Debiting each Department with its proper share of the salaries of officers in charge of combined Post and Telegraph Offices, the foregoing figures show that the revenue of the Post Office and Money Order and Government Savings Bank Departments (including interest on investments) exceeded the expenditure from the votes of those Departments, and interest added to depositors' accounts in the case of the latter, by £219 1s. 2d. and £5,281 13s. 11d. respectively, while the expenditure of the Electric Telegraph Department was £84,776 7s. 6d. in excess of the revenue thereof.

Adding the expenditure on account of the services of the Postmaster-General from the votes of other Departments, and the interest on the cost of buildings and construction of telegraph lines, the expenditure properly chargeable to the Departments under my control for the year 1892 was £922,693 9s. 11d., or £180,070 2s. 10d. in excess of the revenue for the same period.

POSTAL AND TELEGRAPH CONFERENCES.

The usual Annual Conference of Delegates from the whole of the Australasian Colonies, with the exception of New Zealand, met at Hobart in March, 1892. The proceedings having been laid before Parliament in August of that year, I do not deem it necessary to make any special allusion to it now.

In my last Report I alluded to the agreement entered into in the year 1891, on behalf of the Colonies of New South Wales, Victoria, South Australia, Western Australia, and Tasmania, with the Eastern Extension, Australasia, and China Telegraph Company (Limited), whereby that Company undertook—with a view of giving increased facilities to the public using the telegraph service—to effect a reduction, speaking generally, of from about 8s. 10d. to 4s. per word in the rates charged for telegrams exchanged between Australia and the rest of the world, on condition that the Colonies named above jointly guaranteed to pay the Company one-half of the amount of receipts short of the sum of £237,736 (that being the amount of the Company's receipts for 1889, after deducting out-payments), the Company bearing the loss of half the amount received short of that sum.

This agreement took effect on and from the 1st May, 1891, and the proportion of the loss payable by New South Wales, on the basis of the respective populations of the Colonies concerned, for the year 1892 was £15,397 7s. 8d.

It was anticipated that the revenue derived from increased business would more than cover the loss through the reduction in the rates, but such was not the case.

A Conference of Delegates from New South Wales, Victoria, and South Australia was in consequence held in August, 1892, in Melbourne, mainly for the consideration of a proposal to increase the rates for cable messages, the following being the resolutions agreed to on the subject:—

1. That in view of the heavy loss sustained by the principal Colonies in connection with the cable guarantee dated 31st March, 1891, it be a recommendation to the respective Governments concerned that the following alteration in the tariff be adopted with the concurrence of the Eastern Extension Cable Company, and brought into operation on the 1st October next, viz. :—
 Ordinary messages to be increased from 4s. to 4s. 9d. per word.
2. That the extra cost of 9d. per word be apportioned as follows, viz. :—
 To Cable Companies, 7d.
 To South Australia, 2d.
3. That the proposal by the Government of New Zealand to join the Colonies of New South Wales, Victoria, South Australia, Western Australia, and Tasmania in the present guarantees to the Eastern Extension Cable Company and the Government of South Australia be accepted by the Colonies mentioned.
4. That the Honorable the President of the Conference be authorised to communicate with the Eastern Extension Cable Company and the Governments of the other agreeing Colonies (other than New South Wales and South Australia), conveying the result of this Conference, and to have charge of all.

all correspondence relating thereto and of the arrangements necessary to bring the resolutions of the Conference into effect upon their being confirmed by the various Governments.

As it was found impossible to complete the arrangements necessary for bringing the resolutions into effect before the close of the year, the increased rates did not come into operation until the 1st January, 1893.

Full reports of the proceedings of this Conference have been laid before Parliament and printed.

I.—POST OFFICE DEPARTMENT.

INLAND SERVICE.

The new postal routes opened during the year 1892, as shown in the annexed return, amounted to 1,733 miles, viz. —

Postal Line	No of times per week	Postal Line	No of times per week
<i>In the Western Country.</i>		<i>In the Southern Country—continued.</i>	
From Bena to a point on Marsden's Waroo mail line	1	From Kiah to Green Cape	1
Boppy Mountain (on Nyngan Cobar Railway Line) to Booroomugga.	1	Kiama to Jerrara	6
Canowindra to Eugowra	2	Krawarree to Jinden	3
Canowindra to Nyrang	2	Mahratta to Bondi	3
Cobar to Baden Park Station	1	Mahratta Station to London	1
Cobar Railway Station to Post Office	3	Moss Vale to Meryla	2
Cobar to Wilcanma	2	Mount Kembla to Kembla Heights	6
Coolabah to Monkey	1	Mullengandra to Morven	2
Curra Creek to Bournewood	1	Narrandera to Darlington Point	3
Dural to North Dural	3	Narrandera to Mount Crystal	2
Goolma to Cobbora	1	Pericoe to Nangutta	1
Hermidale Railway Yard to Post Office	3	Tarago to Windellama	3
Junction of Castle Hill and Haven Roads to Post Office, Sandhurst.	6	Temora to Stockinbingal	3
Katoomba to Megalong	6	Tocumwal to Deniliquin	2
Millthorpe Railway Station to Post Office	12	Torrowangee to Corona	1
Mount Drutt to Colyton	6 or oftener.	Timberumba to Meragle	1
Mungunyah to Gumbahle	1	Whinstone Valley to Jerangle	2
Narramine to Tomingley	2	Wollongong to Balgownie	12
Obley to Obley Vale	1	Yass Tramway Station to Post Office	12 or oftener.
Round Corner (Dural Road) to Kenthurst	6		
St Mary's to Werrington	6	<i>In the Northern Country.</i>	
"The Meadows Hotel" (on Cobar Wilcanma 'mail line) to Innesowen	1	From Bald Nob to Glen Elgin Mines	1
Tomkins' (near Trundle) to Cardungle	1	Ben Lomond Railway Station to Wandsworth	3
Wallace to Greendale	6	Brushgrove to Lower Southgate	6 or oftener
Whylandia (on Dubbo Belarbigill Mail Line) to Minore	2	Coonabarabran to Blantyre Station	1
Woodlands (on Forbes Dandaloo Mail Line) to Landsdale	2	Currabubula to Clifton Station	2
		Dunoon to Dorrroughby Grass	3
		Fennmount to Bellingen	As required
		Gerrymberryn to Seelands	2
		Gladstone to Loftus Bridge	2
		Krambach to Clarkson's Crossing	3
		Laguna to Central Wattagan	3
		Macleay to Shark Creek	2
		Moree to J. Stancombe's	1
		Muswellbrook to Muscle Creek	2
		Never Never to Dorrigo	1
		Nicholls' (on Inverell Bonshaw mail line) to Pindari	2
		North Pimlico to German Creek	3
		Rawden Vale to Curracabark	1
		Singleton to Bloomfield	1
		Stewart's Brook to Bluey (Upper Camp)	2
		Walcha to Moona Plains	2
		Wickham Post Office to Railway Station, Honeyuckle Point	12
		Wingham Post Office to Steamers' Wharf	3
		Woy Woy Railway Station to Post Office, Blackwall.	6
		<i>Suburban Roads</i>	
		From Steamers' Wharf to Post Office, Longueville	12
		Kogarah to Sans Souci	12
<i>In the Southern Country.</i>			
From Adamniby to Boconnoc	1		
Albion Park to Yellow Rock	6		
Anstinner Railway Station to Post Office	12		
Barber's Creek Railway Station to Post Office	6		
Bermagui to Muriah	2		
Berry to Broughton Vale	3		
Bombo Railway Station to Post Office	12		
Broken Hill to Euriovie	2		
Bungendore to Gundaroo	1		
Burrawang to Avoca	6		
Carabost to Book Book	3		
Cooma to Murrumbucca	1		
Corona Head Station to Quynanbi Station	8		
Corowa Railway Station to Post Office	3		
Germanton to Mangopla	3		
Gundagai to Bongongolong	2		
Gunning to Berrebangalo	2		
Hay to Eurugabah	1		
Johnston's Gate (on Nimbybelle and Bega mail line) to Meringlo	2		
Kangaroo Valley to Upper Kangaroo River	2		

The postal routes abolished, amounting to 690 miles, are shown in the following return:—

Postal Line.	No. of times per week.	Postal Line.	No. of times per week.
<i>Western Roads.</i>		<i>Southern Roads—continued.</i>	
Between Cobar and Innesowen	2	Between Lyttleton and Meringlo	1
Dural and Kenthurst	3	Mahratta and Craigie	1
Faulconbridge Railway Platform and Post Office.	6	Morven and Cookardina	3
Mungunyah and Gumbalie	1	Nelligen Post Office and Steamers' Wharf	1
Yarragreen (near Mundooran) and Bearbong.	2	Tarago and Lake Bathurst	6
		Tumut and Lacmalac	2
		Ungarie and Bygalorie	1
		Whinstone Valley and Captain's Flat ...	1
		Wolumla and Merimbula	1
		Wombat and Young	3
<i>Southern Roads.</i>		<i>Northern Roads.</i>	
Between Bungonia and Windellama	3	Between Armidale and Wollomombi	2
Cargo and Canangles	1	Camden Haven and Kendall	4
Darlington Point and Tubbo	3	Cooranbong and Mandalong	2
Euriowie and Purnamoota	2	Kyle and Clarkson's Crossing	3
Fairy Meadow and Para Meadow	1	Midgeegrass and Perimée	2
Fairy Meadow Railway Station and Post Office.	2 daily.	Nullamanna and Pindari	2
Gainor's Hotel (on the Euriowie-Purnamoota mail-line) and Corona Mines.	2	Wandsworth and Inverell	3
Hay and Eurugabah	1		
Ingleburn Railway Platform and Post Office.	6		
Kiama Railway Station and Steamers' Wharf.	12		
Kybean and Countegany	1		
		<i>Suburban Road.</i>	
		Between Canterbury and Belmore	6

Increased communication on existing lines was afforded as follows:—

Postal Line.	No. of times per week.		Postal Line.	No. of times per week.	
	From	To		From	To
<i>Western Roads.</i>			<i>Southern Roads—continued.</i>		
Between Bathurst Railway Station and Post Office.	2 daily.	3 daily.	Between Kiama and Jamberoo	6	12

Cooma and Adaminiby, <i>via</i> Rhine Falls.	2	1			
Laggan and Peelwood	3	2			

The extent of postal route traversed in the Colony on the 31st December, 1892, was 32,300 miles, as compared with 31,257 miles traversed in 1891—

	1891.	1892.
On horseback	11,802 miles	11,616 miles.
By coach	16,370 "	17,467 "
By railway	2,255 "	2,384 "
By tramway	18 "	21 "
By steamer	812 "	812 "

The number of miles travelled in the year 1892 was 8,568,700, being an increase of 333,700 on the mileage of the previous year.

The extension of mail route by railway during 1892 was as follows:—

Nyngan to Cobar... ..	82 miles.
Culcairn to Corowa	47 "

and by tramway—

Yass Junction to Yass	3 "
------------------------------	-----

The number of Post Offices established was 54, viz.:—Barber's Creek, Bective, Bombo, Bongongolong, Broughton Vale, Budgambi, Cobham Lake, Colyton, Corindi-Clarence, Cuttabri, Deep Creek, Dunbible Creek, Eatonsville, Ford's Bridge, Green Cape, Harnleigh, Irvington, Jerrara, Kembla Heights, Kew, Kiah, Leadville, Long Flat, Longueville, Lower Tarcutta, Megalong, Milburn Creek, Milson's Point, Mount Druitt, Muscle Creek, Nadjingomar, Nana Glen, New Italy, New Lambton, Newrybar, Newstead, Nymboida, Orton Park, Orundumbi, Pelican Island, Pemberton, Porcupine Gap, Ramornie, Salisbury Plains, Sandhurst, Sans-Souci, Tantawanglo, Torrowangee, Turlinjah, Tyringham, Upper Kangaroo River, Warge Rock, Woolwich, and Yellow Rock.

The Post Office at Macdonaldtown was re-established.

The number of Post Offices discontinued was 16, viz.:—Balderodgery, Belmore, Biloela, Blake Brook, Bourke-street Redfern, Coree, Dry Lake, Pemberton, Swallow's Nest, Tallewang, Tubbul, Upper Gundaroo, Wagonga, Wagonga Heads, Wee Jasper, and Winduella.

It was found desirable to change the designations of the following Post Offices, viz.:—Aliceton to Karuah, Budgambi to Copmanhurst, Bulga Creek to Yarralumla, Charleyong to Marlow, Copmanhurst to Upper Copmanhurst, Dora Creek to Brush, Hermitage Plains to Hermidale, Lower Gundaroo to Gundaroo, Mount Macquarie to Neville, North Yanco to Yanko, Para Meadow to Balgownie, Savernake to Warmatta, Trundle Lagoon to Trundle, West Balmain to Rozelle, and Yass Railway Station to Yass Junction.

In the Appendix will be found a list of the 1,423 Post Offices in the Colony on the 31st December, 1892. Appendix A.

203 changes of Postmasters occurred during the year.

Receiving Offices were established at the following places, viz.:—Ardlin, Athey's, Avoca, Baldry, Ballimore, Barnett, Belgrave, Bena, Binneguy, Bloomfield, Bluey, Bo Bo, Boconnoc, Bonnie Doon, Bournemouth, Brook's Creek, Bygalorie, Cable's Siding, Camboon, Carba, Central Wattagan, Cloverley, Collerina, Comarah, Comborah, Dilga, Dorrigo, Dorrroughby Grass, Glen Elgin, Grattai, Gullen Flat, Hughstonia,

Hughstonia, Jackson's Waterholes, Jinden, Lansdale, Lower Southgate, Mahratta Station, Markwell, Meragle, Meryla, Minore, Mooculta, Moona Plains, Mount Sherwood, Murrah, Muscle Creek, New Mollyan, New Park, North Dural, Norway, Nyrang, Oakey Creek, Obley Vale, Peacock Creek, Pudman Creek, Rockvale, Savernake, Seelands, Shannon Vale, South Codrington, South Rivertree, Spring Creek, The Tamarinds, Toomooromah, Tuggerah Lakes, Upper Horton, Wamboyne, Waugoola, Webb's Consols, West Bargo, Whipstick, Winduella, Wollun, and Woy Woy.

The names of the Receiving Offices at Glenreagh, Inglewood, Jump Up, and Mitchell's Creek were changed to Tallawudjah, Turill, Bungulla, and Daviesville, respectively.

The Receiving Offices at the following places were converted into Post Offices, viz. :—Barber's Creek, Corindi-Clarence, Cuttabri, Deep Creek, Eatonsville, Ford's Bridge, Irvington, Kew, Kiah, Leadville, Long Flat, Lower Tarcutta, Macdonaldtown, Milburn Creek, Milson's Point, Mount Druitt, Muscle Creek, Nana Glen, New Italy, Newrybar, Nymboida, Orundumbi, Pelican Island, Ramornie, Salisbury Plains, Tantawanglo, Tyringham, and Warge Rock.

The Receiving Offices at the following places were discontinued, viz. :—Abercrombie, Adjungbilly, Ballanafad, Borambil, Canangles, Gillenbah, Kildary, Lacmalac, Lode Hill, Millingandi, Mountain Top, Pampira, Ware's, and Whipstick.

Appendix B. In the Appendix will be found a list of the Receiving Offices in existence at the close of the year, showing the number to be 377.

Appendix A. Appendix A contains a return of the Government buildings for the transaction of the Postal, Money Order, Savings Bank, and Telegraph business, and particulars of the premises rented or otherwise provided for the purpose. Government buildings at the following places were completed and occupied during 1892, viz. :—Broken Hill, Cudgen Scrub, Kogarah, Maclean, New Lambton, Picton, Sutherland, Temora, and Wickham. Premises were purchased at Chatsworth Island and Harwood Island.

During the year 1892, 3 pillar letter-receivers were erected in different parts of the Colony, 4 were removed to different sites and two were withdrawn; 72 small iron letter-receivers were placed, 10 were removed to new sites, and 1 was withdrawn. Of other kinds of receivers 7 were placed.

On the 31st December the number of letter-receivers erected in the Colony (both large and small) was 1,048 and the number of newspaper-receivers 19.

During this year a new pattern small iron letter-receiver (designed by Mr. Dalgarno, the Secretary of the Postal Service) was introduced. It is about the size of the letter-box of the American pattern in use in the Colony for some years, but besides being more elegant in shape the new box possesses the following advantages over the American one, viz. :—The door opening in front enables the clearer to view the whole of the inside of the box, and thus prevents the possibility of letters being left in it, and the public can more readily find the posting aperture which is in front instead of on one side of the box.

One of the new advertising postal-pillars was withdrawn from a site in the Municipality of Newtown at the request of the Borough Council.

c. The number of licenses for the sale of postage-stamps issued in 1892 to persons other than postmasters or receiving-office-keepers was 231, the number transferred 59, and the number cancelled 7. In the Appendix is given a list of the persons holding these licenses throughout the Colony.

On the 31st December the number of locked private letter-boxes let at the General Post Office was 1,313, besides 69 allotted to Public Departments, for which no fees are paid. The system is now in operation at the following offices, viz. :—Adelong, Albury, Armidale, Ashfield, Ballina, Balmain, Balranald, Bathurst, Bega, Bombala, Bourke, Bowral, Braidwood, Broken Hill, Casino, Cobar, Condobolin, Coonamble, Cootamundra, Coraki, Deniliquin, Dubbo, East Maitland, Emmaville, Forbes, George-street North, Glen Innes, Goulburn, Grafton, Granville, Grenfell, Gulgong, Gunnedah, Hay, Haymarket, Hillgrove, Hillston, Inverell, Jerilderie, Junee Junction, Kempsey, Kiama, King-street, Lismore, Manly, Marrickville, Moree, Moruya, Moss Vale, Mount Victoria, Mudgee, Murwillumbah, Muswellbrook, Narrabri, Narrandera, Newcastle, Newtown, North Sydney, Nymagee, Orange, Pambula, Park-street, Parramatta, Queanbeyan, Silverton, Singleton, Tamworth, Taree, Temora, Tenterfield, Uralla, Urana, Wagga Wagga, Walgett, Wentworth, West Maitland, Wilcannia, Wollongong, and Young.

For

For the convenience of persons requiring boxes from the 1st April, 1st July, or 1st October, payment in advance at the annual rate for the period, nine, six, or three months, will now be received, provided that in the case of a box rented during the last quarter of the year the fee for the ensuing year is paid also.

Nine additional letter-carriers, and seven additional junior letter-carriers were appointed during the year 1892. The total number of these officials employed on the 31st December was 449 of whom 105 were attached to the head office, the remainder being distributed throughout the Colony, as indicated in the Appendix.

Appendix A.

The number of persons employed in connection with the Postal Department for the year 1892 was as follows:—1 Postmaster-General, 1 Secretary, 1 Assistant-Secretary, 1 Superintendent, Mail Branch, 1 Accountant, 1 Cashier, 1 Chief Inspector, 3 Postal Inspectors, 1 Assistant-Superintendent, Mail Branch, 10 senior clerks, 96 clerks, 1 clerk in charge of stores, 22 temporary clerks, 1 special inquiry officer for Missing-letter Branch, 36 mail-guards, 56 letter-sorters, 10 junior letter-sorters, 5 temporary letter-sorters, 55 stampers and sorters, 16 junior stampers and sorters, 4 temporary stampers and sorters, 4 sorters, 244 letter-carriers, 192 junior letter-carriers, 13 temporary letter-carriers, 63 mail-boys, 63 messengers, mail-cart drivers, porters, female servants, &c., 1 detective, 1,423 postmasters, 2 relieving officers, 102 postal assistants, 108 junior postal assistants, 113 temporary postal assistants, 38 receiver-clearers, 70 mail-carriers, 377 receiving-office-keepers, 745 mail contractors; total, 3,881. Three hundred and nine of the above also hold the position of station-master, operator, messenger, or probationer in the Electric Telegraph Department. Of the remainder, 385 hold the dual position of official Post and Telegraph Master.

Ten deaths occurred, viz., E. S. Atkinson, postmaster, Jerry's Plains; W. T. Lee, postmaster, Trunkey Creek; L. S. Mackay, postmaster, Carcoar; Mrs. E. de Trevana, postmistress, Denman; A. Bastable and J. Broderick, postal assistants, Bathurst; W. S. Stevenson, letter-sorter; and F. G. Farquharson and A. White, letter-carriers. The tenth was a person temporarily employed.

Twenty-four resignations took place, and the services of four officials no longer required were dispensed with.

The removals from the service numbered thirteen. Two of these—a postal assistant and a temporary sorter—each received sentences of six months' imprisonment for embezzlement and stealing a letter, respectively; and a third—a letter-sorter—was fined £20 for stealing a letter. The remainder were dismissed for the following offences:—

A postmaster, for failing to account for certain Savings Bank deposits.

A postal assistant, for irregularities in connection with Savings Bank transactions.

A letter-carrier, for misappropriation of letters; two others for absence without leave; and a fourth for intemperate habits and generally unsatisfactory conduct.

Two mail-boys, for irregular attendance and other unsatisfactory conduct; a third for using offensive language; and another for irregular treatment of a registered letter.

The Postal Inspectors in 1892 travelled a distance of 29,130 miles, and inspected the postal route appertaining thereto, visiting 489 post-offices, 71 of which were visited more than once during the year.

Amended regulations, setting forth, in conformity with the provisions of the 7th section of the Civil Service Act, 1884, the conditions of employment in the Departments under the control of the Postmaster-General, were introduced on the 1st June. The principal new features in these regulations are the fixing of the minimum and maximum rates of pay; the provision for annual increments to the junior staff up to a maximum of 30s. per week; the division of official Postmasters, Postal Assistants, and Operators into four classes—1st class, £340 to £400, 2nd class, £260 to £320, 3rd class, £180 to £240, 4th class, £100 to £160; the fixing of a scale of rent allowances to Official Post and Telegraph Masters who are not provided with quarters; also a scale of "district" allowances to officials stationed in remote localities; and the requirement of a certificate of competency from a Postal Inspector, or head of branch, before promotion of an official to a higher rank.

Prior

Prior to the 1st October, 1885, officers in charge of combined Post and Telegraph Offices received a portion of their remuneration from the Post Office, and a portion from the Electric Telegraph Department; but since that date the full salaries have been paid by the Post Office. A further extension of this principle was introduced on the 1st April, 1892, from which date the full salaries of all other officials holding combined appointments, such as Assistant and Operator, Letter-carrier and Messenger, &c., have been paid by one Department, thus saving a considerable amount of clerical labour. The total number of these combined officials, on the 31st December last, was 694.

Owing to complaints made that letters posted in the various suburban receivers before 5 a.m. (the first hour of clearance), failed to reach the addressees by the first morning delivery by letter-carrier, or to be included in the first despatch of mails to the country, it was decided to have the receivers in the city and adjacent suburbs (except Balmain and North Sydney, where the clearances begin at 11 p.m.) cleared at 12.15 a.m. instead of 5 a.m., from the 11th October. The delay complained of was due to the mail matter from the receivers reaching the General Post Office about the time when the mails arrive from the country districts, namely, between 6 and 7 a.m., thus leaving only about an hour available for sorting before the letter-carriers started on their first round. Under the new arrangement, immediately the correspondence reaches the head office, a staff of officials is in attendance to proceed with the sorting, which is completed in time for the first city delivery and the morning despatch to the suburbs and country.

FOREIGN SERVICE.

At the Postal and Telegraph Conference, held in Adelaide, in May, 1890, it was decided "That in any future mail contract across the Pacific Ocean, if arranged for by the Colony of New Zealand, the other colonies shall pay similar poundage rates to New Zealand to those paid by the non-contracting colonies to the contracting colonies for the mail service *via* Suez, each despatching country or colony paying all charges to destination."

Accordingly, when the contract between the New Zealand Government and the Union Steamship Company of New Zealand expired in November, 1891, it was renewed for another year, during which this Colony paid to New Zealand the following rates for the use of the service, viz.:—Letters, 12s. per lb.; Packets, 1s. 6d. per lb.; Newspapers, 6d. per lb.

As there was a probability of the service lapsing at the termination of the contract unless the Company could secure an increase in the contributions from the colonies to recoup the loss sustained by the Company owing to the reduction of postage on foreign correspondence to 2½d. per half ounce, the New Zealand Government opened negotiations with this Colony which resulted in the renewal of the contract for another year from November, 1892, this Department undertaking, subject to the approval of Parliament, to pay a lump sum of £4,000 towards the cost of the service, and the Company agreeing to forego the gratuity previously paid for the conveyance of the mails between Sydney and Auckland.

After the withdrawal, in November, 1884, of New South Wales, from the contract jointly entered into by it and New Zealand with the Pacific Mail Steamship Company of New York, for a four-weekly mail service between Sydney and San Francisco, *via* Auckland, an action in the Supreme Court was brought by the Company, against the Government of this Colony to recover the sum of £11,750, and interest thereon, alleged to be due for the conveyance of New South Wales mails by the Company's vessels from November, 1884, to November, 1885. The judgment of the Full Court, delivered on the 8th August, 1890, being adverse to the Company, leave was obtained to appeal to the Privy Council, which upheld the decision.

I give below the full text of the judgment delivered on the 13th February, 1892, by the Lords of the Judicial Committee of the Privy Council.

"Their Lordships entirely concur in the conclusion at which the Supreme Court of New South Wales has arrived, although they are not prepared to say that the language of the contract of the 3rd of June, 1884, is plain, or its meaning altogether free from doubt. Whatever may be the true construction of that agreement, and whatever may have been the respective rights and obligations of the appellants

appellants and the Postmaster-General of New Zealand when the Government of New South Wales withdrew from the contract, their Lordships are of opinion that the claims of the appellants in the present action cannot be supported.

“The contract of the 3rd of June, 1884, to which the appellants and the Postmasters-General of New South Wales and New Zealand were parties, was a contract for a mail service between Sydney and San Francisco by way of Auckland, to run for the period of two years, computed from the 29th of November, 1883. So long as the contract remained in full force the annual remuneration or subsidy payable to the appellants was to be £50,000, of which the Government of New South Wales was to contribute £18,750. But the Postmaster-General of New South Wales had the option of withdrawing from the contract at the end of the first year on giving three months' notice. He availed himself of this option, and withdrew on the 29th of November, 1884. On his withdrawal he ceased to have any voice in the management of the service, and the contribution from New South Wales ceased to be payable.

“While the notice of withdrawal was still pending, a proposal was made by the appellants to the Government of New South Wales that they should cancel the notice on the terms of being relieved from some portion of their contribution. There was a negotiation as to the extent of the relief. Ultimately the Government of New South Wales agreed to the appellants' proposal, on the footing that their contribution for 1884-85 should be reduced to the sum of £11,750, and upon the express condition that the appellants should procure the concurrence of the Government of New Zealand to this arrangement.

“The Government of New Zealand declined to concur, unless the appellants would make precisely the same reduction in their favour. This concession the appellants refused. Thereupon the Government of New Zealand, insisting that the Government of New South Wales were not at liberty to cancel the notice of withdrawal, and that under the New Zealand Post Office Act of 1881 they could prevent the New South Wales mails being carried by the appellants while receiving a subsidy from them, and also insisting that they had the right, if they chose, to require the appellants to maintain the full service with the diminished subsidy, compelled the Government of New South Wales to pay them £7,000 by the threat of putting in force their powers under the Act of 1881.

“After the Government of New South Wales had come under these terms, the Postmaster-General of New Zealand telegraphed to the appellants in the following words:—‘We give you permission to carry New South Wales mails to and from San Francisco.’

“In point of fact the service was never interrupted. During the year 1884-85 the appellants performed the very same services which they would have been required to perform if New South Wales had not withdrawn from the contract.

“The appellants now claim from the Government of New South Wales the sum of £11,750, as the agreed remuneration for their services during the year 1884-85. The answer of the Government of New South Wales is this:—‘We never agreed to pay you anything for the year 1884-85. Our proposal, was conditional on your procuring the concurrence of New Zealand to our remaining parties to the contract; you failed to procure their concurrence. We were not allowed to remain parties to the contract or to resume our position; and we have actually been compelled to pay £7,000 to New Zealand to prevent the stoppage of our mails, in consequence of your having failed to procure the concurrence of New Zealand.’ It appears to their Lordships that this answer, which is true in fact, is a complete defence to the appellants' claim for the sum of £11,750 as payable under an express agreement. The suggestion that was made during the argument that when the appellants received the telegram from the Postmaster-General of New Zealand, giving them permission to carry the New South Wales mails to and from San Francisco, the condition on which the Government of New South Wales offered to pay the sum of £11,750 was fulfilled, and that therefore they became bound to pay that sum to the appellants as well as the sum of £7,000 to New Zealand, scarcely deserves serious consideration.

“The alternative claim of the appellants is a claim as on a *quantum meruit*, upon an implied agreement that they were to be paid by New South Wales for the services rendered during the year 1884-85. It is plain that there was no implied agreement of the sort. The appellants submitted to the requirements of the
Government

Government of New Zealand and carried the New South Wales mails, because they accepted the view that the New Zealand Government could force them to do so. It was after they had acknowledged themselves to be powerless in the matter that the Government of New South Wales paid the Government of New Zealand to ensure the continuance of services which the appellants admitted they could neither withhold nor perform without the permission of the Government of New Zealand. At one time, indeed, they did demur to carrying the New South Wales mails without receiving remuneration from that Colony. The Government of New South Wales at once took offence, and pointed out that they could compel them to carry their mails under the New South Wales Post Office Act, paying a gratuity of a penny a letter. Then the appellants altered their tone. They wrote to say that, although they protested, they would not refuse to carry such mails as the Postmaster-General might be pleased to put on board. They added, that the meaning of their protest had been misunderstood, and they expressed a hope that they might still continue to enjoy 'the strong sympathy' which the Government of New South Wales had always felt towards their Company. Nothing could show more plainly that there was no implied contract for remuneration. The appellants consented to carry the New South Wales mails without requiring the gratuity of a penny a letter, in the hope that the Government of New South Wales would use their good offices on their behalf with the Government of New Zealand, and that in that way some arrangement might be made, more fair or at least more satisfactory to the appellants.

"In the result, therefore, their Lordships are of opinion that the appeal must be dismissed, and they will humbly advise Her Majesty accordingly.

"The appellants will pay the costs of the appeal."

The following returns show the dates of arrival and departure at and from Sydney and London of the mails per Union Steamship Company's steamers *via* San Francisco during the year 1892 :—

Average time occupied in the conveyance of Mails to and from Sydney and London:—

London to Sydney	33 $\frac{1}{2}$ days.
Sydney to London	34 $\frac{1}{2}$ "

The amount paid by each contributing colony, on the basis of population, towards the cost of the Federal Ocean Mail Service, for the year 1892, was as follows, viz. :—

New South Wales	£26,759 13 4
Victoria	26,576 3 4
Queensland	9,448 16 8
South Australia	7,491 1 8
Tasmania	3,513 13 4
Western Australia	1,210 11 8

The contribution from the United Kingdom is £95,000 per annum.

The following return shows the number of letters, packets, and newspapers despatched and received by the various ocean mail routes during the year 1892, as compared with similar information for the year 1891:—

The following statements for the year 1892 show the approximate net cost to the Colony of the Suez and San Francisco Mail Services.

Statement showing the approximate net cost to the Colony for the year 1892 of the mail service per the vessels of the Orient, and Peninsular and Oriental Steam Navigation Companies:—

<i>Dr.</i>	£	s.	d.	£	s.	d.
To New South Wales proportion of Colonial share of subsidy for carriage of mails	26,759	13	4			
Transit of mail-matter through European Countries, &c.	5,126	13	9			
Overland transit of mail-matter through Australian Colonies, cost of special trains, &c.	3,358	1	4			
				35,244	8	5
<i>Cr.</i>						
By estimated share of contributions from non-contracting Colonies, &c.	350	0	0			
Estimated share of transit rates on mail-matter from European Countries, &c... ..	1,150	0	0			
Estimated postages collected in the Colony	20,470	0	0			
				21,970	0	0
Estimated net cost to the Colony in 1892				£13,274	8	5
Estimated net cost to the Colony in 1891				£13,729	6	11

Statement showing the approximate net cost to the Colony of the San Francisco Mail Service for the year 1892:—

<i>Dr.</i>	£	s.	d.	£	s.	d.
To payments to New Zealand for the carriage of mails ...	2,344	16	4			
Cost of sea and land transit of mail-matter from Sydney to Auckland, San Francisco to New York, &c. ...	504	16	2			
				2,849	12	6
<i>Cr.</i>						
By estimated postages collected in the Colony				2,725	0	0
Net cost to the Colony in 1892				£124	12	6
Net cost to the Colony in 1891				£349	5	4

For several years past the Government of this Colony has contributed a subsidy of £1,200 a year towards the cost of steam communication provided by the Australasian United Steam Navigation Company once every four weeks to and from Sydney, New Caledonia, New Hebrides (Vila), Sandwich Islands, and Fiji, and £1,000 a year for a monthly service in connection with the above between the Islands of the New Hebrides—Sandwich, Tanna, Eromanga, Api, Mallicolo, and Espiritu-Santo. Owing to the strong expression of opinion in Parliament when the Estimates for 1892 were under consideration, against the continuance of these subsidies, they were allowed to lapse at the end of last year.

The rates of postage on commercial papers, posted in the Colony for transmission to all parts of the world except the Australasian Colonies, Fiji, New Guinea, and the Friendly, Marquesas, Marshall, Navigators', New Hebrides, Norfolk, and Solomon Islands (the rate to which remained at 1d. per 2 oz.), were amended from the 1st July as follows:—

Not exceeding 4 oz.	2½d.
Between 4 and 6 oz.	3d.
Every additional 2 oz.	1d.

The rate of postage on newspapers to foreign countries, except the United Kingdom (which was formerly 1d. for the first 4 oz. and ½d. for each additional 2 oz.), was from the 1st July made 1d. each newspaper, and for every weight of 4 oz. or under.

From the 1st September the rates of postage on mail matter transmitted to the South Sea Islands were adjusted so as to be uniform with the rates to countries in the Universal Postal Union. On the 14th November it was notified that this regulation would not apply to Fiji, Norfolk Island, and British New Guinea, which are British possessions, and considered to be embraced under the head of Australasia.

The regulations for the transmission of packets by post were amended so as to allow packets containing merchandise to be forwarded at the rate of 1d. for every 2 oz. or fraction thereof to Queensland, Tasmania, and Norfolk Island from the 19th April, and to the New Hebrides and Solomon Islands from the 5th May.

The

The limit of weight of packets of samples transmitted between this Colony and Belgium, Egypt, France, Hawaii, and Italy, has been raised to 12 oz.

Arrangements were made with the other Australasian Colonies for the reciprocal exchange of commercial and printed papers up to 4 lb. in weight, the rate of postage chargeable in this Colony remaining at 1d. per 2 oz.

It was mentioned in my Report for the year 1891 that by a recent change in the Postal Laws of Queensland, newspapers, which previously were transmitted to that as well as to the other Australasian Colonies free of charge, if not over seven days old, were subjected to a charge of 1d. for every 10 ounces on delivery in Queensland, unless prepaid at the rate of $\frac{1}{2}$ d. for every 10 ounces in the country of origin, and that this rate had accordingly been imposed on newspapers posted in this Colony for Queensland from the 1st January, 1892.

Owing to the receipt of advices of a similar nature from Victoria and South Australia a rate of $\frac{1}{2}$ d. each was, from the 1st May, imposed on newspapers transmitted to those Colonies also. This rate does not apply to bulk parcels of newspapers, posted by recognized newspaper publishers or newsvendors, which may be sent to the neighbouring Colonies at the rate of 1d. per lb., or fraction thereof.

FOREIGN PARCEL POST.

The Parcel Post System, which has been in operation between this Colony and certain Foreign Countries for some years has been extended through the medium of the United Kingdom to Bechuanaland Protectorate, British Bechuanaland, and the Transvaal.

A direct exchange of parcels was instituted between this Colony and Ceylon on the 1st January, 1892, and from the 1st July a similar arrangement was made with India. The terms of the agreements regulating these exchanges will be found in the Appendix.

Appendix D.

Arrangements were also made for an exchange of parcels with Mauritius through the Colombo office.

Appended is a return showing the number and declared value of, and amount of postage paid on parcels despatched to and received from the United Kingdom, British Colonies, and Foreign Countries, during the years 1891 and 1892:—

LETTERS, NEWSPAPERS, PACKETS, AND POST-CARDS POSTED THROUGHOUT THE COLONY.

The following is a return of the estimated number of Letters, Newspapers, Packets, and Post-cards posted in the Colony during 1892, as compared with the number posted in the preceding year:—

	1891.	1892.
LETTERS.		
Posted for delivery within the Colony	59,033,000	65,025,800
„ Australian Colonies and New Zealand	4,402,100	4,757,700
„ Foreign despatch	986,400	1,101,000
Total.....	64,421,500	70,884,500
NEWSPAPERS.		
Posted for delivery within the Colony.....	35,284,000	35,991,200
„ Australian Colonies and New Zealand.....	3,953,400	4,747,500
„ Foreign despatch.....	793,600	873,100
Total.....	40,031,000	41,611,800
PACKETS.		
Posted for delivery within the Colony.....	8,166,500	9,105,300
„ Australian Colonies and New Zealand.....	2,389,800	2,572,800
„ Foreign despatch	142,000	194,900
Total.....	10,698,300	11,873,000
Total number of Post-cards posted	808,700	827,360

The difficulties in the way of arriving at a reliable estimate of the amount of correspondence posted throughout the Colony have, I find, been explained in the reports for previous years. Since the publication of the returns for 1891 a discrepancy has been discovered in the figures for that and the previous year so far as the number of letters “posted for delivery within the Colony” is concerned. The corrected figures for 1891 are given in the above return, the number for 1890 being 54,908,400.

DEAD-LETTER BRANCH.

Year.	Number of letters (except those containing articles of value) returned to the writers as unclaimed.					Number of registered letters returned as unclaimed.	Number of letters unregistered but containing articles of value returned as unclaimed.	Number of unclaimed letters returned to the following places.				Number of letters received unstamped or insufficiently addressed.
	Originally addressed to places within the Colony.	Originally addressed to the Australasian Colonies.	Originally addressed to the United Kingdom.	Originally addressed to other Countries.	Total.			Australasian Colonies.	United Kingdom.	Other Countries.	Total.	
1891 ...	244,612	67,654	2,340	762	315,368	2,408	1,336	29,541	7,360	3,212	40,113	56,340
1892 ...	249,746	39,043	3,457	1,530	293,776	3,812	1,678	33,376	10,680	4,187	48,243	55,088
Increase.	5,134	1,117	768	1,404	342	3,835	3,320	975	8,130
Decrease.	28,611	21,592	1,252

One thousand eight hundred and thirty of the registered letters shown in the above return originated in New South Wales, and upon being opened to obtain address prior to return to the senders were found to contain, besides correspondence and valuable enclosures, such as gold, watches, gold rings, and jewellery, the sum of £3,940 7s. 4d. in coin, notes, and cheques. The remaining 1,782 were from places beyond the Colony, and returned unopened, as follows:—198 to London, 750 to other countries, and 834 to other colonies.

In 1,678 unregistered letters were found valuable enclosures, representing £15,305 8s. 2d.

An average of 92 unstamped and 84 insufficiently-addressed letters and packets were forwarded daily to the Dead-letter Office for treatment; the addresses of a large proportion of the latter were corrected and the letters forwarded. The remainder were returned to the writers.

Of 311 articles containing clothing, merchandise, &c., received with the addresses torn off, postage refused, &c., only 40 were applied for and delivered.

In addition to the foregoing, 1,150 Chinese letters imperfectly addressed were forwarded to the intended addressees through the medium of the Chinese Interpreter employed by the Department.

Two thousand three hundred and ninety-one unstamped letters which could not be returned to the writers through want of name and address were delivered to the addressees, who were specially communicated with by the Department.

Seventy letters were posted without addresses, 30 of which (including 8 containing valuable enclosures) were returned to the writers, the remainder bearing no indication of the sender.

About 422 per cent. of the total number of letters posted in the Colony during 1892 were unclaimed.

Complaints as to the non-delivery of letters are of frequent occurrence, but upon investigation the fault is often found to lie with the senders themselves, it sometimes transpiring that the letters inquired for were never posted. An instance occurred in which an unregistered letter containing a cheque, and stated to have been addressed to Bathurst, failed to reach the addressee. Considerable correspondence took place, but without any trace of the letter being found. Three months afterwards the missing letter, bearing the name of the addressee, but directed to *Brisbane*, was received through the Dead Letter Office, and returned to the sender. Had the letter been registered in the proper manner it could easily have been traced, notwithstanding the clerical error in the address.

Numerous complaints were received from various sources as to non-receipt of letters containing cheques and other securities from a certain firm. Careful search was made by the Department in every case, but without result, and eventually the missing documents were reported to have been found amongst the papers of a former clerk of the firm, then in gaol for embezzlement.

Occasionally inquiry is made as to the abstraction of enclosures from letters, the sender or addressee afterwards explaining that the alleged enclosure was inadvertently omitted. Such explanations, however, generally arrive after the Department has incurred the labour of making a thorough search for the supposed missing article. On inquiry being made as to the loss of a packet containing a watch, it was ascertained to have been sent by rail as a parcel, and, being unclaimed, had been disposed of by the Railway Department.

DELIVERY BY LETTER-CARRIERS.

The number of letters, &c., delivered by the letter-carriers attached to the head office during the years 1891 and 1892 was as follows:—

	1891.	1892.
Unregistered letters	9,824,286	10,027,552
Registered letters	442,585	536,496
Books	108,664	144,150
Newspapers	1,459,459	1,675,234

REGISTRATION BRANCH.

The number of registered letters which passed through the General Post Office in 1892 was 1,075,241, against 1,047,080 in 1891, giving an increase of 28,161.

NUMBER OF MAILS RECEIVED AND DESPATCHED.

The following return shows the number of Mails received at and despatched from the General Post Office during the years 1891 and 1892:—

Year.	Received.		Despatched.		Total number of Mails which passed through the office.
	Inland.	Foreign.	Inland.	Foreign.	
1891	196,342	24,484	181,856	10,310	412,992
1892	202,536	26,317	192,526	10,660	432,039
Increase	6,194	1,833	10,670	350	19,047

RECORD BRANCH.

The number of written communications received from the public during 1892, intimating changes of address, or requesting letters, &c., to be forwarded, was 26,278, against 24,313 in 1891.

The number of communications addressed to the Department, relating to the extension and improvement of the Service, to irregularities connected with the performance of mail contracts, and to the transit of letters, &c., through the post, and recorded in the year 1892, was 38,442, against 36,871 in 1891. REVENUE

REVENUE AND EXPENDITURE.

The following statement shows the Revenue and Expenditure for the year 1892.

REVENUE.			EXPENDITURE.			
	£	s. d.	£	s. d.	£	s. d.

					„ San Francisco mail service ..	2,198 19 6
					Balance of revenue over expenditure	219 1 2
Total	£ 447,945	7 11	Total	£ 447,945	7 11	

* Under regulations made in 1885, in conformity with section 7 of the Civil Service Act, the Post Office Department pays the full salaries of officers in charge of amalgamated Post and Telegraph Offices, who were previously remunerated partly by salaries from the Post Office and Telegraph Departments, and partly by commissions on the sale of postage stamps, and for the transaction of Money Order and Government Savings Bank business. These commissions were, however, discontinued to the officers mentioned, and their salaries were so increased as to compensate them for the loss thereof. It was then arranged that when an amalgamated office transacted Money Order and Savings Bank business the Money Order Branch should be debited with one-ninth and the Post Office and Electric Telegraph Departments with four-ninths each of the salary of the officer in charge of such office, and also, that when an amalgamated office did not transact Money Order and Savings Bank business the Telegraph Department should be debited with four-ninths and the Post Office with five-ninths of the salary of the officer in charge of such office.

The amounts to be debited to the Telegraph Department and to the Money Order Branch, under the arrangement referred to, are £31,702 15s. 5d. and £8,409 10s. 1d. respectively, leaving a sum of £176,866 8s. 3d. to be charged to the Post Office Department, under the heading of Salaries for the year 1892.

† Comprising the cost of fuel, light, rent, furniture, repairs, forage, livery, farriery, carts, horses, overtime—sorting British and foreign mails and newspapers—uniforms, postal inspection, stamps and seals, letter and newspaper receivers, extra clerical aid, traveling and relieving expenses, servants' wages, salaries of temporary letter-carriers and receiver-clearers, and incidental expenses.

The following return shows the number, description, and value of Postage-stamps issued at the General Post Office during the years 1891 and 1892 :—

Number.		Description.	Value.		Increase in issue for 1892.		Decrease in issue for 1892.	
1891.	1892.		1891.	1892.	Number.	Value.	Number.	Value.

The new Postage Stamps issued during 1892 are described hereunder:—

21st January : Stamped Newspaper Wrapper, ½d.; impressed stamp, type of the provisional adhesive stamp of January, 1891; colour, gray; price, ½d. each. (On this date the price of the 1d. stamped wrappers was reduced from 1s. 3d. for 14 to 1d. each wrapper.)

1st February : Postage Due, ½d.; same type as the postage due series of 1891; colour, green.

7th March : Postage, ½d.; diademed profile of Queen Victoria to left on ground of horizontal lines, within a white-bordered oval of solid colour, inscribed in thin white block letters, "New South Wales Postage," and "Half-penny," the two inscriptions being separated by a small ornament on either side; the oval is enframed and touches the four inner lines of an oblong frame; ornaments in upper corners, and ½ in figures in lower corners; colour, gray. It was notified that the provisional ½d. stamp, issued in January, 1891, would become obsolete on 1st July, 1892, and that holders of any unused supply after that date should forward the same to the Secretary to the Post Office to be exchanged for the current issue. The new type of the ½d. stamp was impressed on newspaper wrappers on the 17th March.

21st September : Official stamped envelope, 5d.; type of the adhesive stamp of 4d. (containing a portrait of Captain Cook) with the value altered; colour, green.

With a view to meet the requirements of stamp collectors, it was notified on 13th August that the current postage stamps and reprints of some of the obsolete ones of this Colony, marked with the word "specimen" or "reprint," might be purchased at the General Post Office for 20s. a set.

From

From the 1st January the town rate of postage, viz., 1d. per $\frac{1}{2}$ oz., was made applicable to letters posted at any of the undermentioned Post Offices for delivery at the same or any other of such Post Offices :—Berrima, Bowral, Bundanoon, Burradoo, Burrawang, Cross Roads, East Kangaloon, Exeter, Glenquarry, Great Southern Colliery, Joadja Creek, Kangaloon, Meryla, Mittagong, Moss Vale, Robertson, Sutton Forest, Wild's Meadow, and Yurrunga.

From the 1st July the Municipal District of Prospect and Sherwood was proclaimed as forming part of the Metropolitan penny postage area, throughout which letters may be transmitted at the town rate of postage. The following are the Post Offices included in the Municipality mentioned, viz. :—Fairfield, Guildford, Merrylands, Prospect, Prospect Reservoir, Smithfield, and Wentworthville. From the 16th September, Liverpool, and from the 24th October, Bonnyrigg, Cabramatta, Canley Vale, Moorebank, Smithfield, and St. John's Park (Post Offices within the immediate neighbourhood of Liverpool) were proclaimed as coming within the Metropolitan area.

The town rate of postage was made applicable to all letters posted in any of undermentioned districts for delivery within the same district, from the dates mentioned. The districts include all places within a radius of 13 miles of the Central Post Office, after which the district is named.

Albury, 1 July.	Lithgow, 1 July.
Armidale, 1 July.	Macleay, 1 July.
Ballina, 1 August.	Mudgee, 1 July.
Bathurst, 1 July.	Nowra, 1 July.
Camden, 1 July.	Orange, 1 July.
Carcoar, 1 July.	Penrith, 1 July.
Cootamundra, 15 August.	Queanbeyan, 15 August.
Dubbo, 15 August.	Tamworth, 1 July.
Forbes, 16 November.	Taree, 1 July.
Glen Innes, 1 September.	Wagga Wagga, 1 August.
Goulburn, 1 July.	West Maitland, 1 July.
Grafton, 1 July.	Windsor, 1 July.
Kempsey, 1 July.	Wollongong, 1 July.
Kiama, 1 July.	Yass, 1 August.
Lismore, 1 July.	Young, 15 August.

From the 16th December the Town Rate of Postage was made applicable to letters passing between Murrumburrah and Harden, such offices being within the same Municipality.

From the 1st July the rate of postage on circulars transmitted within the Colony was reduced from 1d. to $\frac{1}{2}$ d. for the first 2 oz. or fraction thereof, the rate for circulars over that weight remaining at 1d. for every 2 oz. On the 9th September the following regulations in regard to this class of mail matter were directed to be observed :—

1. It is understood that circulars, to be entitled to pass at the reduced rate, must be *bona fide* circulars as defined in the Postal Guide, *i.e.*, letters wholly printed, engraved, lithographed, chromographed, or produced by other mechanical process, intended for transmission in identical terms to several persons (the name of the addressee may, however, be added in writing).
2. Such articles as reports of public meetings or companies, trade reports, trade circulars, or other periodical publications (except of course, newspapers, which go free on certain conditions), catalogues, stock and share lists, prices current, and other printed matter are not transmissible at $\frac{1}{2}$ d. as circulars, but are charged at the ordinary initial packet rate of 1d.

From

From the 6th October the reduced rate of $\frac{1}{2}$ d. for the first 2 oz. was made applicable to printed matter of every description, transmitted by post within the Colony, on the understanding that no manuscript of any kind was included, except only the name and address of the addressee.

Letter-cards of the face value of 1d. each, posted in Victoria, are received and forwarded to any address in this Colony.

INLAND MAIL CONVEYANCE.

In the year 1892 the average cost per mile of the Inland Mail conveyance was about $4\frac{1}{7}$ d., against $4\frac{9}{10}$ d., the price per mile paid during the previous year.

II.—MONEY ORDER OFFICE.

Money Order Offices were established during the year 1892 at the following places, viz.:—Balgownie, Bellambi, Bermagui, Black Mountain, Boggabilla, Bre-wongle, Broken Hill Railway-station, Carlingford, Coff's Harbour, Come-by-Chance, Curlewis, Dumaresq, Dural, Ford's Bridge, Jenolan Caves, Jindabyne, Kembla Heights, Kendall, Kentucky, Kunopia, Leadville, Milson's Point, Mulgoa, Murrumbidgerie, Nelson's Bay, New Lambton, Thirroul, Tilpa, Toronto, Torrowangee, Trundle, Wentworth Falls, Windellama, Wingen, Woolgoolga, Wyrallah, and Yetman.

The office at Stannifer was abolished.

The number of Money Order Offices in the Colony on 31st December, 1892, was 605.

The number of Money Orders issued was 522,805 (exclusive of 39,949 certificates of transfer), and the value £1,762,713, against 488,326, of the value of £1,577,744, in 1891, the difference showing an increase of 34,479 in the number, and £184,969 in the amount.

The number of Money Orders paid was 561,164, and the value, £1,739,812, against 507,849, of the value of £1,518,987, in 1891, being an increase of 53,315 in the number and £220,825 in the amount.

The amount of revenue received as commission on Money Orders issued was £19,309 7s. 0d., being £111 9s. 9d. in excess of the amount collected in 1891.

Appendix F.

A comparative return showing the various countries where the Money Orders issued in New South Wales were made payable, and also the Money Order issues of other countries payable in New South Wales, will be found in the Appendix.

Appendix A.

In the information contained in Appendix A will be found a detailed statement of the business transacted and revenue collected at each office in the Colony.

The rates of commission charged on Money Orders issued in this Colony on the other Australian Colonies were reduced from the 1st April as under:—

	£	s.	d.
For any sum not exceeding £2	0	0	6
" above £2, and not exceeding £5...	0	1	0
" " £5, " £7...	0	1	6
" " £7, " £10...	0	2	0

A convention having been entered into for a direct exchange of Money Orders between this Colony and the Kingdom of Italy, the following rates of commission were, from the 1st October, made chargeable on Money Orders issued in this Colony on Italy:—

	£	s.	d.
For any sum not exceeding £2	0	1	0
" above £2, and not exceeding £5...	0	2	6
" " £5, " £7...	0	3	6
" " £7, " £10...	0	5	0

Appendix E.

The text of this Convention is given in the Appendix.

During the year 1890 authority was obtained for the payment of Money Orders drawn by Victoria on this Colony up to any amount not exceeding £20 (the maximum amount of each order previously allowed being £10). Other of the Australasian Colonies having since increased the limit of Money Orders issued to £20, authority has likewise been obtained for their payment in this Colony.

An arrangement was concluded in February, 1892, between this and the other Australasian Colonies, whereby the issuing Colony allows the paying Colony one-half of 1 per cent. on the amount of Intercolonial Money Orders, instead of half the commission collected as previously.

III.—

III.—GOVERNMENT SAVINGS BANK.

The following Branches were opened during the year 1892, viz. :—Balgownie, Berridale, Boggabilla, Breeza, Broken Hill Railway Station, Byron Bay, Coff's Harbour, Curlewis, Dalmorton, Dalton, Dandaloo, Dumaresq, Dural, Galong, Gloucester, Hillgrove West, Kembla Heights, Kunopia, Leadville, Milperinka, Morangarell, Mount Kembla, Mulgoa, Mungindi, Narramine, Nelson's Bay, New Lambton, Oxley, Sutherland, Tibooburra, Torrowangee, Trundle, Wauchope, Wentworth Falls, and Wyong.

During the year 39,721 new accounts were opened, and 32,573 accounts were closed. The number of accounts remaining open at the close of the year was 101,668.

The number of deposits received was 278,578, and the amount £1,630,197 16s. 9d. being an increase of 12,919 in the number and £120,821 0s. 6d. in the amount on the business of the previous year. The interest added to depositors' accounts was £81,781 0s. 3d.

The number of withdrawals was 156,157, and the amount £1,511,355 16s. 5d., being an increase of 30,859 in the number and £207,256 16s. 2d. in the amount on the business of the previous year.

The balance at the credit of depositors at the close of the year was £2,354,086 1s. 6d., being an increase of £200,623 0s. 7d. on the previous year.

The average amount of each deposit was £5 17s. 0½d., and of each withdrawal £9 13s. 7½d.

The average balance at the credit of each depositor at the close of the year was £23 3s. 1d.

The following return will show the annual progress of the Government Savings Bank system, from 1st January, 1883, to 31st December, 1892 :—

Year.	Number of Deposits.	Interest added to Depositors' Accounts.		Amount of Deposits.		Number of Withdrawals.	Amount of Withdrawals.		Balance at Credit of Depositors.	
		£	s. d.	£	s. d.		£	s. d.	£	s. d.

In the information contained in Appendix A is given a detailed statement showing the business transacted at each Branch in the Colony. A statement of the Liabilities and Assets, with the Auditor-General's certificate thereon, will be found in the Appendix G.

Appendix G.

The

The revenue of the Money Order Office and Government Savings Bank shows a profit for the year 1892 of £5,425 1s. 11d. over the expenditure, as indicated in the following table :—

DR.	£	s.	d.	CR.	£	s.	d.
To Revenue received on Money Orders issued	19,309	7	0	By Interest allowed to Depositors, 31st December, 1892	81,781	0	3
„ Interest received on Savings Bank investments	90,354	10	9	„ Staff salaries, Chief Office	11,934	16	10
				<i>Contingencies—</i>			
				Salaries of temporary clerks, commissions to Postmasters, foreign commission, proportion of wages for cleaning chief office and branch offices, &c., &c. ...	2,113	8	8
				Proportion of salaries of official Postmasters chargeable to M. O. and S. B.	8,409	10	1
				Balance of revenue	5,425	1	11
	£	109,663	17 9		£	109,663	17 9

The number of persons employed at the chief office in connection with the Money Order Office and Government Savings Bank was as follows :—

1 Superintendent.	1 Teller.	1 Storekeeper.
1 Chief Clerk and Examiner.	3 Assistant Tellers.	1 Assistant Storekeeper.
2 Examiners.	37 Clerks (including Temporary Clerks).	6 Messengers.
23 Assistant Examiners and Ledger-keepers.		
	Total ...	76

One resignation from the permanent staff took place, viz., Mr. A. E. Earls. Mr. E. J. Clark forfeited his office under section 35 of the Civil Service Act.

IV.—ELECTRIC TELEGRAPH DEPARTMENT.

The following return shows the extent of the Electric Telegraph Lines and the number of Stations in the Colony on the 31st December, 1892; also the revenue and expenditure of the Department (including receipts and expenditure on account of the Telephone system) for the year 1892, as compared with similar information for 1891 :—

Year.	Extent of Electric Telegraph Wire in actual use.	Number of Stations.	Number of Messages.					Revenue.	*Expenditure (exclusive of interest on cost of construction of lines).
			Transmitted within the Colony.	Transmitted to places outside the Colony.	Delivered in the Colony from places outside of it.	Which merely passed through New South Wales wires from and to places outside the Colony.	Total.		
1891	m. chs. 24,780 29	674	2,221,991	467,652	467,463	102,112	3,259,218§	£ s. d. 198,531 8 1	£ s. d. 211,314 5 5†

Total	2,578,197	203,416 10 3	Total	2,573,257	204,888 8 2	166,346 11 9

The following stations were opened during 1892:—Boggabilla, Broken Hill Railway Station, Burruga, Dalmorton, Dalton, Dural, Jindabyne, Kunopia, Leadville, Mullumbimby, New Lambton, Neville, Oaks, Tea Gardens, Thornleigh, Tomingley, Trundle, Upper Copmanhurst, Woolwich, and Yarraman.

The names of the Telephone Offices opened are given under the heading of Telephone Branch.

The stations at Ilford, Stannifer, and Wollondilly were closed.

The only telegraph line in course of construction, but not completed during the year 1892, was that between Pilliga and Bugilbone, an estimated distance of 9½ miles.

The

The staff attached to the Electric Telegraph Department for the year 1892 was as follows, viz. :—1 superintendent, 1 assistant superintendent, 1 accountant, 1 manager, 3 assistant managers, 1 cable clerk, 1 electrician, 1 assistant electrician, 1 telegraph instructor, 1 cashier, 1 clerk-in-charge of correspondence, 1 clerk in charge of check branch, 1 clerk in charge of stores, 1 book-keeper, 3 receiving clerks, 58 clerks, 1 chief mechanic, 1 assistant mechanic, 4 instrument fitters, 5 inspectors, 610 station-masters and operators,* 44 line repairers, 591 messengers, 2 messengers' overseers, 1 batteryman, 9 assistant batteryman, 1 groom, 1 assistant in store, 1 carpenter, 1 inspector of lines (city and suburbs), 14 temporary construction overseers, 3 temporary assistants in store, 1 carpenter, 2 lift attendants, 3 temporary messengers' overseers, 8 temporary operators, 32 temporary clerks, and 72 labourers. Telephone Branch—1 manager, 1 mechanic, 15 fitters, 1 line foreman, 1 exchange foreman, 3 monitors, 53 switch attendants, 1 messenger. Electric Light Branch—5 engineers, 10 assistant engineers. Total, 1,575.

Seven deaths occurred, viz. :—5 operators, Messrs. E. J. Plummer, T. E. Allars, J. Cowan, W. J. Donovan, J. T. Liston; G. Williams, line repairer, and 1 messenger.

Forty-four resignations took place, viz. :—5 operators, 2 station-masters, 30 messengers, 4 telephone operators, 1 probationer, and 2 instrument fitters.

The removals from the service numbered eight :—2 operators, 1 line repairer, 1 temporary clerk, and 4 messengers, for general neglect of duty.

Owing to the large amount of clerical labour involved in the registration of cypher addresses for cablegrams, for which no charge was previously made by the Department, authority was obtained in July for the collection of a fee of £1 per annum for each word registered by any individual or firm in excess of ten words.

From 1st January, Tumbulgum, and from 25th August, Boggabilla, were added to the list of "Border" stations, between which and all stations in Queensland messages are transmitted at the reduced rate of 1s. for the first ten words and 1d. for each additional word. From the 17th September, Cobram in Victoria was added to the list of Victorian "Border" stations; and from the 1st October, Wentworth and Tareena were added to the list of stations on the South Australian Border.

A reduced rate of 6d. for ten words, and 1d. for each additional word, was provided for messages transmitted from any station within a radius of 3 miles of Broken Hill to any other station within the same area, from the 20th February.

The "Newcastle District" was extended to include Minmi from the 1st April, and Charlestown from the 1st October.

The following Regulations in connection with the introduction of a "local message" system were published on the 1st March :—

1. In addition to ordinary telegrams lodged for transmission by wire, messages will be received at any Telegraph Office in the Colony addressed to any place within the city, town, &c., in which such office is situated, and will be delivered, as provided in clause 2, by messenger, subject to the Regulations now in force, or hereafter brought into force, relating to the transmission and delivery of telegrams.
2. The charges for the delivery of such messages will be at the rate of 6d. for ten words, and 1d. for each additional word; and no message will be accepted for an address exceeding 1 mile from any country office, nor for delivery outside the boundaries fixed for the Head, Branch, and Suburban Offices.
3. No message will be received for delivery from offices at which messengers are not employed by the Department, and all messages must be prepaid.

At the Postal Conference held in Sydney in March, 1891, it was arranged that from the 1st May of that year Tasmania should join with the Australian Colonies in the payment of the British and Australian subsidy, and that the Australian Colonies should join with Tasmania in defraying the subsidy payable in connection with the Tasmanian cable (£4,000 per annum).

The proportion payable by New South Wales, on the basis of population, for the year 1892, is £1,704 14s. 8d. The

*In addition to the 385 who hold the dual appointment of Official Post and Telegraph Master, and who are included in the return on page 7.

The following statement shows the Australasian Telegraph business transacted with Europe and the East during the year 1892 :—

Colony.	Forwarded.		Received.		Total.	
	Messages.	Amount.	Messages.	Amount.	Messages.	Amount.
		£ s. d.		£ s. d.		£ s. d.
New South Wales	16,511	41,745 12 4	14,558	38,815 14 0	31,069	80,561 6 4

Western Australia	491	375	186	134
Total.....£	27,520	21,778	10,415	7,675

TELEPHONE BRANCH.

The telephone service, so far as new subscribers are concerned, has not been brisk during 1892, in comparison with previous years, but there has been an increase in the number, and, considering the general commercial depression that has prevailed, this is satisfactory.

Three sections of multiple switchboard were fitted up at the Central Telephone Exchange, providing accommodation for 600 additional subscribers.

A Suburban Exchange was established at Ashfield on the 5th September, 1892.

Public Telephone Offices were established at Balgownie, Bankstown, Bundella, Burringbar, Canley Vale, Carlingford, Greenwich, Henty, Krumbach, Longueville, Mainland off South Solitary, Pennant Hills, Pine Ridge, Pymble, and Tambar Springs.

The following statement shows the number of subscribers connected by telephone at the end of 1892 :—

Central Telephone Exchange, Sydney	1,400
Branch Suburban Exchanges	...	}	Ashfield	...	16
			Balmain	...	15

Total	2,354

ELECTRIC LIGHT BRANCH.

I am informed by the responsible officers that the electric lighting plant at the Circular Quay, Parliament House, Cowper's Wharf, and at the General Post Office has worked satisfactorily during the year. A new Crompton dynamo has been placed at the General Post Office for the purpose of charging the accumulators. At the latter end of the year the Martin Place lamp-posts were fitted with 100 c.p. incandescent lamps, and connected by underground cables to the main building. The large clock was also fitted with 16 c.p. incandescent lamps. Owing to the inability of the existing electric light plant to supply current sufficient for the lamps, and pending the erection of the proposed steam plant, a tender from the Electric Material Company to supply current from their King-street station was accepted. This necessitated the laying of an underground cable from the General Post Office to the Company's station, utilising the existing telegraph conduit across Pitt-street.

Hydraulic Lifts.

Owing to a number of defects in the existing plant, arrangements have been made to alter and connect the various lifts to the Sydney Hydraulic Power Company's high-pressure mains, and thereby secure their improved working.

Jenolan Caves.

The electric lighting plant at this popular resort has worked satisfactorily throughout the year.

SCHOOL OF TELEGRAPHY.

On 1st January, 1892, there were twenty-four probationers on the Instruction-room roll, of which number fourteen were in actual attendance in the room, and ten were undergoing a further period of probation in the suburban offices to which they had been transferred; of these ten, six were appointed during the year as junior operators; of the remaining fourteen, six were transferred during the year to suburban stations, one was appointed as junior operator, one as assistant in the battery-room, one transferred to the Electrician's Branch, and one resigned. Three of the six transferred to suburban offices were appointed as junior operators, and one as messenger.

Eight probationers have been appointed to the Instruction-room during the year, making a total of twelve in attendance at the end of the year. The roll for 1892 contained thirty-two names in all, of which number twenty-two actually attended during the year; twelve of these have been appointed, and one resigned, leaving a total of nineteen names on the roll at the end of 1892.

The technical lectures and practical instruction in making up batteries, testing, &c., were continued, and in addition towards the end of the year typewriting was commenced to be taught with very good results.

NEW STREET ALONG NORTHERN FRONTAGE OF GENERAL POST OFFICE.

In his report for the year 1889 my predecessor related the steps that had up to that time been taken towards the formation of a new street along the northern frontage of the General Post Office. After a series of delays from various causes the street was opened for both vehicular and pedestrian traffic on the 5th September, 1892, and it may now be said that the thoroughfare (known as Martin-place) which is 100 feet wide, with a paved footpath 18 feet in width on the Post Office side, having along its outer edge six handsome marble pedestals, surmounted by ornamental bronze lamps lit by electricity, is worthy of the magnificent building to which it forms the principal approach.

THE FUTURE.

I may travel a little outside the scope of this report for 1892, and remark that by the amalgamation of the three Departments under my control which I have brought into operation this year (1893), it is expected that a vast improvement in the method of transacting business will be effected, whilst it is certain that a large saving of the cost of working them will be secured.

CONCLUSION.

Considering the financial depression that has for some while affected almost every civilized country, and which has been very marked in its effect upon the Australian Colonies, I think the New South Wales community may be satisfied with the progress of the Departments just reviewed.

I have the honor to be,

Sir,

Your Excellency's most obedient servant,

JOHN KIDD,

Postmaster-General.

Postal and Electric Telegraph Department,

General Post Office, Sydney, 2nd June, 1893.

APPENDIX A.

RETURN showing names of Post Offices and Telegraph Stations, Salaries paid, number of Letters posted, Telegrams transmitted, Money Orders issued and paid, Savings Bank Deposits and Withdrawals, Revenue received from each Office, and arrangements regarding premises during the year 1892.

APPENDIX D.

ARRANGEMENT for an exchange of parcels between the Post Office of New South Wales and the Post Office, Ceylon.

In order to establish an exchange of parcels between New South Wales and Ceylon, the undersigned, duly authorised for that purpose, have agreed upon the following Articles :—

ARTICLE I.

There shall be a regular exchange of parcels between the Post Office of New South Wales and the Post Office of Ceylon, by means of the usual mail service performed by the steamers of the Peninsular and Oriental Steam Navigation Company.

ARTICLE II.

The exchange of parcels between the two countries shall be performed exclusively through offices of exchange. The offices of exchange shall be, on the side of New South Wales, Sydney, and on the side of Ceylon, Colombo.

ARTICLE III.

Prepayment of parcel postage shall be compulsory, at the rate of 1s., or the equivalent thereof, per pound. The postage rate shall be apportioned as follows :—

	s.	d.
Ceylon share for inland transit	0	4
Colonial share do	0	4
Sea transit	0	4
	<hr/>	
	1	0

If at any time a lower rate than 4d. per pound be paid for sea transit, the shares for inland transit shall be increased proportionately, unless it shall be mutually agreed to reduce the through rate of postage.

ARTICLE IV.

Parcels shall be despatched in mail-bags or boxes with the ordinary mails.

ARTICLE V.

The maximum limit of weight for a parcel shall be 11 lb. in the case of a parcel despatched from Ceylon, and 11 lb. in the case of a parcel despatched from New South Wales. No such parcel shall exceed 3 ft. 6 in. in length, or 6 feet in length and girth combined.

ARTICLE VI.

Parcels exchanged between the two countries may not contain liquids (unless securely packed in proper cases) or substances of a dangerous, damaging, or offensive nature, or contraband articles or substances, nor may they contain a letter.

ARTICLE VII.

Every parcel shall bear the name and address of the person for whom it is intended, given with such completeness as will enable delivery to be effected.

ARTICLE VIII.

The sender of a parcel shall be responsible that it is securely packed in such a manner as to protect the contents from damage.

ARTICLE IX.

Every parcel shall be accompanied by a declaration of its contents and value, signed by the sender. The declaration shall also contain the address of the parcel.

ARTICLE X.

The conditions as to the posting, transmission, delivery of parcels (including the levy of customs duty and other charges), and re-direction within the limits of the country of destination, shall be governed by the regulations of the country concerned.

ARTICLE XI.

If, for any reason, a parcel cannot be delivered, the offices of exchange of the two countries shall communicate with one another, with a view to ascertaining the sender's wishes in respect of the disposal of the parcel. A parcel which cannot be delivered to the original addressee shall, at the sender's request, be delivered to any other person named by him in the country of destination without further charge, or returned to him (the sender), or re-directed to another country on payment of the ordinary parcel postage which is to be collected on delivery.

ARTICLE XII.

Parcels exchanged between the two countries shall be entered in invoices in the annexed form A or AA, prepared by the despatching office of exchange. The invoices, accompanied by the declaration of contents and of value of the parcels entered therein (referred to in Article IX), shall be forwarded with the parcels to the office of exchange of the country of destination. Undeliverable parcels returned to the senders under Article XI shall be excluded from the invoices A or AA, but they shall be entered in a separate statement in the annexed form D.

ARTICLE XIII.

The invoices despatched by each office of exchange shall be numbered in a consecutive series commencing with No. 1 for the first invoice of each calendar year, and these numbers shall be termed the invoice numbers. The entries in each invoice shall also be numbered consecutively, commencing with number 1 for each invoice, and these numbers shall be termed the entry numbers.

ARTICLE XIV.

A label in the annexed form B or BB shall be affixed to each parcel despatched. The label shall contain the particulars for which provision is made in the form. The invoice number and entry number in the label shall also be noted on the declaration of contents and value of the parcel to which it refers.

ARTICLE XV.

Every discrepancy between an invoice and the parcels entered therein or other error in an invoice observed by the receiving office of exchange shall be recorded in a note of error in the annexed form C, which shall be forwarded by return mail to the despatching office of exchange.

ARTICLE XVI.

A half-yearly account in the annexed form E shall be prepared by the Ceylon office of exchange at Colombo. This account shall be based on the invoices in form A and AA for the half-year, corrected by the notes of error in form C received up to date of preparation of the half-yearly account.

ARTICLE XVII.

A copy of the account mentioned in Article XVI shall be furnished by the Ceylon office of exchange at Colombo to the Postmaster-General, New South Wales, for payment by money order on Colombo, if the balance in sterling money stated in the account be in favour of Ceylon, and accompanied by a money order on Sydney if the balance in sterling money stated in the account be in favour of New South Wales.

ARTICLE XVIII.

ARTICLE XVIII.

In ordinary correspondence affecting the preparation, transmission, or correction of invoices, accounts, &c., or relating to the disposal of parcels, the offices of exchange shall be the mediums, but in matters involving questions other than detail, the offices of correspondence shall be the offices of the Postmaster-General, Sydney, and the Postmaster-General, Colombo.

ARTICLE XIX.

The present arrangement shall take effect on the 1st of January, 1892. It shall then continue in force until one year after the date on which one of the contracting parties shall have notified the other of its intention to terminate it.

JOHN KIDD,
Sydney, 3rd December, 1891.

T. SKINNER,
Postmaster-General, Ceylon,
Colombo, 14th January, 1892.

An arrangement for an exchange of parcels between the Post Office of India and the Post Office of New South Wales was entered into, and took effect from the 1st July, 1892. The terms of this arrangement are to the same effect as that made with the Ceylon office.

NOTE.—It is thought unnecessary to print the forms attached to the original documents.

APPENDIX E.

CONVENTION between the Kingdom of Italy and the Colony of New South Wales for the exchange of Money Orders.

THE Postmaster-General of the British Colony of New South Wales and the Minister of Posts and Telegraphs of the Kingdom of Italy, with a view of rendering possible the direct transmission of sums of money between the two countries, have agreed upon the following :—

ARTICLE I.

The remittance of sums of money may be made by means of post office orders as well from Italy to the Colony of New South Wales as from the Colony of New South Wales to Italy.

The maximum amounts for every money order to be transmitted from Italy shall be 504 francs, and for every money order to be transmitted from the Colony of New South Wales shall be £20 sterling.

ARTICLE II.

The sums of money converted into money orders are guaranteed to the remitters until they shall have been paid in accordance with the regulations existing in the country of payment.

The sums collected by both administrations for the issue of money orders, of which the amount shall not have been claimed by the owners within the time prescribed by the laws of the respective countries, shall definitely belong to the issuing administration. [*Vide* art. XX, par. 4.]

ARTICLE III.

Each administration shall be at liberty to direct that the money orders issued by the corresponding administration shall be transferable by endorsement.

ARTICLE IV.

Each administration shall also have power to fix the rate of commission to be charged for the transmission of money orders which may be issued by its offices.

Should it appear at any time that money orders are used by mercantile men, or other persons in Italy or in the Colony of New South Wales, for the transmission of large sums of money, the postal administration in Italy or in New South Wales, as the case may be, shall have power to increase the commission accordingly.

The commission shall belong to the issuing administration, but the Post Office of Italy shall pay to the New South Wales Post Office one-half per cent. on the amount of money orders issued in Italy, and paid in New South Wales; and the New South Wales Post Office shall make a like payment to the Italian Post Office for money orders issued in New South Wales and paid in Italy.

ARTICLE V.

The unit of currency in Italy is the lira, which is divided into 100 centimes. The Italian lira is equivalent to the franc in French currency.

In the Colony of New South Wales the unit of currency is the pound sterling, which is divided into twenty shillings, every one of which is subdivided into twelve pence.

The conversion of the two currencies shall be effected in accordance with the rate of exchange, which, it is agreed, shall be taken at 25 francs 20 centimes (French currency) to the pound sterling.

In this calculation no account shall be taken of any fraction of a penny or of 10 centimes.

ARTICLE VI.

Payments shall be effected either in gold currency of the country of destination, or in its nearest equivalent, due regard being had for the regulations in force in each administration.

ARTICLE VII.

The Italian administration shall furnish to the office of the Colony of New South Wales a list of the officers which shall be authorised to exchange money orders.

A like information shall be furnished by the New South Wales administration to the Italian office.

ARTICLE VIII.

For the issue of every money order the applicant shall furnish the name and surname, or at least the initial of one of the Christian names of the payee, and shall besides furnish his or her full and correct address, or shall have to specify the name of the firm or company who are the payees whenever a money order has to be addressed.

Similar information shall be given as regards the remitter.

ARTICLE IX.

The money orders issued in Italy on the Colony of New South Wales shall be transmitted by the issuing offices to the post office at Naples, which for such service shall act as an office of exchange.

And the office at Naples shall advise their issue to the corresponding office, which shall be that of Sydney, by means of a list similar to form A annexed, which will be forwarded weekly by the mail packet.

The Italian money orders issued will thus be retained by the Italian administration. On each list shall be stated under the respective column, in both currencies, the amount of each separate order; in Italian currency paid in by the remitter, and for which every money order shall have been issued by the office of origin, and in British currency to be paid to the payee, according to the conversion which shall be effected by the office of Naples.

Moreover, at the foot of each list shall be added together in both currencies the amounts of the money orders therein described, if more than one shall be entered.

Such lists shall besides be forwarded by the office of Naples to the office of the Colony of New South Wales, in duplicate, both copies being stamped and signed by the entering officer, and sent as registered; on the second of the two copies shall be written the word "duplicate."

A "nil" return always in duplicate shall be forwarded on the established days by the office of Naples to the corresponding office when no money orders are to be advised.

ARTICLE X.

ARTICLE X.

Each list shall bear a serial number, which shall begin from I for the first list forwarded in the month of January in each year, and shall continue regularly to the last list forwarded in December.

The money orders shall also be designated in the first column under a progressive number, called international; but this shall not continue for the whole year, but shall begin from I, in each month for the first money order described on such lists, and shall continue regularly for the whole of that month, to recommence from I for the first money order described on the lists of the following month.

These lists, besides setting forth in the appropriate place the particulars referred to in this and the preceding articles, shall be drawn up in conformity with the headings of the other separate columns.

ARTICLE XI.

The office of exchange of Sydney, on the receipt of each list from the office of Naples, and having found the copies to be correct, and agreeing with each other, shall, by first mail, return one, that is the duplicate, to the office of Naples, after having, however, accepted it; shall retain the original in its possession, and if any money orders be therein described for each of these shall issue a new order on the form established for that purpose by the New South Wales administration.

The new order shall be issued for the amount due, in British currency, in accordance with the particulars of the list, and shall then be transmitted, according to its address, to the payee, to enable him or her to present it at the office of destination, and receive payment.

ARTICLE XII.

The money orders issued in the Colony of New South Wales on Italy shall set forth the amount in British currency, and shall be delivered to the remitters who, at their own expense, will transmit them to the payees. For every money order there shall be a corresponding advice. Thus the advices of money orders issued in the Colony of New South Wales on Italy shall be collected by the office of exchange of Sydney, which, from the same, shall fully describe the corresponding money orders on lists similar to form A annexed to the present agreement.

The lists, together with the advices, shall be transmitted as registered, to the Italian office of exchange.

These lists shall be also drawn up in duplicate, and shall be equally forwarded to the aforesaid office of Naples weekly on the day of departure of the mail packet, and therefore also showing a "nil" return when no money orders have to be entered.

In drawing up the above, both as regards the serial and the international number, as well as the other particulars to be furnished thereon, and the various formalities to be gone through, the same rules shall be followed throughout as laid down for the drawing up of the list of Naples for Sydney.

In such manner for each order therein described the amount shall be set forth in both currencies, in British currency as paid by the remitter, and in Italian currency to be paid over to the owners according to the conversion effected by the office of exchange of Sydney.

ARTICLE XIII.

The office of exchange of Naples, having found the two copies of the list to be correct, shall in its turn transmit to the corresponding office of exchange the duplicate copy duly accepted, and shall retain the original with the advices.

These advices shall set forth in the front part the amount in British currency, but on the back of the same the office of Naples, after impressing a special stamp thereon, shall note the corresponding amount in Italian currency to be obtained from the relative column in the lists, and will transmit each advice to its proper office of destination.

For this reason, the payment of New South Wales money orders to be made according to the sums described in Italian currency on the back of the advice, shall not be obtained until the advices will have reached their destination.

ARTICLE XIV.

Whenever any list should be found irregular in any part thereof the receiving office of exchange shall apply for the requisite explanations to the transmitting office of exchange, which shall give them without delay, and in the meantime, until a reply be received, all action with reference to the order in the entries of which such errors shall have been discovered is to be suspended. Should any irregularities be found in the New South Wales lists the office of exchange of Naples, if such be the case, shall return to the office of exchange of Sydney for the necessary verification also the advices of such orders in regard to which the irregularities may have been found.

If however it be an irregularity which the office of exchange can rectify, it shall make in red ink the necessary correction on both copies of the erroneous list, or on one of them, if both should not be erroneous, and shall duly give to the transmitting office of exchange the required information of what shall have been done.

Whenever any list may not reach the office of destination the latter shall inform the transmitting office, which on its part shall hasten to transmit a duplicate thereof, always, of course, in double copy.

If the missing list be of New South Wales origin, the office of exchange of Sydney shall, with the duplicate thereof, also transmit to the office of exchange of Naples, duplicates of the advices relating to money orders described thereon.

ARTICLE XV.

Whenever payment cannot be effected for the following reasons:—

- 1st. Erroneous information as regards the Christian name and surname of the payees;
 - 2nd. Incorrect information as to the address of the payees for orders of Italian origin;
 - 3rd. Non-receipt of the advices of New South Wales orders not inscribed on the list of the office of exchange of Sydney, and which advices may therefore not have been forwarded to the office of exchange at Naples;
 - 4th. Excess in the amount of any order over the established maximum;—
- the chief office of the country of destination shall enter into the necessary negotiation with that of the country of origin, with a view of enabling payees to obtain payment.

In a like manner any claim or inquiry which may be made by the parties interested with regard to orders issued in one or the other country shall form, if necessary, the subject of correspondence between the two chief administrations.

ARTICLE XVI.

Duplicates of New South Wales orders lost or destroyed during the course of their validity (article XIX) shall, at the request, either of the payees or of the remitters, be issued by the Italian administration, provided they be inscribed on the lists received by the same. Duplicates of the advices of New South Wales orders still valid which shall have regularly reached the Italian office of exchange, and which owing to any circumstance may have been lost in Italy shall also be issued by the Italian administration.

Duplicates of orders issued by the New South Wales administration in exchange for orders originating in Italy, and which have been lost or destroyed during the course of their validity, shall be issued at the request either of the payees or of the remitters by the New South Wales administration.

ARTICLE XVII.

The paid orders shall remain with the paying offices.

ARTICLE XVIII.

In order that repayment of a money order may be made to the remitter in the country of origin the chief administration of the country where it shall have been issued must apply for authority to do so to the chief administration of the other country, which shall not give such authorisation until it shall have duly ascertained that the money order in question has not been actually paid, and until it shall have taken the necessary steps that the order may not be paid in future by its subordinate offices.

In the case of orders issued in the Colony of New South Wales, of which repayments shall have been authorised to the remitters, the chief Italian administration, when conveying such authorisation to the chief New South Wales administration, shall furnish the latter with the corresponding advices.

ARTICLE XIX.

ARTICLE XIX.

The money orders to be exchanged between Italy and the Colony of New South Wales shall be valid during twelve calendar months after the month of issue.

ARTICLE XX.

The money orders remaining unpaid for the period mentioned in the preceding article shall be inscribed by the chief office of the respective country of destination on lists similar to the annexed forms marked B and B bis.

Thus on a list similar to form B the chief Italian administration, as occasion may require, shall describe the void New South Wales orders remaining unpaid, transmitting the same, together with the advices of the orders therein described, to the chief New South Wales administration, and the latter shall transmit to the chief Italian administration a list similar to form B bis, describing thereon the void Italian orders remaining unpaid.

The list of void orders remaining unpaid will have always to be transmitted monthly by one central administration to the other, beginning from the fifteenth month after the service shall have come into operation, a "nil" return being sent when necessary. Each central administration, on receiving the list of its own void orders remaining unpaid, and when any one be actually inscribed therein, it shall be lawful for the same spontaneously to provide or not, as it shall think proper, for the repayment to the remitter.

Thus if no spontaneous provision be made the sums unclaimed and not repaid will in due time fall under the provisions of the second paragraph of Article II.

ARTICLE XXI.

Both administrations shall draw up every month a special account in duplicate, in which shall be incorporated the totals of the lists of the preceding month received from the other office of exchange.

The two copies will have to be respectively forwarded from the office which prepares them to the corresponding office.

They shall be compiled by means of forms similar to those annexed to the present agreement, and marked C and C bis, of which the former will be used by the Italian and the latter by the New South Wales administration.

ARTICLE XXII.

In the special account of the Italian administration, as shown in the form, the totals of the New South Wales lists shall be inscribed for their value in Italian currency, and in the special account of the New South Wales administration the totals of the Italian lists shall instead be inscribed for their value in British currency.

The gross total, however, of the latter account shall have to be converted into Italian currency at the rate of and in accordance with the provisions given in Article V, and the result of the conversion shall be set down in the appropriate place.

The sum thus obtained in Italian currency shall be the one to be brought to the credit of the New South Wales administration in the monthly general account. [See Article XXIII.]

Each of the two central administrations on receiving the special monthly account, and having found it, on examination, to be correct, shall retain one copy and shall return the other, duly accepted, to the administration from which it emanated.

ARTICLE XXIII.

The Italian administration shall draw up for every month a general account of the service between the two countries. This account shall be prepared on the basis of the amount shown in Italian currency, and in the following manner:—

To the credit of each administration shall be brought—

- 1st. The results of the special monthly account drawn up by and referring to money orders issued on the same.
- 2nd. A commission (Art. IV) at the rate of one-half per cent. on the gross total of the special monthly account mentioned in the preceding article.
- 3rd. The amount of money orders issued by the same administration, and of which it may have been authorised to effect repayment to the remitters in the course of the month to which the general account refers.
- 4th. The amount of such orders as may have been declared unclaimed and still unpaid in accordance with Article XX.

The final result showing the balance due by the indebted administration shall be left in francs and centimes, as it will have to be obtained if such administration be that of the Colony of New South Wales. If the amount of the balance, however, be to the credit of the latter, it shall be converted into British currency at the rate of exchange of twenty-five francs and twenty centimes per pound sterling.

ARTICLE XXIV.

The general account referred to in the preceding article shall be drawn up in duplicate and on a form similar to the annexed form D. The two copies of each of these accounts shall then be transmitted by the chief Italian administration to the chief New South Wales administration for acceptance after examination.

Having found them to be correct, the New South Wales administration shall retain one copy and return the other duly accepted to the Italian administration.

Whenever such correctness be not at once ascertained, the two copies shall be returned to the Italian administration with the necessary observations, so that their precision may be established.

ARTICLE XXV.

The indebted administration shall pay to the other administration with the least possible delay the balance of each general account.

Balances due by the Italian administration shall be paid by means of drafts at sight on London, payable in gold.

Those due by the New South Wales administration shall be paid by means of drafts also at sight, payable in gold, and drawn upon the Agent-General for New South Wales at London.

ARTICLE XXVI.

Whenever, until the settlement of the general monthly account, either administration be indebted towards the other for a sum exceeding francs 25,200, or £1,000 sterling, whether the debt be on the side either of the Colony of New South Wales or of the Italian administration, the indebted administration shall remit to the other a sum, on account or more, amounting together to three-quarters of its debt.

For the payment of the sums sent on account provision shall be made when necessary in accordance with the same rules laid down in the preceding article for the payment of balances.

ARTICLE XXVII.

The present agreement shall come into operation on the 1st day of October, 1892, and shall remain obligatory from year to year until one administration shall have notified to the other, one year beforehand, its intention to terminate the same.

It is, however, agreed that either administration shall have the power under extraordinary circumstances temporarily to suspend the service by giving notice to the other, even by telegraph.

It is likewise understood that the provisions contained in the present agreement may, by common consent of the two administrations, be modified when deemed necessary.

Done in duplicate, and signed at Sydney, on the 29th day of March, 1892, and in Rome, on the 12th day of June, 1891.

Auditor-General.

1893.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

OCEAN MAIL AND CABLE SERVICES.

(RETURN RESPECTING.)

Ordered by the Legislative Assembly to be printed, 17 October, 1893.

[Laid upon the Table of the House in answer to Questions Nos. 10 and 9, of 12th October, 1893.]

(1.)

Question.

10. MR. STEVENSON asked THE POSTMASTER-GENERAL,—

- (1.) What amount of subsidy is paid by the New South Wales Government to the Union Steamship Company of New Zealand for the mail service between Sydney and California, *via* New Zealand?
- (2.) When does the subsidy terminate, or is it subject to an annual vote of Parliament?
- (3.) Similar information in regard to the mail service performed by the Orient Steam Navigation Company, the subsidy paid, and when terminable?
- (4.) The like information in regard to the P. and O. Company?
- (5.) What amount is paid annually by the New South Wales Government as a subsidy for the mail service between Sydney and Vancouver?
- (6.) Is the subsidy granted for any stated period, or is it subject to an annual vote of Parliament?
- (7.) What sum was paid by the New South Wales Government during 1892 for transit of mails through European countries?
- (8.) What amount was paid by the New South Wales Government during 1892 for the overland transit of mails through the Australian colonies, including cost of special trains?
- (9.) What is the total amount paid annually by the New South Wales Government to the various steam companies as subsidies for the conveyance of European mails?

Answer.

- (1.) £4,000 per annum.
- (2.) October, 1894. The subsidy for the current year has been promised, subject to approval of Parliament.
- (3 & 4.) The Orient and Peninsular and Oriental Companies each receive a subsidy of £85,000 per annum for the conveyance of mails to and from Europe and Australia. Of the total amount payable to the two companies (£170,000 per annum), the British Government contributes £95,000, whilst the Australasian colonies (New Zealand excepted) contribute between them, on the basis of their respective populations, £75,000—the amount payable by New South Wales for the year ending the 31st January, 1894, being £26,724. The existing contracts with the Orient and the Peninsular and Oriental Companies, under which the subsidies named are paid, will expire on the 31st January, 1895.
- (5.) £10,000.
- (6.) For three years. Of course, the subsidy will be provided for on the Estimates, as all expenditure is, but this particular subsidy was sanctioned by Resolution of the Legislative Assembly on the 8th June last.
- (7.) £5,126 13s. 9d.
- (8.) £3,257 15s. 5d.
- (9.) The total subsidies paid for Ocean mail services amount to £40,724, exclusive of about £60 a year paid to the French and German Post Offices, at Universal Postal Union rates, for conveyance of European mails by French and German mail steamers, and also exclusive of the payments for land transit, &c., of £5,126 13s. 9d. and £3,257 15s. 5d., respectively.

(2.)

Question.

9. MR. STEVENSON *asked* THE POSTMASTER-GENERAL,—

- (1.) What amount was paid by the New South Wales Government as a subsidy during the year 1892 to the Eastern Extension Australasia and China Telegraph Company?
- (2.) Is the arrangement entered into for any lengthened period, or can the subsidy be terminated at any time by notice; if so, what notice is required?
- (3.) Does the Government of New South Wales contribute towards the subsidy payable in connection with the Tasmanian cable; if so, what sum was paid during the year 1892?
- (4.) When does the arrangement, if any, terminate?
- (5.) What amount is payable annually by the New South Wales Government as a subsidy to maintain the French cable service between Queensland and New Caledonia?
- (6.) Is the last-mentioned guarantee given for any specific period; if so, for how long?
- (7.) Is the amount subject to the annual vote of Parliament, or was the arrangement before being entered into submitted to the Parliament for approval?
- (8.) Does the New South Wales Government contribute any subsidy towards maintaining the cable service between Sydney and New Zealand?
- (9.) If so, what is the amount and nature of the arrangement, and is the sum subject to an annual vote of Parliament?
- (10.) What is the total amount paid annually by the New South Wales Government for the maintenance of the various cablegram services?

Answer.

(1.) Subsidy, £13,881 9s. 6d., also £10,743 7s. to the Cable Company for guarantee in connection with the reduced rates, and £4,164 0s. 2d. to the South Australian Government on account of loss on their land lines from the same cause.

(2.) Twenty years, from 1st November, 1879.

(3.) Yes; £1,704 14s. 8d. voted, but not yet paid.

(4.) 1st August, 1909.

(5.) A sum of £2,000 per annum is guaranteed by New South Wales, or such smaller sum as shall, together with one-sixth of the net sum received by the Cable Company for messages during the year (after deducting working expenses, limited to £2,400 per annum), amount to £2,000.

(6.) Yes; 30 years.

(7.) Of course all expenditure is subject to a vote of Parliament; and should there be any liability under the guarantee, the amount will, of course, be submitted on Estimates, as stated in the Postmaster-General's reply to questions asked by the Honorable Member for Murrumbidgee on the 17th November last. The agreement was laid upon the Table of this House on 4th October, 1892.

(8.) From 1st January, 1893, an amount has to be paid to make good the loss sustained by the Cable Company in consequence of the reduced rates, which came into force on that date. The amount thus paid for the period, from 1st January to 30th April, was £729 11s. 6d.

(9.) As stated in previous answer, the agreement is terminable on two months' notice, and such notice must be given before the end of February in any year.

(10.) About £34,700, assuming the Government shall be called upon to pay the full amount of the New Caledonia guarantee of £2,000, which, however, is hardly to be expected.

1893.

NEW SOUTH WALES.

ELECTRIC TELEGRAPHS.

(NOTIFICATIONS OF INTRODUCTION OF SYSTEM OF PREPAYMENT OF TELEGRAMS BY POSTAGE STAMPS AND OF THE ESTABLISHMENT OF NEW "BORDER" STATIONS.)

Presented to Parliament, pursuant to Act 20 Vic. No. 41, sec. 6.Postal and Electric Telegraph Department, General Post Office,
Sydney, 14 September, 1893.

His Excellency the Governor, with the advice of the Executive Council, having been pleased to approve of the introduction of the system of prepayment of telegrams by postage stamps, it is hereby notified for public information that, on and after the 1st October next, the charges on telegrams lodged for transmission within New South Wales, or to any of the other Australasian Colonies (New Zealand excepted), must be prepaid by means of postage stamps.

The public will be required to affix the stamps to the message forms, just as they are required to affix stamps to letters.

Stamps may be obtained at any Telegraph Office in the Colony, and the officers to whom the messages are handed for transmission will cancel the stamps thereon.

Messages to which the proper amount in unobliterated postage stamps has been affixed may be posted in any Post Office or letter-receiver, enclosed in a cover addressed to the nearest Telegraph Office, from which the messages will be duly transmitted to destination by wire.

"Collect" messages (*i.e.*, messages on which charges are to be paid by the addressee) will on no account be accepted unless they are answers to "reply-paid" messages. In cases of emergency or distress, however, persons may (at the discretion of the Station-master) send messages to be paid for by the receiver.

The sender of a message to which a reply is requested will be required to lodge a deposit, which in the event of no reply being received, will, on application to the Station-master, be refunded.

JOHN KIDD.

Postal and Electric Telegraph Department, General Post Office,
Sydney, 4 August, 1893.

It is hereby notified, for public information, that the Telephone Offices at Jingellie and Wagra, in this Colony, will henceforth be treated as "Border" Stations, and that the rates chargeable on all messages transmitted to and from Jingellie and Wagra and all stations in Victoria will consequently be one shilling (1s.) for the first ten words, and one penny (1d.) for each additional word.

JOHN KIDD.

1893.

NEW SOUTH WALES.

ELECTRIC TELEGRAPHS.

(NOTIFICATIONS OF RATES FOR TRANSMISSION OF CABLEGRAMS AND PRESS MESSAGES TO NEW CALEDONIA.)

Presented to Parliament, pursuant to Act 20 Vic. No. 41, sec. 6.

Postal and Electric Telegraph Department, General Post Office,
Sydney, 10th November, 1893.

In accordance with the provisions of the 6th section of the Electric Telegraph Act, His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of the following rates being charged for the transmission of Cablegrams from this Colony to New Caledonia, viz. :—

To Gomen—For a message of ten words, including address and signature	s.	d.
		5	0
For each additional word	0	8
To Noumea—2d. per word in addition to the above rates.			

JOHN KIDD

Postal and Electric Telegraph Department, General Post Office,
Sydney, 13th November, 1893.

In accordance with the provisions of the 6th section of the Electric Telegraph Act, His Excellency the Lieutenant-Governor, with the advice of the Executive Council, has been pleased to approve of the following reduced rates being charged on Press Messages for transmission from this Colony to New Caledonia, viz. :—

To Gomen—For a message of ten words or under, including address and signature	...	s.	d.
		5	0
For each additional word up to sixteen words	0	5
Over sixteen and up to 100 words	3	0
(In addition to the Cable Company's charge of 3d. per word.)			
Each additional 100 words, or portion thereof	3	0
(In addition to the Cable Company's charge of 3d. per word.)			
To Noumea—2d. per word in addition to the above rates.

NEW SOUTH WALES.

PUBLIC WORKS ACT OF 1888.

(RESUMPTION OF LAND FOR PUBLIC ROAD AT NITHSDALE.

Presented to Parliament, pursuant to Act 51 Vic. No. 37.

NOTIFICATION OF RESUMPTION OF LAND UNDER
THE "PUBLIC WORKS ACT OF 1888," 51 VICTORIA
No. 37.

NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable Sir ROBERT WILLIAM
DUFF, a Member of Her Majesty's Most
Honourable Privy Council, a Knight
(L.S.) } Grand Cross of the Most Distinguished
Order of Saint Michael and Saint George,
R. W. DUFF, Governor and Commander-in-Chief of
Governor. } the Colony of New South Wales and its
Dependencies.

WHEREAS I, Sir ROBERT WILLIAM DUFF, the Governor aforesaid, with the advice of the Executive Council, have directed that a certain public work, that is to say, a Public Road at Nithsdale, connecting a certain point on the Elrington and Ballalaba Road with another point on the said road, and passing over the land described in the Schedule hereto, in the said Colony, for which public funds are lawfully available, the estimated cost of which does not exceed twenty thousand pounds, shall be carried out under the provisions of the "Public Works Act of 1888," as an authorised work by the Minister for Public Works as Constructing Authority, and that the land described in the Schedule hereto, which is in my opinion required for carrying out the said work, shall be acquired by taking the same under the "Lands for Public Purposes Acquisition Act," as adopted by the "Public Works Act of 1888." Now, therefore, I, the said Governor, with the advice aforesaid, in pursuance of the "Public Works Act of 1888," do declare, by this notification, to be published in the Government Gazette and in one or more newspapers published or circulating in the Police District wherein the said land is situated, that the Crown Land comprised within the description set forth in the Schedule hereto has been appropriated, and the private property within such description has been resumed, for the public purpose aforesaid, to the intent that upon the publication of this notification in the Gazette, the said land described in the said Schedule hereto shall forthwith be vested in the said Constructing Authority as

a corporation sole on behalf of Her Majesty, for the purposes of the "Public Works Act of 1888," for an estate in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the further intent that the legal estate therein, together with all powers incident thereto or conferred by the said last-mentioned Act, shall be vested in such Constructing Authority as a Trustee; and I declare that the following is the Schedule of the land hereinbefore referred to:—

SCHEDULE.

All that piece or parcel of land situated in the parish of Bendoura, county of St. Vincent and Colony of New South Wales, and forming portion of John Wallace's, now James Byrne's grant numbered 2 of 1,047 acres: Commencing at a point on the north boundary of portion 2 as aforesaid bearing west about 4 chains 80 links from a peg on the aforesaid boundary, being the south-east corner of portion number 51 measured, adjoining the said portion number 2; bounded thence on the south-west and south-east by lines bearing south 7 degrees 28 minutes east about 74½ links, south 41 degrees 29 minutes east about 2 chains 31 links, south 81 degrees 54 minutes east 3 chains 25 links, north 76 degrees 57 minutes east about 5 chains 68½ links, and north 68 degrees 46 minutes east about 4 chains 53 links; bounded thence on the north by part of the north boundary of portion number 2 bearing west about 14 chains 60 links, to the point of commencement,—containing by admeasurement about 2 acres 2 roods 36 perches, and said to be in the possession of James Byrne.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twelfth day of July, in the year of our Lord one thousand eight hundred and ninety-three, and in the fifty-seventh year of Her Majesty's Reign.

By His Excellency's Command,

HENRY COPELAND.

GOD SAVE THE QUEEN!

1893.

NEW SOUTH WALES.

PUBLIC WORKS ACT OF 1888.

(RESUMPTION OF LAND FOR DEVIATION OF ROAD FROM TAEMAS BRIDGE TO BRINDIBELLA, AT CAVAN GAP.)

Presented to Parliament, pursuant to Act 51 Vic. No. 37.

NOTIFICATION OF RESUMPTION OF LAND UNDER THE "PUBLIC WORKS ACT OF 1888," 51 VICTORIA No. 37.

NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable Sir ROBERT WILLIAM
DUFF, a Member of Her Majesty's Most
(L.S.) } Honourable Privy Council, a Knight
Grand Cross of the Most Distinguished
Order of Saint Michael and Saint George,
R. W. DUFF, } Governor and Commander-in-Chief of
Governor. } the Colony of New South Wales and its
Dependencies.

WHEREAS I, Sir ROBERT WILLIAM DUFF, the Governor aforesaid, with the advice of the Executive Council, have directed that a certain public work, that is to say, Deviation of the Road from Taemas Bridge to Brindibella, at Cavan Gap, in the said Colony, and the construction of a new Road connecting such deviation with a point on the Mullion to Yass Road, for which public funds are lawfully available, the estimated cost of which does not exceed twenty thousand pounds, shall be carried out under the provisions of the "Public Works Act of 1888," as an authorised work by the Minister for Public Works as Constructing Authority, and that the lands described in the Schedule hereto, which are in my opinion required for carrying out the said work, shall be acquired by taking the same under the "Lands for Public Purposes Acquisition Act," as adopted by the "Public Works Act of 1888": Now, therefore, I, the said Governor, with the advice aforesaid, in pursuance of the "Public Works Act of 1888," do declare by this notification, to be published in the Government Gazette and in one or more newspapers published or circulated in the Police District wherein the said lands are situated, that the Crown Land comprised within the descriptions set forth in the Schedule hereto has been appropriated, and the private property within such descriptions has been resumed, for the public purpose aforesaid, to the intent that upon the publication of this notification in the Gazette, the said lands described in the said Schedule hereto shall forthwith be vested in the said Constructing Authority, as a corporation sole on behalf of Her Majesty, for the purposes of the said "Public Works Act of 1888," for an estate in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the further intent that the legal estate therein, together with all powers incident thereto or conferred by the said last-mentioned Act, shall be vested in such Constructing Authority as a Trustee; and I declare that the following is the Schedule of lands hereinbefore referred to:—

SCHEDULE.

1st. All that piece or parcel of land situate in the parish of Cavan, county of Cowley, and Colony of New South Wales, being part of C.P.L. 3,689: Commencing at a point on the south-western boundary of said lease distant along the said boundary 33 chains 9 links from the south-east corner of said lease; and bounded thence on the south-west by the south-west boundary aforesaid bearing north 15 degrees 18 minutes west

1 chain $56\frac{2}{10}$ links, north 42 degrees 10 minutes west 4 chains $70\frac{8}{10}$ links, north 11 degrees 35 minutes west 3 chains $1\frac{2}{10}$ links; thence by lines bearing north 26 degrees 13 minutes east $41\frac{3}{10}$ links, north 41 degrees 58 minutes west 50 links; thence again by the south-western boundary aforesaid, bearing north 11 degrees 35 minutes west 2 chains 77 links and north 27 degrees 41 minutes west 40 links; and bounded thence on the east by lines bearing south 41 degrees 58 minutes east 4 chains $29\frac{4}{10}$ links, south 26 degrees 13 minutes west 3 chains $1\frac{2}{10}$ links, south 38 degrees 14 minutes east 5 chains $69\frac{8}{10}$ links, and south 21 minutes east 1 chain $39\frac{3}{10}$ links, to the commencing point,—be the said dimensions herein, a little more or less, containing 3 roads 20 perches or thereabouts, and said to be in the possession of F. W. C. Roache.

2nd. All that piece or parcel of land situated in the parish of Cavan, county of Cowley, and Colony of New South Wales, being part of Crown portion number 20: Commencing at a point on the eastern boundary of the said portion distant 4 chains $22\frac{1}{2}$ links southerly from the north-east corner of said portion; and bounded thence on the north by lines bearing south 78 degrees 46 minutes west $42\frac{7}{10}$ links, north 69 degrees 12 minutes west 4 chains $1\frac{2}{10}$ links, south 70 degrees 58 minutes west 2 chains 53 links; thence on the south-east by a line bearing north 3 degrees 29 minutes east 3 chains $29\frac{7}{10}$ links; thence on the north-east by lines bearing north 44 degrees 19 minutes west 7 chains $84\frac{7}{10}$ links; thence by the north-eastern boundary of said portion bearing north 65 degrees 49 minutes west 2 chains $44\frac{1}{2}$ links, north 31 degrees 4 minutes west 3 chains $90\frac{8}{10}$ links; thence by lines bearing north 44 degrees 19 minutes west 1 chain $27\frac{3}{10}$ links, north 1 degree 19 minutes east 1 chain $78\frac{7}{10}$ links; thence again by the north-eastern boundary of said portion bearing north 15 degrees 18 minutes west 13 chains $13\frac{2}{10}$ links; thence on the south-west by lines bearing south 21 minutes east 5 chains $79\frac{3}{10}$ links, south 31 degrees 7 minutes east 3 chains 89 links, south 1 degree 19 minutes west 5 chains $92\frac{8}{10}$ links, south 44 degrees 19 minutes east 15 chains $16\frac{1}{2}$ links, south 3 degrees 29 minutes west 4 chains $87\frac{3}{10}$ links; thence on the south by lines bearing north 70 degrees 58 minutes east 4 chains $23\frac{3}{10}$ links, south 69 degrees 12 minutes east 3 chains 90 links, north 78 degrees 46 minutes east $58\frac{2}{10}$ links; thence on the east by the eastern boundary of said portion bearing north 45 minutes west 1 chain $52\frac{1}{2}$ links, to the commencing point,—be the said dimensions herein a little more or less, containing 5 acres and 37 perches or thereabouts, and said to be in the possession of F. W. C. Roache.

3rd. All that piece or parcel of land situate in the parish of Cavan, county of Cowley, and Colony of New South Wales, being part of C.P.L. 2,241: Commencing at a point on the western boundary of said lease distant 4 chains $22\frac{1}{2}$ links southerly from the north-eastern corner of Crown portion number 20; and bounded thence on the north-west by a line bearing north 78 degrees 46 minutes east 4 chains $54\frac{8}{10}$ links; on the north-east by a Government Road 1 chain 50 links wide bearing south 53 degrees 26 minutes east 1 chain $35\frac{8}{10}$ links, south 42 degrees 35 minutes east 58 links; thence on the south east by a line bearing south 78 degrees 46 minutes west 6 chains $3\frac{1}{2}$ links; thence by the western boundary of said lease bearing north 45

minutes west 1 chain $52\frac{1}{2}$ links to the commencing point,—be the said dimensions herein a little more or less, containing 3 roods and 8 perches, and said to be in the possession of the Bank of New South Wales.

4th. All that piece or parcel of land situated in the parish of Cavan, county of Cowley, and Colony of New South Wales, being part of C.P.L. 2,241. Commencing at a point on the eastern boundary of said lease 4 chains $60\frac{3}{10}$ links from the north-east corner thereof; and bounded thence on the east by said boundary bearing north 13 minutes east 2 chains $22\frac{1}{10}$ links; thence on the north-east by a line bearing north 42 degrees 6 minutes west 14 chains $50\frac{4}{10}$ links; thence on the north-west by a line bearing south 78 degrees 46 minutes west 1 chain 11 links to a Government Road $1\frac{1}{2}$ chains wide; thence on the south-west by that road bearing south 53 degrees 26 minutes east $13\frac{3}{10}$ links, south 42 degrees 35 minutes east 11 chains $31\frac{7}{10}$ links, south 18 degrees 36 minutes east 1 chain 68 links; thence by a line bearing south 42 degrees 6 minutes east 3 chains $72\frac{7}{10}$ links, to the commencing point,—be the said dimensions herein a little more or less, containing 1 acre 2 roods and 15 perches or thereabouts, and said to be in the possession of the Bank of New South Wales.

5th. All that piece or parcel of land situated in the parish of Cavan, county of Cowley, and Colony of New South Wales, being part of Crown portion number 139. Commencing at a point on the western boundary of said portion 4 chains $60\frac{3}{10}$ links from the south-west corner thereof; and bounded thence on the west by that boundary bearing north 13 minutes east 2 chains $22\frac{1}{10}$ links; thence on the north-east by lines bearing south 42 degrees 6 minutes east 2 chains 86 links, south 15 degrees 33 minutes east 3 chains 92 links, south 46 degrees 30 minutes east 1 chain $37\frac{7}{10}$ links; thence on the south by a Government Road 1 chain wide bearing north 89 degrees 47 minutes west 2 chains $18\frac{8}{10}$ links to a point distant 1 chain and 81 links along the said road from the south-western corner of said portion, and bounded thence on the south-west by lines bearing north 46 degrees 30 minutes west 20 links, north 15 degrees 33 minutes west 3 chains 98 links, north 42 degrees 6 minutes west 86 links, to commencing point,—be the said dimensions herein a little more or less, containing 3 roods $38\frac{1}{4}$ perches or thereabouts, and said to be in the possession of the Bank of New South Wales.

6th. All that piece or parcel of land situate in the parish of Cavan, county of Cowley, and Colony of New South Wales, being part of Crown portion number 128. Commencing at a point on the northern boundary of said portion distant 8 chains $37\frac{1}{4}$ links from the north-east corner thereof, and bounded thence on the north-east by lines bearing south 46 degrees 30 minutes east 8 chains $66\frac{7}{10}$ links, south 13 degrees 42 minutes east 3 chains 49 links, south 81 degrees 20 minutes east 1 chain $23\frac{1}{4}$ links; thence on the east by the eastern boundary of said portion bearing south 17 minutes west 1 chain $51\frac{1}{10}$ links to a point distant 3 chains $90\frac{1}{4}$ links northerly from the south-west corner of Crown portion 129; thence on the south-west by lines bearing north 81 degrees 20 minutes west 2 chains $45\frac{7}{10}$ links, north 13 degrees 42 minutes west 4 chains $5\frac{3}{10}$ links, north 46 degrees 30 minutes west 9 chains $81\frac{8}{10}$ links; thence on the north by the northern boundary of said portion number 128 bearing south 8 degrees 47 minutes east 2 chains $18\frac{8}{10}$ links, to the commencing point,—be the said dimensions herein a little more or less, containing 2 acres $36\frac{1}{2}$ perches or thereabouts, and said to be in the possession of the Executors of the late John Ledger.

7th. All that piece or parcel of land situate in the parish of Cavan, county of Cowley, and Colony of New South Wales, being part of Crown portion number 129. Commencing at a point on the western boundary of said portion distant 3 chains $90\frac{1}{4}$ links from the south-west corner thereof; and bounded thence on the west by said western boundary bearing north 17 minutes east 1 chain $51\frac{1}{10}$ links, thence on the north by a line bearing south 81 degrees 20 minutes east 3 chains $31\frac{1}{4}$ links; thence on the east by a line bearing south 1 degree 58 minutes west 4 chains $93\frac{1}{2}$ links; thence on the south by the southern boundary of said portion bearing north 89 degrees 46 minutes west 1 chain 50 links to a point distant 1 chain $63\frac{1}{4}$ links easterly from the south-west corner of said portion; thence on the west by a line bearing north 1 degree 58 minutes east 3 chains $64\frac{7}{10}$ links, thence again on the south by a line bearing north 81 degrees 20 minutes west 1 chain $75\frac{8}{10}$ links, to the commencing point,—

be the said dimensions herein a little more or less, containing 1 acre $3\frac{3}{10}$ perches or thereabouts, and said to be in the possession of the Bank of New South Wales.

8th. All that piece or parcel of land situated in the parish of Cavan, county of Cowley, and Colony of New South Wales, being part of Crown portion number 127. Commencing at a point on the northern boundary of said portion distant 1 chain $63\frac{1}{4}$ links from the north-west corner thereof; and bounded thence on the north by the said boundary bearing south 89 degrees 46 minutes east 1 chain 50 links; thence by lines bearing south 1 degree 58 minutes west $34\frac{6}{10}$ links, south 59 degrees 13 minutes east 10 chains $15\frac{3}{10}$ links, north 54 degrees 8 minutes east 4 chains $97\frac{4}{10}$ links, north 79 degrees 32 minutes east 3 chains $59\frac{3}{10}$ links, south 78 degrees 21 minutes east 9 chains 42 links, south 66 degrees 49 minutes east 7 chains 46 links; thence on the south by the south boundary of said portion bearing north 89 degrees 43 minutes west 3 chains $85\frac{1}{2}$ links to a point distant 31 chains $66\frac{1}{4}$ links easterly from the south-west corner of said portion; thence by lines bearing north 66 degrees 49 minutes west 3 chains $75\frac{7}{10}$ links, north 78 degrees 21 minutes west 8 chains $97\frac{1}{10}$ links, south 79 degrees 32 minutes west 2 chains 96 links, south 54 degrees 8 minutes west 4 chains $54\frac{1}{4}$ links; thence along the south boundary aforesaid bearing north 89 degrees 43 minutes west 1 chain $95\frac{6}{10}$ links to a point distant 10 chains $86\frac{7}{10}$ links from the south west corner aforesaid of said portion; and bounded thence by lines bearing north 59 degrees 13 minutes west 10 chains 77 links, north 1 degree 58 minutes east 1 chain $18\frac{1}{10}$ links, to the commencing point,—be the said dimensions herein a little more or less, containing 5 acres $35\frac{7}{10}$ perches or thereabouts, and said to be in the possession of the Executors of the late John Ledger.

9th. All that piece or parcel of land situate in the parish of Umurra, county of Cowley, and Colony of New South Wales, being part of conditional lease numbered 90-94. Commencing at a point on the southern boundary of portion number 127 and distant 31 chains $66\frac{3}{10}$ links along the said boundary from the south-west corner of the aforesaid portion; and bounded thence on the south-west by lines bearing south 66 degrees 49 minutes east 10 chains $43\frac{7}{10}$ links, south 56 degrees 5 minutes east 5 chains 61 links, south 40 degrees 22 minutes east 6 chains $7\frac{9}{10}$ links; thence on the south by lines bearing north 82 degrees 48 minutes east 3 chains $61\frac{7}{10}$ links, south 81 degrees 6 minutes east 5 chains $85\frac{8}{10}$ links, to the western boundary of surveyed road from Boambolo to Brindibella; thence on the east by that boundary bearing north 44 degrees 8 minutes west 2 chains $49\frac{4}{10}$ links; thence on the north by lines bearing north 81 degrees 6 minutes west 4 chains $7\frac{7}{10}$ links, south 82 degrees 4 minutes west 3 chains $1\frac{3}{10}$ links; thence on the north-east by lines bearing north 40 degrees 22 minutes west 5 chains $47\frac{1}{2}$ links, north 56 degrees 5 minutes west 5 chains $95\frac{8}{10}$ links, north 66 degrees 49 minutes west 7 chains and 2 links to the southern boundary of portion 127; thence on the north by a line bearing north 89 degrees 43 minutes west along that boundary 3 chains $85\frac{1}{2}$ links, to the point of commencement,—be the said dimensions herein a little more or less, containing 4 acres 1 rood $5\frac{1}{2}$ perches or thereabouts.

10th. All that piece or parcel of land situate in the parish of Umurra, county of Cowley, and Colony of New South Wales, being part of conditional lease number 90-94. Commencing at a point on the south boundary of portion 127 bearing south 89 degrees 43 minutes east and distant 10 chains $86\frac{7}{10}$ links from its south-west corner; and bounded thence on the north by part of the south boundary of said portion bearing south 89 degrees 43 minutes east 1 chain $95\frac{6}{10}$ links; thence on the south-east by a line bearing south 54 degrees 8 minutes west 1 chain $8\frac{1}{10}$ links, and thence on the south-west by a line bearing north 59 degrees 13 minutes west 1 chain $25\frac{7}{10}$ links, to the point of commencement,—be the said dimensions herein a little more or less, containing 10 perches or thereabouts.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-fourth day of July, in the year of our Lord one thousand eight hundred and ninety-three, and in the fifty-seventh year of Her Majesty's Reign.

By His Excellency's Command,
WILLIAM JOHN LYNE.
GOD SAVE THE QUEEN!

NEW SOUTH WALES.

PUBLIC WORKS ACT OF 1888.

(RESUMPTION OF LAND, FOR APPROACH ROAD TO BRIDGE OVER COCKBURN RIVER.)

Presented to Parliament, pursuant to Act 51 Vic. No. 37.

NOTIFICATION OF RESUMPTION OF LAND UNDER THE "PUBLIC WORKS ACT OF 1888," 51 VICTORIA No. 37.

NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable Sir ROBERT WILLIAM
DUFF, a Member of Her Majesty's Most
Honourable Privy Council, a Knight
(L.S.) } Grand Cross of the Most Distinguished
Order of Saint Michael and Saint George,
Governor and Commander-in-Chief of
R. W. DUFF, } the Colony of New South Wales and its
Governor. } Dependencies.

WHEREAS I, Sir ROBERT WILLIAM DUFF, the Governor aforesaid, with the advice of the Executive Council, have directed that a certain public work, that is to say, an Approach to Bridge over Cockburn River, in the said Colony, for which public funds are lawfully available, the estimated cost of which does not exceed twenty thousand pounds, shall be carried out under the provisions of "The Public Works Act of 1888," as an authorised work by the Minister for Public Works as Constructing Authority; and that the land described in the Schedule hereto, which is in my opinion required for carrying out the said work, shall be acquired by taking the same under "The Lands for Public Purposes Acquisition Act," as adopted by "The Public Works Act of 1888": Now, therefore, I, the said Governor, with the advice aforesaid, in pursuance of "The Public Works Act of 1888," do declare by this notification, to be published in the Government Gazette, and in one or more newspapers published or circulated in the Police District wherein the said land is situated, that the Crown Land comprised within the description set forth in the Schedule hereto has been appropriated, and the private property within such description has been resumed, for the public purpose aforesaid, to the intent that upon the publication of this notification in the Gazette, the said land described

in the said Schedule hereto shall forthwith be vested in the said Constructing Authority as a corporation sole on behalf of Her Majesty for the purposes of the said "Public Works Act of 1888," for an estate in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the further intent that the legal estate therein, together with all powers incident thereto, or conferred by the said last-mentioned Act, shall be vested in such Constructing Authority as a Trustee: And I declare that the following is the Schedule of the land hereinbefore referred to:—

SCHEDULE.

All that piece or parcel of land situate in the parish of Tamworth, county of Inglis, and Colony of New South Wales, being part of portion 57: Commencing at the south-eastern corner of that portion; and bounded thence on the east by the western boundary of portion 58 bearing north 6 minutes west 4 chains 10 $\frac{3}{4}$ links; on the north-west by the south-eastern boundary of a road 50 links wide bearing south 41 degrees 39 minutes west 3 chains 22 $\frac{8}{10}$ links to the right bank of the Cockburn River; and on the south-west by that bank upwards, to the point of commencement,—be the said several dimensions all a little more or less, containing 1 rood 33 perches or thereabouts, and said to be in the possession and occupation of John Gill.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-fourth day of July, in the year of our Lord one thousand eight hundred and ninety-three, and in the fifty-seventh year of Her Majesty's Reign.

By His Excellency's Command,
WILLIAM JOHN LYNE.

GOD SAVE THE QUEEN!

NEW SOUTH WALES.

PUBLIC WORKS ACT OF 1888.

(RESUMPTION OF LAND FOR A PUBLIC ROAD FROM SANGER-STREET TO QUEEN-STREET, COROWA.)

Presented to Parliament, pursuant to Act 51 Vic. No. 37.

NOTIFICATION OF RESUMPTION OF LAND UNDER THE "PUBLIC WORKS ACT OF 1888," 51 VICTORIA No. 37.

NEW SOUTH WALES,) Proclamation by His Excellency The
to wit.) Right Honourable Sir ROBERT WILLIAM
(L.S.)) DUFF, a Member of Her Majesty's Most
R. W. DUFF,) Honourable Privy Council, a Knight
Governor.) Grand Cross of the Most Distinguished
Order of Saint Michael and Saint George,
Governor and Commander-in-Chief of
the Colony of New South Wales and its
Dependencies.

WHEREAS I, Sir ROBERT WILLIAM DUFF, the Governor aforesaid, with the advice of the Executive Council, have directed that a certain public work, that is to say, the formation of a Public Road from Sanger-street to Queen-street, Corowa, and thence to the Main Road from Deniliquin to Albury, in the said Colony, for which public funds are lawfully available, the estimated cost of which does not exceed twenty thousand pounds, shall be carried out under the provisions of the "Public Works Act of 1888," as an authorised work by the Minister for Public Works as Constructing Authority; and that the lands described in the Schedule hereto, which are in my opinion required for carrying out the said work, shall be acquired by taking the same under the "Lands for Public Purposes Acquisition Act," as adopted by the "Public Works Act of 1888": Now, therefore, I, the said Governor, with the advice aforesaid, in pursuance of the "Public Works Act of 1888," do declare by this notification, to be published in the Government Gazette and in one or more newspapers published or circulated in the Police District wherein the said lands are situated, that the Crown Land comprised within the descriptions set forth in the Schedule hereto has been appropriated, and the private property within such descriptions has been resumed, for the public purpose aforesaid, to the intent that upon the publication of this notification in the Gazette, the said lands described in the said Schedule hereto shall forthwith be vested in the said Constructing Authority as a corporation sole on behalf of Her Majesty for the purposes of the said "Public Works Act of 1888," for an estate in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the further intent that the legal estate therein, together with all powers incident thereto or conferred by the said last-mentioned Act, shall be vested in such Constructing Authority as a Trustee for the purpose of such Public Road as aforesaid: And I declare that the following is the Schedule of lands hereinbefore referred to:—

SCHEDULES.

1. All that piece or parcel of land situated in the town and parish of Corowa (North Wahgunyah), county of Hume and Colony of New South Wales, being allotment 42A of section D within John Foord's private sub-division of portion 28 of 28 acres 1 rood and 23 perches, granted to John Foord by grant dated 4th August, 1859: Commencing on the south-western

side of Sanger-street, at a point bearing north 10 degrees 1 minute west 7 chains 53 links from the intersection of the north-western side of Church-street with the south-western side of Sanger-street, as fixed by the alignment survey; and bounded thence on the north-east by part of the south-western side of Sanger-street bearing north 10 degrees 1 minute west 62½ links; on the north-west by a line bearing south 81 degrees 1 minute west 2 chains 1 link and ¼th of a link; on the south-west by a line bearing south 10 degrees 1 minute east 62½ links; and on the south-east by a line bearing north 81 degrees 1 minute east 2 chains 1 link and ¼th of a link, to the point of commencement,—containing 20 perches, more or less, and said to be in the possession of E. R. Nicolson.

2. All that piece or parcel of land situated in the parish and town of Corowa (North Wahgunyah), county of Hume, and Colony of New South Wales, being allotment 4A of section D, within John Foord's private sub-division of portion 28 of 28 acres 1 rood and 23 perches, granted to John Foord by grant dated 4th August, 1859: Commencing at the southern corner of allotment 42a of section D; and bounded thence on the north-east by the south-western boundary of that allotment bearing north 10 degrees 1 minute west 62½ links; on the north-west by a line bearing south 81 degrees 1 minute west 2 chains 1 link and ¼ of a link to a point on the north-eastern side of Queen-street; on the south-west by that street bearing south 10 degrees 1 minute east 62½ links; and on the south-east by a line bearing north 81 degrees 1 minute east 2 chains 1 link and ¼ of a link, to the point of commencement,—containing 20 perches more or less, and said to be in the possession of F. C. Piggis.

3. All that piece or parcel of land situate in the parish and town of Corowa (North Wahgunyah), county of Hume, and Colony of New South Wales, being allotment 31 of section C, within John Foord's private sub-division of portion 28 of 28 acres 1 rood and 23 perches, granted to John Foord by grant dated 4th August, 1859: Commencing on the south-western side of Queen-street, at a point bearing south 81 degrees 1 minute west 1 chain and 25 links from the southern corner of allotment 4A of section D; and bounded thence on the north-east by part of the south-western side of Queen-street bearing north 10 degrees 1 minute west 2 chains and 32 links to the south-eastern side of a road 3 chains wide; on the north-west by that road bearing south 28 degrees 29 minutes west 2 chains 92¼ links; and on the south-east by a line bearing north 81 degrees 1 minute east 1 chain 82 links, to the point of commencement,—containing 33¾ perches, more or less, and said to be in the possession of F. C. Piggis.

In witness whereof I have hereto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this seventeenth day of July, in the year of our Lord one thousand eight hundred and ninety-three, and in the fifty-seventh year of Her Majesty's Reign.

By His Excellency's Command,

HENRY COPELAND.

GOD SAVE THE QUEEN!

NEW SOUTH WALES.

PUBLIC WORKS ACT OF 1888.(RESUMPTION OF LAND FOR PUBLIC ROAD THROUGH PORTION 37, PARISH OF DALTON,
COUNTY OF KING.)

Presented to Parliament, pursuant to Act 51 Vic. No. 37.

NOTIFICATION OF RESUMPTION OF LAND UNDER
"THE PUBLIC WORKS ACT OF 1888," 51 VICTORIA
No. 37.

NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable Sir ROBERT WILLIAM
DUFF, a Member of Her Majesty's Most
Honourable Privy Council, a Knight
(L.S.) } Grand Cross of the Most Distinguished
Order of Saint Michael and Saint George,
Governor and Commander-in-Chief of
R. W. DUFF, } the Colony of New South Wales and its
Governor. } Dependencies.

WHEREAS I, Sir ROBERT WILLIAM DUFF, the Governor aforesaid, with the advice of the Executive Council, have directed that a certain public work, that is to say, the formation of a Public Road 1-chain wide through portion 37, parish of Dalton, county of King, in the said Colony, the estimated cost of which does not exceed twenty thousand pounds, shall be carried out under the provisions of "The Public Works Act of 1888," as an authorised work by the Minister for Public Works as Constructing Authority; and that the land described in the Schedule hereto, which is in my opinion required for carrying out the said work, shall be acquired by taking the same under "The Lands for Public Purposes Acquisition Act" as adopted by "The Public Works Act of 1888": Now, therefore, I, the said Governor, with the advice aforesaid, in pursuance of "The Public Works Act of 1888," do declare by this notification to be published in the Government Gazette, and in one or more newspapers published or circulated in the Police District wherein the said land is situated, that the Crown Land comprised within the description set forth in the Schedule hereto has been appropriated, and the private property within such description has been resumed, for the public purpose aforesaid, to the intent that upon the publication of this notification in the Gazette, the said land described in the said Schedule hereto shall forthwith be vested in the said Constructing Authority as a

corporation sole, on behalf of Her Majesty, for the purposes of the said "Public Works Act of 1888," for an estate in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the further intent that the legal estate therein, together with all powers incident thereto or conferred by the said last-mentioned Act, shall be vested in such Constructing Authority as a Trustee: And I declare that the following is the Schedule of the land hereinbefore referred to:—

SCHEDULE.

All that piece or parcel of land situate in the parish of Dalton, county of King, in the Colony of New South Wales, being part of William Brown's portion No. 37 of 40 acres: Commencing at a point on the north side of Brown-street bearing north and distant 1 chain 50 links from the north-east corner of allotment 4 of section 10 in the township of Dalton; and bounded thence on the west by a line bearing north and running parallel to the west boundary of portion 37, 20 chains; thence on the north by part of the north boundary of that portion bearing east 1 chain; thence on the east by a line bearing south 20 chains to the north side of Brown-street forming the south boundary of said portion 37; and thence on the south by part of that boundary bearing west 1 chain, to the point of commencement,—containing by admeasurement 2 acres, and said to be in the possession of James Brown.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this second day of August, in the year of our Lord one thousand eight hundred and ninety-three, and in the fifty-seventh year of Her Majesty's Reign.

By His Excellency's Command,

WILLIAM JOHN LYNE.

GOD SAVE THE QUEEN!

NEW SOUTH WALES.

PUBLIC WORKS ACT OF 1888.

(RESUMPTION OF LAND FOR APPROACH, ROAD TO PEARCE'S CREEK BRIDGE.)

Presented to Parliament, pursuant to Act 51 Vic. No. 37.

NOTIFICATION OF RESUMPTION OF LAND UNDER
"THE PUBLIC WORKS ACT OF 1888," 51 VICTORIA
No. 37.

NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable Sir ROBERT WILLIAM
DUFF, a Member of Her Majesty's Most
Honourable Privy Council, a Knight
(L.S.) } Grand Cross of the Most Distinguished
Order of Saint Michael and Saint George,
Governor and Commander-in-Chief of
R. W. DUFF, } the Colony of New South Wales and its
Governor. } Dependencies.

WHEREAS I, Sir ROBERT WILLIAM DUFF, the Governor aforesaid, with the advice of the Executive Council, have directed that a certain public work, that is to say, an approach road to Pearce's Creek Bridge, in the said Colony, the estimated cost of which does not exceed twenty thousand pounds, shall be carried out under the provisions of "The Public Works Act of 1888," as an authorised work by the Minister for Public Works as Constructing Authority, and that the land described in the Schedule hereto, which is in my opinion required for carrying out the said work, shall be acquired by taking the same under "The Lands for Public Purposes Acquisition Act," as adopted by "The Public Works Act of 1888": Now, therefore, I, the said Governor, with the advice aforesaid, in pursuance of "The Public Works Act of 1888," do declare by this notification to be published in the Government Gazette and in one or more newspapers published or circulated in the Police District wherein the said land is situated, that the Crown Land comprised within the description set forth in the Schedule hereto has been appropriated, and the private property within such description has been resumed, for the public purpose aforesaid, to the intent that upon the publication of this notification in the Gazette the said land described in the said Schedule hereto shall forthwith be vested in the said Constructing Authority as a Corporation sole on behalf of Her Majesty, for the purpose of the said "Public Works Act of 1888," for an estate in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever, and to the further intent that the legal estate therein together with all powers incident thereto or conferred by the said last-mentioned Act, shall be vested in such Constructing Authority as Trustee: And I declare that the following is the Schedule of the land hereinbefore referred to:—

SCHEDULE.

All that piece or parcel of land situate in the parish of North Colab, county of Cumberland, and Colony of New South Wales, being part of portion 159: Commencing at the intersection of lines bearing north 39 degrees 45 minutes west 5 chains and 50 links and north 8 degrees 28 minutes east 7

chains and 60 links being boundary-lines of reserve for roadway; and bounded thence on the west by lines bearing south 10 degrees 25 minutes west 1 chain 96½ links and south 16 degrees 13 minutes west 41½ links; on the north by lines bearing south 55 degrees 53 minutes west 1 chain 46 links and south 62 degrees 15 minutes west 2 chains 31 links; again on the west by a line bearing south 22 degrees 22 minutes east 1 chain 69 links; on the south by lines bearing south 55 degrees 5 minutes east 1 chain 7½ links, north 87 degrees 18 minutes east 3 chains 50½ links, and north 79 degrees 8 minutes east 1 chain 25½ links; again on the west by lines bearing south 24 degrees 15 minutes east 3 chains 30½ links, south 30 degrees 5 minutes east 3 chains 44½ links, south 24 degrees 32 minutes east 52½ links, south 3 degrees 23 minutes west 70½ links, south 21 degrees 15 minutes west 2 chains 84 links; again on the south by a line bearing south 44 degrees 34 minutes east 85 links to the left bank of Pearce's Creek; and by that creek downwards bearing north 45 degrees 26 minutes east 1 chain; again on the north by a line bearing north 44 degrees 34 minutes west 20½ links; on the east by lines bearing north 21 degrees 15 minutes east 2 chains 35 links, north 3 degrees 23 minutes east 1 chain 11 links, north 24 degrees 32 minutes west 82 links, north 30 degrees 5 minutes west 3 chains 44½ links, and north 24 degrees 15 minutes west 4 chains 4½ links; again on the north by lines bearing south 79 degrees 8 minutes west 1 chain 97½ links, south 87 degrees 18 minutes west 3 chains 9½ links, and north 55 degrees 5 minutes west 44½ links; again on the east by a line bearing north 22 degrees 22 minutes west 49 links; again on the south by lines bearing north 62 degrees 15 minutes east 1 chain 45½ links and north 55 degrees 53 minutes east 1 chain 87½ links; again on the east by lines bearing north 16 degrees 13 minutes east 82½ links and north 10 degrees 25 minutes east 1 chain 18½ links to the reserve for roadway aforesaid; and again on the north by part of a southern boundary of that reserve for roadway bearing north 39 degrees 45 minutes west 1 chain 30½ links, to the point of commencement,—be the said dimensions a little more or less containing by admeasurement 2 acres 1 rood 30½ perches, or thereabouts, and said to be in the possession of William Kyle Houston.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this thirtieth day of August, in the year of our Lord one thousand eight hundred and ninety-three, and in the fifty-seventh year of Her Majesty's Reign.

NEW SOUTH WALES.

PUBLIC WORKS ACT OF 1888.

(RESUMPTION OF LAND FOR A WAY OF APPROACH TO FOOT-BRIDGE OVER RIVER MANN.)

Presented to Parliament, pursuant to Act 51 Vic. No. 37.

NOTIFICATION OF RESUMPTION OF LAND UNDER
THE "PUBLIC WORKS ACT OF 1888," 51 VIC-
TORIA NO. 37.

NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable Sir ROBERT WILLIAM
DUFF, a Member of Her Majesty's Most
Honourable Privy Council, a Knight
(L.S.) } Grand Cross of the Most Distinguished
Order of Saint Michael and Saint George,
R. W. DUFF, } Governor and Commander-in-Chief of
Governor. } the Colony of New South Wales and its
Dependencies.

WHEREAS I, Sir ROBERT WILLIAM DUFF, the Governor aforesaid, with the advice of the Executive Council, have directed that a certain public work, that is to say, a way of approach to Foot Bridge over River Mann, in the said Colony, the estimated cost of which does not exceed twenty thousand pounds, shall be carried out under the provisions of the "Public Works Act of 1888," as an authorised work by the Minister for Public Works as Constructing Authority; and that the land described in the Schedule hereto, which is in my opinion required for carrying out the said work, shall be acquired by taking the same under the "Lands for Public Purposes Acquisition Act," as adopted by the "Public Works Act of 1888," : Now, therefore, I, the said Governor, with the advice aforesaid, in pursuance of the "Public Works Act of 1888," do declare by this notification, to be published in the Government Gazette and in one or more newspapers published or circulated in the Police District wherein the said land is situated, that the Crown land comprised within the description set forth in the Schedule hereto has been appropriated, and the private property within such description has been resumed, for the public purposes aforesaid, to the intent that upon the publication of this notification in the Gazette, the said land described

in the said Schedule hereto shall forthwith be vested in the said Constructing Authority as a corporation sole on behalf of Her Majesty, for the purposes of the "Public Works Act of 1888," for an estate in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rates, right-of-way, or other easements whatsoever; and to the further intent that the legal estate therein, together with all powers incident thereto or conferred by the said last-mentioned Act, shall be vested in such Constructing Authority as a Trustee: And I declare that the following is the Schedule of land hereinbefore referred to:—

SCHEDULE.

All that piece or parcel of land situate in the parish of Rusden, county of Gough, and Colony of New South Wales: Commencing on the east bank of the River Mann, at its junction with the south-western boundary of a road 1 chain 50 links wide; and bounded thence on the north-east by part of that boundary bearing south 60 degrees east 1 chain $25\frac{7}{10}$ links; thence on the south-east by a line bearing south 46 degrees 31 minutes west 1 chain $63\frac{2}{10}$ links to the east bank of the River Mann; and thence on west by that river bearing north 3 degrees 13 minutes east 1 chain $75\frac{2}{10}$ links, to the point of commencement,—containing by admeasurement 16 perches more or less, and said to be in the possession of Thomas Forde.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this ninth day of October, in the year of our Lord one thousand eight hundred and ninety-three, and in the fifty-seventh year of Her Majesty's Reign.

By His Excellency's Command,

HENRY COPELAND.

PUBLIC WORKS ACT OF 1888.

(RESUMPTION OF LAND FOR APPROACH TO BRIDGE OVER MUNMURRA BROOK)

Presented to Parliament, pursuant to Act 51 Vic. No. 37.

NOTIFICATION OF RESUMPTION OF LAND UNDER
"THE PUBLIC WORKS ACT OF 1888," 51
VICTORIA No. 37.

NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable Sir ROBERT WILLIAM
DUFF, a Member of Her Majesty's Most
Honourable Privy Council, a Knight
(L.S.) Grand Cross of the Most Distinguished
Order of Saint Michael and Saint George,
R. W. DUFF, Governor and Commander-in-Chief of
Governor. the Colony of New South Wales and its
Dependencies.

WHEREAS I, Sir ROBERT WILLIAM DUFF, the Governor aforesaid, with the advice of the Executive Council, have directed that a certain public work, that is to say, a way of approach to Bridge over Munmurra Brook, in the said Colony, the estimated cost of which does not exceed twenty thousand pounds, shall be carried out under the provisions of the "Public Works Act of 1888," as an authorised work by the Minister for Public Works as Constructing Authority; and that the lands described in the Schedule hereto, which are in my opinion required for carrying out the said work, shall be acquired by taking the same under the "Lands for Public Purposes Acquisition Act," as adopted by the "Public Works Act of 1888": Now, therefore, I, the said Governor, with the advice aforesaid, in pursuance of the "Public Works Act of 1888," do declare by this notification, to be published in the Government Gazette, and in one or more newspapers published or circulated in the Police District wherein the said lands are situated, that the Crown Land comprised within the descriptions set forth in the Schedule hereto has been appropriated, and the private property within such descriptions has been resumed for the public purpose aforesaid, to the intent that upon the publication of this notification in the Gazette the said lands described in the said Schedule hereto shall forthwith be vested in the said Constructing Authority, as a corporation sole on behalf of Her Majesty, for the purposes of the "Public Works Act of 1888," for an estate in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the further intent that the legal estate therein, together with all powers incident thereto

or conferred by the said last-mentioned Act, shall be vested in the said Constructing Authority as a Trustee: And I declare that the following is the Schedule of lands hereinbefore referred to:—

SCHEDULE.

1. All that piece or parcel of land situate in the parish of Turill, county of Bligh, and Colony of New South Wales, being part of portion 2: Commencing on the north-western boundary of the road from Mudgee to Cassilis, at a point bearing north 54 degrees 45 minutes west and distant 1 chain and $\frac{1}{2}$ of a link from the junction of lines 7 and 8 on the south-eastern boundary of said road, as shown on plan catalogued R. 1,050B-1,603, Lands Department; and bounded thence on the north-west by lines bearing north 32 degrees 23 minutes east 10 chains $70\frac{8}{10}$ links and north 43 degrees 14 minutes east 3 chains to the right bank of Munmurra Creek; on the north-east by that bank downwards to the western boundary of the aforesaid road; on the east by that boundary bearing south 14 degrees 56 minutes west 3 chains 20 links; and on the south-east by the north-western boundary of that road, being lines bearing south 59 degrees 27 minutes west 10 chains $80\frac{7}{10}$ links and south 38 degrees 8 minutes west 24 links, to the point of commencement,—be the said several dimensions all a little more or less, containing 3 acres 3 roods 14 perches or thereabouts, and said to be in the possession and occupation of D. M'Master.

2. All that piece or parcel of land situate in the parish of Borambil, county of Bligh, and Colony of New South Wales, being part of portion 5: Commencing on the western boundary of the road from Mudgee to Cassilis, at a point bearing north 32 degrees 41 minutes east and distant 16 chains 44 links from the junction of lines 7 and 8 on the south-eastern boundary of the said road, as shown on plan catalogued R. 1,050B-1,603, Lands Department; and bounded thence on the north-west by a line bearing south 43 degrees 14 minutes west 1 chain 79 links to the left bank of Munmurra Creek; on the south-west by that bank downwards to the aforesaid western boundary of road; and on the east by that boundary bearing north 8 degrees 18 minutes west 3 chains, to the point of commencement,—be the said several dimensions all a little more or less, containing 1 rood or thereabouts, and said to be in the possession of A. Busby.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this seventeenth day of November, in the year of our Lord one thousand eight hundred and ninety-three, and in the fifty-seventh year of Her Majesty's Reign.

NEW SOUTH WALES.

PUBLIC WORKS ACT OF 1888.

(RESUMPTION OF LAND FOR CONSTRUCTION OF A BRIDGE OVER HODGE'S CREEK, AT MUMMEL.)

Presented to Parliament, pursuant to Act 51 Vic. No. 37.

NOTIFICATION OF RESUMPTION OF LAND UNDER
THE "PUBLIC WORKS ACT OF 1888," 51 VICTORIA
No. 37.NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable Sir ROBERT WILLIAM
DUFF, a Member of Her Majesty's Most
Honourable Privy Council, a Knight
(L.S.) } Grand Cross of the Most Distinguished
Order of Saint Michael and Saint George,
Governor and Commander-in-Chief of
R. W. DUFF, } the Colony of New South Wales and its
Governor. } Dependencies.

WHEREAS I, Sir ROBERT WILLIAM DUFF, the Governor aforesaid, with the advice of the Executive Council, have directed that a certain public work, that is to say, a Bridge over Hodge's Creek, on Road Goulburn to Pomeroy, in the said Colony, and the approaches thereto, the estimated cost of which does not exceed twenty thousand pounds, shall be carried out under the provisions of the "Public Works Act of 1888," as an authorised work by the Minister for Public Works as Constructing Authority; and that the land described in the Schedule hereto, which is in my opinion required for carrying out the said work, shall be acquired by taking the same under the "Lands for Public Purposes Acquisition Act," as adopted by the "Public Works Act of 1888": Now, therefore, I, the said Governor, with the advice aforesaid, in pursuance of the "Public Works Act of 1888," do declare by this notification, to be published in the Government Gazette and in one or more newspapers published or circulated in the Police District wherein the said land is situated, that the Crown Land comprised within the description set forth in the Schedule hereto has been appropriated, and the private property within such description has been resumed, for the public purpose aforesaid, to the intent that upon the publication of this notification in the Gazette, the said land described in the said Schedule hereto shall forthwith be vested in the said Constructing Authority as a corporation sole on behalf of Her Majesty, for the purposes of the "Public Works Act

of 1888," for an estate in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the further intent that the legal estate therein, together with all powers incident thereto or conferred by the said last-mentioned Act, shall be vested in such Constructing Authority as a Trustee: And I declare that the following is the Schedule of land hereinbefore referred to:—

SCHEDULE.

All that part or parcel of land situated at Mummel, in the parish of Mummel, county of Argyle, and Colony of New South Wales, being part of Wm. Evans' 2,000 acres grant and D. J. Ross 2,000 acres grant: Commencing on the eastern bank of Mummel Creek, at a point bearing 113 degrees 33 minutes 165 links from a post marked broad-arrow over RD placed at an angle of the road from Goulburn to Pomeroy, and situated at the intersection of the northern side of said road and western bank of Mummel Creek; and bounded thence by a line bearing 113 degrees 33 minutes 290 links to the Goulburn and Pomeroy Road; thence by part of said road being a line bearing 135 degrees 50 minutes 263½ links; thence by a line bearing 293 degrees 33 minutes 534 links to the eastern bank of Mummel Creek aforesaid; thence by part of the eastern bank of that creek bearing north-easterly, to the point of commencement,—be the said several dimensions a little more or less, containing 1 rood 26 perches or thereabouts, and said to be in the possession of W. Clements.

In witness whereof I have hereto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this fifteenth day of September, in the year of our Lord one thousand eight hundred and ninety-three, and in the fifty-seventh year of Her Majesty's Reign.

By His Excellency's Command,

WILLIAM JOHN LYNE.

GOD SAVE THE QUEEN!

ANNUAL REPORT.

Department of Charitable Institutions,
New South Wales, Sydney, 1 October, 1893.

The Director of Government Asylums and Boarding-out Officer to The
Principal Under Secretary.

Sir,

I have the honor to present, for the information of the Honorable the Colonial Secretary, my Annual Report upon the Department of Charitable Institutions, which includes (1) The Government Asylums Branch for the year ended 31 December, 1892; (2) The State Children's Relief Department for the year ended 5 April, 1893; (3) and the Children's Protection Division for the year ended 14 August, 1893. The two latter annual periods are fixed by the special Acts of Parliament creating the particular divisions.

ASYLUMS FOR INFIRM AND DESTITUTE.

The year has been one of considerable stress and privation for the whole community. The wave of financial and commercial depression which, for the past three years, has so markedly affected social conditions in all the Australasian Colonies may be held to have reached its highest level during the latter part of the period under review. Its effects were most seriously felt all over the field of charitable effort. In the Government Asylums for the Infirm and Destitute there was a very noteworthy increase in the number of admissions, while there was a marked decrease in the number of discharges. The causes are obvious. On the one hand, the usual growing number of aged and infirm people found that relatives or friends were unable to continue the customary contributions towards their support; on the other hand, the ordinary "winter applicants," to an excess on previous numbers of more than 300, found their chances of obtaining suitable employment during the summer largely decreasing. There were too many able-bodied and youthful seekers for employment to leave much chance for the elderly and feeble. These two causes combined to increase the number who might not be refused admission, and to decrease the number who ordinarily were dismissed when the fine weather set in. The heavier burden on the Government Institutions may justly be regarded as an index of the great stress experienced by unofficial and private relief agencies. Though the latter were multiplied in number and spurred to the greatest activity, the fear must be entertained that a comparatively large amount of poverty existed (especially in Sydney and its suburbs), which was not adequately relieved. Unfortunately, there are grounds for the apprehension that this unhappy condition continues to exist. This, in addition to the two causes first-named, deprived the Government of that relief from pressure on the resources of the Institutions which is ordinarily experienced on the approach of the summer. A proof of this want of elasticity is to be found in the fact that, while during the preceding five years (1887-91) the increase in the number of "permanent inmates" of the Asylums amounted to 558, last year the number was 319, or nearly three times the ordinary increase. A more remarkable proof is that of the total of 3,396 admissions, 1,866 occurred during the six summer months, and 1,530 during the six winter months. Nothing could be more significant of the trouble last year than this reversal of the usual conditions.

As

As a relief from this somewhat gloomy condition, which, it is to be hoped, will soon be overpast, it is a pleasure to turn to the picture presented by the twenty-two Cottage Homes for Destitute Married Couples at Parramatta. There, twenty-two aged couples are enabled to pass their declining days together, who would otherwise have been separated and placed in different institutions. Here is peculiarly an opening for the exercise of private human kindness and benevolence in supplementing and continuing the benefactions of the Government. The experiment might be extended and tried in various other localities, were it possible to induce the more refined and humane among the local residents to take a wise and considerate interest in the welfare of these old folks. Committees representing donors of reasonable annual subscriptions could act very beneficially in harmoniously aiding the officials to render the lives of the beneficiaries smoother and happier. Many a little comfort and act of graceful kindness might be with propriety received from a friendly honorary visitor which the Government cannot from motives of economy grant. The average annual cost of the cottagers to the State shows a further reduction for the past year. In 1890 the cost per head was £31 5s. 11¼d.; in 1891, £27 11s. 1¼d.; and in 1892, £25 19s. 8d., or a cost per inmate of about 1s. 5d. a day for food, clothing, fuel, light, medical comforts, and all expenses of management.

Turning now to the general history for the year, it will be seen from the tables supplied in this report that we commenced with our Asylums filled to overflowing. The ordinary natural increase—proportionate to the growth of our population—would have led to grave embarrassment from want of space. As may be easily conceived, the abnormal pressure experienced last year created so serious an overcrowding that the Government had no other resource than to authorise the utilisation of the buildings at Rookwood (which it had been in contemplation to render available for the beneficent purposes of a Boys' Reformatory), so as to suitably shelter and accommodate the large number of cases which could not otherwise be provided for. This will be better understood when it is stated that there was an increase of 473 admissions during the year into all the Institutions under my control, and when the books were closed on the 31st December there were 319 more permanent inmates than at the commencement of 1892. Out of a total of 3,396 persons admitted during the year no less than 1,069 were new cases, as against 886 new cases in 1891, and 1,648 were "re-admissions," as against 1,194 who were readmitted during 1891. The increase in these two particular classes of inmates was therefore 183 and 454 respectively, and the average increase in the general admissions was as high as 16·18 per cent., while the increase in the number of inmates reached 12·3 per cent. There was an average of nearly eleven persons admitted to the various Asylums upon every working day in the week throughout the whole year. On the other hand, as has been said, the rate of discharges fell off very considerably, particularly towards the end of the year—the summer months—when all former experiences showed a larger disposition among the hardier of the inmates to leave the Asylums and accept light out-door employment in the country districts. In 1891 the rate of discharge was 20·31 per cent., while in 1892 it receded to 16·46 per cent. The number of deaths was less by 24 than during the previous twelve months and there was an increase of only 4·45 per cent. in the number of patients in the Asylums hospitals, which should be considered highly satisfactory under all the circumstances. Large numbers of the dependents are now employed at useful and profitable occupations in and about the grounds and gardens at all the Asylums, with the result that they are individually healthier and happier, whilst their labour is profitable to the Department. As soon as full advantage can be taken of the resources of the newly acquired grounds at Rookwood this desirable result will be obtained to a much greater degree.

RETURN

THE ASYLUMS HOSPITALS.

There was a marked improvement in the hospital divisions throughout the year and the general health of the inmates was much better, notwithstanding the dangerously overcrowded state of all the Asylums. When the year closed in 1891 there were 1,122 patients in the hospitals, and, though the general admissions throughout 1892 were so very much larger—16·18 per cent.—than during any previous twelve months, there are now only 1,172 patients, or an increase of 50, which is equal to 4·45 per cent. This is a substantial improvement, and will appear the more remarkable when it is compared with the returns of preceding years. The hospital figures of 1890 showed an increase of 11·26 per cent. over 1889, while those of 1891 showed an increase of 13·56 per cent. Increased accommodation, careful supervision, and the unvarying attention of the medical superintendents have now reduced the increase on the daily average to 4·45 per cent., and it is hoped that, with the additional accommodation which Rookwood will provide, even this achievement should be still further improved upon in the near future.

* Includes ophthalmic cases.

The general ophthalmics were 39 in excess of the previous year; but, as a set off against this increase, it is pleasing to note that the less important ophthalmic cases which were treated at the George-street Asylum were 65 less than in 1891. The trained nursing staffs have acted in harmony with the medical officers and staff, and their work has been most efficiently performed at all the Institutions. The mortality was largely increased during 1891 by the introduction and spread of influenza, at Newington principally; but the disease was almost unknown in 1892, when the rate fell from 28 to 5. There were substantial reductions in the deaths from asthma (9), bronchitis (18), and cancer (8), and the largest increases were in cases of paralysis (8), phthisis (18), and aneurism (9), while deaths from senile decay fell off from 167 to 158. There was a falling off of 24 in the total deaths, the figures being 524 in 1891, and 500 in 1892. Considering the exceptional difficulties under which the Department laboured last year, there

there is cause for congratulation in this remarkable result. The following tables will give the results in a completer and more detailed form:—

OPHTHALMIC Cases treated in the Asylum, Macquarie-street, Parramatta, during 1892.

Trichiasis	16	Aphakia	27
Granular ophthalmia...	43	Choroiditis	7
Xerophthalmia	2	Sympathetic ophthalmia	1
Nebula	18	Myopic	1
Nyctalopia	2	Staphyloma of cornea	3

AGES OF DECEASED INMATES.

Out of the general total of 500 inmates who died in the various Institutions during the year, 232 were above the age of 70 years, 84 were over 80, 11 were over 90, and 1 was over 100. There was no unusual mortality from any particular disease, the largest proportion of the deaths resulting, as is generally the case in Asylums for the Infirm and Destitute, from senile decay and phthisis.

RETURN showing the Ages of Deceased Inmates at each of the Government Institutions for Infirm and Destitute for the year 1892.

AGE OF INMATES.

When the year closed there were four dependents in the Asylums over 100 years of age, comprising two women at Newington and two men at Liverpool. There were 20 between 90 and 100, 276 between 80 and 90, 867 between 70 and 80, and 777 between 60 and 70, while the average age remained at 64 as last year. Of the 34 inmates at Rydalmere, 25 were between the ages of 10 and 20 years, and 1 was under the former age.

THE COST OF STIMULANTS.

Since the introduction of the new system of substituting good heat-producing foods for the "medical comforts," which, prior to my taking over the control of the Asylums, formed such a large item in the expenditure, substantial economies have been effected in the use, as well as in the cost, of stimulants. From a total cost of £2,800 in 1888, the annual expenditure on stimulants has fallen to £941 9s. 8d., and although this amount is £165 19s. 3d. in excess of the previous year, the increase is fully accounted for by the very large general increase in the number of admissions. The great bulk of the expenditure in this direction has to be charged to the Liverpool Asylum, where, with 836 inmates, the outlay on medical comforts was £590 9s., thus leaving only £351 0s. 8d. to be distributed over the whole of the other Asylums at George-street, Parramatta; Macquarie-street, Parramatta, and Newington, with a total of 1,831 inmates. The subjoined table gives the details of the expenditure:—

THE PERCENTAGE OF DEATHS.

The practice of computing the percentage of deaths upon general averages, which has been followed in past years, has been found, upon examination, not to be the most accurate method of arriving at a true representation of the facts; and, although it is adopted by high authorities in other public departments, I have made a departure this year, substituting a computation upon the number of distinct individuals instead of the general averages.

For the sake of comparison on the old lines, however, the percentages are now given as computed on both systems. In the attached table, the figures shown under the heading "Individuals" represent the percentage of deaths upon the separate individual lives dealt with during the year, while those appearing under "Averages" are estimated upon the average daily attendance. The actual death-rate for the year, therefore, was 9·30 per cent., or according to the old system of computation, 17·87 per cent., as against 22·95 per cent. on the previous year, and the average age of the patients was 63·31 years. As in former years, the large proportion of deaths at the Liverpool Asylum was due to the fact that it was made the chief receptacle for dependent consumptives and others suffering from fatal diseases who seek admission into the public hospitals.

TABLE

TABLE showing the Percentage of Deaths, and Average Ages of deceased inmates, during the year 1892.

Institutions.	Deaths.	Percentages.		Average ages.

THE COST OF MAINTENANCE.

The greatest possible economy was exercised throughout the year in the management of the Government Asylums for Infirm and Destitute, and Cottage Homes for Aged and Destitute Couples, and the Boys' Home at Rydalmere; but there was an increase in the general expenditure, as pointed out elsewhere, consequent upon the very large increase in the number of admissions, and the greater cost of provisions. The detailed tables show that the total expenditure was £55,872 19s. 10d. as against £46,599 18s. 8d. in 1891, but there is still to be added to this amount a sum of £3,368 11s. 2d., the value of the stock carried forward from 31st December, 1891 (as set out in Table A), which makes a gross expenditure of £59,241 11s. It is necessary, however, to deduct £13,107 16s. for revenue collected during 1892, rent and repairs, and the value of the stock and stores in hand on the 31st December last, full details of which are given in Table B, annexed, which makes the average cost per head of all inmates, including those of the Cottage Homes and in the Hospital divisions, £16 2s. 8d., and for ordinary inmates a fraction over £15 a head. The capitation cost of the Cottage Homes' inmates has been £25 19s. 8d. as against £27 11s. 1¼d. in 1891, and £31 5s. 11¼d. in 1890. At Newington there was an increase of £2 2s. 3¼d. per head, which was occasioned by extra cost of rations, necessary repairs, and large increases having to be made to the stores, particularly in the matter of clothing, upon which item alone the expenditure was £302 9s. 8d. in excess of the previous year, while the additional cost of rations was £531 16s. 7d. Upwards of £300 was also expended during the year at this Institution in the erection of a new ward and the purchase of agricultural implements. The cost at Macquarie-street Asylum was reduced to £18 3s. 11d. as against £19 8s. 3¾d. in 1891, showing a saving of £1 4s. 4¾d., which was accomplished without interfering with the comfort or convenience of the inmates. There was a slight increase at the George-street Asylum, where the cost was £14 6s. 7d. per head as against £14 3s. 2¾d. for the previous year, while at Liverpool there was a jump from £15 16s. 2d. in 1891 to £16 7s. 7d. in 1892. In each of these instances the heaviest items of expenditure were for rations, clothing, fodder, light, fuel, drugs and medical comforts. In all the Asylums there was a decrease in the cost of burials. Large increased conveniences have resulted from the new system under which the whole of the milk used in the Asylums is now supplied from their own dairies, and apart from the fact that a fresh pure article is now obtained, healthy exercise and employment is provided for a large number of the inmates who previously idled their time away about the grounds.

The price of flour was increased from £8 15s. to £10 14s. and £11 12s., while lucerne was 2s. 6d. per ton higher, straw 3s. a ton, chaff 6d. a cwt., maize 4d. per bushel, bran 1½d. per bushel, pollard 2½d. per bushel, rum 6d. per gallon, and brandy 1s. per gallon higher than in 1891. Taken altogether those higher prices affected the general expenditure very seriously.

Subjoined

Subjoined are the detailed tables of the year's transactions:—

NOTE.—A sum, £509 6s. 6d. was also spent in the construction of a Cancer Ward at Liverpool Asylum, £500 of which was a bequest from Miss Fox.

FRUIT AND VEGETABLES.

Extensive improvements have been made in the gardens of the various Institutions, with the result that a large supply of fruit and green vegetables is available for the use of the inmates. A large saving of money has been effected every year since 1889 at all the Asylums by each Institution growing its own fruit and vegetables. At the Parramatta Asylums alone in 1889 green vegetables cost £75, at the present time the supply for the whole of the Institutions does not exceed £234 10s. 8d., which includes the cost of the seed (£67 18s.) and the amount (£166 12s. 8d.) of the small sums paid to the inmates working in the gardens. The progress which has been made at the Glenfield

Glenfield farm has enabled the inmates to supply the Asylums with 16,216 lb. of fruit and vegetables. The farm and Boys' Home at Rydalmere, which have only been utilised in this respect since May and December respectively, have supplied 4,291 lb., thus raising the total vegetable produce from all sources for the year up to 130,750 lb., or 58 tons, as against 44 tons in 1890, and 57 tons in 1891. The supply was ample for all the requirements of the Institutions, though there would have been a much larger quantity of vegetables available but for the failure of the crops at Newington, where there was a falling off of no less than 31,971 lb. of produce as compared with the previous year's operations.

RETURN of Quantity of Vegetables and Fruit from the Gardens of the various Institutions during 1891 and 1892.

Institution.	1891.	1892.

Rydalmere Farm (since 17th December).....	664
Total	128,564 (say, 57 tons)	130,750 (say, 58 ton.)

THE ADMISSION DEPARTMENT.

Emphasis has already been laid upon the exceptionally large increase in the admissions during the year, as compared with the operations of 1891, and, notwithstanding the stringent measures taken to prevent the Institutions being overcrowded, the demand for shelter and relief was such that the resources of the Asylums were strained to the uttermost to provide the most primitive accommodation for deserving cases which could not be turned away from the doors. Admissions were out of all proportion to the experiences of the two previous years at the various Asylums, as will be seen from the subjoined tables. While there was a falling off of 273 in the total number of admissions in 1890, and of 40 in 1891, the year 1892 presents the remarkable spectacle of an actual increase of no less than 473 old persons (or an average of 16·18 per cent.), who are unquestionably unable to earn a livelihood permanently at any occupation or calling. The very large increase was chiefly due to the readmission into the Institutions of aged casuals, who drift in and out of the Asylums according to the weather and the fluctuations of their bodily health, from various parts of the Colony. The increased readmissions during the twelve months now under review was 454, as against a decrease of 151 for the previous year, and the increased new admissions 183 as against an increase of 192 for 1891. The precautions which were taken in 1889 to prevent the admission of undeserving and undesirable applicants, particularly from the country districts, have worked admirably, and have resulted in a decrease of 100 admissions during 1892 upon the orders of country police magistrates. Besides these there have been decreases of 18 from the Coast Hospital, 46 from the Sydney Hospital, and 8 from the Prince Alfred Hospital. As a further result of the new system adopted to prevent imposition the

number of admissions from the country districts has fallen from 769 in 1889, to 526 in 1892, or a decrease of 243. The simple expedient of having a special examination and report made into the circumstances of every application for admission has completely put a stop to the questionable practice, which was formerly adopted by country hospitals in receipt of Government subsidy for the maintenance of their own sick-poor, of casting their responsibilities without check or hindrance upon the State Asylums. In addition to dealing with 3,396 applicants who were admitted, there were some 30 others dealt with who were either refused admission or who ultimately declined to go into the Asylums; and between 30 and 40 other applications in which orders and passes were granted but were subsequently returned, either because "other arrangements" were in the meantime made for the applicant, or because death had supervened. It was anticipated, when the Exhibition Building ceased to be used as sleeping quarters for the unemployed, that a large increased demand would be made upon the Asylums for shelter, but, though a strict watch was kept, experience showed that only nine men holding Labour Bureau tickets applied for admission during the year, and in every one of these cases the applicant was physically unable at the time to do any work.

The subjoined return shows the source of the admissions from the 1st of January to the 31st December for the years 1891 and 1892:—

RETURN of Admissions from 1 January to 31 December in the years 1891 and 1892.

PROGRESSIVE INCREASE.

The increase in the number of permanent dependents in all the Government Asylums for Infirm and Destitute for the six years 1887-92, was 877. There were 2,035 inmates in 1887; there are now 2,912. The increase was gradual until the present twelve months was entered upon, when the steady progress of former years was exceeded, as the following table will show:—

NUMBER

NUMBER of inmates in the Institutions on 31st December, of following years:—

Institutions.	1887.	1888.	1889.	1890.	1891.	1892.

OVERCROWDING.

Great inconvenience was occasioned throughout the year by the overcrowded condition of all the Institutions, and it is no exaggeration to say that had it not been for the unremitting care and increased watchfulness of the staff, the health of the inmates would have been seriously impaired and grave consequences unquestionably have resulted. Under all the circumstances the general good health is a remarkable tribute to the new system of administration which is now being carried out. With an accommodation which, under the most favourable conditions, is only sufficient for 2,205 inmates, the demands for relief have been so pressing that it has been found imperatively necessary to provide for 2,846 infirm and destitute persons, or 641 more than there is house-room for. The admissions have increased year by year without any corresponding increase having been made in the accommodation, until the overcrowding, particularly at Parramatta and Liverpool, assumed such dangerous proportions that it could no longer be considered of a tolerable nature. Pressing representations of the gravity of the evil have been made to the Government at short intervals from October, 1888, when the Asylums came under my control, to February in the present year, but only temporary relief was afforded, though it was shown that hundreds of old men, many of whom were suffering from disease, were sleeping on the floors, in the lobbies, in the passages, on the landings, in the bath-rooms, &c., and the atmosphere was often so vitiated by 10 o'clock at night that it was positively nauseous. Things had reached such a pass that it became necessary to stop all further admissions. There was no alternative, and, though it seemed severe, it was a positive necessity, and had to be confronted. At this critical juncture the Government consented to permit the unoccupied buildings at Rookwood to be temporarily used as an Asylum for old men, 200 of whom have already been transferred from Liverpool and Parramatta, where the inconveniences were being felt most seriously. The pressure at both the Newington and the George-street Asylums is very great, but as soon as full advantage can be taken of Rookwood the difficulty will be overcome. As the Rookwood Asylum is a new acquisition, and is not yet in full swing, it will be dealt with in my report for the current year's transactions. The subjoined tables will illustrate the locality of the overcrowding at the present date:—

TABLE showing the present overcrowding, 1st April, 1893.

Institutions.	Accommodation for.	Number now in.	Excess.
George-street Asylum, Parramatta.....	*905	1,078	173
Macquarie-street Asylum, Parramatta	240	319	79
Liverpool Asylum	650	890	240
Newington Asylum	410	559	149
Total.....	2,205	2,846	641

* 176 sleep in cottages outside the Asylum.

STATE CHILDREN'S RELIEF DEPARTMENT.

Detailed particulars of the children under this branch on December 31, 1891, and December 31, 1892, are contained in the following table:—

	Boarders.		Apprentices.		Adopted without Payment.		Boarded out without Payment.		Absconders' List.	
	1891.	1892.	1891.	1892.	1891.	1892.	1891.	1892.	1891.	1892.
Boys	736	746	508	539	57	51	12	11	22	14
Girls	521	543	287	301	84	84	6	7	7	1
	1,257	1,289	795	840	141	135	18	18	29	15

	Unofficial Children.		In Hospitals.		In Cottage Homes.		In Dépôt.		Total.	
	1891.	1892.	1891.	1892.	1891.	1892.	1891.	1892.	1891.	1892.
Boys	0	1	1	6	45	49	1	2	1,382	1,419
Girls	3	3	1	4	77	97	5	3	991	1,043
	3	4	2	10	122	146	6	5	2,373	2,462

The good and effective work done during the year by the boarding-out system and other methods of dealing with the wards of the State have already received the fullest exposition at the hands of the President of the State Children's Relief Board in his report for 1892-3. The total number under the control of the Board was increased by 89 during last year, while the number paid for was increased by 70. The number of absconders decreased by 14, or nearly 50 per cent. of last year's number. There was one additional unofficial child, that is, a voluntary protegee of the Board, over whom, being above the age of control, there would otherwise have been no legal right vested in the Board. The number of sick children in the Cottage Homes increased by 24. It should be remembered that these refuges serve as convalescent homes to our hospitals as well as for our State children. A visit to them by any well-wisher of the Colony would afford convincing proof of the splendid work the State is doing in rescuing deserted, orphaned, and neglected children from the sad fate which would otherwise have awaited them. Any reader of Dr. Dugdale's famous sociological study of "The Jukes" will readily apprehend what mischief even one couple of the vagrant or criminal type may do to the community by producing innumerable dependents of the same class, and will be able to grasp the enormous value of the work of rescue and reformation done by the State Children's Relief Board.

Satisfactory

Satisfactory progress has been made at the Cottage Homes at Parramatta and Mittagong for the care and treatment of invalid and crippled children who were formerly either inmates of the hospital divisions of the public charitable institutions or were treated in the general public hospitals of the Colony.

The following table of the ailments and other characteristics of children who passed through the Cottage Homes is highly instructive:—

Abscesses	3	Debility (general) and measles ...	4
„ and swollen glands ...	1	Dysentery	3
Anæmia	2	Dirty habits and sore ear	4
Bronchitis (chronic)	1	Dropsy and rheumatism	3
„	1	Deaf and dumb (change of air) ...	8
Contraction of leg sinews	1	Diarrhœa	10
Chilled feet	1	Defective palate	2
Cripples	7	Dirty habits	10
Catarrh	3	Deformed and paralyzed ..	2
Delicate and lame	5	Eruptions	25
„ ophthalmic	10	„ scalp and deformed chest	1
„ partial paralysis	5	„ and bad habits	3
„ running ears	10	„ and scrofulous	2
„ scrofulous	8	„ of scalp	15
Debility (general)	184	Epilepsy	6
„ and turned eye	1	Eruptions of scalp and body ...	5
Knee-pan, injury to	1	One leg	2
Fractured limb	1	Spinal disease	10
Hip disease	4	Strumous	1
„ and partial paralysis	1	Semi-idiotic	2
Heart disease	5	St. Vitus' dance	3
Hip disease and running ears ...	3	Sore leg	5
Hand, accident to	1	„ foot	2
„ necrosis of	1	„ ear	9
Hip, accident to	1	Scrofulous	35
Malformed feet	4	Scabies... ..	11
„ hands	1	Teething	1
Marasmus	2	Typhoid	1
Malformed mouth	3	Ulcers	3
Incontinence of water	5	Weak legs	1
Necrosis of foot	1	Whooping-cough	12
One eye	2	Weak intellect	14
Ophthalmia	201	Paralysis	7
„ and scrofulous	7	„ of brain	1
„ semi-idiotic	1	„ (partial) and spinal disease	1
„ ulcerated foot	2	Running ears	15
„ running ears	13	„ and skin eruption	5
„ and scalp eruption, and		Rheumatism... ..	2
general debility	15	Ring-worms	15

Nine of these children were half-castes (Chinese). The number of children who had passed through homes as apprentices was 64.

The total expenditure upon the homes during the year which has just closed has been £3,428 14s. 10d., or £3,233 14s. 10d. for maintenance, management, cost, medical expenses, salaries, &c., and £195 value of clothing furnished to the inmates from the Central Store at Paddington. The average cost has been £22 2s. 5d. per head, or a slight increase upon the capitation cost of the previous year, and for boarded-out children the cost per head to the Government has been £13 7s. 2d., or 8s. 8d. less than in 1891.

RELIEF

RELIEF TO DESTITUTE FAMILIES.

In May, 1892, it became necessary to afford relief to the families of the destitute unemployed. In consequence of representations to the Government that a large number of men, women, and children were in an almost starving condition in the city and near suburbs of Sydney, instructions were issued that the Department of Charitable Institutions should act in conjunction with the Labour Bureau in relieving this distress under a method that would not be likely to cause the recipients of relief to relax their efforts to obtain employment. It was accordingly determined that a ration sufficient to keep these destitute families just above the pressure of actual hunger should be distributed in deserving cases, and every precaution possible was taken to prevent imposition. Applications were made in writing. Where the distress was obvious, temporary relief was at once given pending inquiries. The home of every applicant was visited and reported upon by inspectors from my Department, and the measure of relief to be given in each case was then decided by myself and the Superintendent of the Labour Bureau. The necessity for the most careful precautions against imposition was soon apparent. In many cases persons applied who were not experiencing the slightest distress from the prevailing depression; in others the applicants were comparatively well off, and a third class of impostors to be guarded against were those who were in receipt of relief from other charitable organisations. It was not difficult, however, under the system adopted, to guard against those objectionable applicants; and there is every reason to believe from the reports that attempts at imposture were not practically successful to any great extent.

The distress has not been confined to any particular section of the industrial classes. An analysis of the returns shows that it has been severely felt by all alike, and that the applicants included tradesmen, mechanics, clerks, and labourers. Any lengthened reference to this division of my report, however, is not necessary here, inasmuch as detailed statements have been sent in periodically to the Chief Secretary, in which particulars of the operation of the relief system have been fully explained and published for public information.

The total number of applications dealt with up to the period of this report has been 2,103. Of these, 1,603 were granted, and 500 refused on various grounds after careful inquiry into the circumstances of the applicants. It should be mentioned that, wherever any doubt existed as to the *bona-fides* of the claims, the applicant received the benefit of the doubt, in order that hardship might not possibly be inflicted upon any deserving persons about whom it had been difficult to obtain definite information. It is, therefore, improbable that any of the applicants who were refused had any claim whatever upon charity, and the necessity for the beneficent provision which the Government had made for the relief of those who were actually in want, and who were all married men with families, may be judged from the number of cases which were reported to be genuine. Altogether, since the initiation of the relief system, 41,770 rations have been issued, at a total cost to the State of £3,132 15s., or an average weekly expenditure of £56 19s. 2d. The method adopted was to issue a full ration for each adult, and half a ration for every child of the family, and where illness prevailed, care was taken to meet the special necessities of the case either from the Government Relief System or the Sydney Benevolent Asylum. For the purpose of as far as practicable reducing the claimants for relief, preference was given at the Labour Bureau to the married men who were in receipt of it wherever employment could be obtained for them by that Department, and as soon as they received their first week's wages the issue of provisions to their families ceased. By this method it has been

been possible to prevent any disproportionate increase in the issue of rations during the past few months. The number of families in the city and near suburbs of Sydney at present receiving rations is 401, which represents altogether about 1,604 persons, including fathers, mothers, and children.

It should be mentioned that distress of the character herein explained was not confined to the metropolis and its environs. In several important districts with large industrial populations it became necessary during the past year to apply for similar assistance, but with the exception of Parramatta, and several of the small townships adjoining, the Government aid was not dispensed through the medium of my Department. Local representatives caused instructions to be issued for the distribution of provisions to many poor residents of these localities, and the same system of inquiry was adopted to that which has already been pointed out. The separate figures for these districts show that the average number of persons in receipt of rations weekly from 8 June, 1892, to 30 June, 1893, has been 628. These include 210 adults and 418 children. The total cost has been £644 10s. 3½d., or an average cost of £11 13s. 1½d. per week. Latterly relief to the Parramatta district has been discontinued except to women and children.

THE CHILDREN'S PROTECTION ACT.

The "Children's Protection Act," which was designed to abolish the horrors of "baby-farming," to prevent criminal malpractices, and to check the employment of children of tender years in dangerous public exhibitions, has been partially in force, under the supervision of a special division of this Department, since 14th August, 1892. Its provisions were extended to all parts of the Colony on 7th July, 1893. Though only applying to a limited area for the greater part of the year, the result of its operations has been most beneficial. It has distinctly preserved the lives of many helpless children, and it has done more: it has been the means of restoring many to their mothers. As a remedial measure against the cruelties of the baby-farmer, it is believed to have been, in the area of its influence, completely effectual. It has, indeed, almost eradicated the evil which, it is hoped, will soon completely cease to exist as the Act is enforced in its wider field of usefulness.

Naturally its first year of existence has meant a great deal of work in the drafting of necessary forms, regulations, &c., and in accustoming the class with whom we have had to deal to regular official supervision. Ignorance of the Act was pleaded in many instances, and slight infringements were met in the first instance by instruction and remonstrance. Wherever it was found that "guardians" were not treating their "adopted" children well, the parents were communicated with, and induced either to take the child or transfer it to another and more humane guardian. In cases where the parents' addresses could not be ascertained the children were sent to the Benevolent Asylum. Thirteen children were thus dealt with, while 151 were returned to their parents.

Six hundred and four children have been registered under the Act. These, for the most part, are the offspring of unmarried women who obtained "foster" parents willing to "adopt" or maintain the children for a consideration, paid either in a lump sum or by weekly instalments. In the first class of cases it was found to be the rule that the "adopted" ones did not progress well, and the officers of the Department, acting under instructions, paid frequent visits of inspection, and closely observed how the children were treated. Their vigilance caused the guardians to become imbued with a wholesome dread of detection in case of wrong-doing, and the children, the nurses, and the home surroundings

surroundings show a marked improvement on the state existing prior to the Act being brought into force. Neglect and illtreatment, if not now a thing of the past, have been minimised in so far as they menaced infantile life. In cases where the foster parent receives a weekly payment the inducement is to prolong life, not destroy it. It is the opinion of the officers that the present law should be so amended as to bring children who have been ostensibly "adopted" without payment within its scope. It has occurred that "guardians" have vehemently asserted that the child they had charge of had been "adopted" without payment. The statement was made with a view of avoiding registration and consequent supervision, but after strict inquiry it was discovered that a sum of money had been pinned to the child's clothing. In one case of the kind a prosecution for non-registration was instituted; a committal followed. "Ignorance of the law" was urged in extenuation, and the guilty party discharged by the Court after entering into recognizance to appear for sentence if called on. Four hundred and fifty-nine foster homes are under supervision. In some of those only one registered child is domiciled, and, as a consequence, the persons and premises are exempt from registration. In all other cases, where two or more children are lodged, registration has been made. It would be wise for all homes to be registered where a child is maintained for payment apart from its parents. Experience teaches that when children are placed in objectionable homes evil consequences follow, which can only be effectually checked by registration.

Lying-in homes to the number of fifty-nine have been supplied with copies of schedules in book form, for use in the event of births taking place in the premises. In some of these homes the officers are of opinion that criminal malpractices—difficult to detect—are resorted to. Instances have occurred where the keepers of these homes have relinquished their trade in consequence of the supervision of this Department. The homes are now, however, mostly conducted in an unobjectionable way.

Four prosecutions have taken place for breaches of the Act. In one case the sentence was three months' imprisonment; in the remainder the defendants pleaded guilty, and were discharged on entering into recognizances to appear for sentence if called on. The number of cases reported to the Crown Solicitor for failing to register, &c., was seventy-three.

Eighty-four deaths of registered infants have taken place. Some were premature births, others were weaklings who died from marasmus, and several died from measles. Though it is believed that mothers of illegitimate children have frequently resorted to drugs prior to their accouchement, the mortality amongst their weakened offspring has not been great. Two coroner's inquests on the bodies of children whose deaths there was reason to believe were brought about by neglect were held. The accused were acquitted.

Several cases of alleged illtreatment of children not in registered homes have been investigated, with the result that the charges were either not substantiated or that the offence was found to be so slight as to merit only a reprimand and caution.

The following is a tabulated statement of the results of this Department's experience in the first year's working of the "Children's Protection Act":—

Number of Children registered.	Number of Foster Homes.	Number of Registration from Lying-in Homes.	Number returned to Parents.	Number sent to Benevolent Asylum.	Number of Prosecutions.	Number of Deaths.	Number of Inquests.	Number of cases submitted to the Crown Solicitor.	Number of visits paid by Children's Protection Act Officers.

CONCLUDING REMARKS.

Taking into account the increased prices of articles of diet, fodder, stimulants, &c., during 1892, the year's operations have been highly satisfactory; but I anticipate being able, in my Report for the current year, to show a decrease in the cost per head, as the most stringent rules as to economy are being enforced in every branch.

One disagreeable phase in our experience has already received emphatic treatment in past Annual Reports: The subject is again introduced because it is one that must not be permitted to drop out of sight. I refer to the number of persons in good circumstances whose aged and infirm relatives, in the closest consanguinity, are cast as burdens on the public charge. There are persons well able to perform the duty which in humanity and by the general consent of public opinion should devolve on them, but who are apparently not pervious either to reason, entreaty, or any sense of shame, whose fathers, mothers, or brothers, are maintained by the Colony. Apart from the contrast between the lot of these unfortunates and that of their well-to-do relatives, there is the serious official fact that overcrowding has existed to a dangerous extent, and that it still exists in an unpleasant degree. Coercion by legal means and public exposure are the only weapons that promise to be effective in dealing with the callous indifference of these defaulting relatives. Among the thirty-seven points indicated in my report for 1890, under the heading of "Outlines of Necessary Legislation"—and the further consideration which two additional years' experience has enabled me to give to these suggested bases for legislative enactment has not in any way lessened my feeling of their importance—this question of the necessity of bringing legal pressure to bear on heartless well-to-do relatives of destitute persons was one of the most prominent. It should be borne in mind that the mere existence of the power to enforce the dictates of humanity and reason may, in the event, prove to be the most useful means of preventing the necessity for enforcing it.

We may now fairly claim that in many points connected with our system of public relief, the State performs its duty to the weak and helpless in an exemplary fashion. Our cottage homes for invalid children and for destitute married couples; our system of encouraging the local raising, by inmates' labour, of all manner of farm produce; our method of supervision and inquiry,—are all matters in which we may claim to have set object lessons to several of the other Colonies. Indeed, all this was admitted at the last Conference on Charities held in Melbourne. Much, however, remains to be done before we may venture to rest content in these directions. Many valuable reforms indicated by the suggestions in the 1890-91 Report have not yet been attempted, because of the financial difficulties in the way.

Equally important with the question of compelling defaulting relatives to recognise their duty to their own kith and kin (though more difficult to effect) is the great matter of the desirability of establishing some State machinery for stimulating, organising, and co-ordinating private charitable effort. The more vigorous and healthy the tone of this, the more easy becomes the task of the State. The line of demarcation between the duty of Government and that of the individual in the beneficent and ever-pressing work of succouring the poor, rescuing the fallen, and preventing degradation, can be made so clear and simple that a perfect understanding can easily be brought about between the private and public almoner. There is but one way in which we can do our duty to the poor and fallen without encouraging the growth of a burden of pauperism on the public purse—a burden under which older communities are groaning, and which they are daily finding more intolerable. There is but one way in which the individual

individual desirous of doing what in him lies to benefit his generation by aiding in the work of humanity can do it most effectively. That way is to bring all private charitable societies into line and touch with each other, and into fraternal relations with the State charities, and to organise the work of individuals so as to prevent duplicated, and consequently wasted, effort, and also to prevent neglect of necessary duty. The difference is that between a disorganized mob and a disciplined battalion. The experiences of last year prove the wisdom of united and regulated effort in which, the State, having done its recognised duty, there is left a clear field for the associated or individual workers. A system of organization of all forms of private effort and of their affiliation to State charity is the one method by which periods of unusual depression may be overcome without their resulting in a permanent increase of the mass of helpless and hopeless poverty which is always to be met with in civilized communities.

In conclusion, I beg to tender my thanks to all the officers of the Department and other gentlemen who have, as heretofore, accorded me their valuable co-operation.

I have, &c.,

SYDNEY MAXTED,

Director, Department of Charitable Institutions.

SCHEDULE A.

WEEKLY DIETARY—Compiled from dietary scale (weight).

Remarks.—Hospital dietary to be regulated by Medical Officer; and general record to be kept for inspection in diary. Wines, beer, and spirits to be issued only under authority of Medical Officer, except in cases of emergency.

Day.	Breakfast.	Dinner.	Tea.
SUN.	1 pint coffee.* 1 pint porridge, made with 2 oz. maize meal or oatmeal, and 1 oz. treacle or sugar, at discretion of Superintendent. 4 oz. bread.†	Irish stew, made with 14 oz. mutton (including bone weight), 12 oz. potatoes, and other vegetables, onions, and herbs, 1 oz. flour. 4 oz. bread. Cabbage.	1 pint tea, made with $\frac{1}{4}$ oz. tea, $\frac{3}{4}$ oz. sugar, $\frac{1}{2}$ gill milk. 6 oz. bread. 1 oz. honey.
MON.	1 pint tea, made as for Sunday's tea. 6 oz. bread. 1 oz. jam.	14 oz. beef, roasted. 12 oz. potatoes. 2 oz. bread. 6 oz. pudding.‡	1 pint tea. 6 oz. bread. 1 oz. treacle.
TUES.	1 pint porridge, } made as above. 1 pint tea, } 4 oz. bread. }	Haricot, 14 oz. mutton and necessary vegetables. 4 oz. bread. 1 pint soup, made from liquor of beef bones of previous day, with 1 oz. barley, rice; or pease meal, and other vegetables.	1 pint tea. 6 oz. bread. 1 oz. jam.
WED.	1 pint coffee.* 6 oz. bread. 1 oz. treacle.	14 oz. boiled beef, with soup made as at present. 12 oz. potatoes. 4 oz. bread.	1 pint tea. 6 oz. bread. 1 oz. honey.
THURS.	1 pint tea, } made as above. 1 pint porridge, } 4 oz. bread. }	Curry, 14 oz. mutton and necessary seasoning. 12 oz. potatoes—rice may be substituted for potatoes. 4 oz. bread.	1 pint tea. 6 oz. bread. 1 oz. treacle.
FRI.	1 pint coffee.* 6 oz. bread. 1 oz. honey.	14 oz. beef (weight includes bone) minced. 12 oz. potatoes. 4 oz. bread. Cabbage.	1 pint tea. 8 oz. currant cake, made with same ingredients as pudding.
SAT.	1 pint tea, } made as above. 1 pint porridge, } 4 oz. bread. }	Repeat Tuesday's dinner.	1 pint tea. 6 oz. bread. 1 oz. treacle.

* One pint coffee, made with $\frac{1}{4}$ oz. coffee, $\frac{3}{4}$ oz. sugar, $\frac{1}{2}$ gill milk.

† Bread to be cut up and served out in its proportions for each meal.

‡ Receipt for bread pudding for 250 men, each to receive about 8 oz.:—Bread, 50 lb.; flour, 12½ lb.; suet, 8½ lb. (dripping should be used when practicable); sugar, 8½ lb.; currants, 8½ lb.; spice, 2 oz. These quantities absorb three buckets of water. To be divided for boiling into puddings of required size. Daily record of breakfast, dinner, and tea to be entered in book kept for that purpose.

P.S.—The foregoing to form basis of diet, which may be so regulated or altered, at discretion of Superintendent, as to suit convenient working of establishment, so long as it is not inferior in quality and quantity, and is of the same general character.

Daily dietary scale for unemployed men:—14 oz. bread, 14 oz. meat, 12 oz. vegetables, 1½ oz. sugar, 1 gill milk, $\frac{1}{4}$ oz. tea, 1 oz. jam, treacle, or honey, for tea, and same for breakfast with bread, when no porridge; 1 oz. pepper and 20 oz. salt for every 100 full daily rations. Any inmate requiring more bread at any meal should at once inform the Superintendent, or any person authorised to receive request.

Men actively employed, such as cooks, laundrymen, gardeners, labourers, &c., may be allowed 1 pint coffee, 1 oz. cheese, 4 oz. bread, in addition to authorised scale—only when no spirits or beer are granted. The medical officer may order any extra articles of diet he may deem necessary in particular cases.

Daily dietary scale for working men:—16 oz. bread, 16 oz. meat, 12 oz. potatoes, 1½ oz. sugar, 1 gill milk, $\frac{1}{4}$ oz. tea, 1 oz. jam, treacle, or honey for tea, and also for breakfast with bread, when no porridge.

1893.

NEW SOUTH WALES.

STATE CHILDREN'S RELIEF DEPARTMENT.

R E P O R T

OF THE

PRESIDENT, THE HON. W. J. TRICKETT, M.L.C.,

FOR THE

YEAR ENDING 5 APRIL, 1893.

Presented to Parliament, in accordance with the provisions of Act 44 Vic. No. 24.

SYDNEY: CHARLES POTTER, GOVERNMENT PRINTER.

1893.

[1s. 3d.]

12—*a*

[1065 copies—Approximate Cost of Printing (labour and material), £20 13s. 6d.]

The President of the State Children's Relief Board to The
Colonial Secretary.

Charitable Institutions of New South Wales,
State Children's Relief Department,
Central Home, Paddington, 5 April, 1893.

Sir,

I have the honor to present, for the information of Parliament, the Twelfth Annual Report of the operations of the State Children's Relief Branch of the Charitable Institutions of New South Wales during the year ending 5th April, 1893.

The statistical and general records of the Department, which are fully explained hereafter, show that the period under review has been characterised by progress and economy in the various divisions of the Department; that the social and moral results of the boarding-out system, which it has been the pleasant duty of the President to draw attention to year after year, have been quite up to the high standard hitherto attained; and that the efforts of the State Children's Relief Board and its agencies to extend to the dependent children of this country the privileges of family life and home training in place of the stiff and monotonous existence they were formerly subjected to in large asylums, have again been attended with the successful results which for twelve years have invariably followed the establishment of the system in New South Wales. This experience, I may mention, is similar to that of the neighbouring colonies, in the most important of which the boarding-out system has been universally adopted, while in the others it is steadily being made the national policy of dealing with State children with equally satisfactory results.

The Reports have year after year dealt with the question of a reformatory for criminal boys in this Colony; and although the subject has, in a literary sense, been pretty well worn threadbare in all its aspects, the desired end is apparently still so far from consummation that it may once more well be urged upon the attention of Parliament. At the date of my last year's report, it appeared probable that a reformatory would be at once established in the Government buildings at Rookwood. A scheme was formulated which seemed practicable enough, and all the details of management were arranged on very economical lines. The great overcrowding at the Government Asylums for Infirm and Destitute, however (arising from the unusual influx of patients from the metropolitan and country hospitals, and also in consequence of the extraordinary distress prevailing in this colony during the past two years, which rendered many persons unable to support their aged relatives) made it imperative that an auxiliary asylum for the aged infirm should be opened at once, and the Rookwood buildings and grounds were selected with that object. The advantages of concentrating the general asylum system in this locality became so apparent to the Chief Secretary in the course of his inquiries that he, in my opinion, very wisely determined to set apart the Rookwood premises for this purpose. As his proposals in that direction

are already being developed, it is not now probable that the buildings will ever be utilised as a Boys' Reformatory; and considering the present state of the public finances, it is not likely that other buildings can be erected for some time to come. The matter is of such paramount importance to the social system of this country that it should not be allowed to rest as it is. There has hitherto been considerable difference of public opinion as to the relative advantages of a ship and shore reformatory for young criminals, and I am aware that my predecessor, the Hon. Dr. Renwick, favoured the shore system, doubtless on grounds fully justified from the careful inquiries which I know he made into the results of its operation elsewhere, while I remain a strong supporter of the ship method, judged by my knowledge and personal observation of the satisfactory results attained on the "Vernon" and "Sobraon" among the industrial school boys, who also include a considerable number of young criminals. A good deal can doubtless be urged in favour of both methods; but it is not now necessary, nor is it desirable for me to discuss that point here. What I do urge, however, is that something should be done to keep young criminals, and particularly first offenders, from the taint as well as from the criminal influences of the gaols; and standing provision for about 100 young criminals is urgently needed. It has been often suggested by me and others, that the "Wolverene," long since useless for defensive purposes, might, until a permanent policy of dealing with juvenile offenders is determined upon, be tentatively used at a comparatively small outlay as an auxiliary ship to the "Sobraon" for young criminals only, but the Government have apparently determined to sell the vessel.

The Minister of Justice has wisely endeavoured to further a practice hitherto occasionally adopted by issuing a minute directing magistrates to so interpret the law, when possible, that boys known to be guilty of criminal offences may under certain conditions be proceeded against under the Industrial Schools Act and committed to the "Sobraon" instead of being charged as criminals and sent to gaol. This action is both merciful and commendable; but it is at the best an incomplete expedient, seeing that although there is ample accommodation on board the "Sobraon" for all the boys that are likely for some years to be committed under the Industrial and Reformatory Schools Acts, it is not possible, in the confined limits of any ship, to secure the complete separation of the two classes of offenders that is desirable.

While dealing with this question of the treatment of young incorrigibles, I may mention that a difficulty which it was foreseen would arise in connection with the boarding-out system as time lapsed has during the past year become very manifest. In consequence of defects in the State Children's Relief Act, and also in the Acts governing the Industrial and Reformatory Schools, there is no provision to enable the State Children's Relief Board, or any other authority, to commit the elder boarding-out boys and girls who may become unmanageable to any institution established for children of that class. There are now a limited number of such children who have not actually committed any breach of existing laws that would admit of their being sent to either the Girls' Reformatory or the Boys' Industrial School Ship, but who are still really only fit subjects for confinement in those refuges until they are sufficiently reformed to be returned to society with safety to themselves and others on moral grounds. At present girls of this class can only be sent from home to home, and no matter how carefully they may be watched, they thus have greater or lesser opportunities of corrupting others and being further demoralised themselves. So far as the boys are concerned, the difficulty has in some measure been met—but still only very partially—by a home for elder boys at Rydalmere on the Parramatta River. In Victoria and South
Australia

Australia the laws are so regulated that these young incorrigibles can be sent to the Reformatories and Industrial Schools, and retained there up to 18 years of age, until their reformation is believed to be effected. This system has been found to answer admirably. In view of its ascertained necessity in New South Wales, a deputation from my Board waited upon the Minister of Public Instruction, and requested him to allow its elder girls, when found to be incorrigible in homes, to be informally sent to the Industrial School at Parramatta for a time, but the Minister, having consulted the Crown Law authorities, considered that such a course would be an infraction of the law, and declined to consent to it. I have, however, prepared a short Bill, which is now under consideration by the Crown Solicitor, and which, if approved of, and then adopted by Parliament, will enable the Board to send its young offenders to either the Reformatories or Industrial Schools, when all other expedients fail for making them manageable. There should be no opposition to this proposed measure, since there is nothing of a really debatable nature in it; and the Board consequently hope that it will be dealt with immediately after Parliament re-assembles.

I am glad to be able to report that the Children's Protection Act, the passing of which the Board's investigations, in common with the action of cognate agencies, materially aided, has been carried into effect very vigorously by officials associated with the State Children's Relief Department during the past year. It has already been explained in these reports that the objects of the measure were:—

- (1.) "To provide heavy penalties against unlicensed foster mothers who may take young children to nurse; and to place their homes under official inspection in order to prevent the evils arising from baby-farming.
- (2.) "To place under subjective control and supervision all establishments legally classed as lying-in homes, and which in many cases were known to include malpractices of a criminal character as well.
- (3.) "To further provide for the registration of still-born infants.
- (4.) "To protect children under 16 years of age who may be employed in amusements of a dangerous character."

It was pointed out in the Board's report last year that whilst the Act provided safeguards against the very serious abuses which it was intended to deal with, it should not be inquisitorial in its operations if honestly administered. My inquiries justify me in believing that due care has been taken to avoid the danger thus hinted at; and that thus far the result of this very necessary measure of social legislation has been highly satisfactory. It is not within my functions as President of the State Children's Relief Board, to dilate upon the evils which the Act was intended to remedy, and which have already been sufficiently made public by the administrative authorities, nor to go fully into the details of its operation. But I may just say that while great additional protection has, under its provisions, been afforded to infant life in the proclaimed districts during the past year, the equally important abuses which it was intended to deal with have been largely suppressed. There is every reason for believing that baby-farming does not now exist to any large extent in the thickly populated districts which the Act governs; and the results of the measure have been considered sufficiently important for the Government to extend its powers throughout the Colony generally. Whereas it was formerly commonly the practice for heartless baby-farmers to take in from eight to a dozen infants under most disgraceful conditions

as

as to accommodation and treatment, it is not now permissible for any person to receive more than three, and then only under very exceptional circumstances, the usual number being two, and several so-called homes for infants have consequently been broken up. The prosecutions thus far instituted by the Children's Protection officers have acted as a wholesome deterrent to offenders of this class, the penalties being very heavy both in the direction of fine and imprisonment. At the present time there are 204 homes registered, containing 221 infants, and these, together with 43 lying-in homes, are under supervision and inspection, the reports in every case being tabulated by the Department for reference when necessary. This is not a mean result for less than one year's work, seeing that the new Department had in the same period to be organised, and the large number of persons subjected to its control discovered and instructed. The Act has been found defective in some particulars, but these defects, to which it would be unwise to here direct public attention more fully, can be remedied by a short amending measure at some future time. But even in its imperfect condition it is having a most effective bearing upon the vital statistics of the Colony, and has proved thus far an unmixed blessing to the most helpless section of the community, as, whilst it has preserved life, it has also been the means of securing many homes in which there is some warrant for the kindly treatment of young infants, and abolishing others in which there was too much reason to believe these weaklings were destroyed by the most cruel processes of neglect and slow starvation.

I regret that I am not yet in a position to report that any practical step has been taken towards erecting suitable Government buildings for the Cottage Homes for the delicate and invalid children at present housed in rented premises in the Mittagong district. A sum of £5,000 was once voted for this purpose by Parliament; but the Government of the day declined to sanction its expenditure in view of a falling revenue. At this period of depression I should be very loath indeed to recommend any expenditure unless absolutely necessary for the welfare of State children, or unless it would effect a saving to the revenue; on both grounds it is desirable that provision should be made on the loan estimates for new buildings for Cottage Home purposes. It is really necessary that these particular children should be treated in premises containing special accommodation and sanitary arrangements, and it would be more economical to pay the usual charge for interest upon loans, and have more suitable buildings erected under that plan on a large area of Government land, than to continue to pay rent charges. The excellent buildings erected at Government cost some years ago for the Children's Cottage Homes at Pennant Hills, Parramatta, afford the best practical proof of this fact; and although the Homes at Mittagong continue to do good work under great disadvantages, their efficiency would undoubtedly have been greatly increased under the same favourable conditions I have pointed out. The details of the management of this important branch are dealt with in their proper place in this Report, and it will be noted that there has been no diminution of its success.

I may appropriately state here that the Board has special claims to the consideration of Parliament where matters of public expenditure are concerned. Although it is a purely voluntary agency it has always practised rigid economy. As a result, the system, as compared with that which prevailed when dependent children were dealt with under the barrack system, is effecting an annual saving of over £13,000 to the country in maintenance cost, and it has been carefully estimated that the total saving in this direction since the Board commenced its operations twelve years ago has exceeded £100,000, apart from the higher advantages which it is contended have resulted to the commonwealth from its honorary labours.

The

The complete statistics of the State Children's Relief Department show that from its initiation up to 5th April, 1893, 4,925 children have been removed for boarding-out from the State institutions of this Colony and others partly supported by public contributions. 2,388 of these children have been discharged to their parents and otherwise from the control of the Board; and the number under control on April 5 was thus 2,537.

The following table shows the rate at which the number of children under the care of the Board has increased annually since the initiation of the boarding-out system in 1881 :—

Under control on	Supported by Govern- ment.			Adopted without payment.			Apprenticed.			Total under control.

* This total includes 8 children in Hospital, 143 in Cottage Homes, 23 in Dépôt, 15 under 3 years paid for at 7s. per week, 12 delicate children at 6s., 1 delicate child at 7s. per week, 17 infants paid for at 8s. per week, and 17 infants paid for at 10s. per week.

† This total includes 20 children who are classed as "Boarders without subsidy," that is, placed with guardians who, as in the case of adopted children, do not receive payment for maintenance.

‡ This total includes 21 absconders, whose names still appear upon the books, and 6 children classed as unofficial.

The daily average number of children out as boarders during the year was 1,447.

The great distress which has prevailed amongst the industrial classes caused a heavy increase in the total number of children brought under the control of the State during the twelve months which closed on the 5th April, 1893. There were then 141 more children under control than in 1892, but of these only 75 were actually supported by the Government. In 1892 there were 1,389 children supported by the State, while there are now 1,464. In 1892 there were 2,396 children placed out—there are now 2,537. The practical success of the boarding-out system under which the helpless waifs and strays of the community are rescued from want, moral contamination, and degrading associations and disease, and trained up to become useful citizens in the selected homes of industrious and exemplary people is shown in its expansion during the twelve years of its existence. There were 59 children under control on the 5th of April, 1881—there are now 2,537, and during the interval useful trades and profitable occupations have been found for upwards of a thousand children who have grown up and been taught trades under the system, many of whom would otherwise most probably have drifted into the criminal and pauper population. The total includes 1,472 boys and 1,065 girls, whose ages vary from 2 weeks to 17 years. The greatest care has been taken to see that undeserving parents are not unduly relieved of their responsibilities in so far as the maintenance of their children is concerned, and though

though numerous attempts have from time to time been made to impose upon the State in this direction, it is no exaggeration to say that through careful supervision and the watchfulness of the officers the instances in which imposters have succeeded in foisting their offspring upon the institution have been very few indeed, and when detected they have been immediately punished.

The total number of children under the care of the Board during 1892 was 2,396, which was 27 in excess of the previous year, and it was made up of 1,390 boys and 1,006 girls, all of whom have shown great improvement since their condition and surroundings have been changed. During the official year which has just closed, 310 boys and 193 girls, or a total of 503 children, were boarded out; 24 boys and 14 girls were placed in the Cottage Homes; 7 boys and 3 girls died; 113 boys and 74 girls were discharged to relatives upon the reports of the inspecting officers that they might be again intrusted with the custody of their offspring; 3 unmanageable boys were sent on board the "Sobraon" training ship; 1 girl was placed in the Female Refuge; 27 boys were placed in the new home for boys at Rydalmere; 10 boys and 6 girls were sent to the Benevolent Asylum, and 1 girl to the Newcastle Asylum; 14 boys and 5 girls absconded; 70 boys and 56 girls were discharged to their own resources, as they had reached an age at which they could not legally be kept any longer under control; 1 boy was sent to Moorecliff, 1 girl to the Tempe Refuge; 4 boys to the Aborigines Protection Society; 1 boy to St. Aloysius' Home; 1 girl to Newington Asylum; and 1 boy was accidentally drowned while fishing at Brantxon. The total discharges during the year were 400, which number was made up of 252 boys and 148 girls; consequently at the 5th April, 1893, there were 2,537 children under the control of the Board, viz., 1,472 boys and 1,065 girls, which shows the large increase of 141 over the preceding year. The children who are paid for include the following:— 8 in Hospital; 143 in Cottage Homes for invalids at Parramatta and Mittagong; 23 at the Central Home, Paddington; 17 delicate children who are paid for at the rate of 10s. a week; 17 special cases which are paid for at the rate of 8s. a week; 16 under 3 years of age paid for at the rate of 7s. a week; and 12 who were paid 6s. a week for; the balance in the subsidy division being paid for at the regular rate of 5s. a week each.

The annual financial statement shows the most satisfactory results. Deposits amounting to £27,517 8s. 4d. have been received from the Treasury, and there was a credit balance in the bank from the previous year of £1,609 8s. 7d., making a total income of £29,127 16s. 11d. The balance in bank from this sum on 5th April, 1893, was £95 19s. 8d. The gross expenditure was consequently £29,031 17s. 3d. The gross cost of boarding-out was £20,824 19s. 3d., or £557 4s. 1d. more than in 1892. The daily average number of children out as boarders during the year was 1,457, an increase of 40, and the gross average cost per head was £14 5s. 10d., as against £14 6s. 1d. in 1892, or a decrease in the capitation cost of 3d. per head. The receipts from parents' payments were £629 10s. 9d., and after deducting this from the gross capitation cost the actual cost per head has been £13 17s. 2d. The balance of the gross expenditure of the Department will be found set forth in detail under the several headings of the various divisions of this report.

The following is the classification of the guardians' occupations:—
 Accountant, 1; agents, 2; attendants, 6; auctioneers, 2; bushman, 1; bootsellers, 3; bootmakers, 8; bakers, 6; bricklayers, 4; blacksmiths, 7; booksellers, 2; boilermaker, 1; builders, 5; butchers, 6; boatman, 1; bank managers, 6; broom-maker, 1; boot-finisher, 1; carpenters, 17; carters, 4; contractors, 6; clergymen, 10; coroner, 1; clerks, 10; cordial manufacturers, 5; commercial travellers, 3; chemists, 3; carriage

carriage builder, 1; coach builders, 2; Civil Servants, 9; collectors, 3; confectioners, 2; composers, 2; catechist, 1; carriers, 2; cab proprietors, 3; caretakers, 3; commissioner, 1; coachsmith, 1; domestics, 232; dressmakers, 30; dairymen, 25; doctors, 4; draftsman, 1; dealers, 5; drapers, 2; drover, 1; engineers, 4; fruiterers, 4; fireman, 1; fitters, 4; fettler, 1; fisherman, 1; farmers, 691; gardeners, 21; graziers, 17; grocers, 18; groom, 1; gatekeeper, 1; gunmaker, 1; householders, 55; homœopathist, 1; hair-dresser, 1; instrument maker, 1; ironworkers, 3; ironmonger, 1; importer, 1; independents, 40; joiner, 1; lighterman, 1; labourers, 25; laundresses, 28; lamplighter, 1; librarians, 2; machinist, 1; messenger, 1; miller, 1; miners, 24; merchants, 4; maintenance man, 1; monumental masons, 3; moulder, 1; nurses, 10; news agent, 1; organist, 1; orchardists, 37; painters, 3; produce merchant, 1; printer, 1; poultry farmers, 4; pig farmer, 1; policemen, 10; platelayer, 1; provision merchant, 1; photographer, 1; post and telegraph master, 1; plasterers, 3; plumbers, 4; pastoralists, 2; quarrymen, 4; railway employees, 17; school teachers, 26; steward, 1; shipping clerks, 2; saddlers, 5; stonemasons, 4; settlers, 5; squatters, 4; shopkeepers, 23; sailor, 1; smelter, 1; soap manufacturer, 1; shipwright, 1; solicitor, 1; sheriff's bailiff, 1; tailors, 6; tram conductor, 1; upholsterers, 3; undertakers, 1; van proprietor, 1; vigneron, 1; weighman, 1; warders, 4; wharf lumper, 1. Total, 1,611 guardians.

It will be seen that, while the number of guardians has been increased from 1,514 to 1,611, their industrial character has been fully maintained. In every instance where the children of the State have been placed with foster-parents, the utmost care has been taken to select the most industrious classes, who may be possessed of comfortable homes and are above the pressure of poverty. Out of an increase of 97 new guardians, no less than 35 were farmers, 10 dairymen, 20 laundresses, 17 domestics, while the remaining 15 may be described as "all sorts and conditions" of fairly well-to-do people.

Children are placed out in the undermentioned districts in the numbers stated:—Ashfield, 6; Arncliffe, 2; Annandale, 10; Auburn, 10; Albury, 4; Albion Park, 1; Adamstown, 2; Armidale, 8; Balmain, 18; Bowning, 1; Berrima, 4; Botany, 5; Burwood, 14; Bexley, 2; Balmoral, 8; Bowral, 21; Binda, 1; Ballina, 2; Bundanoon, 1; Bungonia, 3; Braidwood, 10; Bulli, 10; Berry, 16; Bungendore, 5; Bega, 5; Bathurst, 16; Burdenda, 1; Brewongle, 3; Blacktown, 1; Branxton, 32; Croydon, 4; Camperdown, 14; Canterbury, 10; Campbelltown, 4; Collector, 7; Crookwell, 16; Canley Vale, 8; Camden, 27; Cootamundra, 20; Clifton, 1; Cambewarra, 10; Cooma, 2; Cargo, 7; Clunes, 2; Cudal, 6; Clarencetown, 7; Cessnock, 1; Cooranbong, 4; Deniliquin, 1; Dapto, 6; Dungog, 10; Denman, 2; Douglas Park, 2; East Maitland, 11; Forbes, 15; Glebe, 13; Gladesville, 15; Goulburn, 248; Grabben Gullen, 15; Granville, 55; Guildford, 5; Gunning, 15; Gerringong, 10; Girilambone, 2; Glen Innes, 2; Gosford, 4; Greta, 3; Hunter's Hill, 13; Hurstville, 6; Hexham, 5; Hinton, 3; Hay, 2; Hartley, 1; Hawkesbury River, 59; Islington, 3; Jugiong, 2; Junee Junction, 8; Jamberoo, 20; Kogarah, 4; Kangaloon, 10; Katoomba, 4; Kiama, 20; Kangaroo Valley, 14; Leichhardt, 66; Liverpool, 6; Lambton, 12; Lismore, 5; Manly, 4; Marrickville, 32; Macdonaldtown, 11; Mummel, 17; Menangle, 5; Minmi, 1; Mittagong, 50; Moss Vale, 14; Marulan, 6; Murrumburrah, 4; Milton, 22; Moruya, 5; Mulgrave, 5; Mudgee, 3; Molong, 3; Mary Vale, 1; Miller's Forest, 26; Morpeth, 5; Muswellbrook, 3; Manning River, 1; Macleay River, 1; Nelson, 2; Nevertire, 1; Narrawa, 2; Newtown, 24; Nowra, 28; Newcastle, 63; Nelson's Plains, 9; Oberon, 2; Orange, 8; Pymont, 18; Paddington, 27; Parramatta, 90; Petersham, 24; Picton, 47; Pitt Town, 44; Penrith, 20; Pyree, 1; Queanbeyan, 10; Rockdale, 7; Rookwood, 20; Redfern, 25; Ryde, 4; Randwick, 5; Riverstone, 37
Richmond.

Richmond, 3; Rooty Hill, 2; Raymond Terrace, 13; Summer Hill, 10; Sydney, 7; Singleton, 9; Surry Hills, 21; St. Leonards, 59; Shellharbour, 4; St. Mary's, 5; Sassafras, 3; Snail's Bay, 3; Stockton, 2; Scone, 4; Taralga, 3; Tenterfield, 1; Tarago, 5; Tumut, 4; Tamworth, 5; Tirranna, 8; Teralba, 1; Waverley, 13; Woolloomooloo, 6; Woollahra, 6; Waterloo, 16; Wheeo, 27; Windellama, 7; Wagga Wagga, 5; Wollongong, 14; Windsor, 38; Waratah, 10; Wilberforce, 15; Wellington, 3; Wallsend, 6; Wickham, 9; Woodville, 19; William Town, 5; West Maitland, 60; Warren, 1; Wollombi, 4; Wyee, 1; Yass, 5; Yarra, 2; Young, 2. Total, 2,342 children.

952 applications were received during the year for State children, which was an increase of 86 upon the previous year. Of the total number 690 were for Protestants and 262 for Roman Catholics. In the former division 740 were required as boarders, 225 as apprentices, and 25 for adoption; while in the latter 290 children were applied for as boarders, 80 as apprentices, and 7 for adoption. Seven hundred and sixty-one of the applications were inquired into by the inspectors attached to the Department, with the result that 613 were approved and 148 refused for a variety of reasons, principally as to the character of the people applying for the children, which were considered sufficient by the responsible officers.

Altogether 12 meetings of the Board were held during the year, at which the members attended as follows:—Dr. Renwick, M.L.C., 3; Hon. W. J. Trickett, M.L.C., 10; Lady Manning, 12; Mrs. Garran, 11; Lady Windeyer, 10; Mrs. Goodlet, 8; Mrs. Austin, 7; Hon. L. F. Heydon, M.L.C., 7; Lady Allen, 2.

The following is the usual list of lady visitors, under whose supervision the homes are placed in various parts of the Colony, and whose voluntary services are so valuable a factor in the working of the system:—Armidale, Mrs. Allingham, Mrs. K. A. Donnelly, Mrs. S. A. Kearney, Mrs. M. Pattrick, Miss E. Wormersley; Annandale, Mrs. Arguimbau; Albury, Mrs. T. A. Browne; Bowral, Mrs. J. C. Bagot, Mrs. Debenham; Bega, Mrs. Spencer, Mrs. Evershed; Balmain, Mrs. Youill, Mrs. J. Dixon, Mrs. Kendall; Branxton, Mrs. J. A. Tulloch, Mrs. Bercini, Mrs. E. Smith; Bundanoon, Mrs. Osborn; Bathurst, Mrs. Marriott, Mrs. Musgrave; Berrima, Mrs. G. Shepherd, Mrs. Wilshire; Bethungra, Mrs. M. Sawyer; Baulkham Hills, Mrs. W. M. Best; Burwood, Mrs. Henry Fraser, Mrs. Jas. Inglis; Berry, Mrs. E. Morris, Mrs. English; Boolong, Miss Grant; Barraba, Mrs. Kidd; Braidwood, Mrs. O'Brien; Bulli, Mrs. J. B. Nicholson; Cootamundra, Mrs. J. Barnes, Mrs. Ed. Barnes, Mrs. W. H. Matthews; Camden, Mrs. Chas. Furner; Cassilis, Mrs. Traill; Cooma, Mrs. Druitt, Mrs. Byrne, Mrs. Harnett, Mrs. Bevan; Carlingford, Mrs. H. Cox, Mrs. Neil Harper; Cambewarra, Mrs. Brennan; Collector, Mrs. R. Beit; Cowra, Mrs. Johnson; Cessnock, Mrs. M'Donald; Campbelltown, Mrs. J. Kidd, Miss Kidd; Crookwell, Mrs. Dr. Drought; Deniliquin, Mrs. H. M'Cullough, Mrs. H. H. Noyes, Mrs. Holt; Dungog, Mrs. M. Day, Mrs. Waller, Mrs. H. T. Beresford; Forbes, Mrs. Raymond, Mrs. Dunn; Goulburn, Mrs. Ross, Mrs. Morphy, Miss Andrews, Mrs. Craig, Mrs. Oliver, Mrs. Barber, Mrs. Ed. Gillespie, Mrs. M'Killop, Mrs. Shepherd, Mrs. Bell; Glebe, Mrs. Munro, Mrs. Graham; Grafton, Mrs. M'Dougall; Gladesville, Mrs. Lumsdaine; Guildford, Mrs. Barber; Granville, Mrs. E. B. Docker; Gunning, Mrs. Saxby; Gresford, Mrs. Logan; Greendale, Mrs. Whittingham; Gerringong, Mrs. Heighway; Hunter's Hill, Mrs. Bailey; Hay, Mrs. Johnson, Mrs. Lavender; Junee, Mrs. Studds; Kangaroo Valley, Mrs. Hetherington, Mrs. A. G. Tate; Kiama, Mrs. Curtis; Kogarah, Mrs. Balcombe, Mrs. P. Lacey, Mrs. M. Grosvenor; Kempsey, Mrs. S. Verge, Mrs. M. A. Verge, Mrs. Minnet; Kingsdale, Mrs. F. Shepherd; Lane Cove, Mrs. P. F. Richardson; Liverpool, Mrs. Tillett; Maclean, Mrs. M'Innes; Moss Vale, Mrs. Gale; Maitland, Mrs. J. D. Prentice, Mrs. M. Smith, Mrs. Trenchard, Miss Annie Wolfe, Mrs. W. G. Lipscombe; Miss

Miss Alice Hyndes; Manly, Miss M'Hardy, Miss Willis; Menangle, Mrs. Onslow; Morpeth, Mrs. Goddard; Murrumburrah, Mrs. G. Barnes, Mrs. C. Cutcliffe, Mrs. Macanish; Mittagong, Mrs. F. C. Williams, Miss Burke, Mrs. Murray; Mudgee, Mrs. Loneragon; Marulan, Mrs. A. C. Mosley; Moruya, Mrs. Archibald, Mrs. J. Kendall; Marrickville, Mrs. Hill, Mrs. W. Dolman, Miss Dolman, Mrs. J. J. Rubie, Mrs. Gardiner; Newcastle, Mrs. Weatherill, Mrs. J. Harris, Mrs. Ireland, Mrs. M'Donnell; Nelson's Plains, Mrs. Garland; North Sydney, Mrs. T. O'Sullivan; Orange, Mrs. James Dalton; Parramatta, Mrs. W. J. Günther, Mrs. H. Taylor, Mrs. J. E. Bowden, Mrs. Inglis; Penrith, Mrs. F. E. Lethbridge, Mrs. Ewans; Picton, Mrs. Gibson, Mrs. Sheppard, Mrs. W. Antill, Mrs. J. B. Watt; Prospect, Mrs. F. Smart; Petersham, Mrs. Dwyer; Queanbeyan, Mrs. G. Campbell, Mrs. G. P. Smith, Mrs. Willans, Mrs. Emery; Redfern, Mrs. Boyce; Raymond Terrace, Mrs. Smith, Mrs. J. Richardson; Ryde, Mrs. Collingridge; Richmond, Mrs. Onus, Miss Onus; Rookwood, Mrs. E. A. Colvin; Rooty Hill, Mrs. Mackay; Rouse Hill, Mrs. M. Pearce; Sutton Forest, Mrs. A. G. Stoddart; Scone, Mrs. A. C. Thomas; Surry Hills, Mrs. Hargrave, Mrs. E. D. Madgwick; The Burrier, Mrs. Thompson; Tamworth, Mrs. Middleton, Mrs. Wiseman; Taralga, Mrs. T. A. Loder; Tumut, Mrs. Thompson, Mrs. A. K. Josephson, Mrs. A. M. Brown; Thirlmere, Mrs. A. E. Picard; Tenterfield, Mrs. Armstrong; Windsor, Mrs. J. B. Johnstone, Mrs. Hall, Miss Hall, Mrs. W. Dean; Wollongong, Mrs. Finlayson; Woollahra, Miss Dean, Mrs. Newton, Mrs. Gerber; Wallsend, Mrs. Neilson; Waverley, Mrs. A. T. Simpson, Mrs. Best; Werrington, Mrs. King; Wallerawang, Mrs. Abbott; Wellington, Mrs. Dr. Herbert, Miss Rodda, Mrs. Rodda; Wagga Wagga, Mrs. G. Coleman; Windeyer, Mrs. Mallon; Wiseman's Ferry, Miss Laughton; Woodville, Mrs. Graham; Yarrunga, Mrs. Throsby, Mrs. P. F. Hart; Young, Mrs. Dr. Heely; Yass, Mrs. S. Pembroke.

The following return shows a slight increase in the assistance rendered by the voluntary visitors during last year, and a large increase in the number of visits made by the Inspectors of the Department:—
 Honorary visits per lady visitors: 1889, 1,356; 1890, 1,292; 1891, 1,225; 1892, 1,383; 1893, 1,638; an increase of 255 on the previous year. Official visits by Inspectors during year ending 5th April, 1892, 4,906; official visits by Inspectors during year ending 5th April, 1893, 5,969; or an increase of 1,063 on the previous year's figures.

The average number of children under supervision for year ended 5th April, 1893, was 2,314; thus making an average of official visits, 5,969; honorary visits, 1,638—7,607; or three and one-third visits to each child, as against two and three-quarters visits in the preceding year.

The Board has as usual endeavoured to reduce the number of children in every house without separating families. The statistics of 1893 show:

1,134	homes with 1 child.				
283	"	"	2 children, including 125 with children of one family.		
134	"	"	3	"	54
60	"	"	4	"	18

1,611 homes, containing 2,342 children (exclusive of 21 absconders, 8 in hospitals, 143 in cottage homes, and 23 in Dépôt). Total, 2,537.

One hundred and ninety-seven families have thus been prevented from separating by each being placed with one guardian.

Excluding the homes containing one family there are now:

1,134	homes with 1 child.		
158	"	"	2 children each.
80	"	"	3
42	"	"	4

1,414 homes, containing 1,858 children ($1\frac{1}{3}$ average) last year the average was $1\frac{1}{2}$.

NURSING CHILDREN.

The experiment of placing delicate young children with healthy matronly women in the country districts to nurse has worked most satisfactorily, and a very large number of weaklings which would otherwise have inevitably died in their infancy in the Benevolent Asylum, and other similar institutions, have been preserved, and are now growing up into strong, promising children. Special care has been exercised in the selection of homes, and to ensure care and safety, extra payments have been made until such time as the children had become strong enough to come under the operation of the ordinary boarding-out system. During the twelve months now under consideration there were 49 such children under control, and the total cost of their maintenance and clothing was £1,205, the average capitation for the year being £25, or a substantial reduction of no less a sum than 18s. 4d. per head as against the previous year's expenditure under this head.

ADOPTED CHILDREN.

When the official year closed in 1892, no less than 145 young children of the State were placed under the guardianship of well-to-do colonists for adoption without payment; but on the 5th April, 1893, the number had been reduced to 138. The religious classification was as follows:—Protestants, 42 boys and 77 girls; Roman Catholics, 6 boys and 13 girls; total, 48 boys and 90 girls. In addition to the fact that by adopting these children their material prospects in life are substantially advanced, the State has effected a saving of £1,794 for the year. During 1892 the saving effected under this branch of the boarding-out system was £1,885. Great care has to be taken in carrying out the details of this particular branch so that neither the interests of the foster-parents nor of the little ones are affected, and constant precautions have to be taken in connection with the inspections that are made to prevent the children from being enlightened as to their real relationship to their guardians. On all occasions they are made to believe that they are ordinary members of the family with whom they are placed.

APPRENTICED CHILDREN.

On 5th April, 1892, there were 844 apprentices under control. The number had increased to 915 on 5th April, 1893. In the apprenticing division generally, 113 boys and 68 girls have been discharged from their indentures, the number discharged in 1892 being 94 boys and 49 girls. At present 325 girls are at domestic service, and 590 boys are at the following occupations:—Apiarist, 1; bootmaker, 1; blacksmith, 1; bakers, 2; butcher, 1; carpenter, 1; chemist, 1; coach-builder, 1; cordial manufacturers, 3; dairymen, 7; engineer, 1; farmers, 520; grooms, 3; gardeners, 12; gunsmith, 1; harness-maker, 1; mason, 1; miller, 1; orchardists, 11; porter, 1; painters, 3; saddlers, 5; storekeepers, 7; tailors, 3; vigneron, 1. The total cost of managing this division has been £2,183 for inspection and clothing, or an average cost of the apprenticing of £2 10s. per head. Taken as a whole the apprentices are turning out remarkably well, and it is very seldom that any serious complaints come to hand either from the apprentices themselves or their guardians.

CHILDREN CLASSED AS UNOFFICIAL.

The official year was entered upon with a clean sheet as far as unofficial children were concerned, all those who were formally in this division having reached the age at which they were entitled to their freedom, and having gone out to seek employment on their own resources; and from all that can be learnt of their movements it may
be

be said that they are now honestly earning their own livelihood. There are now six children of this class under control, namely, three girls and three boys. Being above the age at which they could be dealt with under the State Children's Relief Act, they voluntarily surrendered themselves to the care of the Board in order that suitable occupations might be obtained for them until they reach the age of 17 years. They are all going on most satisfactorily. The Board have now dealt with 31 children of this class with the most gratifying results.

THE CENTRAL HOME.

The increase in the number of children who passed through the Central Home was greatly in excess of the previous year, and the daily average was higher, but there was a substantial reduction in the cost of maintenance. Eight hundred and ten children passed through in 1892, and 901 in 1893, showing an increase of 91, while the average daily admissions was 10 as against 8 in the previous year. The cost of maintenance was £9 3s. 0²d. per head whilst in 1892 it was £9 11s. 3d., which is a reduction of 8s. 2d. per head. It has been pointed out in all preceding reports that the children are only detained so long at the Central Home as is necessary to provide suitable boarding-out homes in the country for them. The maintenance of the children at the Central Home was £91 11s. 2d. for the year, as against £76 10s. in the previous year.

COTTAGE HOMES FOR INVALID CHILDREN.

The homes, which are located at Parramatta and Mittagong, for the care of invalid pauper children have been admirably conducted during the year, a number of small improvements which were made having proved most beneficial. There were 143 children in the homes on 5th April, 1893, namely, 48 boys and 95 girls, as against 137 at the end of the previous year. The children were received from various public institutions where it was morally impossible to provide them with the fresh air, bright scenes, and healthy open surroundings so necessary to the growth of strong healthy constitutions, and in almost every instance marked improvement has resulted in their condition. The work performed in these hospitals has been most satisfactory, and the care and attention shown the little ones by the medical and nursing staff cannot be too highly praised.

The following is the usual table of particulars :—

	Boys.	Girls.	Total
Total number of children admitted to Cottage Homes up to 5th April, 1893	434	418	852
Total number of children discharged from Homes up to 5th April, 1893	386	323	709

The total expenditure upon the homes during the year which has just closed has been £3,428 14s. 10d., or £3,233 14s. 10d. for maintenance, management, cost, medical expenses, salaries, &c., and £195 value of clothing furnished to the inmates from the Central Store at Paddington. The total cost has been £22 2s. 5d. per head, or a slight increase in this Branch upon the capitation cost of the previous year.

CONCLUDING REMARKS.

I have much pleasure in conveying the thanks of the Board to the Principal Under-Secretary and the Inspector-General of Police, for the valuable assistance rendered to the Department during the year.

I have, &c.,

W. J. TRICKETT,
President.

APPENDIX J.

APPENDIX J.

LETTERS FROM LADY VISITORS.

Mrs. W. R. Antill, Picton :—

Has much pleasure in stating that she thinks the boarding-out system a very good one. It has been very successful in her district, with one or two exceptions. The homes here are at small farms, and the guardians fulfil their duties faithfully.

Mrs. L. Barber, Goulburn :—

I think the system of boarding-out children works well as a rule, and I find the guardians in many cases treat the children like their own; and altogether those under my care have fairly good homes, and children are better treated now than years ago.

Mrs. A. M. Bagot, Bowral :—

My list of children in this district is very small at present, but so far is satisfactory as to the health and happiness of the children.

Mrs. L. Beit, Collector :—

I am again asked to give my experience of the boarding-out system. I have only two boys in my district, and what little I have seen of them in their comfortable homes convinces me that it is the best system that can be adopted for children whose parents have no suitable homes; for children sent into the country are well fed, and lead pure and healthy lives, and it should give them a chance of growing up good men and women.

Mrs. L. M. Beresford, Dalton :—

As I still have only one child in my district, I have nothing further to state than in my previous report. The child being with a respectable farmer, is treated as a member of the family, and as far as I can judge is happy and contented, and I consider the institution a good one.

Mrs. C. Boyce, Redfern :—

I write to say that I am perfectly well satisfied with the treatment of the children of my district. They all seem happy and well-cared for; I am in the way of seeing many of them, not officially, so that I am quite clear about their every-day care. I am sure nothing could be better for these poor little ones than the system adopted by the State in boarding-out.

Mrs. A. M. Brown, Tumut :—

Must apologise for not answering your note received some time ago. Everything satisfactory here.

Mrs. Brennan, Cambewarra :—

In answer to your letter asking my opinion on the working of the boarding-out system, I have much pleasure in stating that it is working exceedingly well in my district. The boys are all with farmers, and help with farm work generally. They have comfortable homes. The guardians are performing their duties faithfully. I do not hear any complaints from the children or guardians.

Miss M. Burke, Mittagong :—

Excuse me for not having before now attended to your circular respecting my idea of the cottage-home system. I have always thought it a great advantage to the poor children to be placed in the homes, and consider any good traits are more likely to be developed there, under the care of efficient matrons, than could possibly be the case in a large institute. I should suggest, in the case of girls, when of an age to do so, that they be taught needlework and washing; it would not only be of use to themselves, but an assistance to the matrons. The homes at which I most often visit are always bright and cheerful, and the inmates appear to be happy and contented, and are carefully watched over.

Mrs. Cuthbertson, Newcastle :—

Has much pleasure in expressing her approval of the boarding-out system so far as the children are concerned whose homes she visited. She is pleased to report that without exception they seem to be well cared for, and to be quite happy and contented.

Mrs. M. Dalton, Orange :—

I have much pleasure in stating that the operations of the boarding-out system in this district seem very satisfactory. The children all appear happy and contented, and the homes selected, I think, are very suitable. The only correction necessary for the children in the various homes is to threaten to send them back to the Asylum, a fact which in itself bears ample testimony of the treatment of the children and the suitability of the homes selected. Some of the foster-parents seem to take particular pains to correct the children of their bad habits.

Mrs. M. Dolman, Marrickville :—

Since my last report I have visited the State children placed out in my district, and I found them all in good health and giving every satisfaction. They all attend school and church regularly; all the homes are clean and comfortable, and the children tidy, and appear well cared for, and they make no complaints when questioned alone.

Mrs. M. Drought, Crookwell :—

My experience in connection with the boarding-out system is as yet limited, but as far as I can judge from this district most of the children seem contented, and well looked after by their guardians. Some of the children are under good and faithful guardians who, I think, conscientiously fulfil their duties and have their welfare at heart. I find some resent too much supervision, and at my last visit informed me there had been two inspectors and a lady visitor from Sydney. In many instances the children have a chance of growing up good men and women, which would not be the case were they not adopted by your admirable institution.

Mrs. M. Ewan, Penrith :—

In reply to your circular of April 6th, *re* the boarding-out system, I think it an excellent one. All the children under my supervision have comfortable homes, and are well treated. I think the guardians, with very few exceptions, faithfully perform their duties to the children placed under their care.

Mrs. F. C. Fraser, Strathfield :—

Has much pleasure in stating that all the homes, in which the children she visits are placed, appear in every way most suitable for the development of habits of industry and thrift; the guardians, too, in some cases, become attached to the children, and take every care of their comfort and wellbeing. These results speak well for the satisfactory working of the boarding-out system.

Mrs. J. E. Gibson, Upper Picton :—

I am of the same opinion now as in former years, respecting the boarding-out system being a good one. The children in my district are kept well clothed, and are as happy a lot of children as you would meet with anywhere, and that speaks well for their homes. The guardians are, I believe, doing their best to bring up the children well.

Mrs. A. Gillespie, Goulburn :—

During the short time I have been visiting the State children in Goulburn, I found the homes clean and comfortable, and the children well cared for. I think the boarding-out system an excellent one.

Mrs. M. Grosvenor, Rockdale :—

In reply to your request for a brief statement of my experience of the boarded-out children under my charge, I cannot speak too highly of the foster parents in my district. The children are always comfortably clad, and bright and happy.

Mrs. and Miss Hall, Windsor :—

In reply to your circular of 6th inst., *re* our experience of the boarding-out system, we are still of same opinion, as in our district it works well.

Mrs. M. Heeley, Young :—

In reference to yours of the 6th instant, I am pleased to say that, judging by the very limited experience I have had in the matter, the boarding-out system is a very good one. The homes here are clean and comfortable, and the guardians trying to do their best for the children under their care. In a day or two I shall send in my report of the two that I have here—one I cannot go to see, so must make arrangements for child to visit me.

Mrs. J. Hetherington, Kangaroo Valley :—

In reply to your circular, I beg to state that I think the boarding-out system an excellent one. All the children of whom I have had charge (Mrs. H. Tate, of The Parsonage, having taken over the visiting) are very healthy, have comfortable homes, and are in most cases treated by the guardians as members of the family.

Mrs. F. A. Kendall, Balmain :—

In reply to your note requesting my idea of the boarding-out system, I have much pleasure in stating that I consider it excellent. The children under my supervision are all in comfortable homes and well cared for. In many cases the foster parents are really fond of their little charges. The children's religious education is also well attended to. It seems to be quite the exception when the foster parents are found to have only taken the children for the sake of the emolument, the object being evidently for the children's good.

Mrs. J. M. Kidd, Campbelltown :—

I am pleased to report that all the boarded-out children in this district are well cared for in every respect. The boarding-out system is, I think, far better for the children than sending them to asylums, where there are usually such large numbers that it is impossible to care for the children properly.

Mrs. M. Lumsdaine, Gladesville :—

In reply to your request, I have much pleasure in stating that I think the boarding-out system an excellent one. The guardians generally appear to treat the children under their care as their own; I never hear any complaint, and the children are happy and well cared for.

Mrs. J. B. Nicholson, Woonona :—

In answer to your inquiries *re* the boarding-out system, it is in my opinion a very good one. All the homes I have inspected are comfortable, and the children well dealt by; the beds are all very clean, the children attend school very regularly, and the guardians appear to be thoroughly doing their duty. I knew some of these children before they entered the State school, and they are really better off now than they were before.

Mrs. M. O'Brien, Braidwood :—

In compliance with your circular of yesterday, I have much pleasure in stating that the children in this district have comfortable homes, are well cared for by their guardians, are in good health, and look well and happy. I think the boarding-out system a great success.

Mrs. T. O'Sullivan, North Sydney :—

I have again much pleasure in testifying to the excellency of the boarding-out system, and am more than ever convinced of its good results. The children under my supervision seem quite happy and contented, and in nearly every instance their guardians give satisfactory accounts of them.

Mrs. D. Osborn, Bundanoon :—

In reply to your letter of the 5th inst., I herewith forward my report. During the time I have had to do with the children I have had no cause to complain in any respect; and those that have been, and still are in my district have given every satisfaction, the children being comfortably clothed, and well attended to; and I think the children should be thankful for the boarding-out system, which is far preferable for them than being all together in one place. The boarding-out system is the means of bringing out their individuality and making them more accustomed to every-day life. The homes in this district are mostly on farms and dairying.

Mrs. S. Oliver, Goulburn :—

I am very favourable to the boarding-out system under proper supervision. The homes I visit give every satisfaction, and the children seem comfortable and happy.

Mrs. A. Pearce, Rouse Hill :—

You will see by my reports that the children in my district are well, happy, and contented.

Mrs. J. Richardson, St. Ives (Gordon) :—

In reply to your communication of the 6th inst., requesting me to send you a brief statement in reference to my experience of the boarding-out system, I have the honor to state that I see no reason to change my opinion as to its general usefulness, and as far as the children under my control are concerned the results have been satisfactory, and the guardians have fairly performed their duties; but I think it devolves upon the department to have very careful inquiries made before sending any children to new homes, and also that the lady visitors should be informed at once of all applications, and that these applications should not be complied with until a report is received from the lady visitor of the district.

Mrs. A. T. Simpson, Waverley :—

Can but repeat what she has said before as to the efficacy of the system which shows such grand results each year. The classes of homes in which the children are placed in this suburb are mostly artisans, with the exception of two storekeepers and the sergeant of police; and all are highly respectable, and the children well cared for.

Mrs. S. W. Smith, Stockton :—

From my experience in this district of the boarding-out system, I think it an excellent one. The homes are good, and the guardians appear to treat the boys very well.

Mrs. A. G. Tate, Kangaroo Valley :—

As my experience of the system as lady visitor only extends over the last three months, I am not prepared to speak definitely upon the subject; but from what I have observed the results would appear to be satisfactory. The homes in this part as a rule are humble, but nevertheless clean and comfortable, and the guardians seem to exercise their duties towards those committed to their charge as if they were members of their own family.

Mrs. L. Tillet, Liverpool :—

Owing to the impassable roads and the long distances from Liverpool I have not been able to visit the children under my control as often as I could wish. Those I have visited seem happy and comfortable, and I believe, as far as I can judge, that the boarding-out system is an admirable one. The guardians seem to treat the children as their own, and I have never had any complaints from the little ones placed in their charge.

Mrs.

Mrs. H. Weatherill, Newcastle :—

You request a brief statement of my experience of the system of boarding-out children in homes, and as I have been a lady visitor ever since this system was commenced my testimony should be of some value. Briefly then I entirely approve of the system and think it immeasurably superior to the former system of herding children together in orphanages or schools. I find the children who come under our notice now, no matter what sort of home they have been taken from, are much freer from the immoral and detestable vices I have had to speak of and which were found in almost all the children who were first boarded out from the schools and orphanages. I think the individual home-training which each child receives much better calculated to fit it, to take a respectable place in the world. The homes are, as a rule, good, and the children well-cared for; indeed, the guardians are sometimes too lenient, and often spare the rod to the danger of spoiling the child, for I agree with wholesome correction by the rod *at times*, and with some children. I have frequently had occasion to beg of the guardian to exercise a little more strictness. I do not agree with the system of public education for these children, and think if they were taught to read, write, and spell, and to understand figures and the value of money, this would be enough, and they might be more thoroughly taught these more useful studies. I also think the children (especially girls) are apprenticed too early and have liberty from control too soon; if the period could be made one year later on, say, from 13 to 18 years, it would be better, as the girls think of nothing now but how they can most quickly spend the money, which has been so carefully saved for them, in foolish articles of dress and finery. This is a brief statement of my experience, and I hope it may be useful.

LETTERS FROM SCHOOL TEACHERS.

W.M., Superior Public School, Armidale :—

There are three boarded-out pupils attending the above school. From what I have seen they compare very favourably with other children; they come to school neatly dressed; their conduct is good, and their attainments are up to the average.

H.G.F., Public School, Baw Baw :—

My report *in re* the boarding-out of children will be similar to that of last year, viz., that they are as well cared for as those who are under parental care, in some cases their lot is more pleasant than where children have mother and father to care for them. As far as I can judge from what has come under my notice the system works admirably. The children are in general clean and neat in dress and seem to have plenty of time given them for such lessons as are given them as exercise at home.

W.H., Bargo West, Public School :—

It is only very recently that I have had any experience with the children to whom you refer. As far as I can judge the boarding-out system is a judicious step on the part of the Government to bring to usefulness the unfortunate children of the Colony. In scholastic life they are on friendly terms with their fellow mates and receive instruction with the same good will as the rest of the pupils.

W.L., Public School, Botany :—

The State children attending the school under my charge always attend school clean and tidy, and they compare favourably in other respects with the other children under my supervision.

R. B., Public School, Brawlin :—

With regard to the boarding-out system here, the result has been most successful, as those children that have attended this school (there are none in the school at present) seem to be well provided for, and as far as I can judge are contented and willing to remain with the people they were first placed with.

W.T.A., Public School, Camden :—

In answer to your circular of the 10th April, I beg to state that the State children attending this school are very clean and tidy, their attendance is regular, and that I cannot perceive any difference in their general appearance compared with that of the other scholars. The number who attend this school is small, being only four.

M.L.A., Public School, Collector :—

Your circular, 10th April, 1893, asking for report *re* State children. In reply thereto I beg to state that I find no reason to alter my statements of former years as to the general cleanliness and tidiness of the State children under my observation, and have only to add that they in appearance compare most favourably, in fact equally, with the rest of the children in this locality. I do not see how the system could well be improved on after seven years of personal observation on my part.

J.M., Public School, Cullarin :—

In reference to the boarding-out system, the children under my supervision compare very favourably with the others attending school. I approve of the system very much, though from my own experience the supervision of the State inspectors, and the inquiries they make concerning the treatment and care of the children, add to the comfort and happiness of the latter very, very much.

J.C.C., Public School, Cullinga :—

I have the honor to forward, in compliance with your request, my observations of the working of the boarding-out system in this district. During 1892 I had on my rolls four boys who attended school the required number of days and over. They were to all appearance well fed and clothed, and were accepted as playfellows in the school-yard without friction, unpleasant remarks or feelings, and in school work they did fairly well. Of these, three having attained the age of 14, were withdrawn, and one is still on the roll, but at present absent, being on a visit to Byrock with his foster-parents. In this parish there are living three young men and one young female, who having served the allotted term are now working on their own account, the female in the family she was assigned to, and the young men on farms owned by other persons than those by whom they were reared. Two of these young men were prepared for confirmation by Canon Betts in the month of December last, and were duly confirmed by the Bishop of Goulburn in St. John's Church of England, Cullinga, and are very promising young men. I observe that children placed with working farmers turn out better than those placed with families considering themselves to be somewhat higher in the social scale, and consequently treat their wards more in the light of servants, consigning them to men's huts for sleeping and food, and exacting as much work as possible with less regard for education, moral and religious training, &c. On the whole I am very much in favour of the system as being preferable to congregating children in asylums.

A.S.W., Public School, Cordeaux River :—

I received your circular of 10th instant, and in answer to same I may state in reference to my experience of the boarding-out system that I cannot speak too highly of what I have seen. I have often visited at the houses where the boys are living, that they are treated as if they were the children of the foster parents, being treated with every kindness. I have had two boys attending the school, and they attend very fairly; they are kept clean and tidy, and their general appearance compare very favourably with other children in appearance and attainments.

B.G.F., Public School, Coolac :—

With reference to circular from State Children's Relief Board dated 10th April, 1893, I beg to state that my experience of the operation of the boarding-out system has been favourable to the said system. The State children who have attended the school under my charge have been both clean and tidy, and their attendance has been fairly regular. Their general appearance and attainments have compared favourably with those of other children under my supervision.

F.L.,

F. L., Public School, Eastgrove :—

Your letter of the 10th, *re* observations of the results of the boarding-out system in this Colony. As far as I am able to judge the system, on the whole, appears to work satisfactorily in this district. The children, as a rule, are clean, and attend school regularly, and altogether they compare favourably with the other children attending this school.

F. W. W., Public School, Gerringong :—

I have the honor to make the following statement and remarks in accordance with your request contained in a late circular. My experience leads me to the belief that children placed with the dairy farmers of this district are comparatively fortunate, both in their work and their masters. The former enables them to attend school regularly and very fairly punctually, and the treatment of the children under my direct notice is kind and considerate without exception.

H. L. F., Public School, Gordon :—

The only State child in this locality, from personal observation and careful inquiry, I am led to believe receives exceptionally kind treatment from her guardian who gives her the most maternal affection, and exercises the greatest care with regard to her moral and intellectual training.

T. C., Public School, Greenwell Point :—

As regards the boarding-out system, I believe it to be a thoroughly good system as the children are not much burden when thus placed, and they are fitted and instructed for the future lives which they have to lead.

J. L., Superior Public School, South Goulburn :—

In reply to yours of the 10th ultimo, I herewith forward my report as you request. I consider the system of boarding-out children an excellent one. Placing children with good, kind, christian parents and thus bringing them under home influence must exercise a beneficial effect upon them. The little ones attending my school do compare favourably with other children. They are clean, apparently well fed, and, judging from their general appearance, are as happy as youngsters can be.

E. M., Public School, Glenfield :—

As I have had no boarding-out State children at this school I am unable to give any particulars as contained in the latter paragraph of your circular. But as regards my opinion of that system, I think that it is one of the best methods that could possibly be adopted, many a child gets a good comfortable home, well reared to industry and well cared for, and even brought up almost equal to children of the family, and where parents have no children of their own, they are treated the same as their own, and often some provision made for such at the last by those to whom they are entrusted.

W. S., Superior Public School, Granville :—

I regret that I have been unable, through illness, to reply to the above at an earlier date, and even now I am not well enough to enter fully into the matter and give a detailed account. On the whole, however, the results of the system have appeared to me very good, the children appear happy, well fed, and well clothed. They attend school regularly, and I have endeavoured to let the guardians know, in cases of apparent laxity, that I was watching the interests of the children and that no evasion of their duties could be winked at.

A. W., Public School, Greendale :—

In answer to your inquiry respecting State children attending my school I beg to say that in every respect they compare very favourably with the other pupils. The marked improvement in the children after being some time in the country ought to be a sufficient proof of the success of the boarding-out system.

P. R., Public School, Gunning :—

I have much pleasure in again making a few remarks in reference to the boarding-out system in this Colony, especially as all I have to say is in favour of that system. At present there are six State children attending this school. They are among my most regular and punctual scholars, scarcely ever missing a day, and I might almost say they are never late. All of them seem happy; they are well clothed, clean and tidy, and apparently well fed, while none of them are over-worked. They mix freely among all the other scholars, and there is nothing in their appearance or conduct to distinguish them from their companions.

L. H. W., Public School, Hinton :—

In reply to your circular soliciting opinion as to the value of the boarding-out system in New South Wales, I have much pleasure in stating that as far as my experience has gone, I have found the boarded-out children quite as well cared for in every way as those possessing parents, and in some cases the comparison results in distinct favour of the system. In every scheme, defects, incident upon imperfect human nature, will make their appearance, but while judicious care is exercised in the choice of foster parents, the present system seems peculiarly free from objection.

B. G. E., Public School, Jamberoo :—

I have the honor to acknowledge the receipt of your circular of the 10th inst. In pursuance of the request contained therein, I beg to make the following report :—During the year of 1892, my experience of State children was limited to five boys. One of these, passed through all the classes, up to the 4th, with credit. When he left school, he was the leading boy. He had, therefore, not only held his own with the other boys in his class, but out-distanced them. At leaving, this boy was 15 years old. Two other boys left the school early in the year, after having attained the age of 14. Two more boys remain still under my tuition. Both compare favourably with the other children. No stranger would ever detect that they are State boys. Scrupulously clean in person and attire, intelligent, and evidently well cared for, they have the appearance of sons of well-to-do men. Having had now more than eight years experience of State children, I feel more than ever convinced of the superiority of the boarding-out system over that which herded young children, together with older, into asylums. Many guardians conceive a lasting affection for the boys or girls under their charge, so, that even after having left their guardians' care, they look back to it as their home; nor does the fact of being State children, deprive them of the sympathy and friendship of their more fortunate comrades. Most of the State boys under my care have been very popular among their school-mates.

F. M., Public School, Kangaroo Valley :—

In reply to your memo. of the 10th inst., asking for report on working of boarding-out system in this Colony, I beg to inform you that my experience of some in this district proves that the system is doing very satisfactory work. The State children attending this school are always comfortably clad, clean and tidy in their appearance, and compare favourably with any other children in attendance.

W. S., Public School, Liverpool :—

In reply to your letter of the 10th inst., in which you request school teachers to give the Board statements of their observations of the results of the boarding-out system in this Colony, I have the honor to state that while my opportunities for observation have been limited, such as I have been in a position to make, have favourably impressed me with the results of the system and with the supervision of its officers. The children who have come under my notice have been well-nourished, clean, and tidy; and in punctuality and regular attendance at school as well as in other particulars have exhibited watchful care on the part of those in charge of them.

J. B.,

J.B., Public School, Marshall Mount :—

Replying to your circular, dated 10th instant. There is at present only one State child attending this school. My experience of children boarding out in this locality is that they are well treated, and that the system gives general satisfaction both to the children and to the ones who have charge of them. The one at present attending this school is exceptionally well cared for, he is clean and tidy, and his appearance compares favourably with the other children attending this school.

W.B.G., Public School, Mittagong :—

With reference to your circular of the 10th instant, I beg to state that the State children who attend this school are clean and tidy in their appearance, fairly regular in their attendance; and in their general appearance compare very favourably with the other children.

A.D.F., Public School, Mudgee :—

There are two children, brother and sister, under the control of your Department attending this school. Their appearance and behaviour compare favourably with that of other children attending the school, and their regularity of attendance is satisfactory.

F.G.W., Superior Public School, Nowra :—

In reply to your circular of the 10th instant, I have to state that the few children attending this school and under your Department continue to attend regularly, and are quite as well clothed and appear as well cared for as the majority of the other children.

J.N.C., Coffey Hill, Orange :—

I have still to report that State children attending this school are well cared for. Their attendance is regular and they are well and tidily clothed and have every appearance of being happy. On the whole they appear as tidy, comfortable, and contented as the other children.

M.D., Superior Public School, Paddington :—

In reply to your circular of the 10th instant, I may state that the State children who attend my school are in general clean and tidy, and fairly regular in attendance. Although I cannot say that their general appearance is as good as that of the other children under my supervision, yet they seem to be well cared for.

M.B., Public School, Penrith, Girls' Department :—

There is one child, K. M'D., boarding-out with Mrs. A, of this town, attending school in this department. She attends regularly, appears well clothed and fed, and compares favourably with the other children in this department.

A.W., Public School, Petersham :—

All the State children attending the Superior Public School, Petersham, appear well cared for and are fairly regular.

J.H.S., Public School, Penrith, Boys' Department :—

There is one child attending in this department. He is neatly dressed, and seems bright, cheerful and happy. With careful supervision I think the boarding-out system is excellent, affording, as it does, the softening influences of family life for the unfortunate child.

J.J.W., Superior Public School, Redfern :—

The boys attending the department under my charge appear to be well clothed and fed. They seem intelligent in mind and cheerful in manner, and present the appearance of being well-cared for. They attend school very regularly on the whole and are very fairly conducted.

E.A., Superior Public Infants' School, Redfern :—

Report on the working of State children's boarding-out system, as shown by children under my supervision :—Their appearance, health, neatness, and suitability of appearance are satisfactory; they have all attended more than the required number of days; their attainments are well up to the average, and their conduct is good.

N.M.J., Public School, North Richmond :—

With regard to your letter of the 10th instant, I beg to acquaint you of the fact that one State child only is in attendance at this school, and as his attendance dates from 31st October, 1892, my acquaintance with the system is but limited. In this instance, however, I may point out that the regularity, punctuality, cleanliness, and general behaviour compare very favourably with those of children reared under more favourable conditions.

B.F.L., Public School, Rouse Hill :—

1. Results of the boarding-out system :—I personally know the "guardians" who have the State children attending this school, and knowing them to be conscientious women, know also that their wards are fortunate in having been placed in their charge. The wards will compare favourably with any who are so happy as to have parents; they are well and comfortably clothed, are well fleshed, healthy, and clean, and have a clearer complexion than when they first appeared at this school. They appear to be much attached to their guardians. One—Mrs. H.—is always spoken of as "mother". They are as regular and punctual at school as any of the children, and are doing fairly well.

L.P., Public School, Rookwood :—

The State children attending the Rookwood Public School are well kept and tidy in appearance, and compare favourably with any of the rest, and to advantage with some. They are fairly regular on the whole, some of them very regular.

J.J.G., North Ryde :—

In reply to yours of the 10th, I know of only one boy under the boarding-out system. He is kept well, and his life seems happy as usual run of lads.

C.R., Superior Public Infants' School, Singleton :—

With reference to a circular received from you, requesting a report upon the boarding-out system in this Colony, I beg to inform you that one State child is under my charge. From what I can judge by her dress and manners at school she appears to be fairly well cared for. On the whole she compares favourably with the other children under my supervision.

G.W.S., Public School, Sutton Forest :—

In reply to your circular of 10th instant, "requesting school teachers to state their observations of the result of the boarding-out system in this Colony," I have the honor to state that so far my observations of the same have been limited, as I have only experience in one case, but in that I am happy to say that the object of the State Children's Relief Board is fully carried out, the child though of tender age is well cared for and presents a happy and healthy appearance, and in every respect compares favourably with all the other children attending this school.

R.A.P., Public School, Taraiga :—

I acknowledge receipt of yours of the 10th ultimo requesting the teachers' statements of their observations of the results of the boarding-out system in this Colony. At the present time my observations as to the above are confined to two cases. Whether there are others in the district I am not aware, but in these particular cases I may assert that they compare favourably with the other children under my charge, and that as far as my knowledge goes, they are not shunned or slighted in any way by the other scholars of the school, or have I ever heard a word expressing dislike in any way. My opinion of the system is that it is a good one, for by it many children are brought up to become respectable citizens, whereas otherwise they would have become inmates probably of some of our gaols and in that way would be a burden on the State.

J.W.C., Public School, Tarago :—

Attending the school under my charge there are two State children, and I can truly say that compared with other children of the settlement living under similar conditions as regards temporal requirements and moral supervision they are favourably placed. They are regular in their attendance at school and as well clothed as are other children in a similar walk in life. Intellectually they are as bright, and, taking all matters into consideration, I may say they have a good and comfortable home. I have, therefore, much pleasure in adding my testimony to the general excellence of the boarding-out system as followed in New South Wales in so far as it has come under my personal observation.

W.G., Public School, St. Peters :—

With reference to your letter of the 10th instant I have much pleasure in stating that so far as my experience has extended the boarding-out system is a success; inasmuch as the State children who have attended this school, especially those in charge of Mrs. L., come clean and well dressed, they are regular in their attendance and compare favourably with the other school children.

M.L.R., Public School, Tirranna, Goulburn :—

The five State children at present under my charge as teacher are, as far as I can judge, well and carefully attended, they are always clean and respectable, and have the appearance of being well-fed and healthy; they are also regular attendants at school, and in their case I should say the system was entirely satisfactory.

L.J., Public School, Ulladulla :—

I beg to inform you that there are only two State children attending the school under my charge at present. They attend school regularly, and in clean and tidy dress. In every respect they seem well cared for by their guardians. I regret that there are not more of these children under the care of Mr. V. C., as his has always proved one of the very best homes for this purpose that I have ever known.

B.C., Public School, Vacy :—

I have much pleasure in complying with your request *re* State children under my charge, but before going fully into the matter, should be glad to learn the duties of guardians towards their trust. From casual observation, State children compare fairly well with others; in one instance, I am pleased to say, a child is treated, if possible, too well, and is consequently as happy as can be. Trusting this will prove satisfactory and meet your wishes.

W.M., Public School, Wilberforce :—

I have the honor to report that there are six State children attending this school, all of whom appear to be in good health, clean and tidy, and attend school fairly well.

G.L., Public School, William Town :—

In answer to your request I have the honor to inform you that I have one State pupil under my charge, and what I have seen of him he behaves himself well, and from what I can see of the young men who were under the boarding-out system, they are a credit to the State and themselves, and to many more who have been more fortunate in having parental care.

J.M., Public School, Woodstock, Rooty Hill :—

In reply to your communication of 10th instant, it affords me pleasure to forward the testimony of my experience of the boarding-out system. At one of the schools of which I was in charge previous to my appointment to this district, over thirty children under the system attended. Their conduct, with few exceptions, both in and out of school was as good, and in some respects much better than that of many pupils who resided with their parents. The few children under the boarding-out system in attendance at this school are in good homes, and do, unquestionably, compare favourably with the other pupils.

S.S., Public School, Wisemans' Ferry :—

With reference to my experience of the boarding-out system for the State children of this Colony, I beg to state, that I think it of great advantage to them to be placed in comfortable homes where they can enjoy the comforts of private life, and can be trained to many useful branches of industry which must prove a great service to them later in life. The State children compare favourably in every way with the other children attending this school.

W.F., Superior Public School, Woollahra :—

In reply to yours of the 10th inst., I beg to inform you that six State children are attending this school, that without exception they are healthy, clean, and comfortably clad, and compare favourably with other children. I consider the boarding-out system to be of great advantage to the children as they are gradually trained, if well placed, to fight the battle of life.

J.K., Public School, Woollombi :—

I have the honor to inform you that the State children who have come under my notice seem to be well cared for, and that they compare favourably with the children under my charge. The children are properly clothed and appear to have a proper supply of food; and are sent regularly to school.

1893.

NEW SOUTH WALES.

NAUTICAL SCHOOL-SHIP "SOBRAON."

(REPORT FOR THE YEAR ENDING 30 APRIL, 1893.)

Presented to Parliament by Command.

The Superintendent, N.S.S. "Sobraon," to The Under Secretary of Public Instruction.

Sir,

Nautical School-ship "Sobraon," Sydney, 23 June, 1893.

I have the honor to submit, for the information of the Minister of Public Instruction, the twenty-sixth Annual Report upon the Institution, for the year which ended on the 30th April last.

2. On the 8th November the school was transferred to the "Sobraon," after an occupation of the old "Vernon" for a period of twenty-five years and six months. For some time the latter vessel had been much overcrowded, whilst its decayed and leaky condition caused me much anxiety. When we left her she was completely worn out, was sold, and shortly afterwards was destroyed by fire.

3. The new ship is a roomy vessel, quite three times as large as its predecessor, and it has been fitted for its work in a very perfect way. The arrangements for ensuring the training, supervision, and comfort of the boys are, in many respects, superior to those of the best of the training ships of the mother country, and there is ample accommodation for over 500 lads. The cost of altering a large cargo-carrying ship of some 3,000 tons burden has necessarily been considerable, but the country has now a strongly built ship of great capacity, well adapted for reformatory work, which will need little repair for the next twenty-five years. To date of writing, the institution has been in its new quarters for upwards of seven months, and, for smoothness of working and general suitability, has quite realised my expectations.

4. The work of the institution again showed an increase upon former years. There was an almost daily change in the composition of the ship's company; the daily average number on board rose to 263, the highest yet attained, and an increase of thirty-three upon the preceding year; the discharges were more numerous, and we closed the twelve months with a larger number on the books.

5. No deaths occurred. An outbreak of influenza attended the closing days on the "Vernon," but the boys attacked soon recovered, and the general health has been good. Boys for the most part have been sadly neglected prior to their committal to the ship, and they arrive in a filthy condition in many instances. Such lads are liable to skin complaints of various kinds, and require much attention.

6. The general behaviour has been good: As usual, new-comers and boys returned from situations for misconduct have been the principal offenders. Of late years we have received a large number of boys who have turned out failures under various charitable organisations, and these naturally need firm handling. One of these, received here during the year, had been for nearly ten years under two other systems for dealing with neglected boys, and was then given up as a hopeless case, and sent here as a last resource. Although his age was assumed to be just under 16, he looked much older, and he was a big powerful fellow, of determined character, and of the worst family history. For some time after arrival he was a troublesome character, but a careful treatment of his case effected a rapid reform, and within six months of his first stepping on board he became a well-conducted youth, trusted to go ashore on messages, and placed in charge of other lads. He left here on a ship bound on a voyage to America last week, having fairly earned permission to go to a situation by his good conduct. I believe it will be found that his reformation is of a permanent character.

7. The foregoing will show the nature of much of the raw material which comes to us for treatment. Table B further illustrates this. Firm discipline, plenty of work and drill, with wholesome recreation, accomplish wonders with this class of lads; and they do not look upon the ship as a prison. Boys coming on board are taken into our confidence, and told what is going to be done for them. After the first natural restlessness is got over, they, for the most part settle down quietly and contentedly; and the healthy public opinion existing amongst the boys, and the frequent visits to the ship by old boys, do much to check misconduct.

8. Table J shows the value of the industrial labour performed during the year, apart from the work done in school and at drill. The inmates are kept busily employed.

9. The class and mark system continue to work well, and afford means to classify by conduct. The lowest class, No. 7, is continually under special supervision, and as there is no play but plenty of extra work, and deprivation of various enjoyments, No. 7 boys receive a practical object lesson as to the desirability of good behaviour. After passing this class, every inducement is held out for continued good conduct, every class from 6 to 1 carrying increased privileges. Wholesome and varied recreation has

always been a characteristic of the institution. There is an excellent library with over 1,000 volumes; a recreation hall, well supplied with piano, musical-box, all of the morning and evening papers, the principal London illustrated periodicals, *Chambers' Journal*, *Leisure Hour*, *Daily Graphic*, &c.; a large swimming bath; a spacious recreation ground; and an entertainment hall where occasional concerts and lectures are given, the latter illustrated by means of the ship's oxyhydrogen apparatus. There are two clubs, the Athletic Association and the Cricket Club, each under the presidency of an officer, but managed by the boys, which are particularly useful in giving a healthy tone to the establishment. The first-named club has a very complete gymnastic apparatus and supply of clubs, and the boys take interest in its proceedings. The Cricket Association turns out some fair players, and last week a representative eleven signally defeated a party of young men, formerly "Vernon" lads, who specially visited their old quarters to play a friendly game. In addition, harbour and fishing excursions are of frequent occurrence, and occasionally trips are made to places of interest about Sydney. On two occasions, by the kindness of the managements, the lads visited Her Majesty's Theatre and the Lyceum. Over 200 boys attended each time; their passage through the crowded streets at night without mishap of any kind showed that confidence in them was not misplaced.

10. Swimming continues to be systematically taught, and no boy leaves the vessel unable to swim. On the 30th April only thirty-six of the inmates could not swim.

11. Favourable reports have been received concerning the apprentices, some of whom have now been five years away, but are still under my guardianship. Everyone has been inspected at his master's residence within the last quarter, and 93 per cent. received satisfactory characters. Much care is taken in selecting suitable places, and the boys, generally, are comfortable, contented, and interested in their work. Most of these apprentices have written to me during the year—some, half-a-dozen times—and their letters always receive replies. The correspondence thus maintained is of much service in assisting to keep the lads steadily on the right track. I have personally visited a number of the apprentices at their homes, but the greater portion of the inspecting has been done by the police, who have performed this work in a tactful, thorough way, which has ensured that the boys were treated properly. Mr. Inspector-General Fosbery, and the force under him, have always taken a deep interest in our apprentices.

12. About 100 boys completed their apprenticeship during the year, and consequently became quite free from legal control. It is satisfactory to find that, for the most part, these young fellows of 18, who had become proficient in country pursuits, remained in the districts in which they had been apprenticed, and in many cases re-engaged with their old masters. The sum of £2,850 was paid to them from the Government Savings Bank, being wages earned during their service.

13. As in past years, numbers of former inmates continue to take an interest in their old school, and some 300 of them have visited or written to me during the twelve months. For the most part the "old boys" seemed to have turned out well. One young man, whose letter reached me to-day, says, "I am getting on very well; still in the same employ. I have over £200 saved and about 60 head of cattle. I shall be happy to go and have a look at the new ship when next I come to Sydney." He has been away seventeen years, but is still with the same master to whom he was apprenticed. A few days ago another man came aboard to show me his ship-master's certificate which he had just received, and which had enabled him to receive substantial promotion. He is a frequent visitor, accompanied occasionally by his wife and family. It is upwards of nineteen years since he left the ship, at the age of 17. These are not by any means singular incidents, as numbers of such cases occur.

14. Fair work has been done in school, and a favourable report was made by Mr. Inspector Pitt concerning its operations. Only thirty-five of the new-comers were found to be up to a fair standard. The remainder were indifferently educated, and forty-five could not read or write. Table K gives full particulars of the educational status. The schoolmasters also act as librarians, and so accomplish much useful work after school hours.

15. On Sundays the lads landed and marched to their respective places of worship, excepting in inclement weather, when service was held on board. In addition to the usual religious exercises held on the ship, religious instruction has been conducted by the Rev. W. A. Charlton, Mrs. Ford, and Miss Fitzhardinge, on behalf of the Protestants, who form the bulk of the inmates; and by the Rev. Dean Boyle, the Rev. J. Hegarty, and the Rev. E. Corcoran for the Roman Catholics. All of these ladies and gentlemen act in an honorary capacity, and do great good by their earnest labours. Sixty boys were confirmed during the year.

16. The institution now commences its twenty-seventh year, and is the oldest establishment of its kind in the southern hemisphere. During the twenty-six years of its existence 2,820 boys have been committed on board. Of these 262 remain on the ship, 11 have died in hospital, and 2,547 have left, principally as apprentices. As could have only been expected, some of these latter have turned out badly, and their cases naturally come much under public attention. These, however, form but a comparatively small proportion of the large number who have passed under the ship's discipline, and it is well within the mark to say that fully 92 per cent. of the lads have turned out to be as respectable, industrious men as any members of the general community.

17. The usual statistics are appended. Table G enables an idea to be formed of the kind of home life led by the boys, prior to their being sent to the ship. Neglect of parental obligations is one of the principal causes that lead to boys coming here.

18. The officers of the ship have carried out their duties in a cheerful and intelligent manner, and I am glad to bring their good conduct under your notice.

I have, &c.,

FREDK. W. NEITENSTEIN,
Commander and Superintendent.

TABLE showing Expenditure for year.

Provisions	£	s.	d.
Band instruments, music, repairs	3,000	1	0
Crockery, knives, forks, mess utensils	84	3	0
Clothing, boots	92	4	10
Stores, rope, paint, timber, repairs to "Vernon" boats, shore establishment generally	1,266	19	1
School appliances, library, reading-room, good conduct pay	753	17	5
Fuel and light	171	10	1
Salaries (including teacher's pay)	248	16	5
Bedding, hammocks, bags, blankets	2,329	13	6
Medicines, visiting surgeon's salary, hospital expenses	224	12	6
Petty expenses	157	1	1
	58	17	0

Deduct parent's contributions

8,386 15 11

361 18 6

8,024 17 5

Expenses connected with the boys still under the legal control of the Institution, whose good conduct admits of their being apprenticed in place of being detained on the ship:—

Proportion of salaries	£	s.	d.
Visiting, stamps, stationery	300	0	0
	68	13	9

368 13 9

Net cost of all the ship's boys under State control

8,393 11 2

The daily average number under control for the year was 670.

The cost per head per annum was £12 10s 7d, or 8d. per diem.

Included in the above expenditure is a large outlay on the old "Vernon," rendered necessary by its leaky, decayed condition during the last few months of its occupancy by the boys.

1893.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

THE DEPARTMENT OF PUBLIC WORKS.
(ANNUAL STATEMENT OF WORKS CARRIED OUT BY, DURING THE YEAR 1892.)

Ordered by the Legislative Assembly to be printed, 19 October, 1893.

The Under Secretary for Public Works to The Hon. William John Lyne,
M.P., Secretary for Public Works.

The Department of Public Works,
14 September, 1893.

Sir,

I do myself the honor to submit, for your information, the Annual Statement relating to works carried out by this Department during the year 1892. Some of the detailed returns have only just been furnished to me, as their preparation involved a large amount of work which had to be carried out along with the current work of the Department; hence the delay.

The gross expenditure for the year amounted to £3,223,495 2s. 2d., of which £1,336,649 14s. 7d. was chargeable to Loans, and £1,886,845 7s. 7d. to Revenue. The particulars are as under:—

Head of Service.	Revenue.	Loans.	Total.
	£ s. d.	£ s. d.	£ s. d.
Establishment*	25,995 6 11	25,995 6 11
Railways and Tramways	6,628 12 0	1,053,291 1 5	1,059,919 13 5

Resumption of Land for Construction of Wharfs (Erskine-street and Woolloomooloo)	73,852 19 1	73,852 19 1
TOTALS	£ 1,336,649 14 7	1,896,845 7 7	3,223,495 2 2

* This includes the Ministerial Office and the Permanent Clerical and Account Staffs.

RAILWAY CONSTRUCTION BRANCH.

During the year under review 129 miles of railway have been completed and opened for traffic, namely :—

Nyngan to Cobar, $81\frac{1}{2}$ miles, which was opened for traffic on the 2nd of July ;
and Culcairn to Corowa, $47\frac{1}{2}$ miles, which was opened on the 3rd of October.

The following lines were in progress at the end of the year, namely :—

Kiama to Nowra (*)	$22\frac{1}{2}$ miles.
Lismore to the Tweed (Contracts Nos. 2, 3, and 4)	62 „
Milson's Point (†)	$2\frac{3}{4}$ „
Molong to Parkes and Forbes (Contracts Nos. 1 and 2)	$72\frac{3}{4}$ „
Cootamundra to Temora (‡)	$38\frac{3}{4}$ „
Marrickville to Burwood Road	5 „
Total...	$203\frac{3}{4}$ miles.

Railway Surveys.

During the year a large amount of work in connection with Trial Surveys has been carried out, details of which will be found in the Report of the Engineer-in-Chief for Railway Construction, appended hereto. On reference to that report it will be seen that a total length of 856 miles of survey has been carried on, necessitating a large amount of preliminary exploration, traverse, levels, etc., the details of which are given in Mr. Deane's Report. (See page 14.)

Unfortunately, on account of the restricted state of the Loan Market, the Department has been unable to proceed with the work of railway extension as rapidly as the needs of the country demand, but owing to the large amount of survey work which has been accomplished, further railway construction can be put in hand as soon as the Colony is again in a position to borrow on advantageous terms.

Tramways.

The following tramways were completed during the year and opened for traffic on the respective dates stated below, viz. :—

	Miles.	chains.	
Yass Railway Station to town	2 73 single track, 20th April.
Forest Lodge to Balmain...	1 58 „ „ 22nd April.
Merton-street to Gladstone Park, Balmain	1 16 „ „ 20th October.
Total...	5 67 „ „

In addition 9 miles and 72 chains of tramway were in course of construction at the end of the year—3 miles 10 chains of double track, and 6 miles 62 chains of single track, as under :—

	Miles.	chains.	
North Shore (cable)	0 60 double track.
Newcastle to Merewether	2 28 single „
Newcastle to Tighe's Hill	2 23 „ „
Military Road, North Sydney	2 11 „ „
King-street to Ocean-street (cable)	2 30 double „
Total...	9 72 Surveys

(*) Opened on June 3, 1893.

(†) Opened on May 1, 1893.

(‡) Opened on September 12, 1893.

Surveys and reports have also been made of many proposed tramways, particulars of which may be found in Mr. Deane's report. (See page 18.)

The North Shore cable tramway extension was opened for traffic on 16 July last, and the Military Road electric tramway will be opened on the 20th instant, the electric plant which was in use on the Randwick-Waverley line having been transferred to this.

The Newcastle-Merewether line and the Newcastle-Tighe's Hill line are likely to be opened for traffic before Christmas next.

With regard to the King-street to Ocean-street cable line, the time for the completion of the last contract expires on 31st January next, and every effort is being made to push the work forward, so that it may be in operation early next year.

HARBOURS AND RIVERS AND WATER SUPPLY BRANCH.

A considerable amount of work was carried out in connection with the improvement and maintenance of harbour works and river navigation, chiefly at the Tweed, Richmond, Clarence, and other coastal rivers, as also at Sydney and Newcastle.

At Newcastle about 20 acres of land were reclaimed by the sand-pump dredge, and a large quantity of rock was removed from the harbour and inner basin.

In my report for the year 1891 I drew attention to the very economical results obtained by the introduction and use of suction dredges. During the year 1892 I find the estimated quantity of sand raised by five of these dredges was 2,163,750 tons, the average cost being 1·855d. per ton. In my previous report it was also pointed out that the "Juno" had deposited a large quantity of sand at the small cost of 1·406d. per ton. During the year 1892 the same vessel deposited 554,600 tons of sand at a cost of 1·484d. per ton, or slightly in excess of the average cost of the preceding year. This increase is accounted for by the fact that the material was discharged at a distance from the dredge nearly double that which was the case in the previous year.

The "Actor," a dredge of the same type, working at the Tweed River, under very unfavourable circumstances, owing to the recurrence of floods, deposited 484,800 tons, at a cost of 1·685d. per ton; in fact this type of dredge is revolutionising the dredging operations of the Department, both as regards economical working and speed. As an evidence of this, I may mention that, previously, it was usual to send most of the silt raised by the dredges to sea; but very little of it is now dealt with in this manner in Sydney. The material raised by the ladder dredges is taken in punts to a convenient point, discharged alongside, and then pumped ashore by means of the suction dredges, at the small cost before mentioned. The material raised, instead of being wasted, is thus utilised in forming very valuable reclamations.

I have attached to this report illustrations showing the "Groper," one of this new type of dredges, at work at Long Cove, where a large channel has been excavated and a considerable amount of reclamation carried out; and also, views of the "Neptune," at work at Neutral Bay, Sydney.

The total quantity of silt raised during the year by the fourteen ladder dredges was 3,526,250 tons, at a total cost of £52,408 3s. 4d., or 3·566d. per ton.

The nineteen grab dredges have raised 996,251 tons, at a cost of £18,359 2s. 10d. The average cost of rock excavation was 15·115d. per ton; and of sand and silt, 3·894d. per ton.

I may here observe that the dredge "Groper," which is the newest type of suction dredge, and one of the largest of the kind in the world, was built at the Fitzroy Dock, Sydney, by the shipwrights in the employ of the Department; the boilers and engines were constructed by private firms; and the cutting machinery was supplied by Mr. Higgins, the holder of the Von Schmidt patents. The total cost of the vessel and machinery will be about £21,000, and she is capable of lifting, under favorable circumstances, 1,300 tons of silt per hour.

A large amount of reclamation work was carried out during the year in the Sydney district, the total expenditure being £52,549 14s. At Homebush Bay, 2 miles of fascine banks have been formed, and an area of 500 acres of mud flats is in process of reclamation. The reclamation work at Rozelle Bay will embrace an area of 52 acres, and is enclosed by a stone dyke 1,700 feet long, carried out by contract. Further details will be found in Mr. Darley's report.

At Sydney several jetties, pontoons, &c., were constructed for the convenience of the harbour traffic.

There are twenty lighthouses along the coast, which were maintained by the Department; the expenditure during the year for this purpose was £619 3s. 4d.

The Potts' Hill Reservoir and duplicate 48-inch main were completed and will shortly be handed over to the Board of Water Supply and Sewerage. The total cost of these works was £257,451 10s. 8d. Works in connection with water supplies for country towns were commenced at Dubbo, Jerilderie, Junee, Nyngan, Nowra, and Parkes.

This reference suggests the question of the management of the country towns water supplies generally, and I may mention that, under your direction, steps are being taken which, it is hoped, will in a short time place in a satisfactory position the debts of the various municipalities on this account.

Fitzroy and Sutherland Docks.

During the year 49 vessels were docked at the former dock, and 41 at the latter, distributed as under:—

British vessels of war	20	
Foreign vessel of war	1	
Private vessels	4	
Government dredges	13	
,, tugs	16	
,, punts	36	
Total							...	90

As is generally known, in the case of ships of war only the actual out-of-pocket expenses are charged, so that it cannot be expected that these establishments will show a direct profit; but, as pointed out in my previous report, to a large extent the first-named dock contributes in a very important sense to the naval defence and commercial importance of the Colony. Regarding the Fitzroy Dock, I have already referred to the fact that the dredge "Groper" was built there, and a large amount of work was also done in the way of lengthening and repairing the numerous vessels composing the dredge fleet of the Colony, of which full details are given in Mr. Darley's report.

GOVERNMENT ARCHITECT'S BRANCH.

In consequence of the necessity for retrenchment few additional buildings have been commenced, most of those which were under construction at the date of my last report have been completed, and considerable additions have been made to many public buildings.

The Government Architect reiterates his complaint respecting the inadequate amount granted for maintaining the public buildings of the Colony in systematic repair, and urges the importance of arranging a plan which will provide for the external painting at least once in every fourth year, and internal painting every seventh year, together with provision to mitigate the ravages of white ant and also the effects of climate.

A detailed statement of the estimated value of the public buildings under the charge of this Branch is appended, by which it will be seen that the value of buildings and sites is estimated at £8,196,162; parks and gardens, £4,407,490; total, £12,603,652.

A contract was let for the completion of the Sydney Hospital, in Macquarie-street, under the supervision of Mr. J. Kirkpatrick, who is also the designer of the new part now under contract.

An engraving showing the elevation of the building, which is now nearing completion, is appended to this report. The total cost of the work carried out by the Government will be about £67,000.

ROADS, BRIDGES, AND SEWERAGE BRANCH.

During the year 1892 a considerable amount of work was carried out by this Branch, the sum of £1,103,040 3s. 8d. having been expended. Owing to the excessive rainfall of the last few years a very severe strain has been placed on this Office which will only be effectually relieved by the passing of some measure of local government which will secure local contributions for necessary works.

There are 33,213 miles of road under the direct supervision of officers of the Branch, 553 miles subsidised by the Government and supervised by municipal authorities, and 1,993 miles under the control of trustees, giving a grand total of 35,759 miles. The length of road constructed during the year was 1,402 miles.

Bridges.

Three hundred and sixty-six bridges, 25,189 feet in length, with 867 spans, were built during the year, making the total number of bridges 3,550, having 7,609 spans, and a total length of 243,697 feet (or $46\frac{1}{4}$ miles).

Culverts.

One thousand five hundred and two culverts were built during the year, of a length of 26,715 feet, the total number of culverts being 25,854, with a length of 403,253 feet (or $76\frac{1}{2}$ miles). There are also 10,169 causeways, of an aggregate length of 237,055 feet.

The number of punts, launches, and boats in use is 290, and the aggregate width of streams crossed by ferries is 69,062 feet.

I may here mention, although it is somewhat anticipating the report for the present year, that a rather important structure—viz., the Cowra Bridge—has recently been completed, and as the design is somewhat novel I have attached illustrations of it. The bridge was formally opened on the 13th instant, and the total cost was about £30,000.

SEWERAGE.

SEWERAGE.

I am sorry that the report in connection with the Sewerage Works is a very meagre one, which is due to the fact of the curtailment of our loan expenditure. This matter is of so important a character that I need not apologise for quoting somewhat extensively from a report on the subject which has recently been furnished by Mr. Hickson. He says :—

In 1875 measles and scarlet fever proved so destructive to life that a Royal Commission was appointed to suggest remedial measures, and this may be termed the birth of the present system. The result of the steps then taken has been that in the city proper the death-rate, which in 1875 reached 31·65 per 1,000, has rapidly fallen, till in 1892, notwithstanding that influenza was epidemic, the death-rate was 16·54 per 1,000, or, exclusive of hospitals, 11·92 per 1,000.

The suburban rates are even more instructive than those for the city. From 1872 to 1885 the death-rate gradually rose till it reached 24·47 per 1,000. In that year the southern outfall sewer was brought into operation, followed by the northern outfall, and the reticulation of the eastern and southern suburbs has been since gradually extended. The statistics show that, although there has been since 1885 a more rapid proportional increase in the population than at any previous period, the death-rate has steadily fallen till it now stands at 12·49 per 1,000, or 1·66 per 1,000 less than the lowest previous record. Comparing the death-rate of 1885 with that of 1892, and taking the present population of the city and suburbs at 400,000, these figures represent a saving of over 4,000 lives for the latter year. Unquestionably this result is greatly owing to the improved sanitary arrangements, and when it is considered that the larger part of the suburbs is still unsewered, it shows the urgent necessity there is for completing the work within as short a time as possible.

The financial aspect of the question, therefore, calls for serious consideration. Seeing that the heaviest expenditure is involved in the construction of the main outfall sewers, and that these must be undertaken first, although unremunerative, and that the cost of the sewers gradually diminishes as the limits of the system are reached, while the area drained increases, the best financial results would undoubtedly be obtained by completing the works to the payable limit as rapidly as possible.

It was anticipated that the Board of Water Supply and Sewerage would be in a position to complete the reticulation immediately on the main sewers being made available. This has unfortunately not been the case, and the result is that not only is the Colony burdened with the interest on £136,757, the cost of the sewers referred to, which should be carried by the localities served, but that an area of about 1,693 acres all thickly, and in some cases densely, populated, is almost wholly deprived of the benefits of drainage, and that the Board is prevented from securing a revenue which would much more than cover interest and working expenses.

On the main western outfall sewer, which is the key to the whole western system, an expenditure of £185,257 has been incurred, and a liability remains on existing contracts of £26,100. In addition to these sums £60,000 will be required for the completion of the sewer and the preparation of the sewage farm. No revenue whatever can be obtained from this expenditure of £271,357, over two-thirds of which has been already paid, till the most important branches have been completed. The construction of the eastern branch high and low level, and of the first sections of the northern and western branches, would make available for revenue purposes 10,700 acres, carrying a population of about 54,000, and the income from this area would at once relieve the general funds from at least a large portion of the existing liability.

The same considerations will apply to the drainage of North Sydney. There a liability of £40,000 has been incurred, which cannot yield any return till an additional sum of about £70,000 has been expended.

I would submit that the drainage of the city and suburbs rests on a different footing from almost any other public work. Not only is the health of a large and increasing community, equalling about one-third of the population of the Colony, dependent upon its rapid completion, but its financial success is assured; and the properties to be drained will be rated to meet the interest and provide a sinking fund for the repayment of the capital expended, and the receipt of an adequate revenue can only be retarded by delay in the construction of the works necessary to carry the sewers into the populated areas.

This report, I think, shows only too clearly that the best interests of the Colony are involved in the prosecution of this important work, whether looked at from a commercial point of view or from that of the urgent demands of the public health, and it is to be hoped that an easier money market will soon enable the Department to proceed with these works with something like the vigour which the necessities of the case require.

During

During the year 5 miles 10 chains 61 links of sewers and 3 miles 20 chains 55 links of storm-water channels were finished, and 4 miles 52 chains 13 links of sewers and 4 miles 7 chains and 29 links of storm-water channels were under construction.

Attached are views of a few of the principal works finished or in progress during the year.

LAND VALUATION BRANCH.

During the year the following claims, valuations, and estimates were made:—

	£	s.	d.
1. Claims for land for Railway and Tramway purposes	188,839	14	10
Other purposes	146,043	11	7
	<u>334,883</u>	<u>6</u>	<u>5</u>
2. Valuations of Resumptions for Railway and Tramway purposes	125,191	12	6
Other public purposes	80,291	11	10
	<u>205,483</u>	<u>4</u>	<u>4</u>
3. Estimates of value of proposed resumptions	507,152	10	0

WATER CONSERVATION AND IRRIGATION BRANCH.

This Branch was transferred from the Mines Department during the year, and with it the administration of the several Acts of Parliament relating to irrigation and water supply.

The Chief Engineer points out that the delay in passing an Act dealing with water conservation, irrigation, and drainage is a very serious matter for the Colony. A comprehensive Bill dealing with these subjects was introduced by you last Session, but its consideration could not be proceeded with on account of the pressure of other business before Parliament.

In the absence of legislation dealing with riparian rights, the construction of works for conserving and utilizing water cannot be proceeded with, except at a great disadvantage, but the few works that were carried out have proved highly satisfactory, and would be very remunerative if rates could be collected from the persons whose land has been improved by their construction.

The system of surveys recommended by the Royal Commission on the Conservation of Water is approaching completion, and this Department is now in possession of information necessary for dealing with the available supplies of water in the western rivers.

Special contour surveys have also been made in connection with lakes in the western interior, and for the headworks of the proposed Murrumbidgee Northern Canal.

The discharges of all the important rivers west of the Dividing Range, and on several of the coastal rivers, have been gauged, and the results are stated in the tables annexed.

In illustration of the results of the surveys which have now been nearly completed by the Water Conservation Branch, two plans are attached. The first of these shows the extent of the two great connected basins, about 4 miles north of Narrandera, which can be converted into a storage reservoir. This reservoir can be filled from the Murrumbidgee during the winter and spring months, when that
river

river is in flood, and the quantity of water thus stored—amounting to 6,900 millions of cubic feet—would afford the means of irrigating extensive areas throughout the fertile plains which extend westward to the River Lachlan. The second plan shows levels which have been taken on the River Namoi, from a proposed reservoir site above Gunnedah down to the junction with the River Barwon or Darling at Walgett. The red figures on the map are heights above Sydney high-water-mark, and the red lines are contours or lines of equal height. It is necessary to mention that the contour plans, showing the levels in the southern part of the Colony, have already been published.

During the year the Water Conservation Branch carried out a comprehensive survey with a view to determining the practicability of utilizing the waters of the Shoalhaven River for hydraulic sluicing on an extensive scale. It had long been known that there are extensive deposits of auriferous drift in the Shoalhaven Valley, and the question of obtaining the gold from these deposits was for some time under the consideration of the Department of Mines. The survey carried out by the Water Conservation Branch was originally sanctioned by that Department. The report of the Chief Engineer and a plan illustrating it are appended. The subject is a most important one, as it would appear that the proposed works would be highly remunerative, and that they would afford employment to large numbers of men. The following summary fairly indicates the conclusions arrived at:—

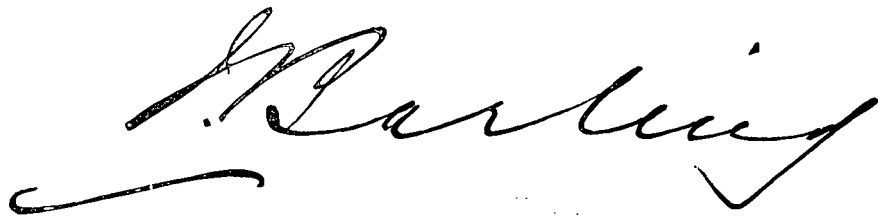

1. It is considered as proved by the survey that a conduit capable of carrying 120 cubic feet per second can be taken from the Shoalhaven River to the neighbourhood of Reedy Creek, in the parish of Larbert, at a cost of £100,000.
2. The length of this conduit would be 23 miles, and it would command an area of 7,800 acres of auriferous drift, the average depth of which is estimated to be 20 feet, and which is estimated to contain gold to the value of 2s. in every cubic yard on an average.
3. It is estimated that, if 20 cubic feet of water per second be allowed for loss and waste, the balance of the supply would wash 2,080,000 cubic yards per annum, thus yielding gold to the gross value of £208,000. According to the estimates, the labour in obtaining this would cost about £26,000 per annum, the interest on cost and the maintenance of the main conduit about £5,000 per annum, and the interest on cost and the maintenance of the various works for conducting the water to the sluicing grounds would probably be more than covered by £2,000 per annum, thus leaving a net annual return of £175,000.
4. It is estimated that the quantity of water actually used during the year would be equivalent to the full supply of 100 cubic feet per second for forty-three weeks, and that a moderate price for the water would be £8 per week for every cubic foot per second, thus producing a total return of £34,400 per annum.
5. The available information tends to show that it will take over eighty years to exhaust the deposits commanded by the proposed conduit, while much larger deposits of at least equal richness can be reached by extension of the works.

Although

Although the artesian bore at Coonamble has been put down during the present year by the Water Conservation Branch its importance justifies me in anticipating this year's report by referring to it. The question of water supply for domestic purposes and for travelling stock at Coonamble is one to which the attention of the Government has been repeatedly solicited. The matter engaged your attention early in this year, and notwithstanding the fact that Coonamble was stated by geologists to be beyond the boundary of the cretaceous strata in which artesian water is generally found, you decided to put down a bore, in the hope of striking artesian water. It is gratifying now to be able to report that the tender for this work, as approved by you, has eventuated in the opening of a new and extensive field for artesian boring. The result has been highly satisfactory, as a supply of considerably more than a million and a half gallons per day is now flowing from the bore, the total depth of which is 1,303 feet. This supply will not only provide for the town and for travelling stock, but will, in addition, irrigate some hundreds of acres of land. What is of even greater importance is the light which this bore has thrown on the extent to which artesian water may be found on the south side of the River Darling. Hitherto it has been the prevailing belief that little or no artesian water was to be found on the left or south-east side of that river; so that the success of the Coonamble bore will doubtless lead to the sinking of many others in the same district, to the increase of settlement, of production, and of value of the public and private lands. The view of this bore which is appended is from a photograph by Messrs. Kerry & Co., of Sydney, and gives a clear idea of the appearance of the flow before the controlling valve was fixed.

I am aware that in this brief report I have omitted many points of interest, which will, however, be found dealt with in the reports of the heads of the various Branches of the Department, to which I would therefore refer those who may desire further information. In concluding, I am glad to be able to express my obligation to the officers of the Department for the way in which they have assisted me in dealing with its varied and complicated business, and to this is largely due the measure of success which can, I venture to think, be claimed.

I have, &c.,

(I.)

Railways and Tramways.

REPORT OF THE ENGINEER-IN-CHIEF FOR RAILWAYS.

Sir,
The Department of Public Works, Railway Construction Branch,
1st January, 1893.

I have the honor to make the following report on works carried out during the year 1892.

RAILWAYS.

THE following railway extensions have been completed during the year (1892), but in each case the maintenance period of twelve months is still running:—

Nyngan to Cobar, $81\frac{1}{2}$ miles, on 2nd July.
Culcairn to Corowa, $47\frac{1}{2}$ miles, on 3rd October.

The following works were still in progress at the end of the year:—

Kiama to Nowra Railway, $22\frac{1}{2}$ miles.
Lismore to The Tweed Railway, Contracts 2, 3, and 4, 62 miles.
Milson's Point Extension Railway, $2\frac{1}{4}$ miles.
Molong to Parkes and Forbes Railway, $72\frac{3}{4}$ miles.

Nyngan to Cobar Railway.

This line junctions with the Western Line at a point west of the Bogan River Crossing at Nyngan, 378 miles 9 chains from Sydney, and terminates at Cobar, 459 miles $36\frac{1}{2}$ chains from Sydney.

The earthworks are for the most part only light in character, 21 miles in length being merely "forming."

The only water-course of importance is Yanda Creek, crossed by twelve 14-ft. timber openings, but a large number of small timber openings are distributed along the line.

The ruling grade on the contract as let was 1 in 75, but at the request of the Railway Commissioners this was altered to 1 in 100 during the progress of the works.

The permanent-way is laid with 60-lb. steel flat-bottomed rails fixed to sleepers 8 ft. by 9 inches by $4\frac{1}{2}$ inches. The rails for the first 50 miles are in 24-ft. and 21-ft. lengths; the rest are 30-ft. lengths. The rails in the sidings are second-hand $71\frac{1}{2}$ -lb. iron rails.

Station buildings, &c., have been erected at Hermidale, Boppy Mountain, and Cobar, and sidings put in at Panjee, Thorndale, and Meruyla.

Circular wrought-iron service tanks and pumping engines with all necessary pipes have been laid at Hermidale, Boppy Mountain, and Cobar. At Hermidale and Cobar the Government tanks are drawn from, and at Boppy Mountain a large reservoir has been excavated.

The line is almost entirely unfenced, and at the crossings of boundary runs sheep and rabbit stops have been made.

Messrs. Smith and Finlayson are the contractors.

The line was opened for traffic on the 2nd July.

Culcairn to Corowa Railway.

This line, which originally was intended to junction with the Main Southern Railway on the south side of the Billabong Bridge, at 355 miles 74 chains, now starts from the Culcairn Railway station, at 355 miles 40 chains from Sydney, and terminates at Corowa, 403 miles 34 chains from Sydney.

The earthworks are for the most part only light in character, 23 miles in length being merely "forming."

The creeks of most importance are Billabong, Back, Petries, Burrumbuttock, and the Twelve Mile.

The ruling grade is 1 in 75.

Thirty and a half miles of the permanent-way are laid with rails 21-ft. and 24-ft. long; the remainder with 30-ft. lengths; all are 60-lb. flat-bottomed steel rails. In the sidings flat-bottomed $71\frac{1}{2}$ -lb. second-hand iron rails have been used.

With one or two exceptions all the public roads crossing the line are provided with cattle stops.

Engine tanks and pumping houses have been erected and the necessary pipes laid for water supply at Brocklesby and Corowa. At the former place the water is taken from a Government stock tank, and at Corowa from the River Murray.

This line was opened for traffic on 3rd October.

The junction station at Culcairn has been rearranged, to suit the requirements of the branch traffic.

Station buildings have been erected at Walla Walla, Burrumbuttock, Brocklesby, Carnsdale, Hopefield, and Corowa.

Messrs. Horne and Shand are the contractors.

Kiama

Kiama to Nowra Railway.

These works have been pushed on by the contractor, Mr. Pritchard, and are approaching completion. The earthworks are heavy, and there are five tunnels, of a total length of 1,840 lineal yards, all lined with concrete. These are completed, and 14 miles of permanent-way laid.

Portions of the country traversed by this line are liable to floods, and the average rainfall is heavy. A large number of timber bridges and viaducts, with spans, &c., varying from 6 feet to 24 feet, have been built, and two skew bridges, with iron superstructure and concrete abutments have been erected—one over Terralong-street at Kiama, 120 feet long; and one at Gerringong 43 feet long.

Station buildings are to be erected at Kiama, Gerringong, Berry, and Bomaderry, and platforms, with waiting-sheds at Rose Valley, Toolejooa, and Jasper's Brush.

The value of the work done at the end of the year was £237,000, exclusive of rails and fastenings.

Lismore to The Tweed Railway.

Contract No. 1, let to Messrs. Crosbie, Marquand & Co., has been completed.

This contract was for construction and erection of steel bridges over Leycester and Wilson's Creeks. The Leycester Creek Bridge consists of three 120-foot and two 42-foot steel spans, and the Wilson's Creek Bridge of one 120-foot and two 42-foot steel spans; the river piers consist of cast-iron cylinders, with concrete filling, and concrete on piles; the abutments are built of concrete resting on a pile foundation.

Contract No. 2, let to Messrs. Kerle and Kerle, includes all the general work required in construction from the commencement of the line at Lismore, at 80 miles 6 chains from Grafton to 96 miles 6 chains from the same point, except the bridges over Leycester and Wilson's Creeks.

The earthworks, consisting of 748,000 cubic yards, and one tunnel, 143 lineal yards in length, are very nearly completed. Progress has been much retarded by wet weather. Much of the land passed through being subject to floods, and the rainfall of the district being very heavy, the construction of a large number of timber bridges and viaducts has been rendered necessary. Cooper's Creek and Pearce's Creek are crossed by bridges with steel superstructure of 120 feet spans, resting on cast-iron cylinders filled with concrete.

The permanent-way is laid on a portion of this contract.

No. 3 Contract was let to Mr. M. Danaher, on 5th August, 1891. It commences at 96 miles 6 chains from Grafton, and ends near the Brunswick River, at Mullumbimby, at 119 miles 30 chains.

The earthworks, although very much interfered with by rainy weather, are nearly completed, and several timber bridges are also finished. Between Byron Bay and Mullumbimby the line runs through swampy land, not many feet above the level of high tide. At Cavvanba a siding connected with the Byron Bay jetty is being made.

A further Contract No. 4, a length of 22 miles 36 chains to the Tweed River, opposite Murwillumbah, was let to Messrs. Willcocks and Firth, on 15th November, 1892, and is the heaviest portion of the whole railway between Lismore and The Tweed. It includes seven tunnels and six steel bridges. Good progress has already been made.

Sites for stations have been fixed at Lismore, Woodlawn, Bexhill, Mayfield, Laureldale, Pearce's Creek, Binna Burra, Granuaile, Cavvanba (Byron Bay), Tiagara Grass, Mullumbimby; and designs are also in hand for station accommodation at Billinudgel, Mooball, Burringbar, and Dunbible, as well as Murwillumbah, the terminus.

Designs for engine tanks and general water supply at Lismore, Byron Bay, and Tiagara Grass, on contract No. 3, are being prepared.

Milson's Point Extension Railway.

Contract time for completion expired on 5th September, 1892, but owing to delays of various causes the line is still unfinished.

On the east side of Lavender Bay, a number of men from the Labour Bureau were employed for some time on excavation outside the contract. This has made a large amount of extra space available for station yard purposes for future use; cutting No. 8 has been altered by the substitution of a tunnel 167 yards long in the middle of its length. At Milson's Point a sea-wall of stone for a length of 150 feet, and a timber platform on piles forms part of the station accommodation.

The tunnels on this contract, of which there are two of a total length of 505 lineal yards, lined with brick, are finished.

Two steel bridges over Carr-street, and Bay-street—the former, 60 feet span, and the latter, 36 feet span, on the skew, both resting on brick abutments, have been erected.

A retaining-wall has been built at Berry's Bay, so as to preserve available frontage to the water.

Station accommodation is provided for at Edwardes Road and Bay Road.

The plate-laying is in an advanced state.

The value of work done at the end of the year was £91,000, exclusive of rails and fastenings supplied by the Government.

Molong to Parkes and Forbes Railway.

These works were let in two sections to Messrs. Baxter and Saddler, who have pushed them forward with energy.

On No. 1 contract the earthworks are finished. Bridges and culverts are all built and the permanent-way laid on bottom ballast.

On No. 2 contract the earthworks are very forward, a large number of timber openings and small culverts are built, and the permanent-way was laid for 8 miles—at the end of the year.

The value of work done at the end of December was £161,000.

Provision has been made for stations at Gregra, Manildra, Meranburn, Bunbury, Moura, Bindogandri, Parkes, Tichbourne, Daroobalgie, and Forbes.

The

The station yards are in progress, and contract plans are being prepared for the buildings. Trucking yard sidings are provided at Parkes and Forbes. The necessary water supply is provided for at Meranburn, Parkes, and Forbes.

The following works authorised by Parliament have been put in hand:—

Marrickville to the Burwood Road Railway, 5 miles.

Cootamundra to Temora Railway, 38 $\frac{3}{4}$ miles.

Marrickville to the Burwood Road Railway.

The works are for a double line of railway.

This line branches from the Illawarra Line just beyond Marrickville Station, at 3 miles 23 chains from Sydney; thence it sweeps round to the right, in a westerly direction, crossing Meek's and Illawarra Roads on the level; under Livingstone and Wardell Roads; over Terrace Road, and thence, skirting Cook's River, passes under Garnett-street, Cross, Sugar House, and Canterbury Roads, through Canterbury; thence across Cook's River and over Wairoa-street; under Beamish Road, to the terminal point at Burwood Road.

Terrace Road and Wairoa-street will be crossed by bridges with steel superstructure resting on brick piers.

Cook's River will be crossed by a bridge, consisting of four spans of 60 feet each. The superstructure is of steel, the piers are of cast-iron, and the abutments are of brick.

A contract for the general works was let to Messrs. Proudfoot & Co. on the 14th July, since which some progress with the earthworks has been made.

This railway will have a double line of rails throughout. Designs for station arrangements and buildings are well in hand.

The value of work done at the end of the year was £11,000, or 15 per cent. of the value of the contract.

The contract time for completion is 14th January, 1894.

Cootamundra to Temora Railway.

This railway branches off from the Great Southern Railway at the north end of Cootamundra Station, 252 miles 74 chains from Sydney, and runs in a north-westerly direction as far as 265 miles; thence westerly, over Noonan's Creek, through the village of Stockinbingal and across Bland and Narraburra Creeks, to the township of Temora, the terminus, at 291 miles 63 chains from Sydney.

A contract for this line was let to Messrs. Baxter and Saddler on 7th July, 1892.

The earthworks are light in character. The works have been pushed on in a vigorous manner, the earthworks and bridges being very nearly completed.

The greater part of the permanent-way is laid.

Sites have been chosen for stations at Bauloora, Yeo Yeo, Stockinbingal, Gundibindyal, Combaning, and Temora.

The value of work done at the end of December was £43,000.

The time for completion of this work is 31st December, 1893, but the contractors have undertaken to finish in August.

The field staff employed in connection with railway construction consists of an average of eighteen officers, divided as follows:—Supervising engineers, 8; resident engineers, 7; engineering assistants, 3.

RAILWAY SURVEYS.

THE following is a report of the railway survey work done during the year 1892, the mileage given being that for the year only:—

Lismore to the Tweed Railway Feeders.

Trial surveys of six of these short lines were completed during the year. The work was suspended in the latter part of the year to enable the surveyor engaged on them to undertake the Pearce's Creek to Ballina survey. The aggregate length of those done is 23 miles.

Pearce's Creek to Ballina.

A trial survey has been commenced from Ballina, working towards Pearce's Creek. Length completed, 4 miles.

Tenterfield to Casino.

This trial survey which was begun in the previous year, and is an amendment of a former one in order to improve grades and lessen works, has been completed. It extends from Tenterfield to a point on the amended Grafton to Lismore Line at Mongogerie Creek, about 12 miles south of Casino. The length surveyed during 1892 is 47 $\frac{3}{4}$ miles.

Glen Innes to South Grafton.

The upper or western portion of the permanent survey was amended in 1891 by a flying survey *via* the "Red Range," down to about 30 miles from Glen Innes, principally to reduce grades from 1 in 33 to 1 in 50. This year thirteen smaller deviations as trial surveys have been made on the lower portions at various points to reduce works, ease gradients from 1 in 40 to 1 in 50, and to improve approaches to South Grafton. The aggregate mileage of these thirteen amendments is 16 miles 57 chains.

Guyra to South Grafton.

This trial survey, which had been nearly finished at the close of 1891, was completed in 1892. Some amendments on it to reduce the grades to 1 in 60 on the portions between Glenrigh and South Grafton, which is common to it and the North Coast Line, were subsequently made. The length of line surveyed in the year was 14 miles.

North Coast.

The amended trial survey of this line from Taree to Glenrigh, the portion from Glenrigh to South Grafton having been included in the Guyra to South Grafton trial survey, has been completed. The length, including deviations, was 133 miles.

Glen Innes to Inverell.

The flying survey of a proposed alternative route *via* King's Plains was finished in January. Length of the deviations surveyed, 12 miles.

Tempe to Long Nose Point and Glebe Island.

The trial survey of an alternative line crossing the present suburban railway at Stanmore has been begun from Tempe, on the Illawarra Line, to a point on the original trial line near the Long Cove Bridge. A branch from this to Glebe Island is being included. Length complete, $7\frac{1}{2}$ miles.

Monaro to Eden, *via* Big Jack Mountain.

A trial survey has been commenced from Cathcart, on the Candelo route, down the Big Jack Mountain, and passing through Burragate till it joins the Bondi-Pericoe route, near Sturt, the object of which is to shorten and cheapen the line by concentrating the steepest gradients in one length by means of a rack railway down the mountain, on which portion a maximum grade of 1 in 12 has been obtained. Length completed, $26\frac{1}{2}$ miles.

Monaro to Eden, *via* Cathcart and Candelo.

The flying survey of an alternative route to connect the Monaro district with the coast, as proposed by Mr. Darragh, is in progress. The work completed only comprises the difficult portion, or main descent. The connection of the survey with Bombala is in hand. Length completed, 26 miles.

Monaro to Eden, *via* Bondi, Pericoe, and Sturt.

The amended trial survey of this line has been completed. Length surveyed during the year, $54\frac{1}{2}$ miles.

Monaro to Eden, *via* Wolumla Spur.

A trial survey of Mr. Postle's suggested route to connect Cathcart on the Candelo route and Wolumla on the permanently staked line from Eden to Bega has been commenced, and nearly completed. Length to date, $33\frac{1}{2}$ miles.

Eden to Bega.

A modification of the permanently staked line has been made through the town of Eden, altering and improving the position of the station site, and in order that suitable connections could be made with the trial lines from Bombala to Eden, *via* Pericoe, and Sturt or Big Jack Mountain. Length, 4 miles.

Dargan's Creek to Eskbank.

A trial survey of a proposed deviation to cut out the great Zig-zag was commenced, but before anything beyond preliminary work was done, the surveyors in charge of the work were recalled.

Gregra to Cudal.

A trial survey from Gregra, on the Molong to Parkes and Forbes Railway, to Cudal, was commenced, and was in progress at the close of the year. Length completed, 10 miles.

Gulgong to Coonamble and Walgett.

The revision of a former trial line has been in progress during the year, that portion between Coonamble and Walgett having been completed, and the rest is in hand. Length revised, $149\frac{1}{2}$ miles.

Gulgong to Coonamble, *via* Mount Stewart.

A trial survey of an alternative line to part of the above has been begun, with the object of the construction of a line through a district considerably to the east of the country proposed to be served by the line referred to in the preceding paragraph, and also to tap the Mount Stewart Mines. Length completed, $30\frac{1}{2}$ miles.

Dubbo to Coonamble.

An amended trial survey of this line has been commenced during the year. Length completed, $30\frac{1}{2}$ miles.

Dubbo to Parkes.

The amended trial survey, *via* Peak Hill, Alectown, and Mingelo, commenced in the previous year, has been finished. Mileage for the year was 27 miles.

Warren

Warren to Coonamble.

A trial survey has been commenced. Length completed, $21\frac{1}{2}$ miles.

Byrock to Brewarrina.

An amended trial survey to lighten works and improve the position of the line as regards floods was begun and completed during the year. Work done, $58\frac{1}{4}$ miles.

Jerilderie to Berrigan.

A trial survey of 25 miles 60 chains for a line to connect the grain districts of Berrigan with the railway system has been completed.

The Rock to Murray Hut.

The trial survey of this line, begun in 1891, was completed in June, 1892. The length completed in the latter year was 87 miles.

Murray Hut to Tocumwal.

This trial survey, which is an extension of the above to the Murray River, was begun and completed during the year. Length, $14\frac{1}{4}$ miles.

The staff employed in connection with Railway surveys consists of an average of forty officers, divided as follows:—Engineer and assistant engineer, nineteen surveyors, and nineteen draftsmen.

The following field work was carried out by the surveyors.

Preliminary Exploration.	Preliminary Traverse.	Preliminary Levels.	Trial Surveys.	Trial Levels.	Trial Check Levels.	Trial Survey Cross Levels.	Detail Trial Survey.	Inspections.

TRAMWAYS.

The following works have been completed during the year:—

Tramway from—

Yass Railway Station to town...	miles.	chains.	
			2	73	S. track
Forest Lodge to Balmain...	1	58	" "
Merton-street to Gladstone Park, Balmain	1	16	" "

The following are still in progress:—

Lane Cove Road Extension	0	60	D track.
Newcastle to Merewether	2	28	S "
Newcastle to Tighe's Hill...	2	23	" "
Military Road, North Sydney	2	11	" "
King-street to Ocean-street Cable	2	30	D "

Yass Tramway.

This line connects Yass Railway Station with the town of Yass, a distance of 2 miles 73 chains, single track.

The whole of the works were completed, and the line was opened for traffic, on 20th April. Messrs. Kerr and Cronin's contract for the construction of the line was completed on the 1st July, 1891, the amount of their contract being £13,156.

Mr. M'Master's contract for the superstructure of the Yass Bridge was completed on the 8th April. Amount of contract, £5,412.

Messrs. Thomson and Bates completed their contract for the station buildings, goods-shed, &c., which were handed over on the 8th April. Amount of contract, £1,224.

Messrs. Taylor and M'Clure completed their contract for the engine and carriage shed, the building being taken over on 8th April. Amount of contract, £1,520.

The total cost of the line, including bridge, station buildings, permanent-way material and water supply, &c., was £27,818.

Forest Lodge to Balmain.

Messrs. Taylor and Bowden's tender for the construction of this line, which is 1 mile 58 chains in length, was accepted, and work commenced on 26th May, 1891; the line was opened and ready for traffic on 22nd April, 1892.

Amount of contract, £6,743.

Owing to the intended conversion of Johnston's Creek into a stormwater channel it was considered advisable to abandon the original design for crossing this creek, and substitute an iron bridge on concrete abutments, with a clear span of 60 feet. The contract for the supply and erection of this bridge was let to Mr. Geo. Davidson on the 12th November, 1891, and was completed, and tested on 22nd April. The amount of the contract for this bridge was £1,874.

The total cost of this extension, including permanent-way material, &c., was £23,133.

Merton-street

Merton-street to Gladstone Park.

Work on this line, which is an extension 1 mile 16 chains in length, of the Forest Lodge to Balmain tramway, was commenced on 22nd August, and the line was completed and opened for traffic on 20th October.

The amount of Messrs. Taylor and Bowden's contract was £2,764, and the total cost of the line, including permanent-way material, was £4,655.

North Shore to Lane Cove Road Cable Tramway.

This is a length of 60 chains of double track in continuation of the present cable tramway along Miller-street and Falcon-street to its junction with Lane Cove Road. Mr. Justin M'Sweeney's tender, amounting to £17,439, was accepted, and work commenced early in May, 1891. This contract has been practically completed for some time past, but in consequence of the new motive power not yet being available, could not be opened for traffic.

Tenders were invited, and that of Mr. Christopher Robinson accepted at the beginning of the year for a cable storage-shed. The work was completed, and handed over by the 1st April, the amount of the contract being £345.

Messrs. Hudson Bros. (Limited) were the successful tenderers for the power plant and driving gear, the amount of their tender being £9,351. Work was commenced early in February, and had progressed favourably up to the end of the year.

Messrs. Grant and Mathison's tender for the addition to the power and car house was accepted, and work commenced about the middle of July. At the end of the year this contract was practically finished; the amount of Messrs. Grant and Mathison's tender was £3,203.

Newcastle to Merewether.

Tenders for this work were invited, and that of Messrs. Walters and Smith was accepted at £7,324 in December, 1891. Work was commenced on 9th January, and at the end of the year the line which is 2 miles 28 chains in length, single track, was almost completed. Some trouble arose through a somewhat serious subsidence in Melville-street, but this has now been overcome, and has, to all appearances, now ceased.

As no decision has been arrived at regarding terminal accommodation in the city of Newcastle, this line, though almost complete, cannot be taken out of contractor's hands.

Newcastle to Tighe's Hill.

Mr. Stanley F. Stokes' tender amounting to £9,238, was accepted for the construction of this line, which is 2 miles 23 chains in length, single track, together with the erection of an iron bridge over Tighe's Creek. Work commenced early in June, and at the end of the year there was every prospect of the work being completed within the contract time.

The remarks with regard to terminal accommodation in the city of Newcastle for the Merewether tramway, apply also to this extension.

Military Road, North Sydney.

Mr. Justin M'Sweeney was the successful tenderer for the construction of this line, the amount of his tender being £5,509, for 2 miles 11 chains, single track. Work was commenced early in October, and progressed favourably up to the end of the year. There is every prospect of the line being completed well within the contract time.

Newtown Bridge to Cook's River.

Plans and specification were prepared, and tenders invited, for the extension from St. Peter's Bridge to Cook's River, but up to the end of the year none had been accepted.

King-street to Ocean-street Cable Tramway.

An Act to sanction the construction of a cable tramway from King-street, *via* William-street, in the city of Sydney, to Ocean-street, in the Borough of Woollahra, was assented to on the 16th March, 1892.

This line having a double track, starts from the foot of King-street, and passes up that street to the open ground surrounding the Queen's Statue, whence it proceeds, *via* College and Boomerang Streets, to William-street, passing along William-street, by a double track, until the top is reached. The down track is laid in Bayswater Road, or Upper William-street North, and the up track in Upper William-street South, these two thoroughfares being too narrow for a double track. Opposite Roslyn-street the two tracks join again, and thence there is a double track along William-street East, or New South Head Road, to Ocean-street, Woollahra, where it is at present proposed the terminus shall be situated.

Ministerial instructions to prepare plans and specifications for the various works in connection with this line were received on the 21st April, and on 1st July, tenders were invited for the manufacture and supply of wrought and cast-iron work, Messrs. Souter and Martin's tender, amounting to £8,555, being accepted on the 12th August. This contract consists mainly of the supply of cast-iron tube frames, manholes, and wrought iron tie-bars. Meanwhile, a contract was let on the 1st of June to the Eskbank Ironworks for the supply of slot-beams, fish-plates, and guide-bars; the whole to be manufactured within the Colony. Some little trouble was at first experienced with the rolls not turning out a good section of slot-beam, but this difficulty was soon got over, and the delivery kept up to all requirements.

The amount of the Eskbank Ironworks contract is £7,959.

On the 20th June, tenders were invited for the construction of the permanent-way, only eight weeks after instructions had been received to prepare plans, which were advertised to be ready by the 22nd July.

Mr. Justin M'Sweeney's tender for the construction of the permanent-way, amounting to £36,534, was accepted on the 8th September, and work commenced near Rushcutter's Bay on the 10th October, which progressed favourably up to the end of the year.

Mr. M'Sweeney has sublet the supply of the wrought and cast-iron work and cast steel under his contract to Messrs. Hudson Bros. (Limited), who are carrying out this portion of the work very creditably.

On the 2nd November approval was given for £7,000 to be spent on increasing power plant, and driving gear for the proposed extension from Rushcutter's Bay to Paddington.

Approval was given on the 29th November for the construction of a loop at the top of William-street to cost £2,000.

Approval was also given just previous to the end of the year, for the expenditure of £13,000, in additional power plant, and buildings for the proposed extension to Rose Bay.

Up to the end of the year, however, nothing further had been done with regard to these extensions, or the proposed extension along Day-street to Erskine-street.

Contracts for the supply of Permanent-way material.

Arrangements were made for the Railway Commissioners to manufacture, in their workshops, at Redfern, sixteen sets of points and crossings, which were required for various extensions.

In June, the drilling of 10 miles of 60-lb. 30-foot rails required for tramway purposes, was commenced in the Redfern shops.

Early in July a contract was let to the Eskbank Ironworks, for the manufacture and supply of 600 tons of guard rails, at £11 5s. per ton. Amount of contract, £6,750; the contract entered into during 1891, for the supply of 600 tons at £11 17s. 6d., having been completed at the end of May.

Messrs. Hudson Bros. (Limited) were the successful tenderers for the manufacture and supply of 72,000 guard rail bolts, the amount of their tender being £1,150, this contract is still in progress.

Surveys and Reports.

Besides field and office work in connection with the foregoing contracts, the permanent survey has been completed, and plans and specifications prepared of the following proposed extensions:—

Bondi to the Beach, Regent-street, Redfern, and Five Dock to Abbotsford. Plans and specifications were also prepared for engine and car sheds for termini at Abbotsford, and the Spit, Military Road Tramway.

Reports and trial surveys were made also of the following proposed lines:—Mitchell's Road, Alexandria; Parramatta to Castle Hill; Newcastle City extension, *via* Scott-street; Buena Vista to the Spit; Falcon-street to the Spit; Enfield to Druiitt Town, *via* Liverpool Road; Rushcutter's Bay to Paddington (cable); Stockton to Salt Ash; Campbelltown to Appin, and the extension of the King and Ocean-street Tramway to Rose Bay, and *via* Day-street to Erskine-street.

(VI.)

Harbours and Rivers and Water Supply.

REPORT OF THE ENGINEER-IN-CHIEF FOR HARBOURS AND RIVERS
AND WATER SUPPLY.

Sydney, August, 1893.

I SUBMIT herewith for the Minister's information a summarised statement of the principal works carried out by the Harbours and Rivers Branch during the year 1892.

For convenience, the works are divided into three heads:—

- (a) Works for the improvement, maintenance, and convenience of navigation.
- (b) Water supply (gravitation or pumping).
- (c) Works not comprised under the above heads.

Dealing first with head (a), and commencing at our most northern work.

Tweed River.

The principal work done on this river during 1892 consists of the construction of training-walls, which form a portion of the scheme which I prepared for the improvement of the navigation of the river and entrance.

The amount of stone quarried and deposited in the training-walls or dykes was 46,523 tons, and the length of wall constructed 7,283 feet. The dykes are 3 feet above high water, and 5½ feet wide on top. The cost of this work, including every expense, together with interest and depreciation on cost of plant, amounted to the comparatively low rate of 2·09s. per ton.

Two quarries have been opened, in both of which the stone has proved sound, hard, and durable. The work was carried out by day labour, an average of 45 men being employed, and the expenditure for the year was £6,876 9s. 2d. As the training-walls proceed the sand-pump dredge "Actor" has been employed dredging out a channel parallel with the walls, and depositing the sand behind them, leaving a depth of 10 feet at low water where formerly there was only about 2 feet. The undoubted success, and the expeditious and economical manner in which this work has been carried out, has been a source of much gratification to me.

The lesser works which have been carried out on the Tweed during the year are the construction of five punts, clearing a road to Byangum Wharf, repairs to this wharf, construction of wharf at Stott's Creek, and a passenger jetty at the Tweed Heads. The cost of these works was £668 5s. 1d.

Some slight repairs were also made to the Fingal Light-house.

Brunswick River.

The construction of a cottage and signal flagstaff was undertaken at the Heads in 1892, and the expenditure on this work at the end of the year was £498 8s. 11d.

Byron Bay.

The jetty was repaired and the mooring buoys relaid, at a cost of £208 16s. 3d.

Richmond River.

Northern Breakwater.—The principal work here has been the construction of breakwaters and dykes at the entrance, in accordance with a design by the late Sir John Coode, for the improvement of the navigation. To obtain stone for the works two quarries have been opened—one on the northern side of the entrance, immediately inside the bar, and the other at Riley's Hill, on the right bank of the river, 19 miles up stream. The amount of stone quarried and deposited in the northern breakwater was 41,310 tons. The head was advanced 445 feet, making the total length of breakwater 1,586 feet. The work was done by day labour, at a cost of 3·04s. per ton, an average of 48 men being employed. The expenditure for the year amounted to £6,755 4s. 5d.

Southern Breakwater.—The stone for this breakwater was brought in punts from Riley's Hill, 37,166 tons being placed in the work during the year, and a length of 3,215 feet completed to high-water level, at a cost of £10,868 11s. 3d., or 4·62s. per ton. The work was carried out by day labour, 74 men being employed.

North Creek Guide Wall.—A contract was let to Messrs. Kerle and Kerle for this work, and 2,471 tons of stone were deposited at 3s. 9d. per ton, the total cost being £463 6s. 3d. The stone was obtained from the banks of the North Creek.

Snagging Richmond River and its Tributaries.—Seventeen men and two punts have been employed on this work. The removal of obstructions deposited by floods is a necessary work, the towns of Lismore and Casino being largely dependent upon the navigation being maintained. The expenditure on this work was £2,373.

Dredging.—The dredging operations on the Richmond are fully set out in the Superintendent's report on that subject.

Wharfs and other works.—Lismore wharf has been extended 156 feet, and raised 3 feet, at a cost of £1,247, and £77 expended on repairs to the old portion. Two wharfs, 65 ft. x 22 ft., were erected at the Heads, and £1,147 spent on this work during the year. 120 feet of wharfage were constructed at Riley's Hill, the cost being £1,022. A bridge has been commenced across the North Creek 434 feet in length, with an opening of 26 feet and 20 feet headway, sufficient for punts and small steamers. The payments made during the year amounting to £1,192.

Wharf at Steve King's Plains.—A wharf, 21 ft. x 16 ft., was constructed, which cost £200.

Wharf at Codrington.—This wharf, which is 21 ft. x 47 ft., was completed at a cost of £64.

A cottage for the Pilot's boatmen was built at the Heads. A shed at Coraki, and general repairs made to the wharfs on the river, the total expenditure on these works being £451.

Clarence

Clarence River District.

Clarence River District.—The principal work in this district for the year was the construction of a line of railway from Green Point to Freeburn Island, about 5 miles in length, for the purpose of conveying the stone to the breakwaters and training walls, on the south side of the Clarence entrance, and is in connection with the carrying out of a scheme for the improvement of the entrance recommended by the late Sir John Coode, and modified by the Public Works Committee. The new quarry is proving satisfactory. The payments made in 1892 amounted to £6,800.

Removing Rocks, Clarence River.—For the improvement of the navigation of the river £1,620 have been spent in removing 8,364 tons of rock from the channel at Lawrence, Maclean, and in the South Arm.

Wharf at Clarenza.—A wharf was erected at Clarenza for £177, and £150 was spent in snagging Mangrove Creek.

Woolgoola Jetty.—This jetty, which is 1,560 feet in length, was completed during 1892, the expenditure in that year being £3,397.

Coff's Harbour Jetty.—This jetty which is similar to that at Woolgoola, but 1,640 feet in length, was also completed during the year; the payments made in 1892 being £4,767. A steam derrick crane was erected near the end of each wharf for loading vessels.

Macleay River District.

Bellinger River Entrance.—A contract was let for the construction of a half-tide training wall at the Bellinger River entrance, and an expenditure of £409 incurred on this work which has since proved very satisfactory, there being nowhere less than 10 feet of water alongside the wall. Before commencing this work some doubt was felt as to the possibility of obtaining material in the district for the construction of the wall; the result, however, has exceeded our anticipations, and stone of a very fair quality for inside work is being obtained.

Nambucca River.—The principal work on this river was the dredging done by the sand pump dredge "Alesus," at the entrance. See Superintendent's Report (page 30).

Macleay River.—On this river repairs have been made to Frederickton, Smithtown, Belmore River, and Green Hills wharfs, at a cost of £312.

Training Wall at Rudder's Hill.—A survey was made and a scheme prepared for the construction of a training wall at Rudder's Hill with a view of concentrating the whole of the flood and tidal waters upon the bar instead of allowing it to flow to sea through five different entrances as it now does. This is a very necessary and urgent work if the navigation of the Macleay is to be maintained.

Trial Bay Harbour of Refuge.—The breakwater at Trial Bay, which is in course of construction by prison labour, was extended 80 feet during the year, the total length then being 366 feet; 31,915 tons were deposited at a cost of £5,124. I expect shortly to have the new 30-ton crane (purchased for Trial Bay) in full working order, when very much larger blocks of stone will be used in the breakwater. The quarry is not improving, and if funds would permit I should like to open up a new quarry on the main road about half-a-mile from the breakwater, where excellent stone is showing.

Smoky Cape Light-house.

An expenditure of £87 10s. was incurred in completing Smoky Cape Light-house. This light is of the first order, dioptric, triple flashing, white. It is at an elevation of 450 feet above the sea, and is visible 27 miles.

Hastings River.

The only work on this river was the dredging operations, for which see Superintendent's Report.

Newcastle District.

Manning River.—Dredging operations only.

Port Stephens.—A sum of £1,581 5s. 10d. was expended on the construction of fascine banks and reclamation for the improvement of the navigation in the Myall River, training banks of fascine construction being formed, behind which the sand excavated from the channel alongside is pumped.

Newcastle Harbour Improvements.—The principal works under this head were the removal of a large quantity of rock, deepening the harbour and inner basin, and reclaiming about 20 acres of land with the sand pump dredge. The Lobnitz Company's rock excavator "Poseidon" started in September, and did good work up to the end of the year, and the rock drill punt "Cliona" excavated a channel 100 feet wide and 25 feet deep between the dyke and the A. A. Company's land.

Wharfs, &c.—Wharfs were constructed at Hexham and Swan Reach. The Newcastle wharfs and life-boat shed repaired, a landing stage at Hinton, and an approach to Woodville wharf, were also completed, the total cost being £1,754.

The Newcastle office has also under its charge the working of the electric installation for Bullock Island, and the pumping engines for the hydraulic cranes. The Hunter River District Water Supply scheme was also worked by the Newcastle office until July, 1892, when it was handed over to the Board. Expenditure during the year, £439 12s.

Sydney and Southern Districts.

Circular Quay.—New jetties were erected at Circular Quay for the North Shore Ferry Company and Watson's Bay Ferry Company. The wharf on the western side was extended, and general repairs to the other wharfs carried out, costing in all £4,522.

Darling Harbour.—Two jetties, with landing pontoons, sheds, and offices, for the Balmain Ferry Company, were erected at Erskine-street; cost, £5,064. A 15-ton steam crane was erected on the Pymont wharf, and extensive rock excavations made between the two jetties there, leaving a depth of 28 feet at low water. The expenditure amounted to £3,287.

Murray,

Murray, Murrumbidgee, and Darling Rivers.

A wharf, shed, and cranes have been erected at Moama at a cost of £1,365, and £269 has been expended on the improvement of the above-mentioned rivers.

Dredge Service Contracts.

Contracts were let for the supply of eighty-four delivery pipes for sand-pump dredgers.

Two steel boilers for sand-pump dredger, No. 6, were completed by Mort's Dock and Engineering Company in April, 1892, the cost being £1,700.

A contract for a coaling punt for the Macleay River, 85 ft. x 27 ft. x 5 ft. 4 in., was let to Mr. Davis for £558, and was completed on the 6th June, 1892.

A contract was let and completed for the supply of compound steam engines, auxiliary pumping engine, and surface condenser, for a Von Schmidt dredger. The principal dimensions being:—Main engines: high pressure cylinder, 18½ in.; low pressure cylinder, 36 in.; stroke, 24 in. Auxiliary engine: cylinder, 9½ in.; stroke, 21½ in.; air pump, 14 in. diameter, 12½ in. stroke; circulating pump, 10½ in. diameter, 12½ in. stroke; feed and bilge pumps, 4 in. diameter, 12½ in. stroke. Vouchers to the amount of £1,167 were certified for in 1892.

A contract was let for a pair of direct acting compound non-condensing engines for a steamer required for the dredge service. High pressure cylinder 7 in., low pressure 11½ in., stroke 12 in.; cost, £225.

A contract was let to Mr. G. Higgins for the supply of Von Schmidt Dredging Machinery to be manufactured in New South Wales, capable of dredging to 24 feet below low water, and fixing the same on a hull provided by the Government. The principal parts of this dredge are, centrifugal pump, diameter 7ft. 6in., telescopic suction pipe, a rotary wheel and cutter, a table and table traversing gear, spuds and gear for working them, and delivery pipes for each side. The engines and boilers were fixed on board the vessel by the Government. The expenditure during 1892 was £2,215.

A contract was let to the Atlas Company for compounding and otherwise improving the engines of the dredger "Samson." The dimensions of the new cylinders are 11 in. and 22 in. diameter and 36 in. stroke. £397 7s. 6d. was paid in 1892 on account of this work.

A contract was also let for two steam ladder-hoisting winches for the "Samson" at a cost of £298.

A contract for 25 ball and socket pipes for the Von Schmidt Dredger was let to Mr. Higgins, but no payments were made during the year.

Fitzroy Dock Establishments, Cockatoo Island.

Hitherto iron has been almost exclusively used for dredge, steamer, and punt building, at the Fitzroy Dock works; but, during 1892, an experiment in wood construction has been tried with gratifying results, the dredge "Groper," 115 ft. x 50 ft. x 9 ft. for the Von Schmidt suction machinery, having been expeditiously built by the Dock shipwrights. One of the boilers for the "Groper" was made at the works, the engines were fitted on board, and the vessel was completed at the Dock after Mr. Higgins' pumping and cutting mechanism was fixed. Eight pontoons for the "Groper" were built at the island, and much shipwrights' work done at H.M.S. "Curacoa" and "Cordelia," and H.M.C.S. "Wolverene," and at the "Jupiter," "Orestes," "Rhea," "Ceres," "Dawn," and to several punts attached to the various dredges.

Large anchor boats were built for the suction dredges, and much of the woodwork for the "Dicty's" was prepared during 1892. The "Thetis" was fitted with additional passenger and bridge accommodation.

In the shipbuilding, boilermaking, and fitting branches much activity was displayed. An iron hopper barge to carry 330 tons was built for the dredge "Hunter," and two smaller iron ones for grab dredges.

The dredge "Archimedes," well was widened, to suit larger buckets, the vessel was cut and lengthened, a new boiler was fitted, new buckets made, and the engine and machinery overhauled.

Important alterations were made to the dredge "Samson." The hull was strengthened by having new plates and frames substituted for defective ones, and the whole forward part of the vessel was increased in beam by 8 feet, to ensure stability and carry more weight. New boilers were made, and the ladders were repaired and hung independently of the shafts.

Extensive renewals were carried out with two of the oldest hopper barges, and others were strengthened and adapted for carrying more silt. More than the usual number of ladder dredge buckets were made during the year, many of them with steel backs.

The work of building the rock-breaker, "Poseidon," begun in 1891, was completed in 1892, and the machinery was fitted on board.

New large grab buckets were made for the 15-ton crane, and the ordinary grabs for the various Priestman cranes were repaired. Repairs were effected to the machinery, hull, and boilers of the "Rhea," "Orestes," "Ceres," and "Ajax," and new centrifugal pumps made for "Neptune" and "Juno."

Considerable progress was made with the "Dictys," and much work done for Garden Island and country towns water supply.

The vessels docked are tabulated in a return hereunder:—

RETURN of vessels docked in Fitzroy and Sutherland Docks during the year 1892.

	Sutherland Dock.	Fitzroy Dock.	Total.
Number of vessels docked	41	49	90
Tonnage	65,909 tons.	15,566 tons.	81,475 tons.
Actual expenses incurred	£2,004 1s. 9d.	£385 4s. 5d.	£2,389 6s. 2d.
Amount received	£2,479 17s. 3d.	£385 4s. 5d.	£2,865 1s. 8d.

PARTICULARS of vessels docked.

	Sutherland Dock.	Fitzroy Dock.	Total.
H.M. war ships	18	2	20
Foreign war ships	1	1
Private vessels	4	4
Government dredges	5	8	13
" tugs	3	13	16
" punts	10	26	36
	41	49	90

Light-houses.

The construction, repairs, maintenance, and all contract work in connection with the light-houses is carried out by this branch. The principal work during the year has been ordinary maintenance, painting, fitting, and repairing electric bells and signals, and gear for revolving lights. All day-labour work is done by the employees of the Marine Board. There are twenty light-houses on the coast of New South Wales, and the expenditure on them during 1892 has been £619 3s. 4d.

(b) WATER SUPPLY.

(Gravitation or Pumping.)

Sydney Water Supply.

Prospect Reservoir.—The principal works done at Prospect Reservoir were the construction of a gauge-weir on the lower canal, repairs and adjustments necessary for the final completion prior to handing over the works to the Water and Sewerage Board.

A survey of the entire works was also made.

Potts' Hill Reservoir.—The work here consisted of the completion of the reservoir, and sundry minor maintenance works, preparatory to handing over to the Board of Water Supply. This reservoir will store 100,000,000 gallons within 12 miles of the city.

Duplicate 48-inch Main.—The laying of this main from Potts' Hill to Petersham and Crown-street was completed. It is 12.11 miles in length, 5.4 miles of which is laid with wrought-iron rivetted pipes, and 6.71 miles with cast-iron pipes. The former were manufactured in the Colony. Sydney is now supplied by two independent mains.

North Shore Water Supply.

These works were completed and handed over to the Board of Water Supply and Sewerage.

The water gravitates in cast-iron pipes from Potts' Hill to Ryde railway station, a distance of $7\frac{3}{4}$ miles. From Ryde a portion is pumped to a reservoir on Ryde Hill, for the supply of Hunter's Hill and a portion of Balmain. The greater portion of the water is, however, pumped through a wrought-iron pipe, $6\frac{1}{4}$ miles in length, to two service reservoirs at Chatsworth, from which St. Leonards and the adjacent districts are supplied. The pipes are carried over the Lane Cove River by steel cables in two spans of 225 feet each. Cast-iron trunk service mains were laid for the supply of Hunter's Hill and St. Leonards with the necessary branches, &c., for the reticulation to be laid by the Board.

Manly Water Supply.

These works were completed during the year. They consist of a storage reservoir, formed by a concrete dam across the Curl Curl Creek, from which water is pumped about $1\frac{3}{4}$ miles to a service reservoir at a sufficient elevation to command the town, and distributed by the usual reticulation.

Richmond Water Supply.

This work was completed during the year. The water is pumped from the Hawkesbury River to a small reservoir on the left bank, from thence it is conveyed by pipes across the Richmond Bridge to the town, a distance of 3 miles, and distributed by the usual reticulation.

Cootamundra Water Supply.

Completed in 1892. The water is drawn from an infiltration well sunk in the gravel drift near the left bank of the Cootamundra Creek, and thence pumped to a small reservoir on the adjoining hill, from whence it is brought, by about a mile of pipes, to the town, and distributed as usual.

Moama Water Supply.

These works are approaching completion. The water is pumped from the Murray River into an elevated tank, and distributed by reticulation pipes through the town.

Parkes Water Supply.

These works were commenced. The water will be drawn from a well, and pumped a distance of 2 miles to a reservoir commanding the town.

Moss Vale Water Supply.

The survey and plans were completed and works commenced in 1892. The scheme comprises a concrete weir across the Wingecarribee, forming a storage reservoir, from which the water will be pumped $1\frac{1}{4}$ miles to an elevation sufficient to command the town.

Dubbo

Dubbo Water Supply.

The plans for this scheme were well advanced during the year. The works will consist of a large well from which the water will be pumped to a reservoir situated above the town, and distributed in the usual way.

Nowra Water Supply.

The survey was completed and plans well advanced. The scheme is a gravitation one, and embraces a concrete weir across Good Dog Creek, $7\frac{1}{2}$ miles from Nowra, the water will be conveyed in pipes to a service reservoir at an elevation sufficient to command the town.

Jerilderie Water Supply.

The survey was completed and plans were in a forward state. The water will be pumped from Billabong Creek to an elevated tank in the town.

Nyngan Water Supply.

The survey was made in 1892. The scheme embraces an earthen dam across the Bogan, from whence the water will be pumped 2 miles to an elevated tank in the town.

Armidale Water Supply.

The survey of this scheme was completed and the proposal examined and approved by the Public Works Committee. The works comprise a concrete dam across Duval Creek to form a storage reservoir, from whence the water will gravitate, in pipes, a distance of $9\frac{1}{2}$ miles to a service reservoir above the town.

Lithgow Water Supply.

A survey was made to improve the pipe line. The scheme, a gravitation one, was approved by the Public Works Committee. It consists of a concrete dam across Farmer Creek forming a storage reservoir, from whence the water will be conveyed, in pipes, $3\frac{1}{2}$ miles, and distributed in the town by reticulation.

Tamworth Water Supply.

A survey was made. The proposed scheme provides for pumping from a well to a reservoir on high ground and distributing the water by reticulation. The scheme was approved by the Public Works Committee.

Junee Water Supply.

A survey was made for this scheme, which is a gravitation one. It comprises a concrete dam, 40 feet high, across Ulandrie Creek, 20 miles from Junee and 2 from Bethungra, to form a storage reservoir, from which the water will be brought in pipes to Junee and Bethungra. An important feature in the scheme is that it will meet the large requirements of the Railway Department at Junee Junction, besides affording a domestic supply for the town.

Wollongong Water Supply.

A survey was made with a view to reducing the cost of the proposed scheme, which provides for the construction of a concrete dam across the Cataract River, to form a storage reservoir, from which the water will be conveyed in pipes partly laid in a tunnel through the coastal range to a service reservoir commanding the town. The scheme was passed by the Public Works Committee, subject to some reservations as to cost.

Bowral Water Supply.

A survey was made of the proposed gravitation scheme, which comprises a concrete dam across Mittagong Creek, forming a storage reservoir, from which the water will be conveyed to the town in pipes a distance of 3 miles.

Hunter River District Water Supply.

These works were extended by further reticulation, prior to handing over to the District Water Board.

Hillston Water Supply.

A trial shaft was sunk near the Lachlan, with a view to obtaining a supply of water for the town.

Yass Water Supply.

A survey was made and a scheme prepared for supplying the town with water pumped from Yass River by means of power furnished by the fall in the river.

Bathurst Water Supply.

Plans were prepared for a service reservoir to hold 750,000 gallons, and for the extension of the pumping main.

Goulburn Water Supply.

Some slight additions were made to the concrete weir across the Wollondilly River which forms the storage reservoir.

A statement of the expenditure on each work during the year 1892 is attached :—

Country Towns Water Supplies.

EXPENDITURE during 1892.

(c) WORKS NOT COMPRISED UNDER (a) OR (b.)

Newcastle District.

Works for the protection of the banks of the Hunter River at East and West Maitland, Oakampton, and Bolwarra, were carried out a cost of £6,600, of which the Government paid one-half.

Sydney District.

A large amount of reclamation work has been carried out, the principal places being Cook's River, Homebush Bay, Leichhardt, Callan Park, Duck River, Rozelle Bay, Careening Cove, Neutral Bay, and Rushcutters' Bay. The expenditure being £47,838.

In all these works it has been necessary to construct fascine banks or rubble walls to retain the silt deposited on the reclaimed area, and this has given employment to over 300 men. In the Cook's River works alone 10 miles of banks have been completed, with roads all round the water frontage, and a navigable channel dredged from Botany Bay to the termination of Shea's Creek for vessels drawing 6 feet.

In Homebush works 2 miles of fascine banks have been formed, and an area of 500 acres of mud flats are in process of reclamation. The Rozelle Bay work embraces an area of 52 acres, and is enclosed by a stone dyke 1,700 feet long, carried out by contract.

Naval Station, Garden Island.

Good progress has been made with the works in connection with Garden Island.

The large machine shop and attached buildings, covering a space of 248 ft. x 132 ft., and including a machine shop, boiler shop, foundry for iron and brass, forge shop, tool and pattern shops, dynamo room, zincing room, office, engine house, boiler house, &c., were completed, and most of the machines erected ready for work. A portion of the spar shed has been fitted up as a torpedo store.

A contract was let for a large building for the naval and victualling stores. This building, which covers a space of 212 ft. x 128 ft., will be four floors in height, divided into five separate compartments by vertical cross walls with fire-proof doors between each. Hydraulic plant, consisting of engines, accumulator, five hoists, and two lifts, will be provided for taking in and putting out stores expeditiously.

The barracks were fitted with extra stairs and verandahs to give independent access to the officers' quarters on the top of the building. A complete set of latrines were erected in connection with the barracks.

The large 160-ton sheer-legs were erected, together with the hoisting and canting engines for working them, and all got ready for applying the 200-ton test load. Rails and turn-tables were laid for moving goods and machinery about the Island.

The water in front of the existing wharf, as well as in front of the site for coaling wharf, was deepened to 28 ft. at low water by the blasting and removal of a large quantity of rock.

Numerous other smaller works were completed on the Island.

The total sum spent during the year on contracts and day work amounted to £23,773 9s. 4d.

Nautical School Ship "Sobraon."

The work done converting the "Sobraon" into a Nautical School Ship consisted principally as follows (for the year 1892):—

Orlop Deck.—On the orlop deck (which is formed of blue metal ballast, about 4 feet in depth, covered with concrete 9 inches thick, and rendered with cement mortar) there were constructed large storerooms for ship's stores, spare gear, &c., storekeeper's office, three punishment cells, bandroom, crockery store, and sick bay for new arrivals. The sick bay contains thirteen beds, and is provided with every necessary accommodation for patients. A portion of this deck is also used as a lecture-hall.

Lower Deck.—The lower deck was sheathed with Kauri pine, $1\frac{1}{2}$ inch thick, thoroughly caulked, and the insides of the vessel cleaded with tongued and grooved Kauri pine, $\frac{3}{4}$ inch thick, right fore and aft. Large windows were cut in the sides of the vessel for light and ventilation. The lower deck, now usually called the "dormitory" or "sleeping" deck, is capable of giving sleeping accommodation to over 500 boys. The hammock stanchions and rods are portable, and the hammocks can be stowed out of sight, allowing the whole compartment (with an uninterrupted view from stem to stern) to be used for various purposes during the day.

Main Deck.—The accommodation at the after end of the vessel was altered and reconstructed, giving accommodation for the Superintendent and officers of the vessel, also a recreation-hall for the boys. The midship portion of this deck, about 98 feet in length and the full width of the vessel, was converted into a boys' messroom, and furnished complete with tables, seats, mess-racks, &c., giving dining accommodation for 310 boys at one time. The fore part of the vessel on this deck was formed into a school and lecture room; the recreation-hall, messroom, and schoolroom are divided by wooden latticed partitions, extending from deck to deck, and are made to swing and slide towards the vessel's side, forming one large compartment on the whole, when required. All the compartments receive light and ventilation from skylights, trunk-hatches, stair-companions, and large square ports cut in the ship's side. The deck was partly relaid with Kauri pine, 4 inches in thickness, and the whole caulked and made thoroughly watertight.

Upper Deck and Fittings.—The upper deck was partly relaid with American clear pine and Kauri pine, and the whole caulked and made thoroughly watertight. A large companion-house was erected over the main stairway. Bulwark stanchions replanked outside and inside, bulwark rails renewed and repaired, and hammock nettings fitted from poop to forecastle. The deck is approached on either side of the vessel by a strong commodious gangway, well secured, and stayed to the vessel's sides. To secure the gangway platform struts, under the water-line, it was found necessary to dock the vessel.

Poop.—The accommodation under the old poop was entirely removed, the space thoroughly cleaned, relined, and a new deck laid, and an extension of 33 feet made at the forward end. The extended portion of the poop has been formed into a library and armoury, and the after part into a drawing-room. French doors are fitted to the latter, giving easy access to a stern walk 40 feet long and 5 feet wide. On the poop a new house was erected, 28 feet long and 13 feet wide; the forward end covers a gangway leading to the Superintendent's quarters, and the remainder is furnished as an office for the Superintendent of the ship.

Forecastle.—The old forecastle was removed, and one entirely of new material erected. The new forecastle is 110 feet in length and $7\frac{1}{2}$ feet in height, and contains hospital and dispensary, bath-rooms. A galley complete with all modern improvements and hot and cold water service. Cook's store-room and ice-house, seamen's quarters, wash-house with twelve wrought-iron tubs, 6 ft. 4 in. by 3 ft. by 1 ft. 6 in., and one 10 ft. by 5 ft. by 1 ft. 6 in.; each tub is connected with hot and cold water. The floors of all the bath-rooms and wash-house were well tarred and laid with porcelain tiles bedded in cement mortar.

Commodious latrine houses with all the latest sanitary improvements were constructed on each bow of the vessel. They are approached from the forecastle deck by ladders.

The rig of the vessel was slightly altered, the number of yards on each mast being reduced to three; the masts and yards were thoroughly overhauled and repaired, and new fore, main, and mizen tops fitted. The standing rigging was altered and repaired, and entirely new running gear fitted to the yards.

A lightning conductor was fitted to the main royal backstay, extending 4 feet above the main truck to 4 feet below the water-line.

Canvas awnings, supported by wrought-iron stanchions and wooden ridge poles, were erected over the upper, poop, and forecastle decks.

A Stone's navy pump, capable of discharging water through wrought-iron pipes to any part of the vessel for fire extinguishing and pumping the ship, was erected on the main deck. Electric bells and speaking tubes were also fitted to the principal parts of the vessel.

New permanent moorings, complete, with buoy, were laid down off Cockatoo Island, and a permanent fresh water supply from Cockatoo Island to the vessel's tanks. The tanks have a capacity of 5,400 gallons, and are so arranged that the water gravitates from them to any part of the vessel.

All the accessible parts of the vessel were thoroughly examined, cleaned, repaired, and renewed where necessary, painted, whitewashed, or tarred.

The alterations to the vessel were so far advanced on the 8th November that the Department of Public Instruction took possession, and transferred the officers and boys from the "Vernon" to the new ship.

A return of the public works carried out by the Harbours and Rivers Branch during the year 1892 is attached, which shows the expenditure under the several heads in 1892, and also the actual expenditure, if finished.

The report of the Dredge Superintendent on his branch is also forwarded, and a description of the Government wharfs in New South Wales.

C. W. DARLEY,
Engineer-in-Chief for Harbours, Rivers, and Water Supply.

(VIII.)

Report on Dredging by the Superintendent of Dredges.

August, 1893.

To the Engineer-in-Chief for Harbours and Rivers,—

Attached hereto I beg to submit the Annual Report, in detail, of dredging performed during the year 1892, the return furnished in January having, as stated, been only approximate as to cost, owing to some of the vouchers not having been dealt with. For convenient reference I have epitomised, opposite the description of work done, the cost to the Department of doing it.

Tweed River.

Suction dredge "Actor" working eight hours daily, from 1st January, 1892, to 21st February, 1892, and sixteen hours during the remainder of year, dredged and pumped on to reclaimed land 484,800 tons (estimated) of sand, at a cost of 1-685d. per ton.

Although the quantity of sand at the Tweed lifted and put on shore has been great, and its cost little, during the past and portion of the present year, the results in increased channel accommodation have not been as satisfactory as could have been wished, owing to the unprecedented floods having refilled portions of the channels, and otherwise delayed work. It is to be hoped that, with the present finer weather, the long channel made by the "Actor," at Woming Flats, will soon be completed.

Richmond River.

During 1892, ladder dredge "Alcides" dredged 87,200 tons of soft rock and sand, at a cost of 7-679d.

Floods and hard material have brought down the Richmond River dredge "Alcides" record to an exceptionally small output. The plant was employed nearly all the year removing very hard deposit (first shattered by dynamite) opposite Ballina. For a short time dredging was carried on at the crossing. Owing to the lessened work the dredge's tug "Achilles" was set at liberty to tow stone punts for the breakwater, the small launch "Unara" towing for the "Alcides."

South Arm, Richmond River.

Grab "Tau" lifted approximately 86,640 tons of sand, and deposited it alongside channel, at a cost of 1-929d. per ton.

On the South Arm of the Richmond, the grab dredge "Tau" was employed throughout the year (when not stopped by floods) removing constantly accumulating flood deposits. Owing to the impossibility of finding suitable places for dumping the sand from punts the less expensive plan was adopted of dropping the dredgings lifted by a "long jib" crane alongside, and on the bank when practicable.

Creeks, &c., Richmond River.

Grab "Zeta" lifted and deposited alongside 61,985 tons at a cost of 2-926d.

The grab dredge "Zeta" was employed during the year at Broadwater North and Emigrant Creeks.

Similarly to the "Tau," the material lifted was deposited direct from the grab buckets. This dredge was slipped, and underwent an extensive overhaul in 1892.

The grab dredge "Lambda" has been employed as a crane at the south breakwater works.

Clarence River.

Grab dredge "Alpha" dredged 108,525 tons of shingle and sand. Cost 4-64d. per ton, dredging and depositing, 2 shifts, 16 hours per day.

Owing to there not having been a ladder dredge on the Clarence the grab dredges were worked 16 hours daily. The "Alpha" worked at Morgan's Flat, Grafton, Elizabeth Island, Dobie-street Ferry, and Carr's Creek. As it was practicable to deposit the material at a distance from the channels, punts and a tug were employed. The cost of the work was, therefore, higher than grab dredging on the Richmond.

Clarence River.

Grab dredge "Theta" working two shifts, lifted 8,264 tons of blasted rock, at a cost for lifting and depositing (exclusive of blasting) of 38-918d. per ton.

The grab dredge "Theta," temporarily taken from Sydney until the "Jupiter" arrived, was, throughout the year, engaged lifting rock blasted by divers at Argyle Reef and South Arm, Clarence River.

The sand-pump "Jupiter" was sent to the Clarence River early in 1893, and was employed near the reef at the Heads, and at Lawrence, until withdrawn from work for reasons which will be given at the conclusion of this report. The cost of working the "Jupiter" on the Clarence will be furnished in the 1893 report.

Bellinger River.

Ladder dredge "Titan" dredged 49,650 tons, chiefly soft rock and shale, at a cost of 10-131d. per ton.

The ladder dredge "Titan," the smallest of this type, was employed principally upon a soft rocky bar in the Back Creek, near Bellinger Heads, and at Mann's Point, near the steamers' wharf. Since July, 1893, this dredge has not been in commission.

Bellinger River.

Grab dredge "Chi" working eight hours per day lifted 39,510 tons of ballast, stone, and shingle, at a cost of 4-64d. per ton.

Until May, 1892, the grab dredge "Chi" was engaged lifting stone from ballast heaps at the Bellinger estuary for forming the new training dyke at the southern shore of the river heads. The plant was then removed above Fernmount to improve Hyde's Crossing. The result has been most discouraging, the late great floods having filled much of the deepened channel.

Nambucca River.

Suction dredge "Alesus" has during 1892 pumped on to the central bank 303,200 tons (estimated) at a cost of 2-025d. per ton.

The sand pump "Alesus" has throughout the year 1892 been occupied in opening out a navigable channel at Nambucca Heads, from deep water to Stewart's Island. It is to be regretted that funds were not available for constructing a stone dyke to protect the southern side of the new channel; but the precaution has been taken of pumping the sand to a considerable distance over on the central bank, and it is believed that with a little dredging, from time to time, the new channel will, when some rocks are blasted, be a satisfactory one.

Upper Nambucca, Taylor's Arm, &c.

Grab dredge "Iota" dredged with single shift 49,065 tons of quartz, clay, and sand, at a cost of 3-23d. per ton.

The Upper Nambucca and its tributary, Taylor's Arm, have been the working places of the grab "Iota" during 1892. No less than nine flats have been deepened, viz. :—Back Creek, Fleming's, Deveres's, Foster's, Maloney's, Scott's, Welch's, and Bowra Falls, also Garr's Skulk; the rival Progress Committees giving the dredge but little time to effect permanent work.

Macleay River.

Ladder dredge "Fitzroy" dredged 251,210 tons, working single shift, cost 2-238d. per ton.

From January until August the ladder dredge "Fitzroy" worked at the channels near Kempsey, and at Fisherman's Crossing, near the river mouth, until the end of 1892. The floods of this year (1893) have been of such severity that not only has the district been impoverished, to a degree hitherto unknown, but the navigation has been impeded to such an extent that the people of Kempsey fare as badly to-day as they did twenty years ago. The sand-pump "Alesus" is being brought round from the Nambucca to restore the channels near the Heads, while the "Fitzroy" will be employed from Kempsey towards the sea.

At

At Camden Haven River and entrance, the grab dredge "Eta" has during 1892 been employed deepening, with a hired tug in attendance, to tow away punts to suitable dumping areas. The places improved were Kendall Flats, Tea Tables, Watson Taylor Lake, and Camden Haven Heads.

The dredge "Ulysses" has been engaged during 1892 at various shoals on the Manning, viz., Goat Island, Croki, Oxley Island, Church's Flats, Tinonee, Carter's Island, Harrington, and Cundle Passage. During the great flood of 1893 the dredge was swept on shore on Goat Island. Advantage was taken of the mishap to overhaul and paint the hull before launching. Work was resumed three weeks ago.

During 1892 the grab dredge "Beta" deepened portions of the new main channel approved, between Cockatoo Island and Tumcurry; a hired tug was employed, and the material deposited clear of the channels. The withdrawal of the "Titan's" crew has enabled the Department to dispense with the hired tug, the Government tug "Callisto" being now attached to the "Beta." The channel above referred to is not yet completed.

From March until November, 1892, the new sand pump "Dorus" was employed making a channel, much of it through a bed of shells, between Hawk's Nest and Tea Gardens, on the Myall River. Owing to the kind of material dealt with, retaining dykes were dispensed with successfully.

Four miles higher up the river a novel description of fascine dyke had been constructed under Mr. Walsh's supervision, and the experiment of pumping sand behind it by the "Dorus" was looked forward to with keen interest. From November, 1892, until June of this year the sand-pump continued its work of reclamation at the back of the fascine work, which stood the pressure admirably. The "Dorus" has since been removed to Newcastle temporarily.

The grab dredge "Sigma" in 1892 was employed dredging sand, mud, and stone at Tin Pot, Black's Crossing, and Shark's Hole, on the Myall River, and at Booral, Karuah River, and Schnapper Island, Port Stephen. A hired tug was in attendance in 1892, but since January this year the Department's launch "Ariel" from the Bellinger has been the attendant tug.

Year following year the same story has unfortunately to be told of the unending deepening of Newcastle Harbour. No sooner is a channel completed than work is ready at the other end of it, where the dredge had, perhaps, started but a few months before. Great floods and small freshes are alike disastrous in leaving alluvial deposits to be removed. Vexatious as the work is, the Department, by the improvements effected in the Newcastle and Hunter, will be able, without extra three shift work, to cope with it, especially now that the "Dorus" has been put to work to remove the spit above Callan's Slip by pumping the material on to Stockton Beach.

The grab dredge "Delta," besides lifting blasted rock at Newcastle, has removed obstructions on the Hunter and Paterson Rivers, chiefly at ferries; at Hexham, Raymond Terrace, Hinton, Largs, on the Hunter; and at Powell's Rocks and Hoff Island on the Paterson.

Throughout the year the grab dredge "Rho" was engaged lifting rock removed by drilling and blasting at the entrance of the new basin behind the Bullock Island Dyke.

The "Juno" during all the past year was employed enlarging the basin behind the dyke at Newcastle. The material dredged was deposited at a greater distance from the vessel than before, the pipe line having been laid under the main line of rails to permit of the reclamation of the submerged area north of the hydraulic engine-house.

Since June of the present year (1893) the "Juno" has been withdrawn from the basin to perform more urgent work in the main harbour, where the vessel's hopper is being filled by the pump, and the material dumped at sea.

The removal of rocks in Newcastle Harbour, by the Lobnitz rock-breaker, "Poseidon," and by the drilling machine, "Cliona," forms part of work specially reported upon by Mr. Walsh.

The "Minos," worked during all the year deepening Cockle Creek, a tributary of Lake Macquarie, and for a short time was engaged at Swansea. The material lifted was principally stiff clay at the creek, and sand at the heads. Since April, 1893, no dredging has been done upon Lake Macquarie or its tributaries.

In marked contrast to the other principal ports of the East Australian seaboard, Sydney stands unrivalled in the matter of economical maintenance. During the present year, when it became necessary to curtail dredging expenses, the natural advantages of the port stood the country in such good stead that the Department was enabled to halt in the work of improvement, and withdraw temporarily from commission no less than four Sydney dredges, together with the "Thetis" and "Ajax." Throughout 1892 the work of dredging and reclaiming was actively carried on. From January to October the sand pump "Neptune" was stationed at Long Cove, Leichhardt, pumping through a considerable length of delivery pipes on to reclaimed areas material deposited alongside from the Sydney dredges. Later on, the insanitary shores of Neutral Bay were quickly converted into the nucleus of a people's health reserve by material deposited from the "Neptune" pump, and similarly, a lesser area at Careening Cove was, early in the present year, converted from a fever plot to a miniature health imparting park site.

The dredge "Sydney" was chiefly employed deepening Woolloomooloo Bay, and removing the sand spit west of Darling Point, besides removing sewage deposits near various wharfs.

Camden Haven.
Grab dredge "Eta" lifted and deposited 44,625 tons gravel and mud and sand, cost 6'216d. per ton.

Manning River.
Ladder dredge "Ulysses" working one shift dredged 197,960 tons at a cost of 2'509d. per ton.

Cape Hawke.
Grab dredge "Beta" dredged and deposited, with one shift, 44,170 tons, at a cost of 6'102d. per ton.

Myall River.
Suction dredge "Dorus," working on the Myall River, has pumped on shore 296,600 tons of sand, at a cost of 1'974d. per ton.

Myall, Karuah, and Booral.
Grab "Sigma" lifted and deposited 49,265 tons, one shift, at a cost of 4'675d. per ton.

Newcastle.
The dredge "Newcastle" dredged 873,600 tons of mud; cost, with three shifts, twenty-four hours per day, 2'320d. per ton.
Dredge "Hunter," also working at Newcastle, lifted 357,110 tons during seven months, with two shifts, in 1892. The alterations to adapt the dredge to load 500-ton barges and to work deeper occupied five months, and raised the year's cost of working to 5'362d. per ton.
Dredge "Vulcan," working in Newcastle Harbour, two shifts, lifted, during 1892, 452,910 tons, at a cost of 2'938d. per ton.

Grab dredge "Delta" lifted 49,150 tons of sand, gravel, and blasted rock, costing 5'93d.

The grab dredge "Rho" lifted 20,800 tons of blasted rock, at a cost of 10'07d. per ton.

Suction dredge "Juno," working sixteen hours daily, has dredged and discharged on shore 554,600 tons of sand, at a cost of 1'484d. per ton.

Lake Macquarie.
Ladder-dredge "Minos," working eight hours daily, lifted 140,170 tons of stiff clay and sand, at a cost of 4'043d. per ton.

Sydney Harbour, &c., and Parramatta River.
Suction-dredge "Neptune," working two and three shifts, pumped on shore 524,550 tons of silt at a cost of 2'238d. per ton.

Dredge "Sydney" dredged 284,970 tons of sewage, clay, and sand, at a cost of 2'297d. per ton.

The

The "Samson" dredged 143,330 tons of silt and sand, at a cost of 8'431d. per ton.

The "Samson" worked at Pyrmont jetties, and in Darling Harbour, and Woolloomooloo Bay until August, when the plant was laid up to have the dredge fitted with new compound engines and boilers, and to have alterations made in the hull to ensure greater stability in working and economy in dredging.

The "Hercules" dredged 211,860 tons of sand and mud, at a cost of 2'283d. per ton.

The "Hercules," throughout the year, was employed at Rozelle and Blackwattle Bays. The increased work and lessened cost is due to the facilities afforded by the "Neptune" in disposing of the material dredged.

The "Archimedes" dredged 125,785 tons of sand, mud, and shells, at a cost of 6'088d. per ton.

The "Archimedes," after being lengthened, the well widened, and having a new boiler and set of buckets fitted, started working at Rushcutter's Bay at the end of February and afterwards deepened Elizabeth Bay, Double Bay (at the pier), and Long Cove.

The "Charon" dredged 140,015 tons of sand and mud, at a cost of 4'858d. per ton.

The "Charon" was employed deepening near various sewers; also at Neutral and Elizabeth Bays, at Leichhardt, and, towards the end of the year, at the upper part of the Parramatta River reclamation, to facilitate depositing material when the suction dredges are sent to reclaim.

Grab-dredge "Nu" lifted 17,377 tons, chiefly rock and clay, at a cost of 12'285d. per ton. Grab-dredge "Omega" lifted 39,040 tons, at a cost of 3'964d. per ton.

Two grab dredges, the "Nu" and "Omega," have been stationed in Sydney during the past year. The former has been almost wholly in attendance upon divers clearing rock for blasting and lifting blasted rock, while the latter ("Omega") has been variously employed lifting clay, sand, and some rock at Parramatta River, Long Cove, Elizabeth Bay, Pyrmont Bight, Elizabeth, Snail's, and Woolloomooloo Bays.

Cook's River and Shea's Creek. Grab-dredge "Kappa" lifted 122,163 tons, at a cost of 1'896d. per ton. Grab-dredge "Mu" dredged 78,085 tons, at a cost of 1'896d. per ton. Grab-dredge "Omicron" dredged 81,509 tons, at a cost of 2'634d. per ton.

As with the grab "Tau," at the Richmond, the grab dredges at Cook's River and Shea's Creek have been working throughout the year under conditions, as to soft material and uninterrupted dredging, the most favourable. With the long jibs the mud was dumped direct into a shoot or silt-trucks, removed quickly, while for the shorter jib machine an ample supply of punts was provided.

Employment at the reclamation works was (by the dredging) provided for a large number of men in distributing the material lifted, but the cost quoted is for dredging only. The dredges are now withdrawn from Cook's River.

Shoalhaven. Dredge "Pluto" has lifted 210,960 tons, at a cost of 2'230d. per ton.

The ladder-dredge "Pluto" was employed on the various flats obstructing navigation on the Shoalhaven and Crookhaven Rivers, and in the Junction Canal. The dredge is not now in commission.

Moruya River. Grab-dredge "Pi" lifted 47,270 tons of sand, at a cost of 5'557d. per ton.

The grab-dredge "Pi," stationed at Moruya, has been working under unfavourable conditions at Moruya. The shoals near the bar are in water too rough to permit of a punt being loaded alongside the dredge, and it was in view of this that a sum of money was submitted on the Estimates for a sand-pump to be used in the first instance at Moruya.

The whole of the plant has been upheld in the highest state of efficiency, and during no year since dredging started have there been so many improvements effected as during 1892, notably the completion of the lengthening of the "Newcastle," the enlargement of and putting new machinery in the "Samson," building the Von Schmidt suction dredge, lengthening and fitting new boiler to the dredge "Archimedes," and important alterations and repairs to the tugs "Ceres," "Rhea," "Orestes," and "Ajax."

I have, &c.,

A. B. PORTUS.

STATEMENT of Ladder Dredge Expenditure and Work for the Year ending 1892.

Dredges.	Where dredging.	Material dredged.	Tons dredged.	Hours dredging.	Expenditure.	Cost per ton.	Cost per hour.	Remarks.
"Newcastle" ..	Newcastle	Sand and mud	373,600	3,539	£ s. d. 8,346 16 10	d. 2 320	£ s. d. 2 7 2	Working three shifts. Bad weather; 17 days no towing. Under repairs 4 months.

STATEMENT of Sand Pump Expenditure and Work for the Year ending 1892.

Sand pumps.	Where pumping.	Material	Tons	Hours pumping	Expenditure.	Cost per ton	Cost per hour	Remarks.
					£ s. d.	d.	£ s. d.	
"Juno" . . .	Newcastle	Sand	554,600	2,773	3,431 4 0	1 484	1 4 9	Working two shifts.
"Neptune"	Leichhardt, Sydney.	Sand and mud	524,550	3,497	4,892 16 3	2 238	1 8 0	Working two shifts for 4 months, and three shifts for 8 months.

GRAB DREDGES.—Quantity of Silt lifted, and Cost of Work for the Year ending 1892

Grab dredges.	Tons lifted.	Total cost.	Cost per ton	Remarks
		£ s. d.	d.	
"Alpha"	108,525	2,048 5 0	4 640	Dredging shingle and sand at Morgan Falls, Grafton, Elizabeth Island, Dobie-street ferry, Carr's Creek, Clarence River. Under repairs 1 week and 2 days.
"Beta"	44,170	1,123 2 3	6 102	Dredging sand and shells at Cockatoo and Flat Island, Cape Hawke. Under repairs, 7 weeks.
"Gamma"	35,925	1,100 6 7	6 456	Dredging sand, clay, and hard shingle at Andrew's Falls, Port Macquarie, Hastings and Wilson Rivers, Telegraph Point, Wilson River. Under repairs 9 weeks and 5 days; fresh in river 7 days.
"Delta"	49,150	1,123 7 6	5 973	Dredging stone, rock, gravel, and sand, behind dyke at Newcastle, Hinton Ferry, Hogg Island, Powell's Rocks, Largs Crossing, Paterson River, Morpeth, Raymond Terrace, Hexham Ferry, Hunter River. Under repairs 5 weeks.
"Zeta"	61,985	753 16 3	2 926	Dredging sand and mud at North Creek, Broadwater, Ballina, Emigrant Creek, Richmond River. Under repairs 3 months and 13 days.
"Eta"	44,625	1,155 16 8	6 216	Dredging gravel, mud, and hard sand at Kendall Flat, Tea Tables, Watson, Taylor Lake, Camden Haven. Under repairs 3 weeks and 2 days.
"Theta"	8,264	1,168 0 2	33 918	Dredging rock and stone at Argyle Rocks, Maclean, South Arm, Clarence River. River flooded 7 days; under repair 1 week and 4 days.
"Iota"	49,065	660 19 3	3 233	Dredging clay, quartz, and sand at Taylor's Arm, Back Creek, Flemmings' Falls, Bradley's Falls, Devercross Falls, Toohey's Falls, Maloney's Falls, Scott's Falls, Welch's Falls, The Skulks, Bowra Falls. Under repairs 4 weeks, Nambucca River; fresh in river 4 weeks.
"Kappa"	122,168	965 3 11	1 896	Dredging sand and mud at Shea's Creek and Cook's River. Under repairs 6 days.
"Lambda"	12,378	394 13 11	7 652	Dredging hard sand and stone at Port Hacking, North Creek, and South Training Wall, Richmond River. Under repairs 4 months.
"Mu"	78,085	923 19 10	2 867	Dredging mud and sand at Shea's Creek and Cook's River. Under repairs 3 weeks and 3 days.
"Nu"	17,877	915 2 3	12 285	Dredging rock, mud, and stone, at Garden Island, Pymont Wharf, and sundry other places. Under repairs 2 weeks.
"Omicron"	81,509	891 8 6	2 624	Dredging silt and sand at Cook's River. Under repairs 11 days.
"Sigma"	49,265	959 14 6	4 675	Dredging sand, mud, and stone at Tin Pot, Black's Crossing, Shark's Hole, Myall River, Booral River, Karuah River, Schnapper Islands, Port Stephens. Under repairs 3 weeks; moving plant 2 weeks.
"Tau"	86,640	696 7 8	1 929	Dredging sand, snags, and soft rock at South Arm, Richmond River. Under repairs 2 weeks; flood in river 4 weeks.
"Pi"	47,270	1,094 10 10	5 557	Dredging hard sand at Moruya. Under repairs 5 weeks and 4 days; Bad weather 3 weeks.
"Rho"	20,800	873 6 11	10 077	Dredging rock and stone, end of Dyke and No. 12 Crane, Newcastle. Under repairs 1 week.
"Chi"	39,510	764 2 4	4 641	Dredging ballast and stone at Bellinger Heads and Hyde's Falls, Bellinger River. Under repairs 1 month.
"Omega"	39,040	644 18 6	3 964	Dredging sand, clay, rock, and mud at Long Cove, Leichhardt, Parramatta River, Pymont, Elizabeth Bay, Neutral Bay, Snail's Bay, Woolloomooloo Bay. Under repairs 2 weeks.
	996,251	18,359 2 10	4 422

Government Architect's Branch.

REPORT of the Government Architect.

Sydney, 30 June, 1893.

I HAVE the honor to present the following report of the works executed and money expended by this Branch in constructing, altering, repairing, and furnishing the various public buildings during the year 1892:—

The expenditure, which is more explicitly set forth in Section XI. (*see* page 43), is as follows:—

	£	s.	d.
Buildings and Services	286,460	8	2
Furniture	14,126	17	11
Office Expenses (including contingencies)	18,582	0	0
Total	£319,169	6	1

Of the above amount, £161,844 13s. 6d. was paid out of Consolidated Revenue, and £157,324 12s. 7d. from Loan Votes.

The expenditure before-mentioned has been spread over 674 separate buildings and services, from which it will be seen that a large percentage of the Government property, under the charge of this Branch, has in some form or other received attention, and the amount available has been distributed to the utmost extent.

With the exception of one or two trifling matters, there are no outstanding disputes or claims in connection with the above expenditure.

The following is a list of the new buildings finished during the year 1892, and their several costs:—

	£	s.	d.
Clarence-street Lock-up... ..	3,193	11	0
Stamp Office	7,310	16	7
Engineering School	4,880	11	4
Croydon Post and Telegraph Office	435	11	9
Gladesville Hospital for Insane (New Wing)	8,859	7	11
Kogarah Post and Telegraph Office	2,364	16	0
Coast Hospital—Lepers' Quarters	2,190	13	10
Bathurst Police Quarters	4,552	13	3
Broken Hill Post and Telegraph Office	9,711	12	4
Byron Bay Police Station	783	18	0
Hay Court-house	7,423	12	4
Macleay Court-house	2,581	8	2
Minmi Lock-up	1,606	8	0
Mossvale Post and Telegraph Office	3,309	9	2
Newcastle Court-house	14,798	12	2
Parramatta Hospital for Insane (Epileptic Ward)	5,356	14	1
Picton Post and Telegraph Office	2,724	0	11
Port Macquarie Police Station... ..	1,699	8	9
Riverstone Police Station	1,334	2	2
St. Albans' Court and Watch House	2,023	19	3
Temora Post and Telegraph Office	1,876	1	8
Wickham Post and Telegraph Office	1,985	2	8
Wollongong Post and Telegraph Office	3,253	4	10

A large number of buildings have had considerable additions, alterations, &c., effected, as follows:—

Museum	Inverell Lock-up
Parliamentary Buildings	Maitland Gaol
Gladesville Hospital for Insane	Narrabri Police Buildings
Admiralty House	Narrandera Post and Telegraph Office
Coast Hospital	Parramatta Hospital for Insane
Newington Benevolent Asylum	Parramatta Public Buildings
Shaftesbury Reformatory	Wellington Court-house
Bathurst Gaol	Wilcannia Lock-up
Broken Hill Court-house	Young Gaol, &c., &c.
Cooma Court-house	

I have to report that a large number of buildings, particularly in the country, is suffering from want of systematic repair, and in some few cases they have become almost ruinous; and I again venture to press upon the Minister the importance, at the earliest possible moment, of making provisions so that some plan may be arranged which will provide for the external painting at least once every fourth year, and internal painting once every seventh year, together with some provisions to make good the ravages of white ant, and the general results of climatic influence.

During the year the competitive designs for a Lunatic Asylum at Rossville, for which plans were invited in the previous year, were placed before a specially-appointed Board, consisting of Dr. Manning, the Inspector-General of Insane; Mr. Horbury Hunt, President of the New South Wales Institute of Architects, and myself, with Mr. Brindley, Building Surveyor of this Branch, acting as Secretary. Forty sets of plans were submitted, and the labours of the Board, in arriving at a conclusion and recommendation, extended over some three weeks of continuous work.

The Minister adopted the recommendation of the Board, and the following awards were publicly made:—

	£	s.	d.
1. Messrs. Sulman and Power—Premium... ..	300	0	0
2. Mr. John Kirkpatrick	200	0	0
3. Mr. G. D. Payne	125	0	0
4. Mr. J. J. Clark	75	0	0
5. Messrs. Weitzel and Mackinnon—Premium	50	0	0

During the year the Minister, on obtaining Parliamentary sanction, proceeded with the completion of the Sydney Hospital in Macquarie-street, appointing Mr. John Kirkpatrick as Architect, who subsequently contracted with Mr. A. M. Allan for the execution of the works for the sum of £64,911.

In accordance with instructions of the Minister, based on the Sydney Hospital Completion Act of 1892, the designs were placed in my hands for report before receiving the approval of the Minister.

I have been able, with the approval of the Minister, to definitely organize the various country districts, and their district inspectors and local officers, during the year; Mr. Laing retiring from the Grafton district and Mr. Clubb from Armidale.

The system adopted in connection with the country inspections is working satisfactorily, and such arrangements have been in operation during the year as to enable the district inspectors to avail themselves of the services of metropolitan clerks of works or assistants temporarily on works in course of erection in their several districts.

The districts, with their officers, are as under:—

1. Bathurst—Mr. W. Roberts	4. Goulburn—Mr. J. W. Dowell
2. Albury—Mr. J. T. Thorne	5. Armidale—Mr. S. Herbert
3. Newcastle—Mr. S. Rigg	6. Grafton—Mr. E. FitzGerald

The coastal district, from Bateman's Bay southward to Twofold Bay, is supervised by Mr. A. T. Brindley, the building surveyor, stationed in Sydney, and the Broken Hill district by Mr. J. MacGregor.

The office staff at the close of 1892 was comprised as follows:—

<i>Professional.</i>	<i>Clerical.</i>
The Government Architect	Chief Clerk
Principal Assistant Architect	Accountant
4 Assistant Architects	Correspondence and Record Clerk
1 Building Surveyor	8 Clerks
6 District Inspectors	3 Clerks to Assistant Architects
17 Draughtsmen	1 Shorthand writer
19 Clerk of Works	

The total office expenses, including salaries, contingencies, travelling expenses, &c., amount to £21,911 (of which the sum of £2,815 is provided for in the clerical division of the Public Works establishment).

The following shows the percentage cost of the various services, based on the total expenditure of £300,587 6s. 1d.:—

Professional	2·71 per centum
Superintendence by clerk of works	2·52 „
Clerical	1·10 „
Contingencies, travelling, &c.	1·02 „
Total	7·35 „

This at a first glance compares unfavourably with that of 1891, which stands at 6·15; but it may be pointed out that during the year a large amount of departmental work, abortive plans, preliminary sketches, and reporting on general repairs, &c., were undertaken far in excess of any previous year, which, if carefully valued and charged for, would, I am of opinion, reduce the percentage to an amount at least equal to that of 1891.

Work in the clerical branch is to some extent represented by its dealing with the following papers, independent of accounts, viz.:—

Vouchers	4,335
Letters, reports, &c. (received and despatched)	24,399
Telegrams despatched	858

Reference was made in the report of 1891 to a valuation of the properties held by the Government and under the charge of this branch, and an approximate estimate was there stated of their value. This work was completed early in the year 1892, and attached (*see* Section XII., page 60) is a complete list of these several properties, together with the year of their erection, the value of the land occupied, and of the buildings themselves. It may be explained that in many cases it has been difficult to arrive at these values, but wherever possible the cost has been the basis of such valuations. The result is as follows:—

	Value of Land.		Value of Building.		Total.	
	£	s. d.	£	s. d.	£	s. d.
Court-houses	407,947	0 0	705,189	10 0	1,113,136	10 0
Lock-ups	50,226	10 0	109,807	0 0	160,033	10 0
Watch-houses	29,025	15 0	31,527	0 0	60,552	15 0
Police Stations	232,151	10 0	296,269	10 0	528,421	0 0
Gaols	172,456	0 0	767,997	0 0	940,453	0 0
Post and Telegraph Offices	975,396	5 0	752,271	0 0	1,727,667	5 0
Lands Offices	72,370	0 0	246,890	0 0	319,260	0 0
Institutions for Insane	216,840	0 0	507,921	0 0	724,761	0 0
Miscellaneous Government Buildings, principally metropolitan	1,618,131	0 0	866,250	0 0	2,484,381	0 0
Benevolent Asylums	40,483	0 0	95,867	0 0	136,350	0 0
					8,195,016	0 0
Parks and Gardens					4,407,490	0 0
Total					12,602,506	0 0

The whole of the Public buildings are suitably and fully furnished, but no estimate of the value of the furniture has been attempted, although it may be assumed such would amount to a considerable sum.

W. L. VERNON, Government Architect.

RETURN of expenditure on Works carried out by the Government Architect's Branch.

Roads, Bridges, and Sewerage.

REPORT of the Commissioner for Roads.

Sydney, 10 May, 1893.

I FORWARD herewith, for the information of the Minister, reports from the Engineer for Bridges, the Supervising Engineers of the various road districts, and from the Principal Assistant Engineer for Sewerage, giving details of works carried out during the year 1892 under their immediate supervision.

It is only further necessary for me to briefly summarise the whole in order that the work of the Department may be presented in a concrete form.

The total expenditure for the year was £1,103,040 3s. 8d., of which £889,632 13s. 11d. was absorbed by the Roads and Bridges Branch, and £213,407 9s. 9d. by the Sewerage Branch. Of this sum, £818,418 15s. 11d. was derived from Consolidated Revenue, and £284,621 7s. 9d. from Loans.

Roads and Bridges.

There are 33,213 miles of roads under the direct supervision of the officers of the Department, while 553 miles are subsidised by the Government but supervised by Municipal authorities, and 1,993 miles are under the control of trustees.

The total length of roads directly or indirectly dealt with by the Department has thus been 35,759 miles, the length constructed during the year being 1,402 miles.

Three thousand five hundred and fifty bridges having 7,609 spans, and a total length of 243,697 feet (or $46\frac{1}{2}$ miles), are now in charge of the Department; 366 bridges, 25,189 feet in length, with 867 spans, having been built during the year. Of culverts under 15 feet span, 1,502 were built during the year, having a total length of 26,715 feet. The gross total now in use is 25,854, with a length of 403,253 feet, or $76\frac{1}{2}$ miles; there are also 10,169 causeways, with a total length of 237,055 feet.

One timber punt, three horse boats, and eleven flood boats have been added on ferries, &c., while one steam launch and nine small boats have been discontinued. The total number of punts, launches, and boats now in use is 290, and the width of streams thus crossed is 69,062 feet.

The cost of working them was £12,000, and the revenue received £4,402 16s. 7d., from 43 ferries. In addition thereto there are 42 ferries subsidised by the department, or a total of 85 ferries.

Two thousand nine hundred and thirty contracts were let during 1892; 26,934 vouchers were passed for payment; and 3,252 cheques, amounting to £845,984 1s. 2d., were signed by me. The monthly average of men employed by the branch has been 6,600—4,747 of whom were engaged on contracts.

Some slight alterations in the arrangement of the divisions has taken place since last report. In 1891 I dealt directly with the four districts in the far west. These have now been absorbed into one of the divisions, so that the whole of the Colony is directly supervised by the divisional engineers.

These divisions are subdivided into sixty-six districts, supervised by resident engineers, who in some cases have assistants.

The Metropolitan, a small division 1,232 square miles in area, embraces, as its name implies, the districts contiguous to Sydney. In it there are 215 miles of classified roads, 86 miles of unclassified, and 180 miles of trustee and municipal roads receiving grants, 97 bridges, and 576 culverts. During the year 64 contracts were let, and the expenditure on these was £44,713. Wages amounted to £20,634. The question of wood-paving several of the main roads when they pass through the city and suburbs is one which demands consideration in order to reduce the cost of maintenance, which is at present very heavy.

No. 1 Division covers the north-eastern portion of the Colony, its southern limit being the Macleay River, and its western Bingara. It comprises thirteen districts, and has a total area of 26,754 square miles. Including 42 miles of roads under trustees the length of road is 4,963 miles, and the local expenditure for the year was £145,556. This division being intersected by many large rivers, punts and ferries are a feature in its management. The new scale of charges instituted in 1890 is so low as to cause the revenue to come far short of the expenses. On the two steam ferries at Grafton and Harwood the receipts were only 56·8 per cent. and 35·4 per cent. of the expenditure respectively. A small increase in the passenger rate from 1d. for the return trip to 1d. each way would, while being little felt by the public, go far to put the revenue on a satisfactory basis. The hand ferries, 37 in number, are nearly self-supporting.

Several large and many smaller bridges were in course of construction or were completed during the year in this division. All of these are of the greatest importance in facilitating traffic. The erection of some important bridges has been deferred for a time owing to the necessity for reducing expenditure.

The most important road works undertaken were the Don Dorrigo Road, from the Bellinger River on to the table-land of New England, from Boat Harbour, *via* Spicket's Creek, to the Nambucca, roads leading to Coff's Harbour from the scrub lands of the Upper Orara, and roads for opening up Taylor's Arm on the Nambucca River. Besides these, the existing roads in the various districts have been maintained, and extensions and alterations made as far as funds were available, in order to cope with increased traffic and the opening up of new country.

No. 2 Division contains eight districts, *viz.*:—Bathurst, Orange, Lithgow, Mudgee, Dubbo, Cowra, Forbes, and Blayney, and embraces an area of 32,614 square miles, with a length of roads of 4,161½ miles, of which 3,477 miles are classified roads and 218 miles are under trustees and municipalities. Some large works have been completed or were in progress during the year, notably the Cowra, Forbes, Euabalong, Cox's River, and Gin Gin bridges, but, generally speaking, the efforts of the department have been concentrated upon the improvement of existing roads to avoid steep gradients, and the maintenance and extension of existing roads as far as funds would permit.

A feature in this division is the construction and maintenance of dams for conserving water. The Binni, Sheet o' Bark, and other dams in the Cowra district have been repaired and improved. The first-named holds 27 feet of water when full, and throws the water back for nearly a mile.

No. 3 Division, embracing eleven districts, is bounded on the east by the Coast Range, on the west and north by the Lachlan River, and on the south by the Murray. Its area is 61,280 square miles, and the length of road is 8,034 miles, 5,513 miles being classified roads.

During the year three large bridges across the Murray at Corowa, Jingellic, and Tintaldra, besides thirty-five others of smaller dimensions in various parts of the division, were completed or in progress. Two punts were also built.

The number of contracts let during the year was 427, and the local expenditure was £122,477, with an outstanding liability on contracts of £24,725. Perhaps the most important road work carried out during the year was the construction of 28 miles of the road Tumut to Kiandra and to the Yarrangobilly Caves. A road now exists through the mountains which, although not fully completed, connects the south-eastern coastal districts with the western interior near Goulburn and Yass, and opens up the "snow lands" in the vicinity of Kiandra.

The area of No. 4 Division, comprising the South Coast and Hunter districts, is 25,667 square miles. It is divided into fifteen districts, and the length of road is 7,292 miles, of which 4,246 miles are on the schedule of classified roads, and 1,383 miles are under trustees. During the year 339 miles of road were cleared, formed, drained, or metalled, 120 bridges and 422 culverts were built or repaired, and one steam punt was built and eleven repaired.

Several alterations have been made during the year in the size and position of the districts in this division, and the result has been to make the local control and supervision more effectual, and the check on the operations of trustees more complete. Some large bridges have been built during the year, notably those at Redbourneberry (approaches only), Elderslie, Aberdeen, Tuross, Liverpool, and Warri, the contracts for which amount to about £44,000, but the efforts of the department have been mainly directed to improving the gradients on the older roads by diversions and otherwise, and the construction of others to open up new land and cope with the extended traffic.

No. 5 Division—56,157 square miles in area—contains thirteen districts extending from the coast between Port Stephens and Nambucca to the Northern interior, about half-way between Walgett and Bourke. It has 5,829 miles of road, of which 4,693 miles are classified, and 275 miles under trustees and municipalities. It comprises thirteen electorates, thirty-six counties, and thirteen municipalities, and contains about 84,000 inhabitants.

During the year 247 miles of road were cleared, formed, drained, or metalled; 110 bridges, at a cost of £24,205, and 329 culverts were constructed or repaired.

The most important bridges completed were those at Mundooran, Bullah Delah, and on the Macleay, above Kempsey. In addition to these several large structures are in progress.

The four districts in the far West—Cobar, Bourke, Wilcannia, and Broken Hill—have, during most of the year, been worked directly from the head office, resident engineers being in charge, but have now been taken over by one of the supervising engineers. Save in the well-defined centres the population is sparse, and the roadwork undertaken has generally been of a pioneer nature only.

The area of the four districts is approximately 124,000 square miles, or over twice the size of the largest of the other divisions, the expenditure, however, was less than half that of the smallest. There are 5,056 miles of road (only 73 miles of which are metalled or formed), 78 bridges, and 165 culverts. The most important bridges in progress during 1892 were those over the Darling River, at Wentworth and Wilcannia, and over Tucker's Creek, near Wentworth. These, conjointly, will cost, when completed, £29,000.

The large bridges constructed, or in progress, during 1892 have been incidentally mentioned in dealing with the various divisions; for further details regarding them I would refer the Minister to the interesting reports presented by the Engineer and Supervising Engineer for Bridges, as the subject cannot be treated fairly without an extended notice.

In the whole of the divisions much valuable work has been done by all the officers.

It will readily be understood that the demands made from various quarters upon the resources of the department have exceeded by many hundred of thousands of pounds the money available for the year, and much labour has been expended by the local officers in investigating the claims for assistance made.

Many really necessary works have had to be deferred, and as the residents in each locality naturally look upon their own applications for help as the most important, it is a difficult task to act justly to all. In this capacity the work of the supervising engineers has been strikingly successful. The resident engineers report certain work as necessary; they are, however, unacquainted with the requirements outside their own districts, and no matter how carefully they may perform their work, they are not in a position to take a comprehensive view of all the issues involved. The supervising engineers, on the other hand, being thoroughly acquainted with the whole division, comprising a number of districts, and being entirely free from local bias, are able to weigh the relative importance of the various necessary works, and so expand the available funds to the greatest possible advantage.

I desire to strongly emphasise the protest made by the various supervising engineers in their reports against the use of narrow tyres in the conveyance of heavy loads. It is of the greatest importance that regulations should be framed whereby the width of tyre should be proportioned to the load carried. Experience has proved that where broad tyres are used the cost of maintenance can be reduced by about 50 per cent., and if the money so saved could be set free for the extension of roads into the newer districts, settlement would be encouraged and the interests of the public benefited.

Sewerage.

This branch has been engaged during the year in carrying out surveys, designs, and works for the drainage of the eastern, western, and northern suburbs of Sydney, and for the storm-water channels connected therewith. Reports and estimates have also been prepared for the drainage and sewerage of various suburban and country towns.

The expenditure of the branch was £213,407 9s. 9d., of which £160,773 11s. 4d. was spent on contracts. Resumption of land cost £28,885 4s. 7d., but this does not represent resumptions actually made during the year, which were very small. Nearly the whole of the payments were for land resumed in previous years, notably for the 311 acres taken for the extension of the Botany sewage farm, resumed in connection with the western suburbs sewerage scheme.

In dealing with a large scheme such as that for the drainage of the western suburbs in which the works must be treated as a whole, it is important that the surveys and designs should be kept well in advance of construction. This has been done, and a number of contracts are ready, which have not yet been let. It is intended during 1893 to continue this policy as far as possible with the staff at the disposal of the branch. Tenders for nine contracts were accepted during the year, which comprise the construction of 2 miles 47·66 chains of sewers, and 3 miles 15·15 chains of storm-water channels, and entail a cost of £83,516 2s. 8d.

Five additional contracts were advertised and tenders received. They amounted in the aggregate to £36,051 19s 7d., but their acceptance has been deferred owing to the unsatisfactory state of the English money market precluding the floating of fresh loans.

Designs for ten other contracts were prepared during the year, comprising 11 miles 51·76 chains of sewers, and 3 miles 43·35 chains of storm-water channels, and estimated to cost £324,292 9s. 4d. Owing to the same cause they have not yet been advertised.

Twelve contracts were completed during the year. Four of these, of a length of 5 miles 10·61 chains, were for sewers, and eight, of a length of 3 miles 20·55 chains, for storm-water channels. With reference to these it may be stated as illustrating the care which is exercised in design and supervision, that while the amount of the tenders aggregated £137,611 8s. 10d. the actual cost was, by judicious deductions, reduced to £129,025 without in any way detracting from the efficiency of the works.

Contracts for 4 miles 52·13 chains of sewer, amounting to £240,564 1s. 11d., and for 4 miles 7·29 chains of storm-water channels, amounting to £30,755 1s. 4d., are still in progress.

The most important of these are the two contracts for the construction of the main outfall sewer for the western suburbs sewerage. They are well advanced, and I would strongly urge that the next section through Marrickville should be also taken in hand as soon as possible. The outfall sewer is in itself not revenue-producing, and if its extension into the residential areas is not speedily undertaken the works, costing nearly £160,000, must necessarily lie unused for a considerable period. The area to be sewered by the branches, especially the eastern branch, is thickly populated, and would from the first return a good revenue.

The first section of the main outfall sewer for the North Shore drainage is well in hand, and the remarks made above will, in a lesser degree, apply to this work also. The Waverley-Woollahra branch, the Potts' Point branch, and the Darling Point branch are completed, or nearly so, and no effort should be spared to make them revenue-producing by completing the reticulation of these districts as soon as possible.

Considerable attention has been given to the construction of storm-water channels in various localities, and as will be seen from the returns attached to the special report of the branch, considerable progress has been made in their construction.

It is satisfactory to know that wherever they have been built not only has the destruction caused by floods ceased, but the insanitary condition of the old creek beds has been removed.

ROBT. HICKSON.

(XIV.)

RETURN of Expenditure on Works carried out by the Roads and Bridges and Sewerage Branch.

WATER CONSERVATION AND IRRIGATION.

REPORT of the Chief Engineer for Water Conservation and Irrigation.

Prefatory.

THE transfer of the charge of Water Conservation to the Department of Public Works in the early part of 1892 took place after a number of plans and diagrams illustrating the progress made in 1891 had actually been printed. On account of the transfer, the question of the submission of a Progress Report was deferred till it could be dealt with as a part of the general Progress Report of the entire Department of Public Works. The record now supplied is a review of the progress made in 1891 as well as 1892, and the plans and diagrams which were prepared for the former year are herewith attached.

The period of high rainfall which continued through both of these years has probably been the most favourable in this respect since the settlement of the interior of the Colony. In the six years, beginning with 1887 and ending with 1892, there were five years in which the rainfall was considerably above the previous average. 1887 was the wettest year on record up till that time; but the record was raised still further in 1890. Under these circumstances it is not surprising that during the period mentioned the subject of water conservation and irrigation has attracted less attention than it did in the years prior to 1887. Notwithstanding the favourable character of recent seasons, irrigation is spreading steadily, and is carried on from every important river, and from some of the larger creeks and billabongs west of the Dividing Range. The reports on the competition for the national prizes offered for irrigation in 1891 and 1892, which are herewith attached as appendices, show that irrigation is being carried on successfully under varied circumstances, both in the coast district and in the interior of the Colony.

On the transfer of the Water Conservation Branch to the Department of Public Works, the charge of the administration of the following Acts of Parliament was proclaimed as belonging to this Branch:—

The Wentworth Irrigation Act.
 The Hay Irrigation Act.
 The Broken Hill and District Water Supply Act.
 The Broken Hill and District Water Supply Amendment Act.
 The Broken Hill Water Supply Act.
 The Mulgoa Irrigation Act.

By mutual arrangement between the Ministers for Public Works and Lands, the charge of "The Drainage Promotion Act" was transferred to this Branch.

A comprehensive Bill, dealing with water conservation, irrigation, and drainage, was introduced in Parliament by the Minister for Public Works in 1892. This Bill, besides providing for the administration of the natural supplies of water throughout the Colony in the manner best calculated to promote and protect the interests of the public, while encouraging, regulating, and protecting private and local enterprise in matters connected with water conservation and irrigation, has also much needed provisions for dealing in a more complete and comprehensive manner with drainage of land than is possible under the Drainage Promotion Act. The consideration of the Water Conservation Bill was delayed on account of the state of business in Parliament. This delay is a much more serious matter for the country than is generally supposed. In some of the Western States of America a hurried scramble for the available water supply took place when it became known that any person by purchasing a piece of land fronting on a river could acquire a perpetual right to, as much water as he could use, merely by constructing works capable of diverting it from the river. The result has been the creation of water monopolies of the most objectionable character. In this Colony the state of the law has been a most serious obstacle to private and local enterprise, but as year passes after year with no legislation to proclaim the right of the State to administer the water supply in the interests of the public, an impression is arising that water monopolies can be created here also. Extensive arrangements for irrigation have been or are being made on almost every important river in the western part of the Colony. It is beyond question that some at least of the owners of pumping appliances and works for irrigation purposes believe that they are acquiring by use a right to water such as riparian owners acquired in America by the direct sanction of the Government. Under the Water Conservation Bill the rights of irrigators would be defined, and their interests would be protected within the defined limits. But, by allowing the question to drift, interests adverse to any proper distribution of the river waters are being created, and monopolies in water, far-reaching in their mischief and more objectionable in their character than any monopolies in land with which this Colony has had experience, are in process of development. Land highly suitable for cultivation throughout the country west of the Dividing Range may be reckoned by millions of acres, but water available for irrigation cannot be reckoned by thousands of cubic feet per second except on two of the rivers. Besides, it frequently happens that the land situated at a distance from the rivers not only needs water more than that on the frontage, but is in addition much better suited for irrigation.

During the period under review the local and private Bills introduced in Parliament relating to irrigation were the Balranald Irrigation Bill, the Segenhoe Irrigation Bill, and the Menindie Irrigation Bill. The first of these proposes to create a Municipal Irrigation Trust, similar in character to those already created at Hay and Wentworth. The other two Bills have been introduced by private companies, one of which proposes to utilise a portion of the waters of two of the tributaries of the Hunter River, while the other asks for power to pump water from Lake Menindie and from the river Darling.

Surveys.

Surveys.

The comprehensive system of surveys recommended by the Royal Commission on the Conservation of Water are now approaching completion. The total length of line levelled and surveyed up till the end of the year 1892 was 14,134 miles. The work has been done by contract, and checks have been made by officers of the Department wherever deemed necessary. The rivers dealt with in these surveys are the Murray, Murrumbidgee, Lachlan, Macquarie, Namoi, Gwydir, and Upper and Lower Darling. The object of the surveys was to ascertain the extent to which the waters of these rivers could be distributed, and the best methods of effecting this distribution. The cost of the surveys up till the end of 1892 was £28,000, which is equivalent to an outlay of less than one-fifth of a penny per acre of the lands included within the scope of the surveys.

Contour plans, showing the result of the levelling in the Murray, Murrumbidgee, Lachlan, and Macquarie Districts, were published with the first Progress Report of this Branch. A plan showing the corresponding results obtained in the Namoi and Gwydir Districts is now appended. A portion of the levelling and surveying along the course of the river Darling still remains to be done. On this account a contour plan of the Darling District has not yet been completed.

Special contour surveys were made of Urana Lake, Lakes Mejum and Coolah-gum-Parma, the neighbourhood of the headworks of the proposed Murrumbidgee Northern Canal, and of the land attached to the Hawkesbury Agricultural College. The plan of Urana Lake was published with the first Progress Report, and the plan showing the result of the survey of Lakes Mejum and Coolah-gum-Parma is attached. The contour plan of the lands attached to the Agricultural College was prepared for and at the expense of the Agricultural Department. The immediate object of the plan was to show how the land could best be drained, but it will be equally useful to indicate the lines on which irrigation can be carried on.

In addition to the surveys which have been carried out by this branch with a view to the utilisation of the waters of our rivers for irrigation, a highly important survey of a similar character, though with an entirely different object, has been completed during the year. This is the survey for investigating the practicability of utilising the waters of the Shoalhaven River for hydraulic sluicing purposes. The result of this investigation is so important, and the prospect of a very large return of gold from the auriferous drifts in the Shoalhaven Valley so encouraging, that the circumstances warrant the publication of the official report on this subject as an appendix to this report.

The general result of the surveys is that the Department is now in possession of the information necessary in dealing with the available supplies of water in the western rivers. Whether the works for water conservation and irrigation, on which the development of settlement on the Western Plains depends, be carried out by the Government or by local trusts, or by private individuals or companies acting under Government sanction, the surveys which have been made will be the foundation on which all such works will be based. Should the remarkably favourable seasons which the Colony has enjoyed for several years past cease for a time, and a period of drought set in, the state of public feeling will probably return to what it was previous to 1887. Up till the time of publication of the reports of the Water Commission, irrigation schemes of the most impracticable character received influential support. The inquiries of that Commission put matters on a sound footing, and the surveys which have been carried out on the recommendation of the Commission will be not only the basis of feasible projects, but an effective bar to public expenditure on schemes of an undesirable character.

River Discharges.

Gauges have been fixed on all the important rivers west of the Dividing Range and on several of the coastal rivers, and regular records of the daily readings on them are maintained. Tabular statements furnishing particulars regarding these gauges are given as appendices to this report. In regard to the nature of the gauges it may be mentioned that the old timber gauges are being gradually replaced by the enamelled iron gauges which were adopted by, and specially ordered for, this department.

The discharges of the rivers for various heights on the gauges are taken as opportunity offers, and the results obtained are noted on diagrams. The gaugings are complete for ordinary heights of the Murray, Murrumbidgee, and Macquarie, and more or less advanced in the cases of the Darling, Lachlan, Namoi, and Nepean.

As already explained, the main object of the surveys which have been carried out is to show the extent to which and the manner in which the waters of the rivers can be distributed with advantage. The gauge records and the discharge observations are the complement to this, as their object is to show the quantity of water available at all times of the year.

As an interesting point in connection with the discharge observations, it may be mentioned that the question of the proportion of the rainfall which has been discharged by various rivers has been considered, though it was not deemed necessary to make special observations merely for this purpose. During periods of high floods the work involved in taking river discharges would be difficult and expensive, and in some important cases it would also be dangerous. Besides, on account of the extent to which most of the rivers overflow their banks at such times, gaugings would at the best be only fair approximations. Hence, in regard to the proportion of rainfall discharged, it has proved practicable to obtain fairly satisfactory results only for years such as 1888, when no floods of any consequence occurred. During that year the proportion of the rainfall on the catchment area of the Macquarie River above Dubbo which flowed past that place was only 2·30 per cent. As a general rule the quantity of water which flows past Warren is less than that which passes Dubbo, and is therefore a considerably smaller proportion of the rainfall. Owing to exceptional conditions as to rainfall in 1888 and the end of 1887, the discharge at Warren in the early part of the former year exceeded that at Dubbo, and for the whole year the proportion of the rainfall which flowed past Warren in the Macquarie River was about 3·00 per cent. During the same year about 12½ per cent. of the rainfall on the Murrumbidgee catchment area above Wagga Wagga was discharged by the river at that place. In the same year the proportion of the rainfall on the basin of the river Murray which was discharged by that river at Albury was 28½ per cent.

The

The foundation of the Water Conservation Bill introduced in Parliament by the Minister is that the great natural supplies of water belong to the Government, and that it is the duty of the Government to administer them in the best interests of the public. Taking this view, the western rivers constitute a national asset of the first importance.

Works.

Until legislation dealing with riparian rights is passed, such works as are contemplated for utilising the water available in the rivers of the Colony cannot be proceeded with except at a great disadvantage. Under these circumstances the only works dealt with during 1892 were—(1) the improvement of the Willandra Billabong and the completion of the Willandra weir and dam; (2) the construction of a self-acting flood-gate in Lake Creek to retain flood-water in Lake Cudgellico; and (3) the improvement of Yanko Creek.

The Willandra weir and dam came into full operation in October, 1892, since which time a portion of the waters of the river Lachlan has been flowing down the Willandra Billabong. These works have proved a great boon to the dry district between the Lachlan and Darling Rivers, as the Willandra Billabong is now a running stream, and will remain so during the greater part of every year. The construction of the works here has already given rise to misunderstandings among those who benefit by them. There being no law to regulate the construction of dams across creeks and rivers, complaints have been made that the benefits conferred by the works are very unequally divided, as much of the water flowing in the Willandra Billabong is intercepted by dams. This is a matter which can only be rectified by legislation.

It may be mentioned that during the greater part of October the quantity of water flowing in the Willandra Billabong averaged nearly 400 cubic feet per second.

The improvement of Yanko Creek is a work of the same character as the improvement of the Willandra Billabong, but, owing to the circumstances being more favourable as regards the outflow of flood-water in the former case, no weir or dam to divert the required supply of water was necessary. The work at Yanko Creek has been repeatedly interrupted by the rise of the Murrumbidgee River, which was only to be expected, as the intended effect of the work is to make Yanko Creek a running stream during the greater part of the year. The work is approaching completion.

The self-acting flood-gate in Lake Creek has the effect of making the supply of water in Lake Cudgellico permanent. The area of this lake is 4,054 acres. Although it affords the means of irrigating on an extensive scale, very little irrigation has yet been done, but the lake has been of great advantage to the township of Lake Cudgellico, which is situated on its margin.

The three works mentioned would be highly remunerative if there was any authority for collecting in rates a small fraction of the benefits conferred by the works.

Acts of Parliament administered under this Department.

(A) "Broken Hill Water Supply Act."—This Act relates to what is known as the Stephen's Creek scheme, under which the town of Willyama (Broken Hill) is supplied with water. The Act is in full operation, the preliminary conditions having been complied with, the scheme sanctioned by the Minister, and the works carried out. The Company was at first unfortunate in the fact that a period of drought occurred after the completion of the works, but a good supply of water was eventually received, and no difficulty has since been experienced.

Two other Acts dealing with water supply to Broken Hill were passed, but both lapsed through their conditions not being complied with.

(B) "Wentworth Irrigation Act."—This Act constitutes the Municipal Council of Wentworth an Irrigation Trust, and vests in it for irrigation purposes the Temporary Common adjoining that town. After the passing of the Act the members of the Trust on their own personal security obtained a temporary loan of £1,000, of which they expended over £800 in the preparation of a scheme for carrying out the objects of the Act. This scheme proved too expensive for the Trust to undertake. A smaller and much less costly project proposed by the Department has been adopted, and for the purpose of carrying it out, sanction has been granted for the raising of a loan of £5,000 by the Trust. The land proposed to be irrigated is rich alluvium, the supply of water is abundant and permanent, and the lift for pumping is moderate.

(C) "The Hay Irrigation Act."—This Act is precisely similar in character to that last described. It constitutes the Municipal Council of Hay an Irrigation Trust, and makes over to it the Temporary Common situated on both sides of the Murrumbidgee River at that town. The Hay Irrigation Trust applied to the Minister for assistance in the preparation of a project, and offered to bear the cost of the necessary surveys if done by this Department. This course was approved, the project recommended was adopted, and the Trust obtained sanction to raise a sum of £5,000 on loan.

(D) "The Mulgoa Irrigation Act."—This is a private Act which authorises a company to take water from the Nepean and Warragamba Rivers for the purposes of irrigation at Mulgoa in the Police District of Penrith. The Act was passed on 19th December, 1890, and one of its conditions was that within two years after that date the sum of £20,000 should be expended on the proposed works. This condition was duly carried out by the company, so that the Act is now in operation. Arrangements have been made by which the requisite supply of water will be obtained for some time at least from the Nepean River without constructing a dam. Before any dam can be constructed in the Nepean or the Warragamba River, the plan and section of it must receive the approval of the Minister.

(E) "Drainage Promotion Act."—This Act was passed in 1865, with the object of promoting co-operation among land-holders, particularly on the coastal rivers, for the purpose of constructing drainage works. Although there are defects in the Act which diminish its usefulness, it is believed that if its existence were more widely known among those interested in lands which require drainage, the number of Drainage Unions would be considerably greater than at present. Seven of these Unions were at various times constituted under the Act, but of these only three are now actually in operation, namely, one in the Shoalhaven District and two in the Macleay District. In the Clarence, Richmond, and Tweed Districts, where drainage is a question of the first importance, the existence of the Act appears to be known only to a very limited number of land-holders.

Projects.

The most important project considered during 1892 was the question of locking the river Darling Acting under special instructions from the Minister, a complete inspection of that river from Walgett to Wentworth was made by the Chief Engineer and Mr. F. W. Ward. The joint report, which was submitted to the Minister, and presented by him to Parliament, dealt with the economical and general aspect of the question, as well as with the engineering part of it. The detail surveys of sites of proposed locks were put in hand under the Minister's instructions, but the work was interrupted by the rise of the river.

Three Bills relating to irrigation were introduced in Parliament during the period under review, two being promoted by private companies, and the third by a municipality. These are the Menindie Irrigation Bill, the Segenhoe Estate Irrigation Bill, and the Balranald Irrigation Bill.

H. G. MCKINNEY,
Chief Engineer for Water Conservation and Irrigation.

THE NATIONAL PRIZE COMPETITION FOR IRRIGATION.

(1891.)

Report of the Chief Engineer for Water Conservation and Irrigation.*

I HAVE the honor to forward herewith, for the information of the Minister, my report on the orchards and farms which have this year been entered for the national prizes for irrigation.

In connection with this matter it is worthy of special notice that, whereas last year there were only two entries for these prizes, this year there are seven. Both of the entries last year were of farms, while this year there are three farms and four orchards. This increase in the number of entries affords an indication of a rapidly increasing interest in irrigation. The inquiries and observations which I made in the course of my inspections have shown clearly that, notwithstanding the unusually large rainfall of recent years, this great increase in the interest taken in irrigation is beyond question. It is worthy of special remark that the importance of the question of irrigation, in its relation to the pastoral industry, is beginning to be appreciated by those directly interested. Not many years have elapsed since pastoralists regarded the question of irrigation as one in which they had no immediate interest, and even treated with ridicule the idea that the safe carrying capacity of pastoral estates could profitably be largely increased by resorting to irrigation. So far as can be judged by present indications, the time is rapidly approaching when neglect to adopt irrigation wherever practicable on pastoral estates, will be regarded as an evidence of inferior management and of failure to keep pace with the times.

In regard to the properties inspected, I beg to point out that there is such a marked difference in the character of the operations for the irrigation of farms, as compared with the management required in the irrigation of orchards, that it would be unsatisfactory to both classes of properties to judge them in the same category. I trust that on this point being brought to the notice of the Minister he will sanction the granting of separate prizes. The orchards, being much smaller in area and possessing a much greater value per acre than farm crops, require a different style of treatment, and warrant a much greater outlay per acre on plant and distributive appliances. On this account I submit two reports, and I trust that the Minister will approve of this treatment of the question of the national prizes for this year and future years.

A.

*This report was submitted to the Minister for Mines and Agriculture when the Water Conservation Branch was under his administration.

A.—Orchards.

The orchards entered for the National prizes for irrigation this season are four in number, the names of the owners and the location of the properties being as follows :—

Name of owner.	Location.
Timothy Brien	Hollywood, 2 miles from Parramatta.
Henry Turner	The Terrace, North Richmond.
George H. Dempsey	Emu Plains.
George Walker	The Orangery, Emu Plains.

The scale of marks which I have adopted is as follows :—

Detail of points.	No. of marks.
1. Suitability of the land as to position and as to necessity for irrigation ...	10
2. Suitability as to soil	10
3. Suitability as to water supply and as to position of off-take or pump ...	10
4. Application of the water to the land	25
5. Suitability of crops to existing conditions	20
6. General economy of the arrangements	25
Total... ..	100

The number of marks which I have allotted to the competitors are shown in the following table:—

No. of Item in scale.	Names of competitors and number of marks awarded.			
	T. Brien.	G. H. Dempsey.	G. Walker.	H. Turner.
1	8	8	8	6
2	10	10	10	6
3	10	10	10	8
4	23	21	20	16
5	20	20	20	16
6	23	21	20	12
	94	90	88	64

It will be seen from the above table that Mr. Brien stands first with 94 per cent. of the total number of points, and that he is closely followed by Mr. Dempsey and Mr. Walker. Mr. Turner has a much larger orchard than any of the others, but the style in which it is managed is much below the standard reached by them. There is very little difference between the first three in the table; all three are well-managed remunerative properties. Among small differences, I observed that in the case of Mr. Brien's orchard the question of the quantity of water required to be used, and of the quantity raised in proportion to the fuel consumed, had been carefully considered—more so than in any of the other cases. In Mr. Dempsey's orchard flexible hose is used to a considerable extent. He believes that the trees are benefited by having the water directed on them occasionally through the hose. It is reasonable to suppose that the practice is beneficial, but whether it be so or not, the method of irrigating fruit trees by means of a flexible hose has several advantages, and in the case of Mr. Dempsey's orchard, it is certainly a success. The orchards of Mr. Brien and Mr. Dempsey, which are confined almost entirely to citrus fruits, are each 8 acres in area, that of Mr. Walker 11 acres, and that of Mr. Turner 30 acres, the latter two having chiefly citrous fruits, but with a moderate proportion of mixed fruits in addition. The last is still in an undeveloped state, and its condition seems to show that it would have been better if its owner had begun operations on a more limited scale. In all four cases the water has to be pumped, but the lift is moderate, except that at Mr. Turner's orchard, where it is 265 feet. The source of supply in this case is the river Hawkesbury. Mr. Dempsey and Mr. Walker obtain their water supply from wells sunk into the drift, near the same river, locally called the Nepean, and Mr. Brien pumps from Toongabbie Creek. Tangye pumps are used in every case, and the results of the outlay on irrigation plant in the three orchards named, which are in full working order, has been highly satisfactory.

The four orchards entered in the competition for the National prizes for irrigation are situated in the counties of Cumberland and Cook, where, until a few years ago, it was generally believed that irrigation would not prove remunerative. Our fruit-growers now know by actual experience that while the rainfall in the coast district is sufficient, if it fell at such times as it is required, great risk and frequent losses are incurred if only the rainfall is depended on to produce good crops of fruit, and bring them to maturity. It is, therefore, now regarded as an established fact that the future of fruit-growing in this Colony depends in a large measure on the successful extension of irrigation.

The principle on which the competing orchards are irrigated is to raise the water to the highest part of the orchard by pumping it through pipes, and then to distribute it by gravitation. The pumping plant used by Mr. Brien was guaranteed to deliver 8,800 gallons per hour, the total lift from the supply creek to the highest part of the orchard being slightly over 40 feet. The water is forced through a 2½-inch pipe, on which there are taps provided at suitable intervals for screwing on 1-inch pipes. These 1-inch pipes are laid on the surface of the ground to the places from which open channels can easily be made to and around the trees. By keeping four 1-inch pipes in operation Mr. Brien finds that he can irrigate the whole of his orchard in six days of twelve hours each. Each tree requires about 120 gallons of water, and the whole operation of irrigating one tree takes about twenty minutes. As a rule, Mr. Brien uses only four 1-inch pipes at a time, but as a 2½-inch pipe would discharge nearly as much as ten 1-inch pipes, there is an absence of proper proportions. On further inquiry into this point, I found that the boiler used is 6 horse-power, which is much larger than is necessary, but it was explained by Mr. Brien, jun., that, when purchasing a large boiler, the probability of irrigating on a larger scale was taken into account. The cost of boiler and pump complete, together with 650 feet of 2¼-inch piping and 1,100 feet of 1-inch piping,

pipng, was about £190. Smaller pumping-plant, suitable to the area now irrigated, could have been obtained at a considerably reduced cost, but even with the outlay stated, Mr. Brien informed me that the value of the benefits derived from irrigation nearly repaid the entire cost in the first year's operation. In regard to the consumption of coal, he finds that the irrigation of 600 trees requires a consumption of $2\frac{1}{2}$ tons of coal. Coal costs 11s. per ton at the railway station, or about 14s. per ton on the ground at the engine, so that the expenditure on fuel for every flooding is 35s., or slightly under $\frac{1}{4}$ d. for every tree. The working of the engine is managed entirely by Mr. Brien, jun., and the distribution of water is attended to by Mr. Brien, sen., while only one labourer is employed on wages. The entire management of the orchard, including irrigation, is, therefore, done by three persons.

Mr. Dempsey uses a 3 h.-p. boiler and Tangye pump, which has been proved to deliver 1,200 gallons per hour, with a total lift of 46 feet. Only the water required for the highest part of the orchard is raised to this height, the average lift being little over 20 feet. Details regarding the water and fuel used were not maintained. In this case, also, the power is in excess of present requirements.

The plant in Mr. Walker's orchard is similar to Mr. Dempsey's. The cost of the boiler and pump complete, with 1,400 feet of $1\frac{1}{4}$ -inch piping and 600 feet of 1-inch piping, was about £150, exclusive of labour in erecting plant and laying pipes. Mr. Walker stated that the total outlay, including labour, was probably £200.

The soil in the three orchards described is in every case a light loam, which is easily worked, and does not cake with watering. There is good natural drainage in every case.

The irrigation plant used by Mr. Turner comprises an 8 h.-p. boiler and a Tangye special pump, with 3,050 feet of 3-inch wrought-iron pipes and 3,200 feet of $1\frac{1}{2}$ -inch pipe. The pump delivers 3,500 gallons per hour at a height of 265 feet. The whole plant, including fitting and erection of boiler and pump and laying of pipes, cost £1,000. Firewood is used as fuel, and the boiler furnace takes billets 4 feet in length, and the quantity used is stated at 4 tons per week—that is, for six days when working twelve hours per day. The pumping power in this case is better proportioned to the work to be done than in any of the other orchards described, but in the latter the system followed has been to start on a limited scale, and to carry out the work in a thoroughly systematic and economical manner, a course which has proved satisfactory by results. It is worthy of mention that Mr. Dempsey, when speaking of the benefits of watering fruit trees direct, stated that the spraying of his trees with a mixture of soft soap and sulphur, under the instructions of the Director of Agriculture, has caused a difference of £200 in the value of his fruit for one season by destroying the orange mite, which discolours the skin of the fruit, and thus depreciates its value.

If the Minister approves of the awarding of two prizes for the irrigation of orchards, I beg to recommend that the first be awarded to Mr. Timothy Brien, and the second to Mr. G. H. Dempsey. Mr. Walker's irrigation is worthy of honourable mention.

B.—Farms.

The farms entered in the competition for the National prizes for irrigation were three in number, and were as shown in the following table:—

Name of Owner.	Location.
H. Wharton Mason	Tumut.
T. P. Wills-Allen	Gunnible, Gunnedah.
W. W. Wren (<i>pro</i> R. L. Tooth)	Kameruka, Bega.

The scale of marks which I have adopted is as follows:—

No. of item.	Detail of points.	Maximum No. of marks.
1.	Selection of land for irrigation	15
2.	Selection of source of supply and nature of appliances	10
3.	Selection of crops to be irrigated	15
4.	Application of water to land	30
5.	General economy of arrangements	30

100

The number of marks which I have allotted to the competitors are shown in the following table:—

No. of item.	W. W. Wren.	T. P. Wills-Allen.	H. Wharton Mason.
1.....	12	12	15
2.....	7	8	9
3.....	13	12	7
4.....	26	22	18
5.....	26	22	20
	84	76	69

In regard to the character of the farms inspected, I may explain that two of the three, namely, Mr. Wills-Allen's property and that managed by Mr. Wren, are intended to provide reserves of fodder for live stock, so as to be prepared for dry seasons. On the third property it is intended to carry on mixed farming of a more general character.

The Kameruka Estate consists of hilly land with narrow valleys, and practically no level or approximately uniform ground. The question for Mr. Wren to solve was how to provide reserves of fodder by irrigation under these adverse circumstances, and the manner in which he has solved it is highly creditable. The soil on the hill sides, near the best available water supply, is, as a rule, only from 5 to 9 inches in depth, but under it is an extensive layer of disintegrated granite, the depth of which is seldom found less than 2 or 3 feet, and is, as a general rule, much greater. On the whole it was a bold experiment to attempt irrigation of any crop under such circumstances, and I was not surprised to learn that Mr. Wren's intention to sow lucerne on such soil was regarded as absurd by most of his neighbours.

The

The system followed by Mr. Wren was to force the water through pipes to the top of a ridge, and then to conduct it in open channels commanding the land to be irrigated. In regard to both alignment and construction, these channels are superior to any I have seen elsewhere on farms I have inspected. The channels were carefully marked out with the aid of a simple but neat and effective water-level, constructed by Mr. Wren's engineer, and were taken out with a Hornsby draining plough. Very little dressing off of the channel was required.

In section they were only about 15 inches in top width and 7 or 8 inches in depth. For the irrigation of 30 acres of lucerne, one channel was carried along the top of the ridge, and a second at about a third of the distance down the slope. When irrigating the crop openings were made in the lower side of the channels at suitable intervals, and the uniformity of the crop showed that the watering had been carefully done. On the other side of the ridge a large extent of grass land had been watered, but it is not intended to continue this, as much better results can be obtained by extending the area of lucerne.

The power required is obtained from two Cornish boilers, which work a Blake pump, and raise the water to a total height of 246 feet. The source of supply is Tantawanglo Creek, and it has never been known to fail. The plant was guaranteed to raise 30,000 gallons per hour to this height, and though the pump does not work as smoothly as desirable, the quantity of water raised is quite up to expectations. The entire plant, including piping, cost in position about £3,000. The fuel used is the dead timber which is being cleared off the surrounding land, and the productive capacity of the irrigated land is kept up by bone-dust, which is crushed on the estate.

Regarding the economy of the operations, it is necessary to explain that the Kameruka Estate takes rank among the largest dairy farms in the world. The number of cows milked daily during summer is about 1,300, and all the operations on the estate are on a correspondingly large scale. In such a district the cost of carriage is heavy, and lucerne hay could scarcely be reckoned on to cost less than £6 per ton delivered, and has cost as much as £8 per ton. The necessity for being provided against a drought on such an estate is obvious, and Mr. Wren has satisfied himself as to the economy of the course he has adopted. The first crop of lucerne which he obtained yielded about $1\frac{1}{2}$ tons of hay per acre, and he reckons that an average crop of at least 1 ton of hay can be obtained four times annually. The irrigation of every crop costs about £1 per acre. This gives £120 per annum for four crops aggregating 120 tons. If interest and depreciation be taken at 10 per cent., the gross cost is £240 per annum for 120 tons of hay, or £3 10s. per ton, exclusive of sowing, cutting, and stacking, and of manure. This takes no account of the grass land, which was flooded. The result is highly satisfactory when it is considered that the irrigation is only being developed, and that a much larger area will be dealt with by the same plant.

The irrigation carried on by Mr. Wills-Allen is on a much larger scale, but there are practically no difficulties in the way, and there were no new problems to be solved. The land irrigated at Gunnible is a rich alluvial plain on the right bank of the river Namoi, from which the supply of water is obtained. The pump used is an 18-inch centrifugal, and the total lift is only slightly over 30 feet. The quantity of water delivered was stated by those in charge to be 3,000 gallons per minute, but from rough gaugings which I made I concluded that the quantity was at least 4,500 gallons per minute. The area irrigated during the past season was about 240 acres of lucerne, 80 acres of maize, and 12 acres of wheat; and in addition about 500 acres of grass land received a flooding. Hence the plant is not working up to near its full irrigating capacity.

Mr. Wills-Allen was one of the pioneers of irrigation in the northern district, and deserves every credit for his enterprise; but, as already indicated, the land is specially adapted for irrigation, and as large areas in the neighbourhood benefit from periodical floods, nature has frequently pointed out what should be done. The management of the irrigation is carried out economically, so far as the construction of works is concerned, but not in regard to the water used. The system of distribution channels is insufficient for requirements, so that some places are overwatered while others do not receive enough. There is an unevenness in the crops grown, arising partly from this cause, and partly from the ground not having been levelled. The channels have been made with the plough and delver, and I was informed that five men with twelve horses made a mile and a half of channel five furrows wide in five days. These channels are wide and shallow, the question of proportioning them and supplementing them by laterals apparently not having been considered.

The site of the pumping plant is a very good one, so that the defects in the arrangements for distributing the water can be remedied in a large measure as the development of the irrigation progresses.

The farm of Dr. H. Wharton Mason is on the Gilmore Creek, and close to the town boundary at Tumut. The Gilmore Creek, before flowing into the Tumut River, emerges from the hills, and flows through fertile alluvial flats. Dr. Mason's farm includes a large portion of these flats, and extends up to the place where the valley begins to widen out. It would be difficult to find a situation equally favourable for irrigation. The Gilmore Creek furnishes a permanent supply of water, which can be carried all over the farm by gravitation. Not only so, but the fall in the land is sufficient to give very considerable water power, which was at one time used to work a flour-mill. The remains of this mill is still on the ground, and the building is being repaired, and will be used as a butter factory and for other purposes, while the power will be utilised for various classes of work connected with the farm. The land is a light but rich loam, with river drift underlying it.

The arrangements for irrigation are still in an incomplete state. An area of about 100 acres was irrigated during the past season, but of this there were only about 8 acres of crops, the balance being grass land. The crops consisted chiefly of maize and sorghum, but potatoes and pumpkins were also successfully tried. The crops were uneven, and the ground had evidently not been properly prepared for irrigation, the operations being, in fact, still in the experimental stage. While much remains to be done before it can be considered that the remarkably favourable natural conditions are being utilized to the greatest advantage, it is only right to state that the result of the experiments made has been instructive and encouraging. It seldom happens that a medical practitioner, with a large amount of professional work to attend to, is either able or willing to devote his spare time to model farming. This is what Dr. Mason has done, and there seems every probability that he will soon have his plans in complete and successful operation. Having already ascertained the suitability of his land for dairy farming, and for growing maize, he has proved that at such a distance from market the best way of using maize and other crops is for feeding pigs, while the greater part of the skim milk from the separator can be utilised for the same purpose. Bacon, on Dr. Mason's farm, produced in this way, and cured according to a recipe recently published in the *Agricultural Gazette*, has proved equal, if not superior, to the best imported.

In conclusion, I trust that my recommendation as to awarding prizes under two divisions for irrigation will be adopted, and if so, I beg to recommend that a first prize be awarded to Mr. W. W. Wren, and a second prize to Mr. T. P. Wills-Allen.

(XIX.)

THE NATIONAL PRIZE COMPETITION FOR IRRIGATION FOR 1892.*

Report of the Chief Engineer for Water Conservation and Irrigation.

OWING, doubtless, in a large measure to the favourable rainfall during the past season, the number of entries for the national prizes for irrigation in the coastal district was reduced to one. On the other hand, notwithstanding that the rainfall, as a rule, was above the average, there was an increase this season in the entries from the country west of the Dividing Range. I have lately had good opportunity for ascertaining that, although the Colony has in recent years passed through a period of exceptionally high rainfall, there has been a steady increase of irrigation in the western districts. On every important river, and on several of the creeks, irrigation is conducted on a steadily increasing scale. It is surprising that so few entries for the prizes have come from the western parts of the Colony; but I have no doubt that the competition will increase as irrigation extends, and as the regulations relating to the national prizes become better known. It is encouraging that the entries from the country west of the Dividing Range are fairly representative of the tract of rich land which extends along the western margin of the range, and marks the beginning of the great western plains. The sources of water supply for irrigation in these cases were the river Namoi, the Lachlan River, and the Murrumbidgee River respectively.

IRRIGATION AS APPLIED TO GENERAL AGRICULTURE.

For the prizes for irrigation, as applied to general agriculture, there was only one entry, namely, the farm of Mr. T. P. Wills-Allen, of Gunnible, near Gunnedah. This farm is situated within a valuable pastoral estate, and is worked as an adjunct to this and two other pastoral properties of Mr. Wills-Allen. The objects of this irrigated farm are three-fold:—

- 1st. To provide reserves of fodder for dry seasons.
- 2nd. To supply horse feed for ordinary requirements.
- 3rd. To be used as an occasional fattening ground for sheep and cattle.

That the operation of this farm has been highly satisfactory is evidenced by the statement of its enterprising owner, that if he had to begin pastoral pursuits afresh, and possessed at the same time his present knowledge and experience, he would at the very outset order an irrigation plant as a necessary adjunct to successful management.

As Mr. Wills-Allen's farm was entered in the similar competition last year, and the plant used was then described in detail, it is not necessary to give more than a brief summary of the conditions under which the irrigation is carried out. The land irrigated is rich alluvium, and fronts on the river Namoi. Under this alluvium, sand and gravel are found at moderate depths, so that there is good natural drainage. The water for irrigation is pumped from the river Namoi by means of a centrifugal pump, worked by a 40-horse-power engine. There are two main distributary channels leading in opposite directions from the pump. The water is first delivered into a timber flume, and then passes into one or other of these channels, according to requirements, the flume being provided with simple stop-gates. A short length of each

* When this report was submitted the Water Conservation Branch was under the administration of the Minister for Mines and Agriculture.

each channel at the head is constructed of concrete and masonry, but excepting these lengths, earthen channels made with the plough and delver are used throughout. The extent of the farm is about 600 acres, of which about 40 acres are under crop, chiefly lucerne, while the remainder is grass land, which is irrigated at intervals, according to convenience and requirements. It is, however, Mr. Wills-Allen's intention to increase the area of cultivation, as the pumping plant is not worked nearly up to its capabilities.

The site for pumping has been very well chosen; the pumping plant is well suited to the work required, and is kept in excellent order; the management of the cultivation, and the choice of implements used leave little or nothing to be desired. The one point which seemed open to objection was that to which I called attention at last year's inspection, namely, the very large quantity of water used. This apparent extravagance is due largely to the absence of minor distributaries, and to the breadth of the existing channels. From the particulars furnished to me, I estimated that the quantity of water pumped up for one watering of the land is sometimes equivalent to a depth of a foot or more over the surface irrigated. In many places a watering such as this would be simply ruinous to the crops, but in the case of Mr. Wills-Allen's property, owing to the extreme porosity of the soil, and to the excellence of the natural drainage, no damage is done by this excessive watering. I ascertained that since last year Mr. Wills-Allen has given much consideration to this question, and that he decided to continue his present system on the grounds that:—

- (1st.) The water possesses valuable fertilising properties, so that not only is no harm done, but on the contrary, the land is enriched or at all events its fertility is fully maintained.
- (2nd.) The distribution in a more economical manner of the water by the use of laterals or minor distributaries would give more trouble in cutting the crops.
- (3rd.) That main distributaries constructed with a view to more economical use of the water would be more liable to damage from the sheep and cattle which are occasionally allowed on the irrigated land.

Under existing circumstances, I see no objection to these views being carried out; but it is necessary that it should be clearly understood that till legislation dealing with riparian rights is passed, all such irrigation is done on sufferance only, and will be subject to such regulations as may be deemed necessary. That such regulations will be necessary in the near future for the protection of irrigators cannot be doubted. On the river Namoi there is very little irrigation except that done by Mr. Wills-Allen, but in times like the present, when the necessity for new industries and new fields of enterprise is keenly felt, it cannot be expected that he will continue to hold such a monopoly. As irrigation on the Namoi develops, the necessity for regulations which will legalise the use of a certain portion of the available water by every landholder will quickly become apparent. Such regulations will give a legal right, but they will necessarily place a limit on the supply, and this limitation will show the necessity for adopting a more economical system of distributing the water than that which Mr. Wills-Allen has adopted.

Following the system of marks adopted last year, I award the numbers stated in the following table:—

Item.	Detail.	Maximum number of points.	Points awarded.
1	Selection of land for irrigation	15	12
2	Selection of source of supply and nature of appliances	10	8
3	Selection of crops to be irrigated	15	13
4	Application of water to land	30	25
5	General economy of arrangements.....	30	25
Total.....		100	83

In regard to the marks here awarded, it is necessary to explain that on considering the whole circumstances of the case, I came to the conclusion that existing circumstances and the proved success of the operations justify the system adopted by Mr. Wills-Allen, although in many places it would not be allowable, and in many others it would be ruinous. The success of irrigation in this Colony depends on the adoption of methods suited to the circumstances and conditions met with, and this is precisely what Mr. Wills-Allen has successfully accomplished.

I beg to recommend that the first prize for irrigation, as applied to general agriculture, be awarded to him.

IRRIGATION AS APPLIED TO ORCHARDS.

As already mentioned, the wetness of the past season so lessened the necessity for irrigation in the coastal district that only one competitor entered for the prizes in connection with irrigated orchards. The names of the competitors, and the location of their orchards, are as shown in the following table:—

Name of Competitor.	Situation of Orchard.	Source of Supply of Water.
Thomas Spencer	3 miles from Narrandera	Murrumbidgee River.
Thomas Tozer	2 miles from Forbes	Lachlan River.
George H. Dempsey	1 mile from Emu Plains	Well in Nepean River drift.

George H. Dempsey's orchard.—Mr. Dempsey's orchard was entered in the competition last year, and was then fully described. In the interval some minor improvements have been made in connection with the distribution of the water, but on the whole the remarks in last year's report apply very closely to the present circumstances. The orchard is partly on a slope, and partly on nearly level ground, but the whole orchard overlies the Nepean River drift, and through this has excellent subsoil drainage. The water is pumped into two 400-gallon tanks, which are placed at a sufficient elevation for household purposes as well as irrigation. For the irrigation of the trees on the sloping ground the water is passed into

into open furrows, while for the comparatively level ground iron pipes are laid on the surface of the ground through the centre of it, and the watering of the trees is done separately by means of a flexible hose. The iron pipes, when not in use, are unscrewed and put away, and the flexible hose is similarly cared for. The arrangements are in the highest degree economical and systematic.

Orchard of Mr. T. Tozer.—The irrigated orchard of Mr. T. Tozer at Forbes is situated in a bend of the river Lachlan, and about 2 miles upstream from the town. The land is of the most fertile description, consisting of grey alluvium overlying sandy drift, the latter being generally at a depth of 10 to 12 feet. A public road passes through the orchard, dividing it into two parts of about 7 acres and 5 acres in extent respectively, the water for irrigation being taken under the road in a timber culvert constructed by Mr. Tozer. The source of supply is the river Lachlan, from which the total lift at the time of my inspection was 34 feet. A centrifugal pump, having a 5-inch delivery-pipe, and worked by a 6-horse-power portable engine is used for raising the water. The selection of the site for the pump shows sound judgment, as the water can be taken from it by gravitation to all parts of the orchard. The main distributary channels are well constructed and fairly maintained; but the irrigation of the fruit trees and vines is roughly done, and no attempt is made at economical or uniform distribution. The orchard is remarkably productive, and it would seem that the ease and certainty with which a splendid crop of fruit can be obtained has led to a certain amount of looseness in the management of the watering. It is necessary, however, to state that Mr. Tozer is a firm believer in the fertilising properties of the water, and that this would justify a liberal use of it. On the other hand, while it has been proved that fodder crops will in some cases bear very profuse watering with advantage, the general experience is adverse to excessive watering of fruit-trees. The fruits chiefly grown here are peaches and apples, but pears, plums, nectarines, grapes, and almonds, are also grown, and, as a rule, with great success. This year the grape crop proved a failure. The yield in the other cases was, on the whole, very heavy, although, as one of the fruit experts of the Agricultural Department pointed out a few days before my arrival, some of the trees were not in a healthy state.

Orchard of Mr. T. Spencer.—The orchard of Mr. T. Spencer, about 3 miles from Narrandera, consists of land which was formerly covered densely with pine scrub. The soil is a reddish loam, which, if neglected, will bake and crack on the surface, though it is easily worked if properly attended to. The source of water supply is the Murrumbidgee River, and the lift at the time of my inspection was 35 feet. This may be regarded about the maximum, the river at that time being very low. The water is raised by a centrifugal pump, worked by an 8-horse-power engine. The bend on which the engine stands is high red land considerably above the level of the highest floods. The site for the pumping station might have been better chosen, as owing to its not being on the highest part of the land to be irrigated about 4 chains of fluming proved necessary. With the exception of this length, the main distributaries are well constructed earthen channels in the banks of which, at suitable intervals, outlet pipes of galvanised iron are fixed. The orchard is on ground which has sufficient slope to afford good natural drainage. The distribution of the water is done by means of furrows, which are run parallel to the rows of trees. At an interval of about half a day after the flow in the furrows is stopped a light American cultivator is used to work up the land between the trees, and it is found that by this practice any caking on the surface is prevented. The orchard, which is about 13 acres in extent, is kept in excellent order, and it may be mentioned that Mr. Spencer also irrigates about 4 acres of lucerne and 6 acres of other crops, chiefly for fodder.

The system of marking adopted last year and now continued is shown in the following table:—

No. of item.	Detail.	Maximum number of points.
1	Suitability of the land as to position and as to necessity for irrigation	10
2	Suitability as to soil	10
3	Suitability as to water supply and as to position of offtake or pump	10
4	Application of the water to the land	25
5	Suitability of crops to existing conditions.....	20
6	General economy of arrangements	25
	Total.....	100

As the results of my examination of the competing orchards, I award marks as follows:—

No. of items.	G. H. Dempsey.	T. Spencer.	T. Tozer.
1	8	9	8
2	10	9	9
3	10	8	10
4	23	21	15
5	20	20	20
6	23	20	15
	94	87	77

It will be seen from the figures given above that no difficulty was experienced in distinguishing between the claims of the competitors. Items 4 and 6 bear the most important part in deciding on the rival merits, and under these circumstances I considered the irrigation done by Mr. Tozer to rank much below that of the other competitors, both of whom have carried out their operations in a highly creditable style. I beg to recommend that the first prize for the best irrigated orchard be awarded to Mr. G. H. Dempsey, of Emu Plains, and that the second prize be awarded to Mr. Thomas Spencer, of Mosely, near Narrandera.

H. G. MCKINNEY,
Chief Engineer for Water Conservation and Irrigation.

(XX.)

UTILISATION OF THE SHOALHAVEN RIVER FOR HYDRAULIC SLUICING.

REPORT of the Chief Engineer for Water Conservation.

First Action.

15 September, 1893.

THE presence of large deposits of auriferous drifts along portion of the valley of the Shoalhaven River and the knowledge that the profitable working of these drifts was prevented by the scarcity of water, suggested the idea of utilising the waters of the Shoalhaven River for sluicing purposes. An inquiry into this question was recommended by the Under Secretary for Mines, and approved by the then Minister of that Department. In pursuance of instructions consequent on this approval I made an inspection of the Shoalhaven River and also of Lake Bathurst, the latter having also been mentioned as a possible source of supply of water for sluicing purposes. In my report, which was submitted on the 15th January, 1891, I expressed the opinion that it was practicable to divert a supply of water from the Shoalhaven River to the principal deposits of auriferous drift, that for the position of off-take the choice lay between two places situated some miles above the Warrai bridge, and that the prospect of being able to construct works which would prove remunerative was sufficiently favourable to warrant the carrying out of the necessary surveys. The question stood over for some time, but ultimately sanction for carrying out the surveys was granted by the present Minister for Mines.

Mr. Wade's Survey and Report.

Acting under this sanction, I gave the necessary instructions to Mr. Wade, Assistant Engineer, who has carried out the work in a satisfactory manner, and has submitted a carefully-prepared and comprehensive report. As the lines to be surveyed and levelled extend through hilly country, and in a number of places cross deep ravines, the work proved very arduous. On its completion I was under the necessity of sending Mr. Wade to take charge of the contract for the improvement of Yanko Creek. While engaged on that duty he was unable to submit his report—hence the delay, which was unavoidable on his part.

Results of Survey.

The result of the survey and levels of Mr. Wade is to show that, notwithstanding the difficult nature of the country along the Shoalhaven Valley, the waters of the Shoalhaven River can be diverted and utilised for hydraulic sluicing purposes under more favourable conditions than were anticipated in my report. Considering that the opinions given in my report were arrived at after a necessarily brief inspection of the Shoalhaven River, the extent to which they are borne out by a complete survey, combined with discharge observations, is very satisfactory.

Nature of the Scheme.

The surveys show that a channel having a general fall of 2 feet per mile can be constructed to divert a supply of water from the Shoalhaven River at a point about 2 miles down stream from the confluence of the Jembaicumbene Creek. This channel would be taken out on the left or west side of the river, and would continue on that side of the valley as far as the parish of Larbert. Mr. Wade proposes that the supply should be divided here, half to be taken across the river in a wrought iron syphon pipe, while the other half would continue to follow the left side of the valley through the parishes of Oallen, Jerralong, and Nerrimunga.

Character of Conduit.

The main channel would, as a rule, be in open cutting, but in some instances wrought-iron syphon pipes and flumes will be required for crossing ravines, and in a few cases tunnels will be required to pass through ridges. The material met with in the cuttings and tunnels is, as a general rule, either granite or slate. While the cost of excavation will be heavy, the hardness of the rock passed through will render lining unnecessary in either the tunnels or the open channel.

Amendment of Proposals.

Since the submission of Mr. Wade's report I have had a statement prepared by him showing the cost of the various lengths of channel into which the scheme may be divided. This statement shows that while the entire scheme is estimated to cost £228,000, that part of it which would bring the supply of water to the first large area of auriferous deposits would cost little more than £84,000.

Proposals now submitted.

The foregoing is a brief outline of the result of the survey and of the conclusions arrived at. In further support of the opinions and recommendations which I wish to offer, it is necessary to call attention to some important considerations bearing on the case.

Extent and Value of Auriferous Drifts.

In the accompanying tracing the approximate area of gold-bearing drifts in the parishes of Warrai, Larbert, Oallen, and Jerralong, on the left side of the Shoalhaven River, is 29,500 acres. The average depths of these drifts can be only roughly estimated, but that mentioned by Mr. Wade—namely, 20 feet—is probably within the mark. The quantity of gold in them is also a point in regard to which only very rough approximations are possible, but, fortunately, there is some substantial information in regard to it. In the first place, there is the fact that at many places these drifts have been worked in the most primitive manner by using such small quantities of surface water as could easily be made available, and even in this way miners have been able to make fair wages. In the second place, sluicing has been successfully carried on on a considerable scale and with profitable results so long as the supply of water lasted. In the third place, I have been shown the results obtained by carefully washing some dishes of the drift taken as fair representative samples, and the gold in these varied from a few colours up to 10 grains per dish, while in not one case was gold absent. Taking these facts into account, it is probably well within

within the mark to take one-tenth of a grain per dish as a safe average. This is equal to 13 grains per cubic yard. Taking the value of the gold at £3 15s. per ounce, the value of that in every cubic yard is 2s. The fact that men are able to make fair wages by a very laborious process of sluicing with surface water tends strongly to show that this is not an excessive statement. Comparing this with the yield from auriferous drifts worked in thirty-three different places in the Western States of America, it appears that of this number only two gave a higher yield per cubic yard than that estimated in the case of the Shoalhaven drifts, while the average of the thirty-three was only $3\frac{3}{8}$ grains, valued at $6\frac{3}{8}$ pence per cubic yard. By far the most extensive operations in connection with these mines were in the Gold Run district and the North Blomfield mine, the former of which sluiced 43,000,000 of cubic yards in three years, and the latter thirty millions of cubic yards in the same period. The value of the gold obtained averaged only 2·4 pence per cubic yard in the former case, and 4·35 pence per cubic yard in the latter. The expenditure in the former case amounted to 2d. per cubic yard, which seems to be a common rate of outlay, though in one case there was actually a small profit obtained in working drift which yielded gold to the value of only 1·45 pence per cubic yard. From these considerations it may be concluded that while the value of the gold may fairly be estimated at 2s. per cubic yard of drift, the cost of obtaining it should be from 2d. to 3d. per cubic yard.

Quantity of Water and Cost of Sluicing.

The quantity of water required per cubic yard of drift has been reported in "sluice-heads" in a number of instances, but unfortunately the term "sluice-heads" has many definitions. For instance, in this Colony the term "box sluice-heads" and "ground sluice-heads" are defined as the quantity of water flowing in a wooden flume of specified dimensions, and with specified depths, but nothing is stated as to whether the wood is to be rough or planed—a point which in such a small flume would make a very material difference. The only case, so far as I am aware, in which the term "sluice-head" has been clearly defined is in New Zealand where it is described as a flow of 1 cubic foot per second. Mr. H. A. Gordon, Inspecting Engineer for Mines in that colony, has reduced the results obtained in the cases of a number of American mines to this basis, and thereby furnishes definite and valuable information as to the quantity of water required in hydraulic sluicing. The quantity of cubic yards washed in a day will naturally vary with the nature, depth, and position of the drift, and with the head of water available. In the case of the North Blomfield mine, a flow of 1 cubic foot per second, washed on an average 168 cubic yards per day, although the drift was so cemented as to require to be broken up in the first instance by blasting. In this case there was a great depth of drift deposit—about 280 feet, and the head of water was about 200 feet. In estimating the result which may reasonably be expected in such a project as that now under consideration, it is on all grounds advisable to adopt the maximum of outlay, and the minimum of results likely to arise. On this principle, and notwithstanding the fact that the auriferous drifts of the Shoalhaven Valley are as a rule loose and sandy, and easily worked, I assume that every cubic foot per second will wash only 80 cubic yards of drift in twenty-four hours. Taking, as already explained, the gross value of the gold at 2s. per cubic yard, the total return in value obtained by the aid of a flow of 1 cubic foot per second will be £8 per day. Allowing 3d. per cubic yard as the cost of working, the net return from this flow will be £7 per day or £42 per week.

Quantity of Water available.

The quantity of water which may be diverted from the Shoalhaven River was estimated in my original report at 120 cubic feet per second. At that time no records were available, and no discharge observations had been taken. Since then, however, records have been kept, and Mr. Wade has taken discharge observations with the result that it has been proved that in an unusually dry year the discharge fell on thirty-five days below 100 cubic feet per second. Notwithstanding this fact, I am of opinion, that the circumstances warrant the construction of works capable of carrying 120 cubic feet per second, because in the first place it has been proved that, as a rule, that quantity could be obtained during at least ten months in the year, and in the second place, the full supply is not required constantly on account of intervals necessary for collection of the gold and other causes. Taking then a discharge of 120 cubic feet per second, and allowing one-sixth for loss and waste, it will be reasonable to anticipate that the water used will be equivalent to a supply of 100 cubic feet per second for 260 working days. The quantity of material sluiced during that time would be 2,080,000 cubic yards, yielding gold to the net value of £182,000.

Proposed Outlay.

The cost of the works has been estimated by Mr. Wade, on the basis of a supply of 100 cubic feet per second. I have examined these estimates, and consider that the rates assumed are ample to cover the cost of the works. The cost of enlarged works, to carry 120 cubic feet per second instead of 100 cubic feet, would be materially less in proportion than the increase of the supply of water. Thus, while the cost of the works as far as the point marked ("P") in the tracing would be £84,166, the sum of £100,000 would be an outside estimate for the enlarged conduit as far as that point. Interest on that, at $4\frac{1}{2}$ per cent., would amount to £4,500, and the cost of maintenance and repairs should be amply provided by the expenditure of £500 per annum.

Probable Returns.

Regarding the revenue which such a supply of water would return, I may refer to the statement made in my original report, and confirmed by Mr. Slee, Chief Inspector of Mines, that working miners were willing to pay £4 per week for a "box sluice" of water in the district now proposed to be provided for as described. This rate assumed, too, that the water would not be delivered under pressure. In my original report I assumed that 100 cubic feet per second was equal to 160 box sluices, but I find that in reality 100 cubic feet per second is equal to over 200 box sluices. Taking the latter number, the letting value of the water should be £800 per week. If it be assumed that the whole supply will be used during only forty-three weeks in a year, the revenue would be £34,400 per annum. This amount, it is to be borne in mind, is arrived at by assuming for water supplied under an average pressure of 120 feet head, a rate somewhat under that which is considered fair for water supplied under no pressure. Hence, by adopting what appears to be the highest reasonable figures for the outlay, and the lowest reasonable figures for the returns, it appears that the project, after returning $4\frac{1}{2}$ per cent. interest, and the cost of maintenance, would show a profit of £29,400 per annum.

Extent

Extent of Project.

The area of deposits commanded by the outlay mentioned would be about 7,800 acres. Assuming an average depth of 20 feet, the quantity of drift in this area amounts to 251,680,000 cubic yards. Deducting one-third, to allow for material which cannot, owing to its position or its character, be profitably worked, there remains 167,787,000 cubic yards, and this, at the rate of working already estimated, will not be exhausted until after eighty years' operations are complete. By an extension of the conduit, when the best part of this great quantity of drift has been washed, the deposits in the parish of Larbert, covering an area of over 9,000 acres, can be dealt with, and after that the deposits in the parish of Oallen, which extends over an area of more than 10,000 acres. It is manifest from these figures that the area and value of the drift deposits would warrant the construction of a much larger conduit if a more abundant water supply were available.

Probable effect of Detritus.

The question of the effect of the tailings on the Shoalhaven River is a very important one. From the circumstances of the case I do not, however, think that this question is one which should materially affect the project now recommended. As a rule the Shoalhaven River at the part near the proposed line of conduit flows along a narrow gorge, the land on both sides being generally inferior in quality; so that any rise of the river-bed would affect but a small area, and that area comprising poor land. The levels confirm the impression created by inspection of the river, that the fall in the bed is very irregular, series of rapids alternating with long reaches of moderate fall. The tendency will, doubtless, be to accumulate deposits in the latter lengths of the river, and thus to produce a more uniform rate of fall. While this question of the detritus is a very important one, which will require to be carefully watched and considered from the outset, I do not think it likely for many years to cause any trouble or involve any outlay which would in a remote degree counterbalance the benefits arising from the scheme proposed.

System of construction and management recommended.

With regard to the system which should be pursued in the construction and management of the proposed works, I know of no better arrangement than that which I have already recommended in connection with the proposed Murrumbidgee southern canal. This arrangement is that in the first instance the Minister should, by announcement in the *Gazette*, call for offers for the water supply available; that contracts for the supply and use of the water should be entered into before the works are started; that when a sufficient number of such contracts have been entered into the works should be commenced and carried out by the Government; and that the various mining lessees should make their connections with the main channel at their own expense, such connections to be approved by the Minister on certificates to the effect that in every case the connection would divert only the quantity of water specified in the contract. Under this system the Government would construct and maintain only the main conduit, while, as the various mining lessees would make their own arrangements for the use of the water, and would pay for the quantity taken from the main channel, it would be to their interest to economise the water, and use it to the greatest advantage. The system of contracting beforehand for a specified quantity of water to be delivered for a specified period would provide a revenue from the outset, while the immense area of the gold-bearing deposits would for a long time keep the demand in excess of the supply.

Recommendation of project.

The manner in which the waters of the western rivers of the Colony run to waste instead of being utilised to increase the productiveness of enormous areas of land is in some cases excusable on the ground that the works required would have to be in operation for considerable periods before they would return interest on the outlay. In this case all the information available tends to show that the proposed scheme would be highly remunerative from the time of its completion. I have, therefore, no hesitation in strongly recommending it for the favourable consideration of the Minister.

H. G. MCKINNEY,
Chief Engineer for Water Conservation and Irrigation.

Appearance in the standard 2-foot tube	Clear	

Composition of the Dissolved Solids:—

Sodium Chloride...	6.91	grains per gallon.
Sodium Bi-carbonate	40.60	" "
Calcium Bi-carbonate	1.12	" "
Loss on ignition	3.08	" "
Magnesium Carbonate	Traces.	

General Observations:—

The water is fit for household and dietetic purposes, and will prove to be useful for steam purposes. The water becomes alkaline upon boiling, owing to the expulsion of the carbonic acid.

[7 Maps and 23 Illustrations.]

NO. 1.—TUNNEL NO. 4, KIAMA TO NOWRA RAILWAY.

This is a view of the south end of Tunnel No. 4, at 73 miles 70 chains from Sydney. The tunnel is for a single line of railway; it is 345 yards long, straight from end to end, and has a grade of 1 in 226. The lining is of concrete 18 inches thick, and the fronts are also of the same material. The depth of the cutting at the face of the tunnel is 62 feet.

NO. 2.—BRIDGE OVER BROUGHTON MILL CREEK, BERRY, KIAMA TO NOWRA RAILWAY.

This is a good example of the timber structures now adopted. The bridge is built over Broughton Mill Creek at Berry, 83 miles 77 chains from Sydney, and consists of six 24-foot spans; each span has three double 12-inch x 12-inch ironbark girders keyed together as shown, and supported on three pile piers.

NO. 3A.—BRIDGE OVER LEYCESTER CREEK LISMORE, LISMORE TO THE TWEED RAILWAY.

NO. 3B.—BRIDGE OVER LEYCESTER CREEK, LISMORE, LISMORE TO THE TWEED RAILWAY.

This bridge consists of three 120-foot steel truss spans and two 44-foot wrought-iron plate girders, supported on two piers formed of cast-iron cylinders, varying in diameter from 9 to 5 feet, two concrete piers, and concrete abutments. The bridge deck is of the open top style.

NO. 4.—BRIDGE OVER WILSON'S CREEK, LISMORE TO THE TWEED RAILWAY.

The Bridge over Wilson's Creek, at 9 miles 63 chains from Lismore, has one 120-foot steel truss span and two 44-foot continuous wrought-iron plate girders supported on one pier of cast-iron cylinder 5 feet diameter, one concrete pier and concrete abutments. The deck is similar to that of Leycester Creek Bridge.

NO. 5.—TUNNEL, MILSON'S POINT EXTENSION RAILWAY.

This is a view of the south end of the tunnel substituted for cutting No. 8 at 11 miles 55 chains from Hornsby. The tunnel is for a double line, 167 yards long, partly on the straight and partly on a curve of 20 chains radius. The gradient is 1 in 50. The tunnel is driven through sandstone rock, being lined throughout with brickwork 18 inches thick. The cutting at the commencement of the tunnel is 63 feet deep, and also composed of sandstone rock.

NO. 6.—BRICK VIADUCT, LAVENDER BAY, MILSON'S POINT EXTENSION RAILWAY.

This view shows the brick viaduct at the head of Lavender Bay, the excavation along Lavender Bay, and the Milson's Point Station in the distance. The viaduct consists of two 20-foot, two 25-foot, and two 30-foot brick arches, and is built for the purpose of giving access to the valuable properties resumed from Messrs. Cliff and Charlton. The excavation between the viaduct and Milson's Point amounts to 140 000 cubic yards of rock, and the area of the ground formed and reclaimed with this excavation provides ample room for the Milson's Point Station yard, and for future goods siding.

No. 13.—SYDNEY HOSPITAL, FROM MACQUARIE-STREET.

Parliamentary sanction was given for the completion of the Sydney Hospital on the 29th March, 1892. The designs of Mr. John Kirkpatrick, Architect, of Sydney, were approved; and, tenders having been invited, the tender of Mr. A. M. Allan at £51,989 was accepted. The new work to be carried out included the placing of two additional stories on the central block, and of an extra story on the North, South, and East blocks, the connection of the various buildings by verandahs and bridges, and the provision of a thorough system of sanitation. Other contracts were let for the erection of an operating block (with operating theatre and chapel and eight surgical wards), hydraulic lifts, lighting and ventilation, steam heaters, &c. The total cost is estimated at £64,911, or £368 10s. 3d. per bed. By the construction of the new buildings accommodation is provided for 176 beds, making with those in the present edifice a total of 374 beds.

PARLIAMENTARY STANDING COMMITTEE ON PUBLIC WORKS.

SEVENTH GENERAL REPORT.

To His Excellency the Right Honorable SIR ROBERT WILLIAM DUFF, a Member of Her Majesty's Most Honorable Privy Council, a Knight Grand Cross of the Most Distinguished Order of Saint Michael and Saint George, Govern'or and Commander-in-Chief of the Colony of New South Wales and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY,—

The Parliamentary Standing Committee on Public Works, appointed during the last Session of Parliament, under the Public Works Act of 1888, 51 Vic. No. 37, the Public Works Act Amendment Act of 1889, 52 Vic. No. 26, and the Public Works (Committees' Remuneration) Act of 1889, 53 Vic. No. 11, have the honor to submit the following General Report of their proceedings since the date of their last General Report, 29th August, 1892:—

1. At the date of the last General Report the Committee had inquired into nine out of fifteen proposed works which had been referred to them. Of the remaining six, inquiries were proceeding with reference to three, and three were on the Committee's business paper not dealt with. Since that time one of the works among the nine inquired into has been referred to the Committee for further consideration and report; one other proposed work has come before them; and the inquiries respecting the whole have been completed.

2. The works which have been under inquiry since the date of the last General Report are:—

	Estimated Cost.
Sewerage Works for Parramatta	£75,926
Railway from Grafton to Lismore	662,000
Railway from Eden to Bega	564,000
Water Supply for Tamworth	22,500*
Water Supply for Lithgow	15,000*
Water Supply for Armidale	43,500*
Railway from Glen Innes to Inverell (second reference)	421,400
Waterworks for the town of Junee	45,000
Total	£1,849,326

3. Four of these have been passed as proposed; two have been passed with modifications; and two have been negatived.

The works passed as proposed are:—

Water Supply for Tamworth	£22,500
Water Supply for Lithgow	15,000
Water Supply for Armidale	43,500
Waterworks for the town of Junee	45,000
Total	£126,000

These four works of water supply the Committee found to be well designed, but in the case of Tamworth there did not appear to have been a sufficient investigation as to the quantity and quality of the water available from the source of supply—the drift in the bed of the rivers Peel and Cockburn. While, therefore, the Committee recommended that the work should be carried out, they were of opinion

* The estimated cost of the works of Water Supply for Tamworth, Lithgow, and Armidale as stated in the last General Report was afterwards revised, and the amounts submitted definitely to the Committee were those now given.

opinion that before it was commenced a thorough test should be made of the quantity of water which the drift was likely to supply. The quality of the water was determined through Mr. W. M. Hamlet, Government Analyst, who at the request of the Committee proceeded to Tamworth, and obtained from the proposed source of supply several samples which he afterwards subjected to analysis, with the result that the water was found to be of very superior quality—far superior to that usually found in towns, remarkably free from organic impurity, and quite free from sewage contamination. A similar step was taken in connection with the proposed water-works for the town of Junee. The satisfactory nature of the rock which would form the bed of the storage reservoir when constructed, and of the water at present obtainable at the site and likely to be supplied from the reservoir, being questioned by some of the witnesses before the Committee, the services of Mr. Hamlet were again obtained, and in accordance with a resolution of the Sectional Committee appointed in this inquiry, Professor T. W. E. David, of the University of Sydney, was asked to visit the site of the proposed storage reservoir and report upon the nature of the rock and upon some saline springs which occur in parts of it. The examinations made by these experts remove all doubt both as to the rock and the water, the reports indicating that everything in regard to these important elements in the scheme will when the works shall have been constructed be found satisfactory.

Works passed
with modifica-
tions.

4. The two works passed in a modified form are the following :—

Railway from Grafton to Lismore (18 miles only);
Railway from Glen Innes to Inverell.

With regard to the railway from Grafton to Lismore the Committee consider “that it is best to move slowly,” and they recommend that for the present the line should be constructed from Lismore to Casino only, that if that be done it should be with the provision that the cost should not exceed £6,000 per mile, and that the betterment principle be applied to the land served by the railway. Constructing the line between Lismore and Casino only at £6,000 per mile will reduce the proposed total expenditure of £662,000 to £108,000. Lismore is the present terminus of the railway now being constructed from Murwillumbah, on the river Tweed, and by extending this line to Casino that district will be connected with the navigable portion of the Richmond River and with Byron Bay, while the terminus of the railway can with advantage remain there until the route for a line from the coast to the table-land be chosen, or a continuation of the coast railway further southwards be justifiable. The railway from Glen Innes to Inverell the Committee are of opinion may be constructed if the cost of construction can be kept within £7,000 per mile, the working expenses of the railway and the interest on the cost of construction provided for by charging special local traffic rates, and the betterment principle applied to the land served by the line. At £7,000 per mile the total cost of constructing this railway would be £369,862, instead of £421,400 the estimated cost placed before the Committee.

Works
negatived.

5. The works which, after inquiry, the Committee did not consider it expedient should be carried out, and therefore negatived, are :—

Sewerage Works for Parramatta	£75,926
Railway from Eden to Bega	564,000

One of the principal features in the sewerage scheme for Parramatta is the discharge of the sewage upon an area of 40 acres of land, to which 22 acres may be added by reclamation, and the cultivation of cereals and other crops upon the land according to the practice followed on sewage farms. The proposed sewage farm the Committee consider to be too small in extent and unsuitable in regard to the nature of its soil, and they recommend that another method of dealing with the sewage should be adopted. This conclusion they arrived at after very careful inquiry, which embraced not only an inspection of the locality and the taking of evidence by the Committee, but a special examination of the scheme by a competent and recognised authority on sewerage works employed by the Committee for the purpose.

The railway from Eden to Bega the Committee do not consider it would be expedient to construct, because the present resources of the district are not, in their opinion, such as to warrant the construction of a line at the estimated cost—£15,350 per mile. They think, however, that it may be found possible to supply the district with railway communication by what is known as a cheap railway, and that the construction

construction of such a railway may be favourably considered. The subject of cheap railways was one of prominence in this inquiry, and in their report the Committee commend the evidence upon it to the attention of the Legislative Assembly. It appears to be quite possible to construct one of these railways in a district like that from Eden to Bega for from £6,000 to £8,000 per mile. This cost, though not what in relation to many districts would be considered cheap, is cheap for railway construction in the Eden to Bega district. Even at £8,000 per mile the line would be one of narrow-gauge and sharp curves. But it is in respect to cheap railways as applicable to other places besides the Eden to Bega district, and available as a means not only for supplying the want of communication but of adding to the traffic of the general railway system, that the evidence in this inquiry is specially useful. Statements and opinions will be found from both the Engineer-in-chief for Railway Construction and the Railway Commissioners as to the feasibility of introducing cheap railways into the Colony, either in districts which in the ordinary course of events cannot for many years be connected with the main railways, or in those the close proximity of which to the existing lines should make the cheaply constructed lines branches of the general system. The question of gauge was, of course, one of the principal points in the inquiry, and some useful information respecting narrow-gauge railways in Europe was given in evidence by a witness acquainted with the progress and latest developments in this respect. In view of the desirableness of reducing as much as possible the cost of new railways, now that the expensive main lines may be said to have been completed, the whole of the evidence obtained by the Committee on the subject of cheap railways is of value. The Engineer-in-Chief for Railway Construction and the Railway Commissioners are very sensible of the importance of reducing as much as possible the cost of railway construction, and the prominence given to the matter in this inquiry will doubtless lead to its receiving further attention.

6. Two returns, in addition to a copy of the Committee's Minutes of Proceedings, will be found attached to this Report. One of these is similar to that which has been attached to preceding General Reports, brought up to date. It gives a list of the public works inquired into by the several Committees which have been appointed since the passing of the Public Works Act, with the results of the inquiries. The other supplies information so arranged that the operations in any inquiry may be traced from the reference of the work by the Legislative Assembly to the assent to the Bill which authorises the construction of the work or the motion in Parliament by which it is negatived.

7. With respect to the work of the present Committee, the fourth appointed under the Act, it will be seen from the returns that they have had before them seventeen proposed works (one, the railway from Glen Innes to Inverell, being twice referred to them for inquiry), involving an estimated total expenditure, as placed before the Committee, of £2,992,078. The recommendations of the Committee in respect of these works represent an estimated total expenditure of £981,214, a difference of £2,010,864. Taking from this sum £427,400, the estimated cost of the Railway from Glen Innes to Inverell in the first reference of this work to the Committee, when the proposal was negatived, the figures show that the Committee have effected a reduction in the total expenditure as proposed, of £1,583,464.

8. The four Committees have had fifty-six works under consideration (three, the Railway to connect the North Shore Railway with Milson's Point, the Hospital for the Insane at Kenmore, and the Railway from Glen Innes to Inverell, having been twice referred for inquiry), the estimated total expenditure, as proposed, being £12,517,896. The Committees' recommendations, including £34,938 excess in two cases of the cost proposed, amount to £7,928,326, leaving a difference of £4,589,570. Allowing, however, for the inclusion of the estimated cost of the North Shore Railway (£262,000), and that of the Railway from Glen Innes to Inverell (£427,400), in the first reference of these works, when they were negatived, together with the estimated cost of the Hospital for the Insane upon the Kenmore Estate, near Goulburn (£120,000), a work which before the completion of the Committee's inquiry respecting it was withdrawn, and £108,000, the estimated cost of the portion of the proposed Railway from Grafton to Lismore, which is a part of the line originally proposed as from Grafton to the Tweed, the reduction in the total expenditure proposed actually made by the four Committees to the present date is £3,672,170.

Improved manner of submitting proposed works to the Committee.

9. While the several Committees have been able to effect a material reduction in the total amount of expenditure proposed in connection with the various works that have been under consideration, their investigations have led to beneficial reforms in the manner in which works are designed and placed before them. The evidence in one of the latest inquiries, shows that under the system which existed prior to the appointment of the first Committee insufficient effort was made in the Railway Construction Department either to find the best route for a railway or to keep down the cost of construction. The work of the railway surveyor was apparently restricted by explicit instructions to discover the shortest route with a grade not exceeding 1 in 40. In the cases of several of the railways which have been inquired into by one or other of the Committees and recommended by them for construction, there has been an improvement of grade after the works have come before them; and proposed railways with a grade of 1 in 40 are now matters of the past. Care in the preparation of other classes of works referred to the Committee, so that their design shall be acceptable and the estimated expenditure upon them kept within reasonable limits, is also now noticeable.

Sittings held and witnesses examined.

10. At the date of their last General Report the present Committee had been in office five months, and they had held 66 meetings, and examined 174 witnesses. Three Sectional Committees had been appointed, and they had held 42 sittings, and examined 237 witnesses. Since then the Committee have held 40 meetings, and as part of the business of those meetings examined 59 witnesses. In addition to this four Sectional Committees have been appointed, and they held 25 meetings and examined 98 witnesses.

Regulations under section 17 of the Public Works Act.

11. Under section 17 of the Public Works Act there may be framed, for giving effect to the Act, regulations which, after approval by the Governor and publication in the *Government Gazette*, shall have the full force of law. Copies of them must be laid before Parliament within fourteen days after publication in the *Gazette*, if Parliament be then in session, and, if not, within fourteen days from the commencement of the next session of Parliament. Up to the present the Committee have carried out their inquiries without having such regulations for their guidance, sufficient opportunity for framing them not having occurred; but recently the subject was considered, and a list of regulations prepared and adopted by the Committee. They will be forwarded to the Honorable the Colonial Secretary for the approval of His Excellency the Governor and the Executive Council, and, if approved, will be of material assistance to this and future Committees.

J. GARRARD,
Chairman.

Office of the Parliamentary Standing Committee on Public Works,
Sydney, 26 April, 1893.

PARLIAMENTARY STANDING COMMITTEE ON PUBLIC WORKS.

RECORD OF INQUIRIES.

LIST of Proposed Public Works inquired into by the four Committees, with the results of their inquiries, from 27 August, 1888, the date of the first sitting of the first Committee appointed under the Act, to 26 April, 1893.

Date of inquiry.	Proposed Work.	Expenditure proposed by the Government.	Expenditure recommended by the Committee.	Amount in excess of that proposed.	Amount in reduction of that proposed.	Remarks.
1888. 4 Sept. to 22 Oct.	Improvements to the Circular Quay.	£ 120,000	£ 125,000	£ 5,000	The Committee recommended an alteration in the plan of these improvements, by which the total estimated cost would be increased to £125,000.
26 Sept. to 22 Oct.	Storage reservoir at Potts' Hill, and second line of pipes to Crown-street.	120,000 165,000	} 285,000	Recommended as proposed.
13 Sept. to 22 Oct.	New Central Police Court	48,000		48,000	
4 Oct. to 22 Oct.	Drainage works, Manly...	34,114	22,000	12,114	The Committee recommended the adoption of a modified plan of these drainage works, by which the total estimated cost would not exceed £22,000.
10 Oct. to 22 Oct.	Drainage works, North Shore.	77,062	107,000	29,938	The Committee recommended the adoption of the complete scheme proposed in relation to this work, and the estimated cost of which, as shown by the evidence, is £107,000.
31 Aug. to 22 Oct.	Harbour improvements at Newcastle.	112,000	112,000	Recommended as proposed.
19 Sept. to 22 Oct.	Wharfage accommodation, Woolloomooloo Bay.	42,000	42,000	The Committee were of opinion that the proposed expenditure was not justified either by the requirements in connection with the wharfage accommodation of the port, or by the nature of the proposal if regarded as a scheme for the improvement of a very valuable Government property.
16 Nov. to 1889. 11 Jan.	Bridge at the Spit, Middle Harbour.	62,000	62,000	The Committee decided that the proposed expenditure was not justified by the evidence, and that a steam-punt would meet the requirements of the district in the vicinity of the proposed work for some years to come.
1888. 7 Dec. to 1889. 27 Aug.	Drainage works for the Western Suburbs.	830,304	830,304	Recommended as proposed.
26 June to 30 Sept.	Improvements to the entrance of the Richmond River.	326,000	326,000	The Committee recommended that the proposed works be carried out in a certain order, so that the results from the works first constructed might be ascertained before others were proceeded with.
9 Oct. to 11 Dec.	Railway to connect North Shore Railway with Port Jackson, at Milson's Point.*	262,000	262,000	The Committee considered, for various reasons stated in their report on the subject, that the work as proposed should not be carried out.
29 Aug. to 12 Dec.	Railway from Culcairn to Corowa.	197,300 (or £4,184 per mile.)	164,500 (or £3,500 per mile.)	32,800	The Committee were of opinion that this line should be constructed at a cost not exceeding £3,500 per mile.
22 Aug. to 19 Dec.	Railway from Goulburn to Crookwell.	198,300 (or £5,984 per mile.)	148,500 (or £4,500 per mile.)	49,800	The Committee considered that the cost of this railway should not exceed £4,500 per mile, and that a saving should also be effected by utilizing a certain portion of the present main line instead of taking the proposed railway through a part of the city of Goulburn.
1890. 22 Jan. to 6 Feb. 1889.	Dredge and plant for Sydney Harbour.	30,000	30,000	The evidence showed that this class of dredge was not required.
25 Sept. to 1890. 18 Feb.	Railway from Nyngan to Cobar.	207,360	207,360	The Committee recommended the construction of this railway as part of a line which should be extended to Wilcannia and Broken Hill.
14 Jan. to 11 Feb.	Offices for the Board of Water Supply and Sewerage.	50,000	50,000	Recommended as proposed.
14 Jan. to 6 Feb.	Reticulation of the Western Suburbs Drainage Scheme.	713,592	713,592	Recommended as proposed.
14 Jan. to 11 Feb.	Extension of Sydney Water Supply to Southern Suburbs—Hurstville and Rockdale.	66,000	66,000	This expenditure was rendered unnecessary by reason of a temporary water-supply scheme being sufficient to meet requirements for some years.
19 Nov. to 2 April.	Railway from Marrickville to the Burwood Road.	90,250	90,250	Recommended as proposed.
	Carried forward.....£	3,751,282	3,229,506	34,938	556,714	

List of Proposed Public Works inquired into by the Committee, &c.—*continued.*

Date of inquiry.	Proposed Work.	Expenditure proposed by the Government.	Expenditure recommended by the Committee.	Amount in excess of that proposed.	Amount in reduction of that proposed.	Remarks.
		£	£	£	£	
1890.	Brought forward ...	3,751,282	3,229,506	34,938	556,714	
23 Oct. to 24 April.	Improvements to the entrance of the Clarence River.	580,900	211,900	369,000	In this case the Committee recommended the construction of only a portion of the works proposed, as they were of opinion that when this portion had been constructed it might be found that the remainder would not be required.
31 Oct. to 15 April.	Breakwater at Byron Bay.	241,723	241,723	The original estimate for this work was £162,000; the increase was due to a difficulty in obtaining stone.
4 Dec. to 24 April.	Railway from Kiama to Nowra.	381,390	381,390	In this case there was an original estimate of £441,663. The reduction was due to an amended estimate made by the Acting Engineer-in-Chief for Railways since the railway was referred to the Committee.
12 Nov. to 24 April.	Railway from Grafton to the Tweed.	1,728,100	800,000	928,100	The Committee recommended that this railway should be constructed from Lismore to Murwillumbah, instead of from Grafton to Murwillumbah, the Committee's recommendation involving a length of about 60½ miles as compared with 140 miles 76 chains, the length of the line as referred to them by the Legislative Assembly.
15 Jan. to 24 April.	Railway from Cootamundra to Temora.	138,000 (or £3,656 per mile.)	125,400 (or £3,300 per mile.)	12,600	The Committee considered that the cost of constructing this railway should not exceed £3,300 per mile.
23 Jan. to 24 April.	Railway from Moss Vale to Robertson.	84,900	84,900	The Committee negated this proposal because they considered another route, described in their report, was preferable.
23 Jan. to 25 Mar.	Railway from Mudgee to Guilgong.	109,330	109,330	The Committee decided against this work, on the ground that any extension of the Mudgee Railway should form part of a more comprehensive proposal, the consideration of which should be deferred until after the suggestion for the connection of the Northern and Western systems, by a line between Dubbo and Werris Creek, has been dealt with.
12 Feb. to 24 April.	Bridge over Tarban Creek, Parramatta River.	26,000	26,000	The Committee considered this bridge to be unnecessary.
20 Feb. to 15 April.	Bridge over the Hunter River, at Jerry's Plains.	20,000	20,000	The Committee considered that a less expensive bridge would be sufficient to meet requirements.
25 Feb. to 24 April.	Bridge to connect Bullock Island with the mainland at Newcastle.	33,000	33,000	The Committee considered that this proposed expenditure was premature, pending certain reclamation works.
12 Feb. to 21 May.	Iron Bridge at Cowra ..	26,537	26,537	The original proposal represented an expenditure of £69,971, which amount was afterwards reduced to £26,537, as the result of a revision of the system of bridge-building in the Colony.
22 Jan. to 21 May.	Railway from Molong to Parkes and Forbes.	433,000	433,000	Recommended as proposed.
28 May to 8 July.	Hospital for the Insane upon the Kenmore Estate, near Goulburn	120,000	120,000	This proposed work, after being partly considered, was withdrawn from the Committee by resolution of the Assembly.
28 May to 21 Aug.	Railway to connect the North Shore Railway with the deep waters of Port Jackson, at Milson's Point. (Second Reference).	231,156	231,156	This proposal was before the Committee on a previous occasion (estimated cost, £262,000), when it was negated; but having been referred to the Committee for further consideration, and circumstances appearing in the second inquiry which justified the construction of the railway, the Committee approved of the proposed work.
10 Dec. to 13 May, 1891.	Hospital Buildings, Macquarie-street.	140,000	56,000	84,000	In this case, two sets of plans for the buildings were submitted to the Committee, one representing a design that was estimated to cost £140,000, and the other a design to cost £56,000, and the Committee approved of the latter.
1891.						
11 Feb. to 25 Mar.	College for the Training of Teachers of Public Schools.	37,500	37,500	Recommended as proposed.
19 Feb. to 21 April.	Extension of the Kiama to Nowra Railway into the town of Nowra.	75,000	75,000	Recommended as proposed.
24 Feb. to 14 May.	Railway from Cobar to Cockburn.	1,168,000	1,018,000	150,000	The Committee recommended the construction of this railway as far as Broken Hill only, which would reduce the proposed expenditure by £150,000.
22 Jan., 1890, to 19 May, 1891.	Cable Tramway from King-st., via William-street, to Ocean-street.	80,000	80,000	Recommended as proposed.
25 Nov., 1890, to 3 June, 1891.	Cable Tramway through George, Pitt, and Harris Streets, Sydney.	120,000	120,000	The Committee considered that it was not expedient at present, for reasons stated in their report, that this tramway should be constructed.
	Carried forward..... £	9,525,818	6,947,112	34,938	2,613,644	

LIST of Proposed Public Works inquired into by the Committee, &c.—*continued.*

Date of inquiry.	Proposed Work.	Expenditure proposed by the Government.	Expenditure recommended by the Committee.	Amount in excess of that proposed.	Amount in reduction of that proposed.	Remarks.
		£	£	£	£	
1892. 5 May, to 2 June.	Brought forward .. £ Improvements at Darling Island.	9,525,818 142,000	6,947,112	34,938	2,613,644 142,000	The Committee considered that the proposed works might be postponed for the present without inconvenience, and that a more suitable design might be submitted.
7 June, to 12 July.	Stormwater sewers discharging into Johnstone's Bay.	51,352	51,352	Recommended as proposed.
15 June, to 4 Aug.	Reservoir at Centennial Park for Sydney Water Supply.	83,000	83,000	Recommended with an alteration of site.
14 July, to 24 Aug.	Water Supply for Wollongong and the surrounding districts.	66,000	30,000	36,000	The Committee found that the Water Supply proposed for the surrounding districts was not needed, and that the estimate of cost for supplying Wollongong might be reduced to £30,000.
28 July, to 24 Aug.	Second pipe-line from Walka to Buttai, for Hunter River District Water Supply.	50,000	50,000	Recommended as proposed.
26 July, to 9 Aug.	Sewerage works at Cottage Creek.	25,000	13,000	12,000	The amount of £25,000 provided for a covered sewer; but the Committee found that a cover was not necessary at present, and that by constructing an open sewer the cost could be reduced by £12,000.
21 April, 1891, to 27 May, 1892.	Railway from Glen Innes to Inverell.*	427,400	427,400	The evidence in this case showed that the estimated cost of constructing the railway was excessive, and indicated the probability of a serious annual loss in the working of the line. In addition to this, the Committee were not as fully informed as desirable with regard to connecting Inverell not only with the Great Northern Railway but with the coast, a matter of considerable importance in the inquiry.
31 May, to 18 Aug.	Railway from Jerilderie to Deniliquin.	148,000	148,000	The Committee were of opinion that the consideration of this proposed work should be postponed until it should be determined by Parliament as a matter of public policy to purchase the Deniliquin to Moama Railway.
12 July, to 24 Aug.	Lunatic Asylum at Kenmore, near Goulburn. (Second Reference).	150,000	150,000	Recommended as proposed.
14 June, to 28 Sept.	Railway from Grafton to Lismore.	662,000 (or £8,000 per mile.)	108,000 (or £6,000 per mile.)	554,000	The Committee decided that, for the present, only the Lismore to Casino section of the proposed railway should be constructed, that the cost should not exceed £6,000 per mile, and that the betterment principle be applied to the land to be served by the proposed line.
10 July, to 26 Oct.	Railway from Eden to Bega.	564,000 (or £15,350 per mile.)	564,000	The Committee considered that the present resources of the district did not warrant the construction of such an expensive line, but they were of opinion that a cheaply constructed railway might be favorably considered.
22 June, to 4 Oct.	Sewerage Works for Parramatta.	75,926	75,926	The Committee were of opinion that the sewage farm included in the scheme was too small for the purpose, and that the sewage should be dealt with by precipitation and filtration or other effective modern process at a proposed pumping station at Clay Cliff Creek.
12 Oct. to 21 Dec.	Water Supply for Tamworth.	22,500	22,500	Recommended as proposed, with a provision as to the quantity of water obtainable, and the resumption of land surrounding the well in the drift forming the source of supply.
14 Sept. to 16 Nov.	Water Supply for Lithgow	15,000	15,000	Recommended as proposed.
15 Sept. to 16 Nov.	Water Supply for Armidale.	43,500	43,500	Recommended as proposed.
17 Nov. to 10 Jan. 1893.	Railway from Glen Innes to Inverell. (Second Reference).	421,400 (or £7,975 per mile.)	369,862 (or £7,000 per mile.)	51,538	The Committee considered it expedient this railway should be constructed, provided that the cost did not exceed £7,000 per mile, that special local rates were charged until the railway paid working expenses and interest on cost of construction, and that the betterment principle was applied to the land served by the railway.
14 Feb. to 8 Mar.	Waterworks for the town of Junee.	45,000	45,000	The Committee recommended that these works should be carried out, conditionally upon the Railway Commissioners undertaking to enter into an agreement for a period of not less than ten years to pay a minimum of £1,900 per annum for water supplied for railway purposes at Junee and Bethungra.
		£ 12,517,896	7,928,326	34,938	4,624,508	

* The proposed works marked with an asterisk have been twice referred to the Committee, and together, as first referred, represent an estimated expenditure of £809,400, by which amount the total expenditure proposed by the Government and the amount in reduction of that proposed expenditure as shown by the result of the Committee's inquiries should be reduced. A further reduction should be made of £108,000 as the estimated cost of the railway recommended by the Committee between Lismore and Casino, which while being a portion of the proposed line between Grafton and Lismore is also a part of the line originally proposed from Grafton to the Tweed. With these reductions the total expenditure proposed by the Government is £11,600,496, and the saving effected by the Committee, allowing for the £34,938 excess, £3,672,170.

PARLIAMENTARY STANDING COMMITTEE ON PUBLIC WORKS.

RETURN SHOWING THE COURSE OF THE COMMITTEES' INQUIRIES FROM THE REFERENCE OF THE WORKS TO THE ULTIMATE ACTION RESPECTING THEM.

FIRST COMMITTEE—FROM 12 JUNE, 1888, TO 22 OCTOBER, 1888.

MEMBERS OF THE COMMITTEE.

LEGISLATIVE COUNCIL.

The Honorable JOHN LACKEY, Chairman.
The Honorable GEORGE CAMPBELL.

The Honorable WILLIAM HENRY SUTTOR.
The Honorable JAMES WATSON.

The Honorable FREDERICK THOMAS HUMPHERY.

LEGISLATIVE ASSEMBLY.

JOSEPH PALMER ABBOTT, Esquire, Vice-Chairman.
JAMES NIXON BRUNKER, Esquire.*
HENRY COPELAND, Esquire.
ALEXANDER KETHEL, Esquire.

JOHN RENDELL STREET, Esquire.
THOMAS MICHAEL SLATTERY, Esquire.
JACOB GARRARD, Esquire.
SYDNEY SMITH, Esquire.

* James Nixon Brunker, Esquire, by reason of his accepting the office of Minister for Lands, did not take his seat as a member of the Committee.

Proposed Work.	Date of reference to Committee.	Date upon which inquiry was opened.	Date upon which Sectional Committee was appointed.	Date of Sectional Committee's Report.	Date of Committee's Report.	Statement of Committee's recommendation.	How dealt with by Parliament.	Date of Parliamentary action.
Wharfage Accommodation, Woolloomooloo Bay.	1888. 23 July	1888. 19 September	1888. Inquiry completed by Second Committee.	See Second Committee.	See Second Committee.	See Second Committee.
Improvements to the Circular Quay.	23 ,,	4 ,,	22 October ...	The Committee recommended an alteration in the plan of these improvements, by which the estimated total cost would be increased from £120,000 to £125,000.	Passed.	Legislative Assembly—11 April, 1889—Bill read third time. Legislative Council—24 April, 1889—Bill read third time; 30 April, 1889—Assent reported.
Storage Reservoir at Potts' Hill	23 ,,	26 ,,	22 ,, ...	Recommended as proposed.	Passed.	Legislative Assembly—17 May, 1889—Bill read third time. Legislative Council—30 May, 1889—Bill read third time; 5 June, 1889—Assent reported.

FIRST COMMITTEE—continued.

Proposed Work.	Date of reference to Committee.	Date upon which inquiry was opened.	Date upon which Sectional Committee was appointed.	Date of Sectional Committee's Report.	Date of Committee's Report.	Statement of Committee's recommendation.	How dealt with by Parliament.	Date of Parliamentary action.
Second Pipe between Potts' Hill and Crown-street.	1888. 23 July.....	1888. 26 September	1888. 22 October ...	Recommended as proposed.	Passed [Sydney Water Supply (Partial Reduplication) Bill].	Legislative Assembly—24 July, 1889—Bill read third time. Legislative Council—17 Sept., 1889—Bill read third time; 30 Sept., 1889—Assent reported.
Dredge and Plant for Sydney Harbour.	23 ,,	Dealt with by Third Committee.	See Third Committee.	See Third Committee.	See Third Committee.
Improvements to the Entrance of the Richmond River.	23 ,,	,, ,,	,, ,,	,, ,,	,, ,,
Bridge at the Spit, Middle Harbour.	23 ,,	Dealt with by Second Committee.	See Second Committee.	See Second Committee.	See Second Committee.
New Central Police Court	23 ,,	13 September	22 October ..	Recommended as proposed.	Passed.	Legislative Assembly—15 May, 1889—Bill read third time. Legislative Council—23 May, 1889—Bill read third time; 30 May, 1889—Assent reported.
Improvements to the Entrance of the Clarence River.	23 ,,	Dealt with by Third Committee.	See Third Committee.	See Third Committee.	See Third Committee.
Drainage Works, Manly	23 ,,	4 October	22 October ...	The Committee recommended the adoption of a modified plan of these drainage works, by which the estimated total cost would not exceed £22,000, or £12,114 less than the original estimate.	Passed.	Legislative Assembly—23 May, 1889—Bill read third time; 3 Sept., 1889—Bill finally passed. Legislative Council—20 June, 1889—Bill read third time; 12 Sept., 1889—Assent reported.
Drainage Works, North Shore	23 ,,	10 ,,	22 ,, ..	The Committee recommended the adoption of the complete scheme proposed in relation to this work, the estimated cost of which, as shown by the evidence, was £107,000.	Passed.	Legislative Assembly—17 April, 1889—Bill read third time; 15 May, 1889—Bill finally passed. Legislative Council—9 May, 1889—Bill read third time; 22 May, 1889—Assent reported.
Drainage Works for the Western Suburbs.	23 ,,	Dealt with by Second and Third Committees.	See Third Committee.	See Third Committee.	See Third Committee.
Harbour Improvements at Newcastle.	23 ,,	31 August	22 October ...	Recommended as proposed.	Passed.	Legislative Assembly—11 April, 1889—Bill read third time. Legislative Council—24 April, 1889—Bill read third time; 30 April, 1889—Assent reported.

THIRD COMMITTEE—FROM 7 JUNE, 1889, TO 6 JUNE, 1891.

MEMBERS OF THE COMMITTEE.

LEGISLATIVE COUNCIL.

- | | |
|--|--|
| * The Honorable JOHN LACKEY, Chairman. | The Honorable FREDERICK THOMAS HUMPHREY. |
| The Honorable ANDREW GARRARD. | The Honorable WILLIAM JOSEPH TRICKETT. |
| * The Honorable JAMES WATSON. | * The Honorable GEORGE HENRY COX. |

LEGISLATIVE ASSEMBLY.

- | | |
|--|-------------------------------------|
| * JOSEPH PALMER ABBOTT, Esquire, Chairman. | * JOHN SUTHERLAND, Esquire. |
| * JACOB GARRARD, Esquire, Vice-Chairman. | EDWARD WILLIAM O'SULLIVAN, Esquire. |
| HENRY COPELAND, Esquire. | * JOHN HURLEY, Esquire. |
| JAMES EBENEZER TONKIN, Esquire. | * CHARLES ALFRED LEE, Esquire. |
| WILLIAM SPRINGTHORPE DOWEL, Esquire. | * WILLIAM MCCOURT, Esquire. |
| * JAMES PATRICK GARVAN, Esquire. | |

[* Shortly after the first meeting of the third Committee, John Sutherland, Esquire, died, and his place was filled by the appointment of Charles Alfred Lee, Esquire. Subsequently the Honorable James Watson resigned his seat on the Committee, and the Honorable George Henry Cox was appointed in his place. On 22nd October, 1890, Mr. Joseph Palmer Abbott, having been appointed Speaker of the Legislative Assembly, resigned his position as Chairman and member of the Committee. The Honorable John Lackey, who at that time was Vice-Chairman of the Committee, was appointed Chairman in Mr. Abbott's place, and Mr. Jacob Garrard was chosen as Vice-Chairman. Mr. William McCourt was appointed a member of the Committee on 18th July, 1890, in the place of Mr. John Hurley, whose seat became vacant by reason of his resignation from the Legislative Assembly; and Mr. James Patrick Garvan was appointed a member on the 6th November, 1890, in the room of Mr. Joseph Palmer Abbott.]

Proposed Work.	Date of reference to Committee.	Date upon which inquiry was opened.	Date upon which Sectional Committee was appointed.	Date of Sectional Committee's Report.	Date of Committee's Report.	Statement of Committee's recommendation.	How dealt with by Parliament.	Date of Parliamentary action.
Dredge and Plant for Sydney Harbour.	23 July, 1888	22 Jan., 1890	6 Feb., 1890	The evidence showed that this class of dredge was not required.	Not dealt with.
Improvements to the Entrance of the Richmond River.	23 ,, ,,	26 June, 1889	30 Sept., 1889	The Committee recommended that the proposed works should be carried out in a certain order, so that the results from the works first constructed might be ascertained before others were proceeded with.	Passed.	Legislative Assembly—23 July, 1890—Bill read third time. Legislative Council—23 Aug., 1890—Bill read third time; 3 Sept., 1890—Assent reported.
Improvements to the Entrance of the Clarence River.	23 ,, ,,	23 Oct., ,,	14 Nov., 1889	28 Jan., 1890	2 April, 1890	In this case the Committee recommended the construction of only a portion of the works proposed, as they were of opinion that when this portion had been constructed it might be found that the remainder would not be required.	Passed.	Legislative Assembly—23 July, 1890—Bill read third time. Legislative Council—17 Sept., 1890—Bill read third time; 1 Oct., 1890—Assent reported.
Drainage Works for the Western Suburbs.	23 ,, ,,	7 Dec., 1888	27 Aug., 1889	Recommended as proposed.	Passed.	Legislative Assembly—26 Sept., 1889—Bill read third time. Legislative Council—26 Sept., 1889—Bill read third time; 30 Sept., 1889—Assent reported.

THIRD COMMITTEE—continued.

Proposed Work.	Date of reference to Committee.	Date upon which inquiry was opened.	Date upon which Sectional Committee was appointed.	Date of Sectional Committee's Report.	Date of Committee's Report.	Statement of Committee's recommendation.	How dealt with by Parliament.	Date of Parliamentary action.
Railway from Goulburn to Crookwell.	31 July, 1889	22 Aug., 1889	29 Aug., 1889	17 Sept., 1889	19 Dec., 1889	The Committee considered that the cost of this railway should not exceed £4,500 per mile, and that a saving should also be effected by utilizing a certain portion of the present main line instead of taking the proposed railway through a part of the city of Goulburn.	Negated by the Legislative Council.	Legislative Assembly—10 July, 1890—Bill read third time. Legislative Council—6 August, 1890—Second reading resolved in the negative.
Railway from Nyngan to Cobar	1 Aug., ,,	25 Sept., ,,	24 Sept., ,,	31 Oct., ,,	18 Feb., 1890	The Committee recommended the construction of this railway as part of a line which should be extended to Wilcannia and Broken Hill.	Passed.	Legislative Assembly—10 July, 1890—Bill read third time. Legislative Council—17 July, 1890—Bill read third time; 23 July, 1890—Assent reported.
Railway from Kiama to Nowra	1 ,, ,,	4 Dec., ,,	14 Jan., 1890	30 Jan., 1890	22 April, ,,	In this case there was an original estimate of £441,663. The amount recommended by the Committee was £381,390. The reduction was due to an amended estimate made by the Acting Engineer-in-Chief for Railways after the railway was referred to the Committee.	Passed.	Legislative Assembly—10 July, 1890—Bill read third time. Legislative Council—7 Aug., 1890—Bill read third time; 13 Aug., 1890—Assent reported.
Railway from Marrickville to the Burwood Road.	1 ,, ,,	19 Nov., ,,	2 ,, ,,	Recommended as proposed.	Passed.	Legislative Assembly—11 Dec., 1890—Bill read third time. Legislative Council—18 Dec., 1890—Bill read third time; 19 May, 1891—Assent reported.
Railway from Culcairn to Corowa.	6 ,, ,,	29 Aug., ,,	29 Aug., 1889	11 Sept., 1889	12 Dec., 1889	The Committee were of opinion that this line should be constructed at a cost not exceeding £3,500 per mile.	Passed.	Legislative Assembly—10 July, 1890—Bill read third time. Legislative Council—31 July, 1890—Bill read third time; 6 Aug., 1890—Assent reported.
Breakwater at Byron Bay	6 ,, ,,	31 Oct., ,,	14 Nov., ,,	28 Jan., 1890	15 April, 1890	The original estimate for this work was £162,000. The estimate placed before the Committee, which they adopted in their recommendation, was £241,723. The increase was due to a difficulty in obtaining stone.	Negated by the Legislative Council.	Legislative Assembly—17 July, 1890—Bill read third time. Legislative Council—15 Oct., 1890—Bill negated in Council on motion, "That it be read the second time this day six months."
Railway to connect North Shore Railway with Port Jackson, at Milson's Point.	7 ,, ,,	9 ,, ,,	11 Dec., 1889	The Committee considered, for various reasons stated in their report on the subject, that the work as proposed should not be carried out.	See second reference.	See second reference.
Railway from Grafton to the Tweed.	27 Sept., ,,	12 Nov., ,,	14 Nov., ,,	23 Jan., ,,	15 April, 1890	The Committee recommended that this railway should be constructed from Lismore to Murwillumbah, instead of from Grafton to Murwillumbah, the Committee's recommendation involving a length of about 60½ miles as compared with 140 miles 76 chains, the length of the line as referred to them by the Legislative Assembly.	Passed.	Legislative Assembly—17 July, 1890—Bill (Lismore to the Tweed Railway Bill) read third time. Legislative Council—10 Sept., 1890—Bill read third time; 24 Sept., 1890—Assent reported.
Railway from Cootamundra to Temora.	27 ,, ,,	15 Jan., 1890	16 Jan., 1890	11 Feb., ,,	23 ,, ,,	The Committee considered that the cost of constructing this railway should not exceed £3,300 per mile.	Passed.	Legislative Assembly—23 July, 1890—Bill read third time. Legislative Council—17 Sept., 1890—Bill read third time; 1 Oct., 1890—Assent reported.

THIRD COMMITTEE—continued.

Proposed Work.	Date of reference to Committee.	Date upon which inquiry was opened.	Date upon which Sectional Committee was appointed.	Date of Sectional Committee's Report.	Date of Committee's Report.	Statement of Committee's recommendation.	How dealt with by Parliament.	Date of Parliamentary action.
44-C Railway from Mudgee to Gulgong.	27 Sept., 1889	23 Jan., 1890	12 Mar., 1890	26 Mar., 1890	6 May, 1890	The Committee decided against this work on the ground that any extension of the Mudgee Railway should form part of a more comprehensive proposal, the consideration of which should be deferred until after the suggestion for the connection of the Northern and Western systems, by a line between Dubbo and Werriis Creek, had been dealt with.	Not dealt with.
Railway from Moss Vale to Robertson.	1 Oct., "	23 " "	30 Jan., "	12 Feb., "	29 April, "	The Committee negatived this proposal because they considered another route, described in their report, was preferable.	" "
Railway from Molong to Parkes and Forbes.	1 " "	22 " "	12 Feb., "	19 Mar., "	21 May, "	Recommended as proposed.	Passed.	Legislative Assembly—23 July, 1890—Bill read third time. Legislative Council—21 Aug., 1890—Bill read third time; 27 Aug., 1890—Assent reported.
Bridge over Tarban Creek, Parramatta River.	1 " "	12 Feb., "	15 April, "	The Committee considered this bridge to be unnecessary.	Not dealt with.
Bridge over the Hunter River, at Jerry's Plains.	1 " "	20 " "	4 Mar., "	11 Mar., "	15 " "	The Committee considered that a less expensive bridge would be sufficient to meet requirements.	" "
Bridge to connect Bullock Island with the Mainland at Newcastle.	1 " "	25 Feb., "	4 " "	11 " "	29 " "	The Committee considered that this proposed expenditure was premature, pending the carrying out of certain reclamation works.	" "
Iron Bridge at Cowra	1 " "	12 " "	18 Feb., "	19 " "	21 May, "	The original proposal represented an expenditure of £69,971, which amount was afterwards reduced to £26,537, as the result of a revision of the system of bridge-building in the Colony, and the construction of the bridge at the reduced cost was recommended by the Committee.	Passed.	Legislative Assembly—23 July, 1890—Bill read third time. Legislative Council—21 Aug., 1890—Bill read third time; 27 Aug., 1890—Assent reported.
Hospital for the Insane upon the Kenmore Estate, near Goulburn.	1 " "	28 May, "	Inquiry not completed.	This proposed work, after being partly considered, was withdrawn from the Committee by resolution of the Assembly.	Rescinded.	Legislative Assembly—2 July, 1890—Resolution passed rescinding previous resolution referring proposed work to the Committee.
Offices for Board of Water Supply and Sewerage.	1 " "	14 Jan., "	11 Feb., 1890	Recommended as proposed.	Passed.	Legislative Assembly—7 Nov., 1890—Bill read third time. Legislative Council—20 Nov., 1890—Bill read third time; 27 Nov., 1890—Assent reported.
Reticulation of Western Suburbs Drainage Scheme.	1 " "	14 " "	6 " "	" "	" "	Legislative Assembly—23 July, 1890—Bill read third time. Legislative Council—24 Sept., 1890—Bill read third time; 8 Oct., 1890—Assent reported.

41.

THIRD COMMITTEE—continued.

Proposed Work.	Date of reference to Committee.	Date upon which inquiry was opened.	Date upon which Sectional Committee was appointed.	Date of Sectional Committee's Report.	Date of Committee's Report.	Statement of Committee's recommendation.	How dealt with by Parliament.	Date of Parliamentary action.
Extension of Sydney Water Supply to Southern Suburbs—Hurstville, Rockdale.	1 Oct., 1889	14 Jan., 1890	11 Feb., 1890	This expenditure was rendered unnecessary by reason of a temporary water-supply scheme being sufficient to meet requirements for some years.	Not dealt with.
Cable Tramway from King-street, <i>via</i> William-street, to Ocean-street.	„ „	22 „ „	2 June, 1891	Recommended as proposed.	Passed.	Legislative Assembly—8 March, 1892—Bill read third time. Legislative Council—10 March, 1892—Bill read third time; 17 March, 1892—Assent reported.
Cable Tramway through George, Pitt, and Harris Streets, Sydney.	1 „ „	25 Nov. „	4 „ „	The Committee considered that it was not expedient, for reasons stated in their report, that this tramway should be constructed.	Not dealt with.
Railway to connect North Shore Railway with the deep waters of Port Jackson, at Milson's Point (second reference).	8 May, 1890	28 May, „	21 Aug., 1890	This proposal was before the Committee on a previous occasion when it was negatived; but having been referred to the Committee for further consideration, and circumstances appearing in the second inquiry which justified the construction of the railway, the Committee approved of the proposed work.	Passed.	Legislative Assembly—12 Nov., 1890—Bill read third time. Legislative Council—20 Nov., 1890—Bill read third time; 27 Nov., 1890—Assent reported.
College for the Training of Teachers of Public Schools.	21 Nov., „	11 Feb., 1891	19 Mar., 1891	Recommended as proposed.	Not dealt with.
Hospital Buildings, Macquarie-street.	3 Dec., „	10 Dec., 1890	12 May, „	In this case two sets of plans for the buildings were submitted to the Committee, one representing a design that was estimated to cost £140,000, and the other a design to cost £56,000, and the Committee approved of the latter.	Passed.	Legislative Assembly—9 March, 1892—Bill read third time. Legislative Council—17 March, 1892—Bill read third time; 29 March, 1892—Assent reported.
Railway from Cobar to Cockburn.	19 „ „	24 Feb., 1891	14 „ „	The Committee recommended the construction of this railway as far as Broken Hill only, thereby reducing the proposed expenditure (£1,168,000) by £150,000.	Not dealt with.
Railway from Glen Innes to Inverell.	19 „ „	21 April, „	23 April, 1891	2 June, 1891	See Fourth Committee.	See Fourth Committee.	See Fourth Committee.
Extension of the Kiama to Nowra Railway into the town of Nowra.	19 „ „	19 Feb., „	21 April, 1891	Recommended as proposed.	Not dealt with.

FOURTH COMMITTEE—FROM 31 MARCH, 1892, TO 26 APRIL, 1893.

MEMBERS OF THE COMMITTEE.

LEGISLATIVE COUNCIL.

The Honorable WILLIAM HENRY SUTTOR, Vice-Chairman.
 The Honorable JAMES HOSKINS.
 The Honorable FREDERICK THOMAS HUMPHERY.

* The Honorable ANDREW GARRAN, LL.D.
 The Honorable JOHN DAVIES, C.M.G.
 * The Honorable WILLIAM JOSEPH TRICKETT.

LEGISLATIVE ASSEMBLY.

JACOB GARRARD, Esquire, Chairman.
 THOMAS THOMSON EWING, Esquire.
 WILLIAM CHANDOS WALL, Esquire.
 WILLIAM McCOURT, Esquire.

JOHN CASH NEILD, Esquire.
 EDWARD WILLIAM O'SULLIVAN, Esquire.
 CHARLES COLLINS, Esquire.
 HENRY DAWSON, Esquire.

[* The Honorable Andrew Garran, LL.D., on 5th October, 1892, resigned his seat as a member of the Committee, and on 12th October, 1892, the Honorable William Joseph Trickett was appointed to fill the vacancy.]

Proposed Work.	Date of reference to Committee.	Date upon which inquiry was opened.	Date upon which Sectional Committee was appointed.	Date of Sectional Committee's Report.	Date of Committee's Report.	Statement of Committee's recommendation.	How dealt with by Parliament.	Date of Parliamentary action.
Improvements at Darling Island	29 Mar., 1892	5 May, 1892	2 June, 1892	The Committee considered that the proposed works might be postponed for the present without inconvenience, and that a more suitable design might be submitted.	Not dealt with.
Water Supply for Tamworth...	29 ,, ,,	12 Oct., ,,	12 Oct., 1892	15 Nov., 1892	21 Dec., ,,	Recommended as proposed with a provision as to the quantity of water obtainable, and the resumption of land surrounding the well in the drift forming the source of supply.	,, ,,
Storm-water Sewers discharging into Johnstone's Bay.	29 ,, ,,	7 June, ,,	12 July, ,,	Recommended as proposed.	The money for these works was voted in the estimates for 1891 and 1892.
Reservoir at Centennial Park for Sydney Water Supply.	29 ,, ,,	15 ,, ,,	4 Aug., ,,	Recommended with an alteration of site.	Not dealt with.	
Water Supply for Wollongong and the Surrounding Districts.	29 ,, ,,	14 July, ,,	24 ,, ,,	The Committee found that the Water Supply proposed for the surrounding districts was not needed, and that the estimate of cost for supplying Wollongong might be reduced to £30,000.	,, ,,
Second Pipe-line from Walka to Buttai, for Hunter River District Water Supply.	29 ,, ,,	28 ,, ,,	16 ,, ,,	Recommended as proposed.	,, ,,
Sewerage Works at Cottage Creek.	29 ,, ,,	26 ,, ,,	9 ,, ,,	The estimated cost of this work was £25,000, which provided for a covered sewer; but the Committee found that a cover was not necessary, and that by constructing an open sewer the cost could be reduced by £12,000.	,, ,,
Water Supply for Lithgow ...	29 ,, ,,	14 Sept., ,,	22 Oct., ,,	24 Oct., ,,	16 Nov., ,,	Recommended as proposed.	Passed.	Legislative Assembly—2 February, 1893—Resolution passed that the works be carried out.
Sewerage Works for Parramatta	29 ,, ,,	22 June, ,,	4 Oct., ,,	The construction of this work the Committee did not recommend, as they were of opinion that the sewage farm included in the scheme was too small for the purpose, and that the sewage should be dealt with by precipitation and filtration, or other effective modern process, at a proposed pumping station at Clay Cliff Creek.	Not dealt with.

FOURTH COMMITTEE—continued.

Proposed Work.	Date of reference to Committee.	Date upon which inquiry was opened.	Date upon which Sectional Committee was appointed.	Date of Sectional Committee's Report.	Date of Committee's Report.	Statement of Committee's recommendation.	How dealt with by Parliament.	Date of Parliamentary action.
Water Supply for Armidale ... Railway from Eden to Bega ...	29 Mar., 1892 29 " "	15 Sept., 1892 10 July, "	12 Oct., 1892 11 Aug., "	20 Oct., 1892 7 Sept., "	16 Nov., 1892 26 Oct., "	Recommended as proposed. The Committee considered that the resources of the district did not warrant the construction of such an expensive line, but they were of opinion that a cheaply constructed railway might be favorably considered.	Not dealt with. " "
Railway from Grafton to Lismore.	29 " "	14 June, "	15 June, "	10 Aug., "	28 Sept., "	The Committee decided that, for the present, only the Lismore to Casino section of the proposed railway should be constructed, that the cost should not exceed £6,000 per mile, and that the betterment principle be applied to the land to be served by the proposed line.	" "
Railway from Glen Innes to Inverell.	29 " "	6 April, "	23 April, 1891 (See Third Committee.)	2 June, 1891 (See Third Committee.)	27 May, "	The evidence in this case, which was partly inquired into by the Third Committee and partly by the Fourth Committee, showed that the estimated cost of constructing the railway was excessive, and indicated the probability of a serious annual loss in the working of the line. In addition to this, the Committee were not as fully informed as desirable with regard to connecting Inverell not only with the Great Northern Railway but with the coast, a matter of considerable importance in the inquiry. The Committee therefore did not recommend that the railway should be constructed.	See second reference.
Railway from Jerilderie to Deniliquin.	29 " "	31 May, "	2 June, 1892	23 June, 1892	18 Aug., "	The Committee were of opinion that the consideration of this proposed work should be postponed until it should be determined by Parliament as a matter of public policy to purchase the Deniliquin to Moama Railway.	Not dealt with.
Lunatic Asylum at Kenmore, near Goulburn (second reference).	31 " "	12 July, "	24 " "	Recommended as proposed.	" "
Railway from Glen Innes to Inverell (second reference).	27 Oct., "	17 Nov., "	23 Nov., "	13 Dec., "	10 Jan., 1893	The Committee considered it expedient this railway should be constructed, provided that the cost did not exceed £7,000 per mile, that special local rates were charged until the railway paid working expenses and interest on cost of construction, and that the betterment principle was applied to the land served by the railway.	" "
Waterworks for the town of Junee.	2 Feb., 1893	14 Feb., 1893	15 Feb., 1893	28 Feb., 1893	14 Mar., "	The Committee recommended that the proposed works should be carried out, conditionally on the Railway Commissioners entering into an agreement for a period of not less than ten years to pay a minimum of £1,900 per annum for water supplied for railway purposes at Junee and Bethungra.	" "

PARLIAMENTARY STANDING COMMITTEE ON PUBLIC WORKS.

MINUTES OF PROCEEDINGS.

WEDNESDAY, 31 AUGUST, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,	William Chandos Wall, Esq.,
The Hon. James Hoskins,	William McCourt, Esq.,
The Hon. Frederick Thomas Humphery,	John Cash Neild, Esq.,
The Hon. Andrew Garran, LL.D.,	Edward William O'Sullivan, Esq.,
The Hon. John Davies, C.M.G.,	Charles Collins, Esq.,
Thomas Thomson Ewing, Esq.,	Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

Mr. McCourt's notice of motion with reference to the betterment principle applied to the construction of railways was withdrawn.

The Committee further considered the proposed Railway from Grafton to Lismore.

William Albert Brelsford Greaves, Esq., and Thomas Fisher, Esq., were sworn, and examined.

The following accounts were passed for payment:—

	£	s.	d.
George H. Stayton—Special report with plan and sections with reference to the proposed Sewerage Works for Parramatta	31	10	0
Henry Chapman—Extra clerical assistance	10	10	0

The Committee adjourned at 4 o'clock, until 2 o'clock p.m. on Thursday, the following day.

THURSDAY, 1 SEPTEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,	William Chandos Wall, Esq.,
The Hon. James Hoskins,	William McCourt, Esq.,
The Hon. Frederick Thomas Humphery,	John Cash Neild, Esq.,
The Hon. Andrew Garran, LL.D.,	Edward William O'Sullivan, Esq.,
The Hon. John Davies, C.M.G.,	Charles Collins, Esq.,
Thomas Thomson Ewing, Esq.,	Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Committee further considered the proposed Railway from Grafton to Lismore.

The Hon. John See, M.P., Colonial Treasurer, was sworn, and examined.

The Committee adjourned at 9 minutes to 4, until 2 o'clock p.m. on Tuesday, 6th September.

TUESDAY, 6 SEPTEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,	Thomas Thomson Ewing, Esq.,
The Hon. James Hoskins,	William Chandos Wall, Esq.,
The Hon. Frederick Thomas Humphery,	William McCourt, Esq.,
The Hon. Andrew Garran, LL.D.,	John Cash Neild, Esq.,
The Hon. John Davies, C.M.G.,	Edward William O'Sullivan, Esq.,
	Charles Collins, Esq.

The minutes of the previous meeting were read, and confirmed.

The Committee further considered the proposed Sewerage Works for Parramatta.

Robert R. P. Hickson, Esq., Commissioner and Engineer-in-Chief for Roads and Bridges and Sewers, was sworn, and further examined.

John More Smail, Esq., Engineer for Sewerage, Metropolitan Board of Water Supply and Sewerage, and Mr. William Frederick Brooks, Superintendent of the Sewage Farm, Webb's Grant, Botany, were sworn, and examined.

Mr.

Mr. O'Sullivan gave notice that he would move at the next meeting of the Committee,—“That, in the opinion of the Committee, it is expedient to construct the Lismore-Casino section of the proposed line of railway from Grafton to Lismore, as submitted by the Legislative Assembly, and that the remainder of the proposed line should remain in abeyance till the question of the connection between the Table-land and the North Coast is settled.”

The Committee adjourned at 15 minutes past 4, until 2 o'clock p.m. on Wednesday, the following day.

WEDNESDAY, 7 SEPTEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor, The Hon. James Hoskins, The Hon. Frederick Thomas Humphery, The Hon. Andrew Garran, LL.D., The Hon. John Davies, C.M.G., Thomas Thomson Ewing, Esq.,		William Chandos Wall, Esq., William McCourt, Esq., John Cash Neild, Esq., Edward William O'Sullivan, Esq., Charles Collins, Esq., Henry Dawson, Esq.
--	--	---

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence:—

Letter from Mr. W. A. B. Greaves, forwarding a newspaper extract with reference to the question of grade on a railway from Glen Innes to South Grafton.

The correspondence was received.

The Committee further considered the proposed Sewerage Works for Parramatta.

Joseph Barling, Esq., Under Secretary for Public Works, was sworn, and further examined.

Mr. O'Sullivan moved,—“That, in the opinion of the Committee, it is expedient to construct the Lismore-Casino section of the proposed line of railway from Grafton to Lismore, as submitted by the Legislative Assembly, and that the remainder of the proposed line should remain in abeyance till the question of the connection between the Table-land and the North Coast is settled.”

Mr. Collins seconded the motion.

On the motion of Mr. Neild the debate was adjourned until the following day.

Mr. Garrard, as Chairman of the Sectional Committee appointed with reference to the proposed Railway from Eden to Bega, brought up the Report of the Sectional Committee and moved that it be printed with the minutes of evidence taken before the Sectional Committee.

The motion was seconded by Mr. Ewing, and passed.

Mr. Neild gave notice that he would move at the meeting of the Committee on Tuesday, the 13th September,—“That, in the opinion of this Committee, it is the duty of the Chairman to strictly comply with the provisions of Act 53 Victoria, No. 11.”

The Committee adjourned at 12 minutes past 4, until 2 o'clock p.m. on Thursday, the following day.

THURSDAY, 8 SEPTEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor, The Hon. James Hoskins, The Hon. Frederick Thomas Humphery, The Hon. Andrew Garran, LL.D., The Hon. John Davies, C.M.G., Thomas Thomson Ewing, Esq.,		William Chandos Wall, Esq., William McCourt, Esq., John Cash Neild, Esq., Edward William O'Sullivan, Esq., Charles Collins, Esq., Henry Dawson, Esq.
--	--	---

The minutes of the previous meeting were read, and confirmed.

The Committee further considered the proposed Sewerage Works for Parramatta.

George Henry Stayton, Esq., M. Inst. C.E., and Joseph Barling, Esq., Under Secretary for Public Works, were sworn, and examined.

Mr.

Mr. Suttor gave notice that he would move at the next meeting of the Committee,—“That this Committee is of opinion that it is not expedient to carry out the proposed Sewerage Works for Parramatta as referred to the Committee by the Legislative Assembly.”

The Committee adjourned at 15 minutes past 4, until 2 o'clock p.m. on Tuesday, 13th September.

TUESDAY, 13 SEPTEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,	William Chandos Wall, Esq.,
The Hon. James Hoskins,	William McCourt, Esq.,
The Hon. Frederick Thomas Humphery,	John Cash Neild, Esq.,
The Hon. Andrew Garran, LL.D.,	Edward William O'Sullivan, Esq.,
The Hon. John Davies, C.M.G.,	Charles Collins, Esq.,
Thomas Thomson Ewing, Esq.,	Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence:—

Letter from Mr. Robert R. P. Hickson, Commissioner and Engineer-in-Chief for Roads and Bridges and Sewers, in reply to the evidence given before the Committee by Mr. G. H. Stayton, with reference to the proposed Sewerage Works for Parramatta.

The correspondence was received, and it was decided that the letter should be published as an appendix to the evidence given by Mr. Hickson with reference to the proposed Sewerage Works for Parramatta.

Mr. Neild moved,—“That, in the opinion of this Committee, it is the duty of the Chairman to strictly comply with the provisions of Act 53 Victoria No. 11.”

Mr. Davies seconded the motion *pro forma*.

Dr. Garran moved the previous question.

The previous question was passed.

The adjourned debate on the motion of Mr. O'Sullivan,—“That, in the opinion of the Committee, it is expedient to construct the Lismore-Casino section of the proposed line of railway from Grafton to Lismore, as submitted by the Legislative Assembly, and that the remainder of the proposed line should remain in abeyance till the question of the connection between the Table-land and the North Coast is settled,” was resumed.

Mr. Wall moved,—“That the debate be adjourned for further evidence.”

The motion for the adjournment of the debate was seconded by Mr. Dawson, and negatived.

Mr. O'Sullivan, with the consent of the Committee, amended his motion so that it should read as follows,—“That, in the opinion of the Committee, it is expedient to construct the Lismore-Casino section of the proposed line of Railway from Grafton to Lismore, as submitted by the Legislative Assembly, provided that the cost does not exceed £6,000 per mile, and that the betterment principle can be applied to the land to be served by the proposed line.”

Mr. Neild moved,—“That the motion be amended by the addition of the following words:—‘and conditionally upon the discontinuance of the snagging and dredging operations in the South Arm of the Richmond River.’”

The amendment was seconded by Mr. Collins, and negatived on the following division upon the question,—“That the words proposed to be added be so added”:—

Ayes, 5.	Noes, 8.
Mr. Garrard,	Mr. Suttor,
Mr. Ewing,	Mr. Hoskins,
Mr. Neild,	Mr. Humphery,
Mr. O'Sullivan,	Dr. Garran,
Mr. Collins.	Mr. Davies,
	Mr. Wall,
	Mr. McCourt,
	Mr. Dawson.

The motion was passed on the following division:—

Ayes, 9.	Noes, 4.
Mr. Garrard,	Mr. Humphery,
Mr. Suttor,	Mr. Davies,
Mr. Hoskins,	Mr. Wall,
Dr. Garran,	Mr. McCourt.
Mr. Ewing,	
Mr. Neild,	
Mr. O'Sullivan,	
Mr. Collins,	
Mr. Dawson.	

The Committee adjourned at 6 minutes past 4, until 2 o'clock p.m. on Wednesday, the following day.

WEDNESDAY,

WEDNESDAY, 14 SEPTEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,	William Chandos Wall, Esq.,
The Hon. James Hoskins,	William McCourt, Esq.,
The Hon. Frederick Thomas Humphery,	John Cash Neild, Esq.,
The Hon. Andrew Garran, LL.D.,	Edward William O'Sullivan, Esq.,
The Hon. John Davies, C.M.G.,	Charles Collins, Esq.,
Thomas Thomson Ewing, Esq.,	Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence :—

Letter from Mr. Frank Van Vhek, Chief Engineer, Pacific Railway Co., Los Angeles, California, asking for information with reference to the Committee's Report on the Cable Tramway from King-street, *via* William-street, to Ocean-street.

The correspondence was received.

Mr. Suttor moved,—“That this Committee is of opinion that it is not expedient to carry out the proposed Sewerage Works for Parramatta as referred to the Committee by the Legislative Assembly.”

The motion was seconded by Mr. Wall.

Mr. Garrard moved,—“That the motion be amended by the addition of the following words :— ‘for the reason that, in the opinion of the Committee, the sewage farm is too small for the purpose, and that the sewage should be dealt with at the pumping station at Clay Cliff Creek by a system of precipitation and filtration or other effective modern process.’”

The amendment was seconded by Mr. Davies, and passed on the following division upon the question,—“That the words proposed to be added be so added” :—

Ayes, 6.	Noes, 5.
Mr. Garrard,	Mr. Suttor,
Mr. Hoskins,	Mr. Ewing,
Mr. Davies,	Mr. Wall,
Mr. Neild,	Mr. McCourt,
Mr. O'Sullivan,	Mr. Dawson.
Mr. Collins.	

The motion, as amended, was passed on the following division :—

Ayes, 6.	Noes, 5.
Mr. Garrard,	Mr. Suttor,
Mr. Hoskins,	Mr. Ewing,
Mr. Davies,	Mr. Wall,
Mr. Neild,	Mr. McCourt,
Mr. O'Sullivan,	Mr. Dawson.
Mr. Collins.	

The Committee proceeded to consider the proposed Water Supply for Lithgow.

Joseph Barling, Esq., Under Secretary for Public Works, was sworn, and examined.

The Committee adjourned at 4 o'clock, until 2 o'clock p.m. on Thursday, the following day.

THURSDAY, 15 SEPTEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,	William Chandos Wall, Esq.,
The Hon. James Hoskins,	William McCourt, Esq.,
The Hon. Frederick Thomas Humphery,	John Cash Neild, Esq.,
The Hon. Andrew Garran, LL.D.,	Edward William O'Sullivan, Esq.,
The Hon. John Davies, C.M.G.,	Charles Collins, Esq.,
Thomas Thomson Ewing, Esq.,	Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence :—

Telegram from Mr. Thomas Rawlinson, Bega, with reference to the Committee's inquiry respecting the proposed railway from Eder. to Bega.

The correspondence was received.

The Committee further considered the proposed Water Supply for Lithgow.

Cecil West Darley, Esq., Engineer-in-Chief for Harbours and Rivers, was sworn, and examined.

The Committee proceeded to consider the proposed Water Supply for Armidale.

Joseph Barling Esq., Under Secretary for Public Works, and Cecil West Darley, Esq., Engineer-in-Chief for Harbours and Rivers, were sworn, and examined.

The Committee adjourned at 15 minutes past 4, until 2 o'clock p.m. on Tuesday, 20th September.

TUESDAY,

TUESDAY, 20 SEPTEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,	William Chandos Wall, Esq.,
The Hon. James Hoskins,	William McCourt, Esq.,
The Hon. Frederick Thomas Humphery,	John Cash Neild, Esq.,
The Hon. Andrew Garran, LL.D.,	Edward William O'Sullivan, Esq.,
The Hon. John Davies, C.M.G.,	Charles Collins, Esq.,
Thomas Thomson Ewing, Esq.,	Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence :—

Letter from Mr. J. P. Garvan, M.P., suggesting that certain gentlemen should be invited to give evidence before the Committee with reference to the proposed Railway from Eden to Bega.

Mr. O'Sullivan moved,—“That the gentlemen named in Mr. Garvan's letter be written to, asking them if they desire to give evidence as suggested.”

The motion was seconded by Mr. Davies, and passed.

The Committee further considered the proposed Railway from Eden to Bega.

Henry Clarke, Esq., M.P., and James Patrick Garvan, Esq., M.P., were sworn, and examined.

The Committee adjourned at 12 minutes past 4, until 2 o'clock p.m. on Wednesday, the following day.

WEDNESDAY, 21 SEPTEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,	William Chandos Wall, Esq.,
The Hon. James Hoskins,	William McCourt, Esq.,
The Hon. Frederick Thomas Humphery,	John Cash Neild, Esq.,
The Hon. Andrew Garran, LL.D.,	Edward William O'Sullivan, Esq.,
The Hon. John Davies, C.M.G.,	Charles Collins, Esq.,
Thomas Thomson Ewing, Esq.,	Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Committee further considered the proposed Railway from Eden to Bega.

James Patrick Garvan, Esq., M.P., was sworn, and further examined.

William Neilley, Esq., and Major S. D. T. A. M. Woods, Esq., were sworn, and examined.

The Committee adjourned at 17 minutes past 4, until 2 o'clock p.m. on Thursday, the following day.

THURSDAY, 22 SEPTEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,	William Chandos Wall, Esq.,
The Hon. James Hoskins,	William McCourt, Esq.,
The Hon. Frederick Thomas Humphery,	John Cash Neild, Esq.,
The Hon. Andrew Garran, LL.D.,	Edward William O'Sullivan, Esq.,
The Hon. John Davies, C.M.G.,	Charles Collins, Esq.,
Thomas Thomson Ewing, Esq.,	Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence :—

Letter from Sir Henry Parkes, G.C.M.G., with reference to his giving evidence before the Committee in their inquiry respecting the proposed Railway from Eden to Bega.

The correspondence was received.

The Committee further considered the proposed Railway from Eden to Bega.

William Charles Willis, Esq., Roger Kirby, Esq., and James Inglis, Esq., M.P., were sworn, and examined.

The Committee adjourned at 15 minutes past 4, until 2 o'clock p.m. on Tuesday, 27th September.

TUESDAY, 27 SEPTEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,	William Chandos Wall, Esq.,
The Hon. James Hoskins,	William McCourt, Esq.,
The Hon. Frederick Thomas Humphery,	John Cash Neild, Esq.,
The Hon. Andrew Garran, LL.D.,	Edward William O'Sullivan, Esq.,
The Hon. John Davies, C.M.G.,	Charles Collins, Esq.,
Thomas Thomson Ewing, Esq.,	Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence :—

Letter from Mr. District Court Judge Backhouse, with reference to his giving evidence before the Committee in their inquiry respecting the proposed Railway from Eden to Bega.

Letter from Mr. R. Kirby, suggesting that the Committee should obtain a copy of a Report by Mr Cumming, railway surveyor, with reference to the proposed Railway from Eden to Bega.

The correspondence was received.

The Committee further considered the proposed Railway from Eden to Bega.

William James Featherstone, Esq., captain of the Union Company's steamship "Oonah," and Alfred McFarland, Esq., were sworn, and examined.

The Committee proceeded to consider their Report to the Legislative Assembly on the proposed Railway from Grafton to Lismore.

The preamble and clauses 1 to 7 were passed.

Clause 8.—Additional reasons favourable to the construction of the Railway.

Mr. Ewing moved,—“That the clause be amended by the omission of the words ‘the country between Grafton and Lismore’ after the words ‘leaseholds in,’ and the insertion in their place of the words ‘these districts.’”

The amendment was seconded by Mr. Neild.

The words proposed to be omitted were omitted on the following division upon the question,—
“That the words proposed to be omitted stand part of the clause” :—

Ayes, 3.
Mr. Davies,
Mr. McCourt,
Mr. Collins.

Noes, 7.
Mr. Garrard,
Mr. Suttor,
Mr. Hoskins,
Dr. Garran,
Mr. Ewing,
Mr. Wall,
Mr. Neild.

The question “That the words proposed to be inserted be so inserted” was passed upon the following division :—

Ayes, 10.
Mr. Garrard,
Mr. Suttor,
Mr. Hoskins,
Dr. Garran,
Mr. Ewing,
Mr. Wall,
Mr. McCourt,
Mr. Neild,
Mr. O'Sullivan,
Mr. Collins.

Noes, 1.
Mr. Davies.

The clause as amended was then passed.

The further consideration of the Report was postponed until the following day.

The Committee adjourned at 15 minutes past 4, until 2 o'clock p.m. on Wednesday, the following day.

WEDNESDAY, 28 SEPTEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,
The Hon. James Hoskins,
The Hon. Frederick Thomas Humphery,
The Hon. Andrew Garran, LL.D.,
The Hon. John Davies, C.M.G.,
Thomas Thomson Ewing, Esq.,

William Chandos Wall, Esq.,
William McCourt, Esq.,
John Cash Neild, Esq.,
Edward William O'Sullivan, Esq.,
Charles Collins, Esq.,
Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence :—

Letter from the Hon. John See, M.P., Colonial Treasurer, expressing a desire to give evidence before the Committee in their inquiry respecting the proposed Railway from Eden to Bega.

The correspondence was received.

The Committee further considered their Report to the Legislative Assembly on the proposed Railway from Grafton to Lismore.

Clause 9—Conclusion arrived at by the Sectional Committee—was passed on the following division :—

Ayes, 8.
Mr. Garrard,
Mr. Hoskins,
Mr. Humphery,
Dr. Garran,
Mr. Ewing,
Mr. McCourt,
Mr. Neild,
Mr. O'Sullivan.

Noes, 1.
Mr. Davies.

The remaining clause of the Report was passed ; and the Report, as amended, was adopted on the following division :—

Ayes, 8.
Mr. Garrard,
Mr. Hoskins,
Dr. Garran,
Mr. Ewing,
Mr. Wall,
Mr. Neild,
Mr. O'Sullivan,
Mr. Collins.

Noes, 3.
Mr. Humphery,
Mr. Davies,
Mr. McCourt.

The Chairman was authorised to sign the Report for presentation to the Legislative Assembly. The Committee further considered the proposed Railway from Eden to Bega. Henry Deane, Esq., Engineer-in-Chief, Railway Construction Branch, Department of Public Works, was sworn, and further examined. The Committee adjourned at 13 minutes past 4, until 2 o'clock p.m. on Thursday, the following day.

THURSDAY, 29 SEPTEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,	William McCourt, Esq.,
The Hon. Andrew Garran, LL.D.,	John Cash Neild, Esq.,
The Hon. John Davies, C.M.G.,	Edward William O'Sullivan, Esq.,
Thomas Thomson Ewing, Esq.,	Charles Collins, Esq.,
William Chandos Wall, Esq.,	Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence:—

Letter from Mr. John M. Black, Wolumla, with reference to evidence given before the Committee in their inquiry respecting the proposed Railway from Eden to Bega.

The correspondence was received.

The Committee further considered the proposed Railway from Eden to Bega.

Henry Deane, Esq., Engineer-in-Chief, Railway Construction Branch, Department of Public Works, was sworn, and further examined.

Hon. John See, M.P., Colonial Treasurer, and Gustave Fischer, Esq., Assistant Engineer, Tramway Construction Branch, Department of Public Works, were sworn, and examined.

The Committee adjourned at 17 minutes past 4, until 2 o'clock p.m. on Tuesday, 4th October.

TUESDAY, 4 OCTOBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,	William Chandos Wall, Esq.,
The Hon. James Hoskins,	William McCourt, Esq.,
The Hon. Frederick Thomas Humphery,	John Cash Neild, Esq.,
The Hon. John Davies, C.M.G.,	Edward William O'Sullivan, Esq.,
Thomas Thomson Ewing, Esq.,	Charles Collins, Esq.,
	Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Committee further considered the proposed Railway from Eden to Bega.

Gustave Fischer, Esq., Assistant Engineer, Tramway Construction Branch, Department of Public Works, was sworn, and further examined.

Clement Van de Velde, Esq., C.E., was sworn, and examined.

The Committee proceeded to consider their Report to the Legislative Assembly on the proposed Sewerage Works for Parramatta.

The preamble and clauses 1 to 3 were passed.

The further consideration of the Report was postponed until the following day.

The following account was passed for payment:—Herbert Robinson, shorthand-writer and acting secretary to the Sectional Committee on the proposed Railway from Eden to Bega, £9 16s.

The Committee adjourned at 5 minutes past 4, until 2 o'clock p.m. on Wednesday the following day.

WEDNESDAY, 5 OCTOBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,	William Chandos Wall, Esq.,
The Hon. James Hoskins,	William McCourt, Esq.,
The Hon. Frederick Thomas Humphery,	John Cash Neild, Esq.,
The Hon. John Davies, C.M.G.,	Edward William O'Sullivan, Esq.,
Thomas Thomson Ewing, Esq.,	Charles Collins, Esq.,
	Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence:—

Letter from the Hon. Andrew Garran, LL.D., stating that having consented to accept the post of President of the Council of Arbitration, under the Trades Disputes Conciliation and Arbitration Act, he had by letter to His Excellency the Governor resigned his seat on the Committee.

The correspondence was received.

The

Mr. Wall moved,—“That a letter be written to Dr. Garran acknowledging the receipt of his letter, and regretting his severance from the Committee, and at the same time expressing the hope that his new position will be one of advantage to the country.”

The motion was seconded by Mr. Humphery, and passed.

The Committee further considered the proposed railway from Eden to Bega.

Hugh McLachlan, Esq., Secretary to the Railway Commissioners, was sworn, and further examined.

Mr. McCourt gave notice that he would move at the next meeting of the Committee,—“That the Committee do not consider it expedient to recommend the construction of the railway from Eden to Bega as referred to them by the Legislative Assembly, because the present resources of the district do not warrant the construction of such an expensive line; but the Committee are of opinion that a cheaply-constructed line of railway might be favourably considered.”

The Committee adjourned at 7 minutes to 4, until 2 o'clock p.m. on Thursday, the following day.

THURSDAY, 6 OCTOBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,
The Hon. James Hoskins,
The Hon. Frederick Thomas Humphery,
The Hon. John Davies, C.M.G.,
Thomas Thomson Ewing, Esq.,

William Chandos Wall, Esq.,
William McCourt, Esq.,
John Cash Neild, Esq.,
Edward William O'Sullivan, Esq.,
Charles Collins, Esq.,

Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence:—

Letter from Mr. Walter M. Noakes, Colonial Manager, John Fowler & Co., Limited, (Leeds) forwarding copies of John Fowler & Co.'s descriptive catalogues of light railways and rolling stock.

Letter, with attached tabulated statements respecting railways in South Australia, Victoria, and Queensland, from Mr. H. Deane, Engineer-in-Chief, Railway Construction Branch, Department of Public Works, with reference to the proposed railway from Eden to Bega.

The correspondence was received.

The Committee further considered their Report to the Legislative Assembly on the proposed Sewerage Works for Parramatta.

Clause 4.—Position of Parramatta with regard to proposed works.

Mr. Neild moved,—“That the clause be amended by the omission of the word ‘of’ after the word ‘question’ in the first line, with a view to insert the words ‘as to.’”

The amendment was negatived on the following division upon the question,—“That the word proposed to be omitted stand part of the clause” :—

Ayes, 6.

Mr. Garrard,
Mr. Hoskins,
Mr. Humphery,
Mr. Wall,
Mr. Collins,
Mr. Dawson.

Noes, 5.

Mr. Suttor,
Mr. Davies,
Mr. Ewing,
Mr. McCourt,
Mr. Neild.

The clause was passed.

Clauses 5 and 6 were passed.

Clause 7.—Special report on the scheme.

Mr. Neild moved,—“That the clause be amended by the omission of the word ‘sewerage’ in the second line, with a view to insert the word ‘sanitary.’”

The amendment was negatived on the following division upon the question,—“That the word proposed to be omitted stand part of the clause” :—

Ayes, 6.

Mr. Garrard,
Mr. Suttor,
Mr. Hoskins,
Mr. O'Sullivan,
Mr. Collins,
Mr. Dawson.

Noes, 3.

Mr. Davies,
Mr. McCourt,
Mr. Neild.

The clause was passed.

Clauses 8 to 10 were passed.

Clause 11.—Conclusion arrived at by the Committee.

Mr. Humphery moved,—“That the clause be amended by the omission of the word ‘but’ after the word ‘conflicting’ in the 29th line, with a view to the further amendment of the clause.”

The amendment was passed on the following division upon the question,—“That the word proposed to be omitted stand part of the clause” :—

Ayes, 4.

Mr. Hoskins,
Mr. Davies,
Mr. Neild,
Mr. Collins.

Noes, 7.

Mr. Garrard,
Mr. Suttor,
Mr. Humphery,
Mr. Ewing,
Mr. Wall,
Mr. O'Sullivan,
Mr. Dawson.

Mr.

Mr. Humphery moved,—“That the clause be further amended by the omission of the following words after the word ‘Committee’ in the 32nd line, ‘the fact cannot be overlooked that this clearer indication of what could or might be done, so far at least as to its being placed before the Committee for their information, was a consequence of the special report obtained by the Committee from Mr. Stayton.’”

The amendment was passed on the following division upon the question,—“That the words proposed to be omitted stand part of the clause” :—

Ayes, 3.
Mr. Davies,
Mr. Neild,
Mr. Collins.

Noes, 8.
Mr. Garrard,
Mr. Suttor,
Mr. Hoskins,
Mr. Humphery,
Mr. Ewing,
Mr. Wall,
Mr. O’Sullivan,
Mr. Dawson.

The clause was passed.

The Report as amended was adopted, and the Chairman was authorised to sign it for presentation to the Legislative Assembly.

Mr. Neild moved,—“That Mr. Thomas Midelton be summoned as a witness before the Committee to give evidence on narrow gauge railways, in relation to the proposed railway from Eden to Bega.”

The motion was seconded by Mr. Davies, and negatived.

The Committee adjourned at 28 minutes past 4, until 2 o’clock p.m., on Tuesday, 11th October.

TUESDAY, 11 OCTOBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,
The Hon. James Hoskins,
The Hon. Frederick Thomas Humphery,
The Hon. John Davies, C.M.G.,
Thomas Thomson Ewing, Esq.,

William Chandos Wall, Esq.,
William McCourt, Esq.,
John Cash Neild, Esq.,
Edward William O’Sullivan, Esq.,
Charles Collins, Esq.,

Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence :—

Proposed addition to the evidence given by Mr. H. Deane, Engineer-in-Chief, Railway Construction Branch, Department of Public Works, with reference to the proposed railway from Eden to Bega.

Minute paper and letter from Mr. H. Deane, Engineer-in-Chief, Railway Construction Branch, Department of Public Works, on the subject of cheap railways, with reference to the proposed railway from Eden to Bega.

The correspondence was received.

Mr. McCourt having with the consent of the Committee, amended his notice of motion by omitting from the end of it the words “might be favourably considered,” and inserting in their place the words “should be made,” moved,—“That the Committee do not consider it expedient to recommend the construction of the railway from Eden to Bega, as referred to them by the Legislative Assembly, because the present resources of the district do not warrant the construction of such an expensive line; but the Committee are of opinion that a cheaply-constructed line of railway should be made.”

Mr. O’Sullivan seconded the motion.

Mr. Davies moved,—“That the motion be amended by the omission of the words ‘but the Committee are of opinion that a cheaply-constructed line of railway should be made.’”

The amendment was seconded by Mr. Humphery, and after having, with consent, been altered so that the words proposed to be omitted should be, “but the Committee are of opinion that a cheaply constructed line of railway,” was negatived on the following division upon the question,—“That the words proposed to be omitted stand part of the resolution” :—

Ayes, 9.
Mr. Garrard,
Mr. Suttor,
Mr. Hoskins,
Mr. Ewing,
Mr. Wall,
Mr. McCourt,
Mr. Neild,
Mr. O’Sullivan,
Mr. Collins.

Noes, 3.
Mr. Humphery,
Mr. Davies,
Mr. Dawson.

Mr. Wall moved,—“That the motion be amended by omitting the words ‘should be made,’ with a view to insert in their place the words ‘might be favourably considered.’”

The omission of the words “should be made” was agreed to.

On the question,—“That the words proposed to be inserted be so inserted,” the Committee divided as follows :—

Ayes, 11.
Mr. Garrard,
Mr. Suttor,
Mr. Hoskins,
Mr. Humphery,
Mr. Ewing,
Mr. Wall,
Mr. McCourt,
Mr. Neild,
Mr. O’Sullivan,
Mr. Collins,
Mr. Dawson.

Noes, 1.
Mr. Davies.

The amendment was therefore passed.

The

The motion, as amended, was passed on the following division:—

<p>Ayes, 9. Mr. Garrard, Mr. Suttor, Mr. Hoskins, Mr. Ewing, Mr. Wall, Mr. McCourt, Mr. Neild, Mr. O'Sullivan, Mr. Collins.</p>	<p>Noes, 3. Mr. Humphery, Mr. Davies, Mr. Dawson.</p>
---	---

The Committee adjourned at 15 minutes past 4, until 2 o'clock p.m. on Wednesday, the following day.

WEDNESDAY, 12 OCTOBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

<p>The Hon. William Henry Suttor, The Hon. James Hoskins, The Hon. Frederick Thomas Humphery, The Hon. John Davies, C.M.G., Thomas Thomson Ewing, Esq.,</p>	<p>William Chandos Wall, Esq., William McCourt, Esq., John Cash Neild, Esq., Edward William O'Sullivan, Esq., Charles Collins, Esq.,</p>
---	--

Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Committee further considered the proposed Water Supply for Armidale.

Cecil West Darley, Esq., Engineer-in-Chief for Harbours and Rivers, was sworn, and further examined.

The Committee proceeded to consider the proposed Water Supply for Tamworth.

Joseph Barling, Esq., Under Secretary for Public Works, and Cecil West Darley, Esq., Engineer-in-Chief for Harbours and Rivers, were sworn, and examined.

Mr. Humphery moved,—“That Mr. Garrard, Mr. Davies, Mr. O'Sullivan, Mr. Neild, and Mr. Collins be appointed a Sectional Committee to inspect, take evidence, and report with reference to the proposed Water Supply for Armidale and Tamworth.”

Mr. Dawson seconded the motion.

Mr. Ewing moved,—“That the motion be amended by adding Mr. McCourt to the Sectional Committee.”

The amendment was seconded by Mr. Neild, and passed, and the motion as amended was agreed to.

The Committee adjourned at 3 minutes past 4, until Saturday, 22 October, at Lithgow.

SATURDAY, 22 OCTOBER, 1892.

The Committee met at the “Cosmopolitan Hotel,” Lithgow, at 10 a.m.

MEMBERS PRESENT:—

The Hon. William Henry Suttor, Vice-Chairman.

<p>The Hon. William Joseph Trickett, Thomas Thomson Ewing, Esq.,</p>	<p>William Chandos Wall, Esq., Henry Dawson, Esq.</p>
--	---

The minutes of the previous meeting were read, and confirmed.

The Chairman reported that the Hon. William Joseph Trickett, M.L.C., appointed on the 12th instant a member of the Committee, had made the declaration necessary under the sixth clause of the Public Works Act.

Mr. Trickett then took his seat as a member of the Committee.

The Secretary read the following correspondence:—

Telegrams from Mr. Garrard, Chairman of the Sectional Committee appointed with reference to the proposed Water Supply for Armidale and Tamworth, reporting the progress made by the Sectional Committee in their inquiry.

The correspondence was received.

Mr. Dawson moved,—“That Mr. Suttor, Mr. Trickett, Mr. Ewing, Mr. Wall, and the mover be appointed a Sectional Committee to inspect, take evidence, and report with reference to the proposed Water Supply at Lithgow.”

The motion was seconded by Mr. Wall and passed.

The Committee adjourned at 15 minutes past 10, until 2 o'clock p.m. on Wednesday, 26th October.

WEDNESDAY, 26 OCTOBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

<p>The Hon. William Henry Suttor, The Hon. Frederick Thomas Humphery, The Hon. John Davies, C.M.G., The Hon. William Joseph Trickett, Thomas Thomson Ewing, Esq.,</p>	<p>William Chandos Wall, Esq., William McCourt, Esq., John Cash Neild, Esq., Edward William O'Sullivan, Esq., Charles Collins, Esq.,</p>
---	--

Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence:—

Letter from Mr. Clement Van de Velde, C.E., forwarding information with reference to narrow gauge railways in France.

The correspondence was received.

Mr.

Mr. Garrard, as Chairman of the Sectional Committee appointed with reference to the proposed Water Supply for Armidale, brought up the Report of the Sectional Committee, and moved that it be received and printed with the minutes of evidence taken before the Sectional Committee.

The motion was seconded by Mr. O'Sullivan, and passed.

Mr. Suttor, as Chairman of the Sectional Committee appointed with reference to the proposed Water Supply for Lithgow, brought up the Report of the Sectional Committee, and moved that it be received and printed with the minutes of evidence taken before the Sectional Committee.

The motion was seconded by Mr. Ewing, and passed.

Mr. McCourt moved,—“That, at their rising this day, the Committee do adjourn until Tuesday, 15th November.

The motion was seconded by Mr. Humphery, and passed.

The Committee proceeded to consider their Report to the Legislative Assembly on the proposed Railway from Eden to Bega.

The preamble and clauses 1 to 8 were passed.

Clause 9.—Circumstances unfavourable to the railway.

Mr. Wall moved,—“That the clause be amended by omitting the words, ‘in this connection it is interesting to note a return produced by him and published with his evidence, giving a statement of the sectional earnings of ten of the branch lines of the Colony for last year, and showing a loss of £311,430.’”

Mr. Neild seconded the amendment.

The amendment was negatived on the following division upon the question,—“That the words proposed to be omitted stand part of the clause” :—

Ayes, 6.	Noes, 6.
Mr. Garrard,	Mr. Suttor,
Mr. Hoskins,	Mr. Wall,
Mr. Humphery,	Mr. McCourt,
Mr. Davies,	Mr. Neild,
Mr. Trickett,	Mr. O'Sullivan,
Mr. Collins.	Mr. Dawson.

The division being equal the Chairman gave his casting vote with the Ayes.

Mr. Wall moved,—“That the clause be amended by omitting the following words :—‘in connection with the statement of unprofitable branch lines brought before the Committee by the Secretary for Railways, it is pointed out that these lines may have helped the main line to some extent by feeding it.’”

Mr. Neild seconded the amendment.

The amendment was negatived on the following division upon the question,—“That the words proposed to be omitted stand part of the clause” :—

Ayes, 6.	Noes, 6.
Mr. Garrard,	Mr. Suttor,
Mr. Hoskins,	Mr. Wall,
Mr. Humphery,	Mr. McCourt,
Mr. Davies,	Mr. Neild,
Mr. Trickett,	Mr. O'Sullivan,
Mr. Collins.	Mr. Dawson.

The division being equal the Chairman gave his casting vote with the Ayes.

Mr. Neild moved,—“That the clause be amended by omitting from the end of the clause the words, ‘in all other cases the main line rolling stock has done the branch lines work.’”

The amendment was seconded by Mr. Suttor, and passed on the following division upon the question,—“That the words proposed to be omitted stand part of the clause” :—

Ayes, 4.	Noes, 8.
Mr. Garrard,	Mr. Suttor,
Mr. Hoskins,	Mr. Humphery,
Mr. Davies,	Mr. Trickett,
Mr. Collins.	Mr. Wall,
	Mr. McCourt,
	Mr. Neild,
	Mr. O'Sullivan,
	Mr. Dawson.

The clause as amended was passed on the following division :—

Ayes, 8.	Noes, 4.
Mr. Garrard,	Mr. Wall,
Mr. Suttor,	Mr. McCourt,
Mr. Hoskins,	Mr. Neild,
Mr. Humphery,	Mr. Dawson.
Mr. Davies,	
Mr. Trickett,	
Mr. O'Sullivan,	
Mr. Collins.	

Clause 10 was passed.

Clause 11—The Committee's recommendation—was passed on the following division :—

Ayes, 7.	Noes, 4.
Mr. Garrard,	Mr. Humphery,
Mr. Suttor,	Mr. Davies,
Mr. Hoskins,	Mr. Trickett,
Mr. McCourt,	Mr. Dawson.
Mr. Neild,	
Mr. O'Sullivan,	
Mr. Collins.	

Clause 12 was passed.

The Report, as amended, was adopted, and the Chairman was authorised to sign it for presentation to the Legislative Assembly.

The following accounts were passed for payment:—							£	s.	d.
Balmer and Sons (<i>Lismore Chronicle</i>)	2	0	0
<i>Lithgow Mercury</i> Newspaper Co.	0	7	0
<i>Lithgow Times</i>	0	7	0
Tucker, Gillies, and Thompson (<i>Maitland Mercury</i>)	0	15	0
Smith and Kopsen	1	11	6
Todd and Hooke (<i>Tamworth Observer</i>)	1	2	0
John Fairfax and Sons (<i>Sydney Morning Herald</i>)...	1	11	6
Charles Lyne—Secretary's expenses with Committee to Lithgow	3	12	6
Samuel Kirkland Johnstone, shorthand writer accompanying Sectional Committee on proposed Water Supply for Armidale and Tamworth	14	3	6
Richard Rollo Carrington, shorthand writer accompanying Sectional Committee on proposed Water Supply for Lithgow	4	1	0
Total ...							£29	11	0

The Committee adjourned at 10 minutes past 4, until 2 o'clock p.m. on Tuesday, 15th November.

TUESDAY, 15 NOVEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,	William Chandos Wall, Esq.,
The Hon. James Hoskins,	William McCourt, Esq.,
The Hon. Frederick Thomas Humphery,	John Cash Neild, Esq.,
The Hon. John Davies, C.M.G.,	Edward William O'Sullivan, Esq.,
The Hon. William Joseph Trickett.,	Charles Collins, Esq.,
Thomas Thomson Ewing, Esq.,	Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence:—

Letter from the Clerk of the Legislative Assembly, informing the Committee of a resolution passed by the Legislative Assembly, on the 27th ultimo, remitting to the Committee for further consideration and report their Report upon the proposed Railway from Glen Innes to Inverell.

Letters from Mr. John Riely and Mr. G. M. Jarvey, with reference to the proposed Water Supply for Tamworth.

The correspondence was received.

Letter from Mr. C. Laverty, Council Clerk, Borough of Tamworth, forwarding, for the information of the Committee, a copy of the details of an analysis of water from the town pump and Crawford's Well, Tamworth, with reference to the proposed Water Supply for Tamworth.

The letter was received, and it was decided on the following division that it be published as an appendix to the evidence given before the Sectional Committee appointed with reference to the proposed Water Supply for Tamworth:—

Ayes, 9.	Noes, 4.
Mr. Garrard,	Mr. Davies,
Mr. Suttor,	Mr. Trickett,
Mr. Hoskins,	Mr. Neild,
Mr. Humphery,	Mr. Dawson.
Mr. Ewing,	
Mr. Wall,	
Mr. McCourt,	
Mr. O'Sullivan,	
Mr. Collins.	

Mr. Garrard, as Chairman of the Sectional Committee appointed with reference to the proposed Water Supply for Tamworth, brought up the Report of the Sectional Committee, and moved that it be received and printed with the minutes of evidence taken before the Sectional Committee.

The motion was seconded by Mr. McCourt, and passed.

The Committee further considered the proposed Water Supply for Tamworth.

Cecil West Darley, Esq., Engineer-in-Chief for Harbours and Rivers, was sworn, and further examined.

Mr. Neild gave notice that he would move at the next meeting of the Committee,—“That the Report of the Sectional Committee upon the question of Water Supply for the town of Tamworth having been arrived at by the double vote of the Chairman, the members of the Committee differing from such Report be granted leave to present a minority report.”

Mr. Suttor gave notice that he would move at the next meeting of the Committee,—“That, in the opinion of the Committee, it is expedient the proposed Water Supply for Lithgow, as referred to the Committee by the Legislative Assembly, be carried out.”

Mr. Davies gave notice that he would move at the next meeting of the Committee,—“That, in the opinion of the Committee, it is expedient the proposed Water Supply for Armidale, as referred to the Committee by the Legislative Assembly, be carried out.”

Mr. McCourt gave notice that he would move at the next meeting of the Committee,—

- (1) “That, as the Legislative Assembly has referred back to this Committee the proposed Railway from Glen Innes to Inverell for reconsideration, the Committee are of opinion that further surveys should be made of the line from Guyra to Inverell, so as to enable the Committee to determine the best point to connect Inverell with the Northern line.

- (2) “That the above resolution be forwarded to the Minister for Works.”

Mr.

Mr. Trickett gave notice that he would move at the next meeting of the Committee,—“That samples of water procured from the site of the proposed Government well (Tamworth), and the present town well, be obtained and sent to Mr. Hamlet for analysis.”

The Committee adjourned at 20 minutes past 4, until 2 o'clock p.m. on Wednesday, the following day.

WEDNESDAY, 16 NOVEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor, The Hon. James Hoskins, The Hon. Frederick Thomas Humphery, The Hon. John Davies, C.M.G., The Hon. William Joseph Trickett, Thomas Thomson Ewing, Esq.,		William Chandos Wall, Esq., William McCourt, Esq., John Cash Neild, Esq., Edward William O'Sullivan, Esq., Charles Collins, Esq., Henry Dawson, Esq.
---	--	---

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence:—

Letter from Mr. Thomas Jones, Eden Heights, Tingha, to Mr. James Inglis, M.P., and forwarded by him to the Committee, with reference to the proposed Railway from Glen Innes to Inverell.

The correspondence was received.

The following accounts were passed for payment:—

	£	s.	d.
F. Lassetter & Co.	1	10	0
Snowdon and Sampson		15	0
John Ferguson (<i>Cumberland Times</i>)... ..	1	4	0
Total	£3	9	0

On the motion of Mr. Davies, seconded by Mr. O'Sullivan, leave was given to the Sectional Committee appointed with reference to the proposed Water Supply for Tamworth to amend their report.

Mr. Neild's notice of motion with reference to a minority report in connection with the Report of the Sectional Committee on the proposed Water Supply for Tamworth, was withdrawn.

Mr. Suttor moved,—“That, in the opinion of the Committee, it is expedient the proposed Water Supply for Lithgow, as referred to the Committee by the Legislative Assembly, be carried out.”

The motion was seconded by Mr. Trickett, and passed.

Mr. Davies moved,—“That, in the opinion of the Committee, it is expedient the proposed Water Supply for Armidale, as referred to the Committee by the Legislative Assembly, be carried out.”

The motion was seconded by Mr. O'Sullivan, and passed.

Mr. McCourt's notice of motion, with reference to the proposed Railway from Glen Innes to Inverell, was postponed.

Mr. Trickett, having with the consent of the Committee amended his notice of motion, moved,—“That samples of water procured from the site of the proposed Government well (Tamworth), and the present town well, be obtained by Mr. Hamlet, for analysis, and that he be requested to report generally on the site of the proposed well.”

The motion was seconded by Mr. McCourt, and passed.

The Committee proceeded to consider their Report to the Legislative Assembly on the proposed Water Supply for Lithgow.

The Report was adopted, and the Chairman was authorised to sign it for presentation to the Legislative Assembly.

The Committee proceeded to consider their Report to the Legislative Assembly on the proposed Water Supply for Armidale.

The Report was adopted, and the Chairman was authorised to sign it for presentation to the Legislative Assembly.

Mr. Davies moved,—“That the further consideration of the proposed Water Supply for Tamworth be postponed until after the result of the analysis to be made by Mr Hamlet has been received.”

The motion was seconded by Mr. McCourt, and passed.

The Committee adjourned at 8 minutes to 4, until 2 o'clock p.m. on Thursday, the following day.

THURSDAY, 17 NOVEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor, The Hon. James Hoskins, The Hon. Frederick Thomas Humphery, The Hon. John Davies, C.M.G., The Hon. William Joseph Trickett, Thomas Thomson Ewing, Esq.,		William Chandos Wall, Esq., William McCourt, Esq., John Cash Neild, Esq., Edward William O'Sullivan, Esq., Charles Collins, Esq., Henry Dawson, Esq.
---	--	---

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence:—

Letter from the Hon. Henry Copeland, M.P., with reference to the proposed Railway from Glen Innes to Inverell.

The correspondence was received.

The

The Chairman mentioned that a notice of motion had been handed in by Mr Neild, which he had instructed the Secretary not to put upon the business paper, as he ruled it out of order, on the ground that no motion which had for its object the decision of the Committee on a proposed work could be given notice of before the Committee had concluded the examination of witnesses respecting that work.

The Committee proceeded to consider the proposed Railway from Glen Innes to Inverell.

Joseph Barling Esq., Under Secretary for Public Works, and Henry Deane, Esq., Engineer-in-Chief, Railway Construction Branch, Department of Public Works, were sworn, and examined.

The Committee adjourned at 2 minutes to 4, until 2 o'clock p.m. on Tuesday, 22 November.

TUESDAY, 22 NOVEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,
The Hon. James Hoskins,
The Hon. Frederick Thomas Humphery,
The Hon. John Davies, C.M.G.,
The Hon. William Joseph Trickett,
Thomas Thomson Ewing, Esq.,

William Chandos Wall, Esq.,
William McCourt, Esq.,
John Cash Neild, Esq.,
Edward William O'Sullivan, Esq.,
Charles Collins, Esq.,
Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence:—

Letter from the Secretary of the Board of Health with reference to the visit of the Government Analyst to Tamworth, in connection with the Committee's inquiry respecting the proposed Water Supply for Tamworth.

Minute paper from Mr. Henry Deane, Engineer-in-Chief, Railway Construction Branch, Department of Public Works, explaining the details of the estimate of cost given by him in his evidence respecting the proposed Railway from Glen Innes to Inverell.

Letter from Messrs. Shand, Mason, & Co., with reference to the proposed Lunatic Asylum at Kenmore, near Goulburn.

The correspondence was received.

The Committee further considered the proposed Railway from Glen Innes to Inverell.

Charles Edward Hogg Esq., formerly Surveyor, Railway Construction Branch, Department of Public Works; John M'Masters, Esq., and John Harper, Esq., Goods Superintendent, Department of Railways, were sworn, and examined.

Mr. O'Sullivan gave notice that he would move at the next meeting of the Committee,—“That Mr Suttor, Mr. Humphery, Mr. Dawson, Mr. Collins, Mr. Ewing, Mr. Neild, and Mr. Wall be appointed a Sectional Committee to inspect, take evidence, and report with reference to the proposed line of Railway from Glen Innes to Inverell.”

The Committee adjourned at 19 minutes past 4, until 2 o'clock p.m. on Wednesday, the following day.

WEDNESDAY, 23 NOVEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,
The Hon. James Hoskins,
The Hon. Frederick Thomas Humphery,
The Hon. John Davies, C.M.G.,
The Hon. William Joseph Trickett,
Thomas Thomson Ewing, Esq.,

William Chandos Wall, Esq.,
William McCourt, Esq.,
John Cash Neild, Esq.,
Edward William O'Sullivan, Esq.,
Charles Collins, Esq.,
Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Committee further considered the proposed Railway from Glen Innes to Inverell.

Edward Pulsford, Esq., was sworn, and examined.

Mr. O'Sullivan moved,—“That Mr. Suttor, Mr. Humphery, Mr. Dawson, Mr. Collins, Mr. Ewing, Mr. Neild, and Mr. Wall be appointed a Sectional Committee to inspect, take evidence, and report with reference to the proposed line of Railway from Glen Innes to Inverell.”

Mr. Collins seconded the motion.

Mr. Hoskins moved,—“That the motion be amended by the omission of all the words after the word ‘That’ to the name ‘Mr. Wall.’”

The amendment was seconded by Mr. McCourt, and negatived on the following division, upon the question,—“That the words proposed to be omitted stand part of the resolution”:—

Ayes, 7.

Noes, 3.

Mr. Garrard,
Mr. Suttor,
Mr. Ewing,
Mr. Wall,
Mr. Neild,
Mr. O'Sullivan,
Mr. Collins.

Mr. Hoskins,
Mr. Davies,
Mr. McCourt.

Mr. McCourt moved,—“That the motion be amended by the omission of the words ‘take evidence.’”

The

The amendment was seconded by Mr. Hoskins, and negatived on the following division upon the question,—“That the words proposed to be omitted stand part of the resolution” :—

Ayes, 9. Mr. Garrard, Mr. Suttor, Mr. Humphery, Mr. Trickett, Mr. Ewing, Mr. Wall, Mr. Neild, Mr. O'Sullivan, Mr. Collins.	Noes, 3. Mr. Hoskins, Mr. Davies, Mr. McCourt.
---	---

The motion was passed on the following division :—

Ayes, 9. Mr. Garrard, Mr. Suttor, Mr. Humphery, Mr. Trickett, Mr. Ewing, Mr. Wall, Mr. Neild, Mr. O'Sullivan, Mr. Collins.	Noes, 2. Mr. Hoskins, Mr. Davies.
---	---

Mr. McCourt moved,—

“(1.) That as the Legislative Assembly has referred back to this Committee the proposed Railway from Glen Innes to Inverell for reconsideration, the Committee are of opinion that further surveys should be made of the line from Guyra to Inverell, so as to enable the Committee to determine the best point to connect Inverell with the Northern line.

“(2.) That the above resolution be forwarded to the Minister for Works.”

Mr. Hoskins seconded the motion.

Mr. Neild moved, as an amendment,—“That the debate be adjourned until the Report of the Sectional Committee has been received.”

The amendment was passed on the following division :—

Ayes, 9. Mr. Garrard, Mr. Suttor, Mr. Humphery, Mr. Ewing, Mr. Wall, Mr. Neild, Mr. O'Sullivan, Mr. Collins, Mr. Dawson.	Noes, 4. Mr. Hoskins, Mr. Davies, Mr. Trickett, Mr. McCourt.
---	--

The Committee adjourned at 15 minutes past 4, until 2 o'clock p.m. on Tuesday, 13th December.

TUESDAY, 13 DECEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor, The Hon. James Hoskins, The Hon. Frederick Thomas Humphery, The Hon. John Davies, C.M.G., The Hon. William Joseph Trickett,	William Chandos Wall, Esq., William McCourt, Esq., John Cash Neild, Esq., Edward William O'Sullivan, Esq., Charles Collins, Esq.,
Henry Dawson, Esq.	

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence :—

Telegram from Mr. Ewing explaining his absence from the meeting.

Letter from Mr. Eugene F. Rudder, Coramba, with reference to the proposed Railway from Glen Innes to Inverell.

Letter from Mr. F. Van Vhek, Chief Engineer, Pacific Railway Co., Los Angeles, California, acknowledging the receipt of a copy of the Committee's Report on the Cable Tramway from King-street, *via* William-street, to Ocean-street.

Letter from the Secretary of the Board of Health, forwarding a report and analysis by the Government Analyst, with reference to the proposed Water Supply for Tamworth.

Letter from Mr. C. W. Darley, Engineer-in-Chief for Harbours and Rivers, with a report from Mr. Edward B. Price, Department of Harbours and Rivers, with reference to the proposed Water Supply for Tamworth.

The correspondence was received.

Mr. Suttor, as Chairman of the Sectional Committee appointed with reference to the proposed Railway from Glen Innes to Inverell, brought up the Report of the Sectional Committee, and moved that it be received and printed with the evidence taken before the Sectional Committee.

The motion was seconded by Mr. Humphery, and passed.

The Committee further considered the proposed Water Supply for Tamworth.

William Mogford Hamlet, Esq., F.C.S., Government Analyst, and Theodore Pridham, Esq., Assistant Engineer for Water Supply, Department of Harbours and Rivers, were sworn, and examined.

The Committee adjourned at a quarter past 4, until 2 o'clock p.m. on Wednesday, the following day.

WEDNESDAY,

WEDNESDAY, 14 DECEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,	William Chandos Wall, Esq.,
The Hon. James Hoskins,	William McCourt, Esq.,
The Hon. Frederick Thomas Humphery,	John Cash Neild, Esq.,
The Hon. John Davies, C.M.G.,	Edward William O'Sullivan, Esq.,
The Hon. William Joseph Trickett.	Charles Collins, Esq.,

Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Committee further considered the proposed Water Supply for Tamworth.

Edward B. Price, Esq., Supervising Engineer, Department of Harbours and Rivers; John Alexander McDonald, Esq., M.I.C.E., Engineer for Bridges, Department of Roads and Bridges; and Henry Deane, Esq., Engineer-in-Chief, Railway Construction Branch, Department of Public Works, were sworn, and examined.

The following accounts were passed for payment:—

	£	s.	d.
Edward Downey, Shorthand-writer and Acting Secretary to the Sectional Committee on proposed Railway from Glen Innes to Inverell	20	9	0
J. D. Gray (<i>Grafton Argus</i>)	1	10	0
Solomon Joseph (<i>Tamworth News</i>)	1	4	0
<i>Glen Innes Guardian</i>	1	7	0
A. H. Bond (<i>Inverell Times</i>)	1	6	0
Edward Pulsford (<i>Armidale Chronicle</i>)... ..	0	13	6
Total	£26	9	6

Mr. McCourt gave notice that he would move at the next meeting of the Committee,—“That, in the opinion of the Committee, it is expedient to carry out the Tamworth Water Supply as referred to the Committee by the Legislative Assembly.”

Mr. Neild gave notice that he would move at the next meeting of the Committee, as an amendment of Mr. McCourt's motion,—“That all the words after ‘Committee’ be omitted, with a view to the insertion of the following words: ‘it is not expedient the proposed works for the supply of water to the town of Tamworth, as referred to the Committee by the Legislative Assembly, be carried out, for the following reasons:—

- “(1.) Because the Department has prepared the scheme without obtaining reliable information respecting it, the evidence showing that the scheme was originally designed in 1879 or 1880 (*vide Q. 57*); that the officer best acquainted with the scheme worked it out twelve years ago (*vide Q. 104*); that no other experiment has been made by the Department to test the supply.
- “(2.) Because the only test made was the sinking of a hole 10 feet deep by the municipal overseer, at the request of the Department, upwards of a week after the proposal was referred by Parliament to the Public Works Committee (*vide Q. 1233*).
- “(3.) Because the reticulation plan has never been laid before the Council (*vide Q. 1291*); there has been no official approval by the Council (*vide Q. 1252*), and because one-fourth of the cost of reticulation, or £4,300, is unnecessary (*vide Q. 1417*).
- “(4.) Because on the alluvial flat, from beneath which it is proposed to draw the water supply, there are thirty to forty Chinese market gardens (*vide Q. 909*), occupied by four to five men each (*vide Q. 910*), using large quantities of stable manure and house refuse (*vide Qs. 911 to 919*), and human excreta (*vide Q. 1330*).
- “(5.) Because, according to the evidence of the Government Medical Officer, ‘it is desperately dangerous to human life to draw water from under ground which is manured with the rubbish’ used (*vide Qs. 1378 to 1380*).
- “(6.) Because, in addition to the Chinese gardeners, a considerable population (several hundreds)—about two persons per acre—is settled on the flat from beneath which the water supply for Tamworth is proposed to be drawn (*vide Q. 1332*). Because many of these persons possess ‘no sanitary arrangements of any kind’ about their houses (*vide Q. 1397*), while others have cesspits (*vide Q. 1398*), the contents of which ‘must of necessity find their way through the porous alluvial soil, and would necessarily contaminate the water’ (*vide Qs. 1401 and 1402*).
- “(7.) Because ‘the farmers, Chinamen, and others’ use their own house refuse and excreta as manure upon the ground overlying the proposed water supply (*vide Qs. 1329 and 1330*).
- “(8.) Because the proposed site for the well is within 100 feet of a Chinese dwelling and cesspit (*vide Q. 1381*), and within a few hundred feet of other cesspits used by large numbers of people (*vide Qs. 1383 to 1385*).
- “(9.) Because no test of the quality of the water would be valuable as affording evidence of safety from future contamination, or from fever microbes, which ‘will pass through drift for an immense distance’ (*vide Q. 1386*).
- “(10.) Because, though excellent opportunities exist for the supply of water to Tamworth and the adjoining districts, by gravitation, from a water-shed having a catchment area of 300 square miles (*vide Q. 698*), already set apart by the Government as a water reserve, no examination of such source of supply has been made by the Department, further than an adverse criticism of the plans prepared by Mr. F. B. Gipps, C.E.
- “(11.) Because in view of the undoubtedly good opportunities for carrying out a gravitation scheme, as desired by all local witnesses, even at a largely enhanced cost, the fullest inquiry into the question of a gravitation supply ought to be made before any pumping scheme is further proceeded with.”

The Committee adjourned at 2 minutes to 4, until 2 o'clock p.m. on Tuesday, the 20th December.

TUESDAY,

TUESDAY, 20 DECEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,	William Chandos Wall, Esq.,
The Hon. James Hoskins,	William McCourt, Esq.,
The Hon. Frederick Thomas Humphery,	John Cash Neild, Esq.,
The Hon. John Davies, C.M.G.,	Edward William O'Sullivan, Esq.,
The Hon. William Joseph Trickett,	Charles Collins, Esq.,
Thomas Thomson Ewing, Esq.,	Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence:—

Letter from Mr. Theodore Pridham, Assistant Engineer for Water Supply, Department of Harbours and Rivers, with reference to the proposed Water Supply for Tamworth.

Letter from Mr. Frederick B. Gipps, Civil and Hydraulic Engineer, asking to be allowed to give evidence before the Committee with reference to the proposed Water Supply for Tamworth.

The correspondence was received.

Mr. O'Sullivan moved,—“That Mr. Pridham's letter be published as an appendix to the evidence given before the Committee with reference to the proposed Water Supply for Tamworth.”

The motion was seconded by Mr. Collins, and passed on the following division:—

Ayes, 11.

Mr. Garrard,
Mr. Suttor,
Mr. Hoskins,
Mr. Humphery,
Mr. Trickett,
Mr. Ewing,
Mr. Wall,
Mr. McCourt,
Mr. O'Sullivan,
Mr. Collins,
Mr. Dawson.

Noes, 2.

Mr. Davies,
Mr. Neild.

Mr. Davies moved,—“That Mr. Gipps' request to be allowed to give evidence before the Committee with reference to the proposed Water Supply for Tamworth be complied with.”

The motion was seconded by Mr. Neild, and passed on the following division:—

Ayes, 7.

Mr. Garrard,
Mr. Suttor,
Mr. Humphery,
Mr. Davies,
Mr. McCourt,
Mr. Neild,
Mr. O'Sullivan.

Noes, 6.

Mr. Hoskins,
Mr. Trickett,
Mr. Ewing,
Mr. Wall,
Mr. Collins,
Mr. Dawson.

The Committee further considered the proposed Water Supply for Tamworth.

Frederick B. Gipps, Esq., Civil and Hydraulic Engineer, was sworn, and examined.

Mr. McCourt moved,—“That in the opinion of the Committee it is expedient to carry out the Tamworth Water Supply as referred to the Committee by the Legislative Assembly.”

Mr. Dawson seconded the motion.

Mr. Neild, having, with consent, amended the preliminary portion of the amendment of which he had given notice, moved,—“That the motion be amended by the insertion of the word ‘not’ before the word ‘expedient’ with a view to afterwards add to the motion the following words ‘for the following reasons’:—

- “(1.) Because the Department has prepared the scheme without obtaining reliable information respecting it, the evidence showing that the scheme was originally designed in 1879 or 1880 (*vide* Q. 57); that the officer best acquainted with the scheme worked it out twelve years ago (*vide* Q. 104); that no other experiment has been made by the Department to test the supply.
- “(2.) Because the only test made was the sinking of a hole 10 feet deep by the municipal overseer, at the request of the Department, upwards of a week after the proposal was referred by Parliament to the Public Works Committee (*vide* Q. 1233).
- “(3.) Because the reticulation plan has never been laid before the Council (*vide* Q. 1291); there has been no official approval by the Council (*vide* Q. 1252), and because one-fourth of the cost of reticulation, or £4,300, is unnecessary (*vide* Q. 1417).
- “(4.) Because on the alluvial flat, from beneath which it is proposed to draw the water supply, there are thirty to forty Chinese market gardens (*vide* Q. 909), occupied by four to five men each (*vide* Q. 910), using large quantities of stable manure and house refuse (*vide* Qs. 911 to 919), and human excreta (*vide* Q. 1330).
- “(5.) Because, according to the evidence of the Government Medical Officer, ‘it is desperately dangerous to human life to draw water from under ground which is manured with the rubbish’ used (*vide* Qs. 1378 to 1380).
- “(6.) Because, in addition to the Chinese gardeners, a considerable population (several hundreds)—about two persons per acre—is settled on the flat from beneath which the water supply for Tamworth is proposed to be drawn (*vide* Q. 1332). Because many of these persons possess ‘no sanitary arrangements of any kind’ about their houses (*vide* Q. 1397), while others have cesspits (*vide* Q. 1398), the contents of which ‘must of necessity find their way through the porous alluvial soil, and would necessarily contaminate the water’ (*vide* Qs. 1401 and 1402).
- “(7.) Because ‘the farmers, Chinamen, and others’ use their own house refuse and excreta as manure upon the ground overlying the proposed water supply. (*vide* Qs. 1329 and 1330).

“(8.)

- "(8.) Because the proposed site for the well is within 100 feet of a Chinese dwelling and cesspit (*vide* Q. 1381), and within a few hundred feet of other cesspits used by large numbers of people (*vide* Qs. 1383 to 1385).
- "(9.) Because no test of the quality of the water would be valuable as affording evidence of safety from future contamination, or from fever microbes, which 'will pass through drift for an immense distance' (*vide* Q. 1386).
- "(10.) Because, though excellent opportunities exist for the supply of water to Tamworth and the adjoining districts, by gravitation, from a water-shed having a catchment area of 300 square miles (*vide* Q. 698), already set apart by the Government as a water reserve, no examination of such source of supply has been made by the Department, further than an adverse criticism of the plans prepared by Mr. F. B. Gipps, C.E.
- "(11.) Because in view of the undoubtedly good opportunities for carrying out a gravitation scheme, as desired by all local witnesses, even at a largely enhanced cost, the fullest inquiry into the question of a gravitation supply ought to be made before any pumping scheme is further proceeded with."

The amendment was negatived on the following division upon the question,—“That the word proposed to be inserted be so inserted” :—

Ayes, 2.
Mr. Davies,
Mr. Neild.

Noes, 11.
Mr. Garrard,
Mr. Suttor,
Mr. Hoskins,
Mr. Humphery,
Mr. Trickett,
Mr. Ewing,
Mr. Wall,
Mr. McCourt,
Mr. O'Sullivan,
Mr. Collins,
Mr. Dawson.

Mr. Neild moved,—“That the motion be amended by the addition of the following words: ‘if the official approval of the Municipal Council is obtained and an area of forty acres be resumed around the site of the proposed well.’”

The amendment was seconded by Mr. Davies, and negatived on the following division upon the question,—“That the words proposed to be added be so added” :—

Ayes, 2.
Mr. Davies,
Mr. Neild.

Noes, 11.
Mr. Garrard,
Mr. Suttor,
Mr. Hoskins,
Mr. Humphery,
Mr. Trickett,
Mr. Ewing,
Mr. Wall,
Mr. McCourt,
Mr. O'Sullivan,
Mr. Collins,
Mr. Dawson.

The motion was passed on the following division :—

Ayes, 11.
Mr. Garrard,
Mr. Suttor,
Mr. Hoskins,
Mr. Humphery,
Mr. Trickett,
Mr. Ewing,
Mr. Wall,
Mr. McCourt,
Mr. O'Sullivan,
Mr. Collins,
Mr. Dawson.

Noes, 2.
Mr. Davies,
Mr. Neild.

The resumption of the adjourned debate upon Mr. McCourt's motion with reference to the proposed Railway from Glen Innes to Inverell was postponed until the following day.

Mr. O'Sullivan gave notice that he would move at the next meeting of the Committee,—“That, in the opinion of this Committee, it is expedient to carry out the proposed line of Railway from Glen Innes to Inverell, as referred to the Committee by the Legislative Assembly.”

The Committee adjourned at 32 minutes past 4, until 2 o'clock p.m. on Wednesday, the following day.

WEDNESDAY, 21 DECEMBER, 1892.

The Committee met at 2 p.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,
The Hon. James Hoskins,
The Hon. Frederick Thomas Humphery,
The Hon. John Davies, C.M.G.,
The Hon. William Joseph Trickett,
Thomas Thomson Ewing, Esq.,

William Chandos Wall, Esq.,
William McCourt, Esq.,
John Cash Neild, Esq.,
Edward William O'Sullivan, Esq.,
Charles Collins, Esq.,
Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Committee proceeded to consider their Report to the Legislative Assembly on the proposed Water Supply for Tamworth. The

The preamble and clauses 1 and 2 were passed.

Clause 3.—The Committee's inquiry.

Mr. Neild moved,—“That the clause be amended by the insertion of the words ‘civil engineer’ after the name ‘Mr. F. B. Gipps.’”

The amendment was seconded by Mr. Davies, and passed on the following division:—

Ayes, 5.	Noes, 4.
Mr. Garrard,	Mr. Suttor,
Mr. Davies,	Mr. Trickett,
Mr. McCourt,	Mr. Ewing,
Mr. Neild,	Mr. Dawson.
Mr. O'Sullivan.	

The clause was then passed.

Clause 4.—The rival scheme.

Mr. Humphery moved,—“That the clause be amended by the omission of the words ‘by which a’ in the tenth line, with a view to alter the wording of this part of the clause from ‘a scheme by which a water supply could be obtained by gravitation’ to ‘a scheme to supply water by gravitation.’”

The amendment was seconded by Mr. McCourt, and passed on the following division upon the question,—“That the words proposed to be omitted stand part of the clause”:—

Ayes, 5.	Noes, 7.
Mr. Garrard,	Mr. Suttor,
Mr. Davies,	Mr. Hoskins,
Mr. Neild,	Mr. Humphery,
Mr. O'Sullivan,	Mr. Trickett,
Mr. Collins.	Mr. Ewing,
	Mr. McCourt,
	Mr. Dawson.

Mr. McCourt moved,—“That the clause be amended by the omission after the word ‘Tamworth’ in the twelfth line of the words ‘This scheme the Borough Council accepted.’”

The amendment was seconded by Mr. Humphery, and passed on the following division upon the question,—“That the words proposed to be omitted stand part of the clause”:—

Ayes, 5.	Noes, 7.
Mr. Garrard,	Mr. Suttor,
Mr. Davies,	Mr. Hoskins,
Mr. Neild,	Mr. Humphery,
Mr. O'Sullivan,	Mr. Trickett,
Mr. Collins.	Mr. Wall,
	Mr. McCourt,
	Mr. Dawson.

The clause was then passed.

Clause 5 was passed.

Clause 6.—Question as to whether a pumping or a gravitation scheme is the more desirable.

Mr. Humphery moved,—“That the clause be amended by omitting from the second and third lines the words ‘that of the Department of Public Works, or that preferred by Mr. F. B. Gipps,’ with a view to insert in their place the words ‘a pumping or gravitation scheme.’”

The amendment was seconded by Mr. McCourt, and passed on the following division upon the question,—“That the words proposed to be omitted stand part of the clause”:—

Ayes, 5.	Noes, 8.
Mr. Garrard,	Mr. Suttor,
Mr. Davies,	Mr. Hoskins,
Mr. Neild,	Mr. Humphery,
Mr. O'Sullivan,	Mr. Trickett,
Mr. Collins.	Mr. Ewing,
	Mr. Wall,
	Mr. McCourt,
	Mr. Dawson.

Mr. Humphery moved,—“That the clause be further amended by inserting after the figures ‘£30,000,’ in the sixteenth line, the words ‘A proper gravitation scheme would, in Mr. Darley's opinion, cost not less than £50,000.’”

The amendment was seconded by Mr. O'Sullivan, and passed on the following division:—

Ayes, 7.	Noes, 6.
Mr. Garrard,	Mr. Suttor,
Mr. Hoskins,	Mr. Trickett,
Mr. Humphery,	Mr. Davies,
Mr. Wall,	Mr. Ewing,
Mr. McCourt,	Mr. Neild,
Mr. O'Sullivan,	Mr. Collins.
Mr. Dawson.	

The clause as amended was passed on the following division:—

Ayes, 8.	Noes, 3.
Mr. Garrard,	Mr. Davies,
Mr. Suttor,	Mr. Neild,
Mr. Humphery,	Mr. Collins.
Mr. Trickett,	
Mr. Wall,	
Mr. McCourt,	
Mr. O'Sullivan,	
Mr. Dawson.	

Clause

Clause 7.—Sufficiency and purity of the supply.

Mr. Neild moved,—“That the clause be amended by the insertion after the word ‘farmers,’ in the fourth line, of the words ‘and market gardeners.’”

The amendment was seconded by Mr. Davies, and passed on the following division :—

Ayes, 8.	Noes, 4.
Mr. Suttor,	Mr. Garrard,
Mr. Humphery,	Mr. Wall,
Mr. Davies,	Mr. McCourt,
Mr. Trickett,	Mr. Dawson.
Mr. Ewing,	
Mr. Neild,	
Mr. O'Sullivan,	
Mr. Collins.	

Mr. Neild moved,—“That the clause be further amended by the insertion after the word ‘farms,’ in the fifth line, of the words ‘and gardens.’”

The amendment was seconded by Mr. Davies, and passed on the following division :—

Ayes, 7.	Noes, 4.
Mr. Suttor,	Mr. Garrard,
Mr. Humphery,	Mr. Wall,
Mr. Davies,	Mr. McCourt,
Mr. Ewing,	Mr. Dawson.
Mr. Neild,	
Mr. O'Sullivan,	
Mr. Collins.	

Mr. Neild moved,—“That the clause be further amended by the insertion after the word ‘gardens’ in the ninth line of the clause, of the words ‘and cesspits.’”

The amendment was negatived on the following division :—

Ayes, 1.	Noes, 12.
Mr. Neild.	Mr. Garrard,
	Mr. Suttor,
	Mr. Hoskins,
	Mr. Humphery,
	Mr. Davies,
	Mr. Trickett,
	Mr. Ewing,
	Mr. Wall,
	Mr. McCourt,
	Mr. O'Sullivan,
	Mr. Collins,
	Mr. Dawson.

The clause as amended was passed on the following division :—

Ayes, 10.	Noes, 2.
Mr. Garrard,	Mr. Davies,
Mr. Suttor,	Mr. Neild.
Mr. Hoskins,	
Mr. Humphery,	
Mr. Trickett,	
Mr. Wall,	
Mr. McCourt,	
Mr. O'Sullivan,	
Mr. Collins,	
Mr. Dawson.	

Clauses 8 to 11 were passed.

Clause 12.—Decision of the Committee.

Mr. Humphery moved,—“That the clause be amended by the omission after the word ‘satisfactory’ in the fifth line, of the words ‘from 10 to 15 acres of,’ with a view to insert in their place the word ‘sufficient.’”

The amendment was seconded by Mr. McCourt, and passed on the following division :—

Ayes, 11.	Noes, 2.
Mr. Garrard,	Mr. Davies,
Mr. Suttor,	Mr. Neild.
Mr. Hoskins,	
Mr. Humphery,	
Mr. Trickett,	
Mr. Ewing,	
Mr. Wall,	
Mr. McCourt,	
Mr. O'Sullivan,	
Mr. Collins,	
Mr. Dawson.	

The clause, as amended, was then passed.

Mr. Humphery moved,—“That the following stand as clause 13 of the Report :—‘The Committee call attention to the proposal to provide locally manufactured pipes, and they do not desire that their recommendation should be regarded as an approval of this portion of the Departmental Estimate.’”

The motion was seconded by Mr. Davies, and negatived on the following division :—

Ayes, 6.	Noes, 7.
Mr. Garrard,	Mr. Suttor,
Mr. Humphery,	Mr. Hoskins,
Mr. Davies,	Mr. Wall,
Mr. Trickett,	Mr. McCourt,
Mr. Ewing,	Mr. O'Sullivan,
Mr. Neild.	Mr. Collins,
	Mr. Dawson.

Clause 13 was passed.

The

The Report, as amended, was then adopted, and the Chairman was authorised to sign it for presentation to the Legislative Assembly.

On the motion of Mr. O'Sullivan, the resumption of the adjourned debate upon Mr. McCourt's motion with reference to the proposed Railway from Glen Innes to Inverell, was further postponed until the following day.

Mr. O'Sullivan's notice of motion with reference to the proposed Railway from Glen Innes to Inverell was postponed until the following day.

The Committee adjourned at a quarter past 4, until 15 minutes to 2 o'clock p.m., on Thursday, the following day.

THURSDAY, 22 DECEMBER, 1892.

The Committee met at 1.45 p.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,
The Hon. James Hoskins,
The Hon. Frederick Thomas Humphery,
The Hon. John Davies, C.M.G.,
The Hon. William Joseph Trickett,
Thomas Thomson Ewing, Esq.,

William Chandos Wall, Esq.,
William McCourt, Esq.,
John Cash Neild, Esq.,
Edward William O'Sullivan, Esq.,
Charles Collins, Esq.,
Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Committee further considered the proposed Railway from Glen Innes to Inverell.

John Harper, Esq., Goods Superintendent, Department of Railways, and Henry Deane, Esq., Engineer-in-Chief, Railway Construction Branch, Department of Public Works, were sworn, and further examined.

The adjourned debate upon the following motion, moved by Mr. McCourt, was resumed :—

"(1.) That as the Legislative Assembly has referred back to this Committee the proposed Railway from Glen Innes to Inverell for reconsideration, the Committee are of opinion that further surveys should be made of the line from Guyra to Inverell, so as to enable the Committee to determine the best point to connect Inverell with the Northern line.

"(2.) That the above resolution be forwarded to the Minister for Works."

The motion was negatived on the following division :—

Ayes, 4.

Mr. Suttor,
Mr. Davies,
Mr. McCourt,
Mr. Neild.

Noes, 9.

Mr. Garrard,
Mr. Hoskins,
Mr. Humphery,
Mr. Trickett,
Mr. Ewing,
Mr. Wall,
Mr. O'Sullivan,
Mr. Collins,
Mr. Dawson.

Mr. O'Sullivan moved,—“That, in the opinion of this Committee it is expedient to carry out the proposed line of Railway from Glen Innes to Inverell, as referred to the Committee by the Legislative Assembly.”

Mr. Trickett seconded the motion.

Mr. Hoskins moved,—“That the motion be amended by the addition of the following words: ‘Provided that the cost does not exceed £7,000 per mile; that special local rates should be charged until the railway pays working expenses and interest on cost of construction, and that the betterment principle be applied to the lands served by the railway.’”

The amendment was seconded by Mr. Collins, and passed on the following division upon the question,—“That the words proposed to be added be so added.”

Ayes, 10.

Mr. Garrard,
Mr. Hoskins,
Mr. Humphery,
Mr. Trickett,
Mr. Ewing,
Mr. Wall,
Mr. Neild,
Mr. O'Sullivan,
Mr. Collins,
Mr. Dawson.

Noes, 3.

Mr. Suttor,
Mr. Davies,
Mr. McCourt.

The motion as amended was passed on the following division :—

Ayes, 9.

Mr. Garrard,
Mr. Hoskins,
Mr. Humphery,
Mr. Trickett,
Mr. Ewing,
Mr. Wall,
Mr. O'Sullivan,
Mr. Collins,
Mr. Dawson.

Noes, 4.

Mr. Suttor,
Mr. Davies,
Mr. McCourt,
Mr. Neild.

The Committee adjourned at 30 minutes past 4, until 2 o'clock p.m. on Tuesday, 10 January, 1893.

TUESDAY, 10 JANUARY, 1893.

The Committee met at 2 p.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,	Thomas Thomson Ewing, Esq.,
The Hon. James Hoskins,	William Chandos Wall, Esq.,
The Hon. Frederick Thomas Humphery,	William McCourt, Esq.,
The Hon. John Davies, C.M.G.,	John Cash Neild, Esq.,
The Hon. William Joseph Trickett,	Edward William O'Sullivan, Esq.,
	Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence :—

Letter from the Secretary of the Hunter River District Water Supply and Sewerage Board, applying for four copies of the Committee's reports, with evidence, &c., on the proposed Sewerage Works at Cottage Creek and the proposed Second Pipe-line from Walka to Buttai for Hunter River District Water Supply.

Telegram from Messrs. J. F. Utz and H. C. St. Vincent, Glen Innes, with reference to the decision of the Committee in their inquiry respecting the proposed Railway from Glen Innes to Inverell. The correspondence was received.

The following accounts were passed for payment :—

	£	s.	d.
Craigie and Hipgrave (<i>Armidale Express</i>)
Craigie and Hipgrave (<i>Armidale Express</i>)
Grieve and Turner (<i>Richmond River Express</i>)
Vincent Brothers (<i>Glen Innes Examiner</i>)

The Committee proceeded to consider their Report to the Legislative Assembly on the proposed Railway from Glen Innes to Inverell.

The preamble and clauses 1 to 7 were passed.

Clause 8.—Reduction in the cost of constructing the Railway—was passed on the following division :—

Ayes, 3.	Noes, 3.
Mr. Garrard,	Mr. Suttor,
Mr. Hoskins,	Mr. Davies,
Mr. Humphery,	Mr. McCourt.
Mr. Trickett,	
Mr. Ewing,	
Mr. Wall,	
Mr. O'Sullivan,	
Mr. Dawson.	

Clause 9.—Weight of opinion in favour of the Glen Innes to Inverell route—was passed on the following division :—

Ayes, 8.	Noes, 4.
Mr. Garrard,	Mr. Suttor,
Mr. Hoskins,	Mr. Davies,
Mr. Humphery,	Mr. McCourt,
Mr. Trickett,	Mr. Neild,
Mr. Ewing,	
Mr. Wall,	
Mr. O'Sullivan,	
Mr. Dawson.	

Clause 10.—Sectional Committee's opinion.

Mr. McCourt moved,—“ That the clause be amended by the insertion after the word ‘ Committee,’ in the first line, of the words ‘ by a majority.’ ”

The amendment was seconded by Mr. Davies, and negatived on the following division, upon the question,—“ That the words proposed to be inserted be so inserted :—

Ayes, 4.	Noes, 8.
Mr. Suttor,	Mr. Garrard,
Mr. Davies,	Mr. Hoskins,
Mr. McCourt,	Mr. Humphery,
Mr. Neild.	Mr. Trickett,
	Mr. Ewing,
	Mr. Wall,
	Mr. O'Sullivan,
	Mr. Dawson.

The clause was passed on the following division :—

Ayes, 8.	Noes, 4.
Mr. Garrard,	Mr. Suttor,
Mr. Hoskins,	Mr. Davies,
Mr. Humphery,	Mr. McCourt,
Mr. Trickett,	Mr. Neild.
Mr. Ewing,	
Mr. Wall,	
Mr. O'Sullivan,	
Mr. Dawson.	

Clause

Clause 11.—Decision of the Committee—was passed on the following division:—

<p>Ayes, 8.</p> <p>Mr. Garrard, Mr. Suttor, Mr. Hoskins, Mr. Trickett, Mr. Ewing, Mr. Wall, Mr. O'Sullivan, Mr. Dawson.</p>	<p>Noes, 2.</p> <p>Mr. Davies, Mr. McCourt.</p>
---	---

The remaining clauses of the Report were passed, the Report was adopted, and the Chairman was authorised to sign it for presentation to the Legislative Assembly.

The Committee adjourned at 14 minutes past 3 p.m.

TUESDAY, 14 FEBRUARY, 1893.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

<p>The Hon. William Henry Suttor, The Hon. James Hoskins, The Hon. Frederick Thomas Humphery, The Hon. John Davies, C.M.G., The Hon. William Joseph Trickett, Thomas Thomson Ewing, Esq.,</p>	<p>William Chandos Wall, Esq., William McCourt, Esq., John Cash Neild, Esq., Edward William O'Sullivan, Esq., Charles Collins, Esq., Henry Dawson, Esq.</p>
---	---

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence:—

Letter from the Clerk of the Legislative Assembly informing the Committee of the passing by the Assembly on 2nd instant of a motion referring to the Committee, for consideration and report, the expediency of constructing Waterworks for the Town of Junee.

Letter from Mr. F. W. Wood, General Manager, Temple-street Cable Railway, Los Angeles, California, requesting to be supplied with a copy of the Committee's Report with reference to the proposed Cable Tramway from King-street, *via* William-street, to Ocean-street, Sydney.

Minute paper from the Under Secretary for Public Works with reference to rooms for the use of the Committee in the new Public Works Building.

The correspondence was received.

The Committee proceeded to consider the proposed Waterworks for the Town of Junee.

Joseph Barling, Esq., Under Secretary for Public Works, George Alfred Tillet, Esq., Principal Assistant Engineer in Office, Harbours and Rivers Branch, Department of Public Works, and Edward Bellingham Price, Esq., Supervising Engineer, Harbours and Rivers Branch, Department of Public Works, were sworn, and examined.

Mr. Wall gave notice that he would move at the next meeting of the Committee,—“That Mr. Garrard, Mr. Davies, Mr. McCourt, Mr. Trickett, and Mr. O'Sullivan be appointed a Sectional Committee to inspect, take evidence, and report with reference to the proposed Waterworks for the Town of Junee.”

The Committee adjourned at 8 minutes past 4, until 2 o'clock p.m. on Wednesday, the following day.

WEDNESDAY, 15 FEBRUARY, 1893.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

<p>The Hon. William Henry Suttor, The Hon. James Hoskins, The Hon. Frederick Thomas Humphery, The Hon. John Davies, C.M.G., The Hon. William Joseph Trickett, Thomas Thomson Ewing, Esq.,</p>	<p>William Chandos Wall, Esq., William McCourt, Esq., John Cash Neild, Esq., Edward William O'Sullivan, Esq., Charles Collins, Esq., Henry Dawson, Esq.</p>
---	---

The minutes of the previous meeting were read, and confirmed.

The Committee further considered the proposed Waterworks for the Town of Junee.

Edward Bellingham Price, Esq., Supervising Engineer, Harbours and Rivers Branch, Department of Public Works, was sworn, and further examined.

Hugh McLachlan, Esq., Secretary to the Railway Commissioners, was sworn, and examined.

Mr. Wall moved,—“That Mr. Garrard, Mr. Davies, Mr. McCourt, Mr. Trickett, and Mr. O'Sullivan be appointed a Sectional Committee to inspect, take evidence, and report with reference to the proposed Waterworks for the Town of Junee.”

The motion was seconded by Mr. Humphery, and passed.

The Committee adjourned at 7 minutes to 4, until 2 o'clock p.m. on Thursday, the following day.

THURSDAY,

THURSDAY, 16 FEBRUARY, 1893.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,	William Chandos Wall, Esq.,
The Hon. James Hoskins,	William McCourt, Esq.,
The Hon. Frederick Thomas Humphery,	John Cash Neild, Esq.,
The Hon. John Davies, C.M.G.,	Edward William O'Sullivan, Esq.,
The Hon. William Joseph Trickett,	Charles Collins, Esq.,
Thomas Thomson Ewing, Esq.,	Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Committee further considered the proposed Waterworks for the Town of Junee.

Frederick Bowdner Gipps, Esq., civil engineer, was sworn, and examined.

The Committee adjourned at 2 minutes past 4, until 2 o'clock p.m. on Tuesday, 28th February.

TUESDAY, 28 FEBRUARY, 1893.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,	William Chandos Wall, Esq.,
The Hon. James Hoskins,	William McCourt, Esq.,
The Hon. Frederick Thomas Humphery,	John Cash Neild, Esq.,
The Hon. John Davies, C.M.G.,	Edward William O'Sullivan, Esq.,
The Hon. William Joseph Trickett,	Charles Collins, Esq.,
	Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

Mr. Garrard, as Chairman of the Sectional Committee appointed with reference to the proposed Waterworks for the Town of Junee, brought up the Report of the Sectional Committee.

Mr. Trickett moved,—“That the Report be received, and printed with the evidence taken before the Sectional Committee.”

The motion was seconded by Mr. Dawson, and passed.

The Report was read by the Secretary.

The Chairman reported that, in accordance with the conclusions arrived at by the Sectional Committee, Professor David, of the University of Sydney, had left Sydney for Bethungra to inspect the site of the proposed dam and storage reservoir in connection with the proposed Waterworks for the Town of Junee.

The Committee further considered the proposed Waterworks for the Town of Junee.

William Mogford Hamlet, Esq., Government Analyst, and Cecil West Darley, Esq., Engineer-in-Chief for Harbours and Rivers, were sworn, and examined.

The Committee adjourned at 5 minutes past 4, until 2 o'clock p.m. on Tuesday, 7th March.

TUESDAY, 7 MARCH, 1893.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor,	Thomas Thomson Ewing, Esq.,
The Hon. James Hoskins,	William Chandos Wall, Esq.,
The Hon. Frederick Thomas Humphery,	William McCourt, Esq.,
The Hon. John Davies, C.M.G.,	John Cash Neild, Esq.,
The Hon. William Joseph Trickett,	Edward William O'Sullivan, Esq.,
	Charles Collins, Esq.

The minutes of the previous meeting were read, and confirmed.

The Secretary read the following correspondence:—

Letter from the Town Clerk and Surveyor, Junee, informing the Committee that the Borough Council of Junee had given full consideration to the plan of reticulation in connection with the proposed Waterworks for the Town of Junee, and had unanimously decided to recommend its adoption.

Letter from the Council Clerk, Wagga Wagga, stating the quantity of water supplied to the Railway Department at Wagga Wagga, during the year 1892, with reference to the proposed Waterworks for the Town of Junee.

Letter from the Secretary to the Railway Commissioners respecting their guarantee in relation to the proposed Waterworks for the Town of Junee.

Report by Mr. T. W. Edgeworth David, Professor of Geology, University of Sydney, on the proposed site for the reservoir on Ulandrie Creek, near Bethungra, in connection with the proposed Waterworks for the Town of Junee.

The correspondence was received.

The following accounts were passed for payment.

Herbert Robinson, shorthand writer accompanying Sectional Committee on proposed Waterworks for the Town of Junee	£	s.	d.
Gale & Co., Junee, advertising visit of Sectional Committee on proposed Waterworks for the town of Junee	6	9	6
	0	7	6
Total	£6	17	0

The Committee further considered the proposed Waterworks for the Town of Junee.

Cecil

Cecil West Darley, Esq., Engineer-in-Chief for Harbours and Rivers, was sworn, and further examined.

T. W. Edgeworth David, Esq., B.A., F.G.S., Professor of Geology, University of Sydney, and Walter Shellshear, Esq., M. Inst., C.E., Divisional Engineer, Department of Railways, were sworn, and examined. The Committee adjourned at 13 minutes to 4, until 2 o'clock p.m. on Wednesday, the following day.

WEDNESDAY, 8 MARCH, 1893.

The Committee met at 2 p.m.

MEMBERS PRESENT :—

--	--	--

Charles Collins, Esq.

The minutes of the previous meeting were read, and confirmed.

The Committee further considered the proposed Waterworks for the Town of Junee.

Hugh McLachlan, Esq., Secretary to the Railway Commissioners, was sworn, and further examined.

The Committee proceeded to consider the evidence with reference to the proposed Waterworks for the Town of Junee, with a view to reporting on the subject to the Legislative Assembly.

Mr. O'Sullivan moved,—“That the Committee consider it expedient that the proposed Waterworks for the Town of Junee, as referred to them by the Legislative Assembly, be carried out.”

Mr. Davies seconded the motion.

Mr. Wall moved,—“That the motion be amended by the omission of all the words after the word ‘That,’ with a view to insert the following words: ‘it is not expedient to carry out the proposed Waterworks for the Town of Junee as referred to the Committee by the Legislative Assembly, the Committee being of opinion that the guarantee from the Railway Commissioners does not extend over a sufficient period to warrant such construction.’”

The amendment was seconded by Mr. Collins, and negatived on the following division, upon the question,—“That the words proposed to be omitted stand part of the question” :—

Ayes, 9. Mr. Garrard, Mr. Suttor, Mr. Hoskins, Mr. Humphery, Mr. Davies, Mr. Trickett, Mr. Ewing, Mr. McCourt, Mr. O'Sullivan.		Noes, 3. Mr. Wall, Mr. Neild, Mr. Collins.
---	--	---

Mr. Humphery moved,—“That the motion be amended by the addition of the following words: ‘conditionally upon the Railway Commissioners undertaking to enter into an agreement for a period of not less than ten years to pay a minimum of £1,900 per annum for water supplied for railway purposes at Junee and Bethungra.’”

The amendment was seconded by Mr. Wall, and passed on the following division, upon the question,—“That the words proposed to be added be so added” :—

Ayes, 8. Mr. Garrard, Mr. Humphery, Mr. Davies, Mr. Trickett, Mr. Wall, Mr. Neild, Mr. O'Sullivan, Mr. Collins.		Noes, 4. Mr. Suttor, Mr. Hoskins, Mr. Ewing, Mr. McCourt.
---	--	---

The motion as amended was passed.

The Committee adjourned at 16 minutes to 4, until 2 o'clock p.m. on Tuesday, the 14th March.

TUESDAY, 14 MARCH, 1893.

The Committee met at 2 p.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor, The Hon. James Hoskins, The Hon. Frederick Thomas Humphery, The Hon. John Davies, C.M.G., The Hon. William Joseph Trickett, Thomas Thomson Ewing, Esq.,		William Chandos Wall, Esq., William McCourt, Esq., John Cash Neild, Esq., Edward William O'Sullivan, Esq., Charles Collins, Esq., Henry Dawson, Esq.
---	--	---

The minutes of the previous meeting were read, and confirmed.

The

The following account was passed for payment:—

Professor David, University of Sydney, expenses connected with visit of inspection	£	s.	d.
to Bethungra in connection with proposed Waterworks for the Town of Junee	2	2	0

The Committee proceeded to consider their Report to the Legislative Assembly on the proposed Waterworks for the Town of Junee.

The Report was adopted, and the Chairman was authorised to sign it for presentation to the Legislative Assembly.

The Committee adjourned at 4 minutes to 3 o'clock p.m.

WEDNESDAY, 26 APRIL, 1893.

The Committee met at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor, The Hon. Frederick Thomas Humphery, The Hon. John Davies, C.M.G., The Hon. William Joseph Trickett, Thomas Thomson Ewing, Esq.,	William McCourt, Esq., John Cash Neild, Esq., Edward William O'Sullivan, Esq., Charles Collins, Esq., Henry Dawson, Esq.
--	--

The minutes of the previous meeting were read, and confirmed.

The following accounts were passed for payment:—

	£	s.	d.
Sam. Hawkins (<i>Wagga Wagga Express</i>)	0	14	0
Stephen Sullivan (<i>Wagga Wagga Advertiser</i>)	0	15	0
John Sands (office stationery)	2	3	6
Turner and Henderson (office stationery)	0	18	0
Total	£4	10	6

The Committee proceeded to consider their Seventh General Report to His Excellency the Governor.

The preamble and clauses 1 to 8 were passed.

Clause 9.—Improved manner of submitting proposed works to Committee.

Mr. Trickett moved,—“That the clause be amended by the omission from line 8 of the words ‘exercise of intelligence on the part,’ with a view to the insertion in their place of the word ‘work.’”

The amendment was passed on the following division upon the question,—“That the words proposed to be omitted stand part of the clause” :—

Ayes, 3.		Noes, 8.
Mr. Garrard, Mr. Neild, Mr. Collins.		Mr. Suttor, Mr. Humphery, Mr. Davies, Mr. Trickett, Mr. Ewing, Mr. McCourt, Mr. O'Sullivan, Mr. Dawson.

The insertion of the word “work” was then agreed to.

Mr. Ewing moved,—“That the sentence ‘The work of the railway surveyor was apparently restricted by explicit instructions to discover the shortest route with a grade not exceeding 1 in 40,’ be omitted.”

The amendment was negatived on the following division upon the question,—“That the words proposed to be omitted stand part of the clause” :—

Ayes, 6.		Noes, 4.
Mr. Garrard, Mr. Davies, Mr. Trickett, Mr. McCourt, Mr. Neild, Mr. Dawson.		Mr. Suttor, Mr. Ewing, Mr. O'Sullivan, Mr. Collins.

The clause as amended was then passed.

Clause 10, and the Returns and Minutes of Proceedings attached to the Report, were passed, and the Report was adopted, subject to any alteration or addition consequent upon any further works being referred to the Committee before the presentation of the Report to His Excellency the Governor.

The Committee then proceeded to consider proposed Regulations under section 17 of the Public Works Act.

Regulation 1.—Days and hours of meeting—was passed.

Regulation 2.—How the Committee shall be summoned.

Mr. Neild moved,—“That all the words after the word ‘circular’ be omitted, with a view to the insertion of the words ‘unless otherwise ordered.’”

The amendment was negatived on the following division upon the question,—“That the words proposed to be omitted stand part of the Regulation” :—

Ayes, 5.		Noes, 5.
Mr. Garrard, Mr. Ewing, Mr. McCourt, Mr. O'Sullivan, Mr. Dawson.		Mr. Suttor, Mr. Davies, Mr. Trickett, Mr. Neild, Mr. Collins.

The division being equal, the Chairman gave his casting vote with the Ayes.

The

The Regulation was then passed.

Regulation 3.—Adjournment from want of a quorum—was passed.

Regulation 4.—Definition of attendance.

Mr. Suttor moved,—“That the figures ‘15’ be omitted from before the word ‘minutes’ in the second line with a view to the insertion in its place of the figures ‘30.’”

The amendment was passed on the following division upon the question,—“That the figures proposed to be omitted stand part of the Regulation” :—

<p>Ayes, 3.</p> <p>Mr. Garrard, Mr. Davies, Mr. Trickett.</p>	<p>Noes, 7.</p> <p>Mr. Suttor, Mr. Ewing, Mr. McCourt, Mr. Neild, Mr. O’Sullivan, Mr. Collins, Mr. Dawson.</p>
---	--

The insertion of the figures “30” was then agreed to.

The Regulation as amended was passed on the following division :—

<p>Ayes, 5.</p> <p>Mr. Garrard, Mr. Davies, Mr. Trickett, Mr. O’Sullivan, Mr. Collins.</p>	<p>Noes, 5.</p> <p>Mr. Suttor, Mr. Ewing, Mr. McCourt, Mr. Neild, Mr. Dawson.</p>
--	---

The division being equal, the Chairman gave his casting vote with the Ayes.

Regulation 5.—Notices of motions; 6.—Order of business; 7.—Notice of motion to close an inquiry; 8.—When motion to decide work shall not be considered; 9.—Motions and amendments to be seconded; 10.—Petitions and documents received as evidence; 11.—Quorum of Sectional Committee—were passed.

Regulation 12.—Hospitality to Sectional Committees—was passed on the following division :—

<p>Ayes, 8.</p> <p>Mr. Garrard, Mr. Suttor, Mr. Davies, Mr. Trickett, Mr. Ewing, Mr. McCourt, Mr. O’Sullivan, Mr. Collins.</p>	<p>Noes, 2.</p> <p>Mr. Neild, Mr. Dawson.</p>
--	---

Regulation 13.—Minority Reports; 14.—Members interested in proposed works not to be appointed on Sectional Committee; 15.—Sectional Committee may consider more than one work; 16.—Succeeding Committee may adopt and forward General Report; and 17.—Inquiries to be advertised—were passed.

Regulation 18.—Fees and travelling expenses—was passed on the following division :—

<p>Ayes, 7.</p> <p>Mr. Garrard, Mr. Suttor, Mr. Trickett, Mr. McCourt, Mr. O’Sullivan, Mr. Collins, Mr. Dawson.</p>	<p>Noes, 1.</p> <p>Mr. Neild.</p>
---	-----------------------------------

The Regulations as amended were adopted, and the Chairman was authorised to forward them to the Colonial Secretary for the approval of His Excellency the Governor and the Executive Council.

The Committee adjourned at 27 minutes past 4 p.m.

PARLIAMENTARY STANDING COMMITTEE ON PUBLIC WORKS.

SECTIONAL COMMITTEE.

Railway from Eden to Bega.

MINUTES OF PROCEEDINGS.

THE Sectional Committee appointed on 11th August, 1892, "to inspect, take evidence, and report with reference to the proposed Railway from Eden to Bega," met at the Court-house, Bombala, on

MONDAY, 22 AUGUST, 1892.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor, | Thomas Thomson Ewing, Esq.,
William McCourt, Esq.

The Committee proceeded to call evidence, and examined the following witnesses:—Mr. Hyam Moscs, Mr. Donald Campbell, Mr. Edmund Hyde, and Mr. Robert Weston Dawson.

TUESDAY, 23 AUGUST, 1892.

The Sectional Committee met at the "Commercial Hotel," Bombala, at 7 a.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor, | Thomas Thomson Ewing, Esq.,
William McCourt, Esq.

The minutes of the previous meeting were read, and confirmed.

The Committee proceeded to Cathcart, where they met, at Gerathy's Hotel, at 10 a.m.

Mr. James Gerathy was sworn, and examined.

Mr. William Baker was afterwards sworn, and examined at his own residence.

The Committee then left for Candelo.

TUESDAY, 23 AUGUST, 1892.

The Sectional Committee met at the School of Arts, Candelo, at 3:45 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor, | Thomas Thomson Ewing, Esq.,

The following witnesses were sworn, and examined:—Mr. D. D. M'Naught, Mr. J. M'Naught, Mr. P. Heffernan, and Mr. J. J. Collins.

The Committee then left for Bega, arriving there at 8 p.m.

WEDNESDAY, 24 AUGUST, 1892.

The Sectional Committee having, in the morning, proceeded to Tathra (12 miles from Bega), and, after inspecting the shipping arrangements there, examined Mr. C. B. Ayers, the resident agent for the Illawarra Steam Navigation Company, met at the Court-house, Bega, at 2 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. William Henry Suttor, | Thomas Thomson Ewing, Esq.,
William McCourt, Esq.

The minutes of the previous meeting were read, and confirmed.

The following witnesses were sworn, and examined:—Messrs. F. Bland, W. H. Braine, C. W. Macleod, T. Rawlinson, W. W. Wren, Andrew Smith, W. Hanscombe, J. Britten, G. E. Ward, W. Ramsay, and G. P. Kerrison.

At 6 p.m. the inquiry was adjourned until 7:30 p.m., when Messrs. E. H. Scott, F. T. Stennett, H. O. T. Cowdroy, Joshua Britten, W. A. Wilson, W. D. Neilly, J. N. Postle, and C. Paul were sworn, and examined.

The Committee adjourned at 10:10 p.m.

THURSDAY,

THURSDAY, 25 AUGUST, 1892.

The Sectional Committee met at the "Bank Hotel," Bega, at 8 a.m.

The minutes of the previous meeting were read, and confirmed.

The Committee then proceeded to Wolumla, and met at the School of Arts there at 10:30 a.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.
 The Hon. William Henry Suttor, | Thomas Thomson Ewing, Esq.,
 William McCourt, Esq.

The following witnesses were sworn, and examined:—Messrs. W. J. Morehead, James Cochrane, T. Walsh, J. W. Goward, G. Smith, H. Fowler, G. Ireland, and J. M. Black.

At 2 p.m. the Committee proceeded to Pambula, and met at the Court-house there at 4 p.m.

Messrs. J. Hamilton, P. Doherty, J. Irvine, S. Gordon, W. Frazer, M. Roach, S. Gordon (junior), and Police-Sergeant S. Woods, were sworn, and examined.

The Committee then proceeded to Merimbula. Mr. P. J. Clinch was sworn, and examined. Eden was reached at 10:30 p.m.

FRIDAY, 26 AUGUST, 1892.

The Sectional Committee having, in the morning, visited the site of the proposed railway terminus at Eden, met at the Court-house at 3 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.
 The Hon. William Henry Suttor, | Thomas Thomson Ewing, Esq.,
 William McCourt, Esq.

The minutes of the previous meeting were read, and confirmed.

The following witnesses were sworn, and examined:—Messrs. John Davidson, S. Solomon, H. V. Harrison, T. V. Smith, T. Shelley, F. T. Thomson, A. W. Aspinall, and H. Hardy.

The Committee met again at the "Commercial Hotel" at 8 p.m.

Mr. C. T. Stiler was sworn, and examined.

The Committee then proceeded to discuss their Report.

SATURDAY, 27 AUGUST, 1892.

The Sectional Committee met at the "Commercial Hotel," Eden, at 8 a.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.
 The Hon. William Henry Suttor, | Thomas Thomson Ewing, Esq.,
 William McCourt, Esq.

The minutes of the previous meeting were read, and confirmed.

The Committee having agreed to meet at the Board-room, Colonial Secretary's Office, Sydney, on Monday afternoon, then adjourned.

MONDAY, 29 AUGUST, 1892.

The Sectional Committee met at the Office of the Committee, Sydney, at 2:15 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.
 The Hon. William Henry Suttor, | Thomas Thomson Ewing, Esq.

The minutes of the previous meeting were read, and confirmed.

The Sectional Committee further considered their Report.

TUESDAY, 6 SEPTEMBER, 1892.

The Sectional Committee met at the Office of the Committee, Sydney, at 1:30 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.
 The Hon. William Henry Suttor, | Thomas Thomson Ewing, Esq.,
 William McCourt, Esq.

The minutes of the previous meeting were read, and confirmed.

The Sectional Committee further considered, and adopted, their Report.

PARLIAMENTARY STANDING COMMITTEE ON PUBLIC WORKS.

SECTIONAL COMMITTEE.

Water Supply for Armidale.

MINUTES OF PROCEEDINGS.

THE Sectional Committee appointed on 12th October, 1892, "to inspect, take evidence, and report with reference to the proposed Water Supply for Armidale," met at the "Imperial Hotel," Armidale, on

TUESDAY, 18 OCTOBER, 1892.

MEMBERS PRESENT :—

	Jacob Garrard, Esq., Chairman.	
The Hon. John Davies, C.M.G.,		John Cash Neild, Esq.,
William McCourt, Esq.,		Edward William O'Sullivan, Esq.,
	Charles Collins, Esq.	

On the motion of Mr. O'Sullivan, seconded by Mr. McCourt, it was resolved that Jacob Garrard, Esq., be the Chairman of the Committee.

The Committee, accompanied by Mr. Engineer Grimshaw, of the Department of Harbours and Rivers, and Mr. William Drew, Mayor of Armidale, then inspected the underground tank adjoining the Municipal Gasworks, from which it is proposed to pump water to an overhead tank at the rear of the Town Hall for fire extinguishing purposes, and also the site on Gaol Hill where it is proposed to erect an overhead tank to supply the residences above the higher level.

In the afternoon, the Committee, accompanied by Mr. Grimshaw and Mr. Drew, drove out and inspected the catchment area and the site of the storage dam at Duval Creek.

WEDNESDAY, 19 OCTOBER, 1892.

The Sectional Committee met at the Court-house, Armidale, at 10 a.m.

MEMBERS PRESENT :—

	Jacob Garrard, Esq., Chairman.	
The Hon. John Davies, C.M.G.,		John Cash Neild, Esq.,
William McCourt, Esq.,		Edward William O'Sullivan, Esq.,
	Charles Collins, Esq.	

The minutes of the previous meeting were read, and confirmed.

The Committee then proceeded to call evidence, and examined the following witnesses :—Messrs. W. Drew, G. Wigan, C. Wilson, J. T. French, J. Moore, B. A. Moses, F. Braund, P. Wade, J. Kickham, H. G. Mallam, J. S. Chard, W. C. Higinbotham, W. Murray, J. M. Duncan, J. W. Grimshaw, and W. Robins.

Subsequently Mr. J. Hackett was sworn and examined at the "Imperial Hotel."

A discussion took place on the question of drawing up the Report, and it was unanimously resolved to recommend the adoption of the Departmental scheme.

THURSDAY, 20 OCTOBER, 1892.

The Sectional Committee met at the "Imperial Hotel," Armidale, at 9'45 a.m.

MEMBERS PRESENT :—

	Jacob Garrard, Esq., Chairman.	
The Hon. John Davies, C.M.G.,		John Cash Neild, Esq.,
William McCourt, Esq.,		Edward William O'Sullivan, Esq.,
	Charles Collins, Esq.	

The minutes of the previous meeting were read, and confirmed.

The draft Report of the Committee was read by the Chairman, and on the motion of Mr. O'Sullivan, seconded by Mr. McCourt, it was resolved that the Report be adopted.

The Chairman reported that he had received a letter from Mr. J. T. French, Consulting Engineer to the Borough Council of Armidale, with reference to a reduction in the railway freight on the pipes for the Armidale Water Supply scheme; and it was resolved to print the letter as an appendix to his evidence.

The Committee adjourned *sine die* at 10'15 a.m.

PARLIAMENTARY STANDING COMMITTEE ON PUBLIC WORKS.

SECTIONAL COMMITTEE.

Water Supply for Tamworth.

MINUTES OF PROCEEDINGS.

THE Sectional Committee appointed on 12th October, 1892, "to inspect, take evidence, and report with reference to the proposed Water Supply for Tamworth," met at the Council Chambers, Tamworth, at 2:30 p.m., on

THURSDAY, 20 OCTOBER, 1892.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. John Davies, C.M.G.,
William McCourt, Esq.,

John Cash Neild, Esq.,
Edward William O'Sullivan, Esq.,

Charles Collins, Esq.

The Committee, with the Mayor and Aldermen of Tamworth, and Mr. Engineer Walsh, of the Department of Harbours and Rivers, examined the plans and sections of Mr. F. B. Gipps' scheme to provide Tamworth with a water supply.

Subsequently the Committee, accompanied by the Mayor and Aldermen and Mr. Walsh, inspected the town well and pumping-station; the well on the reserve at the junction of Peel River and Cockburn River, from which the Department of Harbours and Rivers propose to obtain the water for their pumping scheme; the wells on two adjacent properties; and the site of the service reservoir in connection with the Departmental scheme.

FRIDAY, 21 OCTOBER, 1892.

The Sectional Committee met at the "Royal Hotel," Tamworth, at 9 a.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. John Davies, C.M.G.,
William McCourt, Esq.,

John Cash Neild, Esq.,
Edward William O'Sullivan, Esq.,

Charles Collins, Esq.

The minutes of the previous meeting were read, and confirmed.

The Committee, accompanied by the Mayor and Aldermen of Tamworth, and Mr. Engineer Walsh, of the Department of Harbours and Rivers, drove out to Cockburn Creek (opposite the 198-mile railway peg from Newcastle) and inspected the catchment area for Mr. F. B. Gipps' gravitation scheme, and the site of the proposed service reservoir.

SATURDAY, 22 OCTOBER, 1892.

The Sectional Committee met at the Court-house, Tamworth at 10 a.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. John Davies, C.M.G.,
William McCourt, Esq.,

John Cash Neild, Esq.,
Edward William O'Sullivan, Esq.,

Charles Collins, Esq.

The minutes of the previous meeting were read, and confirmed.

The Committee then proceeded to call evidence, and examined the following witnesses:—Messrs. R. Bourne, W. J. Smith, C. J. Britten, F. Poate, J. C. Riley, W. Wood, G. M. Jarvey, C. Laverty, and H. D. Walsh.

On the motion of Mr. McCourt, seconded by Mr. Collins, it was resolved that the evidence be closed, unless otherwise ordered.

The Committee decided, on the motion of Mr. O'Sullivan, seconded by Mr. Collins, to meet at 9:30 a.m., on Monday next, for the purpose of considering the basis of their Report.

It was resolved, on the motion of Mr. Neild, seconded by Mr. Davies, that the Chairman request the Mayor of Tamworth to forward to the Parliamentary Standing Committee on Public Works the plans and sections of Mr. F. B. Gipps' gravitation scheme.

MONDAY,

MONDAY, 24 OCTOBER, 1892.

The Sectional Committee met at the Court-house, Tamworth, at 9.30 a.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.
 The Hon. John Davies, C.M.G., | John Cash Neild, Esq.,
 William McCourt, Esq., | Edward William O'Sullivan, Esq.,
 Charles Collins, Esq.

The minutes of the previous meeting were read, and confirmed.

Messrs. R. Bourne, F. Poate, W. Wood, and C. J. Britten were sworn, and further examined.

Dr. H. L. Harris and Mr. J. Piper were sworn, and examined.

At a subsequent meeting the question of drawing up the Report of the Sectional Committee was discussed.

Mr. McCourt moved,—“That the Government scheme be carried out, provided that further investigation proves the permanency and purity of the proposed supply.”

Mr. O'Sullivan seconded the motion.

Mr. Neild moved,—“That the motion be amended by the omission of all the words after the word ‘that’ with a view to the insertion of the following words in lieu thereof :—

- (1) “The Committee consider that the proposed reticulation is unnecessarily extended and should be largely curtailed, and be submitted to and revised by the local Council.
- (2) “That the Committee decline to approve of a scheme to supply a large town with water drawn from land occupied by farms and Chinese market gardens, and populated to the extent of about two persons to the acre, such population numbering several hundreds, and using ordinary cesspits, or being unprovided with any description of sanitary accommodation.
- (3) “The Committee further consider that such excellent natural opportunities exist for the supply of water to Tamworth by gravitation, that no pumping scheme should be adopted without the fullest investigation.
- (4) “The Committee also draw attention to the expressed wish of a majority of the witnesses for a gravitation scheme even at a largely enhanced cost.”

Mr. Davies seconded the amendment.

The question,—“That the words proposed to be omitted stand part of the question,”—was put, and the Committee divided as follows :—

Ayes, 3.	Noes, 3.
Mr. Garrard, Mr. McCourt, Mr. O'Sullivan.	Mr. Neild, Mr. Davies, Mr. Collins.

The numbers being equal, the Chairman gave his casting vote with the Ayes, and the amendment was consequently negatived.

The Committee then divided on the question,—“That the motion be agreed to” :—

Ayes, 3.	Noes, 3.
Mr. Garrard, Mr. McCourt, Mr. O'Sullivan.	Mr. Neild, Mr. Davies, Mr. Collins.

The numbers being equal, the Chairman gave his casting vote with the Ayes, and the motion was consequently carried.

It was decided to consider the draft Report of the Committee at a meeting to be held in the Board-room, Sydney, at 1.30 p.m., on the following Wednesday.

TUESDAY, 15 NOVEMBER, 1892.

The Sectional Committee met in the Office of the Committee, Sydney, at 12 o'clock noon.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.
 The Hon. John Davies, C.M.G., | John Cash Neild, Esq.,
 William McCourt, Esq., | Edward William O'Sullivan, Esq.,
 Charles Collins, Esq.

The Committee proceeded to consider their Report to the General Committee upon the proposed Water Supply for Tamworth.

The Report was read and amended, and passed on the following division :—

Ayes, 3.	Noes, 3.
Mr. Garrard, Mr. McCourt, Mr. O'Sullivan.	Mr. Neild, Mr. Davies, Mr. Collins.

The division being equal, the Chairman gave his casting vote with the Ayes.

The Committee adjourned at 2 o'clock until 1.30 p.m. on the following day.

WEDNESDAY,

WEDNESDAY, 16 NOVEMBER, 1892.

The Sectional Committee met at the Office of the Committee, at 1.30 p.m.

MEMBERS PRESENT :—

Jacob Garrard, Esq., Chairman.

The Hon. John Davies, C.M.G.,
William McCourt, Esq.,

Edward William O'Sullivan, Esq.,
Charles Collins, Esq.

The minutes of the two previous meetings were read, and confirmed.

The Sectional Committee deliberated upon the question as to whether a report should be made to the Committee by the members of the Sectional Committee forming the minority, with reference to the proposed Water Supply for Tamworth, and decided that it was unnecessary.

PARLIAMENTARY STANDING COMMITTEE ON PUBLIC WORKS.

SECTIONAL COMMITTEE.

Water Supply for Lithgow.

MINUTES OF PROCEEDINGS.

The Sectional Committee appointed "to inspect, take evidence, and report with reference to the proposed Water Supply for Lithgow," met at the "Cosmopolitan Hotel," Lithgow, at 10.30 a.m., on

SATURDAY, 22 OCTOBER, 1892.

MEMBERS PRESENT :—

The Hon. William Henry Suttor, Chairman.

The Hon. William Joseph Trickett,
Thomas Thomson Ewing, Esq.,

William Chandos Wall, Esq.,
Henry Dawson, Esq.

Accompanied by Mr. T. W. Keele, Assistant Engineer, Department of Harbours and Rivers, and the Mayor and Aldermen of the Borough, the Sectional Committee visited and examined the site of the storage reservoir, and the route of the pipe-line from the reservoir to the town, in connection with the proposed Water Supply.

At 3 o'clock p.m., the Sectional Committee met in the Court-house, Lithgow, and examined the following witnesses :—Mr. Thomas William Keele, Assistant Engineer, Department of Harbours and Rivers; Mr. Thomas Bennett, Mayor of Lithgow; Mr. Fritz Johnson, Council Clerk, Lithgow; Mr. William Sandford, iron manufacturer, Lithgow; Mr. Andrew Brown, landowner, Bowenfels; Mr. Charles Lewis, farmer, Marangaroo; and Mr. William Thompson, woollen manufacturer, Bowenfels. Mr. Thomas William Keele, recalled, was further examined.

The Sectional Committee adjourned at 10 minutes past 5 until half-past 9 o'clock a.m. on Monday, 24th October.

MONDAY, 24 OCTOBER, 1892.

The Sectional Committee met at the "Cosmopolitan Hotel," Lithgow, at 9.10 a.m.

MEMBERS PRESENT :—

The Hon. William Henry Suttor, Chairman.

Thomas Thomson Ewing, Esq.,

Henry Dawson, Esq.

William Chandos Wall, Esq.,

At 9.45 a.m. the Sectional Committee met in the Court-house, Lithgow, and examined the following witnesses :—Dr. Morris Asher, Lithgow; and Mr. Fritz Johnson, Council Clerk, Lithgow, who was recalled for further examination.

Mr. Dawson moved,—“That the Sectional Committee report to the General Committee in favour of the carrying out of the proposed Water Supply scheme for Lithgow, as submitted.”

Mr. Wall seconded the motion, which was unanimously agreed to.

PARLIAMENTARY STANDING COMMITTEE ON PUBLIC WORKS.

SECTIONAL COMMITTEE.

Railway from Glen Innes to Inverell.

MINUTES OF PROCEEDINGS.

THE Sectional Committee appointed on 23 November, 1892, "to inspect, take evidence, and report with reference to the proposed Railway from Glen Innes to Inverell," met at the "Guyra Hotel," Guyra, at 8.30 a.m. on

MONDAY, 28 NOVEMBER, 1892.

MEMBERS PRESENT:—

The Committee left Guyra at 9.30 a.m. by coach *en route* for Tingha. Arrived at Ollera Station at noon, and examined the following witnesses:—Messrs. D. Stewart, E. Everett, W. Willis, and W. Relton.

The Committee left Ollera Station at 2 p.m., and arrived at Tingha at 7 p.m. The following witness was examined:—Mr. T. Jones.

TUESDAY, 29 NOVEMBER, 1892.

The Sectional Committee met at the Court-house, Tingha, at 9.30 a.m.

MEMBERS PRESENT:—

The Hon. William Henry Suttor, Chairman.

The Hon. Frederick Thomas Humphery,	John Cash Neild, Esq.,
Thomas Thomson Ewing, Esq.,	Charles Collins, Esq.,
William Chandos Wall, Esq.,	Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The following witnesses were sworn, and examined:—Messrs. W. Litchfield, K. Mitchell, E. Warland, G. Daly, C. Bowers, G. Staschen, W. J. Howes, and J. Rank.

The Committee left Tingha at 4 p.m., and arrived at Inverell at 6.30 p.m.

WEDNESDAY, 30 NOVEMBER, 1892.

The Sectional Committee met at the Court-house, Inverell, at 10 a.m., and sat until 12.30 p.m.; resumed at 3 p.m., and sat until 5.30 p.m.

MEMBERS PRESENT:—

The Hon. William Henry Suttor, Chairman.

The Hon. Frederick Thomas Humphery,	John Cash Neild, Esq.,
Thomas Thomson Ewing, Esq.,	Charles Collins, Esq.,
William Chandos Wall, Esq.,	Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The following witnesses were sworn, and examined:—The Rev. R. K. Ewing, Messrs. E. Grainger, W. H. Rowland, T. C. Worboys, J. McIlveen, J. Sinclair, and D. S. Anderson.

THURSDAY, 1 DECEMBER, 1892.

The Sectional Committee met at the "Imperial Hotel," Inverell, at 10.10 a.m.

MEMBERS PRESENT:—

The Hon. William Henry Suttor, Chairman.

The Hon. Frederick Thomas Humphery,	John Cash Neild, Esq.,
Thomas Thomson Ewing, Esq.,	Charles Collins, Esq.,
William Chandos Wall, Esq.,	Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Committee proceeded in vehicles to inspect the agricultural and pastoral lands within the district of Inverell. They arrived at Mr. A. C. McClymont's farm at 12.20 p.m., when Mr. McClymont was sworn, and examined. They then proceeded to inspect the farm of Mr. P. Sullivan, thence by the farms of Messrs. J. and C. Moore, passing the Byron homestead, and thence through the Dog-trap district to Inverell.

The Committee met at the Inverell Court-house at 8 p.m.

The following witnesses were sworn, and examined:—Messrs. P. Allwell, A. Menzies, G. T. T. Butler, R. Stout, J. W. Moore, and M. Calder.

FRIDAY,

FRIDAY, 2 DECEMBER, 1892.

The Sectional Committee met at the Inverell Court-house at 10 a.m.

MEMBERS PRESENT :—

The Hon. William Henry Suttor, Chairman.

William Chandos Wall, Esq.,
John Cash Neild, Esq.,

Charles Collins, Esq.,
Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The following witnesses were sworn, and examined :—Messrs. T. Mason, J. Goodyer, and T. Mather.

SATURDAY, 3 DECEMBER, 1892.

The Sectional Committee met at the "Imperial Hotel," Inverell, at 8 a.m.

MEMBERS PRESENT :—

The Hon. William Henry Suttor, Chairman.

William Chandos Wall, Esq.,
John Cash Neild, Esq.,

Charles Collins, Esq.,
Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Committee left Inverell by coach at 9 a.m., and proceeded by Brodie's Plains to Elsmore, and thence by the main road to Glen Innes, arriving there at 5.50 p.m.

MONDAY, 5 DECEMBER, 1892.

The Sectional Committee met at the Court-house, Glen Innes, at 10 a.m.

MEMBERS PRESENT :—

The Hon. William Henry Suttor, Chairman.

Charles Collins, Esq.,

Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The following witnesses were sworn, and examined :—Messrs. H. C. Holmes, M. H. Fitzhardinge, and J. F. Utz.

TUESDAY, 6 DECEMBER, 1892.

The Sectional Committee met at the Town Hall, Armidale, at 11.30 a.m.

MEMBERS PRESENT :—

The Hon. William Henry Suttor, Chairman.

Charles Collins, Esq.,

Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Committee left Glen Innes by train at 8.15 a.m., and arrived at Armidale at 11 a.m.

Mr. W. Drew, Mayor of Armidale, presented a petition from 318 residents of East and West Hillgrove Gold-mines, submitting, as a reason in favour of the construction of a line of railway from Guyra to Inverell, that a line from Glen Innes to Inverell would entail upon a large number of the residents of Hillgrove additional travelling *en route* to Tingha to their families and permanent homes to the extent of 53 miles.

Petition received.

The following witnesses were sworn, and examined :—Messrs. W. Drew, P. Wade, W. E. Potts, J. T. French, J. T. Moore, and C. Edwardes.

WEDNESDAY, 7 DECEMBER, 1892.

The Sectional Committee met at the "Imperial Hotel," Armidale, at 9.30 a.m.

MEMBERS PRESENT :—

The Hon. William Henry Suttor, Chairman.

Charles Collins, Esq.,

Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Committee left Armidale by train at 10.30 a.m., and arrived at Sydney at 11 p.m.

FRIDAY,

FRIDAY, 9 DECEMBER, 1892.

The Sectional Committee met at the Office of the Parliamentary Standing Committee on Public Works, at 11 a.m.

MEMBERS PRESENT :—

The Hon. William Henry Suttor, Chairman.

The Hon. Frederick Thomas Humphery,		John Cash Neild, Esq.,
William Chandos Wall, Esq.,		Charles Collins, Esq.,
		Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

Mr. Wall moved,—“That it is desirable to construct the line of Railway from Glen Innes to Inverell referred to the Parliamentary Standing Committee on Public Works.”

Mr. Dawson seconded the motion.

Mr. Neild moved as an amendment,—“That the Sectional Committee, while believing that the establishment of railway communication with Inverell is justifiable in the public interest, is not in a position to determine the proper point of connection with the main line without obtaining further information upon this important question.”

There being no seconder the amendment lapsed.

The Committee divided on the question,—“That the motion be agreed to,” with the following result :—

Ayes, 3.		Noes, 2.
Mr. Wall,		Mr. Suttor,
Mr. Collins,		Mr. Neild.
Mr. Dawson.		

The motion was therefore passed.

TUESDAY, 13 DECEMBER, 1892.

The Sectional Committee met at the Office of the Parliamentary Standing Committee on Public Works, at 1:30 p.m.

MEMBERS PRESENT :—

The Hon. William Henry Suttor, Chairman.

The Hon. Frederick Thomas Humphery,		John Cash Neild, Esq.,
William Chandos Wall, Esq.,		Charles Collins, Esq.,
		Henry Dawson, Esq.

The minutes of the previous meeting were read, and confirmed.

The Committee proceeded to consider their Report.

Mr. Neild moved that the words, “The prospect of a trade being established between the Inverell district and Queensland,” clause 3, be omitted.

The Committee divided on the question,—“That the words be retained” :—

Ayes, 4.		Noes, 2.
Mr. Suttor,		Mr. Humphery,
Mr. Wall,		Mr. Neild.
Mr. Collins,		
Mr. Dawson.		

The amendment was therefore negatived.

Mr. Wall moved that clause 5,—“The Committee are of opinion that before the railway is constructed, legislation should be enacted to charge the owners of land benefited by the line with a portion of the cost of construction,” be omitted.

The Committee divided on the motion.

Ayes, 4.		Noes, 2.
Mr. Suttor,		Mr. Humphery,
Mr. Wall,		Mr. Neild.
Mr. Collins,		
Mr. Dawson.		

The motion was therefore passed.

The Report was adopted.

PARLIAMENTARY STANDING COMMITTEE ON PUBLIC WORKS.

SECTIONAL COMMITTEE.

Waterworks for the Town of Junee.

MINUTES OF PROCEEDINGS.

The Sectional Committee, appointed on Wednesday, 15th February, 1893, "to inspect, take evidence, and report with reference to the proposed Waterworks for the Town of Junee," met at the "Bethungra Hotel," Bethungra, at 9 a.m. on

SATURDAY, 18 FEBRUARY, 1893.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. John Davies, C.M.G.,	William McCourt, Esq.,
The Hon. William Joseph Trickett,	Edward William O'Sullivan, Esq.

The Committee proceeded to inspect the site of the proposed storage reservoir.

Having returned, at 2 p.m., the following witnesses were examined:—Matthew Sawyer, Edward Carroll, Richard Weston, Kenneth McLeod, and Robert Wheeler.

The Committee then proceeded to Junee.

MONDAY, 20 FEBRUARY, 1893.

The Committee met at the Council Chambers, Junee, at 10 a.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. John Davies, C.M.G.,	William McCourt, Esq.,
The Hon. William Joseph Trickett,	Edward William O'Sullivan, Esq.

The Committee proceeded to further consider the proposed Water Supply for Junee.

The following witnesses were examined:—George Dobbins, Thomas Charles Humphreys, and Thomas Wardle Hammond.

The Committee, at 1 p.m., adjourned until 2 p.m., when John Egan, John Love, John Day, and Morris Howard Davies, were examined.

The Committee adjourned at 10 minutes before 4 p.m., and met again at the Railway Refreshment Rooms at 4:35 p.m.

Mr. Trickett proposed, and Mr. McCourt seconded the motion,—“That, having regard to the evidence given before the General Committee, and locally, and after an inspection of the Bethungra site and scheme, the Sectional Committee recommend that the Bethungra scheme be carried out, subject to the following reservations:—1. Mr. Hamlet's evidence proving satisfactory as to the quality of the water. 2. Professor David's evidence being obtained as to the nature of the country around the site of the proposed dam, and as to the holding quality of the dam and the surrounding ground.”

The motion was carried.

The Committee adjourned at 5 p.m.

TUESDAY, 28 FEBRUARY, 1893.

The Sectional Committee met at the Office of the Committee, Sydney, at 1:30 p.m.

MEMBERS PRESENT:—

Jacob Garrard, Esq., Chairman.

The Hon. John Davies, C.M.G.,	William McCourt, Esq.,
The Hon. William Joseph Trickett,	Edward William O'Sullivan, Esq.

The minutes of the previous meeting were read, and confirmed.

The Sectional Committee considered their Report.

Mr. Davies moved,—“That the Report be adopted.”

The motion was seconded by Mr. McCourt, and passed.

The Sectional Committee then adjourned.

1893.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

**PARLIAMENTARY STANDING COMMITTEE
ON PUBLIC WORKS.**

(STATEMENT OF FEES AND TRAVELLING EXPENSES PAID TO MEMBERS OF.)

Ordered by the Legislative Assembly to be printed, 4 October, 1893.

[Laid upon the Table of the House in answer to Part (1) of Question No. 4, of 4th October, 1893.]

Question.

(4.) EXPENSES CONNECTED WITH PUBLIC WORKS COMMITTEE:—MR. MOLESWORTH *asked* THE COLONIAL TREASURER,—

(1.) What amounts have been paid to the several members of the Public Works Committee during the present Parliament for fees and travelling expenses respectively?

(2.) what is the amount incurred for clerical assistance, shorthand-writing, printing, and all other expenses connected with the said Committee during the same period?

Answer.

STATEMENT of amounts paid to the several members of the Parliamentary Standing Committee on Public Works for fees and travelling expenses respectively from 23rd October, 1891, to 30th September, 1893:—

Member's Name.	Fees.	Travelling Expenses.	Totals.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

PUBLIC WORKS ACT FURTHER AMENDMENT BILL.
(MESSAGE No. 5.)

Ordered by the Legislative Assembly to be printed, 25 October, 1893.

R. W. DUFF,

Governor.

Message No. 5.

In accordance with the provisions contained in the 54th section of the Constitution Act, the Governor recommends for the consideration of the Legislative Assembly the expediency of making provision to meet the requisite expenses in connection with a Bill to amend the "Public Works of 1888," and the "Public Works Act Amendment Act of 1889" in certain particulars, and to make better provision with regard to the costs of arbitration; to establish and give effect to the Betterment principle with regard to Public Works, and to form a sinking fund for repayment of the costs of the said works; to repeal certain portions of the "Public Works Act of 1888;" and for other purposes in furtherance of, or consequent on, the aforesaid objects.

Government House,

Sydney, 25th October, 1893.

* Probable amount required for works authorised but not in hand—Loans, £15,909; Revenue, £15,104 17s. 6d.
† In addition, the following amounts have been authorised for expenditure by the Board, but not by the Minister for Public Works—Loans, £31,648 5s.; Revenue, £200.

1893.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

PUBLIC WORKS.
(RETURN RESPECTING CONTRACTS LET FOR.)

Ordered by the Legislative Assembly to be printed, 8 November, 1893.

[Laid upon the Table of the House in answer to Question No. 7, of 8th November, 1893.]

Question.

7. CONTRACTORS FOR SEWERAGE WORKS:—*Mr. Sharp*, for MR. RAE, asked THE SECRETARY FOR PUBLIC WORKS,—What are the names and addresses of the contractors who have obtained contracts for sewerage works and other public works during the last two weeks?

Answer.

DEPARTMENT OF PUBLIC WORKS.

Contracts let from October 22, 1893, to November 8, 1893.—Tenders opened by Tender Board.

No.	Work.	Name of Contractor.	Address.
1	Construction of engine-shed, two engine-pits, &c., Newcastle City tramway extension.	C. McClure	Boundary-street, Croydon.
2	Erection of pavilions, Benevolent Asylum, Rookwood	Peter Graham	Croydon.
3	Construction of concrete dam and timber floodgates, Clibucca Creek, Macleay River.	Thos. Edwards	Boulevard, Dulwich Hill.
4	Erection of residence for Engineer at the pumping station, Moss Vale Water Supply.	Thos. Ackland	9, Justin-street, Leichhardt.
5	Erection of a powder magazine and gun-cotton store at Spectacle Island.	T. E. Quiggan.....	Victoria-street, Lewisham.
6	Construction of timber beam foot-bridge over Moonan Brook, Denison Diggings.	J. G. Robley	Ourimbah.
7	Construction of Petersham Park, Leichhardt and Smith-street branches, Long Cove Creek stormwater channel, Contract No. 89, Sydney Sewerage.	Phillips and Rhodes	420, Darling Road, Balmain.
8	Construction of outlet end of the Iron Cove Creek stormwater channel, Contract 94, Sydney Sewerage.	W. W. Johnson	Wallsend.
9	Construction of sewer, Baptist-street and Phillip-street to McEvoy-street, Contract 91, Sydney Sewerage.	W. O'Neill & Co. ...	3, Randwick View Terrace, Newland-street, Waverley.
10	Construction of Camden-street, sub-main Western Suburbs Sewerage, Contract No. 83, Sydney Sewerage.	" "	" "
METROPOLITAN BOARD OF WATER SUPPLY AND SEWERAGE.			
11	Contract 78, Glebe sewerage	T. Williams.....	56, Broughton-street, Glebe.
12	" 86, "	R. and S. Butcher ...	North Sydney.

Besides those abovementioned there are a number of smaller works, principally road works, for which Tenders have been invited by the branches interested.

1893.

NEW SOUTH WALES.

DEPARTMENT OF AGRICULTURE.

(ANNUAL REPORT.)

Presented to Parliament by Command.

To the Honorable T. M. Slattery, Esq., M.P., Minister for Mines and Agriculture.

Sir,

In submitting my report upon the working of this Department, I have to apologise for the delay which has occurred in regard to its preparation. The delay was, in the first instance, due to the extreme pressure of work during the last session of Parliament, and subsequently to the necessity of reorganizing this Department and the Forest Department, consequent upon the reductions in the Votes granted by Parliament. I shall perhaps be pardoned if I take advantage of the lateness of this Report to refer to the important changes in the Department which have been rendered necessary.

During the past year much good work was done, and it may fairly be hoped much valuable assistance and encouragement were given to the various branches of agriculture by the several agencies employed. Perhaps, on the whole, the least satisfactory of these has been the functions of the Inspectors of Agriculture; but as the services of these officers have since then been dispensed with, it may suffice to say the employment of them was in the nature of an experiment, and it is scarcely matter of surprise if, in the formation of a new department, some agencies be brought into operation which subsequent experience indicates might, with advantage, have been ignored. Another, is the grant of money for National Prizes. The intention was good, but the difficulties and cost of disbursing the grant in a satisfactory manner were so great, the results secured therefrom so questionable, that it was decided to ask Parliament to continue the grant to such an extent only as would enable the Department to discharge the obligations already contracted. The other agencies have, I think, given very general satisfaction, and I am happy to say have, under the reorganization, been retained in complete efficiency, notwithstanding the necessity for extreme economy. It is of course to be regretted that so many valuable officers have had to be sacrificed, but that must necessarily happen in times of retrenchment, especially in departments that have, to a greater or less extent, been overmanned.

One of the most useful of the agencies employed by the Department for the diffusion of information amongst the agriculturists of this Colony and elsewhere is the *Agricultural Gazette*. From all parts this publication elicits the warmest commendation, and it is of the highest importance that it be maintained, even though it should be necessary in the near future to require from those to whom it is supplied some small subscription. It is in contemplation to effect some slight alteration in the arrangement as well as the character of the articles, with a view to meet the requirements of all classes of its readers. In addition to the *Gazette*, the following pamphlets were issued:—

In 1892—

Judge's Report on Apiculture.—Mr. A. Gale's Report on the bee farms entered for the National Prize Competition. Reprinted from vol. 3, part 5, of the *Gazette*.

Analyses of Commercial Fertilisers; also giving value and price asked, and from what firm each fertiliser is to be obtained.

The Cultivation of the Black or Green Wattle.—By F. Turner, F.L.S. Gives directions for the planting and cultivation of wattle; also mode of stripping, drying, and sending the bark to market. Reprinted from vol. 2, part 10, of the *Gazette*.

The Bronzy Orange Bug.—Gives a description and illustration of this insect, and directions as to the best means for destroying it. Reprinted from vol. 3, part 5, of the *Gazette*.

Budding.—A description of the different modes of budding, with illustrations. Reprinted from vol. 2, part 12, of the *Gazette*.

The Clydesdale Horse.—By Principal J. L. Thompson. Gives instruction on breeding, feeding, breaking-in, and management of the Clydesdale horse. Reprinted from vol. 3, part 8, of the *Gazette*.

Citrus Orchards.—Mr. W. Stieme's Report on the citrus orchards entered for the National Prize Competition. Reprinted from vol. 3, part 9, of the *Gazette*.

Cold Storage for Apples.—From the Vegetable Pathologists' point of view. An account of the principles involved, and the application of the principles of cold storage of apples.

Cheese-making.—By F. McCaffrey. Gives general directions on making cheese. Reprinted from vol. 3, part 6, of the *Gazette*.

Chemistry of Cheese-making.—Compiled by F. McCaffrey from the works of A. Sweetman, F.C.S., A. Wanklyn, M.R.C.S., and Professors Robertson and Sheldon. Reprinted from vol. 3, part 7 of the *Gazette*.

The Codling Moth (Entomological Bulletin, No. 1).—By A. S. Olliff. Gives life history, and habits of this insect, its parasites and enemies, and directions as to best means to adopt for destroying it.

17—A

Crop

[1465 copies—Approximate Cost of Printing (labour and material), £21 13s. 2d.]

- Crop Reports for October, November, and December.*—Giving the condition of growing crops in each county of the Colony.
- Directions for Collecting and Forwarding Specimens.*—Gives directions on preserving and packing entomological and botanical specimens.
- The English Market for N.S.W. Fruit.*—Mr. F. W. Ward's Report from London on the fruit trade, together with experts' opinions and advice on packing, &c.
- The Frozen Mutton Industry.*—By A. B. Suttor. Reprinted from the September part of vol. 3 of the *Gazette*.
- Flower Farming for Perfumes and Medicines.*—Being the Reports of Mr. J. H. Maiden, Mr. W. S. Campbell, Mr. F. Turner, and Mr. A. A. Dummicliiff on Flower-farming. Reprinted from vol. 3, part 12, of the *Gazette*.
- Flower Farming for Perfumes.*—With directions for the manufacture of perfumes, oils, and essences. Reprinted from vol. 3, part 3, of the *Gazette*.
- Grafting.*—From the Report of the State Board of Horticulture, California. Illustrated. Reprinted from vol. 3, part 9, of the *Gazette*.
- Gumming in Fruit Trees.*—Description, cause, investigations, and experiments. A blank leaf attached for recipient to return to the Department stating his observations.
- The Cultivation and Extraction of Fibre from the Sisal Hemp Plant.*—Gives description of plant, soil, and climate most suitable, cultivation, and other information. Reprinted from vol. 3, part 10, of the *Gazette*.
- How and When to Spray for Codling Moth.*—By A. H. Benson. Reprinted from vol. 3, part 11, of the *Gazette*.
- Judges' Report on English Fruit Orchards.*—Mr. J. Harold's Report on orchards entered for the National Prize Competition.
- Milk Fermentations and their Relations to Dairying.*—Reprint of a bulletin issued by the U.S. Department of Agriculture.
- The Milking Machine at Bodalla.*—An illustrated description of this machine. Reprinted from vol. 3, part 8, of the *Gazette*.
- Plant Diseases and How to Prevent them.*—By Dr. N. A. Cobb. A description of the principal diseases of the apple, pear, and grape, also white rust on cabbage, pumpkin leaf oidium, powdery mildew of the rose, and remedies recommended for each disease. Illustrated.
- Principal Insect and Fungus Pests.*—By A. H. Benson. A list of the remedies for insect and fungus pests, with directions for mixing insecticides.
- The Preparation of the Lemon for Market.*—By A. H. Benson. Gives a description of the lemon-house, picking, how to clip, and how to keep lemons. From vol. 3, part 9, of the *Gazette*.
- Prunes Growing and Curing.*—By A. H. Benson. Gives soil and climate most suitable. Varieties of prunes, directions for planting, pruning, and gathering the fruit, also grading and curing. From vol. 3, part 10, of the *Gazette*.
- Entomological Notes.*—By A. S. Olliff. A description of the potato moth, pumpkin beetle, and cabbage moth. From parts 9 and 10 of vol. 3, of the *Gazette*.
- Further Notes on Pruning Fruit Trees.*—By A. H. Benson. From vol. 3, part 7, of the *Gazette*.
- Report of the Department of Agriculture for 1891.*
- Rice Growing in America.*—A description of the mode of cultivation. From vol. 3, part 9, of the *Gazette*.
- Report of the Maize Crop Grown at the Hawkesbury Agricultural College.*
- Sydney Prices of Insecticides.*—Quotations from principal wholesale chemists in Sydney for poisons used for insecticides.
- Spraying Fruit Trees.*—A reprint of a letter received by the Department from Mr. F. C. Smith, Yalumba, Angaston, South Australia, describing the complete success of spraying operations in South Australia.
- Silos, Ensilage, and Silage.*—By J. A. Despeissis. An illustrated pamphlet, giving directions for making silage stacks. Reprinted from vol. 3, part 2, of the *Gazette*.
- The Strawberry.*—By F. L. Jensen. Giving the origin of the strawberry, soil required, mode of cultivation, manure most suitable, and general management. Reprinted from vol. 3 part 7, of the *Gazette*.
- The Sugar-Cane Disease in the North Coast.*—By J. A. Despeissis. Giving description of three insects noticed in half-dying canes. Reprinted from vol. 3, part 1, of the *Gazette*.
- The use of Paris Green as an Insecticide.*—By A. H. Benson. Explaining the mode of application of Paris Green and directions for mixing. Reprinted from vol. 3, part 10, of the *Gazette*.
- The Vineyard and the Cellar.*—By J. A. Despeissis. Giving directions as to the planting and management of a vineyard, and oidium and its treatment. Reprinted from vol. 3, parts 9 and 12, of the *Gazette*.
- Woolly Aphis, or American Blight.*—A description of, and best means of destroying it. From vol. 3, part 1, of the *Gazette*.
- Sorghum.*—The soil and climate required, selection of seed, and cultivation. Description of sorghum for ensilage and also as a source of sugar. Analysis of sorghum. From vol 2, part 3, of the *Gazette*.
- Olive Culture and the Manufacture of Olive Oil.*—Reprint of the Report of Sir Samuel Davenport, K.C.M.G., to the Agricultural Bureau, South Australia. The value of the olive oil industry in the south of Europe. Suitability of soil and climate of South Australia for the cultivation of the olive. Mode of extracting the oil. Reprinted from vol. 3, part 3, of the *Gazette*.
- Dialogue concerning the manner in which a poisonous spray does its work.*—The advantages of spraying for preventing or checking blight, put in the form of a dialogue. From vol. 2, part 12, of the *Gazette*.
- The Catiang Bean, or Cow Pea.*—Directions for sowing, cultivating, and harvesting the cow pea. Average yield per acre. Use for feeding horses on the hay. Illustrated. From vol. 3, part 2, of the *Gazette*.
- How are Nitrogen and Phosphoric Acid to be obtained in the cheapest way?*—Translation of a lecture by Professor Paul Wagner, Darmstadt, on the Advantages of green manuring. Illustrated. Reprinted from vol. 3, parts 10, 11, and 12, of the *Gazette*.
- Curl-leaf in Peach, Nectarine, and other Stone-Fruit Trees.*—Description of the disease. Spread by budding and grafting from diseased trees. Treatment. A blank leaf attached for each recipient to fill in his observations regarding the disease and return to the Department. From vol. 3, part 12, of the *Gazette*.
From

From January to July, 1893.

- The Western Districts.*—An account of a tour through the Western Districts by Inspector A. B. Suttor. Re-printed from vol. 4, part 1 of the *Gazette*.
- Clearing Land in the Western and Southern Plains by the aid of a Team of Bullocks.*—A description of the manner of pulling down trees and extracting stumps by means of a strong wire rope and a team of bullocks. Reprinted from vol. 4, part 1, of the *Gazette*.
- Crop Reports for January, February, March, and April.*—Giving the condition of growing crops in each county of the Colony.
- The Sereh Cane Disease.*—By Dr. G. Kottman, inspecting chemist, Colonial Sugar Co. A description of the sereh cane disease as it exists in Java. Dr. Kottman is of opinion that the disease on our northern river cane plantations is not "sereh." Reprinted from vol. 4, part 1, of the *Gazette*.
- "*Arrowing*" and its relation to the present disorder in the Sugar Cane.—A paper read before the Clarence Pastoral and Agricultural Association by Inspector E. de P. O'Kelly, in which he attributes the present disorder in the sugar cane to "checked arrowing." Reprinted from vol. 4, part 1, of the *Gazette*.
- The Vineyard and the Cellar.*—By J. A. Despeissis. Raisin-making: Best grapes for raisins and currants. Illustration of drying-ground and grader. Preparation of table raisins and pudding raisins. Specification of raisin drying kiln. Reprinted from vol. 4, part 1, of the *Gazette*.
- The Australian Wine Trade.*—By Hans W. Irvine. Showing the growth and progress of viticulture; Australian wines in the English market; type of wine suited for the English market; the local market, how to create a trade on a sound basis; new fields for Australian wines; wine casks; viticultural colleges; ravages of phylloxera. At the Hawkesbury College and Farm the work done was, considering all the surrounding circumstances, most satisfactory. At the end of the year sixteen of the students were eligible to present themselves at the Diploma Examination. In order that this examination should be a complete test of the efficiency of the training at the College, and of the qualifications of the students who had completed their course, it was decided that the examination should be conducted by gentlemen of the highest standing and wholly unconnected with the College. The Examiners were:—Agriculture—*viva voce* and Practical Farm Work: Mr. T. N. Grierson, Bodalla; Mr. Thomas Reidy, Camden Park; Mr. H. B. Croker, Cootamundra. Principles of Agriculture: Principal Brown, Dookie Agricultural College, Victoria. Practical Agriculture (paper): Professor Lowrie, Roseworthy College, South Australia. Chemistry: Professor Lowrie. English: Professor Lowrie. Veterinary Science: Professor Lowrie. Entomology: Mr. H. Pye, Dookie College. Book-keeping: Mr. G. A. Sinclair, Dookie College. Natural Philosophy: Mr. Marco Guérin, C.E., Longerenong Agricultural College, Victoria. Mechanics and Drawing: Mr. Marco Guérin, C.E. Arithmetic and Mensuration: Mr. Marco Guérin, C.E. The results were that six out of eight students took the College Diploma:—H. Shute, with 1,044 marks; E. J. Rien, with 1,031 marks; A. Moore, with 968 marks; M. H. Reynolds, with 941 marks; F. L. Nott, with 892 marks; and H. J. Dark, with 878 marks, out of a possible 1,400 marks. The comments of the Examiners upon the proficiency of the students and the curriculum of the College, were highly complimentary to the Principal and Masters, and most gratifying to the Department. With a view to economy, it has been decided that for 1892 and henceforth the Report of the College shall be published separately from the Annual Report of the Department. It is to be regretted that it has not been possible to erect a suitable college building on the Farm. The idea of erecting the costly structure originally contemplated has, for some time past, been abandoned; but it was hoped that it might be possible to put up an inexpensive but suitable building, as it would greatly facilitate the work of instruction if the students were located in the midst of their work, and the cost of maintenance might be reduced. Though it has not, up to the present time, been possible to commence the erection of a college building, we have, since the reorganization, entered somewhat more vigorously upon the important work of constructing the necessary farm-buildings, and I trust I shall, in my next Report, have the pleasure of stating that the whole of these buildings have been completed, including a thoroughly equipped dairy, in which special instruction in the most improved methods of butter and cheese-making may be imparted to non-resident students, as well as to such of the resident students as may desire to avail themselves of it. It is quite evident that dairying is rapidly becoming one of the most important branches of agriculture.

The total number of dairy stock of the Colony is now estimated to exceed 800,000.

Total number of milking cows, 1893, 365,110: ditto for 1892, 343,477; increase for the year, 21,633.

Total number of "factories," 254; value of machinery and plant of ditto, £130,923: number of "cream-separators" at work, 1,000.

Number of persons having direct employment in dairying industries, 13,000.

Totals of dairy products for the year 1892:—Butter, 21,398,300 lb.; cheese, 5,018,296 lb.; bacon and hams, 5,108,077 lb.

Total manufacture of butter for the year 1892, 21,398,300 lb.; ditto for 1891, 18,362,897 lb.; increase (16½ per cent.), 3,035,403 lb.

Butter exported 1891, 572,212 lb.; butter exported 1892-3 season, 2,255,551 lb.; ditto declared value, £89,929.

Surplus production, beyond local requirements, consisting of butter exported, 2,255,551 lb.; ditto in cold storage, 800,000 lb.; total, 3,055,500 lb.

Butter consumed within the Colony, 18,340,000 lb.

Average selling price (wholesale) for the year 1891, 13½d. per lb.; ditto, 1892, 12¾d. per lb.

Total manufacture of cheese for 1891, 5,506,071 lb.; ditto 1892, 5,018,296 lb.; decrease (9 per cent.), 488,475 lb.

Total requirements of cheese for consumption within the Colony, 5,150,000 lb.; cheese manufactured, 5,018,296 lb.; ditto imported, 131,522 lb.; total, 5,149,818 lb.

Imports of cheese for consumption within the Colony, 131,522 lb.; value, £4,918; exports of over production, 77,822 lb.; value, £1,710; average selling price (wholesale) for the year 1892, 4¾d. per lb., for best quality only.

Total number of swine 1891, 253,189; ditto 1892, 249,522; decrease, 3,667.

Total requirements of bacon and hams for consumption within the Colony, 5,857,500 lb.; bacon and hams manufactured, 5,099,050 lb.; ditto imported, 758,450 lb.; total, 5,857,500 lb.

Imports of bacon and hams for consumption within the Colony, 758,450 lb.; value £31,209: approximately 9¾d. per lb. (ex. duty 2d.); exports of over-production, 9,034 lb.; value, £289; approximately 7¾d. per lb.; average selling price (wholesale) for the year 1892, for best quality only, 6¾d. per lb.

N.B.—The years end 31st March following; thus, 1892 means 31st March, 1893.

Recently Mr. Guthrie, the chemist of the department, and Mr. E. Clarence Wood have undertaken to enter upon a systematic investigation of the fodder plants of this Colony, especially with a view to the elucidation of the question as to the influence of feeding upon the quantity and quality of milk. The preliminaries have already been settled, and the experiments will be entered upon at the College at the commencement of next term under the superintendence of Mr. Wood. The results will probably be of interest to dairy farmers and may be helpful to them. These experiments may also be of value in connection with the question of milk condensing. It is also evident that the growth of this branch will depend largely upon the quality of our products, while this will in turn depend upon the training of the persons engaged in the manufacture of butter and cheese. It is, therefore, reasonable to expect that persons thoroughly instructed in the best methods will readily find employment, and thus the department may, by providing the means of obtaining such instruction, best help forward this important branch of industry.

In May last, at my request, Mr. E. Clarence Wood, the science master, undertook certain inquiries and investigations in connection with the manufacture of condensed milk, with a view to ascertain whether the industry could be profitably carried on in this Colony, and, if so, whether practical instruction in the process could be imparted to the students at the College.

These inquiries and investigations are not yet complete, but it is thought that in the course of a month or two Mr. Wood will be in a position to report fully the result of his labours.

The

The subject may be considered as embracing an investigation of various samples of tinned milk now in the market, the chemical composition and comparative value of these in every respect as an article of diet, the cause of certain defects frequently existing in same, and if possible to suggest a remedy, the desirability of establishing the manufacture on a commercial scale in the colonies, where differences of climate and cost of labour as compared with the older countries have to be taken into account, and also as to the adaptability of the vacuum pans of many of the existing small sugar-making plants which have been rendered, in great part, or wholly, idle by the establishment of larger central mills whose conditions of working are much more economical.

All the observed defects in the manufacture of condensed milk appear so far to be only in the mechanical processes of evaporating and tinning, unless exception be taken to the large excess of sugar found in the present commercial article—this being decidedly objectionable. The addition of so much sugar is not necessary, and it may indirectly cause deterioration in the quality.

The importance of apiculture is fully recognised, and arrangements have been made for imparting instruction in bee-farming. Steps are being taken to establish a scent-farm. A small area has been set apart and prepared for the growth of scent-plants, and as many of them as can be obtained are being planted. It is hoped that in a short time not only shall we be in position to give instruction in regard to the growing of the plants but also in the several methods of extracting the perfume.

The experimental plot at the farm has recently been extended and very valuable work is now being carried on.

The department, recognising the fact that the future prosperity of the Colony depends in so large a measure upon the export of the products of the soil, is directing its efforts to the encouragement of such branches of agriculture as are most likely to lead to the production of articles best suited to the markets open to our exports. With this object in view we are about to make experiments in the feeding of cross-bred sheep on the lines adopted in New Zealand, and we are imparting instruction in the growing, saving, and curing of tobacco, in the hope that by the introduction of seeds suitable to the climate and soil of various localities in the Colony, and by adopting the proper methods of saving, curing, and sorting the leaf, it will find a ready sale at remunerative prices in the English market. The following is a brief *précis* of the work done by the tobacco experts:—

In January last the experts found a small experimental planting at the Hawkesbury College, but in a sickly condition from the presence of "*Peronospora Hyocicami*," a fungus, and "*Lita Solanella*," a boring grub, for which remedies were to be tried, but a severe hailstorm occurring shortly after, which entirely destroyed the crop, the remedies could not be tested.

A small planting by Mr. Thomas Douglas, at Richmond, on undrained land, had been completely drowned out by the excessively wet season, and one by Mr. Johns, at Kurrajong, had failed partly from the effects of an unfavourable season, and partly because the seed had been sown at the wrong time.

They also reported that tobacco had been extensively grown in and around Tumut for upwards of twenty-five years. That the leaf grown there had the reputation of being the best the Colony had yet produced. That the soil and climate were evidently well suited to tobacco. That Europeans had formerly engaged largely in the cultivation, which, however, had of late years fallen almost entirely into the hands of the Chinese, who rented land for the purpose. That this change was partly the result of extreme fluctuations in the price obtainable for the leaf. That very large stocks of leaf were still in the hands of growers, storekeepers, and merchants, for which no sale could be found even at 4d. per lb. That the present low price was owing to the heavy crops and excessive plantings of the years 1889 and 1890, and the absence of any outlet by exportation of the surplus then produced. That this surplus quantity of leaf was unsuitable for export to Europe by reason of its having very thick midribs and veins of a lighter colour than the leaf, and being ill-grown, badly harvested, imperfectly cured, and not classed or sorted. That samples had been sent to England and Scotland which had been favourably reported upon as regards its length, toughness, and flavour, but very unfavourably reported upon in every other respect, and valued by a London broker at 1d. to 1½d. per lb. nominal value. That its merits of length, toughness, and flavour are points depending entirely upon soil and climate, while the defects indicated were each and every one the result of either ignorance or carelessness in cultivation in the field and of manipulation during harvesting, drying, curing, and preparation for market.

The experts point out the means by which these defects can be avoided or remedied, and comment upon the utterly inefficient and insufficient means and appliances provided for the purpose of curing the crop. They state what the requirements of the English markets are, and their opinion that with the employment of needful skill and the necessary labour, the tobacco producible in the district could be made to fulfil these requirements, and that by reason of a certain richness of flavour inherent in the tobacco there was at least a possibility of its being preferred to the American leaf.

The experts report that the kinds of leaf most readily saleable in the home markets are—(1st) good, sound, full-bodied leaf for spinning into twist and for making into plug or cavendish; (2nd) good, sound, coloury leaf, for cutting into shag, bird's eye, and returns; (3rd) fine, yellow, aromatic leaf, for cutting into flake cut, and fancies, the higher grades of which are used for cigarette making; (4th) fine, silky, glossy leaf of cinnamon-brown colour, tough, and with very thin veins, for cigar wrappers; (5th) good, clear, burning leaf of any colour suitable for the inside wrapper of cigars, called bunch-wrapper; (6th) any really well-flavoured leaf that burns well for fillers of cigars; (7th) any kind of leaf having exceptional fragrance with little strength and no pungency, the demand for this class of leaf though not very large has never yet been fully met, consequently the prices are very high.

All tobaccos for European markets must be properly and well cured, sorted, and graded. Each package must contain only one quality, one colour, one size of leaf; torn, broken, blistered, or discoloured leaf must be put into separate packages—there must be no nesting or suspicion of false grading. The whole must be well packed and firmly pressed, and with the exception of classes 4 and 7 must not contain more than 17 per cent. of moisture.

The experts report that many of the farmers in the Tumut district are well acquainted with the cultivation of tobacco, and would gladly again engage in the industry if there was an assured sale for the leaf at any price over 5d. per lb. It has therefore been suggested to them that with a view to putting the capabilities of the district to the proof, and to ascertain which variety of tobacco would give the best money return, they should each plant half an acre of one or two approved varieties from seed to be supplied by the Department of Agriculture, should cultivate, harvest, cure, and prepare for market (the crops so grown)

by

by the most approved methods, and ship the product to London to be submitted first for the inspection and report of the Tobacco Trade Section of the London Chamber of Commerce and afterwards to public auction at one of the great periodical tobacco sales. This suggestion has been favourably received, and many farmers and landowners have expressed their willingness to co-operate to carry out the suggestion if the department will appoint an expert to reside in the district for one season to supervise the harvesting and curing of the first crop.

The experts found that the tobacco crops of the district had suffered greatly in the last two years from *Peronospora Hyociami*, a fungus commonly known as blue mould or rust, which is incidental to certain atmospheric conditions in almost all places where tobacco is grown in this and the neighbouring colonies, also from "*Lita Solanella*," a boring grub, and from "*Noctua Larva*," a root grub. These are amenable to treatment by spraying, but have usually been picked off by hand. These and other insect pests appear to be more prevalent as well as more destructive on lands which are planted continuously year after year with tobacco.

The experts further report that very considerable areas of land which formerly produced large crops of excellent leaf are not now in cultivation, and that the land available for tobacco-growing in this district comprises many thousands of acres, there are no insuperable difficulties in the way of establishing a great and profitable industry in the growth of tobacco for exportation.

On 28th January, 1893, Dr. Mason, of Tumut, offered to place his crop of tobacco at the disposal of the department in order to test whether by means of proper curing and attention the Tumut tobacco could be rendered fit for export. The Minister accepted Dr. Mason's offer, and Mr. Sutherland left for Tumut to conduct the experiments (1st March). Dr. Mason's crop comprised about 5 acres, and when the tobacco expert arrived he found about 3 acres cut and hung in the shed used as a curing-house and 2 acres to be cut as the leaves became ripe.

There being no proper curing-shed available, Mr. Sutherland had to make use of an iron-roofed, open house, which he had to improve by means of bagging cloth screens. Notwithstanding risk of damage from sunburn, rain, and the careless handling of the Chinese employed, he had expectations of getting a considerable portion of the crop ultimately fit for export. To enable the tobacco to be dealt with in bad weather a small but comparatively close shed was prepared.

In the intervals when not attending to work in connection with experiments, Mr. Sutherland visited different growers of tobacco round Tumut. He found the Chinese disinclined to adopt any improved methods in cultivating tobacco, but many of the European farmers expressed their readiness to undertake experiments and were grateful for any information supplied. Their chief want was a knowledge of modern means of curing and preparing the leaf for market. After consultation with Dr. Mason and other growers, Mr. Sutherland has been able to devise a means by which the iron-roofed curing sheds which are general in the Tumut district can at a small expenditure be converted into thoroughly serviceable curing houses on the American pattern. Mr. Sutherland also commenced his Manual on Tobacco-growing for the *Agricultural Gazette* during these intervals.

On 28th March the tobacco expert took up his residence for a fixed term at Tumut, and was occupied till 17th April in making preparations for the harvesting of the balance of the crop. Cutting and curing the crop lasted till 6th May, when he made a visit to Adelong, Mindarloo, Tarcutta, and Hillas Creek to inspect crops and sheds. Returned to Tumut 15th May, and spent the rest of the month upon the experiments and in writing manual. Curing and handling the leaves occupied the first week in June. The drying and curing was greatly delayed through bad weather, unsuitable curing-shed, and the carelessness of the Chinese workmen. Stripping and sorting was commenced on the 15th July, and occupied the rest of the month. This work is still in progress.

The Manual on Tobacco-growing comprises a series of articles on the subject, from the selection of land suitable for the growth of tobacco to the preparation of the leaf for market. These articles have been published in the *Agricultural Gazette*.

In February last the experts found that the Tamworth district in respect of its soil, situation, temperature, and rainfall, was eminently suitable for tobacco cultivation, that prior to 1885 it had been very extensively and profitably grown, but that since 1885 the low price of leaf and the recurrence of disease had caused the crop to be abandoned in favour of maize, lucerne, and potatoes. That the low price was owing chiefly to over-production for a limited market, the only possible remedy for which was an export trade. That the same faults in cultivation and curing which rendered the Tumut tobacco unsuitable for export existed here as there. That the same diseases and insect enemies of the plant were prevalent in both places, and were partly the result of faulty cultivation and partly of unfavourable seasons. That the radical defects of the cultivation were—(1st) growing for weight instead of quality; (2nd) growing in the same fields year after year, giving the soil no rest nor change of crop; (3rd) growing from seed which had been raised year after year in the same soil, thus intensifying and perpetuating its defects; (4th) insufficient and inefficient means and appliances for the proper drying and curing of the crop. That they found at Dungowan Creek some tobacco leaf of really exceptional excellence, both of colour and flavour. That nine gentlemen promised in the event of an instructor being stationed in the district in the coming season to plant an aggregate of 30 acres from seed to be supplied by the Department of Agriculture especially for export to England, and undertook to follow instructions in cultivating and curing, and to provide all needful sheds and appliances to render the experiment successful. That vast acreages of really first-class tobacco land are available in the district.

At Singleton they found that the tobacco industry had formerly been a very prosperous one, both here and on Patrick's Plains, where it had been the mainstay of many small selectors, who had each grown an acre or two of tobacco, as a sure ready money crop, the proceeds of which enabled them to complete the necessary improvements on their homesteads. That one farmer at Glendon Brook, who well understood tobacco growing and curing, had, with the assistance of his family only, realized from the produce of 18 acres of tobacco in one year more than the whole cost of his freehold farm. That the idea of growing tobacco for export was new to them, and that one of the sons of the abovementioned farmer said he would plant a few acres in the coming season from imported seed, in order to test the London market. Their experience at West Maitland, Paterson, Vacy, Dungog, Bandon Grove, and Gresford was very similar.

In March last Mr. Lamb found at Kelso 3 acres being harvested—the usual coarse, common, shoe-string kind, badly grown, knee-deep in weeds, utterly neglected. The low price current offering no inducement to bestow labour upon it. The ruins of a shed 500 feet long, and 20 feet wide, showed that the grower had

had formerly cultivated tobacco on an extensive scale. At Mount Pleasant, found 10 acres which had been planted on undrained land, entirely abandoned. Was told that two other planters had also abandoned their cultivations. At Eglinton, saw some self-sown plants looking very well. At Brucedale, saw 6 acres of excellent quality ready for harvesting. The grower said that he harvested last year 22 cwt. per acre, and obtained 3½d. per lb. Obtained a few leaves of last year's growth, found it well-flavoured, holding fire well, and yielding a firm, full, white ash. Have no hesitation in saying that given the right sort of seed, intelligent cultivation, and perfect curing, tobacco could be produced at Brucedale and Peel that would bring a very remunerative price in England. Addressed a meeting of the Pastoral and Agricultural Society, after which several gentlemen stated that they would plant small areas experimentally for exportation if supplied with suitable seed and instructions. This district being subject to both late and early frosts will require seed of the earliest varieties.

Mr. Lamb found that tobacco cultivation on the banks of the Turon River was rapidly dying out, although there are very many small flats on both banks which have yielded good crops of excellent quality in the past. Present prices are not sufficient to cover cost of production, although labour is plentiful and cheap. Mr. James Fulton, the principal storekeeper in Sofala, has 2½ tons of leaf of very fair colour and quality, for which he cannot obtain more than 2½d. per lb. in Sydney; he, therefore, prefers to hold it until prices improve. He sees that an export trade is the only remedy for the present glut in the market, and proposes to have 2 acres planted this year for the purpose of testing the London market, and has written to Messrs. P. Henderson, of New York, for a supply of the best kinds of seed. He wants trustworthy instructions as to the best methods of cultivation, curing, and sorting for the export trade. If his experiment proves successful he is confident that his example will be generally followed and an important industry established. Mr. Lamb was much impressed by the luxuriant growth and heavy crops of figs in the district, and believes that the drying and packing of this fruit might prove of advantage. He reports that Blayney did not impress him as being suitable for tobacco cultivation.

Mr. Lamb reports that tobacco which was at one time extensively grown in and around the Carcoar district has almost ceased to be cultivated. That there are very extensive alluvial flats of rich sandy loam of considerable depth, well suited to the production of tobacco. That although subject to frosts as late as mid-April and as early as mid-October, there is yet a sufficient length of summer for the maturing of a full crop. That a sample of two-year old leaf which he saw was of excellent texture and flavour. That he addressed a meeting at which some thirty-five persons were present, pointing out the desirability of growing tobacco for a larger market than Sydney afforded, of growing from the best sort of seed in the best possible way, and of curing and sorting in such a manner as to suit the requirements of the English trade, and that after the meeting several gentlemen had expressed their willingness to plant experimental crops for exportation if they could obtain reliable seed and proper instruction as to the curing and classing of the leaf. He visited the Lower Clarence in April last, reports that the low-lying flats on the banks of the river do not appear suitable for tobacco cultivation in their present undrained condition, but that back from the river there are some lands at a slightly higher level that are worth an experiment. Mr. Lamb addressed a meeting attended by over fifty persons and much interest was evinced in the subject of tobacco cultivation which had at one time been carried on successfully but had given place to sugar-cane and maize.

Mr. Lamb reports that at Grafton, Upper Clarence, there were formerly two tobacco manufactories and one cigar manufactory. That tobacco had been extensively grown in the district. That the tobacco grown was of excellent flavour, was too thin in texture for manufacturing into the kind of tobacco mostly used in this Colony, but was well suited for cigar-making. That the last crop grown here only brought 4d. per lb. in Sydney. That if 6d. per lb. could be depended upon, the crop, although a somewhat risky one, would still be cultivated. Mr. Lamb addressed a meeting of the Pastoral and Agricultural Society on the 27th, there being about twenty-five persons present. He pointed out, that, as the leaf grown in the district was essentially a cigar leaf, and the total manufacture of cigars in the Colony last year was only 606 lb., it would be well to look for a market elsewhere. That cigar leaf was saleable in London, Hamburg, and Bremen at from 10d. to 2s. 6d. per lb., according to quality. That those markets could not be glutted. That if any desired to grow a crop for exportation small sowings of the best kind of seed could be obtained from the Department of Agriculture, and that a future issue of the *Agricultural Gazette* would contain directions for cultivating and curing tobacco for shipment abroad.

Recognising the importance of encouraging the export of fruit, the Department of Agriculture has been carrying on a series of experiments in the cold storage of fruit under supervision of the fruit expert, at the cold storage rooms attached to the Government Meat Market, Darling Harbour, rented by Messrs. Hudson Bros., who have kindly placed a room at the Department's service free of charge, and who have done everything in their power to make the experiments a success, and have spared neither time, trouble, nor expense in perfecting the arrangements so as to obtain the best possible results.

The experiments have been conducted with a view of determining—

- 1st. The varieties of fruit best adapted for cold storage.
- 2nd. The best method of packing, and the material to be used for packing.
- 3rd. The best style of case to use.
- 4th. The best time, or rather state of ripeness at which to gather the fruit.
- 5th. The temperature at which to keep the fruit.
- 6th. To maintain an even temperature, and still have a constant influx of cold, fresh air.

The varieties of fruit experimented with were as follows:—Apples, pears, plums, peaches, nectarines, tomatoes, grapes, passion-fruit, oranges, Emperor mandarins, thorny mandarins, pine-apples, and mangoes, and taken as a whole the experiments have been of a very instructive and interesting nature, and should prove of great value in developing the fruit export trade of this Colony.

As a result of the experiments it is found that with an even temperature of from 40° to 43° in the fruit chamber, and with a certain and regular supply of cold fresh air—moderately dry, so that the air in the chamber does not become vitiated or laden with moisture—that such fruit as apples, pears, plums, oranges and mandarins, and some varieties of grapes, have kept in perfect condition for at least two months, and what is of still greater importance—that the fruit on removal from the cold storage kept equally as well as fruit of a corresponding degree of ripeness gathered direct from the tree.

The

The experiments have thus overcome one of the great drawbacks that has hitherto greatly restricted the sale of Australian and Tasmanian fruit in the English market, namely, that the fruit does not keep after its removal from the cold storage on board ship, and also that it ripens unnaturally on shipboard. In addition to the introduction of cold fresh air into the fruit chamber, which is the secret of success of the experiments, the whole of the foul air in the chamber is drawn off by means of a fan, so that the air of the chamber is constantly changed. With the other and softer fruits the results were not quite so satisfactory as partly owing to the extreme wetness of the season and the placing in the chamber of over-ripe or unsuitable varieties there was more or less loss, and the fruit did not keep long enough to have been placed on the English market. Nevertheless, the experiments were very instructive, and show that if sufficient care is taken in packing and picking and a more suitable case is used, that it will be possible to send a certain quantity, at any rate, in good condition to India or America, but not, it is feared, to England—even to India or America the greatest care will be necessary to insure success. In addition to the cold storage experiments, the Department has endeavoured to impress upon fruit-growers the necessity of placing their produce on the markets in the best possible condition, properly packed, and to show to the best advantage, instead of the careless handling, packing, and casing usually seen, and which is literally damning our fruit in the markets of the world. In order to successfully pack fruit to show to the best advantage it is necessary to pack only one size of fruit in each case, and in order to show the means adapted for this purpose in use in California, the Department imported a grading machine, which has been brought under the notice of fruit-growers both in Sydney and at the Fruit-growers' Union at Parramatta with satisfactory results, and it is probable that fruit-graders will be used on the coming crop. The value and importance of careful grading and packing was clearly shown in the case of the package of Washington navel oranges, forwarded by Mr. James Martin, M.L.A., from San Francisco to the Department. For though the fruit was not superior to many of the oranges grown in New South Wales, the general neatness of the package and style of packing greatly enhanced the attractiveness and, consequently, the selling of the fruit. At various meetings attended by the fruit expert, he has always laid great stress on the importance of this matter, as in his opinion the success or failure of our export fruit trade depends largely on the manner in which we place our fruit on the markets of the world.

Whilst at Goulburn and Singleton the fruit expert took the opportunity of addressing the fruit-growers of those districts; he also visited the Albury and Corowa districts, giving spraying demonstrations and instruction in pruning, as well as giving lectures on fruit-growing generally. He has also visited the northern rivers district, and has given several spraying demonstrations and lectures at different centres, as well as a large amount of general information on the various branches of fruit culture and preserving. During his visit he travelled over a large part of the district, and was greatly impressed with its great natural resources and with the varied nature of these resources, which are at present to a large extent entirely undeveloped.

A great drawback to the fruit industry of this Colony is the great uncertainty and general mixed state of fruit nomenclature, the same variety being often known by several different names in different parts of the Colony, and many varieties being only known by local names or simply termed seedlings! This state of affairs is exceedingly misleading, especially in purchasing trees from nurserymen, as one seldom knows whether they are obtaining the kind of fruit desired or not, and several years are often lost by planting wrongly named varieties, which, instead of being what they are sold for, turn out to be worthless. In order to definitely determine the correct nomenclature, the simplest and most reliable method is to establish a standard reference orchard with which to compare the fruits sent in for identification, and for this purpose a small plot of ground has been set aside on the land connected with the State Nursery at Gosford, which will be planted with two specimens each of as many varieties of correctly named trees as can be obtained.

The scions from which these fruit trees will be propagated will be obtained from correctly named trees in this Colony, the adjoining colonies, or from the large collection of correctly named trees planted at the experimental stations in California. By this means a number of correctly named varieties will be obtained at a slight cost, and these can be added to from time to time so as to render the collection as complete as possible.

In connection with the work of the fruit expert, the Chemist has made the following analyses of insecticides:—

I.X.L. Compound Tree-wash.—Yellowish-green, solid, dissolves imperfectly in water to orange-coloured solution; contains lime, sulphur, and common salt; appears to have been formed by boiling together lime, sulphur, and water, and adding salt.

Rover's Scale-blight Exterminator.—White substance of crystalline appearance; easily soluble in water, forming strongly alkaline solution; contains soda, sulphur, and arsenic, the mixture forming an alkaline solution of sulpharsenite of soda.

Upfold's Liquid Tree-wash.—Brown liquid, strongly alkaline, froths on shaking; contains soda and resin, with or without addition of soap.

The chemist recommends that the Department obtain samples of any of these "patented" insecticides that are in the market, with a view to ascertaining what they are composed of, as in many cases such compounds are sold at a high price, whereas the same, or equally beneficial mixtures, could be prepared by the farmers with little trouble and far less cost.

Such information need not be made public, but would be of assistance to the officers of the Department in recommending any given treatment.

In the case of such compounds as contain poisonous ingredients (as Rover's Exterminator) the nature of such poison should be stated on the tin.

With regard to the work of the Pathologist mentioned in Mr. Anderson's report, Dr. Cobb supplied the following information touching the recent examination into the diseases of the sugar-cane in this Colony.

Briefly, the facts are as follows:—"Five weeks, inclusive of the month of July, were spent on the Clarence River. Upwards of thirty possible causes of disease in cane were examined with care. These included half-a-dozen different species of fungi and upwards of twenty species of nematodes. Neither the fungi nor the nematodes are doing any such amount of damage as would cause the complaints which are to be heard everywhere on the Clarence River. The disease so bitterly complained of turns out to be associated with the presence of a microbe in the sap vessels of the cane. The presence of the microbes

microbes is indicated to the eye by the exudation on freshly cut surfaces of a yellow gummy substance. The disease, which I propose to call *The Gumming of the Sugar-cane*, never occurs without the presence of this gummy matter. The gummy matter never occurs without the microbes, and is in fact a product of their growth. It is impossible to enter into details here, but from very careful and minute examination I came to the conclusion that there are very strong and exceedingly numerous reasons for supposing the disease to be caused by these microbes, which are a new sort, and which I propose to call *Bacillus vascularum*, but no one is entitled to say that any organism is the cause of any given disease until the organism has been inoculated into healthy individuals and there produced the disease, and such inoculation must of course have been made under the now well understood modern precautions against the introduction of any other organism or disease-producing factor. Such inoculations have been made, and the result will in due time be recorded. Meanwhile we know from these investigations much about the nature and symptoms of gumming that will enable the cane-growers on the Clarence to put several checks on the losses they have hitherto suffered from it.

These methods of checking the disease were fully explained to a representative meeting of farmers from all parts of the river, and were such as to meet their approval. Chief among them was greater care in securing healthy sets.

Not knowing the objectionable nature of this gum the farmers have been planting sets containing it, and the resulting crops have been diseased in consequence. I was able to show that the buds of gummed sets already contain the microbes and the gum, or in other words are already diseased, so that the growers were shown to be setting out diseased plants.

Practical directions, accompanied by numerous specimens, were given to the growers whereby they could distinguish readily and with certainty whether their sets were gummed, and these directions were such as to meet with warm approval. While pointing out the ability of any farmer to select his own sets, I doubted whether many farmers on the Lower Clarence would find on their farms sets sufficiently free from gum. I therefore strongly advised them to adopt some system by which an expert might have access to all farms on the river, wherefrom to select and buy plant-cane at a reasonable price, the same to be sold by him at a profit. If such selection were done with care, the resulting sets would be worth more than is ordinarily paid for plant-cane (namely £1 per ton). If we set the expert's price at 30s. per ton, and reckon for the Lower Clarence 700 tons per annum of cane for planting, there is a living for one man in the business. He should charter a launch and two or three punts and hire a gang of cutters. Having examined and selected his cane, he would then be in a position to deliver to order plant-cane certified to be reasonably free from gum. Whoever enters the undertaking must have first qualified himself to select cane plants free from gum and other blemishes, and must have both energy and business capacity. At planting time his resources would be heavily taxed. At other seasons he should make himself familiar with the cane-fields, and decide from whence he would draw his supplies of plant cane. To qualify himself for selecting cane he should familiarise himself with the appearances of sound cane of every variety in demand; he should make himself familiar with the diseases of cane, especially gumming. My advice was that he should furnish plant cane of two sorts :—

1. Cane in stalks selected from as healthy crops as possible (by the examination of stalks from here and there all through the field.)
2. Cane sets, *i.e.* already cut up, the same to be culled in the most careful manner after rigid inspection, and to be as healthy and free from gum as possible.

No. 1 could be sold at 30s. per ton—possibly less; this would depend on the patronage of the growers.

No. 2 would have to be sold at a much higher price, and would be used by the growers for nursery purposes.

The Lower Clarence would furnish, I believe, a living for one plant-cane specialist; the whole Clarence for more than one. The farmers were warned to bear in mind that the disease exists in all fields on the river, so that the matter of securing non-gummed sets is of interest to the up-river farmers as well as the down-river farmers.

The distribution of the disease is as follows, as far as at present known :—

1. General.

- (a) On the Clarence River.
- (b) On the Richmond River.
- (c) In all probability in Queensland.

2. Local on the Clarence.

While gummed cane is common all along the river, it is much more common on the Lower Clarence, and the gumming is there much worse than above the town of Maclean.

I believe I examined nearly all the varieties of cane at present grown on the Clarence River. No variety examined was perfectly free from gum, though a long search had to be made in some cases to find it. It is very noticeable that the varieties recently introduced are much more healthy, as far as gumming is concerned, than those long in use. Nearly every stalk of some of the new introductions was found to be free from even traces of gum. On this ground, as well as other, the introduction and trial of new varieties is strongly to be commended. This Department has done well during the past few years to import and distribute to cane-growers varieties from Queensland, Fiji, New Guinea, and Louisiana. I made numerous drawings of the fungi examined, and the nematodes and other injurious organisms seen during the progress of the work as well as of the microbes and the different features of gumming. About 125 photographs, mostly micro-photographs, were taken, and numerous specimens obtained. Although I have given the disease the name "gumming," I do not mean to imply that the honey-coloured substance produced by the growth of the *B. vascularum* is a gum in the chemical sense of the word. I tested this substance chemically in many different ways, and its reactions differ from those of the group chemically known as gums. I am satisfied that it is in the main composed of a definite chemical compound to which I have given the name *vasculin*.

The detailed reactions of vasculin, the particulars of the life history of *B. vasculatorum*, the full particulars of the disease gumming of sugar-cane so far as known, together with numerous illustrations, will be submitted in the full report, as well as full details of all the practical conclusions, the latter of which it has here been possible only to briefly sketch."

Mr. Guthrie being desirous to work out the nature of the "gum" in sugar-cane, reported on by Dr. Cobb, the Chemist of the Colonial Sugar Company's Mill at Harwood has been asked to obtain a sufficient supply for the purpose.

During last year as well as this the Viticulturist has been travelling through the vine-growing districts of the Colony lecturing on matters connected with the vineyard and cellar. Much of his time has also been occupied in visiting farms, vineyards, and wine-cellars entered for competition in connection with the National Prizes. The importance of improving the character of our wines, and to secure uniformity and definiteness of type, so that they may take the position in the markets outside the colonies to which they are, by reason of their intrinsic merits, entitled, is engaging the attention of the Department.

In this connection it may be stated that at vintage time a series of experiments in wine fermentation were conducted in different parts of the country, by means of pure selected levures or yeasts, which are the active agents of alcoholic fermentations. Steps had been taken as early as last November for introducing from France a certain quantity of these levures, so that they should arrive in Sydney in time for the vintage; but owing to unexpected delays the order was not executed until after the grapes had been picked. These levures which comprise some obtained from the most celebrated growths of Burgundy, Medoc, Champagne, and Cognac will be kept in a cool cellar until next vintage, when an attempt will be made to revive the ferments, thus affording valuable information as to their resisting power and vitality.

Advantage was, however, taken of an offer made by Mr. Geo. Payne, who came out early in the year with an assortment of levures similar to those ordered, and this Department took sufficient ferments for treating 10,000 gallons of must.

Several vigneron interested themselves in the experiments which were contemplated, and through the courtesy of Dr. T. Fiaschi, of Tizzana vineyard, Hawkesbury, Mr. J. D. Lankester, Ettamogah, Albury, Mr. D. Frère, St. Hilaire, Albury, amongst others, two distinct series of experiments were undertaken.

The principle which underlies this method of fermentation which has lately been brought under notice may be summarily defined.

In order to make good wine three important factors are necessary:—

1. A must having all its constituting elements well balanced.
2. Good ferments for converting the grape sugar in that must into the products of alcoholic fermentation, viz. :—Spirits of good quality, glycerine, and succinic acid.
3. A temperature suitable for the thriftiness of those active agents of fermentation.

With rare exceptions, it is safe to state that, given the choicer varieties of wine grapes grown, must obtained from Australian grapes compares favourably with must pressed in even some of the most favoured vine-growing districts of France.

Although no definite and precise researches have been as yet made to ascertain the peculiarities of the ferments which are found on the skin and the stalks of grape-bunches in these colonies, it is safe to conjecture, from what is known of them, that they would be deeply influenced by the very variable atmospheric conditions of the Australian climate. The part they play in fermentation is so well marked that it has been demonstrated that, whenever the better sorts of ferments take possession of a vat full of good must, and fermentation is allowed to proceed unchecked, good wine is the result.

The third condition of good fermentation "a suitable temperature" in the fermenting vats, ranging from between 25°–30° C. (77°–86° F.) can only be reckoned upon, especially in our warmer and earlier districts, in well-constructed fermenting houses.

Experiments of that nature, tending to help in producing a wine of a more uniform and of a better type, should receive all the attention they deserve, and it would be advisable at the time of next vintage to repeat some of the experiments so as to draw from them more definite conclusions.

So far as an opinion can be expressed at the present time, a decided improvement is noticeable in many cases, while in those cases which have turned out doubtful, precise information regarding the oscillations of the temperature during fermentation have not been furnished, or else the temperature has been allowed to rise too high. A progress report on this subject is in course of preparation and will soon be published.

The valuable work performed by the Chemist during last year is detailed in the report of the late Director; therefore, to save repetition I shall not refer to it; but since the beginning of this year, in addition to the work already mentioned, the following has been done by the Chemist:—Analyses,—52 soils, 26 manures and fertilisers, 6 waters, 4 insecticides, in addition to miscellaneous work, including milks, flour, soils for salt, sugar-beets, &c. reports and replies to correspondents seeking advice.

The following is a list of papers published in the *Agricultural Gazette* since January:—

- Analyses of soils—January, February, March, April, June.
- Analyses of manures—January, March.
- Analysis and description of the "Darling Pea"—February.
- Influence of acid fumes on vegetation—February.
- Examination of the Babcock machine for testing milk—March and April.
- Comparison of Australian and American Maize—February.

The Botanist has completed a work on some of the forage plants of Australia, which was well illustrated. He also completed a considerable quantity of work in connection with Australian grasses, and wrote many articles for the *Agricultural Gazette*, dealing with various matters connected with the botanical branch of the Department. The Botanist was assisted by Mr. Valder in collating his reports on new crops. During the year 3,182 applications for seeds, cutting, and plants were received, 13,235 packets of seeds and plants were distributed for experimental purposes.

The publications on botanical subjects have greatly increased in value by the excellent drawings made by the artist, Mr. Grosse.

In the Entomologist's Branch of the Department the chief aim during the past eighteen months has been to get together as large a collection of noxious and beneficial insects as possible, and the Entomologist thinks it may be fairly said that considerable progress has been made, as several thousand specimens of direct economic interest have been added to the collections of the branch, many of them in all stages of development, from the egg to the adult stage. A special effort has been made to get together a collection of scale-insects (Coccidæ) destructive to fruit-trees, crops, and garden plants; and, thanks to the energy of the collector attached to the Department, and the kindness of a large number of correspondents, a fairly representative series has been brought together. We have commenced the formation of a collection of gall-making insects (Hymenopterous, Dipterous, and Homopterous) affecting fruit and timber trees: and we have now more than 100 mounted specimens suitable for exhibition, besides a large number of minute species and microscopical preparations for study.

During the past eighteen months about 400 different insects have been bred in the small laboratory attached to the Entomological Branch, mostly from material sent in by correspondents, and many of these are now preserved, in their several stages, for future display. Apart from the species bred, the additions to the collection during the year 1892 have been considerable, amounting to not less than the following estimate:—

Coleoptera (beetles), 3,200, including life-histories.
 Lepidoptera (butterflies and moths), 930.
 Orthoptera (grasshoppers, &c., &c.), 59.
 Neuroptera (dragon-flies, &c., &c.), 45.
 Hymenoptera (bees, wasps, &c., &c.), 1,375, including many parasitic species.
 Diptera (flies, &c.), 425.
 Hemiptera and Homoptera (plant-bugs, tree-hoppers, &c.), 900.
 Unmounted specimens in spirits of wine, (about) 1,300.

In addition to those specimens, the branch has acquired during the past six months (*i.e.*, from January to June, 1893), 290 specimens from correspondents, which have been examined and reported upon; and some 2,000 specimens, collected on behalf of the branch, have been properly mounted and labelled for future incorporation in a general economic collection. These additions include a number of life-histories, chiefly preserved in spirits of wine, suitable for exhibition in show-cases; but the present limited accommodation at our disposal prevents any attempt to display such specimens in open show-cases.

In January the Entomologist had an opportunity of investigating the disease affecting the sugar-cane crops on the Clarence River where he was sent, by my instructions, to inquire into the nature and extent of insect ravages amongst the crop. He determined, after careful inquiry, that insects had nothing to do with the disease then prevalent amongst the canes, and suggested that some other cause must be looked for. In this connection he ventured to mention the evils arising from the long-continued in-growing of stock—the planting, season after season, of “sets” from the same parent plant—and the urgent necessity for importing new varieties, or new stock, either from entirely new sources or from abroad.

Experiments and observations have also been made in regard to the habits of the Potato-moth, *Lita solanella*, Boisd., particularly in its relations to tobacco, and in this connection Mr. A. M. Lea's services have been most valuable. A detailed report on this pest is in course of preparation.

Some preliminary experiments with the “Parasite du Ver Blanc”, (*Botrytis tenella*) have also been made, but the results are not sufficiently definite at present to be made known.

A considerable number of notes and papers dealing with injurious and beneficial insects have been published by the Entomologist in the *Agricultural Gazette* for 1892, and January to June, 1893. The following are the insects described:—

The Woolly Aphis or American Blight (*Schizoneura lanigera*); the pear-tree Slug (*Selandria cerasi*); Salt-bush Scale (*Pulvinaria Maskelli*); Crickets (*Gryllus servillei*); injuring fruit-trees; Bronzy Orange Bug (*Oncoscelis sulciventris*); Cherry-tree Borer (*Cryptophasa unipunctata*); introduction of the Fig Insect (*Blastophaga psenes*) into Australia; Gayton's Bee Disease at Lismore; Walking-stick Insect (*Acrophylla tessellata*), destroying forest trees; Orange Borer (*Uracanthus cryptophagus*); Mussel Scale (*Mytilaspis pomorum*); Pernicious Scale, (*Aspidiotus perniciosus*), on pear; Greedy Scale (*Aspidiotus rapax*), on pear and apple; Banded Pumpkin-beetle (*Aulacophora hilaris*); Two-spotted Monolepta (*M. rosea*) on various crops and shrubs; Potato Moth (*Lita solanella*, Boisd.), destroying tobacco; Migratory Locust (*Acrydium migratorium*); Sugar-cane Moth Borer (*Nonagria exitiosa*); Fungus-eating Beetle (*Brachypeplus binotatus*); Predatory Beetle found on Sugar-cane (*Cryptomorpha Desjardinsii*); and various new hymenopterous parasites and other insects.

The Entomologist acknowledges the valuable services of his assistant, Mr. C. Fuller, who has not only given him great assistance in mounting and preserving specimens, but has also done much useful work in preparing microscopical preparations and drawings.

Since the beginning of this year the Artist has been engaged upon the usual work of illustrating the *Agricultural Gazette*, consisting of drawings of grasses, weeds, various plants of value, supposed poisonous, &c., insects in sugar-cane, and various other products, friendly and injurious, in plates and individual drawings; illustrations of experiments, methods of doing various work, &c. Besides what has appeared, there are drawings in hand and in process—insect plates, fruit diseases, &c.

Considerable time has been devoted to work with Pathologist. At Queanbeyan, wheat experiments; photographing, a large variety of wheat, &c.; making drawings of forty wheats in detail; also at Moss Vale on experiments for Stock Branch—nematodes in sheep; making six plates nematode (unpublished); and making also various apparatus for photo purposes, for making lantern plates and photographing with suitable backgrounds, &c., and much miscellaneous work.

In consequence of the need for extreme economy in this Department, and also in that of the Government Printer, it is proposed to discontinue the work of publishing monthly crop reports; but the work will be conducted by the Government Statistician on a less expensive and it may be hoped on an equally effective scale.

From the same cause we have been prevented from utilizing some of the sites for experimental farms, and the operations on the only one actually started, namely, at Wagga Wagga, have been very much restricted; nevertheless Mr. Coleman, who is in charge, has done good work considering the

the limited amount of money available for the purpose. It is possible that we may not be able for some time to come to find means to carry on operations at more than one experimental farm; but it is hoped that we may be able to establish experimental stations in various parts of the Colony and to conduct operations thereat without incurring any serious expense.

This year the duty of administering the vote in aid of Agricultural Societies has devolved upon this Department, and the Inspector has been busily engaged in collecting the information upon which the aid may be allotted. It is hoped that the Department may soon be in a position to enter upon the payment of subsidies.

During last year Bills were prepared on the subjects of vine diseases and fruit pests. The former was passed into law this year and is now being brought into operation; the latter could not be introduced owing to the pressure of business in Parliament.

Herewith I submit the report of the late Director of Agriculture. With regard to it I may perhaps be permitted to point out that the expenditure of the Department for 1891, including £2,005 6s. spent by the Vine Diseases Board, was £21,362 10s. 5d., not £19,955 5s. 5d., and since the 27th of April last the expenditure for 1892 has been added to. In regard to the reference therein to the expenditure of Government in the United States and in France in connection with agriculture, if intended for comparison with the expenditure in this Colony, it may be pertinent to state that the population of America is over 65,000,000 and that of France is over 38,000,000. The amounts as given by the late Director equal 2·46d. per head of the population in the United States, 2·17d. per head of the population in France, while the cost of this Department in 1892 (exclusive of the expenditure under the Vine Diseases Act) was 5·68d. per head of the population of this Colony.

Since the reorganisation of the Department, notwithstanding the reduction in the staff and the limited funds available, the work has in all its branches progressed most satisfactorily. I am greatly indebted to Mr. W. S. Campbell for the very valuable assistance he has rendered me in the work of reorganisation and subsequently in managing the Department of Agriculture and Forests. To the heads of the several branches, and to the officers generally of these Departments, my thanks are due for the ready zeal with which they have seconded Mr. Campbell's and my efforts, and I have every confidence that in my next report, which I hope to submit at a much earlier date next year, I shall have the pleasure of recording such progress as shall merit your entire approbation.

Department of Mines and Agriculture,
9th August, 1893.

I have, &c.,
HARRIE WOOD,
Under Secretary for Mines and Agriculture.

The Director of Agriculture to The Under Secretary for Mines and Agriculture.

Report for the Year 1892.

Department of Agriculture, Sydney, 30 June, 1893.

I HAVE the honour to submit herewith a brief report of the operations of the Department of Agriculture during the year 1892.

Clerical work.

The administrative work has grown rapidly during each successive year of the Department's history as is indicated by the following figures. I need hardly emphasise the fact that the large correspondence and issue of papers and pamphlets indicated by these figures has entailed very heavy work upon the small Permanent-staff of this Department, and I feel it due to them to say that the smooth and steady working of the clerical part of the Department is due to the intelligence and zeal of the whole of the officers on the Permanent-staff who have worked so loyally with, and have been stimulated by the excellent example of the chief clerk (Mr. A. Price) and the first clerk (Mr. A. P. G. Reynolds, B.A.), who have had to control respectively the general and scientific correspondence of the Department.

Pathological Branch.

Amongst the scientific agencies of the Department the one which is most consulted by the farmers of New South Wales and which has before it the most serious problems to consider is that of the pathologist. Dr. Cobb has issued through the pages of the *Agricultural Gazette* the most complete original papers on the chief diseases that affect the crops of New South Wales. He has not only indicated the exact nature of each of these diseases, but has prescribed remedies approved by the experiments of other departments, more especially in America, as well as other remedies dictated by his own practical experiments.

His

His laborious original investigations on the subject of rust in wheat have placed our knowledge of that important fungus far in advance of that which existed before the creation of this Department, and there can be little doubt that many of our more intelligent farmers have now an intelligent knowledge of the exact nature of rust, and of the measures to be adopted to prevent it, or minimise its ravages, instead of the hazy theories in which they indulged a few years ago. Dr. Cobb has communicated his original investigations to the conferences that have met during the past two years in Sydney and Adelaide respectively, and the leading agricultural authorities of the other colonies have not been slow to recognise the value of his work for the whole of Australia.

This officer has also investigated the subject of "Take-all" in wheat, which has long defied the practical wheat-growers of the Colony. His exhaustive article on the subject has summarised the whole of the experiences of our principal wheat-growing districts, and has clearly indicated the principal causes of this disease attributed by farmers to so many obscure causes.

With the invaluable assistance of Mr. W. Farrer, of Queanbeyan, Dr. Cobb has cultivated small plots of all the varieties of wheat obtainable in Australia, and has reduced them in number from 600 to 375, by eliminating the many duplicates hitherto cultivated in the different colonies under different names. In conjunction with the Nomenclature Committee, representing the whole of the Australian Colonies, he has selected sixty-five of the best varieties for further experiments, and it is confidently hoped that we shall in time be able to produce wheats having at once the power of resisting rust, and also high milling qualities. When the different articles on this national question have been gathered together they will form a complete text-book on the subject of wheat-growing in Australia. We have in the Department at the present time complete stools of every kind of wheat at present grown in Australia, and when these have been correctly described and illustrated there should be no further difficulty in correctly naming the different varieties of wheat found worthy of cultivation in the principal wheat-growing districts of this Colony.

Amongst the other important problems submitted to the Pathologist have been the investigation of the blights in the sugar-cane, maize, potatoes, pine-apples, and bananas. Owing to the pressure of work in his branch he has not been able yet to give the necessary time to the investigation of some of these diseases, but it may be confidently expected that when he can find time to investigate the more important of them valuable light will be thrown upon their nature, their causes, and remedies. Only those who know how the so-called practical farmer and fruit-grower will theorise about what *may be* the cause of the diseases affecting his crops, how he will mistake the action of insects for that of fungi, and *vice versa*, and how he will mistake cause for effect,—only they can understand how essential it is to have a highly trained expert to whom diseased specimens can be submitted for accurate determination of the causes of the trouble.

In addition to the work connected with this Department, Dr. Cobb has devoted a deal of time to the question of worms in sheep, and has initiated a complete scheme of work in connection with examining the different fodder plants for their microscopic fauna, and comparing the same with the larval stages of the worms parasitic in sheep, an entirely new line of work from which interesting and important results have been already obtained, which will be published in due course.

When it is estimated that the annual loss through rust and other plant diseases in New South Wales amounts to nearly a quarter of a million sterling, it will be seen that the Pathologist has a large and ever growing field of work before him.

For myself, I must gratefully acknowledge the immense value of Dr. Cobb's work to this Department. The most difficult problems in connection with our work have been referred to him, and his practical common sense, his valuable mechanical skill, and his high scientific attainments have always enabled him to throw a deal of light on any problem however intricate.

I may mention that cordial invitations have been sent to Dr. Cobb to visit Queensland, South Australia, and Fiji, for the purpose of investigating plant diseases which have been peculiarly troublesome to these Colonies, but the pressure of work in our own Colony has prevented him undertaking this work, as he would otherwise have liked to ask the Minister to allow him to do.

Analytical Branch.

The chemist of the Department, who entered on his duties with the beginning of the year has been kept very fully occupied with the analyses of soils, manures, and agricultural products such as milks, feeding stuffs, wheat, sugar beets, plants supposed to be poisonous, wines, and waters used for irrigation.

From these analyses I have been able to give advice to hundreds of farmers throughout the Colony on matters affecting their welfare. As we have confined our attention as far as possible to soils typical of considerable areas, each analysis has enabled us to give advice and suggest experiments to many farmers cultivating similar soils.

The whole of the manures offered for sale in this Colony have been carefully analysed, and have been valued by myself on the same basis. The results, as published in the *Gazette*, have indicated to our agriculturists how they can most cheaply and effectively stimulate their soils or supply the needs of their various crops. The result has been an immense increase in the trade of those companies dealing in first-class manures, which are sold at a reasonable price. The manufacturers are as anxious to get a favourable report from the Department on their products as the growers are for guidance in the selection of the best and cheapest manure for their respective requirements. One company in Sydney have informed the Department that whereas they sold three years ago 300 tons of manure per annum, they have sold during the past twelve months 3,000 tons of their manures. Hundreds of farmers are now using manures extensively and intelligently who had given the matter no attention three years ago. One farmer, who may be said to represent hundreds similarly situated, writes:—"I never used manure before I began to read the *Agricultural Gazette*, but now I use £50 worth in the year, and am well satisfied with the results. My neighbours are following my example." When it is remembered what are the direct advantages of the spread of such knowledge as this in extending trade and in developing our own resources, it will be seen how this Department can in many indirect ways assist in advancing the general interests of the country.

Mr. Guthrie has devoted much attention to the chemistry of the Darling Pea, which is known to cause such loss amongst the stock of the Colony. Although no very definite results have yet been obtained, it may be confidently expected that next year's practical experiments supplemented by further chemical analyses will enable us better to understand the action of this noxious plant concerning the effects of which our stock-owners themselves are so much divided in opinion.

Mr.

Mr. Guthrie's examination into the efficacy of the Babcock machine for estimating the fat in milk has been valuable in enabling the Department to speak with authority on the correctness of this valuable aid to the progressive dairy farmers of the Colony.

His investigations into the percentage of gluten in many of our rust-resistant wheats have furnished data on which to calculate the relative value of the different wheats for the purposes of nutrition.

Without in any way undervaluing the very useful work done during the past year in the Chemical Branch of the Department, I would venture to say that still more valuable work remains to be done chiefly in the direction of investigating the composition of the supposed poison plants of the Colony, the composition of the different fruits of the Colony, and of their ashes, and the chemical character of the chief brands of our wines. Chemistry can without doubt throw much light on this question, and it behoves us as a Department to add our quota of original investigations to the sum total of scientific knowledge which has been presented to us as a free gift by the older countries of the world.

Without assigning value to the purely original work undertaken by the Chemist, the actual commercial work connected with the analyses of soils, fertilisers, and agricultural products during 1892 may be fairly valued at £760.

Botanical Branch.

The Botanist of the Department, Mr. F. Turner, has done excellent work in this branch. He has published an illustrated work on the Forage Plants of Australia—the first Australian work dealing with that important subject. It has been most favourably reviewed both in the Australian and foreign press and is highly spoken of by many intelligent persons who have studied our forage plants from a practical standpoint.

In the pages of the *Agricultural Gazette* Mr. Turner has figured and fully described thirty-seven Australian grasses, which, with those published in the previous year, would form a most valuable volume on the grasses of Australia. The Botanist has also published in the *Gazette* eleven articles on new commercial crops, most of which, with their illustrations, have been reproduced in various agricultural papers throughout Australia and in America. Supposed poisonous plants and noxious weeds have also been fully dealt with by Mr. Turner in order that pastoralists and farmers may be awakened to the necessity of dealing promptly and effectively with these vegetable pests.

The Consul of the United States of America has largely availed himself of Mr. Turner's special knowledge on the India-rubber yielding trees, a special summary of which has been published in the special consular reports.

There is now in the Botanical Branch a large and valuable herbarium, from which the Botanist has been able to make useful exchanges with other countries.

From his complete collection of indigenous grasses and forage plants the Department has been enabled to send to the Chicago exhibition a very valuable collection of the best of these native fodder plants suitably mounted and correctly named.

He has also supplied collections of grasses very valuable from an educational point of view for exhibition at the principal agricultural shows in the Colony, and I am able to say that these grasses have aroused much interest in many of our intelligent farmers and pastoralists who are beginning to take a lively interest in the natural resources of their own Colony.

During the year some thousands of botanical specimens have been submitted to the Botanist from all parts of Australia for identification, as many as 150 having been received in one day.

The Botanist has also supervised the issue of the various seeds and plants sent out by the Department, and has collated, with the assistance of Mr. Valder, the 2,400 reports on these new crops, the results of which have been published in the *Gazette*. During the year 3,182 applications for seeds, cuttings, and plants have been received, and 13,235 packets of seeds and plants distributed.

Artist's Branch.

The artist of the Department, Mr. E. M. Grosse, has rendered most valuable assistance to all the officers of the Department who have been educating the farmers of the Colony through the pages of the *Agricultural Gazette*. His drawings of the grasses, new commercial plants, weeds, supposed poisonous plants, insect pests, and insect friends, and many other illustrations, have assisted us materially in making the *Gazette* valuable from an educational point of view.

In addition to the large number of drawings in black and white, Mr. Grosse has made some beautiful coloured drawings showing the two bees' wax moths, the moth which prays on the salt-bush scale, the potato-moth, and different fungus diseases affecting the fig, pear, apple, bean, rose, and strawberry. These have been reproduced very skilfully by S. T. Leigh and Co., and will be published in the different numbers of this year's *Gazette*. I would venture to express the opinion that, with regard to our illustrations, our publications will take second place to no other similar ones in Europe and America, and that the Department is fortunate in having an artist of such ability as Mr. Grosse, who is inspiring his assistant, Mr. Wills, with his own zeal and special skill.

Viticultural Expert.

Mr. Despeissis, the Staff Inspector of the Department, who might be more properly called the Viticultural Expert, has done very useful work throughout the year by means of his lectures in the various districts, his articles on the vineyard and the cellar, which have appeared in the *Gazette*, and the practical advice which he has given to many of our vignerons and farmers visited during the year. He has also rendered good service as Judge of the vineyards entered for the National Prizes, and has by means of his extensive travels throughout the Colony got such a grasp of the whole question of wine-growing that he will be able in due course to issue a most valuable text-book on this growing industry for use throughout the Colony.

Fruit Expert.

The Fruit Expert of the Department (Mr. A. H. Benson) who was appointed a temporary officer on April 5th, 1892, has been kept very busy during the year. His thorough scientific training gained at the Royal Agricultural College, Cirencester, supplemented by his practical experience as farm manager in Great Britain, and as an orchardist in California, make him a useful officer, and the fruit-growers of the Colony have not been slow to recognise his value; in fact, it may be safely said that the agriculturists of
New

New South Wales are very quick to recognise their superiors either in the scientific or practical part of their calling, and will eagerly welcome any man who is able to give them light on the principles or practice of Agriculture, or who can illustrate to them any of the operations of their special branch of that industry; but no one is more keen to detect a superficial theorist, who has had neither scientific training nor good practical experience, and who, after failing in his own agricultural experiments, does not hesitate to place himself forward as the teacher of others. During the little over a year that Mr. Benson has been in the Department his work has been of a very varied nature and has included almost every branch of fruit-growing and marketing. In carrying out his work he has had occasion to visit a large portion of this Colony, and has thus had opportunities of deciding of the value of different districts for fruit-growing and also of determining the kinds of fruit best suited to individual districts, taking climate and situation into consideration.

In his visits to orchards he has given advice on fruit-growing generally, especially with regard to planting, pruning, draining, manuring, and cultivating, and the treatment of insect and fungus pests.

He has also given information on budding, grafting, and nursery work generally, as well as on the packing and handling of fruit for local markets and for export; also in the utilisation of surplus fruits either by drying, canning, jam or jelly making.

He has also given advice on the kinds of fruits to plant, taking into consideration the suitability of the district for the fruit to be grown and also of the market to be supplied. He has strongly urged the planting of varieties that can be utilised in more ways than one, for instance, fruit that may be either dried, canned, exported, or used fresh so as to relieve the market of the glut of fresh fruit.

The cold storage of fruit with a view to English export or simply as a means of freeing a glutted market has also had a large amount of attention and the experiments that have been carried out at the Country Milk Company, the Farmer's and Dairymen's Company, and at Messrs. Hudson Bros., have been under his supervision and have taken a considerable amount of his time.

In order to give practical demonstration of the best means of keeping insect and fungus pests in check, a series of spraying exhibitions were given over a large part of the Colony. Mr. Benson carried out several of these exhibitions himself, and instructed Messrs. Shepherd and Treseder in the use of the pumps and the making of the different mixtures, so that they were able to continue the exhibitions without his assistance.

As a result of the cold storage experiments I have no hesitation in saying that with a temperature of 40 to 45 degrees and a supply of the necessary amount of fresh air in the hold of the ship, there will be no difficulty in sending oranges, mandarins, lemons, apples, pears, and some kinds of plums in good condition to the English market.

Mr. Benson has given a number of lectures on fruit-growing and on insect pests in various parts of the Colony, and has written articles for the *Agricultural Gazette* on pruning, prune-growing and curing, curing the lemon, insect and fungus pests, use of Paris green, treatment of aphides, co-operation, cold storage, and reports on districts visited. He also acted as Judge for all mixed orchards under 10 acres in extent and for the Champion Class, open to all orchards in the Colony that had previously obtained a first prize. Altogether, there were forty-five entries in the two classes, and the orchards were very widely distributed, extending from Deniliquin in the south-west to Bega in the south, Forbes in the west, and Tenterfield in the north. He also acted as Judge for the National Prizes offered for the best methods of utilising surplus fruit and vegetables. Mr. Benson has always displayed ability and enthusiasm in carrying out his very useful duties.

Dairy Expert

The dairy expert of the Department, Mr. F. M'Caffrey, has been kept very fully occupied during the year. He has taken the Travelling Dairy to the chief centres which have asked for it, and has given a valuable course of instruction in the practical operations of the dairy to fifty-three students at the Hawkesbury Agricultural College.

The exposition of the Travelling Dairy at Muswellbrook, Singleton, Quirindi, and Hinton, had practical results. After the visit to the last-mentioned, the first co-operative dairy company was established in the Hunter Valley, after which Ireland's Creamery was erected at Newcastle. Since when a number of dairy companies have been formed throughout the Hunter River, Paterson, and William's River districts. Mr. M'Caffrey has given lectures on co-operation in dairying, the factory system, fodders for dairy cattle, and cheese-making at thirty of the most important centres of the Richmond, Clarence, Bellinger, Nambucca, Macleay and Hastings Rivers; also at Orange, Wellington, Molong, Bathurst, Cargo, Cowra, Canowindra, Cootamundra, Moama, Deniliquin, Murrumburrah, Tumut, and Germanton. Mr. M'Caffrey's life-long experience as a dairy farmer in the south coast and his earnest desire to keep abreast of modern developments in dairying by constant reading and study, have made him peculiarly fitted to teach our farmers to whom he is always welcome.

In conjunction with the Chemist, he has submitted the Babcock Tester to strict practical tests, and has done much to make it widely known and appreciated in the factories of New South Wales. Mr. M'Caffrey is now engaged with Mr. J. P. Dowling in writing a text-book on Dairy-farming in Australia.

Crop Reports.

During the past year the system of monthly crop reports has been initiated. About 500 farmers and others have been induced to report every month to the Department on the condition and prospects of the different crops of their respective districts, and by means of these individual reports which have been sent into the Department through thirty-seven of the Inspectors of Stock, we have been enabled to present each month a comprehensive report on the crops of the whole Colony. In view of the necessity for retrenchment I have suggested that the allowance for this work to the Stock Inspectors be discontinued, and I believe that the value, both to the farmers and the different business firms, of these monthly reports will amply repay the cost incurred in the salary of the officer who is responsible for this work, and the small item for stationery and postage. These reports have already aroused a deal of interest amongst many of our farmers, millers, and many firms doing business with the agriculturists of the Colony. They have brought us into touch with many intelligent men whose regular communications about the diseases of their crops and other matters of local interest are very valuable to the Department. As the scheme of crop reporting has been found valuable in America, I think it may be safely continued for another year, after which we shall be better able to express a definite opinion as to its value under our present conditions.

Mr.

Mr. Jensen, the officer in charge of this work, has performed his duties with zeal and intelligence, and his agricultural training in Denmark, with his subsequent experience in our Lands Department, has rendered him peculiarly fitted for this special work.

Hawkesbury College.

With regard to the college and farm I need say but little, as the Principal has submitted a most minute report on his past year's operations. I would, however, express the opinion that the scientific training now being received by the students at that college is very fairly adapted to their requirements, and that the practical training is as good as the Principal can make it under the circumstances. When I reflect, however, that we are now turning out every year a number of students with diplomas from the college, who have had so few advantages, I cannot help expressing my regret that the financial difficulties of the Colony have so much retarded this valuable branch of the Department's work. Although the opportunities for scientific instruction are not nearly as good as they might be, I am of opinion that they are sufficiently satisfactory to enable students to get a training adapted to their requirements, but it is impossible to imagine that they can be turned out as thoroughly trained as we had hoped from a farm without farm buildings, without facilities for breeding different kinds of animals, and incompletely equipped with regard to stock, implements, and other appliances.

Experimental Farms.

With regard to the experimental farms which were intended to be such a prominent feature of our system of agricultural education, I have to regret to have so little to report that is encouraging. Shortly after the formation of the Department in 1890 we asked the Lands Department to dedicate for agricultural purposes reserves at Wagga Wagga, Uralla, and Richmond River, on which it was hoped that we should have agricultural schools and experimental farms. The only one of these that has been actually dedicated to the Department is that at Wagga Wagga where we have cleared over 100 acres of land and fenced in more than 400, out of a total area of 1,960 acres dedicated to the Department.

Mr. John Coleman, the acting manager, is doing good work in a very economical manner, and will, I hope, be able this year to put a few acres under cultivation with experimental plots of wheat in connection with our scheme of experiments to discover varieties most suited for general use, with special reference to their rust-resistant properties. I trust that Mr. Coleman will be able this year to plant out an orchard and vineyard, for there is great scope for valuable experimental work with regard to wine-making and wheat-growing on this particular farm.

I would venture to express the opinion that the Department is fortunate in having Mr. Coleman to direct the early history of this experimental farm, which will in due course, I trust, become a valuable educational agency in the interest of the farmers of that and all other similar districts.

The Department has also done some clearing on two reserves of the Richmond River, but operations have been checked owing to the necessity for retrenchment. Although these two sites doubtless present very great differences of soil, and are representative of tolerably large areas in this important district, I think the time was hardly ripe for commencing operations on two distinct sites so close together; and although it may not be possible to initiate any large scheme of operations in this district, I trust that the Minister will soon see his way to establish a small experimental station on the upland red soils of this district, in order to help the struggling settlers in the many problems which they have before them awaiting solution.

Early in the history of the Department the Lands Department was asked to reserve nineteen sites in the following districts for the future use of this Department:—

Area.	County.	Parish.	Area.	County.	Parish.
1,040 acres.....	Ashburnham..	Eyrmedura.	2,240 acres.....	Auckland.....	Meringo.
1,590 „	„	„	Permanent com-		
2,640 „	Sandon	Salisbury.	mons south of		
2,620 „	Harden	Cootamundry.	town of Orange	Bathurst	Orange.
420 „	Argyle	Breadalbane.	600 acres.....	Gough	Inverell.
910 „	Clarence	Great Marlow.	640 „	„	Campbell.
130 „	White	Turrawan.	456 „	Rous	Pimlico.
870 „	„	„	384 „	„	Tuckombil.
6,000 „	Cumberland...	St. Matthew and Ham Common.	6,400 „	Gunnedah.....	Black Jack and Gunne- dah.
2,200 „	Gough	Dilmas and Glen Innes.	1,500 „	Clive	Tenterfield.
2,064 „	Wynyard	South Wagga Wagga and Uranquinty.			

It was considered advisable that some Government land should be reserved in these important centres, although there was no immediate hope of commencing active operations on many of them; as it was felt that when the proper time should arrive, it might be difficult to get suitable land at a reasonable price.

Experiment Stations.

Although the time is inopportune for recommending the establishment of large agricultural schools and experimental farms, which must of necessity cost a considerable sum for their initial operations and their yearly maintenance, I would express the hope that experimental stations may be established in different parts of the country for the purpose of experimenting with new crops, and for working out the many problems which are puzzling the struggling farmers in our best agricultural districts. No expensive staff is needed for such stations, nor should there be any large outlay for the small area of land needed. In fact, in some instances they might be made self-supporting by the sale of improved varieties of sugarcane, maize, cereals, and other seeds, which the farmers would be able to buy at a reasonable price. I think that the temporary inspectors of agriculture, who have now no well-defined duties, and have very little opportunity of showing their qualifications, might be well utilised, assuming that they have the necessary ability and experience in managing small experimental stations, say, of 20 acres each, on which they might conduct series of experiments suited to the respective districts in which they were situated.

Agricultural

Agricultural Gazette.

The *Agricultural Gazette* has become a most useful agency in our educational work. It has brought us into direct touch with about 4,000 of the most progressing farmers, orchardists, and vignerons in the Colony. It has been published for the information of all the original investigations of the experts of the Department, illustrated where necessary by our artist, and has presented in a condensed form the researches of other agricultural experts doing similar work in other parts of the world. I have reason to believe that we have contrived to make the *Gazette* a happy blending of science and practice, and that it has been found to be equally valuable by the purely scientific worker and the ordinary farmer, who wishes for practical advice in the plainest possible language. Agricultural authorities in different European countries, Great Britain, and from most of the colleges and Experimental Farms of America, have congratulated the Department on the value of its original investigations as published in the *Gazette*, and several thousands of our own farmers and the leading authorities in the other colonies have thanked us for the valuable advice given in its pages on the matters of plant diseases, insect pests, improved methods, values of manures, new machines, and many other items of interest in their calling.

Every agricultural paper of any value throughout Australia has done us the compliment of reproducing many of our articles and illustrations, and some issues have been found to consist very largely of reproductions from our work—not always acknowledged. When we note that agricultural papers in America of world-renowned value have also reproduced some of our articles and drawings we may fairly conclude that the work is considered worthy of notice.

National Prizes.

The system of National Prizes has received another year's trial. Half of the vote of £5,000 generously granted by Parliament was offered for prizes for the best managed farms, orchards, and vineyards in the different districts of the Colony, as well as for the best poultry-farm, bee-farm, collection of parasites in stock, collection of injurious insects and their parasites, and collection of grasses and other fodder plants, in each of these cases from the whole Colony. These prizes have undoubtedly done good in stimulating our agriculturists to a healthy rivalry, and in bringing to the front some of our best farmers in the different districts of the Colony, and giving a standard for others to aim at. The system has revealed to the Department and to the general public where our best farmers are to be found, and it has perhaps reduced to their proper level some who have been occupying a false position as to their practical value as farmers and orchardists, men who have been very loud in their talk at meetings or through the papers, but have made a bad appearance in the judge's reports when valued by points. While recognising however, the good that these prizes have done, I am of opinion that under present circumstances they may well be omitted for a year or two, and when things are more prosperous it may be found well to kindle generous rivalry amongst our farming community by offering them again on a smaller scale. With regard to the other half of the grant which has been distributed in sums varying from £100 to £350 amongst ten Agricultural Societies each of which represents a distinct agricultural district in the Colony, I am of opinion that the money has been almost entirely wasted. In nearly every case the amount of money granted has been merely an extra subsidy to the society, saving them their own funds, but doing little else. The committees as a rule have not appreciated these prizes as they might have done, and the result has been poor competition, and I am sorry to say, in some cases, the awarding of the Government money to exhibits totally unworthy of the same. I am of opinion that these prizes should not be offered again under any conditions.

Text Books on Agricultural Subjects.

I am glad to report that the Minister has approved of my suggestion to issue text books on the various subjects connected with agriculture in which special education is urgently needed. He has authorised Mr. J. P. Dowling of the *Sydney Mail*, to collaborate with Mr. M'Caffrey, dairy expert of this Department, in issuing a text book on dairying, which will soon be published, and will I believe be found a very valuable work for the use of our dairy farmers. It will comprise over 200 pages of printed matter copiously illustrated from our own colonial experience. I feel confident that the sale of this book at 2s. 6d. per copy will amply repay its cost. A series of articles now appearing in the *Gazette* on vine growing and wine making will, when completed, form a valuable text book on this subject, and as we have had 1,000 extra copies of each article struck off they can be bound together and issued to the vignerons at a very low cost to the Department.

Mr. A. H. Benson, the fruit expert, has commenced a series of articles on fruit-growing in this Colony which will when completed form a valuable text-book for orchardists. This officer, from his American experience and English scientific training, supplemented by the experience he has gained in his visits to the chief fruit-growing districts of the Colony, will, I am confident, be able to prepare a valuable manual of fruit-growing.

Temporary Inspectors.

In January last year, the Minister appointed five Temporary Inspectors of Agriculture and one Inspector of Agricultural Shows. The appointment of one of the former was cancelled within ten days, for sufficient reasons. The other four Inspectors, Messrs. E. de P. O'Kelly, G. E. Hooke, A. A. Dunningcliff, and C. de la Motte were entrusted with the duty of educating the farmers of this Colony in the different subjects allotted to each. Mr. Hooke was allowed to resign in May, and his place was filled by the appointment of Mr. A. Bruce Suttor.

I regret to report that in this particular line of work our Department has not been successful. I have devoted considerable attention to the duty of sending these Inspectors to every part of the Colony where their services could be found useful but there has never been one application received in the Department for the services of any of these gentlemen, and only in one case has a second visit been requested. Whatever the reasons may be, the idea has not found favour with the practical farmers of New South Wales, and the experience of the past year convinces me that no officer of the Department should be sent to instruct our farming population unless he is, in the proper sense of the word, an expert in one or other branches of agriculture. The farmers will listen with respect to a man who is able to teach them in any line, whether it be in the practical work of the farm, the chemistry of agriculture, the diseases of plants, insect life, or the treatment of the soil, but they will not listen to any man whom they rightly or wrongly imagine to be a theorist, or a man who cannot practice what he preaches.

I am of opinion that the services of some of the Inspectors might be profitably utilised in conducting experiments on experimental stations, where they would have an opportunity of showing their qualifications, of practically educating our farmers, and of convincing them that they are capable of acting as agricultural instructors.

As I addressed the Minister immediately after their temporary appointment regarding two of these officers with whose qualifications and previous history in the Public Service I had sufficient acquaintance to enable me to form a judgment as to their probable value in this Department, I shall, after a year's experience of their work, content myself with expressing the opinion that they might with advantage to the reputation and usefulness of this Department, and with a saving to the public funds, be relegated to their former offices with less than half the salaries now received.

Agricultural Societies.

During 1892 more than £10,000 was distributed in subsidies to the 137 agricultural societies existing in New South Wales. This vote has hitherto been distributed through the Colonial Secretary's Department, but will in future be controlled by this Department.

I regret to have to report that many of these societies are doing very little educational work, and are, therefore, unworthy of the aid received from the State. The total grant might, I think, be reduced with advantage to one-half, and some stringent rules adopted to regulate its distribution—somewhat on the lines I have already twice submitted to the Minister. With a reduced subsidy and strict supervision of the distribution of this vote, the number of societies would soon be reduced to fifty, and no loss would probably ensue to the higher interests of agricultural education.

During the past thirteen years the Agricultural Societies of New South Wales have received £186,679 in annual grants, and £61,050 in special subsidies.

Mr. J. J. Fitzgerald has visited about thirty of the shows held during 1892, and has furnished reports on the same, which have been generally too meagre and superficial to be of much use either to the societies or to the Department.

I should be glad to see this important work entrusted to an officer of high intelligence and with special knowledge of the duties required. He should have practical acquaintance with the interior workings of agricultural societies, should be able to examine their books and analyse their balance-sheets, and should be strong enough to advise the Minister and to inspire the societies with respect.

With judicious rules for the committee's guidance and an able, zealous, and fearless officer to co-operate with the committees, to see that the rules are carried out, and to represent the Department at shows, the whole of the surviving societies might be made as useful and as educational as the best of them now are.

During 1892 the excellent societies at Wagga Wagga and Bathurst took steps to have monthly meetings of their members, for the purposes of mutual instruction.

I trust that the Minister will in future insist on no subsidy being given to any society that is content with only holding an annual show, and allows its members no other opportunities of meeting and comparing notes on the many points of interest to their district and their own farms.

Collectors.

Messrs. R. Helms and A. Lea, the collectors of the Department, have done very useful work in collecting specimens of insects, plants, and fungi for the use of the scientific staff. Mr. Helms has visited the southern district of the Colony, in which he made large collections of our native grasses; inspected all the principal orchards to discover which were infested with codling moth, and to advise the owners as to remedial measures for this and other insect and fungus pests; and generally made observations on the life history and habits of all insects of economic importance that came under his notice. He has also given special attention, under Dr. Cobb's direction, to the peculiar disease among bees that has caused so much loss during the past season. Mr. Helms has shown considerable aptitude for this work, and has been of great service in supplying the scientific experts with suitable material for their work. Mr. Lea has devoted his attention principally to observations of the insects friendly to agriculturists,—either as parasites or predaceous on our insect foes. He has, by means of his practical work in the field, and his enthusiasm in this line of work, discovered a great many predaceous and parasitic insects that do good service in keeping injurious insects in check, and his original work in this direction will bring credit alike to this Department and to himself. He has spent a considerable time in investigating the insect pests of the tobacco plant, particularly on the farm of Mr. Thos. Wall, at Woolomin, where he has been able to indicate and successfully initiate a course of treatment by means of spraying which has given great satisfaction to Mr. Wall. Such investigations as these can only be carried out by specially trained men, and at the expense of the State or some scientific society; and as Mr. Lea has given up his previous calling in order to devote his life to this work, it is to be hoped that it will be possible to carry it on with some of the valuable results, from a practical point of view, that have attended the labours of the large Entomological Staff of the United States Department of Agriculture.

Codling Moth.

Messrs. L. Shepherd and T. G. Treseder were appointed *pro tempore* to give special instructions to our fruit-growers in the best method of dealing with the codling moth in particular, and other insect and fungus pests in general. Mr. Shepherd visited the fruit-growing centres in the southern and south-western districts of the Colony, and gave practical demonstrations in mixing and applying with the Climax Spray-pump Paris Green, Bordeaux Mixture, and resin and soda wash.

Mr. Treseder did the same in the northern and western districts. Due notice was given through the local Agricultural Societies and newspapers, and an opportunity was thus afforded to almost every fruit-grower in New South Wales to get the best kind of instruction in recognising and dealing with the most common pests of his orchard.

The results have been very encouraging, as has been shown by the large demand for spray-pumps reported to the Department.

Pomological

Pomological Committee.

The Pomological Committee referred to in my last report has been appointed by the Minister, and consists of Messrs. R. Scobie, M.P. (West Maitland), G. F. Barnes, M.P. (Cootamundra), E. Whitaker (Secretary, Fruitgrowers' Union), Jas. Morgan (Goulburn), C. W. Mills (Dundas), T. Reedy (Camden), the Director of Agriculture, and the Fruit Expert of the Department (Mr. A. H. Benson).

The Committee met every fortnight during the fruit season, and gave a deal of attention to the nomenclature of the fruit of the Colony—a subject of great importance to nurserymen and orchardists. They have been able to identify a large number of varieties of fruit submitted to them from all parts of the Colony, and have taken steps to describe and name all seedling fruits which have been placed under their observation. If the Committee are able to describe, name, and classify the principal varieties of fruit grown here, and to give certificates of merit to all valuable new varieties, after due trial, they will be laying a good foundation for a Pomological Society for New South Wales, similar to the Royal Horticultural Society of London, and their honorary labours will deserve the gratitude of all fruit-growers in Australia. The Committee has also supervised the Department's experiments with the cold storage of fruit. Oranges, peaches, plums, apricots, mandarins, apples, pears, and passion fruit, have been stored in the cold chambers of Messrs. F. and W. Hudson, where the range of temperature has been noted every day, and the condition of the fruit frequently noted by the Fruit Expert. His final reports, as published in the *Agricultural Gazette*, will, I believe, throw some light on this important question.

As opportunity has offered, typical specimens of our fruit have been modelled and added to the Department's collection, which will in this way gradually become very complete, and of distinct value for reference purposes.

Mr. F. W. Ward's valuable pamphlet on the English market for New South Wales fruit was issued during 1892 to the number of 2,000, and created great interest both in this Colony and in Victoria.

This Department has done its utmost to educate our fruit-growers on this vital question, and when the time is ripe for exportation of fruit on a large scale, private enterprise will doubtless be ready to undertake the matter. In order to test the relative values of cork-dust and kiln-dried cedar sawdust as packing materials—the freight from Spain making the former rather expensive—five barrels of grapes packed in each material were sent to London by this Department. We also imported a barrel of Almerian grapes packed in Spain for the London market, which arrived on Christmas Eve in excellent condition, and were distributed amongst the principal grape-growing districts to furnish an object lesson in the art of packing grapes for export. There can be little doubt that when the initial difficulties have been overcome, there will be a large export trade in fruit, a trade which will help to prevent local gluts, and to establish the fruit-growing industry on a more stable foundation than at present.

The Department has introduced to the notice of the fruit-growers the most approved spray-pumps and pruning saws from California, to the distinct advantage both of the growers and of the importers.

New Seeds and Plants.

The policy of importing and distributing new varieties of seed for trial has been continued during 1892. Mr. Valder has sent out, under the direction of the Botanist, 13,235 packets of seeds, plants, and cuttings to 3,182 applicants. Amongst the seeds were the mung-bean, chick-pea, rice (upland and swamp), sugar beet, teosinte, gram (*Dolichos biflorus*), sixty-five new varieties of wheat, Caragua maize, sorghums, and native grasses, also new varieties of sugar-cane from Florida (U.S.) and Mauritius, tea plants from Ceylon, and varieties of figs from Smyrna.

Mr. Valder has shown his enthusiasm for this branch of our work by cultivating small plots of many of these new commercial crops as well as some new varieties of vegetables deemed worthy of trial and has presented reports on the results in the Department's *Gazette*.

Chicago Exhibition.

The Commissioner of the Chicago Exhibition asked for this Department's assistance in securing suitable agricultural exhibits for the show. We secured excellent samples of different varieties of wheat, weighing 66 to 69½ lb. per bushel, and of peas, oats, maize, dried fruit, tobacco, and sorghum. We also sent, from the Department's herbarium, a unique exhibit of fifty native grasses and salt bushes suitably mounted and fully described in the catalogue.

Humble Bees.

Following the example of New Zealand, which has successfully introduced humble bees, and has thus secured the fertilisation of the red clover, thus becoming large exporters instead of importers of the seed of that valuable fodder, we have introduced from that island 200 fertilised Queens at an average cost of 1s. each. Half of this number arrived alive and were distributed as widely as possible throughout the Colony, near Tenterfield, Bodalla, Bathurst, Maitland, Penrith, Richmond River, and in the Botanic Gardens and Centennial Park.

Departmental Exhibits at Shows.

An effort has been made to bring the work of the Department under the notice of the farming community by means of small exhibits at the various agricultural shows. At the Metropolitan show a special exhibit was prepared, including a complete stool of each of about 375 wheats grown by Mr. W. Farrer at Queanbeyan; a large collection of native grasses, mounted and named; 300 fruit models, named; a large number of insects of economic interest—both friendly and injurious; and the different spray-pumps recommended by the Department. This exhibit was of great value to many farmers and fruit-growers who carefully studied it, and gained a special award from the Judge. We have sent to the country shows a collection of grasses, a small case of fruit models, and two cases of the most important insects—friends and foes. I can safely assert that thousands of persons have received useful information and valuable hints from these exhibits.

Library.

Library.

The library of the Department has been increased by the receipt of several hundreds of reports and bulletins from Great Britain, Germany, France, and America. Many of those from the agricultural departments, the colleges, and experimental stations in the last country have been specially valuable to us, and have been sent, it is gratifying to note, principally in exchange for our *Gazette*, which is much valued by the leading agricultural experts in America.

All the principal agricultural journals and papers published in Great Britain, America, and Australasia are received in exchange for the *Gazette*, so that our library is gradually becoming very valuable for reference purposes to all the experts of the Department.

Necessities of the Department.

Although I am aware that the present is not a convenient time for initiating any new agencies that will cost much money, I would venture to indicate a few matters that should engage the attention of this Department for the sake of the class in whose interests it exists:—

1. A few experimental stations as the forerunners of large experimental farms combined with agricultural schools, to be started in say four districts totally distinct from each other in climatic conditions. The cost of these need not exceed £1,000 a year each, and they might now well take the place of national prizes or other less useful agencies.
2. A Fruit Pests Bill to give the fruit-growers in the respective districts power to deal with the codling moth and other insect pests as well as fungus diseases that now cause so much loss to the Colony, often through the culpable negligence of a few men who allow their gardens to become active centres from which to spread these diseases to their neighbours, who may have done everything possible to keep their own orchards clean.
3. Workshops and gardens for the scientific experts in which the Pathologist may study the fungus diseases on their host plants, and practically try the likely remedies; where the Entomologist may study under favourable conditions the life history of the different insects, and experiment with the preparations he proposes to recommend for general use; and where the Botanist can grow small plots of new crops and conduct other experiments of value to agriculture. By these means the usefulness of the scientific staff would be much increased, and these officers would have the much desired opportunity of showing the teachings of science applied to practice.
4. These facilities might be easily provided at a school of horticulture which is necessary for the education of our fruit-growers and gardeners. The course of instruction for such a school should be quite distinct from that of the Agricultural College, though, for economy's sake, it might be worked together with that institution. It would, however, be preferable for many reasons to have it within easy distance of Sydney, and I know of no better available site than 30 acres of the ironbark ridge in the Rookwood reserve. There is already an orchard planted there, and the Colonial Secretary's Department has been asked to allow this Department to have the use of this orchard for experiments with fungicides and insecticides—the trees presenting abundant opportunities for doing good work in that direction. With little expense a school of horticulture and experimental gardens might be established here without interfering with the main object of the reserve and buildings thereon.
5. Regulations for the guidance of agricultural societies, to provide for the proper distribution of the large annual vote to them, and to secure the best possible results therefrom. The Minister would probably get much assistance and valuable information by inviting a delegate from each society to meet him in conference, as was done in 1890, with advantage alike to the Department and the societies.

Cost of Department.

In view of the statements sometimes made criticising the expense of this Department, I submit herewith—(a) a statement showing the amounts of the votes for 1890, 1891, and 1892, spent up to 21st April, 1893, and showing in what principal directions the money has gone; (b) a statement, compiled from figures supplied by the Principal, showing how much money has been spent on the College—both from loan votes and consolidated revenue, and how it has been expended; (c) a few figures showing the amounts voted for agricultural education in the United States and France—the two countries in which the State gives the most direct encouragement to agriculture.

The vote for this Department for 1890 was £15,000, of which £8,534 15s 2d. was spent; for 1891, £29,900, of which £19,955 5s. 5d. was expended, including £2,005 6s. spent by the Vine Diseases Board; for 1892, £70,100, of which £31,180 5s. 4d. was spent up to 27th April, 1893 (including £2,500 by the Vine Diseases Board).

In conclusion, I have much pleasure in reporting that the whole of the Permanent Staff—scientific and clerical—have discharged their respective duties with zeal and intelligence, and are worthy of the Minister's best respect and confidence.

The Department is, I confidently believe, generally fulfilling the duties expected of it, and is earning the respect and goodwill of the agriculturists of New South Wales, who now freely consult us on the many problems that are constantly arising in their daily work, and whose satisfaction and gratitude are to be found amply expressed in many hundreds of letters now recorded in this Department.

HENRY C. L. ANDERSON,
Director of Agriculture.

					£673,540	14	7

In addition to the amount of £151,666 13s. 4d. granted by the National Government as subsidies to experimental stations, the various State Governments also contribute about £47,000 per annum. There are forty-six of these principal agricultural colleges and experimental stations and fourteen subsidiary ones. The number of principal agricultural professors and investigators employed in these institutions is 543. There are besides in many of the States, State Boards of Agriculture.

FRANCE.

In 1889, the France Government, on behalf of agriculture, expended for agricultural colleges and schools, shows, subsidies to agricultural societies, encouragements or rewards for successful experiments in agriculture, premiums or bounties, &c., the sum of £347,071 0s. 10d. In this country there are the following state agricultural institutions:—

Agricultural, scientific, and practical schools for teaching the various branches.....	62
Investigating and experimental institutions of various kinds	47

Agricultural instruction is also given in establishments for general or university education as follows:—There are ninety-five professorships and chairs in agriculture and agricultural chemistry; fifteen agricultural courses in colleges and higher elementary schools; agricultural courses in all normal schools; and obligatory instruction in the elementary schools.

NEW SOUTH WALES.

VINE DISEASES ACT.

(REGULATION UNDER.)

Presented to Parliament, pursuant to Act 56 Vic. No. 22, sec. 52.

Department of Mines and Agriculture,
Sydney, 1st September, 1893.

VINE DISEASES ACT, 56 VIC. No. 22.

PURSUANT to the provisions of the Act 56 Victoria No. 22, section 52, the Governor, with the advice of the Executive Council, hereby makes the following Regulation:—

For the purposes of the first election of members of the Board of any Vine District proclaimed under the Act aforesaid, each vine-grower, whose name and address shall, after revision, appear on the list of vine-growers of any such district, shall be entitled to one vote at the first election as aforesaid within the district to which such list refers.

T. M. SLATTERY.

1893.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

NATIONAL PARK TRUST.

(REPORT OF TRUSTEES FROM 1ST JANUARY TO 31ST DECEMBER, 1892.)

Ordered by the Legislative Assembly to be printed, 18 October, 1893.

The Trustees of the National Park Trust to The Chief Secretary.

National Park Trust Office, 3, O'Connell-street, Sydney, 30 September, 1893.

Sir,

The Trustees of the National Park have the honor to present you with an Annual Report of their operations from the 1st January to 31st December, 1892.

During the year the following alteration in Trust has been made, viz. :—Sir Julian Salomons, Kt., Alteration in Trust. Q.C., was appointed Trustee in place of Mr. Abigail.

It is gratifying for the Trustees to record and bear testimony to the great interest exhibited by the public in the Park, the increase in the number of visitors having exceeded that of previous years by some thousands. Increase of visitors to Park.

The number of visitors to the Park, as shown by the Caretaker's books for the year, was 25,258, exclusive of those going *via* Waterfall, which may be estimated at half this amount.

The additional accommodation provided by the extension of the building at Audley has greatly added to the convenience and comfort of visitors and tourists. During the summer season the rooms are nearly always occupied, and all available means are used by the Trustees to enhance the enjoyment of the public in this attractive holiday resort, their efforts being stimulated by the unrivalled natural advantages by which the Park is surrounded. Additional accommodation and extension of building at Audley.

The preservation of the flora continues to be made a special feature. The rules for prohibiting shooting are being strictly enforced, as the increase of the native birds will doubtless prove a great boon and attraction for future generations, and rangers have been appointed to prevent persons taking plants from the Park. Flora and fauna.

In addition to this, great vigilance has been exercised in preserving the fish for the recreation of anglers. At the request of the Trustees the Government were induced to offer a reward of £50 for the apprehension and conviction of anyone exploding dynamite or any explosive substance for destroying or taking fish in Port Hacking, and notices were posted at Burraneer Bay, Simpson's Wharf, Public Wharf Jibbon, Lillipilli, Warumbul, South West Arm, Ewey Bay, Deer Park, and other conspicuous places. Means used for preventing destruction of fish by dynamite.

The principal works carried out during the year are as follows :—

This road has been regravelled from Loftus to Bees' Nest, and put in a good state of repair. A new road or deviation has been made from the Bees' Nest to Audley to obviate the steep and dangerous grades of the old route as formerly used. Loftus and Audley Road.

This road has been well maintained. The bridges and culverts have been stripped and redecked with new timber. Lady Carrington Road.

Mile-stones have been placed on the main roads for guidance of pedestrians and travellers through the Park.

A portion of the dam at Audley has been stone-pitched the full width, thus preventing the flood-waters from washing or injuring the roadway. Dams.

The causeway at the waterfall crossing has been thoroughly strengthened; the approaches at each end were formed and ballasted.

Two stone troughs have been made and placed about half-way on the Lady Carrington Road, where there is a permanent spring of water, called the Jersey Springs, affording a great boon to tourists and others. The road in this locality has been widened so that vehicles can now pass or turn. Jersey Springs A

Warumbul.

A commodious cottage has been erected and furnished for the convenience of anglers and others at Warumbul, situated on the banks of the picturesque Port Hacking River. It has been largely availed of by the public. The ground has been cleared and planted with ornamental shrubs, and enclosed with a substantial fence. A roadway has also been made, enabling parties to drive to this favourite fishing ground if preferred, thus giving them the choice of proceeding by land or water.

Deer park.

A building has been erected at Point Danger, near Wentworth Hut, for the residence of the keeper. There is a charming outlook at this locality. It is satisfactory to report the deer continue to thrive and increase in numbers.

Erection of cottages.

Three other cottages have been erected in the Park for the employees.

Land clearing between Loftus and Sutherland and Farnell Downs.

About 200 acres of land have been scrubbed and cleared on Farnell Downs, between Loftus and Sutherland, thereby encouraging the growth of grass and affording greater facilities for recreation purposes.

Tree planting.

A great number of red cedar catapla oaks, Moreton Bay figs, lillipilli, mulberry, and other trees, received from the Director of Botanic Gardens and the Forestry Department, have been planted in suitable parts of the Park. About 300 fruit and berry producing trees have also been planted, which will give food and encourage the increase of Australian birds, and others being acclimatised.

Guide-book.

The Trustees have published an elaborate and comprehensive guide-book, embellished with photographic views, &c., giving most interesting particulars of the Park, with its facilities for securing enjoyment and recreation of the public.

The Trustees, in concluding this Report, desire to thank the Parliament for the liberality bestowed on this great national reserve, and trust that, as the number of visitors has so greatly increased, a more adequate grant may be given in future to enable the Trustees to maintain the improvements made, also to carry out further necessary works to meet growing requirements and to make the National Park, with its magnificent area and unbounded resources, one of the chief attractions of the community.

We have, &c.,

JOSEPH GRAHAM,
Chairman.

NEW SOUTH WALES.

LANDS FOR PUBLIC PURPOSES ACQUISITION ACT.

(RESUMPTION OF LAND FOR PUBLIC RECREATION GROUND AT CAPTAIN'S FLAT.)

Presented to Parliament, pursuant to Act 44 Vic. No. 16.

NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable Sir ROBERT WILLIAM
DUFF, a Member of Her Majesty's Most
(L.S.) } Honourable Privy Council, a Knight
Grand Cross of the Most Distinguished
Order of Saint Michael and Saint George,
R. W. DUFF, } Governor and Commander-in-Chief
Governor. } of the Colony of New South Wales and its
Dependencies.

WHEREAS I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the establishment and construction of a Public Recreation Ground at Captain's Flat, in the said Colony, for and towards the completion of which said works public funds are lawfully available: And whereas the land described in the Schedule hereto is required for the construction of the said works: Now, I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do, by this notification, to be published in the Government Gazette and in one or more newspapers published or circulated in the Police District wherein the said land is situated, declare that the Crown Land comprised within the description set forth in the Schedule hereto has been appropriated, and the private property within such description has been resumed, for the public purpose hereinafter mentioned, that is to say, for and in connection with the construction of a Public Recreation Ground at Captain's Flat, to the intent that upon the publication of this notification in the Gazette, the legal estate in the said land shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the

purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interest, contracts, charges, rates rights-of-way, or other easements whatsoever; and to the intent, further, that the legal estate therein together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a Trustee; and I declare that the following is the Schedule of the land hereinbefore referred to:—

SCHEDULE.

All that piece or parcel of land situate near the town of Captain's Flat, parish of Ballallaba, county of Murray, and Colony of New South Wales: Commencing at a point on the western side of a road from Foxlow to Captain's Flat bearing north 8 degrees 45 minutes east and distant 4 chains 72 links from the south-west corner of measured portion No. 3 in said parish; and bounded thence on the south-east by the western side of that road aforesaid bearing north 8 degrees 45 minutes east 7 chains 50 links; thence on the north-east by a line bearing north 81 degrees 15 minutes west 7 chains 54 links to the right bank of the Molonglo River; thence on the west by that bank of that river upwards to a point bearing north 81 degrees 15 minutes west from the point of commencement; and thence on the south-west by a line bearing south 81 degrees 15 minutes east 4 chains 12½ links, to the point of commencement,—containing 4 acres 3 roods 11 perches.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-fourth day of June, in the year of our Lord one thousand eight hundred and ninety-three, and in the fifty-seventh year of Her Majesty's Reign.

By His Excellency's Command,

WILLIAM JOHN LYNE.

GOD SAVE THE QUEEN!

1893.

NEW SOUTH WALES.

FISHERIES OF THE COLONY.

(REPORT OF THE COMMISSIONERS OF FISHERIES FOR THE YEAR ENDING 31ST DECEMBER, 1892.)

Presented to Parliament by Command.

REPORT of the Commissioners of Fisheries for New South Wales on the Fisheries of the Colony, for the year ending the 31st December, 1892.

The Commissioners of Fisheries to The Colonial Secretary.

Sir,

We have the honor to submit our report on the Fisheries of the Colony for the year 1892. The composition of the Fisheries Board continues unchanged, Dr. James C. Cox, the President, and Dr. Edward Pierson Ramsay, whose terms of office expired in October last, having been reappointed.

Finance.

The revenue shows a decrease of £370 7s. 4d., due to the falling off in the number of applications for oyster culture leases, and the failure of the lessees to pay up accrued rent. This matter of rent arrear has been receiving our attention, and proceedings are being instituted by the Crown Law officers against defaulters.

The amount received for Fishermen's and Fishing-boat licenses exceeds by £145 5s. the sum paid in 1891.

In expenditure we have effected a saving of £193 8s. 11d., principally through the retirement of Mr. Delany, a temporary clerk, whose position we decided not to refill, and the employment of only nine out of the ten Acting Assistant Inspectors of Fisheries provided for on the Estimates.

Official Staff.

The following changes have occurred in the staff. Mr. John D. Delany, above referred to, a temporary assistant clerk, found it necessary to retire owing to failing health. Mr. Thomas Radcliffe having been appointed the Pilot at the Bellinger River in the place of Mr. Thomas Stewart, has succeeded him also as Acting Assistant Inspector of Fisheries; in like manner, Mr. P. S. Newton has been appointed Acting Assistant Inspector of Fisheries at Twofold Bay in the room of Captain Bourne Russell, resigned, and Mr. John Cain who had shown a fitness for the work has been appointed to a similar position at Brisbane Water.

It will be remembered that in our previous report we intimated our intention to invite one or two of the leading residents in the Bungendore district to assume the honorary supervision of the Fisheries at Lake George. We have now the pleasure to report that the oversight of this important Fishery has been accepted by Nathaniel Powell and Patrick Osborne, Esquires, of Turallo and Currandooly, respectively. The oversight of the Fisheries at Narrabeen and Deewhy Lagoons, near Manly, and the Upper George's River, near Liverpool, have in like manner been respectively assumed by Messrs. Paget Bayly and William Learoyd.

If we can succeed in extending this plan of fisheries supervision by inducing private gentlemen to accept honorary positions as acting inspectors of fisheries existing in their own immediate neighbourhood, we shall effect a considerable saving in the cost of administering the Department.

Considerable vigilance has been observed by some of the Inspectors in order to secure due compliance with the Fisheries Laws. During the year prosecutions were instituted against eighty-one offenders; in seventy-six instances convictions were obtained, and in seventeen the nets were confiscated. The total amount of the fines inflicted, not including costs of Court, was £96.

Oysters.

We report an improvement in the supply; the number of bags won from the beds and deposits in our waters has totalled 7,428, being an increase of 2,701 bags upon the number taken last year, while the quantity imported has been 12,751 bags, being 3,945 less than the number received in the Colony in 1891. Of the total quantity thus brought into consumption, 8,258 bags came from Queensland and 8,438 from New Zealand.

We note with satisfaction that the increase in the supply from some of the principal of our own waters is not the result of undue working of the leased beds; the policy of the few lessees who have undertaken *bonâ fide* work has been towards the conservation of their stock; it would have been quite possible for them to have placed upon the market a sufficient quantity to throw out the imported article altogether; the adoption, however, of the more judicious course of husbanding their supplies for future use is to be commended.

The supply has been general from all the rivers; the Clarence River tops the list with 1,716 bags, the next highest winning being 949 bags from the Manning River; from Cape Hawke have come 762 bags; from Port Stephens, 464 bags; from the Hawkesbury River, 688 bags; from Camden Haven, 474 bags, and from other waters in lesser quantities. Reports from some of the local fisheries inspectors unfortunately show that these returns do not altogether represent the results of *bonâ fide* oyster-farming; much of this supply, notably that from the Hawkesbury River, so far from being the produce of leased areas consists mostly of oysters stolen from unleased foreshores, which are Crown property. We represented this matter of oyster thieving in our previous report and we regret that the practice is not by any means on the decrease; the Oyster Fisheries Act in this particular is so defective that it becomes next to impossible to secure the punishment of offenders. In the system proposed in the Bill to regulate the fisheries which we have had the honor to submit to you we think an effective cure for this evil is provided.

We record as unusually interesting a circumstance which has been reported to us by Mr. A. Ross, an ostreiculturist on the Clarence River, relating to the spawning of oysters. Mr. Ross states that about noon on the 29th February, just after the tide began to ebb the oysters spawned, the evidence thereof being that in fifteen minutes the dredges, culling tables, platforms, &c., had assumed an appearance as if milk had been spilt upon them; the occurrence was general and simultaneous along the channel; all the oysters, large and small, appeared to have spawned within the hour. Mr. Ross who gained experience from a similar occurrence in 1886 states, he expected the spatting owing to the unusual difficulty he had found during the previous week in opening the oysters. The Local Inspector made an examination of the beds some time subsequently and found a considerable set of spawn on the lower leases; spat of $\frac{1}{2}$ inch diameter could be plainly seen.

The applications for leases of foreshore for oyster culture embrace a total of only 3,550 yards, being 2,975 yards less than were applied for in 1891. This decrease we attribute, as we did the decrease in 1891, to the uncertainty which has attended previous efforts at oyster-farming owing to the prevalence of the worm disease and the defective nature of the legislation which governs this industry; possibly when the improvement in the state of some of the fisheries becomes known and the long desired legislation has been effected, the public will regard this industry with somewhat more of favour.

Fish Acclimatisation.

We are indebted to our friends, the Acclimatisation Society at Wellington, New Zealand, for a large consignment of trout ova—34,000—supplied to us at the bare cost of collection; it arrived here on the 29th July, in excellent order, only a small percentage of the eggs having died in transit. Mr. Rutherford, the honorary secretary of the Society, informed us that the ova had been taken from exceptionally fine stream fish, and he anticipated an unusually healthy progeny; the ova was duly placed in the troughs in the rear premises of this Department where it hatched out quickly; the distribution was made as general as possible, indeed there is now scarcely a stream of any note in the Colony within available reach in which some of the fry has not been placed. We hope that these repeated efforts of ours to introduce this choice fish into New South Wales waters will prove ultimately successful. Appended to this report is a schedule enumerating the distribution we have effected.

The Fishing Industry.

The amount realised from the sale of fish at the market is £38,174 3s. 3d., being £4,103 9s. 6d. amount less than recorded for the previous twelve months; the quantity of fish taken has also decreased in proportion. We quote 50,473 baskets received at the Eastern Fish Market as against a total of 60,869 baskets in 1891. Of schnapper there is a decrease of 344 dozens; of mixed fish, particulars of which are fully detailed in the Appendices, 57,160 dozens were brought to sale; of prawns we note a decrease of 213 baskets.

In

In cray-fish, an increase of 434 $\frac{3}{4}$ dozens. The Fisheries Inspector at Port Stephens from whence the largest portion of the supply is received is not hopeful as regards the yield for the future. He reports that the fishery is declining, and that scarcely any of the fish are captured nearer the port than Hannah Bay on the south and Broughton Islands on the north. The cray-fish is not included in the protective provisions of the Fisheries Act, so that we are unable to place any bar upon its capture at present. In the Fisheries Bill before referred to this omission has been rectified.

The order of supply of fish in baskets from the various waters is as follows:—Lake Macquarie takes as usual premier position with 15,494 baskets; Botany, 5,000 baskets; the Harbour, 4,804 baskets; Lake Illawarra, 4,450 baskets; Tuggerah Lakes, 3,918 baskets; Broken Bay, 3,087 baskets; Hawkesbury River, 3,076 baskets; Port Stephens, 2,844 baskets, and Shoalhaven, 2,405 baskets. All the remaining waters along the coast have contributed though of course in lesser proportions. A tabulation showing the annual returns of fish from these principal waters since 1889 appears in the Appendices.

The Inspector at the Clarence River reports a decline in the export of fish, while the quantity locally consumed had increased.

The Iluka Fish Canning Company's business has not, he states, realised expectations; the quantity, mostly mullet, treated at the works was only 300 baskets. This establishment has, it is understood, changed hands; the new proprietors have our earnest wishes for success. In this connection we notice that a kindred establishment at Cape Hawke has closed; when it was in operation it gave employment to thirty persons.

In the Hawkesbury River the fish supply has been satisfactory. Great complaint is made by the Inspector of the destruction caused by the use of garfish-nets in the upper waters, where garfish scarcely ever come. While deploring this use of these nets for general hauling purposes we are unable under the existing laws to prevent the practice.

Narrabeen and other lagoons in the vicinity of Manly have been most carefully supervised by Mr. Paget-Bayly, honorary inspector. Mr. Bayly has exhibited the greatest possible interest in the duties he has voluntarily undertaken, and we record our thanks for his valuable assistance; his report on these fisheries will be found amongst the Appendices.

In George's River the continued rain in the early part of the year drove large quantities of fish out of the upper closed waters, the line fishermen lower down the river reaping a large harvest in consequence; the Inspector records that one boat's crew captured twenty-seven dozens of whiting in one afternoon. Since May the fish supply has steadily increased. The mullet began to move towards the sea in November, and continued its migration during December; since that month the run of the fish was lost, but during the latter end of the month two very large shoals were observed off the mouth of the river; it is assumed they were about to travel.

The Upper George's River near Liverpool, has had the advantage of the oversight of the honorary inspector, Mr. William E. Learoyd. It will be seen from Mr. Learoyd's report in the Appendices that he has camped on different points of the river for a day or two at a time and has cautioned the fishermen against attempting infringements of the Fisheries Laws; he states that the river is swarming with fish which are now readily captured within a very short distance of the dam at Liverpool.

The Macleay River fisheries show improvement; 1,573 baskets were sent thence to Sydney, being the winnings of sixteen men with eight boats. In passing, we remark that an attempt to plant oysters on this river proved a failure, the flood water comes down in such volume that it destroys not only oysters but even the cobra on the leading buoys.

In the Manning River the fish supply continues very small; only 233 baskets reached the market; only two shoals of mullet, and very small ones too, made their appearance at Harrington Heads, but did not enter the river.

At Cape Hawke 960 baskets were obtained.

The Port Stephen's fishery still keeps up its supply, showing an increase of 739 baskets, but a large proportion of this quantity did not reach the Eastern Fish market; bream and whiting from Smith's Lake have largely contributed to the total sent hence.

The catch in the Hunter River has been considerably affected by the floods, which on several occasions drove the fish to sea. In November and December fish were more plentiful in the lower part of the river than has been the case for years past.

Lake Macquarie continues to hold its premier position, having as usual been the largest contributor. The Inspector reports that two fishermen occupied one haul from April to June, during which time, eleven weeks, they secured 1,100 baskets which produced a net yield of over £600. A great drawback to this fishery is the prevalence of jelly-fish which interferes considerably with net-hauling.

In

In Tuggerah Lakes the supply during the first half of the year was unusually good; later on the jelly-fish increased to such an extent that the fishermen were obliged to leave. There is a small smoking establishment on this fishery, at which during the year about 260 baskets of fish were cured and sent to market; the quality of the article cured here is unusually excellent.

In Brisbane Water the supply has been plentiful; the first sea mullet arrived early in April, and shoals continued to enter until the middle of June.

Narrabeen Lake, between Manly and Pitt Water, is essentially a breeding ground, and as it is very industriously supervised by the honorary inspector, Mr. Paget-Bayley, it teems with fish. It is really essential that this watershould be closed permanently against net-fishing, but under the existing fisheries laws this cannot be done; the result is that during the short term in which under the law it has to be left open to netters, the good effected by previous conservation is very much marred.

Lake Illawarra, on the south, corresponds in position and comparatively in importance to Lake Macquarie in the north. The Inspector reports an increase of 3,547 baskets over the quantity taken in 1891; he attributes this in a measure to the channel at the entrance being wider and deeper than usual, thus giving the fish better means of access from lake to sea; deep sea fishing has been carried on to a small extent, and cray-fish are reported to be plentiful amongst the reefs around the Five Islands, but so far no attempt has been made to capture them. Should the forebodings of the Inspector at Port Stephens become realised we shall probably have to look to the Five Islands Reefs for the future supply.

Inland Waters Fisheries.

The quantity of fish exported to Victoria was 30,092 lb. via Moama, and 26,600 lb. via Koondrook, making a total of 56,692 lb. or over 25 tons, but fish, of which account cannot be obtained, are sent via Bama, Tocumwal, Colram, Yarrawonga, Corowa and other points along the Murray River. It is thought that 120 tons would not be too high an estimate of the weight of fish captured and exported besides the quantity destroyed in the nets and fish-boxes through long confinement and overcrowding. Both Inspectors Wilshire and Manton have been using their best efforts in protecting these fisheries, but they continue to be placed at great disadvantage by fishermen on the Victorian side of the river, who being outside the jurisdiction of New South Wales are in a position to infringe the law almost at pleasure, and they do so with impunity. The matter is one which might, and we trust will, engage the attention of the Victorian Government; indeed, a Committee from the Legislative Assembly of Victoria has taken the question up. The Committee held sittings at Echuca, and the witnesses examined were unanimous in their opinion that Victoria should aid our Government in affording efficient protection to these important and extensive fisheries.

At the instance of residents we have felt ourselves warranted in recommending the closure against the use of fishing-nets of some parts of the Murray and Murrumbidgee Rivers. In Lake George we have, on the suggestion of the gentlemen who have been good enough to undertake the supervision of this fishery, removed the closure of Deep Creek against net-fishing. They reported that but little fishing is being done there, and that the closure was unnecessary.

In bringing our report to a close, and inviting perusal of the reports and tabulations in the Appendices, which latter are presented in a more than usually detailed shape, we once more express the hope that at no distant date Parliament will be afforded an opportunity of enacting the legislation so much needed for our all important fisheries.

The Commissioners regret to find that the Bill they submitted for the regulation of our Fisheries has not yet been laid before Parliament.

JAMES C. COX, M.D.,
President, Fisheries Commission.

APPENDICES.

COMMISSIONERS of Fisheries for New South Wales, 1892 :—

James C. Cox, M.D., President.

E. P. Ramsay, F.R.S.E., LL.D., &c.,
Jas. R. Hill, Esq.,S. H. Hyam, Esq.,

FISHERIES INSPECTORS' REPORTS.

Tweed River Fisheries.

31 December, 1892.

FISH have been plentiful in the river. At one time there were four fishermen at work, but subsequently two of them gave up as they could not make a living. The two took fish up the river twice a week, viz., Monday and Thursday nights, but barely made a living.

Sea-mullet have been very plentiful in the Terranora waters, though but few went up the main river; they were not seen either coming in or going out, but were plentiful in the lower river from the beginning of March to the end of July.

Schnapper were plentiful at the reefs off Point Danger and Cook's Island; the tug was out several times, and as many as 400 and 500 schnapper, besides a few of groper, red rockcod, and kingfish, were caught, each time, in a few hours. Two of the fishermen went off to Cook's Island in a small boat, on several occasions, and made good catches.

Oysters.

There was very little spawn seen last year. About half of the oyster leases have been destroyed either by mud or by having been worked too bare some years back, the others are in good condition. There are a quantity of good marketable oysters on them, but as spat adhered to them in 1891, the lessees decided not to disturb them, the spat is growing well, lessees do not intend dredging for some months yet. There were no oysters dredged here all the past year.

Eighty-nine bags of spat have been laid down on the leases.

There is no sign of the worm or mud disease.

WILLIAM M'GREGOR,

Acting-Assistant Inspector of Fisheries.

Richmond River Fisheries.

31 December, 1892.

ALTHOUGH a fairly good lot of young oysters were visible on most of the oyster-beds on this Fishery during the early part of the year—yet for some reason which I am at a loss to understand at present they have made very poor growth, the output this season will fall short of last seasons take, notwithstanding that one or two lessees, who have been spelling their beds have signified their intention of working. The oysters were reported as spawning in November, but owing to the very heavy rains which were experienced about that time, I am afraid that very little, if any, of the spat has survived. The returns furnished me for the year are 544 bags, Sydney market, and locally 101 bags, the local trade seems to be increasing; very little has been doing in the fish line, 435 baskets sent in ice to the Sydney markets, of these 100 baskets were whiting, and the rest bream and mullet. In the local trade the men report that the fish have been exceedingly scarce. Whiting were spawning from September to January Mullet from April to July, and bream from February to March.

R. A. FRASER,

Acting-Assistant Inspector.

Palmer's Island, 22 March, 1892.

I HAVE the honor to inform you that in reference to the report that the oystermen made to me that the oysters had spawned during ebb-tide on the 1st instant. I questioned the men particularly on the subject, and they informed me that they were working as usual up till about noon time, and no sign of any spawning took place until the tide turned to run down, when they noticed the oysters were spawning, and they left off working at once.

In order to satisfy myself on this point I have taken particular notice to detect the young oyster as soon as it was discernible, and I now find a moderate spawn has taken place on the lower leases, and a good show of young oysters can be seen, and are about the eighth of an inch in diameter. This spawning took place before the salinity of the water was in any way reduced by the rains, consequently the water was nearly, if not quite, as salt as the ocean.

The temperature of the atmosphere was considerably reduced by the southerly wind which was blowing a few days previous to, and during the spawning, and has continued at short intervals up to the present. At the present time the water at low-tide is quite fresh from the recent rains.

JAS. MASSINGHAM,

Acting-Assistant Inspector of Fisheries.

Clarence River Fisheries.

31 December, 1892.

THE export of fish has not reached the quantity of last year, in fact since the introduction of the system of packing in ice for shipment, the supply of fish in the river has steadily decreased year by year, until now it is no uncommon thing for the fishermen to express their inability to obtain the quantity for which they had received ice to pack. This and the waste of ice during transit, and the arrival in Sydney during the summer months of quantities of fish in a bad state tell very much against the success of net-fishing in the northern rivers. Better developments can scarcely be expected until the ocean steamers are provided with refrigerating chambers, and inland markets established with means of land transit thereto.

The Iluka Canning Company is to be commended for its action in granting to fishermen the use of the wharf at Iluka for a nominal rent, for packing and shipping their fish, the need of which has been so much felt since the steamers ceased to call at the Iluka wharf.

Schnapper-

Schnapper-fishing was carried on during the winter months with a fair amount of success, but owing to the prevalence of southerly weather small boats were not able to proceed to the fishing grounds as usual, the industry was in consequence confined to steamboats, on board of which numbers of pleasure parties availed themselves of the opportunity thus afforded.

The Iluka Canning Company's business has not realised general expectations, but for what reason it would be difficult for me to determine. The establishment, I understand, has recently changed hands, and it is to be hoped the new proprietors will be more successful.

The quantity of fish treated at the works for the few months of the year amounted to 300 baskets of 80 lb. each, chiefly mullet. These fish are by far the most plentiful.

The local consumption has increased during the year, 500 baskets being sent to the various towns on the river, exclusive of large quantities of schnapper, returns of which it is not possible to obtain as large numbers are taken by pleasure parties.

The quantity forwarded in ice to Sydney was 3,024 baskets and 160 dozen schnapper, a portion of these latter were sent to the Fresh Food and Ice Company.

The number of licenses issued to fishermen during the year was forty-one, and for fishing-boats eighteen, three of these were steamboats, and were used exclusively for schnapper-fishing.

For breaches of the Fisheries Act, three fishermen were arraigned, a verdict being obtained in one case, one dismissed, and one charge withdrawn.

During the early part of the year I noticed immense numbers of cormorants in the district, and from numerous observations I found the black and white cormorant for some reason had a preference for the fishes known as the eel-tail catfish and the bullivute, the destruction of these fishes will be hailed with satisfaction by all fishermen. The small black cormorants which congregate in large flocks appear to be the most destructive to young fish.

Oysters.

The condition of the oyster-beds as to quantity of oysters, has fully realised expectations, the upper beds showing remarkable improvement. Up to date there has been forty-three bags of oysters sent to market from off these areas. Considering that no oyster life was visible on these areas for five years previous to the stocking of the reserve in 1890, the experiment may be said to be fairly successful.

No. 560 lease is in the same condition as it was last year, viz., covered in mud. The other leases Nos. 519, 258, 518, 260, 262, 23, and 64 are all showing good crops of mature and immature oysters. The output for the year was 1,642 bags, an excess of 1,122 bags over that of the previous year, indeed the condition and prospects would seem to warrant the assertion that the above number could easily have been doubled. A very considerable increase in the supply of oysters has occurred, a welcome state of things which has been looked forward to, and strange to say the increase has been attended with an unusually limited demand; this, at the present time, is to be regretted, because one of the best beds, which has hitherto contributed the largest supply has, in consequence, scarcely been worked at all; and the worm which has latterly increased so rapidly, has held undisputed possession of this area.

At the present time there is every indication of a flood in the Clarence River, which will materially check the increase of this pest; yet, judging from past experiences on other rivers where the same disease exists, no permanent benefit has accrued from floods, because oysters and worms are, to a certain extent, exterminated, and the one reappears as soon as the other.

Of the public oyster reserves that in the north arm is still unproductive, but that at Yamba fully maintains its reputation, both for quantity and quality of its oysters, which are much appreciated by the public, who, during the summer season, obtain large quantities, and still the supply has continued to increase every year. Now, unfortunately, the worm has increased here also, and is mostly to be found amongst the bottom oysters.

I have not visited any other rivers during the year, therefore cannot give an opinion as to the existence of worm disease, or other matters in connection therewith.

JAS. MASSINGHAM,
Acting-Assistant Inspector of Fisheries.

Macleay River Fisheries.

31 December, 1892.

NET-fishing has been fairly good, although there have been several small floods and freshes in the river and creeks, the waters from which appear to be very injurious to the fish, especially the waters drained from some of the swamps. At the time of floods the water in Kenchela Creek and Belmore River, tributaries of the Macleay, seems to kill the fish, as they can be seen sick and dead floating on the water.

There have been eight fishing-boats, with sixteen men, employed several months in the year, three boats regularly fishing for Sydney market, the others for local consumption.

1,573 baskets have been shipped for Sydney market during the year, principally whiting, silver bream, flathead, and mullet, and a few large jewfish. The local consumption has been about the same as the export.

The sea-mullet came in this river the 21st of March, and kept coming in and going out up to the end of May. The fresh water drove them out on different occasions, which made the season not very profitable to the fishermen.

The oysters are a failure on the Macleay; there seems to be something in the flood-water that kills them; also the cobra that grows on the leading buoys is killed by the same.

I laid down six oyster-beds with the oysters I received from the Department, which were all killed the first flood that came down the river. I think it is useless to attempt cultivating oysters while those wet seasons continue.

J. A. JAMIESON,
Assistant-Inspector of Fisheries.

Nambuccra

Nambuccra River Fisheries.

31 December, 1892.

No oysters have been shipped during the year. The principal bed, 4 miles up the river, has slightly improved. Small oysters of one year's growth can be found on it now; this bed, if improved, would well pay for the trouble of laying down young oysters.

Fish.—The sea-mullet season was the worst I have seen, only one small shoal in June. Several shoals of salmon seen along the beach during October. Two fishermen with two boats have been working at different periods during the year, taking in all about ninety baskets.

W. J. WHAITS,
Acting-Assistant Inspector of Fisheries.

Bellinger River Fisheries.

31 December, 1892.

I HAVE inspected Mr. N. Hanly's and Mr. C. Johnson's oyster leases, they being the only lessees working any beds here, I found them all in good order, very clean, and no sign of any disease. There was a very poor fall of spat at the low end of the river, and that little was killed by shifting sand.

No fishing has been done here, except for local consumption; owing to the scarceness of fish, no fish have been sent from this river to the Sydney market

THOMAS K. RADCLIFFE,
Assistant-Inspector of Fisheries.

Manning River Fisheries.

Oysters.

31 December, 1892.

Most of the natural deep water oyster-beds are in fair condition again. Oyster spat has been setting on the beds off and on most of the year.

The south channel has been worked steady with three boats the whole of the year; also Scott's Creek and Cuttie's Beds, at the latter end of the year.

The whole of the natural deep water oyster-beds are in a fair condition for work excepting McDirmid's Bed, and the Bas Bed, and I have hopes of their being in a condition to work in say, twelve months time.

Nine hundred and ten bags of oysters have been collected during the year.

I have tested the oyster beds several times during the year, indeed, I make it a rule of going in to the men's boats when they are at work, and making several hauls with them, to see the condition and size of oysters they collect.

The river has been in fresh for a considerable portion of the year—the following record thereof may be of service:—

27th February to the 8th of March,	In fresh.
31st March to the 14th of April,	”
24th September to the 30th of September,	”
30th October to the 4th of November,	”
12th November to the 18th of November,	”
19th December to the 24th of December,	”

with occasional small freshes at intervals.

The leases applied for during the year are as follows:—

Wallace and Haiser	400 yards, upper end of South Channel.
”	400 ” lower end of South Channel.
”	100 ” ” ”

The licensed fishermen on this river, at various times during the year, numbered eleven with yearly licenses, and five licensed boats, and ten with half-yearly licenses, and three licensed boats.

Fish have been very scarce during the whole of the year; only two small shoals of sea-mullet made their appearance at Harrington's Heads, one on the 18th of April, and the other on the 21st of June, but they did not come up the rivers. Very few whiting, bream, or flathead in the river, the principal fish having been mullet.

Camden Haven Fisheries.

I HAVE made several flying visits to Camden Haven during the year; found the oysters steadily improving, and in fair marketable condition.

Mr. Gibbins, the lessee, did not work the river until the latter end of September, since which time he has shipped over 580 bags.

There are also two fishing boats at Camden Haven, one boat's crew is salting fish for Sydney market, the other obtains for local consumption about five or six baskets a week.

As I am not allowed to travel without instructions from the Department, therefore I am not in a position to get proper accounts of the Camden Haven fisheries.

ANDREW GYLER,
Assistant-Inspector of Fisheries.

Cape Hawke Fisheries.

31 December, 1892.

THE oyster fisheries are in first-class condition at present, there is a good supply of marketable oysters, and abundance of young oysters on most of the beds and fore-shores—a light spawn set in at the heads, and could be traced for a short way up the river in the month of September—the river oysters have been spawning almost every month for the past twelve months. The tides have been, and are at present, very high, which will tend to improve the mangrove and cobbler pegs oysters.

Owing

Owing to the low tides and hot weather in the summer months for the past three years large quantities of the mangrove and cobbler pegs oysters have been destroyed. Should the high tides continue during the remainder of the hot weather from the heads to 2½ miles up the river will be one mass of oysters. It is many years since the oyster fisheries have been in such good condition as at present, and promise for some years to come.

There has been very little done here with net-fishing. 960 baskets of fish were caught. Some of those were salted, and some preserved. There were also locally caught, 517 Dory lobsters, all the lobsters were preserved or tinned, 205 cases of preserved fish, 189 cases of preserved lobsters, and 117 bags of salt fish.

Licensed fishermen employed, 26; licensed boats employed, 8.

The Fish Preserving Company's Works are now closed. When they were in constant work they gave employment to about 30 men and boys.

A. H. KENDALL,
Acting-Assistant Inspector of Fisheries.

Port Stephens Fisheries.

31 December, 1892.

THE quantity of fish shipped to Newcastle totalled 5,239 baskets, shows an increase of 739 baskets on the output for 1891. The Smiths' Lake whiting and bream caught during the winter months contributed largely to this increased supply; fish packed in ice are still received from that lake.

A move in the right direction was made when in the early part of the present summer ice was introduced and used with good results by the majority of the Port Stephens fishermen.

The average number of fishermen employed and boats used during the year in connection with the net fisheries averaged 22 men, and 7 boats.

On the whole there has been no scarcity of fish in the harbour.

Cray-fish.

I am unable to give an estimate of the number of dozens of cray-fish caught, as the greater bulk are shipped *en route* to Newcastle, but from what I have learned from the fishermen the fish have not been as numerous as in former years; in fact there has been scarcely any caught nearer to the Port than Broughton Island and Hannah Bay. Unless legislation is introduced to afford protection to the female fish (the female fish predominate) this species of fish will ere long become a rarity.

Oysters.

The proclamation issued on 20th April last prohibiting, for a period of three years, the taking of oysters from the beds or deposits in Port Stephens on Crown lands, not under lease, has already had a most beneficial effect, as everywhere (portions of Karuah River excepted) the oysters are becoming abundant; and if those unscrupulous persons, to whom I referred in my last Annual Report, will only leave the oysters on Crown lands alone, general good must result from the closing of the natural oyster beds.

Convictions.

The following convictions for breaches of the Fisheries Acts have been obtained:—

22nd February, 1892,	P. Johnson,	fined £2; 4s. 10d.	Court costs,	Reg. 34, 48 Vic., No. 6.
27th June, 1892,	T. Wooderson,	„ 10s.; 4s. 10d.	do	Sec. 21, 44 Vic., No. 26.
Do	J. Davis,	„ 10s.; 4s. 10d.	do	Sec. 14, do.
Do	W. Thompson,	„ 10s.; 4s. 10d.	do	do. do.
12th August, 1892,	S. Lilley,	„ £2; 14s. 6d.	do	Breach of Reg., 5th March, 1890, (48 Vic., No. 6.)

H. LAMAN,

Assistant Inspector of Fisheries.

Hunter River Fisheries.

31 December, 1892.

FROM ten to twelve boats and eighteen to twenty men have been employed catching fish in the Hunter River for the year now ended; the fish were driven out to sea several times by floods. During June, July, August, and September, fish of all kinds were very scarce in the lower part of the river, but plentiful from Hexham to Morpeth, and at Clarence Town, in the Williams River, the latter place is however too far to bring them to market. November and December, fish were plentiful in the lower part of the river, the Back Channel and Mosquito Creek being full of large mullet bream and flathead, whiting was very scarce all the year, so many floods silting up the feeding grounds. I saw more fish in the Hunter River last November and December than I have seen these five or six years.

Prawns.

There have been from twenty-five to thirty boats, and from fifty to sixty men employed catching prawns in the Hunter River. There were 1,206 baskets sent to Sydney, and 431 baskets to Melbourne: 1,189 baskets were kept for use in Newcastle, and 768 baskets dried; making a total, 3,694 baskets. Prawns have been plentiful, but small. A great many more prawns could have been caught, if there had been sale for them. The dried prawns are sold to Chinamen; the process for drying prawns is to boil them, lay them out in the sun for two or three days, and then scale them.

Oysters.

There is no improvement in the Bay beds. The back and main channel beds have improved, and are still improving. Two hundred and seven bags were taken from the river last year; 139 bags being from lease 344, back channel. The oysters were spawning on all the beds in December. There is a good crop of young oysters on lease 57. They will be fit for market next summer, also a good set of spawn set on Yellow Tom's Point in December. I think the freshes are the cause of the spawn not setting on the bay beds. There are a few old oysters in the bay; they are in good condition, no disease in any of them. The old shells are clean on the beds. All the beds in the Hunter River are improving with the exception of the bay. If no disease comes in the oysters by next summer there will be a good crop on all the beds.

HENRY CURAN,

Assistant Inspector of Fisheries.

Lake

Lake Macquarie Fisheries.

31 December, 1892.

THE fish sent to market this year show a large increase upon the quantity forwarded in 1892. There have been from forty-five to fifty boats employed on the lake during the year. Nine to ten boats from Tuggerah Lakes, Botany, Port Stephens, and Newcastle, two went back to Botany and one to Newcastle. There has been an average of 139 to 145 fishermen employed on the lake during the year.

Fish in the lake have been very plentiful during the last two months, but owing to the jelly-fish being so much more numerous than last year, fishermen were prevented from hauling great portions of the lake. Sharks very numerous about the bar and in the lake; school bream and whiting were making up into the lake in March in large schools. Fishermen caught them in large numbers. Two fishermen were on one haul for twelve weeks, from April till June, the number of baskets which they caught in that time was 1,100, realised 11s. per basket clear of all expenses; there were also several other boats on other hauls for five and six weeks catching only bream.

Fishermen who still send their fish by train from Dora Creek still have to stay to load them, but at Toronto this is done by the Railway Department.

WM. BOYD,
Assistant Inspector of Fisheries.

Tuggerah Lakes Fisheries.

31 December, 1892.

THE first half of the year is notable for the fish supply which was good, especially in May, when the largest catch through the year during any one month was made, there was also plenty of rain this month, and the lakes and creeks being very high, fish could be seen in numbers everywhere; mullet and garfish being very thick in the middle of Tuggerah Lake. In June, blubber became very thick at all parts of the lakes, and, as this pest showed no signs of a decrease, fishermen began to leave, no less than five boats with some of the best fishermen going to Lake Macquarie. With the exception of Munmorah Lake, where fish were scarce, blubber has been plentiful in the lakes throughout the year.

During the year three fishermen were fined for fishing in the closed waters of the lakes, and one fishing-net for which no owner could be found was seized, having been discovered set in closed waters.

The total number of baskets of fish caught during the year for market was 6,759, and about 260 baskets smoked locally.

F. ALDRICH,
Assistant Inspector of Fisheries.

Brisbane Water Fisheries.

31 December, 1892.

THIS river has had a most plentiful supply of fish during the year. The sea-mullet came in early in April, and kept coming and going till the middle of June. The principal fish were flat-tail, and sand-mullet, bream, whiting, blackfish, flathead, jewfish, and tailer. A great many pleasure parties visit Brisbane Water for line fishing all through the year. Different parts of my district, and particularly the closed waters have been regularly visited and well watched.

The oyster fisheries are in good condition, there having been a good fall of spat. There is no sign of the worm or any disease. The total number of bags sent to market is thirty-eight. Several leases have been cancelled, and but one applied for during the year.

W. N. CAIN,
Assistant Inspector, Brisbane Water.

Hawkesbury River Fisheries.

Hawkesbury River, 31 December, 1892.

THE net-fisheries during the past year have been carried on under difficulties by the fishermen, inasmuch as, for a considerable portion of the year, the greater part of the river has been closed, leaving but a limited area of open waters for fishing.

The various kinds of fish, in the Hawkesbury River and tributaries, consisting of bream, blackfish, perch, whiting, jewfish, and several kinds of mullet are now, and have been, during the past year in plentiful supply in closed waters. The open waters having, as stated, been until recently of limited extent. The continual hauling of fishing-nets in those waters made fish very timid, and consequently they would only resort around rocky foreshores or out in the open river.

The total quantity of fish caught, during the past year and conveyed by rail to Sydney and suburbs, has been 4,182 baskets, and about 300 baskets by steamer. This quantity also includes occasional shipments of outside fish, schnapper, &c., which outside fishermen send to market by rail, when caught by contrary winds. There are also several net-fishing boats and crews in Pittwater who take their fish to market by open boat or steamer, but of the quantity of fish so taken I cannot get any record.

In the matter of better protection to our young fish, I would beg to point out that the extensive use of garfish-nets, now at present carried on in the Hawkesbury River, is very detrimental to their preservation and protection, and I am well aware of the large amount of destruction which is caused by these nets. I would, therefore, again most respectfully urge upon the consideration of the Commissioners of Fisheries the necessity that the garfish-nets shall be altogether banished out of the Hawkesbury River, or that a limit be drawn, and that those nets be kept near the sea coast, as scarcely any garfish ever come up the river now in sufficient quantities to warrant the use of such destructive nets.

The oyster fisheries in the Hawkesbury River, which not many years ago gave employment to several hundred of men, I am sorry to state, are now in a very unsatisfactory, and I may also say, in a dormant state, which I consider is principally owing to bad and unsuitable laws.

No exertions are made by lessees to increase the productiveness of their areas, which in many instances could be done; it would seem that lessees have lost all interest in the welfare of their leases, owing to the continued stealing by unscrupulous persons, who also steal off Crown land whenever opportunity offers.

There

There is also the old worm disease still among the oysters; which, in itself, is a certain hindrance to oyster culture, but the thieving is by far the most serious evil, and cannot be overcome by the present system of intermixing leases.

The young oysters are healthy and moderately plentiful, but only in certain localities. Nearly all leases are at present very bare of oysters, particularly marketable oysters, and so are also the Crown lands.

The number of bags of oysters shipped during the past year has been 655, but a large percentage of the above shipments, say, about 150 bags, were New Zealand laid oysters, and not the produce of this river.

In conclusion I would state, that having regard to the present low condition of our oyster fisheries in the Hawkesbury River, and the serious falling off from the shipments of oysters in former years, and having regard also to the apathy and neglect, as shown by the present lessees, in either paying their rent or in making improvements, or even marking their leased areas, and with the view of preventing the industry from becoming extinct, I suggest that any oyster leases, which are at present held in the Hawkesbury River, should at once be cancelled, and a fresh system of leasing introduced, namely, the leasing of a whole creek for the purpose of oyster culture to one person; such a system would be a guard against future oyster thieving, and would develop the fishery.

P. SMITH,
Assistant Inspector of Fisheries.

Narrabeen Lake Fisheries.

31 December, 1892.

NARRABEEN LAKE was, up to the 22nd December, in a very satisfactory condition (as you are aware by personal inspection), small whiting, bream, and mullet being in abundance; since, however, it has become open to net-fishing, I cannot say the same, irrespective of numbers of small fish being destroyed whiting just ready to spawn have been killed, and I am afraid it will take longer than twelve months to bring the lake to its previous condition.

About 500 baskets of fish have been taken out during the past month, about half mullet, the rest whiting, with a small percentage of bream, perch, and flathead. I would respectfully suggest the lagoon should be closed to net-fishing permanently, if possible, as it is essentially a breeding-ground, and when thrown open periodically a few fishermen only get the benefit (at the expense of killing small fish), whereas, if it were closed altogether to net-fishing in the winter, when the lagoon usually flows in and out from the ocean, fish reared in lagoon make their way out to Broken Bay, and a greater number of fishermen get the benefit. My opinion is based on the fact that I have noticed during last winter, when the lagoon burst open, there was a greater number of Broken Bay fish in the markets, and also sold here.

Dee Why, Curl Curl, and Manly Lagoons are breeding grounds certainly, but in a lesser degree, for when they are open to the ocean at low tide they are nearly dry.

There are still a great number of fish sold here daily, but I am happy to say that since three prosecutions, small fish are not known on the wharf.

The licenses here are also a source of satisfaction. I have now about forty fishermen and twenty boats, which will be a great improvement on last year; I also respectfully submit that if by some small license fee amateurs could be made to have a license to bring them within the Act, that quantities of small red-bream would be saved, and in a year or two schnapper would not be so scarce.

PAGET BAYLEY,
Assistant Inspector of Fisheries.

Port Jackson Fisheries.

31 December, 1892.

THE fish supply has been very fair as compared with those of preceding years, and on the whole the fish have been in a moderately good condition, the several lots that were condemned usually coming from distant places. The kinds of fish present, in large quantities, were mullet, whiting, and blackfish, whilst there was also a fairly good supply of garfish, jewfish, tailers, kingfish, teraglin, nanniguys, prawns, schnapper, and crayfish.

The quantity of prawns was, this year, quite up to the standard, and they were unusually large and in, generally, splendid condition, only a few were of an inferior quality. The mullet, whiting, bream, rock-cod, and blackfish, which were also quite as numerous as in other years, were, taken altogether, in very good condition. Some very large sea-mullet were brought to the market during the early part of the year. The garfish were also in very good condition, and in fairly large quantities, considering the fact that they become very scarce during the summer months. The schnapper have not been very numerous, which may probably be attributed to the fact that the weather was often so bad along the coasts that the fishermen were unable to go out to catch them.

A fairly large proportion of the total amount of fish and prawns have come to hand from various parts of the harbour.

There was a very fair supply of oysters from various places during the year, the majority of them being in very good condition, but a large proportion of the Clarence River supply was suffering from the worm disease, which affected nearly all the old oysters, but this disease is rapidly dying out of the oysters in all the other localities.

THOMAS MULHALL,
Assistant Inspector of Fisheries, Sydney.

George's River and Botany Fisheries.

31 December, 1892.

DURING the early part of the year, owing to the continued rain, the river was quite fresh, causing many of the whiting and bream to leave the closed waters, the anglers reaping a great harvest. The fish, especially whiting, continued to bite well up to the month of May, and large quantities were killed about the mouth of George's River, one boat's crew, to my knowledge, killing no less than twenty-seven (27) dozen in one afternoon; this destruction by anglers caused a scarcity of fish in the closed waters up to the latter part of May. Since then the fish have been on a steady increase. Since

Since May, occasional small freshets caused small quantities of fish to come down the river, the net-fishermen reaping the benefit. During the month of November, small lots of hard-gut mullet, and other fish, travelled out of the closed waters, and laid in Oyster, Kogarah, and Woolooware Bays, many of them going right out of the river, the fishermen being unable to kill any large quantity at a haul, owing to the blubber being so plentiful. During the latter part of December, two large shoals of hard-gut mullet were seen a few miles above the Railway Bridge; since then we have, however, lost the run of them, but I was informed last week that two very large shoals were seen laying off the mouth of George's River, probably the same fish about to travel.

The closed waters are at the present time in a most prosperous state, being alive with all kinds of fish. On dark nights at low water, the channels along the sand bars of George's and Woronora Rivers are a mass of whiting and other fish.

Oyster Fisheries.

Spawn has been very plentiful on all the foreshores of George's River this year, but owing to the public they never get a chance to grow to maturity. We tested several natural oyster-beds with the dredge in July, and found what few oysters we managed to collect more or less affected with mud or worm disease.

J. D. GRANT,

Assistant Inspector of Fisheries, George's River.

Upper George's River Fisheries.

31 December, 1892.

SINCE my appointment in August, 1892, as Acting Assistant Inspector of Fisheries, I have endeavoured to put a stop to the illegal net-fishing that was being carried on in these waters. I have camped on different points of the river for a day or two at a time, and have cautioned persons that I suspected, and others, against using nets on any pretence whatever, and that if caught no leniency would be shown them.

I have every reason to believe that a good deal of notice has been taken of these warnings, and I have not seen on the river lately several boats that I suspected. I have rowed up to others that were fishing with hand and rod lines to see if they had nets in their boats. I have also visited places where I know they used to put the nets across and stall, but have failed to find any signs of their being there, or any place where they have encamped. The river at the present time is swarming with fish, and *mullet have been, and are at the present time, being caught with rod and line within 100 yards of the dam at Liverpool; these fish, many of them being 2 lb. and 3 lb. weight,* have not been caught so far up the river for several years; whiting is also very plentiful; several good baskets have been caught by fishing parties at the mouth of Thorn's Creek, the Half Moon, and Blackwall. Oysters in this river do not appear to be doing well; nearly all you open are of a black colour, and no life in them.

Many persons who live on the banks of the river are under the impression that they can use a net for their own use. I think it would be advisable to put on the different points of the river painted notices against the use of nets. Permission can be obtained from the settlers to put them on their land, and they would see they were not destroyed; they can be made here for a few shillings each, and would be of great service.

WILLIAM E. LEAROYD,

Acting Assistant Inspector of Fisheries.

Illawarra Fisheries.

31 December, 1892.

THIS fishery has again contributed very largely to the metropolitan supply, 7,914 baskets having been forwarded by rail to Sydney. This is an increase of 3,271 over the supply of 1891. The local consumption has also increased by 275 baskets, 1,365 baskets having been forwarded to Wollongong and other places in the district. The total number of baskets taken from the lake was 9,279, an increase of 3,546 over 1891.

I attribute the increase to the larger area of water open for operation and to the fact that the channel through the sand bar at the sea entrance has been deeper and wider than usual, giving the finer varieties of ground and school fish full access to the lake. Owing to this squire have been very plentiful in and about the channel and entrance during the latter part of the year.

I have observed large quantities of young fish in the closed waters, and am of opinion that the supply is an excellent one. I noticed bream, tarwhine, whiting, flathead, garfish, and mullet.

Jelly fish continue to interfere with the operations of the fishermen, and are a source of great trouble.

The lake is becoming a favourite resort of amateur line fishermen. Some very good hauls of bream and squire have been made.

There have been four prosecutions for fishing in closed waters.

Deep sea fishing has been carried on to a small extent by a couple of boats from Wollongong. The supply which is not very large is consumed locally. Amateur line fishermen have secured very good hauls from steamers, but the professionals in sailing boats have not been so successful.

Lobsters appear to be plentiful in the reefs about Five Islands and other places, but no attempt to utilise them has been made by fishermen.

Tom Thumb Lagoon.

This lagoon has been closed for two years. The period will expire on the 22nd February, 1893, and I would again recommend its closure. It is the only available spot for line fishing close to Wollongong, and is a favourite resort. When open it was literally scraped out with nets by professionals and amateurs. The closure has met with the unqualified approval of the townspeople.

Oysters.

In consequence of stripping, the lagoon was closed for three years from 30th April last. No disease exists. In connection with the closure there have been two prosecutions for taking oysters, and one prosecution for a breach of Regulation No. 31.

Fishing

Minnamurra River.

Fishing operations have heretofore been confined to a couple of fishermen for local consumption only. No oysters have been utilised from the beds held under lease during the year. No disease exists.

Southern

Southern Fisheries.

During the early part of the year I visited the Shoalhaven, Jervis Bay, and St. George's Basin fisheries to report on the surrender of ten leases under subsection 8 of section 4,—eight leases at Shoalhaven and two at St. George's Basin; also to report generally under section 28.

These reports have been duly forwarded and speak for themselves, but I would again draw attention to the second paragraph of the latter report having reference to over-stripping by greedy lessees. It is a great pity that these persons cannot be compelled to cultivate. They strip the leases, and then ask to be permitted to surrender, when they ought to be compelled to compensate the Government for injuring public property.

One lessee in this district, Mr. G. Hosier, deserves great credit for the pains he takes to cultivate and improve his leases. I wish other lessees would follow his good example both for the benefit of themselves and the Government.

Two hundred and fifty bags of oysters were sent to Sydney this year, as against 484 in 1891. I attribute the decrease to the injury to the leases by over-stripping.

Two thousand six hundred and thirty-three baskets of fish have been sent from Greenwell Point, showing a decrease on the previous year caused by a reduction in the number of men working in the Shoalhaven and Jervis Bay fisheries, but I look forward to a large increase this year in consequence of the opening of the railway to Nowra giving better facilities for transit.

D. W. BENSON,
Assistant Inspector of Fisheries.

Moruya River Fisheries.

31 December, 1892.

THERE is very little to report regarding the fishing industry on this river. There have been three licensed fishermen. One of these shortly after taking out his license left the district, the two remaining supplying the local market, one of them obtaining his fish from Lake Coila and the other from Moruya River. The demand for fish in the local market is very small, the supply being almost as limited, and not likely to improve for some time at any rate until the river deepens about the entrance. At present all the deep holes where fish used formerly to resort are filled up. No attempt has been made to send any fish to Sydney, notwithstanding that the steamboats now make regular bi-weekly trips. The principal kinds of fish obtained have been mullet, bream, and blackfish; whiting, trevally, and salmon have been very scarce. Shoals of fish passing along the coast have also been very rare compared with former years.

Schnapper fishing has also been very poor off this part of the coast during the past year, although there has been an absence of the leather jackets we have had in former years.

As regards the oyster fishery there is absolutely nothing to report.

There have been about six bags, used locally by one of the lessees who keeps an Oyster Saloon and supplies the local demand, but I have no means of ascertaining or verifying the exact number of bags sold or consumed.

There have been no attempts to improve oyster leases in any form, in fact Crown areas and private leases look in worse condition than they did some months ago, especially Crown areas, the greater part of the young oysters having disappeared therefrom, but by whom taken it is impossible to say.

A. SUTHERLAND,
Assistant Inspector of Fisheries.

Murray River Fisheries.

31 December, 1892.

DURING the year 5 tons 3½ cwt. of fish were sent to the Melbourne market across the Murray at Moama, but this represents an extremely small portion compared with the large quantity sent by way of Swan Hill, Koondrook, Bama, Tocumwal, Cobram, Yarrawonga, Corowa, and Albury. I think that 120 or 130 tons for the year would not be too high an estimate of the weight of fish caught in the Murray and exported into Victoria, to say nothing of the quantity destroyed in the nets and fish boxes through being kept too long in them, and often through being overcrowded.

I have seized several nets which were duly confiscated, two were destroyed here, and the others forwarded to Sydney according to instructions.

I regret to state that notwithstanding my efforts to prevent illegal net-fishing I have been unable as yet to stamp it out. My endeavours in this respect have been to a great extent frustrated through the Victorian fishermen, who residing on the other side of the river pay nothing to either governments for fishing licenses, and openly defy the Fisheries Regulations of both colonies. In August last a Select Committee of the Victorian Legislative Assembly on the Fishing Industry sat at Echuca to inquire into the Murray fisheries, and the evidence given before the Committee by nearly all those examined on the subject went to prove that unless illegal net fishing was put a stop to the Murray River will before long become exhausted of its fish, and the almost unanimous opinion expressed was that the Victorian Government should join with that of New South Wales to avert so great a calamity.

I enclose the *Echuca and Moama Border Post* newspaper of the 4th instant, in which appears an article on the Fishing Industry of the Murray, it gives a fair statement of the case as to the scarcity of fish in those portions of the Murray below the Moira Lakes, and the cause also of the large number of nets on the Victorian side at the time of our visit.

JOHN A. MANTON,
Assistant Inspector of Fisheries.

[Enclosure.]

Extract from the *Echuca and Moama Border Post*, Wednesday, 4 January, 1893.

THE FISHING INDUSTRY OF THE MURRAY.

FOR some years past the dearth of all kinds of fish has been great in the river Murray, owing to the vandalic and ill-controlled system of net-fishing by fishermen engaged in the Melbourne trade. The wholesale system of fishing by bag and gill nets is rapidly depopulating the fish in the river, and at the same time is anything but conserving the great and valuable fisheries of the Murray. We have repeatedly been informed of the ruthless character of the said fisheries, and learning that the "Forester," the Government steamer of the New South Wales Government was going up to the river to Lake Moira, we cordially accepted the kind invitation of Mr. Manton, the Inspector of Forests and Fisheries, to go up with him, and

see the state of affairs for ourselves. We are glad that we did so, especially when we heard that all the outlets and water races of Lake Moira were blocked by the nets, traps, and boxes of the Victorian fishermen, so much so that the most expert Isaac Walton's of Echuca and Moama found it almost impossible to hook a fish from Bamah to below Echuca! Let us say at the outset that we found common report fully proved, and that something should be immediately done by the Governments of Victoria and New South Wales to legislate in such a practical manner as to prevent the wholesale destruction of Murray River fish, *i.e.*, cod, bream, cockerill, silver and golden perch, classes of fresh water fish, which for quality and commercial value are unequalled in the colonies. It is almost impossible to state the value and quantity of fish taken annually out of the river Murray for sale elsewhere. From Bamah to Moama and Echuca, the quantity which has crossed the Bamah crossing, the Murray bridge by road and rail, for the past year amounts to 24 tons, which at 3d. per lb., local value amounts to £672. This does not include what crosses the river into Victoria by way of Koondrook, Nathalia, Swan Hill, Albury, Cerowa, Tocumwall, or other points of crossing. We do not object to the people of Victoria the right to procure and purchase Murray River fish simply because the waters of the Murray belong to New South Wales, or that Victoria has no right to interfere with its navigation laws nor fishing license fees; but we desire to go in for the higher consideration of conserving the fish supply of a large portion of the people of Riverina and New South Wales, which can only be done by Victoria granting to the New South Wales Inspector the right to represent the interests of the Victorian Government as well. Some jealous and selfish minded individual might say in the hurry of the moment, without much *a priori* thought and reason, "how could we invest Victorian interests into the hands of a New South Wales officer? This is easily explained in a broad yet just way. There can be no clash of interest between the two Governments in the matter, as the object is not revenue, but the joint conservation of the river fish, which, if not protected just now, bids fair to become a thing of the past. What are the facts of our trip to Lake Moira? All the way up the river we saw signs of net-fishing in every bend. There were poles here, there, and everywhere, and in defiance of recent Victorian laws, to say nothing of those of New South Wales. It is idle to name any exact spot, bend, or mouth, of creek, as the evidence of net-fishing was so regular and universal. But upon this occasion we will confine ourselves to the outlets, channels, and streams running in and out of the lake. Lake Moira is about 37 miles from Moama. It is a beautiful and expansive sheet of water, as lovely as Loch Lomond or Windemere, as Como or Geneva, without the mountain landscape, but with two little belts of the Murray traversing the same. The scenery is fit alike for the poet's pen or the pen of a Robert's, Constable, or a Horatio MacCullough, and the two lakes would have tethered to the place such names as Edward Forbes, Christopher North, or Archy Meston, the Sacred Ibis of the north. The lakes expand for miles in length and breadth in flood time, and on Monday last they shone to most glorious perfection. The lakes covering so much low country they form the natural *habitat* of the fish, and when the water recedes from the land they naturally fall with it into the natural running channels, which is the Murray River. The lakes have about a hundred exits into that river past mud islands, bulrush swamps, gum-tree islands, sandbanks and intersecting water races, the very ponds for fish of six varieties. The lakes are the spawning grounds, and the young fish follow the old fish in shoals, through the said outlets. We inspected these outlets and pulled all over the lakes in two parties. We patrolled the lakes as far as Sheldrake's farm by day, and dropping down the stream moored to the mile tree marked 264. Under the most glorious moonlight scene ever witnessed in Australia, two boats crews inspected a large portion of the two lakes area. We came across bag and gill nets across every outlet visited by us, and in the centre of the lakes where the rushes and flotsom were thickest were more nets and fish boxes, securely and skilfully fixed. The fishermen were on the alert and watched our doings, and after a four or five hour's patrol from tree 264, we left exploration alone until next morning. At break of day Mr. Manton and party started again, and at the upper end of the little river behind tree 264 we came across one of the largest bag nets ever seen on the river. Mr. Manton seized the net, which upon being examined contained large quantities of cod, perch, and cockerill fish. Upon the left bank of the creek there were too deep fish boxes, full of heavy fish, old and young, large and small, containing about 4 cwt. of grand fish. So completely did the net block the passage of the fish that it was impossible for any to pass. Here there was one illustration why the fish on the Murray is becoming scarce, and the fish industry becoming destroyed in the near future. We then pulled along and within the lakes in all directions. We came across and inspected more nets and boxes, in fact the lakes were covered all over with a network of nets, and fish-catching arrangements upon a gigantic and well thought out scale. We could not have believed such a thing possible had we not seen such complete arrangements with our own eyes. We trust that our legislators in Sydney and Melbourne will now believe it, as our assertions can be supported by Mr. Chanter, M.P., and two or three experts. If such fish destruction is permitted to go on like that upon Lake Moira—and it is only one place on the Murray—the fish supply of the people will be ruined. Let it be protected at once. Let there be no further waiting upon the subject. The subject requires urgent legislation; and the control of the fisheries on the Murray, for the sake of economy and efficiency, should be placed under the experienced care of Mr. Manton, a most impartial, painstaking, and efficient officer. In returning down the river, we passed a hundred fishing parties on the banks, and nearly everyone could "catch no fish."

The Murray River Fisheries.

31 December, 1892.

THE number of fish in the various streams under my charge are increased; this fact being evidenced by the quantities sent away by rail, and the larger hauls made throughout the fishing season by amateur fishermen.

There has been no disease amongst the fish, and no mortality to speak of; the freedom from troubles of this description being attributable in a great extent to the long continued height of the parent stream, and the increased flow through the ana-branches, which latter particularly promoted a healthy and vigorous growth among the fishes.

During the year there were eight boat licenses issued.

The illegal netting still continues, but there is a noticeable wariness observable in the operations of those who pursue this nefarious occupation. During the year there were six bag-nets and three gill-nets seized by me, and I also received three gill-nets which were seized by Constable Leonard, of Moulamein, and handed over to me to be dealt with. All these nets were ordered to be forfeited, and in due course were sent on to Sydney.

There were 13 tons 1 cwt. and 1 qr. of fish sent away by rail from this district during the year, a quantity which is an increase on that forwarded during the previous year.

Large quantities of fish are still being sent to Victorian markets from Swan Hill by rail from the counties of Cairn and Taila. The closing of the waters in the counties of Cadell, Townsend, and Wakool have driven fishermen to the other counties named, and they there prosecute their avocations to the same detriment as they did here. I therefore respectfully urge that in the interests of the people and preservation of the fish, the waters of Cairn and Taila be closed against netting, as they are in Wakool, Townsend, and Cadell, if it is only for one year as an experiment.

I have much pleasure in acknowledging the assistance rendered me in the discharge of my duties by Senior-constable Curry and Constable Leonard, of Moulamein, during the past year, and in carrying out the provisions of the Act, and the proclamation of the Fisheries Commission.

The improvement in matters connected with fishing in this district is wholly attributable to the clearing of the waters against net-fishing, and it is a matter for consideration, if it is not desirable, that the whole of the Murray waters should not be dealt with in the same spirit. The closing of the waters for a portion of the year, say in the spawning season, would soon result in a vast increase of the fish, even if they were not closed entirely against net-fishing, and the partial protection would not interfere to any great extent with the operation of those who follow fishing as an occupation from which they derive a portion of their livelihood.

OSBORNE WILSHIRE,

Assistant Inspector of Fisheries for Murray and adjacent waters.

1893.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

GOVERNMENT LABOUR BUREAU.

(REPORT FOR HALF-YEAR ENDED 18TH AUGUST, 1893.)

Ordered by the Legislative Assembly to be printed, 28 September, 1893.

HALF-YEARLY REPORT, Government Labour Bureau, from 18th February to 18th August, 1893.

SINCE the Annual Report, and during the half-year which has just expired, the work of the Bureau has considerably increased, brought about, no doubt, by the bank suspensions and other financial failures.

The depression throughout the Colony has so affected employers of labour that a general shortening of hands has been the result, and, as a consequence, hundreds of unemployed men of all kinds, clerical, mechanical, and manual, have registered at the Bureau, and applying for work.

In consequence of the distress in the country, I visited Newcastle (twice) on August 10th and 11th, and 23rd and 24th; Greta on the 22nd; and Lithgow on the 17th of the same month, and Wollongong on September 12th. From these districts I sent away a great number of men to fossick on the gold-fields, providing them with railway pass, miner's right, and, where necessary, ration to commence their journey on. The following are the respective towns, and numbers of men despatched:—Newcastle, 435; Greta, 50; Lithgow, 52; Wollongong, 18.

The distress and cost of relieving married men and families has also increased in and around the city, particulars annexed marked A.

The distress in the country is chiefly in the mining townships, viz., Newcastle, Wallsend, West Wallsend, Dudley, Greta, and Adamstown, who are receiving rations, of which particulars as to cost, &c., are annexed and marked B.

In June last, under the Labour Settlements Act, I was appointed to receive, and report upon, and keep a register of all applicants in connection with the Act, the particulars are annexed marked C.

In July last a scheme for sending unemployed fossicking on the goldfields was approved by the Minister for Mines and the Colonial Secretary and conducted by a Board consisting of the Under-Secretary for Mines, Mr. Slee, Chief Inspector of Mines, Mr. Dowel, M.L.A., and the Superintendent of the Labour Bureau, and in connection with which a large number have been sent away, the particulars are annexed marked D.

On May 31st last one of the large iron sheds at Cowper's Wharf, Woolloomooloo, was opened as a night shelter, and which has been largely availed of by the houseless unemployed, the particulars referring to same are annexed marked E.

The refund of railway and steamer fares received is very satisfactory, the particulars of which are annexed marked F.

A large number of boys have been found homes and employment in the country, and a number of married couples and female servants have also found situations similarly through the Bureau during the six months, and in several cases upon the application of the husband and father their families have been sent to the district where work has been obtained.

Tables showing arrivals from other Colonies and police statistics are also annexed, marked G and H.

Number of unemployed registered during last six months from February 18th to August 18th, 1893,—6,287.

Total number registered from commencement, 18 months,—24,887. Average registration per day,—50.

Total number sent to work during last six months, and including those from Newcastle, Greta, Lithgow, and Wollongong,—3,860.

Total number sent to work from commencement, 18 months,—12,014.

Adding those registered up to the 18th September, there is a total registered for the seven months of 7,888; and adding those sent to work up to the same period shows a total of 5,037.

JOSEPH CREER,
Superintendent.

(A.)

PARTICULARS and cost of relief administered to the destitute unemployed by the Government Labour Bureau :—

Total cost from 27th May, 1892, to 18th August, 1893...	£3,856 14s. 11d.
Total number of families relieved weekly or otherwise, during the same period	2,300
Total number of families relieved for the half-year, 18th February to 18th August, 1893	1,150

This does not include relief given to unemployed at Parramatta and elsewhere, independent of the Government Labour Bureau.

(B.)

PARTICULARS of country relief and cost thereof to date :—

Teralba and West Wallsend	£120 12 7
Greta	129 12 6
Dudley	64 0 5
Adamstown	21 7 6

Plattsburg has also been granted a sum of £50 for local relief.

(C.)

LABOUR SETTLEMENT ACT.

Total number registered	834
Sent away to the various settlements through the Bureau—	
Adults (men and women)	167
Children...	178
Total	345

(D.)

Number of fossickers sent to various parts of the country	1,574
Total of rations supplied to them—1,021, at a cost of 2s. 6d. per ration	£127 5s.

(E.)

Total number sheltered at shed 108 nights, at an average of 464 per night	50,197
Cost of hot teas provided at 1½d. per head to date	£166 12s. 2d.

The shelter shed was closed on the 25th September, 1893.

(F.)

STATEMENT of amount refunded for railway and steamer fares :—

Total amount received	£2,561 6 7
For period 18th August to 26th September, 1893	585 8 6

Up to the present, comparatively few letters have been received from those sent out fossicking; but it is rather early to expect much from this source yet. Those who have written appear to be satisfied with their prospects; and, in some instances, have sent for their families to join them, showing that at least they are making sufficient to keep them. Some information of a useful kind has also been conveyed, and more in this direction may reasonably be expected soon. It is thought that the majority sent out are doing fairly well, as in most cases they are representative miners, and have gone to fields of which they had previous knowledge. Some have gone to places which have remained untouched for ten or fifteen years; but when they left them they considered they were leaving what would be a good living now.

(G.)

THIRD half-yearly return, showing the number of arrivals from the other Colonies, the United Kingdom and foreign parts, and resident here all within three months, from 18th February, 1893, to 17th August, 1893 :—

Victoria	267
Queensland	90
New Zealand...	77
Tasmania	34
South Australia	18
Western Australia	7
United Kingdom	95
Foreign parts...	51
Total	639
Total for second half-year	685
Total for third half-year	639
Decrease during third half-year	46

(H.)

(H.)

THIRD HALF-YEARLY RETURN OF POLICE REPORT.

Third half year, commencing February 18th, 1893—

Drunkenness	68
Theft	12
Riotous and assault	12
Indecency	1
Begging and vagrancy	5
Language	7
Breaking, entering (suspected persons)	1
Pretences	1
Artillery deserter	1
Gambling	1
									<hr/>
Total	109
									<hr/>
Total for second half year...	134
Total for third half year	109
									<hr/>
<i>Decrease during third half year</i>	25

N.B.—Making allowance for a large number who have obtained employment indirectly through the Bureau, and of whom we have no account, the estimated number of unemployed in and around Sydney is estimated at from 7,000 to 8,000 at the present time. I am pleased to say that the general conduct of the unemployed in connection with the Labour Bureau is exceptionally good.

1893.

NEW SOUTH WALES.

LABOUR SETTLEMENTS ACT.

(REGULATIONS MADE BY THE BOARD OF CONTROL OF THE LABOUR SETTLEMENT IN THE PARISH OF PITT TOWN.)

Presented to Parliament, pursuant to Act 56 Vic. No. 34.

Department of Lands,
Sydney, 21st July, 1893.

It is hereby notified, for public information, that the following Regulations, made in pursuance of the Labour Settlements Act, by the Board of Control of the Labour Settlement in the parish of Pitt Town, county of Cumberland, have been approved by His Excellency the Governor, with the advice of the Executive Council, to apply to such Labour Settlement.

HENRY COPELAND.

I.—THE BOARD.

1. The Board shall, not later than at its fourth meeting, and thereafter annually, and also from time to time as necessity shall arise, elect from amongst its own members a Chairman, an Honorary Treasurer, and an Honorary Secretary.

2. It shall be the duty of the Chairman to preside at all meetings of the Board at which he shall be present, and he shall have a deliberative as well as a casting vote.

3. During the temporary absence of the Chairman the members of the Board assembled at any meeting may elect any one of their number to act as Chairman during such absence.

4. It shall be the duty of the Honorary Treasurer, or, in his absence, the Chairman, to countersign all cheques issued by the Board, and such cheques shall in all cases be first signed by the Honorary Secretary, and at least one other member of the Board, provided that in the absence of the Honorary Secretary some other member of the Board shall be required to sign such cheques.

5. It shall be the duty of the Honorary Secretary to sign all official communications either to the Government or to the principal employes of the Board, including all notices of employment or dismissal of any such employé: Provided that the Honorary Secretary may from time to time delegate any of these functions to the salaried secretary.

6. There shall be an ordinary meeting of the Board at least once in every week at the office of the Board, at such hour as the Board may determine, and an extraordinary meeting of the Board may be summoned at any time by the authority of the Chairman or of any three members of the Board; not less than twelve hours' notice of the time and place of such meeting to be given. At every such meeting five members shall form a quorum.

7. The Board shall annually appoint two Auditors whose duty it shall be from time to time, but not less than once in each period of six months, to examine and verify the statement of the Board's accounts prepared by the Secretary, and to certify to the accuracy and general correctness of such accounts, and of any abstract or balance-sheet professing to represent the same.

II.—OFFICERS OF THE BOARD.

8. The Board may from time to time appoint a Secretary at such a salary and upon such terms as may seem good to the Board, and may be approved by the Minister, and it shall be the duty of the Secretary to keep minutes of all meetings of the Board, to receive and conduct the Board's correspondence, subject to the general supervision of the Honorary Secretary and the directions of the Board; to keep the accounts of the Board, and also to keep and exhibit to the Board at its meetings faithful abstracts of all such accounts as are kept at the labour settlements, and to act generally as the Board's agent in all such matters as the Board shall require.

9. The Board may from time to time appoint some suitable person for each settlement under its control to hold the office of Superintendent at such salary as shall seem fit to the Board, and shall receive the approval of the Minister: Provided that the Superintendent shall be directly responsible to the Board, and that his engagement shall be terminable at any time, without notice, upon the resolution of the Board.

10. The Superintendent shall be the responsible Executive Officer of the Board for the organising of the settlement, the direction of the works undertaken, and the control and management of the settlers in relation to their employments. It shall be his duty to oversee and direct the Storekeeper, Steward, and other local officers of the Board, and to report in writing, at least once in each week, to the Board, which report shall contain a statement of the condition and progress of the settlement, the work done, and any other particulars necessary to enable the Board fully to understand the position of the undertaking, and such report shall be first submitted to the Committee of Advice hereinafter referred to, for their information, and shall then be forwarded by the Superintendent to the Board with any remarks or comments which any of the members of the said committee shall desire to make thereon.

11. The Board shall draw up rules for the direction and allotment of works on the settlement: Provided that any rules so made shall be approved by the Governor before the come into force.

12. Should any question arise as to the duties or functions of any local officer of the Board, the decision shall rest with the Superintendent, and his decision shall have immediate effect, but any officer or settler who is aggrieved at the action or decision of the Superintendent may appeal to the Board, and every such appeal shall be first submitted to the Committee of Advice whose duty it shall be to report the opinion of such Committee of Advice upon the subject matter of such appeal, and to forward the same with such opinion to the Secretary of the Board within one week after the date of the act or decision complained of.

13. Any settler disobeying any rule of the Board, or any direction of the Superintendent, shall be liable to a penalty not exceeding two pounds for every such offence, which shall be a charge against his first share of the surplus profits of the settlement; and obstinate and continued disobedience of any such rule or direction shall render any settler guilty of the same liable to be disenrolled.

14. The Board may from time to time appoint one of the settlers to act as Storekeeper, and it shall be the duty of the Storekeeper to keep an accurate account of all the property of the settlement, including tents, tools, implements, and vehicles, live stock and stock-in-trade, and provisions of every kind. He shall also keep a record of all changes in the said property, and of the incomings, outgoings, and balance, in such a form as shall be readily understood, and he shall embody the same in a report which shall be made by him to the Superintendent at the end of each month.

15. The Board may from time to time appoint one of the settlers to act as a Steward, whose duty it shall be to superintend and manage the victualling of the settlement, subject to the directions of the Storekeeper.

16. The Steward shall, on Saturday in every week, or on such other day or days as may be appointed by the Superintendent, issue to the settlers and their families a supply of provisions in accordance with a scale to be from time to time approved by the Board, and publicly exhibited at the store-house of the settlement.

17. The Storekeeper or Steward may have each assigned to them in the performance of their duties such assistance as the Superintendent shall see fit.

18. It shall be the duty of the Steward to keep true and faithful accounts of all provisions received by him, and he shall render a report at the end of every month to the Storekeeper, showing the amount received and issued by him, and the balance (if any) in his hands, and such report shall be included by the Storekeeper in his monthly report to the Superintendent.

19. There shall be elected by the settlers from amongst their own number a resident Committee, which shall consist of five members who shall be elected by ballot, in the first instance for a period of three months, and thereafter once a year, on a day and in a manner to be prescribed from time to time by the Board, and such Committee shall act as a Committee of Advice to the Superintendent on all matters which he may submit for its opinion, and shall also report to the Board on all questions which may be submitted to the Board by any local officer of the Board, or by any member of the settlement.

20. The Committee of Advice shall exercise no authority or control over the Superintendent or other officer of the Board, but it may, if it shall see fit, offer to the Superintendent its advice or recommendation upon any question which may arise affecting the well-being and progress of the settlement. And it shall be the duty of the Superintendent if he shall disregard such advice or recommendation, to embody the same with his reasons for its rejection in his next weekly report to the Board.

21. The Committee of Advice shall have full power to regulate its own meetings, and it may, at any meeting, report direct to the Board on any question or matter which appears to it important to the well-being of the settlement.

III.—THE DISTRIBUTION OF EARNINGS OR PROFITS.

22. The maintenance of the members of the settlement and their families shall in all cases be a first charge upon all funds in the hands of the Board, and upon the proceeds of the labour of the settlement.

23. Such necessary clothing and materials as shall be approved by the Board may from time to time be advanced to the members upon the recommendation of the Superintendent.

24. The principle of the settlement shall be purely co-operative, and all settlers shall be required to work forty-eight hours in each week for the common benefit of all the members. The Superintendent shall keep a Time-book, in which shall be entered at the close of each day the number of hours every individual member has worked, and every Saturday there shall be issued to each member, and publicly exhibited, a record of the number of hours he has worked during that week.

25. All the earnings of the settlers shall be held by the Board, and the surplus profits may from time to time be divided amongst the settlers in proportion to the number of hours' work recorded in the Superintendent's Time-book:

Provided that no division shall under any circumstances be made until after the settlement has been established for one year at least. Provided also that no allowance shall be made in any settler's account for any proportion of the subsidy granted by Government in respect of such member. Dividends shall in every case be first applied in liquidation of the settler's indebtedness to the Board.

26. The Board shall cause an account to be kept in which each settler shall be separately debited with all rations or other property issued to him, or money advanced to him. The Board shall also cause a balance-sheet to be made out every half-year, which shall contain an estimate made by the Board of the value of improvements made on the land, of the value of all the property of the settlement, and of the amount of the liabilities of the settlement, arranged under suitable heads.

27. If at any time after the expiration of six months from the establishment of the settlement an additional member is admitted to the settlement, he shall be debited with whatever may appear to the Board an equitable sum, having regard to the improvements made on the land and the then value of the Board's property thereon.

28. If after the expiration of one year from the establishment of the settlement any settler desire to leave the settlement, the Board may permit such settler to transfer his right, title, and interest to another person competent to become a member and approved by the Board, and such new settler shall succeed to all the rights and liabilities of his predecessor, and shall sign a declaration in the form of Schedule A to these regulations: Provided that the Board shall not in any case be legally bound to permit such transference; and when such transference is not permitted the interests of the retiring settler shall cease and determine.

29. Should any member die or be declared a lunatic, his interest as such member shall devolve on his legal representatives. His said interest shall be computed by taking the value of the improvements on the land and other property of the Board as it may appear in the then last half-yearly balance sheet; and, after making due provision for the repayment of advances with interest and all other charges, his account shall be credited in proportion to the number of hours' work done in the settlement, with his proportional share of such surplus value.

30. The legal representatives of any settler dying or becoming a lunatic may dispose of his interest to any person competent to become a member and approved by the Board, and such new settler shall succeed to all the rights and liabilities of his predecessor, and shall sign a declaration in the form of Schedule A to these regulations: Provided always that, failing such disposal for a period of six months from the date of death or lunacy as aforesaid, the Board may dispose of such member's interest either for cash or upon terms, and pay the same to the legal representatives of such deceased or lunatic member. The Board may however (but shall not be legally compellable to), pay to the representatives of any dead or lunatic member the amount nominally representing the interest of such member.

31. Enrolled members' children, unless in the receipt of a wage, in which case their maintenance shall cease to be a charge on the settlement, may be directed by the Board, through the Superintendent, to take part in the work of the settlement as employés of the settlement, and shall in such case receive such remuneration as to the Board, on the report of the Superintendent, shall seem equitable.

32. No member abandoning the settlement within one year of its foundation, nor any member who shall be disenrolled by reason of any failure on his part to conform to the terms of membership, shall be entitled to any payment whatever on account of his interest in the settlement, but in every such case such interest shall be taken to be forfeited. Nevertheless the Board may, at its discretion, make an allowance of whatever sum of money it deems fit to any retiring member.

IV.—REGULATIONS RELATING TO LABOUR.

33. Every enrolled settler shall, when in health, do forty-eight hours work in each week as directed by the Superintendent, for the benefit of the settlement. Beyond this number of hours the time of each settler shall be at his own disposal: Provided that the Superintendent shall have full power to restrain any member from using such spare time or any resident whatever from acting in such a manner as may interfere in any way with the work of the settlement as a whole.

34. No work for private emolument outside the settlement shall be undertaken by any person resident in the settlement unless he shall have first obtained express permission from the Board to undertake the same.

35. Any part of the labour at the disposal of the Board may be employed in works outside the limits of the settlement, on such terms and conditions (not inconsistent with these regulations) as the Board may see fit: Provided that the Board shall in no case accept any such work on such terms as might compete on the basis of a lower wage with workmen outside the settlement.

36. The entire direction and apportionment of the work of the settlement amongst the members shall be subject to the decision of the Superintendent, who may appoint foremen and delegate to them such part of the power committed to him as may be requisite for carrying out the duties assigned to them.

V.—THE LOCATION.—GOOD ORDER AND GOVERNMENT OF THE SETTLEMENT.

37. A plan of the settlement dealing with residence areas, special public reserves, allocations of sites for the establishment of industries, and the allocation of particular allotments to the individual members, shall be determined by the Board.

38. No part of the land leased to the Board shall be sublet to any individual, but residence sites in accordance with a plan approved by the Board may be assigned for occupancy to individual members of the settlement, who shall thereupon become entitled to retain and use solely for their own benefit such residence sites, subject to the regulations for residential purposes, so long as they shall remain members of the settlement, and no person beyond the members of a settler's own family shall be permitted to reside on these sites except by the Board's express permission.

39. Every settler shall, previous to enrolment, sign a declaration in the form of Schedule A to these regulations.

40. No intoxicating liquors shall be sold within the limits of the settlement, and any member selling or purchasing the same within such limits shall be liable to disenrolment.

41. No gambling shall be permitted within the limits of the settlement.

42. The Committee of Advice may make recommendations to the Board for the purpose of ensuring the efficiency of the regulations from a sanitary point of view, the lighting of the settlement, traffic regulations, police, and any other matter affecting the good order, government, social improvement, comfort, or recreation of the settlement.

SCHEDULE A.

I, _____, on being enrolled as a member of the Labour Settlement at _____, under the Board of Control having charge thereof, do hereby agree and undertake to abide by the principles upon which the said settlement is established, and to conform in all respects to the rules and regulations made under the Labour Settlements Act, 1893, or any amendments thereof, whether made by the Governor-in-Council or by the Board of Control; and I pledge myself to live a sober, industrious, and peaceable life, and at all times to do my best to promote the general prosperity and well-being of the settlement, and I do this upon the understanding that failure on my part to fulfil these conditions or obligations renders me liable to disenrolment.

NEW SOUTH WALES.

LABOUR SETTLEMENTS ACT.

(REGULATIONS AND FORMS.)

Presented to Parliament pursuant to Act 56 Vic. No. 34.

Department of Lands,
Sydney, 27th June, 1893.

REGULATIONS UNDER THE LABOUR SETTLEMENTS ACT.

It is hereby notified, for public information, that His Excellency the Governor, with the advice of the Executive Council, has, in pursuance of the Labour Settlements Act, made the Regulations hereinafter set forth for the purpose of carrying into effect the said Labour Settlements Act.

HENRY COPELAND.

REGULATIONS MADE IN PURSUANCE OF THE LABOUR SETTLEMENTS ACT.

1. Whenever it shall be deemed expedient, a Board of Control may be appointed comprising eight or more persons, but not exceeding sixteen, nominated by the Governor, for the purpose of enrolling members for a Labour Settlement. And whenever the enrolment shall have been completed, such Board may be dissolved, and a new Board appointed, in accordance with the following provisions:—

- (a) If the enrolled members of the Labour Settlement require monetary assistance at the commencement of the Settlement, the Board of Control shall be composed of persons of whom two-thirds shall be nominated by the Minister and one-third by the enrolled members of the Settlement.
- (b) If the enrolled members of the Labour Settlement provide a sum of money equal to the amount of monetary assistance required from the Government, and are prepared to expend their own moiety on or in connection with such Settlement, and in manner approved by the Minister, before any assistance is granted under section 6 of the Act, the Board of Control shall be composed of four persons nominated by the members of the Settlement and five persons nominated by the Minister if such Board shall consist of nine persons, or if such Board consist of twelve, fourteen, or sixteen persons, the members of the Settlement shall be entitled to nominate five, six, or seven persons respectively, and the Minister shall nominate the remainder.
- (c) Whenever the amount of money advanced by way of loan shall have been repaid to the Government, with interest thereon, as provided by the sixth section of the "Labour Settlements Act," and the Minister after report is satisfied that the objects for which such Settlement was established are being carried out within the meaning of the Act, the Minister shall, if requested so to do by the members of such Settlement, recommend to the Governor that the Board of Control then existing be reconstructed, and if the Governor so approve, such Board shall be reconstructed by the substitution of persons nominated by the members of the Settlement in lieu of those previously nominated by the Minister.

Application and enrolment.

2. Any person who may be desirous of being enrolled for any Labour Settlement shall make an application with a declaration on Form A, and forward the same to the Superintendent of the Labour Bureau for transmission to the Board of Control.

Persons of the class referred to in sub-section (b) of Regulation 1 who may conjointly desire to form a Labour Settlement, shall each make an application and declaration in Form A, but shall not be required to answer questions 9, 10, and 11 therein, and shall forward the same, together with Form B (giving the names of the whole of the persons desirous of forming the Settlement), to the Under Secretary for Lands for transmission to the Board of Control.

3. No person shall be enrolled as a member of a Labour Settlement, in accordance with sub-section (a) of Regulation 1, unless he shall, at the date of application for enrolment, be out of employment or, at least, out of regular employment, and, in the opinion of the Board, without sufficient means of support; and no person shall be enrolled as a member of a Labour Settlement, in accordance with sub-section (b) of Regulation 1, unless he shall be able to contribute an amount equal to that required from the Government. Each Labour Settlement constituted in accordance with sub-sections (a) or (b) shall, as far as practicable, consist wholly of the one or wholly of the other of the classes therein referred to, so that each class shall, as far as practicable, form a separate group.

4. As far as practicable, applicants shall be selected by the Board according to the order of priority hereinafter following: Provided that the Board may, whenever it shall deem necessary or expedient, select or group the applicants without reference to such order of priority:—

1. A husband and wife with a dependent family.
2. A widower or widow with a dependent family.
3. A husband and wife without a dependent family.
4. An unmarried person.

5. When the Board shall have enrolled such a number of persons as it may deem sufficient, it shall forward to the Under Secretary for Lands, for the consideration of the Minister, in terms of section 6 of the Act, the applications of such of the persons as in the opinion of the Board should constitute the Labour Settlement, and shall on Form C describe the area proposed to be leased; the amount of monetary assistance applied for; the names of the persons on account of whom such assistance is asked; and such other particulars as the Form may require: Provided that the Board, subject to the approval of the Minister, may from time to time, for sufficient reason, increase the numbers of enrolled members of any Labour Settlement.

Boards of Control.

6. It shall be the duty of the Board from time to time to report to the Minister (as may be required) on the condition and progress of the Settlement: Provided that the Minister may authorise any officer to inspect and report upon any Labour Settlement, and such officer shall have the right of entry on the land, and shall be supplied by the Board and the members of the Settlement with all reasonable and necessary information.

7. The Board upon disenrolling or removing any member of a Labour Settlement shall report to the Minister on Form D the reasons for such disenrolment or removal. And in the event of any new member being included in such Settlement the Board shall furnish the full particulars required by that form.

8. The Board shall cause to be kept a cash-book as in Form E in which shall be entered from day to day the particulars and amounts of all moneys received and paid by or on behalf of the Board for any purpose or on any account whatever.

9. The Board shall also cause to be kept a ledger as in Form F, which shall be posted up from the cash-book. Separate accounts shall also be kept for all payments to and receipts from the Treasury, but other payments and receipts may be posted up under such headings as the Board may think most convenient under the circumstances.

10. A bound receipt-book with butts attached, numbered consecutively, shall be supplied to the Board; and the amounts of all moneys received, the names of the persons paying the same, the purposes for which those payments were made, and dates of payment, shall be entered in the butts and initialled by the person signing the receipt.

11. The Board shall obtain and record consecutively all receipts and acquittances for all payments made to the parties receiving such payment.

12. All receipt-books and butts, and all books of account and vouchers, shall be produced by the Board for the inspection of the Colonial Treasurer or any officer appointed by him for that purpose.

13. Every Board of Control shall hold a meeting at least once every month.

Leases and sub-leases.

14. All leases granted to a Board and all sub-leases granted by a Board shall be subject to the following special conditions:—

- (a) The Board or the holder of any sub-lease shall not, except under and subject to regulations in force for the time being in that behalf, mine for or remove any minerals from the land.
- (b) Any land required for public roads may be withdrawn from lease by the Governor, by notice in the Gazette, without any compensation whatever, other than for improvements effected on the land so withdrawn, and a refund of any rent paid in advance.
- (c) The first and every successive holder of a sub-lease shall be bound by the conditions of the sub-lease as approved by the Minister, and upon failure to fulfil any of such conditions the Board may cancel such sub-lease and deal with the land, and all improvements thereon, subject to the provisions of the Act, as if such sub-lease had not been granted: Provided that if the Board shall have been dissolved, the Minister may, on default of the due fulfilment of the conditions, cancel such sub-lease and thereafter deal with the land, and all improvements thereon, in such manner as may be deemed expedient.

(d) The rent payable by the holder of any sub-lease shall be paid to the Board, unless and until such Board shall be dissolved; and upon the dissolution of any Board the rent shall continue to be paid, but shall be forwarded by the sub-lessee direct to the Colonial Treasurer.

(e) The granting of any sub-lease shall not relieve the Board of any of its liability to pay to the Crown the rent for the whole area originally leased to such Board, which rent shall be a first charge on the revenues of such Board.

(f) Not more than one sub-lease shall be granted to or be held (wholly or in part) by or in the interest of any enrolled member, except by devolution of law.

(g) Any sub-lease granted to a member of a Labour Settlement who shall be disenrolled or removed from such Labour Settlement shall cease and determine on the date of disenrolment or removal; and the land, and any improvements thereon, may, thereafter, be dealt with by the Board of Control as if such sub-lease had not been granted.

(h) No sub-lease shall be assigned or sub-let without the permission of the Board of Control in writing endorsed on the form of lease.

15. The rents of all leases shall be paid annually in advance, and the first payment shall be made within fourteen days from the expiration of the fourth year of the lease, and thereafter within fourteen days from the due date thereof.

16. The application for the renewal of a Labour Settlement lease or a sub-lease shall be made to the Under Secretary for Lands at least twelve months prior to the expiration of the original term thereof: Provided that in the case of a sub-lease, if the Board of Control shall not have been dissolved, the Under Secretary shall forward such application to the Board, to be dealt with by them.

Miscellaneous.

17. If any survey by way of subdivision shall be necessary for any purpose of the settlement, or for any sub-lease, such survey shall be made under the direction of the Minister for Lands, but the expense thereof shall be paid by the Board out of the funds at its disposal.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

THE UNEMPLOYED.

(PETITION FROM JOHN CHRISTIAN WATSON, CHAIRMAN OF A PUBLIC MEETING HELD AT THE CENTENNIAL HALL, SYDNEY, PRAYING THE HOUSE TO PASS CERTAIN MEASURES FOR THE RELIEF OF.)

Received by the Legislative Assembly, 24 October, 1893.

To the Honorable the Speaker and Members of the Legislative Assembly, in Parliament assembled.

The Petition of the undersigned, Chairman of a Public Meeting held at the Centennial Hall, Sydney, on October 23rd, 1893,—

RESPECTFULLY SHOWETH,—

That your Petitioner was Chairmain of a Public Meeting held at the Centennial Hall, Sydney, on October 23rd, when it was resolved that your Petitioner should forward the following resolutions, which were agreed to at such Public Meeting, to your Honorable House:—

Whereas there are many thousands of deserving citizens at present in a state of destitution through lack of employment; and

Whereas the passage of the Mining on Private Property Bill would largely alleviate the existing distress; be it

Resolved, That this Meeting urges on the Government and Parliament the immediate necessity of passing the measure referred to above.

Whereas certain public works authorised by Parliament have not been proceeded with; and

Whereas the prosecution of such works would afford a large amount of employment to those urgently in need of the same; be it

Resolved, That the Government be asked to push on the construction of remunerative public works already sanctioned by Parliament at the earliest possible date.

Resolved, That this Meeting also urges upon the Government the further extension of the Labour Settlements, and the amendment of the Act with respect to increasing the monetary allowance.

Resolved, That the foregoing resolutions be embodied in Petitions for presentation to both Houses of Parliament, such Petitions to be signed by the Chairman, on behalf of this Meeting.

Your Petitioner therefore prays that your Honorable House may be pleased to pass the said Mining on Private Lands Bill and such other remedial legislation before the close of the present Session of Parliament.

And your Petitioner, as in duty bound, will ever pray.

JOHN CHRISTIAN WATSON,
Chairman.

NEW SOUTH WALES.

“TRADE DISPUTES CONCILIATION AND ARBITRATION ACT, 1892.”

REPORT

ON

INDUSTRIAL DISPUTES AND CLAIMS,

BY THE

CLERK OF AWARDS.

1893.

Presented to Parliament by Command.

SYDNEY : CHARLES POTTER, GOVERNMENT PRINTER.

1893.

CONCILIATION AND ARBITRATION.

Report by the Clerk of Awards.

Sir,

47, Phillip-street, 1st October, 1893.

When taking office at the initiation of this Department under the "Trade Disputes Act" you instructed me to watch closely the working of the local Act, and also to inform myself from time to time of the steps, if any, being taken in other countries for the settlement of industrial troubles.

Over a year has elapsed since I entered upon the duties of my office, and I now have the honor to lay before you as complete a Report as I have been able to compile (having regard to necessary condensation) upon both the work of the Department and contemporary legislation.

I have communicated with English and foreign authorities upon the question of legislation, and have exchanged literature upon the subject. In the United States and Canada special interest has been manifested in the working of the New South Wales Act, copies of it having been supplied by request to several of the States Governments and the principal University Schools of Political Economy, including that of Toronto.

The Colony of British Columbia has adopted our Act in its entirety.

As the Trade Disputes Act is avowedly an experimental measure I have deemed it my duty to express myself frankly and without reserve. It may be that, in some instances, the views advanced will not meet with your acquiescence, but I feel confident that you will not the less attribute to them the credit of sincerity, and a desire to make this Department the useful factor in industrial disputes the Legislature intended it to be.

I have, &c.,

T. B. CLEGG,

Clerk of Awards.

The Honorable the Attorney-General.

SUMMARY.

Summary of
general results.

BEFORE entering in detail upon the several matters dealt with in this Report, I propose, for the sake of convenience, to briefly summarise the general results of an experience gained in connection with the working of this Act, and by inquiry into the systems of other countries.

(1.)

Growing interest
in industrial
arbitration.

In the first place, I venture to direct your attention to the many evidences you will find referred to in this Report of the growing interest shown among not only people of our own race, but foreign nations, in the question of the State's duty in relation to labour disputes. Within the past five years industrial strikes have attained a magnitude that menaces the public peace. Two powers are at the disposal of the State to preserve order; these are military force and a civil remedy. It is upon the establishment of the latter to deal with a new class of causes, that is to say, industrial disputes between masters or companies and bodies of servants or employees, that the attention of Governments in British and foreign communities is now being concentrated.

Legislation in this direction, upon more or less comprehensive, if experimental lines, has been brought into force, or is about to be dealt with, in the following among other nations and colonies:—

ENGLAND.....	Three proposed schemes for conciliation and arbitration. (<i>See Appendix.</i>)
FRANCE	The conciliation and arbitration law of the 27th December, 1892. (<i>See Appendix.</i>)
GERMANY	An existing law for compulsory arbitration.
ITALY	A conciliation law.
BELGIUM.....	An industrial court of arbitration.
NORWAY	A conciliation law.
UNITED STATES.....	Voluntary Conciliation and Arbitration Acts in several States, and a strong agitation in favour of compulsory arbitration.
NOVA SCOTIA.....	Compulsory reference of mining disputes to arbitration.
BRITISH COLUMBIA ...	Voluntary Conciliation and Arbitration Act.
NEW ZEALAND	Compulsory Arbitration Bill.
SOUTH AUSTRALIA.....	Compulsory Arbitration Bill.

(2.)

The balance of
power.

I have been strongly impressed by the fact that the success of any scheme for the voluntary reference of trade disputes to arbitration depends upon the balance of power between the parties being equalised. I do not refer to conciliation, for that is in its essence voluntary. Arbitration, on the other hand, may be carried out at the wish of both parties, or, so far as inquiry is concerned, without their consent. I am convinced that mutual agreement to refer will exist only where the power of the opponents is fairly balanced, or some accidental cause determines the action. If one of the two opposing powers, unrestricted by Legislation, is strong enough to wrest its own terms from the other, it will, as a matter of course, do so. The parties will, left to themselves, only come to arbitration when power is so balanced that expediency—and not morality nor even business foresight—compels them to do so. It is generally admitted, supporting this view, that schemes of voluntary conciliation and arbitration work most effectually where, other things being equal, strong organisation on one side is opposed by strong organisation on the other. An excess of power on either side is destructive to such pacific schemes where their operation depends wholly upon an agreement between the parties to refer them to some tribunal.

I have elsewhere endeavoured to show, with such material as I have at command, that the unparalleled depression throughout the Colony, with the exchequers of the once dominant Trade Unions impoverished, and the power of association between employers vastly increased, has led to this result. Power being far from equalised the party stronger under these particular circumstances has imposed its terms upon the weaker. Presumably those terms were fair terms of trade, though no data has been given to the public from which it may judge of that fairness. A dominant party enforcing its terms is a judge in its own cause and with its verdict the public are forced to be satisfied.

From the records of the Department since its establishment I can draw but one conclusion. It is that voluntary conciliation and arbitration, though excellent methods when the parties to a dispute are upon fairly equal terms of power, break down where, circumstances generally, a crowded labour market, accumulated funds, superior organisation, or other causes, place one of the two in an overwhelmingly stronger position than the other. Any suggestion to the stronger party for conciliation or arbitration under such circumstances will be of no avail.

The fact should not be lost sight of that the present Act came into operation at a moment when the relations between employer and employed had been strained to the utmost tension, and feeling was embittered on either side. The spirit of insistence rather than of concession was at such a time likely to assert itself.

(3.)

Rights of the
public.

An attitude of indifference is assumed by both parties towards the interests of the general public. That large section of the community which has no direct interest in the fight between the disputants, but suffers in the inconvenience arising from it, and pays the larger portion of the wages of the policeman or the soldier who has ultimately to be called in to keep the peace between the two, is now ignored in the matter. It is supposed to be content to take what is given to it and pay cheerfully. Yet the public
as

as a whole has good claim to consideration in this matter. As things are, at any moment its fuel, its water, its gas, its carriage of goods, its sources of life and means of employment, may be cut off by a strike. Now, however, master and man practically say to the public, "You must be content till one or other of us has got the best of this fight, and then it will be your privilege to pay the costs of it." How long the public will be content with the position assigned to it, is, of course, for the public to say.

THE LABOUR MARKET.

Since 1890 there has been a downward tendency of wages in every class of employment, consequent upon a prevailing general depression, and this has been intensified by the commercial crisis of the last year. As a consequence, in addition to the usual proportion of the unemployed, a large number of men have been left without work in their trades, and with little (if any) prospect of employment in other avenues of labour. In order to estimate with some approximation to accuracy the crowded condition of the labour market during the present year, I made a request, at the close of August last, to the Trades Unions of the Colony to be supplied with the following information:—

- (1.) The average wages received in the various trades at the commencement of the present year.
- (2.) The average wages received to date.
- (3.) The estimated percentage of members in each trade out of employment at the commencement of the present year.
- (4.) The estimated percentage of members in each trade out of employment at date.

To those inquiries I have had a number of responses, but they represent of course only a small portion of the total workers of the Colony. The results I have tabulated, and though, from defective premises such as these, it would not be safe to rely upon the conclusion drawn, it may be said that they show on the whole the marked downward tendency of wages during the year. In many instances reductions were voluntary submitted to, in others, as noted hereafter, they were only acceded to after a strike.

In certain classes of trade the proportionate decreases can be fairly estimated. In February last it was resolved by the Builders and Contractors' Association of New South Wales that three months' notice of a 10 per cent. reduction in wages should be given to the various sections of the building trade. Subsequently this resolution was carried into effect, it being estimated that it affected the wages of from 3,000 to 4,000 men, but of these only from 50 to 75 per cent., it is said, were in regular employment. Again, the hewing rates in the Southern and Western Districts have been reduced, and the condition of the coal industry throughout the Colony is far from prosperous. The check given to it by the strike of 1890 has never been retrieved, so far as the foreign trade of the Colony is concerned. The existing agreement between the Associated Colliery Owners and Associated Miners in the Northern District is to be terminated at the close of the year, formal notice having been given to that end. As a consequence the system of voluntary arbitration which has been in successful operation in the district for years past will cease to exist. There is, therefore, nothing to prevent the alternative and destructive policy of strikes being again resumed, and the principle of a contest of strength taking the place of pacific reference to an equitable court, unless, indeed, it be a sense of the hopelessness of such a venture.

Again, the shipowners have enforced a heavy reduction in seamen's wages, and in nearly every other avenue of labour the rate of wages has been reduced.

In many instances the nominal rate of wages does not represent the recipient's actual income; the work may be shared with others, or may be so intermittent that, spread over working and idle days, the average wage gives a much poorer result.

The fact that every strike of the year that can be regarded as significant has failed to attain its purpose, and that this has been the case since 1890, is in marked contrast to the position of united labour before the great struggle.

Since the Maritime Strike the principle of trades unionism or association among employers has made rapid strides, whilst, on the other hand, the great drain on their funds by that struggle, the Broken Hill Strike, and other labour contests, coupled with the want of employment by many of their members, have severely taxed the resources of the Unions of employees.

In bringing wages down to their present point there has, however, been at work, the employees as a body say, not only the depression in trade acting on wages as it would under normal conditions, but the added power of a united body of employers ready to seize an opportune occasion for what is regarded as retaliation upon labour organisation. This, however, is not admitted by the employers, who contend that so far from taking advantage of the opportunity to indulge in any feeling of revenge, they are not, even at the present reduced rates of labour, making an adequate profit. The loss they attribute not only to commercial depression, but the diversion of trade from the Colony by the frequency of strikes. Under these conditions, where power has been unequally distributed and circumstances have provided a cover for offensive action, the inducement has been to enforce terms and not submit them to conference or arbitration.

Had circumstances favoured neither party or been more equalised, and had the strength of organisation and resources been fairly balanced, I have little doubt the offices of this Department would have been accepted, and the parties have met in conference or submitted their disputes to arbitration. As matters stood, the misfortunes of the one were the opportunity of the other, and that opportunity has been fully seized.

Whether a policy of this kind is long or short sighted time will prove. One fact at least would seem beyond doubt—the course adopted intensifies the feeling of animosity between employer and employed. If that feeling were in the first place created by the action of the employee, he may in the future urge that it is set off by the subsequent conduct of his employer.

WAGES.

WAGES.

(From Union Returns.)

The following abstracts of wages and the state of trade have been compiled from information supplied to the Department at its request by the Trade Unions:—

Unions.	Commencement of Year.	Present or Recent Date.										
LABOURERS.												
Balmain Associated Labourers	33s. per week	31s. per week.										
Sydney United Labourers:—												
Bricklayers	1s. 1½d. per hour	1s.										
Masons' Labourers.....	1s. „	1s.										
MINING, &c.												
A.M.A., Western District.....	At the rate of 25s. per week	Working only half-time, with proportionate reduction in wage.										
COLLIERY AND ENGINE DRIVING PROTECTION ASSOCIATION:—												
Winding Engine-men	10s. per day	10s. per day.										
Loco. Engineers	9s. „	9s. „										
Underground Hauling Engineers	8s. „	8s. „										
Fan Engine-men.....	8s. „	8s. „										
	(overtime same rate).											
CRANE EMPLOYEES (NEWCASTLE).												
Crane-drivers	8s. 4d. per day.....	} About £2 18s. per fortnight all round.										
Horse-drivers	7s. 6d. „											
Hookers on	6s. 8d. „											
IRON TRADE.												
Eskbank Ironworkers:—												
General Labourers	5s. 4d. per day	32s. 6d. per week.										
Ironworkers (paid per ton)	Average 15s. per week	Average wage 15s. per week.										
BUILDING.												
Sydney United Benefit and Trade Society of Painters.....	About 9d. per hour.....	About 4½d. per hour.										
Operative Masons and Bricklayers (Sturt District)	12s. per day	10s. per day.										
ENGINEERING.												
Australian Society of Engineers	10s. „	9s. 6d. per day.										
SHIPWRIGHTS.												
Shipwrights	1s. 6d. per hour, and 2s. 3d. overtime.	Same.										
SLAUGHTERING.												
Amalgamated Slaughtermen and Journeymen Butchers:—												
Glebe Island and all Suburban Slaughtermen	£3 per week	£3 per week.										
Casual Labour	12s. per day											
Meat Preserving and Boiling Down	12s. 6d. per 100 sheep											
Freezing work (for export)	20s. per 100 sheep											
BOOT TRADE.												
Makers and Finishers	25s. per week	About 40 per cent. not earning £1 per week.										
MILLING.												
Goulburn Millers' Union:—												
Millers.....	£3 10s. per week	} About 10 per cent. less all round.										
Engine Drivers	£3 per week											
General Hands	£1 16s. to £2 per week ..

STATE OF TRADE.

Reports from Trade Unions.

BALMAIN ASSOCIATED LABOURERS.—Fifty per cent. of members out of employment at the commencement of the year, now increased to 75 per cent. The above figures show state of market for our labour. The cause we attribute to increasing introduction of labour-saving machinery, which does not cheapen the article it produces to us in like ratio. Work is scarce and becoming scarcer, showing a steady falling off during last four years.

SYDNEY UNITED LABOURERS.—One third of members out of employment at the commencement of the year to the best of my knowledge, and at present date two thirds. The state of the labour market in our trade has been very dull during the year, as, owing to financial troubles, there have been very few buildings erected. The Masters' Association has also been offering a reduction of 10 per cent., and we as a body, of course, could not agree to that, and the consequence is that a great number have been thrown out of work.

AMALGAMATED MINERS' ASSOCIATION OF AUSTRALASIA (WESTERN DISTRICT).—There were none of the members out of employment at commencement of the year, but 120 at present time. The depression during the year has been most severely felt in this district, and unfortunately there is no prospect of an immediate revival.

NEWCASTLE

NEWCASTLE COLLIERY AND ENGINE-DRIVERS' PROTECTIVE ASSOCIATION.—About 5 per cent. of the members out of employment at commencement of the year, and about 7 per cent. at present time, but 5 per cent. of these are out of employment through one of the mines being stopped for want of trade. Owing to the depression which has prevailed in the coal trade for some considerable time it has closed many mines up, the result of which is that many of our members have been thrown out of employment. Some have found employment at other callings, and others have gone to other parts of the Colony.

CRANE EMPLOYEES' ASSOCIATION (NEWCASTLE).—At the commencement of the year no members out of employment, members sharing the work with one another, time on and time off. At present time no member out of employment. Trade has been very dull in our line for the past eighteen months, and the time we lose is estimated at about four, five, and six days per fortnight.

ESKBANK IRONWORKERS.—About two thirds of the men out of employment at the commencement of the year; no trade; about 70 men and boys out of 120 employees out at present time. With a view to increase our trade and give us more regular employment we have been asked to submit to the most cruel reduction ever offered to ironworkers in any part of the known world, namely, 33 per cent., which we accepted. Never in the history of the iron trade was there such a reduction offered to men in the trade, and instead of getting more work we get less. Trade worse now than for eighteen years past.

SYDNEY UNITED TRADE AND BENEFIT SOCIETY OF PAINTERS.—At the commencement of this year 80 per cent. of our members were out of employment, and at the present time 90 per cent. The state of the painting trade is absolutely rotten, flooded with cheap and inferior labour obtainable at a rate of from 2s. 6d. to 6s. per diem for nine tenths of the work. Contracts are disgracefully scamped, whilst scores of good, skilled, steady mechanics are walking about destitute.

OPERATIVE MASONS AND BRICKLAYERS (STURT DISTRICT).—At the commencement of the year there were only from 1 to 2 per cent. in work, and at the present time very nearly all the members are out of employment; nothing doing, very dull, and no prospect of any improvement at present.

AMALGAMATED SOCIETY OF ENGINEERS.—Members out of employment at the commencement of the year 7 per cent., and at present time 14 per cent. The labour market was never known to be worse, or as bad, since our society started, and we see no near prospect of any alteration for the better—going from bad to worse.

SHIPWRIGHTS' UNION (NEWCASTLE).—At commencement of the year 50 members on the roll, and not more than 10 out of that number have worked at their trade this year. I regret to state that there is great depression in our trade; scarcely a member at the present time can earn a living at the trade, and the members are of opinion that wooden ship-building and shipwrights' work is a thing of the past.

AMALGAMATED SLAUGHTERMEN AND JOURNEYMEN BUTCHERS' UNION.—At the commencement of the year not one competent butcher was out of employment; but at the present time there are about sixty out of nearly 600. Up to May the trade was never in a more prosperous condition, the stock tax in Victoria having something to do with it. This trade is always slack during the months of May, June, July, and August. We hope for great improvement when Mr. J. H. Geddes' arrangements for export meat take effect.

BOOT TRADE UNION.—At the commencement of the year actually there were only about 10 per cent. out of employment, but there were 40 per cent. not earning £1 a week, and the same may be said of the unemployed at present. The makers and finishers all work by the piece. The state of the trade has not varied one iota during the whole of the year. The months June, July, and August are recognised as the slack months, but all through this year the state of trade has been most uniform, there not having been any perceptible change one way or the other in any month. In no previous year has the state of trade been so uniformly slack as it has been this year. The above information only applies to makers and finishers, those employed (males) in the other branches of the trade do not belong to the Union. They are all employed by the week, and I don't think that I would be far out when I say their average earnings per week is £1 15s., and the number of them out of employment is proportionate to that of the makers and finishers.

GOULBURN MILLERS' UNION.—No members out of employment at the beginning of this year, and at present six hands are off out of thirty-two. The milling trade generally in Goulburn had been fairly good until the suspension of the banks, hence the reduction.

TYPOGRAPHICAL ASSOCIATION (NEWCASTLE).—At the beginning of the year one tenth of the members unemployed, and one eighth at the present time. Nearly the whole of the members are working in the one office, and although only about one hand less is employed, the piece hands are not working the same number of hours, consequently cannot earn the same wage. Piece hands have had to submit to 1d. per 1,000 reduction since the beginning of the year.

NEW SOUTH WALES JOURNEYMEN FARRIERS' ASSOCIATION.—Five per cent. unemployed at the beginning of the year, and about 15 per cent. at present. Our trade is very slack. In shops where five or six men were employed there are at present only two or three.

AMALGAMATED JOURNEYMEN TAILORS' SOCIETY.—Being piece workers it is impossible to average wages earned in our trade, which depends upon the seasons summer and winter, those being the only seasons when there is anything like regular employment. Therefore, at the commencement of the present year, employment would be scarce, while at the present time it is the same, being in between the seasons. In the month of December there would, perhaps, be 5 per cent. out of employment. When trade is slackest, we estimate 50 per cent., the rest working about half-time.

RIVERINA CARRIERS' UNION (HAY).—Seventy-five per cent. unemployed at the commencement of the present year, but none at the present date. From the commencement of the year to the middle of July carrying trade extremely dull, not more than 20 or 25 per cent. of members being employed; but as the wool season commenced here in July, all available carriers will be employed for a few weeks.

AUSTRALASIAN SOCIETY OF ENGINEERS.—This society, which is of a purely trade protective kind, was established in 1890, and since that date has contributed a sum of £243 17s. towards the strikes of other trades, but has not been involved in any strike itself. During the present year a suggestion was made by the manager of the Mort's Dock and Engineering Company to reduce mechanics' wages by 10 per cent., in addition to a reduction in the rate of pay for overtime. Representatives were appointed by the society to meet the manager, and eventually a compromise of 5 per cent., with a reduction in the rate for overtime, was agreed to.

DEPARTMENTAL WORK.

The Trade Disputes Conciliation and Arbitration Act of 1892 provides for the prevention of strikes and other trade disputes by the establishment of State Councils of Arbitration and Conciliation, to which representatives are nominated by employers of labour and their employees. Initiatory proceedings.

Resort to such Councils is wholly within the discretion of the parties to any dispute, and can only be had by agreement between them.

No power of coercion or compulsion can, under this Act, be brought to bear on the parties either—
(a) to submit a dispute, or (b), a dispute having been submitted, to abide by the award.

This measure was assented to on the 31st March, 1892, and, in accordance with its provisions, was brought into operation by Regulations dated June 23rd of that year.

In conformity with these Regulations the Colony was treated as one industrial district, and a Council of Conciliation and a Council of Arbitration were in due course nominated and appointed. Nominations to these bodies were made by the registered organisations representing the interests of employers and employees respectively, four of the former and fifty-five of the latter availing themselves of the privilege.

The

Representation
on Councils.

The late Registrar of Trade Unions and Friendly Societies divided the registered trade organisations of the Colony into eight classes as follows :—

1. Shipping.
2. Railway and road construction and general labour.
3. Mining and machinery in connection with mines.
4. Traffic on roads, railways, and tramways.
5. Building, building materials and construction, and work in wood and iron.
6. Food, drink, clothing, and work in leather.
7. Printing and kindred occupations.
8. Miscellaneous.

The Act provided that where, as in this case, there was but one Council of Conciliation, the number of its members should not be fewer than twelve or more than eighteen. By the above stated classification the number was fixed at sixteen, eight being nominees of employers and eight of employees. As each of these nominees, though in theory representing a whole class, such as mining or building, was as a matter of fact drawn from some section only of a class, it was objected that full representation of all the trades was not thus secured. In one instance, an important deputation representing the interests of the engineering and iron trades waited upon the Attorney-General with a request that a representative from their ranks should be appointed to the Council. It was pointed out by the Minister that it was impossible under the provisions of the Act to secure representation of each section of trade by a member on the Council, and that the appointment had to be determined by the majority of votes received in favour of the candidates, as well as by the relative importance of the industries represented.

Functions of
Council of Con-
ciliation.

With regard to the functions of the Council of Conciliation for the whole Colony with its sixteen members, some conflict of opinion has arisen. The reading of the Act adopted by the Department, and which has your support, is that it is not open to one party to require the full Council to be summoned. Under no circumstances, it is held, can a Council consisting of more than four persons be constituted, two named by each party to a dispute or claim. Were it competent for one party to a dispute or claim to cause the full Council of Conciliation to be summoned, the way might possibly be opened up for a compulsory reference of a dispute or claim to arbitration.

So far as experience of the working of the Act enables an opinion to be expressed, the utility of a standing Council of Conciliation is not clearly shown. All applications to go to conciliation have, so far, been made under section 5 of the Act, which enables the applicants to appoint conciliators outside of the standing Council for the Colony. As each case has arisen, the persons named as conciliators have been chosen either for their acquaintance with the conditions of the trade in which there is a dispute or for their special knowledge of the district, the confidence reposed in their integrity, or it may be for their known sympathy with either of the disputants.

Appointment of
President.

Upon the 16th September Messrs. A Kethel and P. J. Brennan, the arbitrators appointed under this Act to represent the interests of the employers and employees respectively, met for the purpose of determining upon an impartial person whose name should be submitted to the Honorable the Attorney-General for appointment as President of the Council of Arbitration. It was resolved that the name of the Honorable Andrew Garran, M.A., LL.D., M.L.C., should be submitted to the Minister charged with the administration of the Act. This was done, and subsequently Dr. Garran, having consented to accept the position, resigned his seat in the Public Works Committee and in the Legislative Council, and was duly appointed President of the Council of Arbitration by the Governor in Council. Upon taking office the President summoned a full meeting of the Councils at the offices which had been rented for the Department at 47, Phillip-street. This meeting was held on the 13th October, all the members of the Council with the exception of two being present. An address was delivered by the President on the subject of the work of the Councils and the method of its accomplishment. On the 24th of the following month a meeting of employers' representatives was held in the departmental rooms, invitations having been issued to fourteen Associations requesting them to send delegates. Four out of the number responded, apologies and refusals being received from others.

First meeting of
the Council of
Conciliation.

Meeting of
employers'
representatives.

Meeting of
delegates from
Trade Unions.

On the 1st December a meeting of delegates from the Employees' Trade Unions was held in the lecture-room of the School of Arts, forty-four Unions being represented. At each of these meetings an address was delivered by the President, and a proposal laid before those present to make it a rule in their Associations that all disputes likely to lead to a strike or a lock-out should be referred to the Council of Conciliation or Arbitration. "It is," said the President in his address to the Trade Unions, "for you to determine whether you will make it part of your fixed policy to exhaust the resources of the Trade Disputes Act before resorting to a strike, and whether you will by rule so bind yourselves as to make it impossible to be rushed into a strike before availing yourselves of the opportunity of a settlement which the law offers." Copies of the following rule, suggested for insertion in the body of rules of each Union, were distributed among those present :—

Suggested rule]

"Whenever a dispute or claim shall arise between ten or more members or this Union and their employer or employers, and no settlement can be privately arrived at by the parties thereto, the same shall be referred to conciliation under the Trade Disputes Act, with a reference, if needed, to the Council of Arbitration; and in the latter case the award of the arbitrators shall be accepted by the Union on behalf of its members."

Subsequently a copy of the proposed rule was forwarded to each of the Unions in the Colony of whom there was any record, with a request that the Department should be furnished with information as to whether the suggestion had been taken into consideration, and, if so, with what result. At the same time it was pointed out that the result of adopting this rule would be to voluntarily introduce an element of compulsion absent from the Act. A copy of the rule was also sent to the Registrar of Friendly Societies and Trade Unions for his assurance that it did not in any way conflict with the regulations under the Trade Union Act, 1881. A reply was received, stating that there was no objection on this ground against the rule.

List of Associa-
tions and
Unions.

In sending out the proposed rule to the Trade Unions of the Colony, the list of registered Unions, together with a list provided by the Trades and Labour Council, was taken as the basis of communication. A request was made to the secretary of the Employers' Union, which had declined to send representatives to

to

to the meeting of employers' delegates, to provide the Department with a list of the Unions affiliated to it; but this he stated he was "unable to provide." Consequently the Department had to rely on the official list of the registered Employers' Unions, which includes some few only of the organisations, and has been unable to secure a complete official record of employers' organisations. Copies of the suggested rule were addressed to 102 Trade Unions, and letters of acknowledgment were received from twenty-eight of these. Many of the communications were returned through the Dead Letter Office, the societies addressed having apparently ceased to exist.

The following is an analysis of the replies received :—

Analysis of replies.

- 5 Unions adopted the rule.
- 5 Unions stated that they had provision already made in their rules for reference of disputes to conciliation.
- 10 Unions, for various reasons, declined to include the rule.
- 8 Unions pointed out that the number of employees in their trades engaged under any one master or firm was fewer than ten, and, therefore, they did not come within the provisions of the Act.

28

The following were among the reasons advanced for not accepting the proposed rule :—

Reasons for not adopting rule.

- (a) That it would be useless to do so unless a rule on similar terms were adopted by the employers.
- (b) That the Act would not be operative unless a compulsory clause were inserted in it.
- (c) That to be effectual the Act ought to make it compulsory for both parties to a dispute to go to arbitration as a first step, before resort was had to a strike or lock-out.
- (d) That the members of certain Unions were employees of Government contractors, and the Act could not be of any service to them until provision for resort to the Council was made a term of all Government contracts.
- (e) That it was useless for one party to a dispute to bind itself to accept the award of an arbitrator in a trade dispute if the other side refused to recognise the tribunal which made the award.
- (f) That it was inconsistent to apply the term "law" to a measure constituting a tribunal without power to enforce its decisions.

In the case of the Master Butchers, a letter was addressed to them by the Journeymen Butchers' Union, urging the adoption of the rule by both parties so as to obviate future strikes. This proposal was addressed to twenty masters, from whom but one reply, and that declining the offer, was received.

From a number of Unions letters were received pointing out that, as their members were rarely, if ever, employed to the number of ten by any one master or firm, the provisions of the Act could not benefit them. The case of the Colliery Engine-drivers is typical of the class of excluded employees. The secretary writes, that the Union has not ten members working at one colliery or under one Company, with the exception of one case. The number falls as low as one member at a colliery, and rises to eight. Then again, it has four different classes of members, such as winding, hauling, fan and locomotive engine-drivers. There may be a dispute with members, driving any one class of engines, and it may not affect more than one person, or three persons at the outside. Yet it is within reasonable conception that a dispute, having its origin between an employer and a single employee, may lead to a conflict between the Union and the masters as a body.

On the 24th February, a deputation from the New South Wales Operative Bakers Association, waited on the Clerk of Awards, stating that the members of that body were desirous of establishing a system of conciliation and arbitration between themselves and the master bakers, but that they could not avail themselves of the machinery of the Act, as in the greater number of cases their members in the employment of any one master or firm numbered fewer than ten. In consequence of this and other representations made to me, I addressed a memorandum to the Minister in charge of the Department, desiring to be informed whether there was any objection to the office being used for the purpose of smaller bodies of employees than ten and their employers meeting each other in conference, and whether there would be any objection to the President and arbitrators, either jointly or severally, giving their services in such matters without fee, and the officers of the Department performing any clerical or other work that might be required without additional salary. To this it was replied that where the parties had agreed to refer the matter to conciliation or arbitration the Minister saw no objection to their meeting to confer in the first instance at the offices of the Councils, if they were available, nor did he object to the President, arbitrators, and officers giving their assistance without fee, provided that it was clearly and definitely understood in each case that the matter was not being dealt with officially, and that the Department was undertaking no responsibility whatever.

It being considered advisable to collate a body of information relative to the development of labour associations, the number of strikes which have occurred during the past ten years, and the sums of money expended on their maintenance, it was resolved to issue a form of "Strikes Return" to the Trade Unions of the Colony with a request to be furnished with certain information. The Department not being clothed with any power to require the information therein asked for, it was entirely at the option of the Unions to grant or refuse the request. This return asked for the following information :—

1. Name of your Union and address.
2. Date of foundation.
3. Number of original members.
4. Number of present members.

Strikes between 1st January, 1883, and 31st December, 1892, in which your Union was one of the parties.

5. Number.
6. Cause of strike and end sought to be attained through it.
7. Duration of strike.
8. How settled.
9. Cost.

Strikes between 1st January, 1883, and 31st December, 1892, in which your Union assisted one of the parties.

10. Number.
11. Nature of assistance given.
12. If money, sum contributed.

Apparently,

Apparently, the request was considered to be somewhat inquisitorial, and the number of returns filled in is not sufficiently great to be of any considerable statistical worth. The following statement shows the result of this attempt to get together a body of historical information upon trades unionism and its development in the Colony, the expenditure of funds in strikes, &c.:—

Number of returns originally sent out, 106.

Replies received with returns	16
„ declining to give information	21
„ stating Unions were dissolved	4
Unclaimed letters	10
No replies received	55
							106

A request was sent to the Trades and Labour Council for its co-operation in securing the information desired, but that body thought it advisable to leave the matter in the hands of individual societies. The general reason advanced for not complying with the request was that to do so might possibly prejudice the welfare of the Unions. To quote one reply, it was stated that the Union considered it to be “unadvisable to supply the required information, as at some future time it might be used against the principles of unionism.” Another reason advanced was that to make such a return complete would involve a large expenditure of time and money which the Unions were not prepared to undertake.

Of the sixteen returns supplied comparatively few were complete, but still some facts can be gathered from this body of information that may have an approximate value.

Number of
Trade Unions.

The number of societies at present constituting the Trades and Labour Council is 53 (*vide* Report, 1893), but that body, whilst representing in actual membership the majority of Trade Unions in the Colony, does not incorporate all of them. The books of the Registrar of Trade Unions show no fewer than 153. Of these, 7 have been dissolved in accordance with law, 1 has withdrawn from registration (the Pastoralists' Union), and 11 are Eight-hour Demonstration Committees, of annual duration only, leaving 134 still on the Register, but since in many instances societies upon disbanding have neglected to take their names from the books, this cannot be taken as an accurate record of existing registered Unions. It shows all the Unions that have at any time been registered, but it does not necessarily follow that all such are now in existence. The test applied by this Department has been the Post Office. The fullest possible list from the Registrar's record, the books of the Trades' Hall and other sources have been compiled, each Union written to and the result noted. Deducting the number of letters returned through the Dead Letter Office and the number of societies notified as dissolved on the one hand, and presuming that societies to which letters have been delivered but from which replies have not been received are still existent, the result gives a total of 92 Employees' Unions, but this must be taken as only approximately correct, the probability being that the number overstates the fact.

Causes of strikes.

The principal causes of strife, judging from the replies received, appear to have been some years ago the questions of wages and hours of work, but more recently wages chiefly, and next the employment of non-unionists and recognition of unionism. In one instance the question of unionism seems to have also led to the establishment of a Union. The society was organised as a protest “on account of two men getting the sack for gathering money in aid of the maritime strike.” The men were subsequently re-instated.

Condition of
successful
association.

Some of the principal conditions necessary to successful trade unionism in the direction of maintaining or influencing the rate of wages appear to be the following:—

- (a) A numerous body of workers, engaged upon approximately similar terms and like wage, therefore having a community of interests.
- (b) A clear majority of the trade, including its best workers, as members of the Union.
- (c) The absence of foreign competitors working at low rates of wage.
- (d) The absence of a numerous body of unemployed in the trade and who must either be maintained by the Union and so drain its funds or constitute a reserve from which, under the pressure of necessity, the place of the “striker” is filled.

In one trade it is declared that “so far as our trade is concerned unionism is useless. The supply of labour is greatly in excess of the demand. A large number of the workers, and the small firms in the trade, seem opposed to unionism and have held aloof, so that, as we are a very small minority, I am almost convinced that trade unionism will not better our condition.”

As to the competition of cheap alien labour such as Chinese, one of the Trade Unions whose business has been severely cut into by this class, says: “We are placed in a very peculiar position in settling difficulties that may arise, having imported goods on the one hand and Chinese competition on the other. I do not wish it to be inferred that we are afraid of striking or strikes, but the members have tried and are still trying to better their position by legislation, chiefly by urging the compulsory stamping of Chinese-made furniture, and the passing of public health and factory and workshop legislation. These bills, if passed, would compel the Chinese to live in a different manner. A Public Health Bill would also give direct relief to mattress-makers and upholsterers with regard to the manufacture of black-flock.”

As against the instance quoted of unsuccessful trade association, many cases might be given of highly successful results. One of the most successful trade organisations in the world, the Amalgamated Society of Engineers, has also a most prosperous branch in this Colony. Established in 1851 with 12 members it now has a roll of 727. It has never yet been involved directly in a strike, but has contributed £1,070 to the strikes of other Unions, this amount not being taken from general funds but from funds raised by special levies for such purposes. Its immunity from strikes would appear to be due partly to the constitution of the Union itself and partly to the facts of the strong pecuniary position of the amalgamated societies and the skilled nature of their members' calling.

The material of these returns show, and especially up to a point dating some few years back, a rapid growth of unionism in the Colony. It also indicates the expenditure of large sums of money in the maintenance of strikes. Frequently where a society shows no expenditure, or very little, on strikes in its own trade, large sums have been given to support strikes in other trades. For instance, one Union that

that has had no strike in its own trade has contributed an average of £2 per member to strikes in other trades; another equally well placed, but numerically small society, has contributed between £3 and £4 per head.

From such instances as have been furnished to me—and throughout this abstract it must be remembered that the facts are drawn from a limited source and are insufficient to be the basis of any reliable generalisation—it would appear that up to a certain point in the Colony's history the influence of unionism on wages was marked, from that point, namely, the maritime strike, its influence has declined. No doubt a list could be compiled by the Unions showing that, as a matter of fact, wages have been maintained and advanced by certain specific strikes. To get accurate data upon the matter so as to arrive at a percentage of the successful and unsuccessful strikes (as to their influence upon wages) in the Colony during the past ten years would be of great interest but also a matter of great difficulty.

An attempt has been made by the labour correspondent of the Board of Trade, though admittedly upon incomplete returns, to obtain some idea of the increase or reductions of wages brought about during the year 1891, with and without strikes:—"The general effect of the information collected is that 51,589 persons, as a result of strikes, obtained wage advances, amounting in the aggregate to £6,235 per week, while without strikes, 140,382 persons received advances totalling £11,770 weekly. On the other hand 15,223 workers, after strikes, were reduced to the amount of £1,477 per week, while, without strikes, 22,337 were subjected to reductions of £2,204 per week."

DISPUTES AND CLAIMS.

The following is a tabulated statement of disputes to which directly or indirectly the machinery of the Trade Disputes Act has been, or has been attempted to be, applied:—

(1.) *Disputes actually referred and settled:—*

Arbitration—

Metropolitan Colliery Dispute.

Conciliation—

Mount Kembla Colliery Dispute.

(2.) *Formal applications, no settlement:—*

Broken Hill Silver Mines—Application by employees. Refused by employers.

South Clifton Colliery " "

Enoch Taylor & Co.'s Boot Factory " "

Mount Pleasant Colliery " "

South Bulli Colliery " "

Lithgow Colliery " "

Carcass Butchers " "

New South Wales Railways—Application by employees. Refused by employers.

(3.) *Negotiations:—*

Unsuccessful—

Newcastle Wharf Labourers' dispute.

Carters' strike.

Builders' and contractors' dispute.

Mort's Dock dispute.

Masons' dispute.

Seamen's strike.

The result of the year's work is, therefore, one (1) case dealt with by arbitration, one (1) by conciliation; eight (8) applications made by employees and refused by employers; whilst in six (6) cases negotiations by the Department were unsuccessful.

In June, 1892, shortly before the machinery of the Act was brought into operation, the directors of the principal silver mines in the Broken Hill District notified an intention to the miners in their employment of bringing about a change with regard to the day work system then in force in the underground workings. At the close of the month the Associated Companies brought forward a proposal for substituting contract for day work in the underground workings, and gave a month's notice to terminate the agreement then in force between them and their workmen. This notice would, in due course, have expired on July 31st, but early in the month the miners in meeting assembled determined to enter upon a strike in opposition to the proposed change. Thereupon an estimated number of 5,000 men left work thus breaking their contract with the mine-owners. At this time the financial depression which, beginning at the close of the year 1891 had markedly decreased the demand for labour in all the colonies, but especially in Victoria, created a large surplus body of workmen, from which the places of the withdrawn miners could be supplied. To check the influx of outside labour the miners established a system of "picketing." At the same time the mine-owners were requested to consent to a conference with their late employees. This they consented to do upon condition that the pickets posted round the mines should be withdrawn. This stipulation, not being acceded to, the negotiations for a conference fell through. On August the 16th the owners declared their intention of opening the mines for work, when, if their late employees failed to re-engage, their places would be filled from the open labour market. Upon the date in question, the miners having failed to so re-engage under the new conditions, the owners proceeded to carry out their intention of supplying their places. Bodies of labourers were drafted from the overstocked market of Victoria to the mines. Against this movement the miners offered such strenuous resistance as brought them into conflict with the civil power.

Though at this time the machinery of the Act had not been fully brought into operation, it was open to either party to have utilised it under the special provision contained in section 5. No action in this direction was however taken till on the 15th September Mr. Bourke, the miners' delegate in Sydney, made inquiry as to the steps to be taken by the miners to apply to go to conciliation, and produced a telegram

telegram signed by R. Sleath authorising him to obtain this information. It was supplied, and a telegram was filled in with the needed particulars. The same day the Government through its officers at Broken Hill arrested the strike leaders, of whom Richard Sleath was one, on a charge of conspiracy. Subsequently, further communications passed between the Department and the miners' representative at Broken Hill, and on the 21st October, Mr. Cann, M.L.A., lodged a formal application from the Barrier Company District, No. 3, of the Amalgamated Miners' Association, and other labour societies of the Barrier to go to conciliation under the Act. Richard Sleath and W. J. Ferguson, then under committal for trial, charged with conspiracy, were named as "Conciliators." Subsequently this application was withdrawn, pending the trial of the persons named, upon the understanding that, should they be acquitted, the application would be renewed, but otherwise the names of other persons would be substituted for them. Subsequently, on the 14th November, the formerly appointed Conciliators having been tried and found guilty of conspiracy, a fresh application, with other Conciliators appointed therein, was made, and on the 16th of that month the application was forwarded to the Barrier Ranges Mining Companies' Association. On the 19th November a reply was received from the mine-owners' representative, stating that at the time in question they had no dispute whatever with their employees.

"Employer" and
"employee."

The words "employer" and "employee" are not defined in the Act, although all conciliation and arbitration proceedings are, so far as this measure is concerned, conducted as between parties standing in these relations towards each other. Presumably when the relation ceases to exist the machinery of the Act is no longer applicable. It was pointed out in the daily press at the time that "The lesson is, that conciliation is a means for the prevention of strikes; and that strikes cut off access to the benefits of conciliation." It is questioned whether the conception of the relationship of employer and employed as a merely contractual one is always clearly grasped. The ideas of dependency and responsibility associated with the relationship of master and man in earlier days have their vestiges in the frequently manifested and even verbally expressed opinion, that a servant continues in that relationship even after the actual contract between the parties has come to an end. It is quite evident that long after a rupture of the contract between the mine-owners and their men, at Broken Hill, the latter still considered themselves to be the employees of the former.

In a voluntary Act, such as that now in force, it is immaterial in practice whether the actual relationship of employer and employed exists, as both parties by tacitly admitting it may come within the operation of the Act even after a strike, whilst on the other hand, before a strike, the refusal of either party to go to conciliation or arbitration makes the Act, so far as they are concerned, nugatory. In any Act, however, providing for a compulsory reference to arbitration the question of "employment" would necessarily be material.

South Clifton
dispute.

On the 2nd December an application was received from the South Clifton miners to go to conciliation with the mine-owners upon a scale of tonnage rates for coal-getting. The mining manager was communicated with and the application submitted to him. The regulations under the Act allow a fortnight within which a reply may be made acquiescing in the application. If by that time no reply be received it is taken that the party applied to refuses to come to conciliation. In this instance, though communicated with repeatedly during that time, the manager withheld any reply. At the termination of the fortnight the miners' representatives were informed of the failure of the negotiations, and on the 23rd December a letter was received from Mr. Saywell stating that an amicable settlement of the dispute with the miners had been arrived at and that it had not been considered necessary to seek the intervention of the Council.

Opening up
negotiations

Although the Act contemplates the first movement in the direction of conciliation or arbitration to be made by either one or both of the parties to a dispute and not by the Department, it was thought advisable to endeavour to stimulate the action by formally addressing an invitation to the parties to a dispute to submit their differences to conciliation or arbitration. This course, though not required by the Act to be taken, is not in conflict with any of its provisions, is in conformity with the practice in France and the United States, and has recently been adopted in England. In the State of New Jersey, for example, section 10 of the Act, for the creation of a State Board of Arbitration, declares, "That whenever a strike or lock-out shall occur, or is seriously threatened in any part of the State, and shall come to the knowledge of the Board, it shall be its duty, and it is hereby directed to proceed as soon as practicable to the locality of such strike or lock-out and put itself in communication with the parties to the controversy, and endeavour, by mediation, to effect an amicable settlement of such controversy."

Foreign
precedents.

Article 10 of the French law of Conciliation and Arbitration, 1892, provides that in the case of a strike, where the initiative has not been taken by either of the parties interested, the magistrate for the district shall invite them to meet in a Council of Conciliation.

In the case of the London Labour Conciliation Board, established during the great dock strike, it was at first decided never to interfere in a dispute unless application were made to it, but after some reference it was found expedient to issue invitations, couched in identical terms, to both parties.

In Mr. Mundella's Bill, introduced during the present session into the English Parliament, it is provided that "The Conciliator or Board of Conciliation shall inquire into the causes of the difference by communication with the parties and otherwise, and shall endeavour to bring about a settlement of the difference."

The New South Wales Department having no direct channel of communication by which news of labour troubles may be conveyed to it is dependent very largely upon the reports contained in the daily press, and as these reports frequently do not appear till the trouble therein referred to has reached its crisis, an opportunity is not afforded of earlier communication with the parties.

As matters stand at present, the action of the Department in extending an invitation to both parties to meet in conciliation may at any time be called into question, whilst on the other hand, if it do not do so, its usefulness as a mediatory power is nil. Up to the present time it has not, having in view this limitation of its powers and functions, been considered judicious for the Department to do more than address a letter to the disputants, calling their attention to the provisions of the Act and furnishing them with information and with forms of application.

In accordance with this procedure letters were on the 6th of January addressed to Messrs. Enoch Taylor and Company, boot and shoe manufacturers, and Mr. Alexander Porter, secretary of the New South Wales Amalgamated Boot Trade Union, and who represented a number of the firm's employees then on strike. Subsequently Mr. Porter waited on me, and on behalf of the employees on strike offered to submit the question of the price of work then in dispute to conciliation without reference to the firm's right to employ non-union labour. This letter was forwarded to the firm, who replied declining to entertain the offer. Subsequently Mr. Porter and others were committed for trial on a charge of conspiracy, but the Attorney-General declined to file an indictment.

Enoch Taylor & Co.'s dispute.

A great difficulty in the way of the successful working of any system of industrial conciliation and arbitration is the non-recognition by either party of the other party's trade organisation. It is generally admitted that the higher the organisation on both sides the greater the prospect of success for conciliation and arbitration methods. But this presupposes the frank recognition by each party of the other's Union or Association. Where the unavowed but real object underlying the action of either party is the disintegration of the other by destroying the force of its Union or Association, the matter becomes one of industrial warfare for a supremacy of power, and is beyond the sphere of conciliation or arbitration.

Non-recognition by employers of Trade Unions.

The experience of the Department has fully illustrated this fact; in some instances the master has said, "I am willing to meet my own men and treat with them, but I refuse to recognise any demand or request they make through their Union. I do not know the Union in the matter." The workmen on their part have replied, "We speak through our Union and demand the recognition of its delegates through whom alone we shall treat." In one instance the employer shut his eyes to the fact that he met at the Conciliation Board the local Trade Union secretary, who did not happen to be one of his employees, and in the end agreement was reached by the parties. In other cases the refusal to meet Union officials has been made a first consideration.

But not only is this condition of mutual non-recognition a serious obstacle in the way of initiating mediatory schemes, but it detracts from the value of the only substantial means by which the observance of an agreement or award can be secured. As a witness from the colliery districts before the English Royal Commission on Labour remarked:—"To secure the observance of awards it is necessary to establish on both sides strong organisations through which to reach disobedient individuals." The excessive zeal, the unjust demands, or on the other hand the arrogant assumption of power on the part of individual Unions or Associations may from time to time intensify an existent feeling of antagonism between the classes of employer and employed, but to ignore each other's existence would appear to be futile, and to attempt to destroy the forces of each other a mere waste of energy. The only terms upon which pacific negotiations can be carried out, it would appear from the body of opinion and experience at command, are those of full recognition of each other's organisation. These bodies furnish the elements of representation and guarantee which are essential to successful conciliation and arbitration.

In the Bill introduced last year in the New Zealand Assembly, and to be again brought forward by the present Ministry, the operations of the measure are proposed to be confined solely to employers on the one hand and employees' Unions on the other. The Kingston (South Australian) Bill recognises the Unions as an essential part of the industrial machinery, and our own Act, by confining the nominations of members for the two Councils to the registered Unions and Associations of the Colony, gives them a special status in regard to it. It may be added that the system of compulsory enforcement of awards provided for in the South Australian Bill depends entirely upon the full recognition of the principle of industrial organisation. The award is enforced against the organisation and not against the individual employees. In short, all experience tends to support the general proposition that where the organisations of employer and employed are permanently and highly organised, and are fairly equalised in power, the greatest hope of successful conciliation and arbitration is to be found.

On the 16th January, in consequence of certain representations made by the miners at Mount Kembla, a communication was addressed to the managing director, Mr. Ebenezer Vickery, to the effect that the men were desirous of going to conciliation upon the question of certain proposed reductions in the hewing rates. To this request the directors of the Mount Kembla Company eventually acceded, and on the 30th of January a Council of Conciliation met in the departmental rooms, 47, Phillip-street.

Mount Kembla dispute.

As this was the first Council assembled under the provisions of the Act, it may be desirable to briefly review the procedure. The Council was constituted under section 5 of the Act, and consisted of four (4) Conciliators, two (2) nominated by the employers and two (2) by the employees. Each party was represented before the Council by three managers. At a preliminary meeting the Council, consisting of Messrs. H. O. Macabe and C. J. Byrnes for the employers, and A. Campbell, M.L.A., and J. Richards for the employees, was requested to select a chairman from its number to control the proceedings, but as the members did not think this course advisable, the Clerk of Awards was requested to act in that capacity, though of course without a voice in any determination arrived at. The Principal Advocate, or Manager-in-chief as he is officially termed, for each side opened the case for his party, and he was followed by the other manager alternatively. At the conclusion of each address its subject matter was freely discussed with the Conciliators, and both employers' and employees' representatives freely submitted to be questioned by the opposite party. The meeting adjourned to the following day, when the addresses of the parties being concluded, and certain statements and memoranda being placed in the hands of the Conciliators, they retired, with the object of determining upon some scheme of compromise to be submitted to the managers for their consideration. A number of suggestions were made and fully discussed, but no compromise acceptable to the Conciliators as a body was arrived at, and when the Council again met the managers, the Clerk of Awards reported that the Conciliators had agreed to a resolution to the effect that they were unanimously of opinion (after having heard the statements of both parties) that some relief, having regard to the prevailing depression, should be afforded to the Company, but regretted they could not agree as to what form that relief should take. A general discussion then followed, and it was resolved, without dissent, that there should be a reduction in the existing scale of hewing rates. Proposals were then made and discussed; in some instances it being agreed to remit the particular item upon which the managers were at a dead-lock to the Conciliators, who then decided it. From time to time the Conciliators made suggestions, and throughout preserved good feeling between the parties. After giving
and

First Council of Conciliators.

and taking on both sides, the terms of the scale of rates were finally adjusted, and subsequently both parties signed an agreement, terminable by notice on either side, embodying the conclusions thus arrived at.

Experience gained.

The experience gained in the conduct of this Council was of much value. Throughout the proceedings were conducted with good feeling, any impetuous or ill-considered expression, if remarked upon, being at once withdrawn. The managers on both sides conducted their case with moderation and skill.

Utility of Conciliators.

A review of the proceedings suggests that the utility of the body of Conciliators consisted chiefly in its capacity of a board of reference, and the influence it exerted in maintaining harmony between the managers. Probably in future conciliation proceedings it would be found advisable to restrict the addresses of managers to a mere statement of the matters to be determined. In arbitration the principal object must necessarily be to make the arbitrators fully seized of the arguments pro and con, and addresses and evidence are essential to this end. It is not so, however, in conciliation. The Conciliators are not charged with the duty of determining the issues, but are present as persons whose position of detachment from the interests at stake enable them to look with less bias or prejudice upon the matter under consideration, and, therefore, their mere presence acts as a restraint upon party spirit. It is their moral influence, not their judicial capacity, that is valuable. The determination of the actual terms of agreement must always rest finally with the managers. The sooner therefore vital questions, upon which both sides are fully informed before meeting in conciliation are attacked, the better it must be. Both parties are aware that formal addresses in conciliation are mere preliminary skirmishing, and a waste of time to business men. Time on the other hand will be probably well spent in receiving and considering propositions and counter propositions from each side, and it is just at this point that the value of the Conciliator is greatest, for with tact and judgment he can do much to bring about that final agreement which is the object in view. To get at the crux of the matter as speedily as possible and with no more formality than is essential to the maintenance of order and good feeling, should be the spirit animating all who take part in conciliation proceedings. These proceedings were conducted in private, a merely formal record being furnished to the press. This course commended itself to those present.

Metropolitan Colliery dispute. First arbitration case.

On February 20th the miners formerly employed in the Metropolitan Colliery at Helensburgh, but then on strike, in a reply to a question put by the Clerk of Awards, stated that any offer coming from the Company to go to conciliation or arbitration would undoubtedly be accepted. The miners had struck on the 18th of February, on the question of a reduction in the hewing rates. The Company, upon being communicated with, agreed to submit the dispute to arbitration, and the Council accordingly met on the 28th February, the miners having in the meantime resumed work pending the hearing and the delivery of the award. In all applications made through me where the applicants have been on strike, I have requested them to constitute it an essential part of their offer that upon its acceptance by the other party to the dispute the men shall return to duty, and continue at work pending conciliation or arbitration, as the case may be. The proceedings were conducted at first in the rooms of the Department, but afterwards at the School of Arts. Addresses were delivered, and a number of witnesses called. Subsequently, at the desire of the parties, the mine was visited, and on the 13th of March the Council gave its award, and, in accordance with the provisions of the Act, certified copies thereof were transmitted to the representatives and published in the press. The miners expressed discontent at the terms of the award, and gave notice of their intention to strike. The managers of each party were thereupon invited to again meet the Council, and on the 24th of March did so, with the result that certain returns were placed before them, with the request that the facts therein disclosed, which had been duly considered in making the award, should be notified to the miners. This the manager-in-chief (Mr. George Henderson) promised to do. Eventually the resolution of the miners to go on strike was reconsidered and abandoned, the award of the Council being accepted.

In connection with this case every facility was afforded the Council by the Company to enable it to obtain a complete view of its position, it being understood that where facts which might affect its business relations, if made public, were given, they should be treated confidentially.

The terms of the award are still continued in force at this mine. It may fairly be claimed by the Department that the successful settlement of even this one dispute is a set-off to the cost of its maintenance. A strike at Helensburgh would probably have necessitated considerable expenditure in order to maintain the peace. The first application, upon a strike occurring, would be for additional police protection. What a strike may cost the country may be gathered from the case of Broken Hill. There it is estimated that the strike cost some £40,000 to the Customs' receipts, and a total loss to the State of £100,000; the expenses incurred with respect to the police force alone were £12,805 12s.

This view of the matter was pointed out by the press at the time, in the following words,—“A strike, therefore, has been averted. If it had been carried through it would have been a bitter one, and would have put the Government to the expense of sending down extra policemen, and finding quarters for them. The cost of government in the little village of Helensburgh would have mounted, and the Government would have been cheaply out of the business at £2,000. Yet the whole annual cost of the Arbitration Sub-Department is only £2,750. One moderate strike would cost more.”

Mount Pleasant Colliery dispute.

On March the 15th an application to go to arbitration was received from the Mount Pleasant Colliery miners, and the Manager of the Colliery Company (Mr. C. J. Byrnes) declined to go to conciliation, but subsequently agreed to meet a deputation from the miners, the application being withdrawn. A settlement was ultimately arrived at.

South Bulli Colliery dispute.

The miners at the South Bulli Mine applied on the 5th April to go to conciliation upon a proposed reduction in the hewing rate, but to this proposal the Board of Directors refused to accede.

Carters' strike.

On April 19th the attention of the contractor for the excavation works in connection with the new Municipal Market, whose carters were then on strike, was called to the provisions of the Act, and he was invited to make use of the Department. On the following day a letter was received from Messrs. Tate and Lawler, stating that they had been successful in arriving at a settlement with their draymen, and consequently would not need to resort to the Councils.

Towards the end of April a dispute arose in the Lithgow district between the mine-owners and colliers, consequent upon a proposed reduction of 6d. per ton in the hewing rate for coal. A ballot was taken among the miners in May to decide whether they should accept the rate offered by certain proprietors or strike if they did not get 2s. 2d., being 2d. less than the rate which had prevailed for some years before. The latter course was decided on by a large majority, and notice to this effect was given to the proprietors. Lithgow Colliery
dispute.

Early in May communications were addressed to the manager of the "Vale," one of the principal collieries in the district, and to the secretary of the local branch of the Australasian Miners' Association, directing their attention to the provisions of the Act, and asking them if their respective parties would be prepared to go to conciliation. Replies to these letters were received, stating in the one case that the miners were prepared to go to conciliation, and in the other that the letter had been sent to the Board of Directors. After further correspondence I visited Lithgow, and had an interview with the managing director of the Lithgow Colliery, one of the principal mines affected, who gave me to understand that the colliery proprietors, acting in association, would not refer the matter in dispute to either conciliation or arbitration and would not consider any proposal for a higher hewing rate than 1s. 10d. I also met the Delegate Committee of the miners, and put briefly before them the objects of the Act. The following morning I was informed that the miners intended to apply to go to conciliation, but if the employers wished they would be equally willing to go to arbitration. On the 30th May I consequently received a formal application from the miners to go to conciliation, and this, accompanied by a letter, I sent forward to Mr. Isaac Chapman, who was acting as secretary for the associated mine-owners. On 2nd June a letter was received from Mr. Chapman stating that the colliery owners had taken the communication into consideration and did not see their way to alter the decision arrived at respecting the hewing rate. Subsequently the owners succeeded in making their own terms.

At the close of the same month a dispute arose between employer and employees at the Riverstone Meat Works. The men had been working on a verbal agreement at certain rates and on certain conditions. Notice was given that on and after 3rd June the Company would require fifty-four sheep to be well dressed, clean, and free from cuts or tears in either mutton and skins for the sum of 10s., which was to be considered a day's work of eight hours. In the event of sheep not being available to kill, the men were to be paid only for the work actually done. The loading of sheep into the railway trucks was included in this price. The employees applied to go to arbitration upon the dispute, and the application was duly sent forward to Mr. Richards. No reply being received, a second communication was addressed to him, and again no acknowledgment was made of its receipt. The time expiring within which a reply could be made, a letter was sent to the secretary of the Amalgamated Slaughtermen and Journeymen Butchers' Union of New South Wales, informing of this fact, and that, consequently, it must be presumed that the Company absolutely refused to go to arbitration. Riverstone
butchers' strike

A matter of some consequence in the administration of the Act arose in this case. One of the arbitrators (Mr. P. J. Brennan) was also secretary to the Butchers' Union, and as the application from the employees was to go to arbitration, it would follow that a person closely interested in the dispute would be a member of the Council to hear the case and give an award. Under these circumstances Mr. Brennan offered to temporarily withdraw from the Council, and leave the whole matter in the hands of his colleagues. As, however, the employers refused to submit the case the necessity for taking this step did not arise. The strike has since been declared "off."

On the 1st June a letter was addressed to Mr. J. P. Franki, Managing Director of Mort's Dock, inviting him to submit a matter then in dispute between the Company and a number of its employees to conciliation. The Company had submitted to its employees that in view of the generally depressed condition of trade throughout the Colony the employees should spontaneously come forward and propose a reasonable reduction in wages, and also revise the system of payment for over-time work. A suggestion was made to reduce all hands earning over £2 per week by 10 per cent., and all earning under that sum by 5 per cent. The Secretary of the Local Branch of the Amalgamated Society of Engineers called upon me and obtained information with regard to the steps to be taken in order to go to conciliation. I then communicated with the Managing Director, and on the 3rd June I received a reply from Mr. Franki stating that he hoped to effect a settlement without the assistance of the Department. Subsequently a compromise was arrived at. Mort's Dock
dispute.

In June the decision of the Builders and Contractors Association, arrived at three months previously, to reduce the wages of men employed in the trade by 10 per cent. came into force. Meetings of the various Unions associated with the building trade, such as the bricklayers, carpenters, and plumbers were called, and the proposal discussed, in some instances a strike being proposed. On the 3rd June a letter was sent to the President of the Builders and Contractors Association expressing the hope that in the event of relations between the Association and the various Unions becoming so strained as to lead to the disaster of a strike, he would use his influence as President and also as a member of the Council of Conciliation to bring about a reference of the matters in dispute to either that body or the Council of Arbitration. Replying to this communication, the President (Mr. G. P. Jones) said that, in his opinion, there was no present necessity for the services of the Councils being brought into requisition, as the differences in connection with the wages question were not of so serious a nature that they could not be amicably settled between individual employers and their own men. The trade as a whole eventually accepted the reduced rates. Building trades
dispute.

On

Railway
employees
dispute.

On June 22nd, Mr. Robert Hollis, secretary of the Engine-drivers, Firemen, and Cleaners Association called on me to obtain information with regard to the steps required to be taken to enable the Government Railway employees to avail themselves of the provisions of the Act.

On the 27th June a number of Members of Parliament waited upon the Colonial Treasurer (Mr. See), in his capacity of Minister for Railways, with reference to the dispute. The interview was informal; the question which the Members desired specially to bring under the Minister's notice being "the desirability of having the dispute between the Railway Commissioners and the Railway employees referred to arbitration under the 'Trade Disputes Act.'" Subsequently the Minister replied in writing to the views submitted to him, and, in the course of that reply, said that "the suggestion that I should bring this matter before a Board of Conciliation or Arbitration overlooks the fact that the management of the railways and the control of the employees are placed by law in hands distinct from mine. It is for the Commissioners themselves to determine whether the efficiency of the Railway Service would be promoted by any such course, and whether the Trade Disputes Act was intended to meet cases like the present. In this respect also their decision must be final, and subject to no control of mine."

On the 29th June, an application was formally made by the requisite number of Railway employees, to submit certain matters then alleged to be in dispute between them and the Railway Commissioners to arbitration. The application was in due course forwarded to the secretary to the Commissioners, and on July 7th a reply was received, stating that there was no dispute between them and their employees. It was also stated that the Railways Act, which created and controlled "The Railway Commissioners of New South Wales," provided a remedy for the employees, if they considered they had any grievance or complaint; the same Act imposed duties and obligations upon the Commissioners in dealing with matters of the kind referred to by the applicants, and the Commissioners considered that they could not delegate their statutory duties to any other body. A copy of the reply was forwarded to the secretary of the employees' association, who in the course of acknowledgment of its receipt, expressed an opinion that the proper body to combat the reasons advanced by the Railway Commissioners for their refusal to allow the matters in dispute to go before it, was the Council of Arbitration itself. To this the Council directed that a reply should be sent stating that it was no part of its functions "to combat the reasons advanced by any party to a dispute against submitting such dispute to the Council. The duty of the Council was to hear disputes when brought before it, but not to remonstrate with the disputants as to their duty in submitting disputes to arbitration." The applicants then asked the Council of Arbitration to proceed with the hearing of the dispute, notwithstanding the absence of the Railway Commissioners. To this the Council replied that it had no power to listen to any *ex parte* statement unless the case had first been to conciliation and failed to be settled there. The present case had not been referred to conciliation, and therefore had not failed to be settled, consequently the Council had no power to hear it on the application of one party alone.

Subsequently the Council, at the request of the applicants, consented to receive a deputation from the Railway employees consisting of Messrs. Hollis and Fisher. The following is a record of the proceedings:—

MINUTES of meeting of Council of Arbitration held on Tuesday, 4th July, 1893, to receive a deputation from the Railway employees:—This meeting was called for the purpose of granting an interview to, and at the request of, Messrs. Robert Hollis and Alexander Fisher, representing the associated Government Railway locomotive engine-drivers, firemen, and cleaners.

Present:—The PRESIDENT (DR. GARRAN), MESSRS. A. KETHEL and P. J. BRENNAN, Arbitrators, and the CLERK OF AWARDS.

Messrs. Hollis and Fisher attended.

The President: We are present at your request to hear what you desire to place before us, but being a Council of Arbitration we can hear nothing as to the merits of your case nor say anything which would compromise us hereafter as judges of the dispute you allege with the Commissioners, should such dispute come before us. In other respects, however, we will be glad to hear anything you have to say.

Mr. Hollis: We quite understand what you have stated, and we do not wish, at this interview, to go into the merits of the case at all; but there is a matter we think it fit to place before you, and it is this. It is said that the Commissioners will not allow this dispute to go to the Council, and we consider that this is a matter which should have the consideration of yourselves and your colleagues. If the Commissioners cannot be brought to the Court of Arbitration then the whole scheme must fall to the ground. If the servants of the Government, for that is the position of the Commissioners as well as ourselves, can defy the provisions of an Act which the Government has brought into operation there seems to be no reason why any other employer of labour should submit his case to the Council. We thought, therefore, that this might be a matter which you could consider, not only with regard to our own dispute but with regard to other trade disputes in the Colony.

The President: What do you mean by defying the Act?

Mr. Hollis: I understand that the Act is optional, but if the Government allow its own servants to nullify its provisions by not coming to arbitration, there is very little hope that other employers will come in.

The President: The Railway Act was passed before the Trade Disputes Act. Had it been the other way no doubt the question of making disputes in the Service referable to the Council of Arbitration would have been raised as in the case of the Menindie Railway?

Mr. Hollis: Sections 76 and 77 of the Railway Act, in our opinion, deal with this matter—

76. * * * * It shall not be within the powers of the Commissioners to agree with the employees in their service to contract themselves out of the provisions of any Act of Parliament, or to compel them to forego any civil rights to which any Act of Parliament entitles them.

77. No regulation which the Commissioners are by this Act empowered to make in any way allowing or annulling any privileges or immunities, which their servants have previously enjoyed, or dealing in any way with hours of work or wages, shall have any force or effect until the same is confirmed by the Governor, nor until the said regulation has been published in the *Gazette* one week.

The President: What I understand you to contend is that since these sections provide that the Courts of law are not to be closed to Government railway employees, the implication set up is that this Court is morally on the same footing as the Courts of law?

Mr. Hollis: Yes; and again, in the *Government Gazette* notice of the first regulations issued under the Trade Disputes Act, and with regard to the constitution of the Councils of Conciliation and Arbitration, our own association is specially mentioned as one of the Unions which might be represented on those Councils.

The President: The railways?

Mr. Brennan: Yes.

Mr. Hollis: The New South Wales Amalgamated Railway and Tramway Service Association and the New South Wales Locomotive Engine-drivers' and Firemen's Association, which has since been merged into our own society, both nominated representatives.

The President: And that, you think, is a Government recognition of the Union?

Mr. Hollis: Yes, I think so. There can be no doubt about it.

Mr. Brennan: As a matter of fact, you say the railway employees were instrumental in the return of representatives to the District Council of Conciliation.

Mr.

Railway
employees
representatives
interview with
Council of
Arbitration.

Mr. Hollis : You will find that our Union is included in the list published in the *Government Gazette*.

The Clerk of Awards : The Trade Unions in that list are taken from the list of registered Unions kept by the Registrar of Trade Unions and Friendly Societies, no special selection from these was made.

The President : Then do you ask us to do anything in this matter.

Mr. Hollis : Of course we leave that for your consideration, but we thought that if we were afforded an opportunity of bringing these facts before you some good results might be obtained.

The President : I think this is a matter you should rather place before the Government than before us. We are not empowered to do anything in such a matter.

Mr. Hollis : But your influence would have effect. However, we think that what we have tried to lay before you is a matter which should have your consideration.

The President : I may mention that we have recently been considering the range of our duties. When the Act first came into operation I hoped that a voluntary measure such as this would be sufficient, but it has not been as successful as I hoped it would be. This fact is attributable, however, to a great extent to the extraordinary condition of things in which we are placed at the present time of commercial depression.

Mr. Hollis : We are advised that the Commissioners can be forced to come before this Court.

The President : Your adviser may think that the Act can be made compulsory as it stands, but the Attorney-General does not think so. He is not of that opinion.

Mr. Hollis : Perhaps the influence of the Council with the Government might have effect.

Mr. Kethel : I do not think the Government would exert any influence over the Commissioners, and I feel certain the Commissioners will not submit their case to this Court unless under compulsion. I do not know this for certain, but feel sure they will not.

The President : Would not the Commissioners say to the Government, "Why compel us to go to arbitration if you do not compel the shipowners to go?"

Mr. Hollis : If our case fails the Act fails altogether.

The President : What you want us to consider is whether we could do anything in the way of compelling the Commissioners to come to us.

Mr. Hollis : Yes.

The President : I do not think it is within our functions to do so. It may, however, be within our functions to speak to the Attorney-General on the points you have submitted. The Act at present presumes that both parties will voluntarily come to the Court.

Mr. Hollis : I don't know that we need take up any more of your time. We thought it was a question which might well engage your consideration. It is, undoubtedly, a serious matter, and lies at the root of the settlement of disputes by this Court.

The President : I look upon it as a very important matter.

Messrs. Hollis and Fisher then retired.

The Council resolved to wait upon the Attorney-General.

Subsequently, on July 15, the Council waited by appointment upon the Attorney-General, and laid before him the question thus raised and other matters in connection with the Department.

In a recently published work, entitled "Socialism and the American Spirit" (N. P. Gilman. Strikes on railways. London: MacMillan & Co., 1893), the question of the relationship in which railways stand towards the community in the United States, where, however, they are in the hands of private corporations, and are not Government property as here, is dealt with, and has in view of the preceding statements a special interest. He says:—"A strike on an important line of transportation * * at once retards the whole industrial machinery, and is injurious in an extreme degree, few persons being exempt from its more or less direct effects. This fact at once suggests that the terms of the labour contract between the railway, for instance, and its employees should be different from the form usually prevailing; that the employee on a railroad should be obliged by law to give notice, some time previous, of his intention to leave the service, and that arbitration should be applied to the case in a special manner."

The following recommendation was made by the New York State Board of Mediation and Arbitration with regard to railway strikes on the New York Central and Hudson River Railroad, in August, 1890, and the strike at Buffalo in August, 1892:—"Wages to be established at the time of entry and changed only by mutual agreement or decision by arbitration of a board chosen by the company and employees or by a State Board, or through the action of both, the latter serving as an appellate body. Other differences that may arise to be settled in like manner." New York Board of Arbitration.

In modern days the railway is so important an artery of food and fuel supply for the city that it might very fairly be regarded in the same light as gas and water companies.

The English Conspiracy and Protection of Property Act, 1875 (38 and 39 Vic., C. 86, S. 4) makes Conspiracy Act. it penal for a person employed by the municipal authorities, public companies, contractors, and others who have undertaken to supply gas or water, either alone or with others, wilfully and maliciously to break his contract of service, knowing or having reasonable cause to believe that the probable consequence will be to deprive the inhabitants wholly or to a great extent of gas or water.

It could scarcely be questioned that a combined strike of railway employees would create something more than a negative condition of want of the conveniences of transit. It would be a menace to the life of the community. But if, for these reasons, it were made penal for railway employees to strike, it would appear but just that they should have free and full recourse to some equitable tribunal outside of and distinct from the machinery of railway control.

By the New Zealand Bill the Railway Commissioners were to be made subject to its provisions, so New Zealand Bill. that the employees would be in the same position as members of a Trade Union, unorganised workers not being recognised in this measure.

The view that the peril to life and loss of property involved in such a strike is of vital public importance has been marked by recent decisions in the American Courts of Justice. In a late strike of railroad hands in one of the States the Court held that "the workmen had not the right to quit their work when by so doing life, property, or the interests of commerce are jeopardised."

In July a dispute arose between the Steamship Owners' Association and their seamen in consequence of the former's announcement of an intention to reduce wages by £2 a month. The average wages quoted prior to this announcement were as follows:—Firemen, £9; sailors, £7; donkeymen, £10; trimmers, £7; greasers, £9. Seamen's strike.

For some time previously this contingency had been anticipated. As far back as September last the prospect of a revision of the scale of wages had been in view. A local firm more recently had written to the Sydney branch of the Federated Seamen's Union, asking whether that organisation would give consideration to certain specially disadvantageous conditions under which the firm was labouring. In the reply by the Union to this communication appeared the following passage:—"This Union considers that the

the question of the men, rates of wages, and classification of steamers, can be more suitably and amicably arranged by the two organisations electing to submit their disputes to conciliation and arbitration under the Trade Disputes Act of this Colony." It should be mentioned that previous to the strike being declared, the steamship owners offered to meet delegates from the crews of their vessels in conference, but the men considered that this conference should be with the representatives of the Union, and refrained from attending the meeting called by the owners.

A ballot on the question of the proposed reduction was taken, about seventy vessels being represented. It resulted in a large majority of votes being registered in favour of a general strike against the Steamship Owners' Association. The strike was commenced on July 4th, and was extended to the ports of Melbourne, Brisbane, and Adelaide.

Proposals for a conference prior to the declaration of the strike had been made by the Seamen's Societies in both Melbourne and Sydney, and in each case the Masters' Association refused to meet the employees through their Union. Nearly a dozen intercolonial and coastal shipping firms were affected by the strike. The owners, as the crews left the vessels, filled their places with non-union labour engaged at the Bureau established by the Association. In very many cases the crews left before their articles expired, and Police Court proceedings were instituted against no fewer than ninety (90) in New South Wales early in the month, and against many others on later dates. The prosecutions were brought in some cases under the Imperial and in others the local Shipping Act. In the earlier cases of conviction, the sentence usually passed was fourteen days' imprisonment with hard labour, and sometimes with the forfeiture of wages then due. At a later period, towards the end of August, when the tension of the strike was less felt, sentences were made merely nominal, in one of the later cases the Presiding Magistrate being reported to have said:—"I am not here to be an instrument for the owners to inflict condign punishment on the men, especially as the strike is now at an end, according to the owners; and I certainly am not going to deal severely with these men who have lost their employment, most of them with families to keep."

Prosecutions also took place in the other Colonies.

Some time after the strike had been in force, the Federated Seamen's Union of New South Wales, despite the former refusal of the Associated Companies to confer with it, appealed for a conference to the Illawarra Steam Navigation Company, the North Coast Steam Navigation Company, the Newcastle and Hunter River Steam Navigation Company, and the Australasian Steam Navigation Company. In each case the Company refused to acquiesce in the proposal.

The North Coast Steam Navigation Company had originally given no notice of a reduction in wages, and apparently had no intention at the time the strike was declared of doing so. It was, however, treated on the same footing as the other companies, the strike being declared against the steamship owners as a whole, apparently without distinction of individual companies.

On July 4th, after interviews with the secretary of the Federated Seamen's Union of Australasia (New South Wales Branch), I wrote to the secretary of the Associated Steamship Owners, informing that body of the willingness of the seamen to submit the question of wages in dispute between them and the owners to arbitration. On July 13th, a reply was received in which it was stated that the Association did not see its way to join in the proposed reference to arbitration. It was further stated that "under no circumstances could this Association consent to proceed to arbitration with the Federated Seamen's Union, or to negotiate directly or indirectly with a body of men who have wantonly broken the agreements under which they were engaged, and who have done their utmost by gross misrepresentations to injure the business of the steamship owners."

The attitude of the Association towards its late employees, indicated by the above extract, was accentuated by the numerous prosecutions previously referred to, and an announcement by the Press that they refused to recognise Union seamen as applicants for employment. The owners estimated the number of seamen who had left their employment at about 350, and none of these, according to press reports, were to be employed again, at least for some considerable time to come, by the associated owners.

During the strike a dynamite explosion and other serious incidents were reported, but responsibility for the perpetration of these was promptly repudiated by the Union, and no proof of its association with them was then or has been since brought forward.

As the strike extended to the whole of the Australian Colonies, it, for some time being, became an intercolonial question. It was discussed in the Colonial Parliaments then in session, and federal action was suggested.

At the initiation of the strike the Honorable C. C. Kingston, Prime Minister of South Australia, suggested in a communication to the heads of Government in the sister colonies that they should co-operate in endeavouring to do everything possible to avert a strike. The following correspondence passed between the heads of Government:—

The Prime Minister of New South Wales, on 2nd July, received the following telegram from Sir Thomas M'Ilwraith:—"The following is my reply to the message of the Premier of South Australia:—"I would deeply deplore a general maritime strike, but do not think your proposal calculated to avert one. The most probable effect would be that the Government would satisfy neither party; at all events dissatisfy one and weaken their primary function of maintaining law and order. I hope that the masters and men will confer amicably, but do not see my way to any Executive action yet."

To this telegram Sir George Dibbs replied:—"I have wired to Mr. Kingston that I concur with you."

Sir George Dibbs, on the 3rd July, received the following letter from Mr. J. B. Patterson, Premier of Victoria:—"I have to-day sent the following telegram to the Prime Minister of Adelaide:—"We hope that there is no probability of a maritime or indeed of any other strike in these dull times. At present we fear any intervention by the Government would be inimicable. We do not see how, if we approve of the terms of settlement, we could force them either on owners or men, and we might be placed in a false position with one side or the other. I think in such cases perfect neutrality and preservation of order should be the primary consideration of the Government."

To this telegram Sir George Dibbs replied:—"Received your telegram, and also one from Sir Thomas M'Ilwraith. I have wired to South Australia concurring in the views expressed by Sir Thomas M'Ilwraith."

Sir George Dibbs, also on 3rd July, received the following message from Mr. C. C. Kingston:—"We replied yesterday to Queensland as follows:—"We are pleased that you agree with us in desiring conference of masters and men, and hope that on further consideration you will consent to co-operate in trying to bring this about. Of course no Government should identify itself with either side, but we venture to think that in the public interest all might join in seeking, by conciliatory suggestions, to prevent the threatened strike. So long as the community benefits we are comparatively careless of the approval of disputants, both of whom would be advantaged. Surely impartial efforts by moral suasion to prevent industrial strife cannot lessen the powers of the Executive to maintain law and order. We hope that you will be able to modify your views on consideration of above."

On

On July 12th, in the Queensland Legislative Assembly, it was moved, that "It is desirable in the interests of industrial concord that the Australian Union Steam Navigation Company should meet the representatives of their employees in conference, with a view to the peaceful settlement of their dispute by arbitration or conciliation; and, further, that the time has arrived when effect should "be given to paragraph 4 in the Governor's Speech by introducing a Bill providing for conciliation or compulsory arbitration in cases of industrial dispute." This motion, after a protracted debate, in which the question of State conciliation and arbitration was discussed, was withdrawn.

On Monday, September 4, it was resolved by the Seamen's Union to declare the strike off. It had then been in operation for nine weeks, and had had the effect, according to the Press reports, of throwing some 1,200 to 1,500 men out of work.

The situation at the conclusion of the strike may be summarised as follows:—

- (a) That the vacant places had been filled by non-union labour at the reduced rate of wages.
- (b) That the funds of the seamen's organisation had been severely taxed, if not drained.
- (c) That acute distress existed in the families of many of the men who had joined in the strike, on the one hand; whilst on the other many persons who had been out of employment had received work at the reduced rates.
- (d) That though some disturbance of the intercolonial shipping trade, involving risk and inconvenience, had occurred, yet it had never reached an acute stage, the supply of labour, though frequently of inferior quality, being sufficient for the requirements of the trade.

ENGLISH LEGISLATION.

During the past and present years definite steps have been taken in England in the direction of establishing State Boards of Conciliation and Arbitration. An exhaustive inquiry has been held by the Labour Commission into the questions affecting the relations between employer and employed; the combinations of employers and employed; and the conditions of labour which have been raised during the recent trade disputes in the United Kingdom; and whether legislation can with advantage be directed to the remedy of any evils that may be disclosed, and, if so, in what manner.

A mass of evidence has been given before this body of great historic value, presenting an almost exhaustive view of the conditions of labour in the United Kingdom. Of questions dealt with, the treatment of trade disputes is among the principal. The body of evidence on this point indicates that there "has been during the last twenty years a remarkable growth in all parts of the Kingdom of the institutions that make for industrial peace—the Board of Arbitration, the Joint Committee of Conciliation, and the sliding scale." In some trades the belief in conciliation is stronger than in arbitration, the consensus of opinion, however, being that any system of conciliation is incomplete without provision being made in the event of disagreement for a reference to arbitration. Both employers and employed are agreed upon this point.

Two rules seem to have contributed much to the success of the voluntary boards in the north of England—(Rule 1) Forbidding any suspension of work before the dispute has been referred, and prohibiting any suspension during the inquiry; (Rule 2) making the decision take effect, or date, from the time the dispute arose.

The compulsory element has been introduced by means of the organisation of the parties, and the adoption by each of a rule to refer disputes. One instance is given where a Trade Union expelled 400 of its members who refused to abide by an award of the Board of Arbitration.

The moral effect of the working of these Boards is described by one witness as "an education for both parties. Employers" he said "now took up a much less arbitrary position than they did before, and the men were much less suspicious and unreasonable, and much more amenable to their leaders, so that disputes never reached the acute stage on which they generally had their whole being formerly; and besides the concert of the reasonable majority of the employers with the reasonable majority of the men succeeded generally in keeping the unreasonable minorities of both in some control and subjection."

Boards of Conciliation and Arbitration have been established in connection with the following trades:—

Mining.
Iron and Steel Trades.
Ship-building and Marine Engineering.
Builders.
Clothing.
Pottery.
Textile.

During the London Dock Strike of 1889, the London Chamber of Commerce took in hand the working of a Labour Conciliation Board, and since its establishment the area of work undertaken by it has been widely extended. The functions of this Board are defined as follows:—

To promote amicable methods of settling labour disputes and the prevention of strikes and lock-outs generally, and also especially in the following methods:—They shall in the first instance invite both parties to the dispute to a friendly conference with each other. In the event of the disputants not being able to arrive at a settlement between themselves, they shall be invited to lay their respective cases before the Board. Or should the disputants prefer it, the Board would assist them in selecting arbitrators. The utmost efforts of the Board shall, in the meantime, and in all cases, be exerted to prevent, if possible, the occurrence or continuance of a strike or lock-out. The London Conciliation Board shall not constitute itself a body of arbitrators except at the express desire of both parties to a dispute, to be signified in writing, but shall, in preference, should other methods of conciliation fail, offer to assist the disputants in the selection of arbitrators, chosen either from its own body or otherwise. Any dispute coming before the Board shall, in the first instance, be referred to a conciliation committee of the particular trade to which the disputants belong. To collect information as to the wages paid, and other conditions of labour prevailing in other places where trades or industries similar to those of London are carried on, and especially as regards localities either in the United Kingdom or abroad, where there is competition with the trade of London. Such information shall be especially placed at the disposal of any disputants who may seek the assistance of the London Conciliation Board.

During the summer of last year there was a congress of the Chambers of Commerce of the whole Empire which passed the following resolution in favour of the establishment of Boards of Conciliation:—

Resolved, that the frequent recurrence of labour disputes has caused and is causing great damage to the commercial and manufacturing interests of the Empire. That it is extremely desirable in the best interests both of employers and employed that the re-adjustment of the rates and conditions of labour, which from time to time is inevitable, should be brought about without the wasteful and calamitous results proceeding from strikes and lock-outs. And that this Congress strongly recommends the formation of properly constituted boards of labour conciliation and arbitration in all important centres of industry and commerce throughout the Empire. (4934.)

Similar resolutions have been passed at the half-yearly meetings of the Associated Chambers of Commerce of Great Britain, and boards on the lines of the one established by the London Chamber have been formed, or are in process of formation, in the following towns:—Aberdeen, Bradford, Bristol, Cardiff, Croydon, Derby, Dublin, Dudley, Dundee, Edinburgh, Exeter, Glasgow, Gloucester, Greenwich, Grimsby, Halifax, Hull, Keighley, Leeds, Liverpool, Manchester, Morley, Newport (Monmouthshire), Nottingham, Plymouth, Rochdale, Wakefield, Walsall, Wolverhampton, Worcester, and Wrexham.

The attention of the legislature has been strongly directed to the questions of State interference in trade disputes, and during the present year no fewer than three measures with that object in view have been introduced.

The concentration of Parliament's attention upon a great constitutional question has, however, delayed progress with the social legislation of the year; but probably in view of the recent serious strike in the shipping trade at Hull, and the more recent one still in connection with the mining industry, the question of State conciliation and arbitration will receive increased attention. Among the supporters of these measures are such well-known politicians as Sir John Lubbock, Sir Albert Rollit, Sir G. Baden-Powell, Baron H. de Worms, Mr. Howell, and Mr. Charles Fenwick. One of the three Bills is a Government measure and was introduced by the President of the Board of Trade (Mr. Mundella), Mr. Burt, and Mr. Asquith.

The following is an abstract of the proposals of this suggested legislation:—

(a) A Bill to establish Councils of Arbitration in "Trade Disputes," brought in 1st February, 1893.

Bills introduced
in House of
Commons
(See Appendix).

This measure provided for the establishment of a Board of Conciliation and Arbitration in every County Council district. A Board of seven members would be appointed by the County Council in each district. Of the seven members two were to be employers or members of some Employer's Association, and two workmen or members of some Trade Union. The three remaining members were to be neither employers nor workmen, nor members of any Association representing employers or of any Trade Union.

When a trade dispute arose in any County Council District, the Board of that district, either upon application or without application of the parties, would put themselves in communication with such parties; invite them to a friendly conference, and endeavour by mediation to effect an amicable settlement of the dispute. If a settlement were arrived at it was to be embodied in a memorandum drawn up by the Board, and signed by the parties or their representatives. In case of failure to effect an amicable settlement, the Board "shall give public notice that they will hold an inquiry into the matters in dispute, and invite all persons interested to attend and give evidence thereat." The Board would be clothed with power to summon witnesses and administer the oath; such witnesses to be paid their travelling expenses and such further sum, not exceeding ten shillings a day, as the Board might think proper. At the conclusion of the inquiry the Board had to make a report stating the causes of the dispute, give its decision as to the proper settlement of the dispute, and state what parties (if any) were responsible for the same, and should publish such report in any manner they thought fit.

The essential principles of this Bill are:—

- (1.) The power of the Board to initiate an inquiry into the matter in dispute without depending upon an application by either or both parties.
- (2.) The obligation put upon the Board to report upon the dispute where such inquiry had been held.
- (3.) The power of the Board to summon witnesses to give evidence at such inquiry.

(b) A Bill to confer additional powers on Boards of "Conciliation and Arbitration," (brought in, 24 February, 1893.)

By this Bill provision was made for registration by the Board of Trade of Boards of Conciliation and Arbitration. Registered Boards were given power to summon witnesses and administer the oath. Where parties to a dispute agreed to accept the intervention of a Conciliation Board, that Board invited them to a conference and if a settlement were arrived at embodied the terms in a memorandum signed by the parties or their representatives. If a settlement were not arrived at it then became the duty of the Board to endeavour to bring about a reference to arbitration. A submission to arbitration was required to be by agreement in writing between the parties.

The essential principle of this Bill, as differentiated from the former Bill, is:—The dependence of the reference to conciliation or submission to arbitration upon agreement between the parties.

(c) A Bill to make provision for Conciliation and Arbitration in Labour Disputes brought in by Mr. Mundella, Mr. Burt, and Mr. Secretary Asquith, 17th April, 1893.

This measure—a Government Bill—empowered the Board of Trade where a difference existed or was apprehended between an employer or any class of employers and workmen, or between different classes of workmen, with respect to the terms or nature of their employment, to appoint a Conciliator or Board of Conciliation. It also empowered the Board of Trade to aid in the establishment of local Boards of Conciliation, and provided for the registration of local Boards, such registered Boards being required to furnish returns, and also reports of its proceedings, to the Board of Trade. The essential principle of this Bill is:—The registration of local voluntary Boards of Conciliation and Arbitration under the Board of Trade, and the taking of steps to aid in the establishment of such Boards.

FOREIGN LEGISLATION.

In the United States, since the "Homestead" strike (Mr. Carnegie's steel works) last year, the question of compulsory arbitration in trade disputes has been fully discussed in newspapers and magazines, and especially the *Arena* and *North American Review*. In the former a numerous list of writers, including such well-known names as those of Dr. Abbott and Chester A. Reed, have contributed opinions *pro* and *con* on the matter. The Knights of Labour, probably the most powerful organisation of workers in the United States, formulate their views as follows:—"At the hands of the law-making power of State and nation the Knights of Labour demand the enactment of laws providing for arbitration between employers and employed, and to enforce the decision of the arbitrators." They propose the following procedure:—Each side to appoint arbitrators, and the persons thus selected to appoint a chairman outside of their number. In the event of either side refusing to do so, then the Governor of the State to appoint a chairman. No strike or lock-out to be permitted till the decision of the Board is given. Provision for appeal.

Another body of labour representatives seek only a compulsory reference to arbitration, holding that no effectual means of enforcing the award can be devised, but that a full ventilation of the views of both sides will enable public opinion to exert its influence for or against any demand.

In Europe the present year has been marked by a number of important strikes in France, Belgium, and Spain. In Belgium the spectacle was presented of 50,000 workmen laying down their tools and fighting the civic guard because the legislature refused to grant manhood suffrage. This new development of unionism is reported to have had a successful issue, inasmuch as a promise was given to extend the suffrage.

In France, which may to some extent be regarded as the home of "Courts of Industry," an important measure was introduced at the close of last year.

By the courtesy of the French Consul resident in Sydney I have been enabled to read this measure and the instructions issued with it and translate the more important passages.

Masters and workmen between whom disputes arise are given power to refer such disputes in the first place to a Council of Conciliation, and in the second, failing agreement in conciliation, to a Council (or Committee) of Arbitration.

Either party may apply to a local Justice of the Peace, in writing, naming representatives chosen from among those interested, stating their case and requesting a conference. This application is required to be sent by the Justice to the opposite party within twenty-four hours, and the recipient is given three days unless cause be shown for an extension of time within which to reply. If the reply within the stated time agrees to conciliation, the Justice invites the parties or their representatives to meet in Council of Conciliation. Should agreement be there arrived at, the Justice, who presides at the conference, commits the terms to writing. If no agreement is come to, the parties may nominate arbitrators, who, if they disagree, may appoint an umpire, or failing their doing so, the President of the Civil Court has power to do so. The award is delivered to the Justice. If both parties fail to initiate proceedings in the way described and a strike occur, then the Justice has power to call upon the parties to acquaint him within the allotted three days,—

- 1st. With the subject matter of the dispute, and the names of the disputants.
- 2nd. If the parties are willing to go to conciliation or arbitration.
- 3rd. If willing to go to conciliation or arbitration, the names of their representatives.

If the offer of conciliation or arbitration is accepted, the matter proceeds as in the case where the matter is initiated by the parties themselves, but should they refuse, the powers conferred by the Act are exhausted, and the strike may proceed.

The measure, it will thus be seen, is purely voluntary in the initiation of inquiries, and also in the acceptance of the arbitration award. With regard to the object of this law, Mr. Bourgeois, late Minister of Justice, remarks:—"It is not intended to organise so much as to provide the means for organising Councils of Conciliation and Arbitration. The provisions of the law only become applicable when a dispute arises between the employer and his employees as a body on the conditions of employment. Even in this case, if the law offers its assistance, it does not impose it, faithful to the belief that conciliation ought to be voluntarily accepted, the parties not being subjected to coercion. It is not desirable to give any of these peaceful proposals the character of compulsion. The agreements arrived at in the Council of Conciliation, and even the award given by the arbitrators, commends itself to the respect and obedience of the parties only by its moral force. The law is a voluntary one from start to finish."

In contrast to the above statement it may be mentioned that it was reported in the public press some time ago to be the intention of M. Loubet to introduce a Bill into the Chamber of Deputies providing for compulsory arbitration in trade disputes.

COLONIAL LEGISLATION.

The text of the New South Wales "Trade Disputes Conciliation and Arbitration Act" has been adopted by the Legislature of the Colony of British Columbia, but there, in addition to the duties imposed in connection with the Councils, the Department has associated with it a bureau of labour statistics and industrial inspection. It is the duty of this bureau to inspect factories, examine into methods of production, their danger to employees, and the sanitary conditions in and around industrial establishments elsewhere. It is also its duty to see that all laws regulating the employment of children, minors, and women, and laws established for the protection of the health and lives of operators in workshops, factories, &c., are enforced.

The Nova Scotian measure is referred to elsewhere in detail.

In New Zealand the Bill providing for the establishment of a system of compulsory arbitration in trade disputes, introduced by the Ministry of the late Mr. Ballance, and thrown out by the Upper Chamber, will be again introduced, and the present Premier of South Australia, the Hon. C. C. Kingston, intends to re-introduce his comprehensive measure for establishing State machinery for enforcing arbitration in industrial disputes.

COMPULSORY

COMPULSORY ARBITRATION.

Compulsion.
Compulsory
enforcement (A).
Compulsory
reference (B).

The word "compulsion" as applied to arbitration has a dual meaning. There may be compulsory reference to arbitration, and there may be compulsion in enforcing obedience to an award, or there may be both jointly compulsory reference and compulsory observance as in the South Australian Bill.

The arguments for and against the different applications of the principle of compulsion are based for the most part on distinct grounds.

Compulsory
reference a
question of
expediency.

In compulsory reference to arbitration the whole argument, or the argument chiefly, turns upon the question of expediency, whereas in compulsory enforcement of awards a further question at issue is that of practicability. In the one case we ask, is it expedient? in the other, not only is it expedient, but possible?

A

Compulsory
enforcement of
awards.

Taking the compulsory enforcement of awards first, it is necessary to divide the subject matter into three parts—

- (a) Compulsion upon the employer and a large and indefinite number of employees.
- (b) Compulsion upon organised bodies of employers and employees.
- (c) Compulsion upon the employer alone.

Where em-
ployees are a
large and in-
definite number.

With regard to the first the difficulties in the way are manifest. Even if it were possible to compel employers—and this would apply to the individual members of an ordinary firm and not to a joint stock company—to observe the terms of an award, how could the multitude of employees be individually dealt with? It would in practice be found impossible to enforce penalties by any civil process upon men who refused to work.

Such a system could only be carried out by the employment of a military force to drive, somewhat at haphazard, a body of men into mines and factories. On the other hand it would not in the nature of thing be possible to force either a company or an individual employer to continue his enterprise upon terms that meant commercial loss, if not ruin. The general body of opinion is unanimously against a system of compulsory enforcement such as this.

Compulsion on
organised
bodies.

The second suggestion is that compulsion should be applied to the organised bodies on either side representing the interest of employer and employee respectively. This is a suggestion on a more practical ground for carrying out the principle of compulsory observance of an award.

Recognition of
unionism.

In the present "Trade Disputes Act" the principle of unionism, whether on the part of employers or employees, is recognised. Associated employers and employees alone are represented on its Councils. Non-organised employers and non-union labour are alike without representation. They may avail themselves of the good offices of the Councils, or indeed appoint a special council to deal with their disputes, but unionism, in employer and employee, is the essential qualification of an elector under this Act. But the recognition of unionism stops here. In the New Zealand proposed measure it was carried a step further. The Bill dealt with individual or associated masters on the one hand and associated workers only on the other. It was said that the class of labour disputes which caused loss and danger to the community had been confined nearly all over the world to quarrels between masters and organised unions of men. The Arbitration Court, to be established in that colony, was proposed to be clothed with large powers of compulsion against the Associations or Unions only. It was they who were to be coerced, and not the individual workers. Writers on labour questions contend that sooner or later the State will be forced into the recognition of the actually, though not necessarily, hostile forces of employers and employees associations. They point out that the hopeless breakdown of the *petite bourgeoisie* is the leading economic fact of our time. "The ring, the syndicate, is an inevitable form, both of producing and distributing machinery. The outcome will be the economic depression of the hitherto dominant middle class and the survival of the great capitalists. Facing them will be the great federated labour Unions, constantly becoming more and more international in character." It is with these two forces that the State will have to deal.

State recognition
of unionism.

Capitalistic
syndicates.

International
labour
organisations.

Recent displays
of the physical
power of
combined
labour.

The tendency of modern unionism is towards international reciprocity in labour warfare. This advance towards an international basis is illustrated by the development of the Miners' Federation of Great Britain. From individual Unions they have combined into a national federation, and in recent years international miners' congresses have been held, at which English, Belgian, French, and German representatives have been present. In England we have had, during the present year, the spectacle of an organised body of miners marching, in something akin to military order, upon collieries whose workers refused to answer the call to strike. We have seen the civil power paralysed by the aggressive attitude and the actual deeds of violence of the "unionists." Life and property have had to be protected at the point of the bayonet. If aggressive, or, as it is termed, "New" Unionism, can in the days of, comparatively speaking, its infancy, bring about a disturbance of social conditions such as this, what may it not do when its parts are knit together on a still wider basis, working in concert with the united labour of Europe. What its power is on the Continent can be gauged from the political victory of the suffrage secured by a demonstration of force on the part of labour in Belgium.

It is contended by some that from the experience of the past few years, the Maritime and Broken Hill strikes in our midst, the Homestead strike of last year in America, the strikes in Belgium and France, and the coal miners strike in Great Britain during the present year, the conclusion is inevitable that very speedily the State will be forced to interpose decisively between these two classes whose antagonism is reaching the point of intensity.

Alternatives
open to the
State.

There are, it is said, but two courses open to the State either to maintain the public peace by military force, or compel the parties to refer their disagreements in the same manner as disputes between individual and individual are referred, namely to the arbitrament of a Civil Court.

The "Stake-
holder" in
industrial
disputes.

It will have been observed in both the foregoing suggested methods of compulsory observance, provision for enforcing the award is made to apply only after the award is delivered. To use a simple illustration it is somewhat analogous to a wager upon an event to be decided by an impartial third party, and where no fourth party holds the stakes. In such a case the parties are dependent upon the sense of honour in each other to stand by the award of the umpire.

Would

Would it be possible to apply the principle of constituting a stakeholder to industrial disputes?

Apparently it is thought so for what is reported to be an effective system is in force in connection with the Regulation of Coal-mines in Nova Scotia. The Act in this British Dependency provides for the establishment of a Council of Arbitration to which disputes between employer and employed may be referred, the Council consisting of five persons, two appointed by and holding office during the pleasure of the Governor in Council, one by each of the parties to the dispute, and the fifth appointed by the two last-named nominees. Should either of the parties to the dispute fail, after one notice, to appoint members, the Commissioner of Works and Mines may appoint an Arbitrator, and a Board of three has then power to deal with disputes. The main point of interest is the means adopted for enforcing obedience to the award.

The Nova
Scotian Act.

As soon as an employer receives notice that a reference to arbitration has been granted he may retain the wages of all the employed concerned in the arbitration for fourteen days preceding the appointment of the arbitrators. The wages are required to be paid into some chartered Bank of the Province to the order of the Commissioner for Works and Mines, and in addition to this the employer has to pay into the account and out of his own funds a sum equal to the impounded wages of the employees. For example, if the wages for the fourteen days amount to £300 this sum must be paid in as withheld wages to the Commissioner's trust account and also another sum of equal amount by and on behalf of the employer himself. Then clauses 18 and 19 of the Act provide that:—

Clause 18. If the Board of Arbitrators decide against the employer, and the employer shall not submit at once to the award of the Arbitrators, the employer shall become liable for any amount equivalent to the wages of employed, or of any division of employed to whom arbitration has been granted, and in addition thereto be required to pay the employed, or any division of the employed to whom arbitration has been granted, the said fourteen days wages paid into the said chartered Bank, together with the amounts due to them, when demanded, and the Commissioner will pay to the employer the balance of amount of wages paid into the chartered Bank by the employer, after deducting costs of arbitration from said amount, and shall retain the amount equivalent to the said wages paid into the chartered Bank by the employer for the use and benefit of employed, or any division of employees, to whom arbitration has been granted, and shall pay the said amount to the agent of employed, or division of employed, who shall pay the same to the employed for their use and benefit in proportion to the amount of wages first retained by employer.

Clause 19. The cost of the arbitration shall be paid as awarded by the arbitrators; if to be paid by the employed, or any division of the employed, they shall be paid out of the funds in the chartered Bank by the Commissioner, as first wages, and the employer shall be credited with the amount so paid as first wages; if by the employer, to be paid by the Commissioner out of the money of the employer paid into the chartered Bank, as first wages.

Provision is also made prohibiting the employer from locking out employees or reducing their wages, and the men from striking, during the Arbitration.

This scheme suggests itself as being, out of many compulsory schemes proposed, one which contains a possibly workable idea. Also, it is free from any objection there may be to a legal status being given to unionism either among employees or employed. It recognises only master and men.

A possibly
workable idea.

As to compulsion upon the employer alone, the principal argument that has come under my notice is that in modern times the tendency of the employing class is to group into corporations, under which circumstances employer and employed rarely or never come into contact with each other, and the older and humane relations of master and man cease to exist, the workman being more and more regarded as a mere factor of industry, an economic unit. The employer is merged into the syndicate, and the employee becomes a mere supplement to machinery. Such a condition subjects the employee to a pressure that crushes out all but purely commercial results. If left unprotected from the remorseless pressure of the employer, the workman deteriorates as a citizen physically, morally, and intellectually.

Compulsory on
employer alone

The duty of the community is to guard its citizens against undue pressure by the commercial class as well as against the assaults of any other sectional interest in the State. In trade disputes, therefore, the advocates of this view would interpose arbitration between employer and employed, and fix the rate of wage. An enterprise which could only be carried out on the basis of a bare subsistence wage to its employees would, it is argued, instead of being conserved, be better done without from the point of view of the welfare of the community. Therefore, if the rate fixed dissatisfies the employer he may cease to carry on his enterprise since the community will not permit him to continue it upon conditions hurtful to its citizens. On the other hand, the option at the disposal of the workman would be to work at the rate fixed by award or seek other employment. As one writer puts it,—“We do not propose to establish slavery; we do not propose to compel any man to work under any other compulsion than such is involved in the law. ‘If a man will not work neither shall he eat,’ and no other compulsion would be required.” Another writer sums up the situation in the words—“Either the capitalist must rule, the workman must rule, some working arrangement between the two must be effected, or a third power must control and supervise.” That third power he holds to be the State.

To the political economist who regards this as an attempt to substitute an arbitrator acting as a moral “go-between” for the law of supply and demand, and the other non-moral causes operating, under existing conditions to regulate wages, they reply that laissez-faire must break down as a working hypothesis, and, as a matter of fact, has broken down, that already the citizen has had to be protected time after time from the unrestrained application of this law, as for example, by the Factory Acts. And the Legislature must continue to interpose in various directions as the struggle for life grows more intense. “Aggregated capital,” it is said, “will face organised labour, and what solution of the problem is possible but the mediation of the larger self, the State as against either exclusive capitalist or exclusive proletariat domination.”

Political
economy and
laissez-faire.

The only possible
solution.

B

With regard to the compulsory reference of trade disputes to arbitration the practical difficulty is not great. An inquiry is held, and persons whose evidence is required may be compelled to attend at the Council for examination. Upon facts thus elicited a report is drawn up and an opinion expressed. The only power, however, at the back of this judgment or award is such moral force as it may carry with the public. The power of public opinion when exerted is admittedly great, and its force is in proportion to its unanimity.

Compulsory
reference to
arbitration.

But, it is questioned by some, whether upon matters where there will always be a division of opinion, and into which no emotional element enters, public opinion can be relied upon as a force to take the place of fine or imprisonment.

Power of public
opinion.

What

Good results
from compulsory
reference

What good results might then be expected to flow from the compulsory reference of trade disputes to a State Tribunal of Arbitration? An American writer puts the case in the following words:—

No one could seriously propose in a free country to oblige a workman to work continuously for wages which he deems too low, or to compel an employer of labour steadily to pay wages which, in his opinion, are too high. Few thinking persons would desire to confront either employer or workmen with such a menace. The institution of compulsory arbitration in the sense of making the verdict of the Board binding upon both parties, whether they have invited its mediation or not, is plainly out of the question in America.

The advisability of obliging a State Board of Arbitration to pay immediate attention to labour troubles, without waiting for an invitation from either party, but with ample powers to take testimony is another matter. Such intervention has nothing in it necessarily offensive to the American spirit. The sole aim would be the ascertainment of the actual facts by a disinterested third party and the spreading of these facts before the people. When a State Board of Conciliation and Arbitration has been in existence long enough to command general confidence, and when it is supplemented, as in Massachusetts, by experts called in to give counsel in cases of particular difficulty, it is altogether likely that public opinion would come to favour the immediate intervention of such a Board in any labour trouble, to the extent of hearing testimony and rendering an opinion not legally binding upon either party in the absence of an express agreement by both parties to this effect.

Report of Royal
Commission on
Strikes.

This matter also received consideration at the hands of the New South Wales Royal Commission on Strikes. In paragraph 27 of the Official Report the Commissioners say:—

We have given careful attention to the question as to whether the tribunal we propose should have any compulsory powers. This question has to be considered on two sides; first, whether there should be compulsion in initiating the action of the Board, and, second, whether there should be compulsion in enforcing the decrees of the Court. As to the first point, we do not reject the doctrine that the State may legitimately interfere to prevent such colossal disputes as have already distracted our society, and are threatening to distract it still more. Looking at the laws as they exist now for the prevention of disturbances, and for forbidding incitement to disorder, it can hardly be contended that disputes which almost assume the character of civil war ought to be outside the cognisance of the guardian of the public peace. But we do not propose at present any such extension of principles already recognised as to give to the State Board of Conciliation a right to insist on both parties to a trade dispute bringing their case before it. It may, under conceivable circumstances, become expedient hereafter to give such powers, but the expediency should first be clearly proved. In establishing a tribunal for settling disputes that are not in themselves criminal, we think it best that the State agency should be called into action rather than act for itself. But, admitting this, the question still arises whether, if one party to the dispute calls for the action of the Board it should proceed to take such action even if the other party stands aloof. It is true that to allow one party to set the Board in motion would be, to a certain extent, to put compulsion on the other party, because it must either appear, or run the risk of having an award given in its absence. But this degree of compulsion is in the public interest clearly expedient. No quarrel should be allowed to fester if either party were willing to accept a settlement by the State tribunal. Industrial quarrels cannot continue without the risk of their growing to dangerous dimensions, and the State has a right in the public interest to call upon all who are protected by the laws to conform to any provision the law may establish for settling quarrels dangerous to the public peace.

English Royal
Commission on
labour.

The principle of direct State intervention in trade disputes, and official inquiry into their causes, appears to be attracting attention also in England. One of the witnesses before the Royal Commission on labour (Great Britain) expresses the following opinion:—

Inasmuch as a voluntary Board of Conciliation sometimes fails to effect a settlement or even to become constituted at all, there should be in the background a central Board of Mediation established for the whole country in connection with the new Labour Department. This Board should be composed of six persons elected by the Trades' Unions, and six by the Associations of Employers, with a Government official to act as umpire. In order to encourage settlement between the parties as much as possible, this Board should not be authorised to interfere until an outbreak actually took place. Then, if no appeal was made for a fortnight, it should investigate the matter on its own responsibility, publish the facts, and issue, as a mediator, a recommendation as to the lines on which the quarrel should be composed, trusting to public opinion to secure the recommendation being carried into effect. (Extract, 2,752-7, 2,767-81, 3,320-6, 3,441-75, 3,551-5, 3,565.)

The English
Labour Depart-
ment.

The Labour Department above referred to is a development of the Department, founded in 1886 by the Hon. Mr. Mundella, the President of the Board of Trade. It issues a labour gazette, supplying accurate information on subjects of special interest to workmen and workwomen, and also an annual report containing valuable information as to strikes in the Kingdom and prevailing rates of wages. It conducts special inquiries into important subjects bearing upon labour, such as the amount and causes of fluctuations of employment in certain seasonal and irregular trades, and their effects on the conditions and efficiency of the labour employed, the attempts made in the United Kingdom or abroad to relieve distress by providing public work either by relief work, municipal or national workshops, farm colonies, or the like, and the causes of their failure or success. In connection with this Department the President of the Board of Trade has also recently brought up a Bill to make provision for the establishment of voluntary Boards of Conciliation and Arbitration in labour disputes.

This measure (which has been referred to elsewhere) does practically no more than aid in the establishment of local Boards, giving the Department no power of mediation or of initiating inquiry. Commenting upon the Bill, an English journal remarks:—

The labour Bills of the English Government have had an important addition in Mr. Mundella's Arbitration Bill, introduced recently. It proposes to give the Board of Trade power to appoint Boards of Conciliation similar to those now in operation in nearly every large industrial centre in the Kingdom. But it is one thing to create a Board and another thing to set it to work, if the Bill is to be voluntary in its operation. Mr. Mundella will have to show how the second difficulty is to be got over. It will not do to create an authority which will be continually poking its nose into the affairs of men and masters; but if this new Board is to be effective, it must have compulsory powers, with proper safeguards. For instance, if one of the parties in the dispute wants arbitration, it ought to be able to compel the other to commit its case to the Board. Again, if neither party will bend itself to negotiate terms of agreement, as in the late cotton strike, and if by doing so they injure the public good, a resolution of a Town or County Council, or of the majority of Councils in the district affected, should be sufficient to bring the machinery of the Bill into operation. To take away the possibility of a useless strike or lock-out will take away the desire for it.

CONCLUSION.

In concluding this Report I desire to point out that if the results since the passing of the Trade Disputes Act have proved less hopeful than the well-wishers of this measure of industrial peace anticipated, it should not be forgotten that the circumstances of the Colony have been exceptional. The Act came into operation coincidentally with a period of great commercial and financial depression, when economic conditions pressed hardly upon master as well as man. I do not venture to say that, with public opinion not yet fully formed, any legislative measure would, under more favourable circumstances, have brought about an idealistic state of industrial harmony. But I am convinced the influence of the present Act would have been more decisively felt had economic conditions pressed less severely upon our industries and commerce.

Contemporary

Contemporary action shows that legislation such as this is in sympathy with modern conceptions. The evidence of an increasingly strong movement in the direction of State intervention between employer and employed cannot be denied, though that movement may by some be deprecated. Sectional or individual interests, whether of employer or employed, capitalist or worker, will, it would seem, be made ultimately subservient to what is conceived to be the welfare of the body social. Meantime, in this body, a war of interests is waging between the two great factors in production. It is a question of world interest how to check the strife. On every side of us steps are being taken—all more or less tentative—to end or mend this vital mischief. If success were reached it would need to be a vast expenditure that did not repay any community a thousandfold by ending, or in any appreciable degree lessening, the waste, personal suffering and class bitterness that are renewed with every industrial conflict.

APPENDICES.

A Bill to establish Councils of Arbitration in Trade Disputes.

A.D. 1893.

WHEREAS it is expedient to establish councils of arbitration and conciliation for the settlement of trade disputes :

Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows :

1. This Act may be cited as the Trades Disputes (Arbitration and Conciliation) Act, 1893.
2. This Act shall not apply to Ireland.
3. In this Act,—

Title.
Extent.
Interpretation.

The expression "district" shall mean the area under the authority of a county council.

The expression "county council" shall, in the application of this Act to England, include the council of a county borough.

The expression "employer" shall mean any person or body of persons, corporate or incorporate, employing not less than twelve workmen in the same business, or department of the business, in which the trade dispute has arisen.

The expression "workman" shall mean any person in the employment of an employer, as defined by this Act.

A "trade dispute" shall be deemed to have arisen whenever a difference exists between an employer and his workmen which may seriously affect the employer or the workmen, or when a strike or lock-out is threatened or has actually taken place.

The expression "board" shall mean a board of conciliation and arbitration as established under this Act for each particular district.

4.—(1.) A board of conciliation and arbitration shall on or before the first day of January, one thousand eight hundred and ninety-four, be established in every district. Constitution.

(2.) The board shall consist of five members, to be appointed by the county council in each district, of whom two shall be employers or members of some association representing employers, and two shall be workmen or members of some trades union, and one shall be neither an employer or workman, nor a member of any association representing employers or any trades union.

(3.) The first appointment by the county council shall be made on or before the first day of January, one thousand eight hundred and ninety-four, and the members so appointed shall hold office for two years, subject to reappointment.

At the expiration of two years from the first day of January, one thousand eight hundred and ninety-four, and of every subsequent period of two years, the county council shall again appoint five persons to be members of the board in place of the retiring members, and such persons shall, subject to reappointment, hold office for two years.

(4.) In case of the bankruptcy or lunacy of a member of the board he shall forthwith vacate his office of member.

(5.) The county council shall upon the death, bankruptcy, lunacy, or retirement of a member of the board, appoint some other person to act in his place for the remainder of the term for which he was appointed.

5. When a trade dispute has arisen in any district between an employer and his workmen the board of that district shall, upon application as hereinafter provided, and may without any such application, put themselves in communication as soon as may be with such employer and workmen, and invite the parties or their representatives to a friendly conference, and endeavour by mediation to effect an amicable settlement of the dispute; and if a settlement is effected, a memorandum of the terms shall be drawn up by the board and signed by the parties or their representatives, and a copy thereof shall be delivered to each party or their representatives, and the original kept by the board. Board in first instance to mediate.

6. The application above referred to shall be an application made by the employer or by ten per cent. or more of his workmen employed in the business or department of the business in which the trade dispute has arisen, or by his or their duly acknowledged agent, or by both parties. Such application shall contain a statement of the matters in difference between the parties. Mode of application to board.

7. In case of failure to effect an amicable settlement as is above referred to, the board shall give public notice that they will hold an inquiry into the matters in dispute and invite all persons interested to attend and give evidence thereat. Procedure in case of failure of mediation.

8. The board at the conclusion of the inquiry shall make a report stating the causes of the dispute, the decision of the board as to the proper settlement of the dispute, and what parties (if any) are responsible for the same; and shall publish such report in any manner they may think fit. Report.

9. For the purposes of the Act the board shall have power—

Powers of board

(a) To visit the locality where the trade dispute has arisen, and to hear all persons interested who may come before them :

(b) To summon any persons or experts to attend as witnesses or give evidence before the board; and in the case of any persons summoned refusing to attend to apply in a summary way to a Justice of the Peace having jurisdiction in the district for an order compelling such attendance, and such Justice of the Peace is hereby empowered to make such order :

(c) To administer an oath or to take an affirmation of any person attending as a witness before the board and to examine any such person on oath or affirmation.

10. (1.) The members of the board and the clerk (if any) appointed by them shall be paid such honorarium out of the funds of the county council for their services, as the county council may from time to time determine, and they shall also be reimbursed out of the funds of the county council for any expense incurred by them for obtaining professional assistance. Remuneration of members of board and other persons.

(2.) The witnesses summoned by the board shall be paid their travelling expenses and such further sum not exceeding ten shillings a day as the board may think proper.

- Expenses.** 11. All payments authorised to be made by this Act shall be paid out of the county council general assessment or rate of the nature of a general assessment of the district where the trade dispute has arisen. The county council in each district is hereby empowered to raise funds for these purposes if necessary to do so.
- Rules.** 12. The board in each district shall forthwith frame rules under this Act for the purposes of regulating their procedure. Such rules shall be submitted to and approved by the county council, and may from time to time be altered by the board with the like approval.

(*Endorsement.*)

A Bill to establish Councils of Arbitration in Trade Disputes.—(Prepared and brought in by Mr. Cayzer, Sir F. Dixon-Hartland, Baron Henry de Worms, Sir Geo. Baden-Powell, Mr. Fisher, Mr. Webster, Mr. Butcher, Sir H. Seymour-King, Mr. Wyndham, and Admiral Field.)—Ordered, by the House of Commons, to be printed, 1 February, 1893.

A.D. 1893.

A Bill to establish Boards of Conciliation and Arbitration in Trade Disputes.

BE it enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows :

Short title.
Extent.
Interpretation.

1. This Act may be cited as the Trade Disputes (Arbitration and Conciliation) Act, 1893.
2. This Act shall not apply to Ireland.
3. In this Act—

The expression "district" shall mean the area under the authority of a county council.

The expression "county council" shall, in the application of this Act to England, include the council of a county borough.

The expression "employer" shall mean any person or body of persons, corporate or unincorporate, employing not less than twelve workmen in the same business or department of the business, in which the trade dispute has arisen.

The expression "workman" shall mean any person in the employment of an employer, as defined by this Act.

A "trade dispute" shall be deemed to have arisen whenever any controversy or difference, not involving questions which can be decided in a court of law, exists between an employer and his workmen, or when a strike or lock-out is threatened or has actually taken place.

The expression "board" shall mean a board of conciliation and arbitration as established under this Act for each particular district.

Constitution of board.

4.—(1) A board of conciliation and arbitration shall on or before the first day of January, one thousand eight hundred and ninety-four, be established in every district.

(2.) The board shall consist of seven members, to be appointed as hereinafter mentioned, of whom two shall be employers or members of some association representing employers, and two shall be workmen or members of some trades union, and three shall be neither employers nor workmen nor members of any association representing employers or of any trades union.

(3.) The county council in each district shall on or before the first day of January, one thousand eight hundred and ninety-four, appoint seven persons to be the first members of the board. Such members shall, subject to reappointment, hold office for two years. At the expiration of two years from the first day of January, one thousand eight hundred and ninety-four, and of every subsequent period of two years, the county council shall appoint seven persons to be members of the board in the place of the retiring members, and such persons shall, subject to reappointment, hold office for two years.

(4.) In case of the bankruptcy or lunacy of a member of the board he shall forthwith vacate his office of member.

(5.) The county council shall upon the death, bankruptcy, lunacy, or retirement of a member of the board, appoint some other person to act in his place for the remainder of the term for which he was appointed.

(6.) Provided always, that, if and so long as in any district a board or body (other than a board established under this Act) exists which in the opinion of the county council adequately carries out the purposes for which boards are established under this Act, it shall not be obligatory on the county council in that district to appoint any persons to be members of the board in that district.

Board in first instance to mediate.

5. When in any district any trade dispute has arisen between an employer and his workmen, the board of that district shall upon application as hereinafter provided, and may without any such application, put themselves in communication as soon as may be with such employer and workmen and invite the parties or their representatives to a friendly conference, and endeavour by mediation to effect an amicable settlement of the dispute, and if a settlement is effected a memorandum of the terms shall be drawn up and signed by the parties or their representatives, and a copy thereof shall be delivered to and kept by the board.

Mode of application to board.

6. The application above referred to shall be an application signed by the employer, or by ten per cent. or more of his workmen employed in the business or department of the business in which the trade dispute has arisen, or by his or their duly authorised agent or by both parties. Such application shall contain a concise statement of the matters in difference between the parties.

Procedure in case of failure of mediation.

7. In case of failure to effect such amicable settlement as is above referred to, the board shall give due public notice of their intention to hold an inquiry into the matters in dispute, and invite all persons interested to attend and give evidence thereat, and shall thereupon hold such inquiry.

Report.

8. The board shall as soon as may be after the conclusion of the inquiry make a report and publish the same in such manner as they may think fit. Such report shall contain the decision of the board as to the proper settlement of the dispute in question, and also, in case the board so think proper, a concise statement as to the origin of the dispute and the causes inducing the same and what parties (if any) are in the opinion of the board mainly responsible for the same.

Powers of board

9. For the purposes of this Act the board shall have power—

- (a) To visit the locality where the trade dispute has arisen, and to hear all persons interested who may come before them.
- (b) To summon any person to attend as a witness before the board, and in the case of any person summoned refusing to attend to apply in a summary way to a Justice of the Peace having jurisdiction in the district for an order compelling such attendance, and such Justice of the Peace is hereby empowered to make such order.
- (c) To administer an oath to or take the affirmation of any person attending as a witness before the board, and to examine any such person on oath or affirmation.

Remuneration of members of board and other persons.

10. (1.) The members of the board and the clerk (if any) appointed by them shall be paid such sums for their services and expenses as the county council may from time to time determine.

(2.) The witnesses summoned by the board shall be paid their travelling expenses and such further sum, not exceeding ten shillings a day, as the board may think proper.

Arbitration rate.

11. All payments authorised to be made by this Act shall be made by and out of the funds of the county council of the district where the trade dispute has arisen, and the county council shall have power (if necessary) to raise funds for that purpose.

Rules.

12. The board in each district shall forthwith frame rules under this Act for the purposes of regulating their procedure. Such rules shall before they become binding be submitted to and approved by the county council, and may from time to time be altered by the county council with the like approval.

(*Endorsement.*)

A Bill to establish Boards of Conciliation and Arbitration in Trade Disputes.—(Prepared and brought in by Mr. Butcher, Sir F. Dixon-Hartland, Sir G. Baden-Powell, Mr. Fisher, Mr. Webster, Sir Seymour-King, Mr. Wyndham, Admiral Field, and Baron H. de Worms.)—Ordered, by the House of Commons, to be printed, 2 February, 1893.

A Bill to confer additional powers on Boards of Conciliation and Arbitration.

A.D. 1893.

WHEREAS it is expedient to encourage and facilitate the settlement of disputes between masters and their workmen by methods of conciliation and arbitration, and with that object to invest boards established for the purpose with certain statutory powers:

Be it therefore enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:

1. This Act may be cited as the Conciliation and Arbitration Boards Act, 1893.
2. In this Act the expression "Conciliation Board" means a conciliation and arbitration board registered under this Act.
3. Any board, established either before or after the passing of this Act, which is constituted for the purpose of settling disputes between masters and workmen by conciliation and arbitration, and which consists of any number of persons representing masters and workmen in equal proportions, may apply to the Board of Trade for registration as a Conciliation Board under this Act.

Such application must be accompanied by copies of its constitution by-laws and regulations, together with such further information (if any) as the Board of Trade may require; and the Board of Trade shall, if satisfied that such board consists of an equal number of representatives of masters and workmen, and that its constitution by-laws and regulations are reasonable and proper, thereupon enter its name and principal office and such other particulars as the Board of Trade may think fit, in a register kept by the said Board under this Act. A Conciliation Board registered under this Act shall furnish such return, reports of its proceedings, and other documents as the Board of Trade may from time to time require.

A Conciliation Board registered under this Act shall so long as its name remains on the register be entitled to exercise the powers of this Act.
4. The Board of Trade, if satisfied that any board so registered has ceased to comply with the provisions of this Act, may remove its name from the register, and such board, after notice of such removal, shall cease to be entitled to exercise any of the powers of this Act.
5. Proceedings for the settlement of disputes between masters and workmen through a Conciliation Board shall be conducted in accordance with the rules set out in the schedule to this Act.
6. Any Conciliation Board, and any arbitrator or umpire appointed under this Act, shall have power in an arbitration or conciliation proceedings under this Act to examine on oath or affirmation the parties and witnesses appearing before them, and to administer an oath to, or take the affirmation of, the parties and witnesses accordingly.
7. Any party to an arbitration or conciliation proceedings under this Act may sue out a writ of subpoena ad testificandum, or a writ of subpoena duces tecum; but no person shall be compelled under such writ to produce any document which he could not be compelled to produce on the trial of an action, nor to produce books or accounts of profit and loss, nor to produce the books or accounts of any trade union, nor to answer any question as to profit or loss which he objects to answer.
8. (1.) A judge of the High Court may order that a writ of subpoena ad testificandum or of subpoena duces tecum shall issue to compel the attendance in an arbitration or conciliation proceedings under this Act of a witness wherever he may be within the United Kingdom.
- (2.) A judge of the High Court may also order that a writ of habeas corpus ad testificandum shall issue to bring up a prisoner for examination in an arbitration or conciliation proceedings under this Act.
9. Any person who, being examined on oath or affirmation, wilfully and corruptly gives false evidence in an arbitration or conciliation proceedings under this Act, shall be guilty of perjury as if the evidence had been given in open court, and may be dealt with, prosecuted, and punished accordingly.
10. A Conciliation Board, or any arbitrators or umpire appointed under this Act, shall have power to correct in an award any clerical mistake or error arising from any accidental slip or omission.
11. If an arbitrator or umpire dies, or refuses to act, or becomes incapable of acting, his place shall as soon as practicable be supplied by the Conciliation Board, or by the Board of Trade, in the case of an umpire appointed by that Board.
12. Where the parties to any labour or trade dispute arising out of an existing agreement, enforceable at law, have agreed in writing to submit the matter to arbitration under this Act, the award on such submission shall be final, and may by leave of the High Court or a judge be enforced in the same manner as a judgment or order of the High Court to the same effect:

Provided always that nothing in this Act shall be taken to authorise a Conciliation Board, or any arbitrators or umpire, to fix compulsorily a rate of future wages, or price of labour or workmanship, at which the workmen shall in future be paid, save as hereinafter provided.
13. If both or all the parties to any labour or trade dispute have agreed in writing to submit to arbitration under this Act any question dealing with the rate of future wages, or price of labour or workmanship, and have each voluntarily deposited with the Conciliation Board a sum of money, or satisfactory security for a sum of money, to be forfeited as a penalty by such party, if he breaks the award when made, the Board or arbitrators or umpire, may insert in the award a clause providing that such penalty shall in the event of breach of the award by either party be paid over to the other party and such penalty, if incurred, may be recovered in a summary manner.
14. The provisions of the Arbitration Act, 1839, shall not apply to arbitrations under this Act.
15. The following Acts are hereby repealed; that is to say,

The Masters and Workmen Arbitration Act, 1824.

The Councils of Conciliation Act, 1867.
16. This Act does not extend to Scotland or Ireland.

SCHEDULE.

PART I.—CONCILIATION.

Where parties to a labour or trade dispute have invoked or agreed to accept the intervention of a Conciliation Board the following procedure shall be adopted:—

1. The Board shall invite the parties or their representatives to a friendly conference in some building suitable for the purpose.
2. Two or more members of the Conciliation Board, representing respectively the interests of masters and workmen, shall attend such conference; and, if desired by the parties or their representatives, shall afford all the assistance in their power towards effecting a settlement of the dispute, and one of them may preside as chairman.
3. If a settlement of the dispute be effected a memorandum of the terms thereof shall be drawn up and signed by the parties or their representatives, and a copy thereof shall be delivered to and kept by the Board.
4. If a settlement of the dispute be not effected, the members of the Board attending the conference shall then endeavour to bring about a reference to arbitration under this Act.

PART II.—ARBITRATION.

Where parties to a labour or trade dispute have agreed in writing by their representatives (either without or after proceedings for conciliation under this Act) to submit the matters in dispute to arbitration under this Act, the following provisions shall apply:—

1. The submission as regards disputes arising out of existing agreements enforceable at law, unless a contrary intention is expressed therein, shall be irrevocable, except by leave of the High Court or a judge; and shall have the same effect in all respects as if it had been made an order of the court.
2. The Conciliation Board shall, as the parties may prefer, either act as arbitrators themselves, or shall appoint arbitrators of whom an equal number shall be chosen to represent the masters and an equal number shall be chosen to represent the workmen; and such arbitrators may either be members of the Board or not.
3. The arbitrators (which expression hereinafter includes a Board when acting as arbitrators) shall make their award in writing as soon as practicable within one month after entering on the reference, or after having been called on to act by notice in writing from any party to the submission, or on or before any later day to which the arbitrators by any writing signed by them may from time to time enlarge the time for making the award.

4. The parties to the reference shall, if the arbitrators or umpire so desire, submit to be examined by the arbitrators or umpire on oath or affirmation in relation to the matters in dispute.

5. If the arbitrators have allowed their time or extended time to expire without making an award, or have given notice in writing to either party that they cannot agree, the Board may, with the consent of both parties, appoint an umpire. If such consent is not obtained within a reasonable time the Board of Trade, on the application of the Board, shall appoint an umpire.

6. The umpire shall make his award as soon as practicable within one month after the original or extended time appointed for making the award of the arbitrators has expired, or on or before any later day to which the umpire by any writing signed by him may from time to time enlarge the time for making his award.

7. Subject to the restrictions by this Act imposed on fixing a rate of future wages or price of labour or workmanship, the award to be made by the arbitrators or umpire shall be final and binding on the parties and the persons claiming under them respectively.

8. Copies of the award, authenticated by the signatures or signature of the arbitrators or umpire, shall be delivered to the representatives of each of the parties and to the Conciliation Board.

(Endorsement.)

A BILL to confer additional powers on Boards of Conciliation and Arbitration.—(Prepared and brought in by Sir John Lubbock, Mr. Charles Fenwick, Mr. Howell, Mr. Mather, Mr. Montagu, Sir Francis Powell, and Sir Albert Rollit.) Ordered, by the House of Commons, to be printed, 24 February, 1893.

A.D. 1893.

A Bill to make provision for Conciliation and Arbitration in Labour Disputes.

BE it enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:

Power of Board of Trade to appoint conciliator or board of conciliation.

1.—(1.) Where a difference exists or is apprehended between an employer, or any class of employers, and workmen, or between different classes of workmen, with respect to the terms or nature of their employment, the Board of Trade may, if they think fit, on the application of any of the employers or workmen, appoint a person or persons to act as conciliator or as a board of conciliation.

(2.) The conciliator or board of conciliation, shall inquire into the causes of the difference by communication with the parties and otherwise, and shall endeavour to bring about a settlement of the difference.

Power to aid in establishment of local boards of conciliation.

2. If it appears to the Board of Trade that in any district or trade where disputes are of frequent occurrence adequate means do not exist for having disputes submitted to a local board of conciliation, they may appoint any person or persons to inquire into the conditions of the district or trade, and to confer with employers and employed with the view of establishing a local board of conciliation or arbitration composed of representatives of employers and employed.

Registration of boards of conciliation.

3.—(1.) Any board established either before or after the passing of this Act which is constituted for the purpose of settling disputes between masters and workmen, or between different classes of workmen, by conciliation or arbitration, may apply to the Board of Trade for registration.

(2.) The application must be accompanied by copies of the constitution and regulations of the board of conciliation or arbitration, with such further information, if any, as the Board of Trade may require, and thereupon the Board of Trade may, if they think fit, enter in a register to be kept by them for the purpose, the name of the board of conciliation or arbitration, and its principal office, such other particulars as the Board of Trade may think expedient.

(3.) Every board of conciliation or arbitration registered in pursuance of this Act shall furnish such returns and reports of its proceedings as the Board of Trade may from time to time require.

Reports to Board of Trade and to Parliament.

4.—(1.) All persons appointed by the Board of Trade in pursuance of this Act shall report their proceedings to the Board of Trade, and all such reports, and also all reports made to the Board of Trade by any local board of conciliation or arbitration, shall be laid before Parliament.

Short Title.

(2.) The Board of Trade shall present to Parliament annually a report of their proceedings under this Act.

5. This Act may be cited as the Conciliation Act, 1893.

(Endorsement.)

A Bill to make provision for Conciliation and Arbitration in Labour Disputes.—(Prepared and brought in by Mr. Mundella, Mr. Burt, and Mr. Secretary Asquith.—Ordered, by The House of Commons, to be Printed, 17 April, 1893.)

The law of the 27th December, 1892.

Loi sur la conciliation et l'arbitrage facultatifs en matière de différends collectifs entre patrons et ouvriers ou employés.

THE Senate and the Chamber of Deputies have adopted,

The President of the Republic has promulgated a law, the tenor of which is as follows:—

1. Employers, workmen or employees, between whom a collective dispute (*différend d'ordre collectif*) has arisen bearing upon the conditions of work, may submit the questions at issue to a Committee of Conciliation, and in default of settlement at this Board to a Council of Arbitration, both of which will be constituted as follows:—

2. The employers, workmen, or employees, may address, either jointly or severally in person or by representatives, to the Magistrate of the district (*juge de paix du canton*), or of one of the districts, in which the dispute exists, a writing containing—

(1) The names, occupations, and residences of the applicants, or of those whom they represent.

(2) The subject matter of the dispute, with a succinct statement of the allegations made by each party.

(3) The names, occupations, and residences of the persons to whom the proposal for conciliation or arbitration ought to be notified.

(4) The names, occupations, and residences of the delegates, chosen, from among those interested, by the applicants to assist or represent them, provided always that the number of persons so designated be not more than five.

3. The Magistrate shall make an official acknowledgment of this application, and note the date and hour of its deposit; and shall notify the fact without fee and within twenty-four hours to the opposite party or their representatives by a registered letter, or, if need be, by notices affixed to the notice boards at the official residences of the Magistrate and the Mayor of the district within which the dispute exists.

4. On the receipt of this notification, and within not later than three days, the other interested party may forward their reply to the Magistrate. If they neglect to do so their silence shall be taken as a refusal to accept the offer. If they accept they will notify in their reply the names occupations and residences of the delegates chosen to assist or represent them, provided always that the number of persons so designated be not more than five. If the distance at which the persons notified reside, or their absence from home, or the necessity for consulting principals, partners, or any board of control, will not allow of a response within the three days, the persons to whom the notification has been sent ought, during this period, to declare that an extension of time is necessary to enable them to reply. This declaration shall then be transmitted by the Magistrate to the applicants within 24 hours.

5. If the proposal is accepted, the Magistrate, without delay, shall invite the parties, or the delegates named by them, to meet in Committee of Conciliation. The meeting shall take place in the presence of the Magistrate, who shall be at the disposal of the Committee to direct the proceedings.

6. If agreement be arrived at in Committee upon the terms of conciliation, these terms shall be embodied in a formal report (*procès-verbal*), drawn up by the Magistrate, and signed by the parties or their delegates.

7.

7. If agreement be not arrived at the Magistrate shall invite the parties to select either one each, or several arbitrators, or a joint arbitrator. If the arbitrators are unable to agree upon an award, they may select an umpire to give a casting vote.

8. If the arbitrators cannot agree either upon an award nor the choice of an umpire, they will declare so in a formal report, and an umpire shall then be chosen by the President of the Civil Courts upon sight of the report, which will be transmitted to him with all expedition by the Magistrate.

9. The award having been arrived at, drawn up, and signed by the arbitrators, shall be remitted to the Magistrate.

10. In the case of a strike (*la grève*), in default of action being initiated by those interested, the Magistrate shall officially request, in the way indicated in Article 3, the employers, workmen, or employees, or their representatives, to acquaint him within three days with—

(1) The subject matter of the dispute, with a succinct statement of the allegations made.

(2) The acceptance or refusal of a proposal for recourse to conciliation or arbitration.

(3) The names, occupations, and residences of the delegates chosen, should it so happen, by the parties, provided always that the number of persons so designated by each party be not more than five.

The time allowed to be enlarged beyond the three days for the causes and under the circumstances indicated in article 4. If the proposal is accepted matters will proceed in conformity to article 5 and following articles.

11. The formal report and decisions mentioned in articles 6, 8, and 9, preceding are retained in the charge of the magistrate, who shall deliver a copy thereof to each of the parties, and address another to the Minister of Commerce and Industry by the hands of the Prefect.

12. The application for conciliation and arbitration, the refusal, or absence of reply on the part of the other party, the decision of the Committee of Conciliation, and award of the arbitrators, notified by the Magistrate to the Mayor of each of the districts where the dispute exists, shall be made public by affixing notices to the places reserved for official publications. These notices may be further circulated by persons interested, and will be exempt from postage.

13. The rooms necessary for holding the Committees of Conciliation and Councils of Arbitration shall be provided, warmed, and lighted by the local authorities of the districts in which they are held, the cost in connection therewith being comprised in the necessary expenses of the local government. The fees of the Committees of Conciliation and Councils of Arbitration will be fixed by regulation of the Prefect of the Department and charged against the Departmental Budget as necessary expenses (*dépenses obligatoires*).

14. All matters in writing done in carrying out this law will be exempt from postage, and be registered free of charge.

15. The arbitrators and the delegates named in carrying out this law shall be French citizens. In the callings or industries where women are employed they may be named as delegates conditional upon their being of French nationality.

16. This law is applicable to the colonies of Guadeloupe, Martinique, and Reunion.

This law, considered and adopted by the Senate and by the Chamber of Deputies, shall be executed as the law of the State.

Fait à Paris, le 27 Décembre 1892.

CARNOT.

1893.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

WEIGHTS AND MEASURES DEPARTMENT.

(MINUTE BY THE MINISTER OF JUSTICE RESPECTING WORKING OF.)

Ordered by the Legislative Assembly to be printed, 23 November, 1893.

Minute Paper.

Department of Justice, Sydney, 25 July, 1893.

Subject :—The working of the Weights and Measures Department, and the charges against the Inspector.

THE existing law in regard to weights and measures is singularly incomplete and inadequate. The statute now in force, which was passed in 1852, establishes standard weights, and a system of comparison, stamping, and inspection, but the standard weights are only those used on the ordinary beam and counter scales. No such provision is made with regard to other kinds of weights, nor for the comparison or testing of scales, weighing-machines, or weigh-bridges. Indeed the Act appears not to have contemplated the existence of that large class of weighing appliances by means of which by far the greater proportion of the trading business of the country is now carried on.

Mr. Evans was appointed Inspector under this Act by the Sydney Bench of Magistrates some ten years ago, the appointment carrying with it the duties of Inspector under the Acts regulating the sale of coal and bread. According to the Departmental arrangements, the Inspector is under this Department, which pays his salary—£300 a year. An office, all necessary apparatus and quarters are supplied him. He is entitled to all fees collected, and such proportion of each fine inflicted as the Magistrate may apportion to him upon conviction under the various Acts which authorise him to prosecute. Out of these sources of revenue he defrays the expenses incidental to the performance of his duties, and keeps the balance, if any, for his own use. Hitherto the Sydney Bench appear to have exercised neither supervision nor control over him. As far as I can learn, he has not, except on rare occasions, received any instructions or directions as to his duties from this Department, nor has he ever been asked by the Bench or by this Department to account for any fees, fines, or other moneys, received by him in the discharge of his duties; indeed, Mr. Evans seems to have been allowed to take up a position which, both in his own interests and that of the public, no officer should be allowed to occupy. Charged with the administration of an Act, in the enforcement of which a great deal of discretion must be used, if it is to be made effective, he has been left to his own devices in the defining of his powers and duties, whilst in the imposing and collecting of the fees which formed a considerable portion of his income, he has been allowed to become practically irresponsible. In this state of things, no doubt brought about in the first instance by the divided control of the Bench of Magistrates and this Department, under which the Act has placed the Inspector, it is not surprising that his administration should have created some dissatisfaction; indeed, the strongest testimony in favour of the general efficiency and integrity of his administration is afforded by the fact that notwithstanding the unpopular nature of his duties, and the large number of prosecutions instituted by him, so few persons have come forward to make charges against him.

In view of the serious nature of the complaints against Mr. Evans, and their bearing upon the existing law and system of administration, I saw that a searching inquiry into the whole system of law and administration in reference to weights and measures, as well as into Mr. Evans' conduct, was necessary, to enable me to arrive at a satisfactory and practical conclusion. I, therefore, appointed a Board, consisting of Mr. W. M. Macfarlane, P.M., Inspector of Petty Sessions Offices (Chairman), Mr. Dixon, Lecturer on Chemistry at the Technical College, and Inspector Larkin, of the Police Force, to inquire fully into the whole subject, take evidence, and report to me the result of their inquiries. The Board has done its work admirably, and I have now before me, in the evidence taken by it, and in its Report, not only all the material necessary for coming to a conclusion upon the charges against Mr. Evans, but also a clear statement of the defects of the present law and its administration, and practical suggestions of great value in supplying the remedy.

I propose to deal first with the charges against Mr. Evans, and to take them in the order in which they stand in the Board's Report.

1, 2, 4, 5, relate to the same kind of complaint, and may be taken together. Some of the charges referred to are apparently not authorised by the Act, but they are all for services rendered, and, having regard to the nature of these services and to the charges for similar services in England and elsewhere, are not unreasonable. I doubt whether Mr. Evans could have borne the expense of carrying out his duties efficiently under the present system if he had not imposed these charges; and although as a public official he acted irregularly and improperly in imposing and collecting them without the express sanction of this Department, I feel satisfied that he acted as he did in the honest belief that his action was justified by precedent, and was within the law.

6, 7, 8, 9, 10, 12. These complaints concern Mr. Evans' dealings with the scalemakers, and his alleged interference with their business. Although nothing demanding official censure has been proved, Mr. Evans has, in my opinion, evinced great want of tact, of judgment, and of temper in these matters. He has shown also a tendency to exceed the limits of his official duties, and to needlessly encroach in small

small ways upon scalemakers' work—a tendency which is largely responsible for the chronic irritation of the scalemakers against him, and for much of that friction in administration which the evidence before the inquiry has disclosed. Mr. Evans' sole business is to see that the law is observed. It is, in fact, no part of his duty to adjust or regulate weights, weighing machines, or weigh-bridges, or to bring them into conformity with the law, and I trust that in future he will confine himself strictly to the duties which the law has imposed upon him. In the same connection I may mention that no traffic in weights or scales, either by Mr. Evans or his officers, should be allowed. The instances adduced at the inquiry were few, and in those instances Mr. Evans' conduct appears to have been open and honest; but the mere fact that such traffic takes place, in however small a degree, tends to weaken public confidence in the Inspector's administration.

Since the close of the inquiry additional complaints have been brought before me. It is charged that Mr. Evans has, in the carrying out of his duties, maliciously disparaged the work and characters of certain scale-makers. A good deal of angry feeling has of late been developed between Mr. Evans and scale-makers—his principal accusers upon the inquiry—and I have no doubt that, when the subject of the inquiry has been under discussion, Mr. Evans may have expressed himself as warmly of individual scale-makers as they have of him, but I am not satisfied that he has ever used his official position for the purpose of maliciously condemning or disparaging the work or the character of any scale-maker. Charges of negligence and incompetency in the testing of certain weighbridges have also been made, but, after full inquiry, I am satisfied that these charges are not well founded.

It has also been alleged that some five years ago Mr. Evans accepted a bribe, given to induce him to stop a prosecution for light weights, and what purports to be a circumstantial account of the occurrence has been laid before me. I entirely disbelieve it; Mr. Schonhardt's second statement has convinced me that there is no foundation whatever for this accusation.

Mr. Baskerville's charge (numbered 13 in the Report of the Board) has caused me some difficulty, because in respect to it I am obliged to differ from the finding of the Board. That gentleman gives evidence, corroborated by two witnesses, that Mr. Evans, some months before the inquiry, endeavoured, by threatening a second prosecution to force him to pay a fine which had been inflicted, but which by reason of an irregularity could not be enforced as both parties then knew. Mr. Evans admits that a somewhat heated altercation took place in reference to the order for payment of this fine, but denies absolutely that he even attempted to enforce payment in the manner charged. It seems to me, having regard to the strong body of testimony in favour of Mr. Evans' general integrity in the discharge of his duties, much more probable that Mr. Baskerville and the two witnesses who support him carried away a wrong impression of an angry conversation than that Mr. Evans should have made this attempt to levy blackmail and should have made it openly in the presence of two witnesses.

I come now to the remaining charge, numbered 3 in the report, and I regret that I am obliged to concur with the Board in finding it completely proved. Mr. Evans has established a practice of selling at 6d. each "approval tickets" which are supposed to indicate that the scales to which they are attached have been examined and approved by the Inspector. These tickets seem to have been sold indiscriminately to certain scale-makers to be placed on any scales they pleased, whether previously examined by the Inspector or not. Strictly speaking, it is no part of the Inspector's duty under the Act to examine and certify to the correctness of scales, but, having taken it upon himself, he was bound to discharge it faithfully to the public, and to take care that no scales were certified by him as correct which he had not examined. Such laxity in the discharge of duty is deserving of the severest censure, and if it were not for the zeal and integrity with which Mr. Evans appears to have discharged his duties in other respects for the last ten years, I should have felt bound to visit it most severely. I have no doubt that Mr. Evans himself has now realised the effect of his neglect in this particular, and that it is not likely to be repeated.

The inquiry has disclosed the urgent necessity for new legislation in regard to weights and measures and the amendment of the laws relating to the sale of bread and fuel. I fully concur with the suggestions of the Board in regard to these matters, and I shall have prepared a comprehensive measure, embodying these recommendations, and bring the whole question before the Cabinet at an early date. In the meantime it is obvious that some change must be made at once in the mode of administering the office of the Inspector, and in remedying such of the defects and anomalies in the present system as can be remedied without new legislation. To this end I have outlined the following system of administration, which may be at once established for that now in existence, and I would call the attention of the Metropolitan Bench of Magistrates to the urgent necessity for the change:—

1. The Inspector will arrange, as soon as possible, to vacate the premises now occupied by him as office and quarters, and will remove his office to the rooms at the Central Police Court set apart for him.
2. The salary of £300 will be continued, and the following provision will be made for assistance in the carrying out of his duties: He will be allowed two assistants; one at £2, the other at £1 a week—a small sum to be arranged for incidental expenses, and £50 a year for forage. He will be allowed to retain for his own use the proportion of fines allotted to him on convictions, but all fees, charges, and revenue of every other kind collected by him must be paid into the Consolidated Revenue in the manner to be arranged.
3. The scope and nature of his duties and directions as to their discharge will be laid down by the Department after consultation with him; the scale of fees and charges will be revised, and, where necessary, amended, and he will be expected to strictly follow the directions of the Department in these matters.
4. He will keep such books, and make such reports and statements as to duties performed and moneys received as may be directed by this Department.
5. He will confine himself strictly to the performance of his duties as Inspector, taking care in no way to adjust or repair weights or weighing appliances.

The details of this system will be arranged in consultation with the Inspector. The rent of the premises now occupied by him, £200 a year, will be saved, and in other respects the cost to the country of carrying out the law will be less than it is at present. With that loyal co-operation, which I have no doubt I shall receive from Mr. Evans, I trust that the change will result in increased efficiency and smoothness of administration.

R. E. O'CONNOR.

1893.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

WEIGHTS AND MEASURES ACT.

(CORRESPONDENCE AND REPORTS RESPECTING.)

Ordered by the Legislative Assembly to be printed, 28 November, 1893.

No. 1.

W. M. Macfarlane, Esq., to The Under Secretary of Justice.

Board to Inquire into Weights and Measures

Sir,

Department of Justice, Sydney, 30 January, 1893

On behalf of the Board appointed to inquire into matters connected with weights and measures, I have the honor to request that you will be good enough to cause an opinion to be obtained from the Crown Solicitor as to whether there is any authority in the Weights and Measures Act, 16 Vic, No 34, for the Inspector of Weights and Measures to charge fees for examining weighbridges, weighing machines, steelyards, scales, and balances.

I have, &c,

W. M. MACFARLANE,
Chairman of the Board

Submitted.—As this is a matter of urgency, and the Crown Solicitor is absent on leave, perhaps the Minister will give the opinion required —A C F, 31/1/93 Obtain Crown Solicitor's opinion — R E O' C, 3/2/93 B C, T E. M' N (for U S)

No. 2.

The Crown Solicitor to The Under Secretary of Justice.

Sir,

Crown Solicitor's Office, Sydney, 15 February, 1893.

I have the honor to return herewith the letter of the Chairman of the Board appointed to enquire into weights and measures, referred to me for advice on the following question, namely:—

Whether there is any authority in the Weights and Measures Act, 16 VICTORIA, No 34, for the Inspector of Weights and Measures to charge fees for examining weighbridges, weighing machines, steelyards, scales, and balances?

By section 16 of the Act the inspectors are entitled to "fees according to the scale contained in the second schedule for every such examination, comparison, and stamping as is hereby required to be made by him"

By section 8 the inspectors are required to examine, compare, and stamp all "weights and measures," and the second schedule prescribes fees only for examining, comparing, and stamping such "weights and measures"

The Act contains no provision for the verification of stamping of weighing-machines It

It is true that under section 17 an Inspector has power to enter premises and examine all "steelyards or other weighing machines," as well as weights and measures, and to seize any machine found to be incorrect or unjust. But there is no provision requiring the persons using such a machine to submit the same for examination by the Inspector with a view of being stamped as correct.

In England verification of instruments of this kind has been specially provided for by an Amending Act—the Weights and Measures Act, 1889, 52 and 53 Victoria, c. 21—and a scale of fees is prescribed. But the provisions of this very necessary and useful Act have not been adopted by the Legislature here.

I have, therefore, to advise that there is nothing in the Weights and Measures Act, 16 Victoria, No. 34, authorising the Inspector of Weights and Measures to charge fees for examining weighbridges, weighing-machines, steelyards, scales, and balances.

I have, &c.,
ERNEST A. SMITH,
Crown Solicitor.

Mr. Macfarlane.—T.E.M'N., 17. Seen. I would suggest that this opinion be placed with the Report of the Weights and Measures Board of Inquiry, now before the Minister of Justice.—W.M.M., Chairman of Board, 18/2/93. Approved.—A.C.F., 20/2/93. Submitted in first instance for perusal of Minister.—A.C.F., 22/2/93. Seen.—R.E.O'C., 23/2/93.

No. 3.

B. N. Mayman, Esq., to The Minister of Justice.

Sir,

Imperial Chambers, O'Connell-street, Sydney, 23 February, 1893.

I beg to send herewith for your kind acceptance the promised brief review of Imperial legislation relating to weights and measures and weighing instruments, and venture to hope that the same will prove of some value to you in dealing with this important question. If you should wish to see me in connection with the Report submitted by the recent Commission, I shall be glad to wait upon you at any time you may be pleased to appoint.

I have, &c.,
B. NEVILLE MAYMAN.

[Enclosure.]

A BRIEF REVIEW OF IMPERIAL LEGISLATION ON WEIGHTS AND MEASURES.

THE principal statute now in force in the United Kingdom regulating weights and measures is the Act of 1878. This Act has mainly for its object the prevention of fraud in trade, and also the maintenance of invariable standards of measurements for the purpose of science and manufacture. After enacting that the same weights and measures shall be used throughout the United Kingdom, the Act provides that the standards of measure and weight described in the schedule thereto shall continue to be Imperial standards for determining the length of a yard and the weight of a pound, and regulations are laid down by which these standards shall be made subservient to the object of correctly ascertaining the length of the yard (which is declared to be the only unit or standard measure of extension from which all others shall be ascertained), and the weight of the pound (the only unit or standard measure of weight from which all other weights and all measures having reference to weight shall be ascertained). The unit or standard measure of capacity is the gallon, containing 10 Imperial standard lb. weight of distilled water. Every contract, bargain, sale, or dealing, if made by weight or measure, is to be in terms of Imperial weight or measure, and if not so made, shall be void; and the person selling otherwise is liable to a penalty. Thus the Act prohibits only sales by weight or measure other than Imperial weight or measure, but it does not prevent sales otherwise than by weight or measure. All articles sold by weight are to be sold by avoirdupois weight, except gold, silver, platinum, diamonds, and other precious stones or metals, which may be sold by troy weight, and drugs by apothecaries weight. The metric system of weights and measures may be lawfully used. Penalties are provided for unjust weights, measures, or weighing-machines, and for making or selling, or for fraud in the use of them. Provision is made for the stamping and verification and official inspection of weights, measures, and weighing-machines, and the Act particularly provides that a weight or measure once stamped by an inspector may be used in any part of the United Kingdom without being restamped. This Act worked satisfactorily in many respects, though in some instances it failed to put a stop to fraud and trickery of dishonest traders, whereby purchasers, especially the poor, did not get just weight. It was found that many inspectors had not enough technical knowledge for their work. The Amending Act of 1889, though deficient in many respects, is calculated to remove many of the evils which existed under the Principal Act, and to compel traders to be just. The principal alterations effected by the Act of 1889 are, that every weighing instrument must be stamped by an inspector; convicted persons are liable to imprisonment in cases of fraud; and power is given to publish convictions. All future inspectors are required to pass an examination before being appointed, to secure that they possess sufficient practical knowledge for the performance of their duties. The examination of inspectors is conducted under the direction of the Standards Department of the Board of Trade [H. J. Chaney, Superintendent], and includes the following subjects:—Reading, writing, and arithmetic, including decimals; elementary mechanics, elementary physics, and practical verification of weights, measures, and weighing and measuring instruments. The Act specifies the fees that may be taken for verifying weights, measures, and weighing instruments, and provides that the fees so taken shall be accounted for and paid over to the proper authority not less often than once a quarter. Perhaps the most important part of this Act is that relating to the sale of coal. Formerly there was no general law in force restraining the mode of sale, and as inspectors had no power to test the weight of sacks or loads of coal, fraud was extensively carried on, and the poor were often without a remedy. But protection is now afforded. All coal must in every case be sold by weight, except where by the written consent of the purchaser, it is sold by boat load, or by waggon or tubs delivered from the colliery into the works of the purchaser. A weight note on the sale of coal exceeding 2 cwt. must be delivered or sent to the buyer before any part of the coal is unloaded, and if the quantity of coal delivered should be less than the quantity expressed in the note, the seller of coal is liable to a fine. Purchasers or inspectors may require any coal or vehicle to be re-weighed within a distance not exceeding half a mile. The Act contains other protective provisions, and gives power to the local authorities to make by-laws regulating the sale of coal in quantities of less than 2 cwt. The Act, however, possesses one glaring defect, which is, that on questions of procedure the inspectors are not subject to any central authority. Control is vested in County Councils and Municipal authorities, the result of which is an utter lack of uniformity of action. Each inspector is practically a law unto himself, and interprets the Act according to his own good pleasure. The consequence is that the most ridiculous anomalies prevail. It is quite possible to get a particular form of machine stamped in one inspectoral district, and to have the same instrument rejected and condemned in another. This state of things is, of course, most harassing and unjust. The necessary uniformity in procedure will never be secured until control is placed in the hands of a permanent commission, specially appointed for the purpose. The question of administering the law relative to weights and measures ought not to be left to the local authorities, but should be dealt with by the Government, who are responsible to the people for seeing that, in every transaction decided by weight, the vendor gives to the purchaser good and just weight. It is impossible, in ordinary limits, to convey any adequate idea of the mischief and confusion which the English system of decentralisation has created; but experience shows that until local control is abolished, the primary object of weights and measures legislation, namely, the prevention of fraud and the detection and punishment of dishonest trading, will never be satisfactorily accomplished.

B. NEVILLE MAYMAN.

Thank writer for his statement, and inform him that it will be considered in connection with the Report of the Board.—R.E.O'C., 24/2/93.

No. 4.

The Under Secretary of Justice to B. N. Mayman, Esq.

Sir,

Department of Justice, Sydney, 27 February, 1893.

Referring to your letter of the 23rd instant, in which you forward a review of Imperial legislation relating to weights and measures and weighing-machines, I am directed by the Minister of Justice to convey to you his thanks for furnishing the statement referred to, and to inform you that it will be considered in connection with the Report of the Board of Inquiry recently appointed to investigate the working of the Weights and Measures Office.

I have, &c.,

ARCH. C. FRASER,

Under Secretary.

Weights and Measures Inquiry Report.—Write to Mr. Evans, enclosing copy of Report, and inviting him to make any statement he thinks fit with reference to those portions affecting him personally or the administration of his office. Also send copy of the report to the Treasury. R.E.O'C., 27/2/93.

No. 6.

The Under Secretary of Justice to The Under Secretary for Finance and Trade.

Sir,

Department of Justice, Sydney, 28 February, 1893.

I am directed by the Minister of Justice to forward, for the information of the Colonial Treasurer, the enclosed copy of Report of the Board* recently appointed to inquire into the working of the Weights and Measures Act (16 Vic., No. 34) with reference to those portions of the Report relating to the standard weights and measures of the Colony, which, according to the Act referred to, are deposited in the Treasury.

I have, &c.,

ARCH. C. FRASER,

Under Secretary.

*Report tabled in Legislative Assembly and ordered to be printed, 23 March, 1893.

No. 7.

The Under Secretary of Justice to The Metropolitan Inspector of Weights and Measures.

Sir,

Department of Justice, Sydney, 28 February, 1893.

I am directed by the Minister of Justice to forward to you the enclosed copy of Report of the Board recently appointed to inquire into the working of the Weights and Measures Act, and to invite you to make any statement you think fit with reference to those portions affecting you personally, or the administration of your office.

I have, &c.,

ARCH. C. FRASER,

Under Secretary.

No. 8.

The Metropolitan Inspector of Weights and Measures to The Under Secretary of Justice.

Sir,

Weights and Measures Office, 110, Bathurst-street, Sydney, 21 March, 1893.

I have the honor to furnish herewith Report and Supplementary Report on matters affecting me personally and the administration of my office, dealt with by the Report of the Board of Inquiry into the working of the Weights and Measures Office, in terms of your letter of 28th ultimo.

I have, &c.,

JAMES W. EVANS,

Metropolitan Inspector of Weights and Measures.

[Enclosures.]

Sir,

Weights and Measures Office, 110, Bathurst-street, Sydney, 21 March, 1893.

(i.) Referring to your letter of the 28th ultimo, forwarding for my consideration, and for any statement I may desire to make, a copy of the Report of the Board appointed to inquire into the working of the Weights and Measures Act, and the administration of my office in particular, I have the honor to offer the following observations:—

(ii.) While recognising the fairness of the scope of the inquiry as laid down by the Minister of Justice, I desire to point out that it has been made the medium for uncalled-for attacks, scurrilous insinuations, and a display of hostility from outside sources quite foreign to the object originally intended, namely:—That every light should be thrown upon an Act which as I have not ceased for years to point out, requires amendment.

(iii.) It has been my lot, in common with other public officers, to incur the displeasure of certain sections of the community by a fearless discharge of duty; but my object has always been to protect the public, at a risk of offending a few tradespeople, and to serve the interests of the honest trader even at the expense of his dishonest competitor.

(iv.) At the inquiry, the individuals to whom I have alluded played a very prominent part, and it is a significant fact, not noted by the Board in their Report, that with one or two exceptions the witnesses who took exception to my conduct had suffered prosecution at my hands.

(v.) As so many charges were made against me, I was compelled to ask, "Am I on my trial?" The Chairman replied, "No, Mr. Evans; there are no charges against you." To my surprise, I find that the Report makes it appear that a very comprehensive indictment has been framed against me, and no less than nine successive paragraphs commence with the statement that "I admit" such and such a thing, as if I had pleaded guilty to so many counts in this indictment.

(vi.) I hope to show that these so-called admissions are merely tortured constructions of the evidence.

(vii.) I need only point to the character of the gentlemen who voluntarily came forward to give evidence in support of my administration, and to the letters to the same effect put in during the inquiry, which shows unmistakably that I have the confidence of the leading merchants of the city.

(viii.) These gentlemen are disinterested, and that is more than can be said of some of those who sought to malign me in my conduct of public business. It

It is my intention to dissect the Report so far as it affects me, placing charge and reply in juxtaposition, so as to be easy of reference and comparison. (ix.)

By adopting this plan, I think I shall be able to clear away some confusion of arrangement in the Report and some confusion of thought which appears to exist in the minds of the Board, a circumstance which might be expected in gentlemen having no practical acquaintance with weights and measures in their relation to the every day wants of the community. (x.)

I regret that the Board did not see fit to accept my invitation to attend at my office, so that I might give them a practical illustration of my methods of dealing with the material which comes into my hands. Had they adopted my suggestion, I am sure that much serious misconception as to the nature and extent of my duties might have been avoided. (xi.)

I now submit my detailed criticism of the Report. (xii.)

REPORT, PAGE 5, SECTION 1.

It appears to us that Mr. Evans charged fees of £1 1s. and £2 2s. for testing weighbridges, 6d. per cwt. for testing weighing-machines, 2s. 6d. each for testing steelyards, and, in addition to these, he, in many cases, charged an extra 6d. on each weighing-machine.

In Reply.

Under the 16th section of the Act, the Inspector is entitled to fees as set forth in the second Schedule thereto.

As repeatedly explained to the Board, no charge has ever been made for testing weighbridges or weighing-machines. The charges made are for examining, comparing, and stamping weights of same, and, as is shown by tabulated statement herewith (Appendix A), are in no case in excess of those authorised by the Act.

Further, I submit that, as under section 16 of the Act I am liable to penalties if my actions are wrong, I may fairly claim to be in the right until the contrary is proved, in the manner prescribed by statute law.

The extra charge of 6d. has long been discontinued, and is dealt with later on.

REPORT, PAGE 6, SECTION 2.

He admits that he charged travelling expenses in cases where scalemakers might have brought their scales to his office, even although they drove him to and fro; the reason given being that he wished to discountenance scalemakers calling him away from his office.

In Reply.

Owing to the constant and frivolous calls made upon my time by the scalemakers, it became an absolute necessity to place some limit upon their demands; and when it is remembered that, no matter how short the journey, from half an hour to an hour is consumed in every visit, the charge of 1s. per visit does not seem extortionate, and has certainly had the desired effect.

I am also guided by the Victorian system, having been sent to Melbourne by the then Minister of Justice, Hon. W. Clarke, in 1887, "to observe and profit by the practice which obtains there."

The charge in that Colony for outdoor tests is 1s. per cwt.

REPORT, PAGE 6, SECTION 3.

Messrs. R. Wedderburn, J. Wedderburn, J. Cable, P. Harper, Jabez Wedderburn, and M. Gleeson, state positively that they have on different occasions purchased from Mr. Evans or his assistant "Approval Tickets," at a cost of 6d. each for placing on beam and counter scales, which, in many cases, Mr. Evans has not seen at all; and Mr. Charles Blakeney, one of Mr. Evans' employees, also states that he has upon several occasions sold the tickets in question to scalemakers. He understood that the scales for which these tickets were required had been seen by Mr. Evans, and Mr. Evans had also sold these tickets.

In Reply.

It is somewhat remarkable that the whole of these witnesses represent three firms of scalemakers, and that no other persons could be found to support their statement. Mr. Bowrey states that he never obtained tickets in this way, and letters herewith (Appendix B) show that such a thing has never been suggested to the large importing firms, although their material being new, is less liable to error than if repaired. If tickets could be thus easily obtained, why did these scalemakers submit scales for approval at all?

REPORT, PAGE 7, SECTION 4.

He admits that he established a maximum and minimum rate of charges for examining and testing weighing-machines for scalemakers. The maximum charge, however, appears to have been exceeded.

In Reply.

I have again to assert that no charge has ever been made for examining and testing weighing-machines, but for examining, comparing, and stamping the weights of these machines. A maximum and minimum charge was established on my appointment. These, as well as the extra fee of 6d. on the machines have long been discarded in favour of the schedule rate in strict conformity with the Act.

Under the new rates the old maximum charge is undoubtedly exceeded.

REPORT, PAGE 7, SECTION 5.

He admits charging a fee when an incorrect weighing-machine was sent to him, namely, half the ordinary fee when the owner insisted upon his testing the machine when in a dirty condition, and when he could see it was incorrect, and charging a full fee when the machine is sent to him to be tested after correction by a scalemaker.

In Reply.

Under section 16 of the Act I am entitled to fees for every such examination, comparison, and stamping. I have, however, only charged half-fees in the first case instead of schedule rates.

REPORT, PAGE 7, SECTION 6.

Mr. Evans admits that he made a charge of 3d. each to R. Wedderburn for giving him verification tickets to show to the owners of weighing-machines, customers of R. Wedderburn, when requested by Wedderburn, and that he was justified in doing so by the extra work, cost of printing tickets, &c.

In Reply.

These tickets were printed at my expense at Mr. R. Wedderburn's request, to suit his convenience, he making a private arrangement to pay 3d. each. They have never been issued to any other firm, and do not apply to weighing-machines, as stated.

REPORT, PAGE 8, SECTION 7.

He also admits having established a practice of sending notices annually to owners of weighing-machines, reminding them to have their machines tested; but it is admitted by R. Wedderburn and J. Wedderburn that this practice was discontinued some time ago, owing to the representations made by several of the scalemakers.

In Reply.

The periodical notices issued from this office have kept the public in touch with it, and have proved of remarkable assistance to my work.

I fail to see how these can interfere with the business of the scalemakers, unless they expect the public to have their machines adjusted even when correct.

I submit that tests for error should be carried out by this office, and not by the scalemakers, who are interested parties, and this is the chief difference of opinion between them and myself.

Many notices have been issued for years past (Appendix C) to which they have taken no exception. Those objected to by Messrs. Wedderburn were last issued in November, 1892, and I am under no pledge to discontinue them.

REPORT, PAGE 8, SECTION 8.

He admits having sold a set of globe weights to Wedderburn, to be used for testing steelyards, before submitting them for inspection, and some 56 lb. test weights, also to him, which he (Mr. Evans) had procured at his own expense pending the arrival of the 56 lb. test weights from England; but he positively denies having sold any weighing-machines, scales, &c., which R. Wedderburn, J. Wedderburn, and E. Moore state that he has done.

His other employee (Patterson) admitted that on several occasions he had bought scales and machines cheap, and had sold them without Mr. Evans' knowledge.

In Reply.

A perusal of the evidence will show that the Board have confused the sale of the globe weights with that of the 56 lb. weights, it being impossible to test steelyards with the former.

Mr. Wedderburn stated in his evidence that these weights were sold to him as a special favour, and were not to be obtained in Sydney, and that only half their value was charged him, two facts which are not commented upon by the Board.

My assistant, Patterson, who is well skilled in the office work, had to leave my employ on account of his purchase of material against my wishes.

I have never bought or sold material for profit.

REPORT, PAGE 9, SECTION 9.

He admits that he has been in the habit of adding lead to and subtracting it from weights sent to him to test at his office.

In Reply.

I have always considered it as part of my duty to equalise machine weights and to subtract only from avoirdupois weights, and I am borne out in this by universal custom.

REPORT, PAGE 9, SECTION 10.

He admits that he has refused on occasion to attend the shops of scalemakers to test weighing-machines, &c., in cases where money has been owing to him by the scalemaker.

In Reply.

I have always, as far as possible, studied the convenience of scalemakers, and granted them every concession.

I submit that I was justified in withdrawing such concessions, pending the payment of moneys due by them to me.

REPORT, PAGE 9, SECTION 11.

He admits that his employees have been in the habit of comparing, &c., and stamping weights and measures.

Mr. Evans should not have permitted them to do this unless they were properly authorised. This authority was obtained for Patterson, when Mr. Evans was absent from Sydney on departmental duty, in writing.

In Reply.

Section 22 of the Act provides that "all actions for things done in execution of this Act or otherwise by any justice or inspector, or any constable or assistant, to such justice or inspector for effectually preventing the use of balances and weights and measures, &c."

That assistants are recognised by law and are empowered to perform certain duties is here clearly stated, and protection afforded them, but of course they must act under the direction of the inspector.

I have at my own expense, and for the greater efficiency of my office, employed two assistants, reserving to myself full control over special or doubtful material.

It was only when one of these had to temporarily assume my functions that I obtained special authority.

REPORT, PAGE 9, SECTION 12.

He admits that he consented to the letter being written to Mr. S. W. Harpur by Mr. Williamson.

It seems to have been rather injudicious on the part of Mr. Evans to have been a party to such a transaction.

REPORT, PAGE 5, SECTION 12.

That he instructed his solicitors to send a letter to a person named S. W. Harpur who had purchased a scalemaker's business for his (Harpur's) son.

In Reply.

I fail to see in what manner it was "rather injudicious" to acquaint Mr. S. W. Harpur, before he completed his purchase, that certain moneys were due to me on account of the business he was buying.

Mr. S. W. Harpur, being a Government servant (Customs Department) has, I assume, not wishing to appear in a business transaction, tried to shift the responsibility to my shoulders, and the fact that Mr. Williamson is his solicitor, as well as mine, has placed him (Mr. Williamson) in a delicate position, so that he was unable to state fully all he knew in the matter.

The evidence discloses that the letter was sent before the completion of the purchase, and that Harpur debited Cook with the amount he paid to me.

REPORT, PAGE 10, SECTION 13.

With reference to the statement of H. Baskerville that Mr. Evans made strong threats to induce him to pay a fine which had been cancelled through informality, which statement is corroborated by evidence of Messrs. David Price and William Hill; it is almost impossible to imagine that these apparently respectable men should combine and conspire together to accuse Mr. Evans of doing this.

In Reply.

Mr. Baskerville's statements are unfounded. In order to save time Messrs. Price and Hill were merely asked "whether they had heard his evidence and corroborated it in every particular," to which question they replied in the affirmative.

It is thus impossible to point out discrepancies which would probably have arisen had they been allowed to testify. As it may be necessary to take steps in another way, at the close of this enquiry, to vindicate my personal character in this matter, I will merely point out here that the evidence of Mr. Camphin goes far to show the absurdity of this statement as it supplies the motive for my visit to the premises.

REPORT

REPORT, PAGE 10.—DEALING WITH FINANCIAL STATEMENT FOR THE YEARS 1890, 1891, 1892.

- In November, 1883, I was appointed to my present position at a salary of £200 per annum. (xiii.)
- In 1889, this was raised to £300, after an investigation by the Honorable W. Clarke, and his successor, the Honorable J. P. Garvan, Ministers of Justice, into all matters connected with the office, and no mention was made at this time, or since, of the necessity for keeping detailed accounts. (xiv.)
- I have submitted data for the information of the Board which are amply sufficient to enable any ordinary accountant to approximate very closely to the receipts for the years 1890, 1891, 1892. (xv.)
- The moneys received are classified as follows :—(a) Testing and stamping fees, weighbridges; (b) testing and stamping fees, weighing-machines; (c) testing and stamping fees, weights and measures; (d) testing and stamping fees, steelyards; (e) half fines on prosecutions; (f) salary. (xvi.)
- To substantiate my figures, I produced (a) and (b) register of weighbridges and weighing-machines; (c) and (d) these include all small work, including stamping of avoirdupois weights and measures, examination of beam and counter scales, &c. (xvii.)
- The fees from these sources amount to so little that no detailed account has been kept in record. For the twenty-two weeks ending 31st December, 1892, however, the amount taken under these heads is £30 14s. 2d. (xviii.)
- This money, taken in pence and half-pence over the counter, has been used as petty cash, and the balance paid in to my account. (xix.)
- (e) The amounts of half fines for the three years were obtained, without any difficulty, through the courtesy of the officers of the respective police courts.
- In order to substantiate these statements, I produced further (a) My private bank pass-book; (b) lists of cheques passed through account; (c) books, &c., in support of these lists, including treasurer's book of the society alluded to, with a reference to the bank for further particulars if required. (xx.)
- I submit that as no provision has been made for the keeping of a set of official records in connection with this Office, and as the only books available have been compiled and kept at my own expense, and with a view more to the efficient working of this Office than to the possible requirements of your Department, the statement submitted, although only approximate, has proved to be sufficiently accurate for all practical purposes of this enquiry; and that the finding of the Board, after my so unreservedly placing my most private affairs, together with the books of the society referred to at their disposal, is not justified by the facts. (xxi.)
- The statement of the Board differs from that furnished by me. (xxii.)
- The item B and C Scales, £10, has already been included under the head of Weights and Measures, and so has the item of £15 per annum petty cash added by the Board, which, as already explained, was derived from this source. (xxiii.)
- In the statement of the Board, therefore, as against mine, my annual income is increased by £25 per annum. (xxiv.)
- I desire also to point out that, as I showed the Board, in December, 1891, I passed through my account, to oblige R. Wedderburn, two cheques, amounting to £70 in all. As it appears that an effort has been made to swell my banking account, with a view of making my receipts appear larger than they really are, I must again reiterate that I am prepared, at any time, to prove beyond the possibility of dispute the substantial accuracy of the statement rendered to the Board. (xxv.)

REPORT, PAGE 13, PARAGRAPHS 1, 2, 3.

- I was appointed, as already stated, by the Bench of Stipendiary Magistrates in 1883, and waited upon the Chairman of the Bench with reference to instructions as to the discharge of my duties. (xxvi.)
- It was intimated to me by Mr. Dillon, S.M., that, it being a function of the Magistrates to adjudicate upon questions brought before them by me as Inspector, they must decline to advise on my methods of procedure. (xxvii.)
- I was told that it was my province to interpret the existing Acts, and where these were obscure to establish precedents for future action by means of Test Cases. (xxviii.)
- It is a well-known axiom, and I have been repeatedly told, that your Department deals only with the administration of the law, and not with its interpretation, nor gives advice in regard thereto. I have, therefore, not been in a position to obtain assistance in these quarters. (xxix.)
- I would in this connection draw your attention to Appendix D, Nos. 3, 4, 11. (xxx.)
- The position I hold in the interpretation of the Weights and Measures, Coal Delivery, and Bread Acts, has been built up at my own expense and risk. (xxxi.)
- At my own expense, because no provision has been made for the clerical and legal expenses of my office. (xxxii.)
- At my own risk, because under section 16 of Act 16 Victoria, No. 34, I am subject to penalties for the improper performance of my duties. (xxxiii.)
- I most respectfully submit, therefore : (xxxiv.)
1. That I am acting in accordance with precedent, and the rules laid down by the Bench of Magistrates.
 2. That I am personally and pecuniarily liable for any malfeasance on my part.
 3. That, being so liable, and since no assistance in money or advice has been afforded me, I am entitled to your favourable consideration of my actions until they have been proved wrong, in the manner provided by the statute.
- Again referring to Appendix D, No. 10, I submit that, when I assumed office, there was not even the semblance of organisation. (xxxv.)
- I have placed the material in good order, defined the class and quality of material to be accepted or rejected in use, when submitted to me; defined the scope of the Weights and Measures, Coal Delivery, and Bread Acts, heretofore practically inoperative, by means of test cases; established, by degrees, a definite scale of fees under the second Schedule of the Act 16 Victoria, No. 34, and kept the public alive to their responsibilities by means of notices and advertisements in the daily prints, so enabling them to protect themselves from the malpractices of dishonest and designing persons. (xxxvi.)
- This was quite sufficient for one man to undertake, even with official help, and I unhesitatingly take credit for a record of work done during the last nine years, which, under the circumstances, is perhaps unequalled. (xxxvii.)
- It would be impossible for any one man, entrusted with the interpretation, administration, and execution of such admittedly imperfect Acts, to avoid some mistakes; but I claim that each of my actions has been a distinct advance in organisation, and that out of some 1,200 (twelve hundred) cases submitted for decision to both the superior and inferior courts of the Colony, only one has been decided against me. (xxxviii.)
- I have been guided by the latest English legislation, and by the customs of all English-speaking countries, and the agents of two of the largest firms of manufacturers of weighing appliances in the world bear testimony to the efficiency of this Office as compared with others in England and the Colonies. (See evidence of J. H. Keep and B. N. Mayman.) (xxxix.)
- The unwarrantable attacks made upon me before the Board have arisen from the fact that I have stood between the public and the exorbitant demands frequently made for trifling or unnecessary repairs (see Appendix C, No. 5), and between the honest trader and his dishonest competitor. (xl.)
- I have never asked for instructions "for making charges for matters which were not clearly set out in the Act," since, as my charges have never been disputed, the occasion has never arisen. (xli.)
- I submit that, since my appointment, I have been under very active control. I am virtually under the sole control of the Minister of Justice, from whom I obtain all necessary authorities, and officially regard as the head of my Department. (See Appendix E.) My tenure of office is at the discretion of the Magistrates by whom I was appointed; and public and press have ever kept vigilant watch upon me. (xlii.)
- I have made this work my life's study, and have spared neither time nor money in an endeavour to place my Office in a position to satisfy every modern requirement. I have obtained information from every great centre of commerce or science available, and have repeatedly called the attention of your Department to matters affecting my work (Appendix F). (xliii.)
- In conclusion, may I be permitted to express my grateful sense of the courtesy and consideration shown by the Honorable the Minister of Justice and your Department in permitting me an opportunity of thus traversing the statements so freely made to my discredit. (xliv.)

I have, &c.,

The Under Secretary of Justice.

JAMES W. EVANS,
Metropolitan Inspector of Weights and Measures.

SCHEDULE

APPENDIX B—(No. 1)

Dear Sirs,
 A statement has been made to the Department that certain balances or scales have been certified to without previous inspection at this office.
 Will you do me the favour to state hereon whether such has been the case in any respect with your firm?
 Also, if at any time tickets of approval have been supplied, or even suggested, without reference to the scales in question?
 I am, &c,
 JAMES W. EVANS,
 Inspector.

Sydney, 13 February, 1893.

A765
Metropolitan
Inspector.

APPENDIX B—(No 2).

Sir,
 Replying to your enquiry of to-day, we beg to state that, so far as our knowledge extends, we have never known or heard of any slips being issued unless the articles had been previously tested. If such has been done, it has not been in our case, and we know of no other firm to whom it has been done.
 If we had any intention of making a complaint we should feel inclined to take exception to the too great rigour with which the law is administered, and the unnecessary exactness with which the examination has been carried out. Frequently we have had to have machines overhauled in consequence of some slight damage done in transit to the weighing office, and in this connection we might add that in our opinion the office is in a most inconvenient place, and the assistance given to you is most inadequate.
 Yours, &c,
 ANTHONY HORDERN & SONS
 (Per J. H. HARRIS).

Sydney, 13 February, 1893.

Mr. J. W. Evans, Inspector of Weights and Measures

APPENDIX B—(No 3).

Dear Sirs,
 A statement has been made to my Department that certain balances or scales have been certified to without inspection.
 Will you do me the favour of stating hereon whether such has been the case in any respect with your firm?
 I am &c,
 JAMES W. EVANS
 Inspector.

Sydney, 13 February, 1893.

Also, whether any tickets of approval have been sold, or suggested, to your firm without reference to the scales in question? [See specimen]

We know of no scales or balances having been certified to without inspection. Neither have we ever been offered or suggested to us tickets as described.
 14 February, 1893
 HOLDSWORTH, MACPHERSON, & CO.
 (Per RUPERT M. CLARKE).

APPENDIX B.—(No. 4).

Dear Sir,

44, Market-street, Sydney, 15 February, 1893.
 In reply to your letter of 13th instant. In all my experience with weights and scales, I have never known of any scale or weight being certified by yourself without first undergoing a strict examination, and I most certainly never had any tickets offered to me.

I have always considered that your Department has been administered with great care, and with a strict regard to justice; and anything that you have done for me has always been fair and square.

Yours truly,
 OSWALD H. M. PAIN.

Mr. James W. Evans, Inspector of Weights and Measures, 110, Bathurst-street, Sydney.

APPENDIX B.—(No. 5).

Dear Sir,

Sydney, 15 February, 1893.
 In reply to your letter of the 14th instant. We beg to state that neither balances nor scales have been certified, without your inspection, nor have tickets of approval been supplied to us, unless accompanied by said machines.

To James Evans, Esq., Inspector, Bathurst-street.

Yours faithfully,
 F. LASSETTER & CO. (Limited)
 (Per H. P. A.)

APPENDIX B.—(No. 6).

Dear Sirs,

14 February, 1893.
 A statement has been made to the Department that certain balances or scales have been certified to without inspection.

Will you do me the favour of stating hereon whether such has been the case in any respect with your firm?

I am, &c.,
 JAMES W. EVANS,
 Inspector.

Also, if at any time tickets of approval have been supplied to you, or even suggested, without reference to the scales in question. (*See specimen*).—J.W.E.

J.W. Evans A768
 Metropolitan
 Inspector.

ALL our scales that have been certified to by Mr. Evans have been tested by him, and we have never heard of any tickets being sold by him.

W. S. FRIEND, JUNR.

APPENDIX B.—(No. 8).

Dear Sir,

Corner of King and Clarence Streets, Sydney, 13 February, 1893.
 In answer to yours of even date we can only say that we have never known or heard of your having given certificates of the correctness of weighing-machines without having examined them.

Our practice has always been to send our weighing-machines to you to test, and where they have only required some little adjustment of the weights you have done that for us without charge; but in any case where you found the machines required more done to them you directed us to send them to some scalemaker, and we have never known you to give a certificate for a weighing-machine, either a new one or one that had been in use, without having first examined it.

Yours, &c.,
 JOHN KEEP & SONS
 (Per Hy. Williams, Manager).

Mr. James W. Evans, Inspector of Weights and Measures, Bathurst-street.

APPENDIX B.—(No. 9).

Dear Sirs,

Sydney, February, 1893.
 A statement has been made to my Department that certain balances or scales have been certified to without my having inspected them.

Will you do me the favour of stating hereon whether such has been the case in any respect with your firm?

I am, &c.,
 JAMES W. EVANS,
 Inspector.

Messrs. J. Macintosh and Sons.

P.S.—Or whether at any time tickets of approval have been sold to your firm without reference to the scales being required.

APPENDIX B.—(No. 10).

Dear Sir,
 Your memo. as per other side is duly noted, we beg in reply to state that we have no knowledge whatever of any balances being certified to without inspection, or having at any time purchased approval tickets.
 Yours truly,
 J. MACINTOSH AND SONS.

Mr. Evans.

307, Pitt-street, 16 February, 1893.

APPENDIX C.—(No. 1).

Weights and Measures Office, 110 Bathurst-street, Sydney, 25 September 1886.
Public Notice.

THE provisions of the Sydney Coal Delivery Acts 9 Victoria, No. 8, and 10 Victoria, No. 2, will be strictly enforced on and after the 1st day of January, 1887. Those interested will provide suitable weighing-machines and delivery tickets in conformity to the above.

JAMES W. EVANS,
 Inspector for the Metropolitan Police Districts.

First taken action on in 1884.—J.W.E.
 One sent to each coal merchant and advertised in all papers.

APPENDIX C.—(No. 2).

110, Bathurst-street, Sydney, 26 June, 1890.

Special Notice.

MASTER Bakers within the Metropolitan Police District are hereby notified that on and after 7th July, 1890, all denominations of bread must be made of full weight, with the exception of two kinds, known respectively as the "Twist" and "Long or French Roll," which may be held (without prejudice) as Fancy Bread when entirely surrounded with crust.

Any loaves other than of these two kinds will be seized if not of full weight, and the usual proceedings taken. This course of action has been induced by the great deficiency in weight, especially of the two kinds of bread known as "Carringtons" or "Splits," and "Cakes"—a bun or damper-shaped loaf.

JAMES W. EVANS,
 Metropolitan Inspector.

Please give one of these to some other baker.
 First dealt with in 1884.

APPENDIX C.—(No. 3).

Weights and Measures Office, 110, Bathurst-street East.

Sir, Under the Weights and Measures Act, 16 Victoria, No. 34, all Weighing Appliances and Measures used for trade must be compared and stamped by an inspector.

It is also necessary that they be periodically tested to ensure accuracy.

This intimation is sent that you may take proper steps to ensure correctness of any weighing material or measures in your possession. Notice is not requisite in any case.

Weighing appliances should be tested and certified to at least each twelve months.

JAMES W. EVANS,
 Metropolitan Inspector.

First issued in 1885.—J.W.E.

APPENDIX C.—(No. 4).

Inspector of Weights and Measures Office, 110, Bathurst-street East.

IN consequence of the very inferior class of counter and other descriptions of weighing-machines now being introduced to the market, you will please take notice that upon any scale or counter weighing-machine being found with a return action of four drams or over, such will be considered *unjust*, and when used for grocery purposes will be seized without further notice.

All weights sent to the office to be perfectly clean, and when readjusted to have the loading between the surface of the weight. Old rust-eaten and defaced weights, below 7 lb., will not be stamped. And only those steelyards having steeled knifed edges and bearings will be allowed in use.

JAMES W. EVANS,
 Inspector for the Metropolitan Police District.

Issued, March, 1885.—J.W.E.

APPENDIX C.—(No. 5).

Weights and Measures Office, 110, Bathurst-street, Sydney, November, 1887.

WOOLBROKERS, wholesale houses, carriers, agents, and shopkeepers, whose business involve the use of weighing appliances, are strongly recommended to instruct some reliable person in their employ to examine machines, weights, &c., every morning, and when defective to have them attended to at once.

All scales, weighing-machines, &c., must be truly balanced, no draft whatever being allowed, nor will anything not permanently fastened be permitted to make them balance.

As no person whatever is authorised by this office to repair weighing material, the public are cautioned against jobbers who say they are, and whose pretended repairs almost invariably result in damage, for which a heavy charge is made. You are, therefore, advised to have appliances periodically examined by some respectable and established scale-maker, or sent to this office for comparison. It is the duty of all persons, using or having in their possession weighing appliances, to maintain their perfect accuracy. If found defective the parties are liable to a penalty, and the goods confiscated.

All weights, measures, and machines brought to this office for testing, &c., must be perfectly clean and free from rust. Where the lead projects above the surface such will not be permitted in use.

Purchasers are advised to buy none but new scales, weights, and measures, nor then unless properly stamped, as a large number of inferior and unjust articles are offered for sale to those not knowing the difference.

JAMES W. EVANS,
 Inspector of Weights and Measures for the Metropolitan District of Sydney.

The Inspector will be in attendance at his office daily, except Saturdays, from 10 a.m. till 12. Mondays and Thursdays from 10 till 4, and every information given on all matters relating thereto. Material may be left at any time. Names and addresses of scalemakers registered at this office:—R. Wedderburn, 226, Sussex-street; Bowrey Bros., 13, Park-street; E. Cook, 72, Druitt-street; Cross & Wedderburn, 83, Liverpool-street. First issued, 1886.—J.W.E.

APPENDIX C.—(No. 6).

Weights and Measures Office, 110, Bathurst-street East, Sydney, 189 .

To Mr. Sir,
 Please note that certificate of weighing-machine, cwt., issued to you from this office, has expired; you are, therefore, requested to take immediate steps to secure the necessary renewal. Preliminary notice is not an essential.

JAMES W. EVANS,
 Metropolitan Inspector.

All machines or other material sent to this office for comparison and registration must be perfectly clean. Issued periodically since 1886.—J.W.E.

APPENDIX

APPENDIX C.—(No. 7).

MEMO.

Office, 110 Bathurst-street, Sydney, 31 August, 1887.
 THE Inspector of Weights and Measures (acting under advice) has determined to prohibit the use of measures of capacity of taper form, as tending to fraud. Any person hereafter found using such is liable to prosecution under the 9th, 15th, and 17th sections of 16 Victoria, No. 34.

All measures of capacity (except bell-shaped or spirit) will therefore be of parallel shape and approximate to the New Standards at this Office.

All measures shall have their contents denominated, stamped, or marked on the outside in legible figures and letters. Manufacturers are invited to obtain measurements at once, as taper measures will not be stamped hereafter.

JAMES W. EVANS,

Inspector of Weights and Measures for the Metropolitan Petty Sessions Districts of Sydney.

Issued, August 31st, 1887.

APPENDIX C.—(No. 8).

Special Notice.

Sir,

Attention has been called to the very inferior China or Porcelain weights now imported to this Colony. They are not glazed at the bottom nor inside; are porous, and evidently of that class disqualified by the new Weights and Measures Act of the United Kingdom, enacting that none "be stamped if they are found to absorb more than $\frac{1}{2}$ per cent., viz., 35 grains per lb., of their weight of water after immersion for ten minutes."

My duty in future will be to reject all weights not consistent therewith.

For your information, the section of the Act bearing upon the above, and now in force in this Colony, is appended.

JAMES W. EVANS,

Metropolitan Inspector.

16 Victoria, No. 34, Section 13.

"From and after the said first day of January, one thousand eight hundred and fifty-four, no weight made of lead or pewter, or of any mixture thereof shall be stamped or used. Provided always that nothing herein contained shall prevent the use of lead or pewter, or of any mixture thereof in the manufacture of weights, if they be wholly and substantially cased with brass, copper, or iron, and legibly stamped or marked "cased," or shall prevent the insertion of such a plug of lead or pewter into weights as shall be *bonâ fide* necessary for the purpose of adjusting them, and of affixing thereon the stamp hereinafter mentioned."

First issued, January, 1890.—J.W.E.

APPENDIX D.—1883-4.

LEGISLATIVE ASSEMBLY—NEW SOUTH WALES.

INSPECTOR OF WEIGHTS AND MEASURES.

(CORRESPONDENCE, &c., APPOINTMENT OF MR. DENT.)

Ordered by the Legislative Assembly to be printed, 22 February, 1884.

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated 4th December, 1883, That there be laid upon the Table of this House:—

"Copies of all opinions, minutes, letters, papers, or other documents in reference to the appointment of Mr. Dent as

"Inspector of Weights and Measures, more particularly all correspondence upon this subject between the Minister and

"Stipendiary Magistrates."

(Mr. Proctor.)

No. 3.

The Under Secretary of Justice to The Inspector-General of Police.

Sir,

Department of Justice, Sydney, 4 June, 1883.

With reference to my letter of the 1st instant, intimating the appointment of Mr. Alfred Charles Dent as Inspector of Weights and Measures, vice Mitchelson, I am directed to inform you that the Minister of Justice would be glad if you would favour him with a copy of any rules or regulations that may be in force regarding the office of Inspector of Weights and Measures, or with any suggestions you may desire to offer on the subject, with a view to the preparation of suitable instructions for the guidance of the Inspector in the discharge of his duties in carrying out the provisions of the Act 16 Victoria, No. 34.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

No. 4.

The Inspector-General of Police to The Under Secretary of Justice.

Sir,

Police Department, Inspector-General's Office, Sydney, 8 June, 1883.

Referring to your letter of the 4th instant, respecting the duties of the Inspector of Weights and Measures, I have the honor to forward herewith, for the information of the Minister of Justice, copy of a police report obtained in the matter.

I have, &c.,

EDMUND FOSBERY,

Inspector-General of Police.

[Enclosure.]

Memo. by Supt. Reid.

MEMO.

Police Department, Superintendent's Office, Sydney Station, 7 June, 1883.

Mr. Mitchelson informs me that, so far as he is aware, there are no rules or regulations in existence with reference to the carrying out of the duties of Inspector of Weights and Measures.

He has never received any assistance from any person, his only guide having been the Weights and Measures Act, and the experience he acquired while performing the duties of a similar office in London.

GEO. READ, Superintendent.

The Stipendiary Magistrates should be informed of the appointment of Mr. A. C. Dent from the 1st instant, and requested to look into the matter, as to what rules or regulations they may deem to be necessary, and as regards his being sworn in as Inspector of Weights and Measures, &c., under 16 Victoria No. 34, for the purpose of carrying out the duties of his office.—W.E.P., 11/6/83. The S.M.'s, 11/6/83. Seen.—H.E.C., 12/6/83.

No. 10.

Mr. A. C. Dent to The Under Secretary of Justice.

Sir,

Office of Inspector of Weights and Measures, York-street, 19 June, 1883.

I beg to inform you that I entered upon the duties of Inspector of Weights and Measures on the 11th day of June, at the office used for such purpose, in York-street, of this city.

Upon

Upon examination I found the office in a most dilapidated and filthy condition, there being a drain behind the door which has been used for years as a urinal, and the stench from it is intolerable, making the place in my estimation unfit for duties appertaining to such office.

It is also very small and dark, and I find there are no appliances to be relied upon for testing and stamping weights and measures.

The approach to the office is attainable only on certain days, as the fruit-growers and stall-holders of the market make a practice of stacking cases of fruit along the footpath in front of the door; the street, meanwhile, being blocked with fruit-carts discharging and loading freight.

I request, respectfully, one thing—to provide a suitable office and for the purchase of the necessary plant to carry on efficiently the work.

It is also necessary that I be provided with the necessary authority for seizure of false weights and scales, and to enter premises for examining bread, and I should also be required to be sworn in, &c.

I have, &c.,
ALFRED C. DENT.

It has been suggested to Mr. Dent that if the office and premises are as bad as he represents them to be, he might submit for consideration a proposal to rent suitable rooms in some central position, stating rent and other particulars. As regards the purchase of plant, he should submit a list of such articles as he may require, and which are absolutely necessary to assist him in the discharge of the duties of his office. Inquiry might be made of the Inspector-General of Police if Mr. Mitchelson was sworn in as a special constable, or if he thinks it expedient that Mr. Dent should be sworn in, as the Act 16 Vic. No. 34 does not appear to require anything beyond the entering into recognisances, as provided in sec. 7.—T.E.M'N., 22/6/83.

Inquiry might be made through the Inspector-General of Police if any rules are in force in Melbourne or Queensland.—T.E.M'N., 25/6/83. Approved.—H.E.C., 26/6/83. Inspector-General, 26/6/83.

No. 11.

The Under Secretary of Justice to The Inspector-General of Police.

Sir, Department of Justice, Sydney, 26 June, 1893.
With reference to previous correspondence on the subject of the duties of Inspector of Weights and Measures, Sydney, I am directed by the Minister of Justice to inquire whether Mr. Mitchelson, the late Inspector, was sworn in as a special constable, and whether you think it expedient that Mr. Dent should be so sworn in, as the Act 16 Victoria, No. 34, does not appear to require anything beyond the entering into a recognisance as provided in section 7.

You will at the same time have the goodness to say whether there are any rules in regard to the office in force in Victoria or Queensland.

I have, &c.,
THOS. E. MACNEVIN
(For the Under Secretary).

APPENDIX E.—1892-93.

LEGISLATIVE ASSEMBLY.—NEW SOUTH WALES.

METROPOLITAN INSPECTOR OF WEIGHTS AND MEASURES.

(RETURN RESPECTING.)

Ordered by the Legislative Assembly to be printed, 2 February, 1893.

RETURN to an *Order* of the Legislative Assembly of New South Wales, dated 10th January, 1893, That there be laid upon the table of this House a return showing:

“(1.) If the Inspector of Weights and Measures is an officer under the control of any Minister, or responsible alone to the Magistrates in Petty Sessions, from whom he received his appointment.”

THE Metropolitan Inspector of Weights and Measures occupies a position in this matter which is somewhat anomalous, inasmuch as he is appointed under section 7 of the Weights and Measures Act, 16 Vic., No. 34, by the Justices in Petty Sessions within the Metropolitan District. The duty of appointing the present Inspector was performed by the Metropolitan Bench of Stipendiary Magistrates, under the Metropolitan Magistrates Act, 1881. He is, however, paid salary by the Department of Justice. As a matter of practice the Inspector is virtually under the sole control of the Minister of Justice, from whom he obtains all necessary authorities, and officially regards as the head of his Department.

APPENDIX F.—(No. 1).

LIST of Reports Furnished to the Department of Justice by the Inspector.

- 2nd December, 1886.—Suggesting amendments of Act 16 Victoria, No. 34.
- 7th June, 1887.—Official visit to Victoria and comments thereon.
- 7th September, 1887.—Necessity for more stringent regulations.
- 20th December, 1887.—That a more stringent Act be provided.
- November, 1888.—As to increased work in the office.
- November, 1889.—Need for a more comprehensive Act.
- 1889-90.—Series of letters *re* railway material for weighing.
- August, 1890.—Suggesting reform of the Act, and pointing out that inspectors are not under central control.
- November, 1890.—Weighbridges. That no means exist to enforce tests for accuracy.
- December, 1890.—*Re* Goulburn official visit. That weighing-machines be brought under the Act.
- 19th February, 1891.—No real reform possible without a simple comprehensive Act.
- 14th July, 1892.—*Re* Wallsend. Inspector's fees: Any refund would lead to inference that charges were illegal.
- 1st August, 1890.—Report. Copy attached.

APPENDIX F.—(No. 2).

Dear Sir,

Albion Foundry, Liverpool, 14 January, 1891.
Our agent at Sydney, Mr. J. Lee Osborn, has sent us a copy of the *Sydney Morning Herald*, containing your annual report on the inspection of weights and measures. Allow us to have the pleasure of complimenting you upon your very able and comprehensive survey of the whole question. We have read the report with deep interest, and we feel your forecast as to the effect the recent legislation in this country will have upon the colonies to be particularly accurate. There can be no question that a large number of machines of faulty and defective construction will be shipped to Australia. The chief offenders in this respect will no doubt be found among low-class makers in the Midland Counties—firms that are in the habit of turning out such things as scale beams with iron centres.

Mr. JAMES W. EVANS,
Inspector of Weights and Measures, Sydney.

We are, &c.,
Pro HENRY POOLEY & SON
(J. H. SMITH).

Sir,

I have the honor most respectfully to ask your kind consideration of the following review of the District Government Bill now before the Assembly so far as it relates to the administration and control of Weights and Measures. In doing so I must crave indulgence for any breach of official routine inadvertently committed.

During the seven years I have acted as your inspector I have collected from various sources a series of reports dealing with this subject, possibly not otherwise obtainable in the colonies. I trust it will not be considered presumption to place my experience and observation beside that of other countries at your disposal.

The inspectors of Weights and Measures here are appointed by magistrates in petty session, and with two exceptions are selected from the police.

In Sydney it was necessary that I should be sworn in as a constable in order to deal with the Bread Act and Coal Acts which requires "a constable duly authorised by warrant."

There are no means of controlling the inspectors thus appointed, and were they not police who naturally are disposed to follow the practice of the older or superior office, a great amount of friction would have arisen ere this.

In Great Britain the local authority has reigned supreme, although the principle of recent legislation has been to place these matters under departmental control the existence of "Leets Courts," "Borough Manorial," and other hereditary rights has so far prevented the adoption of a complete system as foreshadowed by the Imperial Act of 1889, which provides for its gradual centralisation by demanding for the first time a perfect uniformity of materials, stamping and testing also for the examination of inspectors before appointment, and in other essentials, of which local bodies had hitherto been a law unto themselves, without any control whatever.

In Ireland it has been found imperative to place the supervision of weighing appliances under the constabulary, owing to the peculiarities of local influences.

In America it is held as one of the spoils to the victor, and belongs to the ins and outs of party in municipal government, and is consequently deprived of any importance beyond its pecuniary advantages.

In Canada, where the condition of society and government are very similar to our own colony, the Department of Inland Revenue control weights and measures, appointing inspectors and assistants under executive authority, with comprehensive and well-defined powers, giving instructions in book form providing a model testing room, library, and museum of mechanics, and no class of weighing or measuring material is allowed to be offered for sale unless verified and warranty, ceasing at the end of two years.

The states of Germany, France, Austria, Belgium, Holland, Italy, Scandinavia, even Japan, and others I cannot now remember have direct laws with departmental regulations providing for almost impossible contingencies both in the manufacture and use of such appliances subject to drastic penalties. Detailed instructions are published for *Verificateurs* and the public. Costly workshops and technical schools are provided. Officials are subjected to a severe scientific examination. Manufacturers must submit all original designs to a special commission of experts for approval before allowed into use. The police also act in conjunction with the inspectors.

In Victoria the system prevailing is one of municipal control unrestricted except by an ill-defined Act.

In April, 1887, I had the honor to furnish a report to the then Minister of Justice (Honorable William Clarke) embodying the result of an official visit to Melbourne, "to observe the method obtained there in regard to weights and measures" to which I desire to refer you. My views therein expressed have become intensified by later data.

In New Zealand weights and measures are deputed to an official in each province who has no supervisor, the result being a dead letter. An expert writing from there recently states "I must say I have found no inspection in New Zealand to at all compare with yours in Sydney; the Government here, who undertake it, seems negligent about it, &c."

In Queensland it would appear to be an unknown quantity.

Of the other colonies I cannot say more than that their silence in reference to these matters are a severe sign of indifference.

It will be seen from the foregoing that, except Victoria or places hampered by old-times traditions, the regulation of weights and measures is not made subject to other than Government control, and would appear to form the only exception to that principle of decentralisation deemed so essential to local prosperity. Every recent Act shows a distinct step towards that uniformity which is clearly impossible under an irresponsible authority.

The revision of our Weights and Measures Act is urgently needed, not only for its better administration, but also to place a check on the flood of rubbish now pouring into the colonies being the refuse of Great Britain, its laws now rejecting all inferior material. As this question embodies the purest principles of legislation, and outside the pale of party or personal prejudice it is calculated to secure such attention as no other subject could command.

I have pleasure in stating that the progress made here since my appointment has exceeded the most sanguine hopes.

Therefore, I would most respectfully submit that so important a change might be delayed until distinct legislation be obtained, as under the condition of the present Act it would lead to confusion, misrepresentation, and practically form a vehicle to malpractice and fraud, unless stringently defined and protected; hence, it is a question worthy of the highest consideration whether in following the practice of Victorian laws, rather than that of older and more practically conversant countries, whose experience in mercantile and scientific pursuits are so pre-eminent, and whose machinery in this Department has worked with unqualified success. We shall not expose ourselves to the risk of greater evils than those from which we now suffer. Viewed by the light of that progress in other countries, a change to the Victorian system would, in my opinion, be decidedly retrogressive, and not in accord with modern thoughts and legislation, and is opposed to the expressed opinion of those savants who have devoted years of study to this question.

It is palpable that the proper discharge of these high functions approximate so closely in regard to a necessity for practical skill and exactitude of method to those involved in coinage as to be only second in importance. There could never be a question of allowing local bodies to regulate their own currency, or to depute unskilled persons to determine its value; in like manner this duty, if held in conjunction with the inferior or subordinate offices in small municipalities, would speedily become here what it has, where private interests are allowed to prejudice the possible good, such as is inevitably the case where interested persons have direct and unrestricted control.

Having asserted so much, I may be pardoned for urging as an axiom that the principle of the state providing for and maintaining a complete supervision over its weights and measures is no less a duty than providing for proper coin, and appears to be that guarantee which a wise Government should offer to commerce, thereby securing an efficient test of its honor, probity, and mercantile integrity. This duty can only be correctly conducted when directed by one responsible head or tribunal from which all regulations emanate, and Inspectors be instructed in the intensely practical duties devolving upon them.

The importance of this subject, and its direct contact with every phase in life, is the only apology I can offer for the extreme length my letter has reached.

I enclose herewith books marked "A," "B," "C," and "D," also two letters.

I am, &c.,

JAMES W. EVANS,
Metropolitan Inspector.

The Honorable The Minister of Justice.

SUPPLEMENTARY REPORT.

Sir,

Weights and Measures Office, 110, Bathurst-street, Sydney, 21 March, 1893.

Referring to your letter of the 28th ultimo, in which I am invited to make any statement I think fit with reference to those portions of the Report of the Board of Inquiry into the working of the Weights and Measures Office, &c., affecting me personally or the administration of my office.

I may point out that in my Principal Report I have been compelled, from the turn taken by the inquiry, to deal with the question from a somewhat personal standpoint; and I am in some doubt whether more is required from me in terms of your letter.

I have, therefore, embodied my views on the question of administration in a Supplementary Report, to be dealt with as you may deem advisable, which I have now the honor to submit.

The duties of my office are twofold, and include:—1. Verification; 2. Inspection.

In the performance of this duty I have to deal with the primary standards, which are copies of the Board of Trade Standards of London. It would be obviously impossible to re-verify these in the Colony without obtaining expensive scientific appliances, and in the present state of communication it is far easier to replace them from London when necessary. The material under my charge and now in use is, with the exception of surveyors' standards, in all respects in advance of the requirements of the public, and will, with slight alterations in existing arrangements, answer every purpose for many years to come.

The subject of the primary standards deposited in the Treasury has been fully dealt with by the Board.

These are only used for verification of the secondary or Inspectors' standards.

I would respectfully suggest that, for the purpose of future verifications, the primary standards might, when required, be brought to this Office in charge of an officer of the Treasury, so that tests might be conducted by means of the large Oertling balance (than which there is admittedly none finer in the Southern Hemisphere) and other appliances. In

Duties of
Inspector.
Verification.

Primary
Standards of the
Colony.

Secondary Standards.

In any fresh enactment secondary standards should be provided for the general testing of Inspectors' standards, in order to avoid unnecessary use of the primary standards.

In 1888-91 many of the secondary standards in country districts were placed in my hands for re-verification. I would respectfully submit that, in view of the experience thus gained, I am strongly impressed with the necessity for the verification of such standards at periods of, say, five years.

The practice in England, Canada, France, Germany, &c., is re-verification of weights every five years, measures every ten years.

Weights and Measures Material used in trade.

Data for the periodical re-verification of material used in trade depend so entirely upon the nature of the business conducted that no fixed rule as to period can be laid down.

It is, however, the duty of all persons using such material to have it re-verified periodically, and if found incorrect adjusted by a competent tradesman.

In this respect the Inspector operates as a check upon dishonest tradesmen who, by representing to the public that their apparatus is defective, or even by tampering with it under pretence of examination, obtain work at the expense of their credulous victims.

It is admitted, in all European countries, that the periodical visits of Inspectors enable every one to know the precise condition of his material.

Balances and Counter Weighing Machines.

The public are not compelled under the present Act to submit these for inspection and approval; but as, since the passing of the English Act of 1889, tons of faulty and incorrect material, too bad to pass the English tests, have been shipped to the colonies (see my reports for 1889-90), I considered it part of my duty to warn the public against the purchase of such material, and advised them, for their own protection, to submit balances at this office for examination and approval before purchasing.

This has been proved of the greatest possible use, and has been adopted by the more respectable firms as a means of satisfying their customers of the reliability of same.

All weighing appliances should be brought under the operation of the Act, and penalties provided to prevent any person from selling or exposing for sale any material not previously certified as correct and stamped. This is the practice in Canada and many European countries, whereas in England they need only be stamped before use.

Schedules of Error and Tolerance.

The allowance made for deviation in the standards are so clearly set forth in the Schedules to the English Act of 1889 that they need no comment here; but I may mention that the tolerance of error in tradesman's scales is largely a matter for the consideration of the Inspector, who has to take into account the nature and value of the materials weighed, &c., &c.

I desire to point out that the duties involved in verifying are totally distinct from those of an Inspector. The former demand special qualifications, since they require a technical knowledge of the principles of mechanical construction, leverage, &c., and their application. The latter merely involves comparison by means of the standards; the establishment of a result without the consideration of the cause.

Inspection.

The necessity for reform in our system of Weights and Measures is so universally admitted that I shall merely quote from the report of the Select Committee of the House of Commons on Weights and Measures, 1862, page 8:—"It is clear that no plan of reform can succeed unless it is accompanied by a comprehensive and exact system of inspection; but we require the establishment of an efficient central department to give force and unity to local action."

The work of inspection should be directed—First: To the prevention of fraud. Second: To its detection and punishment.

Under the existing Act it is impossible to fulfil either of these conditions.

For convenience we may classify this subject under two heads: (a) Inspection of weighing material; (b) inspection of goods sold by weight.

The Act but imperfectly provides for the inspection of weighing material.

It has but two operative clauses, 9 and 17, and these are so indefinitely worded that I have only succeeded in establishing the limit of my powers as inspector by a series of test cases, having, on my appointment, absolutely no precedents to guide me.

While the Act provides for the testing and stamping of weights and measures, all other material is exempt from this safeguard.

Quoting again from report of select committee of weights and measures, 1862, page 263, appendix 4, the Comptroller-General of the Exchequer says:—"This duty (the comparison of weights and measures) will be incomplete if care be not taken and remedial measures applied to ensure the integrity of balances as well as weights. However perfect the latter may be, their accuracy will be fruitless if the balance be incorrect."

It is imperative that scales and other weighing machines shall be verified before being issued for use and stamped as a guide to the inspector, who, having no facilities for testing their quality and construction on his rounds, would be thus enabled at once to identify machines, of which many are now in use, too faulty to receive official sanction. All weights, measures, and weighing appliances should be verified and stamped before being sold or offered for sale, under penalties. As a matter of justice, the purchaser of these articles is as much entitled to a guarantee of their correctness as his customers are to correct weight.

In the remote districts to which most of the inferior material finds its way this is especially necessary.

Objections will probably be raised in this, as in other countries, to this course, in anticipation of which I would urge that—

Taking the maker or dealer as the unit, allowing fifty purchasers of his material and 1,000 families dealing with these fifty tradesmen, the unit should have a remarkably strong case to override the best interests of his constituents; and I cannot believe that others than those interested in the sale of cheap and faulty appliances would be injured, since it is already found of advantage that high-class material should be protected by verification and stamping. The English Act provides that all weighing appliances shall be tested and stamped before being used.

In Canada, France, German Empire, and most European countries, they must be stamped before being exposed for sale, whether new or second-hand.

Inspection of Goods sold by Weight.

This subject, though of paramount importance, has only so far been attacked in a half-hearted way by English legislation.

It can scarcely be said to belong strictly to the domain of Weights and Measures proper, yet I have for years endeavoured in my annual reports to call attention to the necessity for some action being taken in this matter.

The French penal code of 13th May, 1863, article 423, provides that,—"Whoever deceives a purchaser with respect to the nature of the article sold, or, by using false weights and measures deceives him as to the quantity sold, is liable to imprisonment for not less than three months or more than one year, or to a fine, &c." The duties of inspection are performed by the police under this section.

I desire particularly to call your attention to an Act of the Dominion Parliament (48-49 Vic., cap. 63), assented to 26th July, 1885, of which I attach a copy (*Appendix A*).

It is entitled "An Act Respecting Canned Goods"; but its provisions, if extended so as to embrace packages of all descriptions, appear to me to be almost exactly suited to our requirements.

Sections 20 and 21 of the Principal Act further provide that any article which cannot be agreed for by weight or measure shall be taken as coming under the provisions of this Act.

Quoting from a circular issued from the office of the Sealer of Weights and Measures, city of New Providence, U.S.A. Public Statutes, cap. 143, section 14: "Every person who knowingly sells any commodity by weight or measure for a greater quantity than is actually delivered to the purchaser thereof, shall be fined not exceeding 100 dollars, or imprisoned not exceeding three months."

Bread Act.

The suggestion (a) of the Board *re* the alteration of the word "Examiner" to "Inspector" would not meet the case; as by a glance at the 11th section it will be seen that the powers conferred by the old Weights and Measures Act, 3 William 4, No. 4, have not been transferred to the Act 16 Vic., No. 34:—I have been sworn in as a constable, and duly authorized by warrant to enable me to take action under this Act.

(b)

(b) It is impossible to define fancy bread, since new kinds are continually being placed upon the market. I am of opinion that full-weight bread should be clearly defined, all other being taken as fancy bread. This, however, should have a stated allowance made in its favour of, say, 2 oz. in the lb.

It appears to me that there would be no objection to limiting the hours of seizure of bread—say from midnight to 4 p.m.; but the Inspector should have power to seize the bread wherever he may find it. Report—page 15
par. 2.

If *denomination* is to be held to mean "size," and not as I have proved in the Supreme Court "shape" or "make," then the allowance for fancy bread must be abolished and all bread taken as full weight.

Coal Delivery Acts.

Under these Acts the Inspector should have power to weigh coal in transit, and without reference to the purchaser, as the consumer is now placed in a very invidious position.

Coal dealers should be compelled to keep a weighing machine in their yard, in addition to those on the carts.

The Canadian or French "stere," a portable frame of certain dimensions, might be taken as the gauge of measurement for wood used for fuel on account of the absence of proper weighing appliances in country districts.

Wood and all other fuel might be sold by weight in large centres of population, but should in any case be under strict supervision.

General.

Any measure tending to define and regulate the work of inspection must be a distinct improvement on the present state of affairs.

Whatever the system of control adopted the objects to be obtained are :—

1. Uniformity of practice.
2. Exact definition of Inspector's powers.
3. Provision for informations to be laid by the public through the Inspector or otherwise.

New Legislation.

In conclusion, may I be permitted to state, that in my opinion, based on the practical experience I have gained after some years of administration of the laws relating to weights and measures, a short amending act dealing with the matters I have indicated would answer every present requirement, and would afford a basis of experience upon which to found a new and comprehensive Act and regulations, necessarily a work of time, and one requiring the most careful consideration.

I have, &c.,

JAMES W. EVANS,
Metropolitan Inspector.

The Under Secretary of Justice.

APPENDIX A.

An Act respecting Canned Goods.—A.D. 1886.

HER Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows :—

1. In this Act the expression "package" means every can, tin, or package in which articles or goods are put up for sale, and which are closed by being hermetically sealed. 48-49 V., c. 63, s. 1. Interpretation
"package."
2. Except in the case of goods packed previously to the twentieth day of July, one thousand eight hundred and eighty-five, every package of canned goods sold or offered for sale in Canada, for consumption therein, shall have attached thereto or imprinted thereon a label or stamp, setting forth in legible characters the name and address of the person, firm, or company by whom the same was packed, or of the dealer who sells the same or offers it for sale. Name and
address of packer
to be stamped
on packages.
2. Every such package containing goods prepared from products which have been dried previously to being so prepared shall, in addition, be labelled or stamped with the word "soaked." Dried goods.
3. Every person who sells or offers for sale any such goods in violation of any provision of this section shall, on summary conviction before a justice of the peace for a first offence incur a penalty of two dollars for each such package, and for a subsequent offence a penalty not exceeding twenty dollars and not less than four dollars for each such package in respect of which any such provision has been violated. 48-49 V., c. 63, s. 2. Penalty for
contravention
3. Every person who places on any package any label, brand, or mark which falsely represents the quantity or weight of the contents of such package shall, on summary conviction before a justice of the peace, incur a penalty of two dollars for each package on which the quantity or weight is so falsely represented. Provided always that a variation under the rate of three per cent. shall not be deemed a violation of the provisions of this section. 48-49 V., c. 63, s. 3. Penalty for mis-
representation
of contents.
4. Every person who places on any package any label, brand, or mark which falsely represents the date when the article or goods contained therein were packed shall, on summary conviction before a justice of the peace, incur a penalty of two dollars for each package on which such date is falsely represented. 48-49 V., c. 63, s. 4. Or of date when
packed.

The Under Secretary for Finance and Trade to The Under Secretary of Justice.

Re Report of Board Weights and Measures.

In dealing with the report of the Board, so far as it affects the Treasury, I would point out, in the first place, that the Standards which are required by law to be deposited in the Colonial Treasury, were so kept there until about August, 1889, when they were temporarily transferred to a branch of the Treasury—the Stores Department—there being no accommodation whatever in the main building for carrying out the large work of testing and stamping, &c., of about 120 sets of weights and measures, which the Justice Department had instructed to be returned by the country benches, to whom they had been forwarded from time to time, without having been first tested, stamped, verified, and certified to as by law required to make them legal copies of the Standards. Which department is responsible for this oversight, I am not aware—certainly it is not the Treasury. So soon as the whole of these sets have been put through the process of testing, &c., the Standards will be redeposited in the Colonial Treasury proper.

It is, however, much to be regretted that although about 120 sets had to be tested, &c., and that it is now some 3½ years since the Standards were removed to more commodious premises partitioned off and set apart for this special work in the Stores Branch, only 33 sets have as yet been put through the process, and this arises from the very tardy way in which the weights, &c., are brought to the Treasury by Inspector Evans. At the slow rate this duty is now proceeding it will take many years to complete the whole lot. It, therefore behoves the Justice Department to take steps in the matter, and require greater attention and more speed in sending down the remaining sets, so that this business may the sooner be finished and put an end to.

In regard to the boxes containing the Standards and the baize lining of the cells of the partitions thereof, which has become decayed and moth eaten, the Board recommend that they should all be thoroughly cleaned and relined with black velvet; and to this end the Justice Department should be asked to direct the Inspector of Weights and Measures to send down a qualified workman, provide the material, and clean, repair, and otherwise do all that may be required for putting the appointments and the weights and measures, &c., into thorough good order, all of which, however, must be carried out in the presence of an officer of the Treasury.

The

The Board further recommend that the Standards be deposited in some secure room in the Treasury, where suitable arrangements should be provided for making tests, &c. But until the necessary accommodation is provided in the Treasury building, it will be impossible to carry this part into effect.

The four extra troy sets referred to by the Board were brought down with others by Inspector Evans for some purpose other than testing, and they are now merely held at his disposal. They have no connection whatever with the Standards.

Finally, it should be stated that the discolouration of the Standards and their condition generally as a whole arise in a great measure from the fact that ever since they were deposited in the Treasury, somewhere about half a century ago, up to the time of their temporary removal to the Stores, previously referred to, they have been kept almost as a dead letter, so little use having been made of them.

Revenue Branch, Treasury,
29 March, 1893.

W. NEWCOMBE,
Receiver.

This minute might now be referred for the information of the Minister of Justice.—F.K., 30/3/93. Submitted. Approved.—J.S., 30/3/93. The Under Secretary of Justice.—F.K. The Treasury.—B.C., 4/4/93.

No. 10.

The Under Secretary for Finance and Trade to The Under Secretary of Justice.

Sir,

The Treasury, New South Wales, Sydney, 5 April, 1893.

I am directed by the Colonial Treasurer to hand you enclosed—for the information of the Minister of Justice—copy letter received from the Railway Commissioners respecting that portion of the Report of the Weights and Measures Inquiry Board which refers to the weighing of firewood by the Railway Department.

I have, &c.,

F. KIRKPATRICK,
Under Secretary for Finance and Trade.

[Enclosure.]

Government Railways of New South Wales, Secretary's Office,
Sydney, 21 March, 1893.

Sir,

With reference to your letter of 7th instance, respecting that portion of the Weights and Measures Board of Inquiry Report which refers to the weighing of firewood by this Department, &c., I have the honor to inform you that the matter of the correct recording of weights by the Department's weighbridges and scales has been and is receiving most careful attention, and that the adjustment of such machines is regularly attended to all over the lines by an efficient officer, whose time is fully occupied in this direction, and in instructing those concerned in regulating the machines when slightly out of adjustment so as to ensure correct weighing being recorded.

The machines at the principal stations are adjusted every morning. The alleged discrepancies in weights brought under the notice of the recent Board of inquiry are of a general character, and are not in accordance with facts. Goods are not weighed approximately but as accurately as is possible; but it is to be pointed out that we do not weigh for trade purposes, and our weights are simply taken to ascertain freight charges.

Regarding firewood, it is quite possible differences may exist between forwarding and receiving stations, wood may be put in very wet, and drying under a hot sun would affect the weights to some little extent; but, as mentioned, every care is taken to ascertain correct weighings for our purposes.

It may be added that the Commissioners in March, 1890, appointed a special officer for the purpose of attending to the railway weighbridges.

I have, &c.,

H. McLACHLAN,
Secretary.

The Under Secretary for Finance and Trade, Sydney.

No. 11.

Minute of Minister of Justice.

OBTAIN report of chairman on all reports and correspondence received respecting this matter.

R.E.O'C., 6/4/93.

No. 12.

W. M. Macfarlane, Esq., to The Under Secretary of Justice.

Sir,

Department of Justice, 18 April, 1893.

In accordance with Mr. O'Connor's directions that I should report upon all reports and correspondence respecting weights and measures, I have the honor to furnish herewith comments upon the Report and Supplementary Report forwarded by Mr. Evans, and the reports furnished by the Treasury and Railway Commissioners.

Although the functions of the Board of Enquiry appointed by the Minister of Justice have practically ceased, I considered it desirable to confer with Mr. W. A. Dixon in the matter. He concurs with me in furnishing the following comments, viz. :—

(1.) *Mr. Evans' Reports of 21st March, 1893.*

Paragraph II.

The Board endeavoured as much as possible to prevent "uncalled for attacks, scurrilous insinuations, and a display of hostility from outside sources." It was evident that there was much friction and hostility between some of the scalemakers and others, and the Inspector and the Board took this into consideration when drafting their Report. There is little doubt that much of this hostility was due to the Inspector's own action as to certificates, &c.

Paragraph IV.

There was no evidence before the Board that, with one or two exceptions, the persons who objected to Mr. Evans' conduct had suffered prosecution at his hands. He had every opportunity of questioning them, and only one or two admitted that they had been prosecuted, notably Messrs. Dearin and Baskerville. The principal evidence was given by scalemakers who had not been prosecuted.

The

The Board told Mr. Evans, in reply to some question he put at the beginning of the inquiry, that there were no charges against him, but that the Board wanted to elicit all possible information in regard to weights and measures. Many matters arose during the enquiry which materially affected him in his actions as Inspector, but he was given every opportunity of refuting them by cross-examining the witnesses on making direct statements. Paragraph v.

This paragraph is of an insulting nature, and is evidently intended to bring the Board into contempt. Throughout the whole papers, indeed, the Board is absolutely ignored. No doubt the Minister will deal with this in the way it deserves. Paragraph vi.

However large the number of persons who spoke or wrote in Mr. Evans' favour, such evidence being negative, does not refute the positive statements made by others. Indeed most of those "disinterested" persons would not come much into contact with Mr. Evans in a business way. Paragraphs vii and viii.

Here Mr. Evans is again trying to cast a slur on the Board, and the Minister's selection of it, when he states that "by adopting this plan I think I shall be able to clear away some confusion of arrangement in the Report and some confusion of thought which appears to exist in the minds of the Board—a circumstance which might be expected in gentlemen having no practical acquaintance with weights and measures in relation to the every-day wants of the community." It is unnecessary for me to make any comments in reference to Mr. Evans' personal reflections contained in this paragraph, as the Minister was fully aware of the fitness of the members of the Board for carrying out the duties entrusted to them. Paragraph x.

The Board visited Mr. Evans' office at first, and saw that the instruments were sufficient and in good order, and did not consider it necessary to visit it on each occasion when requested by Mr. Evans—Mr. Evans' ability and practice in keeping the instruments in order, and the practical work of the office was not called in question after the first visit. Paragraph xi.

Mr. Evans appears to have strangely misconceived the object the Department had in view in referring the Report to him, and allowing him an opportunity of offering any comment thereon, but it was clearly never intended that he should be allowed to offer any detailed criticisms. Paragraph xii.

According to the opinion of the Crown Solicitor [*copy herewith*] there is no authority under the Weights and Measures Act to charge for stamping or comparing weighbridges, weighing-machines, and steelyards. That Mr. Evans considers himself liable to penalties if his actions are wrong does not make the matter any better, as no one had taken the trouble to sue him. Mr. Evans tries to justify his action in this matter by saying that his charge was for testing the weights, and that the instruments were only of use in connection with the weights. There may be some colour of reason in this with regard to weighing-machines in which the weights are changeable, but none in steelyards and platform weighing-machines (for weighing cartloads) when the weight is fixed the weight is found by the difference of distance of the weight from the fulcrum of the balance. Probably there were no other than dead weight machines used in Australia when the Act was passed. Page 4.

The charge of 1s. per visit made by Mr. Evans in certain cases appears reasonable if the charge had been authorised. Page 5.

It makes no difference whether the witnesses represent three or any number of scalemakers. They have stated persistently that they got tickets for scales from Mr. Evans and one of his employees. His employee, Blakeney, bears this out, as he says that both he and Mr. Evans were in the habit of selling these tickets, page 117, although Mr. Evans states, page 92, "I never sold these tickets myself." That Bowrey and others did not get these tickets may be because they did not require them—Bowrey states, type-written evidence, page 68, "When a customer wanted a ticket, I send up to the Inspector's Office for it. There is a system of tickets for which I pay 6d. I have not affixed these tickets on machines which have not been seen by the Inspector." Page 6.

There is nothing in the Act now in force to authorise the inspection of scales or other dead-weight machines, and certainly not to charge any fees in connection therewith, whatever there may be in the Inspector's contention that the testing of weighing-machines is not testing the machine, but the weights. This was, however, considered more than doubtful by a majority of the Board.

Mr. Evans here admits that a maximum and minimum charge was established, but he does not state under what authority he made it. Page 7.

Although the Board pointed out that Mr. Evans made these charges, they did not comment on the matter as they considered them to some extent reasonable. Page 8.

The arrangement between Wedderburn and Mr. Evans about charging 3d. each for verification tickets appears to the latter a private one, and was merely noted without comment. Page 9.

The Board made no comment about the notices having been sent out annually. Page 10.

A slight discrepancy occurs here in the Report. Mr. Evans stated that he had sold the Globe weights to Wedderburn as standards. He also sold him some 56-lb. weights for testing weighing-machines. The Board made no aversive comment on this as Mr. Evans had bought these weights for the use of the office until the Government standards arrived, and it was only reasonable he should then dispose of them as they were of no further use to him. Mr. Evans is correct in the rest of his statement. Page 11.

It was stated in our Report as follows:—We think it was imperative for him to do so, and it cannot be looked upon as adjusting weights. Page 12.

I am still of opinion that Mr. Evans should not have allowed his employees [*they not having been appointed assistants*] to carry out the important duties of comparing and stamping weights and measures. Page 14.

Mr. Evans' explanation on this point may be satisfactory to himself, but it is unnecessary to comment on the matter. Page 15.

Messrs. Price and Hill were present when Mr. Baskerville made his statement. Each was asked separately whether they agreed with that statement, and each replied in the affirmative. Mr. Evans had the opportunity to ask them any questions, but did not do so [*pp. 36 and 37 of evidence*], and the Board did not think it necessary to go over the matter under these circumstances. Page 16.

Mr. Evans states "That the finding of the Board after my so unreservedly placing my most private affairs together with the books of the society referred to at their disposal is not justified by the facts." The statement of the Board differs from that furnished by me. It is necessary to refer to Mr. Evans' statement, page 1, where he says, "I cannot exactly say how much I have received during the last three years, and have never kept a note of the amount in my books." Also page 9, "It is impossible for me to tell what money I have received only for half fines and where amounts are paid by cheque, but I sometimes give receipts from a book; and don't enter or keep the butts of these receipts." Page 17. Paragraphs xiii to xxv. Every

Every endeavour was then made to ascertain from him some approximate idea of his receipts, without result. At the end, however, when his ultimate statement was taken, he furnished the Board with an approximate account of what moneys he had received [*see his evidence pp. 94-95*] from which the Board took the figures in the Report, and these were not quite satisfactory.

Further, Mr. Evans says, "As it appears that an effort has been made to swell my banking account with a view of making my receipts larger than they really are; I must again reiterate that I am prepared at any time to prove beyond the possibility of dispute the substantial accuracy of the statement tendered the Board."

This statement must be taken in conjunction with the two given immediately above, and to understand what Mr. Evans means by "substantial accuracy." His first statement was practically that he had no idea what his receipts were; his second, made a fortnight after, was what his receipts were.

The Board placed no reliance on the exaggerated statements which had been made to some of the members that the emoluments of the Inspector were excessive. They only wished to find what the position was worth, so as to form an opinion for the guidance of the Minister in the matter.

Supplementary Report.

The main part of this Report is simply an epitome of the recommendations of the Board so far as it goes, with some outside authorities cited, and it will probably be of use so far as future legislation is concerned. The Report of the Board, however, went much beyond these suggestions, and desired to bring other measures within the cognisance of the Department, and about some of which the present Inspector probably knows very little, and he therefore omits all reference to them.

In the appendices of this Report, the notice C, No. 8, being the notice as to China and porcelain weights, there seems to be no legal right to use these weights at all, and the notice of the Inspector as to their absorbent power seems to be *ultra vires*.

The other appendices were all gone through by the members of the Board in manuscript before the inquiry was begun.

Report of the Receiver of the Treasury, dated 29th March, 1893, and Report of the Secretary to the Railway Commissioners, dated 21st March.

I do not think it is necessary to make any comment upon these reports. No doubt the matters referred to will receive due attention when action is taken relating to weights and measures.

I have, &c.,

W. M. MACFARLANE.

Submitted.—A.C.F., 19/4/93.

No. 13.

R. Wedderburn, Esq., to The Minister of Justice.

Sir,

226, Sussex-street, Sydney, 6 April, 1893.

Having been in business as a scale, weight, and weighing-machine manufacturer in the city of Sydney and surrounding districts for a period of over seventeen years, during which time my work has always stood a thorough test, and been approved of, I wish to draw your attention to the manner in which I am treated by Mr. Evans, through me having given evidence at the "Inquiry into the manner of conducting the Weights and Measures Office," and that he means to ruin me and my family by finding fault with my work, which he has not the slightest foundation for. The first injury that I complain of is this:—I took seventeen weights to Mr. Evans at 10 a.m. on March 1, and he passed them all as thoroughly correct as far as the standard of weights and measures goes; but he found fault with one weight, and took out his small gouge and drew out a piece of lead that I had placed in myself. The weight, if I thought as a scalemaker was not a fit and proper one, I would not have submitted it for examination. I submitted the weight to Mr. Fraser, the Under Secretary for the Minister of Justice, to show where Mr. Evans had gouged the lead out, and which he had no right to do. Secondly, also, on March 1, I received the enclosed letter from a firm—Edginton's—for whom I have done work for the last seven or eight years—to inform me that they would not require my services any longer. I went and asked why they should write the letter, and a member of the firm stated that Mr. Evans had been down there, and also from what he had said I believe has caused me to lose that firm's work.

R. WEDDERBURN.

[Enclosure.]

Dear Sir,

102, Sussex-street, Sydney, 27 February, 1893.

Please take notice that in future we do not wish you to adjust or mend any scales in our possession unless you receive special instructions from us to the contrary.

We are, &c.,

Mr. R. Wedderburn, Sussex-street.

T. EDGINTON & CO.

The within letter might, I suggest, be referred to the Inspector of Weights and Measures for report.—W.M.M., 17/4/93. Approved.—A.C.F., 18/4/93. The Metropolitan Inspector of Weights and Measures.—A.C.F., B.C., April 18, 1893.

No. 14.

The Under Secretary of Justice to R. Wedderburn, Esq.

Sir,

Department of Justice, Sydney, 18 April, 1893.

I have the honor to acknowledge the receipt of your letter of the 6th instant, complaining of the alleged treatment received by you at the hands of Mr. Evans, Inspector of Weights and Measures, and to inform you that the same will receive due consideration.

I have, &c.,

ARCH. C. FRASER,

Under Secretary.

No. 15.

19

No. 15.

The Metropolitan Inspector of Weights and Measures to The Under Secretary of Justice.

Sir, Weights and Measures Office, 110, Bathurst-street, 27 April, 1893.

Referring to your B.C. communication of the 18th instant, covering letter of complaint from Mr. R. Wedderburn, I have the honor most respectfully to state in reply to his statements :

1. That I mean to ruin him and his family by finding fault with his work.

I have always treated Mr. R. Wedderburn in exactly the same manner as other persons in the same line of business. If the work submitted by Mr. Wedderburn does not come up to the requirements of this office I refuse to pass it.

2. With regard to seventeen weights submitted on March 1st.

One of these weights contained a piece of lead so inserted as to be liable to fall out after stamping. In accordance with my usual custom, I refused to stamp this weight, and on Mr. Wedderburn becoming abusive I lifted the piece out to show the defect. If the weight had been properly plugged this could not have been done.

3. With regard to Mr. R. Wedderburn's loss of Edginton's work.

I have communicated with Messrs. Edginton on the subject, and beg to submit herewith an explanatory letter from them.

With regard to the general question of interference with the business of scalemakers, I desire to state that it is not unusual for these persons to make equivocal statements in order to procure work, and I am almost daily called upon to make tests for persons who appeal to me.

I append a letter received from Mr. Smith, butcher, Enmore Road, which requires no comment, except that upon examination in compliance with his request I found his scales and weights in perfect order.

I further submit extracts from letters handed in during the late inquiry, of which, through the courtesy of the Chairman of the Board, I was permitted to take copies, as tending to show the nature of my alleged interference with the business of scalemakers.

It is significant that in none of the other colonies are there shops devoted exclusively to scale-repairing and adjusting, while in Sydney alone four firms are engaged in this business.

I have, &c.,

JAMES W. EVANS,
Metropolitan Inspector of Weights and Measures.

[Enclosures.]

(A.)

Weights and Measures Office, 110, Bathurst-street, 20 April, 1893.

Gentlemen,

In a letter dated 6th instant, and addressed to the Minister of Justice, Mr. R. Wedderburn, scalemaker, of 226, Sussex-street, says:

"I received the enclosed letter from a firm—Edginton's—for whom I have done work for the last seven or eight years, to inform me that they would not require my services any longer. I went and asked why they should write the letter, and a member of the firm stated that Mr. Evans had been down there, and also from what he had said, I believe, has caused me to lose that firm's work."

I am instructed by the Department to reply to this charge, and shall esteem it a favour if you can furnish me with any information which will enable me to do so.

With apologies for thus troubling you,

I remain, &c.,

Messrs. J. Edginton & Co.

JAMES W. EVANS,
Metropolitan Inspector of Weights and Measures.

(B.)

102, Sussex-street, Sydney, 26 April, 1893.

In reply to yours of the 20th instant, we can only say that you had nothing to do with our telling Wedderburn that we did not require him to regulate our machines.

We are, &c.,

J. EDGINTON & CO.

Mr. Evans, Metropolitan Inspector of Weights and Measures, 110 Bathurst-street.

(C.)

Enmore, 2 March, 1893.

Mr. Wedderburn has called at our shop on the Enmore Road, and said that the scales and weights used by us is to be sent in to his premises, to be readjusted, as all such work is to be done by them, and the price for doing them is £1 5s. ; but he would do them for us for £1 1s. If you would kindly call and see them before they are done, you would oblige, as we are assured that they are in perfect order.

Mr. Evans.

J. C. and J. SMITH, Butchers,
Per J. SMITH, Enmore Road.

EXTRACTS from letters addressed to the Chairman of the Board in connection with the late Inquiry into Weights and Measures :—

From Messrs. Anderson and Foster, Commission Agents, 222, Sussex-street.

The system as at present carried out is the only one to save us from the imposition of the scale-repairers, who would be at liberty to condemn our machines without authority in order that they might obtain a job.

From Mr. J. R. Collins, commission agent, 258, Sussex-street.

I would like to suggest that a workshop be provided for the Inspector, so that all necessary repairs and alterations would be done under his personal supervision, and thus protect the public from any imposition at the hands of those in the trade to which we are all liable under existing conditions.

From Mr. F. Newby, 191, Sussex-street.

I have had to pay scalemakers from 20s. to 30s. for doing perhaps what was unnecessary, as my scales are always kept clean and in good order. Mr. Evans has always stood between the agents and the scalemakers, and consequently the scalemakers are annoyed that they are unable to make these exorbitant charges any longer.

From

From Mr. F. Wright, Commission Agent, Homebush.

On one occasion a scalemaker came to me and asked me to allow him to take the scales in to look to. I told him I would not, and he told me that if I did not get them done every twelve months I would be fined. I saw Mr. Evans about the matter, and he told me that they had no right to use a threat by saying that I would be fined. A little time afterwards I had the scales tested by Mr. Evans and found them correct.

From Mr. John Booth, Sussex-street.

The system he (Mr. Evans) has adopted has, to a great extent, put a stop to the blackmail that used to be levied by designing scalemakers. One of them once entered my store, went to the scale, declared it out of order. As the Inspector, he said, would be round next day, I had better get it repaired. I sent it to him and he charged me 47s. 6d. for merely painting the column, as nothing else was the matter with it.

From Mr. Alfred L. Smith, 105, Sussex-street.

Hitherto we have had to go to so-called scalemakers to obtain our adjustment and certificate of correctness. This, I think, could be obviated if the Inspector were provided with the necessary conveniences to do the work, and I am sure would be a great saving to those who have to use scales and measures, as instead of it costing pounds to obtain our adjustments and certificate, the work could be done satisfactorily for a few shillings.

With reference to the within papers it will be seen that Mr. Wedderburn complains :—

1. That he (Mr. Evans) means to ruin me and my family by finding fault with my work.
2. That he (Mr. Evans) found fault with one weight, and took his small gouge and drew out a piece of lead that I had placed in myself.
3. That I received the enclosed letter from a firm—Edginton's—for whom I have done work for the last seven or eight years, to inform me that they would not require my services any longer. I went and asked why they should write the letter, and a member of the firm stated that Mr. Evans had been done there, and also from what he had said, I believe has caused me to lose that firm's work.

To those complaints Mr. Evans furnishes the following replies :—

1. I have always treated Mr. Wedderburn in exactly the same manner as other persons in the same line of business. If the work submitted by Mr. Wedderburn does not come up to the requirements of this Office, I refuse to pass it.
2. One of these weights contained a piece of lead so inserted as to be liable to fall out after stamping. In accordance with my usual custom I refused to stamp this weight, and on Mr. Wedderburn becoming abusive I lifted the piece of lead out to show the defect. If this weight had been properly plugged this could not have been done.
3. I have communicated with Messrs. Edginton on the subject, and beg to submit herewith an explanatory letter from them.

It appears clear, from this correspondence, that considerable friction exists between Mr. Evans and Mr. Wedderburn, and as arrangements in connection with Weights and Measures are at present constituted, there is little chance of it abating. As far as I can see, Mr. Wedderburn annoys and irritates Mr. Evans, whether intentionally or not I am unable to say, and it is but reasonable to suppose that such treatment would not be borne without retaliation. At the same time I do not for a moment believe that there is any truth in the allegations made that Mr. Evans has any intention of attempting to ruin Mr. Wedderburn and his family.

As far as lifting the plug of lead in the weight is concerned, I think that Mr. Evans was perfectly justified in his action. When a similar question came before the Board on inquiry, the members were of the same opinion, and reported accordingly.

The letter from Messrs. Edginton & Co. shows clearly that Mr. Evans had nothing whatever to do with the dispensing by that firm of Wedderburn's services.

Mr. Wedderburn might, I suggest, be informed that after careful inquiry the Minister sees no sufficient grounds for further interfering in the matters complained of by him, and Mr. Evans at the same time be also apprised of the decision arrived at, and requested to exercise the greatest forbearance to Mr. Wedderburn in the transaction of his public business, so as, as far as possible, to avoid friction in future.

W.M.M., 3/5/93.

Submitted.—A.C.F., 4/5/93.

No. 16.

The Metropolitan Inspector of Weights and Measures to The Under Secretary of Justice.

Sir, Inspector of Weights and Measures, 110, Bathurst-street, 20 April, 1893.

I have the honor to state for your information that by a decision made at the Newtown Police Court, on Friday, the 14th instant, it appears that the whole of the emoluments accruing to this office as fees has been abolished with the exception of a sum which cannot exceed £60 per annum derivable from the testing of avoirdupois weights and measures of capacity.

I have, &c.,

JAMES W. EVANS,
Metropolitan Inspector Weights and Measures.

Mr. Macfarlane for information.—T.E.M.N., 21/4/93. Seen.—W.M.M., 26/4/93.

Will Mr. Evans be good enough to explain how the decisions in the cases referred to affect the emoluments of his office in the manner stated?—T.E.M.N. (for Under Secretary), B.C., 2/5/93. The Metropolitan Inspector of Weights and Measures.

No. 17.

The Metropolitan Inspector of Weights and Measures to The Under Secretary of Justice.

Sir, Weights and Measures Office, 110, Bathurst-street, Sydney, 3 May, 1893.

Referring to your B.C. communication of the 2nd instant in regard to my letter of the 20th ultimo, I have the honor to state in explanation of how the decision referred to affects the emoluments of this office in the manner stated.

There are certain so-called "slip-weights" attached to platform weighing-machines, and it has been the practice of this office to stamp and charge fees for same under schedule 2 of this Act, 16 Victoria, No. 34.

In numerous cases I have recovered penalties from persons having unstamped slip-weights in use.

In the cases of W. Noble and others, heard before Mr. Whittingdale Johnson, S.M., at Newtown Police Court, on 14th ultimo, a preliminary objection was taken that "slip-weights" are not weights within the meaning of the Act, but component parts of the machine to which they belong, and this being upheld the cases were dismissed.

This

This decision appears to include weights belonging to weighing-machines, weighbridges, and steelyards.

It will thus be seen that the stamping of weights other than avoirdupois or troy cannot now be enforced.

The amount of stamping fees for weights of weighbridges, weighing-machines, and steelyards, for 1892 was £340 8s., which would appear to be no longer exigible.

I have, &c.,
 JAMES W. EVANS,
 Metropolitan Inspector of Weights and Measures.

Whittingdale Johnson, Esq., S.M., for favour of his views.—A.C.F., B.C., 5th May, 1893.

Mr. Evans has correctly stated my decision in these test cases. If he was dissatisfied he could have applied for a writ of prohibition, or for a case to be stated to the Supreme Court.—WHITTINGDALE JOHNSON, S.M., 8 May, 1893.—B.C., U.S. Justice.

ALTHOUGH Mr. Evans has for many years past been charging fees for stamping slip-weights, he appears to have done so without any other authority than his own construction of the Weights and Measures Act. The Crown Solicitor, in his opinion dated the 15th February last, now with the report of Board of Inquiry, states: "I have, therefore, to advise that there is nothing in the Weights and Measures Act, 16 Victoria, No. 34, authorising the Inspector of Weights and Measures to charge fees for examining weighbridges, weighing-machines, steelyards, scales and balances."

The Inspector of Weights and Measures might be furnished with a copy of this opinion, and at the same time informed that if he was dissatisfied with Mr. Johnson's decision, he might have asked that gentleman to state a case for the consideration of the Supreme Court.

INFORMATION.

BE it remembered, that on the 8th day of April, in the year of our Lord 1893, James William Evans, in the Colony of New South Wales, Inspector of Weights and Measures for the Newtown Police Petty Sessions, District in the Colony aforesaid, and a special constable, came before me, the undersigned, one of the Justices of our Sovereign Lady the Queen duly assigned to keep the peace of our said Lady in and for the Colony aforesaid duly authorised in that behalf, and informed me, the said Justice, that on the 6th day of April, in the year of our Lord 1893, one W. H. Noble, of Enmore Road, a street in the Petty Sessions District aforesaid, did use a certain weight to wit, a 2 cwt. weighing-machine weight, such weight not having been compared and stamped under the provisions of the Act 16 Victoria, No. 34. Whereupon the said James William Evans, Inspector as aforesaid, did seize the said weight, and prays that I, the said Justice, will proceed in the premises according to law.

Exhibited at Newtown, in the said Colony, on the day } JAMES W. EVANS.
 and year first above-written before me,— }

FRANK S. FIELDER, a Justice of the Peace.

Case dismissed. Newtown, 14th April, 1893—W.J., S.M.

Summons to the Defendant upon an Information or Complaint.

To W. H. Noble, within the Metropolitan Police District, in the Colony of New South Wales.

WHEREAS information has been exhibited by James William Evans, Inspector of Weights and Measures for Newtown Petty Sessions District, and a special constable, before the undersigned, one of Her Majesty's Justices of the Peace, in and for the Colony of New South Wales, for that you on the 6th day of April, A.D. 1893, at Enmore Road, a street in the Petty Sessions District aforesaid, did then and there use a certain weight, to wit a 2 cwt. weighing-machine weight, such weight not having been compared and stamped under the provisions of the Act 16 Victoria, No. 34. These are therefore to command you in Her Majesty's name to be and appear on Friday, the 14th day of April instant, at 10 o'clock in the forenoon at the Newtown Police Court, Australia-street, Newtown, in the said colony, before such Stipendiary Magistrate in the said Colony, as may be, then and there to answer the said information, and to be further dealt with according to law.

Given under my hand and seal, this 8th day of April, in the year of our Lord one thousand eight hundred and ninety-three, at Newtown, in the Colony aforesaid.

FRANK S. FIELDER, J.P.

Mr. Williamson for Complainant, Mr. Abigail for Defendant. Plea, "Not Guilty."

THIS deponent, *James William Evans*, on oath, saith as follows:—I am Inspector of Weights and Measures for this district; I produce my appointment and warrant to enter, also my appointment as a special constable; I see my information; it is true, and refers to defendant; I visited his place in the Enmore Road

Road on the 6th instant; he is a produce merchant; goods were exposed for sale; I called about 4.30 o'clock p.m.; my assistant was with me, and a vanman; I observed a weighing-machine in the shop of defendant; I examined it by means of copies of the standard weights; I didn't at first send for a police officer; I examined it in presence of the defendant's brother; it was a 6-cwt. lever machine; I ultimately sent for a police officer; I found the machine unjust; I test the weights and the correctness of the machine by putting my standard weights on the beam; I found the 14 lb. weight was 2 cwt. slow; I put the 14 lb. weight on the cup, and then the 14 lb. standard is placed on the platform; the accuracy of that is tested by weights; it was found to be 2 oz. light; the 28 lb. slip was then placed on the cup in the same way; it was 2½ oz. heavy; I then tried the 56-lb. slip; it was approximately correct; it was slightly light; I saw the machine was improperly constructed; it is made by an English firm; I saw it had been improperly adjusted; at 56 lb. the slip appeared to be slightly light; I then tested in the usual manner the corners of the platform, as directed by the Imperial Board of Trade; at the right hand back corner, with 56 lb. on, the machine was 14 oz. against the vendor, and in favour of the purchaser; the left hand back corner was 2 oz. against the vendor; the left hand front corner was 2 oz. against the purchaser; the right hand front corner was 2 oz. in favour of the purchaser; at 112 lb. it took 20 oz. to lift the beam, or the machine was 20 oz. in 1 cwt. against the vendor; at 224 lb. it took 2 lb. to lift the beams, or the machine was 2 lb. against the vendor; at that stage I thought it advisable to send for a constable to watch further developments; he came, and a statement was made by defendant's brother, in defendant's absence; the brother said, "You have not tampered with the machine in any way"; when the policeman came I made another examination; the machine gave new results; it gave a less inaccuracy; I have been appointed by the stipendiary magistrates the person in charge of the standard weights and measures; the four corners work upon a common centre; I tested the machine in accordance with the English regulations; defendant came in at the end; I said, "The machine is very bad, it can be used to suit any purpose"; he said, "I have done all I could, I have taken every precaution, I am very sorry"; the weight of an article placed on the machine varied; the machine kept taking up fresh balances; produce was weighed on the machine.

Objected to by
Mr. Abigail.

To Mr. Abigail: I produce an independent witness who saw me testing the machine; the defendant wasn't present at any testing; Wedderburn's name cropped up; Noble's brother showed me some of his bills; I think I said, "It is a very great pity he didn't take more care, he has misled you"; I had a case concerning Wedderburn two days before; I said on the 4th instant in another matter, "It's not your fault, it's Wedderburn's"; I never said, "I want to get at Mr. Wedderburn, not at you"; I tested the one at the back; it was in very fair order; the machine, the subject of this prosecution, sometimes weighed goods placed in its centre correctly; I could get no accuracy; defendant told me he had had the machine recently adjusted; I want to keep clear of Wedderburn; he has been opposed to me for nine years; I won't say is Wedderburn a competent and fair scale adjuster; I won't say either way.

Taken and sworn at Newtown, this 14th April, 1893,
before me—

JAMES W. EVANS.

WHITTINGDALE JOHNSON, S.M.

THIS deponent, *Michael Duffy*, on oath, states:—I am a constable of police; I know the defendant's premises; I remember the 6th instant; I entered defendant's shop; in my presence Evans tested a weighing-machine; he used copies of the standard weights; something was wrong in my opinion with the machine; it didn't work correctly; it would sometimes raise its beam without any weight; it was 2 oz. light in 14 lb.; at any other weights the machine was against the seller; the only time during the whole examination when the scales showed against the purchaser was when the 14 lb. weight was put on; at all other times and tests, six or seven, the machine registered against the vendor; some parts of the examination showed the scale to be fair enough; I saw the corners tested; they did not correspond; the whole affair fluctuated.

To Mr. Abigail: I don't know much about scales; I never before saw scales tested by a competent official; the 14 lb. weight was put on the centre when the machine went 2 oz. against the purchaser; the corners were tested afterwards; it worked badly every time except a few times; it was generally against Noble; it balanced occasionally.

Taken and sworn at Newtown, this 14th April, 1893,
before me,

MICHAEL DUFFY.

WHITTINGDALE JOHNSON, S.M.

THIS deponent, *James Patterson*, on oath, states:—I am assistant to Mr. Evans; I remember being at defendant's place on the 6th instant; I drive a buggy; I saw Mr. Evans test the weighing-machine; it was unjust; it varies in different corners; I wrote down my observations at the time; it was 3 oz. heavy in two corners and 5 oz. in a third, and 2 oz. in his favour on the beam; it would be against the vendor; it was incorrect and out of order.

By Mr. Abigail: I have been seven years with Evans; he generally goes to a place in a buggy, which I drive; I took no notice of any conversation between Evans and Noble.

Taken and sworn at Newtown, this 14th April, 1893,
before me,—

JAMES PATTERSON.

WHITTINGDALE JOHNSON, S.M.

THIS deponent, *William Henry Noble*, on oath, states as follows:—I am defendant; I am a produce merchant, residing at Enmore Road; I am sure no one tampered with the machine in any way since Mr. Evans made his test; I swear it; Evans never offered to re-test the machine when I came in; he said, "Wedderburn has misled you; I don't want to get you into trouble—I want to get at Wedderburn"; I never allowed any one to interfere with the machine; Evans didn't say, "I'm sorry for you—you've been got at by Wedderburn"; the policeman told me the scales were wrong.

Taken and sworn at Newtown, this 14th April, 1893,
before me,—

W. H. NOBLE.

WHITTINGDALE JOHNSON, S.M.

This

THIS deponent, *Robert Wedderburn*, on oath, states as follows:—I am a scalemaker of twenty-two years' standing; I make scales; I didn't make the machine in question; I repaired it for four years; I made two inspections of the machine since Mr. Evans called; the Government Inspector of Weighbridges and Weights was at my second test; I made two complete tests; the result is that the machines were correct; I gave evidence on an inquiry; the machine was a true balance on both occasions; Mr. Noble came to me after Mr. Evans had served him with a summons; I had Mr. Palmer with me; I tested the scales with copies of weights passed by Mr. Evans; I tested the beam carefully; both it and the whole machine was absolutely correct.

By Mr. Williamson: Someone must have done a trick of hand to make the weights go wrong to deceive the policeman.

Taken and sworn at Newtown, this 14th April, 1893, } ROBERT WEDDERBURN.
before me,—

WHITTINGDALE JOHNSON, S.M.

THIS deponent, *John Cross*, on oath, states:—I am Inspector of Railway Weighing machines and Weights; I went this morning and saw the machine tested, and tested it myself with each counterpoise weight; I tested everything; the right hand back corner was slightly slow; the machine was virtually correct in three corners, and under 2 oz. incorrect in the other; the machine was correct to all intents and purposes; the machine always lifts; I should have certified to it as a correct standard weighing-machine.

By Mr. Williamson: I can only swear to what I saw—2 oz. is allowed.

Taken and sworn at Newtown, this 14th April, 1893, } JOHN CROSS.
before me,—

WHITTINGDALE JOHNSON, S.M.

THIS deponent, *James Cable*, on his oath, states as follows:—I am a scalemaker; I have been in the line for thirty-five years; a correct weighing-machine must be all round alike.

Taken and sworn at Newtown, this 14th April, 1893, } J. CABLE.
before me,—

WHITTINGDALE JOHNSON, S.M.

THIS deponent, *Richard Wedderburn*, on oath, states as follows:—I swear I have in no way adjusted the machine since the 4th instant; I never tampered with the machine, and never was with it by myself.

Taken and sworn at Newtown, this 14th April, 1893, } R. WEDDERBURN.
before me,—

WHITTINGDALE JOHNSON, S.M.

THIS deponent, *John Kerr*, on his oath, states:—I am a scalemaker of 44 years' duration; I examined the scales yesterday; Wedderburn tested them in front of me; I then tested them; I have only been a week in the colony; I found the scales correct; one corner was a little slow; it was very reasonable, only just over an ounce; I would have certified it as a correct scale; the scale was not unjust; if it took 6 oz. to raise it it would not be correct; I never tested a more accurate machine.

Taken and sworn at Newtown, this 14th day of April, 1893, } JOHN KERR.
before me,—

WHITTINGDALE JOHNSON, S.M.

Evans v. Noble; case dismissed.—W.J., S.M., Newtown, 14/4/1893.

New South Wales, }
to wit. } 16 Victoria No. 34, sec. 17.

INFORMATION.

BE it remembered that on the eighth day of April, in the year of our Lord 1893, James William Evans, in the Colony of New South Wales, Inspector of Weights and Measures, and a special constable, came before me, the undersigned, one of the justices of our Sovereign Lady the Queen in and for the Colony of New South Wales, including the Newtown Police Petty Sessions District, duly authorised in that behalf, and informed me, the said Justice, that on the 4th day of April, in the year of our Lord 1893 he, the said James William Evans, did enter a certain place, to wit, a store occupied by H. Edwards, junr., and situate in 250, King-street, in the Petty Sessions District aforesaid, wherein goods were exposed for sale, and then and there examined two weighing-machine weights, and then and there compared and tried the same with the copies of the standard weights and measures authorised to be provided under the Act to amend the laws relating to weights and measures, intituled 16 Victoria, No. 34; and upon such examination it appeared that the said two weights were light, to wit, 14 oz. And the said James William Evans, Inspector as aforesaid, did then and there seize the same; and prays, that I, the said Justice, will proceed in the premises according to law.

Exhibited at Newtown, in the said Colony, on the day } JAMES W. EVANS.
and year first above-written, before me,—

FRANK S. FIELDER,
A Justice of the Peace.

Case dismissed. Newtown, 14/4/1893, W.J., S.M.

Summons

Summons to the Defendant upon an Information or Complaint.

To H. Edwards, junr., within the Metropolitan District, in the Colony of New South Wales.

WHEREAS information has been exhibited by James William Evans, Inspector of Weights and Measures for the Newtown Police Office Petty Sessions District, and a special constable, before the undersigned, one of Her Majesty's Justices of the Peace in and for the Colony of New South Wales, for that you, on the 4th day of April, A.D. 1893, were the occupier of a certain place, to wit, a store situated in 250, King-street, in the Petty Sessions District aforesaid, wherein goods were exposed for sale and certain two weighing-machine weights were then and there examined by the said James William Evans, as such Inspector as aforesaid, and then and there compared and tried the same with the copies of the Standard Weights and Measures authorised to be provided under an Act intituled "An Act to amend the Laws relating to Weights and Measures" (16 Victoria, number 34), and upon such examination it appeared that the said two weights were light, to wit, fourteen ounces. These are therefore to command you in Her Majesty's name to be and appear on Friday, the 14th day of April instant, at 10 o'clock in the forenoon, at the Newtown Police Court, Australia-street, Newtown, in the said Colony, before such Stipendiary Magistrate in the said Colony as may be, then and there to answer the said information and to be further dealt with according to law.

Given under my hand and seal, this 8th day of April, in the year of our Lord one thousand eight hundred and ninety-three, at Newtown, in the Colony aforesaid.

FRANK. S. FIELDER, J.P.

INFORMATION.

BE it remembered, that on the 8th day of April, in the year of our Lord 1893, James William Evans, in the Colony of New South Wales, Inspector of Weights and Measures, and a special constable, came before me, the undersigned, one of the Justices of our Sovereign Lady the Queen, in and for the Colony of New South Wales, including the Newtown Police Petty Sessions District, duly authorised in that behalf, and informed me, the said Justice, that on the 29th day of March, in the year of our Lord 1893, he, the said James William Evans, did enter a certain place, to wit, a shop occupied by Samuel Cover, and situate in 17, King-street, in the Petty Sessions District aforesaid, wherein goods were exposed for sale, and then and there examined a certain beam, with scales, and then and there compared and tried the same with the copies of the Standard Weights and Measures, authorised to be provided under the Act to amend the laws relating to weights and measures, intituled 16 Victoria, No. 34; and upon such examination it appeared that the said beam, with scales, was unjust 1 oz. And the said James William Evans, Inspector as aforesaid, did then and there seize the same; and prays that I, the said Justice, will proceed in the premises according to law.

Exhibited at Newtown, in the said Colony, on the day }
and year first above-written, before me,— }

JAMES W. EVANS.

FRANK S. FIELDER, a Justice of the Peace.

Withdrawn—Newtown, 14/4/93.—W.J., S.M.

Summons to the Defendant upon an Information or Complaint.

To Samuel Cover, within the Metropolitan Police District in the Colony of New South Wales.

WHEREAS information has been exhibited by James William Evans, Inspector of Weights and Measures for the Newtown Police Office Petty Sessions District, and a special constable, before the undersigned, one of Her Majesty's Justices of the Peace, in and for the Colony of New South Wales, for that you, on the 29th day of March, A.D. 1893, were the occupier of a certain place, to wit, a shop situated in 17, King-street, in the Petty Sessions District aforesaid, wherein goods were exposed for sale, and a certain beam, with scales, was then and there examined by the said James William Evans, as such Inspector as aforesaid, and then and there compared and tried the same with the copies of the Standard Weights and Measures, authorised to be provided under an Act intituled "An Act to amend the Laws relating to Weights and Measures" (16 Victoria, No. 34), and upon such examination it appeared that the said beam, with scales, was unjust, to wit, 1 oz. These are therefore to command you, in Her Majesty's name, to be, and appear on Friday, the 14th day of April instant, at 10 o'clock in the forenoon, at the Newtown Police Court, Australia-street, Newtown, in the said Colony, before such Stipendiary Magistrate, in the said Colony, as may be, then and there to answer the said information, and to be further dealt with according to law.

Given under my hand and seal, this 8th day of April, in the year of our Lord 1893, at Newtown, in the Colony aforesaid.

FRANK S. FIELDER, J.P.

No. 19.

Messrs. W. M. Macfarlane and W. A. Dixon to The Under Secretary of Justice.

Department of Justice, 10 April, 1893.

IN reference to the complaint to the Minister of Justice by Mr. R. Wedderburn as to the manner in which Mr. Evans had tested some 56-lb. weights, and in response to the request of the Minister, we have the honor to report that we visited the office of the Inspector to see the weights re-tested.

Mr. Wedderburn was present, but Mr. Evans objected strongly to his being present during the testing, on which, however, we insisted.

Mr. Wedderburn's complaint was: 1st. That Mr. Evans had stamped four 56-lb. weights, which were incorrect, as being light to such an extent that a customer of his buying them might have the weights seized and condemned by the Inspector in his rounds. 2nd. That the balance or beam scales on which they were tested was incorrect, as it would not stand the transposal of the weights and standards to the opposite pans.

There

There is no allowance for "remedy" in the Act in New South Wales, that is, the amount of error which is allowable in weights of different sizes. The Inspector explained to us that he had adopted the regulations laid down for the inspector in Great Britain, which allows the amount of 50 grains for a 56 lb. iron weight, and showed us the printed regulations. Three of the weights tested were within the remedy, whilst the fourth was about 70 grains, or 20 grains outside the remedy, and the Inspector said he thought he was justified in stamping that weight. It seems to us that he was so, as it means only one part in 5,850, and he is subject to no regulations.

Mr. Wedderburn seems to think that it was an injustice to him to have them stamped, but had the Inspector desired to be strict with him he could have refused to stamp them, and made him take them away and correct them. The weights were quite correct enough for the rough use to which such common weights are applied, as they are roughly handled and so worn away.

The balance or scales were 30-inch beam scales, with rounded knife edges, and it was tried first with 15 grains in one pan and the same in the other, when it swung and turned in either direction quite distinctly, and this is the turning-weight for a balance of that size. The balance stood even, when empty, although free to swing. It was then tried with standard 56 lb. weights, shifted from pan to pan, and with this load, and with about 2 dwts. in excess in either pan, it swung easily, and similar results were obtained with the iron weights complained of. This increased weight over that required to swing the empty balance is strictly in accordance with the extra pressure and consequent friction brought on the knife edges by loading the balance with 1 cwt.

We therefore conclude that the balance is correct for all practical purposes.

We have, &c.,

W. M. MACFARLANE.

WILL. A. DIXON.

No. 20.

J. S. McGowen, Esq., M.P., to The Under Secretary of Justice.

Sir,

Legislative Assembly, N.S.W., Sydney, 24 April, 1893.

Having received the enclosed documents I forward them to you for perusal.

Certainly if the statements made are true, matters have no right to remain as they are. If Evans has received a bribe he has no right to be in charge of a public department. And if the statements made are a libel on the character of an honest man the libeller should most certainly be brought to account.

Faithfully yours,

JAS. S. MCGOWEN.

[Enclosures.]

(A.)

THIS deponent, *William Henry Noble*, on oath, states:—I am defendant; I am a produce merchant residing at Enmore Road; I am sure no one tampered with the machine in any way since Evans made his test; I swear it; Evans never offered to re-test the machine; when I came in he said "Wedderburn has misled you, I don't want to get you into trouble, I want to get at Wedderburn"; I never allowed anyone to interfere with the machine; Evans didn't say, "I'm sorry for you, you've been got at by Wedderburn"; the policeman told me the scales were wrong.

(B.)

50, King-street, Newtown, and Chapel-street, Marrickville, 17 April, 1893.

On April 7th or 6th I hereby state that Mr. Evans stated that that time he summoned my father was through Mr. Wedderburn.

I can swear to this statement.

I am, &c.,

W. H. EDWARDS.

(C.)

Strawberry Hills Butchery, 11 April, 1893.

Statement by Mr. Schonhardt.

THAT on one occasion about five years ago Mr. Evans visited my shop and took a 7 lb. set of brass weights for being light. He took them on the Friday, and I went down on the Monday in company with Mr. Woodward, butcher, of Foveaux-street, and instead of Mr. Evans prosecuting me I gave him a one pound note (£1) in the presence of Mr. Woodward and Mr. Feherenbach and myself—and I was not prosecuted on that occasion, and he gave me the 7 lb. set of weights back. That on the Mr. Evans visited my shop and found fault with a machine I had on the counter, for which I was summoned and fined. Previous to the case being heard I went down to Mr. Evans' office and inquired what he was going to do. He said he was going to summons me. I asked him if it was possible to keep the case out of the paper. He said he would if he could. I gave him a sovereign (£1), but the case appeared in the papers.

J. SCHONHARDT.

Submitted. The Metropolitan Inspector of Weights and Measures might be asked for report through the Stipendiary Bench, by whom he was appointed to his present office.—A.C.F., 27/4/93. Approved.—R.E.O.C., 27/4/93.

The Stipendiary Magistrates.—T.E.M.N. (for U.S.), B.C., 27/4/93.

Mr. Evans for report.—C. Delohery, S.M., B.C., 29/4/93.

Report of the Inspector of Weights and Measures is forwarded herewith, together with Mr. Wedderburn's letter. The report has been seen by Messrs. O'Malley Clarke, Addison, and Delohery, but not by the other stipendiary magistrates, being urgently required by the Department is forwarded to avoid delay.—Francis S. Isaacs, C.P.S. and C.M. The Under Secretary, Department of Justice, B.C., 18/5/93.

Urgent. Submitted. Report of Inspector of Weights and Measures forwarded herewith.—T.E.M.N. (for U.S.), 19/5/93.

No. 21.

The Metropolitan Inspector of Weights and Measures to The Chairman of the Stipendiary Bench of Magistrates.

Sir,

Weights and Measures Office, 16 May, 1893.

Referring to your B.C. communication of the 29th inst. (? ult.) enclosing papers [returned herewith] for report, I observe,—

1. Copy of deposition of William Noble, at the Newtown Police Court, on 14th April.
2. Statement of H. Edwards.
3. Statements of J. Schonhardt.

1. Since no charge has been formulated in connection with this, nor is the object of its production stated, I will proceed to briefly state what actually occurred.

Since the hearing of the case Mr. Noble has informed me that, being unused to Police Court procedure, he was flurried in cross-examination, and that his deposition did not fairly convey his meaning. In the course of a conversation arising out of my seizure of his weights, Mr. Wedderburn's name cropped up in connection with some bills for repairs which were shown to me. Mr. Noble considered it unjust that he should suffer when he had taken every reasonable precaution to secure correctness; but I explained to him that he was legally responsible, and that no action would lie against the scalemaker. I append a statement from Mr. Smith [marked 1], who lives next door to Mr. Noble and was present at the time, showing the actual words used, and it will easily be seen how they were misconstrued.

2. In the case of H. Edwards, I had, in the course of my duty, to seize his weights. At the time I did not know the name of his scalemaker. When his father was summoned in August, 1891, Mr. Cook was his scalemaker, so I fail to see what connection Mr. Wedderburn had with that case. I desire here to state that no action has ever been taken by me out of personal feeling towards any person; indeed, if such a feeling existed it would incline me to all possible leniency, for fear my action might be misconstrued.

Speaking generally, it is a matter of common occurrence for persons to be involved in prosecutions through careless and inferior work. I have found it necessary to issue circulars [copy marked 2] calling attention to this matter, and consider it a duty to stand between the public and such inferior work. Scalemakers, however, appear to think that I have no right to find fault with any work which has gone through their hands. [See copies of correspondence re complaint of R. Wedderburn, marked 3.]

3. With regard to the charges made by Mr. Schonhardt, they are so serious that I could not help a feeling of surprise that they should have been entertained without evidence other than a mere *ex parte* statement. I accordingly communicated with Mr. Woodward, who at once disclaimed any previous knowledge of Mr. Schonhardt's action, and voluntarily furnished me with a statement [herewith marked 4].

As Mr. Fehrenbach (Mr. Schonhardt's father-in-law) was not present at the interviews referred to, his evidence appeared unnecessary.

Mr. Woodward, feeling aggrieved at his name being used without his authority, brought Schonhardt to my office to explain the share he had in the transaction, and he (Schonhardt) then and there made a statement [herewith marked 5].

That statement was not signed by Schonhardt, but that he did make it, and the reason why he did not sign it at the time he made it, are circumstances which are placed beyond doubt by statutory declarations of Mr. A. McNeill and Mr. A. Lees, which are attached.

Some years ago I did seize a set of weights belonging to Mr. Schonhardt, who came to my office with Mr. Woodward, and explained through him that he had just bought the business from Mr. Fehrenbach, and had trusted to his statement that the weights were correct; that his wife had been dangerously ill, and that he was new to the business. Taking these facts into consideration, and there being no imputation of intentional fraud, I returned him the weights with a caution, also insisting that they should be adjusted by a scalemaker; but the statements of Messrs Schonhardt and Woodward herewith will bear out my assertion that the subject of money was not even alluded to. I also append a statement [herewith marked 6] from my assistant, James Patterson, who was also present.

On 19th October, 1892, I again seized scales and weights belonging to Mr. Schonhardt, and obtained two convictions against him for unjust scales and light weights.

He came to my office alone and entreated me not to prosecute, or at least to keep the affair out of the papers. He then, in the presence of my two assistants, James Patterson and Charles Blakeney, who has since left my employ [statements herewith marked 6 and 7] offered me money to suppress the charges, which I refused to accept, and told him to leave the office. The idea of my influencing the reporters is on the face of it absurd.

It is significant that Mr. Schonhardt was prosecuted and fined for the two offences referred to, although if his original statements are credible I was in his power.

I have enjoyed a remarkable immunity from charges of this kind, which I attribute to the fact that, profiting by experience gained while in the service of the Sydney Municipal Council, I endeavour when possible to have a witness with me while on duty.

I have conducted over 1,200 prosecutions since my appointment, and have no doubt made enemies; but I submit that if *ex parte* statements are to be accepted without corroborative evidence, and the onus of disproving them is to be laid upon the accused, as in this case, no public officer entrusted with executive functions will be safe.

Fortunately, however, I am in a position not only to accept, but to rise superior to the situation, with all its disadvantages, and I confidently leave the issue in your hands.

Having thus vindicated myself to the best of my ability, I am desirous of inviting your attention to certain general issues arising out of the papers signed by Mr. Schonhardt. He admits in his statement [marked 5] that these documents are written by Mr. James Wedderburn, and I contend that this supplies the key to the origin of most of the recent suddenly-raised attacks upon me. I am not altogether of opinion that Mr. Schonhardt is as much to blame as might at first sight appear. He is a foreigner, and imperfectly acquainted with our language. He appears to have been entrapped into signing the papers which were written for him, by a promise that they should not be used. Mr. Schonhardt's verbal statements seem to have been artfully twisted to suit the ends of the writer, and a busy time was selected so as to prevent Mr. Schonhardt from realising what he was signing; indeed he states that he was not aware of the contents of these papers. On page 2 of the printed report of the Board of Inquiry into Weights and Measures it is stated

stated, "Several of the witnesses, principally scalemakers, raised strong objections to many of his (the Inspector's) actions." As a matter of fact eleven out of the thirteen charges with which I was confronted are directly attributable to Messrs. Robert and James Wedderburn. I further submit copy of questions in Legislative Assembly on 2nd instant [marked 8], see question 6, and two letters from my late assistant, Charles Blakeney [marked 9]. Since the termination of the inquiry I have been constantly harassed by complaints, both written and verbal, from R. Wedderburn to the Department of Justice, one of which resulted in an impromptu inspection of my beam scales by Messrs. Dixon and Macfarlane, and another in the correspondence hereto appended [marked 3] which throws some light on the motives for these repeated attacks.

I would further submit an anonymous or forged letter [marked 10] which was sent to the Board of Inquiry, forwarded by them to Mr. Dowling, who happens to be an old friend and schoolfellow of my own, and by him handed to me with a view of finding the author.

A comparison of this document with the letters signed by Mr. Schonhardt, and with a specimen of the handwriting of Mr. James Wedderburn, which will be sent to you direct from the Department of Justice, will, I anticipate, clearly show that these repeated charges are only incidents in a systematic and long-continued conspiracy, having for its object my removal from the path of those to whom I am, it would seem, a dangerous obstacle.

Further evidence of this is supplied by a statement received from Mr. Mayman [marked 11] which is especially valuable as coming from a gentleman representing one of the largest English firms of scalemakers, and who has not been long enough in the colony to be other than disinterested. Owing to your request of the 12th instant, that this report be furnished without delay, I have not endeavoured to do more than briefly indicate the origin and main features of the sustained attack which has been made upon me during the past four months; but I am in a position, if required, to trace almost every accusation which has been made against me to the same interested sources. Failing legitimate means, recourse has been had to anonymous letters and house to house canvassing with a view to concoct fresh charges against me, and verbal accusations have been freely made to which I have had no opportunity of reply. I have been put to very considerable annoyance and expense, my work has been seriously interfered with, the administration of my office has been discredited, and my actions as your officer impugned.

The absence of any press criticism on the published report of the Board of Inquiry would seem to indicate that the public, who have the best and most direct opportunities of appreciating my efforts on their behalf, are satisfied with my conduct, which view of the case is confirmed by the many letters sent to the Chairman of the Board and to myself to that effect.

I only ask that my exoneration which, I am convinced, must carry conviction to any unprejudiced mind, may be made as public as the accusations against me have been, and I feel sure that the fullest publicity will redound to my credit and that of the office I have the honor to hold.

I have, &c.,

JAMES W. EVANS,
Metropolitan Inspector of Weights and Measures.

[Enclosures.]

Dear Sir,

(1.)

Newtown, 4 May, 1893.

As I was present at Mr. Noble's premises, on the Enmore Road, when you inspected weighing-machines, I will swear that you did not make use of the words complained of. The words you used were that Mr. Noble had a perfect right to get at Wedderburn, as the machine was not correct.

Mr. Evans.

HENRY SMITH,
Enmore Road.

(2.)

Weights and Measures Office, 110, Bathurst-street, Sydney, November, 1887.

WOOLBROKERS, wholesale houses, carriers, agents, and storekeepers, whose business involve the use of weighing appliances, are strongly recommended to instruct some reliable person in their employ to examine machines, weights, &c., every morning, and when defective to have them attended to at once.

All scales, weighing-machines, &c., must be truly balanced, no draft whatever being allowed, nor will anything not permanently fastened be permitted to make them balance.

As no person whatever is authorised by this office to repair weighing material, the public are cautioned against jobbers who say they are, and whose pretended repairs almost invariably result in damage, for which a heavy charge is made. You are, therefore, advised to have appliances periodically examined by some respectable and established scalemaker, or sent to this office for comparison. It is the duty of all persons using, or having in their possession weighing appliances, to maintain their perfect accuracy. If found defective the parties are liable to a penalty and the goods confiscated.

All weights, measures, and machines brought to this office for testing, &c., must be perfectly clean and free from rust. Where the lead projects above the surface such will not be permitted in use. Purchasers are advised to buy none but new scales, weights, and measures, nor then unless properly stamped, as a large number of inferior and unjust articles are offered for sale to those not knowing the difference.

JAMES W. EVANS,

Inspector of Weights and Measures for the Metropolitan District of Sydney.

The Inspector will be in attendance at his office daily, except Saturdays, from 10 a.m. till 12; Mondays and Thursdays from 10 till 4, and every information given on all matters relating thereto. Material may be left at any time.

(3.)

Sir,

226, Sussex-street, Sydney; R. Wedderburn, scalemaker, 6 April, 1893.

Having been in business as a scale, weight, and weighing-machine maker in the city of Sydney and surrounding districts for a period of over seventeen years, during which time my work has always stood a thorough test and been approved of, I wish to draw your attention to the manner in which I have been treated by Mr. Evans, through me having given evidence at the inquiry into the manner of conducting the Weights and Measures Office, and that he means to ruin me and my family by finding fault with my work, which he has not the slightest foundation for.

The first injury that I complain of is this: I took 17 weights to Mr. Evans at 10 a.m. on March 1st. He passed them all as thoroughly correct as far as the standard of weights and measures goes, but he found fault with one weight, and took out his small gouge and drew out a piece of lead that I had placed in myself. The weight, if I thought as a scalemaker was not a fit and proper one, I would not have submitted it for examination. I submitted the weight to Mr. Fraser, the Under Secretary for the Minister of Justice, to show where Mr. Evans had gouged the lead out, and which he had no right to do.

Secondly, also on 1st March, I received the enclosed letter from a firm—Edginton's—for whom I have done work for the last seven or eight years, to inform me that they would not require my services any longer. I went and asked why they should write the letter, and a member of the firm stated that Mr. Evans had been down there, and also from what he had said, I believe has caused me to lose that firm's work.

To the Hon. the Minister of Justice.

R. WEDDERBURN.

[Sub-Enclosure.]

[Sub-Enclosure.]

Dear Sir,

Please take notice that in future we do not wish you to adjust or mend any scales in our possession, unless you receive special instructions from us to the contrary.

Mr. R. Wedderburn, Sussex-street.

Sydney, 27 February, 1893.

We are, &c.,

T. EDGINTON & CO.

Sir,

Weights and Measures Office, 110, Bathurst-street, 27 April, 1893.

Referring to your B. C. communication of the 18th instant, covering letter of complaint from Mr. R. Wedderburn, I have the honor most respectfully to state in reply to his statements:

1. That I mean to ruin him and his family by finding fault with his work.

I have always treated Mr. R. Wedderburn in exactly the same manner as other persons in the same line of business. If the work submitted by Mr. Wedderburn does not come up to the requirements of this Office, I refuse to pass it.

2. With regard to seventeen weights submitted on 1st March.

One of these weights contained a piece of lead so inserted as to be liable to fall out after stamping. In accordance with my usual custom, I refused to stamp this weight, and on Mr. Wedderburn becoming abusive, I lifted the piece out to show the defect. If the weight had been properly plugged, this could not have been done.

3. With regard to Mr. R. Wedderburn's loss of — Edginton's work.

I have communicated with Messrs. Edginton on the subject, and beg to submit herewith an explanatory letter from them.

With regard to the general question of interference with the business of scalemakers, I desire to state that it is not unusual for these persons to make equivocal statements in order to obtain work, and I am almost daily called upon to make tests for persons who appeal to me.

I append a letter from Mr. Smith, butcher, Enmore Road, which requires no comment, except that, upon examination, in compliance with his request, I found his scales and weights in perfect order.

I further submit extracts from letters handed in during the late inquiry, of which, through the courtesy of the chairman of the Board, I was permitted to take copies, as tending to show the nature of my alleged interference with the business of scalemakers.

It is significant that in none of the other colonies are there shops devoted exclusively to scale-repairing and adjusting, while in Sydney alone four firms are engaged in this business.

I have, &c.,

JAMES W. EVANS,

Metropolitan Inspector of Weights and Measures.

[Sub-enclosures.]

Dear Sir,

Mr. Wedderburn has called at our shop on the Enmore Road, and said that the scales and weights used by us is to be sent in to his premises to be readjusted, as all such work is to be done by him, and the price for doing them is £1 5s. (one pound five shillings), but he would do them for us for £1 1s. (one pound one shilling). If you would kindly call and see them before they are done you would oblige, as we are assured they are in perfect order.

Mr. Evans.

Enmore, 3 March, 1893.

J. C. and J. SMITH,

Butchers, Enmore Road,

Pro J. SMITH.

Dear Sir,

In reply to yours of the 20th instant, we can only say that you had nothing to do with our telling Wedderburn that we did not require him to regulate our machines.

Mr. Evans, Metropolitan Inspector of Weights and Measures, 110, Bathurst-street.

Sydney, 26 April, 1893.

We are, &c.,

T. EDGINTON & CO.

EXTRACTS from Letters handed to Chairman of the Board of Inquiry into Weights and Measures.

From Mr. John R. Collins, Commission Agent, 255 Sussex-street.

"I would like to suggest that a workshop be provided for the inspector, so that all necessary repairs and alterations would be done under his personal supervision, and thus protect the public from any imposition at the hands of those in the trade to which we are all liable under existing circumstances."

From Mr. J. Wright, Commission Agent, Homebush.

"On one occasion a scalemaker came to me and asked me to allow him to take the scales in to look to. I told him I would not, and he told me if I did not get them done every twelve months I would be fined. I saw Mr. Evans, and he told me that they had no right to use a threat by saying I would be fined. A little time afterwards I had the scales tested by Mr. Evans, and found them correct."

From Mr. A. L. Smith, 105, Sussex-street, Sydney.

"Hitherto we have had to go to so-called scalemakers to obtain our adjustment and certificate. Instead of it costing pounds to obtain our adjustment and certificates the work could be done for a few shillings."

From Mr. John Booth, Commission Agent, Sussex-street.

"The system he has adopted . . . has to a great extent put a stop to the blackmail that used to be levied by designing scalemakers. One of them once entered my store, went to the scale, declared it out of order; as the inspector (he said) would be round next day I had better get it repaired. I sent it to him, and he charged me 4/6 for merely painting the column, as nothing else was the matter with it."

From Mr. F. Newby, Commission Agent, 191, Sussex-street.

"I have had to pay scalemakers from 20s. to 30s. for doing what perhaps was unnecessary. Mr. Evans has always stood between the agents and the scalemakers, and consequently the scalemakers are annoyed that they are unable to make these exorbitant charges any longer."

From Messrs. Anderson & Foster, Commission Agents, 222, Sussex-street.

"The system as at present carried out is the only one to save us from the imposition of the scale-repairers, who would be at liberty to condemn our machines without authority, in order that they might obtain a job."

(4.)

Statement of Mr. James Woodward, Foveaux-street, Butcher.

I READ a statement by Mr. Schonhardt, dated 11th April, 1893. It is true that Schonhardt and myself went to the office of Mr. Evans. I don't remember, from the lapse of time, whether Fehrenbach went with us the whole of the distance, but he was in our company that morning. I and Schonhardt entered Mr. Evans' Public Office, which is open to the street. I am quite clear that Fehrenbach was not in the office with Schonhardt and myself. The reason of my visit was that I knew Schonhardt was a foreigner, imperfectly acquainted with the law, a new beginner in business, and in not over good circumstances. I interceded on his behalf, and alleged as a reason what I have just stated. Mr. Evans complained that while he was waiting hourly for persons to have their machines and weights adjusted, they obliged him to visit their places of business, and then, when he found them in the wrong, came begging to be let off. Mr. Evans then said to Schonhardt, "Would you know your weights if you saw them?" and Schonhardt replied that he did. Mr. Evans then told him to pick

pick them out from a number which were under the counter near the window. Mr. Evans then, on my intercession, and on the condition that the weights should be taken to some competent scalemaker, consented to let him off. The weights were taken away. I did not see Mr. Schonhardt give Mr. Evans a one pound note or other money, nor was mention made in my presence of any bribe or consideration in connection with the matter.

Signed in my presence, 5th May, 1893,—

CHARLES LOVELY, Junr., J.P.

JAMES WOODWARD.

(5.)

STATUTORY DECLARATION.

I, ARCHIBALD MCNEILL, of Pymont Bridge Road, Glebe, in the Colony of New South Wales, do solemnly and sincerely declare,—

1. That on the night of Wednesday, the 10th day of May instant, at Mr. Schonhardt's request I was present at Mr. Evans' office, when Mr. Schonhardt made a statement concerning a certain charge made against Mr. Evans.
2. That Mr. Lees took down the said statement [*herewith annexed and marked A*] in writing, and the same was read over to Mr. Schonhardt in the presence of Mr. Woodward and myself, Mr. Schonhardt stating that he was perfectly satisfied with it.
3. That I heard Mr. Schonhardt say that he would sign the statement on the following night as it was incomplete and the hour was late.

And I make this solemn declaration conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of her present Majesty, intituled "An Act for the more effectual abolition of Oaths and Affirmations taken and made in various Departments of the Government of New South Wales, and to substitute declarations in lieu thereof, and for the suppression of voluntary and extra-judicial oaths and affidavits."

Declared at Sydney, this 17th day of May, 1893, }
before me,—

A. MCNEILL.

CHARLES LOVELY, Jun., J.P.

(5.)

STATUTORY DECLARATION.

I, ARMINE LEES, of 27, Rofe-street, Leichhardt, in the Colony of New South Wales, do solemnly and sincerely declare :—

1. That on the night of Wednesday, the 10th day of May instant, Mr. Schonhardt called at Mr. Evans' office and made a statement, which I took down in writing [*herewith annexed, and marked A*].
2. That the said statement was read over to Mr. Schonhardt, who expressed himself perfectly satisfied with it, and promised that on the following night he would come to Mr. Evans' office and sign it, the reason given being that it was late (nearly 11 o'clock), and he had not completed it.
3. That Mr. Schonhardt did not attend at Mr. Evans' office as he promised on the night of the 11th May instant to sign the statement which I took down in writing from him.

And I make this solemn declaration conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of her present Majesty, intituled "An Act for the more effectual Abolition of Oaths and Affirmations taken and made in various Departments of the Government of New South Wales, and to substitute declarations in lieu thereof, and for the suppression of voluntary and extra-judicial oaths and affidavits."

Declared at Sydney, this 13th day of May, 1893, }
before me,—

ARMINE LEES.

CHARLES LOVELY, Jun., J.P.

(5.)

STATEMENT OF MR. J. SCHONHARDT, BUTCHER.

(A.)

JAMES WEDDERBURN has often called at my shop. He came at first by himself, and pulled out a paper about the weights and measures inquiry. He spoke about Mr. Evans. I said, "Yes; I was had over that affair. I could tell you something if I liked to." He called again several times, sometimes alone, sometimes with a young fellow. There were three of them together who called one evening about 5 o'clock—James Wedderburn, a man whom I took to be his brother, and another man. He pulled out a paper and said to me, "I got him licked at Newtown," and asked me if I knew anything about him. He asked me what I had to say. I told him I was going to be fined five years ago, my weights were light. I went down to Mr. Evans; Mr. Woodward was with me; Mr. Fehrenbach was with me; but I don't think he was inside. Mr. Woodward spoke to Mr. Evans for me to get my weights back. I went round behind the counter. Mr. Evans was behind the counter at the end of it. The weights were under the counter near the window. Mr. Evans was at the other end. I took the weights and slipped a £1 note under the counter. Mr. Woodward was in front of the counter. I made no arrangement with Mr. Evans to give him £1. I did not give him £1. Mr. Woodward did the talking. There was no talk about £1 at all. I did not tell Mr. Evans there was £1 under the counter then or afterwards. Mr. Evans nearly snapped my head off. James Wedderburn wrote the billheads. I signed them. I did not know what was written.

NOTE.—This is the annexure marked A, referred to in the declaration made by Mr. McNeill on this 17th day of May, 1893.

CHARLES LOVELY, JUNR., J.P.

This is the annexure marked A, referred to in the declaration made by Mr. Lees on this 13th day of May, 1893.

CHARLES LOVELY, JUNR., J.P.

(6.)

110, Bathurst-street, Sydney, 6 May, 1893.

1. I was with Mr. Evans when he seized Mr. Schonhardt's weights some years ago. He came to the office a day or two after with another man, and the two of them asked Mr. Evans to let Schonhardt off as he was a poor man and new to the trade. They begged very hard, and at last Mr. Evans told him to get his weights from behind the counter. I was behind the counter when he got them, and was close to him and Mr. Evans all the time. No money passed, and no mention was made of anything like that. I must have seen it if it had.

2. I was with Mr. Evans when he seized the weights and scales five or six months ago. Schonhardt begged to be let off. Mr. Evans said, "No, you have had your chance." He came down to the office a day or two after and begged to be let off. Charlie Blakeney and I were both in the office. Mr. Schonhardt offered Mr. Evans some money to let him off, and Mr. Evans said, "I don't do anything like that—clear out," and Schonhardt went away.

JAMES PATTERSON.

(7.)

ON or about Monday, 31 October, I remember a man coming into the office in his shirt sleeves and asking Mr. Evans if he would withdraw his case as he was summoned. Mr. Evans told him that he could do nothing of the kind as it laid with the bench to deal with. He then asked Mr. Evans if he would stop his name from getting into the papers, Mr. Evans told him that he had nothing to do with the report in the papers as the reporters took their own reports. He then offered Mr. Evans some money in his hand. Mr. Evans stepped back a yard or two and said, "Don't try any of those tricks on me." This man left, Mr. Evans turned to me and said, "That fellow tried to square me with £1." I asked Mr. Evans what his name was, he told me Mr. Schonhardt. Mr. Evans and Mr. Schonhardt were standing just outside the large office counter. I was behind the counter about 2 yards away, and could hear everything that was said.

Redfern, 4 May, 1893.

CHARLES BLAKENEY.

(E.)

QUESTIONS.

(1.) REPORT OF BOARD OF INQUIRY re WEIGHTS AND MEASURES ACT :—MR. HOYLE (for MR. HUGH MCKINNON) asked THE ATTORNEY-GENERAL,—

- (1.) Were the following documents placed in evidence at the recent inquiry into the administration of the Weights and Measures Act; and if so, why were they not tabled and printed with the report of the Board of Inquiry, presented to this House on 23 March last, viz. :—Letters from the Chamber of Commerce, Messrs. W. Johnson, S.M., C. Delohery, S.M., R. Wedderburn, James Wedderburn, Harper, Dowling, and about fifty other letters; twelve months' statement of accounts, furnished by the Inspector to the Board on 20th January; three years' statement of accounts supplied by the Inspector, showing details of banking accounts, receipts, fees, &c., lists of private cheques passed through account; and a written statement handed in by the Inspector at the close of the inquiry in answer to the evidence given?
- (2.) Have any other documents been kept back?
- (3.) Did the Board frame any record of a visit paid to Mr. R. Wedderburn's business premises?
- (4.) Was the Inspector invited to comment on the findings of the Board, and was his reply furnished to the Department of Justice two clear days before the Board's report was tabled in this House?
- (5.) When will the documents referred to be tabled?
- (6.) Is it a fact that out of the six persons who gave evidence against the Inspector of Weights three were of the Wedderburn family, and the fourth an apprentice of Wedderburn?

MR. SLATTERY answered,—The following answers have been supplied by my honorable colleague, the Minister of Justice :—

- (1.) All the documents which were produced and put in evidence as exhibits were printed with the return laid before Parliament, and a mass of correspondence of a voluminous nature was placed with the papers to be dealt with hereafter. A large number of documents were tendered which the Board did not consider to be within the scope of the inquiry, and these, in many cases, were returned to the persons offering them. A written statement was handed in by Mr. Evans at the close of the inquiry, and he was informed that it could not be looked upon as forming part of the evidence, but that it would be placed with the papers for the Minister's information.
- (2.) No documents which were produced as exhibits were kept back.
- (3.) The Board did not place on record the fact that they had visited R. Wedderburn's premises. As a matter of fact, they visited and inspected the place in question—Thursday, 19th January, at 4 p.m.
- (4.) A copy of the Board's report was sent to the Inspector, and he was invited to make any statement he might think fit, with reference to those portions affecting himself personally or the administration of his office. The Inspector's reply reached the Department too late to be laid upon the table with the other documents, as it required to be considered before being laid upon the table.
- (5.) These and all other material documents will be laid upon the table at an early date.
- (6.) Forty witnesses were examined in connection with this inquiry, none of whom were called to give evidence either for or against the Inspector of Weights and Measures. Amongst these witnesses examined were Robert Wedderburn, James Wedderburn, scalemakers, Jabez Wedderburn, nephew of James Wedderburn, and in his employ, and Michael Gleeson, also in the same employ.

(9.)

Sir,

Redfern, 10 April, 1893.

I beg to inform you that owing to the considerable amount of annoyance that I am subjected to from the hands of some of the scalemakers, and there being no direct protection from their traps and abuse, I think it would be advisable to resign my position, while I am safe, as I could not suffer the annoyance you have been subjected to.

When the office is re-organised I would be thankful for opportunity of applying for an appointment in it when the responsibilities are better defined and protected than at present. I am willing to suit your convenience as to date of leaving.

I regret the inconvenience this step may cause you.

I have, &c.,

James W. Evans, Esq., Inspector of Weights and Measures, Sydney.

CHARLES W. BLAKENEY.

Tuesday, 7 February, 1893.

ARRIVED at office at 9.15. Sent by Mr. Evans down to Mr. R. Wedderburn, Sussex-street, to inform him that Mr. Evans could not get down to his place till after 11 o'clock, as he was very busy in the office, and could not leave before that time. Mr. R. Wedderburn said that he must have the machines passed this morning, or else he would know the reason why. Went down with Mr. Evans at 11.15. Mr. Evans passed three machines, two 4 cwt. and one 5 cwt. for Parson Bros. Mr. Wedderburn was in the yard; he was very insulting to Mr. Evans; he told Mr. Evans that he had called up at his place at 8.20 this morning, and that he was told that Mr. Evans was at his breakfast. Mr. Wedderburn wanted to know if he was expected to go into Mr. Evans' b—— breakfast-room. Mr. Evans tried to explain the reason why he could not get down, but Mr. R. Wedderburn would not hear him. Mr. Wedderburn said that Mr. Evans was only b—— well nobbling him, and that he (R. W.) had his horse and cart waiting four and a half hours. Mr. Evans told him that if it was so important he could have put the three machines in the cart, as they were only small ones, and Mr. Evans could have passed them at the office. Mr. Wedderburn said that he would not take them up to the office; he said that he would see that things were different, and that he would go up at once to the Minister of Justice and see about it. As Mr. Wedderburn said that I would say anything and swear anything, I would much rather Mr. Evans took some one else down with him.

J. W. Evans.

C. W. BLAKENEY.

(10.)

21 January, 1893.

KINDLY enlighten the public if the Inspector of Weights and Measures is privileged to go to Tasmania, Victoria, and other colonies in the interests of Freemasonry and Orangeism while being employed as public servant, and if the salary is so luxurious, why not give employment by dividing the office with others?

I remain, &c.,

PHILLIP DOWLING,

Leichhardt.

To the Members of the Board re Weights and Measures.

Department of Justice, Sydney, 24 January, 1893.

Sir,

Board to Inquire into Weights and Measures.

I have honor to acknowledge the receipt of your communication of the 21st instant, on the subject of the Inspector of Weights and Measures visiting unofficially the colonies of Victoria and Tasmania, and also as to the amount of salary paid to that officer, and to inform you that the matter referred to will receive attention by the members of the Board.

I have, &c.,

W. M. MACFARLANE,

Chairman of the Board.

P. Dowling, 148, Norton-street, Leichhardt.

Department of Justice, Sydney, 27 January, 1893.

Sir,

Board to inquire into Weights and Measures.

Referring to your letter of the 24th instant, in reply to mine of even date, I have the honor to forward herewith for your perusal (which you will have the goodness to return to me as early as possible) the letter referred to in my communication.

I would at the same time ask you to be good enough to state whether to your knowledge there is another person bearing the same name as yourself, residing in the district of Leichhardt?

I have, &c.,

W. M. MACFARLANE,

Chairman of the Board.

P. Dowling, Esq., 148, Norton-street, Leichhardt.

148,

Sir, I received the first dated of these letters last week, and I sent word back that it was a forgery. And then after I received the second letter.

Do you recognise the handwriting, as it is evidently some enemy of yours?
If you don't, please return to me, or I will call at your office on Friday, about 12.45.

I am, &c.,
PHILLIP DOWLING.

(11.)

I, BENJAMIN NEVILLE MAYMAN, manager and attorney in Australasia for Henry Pooley and Son, weighing-machine and weighbridge makers, of Liverpool and London, desire to make the following statement:—In December of last year I landed in Sydney bringing with me a letter of introduction from H. J. Chaney, Esq., Superintendent of the Standards Department of the Board of Trade, London, to Mr. J. W. Evans, Inspector of Weights and Measures, Sydney, who is generally regarded in official circles in England as a man that takes a deep interest in his professional work, besides possessing an intimate knowledge of the duties he is called upon to perform. My letter of introduction was presented to Mr. Evans in due course, and shortly afterwards the Board to inquire into the system of administering the Weights and Measures Act was appointed by the Minister of Justice. During the progress of this inquiry I called upon Mr. J. Wedderburn, scalemaker, Sussex-street, Sydney, whom I found to be in a state of excitement bordering upon hysteria. The first words Mr. Wedderburn uttered were to the effect that he had seen me at the Supreme Court, where the inquiry was held, and if it was my intention to attend again, in order to speak in favour of Mr. Evans, he stated that he should "expose" my firm. The "exposure" in question consisted in informing the Board that one of our weighing machines was in use at the Weights and Measures Office. I have no desire to conceal the fact. The machine was placed in the office by our late agent on a request from Mr. Evans, to whom I believe it has been of considerable assistance, and it is intended to leave it where it is until the authorities are ready to receive it at the new Belmore Market. The machine is, and has always been, the property of my firm. Mr. Wedderburn went on to state that Mr. Evans was largely responsible for the depressed state of his business. He alleged that it was the practice of owners of machines which needed repairs to ask Mr. Evans to recommend scalemakers capable of doing the work, and that on account of Mr. Evans recommending another firm (which he named) a great deal of repairing had been taken out of his hands. Mr. Wedderburn also stated that he had made a certain type of machine for weighing coal. The first of these appliances I was told had been submitted to Mr. Evans and approved of. As the scale had met with the Inspector's approval, Mr. Wedderburn proceeded to construct others. After a number had been made, the Inspector, it was alleged, had refused to accept the scales, which resulted in a heavy loss. Mr. Wedderburn affirmed that Mr. Evans had ruined his trade, and expressed his determination not to rest until Mr. Evans had been removed from his position. I am prepared to substantiate this statement in any way that may be deemed necessary.

11th May, 1893.

Minute of The Minister of Justice.

A LETTER from James Wedderburn sent in during the Inquiry offering to assist Inquiry or give evidence, to be sent to Magistrates to be used by them or in their presence only, to be afterwards returned to this Department.

R.E.O'C., 11/5/93.

The Stipendiary Magistrates, Central Police Court.—T.E.M'N. (for U.S.), B.C., 12/5/93.

[Enclosure.]

Sir,

23 January, 1893.

Herewith I beg to give what information I can in respect to the administration of the Weights and Measures Act. Taking Sydney as the chief centre of population, I will specially refer to Sydney districts and suburbs.

In Sydney we have at present one Inspector of Weights and Measures, whose office is situated in Bathurst-street, and is open to the public for the verification of all weighing material; the office hours are regulated so as to ensure the attendance of Inspector as much as possible for the convenience of the public.

My idea is, that taken in conjunction with the office work in connection with the supervision of Weights and Measures, it is not possible for the one Inspector to properly fulfil the duties of that office, however energetic he may be. I should like to point out that Mondays and Thursdays are days set apart for express purpose of stamping weighing material sent to office, and from 9 a.m. to 11 a.m. for the purpose of office work during which time Mr. Evans is generally in attendance. What supervision has inspector over weighing material outside of office during these particular times? Also the large area which comprises the Sydney district, and the large number of weighing machines, &c., which can hardly be computed, are alone sufficient reasons for an additional supervision of the Weights and Measures Act, taking into consideration the number of convictions obtained by Sydney inspector, and the amount of work in connection with the administration of Weights and Measures Act should be sufficient reason for the Government to appoint more inspectors. I understand it is proposed to deal with the matter by allowing the municipal authorities to manage the working of the Weights and Measures Act.

I would respectfully urge that from my point of view that a much better working of the Act, if the Act was carried out by the state, that is to say, inspectors properly appointed by the Government and worked from some given centre, considering the importance of the working of the Act, I am sure that if placed under municipal control the working of this very important measure would be no more than a dead letter. My reasons are that no matter how consistent a man appointed as inspector might be, in the first place he would be under the control of the whims and fancies of every alderman concerned. The salary would be an individual tax on ratepayers, and considering the size of some municipalities it would not warrant an outlay commensurate with the position, which cannot be denied is of the utmost importance. I would also urge that any nominee for the position of inspector or assistant inspector should have a practical experience combined with theory. Weighing-machines are of such variety and class that it behoves the desirability of practical experience, considering that many a business man's reputation hangs on the knowledge of what the inspector considers his functions are.

In reference to stamping fees as now charged in Sydney and suburbs, and considering the vast number of weighing-machines, scales, weights, steelyards, measures, &c., that the Act if carried out in districts outside Sydney, and considering the size and population of such districts as Newcastle, Bathurst, Goulburn, Dubbo, Wagga Wagga, &c., the fees made payable to Government exchequer, would, I think, more than compensate for the appointment of additional inspectors.

Weighing-machines and weighing material should be supervised at least once a year. For example, a machine and weights, when stamped, is supposed to be standard, and that the rough usage, wear and tear, combined with the value of commodity weighed, should at once convince that 12 (twelve) months' use must necessarily incur a deterioration, which should be at once remedied.

Inspectors of districts outside Sydney are generally taken from police force. As I have before pointed out, it is not consistent to expect these inspectors to understand the working of the different weighing-machines now in use, and no doubt it is from this cause we seldom hear of a prosecution outside of Sydney. Take Newcastle, for instance, a place of large trade, with machines of every description. Is it not feasible to suppose a practical man would be better in position as inspector then.

The manner in which the Act has been worked in Sydney and suburbs is one that cannot commend itself. Generally speaking the supervision of large portable platform machines is directed by means of circular sent from inspector's office, calling attention to fact of certificate of verification having expired, and necessary steps be taken for its renewal. No doubt users of weighing-machines on receiving such circular would consider it expedient to take machine to office. It is a matter of interest to follow the *modus operandi* at the office on arrival of such machine. For example, Mr. Jones receives circular, takes machine to office, and after some examination is informed that machine is incorrect. A certain sum

of

of money is demanded. He takes his machine away to scalemaker, and on returning with same it is certified, for which fee is charged, and certificate is issued. Thus Mr. Jones has paid for machine being wrong, and also for being right. To follow on another example, Mr. Smith receives circular, thinks it compulsory, takes machine to office, machine is found correct, and fee charged accordingly. Mr. Brown also receives circular, but takes no notice whatever of circular. What regulation is there to compel Mr. B. to comply with circular as in other cases and in what position he stands? I think the foregoing remarks will exemplify working of office on this point.

As has been pointed out, it is generally conceded that Mr. Evans, the present Inspector, has been a law unto himself from which there seems to have been no appeal, and an alteration as to the present mode of supervising this Weights and Measures Act would be a great public service; and I think I am expressing public opinion in saying that fees derived from stamping which cannot be fairly estimated, half the fines, which have been in many instances very heavy, in addition to salary, is far too much for one inspector to receive.

What benefit has the Government Exchequer received for money expended on appliances, fitting up office, paying salary? If, as Inspector states, fraud is prevalent to such an extent, and no doubt a great many inconsistencies could be done away with by a different working of the Act.

In framing the schedule of charges, I doubt if the 6d. per cwt. referred to weighbridges, considering the weight-carrying capacity of such machines. It simply means an enormous tax levied simply for benefit of Inspector, such fees, I think, could be made much less where such large machines are concerned, and still amply repay for matter of verification.

J. WEDDERBURN,
Scalemaker, Liverpool-street, Sydney.

To Chairman of the Board of Inquiry Weights and Measures Act, Sydney.

No. 23.

Mr. R. Wedderburn to The Minister of Justice.

Sir,

226, Sussex-street, Sydney.

Herewith I beg to refer to a statement made by Mr. Noble, produce merchant, of Enmore, and sworn to by Mr. Noble, that Mr. Evans, the Inspector of Weights and Measures, in summoning Mr. Noble for having unstamped weights and unjust machine, did state that it was not Mr. Noble he wanted to get at, but Wedderburn. I may state here that I have applied for the depositions of the above case, but was informed that the depositions had been forwarded on to the Justice Department. I am led to believe that Mr. Evans in giving evidence in Court, stated he had a case against me on a certain date, and as such is a misstatement, and is likely to affect me in my business, and has affected me in my business, inasmuch as tradespeople who I have been in the habit of working for for years, have refused me their work, I beg if it is possible to let me have the depositions of the above case. I should like to state that since giving evidence at the inquiry, Mr. Evans has by his action maliciously tried to injure me in my business, inasmuch the summoning of Mr. Noble, who I had done the work for, and which case was dismissed, are proof also of the statement Mr. Evans made to Mr. Edwards, junr., of Newtown, where Mr. Evans stated it was Wedderburn who had put his father away. I would most respectfully ask that as such statements made by Mr. Evans are totally false, I am afforded the protection that is necessary for preventing Mr. Evans in any way injuring me in the future. Trusting the above will meet with your earnest consideration,

I beg to remain, yours, &c.,
ROBERT WEDDERBURN.

Although Mr. Wedderburn is not, I believe, strictly entitled to a copy of the depositions in a dismissed case, it may, under the circumstances, be considered desirable to allow him to be furnished with a copy upon payment of the usual copying fees. Mr. Wedderburn may be informed accordingly.—W.M.M., 29/5/93. Approved.—A.C.F., 29. Received copy of depositions in case.—J. R. WEDDERBURN, 14/6/93.

No. 24.

The Under Secretary of Justice to R. Wedderburn, Esq.

Sir,

Department of Justice, Sydney, 30 May, 1893.

Referring to your letter (undated) received at this Department on the 22nd instant, in which you ask to be supplied with the depositions in the case *Evans v. Noble*, heard at the Newtown Police Court on the 14th ultimo, I have the honor to inform you that you will be allowed to obtain a copy of the depositions in question upon payment of the usual fees for copying.

I have, &c.,
ARCH. C. FRASER,
Under Secretary.

Mr. R. Wedderburn, 226, Sussex-street, Sydney.

No. 25.

Deputation.

THE METROPOLITAN INSPECTOR OF WEIGHTS AND MEASURES.

Thursday, 29th June, 1893.

MR. BLACK, M.P., called with a deputation of scalemakers at the Department to-day with the object of waiting on the Minister. I explained that the Minister was unable to meet them that day, and invited them to state briefly the object they had in view, in order to place a statement before the Minister who would be able to receive the deputation on Monday.

Mr. BLACK said they had to complain that the Inspector had unfairly interfered with the work of the scalemakers. The Inspector said he found certain weighbridges were incorrect, which, on examination, proved all right.

Mr. JOHN BOWREY said the test of the weighbridges by Mr. Evans was no test at all. He went round with a horse and cart and about 23 cwt. of weights, asked for the weight at each place and got it, then went back and took the tare of the horse and cart. As he was a long time away the horse might lose

or

or gain weight. Directly after, the scalemakers received letters from the owners that the Inspector had notified the machines were incorrect, and they had to go to the expense of carting weights to those machines (which they were paid to keep in order), and they found on testing that the machines were right after all.

The deputation promised to wait on the Minister on Monday afternoon at 3 o'clock.

Submitted for the information of the Minister.—A.C.F., 29/6/93. Seen.—R.E.O'C., 1/7/93.

No. 26. Deputation.

THE METROPOLITAN INSPECTOR OF WEIGHTS AND MEASURES—DEPUTATION OF SCALEMAKERS TO THE
MINISTER OF JUSTICE, INTRODUCED BY GEORGE BLACK, ESQ., M.P.

Tuesday, 4 July, 1893, at 11 a.m.

MR. BLACK, M.P., said that the prior complaints made against Mr. Evans, Inspector of Weights and Measures, were with regard to the fixed scale of charges, the setting aside of the Weights and Measures Act, harassing the scalemakers, trafficking in scales, weighing-machines, &c., acting in an unjust manner in compelling scalemakers to pay cab hire, illegally issuing notices and attempting to enforce one Baskerville to pay a certain fine. The present trouble arose in connection with Mr. Evans' action towards owners of weighing-machines, &c., which had in many cases caused them to dispense with examinations by scalemakers, and in particular cases where machines had been examined by the Inspector, and reported by him to be incorrect (sometimes as much as 30 lb. out), it had been found, when the same machines had been shortly afterwards examined by scalemakers, that the machines were absolutely correct. If Mr. Evans acted in this way, he was not fit to occupy his position. He was performing the work of examining these scales, &c., merely for the purpose of filling his own pockets, and his intention was to drive every one else out of the trade, and supply everything himself. If the powers of the Inspector are not checked, the scalemakers will be forced to dispense with the services of their assistants, and send them elsewhere; in fact, this had been so in the case of Mr. Wedderburn, whose wife had now to assist him to perform his work in place of an assistant. This state of affairs was occasioned through Mr. Evans taking away their work. Mr. Black stated that it was said that Mr. Evans was still—contrary to law—continuing to buy and sell scales, &c.; but, in reply to the Minister, said that, beyond the statements of the gentlemen present, he had no direct evidence that such was the case; but he would refer to the case of Mr. Cullen, which was brought under the notice of the Board of Inquiry: He said that all fees and fines received by Mr. Evans should, in his opinion, be paid into the Treasury—and that Mr. Evans was in a position to harass the scalemakers, as their complaints were made public, while the scalemakers had not a chance to defend themselves, as Mr. Evans' reply was departmental, and not known to them.

MR. THOMAS BOWREY said that, in the first place, he complained as to the manner in which testings of weighbridges, &c., were carried out by the Inspector. This was done by means of 23 cwt. of standard weights, which were conveyed to the weighbridge by horse and cart. He said that in several cases testings which were thus conducted by the Inspector were found to be incorrect. In three cases, according to Mr. Evans, scales were incorrect to the extent of 31 lb., 33 lb., and 28 lb. respectively; Mr. Evans must, he said, have visited the scale-owners with the express purpose of proving that their scales were wrong. Mr. Bowrey handed in, as evidence in support of his statement, (1) a notice issued by Mr. Evans in connection with the Union Steamship Company's weighbridge, with certificate attached, (2) a notice issued to Mr. Clune, with certificate attached, and (3) a similar notice and certificate in respect of the weighbridge on McIlwraith's wharf. The test made by the scalemakers, which proved the correctness of the weighbridges, were made in the presence of the proprietors in some cases. In connection with McIlwraith's wharf test, he sent word to the Inspector asking him to come down and witness the trial, but he said he could not come, but that if the tests were carried out with standard weights they must be correct. The scalemakers had gone to expense and trouble to conduct these tests, and through Mr. Evans' action they were in danger of losing the custom of scale-owners. The necessity for making this complaint previous to the present occasion had existed. The action of the Inspector was practically ruining the scalemakers, preventing them as it did from carrying on their business. (The notices and certificates referred to by Mr. Bowrey were handed in, to be dealt with in the ordinary official manner.)

MR. ROBERT WEDDERBURN stated that through Mr. Evans' action all his customers were gradually leaving him. He had been eighteen years trading as a scalemaker, and at the present time had only one firm—Hudson Brothers, Clyde—giving him their work, and that was only because they were outside Mr. Evans' jurisdiction and, consequently, influence. In reply to Mr. Black, Mr. Wedderburn said that he had bought various things from Mr. Evans, notably Globe weights. He had also purchased within the past three years, for the sum of £1 11s., a "Cotton" weighing-machine. It was an old machine, the price of a new machine of similar pattern being about £15. Mr. Evans bought the machine and sold it to him (Mr. Wedderburn), but he had no receipt for the amount paid, as it was not Mr. Evans' custom to give him receipts. He could not say where the machine is at present, as he repaired and sold it. (Mr. Cable, who had been in Mr. Wedderburn's employ till about twelve months ago, said that he remembered the machine, but did not know anything about the price paid for it, or where it is at the present time.)

MR. WEDDERBURN (continuing) said that he had bought weights from the Inspector on five or six different occasions, 56-lb weights and others, second-hand, but none recently. Mr. Evans had visited some of his customers—Edginton's, for example—and told them it was not necessary to have work done by scalemakers, and that if their work were sent to his office it would be stamped there. He (Mr. Wedderburn) said that many other of his customers had complained of the action of the Inspector in charging fees for stamping, &c., but in reply to a question as to whether he could produce or furnish a list of the names of the persons referred to, Mr. Wedderburn said that he was not in a position to do so, as he had promised that their names should not be brought forward.

MR. JAMES CABLE said that Mr. Evans was exceeding his duty in charging fees for testing weighing-machines, &c. Such a practice does not prevail in England, and Mr. Evans had stated in a daily paper that he did not now take fees for stamping, &c. He knew of cases in which such fees had been charged. In the case of Mrs. Monaghan, of Gloucester-street, Mr. Evans, on the 11th May last, plugged weights (but

did not stamp them) of a 240 lb. machine and counter machine—charging a fee of 3s. Last week a 240 lb. machine, the property of the Oriental Tea Company, was taken to Mr. Evans' office. He tested it and said the weights were light, and, pointing to a list of four names, told the carrier to take the weights to which place he liked. They were brought to his (Cable's) establishment and the weights adjusted, small holes being drilled, and on being returned to Mr. Evans he said the plugs were too small to admit of stamping, and had to enlarge the drill holes. For this work a fee of either 1s. 6d. or 2s. was charged, Mr. Evans' receipt being held by the manager of the firm. Messrs. J. Macintosh and Sons, of Pitt-street, had a machine stamped by the Inspector on the 3rd July, and a fee was paid him for doing so, and Messrs. Fortescue and Davenport, of Gloucester-street, were recently charged a fee of 1s. for similar work. Mr. Cook, butcher, of Redfern-street, whose work he (Mr. Cable) usually performed, informed him when he called to make his periodical examination that the Inspector had called a few days previously, and after examining the scales said they were correct. This occurred about a fortnight since. Mr. Cable said that since Mr. Evans had thus begun to take the trade out of the scalemakers' hands their only chance of doing any trade at all was by repairing and selling old scales. His bank-book would show how seriously his business had been interfered with.

MR. JAMES WEDDERBURN said that Mr. Evans had been trafficking in scales, &c., far more than the report of the Board disclosed. He (Mr. Wedderburn) had bought articles from the Inspector—not since the holding of the inquiry. Everything bought was mentioned in his statement before the Board except a lot of cast-iron weights; that may have been two or three years ago. Mr. Evans had boasted in his presence that he could starve the whole of the scalemakers—if they took any action against him (Mr. Evans)—by making no prosecutions. This was the first opportunity the scalemakers had had of bringing their grievances to light. If the Inspector had power to correct weights, scales, &c., he had the means of depriving the scalemakers of the whole of their trade, and prevent them from earning a living. (A copy of the *Workman* newspaper, dated 1st July, 1893, was handed in for perusal.)

MR. BOWREY said that he could bear out the statements made by Mr. Thomas Bowrey. He, with a Mr. Dillon, was present at the testings referred to; they were carried out with 2 tons of standard weights, Mr. Evans only having used 23 cwt.

MR. O'CONNOR said that the deputation had brought before him some facts which were new and important, and that they would be taken into consideration when dealing with the whole matter, and a conclusion arrived at as soon as possible. Whatever that conclusion might be, he would say that the present system was as bad as it could possibly be, and one under which even the most perfect man would find it difficult to work satisfactorily. The present system was unsatisfactory to all parties concerned—both the general public and the Government. He was strongly opposed to the taking of any fees by public servants for their own use, as it placed them in a false position, and this had been admitted in connection with clerks of petty sessions, who have now to pay all fees into the Treasury. An endeavour is being made to abolish the taking of fees in all cases—whether received as Commissioners for Affidavits or otherwise. The system is a wrong one altogether, and a minute is now ready for submission to the Cabinet, but the matter is delayed through fresh legislation being necessary. In connection with the Weights and Measures question, fresh legislation would be necessary, and he was of opinion that there should be a separate department to deal with all matters of a quasi-scientific description such as this. The question would be proceeded with without delay, and anything which could be done by him as a matter of administration would be at once effected; but where legislation was required a greater length of time would of course be necessary.

The deputation then thanked the Minister and withdrew.

[Enclosures.]

(E.)

McIlwraith's and Street's Wharves, Sussex-street, Darling Harbour, Sydney, 24 June, 1893

Dear Sirs,

I received this morning from Mr. Evans, Inspector of Weights and Measures, a notice that the weighbridge on this wharf (McIlwraith's) was incorrect, being 31 lb. out in a test load of 23 cwt. This is the weighbridge which was overhauled by you a little while ago.

The weighbridge on Street's wharf, which has not been overhauled for over two (2) years, is correct to within a couple of pounds. Your earliest attention to this will oblige, as the weighbridge will stand idle until you have adjusted it.

Yours, &c.,

J. M. RAISON.

Messrs. Bowrey Brothers, scalemakers, &c.

26 June, 1893.

Memorandum from the Proprietors McIlwraith and Street's Wharves, Sussex-street, Darling Harbour.

THIS morning Messrs. Bowrey Brothers tested the weighbridge on this wharf (McIlwraith's), using 56 lb. standard weights, and I myself stood by and saw the weighings were correct. The test being 2 tons standard weights.

W. W. FOWLER,
Pro J. M. RAISON, Manager,
McIlwraith's Wharf.

Deputation *re* Metropolitan Inspector of Weights and Measures. Report for Minister's perusal.—T.E.M'N. (for U.S.), 4/8/93.

I will be glad to have the Metropolitan Inspector's report upon this complaint as early as possible in order that I may deal with it at the same time as the other matters now under consideration.—R.E.O'C., 11/7/93.

The Metropolitan Inspector of Weights and Measures, B.C.—T.E.M'N. (for U.S.), 12/8/93.

No. 27.

The Metropolitan Inspector of Weights and Measures to The Under Secretary of Justice.

Sir,

Weights and Measures Office, Sydney, 15 July, 1893.

Referring to your blank cover communication of the 12th instant, desiring me to report as early as possible on the official record of proceedings of a deputation of scalemakers which waited upon the Minister of Justice on the 3rd instant, I have the honor to submit the following in reply.

With reference to statements of Mr. Black, M.P., the prior complaints alluded to by him have been already dealt with in my reply to the Report of the Board of Inquiry. He says further, "The present trouble arose in connection with Mr. Evans' action towards owners of weighing-machines, &c., which has in many cases caused them to dispense with examinations by scalemakers." This is a clear and concise statement of facts, and a case in point occurred on the 12th instant, when I received a letter from Messrs. Talbot & Co., which, I append, with copy of my reply, marked A. I consider that I am bound to give information concerning the responsibilities imposed by the Acts which I am called upon to administer. In the case of Messrs. Talbot, however, which may be taken as a sample of many brought under my notice, it would appear that these gentlemen, and not the scalemaker, who will probably hold me responsible if he does not obtain the work, are the aggrieved parties, and their letter emphasises the necessity for the existence of an officer upon whom the public can depend in matters relating to the weighing and measuring appliances. Mr. Black further says, that in certain cases machines pronounced by me to be incorrect have been found to be absolutely correct, when afterwards examined by a scalemaker. This merely amounts to a statement that there are frequent discrepancies in comparative weighings, and is a strong argument in favour of this office as a means of deciding disputes. I will deal with this matter more fully when touching upon Mr. Bowrey's complaints, merely remarking here that the public may be presumed to have more confidence in the decisions of a qualified Government Officer, than in those of a tribunal of scalemakers sitting in judgment upon their own work.

The slackness of work complained of is altogether due to causes beyond my control, and is not confined to this one trade; but if my interference has been, as stated, an important factor in depriving scalemakers of work, it would appear that they have obtained work in the past, which subsequent experience has shown their clients to be unnecessary.

As a matter of fact, it is owing in a great measure to the unscrupulous attacks made upon this office by the scalemakers and to misleading statements made by them to their customers, that these are withholding their work pending a solution of the difficulties created by these very tradesmen, who are now accusing me as the author of their misfortunes.

As will be seen from my previous letters, I have hitherto endeavoured to deal with matters in dispute as they affect the community, but when directly challenged by the scalemakers, as a body claiming to represent "the whole of the trading community of the city and suburbs," I am driven to state the case as between them and myself. They have been treated with the same consideration as other members of the community, but I do not recognise them as intermediaries between this office and the public, nor do I accord to them that semi-official status which they seem to assume as their right.

Mr. Thomas Bowrey in his complaint has not stated the case fairly. He confuses official verifications of weighbridges, which are carried out according to fixed principles, and with the standard weights only, and comparative test weighings, which are made by sending a stated load over the weighbridges in dispute, the expense being defrayed by myself.

On

On 21st June last I received a communication from Messrs. John See & Co. stating that they had sent a test load of bran over certain weighbridges, and complaining of discrepancies in the weighings. In order to enable me to investigate this complaint, I made up a test load of standard weights carefully covered and ran it over thirteen bridges. The weighing in each case was conducted by the weighbridge clerk, and I received a ticket showing the result. In fact the test was conducted as between buyer and seller, and was almost identical with that of Messrs. John See & Co. As a matter of courtesy I furnished each of the owners with the result as affecting his own machine without comment.

Messrs. Bowrey Brothers are contractors for the maintenance of some of these machines, and certain of the owners, by way of precaution, called upon them to adjust, which they have to do without charge. They appear to have tested the machines and satisfied the owners of their "absolute correctness," notwithstanding their own weigh-clerk's certificates. This is a matter entirely between Messrs. Bowrey and their clients, and when they asked me to witness their trial I replied that if the owners were satisfied I had nothing to say.

I did not assign any reason for the discrepancies, which certainly existed if the weigh-clerk's tickets are correct; in fact, my letter of explanation to Messrs. John See & Co. is distinctly in favour of the machines.

I append all papers relating to this matter [*marked B*], and should it be thought necessary, Mr. Broadbent, manager for Messrs. John See & Co. would I am sure be happy to give the department the fullest information.

The trafficking in weights alluded to by Messrs. Robert and James Wedderburn has been fully dealt with by the Board of Inquiry.

The complaint of loss of Messrs. Edginton's work has been refuted by those gentlemen in their letter (enclosure with mine of 17th April ultimo).

Mr. James Cable's statement that fees are not charged in England for weighing-machines is incorrect, as a reference to the Imperial Acts of 1889 will show. He naturally desires that the Inspector should be prevented from testing weighing appliances, even when requested to do so by the owner. I submit that although this duty is not specifically enjoined by the Act, it is included in the general authority to seize incorrect material. It is not reasonable that any person should be debarred from directly obtaining the opinion of the inspector instead of being compelled to depend upon the advice of interested persons, who are tempted to find fault in order to make an excuse for obtaining work.

No change has been made in the fees or charges of this office, pending the Minister's decision, and in each of the cases mentioned by Mr. Cable only the usual rates were charged.

With regard to the plug-holes spoken of, I remedied Mr. Cable's imperfect work to save his customer loss of time, and made no charge for enlarging the holes to suit the office stamps. The whole affair is very trifling. Mr. Cable further objects to my having, on one of my visits of inspection, informed Mr. Cook, a butcher, of Redfern-street, that his scales were correct. It would appear that he expects me to be guilty of a false statement, or, at all events, of a suppression of the truth, in order to put work in his hands. I may add that Mr. Cable, being an applicant for the position I now hold, his attitude in connection with this deputation seems in questionable taste.

Mr. James Wedderburn's statement that I boasted of my power to starve all the scalemakers by making no prosecutions—their claims that prosecutions should be instituted for their advantage is another instance of the lengths to which scalemakers are prepared to go, and is one of the objections taken by the Standards Commission in England to the appointment of scalemakers as inspectors.

Mr. Wedderburn says further: "If the Inspector has power to correct weights, scales, &c., he has the means of depriving the scalemakers of the whole of their trade." I have always considered it my duty to equalize machine weights, and to subtract only from avoirdupois weights; but I have never corrected appliances further than this, and my own scales, if they require adjustment, are sent to a scalemaker.

It is no new thing for scalemakers to be assisted by their wives and families. This was the rule in at least two out of three shops when I was appointed, and is a result of the keen competition which exists in the trade. In the ten years since my appointment the number of hands employed has risen from seven to fourteen, and the present depression is the more severely felt in consequence. I may state that in Queensland, South Australia, Tasmania, and New Zealand there are no scalemakers, and in Victoria the work is but an adjunct to other trades.

The whole question would appear to resolve itself into a conflict between the claims of the scalemakers and the interests of the community.

I have, &c.,
JAMES W. EVANS,
Metropolitan Inspector of Weights and Measures.

[Enclosures.]

(A.)

Sir,

Talbot & Co.'s Wool Stores, Circular Quay, 12 July, 1893.

We have been recently waited on by a man who represented himself as a weighing-machine adjuster, requesting us to send up our machine for adjustment, as, to quote his words, the time has again arrived when we are compelled to have our weighing-machines adjusted, and if it is not done at once an Act is shortly to go through which will have the effect of increasing the cost. We have in the past often grumbled at having to pay as much as £2 2s., and sometimes more, annually, under the impression that it was compulsory on us to obey these instructions, and when we had no fault to find with the working of our machine. We now wish you to inform us if we are compelled under the provisions of the Weights and Measures Act to forward our machines to any of these people for adjustment at your office, and we wish you to clearly understand that we do not use our weighing-machine for purposes of sale or purchase of goods, as we are not auctioneers or sellers of produce. We simply use them for private use in our forwarding business.

Of course, we are only too glad to keep our machine in proper order, and shall be glad to know if we cannot arrange for you to test them when we have reason to think them out of truth, without the charges of a middleman.

J. W. Evans, Esq., Inspector of Weights and Measures.

We are, &c.,
TALBOT & CO.

(A.)

Memorandum from James W. Evans, Inspector of Weights and Measures, 110, Bathurst-street, Sydney, to Messrs. Talbot & Co.

13 July, 1893.

In reply to yours of the 12th instant, I desire to state that there is nothing in the Act to compel owners to have machines readjusted at any time. You are responsible for their accuracy. It is my duty when requested to test either here or at the owner's stores (they paying the cost of cartage, &c.), and a certificate will be given as to the condition of the machine.

I enclose circular as the position is stated by me.

Yours, &c.,
JAS. W. EVANS,
Inspector,

[Copy Circular November, 1887, enclosed.]

21 June, 1893.

Memorandum from John See & Co, Grain and Produce Merchants and Commission Agents, Albion Stores, Sussex-street, Sydney, to Mr. Evans, Inspector of Weights and Measures.

Dear Sir,

Doubting the correctness of various weighbridges, we selected a careful drayman to take sixteen bags of bran to have weighed, with the result as attached. There is evidently something wrong, and we desire to call your attention to same.

Yours truly,
JOHN SEE & CO.
(Per J. BROADBENT).

Sir,

110, Bathurst-street, Sydney, 23 June, 1893.

I have to acknowledge receipt of your memorandum of the 21st instant, with enclosures giving test weighings of a load of bran on several weighbridges in Sussex street.

I must first call attention to the conditions under which these machines are used, and an allowance must be made for discrepancies caused—

- (a) By windage, especially near the sea
- (b) Differences in construction and action of levers.
- (c) Wear and tear.
- (d) Want of attention to mechanism.
- (e) Inattention of weighing clerk.

The two latter are preventable.

According to the English official regulations, upon which I base my practice, weighbridges are expected to turn distinctly with 7 lb. on the platform, whilst the tolerance for error is in the machine itself about 11 lb. These should be considered when the amount of discrepancy is dealt with under the heads a b c.

I have taken advantage of your Memorandum to make a surprise test of thirteen weighbridges along Sussex-street by means of a horse, dray, and a load of forty-six standard weights of 56 lb. each. This being an equivalent to your test, I append a list showing the results obtained, and consider that with but three exceptions the result is satisfactory, and these would in ordinary course be attended to within a few weeks.

The need for a regular system of readjustment is made apparent. As this is optional with the owners, I can only make the suggestion to them. I consider it would be unreasonable to condemn weighbridges as unfit which are temporarily affected by causes beyond ordinary control, but where error is in any way preventable a notice is given to the owner at once; but I would strongly protest against the weighing of single sacks as against a total weighing on a bridge as unjust and most unreasonable.

I desire to thank you for the trouble taken, and to assure you that all complaints will receive prompt attention, and if possible a remedy.

I am, &c.,
JAMES W. EVANS,
Metropolitan Inspector.

Mr. Broadbent, care Messrs. John See & Co., Sussex-street, Sydney.

No. 28.

Mr. R. Wedderburn to The Under Secretary of Justice.

Sir,

226, Sussex-street, Sydney, 10 July, 1893.

I regret to say I am compelled to write to you in reference to the action Mr. Evans, the Inspector of Weights and Measures, is taking towards myself and others in Sydney. I would like to call your attention to following case:—I have for several years been doing the work of adjusting the weights and scales for the firm of Gray and Gray, of Sussex-street, Sydney, doing the said work once every twelve months. On going as usual for the work this morning I was informed by the firm (Mr. Gray) that there was no further necessity of employing me as before, as Mr. Evans informed them that it was quite unnecessary to employ me, as the weights and scales did not require seeing to every twelve months, but every two or three years was quite sufficient. The result being I lost the work that would in all probability come to me. Mr. Gray is quite willing to substantiate this, as he said he could not understand it, as on previous occasions he had received a circular from Mr. Evans drawing attention to the expiration of certificate that was usually given, and charged for; but since the charging of stamping fees has been stopped Mr. Evans has taken the opportunity of preventing our getting the work. I most respectfully urge that some action be taken in respect to this matter as I am sure from the remarks from the deputation you received must have impressed you with the importance of some definite action being taken to prevent Mr. Evans from utterly ruining the trade of scalemakers at present existing in Sydney.

Trusting this matter will receive your earnest consideration. I remain, &c.,

R. WEDDERBURN.

The Metropolitan Inspector of Weights and Measures for immediate report—A.C.F., B.C., 18 July, 1893.

No. 29.

The Under Secretary of Justice to Mr. R. Wedderburn.

Sir,

Department of Justice, Sydney, 19 July, 1893.

I have the honor to acknowledge the receipt of your letter of the 10th instant, complaining of the alleged action of Mr. Evans, Metropolitan Inspector of Weights and Measures, towards yourself, and to inform you that the same will receive due consideration.

I have, &c.,

ARCH. C. FRASER,

Under Secretary.

No. 30.

The Metropolitan Inspector of Weights and Measures to The
Under Secretary of Justice.

Sir,

Weights and Measures Office, Sydney, 21 July, 1893.

Referring to your blank cover communication, No. 11,203, of the 18th instant, received yesterday evening, asking for immediate report upon a further complaint of Mr. R. Wedderburn, I have the honor to state as follows:—

Mr. Wedderburn gives a garbled version of a conversation between Messrs. Gray and Gray and myself, in which I furnished them with information in reply to inquiries made as to their responsibilities.

I explained to them that they were responsible for the accuracy of their machines, but that the means they adopted to secure this were a matter for their own consideration. Obviously if their machines were correct, they would require neither testing nor adjustment.

A similar case occurred in connection with the weighing-machines in Parramatta Gaol to which exception was taken by the local Inspector, who was accompanied when he inspected them by a scalemaker.

I

I was instructed by your Department on the 1st April to report. Upon examination I found that the couplings of some of the machines had been inverted and reversed, thus giving them the appearance of requiring repair. On placing these properly and making a thorough test, I found the machines accurate and in good condition, and reported accordingly. By my action I claim to have saved your Department the uncalled for expenditure of at least fifteen pounds (£15) for repairs; but I have certainly left myself open to the imputation, in this case also, of depriving a scalemaker of a job.

I submit that I am bound to furnish reliable information alike to the public and to your Department.

It would appear that scalemakers claim that the Government, through its officer, should provide them with work. They have attempted to usurp the functions of this office, and the public, naturally resenting this, have applied to me for information thereon.

I append a circular, of which many thousands of copies have been issued since 1887, which exactly states my position, and from this I have never deviated.

I have, &c.,

JAMES W. EVANS,
Metropolitan Inspector of Weights and Measures.

[Enclosure.]

Weights and Measures Office, 110, Bathurst-street, Sydney, November, 1887.

WOOLBROKERS, wholesale houses, carriers, agents, and shopkeepers, whose business involve the use of weighing appliances, are strongly recommended to instruct some reliable person in their employ to examine machines, weights, &c., every morning, and when defective to have them attended to at once.

All scales, weighing-machines, &c., must be truly balanced, no draft whatever being allowed, nor will any thing not permanently fastened be permitted to make them balance.

As no person whatever is authorised by this office to repair weighing material, the public are cautioned against jobbers who say they are, and whose pretended repairs almost invariably result in damage, for which a heavy charge is made. You are therefore advised to have appliances periodically examined by some respectable and established scalemaker, or sent to this office for comparison. It is the duty of all persons using or having in their possession weighing appliances to maintain their perfect accuracy. If found defective, the parties are liable to a penalty and the goods confiscated.

All weights, measures, and machines brought to this office for testing, &c., must be perfectly clean and free from rust. Where the lead projects above the surface, such will not be permitted in use. Purchasers are advised to buy none but new scales, weights, and measures, nor then unless properly stamped, as a large number of inferior and unjust articles are offered for sale to those not knowing the difference.

JAMES W. EVANS,

Inspector of Weights and Measures for the Metropolitan District of Sydney.

The Inspector will be in attendance at his office daily, except Saturdays, from 10 a.m. till 12; Mondays and Thursdays, from 10 till 4, and every information given on all matters relating thereto. Material may be left at any time.

Names and addresses of scalemakers registered at this office:—R. Wedderburn, 226, Sussex-street; E. Cook, 72, Druiitt-street; Bowrey Brothers, 13 Park-street; Cross and Wedderburn, 83 Liverpool-street.

No. 31.

Sir, Mr. W. H. Noble to The Minister of Justice.

I wish to bring under your notice that during the month of April last, Mr. Evans, Inspector of Weights and Measures, visited my shop on two different occasions. On his first visit he got on the machine in the front shop and weighed himself for the purpose of testing its accuracy, and pronounced it incorrect. He picked up a counterpoise weight, and said, "I shall seize this for being unstamped." After that he went into the back shop, and looked at the machine there. A day or two after he paid another visit to the shop, this time bringing some weights with him, and proceeded to test the machines in my absence, and took away a weight from the machine in the back shop for being unstamped, and told me he would send me another in place of it; which has since been proved to be wrong. I may state that when he paid the second visit I was out; but as he was leaving after testing the machines, I came in, when he remarked it was not me he wanted to get at but Wedderburn (who is my scalemaker), and that he intended to summon me, and that I had been "got at" by Wedderburn. I wish to bring under your notice that I wrote a letter to Mr. Wedderburn about the stamping of these machines, and he informed me that there was no necessity for having my machines stamped and paying fees for same; but to be certain on the point, I asked Mr. Wedderburn to see the Minister of Justice whether I should be doing right in not getting them stamped. Mr. Wedderburn informs me that he left the letter at your office. He adjusted my machines; and, strange to say, I was made the victim of circumstances, as very shortly after Mr. Evans took action against me; which shows by the remark he made that he intended to prosecute me to get at Wedderburn. Both cases were heard and argued before Mr. Johnson, S.M., at Newtown Police Court, and it was clearly shown that the stamping of these machines did not come under the Act, and that he had no authority to charge fees, and also that the machine was proved correct by several competent witnesses, the only incorrect weight being the one left by Mr. Evans. Both cases were dismissed, and the cost of defending these cases cost me a considerable amount; and dragging my name before the public for having an alleged unjust weighing-machine has so injured my business that I have not been able to carry on since, inasmuch that I have had to sell out at considerable loss. As this action was taken against me by an officer of your department, I humbly ask of you to consider my case, for the purpose of granting me some restitution for the wrong that was done me.

I remain, &c.,

W. H. NOBLE,
Enmore Road, Enmore.

Submitted with reference to papers now before Minister.—A.C.F., 12/7/93.

No. 32.

The Under Secretary of Justice to Mr. W. H. Noble.

Sir, Department of Justice, Sydney, 14 July, 1893.

I have the honor to acknowledge the receipt of your letter, undated, further complaining of the alleged conduct of Mr. Evans, Metropolitan Inspector of Weights and Measures, and to inform you that the same will receive due consideration.

I have, &c.,

ARCH. C. FRASER,
Under Secretary.

No. 33.

No. 33.
Petitions.

Presented by Messrs. Hyam, A. Kethel, and H. Clarke, 19th July, 1893.

To the Honorable the Minister of Justice,—

WE, the undersigned master butchers of the city of Sydney and suburbs, have been brought into frequent business relations with the Inspector of Weights and Measures, and, observing in the public press that a deputation has asked for his suspension, we take the opportunity of stating that his services as an expert are, and have been, invaluable to the trade. We have always found him ready to give his personal and prompt attention to our wants; and, whilst insisting upon accuracy in our material, he has protected us from the heavy outlay for repairs which, though quite uncalled for, was formerly the rule.

[Here follow 170 Signatures.]

Presented by Messrs. Hyam, H. Clarke, and A. Kethel, 19th July, 1893.

To the Honorable the Minister of Justice,—

WE, the undersigned fuel merchants of the City of Sydney and suburbs, desire to state that our attention has been drawn to a press report of a deputation urging upon you the suspension or removal of the Inspector of Weights and Measures.

Whilst recognising the necessity of the amendment of the Acts in the interests of both trader and consumer, we desire to bear testimony to the way in which Mr. Evans has carried out his difficult task.

The complaints made are evidently founded on self-interest, and are but of minor importance as compared with the large questions at stake, and we consider that the suspension of so zealous an officer, at the instance of a few interested tradesmen, and at a time when his experience and grasp of the subject are required to ensure intelligent action, would be a serious mistake.

We, in common with other trades, have occasion to complain of the intrusion of scalemakers in our business affairs, and to testify to the protection afforded us by the systematic working of the Act by the Inspector.

[Here follow 79 signatures.]

Presented by Messrs. Hyam, Kethel, and H. Clarke, 19th July, 1893.

To the Honorable the Minister of Justice,—

WE, the undersigned produce merchants and agents of the City of Sydney and suburbs, having our attention directed to a report in the daily press of the statements of a deputation of scalemakers, asking the suspension or removal of the Inspector of Weights and Measures, consider the present time opportune for bearing testimony to his care and attention, and the fearless energy with which he has performed his duties.

We further desire to protest against the undue prominence given to the statements of those whose motives in attacking the Inspector are self-evident, and afford the strongest proof of his efficiency. We are distinctly of opinion that the whole question should be dealt with as between vendor and purchaser on the one side, and the law as represented by a responsible officer on the other, without the intervention of the very class of the tradesmen from whose excessive and often unnecessary charges the present Inspector has been the first to protect us.

[Here follow 95 signatures.]

Submitted in connection with previous papers before Minister.—A.C.F., 20/7/93.

No. 34.
Deputation.

The Weights and Measures Inquiry, Thursday, 20th July, 1893.

A DEPUTATION of Scalemakers called at the Department to-day, and, at the request of the Minister, and in the absence of the Under Secretary, they were received by the Chief Clerk. The deputation comprised Messrs. James Wedderburn, J. and T. Bowrey, and J. Cable.

Mr. WEDDERBURN said they had read in the morning papers of the deputation which waited upon the Minister the previous day, and at that deputation certain remarks seem to have been made to which they desired to call attention. It had been said that the scalemakers made extortionate charges, but they would point out that much of the charges complained of were made up by the excessive fees charged by the Inspector, Mr. Evans, fees which had now been proved to have been illegally charged. On a £50 job taken by contract the Inspector would take two days passing the work, and would receive as his stamping fees £15.

The CHIEF CLERK: To whom is that money paid? What particular case do you refer to?

Mr. WEDDERBURN: I am referring to different jobs.

The CHIEF CLERK: But this particular case you mention?

Mr. WEDDERBURN: Mr. Robert Wedderburn paid that money to Mr. Evans.

The CHIEF CLERK: Was that this year?

Mr. WEDDERBURN: No; last year.

Mr. CABLE: Or the year before last.

Mr. WEDDERBURN said, on a £26 job, the Inspector's fees amounted to £6. These jobs were secured by competition among the scalemakers, and the last one he mentioned would take the Inspector less than a

day to pass. In another job taken for £11 15s. the Inspector's fees amounted to £5 15s. In another job for £7 2s. the Inspector charged £2 2s. In a contract for £30 the Inspector charged £11 4s. 6d. Where did the extortionate charges come in now?

The CHIEF CLERK : Is there a reference to extortionate fees charged by the scalemakers in the papers to-day?

Mr. WEDDERBURN : Yes ; they wanted these facts placed before the Minister before he came to a decision. The butchers had complained of the charges made by the scalemakers. Why, their work was the most poorly paid of all. The butchers' scales were dirty, generally with pickle, and the charge for repairing steelyards, for instance, varied from 12s. 6d. to 15s. Out of that Mr. Evans took 2s. 6d.

The CHIEF CLERK : Is that the regular fee?

Mr. WEDDERBURN : That is the fee he charges.

Mr. CABLE : It is the fee he fixed himself.

The CHIEF CLERK : How long has it been charged?

Mr. CABLE : For eight or nine years.

The CHIEF CLERK : Is this the first time you have objected to it?

Mr. WEDDERBURN : We have always objected to it. For repairing a set of 14 lb. brass weights they would charge 3s. 6d. to 5s. 6d., according to the state of the weights. Mr. Evans, out of this, took 10d. for stamping and 6d. for the ticket for the scales. The weighing-machines of produce merchants were generally 10 cwt. ones. The charge for carting them away, repairing them, and lending a machine meanwhile, would be, on the average, £1 5s. 6d., and 5s. 6d. of that was deducted for the stamping fees. They could go on citing cases of this kind. After the long time they had been in business in this city there was not one scalemaker out of the four firms able to employ more than one or two men, and their present position showed that they had not made any great gain out of their occupation. The deputation yesterday stated that the Inspector had saved business people from an outlay which was quite uncalled for. If that were so, what necessity had the Inspector to send round expiry notices if he did not think the machines required repairing? Since the inquiry commenced the scalemakers had not paid any stamping fees to the Inspector, and the Inspector now told the people that they need not get their machines done except every two or three years. They gave their evidence at the inquiry from a public point of view, owing to the representations which had been repeatedly made to them, in order that a better state of things might be brought about. Had the scalemakers deemed it necessary after the report was first sent in, they could have got up a petition with far more signatures than were on the petitions presented yesterday. But they thought that the evidence adduced at the inquiry was quite sufficient. These petitions had been taken round in Mr. Evans' buggy, and his assistant was a canvasser. He was informed so yesterday. He could not say how far it was correct. People were very reticent in giving any information on the subject.

The CHIEF CLERK : The Government do not pay for his buggy or his assistant.

Mr. WEDDERBURN : These people are controlled by Mr. Evans. They left the inference to be drawn. What they particularly desired to bring under notice was the statements made as to their charges. Had the Inspector been more arbitrary it would have been better for the scalemakers, and when the disclosures were made they knew that it would affect their business, but that did not stop them bringing the matter before the public.

The CHIEF CLERK : I will bring the matters you have mentioned under the notice of the Minister.

Mr. CABLE said the whole matter had put the scalemakers to a lot of trouble. They could scarcely pay rent and wages now.

Mr. WEDDERBURN said they expected all this. If any more information was wanted on the question of charges it could be furnished.

Mr. CABLE : We have not paid Mr. Evans 3s. this month where we used to pay him £2 a week.

Mr. WEDDERBURN said business was at a standstill. The Inspector had no right to interfere with the charges the scalemakers made as tradesmen.

Mr. JOHN BOWREY : If we do a 10s. job we have to give Mr. Evans 5s.

The deputation then withdrew.

Submitted for the information of the Minister.—A.C.F., 20/7/93.

No. 35.

Mr. D. Price to The Minister of Justice.

Sir,

Manorbeer, Oxford-street, Waverley, 21 July, 1893.

Seeing a statement in the *Daily Telegraph* of the 20th instant, I beg to inform you that I have no connection with any business that will come under Weights and Measures, and that I was on other business at Mr. Stewart's store when Mr. Evans made that extraordinary statement, and libellous, about Captain Fisher, and wanted the storeman to pay him the 40s. illegally, and was called on to substantiate the statement made there. I have no ill-feeling against the Inspector, but the truth of his statement he made, and I consider that the gentlemen that called on you and made the accusation, that it was only a few interested persons, is a falsehood of the deepest dye. My character is as good as Mr. Hyam, or Mr. Clarke, and Kethell. It is no doubt that the Masons will stand to their own. My discharge and recommendations from Her Majesty's Royal Navy as carpenter of Her Majesty's "Lightning"—and my Commander had the Victorian Cross and the French Legion of Honor; and my residence in here of twenty-nine years, and nine and a half years in the Transit Office, is a guarantee of my truthfulness; and the position that my children in the city. I apologise for troubling you with this, and prepared to meet these would-be rulers at any time before you.

I remain, &c.,

DAVID PRICE.

Submitted in connection with previous papers now before Minister.—A.C.F. 24/7/93. Place with other papers.—R.E.O.C., 26/7/93.

No. 36.

The Under Secretary of Justice to Mr. D. Price.

Sir,

Department of Justice, Sydney, 24 July, 1893.

I have the honor to acknowledge the receipt of your letter of the 21st instant, with reference to a paragraph in the *Daily Telegraph*, respecting a statement made by Mr. Evans, Metropolitan Inspector of Weights and Measures, and to inform you that the same will receive due consideration.

I have, &c.,

ARCH. C. FRASER,

Under Secretary.

No. 37.

Minute of The Minister of Justice.

Department of Justice, Sydney, 25 July, 1893.

Subject:—The working of the Weights and Measures Department, and the charges against the Inspector.

THE existing law in regard to weights and measures is singularly incomplete and inadequate. The statute now in force, which was passed in 1852, establishes standard weights, and a system of comparison, stamping, and inspection, but the standard weights are only those used on the ordinary beam and counter scales. No such provision is made with regard to other kinds of weights, nor for the comparison or testing of scales, weighing-machines, or weighbridges. Indeed the Act appears not to have contemplated the existence of that large class of weighing appliances by means of which by far the greater proportion of the trading business of the country is now carried on.

Mr. Evans was appointed Inspector under this Act by the Sydney Bench of Magistrates some ten years ago, the appointment carrying with it the duties of Inspector under the Acts regulating the sale of coal and bread. According to the Departmental arrangements, the Inspector is under this Department, which pays his salary—£300 a year. An office, all necessary apparatus and quarters are supplied him. He is entitled to all fees collected, and such proportion of each fine inflicted as the Magistrate may apportion to him upon conviction under the various Acts which authorise him to prosecute. Out of these sources of revenue he defrays the expenses incidental to the performance of his duties, and keeps the balance, if any, for his own use. Hitherto the Sydney Bench appear to have exercised neither supervision nor control over him. As far as I can learn, he has not, except on rare occasions, received any instructions or directions as to his duties from this Department, nor has he ever been asked by the Bench or by this Department to account for any fees, fines, or other moneys, received by him in the discharge of his duties; indeed, Mr. Evans seems to have been allowed to take up a position which, both in his own interests and that of the public, no officer should be allowed to occupy. Charged with the administration of an Act, in the enforcement of which a great deal of discretion must be used, if it is to be made effective, he has been left to his own devices in the defining of his powers and duties, whilst in the imposing and collecting of the fees which formed a considerable portion of his income, he has been allowed to become practically irresponsible. In this state of things, no doubt brought about in the first instance by the divided control of the Bench of Magistrates and this Department, under which the Act has placed the Inspector, it is not surprising that his administration should have created some dissatisfaction; indeed, the strongest testimony in favour of the general efficiency and integrity of his administration is afforded by the fact that notwithstanding the unpopular nature of his duties, and the large number of prosecutions instituted by him, so few persons have come forward to make charges against him.

In view of the serious nature of the complaints against Mr. Evans, and their bearing upon the existing law and system of administration, I saw that a searching inquiry into the whole system of law and administration in reference to weights and measures, as well as into Mr. Evans' conduct, was necessary, to enable me to arrive at a satisfactory and practical conclusion. I, therefore, appointed a Board, consisting of Mr. W. M. Macfarlane, P.M., Inspector of Petty Sessions Offices (Chairman), Mr. Dixon, Lecturer on Chemistry at the Technical College, and Inspector Larkin, of the Police Force, to inquire fully into the whole subject, take evidence, and report to me the result of their inquiries. The Board has done its work admirably, and I have now before me, in the evidence taken by it, and in its Report, not only all the material necessary for coming to a conclusion upon the charges against Mr. Evans, but also a clear statement of the defects of the present law and its administration, and practical suggestions of great value in supplying the remedy.

I propose to deal first with the charges against Mr. Evans, and to take them in the order in which they stand in the Board's Report.

1, 2, 4, 5, relate to the same kind of complaint, and may be taken together. Some of the charges referred to are apparently not authorised by the Act, but they are all for services rendered, and, having regard to the nature of these services and to the charges for similar services in England and elsewhere, are not unreasonable. I doubt whether Mr. Evans could have borne the expense of carrying out his duties efficiently under the present system if he had not imposed these charges; and although as a public official he acted irregularly and improperly in imposing and collecting them without the express sanction of this Department, I feel satisfied that he acted as he did in the honest belief that his action was justified by precedent, and was within the law.

6, 7, 8, 9, 10, 12. These complaints concern Mr. Evans' dealings with the scalemakers, and his alleged interference with their business. Although nothing demanding official censure has been proved, Mr. Evans has, in my opinion, evinced great want of tact, of judgment, and of temper in these matters. He has shown also a tendency to exceed the limits of his official duties, and to needlessly encroach in small ways upon scalemakers' work—a tendency which is largely responsible for the chronic irritation of the scalemakers against him, and for much of that friction in administration which the evidence before the inquiry has disclosed. Mr. Evans' sole business is to see that the law is observed. It is, in fact, no part of his duty to adjust or regulate weights, weighing-machines, or weighbridges, or to bring them into conformity with the law, and I trust that in future he will confine himself strictly to the duties which the law has imposed upon him. In the same connection I may mention that no traffic in weights or scales, either by Mr. Evans or his officers, should be allowed. The instances adduced at the inquiry were few, and in those

those instances Mr. Evans' conduct appears to have been open and honest ; but the mere fact that such traffic takes place, in however small a degree, tends to weaken public confidence in the Inspector's administration.

Since the close of the inquiry additional complaints have been brought before me. It is charged that Mr. Evans has, in the carrying out of his duties, maliciously disparaged the work and characters of certain scalemakers. A good deal of angry feeling has of late been developed between Mr. Evans and scalemakers—his principal accusers upon the inquiry—and I have no doubt that, when the subject of the inquiry has been under discussion, Mr. Evans may have expressed himself as warmly of individual scalemakers as they have of him, but I am not satisfied that he has ever used his official position for the purpose of maliciously condemning or disparaging the work or the character of any scalemaker. Charges of negligence and incompetency in the testing of certain weighbridges have also been made ; but, after full inquiry, I am satisfied that these charges are not well founded.

It has also been alleged that some five years ago Mr. Evans accepted a bribe, given to induce him to stop a prosecution for light weights, and what purports to be a circumstantial account of the occurrence has been laid before me. I entirely disbelieve it ; Mr. Schonhardt's second statement has convinced me that there is no foundation whatever for this accusation.

Mr. Baskerville's charge (numbered 13 in the Report of the Board) has caused me some difficulty, because in respect to it I am obliged to differ from the finding of the Board. That gentleman gives evidence, corroborated by two witnesses, that Mr. Evans, some months before the inquiry, endeavoured, by threatening a second prosecution to force him to pay a fine which had been inflicted, but which by reason of an irregularity could not be enforced as both parties then knew. Mr. Evans admits that a somewhat heated altercation took place in reference to the order for payment of this fine, but denies absolutely that he even attempted to enforce payment in the manner charged. It seems to me, having regard to the strong body of testimony in favour of Mr. Evans' general integrity in the discharge of his duties, much more probable that Mr. Baskerville and the two witnesses who support him carried away a wrong impression of an angry conversation than that Mr. Evans should have made this attempt to levy blackmail and should have made it openly in the presence of two witnesses.

I come now to the remaining charge, numbered 3 in the Report, and I regret that I am obliged to concur with the Board in finding it completely proved. Mr. Evans has established a practice of selling at 6d. each "approval tickets" which are supposed to indicate that the scales to which they are attached have been examined and approved by the Inspector. These tickets seem to have been sold indiscriminately to certain scalemakers to be placed on any scales they pleased, whether previously examined by the Inspector or not. Strictly speaking, it is no part of the Inspector's duty under the Act to examine and certify to the correctness of scales ; but, having taken it upon himself, he was bound to discharge it faithfully to the public, and to take care that no scales were certified by him as correct which he had not examined. Such laxity in the discharge of duty is deserving of the severest censure, and if it were not for the zeal and integrity with which Mr. Evans appears to have discharged his duties in other respects for the last ten years, I should have felt bound to visit it most severely. I have no doubt that Mr. Evans himself has now realised the effect of his neglect in this particular, and that it is not likely to be repeated.

The inquiry has disclosed the urgent necessity for new legislation in regard to weights and measures and the amendment of the laws relating to the sale of bread and fuel. I fully concur with the suggestions of the Board in regard to these matters, and I shall have prepared a comprehensive measure, embodying these recommendations, and bring the whole question before the Cabinet at an early date. In the meantime it is obvious that some change must be made at once in the mode of administering the office of the Inspector, and in remedying such of the defects and anomalies in the present system as can be remedied without new legislation. To this end I have outlined the following system of administration, which may be at once established for that now in existence, and I would call the attention of the Metropolitan Bench of Magistrates to the urgent necessity for the change :—

1. The Inspector will arrange, as soon as possible, to vacate the premises now occupied by him as office and quarters, and will remove his office to the rooms at the Central Police Court set apart for him.
2. The salary of £300 will be continued, and the following provision will be made for assistance in the carrying out of his duties : He will be allowed two assistants ; one at £2, the other at £1 a week—a small sum to be arranged for incidental expenses, and £50 a year for forage. He will be allowed to retain for his own use the proportion of fines allotted to him on convictions, but all fees, charges, and revenue of every other kind collected by him must be paid into the Consolidated Revenue in the manner to be arranged.
3. The scope and nature of his duties and directions as to their discharge will be laid down by the Department after consultation with him ; the scale of fees and charges will be revised, and, where necessary, amended, and he will be expected to strictly follow the directions of the Department in these matters.
4. He will keep such books, and make such reports and statements as to duties performed and moneys received as may be directed by this Department.
5. He will confine himself strictly to the performance of his duties as Inspector, taking care in no way to adjust or repair weights or weighing appliances.

The details of this system will be arranged in consultation with the Inspector. The rent of the premises now occupied by him, £200 a year, will be saved, and in other respects the cost to the country of carrying out the law will be less than it is at present. With that loyal co-operation, which I have no doubt I shall receive from Mr. Evans, I trust that the change will result in increased efficiency and smoothness of administration.

R. E. O'CONNOR.

No. 38.

Mr. J. Wedderburn to The Minister of Justice.

Sir,

71, Liverpool-street, Sydney, 23 July, 1893.

I wish to bring before your notice the fact that Mr. Evans, the Inspector of Weights and Measures, is going round to the various tradespeople asking them for an estimate of what their work in regard to repairs of weights and scales has cost them. I have been asked to furnish a statement by a customer of mine

45

mine who I have had the pleasure of working for a number of years past. As such conduct on the part of Mr. Evans as a public officer is not warranted, I beg to ask that such action on the part of Inspector of Weights and Measures be stopped, as such action is calculated to injure me. If there is any necessity to acquaint you with any information as to our charges to the public, I am sure myself and others in the trade would be most happy to do so.

I beg leave to remain,

Yours, &c.,

JAS. WEDDERBURN,

Scalemaker,

71, Liverpool-street, Sydney.

Submitted.—A.C.F. I do not consider it necessary to take any other action in regard to these complaints than I have already taken.—R.E.O'C., 5/8/93.

No. 39.

The Under Secretary of Justice to Mr. J. Wedderburn.

Sir,

Department of Justice, Sydney, 24 July, 1893.

I have the honor to acknowledge the receipt of your letter of the 23rd instant complaining of the alleged action of Mr. Evans, Metropolitan Inspector of Weights and Measures, and to inform you that the same will receive due consideration.

I have, &c.,

ARCH. C. FRASER,

Under Secretary.

No. 40.

The Under Secretary of Justice to The Inspector of Weights and Measures.

Department of Justice, Sydney, 3 August, 1893.

A copy of the enclosed minute was forwarded to the Stipendiary Magistrates, and it was assumed that they would have communicated with the Inspector of Weights and Measures. As Mr. Evans, however, informs me that he has not received a copy of the minute, one is now forwarded to him herewith.

The Inspector of Weights and Measures.—B.C., A.C.F.

[Copy of Minute enclosed.]

No. 41.

The Metropolitan Inspector of Weights and Measures to The Under Secretary of Justice.

Sir,

110, Bathurst-street, Sydney, 4 August, 1893.

In view of the fact that the Inquiry into the Administration of the Weights and Measures Act, and into the other matters which have since arisen, has practically been brought to a conclusion, I would be glad if you would submit for the favourable consideration of the Minister of Justice the following statement:—

When the Inquiry commenced I was unaware of the grounds to be taken up. I had not been required to keep books of account, seeing that I had to account only to myself for the revenues of the office. Certain statistical and other information was called for. Necessarily expert clerical assistance had to be provided, as having to attend the Inquiry each day, and having to collect information for the clerk, very little time was available in which to draw up balance-sheets, &c. As a matter of fact during the course of the Inquiry I had to work till very far into each night. I employed Mr. Lees, and being desirous of giving all the required information I could, caused him to wait on the Chairman of the Board, who told him what was wanted. Day and night I was compelled to have his services, and following the Inquiry came in rapid succession other matters, demanding my closest attention, made it absolutely necessary for me to still retain this clerical assistance. I need only mention the Schonhardt episode, the replies to the Board's Report, and the other papers, which will indicate the amount of work and compilation demanded of me. I do not wish to lay undue weight upon the fact that as one result of the commencement of the Inquiry I am very much out of pocket by way of loss of fees of office (while my expenses were doubled), the receipts for months past being practically nil. But I will submit for the Minister's consideration that I might be recouped the money I am out of pocket on this account in defending myself as a public officer.

In the defending themselves from the charges made by Mr. Hoyle, M.P., and Mr. Schey, M.P., the Railway Commissioners, as public servants, suffered no loss, and had the vast resources of a complete staff at their disposal, and it is generally understood that Mr. Maxted has not been put to personal expense in defending himself, whilst I have, from the manner the charges were preferred against me, been thrown upon my own private means.

The Minister has exonerated me from the serious charges levelled at my personal honor and integrity; but has found fault merely with matters of administration. I submit, therefore, my claim herein set forth is an equitable one, and does not really represent one-half of the direct expense I have had to incur in obtaining evidence and assistance in defending myself as a public officer.

I enclose Mr. Lee's account in full, and receipted.

I have, &c.,

JAMES W. EVANS,

Inspector Weights and Measures.

[Enclosures.]

(A)

My dear Evans,

I am somewhat at a loss in making out an account of services rendered and moneys received from you, as you must be aware that the latter are quite disproportionate to the former, and that I have not charged for much of the work done, and that I have not asked you for even a fair remuneration for what I have been paid for. So don't go about telling everybody that I am willing to work under usual rates. I have allotted the amount received as fairly as possible among the various jobs and remain, yours &c.,

A. A. LEES.

MEMO.

The strongest reason which Mr. Evans urges why he should not be put to expense in connection with the late inquiry is that the Railway Commissioners and Mr. Maxted were not put to personal expense in connection with the inquiries concerning them, and further, that the Minister of Justice has exonerated him from the serious charges against his personal honor and integrity, but has found fault merely with matters of administration. The latter statement is, however, not borne out by facts, which will be seen on reference to the Minister's minute in connection with the matter.

To my knowledge Mr. Lees attended on Mr. Evans on nearly every day of the inquiry, and several of the reports sent in by Mr. Evans are in the handwriting of Mr. Lees.

In view of the terms of the Minister's minute, it would appear to be a question solely for the consideration of the Minister whether any allowance should be paid to Mr. Evans for actual expenses incurred.—W.M.M., 17/8/93.

Submitted.—A.C.F., 18. I regret that I cannot comply with Mr. Evans' request. There is no analogy between this inquiry and that against the Railway Commissioners. Any other public officer who is called upon by the head of his Department to answer charges made against him might make a similar claim, and I cannot allow a precedent of the kind to be created.—R.E.O'C., 18/8/93.

No. 42.

The Under Secretary of Justice to The Metropolitan Inspector of Weights and Measures.

Sir,

Department of Justice, Sydney, 21 August, 1893.

Referring to your letter of the 4th inst. in which you ask that certain moneys expended by you in obtaining clerical assistance during the recent inquiry into the administration of the Weights and Measures Act should be refunded, I am directed to inform you that the Minister of Justice has written upon the subject, of which the following is a copy:—"I regret that I cannot comply with Mr. Evans' request. There is no analogy between this inquiry and that against the Railway Commissioners. Any other public officer who is called upon by the head of his department to answer charges made against him might make a similar claim, and I cannot allow a precedent of the kind to be created."

Deputation.

DEPUTATION to the Minister of Justice—Monday, 7 August, 1893.

MR. CARRUTHERS, M.P., introduced a deputation to the Minister of Justice to-day with reference to the administration of the Bread Act. The deputation comprised Messrs. J. G. Purves (President), F. W. Johnson, C. Lovely, J.P., and A. Shadler, of the Master Bakers' Association.

MR. CARRUTHERS said the deputation comprised the executive of the Master Bakers' Association. It was originally intended to wait upon the Minister whilst he was considering the case of the Inspector of Weights and Measures. The Minister's minute upon the matter generally met with the approval of the association, and they now wished to present a petition, signed by the master bakers, before that decision was announced. They had noticed the Minister intimated his intention of preparing a new bread bill, in addition to dealing with weights and measures, and wished to offer some suggestions concerning the proposed new law. The bakers had suffered grievances in the past, and they wished the state of affairs remedied—they had suffered from the operation of the law in the past. In making a batch of bread allowance had to be made for evaporation and shrinkage. The loaves put in the oven first were taken out last, and, consequently, were shorter in weight than the others, and if the Inspector took these as his test of the whole batch no one in the trade would escape. The deputation proposed to make a suggestion which would get over a difficulty of this kind. The Inspector now had power to seize the batch for what he had stated, and he hoped the Minister would save them from the likelihood of any such action. Mr. Evans had acted judiciously in his administration of the law, he had refrained from putting his great powers into force, but there might not be so prudent a man in his place hereafter.

Mr.

Mr. PURVES presented the petition signed by the master bakers, which he read. It was perhaps late in the day, but it showed their opinion of Mr. Evans. They would like to place before the Minister a draft bill. The first thing they desired was a definition of fancy bread. At present there were two shapes of fancy bread—"twist" and "long rolls," or "French loaves." Two others they desired to add—"Carringtons" and "tin cakes"—to be purely surrounded by crust and baked separately.

Mr. O'CONNOR: Is the "Carrington" recognised in the trade?

Mr. PURVES: Yes.

Mr. O'CONNOR: You might put this in the form of a report and submit it to me. By giving diagrams you would help me. I intend to bring the law into conformity with present requirements.

Mr. CARRUTHERS: I intend to lick this draft bill into shape and to send it to you.

Mr. O'CONNOR: I think we are all here for practical purposes; and if we want to consider these matters, the best way is to put the proposals in writing.

Mr. CARRUTHERS said there were only two or three amendments. The deputation wanted fancy bread defined—that is, with regard to shape and weight. Let there be a standard weight, and let the Inspector keep the standard shapes. A half-ounce margin should be allowed for shrinkage and evaporation.

Mr. O'CONNOR: Are these suggestions founded upon the legislation of any other country?

Mr. PURVES: In Melbourne they have something similar.

Mr. O'CONNOR: It would be of use if you could say whether these proposals are in force anywhere else.

Mr. CARRUTHERS said they were very anxious that the Inspector should be paid a fixed salary, and that all fees and fines should go into the Treasury. That would make the Inspector thoroughly disinterested.

Mr. O'CONNOR: That is the intention with regard to fees, but not as to fines, at present.

Mr. SHADLER: He might make £100 in fines in one morning.

Mr. PURVES: In England, nearly all bread was sold over the counter; here, it was nearly all sold by delivery. In England, the bread was weighed over the counter.

Mr. O'CONNOR said he was very glad to have received the deputation and to have heard what they had to say. The whole question would have to be dealt with in a comprehensive way. On inquiry into this matter, complaints having been made against the Inspector of Weights and Measures, he found that our legislation fell short a very long way of modern requirements. As a matter of fact, in 1852, when the present Act was passed, weighing-machines, weighbridges, and other lever machines were not in contemplation, and the result was that the operation of the Act as applied to modern appliances was doubtful. The same thing applied to the Bread and Coal Acts. As a result of the inquiry, although he had been obliged to censure Mr. Evans in one matter in respect of which complaints were made, in regard to his general conduct he was happy to find him a zealous, efficient, and trustworthy officer, bearing out the statements in the petition now presented by the deputation. As he had already stated, it would be necessary, at the earliest opportunity, to bring in fresh legislation dealing with weights and measures and the Bread and Coal Acts. The inquiry has done a great deal of good, because a great deal of useful information had been obtained which would be of material benefit in framing new legislation. Some valuable information had been given by members of that deputation. All this would be considered when framing the new bill, which he hoped would be satisfactory to all concerned. The suggestions they had made that day would be of great assistance to him, and he would consider the whole matter from every point of view—not only from the public point of view and the dishonest practices perpetrated, but also with the view of saving as much as possible the position of the honest portion of the tradespeople. If they forwarded him their suggestions in the way Mr. Carruthers promised they would help the cause they advocated, and afford him considerable assistance.

The deputation thanked the Minister and withdrew.

[Enclosure.]

To the Honorable the Minister of Justice.

WE, the undersigned, master bakers of the city of Sydney and suburbs, have observed in the daily papers that a deputation has waited upon you to suggest the suspension of the Inspector of Weights and Measures. We have suffered in our business from obstructions placed in the way of this officer, whose duties have hitherto been conscientiously and considerately performed.

We are indebted to his ability and integrity in the administration of an Act which, in the hands of a less unselfish man, would be a vehicle for oppression and injustice. His moderation has been the more remarkable in view of the profit accruing to him from prosecutions.

We regret that the action taken by evidently interested persons should be allowed to override the best interests of the community which he has, when left unfettered, served so well, and trust that he may soon be placed in a position to administer an Act more suited to modern requirements than that now in force.

[Here follow 65 signatures.]

No. 47.

Mr. E. Smith to The Hon. J. Kidd, Esq., M.P.

Orange, 8 August, 1893.

You could do the bakers of the country a great deal of good by speaking to the Minister of Justice to have the new Bread Act extended to all the country towns when it becomes law.

I feel assured if you speak to Mr. O'Connor a few words it will have the desired effect.

I remain, &c.,

ED. SMITH.

My dear O'Connor,

Kindly give the contents of Mr. Smith's letter *re* Bread Act your favourable consideration, and oblige.

10/8/93.

Yours, &c.,

JOHN KIDD.

Submitted.—A.C.F., 11/8/93. Bring forward when considering bill.—R.E.O.C., 14/8/93. Place with papers on weights and measures.—R.E.O.C., 15/9/93.

No. 48.

The Under Secretary of Justice to The Hon. J. Kidd, Esq., M.P.

Sir,

Department of Justice, Sydney, 11 August, 1893.

I have the honor, by direction of the Minister of Justice, to acknowledge the receipt of your memo. of the 16th instant, forwarding a letter addressed to you by Mr. E. Smith, urging the extension of the proposed Bread Act to all country towns, and to inform you that the same will receive due consideration.

I have, &c.,

ARCH. C. FRASER,

Per T.E.M'N.,

Under Secretary.

No. 49.

The Government Astronomer to The Under Secretary of Public Instruction.

Sir,

Observatory, 10 August, 1893.

I have the honor to bring under your notice the following matter:—The recent commission appointed to inquire into the Weights and Measures Department took evidence as to the Government standards of length and did not call me to give evidence, which I felt to be a slight, seeing that I have been for many years the recognised custodian of the only standards of length which the Government possess. My personal feelings in the matter are, however, of little consequence compared with the fact that all the evidence necessary was not before the commission.

I now learn from the daily press that the Honorable the Minister of Justice intends to prepare an Act dealing with the question of weights and measures, and I feel it to be my duty to call attention to the fact that the evidence in regard to standards of length submitted to the Minister of Justice is complete.

I have, &c.,

H. C. RUSSELL,

Government Astronomer.

Submitted.—E.J., 14/8/93. The Minister of Justice.—F.B.S., 14/8/93. The Under Secretary of Justice.—J.M.G. (for U.S.), B.C., 15/8/93.

Submitted.—Might be referred to Mr. W. M. Macfarlane, the Chairman of the Board, appointed to inquire into the administration of the Weights and Measures Act.—A.C.F., 18/8/93. Approved.—R.E.O.C., 18/8/93. Chief Emergency Officer.—T.E.M'N., 18. Mr.

Mr. Russell is, I think, slightly in error, when he states that he has been for many years the recognised custodian of the only standards of length which the Government possess. The only legal standards of length in this Colony would appear to be those set out in the Schedule to the Weights and Measures Act, which are deposited under the authority of section 2 of that act in the Treasury, Sydney.—W.M.M., 1/9/93.

Submitted.—Mr. Russell might be informed that no persons were specially invited to give evidence before the Board of Inquiry with regard to matters relating to weights and measures; but that advertisements were inserted in the daily press inviting any persons wishing to make statements to appear before the Board, and further, that the Minister will deem it a favour if Mr. Russell will be good enough to communicate in writing any matters connected with weights and measures which will assist him in framing new legislation on the subject.—A.C.F., 1/9/93. Approved.—R.E.O.C., 4/9/93.

No. 50.

The Under Secretary of Justice to The Under Secretary of Public Instruction.

Sir,

Department of Justice, Sydney, 13 September, 1893.

Referring to your blank cover communication of the 15th ultimo, forwarding a letter addressed to you by H. C. Russell, Esquire, C.M.G., Government Astronomer, in which he states that he has for many years been the recognised custodian of the only standards of length which the Colony possesses, but was not called to give evidence in connection with the recent inquiry into the administration of the Weights and Measures Act, I am directed by the Minister of Justice to point out that the only standard measures of length in this Colony under the Act referred to would appear to be those which are specified in the schedule to that Act, and are deposited in the Treasury.

I am also to state that no one was specially called to give evidence before the Board of Inquiry, but that advertisements were inserted in the daily press inviting any persons willing to make statements to appear before the Board.

At the same time, the Minister desires me to say that he will deem it a favour if Mr. Russell will be good enough to communicate any information bearing on the subject of weights and measures which would assist him in framing new legislation in regard thereto.

I have, &c.,

ARCH. C. FRASER,
Under Secretary.

No. 51.

The Metropolitan Inspector of Weights and Measures to The Under Secretary of Justice.

Sir,

Sydney, 10 August, 1893.

Referring to that portion of the minute of the Minister of Justice upon the recent inquiry into the administration of the Weights and Measures Act, in which it is proposed to re-arrange the sources of my income, I desire respectfully to point out that the remuneration suggested (Salary £300, forage £50, and half fines) does not appear to be adequate, and I therefore hope the matter will be reconsidered.

As the statements furnished by me to the Board of Inquiry will bear out, my net income for the three years ending 31st December last, after making allowance for value of quarters, was about £400 per annum. This, it will be seen, left for my personal use and support a much greater sum than I would obtain under the suggested new scale. To vigorously carry out the duty of inspection, and effectively control the working of the Coals Act and the Bread Act will necessitate the employment of two horses—to visit bakehouses calls for rapid driving between the hours of 4 and 8 a.m.

The cost of horse and vehicle from a livery stable would be 12s. 6d. to 15s. per day so that it will be seen what a large expenditure the employment of two horses, and the wear, tear, and other expenses of vehicle, harness, and renewals would entail.

My salary under the City Council before I accepted the position I now hold was better than that now contemplated to allow me.

I would further point out that the City Inspector of Nuisances receives £650 per annum, and his assistant £375 per annum; they have no personal risks or expense in carrying out their duties, they have but the city to control and supervise, while I have to attend to an area more than twenty times greater than the city, and have to accept the responsibility for all acts done, and one false step might bring me to ruin.

The half fines, after allowing for the expenses entailed to such service and legal advice often required before proceeding, are not so remunerative as a first glance at the totals would infer, and the Inspector should not be placed in a position which would tempt him to make vexatious prosecutions in order to benefit himself.

The Treasury reaps the full half fine and all costs without assuming responsibility or risk on account of any prosecutions made. It will also be apparent that by a constant system of supervision the revenue will be much augmented by fees. My chances of obtaining cases for prosecution are lessened, my expenses are the same, and my income cannot be legitimately increased in like manner.

The attached statement, showing what would be the result to me if the proposed arrangement be carried out, will speak for itself. And I do humbly trust that the Minister will consider this application and see fit to decide upon such an allowance which will be adequate to the peculiar duties, services, and the long hours involved in their discharge, to meet the expense of carrying them out, to enable me to live respectably, and such as may relieve me from the suspicion that prosecutions are undertaken from any other than a proper and official cause, and not with a view to swell my income.

I have, &c.,

J. W. EVANS,
Metropolitan Inspector of Weights and Measures.

				£128	10 0

Submitted.—A.C.F., 14/8/93. Mr. Macfarlane might inquire into the statements and report thereon.—R.E.O'C., 14/8/93.

As pointed out on page 5 of the Report of the Board of Inquiry, the total emolument which the Inspector of Weights and Measures states he has received during the years 1890, 1891, and 1892, amounted to £611 8s. 6d., £841 5s., and £787 3s. respectively, making a total for the three years of £2,239 16s. 6d., or an average per annum of £746 12s. 2d. He also stated that his expenses amounted to about £430 per annum, thus leaving a balance for his own use of £316 12s. 2d. He was also allowed quarters, the annual value of which would be somewhere about £100, making a total emolument of (say) £400 per annum. Under the new system the Inspector will receive a salary of £300 per annum, and will continue to receive a moiety of the fines imposed on convictions obtained by him, which for the years mentioned averaged £84 8s. 6d. per annum. Owing to the fact that the Inspector will now have considerably more time at his disposal for carrying out inspectorial duties, the returns from fines should in the ordinary course be greater than those previously obtained, and would at least reach the average already quoted, thereby making his total emolument of over £380 per annum. It will not now be necessary for him to incur so great an expenditure as £100 per annum for rent, and, in fact, the amount set down by him as that which he will have to pay for rent is £65 per annum. The present, however, does not appear to be a fitting time to consider this question of increasing the remuneration paid to Mr. Evans, and it is therefore suggested that the matter stand over till such time as Mr. Evans shall have been located in the new offices for about three months under the new system, when the same might be fully considered.—W.M.M., 18/8/93. Submitted.—A.C.F., 19. Approved.—R.E.O'C., 18/8/93.

No. 52.

The Under Secretary of Justice to The Metropolitan Inspector of Weights and Measures.

Sir,

Department of Justice, Sydney, 23 August, 1893.

Referring to your letter of the 10th instant, in which you ask that the remuneration proposed to be allowed to you in future for the performance of your duties as Metropolitan Inspector of Weights and Measures might be increased, I am directed by the Minister of Justice to inform you that the present does not appear to be a fitting time to consider the question of increasing your remuneration, and he has directed that the matter stand over until you have been three months in the new office under the contemplated new system, when you may renew your application.

I have, &c.,

ARCH. C. FRASER

Under Secretary.

No. 53.

Minute.

Department of Justice, Sydney, 17 August, 1893.

Weights and Measures.

THE following action appears to have been taken on Minister's minute on the above subject, namely :—On the 27th July on verbal instructions, a letter was addressed to Mr. Smithers, C.P.S. and Chamber Magistrate at the Water Police Office, forwarding copy of the Minister's minute, asking him to bring the same under the notice of the Stipendiary Magistrates, and on the same date representatives of the press were also supplied with copies of the minute, and copies forwarded for the perusal of Messrs. Dixon and Larkin.

On the 7th August a further communication was addressed to Mr. Smithers, asking if any objection existed on the part of the stipendiary magistrates to Mr. Evans being retained in his present position on the terms stated in the Minister's minute, and on the 9th instant a reply was received stating that no such objection existed, a copy of that reply being forwarded for Mr. Evans' information on the 16th idem. A copy of the Minister's minute was sent on the 3rd August by the Emergency Branch to Mr. Evans under memo.

The only action remaining to be taken would appear to be to send a copy of the Minister's minute of 25th July to the Treasury, in connection with letter from this Department of 1/3/93, forwarding copy of Report of Board of Inquiry.

Seen. Action should be taken on last paragraph.—A.C.F., 18.

No. 54.

The Under Secretary of Justice to The Under Secretary for Finance and Trade.

Sir,

Department of Justice, Sydney, 23 August, 1893.

Referring to my letter of 28th February last, forwarding copy of the Report of the Board appointed to inquire into the working of the Weights and Measures Act, 16 Victoria No. 34, I am directed by the Minister of Justice to forward for the information of the Colonial Treasurer copy of a minute which he has written upon the subject, and to ask that you will move Mr. See to be good enough to cause instructions to be given to aid Mr. Evans in making provision for the proper care of the standards.

I have, &c.,

ARCH. C. FRASER,

Under Secretary.

[Enclosure.]

THE Colonial Treasurer may be asked to aid Mr. Evans in making provision for the proper care of the standards. A copy of this minute may be sent to the Metropolitan Bench of Magistrates with the request that they will aid in initiating the new system as soon as possible. Mr. Macfarlane will see the Inspector as soon as possible in order to revise the scale of fees and charges, and propose the details of the system ready for submission to me at an early date.

R.E.O.C., 25/7/93.

No. 55.

The Under Secretary for Finance and Trade to The Under Secretary of Justice.

Re Report re Weights and Measures.

Memo.

Treasury, 31 August, 1893.

TREASURY Memorandum (receiver's) dated 29th March, 1893, No. 330, on the above subject was sent to the Department of Justice on 5th April last.

To enable this Department to take action in reference to further letter from Justice Department, dated 23rd instant, 93/11,877, I shall be glad to have the above paper, to show the present state of matters, returned to me.

F. K.

The Under Secretary of Justice.—B.C., 30th August, 1893. J.M., urgent.—When action has been taken on communication herein referred to, the same may be returned to the Treasury as requested.—A.C.F., 5/9/93.

THE within communication from the Treasury respecting the standards of weights and measures deposited there appears to have been placed with the voluminous papers in connection with weights and measures, and has apparently escaped attention. A copy of the paragraph relating to the 120 sets of weights and measures, to be examined, compared, and tested at the Treasury, might be forwarded to the Inspector of Weights and Measures for report as to the apparent delay in completing this necessary work. The Inspector might also be asked to obtain an estimate of the cost of having the boxes in which the standards are deposited, relined with black velvet; and requested further to remove the extra four sets of troy weights from the place where the standards are deposited.—W.M.M., 5/9/93. Approved.—A.C.F., 6.

No. 56.

The Under Secretary of Justice to The Metropolitan Inspector of Weights and Measures.

Sir,

Department of Justice, Sydney, 7 September, 1893.

I have the honor to forward herewith a copy of an extract from a memo. from the Treasury, dated 4th April, 1893, relating to the 120 sets of weights and measures to be examined, compared, and tested at the Treasury, and to ask you to furnish a report as to the apparent delay in completing this necessary work.

I have at the same time to ask you to obtain an estimate of the cost of having the boxes, in which the standards are deposited, relined with black velvet, and also to remove the extra four sets of troy weights from the place where the standards are deposited.

I have, &c.,

ARCH. C. FRASER,

Under Secretary.

[Extract from memo. enclosed.]

No. 57.

The Under Secretary of Justice to The Under Secretary for Finance and Trade.

Sir,

Department of Justice, Sydney, 12 September, 1893.

In compliance with the request contained in your memo. of the 30th ultimo, I have the honor to return herewith memorandum dated 29th March last, on the subject of the Report of the Board appointed to inquire into the administration of the Weights and Measures Act.

I may at the same time state that this paper was placed with the voluminous papers in connection with the Weights and Measures Inquiry, and has inadvertently escaped attention; but that Mr. Evans has now been asked to report upon that portion of the memorandum dealing with the delay in examining, comparing, and testing the 120 sets of weights and measures ordered to be returned by the country benches of magistrates, and he has also been asked to obtain an estimate of the cost of having the boxes, in which the standards are deposited, relined with black velvet, and requested to remove the extra four sets of troy weights from the place where the standards are deposited.

I have, &c.,

ARCH. C. FRASER,

Under Secretary.

No. 58.

No. 58.

The Metropolitan Inspector of Weights and Measures to The Under Secretary of Justice.

Sir,

110, Bathurst-street, Sydney, 13 September, 1893.

Referring to your letter of the 7th instant, No. 93-5,671, enclosing an extract from a memo. of the Treasury, dated 4th April, 1893, and asking—

1. That a report be furnished upon the apparent delay in completing the verification of 120 sets of weights, &c.
2. That an estimate be furnished of the cost of re-lining the boxes in which the standards are deposited.
3. Directing the removal of four sets of troy weights, now in the standards room.

I have the honor to report:—

1. In 1889 the copies of the standards in charge of the Inspector at Ryde were taken exception to in court, on the ground that they were not properly issued in terms of the Act—not being inscribed with the letters "S.W.," and not being certified under the hand of the Governor of the Colony.

I called the attention of the Department of Justice to the matter, and a circular was issued, No. 89-18,270, to the Benches of the Colony, requesting them, in the first instance, to forward a list of material and a report as to its condition, and stating that, in the event of re-adjustment being deemed necessary, special authority would be given to forward such material to Sydney, for the purpose of being examined and stamped at this office.

The number of sets of Inspector's standards in the Colony was, in the absence of specific information, roughly estimated at 120.

It would appear that your Department have so far deemed it necessary that thirty-three sets of these should be readjusted, and have given me orders accordingly, and no delay has occurred on my part other than that inseparable from obtaining what new material was required, and causing necessary repairs to be effected. As I have in every case been dependent upon the instructions of your Department, and have always carried these out with the least possible delay, it would appear that the memo. of the Treasury, complaining of the "very tardy way in which the weights, &c., are brought to the Treasury by Inspector Evans," has been written without due inquiry into the facts of the case.

If, as alleged, undue delay has occurred in the verification of country inspectors' standards, which, as I pointed out at the time, is a matter of the utmost importance, I most respectfully submit that I am not even in a position to surmise the cause of such delay, much less to prevent it. I append, for your information, a list of the sets of appliances which you have caused to be sent to me, and which in every case have been dealt with as soon as I received the necessary documents. Indeed, there are sets now in hand for Albury and Corowa, which, although otherwise ready, are delayed pending the receipt of material for Albury, for which the requisition was sent in about two months ago, and on 12th August I wrote in asking that they might be expedited.

This would appear to be a fitting opportunity to note that, in view of the probable requirements that the standards should be at all reasonable times easily accessible to the Metropolitan Inspector, or other person appointed to conduct verifications.

2. I attach an estimate price for re-lining the boxes in which the standards are deposited with black velvet, as also to effect some repairs, as the bottom of one box is dry-rotted and others damaged. These will, I presume, be remedied under my supervision.

3. The four boxes of troy weights now in the standards room will be brought to this office at once.

I respectfully would ask that the Treasury be communicated with in order that I may, when so directed, have access to the standards room in order to have the boxes repaired and relined, otherwise it will not be possible to carry out your instructions.

I have, &c.,

JAMES W. EVANS,

Metropolitan Inspector of Weights and Measures.

[Enclosures.]

(A.)

List of Standard Weights and Measures verified by direction of the Department of Justice:—89-8,924, Young; 89-8,957, Kiama; 89-10,519, Armidale; 89-8,952, Campbelltown; 89-9,164, Bathurst; 89-9,045, Gosford; 89-9,049, Molong; 89-9,044, Cooma; 89-9,324, Rylstone; 89-9,473, Bundarra; 89-9,039, Penrith; 89-11,015, Grenfell; 89-12,689, Emma-ville; 89-9,597, Dubbo; 90-10,541, Parkes; 90-14,987, Uralla; 90-14,987, Hillgrove; 90-14,987, Broken Hill; 90-14,987, Cowra; 91-372, Boat Harbour; 91-372, Waratah; 91-372, Walcha; 91-372, Bombala, also Emmaville, Goulburn, Lambton, Murrurundi, Nowra, Ryde, Tumberumba, Port Macquarie, Yass, Wilcannia, Kempsey, Wollongong, the numbers of which I have overlooked, or must have returned the papers to the Department.

(B.)

Memo. from Lane Bros., 725 George-street, Sydney, 13th September, 1893.

To Mr. Evans, Inspector of Weights and Measures,—

Tender for renovating nine weights and measures boxes (as directed) now lying at Government Stores. The work to be as follows:—Repair and make good all locks and fastenings; replace present baize pads with velvet at four shillings (4s.) per yard; repair all wood work, and clean and oil outside of boxes. The undersigned proposes to do the whole of the work to the satisfaction of Mr. Evans for the sum of three pounds ten shillings (£3 10s.).

A. LANE.

Cartage, about 8s., will be extra to this amount.—J.W.E.

Report from Mr. Evans herewith for perusal, and any remarks the Chief Emergency Officer, &c., may wish to make before submission of papers.—T.E.M'N., 14/9/93.

I suggest that Mr. Evans' Report herein be forwarded for the information of the Under Secretary for Finance and Trade, and that he be requested to allow Mr. Evans to have access to the boxes containing the standard weights and measures of the Colony, for the purpose of having the boxes repaired and relined with black velvet. When such authority is obtained Mr. Evans might be instructed to have the boxes attended to accordingly, the cost being defrayed from the revenue.—W.M.M., 16/9/93.

No. 60.

Minute.

WITH reference to my instructions to see the Inspector of Weights and Measures as soon as possible to revise the scale of fees and charges, and propose the details of the system in connection with the working of the Weights and Measures Office, ready for submission to the Minister at an early date, I have had several interviews with Mr. Evans, as a result of which I have drafted the enclosed instructions. Mr. Evans, however, now wishes that such proposed instructions may be referred to him, in order that he may pursue them carefully, and make any further suggestions that he may think necessary.

I suggest, therefore, that they be now referred to Mr. Evans for the purpose mentioned, and that he be asked to return the same as soon as possible.—

W.M.M., 4/9/93.

Submitted.—A.C.F.; 4/9/93. Approved.—R.E.O'C., 4/9/93.

No. 61.

The Under Secretary of Justice to The Metropolitan Inspector of Weights and Measures.

Sir,

Department of Justice, Sydney, 5 September, 1893.

I am directed by the Minister of Justice to forward for your perusal and for any further suggestions you may think necessary, the enclosed draft of proposed instructions to be observed by you in the working of the Weights and Measures office, and to request that you will return the same to this department as soon as possible.

I have, &c.,

ARCH. C. FRASER,

Under Secretary.

[Enclosure.]

INSTRUCTIONS to be observed by the Metropolitan Inspector of Weights and Measures in connection with the performance of his duties:—

1. *Office Hours.*

The Weights and Measures Office shall be open to the public on week days from 9 a.m. till 4.30 p.m. and from 9 a.m. till 12 noon on Saturdays.

2. *Attendance of Inspector at his Office.*

The Inspector shall be in attendance at his office when not engaged on outside duties connected with his office, and for the convenience of the public shall always be in attendance from 9 a.m. till 11 a.m. on all days of the week except Saturday, and from 3 p.m. till 4.30 p.m. on Fridays.

3. *Inspector's Duties in connection with Weighing Instruments.*

The Inspector shall inspect all public weighbridges at least once in every three months, and shall properly test them up to 4 tons once at least in every six months. He shall only test weighing instruments at his own office when required in writing by the person in charge of them so to do, and upon his agreeing to pay a fee for such testing at the rate of 6d. per cwt. of the weighing capacity of the instrument; the minimum charge being 2s. 6d. and the maximum 10s. Schedule "A."

The Inspector shall not test weighing-machines away from his office, except for the purposes of inspection and where persons requiring new machines tested sign the request contained in the last paragraph. The inspector shall, if required, certify in writing as to the accuracy of all weighing-machines tested by him.

4. *Diary to be Kept and Return Made to Department.*

The Inspector shall keep a diary, in which he shall enter memoranda of the duties daily performed by him, showing the number and nature of inspections made, weighing-instruments tested, weights and measures compared, prosecutions instituted, fines imposed, moiety of fines ordered to be paid to the inspector, and fees received from different sources. Extracts from this diary shall be furnished monthly to the Under Secretary of Justice not later than the 5th day of each month.

5. *Account Books, &c., to be Kept, and Fees to be Paid to the Treasury.*

The Inspector shall keep a general cash-book, in which he shall cause to be entered the name of any person from whom he shall receive a fee, together with the amount of the fee, and the purpose for which it is paid.

The Inspector shall give receipts for moneys received from a general receipt-book, and he shall cause particulars of the purpose for which the receipt was given to be entered upon the butt of the receipt to which it belongs.

The Inspector shall on Monday in each week pay to the Treasury, on miscellaneous collection voucher, contingency form No. 6, all moneys which have been received by him as fees during the previous week, and shall furnish quarterly attested accounts of the same to the Auditor-General before the 10th days of January, April, July, and October in each year.

6. *Testing of Weighing Instruments, Weighing-machines, &c.*

In the inspection and testing of weights and measures and weighing instruments allowance will be made up to the limit of excess tolerance laid down in the schedule attached. Schedule "B."

Any complaints against the action of the Inspector shall be made in writing and forwarded to the Under Secretary of Justice within ten days after the cause of complaint arise.

7. *Weights.*

All weights in use for trade must be stamped by an inspector, and when submitted for stamping shall be clean, shall not be painted unless exceeding 7 lb., shall have but one hole for plugging and stamping; the lead shall be firmly fixed, and shall not project beyond the surface of the weight.

No copper or brass plugs or rings shall be stamped, nor shall any loose or imperfect attachments be allowed.

Load holes for adjustment and stamping shall not be less than $\frac{1}{16}$ of an inch in diameter, and, if necessary, be undercut. Brass weights shall, when requisite, have a plate firmly fixed to the base for the purpose of adjustment.

China and porcelain weights shall be well and completely glazed inside and outside. The use of chipped or broken weights shall not be permitted.

All denominations of weights shall be distinctly and legibly marked. Iron weights of 56 lb., 28 lb., and 14 lb., respectively may continue in use, although containing more than one adjusting hole, if otherwise correct. If the Inspector consider it inadvisable for the purpose of preventing fraud to restamp any weight, he may efface the old stamp, and place a "condemnation mark" thereon.

8. *Measures.*

All measures for use shall be stamped by an Inspector. All measures of capacity not being bell-shaped, with funnel mouths, shall be of parallel form, without subdivision lines, and approximate to the copies of the Standards lodged with the Inspector, or about equal internal diameter and depth.

Cone-shaped or tapering measures, without bell mouths, are strictly prohibited from use.

All measures submitted for stamping shall be clean and shall have their denomination marked upon the outside in legible figures and letters.

In all cases new measures shall have plain and even bottoms; shall have a plug of lead or pewter to receive the stamp at top edge, and shall not differ from the inspectors' standards by more than the estimated amounts shown in the schedule annexed.

SCHEDULE A.

The Inspector of Weights and Measures, Sydney.

Sir,

I request that you will test a _____ cwt. weighing instrument for _____ for which I agree to pay a fee of 6d. per cwt. of its weighing capacity.

Maximum charge, 10s.; minimum charge, 2s. 6d.

SCHEDULE B.

No. 62.

The Metropolitan Inspector of Weights and Measures to The Under Secretary of Justice.

Sir,

Weights and Measures Office, 110, Bathurst-street, Sydney, 5 October, 1893.

Referring to your letter of 5th September, No. 13,820, forwarding for perusal and for any further suggestions I may think necessary, a draft of proposed instructions to be observed in the working of the Weights and Measures Act.

I have the honor to submit the enclosed amended code of regulations, and a further letter stating reasons for my dissenting to the original draft.

This being the first time these draft Regulations have officially been submitted to me, I may be pardoned if the limits of revision intended for me have been exceeded; but I feel bound to point out the impracticable nature of some of the conditions proposed, and the peculiar nature of some of the restrictions of my appointment as contained in the Weights and Measures Act, and my direct responsibility to the magistrates, and to further respectfully ask that the Bench of Stipendiary Magistrates be invited to give me direct instructions referring to my position and its anomalies removed by their directing me. I hope, therefore, the Minister will not deem it disrespectful on my part to ask that so long as the law remain as it is, I may be relieved from any charge of lack of proper official recognition of the Bench of Stipendiary Magistrates by this correspondence being submitted to them, or that they should give me distinct directions which I may at any time produce as an authorization from the Bench who have appointed me.

I humbly trust that the difficulty of my position in its official relationship to the Minister of Justice and the Bench of Magistrates may be realised, so that a course of action may be devised which will leave me free from censure.

I have, &c.,

JAMES W. EVANS,

Metropolitan Inspector Weights and Measures.

[Enclosure.]

(A.)

SUGGESTIONS to amend Draft Instructions forwarded by Department of Justice:—

Section 1.—*Office Hours.*

The Office shall be open to the public on week days from 9 a.m. till 4:30 p.m. On Saturdays from 9 a.m. till 12 noon.

Section 2.—*Attendance of Inspector.*

The Inspector shall be in attendance on the public from 9:30 a.m. to 11 a.m. daily, except Saturdays, and on Fridays from 3:30 till 4:30 p.m., and at other times by special appointment. If unable to be in attendance at the above-mentioned times he shall arrange to attend for the same time as early in the same day as possible.

Section

Section 3.—Weighing Appliances Tested.

- (a) The Inspector shall test all appliances submitted to him at the office, and if found correct issue a certificate for same.
- (b) In cases where appliances are built in or so constructed and fixed as to be not capable of moving he shall, when so requested, attend the premises and test same, but the owners shall send for and promptly return the weights required, and provide proper labour to place the weights as desired, and in addition pay the fee as per schedule.
- (c) Weighbridges shall be examined and their condition noted at least once each three months (but not at regular dates or times).
- (d) All weighing appliances, weights, or measures, when submitted must be thoroughly clean and all painted parts dry.
- (e) All fees are to be paid and a receipt taken before the material is taken from the office. Out-door services to be paid on completion of the work.
- (f) Made up parcels may be tested for weight without prejudice—if so requested by the buyer or seller of such parcel on payment of a fee (see Schedule).
- (g) The decision of the Inspector shall be final in all cases having regard to the quality and fitness of all appliances submitted to him, and he may refuse to give a certificate of accuracy for any such material as would in his opinion tend to the perpetration of fraud, a record of such and the cause of rejection must, however, be kept in a book provided for that purpose.
- (h) All complaints against the Inspector shall be made in writing and forwarded to the Department of Justice within ten days after the cause arise.
- (i) The cost of all original verifications and stamping, as well as the cost of any future reverification or restamping, when made at the request of the owner of the appliances, shall be defrayed by such owner, including the cost of removing the weights, labour, and cartage if required. Special or official tests will be defrayed by the Department (when thought necessary).
- (j) All outdoor work in accordance with (b) shall be authorised by a special direction on a form (as per Schedule A).
- (k) Fees will only be charged when the appliances submitted are stamped or otherwise approved of.
- (l) In cases of new weighing machines or new counter scales, &c., the slip weights, or counterpoise or balance, may be restored, and new weights, if a fraction in excess, may be lightened. Any material that has been in use must be sent to some practical tradesman to restore adjustments.
- (m) Tolerance for error will be allowed in excess only upon weights.
- (n) The average tolerance in weighing appliances may be roughly averaged at $\frac{1}{2000}$ part of the full carrying capacity.
- (o) The Inspector shall be held responsible for the safe custody of all appliances placed under his care by the Department; he shall not lend nor otherwise permit any appliances or material to be taken from the office, except under proper authority, and then to be under his strict and personal supervision.

Section 4.—Diary to be kept.

The Inspector shall cause to be kept a book, to be provided, showing the nature and classes of work done within the office, the names, &c., of every person from whom a fee is received, and its amount, and the nature of the service rendered. Receipts shall be given for all moneys paid in and entered in like manner upon the butt of book. A record shall also be made of all complaints received within the office, but shall not be disclosed to persons outside the office.

The Inspector shall keep a record of outside duties performed, weighbridges examined or tested, districts visited, carefully noting any matter of consequence such as suspicious proceedings, cautions given, seizures made, complaints received, their result and nature; prosecutions instituted, fines imposed, and if paid their appropriation, the verification of sub-standards, and such other duties as may from time to time be required of him in connection with the duties of his office.

Such extracts and particulars as may be required shall be furnished by him to the Under Secretary of Justice not later than the 7th day of each month.

SCHEDULE A.

The Inspector of Weights and Measures, Sydney.

Sir,

I request that you will test, upon the premises below stated, a dormant weighing machine. Its capacity is and cannot be removed from its position. I agree to send for and promptly return the weights you require and pay the fee chargeable for such service.

(Sd.)
(Address and date).

Schedule of Fees not expressly provided for under the Act.

	£	s.	d.
Weighbridges at request of owner	1	1	0
Weighing appliances, per cwt.	0	0	6
Other than weighbridges for vehicles—			
Maximum fee.....	0	10	0
Minimum

Under 20 " " 1 " "	0	0	3
" 1 " " 1 gr. "	0	0	1
Parcels tested, minimum fee	0	0	3

Above 56 lb. at per schedule fees.

(B.)

REMARKS upon Draft Suggestions forwarded by Department of Justice.

Section 1.—Office Hours.

Will suit all requirements.

2.—Attendance of Inspector.

As books, papers, and letters will require to be attended to, and early morning work will prevent the inspector being in punctual attendance, my suggested regulation will be best; also, that the office may be cleaned and the material attended to.

3.—Inspector's Duties in connection with Weighing Instruments.—Weighbridges.

Visits of inspection should be intermittent, varying with the trade seasons and the persons using them. The half-yearly test appears to be, if carried out as suggested by the Department, surrounded by great difficulties. It will seriously obstruct the owner's work, will involve the department in expense which cannot be estimated beforehand, and it will remove the responsibility and onus of maintaining the accuracy of these appliances from the owners to the department. Your inspector will become involved and called in for every dispute arising by difference in weights, and all his time, which otherwise might be devoted to inspections proper, would be taken up by this one duty. The 4 tons test would be practically useless, as any defect would have to be repeated for the scalemaker.

I also respectfully submit that as these public weighbridges are purely commercial speculations, from which large incomes are derived, the department should not be charged with the expense, labour, and responsibility of practically guaranteeing the correctness of them, while the small kinds of machines, which are not a source of profit, and by means of which almost all trade as between vendor and consumer is conducted, and infinitely more liable to derangement and to be tampered with, are intended to be left optional, and if brought to the office would be charged for. It

It would also be calculated to induce owners of private weighbridges to style themselves "public," in order to obtain the advantages of official free verification, and to be relieved of responsibility. I am strongly convinced that the proposed regulation would not work well in practice. The whole time of an Inspector would be taken up in attending to them, and the numberless disputes consequent upon its adoption. Every owner would doubtless be glad to defray the cost of official tests if arranged to suit their convenience.

I shall, however, do my best in carrying out whatever instructions are given by your department, but would not accept the responsibility of advising the adoption of the draft regulation.

Section 4.

In regard to this suggested regulation, I desire to point out that when it is placed beside the varied and complicated duties I am called upon to conduct it will be found impossible to show the number and nature of the inspections made, would restrict and hamper rapid movements beyond description, and the whole of an inspector's success depends on the rapidity with which he can travel from one point to some other place; to account for every weight, measure, or machine examined, every quarter hour in giving instructions, answering inquiries, and hearing complaints; for every detail of time employed would not be reasonable, for not 1 per cent. of the inspections made are worth noticing, but a concise record should be made of any cautions given or other suspicious incident, and of all seizures or official action taken.

I submit the Inspector should be held trustworthy. His hours are unlimited, his duties are continuous, he has no holidays allowed him, and the police, who have short hours and no mechanical duty, are not expected to do such a duty as to keep a record of every door tied or noisy person moved on. As well might a detective be expected to account for all his time. I have often shadowed a place for months before obtaining a case. I have one now over four years in hand, and have failed completely. I could not account honestly and fairly for time thus spent, nor would it be advisable, and at the best will only pile up work without any benefit.

Section 5, Paragraph 3—Fees to be paid into Treasury.

In dealing with this proposal I would most respectfully remind you that no provision has been made for any compensating allowance for the fees which have up to this time been received by all Inspectors of Weights and Measures (as has been done in all other cases, the latest being the Clerks of Petty Sessions), and this would appear to be an opportune time to ask your attention to the serious blow it will be to my means of livelihood. My house rent (now taken away) was allowed me in place of forage, my fees abolished, quarters gone, my duties increased and intensified, my salary reduced to £289 10s., and am expected to provide for self and assistant, horses, vehicles, stabling and groom, forage and keep, wear and damage, on £50 per annum. This sum will not meet more than one-third the expense involved, and if tried by me would make so serious an inroad on my salary as to leave it impossible to keep out of debt.

The duties under the Bread Act and the Coal Act were not imposed upon me at my appointment, but for the first time in the Colony were undertaken by me as a Special Constable some months after. The work is mostly conducted during the early hours, from 4 a.m., and from 4 to 6 or 7 p.m. The time may fairly be considered my own; in any case, the anticipation of half-fines should not form a factor in estimating my salary, as they are for extra services. They are not reliable nor reputable sources of revenue, but should form but an extra incentive to active discharge of duty. Customs officers are so paid and rewarded without regard to forfeitures. My duties are not transferable and are continuous, and when compared with the City Inspector in Melbourne the difference is remarkable. He receives £325 per annum; his hours are 9 till 4. No Bread Act, no Coal Act, no departmental verifications to conduct, no expense or legal responsibility; about four weighbridges to control; the council provide horse and vehicle, with driver, two assistants, and his districts covers one square mile, while in my case I have over 800 miles of streets to traverse and some 60 or 70 weighbridges to attend to, beside the other multitude of duties to carry out and supervise. I would therefore ask your consideration to the equitable nature of my contention, and that before action be taken in this direction some fair and reasonable equivalent be made to me for so serious a reduction in my means as the deprivation of quarters, fees, and salary will cause. I respectfully would add that the fees do not present so formidable an objection as the half-fines system, as the inference is objectionable and the inducement to pernicious prosecutions is palpable. A regular salary sufficient to well remunerate an inspector should be more distinctly creditable and free him from aspirations of self interest and greed.

Section 6

The lists of tolerance are those recognised by the Imperial Acts, and might well be accepted. Complaints should be lodged in three days.

Sections 7 and 8.—Weights and Measures.

These regulations embody most of those as applied by me under the Act, and a copy of which was handed to Mr. Macfarlane by me at his request.

Schedule A.—This form of requisition does not appear to be requisite for office work, as if brought there the appliances are subject to the conditions of the office regulations, but might well be applied to out-door verifications if my suggested regulations thereon be adopted.

Schedule B.—These appear to be in accord with the practices laid down by the Imperial Acts, and may well be adopted.

No. 63.

Mr. R. Wedderburn to The Minister of Justice.

Sir,

226, Sussex street, Sydney, 30 August, 1893.

I have the honor to solicit your attention to the following statement:—

On Monday, the 21st instant, I called on Mr. Evans, Inspector of Weights and Measures, and asked him if he would call later on at my shop to examine five (5) machines, one of which was for a Government Department, the other four (4) for Mr. Millan, of Sussex-street, my motive being to give Mr. Evans three (3) days' notice that I would send for him so soon as I was ready.

On the following Friday I called accordingly, renewing my request, and offering to take any of his own weights Mr. Evans might require to use at my shop, of which offer he availed himself. He came at 11.15 a.m. of that day, and passed all five (5) machines as correct, which operation occupied him fifteen (15) minutes at the outside. He made out five (5) certificates, viz., one (1) for the Government machine (No. B 849, which I now hold), and four (4) for those of Mr. Millan, and demanded for the latter 4s., 4s., 3s. 6d., and 3s. respectively as his fee. I declined to pay same, and he then refused to give me these documents, which I required as certificates of his having passed the machine as correct.

I asked Mr. Evans by what right he charged these fees in face of the fact that Mr. Whittingdale Johnson, S.M., had decided at the Newtown Police Court that he had no legal right to do so. Mr. Evans' reply was, "If I had known I was not to be paid, I would not have come out of my office." I asked him, "How many times do you require to be paid; what do you get £300 a year for?" Mr. Evans then left, taking with him the certificates, saying, "I will not come out of my office again for any weighing-machine."

You, sir, will doubtless remember that the Board of Inquiry found that Mr. Evans systematically charged illegal fees, which went into his own pocket, and I feel it my duty to bring to your official notice the fact that he still continues this practice.

I pray, therefore, that you may be pleased to direct that Mr. Evans is to give me the four (4) certificates in question without payment of the fees he claims; and, furthermore, I venture to express the hope that Mr. Evans may be instructed to discontinue these exorbitant and illegal charges.

I have, &c.,

ROBERT WEDDERBURN.

Mr. Macfarlane for report, in first instance, and suggestion.—T.E.M.N., 31. I suggest that this letter be referred to Mr. Evans for report.—W.M.M., 5/9/93. Submitted.—A.C.F., 5/9/93. Urgent—Mr. Evans for report.—R.E.O.C., 5/9/93. The Inspector of Weights and Measures, Metropolitan District.—T.E.M.N. (for U.S.), B.C., 5/9/93.

No. 64.

Mr. R. Wedderburn to The Minister of Justice.

Sir,

226, Sussex-street, Sydney, 5 September, 1893.

On the 30th ultimo I wrote you relative to the Inspector of Weights and Measures, and am still without any acknowledgment of my communication.

My customer refuses to pay for the work I have done unless I furnish him with the Inspector's certificates. The Inspector refuses to give me said documents unless I pay the fees he demands.

Will you, therefore, be pleased to reply with the least possible delay to inform me whether I am obliged to pay the Inspector the fees in question or not?

I have, &c.,

ROBERT WEDDERBURN,

pro R. W. HALKETT.

The Chief Emergency Officer, and Inspector of Petty Sessions Offices, for perusal and any remarks he may think necessary.—T.E.M.N., 14/9/93.

No. 65.

The Metropolitan Inspector of Weights and Measures to The Under Secretary of Justice.

Sir,

Weights and Measures Office, Sydney, 8 September, 1893.

Referring to your B.C. communication of the 5th instant, No. 13,553, in which I am requested to report on two letters of complaint from Mr. R. Wedderburn, I have the honor to state as follows:—

Mr. R. Wedderburn complains:

1. That I examined four weighing-machines at his shop for Mr. Millan (? Milne), of Sussex-street, and refused to hand him certificates for same until certain fees were paid.

2. That I had no right to charge any fees in view of a decision of Mr. Whittingdale Johnson, S.M., at Newtown Police Court, and seeing that I receive £300 per annum from the Department of Justice for performing this work and issuing these certificates.

3. That the Board of Inquiry found that I systematically charged illegal fees, which went into my own pocket, and that I still continue this practice.

4. Mr. Wedderburn asks that I may be compelled to hand him the four certificates in question without payments by him of any fee, and that the Department will inform him whether he is obliged to pay the Inspector the fees in question or not.

In Reply.

1. I append correspondence between Messrs. Milne and myself, showing that they made an agreement with Mr. Wedderburn for the repair of four weighing-machines, subject to my approval. I charged Mr. Wedderburn the usual fees on comparison and stamping of the weights of these machines, and on his declining to pay them I refused to issue certificates for them. It is to be noted that the work was performed at the request of Mr. Wedderburn on the tacit understanding that the usual fees were to be paid, nothing being said to the contrary until it was completed.

2. The opinion of Mr. Whittingdale Johnson, S.M., to which Mr. Wedderburn refers, was to the effect that under the 8th section of the Act 16 Victoria, No. 34, a 224 lb. weight did not require inspection and stamping. The matter of charging fees or issuing certificates was not then raised, nor has it at any time been brought forward in court. With regard to my salary of £300 per annum, I submit that this is paid to me for services rendered in carrying out my duties as Inspector, as set forth in the Acts 16 Victoria, No. 34, 9 Victoria, No. 8, and 10 Victoria, No. 2. If, as I am advised, fees are exigible for the service I performed for Mr. Wedderburn, he has no cause for complaint; and if such fees are not exigible, the service rendered is outside the duties devolving upon me under the Act, and I cannot legally be compelled to perform it. The Minister of Justice in his minute of 25th July, 1893, says:—"Some of the charges referred to are apparently not authorised by the Act, but they are all for services rendered, and, having regard to the nature of these services and to the charges for similar services in England and elsewhere, are not unreasonable. I doubt whether Mr. Evans could have borne the expense of carrying out his duties efficiently if he had not imposed these charges." I would point out that I have not yet been relieved of the expense of carrying on this office or of the responsibilities imposed upon me by the Act, and it would appear that it is only when the Department assumes these that reductions can be made in my present scale of charges, which are, however, if illegal, subject to the appeal indicated in section 16 (16 Victoria, No. 34).

3. "That the Board of Inquiry found that I systematically charged illegal fees which went into my own pocket," is absolutely untrue, as after a careful perusal of the printed report, I can only find that the Board have committed themselves to three opinions referring respectively to (a) issue of approval tickets; (b) equalisation of weights; (c) letter written to Mr. S. Harper. The question of the fees going into my own pocket has been dealt with by the Minister, who says in the minute above referred to that I could not "have borne the charges incidental to the working of my office if they had not been imposed."

4. With regard to Mr. Wedderburn's request that I may be compelled to hand him the certificates in question without payment of the fees by him—I submit that such a direction from the Department would amount to a direct opinion that my charges are illegal, and would be contrary to the decision of the Minister regarding them. If Mr. Wedderburn desires confirmation of the opinion he evidently holds, and which I am fully prepared to contest, he should hardly seek it at the hands of the Department which claims me as its officer, and to which I on that account look for assistance and protection. I append an extract from the *Workman* newspaper of the 2nd instant, from which it would appear that Mr. Wedderburn having already sought legal advice is desirous of strengthening the case as stated by his solicitor by an opinion gratuitously obtained from the Department of Justice.

I have, &c.,

JAMES W. EVANS,
Metropolitan Inspector of Weights and Measures.

[Enclosures.]

(A.)

Milne Brothers, Sydney Copper and Brass Works, 166, Sussex-street, Sydney, 29 August, 1893.

Dear Sir,

We have recently had four sets of platform scales repaired and adjusted by R. Wedderburn, Sussex-street, and we would like to know if it is necessary for us to get a certificate from you?

Yours sincerely,

MILNE BROTHERS,
per A. W.

Mr. J. W. Evans,
Inspector of Weights and Measures, 110, Bathurst-street.

(B.)

Memo. from J. W. Evans to Messrs. Milne Bros., 166, Sussex-street.

1 September, 1893.

Gentlemen,
In reply to your memo. of the 29th August, the necessity for a certificate for weighing-machines depends upon your own wishes and the arrangements made with the scalemakers you employ.

In any case the usual fee will be charged for services rendered in comparing the weights with the machine as aliquot weights.

If certificates are requested, they can be obtained in the usual manner on submitting the appliances at this office.

(C.)

Milne Brothers, Sydney Copper and Brass Works,

166, Sussex-street, Sydney, 4 September, 1893.

Dear Sir,

Replying to yours of 1st instant, we must insist upon these certificates, as this was part of our order to Mr. Wedderburn, scalemaker, of Sussex-street. If there are any fees, he should pay same.

For our own information you might let us know what are the fees due by Mr. Wedderburn. We shall write him about same.

Yours, &c.,

MILNE BROS.

Mr. J. W. Evans, Inspector of Weights and Measures, 110, Bathurst-street.

(D.)

CUTTING from the "*Workman*" Newspaper, 2nd September, 1893.

THE INSPECTOR OF WEIGHTS AND MEASURES.

ONE of our city scalemakers has forwarded the following letter to the Minister of Justice:—

Sir,

"226, Sussex-street, Sydney, 30 August, 1893.

I have the honor to solicit your attention to the following statement:—

On Monday, the 21st instant, I called on Mr. Evans, Inspector of Weights and Measures, and asked him if he would call later on at my shop to examine five machines, one of which was for a Government Department, the other four for Mr. Milne, of Sussex-street, my motive being to give Mr. Evans three days' notice that I would send for him as soon as I was ready.

On the following Friday I called accordingly, renewing my request, and offering to take any of his own weights Mr. Evans might require to use at my shop, of which offer he availed himself. He came at 11.15 a.m. of that day, and passed all five machines as correct, which operation occupied him fifteen minutes at the outside. He made out five certificates, viz., one for the Government machine—No. B 849, which I now hold—and four for those of Mr. Milne, and demanded for the latter 4s., 4s., 3s. 6d., and 3s. respectively as his fees. I declined to pay same, and he then refused to give me these documents, which I required as certificates of his having passed the machines as correct.

I asked Mr. Evans by what right he charged these fees, in the face of the fact that Mr. Whittingdale Johnson, S.M., had decided at the Newtown Police Court that he had no legal right to do so. Mr. Evans' reply was, 'If I had known I was not to be paid I would not have come out of my office.' I asked him 'How many times do you require to be paid—what do you get £300 a year for?' Mr. Evans then left, taking with him the certificates, saying, 'I will not come out of my office again for any weighing-machine.'

You, sir, will doubtless remember that the Board of Inquiry found that Mr. Evans systematically charged illegal fees which went into his own pocket, and I feel it my duty to bring to your official notice the fact that he still continues this practice."

No reply has, so far, been received to this communication, but the scalemakers of the city have obtained legal advice from Mr. W. F. Brennan, solicitor, of Pitt-street, with reference to the matter, on which they intend to act. Though it is impossible by legal process to force Mr. Evans to give certificates, he cannot, we understand, having given them, sue for any fees for so doing. Some cases in which he has obtained fees not provided for by the Act will be tested in the law courts.

No. 66.

The Under Secretary of Justice to The Metropolitan Inspector and Weights and Measures.

Sir,

Department of Justice, Sydney, 6 October, 1893.

Referring to your report dated the 8th ultimo upon Mr. R. Wedderburn's complaint that you refused to issue certificates for certain weighing-machines which you had examined, until fees had been paid, I am directed by the Minister of Justice to ask you to state whether you still continue to charge fees for examining weighing-machines, and, if so, what way the fees have been appropriated?

I have, &c.,

ARCH. C. FRASER,

Under Secretary.

No. 67.

No. 67.

The Metropolitan Inspector of Weights and Measures to The Under Secretary of Justice.

Sir,

110, Bathurst-street, Sydney, 10 October, 1893.

Referring to your letter dated the 6th inst. in which I am asked whether I still continue to charge fees for examining weighing-machines, and, if so, in what way have the fees been appropriated, I have the honor to report that I am still continuing the practice carried out by me during the past ten years, as also that of my predecessors years antecedent to that. No charge is made for weighing-machines, but simply for examining, comparing, and stamping the weights under section 16 of the Weights and Measures Act and the 2nd Schedule thereto. I have made no change in the fees or charges, nor in the manner of their appropriation. No directions have been issued by your Department or by the Stipendiary Bench of Magistrates, nor has the scope of the proposed new regulations been finally decided upon.

The Minister of Justice in his minute on the recent inquiry outlined a new system of administration and stated, "I would call the attention of the Metropolitan Bench of Magistrates to the urgent necessity for the change." No instructions have yet reached me nor has the Act been superseded. And, indeed, when I asked the Chairman of the Bench what course I was to pursue, he said I was to continue the same way as I had done since my appointment, and until instructed to the contrary.

Certainly, I have been consulted by the Department in regard to the proposed changes, but matters are practically in the old position. My salary and my expenses are the same. I am not provided with assistance or forage, my responsibilities and the scope and nature of my duties remain the same, and in the absence of instructions to the contrary and due provision for the carrying on of the office I have still continued to charge fees which I contend are legally exigible. The Metropolitan Bench has not instructed me to act differently, and the only way I had any knowledge of the Minister's minute was by the press reports, until some days after its publication a personal application to the Under Secretary of Justice for a copy procured for me one under cover of a memo. without any instructions. Till the system proposed has been arranged I cannot without stultifying the procedure I have followed ever since my appointment consistently make any change, and so convinced am I of the soundness and legality of my position in charging these fees, which Messrs. Wedderburn now object to, that I am quite prepared if the Department give me permission to take legal steps to compel the payment of some £9 and £3 8s. now owing to me as fees which sums have been obtained from the public on my account and now withheld from me. I submit that every action taken by me has been the result of careful consideration and advice from counsel and solicitor, and acceded to for many years, and has never been appealed against by the proper legal means within the Act, and that till this be done the custom of this office might be upheld pending the reorganisation of it.

I have, &c.,

JAMES W. EVANS,

Metropolitan Inspector Weights and Measures.

Mr. W. Macfarlane.—In connection with previous papers.—S.H. (for U.S.), 14/10/93.

Very urgent attention is specially invited to the terms of this letter, more particularly the portions I have underlined with pencil. This document should I suggest be considered with Mr. Evans' comments upon the draft regulations submitted to him by the Department upon which I yesterday placed a memo.—W.M.M. (E. Maitland), 18/10/93.

No. 68.

Mr. R. Wedderburn to The Minister of Justice.

Sir,

226, Sussex-street, Sydney, 10 October, 1893.

I beg to bring before your notice the manner in which I am being scourged by the Inspector of Weights and Measures in regard to his action towards me, as I think it nigh time some check was put on the Inspector as regards the charges he is trying to impose on me. My complaint is: I sold a new steelyard, and was wishing to have it tested by the Standard weights, sent the same to the office by my lad at half-past 10 a.m. on the 6th of this month. As Mr. Evans was out the steelyard was left at his office. I went up for them later on, and asked Mr. Evans if he had done my steelyard, and he said, "I would have done them only I did not know who they were for." I said, "Will you please do them now." He said, "Yes; if you pay me the usual fee." I told him I did not want them stamped, but as one of the public I requested him to test them. He positively refused to touch them without I paid him the fee. I told him then he had no right to charge me a usual fee for testing steelyards, as it was not in the Act empowering him to make a charge. I told him I did not require a certificate, or him to stamp them, but to test them, which he refused to do.

I am under the impression that I, as one of the public, have a right to the use of the Standards for the purpose of testing, which I think is clearly shown that they are for the use of the public at any reasonable hours.

I most urgently ask you to afford me some measure of protection in regard to this officer's dealing with me in carrying out the duties of his office, as I do not wish to be a party to any charge or extortionate fees, which is not mentioned in the Act.

Trusting that I will get some justice in connection with my case,

I remain, &c.,

R. WEDDERBURN.

Referred to Mr. Evans for perusal and any remarks he may wish to make before submitting same. The Metropolitan Inspector of Weights and Measures.—S.H. (for the U.S.).—B.C., 14th Oct., 1893.

No. 69.

The Under Secretary of Justice to Mr. R. Wedderburn.

Sir,

Department of Justice, Sydney, 11 October, 1893.

I have the honor to acknowledge the receipt of your letter of the 10th instant, further complaining of Mr. Evans, Metropolitan Inspector of Weights and Measures, and to inform you that the same will receive due consideration.

I have, &c.,

ARCH. C. FRASER,
Under Secretary.

No. 70.

The Metropolitan Inspector of Weights and Measures to the Under Secretary of Justice.

Sir,

110, Bathurst-street, Sydney, 21 October, 1893.

Referring to your B.C. communication of the 14th instant, forwarding for my perusal and any remarks I might wish to make a further complaint from Mr. R. Wedderburn, that I refused to test a steelyard for him without payment of the "usual fee."

I have the honor to report that, as in my last communication to you upon a similar complaint from the same person, I am following the practice adopted for years past, and, pending the inauguration of the proposed new regulations, and which embody the same principle, the usual course must be followed. Mr. Wedderburn himself speaks of the fee as "a usual fee," and if, as he contends, the testing of steelyards does not come within the scope of the Act, what necessity is there for testing them? But if he considered it necessary, as he admits he did, that the steelyard should be tested, then I hold that under the 6th and 16th sections of the Act I have the right to demand a fee for every standard weight used in testing. In one case or the other, Mr. Wedderburn, on his own showing, must be wrong. Further, he has charged and received these very fees as separate items in his accounts to clients, and withholds a considerable sum now due to me as fees. Neither Mr. Wedderburn or other persons have a right to the use of the Standards for testing as he assumes.

The Inspector is the only one authorised, and at the inquiry Mr. Wedderburn protested against my assistants using them, even under my personal supervision, and the Act all through makes it clear a fee shall be paid for every comparison made.

I would also add that the working Standards of the scalemakers have always been tested and reverified at this office free of charge, hence if the steelyards did not need stamping the necessity to come to this office did not arise.

Mr. Wedderburn's complaint that he is "scourged" by me and seeking "protection" should more correctly come from me as the following will clearly show, for on the date referred to a cunningly devised trap was laid for me. The Messrs. Wedderburn (2) called in the forenoon, but seeing two persons in the inner office, simply got a small weight tested and left. In the afternoon the three Wedderburns came in. A gentleman named Slater was within my office whom they did not see, imagining that I was alone—and on my declining to test without the usual fee—abused me in unmeasured terms, making use of obscene and profane language, threatened me with the wrath of the Minister of Justice and members of Parliament, using strong and even threatening language to me. After enduring this conduct for some time, I then asked Mr. Slater if he would come and identify these persons; directly he came out the steelyards was hurriedly seized, thrown into the cart, Mr. Wedderburn declaring that he would make it ——— hot for me. My wife and daughter, with another lady, were standing in the hall, alarmed at the noise they heard and the threats used to me. Mr. Slater is a man of independent means and has made a statement (herewith) and is willing to wait upon you and state what then transpired. The records of your Department will show that both of my predecessors in this office beside myself have been repeatedly subjected to this kind of treatment from Mr. R. Wedderburn, while I have always treated him with deference and consideration.

I have, &c.,

JAMES W. EVANS,
Metropolitan Inspector Weights and Measures.

[Enclosure.]

Weights and Measures Office, Bathurst-street, 6 October, 1893.

I was in Mr. Evans' office (Inspector of Weights and Measures) on Friday afternoon on private business with him, when three persons came into the front office asking Mr. Evans to test a pair of steelyards they had brought. Mr. Evans told them "he would test them if they paid him for doing so." They refused to pay anything, telling him that as he was paid £300 per annum to do it that it was illegal for him to charge.

The persons referred to above I found out afterwards to be Mr. R. Wedderburn, his brother, and nephew. I was quite shocked to hear the abuse and insulting language used by Mr. Wedderburn, senior, towards Mr. Evans, and I think that Mr. Evans showed a laudable amount of patience in the trial he was subjected to, and indeed to me it seemed as if they came on purpose to insult him or for some other motive. What appeared to me to be very strange conduct on the part of Mr. Wedderburn was that as soon as Mr. Evans asked me to come into the front office they appeared quite thunderstruck, and immediately left the premises. I heard (when asked to witness) Mr. Evans tell Mr. Wedderburn that there was nothing in the Act either to compel or to warrant him to stamp them, consequently it was not necessary, except when desired, and if so the schedule rates would be charged. I made this record at the request of Mr. Evans at the time.

THOS. SLATER,

7 North-street, Leichhardt.

No. 71.

The Under Secretary for Finance and Trade to The Under Secretary of Justice.

Sir,

The Treasury, New South Wales, Sydney, 3 October, 1893.

With reference to your letter of 23rd August last, 93-11,877, forwarding copy minute by the Minister of Justice on the subject of the working of the Weights and Measures Department and the charges against

against the Inspector, I am directed to state that, as in terms of such minute (page 8) Mr. Evans is to be a collector of public moneys, the Treasury would be glad of an intimation as to the exact date from which he becomes liable to the revenue for his collections.

I have, &c.,

F. KIRKPATRICK,
Under Secretary for Finance and Trade.

Acknowledge, and inform that a further communication will be addressed when the matter has been definitely settled.—A.C.F., 19/10/93.

The Treasury might be informed that on and after the 1st December next Mr. Evans will be held responsible for his collections, and might at the same time be supplied with a copy of rule 16, as approved by the Minister, in connection with the working of the Weights and Measures Office, and asked to supply Mr. Evans with necessary instructions respecting the manner in which his duties as a collector of public revenue should be carried out.—A.C.F., 23/11/93.

No. 72.

The Under Secretary of Justice to The Under Secretary for Finance and Trade.

Sir,

Department of Justice, Sydney, 19 October, 1893.

Referring to your letter of the 3rd instant, in which you ask to be informed of the date upon which Mr. Evans, Metropolitan Inspector of Weights and Measures, becomes liable to the revenue for his collections, I have the honor to inform you that when the matter has been definitely settled the information will be communicated to you in due course.

I have, &c.,

ARCH. C. FRASER,
Under Secretary.

No. 73.

Minute of The Under Secretary of Justice.

Submitted.

Department of Justice, Sydney, 17 November, 1893.

A COPY of the Minister's minute of the 25th July last, respecting the administration of the Weights and Measures Office was, on the 27th idem., sent to the stipendiary magistrates, and on the 3rd August last a copy was supplied to Mr. Evans under cover of an official memo.

On 7th August the stipendiary magistrates were asked whether they had any objection to Mr. Evans being retained in his present position on the terms specified in the Minister's minute. A reply was received intimating that the stipendiary magistrates had no objection to Mr. Evans being so retained, and a letter was sent on the 16th August to Mr. Evans, apprising him of the reply received from the stipendiary magistrates.

On the 5th September a draft of proposed regulations (drawn up by Mr. Macfarlane) for the working of the Weights and Measures Office, was forwarded to Mr. Evans for perusal and for any further suggestions he might think necessary. Mr. Evans replied on the 5th October, submitting an amended code of regulations, and pointing out certain objections to those drawn up by Mr. Macfarlane.

After carefully weighing the objections raised by Mr. Evans, and considering the additional rules suggested by him, I would submit the following regulations for the Minister's consideration:—

Rule 1. The Weights and Measures Office shall be open daily to the public from 9 a.m. till 4.30 p.m., except on Saturdays, when it will be closed at 12 noon.

Rule 2. The Inspector shall be in attendance at his office during office hours unless engaged on outside duties, and shall for the convenience of the public regularly attend from 9.30 till 11 a.m. each day, except Saturday, and also from 3 till 4.30 p.m. on Fridays. If unable to attend at the hours mentioned he shall arrange to be in attendance for a similar period of time as early in the day as possible.

It was proposed by Mr. Macfarlane that the Inspector should always be at his office from 9 a.m. till 11 a.m.; but it was pointed out by Mr. Evans that 9.30 would be more suitable, as books and letters would require to be attended to, and early morning work (presumably going round amongst bakers and others) might prevent his punctual attendance at 9. Occasions must also arise when the Inspector could not be in attendance at the hours mentioned, as, for instance, when conducting prosecutions before the courts.

Rule 3. The Inspector shall inspect all public weighbridges once at least in every three months, and shall at the end of each quarter furnish a return giving the dates when such weighbridges were last inspected and also when last tested. This information may be attached to the monthly return furnished under rule 15, on 1st April, 1st July, 1st October, and 1st January in each year.

It was proposed by Mr. Macfarlane that the Inspector should also properly test up to 4 tons, every public weighbridge, once at least in every six months, but for the reasons given by Mr. Evans, such a practice would not appear to be desirable. It is clearly the duty of owners to have their weighbridges periodically tested. Messrs. A. Kethel and J. M. Raison (Manager of the McIlwraith and Street's Wharf) gave evidence before the Board that they had their weighbridges tested by Mr. Evans every three months for which they paid a fee. Should an owner run the risk of not having his public weighbridge tested at reasonable intervals, the necessity for an official test being made might well be left to the Inspector to decide, and by means of the suggested quarterly return, the Department can satisfy itself that every attention is given by the Inspector to this important work.

Rule 4. The Inspector shall test all weighing instruments submitted to him at his office, if requested in writing so to do, in the form contained in Schedule A, and for such services shall make the following charges:—

	s.	d.
Counter scales, uniform rate	0	6
Steelyards (per 100 lb. or fraction thereof)	0	6
Weighing machines, per cwt. or fraction thereof	0	6
Maximum fee, 10s.; minimum, 2s.		
Troy weights:		
1,000 oz. to 200 oz. inclusive, each.....	1	0
Under 200 oz. to 20 oz. each	0	6
Under 20 oz. to 1 oz. each	0	3
Under 1 oz. to 1 grain each	0	1

The

The Inspector shall not test weighing instruments away from his office, except for the purposes of inspection, unless they are built in or so constructed and fixed as to be immovable, and unless he receive a written request so to do, in the form contained in Schedule B. The owners shall in such cases provide necessary cartage and labour, and shall in addition pay the following fees:—

	£	s.	d.
Weighbridges	1	1	0
Weighing-machines, per cwt. or fraction thereof	0	0	9
Maximum fee, 15s. ; minimum, 5s.			

It would appear reasonable that if the Inspector is required to attend at owners' premises for the purpose of testing instruments an increased fee should be paid; I have therefore suggested 9d. per cwt. for testing weighing-machines as against 6d. per cwt. for those tested at the office.

Rule 5. All weighing instruments, weights and measures, submitted to the Inspector must be thoroughly clean and all painted parts dry.

Rule 6. All fees must be paid before the material is removed from the office. Outdoor services must be paid for on completion of the work.

Rule 7. The Inspector shall, if required, certify in writing as to the accuracy of any weighing instrument tested by him, provided however that the question of quality and fitness of any appliance submitted, shall rest with the Inspector, and he may refuse to give a certificate for any such material as would in his opinion tend to the perpetration of fraud. A record of such, and the cause of rejection shall, however, be kept in a book to be provided for the purpose.

Rule 8. The examining, comparing, and stamping of any weighing instrument or material connected therewith, when done at the owner's request, shall be paid for at the rate mentioned in the second schedule to the Act, in addition to which the owners shall, if required, provide necessary cartage and labour.

Rules 7 and 8 have been framed from suggestions made by the Inspector. It may be mentioned, in connection with Rule 7, that many weighing appliances are made of faulty material, and, being rejected in England, are shipped to the colonies and there distributed. Mr. Evans has, in the past, refused to stamp bad material, and the practice is one that it would be well to continue.

Under the English Act provision is made for prohibiting the stamping of any weights, measures, and weighing and measuring instruments, in cases where the material or mode of construction appears likely to facilitate the commission of fraud.

The object of Rule 8 is to enable the Inspector to charge without question for services rendered in connection with the examining and stamping (when done at the owner's request) of weighing-machines, or, more correctly, the slip-weights attached to such machines.

A large number of convictions were obtained against persons for using unstamped slip-weights; but recently Mr. Johnson, S.M., decided that such weights were component parts of the machine, and were not weights within the meaning of the Act.

It is, however, probable that, as the custom of having these weights stamped has been so thoroughly established, many persons, before using a new machine, will, as a guarantee of its correctness, require that the weights should be stamped by the Inspector.

Rule 9. The Inspector shall not adjust or repair weights or weighing appliances, provided, however, that at the first verification of new weighing instruments, the slip-weights, or counterpoise, or balance may be restored, and new weights (if a small fraction in excess) may, prior to being stamped, be lightened by the Inspector free of charge.

The proviso contained in Rule 9 is the result of a suggestion made by the Inspector, and special attention is invited to this matter, as it may perhaps be considered to be contrary to the terms specified in the Minister's minute.

It is understood from the Inspector, as frequently occurring, that some very slight adjustment is necessary with perfectly new material, in order that the same may be made to agree with the standards of the Colony, and the practice now suggested is followed both in Melbourne and Adelaide. The service thus rendered, though in itself very trifling, would be a great benefit to the public, and would save them much delay and expense.

It will be noticed that the Board of Inquiry considered it to be imperative for the Inspector to add lead to or subtract it from weights (if necessary) prior to stamping.

It does not, however, appear to be clearly so provided by the Act, and it is only proposed that the Inspector should be authorised to lighten weights, when a fraction in excess (it being understood from Mr. Evans that it is customary to make weights a trifle heavy), and then only when the material has never been used, and requires to be stamped.

Rule 10. In the inspection and testing of weights and measures, tolerance for error in excess only, will be allowed to the limit laid down in the attached Schedule C. The tolerance to be allowed in weighing appliances may be roughly averaged at $\frac{1}{1000}$ part of the full carrying capacity.

The tolerance allowed by Rule 10 is understood to be practically the same as that allowed in England.

Rule 11. The Inspector shall be held responsible for the safe custody of all appliances and material placed under his care by the Department, and shall not lend or permit same to be taken from the office except under authority from the Minister. Material or appliances so lent shall still remain under the personal supervision of the Inspector unless he is instructed to the contrary.

Rule 12. No traffic in weighing or measuring material or appliances, by officers employed in the Weights and Measures Office, will be allowed.

Rule 13. Any complaints against the Inspector must be made in writing and forwarded to the Under Secretary of Justice within ten days after the cause of complaint shall have arisen.

The Inspector has suggested a rule to the effect that made up parcels may be tested for weight—without prejudice—if a request to that effect is made by the buyer or seller of such parcel, and a specified fee is paid; but considering the very large district that is placed under the Inspector's supervision, I do not think that any part of his time should be taken up in duties of this nature.

The Inspector has also suggested that fees should be charged only when appliances submitted are stamped or otherwise approved of. It would, however, appear to me that the effect of such a rule would be to throw a large amount of unremunerative work upon the Inspector, and there is a possibility of a large proportion of his time being absorbed in testing machines (which is, after all, a duty that any competent scalemaker, having verified copies of the Standards, should be able to perform), and his inspecting duties being, in consequence, somewhat neglected.

With

With regard to the fees provided by the Act for examining, comparing, and stamping, the service would appear to be indivisible, and if the material submitted is examined and compared, and being found faulty is not stamped, no charge, it is thought, could be made.

Rule 14. The cost of making special or official tests of weighbridges and weighing-machines of heavy carrying capacity (when thought necessary by the Inspector) shall be defrayed by the Department; but no expenditure in this respect shall be incurred without the authority of the Under Secretary in each case.

Rule 15. The Inspector shall cause a book to be kept showing the nature and class of work done in the office, and giving particulars of instruments and material verified or tested. He shall also keep a record of outside duties performed, and shall furnish the Department with a return not later than the seventh day of each month, showing number of inspections made during the previous month, number of prosecutions instituted under the Weights and Measures Act, the Bread Act, and the Coal Delivery Act respectively, total amount of fines imposed, amount received by him as moieties of fines, and total amount of fees received in the office from all sources.

It was proposed by Mr. Macfarlane that the Inspector should keep a diary, and note therein daily the duties performed by him, giving the number and nature of inspections made, weighing instruments tested, weights and measures compared, prosecutions instituted, &c., and should forward extracts monthly to the Department; but viewing the various duties performed by the Inspector, many of which can only be regarded as of a semi-detective nature, and bearing in mind the fact that Mr. Evans has in the past proved himself to be a zealous and energetic officer, I am of opinion that Rule 14 in the form suggested by me, will ensure the Department being supplied with all the information that is practically useful, and will at the same time sufficiently answer for purposes of supervision.

Rule 16. The Inspector shall carry out all instructions that may be given to him by the Under Secretary for Finance and Trade in connection with the receipt of and disbursement of revenue.

In connection with Rule 16, the Inspector asks that before action is taken in the direction of depriving him of the fees which have hitherto been received by every inspector under the Act, some further consideration may be given to the surrounding circumstances of his case, and that a reasonable equivalent may be made to him for the serious reduction in his means, caused by his being deprived of quarters and fees.

It may be mentioned that Mr. Evans, in contemplation of the change about to be effected, applied on the 10th August last for an increase of salary, and it was decided by the Minister that the time is inopportune to deal with the matter, but that the question of his salary shall receive consideration after the new system has been established for three months, and Mr. Evans was so informed on the 23rd idem.

Rule 17. All weights in use for trade must be stamped by an Inspector, and when submitted for stamping shall not be painted unless exceeding 7 lb. They shall have but one hole for plugging and stamping, and the lead shall be firmly fixed and shall not project beyond the surface of the weight.

No copper or brass plugs or rings shall be stamped, nor shall any loose or imperfect attachments be allowed. Load holes for adjustment and stamping shall not be less than $\frac{3}{8}$ of an inch in diameter, and if necessary shall be undercut. Brass weights shall, when requisite, have a plate firmly fixed to the base for the purpose of adjustment. China and porcelain weights shall be well and completely glazed inside and outside. The use of chipped or broken weights shall not be permitted. All denominations of weights shall be distinctly and legibly marked. Iron weights of 56 lb., 28 lb., and 14 lb. respectively may continue in use, though containing more than one adjusting hole, if otherwise correct. If the Inspector consider it inadvisable for the purpose of preventing fraud to re-stamp any weight, he may efface the old stamp and place a "condemnation mark" thereon.

Rule 18. All measures for use shall be stamped by an Inspector. All measures of capacity—not being bell-shaped with funnel-mouths—shall be of parallel form without subdivision lines, and approximate to the copies of the Standards lodged with the Inspector, or of about equal internal diameter and depth. Cone-shaped or tapering measures without bell-mouths are strictly prohibited from use. All measures submitted for stamping shall have their denomination marked upon the outside in legible figures and letters. In all cases new measures shall have plain and even bottoms, shall have a plug of lead or pewter to receive the stamp at top edge, and shall not differ from the Inspector's standards by more than the estimated amounts shown in the annexed Schedule C.

Rules 17 and 18 have been drawn up practically as suggested by Mr. Macfarlane, and as approved by the Inspector.

It may be mentioned that the Inspector has removed his office to the rooms provided for him at the Central Police Court, and it only remains for the Minister to approve of such rules as may appear to him desirable, and to determine the date upon which the new system shall be established.

The question of appointing two assistants, and fixing the sum to be allowed to the Inspector for incidental expenses, may then be considered.

It will be noticed that Mr. Evans, in his letter of the 5th ultimo, forwarding suggestions respecting the proposed regulations, brings under notice his responsibility to the Stipendiary Magistrates, who, he asks, might be invited to give him instructions with reference to his position, and to direct him; and further, that in order to relieve him from any charge of lack of proper official recognition of the Bench of Stipendiary Magistrates, the correspondence might be submitted to them.

It may, however, be pointed out that Mr. Evans was duly informed that the Stipendiary Magistrates had concurred in his being retained on the terms specified in the Minister's minute, the conditions of which are that the scope and nature of his duties, and directions as to their discharge, shall be laid down by this Department, and that he will be expected to strictly follow the directions of the Department in these matters.

It will be seen that in another part of his letter (p. 10) Mr. Evans states that he will do his best in carrying out whatever instructions may be given him by the Department.

SCHEDULE A.

Sir,

Submitted.

In supplement of the within memo, dated the 17th instant, I beg to inform the Minister that the whole question of the Regulations as prepared by Mr. Macfarlane has been laboriously considered during Mr. Macfarlane's absence at Maitland by Mr. Whitfeld and myself, and that this day a conference was held at which Mr. Evans, Mr. Macfarlane, Mr. Whitfeld, and myself were present, the result being that all were unanimous in approving of the Regulations as now submitted. If the Minister approves of these Regulations they might be put in force from the 1st December next. I think it would be expedient that Mr. Evans should not be required to refund any fees which he has received up to this date, or shall receive up to the 1st December, in consideration of the explanations given by him in these papers. The Minister, I understand, agreed that Mr. Evans should receive a forage allowance of £50 per annum. Endeavour is being made by the Department to secure for him the use of the stables at the Central Police Court, now used by the police as a carpenter's shop. In the event of this being unsuccessful it will be a matter for future consideration whether he should be allowed to rent premises at the expense of the Government. The Minister has approved of a small amount being allowed to Mr. Evans for incidental expenses. I would suggest that £30 per annum would be a fair allowance. It is advisable that in order to enable Mr. Evans to carry out the new system the two assistants promised to him should be appointed at once, and it seems only fair that he should have the nomination of these men. He mentions that he desires that the two assistants who have hitherto done the work for him should be appointed, namely, Messrs. Patterson and Blakeney, at the rates of remuneration authorised by the Minister, namely, £2 and £1 per week respectively. The only matter now remaining to be dealt with would be the complaints of Mr. Wedderburn, which I propose to make the subject of another memorandum. I may mention that I have read this memorandum to Mr. Macfarlane, who was Chairman of the Board of Inquiry, and he thinks it meets the merits of the case.

A.C.F., 22/11/93.

I approve of the suggestions in this memorandum.—R.E.O'C., 23/11/93.

No. 74.

Mr. R. Wedderburn to The Minister of Justice.

Sir,

226, Sussex-street, Sydney, 12 November, 1893.

I wish to bring before your notice that I have written to you on several occasions in reference to the grievances against the Inspector of Weights and Measures. I may state that writing those letters was the outcome of a series of complaints, and as such I was under the impression they would have been ventilated, but from what has been done in the matter they seem to have been totally ignored.

I have been patiently waiting to know if any action has been taken in reference to the Inspector's prosecuting Mr. Noble, of Enmore, on purpose, as was sworn at Newtown Police Court, for Evans to get at me. Also, with regard to the letters that I have written concerning the firms who have refused to give me the work on account of the statement made by Evans to them.

I should like to know if any law has been passed, or if Mr. Evans has any authority to charge fees not mentioned in the Act, as I find Mr. Evans still charges for passing these machines, which you yourself, on my last visit, admitted was wrong. Surely some check can be put on this officer charging fees which are not in the Act; and has he the power to make a law to suit his own pocket?

I should like to bring under your notice the fact that Charles Blakeney, who was acting as clerk and assistant before the inquiry, and who was one of the sellers of tickets to place on scales which were never tested left Mr. Evans' service during the inquiry, and who I and others stated was incompetent to perform the duties of Assistant Inspector. I would like to ask has he been reappointed by the Department of Justice, as he is again performing duties in the office? If not appointed by your Department, is it right for Mr. Evans to have whom he thinks proper to fulfil the duties in his office? I still wish to press on your mind that the action of my giving evidence at the inquiry has been the means of ruining my business. If such is the reward for stating the truth, I must emphatically state that had I known what the result of the inquiry would be, I should have protected myself with silence in reference to the actions of this man. I should like to ask if the retaining of this Inspector is a menace to myself and family after struggling for a business this last seventeen years in Sydney? Surely if such a gross evil existed, and by the evidence tendered to the Board at their request was proved to exist, in common justice it is not fair to myself and others who gave evidence to retain the man in the position to injure me, as I have proof, and you have had the statement sworn to in Court. I have refrained from writing before, but my letters being under consideration such a length of time without receiving any communication from the Department, I would like to know, as a citizen, what I have done to cause such delay in reference to my complaint? Am I not to get justice, or is it one-sided?

I

I see by the reports of the House that the papers in connection with the inquiry have been asked for and refused. Surely the charges made and evidence given was conclusive enough for either Mr. Evans to disprove them, or, if failing, such officer should be disqualified from holding the position. I should like to know what protection have I and others got against the machination of the persons who suffered by the exposure, if they are still allowed to retain their positions in the Government service? Hoping you will see the necessity for taking some action to prevent any undue advantage being taken to prevent my gaining a living for myself and family.

I remain, &c.,

ROBERT WEDDERBURN.

No. 75.

The Under Secretary of Justice to Mr. R. Wedderburn.

Sir,

Department of Justice, Sydney, 21 November, 1893.

I have the honor to acknowledge the receipt of your letter of the 12th instant further respecting certain complaints made by you against the Metropolitan Inspector of Weights and Measures, and to inform you that the same will receive due consideration.

I have, &c.,

ARCH. C. FRASER,
Under Secretary.

No. 76.

Minute of The Under Secretary of Justice.

Submitted.

Since the Minister dealt with the complaints against the Inspector of Weights and Measures in his minute of 25th July last, two further complaints have been received in the Department, both from Mr. R. Wedderburn, who has on several occasions previously made complaints against Mr. Evans.

The first complaint, dated 30th August last, is to the effect that Mr. Evans, at Mr. Wedderburn's request, examined four weighing-machines, and then refused to give certificates for them unless he were paid certain fees.

The second complaint, dated 10th October last, is to the effect that Mr. Evans refused to test a steelyard unless he were paid the "usual fee."

Mr. Wedderburn asks that Mr. Evans may be directed to hand him certificates for the machines in question without payment of the fees claimed, and further, that he may be instructed to discontinue making these "exorbitant and illegal charges." He also considers that as one of the public he is entitled to the use of the Standards, free of charge, for the purpose of testing his appliances.

These complaints are similar to those made before the inquiry was held, respecting the action of the Inspector in charging fees for which there appears to be no authority in the Act.

It may be mentioned that there is no provision in the Act for issuing certificates, or for testing steelyards and other weighing appliances.

It is, however, proposed under the new regulations (see Rule 4) to charge for services rendered by the Inspector in testing weighing appliances at the owner's request, and it is not anticipated that any objection will then be made to paying for such services.

It seems probable that the main objection to paying these fees lies in the fact that they are being charged without any clearly expressed legal or departmental authority, and are retained by Mr. Evans for his own personal use.

Mr. Wedderburn's claim to the use of the Standards free of charge for testing purposes, does not appear to be based upon any substantial grounds.

Mr. Evans contends that the fees claimed by him and objected to by Mr. Wedderburn are chargeable under the Act, or, if not, that he has performed services not within the scope of his duties, and is justified in charging for them, and he urges that as he has received no instructions to the contrary and has not been relieved of the expense of carrying on his office, he is entitled, pending the inauguration of the new system (under which similar fees will be charged and placed to consolidated revenue) to continue the practice of charging fees for services rendered. Mr. Evans submits also that a direction from the Department for him to hand over the certificates in question without payment of the fees would amount to a direct opinion that his charges are illegal, and would be contrary to the decision of the Minister respecting them.

In a subsequent letter, dated 10th ultimo, in reply to inquiries made as to the practice being followed by him, Mr. Evans pointed out that until the proposed new system has been arranged he could not, without stultifying the procedure he has followed ever since his appointment, consistently make any change, and stated further that he was so convinced of the soundness and legality of his position in charging the fees which Mr. Wedderburn objects to pay that he was quite prepared, with the permission of the Department, to take legal steps for their recovery.

He submits that the custom of his office might be upheld pending its reorganisation.

Mr. Wedderburn addressed a further communication to the Department on the 12th instant, asking what had been done in connection with the numerous complaints made by him against Mr. Evans, and pointing out that Mr. Charles Blakeney, whom he considers to be incompetent to fulfil the duties of Assistant Inspector, is at present working in the office, and also that Mr. Evans still charges fees unauthorised by the Act.

Mr. Wedderburn specifies particularly certain complaints made by him concerning disparaging statements made by Mr. Evans to certain firms, and also a statement made by him in connection with the prosecution of Mr. Noble.

These matters were duly considered and dealt with by the Minister in his minute of 25th July last.

It is suggested that Mr. Wedderburn might be supplied with a copy of that minute from which he will see the manner in which the complaints made by him prior to 25th July were dealt with, and in regard to his recent complaints respecting the action of the Inspector in continuing to charge certain fees for testing weighing instruments, that he be informed that the Minister does not consider it necessary to re-open the question

question of these charges, as under the new system, which will come into operation on the 1st December next, it is intended to permit Mr. Evans to charge similar fees, to be paid into the consolidated revenue, for his services, and to issue certificates when requested to do so.

Mr. Wedderburn might be further informed that the public are not entitled to the use of the copies of the Standards, placed in the custody of the Inspector, for the purpose of testing their weighing instruments or material. A.C.F., 24/11/93.

Approved.—R.E.O'C., 27/11/23.

No. 77.

Notice of Motion.

Legislative Assembly.—Tuesday, 3 October, 1893.

Mr. BLACK to move,—That there be laid upon the Table of this House copies of all the correspondence passing between the Minister of Justice and the Inspector of Weights and Measures with reference to the charges brought against that functionary by the scalemakers and others.

In connection with this notice of motion, attention is invited to promises contained in answers to questions on 2nd and 18th May last to have further returns tabled. In fairness to Mr. Evans his reply to the Board's report should be now presented to Parliament, and not merely the documents Mr. Black wishes to have tabled.—A.C.F., 29/9/93. The other papers to be laid upon the table of the House had better be at once prepared.—T.M.S., 3/10/93.

No. 78.

The Under Secretary of Justice to The Under Secretary for Finance and Trade.

Sir,

Department of Justice, Sydney, 25 November, 1893.

Referring to your letter of the 3rd ultimo, asking to be informed of the date from which the Inspector of Weights and Measures will be held liable to the revenue for the fees collected by him, I am directed by the Minister of Justice to apprise you that on and after the 1st December next Mr. Evans will be held responsible for his collections, and to request you to be good enough to cause him to be supplied with the necessary instructions respecting the manner in which his duties as a collector of public revenue should be carried out.

I am directed to forward herewith, for your information, a copy of one of the regulations approved of by the Minister in connection with the working of the Weights and Measures Office.

I have, &c.,

ARCH. C. FRASER,

Under Secretary.

[*Extract from Regulations enclosed.*]

No. 79.

The Under Secretary of Justice to The Acting C.P.S. and Chamber Magistrate,
Water Police Court.

Sir,

Department of Justice, Sydney, 27 November, 1893.

Referring to your letter of the 8th August last, intimating that the Stipendiary Magistrates concurred in Mr. Evans, Metropolitan Inspector of Weights and Measures, being retained in his position, on the terms specified in a minute of the Minister of Justice, dated 25th July last (a copy of which accompanied my letter to you of the 27th idem), I am directed to forward herewith for the information of the Stipendiary Magistrates, a copy of the Regulations which the Minister has approved of, in connection with the working of the Weights and Measures Office, and which will come into operation on the 1st December next.

I am also desired to state that the Minister has approved of Messrs. James Patterson and Charles Blakeney being employed in that office at a remuneration of £2 and £1 per week respectively, from the 1st proximo; and of Mr. Evans being paid, from the same date, an allowance of £50 per annum for forage, and one of £30 per annum for incidental expenses.

I am to add that Mr. Evans has been informed of the changes to be effected in connection with the working of his office.

I have, &c.,

ARCH. C. FRASER,

Under Secretary.

[*Copy of Regulations enclosed.*]

No. 80.

The Under Secretary of Justice to The Metropolitan Inspector of Weights and
Measures.

Sir,

Department of Justice, Sydney, 27 November, 1893.

Referring to my letter of 16th August last, intimating that the Stipendiary Magistrates had concurred in your being retained in your present position on the terms specified in a minute of the Minister of Justice, dated 25th July last (a copy of which was sent to you on the 3rd August), and to my letter of the 5th September and your reply thereto of the 5th ultimo, with reference to certain proposed regulations in connection with the working of your office, I am directed to forward herewith for your information and guidance a copy of the Regulations, which the Minister has approved of, and which will come into operation on the 1st December next.

I

I am to apprise you further that the Minister approves of Messrs. James Patterson and Charles Blakeney being employed in your office at a remuneration of £2 per week and £1 per week respectively from the 1st proximo, and of your being paid from the same date an allowance of £50 per annum for forage and one of £30 per annum for incidental expenses.

I am to add that the stipendiary magistrates have been informed of the changes being effected in connection with the working of your office.

I have &c.,

ARCH. C. FRASER,
Under Secretary.

[*Copy of Regulations enclosed.*]

No. 81.

The Under Secretary of Justice to The Metropolitan Inspector of Weights and Measures.

Sir,

Department of Justice, Sydney, 28 November, 1893.

Referring to your reports of the 8th September last and 21st ultimo, upon two letters received in this Department from Mr. R. Wedderburn, complaining of your action in charging certain fees for examining four weighing-machines, and in refusing to test a steelyard unless paid the "usual fee," I am directed by the Minister of Justice to inform you that a reply has been sent to Mr. Wedderburn to the effect that the Minister does not consider it necessary to re-open the question of these charges, as under the proposed new system of working your office, which will come into operation on the 1st proximo, it is intended to permit you to charge similar fees, to be paid into the consolidated revenue, for your services, and to issue certificates when requested so to do.

Mr. Wedderburn has been further informed that the public are not entitled to the use of the copies of the Standards placed in your charge for the purpose of testing their weighing instruments or material.

I have, &c.,

ARCH. C. FRASER,
Under Secretary.

No. 82.

The Under Secretary of Justice to Mr. R. Wedderburn.

Sir,

Department of Justice, Sydney, 28 November, 1893.

Referring to your letters of the 30th August last and 10th ultimo, complaining of the action of the Inspector of Weights and Measures in charging certain fees for examining four weighing machines, and in refusing to test a steelyard, unless paid the "usual fees," and to your letter of the 12th inst. with reference to the numerous complaints against Mr. Evans made by you on different occasions, I am directed to forward herewith copy of a minute of the Minister of Justice, dated 25th July last, from which you will see the manner in which the complaints made by you prior to that date were dealt with, and to inform you that, in regard to your recent complaints respecting the action of the Inspector in continuing to charge certain fees for testing weighing instruments, the Minister does not consider it necessary to reopen the question of these charges, as under the proposed new system of working the Weights and Measures Office, which will come into operation on the 1st December next, it is intended to permit Mr. Evans to charge similar fees, to be paid into the consolidated revenue, for his services, and to issue certificates when requested so to do.

I am to add that the public are not entitled to the use of the copies of the Standards, placed in the custody of the Inspector, for the purpose of testing their weighing instruments or material.

I have, &c.,

ARCH. C. FRASER,
Under Secretary.

1893.

LEGISLATIVE ASSEMBLY.

1893.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

LUNACY CONVENTION BILL.
(MESSAGE No. 14.)

Ordered by the Legislative Assembly to be printed, 6 December, 1893.

R. W. DUFF,
Governor.

Message No. 14.

In accordance with the provisions contained in the 54th section of the Constitution Act, the Governor recommends for the consideration of the Legislative Assembly the expediency of making provision to meet the requisite expenses in connection with a Bill to further amend the law relating to the insane; to authorise the making of conventions with adjacent colonies in connection therewith; and for the better administration and management of the property of persons incapable of managing their affairs.

*Government House,
Sydney, 28th November, 1893.*

1893.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

INFLUX OF CHINESE.

(CORRESPONDENCE RESPECTING.)

Ordered by the Legislative Assembly to be printed, 8 November, 1893.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 31st October, 1893, That there be laid upon the Table of this House,—

“ Copies of all papers, correspondence, &c., which have passed between this Colony and the neighbouring Colonies during the recent recess, with regard to the alleged influx of Chinese into Australia through New South Wales ports.”

(*Mr. J. D. FitzGerald.*)

Telegram from The Prime Minister of South Australia to The Chief Secretary of New South Wales.

Adelaide, 1 August, 1893.

Customs returns at Port Darwin, showing 700 difference in one year in numbers of Chinese seamen in steamers when bound south and returning, suggest that evasion of Chinese Immigration Restriction Act is systematically practised by placing Chinese passengers on ships' articles. The tonnage limitation is thus evaded under exemption as to crew, and subsequently landing is surreptitiously effected in eastern and southern colonies. We are giving instructions for strictest enforcement of Act, and shall be glad, if not already done, you will do the same. We are also considering question of repealing or altering exemption in favour of crews, and extending Act to Afghans, &c., but we recognise propriety of joint action, and would be favoured by expression of your views.

C. C. KINGSTON,
Premier.

Mr. J. Powell for report.—G.B.D., 2/8/93. The Under Secretary for Finance and Trade.—C.W. (P.U.S.), B.C., 2/8/93. The Collector of Customs.—J.S., B.C., 3/8/93. F.K.

The Prime Minister of South Australia to The Chief Secretary of New South Wales.

Sir, Chief Secretary's Office, Adelaide, 1 August, 1893.

Referring to the telegram which I had the honor to address to you to-day on the subject of the Chinese Immigration Restriction Act, I have the honor to forward herewith a copy of the Customs return from Port Darwin, which I referred to.

It seems to me clear, from a perusal of this document, that the Act is being evaded, and I may add that I have been confidentially advised of cases in which passage money has been collected from Chinese whose names appear on ships' articles.

I have, &c.,
C. C. KINGSTON.

[Enclosure.]

Telegram from The Prime Minister of South Australia to The Chief Secretary
of New South Wales.

Adelaide, 8 August, 1893.

Re Chinese, we shall be glad to hear from you in reply to ours of the 1st instant. We have had assurances from Victoria and Queensland that they are strictly enforcing the Act, and as we are doing the same here, we are forced to the conclusion that the evasion takes place in Sydney. We earnestly request you to adopt stringent measures to prevent a continuance of this practice, and to punish those who have broken the law. The s.s. "Chingtu," which is now on her way south, on her last voyage before 1st May, brought down 125 Chinese on her articles, and took only fifty-five back, showing that seventy must have been smuggled into Australia somewhere. We respectfully suggest that this boat should be strictly watched this trip. May we also ask if New South Wales can make it convenient, fulfil the promise given at the Sydney Chinese Conference in 1888 for the introduction of legislation on the lines of the Bill then agreed to.

C. C. KINGSTON.

Refer to Treasury.—C.W., B.C., 8/8/93. The Under Secretary for Finance and Trade. The Collector of Customs.—F.K., 9/8/93.

Telegram from The Prime Minister of South Australia to The Chief Secretary
of New South Wales.

Adelaide, 9 August, 1893.

WE are still without any answer to our wires of 1st and 8th instant. Further inquiry at Port Darwin makes it apparently perfectly clear that the systematic evasion of the Chinese Immigration Restriction Acts by which nearly 1,000 Chinese have been introduced into Australia during the last fifteen months results from the laxity with which the law is administered in Sydney. Against this we desire to enter our respectful protest and earnest remonstrance in the hope that you will immediately take steps to prevent this wholesale smuggling of Chinese into Australia. Our Customs officers at Port Darwin, through whom we derive our information as to the great discrepancies in the numbers of Chinese on ship articles when bound south, and afterwards returning, report that these arise from the men being discharged by the Shipping Master at Sydney. Your Act, we believe, includes within its restrictive provisions all Chinese seamen who are discharged or landed in your Colony, and should therefore be sufficient, if strictly administered, to prevent the abuse of which we complain. At the same time, whilst availing ourselves of existing legislation to prevent the present evil, we shall be glad to hear that New South Wales is prepared to legislate on the lines agreed to at the Sydney Conference with any necessary modifications. The "Chingtu" has now fifty-one Chinese on her articles, and since the 1st May, the Customs returns at Port Darwin show that by the device as to ships' articles, owing to the laxity referred to, five steamers have introduced 260 Chinese into Australia. These figures are in addition to those previously given. Kindly reply.

C. C. KINGSTON,
Premier.

The Under Secretary for Finance and Trade.—C.W., B.C., 10/8/93. The Collector of Customs.—F.K., B.C., 10/8/93.

The

The Collector of Customs to The Under Secretary for Finance and Trade.

Sir,

Custom-house, Sydney, 10 August, 1893.

I have the honor to report upon two telegraphic messages, addressed by the Honorable C. C. Kingston, Premier of South Australia, to the Honorable Sir G. R. Dibbs, calling attention to alleged evasions of the Chinese Immigration Restriction Act by the placing of Chinese passengers on ships' articles, and thus affording opportunities for the surreptitious and illegal landing of such passengers in the eastern and southern colonies.

The statements contained in the above quoted telegrams are based upon Customs returns furnished at Port Darwin, showing a difference of 700 in one year between the number of Chinese seamen when bound south from Port Darwin, and the number found on board as crew on the return voyage.

As the preceding paragraph contains the main question, I propose to confine myself to an explanation of the causes which have led to the misunderstanding originated at Port Darwin.

As dates are not given in the telegram, I am unable to fix upon the particular year or period the Port Darwin officers have taken to illustrate their suspicion of evasions of the law by Chinese.

I furnish herewith a return showing the arrival of steamships at Sydney from China during one year, dating from 1st July, 1892, to 30th June, 1893, and the return fully supports the statement of the Port Darwin Customs, that a very large number of the Chinese, whose names were on the articles when the ships arrived at Port Darwin on the voyage down were not on board the ships when they returned to that port.

The return shows that during the twelve months, 1st July, 1892, to 30th June, 1893, thirty-four vessels arrived at Sydney from China, and that five only of the vessels brought passengers numbering seventy-two in all, but the thirty-four vessels brought also 2,126 Chinese, whose names appeared on the ships' articles shipped in China as crew. The explanation is that the Queensland Act does not permit any ship to enter a port in that Colony having on board a greater number of Chinese passengers than in the proportion of one Chinese to every 500 tons of the ships' tonnage. The ports of Queensland, by the operation of the Act, became closed to vessels from China bringing more Chinese passengers than one to every 500 tons of their registered tonnage, and vessels having more than that number (for whatever port bound) are unable to call at any Queensland port. In order to obviate this difficulty, all Chinese passengers booked in China for Australia are entered on the ships' articles as crew, unless the vessels are to arrive at Sydney, without calling at Queensland.

As I have explained, the return for twelve months trade herewith shows that thirty-four vessels arrived from China at Sydney with seventy-two Chinese as passengers and 2,126 as crew.

These were disposed of in the manner following:—

Landed at Sydney	40
Left Sydney by the vessels in which they arrived	1,257
As passenger	1
As stevedores	379

Transhipped at Sydney:—

For Melbourne	296
„ Tasmania	137
„ New Zealand	62
„ Queensland	26
Total... ..	2,198

The total number landed in Melbourne from Sydney for the twelve months shown in the return was 676.

By China steamers	379
„ Transshipment at Sydney	296
Passenger	1
Total... ..	676

I have, I hope, succeeded in showing that every Chinese brought to this Colony by ships from China during the period named has been duly accounted for, that there has been no surreptitious landing here, and that the transshipment of Chinese has been effected without injury to the interests of this or the adjoining colonies.

Every Customs clearance issued at Sydney shows the number of Chinese shipped as crew and as passengers, and no Chinese entered for transshipment has been permitted to land here.

I called your attention to this feature of Chinese immigration in a letter dated 1st June, 1893, pointing out that 107 Chinese arrived during the month of May as part of the crews of three steamers from China, and that the men were discharged and transhipped to steamers for intercolonial ports.

There has not been, in my opinion, any infringement of the law in this Colony, and I am sure that the Act has been very strictly administered.

The "Chingtu" case specially referred to in one of the telegrams from the Premier of South Australia can be explained. The statement is, "that the 'Chingtu' (arrived yesterday) brought on her last voyage before 1st May, 125 Chinese on her articles, and took only fifty-five back, showing that seventy-five must have been smuggled somewhere."

The return shows that the "Chingtu" arrived at Sydney on the 1st May, 1893, with 124 Chinese on board as crew. The men were disposed of as follows:—

Landed at Sydney... ..	8
Sailed in ship	69
Transhipped to intercolonial steamers	47
Total	124

The

The Chinese were all accounted for and cleared, so that the other colonies were duly notified by the Customs clearances issued at this port to the vessels by which the men sailed.

I have, &c.,
JAMES POWELL,
Collector of Customs.

P.S.—Since writing the above, I have received a third telegram addressed by the Premier (Adelaide) to the Premier, Sydney. The statements contained in this telegram are similar to those contained in the previous messages.

[Enclosure.]

CHINESE arrived at Sydney direct from China, from 1st July, 1892, to 30th June, 1893 :—

Telegram

Telegram from The Prime Minister of Victoria to The Chief Secretary of New South Wales.

Melbourne, 11 August, 1893.

HAVE received telegrams, and understand you have also, from Premier of South Australia, respecting evasion of Chinese Immigration laws. I at once made inquiries of Customs' authorities, and I find that every care is taken at this port. Mr. Kingston thinks that law may be evaded in New South Wales, and at his earnest request, I join with him in asking you to kindly make inquiries, and if found requisite, to take action with view to prevention.

J. B. PATERSON,
Premier.

Telegram from The Chief Secretary of New South Wales to The Prime Minister of South Australia.

Sydney, 11 August, 1893.

I AM sending by to-night's post a complete report from our Collector of Customs, from which you will gather that there has been a strict scrutiny observed by this Government, and there has been no evasion of the Act.

GEORGE R. DIBBS.

The Chief Secretary of New South Wales to The Prime Minister of South Australia.

Sir, Chief Secretary's Office, Sydney, 11 August, 1893.

In confirmation of my telegram of to-day's date, I have the honor to transmit herewith for your information a copy of a report received from the Collector of Customs of this Colony dealing with the Chinese question, from which you will gather that there has been a strict scrutiny here, and that no evasion of the Chinese Restriction Act has been permitted.

I have, &c.,
GEORGE R. DIBBS.

Telegram from The Chief Secretary of New South Wales to The Prime Minister of Victoria.

Sydney, 11 August, 1893.

I AM sending a report just received from our Collector of Customs dealing with the Chinese question, from which you will gather there has been a strict scrutiny here, and no evasion of the Chinese Act. Am sending similar information to Kingston.

GEORGE R. DIBBS.

The Chief Secretary of New South Wales to The Prime Minister of Victoria.

Sir, Chief Secretary's Office, Sydney, 11 August, 1893.

In confirmation of my telegram of to-day's date, I have the honor to transmit herewith for your information a copy of a report received from the Collector of Customs of this Colony dealing with the Chinese question, from which you will gather that there has been a strict scrutiny here, and that no evasion of the Chinese Restriction Act has been permitted.

Telegram from The Prime Minister of South Australia to The Chief Secretary of New South Wales.

Adelaide, 15 August, 1893.

Re Chinese, the Customs return enclosed in your letter of 11th inst. shows conclusively that we were right in suggesting that Sydney is being made the centre for the distribution of Chinese wholesale throughout Australasia. We respectfully renew our remonstrance against the continuance of this course, and remind you that you do not inform us in any way as to your future intentions. The mischief arises through your permitting Chinese seamen to be discharged at Sydney without payment of poll-tax or regard to tonnage limitation, and it must be the reverse of consoling to the rest of Australasia to learn from your Customs report that you are at some pains to secure their being sent to other colonies. The policy agreed to at the Sydney Conference in 1888 had for its object united action by all the colonies preventing any ship bringing Chinese in excess of the tonnage limitation to any part of Australia. Seamen when discharged were included within the restriction. New South Wales concurred in this policy, and her Colonial Secretary and Treasurer gave a written pledge that so soon as two colonies had passed the Conference Bill the necessary steps would be taken to bring your law into strict harmony with that of the other colonies. Five years have since elapsed, and nothing has been done to redeem this promise, though its condition was performed by Victoria, Queensland, and South Australia; the present difficulty is the result. Either your Act is sufficient to prevent Chinese passengers being smuggled into Australia on ships' articles or it is not. Its 13th section appears to have been intended to bring discharged seamen within its provisions, but it is doubtful if it effects this purpose. If you consider your Act is sufficient, will you kindly administer it accordingly. If it is not sufficient, this affords an additional reason for the request which we feel bound to respectfully repeat—that New South Wales will discharge her long-standing obligation to assimilate her Chinese legislation to that agreed to at the Sydney Conference. We are sanguine that on the fullest consideration you will be impressed with the propriety of heartily co-operating with the other colonies in restricting all undesirable forms of immigration into Australia, and in dealing with the matter from a national standpoint, and we shall be glad to receive an early assurance to that effect.

C. C. KINGSTON.

The Colonial Treasurer.—I should like the views of the Collector of Customs upon Mr. Kingston's telegram, which appears to me to be couched in offensive language.—G.R.D., 15/8/93. The Under Secretary for Finance and Trade.—C.W., B.C., 16/8/93. The Collector of Customs.—J.S., B.C., 16/8/93. F.K.

Memorandum

Memorandum from The Collector of Customs to The Under Secretary for Finance and Trade.

Custom-house, Sydney, 17 August, 1893.

I do not think the frequent use of the words "Chinese passengers smuggled into Australia," and "wholesale smuggling of Chinese" can be justified. The Premier of South Australia, by the use of the phrases above quoted, seems to imply acts wilfully at variance with the legislation of the other colonies on the subject of Chinese immigration. I have endeavoured to show by the return attached to my letter of 10th August that during the year ending 30th June, 1893, 2,198 Chinese arrived at Sydney, and that every man was duly accounted for:—1,637 left by the vessels in which they arrived; 296 left for Melbourne, 137 for Tasmania, sixty-two for New Zealand, twenty-six for Queensland, and forty only landed at Sydney.

There are no complaints of smuggling about the 296 transhipped to Melbourne; no complaint has been received from Tasmania. New Zealand has not objected, and Queensland landed twenty-six without comment.

Not a single Chinese was transhipped at Sydney for South Australia, and, although that colony presents possibilities of the introduction of Chinese from the northern territory, statements have been made by Mr. Kingston and repeated with undue haste about the smuggling of Chinese into Australia at Sydney, which the official records prove to be groundless.

If any reason exists for complaint, surely Victoria should protest—but we have no complaints from that colony. The Victorian Act permits the issue of naturalisation certificates, enabling Chinese to leave and to return. Under this and other provisions of the Victorian Act, 676 Chinese were allowed to land at Melbourne in one year, and I think I am right in stating that more than half the number landed under naturalisation certificates.

In this Colony during the same period forty Chinese only were landed in Sydney, nearly all being holders of naturalisation certificates, issued before the passing of the present Act of 1888, which enacted that no certificate of naturalisation should be issued to any Chinese after that date. The refusal of naturalisation and the tax of £100, together with defined tonnage restrictions, have proved very effective, as shown by the small number of Chinese landed in this Colony since the Act came into force. In Mr. Kingston's telegram to Sir George Dibbs it is stated, "The mischief arises through your permitting Chinese seamen to be discharged in Sydney without payment of poll-tax or regard to tonnage limitations, and it must be the reverse of consoling to the rest of Australia to learn from your Customs report that you are at some pains to secure their being sent to other colonies."

As I have explained in my report the practice in China is to put all passengers on the ships' articles. The men are simply discharged from the articles in order to enable them to sail for New Zealand, Tasmania, or other ports, but they are not allowed to land here, and consequently the poll-tax is not payable, and the tonnage limitation does not apply. The pains taken to secure the due transshipment of the men is not (as Mr. Kingston suggests) to secure their being sent to other colonies, but to prevent their landing illegally in this Colony.

I do not think there is anything in the administration of our Act to occasion the rather severe animadversion of Mr. Kingston. If Chinese passengers are brought to Sydney for other colonies they must be carried on by the ship by which they arrive or be transferred to other vessels for their destination. The fact that Chinese passengers arrive here on ships' articles does not alter the position in any way, and they are sent on exactly as goods are transhipped. Mr. Kingston's telegram says:—"Either your Act is sufficient to prevent Chinese passengers being smuggled into Australia on ships' articles or it is not. If you consider your Act is sufficient, will you kindly administer it accordingly."

With all respect for the high office held by Mr. Kingston, I do not think his inference that Chinese are smuggled into Australia by neglect in this Colony is well founded. The Act is sufficient to keep Chinese out of New South Wales, and I believe it is administered by all concerned with that object paramount.

JAMES POWELL,
Collector of Customs.

The Colonial Secretary.—J.S., 17/8/93. The Principal Under Secretary.—F.K., B.C., 17/8/93. Perhaps this further report may be sent for the information of the Premiers of Victoria and Adelaide.—C.W., 4/9/93. Approved.—G.R.D., 4/9/93.

Re Chinese, we have yours of 5th instant, covering report from your Collector of Customs. Will you kindly inform us if you approve its contents.

C. C. KINGSTON,
Premier.

Submitted.—8/9/93.

Telegram from The Chief Secretary of New South Wales to The Prime Minister of South Australia.

Sydney, 8 September, 1893.
MR. POWEL's report *re* Chinese is simply a statement of facts in regard to the administration of the Chinese Restriction Act in this Colony, and was forwarded to you with my sanction and approval.

GEORGE R. DIBBS.

The Prime Minister of Victoria to The Chief Secretary of New South Wales.

Sir, Premier's Department, Melbourne, 9 September, 1893.

I have the honor to acknowledge, with thanks, the receipt of your letter of the 5th instant enclosing a further report from the Collector of Customs of New South Wales, relative to the alleged evasion of Chinese Immigration laws.

I have, &c.,
E. J. THOMAS
(For the Premier),
Secretary to the Premier's Department.

Telegram from The Prime Minister of South Australia to The Chief Secretary of New South Wales.

Adelaide, 11 September, 1893.
Re Chinese, we have your telegram of 8th instant, adopting report of Collector of Customs, received 7th instant. So far as this consists of criticism on phraseology of our previous wires, we need not allude to it. We desire, however, to point out that the report concedes the absolute accuracy of the position as put by us, for in so many words it states that the practice in China is to put passengers on ships' articles, and that these men are afterwards discharged from the articles in Sydney, and transhipped to ports outside your Colony. The report adds that the pains taken to ensure transshipment are not to secure these men being sent to other colonies, but to prevent their landing in Sydney. No doubt, however, you will recognise that the effect is just the same, whatever the intention. This unrestricted discharging and transshipping is what, we have ventured most respectfully to suggest, should be discontinued, and we hope you will be able to meet us in some way. Shipowners are systematically endeavouring to evade the Restriction Acts by falsely pretending that passengers are members of the crew, but their efforts would be useless, were it not for the facilities for discharge and transshipment which exist at Sydney. As to the absence of complaint, we first discovered the matter only lately, and afterwards mentioned it to the other colonies. Victoria has since replied that it cannot be doubted that a carefully-planned system exists by which the Restriction Acts are extensively evaded. We understand also that Victoria has addressed you supporting our request for inquiry and any requisite action. Queensland also states that it is clear that evasion is extensively practised, and that our representations to you would not require the support of other Governments to secure the desired result. We therefore, with the greatest deference, venture to repeat our respectful request that something may be done by New South Wales to recognise the intercolonial arrangement arrived at at the Sydney Convention of 1888, and to prevent Sydney being continued as a centre for the distribution of Chinese throughout the rest of Australia. We should also be favoured by expression of your views, as asked in our wire of 1st August, with reference to restriction of immigration of other undesirable races. May we remind you that in January last you wired inviting our consideration of this question, but though the late Government immediately replied suggesting that it was a proper subject for intercolonial conference, nothing further has been heard from New South Wales.

C. C. KINGSTON,
Premier.

of New South Wales.

Adelaide, 6 October, 1893.

KINDLY inform us when we may expect to hear further from you on subject of Chinese and other undesirable immigrants. Our last wire was sent on 7th September, since which we have heard nothing from you, there is no doubt that Chinese are eagerly availing themselves of every opportunity to enter Australia.

C. C. KINGSTON.

Telegram from The Chief Secretary of New South Wales to The Prime Minister
of South Australia.

Sydney, 16 October, 1893.

IN reply to your telegram of the 8th instant, I may state, as you have already been informed, that from inquiries made, the Chinese Restriction Act has been strictly enforced here. The great press of public business and the change which is about to take place in our system of Parliamentary representation render it impossible for this Colony to take part in any intercolonial conference at the present time.

GEORGE R. DIBBS,
Chief Secretary.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

INFLUX OF ASIATICS.

PETITION FROM DANIEL SOANE, MAYOR OF DUBBO, PRAYING THE HOUSE TO PASS PROHIBITIVE OR RESTRICTIVE LEGISLATION AGAINST.)

Received by the Legislative Assembly, 14 November, 1893.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned residents of the Colony,—

RESPECTFULLY SHOWETH :—

1. That there are already in the Colony large numbers of Asiatics.
2. That these numbers are being largely augmented by the immigration of other Asiatics, many of whom, your Petitioners have every reason to believe, have been imported under contract to work at wages which totally preclude the possibility of white men competing with them.
3. That your Petitioners regard as a serious menace to the welfare of the community the probability of such importation being continued, and alien labour employed in other occupations than those at present followed.
4. That by the Chinese Restriction Act, passed by your Honorable House in 1888, the principle has been affirmed of checking the influx of inferior and undesirable races, and of preserving the industries of the country to its own people.
5. That the same reasons which induced your Honorable House to restrict the influx of Chinese can be urged with equal force against the influx of other Asiatic people.
6. That the advantages presented by this country and the route to it are daily becoming more familiar to the people of Asia, and that the evil complained of will consequently become more pronounced the longer it is left unchecked.

Your Petitioners, therefore, humbly pray that your Honorable House will take the foregoing premises into early and favourable consideration, and that you will be pleased during the present Session to pass such prohibitive or restrictive legislation as will save the country from a danger threatening it alike with the most serious industrial, social, and political consequences.

And your Petitioners, as in duty bound, will ever pray.

DANIEL SOANE,
Mayor.

HAY IRRIGATION ACT.

(BY-LAWS AND REGULATIONS UNDER.)

Presented to Parliament pursuant to Act 55 Vic. No. 25.

Department of Public Works,
Sydney, 13th November, 1893.

HAY IRRIGATION TRUST.

THE following By-laws and Regulations, made by the Board of Trustees of the Hay Irrigation Trust under the Act 55 Victoria No. 25, intituled "The Hay Irrigation Act," having been confirmed and approved by His Excellency the Governor with the advice of the Executive Council, are published in accordance with the requirements of the above cited Act.

WILLIAM JOHN LYNE.

BY-LAWS.

Constitution of the Board.

1. The Board shall consist of the aldermen for the time being of the Municipal District of Hay, of whom the Mayor shall be President and Chairman at every meeting at which he may be present.

Meetings of the Board.

Quorum. Ordinary meetings.

2. The Board shall meet for the despatch of business at such times and days as may be by resolution appointed. Five of such Board shall form a quorum.

Election of Chairman in absence of President.

Adjournment for want of quorum.

3. If at any meeting of the Board the President be absent at the expiration of fifteen minutes after the time appointed for holding such meeting the trustees then present shall proceed to elect from among themselves a Chairman to act during the absence of the President. Whenever there shall be an adjournment of any such meeting for want of a quorum the names of the members present shall be taken down and recorded in the minute-book.

Order of business.

Business of ordinary meetings.

4. The following shall be the order of the business at all meetings of the Board ;—

1. The minutes of the last preceding meeting to be read, corrected if erroneous, and verified by the signature of the Chairman. No discussion to be permitted on such minutes, except as to whether they are correct.
2. Petitions (if any) to be presented and dealt with.
3. Correspondence to be read, and if necessary, ordered upon.
4. Reports from Committees and minutes from the President (if any) to be presented and ordered upon.
5. Questions as to any matters under the jurisdiction of within the official cognizance of the Board to be put and replied to ; and statements as to any facts, matters, or circumstances requiring attention by the Board or any of the Committees or officers to be made.

6. Matters which have been specially ordered to be placed on the business paper by the President.

7. Motions of which notice has been given to be dealt with in the order in which they stand on the business paper.

8. Orders of the day to be disposed of as they stand on the business paper.

Business may be dealt with out of regular order.

5. Provided that it shall be competent to the Board at any time, by resolution, without notice, to entertain any particular motion, or to deal with any particular matter of business out of its regular order on the business paper, without any formal suspension of By-law 4 ; also, and in like manner to direct that any particular motion or matter of business shall have precedence at a future meeting.

Business paper for ordinary meeting. How prepared.

6. The business programme for every meeting of the Board shall be entered consecutively in a book to be called "The Business Book" by the Secretary or other person acting as his substitute not less than forty-eight nor more than seventy-two hours before the day appointed for such meeting. He shall enter in such business book a copy of the substance of every notice of motion and of every requisition or order as to business proposed to be transacted at such meeting which he shall have received, or shall have been required or directed so to enter in due course of law, and as hereinafter provided. Every such entry shall be made subject to the provisions of section 4 of these By-laws, in the same order as such notice, requisition, or direction shall have been received.

Special Meetings.

7. The Secretary shall call a special meeting of the Board when requested so to do by the President or by any two trustees. The object of such special meeting shall be stated on the summons to attend, and at least forty-eight hours' notice shall be given.

Business at special meetings.

8. At special meetings of the Board, the business shall be taken, after the minutes shall have been read and verified in the same manner as at ordinary meetings, in such order as directed by the President or the trustees at whose instance such special meeting shall have been called.

Business programme for special meeting.

9. The business programme for each special meeting shall contain only such matters as shall have been specially ordered to be entered thereon by the President or trustees calling such meeting.

Summons to members.

10. The summons to members of the Board for every meeting thereof shall be prepared from the business programme for such meeting, and shall embody the substance of such programme.

How business programme to be disposed of.

11. The business programme for each meeting of the Board shall at such meeting be laid before the Chairman who shall make a note upon such programme of the mode in which each matter entered thereon has been dealt with, and such business programme, so noted, shall be a record of the Board.

Notices of motions and all requisitions from trustees, &c., to be numbered as received and preserved until matter disposed of, unless withdrawn before business programme made up.

12. All notices of motion and all requisitions from trustees and directions from the President as to entry of any particular matters of business for the consideration of the Board at its then next or any future meeting shall be numbered by the Secretary as they are received, and each such notice, requisition, and direction shall be preserved by such Secretary until after the matter to which it relates shall have been disposed of, and the record of the manner in which such matter has been so disposed of shall have been duly verified as required by section 4 of these By-laws: Provided, however, that the person giving or forwarding any such notice of motion, requisition, or direction to the Secretary shall be at liberty to withdraw the same at any time before the making up of the business programme.

After business programme has been made up, all notices, &c., to be the property of the Board.

13. After the business programme shall have been made up as aforesaid, all the said notices of motions, requisitions, and directions as to which entries have been made thereon shall be the property of the Board, and shall not be withdrawn, altered, or amended without leave having been first obtained from the Board for such withdrawal, alteration, or amendment.

*Motions and Amendments.**Motions—how to be moved.*

14. Except by leave of the Board motions shall be moved in the order in which they stand on the business programme, and if not so moved or postponed shall be struck from such business programme and be considered to have lapsed.

Absence of proposed mover.

15. No motion of which notice shall have been entered on the business programme shall, except, as hereinafter provided, be proceeded with in the absence of the trustee by whom such notice shall have been given, unless by some other trustee producing a written authority for that purpose from such first-named trustee.

Motion to be seconded.

16. No motion shall be discussed unless and until it is seconded.

Amendments may be moved.

17. When a motion shall have been made and seconded, any trustee shall be at liberty to move an amendment thereon, but no such amendment shall be discussed unless and until it be seconded.

Motions and amendments to be in writing.

18. No motion or amendment shall be discussed until it shall have been reduced into writing.

Only one amendment at a time.

19. No second or subsequent amendment shall be taken into consideration until the previous amendment or amendments shall have been disposed of.

Amended question. Further amendment may be moved thereon.

20. If an amendment be carried, the question as amended thereby shall become itself the question before the Board; whereupon any further amendment upon such question may be moved.

How subsequent amendments may be moved.

21. If any amendment either upon an original question or upon any question amended as aforesaid shall be negatived, then a further amendment may be moved to the question to which such further first-mentioned amendment was moved, and so on: Provided that not more than one question and one proposed amendment thereof shall be before the Board at any one time.

Motions for adjournment.

22. No discussion shall be permitted on any motion for adjournment of the Board, and, if upon the question being put on any such motion the same be negatived, the subject then under consideration or the next in order on the business

programme, or any other on such programme that may be allowed precedence, shall be discussed before any subsequent motion for adjournment shall be receivable. All motions, after being carried, shall be entered by the Secretary or his substitute in a book to be provided and kept for the purpose, such entry to include names of proposer, seconder, and supporters; blank columns for dates and statements of when and how such motions were effected shall be provided in such motion book, which shall be termed "The Motion Register."

Orders of the day. Of what they shall consist.

23. The orders of the day shall consist of any matters other than motions on notice which the Board shall at a previous meeting thereof have directed to be taken into consideration, or any committee of the Board shall have directed to be entered on the business programme for consideration.

Petitions to be respectfully worded.

24. It shall be incumbent on every Trustee presenting a petition to acquaint himself with the contents thereof; and to ascertain that it does not contain language disrespectful to the Board. The nature and prayer of every such petition shall be stated to the Board by the Trustee presenting the same.

Petitions how received.

25. All petitions shall be received only as the petitions of the parties signing the same.

How petitions are to be dealt with.

26. No motion shall, unless hereinafter provided, be permissible on the presentation of a petition, except that the same be received and referred to one of the permanent committees, or to some special committee appointed to consider and report on the same; or that it be received, and that its consideration stand an order for the day for some future meeting: Provided, however, that if any trustee shall have given due notice of a motion in reference to any petition, and such petition shall have been presented before such trustee shall have been called upon to move such motion, the said motion shall, if otherwise unobjectionable, be considered in order. Also provided that any petition may be dealt with summarily, if it does not involve an expenditure of more than five pounds.

Correspondence. Duties of Chairman as to correspondence.

27. The Chairman shall have the same duty in reference to letters addressed to the Board before directing the same to be read as by section 24 of these By-laws is imposed upon the trustees presenting petitions. The Chairman shall direct as to the order in which all correspondence shall be read, and no letter addressed to the Board shall be presented or read by any trustee.

Applicable to letters.

28. Section 26 of these By-laws shall be considered as fully applicable to letters addressed to the Board as to petitions.

Letters sent not to be discussed, but every letter may be subject to motion.

29. No discussion shall be permitted in reference to any letters which have been written and sent by the President or by any officer of the Board, and copies of which may be read to the Board: Provided, however, that any notice of motion, consistent with good order, may be entertained with reference to any such letters addressed to the Board which the President or Presiding Trustee may not have ordered to be read as aforesaid.

Reports from committees. Form of report.

30. All reports from committees shall be written on foolscap paper with a margin of at least one-fourth of the width of such paper, and shall be signed by the members of such committees indorsing such reports.

President's minute.

31. The President shall have the right of directing the attention of the Board to any matter or subject within its jurisdiction or official cognisance by a minute on paper.

How reports, &c., are to be dealt with. Duties of Chairman, &c., in certain cases.

32. No motion shall (unless as hereinafter provided) be permissible on the presentation of a report from a committee or a minute from the President, except that the same be received, and that its consideration stand an order of the day for some future meeting: Provided, however, that if any trustee shall have given due notice of any such report or minute, or if an order for the consideration of such report or minute shall have been entered among the orders of the day, such motion or order may, if otherwise unobjectionable, be moved or considered in due course. And whenever any such report or minute embodies any recommendation which cannot legally be carried out without due notice, and it is nevertheless desirable that such report or minute shall be definitely ordered upon during the meeting of the Board at which such report or minute is presented it shall be the duty of the Chairman or member of such committee signing such report,

or of such President, as the case may be, to give or transmit to the Secretary such a notice of motion, requisition, or direction as aforesaid as will enable such Secretary to make the necessary entry on the business programme and to give such due notice.

Report of Finance Committee on payment of Accounts.

33. The adoption of the report of the Finance Committee on the payment of accounts shall take precedence of every other report.

Questions and statements.

Limitations as to questions and statements.

34. No question or statement shall be allowed to be put or made which is inconsistent with good order, or is not in strict accordance with the requirements of section 5 of these By-laws.

Notice to be given.

35. Four clear days notice of every question shall be given to the person who is expected to reply thereto, to allow for the consideration of such reply, and, if necessary, for a reference to other persons or to documents.

Questions without notice.

36. Provided that nothing contained in By-law 35 shall prevent any question being put and answered without notice, by permission of the Chairman and Board, but it shall not be compulsory upon any person so questioned to answer such question so put to him.

Question to be put without argument, &c.

37. Every such question shall be put categorically, without any argument or statement of fact.

Similar provision as to statements.

38. Every such statement must be made without argument.

No discussion on question, &c.

Rights of objection and of subsequent motion reserved.

39. No discussion shall be permitted as to any such question, or as to any reply or refusal to reply thereto, or as to any such statement at the time when such question is put or such reply or refusal to reply is given, or such statement is made: Provided, however, that nothing herein contained shall prevent the taking of any objection as to any such question or statement being out of order, or shall prevent the discussion, after due notice, as hereinbefore provided, of any matters properly arising out of or relating to any such question or reply, or refusal to reply, or any such statement as aforesaid.

Order of debate.

Mode of addressing the Board, &c.

40. Every trustee who shall make or second any motion, or shall propose or second any amendment, or shall take any part in any debate or discussion, or shall put or reply to any question, or shall make any statement, or shall in any other way or for any other purpose address observations to the Board, shall, while so doing, stand up in his customary place (unless he shall be prevented from so doing, by reason of some bodily infirmity) and shall address himself to the Chairman then presiding: Provided that in the case of a question, such question may, by permission of such Chairman, be put directly to the trustee or officer to be questioned, and may be replied to in like manner; but in every such case the question so put and the answer thereto shall be subject to every legal objection on the ground of disorder or irrelevancy.

Speaker not to be interrupted if in Order.

41. No trustee shall be interrupted while thus speaking, unless for the purpose of calling him to order, as hereinafter provided.

Limitation as to number of speeches, &c.

42. Every mover of an original motion shall have a right of general reply to all observations which may have been made in reference to such motion and to any amendments moved thereon, as well as a right to speak upon every such amendment. Every trustee, other than mover of such original motion, shall have a right to speak once upon such motion and upon every amendment thereon. No trustee shall speak a second time upon any question, unless when misrepresented or misunderstood, in which case he shall be permitted to explain without adding any further observation than may be necessary for such explanation.

Mover and seconder.

43. A trustee who has moved any motion or amendment shall be considered to have spoken thereon; but a trustee who shall have seconded any such motion or amendment without any further observation than that he seconded the same shall be at liberty to speak on such motion or amendment.

Limited time of speaking on motion or amendment.

44. No Chairman or trustee shall speak upon any motion or amendment for a longer time than ten minutes, except by permission of the Board.

Speaker not to digress, &c.

45. No trustee shall digress from the subject under discussion, or shall make personal reflections on, or impute improper motives to, any other trustee.

Adjournment of debate.

46. A debate may be adjourned to a later hour of the day, or to any other day specified, and the trustee upon whose motion such debate shall have been so adjourned shall be entitled to pre-audience on the resumption of the same.

Chairman to decide as to pre-audience.

47. If two or more trustees rise to speak at the same time the Chairman shall decide which of such trustees shall be first heard.

Trustees may require questions to be stated, &c., under certain restrictions:

48. Any trustee may request the question or matter under discussion to be read or stated for his information, or may require the production of any records of the Board bearing upon such question or matter which are readily accessible: Provided, however, that no such request or requisition shall be so made as to interrupt the discussion. Also, that if any such request or requisition shall appear to the Chairman not to have been made *bona fide* it shall not be complied with.

Questions of order.

Chairman to decide points of order.

49. The Chairman shall preserve order, and his decision upon disputed points of order or practice shall be final, except as in so far as the same may be questioned as in the manner hereinafter provided.

Acts of disorder.

50. Every member of the Board who shall commit a breach of any section of these By-laws, or who shall move or attempt to move any motion or amendment embodying any matter as to which the Board has no legal jurisdiction, or who shall in any other way raise or attempt to raise any question, or shall address or attempt to address the Board upon any subject which the said Board has no legal right to entertain or discuss, or shall use any language which according to the common usage of gentlemen would be held disorderly, or who shall say or do anything calculated to bring the Board into contempt, shall be out of order.

Chairman may call a member to order.

51. The Chairman may, without the interposition of any other member of the Board, call any trustee to order, whenever in the opinion of such Chairman, there shall be a necessity for so doing.

Any member may raise question of order.

52. Every member of the Board shall have the right of calling the attention of the Chairman to any motion, amendment, statement, argument, or observation moved, used, or made by any other member which first-named member may consider out of order.

Decision on points of order.

53. The Chairman when called upon to decide points of order or practice shall state the provision, rule, or practice which he shall deem applicable to the case, without discussing or commenting upon the same.

Motion out of order to be rejected.—Members to explain, retract, or apologise.

54. Whenever it shall have been decided, as aforesaid that any motion, amendment, or other matter before the Board is out of order, the same shall be rejected, and whenever anything said or done by any trustee shall be similarly decided to be out of order, such trustee shall be called upon by the Chairman to make such explanation, retraction, or apology as the case may require.

Penalties for persisting in disorderly conduct.

55. Any member of the Board who shall have been called to order, and who, after having been twice directed to make such explanation, retraction, or apology as aforesaid, when required so to do, or who shall be guilty of any other act of disorder as defined in section 50 of these By-laws, and shall refuse to make such explanation, retraction, or apology as the majority of the trustees then present shall consider satisfactory, shall be liable on conviction of the first offence to a penalty of not less than ten shillings, nor more than five pounds; and on second conviction for the like offence he shall be liable to a penalty of not less than one pound nor more than ten pounds; and on the third conviction and for every further conviction for the like offence he shall be liable to a penalty of not less than two pounds nor more than twenty pounds. All such penalties shall be paid into a special fund which shall be applied before the end of each electoral year to any purpose to which a majority of the whole Board may direct.

Power of Board as to laying down general rules, &c.

56. Any trustee who is dissatisfied with the decision of the Chairman on any such question of order or of practice, may, by motion on notice, respectfully worded, invite the Board to lay down a different rule or principle for the determination of any similar questions of order or of practice which may there-

after arise. Any rule or principle thus laid down shall be binding upon all parties, unless and until it be rescinded, but shall have no retro-active operation: Provided, however, that nothing herein contained shall be held to bind any Chairman to put any motion to the Board which in his opinion is contrary to law.

Mode of Voting.

How questions are to be put.

57. The Chairman shall put to the Board all questions on which it shall be necessary that a vote be taken by ayes and noes, and shall declare the sense of such Board thereon, and he shall be at liberty to put any such question as often as may be necessary to enable him to form and declare his opinion as to the opinion of the majority.

Divisions.

Penalty for refusing to vote.

58. Any trustee shall be at liberty to call for a division; in such case the question shall be put first in the affirmative and then in the negative, and the trustees shall vote by show of hands, and the names and votes of the trustees present shall be recorded. Any trustee who shall be present when a division is called for and shall not vote on such division, not being disabled by law from so voting, shall be liable for every such offence to a penalty of not less than ten shillings nor more than five pounds, to be paid into the special fund provided for in section 55.

Protests.

Mode of protesting.—Protest to be recorded, but may under certain circumstances be expunged.

59. Every member of the Board may protest against any resolution or vote by the Board; notice of the intention so to protest must, however, be given at the meeting when such resolution is passed, or such vote is arrived at, and the protest itself must be handed to, or sent to the Secretary not later than seven days after such notice. The Secretary shall enter every such protest in the minute book; but if, in the opinion of the Board, it be inconsistent with the truth, or disrespectfully worded, it may (by resolution on notice) be ordered to be expunged. In such case the expunction shall be made by drawing a perpendicular line with the pen through the entry of such protest, with reference in the margin to the resolution ordering such expunction.

Rules applicable to business in Committee.

60. The following sections of these By-laws shall (except as herein excepted) be taken to apply to the conduct of business in committee of the whole Board; namely, sections 17 (except that it shall not be necessary that any motion or amendment in committee shall be seconded), 18, 21, 39, 40, 43, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58.

Disorderly conduct in committees.—Refusal to vote.

61. Whenever any member of the Board shall, while the Board is in committee of the whole, be considered guilty of an offence against good order within the meaning of section 50 of these By-laws, it shall be competent to any trustee to move that the Board resume its sitting, and that such matter be reported; and if such motion be carried, such matter shall be reported accordingly, and an entry of such report shall be made in the minute-book; and whenever any such trustee shall have failed to vote on any occasion in committee of the whole Board, as required by section 58 of these By-laws, the facts shall be reported to the Board, and such report on such facts shall be duly recorded in the minute-book: Provided that in the case of a trustee failing to vote as aforesaid, no special motion that the Board resume its sitting shall be necessary; but it shall be the duty of the Chairman of such committee of the whole, in making his report of such proceedings in such committee, whenever such report shall be made, to include in such report a statement of such failure to vote as aforesaid, and of the question as to which such trustee has so failed to vote.

Decisions in committee on points of order may be reported.

62. Whenever a decision upon any question of order shall have been given by the Chairman of a committee of the whole Board, under the provision of section 49 of these By-laws, any trustee may move that such decision be embodied in the report of the proceedings in such committee; and if such motion be carried, such decision shall be so embodied in such report whenever the same shall be made.

How progress may be reported, &c.

63. Any trustee may, at any time during the sitting of a committee of the whole Board, move that the Chairman report progress (or no progress), as the case may be, and that leave be asked to sit again at a later period of the same day, or on any further day; or that no leave be asked to sit again; and if any such motion be carried, the Board shall resume its sittings, and a report shall be made accordingly; but no discussion shall be permitted on any such motion, and if the same be negatived, the subject then under consideration shall be discussed before another such motion shall be receivable.

Reports of proceedings in committee.—Want of quorum in committee.

64. All reports of proceedings in committee of the whole Board shall be made to the Board *viva voce* by the Chairman of such committee; and a report of such proceedings shall be made in every case, except when it shall be found, on counting the number of members during the sitting of any such committee, that there is not a quorum present. In the latter case the sitting of the Board shall be resumed without any motion for that purpose, and the proceedings in committee shall be considered to have lapsed: Provided that in the making of any such report as aforesaid, it shall not be necessary to report any such proceedings in extenso, but only to state the result, general effect, or substance of such proceedings.

How reports are to be dealt with.

65. All such reports of proceedings in committee of the whole shall be recorded in the minute book; but except as hereinafter mentioned no such report shall be considered as adopted by the Board; nor shall any such application as aforesaid for leave to sit again be considered to have been granted by such Board until a motion shall have been made and passed for such adoption, or for the granting of such leave. And every such motion for the adoption of a report or for the granting of leave as aforesaid, and the order of debate on such motions shall be subject to the same rules as other motions and the order of debate on such other motions: Provided, however, that where a report shall have been made under Section 61 of these By-laws of disorderly conduct in committee; or under Section 58 of these By-laws of failure to vote on division, or of any decision in committee upon any question of order, such report shall, so far as it relates to such fact, be regarded and recorded as a statement thereof; and to that extent shall not, unless for the correction of a manifest error be interfered with upon any pretext whatever.

Calls of the Board.—How calls may be ordered.

66. A call of the Board may be ordered by any resolution of which due notice shall have been given for the consideration of any motion or matter of business before such Board.

Mode of Proceeding.—Such call compulsory in certain cases.

67. There shall, without any special order to that effect, be a call of the Board for the consideration of every motion for the rescision of any resolution, orders, or decision of such Board.

Mode of proceeding.

68. The call shall be made immediately before the motion, or business for which such call has been ordered, or is required to be made by the last preceding section, shall be moved or considered. Such call shall be made as follows:—The Secretary shall call the names of all members in their alphabetical order; each member present shall answer to his name as so called; and if any member is absent a record shall be made of such absence; but if leave of absence to any such member shall have previously been granted; or if such an excuse in writing shall have been forwarded to the President or Secretary, as a majority of the Board then present shall consider satisfactory, such absent member shall stand excused, and a record shall be made of such excuse and of the reasons for the same.

Penalty for absence without legal excuse.—Further call when question adjourned.

69. Any member of the Board who, having had notice of a call of the Board shall not answer to his name, or who, being absent, shall not be legally excused or who, if absent, and not so excused, shall fail to show that, by reason of extreme illness or any other sufficient cause, he has been unable to send an excuse in writing; or who, having answered to his name, shall not be present when a vote is taken on the motion or business as to which such call has been made, shall for every such offence be liable to a penalty of not less than Ten Shillings nor more than Five Pounds: Provided that if the consideration of any such motion or matter of business be adjourned to a future day, there shall be a further call on the resumption of the consideration of every such motion or matter of business so adjourned, and the provisions herein as to penalties for absence shall have reference to such further call. And if there shall be more than one adjournment this proviso shall be taken to extend to the resumption of the consideration of such motion or matter of business after every such adjournment—said penalties to be paid into the special fund as provided for in Section 55.

Standing and special committees.—Standing committees.

70. There shall be two standing committees— a Committee of Works and a Finance Committee. These committees shall be reappointed every year at the first meeting of the Board which shall be holden after the election of the Mayor for the Municipality of Hay.

Constitution of standing committees.

71. Each of the committees named in the last preceding section shall consist of three members, two of whom shall form a quorum.

Committee of Works.

72. The Committee of Works shall have the general direction of all works ordered or sanctioned by the Board, and the general inspection of all machinery, pipes, channels, reservoirs, aqueducts, drains, streets, roads, ways, and bridges under the care and management of the Board. They shall also inquire and report from time to time as to such improvements and repairs as they may think necessary, or as they may be directed by resolution of the Board to inquire and report upon.

Finance Committee.

73. The Finance Committee shall examine and check all accounts, and shall watch generally over the collection and expenditure of the revenues of the Trust. They shall inquire and report from time to time as to all matters which they may consider to affect, or to be likely to affect the finances of the Trust, and as to such matters or subjects of a like nature as they may be directed by resolution of the Board to inquire and report upon.

Special Committees.

74. Special committees may consist of any number of members, and may be appointed for the performance of any duty which may be lawfully entrusted to a committee, and for which, in the opinion of the Board, a special committee ought to be appointed.

Chairman of committees.

75. Every committee of which the President not being a member shall elect a permanent Chairman of such committee within seven days after their appointment, who, however, may be removed and another appointed at any time.

Form of service in committees.

76. Appointments to the Committee of Works, and the Finance committee shall be for the whole year. The appointment of every special committee shall be considered to endure until the duties for which such Committee shall have been appointed have been fully performed: Provided, however, that nothing herein contained shall be held to affect in any way the right of such committee to remove the Chairman of such committee, or to appoint another such Chairman in his stead.

Committee meeting how called.

77. The Secretary shall call a meeting of any Committee when requested so to do by the Chairman or any two members of such Committee.

Records of transactions in committee.

78. The Chairman of each standing committee shall make or cause to be made, in a book to be kept by him for that purpose, memoranda of all the transactions of such committee, which book he shall, on ceasing to be such Chairman, hand over to his successor.

Expenditure.—Except in emergent matters, cost of all work to be estimated before undertaken.

79. With the exception of emergent matters hereinafter specially provided for, no work affecting the funds of the Trust shall be undertaken until the probable expense thereof shall have been first ascertained by the Board.

Emergent matters and necessary current expenses.—Expenses authorised to be reported.—Outlay to be in accordance with the orders of the Board.

80. For emergent matters and for necessary current expenses during the intervals which may elapse between the meetings of the Board outlays to the following extent may be incurred:

1. By order of the Committee of Works, or of the President and one member of such committee, for repairs or emergent works, to the extent of five pounds.
2. By order of the President for necessary current expenses to the extent of ten pounds.
3. By order of the President and any two trustees; or, without the President, of four trustees for any emergent purpose to the extent of five pounds:

Provided that in every case a detailed report in writing of every such outlay shall be laid before the Board at its next meeting; such report to be signed by the Chairman of the Committee of Works, or the President and trustees, or the trustees without the President, as the case may be, by whom such outlay shall have been authorised; also that such outlay shall only be permissible in reference to matters coming strictly within the jurisdiction or functions of the Board, and that no outlay involving a disobedience or evasion of any order or resolution of such Board shall on any pretence be thus authorised.

All claims to be examined and reported upon by Finance Committee.

81. All accounts against and demands of money from the Board shall be examined and reported on by the Finance Committee before any order shall be made for payment of such accounts or demands.

Certificates required with each claim.—Salaries and wages to be payable on the Presidents' order.—Certificate to be attached to report.

82. No payment shall be so ordered unless there shall be a certificate memorandum from the Committee, President or Officer of the Board to whom the direction or guardianship of

such expenditure properly belongs, showing that the demand is a legitimate one, and has been duly authorised or inquired into. It shall be the imperative duty of the Finance Committee to see that this requirement is fulfilled, or report specially as to the reasons for its non-fulfilment before recommending payment: Provided, however, that such special report as last herein mentioned may be embodied with a report by which payment of the amount in question is recommended; and provided further that in regard to salaries and wages of labour for officers, servants, and labourers employed at fixed rates of payment by order of the Board, the certificate of the President of the amount due to any such officer, servant, or labourer, and the order of such President for the payment of such amount shall be a sufficient authorisation for such payment; and such certificates, memoranda, and authorisations shall be attached respectively to the reports from the Finance Committee on the payments or outlays to which such certificates, memoranda, or authorisations have reference.

Common Seal and Records of the Board.

Common seal and press—how secured.—Care of same.

83. The common seal and the press to which the same is attached shall be secured by a cover or box, which, except when such seal and press are in use, shall be kept locked. There shall be duplicate keys to the lock of this cover or box, of which keys one shall be kept by the President, and the other by the Secretary. Such common seal and press shall be in the custody and the care of the Secretary.

When and how common seal to be used.

84. The common seal shall not be attached to any document without an express order of the Board. In every case where such common seal has been ordered to be attached to any document, such document shall also be signed by the President (or in case of the absence or illness of such President by two trustees) and countersigned by the Secretary.

How books of account are to be kept and inspected.

85. The Secretary shall keep such books of account, and such records, statements, and memoranda of receipts and expenditure in such manner and form as the Board may from time to time direct. It shall be the duty of the Finance Committee to inspect all such books of account, records, statements, and memoranda from time to time, to ascertain that the same are properly kept, and to report at once to the Board any act of neglect or appearance of inefficiency which they may have discovered in the keeping of the same; also to report to the Board from time to time any changes which such committee may think advisable in the mode of keeping the accounts.

Records of the Board defined.—Provisions for the proper keeping of the same.

86. The minute book, business programme book, motion register, letter book, and all rate and assessment books, books of account, records, statements, and memoranda of receipts and expenditure, electoral rolls, and other records relating to elections, reports from committees, minutes from the President, petitions, letters on business addressed to the Board, or to the President, or to any officer or servant of the Board, orders, reports, returns, and memoranda relating to Trust business, drawings, maps, plans, contracts, specifications, agreements, and all other books and papers connected with the business of the Board, shall be deemed records of the Trust. All such records, other than the minute books and other books shall be numbered and filed in due order, and shall be duly registered by the Secretary in a book to be kept by him for that purpose. Upon the face of every document thus registered to which there is any reference in the minute book there shall be a note of the page wherein it is so referred to; and when any order has been made by the Board, or a report has been brought up by any committee thereof in reference to any document aforesaid, a note of such order or report shall be made upon such document. It shall be the duty of the Finance Committee to inspect the records from time to time to ascertain that the same are properly kept as aforesaid, and to report to the Board any act of neglect or appearance of inefficiency which they may discover in the keeping of such records.

Impression upon seal not to be taken, &c., without leave of Board.—Penalties.

87. No member or officer of the Board shall be at liberty to take any impression of the corporate seal, or to show, lay open, or expose any of the books or records of the Board to any person other than a member of the same without leave from such Board except as otherwise provided by law. Any member or officer of the Board who shall be guilty of a breach of this section shall be liable on conviction for the first offence to a penalty of not less than five shillings nor more than two pounds; for a second offence, to a penalty not less than one pound nor more than ten pounds; and for a third and every subsequent offence, to a penalty of not less than five pounds or more than twenty-five pounds, to be placed to the credit of the Special Fund as per section 55.

Impression of seal not to be taken, &c., without leave of Board.—Penalties. Exceptional circumstances.—Receipt to be given in every case before document received.—Proviso as to use of records as matter of Evidence.

88. Any person removing any such book, or other record of the Board as aforesaid, from the Board Chamber, or the place where by direction of the Board such book or record is usually kept, without leave for such removal having been first obtained from the Board, or without other lawful cause for such removal, as hereinafter provided, shall, for every such offence, be liable to a penalty of not less than ten shillings nor more than ten pounds. And nothing herein contained shall be held to affect the further liability of any person who shall have removed such book or other record as aforesaid, and shall not have returned the same, to prosecution for stealing such book or record, or to an action at law for the detention of the same, as the circumstances of the case may warrant: Provided that leave for temporary removal of a book or other record may be granted to the Secretary by the President in order that such Secretary may post up entries, prepare returns, or perform any other duty which it may be necessary that he should perform: Also the President or Chairman of any committee, or any trustee acting for any such Chairman, may temporarily remove any record necessary for the preparation of a minute or a report, or for the purposes of any prosecution or suit at law by, against, or at the instance of the Board; but in all such cases such Secretary, President, Chairman, or trustee, as the case may be, shall give a receipt under his hand for every document so removed, and every such receipt shall be carefully preserved among the records until the book or other record to which it refers shall have been returned, when such receipt shall be destroyed. And provided also that the President, Secretary, or other officer of the Board who may be subpoenaed to produce any book or other record of the Board in a court of law shall have the right to remove such book or other record for the purpose of obeying such summons, but shall return such book or record as speedily as may be, and shall, before removing the same, leave at the Board chambers a receipt for such book or record as aforesaid; and every such person so temporarily removing such book or other record of the Board as aforesaid shall be legally responsible for the safe-keeping and return of the same.

Penalty for defacing or destroying record.

89. Any person destroying, defacing, or altering any record of the Board shall for every such offence be liable to a penalty of not less than five pounds nor more than fifty pounds.

Officers and Servants.

Notice to candidates in certain cases.

90. No appointment to any permanent office at the disposal of the Board to which a salary or allowance of fifty pounds per annum or more is attached shall be made until public notice shall have been given, as hereinafter provided, inviting applications for qualified candidates for the same. The salary or allowance attached to such office shall in every case be fixed before such notice is given, and shall be stated in such notice.

Mode of appointment.

91. Every such appointment shall be made by ballot in such mode as may at the time be determined on, whenever there is more than one candidate for such permanent office.

Exceptional cases.

92. Nothing herein contained shall be held to prevent the appointment by the Board, without advertisement, of any salaried officer or servant of the Trust to any other permanent office or employment at the disposal of the Board to which no further salary is attached; or to prevent the appointment in like manner of any such officer or servant to any other office or employment of which the duties require only occasional attention, and are to be paid by allowances proportionate to the extent of such duties; or to prevent any similar appointment or employment by the President or by any committee or officer of the Board under the authority of any By-laws; or to prevent the employment as may be from time to time found necessary, as may be ordered by the Board, of any workmen or labourers on the public works of the Trust.

Bonds for good conduct.

93. All bonds given by officers or servants of the Board for the faithful performance of their duties shall be deposited with the bankers of the Trust, and no officer or servant of the Board shall be received as surety for any other such officer or servant.

Duties of Secretary.

94. The Secretary shall, under the direction of the President, conduct all correspondence that may be necessary on the part of the Board. He shall likewise have charge of all the records of such Board except such books or documents as may by order of the Board (as hereinafter provided) be entrusted to any other officer, and shall be responsible for the safe-keeping of such documents or records. He shall generally assist the President in carrying out the orders of the Board and the duties of such President, and shall make a return early in January of every year of expenditure, &c., in accordance with section 34 of the "Hay Irrigation Act" (55 Victoria, 25).

Duties of Treasurer.

95. The Treasurer of the Board shall, within forty-eight hours of receipt of moneys on behalf of the Board, or as soon as possible, deposit all such moneys in a bank to be named by the Board to the credit of the Board, and his cash-book and bank pass-book balanced, shall be laid before the Board at every meeting. He shall also lay his accounts before the Board at the first meeting of each month, or oftener if required.

Special powers of President.

96. The President shall exercise a general supervision over all officers and servants of the Trust, and may order the preparation of any such return or statement, or the giving of any such explanation or information by any such officer or servant as he may think necessary; unless such return or statement shall have been already prepared, or such explanation or information already given, and such return, statement, explanation, or information, is so on record as hereinbefore provided; or unless the Board shall have expressly forbidden or dispensed with the preparation of such return or statement, or the giving of such explanation or information. All such returns or statements as aforesaid shall be in writing, and shall be recorded. All such explanations or information may except as hereinafter provided, be either rendered *viva voce*, or put into writing as the President may direct.

How complaints against officers are to be dealt with.

97. All complaints against officers or servants of the Trust must be in writing, and must in every case be signed by the person or persons complaining, and no notice whatever shall be taken of any complaint which is not in writing or is anonymous. All such complaints may be addressed to the President, who immediately upon the receipt of any such complaint, and without laying the case before the Board, shall have power to investigate the same. And if any such complaint be made to the Board or to any member or officer thereof, it shall be referred to and investigated by the President before it shall be in any way (otherwise than by such reference) ordered upon or dealt with by the Board: Provided that every report, explanation, and information, which may be made or rendered in reference to every such complaint shall be in writing. And the President shall state in writing the result of every such investigation, and his opinion as to what order (if any) ought to be made in connection therewith; and such complaints, with all reports, explanations, and information as aforesaid in connection therewith, and the President's statement as aforesaid thereon, shall be laid before the Board at the next meeting thereof, which shall be held after the President shall have made such statement, and shall be duly recorded.

Miscellaneous leave of absence.

98. No leave of absence shall be granted to the President or to any trustee otherwise than by resolution of the Board, adopted after due notice.

Motions for rescission of previous orders, &c.

99. Whenever a motion for the rescission of any order, resolution, or vote of the Board shall have been negatived, no other motion to the same effect shall be permissible until a period of three months shall have elapsed from the time of negativing the first-mentioned motion: Provided that nothing herein contained shall be held to prohibit the reconsideration and amendment of any proposed By-law which may have been submitted to the Governor for confirmation and may have been remitted to the Board with suggested amendments of the same, or the passage, after the notice as hereinbefore provided, and in due course of law, of any By-law for the repeal or amendment of any other By-law.

Lapsed business.

100. Whenever the consideration of any motion or matter of business shall have been interrupted by reason of a quorum not having been present, the resumption of such consideration may be ordered by resolution of the Board after due notice; and such consideration shall in such case be resumed at the point where it was so interrupted as aforesaid.

Suits and prosecutions for penalties, &c.

101. Such suits or information for the enforcement of penalties for or in respect of breach of the "Hay Irrigation Act"; any By-law made thereunder, or of any statute, the operation of which may have been extended to the Trust, as may have been directed by the Board, or by the President, to be commenced or laid, shall be so commenced or laid as follows, namely:—When against a member of the Board, or an auditor, or any officer of the Trust—by the Secretary, unless such Secretary be the officer to be proceeded against; and in such case by any other officer named by the Board for that purpose; when against any other person, by the officer to whom the carrying out of the statutory provision or By-law imposing the penalty sought to be enforced has been entrusted, and if there shall be no such officer, then by any such officer or person as shall be appointed for that purpose by the Board or President, as the case may be on directing

such suit or information as aforesaid; and no such suit shall be brought or information laid as aforesaid against any member of the Board or auditor except by order of the Board; nor shall any similar proceedings be taken against any officer of the Board except by order of the Board or of the President, nor against any other person except upon the order of the Board or of the President. And no such suit shall be directed to be brought, nor shall any such information be directed to be laid as aforesaid except on an express resolution of the Board, in any case where the bringing of such suit, or the laying of such information will be adverse to any previous direction of the Board, or where, on the trial or hearing of any such suit or information the same shall have been dismissed on the merits: Provided that in any such case the conduct or prosecution of any such suit or information may, on the order of the Board, be entrusted to an attorney.

Mode of calling for Tenders.

102. Whenever it is decided that any work shall be executed, or any materials supplied by contract, tenders for the execution of such work or the supply of such material shall be called for by public notice as hereinafter provided.

Drafts of intended By-laws.

103. A draft of every intended By-law shall lie in the office the Board for at least seven days before such draft shall be taken into consideration by the Board, and shall be open to the inspection of any ratepayer of the Municipal District of Hay who may desire to inspect the same; and public notice shall be given as hereinafter provided that such draft is so lying for inspection.

How notices are to be published.

104. In all cases where public notice is or shall be required to be given by any By-law of any appointment, resolution, act, order, or regulation, done, made, or passed by the Board or by any committee thereof, or by the President or any officer of the said Board, such notice shall be given and published by posting the same on or near the outer door of the Board Chambers for the space of seven days, and by advertising the same twice in some newspaper circulating in the Municipality of Hay.

Persons obstructing officer of the Board.

105. In all cases not herein provided for, resort shall be had to the rules, forms, and usages of the Legislative Assembly of New South Wales, so far as the same are applicable to the proceedings of the Board.

Auditors.

106. The auditors for the time being of the Municipal District of Hay may be the auditors also for the Hay Irrigation Trust; or the Board may, if it deems it advisable, appoint other auditors. The remuneration to auditors shall be such amount as the Board may decide upon from time to time.

Agistment.

107. Any ratepayer of the Hay Municipality may be allowed to depasture on the unallotted portions of the Hay Irrigation Area not more than twelve head of grown stock, either cattle, horses, sheep, or goats with their increase up to the age of 6 months, subject to compliance with these By-laws and to the payment of fees as per Schedule A attached thereto; and no fee shall be charged for the progeny of duly registered stock depastured on the said area under the age of 6 months; above that age such stock will be charged for as directed in Schedule A.

Agistment fees payable in advance.

108. All fees shall be paid half-yearly, or, in special cases, by direction of the Trustees, for shorter periods in advance; and shall be payable to the Herdsman during office hours.

Description of stock to be furnished.

Before stock are placed on the said area, a full description, with brands of such stock must be registered with the Trust's Herdsman by the owner, who must at the same time subscribe on the register hereinafter mentioned a declaration that the stock are his own property. Any person who shall register in his own name any stock belonging to another person shall be liable on conviction to a penalty of not more than ten pounds nor less than two pounds.

Stock to be branded.

110. All stock depastured on the said area shall be branded with a private brand, and goats with the Trust's brand in addition thereto.

Notice of passing of travelling stock required.

111. All parties in charge of travelling stock shall give twenty-four hours notice in writing, addressed to the Herdsman, at the office of the Trust, previous to their entering on the irrigation area, and any party neglecting to give such notice shall be liable to a penalty not exceeding forty shillings.

Stock register to be kept.

112. A book to be called the register shall be kept by the Herdsman at the Hay Municipality Council Chambers, in which shall be entered from time to time the names in full and addresses of all owners with the number, brands, and description of the stock depastured by each and the amounts due and payable for agistment fees with the date and particulars of every payment, together with the owner's declaration hereinafter mentioned, and the register shall at all times during the usual business hours of the said Trust be open to inspection by any municipal ratepayer.

Stock at owner's risk.

113. All stock depasturing on the area shall be at the owner's risk.

Travelling stock to be depastured as directed by the Trust.

114. Any person or persons in charge of travelling stock shall depasture such stock on such portion of the said area as shall be directed or defined by the Trust or by some person or persons duly appointed or authorised so to do on their behalf, and on entering and departing therefrom shall travel such stock along such road or roads only, within the area, as they, the Trust, may direct.

Limitation as to time allowed for travelling stock.

115. Travelling stock, including horses, cattle, and sheep, will not be allowed to depasture on the area longer than three days; the first day to be free of charge, and for the remaining two days or part of a day will be charged as per Schedule B.

Time and place allowed for depasturing working stock.

116. Carriers', teamsters', and drovers' working stock will be allowed on such portions of the area only as shall be directed by the Trust, or its duly appointed officer, and such permission shall apply only to the time specified in each case, and they will be charged as per Schedule B, and notice must be given to the Herdsman within eight hours after the arrival of such stock.

Appointment of Herdsman.

117. The said Trust may from time to time appoint one or more competent persons to perform the duties of Herdsman, who shall be paid by the Trust the amount of salary it may from time to time think fit.

Pigs not allowed.

118. No pigs will be allowed on any part of the said area, and any found thereon will be impounded.

Penalty for depositing rubbish.

119. Any person who shall deposit rubbish on any part of the said area shall be liable, on conviction, to a penalty of not more than five pounds nor less than one pound.

Outside duties of herdsman

120. It shall be part of the herdsman's duties to carry out these By-laws, and to report any infringement thereof to the Trust's Clerk immediately on his discovering the same.

Herdsman to attend meetings of the Trust.

121. The herdsman shall also attend every ordinary meeting of the Trust, and report upon the management of the said unallotted area.

General duties of herdsman.

122. He shall devote the whole of his time to the performance of his several duties, and shall attend at the office of the Trust once in each day to receive instructions and to report to the secretary of the Trust.

Animals trespassing to be impounded.

123. He shall impound any animal found on the area except such as are registered and paid for, and such as are provided for by sections 115 and 116 of these By-laws.

Herdsman to bring in horses when required.

124. He shall on receipt of one shilling in addition to tolls, and after receiving twelve hours' notice bring in any horse from any portion of the area if so required by any owner on any days excepting Sundays.

Procedure in case of contagious disease among animals depastured.

125. He shall upon finding any animal upon any part of the said area suffering from any contagious disease send notice in writing to the owner of the animal, if the owner be known to him, stating that if such animal be not removed within twenty-four hours such animal will be destroyed, and he shall affix a similar notice to the notice board at the Court House, Hay, and should such animal not be removed within twenty-four hours from the service of the said notice upon the owner, or within twenty-four hours from the affixing of the said notice upon the said board, the said herdsman shall destroy the said animal accordingly.

Removal of dead animals.

126. If any animal be found dead on any part of the said area, the owner thereof shall, within twelve hours of the time of receiving notice to that effect, cause the same to be removed, buried, or burned; and any owner failing to comply with this part of the By-law shall, upon conviction, be liable to a penalty of not more than ten pounds nor less than one pound.

No materials to be removed without permission.

127. Any person who shall damage, cut, or remove any timber, or dig or remove any gravel, clay, loam, earth, sand, stone, or other material from any part of the said area without first having obtained permission from the Secretary to the Trust, shall be liable on conviction to a penalty of not more than ten pounds, nor less than two pounds, and the place from whence the timber, clay, loam, sand, or other material may be removed shall be pointed out by the Trust's officer.

Definition of "Stock."

128. In the foregoing Rules and Regulations "Stock" means and includes one or more horses, cattle, sheep, or goats.

Permits to remove timber.

129. The Trust's Secretary may, on payment to him of the charges fixed by Schedule C hereto, issue a permit in the form of Schedule D to any commoner to take any fallen timber or underwood from the area. Persons found removing timber without a permit will be liable to a penalty upon conviction of not exceeding ten pounds nor less than two pounds.

Entire horses.

130. No entire horse shall be allowed within the unallotted area under a penalty of not less than Five Pounds nor more than twenty pounds.

Penalty for infringements of By-laws.

131. Any person who shall be guilty of any offence against these By-laws, or any portion thereof to which no penalty is attached, shall be liable on conviction to a penalty of not more than ten pounds nor less than ten shillings.

SCHEDULE A.

Description and Number of Stock, the property of one owner to be depastured on the unallotted Irrigation Area and Scale of Pasture Fees.

Description of Stock.	Maximum Number.	Fees per head per annum.	
		£	s. d.
Horses—			
Each mare, colt, gelding or filly.....	12	0	12 6

Given under the Seal of the Trustees, Hay Irrigation Area.

Passed by the Hay Irrigation Trust,

(L.S.) F. A. BYRNE (Chairman).
(L.S.) T. W. BLANCHE (Secretary).

REGULATIONS.

1. All applications for irrigation allotments in the Hay Irrigation Area must be made in writing on forms to be supplied, addressed to the "President of the Board of Trustees, Hay Irrigation Trust," Council Chambers, Hay, accompanied by 10s. for every acre applied for (being not less than 5 nor more than 40 acres), this sum to be placed to selector's credit against rent.

2. All allotments shall be thrown open for selection on a day to be fixed by the Trust, public notice of which shall be given by advertisement or otherwise, as the Trust may direct.

3. Applications for any lot or lots with deposit aforesaid may be sent in to the President of the Board of Trustees, Hay Irrigation Trust, Council Chambers, Hay, at any time after being advertised, up to 11 a.m. on the day of Selection. All such applications will be considered as simultaneous, and ballot shall be made for priority of selection. In the event of there being no land left for selection, or applicant declining to take any that may be left, the deposit will be returned in full.

4. Allotments offered and not selected may be taken up by written application, accompanied by a deposit of 10s. per acre, on any Thursday from 11 a.m. to 3 p.m. at the Hay Municipal Council Chambers, or such other place as may from time to time be declared and published by the Board of Trustees. If more than one application be presented at the same time for any lot or lots, ballot shall be taken, and the winner shall be declared the selector of any such lot or lots.

5. Title deeds for every lot of 5 acres under seal of the Trust, on parchment, shall be issued to selectors, after improvements to the extent of £10 per acre have been made, subject to verification by the engineer and approval of the Trust. The President, two Trustees, and the Secretary to the Trust shall sign every such title deed. The lease of each allotment shall date from the day on which water is laid on to such allotment.

6. Rents of allotments shall not exceed 10s. per acre per annum, but only at the rate of 2s. per acre per annum shall be required until water be laid on to one part of each allotment.

7. Rents shall be paid yearly in advance on or before July 1st in each year. After exhausting the original 10s. deposit the next payment shall be the amount requisite to make up the rent to the first day of July next ensuing. All arrears of rent or water charges shall bear interest at the rate of 8 per cent. per annum with half-yearly rests, when unpaid interest shall be added to the principal debt. But this shall not prevent the Board from suing for arrears at any time.

8. No transfer of any lot or lots shall be allowed without the special sanction of the Trust, until improvements to an aggregate value of £10 per acre have been made, and title deed issued. The following shall be deemed improvements:—Fences, houses, yards, pens, outhouses, levelling, grading, cutting or raising water-channels, original breaking up or trenching and manuring the land to fit it for culture, vines, planting and trellising, trees of all sorts, permanent crops and grasses, and everything fixed on the land whereby its value is increased beyond the current year.

9. Allotments may be transferred to persons (who by the rules are eligible to hold the same) by registration in the books of the Trust and endorsement on the title deeds. The fee for registration shall be 2s. 6d. for every lot of five acres.

10. Lessees may mortgage their right, title, and interest in their holdings by registration in the books of the Trust and endorsement on the title deed; fee 2s. 6d. each lot.

11. The rates for water supplied by the Trust shall be :—
1. For domestic use, watering stock, and washing sheep, 1s per 1,000 gallons.
 2. For irrigation—the actual cost of pumping the water, which is to be arrived at as follows :—The current expenses incurred in pumping shall be calculated in January and July of each year from which shall be deducted all moneys charged for water supplied to persons other than lessees.
 3. For power and for manufacturing and other purposes not included in the last two preceding sub-clauses 6d. per 1,000 gallons. The charge for water supplied to persons other than lessees shall be by special agreement.
12. The Trust shall purchase and make and maintain all works, machinery, main channels, reservoirs, and other needful public works, and shall pay for same out of general revenue.
13. The Trust retains the right to take a supply of water through any holding, but shall make fair compensation to the lessee for loss and damage caused by doing so.
14. The lessees shall be supplied in rotation, and they must make preparations to take a supply by night or day at the times settled upon by the officers of the Trust, failing which they shall not be entitled to a supply until the next periodical watering. Any person taking water outside the period of his rotation shall be liable to a penalty not exceeding £5 and shall pay at the rate of 2d. per 1,000 gallons on the quantity estimated to have been taken; nevertheless, should cases occur where water is required urgently out of rotation, the Trust may, in writing, give the needful permission, provided that no rights to water be prejudicially affected thereby.
15. All disputes between lessees or between the Board and lessees shall be settled by two arbitrators, one to be chosen by the lessees and one by the Board. In case they cannot agree, the arbitrators shall appoint an umpire, whose decision shall be binding, and it shall be part and parcel of the lease that no appeal from the arbitrators' decision shall be made.
16. In the event of rent or water charge of any lot being over four years in arrears the right, title, and interest of the lessee may be sold by public auction duly advertised in the local papers. Any surplus remaining after paying arrears, cost of sale, and all other expenses connected therewith shall

be paid to the defaulting lessee, or his representatives. The Trust may let from year to year any lot reasonably supposed to be abandoned until the four years aforesaid have expired, the rent to be placed to the funds of the Trust.

17. Boundary fencing must be rabbit-proof, lessees to share cost of dividing fences. Nevertheless, any two or more adjoining lessees may, by agreement, for not more than one year (but renewable), have a ring fence only, with or without subdivisions. All such agreements to bind the land, and must be filed in the office of the Trust.

18. The Trust shall not be liable to pay for the proportion of any fence or fences between lots leased and unleased.

19. When water is supplied under this Act to neighbouring owners of property the minimum charge shall, in addition to the cost of pumping, include a fair proportion of interest on pipes, channels, plant and machinery, wear and tear, management and office expenses.

20. Asiatics shall not be eligible to select or to hold allotments on the "Hay Irrigation Area," except by special approval of the Trust.

21. If at any time, previous to the whole irrigation area being selected, a number of persons notify the Board, in writing, that they are desirous of selecting 100 acres or more, and there are not sufficient surveyed lots available, it shall be obligatory on the Board, upon such applicants depositing 10s. per acre, to cause a special survey of at least double the area so applied for, or if there be not that quantity available, then of so much as there may be, and to advertise the same as open for selection within three months from such notification and deposit.

22. The Trust may at any time by its officers enter upon the land of any lessee for the purpose of inspection or regulating the water supply, and in the event of any water being used in a wasteful or unauthorised manner such officer shall have power to stop the supply of water to such holding until a better system is introduced, and the person responsible for the waste may be prosecuted in addition to being charged for the water wasted.

Passed by the Hay Irrigation Trust.

NEW SOUTH WALES.

PUBLIC WORKS ACT OF 1888.
(RESUMPTION OF LAND, GENERAL CEMETERY AT ECCLESTON.)

Presented to Parliament, pursuant to Act 51 Vic. No. 37.

**NOTIFICATION OF RESUMPTION OF LAND UNDER
THE "PUBLIC WORKS ACT OF 1888," 51 VICTORIA
No. 37.**

NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable Sir ROBERT WILLIAM
DUFF, a Member of Her Majesty's Most
(L.S.) } Honourable Privy Council, a Knight
R. W. DUFF, } Grand Cross of the Most Distinguished
Governor. } Order of Saint Michael and Saint George,
Governor and Commander-in-Chief of
the Colony of New South Wales and its
Dependencies.

WHEREAS I, Sir ROBERT WILLIAM DUFF, the Governor aforesaid, with the advice of the Executive Council, have directed that a certain public work, that is to say, a General Cemetery at Eccleston, in the said Colony, for which public funds are lawfully available, the estimated cost of which does not exceed twenty thousand pounds, shall be carried out under the provisions of the "Public Works Act of 1888" as an authorised work by the Minister for Public Works as Constructing Authority, and that the land described in the Schedule hereto, which is in my opinion required for carrying out the said work, shall be acquired by taking the same under the "Lands for Public Purposes Acquisition Act," as adopted by the "Public Works Act of 1888": Now, therefore, I, the said Governor, with the advice aforesaid, in pursuance of the "Public Works Act of 1888," do declare by this notification, to be published in the Government Gazette, and in one or more newspapers published or circulated in the Police District wherein the said land is situated, that the Crown Land comprised within the description set forth in the Schedule hereto has been appropriated, and the private property within such description has been resumed, for the public purpose aforesaid, to the intent that upon the publication of this notification in the Gazette, the said land described in the said Schedule hereto shall forthwith be vested in the said Con-

structing Authority as a corporation sole on behalf of Her Majesty, for the purpose of the said "Public Works Act of 1888," for an estate in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the further intent that the legal estate therein, together with all powers incident thereto or conferred by the said last-mentioned Act, shall be vested in such Constructing Authority as trustee; and I declare that the following is the Schedule of the land hereinbefore referred to:—

All that piece or parcel of land situate at Eccleston, in the parish of Holywell, county of Durham, and Colony of New South Wales, being part of George Townshend's grant of 1,120 acres: Commencing on the south side of the road from Eccleston to Gresford, at a point bearing north 26 degrees 55 minutes 47 seconds west 40 chains 73 $\frac{5}{16}$ links from the north-east corner of portion 14 of 50 acres; and bounded thence on the north-east by that side of that road bearing north 68 degrees 44 minutes west 6 chains 67 links; thence on the north-west by a line bearing south 21 degrees 16 minutes west 3 chains; thence on the south-west by a line bearing south 68 degrees 44 minutes east 6 chains 67 links; and thence on the south-east by a line bearing north 21 degrees 16 minutes east 3 chains, to the point of commencement, containing by admeasurement 2 acres, and said to be in the possession of H. and R. Sivyler,—as shown on plan catalogued Ms. 493 Md.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-fourth day of June, in the year of our Lord one thousand eight hundred and ninety-three, and in the fifty-seventh year of Her Majesty's Reign.

By His Excellency's Command,
WILLIAM JOHN LYNE.
GOD SAVE THE QUEEN!

NEW SOUTH WALES.

PUBLIC WORKS ACT OF 1888.

(RESUMPTION OF LAND FOR THE ESTABLISHMENT OF A GENERAL CEMETERY AT PLATTSBURG.)

Presented to Parliament, pursuant to Act 51 Vic. No. 37.

NOTIFICATION OF RESUMPTION OF LAND UNDER
THE "PUBLIC WORKS ACT OF 1888," 51 VICTORIA
No. 37.

NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable Sir ROBERT WILLIAM
(L.S.) } DUFF, a Member of Her Majesty's Most
Honourable Privy Council, a Knight
Grand Cross of the Most Distinguished

By Deputation from Order of Saint Michael and Saint George,
His Excellency: Governor and Commander-in-Chief of
FREDK. M. DARLEY, the Colony of New South Wales and its
Lieutenant-Governor Dependencies.

WHEREAS I, Sir ROBERT WILLIAM DUFF, the Governor aforesaid, with the advice of the Executive Council, have directed that a certain public work, that is to say, a General Cemetery at Plattsburg, in the said Colony, the estimated cost of which does not exceed twenty thousand pounds, shall be carried out under the provisions of the "Public Works Act of 1888," as an authorised work by the Minister for Public Works as Constructing Authority; and that the land described in the Schedule hereto, which is in my opinion required for carrying out the said work, shall be acquired by taking the same under the "Lands for Public Purposes Acquisition Act" as adopted by the "Public Works Act of 1888": Now, therefore, I, the said Governor, with the advice aforesaid, in pursuance of the "Public Works Act of 1888," do declare by this notification, to be published in the Government Gazette and in one or more newspapers published or circulated in the Police District wherein the said land is situated, that the Crown Land comprised within the description set forth in the Schedule hereto has been appropriated, and the private property within such description has been resumed, for the public purpose aforesaid, to the intent that upon the publication of this notification in the Gazette, the said land described in the said Schedule hereto shall forthwith be vested in the said Constructing Authority as a corporation sole on behalf of Her Majesty, for the purposes of the said "Public Works Act of 1888," for an estate in

fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever, and to the further intent that the legal estate therein, together with all powers incident thereto or conferred by the said last-mentioned Act, shall be vested in such Constructing Authority as a Trustee: And I declare that the following is the Schedule of land hereinbefore referred to:—

SCHEDULE.

All that piece or parcel of land situate at Plattsburg, in the parish of Hexham, county of Northumberland, and Colony of New South Wales, being part of J. B. Weeler's grant of 1,200 acres: Commencing on the north-west side of the road from Wallsend to Sandgate, at a point bearing south 76 degrees 30 minutes east and distant 74 chains 15 links from the north-west corner of C. Brooks' 320 acres, portion 24; and bounded thence on the south-west by a line bearing north 60 degrees 36 minutes west 11 chains 80 links; thence on the north-west by a line bearing north 29 degrees 24 minutes east 12 chains 75 links; thence on the north-east by a line bearing south 60 degrees 36 minutes east 15 chains 55 links to the north-west side of the road from Wallsend to Sandgate before mentioned; and thence on the south-east by north-west sides of that road bearing south 58 degrees 56 minutes west 7 chains $61\frac{5}{10}$ links, and south 29 degrees 24 minutes west 6 chains $12\frac{5}{10}$ links to the point of commencement,—containing by admeasurement 16 acres 1 rood, and said to be in the possession of the Wallsend Coal Company, shown on plan catalogued Ms. 522 Md.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this eleventh day of November, in the year of our Lord one thousand eight hundred and ninety-three, and in the fifty-seventh year of Her Majesty's Reign.

By His Excellency's Command,

WILLIAM JOHN LYNE.

GOD SAVE THE QUEEN!

1893.

NEW SOUTH WALES.

PUBLIC WORKS ACT OF 1888.

(RESUMPTION OF LAND FOR FLOOD EMBANKMENTS FOR PROTECTION OF TOWN OF WEST MAITLAND.)

Presented to Parliament, pursuant to Act 51 Vic. No. 37.

NOTIFICATION OF RESUMPTION OF LAND UNDER THE "PUBLIC WORKS ACT OF 1888," 51 VICTORIA No. 37.

NEW SOUTH WALES, } Proclamation by His Excellency The
to wit. } Right Honourable Sir ROBERT WILLIAM
DUFF, a Member of Her Majesty's Most
Honourable Privy Council, a Knight
(L.S.) } Grand Cross of the Most Distinguished
Order of Saint Michael and Saint George,
Governor and Commander-in-Chief of
R. W. DUFF, } the Colony of New South Wales and its
Governor. } Dependencies.

WHEREAS I, Sir ROBERT WILLIAM DUFF, the Governor aforesaid, with the advice of the Executive Council, have directed that a certain public work, that is to say, the Construction of Flood Embankments for the protection of the Town of West Maitland, in the said Colony, the estimated cost of which does not exceed twenty thousand pounds, shall be carried out under the provisions of the "Public Works Act of 1888," as an authorised work by the Minister for Public Works as Constructing Authority, and that the land described in the Schedule hereto, which is in my opinion required for carrying out the said work, shall be acquired by taking the same under the "Lands for Public Purposes Acquisition Act," as adopted by the "Public Works Act of 1888": Now, therefore, I, the said Governor, with the advice aforesaid, in pursuance of the "Public Works Act of 1888," do declare by this notification, to be published in the Government Gazette, and in one or more newspapers published or circulated in the Police District wherein the said land is situated, that the Crown Land comprised within the description set forth in the Schedule hereto has been appropriated, and the private property within such description has been resumed, for the public purpose aforesaid, to the intent that upon the publication of this notification in the Gazette, the said land

described in the said Schedule hereto shall forthwith be vested in the said Constructing Authority as a corporation sole on behalf of Her Majesty, for the purposes of the said "Public Works Act of 1888," for an estate in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the further intent that the legal estate therein, together with all powers incident thereto or conferred by the said last-mentioned Act, shall be vested in such Constructing Authority as a Trustee; and I declare that the following is the Schedule of land hereinbefore referred to:—

SCHEDULE.

All that piece or parcel of land situate in the parish of Maitland, county of Northumberland, and Colony of New South Wales, being part of W. B. Wilkinson's grant of 1,000 acres: Commencing at a point bearing north 29 degrees 27 minutes east and distant 9,276 feet from the south-west corner of the said grant; and bounded thence by lines bearing south 88 degrees 20 minutes east 493 feet 6 inches, south 46 degrees 23 minutes east 100 feet, and north 81 degrees 37 minutes west 571 feet 9 inches, to the point of commencement,—be the said several dimensions all a little more or less, containing 26 perches or thereabouts, and said to be in the possession of Charles Cummins.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this eighteenth day of November, in the year of our Lord one thousand eight hundred and ninety-three, and in the fifty-seventh year of Her Majesty's Reign.

By His Excellency's Command,

WILLIAM JOHN LYNE.

GOD SAVE THE QUEEN!
