regards the timber coming down? Yes.

Mr.
F. B. Gipps,
C.E.
10 Oct., 1891.

- Mr. F. B. Gipps, C.E.
10 Oct., 1891.
476. You have provided for this in your estimate of cost? Yes. I have provided for the proposed road deviation, and I say that it would be better to construct the bridge so far as the company are concerned.
477. What is the estimate of cost of the deviation? The cost of the deviation is £3,000. A wooden tressel bridge could be constructed for much less than that.
478. In proposing the road deviation, you proposed what you deemed would be better in the interests of the people of the district? Yes.
479. But not what would be better in the interests of the company? It would be to the benefit of the company, of course, to avoid opposition to the Bill.
480. Your total estimated expenditure in connection with the scheme is, in round figures, £50,000? Yes.
481. I suppose the expenditure of that sum would afford a large amount of work in the locality? Yes, very large.
482. I suppose the chief expenditure would be in labour, not in material? In labour. All the material would be got in the neighbourhood.
483. I suppose four-fifths of the expenditure would be for labour? Yes.
484. So that the scheme would afford employment to a large number of people? Yes; not only during the time of construction, but afterwards, for maintenance and the carrying on of the irrigation works.
485. *Mr. Scobie.*] I understand that Gundy is on the side of the river to which you would keep in avoiding the two crossings? Yes.
486. And that the road would be near it? Right through it.
487. *Chairman.*] Mr. Minch gave us to understand that the people would probably not take the deviation? I think the deviation would be generally taken. It starts almost from the site of the dam and goes across the Hunter River, and I do not see how it would alter present circumstances. The public can go by the road, which, I suppose, Mr. Minch thinks they would take at the present time if they chose.
488. *Mr. Morgan.*] The company are willing to pay either the cost of the deviation or the bridge? Yes, whichever is preferred. Of course, if the people like to have a bridge, one can be built, but it would not be an iron bridge with 100 feet span—it would be a wooden tressel bridge.
489. In reality then the company are willing to build whatever the people require? The company would build a bridge if, after seeing the deviation, a bridge were preferred. I cannot understand why anyone should prefer the bridge, because the deviation would avoid two difficult crossings which cannot be crossed at all in flood time.
490. You do not think that the throwing back of the water would flood the town of Gundy? I am not prepared to say that, because we have had such conflicting evidence as to the height of the flood. The evidence of Mr. Barnes is to the effect that the height is only 9 feet 6 inches. Mr Morgan showed me a flood-level near the crossing on the Page, and I took a section there and found the height 18·2 feet. There is such a large difference, that one or the other must be wrong.
491. Would the construction of this weir make the flood-waters higher? Undoubtedly.
492. *Mr. Scobie.*] The difference you talk of in the flood-levels might be accounted for by a difference in the fall of the river? There is a difference. The fall is certainly greater at Gundy than it is at the spot where I took the section.
493. Is there any stream of considerable size between the two places? Not that I know of.

Robert George Dundas Fitzgerald, Esq., M.L.A., called in, sworn, and examined:—

- R. G. D. Fitzgerald, Esq., M.L.A.
10 Oct., 1891.
494. *Chairman.*] You are a solicitor and one of the members for this district in the Legislative Assembly? Yes.
495. You are a resident of Muswellbrook? Yes.
496. You practice there? Yes.
497. Are you acquainted with proposed irrigation scheme for the Segenhoe Estate? I am.
498. In your opinion, would the carrying out of the proposed works be detrimental to the interests of the people of Muswellbrook? I do not think so in any way.
499. Is there, to your knowledge, any opposition to the proposed scheme among the inhabitants? I have made it my duty to make inquiry among those persons who are largely interested in property in this district, and, so far from there being any opposition to the scheme, they all seem to desire that it should be carried out.
500. In the belief, no doubt, that it would tend to increase the production and population of the district? That it would benefit the district in every way in a commercial sense.

[At Aberdeen.]

Mr. Murdo Cameron Mackenzie called in, sworn, and examined:—

- Mr. M. C. Mackenzie.
10 Oct., 1891.
501. *Chairman.*] You are a resident of the town of Aberdeen? I am.
502. I think you are engaged in business here? In a small way.
503. Have you been a resident here for any length of time? For a quarter of a century.
504. You are acquainted with the proposed irrigation works in connection with the Segenhoe Estate? Yes, I have read of the proposed works.
505. Have you visited the sites of the proposed reservoirs? Not lately, but I know the localities.
506. You know that it is proposed to dam up the water on the Page River and the Rouchel Brook, but not to interfere with the Hunter? Exactly.
507. Have you personally any objection, or do you know of any objection on the part of persons in or about the town of Aberdeen, to the proposed scheme? No; there is not one I know of who objects to it.
508. Notwithstanding your long knowledge of the district, you have no personal objection? No.
509. You do not consider that the scheme would be to the detriment of the people of the district? No, quite the reverse, I think.
510. Do I understand that in your view the proposed scheme would lead to an increase of production and population? That is my belief.
511. And a consequent increase of trade? Undoubtedly.
512. And I suppose also an increase of traffic on the railway? Undoubtedly.
513. So that whatever advantage the proprietors of the estate might derive, the public would also gain a corresponding advantage? Yes; and I should like the Committee to understand that I am speaking my own opinion on the matter, quite apart from my own business as a storekeeper.

Mr.

Mr. Alexander Cameron sworn, called in, and examined:—

Mr.
A. Cameron.
10 Oct., 1891.

514. *Chairman.*] You are a resident of this district? I reside on the Rouchel Brook.
515. Have you been living there long? Over thirty years.
516. Are you engaged in farming pursuits? I am grazing on a small scale.
517. Are you acquainted with the site of the proposed dam on the brook? I do not quite know where it is proposed to erect the dam, but I know the whole length of the Rouchel Brook.
518. You have before you a Government plan of the parish of St. Aubins, and you see marked upon the plan the proposed position of the dam on the brook? Yes.
519. Is your property above or below the dam? Below it.
520. Have you any objection to offer to the construction of the dam? The only objection we have is that it might make us short of water in a dry time.
521. You think it might reduce the supply of water? Yes. The Rouchel is not always running, and if it were dammed above it might make us short of water.
522. Does the brook ever run dry? It runs dry for over a mile in some places.
523. Have you considered whether the the damming of a large body of water above your property would or would not cause a more steady supply to your property than now exists? I could not say. I have had no experience in the matter.
524. It is in evidence that the water-channels of the proposed scheme are merely to be water-channels cut through the country. They are not to be lined or made water-tight in any way, and knowing that, do you think that there would or would not be a considerable soakage from these channels that would fully compensate you for any alteration in the river-bed itself? I could not say.
525. It is our duty to obtain information from all persons who are likely to be affected by the proposed scheme. We have no desire to cause a one-sided view of the matter to be taken by Parliament. Are we to understand that you desire to offer objections to the proposed scheme? I have not studied the question, but I think it would make us very short of water in a dry season. I do not think, having regard to where it is proposed to put the dam, that such soakage would come through, and I think we should run very short. There are men here to-day who have had more experience than I have had in the same locality.
526. You keep stock? Yes, cattle.
527. What you fear is that the construction of the dam would lead to your cattle going short of water? Yes.
528. Are you aware whether the proposed water-channels pass through your property? I do not know.
529. What is the area of your property? Three hundred and sixty acres.
530. About how many head of cattle have you? I run about 100.
531. Does the failure of your water supply ever affect the number of your stock;—have you had any losses? Not through want of water.
532. Suppose—and understand I am asking this question in any shape or way dealing with the village itself—suppose the company entered into an agreement to supply you with water from their water-channels at a reasonable figure when you require it for your cattle, you making no payment at any other time, would that be a proposal that you would be induced to view favourably? I think it would be only fair if the water were supplied to us without any charge.
533. Not for the purposes of irrigation, but simply for the watering of stock? Quite so. All that we want is that plenty of water shall be kept in the brook. We have always had plenty of water; but we might run short if the dam were made, although when the brook stops running there are of course holes.
534. It sometimes stops running now then? Yes, in dry seasons.
535. For how long? I could not say.
536. For a month? Perhaps for six months.
537. You have known it to cease running for six months? Yes.
538. But during that period there has been more or less supply in the holes of the river-bed? Yes, at my place; but other places have run shorter.
539. I suppose your view is that the construction of a dam would interfere at times with the flow of the stream? Yes.
540. But would that interfere with the water in the holes? I think that if a considerable quantity of water were held back it would make the holes less. There is at the present time soakage underneath, but there would be no soakage from the proposed dam.
541. *Mr. Scobie.*] How far is your land situated below the proposed dam? I think about 3 miles.
542. How long would the brook continue to run after such rain as we have had at this time of year? I could not say.
543. The water passes away at once after heavy rains? Yes, it runs down very fast.
544. Would you think it reasonable to suppose that if a dam 35 feet high were erected there would not be a leakage from the great pressure of water above on to the lower land, and that there would be no soakage from the channels conveying the water for irrigation? I suppose there might be some amount of soakage from the channels; but I do not know about the dam.
545. But do you not think it would be unreasonable to suppose that there would be no soakage? I suppose there would be a certain quantity.
546. Possibly then the soakage might lead to a better supply of water in the bed of the river in dry weather than you would have if there were no dam? It is just possible that there might be.
547. The fear that you might be without water is the only objection that you have to urge against the scheme? Yes, unless there were any danger of the dam breaking away, because we are on very low-lying ground.
548. *Mr. Morgan.*] What do you do for water when the river is dry? There is always plenty of water in the holes.
549. If the dams were not there, what would become of the water? It would flow away.
550. The water in the dams would not be on your land or anywhere near it? Quite so, it would simply flow down to its outlet.

Mr.

Mr. Frederick Bowdler Gipps, C.E., recalled and further examined:—

Mr. 551. *Chairman.*] The Committee would like to know whether the water-channels of the Rouchel dam
F. B. Gipps, pass through Mr. Cameron's property? Yes, they go right through his property.
C.E.

10 Oct., 1891.

Mr. Walter Woodrow Holmes called in, sworn, and examined:—

Mr. 552. *Chairman.*] You are a resident on the Rouchel Brook? Yes.
W. W. 553. Have you lived there long? Three years.
Holmes. 554. Are you acquainted with the site of the proposed dam there in connection with the Segenhoe
Irrigation scheme? I have heard persons speaking of it, but I do not know exactly the site of the dam.
10 Oct., 1891. 555. Could you recognise it if it were pointed out on the map? I think so.
556. You have before you a map of the parish of St. Aubins, and you see upon it the site of the proposed
dam;—is your property above or below it? The dam is on my property.
557. Would the effect of the dam be to cover much of your property with water? I have not any idea
as to what point the water would go to.
558. What is the area of your property? 1,750 acres.
559. You occupy it as a grazier? Partly for grazing and partly for farming.
560. What farming do you carry on? All sorts—wheat, barley, and corn.
561. Your property comprises some river flats? Yes.
562. What number of cattle do you keep? I keep about 1,400 sheep and 150 head of cattle.
563. Have you any objection to offer to the establishment of the proposed irrigation works? I know so
little about the matter, and what its effects will be that I am almost in the dark about it.
564. Have you seen the Bill before Parliament for the construction of these works? I saw an account
of it; but I thought at that time that the dam would be on Segenhoe, and I took no interest in the
matter; I did not think it would affect other properties; I remember the day the engineer passed my
place; but I did not know that he was on the look-out for a site for a dam; my house is just alongside
the dam; there is a cottage and a house quite near it; my brother is living in the cottage.
565. Then you are scarcely in a position to say whether you approve or disapprove of the scheme? No.
566. You are, of course, aware that the proposed dam is an over-shot dam? Yes; but I thought that
the house and cottage being so close to the dam, the water might carry a lot of soil away, and injure
them; then, again, I do not know where the drains that will carry the water will be. If the drains are
between the road and the brook, they will do me a good deal of damage.
567. You are aware that the Bill provides for an ample measure of compensation for any damage done to
property? I suppose it does; it would be pretty rough on us if it did not.
568. *Mr. Nobbs.*] Provided you were fairly compensated, you see no reason why the scheme should not be
carried out? No; I do not, provided I get fair compensation; I spent all I had on my place; it makes
a good living for me; and if I were to lose a lot of it I should require good compensation; the loss of a
lot of it would mean that I should not have so much to make a living upon.
569. But if you received compensation, you know of no reason why the scheme should not be carried
out? No; of course I should expect compensation. I do not know whether the drains would cut me
off from the road or not.
570. The question of access to your property, and the question of damage in every way is a matter for
compensation. If you were compensated for damage in all these respects you would have no objection to
the scheme? No.
571. *Mr. Scobie.*] What is the height of your property above the summer level? It is right on the bank
of the creek. That is my orchard.
572. What height is it? I suppose about 12 or 15 feet. The river has a high bank.
573. Would your orchard be above or below the dam? It would be below. There is one other thing I
might mention. My property runs $1\frac{1}{4}$ mile on both sides of the creek below the dam; and I
should like to know how I will be able to manage for water. During the time I have been on the
Rouchel it has stopped running for a great many months.
574. *Chairman.*] For how long at a time? For three or four months.
575. But there was water left in the water-holes? Yes, from soakage.
576. From the upper parts of the brook? Yes.
577. And would not that soakage be increased from the storage of a large volume of water? I doubt it,
because there is a bar of rock at the place where it is proposed to put the dam, and that would not let
much water through. So far as the dam, being an over-shot dam, is concerned, if the water is taken out
to supply the farms on Segenhoe, there will not be much water coming over.
578. *Mr. Morgan.*] How does the water soak through now if there are rocks? There is always a little
trickle over the rocks in the driest time. Then, perhaps, a few yards further down you would not see
any, because the water soaks underneath.
579. If there is a trickle the river is not dry? It is what we call dry. We know that the soakage is
going on underneath, because the holes do not get any less. If that soakage were stopped by the dam, I
should like to know how our holes would be situated. If I were sure of that part of the thing, it would
be right enough.
580. *Mr. Nobbs.*] You have noticed the brook dry many times? No; only once. I have only been there
three years.
581. During the time you have been there, have you not seen the rocks perfectly dry, without the trickle
you mention? I could not say. I could not be sure whether the rocks have been dry or not.
582. What is the value of your flat land? I do not know. I have some of it under wheat and barley at
the present time, and you can see it for yourselves. I think it is as good a flat as anyone could have. It
is all stumped and fenced, and represents a lot of money to me. I should have no objection to the scheme
if I were sure of there being water below, and if I got sufficient compensation.

Mr. Duncan Kennedy called in, sworn, and examined:—

Mr. 583. *Chairman.*] You are a resident on the Rouchel Brook? Yes, I have been there all my life.
D. Kennedy. 584. Are you engaged in farming pursuits? No, I am grazing.
585. What is the area of your land? Between 3,000 and 4,000 acres.
10 Oct., 1891. 586. You run a good number of cattle and sheep? Yes.

587.

587. Are you acquainted with the site of the proposed dam on the Rouchel Brook? Only from hearsay.
588. You have the parish map of St. Aubins before you? Yes.
589. Upon it you observe the site of the proposed dam? Yes.
590. Is that site above or below your property? It is above it. I have property above and below, but the bigger part is below.
591. Have you any objection to the construction of the proposed works? Well, they might reduce our water supply—that is the only thing. In dry seasons we are very short of water. I have been compelled to ask my neighbour, Mr. Gardner, to shift his fence to allow my sheep to get water in dry summers. The brook runs dry at times.
592. Does that happen frequently? In any dry summer it ceases running.
593. But you have water in the holes? Yes, there is water in the holes, but there may be, perhaps, half a mile or a mile between them—in some places more, and in others less.
594. Does the brook cease running for any length of time? That depends upon the weather.
595. What stoppage have you known? I have known it to cease running for two or three months.
596. On any occasion for a longer period? I cannot remember at this moment any period longer than three months. I believe at times I have seen it dryer for a longer period, but I could not fix the dates, it depends upon the weather.
597. It might have stopped running for as long as six months? I believe it has for five or six months.
598. It is in evidence that the dam is to be an overshot dam, and you know what that means: that water will flow over the top when the dam is full. I suppose you recognise the fact that water would be taken from the dam for irrigation purposes only in dry weather? Yes.
599. And when the dam is once full there would be no alteration in the flow of the brook? Yes, but suppose the dam were not full—at such a time it would stop all the water coming down, and if we had a spell of dry weather what should we do down below. I should like to know what we are to do while the dam is filling. There are water-holes, but they are not on everyone's property. Suppose I lost a lot of sheep and cattle through want of water, who is to be responsible for them.
600. *Mr. Morgan.*] What is the depth of the water-holes? I do not know the depth; it varies. There is a sandy bottom, and every flood in the creek alters them. If the brook stopped running, I am sure the supply would run away before the reservoir would fill up, and I do not see, under those circumstances, what we should do for water.
601. *Mr. Nobbs.*] If there are water-holes in front of your place you would be all right? I am not sure of that. I do not know how long the dam would be filling up.
602. *Mr. Morgan.*] Suppose that there were no rain for six months, and that there were no dam, would you be likely to have more water than if the dam were there? I could not say, because we have never had a dam there. I never knew the brook to be dammed.
603. *Mr. Scobie.*] I understand your chief fear to be that in dry weather when the water is being used, the dam will not overflow, and that your holes will therefore run short? Yes. I do not know what is to keep our holes going.
604. *Chairman.*] Your objection resolves itself into this: You are afraid of suffering injury while the dam undergoes the process of filling in dry weather? Yes.
605. *Mr. Morgan.*] What number of stock do you water? I water about 1,200 sheep, and the greater number of my cattle.
606. How much water would it take to water them each day? It depends upon the season. I have no idea. If they have back water they would not require to come to the brook. I cannot tell you how much water they would consume.
607. *Chairman.*] In dry weather would the sheep require to water every day? Oh, yes, in dry weather.
608. *Mr. Morgan.*] If the company undertook to supply water for your stock, would you have any objection to the scheme? Well, then, I should like to know who is to be responsible if the reservoir breaks away and washes away our fences and other property.
609. I presume the company intend to put up a dam to be a fixture. If they put up a shoddy structure they will lose the money they have put into it? Many a man builds a house which falls.
610. *Chairman.*] You have no guarantee against damage from floods? No; of course not.
611. If the dam broke away it would be in the nature of a flood? But the damage would be much greater than it is in the case of an ordinary flood.
612. I suppose you know that the proposed Bill provides compensation for all land taken and damage done? I was not aware of that.
613. *Mr. Nobbs.*] You have not read the Bill? No.
614. You do not know of any clauses in it that are objectionable? No. I only go by what I have read in the newspapers, and so forth.

Mr. William Irwin Gardner called in, sworn, and examined:—

615. *Chairman.*] You are a resident on the Rouchel Brook? Yes.
616. Are you engaged in farming or pastoral pursuits? In both.
617. What is the area of your property? At the place where I live, at the site of the proposed dam, I have only 400 or 500 acres, but I suppose I have about 8,000 or 9,000 acres above the dam.
618. You know the site of the proposed dam? I am informed that it is at Mr. Holmes'.
619. You have a map of the parish of St. Aubins before you? Yes.
620. And you recognise upon it the site of the proposed dam? Yes.
621. The land you have mentioned as being below the site of the dam, is below, and the portion above is above? Yes.
622. Are you acquainted with the nature of the dam proposed to be constructed? I am not.
623. It is in evidence before the Committee that it is proposed to construct it of rock, with a wooden face, and that it is to be an overshot dam, that is a dam the water flowing over the top when it is full? Yes.
624. Have you known the Rouchel Brook to run dry? I have seen it stop running, but there has always been enough water in the holes to water stock.
625. But they are some distance apart? Perhaps there would be $\frac{1}{2}$ a mile between some of them.

Mr. W. I.
Gardner.
10 Oct., 1891.

- Mr. W. I. Gardner. 626. Have you any objection to offer to the construction of the proposed irrigation works?—Not the slightest. I do not see how they could injure any person, and I think they would do a great deal of good.
- 10 Oct., 1891. 627. You think that they would increase the production and population? Yes, that is my idea.
628. Do you think the conservation of water would have a generally useful effect upon the locality? Yes, I think it is the description of work the Colony requires.

MONDAY, 30 NOVEMBER, 1891.

Present:—

Mr. PERRY,

Mr. SCOBIE,

Mr. ROSE.

MR. NEILD IN THE CHAIR.

Mr. Frederick Bowdler Gipps recalled and further examined:—

- Mr. F. B. Gipps. 629. *Chairman.*] You heard the evidence given by the proprietors of certain property in the township of Gundy, in which they expressed a preference for a bridge at the present crossing on the Page River, rather than a deviation of the road as proposed in your survey plans? Yes.
- 30 Nov., 1891. 630. Which would be the most expensive—the bridge or the deviation? The deviation, undoubtedly.
631. Could you give the Committee an estimate of the relative probable cost? I placed £2,000 on the estimates for the deviation of the road and the purchase of the land. I do not think the bridge would cost much more than half that amount. We thought we were best consulting the interests of the local people.
632. Are you authorised on behalf of the promoters of the scheme to assent to the proposed alterations? I do not know that I am authorised, but I should think the company would consent, on the ground that it would be more economical. We thought that we should, by our plan, avoid two crossings. Instead of that, if we put up a bridge, the local people would still have one of the worst crossings facing them. In either case the local people would be put in a better position than they are at present, because it would provide crossings in flood times.
633. Within the area of the proposed works, is there a single made road? The road through Gundy is supposed to be a fourth-class road.
634. Below the dam on the Page River, are there any made roads within the area of the proposed works? There are no made roads anywhere, but these are fourth-class roads—that is, that they are reserved as roads.
635. Are there any formed roads within the area of the proposed works? I do not know of one.
636. *Mr. Scobie.*] Do the Government contribute any moneys for those roads? Yes, but they are not metalled.
637. *Mr. Rose.*] Are they in use as roads? Yes.
638. Are they partly formed, but not metalled? They are subsidised by the Government.
639. *Chairman.*] Do they simply fill up holes? Yes, and chop a tree down here and there.
640. Some witnesses in Aberdeen took exception to the course of the irrigation canal from the dam at Rouchell Creek being under the impression that it went through their orchards and so on? Yes.
641. Did you afterwards make a visit with the members of the Committee to Rouchell Creek and meet the witnesses? Yes.
642. Did you point out the actual course of the canal? Yes.
643. Was the canal in the place in which they believed it would be? No; they found that they were mistaken. The course of the canal went below the orchard, and did not affect it in any way.
644. Did the witnesses express themselves as being satisfied? Quite satisfied.
645. Is it proposed to enclose the course of the canal on the two or three properties through which it will pass? I should think that would depend as to whether the owners force the company to resume the land and pay a high price for it, or whether they allow the company to take the canal through without forcing them to resume. If they force them to resume at a high price the company will have no alternative but to fence the land to show that it is theirs.
646. Is it otherwise contemplated to fence the canal? No.
647. So that the proprietors of the land through which the canal will pass would be enabled to water their stock? Undoubtedly. We would make special watering and crossing places for them by paving the paths or tracks which they used.
648. So that if water were diverted from the river channels the water would still be available for stock purposes within the canals? Yes; provided they do not force the company to buy the land at an exorbitant price.
649. *Mr. Rose.*] Would not canals have a tendency in flood time to inundate the surrounding lands? No; the floods could not possibly be increased thereby. The canals would help to keep the floods off.
650. *Mr. Perry.*] Could you regulate the flow of water in the canals? Yes.
651. *Mr. Scobie.*] Have you an arrangement at the mouth of the canal at the dam whereby you can shut off the water so that in case of a flood you could regulate the flow of water down the channel? Yes, that is what I mean by saying that the canals would increase the means of preventing floods on the local lands.
652. Was there only one man who made any objection to a canal going down with reference to his orchard? Yes. Another settler objected to cutting his stock off from the water; but I think the objections of both parties were met satisfactorily.
653. *Mr. Perry.*] Is the maximum price which you propose to charge for the water less than what is charged in Sydney? Yes. I am very much astonished to see the price which is fixed in the Bill—that is, one shilling.

Mr.

Mr. Ernest Broad called in, sworn, and examined:—

654. *Chairman.*] Are you solicitor for this Bill? Yes.
655. Was the Bill drawn in your office? Yes; and settled by counsel.
656. Does it follow the lines of any existing legislation in this Colony? Yes; the Mulgoa Irrigation Act which was very exhaustively amended by a Select Committee of the Legislative Council. This Bill embodies all the amendments which the Council thought fit to put in that Bill.
657. Have you made full provision in this Bill for compliance with that statute? Yes.
658. Are the company promoting this Bill in a position to proceed with the proposed works, upon obtaining Legislative sanction? Yes.
659. The object therefore of applying to Parliament for this sanction is for purposes of actual improvements, rather than for a mere speculation? Yes; there is no element of speculation in it. The company propose to retain the rights in their own hands, and not to sell them.
660. Then the Bill does not come under the heading of what are frequently known as syndicate speculations? No; it does not contain the power for the company to assign its Parliamentary rights to another Company; but that is only in the event of selling the estate as a whole, so that they might be able to pass these rights with the estate.
661. Then the passing of this Bill would be followed by the construction of the works, and not by any effort to float the concession in the market? Yes. Since Mr. Harris gave his evidence before the Committee the English shareholders have met and approved of a special call being made for this purpose.
662. You do not anticipate any delay in carrying out these works? No; I understand the company are prepared to proceed immediately they obtain Parliamentary sanction.

Mr. E. Broad.
30 Nov., 1891.

APPENDIX.

A.

[Map.]

B.

[*Handed in before the Select Committee on "Segenhoe Estate Irrigation Bill," by F. B. Gipps, C.E.*]

REPORT on an Irrigation Project for the Segenhoe Estate, Upper Hunter River, New South Wales.

THE Segenhoe Estate is situated at Aberdeen, in the Upper Hunter Valley, 185 miles on the Great Northern Railway from Newcastle, and at an elevation of 610 feet above sea-level. The Hunter River bounds it on the west for about a mile, when with a sharp curve it changes its course from north to east and traverses the property for about 2½ miles in that direction; then again bending round to the north, it flows on, almost parallel to the Page River, to the boundary of the estate. The Page River, a large tributary of the Upper Hunter River, enters it about 2½ miles north-east of Aberdeen Station, having first traversed the whole of the estate from its northern boundary line, including by far the largest portion of river alluvial flats and agricultural slopes. Thus it will be observed that this estate is singularly well situated with regard to water supply in having two rivers traversing it from north to south and from east to west. Unfortunately neither of these rivers have permanent streams; consequently, in order to ensure irrigation when most required in seasons of long drought, it is absolutely necessary to resort to storage reservoirs.

Undoubtedly the isolated peaks of porphyritic trachyte which meet the eye in every direction from the homestead and which seem at a distance to meet in long sloping spurs, form the most prominent physical features of the estate. These peaks are chiefly noticeable at the junction of the Page with the Hunter River, and give one the impression that at one time they may have formed a barrier to the flow of the Page River and may have enclosed an enormous lake for miles up the valley. Behind these peaks may be seen the more regular ranges of the lower coal-measures. These measures include chiefly thick belts of conglomerate and limestone, the latter of a brownish-grey colour and largely hydraulic, according to some mortar tested by me which I was informed was made from it. Most of the hills and ranges are rocky and precipitous near their summits, especially with an eastern aspect, but their steep spurs gradually give way to rolling country, which, in its turn, slopes gently down to the river flats. Thus the conditions are all favourable to a rich, strong, agricultural soil, independent of the flood detritus which has assisted so largely in forming the extensive river flats. According to Mr. Licensed-Surveyor Pike's computation and map, there are 4,945 acres of river flats, and 7,308 acres of rich agricultural soil on the slopes of the rolling country in the estate, leaving 11,272 acres of good grazing country. It was my aim to project an irrigation scheme which would supply as large an area as possible of the 12,253 acres of the flat and rolling country.

Guided by Mr. Yorke, your local manager, who was at all times assiduous in rendering me every assistance in his power, and whom I have to thank largely for the success of my mission, I inspected the banks and channels of the Hunter, Page, and Isis Rivers and of Rouchel Brook for many miles up. This examination enabled me to determine with confidence on two sites for storage reservoirs, one on the Page River, the other on Rouchel Brook, which together will impound sufficient water to ensure a generous irrigation of crops over 10,000 acres in the most severe droughts.

The Hunter River, as above stated, traverses most of the southern portion of the estate. Its source is in the Main Divide, 42 miles in a northerly direction from Aberdeen. Its drainage area above that town is about 1,300 square miles. Three miles south of Aberdeen it is joined by a large stream called Dart Brook, whilst about 22 miles further, in a southerly direction, its principal tributary, the Goulburn River, flows into it. The Goulburn branch drains approximately 2,890 square miles, whilst the Hunter River proper, just above, has only a drainage area of about 1,580 square miles, or little more than half that of its tributary. The Hunter River, as it flows through the Segenhoe Estate, has a channel varying from 180 to 300 feet wide, with steep alluvial banks on either side varying from 12 to 25 feet deep. Its bed is chiefly composed of coarse gravel and boulders. The stream varies considerably in width and depth, at times running swiftly over one of the numerous low falls in a narrow channel, at times spreading out to a broad sheet of water. At a crossing place, about 2 miles from Aberdeen, it was 70 feet wide, and with an average depth of 1·2 feet, and velocity of 2 feet per second. I estimated its discharge at 90,714,000 gallons per twenty-four hours. As I was informed that this was its normal condition during most winter seasons my figures may give some impression of the enormous quantity of water running to waste which might be largely conserved for irrigation. At different points steep rocky spurs abut on the river on one side or the other, and the erosion of the stream has formed small

small deep basins just below their declivitous face, but in no instance could I discover any indication of a bar of rocks crossing to the opposite bank. Being unable to discover any suitable position for a weir or dam to form a storage basin in the Hunter River I turned my attention to two of its smaller tributaries, the Page River and Rouchel Brook.

Page River.

The Page River rises in the Liverpool Ranges in the vicinity of Murrurundi. It flows south-easterly for about 26 miles to the junction of the Isis River, when it swerves round and flows nearly due south to its junction with the Hunter River. Its catchment area above the dam site measures approximately 400 square miles, and altogether to the Hunter River junction to about 430 square miles. The mean annual rainfall at Murrurundi, in the upper portion of its basin, is 29.95 inches for eleven years, and at Scone, in the lower portion of its basin, 21.57 inches for ten years. The lowest rainfall hitherto recorded at Scone, was in 1888, when it only measured 10.09 inches. In such a year irrigation would be required on the Segenhoe Estate for fully nine months. The rainfall up to the end of May this year has measured 8.3 inches, and yet there was little appearance of a spring in the grass or vegetation, the ground, for the most part, looking brown and parched at the time of my visit. Such experience of only 10 inches for a whole year shows the absolute necessity therefore of storing fully nine months' supply for ensuring irrigation in all seasons of drought. Allowing for four waterings of 3 inches deep each, the 10,000 acres covered by the distributing channels would require a supply of 2,723,000,000 gallons. This quantity could very easily be supplied without any storage if the stream kept up its normal winter discharge throughout the year, but it contracts considerably in summer, and has even been known to cease running for nearly four months in very dry years. Its stream, when measured by me at the proposed dam site, was 21 feet wide; 1.6 feet average depth; velocity, 3.3 feet per second; its discharge is estimated by me at 110 cubic feet per second, or 59,600,000 gallons per twenty-four hours. Such a discharge would be far more than sufficient for constant and full irrigation, but, as above noted, it dwindles down to a trickle for about four months. Consequently it follows that a storage basin is required which will give a constant supply for irrigation for four months without any assistance from the stream. This quantity may be estimated at 907,000,000 gallons, being just one-third of 2,723,000,000 gallons required for the supply of nine months of drought. One inch of effective rainfall over an area of 400 square miles, similar to the Upper Hunter or Page River basin would far more than fill any such storage basin, and as on examination of the official records I can find no single year with four consecutive months in which such effective rainfall would not have occurred, I think it may be confidently assumed that such a provision for storage would be amply sufficient. The average fall of the river, from the dam site to its junction with the Hunter River is about 10 feet per mile. The highest flood-mark shown me by Mr. Moran, a settler of over twenty-five years standing, is 18.2 feet above river-bed; its flood discharge for such depth is estimated by me at 53,456 cubic feet per second.

Description and capacity of storage reservoir.

My examination of the river channel brought me, by Mr. Moran's direction, to a point in the river admirably suited for constructing a dam to impound a large supply of water. This point is only about 1½ miles in a direct north-easterly line from the north boundary fence of the Segenhoe Estate. Here two rocky spurs converge towards one another, approaching within a few hundred feet at a considerable height. A wide rocky bar of reddish porphyry crossing the river and obtruding on either bank offers one of the best of materials for the foundation of a dam. An overshot dam, 45 feet high, 180 feet long at bottom, and 590 feet long at top, will back the river for over 4 miles, and will cover besides about 100 acres of flats with water. Its estimated storage capacity is 804,000,000 gallons. Its foundation would be in crib work for the first 5 feet at various levels according to the rough rugged character of the river channel. The superstructure will be built on the crib work and will consist of right-angled trusses 4 feet apart, and sheeted on the face with 2½-inch planking. The whole structure will be weighted with rock filling. The total cost of the dam, including sluices and outlet works is estimated at £13,620. There is abundance of rock and ironbark timber in the immediate neighbourhood. The whole superficial area of the reservoir is estimated at 197 acres, or 8,580,000 square feet. Supposing the loss by evaporation to equal 3 inches per month, which, in consideration of its sheltered position is not likely to be exceeded, then the total loss from that source for nine months would be 54,000,000 gallons, leaving still an available storage of 750,000,000 gallons. Thus it appears that this storage reservoir in itself will almost suffice for irrigating the whole estate in season of drought. Its position commands all the river flats and most of the rich agricultural slopes of the estate, consequently it may be assumed that for many years, until the whole available area is subdivided into small farms, this storage reservoir will satisfy all requirements.

Rouchel Brook scheme.

Rouchel Brook is one of the largest tributaries of the Hunter River, above the junction of the Page River. Its source is in the Coast Range, whence it flows over 20 miles in a direct westerly line to the Hunter River. For the first 5 miles, from its junction with the Hunter, it has a fall of about 10 feet to the mile which increases in the next 5 miles to 12 and 14 feet per mile. It drains an area of about 180 square miles chiefly hilly or mountainous country. In most years it has a constant stream, but in seasons of extreme drought it has been known to cease running for three or four months. Even then abundance of good drinking water could be obtained, both for stock and household purposes, by sinking shallow wells in its shingly bed. There was a fine stream running over the rocky bar, at the proposed dam site, during my visit, which measured 50 feet across. With a velocity of 1.5 feet per second and an average depth of 70 feet, it gave a discharge of 52.5 feet per second or 28,000,000 gallons per twenty-four hours. I have previously shown that the Page River reservoir may be depended on for an available storage of 750,000,000 gallons, leaving 157,000,000 gallons to be provided for elsewhere, in order to ensure a thorough system of irrigation in extreme droughts. As I could not discover any available position for the required storage basin either in the Page or its tributary, the Isis River, within reasonable distance I directed my attention to the Rouchel Brook, where I was informed a bar of rocks crossed the stream about 5 miles above its junction with the Hunter. An examination of this site gave me a most favourable impression of its advantages for the purpose required. As in the case of the Page River dam site, two rocky spurs converge and approach one another within 500 feet at a height of 40 feet from the bed of the channel, whilst a wide belt of hard indurated blue sandstone forms a bar across the river, and shows itself on either bank. This sandstone has a north easterly strike, and underlies 30 degrees east. The foundation of the dam would thus be secured to the country rock in the very position resting on its back.

Capacity of reservoir.

The maximum height of the dam is measured at 35 feet; its width at top, 445 feet; its bottom width between steep banks, 215 feet. Besides throwing the stream back fully 3 miles, it would impound 200 acres of flats. Its storage capacity is estimated at 742,000,000 gallons, or after deducting 74,000,000 gallons for four months evaporation, its available storage would be 668,000,000 gallons. Thus by the adoption of both schemes provision would be made for the most extraordinary droughts, of which at present we have no reliable record. This reservoir would be specially serviceable for irrigating all the flats, and a large proportion of the slopes on the left bank of the Hunter right to Aberdeen, the height of its base being 70 feet above the railway station. The construction of the dam would be similar to that on the Page River. Its cost is estimated at £10,600. Ironbark timber and abundance of loose rock for filling crib work are available in the neighbourhood.

Distribution works.

The necessary works for distributing the stored water consist of main off-take channels and main distributing channels. The approximate area commanded by the distributing channels is etched red on the accompanying sketch plan. I propose that the main off-take channel from both reservoirs should have an effective capacity for the discharge of 40 cubic feet per second, or 21,600,000 gallons in 24 hours, so that the whole area commanded by them may be thoroughly saturated during the normal flow of the streams. Thus, a smaller supply would suffice for irrigation in drought. The dimensions of these channels for such duty will be as follows; top width, 6 feet; bottom width, 3 feet; depth, 3 feet; fall, 1 foot per 1,000 feet; velocity, 3.873 feet per second; area, 13.5 square feet, and hydraulic radius, 1.526 feet. The estimated cost of 3 miles of such channel from the dam site in the Page River to the boundary of the Segenhoe Estate is £1,800, including head-works. At this point it is proposed to distribute the supply in two main channels, one on the right bank of the Page River, and the other on the left bank. The total length of these distributing channels is estimated at 20 miles, and their cost at £6,000. The plough could be used in forming these channels for almost their whole length. With an area of 8 square feet, and a velocity of 2.24 feet per second, they would be capable of discharging 10,000,000 gallons each in twenty-four hours. The main off-take channel from the Rouchel Brook reservoir to the boundary of the estate will be about 5 miles long. Its cost is estimated at £3,000, including head-works. The main distributing channels up and down the estate on the left bank of the Hunter will measure about 9 miles long, and will cost about £2,700.

Financial aspect.

The prolific fertility of the soil on the area commanded by the above proposed works needs no comment from me, having been already vouched for by different writers of scientific repute—in fact, it is at once self-evident to any ordinary visitor—but there is also no doubt that this fertility is only capable of fitful advantage to humanity under present conditions. Only by a regular and judicious system of irrigation can the great dormant fertility of this country be justly realised—only by such means can regular cropping be ensured. Assuming that the works proposed by me were carried out,

APPENDIX.

out, the following comparative estimates of revenue and charges shows that the financial success of the scheme is ensured, irrespective of the great profit and advantage which must accrue to the whole estate by irrigating 10,000 acres. The fact that the more water that is used so the cheaper will be the charge on its supply is especially deserving of notice.—

SUMMARY OF ESTIMATES.

<i>Page River Scheme.</i>		Financial position of complete scheme.
Clearing site of reservoir, 200 acres	£600	
Purchase of land, 200 acres, at £5 per acre	1,000	
Road deviation for 2 miles and land compensation	3,000	
Estimated cost of dam	13,600	
Estimated cost of 3 miles main off-take channel	1,800	
Estimated cost of distribution channels	6,000	
Total cost	£26,000	
<i>Rouchel Brook Scheme.</i>		
Clearing site of reservoir, 300 acres	£900	
Purchase of 300 acres, at £5 per acre	1,500	
Road deviation for about 2 miles and land compensation	3,000	
Estimated cost of dam	10,600	
Estimated cost of 5 miles of main off-take channel	3,000	
Estimated cost of 9 miles of main distribution channel	2,800	
Total cost of Rouchel Brook scheme	£21,800	
Total cost of Page River scheme	26,000	
Grand total estimated cost of whole scheme	£47,800	
Capital required for complete scheme	£50,000	
Capital required for Page River scheme	30,000	
Total area of land irrigable, 10,000 acres—four waterings per annum (each watering equal to 3 inches covering on 10,000 acres), at 12s. per acre	6,000	
Maintenance and repair, at 2 per cent. on cost of works	1,000	
Interest on £50,000, at 5 per cent	2,500	
Sinking fund, at 1½ per cent.	750	
Surplus balance	£4,250	
	1,750	
	£6,000	

In the first place, it appears that for every £1,000 expended on works an annual revenue of £85 will be required to pay interest, maintenance, and working expenses, as follows—

5 per cent. on £1,000	£50
1½ per cent. sinking fund	15
Maintenance and working expenses, at 2 per cent.	20
	£85
170 acres, irrigated 12 inches deep, at 1s. per acre per inch	£85

Thus, if the complete scheme is constructed, 8,500 acres will require to be irrigated at 12s. per acre, in order to cover charges; whilst, if the Page River scheme alone is constructed, only 5,100 acres would require to be irrigated to cover such charges. In comparing this charge of 12s. per acre per annum for irrigation with charges in France, Italy, Spain, or America, it appears very reasonable. In France the cost per acre varies from 25s. to 30s.; in Italy, from 31s. 6d. to £4 per acre; in Spain the Iberian Irrigation Company charge 30s. per acre per annum, whilst in California it is rarely below £1 per acre. But even this charge might be reduced if more water was used and a larger acreage covered, especially if only one scheme was at first constructed. The Page River scheme commands the most attention, because it would store the most water, and it would command by far the largest area of the estate. Its excess of cost in comparison with the Rouchel Brook scheme is hardly worth consideration, on account of its superior advantages.

The unusual facilities for the irrigation of the estate offered by the three large and almost permanent streams flowing through it, and the great advantages offered for the construction of works which will ensure irrigation to by far the largest area of its agricultural and bottom lands by gravitation, render an irrigation project, such as proposed, an enterprise of almost assured profit. Further, these facilities allow of a thorough application of irrigation without any resort to the main stream of the Hunter River, so that no justifiable objection can be offered to it. In the case of either proposed scheme there are only four or five settlers between the site of dam and the boundary of the estate, and they would certainly be more benefited than otherwise by the large storage of water for domestic and stock purposes in the reservoirs.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

LIGHTING OF THE CITY OF SYDNEY BY ELECTRICITY.

(PETITION FROM THE MUNICIPAL COUNCIL OF SYDNEY AGAINST THE PASSING OF ANY BILLS FOR.)

Received by the Legislative Assembly, 19 August, 1891.

To the Honorable the Speaker and the Honorable the Members of the Legislative Assembly of the Colony of New South Wales, in Parliament assembled.

The humble Petition of the Municipal Council of Sydney,—

SHOWETH:—

1. That your Petitioners have learnt that certain Bills have been introduced before your Honorable House, having for their object the Lighting of the City of Sydney by Electricity, and that one of such Bills has been duly referred to a Select Committee of your Honorable House for the purpose of being reported upon.

2. That it will be necessary, in order to carry into effect the purposes of such Bills, to break up the streets of the City of Sydney, which are vested in your Petitioners, and of which they are the guardians.

3. That the breaking up of the said streets would be a serious inconvenience, and would offer great hindrance to the public and the traffic of the said city, which could only be minimised by such work being carried out under the supervision of your Petitioners.

4. That your Petitioners have for some time past been taking evidence before them in order to enable them to devise the best means of using electric lighting power in the said city.

5. That your Petitioners are about to introduce before your Honorable House a Bill providing for the good government of the said city, in which is included power for your Petitioners to use such electric lighting power.

That your Petitioners therefore humbly pray for the foregoing and other reasons that your Honorable House will not pass any such Bill into law.

And your Petitioners, as in duty bound, will ever pray.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES NO. 9. TUESDAY, 4 AUGUST, 1891.

5. SYDNEY ELECTRIC LIGHTING BILL (*Formal Motion*):—Mr. Dibbs moved, pursuant to Notice,—
(1.) That the Sydney Electric Lighting Bill be referred to a Select Committee for consideration and report.
(2.) That such Committee consist of Mr. Collins, Mr. Barbour, Mr. Gough, Mr. Lee, Mr. Frank Farnell, Mr. Ritchie, Mr. York, Mr. Henry Clarke, and the Mover.
Question put and passed.

VOTES NO. 19. WEDNESDAY, 26 AUGUST, 1891.

12. SYDNEY ELECTRIC LIGHTING BILL:—Mr. Dibbs, as Chairman, brought up the Report from, and laid upon the Table the Minutes of Proceedings of, and Evidence taken before, the Select Committee for whose consideration and report this Bill was referred on 4th August, 1891; together with Appendix and a copy of the Bill as amended and agreed to by the Committee.
Ordered to be printed.

(SECOND SESSION.)

 SYDNEY ELECTRIC LIGHTING BILL.

 REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred, on 4th August, 1891, the "*Sydney Electric Lighting Bill*,"—beg to report to your Honorable House:—

That they have examined the witnesses named in the list* (whose evidence will be found appended hereto), and the preamble having been satisfactorily proved to your Committee, they proceeded to consider the several clauses and schedules of the Bill, in which it was deemed necessary to make certain amendments. See list*
page 5.

Your Committee now beg to lay before your Honorable House the Bill as amended by them.

GEORGE R. DIBBS,
Chairman.

No. 2 Committee Room,
Sydney, 26 August, 1891.

PROCEEDINGS OF THE COMMITTEE.

THURSDAY, 13 AUGUST, 1891.

MEMBERS PRESENT :—

Mr. Henry Clarke,		Mr. Dibbs,
Mr. Gough,		Mr. Lee,
	Mr. York.	

Mr. Dibbs called to the Chair.

Entry from Votes and Proceedings appointing the Committee read by the Clerk.

Printed copies of the Bill referred, together with original Petition to introduce same before the Committee.

Present :—W. H. Moseley, Esq. (*Solicitor for the Bill*).

William Henry Moseley sworn and examined.

Thomas Frederick Thompson (*a Director of City of Sydney Electric Light and Power Company*) called in, sworn, and examined.

Witness withdrew.

John Pope called in, sworn, and examined.

Witness withdrew.

Alfred Herbert Whiffin (*Electrical Engineer*) called in, sworn, and examined.

Witness withdrew.

Ordered,—That the evidence be printed and distributed to Members of the Committee before next meeting.

[Adjourned till Wednesday next, at half-past Ten o'clock.]

WEDNESDAY, 19 AUGUST, 1891.

MEMBERS PRESENT :—

Mr. Dibbs in the Chair.		
Mr. Barbour,		Mr. Lee.

Present :—W. H. Moseley, Esq. (*Solicitor for the Bill*).Colonel Edward Charles Cracknell (*Superintendent of Electric Telegraphs*) called in, sworn, and examined.Witness handed in extracts from an Address delivered by Mr. W. H. Preace, F.R.S., M.I.C.E., M.I.E.E., before the London meeting of the Association of Municipal and County Engineers. [*See Appendix A.*]

Witness withdrew.

The Hon. Alban Joseph Riley, M.L.C. (*Alderman of the City of Sydney*), called in, sworn, and examined.

Witness withdrew.

Robert Sands called in, sworn, and examined.

Witness withdrew.

Watkin Wynne called in, sworn, and examined.

Witness withdrew.

Ordered,—That the evidence be printed and circulated to members of the Committee before next meeting.

[Adjourned till Wednesday next, at half-past Ten o'clock.]

WEDNESDAY, 26 AUGUST, 1891.

MEMBERS PRESENT :—

Mr. Dibbs in the Chair.		
Mr. Barbour,		Mr. Lee,
	Mr. York.	

Present :—W. H. Moseley, Esq. (*Solicitor for the Bill*).

Alfred Herbert Whiffin called in and further examined.

Alderman William Patrick Manning (*Mayor of Sydney*) called in, sworn, and examined.

Room cleared.

Preamble considered.

Question,—“That this preamble stand part of the Bill,”—put and passed.

Solicitor called in and informed.

Clause 1 read and agreed to.

Clause 2 read and postponed.

Clauses 3 and 4 read and agreed to.

Clause 5 read, amended,* and agreed to.

Clauses 6 to 17 read and agreed to.

Clause 18 read, amended,* and agreed to.

Clause 19 read, amended,* and agreed to.

Clause 20 read and agreed to.

Clause 21 read and negatived.

Clauses

* See Schedule of Amendments

Clauses ~~22~~ 21, to ~~28~~ 27 read and *agreed* to.
 Clause ~~29~~ 28, read, amended,* and *agreed* to.
 Clauses ~~30~~ 29, to ~~34~~ 33 read and *agreed* to.
 Clause ~~35~~ 34, read, amended,* and *agreed* to.
 Clause ~~36~~ 35, read and *agreed* to.
 Clause ~~37~~ 36, read, amended,* and *agreed* to.
 Clause ~~38~~ 37, 40 to 39, read and *agreed* to.
 First Schedule read and *agreed* to.
 Second Schedule read and *agreed* to.
 Clause 2 further considered and *agreed* to.
 Title read and *agreed* to.
 Chairman to report the Bill with amendments to the House.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

SYDNEY ELECTRIC LIGHTING BILL.

THURSDAY, 13 AUGUST, 1891.

Present:—

MR. DIBBS.		MR. YORK.
MR. LEE.		MR. CLARK.
MR. GOUGH.		

G. R. DIBBS, ESQ., IN THE CHAIR.

Mr. William Henry Moseley appeared as Solicitor for the Bill.

William Henry Moseley sworn and examined:—

1. *Chairman.*] Are you solicitor for this Bill? Yes; my firm are solicitors for the Bill. The firm is Billyard, Andrews, and Moseley. Mr. W. H. Moseley.
2. Will you state what is the object of the Bill? It is to facilitate and to regulate the supply of electricity for lighting and other purposes for the City of Sydney. 13 Aug., 1891.
3. What are the other purposes? Providing power for machinery, for manufacturing purposes, for lifts, and for domestic purposes.
4. Is this project to be worked in connection with the Australian Gaslight Company? It has no connection whatever with the Gas Company; it is an independent company.

Mr. Thomas Frederick Thompson sworn and examined:—

5. *Chairman.*] What is your occupation? I am a merchant in Sydney.
6. Are you Chairman of the company which is putting this Bill before the House? Yes. Mr. T. F. Thompson.
7. Has the company any connection whatever with the Australian Gaslight Company? Not in any way. 13 Aug., 1891.
8. If this Bill be passed, and the light be established, will it be in rivalry with the other company? I look upon it as such.
9. What is to be the capital of the company? Between £200,000 and £300,000. It will start with less, but to complete the works it will take up to £300,000.
10. Who are the other Directors or gentlemen associated with you? Mr. Pope, of Farmer & Company; Mr. Trotter; Mr. Wynne, Manager of the Daily Telegraph Company; Mr. John Woods, of Manly Beach; Mr. J. R. Carey, Mr. Whiffen, Mr. Allbright. Mr. Whiffen is the Managing Director of Crompton & Co, who are, I presume, the leading electricians in England. They have supplied several towns in London which are equally as large as Sydney. They have a very large interest in this company.
11. *Mr. York.*] Have Crompton & Co. any rights in this city? No; they need not have the rights we are now asking for to supply electricity to houses, but we may require rights to be conferred on us by the Legislature. 12.

- Mr. T. F. Thompson.
13 Aug., 1891.
12. *Mr. Moseley.*] Have you been settled for a great number of years in Sydney? Yes.
 13. Have you been presiding officer at elections? Yes; returning officer for East Sydney.
 14. Are you acquainted with the provisions of this Bill? Yes.
 15. Are you also acquainted with the provisions of the Regulations of the Board of Trade in England? Yes.
 16. Are you aware that this Bill has been largely drawn from the provisions of those Regulations? Yes; we were very careful to have that done.
 17. With regard to safeguards to prevent you from acquiring an absolute monopoly, are you aware that this Bill was drawn in accordance with the provisions of the Regulations of the Board of Trade? Yes.
 18. Are there sufficient safeguards in this Bill to prevent you from holding a monopoly as against the Municipal Council? Yes; we would not expect that our request would be acceded to unless our demands were fair.
 19. Has this Bill ever been submitted to the Municipal Council of Sydney? Yes; as a matter of courtesy they have had all information, and we also asked them if they could suggest anything which we could embody in the Bill. In the Bill we have given them every power to supervise.
 20. In point of fact, your Bill contains all the provisions that were suggested by the Council for their own protection? Yes; they did not offer any suggestions other than those which were submitted to them, so we concluded that they considered that our request was a fair one.
 21. *Chairman.*] They have expressed neither approval nor disapproval? Not formally.
 22. *Mr. York.*] They are not likely to take any responsibility? No; but there is the difficulty of interfering with electric wires and other things, and we asked them if they could suggest anything to be embodied in the Bill which would be more satisfactory to them than what we had submitted, but we never received any formal answer.
 23. *Chairman.*] Have the Council had full notice of your intention to apply for this Bill? Yes; we have supplied them with all information.
 24. *Mr. Gough.*] Do you think the Municipal Council would be likely to offer any objection to the progress of the Bill? I do not think so; as far as I am aware, there is no objection at all.
 25. *Mr. Moseley.*] Do you particularly give power to the Council to appoint their own inspector of meters, so as to protect the public? Yes, in every possible way.
 26. Have you fixed a maximum charge for the supply of electricity at the end of clause 20? Yes.
 27. Have you had some communication with the Superintendent of Telegraphs with reference to the powers to be embodied in the Bill for protecting the telegraph lines? We had no formal communication.
 28. Are the provisions which are in the Bill for the protection of existing lines of telegraph and telephone wires drawn from the English Acts? Yes; and, so far as I can gather, they meet with the entire approval of the authorities here.
 29. Do you also take powers in the Bill for the Municipal Council to appoint a person to examine the strength of your currents for the purpose of seeing that they do not exceed the regulation strength? Yes.
 30. Is it also provided in the Bill that the work of the company shall be completed within a certain period of time? Yes.
 31. From your own business knowledge, do you think it is time now that electric lighting should supersede gas? I do, and think my opinion is shared by the public, otherwise I should not attempt to put money into this concern.
 32. *Mr. York.*] Have you seen the electric lighting operations in any large cities? No.
 33. *Mr. Gough.*] Has the lighting of towns in New South Wales by electricity been a success? I believe that some have been a success and others have not. The want of success can be better explained by Mr. Whiffen, who is a professional man. I more particularly represent business people, who, I am satisfied, will at once adopt the light in the city. My reason for saying that is, that if the business houses adopt it in Sydney, and if they have any surplus energy, there are any number of shopkeepers adjoining the establishments who will clamour for the light. They now pay three times more for the light than the price which we have fixed as a maximum, which proves to me that there is a great demand for the light. For illuminating purposes, I know that electric light would be very much better than gas, and will be very much cheaper for large lights.

Mr. John Pope sworn and examined:—

- Mr. J. Pope.
13 Aug., 1891.
34. *Chairman.*] Are you a member of the firm of Farmer & Co., merchants, of Sydney? Yes.
 35. Are you interested in the company which is promoting this Bill? Yes.
 36. Is the capital available for the purpose if it is wanted? Yes.
 37. Are the objects of the company to provide electric lighting and power? Yes.
 38. From your experience as a commercial man in Sydney, do you think that the light, as compared with gas, will find favour, and be generally used? Yes, and think it would be an advantage to the public. It is manifestly a better light, and from all the inquiries I have made, and from my experience in travelling, I believe that the electric light is less expensive than gas. It is also more effectual and less dangerous with respect to accidents or fire.
 39. Have you seen the electric light used elsewhere? Yes, over nearly all the world—Paris, New York, London, and all the principal cities of America.
 40. *Mr. Moseley.*] Have you ever heard, or are you aware, that gas has a deteriorating effect on the colours of fabrics, on brass fittings, and so on? Yes; it has a deteriorating effect on goods in my business.
 41. Are you a very large consumer of gas at present? Yes; I have to pay £1,200 a year for it.
 42. *Chairman.*] Do you use gas as a motive-power? Only for one engine. We use it principally for lighting.
 43. *Mr. Moseley.*] Would you be disposed to use electricity as a motive-power if it could be supplied as cheaply as gas? I would use it for lighting certainly, but if I made a change for motive-power I would adopt hydraulic power.
 44. Are you acquainted with the use of electricity as a motive-power? No.
 45. Has the company which is promoting this Bill any connection with any other company to supply gas? Not that I am aware of.
 46. Has it any connection with the Australian Gas-light Company? Not the slightest.
 47. Are you aware that this Bill has been submitted to the Municipal Council? Yes.
 48. Have they taken any objection to any of the safeguards provided in the Bill? I have not heard of any.

49. Would you have heard of them if there were any? Yes.
50. *Chairman.*] Did you give them an opportunity of making objections? I think so. I have not interested myself very largely with the details. I am a shareholder in the company, but I am not connected with the active working of it.
51. *Mr. York.*] Have you ever seen the electric light at work in New York? Yes.
52. Have you ever heard of any accidents occurring there? I never heard of one. I have seen the lights go off in Paris and New York and Chicago, but no accidents occurred. An inexperienced hand could apparently put them right again.
53. Are you aware whether the electric light works well in this Colony? Yes; for instance, at Penrith.
54. Is it not working very badly there? It lights the town very well. As far as I can understand, where the electric light is in use in any town or city in this country it is acceptable to the people, and there are fewer accidents with electric light than with gas. Explosions are not possible with the electric light as they are with gas. As to the effect of working with the electric light for six or ten consecutive hours, it is a pleasure, whereas with gas it is almost a danger. Eyesight is more injured by gas than by electric light.
55. *Mr. Lee.*] Are you a director in this proposed company? No; only a shareholder.
56. You are not practically acquainted with the scientific details of the Bill? No.
57. Are you prepared to tell the Committee whether they are right or wrong? No.
58. Is your attitude simply that of a speculator in what you believe to be a good concern? I look upon myself as able to say, from my experience during the last ten years of the electric light, that it is very far in advance of anything else, especially of gas, and I would, therefore, use it myself if available for any of my business concerns.
59. Outside of that, do you look upon it from a speculative point of view? Not particularly; I am not a very great speculator.
60. Then, do you look at it from an investing point of view? I entered into it really as much for the public good as for individual good.
61. Do you put your money into it, assuming that it will be a paying concern? Yes.
62. If you thought it would not be a paying concern, would you put your money into it? No.
63. Then, it is a fair inference that you think the public will largely adopt it? Yes.
64. Has your company had any opposition from any of the business people within the area proposed to be lighted? Not that I am aware of.
65. From your experience, would you be perfectly satisfied to adopt the light for your own premises? Yes; and I have been told by several others that they would avail themselves of the light.
66. Do you believe it would effect a great saving? Yes.
67. Would the insurances be affected? I do not think so.
- 67½. Will the electric light affect the insurances at all throughout the city? No; it would certainly not increase the cost of insurance.

Mr.
J. Pope.
13 Aug., 1891.

Mr. Alfred Herbert Whiffen sworn and examined:—

68. *Chairman.*] What are you? An electrical engineer.
69. Are you connected with Crompton & Co.? Yes; I am the direct representative in the Colonies of Crompton & Co., and I am Managing Director of the Crompton Australian Company. We represent for this Bill the engineers for the work.
70. Are they financially connected with it as shareholders? Yes.
71. Will you describe, as briefly as possible, and in language easily comprehensible to the ordinary mind, the nature of the light proposed to be applied here? The system we propose is what is usually known as the low tension system. There are at the present time two systems in vogue, the high tension and the low tension, of which we take the latter. We do so for many reasons, the chief of which is the fact of its being perfectly safe. With the high tension system there are certain dangers to human life. That will be understood readily when I state that the high tension system is at real work from 1,000 to 2,000 volts, a volt representing the same thing in electricity as 1 lb. does in the steam boiler; that is the pressure.
72. When you speak of 1,000 volts it is the same as saying 1,000 lb. pressure in steam? Yes. Then the high tension system is worked, not with a continuous current, but with an alternating current, which has the same effect as we have all felt when we have used medical coils, when we get a very severe shock. That is largely brought about not only by the high tension of the current, but also by the fact that it changes its direction some thousands of times in a second. That is very much more dangerous to human life. Than the continuous current, which is otherwise known as the low tension, which we propose to use. We may say that 800 volts is considered a dangerous pressure for human life, and that really comes under the high tension pressure. We propose in this Bill to run it in some of our mains perhaps at 300 volts, but in entering houses the pressure will be 100 with a continuous current and not an alternating current.
73. Will that give an effective light? It makes no difference in the light; but if you take the alternating—that is, the high tension system—before they can use it in rooms they have to reduce the pressure to 100 volts.
74. What about using it as a motive power? That is one other reason for adopting the continuous current. At the present time there is no success in using the alternating current for motive power. With the continuous current there is great success, and it is very largely used in very many towns in England, Europe, and America.
75. Do you know many towns where the same system is in vogue as you propose to adopt here? Yes; our company has put down a great many in London under exactly the same system as we propose to establish here—that is, the low pressure system. It has been put down by our company in Kersington, Notting Hill, and Westminster, representing in all, for machinery and appliances, a supply of about 300,000 lights.
76. *Mr. York.*] Are these distributing lights? Yes. We are at present just completing a work in Birmingham under the same system. It is being done for another company, but our company is doing the work on this principle. In Spain, there are three towns lighted by the same system. Copenhagen is also being lighted by us under exactly the same lines. Then, in America, although our own company have not

Mr. A. H.
Whiffen.
13 Aug., 1891.

Mr. A. H.
Whiffen.
13 Aug., 1891.

not actually done the work there, as of course there are a number of good electrical firms in America, at the same time the low tension system is the one which Edison himself adopts and uses. It is very largely used in Boston and New York. In other cities in America, in the scattered districts—in the up country towns as we would call them here—the alternating or high tension system is very considerably used. Then again, in introducing the low tension system here, we say that in a city like Sydney, with a mass of telephone and telegraph wires, it is unreasonable to think for a moment that electric wires, carrying sufficient current for lighting and motive purposes, could be run overhead. We think that should be entirely swept away before anything can be done.

77. *Chairman.*] What is it that you say should be swept away? The idea of running the wires overhead. In New York at the present time there are a great many wires carrying currents overhead, but they have been condemned by the corporation, and they are steadily being removed, and it will not be long before all wires will be carried underground in New York, Boston, Chicago, and other large cities.

78. Is it proposed by your company to carry all the wires underground? Yes. Of course here in this Bill we have a clause saying that if we light a park it will not necessitate our running underground if that meets the view of the Municipal Council; but in the streets we propose to run entirely underground in a similar way to what we are doing in England and elsewhere.

79. What do you mean by lighting a park? Take Hyde Park for instance. It would not be necessary to run our wires underground from one lamp to another—the same would apply to Moore Park. We leave that entirely in the hands of the Municipal Council to demand which they please.

80. Have you had a voice in the preparation of this Bill? Yes; Mr. Allbright and myself have.

81. Has this Bill been drawn up on the lines of similar concessions granted anywhere else where your company have erected works? Yes; in framing this Bill in the first instance, we took a specimen of an English provisional order—they are all practically alike—and we drew up the main lines of this measure exactly in accordance with that. We are asking nothing in this Bill beyond what is granted under the English Act, and under the provisional orders which are constantly being given for the different towns and districts. We were most careful in that particular.

82. As an electrical engineer, can you give the Committee any idea as to the possible danger from fire owing to the use of electricity? In other countries where it is largely used, it is universally found that insurance premiums are somewhat lessened. The danger from fire under this system which we propose is reduced to a complete minimum. There is danger neither from fire nor accident.

83. Is there danger to human life? No; we provide also under this system—and we think this is a very great feature—for reducing a break-down to an impossibility. We do not entirely depend on running machinery. We have a certain amount of storage, just as gas is stored in gasometers. That would carry us over any little mishap in the engine-house.

84. *Mr. Moseley.*] Do you propose to charge for electricity by meter? Yes.

85. You would be able to show exactly how much is used by each person? Yes; some people prefer to have it supplied in that way.

86. How do you regulate those meters to show that they register correctly? We give the Municipal Council the right to appoint an inspector to see that the meters are working correctly.

87. What other powers have the inspector? That he shall from time to time be appointed by the Municipal Council as inspector, and shall be authorised, at the expense of any one, to test the meters in exactly the same way as we at present request the Gas Company to test a meter.

88. What would be the strength of the current as issuing from the dynamo? At the dynamo terminals it would not exceed 300 volts.

89. Is that a current that would not be dangerous to human life? Yes.

90. Could a man touch the wire with perfect impunity? Yes; he might receive a shock, but without any danger whatever.

91. Do you make any provision to protect persons from sustaining a shock from the wires conveying the electricity? We propose to carry our conductors which carry the electricity underground in a concrete conduit, in accordance with the photographs which I produce. We put the wires in a concrete tube.

92. You have explained to the Committee the difference between high and low tension;—which is the most economical system to work? The low tension system is the most economical in concentrated areas. In up-country towns, where the population is very much scattered, and where you have to carry the current for many miles to supply a few consumers, it is certainly an advantage to use the high tension system; the cost is much less and you lose a little less. But in large towns—and of course Sydney may be taken to be such—it has been thoroughly proved that the low tension system is far less expensive in cost and up-keep. In the high tension system, there is a very large loss in reducing from 2,000 volts to the pressure which is used in houses—that is, 100 volts.

93. Do you consider that the proposed area of your operations would be a decidedly concentrated area? Yes; we calculate that in that area at least 100,000 lights would be required very quickly.

94. In point of fact, your system will be the most economical to apply? Yes, we thoroughly believe that. That is the reason why we have worked out this system.

95. Have you also made provision in the Bill to allow the Municipal Council to employ an electrical examiner? We give the Council the right to employ an inspector or examiner, and we also give the Superintendent of Telegraphs the right to employ a superintendent and inspector. The Council can protect the public and see that what we are giving them is right, and that the mains are only carrying what the Bill sets forth. The Superintendent of Telegraphs can see that his Department is thoroughly protected from any possibility of connection with the telegraph and telephone wires.

96. Then, it will be impossible for you to supply a current which will be dangerous to human life? Yes.

97. You would not be inclined to do it; but, if you were, the electrical examiner would be able to step in? Yes; we set down our pressure in the Bill, and the municipal authorities have the right to enforce that.

98. Were all the provisions which are embodied in the Bill submitted to the Municipal Council in order that they might make suggestions? Yes; the Bill was submitted, and myself and Mr. Allbright were examined before the Municipal Council. We have since asked them again to give us any ideas which they might have, so that we might carry them out. We have simply received a formal notice of receipt and nothing else, and we imagined, therefore, that there is nothing in the Bill to which they object.

99. Were you examined *viva voce* by the Municipal Council? Yes; and I have with me a report of the proceedings.

100. Did they ask you certain questions as to the powers you proposed to take? Yes; we were thoroughly examined in every way, and questioned with regard to technicalities, scientific as well as commercial. Mr. Cracknell was present at the Council meetings, and he afterwards expressed himself that we had wiped away the chief objections which he could have raised to a Bill on other lines.

101. Do you propose to supply private houses as well as to light public streets? Certainly. We are prepared to light public streets, as requested, but we want to offer to everyone an opportunity of obtaining electricity for light or power from a general productive source.

102. Are you compelled, under a clause of this Act, to supply electricity to private persons, so that you cannot show any favour? Yes; we must supply electricity to anyone who demands it within our area.

103. What is to be the charge for electricity for private persons? We have set down a maximum charge of 1s. per unit, a unit being 1,000 volts ampère. A unit represents sixteen 16-candle power lamps for one hour. We have set down the unit at 1s. as a maximum. It does not at all follow that we shall have to charge that price.

104. What would 1,000 volts represent? 1,000 volts ampère is a unit. There is a clerical error in the Bill, in clause 20, where there is a blank between the word volts and the word "ampère." There should be no blank.

105. Can you give us any idea as to how that compares with the cost of gas? Gas at 6s. 6d. would represent 8d. per unit. That of course will make it appear as if electricity were considerably dearer; but I may say that in practical use it is not found to be so. When electricity is shut off there is no leakage, which is not always the case with a gas-meter, and although in England the price is set down at 8d. which represents gas at 6s. 6d., where in London, gas at the present time is charged for only at the rate of 3s. and 3s. 6d., still it is found, generally, that the use of electricity for light is cheaper than gas.

106. Are you aware that electricity is a purer and better light than gas for judging colours? Yes; that is one great point where it is found to be beneficial. It is not only more healthy than gas, but practically, it is the closest approach to daylight that we have reached at present. It has also no destructive powers on decorations, on materials, or on any class of goods. With gas, we not only have got smokiness, but there is also such a large consumption of the atmosphere, that it absorbs not only what is requisite for ourselves, but what is requisite for colours and other things. Last year when I was at home, I visited a lady's house in London to decide on fittings, and she told me that the destruction by gas of pictures and furniture amounted to several hundred pounds per annum.

107. With regard to health, are you aware that statistics on the subject have been published in England? I believe that Mr. Preece, of the post office, has published some figures relative to the difference which is made owing to the absence of employees from ill health. I take the facts from what I have read—I am not personally conversant with them.

108. Still you can give to the Committee the written opinions of a man of such great eminence? In the post office, I understand he says that it makes a difference of ten to fifteen extra clerks if gas is used instead of electric light.

109. Is that in consequence of so many going off duty when gas is used? Yes; they are off duty owing to sickness.

110. Does that represent a difference of £600 or £700 a year in the post office expenditure? Yes. I know that in banks in England where artificial light has to be largely used, they could scarcely do with gas now after once having electric light. The offices, and so on, have been constructed in such a way that gas would not be suitable on account of the vitiation of the atmosphere, the clerks being so close under the light.

111. Have any statistics been published by medical men with regard to the effect of the light on eyesight? No; but from my own experience, I can certainly say that there are no deleterious effects whatever from the use of the electric light.

112. Would you sooner read by electric light than by gas? Yes. I think that one very strong point is that in newspaper offices throughout the whole world, the compositors who have to do such very close work with the light, and such very fine work, are in favour of the electric light as against gas.

113. Do you provide for any reserve power in case of a break down? Yes; we have storage for something like 50 per cent. for the work we are doing at any time. That reduces the possibility of a break-down to nothing. If our engines break down we can carry on for twelve hours with no machinery what-ever running.

114. So that there will be no danger of a place being left in total sudden darkness? Yes; the system we propose obviates such a possibility. That is not the case under a high tension system, which must be worked by running machinery.

115. Have you taken precautions against the possibility of contact with telegraph and telephone wires? Yes.

116. Have you had an interview with the Superintendent of Telegraphs? Yes; we have spoken to him unofficially. All that I can say that Mr. Cracknell said officially was, that, after being present when we gave evidence before the City Council, he said our Bill and our ideas were so framed as to do away with any objections which he might have as Superintendent of Telegraphs.

117. What system of lighting do you propose to adopt for street lamps? We should adopt both arc and incandescent. In two or three main streets of the city arc lights would be desirable. In George and Pitt Streets a great deal of light is wanted, and there we should use powerful arc lamps. In the outside and narrow streets incandescent lights of 32-candle power would be sufficient.

118. If need be, will you be prepared to extend this system beyond the present area which the Bill proposes to embrace? Yes. Our Bill asks for powers covering the city of Sydney as incorporated by the Act. What we ask for covers a compulsory area within a given time. I have a plan here showing that area.

119. *Chairman.*] Are you only applying in this Bill for powers affecting the city of Sydney? Yes.

120. Does it not include any of the suburbs? No, it only refers to the city of Sydney as described in the Corporation Act. We are asking for the whole of it. The compulsory portion is only a certain area.

121. *Mr. Moseley.*] The expression "compulsory area" has been used;—what does that mean? That is the area described in the Second Schedule, in which we are compelled by the Act to lay our wires and to supply light to anyone who desires to consume it within the term mentioned, which is three years.

Mr. A. H.
Whiffen.
13 Aug., 1891.

Mr. A. H.
Whiffen.
13 Aug., 1891.

122. *Mr. Gough.*] If you do not comply with that condition, will your concession lapse? Yes.
123. *Mr. Moseley*] If you look at the preamble of the Bill, you will see that the expression "compulsory area" is defined—is that correct? Yes.
124. Have you had some experience of the electric light in other parts of the world? Yes. In actual work, my experience has been in England and Europe; but I have had opportunities in travelling of seeing and investigating electric lighting in America and other parts of the world.
125. Can you specify any city in which you have noticed it particularly? That would be difficult to answer, as there are so many places. When I was in England last year, I found that electric lighting had advanced in London very greatly as compared with what it was four years before. There were eight companies at work in the city of London supplying electricity, and representing a capital of something like £4,000,000. Birmingham, Liverpool, and most of the other towns of England, had the electric light in use more or less. New York, Boston, Chicago, Baltimore, and Philadelphia, used the electric light very largely. It is used in conjunction with gas. Gas, of course, was established before, and both are in use. But electricity is coming into vogue more and more every day, the same as in England. In the smaller cities of the United States and England, they use electricity not only for domestic work, but for corporation lighting.
126. Have you had an opportunity of observing the electric light as used in this country? Yes. We ourselves fitted up the borough of Tamworth with the electric light for borough lighting, and, in addition, I have myself seen all the electric installations of other towns in New South Wales and Victoria. With regard to Tamworth, I can speak thoroughly and truthfully. When we took up the lighting of Tamworth, there were fifty-two gas-lamps in the town, and we put up eighty-four 32-candle power lamps and four arc lamps of 2,000-candle power, and the whole of that extra light, which is equal to about 50 per cent. more than was given by gas-light, cost about £10 per annum less than the borough had been paying to the gas company. They get 60 per cent. more light for a little less money than they paid previously. The way that has worked out is practically this: They impose a lighting rate of about £522 a year, and they have extended their light until they spend roughly that amount.
127. *Chairman.*] Is the electric light largely used in private houses in Tamworth? No; the gas company is there.
128. Is it an overhead or underground system in Tamworth? It is overhead.
129. Is that low tension? Yes; the gas company is there, and, at present, the corporation have not power to supply the light to private persons. They would require to get some form of parliamentary concessions to enable them to do so.
130. *Mr. Moseley.*] They did not take power under their Act to supply private lights? No.
131. *Mr. Gough.*] What do they charge for gas there? At present it is reduced to 8s. 6d.
132. What is the electric light rate now? Five-pence; that is nearly 50 per cent.
133. The original rate would have been struck at one shilling, and the present rate is five-twelfths? They have never altered the lighting rate, but they spend the money on more light.
134. *Mr. Moseley.*] How do you propose to provide against any interference with telegraph wires? In carrying our wires underground, we think we will do away with any possibility of coming into contact.
135. Supposing you were to come into contact with the telegraph wires, would there be any actual danger? No; with the pressure that we propose to use, there would be no danger whatever.
136. Would there be any danger of fire? No.
137. Suppose you came into contact with telephone wires in offices, would there be any danger of fire or any danger to human life? No.
138. You are aware that accidents have sometimes happened in that way? Yes; I knew of one large fire in the neighbourhood of Boston, but that occurred where they were using the high tension system.
139. On the low tension system, is there any danger? There is not with proper precaution.
140. *Mr. Gough.*] You said that sixteen lamps of sixteen-candle power burning one hour would cost one shilling according to the maximum rate, is that less than the cost of gas as charged by the Gas Company of Sydney? No; it is a shade higher.
141. Would you not consider that is an extremely high rate, seeing that if you take sixteen of those lights burning for twelve hours per day, it would amount to 84s. per week? Of course we have only set down the maximum price.
142. Does it not seem very high? I will tell you practically what it would cost. Roughly speaking, it would cost a consumer about 9d. per lamp per week.
143. But that is not in accord with your other statement? If you take twelve hours per night it would be very long running.
144. I know what the charges are by other companies, and I know that it is considerably less than the price you mention? If you take Sydney, the companies which supply consumers charge 1s. per lamp per week.
145. Would that be for 16-candle lamps or 25-candle lamps? Sixteen-candle lamps.
146. Would not that be considerably less? It would come to about the same thing—you would have to take an average of the hours.
147. In winter would the lamps not have to run for twelve hours? On that point I can give you figures which I actually know. In our works at Kensington we have about 120,000 lamps. At 8d. per light we find that the average earnings per lamp was a little under 10s. per annum.
148. Do you know the electric plant erected at Young? Yes.
149. Has that been a success? In a general way you may take it as a success. There have been points about it not entirely successful, but I think they are matters of detail and not of principle.
150. Do you know what system is adopted in New York—is it high or low tension? Both. The Edison Company are running the low tension system to a very large extent, but several other companies are running the high tension system.
151. You have stated that with a low tension system there is no danger to life; are you aware of any accidents having happened in New York to human life by wires falling, and has that been by the high or low tension system? That is with the high tension system essentially. I have heard of accidents happening, but I look upon that as really being in consequence of the fact that hitherto, in the American cities, the authorities have not been careful about taking precautions.
152. Would it be necessary, in the erection of this plant of yours, to duplicate it to provide for extra power?

power? It would practically be triplicate. The motive power would be more than duplicate, and the storage system would really triplicate our power.

153. So that in the event of a break-down in one part of the plant you could shut it off and still run the light? Yes, under the scheme proposed for Sydney. Two of our generating stations might be burnt out—that is, they might be entirely destroyed—and yet we could still carry on the light.

154. That is on account of the storage? Yes. In England, especially in London, we are under very heavy penalties, and the current must never be off, so that we are pretty well used to working up to such conditions.

155. Are you aware of the charges made in any other place besides Tamworth per lamp or per 1000 volts? In Melbourne the price charged by the companies running there is one half-penny per lamp per hour, which comes to an average of something like 48s. to 50s. per lamp per year—that is for house lighting.

156. How many candle power is each lamp? Sixteen-candle power.

157. *Chairman.*] Is each of the little lamps which we have in the Assembly of 16-candle power? Those in the lobby are of 16-candle power.

158. What are they charging at Young? At the present time I do not know what they charge. I know they have increased their prices lately. I believe their original prices were something like 25s. to 27s. a year.

Mr. A. H. Whiffen.

13 Aug., 1891

WEDNESDAY, 19 AUGUST, 1891.

Present:—

MR. DIBBS.

MR. BARBOUR.

MR. LEE.

G. R. DIBBS, ESQ., IN THE CHAIR.

Mr. Moseley appeared as Solicitor for the Bill.

Colonel Edward Charles Cracknell, Superintendent of Telegraphs, called in, sworn, and examined:—

159. *Chairman.*] Are you Superintendent of the Telegraph Department in New South Wales? Yes.

160. *Mr. Moseley.*] Have you seen this proposed Bill? Yes.

161. Do you consider that it provides sufficient safeguards to protect the public from any danger to life or limb? Yes.

162. Are you aware that clause 15 provides that the company are not to supply a force of greater power than 400 volts with a continuous current, and only half that force with an alternating current? Yes.

163. Is such a current totally unattended with danger? It is quite safe.

164. Do you think it is desirable that the wires should be underground? Decidedly. I think that all lines for electric lighting should be underground, if possible.

165. Is provision made for that in the Bill? Yes.

166. Should there be some provision that the company should not exceed the power of 400 volts? I think it is very necessary in consequence of possible interference with telephone and telegraph lines. If the current is very much stronger than that there is induction, which would materially interfere with the working of the telephones.

167. Would it therefore be desirable that there should be some person to test the normal strength of the current supplied? Yes.

168. Should that person be under the control and direction of the Superintendent of Telegraphs? Yes; or an officer appointed by him.

169. With that safeguard do you think the company would be prevented at any time from exceeding the prescribed amount of force without your discovering it? Yes; and it might be necessary to see that the company worked up to that current so that they should not give the public less than they bargained for.

170. So that the appointment of an examiner would not only protect the Government Telegraph Department but also the public? Yes; that is the intention.

171. In the 29th section are powers conferred upon the Superintendent of Telegraphs to see that the company shall not commence any work within a dangerous distance of telegraph or telephone lines without giving seven days' notice? Yes.

172. Will that be sufficient? Yes, ample.

173. Do you think that it is necessary to make any addition to clause 29? I think that the test should be also made of the strength of the current to see that it does not go below the voltage for the protection of the consumers.

174. Do you suggest that the electrical examiner should have power to do more—that he should perform such other tests as may be required? Yes, so as to give the fullest power possible, so that the public may get what they pay for.

175. We know that with regard to meters in connection with gas there is a great deal of dissatisfaction;—are the provisions in the Bill sufficient to ensure that the meters will always be correct? I should think that the inspector of meters should be the person who is authorised to test, so that he should be responsible for the meters working properly. That is not a matter which should be cast upon the Municipal Council.

176. Do you think that he should be the same person as the examiner appointed by the Telegraph Department? Yes.

177. Will the clause give the officer sufficient power to protect the public? Yes, but the clause will require to be altered, because it now provides for the Council dealing with the matter.

178. *Chairman.*] Can you go a step in advance and satisfy us that electricity can be meted out and recorded? Yes.

179. Can that be done as reliably as with an ordinary gas-meter? A great deal more so.

180. *Mr. Moseley.*] Is there no leakage inside the meter under an electrical system? I cannot say that. There might be.

181. *Chairman.*] Can the supply be meted out and recorded honestly? Yes; and recorded automatically.

Colonel E. C. Cracknell.

19 Aug., 1891.

- Colonel E. C. Cracknell.
19 Aug., 1891.
182. *Mr. Moseley.*] Can it be done with perfect accuracy? I am not prepared to say that; that would be fixing me to an absolute fact, which perhaps no one could control.
183. *Chairman.*] Is not the supply usually at per light and not at per 1,000 feet consumed? Sometimes it is by quantity consumed; in other cases it is at so much per lamp of a certain measure.
184. For all practical purposes would it not be taken by the public at per light? Under the Board of Trade at home—and we shall have to adopt something of the same kind here—there is a unit of measurement for which they allow the companies to charge so much—that is 8d. If such a rule were adopted here it would secure uniformity and meters would not be required except for the satisfaction of consumers, and possibly for the examiner mentioned in the Bill to enable him to judge whether the proper quantity was being meted out to the public. It is not absolutely necessary to have a meter for each house.
185. *Mr. Moseley.*] At the end of clause 20 the company has fixed its price at per unit which is the same as the Board of Trade unit? Yes.
186. Is the price fixed in the Bill a reasonable price? The charge is 1s., which I think is quite reasonable. In London they charge 8d. per unit, and of course it would be more expensive here.
187. *Chairman.*] That is the maximum price? Yes.
188. *Mr. Moseley.*] What would be a fair price to pay for one of those 16-candle power lamps per year, such as they use in the Assembly? I think about £3 15s.
189. *Chairman.*] Would that be if it were burnt every day in the year? Yes. It will cost the corporation for each light about £3 15s.
190. *Mr. Moseley.*] What would be the cost of 16-candle power gas burning every day throughout the year at Sydney price? That has been worked out very satisfactorily by Mr. Preece of the English Post Office. I shall forward an extract from his paper on the subject. [*See Appendix.*] He shows that electricity is dearer to a trifling extent than gas when an incandescent light is used while for arc lamps it is considerably cheaper than ordinary gas. But even taking electricity at the same price as gas I think there is a great advantage on the side of electricity because it is so much easier to operate; it is cleaner; it is not destructive to wall papers and books; and altogether you get a light more under control.
191. *Chairman.*] And with all that, is there a certain amount of protection against fire by electricity? Yes, there is no doubt about that. With proper care there is no danger from fire as compared with gas, and there is not the slightest danger of explosion.
192. Is there any possible danger of accidents to human beings? If you work it at very high voltages there would be danger.
193. Would there be danger in ordinary work in a domestic establishment? If you work according to this Bill there would be no danger, but with high tension and alternating currents there is an element of danger.
194. Would there be power sufficient under this Bill in the event of Parliament deciding to change the mode of execution to kill a man? No.
195. *Mr. Barbour.*] Is there a clause in the Bill which provides for the appointment of an electrical manager? Yes, clause 30 deals with the matter. I do not think that the City Council should be referred to in the clause.
196. Clause 18 refers to a similar matter. Do I understand you to say that the two offices referred to should be combined and should be filled by the same person? Yes.
197. Do you suggest that he should be appointed by the Government and not by the City Council? Yes, I do not think the City Council should appoint such an officer.
198. Why should the Government be saddled with any expense for this officer? For the protection of Government property, the telegraph lines and telephones, we must protect ourselves.
199. I am speaking of the cost; who should pay the expenses? The Government will have to do that; there is a Bill already drafted ready for Parliament which provides for that.
200. *Chairman.*] Is that a general electric lighting Bill? It is more of a protective Bill than anything else? It will not interfere with the companies; it is for the general protection of the public and of our own property.
201. Would you appoint the examiner as well? This examiner would be the very officer provided for by the Government Bill.
202. *Mr. Barbour.*] Will not clauses 18 and 30 have to be revised and amended so as to place the power of appointment in the hands of the Government? Yes.
203. *Mr. Lee.*] Has there been some difference between the Government and the Newcastle Electric Lighting Co.? Yes.
204. Would this proposed company be on all-fours with that company? The difficulty arose in this way: The Newcastle Company thought proper to put up certain wires, in some cases parallel with our wires, although I arranged with the late Mayor of Newcastle to give them one side of the street, and I had all our wires taken down and put up on the other side so as to give them a fair way. Instead of that they crossed our wires in all directions, until it was necessary to take some legal action in the matter. They promised that alterations should be made, and action was stayed for a time, but I find that those alterations were not carried out as proposed, and legal proceedings are now being taken against them.
205. *Chairman.*] In this case by putting the wires underground is not such a difficulty obviated? Yes, this Bill provides for everything which we wanted the Newcastle Company to do.
206. *Mr. Lee.*] If the wires of the Newcastle Company had been placed underground would such a difficulty have arisen? No.
207. Do you think that clause 29 is sufficiently stringent to protect your department? I think that clause will cover us. It gives us power to inspect works, and to effect such alterations as may be necessary. Have you anything to suggest to the Committee by way of an additional clause for the further protection of the department or the public? No; the only thing I wish to point out is that the company under this Bill should not be allowed to claim a monopoly of the entire lighting of the city.
209. *Chairman.*] Do you see any clause in the Bill which gives a monopoly? No, but I think there should be something added to say that there should not be a monopoly.
210. The Gas Company of Sydney are getting a Bill through the Upper House similar to this; does not that get rid of the question of monopoly? I think there should be a clause stating that there should not be a monopoly. I should like to see something more definite in the Bill, because it is possible that the City Corporation might take it into their heads to light the city themselves.

211. *Mr. Barbour.*] Have you any doubt in your own mind that there is anything in the Bill that will lead anybody to infer that a monopoly is granted? I think that if the Bill is passed without such a clause as I have referred to, the company would say we have the only power to light the City of Sydney.

Colonel E. C.
Cracknell.

19 Aug., 1891.

212. *Mr. Lee.*] Within the area named in the Bill? Yes.

213. Do you think that would give the company a monopoly within the area? I think so, but I am not a lawyer.

214. If such is the case, are you of opinion they should not have a monopoly? Yes, if you take the second schedule the streets that are to be dealt with are defined.

215. You think that if the Bill gives a monopoly it should be amended? That is a matter for the Committee; I am simply pointing out that I do not think there should be a monopoly.

216. *Mr. Barbour.*] Can you point out any part of the Bill which would make it reasonable to infer that such a monopoly would be granted? The Government are lighting portions of the city already with electricity, and if this company gets the privilege of lighting, they will say to the Government directly, you have no right to erect lights. I think it is a dangerous power to give to one company.

217. *Chairman.*] These people ask for power to open the streets and put down their plant. Are they asking for any power beyond that? I do not know. That is for the Committee to say. I do not know that there is a clause in the Bill which would give the company a monopoly. The question is whether the bill would not give them a monopoly.

218. *Mr. Lee.*] Have you any doubt as to the safety of the light in public or private dwellings? It is perfectly safe.

219. Has it been represented to you since this Bill has been brought forward, or at any time previously by the agents of the various insurance companies, that it would be likely to affect the insurances in the city? Not recently. At one time the agents submitted a number of clauses for my opinion, and it has since been decided by the insurance companies to adopt the Phoenix Insurance Companies clauses.

220. Do those clauses admit of the use of electricity? Yes, under certain conditions, without increasing the rates of insurance.

221. *Chairman.*] But making no reduction? No.

The Hon. Alban Joseph Riley, M.L.C., sworn and examined:—

222. *Chairman.*] Are you one of the aldermen of the city of Sydney? Yes.

223. *Mr. Moseley.*] Were you a member of the City Council when Mr. Whiffen and Mr. Allbright appeared before that body when this Bill was first propounded? Yes.

Hon. A. J.
Riley, M.L.C.

19 Aug., 1891.

224. Did you go through the Bill with them? I cannot recollect whether or not this was the Bill. I think we were invited to hear a gentleman's opinion upon electric lighting, but I do not think a Bill was submitted.

225. *Chairman.*] Were you a member of a committee of the Council that considered a proposal to light the city by electricity? Yes; but I have no recollection of being summoned on the committee to consider any private Bill. My recollection is that Mr. Allbright, at the request of the Mayor, attended as an expert to give us some information. We did not decide upon adopting any system; the matter is now under consideration by a committee of the Council, of which I am not a member.

226. *Mr. Moseley.*] Have you seen the Bill to which I now call your attention? I have seen it this morning.

227. Do you consider that the clauses in the Bill to protect the Corporation of Sydney and the consumers are adequate? I have just glanced over the Bill, and I could not give an opinion upon it off hand. My experience of these Bills is that they do not adequately protect the citizens or the Council.

228. *Mr. Lee.*] Are you prepared to give any opinion as representing the City Council? No; I can only give my individual opinion, I could not commit the Council.

229. *Mr. Moseley.*] As a private citizen, I ask you, do you think that the citizens' rights are sufficiently protected? I have only just seen the Bill, but I am quite prepared to give my opinion on general grounds as a citizen as to whether or not the electric light would be an advantage to the city.

230. *Chairman.*] Are you of opinion that it would be of advantage to the city to have it lighted by electricity or jointly with electricity and gas? I think it would be decidedly a very great advantage.

231. Do you think that a healthy rivalry between gas and electric companies would be for the advantage and economy of the public? Yes.

232. Do you think that, so long as the rights of the citizens of Sydney to the streets are fairly protected, there would be any objection to a company obtaining powers from Parliament to open up the streets for the purpose of carrying out electrical works? That opens up the whole question.

233. It would be for the Council afterwards to say whether or not they would adopt electric light, but so long as the rights of the citizens, with regard to the streets, were protected, will there be any objection to a company of this sort opening up the street? As a citizen, and irrespective of being an alderman or anything else, I am totally opposed to private interests conducting matters of this kind at all. My experience of companies having the power to interfere with our streets is that it is prejudicial in every respect, whether it applies to tramways, electric light, hydraulic power, or anything of that kind.

234. Are you not a little before or a little after your time, seeing that all these things are now being done in the city? My experience has led me to the conclusion that I have expressed. There may be half a dozen electric companies in rivalry, and I speak as a citizen having large interests and as one having suffered only recently by the cutting up of our streets, first by the Gas Company, then by the Water and Sewerage Board, and next by the Hydraulic Company. As a citizen I am totally opposed to that.

235. *Mr. Lee.*] Do you hold that such a power should be retained in the hands of the City Council? Decidedly.

236. *Chairman.*] Do you not think it has now gone a little too far to adopt a mongrel system of having this work done partly by the Council and partly by private citizens? It has gone too far, but I do not see why there should not be a remedy. There may be rival hydraulic companies and electric companies as well as rival tramway systems, and the end will be that the citizens will lose entire control over their own streets, which they have to pay for.

237. Are not the citizens able to look after themselves and protest against any injustice? I have not the slightest doubt that they will, and they can.

238. *Mr. Moseley.*] Are the city councillors prepared with any scheme for lighting the city? They are considering a scheme now.

239.

- Hon. A. J. Riley, M.L.C.
19 Aug., 1891.
239. Is there any reasonable probability of that scheme being carried out in the near future? I think so.
240. Are you aware that this Bill makes provision for the corporation taking over the works from the company? Yes; that is the usual clause in such Bills.
241. So that the company would have to undergo all the risk, and the Council may or may not take it over as a going-concern hereafter? Yes.
242. If it is a good thing the Council can take it over, but if it is not they need not do so? Yes; but they are in precisely the same position with regard to any other electric lighting company. We might have half a dozen to take over in a few years.
243. But is there any compulsion to take over any of them;—might not the corporation take over the best and leave the worst? Yes. I am not hostile to this Bill more than to any other Bill; but ever since I have had a voice in municipal affairs I have consistently opposed the granting of such powers as these to private companies.
244. *Chairman.*] Do you not think that private citizens are better able to manage works of this kind than either the Government or corporate bodies? I think the latter are quite as well able to manage such works as are the former if you give a monopoly.
245. Can you give any reasonable argument why the Municipal Council should have a monopoly of lighting the city? They own the streets, and the ratepayers pay for their maintenance.
246. Do you think that such works would be carried out better by the Municipal Council if they could secure a monopoly which they do not possess at present? I think it is unfortunate that the Council have not such a monopoly, many things have been taken from the City Council which I think they ought to have.
247. *Mr. Moseley.*] Do you not think that competition would be a good thing for the citizens at large? Not in a case of this kind.
248. *Chairman.*] Not where it breaks up the streets? I am not in favour of anything that would lead to more interference than there is at present with our narrow streets and their congested traffic.
249. *Mr. Moseley.*] Then the probability is that the City Council would hesitate to break up the streets for electric lighting? They would then get rid of the trouble with the Gas Company in breaking up the streets.
250. The streets would have to be broken up in any case? Yes.
251. Then, what is the objection to this company breaking up the streets when they are under heavy penalties? It is scarcely necessary for me to point out the difference between the Corporation having a monopoly, which would probably be readily granted to them as compared with granting it to any private company, and four or five rival electric companies breaking up the streets. Suppose one electric company said we will light the "Australia Hotel" for three years at a certain price, and at the end of the term another company offered to do it for less. That second company might then proceed to lay down their mains in the streets. The same thing might happen with regard to every large building. The consequence would be that we should be in a continual state of turmoil.
252. *Chairman.*] At the present time is not the lighting of Sydney practically in the hands of a monopoly? Yes.
253. And the Corporation, in fact, cannot take that right from the monopolists? Yes; that is unfortunately the case.
254. As the lighting of Sydney is in the hands of a monopoly at the present time, would not this proposed Electric Lighting Bill be a relief to the citizens by bringing in fair competition in the supply of light? Undoubtedly the electric light would be a great improvement on gas.
255. Would it not give the citizens of Sydney an undoubted privilege by establishing a fair competition with the existing monopoly, and would not the rivalry be an advantage to the citizens? Undoubtedly.
256. But as a citizen you object to the further breaking up of the streets, because other rival institutions might claim the same rights? That is it.
257. *Mr. Moseley.*] But under this Bill no company can break up the streets without the consent of the Council, and is it not quite possible for the Council to step in and say "We have had enough of it"? We have had Bills of this character in connection with other matters, and this clause is word for word the same as the clauses in the other Bills. As far as that is concerned, this clause is just as fair as any other which I have seen. I do not think, however, that three days' notice is sufficient. I know in one case that a notice was given to me that could not be attended to for four days.
258. *Mr. Lee.*] What notice do you think should be given? It would require some consideration. What might do for some purposes would not do for electric lighting. I think five days' notice would be quite sufficient.
259. *Chairman.*] In your travels throughout the world have you seen cities lighted by electricity? When I was travelling, electricity was only in its infancy.
260. Have you had any personal experience of its use? Not beyond what I have seen in Sydney.
261. *Mr. Barbour.*] Do you think as an Alderman, that the Council would like to have an opportunity of giving any evidence on this Bill before the Committee report progress? I do not think so. There has been one rule adopted with all Bills of this kind, that when the committee reported on the Bill to Parliament if the Council think their interference is necessary they petition that the Bill be not passed.

Mr. Robert Sands sworn and examined:—

- Mr. R. Sands.
19 Aug., 1891.
262. *Mr. Moseley.*] Are you a large employer in the city of Sydney? Yes.
263. Does your business involve a great deal of night work? Yes.
264. Are you satisfied with the superiority of electric lighting over gas lighting for your business purposes? So much so, that I intend to adopt it in my new building.
265. Which system do you propose to adopt? The same system which is in use in the *Daily Telegraph* office at the present time.
266. Is that the Crompton system? Messrs. Harrison and Whiffen are the representatives of the company.
267. Have you seen this Bill? Yes.
268. Do you consider that the provisions of the Bill are sufficient to protect life from danger? I do not know anything at all about that.
- 269.

269. Do you know if the provisions of the Bill are sufficient to protect the general public in the matter of meters? No; I did not know there was such a thing as a meter.
270. Does not clause 19 do that? I have read it, and it appears to me to be very fair. If a man makes a complaint, and deposits a certain amount, the company find out whether his complaint is fair, and if they find that it is fair they return him his money. Mr.
R. Sands.
19 Aug., 1891.
271. Do you think that the general provisions of the Bill are fair and reasonable? Yes; as far as I can understand them.
272. *Chairman.*] As a citizen and a large consumer, do you intend to adopt the electric light when you can obtain it? Yes.
273. Is that the general view taken by the citizens of Sydney? I should think that would be the opinion of those who have seen cities lighted with the electric light.
274. Do you think it is a great advantage? Yes.
275. Do you think that the general opinion of the citizens of Sydney is in favour of an improved system of lighting? I should imagine that the common sense of the community would accept electric lighting in preference to gas, if they once saw that the electric light is almost as cheap and infinitely better.
276. *Mr. Moseley.*] Have you any connection whatever with this company? Not the slightest.
277. Do you speak merely as a private citizen? Yes.

Mr. Watkin Wynne sworn and examined:—

278. *Chairman.*] Are you the manager of the *Daily Telegraph* Newspaper Company? Yes.
279. *Mr. Moseley.*] Have you had considerable experience in the use of the electric light? We have had an installation in the *Daily Telegraph* office for a little more than two years. It was erected by the Crompton Company, of whom Messrs. Harrison and Whiffen are the local representatives. We have no gas in the building at all; we depend entirely upon the electric light; and if that went out we should be in darkness. We have never had a hitch during the whole of the two years. We burn the light from early in the afternoon until the next morning. No defects have developed themselves. There has been no injury to the sight of the compositors or of the writers. There have been no complaints except that when the light was first started some imagined that there would be a possible injury to their eyes in consequence of the extra brightness of the light. Experience has shown that there has been no injury, and the light has been a great convenience. The heat from which we suffered from the gas in the old building has almost entirely disappeared. The electric light is very cool, pleasant, and bright; and certainly, as far as I am concerned, if I were associated with any large building I should make provision for electric lighting. I should consider it a very material convenience. It is very handy and safe. Mr.
W. Wynne.
19 Aug., 1891.
280. *Mr. Lee.*] Is it quite controllable? It is under perfect control.
281. Is it quite as controllable as gas? It is more so. We had more difficulties with regard to gas than we have had with electricity. Occasionally you get water in the gas-pipes and the gas-light jumps. Then paper used to get blown into the gas, and the building had an escape from burning. No such difficulty has occurred with the electric light, nor do I see how such a difficulty could occur in accordance with the rules of the Phoenix Fire Insurance Company.
282. Has the use of the electric light increased the cost of insurance on your building? No.
283. Has it decreased the cost? The cost of insurance has been decreased since we have been in the office, but that has not been in consequence of the electric light. I think it has been the result of competition between the various companies.
284. *Mr. Moseley.*] Do you think that when the electric light is more generally used, the insurance companies will reduce their rates? I think they ought to do so; but I think they are governed in fixing their rates by other considerations. When they make heavy losses they have to make good those losses. I may mention that, besides using the electric light ourselves, we are supplying half-a-dozen other consumers with the light. We have a surplus power, and in order to economise the use of the light for ourselves, we supply other people with it.
285. *Chairman.*] And do you do that without a Bill or authority? Yes; we supply buildings immediately surrounding us. We have had applications from people on the other side of the street, asking us if we could give them the light, for which they are perfectly willing to pay; but we have no power to cross the streets, and we could not oblige them. In fact all our surplus power is now in use, but the citizens all around are anxious to have the light.
286. The cry is, let there be light? Precisely so.
287. *Mr. Moseley.*] Do they readily pay any extra charge? Yes; it costs little more than gas. We charge 48s. per lamp per year, and they can burn it all night if they like. Each lamp is sixteen candle power. It costs about the same as gas.
288. *Mr. Barbour.*] What is your own opinion as to the relative cost of gas and electricity? It depends upon the conditions under which the light is produced. With a small installation like ours it costs as much as gas, but with a larger installation it would be cheaper, and that would be a profit to the company. I am sure it does not cost us more than gas; but we sell at 48s. per lamp, and that reduces the cost.
289. *Mr. Moseley.*] Have you seen the light in operation in Melbourne lately? I have seen it in use in the streets of Melbourne, and in the *Age* office the Crompton system is in successful operation.
290. *Mr. Lee.*] Are you quite satisfied with it as a light? Yes, perfectly.
291. If it was a choice between electric light and gas, would you revert to gas? No.
292. Do you think the light is incomparably superior to gas, and would you retain it at a higher cost? It is superior in every respect, and we would be inclined to pay more money in order to secure the convenience of the electric lighting.

WEDNESDAY, 26 AUGUST, 1891.

Present:—

MR. DIBBS.
MR. BARBOUR.MR. LEE.
MR. YORK.

G. R. DIBBS, ESQ., IN THE CHAIR.

Mr. Alfred Herbert Whiffen recalled and further examined:—

Mr. A. H.
Whiffen.
26 Aug., 1891.

293. *Mr. Moseley.*] Having heard the Clerk read the paper by Mr. Preece, of London, which appears as an appendix to the evidence given by the Superintendent of Telegraphs before this Committee, do you agree with the statements therein contained? Yes; I think that many of the points contained in my evidence before the Committee agree with the statements in that paper. I have drawn up a few figures showing the comparative prices of gas and electricity. I find that a 10-candle power electric lamp at 1s. per unit, which is the maximum price in our Bill, would cost £3 6s. 6d., burning six hours per day for 365 days.
294. *Chairman.*] Would each light cost £3 6s. 6d. per annum? Yes; burning every day. A 10-candle power incandescent lamp, burning for 365 days in the year for six hours per day, would cost £3 6s. 6d. for each light.
295. *Mr. Lee.*] What is a light? One lamp such as is used in the Assembly chamber. Such a lamp, I reckon, gives about the same light as a 5-foot gas-burner, and that I find agrees with what Mr. Preece states. A 5-foot gas-burner, burning for the same number of hours with gas at 5s. 3d., would cost £3 17s. 5d. per annum.
296. *Mr. York.*] What candle power would that gas-burner represent? It has a nominal 20-candle power.
297. *Chairman.*] And it is stated that that nominal 20-candle power is really only 10-candle power? Yes.
298. That is, as an actual fact, the gas is only 10-candle power? Yes.
299. Then you state that an electric light, and what they call 20-candle nominal gas-light, but which is practically only 10-candle, are about equivalent? Yes; in the actual light given, and the gas would cost a few shillings more.
300. *Mr. Moseley.*] As a matter of fact do you not know that gas in this country is only supposed to be of 13-candle power? Yes; and of course gas varies a great deal. In the city it is much better than it is in some parts of the suburbs. Gas is one of the easiest things to adulterate that you can have.
301. *Mr. Lee.*] Can you not adulterate electricity? No.
302. *Mr. Barbour.*] Speaking in an ordinary way, the result of the comparison of the two lights is that electric light of the same power would be cheaper than gas-light? Yes, a little cheaper.
303. *Mr. York.*] Could not the company supply the electricity of less power than they are supposed supply it? We could supply electricity at less pressure, but the same thing applies to gas.
304. *Mr. Moseley.*] Do you remember a letter being written to the City Council on the 28th January of the present year by your company proposing a deputation? Yes.
305. Again, on the 2nd February, was a letter written respecting an interview with the Mayor of Sydney, Mr. Burdekin, and forwarding copies of the Bill to the City Council? Yes. We have also the Town Clerk's acknowledgment of having received those letters.
306. Again, on the 3rd April of the present year, was a letter written to the City Council asking if they had any objection to the Bill? Yes; the letter asked them to state any objection or alterations that they might wish, and that we would give them due consideration. We have the Town Clerk's acknowledgment of that letter, but no other message.
307. *Chairman.*] Did you receive any objections? No; and as it is so long ago we naturally concluded that there were no objections.
308. *Mr. Moseley.*] Are you aware that Mr. Allbright, as representing your company, appeared before the City Council on the 11th February of the present year? Yes; I was present with him at a special meeting of the Council.
309. Was he specially examined on the subject? Yes.
310. Were you examined also? To some small extent. I really went with Mr. Allbright, to assist in any way I could.
311. Is your company willing to assist the City Council in any way they might reasonably require? We will be quite willing to consider and act upon any reasonable suggestions.

Alderman William Patrick Manning, Mayor of Sydney, called in, sworn, and examined:—

Alderman
W. P.
Manning.
26 Aug., 1891.

312. *Mr. Moseley.*] Are you Mayor of the city of Sydney? Yes.
313. Are you aware that at a meeting of your City Council, in February last, Mr. Allbright, who represents the Crompton Company, was called as a witness? Yes.
314. Was he examined by the Mayor? Yes; I think he was examined generally by the members of the committee.
315. Was he questioned primarily by the Mayor? Yes; Mr. Burdekin was then Mayor.
316. Did he appear to give evidence upon a Bill to facilitate and regulate the supply of electricity for lighting and other purposes in the city of Sydney? Yes.
317. Is that the Bill which was afterwards submitted to the Council? It was sent to the Council.
318. Do you know, as a matter of fact, that in February certain copies were sent to the Council? Yes.
319. And also that in February a letter was written to the Council, asking if there were any objections to the Bill? I do not know anything about that.
320. Have you looked at the Bill at all? No.
321. Then you are not aware of the particular clauses and provisions of the Bill for the protection of the Council? No.
322. Do you think that if three days' clear notice is provided for in clauses 5 and 6 to be served upon the council before the streets are broken up, it is sufficient? I do not think that is a matter of much importance.

323. Is it provided in clause 6 that the streets are not to be broken up except under the superintendence of the council? That is the usual provision which is made.

324. Do you think that that provision is sufficient? Yes, so far as it goes.

325. There are various other clauses in the Bill which I believe are the usual clauses that companies take before they break up the streets, and which in practice have proved sufficient for the protection of the roadway? Yes; with, perhaps, some little amendment.

326. Are you aware that the company proposes to place their wires underground, and do you think that that is preferable to having them above ground? Yes; but I think that that clause only refers to a certain part of the city. It would be preferable to have the wires underground.

327. Would that obviate many of the objections to the electric light system with regard to the danger to individuals? Yes; besides, the Government require that to be done now.

328. If it can be shown that there is no danger to life from the strength of the current which is proposed, would that also do away with one of the principal objections to the use of the electric light? Yes.

329. Assuming that any company gets a concession to light the city by electricity, is there any objection, so far as you know, to what is now being asked by the present company? I may say that this Bill and two or three other Bills have been referred to a sub-committee of the City Council, which is now engaged in considering all the various Bills, and the committee is also considering the question of the advisability of introducing electric light into Sydney.

330. *Chairman.*] Of introducing it by themselves? Perhaps by themselves; but they have not decided that it shall not be entrusted to private enterprise. They have devoted themselves up to the present time wholly to the consideration of the advisability of introducing the system. They have not decided the question whether it should be by private enterprise or whether the council should take it up. The committee have not considered one of those Bills yet. If the council decides that private enterprise should carry out the work, they will proceed to consider which Bill is the best. I do not know which Bill is the best. The sub-committee has been working for six months getting a mass of evidence together, and it is just about to bring up its report. When it does so it will leave to the council the question of determining whether this work should be carried out by private enterprise or by the municipality.

331. In the event of the City Council deciding to start an electric system of their own would they require a Bill? Yes.

332. At the present moment is not the lighting of the city of Sydney practically in the hands of one company? Yes.

333. Would it be to the advantage of the citizens if there was a rival lighting system? Most assuredly it would.

334. *Mr. Lee.*] Have the council, directly or indirectly, intimated their intention to oppose the Bill which we are now considering? They will oppose every Bill. They will oppose any concession being granted to any company unless they really grant it themselves. I can see that they are prepared to contend that this is a matter for municipal control.

335. Will they oppose any Bill until such time as they have decided what course they shall pursue? Yes. The whole key of the question is whether or not private enterprise should be entrusted with the work.

336. Until that question is determined by the council, you are not in a position to give any direct opinion on the matter? Yes.

337. *Chairman.*] As an alderman, and not as Mayor, and therefore not binding the council, do you not think the time for securing the control of lighting has passed out of the hands of the municipality by reason of the fact that one company has the sole right to the streets at the present moment? The Gas Company has not the sole right to the streets. As far as electric lighting is concerned, we could introduce the system.

338. Would it not be an awkward thing for the council to carry on a rival system of lighting against a private company? No; because the superior light will prevail.

339. I mean so far as the electric lighting proposed to be used by the council for lighting this city only is concerned, and without dealing with the supply of light to private houses? The council I think would have no hesitation in taking up the work of lighting the city with all its risks. I may say that it would be impossible for the council to take up the question of lighting the streets only. If they go in for the work they must dove-tail it with private lighting, otherwise it will not pay.

340. As an alderman, and not as Mayor, do you not think that that would be a little beyond the aldermanic functions? I have not studied that question yet; I shall study it on the committee; I have no opinion on the question just now. The whole question is whether private enterprise rather than municipalities should be allowed to do this work.

341. Would not the council be going beyond the object of municipal government in retailing light to private individuals? In my opinion they would not.

342. *Mr. Lee.*] As a matter of fact is it not done in many municipalities at present? Yes; and it is done very badly by some of them. They have been rushing at the question.

343. *Chairman.*] Do you not think that electricity is a little beyond the municipal mind? I think the aldermanic mind is quite equal to the Parliamentary mind. There is no doubt this is a big question. I cannot say what the report of the committee of the Council will be, but we have taken a great deal of valuable professional evidence.

344. *Mr. York.*] Having simply glanced through this Bill, have you any objection to it as Mayor of the city of Sydney? There is nothing about it that strikes me as particularly objectionable. I regard the Bill as very satisfactory, inasmuch as it provides for all the business parts of the city being supplied by means of an underground conduit. I think this is the first Bill submitted to us which makes such provision.

345. As a private citizen, and not as Mayor, do you think that the lighting of the city by electricity would be a matter of public convenience and safety as compared with lighting by gas? Yes.

346. The question being left to consumers themselves to decide? Yes.

347. *Mr. Moseley.*] In the event of any Bill whatever being submitted to Parliament, do you think it would be complete without some provision allowing the Council at any time to take over the works at a certain price? That would, of course, be a very good provision in the interests of the Council and the citizens.

Alderman
W. P.
Manning.

26 Aug., 1891.

Alderman
W. P.
Manning.
26 Aug., 1891.

343. *Mr. York.*] Have you read clause 29, which makes that provision? That is a clause which requires careful consideration, and I would not like to say that I approve of every word of it. The clause may be so worded that the company could get a great deal more money than they embarked in the enterprise at the commencement on account of the increase in the value of land at the time that they sell. The principle of the clause is a good one.

APPENDIX.

(A.)

EXTRACTS from an address delivered by Mr. W. H. Preace, F.R.S., M.I.C.E., M.I.E.E., &c., before the London meeting of the Association of Municipal and County Engineers.

ONE ton of coal produces 9,611 cubic feet of nominal 20 candle-power gas in Manchester, or 1 lb. produces 4·29 cubic feet or 17·2 candle-power.

Seven pounds of coal burnt in a steam boiler will produce 1·3 electrical horse-power or 1,000 walt; or one kilowalt hour and 1 lb. of coal burnt per hour will produce 48 candle-power through the medium of an incandescent lamp or 288 candle-power through the medium of an arc lamp.

The cost per 1,000 feet of gas to the Corporation of Manchester is 2s. ; 1,000 cubic feet of gas is equivalent to 4,000 candle-power hours.

A kilowalt hour (or Board of Trade unit) can be produced for 4d., which means that we can produce 4,000 candle-power hours by * arc lamps for 8d., and 4,000 candles by glow lamps for 4s., or twice the theoretical price of gas. As an actual fact gas gives practically only 10 candles per 5 cubic feet, according to measurements made by Mr. Preace and Mr. Vernon Harcourt; consequently 30 per cent. at least must be added to the cost of gas for this.

In addition to this an allowance must be made for waste. The average numbers of hours per annum per house in England is 600 for gas and only 460 for electric light. This is probably due to the ease with which the electric lamps can be turned off and on.

The result of this comes to the fact that the practical figures of comparison between gas and electricity is 3s. 8d. against 4s., not 2s. against 4s.

We can prove this. The average amount, taking the returns from the chief nine towns of this country (England), paid per gas-burner per annum, is 9s., the average price of gas being 3s. 1,000 cubic feet.

The average price of the 200,000 electric lamps burning in London is 10s. Following is a list of revenues derived per lamp wired by the various London companies:—Metropolitan, 12s. ; Chelsea, 8s. 6d. ; Kensington and Knightsbridge, 8s. 6d. ; House-to-House, 11s. 6d. ; St. James and Pall Mall, 9s. 6d. ; and the Brighton Company, 8s. 6d. ; the mean for the 200,000 lamps being 10s.

* An arc lamp of 2,000 candle power takes a current of 10 amperes at 50 volts pressure, or 500 walt and burning for one hour uses half a kilowalt hour or half a Board of Trade unit. An incandescent lamp of 10 candle-power takes on an average 30 walt, so 400 ten candle-power lamps giving an aggregate light of 4,000 candles burning for one hour will use twelve kilowalt hours, or twelve Board of Trade units. A Board of Trade unit can be produced in London for 4d.

1891.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

SYDNEY ELECTRIC LIGHTING BILL.

(PETITION FROM CERTAIN RESIDENTS OF SYDNEY, IN FAVOUR OF.)

Received by the Legislative Assembly, 21 September, 1891.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in
Parliament assembled.

The humble Petition of the undersigned residents of Sydney,—

RESPECTFULLY SHOWETH:—

That whereas the Bill of the City of Sydney Electric Light and Power Supply Company, now
before your Honorable House, provides:—

1. For the distribution and supply of electricity for lighting and power throughout the City of Sydney as incorporated under Act 1879, 43 Vic. No. 3:
2. For the supervision by the Sydney Council of all such works so far as regards the streets and thoroughfares:
3. For the supervision by the Superintendent of Telegraphs of all such works as far as regards the protection of the Telegraph and Telephone Lines, and safety of the general public:
4. For the right of purchase of the works by the Council at the expiration of twenty years after the passing of this Act, or every succeeding term of ten years:
5. Whereas the City Council have resolved to petition your Honorable House to set aside this Bill:

Now therefore your Petitioners being deeply interested in the commercial progress of the City of Sydney, and desirous of securing such benefits as electricity for light and power affords, your Petitioners humbly pray that you will be pleased to give Legislative sanction to the Bill now before your Honorable House.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 218 signatures.]

(SECOND SESSION.)

WAGGA WAGGA SCHOOL OF ARTS ENABLING BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred, on 26th November, 1891, the "*Wagga Wagga School of Arts Enabling Bill*,"—beg to report to your Honorable House,—

That they have examined the witnesses named in the list* (whose evidence will be found appended hereto); and the Preamble having been satisfactorily proved to your Committee, they proceeded to consider the several clauses and the Schedules of the Bill, in which it was not deemed necessary to make any amendment. See list, page 4

Your Committee now beg to lay before your Honorable House the Bill, as agreed to by them.

*No. 1 Committee Room,
Sydney, 9 December, 1891.*

JAMES GORMLY,
Chairman.

PROCEEDINGS OF THE COMMITTEE.

WEDNESDAY, 2 DECEMBER, 1891.

MEMBERS PRESENT:—

Mr. Hutchinson,		Mr. Gormly,
Mr. Morgan,		Mr. Sheldon,
		Mr. John Wilkinson.

Mr. Gormly called to the chair.
 Entry from Votes and Proceedings appointing the Committee *read* by the Clerk.
 Printed copies of the Bill referred, together with original Petition to introduce same before the Committee.
 Charles Hardy called in, sworn, and examined.
 Witness withdrew.
 [Reassembling of the Committee to be arranged by the Chairman.]

WEDNESDAY, 3 DECEMBER, 1891.

MEMBERS PRESENT:—

		Mr. Gormly in the Chair.
Mr. Barnes,		Mr. Morgan,
Mr. Perry,		Mr. John Wilkinson.

John Robert Garland called in, sworn, and examined.
 Room cleared.
 Preamble considered.
 Question—"That this Preamble stand part of the Bill"—put and passed.
 Clauses 1 to 6 read and *agreed to*.
 Schedules read and *agreed to*.
 Title read and *agreed to*.
 Chairman to report the Bill without amendment to the House.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

WAGGA WAGGA SCHOOL OF ARTS ENABLING BILL.

WEDNESDAY, 2 DECEMBER, 1891.

Present:—

MR. GORMLY,	MR. SHELDON,
MR. MORGAN,	MR. HUTCHINSON,
MR. JOHN WILKINSON.	

J. GORMLY, ESQ., IN THE CHAIR.

Mr. Charles Hardy called in, sworn, and examined:—

1. *Chairman.*] Do you reside at Wagga Wagga? I do.
2. You are one of the trustees of the Wagga Wagga School of Arts? Yes.
3. You have been on the committee of the School of Arts for a number of years? Yes, about twenty years.
4. You know the School of Arts site at Wagga Wagga? Yes.
5. And you are acquainted with the buildings on the land? Yes.
6. Are you of opinion that it is desirable that money should be provided to improve the land? Undoubtedly; that is what the committee have been wanting to do for a length of time. They desire to make improvements in the present building; it is far behind the times.
7. And you believe that if money could be procured, the land could be so improved that it would be more useful to the residents of the town and district for the purposes for which it was granted? Undoubtedly; it would enhance its value in every respect.
8. The Bill that has been referred to this Committee provides that £4,000 may be raised on mortgage;—do you think it is necessary to raise that amount, or do you think that a smaller sum would suffice? I think that is a very fair sum. The matter has been duly considered by the committee, and they are of opinion that that is the lowest amount which should be asked for for the improvements which are actually necessary.
9. I suppose you are very well acquainted, from your long residence in Wagga Wagga, with the value of the land? Yes.
10. And you are acquainted with the situation of the site of the Wagga Wagga School of Arts? Yes.
11. Could you give the Committee any information as to the probable value of the site from its central situation? It has a frontage of 66 feet to Fitzmaurice-street. There are two frontages to it.
12. Was part of that land sold at £75 a foot? The value of the site would be about £70 a foot. It is deeper than the opposite side that was sold. The depth is about 220 feet, and the frontages are to Johnston-street and Fitzmaurice-street.

Mr. C. Hardy.

2 Dec., 1891.

- Mr. C. Hardy. 13. And you believe that it will be beneficial to enable the trustees to raise money to improve the buildings? Yes.
- 2 Dec., 1891. 14. And it would enable the land to be used more beneficially to the residents? Yes, for the object in view. The difficulty now is that the institution has not sufficient accommodation to enable the residents to obtain all the advantages that should be derived from a School of Arts.
15. Mr. Sheldon.] The Bill speaks about the repair and alteration of buildings. What buildings are they. Are they buildings which are used for the School of Arts at present? Yes, entirely. They have been used for a School of Arts for the last twenty-five years.
16. The Bill only has reference to School of Arts buildings and nothing else? Only to School of Arts buildings.
17. Chairman.] Do you think if the Bill were passed, and the trustees raised a mortgage on the land, and if the Bill gave them a power to lease the building if erected, a portion of it might be rented beneficially, and the rents derived from it would be the means of improving the institution? Yes; I undoubtedly believe that. That is really what is necessary—to have additions made to the building for that purpose.
18. Is there a vacant portion of land equal to nearly half the frontage to the main street that is not utilised? Yes, about 30 feet frontage to the main street. The building stands on a corner.
19. Is it the wish of a number of subscribers to the institution that a larger hall should be erected on the land? Yes. The inhabitants have desired to erect a hall there for a long time, but for want of an opportunity for borrowing nothing could be done. We could not borrow anything on the land.
20. Was it the wish of the members of the institution that the hall should be erected for the purpose of having lectures delivered on technical subjects in connection with the Department of Public Instruction? At present we have no lecture hall, so that if we had an opportunity of getting lectures delivered in connection with the Technical College, we could not take advantage of it.
21. Has an offer been made by the Department of Public Instruction to have lectures delivered if a hall were provided? There have been frequent applications from persons desirous of lecturing there, but we have not a hall; we have only the main reading-room and the library.
22. Mr. Sheldon.] Of course there are public halls in Wagga Wagga? Yes, there is the Oddfellows Hall.
23. Chairman.] Has the Department of Public Instruction offered to send people to lecture on technical subjects if a room were provided for that purpose? Yes; on several occasions we have had to refuse the lectures through not having a hall in which they could be delivered.

WEDNESDAY, 9 DECEMBER, 1891.

Present:—

MR. BARNES,
MR. MORGAN,

MR. PERRY,
MR. WILKINSON.

J. GORMLY, ESQ., IN THE CHAIR.

Mr. James Robert Garland called in, sworn, and examined:—

- Mr. J. R. Garland. 24. Chairman.] You are one of the trustees of the Wagga Wagga School of Arts? I am one of the trustees and grantees.
- 9 Dec., 1891. 25. Have you seen a copy of the Wagga Wagga School of Arts Bill? I have.
26. You know that the Crown grants in regard to the lands occupied by the School of Arts exist? Yes.
27. Are you of opinion that circumstances may render it necessary that some part of that land should be leased for promoting the object for which the School of Arts has been established? Yes, I am, and have been for many years.
28. You have been intimately connected with the management of that institution? Yes, I was President for a great many years, and I have been for the last twenty years either President or a Committee man.
29. Have you any knowledge of an overdraft of about £250 that has been obtained at the Joint Stock Bank for the institution? Yes; it was to carry out repairs and improvements.
30. It is proposed by this Bill to give power to mortgage the land so as to raise money to erect buildings? Yes.
31. Do you think that will be a desirable course to adopt? That is the only means of putting a suitable building upon the grounds.
32. Do you think it desirable that a hall should be erected for the purpose of having lectures delivered in connection with the Public Instruction Department on technical subjects? I think it is desirable that a building should be erected suitable for the purposes for which Schools of Arts are instituted. There should be a lecture hall, a library, reading-rooms, and chess-rooms.
33. I believe the institution has 66 feet frontage to Fitzmaurice-street? Yes.
34. Is that the main street of the town? Yes.
35. And if suitable buildings were erected on that land, might a portion of it be profitably let for shops and offices, so as to pay the interest on the money borrowed? I think so. I think that the frontage to Fitzmaurice-street might be well utilised in that way. The land has two frontages—one to Fitzmaurice-street and the other to Johnstone-street.
36. Is there a space of ground on the frontage to Fitzmaurice-street not utilised? Yes.
37. And if buildings were erected on that portion might they be let to pay the interest on the borrowed money? Yes, I think so.
38. Most of the business of the town is confined to Fitzmaurice-street? Yes.
39. It is a long street running from the bridge to the railway station? Yes. Baylis-street is a continuation of it.
40. They are the streets in which there is the greatest traffic? Yes.
41. The principal business sites are in Fitzmaurice-street? Yes.
42. Which makes that frontage particularly valuable? Yes.
43. Are the buildings in Fitzmaurice-street let at fairly high rents? Yes; it is a very desirable situation.

Mr.
J. R. Garland.
9 Dec., 1891.

44. From your knowledge of the institution, are you of opinion that the objects for which the land has been granted cannot be properly carried out unless the committee get the command of funds in some such way as is proposed in the Bill? No doubt it is necessary for the committee to obtain funds to utilise the land properly, either by a special grant or by raising money upon the property.
45. The Committee would like to be satisfied that there would be some return on the money expended, and that the mortgagees would not have to foreclose;—could you give any information on that subject? I think that the rents of the offices would pay the interest on the money that might be borrowed to erect the proposed buildings, and that there would be a great increase in the number of subscribers if the buildings were made more suitable. At present the buildings are unsightly and not by any means attractive, either externally or internally. The committee have always had very great trouble in trying to suit the convenience of the subscribers and to induce other persons to become members.
46. Is not Wagga Wagga a large centre of population? Yes; and it is increasing very much every day.
47. Would you be able to give the Committee any information as to the value of the site of the School of Arts;—I would ask if you have any knowledge of what land close to it has been sold for, for instance the site on which the Union Bank stands? I do not remember exactly, but I know that the value of property in that neighbourhood is high. I know that the Union Bank sold some of their property to the Bank of Australasia, but that land was in a better position.
48. Was it a corner lot? No.
49. It had a small frontage I believe? It had not very much.
50. What was it sold for per foot? I could not say exactly, over £65.
51. Do you know that the opposite corner was sold for £75 per foot? No, I did not know that.
52. The frontage to Johnstone-street, which is 300 ft., would be of great value for building purposes? It would, but if you were building on that there would be only 1 chain depth.
53. Could not the corner be built on and let? Yes, but it would not do to go too far or it would entrench upon the whole.
54. Does this site form one corner? Yes.
55. The Bank of New South Wales is one of the opposite corners? Yes.
56. And the Union Bank is on another corner? Yes.
57. Then the site is really in the centre of the business part of the town? Yes. It is within 100 yards of the Court House, the Post-office, the Telegraph Office and the crown of the sand hill, which is really the most valuable site in Wagga Wagga, being completely beyond the flood-mark.
58. Is this School of Arts out of the flood-mark? There never yet has been a flood that reached it.
59. *Mr. Wilkinson.*] Is it intended to pull down the present buildings? I think it may be necessary. I do not think suitable buildings could be erected so as to utilise the present structure. It may be that an architect could design a building so as to utilise the present one, but I very much doubt it, because it is an unsuitable building, which has been in existence for many years.
60. *Chairman.*] Still there is considerable accommodation in it? Yes; there are a library, reading-room, chess-room, and committee-rooms, besides the librarians' private rooms, and two offices fronting Fitzmaurice-street.
61. *Mr. Perry.*] Have you any doubt as to whether the rent you expect will cover the interest on the money borrowed, without any increase in the number of subscribers? I think that without any increase in the number of subscribers the rent will be sufficient to pay the interest. I feel certain that if the frontage were judiciously utilised the rent would pay all the interest on the amounts borrowed.
62. *Mr. Morgan.*] What do you intend to build—offices? That is a matter that has not been actually decided upon by the committee.
63. *Mr. Perry.*] Will that be referred to the committee before anything is done? Yes.
64. *Mr. Morgan.*] I suppose you would erect buildings most suitable for letting? Yes; my idea is that some plan should be carried out which could be added to hereafter. A design should be prepared that could be built in portions, not to have a complete building erected which would afterwards be rendered unsightly by additions being made as they were required.
65. It would be to the interest of the committee to erect buildings suitable for letting purposes? Yes, no doubt.
66. *Chairman.*] The ground-floor of the frontage might be let for offices? Yes.
67. And the second floor might be used for the objects of the institution? Yes, I think it is a good thing to have the hall in connection with an institution of that kind on the ground-floor, not up stairs.
68. Do you know what rents are got for buildings in Fitzmaurice-street, for instance the rent of Lorimer's store? I do not.
69. Do you know the rent of Mr. Davidson's office? No; I cannot say for certain, but I know that rents are very high in that neighbourhood.
70. Do you know Mr. Davidson's office? I do.
71. What frontage has it? I think barely 18 ft.
72. Do you know that he is paying £200 a year for it? I am not aware.
73. *Mr. Morgan.*] You are sure that the present accommodation is unsuited to the requirements of the institution? I am quite sure of that; it is a difficulty which the committee have had to contend with for many years. They have had meeting after meeting to devise some means of getting a more suitable building. They have patched it several times, and added to it, but it has always been unsatisfactory; they have not had the means to erect suitable buildings.
74. You think that the way proposed in this Bill is the best way to raise funds for the purpose? Yes. Although I am a trustee I am no longer a member of the committee, except *ex-officio*, as I have left Wagga Wagga. I quite approve of the objects of the Bill.

WATKINS-WALLIS TRUST ESTATE BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred, on 15th December, 1891, the "*Watkins-Wallis Trust Estate Bill*,"—beg to report to your Honorable House,—

That they have examined the witnesses named in the list* (whose *See list, page 4 evidence will be found appended hereto); and the Preamble having been satisfactorily proved to your Committee, they proceeded to consider the clauses of the Bill, in which it was deemed necessary to make certain amendments.

Your Committee now beg to lay before your Honorable House the Bill, as amended by them.

ROBT. BARBOUR,
Chairman.

No. 1 Committee Room,
Sydney, 22 December, 1891.

PROCEEDINGS OF THE COMMITTEE.

THURSDAY, 17 DECEMBER, 1891.

MEMBERS PRESENT:—

Mr. Barbour,		Mr. Barnes,
Mr. Morgan,		Mr. McCourt.

Mr. Barbour called to the chair.

Entry from Votes and Proceedings appointing the Committee *read* by the Clerk.

Printed copies of the Bill referred, together with original Petition to introduce same before the Committee.

Present:—H. De Y. Scroggie, Esq. (*Solicitor for the Bill*).

Herbert De Yongh Scroggie sworn and examined.

Witness *produced* conveyance in trust, dated 22nd June, 1875, made between Hannah Eliza Wallis, Joseph Wallis, Stephen John Pearson, and John Douse Langley, and deed of declaration of new trusts, 17th May, 1878, Watkins and others to Pearson and Langley.

Joseph Wallis called in, sworn, and examined.

Witness withdrew.

Rev. John Douse Langley (*one of the Trustees*) called in, sworn, and examined.

Witness withdrew.

Stephen John Pearson (*one of the Trustees*) called in, sworn, and examined.

Witness withdrew.

Mary Jane Wallis called in, sworn, and examined.

Witness withdrew.

Clara Wallis called in, sworn, and examined.

Witness withdrew.

Emily Mary Wallis called in, sworn, and examined.

Room cleared.

Committee deliberated.

[Adjourned till Tuesday next, at *Two* o'clock.]

TUESDAY, 22 DECEMBER, 1891.

MEMBERS PRESENT:—

Mr. Barbour in the Chair.		
Mr. Barnes,		Mr. Gormly,
Mr. Morgan.		

Present:—H. De Y. Scroggie, Esq. (*Solicitor for the Bill*).

Francis Joseph Wallis called in, sworn, and examined.

Witness withdrew.

William Stephen Wallis called in, sworn, and examined.

Witness withdrew.

Herbert De Yongh Scroggie further examined.

Room cleared.

Preamble considered.

Question—"That this Preamble stand part of the Bill"—put and passed.

Solicitor called in and informed.

Clause 1 read, amended,* and *agreed to*.Clause 2 read, amended,* and *agreed to*.Clauses 3 and 4 read and *agreed to*.Title read and *agreed to*.

Chairman to report the Bill with amendments to the House.

SCHEDULE OF AMENDMENTS.

Page 3, clause 1, line 41. *After* "constructing" *insert* "at a cost not exceeding one thousand pounds".
 " 3, " 2, " 48. *After* "moneys" *insert* "not exceeding in the whole the sum of five hundred pounds."

LIST OF WITNESSES.

1891.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

WATKINS-WALLIS ESTATE BILL.

THURSDAY, 17 DECEMBER, 1891.

Present:—

MR. BARNES,		MR. McCOURT,
MR. MORGAN,		MR. BARBOUR.
R. BARBOUR, Esq., IN THE CHAIR.		

Mr. H. De Y. Scroggie appeared as Solicitor for the Bill.

Mr. Herbert De Yongh Scroggie called in, sworn, and examined:—

1. *Chairman.*] Will you kindly give us a short history of this Bill? I produce a certified copy by the Registrar-General of a conveyance of trust, dated June 22nd, 1875, made between Hannah Eliza Watkins of the first part, Joseph Wallis of the second part, Hannah Eliza Watkins and Robert Lethbridge King of the third part, and Messrs. Stephen John Pearson and the Rev. John Douse Langley of the fourth part. The original deed has been mislaid. The trusts with regard to this deed are as follows:—The sum of £1,500 was paid to the trustees to invest upon certain trusts in the deed mentioned; also two parcels of land containing 400 acres and 75 acres 1 rood 32 perches, situated at Mittagong, were conveyed to the trustees upon trusts in the deed mentioned. Under this deed the trustees have full power to sell any of the lands with the consent of Joseph Wallis during his life, and after his death they can use their own discretion. Power is also given to them to exchange therein comprised and other lands. They have also the power to invest the £1,500 already mentioned, and any other moneys which may come to their hands in the purchase or exchange of lands. As a matter of law lands include houses. Mr. Joseph Wallis is entitled to reside, use, or occupy the whole or any part of the lands comprised in that conveyance or any other lands acquired by the trustees. He is also entitled to receive an income arising from the investment of the £1,500 and any income arising from the lands comprised in that deed. After Mr. Wallis's death, his first wife, Mary Eliza Wallis, is entitled to reside on, use, or occupy the land; and that an income arising from any part of the trust property should be paid to Mrs. Wallis, that is Mary Eliza Wallis, and applied by her in the maintenance of herself and such of her children as should be under the age of 21 years. After the death of both Mr. and Mrs. Wallis the trustees are to apply the income of all the trust property in the maintenance of such children as should be under the age of 21, and upon the youngest child attaining 21 the trustees are to divide the whole of the property amongst the children then living. I may point out that accordingly the rights of the children of Mr. Wallis are only contingent on their being alive upon the youngest child attaining the age of 21. Mary Eliza Wallis, already referred to, being Mr. Wallis' first wife, died on the 18th January, 1876. On December 9th, 1876, Mr. Wallis married his present wife, Mary Jane Wallis. On May 17th, 1878,

Mr. H. De Y.
Scroggie.
17 Dec., 1891.

- Mr. H. De Y. Scroggie.
17 Dec., 1891.
- 1878, there were living five children of the first marriage, and one child of the second marriage. This first deed gave Mrs. Wallis, who was really the settler of the property, power to add new trusts. By virtue of that power she executed a deed of declaration of new trusts, dated May 17th, 1878, made between Hannah Eliza Watkins of the first part, Joseph Wallis of the second part, Mary Jane Wallis of the third part, and Messrs. Pearson and Langley, trustees, of the fourth part. I produce the deed. The effect of that deed is to substitute Mary Jane Wallis, Mr. Wallis' present wife, for Mary Eliza Wallis, his first wife deceased, and to place the children of the present marriage on the same footing as the children of the first marriage with regard to participating in the trust estate. Under that deed the trustees are authorised to lend Mr. Wallis £500. Mrs. Watkins died on January 17th, 1881. Under these indentures of June 22nd, 1875, and May 17th, 1878, there is no power given to the trustees to expend any moneys coming to their hands in repairing buildings already erected, or to be hereafter erected, upon the lands comprised in indenture of June 22nd, 1875, or in erecting houses. As a matter of professional knowledge I state that in deeds of this kind a clause giving trustees power to expend moneys in repairing buildings upon the property should be inserted, and it is usual for such power to be inserted. That I think proves the preamble of the Bill, and now, if convenient, I will prove the reasons why the trustees have applied to Parliament for the Bill. The proper persons to speak in regard to that matter will be Mr. Wallis and the trustees.
2. *Mr. McCourt.*] The property cannot be divided until after the decease of the present Mrs. Wallis? No.
3. And all her children participate? Yes, provided they be alive when the youngest child reaches 21.
4. *Chairman.*] It will be for the benefit of the trust that the power to repair and erect buildings should be given? Most decidedly.

Mr. Joseph Wallis sworn and examined:—

- Mr. J. Wallis.
17 Dec., 1891.
5. *Chairman.*] What are you? A farmer and butcher at Mittagong.
6. *Mr. Scroggie.*] You are the Mr. Wallis mentioned in indenture of June 22, 1875, and May 17, 1878, now before the Committee? Yes.
7. You are the tenant for life under the trusts therein contained? Yes.
8. You and your family are living on the property in the house known as Southwood? Yes.
9. Mrs. Watkins gave this property to you and your family? Yes.
10. At the time she executed the first deed you were living in Southwood House? Yes.
11. Mrs. Watkins was your aunt? Yes.
12. What is the present state of repair of Southwood House? It is almost tumbling down; it is being eaten away by white ants, and the sleepers have sunk.
13. Is it in such a condition that there is personal risk to yourself and family in living in it? There is. I hear it crack sometimes at night, and I wish I was out of it.
14. It is in a very dilapidated condition? Yes.
15. You have been obliged to make some improvements in it? Yes; I had to take all the ceiling down. I was afraid we would be killed in our beds.
16. The only satisfactory thing to be done would be to pull it down and build a new one? Yes.
17. It would be of no use patching it up? No; I had an architect to look at it, and he said it would be throwing money away to do anything to it.
18. When Mrs. Watkins gave this property to you and your family she intended that you should live on it? Yes.
19. In addition to any money you have expended in making improvements to Southwood House, you have also expended certain money in building two other houses and in making improvements on the property comprised in the indenture of June 22, 1875? Yes.
20. How much have you expended on the new house? From £800 to £900.
21. How much have you expended on the old house which you are now living in? About £100.
22. What is the return from these two houses which you have built? I am getting £40 a year for one, and I should be getting £40 a year for the other, only the occupier is a bricklayer who makes bricks for me. He has a large family, and I let him have the house at 7s. 6d. a week.
23. As a matter of convenience to yourself you prefer to let him have the house at a small rent? Yes.
24. But it would bring in the same rental as the other, viz., £40? Yes.
25. You have sold some portions of the land? Yes.
26. What is the total amount of the purchase money up to the present time? £550 or thereabouts.
27. You intend to subdivide a large quantity of the remaining land and sell it? I have had about 120 acres subdivided.
28. Can you give any idea of what you expect to realise from that sale? No; because I sold some at £27 10s. an acre and some at £20 an acre.
29. *Chairman.*] We want to know about how much? I suppose from £25 to £30 an acre.
30. *Mr. Morgan.*] Where is this land situated? A little over a mile from the Mittagong Railway Station.
31. *Mr. Scroggie.*] Do you think the expenditure you have made on the property is a good investment? Yes.
32. You have also expended moneys in obtaining a Torrens title to portions of the land? Yes.
33. You have spent £59 5s. in getting that title? Yes.
34. How many children have you? Six living—three girls and three boys.
35. How many of these are 21 years of age? Two girls and one boy; and Willie will be of age in May next.
36. The two girls are here to-day to consent? Yes.
37. Are you in a position to consent on behalf of the other two to the Bill? Yes.
38. Your son William is unable to be here to-day? Yes; the notice was too short; he was away from home.
39. There was not even time to get a statutory declaration from him of his willingness? No; he was away at Menangle.
40. Is this his signature. This is the notice of the Bill inserted in the papers, and he has signified his consent to the Bill being passed. The other two signatures attached to it are those of the Misses Wallis, who are present in person? Yes.
41. There is no doubt that the buildings put up on the property improve it considerably? Yes.
42. As a beneficiary under these deeds are you willing that the trustees should have the powers proposed to be given to them by the Bill? Yes.

43. Do you think it right and proper, in the interests of the trust estate, that they should have these powers? Yes. Mr. J. Wallis.
44. I suppose that what you have done for the estate has been with the consent of the trustees? I think so. 17 Dec., 1891.
45. And for the benefit of the estate? Yes.
46. *Mr. McCourt.*] But was it with the consent of the trustees? I can hardly tell you now. I don't remember. Mr. Pearson, one of the trustees, said he wished me to build a new house when the first land was sold.
47. *Chairman.*] What has been done has been with their consent? Yes; I know they are quite satisfied.
48. *Mr. McCourt.*] If the Bill is passed, how much will be paid to you on account of improvements and other matters? From £900 to £1,000.
49. *Mr. Scroggie.*] You are not including £57 for survey? No.
50. *Mr. McCourt.*] Would it be best for those who are to receive the property to have the money kept in the bank, or to have the improvements carried out? I think it will be best to have the improvements carried out.
51. Why? Because they will bring in money. If the land is not improved it will bring in nothing.
52. *Chairman.*] Does the expenditure of the money increase the value of the trust by the amount of the expenditure? Yes.
53. *Mr. Barnes.*] Do you think the estate will be improved to such an extent by this expenditure that it will be a great deal more valuable than it is at present? Yes.
54. Do you think it will increase in value more than £1,000? Yes, double that amount.
55. *Mr. McCourt.*] Did those who have signed this document know and thoroughly understand the nature of the Bill? They thoroughly understand it. Mr. Langley explained it to them.
56. *Mr. Morgan.*] You sold some of the land? Yes.
57. With the consent of the trustees? Yes.
58. What did you get for it? £500.
59. What was the money utilised for? I have not got it yet.
60. *Chairman.*] It was sold on term payments? Yes; it goes to the trustees.
61. It does not go to your own private use? No.
62. *Mr. Scroggie.*] How much did you expend on the house, the rental of which is £40? About £350 or £400.
63. *Chairman.*] It is paying about 10 per cent. interest on the money expended? Yes.
64. *Mr. Scroggie.*] Your son, William Wallis, is not present? No.
65. You produce his consent to the advertising of the Bill in the newspapers? Yes.
66. And you know he has given his full consent to the obtaining of the Bill from Parliament? Yes.

Rev. John Douse Langley sworn and examined:—

67. *Chairman.*] You are one of the trustees in the Wallis Estate? Yes.
68. *Mr. Scroggie.*] I understand that Mr. Wallis and his family are now living at Southwood House on this estate? Yes. Rev.
J. D. Langley.
69. Do you know the present condition of the house? It is in a deplorable state. 17 Dec., 1891.
70. Is it in danger of falling down? I consider it is not safe to live in it.
71. Is it desirable in the interests of all concerned that the house should be pulled down and a new one erected? It is.
72. You are aware that Mr. Wallis, out of his own moneys, has erected two houses and effected other improvements on the land? Yes.
73. Do you think this expenditure is a good investment? Yes. My reason for thinking so is that it is returning him very high interest for the money expended.
74. In fact if these houses had not been erected by him the land would have been lying idle and producing no income? It would have been comparatively useless.
75. The trustees are of opinion that the erection of these houses is advantageous to the estate? Yes.
76. Are the trustees willing to repay Mr. Wallis what he has expended in buildings and improvements on the land if power be given them so to do? Yes.
77. Mr. Wallis, I understand, brought certain portions of the land under Torrens title. Was that title a complicated one? Yes.
78. And was it desirable that it should be brought under the provisions of the Real Property Act? I should say it was almost essential in order to secure any selling of any portions of the property. The expense of an inquiry into the title on the part of the purchaser would have been of such a character as to seriously militate against the sale, and would have interfered considerably with the price obtained for the land.
79. In fact the Torrens title offers inducements to purchasers? Yes.
80. I believe it is the intention of the trustees eventually to sell the property? Yes, if a good price can be obtained for it. We are of opinion it would be to the interests of the estate to sell, and eventually the whole of the property must be sold according to the trust when the family are all of age, and when Mr. Wallis and his wife have died.
81. Do you think it right, in the interests of the trust estate, that the trustees should have the powers proposed by the Bill? Yes.
82. I understand that all the beneficiaries who are of age consent to this Bill with the exception of one son, Frank Wallis? Yes. I understand from himself that he is not in favor of it.
83. There is no opposition or objection by anyone else? I know of none. All the other members of the family are here as witnesses, with the exception of Willie Wallis, who has signified through his father his consent. I had a conference with the family some short time ago, and placed the matter before them. It was as a result of that conference that Willie Wallis signified his consent, and I believe he would have been here if his father could have communicated with him.
84. *Chairman.*] Is that his signature to the document? Yes.
85. This is the document advertising the application for the Bill? Yes.
86. *Mr. Morgan.*] What age is Frank Wallis? I think he is over 25 years of age.
87. He is one of the objectors? He is the only objector.
88. Does he give any reason why he objects? No; he has not given me any. In the first place he said
he

- Rev. J. D. Langley. 17 Dec., 1891. he was quite willing to consent to the portion of the Bill which allowed a house to be erected, but subsequently he withdrew his consent. I may say that he and his father are not on very good terms, and I think it is from a want of good feeling between the two that he has not consented.
89. *Chairman.*] As one of the trustees, are you aware of any substantial objection? I am aware of no objection which I could regard as substantial.
90. Has Frank Wallis made any substantial objection? No. He has simply stated his intention to oppose the Bill. He has given no reason to me.
91. *Mr. Morgan.*] You yourself think it would be the best, in the interests of all concerned? As far as the building of the house is concerned I have no doubt whatever about it, and I think it is only fair to Mr. Wallis, as he has erected the buildings on the place, that he should be allowed the money he has expended.
92. *Mr. McCourt.*] Did he ask your consent before erecting the buildings? I was aware the buildings were being erected, but I do not know that he formally asked my consent.
93. No plans were submitted to you? No; but I was aware of what was being done, and I quite approve of it, and if I had had the power under the Act to have allowed him the money for the buildings I should have done so, as they were so greatly to the advantage of the estate.
94. This Bill will give the trustees unlimited power of expenditure, will it not? I would not like to say what the scope of the Bill is.
95. It gives you unlimited power to expend money. Do you not think it would be advisable to place a limit to the expenditure? I should have no objection.
96. What do you think the limit should be? I should say about £500 for any money which has been expended, and about £1,000 for the houses.
97. Then you think a limit of £1,500 ought to be placed on the expenditure? I am quite willing to assent to that.
98. *Chairman.*] Have the affairs of this trust been conducted satisfactorily to the trustees? Certainly, as far as Mr. Wallis is concerned. We have very little power under the Act. Mr. Wallis draws all the income, and, with the exception of the money we have in hand, we have what may be regarded as a dry trust.
99. And it is to the best interests of the trust that these steps are now being taken? We regard it to be so.
100. *Mr. Scroggie.*] Do you include in the limit of £1,500 the money Mr. Wallis has spent in the Torrens title? No; that would make it about £50 or £60 more. The Bill provides that in addition to the money which has to be expended the trustees shall be authorised to pay money which has been already expended. That would not touch the question of extended powers under the Act, because we cannot apply for another Torrens title.

Mr. Stephen John Pearson sworn and examined:—

- Mr. S. J. Pearson. 17 Dec., 1891. 101. *Chairman.*] You are one of the trustees in this estate? Yes.
102. *Mr. Scroggie.*] Do you think it desirable that the trustees should have power to pull down Southwood House and to erect a new one? Yes.
103. Are you in favour of Mr. Wallis being repaid the money he has expended in buildings or in improving the estate? Yes.
104. Do you think that what he has done has been to the advantage of the estate? Decidedly.
105. Do you think it right and proper that the trustees should have the powers proposed by the Bill with regard to power to build, repair, and so on? Decidedly.
106. Do you think any limit should be fixed with regard to what has to be repaid to Mr. Wallis, and with regard to the amount which should be spent in building a new house? I think some amount should be mentioned.
107. *Chairman.*] As a trustee, you would not object to the amount being limited? Certainly not.
108. Your co-trustee has suggested about £1,500? That would meet my views.
109. *Mr. Barnes.*] Do you think the money expended in buildings would be better than banking the money? Decidedly.
110. *Mr. Morgan.*] Generally speaking, the passing of the Bill would be an advantage to all concerned? Decidedly. I have read the Bill, and I think it would be an advantage to the whole of the family.
111. Do you know if the family generally are favourable? I have heard that the eldest son is not favourable to it; in fact I think it was from a letter addressed to Mr. Langley and myself that I saw he was going to oppose the Bill. He was going to oppose what there was no necessity to oppose—our power of selling, to which we have a right. Therefore his opposition amounted to nothing, so far as I could see.
112. Did he state his reasons for opposing the Bill? I do not know that he did.
113. So far as you are aware, the other members of the family are agreeable, and no influence has been brought to bear upon them? I believe they are agreeable, although at one time they were not. I do not know of any influence having been brought to bear upon them. The objection which was made was made by the whole of the family, but it was withdrawn except in regard to the eldest son.
114. *Chairman.*] Has any substantial objection by the eldest son come to your knowledge? Not the slightest; in fact he is objecting to that which no one has any power to upset, because the trust deed gives us the power to sell, and that is all he objects to.
115. You are under the impression that his objection is not substantial in itself? Yes.

Mrs Mary Jane Wallis sworn and examined:—

- Mrs. M. J. Wallis. 17 Dec., 1891. 116. *Chairman.*] You are the wife of John Joseph Wallis? Yes.
117. *Mr. Scroggie.*] You are a beneficiary under the deeds relating to this trust estate? Yes.
118. After Mr. Wallis' interest ceases you are the tenant for life? Yes.
119. Do you fully understand the nature of this Bill? Yes.
120. Do you consent to its being passed? Yes.
121. *Chairman.*] You think it will be for the interest of the estate that it should be passed? Yes.
122. You know of no good reason why it should not be passed? No.

123. It would be for the benefit of the estate if you had a new house put upon it? Yes.
 124. *Mr. Barnes.*] Do you think an expenditure of money would improve the estate? I do.
 125. And it will be a benefit to the family hereafter? Yes. In the present state of the place we could not let or sell it to any advantage. The house is not fit for any one to live in.
 126. *Chairman.*] And the application to Parliament for the Bill is made with your entire concurrence? Yes.

Mrs.
M. J. Wallis
17 Dec., 1891.

Clara Wallis sworn and examined:—

127. *Chairman.*] You are interested in the benefits arising from the estate? Yes.
 128. *Mr. Scroggie.*] Do you understand the nature of the Bill before the Committee? Yes.
 129. Do you consent to the powers thereby proposed being given to the trustees? Yes.
 130. *Chairman.*] Do you think the expenditure upon a new house is justified and that it would be to the interest of the trust? Yes.
 131. Have you any objection to the money already expended in benefiting the trust in the shape of buildings being repaid to your father, Mr. Wallis? No.
 132. *Mr. McCourt.*] Have you read the Bill? Mr. Langley read it to me.
 133. Do you know if the Bill becomes law that the trustees will have unlimited power to spend what they like on the property? Yes.
 134. And you are agreeable to that? Yes.
 135. *Chairman.*] Would you have any objection to the amount being limited to £1,500 or £1,600? No.

Clara Wallis.
17 Dec., 1891.

Emily Mary Wallis sworn and examined:—

136. *Mr. Scroggie.*] You are interested in this estate? Yes.
 137. You are aware of the contents of the Bill before the Committee? Yes.
 138. It has been explained to you? Yes, by Mr. Langley.
 139. Are you willing that the trustees should have the powers which the Bill proposes to give them? Yes.
 140. *Mr. McCourt.*] One of your brothers objects to the passing of the Bill? My eldest brother.
 141. Do you know why he objects? No.
 142. Did you and he ever talk the matter over? At first we did.
 143. Did he not give any reasons? No particular reasons.
 144. Did you agree with his objections then? At first he thought the trustees had no power to sell.
 145. Do you know that under the Bill unlimited power is given to the trustees to spend as much money as they like? Yes.
 146. Do you think that is right in your interests. Do you not think it would be better to limit the amount to about £1,500? Yes, I think there ought to be a limit.
 147. *Chairman.*] You approve of a limit of £1,500 or £1,600? Yes.
 148. That would be £500 for the money already put out, £100 for expenses, and £1,000 for the new house? Yes.
 149. *Mr. Morgan.*] You approve of the Bill which has been read to you by Mr. Langley? Yes.
 150. No influence has been used to cause you to approve of it? No.
 151. You approve of it of your own free will? Yes.
 152. *Mr. Barnes.*] Do you think the expenditure of this money will be a benefit to you hereafter? Yes; it will make the property more valuable.

Emily Mary
Wallis.
17 Dec., 1891.

TUESDAY, 22 DECEMBER, 1891.

Present:—

MR. BARNES, | MR. GORMLY,
MR. MORGAN.

R. BARBOUR, ESQ., IN THE CHAIR.

Mr. Herbert De Yongh Scroggie appeared as Solicitor for the Bill.

Mr. Francis Joseph Wallis sworn and examined:—

153. *Chairman.*] You reside at Mittagong, and you are a butcher? Yes.
 154. *Mr. Scroggie.*] You are aware of the contents of the Bill before the Committee? Yes.
 155. You thoroughly understand the nature and effect of the Bill? Yes.
 156. You are interested in the estate? Yes.
 157. Are you willing that the trustees should have power to pull down the old Southwood House, and to build a new one in its place? Yes.
 158. But you would limit the expenditure to a certain amount? Yes.
 159. What amount would that be? £800.
 160. Would you also be agreeable to the trustees having power to repay Mr. Wallis what he has expended in improvements connected with the old Southwood House? Yes, on condition that it does not exceed £300.
 161. You object to the trustees paying Mr. Wallis any moneys he has expended in putting up the two other houses on the land? Yes.
 162. You are agreeable to the trustees having power to repay Mr. Wallis what he has expended in obtaining a Torrens title to part of the land? Yes.
 163. *Chairman.*] If the trustees are desirous of spending a larger sum than you have mentioned—if, for instance, they desire to spend £500 instead of £300, and £1,000 instead of £800, would you be agreeable? No; I think the amount I have mentioned is sufficient.
 164. Are you aware that your brothers and sisters who are interested in the estate with you are willing that the trustees should pay up to £1,500 or £1,600? Yes.

Mr. F. J.
Wallis.
22 Dec., 1891.

- Mr. F. J. Wallis. 165. Is it your impression that that is too large an amount? I think the amount I have mentioned is sufficient.
- 22 Dec., 1891. 166. And that the work ought to be done for that amount? Yes.
167. Would you say it would be better not to do the work at all than to pay the extra amount? Well, I think the amount I have mentioned is sufficient.
168. I suppose if it came to a little more you would not seriously object? Yes. I think the sum I have mentioned is sufficient, on condition that the property is not sold.
169. What property do you refer to. Do you refer to Southwood House? To any of the estate.
170. You object to any of the estate being sold? Yes.
171. Are you not aware that it has been subdivided with a view to selling? Yes; I am aware of that.
172. And if it were sold to advantage, would not the money in the hands of the trustees be as good for you and others as the land lying idle? I do not think so at the present time. I think it will fetch more in a few years' time.
173. But you are aware that you would be losing the interest on what money you would get in the meantime. If it were sold now the money paid for would be lent out at interest. If it is not sold there will be no interest coming in. Would not the interest and the benefits arising from the money be equal to any prospective increase in value? Yes; but we do not receive that interest.
174. But it goes to swell the amount which will have to be divided when the legatees are no more. The interest the trustees receive would be added to the principal. They would have to account for the interest as well as for the principal when the balance comes to be divided amongst the children? I was not aware of that. I thought we had nothing at all to do with the interest.
175. The interest is part of the estate as well as the principal? I understood that my father had the interest himself.
- Mr. Scroggie:* The father is entitled to the interest on the capital for his life, but the trustees would be called upon to explain what they have done with it. Any money which is not paid to the father or Mrs. Wallis, the second tenant for life, will, of course, be added to the capital.
176. *Mr. Barnes.*] You say you would be agreeable to spend the £800 provided they do not sell any of the estate? Yes.
177. How are they to raise that money? Well, there is £1,500 in the estate.
178. That is lying at interest? Yes.
179. You would allow them to spend £300 of that money? Yes.
180. Do you not think the building of the two cottages improved the estate? Yes.
181. Why not allow him for the building of the cottages if they improved the estate? Well, he has had them rented. I know that one of them has already paid for itself; it has been rented to the State Children's Relief Department for six years.
182. *Mr. Gormly.*] Will the cottages depreciate in value in a number of years? I think so; they are weatherboard cottages.
183. *Mr. Scroggie.*] "Southwood" is weatherboard, and has it not been standing for some sixty years? Yes; but it is worth very little now.
184. *Chairman.*] There is no doubt the trustees will have to account for the amount they receive as interest, as well as the amount they receive as principal, and I do not think they would be likely to pay your father money unless he actually wanted it; and if he wanted it I suppose you would have no objection to his having it? Yes, I have. I think the sum I have mentioned is quite sufficient.
185. *Mr. Gormly.*] Is the estate a productive one;—does it return an income to your father? Yes. I think he realises something like £700 or £800 a year. I do not think if it were not for the estate he could make as much as he does.
186. *Mr. Scroggie.*] That is indirectly through the estate? Yes.
187. *Chairman.*] You must consider this: that the property did not belong to you. It is not you who is giving it to your father; it is rather the other way—that your father inherited the property, and the balance which he does not require is to go to you, so that under the circumstances you should be more liberal. If it had been your own property, and you had left the property, then you might have curtailed him? But he is to receive all interest in the estate, and not the capital at all.
188. *Mr. Gormly.*] He has got a life interest in the estate? Yes. He has not any interest in the capital.
189. *Mr. Morgan.*] The money which is required is for the improvement of the estate? Yes.
190. And to reimburse your father for expenses incurred in the erection of some buildings? Yes. I am willing that they should have this money on condition that it does not exceed the sum I have stated—£1,150, and £58 for the Torrens title.

Willie Stephen Wallis called in, sworn, and examined:—

- W. S. Wallis. 191. *Chairman.*] You are one of the sons of Mr. Wallis, who has an interest in this estate? Yes.
- 22 Dec., 1891. 192. *Mr. Scroggie.*] You know the contents of the Bill before the Committee? Yes.
193. And you understand thoroughly what the Bill is all about? Yes.
194. You are willing that the trustees should have power to pull down old Southwood House and to erect a new house? Yes.
195. But as a condition you limit the expenditure to a certain amount? Yes.
196. What would that amount be? I think about £800, besides the other improvements made in connection with Southwood House.
197. You would be willing that the trustees should repay Mr. Wallis that amount, which is about £350? Yes.
198. Are you also willing that the expenditure by the trustees in obtaining a Torrens' title should be authorised in the money repaid to Mr. Wallis? Yes.
199. Otherwise than with those limits you have no objection to the Bill? No.
200. *Mr. Morgan.*] What age are you? I was 20 on the 4th May last.
201. *Chairman.*] Tell us why you fix the amount so rigidly;—would it not be advisable that the trustees should have a little margin for extra improvements which might be suggested? I do not altogether object to a small amount, but I do not wish it to go on, nor that they keep on selling one part of the property to improve another part.

202. Do you think then that £1,300 would be sufficient for the necessary improvements and to pay for W. S. Wallis. any liabilities incurred? Yes.
203. And you have no great objection to the amount being fixed at £1,300? No. 22 Dec., 1891.
204. Do you think that that will be sufficient for all purposes? Yes.

Herbert De Yongh Scroggie recalled and further examined:—

205. *Chairman.*] What is the amount the trustees wish for power to expend? £1,500. That is £1,000 for the new house, £500 for the improvement already made by Mr. Wallis, and £58 for the Torrens title. Mr. H. De Y. Scroggie.
206. Do you know that there are plenty of funds to pay it? There is £1,000 invested, and there will be the purchase money coming in from the land already sold, and which the trustees intend to sell. It has all already been subdivided, and plans have been prepared. 22 Dec., 1891.
207. And that will make up the amount required? Possibly more.
208. *Mr. Gormly.*] Have the trustees power to sell? Yes.
209. *Mr. Morgan.*] There is power to sell apart from the Bill altogether? Yes.

<p>* James Nixon Brunker, Esq., by reason of his accepting the office of Minister for Lands did not take his seat as a Member of the Committee. † Joseph Palmer Abbott, Esq., who occupied the position of Chairman, resigned from the Committee on the 22 October, 1890, by reason of his being elected to the office of Speaker of the Legislative Assembly. On 30 October, 1890, the Hon. John Lackey was appointed Chairman, and Jacob Garrard, Esq., Vice-Chairman; and on the 6 November, 1890, James Patrick Garvan, Esq., was appointed to fill Mr. Abbott's place on the Committee. ‡ The Honorable James Watson resigned his seat on the Committee on 24 July, 1889, and the Honorable George Henry Cox was appointed in his place on 27 September, 1889. § Shortly after the first meeting of the third Committee, John Sutherland, Esq., died, and his place was filled by the appointment of Charles Alfred Lee, Esq. The seat of John Hurley, Esq., as a member of the Committee became vacant by reason of his resignation from the Legislative Assembly, and William McCourt, Esq., was appointed to fill the vacancy on 16 July, 1890.</p>

¹ Receives a special allowance of £20 per annum. ² Appointed to Kurrajong, 17 March. ³ Allowed £2 10s. per month when travelling.

Letter-carriers and Mail-boys, each allowed one scarlet cloth tunic, one scarlet serge sac, two pairs blue cloth and one pair blue serge trousers, one helmet or one cap. Mail Guards each allowed one scarlet cloth tunic, one scarlet serge sac, two pairs blue cloth and one pair serge trousers. Shipping Clerk, Shipping Clerk's Assistant, Overseer of Letter-carriers, and Gate-keeper, each allowed one blue cloth and one blue serge sac, two pairs blue cloth and one pair serge trousers. Mounted Letter-carriers are allowed three pairs of strapped Bedford cord trousers and one cap each in lieu of helmet, and cloth and serge trousers.

Overtime allowances are granted to the officials of the Mail Branch of the Head Office, in consideration of giving their attendance whenever called upon, either during day or night, to sort English or Foreign Mails received and despatched.

For forage allowances to Post and Telegraph Masters see foot-note at end of Electric Telegraph return.

Porterage allowances are paid as follows:—To Post and Telegraph Masters Bateman's Bay, £6 per annum; Brushgrove, £52; Bulli Railway Station, £28 14s.; Croki, £7; Cundletown, £5; Dulwich Hill, £26; Eden, £15; Fernmount, 12s. per trip; Hamilton, £30 per annum; Harwood Island £13; Hurstville, £6; Kiama, £5 4s.; Lawrence, £13; Milton, £24; Nelligen, £3; Nelson's Bay, £6; Picton, £5; Port Macquarie, £12; Raymond Terrace, £9; Smithtown, £8; South Woodburn, £20; Tarce, £15; Ulmarra, £13; Wardell, £3 5s.; Watson's Bay, £10; Wyrallah, £5; Yamba, £13.

Postmasters are allowed quarters, fuel and light, and in some instances small sums for keeping their offices clean.

The Post and Telegraph Masters at Camperdown, Hunter's Hill, Lambton, Leichhardt, Lower Botany, Randwick, Rockdale, Waratah, and Waverley, are allowed £10 per annum each for keeping their offices open daily until 8 p.m.

Mounted Letter-carriers are allowed forage.

Amount of security given by the Officers, viz.:—Secretary, Accountant, and Cashier, each £1,000; included in a Bond furnished by certain Guarantee Societies to the Treasury Department.

The whole of the other officials in the Postal Service (Town and Country) are included in a general bond, issued by four Guarantee Societies—the security ranging from £100 to £800.

The Government Statistician to The Honorable the Colonial Secretary.

Government Statistician's Office, 25 January, 1892.

In the second part of the Census and Industrial Returns Act of 1891 it is provided that "inquiry shall be made into the industrial condition of the people, the hours of labour, the regularity of employment, the wages of workers, and the accommodation afforded by employers for their workpeople, the employment of children and females, the displacement of labour by machinery, the return upon capital invested, the variation in prices, and any other subject on which the Colonial Secretary may deem it expedient to have inquiry made."

Power to accomplish the object in view is conferred by the provision that "it shall be lawful for the Government Statistician, or any person duly authorised under his hand, to enter any factory, mine, workshop, or place where persons are employed, at any time within reasonable hours, for the purpose of making any inquiries or observations needful for the proper carrying out of this Act."

In compliance with the provisions just recited an inquiry has been made into the conditions prevailing in connection with the various industries of the Colony, and the results of such inquiry will be found in the series of reports, of which the accompanying form an instalment.

An investigation of the kind contemplated by the Act having never before been attempted in the Colony, it was feared that trouble of no ordinary kind would be encountered in persuading employers and others, from whom information was desired, to assist the inquiry. Some difficulty was certainly experienced before many would recognise that an exact knowledge of the industrial condition of the working classes was a matter of State concern, but great readiness was displayed in affording information within the scope of the inquiry, when its nature came to be understood. In no case has recourse been needed to the penal provisions of the Act, a most gratifying circumstance, seeing that from their nature some of the questions touched upon somewhat tender ground.

In the special report of each industry attention has been for the most part confined to the hours of labour, the regularity of employment, the accommodation provided for workers, their wages and earnings, the employment of women and children, and other cognate subjects.

With regard to the displacement of labour by machinery, the return upon capital invested, and other matters not touched upon in these reports, a considerable mass of useful information has been gathered. This it is proposed to embody in a general report, embracing all the leading industries, which will follow the special reports now being compiled.

T A. COGHLAN.

Report No. 1.—The Tailoring Industry.

As the manufacturing industry employing the greatest number of hands, and moreover, as the one popularly supposed to be more open to abuse than any other, and also as embracing greater variety in the circumstances under which work is executed, tailoring was selected as the first industry regarding which inquiry should be made. This inquiry has been of the most searching character, no detail being omitted, and no available source of information neglected. Whenever necessary assistance was sought from employers, from workers, and from the labour organisations or their officers. This has in most cases been freely afforded, and it is believed that nothing of material consequence within the knowledge of the persons and bodies mentioned has escaped attention.

The method of carrying on the tailoring trade in Sydney presents some striking peculiarities. The factory system has not yet assumed large dimensions, by far the greater portion of the work being done by "outside" or home-workers, who form a much more numerous class than the "indoor" or factory hands. The conditions of the homeworkers was therefore looked upon as of equal importance with that of the factory hands, and received a considerable share of attention.

Under the heading of Clothing Factories are included—(1), the large establishments in which "slop" clothing is made wholesale; (2) the workshops in connection with retail businesses in which most of the work is done to measure for the order trade; and (3) private residences where many hands are engaged on order, slop, or contract work.

ACCOMMODATION.

In the principal factories the accommodation provided for the workers is as exhibited in the following table, from which a fairly correct idea may be formed of the amount of care and attention bestowed thereon:—

	Fair.	Inferior.	Bad.		Fair.	Inferior.	Bad.
Cubic space	13	5	0	Approach	15	3	0
Floor space	13	5	0	Sanitary			
Ventilation	13	5	0	arrangements	18	0	0
Cleanliness	15	3	0	Light	12	6	0

The trade is carried on principally in the upper storeys of retail houses and stores, where many appliances and arrangements needful for the comfort of the workers are wanting. In five factories out of eighteen inspected the workers are unduly crowded; in three the premises are dilapidated and dirty; in five the ventilation is unsatisfactory, and in most the keeping of stoves for pressing operations in rooms where many hands are working all day long is the cause of much discomfort. In six establishments the workers are under great disadvantage owing to the deficiency of light in their workrooms. In other respects sanitary arrangements in factories are fairly good, though privacy and convenience demand more attention than they receive in some cases.

A highly objectionable feature is the entire absence of any precaution against fire, no provision being found in any factory either for the prevention or extinction of fire, or for the escape of the employees in case of danger.

In workshops attached to retail businesses the accommodation is generally inferior to that in factories, and the information regarding them may be summarised as follows:—

	Fair.	Inferior.	Bad.	Very Bad.		Fair.	Inferior.	Bad.	Very Bad.
Cubic space	23	19	1	0	Approach	19	17	5	2
Floor space	23	19	1	0	Sanitary				
Ventilation	19	20	4	0	arrangements	25	15	0	3
Cleanliness	19	18	5	1	Light	28	15	0	0

It is believed that these forty-three workshops, employing about 1,300 hands, of whom nearly 900 are women, fairly represent the different types to be found in Sydney. As a rule, the accommodation provided is inadequate, in regard to both ventilation and sanitary conveniences. At one place, where five men and twenty women are at work, there is only one small closet for general use; and the same undesirable state of things exists in another case, while in a third the sanitary conveniences are in connection with a large arcade, where the closets for both sexes adjoin, and are only separated by a corrugated iron fence 6 feet high, and open at the top. In two other instances the closets used by female workers are common to all the other occupants of the buildings to which they are attached, wherein many businesses, employing a large number of persons of each sex, are carried on. Unfortunately, as the law stands, it is impossible to compel owners or occupiers of premises unprovided with suitable conveniences to remedy the defect; and as the causes of complaint have in most cases existed for a long time, it is vain to expect that they will be remedied by the voluntary action of the parties concerned, who, for the most part, think their duty to their workpeople extends no further than the payment of their wages.

As in the larger factories, so in these workshops, no attempt is made in any case to supply facilities for the prevention, extinction, or escape from fire, although in large shops some degree of security may be found in the appliances provided for the protection of their retail branches. Some of the approaches to the workshops are dark and dingy, the stairways rickety, and lighted by gas during the day, and so steep and narrow as to be practically useless as a means of escape in the event of panic arising from an alarm of fire. In factories and workshops alike the absence of precautions against fire is a matter of the greatest importance, demanding immediate attention. Although in a few instances the ventilation is sufficiently good to keep the workrooms tolerably cool, in most the temperature is often uncomfortably and unhealthily high in the summer, and no means are provided for supplying warmth in winter. For the greater comfort of the workers some reform in these respects is urgently required.

The clothing trade has grown very rapidly, and has now expanded far beyond the capacity of the existing accommodation. Of all the factories examined only one has been built especially for the trade, and the arrangement and necessary conveniences are therefore more or less faulty throughout. In connection with "order" shops, the accommodation is, generally speaking, bad, those doing the better class of business providing, as a rule, the poorest housing for their employees. Amongst the small, low class shops, the accommodation being almost everywhere bad, descriptions of a few may serve as examples of the many; one for instance is an establishment comprising a small shop with equally small premises attached. The workroom in which a few girls are employed is not unlike a loft in appearance, having a sloping

sloping corrugated iron roof, destitute of any intervening ceiling to protect the inmates from the heat of the sun. This workroom is approached by a steep stair terminating in a trap-like opening. Another shop consists of a narrow space from 15 feet to 20 feet long by 5 feet wide. Originally it was an open passage way between two buildings, along which the drainage was carried off. The space has been roofed in with glass, and forms the workroom for six girls and one man. A third workshop is situated in a back yard, barely raised above the level of the wet and muddy ground, and too closely surrounded by other buildings to admit the free circulation of pure air. Another is a barn-like structure, in every respect unsuited to female workers.

DIVISION OF LABOUR.

During recent years the trade has undergone many changes, and a marked tendency is now apparent to divide the numerous processes in the manufacture of clothing into distinct crafts. Formerly a beginner was not considered to have mastered the trade until able to make, not only the whole of a single garment, but every part of an entire suit. The number of workers now reckoned "complete" in any one article is comparatively small, and a coat, vest, or pair of trousers, before being finished, must generally pass through the hands of four or five persons. This division of labour is naturally most complete in the large slop factories, where the different classes of workers are close together, and the least time is lost in passing the work from one to another. The greater number of "complete" hands belong to the class of home-workers, although not a few are found among those who work in order shops.

As this division of labour is yet only in the transition stage, great difficulty has been experienced in arranging schedules of wages and prices paid for piecework. There exists also much confusion of terms used in the trade, the work of a "machinist" or "finisher" in one shop differing from that of workers under similar titles in another, while both may differ from outside hands passing under the same designations. This confusion of terms adds to the difficulty of accurate classification of work and the earnings of workers.

CLASSIFICATION OF WORK.

The manufacture of clothing comprises three main classes of work:—

- (1.) The ordinary slop clothing found in all soft goods stores.
- (2.) Uniforms and clothing for public services made under contract with the Government.
- (3.) Clothing made to measure for the order trade.

RATES OF PAYMENT.

Slop clothing is made almost entirely by machinery, and the rates of payment are consequently low. A great deal of the work is of the roughest description, and the hands employed upon it the least qualified by skill and experience. Government contract work is also mostly done by machinery, but the quality of the material as well as the workmanship is better and commands higher pay than slop work. In the order trade the range of quality and workmanship is great, varying with the standing of the business and the character of its connection. With this range in the class of the work and the quality of the material there is necessarily considerable variation in the rates of payment, but there is no great difference in the prices paid for work of the same class by different employers. As a general rule factory indoor hands are on weekly wages, home-workers and order hands are paid by the piece. Cutters, pressers, improvers, and apprentices are usually weekly hands, but it is sometimes the practice to include pressing in the work to be done "by the piece." It is also sometimes customary for workers to find their own sewing cotton, thread, and silk, and this rule is general with regard to home-workers and order hands, the employers occasionally buying the thread wholesale and retailing it, as far as can be judged, at wholesale rates. Cotton and thread for trouser making costs from 1d. to 1½d. per pair.

The large factories are employed chiefly in the manufacture of the class of wearing apparel called "slops," which maintains a vigorous struggle for the command of the local market with goods of a similar kind imported from England and elsewhere. The strength of the English made goods lies wholly in their cheapness, that of the local production in greater suitability in shape and make to local taste. To gratify this it is found that purchasers are willing to pay for clothing made here, from 10 to 15 per cent. above the price of English goods of the same class. When the cost of cutting, trimming, and putting together bears a high proportion to the total value, as is the case with goods of the cheapest class, the importer commands the market, but when the material is of higher value the proportionate cost of labour diminishes and the local manufacture is able to hold its ground against the imported article so long as the difference in value does not exceed the margin above mentioned. The following tables show the relative cost of labour in London and Sydney in making a pair of trousers, (1) requiring 2½ yards of cloth at 1s. per yard, and (2) the same quantity at 3s. 6d. per yard, with the addition of 12½ per cent. to the value for import and other charges.

(1.) Cost in London—	s. d.	Cost in Sydney—	s. d.
2½ yards cloth at 1s.	2 6	2½ yards cloth at 1s.	2 6
Making up	1 4	Import expenses	4
	3 10		2 10
Add import expenses, say.....	5½	Making up	2 3
Price in Sydney	4 3½	Price in Sydney	5 1
(2.) Cost in London—	s. d.	Cost in Sydney—	s. d.
2½ yards cloth at 3s. 6d.	8 9	2½ yards cloth at 3s. 6d.	8 9
Making up	1 6	Import expenses	1 1
	10 3		9 10
Import expenses.....	1 3½	Making up	2 6
Price in Sydney	11 6½	Price in Sydney.....	12 4

The difference between the two values in the first case is about 20 per cent., but in the second only about 8 per cent, while the cost of labour compared with that of the product delivered in Sydney, is:—

- (1)—In London 31 per cent.; in Sydney 44½ per cent. (2)—In London 13 per cent.; in Sydney 20¼ per cent.

The

The cost of labour is from 75 to 100 per cent. greater in Sydney than in England, the amounts paid for making the same kind of clothing being as follows:—

Cost of making in London.		Cost of making in Sydney.	
	s. d.	s. d.	s. d.
Sac coats	2 6	3 6	6 6 to 7 0
Tweed trousers	1 2	1 6	1 9 „ 2 6
Tweeds suits	5 6	6 6	10 6 „ 12 6

When the price of the locally made clothing is more than 15 per cent. above that of the imported article, the question of cheapness overrides that of taste, and the imported goods are preferred. But when the material is of better quality and higher value, the cost of locally made goods can be kept within the margin named, and the local manufacturer can successfully compete with the importer. The duty to be levied under the new tariff on woollens will, however, somewhat modify these figures. For instance, the sale price of the London-made article given above as 4s. 3½d. will be raised to 4s. 8¾d., and the locally-manufactured clothing will cost 5s. 4¼d. instead of 5s. 1d., thus reducing the margin between the imported and home-made goods to 13¾ per cent., as compared with 20 per cent., the previous difference; similarly with the higher-class article—clothes which formerly cost 11s. 6½d. and 12s. 4d. will now probably realise 12s. 8¼d. and 13s. 3¼d. respectively, reducing the difference from 8 per cent. to 4½ per cent., and consequently bringing the cheap goods manufactured in the Colony within the purchaser's 15 per cent. margin of preference, the more costly goods being already within this preference before the imposition of the tariff.

EARNINGS.

There is very great difficulty in arriving at an estimate of the actual earnings of the different grades of workers in the different classes of work, especially when it is found that payments are calculated on different scales in different establishments, and the extras, allowances, and variations to be considered are almost endless. In the slop trade the rates paid depend upon a number of small particulars affecting each class of clothing, and there are at least four classes of ordinary slop trousers, and three of coats and vests, while “boys” and “youths” still further multiply the varieties. Exclusive of cutting and pressing, the rates paid for piece work are approximately as follows:—

	s. d.		s. d.
Coats.—Sac, stitched, from ..	2 6 each.	Trousers—Youths.....	13 0 per dozen.
„ bound ..	3 9 „	Boys	7 0 „
Walking ..	7 6 „	Vests (exclusive of buttons and buttonholes.)	
Overcoats ..	5 0 „	No. 1, ..	8 0 „
Trousers—No. 1, ..	7 0 per dozen.	No. 2, ..	12 0 „
No. 2, ..	10 0 „	No. 3, ..	18 0 „
No. 3, ..	13 0 „	Youths ..	12 0 „
No. 4, ..	18 0 „	Boys	9 0 „

The maximum payment for No. 4 trousers has been stated at 30s. per dozen, but very little slop clothing at this rate is manufactured, and 20s. per dozen may be taken as an outside estimate of the rate paid for this class of goods. The highest rate paid for making vests is also said to be 30s. per dozen, but it is very seldom that any firm pays more than 18s. per dozen for bound, and 13s. for stitched vests. In coats there is a wide margin for “extras,” but not much “slop” work is to be found at more than 4s. 6d. each, bound, and 3s. 9d. stitched.

The wages for factory hands, paid by the week, can be much more easily arrived at. The rates paid are as follows:—

Cutters	from 40s. to 100s. per week.	Improvers	from 7s. 6d. to 17s. 6d. per week,
Trimmers	„ 30s. „ 70s. „	Apprentices	„ 2s. 6d. to 10s. „
Pressers	„ 35s. „ 80s. „	Buttonhole hands—	
Deliverers	„ 60s. „ 70s. „	Machinists } M. ... from 17s. 6d. to 40s. „	
Examiners	„ 60s. „ 65s. „	} and	
Machinists	„ 45s. „ 80s. „	Finishers } F. ... „ 12s. 6d. „ 25s. „	
„ (fem.)	„ 15s. „ 40s. „	Complete (manual labour) from 25s. to 55s. „	
Finishers	„ 18s. „ 40s. „		

The range covered by these figures is very great, corresponding with the range in skill and experience possessed by the hands and in the class of work they are called upon to perform.

In the “order” trade work by the piece is paid at the following rates:—

Coats (exclusive of cutting) ..	from 7s. to 39s. each.
Vests ..	„ 4s. 6d. to 10s. each.
Trousers ..	„ 3s. 3d. to 13s. 9d. per pair.

A great deal of work is done at much lower prices under the name of “order” goods which are really more of a “slop” character. The above figures, however, can be taken only as the merest generalities, as there are almost endless variations in time, and consequently in the remuneration, required for making any garment affected by the taste of purchasers, which is not a matter that can be reduced within the limits of set rules. The rates of wages among indoor workers in factories, do not fluctuate very much, and the wages of outside workers who have followed the same avocation for a number of years have varied but little. A woman of ordinary skill can make an “order” coat in about twelve hours, a vest or pair of trousers in seven hours, and the average earnings of inside hands in the order trade will be about equal to those of the best workers in slop factories.

Information has been obtained in respect to nearly half the hands employed in order shops, and it would appear that during the past twelve months their average earnings have been £2 12s. for every week, or portion of a week, worked. This average gives for a person in full employment £135 a year. Unfortunately, in regard to the very important point of the amount of compulsory idleness which tailors engaged in the order trade have to submit to, the information is very conflicting; the executive officers of the union assert that the term of enforced idleness is not less than twenty-two weeks in the year, while the employers maintain that this period does not amount to more than six weeks, other idle time being voluntary or due to sickness. In the opinion of the agents employed in this inquiry, the time which an ordinary hand, willing to work, is compelled to remain unemployed is somewhere about eight weeks in the year, so that the earnings during twelve months amount to £114, which, distributed over the whole period, gives—instead of a possible £2 12s.—a weekly rate of £2 4s.

£2 4s. This last-mentioned sum happens also to be the average earnings of all the tailors working for more than half the year, regarding whom particulars have been received. In connection with the question of average earnings, it is proper to remark that the amount stated (£2 12s.) does not represent the actual sum earned by any considerable body of men. There are many men who with every opportunity do not earn more than £2 a week in ordinary hours, while on the other hand the number is by no means small whose weekly earnings rarely fall below £3 10s.

HOURS OF LABOUR.

The hours of labour generally observed in factories are about $8\frac{1}{2}$ per day on five days, and $4\frac{1}{2}$ on Saturday, overtime being paid at the rate of pay and a half. During the busy season, just before Christmas, many factories work overtime at these rates, but the period is of short duration. The employees in factories usually begin work at 8.30 or 9 a.m., the interval allowed for dinner being three quarters of an hour. In most of the order shops the hours worked are $8\frac{1}{2}$ per day for five days and 6 on Saturdays, making a total of $48\frac{1}{2}$ hours per week; but pieceworkers are permitted to complete at home work not finished within ordinary hours, but receive no more than the ordinary rate; in this way about $2\frac{1}{2}$ hours per week more are worked, making an average of 51 hours per week altogether. Cutters, trimmers, and pressers are seldom required to work overtime, and on such occasions receive regular overtime pay. Very long hours are not the rule in the trade, except among certain classes of outside workers, in reference to some of whom it is stated that, in the neighbourhood of Surry Hills, Goulburn and Foveaux Streets, the machines may be heard all night long, and sometimes even on Sundays.

FINES, &c.

The custom of inflicting fines for breaches of rules, so common in other parts of the world, does not obtain in Sydney. All work is examined by a person appointed for the purpose, and, if not passed by him, is returned to the worker to be amended. In most cases the worker is fairly and sensibly treated, but it is alleged, and perhaps with good reason, that some masters use their power of rejection as a means of defrauding their employees—an abuse which, however, does not seem to any great extent.

EARNINGS OF HOME-WORKERS.

The earnings of home-workers was one of the questions dealt with in the present inquiry upon which a large share of attention was bestowed. A considerable mass of evidence has been obtained, from which may be formed a tolerably accurate estimate of the amount a person of average skill may earn by working only the ordinary hours of the trade. The home-workers are for the most part women, from whose statements of the rates paid for the different classes and kinds of work, and from the time allowed by experienced hands as sufficient for doing such work, it is estimated that their earnings throughout the year average from 20s. to 22s. 6d. per week. In this average are included many whose earnings fall far below, as well as those whose weekly wages greatly exceed that amount.

The rate of pay for home-workers does not greatly differ from the sum needed by a single girl of that class to maintain herself in moderate comfort. A woman with a family to support must work at the same prices as a single girl of equal skill and reliability. The same rule obtains in factories and shops, where no one ever receives higher wages for any reason independent of the work to be done. A woman may have aged parents dependent upon her, or by the death or sickness of her husband may be suddenly called upon to provide food, clothing, and shelter for a family of young children, but she will be able to obtain no higher pay than a single girl possessing equal qualifications in regard to the work, and with no wants or desires to satisfy except her own. Even when she can secure the best paid work it is everywhere plain that the woman who has others dependent upon her can earn in reasonable hours no more than will be barely sufficient for her most pressing wants. The result is what might naturally have been expected. Women who have families to support, finding themselves unable to earn sufficient for their needs in factory hours, do not seek factory work, but devote themselves to outside piecework, and, as they themselves express it, work late and early to make ends meet. When it is remembered that the earnings average $4\frac{1}{2}$ d. per hour there will be little difficulty in estimating what working "late and early" may mean to a woman with a family of four or five depending upon her, especially as she may be subjected to continual interruption by reason of the demands of her domestic duties, and has necessarily to lose several hours every week in receiving and returning work. To earn thirty shillings, about the smallest sum capable of supporting with decency herself and a family of four, she may be compelled to work 12 or 14 hours a day in addition to the time devoted to her household affairs.

The best and most reliable among the workers can earn from 30s. to 40s. per week, but there are others, and by far the greater number, whose earnings range from 10s. to 15s. per week. This disparity arises from the existence of a great number of unqualified and incompetent workers, who rove about from factory to workshop, and finally gravitate into the ranks of the poorest paid home-workers, or into the employ of the lowest class of sub-contractors. That so many incompetent hands should be employed in the trade is accounted for by the absence of any regular system of apprenticeship, many girls seeking to make a living as tailoresses who have never undergone any proper training to fit them for the work.

The tendency to a minimum wage already resulting from the existence of this large body of incompetent workers, is still further aggravated by the competition of women not wholly dependent upon their own earnings. For example, there are numerous cases where married women whose husbands earn fair wages seek to increase their incomes by tailoring work, and it is by this class that the minimum price for piecework is most frequently accepted.

OUTSIDE WORKERS.

In addition to the number of homeworkers with whom the factories and workshops have dealings, there is another larger class of outside workers who maintain themselves by assisting home-workers, or by working for sub-contractors. The wholesale soft goods houses, which supply the retail shops with ready-made clothing and other goods, are the chief patrons of the factories. The cloth supplied by them is first cut to measure by the factory cutter, and then distributed to the various workers, indoor and out, who make up the goods. It is the custom for the factories to deal with only a small number of the outside hands

hands, for, though some hands themselves complete the work they receive, many of the workers are responsible for much more than they actually perform. In the homes of the persons responsible to the factory small companies of tailoresses, ranging in number from two to twelve or more, work together, either on co-operative principles, or on weekly wages, or as apprentices to the chief workers. In most instances the chief worker is a woman, and the work done is taken on sub-contract.

This system has many objectionable features, and is obviously open to very grave abuses, natural results in most cases of the conditions which require that work shall always leave something in every hand it passes through. But the stoppage of outside work, if it were possible, while it would cure some of these evils, would also shut out from employment, or at least greatly inconvenience, many deserving workers, particularly women with young families or other helpless dependents upon their labours.

SWEATING.

Though the clothing trade is by no means free from abuses, it is, so far as can be ascertained, free from the grinding down of the workers, which has made tailoring a by-word in other parts of the world. Rumours of the prevalence of "sweating" in Sydney have been both plentiful and persistent, and their substantial truth has been avouched by apparently trustworthy persons. When tested, however, their assertions were found to be based on mere hearsay evidence, and, though the names and addresses of some few so-called sweaters were given, the accusations have not been sustained by the evidence obtainable. To get at the truth no pains were spared. Domiciliary visits were made to houses pointed out as "homes of the sweaters, where the hands are kept at work all night long," and to factories where "children of tender years are employed," but revealed nothing to substantiate the charges. Polish and other Jews in particular have been frequently denounced as the greatest offenders, but, though employed in the trade in large numbers, they are for the most part respectable workers, the charges against them being utterly unjust and without foundation. The persons employed by the Jewish tailors are rarely of the nationality of their masters, being of the same class as those finding employment in the ordinary shops of the city; and their wages and hours of labour will compare not unfavourably with those of their fellow-workers in more pretentious establishments. Visits were paid to eighteen so-called Jewish sweating-dens, and it was found that, in addition to the proprietors, there were employed therein some seventy-two hands,—twenty-one males and fifty-one females,—all engaged in tailoring. Seven of the males and fourteen of the females were apprentices, whose wages ranged from 2s. 6d. to 15s. per week, according to their skill and length of service; the average being 7s. 9d. for boys and 9s. 2d. for girls. The wages of the men varied between 25s. and 80s. per week, the general average being 51s. The women, other than apprentices, receive from 15s. to 45s. per week, and the average wage for all employed is 24s. 6d. per week. In the majority of cases the hours are on five days from 9 till 6, with the usual interval for dinner, while in one or two instances work begins at 8 o'clock; on Saturday work is suspended at 1 o'clock, but proprietors admitted that in cases of urgency jobs on hand would not be laid aside until 3, 4, or even 5 o'clock in the afternoon. In most cases the proprietors and their wives do not profess to be themselves bound by any regular hours, indeed it is probable they occasionally work far into the night if they have urgent work on hand, and the click of the machines betraying the fact that work goes on during the whole night is no unaccustomed sound in certain localities, but inquiry disclosed nothing worse than a man, his wife, with now and then a hired assistant, working against time to finish garments wanted in a hurry.

The system of sub-letting, shown by this inquiry to be the one mainly in operation here, is doubtless the cause of a great part of what has been said about sweating. In common parlance, the term "sweating" is understood to mean the practice of taking contracts by middlemen, who sublet them at a price so low that the unfortunates who do the work are compelled to toil for extremely long hours to make a scanty livelihood. But though most of the factories are practically sub-contractors, such a system of cutting down prices is almost non-existent here, and few instances have been found in which the hands are prejudiced, or where those most deeply interested express dissatisfaction. This last-mentioned circumstance, however, proves nothing, since it is from the victims of oppression that opposition to reform generally proceeds.

In cases where work goes on throughout the night or for many hours with little intermission, it is certain that such a press of work is preceded and followed by slack times. If an order is required at short notice extraordinary hours are worked to finish it in time, but the mean duration of daily labour throughout the year is not excessive; and there is no question of the coercion of the workers, who are tolerably independent of control, and whose overtime is entirely optional.

It is very difficult to define exactly the term "sweating" as used in the trade and by the public, but if the definition given to the London Board of Trade is accepted, and sweating is considered to be "a system under which sub-contractors undertake to do work in their own houses or small workshops, and employ others to do it, making a profit for themselves by the difference between the contract prices and the wages they pay their assistants," it is obvious that many will be included who are perfectly innocent of any suspicion of sweating, unless it is assumed that the sub-letting of a contract cannot be consistent with fair wages and perfect justice to the workers. When a contract passes from one intermediate agent to another the first may fairly be said to sweat the contract for his profit, but the last, who makes profit by cutting down the wages of the workers, is "the sweater" in the language of the trade. In London the investigation of this subject was resisted and opposed by the sweaters and their victims alike, both parties regarding the inspectors who conducted the inquiry as their common enemy. It may well be that a similar prejudice has exerted its influence here also, but though many workers, particularly women, suffer great hardships, and their wages are often lower than they should be, it is impossible to admit the existence in Sydney of any abuse approaching the conditions prevailing in London and elsewhere. Sanitary and other conveniences are frequently deficient, sometimes even very bad, but there are no "dens" or "hot-beds of infection" like those spoken of in connection with the London sweating atrocities.

EMPLOYMENT OF CHILDREN.

On account of rumours, and even definite assertions, that many children of unlawful age were employed in factories and workshops, particular attention has been directed to the matter, and every effort made to test the truth of these and other statements, but nothing confirmative has in any case been discovered. On several occasions young girls, apparently not more than 12 or 13 years old, were questioned on the point, and all except one gave their age at over 14 years. These children were apprentices, some of whom are doubtless under 14 years of age, but the number is certainly small. MORALITY.

MORALITY.

With regard to the specific charge of immorality which has been alleged against tailoresses as a class, the evidence proves that it is entirely without foundation, and that their standard of morality is as high as that of the rest of the community. This is a pleasing circumstance, seeing that dangers of an exceptional character assail them, especially in connection with the sanitary arrangements of many workshops, which, not being such as to encourage modesty or self-respect, afford many opportunities to those so disposed to take advantage of them.

Other abuses in connection with the trade have been alleged to exist, but the evidence elicited by this inquiry has failed to substantiate them.

WAGES AND PIECEWORK.

The impression prevailing that workers engaged by the week have an advantage in wages over those who work by the piece is based upon the supposition that the rates are governed by different principles, whereas the fact is that under both systems the rate is fixed by the same principle, and daywork and piecework are merely different methods of buying and selling given quantities of labour. Hence, in the tailoring trade, whilst it is customary to pay by the piece those who take work to be done in their own time or at their own homes, and by the week those who work in factories, yet both classes of workers will in all cases earn the same amount in the same time if they are equal in all other respects. Under existing circumstances piecework is a necessity here, because the room available in factories is not equal to the accommodation of one-third of the hands employed, and, in the absence of any law regulating workshops, the conditions of work for outside hands are likely to be preferable to those of the ordinary factory.

APPRENTICESHIP.

By the Act 8 Victoria No. 2 children over 12 years of age may be bound in apprenticeship to "any householder, tradesman, or other person exercising any art, mystery, or manual occupation," but in the clothing trade, so far as young girls are concerned, this Act is not taken advantage of. In some few cases girls are legally bound for a fixed period to learn some special branch of tailoring, but as a general rule between masters and their so-called apprentices there is no agreement other than a verbal one, and this is broken as easily as it is made. The number of such apprentices in order shops runs from two to six, and in the slop factories there are often more, from 13 to 15 years of age, who sometimes receive no pay for the first three or six months, sometimes 2s. 6d. per week, gradually rising to 10s. in about two years. The only branch of tailoring regularly taught is the making of coats, which may be learnt thoroughly in from two to three years. It is a common thing for a young girl to go to a factory for a few weeks as an apprentice, and then, though by no means qualified, to seek elsewhere a position as improver, often accepting wages below the current rates for improvers, but higher than those paid during the early days of apprenticeship. Wandering from shop to shop, and picking up a more or less imperfect knowledge of the trade in this precarious way, such girls usually become home-workers' incompetent assistants, working for low wages because they have not qualified for full rates. Workers and employers alike admit the magnitude of the evil, but, in the absence of any provision against the employment of young children not legally apprenticed, there is no way to overcome their rooted objection to submit to the irksome restraints of indenture for a fixed period.

The deficient supply of competent workers, as well as the superabundance of those at best but poorly qualified, is a serious disadvantage to the clothing trade, directly traceable to the want of a proper system of apprenticeship. To the same cause is due the unjust practice of some employers of keeping young girls on a very small wage long after they deserve more, and dismissing them if they ask for an increase. On both sides the system is abused, and the need for reform is becoming urgent.

GENERAL REMARKS.

Though suffering at certain times from slackness, and, especially on the approach of Christmas, from over-pressure, employment in the clothing trade is fairly constant throughout the year, a large number of hands being kept in steady work by the Government contracts alone. In dull seasons some slop factories keep their hands employed on order work for country stores, distributing it among the most competent workers, the less efficient ones mostly suffering from lack of employment at such times.

The provision of separate workrooms is a very necessary reform, which might easily be effected. Workrooms common to both sexes, where long hours are spent in any sedentary occupation, are at all times most objectionable, for though whilst work is going on good order may be maintained, when discipline is relaxed during the interval allowed for dinner, the conduct especially of the males is too frequently offensive. In some of the large factories this difficulty is met by setting apart a large room for the use of the female employees during the dinner hour, an arrangement which should be enforced wherever practicable.

In these days of labour unions the clothing trade is of course not without its own organisations. In connection with different branches of the industry there are four unions: The Cutters' and Trimmers' Union, with forty-three members; the Amalgamated Journeyman Tailors' Association, with 350 members; the Tailoresses' Union, and the Pressers' Union.

REPORT No. 2—Dressmaking.

OF the many branches of industry connected with the manufacture of women's apparel by far the most important is dressmaking, which affords employment to a great many workers, whose numbers probably amount to several thousands, though on this point exact information will not be available until the tabulation of the census returns is completed.

ACCOMMODATION.

The making of dresses is carried on largely in conjunction with the sale of materials by retail drapers, but the bulk of the work is done by persons specially designated by the term "dressmakers," whose business is carried on independently of any other trade. Some few factories also engage in dressmaking to a small extent. In the large retail shops, where it is customary to make costumes from materials sold over the counter, though the sanitary arrangements are in some instances defective, the accommodation provided is generally good, except that in six only, out of the seventeen inspected, has a separate room been allotted for the use and comfort of workers during the midday interval for rest and refreshment. Nearly 700 women and girls are employed in these shops, and the provisions for their health, comfort, and convenience may be classified as follows:—

	Good.	Fair.	Bad.	Very bad.
Light	7	7	3	0
Ventilation	7	6	4	0
Cubic space	7	7	2	1
Sanitary arrangements	7	6	3	1
Heating	2	4	0	0

In the smaller retail shops the conditions under which work is carried on are for the most part unsatisfactory, the workrooms, besides being in many cases too small for the health and comfort of the occupants, are insufficiently lighted, badly ventilated, untidy, and dirty. The sanitary arrangements are generally defective, separate conveniences not being provided, and it might be assumed that most of the proprietors are ignorant of the necessity of paying some attention to privacy, decency, and cleanliness, were it not for the efforts made by them to conceal from the agents employed in this inquiry the existence of the discreditable conditions under which their employees work.

In establishments where dressmaking alone is carried on the provisions for health and comfort are better in character, the premises being in most cases good private dwelling-houses, and, although in a few instances the hands are somewhat crowded, on the whole the accommodation is fair, as represented in the following table:—

	Good.	Fair.	Bad.	Nil, or not classified.
Light	7	10	0	2
Ventilation	4	13	1	1
Cubic space	5	10	3	1
Sanitary arrangements	5	6	0	8
Heating	0	2	0	17

The accommodation in factories, where the making of dresses forms but a small portion of the work done, will be dealt with in connection with the trades constituting the bulk of their business.

Dressmakers who work in their own homes, either entirely on their own account, or on piece-work for shops trading in women's apparel, form a large proportion of those engaged in this industry, and one or more of this class may be found in almost every street in the city, and in every town and village in the country. They work alone, or employ one or two assistants, in small rooms, usually in small terraced-houses or cottages, where the light and ventilation are often bad, and the accommodation generally of an inferior description. In the eighty-one establishments whose conditions have been investigated, 214 girls and women were employed, of whom 100 were principals and 114 assistants.

APPRENTICES.

Except in the classes under the technical branch of the Department of Public Instruction, which are attended by very few professional dressmakers, there is no proper system for teaching or learning dressmaking. In these classes two terms of the first year are devoted to measuring and drafting the separate portions of dresses, and one term to cutting and fitting them; during the second year instruction is given in practical dressmaking, and pupils who pass through the entire course should acquire sufficient knowledge and skill to enable them to cut, fit, and make up complete dresses of any material. But under the system in vogue among dressmakers the apprentices seldom acquire a sound knowledge of even one branch of the business. Many employers will not take apprentices, and in cases where they are taken, without indentures, on verbal agreements not always adhered to, and paying no premium, employers care very little whether the girls learn or not, being generally of opinion that little recompense is likely to be reaped for time and attention bestowed on so-called apprentices, who are at liberty to leave, and frequently do leave, without a moment's warning. As a rule, apprentices have little to do but run errands and wait upon other workers, their progress in the art of dressmaking depending largely on the quickness of their powers of observation and imitation. Their term of probation varies from six months to two years, but one year is the period most commonly agreed upon. A desire for change, impatience of restraint, or dissatisfaction with their employer, very often impels girls who have served a short period as apprentices in one shop to leave and engage in another as improvers, and it is a matter of common complaint that they know nothing of their business and must begin afresh. On the other side it is complained that employers frequently keep girls on apprentice wages long after they are qualified for a higher rate, and dismiss them as soon as they ask for remuneration more commensurate with the work they perform. In two years, girls of ordinary intelligence should be fully competent in at least one branch of the business, but a term of three years is recognised as necessary for complete proficiency. It might reasonably be supposed that most girls would learn plain sewing before aspiring to work demanding skill, but it is asserted that when entering their apprenticeship comparatively few

few know how even to hold a needle properly. Owing to the desultory teaching and defective training of apprentices there are a very great many half-taught, and consequently incompetent, workers who, as oft-times happens, are condemned by their lack of skill to labour on a wage hopelessly inadequate to their maintenance, and more inadequate still to the number of hours of work required of them.

HOURS OF LABOUR.

The prevailing hours of labour are from 9 a.m. to 6 p.m., with an hour, or three-quarters of an hour, for the midday recess, and from 9 a.m. to 1 p.m. on Saturdays. In a few houses 2 p.m. is the closing time on Saturdays, in some it is 3 p.m., and in others the same hours are observed as on other days. Out of thirty-four representative establishments forty-four hours are said to constitute a week's work in nineteen, forty-five hours in three, forty-six hours in three, and forty-eight hours in nine. These, however, are merely the nominal hours according to the statements of the employers, and fall far short of the actual number of working hours passed by the girls employed in many of these establishments.

The hours of labour of home-workers are governed only by their own circumstances; some who are under the necessity of earning as much as possible, or who work slowly, must work from ten to twelve hours a day, but the average working time of the whole class is considerably less than that of the shops. Out of eighty-one cases investigated, less than forty-four hours make a week's work in three, forty-four in thirty-five, forty-five in twenty, forty-six in four, forty-seven in three, and forty-eight in sixteen. In exceptional cases, where women are their own mistresses, their voluntary hours of labour extend even to eighty hours a week.

OVERTIME.

The greatest grievance among dressmakers' assistants is the system of overtime work, under which they are detained in the workrooms long after the proper closing time. It is asserted by many of the girls that they are called upon to work two or three hours' overtime two or three nights a week, and sometimes more; but the employers deny that such is the practice, though they admit that occasionally the hands are detained to finish orders promised at a certain hour, and that overtime is considered necessary for a week or two about Christmas or Easter. Only two employers admitted that overtime is frequent, the others almost unanimously asserting that it is seldom, if ever, necessary. Evidence on this point is very conflicting, that of work-girls as to overtime in shops where they are now employed being contradicted by their employers, who absolutely deny that the girls are kept later than 6 p.m. There is no doubt that the evidence of many employers in this regard is unreliable, and that overtime is the rule in most dressmaking establishments, and it is significant that, since this inquiry commenced, in not a few cases the practice has ceased, circumstances pointing to the probability that it has been suspended but not abandoned.

In cases where overtime is not brought about owing to the deliberate intention of employers to exact the greatest possible amount of work at the least possible expense, it may arise from (1) the accumulation of orders, (2) cases of emergency, or (3) the thoughtlessness of customers who neglect to give their orders until the last moment, without reflecting that work-girls must perhaps toil far into the night to finish them in time; or who fail to keep punctually their appointments for "trying on" their dresses, but nevertheless expect them to be finished in time. It is highly discreditable that the last is so frequently the cause of needless overtime work, for in such cases the girls waiting for a dress to be tried on are kept working at odds-and-ends until it is returned to them, when they must perforce toil long and late to regain the time thus wasted by the careless neglect or indifference of the customer.

It is pleasing to record that in some establishments the girls are treated more justly, the regular hours are strictly observed, extra hours of freedom next day are allowed in compensation for extra hours of work on the rare occasions when such are necessary, and the employees are not compelled to extend the hours of work beyond the number paid for. On the other hand, the proprietors of some large establishments, as well as many small shopkeepers and homeworkers, compel their employees to work without proper intervals of rest long hours beyond the time for which they are supposed to be paid. In these places the girls sometimes eat their luncheon without even leaving their seats, and immediately resume work, hurrying on in order to be earlier released, for experience has taught them that, when the job in hand cannot be disposed of within the regular hours, but can be completed that night, when 6 o'clock comes they will still be kept stitching wearily on till 7, 8, 9, or even 11 o'clock, before they may quit their work. The possible effect on the morals of young girls of compelling them to traverse without protection the midnight streets of a large city, and the injury inflicted on their bodily health by the overtime system, are very obvious evils. After bending for ten or twelve hours over their sewing, girls are too weary to have much appetite for their food, and on the morrow they rise unrefreshed to face the same monotonous routine of excessive toil, with insufficient food, rest, and exercise. Saturday is frequently the most trying day of all, because, expecting to be free at 1 o'clock, they take no lunch with them, and on such occasions it is an ordinary occurrence that they pass the whole day, from the morning till the evening meal, without refreshment of any kind. It is therefore not to be wondered at that few of the girls are robust, or that many exhibit signs of delicate health.

In large establishments the regular hours are sometimes observed in one room and not in another, because the power to keep the girls overtime rests largely in the hands of the forewoman of each room, who is expected to obtain a fixed result on the work done. The one-sidedness of the contract between employers and employed in this industry is well exemplified, in certain establishments, where the girls are fined half a day's pay if they are ten minutes late in the morning, and fined again on the flimsiest pretext, but, on the other hand, are compelled to work overtime without pay, and also in slack times to accept compulsory holidays on the same terms. The greatest sufferers in this direction are those entirely dependent on their earnings for subsistence, the exigencies of whose position silence their protests and compel them to submit to what they know to be injustice and oppression.

Payment for overtime is seldom offered, even in cases where extra hours are most common, employers claiming that, since the workers are sometimes absent and no deduction from their pay is made for public holidays, they may reasonably be expected to do extra work when it is required. For the credit of the business it is fortunate that exceptions to this odious rule are found in four establishments, where double rates are paid for overtime, and in a few other cases where pay at the rate of 6d. an hour and upwards is allowed. When detained too late to take tea at home the girls are most often paid from 3d. to 1s. for that meal. Even where overtime is paid for, however, parents, out of regard for their children's moral and physical well-being, strenuously object to the system.

WAGES.

WAGES.

Apprentices usually serve without pay for the first half-year, and receive 2s. 6d. a week for the second, though sometimes they are paid 2s. 6d. per week for the first three months, and 5s. per week for the remainder of their term, while in a few cases they receive no pay during their apprenticeship. The weekly wages of other hands in the large retail establishments inspected are as follows :—

	Highest.	Lowest.	Average.
Improvers	12/6	3/6	7/10
Skirt-hands	22/6	11/6	15/9
Bodice hands	25/-	12/-	18/-
Sleeve hands	25/-	15/-	18/-
Machinists	27/6	12/6	22/-
Heads of tables	50/-	25/-	31/-
Skirt-drapers	60/-	30/-	37/-
Head dressmakers	140/-	30/-	71/-

The position of head dressmaker is frequently one of great responsibility, the promotion, as well as the wages of subordinates, usually resting entirely in her hands; heads of tables also have considerable authority over the employees, the allotment and supervision of the work being part of their duties. Machinists who receive more than 20s. per week are usually expected to provide their own machines, which is tantamount to a reduction of wages by the hire of a machine, generally about 2s. or 2s. 6d. per week.

In dressmakers' shops the weekly wages are lower, to the extent of about 10 per cent., than those paid by the large retail drapers, the rates paid being as follows :—

	Highest.	Lowest.	Average.
Improvers	16/-	5/-	6/10
Skirt hands	25/-	7/-	14/5
Bodice hands	25/-	10/-	16/-
Heads of tables	30/-	25/-	28/6
Head dressmakers	100/-	20/-	58/-

But few head dressmakers or heads of tables are employed in this branch of the industry, those functions being usually discharged by the proprietors themselves. Wages vary greatly in the different shops, and there is, besides, a wide range in the payments to workers of the same designation, the rate changing with the degree of skill and competence. There is always something new to learn in dressmaking, and girls who are quickest to follow the changes of fashion have but little difficulty in obtaining the highest rates. Excellent work is, nevertheless, sometimes poorly paid, unscrupulous employers being prompt to take advantage of the necessities, the helplessness, and the unorganised condition of this class of workers.

Between the small suburban retail shops and the home-workers there is keen competition, and to make the competition effective there is a general tendency to reduce wages to the lowest possible figure, the highest wage paid to an assistant by a home-worker never exceeding 20s. per week, and even this amount is given to very few, the average rates being as follows :—

Apprentices (excluding those not paid)	2s. 6d. per week.
Improvers	7s. 8d. „
Skirt hands	11s. 5d. „
Bodice hands	13s. 8d. „
Complete assistants	16s. 0d. „

Improvers are paid from 4s. to 16s. per week, skirt hands from 7s. 6d. to 15s., and bodice hands from 9s. to 18s., while persons describing themselves as complete assistants have been found working for 7s. a week. It is however frequently the case that girls doing the same kind of work are called "improvers" in one place, and "complete assistants" in another. In the employ of home-workers who have been visited there were twenty-one apprentices, some of whom were receiving no pay, and others up to 4s. per week, the average being 2s. 6d. per week.

Excluding the small but highly paid classes of head-dressmakers, skirt-drapers, and forewomen, and also the numerous class of apprentices receiving merely a nominal wage or no pay at all, the average wage per week for ordinary hands in retail establishments, is a fraction over 14s.; in dressmakers' shops it is 12s. 8d.; and taking the two classes of shops together it is 13s. 8d. These figures are based on the experience of nearly 700 workers, and may be accepted as fairly indicating the average rate of weekly wages prevailing in the trade. The average rates for the superior grades alone are 49s. 3d. and 41s. 6d. in the two classes of shops respectively. Including all classes of dressmakers, from improvers at 5s. a week, up to head-dressmakers at £7, the average wage all round is 17s. 6d. per week.

Dressmakers working in their own homes usually earn more than they would if employed in shops, for when a connection is once formed work is fairly plentiful and sufficiently profitable to afford them a frugal subsistence. The average gross income for seventy-five houses visited is 65s. 5d.; but after paying assistants' wages, and making allowance for cases where two or more members of a family share in the proceeds, the average net income per head is 39s. 9d. per week.

Comparing the earnings of home-workers employing paid assistants with the earnings of those who employ none, the average net incomes per worker are 47s. 4d. and 31s. 5d. per week respectively. The assistants employed number about 2.5 per house, earning an average of 9s. 7d. each; or excluding nine unpaid apprentices, 10s. 5d. each per week. It would therefore appear that the advantage the homemaker derives from employing assistants is equal to 15s. 11d. per employer, and dividing by 2.5, the average number of assistants, this gives a profit to the employer of 6s. 4d. per week for each assistant employed.

EARNINGS.

EARNINGS.

The earnings of employees in dressmaking establishments at the weekly rates given above are affected by the fact that there are usually two slack periods in the dressmaking year, one in June and July, before the spring fashions come out, and one from December to February, before summer dresses begin to give way to autumn and winter costumes. At such times it is customary for employers to reduce their expenses by granting compulsory "holidays" for a week or a fortnight, or even longer, to most of their ordinary hands, that is, to all whose places could not readily be filled at short notice. Many girls being thus out of employment for a month or more every year their average earnings do not exceed £32 or £33 per annum. The greater number of the girls live with parents or relatives, and their earnings are usually subsidiary to the household income, but in some instances the small wage they earn forms the sole means of subsistence of girls thrown upon their own resources, a meagre pittance capable of affording them but little comfort. Very often girls profess to be independent of the necessity of following any trade, their parents being able to keep them, and that the desire for employment alone induces them to engage in dressmaking. This is for the most part a pleasing illusion, not confirmed by the fact that they are unwilling participants in the overtime system. Workers of the higher grades usually receive liberal salaries and maintain themselves in moderate comfort on their earnings. With the desire of learning to make their own clothes some girls take places in dressmakers' shops and work for a wage little more than sufficient to cover travelling expenses to and from the shop, and, long after attaining competent knowledge in that respect, such girls have been known to continue working merely for lack of distraction and occupation at home. Girls whose entire subsistence must be provided by the work of their own hands are obliged, when they can procure it, to take work to be done in the evenings not spent in gratuitous overtime work for their employers, but at the best they can earn no more than will suffice for the barest necessities of life. Their position becomes truly pitiable in slack times, when compulsory "holidays" are given to all whose services are not indispensable, and among these girls there is perhaps as much genuine hardship and suffering as anywhere else in the community.

COUNTRY DRESSMAKING.

As a rule, country dressmakers are slightly better off than metropolitan workers in the business, and their surroundings are in many respects superior. The establishments are usually small, the greatest number of assistants being employed by retail drapers, but the great bulk of the work is done in their own homes by independent workers, who rarely employ more than two or three assistants. In drapers' shops one good head dressmaker usually has entire charge of the work, at a wage of from £2 10s. to £5 a week, sometimes receiving, in addition, a bonus or percentage of the profits. The average weekly earnings of country dressmakers are as follows:—

Improvers	8/8
Bodice hands	19/3
Skirt hands	19/7
Head dressmakers	67/-

Improvers, however, are comparatively rare, apprentices generally serving two years in one establishment, and becoming fully qualified assistants on the completion of their term of probation. They pay no premiums, but learn the business thoroughly in all its branches, and receive higher wages than in Sydney, their pay usually being 2s. 6d. per week for the first half-year, with 2s. 6d. per week added for each half-year following.

PROFITS FROM DRESSMAKING.

As carried on in dressmakers' shop, and by independent home-workers, it has been seen that the business is fairly profitable, affording a fair income, especially in cases where paid assistants are employed. On the other hand, it is said that no profit is derived directly by retail drapers from the dressmaking department, which is carried on solely as a means of promoting sales in the retail department, proprietors, without exception, maintaining that so long as workrooms show no great loss, they are content with the profits derived from the sale of materials at retail prices. The books of some establishments certainly show a loss on the dressmaking, and in other cases the profits earned were small compared with the other branches of draper's business.

In the workrooms attached to the large retail drapers' establishments the most skilful artists commanding the highest salaries are employed, the highest average wages are paid, and the dresses made require the highest finish, and are, therefore, longer in hand than those of an inferior class. In dressmakers' shops the principals perform all the more expensive kinds of work, employ no highly paid assistants, and pay lower wages than the retail shops; their work does not require a high finish, and they can get through more work in a given time. These considerations are sufficient to account for the anomaly that retail drapers make little or no profit directly from dressmaking, while those who depend entirely upon it for their subsistence do find it remunerative.

HEALTH, &c.

On account of the confinement, the constant application, and the want of fresh air and exercise, the occupation of the dressmaker is not conducive to health. Long hours of work in a stooping position on seats which admit of little change of posture, in rooms during the summer too hot, during the winter too cold for comfort, and very often insufficiently ventilated, are sufficient to undermine even a strong constitution. Where girls are required to work overtime, especially on Saturday afternoons and evenings, when debility from want of food is superadded to the exhaustion and fatigue of incessant work for twelve or fourteen hours without rest, the evil effects soon make themselves visible in the pallid cheeks and lips, and other unmistakable signs of physical degeneration. In addition to this, no change of costume is insisted on in workrooms, so that girls who may be saturated with rain on their way to work in the morning are allowed to sit and work all day in wet clothes, and perhaps are even expected to go through
three

three or four hours of overtime in that state. Where the workers are not unduly pressed, have regular hours for food and rest, and their regular Saturday half-holiday, their health does not appear to suffer to any serious extent; on the contrary, many who have been a long time in the business declare themselves to be so far enamoured with it that they would be quite unable to give it up, and that it entails no injurious effects upon them, except from overwork.

Special attention has been directed to the investigation of charges of immorality levelled against dressmakers as a class, but as might have been expected these charges are found to be built up on the slenderest foundations. It is a universal experience that those who struggle to maintain themselves by honest industry have too much self-respecting pride to descend to such degradation, and that those whose self-respect is gone have no desire for steady industrious effort. Houses exhibiting external signs of connection with the business, but whose true character has become immediately apparent, have occasionally been observed, and to these are doubtless due the imputations referred to. As a rule, girls compelled to support themselves by their own exertions maintain a noble fight against immense odds, and work with an energy and perseverance beyond all praise.

Lying advertisements for numbers of assistants of various grades, inserted by employers who really want none, for the purpose of conveying a false impression of the magnitude of their businesses, and described by them as "tricks of trade," are a frequent cause of annoyance and disappointment to an industrious class of workers who deserve better treatment than to be subjected to expense and loss of time for the mere purpose of giving a fictitious inflation to a collapsing business.

REPORT No. 3—Millinery.

MILLINERY is a less complicated and extensive industry than dressmaking, and affords employment to a much smaller number of persons. It is carried on sometimes as a distinct business, sometimes as an auxiliary to the dressmaking, but principally in connection with drapery establishments, as a means of promoting the sale of material in the retail department. The goods manufactured are for "order" and "stock," terms which are sufficiently self-explanatory, and between these the demand is about equally divided. There is also a small class of contractors who trim large numbers of hats and bonnets for wholesale firms. When the summer or winter fashions are coming in there is sometimes a rush of employment, and hundreds of dozens of hats or bonnets of a particular shape or style are required as quickly as they can be made. The wholesale houses supply shapes and all materials except linings, which are furnished by the contractors, who sometimes carry on business as retail milliners, but usually have no shops, doing the work in their own homes or in rooms hired for the purpose.

ACCOMMODATION.

Whilst the provisions for the health, comfort, and convenience of workers are not in any instance decidedly bad, there is still much room for improvement, especially in connection with the sanitary arrangements. In twenty-seven establishments, important enough to be separately noted, the accommodation may be classified as follows:—

	Good.	Fair.	Poor or no provision.
Light	13	10	4
Ventilation	15	8	4
Cubic space	13	9	5
Sanitary arrangements	9	11	7
Heating	4	4	19

HOURS OF LABOUR.

The usual hours of labour for milliners are from 9 a.m. to 6 p.m. on five days a week, with an hour's rest at midday, and 1 p.m. on Saturdays. In one or two cases 6 p.m. is the closing time on every alternate Saturday, and in others on every Saturday, the reason for these long hours being that customers frequently require alterations to be made at once in hats or bonnets purchased during the afternoon. In cases where milliners act as sales-women their duties in the latter capacity detain them till 10 p.m. on Saturdays.

OVERTIME.

The specified hours are observed with great punctuality, and overtime occurs only on the rare occasions when a pressing order must be completed by a given time. For this reason, as well as for its tasteful and artistic character, the business is highly approved by parents, who prefer that their daughters should not keep irregular hours, nor be compelled to return home unprotected at late hours of the night. Extra pay is not given when overtime does occur, and only one establishment allows tea money on such occasions.

DIVISION OF LABOUR.

Independent milliners generally keep shops for displaying their goods, and act both as sales-women and head milliners, but in a few cases the principals attend only to the sale of materials, and employ qualified assistants for the millinery department. The other grade of workers are apprentices, improvers, trimmers, or assistants, forewomen or heads of tables, and head milliners. In some of the large city drapery shops the head milliners are, properly speaking, managers of the millinery department and head sales-women, who buy all the materials required for the shop, and supervise the general working of the department, but do no actual trimming themselves. In some of the smaller retail shops, where the millinery business is not sufficient to occupy the full time of the assistants, when work is slack, and in the evening when sales at the counter are brisk, they act as sales-women, and generally receive higher wages than are usually paid to trimmers.

APPRENTICES.

Apprentices are never bound by indenture, but are taken on verbal agreements between parent and employer. They are seldom admitted under 14 years of age, and their term of probation, usually completed in one establishment, ranges from six months to two years. From three to four years are required to gain proficiency as a trimmer, beyond which grade the chances of promotion are very remote. In some establishments apprentices are taught something of the business, but in others are made use of to wait upon the more advanced workers, and are left to pick up the business as best they can. They are given only the simplest and roughest work until they have had considerable experience, and it is only when they possess natural ability and quickness that a share of the better work falls to their lot. The majority have no special natural gifts, and their promotion is consequently slow.

IMPROVERS.

Owing to the high place this industry holds in their estimation girls rarely fail to complete the term of apprenticeship with their first employer, and are generally desirous of remaining in the same service as improvers—a desire not always gratified, because of the excessive supply of this class of labour. Excepting those who display talent above the average, probationers must serve from one to two years as apprentices, and from one to four or five years as improvers. In the superior grade there is consequently a large body of fairly competent milliners who do the work of trimmers, but are called improvers, and receive improvers' pay. On the other hand, if they display more than ordinary talent their promotion is rapid enough until they become trimmers, when the openings for further progress are distinguished by their rarity.

WAGES.

WAGES.

Apprentices in some establishments receive no pay during their term of probation; in others, none for the first three, six, nine, twelve, or eighteen months; and in four only of the cases inquired into are they paid from the beginning, the wages being 1s. 3d. per week for the first, and 2s. 6d. per week for the second half year in one case, and 2s. 6d. per week for the first year in the remaining three. In the absence of indentures the conditions are regulated by the employers on their own particular systems; and there is, on that account, considerable diversity and great difficulty in forming an accurate general estimate, but it may be accepted as a rule with few exceptions that 2s. 6d. and 5s. are the wages paid about the end of the first and second years respectively. In one case a lump sum of £2 10s. is paid at the end of the first year to ensure completion of the term, no allowance being made for any shorter period.

For improvers the range of payment is from 4s. to 15s. a week in most cases, though in houses where no pay is given until the term of apprenticeship is complete they usually start on 2s. 6d. a week, rising to 7s. 6d., or it may be 10s., a week about the end of the second year. The greater number of houses give 10s. a week as their maximum for improvers, those who receive more being possessed of more than average ability, and reaching the grade of trimmers without undergoing any long terms of probation in the inferior grades. Trimmers, or assistants of exceptional talent, capable of filling positions of responsibility, may sometimes receive as much as 30s. a week, but the highest rate, in most cases, is from 20s. to 25s. a week for first-class hands, the ordinary wages being from 12s. 6d. to 15s. a week, though 10s. a week is by no means rare. Details have been obtained concerning the wages paid at a number of establishments employing altogether 168 hands, consisting of 84 improvers, 58 assistants, 13 forewomen or heads of tables, and 13 head milliners and head saleswomen. The rates of payment for these were obtained from the employers, and are set out in the following table side by side with the rates obtained directly from 81 employees, of whom 36 were improvers, 28 assistants, and 17 forewomen.

Class.	Employers' Statement.			Employees' Statement.		
	Highest Wage.	Lowest Wage.	Average.	Highest Wage.	Lowest Wage.	Average.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
Improvers	0 15 0	0 4 0	0 8 6	0 12 6	0 2 6	0 7 1
Assistants	1 10 0	0 10 0	0 17 8	1 5 0	0 7 6	0 15 5
Forewomen	2 15 0	1 10 0	1 16 0	3 10 0	0 17 0	1 16 8
Head milliners	5 0 0	2 0 0	3 0 0

A comparison of these statements indicates that the wages of improvers and assistants range between lower figures, and that the range for forewomen is between wider figures than those given by the employers. In the most fashionable establishments the head milliners and forewomen are not seldom brought direct from London or Paris, and in such cases of course receive payment on the highest scale.

EARNINGS.

Girls engaged in the millinery business are generally fairly educated, and belong to a class accustomed to the enjoyment of a considerable degree of comfort. As a rule the parents or relations with whom they reside are fairly well-to-do, and assert that their girls go to business not so much for the sake of earning money as for learning a useful accomplishment likely to be of service in the family circle. They are seldom entirely dependent upon their earnings, except in the higher grades, where the income is usually sufficient for comfortable existence. For those who have no other means the wages in the lower grades are utterly inadequate, and are not improved by the custom in many large houses of giving holidays in the slack periods, during the months of February and August. This compulsory idleness extends for from two weeks to a month, and must add materially to the troubles and difficulties the workers have to endure. The fact that but few of them are supported by their own earnings is, in part, responsible for the general complaint among trimmers that they are underpaid, for girls who have other means are willing to work for less than those who have not. The number ready to accept almost any terms is largely in excess of the requirements of the industry, so that, under existing conditions, the grievance admits of no simple remedy. The rate of wages is affected to a considerable extent by the existence of a number of semi-amateur workers, with whom the amount of pay is of less importance than a knowledge of the practical part of the business with which they desire to become acquainted, but with no intention of devoting themselves to it as a means of earning their livelihood.

HEALTH, &c.

In striking contrast with the pale and sickly looks of those who are subjected to much overtime work, and the consequent long hours of fasting and fatigue, a bright and healthy appearance is one of the most noticeable characteristics of milliners, and bears testimony both to the wholesomeness of their occupation and to the injury inflicted upon those who are deprived of their proper amount of rest and nourishment. Millinery work is lighter, of a less trying nature, and carried on under more favourable conditions than any other similar industry. The operatives usually occupy a somewhat higher social standing than the majority of girls employed away from their homes, and with few exceptions they reside with their parents, who appear to be well able to maintain them in comfort. Employers and forewomen in authority over them speak highly of their conduct and morality, and inquiries in other directions generally sustain the favourable opinion expressed by them of the girls engaged in the millinery industry.

REPORT No. 4.—Whitework and Various Articles of Clothing, &c.

INCLUDED under the general technical denomination of "whitework" are many articles made of calico, linen, holland, and similar materials, and comprising women's underclothing, children's clothing, house linen, &c., the manufacture of which is generally carried on in factories or workshops attached to drapery establishments, and also to a considerable extent in the private homes of the workers. It forms, however, but a portion of the work, other articles, such as blouses, mantles, babies' flannel gowns and hoods, women's morning wrappers and cloth coats, children's print dresses and pinafores, dust cloaks, holland aprons, Crimean shirts, &c., being largely manufactured in the same places. The conditions in connection with the making of these articles and of "whitework" are in no way different, and it will therefore be convenient to deal with them both at the same time.

ACCOMMODATION.

The provisions for the health, comfort, and convenience of the workers in factories and workshops are on the whole very satisfactory. In all the larger establishments the workrooms are spacious, well lighted, and well ventilated, and in two of them there is a separate luncheon-room, where tea is provided for the operatives. In one case the workers complain of the sanitary conveniences, which are merely partitioned off from the workroom, and are at times very obnoxious, especially to those who work closest to them, but generally speaking the conditions in connection with the factories are fairly satisfactory, though with some notable exceptions, including the establishments of certain Syrian manufacturers, who cater for the supply of goods to Indian and other hawkers. In one of these a most offensive smell pervaded the workrooms, and the surroundings generally were filthy and disgusting; in another the conveniences were in an abominably dirty state, and gave forth a sickening stench, highly suggestive of danger to the public health. Strange to say, the girls employed in these places, who are all machinists, earning a smaller average wage than the operatives in any other establishment examined, and who are surrounded by conditions so very much the reverse of enticing, express their satisfaction with employers and employment.

DIVISION OF LABOUR.

In this branch of the sewing industry there are two main classes of workers, employees in shops and factories, and "home-workers." Factory operatives as a rule, are regularly trained in the business from apprenticeship upwards, the regular gradations among those who do "white work" being apprentices, improvers, finishers, machinists, forewomen, and cutters. There are also mantle-cutters and assistants, who usually do no other kind of work. Of all grades there are in the factories and workshops examined about 400 hands, the greatest number in any factory being 100, and in any workshop, seventy-one, the fewest numbers being ten and two respectively. Considerably more than half the entire number are machinists, the next in proportion being improvers, and the next apprentices. It is impossible to form any idea of the number of home-workers who take work from factories and shops to be done in their own homes, and in their own time. Few of them have served any regular apprenticeship, and there is no division of labour among them, all operations being generally performed by the same hands, except in the rare instances where apprentices or assistants are employed. They are mostly widows, or wives whose husbands are prevented by sickness or other causes from maintaining their families. In such cases upon the wives and mothers, in addition to their ordinary household and family cares, falls the burden of providing the means of subsistence. Among them are women of refinement reduced by misfortune from a position of comparative affluence to an incessant hand to hand struggle against poverty, whose condition is all the more pitiable because their desire to conceal the fact that they work for their living is generally regarded by employers as a reason for paying them lower wages. Many distressing cases have come under observation where such women, with all the responsibilities of supporting their families, in addition to their household work, have toiled twelve and thirteen hours a day at their needles, and even then earning an excessively small pittance totally inadequate to their labour, or to provide the barest necessities of life.

HOURS OF LABOUR.

In factories and workshops the hours of labour usually observed are from 8:45 a.m. to 6 p.m., with half-an-hour for lunch, on five days, and to 1 p.m. on Saturdays, making a total of forty-eight hours per week. In some places an hour is allowed for lunch and the week's work occupies from forty-four to forty-five hours. Overtime is very rare, and when it occurs the hands usually receive a bonus of 6d., or 4d. for tea, and a proportion of their ordinary wages, or the amount they earn on piecework. In the slack period near the end of the year a holiday of about a fortnight, without pay, is usually given by the factories to all but the indispensable hands, a practice seldom objected to by the girls, except when they are inconvenienced by the temporary cessation of their earnings.

Homeworkers' hours of labour are subject only to the will or the necessity of the individuals, and even they themselves can seldom give more than an approximate estimate of the number of hours daily devoted to sewing. They are subject to numerous interruptions from their household and family duties, and it is frequently necessary for them to work late at night in order to earn their daily bread. The comparison of a large number of cases shows that their hours per week vary from forty to seventy-eight, and that fifty-eight hours make an average week's work amongst them. It is a noteworthy fact that, notwithstanding overwork and microscopic remuneration, they are still able in many cases to keep their homes clean and respectable, even while they themselves are but scantily fed.

WAGES.

WAGES.

In factories and workshops some of the hands are on piecework, but the majority receive weekly wages, the rates paid in five establishments, employing altogether 254 hands, being as exhibited in the following table:—

Grades.	1				2				3				4				5				Total hands.	General average Wages.
	No. of hands.	Wages.			No. of hands.	Wages.			No. of hands.	Wages.			No. of hands.	Wages.			No. of hands.	Wages.

" on piece-work . . .	3	25/-	12/-	16/4	3	25/-	12/-	16/4	3	25/-	12/-	16/4	3	25/-	12/-	16/4	6	22/6	10/-	13/6	9	14/5
Forewomen . . .	2	40/-	40/-	40/-	2	40/-	40/-	40/-	2	40/-	40/-	40/-	2	40/-	40/-	40/-	2	40/-	40/-	4	50/-	
Cutters of white work . . .	2	60/-	40/-	50/-	1	35/-	35/-	35/-	1	60/-	60/-	60/-	1	35/-	35/-	35/-	2	45/-	45/-	7	47/2	
" mantles	1	100/-	100/-	100/-	1	100/-	100/-	100/-	1	90/-	90/-	90/-	1	35/-	35/-	35/-	1	45/-	45/-	3	75/-	

In addition to the hands included above, eighteen mantle-makers' assistants are employed, receiving 30s. to 15s. a week, an average of 18s. 6d., also twenty machinists, 20s. to 15s., an average of 16s. 8d. per week, and ten machinists on piece-work, 20s. to 9s., an average of 11s. 9d. each per week. Of all grades there are in these establishments 318 hands, receiving an average weekly wage of 13s. 10d. each, or, excluding fifteen cutters and forewomen whose average weekly wage is 53s. 8d., there are 303 workers on an average wage of 11s. 10d. each per week. A strict record is kept of the work done by each hand in a factory, so that if a worker on weekly wage fails to complete a sufficient quantity of work in the week she is at once put on piece-work or dismissed. Those on piece-work again, if it is found that they can earn high wages at certain work, are not infrequently put on weekly wages, an arrangement affording a higher percentage of profit to the employers. The amount each worker should earn for her employer differs in each factory, the value of the work done usually ranging from 30 to 100 or 200 per cent. above the wages paid for it; the worker who receives 12s. per week earning from 4s. or 6s. to 12s. or 24s. a week for her employer. For stitching on piece-work the price usually paid in factories is 1s. per 100 yards, and a smart worker can do about 1,200 yards a week, averaging 2s. a day. At mattress-making the sum a quick and skilful worker can earn in a week ranges from 16s. to 20s. at 4s. per dozen, but ordinary hands cannot make more than 2 to 2½ dozen a week. If the price paid for piece-work were calculated on a fixed standard of relation to weekly wages the system would be relieved of one of its worst features; but in factories where work is done in great part by the piece employers usually offer work to the piece-hands at a price per dozen, and then take contracts from the wholesale houses to supply the articles in large quantities at a price calculated to leave themselves a large margin of profit, in which the worker does not participate. In this way the earnings of piece-workers are reduced to the lowest figure that will afford a bare subsistence, employers relying on the reluctance of the hands to refuse work until the insufficiency of the remuneration has been demonstrated by personal experience.

From operatives engaged in various factories, and numbering altogether less than fifty, the following statement of wages have been obtained, the averages of which are, on account of the small number compared, somewhat different from those given in the preceding table.

Grade.	Weekly Wages.		
	Lowest.	Highest.	Average.
Apprentices	£ s. d. 0 2 6	£ s. d. 0 2 6	£ s. d. 0 2 6
Improvers	0 5 0	0 5 0	0 5 0
Finishers	0 7 6	0 13 0	0 8 10
" on piece	0 12 6	0 15 0	0 13 6
Machinists	0 6 0	1 10 0	0 16 2
" on piece	0 9 0	0 19 6	0 12 8

EARNINGS OF HOMEWORKERS.

Homeworkers are engaged in all branches of needlework, either working alone, or with other members of their own families, though occasionally they employ one or two assistants as apprentices or improvers. Their earnings vary considerably, the lowest return for a week's work being 2s. 3d., and the highest 72s; but these are both exceptional cases, ordinary rates ranging from 8s. to 20s. a week, or, allowing for cotton, travelling expenses, machine-hire, &c., from 6s. to 15s. when in full work. Homeworkers do not receive the same rates as factory hands, but for less than machinists' pay must do the work of both machinist and finisher. A few years ago there were no factories or middlemen, and the workers dealt directly with the wholesale firms, and were much better off than they are at present. The establishment of factories, where the work is done by steam-driven machinery, has materially affected their position, for they are necessarily sufferers to the extent of the factory proprietors' profits, and also from the reduction of prices by competing factories. They are also generally less skilful than trained factory operatives, and have not the advantage of steam power to drive their machines, consequently their work is much more fatiguing and requires longer hours than factory work. A good general notion of the articles they manufacture, their hours of labour, and rates of remuneration may be gathered

gathered from the annexed table, compiled from the statements of homeworkers employed for factories and for retail shops:—

Employees.	Hours per week.	Gross earnings.	Articles made.	Price per dozen.	Employees	Hours per week.	Gross earnings.	Articles made.	Price per dozen.

			60	60	12/6

Excluding five abnormally high and two exceptionally low earnings the average gross weekly wage for the remainder is 14s. 9d.; but from this must be subtracted, for travelling and other expenses and deductions, an average of 3s. per week, leaving an average net weekly wage of 11s. 9d. per head for homeworkers. The above list discloses remarkable variations in the earnings of different workers at the same work, one receiving 13s. 6d. per week for making children's pinafores at 2s. per dozen, equal to 6 $\frac{2}{3}$ dozen per week, whilst another can earn only 2s. 3d. for 1 dozen. At blouse-making one earns 9s. a week at 6s. per dozen, whilst another earns 18s. a week at 3s. per dozen. The discrepancies in prices are due chiefly to differences in the quality of the work done, but to some extent to the fact that the higher prices are earned by operatives who obtain the work directly from the large retail houses, the lower prices by those who work for factories, and go far in support of the complaint everywhere urged by home workers that factory proprietors have made their business less remunerative than formerly. The differences in amounts earned by workers at the same articles are chiefly due to differences of individual skill.

APPRENTICESHIP.

The term of apprenticeship usually arranged for is from twelve to eighteen months, on verbal agreement only; wages 2s. 6d. per week for the first six months, except in one establishment, where no wages are paid during the first year. In factories there is no fixed rule of advancement but individual capacity, the term of probation for girls of exceptional ability being sometimes very short, as, for instance, in the case of a girl under 15 years of age who was earning 14s. to 15s. per week on piece-work within ten weeks of her admission as apprentice. Such examples are very rare; and, although it is perfectly true, as stated by a factory proprietor, that in six months a smart girl can earn from 15s. to 20s. a week and keep herself in comfort, the majority of girls are not smart, and their earnings, after a much longer probation, are generally less than 10s., seldom more than 15s., a week.

GENERAL REMARKS.

The conditions under which factory hands work are generally good, and there is in this occupation nothing prejudicial to health; but home-workers, who are compelled to work long hours on insufficient food and with unwholesome surroundings, find the extra fatigue of working their sewing-machines exercises a very injurious effect, though otherwise their work is not unhealthy. They are mostly of opinion that it is impossible for a woman to maintain a home, and difficult even to keep herself, on her earnings in this industry. The earnings of the younger operatives who reside with their parents form a welcome addition to the family income; but in cases where girls have to pay 10s. or more per week for lodgings they have seldom enough to keep them from week to week, and when any interruption in work occurs they are reduced to great straits. In the homes visited the conditions observed were as follows:—Good to very good, 20; fair, 13; poor to very poor, 16. Though signs of poverty were everywhere apparent, and the homes generally were situated in poor localities, they were clean and well cared for, except in cases where the housekeepers excused themselves for not keeping things tidy, by saying they could not spare the time from their work. Employers agree that the girls are respectable and of good moral character.

REPORT No. 5.—The Manufacture of Woollen Cloth.

VERY early in the century an attempt was made to manufacture cloth from wool grown in the Colony, first under Governmental auspices in the reformatory at Parramatta, and afterwards by Mr. John Lord in his mill at Botany. The amount of capital invested was but small, and the machinery of a very primitive description, but Mr. Lord's effort was attended with success sufficient to induce him to import new and improved machinery from Leeds. In 1830 Mr. Robert Cooper erected a much more complete and expensive plant at Blackwattle Swamp, but his investment proved unprofitable, and the industry was brought to a standstill, until in 1838 Mr. Cooper brought out from the West of England a number of weavers under a sort of co-operative agreement to make broadcloth at 6s. 6d. per yard, Mr. Cooper providing machinery and materials. This arrangement proved a temporary success, and the cloth manufactured brought from 10s. to 14s. per yard, but the hands quarrelled among themselves, the carding machines were damaged, and work was suspended. After a time the plant was removed to Stockton, where a losing struggle was carried on, till in 1857 the mill and machinery were destroyed by fire. Messrs. Raynor in 1838 started the Lachlan Mills near Randwick and afterwards removed to Emu Plains, where the industry was carried on from 1849 to 1870, when operations were suspended and finally abandoned. Other attempts have been made with tolerable success at Parramatta, Camden, Bowenfels, Clyde, and Sydney. The mills at Bowenfels and Camden have recently been reorganised and started afresh, and with those of Parramatta, Clyde, and Sydney, are now in full operation.

HANDS EMPLOYED.

During the past ten years the number of mills in operation has varied from 9 to 4, and the number of operatives from 385 to 155. In 4 of the 5 mills now in operation there are 145 hands, consisting of 75 males and 70 females. The following table shows the fluctuations in the number of mills and employees, and also in the output, from 1880 to 1890 inclusive:—

Year.	Mills.	Hands employed.			Output.
		Male.	Female.	Total.	
1880.....	8	114	100	214	353,100 yards.
1881.....	5	178	157	335	358,000 "
1882.....	8	266	119	385	319,225 "
1883.....	9	260	112	372	352,000 "
1884.....	7	175	137	312	305,000 "
1885.....	6	189	134	323	337,750 "
1886.....	8	104	78	182	324,788 "
1887.....	5	101	71	172	348,000 "
1888.....	5	117	60	177	241,000 "
1889.....	5	110	62	172	207,500 "
1890.....	4	94	61	155	310,000 "

DIVISION OF LABOUR.

Instead of having a great many different grades of operatives, as in the woollen mills of Great Britain and America, the industry has hitherto been attempted in this Colony on a scale so small that it employs only some five or six grades, consisting of carders and spinners, weavers, pickers and winders, washers, sorters and dyers, and finishers. Some of these perform the functions of two grades, and it may naturally be supposed are less effective in both than operatives who confine their attention to one function only.

HOURS OF LABOUR.

The hours of labour observed are from 6.30 a.m. to 5 p.m. on five days, and to 12.15 p.m. on Saturdays, with the usual intervals for meals, making in all 54 working hours per week. At the present time all hands are fully employed, and in one mill are working overtime to fulfil outstanding orders.

WAGES.

Weavers, who are mostly women, are generally paid by the piece, the usual price being from 3½d. to 6d. a yard, or an equivalent rate "by the warp." At these prices men can earn an average weekly wage of about 40s. and women about 25s. The other grades are on weekly wages, and are paid according to the following scale:—

Grades.	Carders and Spinners.	Pickers and Winders.	Washers.	Sorters and Dyers.	Finishers.	Weavers.
Men	30/- to 70/-	35/- to 45/-	30/- to 42/-	30/- to 50/-
Boys	8/- to 14/-	11/- to 20/-	11/- to 15/-	15/- to 20/-
Women	15/- to 20/-	16/-	17/- to 30/-
Girls.....	8/- to 14/-	8/- to 13/-

THE MILLS AND MACHINERY.

Out of the five mills now in operation four were formerly used as flour-mills, and are neither so convenient nor so well adapted for their present use as might be desired. Those with upper floors cause needless labour, and entail a considerable loss of time and expense in conveyance of materials to different parts of the mill. The only building designed and erected especially for a woollen mill has not been in operation for the past five years.

The

The machinery in use is of all classes and by different makers, and, generally speaking, obsolete, some of the looms working at little more than half the speed of modern looms, and utterly incapable of turning out high class cloth. Carding, weaving, warping, dyeing, and finishing, are operations requiring great care and skill, in order that the product when finished may not be deficient of any essential characteristic. None of these operations can be satisfactorily performed with the antiquated machinery in use at present, and the consequence is that the mills can only turn out an inferior class of cloth, at a low price, to compete against the imported article. In the attempt to manufacture goods of a higher class the faults of the machinery in use and other attendant circumstances involve so much needless expense that only failure has hitherto been met with. The total capacity of all the mills now in work is not equal to that of one fifth class English mill, a fact which points to the necessity of concentrating efforts to establish the industry on a firm footing, for it is useless trying to earn a fair return with insufficient capital and inadequate machinery. Even the largest of the mills achieves too small an output to afford a profit at all commensurate with the capital invested, and a glance at the following table will show the exceedingly small, almost insignificant, capacity of the various mills at work during 1890 :—

Mills.	Hands.	Cards.	Looms.	Spindles.	Picks per Minute.	Annual Output.
1	72	4	26	1,800	45 to 54	150,000 yards
2	34	3	14	1,200	50	90,000 „
3	14	1	8	600	50	20,000 „
4	25	1	8	800	60	75,000 „

With a gross possible output of 335,000 yards per annum the profit to be divided among these four mills would be so small a return for the capital invested that the proprietors could have but slight inducement to continue, were it not that the mills are worked in conjunction with clothing factories, enabling them to reap a second and perhaps more satisfactory return from the cloth manufactured in the mills.

REPORT No. 6.—Laundries.

THE laundry business of Sydney and suburbs is not an industry of any considerable magnitude, so far as the number of persons to whom it affords employment is concerned, but it assumes special importance by reason of its relation to the public health and of the various matters affecting the welfare of the employees which require attention.

ACCOMMODATION.

The structures in which the industry is carried on vary considerably in all their essential features, from the large well-appointed building, specially designed and constructed, with all the latest improvements in machinery and appliances, to the small half-open shed in the back yard of a private dwelling. The four establishments comprising the former class are clean, dry, and well drained, but the stables attached to them are, in some cases, not properly drained, as will be seen from the following table showing the arrangements in connection with them:—

Material.	Number of Rooms.		Horses in Stables.	Drainage of	
	Dwelling.	Laundry.		Stables.	Laundries.
Brick	4	4	Connected with sewer ...	Connected with sewer.
"	8	3	Inadequate sink	" "
"	4	7	3	Connected with sewer ...	" "
"	8	3	Not drained	" "

The conveniences provided for the workers in these establishments is in some respects highly unsatisfactory. It is true that cubic space, light, and ventilation are ample, except in the "hot rooms," to be referred to later, but there are no private rooms for the use of the women and girls, and the washers, who of necessity are compelled to change their clothing before and after work, must do so in the presence of the men and boys employed on the premises—an arrangement as unnecessary as it is offensive to modesty and decency. The sanitary conveniences are in some cases dark, dirty, and badly situated, and no separate provision is made for the women.

In the class of establishments not specially constructed for laundry purposes the accommodation so far as space, light, and ventilation are concerned, is generally ample, but the sanitary conveniences, though in some cases fairly good, are most frequently insufficient and inconveniently placed, and are used in common by both sexes. The washing-room floors are in many instances sloppy for want of adequate drainage, and very primitive contrivances are occasionally adopted to raise the workers out of the mud and water they would otherwise be required to stand in. In other respects the conditions where regular employment is afforded to a number of hands are as set forth in the following table:—

Laundries.	Construction.	No. of Rooms.		Stabling.	Drainage of	
		Dwelling.	Laundry.		Stables.	Laundry.
1	Brick.....	4	4	1 horse ...	Into lane at rear.....	Underground sewer.
2	"	3	3	1 " ..	Not drained.....	By street gutters 80 yards to sewer.
3	"	6	1 " ..	"	By street gutter 30 yards to sewer.
4	"	3	3	1 horse ...	Into sink beside the washhouse	" "
5	"	6	6	1 " ..	Not drained.....	By street gutters 150 yards to sewer.
6	"	3	5	2 horses..	"	By street gutter 50 yards to sewer.
7	Wood	5	3	1 horse ...	"	Into sewer.
8	Wood and stone ...	4	3	2 horses..	Into harbour	Into Harbour.
9	Wood	3	6	3 " ..	Not drained.....	Underground sewer.
10	Brick.....	4	3	1 horse ...	"	" "
11	Stone.....	8	5	4 horses..	Into sewer	" "
12	Brick.....	...	8	2 " ..	Not drained. Large heap of manure.	" "
13	Wood	4	2	None	" "
14	Brick.....	4	3	"	Into sewer.
15	Wood	5	2	"	Under floor of house by open drains into harbour.

In many small laundries, where a very few women are employed, the conditions observed were usually such as are found in the humbler class of private dwellings.

Drainage is plainly the weak point of the laundry business, especially in the suburbs, where connection with the sewerage system is in general a matter of more or less difficulty. In most cases the open gutters of the streets form the only channels for carrying off the filthy soapsuds from private dwellings, as well as from public laundries. Even these are not always available, for in one case it was found that the foul water of a laundry is poured into a sink in the washing-room, from which an overflow pipe leads under the floor of the dwelling-house, and how much further is a matter of doubt, but certainly not to any distance, for at the lower side of the house the water reappears, flowing out in several channels, crosses some 20 or 30 feet of open ground, and empties directly into the harbour. The nuisance arising from the offensive odour of soapsuds is a lesser evil than the danger to the public health from the putrefaction, under the direct action of the sun, of the animal matter they contain, and for that reason it might be well that steps should be taken to prevent unsuitable premises being used as laundries.

The

The drainage of stables connected with laundries is generally defective, only two having been reported as "well drained." Of the others many are not drained at all, whilst in some of the cases where drainage of a kind has been attempted the effect is worse than if nothing had been done. In one case the odour from stable manure and other refuse, steeped in stable drainage and trodden in wet weather into a pestilential and disgusting mash in an open yard, is distributed with the clothes dried in fine weather in the same yard.

HANDS EMPLOYED.

Excluding all the small half-time laundries and reckoning only twenty of the largest establishments, the numerical strength of the industry in the winter season is represented by about 414 hands, consisting of 48 males and 366 females. The number of males varies very little, but in the summer the number of females increases considerably, and the same establishments probably employ from 450 to 500 women and girls.

DIVISION OF LABOUR.

In the smaller laundries there is naturally very little diversity in the work done by the hands, who are generally speaking experts in all branches of the business. In those employing a great many hands, however, the work is minutely subdivided, each operation being performed by workers specially qualified and engaged for it, and called washers, wringers, starchers, starch-ironers, plain-ironers, shirt ironers, collar ironers, hangers out, folders, and sorters, names sufficiently descriptive to render explanation unnecessary. To enable them to decipher the marks on clothing and make out the list and account for each lot it is necessary that sorters should be able to read and write, and have some slight knowledge of arithmetic, and for this reason they are usually better educated than any other class of laundry employees.

WAGES.

Work is occasionally paid for by the piece, especially in the various grades under the head of ironing, but the ordinary basis of payment is time, the indispensable hands receiving weekly wages, and others a given rate per day for the number of days employed in each week. Shirt-ironers on piece-work are paid 1s. 3d. to 1s. 9d. per dozen, or 4s. for 2½ dozen; collar-ironers receive from 3d. to 4d. per dozen, and others according to circumstances. In laundries where machinery is used men employed as washers are paid from 27s. to 40s. a week; folders, 35s.; engine-drivers, 45s. to 60s.; firemen, 30s.; carters, 30s. to 45s.; handy men, 35s. to 42s.; boys, 10s. to 12s. The ordinary rates for the different classes of female workers are as follows:—

Class.	Daily Wages.		Average.	Weekly Wages.		Average.
	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.
Washers	3 0	to 5 0	3 8	16 0	to 30 0	21 0
Wringers	3 0	to 3 6	3 4	15 0	to 20 0	17 6
Ironers—Starch	4 0	to 5 0	4 8	20 0	to 30 0	25 9
" Plain	3 0	to 5 0	3 9	14 0	to 25 0	20 0
" Shirt	3 6	to 5 0	4 9	20 0	to 30 0	24 9
Hangers out	3 0	to 4 0	3 5	14 6	to 18 6	16 1
Folders	2 6	to 3 6	3 1	6 0	to 15 0	12 3
Sorters.....	42 0	to 60 0	50 0

HOURS OF LABOUR.

From 7.45 or 8 a.m. to 6 p.m., with an hour or three-quarters of an hour for the midday meal for all hands six days a week, are the hours usually observed in all the large laundries. Where the work is not sufficient to occupy full time the number of days is proportionately reduced, and some laundries work only two or three days a week.

OVERTIME.

In one of the largest laundries overtime work to the extent of fifteen hours a week for females and twenty hours a week for males, has been the rule until quite recently, and in others it has prevailed to a considerable extent, although small laundries do not as a rule work full time. The rate of payment for overtime is usually the same as for ordinary time, but in some cases 6d. per hour is paid to all hands alike. Folders, whose ages range from 14 to 17 years, do more overtime than any other grade, for the reason that their work begins only when the others have finished.

HOLIDAYS.

In the large establishments where work is constant, varying only between full time and overtime, it is not customary to allow the workers to have any public holiday but Christmas Day, and absence without leave on any other day is punished by instant dismissal. As there is in most cases a greater press of work towards the end of the week it is always more difficult to obtain leave of absence at that time than in the earlier portion.

BONUSES AND FINES.

In one laundry a system is in force of giving a bonus of 2s. per week instead of an increase of wages, professedly as a reward for regular attendance. Half of this bonus, and half a day's pay, are forfeited by absence for half a day, and all the bonus and a full day's pay by a day's absence, without notice. A day's notice leaves the forfeiture of the bonus at the discretion of the employer. The bonus and wages for the number of days of absence are forfeited by absence through sickness. The same employer discharges without notice, yet holds back the first week's pay to prevent employees from leaving without giving a week's notice. Then, if they are compelled to leave without giving notice, whether by sickness or any other necessary cause, they forfeit whatever wages may be due at the time the bonus, and this half week's pay in addition.

EARNINGS.

EARNINGS.

Workers engaged by the day are, in consequence of the nature of their work, idle for a day or two, some at the beginning, others at the end of the week, and their earnings are therefore proportionately reduced. Ironers, for instance, lose a portion of every week, and work an average of only five days, overtime included, earning an average of 22s. 6d. a week or an average wage of 4s. 6d. a day, whilst ironers engaged by the week receive an average of 24s. 3d. a week. Washers, on an average of 3s. 8d. a day, work only four and a half days a week and earn 16s. 6d., whilst those on weekly wages receive an average of 21s. The average earnings of all classes on daily wages amount to about 15s. 6d. a week, and of all on weekly wages to about 18s. a week, and the average week's work for all is very nearly five days a week. In some small laundries however the workers are rarely employed for more than two or three days a week, and their earnings are consequently much below this average.

DRYING ROOMS.

When the necessary space is available drying is carried on as far as possible in the open air, the roof of the laundry being sometimes utilised for the purpose, but a considerable portion of the drying must always be done indoors, even in fine weather. A hot room is therefore an indispensable adjunct to a public laundry, and several are attached to all the larger laundries. The "old style" of hot room is heated by furnaces or stoves, and labours under the defect of an unequal distribution of heat, clothes hanging near the fire being sometimes in danger of scorching, whilst those more remote do not dry quickly. The new style of hot room is heated by steam pipes, and is much more efficient and less expensive. In these rooms clothes are hung to dry on lines or "horses," the highest rungs being from 6 to 8 feet above the floor, and only to be reached by climbing on the lower. The temperature maintained is sufficient to dry a room full of clothes in about twenty minutes, and frequently produces evil effects on those subjected to it for any length of time. In some laundries, especially those using old style hot rooms, ironing is done in the same room, the irons being heated at the furnaces which heat the rooms, the comfort of the workers being studied less than economy of fuel and heat.

GENERAL REMARKS.

Clothes are collected for laundries from private dwellings, hotels, boarding-houses, ships, steamers, hospitals, and asylums, and it is asserted by laundry-keepers and workers that sufficient care is not exercised with regard to infected clothing. In consequence of the reprehensible practice of sending such clothing to laundries without first disinfecting it diphtheria and other diseases are said to have been contracted by sorters and washers, and the latter sometimes suffer from sore hands and partially paralysed arms from the same cause. With these exceptions, and the evils arising from working in the "hot rooms," the laundry business is not unhealthy in itself, but from carelessness with regard to drainage and infected clothing, danger to the public health may at any time arise. Even in the matter of transit negligence of the very grossest kind is sometimes displayed, as in the case of a carter who uses his vehicle alternately for carrying clothes for a hospital to and from the laundry, and for hawking vegetables.

REPORT No. 7.—Shirtmaking.

THE manufacture of shirts in the metropolitan district affords employment to not more than 150 hands, and cannot, therefore, be said to have attained an important position among the productive industries of the Colony. There are but four factories exclusively devoted to the business, and these are in a small way; besides the factories, the industry is carried on in some nine or ten retail soft-goods establishments, and by a few small contractors for the supply of slop-made stock shirts to retail shops. The factories confine themselves almost exclusively to the manufacture of white shirts of good quality, while other shirtmakers undertake, as well, Crimean and flannel shirts; but their output is not large, as these goods are usually made by persons working for the manufacturers of whitework and sundries, mentioned in a previous report.

ACCOMMODATION.

The comfort and convenience of the workers have in all cases been well provided for, and the sanitary arrangements in connection with establishments where this industry is carried on may fairly be classified as good. In one instance, however, a basement is used as a workroom, and though fairly suitable in other respects, the light and ventilation are defective.

DIVISION OF LABOUR.

Very few of the employees are qualified to put together a complete white linen shirt, though, for the most part, they acquire a knowledge of several portions of the work to be done, and do not, with the exception of machinists, confine themselves to any one particular branch. The various grades are apprentices, body and sleeve hands, collar, cuff, and front hands, button-holders, machinists, and cutters. In some establishments the only grades are apprentices, finishers, machinists, and cutters, the latter being, in most cases, either proprietor or manager of the business. Cutters and forewomen competent to take charge of a workroom are seldom to be found, and it is a general complaint among employers that competent workers in any branch are very scarce, the supply being by no means equal to the demand, and that apprentices are, as a rule, too independent, too careless, and too fond of change to learn the business quickly and thoroughly. On the other side it is urged that the remuneration to be obtained by shirtmakers is not such as to warrant any apprentice remaining at the trade longer than necessity compels.

HOURS OF LABOUR.

In the factories and shops inspected the hours of labour range from $42\frac{1}{2}$ to $45\frac{1}{2}$ per week, the general average of 44 hours obtaining in most cases. There is no overtime, except on rare occasions, when it is always paid for and tea is usually provided when the hands are detained beyond the recognised hour for closing. Among homeworkers the hours vary from 40 to 70, averaging a trifle over 59 hours of work per week.

WAGES.

The rates paid to different classes of workers vary considerably, not only under different employers but even in the same establishment. Apprentices in some cases complete their probation without pay, and receive in others 2s. or 2s. 6d. a week during the latter portion, and sometimes 5s. a week from the beginning. The range is great in other classes also, the wages commonly paid varying between the following figures:—

Grades.	Wages.			
	s.	d.	s.	d.
Apprentices	2	0	to	7 6 per week.
Body and sleeve hands	7	6	„	13 0 „
Collar and front hands	10	0	„	17 0 „
Button-holders	10	0	„	12 6 „
Machinists.....	7	6	„	21 0 „

Cutters and forewomen are sometimes paid £5 to £6 and £2 to £3 10s. per week respectively, but persons of these classes are comparatively scarce, and the work which would otherwise be entrusted to them is usually done by the proprietors. Excluding cutters and forewomen, the average wages of the employees in the shirt-making industry amount to 11s. 4d. per week, and excluding apprentices, to 14s. 6d. per week, or from 3d. to 4d. an hour.

Homeworkers employed in the manufacture of Crimean and woollen shirts and flannel vests, on piecework for whitework factories, average 11s. 6d. per week, or less than $2\frac{1}{2}$ d. per hour. The highest recorded weekly earning was 15s. for 60 hours, and the lowest 8s. for 40 hours.

GENERAL REMARKS.

During the colder months trade is generally slack, but for the rest of the year work is fairly constant. There is always some demand for locally made shirts and for shirts made to measure, in preference to imported stock shirts, but the latter are generally cheaper as well as superior in workmanship and appearance, so that although the local industry holds its ground, there seems little possibility of any expansion under present conditions. It is said, too, that there is not in the colony a single fully competent "shirt-dresser" capable of imparting to the newly finished articles an appearance similar to that presented by imported shirts, which are consequently preferred to the local stock product of even superior quality. Ordinary prices for locally made shirts range from 7s. 6d. to 10s. 6d. each, whilst imported shirts of similar quality range from 5s. to 8s. 6d. each, and usually present a much more highly finished appearance.

1891-2.

 NEW SOUTH WALES.

CENSUS AND INDUSTRIAL RETURNS ACT OF 1891.

(INFORMATION RESPECTING.)

 Presented to Parliament by Command.

The Government Statistician to The Honorable the Colonial Secretary.

Government Statistician's Office, 14 March, 1892.

I HAVE the honor to forward the following reports, prepared in accordance with Part II of the Census and Industrial Returns Act, viz. :—

No. 8: The Growth and Manufacture of Tobacco.

No. 9: Bootmaking.

No. 10: The Furniture Trades—Cabinet-making.
 Carving.
 Chair-making.
 Turning.
 French Polishing.
 Cane and Wicker work.
 Upholstering.
 Mat-making.

T. A. COGHLAN,
 Government Statistician.

REPORT No. 8.—On the Growth and Manufacture of Tobacco.

GROWTH.

THE cultivation of the tobacco plant was introduced into New South Wales by some of the earliest settlers, but its expansion into an important industry dates only from about the year 1826, when the Australian Agricultural Company had under crop a considerable area on their estate at Stroud. From thence the cultivation extended to the valleys of the Hunter River and its confluent, the Paterson and Allyn rivers, and later to the Argyle district. In all these places, for many years after its introduction, tobacco-growing received much attention. Recently, however, the cultivation has almost ceased in the districts where it was first undertaken, and the greater part of the crop now grown in the Colony is obtained from the electoral districts of Gundagai, the Murrumbidgee, and Tumut.

The climate of New South Wales is highly favourable to the cultivation of tobacco, and the soil, especially of the fertile alluvial valleys of the Murrumbidgee and other rivers and of the Tumut district, rich in volcanic deposits, is eminently suitable for its growth. In the valleys, however, it is found that the returns fall away rapidly after the third or fourth year, owing to the exhaustion of the soil, unless refertilised by floods, but in the Tumut volcanic region abundant crops are raised for a number of years in succession from the same land, and the leaf obtained is said to be as good as the best grown in Virginia or Kentucky. Analyses of the plant show that it varies in composition with the climate and soil in which it is grown, and the quantity of ash is found to range from $17\frac{1}{2}$ to $22\frac{1}{2}$ per cent. of the weight of the plant, the average being about 20 per cent. The principal constituents of the ash are lime, potash, magnesia, and chlorine, found with other constituents in the following proportions:—

Silica	from 0·05 to 0·30 per cent.
Chlorine	„ 0·08 „ 2·55 „
Sulphuric acid	„ 0·52 „ 1·69 „
Phosphoric acid... ..	„ 0·47 „ 0·80 „
Lime	„ 3·17 „ 8·22 „
Magnesia	„ 0·94 „ 2·21 „
Potash	„ 3·90 „ 7·45 „
Soda	„ 0·08 „ 1·81 „

The plant also contains from 3·2 to 5·1 per cent. of nitrogen, and traces of other components of less importance are sometimes found. Samples of leaf vary not only in regard to the quantity of the above-mentioned substances in the ash, but also in the presence or absence of particular constituents, whose special functions with regard to the making of good tobacco are not recognisable in the present state of information on the subject. By comparison of analyses of American and Australian leaf, and of the soils in which they are grown, it may be possible to discover whether the inferiority of Australian leaf results from the presence or absence of any particular substance in its composition.

Whatever may be its inherent defects there is evidence which would seem to show that most of the faults of locally-grown tobacco are due to defective preparation for the market. Thus the tobacco grown in the Tumut district is reported to be, as leaf, not only much superior to any other grown in Australia, but to be equal to American leaf, yet, when manufactured, it is not found to be much better than any other Australian tobacco. Curing is a process requiring knowledge and skill, as well as careful attention and proper appliances, and may be said to be the weak point in the tobacco industry as carried on in New South Wales. In most districts the industry is to a large extent in the hands of Chinese, who appear to bestow upon it greater care and patience than their European competitors, and are rewarded by a leaf of better quality, but much of the advantage gained by them in this way is lost by reason of lack of skill in curing and the absence of suitable barns for housing, drying, and preparing the crop after it is harvested.

From the subjoined table showing the area under cultivation, and the total production of tobacco leaf for the past eighteen years, it will be seen that the industry has been subject to very great fluctuations, the breadth of land under crop varying from 199 acres in 1874 to 4,833 in 1889, and the production from 1,261 cwt. to 55,478 cwt.

Year.	Area. acres.	Production in leaf. cwt.	Year.	Area. acres.	Production in Leaf. cwt.
1874	199	1,261	1883	1,815	17,540
1875	539	6,069	1884	1,785	20,006
1876	491	4,098	1885	1,046	9,914
1877	333	2,440	1886	1,603	22,947
1878	399	3,049	1887	1,203	13,642
1879	835	7,932	1888	2,371	23,465
1880	592	6,221	1889	4,833	55,478
1881	1,791	19,469	1890	3,239	27,724
1882	1,625	18,311	1891	1,148	10,592

The explanation of the anomalies revealed by these figures is not far to seek. So long as the production is not in excess of the demand of the local factories, tobacco-growing is undoubtedly a highly remunerative industry, but, as the leaf has no value whatever as an article of export, whenever a surplus is grown the excess remains a waste product on the hands of the growers. Warned by the experience of years of over-production many growers have abandoned the industry, but there has been no lack of others to take their places, so that only thrice since 1880 has production been less than manufacturers' requirements, whilst for the other eight years the quantity grown amounted in all to 204,940 cwt., of which, allowing for the three years of under-production, only 147,500 cwt. could be used; the remaining 57,440 cwt., representing excessive production, was, of necessity, thrown away. The inability of the growers to gauge the probable demand with any approach to accuracy has a very serious effect on the successful prosecution of the industry, for it cannot be expected that, where a market is wanting, any care will be taken in the preparation of the leaf, and under existing conditions it would be idle to look for a market outside the limits of the Colony.

In the year of greatest production, 1889, the quantity of leaf grown in New South Wales was 6,213,536 lb., and the total consumption of tobacco and cigars, 3,020,240 lb., of which 1,985,987 lb. were made in the Colony, the leaf used being 560,336 lb. of American and 1,425,651 lb. of local growth. Allowing for stems and waste, this latter would represent about 1,780,000 lb. of leaf, which, in a moderate season, could be grown on about 1,700 acres, whilst the area under tobacco was 4,833 acres. The supply for 1889 was, therefore, more than three times as great as the demand, whilst even in 1890, with a decrease of one-third in area and one-half in production, supply exceeded demand by 1,275,000 lb., or about eight months' supply, in addition to stocks remaining from the previous year. This over-production has affected prices to such an extent as to have made tobacco-farming an unprofitable industry. The present year shows a great falling off in the breadth of land devoted to tobacco, and the yield, which has been greatly affected by blight, amounted to only 1,186,300 lb., a quantity which would be far short of the local demand were it not for the supplies remaining over from the previous year.

THE MANUFACTURE OF TOBACCO, CIGARS, AND CIGARETTES.

In New South Wales there are at present only nine establishments in which is carried on the manufacture of tobacco, six being situated within the Metropolitan area, and employing about 600 hands; while Newcastle, East Maitland, and West Maitland have each one, providing between them employment for 75 hands. The manufacture of cigars and cigarettes is undertaken by only two of the principal tobacco-manufacturers, but this industry is carried on to some extent outside the factories by cigar-makers. These latter employ about 25 assistants altogether, so that in all its branches the industry affords employment to about 700 hands, comprising 480 males and 220 females.

ACCOMMODATION.

The factory buildings in and around Sydney have been specially designed and constructed for their present use, and are all substantially built, with every facility for economical management of the business and ample accommodation for the employees. Light, space, and ventilation have been supplied, and separate work-rooms and sanitary conveniences set apart for the use of the females. The comfort of the workers in most of the factories receives more than ordinary attention, but in one or two cases the want of a separate room for dressing, and taking their midday meal has subjected the female employees to considerable annoyance and discomfort. Two factories are fitted throughout with a fire-extinguishing apparatus, and in others the doors and stairs are of iron, and the furnaces, and in one case the lift also, are placed outside the main building, in order to minimise the danger of destruction by fire.

HOURS OF LABOUR.

The recognised hours of work are from 8 a.m. to 6 p.m., with an interval of one hour for dinner, making in all nine hours a day. There is no overtime, most of the work is done by the piece, and as a rule only permanent hands are kept on weekly wages. Periods of slackness are of frequent occurrence, and may cover as much as three months in the year, so that tobacco-workers must perforce be able to turn to other industries in case of need, and to this circumstance is due the fact that it is not an infrequent occurrence for piece-workers to absent themselves from the factory for weeks at a time, even when there is employment offering.

DIVISION OF LABOUR.

Tobacco operatives are distributed into various classes, called, after their occupations, dryers, steamers, strippers, pickers, twistors, plugmakers, plug-coverers, pressers, cigar-makers, and cigarette-makers. In none of the work required of them is any high degree of skill or knowledge necessary, and none of the processes involve any very laborious exertion. As a natural consequence boys and girls are employed in considerable numbers, the proportion of boys to men being about 62 per cent., and of girls to women slightly higher.

WAGES.

When in full work the average weekly wages of the various grades of pieceworkers are as follows:—

	Men.	Women.		Men.
Tobacco—Plug hands ...	28s. to 40s.	15s. to 21s.	Cigars ...	30s. to 60s.
Coverers ...	30s. to 40s.	20s. to 30s.	Cigarettes ...	27s. to 40s.
Twistors ...	50s. to 80s.		Boys and girls	10s. to 25s.
Boys ...	10s. to 21s.	Girls 8s. to 15s.		

EARNINGS.

In slack times it is customary to retain only the best hands, who for the most part work little more than half-time on piecework at the rates given in the preceding table. The less steady and skilful hands are for the time dispensed with, and must find, if possible, other occupations until the opportunity occurs of returning to the tobacco industry. By these slack periods, as well as by voluntary absences from work, the average earnings in the trade are very considerably reduced, a wage of £2 10s. per week representing an aggregate of not more than £70 or £80 for the whole year, while 4s. a day when in full work, which may be taken as the average pay of the best female workers, means probably £40 a year. Even those women who apply themselves more assiduously to work whenever it is procurable, and are able to earn the highest wages paid to females, nevertheless find themselves at times in very straitened circumstances. If such is the case with the most highly paid, it is not difficult to surmise what must be the lot of those who, through physical inability or other cause, cannot work assiduously or earn anything beyond a minimum wage. Females are employed almost exclusively on piecework, and some, who earn from 15s. to 20s. a week in busy times, have been engaged in this occupation for a number of years, and though unable by unremitting toil during factory hours to earn more than a very meagre subsistence, yet for conduct and morality the record of these constant hands is everywhere very favourable.

HEALTH.

If the testimony of employers and employees be accepted it goes very far to establish the healthiness of the industry, yet the sallow complexions of the workers would appear to belie this testimony, and it has been said that some of the processes are apt to cause specific diseases, and that men who have been engaged in this business for any length of time are unfitted for any other occupation, but sufficient evidence on this head has not been available for a definite opinion to be safely offered.

TAXES

TAXES ON TOBACCO.

The taxes levied on tobacco are as follows:—

Import duties	per lb.	Excise duties	per lb.
Tobacco	3/-	Tobacco	1/3
Snuff	3/-	Cigars	2/6
Leaf	3/-	Cigarettes	2/6
Leaf for manufacture ...	1/-		
Cigars	6/-		
Cigarettes	6/-		
Tobacco for sheepwash ...	-/3		

LICENSE FEES.

In addition to these taxes, fees for licenses to manufacture are charged as follows:—

FEES PAYABLE UNDER SECTION 5, ACT 47 VICT., 1884.

LICENSE A.

For every license to manufacture tobacco, cigars, and cigarettes from imported tobacco, upon which the full Customs duty of 3s. per lb. has been paid, and from leaf tobacco the produce of New South Wales, in quantities of manufactured tobacco, cigars, and cigarettes—

lb.	lb.	£
Not exceeding 5,000	£5
Exceeding 5,000, but not exceeding 10,000...	...	£10
" 10,000 " " 20,000...	...	£20
" 20,000 " " 50,000...	...	£50

LICENSE B.

For every license to manufacture tobacco, cigars, and cigarettes, under the immediate supervision of an officer of excise, from imported leaf tobacco received direct either from a Customs bonding warehouse or from ship's side, upon which the Customs duty of 1s. per lb. has been paid, or from leaf tobacco the produce of New South Wales, in quantities of manufactured tobacco, cigars, and cigarettes—

Not exceeding 100,000 lb.	£100
Exceeding 100,000 lb., but not exceeding 200,000 lb.	£150
" 200,000 lb. " " 350,000 lb.	£200
" 350,000 lb.	£250

Under License A, cigars and cigarettes made from tobacco on which the duty of 3s. per lb. is paid are free from the excise duty of 2s. 6d. per lb., provided no locally-grown tobacco is mixed therewith. This is equivalent to a preference of 3s. per lb. to the local manufacturer, as the import duty on cigars and cigarettes is 6s. per lb. Under License B an excise of 1s. 3d. per lb. is levied on all tobacco manufactured from imported or locally-grown leaf. This is equivalent to a preferential duty of 9d. per lb. in favour of the local manufacturer who used only imported leaf, and 1s. 9d. where only locally-grown leaf is used. In practice, however, it is found that the manufacturers use local and imported leaf in making tobacco in such proportions that the import duty of 1s. and the excise of 1s. 3d. equal a duty of 1s. 6½d., as against the import duty of 3s. on manufactured tobacco.

CIGARS AND CIGARETTES.

The quantity of cigars and cigarettes manufactured in the Colony is but small, and there has been of late years a considerable decline in the production of cigars, though this has been accompanied by a large increase in that of cigarettes. Some idea of the condition of these branches of the tobacco industry may be gathered from the following table showing the quantities manufactured for each year since 1885, also the quantity of cigars and cigarettes imported.

Year.	Made in Colony.		Imported.	
	Cigars.	Cigarettes.	Cigars.	Cigarettes.
	lb.	lb.	lb.	lb.
1885	9,402	6,901	317,995	40,593
1886	7,125	5,340	310,694	49,923
1887	6,057	10,269	257,312	50,318
1888	3,624	8,296	275,818	95,431
1889	5,392	9,200	341,328	72,142
1890	4,120	18,328	273,882	87,973

The cigars usually made in the Colony contain both Sumatra leaf and American seed tobacco. To make 1,000 cigars, 3 lb. of the former, valued at about 4s. 9d. per lb., is required; 6 lb. of the latter, worth approximately 1s. 3d. per lb., and 5 lb. of slightly inferior quality at (say) 1s. per lb., or 14 lb. in all, worth £1 6s. 9d. The duty at 3s. per lb. amounts to £2 2s., and the labour of making costs 35s. to 40s. If to this is added the cost of packages and other incidental charges, the cigars are worth £5 18s. to £6 3s. per 1,000 at the factory. The usual price obtained by the maker is from £6 10s. to £7, and the consumer pays the retailer 3d. each, or 1s. for five cigars.

The value of tobacco in cigarettes forms but a very small portion of the retail cost, the principal items being duty and excise, wrappers, and packing. From 2 lb. to 2¼ lb. of tobacco will make 1,000 cigarettes, the cost of the tobacco used varying from 6d. to 1s. 4d. per lb. The paper for wrappers is worth 3d., and the boxes and other packing expenses cost 4s. The expense of making varies according as machinery or hand power is employed. A good machine will turn out 100,000 cigarettes in a week of ordinary working time; by handwork a cigarette maker will average from 800 to 1,000 per day, but a good man will make as many as 1,500 by working long hours. The usual pay for handwork is 4s. per thousand, though in exceptional houses 5s. are paid. A good many females are employed in this work. Cigarettes are made mostly from American tobacco; perhaps not more than 7½ per cent. of New South Wales leaf is used, and then only the finer quality.

IMPORTS

IMPORTS AND MANUFACTURE OF TOBACCO.

Out of a total import of 1,380,000 lb. of manufactured tobacco, the United States sends 635,000 lb., the United Kingdom 327,000 lb., and the remainder comes mostly from Germany and Hongkong. Nearly one-half of this total is re-exported, principally to Queensland, the South Sea Islands, New Caledonia, and the other colonies. The position of the manufacture within the Colony since 1885 is exhibited in the following table :—

Year.	Number of Factories.	Number of hands Employed.		Import duty on—		Excise on Tobacco.	Leaf used in Manufacture.		Manufactured in the Colony.	Imported for home consumption.	Total consumption of Tobacco.
				Manufactured Tobacco.	Leaf for Manufacture.		Locally grown.	Imported.			
		M.	F.	s. d.	s. d.	s. d.	lb.	lb.	lb.	lb.	lb.
1885	16	411	257	3 0	1 0	1 0	1,460,688	672,480	2,133,168	327,249	2,460,417
1886	17	559	144	3 0	1 0	1 0	1,482,725	561,514	2,044,239	372,408	2,416,647
1887 ..	13	506	156	3 0	1 0	{ 1 0 } { 1 3 }	1,595,012	552,217	2,147,229	492,346	2,639,575
1888	14	554	161	3 0	1 0	1 3	1,451,895	610,480	2,062,375	591,503	2,653,878
1889	10	454	167	3 0	1 0	1 3	1,425,652	545,740	1,971,392	711,109	2,682,501
1890	9	506	172	3 0	1 0	1 3	1,323,172	569,420	1,892,592	768,449	2,661,041

GENERAL REMARKS.

The quantity of tobacco, including cigars and cigarettes, consumed in the Colony, amount to 3,020,240 lb., being at the rate of 2·75 lb. per head of the estimated population for 1890. The decline in the manufacture of tobacco and cigars, and the increasing consumption of imported tobacco and cigarettes, are features deserving special notice.

It is the opinion of manufacturers that the operation of the excise taxation has injuriously affected the manufacture of tobacco, cigars, and cigarettes, causing a decrease in the local production, and a large increase in importations, and it is certain that several small factories, some of which had been in existence for more than fifty years, have recently been closed. The terms usually allowed by manufacturers to wholesale buyers virtually amount to a credit of at least five months, so that the present amount of excise (£118,257) necessitates the employment of an additional capital of £50,000, a sum considerably more than half the value of the plant and machinery employed in the business. It is therefore not surprising to find that the excise duties have had in their operation a depressing effect on all businesses where the command of capital has been limited. The stoppage of the small factories cannot, however, be entirely attributed to this cause. There is no doubt that this was at least partly to the change of fashion. Machine-made plug tobacco has almost entirely superseded in popular favour the "twist," the hand-made product of the small factories, whose businesses were too small to yield a profit on the expensive machinery and large capital required for the manufacture of plug tobacco. Another cause was the inferiority of the leaf used, or, at least, of the tobacco produced, which possesses a flavour far less delicate and agreeable than the imported. Cigars manufactured from locally-grown leaf have a limited sale for the same reason, for it is not to be supposed that popular taste will submit to use the disagreeable simply because it is of local manufacture.

THE EMPLOYMENT OF CHILDREN.

Rumours and reports to the effect that children under fourteen years of age were employed in several factories have been carefully investigated, but when questioned, the children invariably declared that they were over fourteen, and however strongly appearances might discredit their statements, no means of ascertaining the truth with regard to them were available.

REPORT No. 9.—Bootmaking.

THE manufacture of boots and shoes under the factory system has been carried on in New South Wales for nearly thirty years, and is now one of the most vigorous of the staple industries of the Colony. Though the goods manufactured are, for the most part, of a common description, there is a decided disposition on the part of the manufacturers to improve the quality of their product, both in material and workmanship, and to undertake the manufacture of superior classes of goods, the supply of which is at present almost entirely imported. That some of the persons who are engaged in the industry consider the future of their enterprise to be assured is sufficiently proved by the amount of capital they have already expended in the erection of substantial premises, equipped in many instances with the most recent appliances for minimising labour. There are large factories in all the principal towns of the Colony, but the chief seat of the industry is naturally found in the metropolitan district, where the largest factories are situated.

GROWTH OF THE INDUSTRY.

Excluding those employing fewer than seven hands, in 1878 there were 71 factories, employing 1,883 hands; and in 1891, although the number of factories was reduced to 60, the hands employed had risen to 2,806, giving an average of 46 operatives per factory, the greatest number in any one establishment being 300. The steady growth of the industry may be traced in the following figures:—

Year	No. of Factories.		Hands employed.		Total.
			M.	F.	
1886	...	65	1,672	433	2,105
1887	...	68	1,856	416	2,272
1888	...	60	1,837	436	2,273
1889	...	57	1,618	427	2,045
1890	...	59	1,955	465	2,420
1891	...	60	2,262	544	2,806

It is agreed by both masters and men that the trade has for some time been in a very satisfactory condition, and that it has in recent years displayed new vigour in every direction. This is certainly a matter for congratulation, seeing that the trade in most of the other colonies is in anything but a flourishing condition.

ACCOMMODATION.

In about twelve factories of comparatively recent construction, the conditions affecting the health, comfort, and convenience of the operatives have received ample consideration, and the efforts made to secure light, working space, and ventilation, have left little to be desired, nor can any fault be found with the sanitary arrangements. In other cases the factory buildings consist of wooden or iron sheds, barn-like in appearance, and more or less dilapidated and unclean, erected in the first instance without regard for convenience or sanitary considerations, and affording the very poorest accommodation. In these sheds the workers are so closely packed that it is with difficulty they are able to avoid impeding one another; no separate workrooms or conveniences are set apart for the use of the females, and the general arrangement of the premises is not calculated to secure health or comfort, or even the maintenance of ordinary decency.

APPRENTICESHIP.

Although in most cases apprentices are supposed to be regularly indentured, yet they do not scruple to throw aside their indentures whenever it suits their whim or convenience. Their number is now very small, employers, especially those who have large factories, being loth to find room for lads who, experience shows, are likely to abandon their apprenticeship as soon as their services are of any real value to their masters, at whose charge they have acquired a certain degree of proficiency in the trade.

Girls usually enter the trade as "tiers off," to attend on machinists and fitters, fasten ends of threads and paste parts together, and are paid from 3s. to 10s. a week, their term of probation being three or four years. Boys, when taken as apprentices, are expected to wait upon other workers and make themselves generally useful. Their wages are from 2s. 6d. to 15s. during their period of service, usually four years, but there is no uniformity in the practice of the trade, every employer being at liberty to make his own terms of agreement with his apprentices. The opportunities afforded them to learn their trade are so desultory that, at the completion of their period of indenture, apprentices are frequently found very far from being skilful workmen, and for this reason it is no uncommon thing for a father to take his son to assist him in the factory, where he receives no wages, but learns the trade more rapidly and thoroughly than in any other way.

Early in 1891 a question arose in regard to apprenticeship, which for a time threatened to cause a disruption of the good understanding that had for a long time existed between the employers and the employed. It would appear that a factory proprietor had entered into indentures with certain apprentices whose number was in excess of that authorised by the rules of the Union. He was requested to reduce the number to the specified proportion, but pleaded inability to break his arrangements, and also objected on the ground that the resolution in regard to apprenticeship had not been submitted for the approval of the masters previous to his making the engagement, and the Union then declared his shop "black." The Masters' Association gave passive support to the employer by declining to sign the new log, and matters appeared to be rapidly approaching a deadlock which would have rendered futile the mutual work of masters and men in preparing the improved time statement. Better counsels fortunately prevailed, and the dispute was settled by the Union withdrawing its opposition without insisting upon an immediate reduction in the number of apprentices, while the masters agreed that in future the rule regulating the proportion of apprentices should be strictly observed, viz., one for the first three men, and one for every additional six.

HOURS

HOURS OF LABOUR.

The eight-hour system is observed in the greater number of factories, forty-four hours constituting a week's labour for both male and female workers. In the remaining establishments male employes usually work forty-eight hours a week, but in some few cases their time is fifty hours. Overtime is of rare occurrence, and there is no fixed rule in regard to payment for it, the custom in some shops being to pay at the rate of time and a half, and in others at ordinary rates.

WAGES.

Among the male hands, cutters, clickers, and apprentices are almost invariably on weekly wages, makers and finishers, on piece-work. Females, except in the few instances where their work is done in their own homes, are paid by the week. For all classes the payment seems to be calculated on a more liberal scale than in any industry demanding a like amount of skill, or indeed than in many industries usually reckoned superior to bootmaking. The average weekly wages for the various classes of operatives are shown in the following table which includes returns from all the factories of any consequence:—

<i>Hands on Weekly Wages.</i>	Wages.		
	Highest.	Lowest.	Average.
<i>Females—</i>			
Fitters	30/-	18/-	23/1
Machinists.....	32/6	15/-	23/1
Tiers off.....	10/-	5/-	7/2
<i>Males—</i>			
Sole Cutters	60/-	40/-	45/10
Clickers	55/-	40/-	48/10
Apprentices	15/-	2/6	7/1
<i>Hands on Piece-work.</i>			
Makers	60/-	27/6	42/7
Finishers	100/.	35/-	53/4

In addition to the eight classes mentioned above, there are a few "improvers," for the most part apprentices whose term of probation is finished, who receive wages ranging from 15s. to 30s., and averaging 21s. a week. Foremen and forwomen are found only in a few factories, and their wages average 70s. and 50s. a week, respectively. Home-workers are found in connection with only about a dozen factories, and are, of course, engaged entirely on piece-work, their weekly earnings ranging from 45s. to 70s. for the men, and from 25s. to 32s. 6d. for the women.

EARNINGS.

The payments to the various classes in the above synopsis represent only the averages of their weekly earning. Statements taken casually from the books of several factories show that their actual individual receipts for any single week may differ widely from the figures there given, "makers," for instance, varying from 83s. 9d. down to 21s., and "finishers" from 96s. to 26s. for one week's work. Hence it is evidently possible for industrious and capable workmen in these classes, to earn very good wages, but the general average is diminished by the lack of steady perseverance and sobriety too frequently characteristic of workers in this trade. On this account it has been found impossible to arrive at any estimate of their average annual earnings.

In this connection it may be mentioned that though many of the hands are steady industrious men, working full time and earning good wages, there are also others who are lazy and dissipated, working only when driven thereto by necessity, and spending in drunkenness the greater part of their earnings. It was the unfortunate experience of the agents who conducted this inquiry to find that many of the men visited at their own homes during the evening were the worse for liquor. Such men rarely work more than four days a week, and often not more than two, but, however much they may earn, they never return to the factory until their money is exhausted, and necessity drives them to work again. Their homes are squalid, miserable, and uncared for, in keeping with themselves and their habits, whilst the dwellings of the steady, frugal, and industrious workers everywhere display a bright, cheerful, and comfortable appearance, and their wives and children are well fed, well clad, and well cared for.

THE BOOTMAKERS' UNION.

At Redfern, the principal seat of the bootmaking industry, are situated the head quarters of the Bootmakers' Union, which has branches in all the principal towns throughout the Colony. These branches are under the control of the central authority, but act independently in matters of merely local interest. The Union includes only "makers" and "finishers," and in proportion to the whole number of workers of these two classes it is the foremost trade organisation in the Colony. Its numerical strength, inclusive of country members, is about 1,750, and it is an exceptionally well managed and influential body. It was recently proposed to form a Female Workers' Union, but having made no head-way it is feared the project must be abandoned.

THE NEW "LOG."

For many years the "log" or statement of working prices remained unchanged, notwithstanding the improvements and alterations in certain lines and the manufacture of various kinds of boots not known in the trade at the time it was agreed upon, until at length it failed to meet the purpose it was intended to serve, and as a natural result friction and dissatisfaction arose between employers and operatives. The Masters' Association complained that different scales existed for the same class of work, and the operatives felt that there should be a discriminating rate to meet the numerous innovations recently introduced. In the interests of all parties it became manifest that a complete revision of the "log" was of the first importance and should be no longer delayed. The work of revision was entered upon in an amicable and conciliatory spirit. The Union drew up a proposal dealing with over 100 boots or variations in

in boots, which then received much careful consideration from a committee whereon the Masters' Association and the Union were equally represented, and was finally agreed to without any material alteration. Owing to various causes the adoption of the new statement was delayed for several months, but a common understanding was eventually arrived at, and a "log" embodying all the essential points of the statement was brought into operation at the close of last year. The new "log" places all the manufacturers on a level in regard to the prices to be paid, which range some 10 per cent. above the old rates; on the other hand it provides that the quality of all work done by operatives shall be equal to a fixed standard, which is somewhat higher than has hitherto prevailed in many shops. Standard boots are held by the Union authorities and also by the Masters' Association, so that any question respecting quality or value of work can be readily determined. It is not improbable that the new "log" will have the effect of purging the trade of the more unskilled members, who have been in the habit of working in the small factories at lower rates than those paid in the larger establishments or sanctioned by the Union. This result, however, depends upon the adoption of the new "log" by all the factories, for there still remains the possibility that some of the smaller ones will disregard it and so perpetuate the disparity of prices it was intended to remove.

Although no serious disagreements have as yet arisen, the new "log" has not proved an unqualified success, or given satisfaction to either masters or men, and about thirty disputed cases have already been settled by the arbitration committee. It is found that the advance in wages is not so general as was anticipated, being distributed for the most part among the "makers" and those engaged in the common classes of work, while "finishers" and operatives in the higher classes have suffered a slight reduction. The new system has also so far failed to remove the anomalies in the prices paid in different factories for work apparently of the same quality. It is hoped however that with the goodwill of all parties working in a friendly manner towards a satisfactory settlement these difficulties will shortly be obviated.

GENERAL REMARKS.

The output of the factories is represented by an exceedingly large variety of boots, of many sizes, grades, and descriptions; the product of a certain leading establishment, for instance, embraces 98 different kinds of men's, 35 of youths', 30 of boys', 47 of women's 23 of maids', 24 of girls', and 10 of children's, or altogether a total of 267 varieties of boots and shoes of all shapes and sizes. In the manufacture of these are used a great many different kinds of leather, and combinations of leather and cloth, and along with these varieties of material there are many distinctions in workmanship, and innumerable modifications of shape and size. The common "blucher" boots are made in larger quantities than any other kind. Next in order comes the "elastic side" in many varieties, commanding a ready sale, and forming an important part of the general output.

The leather used in the manufacture of the lower grades of boots is usually the soft, porous, mal-odorous, and dark-coloured product of the local tanneries. The tanners find that this inferior leather pays better than the higher qualities, and the manufacturers perceive that they can make more profit out of the lowest class of boots made of the cheapest leather than out of the higher classes. The fact that high class boots command a ready sale and that the best qualities of leather are imported and used by the makers of "order" boots, proves that there is a good market for good boots. An idea of the magnitude of this market may be gathered from the figures of the import trade, which show that during the ten years, 1881-90, boots and shoes to the value of nearly £5,750,000, and leather worth about £750,000, were imported; making a total import of about £6,500,000 sterling.

REPORT No. 10.—The Furniture Trade.

DURING the last few years some progress has been made in the manufacture of high-class furniture, but the output of the local factories still consists mainly of the cheaper kinds, while the greater portion of the goods imported is superior in quality—not only of material, but also of workmanship. Fashion in furniture, especially of the better kinds, is subject to rapid change, and the desire to possess the latest designs, combined with great facility of transport, induces the affluent to seek what they require from European art centres instead of from the local manufacturers. Nevertheless, importations show a tendency to decrease, and there is reason to believe that the influences in favour of the local production of superior furniture will ultimately prevail.

The Chinese question is dealt with at length in the appendix attached to this report; but here it may be noted that the intrusion of the Chinese into the cabinetmaking business has, without doubt, had an injurious effect upon the Australian worker, not so much by reason of the output of the Chinese factories, as from the prejudice raised in the minds of all classes against all locally made goods. Chinese competition was, in reality, directed, not against the local maker, but against the importer of cheap furniture from the East end of London, and so successfully that this class of goods has now almost ceased to be imported. Since the passing of the Chinese Restriction Act, however, their work and wages each year approach more nearly those of Australians, and their competition is, therefore, rapidly becoming less acute.

The principal articles of household furniture are produced by three broadly distinguished classes of workers, viz., woodworkers, cane and wicker workers, and upholsterers. The woodworkers are subdivided into a number of distinct trades, chief among them being cabinetmakers, carvers, chairmakers, and turners. Connected with these, but hardly to be called woodworkers, are several other trades, of which the most important are the polishers, gilders, and Venetian blind makers. Among upholsterers, also, there are many sub-classes, such as mattress and palliasso makers, and makers of mosquito-nets, window-blinds, curtains, carpets, loose covers, and so on.

Owing to the numerous ramifications of the industry it is impossible, at present, to give an estimate of its numerical strength for the whole Colony, but in the metropolitan district alone it affords employment to probably not fewer than 1,500 hands, males and females, the latter being engaged for the most part in the various branches of upholstery where needlework is required.

CONDITION OF THE INDUSTRY.

Of recent years the cheap furniture business has drifted, to a great extent, into the hands of auctioneers and furniture brokers. The regular weekly sales of cheap Chinese-made goods with occasional speculative shipments from England, America, and elsewhere, have done much to interfere with the ordinary trades, as such lines are nearly always subject to forced sales without reserve, and local makers justly complain that the practice has a tendency to reduce first the price and then the quality of all classes of furniture. But too great emphasis has, nevertheless, been laid on the injuries inflicted upon the trade by these importations, for to this cause the workers ascribe their intermittent employment and limited earnings, while the employers assign to it the existing depression, and almost every other misfortune that has befallen the industry. As an instance of their proneness to exaggerate in this direction may be taken the complaints frequently heard in the course of this inquiry, that during the last five or six years the large importations of various kinds of furniture from Italy had injuriously affected the local industry, whereas the fact is that altogether only £262 worth came in from Italy during the years 1886-91 inclusive.

DIVISION OF LABOUR.

The tendency to subdivide labour has of late extended its influence in every direction, and shows itself in this industry in the number of specialists, who make only one part of a piece of furniture, or confine themselves to a single operation in the upholstering or polishing branches. The old-time worker, who could make any article of furniture throughout, is now seldom found. Under the old system it was necessary for a workman to serve a long apprenticeship before he could claim to be fully qualified; but such necessity does not now exist, and the practice of apprenticeship is consequently fast falling into desuetude.

ACCOMMODATION.

The workrooms are usually roomy and well lighted, but in most cases very little attention is paid to the necessity of providing proper sanitary conveniences; and even where such have been supplied they are not kept clean and fit for use. This seems a weak spot in all factories; yet very few complaints are made, workers having apparently become reconciled to the idea that order and cleanliness are not to be looked for in such places.

Most workrooms are situated in buildings originally designed for some other purpose, and communication between the floors is usually by means of wooden ladders or stairs. Little or no work is done in these places at night, and the risk of fire in the daytime is small; but should a fire occur, the means of exit would be almost immediately closed to those at work on the upper flats, and loss of life would be inevitable.

CABINET-MAKING.

Cabinet-makers are the largest and most important class of furniture operatives, and it is estimated that about 230 Europeans and Chinese are at present engaged in the trade.

Complete information as to the wages, earnings, and hours of labour were obtained in regard to the great majority of these men; and nearly all the shops in the metropolitan district as well as some in the country were visited, so that it is hardly probable that any material circumstance affecting the trade has escaped attention. The recognised working time is forty-eight hours per week, and in all but four of the establishments inspected this time was observed; the time in the exceptional shops was two or three hours longer, but the number of men affected was probably not more than eight or ten.

Apprenticeship.

Much prejudice exists in the minds of parents against putting their sons to cabinet-making, on account of the hold which the Chinese have acquired in the trade. It is not surprising, therefore, that the number of apprentices is very small, the ranks of the trade being recruited from fresh arrivals in the Colony. And in this connection it may be worthy of mention that only four out of every ten members of the Furniture Trade Society are native born.

It is very seldom that apprentices are bound by indenture. Usually the beginner enters the workshop as a "generally useful boy"; in the course of a few months he picks up a little knowledge of the business by observation, and then leaves and enters some other establishment as an improver. In this way he wanders from shop to shop, gradually improving his wages and knowledge, but seldom becoming a really efficient tradesman. Only ten apprentices were met with in the shops inspected, and these were receiving from 5s. to 15s. per week, the average being 10s. 3d. Where indentures are signed, the term of service is usually five years. Improvers are of necessity as rare as apprentices, and only three persons so styling themselves have been seen. They are receiving 12s. 6d., 15s., and 25s. respectively.

Instruction in cabinet-making may be obtained at the Technical College; but at present only nine persons are availing themselves of this course, and probably at least three of these are amateurs. Two nights in every week instruction is given by competent teachers. Tools and their application, glue and its uses, methods of joining, dovetailing, mortising, and tenoning, cabinet woods and their uses, buhl work, &c., all receive attention during a one-year course.

Earnings.

Amongst cabinet-makers there are the usual two classes, piece and time workers, and as might naturally be expected there is but small difference in the earnings of each class, such difference as there is being in favour of the piece-hands. Taking the trade generally the greater number of hands work on wages; perhaps the proportion in a hundred would be 63 wage hands and 37 piece-hands. The average earnings of each class were as follows:—

	Average weekly earnings.	Rate per hour.
On wages	51s. 3d.	1s. 1d.
Paid by results.....	56s. 1d.	1s. 2d.
Mean.....	53s. 0d.	1s. 1½d.

These are the rates obtained by operatives when in work, but the average worker is out of employment for from two to three months in the year, so that the annual earnings may be set down at £106 to £116. Of course numbers of men do not manage to obtain even nine months constant employment, but on the other hand many are never idle, and the general opinion among operatives is that skilled men need rarely lack employment. From the nature of the trade it might be anticipated that no particular season of the year would be called busy; nevertheless there is usually a press of work during the months of December, January, and February, when every available hand finds employment. Very little work of any kind is done by cabinet-makers at their own homes, so that there is not the inducement to cut rates by working long hours which is a growing evil in some of the other trades.

Cabinet-makers usually provide their own appliances with the exception of the bench; the value of a first-class kit is estimated at about £30, but £10 will buy sufficient tools for most purposes.

AUSTRALIAN WOODS.

Some Australian forest timbers are light, soft, rich in colour, beautifully grained and marked, highly fragrant, and easily worked. These woods are eminently suitable for the finest descriptions of cabinet-making and buhl work, but unfortunately, with the exception of red cedar, they are not abundant in districts accessible by water, and their use is consequently restricted by the expense and difficulty of carriage by land. The denudation of the forests of red cedar has proceeded so rapidly that the wood is already becoming scarce, and a substitute of some kind must soon be sought. This may have the effect of bringing into use some other of the native woods, of which there is a large variety. Several hundred specimens of different species of Australian timber are exhibited in the Geological Museum attached to the Department of Mines. The principal timbers suitable for cabinet work are as follows:—

Red Cedar.—Beautiful in grain and colour, durable, and easily worked.

Blackbean.—In colour and quantity resembling walnut; abundant.

Forest Oak.—Rich Red, well marked, but hard to work and heavy.

Pigeon Ash.—Long fibre, white and clear, a good substitute for oak.

Onionwood.—Resembles cedar, but is less fragrant and beautiful.

Beech.—Handsome, durable, easily worked, and plentiful.

Rosewood.—Rich red, fragrant, beautiful, durable, abundant.

Satinwood.—Clear golden colour, durable, small and scarce.

Silky Oak.—Beautifully marked, pale golden colour, small and scarce.

Tutip.—Beautifully marked, hard, small and scarce.

Myall.—Dark, hard, heavy, small, with strong perfume of violets.

UPHOLSTERY.

In the upholstering trade there are many branches whose connection with one another is not very apparent to the uninitiated; amongst the more important may be mentioned mattress making, mattress stuffing, coach upholstering, carpet laying, carpet sewing, blind sewing, palliasso sewing, bolster sewing, pillow sewing, cording, loose covering, mosquito-net making, and draping. In these branches there are in the metropolitan district about 200 operatives, and for two-thirds of these the work is constant. The remainder lead a hand to mouth existence, and only obtain work at irregular intervals.

In London an upholstress is supposed to be able to turn her hand to any branch of the work, and in this colony in some establishments the same upholstresses sew mattresses, carpets, and blinds. In most cases, however, the branches are distinct, each having its own special workers, who seldom drift into any other kind of employment.

Apprenticeship.

Apprenticeship.

The proportion of indentured apprentices to journeymen is very small, being only about one to every ten; but, learning the trade without indentures, there are about three boys to every ten competent hands. Starting with wages averaging about 5s. per week, these beginners gradually acquire a little knowledge of several branches of the trade, and finally settle down to that in which they are most efficient. Smart lads properly taught may learn the business in about five years, but a knowledge of woman's work is more quickly acquired, and girls, though never bound by indentures, may become qualified assistants in about two years.

Wages.

There are four grades of workers among the male hands, viz.: Foremen, journeymen, improvers, and apprentices, whose rates of wages and average weekly earnings are set forth in the following table:—

Grade.	Highest.	Lowest.	Average.
Foremen	70/-	60/-	64/6
Journeymen	60/-	30/-	50/3
Improvers	20/-	20/-	20/-
Apprentices	15/-	5/-	10/6

Journeymen are occasionally employed on piecework, their wages ranging from 60s. to 40s., and their earnings averaging about 53s. per week while in full work.

The various classes of female workers, and their average weekly earnings, are as follows:—

	s.	d.		s.	d.		s.	d.
Mattress sewers	18	0	Corders	20	0	Carpet sewers	17	6
Palliasse sewers	20	0	Leather sewers	25	0	Mosquito-net makers...	20	0
Men's hands	17	6	Loose covers	20	0	Drapers	25	0

Though all receiving weekly wages, the time and amount of work done by each hand are measured with great minuteness, and every care is taken to secure from all a certain average amount of work in a given time. Mattress and palliasse makers are expected to make 1 dozen mattress covers, or 6 to 8 palliasse covers, per day; corders, to finish a suite of furniture in two days; carpet sewers, to sew 20 to 30 yards per day; and leather sewers, who are more highly paid on account of the heaviness of their work, to "pipe" a pair of arms in 1½ hours, or to cover a settee in 4 hours, extra time being allowed for joining skins.

Carpet sewers are sometimes paid by the piece at the rate of 2d. per yard, finding thread, or 1½d. per yard if thread is provided. The average quantity of work per hour is from 3 to 4 yards, though some can do 5 to 8 yards without over exertion. In cases of exceptional ability or exceptionally profitable descriptions of work they occasionally make large earnings, but the rates above given fairly represent their average weekly earnings.

A few women are employed as bedding hands at about 40s. per week, and others, whose business is to attend upon the upholsterers and do odds and ends as required, are called "men's hands," and receive about 17s. 6d. per week.

Employment for all hands in these branches is fairly constant, and no good worker should be idle for more than three weeks in the year.

A few years ago, business being but small, and competent hands very scarce, rates of remuneration were consequently high, and few shops could give constant work on weekly wages. The greater part of the upholstering was done by women on piecework, and a quick needlewoman often earned very high wages during the time she was at work. As business increased, and work was more minutely subdivided, girls were engaged on weekly wages, and persons were found to undertake certain portions of upholstering at wages far lower than had previously been paid to fully competent hands.

MATTRESS STUFFING.

The principal materials used in stuffing mattresses, palliasses, bolsters, pillows, chairs, sofas, and cushions are: Horsehair, feathers, Ceylon fibre, cocoanut fibre, hemp, flax, kapok, pulu, stringybark, seaweed, white flock, and black flock. Of these the best and most expensive are horsehair, feathers, the various kinds of fibre, kapok, and pulu. Seaweed is objectionable on account of its tendency to absorb moisture from the air, and become damp and offensive; white flock is the waste product of cotton mills, and is largely used in upholstering the cheaper classes of imported furniture. Black flock, or, as it is called in the trade, "Melbourne wool," is made from the filthy woollen rags collected by ragpickers from street dustbins and refuse heaps. Without undergoing any process of purification or disinfection, these choice pickings are usually taken straight to the flock-mill, where the "teaser" reduces them to fluff, which is then sold to upholsterers who use it largely in the production of cheap furniture. The boys who tend the teasing mills, and the hands who stuff black flock mattresses, generally wear respirators, but the filthy dust of this abominable material frequently nauseates them in spite of that precaution. Although every upholsterer is opposed to black flock, it is nevertheless employed to a much greater extent than all other classes of stuffing material, and its use is undoubtedly a menace to the public health, since the very beds and couches have become the vehicles by which disease may be spread. Pretentious-looking upholstered chairs and couches stuffed with this material have been opened and found swarming with larvæ, and ordinary cheap mattresses not long in use have been found in a like condition. It is apparent, therefore, that the public health is regarded as a matter entirely subordinate to personal profit by the furniture dealers who impose upon the confidence of an unsuspecting people a deception so atrocious. Even if it were cleansed and disinfected it would still be repugnant to most people, and its use would be rendered impossible if people were careful to find out what the covers of their sofas and mattresses conceal.

During

During the last few years the almost complete displacement of the palliasse by the wire or spring mattress has formed a noticeable feature in upholstery. Its lightness, cleanness, and general suitability to the climate of this Colony has brought it very rapidly into public favour, and the proportion of palliasses now sold is scarcely one to a hundred of its new-born rival. The palliasse-maker has drifted into other branches of the trade, and the carpenter and the wire-worker—or, more correctly speaking, wire-working machinery—have taken his place. In one firm where three years ago five palliasse-makers were constantly employed, not one is now engaged, but the rough carpenter is found instead putting together the frames, while a boy guides the wire curling and twisting machine.

FRENCH POLISHING.

In the Metropolitan district there are about 300 men engaged in the polishing trade, about one third of whom are out of employment for three or four months of the year, during the periods of slackness prevailing in this as in other branches of the furniture industry.

The usual length of a week's work is 48 hours, though in a few shops it is from 2 to 3 hours longer.

The rate of payment for work done by the piece varies with the quality of the work from 3d. to 8d. a foot, but the average weekly earnings at these rates will not differ much, the more highly paid classes of work requiring more time than the inferior classes. The earnings of journeymen on piece-work range from 50s. 6d. up to 60s., and average 52s. a week.

The rates of weekly payment vary considerably, and some of the workers are able to make good wages, though it by no means follows that the best tradesmen receive the highest rates, but rather the contrary, since inferior hands who get through much work are most in demand. The grades of workers and the highest, lowest, and average wages recorded for each, are set forth in the following table:—

Grade.	Weekly Wages.		
	Highest.	Lowest.	Average.
Foremen.....	72/-	55/-	60/6
Journeymen	60/-	40/-	49/6
Improvers	43/-	12/6	24/-

The French polishing of furniture was formerly done by day work in the shops of the manufacturers, but there is now a growing tendency in favour of sub-letting it to the lowest tenderers, with the natural consequence of encouraging inferior work and extending the hours of labour. Similar bad results follow from the practice of sub-letting contracts for polishing the fittings of buildings, which is usually done by furniture polishers. It is customary in the first instance to sub-let the contract for painting and polishing, and the sub-contractor usually again sub-lets the polishing, naturally at a profit to himself. This sub-contract is carried out on piece-work, and it not infrequently happens that there are three or four persons who, without any risk or trouble, make a profit out of the work of the polisher. In the interest of honest work, and to enable the polisher to reckon on fair wages, this system should be as much as possible discouraged by all connected with the trade.

Although proper instruction is necessary to make a competent workman, yet it is a very easy thing for beginners to learn a little of the polishing trade, and the greater part of the undercutting and swagging induced by the sub-letting of contracts is due to the existence of a large body of half-taught polishers, who will take any job at a very low price and do it badly.

Great skill is displayed by some polishers in producing on wood, such as Huon or kauri pine, imitations of other and more valuable timbers so perfect that it is difficult in some instances to distinguish them from the genuine article.

Apprenticing to the trade is now very rare. Boys begin at 5s. a week and work up, sand-papering the wood, filling in the grain with plaster of Paris, oiling, giving first coat, and so on until qualified to rank as improvers.

CHAIR-MAKING.

The importation of Austrian chair frames has so seriously affected the business of chair-making that a large proportion of those at one time engaged in the industry have found it impossible to obtain work at their trade. These men naturally turned their attention to cabinet-making, but as the knowledge required in that trade is essentially different from that of the chair-maker, they have found that the change involved considerable hardship.

The working time is generally 8 or 9 hours a day, and a good hand receives 50s. to 60s. a week, and improvers, 22s. to 25s. a week.

Very few men are at present employed solely at chair-making, those who put together imported frames being mostly rough carpenters or packers, whose weekly wages are very little higher than the average of ordinary unskilled labour.

CARVING.

The greater portion of their most important and remunerative work, comprises capitals for columns, mouldings, brackets, and other architectural details, so that carvers, although classed as a subdivision of cabinet-makers, might, with equal propriety, be treated as an independent trade. Yet their general condition is so much influenced by the state of the cabinet-making industry that it may not be thought inappropriate to deal with them here.

The trade has for a considerable period suffered from a serious depression, the severity of which has been greatly increased by inconsiderate internal competition. At the present time there remain in Sydney not more than fifty carvers, and even for this small number employment is very irregular, and extends over only about eight months in the year. Almost all work is done by the piece, and 9 hours usually constitute a day's work, the wages ranging from 9d. to 1s. 4d. per hour, according to the state of the trade and the ability of the workman.

There is no union or organisation among the operatives, and in slack times competition is so keen that work is undertaken at very reduced rates.

TURNING.

TURNING.

In this branch of the furniture industry competition during the last few years has become very keen between the large joinery mills, where most of the work is done by machinery, driven by steam power, and the smaller shops, where hand power is mostly used. A man who can engage a lathe at one of the mills is enabled to work at a lower rate than the small turner who provides his own motive power, and by using up odd lengths of timber from the mill can make table legs and sell them in sets lower than their price if made of material procured in the ordinary way. As illustrating the great fall in prices, it may be mentioned that less than ten years ago the contract price for the supply of insulators to the Telegraph Department was 45s. per 100; three years later it was 35s. per 100 to the same firm; in the year following another contractor supplied them at 30s. per 100; a year later a third undertook the work at 19s. 6d. per 100, and again at 15s. 6d. per 100; and for the last two years the price has been 14s. 6d., or less than was formerly paid to the turner for making them. These insulators are of Australian hardwood, the pin being 10 inches long with a 2-inch worm, and the turner's wages during the period above mentioned fell from 16s. 6d. to 2s. 6d. per 100.

Apprentices are found in nearly all the mills, and are usually indentured for five years at a progressive wage of 5s. to 20s. a week. The wages of journeymen range from 45s. to 66s., the average earnings of those on weekly wages being 57s., and of piece-workers, 58s. a week, while improvers are paid 30s. to 40s. a week. The hours of labour are usually 48 per week, but as there is no trade organisation, men will, in dull times, work longer hours for lower wages. These slack periods generally last for three or four months every year. Turners generally provide their own tools to the value of about 20s. There are about 100 workers in this trade in the Metropolitan District, to which it is almost exclusively confined.

CANE, PITH, AND WICKER WORK.

During recent years there has been a great development in the manufacture of furniture from cane, pith, and wicker, and despite the importations from Germany, China, and elsewhere, the local factories at Sydney and Newcastle display considerable activity. The articles made of those materials are specially adapted to this climate and have to some extent superseded the heavier kinds of furniture.

Cane or rattan comes principally from China, Java, Singapore, and Calcutta, and costs from 6d. to 1s. per lb. For common basket ware the ruling price is from £16 to £20 per ton.

The outside or skin of cane is chiefly used for seating chairs, &c., while the pith or inside is twisted into basket work chairs of various kinds.

For wicker work the material used is mostly the ozier willow grown in Tasmania, and worth about £30 per ton.

It is estimated that there are about seventy men and thirty boys employed in the trade in Sydney and Newcastle. Some apprentices are bound for three years, others for four or five years, at wages rising from 5s. to 20s. per week.

Formerly there was a Cane and Wicker Workers' Union, but finding itself powerless to control the trade, or even its own members, the organisation speedily came to an end. During its existence the Union endeavoured to establish the principle that an employer should engage not more than one apprentice to every three men. An effort was also made to enforce a fixed price for piece-work, and a uniform rate of 1s. per hour for all articles not on the list.

The present rate of wages varies from 40s. to 70s. a week, and the earnings of a skilful worker will average 60s. a week for nine months in the year.

The hours of labour are not everywhere the same, but a week's work averages about fifty hours.

A few females in their own homes engage in the manufacture of cane chairs and basket work, and earn on an average from 15s. to 20s. per week.

The local manufacture finds formidable rivals in the German made fancy basket ware and the lounges, chairs, blinds, &c., imported from China and other countries in rapidly increasing quantities. It is said that some firms send samples of locally made wares to China with orders for goods of a similar description, and local manufacturers complain that their business is greatly injured by the practice.

PICTURE-FRAME MAKERS.

This industry has never attained a position of importance and is now reduced to a very low ebb. The materials used for frames of pictures are imported for the most part from Germany. Some oak and hardwood mouldings are made in Sydney, but the quantity is too small to provide continuous employment for more than a few hands. The principal occupation of those employed in this trade consists in making frames to order from imported materials. The hands are recruited mainly from the ranks of the carpenters and joiners.

Including gilders, who are in some sense associated with the frame makers, there are about sixty men employed in this business, but the work available is not sufficient to keep this number in full work for more than nine months in the year.

The hands are engaged almost without exception by the week and the rates of wages are, for first class gilders 60s. per week, for others doing gilders work 40s. to 50s. per week. Frame makers and glass cutters work eight to nine hours, and are paid 7s. to 8s. per day.

There is no organisation in the trade, and the conditions of labour differ greatly in the different shops, and although both hours of labour and rates of wages are quoted, these must not be interpreted too strictly, as the trade is in an altogether unsatisfactory state, and men are willing to work longer hours, if necessary, to keep their employment.

VENETIAN BLIND MAKING.

The materials most commonly used in the manufacture of Venetian blinds are redwood and clear pine, which are imported from the United States. In the busy season it is estimated that, including boys and apprentices, about 100 persons find employment in this trade. During about three or four months, however, business is dull, and a large proportion of the workers are compelled to seek employment in other trades, such as upholstery and joinery, while, as might be expected, a good many persons belonging

belonging to these trades take up Venetian blind making during the busy season. A large number of females were formerly employed sewing loops on the webbing, but these are now woven in by the web manufacturers, so that few females are at present employed.

The usual length of a day's work is nine hours, and the average wages are, for journeymen, 45s. per week, and for boys from 10s. to 18s. per week.

MAT MAKING.

With the exception of one private establishment, where ten hands are employed at wages ranging from 16s. to 30s. per week, mat making in Sydney is carried on only in Darlinghurst Gaol and the Industrial Blind Institution.

The material used in the manufacture is coir, or coir yarn, from India, and the mats usually have some device, or pattern, or a name of the house, firm, or person, woven into the texture. Mats imported from Calcutta are usually plain and are sold at prices from 30 per cent. to 40 per cent. lower than the locally-made article, much of which is made to order and to measure. The prices are, for imported mats, 6d. per lb., for the locally-made, 8d. to 9d. per lb., for mats of equal quality.

At the Industrial Blind Institution there are fifteen persons engaged in mat making who are paid by results, and earn from 15s. to 20s. a week.

APPENDIX.

CHINESE IN THE FURNITURE TRADES.

FURNITURE making is the only manufacturing industry in which Chinese have exercised an influence prejudicial to Australian workmen. Their opposition, however, is now much less powerful than it was three years ago, and under the operation of the Chinese Restriction Act it will presently disappear.

Conditions.

It is popularly supposed that Chinese live on food of a cheap and inferior character, but this belief is entirely erroneous. The cabinet-makers have regularly three meals a day, of which salt-fish, rice, pork, cabbage, and the cheaper kinds of tea, constitute the principal items. On Sundays these are generally supplemented by poultry of some kind and gin.

The workmen invariably live on the premises where they work, and the most objectionable characteristic of the sleeping accommodation is the entire neglect of the most ordinary sanitary requirements in regard to cubic space. The dimensions of a number of rooms have been taken, and it is found that 500 cubic feet is the average space allotted to each sleeper. In many cases, however, the space is much less than this average, 300 cubic feet to each person being all that is available in some of the rooms examined. The buildings are mostly of the ramshackle order, and on that account the ventilation as a rule is sufficient, but the stench is tolerable only to Chinese nostrils. The sanitary condition of their workshops is for the most part poor in the extreme, but it must be said in their favour that the workers invariably bathe at the close of each day's labour.

As a rule their habits are simple, their wants few, and their expenses small. They never fail to send home regular remittances for the support of their wives and children, or other relatives. Their amusements are necessarily few, for owing to their lengthy hours of labour they have very little time to spend away from their lodgings. Few masters will employ opium-smokers, even on piece-work, for they are usually indolent and unsatisfactory workers. They also object to men who gamble, as they well know from experience, that when the love of gambling seizes a man he ceases to be a good workman. Gambling is very prevalent, but it is carried on almost entirely in the dens so plentiful in Sydney. Domino playing is one of their principal sources of amusement and certain games of cards are also very popular amongst them.

Employers describe their men as peaceful, sober, methodical, honest, learning quickly, imitating cleverly, and protecting to the best of their ability the interest and property of their employers. Masters and men are on familiar terms and talk together with the greatest freedom.

The hours of labour are from 6 a.m. to 6 p.m. in summer, ceasing at an earlier hour in winter. Half-an-hour is allowed for breakfast and the same for dinner, the men losing no time in going backwards and forwards by taking their meals on the premises. Much longer hours than those above stated are sometimes worked when required, but men on weekly wages receive no pay for overtime, and piece-workers receive no advance on the price for work done in ordinary time.

In every shop a schedule of prices paid to piece-workers is hung up in a prominent place for the information of applicants for employment.

Wages.

Men who were satisfied with 15s. or 20s. a week before the Restriction Act was passed have since become more independent in consequence of the limitation of their numbers, and now demand and receive a regular wage of 25s. to 30s. with board and lodging. Good cabinet-makers can earn 32s. to 35s., and even more, with board and lodging, which is equivalent to an additional 9s. per week.

Some twelve months since a strike amongst the Chinese cabinet-makers resulted in an increase in the piece-work price of several articles, equivalent to a general advance of 10 per cent. Another outcome of the strike was that a considerable number of employees set up on their own account. In most cases they associated themselves in companies of three or four, and no machinery being required a capital of £8 or £10 each sufficed to start them in business. In April and May last year further agitations produced a slight additional increase in the rates paid.

It was a common practice, but not now so general as in former days, for workmen to draw only sufficient of their earnings to defray current expenses, leaving the balance to accumulate in the hands of their employers, to be paid without interest at their final separation. The item of lodging is thought so unimportant as not to be worth taking into consideration in the matter of payment, but 9s. or 10s. a week is deducted from the earnings of each piece-worker to pay for his food, the supply of which is estimated to cost employers 9s. a week for each man. The workmen find their own tools and usually work in their national costume without covering to their feet, and their expenditure on clothing does not exceed an average of £5 per head per annum. Allowing for tobacco, and occasional indulgences at festivals, men who do not gamble are able to save a fair sum during the year. As already explained, a certain amount is annually transmitted to their relatives in China, as the filial piety inculcated by their religion requires of them, but in spite of this the steady workman continues to lay by something in expectation of the day when enough has been saved to enable him to live at ease in his own "flowery land," whither he loses no time in returning.

The Chinese carpenters are exceedingly economical workmen. Timber that would be rejected as unfit for use by the ordinary Australian is utilised in some way or other, so that nothing comes amiss and there is absolutely no waste in his work. The timber they buy is usually selected in lengths an Australian tradesman would consider too troublesome to work. Old packing cases are used up for backs of meat-safes and similar articles, and parts not seen, such as bottoms and backs of drawers, are seldom even roughly planed. Their small economies of various kinds do more to make their competition against the Australian tradesman effective than their long hours and lower wages.

Where the business is extensive, in order to allow a departure from the standard thicknesses of the saw-mills and to effect certain economies of material, the timber is generally sawn upon the premises. The sawyers are rarely Chinese, who do not appear to possess strength for the work, or perhaps think their energies better employed in other directions. Only one firm has yet procured any machinery worth noticing, and it is surprising to see how much they contrive to do without it. Their manual skill is considerable, and the dexterity with which they hold and guide the material and keep it in position with their toes, renders each foot almost equivalent to another hand.

The profits of Chinese cabinet-making are not so great as formerly, owing partly to the advance in wages brought about by the strike above mentioned, and partly to the competition of the small co-operative establishments alluded to, which are the chief supporters of the furniture auction sales. Another source of trouble is the determination of a large local firm to undersell them in their own special lines. By the aid of complete machinery it is likely the firm in question will succeed in their purpose, especially if the upward tendency of the wages of Chinese workmen is maintained. Taking all things into consideration it is evident that the lot of the Chinese cabinet-maker is not so prosperous as once it was.

SETTLEMENT OF DISPUTES.

With regard to the method of settling differences between masters and men a great deal may be learnt from the Chinese. When a matter involving a conflict of opinion arises the question is first argued at length by the master and his workmen. Should no satisfactory arrangement be arrived at, a deputation of workmen waits upon the master, and the facts are again discussed. If the dispute is not then settled, the party aggrieved has the option of calling together what is known as a "Ki Fong," that is, he issues invitations to some of the principal Chinese in business in the city, who meet at an appointed place, hear the parties, and after weighing the arguments, at once settle the matter by a vote of the majority. Their verdict is in all cases final, and is seldom if ever appealed against or disregarded.

The "Ki Fong" has frequently been the means of preventing very expensive law proceedings and prolonged conflicts between employers and employed. In selecting its members preference is always given to the most highly educated and intelligent men, who rarely refuse to adjudicate when called upon, as it is regarded as an honor to be so selected. It is worthy of note that no witnesses are called, the verdict being based upon the statements of the contending parties alone.

There are at present in Sydney eight or more different groups or tribes of Chinese, each composed of men from the same district in the land of their birth. Before sailing from Hongkong each man receives a list of the principal houses of business belonging to people of his own tribe in the city of his destination, to some of whom he makes himself known immediately on his arrival. The members of each tribe use their best endeavours to promote the welfare of their fellow tribesmen, and the preference given to them in all matters of business is very noticeable, especially in some establishments where members of a particular tribe are employed to the exclusion of all others.

The general condition of Chinese life in the Colony has been discussed at some length, as it bears directly upon the question of competition between Chinese and Australian tradesmen. It will be seen that there is not such a wide difference as is generally supposed between the wages of the two nationalities, and the food consumed by the Mongolian is, in point of quality and value, not much below that enjoyed by the Australian. The working day of the former is some two and a half hours longer, but the latter has a compensating advantage in the greater use of machinery and the better quality of work done. The points where the Chinese gain most advantage are—economy of material and contentment with inferior conditions. The first, it will be acknowledged, is a virtue, or something very like one; the second is emphatically a matter calling for the intervention of the sanitary authorities. The wretched sleeping accommodation already referred to, as well as the common lodging-houses in this city, whether occupied by Chinese or by Australians, are a source of danger, not to their inmates only, but to the entire community, and demand some sweeping reform.

Were the Chinese operatives compelled by law to observe proper sanitary precautions, and had they the same standard of comfort in their dwellings as Australian workers generally insist upon, the competition between the two races would be purged of some of its evils, and placed on the same footing as in other branches of industrial enterprise.

Present

Present prices paid by Chinese furniture houses for work done by the piece.

	Each.	Average time taken.		Each.	Average time taken.
Cedar wardrobe, 3-drawers, pine or cedar	30/-	4 days.	3-ft. toilets, pine or cedar, marble and tile, per pair.....	17/-	2½ days.
Do 1-drawer, do ...	27/-	3½ "	Common cedar safes	5/-	1 day.
Round corner book-case, do ...	30/-	4½ "	Do size a little larger...	5/6	1 "
Square do do do ...	25/-	3½ "	Common pine safes.....	3/-	2 per day.

3-ft. do	18/-	2½ "	Very common do	2/-	3 "
Chiffonier, ordinary size	10/-	1½ "	Writing desks or table (covered).....	30/-	5 days.
4-ft. toilets, pine or cedar, marble and tile, per pair	25/-	4 "	4-drawer chest.....	8/6	1½ "
3-ft. 6-in. toilets, pine or cedar, marble and tile, per pair	20/-	3 "	Dinner waggons	16/-	2½ "

NOTE.—The above articles are those made mostly by the piece-work men, and are simply made up in their rough state, that is, put together ready for the sandpaper man and the polisher to turn out. The timber is cut and got ready by the man in charge of the sawing department, and the quantities as required are handed over to the workman.

1891-2.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CENSUS OF NEW SOUTH WALES, 1891.
(POPULATION RETURNS.)

Ordered by the Legislative Assembly to be printed, 23 March, 1892.

RETURN of the Population of New South Wales, showing the number in each Division of the Colony; the increase of population during ten years since the Census of 1881 in each Division of the Colony; and the Ages of the People.

* The Census of Lord Howe Island was not enumerated by this Colony in 1881.
 Note.—In 1881 the Chinese numbered, males, 10,141; females, 64; total, 10,205; and in 1891, males, 13,555; females, 601; total, 14,156—which shows an increase of males, 3,414; females, 537; total, 3,951. The aboriginal population for the Census years cannot be compared, as the number enumerated in 1881 only included those within the bounds of civilization.

Government Statistician's Office,
 Sydney.
