## NEW SOUTH WALES.

RULES OF THE SUPREME COURT OF NEW SOUTH WALES.  
(IN LUNACY.)

Presented to Parliament pursuant to the Act 56 Vic. No. 23, sec. 20.

In the Supreme Court of New South Wales. In Lunacy.

Friday, the 11th day of May, A.D. 1894.

## LUNACY RULES.

In pursuance of the powers vested in us by the "Lunacy Act Further Amendment Act of 1893," we do order and direct in manner following:—

## THE COURT VISITOR.

1. The Order of the Court in its Lunacy Jurisdiction made in the matter of certain insane persons on the Petition of the Master in Lunacy, and dated the 9th day of June, 1886, and set out in the schedule hereto, and hereafter referred to as the said Order, is to be read with and as forming part of these Rules, so far as the same is set out in the schedule.

2. The Court Visitor shall, without special order, of the Court in that behalf, proceed to visit any person who may hereafter be declared of unsound mind and incapable of managing his affairs pursuant to the provisions of the said order upon receipt from the Master of such sufficient abstracts of reports as to the fortune, income, and maintenance of such insane persons as are directed to be sent to him by the said Order.

3. The Master shall, without special order, inquire and report what fees and expenses (if any) ought to be paid to the Court Visitor in respect of the visits directed by the said Order.

4. The Master may from time to time in his discretion report to the Court that any of the fees directed to be paid to the Court Visitor out of the estate of any insane person ought to be increased or diminished, or that such fees ought not to be further paid, and upon the confirmation of the Master's Report such fees shall be varied or cease accordingly.

5. The Master shall collect all fees and expenses directed to be paid to the Court Visitor, and shall transmit the same to him, and may report to the Court any failure to pay the same after due request; and he may commit to the Crown Solicitor the conduct of the matter of enforcing payment of such arrears.

## PER-CENTAGE AND FEES.

6. There shall be paid to the Master a per-centage at the rate of four per cent. per annum on the clear annual income of every insane person so found by inquisition or by declaration under the Principal Act, unless the Court or Judge shall otherwise order.

7. There shall be paid a per-centage at the rate of four per cent. per annum on the clear annual income of every insane patient whose estate is under the care and management of the Master: Provided that no per-centage shall be levied on such portions of any such clear annual income as the Master may have paid to the Consolidated Revenue for the maintenance, clothing, medicine, and care of any such insane patient pursuant to the above Acts: Provided further that the Master may in his discretion reduce such rate as may seem reasonable.

8. In the calculation of the per-centage, sums less than one pound shall be disregarded.

9. The Master shall certify the annual amount of money payable to him in respect of per-centage upon the income of each insane person, and the person who is to pay the same, and the time within which the same is to be paid: Provided that the Master may in his discretion withdraw, without further order, sufficient interest accrued on any Government debentures or on money in Court standing to the credit of the said insane person to pay to the Consolidated Revenue the whole or any part of such per-centage.

10. The Master shall certify the amount of per-centage payable upon the income of each insane patient whose estate is under his care and management, and shall pay the same to the Consolidated Revenue out of such moneys coming to his hands on account of the income of the said insane patient.

11. An account shall be kept and recorded by the Master of all moneys received by him, and of all moneys paid by him to the Consolidated Revenue in the estate of each insane person or patient in respect of per-centage.

12. Where it appears to the Master, with a view to the establishment of a uniform period for the payment of per-centage, or for other purposes, to be expedient, he may make in any case a certificate comprising the income for a period greater or less than one year, and stating the amount of per-centage payable for such period.

13. The Master shall, once at least in every six months, and oftener if he shall think fit, certify to the Court the names of all persons (if any) who are then in default in paying the amount certified to be payable by them in respect of the said per-centage, and he may commit to the Crown Solicitor the conduct of the matter of enforcing payment of such arrears.

## FEES.

14. The following Court fees shall be payable in Lunacy :—

| TABLE OF FEES PAYABLE IN LUNACY.   |     | £ | s. | d. |

## ALLOWANCE TO COUNTRY WITNESSES.

From 4s. to 5s. per day, in addition to the above-mentioned allowances, and in addition to the sum reasonably paid for travelling expenses.

## SCHEDULE.

*Order of Court, dated 9th June, 1886, referred to in Rule 58.*

His Honor doth order that Dr. Frederick Norton Manning, Inspector-General of the Insane, be appointed Visitor of Court Patients, and he is hereinafter referred to as the Court Visitor; and it is ordered that the Master in Lunacy do, from time to time, furnish the said Court Visitor with sufficient Abstracts of Reports as to the fortune, income, and maintenance of each Court patient now found or declared, or hereafter to be declared, insane under the provisions of the said Act and of the Orders, if any, altering or adding to any such report, and that the said Master do inform the said Visitor of any increase which may have accrued in the fortune of, and of every change which may have been made in the allowance or scheme for the maintenance of any Court patient so that at all times the said Court Visitor may be fully acquainted with the amount of the fortune and income of each and every Court patient and also with the scheme approved and the allowance made for their maintenance severally; and it is further ordered that the said Court Visitor do visit each of the said Court patients and all other persons who may hereafter be declared under the provisions of the said Act to be persons of unsound mind at least once in every six months, and also on such other special occasion as he may think fit or as to the Court or Master may seem necessary. And that he do on each occasion of visiting any Court patient inquire and examine whether such patient is maintained in a suitable and proper manner, having regard to the then existing amount of the allowance ordered to be paid and the then existing scheme (if any) approved of for the maintenance of such patient, and also whether, having regard to the mental and bodily health and to the then fortune and income of such patient, it appears expedient that any and what addition or diminution or other change shall be made in the scheme for or manner of any patient's maintenance, and in every case in which he may consider it necessary that any such addition or change shall be made, that he do at once report the same to the said Master. And it is further ordered that the said Court Visitor do report annually in the month of February to the Primary Judge in Equity and give particulars of the mental and bodily health of each Court patient, the dates on which visited, the conditions under which the patient is living, together with any recommendations that may appear to him necessary or serviceable; and it is further ordered that the said Court Visitor be paid a fee of three guineas for each half-yearly visit made by him as aforesaid, provided in any event he shall be entitled to receive for such services an aggregate amount not less than £100 per annum. Provided that such fees shall include and cover all the travelling and other expenses incurred by him in the performance of his duties as such Visitor aforesaid, save and except the expenses of any special visit that may be made under the conditions of the Court or of any visit involving expense and loss of time, not in the opinion of the Master contemplated by this scheme in any of which cases the Master may allow such sum as he shall consider appropriate to the services rendered and the time expended, and the expenses incurred: Provided that in any case the Master may appoint some other fit and proper person to visit any Court patient in the place and stead of the Court Visitor, and upon such terms as to remuneration over and above the fee of three guineas as the circumstances of the case may require, and the Court may approve.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CASE OF REGINA *v* WILLIAM BYRNES AND OTHERS CONNECTED  
WITH THE IMPERIAL LAND, BUILDING, AND DEPOSIT COM-  
PANY (LIMITED).

(DEPOSITIONS IN.)

*Ordered by the Legislative Assembly to be printed, 17 May, 1894.*

The Bench of Magistrates, Central Police Office, to The Secretary to The Attorney-  
General.

Transmitting depositions in the case Regina *v*. William Byrnes and others charged with conspiracy.

Sir,

Central Police Office, Sydney, 24 August, 1893.

I have the honor by direction of the Bench of Magistrates, to transmit herewith the depositions and the other documents in the case of William Byrnes, William Graham Cameron, William Martin, Evelyn Manning, James Green, Henry Birrell Brewer, William Rooke Row, and William Percy Smairl, who have been committed to take their trial at the Central Criminal Court to be held at Sydney, on Monday, the 18th day of September, 1893. The accused have been admitted to bail with the exception of William Percy Smairl, each in the sum of £200, with one surety in the sum of £200, Byrnes' surety being John Booth, of 138, Liverpool-street, Sydney, hydropathist; Cameron's being Thomas Morrison, of 380, George-street, Sydney, draper; Martin's being Gustavus John Waterhouse, of Pitt-street, Sydney; Manning's being Zachary Collis Barry, of Nicholson-street, Burwood, Secretary of Fire Brigades Board; Green's being George Wallace, of Stanmore, solicitor; Brewer's being Thomas Hughes Barlow, of "Mount Vernon," Botany-street, Randwick, grocer; and Row's being Warren Elf Row, of George-street North, Sydney, chemist.

The exhibits enclosed consist of a Certificate of Incorporation, a memorandum and articles of association, thirty-two books (account books, minute book and others), five balance-sheets, thirteen letters, four deposit receipts, butts of deposit receipts, two receipts, nine cheques, a guarantee, two deposit slips, an affidavit of proof, a valuation, a copy of a letter, a certified copy of an account, five butts of cheque books, cheques, vouchers, &c., in Martin's account, and a copy of an article in the *Daily Telegraph*.

I have, &amp;c.,

FRANCIS S. ISAACS,

Clerk of Petty Sessions and Chamber Magistrate.

P.S.—28/8/93. Since writing the above, the following witnesses have been bound over, viz., William Thomas Ball, of 420, George-street, Sydney, accountant; William Stronge, of Station-street, Newtown, retired civil servant; Ernest Hurley, clerk in the Registrar-General's Department; Jonathan Wiley, of Trafalgar-street, Petersham, accountant.

New South Wales, }  
City of Sydney, }  
to wit.

## Depositions of Witnesses.

THE examination of Ernest Hurley, of Sydney, clerk; Edward Harrison, of Sydney, clerk; Jonathan Wiley, of Sydney, accountant; George Guile, of Redfern, builder; William Stronge, of Newtown, retired civil servant; William Thomas Ball, of Sydney, accountant; Spence Hodgkinson Puckle, of Sydney, newspaper employee; William John M'George, of Sydney, Bank manager; John Docker, of Sydney, Bank clerk; Robert Charles Stephen Wilkinson, of Sydney, Bank clerk; William Henry Chapman, of Sydney, mining agent; Frederick Moorehouse, of Sydney, architect; Ambrose Jones, of Sydney, clerk; James Gregg, of Sydney, managing director; George Edward Hilliard, of Sydney, accountant; Edmond Simmons Mayhew, of Sydney, Bank teller, taken on oath the 19th, 20th, 21st, 24th, and 31st days of July, and the 3rd 7th, 9th, 10th, 11th, 14th, and 21st days of August, in the year of our Lord one thousand eight hundred and ninety-three, at Sydney, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, in the presence and hearing of William Byrnes, William Graham Cameron, William Martin, Evelyn Manning, James Green, Henry Birrell Brewer, William Rooke Row, and William Percy Smairl, who are charged this day before me for that they, the said William Byrnes, William Graham Cameron, William Martin, Evelyn Manning, James Green, Henry Birrell Brewer, William Rooke Row, and William Percy Smairl, before and at the time of the committing of the offence hereinafter mentioned were connected with the Imperial Land, Building, and Deposit Company (Limited), the said William Byrnes, William Graham Cameron, William Martin, Evelyn Manning, James Green, as directors, the said Henry Birrell Brewer, and William Rooke Row, as auditors, and the said William Percy Smairl, as manager of the said Company, and that while so connected with the

said Company as aforesaid, on divers days and times, before the 15th day of July, 1893, and with divers other persons, at Sydney, in the Colony aforesaid, between the 9th day of March, A.D. 1886, and the 14th day of September, A.D. 1891, did amongst themselves and with divers other persons conspire falsely and fraudulently to publish and represent to the shareholders, creditors, and depositors of the said Company, and to divers other persons and to the public, the subjects of Her Majesty the Queen, that the said Company and its affairs had been and were in a sound and prosperous condition, and that the said Company possessed assets to certain large values and amounts, and that the purchases, investments, and advances which had been made with the same were secure, profitable, and valuable, and that large profits were from time to time derived from the business carried on by the said Company, and such as from time to time to enable certain large dividends to be declared and paid therefrom to the said shareholders, and certain high rates of interest to be paid therefrom to the said depositors, and that certain large numbers of shares in the said Company had been applied for and taken up, and that the said Company was possessed of a subscribed and paid-up capital to certain large amounts, and that certain large sums of money had been deposited with the said Company, and that certain deposit receipts were good and valid and available deposit receipts for the said sums, the said William Byrnes, William Graham Cameron, William Martin, Evelyn Manning, James Green, Henry Birrel Brewer, William Rooke Row, and William Percy Smairl, well knowing that the said Company and its affairs had not been and were not in a sound and prosperous condition, and that the said Company did not possess assets to the said large values and amounts, and that the said purchases, investments, and advances were not secure, profitable, and valuable, and that large profits were not from time to time derived from the business carried on by the said Company, nor such as from time to time to enable the said large dividends to be declared and paid therefrom to the said shareholders, and the said high rates of interest to be paid to the said depositors, and that the said large numbers of shares in the said Company had not been applied for or taken up, and that the said Company was not possessed of subscribed and paid-up capital to the said large amounts, and that the said large sums of money had not been deposited with the said Company, and that the said deposit receipts were not good and valid and available deposit receipts for the said sums, with intent to deceive and defraud the said shareholders, creditors, and depositors, and the said divers other persons and the public, the subjects of Her Majesty the Queen, and to induce them to purchase and hold shares in the said Company, and to become customers and depositors of the said Company, and to make advances of money to them, the said William Byrnes, William Graham Cameron, William Martin, Evelyn Manning, James Green, Henry Birrel Brewer, William Rooke Row, and William Percy Smairl, and to the said Company, and to contrive to do business with the said Company.

REGINA v. William Byrnes, William Graham Cameron, William Martin, Evelyn Manning, James Green, William Rooke Row, Henry Brewer, William Percy Smairl.

CONSPIRACY.

MR. C. G. Heydon for the prosecution, Mr. F. Gannon for defendant Byrnes, Mr. B. R. Wise for defendants Manning and Martin, Mr. Bruce Smith for defendants Brewer and Row, Mr. G. Wallace for defendant Green, Mr. Blackett for defendant Cameron, Mr. Shipway for defendant Smairl.

## Hinds v. Cameron and others.

Mr. C. G. Haydon for prosecution.

Mr. Shand for Cameron; Mr. Wise for Martin and Manning; Mr. Wallace for Green; Mr. Shipway for Smairl; Mr. Bruce Smith for Row and Brewer.

## Hinds v. Cameron and others.

Postponed until Monday next at 2 p.m. Bail, each self in £200, with two sureties in £100 each, or one in £200.

Sydney, 13 July, 1893.

C. DELOHERY, S.M.

## SUMMONS to a person charged with an indictable offence.

To William Percy Smairl, of Goulburn, in the Colony of New South Wales, William Graham Cameron, of Glen Innes, in the said Colony, and William Byrnes, James Green, Evelyn Manning, William Martin, Henry B. Brewer, and William R. Row, of Sydney, in the Metropolitan Police District in the said Colony.

WHEREAS you and each of you have been charged before the undersigned, one of Her Majesty's Justices of the Peace, in and for the said Colony, for that before and at the time of the committing of the offence hereinafter mentioned, you, the said William Byrnes, William Graham Cameron, James Green, Evelyn Manning, and William Martin, were Directors of a certain Public Company, called the Imperial Land, Building, and Deposit Company (Limited), and you the said Henry B. Brewer, and William R. Row were employed in auditing and investigating the affairs of the said Company, and you, the said William Percy Smairl were an officer of the said Company, and you and each of you being so connected with the said Company as aforesaid on divers days and times before the filing of the information herein, at Sydney, in the said Colony, between the 9th day of March, in the year of our Lord, one thousand eight hundred and eighty-six, and the 14th day of September, in the year of our Lord, one thousand eight hundred and ninety-one, did amongst yourselves, and with divers other persons, conspire falsely and fraudulently to publish and represent to the shareholders creditors and depositors of the said Company, and to divers other persons, and to the public, the subjects of Her Majesty the Queen, that the said Company and its affairs had been and were in a sound and prosperous condition, and that the said Company possessed assets to certain large values and amounts, and that the purchases, investments, and advances, which had been made with the same were secure, profitable, and valuable, and that large profits were from time to time derived from the business carried on by the said Company, and such as from time to time to enable certain large dividends to be declared and paid therefrom to the said shareholders, and certain high rates of interest to be paid therefrom to the said depositors, and that certain large numbers of shares in the said Company had been applied for and taken up, and that the said Company was possessed of a subscribed and paid-up capital to certain large amounts, and that certain large sums of money had been deposited with the said Company, and that certain deposit receipts were good and valid, and available deposit receipts for the said sums, you and each of you, well knowing that the said Company and its affairs had not been, and were not in a sound and prosperous condition, and that the said Company did not possess assets to the said large values and amounts, and that the said purchases, investments, and advances were not secure, profitable, and valuable, and that large profits were not from time to time derived from the business carried on by the said Company, nor such as from time to time to enable the said large dividends to be declared, and paid therefrom to the said shareholders and the said high rates of interest to be paid to the said depositors, and that the said large numbers of shares in the said Company had not been applied for or taken up, and that the said Company was not possessed of subscribed and paid-up capital to the said large amounts; and that the said large sums of money had not been deposited with the said Company; and that the said deposit receipts were not good and valid and available deposit receipts for the said sums, with intent to deceive and defraud the said shareholders, creditors, and depositors and the said divers other persons and the public, the subjects of Her Majesty the Queen; and to induce them to purchase and hold shares in the said Company, and to become customers, depositors, and creditors of the said Company; and to make advances of money to you and each of you, and to the said Company; and to continue to do business with the said Company.

These are, therefore, to command you and each of you, in Her Majesty's name, to be and appear before me on the 17th day of July, 1893, at 2 o'clock in the afternoon, at the Water Police Court, Sydney, or before such other Justice or Justices of the Peace for the same Colony as may then be there to answer to the said charge, and to be further dealt with according to law. Herein fail not.

Given under my hand and seal, this 15th day of July, in the year of our Lord 1893, at Sydney, in the Colony aforesaid,—

GEORGE H. SMITHERS, J.P.

Hinds

## Hinds v. Cameron and others.

Mr. Gannon for Byrnes; Mr. Blackett for Cameron.

Postponed until Wednesday next at *Central Police Court*. Bail, each self in £200, with two sureties in £100 each, or one in £200.

Sydney, 17th July, 1893.

C. DELOHERY, S.M.

This deponent, *Ernest Hurley*, on his oath, states:—I am a clerk in the Registrar-General's Office; I produce the certificate of incorporation, and memorandum of articles of association of the Imperial Land, Building, and Deposit Company (Limited); each is dated 27th April, 1886; I produce also the lists of shareholders of the Company for 1887, 1888, 1889, 1890, and purporting to be signed by E. J. Henry (1888), 1887 by W. P. Smairl, 1889 by Smairl, and 1890 by Smairl; they are all in the same condition as when they were lodged.

*By Mr. Wallace*: I know nothing personally about them; I only found them among the papers in the office.

Taken and sworn at the Central Police Court, }  
Sydney, this 19th day of July, 1893,— }

E. HURLEY.

GEORGE H. SMITHERS, J.P.

This deponent, *Edward Harrison*, on his oath, states:—I was in the employ of the Imperial Land, Building, and Deposit Company from April, 1887, to July, 1891; I was first employed as office-boy, then as teller; I began to act as teller occasionally, but not regularly, in June, 1887; I acted regularly as teller about July, 1888; then I was employed in making out the weekly balances; I was succeeded as teller by Mr. Heffernan in November, 1889; Smairl was manager of the Company while I was there; at one time he used to check the books once a day, but afterwards once a week; directors' meetings were held at the office every week; the counter cash-books at one time used to go into the directors' meetings; there were two of these books—one for receipts and one for disbursements; when I first went there it was not the regular practice to send these books into the meetings, but it afterwards became so; I know the signatures of the directors; I look at the signatures attached to the memorandum of association; the first is that of defendant Byrnes; his is the first to the articles also; the third signature to each is that of defendant Cameron; the next signature to each is that of defendant Smairl; the next is that of J. Wiley; the next is that of defendant, Martin, and the last, that of A. C. Hewlett, another director; I look at list of shareholders for 1887; it is signed by defendant Smairl; that for 1888 is signed by E. J. Henry, assistant manager; that for 1889 is signed by defendant Smairl; that for 1890 is also signed by defendant Smairl; I produce a counter cash-book of the Company for receipts from August, 1889, to September, 1891; I produced similar book from May, 1886, to July, 1889; I produce the counter cash-book disbursements, No. 1, from May, 1886, to February, 1891; I produce a similar book from March, 1891, to September, 1891; I produce the cash-book from 8th May, 1886, to September, 1891; I produce the journal from May, 1886, to September, 1891; I produce the general ledger from May, 1886; it was the only one ever kept; I produce the repayment ledger from 1886 to 1891; that was the only one kept; I produce the fixed deposit ledger; it was used for current accounts and fixed deposits; it was called current account ledger; it was the first book we had for fixed deposits; then we had a book for each kind of account deposit and current; I produce the current account ledger from May, 1890, to the end, and the fixed deposit ledger from May, 1890, to the end; I produce the share ledger, the only one used; I produce the current account balances from 30th June, but not showing what year, to 17th August, but not showing what year; there was another book of the same kind, I believe.

*By Mr. Wise*: I kept the books generally, but not the current account balances books.

*By Mr. Heydon*: I see a date in the book, September, 1890; the entries do not appear to go into any year but 1890.

*By Mr. Wise*: There is no entry dated June, 1890, in the book.

*By Mr. Heydon*: The book purports to contain weekly entries; the first entry is dated 30th June, but no year; that book was entered up from week to week, and shows the current account balances, and the fixed deposit balances, as they appeared in the books from week to week; it was never discontinued for twelve months and then taken up; I produce the rent ledger from August, 1889, to 18th August, 1891; that was the only one used; I produce the dividend book—the only one used; I produce the fixed deposit register, showing the deposits payable at call, at three months, at six months, and twelve months; it dates from 10th May, 1886, to October, 1889; the balance book was used for that purpose afterwards; I produce the "bills payable" book from 1886, to February, 1889; I produce the "bills receivable" book, from 12th April, 1886, to 6th February, 1888; I produce a "letters received" book, from 10th January, 1887, to 31st August, 1891; I produce another balance book of current accounts and fixed deposits, from 30th June, 1888, to 23rd June, 1890; I produce the share transfer journal, from 1886 to 1889; I produce the share register, from 1st May, 1886, to 14th November, 1890; I produce the minute book, from 9th March, 1886, to 14th September, 1891; I look at counter disbursements book, at folio 88, 5th August; the signatures of defendants, Martin and Green, appear thereon, under the words "inspecting vouchers"; at folios 90 and 91 and 92 appear the same signatures, also on folio 93; the auditors' and manager's initials appear on folio 93; on folio 94 the signatures of Martin and Green appear under "inspecting vouchers," also on folio 95; on folio 97 appear the signatures of H. L. Summerfield and defendant Martin, also on page 98; on page 102 appear the signatures of defendants Green and Martin; on page 100 appear the initials of the auditors; on page 103 appear the signatures of defendant Martin, and H. L. Summerfield; throughout the book the initials and signatures are those of the persons whose they purport to be; I look at book marked No. 7; I see in it the signatures of some of the directors, and that of the manager; the signatures and initials in that book are those of the persons whose they purport to be; I look at the book marked 4, and see in it the initials of the auditors, and the signatures of the defendants Green and Byrnes, Manning and Martin; I look at book marked No. 5, it contains the initials of the auditors and manager; I was there when the books were audited; I saw the books before the audit and afterwards, after the audit there were "ticks" in them which I had not seen in them previous to the audit; they used to audit the counter cash books

books; I look at that marked No. 5, and at page 67 see "ticks" made downwards with a metallic pencil; I now look through the book; at page 38 I see a different kind of ticks; there are so many I cannot distinguish one kind from another; at different times they may have used different pencils; I look at book marked No. 11; it contains coloured "ticks"; I cannot see any initials in it; on page 15, I see the initials "W. R. R. and H. B. B."; those are the initials of the auditors; at page 74, I see some figures in pencil; I cannot say who made those; there are metallic ticks throughout the book; I never knew anybody but the auditors to make such ticks; I have noticed the ticks in the book after the auditors had been through it; I had not noticed these ticks prior to the auditors going through the book; I look at book marked No. 10; on page 1 there are metallic ticks; on page 3 and 4 are the initials of the auditors, and the same kind of ticks; on page 11 the initials H.B. appear; they are those of defendant Brewer; on page 44 the initials H.B. appear; they are those of defendant Brewer; his initials appear also on pages 51 and 52 and 55; also on pages 56 and 57 and 58; on page 62 the initials of both defendants Row and Brewer appear; on pages 69, 72, 73, and 74 Brewer's initials appear; also on pages 78 and 79, 81 and 82, 83, 85, 87, 88, 91; I have looked all through the book, and in most of the pages appear the metallic ticks; they are different in shape to the ticks in the other books; some are like those, others are not; they have all the same colour, and appear to have been made with the same kind of pencil in each book; I look at book marked No. 9; at page 27 I see the signatures of defendants Manning and Martin; there are metallic ticks throughout that book; I look at book marked No. 8; at page 1 I see the words "audit tick," and same initials either "W.R.R. or H.B.B."; I cannot tell which; there are metallic ticks on that page; on page 20 I see the words "Cheques produced," and same initials which, I think, are those of one of the auditors; at page 21 I see the words "Tick bank-book" in metallic pencil; at page 55 the initials of both auditors appear; at page 57 I see written in metallic pencil "Audit tick bank-book"; at page 92 the initials of both auditors appear on each side of the page; I have looked through the book, and speaking generally the ticks appear throughout it; they are all the same metallic tick; I look at book marked No. 26; the writing generally in it is that of defendant Smairl, but in one or two instances is that of Henry the assistant manager; I look at page 52, and see there a balance-sheet to 30th September, 1886, signed by defendants Smairl and Byrnes; there is no report attached to it; the balance-sheet itself is in Smairl's handwriting; at page 94 there is a balance-sheet to 30th September, 1887; there is a printed balance-sheet to which is attached a letter signed by defendants Row, and Brewer; there is also a manuscript balance-sheet and profit and loss account; on this appears the entry "cash account audited and found correct," and "profit and loss account audited and found correct;" this is signed by Row and Brewer as auditors; there is also attached another manuscript balance-sheet, signed by defendant Cameron, as chairman, Smairl as manager, and Row and Brewer as auditors; a certificate signed by Row and Brewer accompanies this; on page 161 there is a printed balance-sheet for 1888 pasted in the book; the letter produced is signed by defendants Row and Brewer; I look at page 275 of minute-book (No. 26); a printed balance-sheet is pasted in the book; it is signed by defendants Row and Brewer; there is a letter dated 31st October, 1889, signed by them also; when I first went to the Company the directors met once a month; in minute-book (No. 26) Henry's writing appears at pages 10, 14, 16, 19, 21, 22, 23, 24, 25, 165, 166, 167, 168, 169, 170, 171, 172; on pages 283 and 284 the minutes are in my writing, copied from what Smairl gave me.

Exhibit No. 27.

*By Mr. Blackett:* From April, 1887, to August, 1888, I was employed as office boy; I was then pretty frequently out of the office, and it was no part of my duty to see about the books being taken into the directors' meetings; as far as I know it was in August, 1888, that the books were first taken in; I look at page 161 of minute-book (No. 26), and see a sentence there commencing, "Considerable discussion followed on the recommendation of the directors as to the disposal of the amount carried to the reserved fund; Mr. Cliff moved the following amendment:—'That instead of forming a reserve fund the amount be divided among the shareholders;' he pointed out that as the Company were represented by lands with considerable increased value, the shareholders were entitled to the same; the amendment was put and carried;" I know that Mr. Cliff was then a shareholder and not a director; he was never a director; I know that Cliff's opinion was thought a great deal of at the time; it appears from the minutes that all the directors voted for creating a reserve fund and not for declaring a dividend; defendant Cameron up to that time had been chairman of the Company; he resigned shortly after that meeting; I do not know why he resigned his position; after he resigned in January, 1889, he had nothing to do with the Company either as a director or in any other official capacity; he remained a shareholder up to the last, I believe; I look at book marked No. 12 at page 78, showing Cameron's account with the Company; he kept an ordinary banking account with the Company; on 21st February, 1888, the sum of £3,000 was paid into his credit; at page 305 it is shown that in April, 1889, his account was in credit £2,676 19s. 6d.; that amount was carried forward to the new ledger; between February, 1888, and April, 1889, the account was always in credit to the extent of £2,600 and £3,000.

Taken and sworn at the Central Police Court, Sydney, }  
this 19th day of July, 1893,—

EDWARD HARRISON.

GEORGE H. SMITHERS, J.P.

Postponed till 10 a.m. to-morrow. Same bail allowed.  
Sydney, 19 July, 1893.

GEORGE H. SMITHERS, J.P.

This deponent, *Edward Harrison*, recalled, on his oath, states, in answer to Mr. Wise:—I began to enter up the letter-book as soon as I joined the Company's service; I assisted Mr. Henry and Smairl with some of the other books; I only assisted them with the current account fixed deposit ledger No. 12; when I became teller, I kept the two counter-books, and entered the current account fixed deposit ledger from them; the books are marked respectively No. 4, No. 5, and No. 6 and No. 7; I only kept them while I was teller; I became teller about July, 1888; I was teller at different periods; Haffner became teller in November, 1889; from July, 1888, to November, 1889, I was teller; in November, 1889, I used to keep the weekly balance-book (No. 23); that was the only book I kept at that time; I used to check the books Haffner kept—the counter-books and the current account and fixed deposit ledger; I did not keep the latter book when I first became teller; Smairl posted it for some time after I became teller; he did so till January, 1889; it was posted from the two counter-books; when Haffner became teller, in

Exhibit No. 12.

November,

November, 1889, he kept the same books as I did; about that time we did away with the current account and fixed deposit ledger, and used two new ones, those marked 13 and 14; that was in August, 1889; Haffner also kept book marked No. 12; he also kept, on becoming teller, the books marked 15, 11, 9, 8, being the share register, the repayment ledger, the journal, and cash-book respectively; he also kept the current account balances book (No. 16), the rent ledger (No. 17); some entries of his are also in the dividend-book (No. 18); Smairl and Henry also made entries in that book; Smairl entered up the "bills books" (20 and 21); I also made entries in No. 20; Smairl kept the share transfer (No. 24); Smairl and Haffner kept the share-register (No. 25); No. 10 (the ledger) contains no entries by either Haffner, Marsh, or myself; when I gave up my duties as teller it was part of my duty to check Haffner's work; I was then second in command, and continued so till I left in July, 1891; the Company went into liquidation in September, 1891; when Haffner was sent to Newtown—in July, 1890—I became teller again, and continued so till I left in July, 1891; during that time I exercised a supervision over Haffner's and Marsh's work; during that time I had access to and made entries or checked the books kept by Marsh and Haffner, or in which they made entries; that was with the exception of book No. 10, the ledger; that was posted from the journal and cash-book kept by either Haffner or myself; I made no false entries in either of those books, nor passed any; as far as I know all the entries in those books were correct; although Smairl kept the ledger exclusively there was nothing to prevent me looking at the entries in it; I look at counter-book (No. 6); at folio 88 I see the signatures of Martin and Green under the words "inspecting vouchers"; inspecting vouchers means that they had gone through all the cheques for current and fixed deposits for the week, and if they found them correct they would tick the entries in the ledger; I have never found any one of those entries under inspecting vouchers to be incorrect; I know they are correct; I made the entries from the vouchers in the first instance, and know they were correct; I sent in the vouchers and books myself to the Board meetings; on one or two occasions depositors lived in the country, and we sent the cheques and vouchers for the depositors to sign; they would be returned the next week, and then ticked by the directors; my answer as to examination of vouchers refers to all books and to all places in the books where the words "inspecting vouchers" appear.

Exhibit No. 10.

*By Mr. Wallace:* The directors had nothing personally to do with the books beyond ticking them at the meeting; I look at share ledger (No. 15) and see Green's account there; it shows 6,667 contributing shares transferred to him, and represents an amount of £5,666 19s.; the share transfer shows that he paid 16s. per share for them; he was the holder of that number of shares when the Company went into liquidation, according to the books; for a long time before the liquidation of the Company the directors under a resolution of the Board received no fees; I do not know that prior to that resolution being passed Green had moved a resolution to the same effect, which was not passed; a rough minute-book was kept; the shares held by Martin and Manning have not been transferred according to the books; Manning holds twenty-five shares, series No. 2; those would be £25 shares; they were afterwards converted into £1 shares, consequently he would hold 625 £1 shares; Martin holds two shares, series No. 1, and ten shares No. 2 series; they would represent 350 £1 shares.

Folio 42, No. 10.

*By Mr. Wise:* I look at Manning's account opened on 30th September, 1886, and balanced in October, 1886; during that time the sum of £16 16s. 3d. was passed through the account; an account was opened on 30th September, 1887, in the name of Manning and Hills, and closed on 30th September, 1890; the total amount passed through the account during that time was £38 15s. 6d.; the account is balanced on 30th September, 1890; it shows that at no time during the three years had Manning an overdraft; I look at current account book at page 250; that shows Manning's account to have balanced; except for what he owes on calls, the books show that Manning is not indebted to the Company; I look at Martin's current account (folio 45, No. 13); it opens on 1st August, 1889, as transferred from the old book; it shows a credit balance then of £4 2s; the old book, No. 12, shows the account to have been opened on 26th November, 1887, with a credit of £78; during 1888 he appears to have received an overdraft of £100 on a deposit of deeds and scrip; on one occasion it was exceeded by £16; on 30th June, 1888, it was paid off and the account put in credit £11; since then it was always in credit except for one day, when an amount of £4 10s. was owing for interest; that was paid, and the account was after that always in credit.

*By Mr. Blackett:* I look at share register (No. 25, folio 110); I find there Cameron to be the holder of £250 worth of shares; on folio 21 I find him the holder of £150 worth of shares, and on folio 44 of £100 worth of shares; he remained the holder of those shares up to the time of liquidation.

*By Mr. Smith:* I joined the Company as office-boy in 1887, and passed from that position till I became next to the manager; during that time, at different periods, I have either kept or checked all the books in the office except No. 10; Mr. Henry was in the service of the Company while I was there for two years; a Mr. Quinan came there while Henry was there; I do not know where Henry is; Quinan stayed in the office six months; he is now in the Woollahra Council; Mr. Haffner and Mr. Marsh were also employed there during my time; a Mr. Packham used to come in to make up the balance-sheets prior to the auditors coming in; he prepared two or three balance-sheets; I cannot remember any occasion upon which he did not make up the balance-sheets; the auditors based their investigation upon the balance-sheets prepared by Packham and Smairl; I did not take much interest in the balance-sheets; I saw the written balances made out by Smairl and Packham; Packham examined the books to prepare the balance-sheets; upon one occasion Brewer and Row said Packham was wrong in his balance; I do not know what the mistake was; I look at counter cash-book (No. 5) at date September, 1887 (page 18); some of the entries are Smairl's, some Henry's; the entry under "Capital, £3,000" is Henry's; that was the first book in which entries were made of the business done over the counter; from it the other books were posted; the entry "Capital, £3,000" means that £3,000 had been received and paid to capital account; I look at book marked No. 6, page 93; the auditors' signatures are placed at the end of the column opposite the totals; that means the total is correct; as far as I know it is correct; at page 100 the auditors' initials appear opposite the total; that indicates the total is correct; as far as I know it is correct; I made up the totals myself; I look at book marked 4; on page 4 are the initials of the auditors put to the total for the month; I added that total, and it is correct; at the end of another month their initials appear again, certifying to the correctness of the totals; the total was made up by me, and is correct; at each place in the book where the initials appear as certifying to the correctness of the totals the totals are correct; they were made up by me; I look at book marked No. 5; at page 53 the auditors' initials appear to the total for the month; that total is correct; it was made

made up by me; the additions opposite which the initials appear through the book are correct; at page 67, on which the ticks are made downwards, the manager's initials appear, but not the auditors'; the ticks are placed opposite the amounts; those amounts were posted from the counter books, and are correct; I look at page 15 of book marked No. 11; the auditors' initials appear thereon, opposite the entry "change counted"; the entry is in Smairl's writing; I have no reason to think that entry is incorrect; I look at page 74; there are no initials or signatures of the auditors there; there are ticks opposite the amounts; those amounts are taken from the counter cash-book, and are correct; I know of no entry in the book with a tick placed opposite it, which is not correct; I look at book No. 10, and on page 1 find ticks placed opposite amounts posted from the other books; so far as I know all those amounts are correct; on page 4 I find the auditors' initials opposite a total; the total is in Smairl's writing, and is quite correct as far as I know; wherever the auditors' initials appear throughout the book as certifying to the correctness of the amounts, I know of no case in which any amount is incorrect; I look at book No. 8, page 1; there is nothing in that page which is incorrect as far as I know; I look at pages 20, 21, 25, 55, 57, and 92; on each of those pages I see either the ticks or initials of the auditors, or both; all the figures in each of those pages are correct as far as I know; I look at minute-book, page 52; I see a manuscript balance-sheet in Smairl's writing; at page 94 there is another balance-sheet in Smairl's writing [*Letter attached read to witness*]; there is nothing whatever in that letter which to my knowledge is incorrect; I look at page 275 [*letter attached to balance-sheet read to witness*]; there is nothing in that letter which, in my opinion, is incorrect; I cannot recollect over what period the audit lasted on that occasion; in any of those instances in which I have pointed out the ticks or initials or signatures of the auditors, I know of none in which there is any incorrect entry; I do not know of any instance in any of the books in which the auditor's initials, ticks, or signatures appear as certifying to an incorrect entry; any money lent by the Company would appear in the counter cash-book; I know of no advance made to either Brewer or Row; I know of no payment made to either of them by the Company, except their auditor's fees; Row held four shares of series No. 3; they would mean 100 £1 shares; he paid £22 10s. on them; Brewer had 250 £1 shares; they were taken up in August, 1886; I believe the auditors receive £10 10s. a year for auditing; Mr. Brewer paid more to the Company in calls than he received as auditor, and became liable for £200 more; Mr. Row paid £22 10s., and became liable for £77 10s.; each was auditor for four years, I believe; I know of no instance where the auditors were present at a Board meeting; as far as I know, the auditors never met the directors by arrangement; they never came to the office, except for the purpose of auditing or paying their calls; I look at repayment ledger (No. 11); that book was used for the purpose of entering the payments made by people who had bought land from the Company.

*By Mr. Heydon:* The auditors were paid £10 10s. the first year, and £15 15s. for the remaining three years, thus receiving a total amount of £55 15s.; Row paid £22 10s. on his shares, and Brewer, £43 15s.; Row was in the Railway Audit Office, and Brewer in the Treasury; I think the audit in the year 1889 or 1890 was a long one; it lasted about two weeks; I left the office at 11 p.m., and several times left the auditors at work in the office; they were there every night; Smairl was with them each night; I look at page 15, book marked No. 11; I cannot say in whose handwriting the words "change counted" are; they are written with a metallic pencil; I look at book No. 4, page 11, where the auditors' initials are; I cannot say in whose writing the figures in pencil under the stamp are; I look at page 18 of book No. 5; the following entry appears in Henry's writing; "September 28, 1887, W. G. Cameron, investing coupons, £3,000"; the £3,000 appears in a column headed "capital account" in Henry's writing; that indicates the receipt of £3,000 by the Company; September 30th was the end of the year for the Company; that money was paid in two days before the end of the Company's year; there is an account in the name of Mrs. Martin in the books; she was the wife of defendant Martin; it began June 30th, 1888, and closed August 31st, 1890; at that time it was in debit £292 5s. 9d.; it had been in debit at one time to the extent of £813; that was on 29th September, 1889; I do not know what the security was; the account is headed "Permission to overdraw £250, security deeds deposited"; that is in Smairl's writing; I remember defendant Martin and his wife being in the manager's office just before the account was opened; Martin received fees as architect from the Company; Mrs. Martin's account began with a debit of £128 1s. 5d.; on September 22nd £24 was paid in to the credit of the account.

*By Mr. Wise:* I cannot remember what security was given for Mrs. Martin's account; the book contains an entry that a property known as "Athens Bank" was the security; in 1889 the Company was building on a large scale at Macdonaldtown; it spent many thousands of pounds in building, and Martin was architect to the Company; the large debit amount occurred in Mrs. Martin's account during the first five or six months of 1889; after September it was greatly reduced; during the first few months there must have been fees due to Martin as architect; when Mrs. Martin's account was closed about £200 was owing to Martin by the Company as architect.

*By Mr. Smith:* The Company carried on the usual banking business over the counter, advancing money to the public; when we had large current accounts we used to keep the sum of £500 in cash to transact business; at the date of the entry "change counted" we had £500 in cash to meet emergencies, and the entry would mean that cash had been counted.

*By Mr. Shipway:* I look at book No. 5, page 18; the entry "investing coupons, £3,000," is in Henry's writing; I look at the counter cash-books; Smairl's initials in them mean that he had checked my work and found it correct; that refers to all Smairl's initials wherever they appear in those books; the meeting at which Mr. Cliff's resolution was carried was held in the afternoon, I believe; it may have taken place at night time; I was not present at the meeting; I was in the office, but not in the board room; it was not a quiet meeting; I could hear what was said if the windows were shut, and there was not much traffic in the street; I could hear Smairl talking, but could not hear what he said.

*By Mr. Wise:* I had not an intimate knowledge of the books and transactions of the Company from 1888, although I could look at any of the books; I had an acquaintance with all the transactions of the Company that appear in the books; I managed the business of the Company in Smairl's absence for two weeks in October, 1890; the failure of the Company resulted, in my opinion, from the depreciation in the value of land; I know that valuations were obtained from Hardie and Gorman, and Richardson and Wrench, prior to the balance-sheets of 1889 and 1890; I know of nothing in connection with the transactions of the Company that, as a matter of fact, would tell against Manning or Martin; I have never seen either of them, singly or with any other person, do anything calculated to deceive or defraud anybody; as far

far as I could see all the transactions of the Company were conducted in an open straightforward manner; that applies to all the defendants; the book marked No. 10, and kept by Smairl, I had occasion to look at now and then, and found the entries in all cases correct.

*By Mr. Smith:* I did not say yesterday that the counter cash-book had been altered.  
Taken and sworn at the Central Police Court, } EDWARD HARRISON.  
Sydney, this 20th day of July, 1893,— }

GEORGE H. SMITHERS, J.P.

This deponent, *Jonathan Wiley*, on his oath states:—I am an accountant and property agent, residing at Stanmore; I was a shareholder in the Imperial Land, Building, and Deposit Company from the inception of the Company; I was valuator to the Company for twelve months; I attended the annual meetings as a shareholder; I was present at that of 1887 and that of 1888; at the latter the directors and manager were present; of the directors, defendants Cameron, Byrnes, and Martin were present at that meeting; Smairl was also present; I could not say if either Manning or Green was present; I know Brewer, but not Row; I cannot say if Brewer was present at that meeting; balance-sheets and reports were distributed at the meeting; that produced is what I received; a general discussion took place on the balance-sheet; I was present as a shareholder at the annual meeting of 1889; Cameron, Byrnes, and Martin were present; Smairl was present also; reports and balance-sheets were distributed among the persons attending the meeting; that produced is what I received; the usual discussion took place; I was present at the meeting in 1890; Martin, Byrnes, and Smairl were present, and, I think, Green; I saw one of the auditors at one meeting, but cannot say in what year; I think the balance-sheets and reports were not issued to the meeting; I obtained one at the office from one of the clerks a few days after.

Exhibit No. 29.

*By Mr. Blackett:* I may have attended more than one meeting in 1888; at the annual meeting in 1888—14th November—Cameron, I believe, proposed that the whole of the profits for the half year should be carried to the reserve fund; other directors spoke in favour of that; and I think it was recommended in their report that that should be done; they also recommended in their report that no dividend should be declared; Cameron moved the adoption of the report, but Mr. Cliff moved an amendment that a dividend should be declared; the report that was distributed contained the recommendation I have spoken of; I believe the report I produce is that which I received at that meeting; I have kept it ever since; the report proposes to carry to the reserve fund the sum of £736, the amount of net profits; the proposal contained in the report produced to pay a dividend of 8 per cent. was not contained in the report distributed to that meeting; that report I produced must have been printed afterwards.

Exhibit No. 28.

Exhibit No. 28.

*By Mr. Heydon:* I obtained that report and balance-sheet from the office of the Company, from one of the officers; I obtained a report at the meeting; that produced is not it.

Exhibit No. 28  
withdrawn by  
Crown.

*By Mr. Blackett:* I took part in the division as to the proposal of Mr. Cliff to declare a dividend; Cameron threatened to resign if the director's proposition was not carried out; he used words to the effect "That it was better to follow an absolutely safe course with regard to the affairs of the Company;" Mr. Cliff spoke very strongly in favour of declaring a dividend; he was very much impressed with the Company's affairs, and said it could afford to pay the dividend; ultimately he carried the meeting against Cameron and the other directors; I daresay, I voted for Cliff's amendment; Cliff at that time was a very high authority on matters relating to land; his word carried great weight, in those days, in finance matters; Cameron resigned his position as chairman and director after that meeting; I do not think Cameron was present at the meeting in 1889, when the balance-sheet was adopted; if the minutes show he was not there, I am satisfied he was not.

*By Mr. Smith:* Cameron would have a better knowledge of the Company's affairs than myself; I have, and had at that time, a considerable knowledge of land values; about that time, 1888, public feeling was very buoyant regarding land matters; seeing my name in the division in the minute-book, I am satisfied I voted against the recommendation of the directors; I was very confident myself as to the prospects of land values; I made an offer to sell to the Company 320 acres of land at £30 an acre; the purchase-money to be paid in the Company's shares; my knowledge of land values, and their prospects at that time, I considered justified me in voting against the director's proposal; I considered the property I submitted to the Company was well worth the money; I put no particular marks upon the balance-sheets by which to remember from where I obtained them; I feel certain I obtained the 1889 balance-sheet from the directors at the meeting; there is no mark upon it, nor anything else by which I could locate the source from which I obtained it; I obtained it at the meeting; I do not believe I got it at the office; I cannot recollect that a manuscript balance-sheet was read at the 1889 meeting, and an explanation made that the printed sheet was delayed through the length of the audit; I will not swear that I received that sheet at the annual meeting of shareholders; to the best of my knowledge and belief, I did so; I regard that as very different to swearing I received it at the meeting; in almost every case I received a printed balance-sheet a few days before the meeting; on one occasion I did not so receive the balance-sheet; I will not swear it was in 1889; I remember a manuscript balance-sheet being read to one meeting; I cannot say that was not in 1889; I believe it was in 1890.

Exhibit No. 29.

Taken and sworn at the Central Police Court, } J. WILEY.  
Sydney, this 20th day of July, 1893,— }

GEORGE H. SMITHERS, J.P.

Postponed till to-morrow at 10 a.m. Same bail.  
Sydney, 20th July, 1893.

GEORGE H. SMITHERS, J.P.

This deponent, *George Guile*, on his oath states:—I am a builder, living at Redfern; I know where the Imperial Company used to carry on business; I called there on 31st October, 1890; I saw Smairl and Harrison there; I asked for a copy of the balance-sheet; that produced was given to me; I looked it over and found the Company was perfectly solvent and had a large amount of cash in hand; I then deposited £150 with the Company; I did so on account of my perusal of that balance-sheet; I produce my deposit receipt.

Exhibit No. 30.

Exhibit No. 31.

By

*By Mr. Wise*: The particular feature in the balance-sheet that impressed me was that they were perfectly solvent and had a large amount of cash in hand; I did not know their principal assets consisted of land; every Bank has a large amount of property, I know; I did not know the main asset of the Company consisted of real estate except according to the balance-sheet; the sheet discloses that fact; I was to receive  $7\frac{1}{2}$  per cent. on my deposit, which was for twelve months; I knew nothing of any bonus; I did not see my deposit receipt filled up; it was done in the Board-room; I could not see into the room; I think I saw Martin pass through the Bank that day; the receipt was handed to me over the counter, but I do not know by whom; I had to go three or four times on different days to get the receipt.

*By Mr. Smith*: I was not one of a committee of depositors to get up a subscription to prosecute the directors; I was not connected with any body of depositors; I did not contribute, nor offer to contribute, any money towards a fund for prosecuting the directors; I own land now, and did in 1890; I have no vacant land; I receive the same rents now from my property as I did in 1890; I have not had my property valued; I do not know that property that was readily saleable five years ago is not so now; I look at balance-sheet (No. 30); I know the difference between assets and liabilities; I read the second line on the assets side, "City and suburban investments"; I understand that to mean property; the third line is "unsold land"; the total of these two items is over £78,000; I understood from the sheet that out of the £95,000 worth of assets the Company held £78,000 worth of property; I look at the liabilities side and see the Company held from the public on fixed and current deposits £20,900; I also understood that it owed the A.J.S. Bank £26,000; all the properties mentioned in the sheet I understood the Company to hold; I cannot say if the Company holds those properties now; I knew when I saw the item £3,300 cash in hand that the Company owed the Bank and the public £17,000; if I had known the properties were mortgaged I should not have deposited my money; I did not suppose the Bank would advance them money without securities; I suppose they had the property as security; I suppose the balance-sheet is correct; the only in correction I can see is the item "City and suburban investments"; I do not know of any property that is represented in the sheet that the Company did not hold; I know that several Banks have closed their doors lately; I know they could not pay the demands upon them; I bank with the A.J.S. Bank; I have not been paid all my current account by the Bank; I have not been paid any of my fixed deposit; I think it was a dishonest thing for this Company to take my money and not repay it; the Bank took my money and has not repaid it; I do not think that was dishonest; I think the whole of the balance-sheet is wrong; I cannot say what is wrong about the first item on the assets side; I thought the Company held the properties in the second item clear of mortgage; I understood the Bank held the properties as security; I know that if a company gets an overdraft from the Bank and lodges the deeds of property with the Bank that the property is mortgaged; I have no fault to find with any of the other items; my reason for supposing the sheet is incorrect is that I paid my money in and could not get it back; I do not think the Bank is dishonest in not paying me back my money, because they did not tell me they would not pay me; if they do not pay me I will think them dishonest; if the Bank holds a million's worth of property and only realised £200,000 I would think it was dishonest; if I had a friend who had £1,000 worth of property on which he owed £750, and he borrowed £10 from me and the value of the property fell to £500 and he could not pay me the £10, I would think him dishonest; my only reason for thinking so is that he has not paid his debt; I knew the Company were dishonest in taking my money when they could not pay me back; I know they could not pay other depositors; they could not pay Mrs. Summerfield, I believe; I believe Mr. Summerfield was dead; I do not know that the Company refused to pay because no letters of administration had been taken out; I have no fault to find with any item in the balance-sheet, and my only reason for thinking the directors dishonest is that I did not get back my deposit.

*By Mr. Shipway*: I received the balance-sheet in the office about 12 noon on 31st October, 1890; I did not attend the annual meeting on 31st October, 1890; I was not conversing with Smairl or Harrison in the office for a quarter of an hour on the day I received the balance-sheet; I am certain I received it on 31st October, 1890; that was the same day as I paid the deposit; the sheet must have been printed by 12 o'clock on 31st October, 1890, because I got it then; it is not the date on the sheet that causes me to be certain about the date; I can remember the date.

*By Mr. Heydon*: I am certain I got it the same day as I deposited my money; I have not been paid a single fraction from the Company on account of my deposit; I saw Smairl at the Bank some time afterwards, and told him it was a serious thing to take a man's money and not pay him back; he said there was nothing to do but close the doors.

*By Mr. Smith*: I do not know whether the official liquidator has sold or attempted to sell any of the Company's properties.

*By Mr. Wise*: Mr. Summerfield was a director.

Taken and sworn at the Central Police Court, }  
Sydney, this 21st day of July, 1893,— }

G. GUILLE.

GEORGE H. SMITHERS, J.P.

This deponent, *William Stronge*, on his oath, states:—I am a retired civil servant, living at Newtown; I was a depositor with the Imperial Land Company; I first called there in February, 1889; in July, 1891, I called there again, and got a balance-sheet from Smairl; that shown me is it; I also got the other one shown me from Harrison at the office; the latter I got some time in 1889; I remember the date of the first because at that time Smairl told me he wanted me and the other depositors to sign a renewal of our deposits for another twelve months; I signed the renewal; Martin came in shortly after I had signed; before I signed Smairl had told me that the Company would have out £100,000 worth of debentures in six months; I said I wanted my money, but he said it would be all right, as the money would be out in six months; Martin was not present then, and nothing was said about it after he came in; I produce my deposit receipt; I got the 1889 balance-sheet some time in 1889; I did not look over either of the balance-sheets till after the Company had got into difficulties.

*By Mr. Wise*: I was present at a meeting of depositors held on 22nd July, 1891; a statement was made that money was going to be raised in England for the Company; I agreed to that proposal; there was a petition at that time to wind up the Company; they had no chance to obtain the money, on account of the winding-up petition.

*By Mr. Heydon:* Martin was in the chair at that meeting; Green, Manning, and Smairl were there; Martin told the meeting that a petition for the winding-up of the Company had been filed, and was to be heard a few days after the meeting; he asked us to sign a renewal of our deposits for twelve months; that this agreement was to be sent to the Judge in Equity for the purpose of upsetting the petition that had been filed; he said we were asked to renew our deposits on the understanding that the Company was to raise £100,000 in England on the assets of the Company; that as soon as the money arrived they would begin to pay off matured deposits, and would pay off all deposits as they matured; that it would not be to their advantage to pay depositors 7 and  $7\frac{1}{2}$  per cent. for their money when they could obtain money in England on such reasonable terms as 4 and  $4\frac{1}{2}$  per cent.; in reply to a depositor, he said the £100,000 was to be raised on the security of the Company's property; we were informed that the A.J.S. Bank held a mortgage over the whole of the Company's properties, but that the management of the Bank were prepared to give the Company an abstract of their titles of the property, so as to enable the Company to borrow in England; a depositor asked if there were any other encumbrances on the property but those held by the Bank; Martin answered "No"; in reply to a depositor, who asked if the properties of the Company had been lately valued, and, if so, by whom, and what was the valuation, Martin said, "The properties have been valued lately—about a few months ago—by Messrs. Richardson and Wrench—at a valuation of something over £100,000;" we were told at the same time that the liabilities were between £70,000 and £80,000; I think Smairl told us the positions of the properties, and said one property at Willoughby was very valuable; that a proposed line of railway was going through it, and it would be worth £300 per acre, enough to pay off the Company's liabilities; Manning came over to me, and told me what trouble they had been at to bring out this scheme of raising money in England; that they had been at the office every night; the meeting was told that the Company would be able to pay off the depositors in six months; that they would send to England and get the money at once; Martin said that; on 11th September, 1891, a meeting of depositors was held; Smairl was present; he asked for the meeting to be adjourned, in order to lay before it a statement of the Company's position; there was another meeting on the 18th September, at which Martin, Green, Manning, and Smairl were present; Martin was chairman, and told us he could not furnish the statement as the liquidator had taken possession of the Company's books; I asked Martin how it was that they had placed £3,305 18s. among the assets when it was shown by the balance-sheet of November, 1890, that they had no way of making that money; no answer was given; I then asked what had become of the £318 0s. 5d. profit made during 1890; no answer was given; I asked how was it that the Company had taken a deposit of £200 from Mark Thornton, of Hurstville, on the 2nd July, 1891, when the petition was filed for the winding-up of the Company, and why he did not get a receipt for the £200 until the 18th July; the only answer I got was that I was not fit to analyse any accounts; Martin said that; I asked what had become of the £3,300 cash in hand; there was no answer; I asked why they sent a statement to the Registry Office for the year 1887, showing that 6,691 shares had been taken up up to that date, and that £1,902 17s. had been paid on them, whereas on the balance-sheet of 1888, the directors in comparing the steady progress made by the Company from 1887 to 1888 gave the subscribed and paid-up capital for 1887 as being £9,796; I was told I was not fit to analyse any accounts; I asked how they could account for the discrepancy between the statements for 1887 and 1888; no answer was given me; I asked no further questions; Green stated he was negotiating with certain gentlemen to take over the assets of the Company, and if successful, they would be able to pay the depositors.

*By the Bench:* It was not a noisy meeting, and Martin could hear the questions I put to him.

*By Mr. Wise:* There was not another meeting being held at the time; it was not attempted to make Richmond chairman; he was chairman of the meeting held on the 11th September; I was angry at the meeting; I had good reason to be so; others were angry; there was a good deal of laughing and joking going on; there were seventy or eighty people at the meeting; I understood the Company owed money to the Bank; I understood the Company ought to have kept the cash in hand, £3,300—from September, 1890, till July, 1891; my reason is that one lady called for her matured deposit in October, 1890, and she told me something; I have no other reason for thinking they should have kept the cash, except what she and others told me; I had no row whatever with the directors, nor they with me; at the meeting I was not waving my arms and shouting out among a number of other people.

*By Mr. Heydon:* Mrs. Summerfield, Mr. Van, Mr. Richmond, and Mrs. Day were some of the people who made statements to me about the Company.

*By Mr. Smith:* I did not know the auditors to the Company; they were not present at any of the meetings I have spoken of.

*By Mr. Blackett:* I do not know Cameron; he was not present at any of the meetings; I became a depositor in February, 1889.

*By Mr. Heydon:* At the meeting on 22nd July, 1891, Martin stated that one gentleman had such confidence in the stability of the Company that he was willing to advance £6,000 to tide the Company over its present difficulty on condition that depositors would advance a similar amount; a depositor who dissented from the proposal to sign a renewal made a proposal to this effect: that, if successful in raising £100,000 worth of debentures, would the directors pay off matured deposits and those about to mature as soon as the money arrived; Martin answered "Yes"; on 18th September, 1891, Green told the depositors that both he and his son made a calculation of the value of the several properties, according to which depositors should get at least 15s. in the £; I signed the renewal of my deposit before any meeting was held as to the proposal to renew deposits; I did not know Mr. Byrnes at all.

WM. STRONGE.

Taken and sworn at the Central Police Court, }  
Sydney, this 21st day of July, 1893,— }

GEORGE H. SMITHERS, J.P.

This deponent, *Edward Harrison*, on his oath, states:—It was the practice to issue reports and balance-sheets from the office to people calling for them; I have issued them in that way; I obtained them from Smairl, and issued them by his instructions. [*Balance-sheet put in.*]

Exhibit No. 34.

*By Mr. Shipway:* I gave the balance-sheets without consulting Smairl; he would give me a number together to issue to anyone calling for them; the meeting on 31st October was held in the evening; I do not

not recollect specially the auditors working late in order to get the balance-sheet out for the meeting; I do not recollect working late myself that day; I have seen the printed balance-sheets before the holding of the meeting; I recollect comparing the printer's proof of the sheet for 1890 with the manuscript; I think the proof came from the printer in the afternoon; it was just before 6 p.m., or between 7 and 8 p.m., that the printed sheets came from the printer, to the best of my recollection; it was certainly after 3 p.m.; I remember going round to the printer's (Sands) and asking them to have the sheets out in time for the meeting.

Taken and sworn, at the Central Police Court, }  
Sydney, this 21st day of July, 1893,— }

EDWARD HARRISON.

GEORGE H. SMITHERS, J.P.

This deponent, *William Thomas Ball*, on his oath, states: I am an accountant, practising my business in Sydney; I have been employed by the official liquidator of the Imperial Company; I have been through all the books of the Company to make an investigation of its affairs; I look at balance-sheet for September, 1886; it shows the capital paid up to be £609 5s., and the subscribed capital £1,109 5s.; five hundred shares had been issued on which no money had been paid; the profit and loss account shows a profit for the half-year of £1,581 16s. 4d.; a 10 per cent. dividend and a bonus of 1½ per cent. were declared; I have looked into the books to see if that amount of profit is correct: according to the figures in the books it is correct; the profit arose from the sales of the Osmond Estate, and portion of the Astolat Estate; the sales amounted to £4,302 8s. 5d.; the sum of £440 15s. 4d. had been actually received on the sales; pages 1, 2, 3, and 4 in book No. 11 will show the payments made by the purchasers; pages 35 and 39 in No. 10 show the general accounts of these estates; I look at page 71 of minute-book (No. 26); there is a minute showing Cameron, Byrnes, Fuller, and Hewlett were present, and that the consideration of the balance-sheet was adjourned until next meeting; at page 72—19th May, 1887—there is a minute showing Byrnes to have been in the chair [*passage from minutes read*]; I look at page 74, showing Cameron in the chair, and Byrnes, Fuller, Hewlett, and Martin present [*passage from minutes read*]; I have examined the books to see what the state of the profit and loss account was at that time; the books show a gross profit of £384 1s. 10d.; according to me that is not correct; the profit should really be only £62 9s. 4d.; I take exception to the addition of interest to estates (I have not been able to find any copy of the balance-sheet of that date); page 91, No. 10, shows an entry of "sundry estates, £384 1s. 10d.;" I take exception to the loading of furniture, £80; on page 21 of exhibit 11 there is an entry "sundries debited to profit and loss" that shows the loading of the furniture; I look at minutes of 15th June, 1887 (page 76) [*passage read in minutes, paragraph as to change of capital*]; I look at page 94 of minute-book; Cameron was chairman of the meeting, which was one of shareholders; Martin and Byrnes were present as directors, and Manning as a shareholder [*passage as to balance-sheet read, also as to declaration of dividend*]; I look at the balance-sheet attached to those minutes; the subscribed capital is shown as £9,796, and the paid-up as £4,588 17s. 11d.; in the item of £9,796, I take exception to the item of £3,000 that appears in exhibit 10 on page 4; there is an entry there headed "investing coupons"; the entry to that is "30th September, W. G. Cameron, by cash, £3,000"; that £3,000 was included in the capital subscribed and paid up; on 4th October there is a debit entry "To cash, W. G. Cameron, £3,000"; the first entry is posted from folio 19 in the cash-book (No. 8); in the subscribed capital—£9,796—I take exception to the £3,000 already mentioned, and also to the sum of £625 represented as M'Kenzie's shares (see folio 1,024, No. 15), entry headed Alexis M'Kenzie; the books do not show that any money was paid on those shares; I have never found any application for those shares, although I have searched for it; the £3,000 and £625 have been included in the £9,796; the balance-sheet shows a profit of £488 19s. 10d.; I take exception to that; I say there was a loss of £56 7s. 4d., reducing the profits to £432 12s. 6d.; the balance they brought down from the previous year was £488 19s. 10d. on the credit side; the gross profit for the half-year ending 30th September, 1887, was £657 14s. 3d.; on the other side there are items amounting to £714 1s. 7d.; the two items on the other side amount to £1,146 14s. 1d., and to make the £714 1s. 7d. agree with that the sum of £432 12s. 6d. was brought down; the expenses for that year exceeded the gross profits by £56 7s. 4d.; the gross expenses for half-year ending March, 1887, was £1,476 18s. 4d.; I look at page 158 of minute-book, showing Cameron as chairman of a meeting of shareholders; Byrnes and Martin were present as directors, and Manning as a shareholder; I look at page 160; Cameron was chairman of that meeting, and Martin and Manning were present as directors; a meeting was held on 16th November, 1888, at which Cameron was chairman, and Byrnes, Martin, and Manning were present; the book shows a profit of £736 18s. 4d. for that year; there was an actual loss of £1,413 18s. 7d.; I object to the item of £2,018 9s. 9d. profit from interest account; there is an item of £1,415 for the sale of Bartlett's estate; I consider the sale was never made; there is an entry in the journal referring to the sale to Chapman at a profit of £1,415 5s., and then it is entered back as if the sale had not been completed; no money was passed and no deposit made, and yet the profit was thrown into the half-yearly balance; there is an entry in the journal (No. 11) "Malcolm's estate debtor to interest estate for amount of profit on 310 feet of the above estate at £1 per foot"; there is nothing in the books to show that a sale took place; £100 has not been written off the preliminary expenses.

Taken and sworn at the Central Police Court, }  
Sydney, this 21st day of July, 1893,— }

W. T. BALL.

GEORGE H. SMITHERS, J.P.

Postponed till 10 a.m. on Monday next. Same bail.  
Sydney, 21st July, 1893.

GEORGE H. SMITHERS, J.P.

This deponent, *William Ball*, recalled and resworn, states:—The item £400 for preliminary expenses should be £300, the £100 not having been written off; there is an item of £66 1s. 8d. for law costs included in the assets; it has been included in the account "Sundry Debtors" (folio 51, book 10); the account is called law costs, and is treated as a good asset; at folio 67, book 10, there is an item of interest due to the E. S. and A. C. Bank for overdraft of £259 10s. 2d. up to 30th September, 1888; it is credited to the bank, and added to the value of the estates—Smidmore Estate, £86 10s. 2d. (folio 77),  
Carlton

Carlton Estate, £86 10s. (folio 49), Malcolm Estate, £86 10s.; those items together total £2,150 16s. 10d.; the sum of £1,415 5s. was taken as profit on sale of Bartlett's Estate, £310 on Malcolm's, and £100 has not been written off preliminary expenses, £66 1s. 8d. for law costs, and £259 10s. 2d. interest to the E. S. and A. C. Bank; all these items make the total £2,150 16s. 10d.; the loss on the business was £1,413 18s. 7d.; the books show a profit of £736 18s. 3d.; the profit is shown on folio 91, book 10; it is shown there that the Company started with a balance brought from the previous year of £432 12s. 6d.; an entry in the journal (folio 38, book 9), "Interest debited to profit and loss, £2,018 18s. 9d.;" on page 37 of same book, "Malcolm's Estate, debtor to interest for amount of profit, on 310 feet, at £1 per foot, £310"; those entries show a total of £2,760 13s. 3d.; on folio 42 of book 8—cash-book—is an entry of £98 0s. 9d. for dividend; at folio 37, book 8, there is a debit for interim dividends of £238 18s. 11d.; then there is a debit (book 9, page 38) of £1,686 15s. 4d.; those three make a total of £2,023 15s.; deducting that from the £2,760 13s. 3d. leaves a balance of £736 18s. 3d.; deducting that from the £2,150 16s. 10d., leaves a balance of £1,413 18s. 7d. loss; there appears in the books an entry showing a profit on the sale of the balance of the Astolat Estate (book 9, folio 29); the entry is, "A. A. Gallagher, debtor to Astolat Estate"; the total is £2,176 5s.; another entry is, "A. A. Gallagher, debtor to Astolat Estate, £1,797 15s.;" the estate stood at debit in the books £2,796 19s. 5d., and the two purchases by Gallagher came to £3,974, which put the Astolat Estate account in credit £1,177 0s. 7d.; the dates of those purchases were 3rd April, 1888, and 4th August, 1888; the books show that £217 6s. 6d. was paid on the first purchase, and £89 18s. 6d. on the second; those two make a total of £307 5s. as having been paid on deposit on account of those purchases; there is nothing in the books to show that any further sum was paid on account of those purchases; the balance owing by Gallagher with interest added is shown each year; book 11, at pages 25 and 26, shows the terms of the sales; they were £1 per cent. per month for the balance owing, with 7½ per cent. interest; the balance was thus shown as payable in instalments extending over eight and a half years; the purchase-money is treated in the books as having been fully paid; on 30th September, 1888, the subscribed capital is shown as £18,503 (pages 1,001 to 1,044, book 15); at the same date the paid-up capital is shown as £12,082 4s. 1d., showing an increase of £10,493 16s. 1d. on that of 1887; portion of that increase consists of 8,800 shares, issued as paid-up to 15s., making a total of £6,600; they were issued as part payment of purchase of land at Gordon from Cliff and Way; I look at balance-sheet for 1889, signed by the auditors Row and Brewer; the subscribed capital is there shown as £20,000; the books show it as £19,394, a difference of £606.

*By Mr. Wise:* I do not include M'Kenzie's shares in that amount; they, if *bona fide*, would more than account for the difference.

*By Mr. Heydon:* There are other shares I have not included; I have included Cohen's in the £19,394; the profit and loss shown in sheet for 1889 is £869 19s. 11d.; I take exception in that to the sale of Henderson's estate, showing a profit of £2,700; the sale was effected on 17th October, 1889 (book 9, folio 57); the names of purchasers, and the deposits made, appear in that book; the largest purchaser appears to have been W. P. Smairl; the total amount of sales was £3,252 18s.; the deposits made were £202 18s.; all the payments are shown on page 57, book 9, with the exception of a payment made by Lyons of £45 10s.; the first purchaser was W. P. Smairl, who purchased to the amount of £3,220, and paid a deposit of £662 10s. on 31st October, 1889, as shown in book 11, page 74; the next item I object to is an item of £346 7s. 11d. (book 9, page 50); that is for interest debited on rent-producing properties; Malcolm's estate, £242 2s. 8d.; Bartlett's estate, £16 10s. 7d.; Waverley leaseholds, £87 14s. 8d.; Malcolm's estate was the only rent-producing estate.

*By Mr. Wise:* The Waverley leaseholds and Bartlett's estate were being built upon at that time.

*By Mr. Heydon:* The interest on these properties was credited to interest account from which the profit was taken; the interest upon these estates was added to the value of these estates; the next items I take exception to are several which are treated as good assets, included in the balance-sheet; under the item, "Sundry debtors, £177 17s. 5d.," book 10, page 22, there is an item, "Amount paid for insurance, £23 19s. 6d.;" on page 51, "Amount paid for law costs, £280 10s. 9d.;" the next item (page 9) is "Valuation fees, £18 18s.;" the usual £100 has not been written off the preliminary expenses; the three items, insurance, law costs, and valuation fees, amount to £332 8s. 3d., and that amount forms part of the £400, sundry debtors' item; the £18 18s. valuation fees is eventually written off as loss; I cannot say if the £18 18s. is debited to different estates; the £18 18s. should have gone into profit and loss, but did not that year; it was treated as an asset in the "sundry debtors'" item.

*By Mr. Wise:* The law costs are shown as a good asset throughout.

*By Mr. Heydon:* The insurance money was next year debited to different estates; there is another item—"Pitt-street property, £176 12s. 2d.;" that is the deposit paid for the purchase by the Company of some Pitt-street property; on 30th September, 1886, the Company had paid a deposit of £525 for the purchase of some Pitt-street property; in March, 1889, the amount of £369 16s. 6d. was refunded to the Company, the contract having gone off; therefore the £176 12s. 2d. represented a balance for the purchase of property the contract for which had gone off; the preliminary expenses still appear as an asset of £400; the operations for the year really showed a loss of £2,785 8s. 5d.; I look at balance-sheet for 30th September, 1890, in which the subscribed capital is shown as £20,000; I say it should be £19,438; I have omitted M'Kenzie's shares, which would more than account for the difference; a profit of £318 0s. 5d. is shown by the sheet; I take exception to the item adding to the value of estates, and crediting interest with £5,870 11s. (book 9, folio 70); at page 339 of minute-book (26) there is an entry showing Milsopp in the chair, and Martin, Green, and Manning present [*paragraph in book read as to interest on different estates*]; the balance-sheet and report for presentation to meeting were adopted; that £5,870 11s. should come out of the profit and loss account; the additions to the valuations of the estates are not made on any uniform basis; the balance-sheet shows an item—"Sundry debtors, £985 4s. 3d.;" in that I take exception to the item of £595 12s. 5d. law costs, also to the item £9 7s. 6d. for stamps; those are expenses, and should not be included as assets; the preliminary expenses appear still as £400; among the assets is an item of "cash in hand, £3,305 18s. 4d.;" when I took possession of the books in September, 1891, I found 19s. in cash; according to the books there should have been £1,873 9s. 9d. cash in hand; I was in Court after the Company went into liquidation; I heard Brewer give evidence and say that the £3,305 18s. 4d. had never been put before him, and that he had not counted it; assuming that the £3,305 18s. 4d. was there the profit and loss would show a loss of £3,429 18s. 6d., less the £2,700 which had been used the year before, giving a loss of £3,429 18s. 6d. on the year's transactions; for the first six months of the Company's existence the books show

show a profit of £1,581 16s. 4d.; the next six months—to March, 1887—the books show a loss of £1,092 16s. 6d. for that period; to 30th September, 1887, the books show a loss of £56 7s. 4d.; for the year ending 30th September, 1888, the books show a loss of £1,413 18s. 11d. for the year; for the year ending 30th September, 1889, the books show a loss of £2,785 8s. 5d.; for year ending 30th September, 1890, the books show a loss of over £3,000, giving the Company credit for the £3,305 cash in hand; I look at a deposit receipt dated 21st February, 1889; it is signed by defendant Smairl, and purports to be signed by James Green and Evelyn Manning; it bears the number 242, and it is payable to that number; it purports to be entered in cash-book, folio 65; I have the butts of the deposit receipts; there is no butt No. 242 among them; I look at minute-book, folio 218, showing the appointment of James Green as director; that is dated 29th April, 1889, and he first took his seat in May, 1889; the deposit receipt is dated 21st February, 1889; I can find nothing in the books about the £3,000 represented by the receipt; there is nothing to show it had ever been received.

Taken and sworn at the Central Police Court, }  
Sydney, this 24th day of July, 1893,— }

GEORGE H. SMITHERS, J.P.

W. T. BALL.

Postponed till 10-15 a m. on Monday next. Same bail.  
Sydney, 24th July, 1893.

GEORGE H. SMITHERS, J.P.

This deponent, *Edward Harrison*, on his oath, states, recalled:—The signatures to the deposit receipt are those of the defendants Smairl, Green, and Manning; the body of it is in Smairl's writing; I was teller on 21st February, 1889; it was part of my duty to enter all moneys coming in over the counter; I can find no entry showing the receipt of that deposit by me on folio 65, nor anywhere else, in the cash-book.

*By Mr. Wallace*: The butts 241 and 243 are in Smairl's writing; they are dated 1st July, 1889.

Taken and sworn at the Central Police Court, }  
Sydney, this 24th day of July, 1893,— }

GEORGE H. SMITHERS, J.P.

EDWARD HARRISON.

This deponent, *William Ball*, recalled, and re-sworn, states:—At the time the Company went into liquidation Byrnes' account stood at a debit of £40 15s. 10d. (folio 274, No. 13); another account appears on folio 18, of No. 11, showing a debit of £50 12s., making a total of indebtedness to the Company by Byrnes of £90 additional; the amount of fees received by the Directors up to 30th September, 1886, was £74; for half-year ending 31st March, 1887, was £66 3s.; for half-year ending 30th September, 1887, was £40; for year ending 30th September, 1888, £117; for year ending 30th September, 1889, £236; for year ending 1890, £252; and up to time of closing, £58, making a total of £843 3s.; the auditors received for audit of 1887, £20; for those of 1888, 1889, and 1890, £30, respectively, making a total of £110; the amount paid in dividends was,—first, 30th September, 1886, £86 7s. 7d.; for 31st March, 1887, £82 17s. 8d.; on 31st September, 1887, £98 0s. 9d.; on 31st March, 1888, £238 18s. 11d.; on 30th September, 1888, £300; on 31st March, 1889, £200; on 30th September, 1889, £746 15s., making a total of £1,752 14s. 11d., less £170 18s. 5d. unclaimed dividends; the amount actually paid in dividends was £1,581 16s. 6d.; before the balance-sheet for September, 1887, was made out, £50 was paid into Byrnes' account on 5th October, 1887; it was paid into his own credit, and appears to have been drawn out the same day; in a book called "receipts for No. 2 series of shares" there is a butt No. 20; at page 60 of the voucher-book I found the document signed by Smairl, which I produce; the endorsement on the document is in Smairl's writing, and apparently signed by Cameron; in book 8, folio 19, is an entry showing that Cameron, on the 23rd September, 1887, paid £3,000 for "investing coupons"; it appears under the heading "sundries"; on page 21 of same book is an entry showing the payment out to W. G. Cameron of £3,000 on 4th October, 1887; these entries came in their proper chronological order, according to the book; in book 5, folio 18, on 28th September, 1887, is an entry showing the receipt of £3,000, from Cameron, for investing coupons under the heading "capital"; that transaction does not appear in the disbursements-book (No. 6); it has been posted from No. 8 into the general ledger (No. 10, folio 4); it appears there to the credit of an account called "investing coupons"; that is 30th September, 1887; on 4th October is an entry, "to cash, W. G. Cameron, £3,000"; the metallic ticks appear on both sides of the cash-book and general ledger; from 1st October, 1890, inclusive (from page 40, of No. 4), the total of new deposits received by the Company was £3,059 15s.; the last new deposit was July, 1891; there were three in that month for £70, £200, and £47 7s. 6d. respectively; in September they went into liquidation; the amount of renewed deposits during the same time was £11,141 9s. 2d.; the date of the last renewal was 8th September, 1891; the Company banked with the E. S. and A. C. Bank, and the A. J. S. Bank; that is according to the books; I have been through the books to see what the debts of the Company were at the time of winding up; I have a list of the debts; folio 22, exhibit 11, shows an entry of Hardman's account of £470 4s. 4d.; there are references to it at folios 269, 306, 314, 316, 329, and 347 of minute-book, the last one stating the matter was settled for £196, and £40 costs; the £470 4s. 4d. is made up of two amounts—£234 4s. 4d. and £236—and appears in the book as due by Hardman to the Company; that is the last balance in the books; a sum of £236 is passed to his debit on 25th June, 1890; the last minute (page 347) shows the settlement of Hardmann's claim; on page 29, book 9, there is an entry showing the sale to Hardmann of portion of the Smidmore Estate for £360; no other sale to Hardmann appears in the book; there is an entry in Mr. Martin's account of £66 13s. 4d.; I produce a cheque for £66 13s. 4d. in favour of Gifford and Martin, and a receipt for the same, and a deposit receipt and an account; I also produce account for £87 10, a deposit slip, and receipt for the amount; the next item in the account is for £395, on account of professional services; I produce the voucher deposit slip and account for that; the next item is £78 17s. 6d., and I produce the vouchers for that; the last item is £138 15s.; I produce the vouchers for that; the five items total £766 15s. 10d.; the account stood in debit £292 5s. 9d. when the Company went into liquidation; the permission to overdraw to the extent of £250 was availed of, and £42 above that amount overdrawn; the address of each person having an account is given after each name; "Athens, Bondi," is merely Martin's address; I produce eleven letters referring to the auditors (letters read); I refer to minute-book, at folio 4, showing the appointment of directors and other officers; I look at

at folio 7, showing the appointment of Henry as assistant manager; on folio 8 the qualification for a director appears; on same page is a paragraph in reference to allotment of shares; on page 9 there is another paragraph marked by me; on pages 10 and 11 I mark two paragraphs; I look at pages 12, 13, 14, and mark paragraphs on them; twenty fully paid-up shares were allotted without any payment; they were of the value of £500.

*By Mr. Wise*: These shares have been treated as contributing by the Court.

*By Mr. Heydon*: I look at pages 15, 21, 22, 30, 32, 36, 37, 42, 43, 45, 51, 52, 53, 57, 65, 69, 70, 71, 72, 74, 75, 76, 78, 82, 87, 88, 89, 94, 95 (balance-sheets and auditors' letter), 97, 98, 100, 109, 110, 116, 117, 119, 131, 153, 158, 160, 161, 164, 166, 170, 176, 177, 178, 179, 182, 184, 185, 198, 207, 218, 223, 224, 241, 245, 250, 251, 259, 260, 261, 263, 265, 266, 267, 269, 270, 271, 272, 262, 274, 276, 277, 278 of minute-book, and mark certain paragraphs appearing on each of those pages.

Taken and sworn at the Central Police Court, }  
Sydney, this 31st day of July, 1893,— }

W. T. BALL.

GEORGE H. SMITHERS, J.P.

Postponed till Thursday next at 10.15 a.m. Same bail.  
Sydney, 31st July, 1893.

GEORGE H. SMITHERS, J.P.

Exhibit No. 42

This deponent, *Spence Hodgkinson Puckle*, on his oath, saith:—I am employed on the *Daily Telegraph* newspaper; I produce the file containing the issue of 28th May, 1888 (copy of article read and put in).

Taken and sworn at the Central Police Court, }  
Sydney, this 31st day of July, 1893,— }

SPENCE HODGKINSON PUCKLE.

GEORGE H. SMITHERS, J.P.

*Mr. Heydon* puts in minute-book, and indicates passages on the following pages as those he more particularly relies upon:—279, 283, 287, 290, 292, 293, 294, 296, 298, 299, 300, 305, 306, 308, 310, 311, 312, 314, 315, 316, 317, 318, 319, 320, 321, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 344, 440, 441, 346, 347, 348, 350, 351, 353, 356, 357, 358, 359, 361, 364, 365, 366, 367, 368, 369, 371, 375, 377, 379. These passages are marked with a pencil cross.

Exhibit No. 43

Exhibit No. 35.

This deponent, *William John Macgeorge*, on his oath, saith:—I was at one time manager of the Sydney branch of the Bank of South Australia; I know Smairl, Martin, and Byrnes; I recognise the cheque produced; it is signed by defendant Martin and Milsopp; I received it from my accountant, together with the deposit receipt produced; I saw Smairl and Milsopp, and afterwards Martin, in connection with the cheque; I do not remember Martin being present at the first interview; Smairl asked me to take over from the Federal Bank the advance to the Neokratine Company on certain securities; I sent my accountant out with Smairl to the Federal Bank to obtain the securities, and he returned with the deposit receipt.

Exhibit No. 35.

*By Mr. Wise*: Smairl and Millsopp came to me as directors of the Neokratine Company, I presume; I did not recognise the Imperial Company in that matter at all.

*By Mr. Heydon*: The deposit receipt was left with me, and an advance was made upon it; Martin came in to me afterwards; he referred to the deposit, and said the money was lying with the Imperial Building Company; Martin, Smairl, and Milsopp represented to me that the money was lying to the credit of the Neokratine Company with the Imperial Company; I asked them if the money was lying to the credit of the Neokratine Company with the Imperial Company; they all said yes; I think this took place about August, 1890.

*By Mr. Wise*: I did not know the deposit was overdue at the time; I think I was to charge them 8 per cent. for the advance.

Taken and sworn at the Central Police Court, }  
Sydney, this 3rd day of August, 1893,— }

W. J. MACGEORGE.

GEORGE H. SMITHERS, J.P.

Postponed till 10 a.m. on Monday next. Same bail.  
Sydney, 3rd August, 1893.

GEORGE H. SMITHERS, J.P.

Exhibit No. 35.

Exhibit No. 45.

This deponent, *John Docker*, on his oath, saith:—In June, 1889, I was in the Federal Bank, employed as accountant; on 12th June, 1889, I was acting for the manager in his absence; Smairl came to see me that day about an advance that had been granted to the Neokratine Company by our Bank; he came to lodge a deposit receipt of £3,000 with the Imperial Company with me as part of our Bank's security; he lodged it with us; that produced is the same; we were also to have a letter from the Neokratine Company to the Imperial, authorising the latter to pay to us £1,500 of the £3,000 at maturity; we obtained the letter, but I cannot say from whom; on 13th June we sent a letter to the Imperial Company, of which we took a letterpress copy and a copy on a loose sheet of paper; we received an answer to that letter; the deposit receipt and the letters were entered in our security register; on 18th August, 1890, they were handed by me to Smairl, and he signed for them in our security register; the letter from the Neokratine to the Imperial Company was signed by Alexander Milsopp, as Chairman of the Neokratine Company, and by Smairl and Martin; the letter authorised the Imperial Company to pay our Bank £1,500 out of the £3,000 deposited with the Imperial Company at maturity; the letter was dated 12th June, 1889, the same day as Smairl gave me the receipt; our letter to the Imperial Company was dated 13th June, 1889, and appears on page 555 of our letter-book; we received a reply from Smairl, as Manager of the Imperial Company; it stated that the deposit was all right, and the receipt would be recognised; that was dated 14th June, 1889.

Letterpress copy read; copy of letter put in, No. 44.

*By Mr. Wise* (for Smairl): I recollect Smairl receiving the letters from me; we would not hand them over to the clerk from the Bank of South Australia; I have an independent recollection of handing them to Smairl apart from what our custom was.

By

*By Mr. Heydon*: We also received a guarantee for £1,500 besides the deposit receipt; I produce it; it is signed by Byrnes, William Martin, Thomas Martin, H. L. Summerfield, Alexander Milsopp, W. P. Smairl. Exhibit No. 46.

Taken and sworn at the Central Police Court, }  
Sydney, this 7th day of August, 1893,— }

JOHN DOCKER.

GEORGE H. SMITHERS, J.P.

This deponent, *Robert Charles Stephen Wilkinson*, on his oath saith:—I am employed in the Bank of New South Wales; I produce a certified copy of the account of the Imperial Company with the bank; the books from which it was taken are in the possession of the bank and kept in the ordinary course of business; it opens on 30th September, 1887, with a deposit of £4,590 10s.; I produce the deposit receipt; on 4th October, 1887, a cheque for £3,000 was drawn against the account; I produce the cheque; each deposit slip is stamped with a number of its own, and all the cheques included in the deposit are stamped with the same number; I produce two cheques for £3,000 and £50 respectively which bear the number 175, the same as that on the deposit slip for £4,590 10s.; I produce the cheque for £3,000 signed by Cameron, Byrnes, and Smairl, and a deposit slip for £3,000 in Cameron's favour; I produce the other cheques drawn on this account, and which closed it; one is dated 1st October, 1887, and is signed by Cameron, Byrnes, and Smairl; and another, dated 6th October, 1887, signed by the same people; the £1,290 cheque was cashed in twelve £100 notes, one £50 note, and four £10 notes; that for £300 was cashed in 100 £1 notes and forty £5 notes. Exhibit No. 47.  
Exhibit No. 48.  
Exhibits Nos. 49 and 50.  
Exhibit No. 48.  
Exhibit No. 51.  
Exhibits Nos. 53 and 54.

*By Mr. Blackett*: The deposit slip would bear the same number stamped upon it as the cheques included in the deposit; the number has to be altered each time for each deposit, and would stamp incorrectly if not altered; I am at present assisting at one of the counters; whatever date the cheques may bear they are all entered in our ledger under the date of the day upon which they were lodged; I may not have been in the head office in September, 1887; I know nothing of any of the defendants in connection with the bank.

Taken and sworn at the Central Police Court, }  
Sydney, this 7th day of August, 1893,— }

R. C. S. WILKINSON.

GEORGE H. SMITHERS, J.P.

Mr. Heydon tenders the butt of cheque-book containing butts of cheques, and bearing the auditors' initials, and certain writing in coloured pencil, which is admitted to be that of the auditors. He also tenders another book of butts from January, 1888, to 31st March, 1890; also a third book from 31st March, 1890, to 30th June, 1890. Exhibit No. 55.  
Exhibit No. 56.  
Exhibit No. 57.

This deponent, *Edward Harrison*, recalled and resworn, states:—I produce one of the letter-books of the Company; at page 666 there is a copy of a document signed by H. L. Summerfield and William Martin; it is dated 14th November, 1888, and contains a copy of a resolution appointing Cameron as managing director; I also produce another letter-book, and look at page 143, showing a letter of 8th April, 1889, and signed by W. P. Smairl. Exhibit No. 58.  
Exhibit No. 59.

*By Mr. Wise*: I look at fixed deposit receipt-book, one of the books of the Company, and which comes out of the possession of the official liquidator; I look at a blank deposit receipt signed by W. Byrnes and Alexander Milsopp, and dated 4th February, 1890; I also see another signed and in blank by James Green and Evelyn Manning; I also look at the scrip-book of the Company; there are five vouchers for scrip there, which appear to have been signed in blank, the places where the signatures should be having been torn out; I produce a scrip certificate book of the Company, and showing a scrip certificate signed in blank by William Martin and James Green; I also produce the transfer scrip-book, beginning in 1886, and containing a certificate signed in blank by Martin and Cameron; the directors of the Company often signed scrip certificates, deposit receipts, and vouchers in blank. Exhibit No. 60.  
Exhibit No. 61.  
Exhibit No. 62.  
Exhibit No. 63.

*By Mr. Blackett*: The directors used to sign cheques in blank also; it often happened that several cheques ahead were signed in blank by directors; I look at the cheque for £300 produced; the signature of one director appears to be in lighter ink than that in the body of the cheque; I do not recollect the bank requiring some one to sign cheques in Smairl's absence. Exhibit No. 54.

*By Mr. Wise*: I look at pages 267 and 298 of book marked No. 13, showing the Neokratine Company's account with the Imperial Company; I recollect on one or two occasions that valuations were made for the Company by Richardson and Wrench and Hardie and Gorman.

Taken and sworn at the Central Police Court, }  
Sydney, this 7th day of August, 1893,— }

EDWARD HARRISON.

GEORGE H. SMITHERS, J.P.

This deponent, *William Henry Chapman*, on his oath, saith:—I am a mining agent; I know Smairl and Martin; on 28th September, 1888, I did not purchase any buildings in King-street, Newtown, from the Imperial Company for £6,500; I did not purchase any land or buildings at all from them; my address at that time was Post Office Chambers, Pitt-street.

Taken and sworn at the Central Police Court, }  
Sydney, this 7th day of August, 1893,— }

WM. H. CHAPMAN.

GEORGE H. SMITHERS, J.P.

This deponent, *Frederick Moorhouse*, on his oath, saith:—I am an architect, and was at one time in partnership with Martin; I think that was about September or October, 1890; I waited upon Martin with regard to the partnership; before the partnership plans and specifications were made of seven shops at Waverley for the Imperial Company; Martin said the matter was in abeyance just then; that he had received 2½ per cent. commission on what had been done, and I would receive half the balance; the partnership lasted three months; I never received any payment on account of the shops at Waverley; I do not know any architect named Gifford in Sydney.

Taken and sworn at the Central Police Court, }  
Sydney, this 7th day of August, 1893,— }

FREDERICK MOORHOUSE.

GEORGE H. SMITHERS, J.P.

Mr.

*Mr. Heydon* reads passages from minute-book at pages 381, 383, 384, 385, 386, 387, 389, 390, 449, 457, and indicates them and others on other pages as those upon which he particularly relies.

Postponed till 10 a.m. on Wednesday next. Same bail.  
Sydney, 7th August, 1893.

GEORGE H. SMITHERS, J.P.

Exhibit No. 61

This deponent, *William Ball*, recalled and resworn, states:—I produce a cheque for £50, drawn by Byrnes on Imperial Company, and dated 5th October, 1887; exhibit 5, folio 18, shows that £50 was received from Byrnes on 28th September, 1887; book 6, page 9, shows that £50 was debited to Byrnes on 7th October, 1887.

*By Mr. Blackett*: The balance-sheet for September, 1887, should have shown a loss of £56; in that half-year a dividend of £82 2s. 7d. was paid; that was paid on account of the half-year ending March, 1887; it was right to charge it to the half-year in which it was paid; the sum of £488 19s. 10d. was brought down from the March half-year, and the £82 2s. 7d. was paid out of it; it would not have been more correct to have brought down the £488 19s. 10d. less the dividend that had been paid; it is usual, in large companies, to show the profit for the half-year, to deduct the dividend declared, and carry forward the balance; if that had been done in this case the amount brought down would have been £406 2s. 2d.; it would not have been more correct to have done that; it is the more usual custom to carry forward the balance of profit and loss after declaring a dividend; the dividend declared one half-year and paid during the next could not be called part of the working expenses; the £100 that I debited formed part of the £500; the £500 was not part of the expenses of forming and floating the Company; £50 and 100 shares were given to Henry for his services; the balance of the amount was allotted at the same time; the shares were given in connection with the formation of the Company; I refer to them as, "Formation expenses, £500;" they are shown in the ledger as preliminary expenses; I still say the £100 should have been written off; I have read the articles of association; I look at No. 5 of the articles, and still say the £100 should have been written off; there is a great difference in paying out of capital and paying out of profit and loss; in saying the £100 should have been written off, I am guided by the resolution in the minute-book; according to article 5, the £100 should have been paid out of capital; I was not aware of that article at the time I made my report; under article 5 that £100 should not have been debited to profit and loss; I depended upon the resolution of the directors; I know that a resolution of directors cannot overrule an article of association; assuming that the £100 had not been written off, and the balance for the previous half-year, less dividend, had been carried forward, a profit would have been shown of £126; with regard to the statement I have given for half-year ending 30th September, 1888; there is an amount of £238 18s. 11d. included for dividends; that amount was not part of the working expenses for that half-year; the loss that I have given would therefore, in that event, be decreased by the amount of £238 18s. 11d.; the Company received a 10 per cent. deposit from Gallagher, and, in the ordinary course of events, should have received interest on the unpaid balance; I know the Company would hold the land as security until the last farthing had been paid; the Company would have received a profit on the sale and a profit by the interest on the unpaid balance; that profit by interest would have been credited to the Company for each half-year as long as any part of the purchase money remained unpaid; the minute-book shows that transactions were going on between Gallagher and the Company with regard to buildings and land prior to the purchase of this land by Gallagher; the fact of his building on the land would increase the Company's security; I believe he wrote to the Company with regard to some buildings; I have noticed by the minute-book that Cameron went with others to inspect properties that were offered for sale to the Company, and that he reported for or against the purchase by the Company; from the distance from the city of some of the properties that would be work entailing a great loss of time and a great deal of labour; if these services were well rendered they would be of substantial value to the Company; the directors resolved that they would like to compliment him in some way for his services; there is nothing to show that they ever did so; page 78 of minute-book shows that he was opposed to Martin and Byrnes with regard to the purchase of Mrs. Long's property; I look at page 30 of minute-book showing the purchase of some land from Cameron by the Company at a profit of £50; there is nothing to show how long Cameron had held the land; the land—Osmund Estate—was sold two months later, at a net profit of £1,016 19s. 9d., to the Company; I took exception to an item of £80 for office furniture; the Company had paid £80 for the furniture, and set down the value of it as £160; if the value of it was £160 it was not right to put it down as a profit of £80; I can quite believe that at the time it was purchased for £80 it was valued at £480; it would have cost the Company £480 to fit up their office in the same manner; I do not know that the Company had been offered £350 for the furniture; if they had it would not have been right for them to reckon it as an asset of £160, in the way they did; the furniture is shown in the books at a valuation of £160; with regard to the transaction of £3,000 in September, 1887, there are only three columns in the book—No. 5—"Capital," "Deposit," and "Repayment"; the entry is in Henry's writing; all amounts received over the counter should have been entered in that book, and in that book could only be entered as "capital deposit" or "repayment"; it would be within the discretion of the clerk receiving the amount as to what heading it should appear under; the entry shows the £3,000 was for "investing coupons;" other entries show for what the different amounts were paid for; the £3,000 is mentioned in each book in which it appears as "investing coupons"; in the statement of receipts and expenditure in the minute-book at page 95, it appears as investing coupons; in order to find out whether the sum of £9,764 is correct or not, it would be necessary to refer to the share register.

*By Mr. Wise*: I have prepared a statement showing the total cash receipts and the total disbursements of this Company from its beginning to its end; the total amount received was £508,332 5s. 7d., and the disbursements £506,458 15s. 10d.; that brings out a cash shortage of £1,873 9s. 9d.; the balance-sheet for September, 1890, shows the cash in hand to be £3,305 18s. 4d; assuming that to be correct, the shortage would appear to have occurred between that date and the closing of the Company; I know that Smairl was charged with embezzling the sum of £1,011 belonging to the Company; at his trial I gave evidence that the shortage was £1,873 9s. 9d.; the £1,011 had nothing to do with it; I have not taken it into account in my statement; it appears in the books as a disbursement, but not as a receipt; including that £1,011 the shortage is £2,800; if the properties could be sold at the figures at which they appear in the

the books, the Company would now be in a solvent condition, even allowing for the shortage of £2,800; in October, 1888, Malcolm's Estate was valued in the books at £5,479 15s. 4d.; I know that at that date Richardson and Wrench had given a written valuation of the property at £12,600; in March, 1889, Jolly's trustees advanced £9,000 on the estate; the valuations I supplied to Mr. Wise I had seen; the others he quoted to me I had not seen; I have never seen them; in 1888 the Astolat Estate was valued in the books at £2,721 9s. 2d.; Richardson and Wrench valued it at £4,258 10s. at the same date; in October, 1888, the Smidmore Estate was valued in the books at £7,656 13s. 10d., less £540—£7,116 13s. 10d.; Richardson and Wrench valued it at £8,500 at the same date; the Company owned the following properties: North Willoughby—Malcolm's, Astolat, Smedmore, Carlton, Henderson's; Waverley leaseholds, Newtown; they also owned the Osmund Estate, but had sold it at a profit; they also sold the Astolat Estate before liquidation; none of the other properties have ever been realised; on 18th February, 1889, the North Willoughby Estate stood in the books at £9,798 10s.; Sievers and Green at that date valued it at £16,000; I believe Mr. Sievers was valuator for the Government in connection with the resurreptions; on 12th May, 1890, the same property was valued in the books at £9,931 2s.; Hardie and Gorman, at the same date, valued it at £12,800; on the date of the purchase the Carlton Estate stands in the books at £16,884 9s. 8d. for 52 acres; that is something under £300 per acre; when the Company closed, the estate stood in the books at £18,512; I know of no valuation of this property; I do not know that it was valued at £350 per acre; the date of the purchase was August and September, 1888; the Manager of the A.J.S. Bank has told me that he believes the Carlton Estate was valued by Richardson and Wrench at £350 per acre; he has copies of the valuation, which were supplied to him by Smairl; Henderson's Estate was contracted to be purchased for £8,850; that was in June, 1889; I believe Richardson and Wrench, in January, 1889, valued it at £7,500; on 26th November, 1889, the book valuation of the Waverley leaseholds was £2,916; I believe Richardson and Wrench at that date valued it at £4,866 10s.; the first cost for the Newtown property was £4,900; it was purchased on 30th September, 1887; I cannot say if Richardson and Wrench valued it at £5,500 in January, 1887; there are additions to the cost of the property in the shape of buildings, insurance, and interest; the sum of £2,333 13s. 7d. is added for the time between purchase and date of liquidation; it was a rent-producing property; on 30th November, 1889, Henderson's Estate was valued in the books at £6,600 10s. 4d.; I do not know that Hardie and Gorman valued it at that date at £7,305 11s. 3d.; I took exception to some capital standing in the name of M'Kenzie; I could find no application for shares; Manning was a shareholder; I cannot say whether he made any application on the proper form; I do not question the shares taken up by Mr. Cohen; I believe he was a partner of Mr. M'Kenzie's; his shares appear to have been taken up at the same time as Mr. M'Kenzie's; I gave certain evidence as to the receipt by Martin of certain fees as architect; at that time I was not aware that the articles of association allowed the directors to take fees for work done for the Company; I thought he had power to do so through a partner; I now look at article 77; I complained of the value of estates being increased by the interest being added to them; it has been the practice to add 8 per cent. in this way, but in the case of the Waverley leaseholds interest has been charged at the rate of 40 per cent.; at the time of the liquidation they stood at £9,060 in the books; shops were then in course of erection upon that property; a total sum of £3,025 19s. 9d. was paid in interest, and £1,672 upon the property in buildings; the increased value in that case was at the rate of between 8 and 9 per cent.; in September, 1890, the directors loaded five of the estates; at the time I made my report I had the written valuations in my custody; I do not know that the figures at which they were loaded were much below the valuations given by Hardie and Gorman, Richardson and Wrench, and Sievers and Green; the North Willoughby Estate, at 30th September, 1890, was written up from £9,000 to £12,000; at that time Hardie and Gorman had valued it at £12,800, and Sievers and Green at £16,000; I would estimate the value of any property at what it cost me; I would add any legitimate expenses to the value; I know it is the usual thing to add to the value of properties in these companies; it makes no difference, in my opinion, whether they had valuations or not; they had no right to take credit for the increased value of the properties, and showing it as profit before they had realised; I know that an insurance society in Sydney added £20,000 to the value of their property on account of the opening of Moore-street, and showed it separately in their balance-sheet; the Company has always kept its book values within the valuations; if the book values had been realised the Company would have paid 20s. in the £, and if the valuations had been realised the Company would have had a surplus.

*By Mr. Smith:* I have not before this occasion had to deal with the balance-sheet of a public company or bank of any kind professionally; I do not profess to know anything about land values; it has been the practice of companies to charge up properties 8 per cent. per annum on their cost; some accountants will pass that in a balance-sheet some will not; when I took charge of this Company's papers they were taken from the office in a spring van; the vouchers were tied up in bundles before being put on the carts; I went with the carts to my office; I did not systematically go through the articles of association to see what powers the auditors or directors had, and what not; I read through the whole of the minutes, and read them; all the figures in the balance-sheets are in the books; all the figures that appear in any of the balance-sheets are correct as far as the books are concerned; there is nothing to show that the auditors had anything to do with the Company until the balance-sheet for September, 1887; I look at that balance-sheet; there is nothing in that that I take exception to, as far as the auditors are concerned, except the item of capital, £9,796; in that I object to the £3,000 of Cameron's and the 625 shares—M'Kenzie's, Fairweather's ten shares, Wells' ten shares, R. Cameron's 100 shares, and Turner's; I do not know of any kind of capital that the Company was empowered to deal with besides the ordinary capital; I look at articles 29 and 32 of the articles of association; they are an authority to the directors to treat money paid in as deposit capital as capital; under those articles, if a sum of money were paid into the Company as deposit capital the directors would be justified in putting it in their balance-sheet and treating it as capital, in so far as its shareholders were concerned; I look at counter cash-book—No. 5—at folio 18; I find headings "deposits," "capital," "repayments;" under "capital" appears the entry "W. G. Cameron, £3,000, investing coupons," under date of 28th September; I look at exhibit No. 37, and there find the block of a receipt given to Cameron for £3,000; it shows the £3,000 was paid for coupon shares of series No. 2, and that it was to remain for three years at interest, or withdrawable without interest; article 32 shows that these shares were not to be entered in the register; Cameron's other shares appear in the register; I look at page 21 of No. 8, and see that the £3,000 was withdrawn—

that no interest was paid on it; seeing the articles, seeing the entry in the counter cash-book, the block of the receipt, and the entry in the cash-book, and that no interest was charged, the inclusion of the £3,000 in the item of capital was allowable; therefore, it was allowable for the auditors to pass it; I did not look for the application forms of all those on the register, but only for those of the persons who had not paid anything on their shares; I do not say that because I could not find any application form that the person had not paid anything on their shares; I cannot say that the shares for which I cannot find applications have not been applied for; if a man applies for shares, although he may not send in the application money and the directors waive the payment and allot the shares to him and issue the scrip he becomes a shareholder; if the shares are allotted to him the directors could sue him for payment for the shares; I look at page 45 of minute-book and find that M'Kenzie applied for twenty-five shares of the old series—equal to 625 of the new—and that they were allotted to him; that satisfies me that M'Kenzie on that date became a shareholder to the extent of 625 shares; I look at butt No. 28 of share certificate book and find that scrip for 625 shares was apparently issued to M'Kenzie; seeing that the shares were applied for by M'Kenzie, and allotted to him, and that the butt showed the issue of the scrip to him, I think the auditors were justified in including those shares in the balance-sheet for that year; Wells' share account has been entered in just the same way as M'Kenzie's; I look at butt 38 of scrip certificate book, showing that ten shares were issued to Wells, and on butt 31 that ten shares were issued to Fairweather, and on butt 53 that ten shares were issued to Turner; I cannot say that written application forms for these shares were not in the possession of the Company at one time; it is quite possible that such papers may have been lost; as far as 1887 is concerned, there is nothing in the books to cause the auditors to think anything was wrong; I look at balance-sheet for 1889 in minute-book, signed by the auditors; in that I object to the item "capital"; M'Kenzie's shares more than make up for the difference between the capital as shown in the books, and that shown in the balance-sheet; I would refuse to sign a balance-sheet showing that nothing had been paid on certain shares for two years, but which were included in the assets; the mere fact of M'Kenzie not having paid anything on his shares for two years would have been sufficient for me to have excluded his shares from the balance-sheet.

Taken and sworn at Sydney, this 9th day of }  
August, 1893, before me,—

W. T. BALL.

GEORGE H. SMITHERS, D.S.M.

Postponed till 2 p.m. to-morrow. Same bail.  
Sydney, 9th August, 1893.

GEORGE H. SMITHERS, D.S.M.

This deponent, *William Ball*, recalled and resworn, states, in answer to Bench:—When I said it was allowable to include the £3,000 in the item "capital," I meant it was allowable for the auditors to pass it; I do not consider it so myself.

*By Mr. Smith*: The Company's books and papers were removed from their office by me in two vans at about 6-20 p.m. in the latter end of September; I went through the drawers in the Company's offices to see that all papers had been removed; I do not know that two months after Mr. Levy found a number of written papers in the Company's offices; there were some plans and old newspapers left in the strong-room; as far as I know all the written papers were removed; if a man is a shareholder, and has not paid anything for two years, I do not consider it right of the directors to look upon him as a shareholder, unless they were satisfied he was a good mark; supposing they thought he was a good mark and would pay all moneys due by him they would have it within their discretion as to whether they would leave him on their books as a shareholder; I presume they would be guided by their articles; I refer to article No. 22 particularly in saying that; looking at the articles it would be within the discretion of the directors to determine whether a debt was good or bad within a reasonable time; I cannot point out in any article any limitation of the discretion of the directors; I cannot point out in the articles any limitation to what I call a reasonable time; there is nothing in the articles which restricts the directors as to time; I know of no restriction upon the directors as to their judgment; I am in as good a position to judge of the worth of the debt with regard to M'Kenzie as the directors were in 1889, seeing who the man was; assuming that the directors treated M'Kenzie's as a good debt by including it in the unpaid capital, and seeing that they had discretion as to that, I think the auditors should have called attention to it in their report, as it had remained unpaid for two years; I look at the balance-sheet for 1889; as far as the auditors are concerned I take exception to the item "Preliminary expenses," in which the £100 has not been written off; there is an article directing this to be paid out of capital; in my evidence I have always been of opinion that it should have come out of the profits; article 5 says it is to come out of capital; if £500 was the total amount of preliminary expenses, and £100 was written off the first year and the £400 appeared afterwards as unpaid, it would deceive a shareholder; they would take it as a good asset; many shareholders cannot tell one side of the balance-sheet from another; if £100 were written off £500, £400 would remain; the balance-sheet for 1889 shows the £400 on the face of it; it is shown openly on the face of the balance-sheet; the £400 does not honestly and correctly represent that account; it should have been £300; £100 had been wiped off the £500; if they determined not to write off any more than the £100, £400 was the right amount to appear on the sheet; there is nothing in the articles to determine how much should be written off the preliminary expenses each year; it would be a matter for the directors to determine how much should be written off each year; if they determined not to write off any in any particular year, the amount in the balance-sheet of that particular account should be the same as the previous year; if the directors resolved to write off any particular amount at any time any portion of preliminary expenses, they could a month hence determine the opposite without any dishonesty; if the directors had resolved to write off £100 each year, it was open for them at any time to alter that resolution; it was open for them to determine not to write off anything in any particular year; I think when a resolution is passed there should be another to rescind it; assuming the directors had altered their determination about writing off preliminary expenses, the state of that account was fairly shown in the balance-sheet; assuming that the directors properly altered their determination as to how much should be written off preliminary expenses, their action was honestly represented in the balance-sheet—that is, assuming that the shareholders knew that for the present the preliminary expenses were to remain; a shareholder comparing the 1888 sheet with the 1889 sheet, he would see that nothing had been written off preliminary expenses; I believe the determination to pay off the

the £100 the first year was shown on the balance-sheet; I have no reason for saying that that determination to pay off £100 per year was ever communicated to the shareholders; even if they had been so told, they would know by looking at the 1889 balance-sheet that the £100 had not been written off; they would therefore have an opportunity of finding fault if they objected to it; I can find no record that any shareholder ever found fault with that; with regard to the auditors, the next item in the 1889 sheet I object to is "sundry debtors."

Taken and sworn at Sydney, this 10th day of }  
August, 1893, before me,—

W. T. BALL.

GEORGE H. SMITHERS, D.S.M.

Postponed till 2 p.m. to-morrow. Same bail.  
Sydney, 10th August, 1893.

GEORGE H. SMITHERS, D.S.M.

This deponent, *William Ball*, recalled and resworn, states, in answer to Mr. Smith:—The 1889 balance-sheet shows that the directors proposed to pay £100 off the preliminary expenses; the balance-sheet shows that only £100 had been written off the preliminary expenses; with regard to the item "sundry debtors" item, it is not a common practice for large firms to leave over certain sums chargeable against certain assets until the items have been journalised; if it were chargeable to different estates, it would make no difference to the balance-sheet whether the items were given in detail or shown in a lump-sum; it is the proper proceeding, in my opinion, for a firm to value their stock at the cost price, with the interest added, and not to obtain a valuation; I would not go so far as to say it was improper to take the cost price with 8 per cent. interest added; if I add interest to a property I would do so on the principle that it would cost the interest to keep it for twelve months; if a property cost £5,000 at the beginning of the year the addition of 8 per cent. interest at the end of the year would bring the cost up to £5,400; supposing the price had in this way been increased and a competent firm of valuers valued it at £10,000, it would be wrong to treat that increase by valuation as profit in the same way as I would add 8 per cent. to the cost for keeping the property; I would add survey fees to the first cost; I would also in the same way, add legal expenses in connection with the property; insurance would not be a fairly chargeable cost to add to the property; I would not add it to the value of the property; I would say it was improper to do so; any expenditure which adds to the cost of a property as distinguished from the maintenance of it I should say one was justified in adding to the first cost; I do not think that auditors could fairly differ on the question of adding insurance to the cost of a property; the £23 19s. 6d. was for insurance on different properties; it is only because I think the insurance should not be charged as part of the cost that I object to its inclusion in the item "sundry debtors"; there may be a difference of opinion between auditors as to that insurance money being added to the cost; I do not consider valuation fees are fairly chargeable against a property in the same way as survey fees; if a man buys land for £1,000 and pays £5 survey fee he might fairly consider the land cost him £1,005; if he also spent £5 on valuation I would object to his including that in the capital cost of the land; the £18 18s. valuers' fees to which I take exception in the 1889 sheet was written off next year; I object to the £66 1s. 8d. for law costs in the item "sundry debtors"; I have looked up the bills of costs and found that lump sums with regard to certain purchases are shown without any details; I did not go through Shorter's bill of costs of 25th August, 1887, for £82, to see what items are fairly chargeable against certain properties; if a charge were made for writing for an abstract of title for property to be purchased by the Company, that charge would be fairly made against that property if purchased; in condemning the item £289 10s. for law costs I did not allow for charges made in connection with purchase of properties; I assumed that none of the £82 10s. 6d. bill of costs was properly chargeable against the properties, and that it had nothing to do with any of the properties; the £82 10s. 6d. is included in the £289 10s. 9d. to which I object; I cannot say that no portion of the bill for £82 10s. 6d. has to do with properties; with regard to the item of £66 1s. 8d. for law costs; the £82 10s. 6d. bill of costs is that on account of which the £66 1s. 8d. to which I object was paid; I look at the item in the bill "You to Callaghan and Phillip"; I cannot say whether or not the charges on page 1 of that bill are connected with the purchase of the Osmund Estate; I cannot say whether or not the charges on page 2 are in connection with the purchase of the Astolat Estate; I had no better material than the bill itself to tell whether the legal charges were chargeable to properties or not; it is possible that portions of that bill are chargeable to different estates, although I have expressed an opinion to the contrary; the £23 19s. 6d. for insurance was debited to different estates the following year, and so removed from the "sundry debtors" account; the cost of the Carlton Estate on 6th August, 1888, was £16,582 2s. 6d.; with other allowable costs appearing in the ledger, the cost to the Company was £17,105 14s. 8d.; that is without interest; that property was in the possession of the Company at the time of liquidation; in the 1889 balance-sheet it is valued at £18,733 6s. 5d.; it stood at that value in the books at 30th September, 1889; that was about fourteen months after the purchase; the interest on the first cost (£17,105), at 8 per cent. per annum, would be about £1,589; that, added to the cost price, would make the cost, at 30th September, 1889, £18,694; it is a fact that by adding interest at the rate of 8 per cent. per annum for the fourteen months, the value is brought up to within £39 of the value shown in the balance-sheet; I refer to the sale of the Carlton Estate, it sold from £2 1s. down to £1 10s. per foot; regarding the North Willoughby Estate, the actual cost was £9,600; the first payment was on 5th February, 1888, of £8,000; the allowable additions to that cost amounted to £49 11s. 6d. for stamp duty and survey fees, making the cost £9,649 11s. 6d.; adding interest, at the rate of 8 per cent. per annum, from the date of purchase to 30th September, 1889, the cost would be £10,933; Sievers and Green's valuation was £16,000; in the 1889 balance-sheet the property stood at a value of £9,917 14s.; therefore, that property was put in the balance-sheet at more than £1,000 less than it would come to if interest at the rate of 8 per cent. were added; I have said nothing in my report about the fact of this property being shown in the balance-sheet as £1,000 less than it would have been with 8 per cent. added; I had most of the valuations referred to by Mr. Wise in my possession when I made my report; I have not looked through the Company's letters to the Banks; I cannot say whether the valuations of the properties appear in the Company's letters to the Banks; I made no reference whatever in my report to any of the valuations I had in my possession; in making my charge of undue inflation of properties I wholly disregarded all valuations by outsiders;

I know that every financial institution in Sydney makes it advances upon valuations made by outside valuers; I know that these valuations are regarded as thoroughly trustworthy; still I wholly disregarded the valuations I had in my possession when I made my charge of unduly inflating the value of properties; I heard Brewer say at Smairl's trial that he had not counted the cash; I do not remember him saying, also, that if the cash was counted it was by the other auditor, in his absence; I said, in my report, that the cash in hand, £3,305 18s. 4d., only existed on paper; I still adhere to that; I look at cash-book at date 30th September, 1890; the total amount paid out by the Company in October, 1890, was £5,469 16s.; the amount received during that month was £3,162 10s. 4d.; the items making up those two totals are correctly set out in the book; the sum of £2,306 15s. 8d. more was paid out in the month of October, 1890, than was received; I cannot, off hand, say where that £2,306 came from; I had gone over the payments in and out for the following month, when I stated that the cash in hand, £3,305 only existed on paper, and had noticed that the outgoings for October, 1890, exceeded the income by £2,300; the £3,300 was represented to be in hand at 30th September, 1890; I know of no other source from which the difference of £2,300 could have come according to the books except from cash in hand as at the 30th September, 1890; the books demonstrate to me that this Company was doing the business of a bank—keeping current accounts; seeing they kept current accounts, there would be nothing extraordinary in their keeping a large amount of cash in hand to meet the demands upon the current accounts; in my report I took objection to the representation that a profit was made on Henderson's Estate; I did so on the assumption that the sales were not made till after 30th September, 1889; the books show that it is very often the case that a transaction is not journalised till some days after it has been made; the date of this transaction appears in the books as 17th October, 1889; it is the date which induces me to think that the transaction was not completed till the 17th October; the date in the journal and the date at which the deposit is credited in the repayment ledger are the only grounds upon which I base my belief that the sale was not completed till after 30th September; I look at page 262 of minute-book, and find that on the 23rd September, 1889, the manager reported sale of portion of Henderson's Estate; to-day I found an original account sales of Hardie and Gorman's, dated 17th October, showing the sale of portion of Henderson's Estate, on 21st September, 1889, for £2,044; I found it in my office in going through the papers for something else; I do not doubt the genuineness of the account I found; at the time I made my report, I had not seen that minute, nor did I know of that account; I do not doubt the genuineness of the entry in the minute-book; having seen the minute and Hardie and Gorman's account, I do not doubt that sales of that estate to the amount of £2,044 were made in September, 1889; the minute and the account sales show that the dates in the books upon which I relied are no criterion as to the date of the sales; the entry of Smairl's deposit comes after the entries of 17th October; it is possible that Smairl's deposit was paid in September; Smairl's debit appears under date of 17th October, 1889; the debit to Smairl in repayment ledger is dated 17th October, the same date as in Hardie and Gorman's account; I have no more reason for supposing that Smairl's sale took place in October than that the others did; supposing that Smairl's sale took place upon the same date as that upon which the others did take place, the inclusion of the profit upon the Henderson Estate in the 1889 balance-sheet would be justifiable.

Taken and sworn at Sydney, this 11th day }  
of August, 1893, before me,—

GEORGE H. SMITHERS, D.S.M.

W. T. BALL.

Postponed till 11 a.m. on Monday next. Same bail.  
Sydney, 11th August, 1893.

GEORGE H. SMITHERS, D.S.M.

Exhibit No. 28.

This deponent, *Jonathan Wiley*, recalled and resworn, states:—I got the balance-sheet produced from one of the clerks of the Imperial Company; it was handed to me over the counter at the Company's office.

*By Mr. Blackett*: I produced another document in this case and gave certain evidence about it which I afterwards admitted was wrong; I put the balance-sheet I now produce in a pigeon-hole after reading it; I attached no special importance to it; if I had not found it I could not have sworn I had got it; I remember receiving it at the office; I received a balance-sheet each year; that for 1889 came by post; in 1887 I received two—one by post and the other at the meeting; the document I now produce is the same as I produced when I was called in this case before; I said before: "I will not swear I did not receive that sheet at the annual meeting of shareholders; to the best of my knowledge and belief I did so;" I was referring then to the sheet I now produce; I am now positive that I did not receive it at the meeting; I was wrong in stating that I believed I had got it at the meeting; my recollection as to the matter was as good when I gave evidence before as it is now; I do not remember receiving a copy of that sheet before the meeting; I know that what I now produce differs in the wording from that first issued by the Company; I saw the first sheet for 1888 that was issued; I saw it at the meeting; the sheet produced was not at the meeting; when I said that to the best of my belief I had received it at the meeting I meant while the meeting was going on; I did not see the two reports at the meeting; I first saw the sheet I now produce some days after the meeting; I was often at the Company's office about that time; I could not say the exact day upon which I received the sheet I now produce, nor from whom I received it; I am certain I got it at the office; I am certain it differs from that which I saw at the meeting; I believe Cameron resigned on account of the directors' proposal as set out in the other sheet not having been agreed to.

*By Mr. Heydon*: When I said that to the best of my knowledge and belief I had received the sheet at the meeting I believed I had obtained it at the meeting.

Taken and sworn at Sydney, this 14th day of }  
August, 1893, before me,—

GEORGE H. SMITHERS, D.S.M.

J. WILEY.

Exhibit No. 65

This deponent, *Edward Harrison*, recalled and resworn, states:—I identify Smairl's hand-writing on the document produced; both the writing in ink and that in blue pencil; the report and balance-sheet were printed on one sheet of paper; in 1888 a report and balance-sheet were prepared and sent into the meeting of shareholders; all the copies that were not taken away by the shareholders were tied up in a bundle

bundle and put away in the strong-room ; I read that report and balance-sheet ; another report and balance-sheet were afterwards printed ; I believe some of them were distributed to shareholders ; we kept them in a drawer under the counter under the instructions of Smairl ; anybody coming in and asking for one could get it ; I was teller at that time, and was at the counter all day ; no other report and balance-sheet but the second issue were issued for that year after the first lot had been put away ; the second lot were distributed by the authority of Smairl ; I read over the balance-sheets and reports—both of them ; the signature to the document produced is Smairl's (affidavit of proof in the estate of Edward Hobbs).

Exhibit No. 66.

Taken and sworn at Sydney, this 14th day }  
of August, 1893, before me,—

EDWARD HARRISON.

GEORGE H. SMITHERS, D.S.M.

This deponent, *Ambrose Jones*, on his oath, saith :—I am a clerk in the Bankruptcy Court ; the documents produced are portion of the records in the bankrupt estate of Edward Hobbs ; only preferential claims were paid in that estate.

Exhibit No. 66.

Taken and sworn at Sydney, this 14th day }  
of August, 1893, before me,—

AMBROSE JONES.

GEORGE H. SMITHERS, D.S.M.

This deponent, *James Gregg*, on his oath, saith :—I am one of the managing directors of Richardson and Wrench (Limited) ; we did some business for the Imperial Land, Building, and Deposit Company ; our firm at no time valued the properties of the Imperial Company at about £100,000 ; land was not so valuable in 1890 as in 1888, in and about Sydney.

Taken and sworn at Sydney, this 14th day }  
of August, 1893, before me,—

J. GREGG.

GEORGE H. SMITHERS, D.S.M.

Postponed till 11 a.m. to-morrow. Same bail allowed.  
Sydney, 14th August, 1893.

GEORGE H. SMITHERS, D.S.M.

Postponed till 11 a.m. on Monday next. Same bail.  
Sydney, 15th August, 1893.

GEORGE H. SMITHERS, D.S.M.

This deponent, *Ambrose Jones*, on his oath, states :—I am a clerk in the Bankruptcy Court ; I produce the papers in the insolvent estate of Alexis Greig M'Kenzie ; the sequestration was on the 18th January, 1887 ; no dividend was paid ; his certificate was issued on the 5th January, 1893, after being suspended.

Taken and sworn at Sydney, this 21st day }  
of August, 1893, before me,—

AMBROSE JONES.

GEORGE H. SMITHERS, D.S.M.

This deponent, *George Edward Hilliard*, on his oath, states :—I am accountant in the Haymarket Branch of the Union Bank ; I produce a cheque for £50 ; it is signed by the defendant Byrnes.

Exhibit No. 67.

Taken and sworn at Sydney, this 21st day }  
of August, 1893, before me,—

GEO. E. HILLIARD.

GEORGE H. SMITHERS, D.S.M.

This deponent, *Edmund Simmons Mayhew*, on his oath, states :—I am teller in the Bank of New South Wales, Sydney ; I look at the deposit slip for £4,590 10s. (No. 48), and the cheque for £50 produced by last witness ; that cheque was paid in with that deposit.

Exhibit No. 67.

Taken and sworn at Sydney, this 21st day }  
of August, 1893, before me,—

E. S. MAYHEW.

GEORGE H. SMITHERS, D.S.M.

This deponent, *William Ball*, recalled and resworn, states, in answer to Mr. Gannon :—When the Company went into liquidation Byrnes was indebted to it ; I look at Byrnes' account ; on 23rd May, 1891, the sum of £100 was paid in to his credit, and a cheque payable to W. P. Smairl or order for £100 was drawn against it that day ; I have not been able to trace what became of proceeds of the cheque ; I cannot say whether that cheque was an advance to the Bank or not ; the deposit slip shows that the money was paid to Byrnes' credit in 100 notes.

Exhibit No. 68.

Exhibit No. 69.

*By Mr. Blackett* : I have custody of all the papers, documents, and correspondence belonging to this Company ; I believe I have seen two letters of resignation from Cameron.

*By Mr. Wallace* : I have seen Green's share account in the register ; he paid with calls 17s. per share for his shares ; during his connection with the Company only two balance-sheets were issued—those for 1889 and 1890 ; the number of shares he held was 6,667 ; so far as I can judge, the money he invested in the shares will be a dead loss to him.

*By Mr. Heydon* : Both the cheque for £100 and the deposit slip are in Byrnes' handwriting ; he paid in and drew out the £100 on the same day ; his overdraft arose from subsequent drawings ; I look at articles of association ; I have read article No. 5, showing that preliminary expenses were to be paid out of capital ; there is nothing in the books to show what the expenses in connection with drawing and perfecting the articles and memorandum of association were ; I can find nothing in the books showing what the costs and charges incidental to forming and floating the Company were ; I have found there were promoter's shares amounting to £500 ; that amount is shown as capital in the first balance-sheet on one side, and as preliminary expenses on the other ; there is nothing to show whether the preliminary expenses amounted to more than £500 or less ; I have not found the expression "investing coupons" anywhere in any of the books or articles, except in the entry of Cameron's £3,000, and the vouchers and slips relating to it ; I look at article No. 29 ; I have looked through the books and cannot find any record of the directors having made any rules and regulations with regard to money received under that article ; there is no minute showing that the question was ever brought before them ; there is nothing to show that they ever fixed any period of notice upon which such moneys could be withdrawn ;

Exhibit No. 68.

Exhibit No. 69.

there

there is no account in any of the books under the heading "Deposit capital," or "Withdrawable capital;" I look at the two draft balance-sheets for 30th September, 1887, signed by the auditors, and pasted in the minute-book at pages 94 and 95; each is signed by both auditors; the capital appears in each of them; the entries are not the same in each; in the upper one the entry, "Capital coupons, £3,000," appears, but is not mentioned in the other; I have made a calculation as to the value of the properties of this Company, with 8 per cent. added from the time of purchase up to 30th September, 1890; besides this 8 per cent, I have added the cost of buildings, the ground rent, the survey fees, plans, and law costs, wherever there have been such expenses; wherever there have been sales I have credited the estate with the full profit shown by the books; I have left out charges for insurance and for caretakers; the whole of these latter charges would not amount to £1,000; the value of the Waverley leaseholds of 30th September, 1890, with the addition of the 8 per cent., and the other charges I have mentioned, was £5,504 4s. 9d.; they stand in the books at £7,827; at the same date. I value the North Willoughby Estate at the same date at £11,724 4s. 6d.; it stands in the books at £12,000; Bartlett's Estate works out at £7,658, and stands in the books at £8,842 8s. 5d.; Smidmore's comes out at £8,428 12s. 6d., and stands in the books at £8,500; Malcolm's estate works out at £12,695 7s. 3d., and stands in the books at £14,254 14s. 3d.; Henderson's comes out at £7,172 17s. 5d., and stands in the books at £7,093 16s. 3d.; the Carlton Estate comes out at £16,947 6s. 6d., and stands in the books at £18,582 5s. 4d.; the difference between my calculated value and that in the books is something about £7,000; I have made my calculations on a simple interest basis; I have found certain valuations by different people of the Company's properties; all those have been referred to in my evidence, except one dated 30th October, 1888, by Richardson and Wrench, of the Gordon property; the value was estimated at £5,135 14s.; Sievers and Green afterwards valued it at £16,000; that Green is a son of the defendant Green; I remember the first balance-sheet for 1887; the figures in that as to capital are not correct; that applies to the sheets for 1888, 1889, and 1890 also; I said, in cross-examination, that all the figures in the balance-sheets were correct as far as the books were concerned; that answer was limited to the figures only; the balance-sheets are not correct as to headings under which the figures appear; in the 1888 balance-sheet the capital subscribed appears as £20,000; between that date and the 30th September, 1890, the number of shares sold was 735, according to the books; in the balance-sheet for 30th September, 1890, the subscribed capital appears as £20,000, the same as at 30th September, 1888; there is nothing in the minutes to show that the directors altered their determination to write off the £500 preliminary expenses in five years; I look at report for year ending 30th September, 1889, which shows that provision had been made for writing off the £100 preliminary expenses; it is not written off in the balance-sheet; I have looked at the bill of costs about which I was cross-examined; the items relating to the sale and purchase of properties in that bill form a very small proportion of the total; page 86 of minute-book shows that the equity suit about the "Carrington Hotel" had been abandoned; some of the entries in the bill of costs refer to that suit.

*By Mr. Wise:* Page 283 of minute-book shows that at 16th November, 1889, the Newtown property was valued by Batt, Rodd, and Purves at £7,600; I produce a certified copy of that valuation which I found among the papers.

*By Mr. Blackett:* I look at the two manuscript sheets in the minute-book; one is a copy of the receipts and expenditure and the profit and loss account, the other is a copy of the balance-sheet; the statement of receipts and expenditure does not show the balances of any outstanding accounts; one shows the total amount received during the year on account of capital; it shows the total amount of capital paid up to that date; it does not show the capital unpaid; the other sheet shows the capital paid up and subscribed; the meeting before the 30th September, 1887, was 13th September, 1887, and the next after it 6th October, 1887; there was none between those dates.

*By Mr. Smith:* There is no account in the ledger showing the cost of making up and perfecting the articles, and forming and floating the Company; the Company have paid something more than the £500 worth of promoters' shares; I find the entry in the cash book "Articles of Association, £9; printing, £23 14s.; and registration, £17; and petty cash for formation of company, £10"; those are entered into the different accounts, such as "Printing"; there is an entry showing the payment to Henry of £50 in connection with the formation of the Company; there is no entry to show that any commission was paid to any broker for floating the Company; I know that a commission is usually paid for brokerage in connection with the floating of a Company; the first balance-sheet shows that £500 was charged for preliminary expenses, and that £100 was written off, leaving £400; that £100 was written off; I know of no other expenditure of that amount in connection with the formation of the Company that those figures could represent except the £500 for shares; the books show that Henry received 100 out of the 500 shares; there is nothing to show what Henry did in connection with the promotion of the Company; besides Henry a man named Hewlett had fifty shares; neither of the auditors had any shares; Cameron had fifty, and the rest were divided in fifty each; I know something of the practice of companies; I know that Lassetter & Co. (Limited), passed a resolution to do something which, under their articles, they had the power to do; that was done so as to have a record of the matter; I know of no case where a board of directors passed a resolution affirming that they had the power to do a thing which their articles gave them power to do; one of the manuscript sheets I have referred to the entry of £3,000 under capital coupons is shown as distinct from the capital account; from the very nature of those two manuscript sheets they should show different figures in same items; one shows the amount of capital paid and the other the capital subscribed and paid; say, the £3,000 should be shown as distinct from the other capital; the amount of £275 was debited back for cheques dishonored on 30th September, 1887; that would make a difference of about £31 between the two sheets; the £500 preliminary expenses could not have been put in the receipts; the £275 18s. 10d. for dishonored cheques and £224 1s. 2d., the difference between the two sheets, amount to £500; that would account for the £500 left out in the sheet as to the figures; the report for 1889 merely proposed to write off £100 for preliminary expenses; the balance-sheet shows that only £100 had been written off, leaving £400 of the preliminary expenses; the £400 is shown in the sheet; the £400 is shown in the last balance-sheet issued as remaining of the preliminary expenses; there is nothing in any of the published statements of the Company, the directors or auditors, nor in their books, representing that more than £100 had been written off preliminary expenses; that was shown correctly as the £100 had been written off; with regard to Smidmore's Estate, calculating on the simple interest basis, and adding 8 per cent. to the value, there is a difference of £71 between my valuation and that shown in the books.

*By*

*By Mr. Wise:* In giving my calculations as to property, I did not allow interest on anything but the cost price; I did not allow any interest on any of the charges, such as ground rent, buildings, &c.; the cost price of the Carlton estate was £16,707; the interest on that for three years at 8 per cent. would be £4,021; assuming that none of it had been sold, it would stand in the books at 30th September, 1891 at a cost of £20,728; portions of it, amounting to £3,502 10s. 9d., were sold; in making my calculations I deducted any profit made; I deducted £972 from the sales as profit, leaving a total of £2,530 10s. 9d.; I reduced the interest by the amount sold; the dates of the sales were 15th December, 1888, £2,906 10s. 9d., 15th January, 1889, £510, and 30th September, 1889, £56.

*By Mr. Smith:* The interest added to the cost of a property represents the cost of keeping a property; if a man bought property for £1,000, and added 8 per cent. to it, at the end of a year it would have cost him £1,080; he could not charge interest on the £80 the next year; I say he could not charge interest on the interest; I have said the headings under which the figures appear in the balance-sheets are wrong.

*By Bench:* I do not object to the headings; I consider some of the items under "Sundry Debtors" are wrong.

*By Mr. Smith:* With regard to the balance-sheet for 1887, I object to the "Capital paid up and subscribed," because it includes Cameron's £3,000 as capital; I also object to the inclusion of M'Kenzie's and other shares in the capital; that is what I meant by saying that I objected to the headings under which the items appear; with regard to the bill of costs I have spoken of to-day, I will not undertake to say to within £10 what the charges against properties were in that bill; if I were auditing the books of a firm, and found there was a bill of costs added on to a property, I think I would send for the bill, and go through it carefully; I have not gone through all the bills of costs of this Company; I cannot say within £200 or £300 what the charges against properties were in all the bills of costs; I knew of the valuations made by Richardson and Wrench, Hardie and Gorman, and Batt, Rodd, and Purves, when I made my report.

Taken and sworn at Sydney, this 21st day of }  
August, 1893, before me,—

W. T. BALL.

GEORGE H. SMITHERS, D.S.M.

Postponed till 11 a.m. to-morrow. Same bail.  
Sydney, 21st August, 1893.

*Statement of the Accused.*

WILLIAM GRAHAM CAMERON stands charged before the undersigned, one of Her Majesty's Justices of the Peace in and for the Colony aforesaid, this 23rd day of August, in the year of our Lord 1893, for that he, the said William Graham Cameron, on divers days between the 9th of March, 1886, and the 14th September, 1891, at Sydney, in the said Colony, being a director of the Imperial Land, Building, and Deposit Company (Limited), did with others conspire falsely and fraudulently to represent the affairs of the said Company, and the examinations of all the witnesses on the part of the prosecution having been completed, and the depositions taken against the accused having been caused to be read to him by me, the said Justice (by or) before whom such examination has been so completed; and I, the said Justice, having also stated to the accused and given him clearly to understand that he has nothing to hope from any promise of favour, and nothing to fear from any threat which may have been holden out to him to induce him to make any admission or confession of his guilt, but that whatever he shall say may be given in evidence against him upon his trial, notwithstanding such promise or threat; and the said charge being read to the said William Graham Cameron, and the witnesses for the prosecution Ernest Hurley, Edward Harrison, Jonathan Wiley, George Guile, William Stronge, Spence H. Puckle, William Thomas Ball, William John M'George, Robert C. S. Wilkinson, William H. Chapman, Frederick Moorehouse, Ambrose Jones, James Gregg, George E. Hilliard, Edmund Simmons Mayhew, being severally examined in his presence, the said William Graham Cameron is now addressed by me as follows:—"Having heard the evidence, do you wish to say anything in answer to the charge? You are not obliged to say anything unless you desire to do so; but whatever you say will be taken down in writing, and may be given in evidence against you upon your trial"; whereupon the said William Graham Cameron saith as follows:—"I desire to reserve my defence."

Taken before me, at Sydney, in the said Colony, the day and year first above mentioned,—

GEORGE H. SMITHERS, D.S.M.

(N., 11 and 12 Vic., cap. 42.)

*Statement of the Accused.*

WILLIAM MARTIN stands charged before the undersigned, one of Her Majesty's Justices of the Peace in and for the Colony aforesaid, this 23rd day of August, in the year of our Lord 1893, for that he, the said William Martin, on divers days between the 9th of March, 1886, and the 14th September, 1891, at Sydney, in the said Colony, being a director of the Imperial Land, Building, and Deposit Company (Limited), did with others conspire falsely and fraudulently to represent the affairs of the said Company; and the examinations of all the witnesses on the part of the prosecution having been completed, and the depositions taken against the accused having been caused to be read to him by me, the said Justice (by or) before whom such examination has been so completed; and I, the said Justice, having also stated to the accused and giving him clearly to understand that he has nothing to hope from any promise of favour, and nothing to fear from any threat which may have been holden out to him to induce him to make any admission or confession of his guilt, but that whatever he shall say may be given in evidence against him upon his trial, notwithstanding such promise or threat; and the said charge being read to the said William Martin, and the witnesses for the prosecution Ernest Hurley, Edward Harrison, Jonathan Wiley, George Guile, William Stronge, William Thomas Ball, Spence H. Puckle, William John M'George, Robert C. S. Wilkinson, William H. Chapman, Frederick Moorehouse, Ambrose Jones, James Gregg, George E. Hilliard, Edmund Simmons Mayhew, being severally examined in his presence, the said

William

William Martin is now addressed by me as follows:—"Having heard the evidence, do you wish to say anything in answer to the charge? You are not obliged to say anything unless you desire to do so; but whatever you say will be taken down in writing, and may be given in evidence against you upon your trial;" whereupon the said William Martin saith as follows:—"Nothing to say."

Taken before me, at Sydney, in the said Colony, the day and year first above mentioned,—

*Information—General Purposes.*

BE it remembered, that on this 15th day of July, in the year of Our Lord 1893, at Sydney, in the Colony of New South Wales, Alexander Hinds, a detective in the Police Force of the said Colony, appears before me, the undersigned, one of Her Majesty’s Justices duly assigned to keep the peace of our Lady

the Queen in and for the Colony of New South Wales, and on oath informs me that he has just cause to suspect and believe, and verily doth suspect and believe, that before and at the time of the committing of the offence hereinafter mentioned, William Byrnes, William Graham Cameron, James Green, Evelyn Manning, and William Martin, were directors of a certain public company called the Imperial Land Building, and Deposit Company (Limited) and Henry B. Brewer and William Rooke Row were employed in auditing and investigating the affairs of the said Company; and William Percy Smairl was an officer of the said Company; and that the said William Byrnes, together with William Graham Cameron, James Green, Evelyn Manning, William Martin, Henry B. Brewer, William Rooke Row, and William Percy Smairl, being so connected with the said Company as aforesaid, on divers days and times before the filing of this information; and with divers other persons at Sydney, in the Colony aforesaid, between the 9th day of March, in the year of our Lord 1886, and the 14th day of September, in the year of our Lord 1891, did amongst themselves and with divers other persons, conspire falsely and fraudulently to publish and represent to the shareholders, creditors, and depositors of the said Company, and to divers other persons, and to the public, the subjects of Her Majesty the Queen, that the said Company and its affairs had been and were in a sound and prosperous condition; and that the said Company possessed assets to certain large values and amounts; and that the purchases, investments, and advances which had been made with the same were secure, profitable, and valuable; and that large profits were from time to time derived from the business carried on by the said Company, and such as from time to time to enable certain large dividends to be declared and paid therefrom to the said shareholders, and certain high rates of interest to be paid therefrom to the said depositors; and that certain large numbers of shares in the said Company had been applied for and taken up; and that the said Company was possessed of a subscribed and paid-up capital to certain large amounts; and that certain large sums of money had been deposited with the said Company; and that certain deposit receipts were good and valid and available deposit receipts for the said sums; the said William Byrnes, together with the said William Graham Cameron, James Green, Evelyn Manning, William Martin, Henry B. Brewer, William Rooke Row, and William Percy Smairl, well knowing that the said Company and its affairs had not been and were not in a sound and prosperous condition; and that the said Company did not possess assets to the said large values and amounts; and that the said purchases, investments, and advances were not secure, profitable, and valuable; and that large profits were not from time to time derived from the business carried on by the said Company, nor such as from time to time to enable the said large dividends to be declared and paid therefrom to the said shareholders, and the said high rates of interest to be paid to the said depositors; and that the said large numbers of shares in the said Company had not been applied for or taken up; and that the said Company was not possessed of subscribed and paid-up capital to the said large amounts; and that the said large sums of money had not been deposited with the said Company; and that the said deposit receipts were not good and valid and available deposit receipts for the said sums with intent to deceive and defraud the said shareholders, creditors, and depositors, and the said divers other persons, and the public, the subjects of Her Majesty the Queen, and to induce them to purchase and hold shares in the said Company, and to become customers, depositors, and creditors of the said Company, and to make advances of money to them, the said William Byrnes, William Graham Cameron, James Green, Evelyn Manning, William Martin, Henry B. Brewer, William Rooke Row, and William Percy Smairl, and to the said Company, and to contrive to do business with the said Company. Whereupon the said Alexander Hinds prays that I, the said Justice, will proceed in the premises according to law.

Sworn at Sydney, in the said Colony, on the day }  
first above written, before me,— }

ALEXANDER HINDS.

GEORGE H. SMITHERS, J.P.

New South Wales, }  
to wit. }

*Information—General Purposes.*

BE it remembered, that on this 3rd day of July, in the year of our Lord 1893, at Sydney, in the Colony of New South Wales, *Alexander Hinds*, a detective in the Police Force of the said Colony, appears before me, the undersigned, one of Her Majesty's Justices duly assigned to keep the Peace of our Lady the Queen, in and for the Colony of New South Wales, and on oath informs me that he has just cause to suspect and believe, and verily doth suspect and believe, that before and at the time of the committing of the offence hereinafter mentioned, William Graham Cameron, James Green, Evelyn Manning, and William Martin, were directors of a certain public company called the Imperial Land, Building, and Deposit Company (Limited), and Henry B. Brewer and William R. Row were employed in auditing and investigating the affairs of the said Company, and William Percy Smairl was an officer of the said Company, and the said William Graham Cameron, James Green, Evelyn Manning, William Martin, Henry B. Brewer, William R. Row, and William Percy Smairl being so connected with the said Company as aforesaid, on divers days and times, before the filing of this information, at Sydney, in the said Colony, between the 9th day of March, in the year of our Lord, 1886, and the 14th day of September, in the year of our Lord, 1891, did amongst themselves, and with divers other persons, conspire falsely and fraudulently to publish and represent to the shareholders, creditors, and depositors of the said Company, and to divers other persons, and to the public, the subjects of Her Majesty the Queen, that the said Company and its affairs had been and were in a sound and prosperous condition, and that the said Company possessed assets to certain large values and amounts, and that the purchases, investments, and advances which had been made with the same were secure, profitable, and valuable, and that large profits were from time to time derived from the business carried on by the said Company, and such as from time to time to enable certain large dividends to be declared and paid therefrom to the said shareholders, and certain high rates of interest to be paid therefrom to the said depositors, and that certain large numbers of shares in the said Company had been applied for and taken up, and that the said Company was possessed of a subscribed and paid-up capital to certain large amounts, and that certain large sums of money had been deposited with the said Company, and that certain deposit receipts were good and valid, and available deposit receipts for the said sums, the said William Graham Cameron, James Green, Evelyn Manning, William Martin, Henry B. Brewer, William R. Row, and William Percy Smairl, well knowing that the said Company and its affairs had not been and were not in a sound and prosperous condition, and that the said Company did not possess assets

to

to the said large values and amounts, and that the said purchases, investments, and advances were not secure, profitable, and valuable, and that large profits were not from time to time derived from the business carried on by the said Company, nor such as from time to time to enable the said large dividends to be declared and paid therefrom to the said shareholders, and the said high rates of interest to be paid to the said depositors, and that the said large numbers of shares in the said Company had not been applied for or taken up, and that the said Company was not possessed of subscribed and paid-up capital to the said large amounts, and that the said large sums of money had not been deposited with the said Company, and that the said deposit receipts were not good and valid and available deposit receipts for the said sums, with intent to deceive and defraud the said shareholders, creditors, and depositors, and the said divers other persons and the public, the subjects of Her Majesty the Queen, and to induce them to purchase and hold shares in the said Company, and to become customers, depositors, and creditors of the said Company, and to make advances of money to them, the said William Graham Cameron, James Green, Evelyn Manning, William Martin, Henry B. Brewer, William R. Row, and William Percy Smairl, and to the said Company, and to continue to do business with the said Company: Whereupon the said Alexander Hinds prays that I, the said Justice, will proceed in the premises according to law.

Sworn at Sydney, in the said Colony, on the }  
day first written above, before me,— }

ALEXANDER HINDS.

C. N. PAYTEN, J.P.

*Summons to a person charged with an indictable offence.*

To William Percy Smairl, of Goulburn, in the Colony of New South Wales, William Graham Cameron, of Glen Innes, in the said Colony, and James Green, Evelyn Manning, William Martin, Henry B. Brewer, and William R. Row, of Sydney, in the Metropolitan Police District, in the said Colony.

WHEREAS you and each of you have been charged before the undersigned, one of Her Majesty's Justices of the Peace, in and for the said Colony, for that before and at the time of the committing of the offence hereinafter mentioned, you the said William Graham Cameron, James Green, Evelyn Manning, and William Martin were directors of a certain public company, called the Imperial Land, Building, and Deposit Company (Limited), and you the said Henry B. Brewer, and William R. Row were employed in auditing and investigating the affairs of the said Company, and you the said William Percy Smairl were an officer of the said Company, and you and each of you being so connected with the said Company as aforesaid on divers days and times before the filing of the information herein at Sydney, in the said Colony, between the 9th day of March, in the year of our Lord, 1886, and the 14th day of September, in the year of our Lord, 1891, did amongst yourselves, and with divers other persons conspire falsely and fraudulently to publish and represent to the shareholders, creditors, and depositors of the said Company, and to divers other persons, and to the public, the subjects of Her Majesty the Queen, that the said Company and its affairs had been and were in a sound and prosperous condition, and that the said Company possessed assets to certain large values and amounts, and that the purchases, investments, and advances which had been made with the same were secure, profitable, and valuable, and that large profits were from time to time derived from the business carried on by the said Company, and such as from time to time to enable certain large dividends to be declared and paid therefrom to the said shareholders, and certain high rates of interest to be paid therefrom to the said depositors, and that certain large number of shares in the said Company had been applied for and taken up, and that the said Company was possessed of a subscribed and paid-up capital to certain large amounts, and that certain large sums of money had been deposited with the said Company, and that certain deposit receipts were good and valid and available deposit receipts for the said sums, you and each of you well knowing that the said Company and its affairs had not been, and were not in a sound and prosperous condition, and that the said Company did not possess assets to the said large values and amounts, and that the said purchases, investments, and advances were not secure, profitable, and valuable, and that large profits were not from time to time derived from the business carried on by the said Company, nor such as from time to time to enable the said large dividends to be declared and paid therefrom to the said shareholders, and the said high rates of interest to be paid to the said depositors, and that the said large numbers of shares in the said Company had not been applied for or taken up, and that the said Company was not possessed of subscribed and paid-up capital to the said large amounts, and that the said large sums of money had not been deposited with the said Company, and that the said deposit receipts were not good and valid and available deposit receipts for the said sums, with intent to deceive and defraud the said shareholders, creditors, and depositors, and the said divers other persons and the public, the subjects of Her Majesty the Queen, and to induce them to purchase and hold shares in the said Company, and to become customers, depositors, and creditors of the said Company, and to make advances of money to you and each of you, and to the said Company, and to continue to do business with the said Company.

These are, therefore, to command you and each of you in Her Majesty's name to be and appear before me on the 13th day of July, 1893, at 10 o'clock in the forenoon, at the Water Police Court, Sydney, or before such of Her Justice or Justices of the Peace for the same Colony, as may then be there, to answer to the said charge and to be further dealt with according to law. Herein fail not.

Given under my hand and seal, this 5th day of July, in the year of our Lord, 1893, at Sydney, in the Colony aforesaid,—

C. N. PAYTEN, J.P.

*Summons to a person charged with an Indictable Offence.*

To William Percy Smairl, of Goulburn, in the Colony of New South Wales, William Graham Cameron, of Glen Innes, in the said Colony, and James Green, Evelyn Manning, William Martin, Henry B. Brewer, and William R. Row, of Sydney, in the Metropolitan Police District, in the said Colony.

WHEREAS you and each of you have been charged before the undersigned, one of Her Majesty's Justices of the Peace in and for the said Colony, for that before and at the time of the committing of the offence hereinafter mentioned, you, the said William Graham Cameron, James Green, Evelyn Manning, and William Martin, were directors of a certain public company, called the Imperial Land, Building, and Deposit Company (Limited); and you, the said Henry B. Brewer and William R. Row, were employed in auditing and investigating the affairs of the said Company, and you, the said William Percy Smairl, were an officer of the said Company, and you and each of you being so connected with the said Company

as aforesaid on divers days and times before the filing of the information herein at Sydney, in the said Colony, between the 9th day of March, in the year of our Lord 1886, and the 14th day of September, in the year of our Lord 1891, did, amongst yourselves, and with divers other persons, conspire falsely and fraudulently to publish and represent to the shareholders, creditors, and depositors of the said Company, and to divers other persons, and to the public, the subjects of Her Majesty the Queen, that the said Company and its affairs had been and were in a sound and prosperous condition, and that the said Company possessed assets to certain large values and amounts, and that the purchases, investments, and advances which had been made with the same were secure, profitable, and valuable, and that large profits were from time to time derived from the business carried on by the said Company, and such as from time to time to enable certain large dividends to be declared and paid therefrom to the said shareholders, and certain high rates of interest to be paid therefrom to the said depositors, and that certain large number of shares in the said Company had been applied for and taken up, and that the said Company was possessed of a subscribed and paid-up capital to certain large amounts, and that certain large sums of money had been deposited with the said Company, and that certain deposit receipts were good and valid, and available deposit receipts for the said sums, you and each of you well knowing that the said Company and its affairs had not been, and were not in a sound and prosperous condition, and that the said Company did not possess assets to the said large values and amounts, and that the said purchases, investments, and advances were not secure, profitable, and valuable, and that large profits were not from time to time derived from the business carried on by the said Company, nor such as from time to time to enable the said large dividends to be declared and paid therefrom to the said shareholders, and the said high rates of interest to be paid to the said depositors, and that the said large numbers of shares in the said Company had not been applied for or taken up, and that the said Company was not possessed of subscribed and paid-up capital to the said large amounts, and that the said large sums of money had not been deposited with the said Company, and that the said deposit receipts were not good and valid and available deposit receipts for the said sums with intent to deceive and defraud the said shareholders, creditors, and depositors, and the said divers other persons, and the public, the subjects of Her Majesty the Queen, and to induce them to purchase and hold shares in the said Company, and to become customers, depositors, and creditors of the said Company, and to make advances of money to you, and each of you, and to the said Company, and to continue to do business with the said Company.

These are, therefore, to command you, and each of you, in Her Majesty's name, to be, and appear before me on the 13th day of July, 1893, at 10 o'clock in the forenoon, at the Water Police Court, Sydney, or before such of Her Justice or Justices of the Peace for the same Colony, as may then be there to answer to the said charge, and to be further dealt with according to law. Herein fail not.

Given under my hand and seal this 5th day of July, in the year of our Lord 1893, at Sydney in the Colony aforesaid,—

*Recognizance of Bail instead of Remand on an Adjournment of Examination.*

New South Wales, }  
 Sydney, to wit. }

BE it remembered, that on the 7th day of August, in the year our Lord 1893, William Byrnes, of The Boulevard, Petersham, in the Colony of New South Wales, secretary, and Dudley Ward, of 108, Norton-street, Leichhardt, in the said Colony, personally came before me, the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, and severally acknowledged themselves to owe to our Lady the Queen the several sums following, that is to say: the said William Byrnes the sum of £200, and the said Dudley Ward the sum of £200 each, of good and lawful money of Great Britain, to be made and levied of their several goods and chattels, lands and tenements respectively, to the use of our said Lady the Queen, her heirs and successors, if he, the said William Byrnes, shall fail in the condition indorsed.

Taken and acknowledged, the day and year first above mentioned, } W. BYRNES.  
 at Sydney, in the said Colony, before me,— } DUDLEY WARD.

F. S. ISAACS, J.P.

*Condition.*

THE condition of the within-written recognizance is such, that whereas the within-bounden William Byrnes was, on the 7th day of August, charged before George H. Smithers, Esquire, one of Her Majesty's Justices of the Peace for the said Colony, with conspiracy; and whereas the examination of the witnesses for the prosecution in this behalf is adjourned until the 7th day of August; if, therefore, the said William Byrnes shall appear before me on the said 7th day of August instant, at 10 o'clock in the forenoon, at the Central Police Office, Sydney, in the said Colony, or before such other Justice or Justices of the Peace for the said Colony as may then be there, to answer further to the said charge, and to be further dealt with according to law, and there attend until the said charge shall be disposed of, then the said recognizance to be void, or else to stand in full force and virtue.

F. S. ISAACS, J.P.

## (Q. 2.)

*Recognizance of Bail instead of Remand on an Adjournment of Examination.*

New South Wales, }  
 Sydney, to wit. }

BE it remembered, that on the 7th day of August, in the year of our Lord 1893, James Green, of 32, Landsdown-street, Surry Hills, in the Colony of New South Wales, clerk, and Kelso King, of Mercantile Chambers, Pitt-street, Sydney, in the said Colony, personally came before me, the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, and severally acknowledged themselves to owe to our Lady the Queen the several sums following, that is to say: the said James Green the sum of £200, and the said Kelso King the sum of £200 each, of good and lawful money of Great Britain, to be made and levied of their several goods and chattels, lands and tenements respectively, to the use of our said Lady the Queen, her heirs and successors, if he, the said James Green, shall fail in the condition indorsed.

## (N. 11 &amp; 12 Vic., Cap. 42.)

New South Wales, }  
to wit. }*Statement of the Accused.*

WILLIAM BYRNES stands charged before the undersigned, one of Her Majesty's Justices of the Peace in and for the Colony aforesaid, this 23rd day of August, in the year of our Lord 1893, for that he the said William Byrnes, on divers days between the 9th of March and the 14th of September, 1891, at Sydney, in the said Colony, being a director of the Imperial Land, Building, and Deposit Company (Limited) did with others conspire falsely and fraudulently to represent the affairs of the said Company and the examinations of all the witnesses on the part of the prosecution having been completed, and the depositions taken against the accused having been caused to be read to him by me, the said Justice, (by or) before whom such examination has been so completed; and I, the said Justice, having also stated to the accused and given him clearly to understand that he has nothing to hope from any promise of favour, and nothing to fear from any threat which may have been holden out to him to induce him to make any admission or confession of his guilt, but that whatever he shall say may be given in evidence against him upon his trial, notwithstanding such promise or threat; and the said charge being read to the said William Byrnes, and the witnesses for the prosecution, Ernest Hurley, Edward Harrison, Jonathan Wiley, George Guile, William Stronge, Spence H. Puckle, William Thomas Ball, William John M'George, Robert C. S. Wilkinson, William H. Chapman, Frederick Moorehouse, Ambrose Jones, James Gregg, George E. Hilliard, Edmund Simmons Mayhew, being severally examined in his presence, the said William Byrnes is now addressed by me as follows:—"Having heard the evidence, do you wish to say anything in answer to the charge? You are not obliged to say anything unless you desire to do so; but whatever you say will be taken down in writing, and may be given in evidence against you upon your trial;" whereupon the said William Byrnes saith as follows:—"I've nothing to say."

Taken before me, at Sydney, in the said Colony, the day and year first above mentioned,—

GEORGE H. SMITHERS, D.S.M.

## (O. 1, 11 &amp; 12 Vic., Cap 42.)

New South Wales, }

\* Mother died 3rd September.

J. C. WOORE,  
City Coroner.

1894.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

**ADMINISTRATION OF JUSTICE.**

(SPIRITS, WINE, AND BEER—CONVICTIONS UNDER THE DRUNKARDS AND LICENSING ACTS.)

*Ordered by the Legislative Assembly to be printed, 22 May, 1894.*

RETURN (*in part*) to an *Order* of the Legislative Assembly of New South Wales, dated 17th March, 1892, That, in place of the Returns ordered by this House on the 15th February, 1884, and the 12th June, 1888, there be annually laid upon the Table of this House, Returns giving the following particulars for each Police Court of the Colony, classed in Electorates:—

- “ (a) The number of convictions for drunkenness only.
  - “ (b) Other convictions in which drunkenness formed part of the charge (drunkenness with disorderly conduct).
  - “ (c) Women convicted of foregoing offences.
  - “ (d) Foregoing offences committed between 8 a.m. on Saturday and 8 a.m. on Sunday.
  - “ (e) Foregoing offences committed between 8 a.m. on Sunday and 8 a.m. on Monday.
  - “ (f) Convictions for selling on Sunday.
  - “ (g) Convictions for selling during prohibited hours other than on Sundays.
  - “ (h) Convictions for selling liquor without a license.
  - “ (i) Convictions for selling adulterated liquor.
  - “ (j) Publicans’, Colonial Wine, Brewers’, Spirit and Distillers’ licenses, respectively in each Electorate.
- “ The total numbers to be also shown in each case for the whole Colony, such Returns in future to be laid upon the Table of this House and printed, as soon after the close of the year as possible.”

(*Mr. Garrard.*)

1894.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

ADMINISTRATION OF JUSTICE.  
(RETURN.)

*Ordered by the Legislative Assembly to be printed, 28 March, 1894.*

[Laid upon the Table of this House in answer to Question No. 7, of 14 March, 1894.]

Question.

(7.) LICENSING INSPECTORS:—MR. SCOTT asked the MINISTER OF JUSTICE,—Will he furnish a return of the ranks and names of all the licensing inspectors and licensing sub-inspectors throughout the Colony, showing where stationed, and setting opposite each the amount which it is proposed he shall receive from the sum of £575, recently voted to remunerate such inspectors and sub-inspectors?

Answer.

METROPOLITAN DISTRICT.

RETURN showing rank, name, station, and amount to be paid to Licensing Inspector and Sub-Inspectors in the above district for 1894.

| Rank and Name.                          | Station.        | Amount.             |

1894.

## LEGISLATIVE ASSEMBLY.

## NEW SOUTH WALES.

## LOCAL OPTION.

(RESULT OF VOTE TAKEN IN METROPOLITAN SUBURBAN MUNICIPALITIES IN FEBRUARY, 1894.)

*Ordered by the Legislative Assembly to be printed, 30 May, 1894.*

## The Inspector-General of Police to The Principal Under Secretary.

Sir, Police Department, Inspector-General's Office, Sydney, 21 May, 1894.

I have the honor to forward herewith, for transmission for the information of the Minister of Justice, a report and return furnished by the District Inspector under the Licensing Act, Metropolitan District, showing the result of the Local Option Vote taken in the Suburban Municipalities during the aldermanic elections in February last.

I have, &amp;c.,

EDMUND FOSBERY,

Inspector-General of Police.

Forward to the Department of Justice.—C.W., B.C., 22/5/94. The Under Secretary of Justice.

A copy of this report, with the return, might (as usual) be laid upon the Table of the Legislative Assembly. The Local Option Vote will be taken at Annandale next year, at the first annual election of aldermen for that Municipality, in accordance with the provisions of sub-sec. 10 of sec. 34 of the Principal Licensing Act.—A.C.F., 29/5/94.

Approved.—T.M.S., 29/5/94.

[Enclosure.]

Sir, Central Police Office, Sydney, 17 May, 1894.

I do myself the honor to forward herewith a comparative return showing the result of the Local Option Vote taken in the Suburban Municipalities within the Metropolitan District during the aldermanic elections in February last.

When the vote was taken in February, 1891, there were on the Municipal lists 56,766 voters. This year there were 62,009, showing an increase during the last three years of 5,243.

Only 13,075 voted under Division A, and 12,603 under Division B, which result shows about 21 per cent., being the same proportion as when the last vote was taken.

There are 28 Municipalities which are divided into 97 wards, and 6 Municipalities undivided. In the Municipality of Annandale no vote was taken. Out of 103 elections the Local Option Vote was carried in 8 in the affirmative and 95 in the negative in Division A, and in Division B it was carried in 18 in the affirmative and 85 in the negative.

There are at present 444 hotels in the City of Sydney, 13 in places not yet incorporated, 346 in the suburbs, and 4 in Annandale (where the Local Option Vote was not taken), showing a decrease of 1 in the suburbs since the vote of 1891.

The following is the result of the licensing business in the suburbs since the last Local Option Vote was taken in 1891 :—

|   |     |     |     |     |     |     |     |     |     |
|---|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| New Hotels opened                               | ... | ... | ... | ... | ... | ... | ... | ... | 8   |
| Old Hotels closed                               | ... | ... | ... | ... | ... | ... | ... | ... | 9   |
| In the suburban Municipalities there were in :— |     |     |     |     |     |     |     |     |     |
| April, 1885                                     | ... | ... | ... | ... | ... | ... | ... | ... | 298 |
| „ 1888  | ... | ... | ... | ... | ... | ... | ... | ... | 330 |
| „ 1891  | ... | ... | ... | ... | ... | ... | ... | ... | 351 |
| „ 1894  | ... | ... | ... | ... | ... | ... | ... | ... | 350 |

Not only was no vote taken in the borough of Annandale, but the result shows that there was the same apathy evinced by those entitled to vote as had been exhibited on all previous occasions.

As

As a factor in the repression of drunkenness I do not think the Local Option Vote has had any appreciable effect. It has certainly prevented the licensing of new hotels, except where buildings have been erected containing over thirty rooms in order to overcome the operation of the vote. Such houses when licensed have proved, in the majority of cases, perfect failures as residential hotels, the sale of liquor being the only trade sought for or carried on.

I have, &c.,

W. E. LENTHALL, Inspector,

Mr. Superintendent Read, Sydney.

District Inspector, Metropolitan District.

[Sub-Enclosure.]

COMPARATIVE Return of Result of Local Option Vote in the Metropolitan Suburban Municipalities, taken in February, 1894.

Table with columns: Municipalities, No. of Voters on Municipal Lists, Division A—New Licenses (Yes, No, Total), Division B—Removals (Yes, No, Total), Results—A. New Licenses (Affirmative, Negative), Results—B. Removals (Affirmative, Negative), Gazette Notification (No, Date), No. of Hotels, Whether Election contested. Rows include municipalities like ALEXANDRIA, ASHFIELD, BALMAIN, BOTANY, BURWOOD, CAMPERDOWN, CONCORD, CANTERBURY, DARLINGTON, DRUMMOYNE, ENFIELD, ERSKINEVILLE, FIVE DOCK, GLEBE, HURSTVILLE, KOGARAH, LEICHHARDT, and MANLY, with sub-rows for various wards.

LIQUOR TRAFFIC.

(PETITION FROM JOHN M. WATT, CHAIRMAN OF A PUBLIC MEETING OF THE RESIDENTS OF TAMWORTH, PRAYING FOR THE TAKING OF A PLEBISCITE VOTE ON THE DISTINCT ISSUE OF PROHIBITION.)

---

*Received by the Legislative Assembly, 27 February, 1894.*

---

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

Your Petitioners, residents of Tamworth, in public meeting assembled, humbly pray that in view of the manifold evils arising from the traffic in intoxicating liquors, and the widespread demand for reform, your Honorable House will at the earliest possible moment pass into law a Bill providing for the taking of a plebiscite vote of the men and women of the country on the distinct issue of prohibition.

And your Petitioners, as in duty bound, will ever pray.

J. M. WATT,  
Chairman.

---

A similar petition was received on 27th February, 1894, from E. A. Cross (Chief Templar) on behalf of a meeting of the members of the "Harvest Home" Lodge and residents of Tamworth in meeting assembled.

**LIQUOR TRAFFIC LOCAL OPTION BILL.**

(PETITION FROM W. G. MACONOCHIE, CHAIRMAN OF A PUBLIC MEETING OF THE RESIDENTS OF ORANGE, IN FAVOUR OF.)

*Received by the Legislative Assembly, 18 January, 1894.*

To the Honorable the Speaker and the Honorable Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned,—

RESPECTFULLY SHOWETH:—

That at a Public Meeting of the residents of Orange the following resolutions were passed:—

1. That this Meeting of the Citizens of Orange, while viewing with much satisfaction the introduction of the Liquor Traffic Local Option Bill, most emphatically protests against adding any compensation clause thereto.
2. That in view of the manifold evils to the community arising from the liquor traffic, and the urgent necessity for reform, this meeting would respectfully urge the Parliament to pass the Liquor Traffic Local Option Bill without delay.
3. That the resolutions passed be embodied in a Petition, to be signed by the Chairman on behalf of this meeting, for presentation to Parliament.

We therefore pray your Honorable House to take immediate steps to pass the said Bill into law, and thus enable the people to stamp out the blighting liquor traffic wherever they so desire.

And your Petitioners, as in duty bound, will ever pray.

W. G. MACONOCHIE,  
Chairman.

## REPORT OF THE MINISTER OF PUBLIC INSTRUCTION.

To His Excellency the Right Honorable SIR ROBERT WILLIAM DUFF,  
a Member of Her Majesty's Most Honorable Privy Council, a  
Knight Grand Cross of the Most Distinguished Order of Saint  
Michael and Saint George, Governor and Commander-in-Chief of  
the Colony of New South Wales and its Dependencies.

May it please your Excellency,—

I have the honor to submit to your Excellency the Report of the Department of Public Instruction for the year 1893. The Report deals fully with the educational work carried on under the provisions of the Public Instruction Act of 1880, and embraces summaries of similar work done in State-aided Institutions of an educational character.

The number of schools on the list in the year was 2,520, embracing 2,744 separate departments, with accommodation for 229,004 pupils. The gross enrolment of pupils was 238,951, the mean quarterly enrolment, 186,327, and the average attendance, 128,322. The staff of teachers, all grades included, numbered 4,527. By additions to 34 existing buildings and the erection of 98 new buildings, accommodation was provided for 10,262 more children than in 1892.

2,497 schools, comprising 2,720 departments, were inspected during the year. In Primary Schools, 140,713 pupils were examined—84,465 in the course of instruction for Classes I and II, and 56,248 in higher-class courses. 620 High School pupils were also examined. In the different classes of the Primary Schools, 82 per cent. passed in reading, 83 per cent. in writing, 72 per cent. in arithmetic and grammar, 75 per cent. in dictation and Australian history, and 76 per cent. in drawing and geography. In Superior and High Schools subjects, from 67 to 100 per cent. satisfied the standard, while in all the schools inspected the discipline was reported as satisfactory. During the year, 97 candidates were successful in obtaining Scholarships and Bursaries for secondary or higher education. The number of School Savings Banks increased by 10, and the Cadet Force, omitting the senior cadets, showed an enrolment of 4,179.

The total expenditure of the year under the Public Instruction Act was £715,219 9s. 7d., and towards this sum school fees amounting to £73,267 11s. 3d. were collected and paid into the Treasury. The

cost of maintaining the Technical Branch was £28,525 11s. 6d., including £6,605 2s. 9d. spent on the Technological Museum. The sum of £3,424 16s. 6d. was paid as fees by students. Details respecting the whole work carried on are shown under the headings which follow :—

### I.—SCHOOLS.

In 1893 there were 2,520 schools, containing 2,744 departments, as compared with 2,502 schools and 2,724 departments open in 1892. During the year, 78 schools were established, comprising 12 Public, 43 Provisional, 16 Half-time, 6 House-to-house Schools, and 1 Evening School. In addition to these, 10 schools were re-opened, 27 Provisional and 2 Half-time Schools were raised to the rank of Public Schools, and 15 Half-time and 4 House-to-house Schools to the rank of Provisional Schools; while 34 Public and 32 Provisional Schools were reduced to Half-time or House-to-house Schools. Seventy of the schools in operation during the whole or some portion of 1892 do not appear on the list of schools open in 1893, and of those actually in operation in that year 83 were closed before the last quarter. The number of schools open at the close of 1893 was 2,437, containing 2,660 departments.

The following table shows the classification of the schools open in 1893 :—

|   |       |     |     |     |     |          |              |

| "   | III.  | ... | ... | ... | ... |          |              |
| 4. <i>House-to-house Schools</i> :—               |       |     |     |     |     |          |              |
| Unclassed   | ...   | ... | ... | ... | ... | 90       | 90           |
| 5. <i>Evening Public Schools</i> :—               |       |     |     |     |     |          |              |
| Unclassed   | ...   | ... | ... | ... | ... | 9        | 9            |
| Total   | ...   | ... | ... | ... | ... | 2,520    | 2,744        |

One hundred and eighty-two applications for the establishment of new schools were received, namely, 31 for Public Schools, 110 for Provisional Schools, 18 for Half-time Schools, 15 for House-to-house Schools, and 8 for Evening Schools. Of these, 70 were granted, 97 were declined, and 15 remained under consideration at the close of the year. The total number of children to be accommodated in the new schools granted is 1,676. The

The number of applications received, and the action taken with regard to them, are shown in the following table:—

*Applications for the establishment of Schools.*

| Schools.                     | Number received. | Number granted. | Number declined. | Number still under consideration. |
|------------------------------|------------------|-----------------|------------------|-----------------------------------|
| Public Schools ... ..        | 31               | 12              | 17               | 2                                 |
| Provisional Schools ... ..   | 110              | 42              | 60               | 8                                 |
| Half-time Schools ... ..     | 18               | 10              | 4                | 4                                 |
| House-to-house Schools... .. | 15               | 4               | 10               | 1                                 |
| Evening Public Schools... .. | 8                | 2               | 6                | ...                               |
| Total ... ..                 | 182              | 70              | 97               | 15                                |

Full details respecting these applications will be found in Appendices I, II, III, IV, V.

The number of schools in operation in 1881, the first full year during which the Department was under Ministerial control, as compared with the number open in 1893, is given in the following table:—

| Schools.                      | Number of Schools or Departments in operation. |         | Increase, 1881-1893. |
|-------------------------------|--|---------|----------------------|
|                               | 1881.  | 1893.   |                      |
| High Schools ... ..           | .....  | 5       | 5                    |
| Superior Schools ... ..       | 58   | 241     | 183                  |
| Primary Public Schools ... .. | 1,042  | 1,683   | 641                  |
| Provisional Schools ... ..    | 246  | 347     | 101                  |
| Half-time Schools ... ..      | 93   | 369     | 276                  |
| House-to-house Schools ... .. | .....  | 90      | 90                   |
| Evening Schools ... ..        | 57   | 9       | 48*                  |
| Total ... ..                  | 1,496  | 2,744   | 1,248                |
|                               | 98,721   | 229,044 | 130,283              |

\* Decrease.

From the foregoing table it will be seen that, Evening Schools excepted, all kinds of schools increased considerably in numbers during the period under notice. Primary Public Schools increased by 641 in the twelve years, Superior Schools by 183, Provisional and Half-time Schools by 101 and 276 respectively, while of House-to-house Schools, first started in 1883, there are now 90. During the twelve years referred to the Evening Schools have decreased from 57 to 9.

In addition to the schools established and maintained under the Public Instruction Act, the following State supported or aided schools are still in operation, namely, the Sydney Grammar School, the two Industrial Schools, and the School for the Deaf and Dumb and the Blind.

*School Premises and Sites.*—The number of school sites acquired during the year was 148. Of these, 89 were Government grants; 43 were resumed under the Public Works Act, 51 Vic. No. 37; 12 were purchased; and 4 were gifts from private individuals. The cost of the purchased sites amounted to £3,070 5s. 6d., and the sum of £75 17s. 3d. was paid on account of those resumed. The balance

balance to be paid for the latter, when the claims have been settled, is £584 0s. 3d. Full particulars as to the sites will be found in Appendix XXI.

*Buildings.*—At the close of 1893, existing school premises afforded room for 229,004 pupils, about 95 per cent. of this accommodation being in vested premises. Of the school-places counted in 1892, about 5,040 were lost in 1893 by the closing of schools and by the giving up of old buildings. The net increase for 1893 was 6,927. Taking the building-work done in the last two years, it may be observed that, in 1893, 58 new schools and residences were erected under the Architect's supervision, as compared with 51 built in 1892; while the additions numbered 21, as compared with 28; the premises repaired, 335, as compared with 418; and the places provided, 7,852, as compared with 7,511 for the same period. It may also be noticed that the number of small school-buildings and residences erected under the Inspectors' supervision was 58, as compared with 98 put up in 1892, and that the number of places provided in 1893 was 1,939, as compared with 3,030 in the previous year.

At the close of 1893, the following additional works were in progress:—5 new buildings, 3 additions, and 7 buildings for small country schools, the whole to provide for about 1,400 children. One new weather-shed was in course of construction, as well as a teacher's residence. Repairs and improvements were being carried out in 72 existing buildings.

Full particulars respecting the building-work completed in the year, and that in progress at its close, are given in the following tables:—

*Works completed.*

The amount expended on Public School sites, buildings, furniture, repairs, and rents in 1893 was £110,119 6s. 10d. The total expenditure on these items since 1880 is £2,387,125 8s. 1d.

*School Attendance.*—Returns for Public Schools for the year show a gross aggregate enrolment of 238,951 pupils, as compared with 239,364 under instruction in 1892. Deducting the usual 12 per cent. for multiple enrolments, it will be seen that the number of individual pupils was 210,277. This number equals 92·2 per cent. of the total population of the Colony between the ages of 6 and 14, and 71·1 per cent. of the number between the ages of 4 and 14. The returns show no increase in numbers as regards either the enrolment or the average attendance. This is wholly attributable to the severity of the epidemics of measles and diphtheria which visited all parts of the Colony during the latter half of 1893. So widespread was the dread caused even when disease was not actually present, that for weeks together, very many schools were almost empty—the attendance falling from hundreds to tens—while others were absolutely without pupils. The effect upon the schools of this visitation will be seen on reference to page 6, where the enrolment and average attendance are stated for each quarter of the years 1892 and 1893. At the end of June quarter, the enrolment and average attendance in 1893, as compared with 1892, gave an increase of 2,301 and 2,883 respectively; but the end of the second half-year shows a falling off in 1893 of 5,694 in the enrolment and of 9,657 in the average attendance. Comparing the December quarter of 1893 with the June quarter of the same year, the decrease in numbers is still more remarkable, the pupils enrolled being fewer in December quarter by 10,000, and those in average attendance by 12,898.

The gross and corrected enrolments for the last five years, taking 12 per cent. as representing the multiple enrolments in each year, are given in the following table :—

| Years.      | Gross Aggregate Enrolment. | Corrected Aggregate Enrolment of Distinct Pupils. | Increase.        |                      |
|-------------|----------------------------|---|------------------|----------------------|
|             |                            |   | Gross Enrolment. | Corrected Enrolment. |
| 1889 ... .. | 217,289                    | 191,215   | 5,139            | 4,523                |
| 1890 ... .. | 221,864                    | 195,241   | 4,575            | 4,026                |

| The School for the Deaf and Dumb and the Blind ... .. | 79    |
| Total ... ..  | 1,136 |

Estimating

Estimating the mean population of the Colony for 1893 at 1,210,510, the population between 6 and 14 years of age was 227,851. Of this number, 177,583, or 77·9 per cent., attended State Schools, and 50,268, or 22·1 per cent., received instruction in Private Schools or at home, or else remained altogether untaught. From the latest returns of Private Schools' attendance it appears that the total enrolment was 46,860. As of this enrolment 33,750 pupils were between the ages of 6 and 14, it will be seen that of the total statutory school population of 227,851, about 211,333, or 92·7 per cent., were enrolled at State and Private Schools, while 16,518, or 7·3 per cent., were taught at home, had left school after satisfying the standards of the Act, or remained untaught. In addition to pupils of the statutory school age, 25,119 under 6 years of age, and 21,828 over 14 years, were also enrolled for school attendance—33,837 at State Schools, and 13,110 at Private Schools. Thus, of 319,976 children in the Colony between the ages of 4 and 15 years, 211,420 attended State Schools, and 46,860 attended Private Schools; while the remainder, 61,696, received instruction at home, had completed their education, or were untaught.

The average quarterly enrolment was 186,327, and the average attendance 128,322. From causes which have been already explained, the regularity of attendance, as tested by comparing the average attendance with the enrolment, was considerably lower than in 1892.

In the first half of the year 124,644 pupils, and in the second half 120,533 pupils, attended the ordinary day-schools 70 days or more.

The percentages of the enrolment attending 70 days or more in each half-year, since 1888, are as follow :—

| Year.       | 70 days or more in first half-year. | 70 days or more in second half-year. |
|-------------|-------------------------------------|--------------------------------------|
| 1889 ... .. | 68·8                                | 71·5                                 |
| 1890 ... .. | 58·4                                | 72·3                                 |
| 1891 ... .. | 57·9                                | 68·7                                 |
| 1892 ... .. | 67·7                                | 71·5                                 |
| 1893 ... .. | 66·2                                | 66·1                                 |

The enrolment and average attendance are shown in the following tables :—

| 1892 ... .. | 210,641           | 186,207              | 132,580             | 62·94                           | 71·20                              |
| 1893 ... .. | 210,277           | 186,327              | 128,322             | 61·02                           | 68·86                              |

The main facts relative to school attendance may be summed up thus:—211,333, or 92·7 per cent. of the statutory population, were enrolled for school attendance; 177,583, or 77·9 per cent., at State Schools; and 33,750, or 14·8 per cent., at Private Schools. Of the ordinary school population between 4 and 15 years—258,280, or 80·7 per cent., were at school; 211,420, or 66 per cent., at State Schools; and 46,860, or 14·7 per cent., at Private Schools. 210,277 children attended schools under the Public Instruction Act; 177,056 being of the statutory school age, and 33,221 either above or below it. The mean quarterly enrolment was 186,327, or 88·6 per cent. of the year's enrolment; and the average attendance was 68·8 of the quarterly enrolment. Of the average enrolment, 66·2 per cent. attended school 70 days or more in the first half-year, and 66·1 per cent. in the last half-year. The percentage of the population enrolled quarterly, and the corresponding percentage in average attendance in 1893, were respectively 15·3 and 10·6, as compared with 15·6 and 11·1 in 1892.

*Compulsory Clauses of the Public Instruction Act.*—During the half-year ended 30th June, 1893, 33,937 children failed to attend school for 70 days, as required by the Act. As satisfactory excuses, however, were received from 27,999, the number of defaulters under the law amounted to 5,938. The parents or guardians of 5,104 of these were recommended for cautions, and prosecutions were authorised in 834 cases.

For the half-year ended 31st December, 1893, there were 34,449 children who failed to make the prescribed minimum attendance. Satisfactory explanations were received in regard to 30,443, the parents or guardians of 3,557 were recommended for cautions, while in 449 cases legal measures were taken.

The default for the half-year ended 30th June amounted to 3·1 per cent. of the average enrolment for the year, while for the December half-year the percentage was 2·1.

With a view to the more economical working of this branch, the services of the attendance officers were dispensed with on the 30th June, and arrangements made with the Inspector-General of Police for the transfer to the police of most of the duties hitherto performed by such officers.

As

As set forth in previous reports, the Act requires amendment in certain important particulars, in order that the non-attendance at school of children between 6 and 14 years of age may be dealt with, and their employment in factories, &c., prevented. The directions in which the Act needs alteration have been frequently pointed out, and are as follow :—

- I. Provision to deal effectively with children found idling about the streets during school-hours evading the law.
- II. Authority to ascertain conclusively, by compulsory registration, the number and names of all children in the Colony of statutory age.
- III. Placing the onus of proof of age and of the fulfilment of minimum attendance on the parents or guardians.
- IV. The power to compel teachers of private schools to furnish accurate returns of enrolment and attendance.
- V. The inclusion of a clause making it penal to employ children of school age, unless educated up to standard requirements.

*Collection of School Fees.*—In view of the distress that has existed throughout the Colony during the year, the Department has exercised considerable leniency in dealing with arrears of school fees. A large number of debts has been cancelled, and free education granted in very many cases. Legal action for the recovery of arrears was authorised in 154 cases. The total amount of fees collected during 1893, and paid into Consolidated Revenue, was £73,267 11s. 3d.

## II.—INSPECTION.

No alteration was made during the year in the arrangements for carrying on the work of inspection, but several changes took place in the *personnel* of the inspectoral staff, arising out of the lamented death of Mr. Gerald O'Byrne, District Inspector for the Wagga Wagga district, and the superannuation of Inspectors C. Hookins and J. H. Murray—all officers of ability and long experience whose services the Department could ill spare. The vacancies thus caused were filled by the promotion of Mr. Inspector Lawford to the office of District Inspector, and the appointment as Inspectors of Mr. A. D. McKenzie, late Principal Teacher of Newtown Superior Public School, and Mr. Peter Board, late Head-master of the Superior Public School at Erskineville.

With the exception of 23 schools which were not in existence at the time others in their neighbourhood were visited, all schools were subjected to rigid examination, the inspections occupying from one day to three weeks according to the size of the school. Thus out of 2,738 schools (exclusive of the High Schools), 2,715 underwent inspection, while 402 received a second visit.

The subjoined table will show how the schools were apportioned to the Inspectors and the amount of inspection done in each district :—

| District.             | No. of Inspectors. | No. of Schools. | No. of Schools inspected. | No. of Schools inspected twice. | Total No. of inspections. | No. of Schools not inspected. | No. of Pupils examined. |

The inspected and the uninspected schools stand thus :—

|                  | Public. | Provisional. | Half-time. | House-to-house. | Evening. | Total. |
|------------------|---------|--------------|------------|-----------------|----------|--------|
| Inspected.....   | 1,917   | 339          | 364        | 88              | 7        | 2,715  |
| Uninspected..... | 9       | 6            | 5          | 3               | ...      | 23     |
| Totals.....      | 1,926   | 345          | 369        | 91              | 7        | 2,738  |

*The Course of Secular Instruction and Standards of Proficiency.*—The standards of proficiency were the same as for the previous year, and speaking generally, worked satisfactorily. Their requirements are high, but may be readily satisfied by the painstaking teacher. During the year these standards have been rigidly applied, and, while the results in certain subjects appear somewhat lower than those obtained in 1892, there is good reason for believing that the quality of the instruction and the attainments of the pupils have, on the whole, improved. Having regard to the drawbacks under which teachers laboured in the second half of the year, through the pupils' irregular attendance in consequence of the prevalence of epidemics, the progress made is very gratifying. The table given below shows the proficiency of the pupils in the several subjects of examination :—

*Estimated Proficiency of Pupils in all Schools.*

| Subject.                          | Estimated Proficiency.     |                          |                                     |
|-----------------------------------|----------------------------|--------------------------|-------------------------------------|

*Character of Pupils' Attainments and Progress in Learning.—*

140,713 pupils were present at inspection. All were examined in reading, 99 per cent. in writing, 77 per cent. in dictation, 97 per cent. in arithmetic, 39 per cent. in grammar, 39 per cent. in geography, 39 per cent. in history, 96 in Scripture and moral lessons, 95 per cent. in object lessons, 95 per cent. in drawing, 90 per cent. in music,  $1\frac{1}{2}$  per cent. in French, 6 per cent. in Euclid, 1·8 per cent. in algebra, 5 per cent. in mensuration, 1·8 per cent. in Latin, ·02 per cent. in trigonometry, 78 per cent. (of girls) in needlework, 94 per cent. in drill, and 4·8 per cent. in natural science.

Of the 140,713 pupils examined in reading, 7·8 per cent. were in the alphabet, 22·9 per cent. were in monosyllables, 29·4 per cent. were in easy narrative, and 39·9 per cent. in ordinary prose. Of 139,777 pupils examined in writing, 40 per cent. wrote on slates, and 60 per cent. in copy-books or on paper. Of 137,845 pupils examined in arithmetic, 59·6 per cent. were tested in simple rules, 25 per cent. in compound rules, and 15·4 per cent. in the higher rules. Of 55,442 examined in grammar, 46·6 per cent. were learning the elementary part, and 53·4 per cent. the advanced part of the subject. In geography, of 55,455 examined, 44·6 per cent. were tried in the elementary portions of the subject, and 55·4 per cent. in the advanced part.

A comparison of some of the foregoing percentages, with the results in corresponding subjects during the previous year, is shown in the subjoined table:—

|   |   | 1892.   | 1893.   | Increase<br>per cent. | Decrease<br>per cent. |
|---|---|---------|---------|-----------------------|-----------------------|
| Total number of pupils examined .....         |   | 142,109 | 140,713 | .....                 | 0·9                   |
| Percentages<br>of<br>pupils<br>examined<br>in | Reading, who were tested in ordinary prose .....    | 38·2    | 39·9    | 1·7                   |                       |
|   | Writing, who wrote on paper.....                    | 58·1    | 60·0    | 1·9                   |                       |
|   | Arithmetic, who were tested in the higher rules ... | 16·5    | 15·4    | .....                 | 1·1                   |
|   | Grammar, who were tested in the advanced portions   | 52·4    | 53·4    | 1·0                   |                       |
|   | Geography, who were tested in the advanced portions | 54·0    | 55·4    | 1·4                   |                       |
|   | History .....                                       | 39·0    | 39·0    | .....                 |                       |
|   | Scripture and Moral Lessons .....                   | 97·0    | 96·0    | .....                 | 1·0                   |
|   | Drill .....   | 95·0    | 94·0    | .....                 | 1·0                   |
|   | Drawing .....                                       | 97·0    | 95·0    | .....                 | 2·0                   |
|   | Object Lessons .....                                | 93·0    | 95·0    | 2·0                   |                       |

Viewing the attainments generally, it will be seen from the information here given that, in addition to reading, which is taught to all scholars, more than 95 per cent. of the pupils in our schools are instructed in the following subjects:—Writing, arithmetic, Scripture and moral lessons, object lessons, drawing. Drill is taught to 94 per cent., music to 90 per cent., dictation to 77 per cent.; 39 per cent. learn grammar, 39 geography, and 39 per cent. history; 78 per cent. of the girls learn needlework, while other subjects such as can be taught only to the elder pupils range from 1 to 6 per cent.

With regard to the proficiency of the pupils examined, the results of inspection show that in reading 82 per cent. of the examinees passed, in writing 83 per cent., in dictation 75 per cent., and in arithmetic 72 per cent. The standard was satisfied by 72 per cent. in grammar, 76 in geography, and 73 and 75 per cent. respectively in English and Australian History. In Scripture and moral lessons 76 per cent. passed, 78 in object lessons, 76 in drawing, and 77 per cent. in music. In other subjects the percentages were:—French, 72; Euclid, 77; algebra, 72; mensuration, 63; Latin, 71; trigonometry, 100; needlework, 87; drill, 78; and natural science, 82. Compared with last year, the above percentages show improvement in most of the more important subjects. The proportion of passes was 1 per cent. higher in dictation, reading, English History, music, French, and drill; 2 per cent. higher in writing and drawing; 3 per cent. in needlework; 4 per cent. in natural science. In arithmetic, geography, Scripture, object lessons, and Euclid, the percentage of passes is the same as in 1892.

The following table summarises the progress in efficiency made in the different classes of schools during the past five years:—

| Class of Schools.      | Percentage up to or above the Standard. |       |       |       |       |
|------------------------|---|-------|-------|-------|-------|
|                        | 1889.                                   | 1890. | 1891. | 1892. | 1893. |
| Public ... ..          | 86                                      | 88    | 92    | 95    | 95    |
| Provisional... ..      | 62                                      | 56    | 71    | 77    | 84    |
| Half-time ... ..       | 74                                      | 69    | 81    | 81    | 84    |
| House-to-house ... ..  | 73                                      | 70    | 81    | 76    | 78    |
| Evening Schools ... .. | 90                                      | 100   | 92    | 92    | 100   |
| All Schools... ..      | 82                                      | 81    | 88    | 90    | 92    |

These figures show that the results are much better than in the previous year. While the percentage of schools up to 5 or above the standard has remained the same in the case of Public Schools, there has been an increase in efficiency of 7 per cent. in Provisional, 3 per cent. in Half-time Schools, 2 per cent. in House-to-house, and 8 per cent. in Evening Schools. The total efficiency of all schools was greater by 2 per cent. than in 1892, and very satisfactory progress has been made.

*Vocal Music.*—Of 127,185 pupils present at inspection, 76 per cent. satisfied standard requirements in this subject. The Superintendent of Music examined all Public Schools within the Metropolitan District in vocal music and theory. Notwithstanding the interruption caused by the prevalence of sickness, the results are reported to be very satisfactory; “the teaching has been more thorough, and, as many classes were often much reduced in numbers, the remaining children have been taught to rely more upon themselves.” There has been a steady advance in reading at sight, and more earnest attention has been paid to the teaching of the lower classes. Many Public School pupils and pupil-teachers were successful at the Trinity College (London) musical examinations, and some passed in music at the Sydney University junior examination.

*Discipline.*—All the Inspectors report favourably of the discipline maintained in schools. No feature of school management shows to greater advantage, and it is a rare circumstance to find a school without a carefully-arranged time-table, in which the profitable occupation of the pupils is fully provided for. Where military drill is regularly and thoroughly taught, the highest excellence in discipline is reached. Regularity of attendance excepted, all the points commonly included under the head of discipline appear not only to receive due attention but to be well secured. The pupils attend with fair punctuality, present a neat, cheerful appearance, manifest a quiet, respectful demeanour, and yield a prompt and willing obedience.

*Drill.*—Of 132,591 pupils examined, 78 per cent. were found to be up to or above the standard, being 3 per cent. more than in 1892. Every school in the Metropolitan District was visited, and examined in military drill, calisthenics, gallery exercises, and physical drill.

Instruction was also given twice a week to the Hurlstone College students in school drill, calisthenics, infants' drill, gallery exercises, dumb-bell and wand exercises; also in marching, playground order, and orders for marching in and out of school. The Fort-street students and the Metropolitan male pupil-teachers received the necessary drill instruction as members of the Training College Rifle Battalion, while the female pupil-teachers were afforded weekly instruction in connection with the Fort-street Saturday classes.

*High Schools.*—The schools in operation were the same as in 1892. The total enrolment for the year was 815, and the average daily attendance 568·4, as against 882 and 614·9 respectively for 1892. The attendance at each school is shown below:—

| School.              | Total enrolment. | Average quarterly enrolment. | Average daily attendance. |
|----------------------|------------------|------------------------------|---------------------------|
| Sydney (Boys)...     | 328              | 256                          | 230·8                     |
| " (Girls) ...        | 307              | 229                          | 205·7                     |
| Maitland (Boys) ...  | 78               | 60                           | 55·3                      |
| " (Girls) ...        | 51               | 52                           | 45                        |
| Bathurst (Girls) ... | 51               | 38                           | 31·6                      |
| Totals ...           | 815              | 635                          | 568·4                     |
| Totals for 1892 ...  | 882              | 686                          | 614·9                     |

During the year these schools have maintained their high standard of efficiency. They are reported by the examining Inspectors to be in a very healthy condition as to discipline, the pupils being orderly and diligent in study; 655 pupils, or 83 per cent. of the year's enrolment, were present at the annual examinations, the percentages of passes ranging from 67 to 100 per cent. The following are some of the percentages:—Mensuration, 67; arithmetic, 72; Latin, 73; dictation and physiology, 74; English, trigonometry, and history, 79; Greek and physics, 80; drawing, 82; German, 83; conic sections, 84; needlework, 100. The average for all subjects was 77·2 per cent. The number of passes obtained in connection with the University Junior and Senior Examinations is shown in the appended table:—

| School.              | No. of Passes Junior Examination. | No. of Passes Senior Examination. | No. of Passes Matriculation Examination. |
|----------------------|-----------------------------------|-----------------------------------|--|
| Sydney (Boys) ...    | 31                                | 7                                 | 16                                       |
| " (Girls) ...        | 21                                | 6                                 | 8  |
| Maitland (Boys) ...  | 12                                | 3                                 | 12                                       |
| " (Girls) ...        | 7                                 | 1                                 | ...                                      |
| Bathurst (Girls) ... | 6                                 | ...                               | ...                                      |
| Totals ...           | 77                                | 17                                | 36                                       |

Of those who matriculated, 16 qualified at the Junior and 9 at the Senior Examination. A pupil of the Sydney Girls' High School succeeded in gaining the Fairfax Prize for general proficiency at the Junior Examination, while silver medals were awarded to High School pupils at the Senior Examination for proficiency in history of Europe, geography, and algebra.

From 1st July, the fee charged in the High Schools was raised from £2 2s. to £3 3s. per quarter. It is expected that this step will considerably reduce the cost to the State of the maintenance of these schools.

The total expenditure on High Schools for the year was £8,230 15s. 11d., and the amount received from fees, £4,650 11s. 11d. The actual cost to the State was, therefore, £3,580 4s., or at the rate of £4 7s. 10d. per head of the total enrolment. *State*

*State Scholarships and Bursaries.*—At the examinations held under the Scholarship and Bursary scheme, 97 candidates were successful. Of these, 25 males and 34 females obtained scholarships for High Schools and Superior Schools, 13 males and 15 females bursaries for High and Superior Schools, and 6 males and 4 females University bursaries.

Of the 59 successful competitors for High School Scholarships, 15 boys and 15 girls have since attended the Sydney High Schools, 8 boys and 10 girls the Maitland High Schools, 9 girls have attended the Bathurst High School, 2 boys Superior Schools. Of the 28 successful competitors for State School Bursaries, 6 boys and 6 girls have attended the Sydney High Schools, 5 boys and 4 girls the Maitland High Schools, 2 girls the Bathurst High School, 2 boys and 3 girls Superior Schools.

Ten University Bursaries are available annually. Nine of them were awarded to High School pupils, 5 boys and 4 girls, and 1 was gained by a boy from the Fort-street Model School.

The total number of candidates examined for admission to the High Schools was 798, of these 729, or 91·3 per cent. were successful.

*Superior Public Schools.*—At the end of 1892 there were 92 Superior Schools in operation. During 1893, 3 schools, Broken Hill, Tenterfield, and Waterloo, were added to the list, thus making a total of 95, comprising 241 Departments. The number of pupils attending Superior Schools for the last quarter of the year was 63,950.

In addition to the subjects taught in ordinary Public Schools, the routine in Superior Schools embraces instruction in higher mathematics, natural science, Latin, and French, and, as far as practicable, the teaching in English, geography, and history is made to correspond with that prescribed for the Senior and Junior Examinations. The work done has been of a satisfactory character. The Inspectors' reports show that the schools are fully organized, well disciplined, and efficiently taught, while the large number of pupils who passed the University Examinations affords additional evidence of the industry and skill of the teachers.

The total number of pupils from Superior Schools who were successful at the University Examinations was 265, namely, 7 seniors and 258 juniors, while other Public Schools, not classed as Superior, sent up 3 seniors and 62 juniors. These give a total of 330, which is 31·5 per cent. of the aggregate number of passes. If the High Schools be added, the passes from schools under the Department represent 40·4 of the whole.

The successful seniors came from the undermentioned schools :—  
Cooma (Boys), Emmaville, Forest Lodge (Boys), Grenfell (Boys), Grenfell (Girls), Guntawang, Newcastle (Boys), Wollongong (Boys), and Young (Girls).

*Evening Public Schools.*—Eight applications for the establishment of Evening Schools were received; 2 were granted, and 6 refused. The total number of schools in operation was 9, but 3 collapsed before the end of the year. On 31st December, there were only 6 schools in existence, having an enrolment of 210, with an average attendance of 102.

*House-to-house Schools.*—Of 15 applications received for these schools, 4 were granted, 10 refused, and 1 was still under consideration at the end of the year. There were 90 schools in operation during 1893, rendering very valuable service in thinly-populated localities where the children are too few to justify the establishment of a Full-time School. Of the 88 schools inspected, 78 per cent. were reported to be up to or above the standard.

*Technical Education in connection with Public Schools.*—Elementary technical education is still carried on in connection with Public Schools. These include Kindergarten Schools and classes, drawing, oral lessons on common objects and in elementary science, planting and cultivating school-gardens and play-grounds, manual training in workshops for boys, and needlework and cookery for girls.

*Kindergarten.*—The same fully-organised Kindergartens were in operation in 1893 as in the previous year. They are situated at Fort-street, Riley-street, Australia-street, Alexandria, and Armidale West. In addition to these, Kindergarten classes are carried on in connection with 37 Public Schools, 5, namely those at Clarence Town, Granville, Grafton, Penrith, and Redfern, having been brought into existence during the year. The complete Kindergartens have an attendance of 1,210 children, while the infants' departments and junior divisions of the schools, where special classes have been formed, show an enrolment of over 9,000 pupils.

In addition to their other studies, all the students of the Training Schools, both male and female, are required to make themselves acquainted with the theory and practice of Froebel's system, so that, when desirable, they may avail themselves of his methods in the training of children placed under their care. The Regulations, moreover, prescribe Laurie's Kindergarten Manual as a text-book for the examination of all pupil-teachers.

*Drawing.*—134,333 pupils were examined by the Inspectors in this subject, of whom 102,249, or 76 per cent., satisfied the standard, an improvement of 2 per cent. upon 1892. All the schools in the Metropolitan District were visited, 33,599 pupils being present at examination, namely, 10,356 boys, 9,694 girls, and 13,549 infants. Of these, 22,365 were found to be up to or above the standard, showing 5 per cent. better results than in the previous year. The Superintendent of Drawing reports that the "teaching of freehand and geometrical drawing is improving, but that of object drawing leaves much to be desired." He is not satisfied with the results obtained; but states that, in view of the more searching tests used, the progress is really greater than appears from a mere comparison of averages.

At

At the annual inspection of the High Schools the work done in the presence of the Superintendent by all classes "reached a most satisfactory level."

Details as to the progress of the training students and the pupil-teachers is given in the Superintendent's Report, Appendix XIII.

*Arbor Day and the Planting of School-grounds.*—Arbor Day was inaugurated as a special feature in 1890. Up to the close of 1893, 1,378 applications for trees were received and dealt with. In view of the need for retrenchment, it was found necessary to abolish the Arbor Day subsidies this year. The Department supplied the trees, and paid the freight, but no other monetary assistance was given. Trees obtained from the Botanic Gardens were planted in 245 schools, at a total cost to this Department of £65 5s. 1d.

*Manual Training.*—No addition was made during the year to the number of classes in operation. Seven workshops are in existence: the one at Fort-street serves both the students at the Training School and the pupils of the Model School; those at Sussex-street, Crown-street, Blackfriars, and East Maitland High School are used only by the pupils of the schools to which they are respectively attached; that at West Maitland is attended by pupils of three schools; while that at Goulburn meets the requirements of four schools.

Including the training students, the total number attending these classes is 436.

It is hoped that before long workshops will be started in connection with the Bathurst and Newcastle Public Schools.

*Cookery Instruction.*—Classes were opened at Armidale and Glen Innes, while those at Carr's Creek, Grafton, and South Grafton were temporarily discontinued. With these exceptions, the classes in operation were the same as in 1892. The total enrolment for the year was 1,739, representing 38,004 attendances. Eleven teachers were employed, and the number of schools sending pupils to the classes was 26.

The Directress reports that the results of examinations during the year were very satisfactory, and that from many quarters she has received testimony as to the value of the instruction in cookery imparted in our schools. Details of the work done will be found in her Report (Appendix XV).

*Needlework.*—Of 47,813 female pupils examined, 41,699, or 87 per cent., were found up to or above the standard, showing an improvement of 3 per cent. on the results of 1892. The Directress visited and reported upon 78 schools in and near the Metropolis, including Hurlstone Training School, the Girls High School, and the school at Randwick Asylum. In all, 11,060 pupils were present at examination. Mrs. Dudley reports that the needlework executed "has been varied and useful, and will bear more than favourable comparison with that accomplished in the past three years."

*Public School Savings Banks.*—Ten new banks were opened during the year, making the total number in operation 629. The amount

amount deposited in the year was £9,912 9s. 9d., while the withdrawals reached the sum of £11,143 6s. 11d. £8,418 4s. of this was for current use, and £2,725 2s. 11d. was transferred to the Government Savings Banks for deposit to the credit of children's own accounts therein.

As compared with the figures for 1892, the deposits and transferences show a decrease of £2,529 6s. 6d. and £826 6s. 1d. respectively, and the withdrawals for current use a decrease of £630 3s. 6d. This falling off is wholly due to the continued depression which has affected all classes of the community. Although the total sum deposited was considerably smaller, it is gratifying to know that the interest of parents and pupils in the Savings Banks has not diminished. This is shown by the fact that no reduction has taken place in the number of individual depositors. For the seven years School Banks have now been in operation the aggregate deposits are £77,576 15s. 11d., and the number of Banks has increased from 255 in 1887 to 629 in 1893. Of the total sum deposited, £48,649 4s. 1d., or 62·7 per cent., has been withdrawn by depositors, £22,848 12s. 7d. has been transferred to pupils' own separate accounts in the Government Savings Banks, and the balance, £6,078 19s. 3d., still remains in the School Banks to the credit of depositors.

*Teachers.*—As was the case in 1892, the difficulty this year has been not to find teachers for schools, but to provide suitable schools for the large number of classified teachers trained under the Department, and of pupil-teachers who had completed their course but had failed to secure admission to the Training School. Only in the case of the smallest schools, House-to-House and Third-class Provisional, were teachers employed from outside the service. Thirty-three young persons were so appointed after giving satisfactory evidence of their qualifications for the office. The number of teachers whose connection with the Department ceased during 1893 was 211.

The following table will give full information respecting the number of teachers on the roll for the last quarter of 1893, and the several classes into which they are divided:—

|   | I A.     |     | I B.      |     | II A.      |     | II B.     |     | III A.        |     | III B. |     | III C. |     | Unclassified. |     | Totals. |       | Grand Total. |

| Pupil-teachers .....  | 81       | 217 | 113       | 164 | 118        | 214 | 83        | 138 | 4             | 15  |        |     |        |     |               |     | 399     | 748   | 1,147        |
| Work-mistresses .....   |          |     |           |     |            |     |           |     |               |     |        |     |        |     |               |     | 77      | 77    |              |
| High School Teachers .....  |          |     |           |     |            |     |           |     |               |     |        |     |        |     |               |     | 17      | 14    | 31           |
| Total Teachers of all ranks .....   |          |     |           |     |            |     |           |     |               |     |        |     |        |     |               |     | 2,304   | 2,223 | 4,527        |

Including teachers of all grades, the number was 4,527, or 109 less than in 1892, but exclusive of High School teachers, work-mistresses, and pupil-teachers, the number was 3,272, or 24 more than in 1892. Of these, 57·7 per cent. were males, and 42·3 per cent. females; while 77·3 per cent. were classified teachers and Training School students, and 22·7 per cent. were unclassified teachers. The latter have passed the usual examinations, and been certified, and nearly all are in charge of small country schools. Of the total number of classified teachers, 8·4 per cent. were in Class I, 35·5 per cent. in Class II, and 56·1 per cent. in Class III. In 1892 the percentages in the three classes were the same, and in 1891 they were 7, 38·1, and 54·9.

*Pupil-teachers.*—The number of pupil-teachers employed was 1,147, consisting of 399 males and 748 females. They were classed as follows :—First class, 298; second class, 277; third class, 332; fourth class, 221; probationers, 19.

During the year 436 applicants for appointment to the office of pupil-teacher were examined, and of these 268 were successful. Eighty-two of those awaiting employment were appointed to schools. In July the minimum age fixed for candidate pupil-teachers was raised from 13 to 14 years.

The pupil-teachers form a valuable body of assistants, and under watchful supervision and judicious training do a large amount of useful school-work. Their general conduct, zeal in the performance of duty, and diligence in study are very favourably reported on.

*Fort-street Training School.*—Fifty-four students underwent training during the year, 28 being juniors in their first year, 23 second-year, and 3 third-year students. Thirty-three held full scholarships, 18 half-scholarships, and 3 attended at their own cost. In addition to these, 3 students who had gained the Bachelor of Arts degree in the previous December were permitted to remain at the Training School in order to attend the Honours Examination in March, 1893, at which they all acquitted themselves very creditably. On the Honours list they were placed as follows :—

Mr. G. C. Henderson : University Gold Medal for Logic and Mental Philosophy. Professor Anderson's prize for Logic and Mental Philosophy. John Frazer Scholarship for History. First-class in History, Logic, and Mental Philosophy.

Mr. W. L. Atkins : *Proxime accessit* for University Gold Medal in Logic and Mental Philosophy. First-class in Latin, French, Logic, and Mental Philosophy.

Mr. A. E. Chapman : First-class in History, Third-class in Logic and Mental Philosophy.

Of the 54 students who were in training for the whole year, 3 passed their B.A. examination in December, and 25 presented themselves for Matriculation in March, all being successful.

All

All the students except those in the Third year were examined at the Training School in music, drawing, and Art of Teaching. Those not attending University lectures were also examined in the subjects prescribed in the course of study. The following tables give particulars of the nature of the examinations, the number who attended, and the results :—

| Nature of Examination.                      | Number of Students. |          |
|---|---------------------|----------|
|   | Seniors.            | Juniors. |
| University, 1st year... ..                  | 15                  | 16       |
| „ 2nd year... ..                            | 8                   | .....    |
| „ 3rd year... ..                            | 3                   | .....    |
| Special Training School Examinations ... .. | .....               | 12       |
| Total ... ..                                | 26                  | 28       |

The number who passed was as follows :—

| Nature of Examination.                      | Seniors. | Juniors. |
|---|----------|----------|
| University, 1st year... ..                  | 9        | 14       |
| „ 2nd year... ..                            | 7        | .....    |
| „ 3rd year... ..                            | 3        | .....    |
| Special Training School Examinations ... .. | .....    | 12       |
| Total ... ..                                | 19       | 26       |

As in previous years, a systematic course of lectures on the Science and Practice of Teaching was given to the students. This was supplemented by practical work in the school-rooms, by specimen test and criticism lessons, and by visits to the Kindergarten with a view to the study of Froebel's methods. Instruction in manual training was also given regularly during the session; and in December an examination of the First and Second year students was held by the Technical Education Officers with the following satisfactory results :—

|                             | Nature of Pass. |            |            | Total. |
|-----------------------------|-----------------|------------|------------|--------|
|                             | Honours.        | 1st Grade. | 2nd Grade. |        |
| First year students ... ..  | 2               | 16         | 10         | 28     |
| Second year students ... .. | 4               | 11         | 8          | 23     |
| Totals ... ..               | 6               | 27         | 18         | 51     |

The Training College battalion, consisting of students in training and the male pupil-teachers attending the Saturday classes, has an enrolment of 189, inclusive of officers. During the year the members received regular instruction in drill, and lectures on the rifle and how to use it. Both students and pupil-teachers had the benefit of regular target practice at the Randwick rifle range.

In October last some important alterations were effected in the management of the Training School. Having regard to the close connection between the Training School and the Fort-street Model School, and with a view to the more economical working of the former, it was decided

decided to amalgamate the two institutions under one head. This change was rendered practicable by the fact that nearly all the students enrolled attended the University in the mornings, spending the afternoons in practical work in the Model School or in attending lectures bearing on school management.

In pursuance of this arrangement other positions in the service were found for the Principal, Mr. J. Conway, and the Assistant Training Master, Mr. J. M. Taylor, LL.B.; while Mr. J. W. Turner, Head Master of the Model School, was placed in full control of the Training School, Mr. J. D. St. Clair Maclardy, M.A., retaining his position as Master in Mathematics and Languages. While by this means a substantial reduction has been made in the expense of working the Training School, it is believed that the efficiency of the instruction and of the training imparted to the students will be maintained at the same high standard as heretofore.

*Hurlstone Training School for Female Students.*—The health of the female students during the year was good, and their general conduct and attention to their studies were excellent. The total enrolment for the year was 54, 23 being senior or second-year students and 31 juniors. Twenty-eight held full scholarships, 19 half scholarships, and 7 attended at their own cost.

Eighteen students attended the first-year course of University lectures. Twenty-three presented themselves for Matriculation in March, of whom 16 were successful. Of the 7 who did not pass, 3 failed in Latin only, 1 in Mathematics, and 3 in Latin and Mathematics. Two of these obtained permission to attend evening lectures at the University, and the remaining 5 studied at the Training School with a view to examination at the end of the year for second-class certificates.

It is gratifying to be able to report that Miss Annie A. Kennedy, a student of Hurlstone, succeeded in obtaining honours in connection with the examination for the Bachelor of Arts degree. On the honours list she is placed first-class in Latin, Logic, and Mental Philosophy, French, and English; *proxime accessit* for the University Gold Medal for Logic and Mental Philosophy; and was awarded Professor MacCallum's prize for English Essay.

The practical training of the students consisted of (a) attendance in the Practising School; (b) special criticism lessons to classes drawn from the Practising School, given weekly by students in the presence of their fellows, the method and style of teaching being criticised by the Principal, the Mistress of the Practising School, and the students themselves; (c) weekly half-hour lessons in the theory of music, given by students to children, and criticised by the Superintendent of Music; and (d) gallery lessons and drill orders given by students to fellow students, sometimes to children, and criticised by Captain Mulholland. Instruction is given to the students in the Kindergarten system on Saturday mornings by the Mistress of the Kindergarten at Fort-street.

No alteration took place in the teaching staff during the year.

*Teachers'*

*Teachers' Examinations.*—The total number of examinees of all classes during the year was 2,979. The percentage of passes of teachers was 41·8, and of pupil-teachers, 88·6. The total number of pupil-teachers reported on was 1,055, as against 648 in 1892. Of the First Class pupil-teachers examined in December for admission to the Training Schools, the male examinee who succeeded in obtaining the highest number of marks was Mr. William Russell, of the Grafton Superior Public School, while Miss Sarah Molster, of the Singleton Superior Public School, headed the list of female pupil-teachers. These pupil-teachers will be presented with the Jones Memorial Medals which are awarded annually to the candidates, male and female, who show the greatest proficiency at the examination for admission to the Training Schools. The pupil-teachers, as a whole, have acquitted themselves very creditably.

The following table furnishes the results of the several examinations in detail:—

| Persons examined.  | Results. |         |        |
|--|----------|---------|--------|
|  | Passed.  | Failed. | Total. |
| Teachers and Assistant Teachers ... ..                   | 222      | 309     | 531    |

*Teachers' Mutual Assurance Association.*—Six members of this Association died in 1893, and in each case the claim, amounting to about £80, was promptly met. Since the formation of the Association in

in 1869, the average annual death-rate has been only 1.2 per cent. Taking the years 1883 to 1893 inclusive, the amount paid annually by each member, by way of premium, has averaged £1 4s. 10d., a little over 1½ per cent. on the sum payable at death.

The entrance fee for members joining between the ages of 30 and 40 years has now been reduced to £1 1s. for each year over the age of 30; while applications for membership from persons over 40 years of age are dealt with on their merits. Ordinary members continue to pay a call of 5s. on the death of any of their number, but teachers joining the Association under 25 years of age only pay 3s., and between the ages of 25 and 30, 4s. per call.

*Teachers' Emoluments.*—In accordance with the scheme of financial retrenchment adopted by the Government, the salaries of all teachers in the Service suffered a reduction of 5 per cent. from the 1st July, 1893. The salaries now paid to teachers of all ranks are given in the subjoined table:—

| Kind of Teachers.   | Males. | Females.            |                       |
|---|--------|---------------------|-----------------------|
|   |        | Girls' Departments. | Infants' Departments. |
| Teachers of I A. in charge of 1st class schools or departments .....                    | 380    | £ 285               | £ 194                 |
| " I B. " 2nd " " .....  | 319    | 239                 | 182                   |

| " " III .....   | 46     | 29                  | .....                 |
| " " IV .....  | 40     | 23                  | .....                 |
| (a) Work-mistresses in 1st class schools, with not fewer than 250 girls—£114 per annum. |        |                     |                       |
| (b) " " 150 " " £95 " " "   |        |                     |                       |
| (c) " " 2nd " " £86 " " "   |        |                     |                       |

\* In schools ranking below Class IV the salaries of unmarried teachers and of married teachers not assisted by their wives, as required by regulation, are £12 per annum less than the rates stated above.

† In the case of Infants' Schools, mistresses are required to hold a classification of II A.

*Half-time Schools.*—Half-time Schools are classified in the same manner as Public Schools, and teachers are paid the same rates of salary as Public School teachers of corresponding classification, with forage allowance of £10 a year where necessary.

*House-to-house Schools.*—Teachers are paid at the rate of £4 15s. per annum for each pupil in average attendance up to a maximum salary of £95 per annum, with forage allowance as in Half-time Schools.

*Evening Schools.*—Teachers are paid, in addition to school fees, a salary of £19, £25, £30, or £36, according to the number of pupils in average attendance.

In addition to the salaries quoted, residences, vested or rented, are provided for classified male married teachers in charge of classified Public Schools. Where a residence is rented, it must be as near as practicable to the school premises.

*Local Supervision.*—Four additional sub-districts were formed during 1893, and Public School Boards appointed thereto. In addition to the appointment of these Boards, 61 members were added to the Boards

Boards already in existence. The total number of Boards in operation at the end of the year was 283 on 47 of which ladies held seats. The resignations of 44 members were accepted.

*Scientific and Technical Education.*—The work of this branch was carried on under the control of the Superintendent of Technical Instruction, whose detailed report forms Appendix XX.

The urgent necessity for retrenchment in the public service led to the reduction of the Vote for Technical Education from £49,800 in 1892, to £25,367 in 1893. To limit the expenditure, it was deemed advisable to close the branch schools at twelve centres of population, to discontinue the classes in certain subjects, and in the case of others, to permit the teachers to continue teaching without payment of salaries, their remuneration to consist only of the fees of the students.

The total number of classes in operation during 1893, was 201, but 14 of these were closed at the end of the first term. 187 classes were carried on throughout the whole year, and were thus distributed :—

|                                    | Under salaried Teachers. | Teachers paid fees only. | Total. |
|------------------------------------|--------------------------|--------------------------|--------|
| Sydney Technical College ... ..    | 56                       | 15                       | 71     |
| Suburban classes ... ..            | 9                        | 7                        | 16     |
| Classes in country towns ... ..    | 75                       | 8                        | 83     |
| Classes from Public Schools ... .. | 8                        | 9                        | 17     |
|                                    | 148                      | 39                       | 187    |

The enrolment of students was as follows :—

|                                    |       |
|------------------------------------|-------|
| Sydney Technical College ... ..    | 3,016 |
| Suburban classes ... ..            | 552   |
| Classes in country towns ... ..    | 2,881 |
| Classes from Public Schools ... .. | 647   |
|                                    | 7,096 |

Deducting from the total enrolment all multiple enrolments, the number of individual students attending classes during the year was 5,662, the weekly average being 3,962·4.

The staff employed consisted of 11 lecturers, 5 resident masters in charge of branch schools, 33 salaried teachers, 14 assistant teachers, and 23 teachers in charge of classes remunerated by fees only. In addition to the ordinary class work, popular lectures on various subjects were given at different centres throughout the Colony. The Rev. J. Milne Curran, F.G.S., lectured in Geology and Mineralogy to audiences aggregating 13,360 persons, or an average of over 300 persons at each lecture. Practical demonstration and simple tests for minerals, also, were frequently given by that gentleman to parties of working miners during his tours. In the matter of bee culture, 77 lectures were delivered to audiences numbering in the aggregate more than 9,000 persons, and practical lessons in horticulture were given to the pupils of 78 Public Schools. Notwithstanding that the time of

the

the lecturer in agriculture was almost entirely taken up with class work, that officer found opportunities to give popular lectures in agriculture at Canley Vale, Carlingford, Hornsby, Mangrove Creek, and Thornleigh.

The number of students examined was 2,157 including 320 Public School pupils tested in manual training. Of these 1,575 or 73 per cent. satisfied the Examiners, being an improvement on the results of 1892 of 4·8 per cent.

Works of students of the technical classes are sent annually to South Kensington for classification by the Examiner of the Science and Art Department of Great Britain. Returns of the results in the national competition for 1893, show that 2 bronze medals and 4 book prizes were gained by students of the Sydney Technical College. Twenty-seven students also passed the technological examinations of the City and Guilds of London Institute for the advancement of technical education, 14 obtaining honors, in the case of 7 of the highest class.

The new Technological Museum built at Ultimo was formally opened by His Excellency the Governor on 4th August last. This building is 183 feet long by 50 feet wide, and has a basement storey under one-half its length, three whole storeys and an attic storey. The amount of space provided on each floor is 9,150 square feet, and of wall space 6,000 feet, making in all 27,450 feet of floor space and 18,000 of wall space, exclusive of the basement. The cost of the building was £20,000. During the year the attendance at the several museums was:—

|                                  |     |         |
|----------------------------------|-----|---------|
| Technological Museum, Sydney ... | ... | 100,480 |
| Branch Museum, Bathurst ...      | ... | 28,203  |
| "    "    Goulburn ...           | ... | 14,267  |
| "    "    Newcastle ...          | ... | 9,760   |
| "    "    West Maitland ...      | ... | 8,603   |
|                                  |     | <hr/>   |
| Total ...                        | ... | 161,313 |
|                                  |     | <hr/>   |

The total expenditure on technical education during 1893, including £6,605 2s. 9d. spent on the Technological Museum, amounted to £28,525 11s. 6d. Of this sum £25,100 15s. 0d. was a Parliamentary grant and £3,424 16s. 6d. was paid as fees by students.

*Public School Cadet Force.*—Full information as to the condition of the Public School Cadet Force will be found in the report of the Officer Commanding, which appears as Appendix XIX.

For the last quarter of 1893 the total enrolment of the force was 4,179. This is exclusive of the senior cadet corps, which under arrangements approved of by Major-General Hutton, was taken over by the Military Department, and will, for the future, be affiliated with the partially-paid volunteer regiments.

Several important changes were made in the cadet staff during the year, which, as regards numbers, was reduced by one-half. Major Dettmann was appointed to the chief command with the designation of

of Officer Commanding Cadet Force and Superintendent of Drill, Lieutenant-Colonel Paul being transferred to another position. Major Strong was retired after long and valuable service, and the services of Lieutenant Hilliard and two warrant officers were discontinued.

The amount voted for cadet purposes for 1893 was £5,869, being a reduction of £5,949 upon the sum granted for 1892. The total expenditure was £5,591 3s. 2d.

#### FINANCE.

As already indicated a policy of rigorous retrenchment was adopted in the administration of all branches of the Department. The strictest economy was practised, and the expenditure restricted by every possible means. The subjoined statement will show the retrenchment effected under the more important heads:—

*Officers.*—10 per cent. deducted from all salaries over £200 a year. The services of two clerks of works dispensed with.

*School Attendance Officers.*—All such positions abolished and 18 officers dispensed with from 1st July, representing a saving of £5,100 per annum.

*Teachers.*—All salaries reduced by 5 per cent. from 1st July; salaries payable to Mistresses of Infants' Departments fixed at a lower rate.

*Contingencies.*—General reduction on all items of expenditure for school service.

*Vote for Buildings, Sites, &c.*—Reduced by £50,000.

*Fort-street Training School.*—Transference of Principal and Assistant Training Master to other positions, the Training School being placed under control of the Head Master of the Model School, thus saving over £500 a year.

*Technical Education.*—General reduction on all items; total vote reduced by £24,433.

*Cadet Branch.*—Services of several of the staff dispensed with from 1st July. Withdrawal of votes of £700 allowance to senior cadets and of £1,000 for camp expenses; general vote reduced by more than 50 per cent., from £11,818 to £5,869.

The sum available in 1893 for expenditure under the Public Instruction Act was £726,371 3s. 11d., made up as follows:—

|   | £               | s.       | d.        |
|---|-----------------|----------|-----------|
| Balance from 1892   | 17,053          | 14       | 9         |
| Amount received from Treasury on account of Vote for 1892 | 33,798          | 0        | 0         |
| Amount received from Treasury on account of Vote for 1893 | 652,370         | 0        | 0         |
| Amount received from Loan Vote—Buildings                  | 15,000          | 0        | 0         |
| Amount received from Loan Vote—Land                       | 4,000           | 0        | 0         |
| Amount received from Loan Vote—High Schools               | 4,149           | 9        | 2         |
|   | <u>£726,371</u> | <u>3</u> | <u>11</u> |

The total outlay in the year was £715,219·9s. 7d., namely, £112,855 12s. 5d. on school premises, and £602,363 17s. 2d. on maintenance of schools, administration, &c. The balance at the close of the year was £11,151 14s. 4d.

*General Statement of Expenditure for 1893.*

I. On School Premises :—

|  |     |     |     |         |    |    |
|--|-----|-----|-----|---------|----|----|
| For sites, new buildings, additions, repairs, &c | ... | ... | ... | £       | s. | d. |
|  |     |     |     | 112,855 | 12 | 5  |

II. On Maintenance of Schools, &c. :—

|  |     |     |     |     |          |    |    |
|--|-----|-----|-----|-----|----------|----|----|
| 1. Teachers' salaries and allowances in Primary Schools                            | ... | ... | ... | ... | £        | s. | d. |
|  |     |     |     |     | 515,344  | 0  | 4  |
| Other maintenance expenses in such schools   | ... |     |     |     | 24,951   | 12 | 10 |
| 2. High School salaries and maintenance expenses                                   |     |     |     |     | 7,509    | 0  | 1  |
| State Scholarships and Bursaries   | ... | ... |     |     | 2,105    | 1  | 4  |
| 3. Administration, including Training Schools and enforcement of school attendance | ... | ... |     |     | 52,454   | 2  | 7  |
|  |     |     |     |     | <hr/>    |    |    |
|  |     |     |     |     | 602,363  | 17 | 2  |
|  |     |     |     |     | <hr/>    |    |    |
|  |     |     |     |     | £715,219 | 9  | 7  |
|  |     |     |     |     | <hr/>    |    |    |

The amount of school fees collected and paid into the Consolidated revenue was £73,267 11s. 3d., namely, £68,616 19s. 4d. from Primary Schools, and £4,650 11s. 11d. from High Schools. Deducting this sum from the total expenditure, there will remain £641,951 18s. 4d. as the net school expenditure derived from State funds, showing a decrease for the year of £48,918 14s. 1d. as compared with the like outlay for 1892.

The total expenditures under the following heads in 1881, 1892, and 1893, were :—

|  | 1881<br>Expenditure. | Per-<br>centage<br>of total<br>expen-<br>diture. | 1892.<br>Expenditure. | Per-<br>centage<br>of total<br>expen-<br>diture. | 1893.<br>Expenditure. | Per-<br>centage<br>of total<br>expen-<br>diture. |
|--|----------------------|--|-----------------------|--|-----------------------|--|
|  | £ s. d.              |  | £ s. d.               |  | £ s. d.               |  |
| I. SCHOOL PREMISES AND ARCHITECT'S EXPENSES :—                   |                      |  |                       |  |                       |  |
| For sites, buildings, additions, &c. ....                        | 120,903 11 2         | 25·49  | 157,679 6 9           | 20·52  | 112,855 12            | 15·78  |
| II. MAINTENANCE OF SCHOOLS, not including adminis-<br>tration :— |                      |  |                       |  |                       |  |

\* Included in Chief Inspector's Branch.

The foregoing statement shows that of the total year's expenditure of £715,219 9s. 7d., nearly 15 $\frac{3}{4}$  per cent. was spent on school premises, 75 $\frac{1}{2}$  per cent. on the maintenance of Primary Schools, 7 $\frac{2}{3}$  per cent. on administration and inspection (including the training of teachers and the enforcement of school attendance), and 1 $\frac{2}{3}$  per cent. on High Schools. In 1892 the corresponding percentages were:— Premises, 20 $\frac{1}{2}$  per cent.; maintenance of Primary Schools, 72 per cent.; administration, 7 $\frac{1}{4}$  per cent.; and High Schools, 1 $\frac{1}{4}$  per cent.

The following table exhibits the number of schools, the number of pupils, and the State expenditure for each of the last five years:—

| Year.     | Number of Schools. | Number of Pupils. | The State Expenditure. |  |              |                   |                        |
|-----------|--------------------|-------------------|------------------------|--|--------------|-------------------|------------------------|
|           |                    |                   | On School Premises.    | On Maintenance of Schools, including Administration, &c. | Total.       | Less School Fees. | Net State Expenditure. |

| 4. School Attendance Branch .....  | 5,331 2 5     | Included under | Chief Inspector. |
|  | 42,325 16 9   | 57,130 10 3    | 52,454 2 7       |
| Total expenditure .....  | £ 474,157 5 7 | 768,395 2 3    | 715,219 9 7      |

The total cost per child, and the average cost respectively for "School Premises," the "Maintenance of Schools," and "Administration" including inspection, the training and examining of teachers, and the enforcing of school attendance, are shown in the next tables.

(a) *Average cost per child of the Year's enrolment.*

| Year.       | For School premises. | For the maintenance of Schools. | For administration, including the amount paid for training and examining teachers, &c. | Total.   |
|-------------|----------------------|---------------------------------|--|----------|
|             | £ s. d.              | £ s. d.                         | £ s. d.  | £ s. d.  |
| 1881 ... .. | 0 14 1               | 2 2 8½                          | 0 8 1½   | 3 4 10½  |
| 1892 ... .. | 0 14 11½             | 2 12 6¾                         | 0 5 5  | 3 12 11¼ |
| 1893 ... .. | 0 10 8¾              | 2 12 3½                         | 0 4 11¾  | 3 8 0    |

(b) *Average cost per child of the mean Quarterly enrolment.*

| Year.       | For School premises. | For the maintenance of Schools. | For administration, including the amount paid for training and examining teachers, &c. | Total.  |
|-------------|----------------------|---------------------------------|--|---------|
|             | £ s. d.              | £ s. d.                         | £ s. d.  | £ s. d. |
| 1881 ... .. | 0 16 4½              | 2 9 8¼                          | 0 9 5½   | 3 15 6  |
| 1892 ... .. | 0 16 11              | 2 19 5½                         | 0 6 1½   | 4 2 6   |
| 1893 ... .. | 0 12 1¼              | 2 19 0¼                         | 0 5 7½   | 3 16 9  |

(c) *Average cost per child of the average attendance.*

| Year.       | For School premises. | For the maintenance of Schools. | For administration, including the amount paid for training and examining teachers, &c. | Total.   |
|-------------|----------------------|---------------------------------|--|----------|
|             | £ s. d.              | £ s. d.                         | £ s. d.  | £ s. d.  |
| 1881 ... .. | 1 4 9¾               | 3 15 3                          | 0 14 3¾  | 5 14 4½  |
| 1892 ... .. | 1 3 9¼               | 4 3 6¼                          | 0 8 7¼   | 5 15 10¾ |
| 1893 ... .. | 0 17 7               | 4 5 8½                          | 0 8 2  | 5 11 5½  |

In the last three tables the total year's expenditure is dealt with in calculating the average cost per child; but in the succeeding tables the amount of school fees paid into the Treasury has been deducted, and the average cost per child has been calculated on the reduced amount as being the actual cost to the State.

(a)

(a) *Average cost (to the State) of a child's education.*

| Cost per child, calculated upon the—       | In 1881. | In 1892. | In 1893. |
|--|----------|----------|----------|
|  | £ s. d.  | £ s. d.  | £ s. d.  |
| Year's enrolment of distinct children..... | 2 18 6½  | 3 5 7    | 3 1 0½   |
| Mean quarterly enrolment .....             | 3 8 2    | 3 14 2½  | 3 8 10¾  |
| Average attendance .....                   | 5 3 2½   | 5 4 2½   | 5 0 0½   |

(b) *Average cost (to the State) of a child's education—exclusive of the cost of School premises.*

| Cost per child, calculated upon the—       | In 1881. | In 1892. | In 1893. |
|--|----------|----------|----------|
|  | £ s. d.  | £ s. d.  | £ s. d.  |
| Year's enrolment of distinct children..... | 2 4 5½   | 2 10 7½  | 2 10 3¾  |
| Mean quarterly enrolment .....             | 2 11 9¼  | 2 17 3   | 2 16 9½  |
| Average attendance .....                   | 3 18 4½  | 4 0 5    | 4 2 5¼   |

The subjoined table of statistics summarises the school work done in 1893, and shows also the progress made under the Department since the passing of the Public Instruction Act of 1880:—

*Statistics of 1893, compared with those of 1881, the first complete year of work under the Public Instruction Act of 1880:—*

|   | 1881.   | 1893.     | Increase. |             |
|---|---------|-----------|-----------|-------------|
|   |         |           | Number.   | Percentage. |
| Estimated population—Total.....   | 781,265 | 1,210,510 | 429,245   | 54·9        |
| Population, aged 4 to 6 years.....  | 42,492  | 67,613    | 25,121    | 59·1        |
| "    6 to 14 years (statutory school age) ...                                     | 153,156 | 227,851   | 74,695    | 48·7        |

Information is furnished in the following summaries respecting educational establishments connected with this Department, but not carried on under the provisions of the Public Instruction Act :—

#### THE SYDNEY UNIVERSITY.

The number of students attending lectures in 1893 was 586, being a decrease of 12 on the attendance for the previous year. Of these, 108 were women students.

Of 208 who presented themselves at the ordinary Matriculation Examination, 131 were successful. In addition to these, 10 passed the entrance examination for Medicine and Science, 32 the Articled Clerks' Examinations, 37 the Senior Public, and 99 the Junior Public Examination. Thus the total number of matriculants for the year was 309, which included 25 students from the Training Schools. For the Senior Examinations 176 candidates presented themselves, and 127 passed. For the Junior Examination 1853 candidates presented themselves, and 921 passed. The requirement for a pass in the Junior Examination was raised to four subjects instead of three as in previous years, and it was likewise provided that such subjects must not be all in the same group. The number of Professors and Lecturers on the University Staff during 1893 was as follows:—14 professors and 34 lecturers. Of these, 7 professors and 6 lecturers were paid out of the Challis Fund.

The year's expenditure was £39,769 10s. 2d., of which sum £18,695, or about 47 per cent., was granted by the Government. The year's total income was £38,528 18s. 6d.

#### THE SYDNEY GRAMMAR SCHOOL.

The total enrolment of pupils for 1893 was 475, of whom 163 were under and 312 over the statutory age of 14 years. Compared with 1892 the enrolment has decreased by 20, and the pupils over 14 years by 21, while those under that age have increased by 1. 130 new pupils were admitted, being 38 less than the number for 1892. Of these 77 were under and 53 above the statutory age. The mean quarterly enrolment was 397 and the average attendance 372, showing a decrease from last year of 23 and 29 respectively. In connection with the University Examinations, the following results were obtained by pupils of the Grammar School :—Junior Public Examination, 30 passed; Senior Public Examination, 9 passed; Matriculation, 20 passed. 14 of the juniors and 7 seniors also qualified for matriculation. The income of the School for the year amounted to £8,447 6s., comprised of :—

|               |     |     |     |        |    |   |
|---------------|-----|-----|-----|--------|----|---|
| State grants  | ... | ... | ... | £2,299 | 19 | 6 |
| School fees   | ... | ... | ... | 6,047  | 9  | 6 |
| Other sources | ... | ... | ... | 99     | 17 | 0 |
|               |     |     |     | <hr/>  |    |   |
|               |     |     |     | £8,447 | 6  | 0 |

The

The year's expenditure reached the sum of £9,045 11s. The cost per pupil in average attendance was £24 6s. 4d., of which £24 2s. 3d. represented the cost for tuition, and 4s. 1d. for buildings, &c. The cost per pupil in 1892 was £22 12s. 8d. The expense to the State was £6 3s. 8d. per head of the average attendance as against £6 19s. 8d. for 1892.

The School Examinations held in December showed that the Upper School fully maintained the previous year's standard. Some branch of Natural Science is now taught in every form. Geology and Physics have been introduced, and practical Chemistry has been encouraged. In the Lower School there were few boys who did not make distinct progress during the year.

#### FREE PUBLIC LIBRARY.

The total number of volumes in the Library at the end of 1893 was 101,348, an increase of 4,000 over the number for 1892. The number of new works added was 4,143, being 1,260 less than in 1892. 151,004 persons visited the reading-room as against 136,410 in the previous year, while 65,085 visits were made to the Lending Branch. The total number of visits therefore paid to the institution during the year was 216,089. Twenty-eight persons were employed on the staff. Mr. R. C. Walker, the Principal Librarian, retired from the service on the 31st August, and was succeeded by Mr. H. C. L. Anderson, M.A., formerly the Director of Agriculture. The year's expenditure is shown hereunder:—

|  |        |   |   |
|--|--------|---|---|
| On buildings, repairs, &c. (under Government Architect) ... .. | £109   | 0 | 0 |
| On books ... ..  | 1,375  | 0 | 0 |
| On salaries ... ..   | 4,886  | 0 | 0 |
| On maintenance ... ..  | 1,188  | 0 | 0 |
|  | £7,558 | 0 | 0 |

#### THE AUSTRALIAN MUSEUM.

The number of visitors to the Museum was—On week-days, 81,551; on Sundays, 30,776; total 112,327. As compared with 1892, this shows a decrease of 18,374 visitors, being accounted for by a falling off of 5,487 in the Sunday visits, and 12,887 in the week-day attendances. Thirty-three persons were employed in the institution, of whom twelve were discharged during the year, leaving twenty-one employees at the close of the year. The Trustees report that the year's expenditure was as given below:—

|  |        |    |   |
|--|--------|----|---|
| On salaries and allowances ... ..                        | £4,709 | 16 | 8 |
| On specimens (purchase, collection, and carriage) ... .. | 273    | 19 | 4 |
| On books ... ..  | 421    | 17 | 6 |
| On catalogues ... ..                                     | 401    | 5  | 7 |

| Miscellaneous ... ..                                     | 444    | 14 | 5 |
| Cases in new Hall (special vote) ...                     | 2,443  | 6  | 9 |
|  | £9,036 | 18 | 0 |

NATIONAL

## NATIONAL ART GALLERY.

During the year, 303,130 visits to the Gallery were registered, showing an increase of 53,021 on the attendance for 1892, and of 173,000 on the average annual attendance for the previous ten years. On week-days the visits numbered 185,704, and on Sundays 117,426, as against 148,426 and 101,683 respectively for the previous year. Five persons were permanently employed, with three extra assistants on Sundays and holidays.

The following is a statement of the year's expenditure :—

|   |        |    |   |
|---|--------|----|---|
| For work of art purchased ... ..                                      | £4,097 | 7  | 4 |
| For maintenance (frames, freight,<br>repairs, insurances, &c.) ... .. | 682    | 10 | 0 |
| For salaries ... ..   | 1,215  | 15 | 8 |
|   | <hr/>  |    |   |
|   | £5,995 | 13 | 0 |

## NEW SOUTH WALES INSTITUTION FOR THE DEAF AND DUMB AND THE BLIND.

The number of inmates during the year was 66 as compared with 99 for 1892. Of these 60 were under and 6 were over 14 years of age. The new admissions were 15, all of whom were under 14 years. Thirteen inmates were discharged—6 under 14 years, and 7 over that age. The income was :—

|                             |        |   |   |
|-----------------------------|--------|---|---|
| From State grants . . . . . | £450   | 0 | 0 |
| From other sources ... ..   | 4,135  | 3 | 5 |
|                             | <hr/>  |   |   |
|                             | £4,585 | 3 | 5 |

showing a decrease of £2,217 18s. on the previous year's receipts.

The expenditure for the year was as follows :—

|                               |        |    |    |
|-------------------------------|--------|----|----|
| For maintenance ... ..        | £1,734 | 2  | 5  |
| For salaries and wages ... .. | 2,310  | 7  | 10 |
|                               | <hr/>  |    |    |
|                               | £4,044 | 10 | 3  |

## INDUSTRIAL SCHOOL FOR GIRLS, PARRAMATTA.

The number of girls enrolled during 1893 was 134, of whom 58 were under and 76 above the age of 14 years. There were 46 new admissions—20 under and 26 over 14 years old. Thirty-one inmates were discharged during the year, as follows :—

|   |    |
|---|----|
| For apprenticeship ... ..               | 15 |
| On attaining the age of 18 years ... .. | 16 |

The number remaining in the institution at the end of the year was 103. Compared with 1892 the enrolment showed a decrease of 2, the new admissions of 10, and the discharges of 27. The expenditure for the year was :—

|                        |        |    |   |
|------------------------|--------|----|---|
| For maintenance ... .. | £1,088 | 16 | 5 |
| For salaries... ..     | 1,082  | 16 | 0 |
|                        | <hr/>  |    |   |
|                        | £2,171 | 12 | 5 |

Calculated on the enrolment, the expenditure was equal to £16 4s. 1d. per head, a reduction upon 1892 of £2 8s. 11d.

The health of the inmates and their general conduct throughout the year were very good. Their religious instruction was attended to by the local clergymen of the principal denominations, the Sisters of Charity, and lay readers. Fair progress was made by the girls in the cookery classes and in the school.

In the laundry, 161,602 articles of clothing were washed, mangled, and ironed. Of these 49,855 pieces were washed for the Hurlstone Training School, representing a saving of £455; and 118,747 pieces for the Industrial School itself, at a saving of £1,329 2s. 11d.

The work done in the sewing-room consisted of plain sewing, darning, dressmaking, and cutting out, the estimated value of the work being £102.

The Superintendent reports :—“ Of the apprentices sent out this year, 64·7 per cent. have done well, 11·8 per cent. fairly, and 23·5 per cent. badly. Of those who were discharged to their friends on attaining the age of 18 years, 62·5 per cent. are living respectably; 12·5 per cent. immorally; and in the case of 25 per cent. it is doubtful as to their mode of life.”

#### NAUTICAL SCHOOL-SHIP “SOBRAON.”

In this institution, 448 boys were enrolled, 240 of these being under and 208 over 14 years of age; 170 were new admissions, of whom 106 were below and 64 above the age stated. The number discharged was 145, made up in the following manner :—

|  |     |     |     |     |     |
|--|-----|-----|-----|-----|-----|
| For apprenticeship                           | ... | ... | ... | ... | 100 |
| On attaining 18 years of age                 | ... | ... | ... | ... | 6   |
| Transferred to Boarding-out Officer          | ... | ... | ... | ... | 18  |
| Sent to hospitals                            | ... | ... | ... | ... | 3   |
| Released by order of the Governor-in-Council |     |     |     |     | 18  |
|  |     |     |     |     | 145 |

Three hundred and three boys remained on the “Sobraon” at the end of the year. The figures for 1893, as compared with those of 1892, show an increase of 22 in the total enrolment, while there is a decrease of 26 and 3 respectively in the number of new admissions and of boys discharged.

The total expenditure was £8,544 9s., made up as follows :—

|  |     |     |     |        |   |   |
|--|-----|-----|-----|--------|---|---|
| For maintenance                                  | ... | ... | ... | £5,755 | 9 | 0 |
| For salaries...                                  | ... | ... | ... | 2,789  | 0 | 0 |
|  |     |     |     | £8,544 | 9 | 0 |
| Deducting parents' contributions to the Treasury | ... | ... | ... | 295    | 5 | 0 |
| Net cost to the State                            | ... | ... | ... | £8,249 | 4 | 0 |

Calculated on the net expenditure, the cost to the State per head of the enrolment was £18 8s. 3d.

The

The Commander and Superintendent reports :—“The institution worked quietly and easily during the year. The boys behaved well and there was no absconding or attempt to abscond. Some of the lads were attacked with measles, but beyond this there was little serious sickness, and at the close of the year we enjoyed a clean bill of health. No deaths occurred. The cost per head of the enrolment was £19 1s. 5d., as against £19 9s. 5d. for the preceding year, a substantial reduction of 8s. 2d. per head. The daily average attendance on board rose from 254 in 1892 to 272, the highest average reached, and there is every reason for anticipating a large increase during the forthcoming year. There were 420 apprentices in the country under my legal control, fully 90 per cent. of whom received good characters. Boys who finished their apprenticeship drew from the bank nearly £2,000, but many of them refrained from drawing their money, allowing it to remain in the Government Savings Bank. A gratifying increase took place in the number of visits paid to the ship by former inmates. No less than 350 such visits took place, and all the young men were leading industrious respectable lives.”

F. B. SUTTOR,  
Minister of Public Instruction.

Department of Public Instruction,  
Sydney, 11th May, 1894.

## APPENDIX I.

APPLICATIONS for the establishment of Public Schools, received during the year 1893.

## APPENDIX XII.

## THE CHIEF INSPECTOR'S REPORT, WITH ITS ANNEXES.

OF the 2,497 schools open in 1892, 70 were closed during that year, leaving 2,427 in existence at the beginning of 1893. New schools to the number of 88 were established in 1893, making a total for the year of 2,515. The numbers for the last three years stood thus :—

| Year. | Public. | Provisional. | Half-time. | House-to-House. | Evening. | Total. |
|-------|---------|--------------|------------|-----------------|----------|--------|
| 1891  | 1,697   | 349          | 300        | 92              | 14       | 2,452  |
| 1892  | 1,708   | 348          | 341        | 85              | 15       | 2,497  |
| 1893  | 1,700   | 347          | 369        | 90              | 9        | 2,515  |

Arranged in classes, according to the average attendance at the end of the year, they are :—

|      | Class I. | II. | III. | IV. | V.  | VI. | VII. | VIII. | IX. | X.  | Small<br>Unclassified. | Total. |
|------|----------|-----|------|-----|-----|-----|------|-------|-----|-----|------------------------|--------|
| 1891 | 35       | 35  | 20   | 47  | 118 | 197 | 200  | 309   | 668 | 290 | 533                    | 2,452  |
| 1892 | 38       | 34  | 21   | 54  | 117 | 195 | 222  | 315   | 665 | 283 | 553                    | 2,497  |
| 1893 | 38       | 37  | 24   | 53  | 116 | 205 | 208  | 322   | 724 | 227 | 561                    | 2,515  |

*Accommodation.*

The work done under the supervision of the Inspectors consisted of :—

|                               | £               | s.    | d.   |
|-------------------------------|-----------------|-------|------|
| 56 new schools.....           | } total cost... | 3,939 | 18 0 |
| 13 additions to schools ..... |                 |       |      |
| 2 new residences .....        |                 | 226   | 0 0  |
| 3 weathersheds .....          |                 | 58    | 0 0  |
| 592 buildings repaired.....   |                 | 4,335 | 12 3 |

Information respecting large buildings and extensive repairs will be found in the Architect's report.

At the close of 1892 there was sitting accommodation for 222,411 pupils. During 1893 there was an increase of 6,593 seats, the total accommodation being for 229,004 pupils. The following table shows the accommodation in each district :—

| District.             | Number of places at end of 1893, reckoned at 8 square feet for each child. | Number of places at end of 1893, reckoned at 100 cubic feet of air space for each child. |
|-----------------------|--|--|
| Armidale.....         | 18,137   | 16,599   |
| Bathurst .....        | 16,072   | 15,952   |
| Bowral... ..          | 14,815   | 13,235   |
| Goulburn .....        | 18,662   | 15,624   |
| Grafton .....         | 17,651   | 17,627   |
| Maitland.....         | 27,426   | 28,588   |

| Submetropolitan ..... | 23,784   | 23,680   |
| Wagga Wagga .....     | 23,339   | 22,727   |
| Wellington.....       | 13,029   | 13,237   |
| <b>Total .....</b>    | <b>221,374</b>   | <b>229,004</b>   |

A yearly supply of working stock is granted to each school free of expense to scholars or teachers. In most cases materials are economically used, but in some schools, owing to want of attention to small details, too many slates are broken, the covers and leaves of books become detached, pencils, ink, chalk, and pens run short, and so, before a new supply is due, there is a scarcity of these necessaries. It is part of an Inspector's duty to bring under the notice of the Department mismanagement of this kind, and also any neglect of a teacher to do his best to keep his school and premises in good condition. The Inspectors report that schools have a sufficient outfit of furniture and apparatus. It has for some years been the practice of the Department to give a fair trial to fittings claimed by inventors to be improvements, so that most modifications of English, American, and Continental desks, forms, and other apparatus have been under test here.

*Attendance.*

The gross enrolment of pupils in 1893 was 238,951. Deducting 12 per cent. for multiple enrolments, the number of individual pupils on the books of the schools was 210,277. The following table gives the enrolment and average attendance for each quarter of 1892 and 1893, together with the rates of increase or decrease :—

| Quarter.           | Enrolment in 1892. | Enrolment in 1893. | Increase of enrolment for 1893. | Average daily attendance for 1892. | Average daily attendance for 1893. | Increase in average daily attendance for 1893. | Per-centage of increase of enrolment. | Per-centage of increase of average attendance. |
|--------------------|--------------------|--------------------|---------------------------------|------------------------------------|------------------------------------|--|---------------------------------------|--|
| March.....         | 185,088            | 189,479            | 4,391                           | 132,735·5                          | 132,799·5                          | 64·0   | 2·3                                   | ·04  |
| June .....         | 187,206            | 189,587            | 2,381                           | 131,437·7                          | 134,320·4                          | 2,882·7  | 1·2                                   | 2·1  |
| September ...      | 187,253            | 186,658            | — 595                           | 135,067·6                          | 124,748·9                          | —10,318·7                                      | —·31                                  | —7·6   |
| December.....      | 185,281            | 179,587            | — 5,694                         | 131,079·7                          | 121,422·1                          | — 9,657·6                                      | — 3·0                                 | —7·3   |
| <b>Averages...</b> | <b>186,207</b>     | <b>186,327</b>     | <b>3,386*</b>                   | <b>132,580·1</b>                   | <b>128,322·7</b>                   | <b>1,473 3*</b>                                | <b>1·7*</b>                           | <b>1·07*</b>                                   |

\* In taking these averages the attendance for the last two quarters has been omitted, owing to the prevalence of measles and other epidemics which during that period seriously interfered with the attendance.

The per-centage for each quarter was :—

| Quarter.                    | Enrolment.     | Average Attendance. |              |
|-----------------------------|----------------|---------------------|--------------|
|                             |                | Number.             | Per-centage. |
| March.....                  | 189,479        | 132,799·5           | 70·0         |
| June .....                  | 189,587        | 134,320·4           | 70·8         |
| September .....             | 186,658        | 124,748·9           | 66·8         |
| December .....              | 179,587        | 121,422·1           | 67·6         |
| <b>Year's average .....</b> | <b>186,327</b> | <b>128,322·7</b>    | <b>68·8</b>  |

Compared with 1892, there is a decrease in the gross enrolment of 413, on the average daily attendance of 4,257.4, and an increase on the average quarterly enrolment of 120. The decrease was due to measles. For the three months ending 30th September, the average daily absence on account of this disease was about 11,000, and, for the next three months, 13,000. In the September quarter about 3,000 were not enrolled at all, being kept away more than three months either by sickness or from fear of infection; in the December quarter, the number off the rolls increased to 10,000.

*Inspection.*

There were open during the whole or a portion of the year 2,738 departments. Of these, 23 closed for want of attendance before they could be visited for inspection, or were opened late in the year after the schools in their neighbourhood had been inspected. The remaining 2,715 schools were thoroughly examined. During the last six months of the year, the pupils examined were frequently only a small proportion of the number ordinarily present. Instead, therefore, of the usual annual increase of children examined, there was a decrease on the previous year of 1,383.

The following Table gives the details of inspection:—

| Year. | No. of schools. | No. of schools inspected. | No. of schools inspected twice. | Total number of inspections. | No. of schools not inspected. | No. of pupils examined. | No. of Inspectors. |
|-------|-----------------|---------------------------|---------------------------------|------------------------------|-------------------------------|-------------------------|--------------------|
| 1891  | 2,662           | 2,623                     | 986                             | 3,609                        | 39                            | 132,044                 | 35                 |
| 1892  | 2,728           | 2,712                     | 1,174                           | 3,886                        | 16                            | 142,109                 | 35                 |
| 1893  | 2,738           | 2,715                     | 402                             | 3,117                        | 23                            | 140,713                 | 35                 |

The particulars for each district stand thus:—

| District.             | No. of Inspectors. | No. of schools. | No. of schools inspected. | No. of schools inspected twice. | Total No. of inspections. | No. of schools not inspected. | No. of pupils examined. |
|-----------------------|--------------------|-----------------|---------------------------|---------------------------------|---------------------------|-------------------------------|-------------------------|

| Natural science .....             | 6,840                  | 5,633          | 82                                   |

These results compare very favourably with those of previous years. It is noticeable again that reading, writing, spelling, and arithmetic received increased attention. The other subjects in which the results were better than in 1892 are English history, drawing, music, needlework, drill, and natural science. Considering the drawbacks under which teachers and pupils worked, the outcome for the year was, on the whole, more than usually satisfactory.

#### Discipline.

All the Inspectors speak well of the discipline. There are certain school laws that pupils must obey, and this fact is so frankly recognised by them and their teachers, and so firmly established by usage, that the public feeling in schools is in the direction of obedience, attention, and order. He is a weak and mischievous teacher who destroys this spirit.

#### Compulsory Clauses of the Act.

The average enrolment for the half-year ended 30th June, 1893, was 189,533. Of this number 33,937 failed to attend school 70 days. The explanations received in regard to 27,999 were considered satisfactory. Of the remainder, amounting to 3·1 per cent. of the average enrolment, the parents of 834 were prosecuted, and cautions were recommended in 5,104 cases. For

For the half-year ended 31st December the average enrolment was 183,122. Of these, 34,449 failed to attend 70 days. The explanations respecting 30,443 were accepted, the parents of 3,557 were recommended for cautions, and legal action was taken in 449 cases. The cases for prosecution and caution, therefore, for the December half-year amounted to 2.1 per cent. of the average enrolment for that period.

The increase in the number of pupils who failed to attend school during the year, as required by the law, was due chiefly to the epidemics of measles and diphtheria.

The services of the Attendance Officers, with one exception, were dispensed with from 30th June, 1893, and their duties are, in the main, now being performed by the police.

#### Staff of Teachers.

The number of teachers on the records at the end of 1893 was 4,527, a decrease of 109 on the number for 1892. The following table shows their classification :—

|  | I A.        |           | I B.      |           | II A.      |            | II B.      |           | III A.        |            | III B.     |              | III C.    |           | Unclassified. |            | Totals.     |             | Grand Total. |                      |          |  |           |  |            |  |           |  |               |  |         |              |       |         |       |         |       |         |       |         |       |         |    |     |     |     |     |     |    |     |   |    |    |     |     |       |

#### Training Schools.

During the year there were in attendance at the two training schools :—

|                                   |            |            |           |
|-----------------------------------|------------|------------|-----------|
| Fort-street (male students) ..... | 26 seniors | 28 juniors | Total, 54 |
| Hurlstone (female ,, ) .....      | 23 ,,      | 31 ,,      | ,, 54     |

Totals .....

49 seniors ..... 59 juniors ..... Total, 108

The course of study includes both professional and literary work. Those who matriculate attend the University; those who do not, take up corresponding subjects at the Training School. All have to study practical teaching, school management, music, drawing, and drill; the female students have, in addition, needlework and cookery, and the male students carpentry. The following table shows the distribution of the students for study :—

|  | Senior.   | Junior.   | Total.     |
|--|-----------|-----------|------------|
| Attending University—1st year course (males) ..... | 15        | 16        | 31         |
| "          1st "          (females) .....          | 18        | 0         | 18         |
| "          2nd "          (males) .....            | 8         | 0         | 8          |
| "          3rd "          (males) .....            | 3         | 0         | 3          |
| Non-University students—1st year (males) .....     | 0         | 12        | 12         |
| "          1st "          (females) .....          | 0         | 31        | 31         |
| "          2nd "          (females) .....          | 5         | 0         | 5          |
| <b>Totals .....</b>                                | <b>49</b> | <b>59</b> | <b>108</b> |

Without an exception, the students worked with energy and judgment, and the reports upon them are in all respects satisfactory.

#### High Schools.

The number of High Schools was the same in 1893 as it was in 1892. The attendance is shown in the following table :—

| School.                         | Total enrolment, 1893. | Average quarterly enrolment. | Average daily attendance. | Amount of fees paid. |
|---------------------------------|------------------------|------------------------------|---------------------------|----------------------|

| The figures for 1892 were ..... | 882                    | 686                          | 614.9                     | 4,293 19 0           |

From the 1st July, the fees were raised from £2 2s. a quarter to £3 3s. This, to some extent, decreased the attendance; but the fee receipts for the year show an increase. The general commercial depression considerably reduced the number who presented themselves at the entrance examination. In 1892, the total was 1,095; but in 1893 it was 798. The scholarships awarded during the year were 62, and the bursaries 28. For the quarter ending in December there were in attendance :—

|                                   | Scholars.  | Bursars.  | All        |

| <b>Total .....</b>                | <b>126</b> | <b>41</b> | <b>All</b> |

All the High Schools were examined by the Department's Inspectors. The results were reasonably satisfactory, and the Inspectors report favourably of the discipline and general management. The following table gives the number of pupils examined in each subject, and the percentage of passes :—

| Subject.           | Number examined. | Per-centage of passes. | Subject.             | Number examined. | Per-centage of passes. |
|--------------------|------------------|------------------------|----------------------|------------------|------------------------|

| Latin .....        | 558              | 73                     | Conic Sections ..... | 13               | 84                     |

All the schools were represented at the various University examinations. The following table shows the number of passes.

|                           | Junior. | Senior. | Matriculation. |
|---------------------------|---------|---------|----------------|
| Sydney (Boys) .....       | 31      | 7       | 16*            |
| " (Girls) .....           | 21      | 6       | 8†             |
| West Maitland (Boys)..... | 11      | 3       | 12‡            |
| " (Girls).....            | 7       | 1       | .....          |
| Bathurst (Girls) .....    | 6       | .....   | .....          |
| Totals .....              | 76      | 17      | 36             |

\* Of these 8 matriculated at the Junior and 5 at the Senior Examination.

† Of these 2 matriculated at the Junior and 1 at the Senior Examination.

‡ Of these 6 matriculated at the Junior and 3 at the Senior Examination.

The total expenditure on High Schools for the year was £8,230 15s. 11d. Deducting from this sum the amount paid as fees, there is a balance of expenditure over income of £3,580 4s., or £5 12s. 9d. per head of the average enrolment.

Appended will be found a report from :—

- Each Inspector giving detailed information respecting the state of education in his own district.
- The Principals of the Training Schools.
- The Superintendents of Drawing and Music, the Directress of Needlework, and the Directress of Cookery.

J. C. MAYNARD,  
Chief Inspector.

10th March, 1894.

#### ANNEX A.

##### INSPECTORS ALLEPASS AND DAWSON'S REPORT.

THE total number of schools and departments under our supervision during the year just ended was ninety-three (93) ; of these, ninety (90) are Public Schools and three (3) are Evening Public Schools.

##### CLASSIFICATION of the foregoing Schools.

| Class I. | II. | III. | IV. | V. | VI. | VII. | VIII. | IX. | X. | Evening Public. | Total. |
|----------|-----|------|-----|----|-----|------|-------|-----|----|-----------------|--------|
| 37       | 21  | 12   | 11  | 8  | ... | ...  | ...   | ... | 1  | 3               | 93     |

With the exception of the temporary (wooden) school-house at Albion-street, the material condition of the school buildings in our section of the Metropolis is very good.

Additional school-rooms have been erected at Bondi and Paddington, and one is in course of erection at Leichhardt West. Class-rooms have been added to the school premises at Erskineville and Leichhardt, and improvements and repairs have been effected at Coogee, Crown-street, Darlington, Forest Lodge, Fort-street, Leichhardt, Erskineville, Paddington, Redfern West, and Woollahra. The necessity for permanent school buildings at Albion-street still exists, and the erection of the much needed Infants' school-room at Manly stands deferred.

The number of sittings provided in the schools under our supervision is 25,361 The following table shows the enrolment, average attendance, &c. :—

|                         | Enrolment. | Average attendance. | Per-centage of attendance. | Free Pupils. |
|-------------------------|------------|---------------------|----------------------------|--------------|
| March quarter .....     | 26,673     | 19,198·0            | 72·0                       | 1,417        |
| June quarter.....       | 26,622     | 18,921·7            | 71·1                       | 1,662        |
| September quarter ..... | 25,858     | 15,451·0            | 61·3                       | 1,822        |
| December quarter .....  | 24,566     | 17,260·0            | 70·0                       | 2,037        |

The falling off in the enrolment and average attendance during the latter half of the year was due to the prevalence of measles, and from the same cause there were upwards of 1,000 pupils less examined than in 1892.

In 1892 the maximum number of Free Pupils was 1,350, in 1893 the maximum was 2,037 : this may fairly be taken as resulting from the existing depression among the labour classes.

All the schools under our supervision received two full inspections, a regular for examination and an ordinary for insight into the working of the school ; but owing to our increased clerical duties, through the retirement of the Attendance Officers that were under our direction, we have not been in a position to make many incidental visits.

In all the schools work is regulated by more or less skilfully drawn-up time tables and programmes of lessons for each quarter. With regard to the latter, it is a manifest defect that in most schools little provision is made for revision in arithmetic, the work set down being often strictly that prescribed

prescribed for the particular half-year the class may have reached. As a consequence we often find pupils in the Fourth Class busy at intricate complex fractions, wasting their time, while the important rules studied while in the Third Class are quite forgotten. This defect has been noticed before, but through the examination for exemption certificates to which the upper classes have been submitted during the second half of the year, it has appeared more glaringly than hitherto.

The condition of our schools, as regards efficiency, is as follows:—

|                       | Below standard. | Pass (50 per cent). | Above standard. | Total. |
|-----------------------|-----------------|---------------------|-----------------|--------|
| Public Schools .....  | 0               | 0                   | 90              | 90     |
| Evening Schools ..... | 0               | 0                   | 3               | 3      |

The following table shows the number of pupils examined in the several subjects, and the percentages of passes:—

| Subject.                   | Number examined. | Per-centage of passes. | Subject.              | Number examined. | Per-centage of passes. |
|----------------------------|------------------|------------------------|-----------------------|------------------|------------------------|
| Reading .....              | 18,123           | 77                     | Drawing.....          | 16,501           | 67                     |
| Writing .....              | 18,123           | 79                     | Music .....           | 16,580           | 82                     |
| Dictation .....            | 14,180           | 73                     | French .....          | 475              | 66                     |
| Arithmetic .....           | 17,711           | 63                     | Euclid .....          | 1,684            | 72                     |
| Grammar .....              | 8,063            | 68                     | Algebra .....         | 635              | 70                     |
| Geography .....            | 8,063            | 70                     | Mensuration .....     | 1,691            | 56                     |
| History (English) .....    | 7,846            | 67                     | Latin .....           | 635              | 65                     |
| History (Australian) ..... | 1,637            | 68                     | Needlework .....      | 5,225            | 96                     |
| Scripture .....            | 17,702           | 70                     | Drill .....           | 17,083           | 90                     |
| Object lessons .....       | 16,156           | 70                     | Natural Science ..... | 1,745            | 74                     |

The order and discipline maintained in the majority of the schools are of a satisfactory character.

Corporal punishment is discouraged as much as possible.

The teachers, as a body, are punctual and diligent in the discharge of their duties.

The pupil-teachers have, in every case, been favourably reported upon.

The Superintendents of Drawing, Music, Drill, and Needlework have discharged their duties in an able and zealous manner.

TABLE showing the classifications of Teachers and Pupil-teachers.

#### ANNEX B.

##### INSPECTOR THOMPSON'S REPORT.

At the beginning of the year 20 Public Schools and 2 Evening Public Schools, comprising 48 departments, were placed under my immediate supervision.

No new schools or departments were opened during the year in this section of the Metropolitan District, nor was any school or department closed.

##### Accommodation.

In this section of the district accommodation for 11,585 pupils is provided, which may be regarded as sufficient for the ordinary attendance.

##### Attendance.

The following table shows the total enrolment, average attendance, and percentage of attendance for each quarter during the year:—

| Quarter.        | Enrolment. | Average Attendance. | Per-centage. |
|-----------------|------------|---------------------|--------------|
| March.....      | 12,979     | 9,240·2             | 71·2         |
| June .....      | 12,995     | 9,237·0             | 71·0         |
| September ..... | 12,658     | 7,555·8             | 51·6         |
| December .....  | 11,966     | 8,163·1             | 69·0         |

During the quarters ending on 30th September and on 31st December, respectively, both the enrolment and attendance were affected by the epidemic of measles.

*Inspection.*

*Inspection.*

All schools and departments received regular inspection during the year, and 13 departments received ordinary inspection.

Of the 48 departments inspected under regular form 45 were above the standard of 50 per cent. of maximum marks obtainable, and 3 were up to the required standard. No department, therefore, was below the standard.

In this connection I would state that, owing to my absence from duty on account of ill-health, ordinary inspections could not be completed. As regards regular inspections I stand indebted to my brother officers, who, in addition to their own onerous duties, were good enough to undertake the examination of my schools during my absence, and I gladly embrace this opportunity of expressing my appreciation of their courtesy.

The total number of pupils examined, and their proficiency in the several subjects prescribed, is hereunder shown :—

| Subject.             | Number examined. | Per-centage (on standard of 50 per cent.) | Subject.              | Number examined. | Per-centage (on standard of 50 per cent.) |
|----------------------|------------------|---|-----------------------|------------------|---|
| Reading .....        | 9,628            | 69.0                                      | Music .....           | 9,513            | 74.0                                      |
| Writing .....        | 9,628            | 64.0                                      | French .....          | 192              | 60.0                                      |
| Dictation .....      | 7,407            | 69.0                                      | Euclid .....          | 680              | 66.0                                      |

|                                 | Class I.                          |         | Class II. |         | Class III. |         | Class IV. |         | Proba-tioners. |         |        |         |        |         |               |         |         |         |               |    |    |     |     |
| Pupil-teachers .....            | 9                                 | 44      | 11        | 19      | 6          | 12      | 6         | 6       | ..             | ..      |        |         |        |         |               |         |         |         |               |    | 32 | 81  | 113 |
| Work-mistresses .....           |                                   |         |           |         |            |         |           |         |                |         |        |         |        |         |               |         |         |         |               |    | .. | 10  | 10  |
|                                 | Total Teachers of all ranks ..... |         |           |         |            |         |           |         |                |         |        |         |        |         |               |         | 74      | 164     | 238           |    |    |     |     |

To sum up.—The organisation as a whole is good ; the government effective and well sustained and the instruction is well up to standard.

W. F. THOMPSON,  
Inspector.

January, 1894.

ANNEX C.

INSPECTOR WILLIS'S REPORT.

At the beginning of the year 1893 those schools in the Metropolitan District that were formerly under the joint supervision of Inspectors, Messrs. Thompson and Pitt, were equally divided between Mr. Inspector Thompson and myself. Those placed under my supervision numbered in all 23 schools, viz., 20 Public, 2 Evening Schools, and the school on board the Training Ship "Sobraon."

The classification of these, and the departments represented by them, are indicated in the following table :—

| Classes .....    | I. | II. | III. | IV. | V. | VI. | VII. | VIII. | IX. | X. | Evening. | Training Ship. | Total. |
|------------------|----|-----|------|-----|----|-----|------|-------|-----|----|----------|----------------|--------|
|                  |    | 9   | 2    | 1   | 3  | 1   | 1    | 0     | 0   | 2  | 1        | 2              | 1      |
| Department ..... | 27 | 6   | 3    | 5   | 1  | 1   | 0    | 0     | 2   | 1  | 2        | 1              | 49     |

One of these, the Evening School at Smith-street, Balmain, was closed at the end of September last. The others have been open through the year, and are still in operation.

The schools, viewed collectively, are in good material condition. During the year repairs were effected to the schools at Five Dock, La Perouse, Marrickville, Newtown, Newtown North, and Smith-street, Balmain ; and new class-rooms were added to the schools at Marrickville, Tempe, and Dulwich Hill.

Hill. The accommodation provided has been more than sufficient for the ordinary attendance of the pupils. In the early part of the year the total floor space of the schools, at the rate of 8 square feet per child, afforded places for 11,219 pupils. Now, owing to the enlargement of the three schools above referred to, 11,513 places are available.

In the following statement the adequacy of the accommodation is set forth :—

|  |        |
|--|--------|
| Gross enrolment of pupils for the year ..... | 17,500 |
| Multiple .....                               | 2,901  |
| Actual .....                                 | 14,599 |
| Average attendance.....                      | 8,833  |
| Ordinary .....                               | 10,000 |
| Aggregate number of seats now afforded ..... | 11,513 |

The regularity of the pupils can be judged by the quarterly statistics given below :—

| Quarters.       | Enrolment. | Average Attendance. | Per-centage of Regular Pupils. |
|-----------------|------------|---------------------|--------------------------------|
| March.....      | 13,320     | 9,262·8             | 71·8                           |
| June .....      | 13,196     | 9,468·8             | 71·8                           |
| September ..... | 12,922     | 7,613·7             | 58·1                           |
| December .....  | 12,402     | 8,779·7             | 70·7                           |

The low average attendance of pupils during the September quarter was caused by the prevalence of measles in Sydney at that time.

The whole of the departments under my supervision received regular inspection, and 29 of them ordinary inspection. The efficiency of these departments at the time of the inspection was found to be, with one exception, satisfactory. There were 45 above the standard, 3 up to the standard, and 1 department below it.

The number of pupils examined in each subject, and of those who reached standard requirements in each, are given in the following table :—

| Subjects.             | Pupils examined. | Number that passed. | Percentage up to standard. | Subjects.         | Pupils examined. | Number that passed. | Percentage up to standard. |
|-----------------------|------------------|---------------------|----------------------------|-------------------|------------------|---------------------|----------------------------|
| Reading .....         | 10,023           | 8,200               | 81                         | Drawing .....     | 7,523            | 5,896               | 78                         |
| Writing .....         | 10,023           | 8,300               | 82                         | Music .....       | 9,035            | 7,313               | 81                         |
| Dictation.....        | 7,648            | 5,895               | 77                         | French .....      | 220              | 148                 | 67                         |
| Arithmetic .....      | 9,684            | 6,690               | 68                         | Euclid .....      | 650              | 532                 | 88                         |
| Grammar .....         | 3,765            | 2,491               | 66                         | Algebra .....     | 220              | 138                 | 63                         |
| Geography .....       | 3,765            | 2,673               | 71                         | Mensuration ..... | 315              | 156                 | 49                         |
| History, English..... | 3,765            | 2,715               | 72                         | Latin .....       | 220              | 154                 | 70                         |
| "    Australian ..... | 827              | 619                 | 75                         | Needlework .....  | 2,668            | 2,590               | 97                         |
| Scripture.....        | 9,713            | 7,795               | 82                         | Drill .....       | 8,920            | 7,234               | 81                         |
| Object Lessons .....  | 9,635            | 7,278               | 75                         | Science .....     | 358              | 273                 | 76                         |

These results are for the most part satisfactory, and they will bear favourable comparison with statistics of a similar character recorded in previous years.

In nearly all the schools the organisation was markedly high, and the discipline was found to be sound and effective.

The teachers, assistants, and pupil-teachers have, with few exceptions, discharged their duties in a creditable manner. The schedule given below shows the number and the classification of those on the teaching staff.

|                                  | I A.     |         | I B.      |         | II A.      |         | II B.     |         | III A.        |         | III B. |         | III C. |         | Un-classified |         | Totals. |         | Grand Totals. |     |

| Total Teachers of all ranks..... |          |         |           |         |            |         |           |         |               |         |        |         |        |         |               |         | 73      | 168     | 241           |     |

To sum up :—

- (1) The material condition of the schools is satisfactory.
- (2) Ample accommodation is provided for the pupils.
- (3) The work done in the schools this year has on the whole been of a commendable character, and gives promise of results of equal merit for the year 1894.

M. WILLIS,  
Inspector.

Sydney, 5th January, 1894.

#### ANNEX D.

##### DISTRICT-INSPECTOR W. DWYER'S REPORT.

THE number of schools in operation during the year was 214. They are included in the following classes :—

|                      |     |              |
|----------------------|-----|--------------|
| Public.....          | 190 | Departments. |
| Provisional.....     | 12  | "            |
| Half-time .....      | 10  | "            |
| House-to-house ..... | 2   | "            |
|                      |     | Five         |

Five schools—one Public, one Provisional, two Half-time, and one House-to-house—were closed on account of insufficient attendance, and five new schools were established. The number of places available for pupils at the close of the year was, according to the standard of superficial measurement, 23,784 for an enrolment of 20,239 pupils. These figures show that the accommodation provided is, in the aggregate, considerably in excess of the demand; it is also evenly distributed.

All the schools of the district were duly examined, and their condition as regards efficiency may be understood from the following table:—

|   | Below Standard. | Up to Standard. | Above Standard. | Total. |
|---|-----------------|-----------------|-----------------|--------|
| Public Schools open a full year .....         | 10              | 13              | 163             | 186    |
| „ not open a full year .....                  | 1               | 1               | 2               | 4      |
| Provisional Schools open a full year .....    | 1               | 2               | 8               | 11     |
| „ not open a full year .....                  | 1               | .....           | .....           | 1      |
| Half-time Schools open a full year .....      | .....           | 3               | 5               | 8      |
| „ not open a full year .....                  | .....           | .....           | 2               | 2      |
| House-to-house Schools open a full year ..... | .....           | .....           | 1               | 1      |
| „ not open a full year .....                  | .....           | 1               | .....           | 1      |
| Totals open a full year .....                 | 11              | 13              | 177             | 206    |
| „ not open a full year .....                  | 2               | 2               | 4               | 8      |
| Totals.....                                   | 13              | 20              | 181             | 214    |

TABLE showing the subjects taught, the number of pupils examined in each, and the per-centage of passes:—

| Subject.                | Number of Pupils examined. | Number of Passes per 100. | Subject.              | Number of Pupils examined. | Number of Passes per 100. |
|-------------------------|----------------------------|---------------------------|-----------------------|----------------------------|---------------------------|
| Reading .....           | 15,901                     | 80                        | Drawing.....          | 15,710                     | 66                        |
| Writing .....           | 15,181                     | 74                        | Vocal Music .....     | 15,453                     | 63                        |
| Dictation .....         | 12,003                     | 73                        | French .....          | 363                        | 68                        |
| Arithmetic .....        | 15,336                     | 68                        | Euclid .....          | 1,305                      | 74                        |
| Grammar .....           | 6,654                      | 72                        | Algebra .....         | 520                        | 67                        |
| Geography .....         | 6,661                      | 75                        | Mensuration .....     | 935                        | 68                        |
| History (English) ..... | 6,667                      | 71                        | Latin .....           | 537                        | 71                        |
| „ (Australian).....     | 1,661                      | 64                        | Needlework .....      | 6,326                      | 76                        |
| Scripture Lessons ..... | 15,757                     | 69                        | Drill .....           | 15,842                     | 67                        |
| Object Lessons .....    | 15,482                     | 68                        | Natural Science ..... | 738                        | 74                        |

These results are in themselves satisfactory, being in all cases above the standard; and manifest, moreover, in the majority of subjects a steady advance upon those of previous years.

|   |              |
|---|--------------|
| Proportion of schools up to or above standard (tolerable) for 1890..... | 86 per cent. |
| „ „ „ „ 1891.....   | 91 „         |
| „ „ „ „ 1892.....   | 94 „         |
| „ „ „ „ 1893.....   | 94 „         |

In view of the foregoing figures it seems almost needless to dwell at any length on the condition of the schools as regards efficiency; they are, with few exceptions, working satisfactorily and fulfilling fairly well the object for which they were established.

The teachers and assistants are classified as follow:—

|                    | Male. | Female. | Total. |
|--------------------|-------|---------|--------|
| 1 A.....           | 4     | 3       | 7      |
| 1 B.....           | 12    | 3       | 15     |
| 2 A.....           | 56    | 26      | 82     |
| 2 B.....           | 31    | 9       | 40     |
| 3 A.....           | 50    | 22      | 72     |
| 3 B.....           | 13    | 16      | 29     |
| 3 C.....           | 2     | 4       | 6      |
| Unclassified ..... | 8     | 32      | 40     |
| Totals .....       | 176   | 115     | 291    |

*Pupil-teachers.*

|                    | Male. | Female. | Total. |
|--------------------|-------|---------|--------|
| Class 1 .....      | 5     | 17      | 22     |
| „ 2 .....          | 22    | 27      | 49     |
| „ 3 .....          | 22    | 32      | 54     |
| „ 4 .....          | 16    | 13      | 29     |
| Probationers ..... | 0     | 2       | 2      |
| Totals .....       | 65    | 91      | 156    |

All continue to maintain respectable social positions, and are, I may say, without exception, earnest, devoted, and efficient in performing their respective duties. Under these circumstances it is only reasonable to expect that the work of the schools for the year now entered upon will be as suitably regulated, as vigorously conducted, and as effectively executed as it has been in past years.

All the usual statistical information has been already forwarded, and the reports of the Inspectors acting with me are hereto appended.

WM. DWYER,  
District Inspector.

Sydney, 9th January, 1894.

ANNEX E.

## ANNEX E.

## INSPECTOR PITT'S REPORT.

*Means of Education.*

At the end of 1892 there were in this section of the Sub-Metropolitan District 75 schools, comprising 62 Public Schools, 4 Provisional, 6 Half-time, and 2 House-to-house Schools.

The total number of schools of all classes in operation at the commencement of the year was 77. Of these, 1 House-to-house School at Haroldene, and 2 Half-time Schools at Redbank and Island Flat have been closed owing to paucity of attendance.

There are now in existence 60 Public Schools in 65 departments, 4 Half-time Schools, 4 Provisional Schools, and 1 House-to-house School.

The Infants' School at St. Mary's has been closed, and the former two departments are now worked as one.

The establishment of a Public School at the Pitt Town Co-operative Settlement has been authorised, and tenders have been called and received, and are now under consideration.

With reference to the demand for new schools, I have to report that four applications for the establishment of schools have been received. The following statement shows the localities from which these applications were received, and the Department's decision in each case:—

| School.                                     | Department's decision            |
|---|----------------------------------|
| (a) Pitt Town Co-operative Settlement ..... | Public granted.                  |
| (b) Wilberforce Labour Settlement .....     | Public declined.                 |
| (c) Lower Macdonald .....                   | Provisional under consideration. |
| (d) Galston Heights .....                   | " "                              |

*Accommodation.*

The total number of seats provided for the pupils in this section at the end of 1892 was 5,351, allowing 8 square feet to each child; but owing to the enlargement of several schools, there is now room for 5,883 scholars. The accommodation provided is sufficient and suitable for present requirements.

The following table shows the names of new buildings, enlargements, and repairs completed or in progress at the end of the year, &c.:—

| School.                           | Supervision. | Cost.     | Accommodation. | Object in View.       | Remarks.                            |
|-----------------------------------|--------------|-----------|----------------|-----------------------|-------------------------------------|
| Pennant Hills Road                | Architect    | £ 990 0 0 | 60             | New School            |                                     |
| Blacktown                         | "            | 116 8 0   |                | Improvements, &c.     | To residence.                       |

|                                   | "            | 186 10 0  | 175            | New School            | Tender received for acceptance.     |

*Attendance.*

The table hereunder shows the total enrolment, the average attendance, and per-centage of attendance for each quarter during the year 1893:—

| Quarter.  | Enrolment. | Average Attendance. | Per-centage. |
|-----------|------------|---------------------|--------------|
| March     | 5,157      | 3,569.7             | 69.2         |
| June      | 5,228      | 3,732.2             | 71.3         |
| September | 5,246      | 3,483.0             | 66.3         |
| December  | 5,099      | 3,430.5             | 67.2         |

For the previous year they were:—

| Quarter.  | Enrolment. | Average Attendance. | Per-centage. |
|-----------|------------|---------------------|--------------|
| March     | 5,024      | 3,610.4             | 71.9         |
| June      | 5,059      | 3,580.1             | 70.8         |
| September | 5,126      | 3,617.5             | 70.6         |
| December  | 4,996      | 3,525.9             | 70.6         |

From these numbers it will be seen that the enrolment this year was higher than for last year, but the average attendance was lower. This is due to the prevalence of influenza, whooping cough, and measles. In view of these unavoidable causes the attendance should be considered satisfactory.

The number of children present at inspection was 4,276.

*Inspection.*

All the schools that were in operation during the year were fully inspected. One received a second inspection owing to its inefficient state on my first visit. Every school has been incidentally visited, and fourteen schools have received ordinary inspection. In addition to the schools above mentioned, the Girls' Industrial School at Parramatta was fully inspected, with results of a highly satisfactory character.

The

The condition of the schools as regards efficiency is seen from the following table :—

| Name of School.     | Below Standard. | Up to Standard. | Above Standard. | Totals.   |
|---------------------|-----------------|-----------------|-----------------|-----------|
| Public .....        | 1               | 1               | 63              | 65        |
| Provisional .....   | .....           | 1               | 3               | 4         |
| Half-time .....     | .....           | 2               | 4               | 6         |
| House-to-house..... | .....           | 1               | 1               | 2         |
| <b>Total .....</b>  | <b>1</b>        | <b>5</b>        | <b>71</b>       | <b>77</b> |

*Per-centages.*

The total number of pupils examined and their proficiency in the several subjects is hereunder shown :—

| Subject.              | Number of pupils examined | Per-centage of passes. | Subject.                | Number of pupils examined | Per-centage of passes. |
|-----------------------|---------------------------|------------------------|-------------------------|---------------------------|------------------------|
| Reading .....         | 4,276                     | 79                     | Music.....              | 4,276                     | 76                     |
| Writing .....         | 4,276                     | 76                     | French .....            | 235                       | 70                     |
| Dictation .....       | 2,819                     | 72                     | Geometry .....          | 603                       | 80                     |
| Arithmetic .....      | 4,241                     | 72                     | Algebra .....           | 317                       | 64                     |
| Grammar.....          | 2,274                     | 75                     | Mensuration .....       | 624                       | 71                     |
| Geography .....       | 2,274                     | 77                     | Latin .....             | 329                       | 76                     |
| History, English..... | 2,313                     | 73                     | History, Australian ... | 690                       | 70                     |
| Scripture .....       | 4,270                     | 72                     | Needlework .....        | 2,103                     | 79                     |
| Object Lesson.....    | 4,276                     | 74                     | Drill .....             | 4,276                     | 75                     |
| Drawing .....         | 4,276                     | 72                     | Natural Science.....    | 419                       | 72                     |

In nearly every case the per-centage obtained is higher than that of last year.

*The Teaching Staff.*

The following synopsis shows the classification of the teachers and pupil-teachers under my supervision :—

|                                 | I A.                              |         | I B.      |         | II A.      |         | II B.     |         | III A.        |         | III B. |         | III C. |         | Un-classified |         | Totals. |         | Grand Totals. |    |    |

| Work Mistresses .....           |                                   |         |           |         |            |         |           |         |               |         |        |         |        |         |               |         | ..      | 2       | 2             |    |    |
|                                 | Total teachers of all ranks ..... |         |           |         |            |         |           |         |               |         |        |         |        |         |               |         | 9       | 39      | 118           |    |    |

The teachers, as a body, are respectable, trustworthy, competent, and sober. A few, I regret to say, were censured for carelessness or misconduct. At the end of each quarter and each year there is a small contingent who fail to furnish complete and accurate returns promptly, some even failing to compile them neatly. I am pleased to add that these references apply to a very limited number. The majority of the teachers strive to do their work well, and discharge their several duties in a creditable manner. The pupil-teachers are an intelligent promising body of young persons, and have rendered good steady service during the year.

*Summary.*

- I. The schools are fairly well distributed; the accommodation is sufficient and good.
  - II. The discipline continues a pleasing feature in the majority of the schools.
  - III. All schools have been inspected, and visited incidentally many times.
  - IV. The efficiency of the schools has improved and satisfactory results have been achieved.
  - V. The prospects for the incoming year are hopeful and encouraging.
- All required statistics have been duly forwarded as directed.

Parramatta, 5th January, 1894.

CHAS. JNO. PITT,  
Inspector.

ANNEX F.

INSPECTOR SKILLMAN'S REPORT.

At the end of 1892 there were in this section of the Sub-Metropolitan District 73 schools.

During this year new Public Schools have been established at Austral and Miranda, and a Provisional School at Burraneer Bay.

Bulgo Public School has been closed owing to the small attendance of pupils.

I have now under my supervision 55 Public Schools in 71 departments, 3 Provisional, and 2 Half-time Schools; total, 75 schools.

New school buildings have been erected by the Architect at Austral, Clifton, and Sutherland, that at Austral being a new school. At Clifton and Sutherland substantial brick school-rooms replaced old wooden structures.

Additional

Additional accommodation has also been provided under the Architect's supervision by a school-room for Infants at Bexley, class-rooms at Goughtown and Rookwood, and by lengthening the Infants' school-room at Granville.

A building was leased at Miranda, and the use of a room given free at Burraneer Bay for the new schools established at those places.

The net increase of seats in 1893 was 439, making the present total 11,150.

Teachers' residences have been erected at Canley Vale, Clifton, Prospect, and Sutherland.

New school buildings are shortly to be provided at Parramatta South (Girls') and St. John's Park.

#### Attendance.

In all 76 schools have been in operation during 1893; 72 being in existence for the whole year, and 4 for only a portion thereof.

The average attendance for the four quarters was:—

| Quarter.        | Boys.   | Girls.  | Total.  | Enrolment. | Percentage. |
|-----------------|---------|---------|---------|------------|-------------|
| March .....     | 3,684.6 | 3,281.9 | 6,966.5 | 9,918      | 70.2        |
| June .....      | 3,829.7 | 3,404.6 | 7,234.3 | 10,000     | 71.6        |
| September ..... | 3,420.8 | 3,038.1 | 6,458.9 | 10,001     | 64.5        |
| December.....   | 3,370.4 | 2,923.9 | 6,294.3 | 9,466      | 66.5        |

The prevalence of measles and influenza caused the diminution in the attendance during the latter half of the year.

#### Inspection.

All the schools in the District were regularly inspected, and twelve received an ordinary inspection.

Of the 76 schools 48 were above the standard, 16 satisfied it, and 12 failed to reach it, a result almost similar to that obtained last year.

The number of pupils examined, and the per-centage of those who satisfied the standard, are given below:—

| Subjects.              | Number examined. | Per-centage of passes. | Subjects.             | Number examined. | Per-centage of passes. |
|------------------------|------------------|------------------------|-----------------------|------------------|------------------------|
| Reading .....          | 7,677            | 77.9                   | Drawing .....         | 7,667            | 66.7                   |
| Writing .....          | 7,677            | 78.6                   | Music .....           | 7,502            | 65.5                   |
| Dictation .....        | 6,302            | 72.9                   | French .....          | 78               | 57.7                   |
| Arithmetic .....       | 7,677            | 70.5                   | Euclid .....          | 474              | 66.0                   |
| Grammar .....          | 2,985            | 73.6                   | Algebra .....         | 113              | 67.2                   |
| Geography .....        | 2,985            | 76.4                   | Mensuration ..        | 191              | 66.5                   |
| History, English ..... | 2,978            | 68.7                   | Latin .....           | 113              | 77.0                   |
| „ Australian .....     | 805              | 63.7                   | Needlework .....      | 2,861            | 76.2                   |
| Scripture .....        | 7,653            | 65.7                   | Drill .....           | 7,649            | 66.4                   |
| Object Lesson .....    | 7,484            | 67.5                   | Natural Science ..... | 193              | 76.3                   |

I have good reason to be satisfied with the work done by the teachers under me during 1893, and from the desire almost invariably evinced to implicitly carry out my suggestions, I am confident that no retrogression will take place in 1894.

Kogarah, 27th December, 1893.

H. SKILLMAN,  
Inspector.

### ANNEX G.

#### DISTRICT-INSPECTOR BRADLEY'S REPORT.

##### I.—Schools and School Establishment.

FOR the year 1892 there were in operation in the Armidale district in all 302 schools. Of this number, 7 lapsed through paucity of attendance before the end of the year, and were not re-opened during 1893, but new schools or schools revived—18 in all—were established in the following localities:—Bereen, Boolooroo, Borah, Coningdale, Cooringoora, Eversleigh, Haning, Jeogla, Maitland Point, Mungindi, North Lynne, Oban, Reedy Creek, Rockmore, Sinclair, Trevaylor, Vivier, and Woodlawn. To these must be added Acacia Creek Public School, transferred from Grafton district, and the net increase (12) brings the school roll for 1893 up to 314, classified as follows:—

|                      |     |
|----------------------|-----|
| Public .....         | 199 |
| Provisional .....    | 62  |
| Half-time .....      | 32  |
| House-to-house ..... | 21  |
| Total .....          | 314 |

The district is well provided with schools, and it is not probable that many applications for further establishment will arise within the coming year. An Infant School at Ross Hill, near Inverell, and a Provisional School at Brushy Creek will be opened in the new year; but several Provisional and other small schools in which the attendance has for some time been below the required minimum, with little or no prospect of recovery, will in all likelihood be closed. There is thus more probability of diminution than of increase in the school roll for the coming year.

##### II.—Buildings, Accommodation, &c.

Ten new school buildings have been erected and furnished under the supervision of the several inspectors, at a cost of £953 9s. Five of these are in new localities, and 5 supersede old school-rooms. Through the same agency repairs to 48 school-houses and 6 teachers' residences have been effected, and one school house has been enlarged. The cost of these works was £386 1s. 8d.; so that the total expenditure arranged for by the inspectors reached £1,339 10s. 8d. This amount is more than £700 below the corresponding outlay for 1892, but the limited funds at the disposal of the Department necessitated the strictest economy, and many minor repairs and improvements that should have been carried out have had to stand over for the advent of better times.

Under the Architect to the Department, extensive additions and improvements, including the erection of a teacher's residence, have been effected at Bingera; substantial school premises have been provided for Guyra and Ross Hill; while less expensive ones have been erected to replace old structures at

at Tilbuster and Summer Vale. Repairs more or less important in character have also been carried out in connection with many schools; but here, as in the case of the expenditure under the Inspectors, only the most necessitous cases have received attention, and much still remains to be done.

With very few exceptions the schools of the district are provided with sufficient and suitable furniture, and the supply of books and minor apparatus is adequate. A more liberal grant of maps, diagrams, and picture cards is, however, desirable, and would serve to brighten the appearance of the school-rooms, and prove valuable aids in the teachers' work.

In the aggregate, the sitting accommodation provided in the schools of the district is well ahead of requirements. There are, however, a few instances in which, from increased attendance, such accommodation is inadequate—the most important being that of Armidale, where before long it will be necessary to erect a new wing or separate school-room. During the year an increase, roughly stated, of 500 seats has taken place, and, calculated at 8 square feet of floor space per child, the entire accommodation now reaches 18,137. At the rate of 100 cubic feet per child it is 16,599.

### III.—*Inspection, Condition of Schools, &c.*

No change has been made in the inspectorial staff during the year. One school, Acacia Creek, near the Queensland border, has been taken over from the Grafton district, and a small school, Mount Russell, has been transferred from the Tamworth to the Glen Innes section.

Three hundred and fourteen schools have been in operation during 1893, and all, except two small ones in the Tamworth section, have received full inspection. The total number of pupils present at examination was 10,577, or 138 more than in the previous year. But for the prevalence of measles in the later months when inspection work is usually most active, there would doubtless have been a much larger attendance; and it is reasonable to suppose also that the epidemic in some degree affected prejudicially the results of inspection.

The record of general efficiency as elicited at the regular inspections compares favourably with that of previous years, and indicates steady and satisfactory progress. Of the 312 schools examined, 280 (90 per cent.) either met or exceeded the requirements of the standard, and 32 (10 per cent.) failed to do so. The corresponding per-centages for 1892 were 86 and 14 respectively, and it is curious to note that for four consecutive years the non-efficient schools have lessened uniformly at the rate of 4 per cent.

The proficiency of the pupils in the various subjects of instruction is exhibited in the following table. In reading, writing, dictation, arithmetic, grammar, geography, history, Scripture, object lessons, drawing, and needlework, the results are about on a par with those of last year. A fairly substantial improvement has been made in drill, while in the remaining subjects some retrogression is perceptible. Taken as a whole, and making reasonable allowance for the interruption to the pupils' attendance occasioned by the epidemic sickness previously referred to, these results are as satisfactory as could be expected.

| Subjects.                         | Estimated Proficiency. |                |                                      |                              |
|-----------------------------------|------------------------|----------------|--------------------------------------|------------------------------|
|                                   | Total Number Examined. | Number Passed. | Per-centage up to or above Standard. | Relation to Results of 1892. |
| Reading—                          |                        |                |                                      |                              |

| Latin .....                       | 102                    | 75             | 74                                   | — 7                          |
| Trigonometry .....                | 14                     | 14             | 100                                  | None examined.               |
| Needlework .....                  | 3,616                  | 3,390          | 94                                   | + 1                          |
| Drill .....                       | 9,493                  | 7,612          | 80                                   | + 7                          |
| Natural Science .....             | 421                    | 421            | 100                                  | + 7                          |

In accordance with the provision contained in clause 35 of the Public Instruction Act of 1880 certificates have been awarded by the Inspectors—but during the latter half of the year only—to 326 pupils of the higher classes, whose attainments proved satisfactory in the tests prescribed. Definite information as to the effect produced upon the subsequent school attendance of the recipients is not available, but sufficient is known to justify the belief that, in many schools, the enrolment of 3rd and 4th classes will be more or less injuriously affected.

Cookery classes were established during the year in connection with the Superior Public Schools at Armidale and Glen Innes, and 60 of the senior girls at each centre attended the full course of instruction. The interest in the work, both on the part of instructress and pupils, was earnest and well sustained; and I understand that the results, as tested by the Directress of Cookery at the close of the term, proved fully satisfactory.

#### IV. Teaching Staff.

At the close of the year the teaching staff of the district comprised 279 principal teachers, 8 mistresses of departments, 37 assistants, 2 work-mistresses, and 64 pupil-teachers. Their distribution, according to classification, is shown in the following tables:—

|  | 1A. | 1B. | 2A. | 2B. | 3A. | 3B. | 3C. | Un-classified. | Total. |
|--|-----|-----|-----|-----|-----|-----|-----|----------------|--------|
| Teachers and Mistresses of departments ..... | ... | 7   | 33  | 11  | 63  | 31  | 25  | 117            | 287    |
| Assistant Teachers .....                     | ... | ... | 8   | 2   | 14  | 3   | 1   | 9              | 37     |
| Totals.....                                  | ... | 7   | 41  | 13  | 77  | 34  | 26  | 126            | 324    |

|                     | Class 1. | Class 2. | Class 3. | Class 4. | Pro-bationers. | Total. |
|---------------------|----------|----------|----------|----------|----------------|--------|
| Pupil-teachers..... | 10       | 13       | 16       | 20       | 5              | 64     |

Two teachers have been disrated and removed to smaller schools because of negligence and inefficiency, and about half a dozen others have been censured for minor offences. With these exceptions, the record has been a creditable one for the year; and all of the Inspectors speak in terms of commendation of the general body, both in respect of its personal and professional character, and as regards efficient and faithful discharge of duty.

J. D. BRADLEY,  
District Inspector.

#### ANNEX H.

##### INSPECTOR BLUMER'S REPORT.

At the close of 1892 there were 71 schools in operation in the Tamworth section of the Armidale District. Since then Mount Russell Public has been transferred to the Glen Innes section, and 6 schools closed (Orundumbi Public; Emu Creek, Haystack, Saddler's Flat Provisional; New Gunyerwarildi and Rockwall House-to-house.) During the year the following 10 new schools were opened:—Bereen, Boolooroo, Haning, Mungundi, Reedy Creek Provisionals; Cooringoora and Woodlawn Half-time; Borah, Molroy, and Rockmore House-to-house. Yarrowitch Provisional was converted into Public, and Upper Bingara Provisional and Oakey Creek House-to-house were made Half-time.

At present, therefore, the schools under my supervision number 74, viz., 47 Public, 16 Provisional, 6 Half-time, 5 House-to-house.

Applications for establishment of schools were received and dealt with as follows:—

| Place.                         | Kind of School applied for. | Result of Application.                           |
|--------------------------------|-----------------------------|--|
| Arkstone (Walcha) .....        | Provisional .....           | Refused.   |
| Bobby Whitlow Ck. (Bingara)... | „ .....                     | House-to-House granted with Molroy.              |
| Cooringoora (Bingara) .....    | „ .....                     | Half-time granted with Upper Bingara.            |
| Ingalba (Walcha) .....         | „ .....                     | Refused.   |
| Kingstown .....                | „ .....                     | Refused.   |
| Molroy (Bingara) .....         | „ .....                     | House-to-House granted with Bobby Whitlow Creek. |
| Moor Creek, Upper (Tamworth)   | „ .....                     | Granted conditionally.                           |
| Mundowey (Manilla) .....       | „ .....                     | Granted.   |
| Tulloona (Wariálda) .....      | „ .....                     | Granted conditionally.                           |
| Baldersleigh (Armidale) .....  | House-to-House ...          | Refused.   |

As already stated, three of these are now in operation. Mundowey Provisional will open immediately after the vacation, and Upper Moor Creek later in the year. Tulloona is not likely to come into existence.

The district is well provided with schools, and it is not expected that many applications will be received during the ensuing twelve months.

During the past year, 4 small schoolrooms were erected, 1 building enlarged, 13 schoolrooms and 2 residences repaired by the Inspector at a total cost of £369 11s. 4d. A new residence was erected at Bingara, a new schoolroom at Summer Vale, and extensive additions to the school buildings at Bingara and Moree, completed by the Architect at a cost of £2,763 18s. 6d. Minor repairs, involving an outlay of £125 6s., were also effected by the Architect.

By erection of new buildings, additions to existing ones, and reopening old ones closed in former years, extra accommodation was provided for 680 pupils, allowing each 8 square feet, and for 634, allowing each 100 cubic feet. Computed on the same bases, 305 or 221 places were lost by closing, &c., of schools. There has, therefore, been a net increase in accommodation of 375 or 413 places. At the present time, space is provided for 4,829 children, allowing each 8 square feet, and for 4,551, allowing each 100 cubic feet. This is more than ample for the total number of pupils enrolled.

Eighty schools were open during the whole or some portion of the year—78 were fully inspected, and 9 received a second or Ordinary Inspection. Orundumbi Public and Mungundi Provisional were not inspected. The former was closed early in the year before a visit could be paid. The latter is nearly 250 miles from Tamworth and did not open until late in October; consequently it was not deemed advisable to make a special and costly journey to examine about a dozen children who had been under instruction only a few weeks. Reedy Creek Provisional, recently established near Inverell, was, by direction of the Chief Inspector, examined by Mr. Inspector Beavis.

Incidental

Incidental visits were made as opportunities offered.

Generally the schoolrooms are conveniently situated, afford adequate accommodation, and are suitably furnished. Nearly all are in fair condition, but, in numerous instances, expenditure for repairs cannot be long delayed.

School gardens, hedges, and tree-planting receive increased attention. In connection with these matters, the teachers at Walcha and Nemingha deserve special mention.

Were the supply of maps and diagrams not so limited, little fault could be found with the stock of educational appliances. As a rule, the records are correctly and neatly kept, and care and skill are exercised in the construction of the prescribed lesson guides.

The formation of an athletic association in connection with schools in the vicinity of Tamworth can scarcely fail to augment the sympathy between the respective teachers and pupils.

As in former years, the disciplinary condition of the schools is very pleasing. It is difficult, however, to always secure punctuality of attendance in rural localities, as the children are often detained to assist with dairy work.

Cadet corps still exist at Tamworth Superior and West Tamworth, but with diminished numbers. The decrease in strength is no doubt due to the suspension of rifle shooting for about nine months. A recent issue of Braendlin carbines and ammunition has done much to revive the boys' interest in the corps.

As regards general efficiency, 90 per cent. of the schools inspected satisfied the standard. This is an increase of 4 per cent. on last year's results. Manilla Public, Tamworth Superior Infants', Walcha Public, and Rywung Public occupy, in the order given, the most prominent places in point of merit.

The proficiency in the various subjects of instruction, as compared with the results for 1892, is shown hereunder:—

| Subjects.                         | Percentage of pupils up to or above standard. |       | Increase (+) or decrease (—) during 1893. | Subjects.             | Percentage of pupils up to or above standard. |       | Increase (+) or decrease (—) during 1893. |
|-----------------------------------|---|-------|---|-----------------------|---|-------|---|
|                                   | 1892.   | 1893. |   |                       | 1892.   | 1893. |   |
| Reading .....                     | 88  | 88    | =   | Drawing .....         | 85  | 84    | — 1                                       |
| Writing .....                     | 90  | 90    | =   | Music .....           | 77  | 64    | — 13                                      |
| Arithmetic .....                  | 79  | 75    | — 4                                       | Latin .....           | 83  | 69    | — 14                                      |
| Grammar .....                     | 87  | 84    | — 3                                       | French .....          | 83  | 64    | — 19                                      |
| Geography .....                   | 95  | 89    | — 6                                       | Euclid .....          | 87  | 84    | — 3                                       |
| History, English .....            | 83  | 73    | — 10                                      | Algebra .....         | 87  | 73    | — 14                                      |
| „ Australian .....                | 91  | 82    | — 9                                       | Mensuration .....     | 79  | 41    | — 38                                      |
| Scripture and Moral Lessons ..... | 96  | 90    | — 6                                       | Natural Science ..... | 84  | 100   | + 16                                      |
| Object Lessons .....              | 88  | 86    | — 2                                       | Needlework .....      | 95  | 92    | — 3                                       |
|                                   |   |       |   | Drill .....           | 86  | 66    | — 20                                      |

A slight falling off is noticed in connection with some of the subjects of secondary importance, but the results in the more important subjects are quite as satisfactory as in former years.

Every school has its full staff of teachers. One teacher was disgraced and removed to a smaller school on account of inattention to duty; but, with this single exception, no serious cause of complaint arose. As a body, the teachers are earnest, efficient, and deservedly respected by parents and pupils.

#### Summary.

The schools are well distributed throughout the district and fully meet present educational requirements.

Teachers continue to discharge their duties faithfully and efficiently and to merit public confidence and respect.

Tamworth, 27th December, 1893.

L. BLUMER,  
Inspector.

#### ANNEX I.

##### INSPECTOR BEAVIS' REPORT.

EIGHTY-EIGHT (88) schools remained effective at the end of 1892; these, with Trevaylor (Big Ben) Provisional—a new school—the Oban Provisional School re-opened, and the Acacia Creek Public School transferred from the Lismore Section, were in operation under my supervision during the March quarter of the current year. Subsequently two new Provisional Schools—Vivier and Sinclair—were established; Torrington, which had been closed for 6 months, was revived as a Provisional School; and the Mt. Russell Public School was transferred from the Tamworth Section.

Five Schools, including Torrington, have undergone change of status during the year: Wellingrove Provisional has been converted to Public, and New Valley Provisional and Tenterden Public have, on account of reduced attendances, been combined as Half-time Schools. Tenterfield has been ranked as a Superior Public School.

The 95 schools which have been in operation for the whole or a portion of the year embrace—

66 Public  
23 Provisional  
4 Half-time  
2 House to House

Only one school, Swan Peak Provisional, has been permanently closed, although the prospects of a few others make their continuance doubtful. However, any reduction in the number of schools consequent upon diminished attendance, is likely to be more than compensated by the opening of new schools. The Ross Hill (Inverell) Infant School is to be opened in January, likewise a small Provisional School at Brushy Creek, near Guyra.

Notwithstanding the necessarily restricted expenditure which has marked the year, two new schoolrooms have been erected to replace old ones, and several other buildings have been rendered more suitable or more comfortable by the effecting of minor improvements. The accommodation in the schools is ample; while 5000 places are available, the gross enrolment of pupils is only 4000 and the average attendance 3000.

Every school has been fully inspected, and 5 ordinary inspections were made. Of 95 schools in operation, 73 were, in general efficiency above the standard, 11 up to standard, and 11 below it. The schools which were satisfactory represent 83 per cent. of the whole—5 per cent. increase on last year's record.

3,310 pupils (113 more than in 1892) were examined; the subjoined table shows the estimated proficiency of the pupils in comparison with the results for last year:—

| Subjects.                  | Percentage up to or above standard. |       | Increase or decrease per cent. | Subjects.             | Percentage up to or above standard. |       | Increase or decrease per cent. |
|----------------------------|-------------------------------------|-------|--------------------------------|-----------------------|-------------------------------------|-------|--------------------------------|
|                            | 1892.                               | 1893. |                                |                       | 1892.                               | 1893. |                                |

| Geography .....            | 75                                  | 79    | + 4                            | Latin .....           | 79                                  | 65    | — 14                           |
| History (English) .....    | 75                                  | 82    | + 7                            | Trigonometry .....    | ...                                 | 100   | +100                           |
| History (Australian) ..... | 79                                  | 77    | — 2                            | Needlework .....      | 87                                  | 90    | + 3                            |
| Scripture .....            | 85                                  | 82    | — 3                            | Drill .....           | 78                                  | 78    | =                              |
| Object lessons .....       | 85                                  | 89    | + 4                            | Natural Science ..... | 100                                 | 100   | =                              |
| Drawing .....              | 77                                  | 83    | + 6                            |                       |                                     |       |                                |

Sixty-seven fifth-class pupils were examined as compared with 40 examined last year; this fact will account for the lower percentages of passes in most of the higher subjects.

Cookery classes were established in August at the Glen Innes Public School, under the superintendence of Miss Lance, and were continued to December. Sixty girls from the town school and from small neighbouring schools were regularly under instruction, and displayed a keen interest in the lessons. The classes for adults were not numerously attended, but the instruction was evidently prized.

Good organisation and discipline continue to be characteristic features of the schools; while there is much diversity of merit in these particulars, a disorderly school is a rarity.

The teachers as a body are studious, persevering, and deservedly respected; by securing public confidence and rendering their schools attractive, they are the most effective agents in minimising cases of default under the compulsory clauses of the Public Instruction Act.

The police, since their services were enlisted to secure school attendance, have been very active, and seem to be in sympathy with the work required of them; their intervention is likely to be beneficial. Still it is every day patent that careless or selfish parents evade with impunity the duty of educating their children as the State demands, and no vigilance of teachers or police will avail till the compulsory clauses of the Act have been amended in some essential points.

#### Summary.

The number of schools in the section increases with requirements; the accommodation is ample; the material condition and general efficiency are satisfactorily maintained.

The teachers perform their duties with a success that commands public favour, and their personal character inspires confidence.

W. BEAVIS,  
Inspector.

Glen Innes, 30th December, 1893.

#### ANNEX J.

##### INSPECTOR PARKINSON'S REPORT.

THERE were 80 schools in operation in this section of the Armidale District at the close of 1892. The Half-time Schools at Gunnenbene and Keepit did not reopen after the Christmas vacation, but in January a House-to-house School was established at North Lynne, near Pilliga. This was the only new school established during the year, so that the total number of schools at work in 1893 was 79. Of these the House-to-house School at Apple Tree Clump was closed in June. Applications for schools at the Barry, Camborah Springs, Eulah Creek, and Kercargo were declined. The Half-time Schools at North and South Bective, as well as those at Blackville and St. Helena, have become Full-time Schools, while the Public School at Harparary is now one teaching station of a House-to-house School. Thus of the 78 schools in operation at the end of the year, 48 are Public, 13 are Provisional, 6 are Half-time, and 11 are House-to-house.

At the close of 1892 the buildings in this section provided floor space for 4,746 pupils, and air space for 4,148 pupils. By closing the Half-time Schools at Gunnenbene and Keepit, and by giving up an old building at Collarendabri, floor space for 177 pupils, or air space for 133 pupils was lost; while the opening of a new building at Collarendabri, and the leasing of a room at North Lynne, provided floor space for 99 pupils, or air space for 79 pupils. The buildings now provide floor space for 4,668 pupils, or air space for 4,094 pupils. As the highest enrolment for any period of the year has been 3,579, it is apparent that ample accommodation is available. On the whole the school-rooms and teachers' residences are in fair repair, but many of them need painting, and at one or two centres new buildings are urgently required. Little money has been spent on improvements during the last twelve months, and if the present restrictions on outlay be continued much longer, heavy expenditure will be necessary eventually to keep the structures in habitable condition.

All the schools in operation during the year received a regular inspection. Of the 79 examined 7 were below standard, 4 were up to standard, and 68 were above standard. Thus 91 per cent. of the schools were either up to or above standard requirements. This is an improvement of 2 per cent. on the year 1892. As already stated, 7 schools failed to obtain 50 per cent. of marks, 33 others obtained between 50 and 60 per cent., 30 obtained between 60 and 70 per cent., and 9 obtained upwards of 70 per cent. The most efficient schools were Nundle and Gunnedah Superior, each of which reached nearly 80 per cent. The schools ranking next to these in efficiency were Narrabri Superior Boys', Quirindi Superior, Narrabri West, Bando, Boggabri, Currabubula, and Werris Creek. It is pleasing to note that this list includes nearly all the large schools under my supervision, so that the majority of the children in this section are under the wholesome influence of the best teaching and the most capable management.

The number of pupils examined ranged from 2,500 in reading to 21 in latin, and the percentages of passes in the different subjects varied from 100 in natural science to 66 in latin. The subject last named is the only one in which the percentage of passes showed a marked decrease. Grammar, euclid, and algebra secured slightly lower averages than last year. But in the majority of the subjects (including reading, writing, dictation and arithmetic) the percentages of passes were higher in 1893 than in 1892, and as the main object of Public Schools is to give a sound primary education, these results must show that the schools are conducted on proper lines, and are doing satisfactory work. 169 fewer pupils were examined this year than last. This decrease is entirely owing to an epidemic of measles, which literally emptied the schools during the last quarter of the year.

Little fault has been found with the conduct of any of the teachers during the year. No teacher has been reported for misconduct by the residents of any locality, and it has been necessary to censure only four for negligence and inefficiency. A number of teachers continue to show a laudable ambition to

to raise their classifications and improve their positions in the service: many sought promotion at the examination held in June. All the pupil-teachers continue to render useful and ready service, and only one failed at the examination held in December, 1892. The conduct of all is reported as highly satisfactory.

In conclusion, I have to repeat that during the year 1893 the schools have increased in efficiency, that the conduct of the teachers has been exemplary, and that the work of education is being carried on with success.

H. PARKINSON,  
Inspector.

Quirindi, 28th December, 1893.

#### ANNEX K.

##### DISTRICT INSPECTOR MCCREDIE'S REPORT.

THE year opened with 256 schools and departments on my general list, and closed with 248, the reduction having been caused by the closing of several small schools in the Lithgow and Forbes sections of the district, and the conversion of 8 Half-time and 1 Public Schools into House-to-house Schools.

Many applications for the establishment of new schools were received, and with the exception of 1, for a Provisional school at Huntley in the Central section, all were confined to the Eastern and Western divisions of the district, principally to the latter. In each instance, however, the application had to be declined, sometimes on account of the nearness of existing schools, but more frequently because there was not a sufficient number of children between 6 and 14 years of age in the neighbourhood of the site chosen, to maintain the minimum average attendance for a Provisional or a Half-time School.

Three small school buildings, 2 of them to replace old structures, were erected under the supervision of the Inspectors, at a total cost of £122; and the same officers also attended to the repairing of 55 school-rooms and 12 teachers' residences, at an outlay of about £423. Substantial and commodious class-rooms were added to the Superior Public Schools at Eskbank and Katoomba. Except that many of the buildings are in need of painting, their material condition is fairly satisfactory.

There were 254 schools and departments in operation during the year or a portion of it, and all were regularly inspected, except Genanaguy Provisional, which lapsed through small attendance before the Inspector was able to visit the locality. Three schools received a second regular, and 41 others an ordinary inspection. There were therefore in all 297 inspections, regular and ordinary, in the year.

Ninety-six per cent., or 243 of the schools regularly inspected, satisfied or exceeded the standard for general efficiency. This is an increase of 1 per cent. upon the results of the previous year.

The number of children examined at the regular inspections was 9,559, being 114 less than in 1892. The decrease was due chiefly to epidemics of measles, diphtheria, and influenza for several months, necessitating in some instances the closing of schools for a short time.

The statistics of the proficiency of the pupils examined show an advance in the percentages of passes in reading, writing, arithmetic, grammar, geography, history, scripture, object lessons, drawing, singing, mensuration, and drill, and a slight falling off in other subjects.

In September last, several of the larger schools sent up candidates for the Junior University Examination, the most successful being Bathurst Superior Public, from which there were 11 candidates, 10 of whom succeeded in securing creditable passes in 4 or more subjects, the unsuccessful candidate failing in one subject only.

Since the beginning of the year, there has been a gradual decline in the number of cadets in the district. The total enrolment for each school quarter was as follows:—March, 318; June, 312; September, 271; December, 268. All teachers of schools having Cadet Corps are doing their best to keep up a good enrolment, the main difficulty experienced being that of inducing parents to incur the expense of purchasing the necessary uniform. In December last, the Orange Superior Public School Cadets once more succeeded in winning the Challenge Shield at the Annual Competition in Sydney, the last victory being the fourth in succession for that school.

The organisation in all important points is of a satisfactory character, no serious defect under this head having been observed in any school. The disciplinary condition of the schools is also satisfactory, and the government generally speaking is genial, firm, and effective.

At the close of the year there were 327 teachers of all ranks employed in the State Schools of the district. Of this number, 71 are pupil-teachers, 28 assistant-teachers, 9 mistresses of departments, 3 work mistresses, and the remaining 216 principal teachers in charge of Full-time or Half-time schools. With one or two exceptions, all have done good honest work, and have given no occasion for fault-finding in regard either to the discharge of their official duties, or to their conduct in private life.

When the year's work commenced, there was accommodation provided in all schools for 15,740 pupils, allowing each 8 square feet of floor space, and for 15,640 pupils, allowing each 100 cubic feet of air space. Changes during the year, caused by the closing of schools, the erection of new buildings, and the additions of large class-rooms to the Superior Public Schools at Eskbank and Katoomba, slightly affected these numbers, which now stand as under:—

|                                   |               |
|-----------------------------------|---------------|
| 8 square feet of floor space..... | 16,072 seats. |
| 100 cubic feet of air space ..... | 15,952 do.    |

The actual enrolment of pupils in all schools for the year was 14,381 and the average attendance 9,077·2. The highest quarterly enrolment and average attendance was in March quarter, when the numbers were 13,378 and 9337·1 respectively. No school in the district is overcrowded, and in many there is ample room for more pupils.

The educational requirements of the district are well met by existing schools, and a continuance of the good work done by teachers and pupils during the past year may be confidently expected in the year now entered upon.

Bathurst, 8th January, 1894.

J. MCCREDIE,  
District Inspector.

#### ANNEX L.

##### INSPECTOR KEVIN'S REPORT.

I BEGAN this year's work with 103 schools on my roll, viz.:—

|                   |    |
|-------------------|----|
| Public .....      | 64 |
| Provisional ..... | 10 |
| Half-time .....   | 24 |
| House .....       | 5  |

—  
103

This number has been reduced by the closing of Good Forest Half-time and the conversion of Limekilns Public and Dullaberry and Wheatfield Half-time into one school—House-to-House—so that the year closes with 100 schools of all grades under my supervision. It is likely to be increased, however, by the opening of two or three new schools. Other unimportant changes took place, but chiefly in name. Applications for schools were declined at New Vale (Evening), Daisybank (Provisional), Boggy Flat (House-to-house), Woodlands (Provisional), and Leura (Provisional). Two applications for small schools are under consideration. Vulcan Half-time was closed, but to compensate this Charley's Hill was opened instead. The Provisional School at Antonio Creek was converted into a Public. Beyond these trifling changes matters remain almost as they were at the end of last year.

*Buildings.*

*Buildings.*

New school buildings were erected under my own supervision at Brownlea and Porter's Retreat costing £107 3s., while new class rooms (2) have been added to the Superior Public School, Esk Bank, and Katoomba (2) under the supervision of the Architect.

No additions were made.

A large number of schools and residences, &c., have been repaired in various ways under my own directions at a cost of £164 5s. 11d.

The schools and appurtenances are in an average condition of very fair.

*Organisation.*

The organisation generally is satisfactory. The school accommodation is more than adequate: the buildings are well-lighted and well-ventilated, and, on the whole of pleasing aspect. The supply of materials is sufficient, and in very fair condition. The lesson guides and records are generally compiled with care, and not a few with excellent taste. There are some time-tables that almost rank as works of Art, while others are slovenly in the extreme.

*Discipline.*

The discipline continues healthy. The pupils as a body are regular and punctual, fairly neat and clean, and well behaved.

Corporal punishment is not often resorted to in most schools, and then not excessively.

Drill is not well taught in the majority of schools: in summer it is too hot, and in winter too cold. Such is the excuse often made to me. I can understand the former to some extent, but the latter not at all, except when it snows or rains.

*Inspection.*

All schools under my supervision for the year received a regular inspection—two (2) received a second regular inspection, and fourteen (14) went through an ordinary inspection,—while a large number of incidental visits were paid as opportunity offered. The results of inspection have been on the whole very satisfactory, and quite up to last year's work.

*Instruction.*

The work of instruction has been carried on earnestly and skilfully during the year, many of the schools showing highly creditable results, and the majority being many degrees above the standard. All the prescribed subjects, except music in a very few small schools, have been taught with varying skill and success. During the year about forty (40) school libraries have been established in the principal schools, representing some 4,000 volumes of useful, interesting, and instructive reading for the young people at home. The movement is very popular with all, parents, teachers, and pupils, and I hope the last-named will be the better for it, both morally and intellectually.

The teachers in this section of the District are a steady and worthy body of people, and with but few exceptions command the respect and in many cases the esteem of the community where they are located. A few have been very studious and persevering, and have as a consequence been justly rewarded by promotion. The pupil-teachers have worked well in their respective schools during the year, but I doubt if their own work has been quite so satisfactory. All due for promotion were examined as usual in the first week of the vacation.

*Summary.*

To sum up,—

- (a) The means of education are more than sufficient and are well distributed.
- (b) The organisation and discipline are satisfactory as a whole.
- (c) The instruction covers the prescribed course and is carried on with earnestness and skill.

In view of these facts I consider the outlook of 1894 very hopeful.

The usual statistical information has been forwarded.

J. KEVIN,  
Inspector.

Inspector's Office, Lithgow, 2nd January, 1893.

## ANNEX M.

## INSPECTOR THOMAS'S REPORT.

*I.—The adequacy of the means of education as regards amount and distribution.**a. Schools already established.*

I COMMENCED the year with 84 schools on my list, viz.:—

|                      |    |
|----------------------|----|
| Public .....         | 46 |
| Provisional .....    | 12 |
| Half-time .....      | 18 |
| House-to-house ..... | 8  |

These numbers include two new schools—Wangan Vale Provisional and Byong House-to-house—which opened immediately after the Christmas vacation.

During the year Genanaguy Provisional, Cave Creek Half-time, and Blow Clear House-to-house were closed through diminished attendance, and my numbers were further curtailed by the conversion of 6 Half-time schools into 3 House-to-house schools. Three Provisional schools, 2 Public, and 1 House-to-house were formed into three pairs of Half-time schools.

On the other hand, I gained one school by the change of Derriwang House-to-house into two Half-time schools, and another by the transference of German's Hill Half-time from the Bathurst section to that under my supervision.

The result of these interchanges is that I close the year with 80 schools in operation, viz.:—

|                      |    |
|----------------------|----|
| Public .....         | 44 |
| Provisional .....    | 8  |
| Half-time .....      | 20 |
| House-to-house ..... | 8  |

*b. Applications for New Schools.*

The year has been fruitful in applications for the establishment of new schools, but in no case has the application been successful. The list is as follows:—

|                           |   |  |
|---------------------------|---|--|
| Cardungle .....           | For House-to-house school .....                     | Declined.  |
| Edinborough .....         | For Provisional .....                               | Abandoned.   |
| Bucobra .....             | For reconsideration of application refused in 1892. |  |
| Tom's Lagoon .....        | For Provisional School .....                        | Declined.  |
| Murrin Bridge .....       | For Provisional School .....                        | School at House-to-house rates offered but not accepted. |
| Carrawobbity .....        | For re-opening as Provisional .....                 | Declined.  |
| Kamandra .....            | For Public or Provisional school .....              | Declined.  |
| Mount Allen .....         | For Public school .....                             | Declined for present.                                    |
| Tinda Tank .....          | For Provisional school .....                        | Declined.  |
| Sandy Creek Battery ..... | For Provisional school .....                        | Declined.  |

Fresh

Fresh applications from Cardungle and Mount Allen are under consideration, and applications from Elswick (near Condobolin), Oakendale (near Parkes), and Fiefield (Burra Burra Rush) are on the way to me.

When these have been dealt with no portion of my district having claims for consideration will be, as far as I know, without the means of education provided under the Public Instruction Act.

### II.—*The Actual Condition of the Schools as elicited by Inspection.*

Allowing for interchanges between Half-time and House-to-house Schools, there were 83 schools in operation during some part of 1893. All of these received a full inspection, with the exception of Genanaguy Provisional, which was closed before I could get to it. 14 schools received an ordinary inspection, and incidental visits were made where circumstances permitted.

Of the 82 schools that received a full inspection, 74 were above, 2 up to, and 6 below standard. The percentage of schools satisfying the standard was 92, a result exactly similar to that of last year, when out of 85 schools 78 satisfied requirements.

#### (a.) *Organisation.*

So far as the teachers themselves are responsible, the organisation of the schools is on the whole satisfactory. With few exceptions, returns are furnished with promptness and accuracy. The instruction is regulated by suitable programmes and time-tables; and the general arrangement of the rooms is neat and tasteful.

The general condition of the buildings and premises, while favourable in most cases, will in several instances call for considerable outlay during the coming year. Repairs and improvements have, during the past two years, been limited to cases of urgent necessity, but general wear and tear is rendering several buildings unsightly and uncomfortable, and their repair cannot much longer be postponed.

#### (b.) *Discipline.*

The regularity of pupils has been very much broken by visitations of measles and diphtheria. These epidemics have been especially prevalent in the immediate valley of the Lachlan; Forbes, Goolagong, Eugowra, Lake Cudgellico, and Euabalong, suffering more or less severely.

The pupils are, as a rule, neat and respectable in appearance and respectful in demeanour. Cheerful and willing obedience is rendered, and commendable attention is given under instruction. It would be well if the same high standard of discipline were maintained in every home. Unfortunately, this is not the case, and hence the teacher's efforts are often neutralised, while the charge of contributing to the spread of the prevalent larrikinism is unfairly laid upon our school system.

#### (c.) *Instruction.*

2,493 pupils were examined at the regular inspections, as against 2,463 in 1892.

Taking the more important subjects of the school course—

|                         |                    |
|-------------------------|--------------------|
| 2,127, or 85 per cent., | passed in Reading, |
| 2,184, or 89 per cent., | Writing,           |
| 1,819, or 78 per cent., | Arithmetic,        |
| 712, or 81 per cent.,   | Grammar,           |
| 688, or 76 per cent.,   | Geography,         |
| 600, or 69 per cent.,   | History.           |

On the whole, the results are so close to those of 1892 that a tabulated comparison is unnecessary. The balance, a very small one, is in favour of the current year.

Since 1st July, 1893, certificates of being educated up to the requirements of the Act have been issued to those passing the necessary test. 108 such certificates were issued.

#### (d.) *Teaching Staff.*

The preponderance of qualified over unqualified Teachers continues to increase, and many of the latter, even, are ex-Pupil Teachers. Of 74 adult Teachers under my charge, only 20 are without certificates, and of these 20, 8 are ex-Pupil Teachers.

The usual examinations were held in June and December. With one exception, all the Pupil Teachers in the district obtained promotion during the year.

The Teachers under my supervision have worked zealously and with gratifying success during the year, and in most cases they possess the esteem and confidence of parents.

### III.—*Accommodati n.*

Taking the basis of eight square feet to each pupil, accommodation is provided for 4,853 pupils. Upon the slightly more liberal basis of 100 cubic feet per child, there is room for 4,599 pupils. These figures show a gain respectively of 31 and 22 upon the figures of 1892.

The highest quarterly enrolment was 3,465, so that a wide margin exists between the accommodation provided and that actually required.

In Form D of my statistics the details of the gains and losses in sitting room are fully shown.

#### *Summary.*

|   |                |
|---|----------------|
| Number of schools in operation during 1893..... | 83             |
| Enrolment during December quarter .....         | 3,393          |
| Average attendance, December quarter .....      | 2,391.7        |
| Total fees for 1893.....                        | £1,334 7s. 3d. |
| Outstanding arrears of fees .....               | £39 8s. 9d.    |
| Number of free pupils, December quarter.....    | 142            |
| Number of schools fully inspected .....         | 82             |
| Percentage satisfying standard .....            | 92 per cent    |
| Number of pupils examined .....                 | 2,493          |
| Accommodation provided for .....                | 4,853          |

The educational requirements of the district are very fairly met.

W. GEO. THOMAS,  
Inspector.

Forbes, 29th December, 1893.

### ANNEX N.

#### DISTRICT INSPECTOR JOHNSON'S REPORT.

THERE were 66 schools in this section of the Bowral District at the end of 1892, and of these 2 were permanently closed on account of the attendance having fallen below the required number, and those at Luddeoham, Werombi, and Silverdale, were transferred to the Parramatta Section of the Sub-Metropolitan District. Eleven Schools previously under the supervision of the Inspector stationed at Crookwell were added to my list, and an Infants' Department was opened in connection with the Public School at Bowral. I have, therefore, at present, 74 schools under my supervision, viz., 51 Public; 13 Provisional; 8 Half-time; and 2 House-to-house Schools.

New school buildings were erected at Spaniard's Hill and Balmoral, the old ones having become dilapidated and otherwise unsuitable. The school-room at Exeter was enlarged to meet the growing requirements of that place, and a class-room was added to the school-room at Camden, and the buildings were put in thorough repair. A Girls' school-room is in course of erection at Bowral, and a Teacher's residence at Bringelly. Eleven other buildings were repaired and improved.

The

The school rooms of this section now provide seats for 4,476 pupils, and as the highest quarterly enrolment for the year was only 4,049, the accommodation is fully up to present requirements.

All the schools on my list except the small one at the Aborigines Camp in Burrarorang, were inspected during the year. This school was closed at the time of my visit to Burrarorang on account of the illness of the teacher, and it is not of sufficient importance to warrant the expense which a special visit to the locality would entail.

The attainments of the pupils in reading, dictation, English history, object lesson, and Euclid, showed considerable improvement on those of last year, but the results in arithmetic were not so satisfactory.

Of the 75 schools inspected, 70 exceeded the standard, 4 reached it, and 1 failed to reach it. This last is now under different management and gives promise of more satisfactory results at next inspection.

The enrolment and average attendance were much lower during September and December quarters than in the earlier part of the year. This falling-off was caused by the prevalence of measles among children generally, some schools having been entirely deserted for a time through this cause.

There are 3 teachers of the first class, 16 of the second, 41 of the third, and 18 unclassified employed in the schools of this section. The unclassified teachers are mostly ex-pupil-teachers who have not yet had charge of schools a sufficient time to warrant their examination for classification.

There are also 23 pupil-teachers, 6 of whom are in Class I, 4 in Class II, 10 in Class III, and 3 in Class IV.

The educational requirements of this part of the Colony are fully met by existing schools, and the buildings are in good condition.

The general efficiency of the schools is satisfactory and I have every reason to hope that equally good work will be done during the year now entered upon.

Reports on the other sections of the district forwarded by Messrs. Smith and McLElland are appended hereto.

Bowral, 8th January, 1894.

W. H. JOHNSON,  
District Inspector.

#### ANNEX O.

##### INSPECTOR McLELLAND'S REPORT.

As I did not take charge of this district till 1st August, my report is based chiefly upon information left in this office by my predecessor. At the end of last year there were 84 schools open in the Nowra section, classified thus: Public 75, Provisional 1, Half-time 8, Total 84. At the beginning of this year, a new Infants' Department was established at Nowra. Later on Mimosa Park Public was reopened, and a Provisional School was opened at Little Forest, near Milton. During the year Tanner's Creek (Public) New Bristol and Ccrindah (Half-time) were closed. Cozarong Public temporarily closed in July was reopened in October. Thus there are at the end of the year still 84 schools in operation viz. :—

|                  |    |
|------------------|----|
| Public.....      | 74 |
| Provisional..... | 2  |
| Half-time .....  | 8  |
| Total.....       | 84 |

Only two applications for the establishment of new schools were received. One of these (Cudmirrah) was declined, the other (Bawley Point) was granted subject to the erection of suitable buildings by the residents—a condition they have not yet fulfilled. The district is fully supplied with schools, nearly all of which are in good repair. The sum of £153 3s. 11d. has been expended under the Inspector's supervision, in general repairs and improvements to 19 schools. Minor works in connection with 6 other schools are in progress, and involve a further outlay of £2 71s. 5d. Under the Architect's direction important additions have been made to the buildings at Kiama, Nowra, and Ulladulla, and new premises have been erected at Albion Park, Bomaderry, and Greenwell Point.

Individually the schools provide ample accommodation for the pupils attending. Floor space is now available for 7,179, and air space for 6,329 children. These numbers are far in excess of the highest total enrolment during any portion of the year.

Of the 87 schools in existence during some portion of 1893 all received a Regular and 11 an Ordinary Inspection. Eighty-one schools reached or exceeded the prescribed Standard (tolerable), but this result though satisfactory from one point of view is perhaps misleading. It is not the case that all schools obtaining tolerable for general efficiency are in a satisfactory condition. Teachers are expected to achieve a degree of success proportionate to the qualifications implied in the classifications they hold, and in this respect some teachers in the Nowra section have acquitted themselves poorly. In all, about 60 schools have passed a creditable examination, and of these the following deserve special mention for their high state of efficiency :—

|                    |                         |
|--------------------|-------------------------|
| Nowra Primary..... | Mr. E. Wilson.          |
| Kiama Primary..... | Mr. D. Richardson.      |
| Kiama Infants..... | Miss. Wignell.          |
| Robertson .....    | Mr. H. Dennis, removed. |
| Shellharbour.....  | Mr. Myers, removed.     |
| Fall's Creek.....  | Mr. W. Gibbons.         |

As the regulations regarding the issue of exemption certificates only came into force in July, no schools inspected during the first half-year were represented at these examinations. Of 201 pupils examined 86 passed the necessary test, nearly all the failures being due to bad Arithmetic. The Reading, Writing, and Spelling were generally good.

Speaking generally the work of primary education in this portion of the Colony is being attended with satisfactory results and the prospects for the coming year are favourable.

Nowra, 27th December, 1893.

H. D. McLELLAND,  
Inspector.

#### ANNEX P.

##### INSPECTOR SMITH'S REPORT.

I LEFT Dubbo on the 3rd and arrived in Crookwell on the 5th of February. A list of those schools which had been placed under my supervision was forwarded to me in January last from headquarters and contained—

|                          |                   |
|--------------------------|-------------------|
| Public Schools.....      | 31                |
| Provisional Schools..... | 11                |
| Half-time Schools.....   | 14                |
| House Schools .....      | 5 or 12 stations. |
| Total.....               | 61                |

Fassifern Provisional School on that list has not been in operation this year, and Taylor's Flat Provisional was not opened until August, and then only as a House School in conjunction with Phil's Creek. Two other Provisional Schools, however, were opened, Big Meadow and Red Hill, at the commencement of the year, which made the total number of schools precisely the same.

The

The following changes in this section of the Bowral District with regard to certain schools have been carried out:—Kentgrove Public was made a Half-time with Curran's Creek Half-time School, and Five-mile Tree Half-time a House School with Burwood Station. Fullerton Provisional School was raised to the grade of a Public School. Gurrundah and Windualla Public Schools were permanently closed. The Half-time School at Merrill Creek and the Half-time at Yorkborough were removed to more central and suitable localities, namely, Benbengene and Richlands. Two applications for Provisional Schools were declined on the grounds that the residents could not comply with the requirements of the Act.

My list of schools, therefore, at the end of 1893 comprises—

|                          |                   |
|--------------------------|-------------------|
| Public Schools.....      | 29                |
| Provisional Schools..... | 10                |
| Half-time Schools .....  | 14                |
| House Schools.....       | 7 or 15 stations. |
| Total.....               | 60                |

The material condition of the schools may be regarded as very fair, and the accommodation sufficient for the average number of children in attendance. The buildings in use at the end of 1892 contained accommodation for 3,160 pupils, reckoning 8 square feet for each child. During the year 60 places were lost by the closing of 2 Public Schools, Gurrundah and Windualla, and 60 places were gained by the opening of 3 new schools and the erection of 1 more commodious school building, so that the total number at the end of 1893 corresponds exactly with that at the end of 1892. The largest enrolment for any quarter of the year was 1,714, and the highest average daily attendance 1,178.8. It will thus appear that the accommodation provided is, in the aggregate, in excess of actual requirements. The new Provisional School erected was at Brewer's Flat, and the new House School opened at Phil's Creek on the Fish River. A new residence has been built for the teacher at Kentgrove. Some small sums of money were spent on repairs at Frogmoor, Kialla, and Third Creek.

All the 62 schools in operation during the whole or portion of 1893, received one regular inspection, and one Public School, Gullen Flat, received two regular inspections. Two teaching stations in remote localities where the children could not assemble at places of inspection were also examined, so that the total number of inspections made during the year was 65.

The following table serves to show the estimated efficiency of the schools with regard to standard, inclusive of attainments, organisation, and discipline:—

|   | Below Standard. | Up to Standard. | Above Standard. | Totals. |
|---|-----------------|-----------------|-----------------|---------|
| (a) Schools in operation a whole year ..... | 17              | 2               | 39              | 58      |
| (b) Schools in operation part of year ..... | 2               | 0               | 2               | 4       |
| Totals .....                                | 19              | 2               | 41              | 62      |

The following table shows the estimated proficiency of the pupils in all subjects examined:—

| Subjects.        | Number of Pupils examined. | Number of Pupils passed. | Per-centages. | Subjects.           | Number of Pupils examined. | Number of Pupils passed. | Per-centages. |
|------------------|----------------------------|--------------------------|---------------|---------------------|----------------------------|--------------------------|---------------|
| Reading .....    | 1,147                      | 1,097                    | 95            | Scripture .....     | 1,005                      | 847                      | 84            |
| Writing .....    | 1,147                      | 1,118                    | 97            | Object Lesson ..... | 1,075                      | 869                      | 80            |
| Dictation .....  | 889                        | 649                      | 73            | Drawing .....       | 1,075                      | 693                      | 64            |
| Arithmetic ..... | 1,147                      | 858                      | 74            | Music .....         | 837                        | 585                      | 69            |
| Grammar .....    | 357                        | 151                      | 42            | Needlework .....    | 361                        | 345                      | 95            |
| Geography .....  | 357                        | 256                      | 71            | Drill .....         | 1,059                      | 397                      | 37            |

The Crookwell section of the Bowral District is a new one formed this year out of portions abstracted from larger neighbouring districts, and no comparisons can be made between the present attainments of pupils and those of former years; but inasmuch as the great majority of the schools are small the results on the whole are fair with every prospect of improvement in the future. No complaints of any kind have been made against teachers or pupil teachers and all have worked with fair success in their several positions.

JOHN LESLIE SMITH,  
Inspector.

Crookwell, 11th December, 1893.

#### ANNEX Q.

##### DISTRICT INSPECTOR COOPER'S REPORT.

In January last, Mr. Inspector Willis was transferred from Braidwood to the Sydney District, and Mr. Inspector Nolan was appointed to succeed him at Braidwood. Messrs. P. Durie and P. F. Sheehy retained charge of the Bega and Yass sections respectively. By the readjustment of schools, consequent on the appointment of an Inspector to Crookwell (Bowral District), 4 were removed thereto from the Goulburn section, and 10 from the Yass section of this district. One school, formerly under my immediate supervision, was placed under Mr. Sheehy. Seven schools were removed from the Yass section to the Wagga Wagga District, from which an equal number was transferred to the Yass section. At the beginning of the year, there were 370 schools in the district, distributed at follows:—88 in the Goulburn section, 102 in the Braidwood section, 100 in the Bega section, and 80 in the Yass section. By the establishment of new schools, and the re-opening of schools formerly closed, the total was increased to 384, of which 90 were in the Goulburn, 105 in the Braidwood, 106 in the Bega, and 83 in the Yass section. Some of these schools were, however, closed before the end of the year, as a consequence of small attendance, and there are now in existence 371 schools, indicated hereunder:—

| Section of District. | Schools or Departments. |       | Number of places allowing for each Pupil |                 | Highest quarterly enrolment. | Enrolment for the year. |
|----------------------|-------------------------|-------|--|-----------------|------------------------------|-------------------------|
|                      | 1892.                   | 1893. | 8 square feet.                           | 100 cubic feet. |                              |                         |
| Goulburn.....        | 84                      | 90    | 4,759                                    | 4,357           | 3,957                        | 4,808                   |
| Braidwood .....      | 105                     | 102   | 4,818                                    | 3,384           | 2,855                        | 3,378                   |
| Bega .....           | 100                     | 100   | 5,220                                    | 4,462           | 3,762                        | 4,658                   |
| Yass .....           | 90                      | 79    | 3,865                                    | 3,421           | 1,910                        | 3,500                   |
| Totals .....         | 379                     | 371   | 18,662                                   | 15,624          | 12,484                       | 16,344                  |

Of the new schools opened, 12 entailed on the Department an expenditure of £406 15s., and afford the required cubic space for 250 pupils. One was erected in the Goulburn section, six in the Braidwood section, two in the Bega section, and three in the Yass section. One school in the Braidwood section was enlarged, at a cost of £39 10s. 6d. Improvements, including repairs, fencing and the provision of water tanks, were effected at a total cost of £279 9s. 9d., as under:—

|   | £   | s. | d. |
|---|-----|----|----|
| Goulburn Section, 5 schools costing ..... | 22  | 14 | 6  |
| Braidwood „ 19 „ „ .....                  | 87  | 10 | 3  |
| Bega „ 6 „ „ .....                        | 33  | 9  | 0  |
| Yass „ 30 „ „ .....                       | 135 | 16 | 0  |

The accommodation provided for the pupils enrolled in existing schools is in nearly every case sufficient, and in many excessive. The material condition of all the schools under my personal supervision, with the exception of a few Half-time Schools and the Goulburn Superior Boys' School is fairly satisfactory.

Many of the teachers continue to manifest a laudable interest in the beautifying of the school grounds, and show a just appreciation of the benefits derivable from the cultivation of plants and flowers. Some, however, seem to regard this point of organisation as one which they may ignore without exposing themselves to blame, even when the conditions of success are very favourable. It is hoped that, ere long, it will be a rare thing to find a school, especially a town school, devoid of trees and well-kept flower-beds.

Particulars of the attendance of pupils and the payment of school fees are given in the following table:—

| Quarter.        | Section of District.         | Enrolled.        | Average attendance. | Per cent. | Fees paid.                | Fees due.            | Free pupils.   |

For the first three quarters the regularity of attendance was about the same as it was last year, but the very severe epidemics of measles and influenza which prevailed during the last quarter caused a falling off in both the enrolment and average attendance towards the close of the year.

Of the 384 schools which were opened during the whole or some part of the year, 379 underwent a regular inspection, and one in the Goulburn section was fully inspected twice. The five schools not inspected (three in the Bega and two in the Yass section) were either closed before the inspectors' visits to the localities, or were brought into operation after the inspectors had visited. In addition to these regular inspections, 77 ordinary inspections were held. The inspections held in the several sections of the district may be summarised thus:—

|                       | 1893.    |           |         | 1892.    |           |         |
|-----------------------|----------|-----------|---------|----------|-----------|---------|
|                       | Regular. | Ordinary. | Totals. | Regular. | Ordinary. | Totals. |
| Goulburn section..... | 90       | + 40      | = 130   | 86       | + 68      | = 154   |
| Braidwood „ .....     | 106      | + 32      | = 138   | 106      | + 50      | = 156   |
| Bega „ .....          | 102      | + 3       | = 105   | 102      | + 57      | = 159   |
| Yass „ .....          | 81       | + 2       | = 83    | 90       | + 4       | = 94    |
| Totals .....          | 379      | + 77      | = 456   | 384      | + 179     | = 563   |

The

The efficiency of the schools, as disclosed at the regular inspections, is shown in the subjoined table:—

| Section of District. | Class of School.     | Above Standard. | Up to Standard. | Below Standard. | Totals. | Percentage up to or above Standard. |       |

|                      | House-to-house ..... | 0               | 1               | 0               | 1       | 100                                 | ..... |
|                      | Totals .....         | 67              | 4               | 10              | 81      | 87                                  | 86    |
| Grand Totals .....   | 297                  | 40              | 42              | 379             | 84      | 86                                  |       |

It thus appears that 297, or 78 per cent., of all the schools inspected were found to be *above* the standard, whereas last year the percentage was 62. This may be regarded as evidence of satisfactory advancement in general efficiency. Combining the numbers of those above and just equal to standard requirements, the percentage for three sections shows improvement, but that for the Braidwood section appears as 4 per cent. lower than that for 1893.

The proficiency of the pupils examined is indicated hereunder:—

| Subject.              | Goulburn Section. |         | Braidwood Section. |         | Bega Section. |         | Yass Section. |         | Percentage of Passes. |       |

The proficiency of the pupils in every subject of the school course, excepting dictation, is higher than it was for the previous year, the improvement in the more important subjects, reading, writing, and arithmetic, being considerable. In respect to writing, those teachers who have devoted careful attention, not only to the imitation of head-lines in copy books, but also to writing in dictation and exercise books, and have reduced the working on slates to a minimum in the higher classes, have obtained excellent results. At the yearly inspections, in addition to examining the copy-books, I tested the ability of the Fourth and Fifth classes to write neatly and legibly by requiring the pupils to transcribe 30 or 40 lines on unruled paper. The results were very gratifying, and gave evidence of skill and intelligence in teaching this important subject. The specimens of handwriting done in the Superior Public Schools at Queanbeyan, South Goulburn (girls'), Goulburn (girls'), Goulburn (boys'), and South Goulburn (boys'), deserve special commendation.

In accordance with the Minister's instruction, issued in June last, certificates of exemption from compulsory attendance were given to 185 pupils attending the 28 schools inspected by me between July and December. As that instruction necessitated the handing of these certificates to all children who satisfied the standard, without respect to age, many were received by those who were already exempt from legal obligation to attend, inasmuch as they were over 14 years of age. Some of the latter, who were pupils of Fifth classes in Superior Schools, appeared to receive the certificates with reluctance, regarding them as evidence of attainments much lower than those they really possessed.

The higher classes in the Superior Public Schools were tested, as in former years, by written examinations in most of the important subjects. The results exhibited progressive improvement, and a fair proportion of the pupils showed a degree of proficiency equal, I think, to the requirements of the University Junior Examination. The issue of Departmental certificates evidencing, in a reasonable measure, the attainments of these pupils would provide the pupils with well-earned testimonials of advancement beyond the elementary knowledge required to exempt them from obligatory attendance, and could not fail to benefit the schools generally. As the exemption certificate would show that the minimum standard of elementary instruction had been reached, so the higher certificate would indicate that the required proficiency in the "higher branches of education," which the Act makes the distinguishing feature of Superior Schools had been attained.

The Manual Training Class at the Goulburn Technical School, in which provision is made for the instruction of 32 boys from the Goulburn Public Schools, has been well attended throughout the year. The instruction is appreciated by both parents and pupils, and the results have, I think, been very beneficial. Early in the year the elder pupils of the Superior Public Schools at Goulburn (boys' and girls') North Goulburn (boys') and South Goulburn (boys') were allowed to attend the Technical School for one lesson a week on Chemistry. About 90 boys and girls thus enjoyed the benefit of the experiments and instruction of the resident Science and Art Master, Mr. A. J. Sach, F.C.S. Their regular teachers accompanied the pupils, and afterwards revised the lessons received. The results of this arrangement for teaching science proved very satisfactory, as evidenced by the fact that 41 per cent. of those presenting themselves at a written examination held in November obtained fully 50 per cent. of possible marks, and became eligible for cards of proficiency from the Technical Education Branch. Four girls and one boy distinguished themselves by gaining "honours," having received from 83 to 97 marks out of a possible 100.

The Kindergarten instruction introduced in 1890, into the Superior Public Schools at Goulburn, North Goulburn, South Goulburn, and Queanbeyan continues to form a pleasing and very helpful part of the infants' course in those schools.

School banks are maintained in all the schools in which more than one teacher are employed, but the general depression of the year led to a reduction of depositors and deposits.

It is gratifying to be able to report that the high standard of discipline that has long been a marked feature of our Public Schools has been well sustained throughout this district during the year. In most of the schools visited by me the general discipline has merited high marks and the experience of the Inspectors engaged in the other sections appears from their reports appended hereto to have been equally satisfactory.

At the end of 1893 there were 338 teachers of all classes employed in this district. They may be arranged under the following heads:—

| Section.        | Teachers. |          | Mistresses. | Assistants. |          | All ranks.  |               | Pupil-teachers. |          |
|-----------------|-----------|----------|-------------|-------------|----------|-------------|---------------|-----------------|----------|
|                 | Males.    | Females. |             | Males.      | Females. | Classified. | Unclassified. | Males.          | Females. |
| Goulburn .....  | 42        | 28       | 6           | 3           | 5        | 63          | 21            | 7               | 14       |
| Braidwood ..... | 52        | 25       | 1           | 0           | 2        | 46          | 34            | 1               | 9        |
| Bega .....      | 73        | 12       | 1           | 0           | 5        | 78          | 13            | 4               | 7        |
| Yass .....      | 43        | 34       | 0           | 0           | 2        | 49          | 30            | 4               | 8        |
| Totals.....     | 210       | 99       | 8           | 3           | 14       | 236         | 98            | 16              | 38       |

With few exceptions the teachers perform their duties with earnestness and zeal, and it is a rare thing to find need for censure in respect to their personal conduct. In regard both to their professional work and their bearing as citizens they enjoy a high and well deserved reputation. The pupil-teachers continue to render valuable assistance in the conduct of the larger schools.

When arrangements now in progress for opening schools in several isolated spots are completed, the educational wants of the district will be fully supplied. The material organisation of the schools is in general satisfactory. The proficiency of the pupils, as disclosed at the regular inspections shows progressive improvement for the year, and, so far as present circumstances may be taken as a guide, the prospects of 1894 are encouraging.

D. J. COOPER,  
District Inspector.

Goulburn, 30th December, 1893.

#### ANNEX R.

##### INSPECTOR NOLAN'S REPORT.

At the end of last year 105 schools were in operation, of which 3, though not officially closed until the beginning of 1893, were not open during any portion of the current year. Thus 1893 opened with 102 schools. During the year 4 small schools were closed on account of insufficient attendance, and 4 new schools were opened in localities previously without the means of education. The current year terminates with 102 schools at work. Several of the existing small schools are likely to be closed early in the ensuing year, as the attendance thereat is insufficient to warrant their continuance; on the other hand, a few small schools will be established at an early date to meet the requirements of recently settled localities. The existing schools are well distributed, and they, with the new schools contemplated, will afford ample educational facilities for the district. In too many cases, however, there is a lamentable lack of parental interest; children are sent to school the bare number of days to comply with the compulsory clause of the Public Instruction Act, for the remainder of their time they are employed at farm or station labour.

In the more settled portions of the district substantial well-equipped buildings have been provided and their material condition is satisfactory ; but in the majority of schools the buildings, though equal to the requirements of small and migratory populations, are of a make-shift character. During the coming year some of the more unsuitable buildings will be replaced by more substantial structures. The erection of new buildings at Benanderah and Dairyman's Plains has already been sanctioned, and work will be commenced thereat early next year.

During the current year the sum of £945 17s. 9d. was expended by the architect in the erection of a new building at Bateman's Bay, and in improvements to the schools at Cooma, Jembaicumbene and Mongarlowe. Under inspectoral supervision 4 small buildings were erected at a cost of £176 10s., 1 building was enlarged for £39 10s. 6d., and an expenditure of £92 10s. 3d. was incurred in repairing 20 schools. Two small buildings were provided by the residents. The existing schools provided accommodation for 4,818 pupils; the total enrolment for the year was 3,378, and the average attendance was 2,006; during the latter part of the year the attendance was seriously affected by long continued epidemic sickness; under ordinary circumstances the accommodation already provided is in excess of the requirements.

All of the schools (106) on my list were regularly inspected, and 32 received ordinary inspection. Twenty-two schools were below, 3 up to, and 81 above standard requirements; for 1892, Mr. Inspector Willis gave the corresponding numbers as (of 106 schools inspected) 20 below, 33 up to, and 53 above standard. In 1892, 81 per cent. satisfied, and 19 per cent. fell below standard; for the present year 80 per cent. satisfied the standard and there was a 20 per cent. failure; a comparison shows a slight falling off for 1893; irregularity of attendance, caused mainly by long continued illness, will probably account for the declension.

Whilst pleased to be able to report in favourable terms upon the majority of the teachers, I regret having to state that, there are several who do not devote that constant attention to duty so essential to success. I am of opinion that, under ordinary circumstances, no school should fail to reach the existing standard, 50 per cent. of possible marks. Most of the schools under my supervision are, in regard to attendance, very small, and they are in charge of unclassified teachers, some of whom, fail to realise the importance of their duties. During the year several teachers received official censure for unsatisfactory work, and a few were dealt with for unreliable records. The teachers of the undermentioned schools deserve mention for creditable work done:—

Major's Creek Public (8.1.)  
Araluen Public (7.8.)  
Cooma Infants' (7.8.)  
Braidwood Public (7.7.)  
Cooma Primary (7.5.)  
Bell's Creek Public (7.5.)

The following schools secured passes at the University examinations:—Cooma Public, 5 juniors, 1 senior; Araluen Public, 2 juniors; Adaminaby, 1 junior. A medal was awarded to Master J. Perkins, of Cooma Public School, for proficiency in geography.

The system of introducing certificates to pupils passing the standard prescribed by the Public Instruction Act did not come into force until late in the year, after the regular inspection of the majority of the schools, hence but very few certificates were awarded this year.

As far as the teachers are reasonably accountable the organisation is fairly satisfactory; in schools under trained teachers the material is carefully preserved, the classification is judicious, and the instruction is skilfully regulated; with many untrained teachers the prescribed lesson guides are constructed as a matter of course, but they are practically useless on account of their defective character and their non-observance. The disciplinary condition is, on the whole, very satisfactory.

The pupil-teachers are worthy of commendation for their zeal and industry.

As I have had but one year's experience in this district, I am unable to compare, from personal knowledge, the work done during 1893 with the results of previous years. I trust, however, that existing defects will soon be removed, and that my next report will be of a more satisfactory character than that which I have now the honor to submit.

W. NOLAN,  
Inspector of Schools.

Braidwood, 23rd December, 1893.

#### ANNEX S.

##### INSPECTOR SHEEHY'S REPORT.

THE redistribution of schools at the commencement of the year has altered considerably the boundaries of this section. Its northern limits have been contracted by the annexation of the schools in the basin of the Lachlan River to those in the newly formed Crookwell section of the Bowral District. On the western side some of the schools near Murrumburrah were transferred to the Inspector at Young, and as a set-off the following schools were placed on my list:—Brawlin, Clarendon, Cooba Creek, Lerida, Mitta Mitta, Muttama, and Watson's Reef Public, together with Burnt Hut Creek Provisional. After this adjustment and the discontinuance of Tarrabandra Public and Berremangra Provisional, owing to low enrolment of pupils, the schools under my supervision comprised:—

|                   |    |
|-------------------|----|
| Public .....      | 55 |
| Provisional ..... | 18 |
| Half-time .....   | 6  |
| Total.....        | 79 |

In the course of the March and June quarters Bulga Hut and Cooney Provisional, Digger's Flat Half-time, and Geegullalong Public were permanently closed, as the attendance did not warrant their continuance. Early in the year new schools were opened at Cunningham Creek, Tumorrana, and Wyangle, places where no school previously existed. Tarrabandra Public was reopened in May, the residents having furnished a guarantee to supplement the teacher's salary should the minimum number required be not maintained. In November Cavan Public, which had been closed for a few months, was reopened as a House-to-house School, to be worked in conjunction with Warham, a new station.

The Half-time Schools at Gorham and Toul were converted to Full-time Schools, and Mudoonen Public was reduced to Half-time rank. There were thus at the end of the year 79 schools in operation, viz:—

|                      |    |
|----------------------|----|
| Public .....         | 53 |
| Provisional .....    | 21 |
| Half-time .....      | 4  |
| House-to-house ..... | 1  |

The establishment of a Provisional School at Billabong has been sanctioned, and it is expected that the building will be fit for occupation in January next. Applications were received for new schools at Allandale, Reedy Creek, and Tenandra, and after due inquiry declined.

##### Inspection.

There were 83 schools in operation during the year or some portion thereof. Of these two had been closed before the time fixed for visiting them. The remaining 81 received a regular inspection, and in

in consequence of the instruction in regard to economy in travelling expenses only-2 received a second or ordinary inspection. The following table shows the number below, up to, and above the standard of general efficiency (50 per cent. of possible marks) :—

| Schools.             | Below Standard. | Up to Standard. | Above Standard. | Total. |
|----------------------|-----------------|-----------------|-----------------|--------|
| Public .....         | 6               | 1               | 47              | 54     |
| Provisional .....    | 3               | 2               | 17              | 22     |
| Half-time .....      | 1               | 0               | 3               | 4      |
| House-to-house ..... | 0               | 1               | 0               | 1      |
| Total .....          | 10              | 4               | 67              | 81     |

Of these schools 69 were under my supervision last year. In 42 there is increased efficiency, in 6 no improvement, and in 21 a deterioration.

#### Discipline.

The pupils are, as a rule, punctual, except in cases where they have to travel long distances to school. Their regularity is not so satisfactory. In most schools there are children on the rolls with a record of frequent absences each quarter. For this defect, so detrimental to their progress, the parents are to blame, who keep them at home chiefly on the plea of needing their services. The pupils present, as a rule, a pleasing, tidy appearance and becoming demeanour. They are, generally speaking, orderly and attentive under examination, and yield a willing obedience to their teachers. Corporal punishment is not much used, and is judiciously administered. One case only of undue severity occurred during the year.

#### Proficiency.

The estimated proficiency, as shown by the percentage of passes in each subject, is given below :—

| Subjects.               | Number examined. | Number passed. | Percentages. |       |
|-------------------------|------------------|----------------|--------------|-------|
|                         |                  |                | 1893.        | 1892. |
| Reading .....           | 2,060            | 1,649          | 80.0         | 79.3  |
| Writing .....           | 1,896            | 1,765          | 93.0         | 89.2  |
| Dictation .....         | 1,711            | 1,118          | 65.3         | 67.9  |
| Arithmetic .....        | 1,967            | 1,446          | 73.5         | 71.2  |
| Grammar .....           | 837              | 489            | 58.4         | 59.6  |
| Geography .....         | 840              | 460            | 54.7         | 61.0  |
| History (English) ..... | 869              | 343            | 39.4         | 36.2  |
| „ (Australian) .....    | 127              | 99             | 77.9         | 79.7  |
| Scripture .....         | 2,058            | 1,171          | 56.9         | 50.8  |
| Object Lessons .....    | 2,059            | 1,898          | 92.1         | 92.7  |
| Drawing .....           | 1,922            | 1,579          | 82.1         | 69.9  |
| Music .....             | 2,060            | 1,116          | 54.1         | 45.6  |
| Euclid .....            | 74               | 49             | 66.2         | 76.3  |
| Algebra .....           | 10               | 4              | 40.0         | 100.0 |
| Needlework .....        | 878              | 860            | 97.9         | 97.7  |
| Drill .....             | 2,060            | 1,513          | 73.4         | 64.2  |

Compared with the results obtained last year, the percentages show an improvement in reading, writing, arithmetic, scripture, drawing, music, and drill, and a retrogression in dictation, grammar, geography, Euclid, and algebra. History is not well taught, and the number of passes in it is low. There is evidence, however, that this subject, and also meanings and mental operations in arithmetic, are receiving more attention than were formerly bestowed on them.

Certificates of being educated up to the standard required by the Public Instruction Act of 1880 were issued to 53 pupils in the course of the regular inspections during the December half-year.

Two pupils from Murrumburrah Public were successful at the Junior Public Examination.

#### Teachers.

At the end of the year there were 77 teachers, 2 assistants, and 12 pupil-teachers employed in this section, classified as follows :—

| Office.          | II A.  |          | II B.  |          | III A. |          | III B. |          | III C. |          | Unclassified. |          | Total. |          |
|------------------|--------|----------|--------|----------|--------|----------|--------|----------|--------|----------|---------------|----------|--------|----------|
|                  | Males. | Females. | Males. | Females. | Males. | Females. | Males. | Females. | Males. | Females. | Males.        | Females. | Males. | Females. |
| Teachers .....   | 6      | 0        | 3      | 0        | 13     | 4        | 9      | 8        | 2      | 2        | 9             | 21       | 42     | 35       |
| Assistants ..... | ...    | ...      | ...    | ...      | ...    | 2        | ...    | ...      | ...    | ...      | ...           | ...      | 0      | 2        |
| Total .....      | 6      | 0        | 3      | 0        | 13     | 6        | 9      | 8        | 2      | 2        | 9             | 21       | 42     | 37       |

#### Pupil-teachers.

| Class I. |         | Class II. |         | Class III. |         | Class IV. |         | Total. |         |
|----------|---------|-----------|---------|------------|---------|-----------|---------|--------|---------|
| Male.    | Female. | Male.     | Female. | Male.      | Female. | Male.     | Female. | Male.  | Female. |
| 2        | 1       | 1         | 3       | 0          | 2       | 1         | 2       | 4      | 8       |

The teachers, as a body, are well fitted for their duties, and are earnest in the discharge of them. The pupil-teachers have given general satisfaction. The reports on their conduct and efficiency, and (with one exception) on their diligence in study, are very favourable.

#### Accommodation.

*Accommodation.*

Reckoned at 100 cubic feet of air space for each pupil, the sitting accommodation consists of 3,421 places. During the year 376 places were gained by the erection of new buildings and the addition of schools to my list, and 583 places were lost by the closing of schools and the transfer of others to the Inspectors at Young and Crookwell. There was thus a decrease of 207 places for the year. Except in two small schools, which require to be enlarged, the accommodation provided is sufficient. The school-buildings erected, their cost, &c., are given hereunder:—

| School.                      | Cost.             | Places provided. | Supervised by | Remarks.                                |
|------------------------------|-------------------|------------------|---------------|---|
| Cunningham Creek Provisional | £ s. d.<br>75 5 0 | 23               | Inspector ... | Erected where no school existed before. |
| Tumorrana Provisional .....  | .....             | 23               | Residents ... | Erected where no school existed before. |
| Wyangle .....                | .....             | 18               | „ ...         | Erected where no school existed before. |

Under the supervision of the Inspector, a weathershed, which cost £34, has been erected at Edwardstown. Repairs and improvements to 30 schools have been effected at a cost of £135 16s., and to 7 teachers' residences at a cost of £42 18s.

Under the Architect, a weathershed has been built at South Gundagai, and a neat substantial brick residence at Demondrille Junction.

In view of limited funds, several works were postponed till next year.

*Attendance.*

The attendance was affected by the epidemics which occurred during the year. Owing to an outbreak of diphtheria, Burrumbidgee, Binalong, and Lang's Creek Public were closed until it was considered that they could be reopened with safety. In nearly every population centre throughout the district the children were attacked by measles, and, as the schools were kept open, the average attendance was very much reduced.

*Summary.*

There has been an improvement in the general efficiency of 42 schools, and 83 per cent. of the total number inspected have been either up to or above the standard. Three new schools have been opened where no school had formerly existed, and it is expected that two others will soon be completed. The means of education are well distributed, and the prospects for the ensuing year may be regarded as favourable.

P. F. SHEEHY,  
Inspector.

Yass, 30th December, 1893.

## ANNEX T.

## INSPECTOR DURIE'S REPORT.

IN Bega Section of Goulburn District there were 100 schools in existence at the close of 1892. These consisted of—

|                           |            |
|---------------------------|------------|
| Public Schools .....      | 70         |
| Provisional Schools ..... | 12         |
| Half-time Schools .....   | 18         |
| <b>Total .....</b>        | <b>100</b> |

Of these, 1 school, Nelbothery Half-time, was not re-opened in 1893, and 5 were closed on account of insufficient attendance, viz., Killarney Swamp and Wagonga Provisional, and Currowoodgyn, Glenryan, and Murrah Half-time Schools. Three schools that were not in operation during 1892 were re-opened in 1893, viz., Numbla and Sam's Corner Provisional and Jettiba Half-time. Three new schools were opened during the year, viz., Corunna and Buckajo Provisional and Cambalong Half-time.

During the year the following changes were made in the rank of schools:—Wellesley Provisional was raised to Public; the Public Schools at Brogo, Lord's Hill, Glenbog, Mila, Quinburra, and Wapengo, and the Provisional Schools at Bobundarah, Dangelong, Puen Buen, and Timbery Range were reduced to Half-time. These changes left the total schools 100, made up as follows:—

|                           |            |
|---------------------------|------------|
| Public Schools .....      | 65         |
| Provisional Schools ..... | 9          |
| Half-time Schools .....   | 26         |
| <b>Total .....</b>        | <b>100</b> |

Small school-buildings at Corunna and Curia Creek were erected under my supervision during 1893. The latter replaced a very dilapidated structure used as a Provisional School; at the former place no school existed previously. Repairs to the residences at Turlinjah, Merimbula, Nimitybelle, Bega, Verona, and Quaama were carried out, as also at the Public Schools at Avoca, Angledale, Lord's Hill, Wellesley, Eurobodalla, and Yurramie.

At the close of 1892 the sittings provided in this district for pupils amounted to 5,194. The changes above enumerated increased these to 5,220.

*Attendance.*

During the year 105 schools were in operation, having a total enrolment of 4,658 pupils, and an average daily attendance of 2,499.6. The attendance for 1892 and 1893 is tabulated hereunder:—

| Quarter.        | Enrolment. |       | Attendance. |         | Percentages. |       |
|-----------------|------------|-------|-------------|---------|--------------|-------|
|                 | 1892.      | 1893. | 1892.       | 1893.   | 1892.        | 1893. |
| March .....     | 3,686      | 3,664 | 2,404.6     | 2,496.5 | 67.9         | 63.1  |
| June .....      | 3,746      | 3,762 | 2,582.9     | 2,599.1 | 63.9         | 69.0  |
| September ..... | 3,682      | 3,701 | 2,521.0     | 2,630.3 | 68.4         | 71.0  |
| December .....  | 3,563      | 3,473 | 2,320.7     | 2,106.3 | 65.1         | 60.6  |

For the first three quarters of the year the percentages of attendance were slightly in excess of the corresponding period for 1892. The attendance, however, fell off very considerably in the last quarter. This was due to the epidemics of measles and influenza, which were prevalent throughout the district during the last three months of the year. Shearing and harvesting operations, as in previous years, also assisted in diminishing the attendance for the December quarter.

*Inspection.*

*Inspection.*

During 1893 the following inspections were made:—Regular, 102; ordinary, 3; total, 105. Of the 3 schools not regularly inspected, 2, viz., Wagonga Provisional and Murrah Half-time, were closed on account of small attendance before my visit of inspection; and Spring Vale Public School was not in operation until the last week of December quarter.

At the regular inspections held during the second half of the year certificates were issued to all pupils who passed the standard of efficiency required by the Public Instruction Act. Of such certificates 212 were issued.

The condition of the various classes of schools as shown at the time of inspection is given in the following table:—

| Schools.          | Below Standard. |           | Up to Standard. |           | Above Standard. |           |
|-------------------|-----------------|-----------|-----------------|-----------|-----------------|-----------|
|                   | 1892.           | 1893.     | 1892.           | 1893.     | 1892.           | 1893.     |
|                   | per cent.       | per cent. | per cent.       | per cent. | per cent.       | per cent. |
| Public .....      | 14              | 8         | 44              | 23        | 42              | 66        |
| Provisional ..... | 16              | 0         | 58              | 50        | 26              | 50        |
| Half-time .....   | 10              | 10        | 30              | 18        | 60              | 72        |
| All .....         | 12              | 7         | 44              | 27        | 44              | 66        |

These figures show that the efficiency of all schools has improved during 1893; for while in 1892 12 per cent. of the schools inspected were below standard, only 7 per cent. were in such condition during 1893; and while, in 1892, 83 per cent. were up to or above standard, 93 per cent. were in this state in 1893. The schools have fully maintained their good character for organisation and discipline; their tone is healthy, and corporal punishment is in no school unduly severe.

*Teachers.*

The total number of teachers engaged in this district at the close of 1893 was 102, made up as follows:—

|                          |                   |     |
|--------------------------|-------------------|-----|
| Teachers and Assistants— |                   |     |
| Class 1 B .....          |                   | 1   |
| " 2 A .....              |                   | 9   |
| " 2 B .....              |                   | 4   |
| " 3 A .....              |                   | 40  |
| " 3 B .....              |                   | 16  |
| " 3 C .....              |                   | 8   |
| Unclassified .....       |                   | 13  |
|                          | Total .....       | 91  |
| Pupil-teachers—          |                   |     |
| Class 2 .....            |                   | 4   |
| " 3 .....                |                   | 3   |
| " 4 .....                |                   | 4   |
|                          | Total .....       | 11  |
|                          | Grand Total ..... | 102 |

*Summary.*

1. The efficiency of the schools is higher than in 1892.
2. The means of education are ample and well distributed.
3. The outlook for 1894 is promising.

P. DURIE,  
Inspector.

Bega, 27th December, 1893.

## ANNEX U.

## DISTRICT-INSPECTOR LOBBAN'S REPORT.

At the beginning of 1893 the Port Macquarie section of the Grafton District was placed under the immediate supervision of Mr. Stewart Wright, B.A., and in the latter half of the year Mr. Peter Board, M.A., succeeded Mr. H. D. M'Lelland, B.A., as Inspector of the Lismore section. The distribution of schools remained the same as in previous years, except that the Public School at Mororo was transferred from the Lismore to the Grafton section, and the Public School at Acacia Creek to the Armidale District.

The year began with 285 schools in operation—208 Public, 49 Provisional, 22 Half-time, and 6 House-to-house Schools, distributed as follows:—

| Section.             | Public. | Provisional. | Half-time. | House-to-house. | Total. |
|----------------------|---------|--------------|------------|-----------------|--------|
| Grafton .....        | 60      | 17           | 10         | 3               | 90     |
| Lismore .....        | 69      | 17           | 2          | .....           | 88     |
| Port Macquarie ..... | 79      | 15           | 10         | 3               | 107    |

In the course of the year 1 Half-time and 2 Provisional Schools were established in the Grafton section, and 1 Public School was added to the list from the Lismore section; 1 Half-time School was converted into a Provisional School, 2 Provisional Schools were closed, and the Infant School at South Grafton was incorporated in the Primary Department. In the Lismore section 2 Public and 4 Provisional Schools were established, and 2 schools (Condong and Tooloom) that had been closed for some time were re-opened; but 1 Provisional and 4 Public Schools were closed, and 2 Public Schools were transferred to other supervision. In the Port Macquarie section 3 Public, 5 Provisional, and 2 Half-time Schools were established; and 2 Public, 1 House-to-house, and 5 Provisional schools were closed. There were, therefore, 239 schools in operation at the end of 1893, viz., 203 Public, 50 Provisional, 23 Half-time, and 3 House-to-house Schools:—

| Section.             | Public. | Provisional. | Half-time. | House-to-house. | Total. |
|----------------------|---------|--------------|------------|-----------------|--------|
| Grafton .....        | 61      | 17           | 10         | 3               | 91     |
| Lismore .....        | 67      | 20           | 2          | .....           | 89     |
| Port Macquarie ..... | 80      | 13           | 10         | .....           | 103    |

Allowing 8 square feet of floor-space for each child, places were available for 18,337 pupils at the end of 1893, being an increase of 401 places for the year. In the Grafton section 5,480 places are available, 5,391 in the Lismore section, and 6,780 in the Port Macquarie section. Ample accommodation is thus provided for existing requirements.

The utmost economy compatible with keeping the school premises in fair tenable order was exercised in connection with repairs and improvements effected. The total amount expended under Inspectorial supervision was £1,159 14s.; viz., £250 7s. in the Grafton section, £542 3s. 9d. in the Lismore section, and £367 3s. 3d. in the Port Macquarie section. The amount expended by the Architect was £3,614 6s. 3d.; viz., £215 16s. 11d. in the Grafton section, £2,009 0s. 10d. in the Lismore section, and £1,389 8s. 6d. in the Port Macquarie section. The total expenditure in the district, therefore, was £4,774 0s. 3d. Most of the premises are in good order; but some new buildings will be required to replace rented ones, and many of the wooden structures will need painting before the end of the current year.

One small Provisional School in the Grafton section and 1 Provisional and 2 Public Schools in the Lismore section were not inspected, as they were closed early in the year, on account of diminished attendance. There were 301 regular and 22 ordinary or second inspections made. The District Inspector held 97 regular inspections; Mr. Inspector Wright, 113; Mr. Inspector M'Lelland, 46; and Mr. Inspector Board, 45. 10,676 pupils were examined—3,498 in the Grafton section, 3,375 in Lismore section, and 3,803 in Port Macquarie section. There were 26 schools below and 275 up to or above the standard, viz.—Grafton section, 9 schools below and 84 up to or above standard; Lismore section, 8 below and 83 up to or above standard; and Port Macquarie section, 9 below and 108 up to or above standard; thus 91.3 per cent. of the schools inspected either reached or exceeded the standards. Last year the percentage was 90.2. Although a larger percentage of the schools satisfied the standards in 1893 than in 1892, yet in most subjects the attainments are a shade lower. This is accounted for by the fact that during the first half of the year the attendance was very irregular on account of long continued rain and floods, and during the latter half by an epidemic of measles, which spread over the whole district. The subjoined tables will afford the means of comparing the results for the past two years:—

| Subjects.               | 1892.            |                       | 1893.            |                       |
|-------------------------|------------------|-----------------------|------------------|-----------------------|
|                         | Number examined. | Percentage of Passes. | Number examined. | Percentage of Passes. |
| Reading.....            | 10,507           | 93                    | 10,651           | 87                    |
| Writing.....            | 10,507           | 92                    | 10,676           | 87                    |
| Arithmetic.....         | 10,507           | 78                    | 10,518           | 76                    |
| Dictation.....          | 7,898            | 76                    | 8,469            | 82                    |
| Grammar.....            | 3,830            | 76                    | 4,094            | 77                    |

| Vocal Music.....        | 10,089           | 72                    | 10,280           | 75                    |
| French.....             | 59               | 84                    | 65               | 92                    |
| Euclid.....             | 416              | 83                    | 494              | 81                    |
| Algebra.....            | 104              | 93                    | 91               | 82                    |
| Mensuration.....        | 345              | 76                    | 483              | 65                    |
| Latin.....              | 95               | 83                    | 91               | 85                    |
| Trigonometry.....       | 27               | 92                    | .....            | .....                 |
| Needlework.....         | 4,007            | 91                    | 3,887            | 85                    |
| Drill.....              | 10,390           | 77                    | 10,655           | 78                    |
| Science.....            | 376              | 89                    | 425              | 87                    |

There is little room for dissatisfaction in connection with the organisation of most schools, nor can much exception be taken to the general discipline, although a few teachers still seem to regard the "cane" as an instrument for teaching. The instruction in nearly all cases corresponds with the requirements of the standards, and it is imparted with diligence. The behaviour of the pupils is decidedly good. In some schools in each section very high results are achieved, and in this respect the Superior Public School at Grafton stands first, embracing a course of instruction necessary not only to qualify for the ordinary University Examinations, but also for matriculation.

The University Examinations were not so largely attended as in previous years; 14 pupils passed from 9 schools, 5 of them being from Grafton.

Much suffering and privation were caused on these rivers during the past year by repeated floods, and hence more applications than formerly were received for free education, and a larger amount of bad debts had to be cancelled. During the year the sum of £5,199 5s. was collected as school fees:—£1,663 13s. 3d. in the Grafton section, £1,683 0s. 6d. in the Lismore section, and £1,852 11s. 3d. in the Port Macquarie section. Arrears of fees amounting to £175 14s. 9d. were due on the 31st December, 1893, viz.:—Grafton section, £22 10s. 6d.; Lismore section, £81 12s. 3d.; and Port Macquarie section, £71 14s. 9d. It is feared that a great portion of this amount is composed of bad debts, which will have to be cancelled. The Fee Returns for December show that in 163 schools no fees were owing; in 52 schools no single debt exceeded 5s.; and in 74 schools there were single debts of 5s. and upwards.

The disbandment of the Attendance Officers in June disorganised the arrangements then existing for carrying out the provisions of the compulsory clauses of the Public Instruction Act; but the new plan works smoothly, and the duties devolving upon the officers of the Police Department are carried out with promptness and efficiency.

The Public School Banks have felt the pressure of the hard times during the year. Nevertheless, these institutions are very fairly patronised. Returns have not been received from the Port Macquarie section; but in the Grafton section there were on the 31st December, 1893, 17 Banks open, with 485 depositors, having £154 12s. 11d. at their credit; and in the Lismore section, 13 Banks, with 455 depositors, having a credit balance of £142 17s. 9d.

The various Public School Boards throughout the district have taken considerable interest in the schools under their immediate supervision, and have assisted the Inspectors by supervising the execution of minor repairs to the premises in their several districts. A healthy influence is exerted upon the schools, which are systematically visited and reported upon by the School Boards.

Special religious instruction continues to be given in all the large and several of the smaller schools throughout the district. The work is systematically carried out in connection with the Church of England children. Some Wesleyan and Presbyterian clergymen also take advantage of the provisions of the Act for this purpose; and the Rev. Father Abern has given religious instruction to the Catholic children in some of the schools on the Bellinger River.

The School Staff consists of 271 teachers, 4 mistresses, 1 work-mistress, 20 assistants, and 78 pupil-teachers. The teachers (including mistresses and assistants) and pupil-teachers are classified as follows:—

| Class I.           | Class I. |    | Class II. |    | Class III. |    |    | Not classified. | Total. |
|--------------------|----------|----|-----------|----|------------|----|----|-----------------|--------|
|                    | A.       | B. | A.        | B. | A.         | B. | C. |                 |        |
| Teachers, &c. .... | 1        | 3  | 48        | 19 | 88         | 28 | 12 | 96              | 295    |

|                      | Class I. | Class II. | Class III. | Class IV. | Probationer. | Total. |
|----------------------|----------|-----------|------------|-----------|--------------|--------|
| Pupil-teachers ..... | 19       | 18        | 22         | 18        | 1            | 78     |

The work-mistress is employed in the Girls' Department of the Grafton Superior Public School.

The great body of teachers are respectable and respected members of society, who faithfully perform their duties both as teachers and citizens, and reflect credit upon the service with which they are connected. It must be admitted, however, that there are a few who are not strictly temperate in their habits, and these fail to command the respect of either their pupils or their neighbours. The pupil-teachers have given much satisfaction to all charged with their supervision; all passed the examinations last year. The ex-pupil-teachers in charge of small schools—the majority of the unclassified teachers—are doing creditable work.

In the general condition of the schools of the district there is much to be satisfied with, and where defects were noticed and pointed out the teachers in all cases promised to effect improvement. The reports of Messrs. Wright and Board are attached.

Grafton, 8th December, 1894.

A. LOBBAN,  
District Inspector.

#### ANNEX V.

##### INSPECTOR WRIGHT'S REPORT.

At the end of 1892 there were 107 schools in operation in this district, and during 1893 10 new schools were opened, viz., 3 Public (Hibbard, Kew, and Missabotti), 5 Provisional (Bohnock, Heron's Creek, Sidebottom, Telegraph Point, and Unkya Creek), 2 Half-time (Parrabel and Temagogue), so that there were 117 schools in operation during some portion of the year. Of these, 8 have been closed, 7 owing to the limited attendance, viz., 2 Public (Brombin and Bucerabandini), 4 Provisional (Glenora, Pelican Island, Taylor's Arm, and Telegraph Point), 1 House (No. 1), and the other, Camden Haven Provisional, as it had been replaced by Kew Public. There are, therefore, at the present time 109 schools in operation, classified as follows:—

|                    |            |
|--------------------|------------|
| Public .....       | 80         |
| Provisional .....  | 13         |
| Half-time .....    | 16         |
| <b>Total .....</b> | <b>109</b> |

New schools will be opened early in 1894 at Collombatti, Gannon's Creek, and Wallingat, and these, with the existing schools, will adequately meet the educational requirements of the district, though one or two small schools may be required during 1894.

##### Accommodation.

At the end of 1892 accommodation was provided for 6,456 pupils, allowing 100 cubic feet of air space for each pupil. During 1893 places for 166 were lost by closing schools, while new places for 340 were provided by the erection of new buildings, &c. There is thus a total gain of 174 places, there being accommodation now for 6,630 scholars. As the highest enrolment shown for any quarter of the year was 4,804, it is evident that ample provision has been made for the proper accommodation of the children.

##### Condition of School Property.

The property of the Department is, generally speaking, in good condition. Some of the buildings have been attacked by white ants, which have done serious damage, but in other respects there is little cause for complaint, the teachers, as a body, having proved very careful tenants; and in most places, where the site is fenced in, the grounds have been well attended to, trees have been planted, gardens, both flower and vegetable, have been formed, and a very pleasing and cheerful appearance has thus been given to the schools generally. In a number of cases, however, where the schools are situated on the river-banks, the results of months and even years of hard work have been swept away by the great floods which visited the district during the first half of the year.

##### Works done under Inspector.

Under the supervision of the Inspector a sum of £367 3s. 3d. has been expended—£254 5s. in the erection of new buildings, £45 in enlarging one school, £54 8s. 3d. in repairing schools, and £13 10s. in repairing residences. For works not completed, a further sum of £154 11s. will be required—£135 for buildings in course of erection, and £19 11s. for repairs now being executed.

##### Inspection.

All the schools (117) open during the year received a regular inspection, and 6 ordinary inspections were held. Of these, 5 regular and 3 ordinary inspections were made by Mr. District-Inspector Lobban, the rest by myself. The efficiency of the schools is shown in the following table:—

| Class of Schools.   | Below Standard. | Up to Standard. | Above Standard. |
|---------------------|-----------------|-----------------|-----------------|
| Public.....         | 2               | 3               | 77              |
| Provisional.....    | 5               | 1               | 12              |
| Half-time .....     | 2               | 1               | 13              |
| House.....          | 0               | 0               | 1               |
| <b>Totals .....</b> | <b>9</b>        | <b>5</b>        | <b>103</b>      |

From this it will be seen that 92·3 per cent. of the schools in the district are up to or above standard requirements. Last year the percentage of passes was 89, so that an improvement of 3·3 per cent. in efficiency has taken place. The work done in the following schools, as shown by the results obtained at inspection, has been of a very high order, and is deserving of special mention:—Taree Superior, Wingham, West Kempsey Superior, Pelican Island, Frederickton, and Bowraville. Three of these schools, viz., West Kempsey Superior, Wingham, and Frederickton, were represented at the recent Junior University Examination; two from the first-named school having passed, and one from each of the other schools.

*Attainments.*

The attainments of the pupils in the principal subjects of examination are shown below:—

| Subject.              | Number of pupils examined. | Percentage up to or above Standard. | Subject.               | Number of pupils examined. | Percentage up to or above Standard. |
|-----------------------|----------------------------|-------------------------------------|------------------------|----------------------------|-------------------------------------|
| Reading .....         | 3,778                      | 85·3                                | Australian History ... | 332                        | 81·6                                |
| Writing .....         | 3,803                      | 80·2                                | Scripture .....        | 3,702                      | 76·7                                |
| Dictation .....       | 3,102                      | 82·3                                | Object Lessons .....   | 3,750                      | 76·4                                |
| Arithmetic .....      | 3,645                      | 74·7                                | Drawing.....           | 3,767                      | 75·5                                |
| Grammar.....          | 1,538                      | 75·6                                | Needlework .....       | 1,471                      | 79·2                                |
| Geography .....       | 1,541                      | 81·1                                | Drill .....            | 3,782                      | 73·8                                |
| English History ..... | 1,541                      | 74·5                                |                        |                            |                                     |

These results are highly satisfactory, and bear evidence of careful and systematic work on the part of the teachers generally.

*Teaching Staff.*

Altogether 133 teachers are employed in the schools in this district, viz., 101 principal teachers, 7 assistants, and 25 pupil-teachers. Their classifications are shown in the subjoined table:—

| Position.                         | 1 A.       | 1 B. | 2 A.       | 2 B. | 3 A.       | 3 B. | 3 C.       | Un-classified. | Total. |
|-----------------------------------|------------|------|------------|------|------------|------|------------|----------------|--------|
| Teachers .....                    | 0          | 1    | 16         | 10   | 27         | 10   | 5          | 32             | 101    |
| Assistants .....                  | 0          | 0    | 0          | 0    | 6          | 0    | 0          | 1              | 7      |
|                                   | 1st Class. |      | 2nd Class. |      | 3rd Class. |      | 4th Class. |                |        |
| Pupil-teachers ...                | 7          |      | 5          |      | 5          |      | 8          |                | 25     |
| Total teachers of all ranks ..... |            |      |            |      |            |      |            |                | 133    |

Most of the 32 unclassified teachers are ex-pupil-teachers who have had the advantage of three or four years' practical training under experienced teachers, and are therefore well fitted for the charge of small schools. Of the teachers generally it may be said that they form a capable and energetic body, who do their work in the schools faithfully, and outside of the schools take an active and intelligent interest in the district in which they reside, and endeavour to promote its welfare. A few complaints have been made against individual teachers during the year, but in only one instance was the matter a serious one. Each case was fully inquired into, and suitable action taken by the Department.

*Summary.*

The educational requirements of the district are adequately met.  
 The school-buildings generally are in good repair.  
 All the schools were regularly inspected, and 92·3 per cent. of them satisfied standard requirements.  
 The teachers are zealous, capable, and energetic.  
 The work done has been sound and progressive.

STEWART WRIGHT.

Port Macquarie, 2nd January, 1894.

ANNEX W.

INSPECTOR BOARD'S REPORT.

THE Lismore section of the Grafton District was under the supervision of Mr. Inspector M'Lelland during the first half of the year, and was placed under my charge on 1st July.

At the close of last year there were 88 schools in this section, providing accommodation for 5,215 pupils. During the year the schools at Byangum, Graham Town, Teven Creek, Goolmangar, and Nashua have been closed owing to diminished attendance, and, in January last, the school at Mororo was transferred to the Grafton section, and the Acacia Creek school to the Glen Innes section of the Armidale District. New schools have been established at Kurrara, Dungay, Riley's Hill, Tuckaburra, Dumbible, and Cabbage Tree Island, and the schools at Condong and Tooloom, which had been closed for some time, were re-opened. This year, therefore, closes with 89 schools in operation; of these, 67 are Public, 20 are Provisional, and 2 are Half-time schools; the total enrolment is 4,501, and sitting accommodation is provided for 5,391 pupils.

A new school-building, erected at Burringbar to meet the educational needs of residents along the line of railway in course of construction, will be ready for occupation at the beginning of 1894. Applications have been received for the establishment of schools at Richmond, Red Hill, Crabbe's Creek, Woodenbong, White Swamp, and Crystal Creek; those received from Richmond and White Swamp have been granted by the Minister, and early in the coming year schools will be brought into operation at these places.

During the year six school-buildings have been erected under the supervision of Mr. Inspector M'Lelland, at a total cost of £336 16s., and the schoolrooms at Riley and Point Danger have been enlarged at a cost of £142 13s., the former under the Inspector's and the latter under the Architect's supervision. The sum of £152 0s. 9d. has been expended in effecting the necessary repairs to 34 school-buildings. A new class-room for the Public School at Drake is now approaching completion.

In

In the course of the year 91 schools received a regular inspection, 46 of these by Mr. Inspector M'Lelland. Three schools, Byangum, Graham Town, and Nashua, were closed before an opportunity was afforded for inspecting them. Two schools received an ordinary inspection from my predecessor; and incidental visits have been paid as occasion offered. Of the 91 schools inspected, 8 were found to be below standard, 2 up to standard, and 81 above standard. The results of inspection are shown in the following table:—

| Subjects.             | Number of Pupils examined. | Per-centage of Passes in 1893. | Per-centage of Passes in 1892. | Subjects.             | Number of Pupils examined. | Per-centage of Passes in 1893. | Per-centage of Passes in 1892. |
|-----------------------|----------------------------|--------------------------------|--------------------------------|-----------------------|----------------------------|--------------------------------|--------------------------------|
| Reading .....         | 3,375                      | 90                             | 90                             | Drawing .....         | 3,375                      | 75                             | 60                             |
| Writing .....         | 3,375                      | 88                             | 87                             | Music .....           | 3,360                      | 67                             | 54                             |
| Dictation .....       | 2,421                      | 81                             | 71                             | French .....          | 6                          | 83                             | 33                             |

| Grammar .....         | 1,146                      | 74                             | 71                             | Algebra.....          | 11                         | 55                             | 78                             |
| Geography.....        | 1,146                      | 74                             | 66                             | Mensuration.....      | 96                         | 58                             | 62                             |
| English History.....  | 1,146                      | 66                             | 54                             | Latin.....            | 7                          | 86                             | 57                             |
| Australian History .. | 153                        | 81                             | 61                             | Needlework .....      | 1,054                      | 84                             | 87                             |
| Scripture.....        | 3,232                      | 67                             | 62                             | Drill .....           | 3,375                      | 70                             | 37                             |
| Object Lessons .....  | 3,375                      | 72                             | 65                             | Natural Science ..... | 13                         | 85                             | 64                             |

These results indicate that in reading and writing the percentages of passes have changed but little; in arithmetic, algebra, mensuration, and needlework a decrease appears, whilst in other subjects there has been a distinct advance.

The organisation of the schools and the discipline maintained in them are satisfactory; the teachers are, with very few exceptions, earnest and industrious; the pupil-teachers have been, without exception, favourably reported upon by those who are charged with their supervision.

In view of the present condition of the schools of this district, the prospect for 1894 is favourable.

P. BOARD,  
Inspector.

Lismore, 29th December, 1893.

#### ANNEX X.

##### DISTRICT-INSPECTOR T. DWYER'S REPORT.

DURING some portion of the year there were in operation in the Maitland District 291 schools, which were distributed as follows:—

| Section of District. | Public. | Provisional. | Half-time. | Evening Public. | House-to-house. | Total. |
|----------------------|---------|--------------|------------|-----------------|-----------------|--------|
| Maitland .....       | 71      | 1            | 5          | .....           | .....           | 77     |
| Newcastle .....      | 52      | 1            | .....      | .....           | .....           | 53     |
| Musclebrook .....    | 49      | 8            | 18         | .....           | 3               | 78     |
| Dungog .....         | 60      | 8            | 10         | .....           | 5               | 83     |
| Total.....           | 232     | 18           | 33         | .....           | 8               | 291    |

The following is a brief summary of school work and extension carried out in this district during the year.

*Maitland Section.*—A new Infant School was completed and opened at Wallsend, and a Provisional School was established at Rockview. The school-buildings at Noraville were removed to Wyee, and re-erected there, as the old schoolroom was unsuitable. An application for a Provisional School at Sawyer's Gully has been granted, and operations will start there in a rented building this month. The Half-time School at Mount Finch was closed early in the year for want of attendance, and Dairy Arm was worked with Murray's Run, which was reduced to Half-time rank.

The Public School at Leconfield was closed in August, as the bulk of its pupils could, without much inconvenience, attend at Greta. The sum of £132 16s. 6d. was expended by the District Inspector in effecting improvements to 20 schools and residences.

*Newcastle Section.*—A splendid new Infant Department was opened at Wickham; and extensive improvements were effected to a considerable number of schools and residences.

*Musclebrook Section.*—But one application was received during the year for a new school, which was declined.

*Dungog Section.*—Two new schools, Branch River House and Webber's Creek Provisional, were opened early in the year. Barrington Aborigines' Camp Public and Gloucester Provisional were converted to Half-time Schools; Binglebrah and Sugarloaf Creek Half-time to House Schools; and Narani Public and Seal Rocks Provisional to House Stations. The number of schools in operation in the Maitland District at the close of the year was as follows:—

| Section of District. | Public. | Provisional. | Half-time. | Evening Public. | House-to-house. | Total. |
|----------------------|---------|--------------|------------|-----------------|-----------------|--------|
| Maitland .....       | 70      | 1            | 4          | .....           | .....           | 75     |
| Newcastle .....      | 52      | 1            | .....      | .....           | .....           | 53     |
| Musclebrook .....    | 49      | 8            | 18         | .....           | 3               | 78     |
| Dungog .....         | 60      | 8            | 10         | .....           | 4               | 82     |
| Total.....           | 231     | 18           | 32         | .....           | 7               | 288    |

Existing schools are, on the whole, centrally placed, and afford sufficient space for more pupils than the highest average attendance during the year. The total amount of floor-space for the whole district at the end of 1893 was 27,426, and the number of cubical spaces 28,588, being an increase of 966 and 1,106 respectively on last year.

Organisation and discipline continue to improve, fewer defects having been found in the records, and recourse to corporal punishment having been less frequent than in former years.

Tree-planting and horticulture have fallen off in comparison with previous years.

The

The work of inspection for the year is shown in the following table :—

| Section of District. | Regular Inspections. | Ordinary Inspections. | Total number of Inspections. | Total number of Pupils examined. |
|----------------------|----------------------|-----------------------|------------------------------|----------------------------------|
| Maitland .....       | 75                   | 12                    | 87                           | 5,719                            |
| Newcastle .....      | 53                   | ...                   | 53                           | 9,074                            |
| Musclebrook .....    | 78                   | ...                   | 78                           | 2,590                            |
| Dungog .....         | 82                   | ...                   | 82                           | 2,681                            |
| Total .....          | 288                  | 12                    | 300                          | 20,064                           |

Mount Finch Half-time did not receive regular inspection, as it was closed early in the year, and Leonfield was not inspected, inasmuch as pressure of work rendered a special visit to it impossible.

The condition of the inspected schools is shown hereunder :—

| Class of School.     | Above Standard. | Up to Standard. | Below Standard. | Total. |
|----------------------|-----------------|-----------------|-----------------|--------|
| Public .....         | 218             | 4               | 9               | 231    |
| Provisional .....    | 12              | 1               | 5               | 18     |
| Half-time .....      | 25              | 1               | 6               | 32     |
| House-to-house ..... | 4               | ...             | 3               | 7      |
| Total .....          | 259             | 6               | 23              | 288    |

It appears from this table that 92 per cent. of the inspected schools satisfied or exceeded the standard, as against 91 per cent. for last year.

The names of the Superior Public Schools in this district, and the number of pupils from each that succeeded in passing the Senior and Junior University Examination for 1893, are given in the subjoined table :—

| School.               | Class. | Seniors. |        | Juniors. |        | Total. |
|-----------------------|--------|----------|--------|----------|--------|--------|

|                      |                  |   | Drill .....                       | 18,371           | 80                                      |
|                      |                  |   | Natural science .....             | 400              | 91                                      |

Compared with last year there is an improvement in all branches. Dictation is better by 13 per cent.; Euclid, by 10 per cent.; natural science, by 9 per cent.; mensuration, by 8 per cent.; Latin, by 7 per cent.; drawing, by 6 per cent.; reading, Australian history, and Algebra have improved by 5 per cent.; English history, geography, and scripture, by 4 per cent.; simple and compound rules of arithmetic, elementary grammar, music, French, needlework, and drill are better by 3 per cent.; higher arithmetic, advanced grammar, and object lessons, by 2 per cent.

The general conduct of the teachers and pupil-teachers of this district for the past year has been very satisfactory, with few exceptions. Many of the teachers are men and women of good education and refinement of character. Many are indefatigable workers. Nearly all are studiously inclined, which is evidenced by the number who were promoted by examination during the year. The pupil-teachers, a very small number excepted, are doing creditable work as teachers and qualifying themselves by study to become still more useful. The classification of the teachers, assistants, and pupil-teachers is indicated in the subjoined table:—

|                                   | I A.  |         | I B.  |         | II A. |         | II B. |         | III A.        |         | III B.    |         | III C. |         | Un-classified |         | Total. |         | Grand Total. |     |

#### Summary.

Three new schools were opened during the year. Accommodation exists for 27,426 pupils. The course of inspection has been complete and thorough; and although floods and measles interfered with the attendance during two quarters of the year, 1,205 more pupils were examined than during 1892.

The employees of the Department have, on the whole, worked zealously and effectively.

The condition of the district in regard to primary education is sound and progressive.

T. DWYER,

East Maitland, 6th January, 1894.

District Inspector.

#### ANNEX Y.

##### DISTRICT-INSPECTOR T. DWYER'S REPORT ON NEWCASTLE SECTION.

THE number of schools in operation in the Newcastle section of the Maitland District for 1893 was 53, the same as for last year. During the year a new and spacious Infant School was completed at Wickham, and improvements and repairs were effected to a considerable number of buildings by the Architect. The buildings are in a very fair state of repair, and afford ample accommodation for present requirements. The total floor-space for this section is 9,521, being an increase of 808 over last year.

Tree-planting and gardening continue to receive due attention.

Organisation and discipline indicate marked advancement on past years, no salient points being lost sight of, and defects becoming less general.

Every school in the section received a regular inspection. The number of pupils examined was 9,074. The percentage of schools that satisfied the standard is 98, which is the same as for last year.

The following table shows the number and classification of teachers, assistants, and pupil-teachers employed in this section:—

##### 1. Teachers, Mistresses, and Assistants.

|                                 | First Class. |    | Second Class. |    | Third Class. |    |    | Unclassified |
|---------------------------------|--------------|----|---------------|----|--------------|----|----|--------------|
|                                 | A.           | B. | A.            | B. | A.           | B. | C. |              |
| Teachers .....                  | 4            | 6  | 8             | 5  | 5            | 0  | 0  | 1            |
| Mistresses of Departments ..... | 1            | 3  | 19            | 0  | 0            | 1  | 0  | 0            |
| Assistants .....                | 0            | 6  | 12            | 9  | 14           | 6  | 1  | 10           |
| Totals .....                    | 5            | 15 | 39            | 14 | 19           | 7  | 1  | 11           |

Totals, 111.

##### 2. Pupil-teachers.

| Class 1. | Class 2. | Class 3. | Class 4. | Totals. |
|----------|----------|----------|----------|---------|
| 10       | 29       | 26       | 11       | 76      |

##### 3. Work-mistresses, 8.

##### 4. Total Teachers of all ranks, 195.

The

The teachers and pupil-teachers continue to give very general satisfaction in the discharge of their duties, and in their intercourse with the people. They are studious, and a number of them are men and women of high attainments and mature judgment. The pupil-teachers' Saturday classes at Wickham continue to be largely and regularly attended.

The Cookery School has been made a success through the energy, skill, and unremitting attention of Mrs. Storey and Miss Porteous.

The condition of the Primary Schools in this section leaves no reasonable ground for complaint.

East Maitland, 5th January, 1894.

T. DWYER,  
District Inspector.

---

#### ANNEX Z.

##### INSPECTOR FLASHMAN'S REPORT.

Few changes have taken place in the boundaries of this section, or the number of schools contained therein during the past year.

Last year closed with 79 schools on my list. Owendale Provisional School was not reopened this year, and the Public School at Dunbars Creek was closed in consequence of diminished attendance; the House School at Cuan was converted into a Half-time School, and worked with a new school at Bunnan.

The year closed with the following schools in operation:—

|                   |    |
|-------------------|----|
| Public .....      | 49 |
| Provisional ..... | 8  |
| Half-time .....   | 18 |
| House .....       | 3  |
| Total.....        | 78 |

The attendance at the schools at Brushy Hill, Ravensworth, Ravensworth North, Page River, Munmurra, Rouchel Vale, Bow Ridge, and Redwell, has been very unsatisfactory during the year; the question of continuing them will have to be considered during next year.

The material condition of all the schools is good, and the teachers' residences are in a satisfactory condition. A new and commodious school building has been erected and opened at Aberdeen.

Seats have been provided for 4,728 pupils, while the enrolment is about 3,300, so that it will be observed that ample provision has been made for the educational accommodation of the school population.

As far as I am aware, the schools are so placed as to be within easy reach of nearly all the children of this district.

Only one application was received during the year for a new school: as the site selected was within 1 mile of an established school, the application was declined.

All the schools in this section received a regular inspection, but no ordinary inspections were made. I am pleased to be able to report that in most of the schools very satisfactory work has been done, and in a few the results obtained were far above the average.

The schools obtaining the highest marks for general efficiency were: Bulga, Rix Creek, Singleton Boys', Singleton Girls', Sparkes Creek, Vere, Cuan, Gouldsville, Mount Thorley, Murrurundi, Muswellbrook, Owen's Gap, Rouchel, and Roughtit.

In many subjects the percentages up to or above the standard are higher than those obtained last year. A marked improvement is noticed in Reading, Dictation, Grammar, Geography, English History, Scripture History, Music, Algebra, and Needlework.

Most of the teachers now fully realise the necessity, if satisfactory results are to be obtained, of keeping the provisions of the standards constantly in view, and teaching strictly in accordance with them. The methodical painstaking, conscientious teacher finds but little difficulty in doing good work, but those teachers who depend upon a few week's unnatural activity just previous to the expected annual inspection usually find that such work will not stand the test of rigid inspection and that the cramming process entirely fails on the day of examination.

The number of schools above the standard this year is 71, while 7 failed to satisfy the requirements. Last year the number that failed was 11.

The organization of the schools still continues to be of a pleasing character. No serious defects have been noted; in most cases the school-rooms present an attractive appearance.

The discipline is generally mild, firm, and effective, its tone is modified by the personal influence of the teacher's character. The sympathetic teacher produces good results by moral suasion; his pupils love to obey because it is one way they have of showing their regard for him; the cold, distant, harsh teacher's discipline is more the result of fear than respect, it is uneven, unreliable, easily upset, the removal of the teacher's eye or presence is a signal for disorder.

The moral tone of the school and the general demeanour of the pupils are inseparably connected with the character of the discipline; while I have been much pleased in observing in many cases the respectful bearing of pupils towards their teachers when beyond the vicinity of the school-room, I have been pained to note in other instances the almost entire absence of even deferential recognition, and that outside the school-room the teacher and the taught appear to be entire strangers to one another; this is not as it should be and the fault most certainly rests with the teacher; he has in a most emphatic manner given the impression that his interest in his pupils is purely selfish and that he is a stranger to the higher impulses which should actuate every member of the teaching profession.

Six teachers were examined in June last for promotion, but only 3 were successful.

The pupil-teachers employed in this section are industrious, hard-working, and respectable young persons, they have done good work and give promise of extended usefulness in the future. All the pupil-teachers gained promotion during the year.

The educational requirements of the section have been well met during 1893.

Muswellbrook, 28th December, 1893.

C. O. FLASHMAN,  
Inspector.

---

#### ANNEX ZI.

##### INSPECTOR WATERHOUSE'S REPORT.

In accordance with your instructions, I beg to submit a short and concise report upon the schools in the Dungog section of the Maitland District for the year 1893.

At the close of 1892 there were 83 schools in operation. One of them—Wortwell Half-time—was not reopened this year in consequence of diminished attendance. Two new schools, Branch River House and Webber's Creek Provisional, were opened early in the year. Barrington Aborigines' Camp Public and Gloucester Provisional were converted to Half-time, Binglebrah and Sugarloaf Creek Half-time, Narani

Narani Public and Seal Rocks Provisional to House Stations. As a result of these changes, the schools at the close of the year 1893 were classified thus :—

|                    |           |
|--------------------|-----------|
| Public .....       | 60        |
| Provisional .....  | 8         |
| Half-time .....    | 10        |
| House .....        | 4         |
| <b>Total .....</b> | <b>82</b> |

New school buildings have been erected at Nelson's Bay, Ward's River, and Welshman's Creek, to replace old or unsuitable structures. At Dungog, a new residence has been built under the architect's supervision. Speaking generally the school buildings are in very fair repair; many of the wooden structures, however, greatly need repainting. Repairs and improvements to fourteen schools and seven residences have been effected under the Inspector's supervision, at a cost of £311 19s., and tenders for three other buildings, at a cost of £100, have been accepted, and the work is now being proceeded with.

I regret to report that the buildings at Miller's Forest and Nelson's Plains were seriously injured by the devastating floods of last March, and that the teachers lost almost the whole of their personal effects.

The following applications for the establishment of schools were dealt with :—

The Fens—House School; declined.  
 Stonehenge—Provisional; declined for the present.  
 Hanley's Creek—Half-time; House School offered, but declined by the residents.  
 New Glanmorgan—Public; sanctioned.

Statute accommodation is provided for 4,440 children, and floor space, allowing 8 square feet for each child, for 4,804. As the highest average attendance during any quarter of the year was only 2,389, it is evident that the aggregate accommodation is more than sufficient; in a few cases it is considerably in excess of present requirements, and in only two instances are the children uncomfortably crowded.

Every school in this section was fully inspected, and fourteen underwent an ordinary inspection.

The following table gives details of the schools examined :—

| Schools.            | Below Standard. | Up to Standard. | Above Standard. |
|---------------------|-----------------|-----------------|-----------------|
| Public .....        | 3               | 2               | 55              |
| Provisional .....   | 3               | 0               | 5               |
| Half-time .....     | 3               | 1               | 6               |
| House .....         | 2               | 0               | 2               |
| <b>Totals .....</b> | <b>11</b>       | <b>3</b>        | <b>68</b>       |

Thus 87 per cent. of the schools satisfied or exceeded standard requirements, a result which compares favourably with last year's work. It may be mentioned that of the schools below standard one had not been in operation a year at the time of inspection, whilst two others were treated as below standard simply because there were no third classes.

The schools which were awarded the highest marks for general efficiency (organization, discipline, and attainments of pupils) were :—

|                       |                             |
|-----------------------|-----------------------------|
| Aliceton .....        | Miss A. M'Lennan.           |
| Binglebrah .....      | Mr. H. A. M'Lean (removed). |
| Booral .....          | Mr. Wm. M'Knight.           |
| Bungwall Flat .....   | Mr. J. J. Souter (retired). |
| Clairwood .....       | Mr. H. E. Hunt.             |
| Dungog .....          | Mr. C. E. Broome (removed). |
| Euwylong .....        | Miss A. A. Connolly.        |
| Merranie .....        | Miss E. M. Gale.            |
| Raymond Terrace ..... | Mr. J. P. Green.            |
| Seaham .....          | Mr. W. Quinn.               |
| Stroud .....          | Mr. E. E. Mitchell.         |
| Telegherry .....      | Mr. A. J. Dransfield.       |
| Webber's Creek .....  | Miss K. M'Gregor.           |

The estimated proficiency of the pupils examined is shown hereunder :—

| Subjects.                    | Number of Pupils examined. | Per-centage of Passes. | Percentage of Passes, 1892. | Subjects.             | Number of Pupils examined. | Per-centage of Passes. | Percentage of Passes, 1892. |
|------------------------------|----------------------------|------------------------|-----------------------------|-----------------------|----------------------------|------------------------|-----------------------------|
| Reading .....                | 2,681                      | 89                     | 87                          | Object Lessons .....  | 2,649                      | 85                     | 86                          |
| Writing .....                | 2,681                      | 85                     | 87                          | Drawing .....         | 2,649                      | 82                     | 86                          |
| Dictation .....              | 2,289                      | 76                     | 75                          | Music .....           | 2,276                      | 81                     | 81                          |
| Arithmetic .....             | 2,681                      | 72                     | 72                          | Euclid .....          | 216                        | 76                     | 68                          |
| Grammar .....                | 1,080                      | 75                     | 77                          | Algebra .....         | 40                         | 77                     | 75                          |
| Geography .....              | 1,080                      | 76                     | 76                          | Mensuration .....     | 169                        | 71                     | 58                          |
| English History .....        | 1,080                      | 73                     | 70                          | Latin .....           | 40                         | 90                     | 76                          |
| Australian History ...       | 248                        | 84                     | 75                          | Needlework .....      | 1,110                      | 86                     | 86                          |
| Scripture and Moral Lessons. | 2,584                      | 80                     | 82                          | Drill .....           | 2,605                      | 78                     | 79                          |
|                              |                            |                        |                             | Natural Science ..... | 40                         | 87                     | 87                          |

It will be noticed that the percentage of passes in the various subjects is approximately the same as for last year. There is a slight improvement in the majority of subjects, and the only ones not quite so good are Object Lessons and Drill by 1 per cent.; Writing, Grammar, and Scripture by 2 per cent.; and Drawing by 4 per cent.

The teaching staff consists of 77 teachers, 3 assistants, and 10 pupil-teachers, who, on the whole, have maintained their high character for personal conduct and attention to duty.

The work of the year has been satisfactory, and the prospects for 1894 are hopeful.

Dungog, 1st January, 1894.

J. WATERHOUSE,  
 Inspector.

## ANNEX Z2.

## DISTRICT-INSPECTOR LAWFORD'S REPORT.

I was placed in charge of the Wagga District on 1st July, as successor to the late District Inspector, Mr. Gerald O'Byrne, an old and very popular public servant, whose death on 31st May was regretted by all who knew him. Mr. Pearson, the Inspector stationed last year at Hay, was removed to Albury at the beginning of the year, and Mr. McKenzie was appointed to the charge of the Hay section. Mr. Friend still remains in charge of the Young section of the district.

The following seven schools—Watson's Reef, Brawlin, Muttama, Burnt Hill Creek, Mitta Mitta, Cooba Creek, Clarendon—were transferred from the Young section of this district to the Yass section of the Goulburn district, in exchange for seven others, viz., Demondrille, Collingrove (late Douglas), Khalangan, Burrowa Flats, Murrinboola, Tiverton, and Barwang, which were transferred from the Yass to the Young section at the beginning of the year. Otherwise the boundaries of the district remain as they were last year.

During the year 1893 or some part of it, 328 schools have been open, viz.:-

|                      |     |
|----------------------|-----|
| Public.....          | 230 |
| Provisional.....     | 50  |
| Half-time .....      | 36  |
| House-to-house ..... | 12  |
| Total .....          | 328 |

Of these 12 are new schools or are reopened schools which had not been open during any part of 1892.

Fourteen schools have been closed during the year, leaving 314 in operation in December; but of these it is probable that one or two will not be opened in January, owing to the reduced attendance. Of the 328 open during the year 322 received a regular or full inspection, while 6 schools were not inspected, viz., Tooma (Public), Manus (Half-time), and Upper Tumbarumba (Half-time), in the Albury section, which were closed on account of low attendance before the Inspector could reach them; and Wemmera (House-to-house), Bloomfield (House-to-house), and Mundawaddera (Public), in the Wagga section. Of these Wemmera was closed before I took charge of the district, and the other two collapsed before I could visit them. These very small schools often depend upon a single family for their continuance.

As regards accommodation there is an increase since last year in the number of places available, the figures being :-

|                              | At 8 square feet per head. | At 100 cubic feet per head. |
|------------------------------|----------------------------|-----------------------------|
| Places at end of 1892 .....  | 22,993                     | 22,448                      |
| New places during 1893 ..... | 346                        | 279                         |
| Places at end of 1893 .....  | 23,339                     | 22,727                      |

There are plenty of schools, well distributed, and I do not know of a single case of overcrowding.

Repairs and improvements at 86 schools and 18 residences have been effected under the inspectoral staff at a total cost of £428 18s. 6d. and £318 12s. 8d. respectively, and 9 new schools have been built under the same supervision at a cost of £705 2s. 0d.

A new departure has been made since July in causing all children in the 4th and 5th classes to be regularly examined for a certificate, according to the Act, of being educated up to the standard. The result is a little disappointing, a comparatively small percentage of children having passed. In many cases this was due to a want of accuracy in arithmetic, and in many to a want of acquaintance with the spelling of the Fourth book, but I fully expect that far better results will be shown next year. In reading and writing nearly every child passed.

In point of efficiency the condition of the schools inspected remains the same as it was last year, 90 per cent. being up to or above the standard, in numbers 293 out of 322. More than this degree of efficiency cannot reasonably be expected, and there is no reason to suppose that this high rate will not be maintained.

5th January, 1894.

L. E. LAWFORD,  
District Inspector.

## ANNEX Z3.

## INSPECTOR FRIEND'S Report.

At the commencement of the year, a change was made in the boundaries of the southern portion of the district, by transferring to my list the following schools, situated in the vicinity of Murrumburrah and on the northern or Young side of the Great Southern railway line :—Demondrille, Collingrove (formerly known as Douglas), Khalangan, Burrowa Flats, Murrinboola, Tiverton, and Barwang. At the same time I was relieved of Brawlin, Muttama, Burnt Hut Creek, Mitta Mitta, Cooba Creek, Clarendon, and Watson's Reef Schools, which lie further south,—an arrangement which, rendering this district more compact, materially simplifies the work of inspection.

During the whole or some part of the year, there were 98 schools under my supervision; two (Cudgel Creek and Glenlogan), lapsed in consequence of small attendance. New schools came into operation at Tyagong, Grogan, Willundry, and Mulyan (this last established for aboriginal children). Dinga Dingi, which had been closed for some months, was reopened. Additional petitions for schools were received from Wyalong, Cairn Hill, and Wedallion; one was sanctioned at the last of these places only.

The buildings provide very liberal accommodation, are appropriately furnished, and the majority of them are in a satisfactory state of repair. Some, however, are badly in need of painting, a work which the scarcity of funds has prevented; it is hoped that they will receive attention during the current year. Under the Inspector's supervision school-rooms were erected at Mount M'Donald, Murrinboola, Milburn Creek, and Tyagong, the cost being £505 9s. 6d.; that at Holmwood was enlarged (price £36), and repairs were executed at 30 schools and 3 teachers' residences,—at a cost of £228 18s. 4d. Improvements of an important nature at Cowra, and the erection of a brick school building in place of the old structure at Yeo Yeo, were carried out by the architect.

The

The regular inspection of every school in operation during any part of the year was effected, and 20 received an ordinary inspection. Of the 98 schools, 89 were found to be above standard, and 9 below. The number of pupils examined and the number who passed are shown in the following table, which, moreover, gives the percentages of passes for 1893 and the previous year :—

| Subjects.                            | Estimated Proficiency. |                |                                     |          |
|--------------------------------------|------------------------|----------------|-------------------------------------|----------|
|                                      | Total number examined. | Number passed. | Percentage up to or above standard. |          |
|                                      |                        |                | In 1893.                            | In 1892. |
| Reading—Alphabet.....                | 69                     | 59             | 85                                  | 82       |
| "    Monosyllables.....              | 630                    | 539            | 85                                  | 88       |
| "    Easy Narrative.....             | 898                    | 758            | 84                                  | 84       |
| "    Ordinary Prose.....             | 1,260                  | 1,166          | 92                                  | 90       |
| Totals.....                          | 2,857                  | 2,522          | 88                                  | 87       |
| Writing—On Slates.....               | 1,029                  | 952            | 92                                  | 91       |
| "    In Copy-books and on Paper..... | 1,866                  | 1,735          | 92                                  | 93       |
| Totals.....                          | 2,895                  | 2,687          | 92                                  | 92       |
| Dictation.....                       | 2,310                  | 1,570          | 67                                  | 74       |

| Natural Science.....                 | 794                    | 665            | 83                                  | 85       |

Comparing the results of the two years, an examination of this synopsis discloses more or less retrogression in the majority of the subjects during 1893. The progress of education in the Cowra portion of this district (which comprises a large percentage of my schools) was checked by an outbreak of diphtheria in the early part of the year, which had the effect of closing nearly all those within 20 miles of the town for periods of from two to four months; this circumstance will, in a large measure, account for the falling off in the attainments of the pupils. But another impediment was at work throughout the district generally in the shape of a long-lived epidemic of measles. These scourges continued to exert a damaging influence upon the schools after they had disappeared, for the scare did not readily subside, and many people withheld their children from school for weeks after the diseases had been stamped out.

As a rule, the methods employed are suitable, and applied with earnestness and care; the disciplinary condition of almost every school is highly satisfactory; but there is still room for improvement as regards the classification of the pupils. Those teachers who have erred on this important point are chiefly such as have not been long in charge of schools, or not had the advantages of pupil-teachership or the Training College. It is a matter for regret that the value of punctuality of attendance does not appear to be duly estimated in some few localities.

The teachers, mistresses, and assistants of the district comprise :— 1B, 3; 2A, 9; 2B, 6; 3A, 30; 3B, 10; 3C, 5; unclassified, 36. In addition to these there are 19 pupil-teachers and 1 work-mistress.

With very few exceptions they are competent, reliable, anxious for improvement, and deservedly respected in their several localities. Three or four, however, who richly merited the censure of the Department, have been, or shortly will be, removed to less important positions in the service.

With regard to University Examinations, Young Superior Public, with one senior and eleven junior passes, continues to maintain a high place amongst our Public Schools, whilst Grenfell Superior Public has two seniors to its credit. To conclude—

1. All schools received a regular and twenty an ordinary inspection.
2. The buildings provide more than the necessary accommodation.
3. The legitimate educational wants of the district are well met.
4. The prospects are hopeful.

Young, 30th March, 1894.

CHAS. J. W. FRIEND,  
Inspector.

## ANNEX 24.

## INSPECTOR PEARSON'S REPORT.

WHEN I took charge of the Albury section at the beginning of 1893 there were 88 schools in operation, classified as—Public, 56; Provisional, 13; Half-time, 18; House, 1; total, 88.

During the year Butherwah (Provisional) and Mundaroo (Provisional) were established; Ournie (Half-time) was converted into Provisional; Jingellic (Half-time), which was closed for a few months, was re-opened as Provisional.

Oberne (Public) and Umbango (Public) were converted into half-time.

The following were closed on account of diminished attendance, viz., Carabost, Humula (South), Manus, Upper Tumbarumba (Half-time), Tooma (Public), Khancoban, and Lobb's Hole (Provisional). At the close of 1893 the schools numbered 83.

The requirements of the district are well met, and it is not probable that any new schools will be required for some time.

Of the 90 schools in operation during the year all except 3 were fully inspected. These were Tooma (Public), Manus, and Upper Tumbarumba (Half-time). These small schools were closed on account of very low average before I could reach their respective localities.

Of the 87 schools inspected, 3 were below, 3 up to, and 81 exceeded the standard limits.

The number of pupils examined, the number passed, and the percentages are hereunder tabulated.

| Subjects.           | No. examined. | No. passed. | Percentages. |
|---------------------|---------------|-------------|--------------|
| Reading .....       | 2,317         | 1,839       | 79.3         |
| Writing .....       | 2,317         | 1,876       | 80.9         |
| Dictation .....     | 1,968         | 1,811       | 92.0         |
| Arithmetic .....    | 2,317         | 1,760       | 75.9         |
| Grammar .....       | 949           | 732         | 77.1         |
| Geography .....     | 940           | 737         | 78.4         |
| History .....       | 939           | 720         | 76.6         |
| Scripture .....     | 2,234         | 1,766       | 79.0         |
| Object Lesson ..... | 2,230         | 1,883       | 84.4         |
| Drawing .....       | 2,297         | 1,768       | 77.0         |
| Music .....         | 1,864         | 1,436       | 77.0         |
| French .....        | 16            | 11          | 68.7         |
| Euclid .....        | 100           | 77          | 77.0         |
| Algebra .....       | 15            | 12          | 80.0         |
| Mensuration .....   | 31            | 21          | 67.7         |
| Latin .....         | 15            | 10          | 66.6         |
| Trigonometry .....  | .....         | .....       | .....        |
| Needlework .....    | 932           | 736         | 78.9         |
| Drill .....         | 2,280         | 1,809       | 79.3         |
| Science .....       | 169           | 139         | 82.2         |

These results compare favourably with those of last year, the majority of the subjects showing a slight advance.

The schools showing the lowest percentages are Provisional, under the control of unclassified teachers. The schools of highest efficiency are in order of merit:—Albury Boys, Germanton, Albury Infants, Burrumbuttock, Albury Girls, Howlong, Major's Plains, Moorwatha, and Tumut Plains.

Horticulture and Arboriculture have been carried on with perseverance and taste in the majority of schools, in some cases under adverse circumstances.

The organisation of a number of schools is very unsatisfactory, but the discipline is of a high standard.

School accommodation, allowing 8 square feet per child:—

|   |       |
|---|-------|
| Accommodation existing at beginning of 1893 ..... | 5,309 |
| Additional accommodation provided .....           | 253   |
| Accommodation lost by closing, &c. ....           | 257   |
| Accommodation existing at end of 1893 .....       | 5,305 |

As the enrolment does not reach 3,000, the accommodation provided is more than sufficient.

New school-buildings were erected at Butherwah and Mundaroo by the Inspector, at a total cost of £120. These buildings, which were erected where no schools previously existed, give an additional accommodation of 66 places.

Twenty-one school-rooms were repaired and improved by the Inspector at a cost of £115 8s. 6d., and three teachers' residences were also repaired, involving an additional cost of £180.

No works are in progress.

The substantial and commodious new school-building at Urana was completed in the early part of the year, and is now occupied. The old building was converted into additional rooms to teacher's residence.

At the close of the year the teaching staff comprised:—

|                          | Males. | Females. | Total. |
|--------------------------|--------|----------|--------|
| Principal Teachers ..... | 48     | 26       | 74     |
| Mistresses .....         | 0      | 2        | 2      |
| Assistants .....         | 1      | 4        | 5      |
| Pupil-teachers .....     | 2      | 8        | 10     |
| Work-mistress .....      | 0      | 1        | 1      |
| Total .....              |        |          | 92     |

Generally speaking, the teachers are diligent, painstaking, and zealous, and, with few exceptions, are highly esteemed by parents and the general public. The efficiency of the schools has been maintained.

The accommodation is more than sufficient.

There is reason to anticipate higher results in 1894.

T. PEARSON,  
Inspector.

Albury, 1st January, 1894.

## 113

## ANNEX Z5.

## INSPECTOR M'KENZIE'S REPORT.

THE schools in this section are well distributed, fully staffed, and satisfactorily meet the requirements of the residents.

At the end of the year 1892 there were 62 schools and departments in operation, one of which has since been closed, whilst a discontinued school has been re-opened. There have been, therefore, 63 schools and departments in operation during the year 1893, including in all 51 Public, 8 Provisional, and 4 House-to-house Schools.

Small school-buildings, to replace old ones, were erected at Gunbar and Moulamein; 3 new classrooms were completed at Alma; 3 verandah classrooms were enclosed at Broken Hill; the school-room at Cummeragunja was enlarged; and repairs were effected in 20 schools and 6 residences.

Applications for new schools were received from Connorgie, Colinroobie, Brobenah, Goondarin, and Nunagoit; also applications for the reopening of schools at Paika, Wanganella, and Pretty Pine. Paika Provisional School was reopened; the applications from Connorgie and Goondarin were declined; and teachers were promised conditionally at Colinroobie, Brobenah, Nunagoit, Wanganella, and Pretty Pine.

All schools were fully inspected, and, as a rule, the buildings were found to be in good repair, the accommodation ample, the supply of furniture and school material sufficient, and the condition of the schools, as regards organisation, discipline, and instruction, satisfactory. Of 63 schools inspected, 57 were above, and 3 up to standard, giving 95 per cent. up to or above standard, which is an advance of 5 per cent. on last year's record.

The total enrolment for the year is 7,141, and the average attendance 3,514.6, while there is statute accommodation for 6,558 pupils, and floor-space for 6,478, thus showing an increase on last year's accommodation.

Savings Banks are established in all the more important schools; 4 schools possess cadet corps, and arboriculture receives a fair amount of attention. Only 3 schools, however, made any serious attempt to prepare candidates for the University examinations, viz., Alma, Deniliquin, and Tattaila.

Of the teachers generally it may be said that they exhibit a deep interest in the success of their schools, are diligent and conscientious in the discharge of their duties, and are doing excellent work, often under trying circumstances.

A. D. M'KENZIE,  
Inspector.

Marrickville, 30th December, 1893.

## ANNEX Z6.

## DISTRICT-INSPECTOR LONG'S REPORT.

THE divisions of my district for inspectoral supervision have remained unaltered, but from the beginning of the year, Mr. J. W. E. Baillie has had charge of the Dubbo, or Western Section, *vice* Mr. J. L. Smith, removed to Crookwell.

The number of schools in operation in the district during the whole or some portion of 1893 was 233. It has been necessary to close the schools in several localities on account of insufficient attendance, while new schools have been established at Springfield, Wilpingong, Dunsbury, Dilga, Ardell, Comobella, and Fashion's Mount. The number of schools in operation at the end of the year was 225, of which 97 are in the Mudgee, 63 in the Dubbo, and 65 in the Wellington Section. The buildings in which these are conducted contain accommodation for 13,029 pupils, at the regulation rate of 8 feet of floor-space per head, which is an increase of 172 places for the year. That this is sufficient appears from the facts that the whole number of pupils on the class-rolls, deducting multiple enrolments, was 10,979, and the average daily attendance 6,900.6. The buildings are, with few exceptions, in serviceable condition, but repainting is desirable in the case of a considerable number. Where increased or improved accommodation is desirable the necessary action has already been initiated. Under Inspectors' supervision, 4 school-rooms have been erected, 1 enlarged, and 54 school-rooms and 8 residences repaired, at a total cost of £765 18s. 3d., being but little more than half the expenditure in this direction in the former year.

All the schools received a regular inspection, excepting one House-to-house School, which was closed prior to the Inspector's visit to the locality. The following statement shows the inspections effected in the several sections in the district:—

| Section.         | Number of Schools. | Regular Inspections. | Ordinary Inspections. |
|------------------|--------------------|----------------------|-----------------------|
| Wellington ..... | 65                 | 65                   | 8                     |
| Mudgee .....     | 101                | 101                  | 10                    |
| Dubbo .....      | 67                 | 66                   | 3                     |
| Total .....      | 233                | 232                  | 21                    |

The general efficiency of 140 of the above schools was found to deserve the creditable estimate "Above Standard." In the case of the following 77 schools the efficiency was satisfactory, or "Up to Standard":—Angledool, Arratree, Beni, Binnaway, Byrock, Curban, Gilgandra, Goodooga, Gulargambone, Louth, Nevertire, Orandelbinna, Timbriungie, Trangie, Warkton, Brewarrina Mission, Eilginbah, Noonbar Creek, Plain Creek, Belarbigill, Coalbaggie, Ford's Bridge, Bone Bone, Breelong, Collie, Dunsbury, Purlawaugh, Cullenbone, Menah, Merrendee, Denisontown, Glen Lee, Murragamba, Springfield, Ben Buckley, Brogan's Creek, Clandulla, Combo, Wilpinjong, Tong Bong, Tarrabran, Amaroo, Apsley, Buckhobble, Bulbudgerie, Coolabah, Cundumbul, Eulomogo, Eurimbla, Farnham, Gulgullendah, Mumbil, Myrangle, Nora Creek, Obley, Sandy Creek, Stuart Town, Suntop, Warne, Yullundry, Beri, Boomey, Bridgewater, Fashion's Mount, Lincoln, Medway, Peabody, Station Point, Store Creek, Arthurville, Ponto, Burrendong, Mookerawa, Lower Spicer's Creek, Dilga, Ardell. The general efficiency was "Below Standard," or unsatisfactory, in the case of the following fifteen schools:—Morungulan, Mulyan, Newrea, Muddy Creek, Warburton, Round Swamp, Avisford, Campbell's Creek, Bimbijong, Kelgoola, Pinnacle Swamp, Minore, Bundemar, Ironbarks, Goolma. That a school should appear in the latter section is evidence of defective ability or diligence on the part of the staff, excepting of course cases in which causes beyond a teacher's control have rendered satisfactory results impossible.

From the above it appears that 217 schools, or over 93 per cent., satisfied or exceeded standard in general efficiency. This is an improvement of 4 per cent. on the result of the former year, and in view of the extent to which the attendance has been effected by measles and other epidemics must be regarded as very satisfactory.

The following table shows the number of pupils examined at the regular inspections of the year in the several subjects, and the percentage of passes in each :—

| Subjects.                   | Number of Pupils examined. | Percentage of Passes. | Subject.              | Number of Pupils examined. | Percentage of Passes. |
|-----------------------------|----------------------------|-----------------------|-----------------------|----------------------------|-----------------------|
| Reading .....               | 7,554                      | 81.2                  | Drawing .....         | 7,021                      | 74.6                  |

There is no material difference between the above results and those of the former year. In eight subjects they are higher and in eleven slightly lower. This latter circumstance is doubtless due to the irregularity in the attendance consequent on the prevalence of epidemics at various periods of the year, and does not therefore imply any deterioration in the general skill, care, and diligence of the teaching.

The organisation in regard to details under the teachers' control and the discipline are generally highly creditable. The schools in which they are not at least satisfactory are very few, and it is to be hoped that the advice and directions given where defects have been observed will be productive of the desired improvement. The appearance and demeanour of the pupils in nearly every school show careful training in habits of neatness, obedience, and good order. Many teachers show their appreciation of the educative effect of sightly and well-ordered surroundings by the care and good taste they display in the improvement of the school grounds by planting trees, forming flower beds and borders, and by other means.

The number of teachers employed in the district at the end of the year was 274. Their classifications and positions are shown in the following table :—

|                                 | I A.                             |    | I B.      |    | II A.      |    | II B.     |    | III A.        |    | III B. |    | III C. |    | Unclassified. |    | Totals. |     | Grand Total. |     |     |

|                                 | Class I.                         |    | Class II. |    | Class III. |    | Class IV. |    | Probationers. |    |        |    |        |    |               |    |         |     |              |     |     |
|                                 | M.                               | F. | M.        | F. | M.         | F. | M.        | F. | M.            | F. |        |    |        |    |               |    |         |     |              |     |     |
| Pupil-teachers .....            | 2                                | 4  | 5         | 4  | 3          | 3  | ..        | 6  | 4             | .. |        |    |        |    |               |    |         |     | 16           | 20  | 36  |
| Work-mistresses .....           | ..                               | 2  | ..        | .. | ..         | .. | ..        | .. | ..            | .. |        |    |        |    |               |    |         |     | ..           | 2   | 2   |
|                                 | Total Teachers of all ranks..... |    |           |    |            |    |           |    |               |    |        |    |        |    |               |    |         |     | 160          | 114 | 274 |

With few exceptions the teachers have during the year faithfully and successfully discharged the responsible and honorable duties entrusted to them, and have at the same time secured the esteem of the residents in their respective localities. Some few complaints have occurred for investigation, but excepting in two instances they were found to be of a trivial nature.

The pupil teachers have displayed creditable aptitude, diligence, and usefulness, and have without exception received favourable reports.

#### Summary.

The schools now in the district are sufficient for its present educational requirements. Their efficiency and material condition are satisfactory. The general results for the year indicate success in regard to the objects for which the Department is designed.

GEORGE ED. LONG,  
District Inspector.

Waverley, 13th January, 1894.

#### ANNEX Z7.

##### INSPECTOR ROONEY'S REPORT.

The year 1892 closed with 100 schools in operation, thus classified :—

|                      |    |
|----------------------|----|
| Public .....         | 57 |
| Provisional .....    | 14 |
| Half-time .....      | 22 |
| House-to-house ..... | 7  |

Total..... 100

Failing attendance has since necessitated the closing of the Public School at Spring Flat, and the Half-time Schools at Carwell, Dabee, and Flatlands.

Wyaldra Provisional was converted into a Public School, Glen Lee Half-time into a Provisional, and the Provisional Schools at Combo, Oakborough, and Tong Bong were reduced to Half-time.

Wilpinjong Public School, closed in 1890 when within the Maitland District, was reopened as a Half-time School in conjunction with Combo, and transferred to this district in May last.

Springfield, formerly a Public School but closed during the past few years, was reopened as a Provisional School.

The year 1893 closed with the following schools in operation :—

|                      |    |
|----------------------|----|
| Public .....         | 57 |
| Provisional .....    | 13 |
| Half-time .....      | 20 |
| House-to-house ..... | 7  |

Total..... 97

The

The following works were carried out under my supervision:—Repairs to Public Schools at Canadian Lead, Dapper, Gulgong, Guntawang, Hill End, Lawson's Creek, Leadville, McDonald Creek, Menah, Millville, Mudgee, and Windeyer; and to the Provisional Schools at Birriwa, Cainbill Creek, Denisontown, Murragamba, and Springfield; the erection of a new school at Glen Lee; the transference of buildings, unused for eighteen months, from Tallawang to Wyaldra; and repairs and additions to the residences at Camboon, Pipeclay Creek, and Windeyer.

The architect supervised the erection of a new school at Gulgong, a new room to the school and a residence at Hill End, a class room at Leadville, and improvements at Crudine Public School. Under his supervision, also, new roofing of the school and general repairs to the playgrounds at Mudgee were effected.

With the exception of one Public and three Half-time Schools all school buildings are in a fair state of repair, and suitable for educational purposes.

Many of the wooden buildings will soon require repainting.

Omitting Menah and Collingwood, all the Public and Provisional Schools, and in addition ten of the Half-time Schools are vested in the Department. Eleven Public Schools are not provided with residences, and three married teachers are in charge of schools not so provided.

The school accommodation has increased during the year from 3,818 to 3,843 seats or places, thus being above the requirements of the total enrolment for any quarter. The appearance of many of the playgrounds has been improved by the cultivation of ornamental shrubs and trees. Practical instruction in bee-keeping is imparted by the teachers of the schools at Pipeclay Creek and Lawson's Creek.

#### Enrolment and Attendance.

The total enrolment for the year was 4,473. Of this number, 387 were returned as pupils of more than one school. A slight decrease is shown both in the enrolment and the average attendance. The enrolment and the average for each quarter of the year are shewn hereunder:—

|                     | Enrolment. | Average. |
|---------------------|------------|----------|
| First Quarter ..... | 3,814      | 2,770·6  |
| Second „ .....      | 3,811      | 2,704·4  |
| Third „ .....       | 3,702      | 2,748·6  |
| Fourth „ .....      | 3,553      | 2,354·2  |

The diminution of attendance during the December quarter was owing to the prevalence of measles. The compulsory clauses of the Public Instruction Act have been duly administered.

#### School Fees.

The amount of fees received during the year was £1,358 16s. 9½d., a decrease as compared with 1892 of £82 18s. 6d.; the number of free pupils has, however, diminished from 276 to 233.

#### Inspection.

The whole of the 101 schools in operation during the year, or part of it, received a regular inspection, and ten an ordinary inspection. Merrendee Public School received two regular inspections.

Three thousand and thirty-four pupils were examined in this section of the district. Subjoined are the results, together with a comparative statement of the percentages of those satisfying the standard for the years 1892 and 1893:—

| Subjects.            | Number of Pupils examined. | Percentage satisfying the Standard. |       | Subjects.           | Number of Pupils examined. | Percentage satisfying the Standard. |       |
|----------------------|----------------------------|-------------------------------------|-------|---------------------|----------------------------|-------------------------------------|-------|
|                      |                            | 1893.                               | 1892. |                     |                            | 1893.                               | 1892. |
| Reading .....        | 3,034                      | 70·7                                | 75·9  | Music .....         | 2,023                      | 52·7                                | 56·7  |
| Writing .....        | 3,007                      | 74·4                                | 78·7  | French .....        | 33                         | 100·                                | 65·7  |
| Dictation .....      | 2,469                      | 78·9                                | 82·   | Euclid .....        | 100                        | 73·                                 | 80·   |
| Arithmetic .....     | 2,797                      | 74·2                                | 80·2  | Algebra .....       | 24                         | 62·5                                | 66·4  |
| Grammar .....        | 1,154                      | 67·                                 | 67·2  | Mensuration .....   | 88                         | 62·5                                | 86·4  |
| Geography .....      | 1,154                      | 70·                                 | 75·2  | Latin .....         | 24                         | 66·6                                | 76·   |
| History—English ...  | 1,151                      | 70·9                                | 71·2  | Natural Science ... | 79                         | 82·                                 | 80·3  |
| „ Australian .....   | 272                        | 76·8                                | 73·8  | Trigonometry .....  | None examined.             |                                     |       |
| Scripture .....      | 2,709                      | 72·3                                | 70·0  | Needlework .....    | 1,160                      | 66·3                                | 69·   |
| Object Lessons ..... | 2,704                      | 69·6                                | 81·8  | Drill .....         | 2,752                      | 62·7                                | 62·2  |
| Drawing .....        | 2,730                      | 66·4                                | 72·   |                     |                            |                                     |       |

A slight decrease in the general average of results is shown. Reading and writing are imperfectly taught in many schools; music, drawing, and drill are badly taught in all but 18 schools.

#### Efficiency of Schools.

Two Public Schools, 5 Half-time, and 1 House-to-house were below the standard; 6 Public Schools, 2 Provisional, 4 Half-time, and 1 House-to-house reached it; and 50 Public Schools, 10 Provisional, 15 Half-time, and 5 House-to-house exceeded it. Thus 92 per cent. of the schools either satisfied or exceeded the requirements of standard.

The teachers under my supervision are classed as follows:—

|                    |    |
|--------------------|----|
| Class I A .....    | 1  |
| I B .....          | 0  |
| II A .....         | 11 |
| II B .....         | 6  |
| III A .....        | 34 |
| III B .....        | 10 |
| III C .....        | 5  |
| Unclassified ..... | 28 |
| Total .....        | 95 |

Of the unclassified teachers, 7 are ex-pupil-teachers.

#### Pupil-teachers.

|               |    |
|---------------|----|
| Class I ..... | 3  |
| II .....      | 3  |
| III .....     | 4  |
| IV .....      | 4  |
| Total .....   | 14 |

As a body, the teachers are painstaking, intelligent, and worthy of their honorable position. No serious complaint has been made against any teacher during the past year.

#### Summary.

*Summary.*

- (a) This section of the district is sufficiently provided with the means of education as contemplated by the Act.  
 (b) The material condition of the schools, with but few exceptions, is satisfactory.  
 (c) Slight decreases are shown in the enrolment and the average attendance for the year.  
 (d) The organisation of the schools is satisfactory, and the general discipline is good.

The general results indicate that steady and useful work has been done during the past year.

JOHN P. ROONEY,  
Inspector.

Mudgee, 30th December, 1893.

## ANNEX Z8.

## INSPECTOR BAILLIE'S REPORT.

THE number of Schools in the Dubbo Section of the Wellington District at the beginning of the year 1893 comprised :—

40 Public Schools.  
 10 Provisional Schools.  
 5 Half-time Schools.  
 11 House-to-house Schools.

making a total of 66 schools in operation.

The year closed with—

39 Public Schools.  
 8 Provisional Schools.  
 5 Half-time Schools.  
 11 House-to-house Schools.

Total, 63 in full working.

Two Public Schools (Timbriungie and Orandelbinnia), 1 Provisional (Plain Creek), and 1 House-to-house (Dappo Springs and Myall Camp), were closed through insufficient attendance. A House School has been established at Dunsbury. The Provisional School at Armatree was converted into a Public. The Half-time School at Gumbailie, which was worked in conjunction with the Half-time at Ford's Bridge, has been temporarily closed through small attendance.

*School Buildings.*

Under the Architect's supervision commodious school buildings have been erected at Trangie and Angledool; teachers' residences at Trangie and Byrock; a weathershead at Trangie; and additions to the Public School at North Bourke. The total cost was £2,376 14s. Under my own supervision small schools have been erected at Minore and Dunsbury, the former a Public, at a cost of £45, and the latter a House School built by the residents. The new building at Minore was to replace the old one destroyed by fire in 1892, and that at Dunsbury to establish a new school. Repairs of a more or less extensive nature have been effected at 22 schools and 2 residences, at a cost of £162 14s. 6d.

The Schools that underwent repairs are—Angledool, Armatree, Baradine, Belar Creek, Beni, Bourke, Brewarrina, Byrock, Collie, Coonabarabran, Dubbo, Eringonia, Ford's Bridge, Gilgandra, Goodooga, Louth, Mundooran, Narromine, Nevertire, Tooraweenah, Warren, and Willandra. The teachers' residences were Byrock and Warren. Repairs are being carried out at the Public School, Louth, at a cost of £28.

The accommodation at the end of 1892 showed that provision was made for 5,281 pupils, and at the close of the year 1893 there is sufficient space for 5,306 pupils, thus indicating a slight increase for the present year.

*Enrolment and Attendance.*

The enrolment and average attendance for the year were 4,620 and 2,435·6 respectively. The enrolment and average attendance for each quarter were :—

|                      | Enrolment. | Average attendance. |
|----------------------|------------|---------------------|
| First quarter .....  | 3,634      | 2,484·3             |
| Second quarter ..... | 3,629      | 2,431·8             |
| Third quarter .....  | 3,627      | 2,505·7             |
| Fourth quarter ..... | 3,534      | 2,232·5             |

During the last week of the second quarter the records of the Public School at Louth were destroyed by fire, hence no returns could be furnished from that school. The prevalence of measles and diphtheria reduced the attendance considerably during the last quarter of the year.

*Inspection, Instruction, and Discipline.*

All the schools in operation (with the exception of Dappo Springs, a House School, closed through small attendance before I visited that portion of the district) received a regular inspection, three an ordinary, and several received incidental visits as opportunity afforded. It is gratifying to state that of the 66 schools inspected 61 were above the standard, 2 up to, and only 3 below.

The number of pupils examined, their proficiency, and the percentage up to or above Standard are subjoined :—

| Subjects.              | Total number examined. | Number passed. | Percentage up to or above Standard. | Subjects.             | Total number examined. | Number passed. | Percentage up to or above Standard. |
|------------------------|------------------------|----------------|-------------------------------------|-----------------------|------------------------|----------------|-------------------------------------|
| Reading .....          | 2,594                  | 2,376          | 91·5                                | Drawing .....         | 2,374                  | 2,042          | 87·2                                |
| Writing .....          | 2,599                  | 2,290          | 88·1                                | Music .....           | 1,970                  | 1,425          | 72·3                                |
| Dictation .....        | 1,883                  | 1,356          | 71·8                                | French .....          | 7                      | 4              | 57·1                                |
| Arithmetic .....       | 2,594                  | 1,990          | 76·7                                | Euclid .....          | 105                    | 101            | 96·1                                |
| Grammar .....          | 824                    | 688            | 83·4                                | Algebra .....         | 20                     | 20             | 100·0                               |
| Geography .....        | 825                    | 695            | 84·2                                | Mensuration .....     | 147                    | 111            | 75·5                                |
| History, English ..... | 749                    | 567            | 75·5                                | Latin .....           | 20                     | 20             | 100·0                               |
| "    Australian .....  | 166                    | 153            | 92·1                                | Needlework .....      | 730                    | 632            | 86·5                                |
| Scripture .....        | 2,372                  | 1,754          | 73·9                                | Drill .....           | 2,255                  | 1,855          | 82·2                                |
| Object Lessons .....   | 2,382                  | 1,844          | 77·4                                | Natural Science ..... | 29                     | 29             | 100·0                               |

These percentages compare very favourably with those of 1892.

The

The discipline maintained without apparent effort on the part of teachers at 90 per cent. of the schools is highly commendable; the pupils are well behaved, courteous, and respectable. At about 10 per cent. of the schools, the order and discipline are rather lax through want of tact and firmness; the pupils are unsteady, noisy in their movements, and talkative; but I am induced to hope an improvement will be made before my next visit.

*Teaching Staff.*

The teachers, assistants, and pupil-teachers employed in this section of the district are, as a whole, earnest and diligent in their work, of good repute, and exemplary character.

*Classification.*

|                               | I. A. | I. B. | II. A. | II. B. | III. A. | III. B. | III. C. | Unclassified. | Total. |
|-------------------------------|-------|-------|--------|--------|---------|---------|---------|---------------|--------|
| Principal Teachers .....      | ...   | 1     | 6      | 5      | 9       | 8       | 6       | 23            | 58     |
| Mistress of Departments ..... | ...   | 1     | 2      | ...    | ...     | ...     | ...     | .....         | 3      |
| Assistants .....              | ...   | ...   | 1      | 2      | 3       | 1       | 1       | 5             | 13     |
| Totals.....                   | ...   | 2     | 9      | 7      | 12      | 9       | 7       | 23            | 74     |

|                      | Class I. | Class II. | Class III. | Class IV. | Total. |
|----------------------|----------|-----------|------------|-----------|--------|
| Pupil-teachers ..... | 2        | 3         | 4          | 4         | 13     |

In addition to the above, there is a sewing mistress at the Superior Public School, Dubbo.  
Total teachers of all ranks eighty-eight (88).

*Summary.*

1. The accommodation is more than sufficient, and is well distributed considering the extent of the district.
2. The progress made during the year is very satisfactory.
3. The teachers are as a body respectable, earnest, and loyal.
4. Judging from appearances, the ensuing year augurs further improvement and still better results.

J. W. E. BAILLIE.

Inspector.

Dubbo, 30th December, 1893.

ANNEX Z9.

REPORT OF THE PRINCIPAL OF THE TRAINING SCHOOL, FORT-STREET.

THE total enrolment of students for the year 1893 was 61. Seven of this number completed their course of training in March, thus leaving 54, who attended to the end of the year. Of these 7, three received permission to remain for the third year honor examination, at which they acquitted themselves most creditably. Those in attendance at the end of the year, viz., 54, may be classified thus—23 in the first year, 23 in the second, and 3 in the third year.

2. STAFF.

Some changes took place in the staff in October. The Minister then decided to amalgamate the offices of Principal of the Training College and Head Master of the Model School. Mr. J. D. St. Clair Maclardy is Master in Mathematics and Languages; Mr. Woodhouse, Drawing Master; and Mr. Alpen, Teacher of Music.

3. COURSE OF STUDY.

Students attending Sydney University.

First, second, or third year's course as prescribed by the Senate.

*School Management.*

Theory and History of Education. Public Instruction Act and Regulations.  
Practical School Management. The Kindergarten Principle.

*Drawing.*

Practical, Plane, and Solid Geometry. Perspective.  
Blackboard Practice.

*Music.*

Sutton's Theory of Music. Four Part Songs.  
Stainer's Harmony. Voice Training.

*Drill.*

Squad, Company, and Battalion Drill. Manual and Firing Exercise.  
Physical Drill, with and without Rifle. Single-stick Practice.

Juniors—not attending University.

*Reading.*

Shakespeare's King Lear.

*Grammar.*

Parsing, Analysis, Composition. Meiklejohn's Book of English.  
Lennie's Grammar.

*Art of Teaching.*

History of Education. Practical School Management.  
Public Instruction Act and Regulations. The Kindergarten Principle.

*Natural Science.*

Physics—Light, Heat, Magnetism, Electricity. Physiology.  
Inorganic Chemistry.

*Mathematics.*

*Mathematics.*

Arithmetic and Mensuration. Trigonometry, to Solution of Triangles, inclusive.  
 Euclid, Books I-XI, with deductions. Geometrical Conic Sections.  
 Algebra, Hamblin Smith (the whole).

*Latin.*

Arnold's Latin Prose Composition (Bradley). Livy—Book XXII.

*French.*

Macmillan's First Year's Course. Colomba by Prosper Mérimée.  
 Part of Macmillan's Second Year's Course.

*Music, Drawing, and Drill, as for University students.*

## 4. PRACTICAL TRAINING.

With the view of improving the purely professional qualifications of the students a systematic course of lectures on the Science and Practice of Teaching was given during the session. This was supplemented by practical work under supervision in the school-rooms, by specimen, test, and criticism lessons, and by visits to the Infant School where the Kindergarten system is exemplified.

## 5. MANUAL TRAINING.

The accommodation of the workshop provides for eleven students at a time, and the classes so formed attend in rotation three afternoons each week. In December an examination of first and second year students was held by the Technical Education authorities with the following satisfactory results :—

|                           | Nature of Pass. |              |               | Total. |
|---------------------------|-----------------|--------------|---------------|--------|
|                           | Honours.        | First Grade. | Second Grade. |        |
| First Year Students.....  | 2.              | 16           | 10            | 28     |
| Second Year Students..... | 4               | 11           | 8             | 23     |

## 6. EXAMINATIONS.

The Annual Examinations were held in December. In addition to the University Examination, the matriculated students were examined in the following professional subjects:—Reading, writing, art of teaching, drawing, music. The students not attending University lectures were examined in the subjects specified in the Course of Study. The following tables give particulars concerning the nature of the examinations, numbers in attendance, and the results :—

| Nature of Examination.                   | Number of Students. |          |
|--|---------------------|----------|
|  | Seniors.            | Juniors. |
| University, 1st year.....                | 15                  | 16       |
| „ 2nd „.....                             | 8                   | .....    |
| „ 3rd „.....                             | 3                   | .....    |
| Special Training School Examination..... | .....               | 12       |
| Totals.....                              | 26                  | 28       |

The number who passed was :—

| Nature of Examination.                   | Number of Students. |          |
|--|---------------------|----------|
|  | Seniors.            | Juniors. |
| University, 1st year.....                | 5                   | 10       |
| „ 2nd „.....                             | 6                   | .....    |
| „ 3rd „.....                             | 3                   | .....    |
| Special Training School Examination..... | .....               | 12       |
| Totals.....                              | 14                  | 22       |

It is pleasing to note that the 12 junior students who presented themselves for the examination held by the Department were successful. The 18 students who failed at the University Examinations will be granted a deferred examination in March, 1894. In the ranks of the students of this session there are many who, by reason of their good behaviour, their intelligence, industry, and sympathy with the young, give promise of becoming eminently useful teachers.

The list of scholarships at the close of the year was as follows :—

|                           | Senior. | Junior. |
|---------------------------|---------|---------|
| Scholarships.....         | 18      | 15      |
| Half scholarships.....    | 8       | 10      |
| Without scholarships..... | ...     | 3       |

## 7. TRAINING COLLEGE BATTALION.

This battalion, composed of students in training and pupil-teachers in attendance at Saturday classes, has received regular instruction in drill, and lectures on the rifle and how to use it. By means of a programme carefully arranged to give the minimum inconvenience to Head Masters, the pupil-teacher members have had the benefit of regular target practice at the Randwick rifle range. The students who form the senior company have had this privilege for years past. Captain Maclardy, who has charge of the battalion, takes an active interest in his work, and is ably assisted by Captain McCoy, Adjutant, and Captains Taylor, Maxwell, and Chaseling, in charge of companies. At the examination in drill held in December 20 seniors and 23 juniors were successful.

## 8. PUPIL-TEACHERS' CLASSES.

The following table gives the enrolment and attendance in the pupil-teachers' classes:—

| Classes.     | Enrolment. |          |        | Ordinary attendance. |
|--------------|------------|----------|--------|----------------------|
|              | Males.     | Females. | Total. |                      |
| I.....       | 45         | 92       | 137    | 129                  |
| II.....      | 35         | 71       | 106    | 100                  |
| III.....     | 39         | 90       | 129    | 123                  |
| IV.....      | 18         | 38       | 56     | 52                   |
| Totals ..... | 137        | 291      | 428    | 404                  |

The course of study for the year was music, drawing, drill (calisthenics for females), in the third and fourth classes, and Latin and French in the first and second classes. The teachers engaged at the Saturday classes were: Mr. Maclardy, M.A., Latin and French, class I, males; Mr. Smith, M.A., Latin, class I, females, French, class II, males; Dr. Thibault, French, class I, females; Mr. Taylor, M.A., LL.B., Latin and French, class II, females; Mr. Stephenson, M.A., Latin, class II, males; Mr. Alpen, Vocal Music, class III; Mr. Woodhouse and Miss Douglas, Drawing, class III; Mr. Cotterill, Vocal Music, class IV; Mr. Flannery and Mrs. O'Byrne, Drawing, class IV; Captain Mulholland, Calisthenics, females, classes III and IV; Warrant-Officer Murphy, Drill for all classes of males.

## TIME TABLE for Saturday Classes.

| Classes. | 9.15 to 10.15 a.m. | 10.15 to 11.10 a.m. | 11.20 to 12.15 p.m. |
|----------|--------------------|---------------------|---------------------|
| IV       | Music.             | Drawing.            | Drill.              |
| III      | Music.             | Drawing.            |                     |
|          | 9.15 to 10.45 a.m. | 11 to 12.15 p.m.    |                     |
| II       | Latin.             | French.             |                     |
| I        | Latin.             | French.             |                     |

The male pupil-teachers of the city and adjacent suburbs received instruction in Latin and French on Wednesday afternoon, from 4.30 to 5.30, in the Castlereagh-street Public School.

Most of the pupil teachers attending the Saturday and Wednesday classes are doing good work, and their general conduct, excepting in a few cases of unpunctuality, is satisfactory.

J. W. TURNER,  
Principal.

## ANNEX Z10.

## REPORT OF PRINCIPAL OF TRAINING SCHOOL, HURLSTONE.

## I. THE STUDENTS.

FIFTY-FOUR students have this year entered the Training School; one retired at the end of three months on account of ill health; one entered after the beginning of the session, in April, by special arrangement.

There were 23 Seniors or Second Year Students, of whom 16 were successful in matriculating. Of the seven who failed, two applied for and obtained permission to attend evening lectures at the University, and the remaining five have studied at the Training School for the Second Class certificate.

The health of the students has been good on the whole; any illness from which they may suffer is as a rule attributable to their four years' work as pupil-teachers immediately before entering upon further work at the Training School. Their general conduct has been excellent.

The respective examinations which the students are at present undergoing are as follows:—

|   | No. of Students. |          |
|---|------------------|----------|
|   | Seniors.         | Juniors. |
| University, 1st year .....                | 18               | ...      |
| Special Second Class Certificate .....    | 5                | ...      |
| Special Training School Examination ..... | ...              | 30       |
|   | 23               | 30       |

## II. COURSE OF STUDY.

1. For senior students attending the University:—

(a) At the University:—

*Latin.*Livy, Book 26; Virgil, *Æneid* 9 and 11.*French.*

Macmillan's Course, Third Year; Racine, "Britannicus"; Molière, "L'Avare"; Thierry, "Récits des Temps Mérovingiens."

*English.*

Lectures on Language; Dr. Morris' Grammar; Chaucer's "Nonne Preestes Tale"; Shakespeare's "Hamlet."

*Mathematics.*

Euclid: Books I-IV, VI, and XI. Algebra: Up to quadratic equations of two and three unknown quantities and corresponding problems; Surds; ratio; Trigonometry.

*Physics.**Chemistry.**Physiography.*

(b) At the Training School:—

*Art of Teaching and School Management.**Music.*

Theory and Practice.

*Drill.*

Calisthenics and School Drill.

*Drawing.*

Geometrical.

2. For the senior students studying at Hurlstone for second-class certificate:—

*English.*

Shakespeare's "King Lear"; Composition, Parsing, Analysis, and Prosody.

*French.*

MacMillan's Course, Third Year; Racine, "Britannicus"; Molière, "L'Avare"; Thierry, "Récits des Temps Mérovingiens."

*Mathematics.*

Arithmetic, Hamblin Smith's and Barnard Smith's Text-books; Todhunter's Mensuration, to chapter 13 (inclusive). Euclid, Books I, II, and III. Algebra, up to Surds.

*Natural Science.*

Elementary Chemistry and Physics.

*School Management.*

Instruction in Method; Compilation of School Records, Time-tables, and Lesson Programmes; Public Instruction Act and Regulations; History of Educational Reformers. Text-book: Gladman's School Work.

*Vocal Music.*

Practice, Staff Notation and Tonic Sol-fa; Sutton's Class-Book; Stainer's Harmony.

*Drawing.*

Geometrical.

*Latin.*Livy, Book 26; Virgil, *Æneid*, Book 9.*Drill.*

Calisthenics and School Drill.

3. For the junior students:—

*English.*

Meiklejohn's Book of English; Composition, Parsing, Analysis, Prosody; special study—"King Lear."

*French.*

MacMillan's French Course, Third Year; Prosper Mérimée, "Colomba."

*Latin.*

Smith's Latin Grammar; Arnold's composition; Livy, Book 22.

*Mathematics.*

Arithmetic, Practice and Theory; Euclid, Book I; Smith's Algebra.

*Natural Science.*

Physiology, Text-book, Murché; Elementary Chemistry; Elementary Physics.

*School Management.*

Gladman's School Work; Instruction in Method; Compilation of School Records, Time-tables, and Lesson Programmes; Public Instruction Act and Regulations; Kindergarten; History of Educational Reformers.

*Domestic*

*Domestic Economy.*

Needlework; Cookery.

*Vocal Music.*

Sutton's Class Book; Stainer's Harmony; Staff Notation; Tonic Sol-fa.

*Drawing.*

Blackboard, Freehand, Model, Geometrical, and Elementary Perspective.

*Drill.*

Calisthenics and School-drill.

## III. PRACTICAL TRAINING.

The practical training has this year consisted of:—

- a. Attendance in the Practising School.
- b. Special criticism lessons to classes drawn from Practising School, given weekly by students in presence of their fellow-students; the method and style of teaching criticised by the Principal, the students, and the mistress of the Practising School, Miss S. H. Nicholls.
- c. Weekly half-hour lessons in Theory of Music given by students to children and criticised by the Music Instructor.
- d. Gallery Lessons and Drill Orders given by students to fellow-students, and occasionally to children, and criticised by the Drill Instructor.

## IV.—KINDERGARTEN.

Kindergarten is taught for an hour on Saturday mornings to the students by the Mistress of the Kindergarten Department of the Model Public School at Fort-street.

## V.—JUNE EXAMINATION.

In June special examinations were held in Drawing and Needlework. In Geometrical Drawing 28 students presented themselves for examination and 19 passed; two presented themselves for examination in Perspective Drawing, and one passed. Thirty students were examined in Needlework, and all passed.

## VI.—THE PREMISES.

The grounds are in very good order, and very few repairs to the premises have been necessary. The tennis-lawns are in good condition, and are frequently used by the students.

MARY M. EVERITT,

Principal.

13 December, 1893.

## APPENDIX XIII.

## REPORT ON DRAWING.

EVERY school has been examined during the year, the results being shown in the accompanying tables. The same system of oral and practical examination, combined with inspection of the book work of the year, has been pursued. The teaching of Freehand and Geometry is improving, but that of object drawing leaves much to be desired, partly because teachers have frequently a very imperfect idea of the subject themselves, and partly because they rarely know how to teach it in the only way it can be taught—by practical demonstration. The work in the Infants Schools is certainly improving.

*Saturday Classes.*

I wish I could speak favourably of the work done in these classes. With some exceptions the pupil-teachers do not appreciate the advantages offered to them, and are, moreover, too apt to rely exclusively on the work done in the lesson (which hardly averages more than three-quarters of an hour), not realising the fact that these lessons are intended only to direct their own studies. Other causes operate against success. The idea is still far from being removed, that the power to draw objects is a natural gift, largely independent of the powers of reason and observation possessed by all, and this delusion being fostered by many teachers (as well as the outside public) tends to discourage effort. The lack of success I do not believe to depend in any way on my fellow-workers who are capable and thorough. In the hope to improve the quality of the work much time has been given every week to the correction and annotation of papers for the information of students, but in very few cases have I observed any wish to profit by the assistance thus given.

*"D" Certificate.*

With a view to furnishing a test more in accordance with the conditions and methods under which the teachers have to work in the conduct of their own classes, I proposed, and obtained the sanction of the Board of Examiners, for the use of enlarged copies in the examinations. These will also preclude any unfair means being resorted to, and the copies thus distributed should prove useful for class purposes to the schools they find their way to.

*Examinations.*

During the past year I have revised the papers of 320 applicant pupil-teachers, 992 pupil-teachers, 307 teachers, and 105 training students, a total of 1,724. Of the first-named, 66·8 per cent. passed; of pupil-teachers, 51·3 per cent.; of teachers, 57·3 per cent.

*High Schools.*

The death of Mr. Fotheringham deprives the High Schools of the services of a most thorough and efficient teacher who has done much to raise the standard of attainment in these schools. It will not be easy to fill his place with one in whom knowledge of teaching-method, technical skill and disciplinary tact are equally present.

At the annual inspection the work done in my presence by all classes, including that of the junior boys (under Mr. Wardrop) reached a most satisfactory level.

*Training*

*Training Schools.*

From causes I cannot explain, the work of both seniors and juniors (males) has not been quite equal to the average of past years. The work of the female students shows careful and thorough teaching.

*Results of Inspection.*

Appended are the results of my inspections, giving the percentage of passes in the departments and the average mark in the classes as compared with the results of last year.

| Schools. | Departments. | Classes. | Boys.  | Girls. | Infants. | Total. |
|----------|--------------|----------|--------|--------|----------|--------|
| 80       | 181          | 1,072    | 10,356 | 9,694  | 13,549   | 33,599 |

|               | Up to Standard. | Below Standard. | Total. | Percentage above. | Percentage, 1892. |
|---------------|-----------------|-----------------|--------|-------------------|-------------------|
| Boys .....    | 6,956           | 3,400           | 10,356 | 67·1              | 65·3              |
| Girls .....   | 6,237           | 3,457           | 9,694  | 64·3              | 64·0              |
| Infants ..... | 9,172           | 4,377           | 13,549 | 67·6              | 68·0              |
|               | 22,365          | 11,234          | 33,599 | 66·3              | 65·7              |

These show, I think, on their face some improvement, but any great advance in marks at this stage is not to be expected, and, in view of the more searching tests used, the progress is really greater than appears from a mere comparison of averages.

Sydney, 13 January, 1894.

FREDERIC W. WOODHOUSE,  
Superintendent of Drawing.

## APPENDIX XIV.

## REPORT ON SINGING.

OWING to the prevailing epidemic (the measles), great interruptions in teaching have taken place, and perhaps no subject suffered more than Vocal Music, yet notwithstanding this, the results are very satisfactory; the teaching has been more thorough, and as many classes were often much reduced in numbers, the remaining children have been taught to rely more on themselves. Thus I can state with confidence that there is a steady advance in reading at eight in our schools. More earnest attention has been paid to the teaching of the lower classes, and this has reacted favourably upon the upper classes.

That there is, year by year, a more vivid interest taken in Music is evidenced by the fact that amongst the successful candidates of the Trinity College (London) Music Examinations, were many of the children and pupil-teachers of our schools; a fair number also, notably from Redfern and Crown-street Superior Public Schools, took up Music at the University Examinations, showing thereby that some of our teachers are not afraid to go beyond our already high standard. The general results for both upper and lower classes are from fair to very fair (nearly very fair throughout), and if it be desirable to mention special schools which distinguished themselves, I would name:—Paddington (Girls' Department), and Fort-street (Boys' Department), which as a whole passed the best examination.

HUGO ALPEN,  
Superintendent of Music.

## APPENDIX XV.

## REPORT ON COOKERY.

THE work of this Department has steadily progressed during the year, and the results of the examinations held in June and December may be regarded as very satisfactory. The new teachers are becoming accustomed to the work and its responsibilities, and are more methodical, energetic, and self-reliant. The Head-mistresses of schools also better understand the scope of the system, and, with very few exceptions, co-operate heartily with the cookery teachers in carrying it out. Testimony to the value of our scheme of cookery instruction has been received during the year from many quarters. We have had visitors connected with the educational systems of England, the United States, Canada, and Victoria, who, after seeing the work in operation and examining carefully its details, have concurred in saying that the cookery instruction given in their respective countries will not bear comparison with our scheme for thoroughness, efficiency, economy, and the results obtained. Very gratifying and sometimes touching tributes are constantly being received from parents. A working man spared the time to come to this office from Blackfriars to express his gratitude for the teaching which had enabled his little daughter to provide wholesome economical meals for his family during the illness of the mother, and also to cook the more delicate food necessary for the invalid. A mother who supported her family by keeping a boarding-house, informed us that during the hard times last year she must have gone under but that her daughter's knowledge of cookery acquired in the Public School enabled her to save a cook's wages. Many more cases might be cited, showing the difference which has been made in the comfort and prosperity of homes, by the knowledge of cookery gained in our schools. Beyond this, several of our pupils are known to have utilized this instruction as a means of gaining a livelihood. The value to the State of the diffusion throughout girls' schools of a knowledge which so tends to the healthfulness, thrift, and good order of homes, is, I am convinced, incomparably greater than the moderate cost of imparting it.

Although many applications have been made for the establishment of cookery schools during the year it has not been found practicable to extend the teaching at present. When circumstances are more favourable, the claims of these schools will doubtless be considered.

*Attendance.*

*Attendance.*

|   |        |
|---|--------|
| The total enrolment for the year was 1,739, made up as follows :— |        |
| Public School children.....                                       | 1,435  |
| "    teachers.....  | 52     |
| Country Technical College students .....                          | 152    |
| Industrial School girls .....                                     | 100    |
|   | 1,739  |
| Number of attendances .....                                       | 38,004 |
| Number of teachers .....  | 11     |
| Number of Centres .....   | 10     |
| Number of Schools attending Centres .....                         | 26     |

*Results of Examinations.*

The schools when visited were found to be generally in a state of efficiency; in one or two instances, notably in the country, the report was excellent. The inhabitants of the towns in which Cookery Schools were conducted spoke unanimously in their praise, and in some cases gave handsome prizes for the best results. The practice may be collectively classed as good—method, good; theory, fair; cleanliness, very fair; economy in management, good; state of appliances, very fair; discipline, very good; conduct of scholars, excellent. The results of the certificate examinations were considerably affected by the sickness prevalent during the year: the theory being the weakest point. Attendance at every demonstration is absolutely necessary to enable pupils to pass the theory examination with credit.

*Results of Examination for Primary Certificate.*

Examined, 500. Passed—Honors, 29; 1st Grade, 195; 2nd Grade, 105—329. Failed to pass 171.

*Cost of Maintenance.*

|  |      |    |    |
|--|------|----|----|
|  | £    | s. | d. |
| Cost of provisions.....  | 708  | 15 | 7  |
| Cost of cleaning, gas, labour, and sundry expenses.....                      | 200  | 0  | 0  |
|  |      |    |    |
| Cr. by receipts .....  | £908 | 15 | 7  |
|  | 646  | 1  | 8  |
|  |      |    |    |
|  | £262 | 13 | 11 |
|  |      |    |    |
| Total cost to Department (exclusive of buildings, plant, and salaries) ..... | £262 | 13 | 11 |

With the exceptions of the directress and four teachers, the instruction is given by teachers already in the service of the Department. Premises are rented for four centres only; buildings belonging to the Department are used for the others, and, having been altered and refitted for cookery schools, no further expense is necessary for years to come.

A. FAWCETT STORY,  
Directress of Cookery.

## APPENDIX XVI.

## REPORT ON NEEDLEWORK.

THE needlework executed in the Metropolitan schools, during the past year, under the supervision of workmistresses, mistresses-in-charge, teachers' wives, and pupil-teachers has been good, varied, and useful, and will bear more than favourable comparison with that accomplished in the past three years.

I have examined and reported upon 78 schools in and about the Metropolitan district. This number includes Hurlstone Training College, the High School, Castlereagh-street, and the Randwick Asylum. In all, 11,060 pupils were present at examination. The above numbers do not include the examinations of needlework I have held for public school exhibitions, or for prizes and awards at the public school competitions.

The epidemic of measles in most of the schools in the Metropolitan district for the past year caused a decided falling off in the numbers present at needlework examinations, but the work of the absentees was retained and arranged for my inspection, and proved satisfactory.

This fact shows conclusively that the system of instruction in needlework continues to be thorough and effective.

Head mistresses, in most large schools, continue to take a strong interest in this subject, and evince the same pleasure at the success of pupils in this, as in other branches, thereby stimulating them in their endeavours to excel.

*Mixed Schools.*

I cannot speak too highly of the industry and patience displayed by mistresses, teachers' wives, and Infant School mistresses in charge of needlework in mixed schools. Many of these schools are far above the standard in this subject, dressmaking having been successfully introduced among the elder girls. The introduction of needlework in lower classes in these mixed schools continues to be a success. Young children are amused by the coloured cotton at sewing lesson, and become ambitious and expert in making small model clothing.

*Pupil-teachers.*

I may repeat, as in my last Annual Report, that in my incidental visits to schools, it was apparent that the pupil-teachers were attentive to the instructions of work mistresses, anxious to excel, showed the same proficiency in the art of needlework and design as formerly, and that the same aptitude and industry continue to prevail among them.

*Dressmaking.*

This subject still receives special attention from work-mistresses, and is carried out and made very general throughout all Metropolitan Schools.

A decided disadvantage in teaching this branch is the want of proper workrooms. This is a hindrance, as the fitting-on attracts attention, and disturbs the quiet and order necessary to sewing lesson.

*Method*

*Method and Order.*

Since the introduction of work-aprons and needle-books, the sewing classes in most schools present a very artistic and orderly appearance.

The effect and influence is very marked, as each girl cultivates independence by providing her own materials, and vies with her companions in neatness, and form, and in many cases, elegance of design.

In conclusion, I am pleased to be able to report continued diligence and application to duty, on the part of work-mistresses under my supervision during the past year; also, to speak highly of assistance accorded them by head mistresses and teachers in most Metropolitan Schools.

ANNIE DADLEY,

Directress of Needlework.

18 January, 1894.

## APPENDIX XVII.

## ARCHITECT'S REPORT.

BETWEEN the 1st January and 31st December, 1893, there have been handed to the Department ready for occupation, the undermentioned Public School buildings, &c. :—

| No. | Nature of Work.                                  | Accommodation. | Cost.                  |
|-----|--|----------------|------------------------|
| 42  | Public School buildings.....                     | 5,437          | £ s. d.<br>36,216 14 2 |
| 16  | Residences .....                                 | .....          | 19,437 15 5            |
| 10  | Weathersheds .....                               | .....          | 1,634 17 6             |
| 21  | Additions, providing accommodation .....         | 2,415          | 13,368 19 3            |
| 335 | Additions, &c., providing no accommodation ..... | .....          | 19,717 0 5             |

The school accommodation has thus been increased during the year by 7,582, at a cost of £49,585 13s. 5d. or an average cost of about £6 10s. 9d. per seat, as against 7,511, at a cost of £57,814 18s. 6d., or an average cost of about £7 14s. per seat last year.

Works have also been completed at the Technical Colleges at Ultimo and West Maitland, to the value of £632; and at the Technological Museum, Ultimo, £2,193 18s. 3d. were expended.

Contracts were in progress at the end of the year to the value of £6,943 17s. 4d., and accommodation for 983 will be thus provided at an average cost of £4 12s. per seat. (Five buildings—accommodating 941 pupils, at cost £4,402 16s. 6d.; 28 additions, &c., cost £2,032 0s. 10d., accommodating 42 pupils at £115 5s. 8d.; 1 residence, cost £505; 1 weathershed, £54).

The total outlay for works certified for by me during the year is £82,664 16s. 11d., in 1,900 certificates, averaging about £43 10s. 2d. each, against an outlay of £125,563 5s. 2d. in 1,832 certificates, in 1892.

The number of papers received and dealt with during the year is about 8,500, and the number of letters and reports, &c., written and despatched is 5,439. The contracts entered into numbered 323, for which contract documents had to be prepared, and many small works were carried out under Ministerial authority, for which contracts were not entered into.

During the year 623 plans and 494 specifications were prepared.

At the close of the year the staff consisted of 4 draftsmen, 3 junior draftsmen, 3 clerks, and 7 clerks of works. During the year the services of one temporary draftsman and one clerk of works were dispensed with in carrying out a policy of retrenchment. Owing to promotions one clerk was removed from this office, and placed in another branch, and a junior draftsman was placed on the clerical staff at a small salary, so that a saving of £233 per annum is made.

The officers serving under me have continued to do their work diligently, and in a satisfactory manner; and the buildings under my charge have been kept in repair as far as the limited funds at my disposal would admit.

WM. E. KEMP,

Architect for Public Schools.

## APPENDIX XVIII.

## BOARD OF EXAMINERS' REPORT.

The total number of examinations reported on was 2,979, as against 3,548 for the previous year, made up in the following manner:—

|                                   |       |
|-----------------------------------|-------|
| 1. Applicant Pupil-teachers ..... | 436   |
| 2. Pupil-teachers .....           | 1,055 |
| 3. Training Students .....        | 147   |
| 4. Teachers .....                 | 543   |
| 5. High School Candidates .....   | 793   |

## 1. Applicant Pupil-teachers (436) :—

(as against 716 in 1892).

|                               |     |
|-------------------------------|-----|
| Eligible for employment ..... | 268 |
| Ineligible .....              | 168 |

Percentage of passes, 61'4.

„ in 1892, 64'8.

## 2. Pupil-teachers (1,055) :—

(as against 648 in 1892).

|   |     |
|---|-----|
| Promoted from Class IV to Class III ..... | 308 |
| „ III „ II .....                          | 288 |
| „ II „ I .....                            | 196 |
| „ I „ Training .....                      | 143 |
| Examined in Drawing only .....            | 4   |
| Failed .....                              | 120 |

Percentage of passes, 88'6.

„ in 1892, 90'3.

3.

## 3. Candidates for Training (174) :—

|          |              |    |
|----------|--------------|----|
| Males—   | Passed ..... | 44 |
|          | Failed ..... | 12 |
| Females— | Passed.....  | 99 |
|          | Failed ..... | 19 |

## 4. Students in Training (147) :—

|                              |  |    |
|------------------------------|--|----|
| Males—                       |  |    |
| Juniors (not at University)— |  |    |
|                              | Recommended for III A, or Second Year's Training ..... | 15 |
|                              | III B .....  | 1  |
| Juniors (at University)—     |  |    |
|                              | Recommended for IIIA, or Second Year's Training .....  | 9  |
| Seniors (at University)—     |  |    |
|                              | Recommended for II A .....                             | 17 |
|                              | II B .....   | 3  |
|                              | III A .....  | 2  |
|                              | Examined for Drawing only .....                        | 16 |
| Females—                     |  |    |
| Juniors (not at University)— |  |    |
|                              | Recommended for III A, or Second Year's Training ..... | 36 |
| Seniors (not at University)— |  |    |
|                              | Recommended for II A .....                             | 9  |
| Seniors (at University)—     |  |    |
|                              | Recommended for II A .....                             | 9  |
|                              | Examined in Drawing only .....                         | 30 |

## 5. Teachers (543) :—

|                              |                                |     |
|------------------------------|--------------------------------|-----|
|                              | (as against 887 in 1892).      |     |
|                              | Recommended for I B .....      | 19  |
|                              | II A .....                     | 13  |
|                              | II B .....                     | 35  |
|                              | III A .....                    | 84  |
|                              | III B .....                    | 50  |
|                              | III C .....                    | 21  |
|                              | Examination cancelled .....    | 1   |
|                              | Retired from Examination ..... | 4   |
|                              | Examined in Drawing only ..... | 7   |
|                              | Failed .....                   | 309 |
| Per-centage of passes, 41·8. |                                |     |
| „                            | in 1892, 53·6.                 |     |

## 6. High School Candidates (798) :—

|                                       |                             |     |
|---------------------------------------|-----------------------------|-----|
|                                       | (as against 1,133 in 1892). |     |
|                                       | Passed .....                | 729 |
|                                       | Failed .....                | 69  |
| Scholarships were awarded as under :— |                             |     |
| Boys—                                 |                             |     |
|                                       | Sydney .....                | 15  |
|                                       | Maitland.....               | 10  |
| Girls—                                |                             |     |
|                                       | Sydney .....                | 15  |
|                                       | Maitland.....               | 10  |

|                                       | —                           | —   |
|                                       | 60                          |     |
| The following Bursaries were given :— |                             |     |
|                                       | Boys .....                  | 10  |
|                                       | Girls .....                 | 9   |
| Half Bursaries in Sydney :—           |                             |     |
|                                       | Boys .....                  | 5   |
|                                       | Girls .....                 | 5   |
|                                       | —                           | —   |
|                                       | 29                          |     |

There is a decrease of 280 applicant pupil-teachers examined as compared with 1892. This has happened through the excess of the supply above the requirements of the Department. The excess has consisted chiefly of female applicants.

The increased number of reports on pupil-teachers (viz., 407) over those of 1892 is due to the alteration by which all pupil-teachers are examined in December instead of half in June and half in December as heretofore.

The decrease of 344 in the number of teachers examined is due to several causes. In the first place, a large number have already qualified themselves for the positions they hold. Again, most of the large schools now have teachers holding the requisite classification as prescribed by the regulations; and further, an increasing number of small country schools are taught by ex-students who already hold a third or even second-class certificate.

In the case of the High School candidates, the decrease of 335 is no doubt largely the result of the financial depression from which the Colony has so long been suffering.

Taking the entire results, the average proficiency of those examined has reached about the same standard as that attained last year.

With reference to individual subjects, it must be said that much of the History sent in is of only moderate worth, and that very few of the third-class candidates do well in Domestic Economy. It is a general complaint by the members of the Board that candidates in many cases appear not to have read the text-books recommended.

R. N. MORRIS,  
Examiner.

## APPENDIX XIX.

## REPORT ON THE PUBLIC SCHOOLS CADET FORCE.

THE previous year closed with a total enrolment of 6,221 of all ranks, of which the Senior Cadets numbered 600.

During 1893 the strength of the Senior Cadets was considerably diminished, owing to no provision having been made on the Estimates for their maintenance; and at the close of the year several of these corps barely existed. The officers strove to keep the corps intact, with the hope that the Military Department would ultimately take them over; and negotiations were accordingly entered into with a view to the accomplishment of this object. Major-General Hutton was seen on the matter, and expressed himself as being strongly in favour of Senior Cadet Corps, and promised that, provided money could be spared for the purpose, he would recommend their maintenance in connection with the Military Department. Such provision has since been made, and the affiliation of Senior Cadet Corps with certain of the partially-paid regiments from the 1st January, 1894, has been decided on.

The retrenchment in the Cadet Branch has not only affected the Senior Cadets, but has also operated against an increase in the Cadet Force generally.

The reduction of the Cadet Vote from £11,818 in 1892 to £5,869 in 1893, a reduction of more than 50 per cent., prevented the formation of new corps, and lessened the advantages of existing ones. This, taken in conjunction with the inability of many parents to provide their boys with uniform, militated against the success of the Cadet Force as regards numbers.

Omitting the Senior Cadets, the total enrolment for the December quarter was 4,179.

In connection with the scheme of retrenchment, the *personnel* of the Cadet Staff was considerably altered. Major Strong, who was associated for so many years with the cadet movement as officer commanding the cadets previous to the reorganisation in 1889, was called upon to retire, and the services of Lieutenant Hilliard and of Warrant Officers Green and Thompson were dispensed with.

Lieutenant Hilliard was subsequently selected by the military authorities to proceed to India with Major H. P. Airey, D.S.O. of the New South Wales Artillery Regiment, and Captain Antill, of the Camden Mounted Rifles, for special training, with a view to his employment in the Military Department.

I was appointed Officer Commanding the Public Schools Cadet Force, with the added office of Superintendent of School Drill, Lieut.-Col. Paul, as the result of the retrenchment, being transferred to another position on the Cadet Staff.

The combining of these two offices will have the effect of connecting the cadet movement more closely with the drill work of the schools, of which it should be the outcome. This is the view generally held by teachers who interest themselves in cadet work, and is in effect one of the recommendations of the Committee appointed by the Minister in 1887 to report on the cadet question as affecting our schools.

Boys in Public Schools, whether they are cadets or not, are taught up to a certain point precisely the same drill, and as the principle of teaching rifle drill to all such boys over the age of twelve years is embodied in our school standard of proficiency, it only remains for the necessary provision of arms to be made in order that such instruction may become general. Those boys whose parents are prepared to provide them with uniforms should be allowed to join the Cadet Corps, and have the privilege of attending parades away from their schools, and of visiting the rifle ranges for target practice and for prize shooting.

To save expense the ordinary school drill with rifles might be conducted with the dummy rifle, while the cadets, by way of encouragement, should be supplied with an effective weapon.

One of the principal inducements for lads to join Cadet Corps is that they are thereby afforded opportunities for rifle practice. For several years our cadets have from various causes been deprived of opportunities for systematic target practice. Moreover, such practice as they have had has been with the Snider carbine, a weapon which only the bigger boys can handle with any degree of satisfaction.

The purchase by the Minister of a quantity of ammunition for the Braendlin Cadet carbine has increased cadets' advantages in this respect, and as the necessary appliances have been obtained for refilling the empty cartridge cases, the cost of rifle shooting for our cadets can be kept within reasonable limits.

Target practice in both town and country schools was confined principally to the second half of 1893, preparation for the Annual Cadet Challenge Shield Competition being the main object of the practice. In connection with this competition, which was held at Randwick, on Friday and Saturday, the 15th and 16th December, twenty-five schools sent representative teams. The shield was again won by the Orange Superior Public School team, this making the fourth consecutive win for the Orange School. Tamworth came second, and Dubbo third in the competition.

A silver medal (given by Mr. Beaton, of Waverley) for the highest individual scorer was won by Sergeant E. J. Goodyew, of the Newtown Superior Public School Corps.

In a subsequent match for Mr. Condy's Champion Shield, confined to top scorers of teams engaged in the Schools Challenge Shield Competition, the first place was obtained by Corporal H. Heane, of the Dubbo Superior Public School, Sergeant Goodyew, of Newtown, being second.

This shield, which cost twelve guineas, is the gift of Mr. F. Condy, of 346, Oxford-street, Sydney. Mr. Condy intends to give such a shield annually for competition among our cadets.

This generous offer was made through Captain Turner, of the Model Public School, in a letter, in which Mr. Condy says:—"I am an ardent admirer of military training for the youths of our schools, and I am a strong advocate for that particular branch which will enable them to become good marksmen. To encourage our boys in rifle practice, I have much pleasure in offering an annual prize in the form of a champion shield for competition among the public school cadets of New South Wales only. I place no restrictions on the management of the competition further than—

- 1st. That each competitor must be a *bonâ fide* pupil of a public school.
- 2nd. That the best shot in each event at the annual shooting competition of public school cadets shall be deemed eligible to fire for the shield.
- 3rd. That the shield become the property of the cadet making the highest aggregate marks in the shield competition.

4th. That the winner of one shield must not compete again for such a shield."

This is not the first occasion on which Mr. Condy has shown a practical interest in the promotion of rifle shooting among our lads, and his thoughtful liberality cannot be too highly commended. In former meetings of this kind the Snider carbine was used. The substitution of the Braendlin cadet carbine for the Snider made this year's meeting more interesting, and produced better results than formerly. Evidence of careful coaching on the part of the teachers was very manifest, notably in the case of several country corps.

Opportunities for meeting together in large numbers, as in camp years, were not afforded cadets in 1893. On two occasions, however, the Metropolitan cadets assembled for a special purpose, namely, on the 8th July and on the 11th November.

On the 8th July over a thousand cadets took part in a Vice-Regal review of the Military Forces, notwithstanding that the cadets were called out on short notice and during school vacation. On the 11th November 500 school cadets assembled at Botany and participated in certain field operations of the military forces, marching across country to Centennial Park before the close of the day.

The cadet movement in our schools has in it all the elements of success, and admits of ready expansion under more favourable circumstances than have obtained of late.

JOHN DETTMAN, Major,  
O.C. Public Schools Cadet Force and Superintendent of Drill.

## APPENDIX XX.

## REPORT ON TECHNICAL EDUCATION FOR 1893, WITH ANNEXES.

THE work of the Technical Education Branch for the year 1893 was carried on under conditions very different from those of previous years. The necessity for retrenchment in the public expenditure led to the cutting down of the Technical Education Vote to little more than half that of 1892. It therefore became necessary to confine the field of operations within comparatively narrow limits. In pursuance of this policy the following action was taken :—

- (a) The Branch Schools at the under-mentioned places were closed at the beginning of the year :— Burwood, Esk Bank, Kogarah, Marrickville, Neutral Bay, Orange, Paddington, Parramatta, Plattsburg, Stockton, and Waverley; the school at Broken Hill was allowed to continue until the end of the first term of 1893.
- (b) The following subjects were discontinued :—Ambulance Surgery, Anatomy and Physiology, Home Nursing for the Sick, Telegraphy, Latin, French, and Type-writing.
- (c) The teachers of the following subjects were allowed to continue teaching, to be remunerated only by the fees of the students, and to defray all expenses of lighting, cleaning, &c. :—Shorthand, Book-keeping, Mathematics, Calligraphy and Correspondence, Tailors' Cutting, Design, Cookery, Dresscutting, and Dressmaking. Several teachers declined to accept these conditions, and the classes consequently lapsed. Those who continued had to raise the fees, and this step naturally led to a decrease in the number of students. The Shorthand Classes connected with Public Schools have well nigh disappeared.

*Classes and Students.*

Although the commercial depression and financial collapse of the year have caused hundreds to be thrown out of employment, the technical classes that have been fully recognised have not only maintained the number of students attending in 1892, but in some cases show a larger attendance.

During the year 201 classes were in operation, but 14 of these were closed at the end of the first term. The classes continued all through the year numbered 187, and were thus distributed :—

|   | Under<br>salaried Teachers | On fees only. | Total. |
|---|----------------------------|---------------|--------|
| (a) Classes in operation—                   |                            |               |        |
| Sydney Technical College .....              | 56                         | 15            | 71     |
| Suburban classes .....                      | 9                          | 7             | 16     |
| Classes in country towns .....              | 75                         | 8             | 83     |
| Classes connected with Public Schools.....  | 8                          | 9             | 17     |
| Totals .....                                | 148                        | 39            | 187    |
| (b) Enrolment of Students—                  |                            |               |        |
| Sydney Technical College .....              |                            | 3,016         |        |
| Suburban classes .....                      |                            | 552           |        |
| Classes in country towns.....               |                            | 2,881         |        |
| Classes connected with Public Schools ..... |                            | 647           |        |
|   |                            | 7,096         |        |

Deducting from the total enrolment all cases where the students have joined two or more classes, the number of individual students entered on our books for the year was 5,662; the weekly average of individual students was 3,962·4

The Cookery classes under the Directress of Cookery are not included in these returns.

*Teaching Staff.*

The retrenchment policy necessarily led to a great reduction in the staff of teachers.

In 1892, 128 persons were employed; now there are only 86, and 23 of these receive no remuneration but the fees of the students.

Teachers whose classes were closed, or whose salary was withdrawn, were granted full pay for the months of January and February.

The Teaching Staff consists of—

- 11 Lecturers in charge of Departments.
- 5 Resident Masters in charge of branch schools.
- 33 Teachers.
- 14 Assistant Teachers.
- 23 Teachers in charge of classes without salary.

I cannot report too favourably upon the character and conduct of all employed in the work of teaching. They are loyal, enthusiastically devoted to their work, and thoroughly efficient. All are men who have learnt their work from the practical side, and can therefore show how theory can be applied in practice; they are trained workers endeavouring to teach the principles upon which the various methods and processes of industrial operations are based, and the application of those principles to ordinary workshop practice.

*Instruction.*

The prescribed course of instruction has been followed faithfully and energetically. Throughout all the classes a higher standard of work has been aimed at and reached. In nearly all the classes great use is made of lantern slides. By means of the lantern and slides diagrams that would take hours to sketch properly on the blackboard are placed before the pupils at a moment's notice. The advantages of this practice are obvious. Nearly all the slides are prepared in the College by the Operator. During 1893 slides were made for the different classes as follows :—

|   |    |
|---|----|
| Electrical Engineering .....            | 74 |
| Mechanical Engineering .....            | 47 |
| Sanitary Engineering and Plumbing ..... | 59 |
| Building Construction .....             | 72 |
| Geology .....                           | 36 |
| Mining .....                            | 14 |
| Sheep and Wool Training .....           | 44 |
| Agriculture .....                       | 15 |
| Bee-keeping .....                       | 20 |

The fact that most of the teachers are actively engaged in the various trades or professions, and thus in close touch with all forward movements or new processes, is a decided benefit, and helps to keep the instruction fully abreast of modern developments.

The

The following is a detailed account of the work done in the more important classes of the Sydney Technical College and in the larger branch schools :—

*Agriculture.*

The enrolments of students during the session was 225, an increase of 58 upon the enrolments during 1892. The classes of the year were—(1) Afternoon, for the study of subjects suitable for urban residents, and so arranged as to be convenient for ladies and others who cannot attend the regular course in evening classes; (2) Elementary, for the study and practice of the elements of the various branches of agriculture; (3) Advanced or science class (Chemistry of Agriculture), with the use of apparatus, and the more advanced principles and science of agriculture are taught, and the subjects are worked out by the students of this class. Three classes are carried on in the Technical College and two each at Hornsby and Granville, the latter under the care of Mr. Henry Lord, Assistant in the Sydney Classes. The enrolments were :—

|                  |    |
|------------------|----|
| Afternoon.....   | 25 |
| Elementary ..... | 97 |
| Advanced .....   | 94 |
| Hornsby .....    | 21 |
| Granville .....  | 48 |

During the year special attention was given to the nature and methods found effective in checking fungus, bacteria, and other enemies of agriculture. The lessons were continuous, there were no breaks, and the average attendance continued high in all weathers. Twenty-five practical lessons in the field were given during the session, the average attendance of students being 45. Students pay their own fares and expenses, and I am glad to acknowledge the courtesy and consideration of the railway authorities, who have afforded every convenience in their power for the various journeys made. The students going in such large parties for actual work in the field travel for half the ordinary rates.

During the session 54 students from these classes have entered upon land occupation in the various branches of grazing, farming, or garden work. Thirty-two have left town for country life; and, in many of these cases, it has been a pleasant part of Mr. Mackay's duty to aid in the laying out of the land for fencing, clearing, building, draining, and cultivation purposes. The field lessons have proved very effective in preparing for the change from town to country life, affording as they do opportunity for becoming acquainted with the difficulties as well as the advantages of settlement upon the land. The outdoor work includes examination of soils, grasses, trees, &c., and their value for agricultural purposes: the rudiments of agricultural geology and practical botany, draining of the land, making and use of manures, ploughing, harrowing, seed sowing, planting, digging, use of implements, European and Chinese gardening, grape picking, wine making, pruning of trees and vines, budding, grafting and other methods of propagation, working with bees, honey extracting, management of horses, cattle, sheep, pigs and poultry, and other subjects, as irrigation, treatment of diseases of plants.

In the advanced class much attention has been given to the compounding and chemistry of manures, and manuring, to chilling and freezing, the making of syrups, fruit-growing, bottling, canning and candying, the composition and use of spray mixtures for destroying insect and fungus pests, and various other operations of direct use to those engaged in agricultural pursuits. Many of the students have become quite expert in manipulations of this kind, and all take real interest in the work. In addition to the regular class work in the College and out of doors, large numbers of soils, samples of water, &c., have been analysed for students and others. The advanced students, both men and women, do this work for themselves. The conduct and desire for work all through the session have been very gratifying. Prizes were given during the session for special papers on drainage for cultivation purposes. Sixteen papers were sent in; that of Hugh R. Fear, of the Hornsby Class, was awarded first prize, and has been printed as an exceptionally valuable contribution to draining experiences in this country. The other papers were so evenly good that the minor prizes were awarded to each. During the year investigations concerning plant diseases have been made in the Hornsby district, at Carlingford and Guilford, and information in numerous cases has been supplied when specimens were sent to the College. Lectures were given at Mangrove Creek, at Hornsby and Thornleigh, and similar requests have been made for Canley Vale and Carlingford. At the end of 1892, Mr. Mackay, at the special request of the sugar-growers in the Clarence district, was sent to investigate the diseases in the sugar cane. Mr. Mackay's report was presented to the Honorable John See, and copies placed in the local papers and in the *Daily Telegraph* of 11th January. Investigations made at a later date by Dr. Cobb confirmed the conclusions arrived at by Mr. Mackay.

*Sheep and Wool Training.*

The term commenced on the 6th February and terminated on the 31st July. On the opening day 13 students commenced work before mid-day, and the numbers gradually increased to 27 by the end of the month, and to 40 by the end of April, when applications had to be refused for want of room. All through the term the accommodation was taxed to the utmost, and great difficulty was experienced in doing justice to the students, as the work is practical, and each student must have his work examined separately each day. The young men attending this branch may be divided into three classes :—1st. Those who have a fair knowledge of wool, who have been classing on stations and are desirous to finish learning their trade—to these may be added sons of station overseers, managers, and station owners. 2nd. Young men who know a little about wool, many of whom have left clerkships to learn wool-classing, &c. 3rd. Youths just left school and come for a term of years. The difficulties of working so many students of varied experiences can be understood.

The class is a decided success and now well established, and from the present outlook many applicants will not be able to secure admission for the 1894 term. The work is practical, with one afternoon each week devoted to lectures and examinations. Wool-classing is the principal subject taught, whilst wool-scouring and sheep classing have their places in the daily work, and special attention is given to all work relating to handling wool, as in a sheep-shearing shed. Wool sales are visited, when each lot is inspected and valued. These branches give a wide field for instruction, and should thoroughly qualify an industrious student to undertake a responsible position in any branch of the trade. The examinations are conducted by a Board of Examiners at the end of each term, when the students who pass are awarded full or provisional certificates; the former only to those who have had at least two years' practical experience on a station. The results of these examinations have far exceeded expectations as regards success. The successful students were engaged as classers during the late shearing season. Those students who do not hold certificates, go, during shearing, as skirter, rollers, piece sorters, working at a kind of labour that wool growers find great difficulty in getting properly done. The report as to the work of these young students is very favourable. Arrangements were made on several occasions for students to go to hold sheep, &c., for judges. Secretaries and judges were ever ready and willing to give assistance and information about sheep. During the last sheep sales in Sydney a stud ram was presented to the Department to be used as a model for sheep instruction. He has been killed and the skin preserved, and, with the assistance of the College carpenter and engineer, has been mounted ready for the class, and will be a most valuable addition for sheep instruction.

*Wool Sorting.—Evening Class.*

This year has been one of the best as regards numbers and results since the formation of the class. In the first term there were 22 students on the roll, second term 28, and third term 28. The lessons have consisted of opening, skirting, re-rolling and classing selectors' lots, all of which have been performed to the entire satisfaction of the teacher.

*Art.*

*Art.*

The classes in the Art Department have, upon the whole, progressed not only in the number of students attending, but in what is of greater importance, the quality of work done; this is specially the case in Freehand, Model and Object Drawing, and Modelling. The following is a list of the College classes and enrolments for the year :—

|   |     |
|---|-----|
| Freehand Drawing .....                    | 251 |
| Model and Object Drawing.....             | 130 |
| Perspective .....                         | 32  |
| Geometrical Drawing .....                 | 30  |
| Sciography and Descriptive Geometry ..... | 14  |
| Modelling .....                           | 53  |

The third year Freehand course prescribed in the syllabus has been passed through for the first time in the history of the College, and it has been greatly appreciated by both students and teachers. The day classes have been well attended, and now that the students are aware that there are higher studies for them to work for, there is every probability that these classes will increase in numbers and in usefulness, and become a prominent feature of the College work. The new series of plaster casts for the first year course in Freehand Drawing was introduced at the beginning of the year, and has been used in the instruction of all the classes under the branch. These casts have been designed, modelled, and cast at the College, and are larger and better defined than those formerly in use. Every care has been taken to make the studies interesting in form and subject. The course comprises free and conventional ornament, foliage, flowers, and fruit modelled direct from nature. The second year course, which includes excellent casts of typical Australian birds and quadrupeds, modelled from specimens in the Australian Museum, has been completed, and will be distributed to all the classes in time for commencing the studies of 1894.

The Modelling Class made a bad start in point of attendance, but the number of students increased steadily, and in the latter half of the year the enrolment and average attendance were the highest yet reached. The day class consists chiefly of ladies, the evening class of artists, craftsmen, and apprentices. Very good work has been done, and students who sent work to South Kensington have succeeded in gaining medals and prizes. The addition of the potter's wheel and lathe to the class apparatus has been of great service. The students have been enabled to perform work hitherto impossible, and have been furnished with means of testing and illustrating the nature and uses of our local clays. Lectures have been delivered each term; they were well attended, and have proved of great benefit. The conduct of the students in all the art classes has been all that could be desired. The attention to instruction and application to work has been very marked.

*Architecture.*

The work of the classes in the Department of Architecture during the year has been maintained with the usual effort to keep it abreast with, if not ahead of, its past reputation.

The great depression throughout Australia, and in the building trades generally—during the past year 60 per cent. of workmen reported to be out of employment—has, as a matter of course, prevented such an increase in the numbers of students as would probably otherwise have attended the instruction given in the various classes.

The enrolments for the year were—

|   |    |
|---|----|

The average daily attendance has, however, notwithstanding the slackness in the building trades, steadily increased. The students since the regular course of instruction has been introduced seem to enter into the various branches of their work with greater enthusiasm than formerly, and it is probable that their numbers will gradually increase as the system now being carried out becomes more generally known. It may be claimed that the syllabus of the work entered upon during the session is equal to that of any similar department in other technical institutions. Architectural draftsmen and pupils in offices of architects, master builders, foremen, operative tradesmen and apprentices all take from time to time advantage of some of the various classes. Whilst this wide range of students is proof of the general regard in which the classes are held, it should be remembered that the instruction fulfils one of its most important functions in teaching many of our future tradesmen both the theory and the practice of the calling they intend to pursue. Apprenticeships here in most of the trades are limited, being discountenanced by employers generally, and thereby the work of the Technical College is all the more advisable; if not indispensable.

The appliances which are now at the College have raised the educative power of the institution to a very high standard. The proximity of the Museum and the establishment of the Library within the College itself are valuable elements for teaching purposes, and have been taken advantage of to a very great degree with doubtless good results. Visits to works of diverse character connected with the department have been made, and are intended to be continued in order to bring the manufactures used in building and their proper method of fixing before the students in a practical manner, thereby affording them an opportunity of information which otherwise they might have difficulty in obtaining. It is the intention in future to draw the whole of the department more closely together than hitherto by bringing the students in the classes of Masonry, Stone and Marble Carving, Bricklaying, Carpentry, and Cabinet-making—as well as the students in Sanitary Engineering—more in contact with the scientific and artistic sections of drawing and designs, together with building construction, in the belief that such an amalgamation will be beneficial to the students individually as well as increase the *esprit de corps* in the department as a whole.

*Industrial and Decorative Art.*

The attendance at the classes has been good and steady throughout the year, showing a gradual increase from the beginning of the first term; the last four weeks of the third term have been exceptionally good. The classes in this department comprise House Painting, Graining, and Marbling, Sign-writing, Advanced Sign-writing, Decoration (elementary), and Art Decoration (advanced).

In the *House Painting* class the students have been taught the names and uses of the different brushes and materials used in painting and the mixing and use of colours in water, spirit, and oil. An important item in this course of instruction has been the production of tints and shades of colours from a given list of pigments. Staining, sizing, and varnishing have been taught in a practical manner, and the students have been able to produce their own stains from proper materials. The various processes and methods of painting have been explained to the students, and they have also worked out arrangements of colour in an elementary form suitable for the colouring of a house. Stencilling has been taught practically, and the students have produced good and efficient work in distemper colour and in spirit colour.

*Graining and Marbling Class.*—This is an advanced class of the foregoing subject, or it can be taken separately, as many that join the class are engaged in the painting trade during the day, but have no opportunity of practising a higher branch in their business. Other students come for improvement

in

in their work. Independent of its trade value, this subject enables the student to educate hand and eye at the same time. The students have been first taught the elementary forms to be found in various woods and marbles; the materials, colours, and methods of execution have been thoroughly explained as they advanced. The workmanship shown by the students in this class has been above the average in quality.

*Sign-writing Class.*—The course of instruction given in this class comprises the formation of letters and alphabets of the most approved characters. Not only to the student engaged in sign-writing, but to the lithographer, carver, draughtsman, or any craft where letters are used it will be of great value. The students have been first taught the drafting of letters with chalk on a blackboard; the alphabets used have been specially arranged, and the letters divided into square, angle, combination, and curve. When sufficiently advanced the pupils have been taught the use of the brush, and the drawing continued with it; colour has then been introduced, and various given methods and combinations produced by the students in a practical manner on cardboard, &c. The use of gold on glass has been taught, and the difficulties of workmanship explained, and very creditable specimens of letter and ornament have been produced. The whole of the work executed by the students in this class has been above the average, and in two or three instances beyond anything yet attempted by them.

*Art Decoration Class.*—Under this heading a system of instruction has been given of great value in various crafts and trades. The students have been taught to draw in a bold, free manner with charcoal, and the use of the brush in the production of ornamental designs has been encouraged from the commencement of the course. A complete system of industrial design has been taught, consisting of adapting a given scroll or irregular ornament to the purposes of a cornerpiece, break, panel, pilaster, border, or other required ornament; and the transferring of it to properly prepared grounds has been practically worked out by the students. The more advanced students have also executed practically a series of ornament in proper flat colours as it would actually be done in the workshop, the series consisted of flat and relieved ornament both in monochrome and in colours. A Theoretical course has also been given explaining the use of colour in ornament and the different processes and treatment of oil colour, spirit colour, and distemper colour, &c. The whole of the work done in this class has been up to the standard of past years, and some of the students have shown particular dexterity of hand in the production and execution of ornament.

*Appliances and Apparatus.*—The present appliances and apparatus for teaching purposes are in good working order, but are insufficient for the number of students attending the classes, and more apparatus in the shape of models and diagrams is needed. It would be better if colour lessons could be given by daylight, as it is rather a difficult matter to mix and match colours by gas-light. Day classes in Applied Decorative Art will probably be established at no distant date; the colour lessons can then be transferred to them with great advantage to the students. The students still continue to express their satisfaction with the course of instruction given in these classes, and regret the loss of lessons if circumstances compel them to leave the College during the terms.

The whole course of instruction given in this department is education bearing on trade, more than a purely trade education; the idea being to place in the hands of the student sufficient information which with practical dexterity will enable him to thoroughly understand all that is going on around him in his own particular trade or vocation, and by the knowledge of the different materials, tools, methods, and processes to help himself and produce work original both in thought and execution.

#### *Chemistry.*

The Chemistry classes may be said to have fairly started in the permanent laboratory only at the beginning of this year. The attendances have been considerably interfered with in consequence of the financial troubles of the year. The reason of this is that a number of students attend the Chemistry classes for the sake of general education, without any idea of using it in their business; many of them are employed in banks and similar institutions, and during half the second and all the third terms they were occupied in the evenings with their own work. The conduct of the students has been excellent, and those who have attended regularly have done good work. Of the students attending the laboratory during the day for quantitative analysis and metallurgy, three left at the end of the first term, two being ready to take situations and one to pursue his studies in England. Three students have attended for a short time, each to learn the process for testing tallow. This is a comparatively simple process, but others have wished to learn in a week or two how to make elaborate analyses such as would take years of training, and these have had to be refused. The stocks of apparatus and re-agents have been kept up and are in good order; the latter is effected more easily now than formerly, the laboratory being well ventilated and kept clean without much difficulty. Several visitors from England have expressed themselves as highly pleased with the general arrangements of the laboratory, and they were persons qualified to judge of them. The great temporary depression in everything, but especially in mining, has rendered it difficult for ex-students, however well qualified, to obtain employment at present. A number of students now occupy important positions on mines, sugar plantations, &c., in the various Australian colonies, and one reports that he is doing well at Washington, U.S.A.

#### *Mechanical Engineering.*

Although business connected with the iron trades has been almost dead during the year, as many as 70 per cent. of the workmen being out of employment, the classes of this department have maintained an attendance equal to the best of any previous year, as the following return of the enrolments will show:—

|                           |    |                         |    |
|---------------------------|----|-------------------------|----|
| Applied Mechanics .....   | 35 | Pattern-making .....    | 18 |
| Mechanical Drawing .....  | 89 | Blacksmithing .....     | 31 |
| Fitting and Turning ..... | 99 | Iron-founding .....     | 13 |
| Boiler-making .....       | 32 | Carriage-building ..... | 20 |

The students, with very few exceptions, belong to the iron trades. They have been very attentive to instruction, and have conducted themselves in an exemplary manner, not one instance of unruly conduct having been reported. The following is a detailed account of the work of each class:—

*Applied Mechanics.*—The pupils of this class are studious, well-educated, and of an age to appreciate the instruction. Besides passing through the courses of lectures prescribed in the calendar, they have been taken to inspect works such as the North Shore engine building, the water works, the Middle Harbour suspension bridge, and also the engine-rooms of the Orient Line steamers. By the kindness of the Engineering Association they have also been enabled to join in the excursions of that body. Those students who have availed themselves of this privilege have learned much, not only from what they saw, but also from the discussions of experienced engineers and their remarks upon matters of novelty and interest.

Various experiments as to the strength of materials have been made during each term, but when the new testing machine is available for use—as it will be in the course of a few weeks—more important and more delicate tests will be made. The information acquired in this way will be very serviceable to the students, especially to those who are studying with a view of qualifying themselves for construction work.

*Mechanical Drawing.*—In order to raise the proficiency of the students of these classes special attention has been paid to the freehand sketching of various parts of machines, then taking dimensions, and from the sketch making the working drawing. This is a most useful addition to the course of instruction, for, though numbers of engineers can make a good freehand drawing that they can understand themselves,

themselves, many are unable to execute a properly-dimensioned sketch for the draftsman. During the year new copies of a superior kind have been supplied, and have been regarded as a great boon to teachers and students. Eminent engineers to whom these copies have been shown have praised them in the highest terms.

*Fitting and Turning.*—Though the enrolment of this class is lower than it was last year, the attendance is higher. More students have attended for two or three evenings per week than formerly, and more have completed the year's course. During the last term it was not uncommon to find 75 per cent. of the students present. The accommodation has been fully taxed, and the whole of the machinery kept in constant use. Indeed the time is fast approaching when the necessities of the class will render the supply of additional machines imperative. The first year students have gone through a thorough practical training in all hand tools used in engineering, first learning to use the hammer, chipping with cross-cut and flat chisels, and filing flat surfaces. Then they were taken to the vyce, and received practical lessons in fitting, such as fitting brasses in plummer blocks, feathers or sunk keys in shafts, reversing links or quadrants, cutting key ways by hand, and making numerous parts of engine gear, which they are not trusted with in their daily shop work. These students are also making four pairs of compound engines of 6 horse-power each. The second year students are made thoroughly conversant with the structure and working of planing, shaping, slotting, milling and boring machines, and all kinds of lathes used in engineering workshops. They have received practical lessons in cutting teeth in wheels and pinions; milling joints, square and hexagonal spindles; slotting key ways in wheels, connecting rod ends in jaws, crank webs; boring out with cutter bar and cutter. It very frequently happens that pupils have a very good knowledge of certain machines, but have not the slightest idea of setting out their work. This is the result of the necessarily partial training of apprentices in the workshops, where the aim must be to employ every man and boy, so as to bring most profit to the employer. Screw-cutting, right and left, is a special feature of the second year work. The development, construction, and uses of various kinds of lathes are discussed in minute detail, so that the students may gain a perfect insight into these most important workshop tools. The instruction is both theoretical and practical. The rules for calculating the required number of teeth in change wheels are very carefully explained and exemplified. The students are made to understand the different proportion of lever or dead weight safety valves, and section of steel for spiral spring safety valves.

During the winter months visits were paid on Saturday afternoons to large establishments, as Mort's Dock, Sydney Gas Works, Crown-street Pumping Station, and also to large ocean steamers. The engineers in charge placed all possible facilities in the way of students acquiring information about the machinery, so that these outings have been both pleasant and profitable. The following specimens of students' work are on view in the workshop:—Built crank shafts, screws, diamond thread, connecting rods, cylinders, wheels, and pinions.

*Pattern-making.*—Though this class is comparatively small, the attendance for the year is the best yet reached. The work done has been of a varied character. The Iron-moulding Class made numerous requests for patterns, the castings from which were supplied to the Fitting and Turning and Boiler-making Classes. The patterns included pulleys, moulding-boxes, blocks on surface plates, core-boards and core-boxes, and a number of small articles required in moulding. There are also in a very forward state patterns for a compound launch engine.

*Iron Founding.*—This class has now been in operation for over a year, and has turned out good work of green sand, dry sand, and loam castings, comprising screw propellers, pumps, worms, pulleys, sheaves, &c. The appliances are rather limited, and it has been necessary to borrow some tools. Facing sand, loam, and core sand have been given. It is hoped that when the loam mill, parts of which have been cast by the students, is completed, we shall be able to mix our own sands and loam; and have the opportunity of teaching a class of work hitherto untouched. Donations of patterns have been made by Messrs. G. and C. Hoskins, and G. Ashcroft & Co. for the use of the class. The course of instruction will be extended in 1894, so as to embrace brass founding, and the use of aluminium as applied to cast-iron.

*Boiler-making.*—The enrolment of this class is the best recorded. This is very gratifying when the state of trade is considered. The instruction has been extensive and thorough. By the kindness of the Atlas Engineering Co., who presented an old marine boiler to the College, opportunity has been afforded of showing the different methods of repairing damaged or defective boilers.

*Blacksmithing.*—This class has been fairly attended. Many of the students are not blacksmiths, but have taken up the work so as to complete their engineering course. Work done in this class has now passed through the hands of the fitter and turner; it consists of joints, valve spindles, ball stanchions, &c. The workshop occupied by the blacksmiths and boiler-makers has suffered from defective ventilation, but this will be remedied before the next term.

*Carriage Building.*—This class was poorly attended at the beginning of the year, a number of the best students having obtained situations away from Sydney. These were lost to the class, but their success induced others to join so that in the second and third terms, there were quite as many students as the class-room can accommodate. A complete and high class of work has been gone through. Lectures have been given regularly each term on the following and kindred subjects:—Timbers suitable for carriage building; their relative advantages and defects as to durability, strength, and suitability for painting and general finish; use of springs for pleasure carriages or merchandise waggons; wheels and wheel making; distribution of loads and distribution of draughts on two- and four-wheeled vehicles; buggy suspension on English and American principles; carriage design, proportioning heights, lengths and widths of shafts for various size of horse; general appointment and finishing of carriages, drawings to scale, and of full size, of all important parts and of complete vehicles have been prepared in the class, and then the parts represented have been made.

#### *Electrical Engineering and Physics.*

Changes in the teaching staff have interfered with the class work. Forty lectures were given during the year on each of the following subjects:—Elementary Electrical Engineering, Advanced Electrical Engineering, Electricity and Magnetism (Physics); and in addition a laboratory class with 13 lessons of two hours each was held in connection with the Electrical Engineering classes.

In the Elementary Electrical Engineering class the subjects taken up were:—The fundamental laws of Electricity and Magnetism, design, construction, and use of measuring instruments, dynamos, arc and incandescent lamps, accumulators, conductors, &c., distribution of electricity for lighting purposes, &c., accompanied by experimental proofs of fundamental laws, testing, &c., in the laboratory.

The work of the Advanced Electrical Engineering class was devoted generally to principles, design, laws of and construction of electro-motors for various purposes, electric railways, overhead and underground construction, storage traction, &c. The laboratory course, instituted only at the beginning of the third term, was the same for Elementary and Advanced classes.

The work of the Physics class consisted of lectures and experimental proof of the physical laws of Electricity and Magnetism.

This department will be re-modelled, and placed on a permanent and satisfactory basis before the work is resumed.

#### *Geology and Mineralogy.*

The attendance at the beginning of the session was small comparatively, but increased considerably during the second term. A number of students have attended the classes for a few months for special purposes, and there has been no way of recording their work by examination. Principally those who work in this way are young men who desire to engage in mining, and gaining the particular knowledge they

they require go away to different mining fields : generally the information required is how to recognise in the field all the more common metals and their associated minerals, and how to work them. Amongst those who have left the classes in this way some have gone to Queensland and Western Australia, others have been content to apply their acquired knowledge to the finding and working of mineral deposits in New South Wales.

Practical geological work has been carried on every alternate Saturday afternoon in different localities in the vicinity of Sydney, and a discovery made by Mr. Dunstan of an inexhaustible bed of fossils near Manly [see Royal Society's Proceedings, 1893], will, I hope, partly remove from the minds of students and others the idea that the geological features of Sydney are uninteresting from a paleontological point of view. There have been numerous inquiries from miners and others concerning minerals and mining matters generally, and Mr. Dunstan has always been very pleased to give any assistance in his power in this direction.

In the proposed arrangements as to the working of the School of Mines, the work of the Technical College and its branches is distinctly recognised.

The Board appointed to report on the establishment of a School of Mines in Sydney reported as follows :—

"We recognise the facts—(1) that there is a demand for a class of managers who do not need and who would not avail themselves of the higher instruction afforded by the University, and (2) that some of those who might desire to obtain a degree in mining engineering might not be able to devote 3 years to attending lectures and courses of practical instruction at the University. To meet the former of these cases we would suggest that the Technical Branch of the Department of Public Instruction provide in Sydney and such country centres as may be possible a course of instruction and issue certificates of competency as mining managers to students who had attended the course, successfully passed the prescribed examinations, and produced proof of having for a period of at least two years been employed in a mine. That the course of instruction for a certificate of competency as mining manager be :—

Primary subjects : Geology, Mineralogy, Mining.

Subsidiary subjects : Elementary Chemistry, Elementary Mathematics, Elementary Physics, Elementary Electricity and Magnetism, Elementary Mechanics, Plan-drawing."

The Senate of the University agreed to the following proposition recommended by the Board and approved by the Minister of Mines :—

"That any student who produces a certificate from the Technical Branch of having passed the examination for the first or second year's course, or for any subject comprised in such course, be exempted from attending lectures or passing the prescribed examination at the University for such subject as the case may be. Provided that the Senate, through its Examiners, Professors, or Teachers of subjects required for a degree of mining at the University, be afforded the means of ascertaining that the standard of proficiency in such subjects at the Technical Branch of the Department of Public Instruction is equal to the standard at the University, or in other words, that the certificate, whether for a year or a subject, is equivalent to a pass at the University in such year or subject.

That students from the Technical Branch be allowed to substitute a second modern language for a classical language at such entrance examination."

The effect of these arrangements will be to bring the Technical College into harmony with the University, and to avoid needless duplication of work.

#### *Sanitary Engineering.*

Notwithstanding the very bad times all over the colonies during the year, which of necessity specially affected the class to which the students mostly belong, it is gratifying to be enabled to report continued progress in the classes of this department, and none the less satisfactory to be able to report the increasing recognition of the value and public utility of its work coming from widely separated parts of the Colony.

The students entered on the rolls in the various classes total for the year 296. The attendances have been 7,752, giving an average weekly attendance of nearly 185. These figures are exclusive of a further attendance of 160 at a series of sanitary lectures given to the Plumbing Classes at Newcastle and West Maitland. These figures show an interest extremely satisfactory considering the very trying conditions which have obtained during the period.

*Sanitary Engineering and Architectural Sanitation.*—Good progress has been made by the students. During the past session the second year's course has been overtaken, and the lecturer has every reason to be satisfied with the attention and intelligence displayed by students. Several of the most advanced of the sanitary plumbing students have entered the 1st year Sanitary Engineering Class, and the grounding they received in the less advanced class has enabled them to follow the more difficult and varied work embraced in sanitary engineering. This progress and desire to advance is the more satisfactory when it is considered that at the time some of the students first joined the sanitary plumbing class, about three years ago, they were utterly unacquainted with even the elements of plumbing principles or theory.

During the forthcoming session the 3rd year's course will be initiated. In order to assist students as far as possible, it is proposed to treat in a general way of the use of the level and theodolite in engineering surveying, as opportunity offers during the session ; but this will not be teaching surveying and levelling as it should be taught, and it is intended to be regarded in that light.

*Principles and Theory of Sanitary and general Plumbing.*—The greatly increased attendance at this class during the past session has been most satisfactory, and proves clearly the importance now being attached by plumbers themselves to knowledge of this kind. Modern legislation, and the advance of public opinion in the direction of recognising and enforcing the proper observance of sanitary principles in plumbers' work, has created a necessity and demand for a class of workmen far above the mere rule-of-thumb operative, skilled handicraftsman though he often was. The licenses to do plumbing work now required almost without exception in all the leading cities throughout the civilised world, which can usually be obtained only after proof of knowledge and ability, not only as to workmanship, but as to methods and arrangements, furnish sufficient reason why all plumbing students who look before them are careful to make this work an important part of their curriculum.

*Practical Plumbing Class.*—This class has maintained a very large attendance all through the year, so much so that there has not been sufficient accommodation for the efficient instruction of the students. Arrangements are now in progress that will result in improving the ventilation of the workshop, give more room to the students, and afford better facilities for teaching and for practice. The work done shows a marked improvement on that of last year. The increased attention given to roof work, such as covering ornamental finials and dome roofs, is a departure in the right direction. This work has been carried out according to drawings and designs specially prepared in the drawing class, and it is proposed to extend this class of work during 1894. The system introduced in 1892 of re-rolling the old lead has enabled the teacher to proceed with this high-class work. It could not be attempted before because of the great cost of lead, sometimes over £20 per ton. Now no matter what the price is the cost to the department is only £5 per ton. The lead casting table supplied during the year has been of great service, both from an instructional and economical point of view.

The Sanitary and Practical Plumbing Classes established in Newcastle and West Maitland have done excellent work during the two terms of the session since they have been initiated. The five lectures given there during the latter part of the session were well attended and attentively listened to, and the students, who are mostly men in business for themselves, are evidently looking ahead and realising the altered conditions now obtaining in sanitary plumbing matters.

*Examination*

*Examinations for Diplomas, Certificates, and Licenses.*—This branch of the work of the Department has greatly increased, and applications for examination are now being received from such distant and widely separated districts as Orange, Dubbo, Windsor, Parkes, and Jerilderie. In addition to the examinations for master plumbers' diplomas, qualifying for the Metropolitan and also the Hunter River District Water Supply and Sewerage Boards' licenses, examinations for certificates as competent drainers, and also for the laying on of water supply, have been added as regular monthly examinations, the sanitary engineering department "pass certificate" being required to obtain a license to do either class of work in the district under the jurisdiction of the Metropolitan Board. The local authorities throughout the Colony having charge of waterworks are also now desired by the Chief Engineer for Harbours and Rivers to insist on the College certificate of competency as the preliminary to the granting of a license to lay on water. Since the initiation of these examinations nearly 100 applicants have been examined. At the beginning of the year application was made by the Metropolitan Board for the examination by this department of candidates for the position of Inspector of sanitary plumbing. This was agreed to, and after examination three candidates were recommended for appointment, one of whom was appointed at once, another at a later period, as the increased work warranted, and the third stands first on the list for the next opening. Early in the year this department was applied to to nominate a suitable man as Chief Inspector of Sanitary Plumbing under the Hunter River District Board. This nomination was made in the person of the holder of an "Honors" diploma as master plumber obtained after examination here. The appointment was forthwith made, and is giving complete satisfaction to all concerned. These examinations are conducted by a Board consisting of the Lecturer in Sanitary Engineering, the Lecturer in Architecture, and the Teacher of Practical Plumbing, one of the College clerical staff acting as Secretary. From what is already stated, it will be evident how rapidly this branch of the department is extending, and it is at the same time being increasingly recognised and respected.

*General Work.*—During the past year a number of special reports have been made on the sanitary state of water from tanks in a number of Public Schools; on the gas-lighting and gas-usage at the Technical College and Technological Museum and the West Maitland Technical School. The recommendations made and adopted have effected a large saving in gas bills. With the assistance of the students in the Sanitary Engineering classes tests have also been made as to the air in several of the class-rooms at the College. This important work will be continued next session.

*Sanitary Exhibit at the Technological Museum.*—A special sanitary exhibit has been arranged in the new Technological Museum. This was fully described and favourably commented on in the Sydney *Daily Telegraph* of 26th August. The object of this exhibit is purely educational, and it is arranged chiefly for the purpose of class-work. The general public have, however, taken considerable interest in the exhibit, particularly as regards the ornamental lead work shown from the Practical Plumbing classes. The hearty thanks of the College are due to the leading sanitary-ware manufacturers of the city who so kindly presented samples of their goods for the purpose of completing the desired exhibit, and also to the members of the Metropolitan Board of Water Supply and Sewerage and to their Engineer for supplying the skilled labour necessary to put the various samples together.

*Students.*—The conduct of the students has been in every way satisfactory, and as to the general progress made the marked and unprecedented success attained by a number of the sanitary and practical plumbing students in the last London Guilds Examination, where they obtained the highest honors that body has to bestow—a distinction never before obtained by this department—affords gratifying evidence of increasingly good work done.

#### *Lithography and Photo-Lithography.*

The first portion of the year was taken up with the teaching of a new process of printing from zinc; the preparation of the plates, transferring, and printing being thoroughly taught. As zinc is now a very good substitute for stone, the information derived by the students will be of great value in the near future.

Much time has also been devoted to the manufacture of colour, the students being now well versed in the knowledge of making red, yellow, blue, lake, &c., from chemicals; and as this is never shown to apprentices in private factories, these experiments have proved highly entertaining and useful. Much success has also been achieved in making permanent show-cards on tin. Samples of a very good class of this kind of work can be seen in the class-rooms, the drawing, transferring, and varnishing being the work of the students. In order to demonstrate the working of colours, a calendar has been printed; the drawing and design are by a young student named Holland; the printing and every detail in connection with same being the work of the students.

In photography, platino-type, blue-printing process, and photo-lithography have been thoroughly gone into, and the samples of work are highly satisfactory. The conduct of the students has been exceptionally good, and although bad times have told against regular attendances, the future promises well.

#### *Mathematics.*

The mathematical classes were conducted on the same lines as last year. The salary for conducting the classes was withdrawn in the general retrenchment at the beginning of the year, and the classes have since been carried on without any assistance from the State. In order to obtain fair remuneration for the work done, the teacher increased the fees. This proved unwise, and caused many of the junior students to leave, or to join one class where they had formerly joined two. It is, therefore, proposed next term to revert to the old scale of fees in order, if possible, to increase the attendance and extend the usefulness of the classes.

#### BATHURST.

At the commencement of the present session several classes which had met in the previous year were discontinued. Typewriting and French were entirely given up, while the teachers of Drawing and Shorthand were allowed the use of a room for their respective classes, but had to depend for remuneration on the fees received from students. The fees were of course raised, and there was a considerable falling off in the attendance. Owing to these changes the total number of students attending the school has not been so large as last year. In those classes, however, which have been carried on as heretofore the enrolment has been well maintained, the total being 357, distributed as follows:—

|                        |    |                      |     |
|------------------------|----|----------------------|-----|
| Agriculture .....      | 13 | Mathematics .....    | 48  |
| Book-keeping .....     | 42 | Mineralogy .....     | 14  |
| Botany .....           | 15 | Physics—Senior ..... | 15  |
| Chemistry—Theory ..... | 18 | "    Junior .....    | 156 |
| "    Practice .....    | 7  | Mechanics .....      | 14  |
| Geology .....          | 25 |                      |     |

Most of these numbers compare favourably with those of last year, there being a marked improvement in Geology and Agriculture. A

A brief allusion to the work of each class may be made:

*Mechanics and Physics.*—The syllabus of the Department of Applied Physics is divided into three courses: A, Mechanics; B, Heat, Light, and Sound; C, Electricity and Magnetism. In Mechanics there has been a fair class throughout the year, but several students being connected with the railway have been unable to attend regularly. The classes for Sound, Light, and Heat have also been well attended, and this was the branch taken for the Junior Physics class, attended by boys and girls from the Superior Public School. The attention and intelligence shown by these junior students have been very gratifying. Electricity and Magnetism could only be treated briefly, but a foundation has been laid for future work.

*Chemistry.*—Chemistry has been a good class for most of the year, but apprehension of the principles of the science is rather slow among the younger pupils.

*Mineralogy.*—In order to render this class more generally useful, the subject was treated during the first term with a view to mineral prospecting. Several practical miners joined and admitted the value of the class, but, for the most part, were unable to continue their attendance. A complete set of crystal models is much wanted in this class, in order to teach crystallography to the more advanced students.

*Geology.*—Geology commenced with a small class, but considerably increased later in the year; but the students who joined then were unable to complete the course sufficiently to sit for examination.

*Mathematics and Book-keeping.*—These classes have, as usual, been well attended; and the omission of the examination in Book-keeping was regretted by many.

*Agriculture and Botany* are generally taken up by the same students, as students of Agriculture are able to understand the principles of that subject much better when they have a good knowledge of the structure and growth of plants, such as they get at the Botany class, than when they confine their attention to Agriculture alone.

The scientific apparatus and appliances for teaching are for the most part in good condition. Some of the physical apparatus needs renewing, and some additional apparatus is desirable. As in former years, the conduct of the students has been uniformly good, and most have attended with great regularity, and worked well. During the year Mr. A. T. Atkins, a diligent student of the school, and last year teacher of Typewriting, died of rapid consumption. He was a young man of great promise, and very popular with his fellow students, who, to mark their sense of his worth, placed a neat marble tablet to his memory in the school, and also erected a headstone in the Bathurst cemetery. This is only one instance of many which might be cited of the uniform good fellowship and kindly feeling which exists among the students. Former students often visit, and all retain an attachment to the school.

*Branch Technological Museum.*—The attendance of visitors has been very good, and far in excess of any previous year. No less than 28,203 persons visited it in 1893; and the average for several months was over 120 a day. A variety of interesting and valuable donations have been received during the year, including a collection of 250 eggs of native birds and a fine specimen of the English brown trout, reared in Clear Creek, near Bathurst. Attempts have been made to acclimatise this fish in the district, and it is evident that this has now been done.

*The Bathurst Scientific Society*, which is held in connection with the Technical School, has lately revived, and some interesting papers have been read.

The usual work of naming specimens for miners and others has been carried on at the School and Museum. As an instance of the utility of this work, it may be mentioned that a party of men were prevented from wasting time and money on a fruitless search for tin by having the specimens they relied upon identified as magnetite.

There appears to be every prospect of a successful future for Technical Education in Bathurst.

#### GOLBURN.

The Goulburn Technical School has succeeded in maintaining a fair number of well-attended classes in spite of the prevailing depression, and the occurrence of several epidemics of sickness which have induced many to relinquish extra efforts in the shape of voluntary studies and extra expenditure to carry on the same. The decrease in a general way amounts to about 10 per cent. on last year's operations. Particulars of the various classes in operation are as follows:—

*Chemistry.*—The subject continues the most popular and important. Two lessons per week are given—one on Wednesday evenings and the other on Saturday mornings—which latter is attended by several Public School teachers of the district. Good work has been done in Practical Chemistry, and several students have attained a fair proficiency in analysis.

*Physics.*—The classes in Electricity and Magnetism and Sound, Heat, and Light have suffered most during the year, the total enrolment for both divisions being 9. The Physics apparatus is often of great use in illustrating the allied subject, Chemistry.

*Geology.*—Students of both sexes take great interest in this subject. Constant use is made of the specimens in the school and museum; and excursions have been made into the surrounding district for specimens and examples of geological structure. The advanced students have appreciated the fine petrological microscope which has been supplied during the year. The enlarged photographs of New South Wales geological scenery and the new geological map are valuable aids to the study.

*Mineralogy.*—The class suffered severely through the loss of several promising students who removed from the district, and unfortunately no representative attended the annual examination in this subject. The specimens available for teaching purposes and for the Museum cases are constantly being increased by local donations.

*Assaying.*—One student worked for two terms at this subject, and fair progress was made. Business called him away from Goulburn during the third term.

*Art.*—The various art subjects are taught concurrently; ten hours' instruction being devoted to them. A fair number represented the school in each subject at the annual examinations.

*Carpentry.*—This class continues very small, and is composed of lads who have left the Public Schools, and attend the evening class to carry on their studies.

*Public School Classes.*—(1.) *Chemistry.*—This class was inaugurated at the beginning of this year. The District Inspector (D. J. Cooper, Esq., M.A.) takes great interest in it, also the three principal teachers of the Goulburn Superior Schools. The enrolments have been 146. Two lessons per week have been given on Mondays. The pupils showed great intelligence and interest in the experiments. They prepared carefully-written and illustrated note-books. The examination proved that about 50 per cent. of them had gained a fair grasp of the subject. Two of the pupils passed in Chemistry at the University Junior Examinations.

(2.) *Manual Training.*—There were 46 enrolments. The classes were held on four afternoons per week, 8 boys attending at a time. The tools and workshop have been kept in good order, and the boys have worked well and attended with fair regularity. The accommodation for all classes is good; the apparatus and teaching appliances are in excellent condition, and sufficient for present purposes.

*Technological Museum.*—This continues to be a most popular institution. The average number of visitors per day is 46, the total number of visitors for the year being 14,267. The visitors have, in several instances, included classes from the public and private schools in charge of their respective teachers.

## GRANVILLE.

Though the commercial and industrial troubles have seriously affected the attendance of students at the classes, the individual enrolment shows that the influence of the tuition is more widely spread than on any previous year. The number of individual students enrolled this year is 110; the number enrolled at Granville and Parramatta last year was 177, showing an apparent decrease of 67 individuals; when it is taken into account, however, that the following classes—phonography (Parramatta and Granville) and freehand drawing and chemistry (Parramatta) which were in existence last year, and have not been held this year, had an enrolment of 89, it will be seen that there is a net increase of 22 individuals enrolled in the subjects taught at present. The class in model drawing which was removed from Parramatta to Granville at the beginning of the year has a total enrolment of 31 as compared with 17 last year.

The conduct of the students has been most exemplary, and in some cases both the quantity and quality of work done have been all that could be desired; in other cases the student has had to leave the district in search of employment just as his interest in his studies was beginning to develop. The accommodation has been admirably suited to the requirements of the classes meeting in the large, well-lighted, and ventilated hall of the School of Arts. One of the students presented to the school a model of a cone which he made showing the conic sections; this has proved very useful in teaching geometrical drawing. The new set of mechanical drawings will help very much in the teaching of that subject.

The exhibition of students' work held at the beginning of the year was largely attended, and had much influence on the enrolment. The following were the prizes given during this year:—The Mayor's prize, for the best student in engineering, presented by Mr. J. R. Palmer, Mayor of Granville; prize for best year's work in the class-room, presented by Mr. T. Irons; prize for general proficiency, presented by Mr. William Robison.

During the year there were several students' excursions on Saturday afternoons. Amongst others the following places were visited:—The Sydney Hydraulic Power Co.'s Pumping Station, Darling Harbour; the Observatory; Mr. Shorter's exhibition of art (Doulton) pottery; The Australian Roller Flour Mills, Clyde; The Orient S.S. "Ophir"; Crown-street Pumping Station; The North Sydney Cable Tramway and Suspension Bridge; the Parramatta Water Works and the Pennant Hills Quarry. In all cases the students took great interest in what they saw, and the Resident Teacher was generally able to illustrate the teaching of the class-room practically by something that was seen.

*Chemistry.*—These classes opened the year with a roll of 26 students, 20 being enrolled for the first year's course and 6 for that of the second year. The students for both these classes consist of men and youths connected with the iron industries of the neighbourhood, of agricultural students, and of public school teachers. An encouraging feature in the year's enrolment is that of 4 lady students, showing that this subject, which is by no means a simple one, is beginning to awaken an interest for its bearing on the relations of science to the conditions of every day life. The uncertainty and irregularity of employment in Granville, as elsewhere, has made it difficult for some students and many would-be students to pay the small fees demanded. In spite of this drawback, however, the numbers have been fairly well kept up, and the year's course was closed with a roll of 24 students attending. Eighty-four lessons have been given during the year. The course for the first year consists of lessons on the laws of matter, including the physical properties of solids, liquids, and gases, the atomic theory, the nature of acids, salts, and bases, and the properties and combinations of the non-metallic elements. Special attention has been given to the principles which underlie the industrial arts, as for instance the destructive distillation of coal, the manufacture of sulphuric acid, carbonate of soda, bleaching powder, bromine, iodine, glass, porcelain, cement, and artificial manures. The course for the second year consists of lessons on the economic metals, the minerals in which they naturally occur, the modes of extracting them from their ores, the various compounds which they form with other elements, and the alloys which they form with one another; lessons on the use of the spectroscope and on the principles of electrolysis. The lessons for both first and second year have been illustrated whenever possible by lecture table experiments, and by mineral specimens and alloys.

*Agriculture.*—The elementary class started with 21 students on the opening night, and increased to 30 by the end of the year. The advanced class commenced with 8 students, and afterwards increased to 18, thus making 48 students as compared with 34 for last year. The course of instruction was the same as in the Sydney classes, with slight modifications in favour of subjects of local interest or of special interest to the students. At the invitation of the Lecturer in Agriculture, the Granville students accompanied the Sydney students in 25 outings last year to gardens, orchards, bee-farms, &c. At one of these outings an unbroken colt was placed at the disposal of the teacher, and students were shown how to break in a horse for the saddle, harness, or plough. As an illustration of the practical value of these classes, it may be mentioned that 7 of the students at present in the classes, and who had no bees before joining, have now respectively 3, 5, 8, 17, and 50 hives. Several students have gone into poultry raising on a fairly large scale, and 4 others have during the year taken up respectively 4, 5, 10, and 20 acres of land for orchard and cultivation purposes. The average age of the 48 students is 30. The teacher visited most of the gardens, bees, poultry, and orchards of the students, and was very pleased with the intelligent way in which they have carried out the teachings given in the class-rooms. Special attention has been paid by these students to drainage and manuring, subjects which are, unfortunately, too often neglected or misunderstood.

## NEWCASTLE.

Despite the great falling off in mining operations, and the consequent dullness in all kinds of trade and general distress that has marked the year 1893, and which in severity has had no parallel in any part of the Colony, the classes, though they have naturally suffered in enrolments and attendance, have not done so to the extent that might have been expected.

The enrolments for the district were:—

|                                 |    |                          |     |
|---------------------------------|----|--------------------------|-----|
| Chemistry .....                 | 11 | Mathematics .....        | 69  |
| Metallurgy .....                | 12 | Applied Mechanics.....   | 12  |
| Geology .....                   | 12 | Mechanical Drawing ..... | 43  |
| Mineralogy .....                | 5  | Plumbing.....            | 42  |
| Boiler-making.....              | 15 | Shorthand .....          | 209 |
| Steam and the Steam-engine..... | 14 | Book-keeping .....       | 24  |
| Art .....                       | 86 | Dress-cutting .....      | 49  |
| Coal-mining.....                | 88 |                          |     |

The changing of class-rooms from the School of Arts to rooms over the Telegraph Office involved some loss of time to the science classes, owing to the packing and unpacking and rearrangement of the apparatus, &c. In addition to the evening lessons, there have been day lessons during the last two terms, mostly in metallurgy. The students were instructed in the analysis of coal and in the assay of gold, silver, copper, tin, lead, arsenic, &c., and some hundreds of assays have been made. Miners are more likely to turn their attention to this class and to mineralogy in the future, recognising the unstable condition of their present employment, and the usefulness of a knowledge of the subjects connected with metal mining. The accommodation for these classes is rather limited, but this will be remedied at an early date.

*Art Classes.*—These classes suffer from the non-central position of the room for art work, but have been well attended all through the year. The new set of casts proved most interesting and instructive. Nearly all were studied and executed on good paper and on a large scale.

*Coal-mining*

*Coal-mining Classes.*—These have been held at Newcastle, Hamilton, Merewether, Minmi, and Wallsend. There has been such uncertainty of employment, and so many persons have been cavilled out, and have had to leave the district in search of work, that the steady attendance at class-work has shown the appreciation by the miners of the advantages to be derived from the instruction. The Teacher has endeavoured to make the matter and method of his lessons sufficiently attractive to overcome the natural repugnance to hard mental application after a day's toil. No better proof of the beneficial influence of technical instruction in the district could be adduced than the recent formation of an association called the Northern Association of Mining Students, which now numbers over 50 members. Meetings are regularly held for the reading and discussion of papers treating of coal-mining and kindred subjects.

*Boiler-making.*—The boiler-making class has done good work. In the absence of a workshop, the instruction must necessarily be confined to theory. The following subjects have been studied:—Template working, riveting percentage of joints, bursting and safe-working pressures, collapsing pressure of plain and corrugated furnaces, staying flat surfaces, strength of materials, safety valves. It is probable that a workshop will be provided during 1894.

*Plumbing Class.*—This is the only new class formed at Newcastle during the year. It commenced work with the second term. The students, numbering 42, were mostly master plumbers and journeymen who had to qualify themselves for licenses under the Hunter River Water and Sewerage Board. The standard of work required by the Board was much in advance of the plumbing work formerly carried out in the district. To give the students a thorough knowledge of their craft the plan of work was so laid out as to cover the first year of apprenticeship, skilful manipulation at each step being insisted upon before the student was allowed to advance. The lessons were so arranged that each student had one hour at lead work, followed by one hour's practice at joint-wiping. During the course, Mr. J. L. Bruce, Lecturer in Sanitary Engineering, Sydney Technical College, delivered five lectures, covering a range of subjects dealing with Sanitary Plumbing.

Mr. Gardner, a member of the Hunter River Board, also delivered five lectures on hydraulics, &c. The practical work of this class and of that at Maitland is very creditable.

*Steam and Steam Engine.*—This class is attended by young men serving their apprenticeships in Engineering workshops. The accommodation is sufficient, but models are greatly needed. These will be supplied in due course from the foundry of the Sydney College.

*Mechanical Drawing.*—Two classes are held, one at Newcastle, the other at Minmi. The attendance at the latter class has fallen off in consequence of the unsettled state of the mining industry at that place. The Newcastle class has been much inconvenienced by the limited accommodation. Though two rooms have been occupied, the students were too crowded to do satisfactory work. This will be remedied before the class meets again. The classes in Mathematics, Shorthand, and Scientific Dress-cutting have been continued on fees only and have fairly maintained their numbers, but the Book-keeping class has not been a success.

#### WEST MAITLAND.

Notwithstanding the disastrous floods of March, which intensified the general industrial depression the work of this branch school shows an improvement. The enrolments in the classes under the supervision of the Resident Master for the year were:—

|                             |     |
|-----------------------------|-----|
| Art Classes .....           | 773 |
| Carpentry and Joinery ..... | 90  |
| Manual Training .....       | 72  |
| Architecture .....          | 17  |
| Mechanical Drawing .....    | 24  |
| Building Construction ..... | 19  |
| Plumbing .....              | 18  |
| Book-keeping .....          | 22  |

The classes formerly accommodated in Frechurch-street were removed to the High-street building in October. The accommodation, so far as floor space is concerned, is a great improvement on that formerly provided, but the building is not suitable for any but workshop classes. The art and other classes have to be placed on the top floor, where the heat during the summer months is tropical, and the noise from the trades classes interferes seriously with the teaching, and is a source of discomfort to the students. It is hoped that the much-needed class rooms will be built during the coming year. Art classes are held at East and West Maitland, Singleton, Morpeth, Hinton, Seaham, Clarence Town, and Raymond Terrace; they are well attended, and have made satisfactory progress. The increased and improved accommodation now provided for the Modelling class has had the effect of greatly improving the work as well as the number of students.

In *Architectural Drawing* the instruction given included the construction and use of scales, the drawing to scale of plans, elevations and sections, and the preparation of complete drawings of residences, &c. Lectures in Building Construction and History of Architecture, as laid down in the syllabus, have been given regularly. Some difficulty has been experienced in illustrating these lectures properly; the teacher has had to depend upon blackboard sketches and rough lantern slides made by himself, but action is being taken with a view to supplying proper appliances.

In the *Mechanical Drawing* class instruction was given in scale drawing, the preparation of plans and elevations, and sections of parts of machinery; in some instances plans were prepared by students of work required by themselves. The more advanced students took up the mounting and finishing off in colours of complete drawings. Towards the end of the year pieces of machinery cast at the Sydney College were received; these will be of great service to the class.

The *Practical Plumbing* class was formed in August, bench accommodation being provided for 16 students. The work has been eminently successful, and there are upwards of 20 applicants for vacancies at the benches.

The *Woodworking* classes were greatly interfered with by the alterations to the new premises, and by the disastrous floods, which not only put a stop to all work for some time, but caused many students and intending students to leave the district. Towards the end of the year the classes recovered their normal condition in numbers and efficiency.

The *Manual Training* classes are very popular; there are always applicants waiting for vacancies. The *Book-keeping* and *Dress-cutting* classes have done very good work.

The West Maitland Technical School is highly appreciated in the district, and secures a large amount of popular support. The Hunter River Agricultural and Horticultural Association offered at their proposed exhibition in May last a large schedule of prizes for the advancement of technical work. Unfortunately the floods came in March, and compelled the Association to abandon the exhibition.

The schedule has, however, been re-introduced this year.

The local *Technological Museum* fortunately escaped flood water, but the rain damaged the walls. There has been a fair list of donations, and several gentlemen have promised collections of exhibits on their return from Chicago.

#### ARMIDALE AND URALLA.

The attendance at the Armidale and Uralla drawing classes has been satisfactory, the pupils being very studious and diligent, doing a large amount of home work in addition to the usual class work. This home work showed a marked improvement upon the same class of work executed during 1892. The attendance has been well maintained in spite of a great deal of sickness and want of employment. The number

number of candidates for examination was quite equal to that of last year, and even better results have been obtained. A number of young tradesmen have joined the classes, and are very pleased with what they have acquired, and express a certainty of a number of their fellow workmen joining next term, as what they learn is of great assistance in their everyday work. Many Public School teachers avail themselves of the benefits to be derived from attending the classes, all who attend speaking highly of the advantages gained. There is likely to be a large increase in the number of pupils next year.

#### NEWTOWN.

The classes are in a very sound condition, notwithstanding the dropping of several subjects; the enrolments for the year reached 147. A great amount of praise is due to many of the influential business men of Newtown for the enthusiastic interest which they take in matters relating to the welfare of the school, and it is no doubt due to them, as well as to the efforts of the teachers, that the classes are so well known and made use of. A pleasing feature in these classes is the fact that most of the students are young men employed in the workshops of the district, who directly require in their daily work the information imparted at the Technical School. A gentleman who is an employer of several of the students expressed himself convinced that the work done by the students increased in value in the most marked manner after a little instruction at the classes. A matter that may be mentioned is the establishment among the students of an association conducted after the fashion of old scientific societies, and it has been the practice to prepare papers for reading and discussion at the meetings.

#### PETERSHAM.

The mathematical classes were discontinued at the beginning of the year. The subjects now taken up are Freehand, Model and Mechanical Drawing, Practical Plane, and Solid Geometry, Perspective, Scientific Dresscutting, and Shorthand. The teachers of the two last-named subjects are paid by the fees only. Nearly 200 students have passed through the school during the year, and the results at the yearly examinations show that the teaching has been efficient.

#### ASHFIELD.

The accommodation is sufficient for present requirements, and the stock of appliances is ample. The conduct and attendances of students have been very good, while the condition of the classes generally throughout the year has been satisfactory. The students comprise lithographic artists, painters, decorators, sign writers, modellers, and teachers. The subjects taught are Freehand and Model Drawing and Modelling. The Shorthand and Calligraphy and Correspondence classes continue to be held at this school for fees only, and are in each case fairly well attended.

#### MANUAL TRAINING IN PUBLIC SCHOOLS.

This work, one of the most important connected with Technical Education, has in its limited sphere of action been prosecuted with vigour and efficiency; but it has not been practicable to add to the number of classes. Seven workshops have been provided. The one at Fort-street serves both the students at the Training School and the pupils of the Model School; those at Sussex-street, Crown-street, Blackfriars, and East Maitland High School are used only by the pupils of the schools to which they are respectively attached; the one at West Maitland is attended by pupils of three schools; while that at Goulburn meets the requirements of the four schools of that city. I hope that before long workshops will be placed at Bathurst and Newcastle. The instruction given in these classes aims at helping the pupil to interpret working drawings correctly, to obtain skill in handling tools, to be able to work to exact measurements, and to set out work in the best possible way; it does not pretend to teach a trade, but to develop general manual dexterity. The mental and moral benefits derived by youths from Manual Training are great. Professor J. M. Ordway, speaking of the observed influence of Manual Training in a High School at New Orleans, says,—“The indications are, that it tends to awaken and keep up the interest of the pupils in all the school exercises; for by it they acquire juster ideas of the relation between books and actual things. They see that the school is a place for real earnest work. They gain the habit of close attention in the exact performance of tasks. They find that they have the power to do something of themselves, and hence are likely to acquire a manly self-reliance. They do not lose time that ought to be devoted to intellectual studies, for it is found that without exertion they accomplish quite as much as they did before hand-work was introduced. They gain by alternating hand-work with pure brain work, and thus resting without being idle. The surplus activity of youth, which is too prone to vent itself in mischief, is allowed to find scope in useful and pleasant employment.”

I note with very great pleasure that most of the students of the Training School take praiseworthy interest in their workshop practice and have turned out some highly creditable specimens of work. A complete set of models, illustrating the course of instruction, has been prepared by Mr. Powrie, the Instructor at Fort-street, and placed in the Technological Museum for the information of the public.

#### EXAMINATIONS.

The examination results of the Technical classes for the year 1893 are very satisfactory. The total number of candidates examined was 2,157, and of these no less than 1,575, or 73 per cent., passed. This is the highest percentage of passes that has yet been reached under the Branch, and has been equalled only once under the late Board of Technical Education, when the standard for a pass was 33 per cent.; now 50 per cent. of marks is required for a bare pass. The passes are made up as follows:—Honors, 1st Grade, and 2nd Grade. The number of candidates examined is less by 1,176 than it was in 1892, but this is fully accounted for by the number of classes which have been discontinued, and by the fact of there being no examination for classes such as Shorthand, Book-keeping, and Correspondence, which exist now on sufferance only.

In addition to the standard being raised, higher work has been accomplished, and, in many instances, notably in Fitting and Turning, Agriculture, Modelling, and Decorative Art, the Examiners speak of the work executed by the students as being a distinct advance on that performed at previous examinations.

In matters connected with the Public Schools the subjects taken up in 1892 were Manual Training and Shorthand. The latter subject now assumes very small proportions so far as the classes are concerned, and last year no examination was held in that subject. In Manual Training last year 320 pupils were examined, and but 41 failed. It will thus be seen that the lads at school are taking hold of the instruction given in this subject, and profiting accordingly by it. The practical work of some classes, particularly that at the East Maitland High School, is reported by the Examiner to be excellent.

#### LECTURES.

*Geology and Mineralogy.*—During the year the Rev. J. Milne Curran, F.G.S., Lecturer in Geology and Mineralogy, delivered 44 lectures at various centres throughout the Colony. These lectures have dealt with Australian geological features, either from a purely scientific standpoint or in regard to the economic value of their mineral deposits. The lectures have been eminently successful, the audiences reaching an aggregate of 13,360 persons, or an average of over 300 at each lecture. In addition to the lectures, practical demonstrations and simple tests for minerals were frequently given by Mr. Curran to parties of working miners during his tours. In every district visited numerous samples of minerals and rocks were brought for determination, and no pains were spared to furnish accurate information. That Mr. Curran's work is appreciated is evidenced by the very laudatory notices of his lectures that appear in the local Press at all places visited, and by the strenuous efforts made to get a visit from him; in fact, the applications are so numerous that a large proportion could not be complied with in 1893, but had to stand over to be arranged for this year. The

The following extracts from newspapers will give some idea of the usefulness of Mr. Curran's lectures:—

*Inverell Times*, 13 May, 1893.—“After hearing Mr. Curran, we are satisfied that the country gets good value for that portion of the Public Instruction Funds devoted to paying for his lectures. In every district visited by this gentleman, we imagine that a stimulus must be given to the study of practical geology. His advice should be of great value in helping to ascertain the exact location of mineral deposits, and should save much useless labour.”

*Tenterfield Star*, 1 July, 1893.—“One of the pleasantest methods of conveying instruction is that furnished by means of the lecture platform. The Education Department, recognising this, have made a speciality of sending hither and thither throughout the land specialists from the Technical College who, by their free public lectures, have done wonders in the way of spreading a knowledge of the latest developments of pure science as applied to industrial pursuits among a naturally intelligent and receptive people. Several of these lecturers have visited Tenterfield, and have done more or less good, but none have been so popular here as the eminent geologist, the Rev. J. M. Curran.”

*Gundagai Times*, 25 August, 1893.—“The lectures have been far and away the most successful ever heard of here, and the Department are carrying out a real public good by the visits of the Rev. Mr. Curran.”

*Australian Star*, 28 December, 1893.—“Recently the Rev. Milne Curran examined the Swamp Oak district, and delivered a lecture upon the results of his survey. The information given by the lecturer, an unusually accomplished authority, was not satisfactory to those who previously had faith in the auriferous richness of the district. He pointed out that if they did not obtain good gold at a depth of 50 feet, they would not obtain it by deeper sinking; and in addition he showed the miners that what they were taking for granite was merely porphyry. This is an instructive instance of the value of expert opinion upon auriferous country.”

Mr. Curran's report, Annex A, furnishes details of his work.

#### BEE CULTURE.

Mr. Gale delivered 77 public lectures upon matters connected with the profitable keeping of bees to an aggregate attendance of over 9,000, the audiences varying from 25 to 450 according to the populousness of the locality. Great and increasing interest is taken in the subject. The applications now in hand for Mr. Gale's services, will, if complied with, occupy nearly the whole of the current year. Since this work has been taken up by the Department, many families have entered upon bee-keeping, either as a means of gaining a livelihood, or of supplementing a limited income. In very many instances the venture has been successful, the net profits sometimes reaching £400 per annum. The bee-keeping industry in the Colony has now become of sufficient importance to be made the subject of a special paragraph in the 1893 edition of Coghlan's *Wealth and Progress of N.S.W.* The labours of Mr. Gale have no doubt largely contributed to the development of this industry. It may not be out of place to point out that in his report for 1890, Mr. Gale cited a number of openings for profitable industry in such lines as preparing cut flowers for sale, the cultivation of plants and flowers for medicinal and other purposes. These hints appear to have borne fruit. A bay in the Technological Museum has been fitted up with apparatus used in Apiculture and models of bees, &c. The exhibits have proved of great service to many visitors, and attract a good deal of attention.

#### AGRICULTURE.

Mr. Mackay has delivered lectures at Mangrove Creek, Hornsby, Thornleigh, Canley Vale, and Carlingford; but his time is almost entirely taken up with class work.

#### LIBRARY.

In order to place the library fully at the disposal of the students, I had the room set apart for the purpose fitted with shelving and tables, and the books and periodicals arranged ready for use. At present the library is open from 11 a.m. to 4.30 p.m., and from 6.30 to 8 p.m. The students have not been slow to take advantage of this opportunity of acquiring useful information, the average number visiting each day being 40. Application has been made to open at 6 in the evening and keep open till 9; if practicable this will be done. The number of books in the library now reaches 2,300, and a very great number of magazines, periodicals, &c., not bound, can also be had access to. The following list of periodicals, most of which are supplied gratuitously, will show that for Technical purposes the Library must be of great value, and is without a rival in the southern hemisphere:—

|   |  |  |
|---|--|--|
| Agricultural Gazette.                           | The Steam-ship.                            | Scientific American (Architect's edition). |

Initiatory steps have been taken with the view of forming small technical libraries at the larger Branch Schools. Works of a technical character are usually very expensive and quite out of the reach of the means of artisans. The use of these books will enable them to supplement the instruction given in the class-room, and such instruction will, on the other hand, make the information contained in the books clearly understood.

#### PRACTICAL INSTRUCTION IN HORTICULTURE IN PUBLIC SCHOOLS.

Mr. Gale, visiting teacher, made 100 visits to 78 schools during the year, and gave practical lessons. These visits were not so numerous as in 1892, as more time had to be devoted to public lectures. Playground improvements are still proceeded with, but the enthusiasm with regard to Arbor Day has abated.

The decision of the Minister, announced early in the year, not to grant bonuses to teachers of Public Schools for improving the school grounds, except in a few special cases, had the effect of reducing the number of applications to 36, and most of these were made before the notification of the decision. Only 13 teachers were awarded a bonus.

Bonuses have now been discontinued altogether.

LOAN

## LOAN OF LANTERN SLIDES TO PUBLIC SCHOOLS.

Teachers of Public Schools may obtain loans of lantern slides, on the condition that they pay the expense of carriage and guarantee their return in good order.

During the year, 31 Public School Teachers borrowed 109 sets of slides. With one exception all the slides were returned punctually.

## TECHNOLOGICAL MUSEUMS.

The following figures indicate the attendance of visitors at the Technological Museum in Sydney and the Branch Museums:—

|                                    | No. of Visitors during 1893. | Increase on 1892. | Decrease on 1892. |
|------------------------------------|------------------------------|-------------------|-------------------|
| Technological Museum, Sydney ..... | 100,480                      | .....             | 43,773            |
| Branch Museums—                    |                              |                   |                   |
| Bathurst .....                     | 28,203                       | 14,102            | .....             |
| Goulburn .....                     | 14,267                       | 2,964             | .....             |
| Newcastle .....                    | 9,760                        | 4,716             | .....             |
| West Maitland .....                | 8,603                        | .....             | 1,281             |

The Technological Museum at Sydney was practically closed for three months for the purpose of moving the exhibits from the old building in the Domain to the new Museum at Ultimo.

The attendance at the West Maitland Museum suffered severely from the terrible floods that devastated that town and district in March, and by the almost impassable state of the roads for a lengthened period.

The Newcastle Museum has been removed from the School of Arts hall to the Old Court-house building, which affords much greater facilities for displaying the exhibits. This change has had a very beneficial effect upon the attendance, for although the Museum was closed for six weeks to admit of the removal, cleaning, and re-arranging of the exhibits, the number of visitors was nearly double that of 1892.

The Technical College and the Technical Museum at Sydney are now located on the same block of ground, and the arrangement is certainly of great advantage to both students and teachers, who, I believe, fully appreciate it. The Museum was formally opened by His Excellency the Governor on the 4th August in the presence of the Minister and a large number of visitors. The collections are now classified and displayed in a manner which was impossible in the old building, and I am glad to see that an increasing number of our Public School teachers contribute specimens to it, and use it as a means for obtaining information. We are now able to adequately display selected specimens of work of students in the Technical College and Branch Schools, and the exhibition of colonial wools and timbers (each numbering several thousands) is worthy of these staple products.

Details of the Museum work will be found in the report of the Curator, Annex B.

## EXPENDITURE.

The amount expended on technical education during the year was £18,008 11s. 1d. The cost to the State is at the rate of £3 3s. 6d. for each student enrolled, a slight reduction on that for 1892, and the lowest yet reached.

The fees paid by the students amounted to £3,424 16s. 6d. Of this sum £2,111 1s. 6d. was paid by the students of the Sydney Technical College, and £1,313 15s. by the students of the Branch Schools. The amount of fees paid is less than that of the previous year by £960 18s. 3d., a falling off of £321 15s. 6d. at the College and £639 2s. 9d. at the Branches. Considering the number of classes and branch schools closed the fees received are very satisfactory.

The expenditure on account of the Technological Museums and branches was £6,605 2s. 9d. Of this amount £1,928 15s. 6d. paid out of the vote for 1892 was chiefly in connection with the new building.

The sum of £487 1s. 2d. was paid for water and sewerage rates.

*Summary of Statistics.*

|   |                 |
|---|-----------------|

In conclusion I am pleased to be in a position to report that although the year has been a time of much anxiety and trouble, I have been warmly supported by all the officers and teachers, the regularity, diligence, and attention of the students have been very satisfactory, and the highest results yet reached have been attained.

F. BRIDGES,

Superintendent of Technical Education.

Technical College, 15 Feb., 1894.

## ANNEX A.

## REPORT OF THE LECTURER IN GEOLOGY AND MINERALOGY.

DURING the year I have delivered 44 lectures at various centres through the Colony. These lectures dealt with Australian Geological features, either from a purely scientific standpoint, or in regard to the economic value of their mineral deposits. It is very satisfactory to have to state that the lectures have been well attended by the public in every instance. I venture to point to the fact that the Departmental correspondence with various public bodies, shows that my efforts have been duly appreciated. More applications for lectures have been received than could possibly be entertained. Besides formal lectures, lessons and demonstrations for simple tests for minerals were given to parties of working miners very often during country tours.

*Scientific Work.*

In every district visited numerous samples of minerals and rocks are brought for determination. This work was particularly heavy during the past year, and no pains were spared to give accurate information as far as possible. I have continued to collect mineral specimens suitable for the Technological Museum. These, together with photographs of remarkable geological features, will commend themselves to your approval.

*Original Research.*

I have read one paper on the "Geology of the Bingera Diamond Field" to the Royal Society. Excepting the determination of minerals and rocks, and assistance given to practical miners, this is the only original research I have been engaged upon. The want of an assistant to undertake ordinary routine manipulation, &c., makes any attempt in original research well nigh impossible.

J. MILNE CURRAN.

ANNEX

ANNEX B.  
REPORT OF CURATOR.

Technological Museum, 14 February, 1894.

THE attendance for the year has been 100,480, a decrease of 43,773 as compared with the previous year. This is accounted for by the fact that the Museum was closed for the removal of exhibits to the new building from 4th May to 3rd August inclusive; also, prior to the former date the Museum was somewhat upset, and the attendance of visitors suffered in consequence. It is reasonable to suppose that when collections have been moved a mile-and-a-half from their former situation, it takes the public some little time to realize the change, but I do not think that the Museum will shortly show any falling off in the attendance.

The new Museum building was formally opened to the public by His Excellency the Governor on the 4th August last, in the presence of the Minister of Public Instruction, some officers of the Department, and a large number of people. Following is a brief description of the building, in the words of Mr. W. E. Kemp, the architect:—"The style selected for this building corresponds with that of the adjoining Technical College, and is an attempt to adapt the spirit of Romanesque to the necessities and materials of the present day. The form of the building being necessarily, for convenience, simple, no picturesque breaking up of outline could be attempted. The materials used principally being brick, effect has been sought by the harmony of colour; and this, by the use of such bricks as are easily obtainable, with a sparing use of stone to relieve the larger masses of darker and brighter colour of the brick-work, has it is thought, produced a simple and not unpleasing structure, which, though plain and massive, escapes the fault of heaviness. The building is 183 feet long by 50 feet wide, and has a basement storey under one half its length, three whole storeys 15 feet high, and an attic storey in the roof. Each floor is divided transversely into bays 16 feet wide, which, while providing separate compartments to facilitate the classification of the exhibits into groups, thus simplifying the study by visitors of the different kinds of specimens, also provides an amount of wall space on the cross partitions for the exhibition of maps, diagrams, and other forms of exhibit not easily displayed in cases, which could not be obtained otherwise. The amount of floor space provided on each floor is 9,150 square feet, and of wall space 6,000 feet, making in all 27,450 feet of floor space and 18,000 feet of wall space, exclusive of the basement, which can be used for heavy and rough exhibits, and the attic, which will be used for workrooms and for packing or unpacking of specimens received or despatched. There is a projecting central portion of the building, which contains a handsome staircase, extending from basement to attic, and six large rooms for offices for the curator and his assistants. The cost of the building has been £20,000." I have been able to classify the exhibits in a way that has been previously impossible, and the contents of the old crowded building and the congested store show now to advantage, and cause surprise to most people, who had no idea of the extent and value of our collections.

*Statistics.*

Number of specimens received during year 1893 ..... 2,764

*Purchases.*

|  | 2,764 |

Number of specimens sent to other institutions in exchange of those received, 379.

Number of specimens sent to Albury to form the nucleus of a Museum, 348.

This is the fifth country Museum affiliated with the Sydney one.

*Branch Museums.*

|                     | Local Donations. | Transfers from Sydney Museum. |
|---------------------|------------------|-------------------------------|
| Bathurst .....      | 121              | 38                            |
| Goulburn .....      | 167              | 52                            |
| Newcastle .....     | 12               | 34                            |
| West Maitland ..... | 214              | 28                            |
|                     | 514              | 152                           |

The attendance of visitors at the various Museums has been as follows:—

|                     | Attendance, 1893. | Increase over 1892. | Decrease. |
|---------------------|-------------------|---------------------|-----------|
| Bathurst.....       | 28,203            | 14,102              | .....     |
| Goulburn .....      | 14,267            | 2,954               | .....     |
| Newcastle .....     | 9,760             | 4,716               | .....     |
| West Maitland ..... | 8,603             | .....               | 1,281     |

The floods in West Maitland in March somewhat interfered with the attendance at the local Museum.

N.B.—The Branch Museums are not open on Sundays.

*Principal*

*Principal Donations.*

Following is a brief account of the principal donations of the year:—Mr. W. D. P. Keppel, Samoa—Miscellaneous products (chiefly vegetable) of the Samoan Group; Dr. Thomas L. Bancroft, Brisbane—Collection of roots of the Leguminosæ attacked by bacterial disease, colonial barks, gums, resins, sandalwood, iguana oil, &c.; Mr. Rhodes Morgan, Snowdon, Ootacamund, India—Collection of Indian barks, kinos, and fruits; Messrs. J. Armstrong and Sons, 114, Riley-street, Sydney—Collection of door mats manufactured by the firm; Mr. T. W. Kirk, Wellington, N.Z.—Collection of slabs of polished New Zealand timbers; Mr. E. M. de Burgh, Supervising Engineer, Roads and Bridges, Sydney—Colonial timbers; Mr. H. Deane, M.A., Engineer-in-Chief for Railways, Sydney—Colonial timbers; Mr. J. T. Wilshire—Mineral specimens; Mr. W. Litchfield, Tingha—Collection of tin ores and sapphires; Messrs. C. Icke & Co., Sydney Smelting Works, Botany Road, Alexandria—Specimens to illustrate the metallurgy of antimony; Mr. John Hickson, 27, Wilson-street, Redfern—Collection of mineral specimens; Messrs. Hebblewhite & Co., George-street, Sydney—Bee-keeping appliances; Mr. G. Tall, 133, Bathurst-street, Sydney—A valuable collection of locks and saws made by donor. A valuable collection of economic botany specimens has been received from the Royal Gardens at Kew; this is one of the most important donations of the year. An extensive collection of products of Dutch agriculture, from the Koloniaal Museum, Haarlem, Holland.

*Principal Purchases.*

Specimens from New Hebrides, shells, dresses, weapons, &c.  
A collection of New Zealand timbers.  
Chev. G. Jervis, Turin, Italy, a collection including wood carvings, &c., educational geological series, botanical illustrations, toys for instructing the blind and deaf-mutes, &c.  
Wrought iron forgings in imitation of native flowers, from Mr. Alfred Amos, 133, Cooper-street, Waterloo.  
The necessity for reduced expenditure has made itself felt in the acquisition of specimens.  
In addition to the above extensive collections have been made for the Museum by the Rev. J. Milne Curran, Geological Lecturer; by Mr. W. Bauerlen, Botanical Collector; and by Mr. W. W. Froggatt, Geological and Economic Entomological Collector.

*Wool Section.*

Mr. Alfred Hawkesworth, Lecturer on Sheep and Wool in the Technical College, who is in charge of the Wool Section in the Museum, reports:—"The year 1893 has been the busiest of all since the establishment of the Wool Section twelve years ago. It has been greatly augmented by 585 fleeces and samples, many of great prize winners in different parts of the Colonies, and Europe, making a grand total of over 7,500 wool specimens in all. During the past year a number of faulty wools have been sent, such as yolk, stained, and green, &c., the donors being anxious to know the causes of these defects. The removal from the old Museum building to the new premises entailed a great amount of labour, but the advantages now presented through having the whole collection rearranged, each Colony having separate courts, the samples being placed into divisions according to the districts in which they were grown, are very great. By these divisions the specimens become more instructive, showing the effects of climate and pasturage upon the different types. The floor space is adequate for some time to come, but more cases are required, many excellent samples being stowed away in boxes. Valuable collections have been sent to Canada, America, and the Bradford Chamber of Commerce in exchange, and to different Pastoral and Agricultural Shows in the Colony. The whole collection is in a perfect state of preservation, and is becoming quite historical. The advice of the Department upon sheep and wool matters is very frequently sought by large pastoralists, selectors, and farmers."

*Economic Entomology.*

One advantage of the increased accommodation afforded by the new building has been that the collections of economic entomology have been adequately displayed. They are under the charge of Mr. Froggatt, who, in the intervals of collecting, and other duties, has made great progress with them, having mounted several thousand specimens during the year. We have collections to illustrate the silk and lacquer industries, phylloxera, the ravages of white ants, gall-producing insects, insects injurious to timber, and so forth, the endeavour being to show the life-histories of insects which work for the benefit of man or to his injury, and specimens of their products. Most important of all, as regards local industry, is the section of bees and bee-keeping appliances. To this section, Mr. Albert Gale, Lecturer in Horticulture to the Technical College, has largely contributed, and by means of his discourses in country districts he has been the means of inviting the attention of bee-keepers to the efforts the Branch is making on their behalf.

*Native Plants.*

The collection of fresh flowering specimens of native plants has remained open the whole of the year. It no longer interferes with the other specimens, as one of the bays is exclusively devoted to it. Boxes of fresh flowers are sent long distances, and students of botany are furnished with named specimens, or specimens for dissection, while art students are given facilities for depicting them.

*Colonial Timbers.*

Large additions have been made to this section during the year, and I have frequently been called upon to diagnose timbers, or to give information concerning them.

*Sanitary Court.*

The sanitary appliances belonging to the Museum have been arranged in one bay by themselves. Mr. J. L. Bruce, the lecturer in sanitary engineering at the Technical College, has undertaken the supervision of this section, and has enriched it with many interesting specimens. The Water and Sewerage Board have fitted up in the bay a model sewerage system for a private house. I look upon this section as one of the greatest practical interest to citizens of any in the Museum.

The following manufacturers have presented sanitary appliances to the Sanitary Court:—Messrs. Bakewell Bros., Macdonaldtown; Mr. Robert Fowler, J.P., Camperdown; Messrs. Goodlet and Smith, George-street; Messrs. Hart and Gallagher, Petersham; Mr. D. Sharp, plumber, Redfern. The Board of Health, Sydney, presented mounted photographs of a case of *Variola discreta* (small-pox) at different stages of eruption; also, sanitary publications.

*Public School Teachers and the Museum.*

Below is a list of the school teachers who have sent specimens to the Museum during the year. It is not generally known that the Railway Commissioners have kindly granted free freight for specimens consigned to the Museum, so that teachers in country districts who desire to make a contribution to the Central or Branch Museums, or to have specimens named for the purpose of study, need not fear that they will be put to any expense. We have much to learn in regard to the plants, minerals, and fauna of the

the Colony; new species remain to be discovered, life-histories to be worked out, and the geographical range of many to be defined. The Public School teachers of the Colony are well-educated, and, as their districts are extensive with the Colony itself, they can aid in this grand work to an extent that perhaps few of them realise. No matter how insignificant, or of what little intrinsic value a specimen may be, it will be carefully reported upon.

The students of the Training Colleges at Hurlstone and Fort-street have, during the past year, more largely drawn upon the collections to illustrate their object-lessons than usual. I would like to see the profuse illustration of object-lessons even more widely extended. A large number of teachers have, during the vacations, paid one or more visits to the Museum, and I hope to see the number very largely increased.

*Public School Teachers.*

|                                    |                                |
|------------------------------------|--------------------------------|
| C. E. Wilson, Walli.               | W. Knight, Marrangaroo.        |
| Robert Harper, Menangle.           | S. J. Pike, Canadian Lead.     |
| J. Mitchell, Narellan.             | H. Read, Heathcote.            |
| W. J. Cahill, Pian Creek.          | T. Miller, Eugowra.            |
| W. C. Kemp, Lawson.                | S. W. Humphries, Werris Creek. |
| J. Farrell, Attunga Springs.       | J. Crozier, Cootamundra.       |
| James Grant, Theresa Park, Camden. | J. A. Brown, Toothdale.        |
| M. M. Ryan, Eulenstein, Henty.     | C. W. Coombe, Nemingha.        |
| B. F. Dale, Bethungra.             | James Meldrum, Tumberumba.     |
| A. Richardson, Yarramalong.        |                                |

From the abovenamed gentlemen I have received large numbers of specimens during the year. The specimens of Messrs. C. E. Wilson, Robert Harper, and W. J. Cahill amount to over 100 each, and are most acceptable, the agricultural specimens of Mr. Wilson making a fine show.

J. H. MAIDEN,  
Curator.

## APPENDIX XXII.

## REGULATIONS UNDER THE PUBLIC INSTRUCTION ACT OF 1880.

Department of Public Instruction,  
Sydney, 1st July, 1893.

Hrs Excellency the Governor, with the advice the Executive Council, has been pleased to approve of the following Regulations, for carrying out the provisions of the Public Instruction Act of 1880, being made in accordance with the 37th section of that Act. These Regulations are intended to supersede those of 1st July, 1891, and of subsequent dates.

F. B. SUTTOR.

## APPLICATIONS FOR SCHOOLS.

1. Applications for the establishment of the several classes of Schools must be made on the forms prescribed, which may be obtained at the Office of the Department, or from any Inspector.

## PUBLIC SCHOOLS.

2. A Public School may be established in any locality where a regular attendance of twenty children between the ages of 6 and 14 years is guaranteed.

*Inscription.*

3. In the case of every Public School, whether the property be vested in the Minister or not, the words "Public School" only, with, if desired, the year of establishment, shall be put up on the outside of the building in a conspicuous position.

*Uses of Public School Buildings.*

4. No use shall be made of any Public School building tending to cause contention—such as the holding of political meetings, or bringing into it political documents or petitions for signature—or for private purposes. And no such building shall be used as a place of public worship, or for other sectarian purposes, unless built and kept in repair without aid from the Minister; nor in such case, if objected to in writing by one-fourth of the parents of the children attending the school.

*Fees.*

5. The Fee payable for each pupil shall be 3d. per week up to four children of one family, and for four, or any larger number from the same family, the total amount of fees shall be 1s. weekly. Such Fees shall be paid to the Teachers in charge on or before school closing on Friday in each week.

6. The Teacher shall demand and receive such Fees and shall record the receipt thereof, at the time, in the Roll Book of the School.

7. All sums received by Teachers as School Fees must be remitted weekly, or monthly, to the Cashier of the Department of Public Instruction, for payment into the Consolidated Revenue Fund, together with statement in the prescribed form. At the same time a formal return of fees shall be forwarded to the Accountant of the Department.

*Relief from Payment of School Fees.*

8. Application to be relieved from payment of school fees shall be made upon the prescribed form, which may be obtained from teachers of schools by the parents or guardians of children.

*Standard for Exemption from Attendance.*

9. The standard of education required by the 20th section of the Public Instruction Act as a just ground for exempting any child from the obligation to attend school, shall be the following:—

- (1.) Reading—To read the Fourth Book of any authorised series, or, at the option of the Inspector, any other book of equal difficulty.
- (2.) Writing—To write in a neat and legible hand, and without errors in spelling, a passage of twelve lines to be dictated slowly from such book.
- (3.) Arithmetic—To work correctly questions of ordinary difficulty in simple and compound rules, reduction, proportion, and practice.

SUPERIOR

## SUPERIOR PUBLIC SCHOOLS.

10. Any Public School may be declared a Superior Public School, if, after due inquiry, it shall be found that the attendance thereat is sufficient to enable a class to be formed of not less than twenty pupils, who have been educated up to the standard that completes the course prescribed for a Fourth Class.

11. In addition to more advanced work in the ordinary subjects, lessons in other branches shall be given to the highest class, as under :—

To Boys.—In Mathematics, Latin, Science, and Drawing.  
To Girls.—In French, Drawing, and Sanitary Science.

Instruction may also be given in such other branches as the Minister may from time to time consider expedient.

12. Necessary text-books shall be supplied by the Minister.

13. In cases where the regular staff is unable to teach any prescribed subject efficiently, the Minister may employ a special teacher for such subject, and pay him such salary as he may deem expedient, provided that the special class so taught shall be drafted from the highest class, and contain not less than twenty pupils.

14. The course of instruction to be carried out in the highest class of a Superior Public School shall be that prescribed for a fifth class in the Standard of Proficiency; and such subjects shall be studied each year as may be prescribed annually for the Junior or Senior Examinations of the Sydney University.

## EVENING PUBLIC SCHOOLS.

*Signatures to Petition.*

15. Every petition for the establishment of an Evening Public School must be signed, on behalf of not fewer than ten persons, by the parents, guardians, or other residents of the locality in which it is desired to establish such School.

*Persons not eligible to be Pupils.*

16. No person below the age of fourteen years shall be received as a pupil in any Evening Public School, until such person has received a certificate under section 35 of the Public Instruction Act; and no teacher or pupil-teacher employed in any school established or maintained under this Act shall be eligible for admission into such Evening Public School unless authorised by the local Inspector.

*Appointments of Teachers.*

17. Teachers of Evening Public Schools will be appointed by the Minister, but no teacher can be appointed unless he has been trained and classified.

*Place of holding Evening Public Schools.*

18. An Evening Public School may be conducted in any Public School-room, in any class-room attached thereto, or elsewhere in a suitable place.

*Furniture and Apparatus.*

19. The ordinary school furniture and apparatus of any such Public School may be used in the management of an Evening Public School.

*Books.*

20. Necessary supplies of reading books will be granted to Evening Public Schools.

*Time of Meeting.*

21. The pupils of an Evening Public School shall meet for instruction three times weekly at least, and every such meeting shall be of not less than two hours' duration.

*Course of Instruction.*

22. The course of instruction shall comprise Reading, Writing, Dictation, Arithmetic, Grammar, and Geography, and such other subjects as the Minister may from time to time determine.

*Instruction to be Secular.*

23. The instruction imparted must be secular, in accordance with section 7 of the Public Instruction Act.

*Fees.*

24. Every pupil in an Evening Public School shall pay to the teacher weekly, in advance, a fee not exceeding one shilling; but the Minister may relieve any pupils from the payment of school fees where inability to pay is satisfactorily shown, and shall make good the payment to the teacher.

*Salaries.*

25. The salaries of teachers of Evening Public Schools shall be at the following rates :—

|   |     |            |
|---|-----|------------|
| For an average attendance of 10 to 15,  | £19 | per annum. |
| "                  "          15 to 20, | £25 | "          |
| "                  "          20 to 30, | £30 | "          |
| "                  "          30 to 40, | £36 | "          |

*Fuel and Light.*

26. The expense of providing fuel and light must be borne by the Teacher.

*Registers.*

27. A class roll for recording the attendance of pupils, and a lesson register, shall be kept in every Evening Public School.

*Returns.*

28. Quarterly and annual returns shall be furnished in the same form as in Public Schools.

*Inspection and Control.*

29. Evening Public Schools shall be subject to the same inspection and control as Public Schools.

## PUBLIC HIGH SCHOOLS.

30. Examinations for admission to Public High Schools as well as for Scholarships and Bursaries shall be held half-yearly, in June and December, and at these examinations Scholarships and Bursaries may be awarded to those who gain the most marks and show the requisite proficiency, as follows :—

## SCHOLARSHIPS.

15 (7 to boys and 8 to girls in June; 8 to boys and 7 to girls in December), Sydney High School.  
5 Bathurst Girls' High School.  
10 (5 to boys and 5 to girls), Maitland High School.

## BURSARIES.

## BURSARIES.

- 10 half bursaries for Metropolitan and Sub-metropolitan children tenable at the Sydney High, Grammar, or Superior Schools.
- 5 full bursaries (2 to boys and 3 to girls in June; 3 to boys and 2 to girls in December) for country children tenable at the same schools.
- 2 full bursaries in June and 3 in December, Maitland Girls' High School.
- 2 full bursaries in June and 3 in December, Bathurst Girls' High School.
- 5 full bursaries, Maitland Boys' High School.
- In the case of children whose parents reside within convenient access of the country schools only half bursaries will be awarded, and no child so residing will be permitted to compete for a Sydney bursary. *Vice versa*, no Sydney child may compete for a country bursary.
- Every applicant for either a scholarship or a bursary must state in his application what school he intends to enter.
- Country children are expected to attend the High School nearest by a practicable route to their places of residence. In exceptional circumstances, however, the Minister may, on application being made, sanction a departure from this rule. The application should accompany the form notifying intention to compete.
31. There shall be two groups of subjects for examinations, one for Scholarships and one for Bursaries. They are—

## FOR SCHOLARSHIPS.

- (1.) *Grammar*.—To parse the more difficult words in a passage of about six lines. To distinguish the true subjects and the true predicates in sentences. To correct inelegant or ungrammatical expressions. To exemplify the correct usage of picked words.
- (2.) *Dictation*.—To write a passage of about fourteen lines, dictated from some standard author or from an ordinary newspaper, with correct spelling and punctuation.
- (3.) *Arithmetic*.—To solve questions in Proportion, Vulgar and Decimal Fractions, Interest and Discount.\*
- (4.) *French (for girls)* } As prescribed for Fifth Classes in Public Schools, First Half-year.  
*Latin (for boys)* }
- (5.) *Euclid (for boys only)*.—Book I, Definitions, &c.; Propositions 1 to 20 inclusive.
- (6.) *Algebra (for boys only)*.—First Four Rules.

## FOR BURSARIES.

- (1.) *Grammar*.—As for Scholarships.
- (2.) *Dictation*.—As for Scholarships.
- (3.) *Arithmetic*.—As for Scholarships.
- (4.) *History*.—Henry VII to Victoria inclusive, as prescribed for fourth classes in Public Schools; History of Australia as taught in Public Schools.
- (5.) *Geography*.—Europe, Asia, America, and Australia, as prescribed for third and fourth classes in Public Schools.
- (6.) *Drawing and Music*.—As prescribed for third and fourth classes in Public Schools.

Candidates shall be eligible for admission to a High School who pass satisfactorily in the subjects numbered (1), (2), and (3), and in one other subject selected from Nos. (4), (5), and (6) in either group.

32. A Scholarship will be tenable for three years, subject to good reports from teachers, and will entitle a pupil to a free grant of text-books and to free education in a State High School. A bursary will be tenable for three years, subject to good reports from teachers, and will entitle a pupil to a free grant of text-books and to free education in Sydney High School, in a Sydney Superior Public School, or in the Sydney Grammar School, or in one of the Country High Schools. When a pupil holding a Bursary must necessarily board away from home in order to attend one of these schools, an allowance not exceeding £30 a year, in addition to free education and text-books, will be made.

33. No pupil will be awarded a Bursary whose parents or guardians are in a position to pay for his education; but, subject to this proviso, the examination for Bursaries will be open to all boys and girls under fourteen years of age who have attended a Public School with reasonable regularity for the two years preceding the date of examination.

34. The examination for scholarships will be open to all boys and girls under fourteen years of age.

35. Candidates who compete for a Bursary or Scholarship more than once will be eligible for a Bursary or Scholarship only for the period remaining out of three years from the date of their first competition, and no candidate will be permitted to compete after having attended a High School.

36. The fee to be charged at a High School shall be £3 3s. per quarter payable in advance.

37. The fees shall in no case be the property of the teachers but shall be forwarded to the Cashier for payment into the Consolidated Revenue Fund.

38. The parents or guardians of candidates for Bursaries or Scholarships must fill in and forward to the Under Secretary the necessary forms of application at least six weeks before the date of examination. Such forms may be obtained at this office.

## STATE BURSARIES FOR UNIVERSITY EDUCATION.

39. Ten Bursaries, six to boys and four to girls, tenable for three years at the Sydney University, will be awarded annually on the position of candidates at the March Matriculation Examination.

40. Candidates must be under eighteen years of age, and must have attended a State High School, a Public School, or, as State Bursars, the Sydney Grammar School, for the year previous to the examination; and they must produce satisfactory testimonials of character from the headmasters of the schools they have attended.

41. They must satisfy the Minister of Public Instruction that their own and their parents' means are unequal to the expense of the University education. To a successful competitor who resides at such distance from the University as to be unable to travel to and fro daily a full bursary will be awarded, while to one who resides in the metropolitan or sub-metropolitan inspectorial district, within easy access of the University, part of a Bursary only will be awarded. The candidate's status as to whether he can be deemed eligible for a full Bursary or part of a Bursary will be decided by the Minister before his admission to examination.

42. A Bursary shall entitle pupils to text-books and free education, together with an allowance not exceeding £20 per annum to those who need not board away from home, and not exceeding £50 to those who must necessarily do so.

43. Every Bursar must matriculate at the University and attend lectures; and he shall continue to hold the Bursary only on condition that his conduct be good, and that he pass creditably the examination at the end of the first and second years after his matriculation.

44. The parents or guardians of candidates must fill in and forward to the Under Secretary the necessary forms of application for University Bursaries at least six weeks before the date of the Matriculation examination. Such forms may be obtained at this office.

## PROVISIONAL

\* In the case of girls, Interest and Discount to be omitted.

## PROVISIONAL SCHOOLS.

45. A Provisional School may be established in any locality where not fewer than twelve, but not more than nineteen, children between the ages of six and fourteen years can regularly attend such school : provided that no Provisional School shall be established within four miles, by the nearest route practicable for children, of any existing Public, Provisional, or Half-time School.

46. The necessary school buildings and furniture for a Provisional School, as well as the requisite books and apparatus, will be provided at the cost of the Department, subject to the following conditions :—

- (a) That the grant in aid of the building and furniture shall be limited to £45, when, in the opinion of the Inspector, the average attendance will be from 12 to 15, and to £60 when the average attendance is likely to be 18; that payment shall not be made until the building has been erected, and reported by an Inspector or other officer of the Department of Public Instruction to be ready for occupation.
- (b) That the building shall be placed on Crown lands, if a site thereon central to the school population and otherwise suitable can be obtained, and that, if built on private land, the right-of-way shall be secured, and the property leased to the Minister of Public Instruction for a term of years, as may be agreed upon, at a peppercorn rent, the Minister having the right to remove the building before or at the expiration of that term.
- (c) That where the average attendance is expected to range from 12 to 15, the schoolroom shall measure 14 feet in length, 12 feet in width, and 9 feet in height to the wall-plates, and shall have a pitched roof, two windows, a boarded floor, and a fireplace; two out-offices must also be provided, and the following articles of furniture supplied, viz. :—
- 2 desks, each 10 feet 6 inches long.  
2 forms, each 10 feet 6 inches long.  
1 book-press or box.  
1 table, 3 feet by 2 feet.  
1 chair.
- (d) That when the average attendance is expected to be 18, the schoolroom shall measure 17 feet in length, 14 feet in width, and 9 feet in height to the wall-plates, and shall have a pitched roof, two windows, a boarded floor, and a fireplace; two out-offices must also be provided, together with the following articles of furniture, viz. :—
- 4 desks, each 7 feet 6 inches long.  
4 forms, each 7 feet 6 inches long.  
1 book-press or box.  
1 table, 3 feet by 2 feet.  
1 chair.
- (e) That the applicants for a Provisional School state, on the usual form of application, the arrangements which they deem best for having the building erected, and the furniture supplied, with the least possible delay.

47. Teachers of Provisional Schools will be appointed by the Minister, after their competency for the office has been ascertained.

48. To ensure the continuance of a Provisional School, the provisions of the Public Instruction Act must be duly observed, and an average attendance of not less than 12 pupils maintained.

49. Provisional Schools shall be classified in the following manner :—

|  |   |                                   |
|--|---|-----------------------------------|
| Schools with an average attendance below 20, but not below 18. | } | First-class Provisional Schools.  |
| Schools with an average attendance below 18, but not below 15. |   | Second-class Provisional Schools. |
| Schools with an average attendance below 15, but not below 12. |   | Third-class Provisional Schools.  |

50. The Salaries of Teachers of Provisional Schools shall be at the following rates :—

- In First-class Provisional Schools, £91 per annum.  
In Second-class Provisional Schools, £80 per annum.  
In Third-class Provisional Schools, £68 per annum.

51. School fees shall be paid at the same rate as prescribed for Public Schools, and the sums received shall be paid to the Consolidated Revenue.

52. Provisional Schools must be conducted in every respect as Public Schools, and be subject to all the provisions of the Public Instruction Act with respect to religious instruction.

53. The course of secular education shall embrace Reading, Writing, Arithmetic, Grammar, Geography, and History, with needlework for girls, whenever practicable; and the instruction must be imparted in accordance with the prescribed standards of proficiency.

## SCHOOLS TAUGHT BY ITINERANT TEACHERS.

(A.) *Half-time Schools.*

54. Wherever twenty children, between the ages of six and fourteen years, are residing within an estimated radius of 10 miles from a central point, and can be collected in groups of not less than ten children in each, the Itinerant Teacher shall visit two such places only, and the schools so established shall be designated Half-time Schools.

55. Aid will not be granted towards the maintenance of such schools unless suitable school-houses be provided by the applicants.

56. No schoolroom shall be approved unless it be at least 10 feet in width, be floored, be provided with a fireplace, and be properly lighted and ventilated.

57. A full supply of furniture and school books shall be granted as a first stock to all schools newly established, and further grants will be made from time to time, as may be deemed expedient.

58. The same Registers are to be kept, and the same Returns furnished as in Public Schools.

59. Every teacher must divide his time between the schools under his charge, in such a way as to effect the largest amount of good. Where practicable, he is to devote the mornings to the teaching of one school, and the afternoons to the teaching of the other; but, if found more suitable, other arrangements may be adopted, under the authority of the Inspector charged with the supervision of the schools. The parent or guardian of each child is to be supplied by the Teacher with a time-table showing the hours at which school opens and closes.

60. Half-time Schools shall be classified in the same manner as Public Schools, according to the total average attendance of pupils at the stations at which the teacher gives instruction.

61. Teachers shall be paid the same rates of salary as teachers of Public Schools of corresponding classification.

62. The scale of fees for Half-time Schools shall be, for five days teaching—

- For one child in a family, threepence.
- For two children in a family, sixpence.
- For three children in a family, ninepence.
- For four or more children in a family, one shilling.

The sums received shall be forwarded by the Teacher to the Cashier for payment into the Consolidated Revenue.

63. Teachers shall be paid an annual allowance of £10, where necessary, for forage, in addition to the salary attached to their schools.

64. As regards instruction, every Half-time School is to be conducted in all respects as a Public School.

65. Teachers are required to insist on the carrying out of a systematic course of Home Lessons.

66. Teachers shall be held directly responsible to the Inspectors under whose supervision they are placed.

67. At the end of each month a report upon the work done during that period must be furnished by Teachers to the Inspector.

*(B.) House-to-house Schools.*

68. Teachers not necessarily trained may be employed in house-to-house teaching; they must be persons of good moral character, and must satisfy the Inspector that they are capable of imparting the rudiments of an English education.

69. The mode in which their time shall be apportioned between the several families visited by them will be determined by the Minister, on information furnished by the Inspector.

70. The subjects of Instruction shall be limited to Reading, Writing, Dictation, and Arithmetic.

71. It is required that the teacher shall supplement his oral instruction by a systematic course of Home Lessons.

72. At the end of each month a report upon the work done during that period must be furnished by the Teacher to the Inspector.

73. The remuneration of teachers engaged in the work shall be at the rate of £4 15s, per annum for each pupil in average attendance, up to a maximum salary of £95 per annum.

74. In addition to such remuneration, they shall be allowed, where necessary, a sum of £10 per annum as forage allowance. Application for payment should be made at the end of each quarter.

75. As a condition to payment of salary, they must keep a record of the pupils' attendance in a satisfactory manner, and furnish punctually and accurately such returns as may be required by the Department.

76. Necessary text-books and materials will be supplied on requisition, as in the case of other schools.

77. The school fees payable shall be at the same rate as prescribed for half-time schools, and the sums received shall be forwarded to the Cashier for payment into the Consolidated Revenue.

GENERAL REGULATIONS.

*Grants of School Books, &c.*

78. Grants of school books and apparatus shall be made from time to time, as may be deemed expedient, to all schools under supervision of the Minister, in proportion to the average number of children in attendance. A full supply will be granted to schools newly established.

*Requisitions for School Materials.*

79. Requisitions for supplies should be forwarded at the end of a quarter only.

*Character of School Books.*

80. Such books only as are supplied or sanctioned by the Minister shall be used in any school for ordinary instruction.

*Apparatus.*

81. The term Apparatus shall be held to include maps, diagrams, pictures, black-boards, easels, ball-frames, and Kindergarten appliances.

*Registers, &c., to be kept.*

82. The undermentioned Registers and Forms shall be kept, according to directions supplied with them, by every teacher: (a) Admission Register, (b) Class Roll, (c) Daily Report Book, (d) Punishment Book, (e) Lesson Register, (f) Time-table, and (g) Programme of Lessons for each Class.

*Returns.*

83. Quarterly and Annual Returns shall be furnished from every school. Each Quarterly Return must be neatly made out in duplicate, one copy to be retained by the teacher as a record, and the other to be furnished to the Inspector on the last Saturday preceding the Midwinter and Christmas vacations, and in other cases on the last Saturday in the months of March and September. The Annual Return must be forwarded, with the Quarterly Return, immediately after the close of the December quarter.

*Default as to Returns or Registers.*

84. Negligence in compiling or sending Returns, or in keeping School Registers, shall render a teacher liable to a fine, or, if repeated, to a loss of classification. Any teacher guilty of fraudulently making false entries in any Register or Return will be dismissed.

*Appointment and Training of Teachers.*

85. Every applicant for employment as a teacher, unless he be a University graduate, or a person holding a certificate from a recognized training institution, must show that he has gained in the Colony, either as a pupil in a State School, or otherwise, a sufficient experience of the established Public School system to warrant his employment. Every untrained applicant must undergo a course of training before being permanently appointed, and he must sign an undertaking to accept employment in any locality indicated by the Minister.

*Married Women Ineligible.*

86. Married women will not be accepted for employment as teachers.

*Position of Teachers.*

87. Teachers employed under the Department of Public Instruction are Civil Servants of the Crown.

*Teachers not to seek Outside Influence.*

88. Teachers are appointed, promoted, and removed on a due consideration of their claims and merits. They are, therefore, prohibited from seeking the interest of influential persons outside the Department to obtain promotion, removal, or other advantage. Any infringement of this Regulation will be severely dealt with.

*General*

*General Qualifications.*

89. As a general rule, no person will be appointed as a teacher unless he has been examined and classified. In some cases a teacher may be appointed provisionally who has not undergone examination; but his appointment will not be ratified until his competency has been tested in that manner.

*Teachers' Travelling Expenses.*

90. Except in the case of applicants for removal and of teachers who obtain substantial promotion by removal, reasonable allowances on account of *personal* expenses in travelling will be granted to teachers in proceeding to new appointments. As a rule, the cost of carriage of furniture and household effects must be borne by teachers themselves.

*Examination and Classification.*

91. The attainments of Teachers, Students of the Training Schools, and Candidates for employment as Teachers, shall be tested by written and oral examinations, and their skill in teaching determined by their ability to manage a school or class; and, according to such attainments and skill, they will be classified in the following grades:—The first, or highest, class, will have three grades, distinguished as IA with Honors, IA (without Honors), and IB; the Second Class will have three grades, distinguished as IIA with Honors, IIA (without Honors), and IIB; and the Third Class will have three grades, distinguished as 3A, 3B, and 3C. A classification awarded to a Teacher, a Student of the Training School, or a Candidate for employment, after his first successful examination, shall be provisional only, and be confirmed at the end of three years from the date of examination if the Inspectors' reports upon his school work be fully satisfactory: provided that the classification of any Teacher in the School Service shall be liable to reduction or cancellation for inefficiency, gross neglect of duty, or serious misconduct on the part of the person holding such classification. As a rule, a teacher will not be regarded as eligible for examination, with a view to promotion to a higher class, until his provisional classification has been confirmed.

*Commencement of duty.*

92. When a teacher is appointed to a school, he must report to the Inspector of the District the fact of arrival at his post, and the date of commencing duty.

*Resignation of a Teacher.*

93. A teacher is required to give not less than one month's notice of his intended resignation, which shall take effect on the last day of the month indicated. Before receiving salary for the last month, he must hand over to a person duly authorized all school property belonging to the Minister, and make out, in duplicate, an inventory of the same: one copy, to be forwarded to the Inspector, the other to be left with the School Records.

*Teachers not to engage in other Occupations.*

94. Teachers in the service of the Minister are prohibited from holding any office unconnected with their school work which might bring them into collision with any of the parents or residents, and from engaging in any occupation not having a distinctly educational character, unless the sanction of the Minister has been previously obtained.

*Duties of Teachers.*

95. The duties of Teachers shall be:—

To observe faithfully these Regulations.

To carry out the suggestions of Inspectors.

To teach according to the Course of Secular Instruction.

To maintain the discipline prescribed in the Regulations.

To keep the School Records neatly, and to furnish Returns punctually.

To see that the undermentioned documents are kept posted in a conspicuous place in the school-room, namely:—(a) The Regulations; (b) Notice to Visitors; (c) Course of Secular Instruction; (d) Time-table; (e) Programme of Lessons; (f) Scale of Fees; (g) Proclamation as to obligatory attendance; (h) List of Public School Board.

To take charge of the school buildings and all property belonging to the Minister, and to be responsible for keeping the school premises in good order and tenable repair—reasonable wear and tear excepted—and to see that they are not used for any private purposes without the Minister's permission.

*Teachers' Wives.*

96. In a school containing female children but no female teacher, it will be the duty of the teacher's wife to teach needle-work to the girls during at least four hours in each week. In forming an estimate of the efficiency of a school, the competency and usefulness of the teacher's wife, and the time she devotes to school duties, will be taken into account.

*Assistant Teachers.*

97. Assistant teachers may be appointed to schools in which the average daily attendance exceeds seventy. They may be (a) persons who have served for four years as pupil-teachers, or, (b) persons who have been examined and classified.

*Pupil-teachers.*

98. Pupil-teachers may be employed to serve for not less than four years in any school in which the average attendance has not been less than fifty for the preceding quarter, provided that the teacher holds a classification not lower than Class II.

*Conditions of Appointment.*

99. Candidates for the office of pupil-teacher must be not less than fourteen nor more than seventeen years of age, and free from any bodily infirmity likely to impair their usefulness. They must also pass an examination in the subjects specified in Appendix A.

*Remuneration.*

100. The remuneration of a pupil-teacher will consist partly of instruction to be given by the teacher, for at least one hour on every school day, and partly in a yearly salary.

*Examinations.*

101. The subjects in which teachers and pupil-teachers shall be examined for classification are those stated in Appendix A.

102. An examination of teachers shall be held yearly in each Inspector's district. Teachers who desire to be examined, with a view to promotion, must apprise the Inspector of their wish at least one month before the date of examination, and furnish him with a list of the alternative subjects, if any, upon which they are prepared for examination.

*Promotion*

*Promotion for Good Service.*

103. Teachers can be promoted from one class to another by examination only. But in each class a teacher may, without examination, be advanced to a higher grade for good service; that is to say, if in the last five years during which he has held his classification, his school has increased in efficiency, if the Inspectors' Reports throughout that period have been satisfactory, and the Report for the fifth year indicates that the applicant's practical skill is equal to that required for the grade sought, and if his general conduct has merited the Minister's approval.

*Promotion by Removal.*

104. Teachers desirous of being promoted to more important schools must intimate their wishes to the Inspector of the district, in writing. A list of such teachers will be kept in the Department of Public Instruction; and, except in special cases, promotions will be made in accordance with the principle of classification and seniority.

*Efficiency of Teachers.*

105. In judging of the efficiency and usefulness of Teachers and of their claims to promotion, the successful work carried on by them in connection with (a) the initiation and management of School Savings' Banks, (b) the planting and beautifying of school grounds, (c) the instructing and drilling of Public School Cadet Corps, and (d) the passing of pupils at the Junior or Senior Examinations, will have full value awarded to it.

*Classification of Schools.*

106. Primary schools established or maintained under this Act shall be classed as follows :—

## First Class Schools.

All schools in which the average daily attendance is not less than six hundred, and in which the standard of proficiency prescribed for that class of school is fully reached.

## Second Class Schools.

All schools in which the average daily attendance is not less than four hundred children nor more than six hundred, and in which the standard of proficiency prescribed for that class of school is fully reached.

## Third Class Schools.

All schools in which the average daily attendance is not less than three hundred nor more than four hundred, and in which the standard of proficiency prescribed for that class of school is fully reached.

## Fourth Class Schools.

All schools in which the average daily attendance is not less than two hundred nor more than three hundred, and in which the standard of proficiency prescribed for that class of school is fully reached.

## Fifth Class Schools.

All schools in which the average daily attendance is not less than one hundred nor more than two hundred children, and in which the standard of proficiency prescribed for that class of school is fully reached.

## Sixth Class Schools.

All schools in which the average daily attendance is not less than fifty nor more than a hundred children, and in which the standard of proficiency prescribed for that class of school is fully reached.

## Seventh Class Schools.

All schools in which the average daily attendance is not less than forty nor more than fifty, and in which the standard of proficiency prescribed for that class of school is fully reached.

## Eighth Class Schools.

All schools in which the average daily attendance is not less than thirty nor more than forty children, and in which the standard of proficiency prescribed for that class of school is fully reached.

## Ninth Class Schools.

All schools in which the average daily attendance is not less than twenty nor more than thirty children, and in which the standard of proficiency prescribed for that class of school is fully reached.

## Tenth Class Schools.

All Public Schools in which the average daily attendance does not reach twenty.

*Condition of Retention in Class.*

107. Where a school fails to meet the conditions above specified, the Minister may remove such school to a lower class.

*Eligibility of Teachers for appointment to certain Schools.*

108. Teachers who have gained their classifications by examination, or by promotion under Regulation 103, shall be eligible for appointment to any Primary School or any boys' or girls' department, in accordance with the following Schedule :—

| Class of School or Department. | Teacher's Classification. |
|--------------------------------|---------------------------|
| I.....                         | I. A.                     |
| II.....                        | I. B.                     |
| III.....                       | II. A. with Honors.       |
| IV.....                        | II. A.                    |
| V.....                         | II. B.                    |
| VI.....                        | II. B.                    |
| VII.....                       | III. A.                   |
| VIII.....                      | III. B.                   |
| IX.....                        | III. C.                   |
| X.....                         | III. C.                   |

Mistresses of Infants' Departments must hold a classification of II. A.

109. A teacher may be removed from the school in which he is employed to another of a lower class, should he fail, through any default on his part, to maintain the requisite number of pupils in average attendance, or to satisfy the conditions of the standard of proficiency.

*Teachers'*

*Teachers' Emoluments.*

110. The salaries of male teachers shall be according to the following scale :—

|  |                     |      |
|--|---------------------|------|
| For a teacher in charge of a school of the | First Class .....   | £380 |
| Do do do                                   | Second Class.....   | 319  |
| Do do do                                   | Third Class .....   | 239  |
| Do do do                                   | Fourth Class.....   | 228  |
| Do do do                                   | Fifth Class .....   | 217  |
| Do do do                                   | Sixth Class .....   | 205  |
| Do do do                                   | Seventh Class ..... | 171  |
| Do do do                                   | Eighth Class.....   | 148  |
| Do do do                                   | Ninth Class .....   | 125  |
| Do do do                                   | Tenth Class .....   | 103  |

In schools ranking below the fourth class, the salaries of unmarried male teachers, of married teachers who are not assisted by their wives, as required by regulation 96, and of female teachers in charge, shall be £12 per annum less than the foregoing rates.

111. In addition to these salaries, residences, vested or rented, shall be provided for classified married male teachers in charge of classified Public Schools; but a residence rented for a teacher shall be as near as practicable to his school.

*Mistresses.*

112. The salaries of mistresses shall be according to the following scale :—

|  |                    |                    |                      |
|--|--------------------|--------------------|----------------------|
| For a mistress in charge of a girls' or infants' department of a |                    |                    |                      |
| School of the  | First Class .....  | Girls' Department. | Infants' Department. |
|  |                    | £285               | £194                 |
| Do   | Second Class ..... | 239                | 182                  |
| Do   | Third Class.....   | 194                | 171                  |
| Do   | Fourth Class ..... | 182                | 160                  |

*Assistant Teachers.*

113. Salaries shall be paid to assistant teachers as follow :—

|   |                             |       |         |
|---|-----------------------------|-------|---------|
|   |                             | Male. | Female. |
| To a First Assistant, holding a First Class Certificate, in a school of the   | First Class .....           | £237  | £160    |
| To a Second Assistant, holding a Second Class Certificate, in a school of the | First Class .....           | 142   | 114     |
| To a Third Assistant, holding a Third Class Certificate, in a school of the   | First Class.....            | 103   | 95      |
| To a First Assistant, holding a Second Class Certificate, in a school of the  | Second Class.....           | 171   | 137     |
| To an Assistant holding a Second Class Certificate, in a school of the Third, | Fourth, or Fifth Class..... | 142   | 108     |

*Pupil-teachers.*

114. Salaries shall be paid to Pupil-teachers at the following rates :—

|                    |  |       |        |
|--------------------|--|-------|--------|
|                    |  | Male. | Female |
| First Class .....  |  | £68   | £46    |
| Second Class.....  |  | 57    | 34     |
| Third Class .....  |  | 46    | 29     |
| Fourth Class ..... |  | 40    | 23     |

*Work-mistresses.*

115. Work-mistresses may be appointed to schools of the first and second classes; and their salaries shall be at the following rates :—

|   |  |           |
|---|--|-----------|
|   |  | Per annum |
| In a First Class School with an average daily attendance of not fewer than 250 girls... |  | £114      |
| In a First Class School with an average daily attendance of fewer than 250 girls.....   |  | £95       |
| In a Second Class School.....   |  | £86       |

116. The time devoted to their duties by Work-mistresses shall be as follows :—

|   |  |              |
|---|--|--------------|
|   |  | Days a week. |
| In First Class Schools with an attendance of 250 girls .....            |  | 5            |
| In First Class Schools with an attendance of fewer than 250 girls ..... |  | 4            |
| In Second Class Schools .....   |  | 4            |

117. Each Work-mistress shall be required to keep a record showing the names of the pupils, as well as the dates of commencing and completing each piece of work. The record is to be preserved for the information of the Inspector, and of the Directress of Needlework.

118. The regular Teachers of such classes as may be receiving instruction in Needlework will be expected to assist the Work-mistress in the performance of her duties.

## TRAINING SCHOOLS.

*Classes of Candidates.*

119. The Minister may authorize to be received into the Training Schools, annually, three classes of candidates, namely, *First Class, or Scholarship Candidates*—Thirty pupil-teachers whose term of service has expired, and who have obtained the highest marks among those passing the entrance examination successfully; *Second Class, or Half-Scholarship Candidates*—Twenty pupil-teachers whose term of service has expired, and who have obtained, after the first thirty, the next highest marks among those passing the entrance examination successfully, and are prepared to pay half the cost of their maintenance while in training; *Third Class, or non-Scholarship Candidates*—Other Pupil-teachers whose terms of service have expired, untrained teachers who have had charge of schools, and persons entering the teaching profession for the first time, who have passed the entrance examination successfully, and are prepared to pay the whole cost of their maintenance while in training.

*Qualifications.*

120. Candidates must apply for admission in a form prescribed by the Minister. They must, except in the case of pupil-teachers, be not less than twenty years of age, and, as a general rule, not more than thirty; they must be free from any bodily infirmity likely to impair their usefulness as teachers, and be persons of active habits and unblemished reputation. They must also satisfy the Minister as to their previous history and their qualifications.

*Conditions of Admission.*

121. Before admission, every candidate must make a declaration that he intends, in good faith, to follow the profession of a teacher in schools under the Minister, and that he will accept a situation in any district, as the Minister may see fit. He must also procure a guarantee from two responsible persons that the whole expense of his training defrayed by the State will be refunded, if, from any cause whatever, he shall not enter the service of the Minister, or shall leave it in less than three years from the date of his first appointment.

*Terms*

*Terms of Training.*

122. Entrance examinations shall be held yearly in December; and the periods of training will be one year, two years, or three years, as may be found expedient.

*Allowances during Training.*

123. The following allowances may be made to students who satisfy the aforementioned conditions and pass successfully the prescribed examinations:—To scholarship students, £6 per month; to half-scholarship students, £3 per month. When the school is prepared to receive students into residence, these allowances are not paid, board and lodging being provided instead.

*Practical Training.*

124. The students shall be trained in the practical management of schools by attendance at the Practising Schools.

*Examinations.*

125. Oral examinations of the students shall be held periodically to test their attention and progress; and written examinations shall take place yearly, in December, when classifications will be awarded according to attainments and teaching skill to students who have completed their course. No certificate shall be given until the Inspector's Report shows that the student is successful in the management of a school.

## GOVERNMENT OF SCHOOLS.

*Public School Boards.*

126. The Minister reserves to himself the power of controlling, through his officers, the internal management of schools; but, for other purposes, he will avail himself of the assistance of Public School Boards, wherever suitable persons are found to fill the office.

127. Every Public School Board, at the first meeting thereof, shall elect from the members a Chairman, whose duty it will be to correspond with the Minister on behalf of the Board; and the Board may in like manner appoint such other honorary officers, being members of the Board, as the Board may deem expedient.

128. A Public School Board may, by resolution passed at a duly constituted meeting thereof, appoint any member or members to perform the duty, prescribed by the 19th section of the Public Instruction Act, of visiting any of the schools placed under the supervision of the Board; and it shall be the duty of the member or members so appointed to report the results of any such visitation to the Board, who will, if necessary, report to the Minister.

129. The grounds upon which any Public School Board shall exercise the power conferred on it by the section before-mentioned to suspend a teacher for misconduct, shall be the following:—Unfitness on the part of such teacher to perform his duties from intemperance, immoral conduct, gross neglect of duty, or continued absence from duty without leave.

130. Public School Boards shall, before leaving the school under visitation, report to the Minister any case in which a teacher is suspended by them, and apprise the Inspector having charge of such school by letter.

131. Public School Boards are expected to use every endeavour to induce parents to send their children regularly to school, and to report the names of any parents or guardians who refuse or fail to educate their children.

132. When the course laid down in Regulations under the 13th section of the Public Instruction Act for relieving parents and guardians from payment of school fees by the Minister is not convenient, application may be made by parents or guardians to the Public School Board of the district; and, if satisfied as to the inability of the applicants to pay school fees, such Public School Board may issue a certificate of exemption from payment thereof for a period not exceeding three months, and shall thereupon report the case to the Minister.

133. In fixing the hour for special religious instruction, in accordance with section 17 of the Public Instruction Act, the Public School Board should take care that the daily routine of the school, as laid down in the Regulations, is not unduly interfered with.

134. In addition to the powers conferred on such Boards by the Public Instruction Act, the Minister entrusts to them the following duties:—(a) To take care that the school buildings are not used for any improper purpose. (b) To see that a sufficient quantity of suitable furniture and apparatus is provided. (c) To take precautions for excluding from the school, during its ordinary business, all books not sanctioned by the Minister. (d) To inspect periodically the School Registers and Records. (e) To see that the school is open on all the usual school days, and that the teacher is present at his work. (f) To observe whether the teacher discharges his duties, to report his conduct to the Minister when he is in fault, and to protect him from vexatious complaints.

*Inspectors of Schools.*

135. Inspectors and other persons deputed by the Minister to visit any school shall be furnished with proper credentials. Every teacher is required to treat such persons with deference; to carry out their suggestions for the improvement of the school; and to obey their instructions in all matters relating to the Public Instruction Act and these Regulations.

*Duties of Inspectors.*

136. Inspectors are to enforce observance of the provisions of the Public Instruction Act and of the Regulations; but their decisions shall be subject to appeal to the Minister. They are to examine into condition of the schools, and to inquire into all matters which it may be expedient to report to the Minister. They are authorized to determine all questions of school management, and to take the teaching of a class or of a school into their own hands for a time, to show the teacher how defective methods may be improved.

*Annual Inspections.*

137. Once at least in the year, every school in each Inspector's district shall be visited by him and the pupils be examined as to their proficiency in the several branches of instruction as authoritatively prescribed. He shall, within six days of such inspection, send a report thereupon to the Minister, together with such observations on the state of the school generally as shall appear to him to be called for.

*Conduct of Inspectors.*

138. In their intercourse with teachers, Inspectors should be guided by feelings of respect for the teacher's office, and of sympathy with his labours. They should exhibit towards teachers every possible courtesy, treating them at all times with the consideration and kindness which the difficulties of their position demand.

*Observation Book.*

139. The Inspector's remarks upon the state of a school visited by him, shall, at the close of the examination, be entered in the Observation Book of the school, which, as a record, is to be carefully preserved. Entries therein must not be erased or altered.

## SCHOOL ROUTINE AND DISCIPLINE.

*Punctuality.*

140. With a view to the proper training of their pupils, teachers must conduct the operations of their schools with punctuality and regularity.

*Cleanliness.*

141. Habits of personal neatness and cleanliness are to be encouraged among the pupils, not only by precept, but by the personal example of the teachers, and, if necessary, may be enforced. Teachers are also responsible for keeping the schoolrooms and furniture clean and arranged in an orderly manner.

*Order and Conduct.*

142. Teachers are to instil into the minds of their pupils the necessity for orderly and modest behaviour, as well as for obedience to teachers and to the rules of the school. Pupils should also be trained to exhibit respect for the property of others, whether public or private; to regard the feelings of their fellows; to be honest and truthful, attentive under instruction, and conscientious in the discharge of every duty.

*Government of Pupils.*

143. In the government of pupils a teacher must avoid all degrading punishments. His discipline should be mild but firm, his manner kindly, his demeanour cheerful, and his language marked on all occasions by strict propriety. While overlooking no offence, his aim should be to prevent the necessity for punishment by effecting the improvement of the offender.

*Corporal Punishment.*

144. Corporal punishment may be inflicted, but by the principal teacher only, or by an assistant with his approval. It should be restricted to *extreme* cases; and the teacher must keep a record of the time and place of punishment, its amount, and the nature of the offence. [See also Clause 17 of Instructions to Teachers.]

*Expulsion of Pupils.*

145. No pupil shall be expelled from any school except by the authority of the Minister.

*Suspension.*

146. A pupil may, nevertheless, for gross insolence, persistent disobedience, profanity, or immoral conduct, be, by the teacher, forthwith removed from the school; provided that, in every such case, the matter shall be reported without delay to the Minister; and, until its settlement by him, the pupil shall not be re-admitted.

*Playground Supervision.*

147. The conduct of pupils in the playground must be carefully supervised by the teacher; and he must see that, in proceeding to school and returning from it, their behaviour is orderly.

*Religious Views of Pupils or of Parents.*

148. Nothing must ever be said or done by any teacher, in a pupil's hearing or presence, calculated to offend the religious views of that pupil, or of any other in the school, or of the parents of any such pupil.

*Daily Routine.*

149. In all schools maintained or aided by the Minister, the daily routine shall be that specified hereunder: Provided that, by permission of the Minister, the time of assembling may be half an hour later than so specified; in which case, the several times stated will be later in the same proportion.

*Morning.*

- At 8:45. Pupils to assemble in the playground. All school materials to be prepared for lessons.
- At 8:55. Pupils to be arranged in ranks, inspected as to cleanliness, and marched into school.
- At 9. Lessons (or Special Religious Instruction) to commence; as noted in the Time-table prescribed by Rule 150.
- At 10:30. Recess for ten minutes, to be spent in the playground by pupils and teachers.
- At 10:45. Lessons to be resumed according to the Time-table.
- At 11:55. Class-roll to be called and marked.
- At 12. The school to be dismissed for mid-day recess.

*Afternoon.*

- From 12 to 1:20. Recess for dinner and recreation, under the superintendence of the teachers
- At 1:20. Pupils to re-assemble in the playground. School materials to be prepared for lessons.
- At 1:25. Pupils to be arranged, inspected, and marched into school.
- At 1:30. Lessons to re-commence as noted in the Time-table.
- At 3:25. The Roll to be called and marked.
- At 3:30. The school to be dismissed.

*Time-table.*

150. The Time-table to be observed in the schools is the following, except that, in cases within the proviso to the preceding Regulation, the time in each instance will be half an hour later than specified:—

- From 9 to 10. Special Religious Instruction; or, in Public and Provisional Schools, where no Religious Teacher is in attendance, Ordinary Instruction.
- From 10 to 12. Ordinary Instruction.
- From 12 to 1:30. Recess for dinner and re-assembling.
- From 1:30 to 3:30. Ordinary Instruction.

*Special Religious Instruction.*

151. Where the time specified for special religious instruction is inconvenient, some other hour may be fixed by mutual agreement between the Public School Board, the teacher, and the person giving such instruction.

*Vacations and Holidays.*

152. The vacations sanctioned by the Minister are—four weeks at Christmas, one week at Easter, and a fortnight at Midwinter. The holidays allowed, other than those occurring in vacation, are—the Anniversary of the Colony, of the Queen's Birthday, and of the Prince of Wales' Birthday; and Good Friday.

Teachers are to enter on their Time-tables these Vacations and Holidays.

*Closing Schools.*

153. No school is to be closed upon any school-day without the written direction of the Minister or other person duly authorized by him on that behalf.

*Infectious Diseases.*

154. The attendance of any pupil suffering from any contagious, offensive, or infectious disease, may be temporarily suspended by the teacher under rules approved by the Minister.

## INSTRUCTION IN SCHOOLS.

*Course of Instruction.*

155. The Course of Secular Instruction, as the term is defined in the Public Instruction Act, shall be as given in Appendix B.

*Provisional Schools.*

156. The Course of Instruction, with all Regulations respecting routine, discipline, and inspection, shall apply equally to Provisional as to other schools.

*Special Religious Instruction.*

157. No pupil is to be required to receive Special Religious Instruction if the parents or guardians of such pupil object to such religious instruction being given.

*General Religious Instruction.*

158. Where any parent or guardian objects to a pupil receiving the General Religious Instruction prescribed in the Course of Instruction, notification to this effect shall be made to the teacher *in writing*.

*Denominational Books.*

159. The Teacher, in all schools, under the superintendence of the Minister, shall see that the religious books employed in the Classes for Special Religious Instruction are confined to the time and place of such instruction, and not left in the way of children whose parents may object to them.

*Methods of Teaching*

160. Every Teacher shall make himself acquainted with improved methods of teaching, and practise them in his school; and, as the efficiency of Teachers will be judged by the attainments, as well as by the moral improvement of their pupils, *results*, as well as the mode of instruction, should be kept in view.

*Teaching power to be justly distributed.*

161. Teachers shall provide for the equitable distribution of their time through all the classes, so that the instruction of no pupil be neglected.

*Persons visiting Schools.*

162. Visitors shall have access to every school maintained or aided by the Minister, during the hours of Secular Instruction—not to take part in the business or to interrupt it, but simply to observe how it is conducted.

*Duty of Teachers to Visitors.*

163. Every Teacher shall receive courteously visitors seeking to inspect his school, and afford them access to the schoolroom, and liberty to observe what books are in the hands of the children or on the desks, what tablets are on the walls, and what is the method of teaching; but teachers shall not permit any person to interrupt the business of the school by asking questions of the children, examining classes, calling for papers, or in any way diverting attention from the usual business.

*Official Visits.*

164. The restriction expressed in the preceding Rule will, of course, not interfere with the provision in Section 17 of the Public Instruction Act, whereby access is afforded to Religious Teachers for the purpose of communicating Special Religious Instruction.

*Visitors' Book.*

165. Every Teacher shall have the "Visitors' Book" lying upon his desk, in which the visitors may enter their names, and, if they think proper, any remarks. Teachers are by no means to erase or alter any remark so made.

## INSTRUCTIONS TO TEACHERS.

THE following Instructions, issued for the information and guidance of Principal Teachers of Schools and of Mistresses of Girls' and Infants' Departments, are also to be acted upon, as far as they may apply, by Teachers generally. These instructions have equal force with the preceding Regulations.

## I. INSTRUCTIONS RELATING TO PRINCIPAL TEACHERS ONLY.

The Principal Teacher will keep a Teachers' Time Book, and will see that all Teachers enter therein the time of their arrival at and departure from school.

2. He will report to the Inspector all Teachers absent from duty without leave, and any who are habitually unpunctual.

3. He will visit the other School Departments once a day at least, to ascertain that the Teachers are at their posts and are observing the Time-tables. He will see that all documents required by the Regulations are exhibited in their proper places. It is not intended that he shall arbitrarily interfere with the teaching, the discipline, or the internal management of the other Departments; nor is he at liberty to remove children therefrom to his own Department without the sanction of the Inspector; but he is empowered to decide questions relating to the general order and routine of the entire school, subject to appeal to higher authority.

4. He will, with the concurrence and aid of the Heads of Departments, arrange for the regular cleaning of the schoolrooms, will see that the water-closets and all external premises are kept clean, and that the fences and gates are uninjured by the pupils. He will report promptly any damage done to the school buildings, as also any necessity for emptying the water-closets. If the water for the use of the pupils should become bad, the Inspector should be informed to that effect; and, in dry seasons, care is to be taken to prevent any persons, other than the pupils or the Teacher's family, from obtaining water from the school tanks or wells.

5. He will receive all letters addressed to Teachers at the School, and deliver them to the owners as soon as convenient. At the same time he will impress upon Teachers that having private letters addressed to them at the school is an inconvenient arrangement, justified only by urgent circumstances. Letters intended for pupils, and non-official letters addressed to Pupil-teachers, should be forwarded to the parents of the persons concerned.

6. Persons visiting the School, or calling upon Teachers, should in the first instance be brought to the Principal Teacher.

7. He will receive and investigate complaints from parents and others. It is expected that he will attentively consider such complaints, that he will endeavour to ascertain whether they are well founded, and that he will afford the redress which their nature may require or suggest.

8. The Principal Teacher will register all children applying for admission to the School, and will determine the Department for which they are fit.

9. Under the heading in the Annual Return, "Number of Scholars on the Records," pupils who have left, but who have subsequently been re-enrolled in the same school during the year, should only be counted once. A School with two or more Departments is to furnish but *one* Annual Return, in which children transferred from one Department to another during the year are only to be counted once.

## II. INSTRUCTIONS RELATING ALIKE TO PRINCIPAL TEACHERS AND MISTRESSES OF DEPARTMENTS.

10. He will give vigilant attention to the ventilation and temperature of the rooms, and will especially avoid an excessive degree of heat. At each recess the doors and windows should be opened so as to secure an effectual change of air. Windows should be opened, where practicable, by lowering them from the top; and children must not be allowed to sit in a strong current of air.

11. He will note the methods employed and the discipline maintained by the several Teachers under his immediate supervision, and will have power to interfere whenever he may consider either to be defective.

12. He will arrange his classes, if four or more, in sections, each section to contain two or three classes; and will place in charge of each section an Assistant Teacher, who, when the staff admits, will be aided by a Pupil-teacher.

13. For all purposes of classification and examination, the actual attendance of a pupil in days shall determine his half-year in class, such half-year to consist of 110 days.

14. When a subordinate Teacher relinquishes the charge of a class or section, it should be examined by the Head of the Department in the presence of the outgoing Teacher and his successor. A record of the condition of the class or section, as elicited by such examination, should be entered in the Lesson Register, and be attested by the signatures of all the persons concerned.

15. A similar course should be followed with respect to the materials used by the class or section in charge of the outgoing Teacher.

16. He will carefully preserve in the School all completed records and duplicate returns, for the use of future Teachers.

17. Corporal punishment must not be inflicted except by the Head of the school, or Department, or—under his direction and responsibility—by an Assistant Teacher. Pupil-teachers are, under no circumstances, to be allowed to inflict corporal punishment. Careful attention must be paid to the Regulation which provides that corporal punishment "should be restricted to *extreme* cases." Failure or inability to learn is not to be regarded as an extreme case; and corporal punishment is not to be recognised as a proper aid to teaching. The boxing of pupils' ears and the tapping of children on the head are strictly forbidden, as is also the corporal punishment of female pupils twelve years of age and over; and no corporal punishment may be inflicted for neglect to prepare home lessons. *All cases* of corporal punishment are to be recorded, at the time the punishment is inflicted, in the Punishment Book supplied to all schools by the Department.

### 18. Home Lessons :—

- (a.) No home lessons or written exercises of any kind shall be given to children attending Infants' Schools or First Classes in other schools.
- (b.) Children in the Second Class shall have no written exercises of any kind; but they may be required to prepare lessons on Reading, Spelling, or Tables, provided such work take up not more than half-an-hour each evening.
- (c.) Children in the Third Class may be given home lessons four evenings in the week, the subjects being left to the discretion of the Teacher; but each night's lessons must not take more than one hour to complete.
- (d.) In the case of Fourth and Fifth Classes it is left to the discretion of the Teacher to give such home lessons as he may consider necessary.

19. Pupils shall not be detained in School for study or for punishment during any part of the forenoon recess.

20. The Teacher shall make the necessary arrangements for the proper oversight of the playground during recesses. It is competent for the head of a School or of a Department, the staff of which contains more than one Teacher, to so arrange that each half of the staff shall be relieved of playground supervision during an equal portion of the recess for dinner. Principal Teachers and Mistresses of Departments must undertake playground duty equally with the other Teachers.

21. He will construct Programmes of Lessons for classes in his Department taught by Pupil-teachers, and will decide upon the suitability of those framed by Assistant Teachers. His signature is to be attached to these documents, in evidence that they have been examined by him and have received his approval.

22. He will devote a portion of his time weekly to the instruction of each class in his Department.

23. He will examine each class in his Department at least once a month, and will record the results, note the defects, and enter suggestions for their remedy in a book kept for the purpose. Such entries should be signed by himself and the Teacher of the class.

24. He will be responsible for the progress of all children in his Department, and for the condition of the Department in all other matters, excepting those points of organization for which he cannot reasonably be held accountable.

25. He will devote at least one hour daily to the instruction of Pupil-teachers, and will see that *all* the prescribed subjects are duly studied by them. Suitable programmes are to be prepared, and a Register is to be kept showing (a) the time of commencing the daily lesson and the time at which it was concluded, (b) the exercise or home-lesson appointed for the day. It must be clearly understood that Mistresses of Departments are to perform a fair share of the work of instructing Pupil-teachers.

26. He will be responsible for posting Quarterly Returns on the last Saturday preceding the Mid-winter and Christmas vacations; and, in other cases, on the last Saturday of the months of March and September. In country places, where no post leaves on Saturday or the preceding Friday evening, the Returns must be sent, without fail, by the first subsequent opportunity.

27. In making application for increased assistance, he will give attention to the following Rules, by which the numerical strength of Teaching Staffs is regulated.

In a mixed school, or in a separate Boys' or Girls' Department, having an average attendance of—

50 pupils, the staff may consist of Teacher and Pupil-teacher.

70 pupils, the staff may consist of Teacher and Assistant.

80 to 110 pupils, the staff may consist of Teacher and 2 Pupil-teachers.

110 to 140 pupils, the staff may consist of Teacher, Assistant, and Pupil-teacher.

140 to 180 pupils, the staff may consist of Teacher, Assistant, and 2 Pupil-teachers.

180 to 220 pupils, the staff may consist of Teacher, Assistant, and 3 Pupil-teachers.

220 to 270 pupils, the staff may consist of Teacher, 2 Assistants, and 2 Pupil-teachers.

270 to 310 pupils, the staff may consist of Teacher, 2 Assistants, and 3 Pupil-teachers.

310 to 350 pupils the staff may consist of Teacher, 2 Assistants, and 4 Pupil-teachers.

350 to 400 pupils, the staff may consist of Teacher, 3 Assistants, and 4 Pupil-teachers.

400 to 450 pupils, the staff may consist of Teacher, 3 Assistants, and 5 Pupil-teachers.

450 to 500 pupils, the staff may consist of Teacher, 3 Assistants, and 6 Pupil-teachers.

In every separate Infants' Department having an average attendance of—

- 60 pupils, the staff may consist of Teacher and a Pupil-teacher.
- 100 to 120 pupils, the staff may consist of Teacher and 2 Pupil-teachers.
- 120 to 160 pupils, the staff may consist of Teacher, Assistant, and Pupil-teacher.
- 160 to 200 pupils, the staff may consist of Teacher, Assistant, and 2 Pupil-teachers.
- 200 to 240 pupils, the staff may consist of Teacher, Assistant, and 3 Pupil-teachers.
- 240 to 300 pupils, the staff may consist of Teacher, 2 Assistants, and 3 Pupil-teachers.
- 300 to 340 pupils, the staff may consist of Teacher, 2 Assistants, and 4 Pupil-teachers.
- 340 to 380 pupils, the staff may consist of Teacher, 2 Assistants, and 5 Pupil-teachers.
- 380 to 440 pupils, the staff may consist of Teacher, 3 Assistants, and 5 Pupil-teachers.
- 440 to 480 pupils, the staff may consist of Teacher, 3 Assistants, and 6 Pupil-teachers.
- 480 to 550 pupils, the staff may consist of Teacher, 3 Assistants, and 7 Pupil-teachers.

28. Principal Teachers and Mistresses of Departments, respectively, are empowered to grant leave of absence to Assistants and Pupil-teachers employed under their supervision for a period not exceeding one day, subject to the conditions stated in paragraph 3 of the Rules regulating leave of absence. It must, however, be distinctly understood that such leave of absence can only be granted in cases where the necessity for it is clearly shown. In forwarding applications for leave of absence for more than one day, the Principal Teacher or Mistress of a Department, will state thereon the arrangements proposed for the performance of the duties of those applying; will express an opinion as to whether such arrangements are satisfactory; and will state what previous leave has been granted, and on what terms, during the past twelve months. Applications for sick leave for three or more days should be accompanied by medical certificates.

29. All correspondence and returns (except those relating to fees) should be sent to the Inspector under whose immediate supervision the school is placed. Salary abstracts should be sent direct to the Accountant.

30. Teachers of all ranks are required to abstain from participation in any public meetings or other gatherings on party, political, or sectarian topics, and generally to refrain from all action in such matters calculated to give offence to any section of the community or to impair their own usefulness as teachers; they must also abstain from public controversy upon the merits of the system of education now in force, and from acting as local preachers, lay readers, or local correspondents of newspapers.

31. It is incumbent on teachers to attend to directions given them by Inspectors, and all departmental orders issued to them must be strictly observed. Should a Teacher at any time feel aggrieved, he may appeal to the Minister for redress, but such appeal must be made in a proper and respectful manner. Pending an appeal, no Teacher will be justified in disobeying orders, nor in the course of an appeal shall he knowingly make unfounded charges or improperly introduce subjects foreign to the matter of appeal.

32. No Sectarian or denominational publications of any kind whatsoever shall be used in school, nor shall any denominational or sectarian doctrines be inculcated.

33. It shall be the duty of all Teachers to impress on the minds of their pupils the principles of morality, truth, justice, and patriotism; to teach them to avoid idleness, profanity, and falsehood; to instruct them in the principles of a free Government; and to train them up to a true comprehension of the rights, duties, and dignity of citizenship.

#### APPENDIX A.

##### *Subjects of Examination for Teachers and Pupil-teachers.*

###### FOR A THIRD-CLASS CERTIFICATE.

- Reading*—Full value, 800 marks. Prose and Poetry.
- Writing and Dictation*—Full value, 1,000 marks. Specimens of Copy-setting in round hand, half-text, and small hand.
- Arithmetic*—Full value, 1,000 marks. Simple and Compound Rules, Reduction, Proportion, Practice, Simple and Compound Interest, Vulgar and Decimal Fractions.  
*Text Books*—Barnard Smith's Arithmetic, or Hamblin Smith's Arithmetic.
- Grammar*—Full value, 1,000 marks. Including Accidence, Parsing, Analysis of Sentences, Meanings and Applications of Words, Saxon and Latin Prefixes and Affixes, and Composition.  
*Text Books*—Lennie's Grammar and Laurie's Composition. For special study—the Text-book prescribed for the Junior University Examination of the current year.
- Geography*—Full value, 800 marks. Europe and Australia in detail. Mapping in connection with those Continents.  
*Text Books*—Hughes' Class Book of Geography. Geography of New South Wales (Wilkins').
- History*—Full value, 600 marks. Outlines of British History from the Conquest to the reign of Victoria inclusive; date of Accession of each Sovereign; leading Men; and most important events. General sketch of Australian History.  
*Text Books*—Nelson's Royal History of England. History of Australia.
- School Management*—Full value, 800 marks. Organization, Discipline, and Instruction of Schools—in outline.  
*Text Books*—Gladman's School Method. Public Instruction Act and Regulations.
- Domestic Economy*—(Female Teachers only)—Full value, 500 marks. Plain Needlework, Food, Clothing, Household Management.  
*Text Book*—Hassell's Domestic Economy.
- Drawing*—Full value, 500 marks. Black-board, Freehand.  
*Text Books*—As prescribed in the Standard of Proficiency.
- Vocal Music*—Full value, 500 marks. Rudiments of Music, either notation.  
*Text Books*—Curwen's Standard Course to Step IV inclusive, or Stimpson's Singing Class Book.

###### FOR A SECOND-CLASS CERTIFICATE.

- Reading*—Full value, 500 marks. Prose and Poetry.
- Writing*—Full value, 500 marks. Specimens of Copy-lines, Ornamental Writing.
- Arithmetic*—Full value, 1,000 marks. The full Course, with Elementary Mensuration.  
*Text Books*—Barnard Smith's Arithmetic. Hamblin Smith's Arithmetic. Todhunter's Mensuration (for Males), Chaps. I to XVII, omitting Chap. VI.
- Grammar*—Full value, 1,000 marks. Including Accidence, Parsing, Derivations, Meaning and uses of Words, Composition, and Analysis.  
*Text Books*—Hunter's Grammar. Meiklejohn's Book of English.
- Subject for Special Study*—Same as that prescribed for the Senior University Examination of the current year.

*Geography*—

- Geography*—Full value, 800 marks. Physical Geography.  
Europe, Australasia, and North America, in detail.  
Mapping within these limits.  
*Text Books*—W. Hughes' Class Book of Geography, and  
W. Hughes' Physical Geography, or  
Geikie's Physical Geography.
- History*—Full value, 600 marks. British History, from the Conquest to the present time.  
*Text Books*—Ransome's Short History of England.  
Australian History.
- British Literature*—Full value, 600 marks.  
Smith's Smaller History of English Literature.  
1894—Chapters I to VIII inclusive.  
1895— " IX to XIII " "  
1896— " XIV to XIX " "  
1897— " XX to XXVII " "  
and so on in cycles of four years.  
Also, Smith's Specimens of English Literature for corresponding periods each year.
- Art of Teaching*—Full value, 1,000 marks. Organization, Discipline, Method, and Instruction of Schools  
in greater detail.  
*Text Books*—Gladman's School Work.  
Public Instruction Act and Regulations.
- Sanitary Science* (Female Teachers only)—Full value, 500 marks.  
*Text Book*—Wilson's Healthy Life and Healthy Dwellings.
- Drawing*—Full value, 500 marks. Geometrical and Model Drawing.  
*Text Books*—Nesbit and Brown's Handbook of Model and Object Drawing.  
Rawle's Practical Plane Geometry.
- Vocal Music*—Full value, 500 marks. Rudiments of Music, either notation, with increased proficiency.  
*Text Books*—Curwen's Standard Course to Step VI inclusive, or  
{ Dunstan's Teacher's Manual of Music.  
{ Köhler's Elements of Music.  
{ Stainer's Rudiments of Harmony, Chaps. I to IV.

\* *Alternative Groups for Males.*

Group I.

- Euclid*—Full value, 1,000 marks. First three Books of Euclid's Elements, with Deductions.  
*Algebra*—Full value, 1,000 marks. To Quadratic Equations, including Surds.  
*Text Books*—Hamblin Smith's Algebra.  
Todhunter's Euclid.

Group II.

- Latin*—Full value, 2,000 marks. Grammar, Composition. Cæsar: De Bello Gallico, Books I to IV  
inclusive.  
*Text Books*—Dr. Smith's Smaller Latin Grammar. Arnold's Composition (Bradley) to  
Exercise 40.

Group III.

- Euclid*—700 marks. Books I and II, with deductions.  
*Algebra*—700 marks. To Quadratics, without Surds.  
*Science*—600 marks. Any one mentioned in Group IV for Females.

\* *Alternative Groups for Females.*

Group I.

- French*—Full value, 2,000 marks. Grammar, Composition. Translation from an easy author.  
*Text Books*—(For translation.) Book prescribed for Junior University of current year.  
Havet's French Class Book (complete), or  
Hallard's French Grammar.

Group II.

- Latin*—Full value, 2,000 marks. Grammar, Composition. Cæsar, De Bello Gallico, Books I, II.  
*Text Books*—As for Males.

Group III.

- Euclid*—Full value, 1,000 marks. Books I and II, with easy Deductions from them.  
*Text Books*—As for Males.  
*Algebra*—Full value, 1,000 marks. To Quadratics, omitting Surds.  
*Text Books*—As for Males.

Group IV.

Any two of the following Sciences:—

- Experimental Physics*—Full value, 1,000 marks.  
*Text Book*—Balfour Stewart's Lessons on Elementary Physics.
- Chemistry*—Full value, 1,000 marks. Inorganic.  
*Text Book*—Roscoe's Lessons in Elementary Chemistry.
- Geology*—Full value, 1,000 marks.  
*Text Book*—Geikie's Class Book of Geology.  
Wilkinson's Notes on the Geology of New South Wales.
- Botany*—Full value, 1,000 marks.  
*Text Book*—Oliver's Lessons in Elementary Botany.
- Physiology*—Full value, 1,000 marks.  
*Text Book*—Huxley's Lessons in Elementary Physiology.

FOR A FIRST-CLASS CERTIFICATE

- Reading*—Full value, 500 marks. Prose and Poetry from a standard author.  
*Writing*—Full value, 500 marks. Specimens of Copy-setting and Letter-writing, Ornamental Printing.  
*Arithmetic*—Full value, 900 marks. The whole theory and practice.  
*Text Books*—Hamblin Smith's Arithmetic.  
Colenso's Arithmetic (as revised by Hunter).  
Todhunter's Mensuration (for Males only). Chaps. 1 to 32.
- Grammar*—Full value, 900 marks. Including Accidence, Parsing, Analysis, Composition, Prosody, and  
Derivations.  
*Text Books*—Mason's English Grammar.  
Meiklejohn's English Language.

*Geography*

\* NOTE.—These groups of subjects are styled Alternative, because candidates are allowed to choose from them the  
Group in which they wish to be examined. Candidates are required to confine themselves to one group.

- Geography*—Full value, 800 marks. Physical Geography.  
Astronomical Geography. Map Drawing.  
*Text Books*—Geikie's Physical Geography.  
Lockyer's Astronomy.
- Art of Teaching*—Full value, 900 marks. Organization, Method, Discipline, with a knowledge of the Constitution of the Human Mind.  
*Text Books*—Bain's Education as a Science.  
Morell's Mental Philosophy.  
Public Instruction Act and Regulations.
- Sanitary Science*—(Female Teachers only)—Full value, 500 marks.  
*Text Book*—Wilson's Healthy Life and Healthy Dwellings.
- Drawing*—Full value, 500 marks. To complete the full D Certificate.  
*Text Book*—Dennis' Perspective.
- Vocal Music*—Full value, 500 marks. Rudiments of Music and Elements of Harmony, either notation.  
*Text Books*—Curwen's Standard Course, or same as for Class II, with Stainer's Rudiments of Harmony, Chapters 1 to 8.
- History*—Full value, 700 marks. History of England in detail. History of Australia.  
*Text Books*—Smith's Student's Hume. (Brewer.)  
Creasy on the English Constitution. Chapters 10, 11, 15, 16.  
History of Australia.
- English Literature*—Full value, 800 marks.  
Morley's English Literature.  
1894—Chapters I to V inclusive.  
1895— " VI and VII.  
1896— " VIII to X inclusive.  
1897— " XI and XII,  
and so on in cycles of four years.
- For Special Study*—Shakespeare's "Hamlet."  
Milton's "Paradise Lost." Book I.  
Addison's Essays, 12 (Clarendon edition), Nos. 3, 15, 25, 61, 105, 106, 135, 159, 165, 409, 458, 487.  
Bacon's Essays, 6. Civil and Moral. Blackie's edition.

*Alternative Groups for Males.*

Group I.

- Algebra*—Full value, 1,000 marks. Including the Binomial Theorem.  
*Text Books*—Colenso's Algebra, as revised by Hunter, or Hamblin Smith's Algebra.
- Euclid*—Full Value, 1,000 marks. Books I to VI, with Deductions  
*Text Books*—Mackay's Euclid, or Todhunter's Euclid.
- Plane Trigonometry*—Full value, 1,000 marks.  
*Text Book*—Todhunter's Trigonometry for Schools and Colleges.
- \* Group II.
- Latin*—Full value, 2,000 marks. Virgil, first two Books of *Æneid*; Livy, Book 21. Horace's Odes, Books I, II. Questions on Grammar. Composition.  
*Text Books*—Dr. Smith's Larger Latin Grammar.  
Abbott's Latin Prose through English Idiom.  
Arnold's Latin Prose Composition. (Bradley.)
- Greek*—Full Value, 1,000 marks.  
*Text Books*—Xenophon's "Memorabilia." Books I and II.  
Smith's Smaller Greek Grammar.  
Abbott's Greek Prose Composition.
- French*—Full value, 1,000 marks. Grammar, Translation, Composition.  
*Text Books*—Subjects as for Senior University Examination of the current year.  
Havet's French Grammar.  
Hallard's French Grammar.
- German*—Full value, 1,000 marks. Grammar, Translation, Composition.  
*Text Books*—Subjects as for Senior University Examination of the current year.  
Otto's German Grammar.

† Group III.

- Physics*—Full value, 750 marks.  
*Text Book*—Ganot's Physics.
- Chemistry*—Full value, 750 marks. Inorganic.  
*Text Book*—Roscoe's Class Book of Elementary Chemistry (Macmillan).
- Geology*—Full value, 750 marks.  
*Text Book*—Jukes' or Geikie's Geology.
- Botany*—Full value, 750 marks.  
*Text Book*—Oliver's Lessons in Elementary Botany.
- Physiology*—Full value, 750 marks.  
*Text Book*—Huxley's Elementary Lessons in Physiology.
- Sanitary Science*—Full value, 750 marks.  
*Text Book*—Wilson's Handbook of Hygiene.

Group IV.

- Euclid*—Full value, 1,000 marks. Books, I to VI, with Deductions.  
*Text Books*—As in Group I.
- Algebra*—Full value, 1,000 marks. Inclusive of the Binomial Theorem.  
*Text Books*—As in Group I.
- Latin*—Full value, 1,000 marks. *Cæsar, De Bello Gallico*. First two books.  
Virgil's *Æneid*. Book I.  
*Text Books*—As in Group II.

Group V.

- Euclid*—Full value, 1,000 marks. Books I to VI, with Deductions.  
*Text Books*—As in Group I.
- Algebra*—Full value, 1,000 marks. Inclusive of the Binomial Theorem.  
*Text Books*—As in Group I.
- And any two Sciences of the Science Group already specified in Group III, Full value, 1,000 marks.

*Group*

\* NOTE.—In this group at least two languages must be taken, one of them being Latin.  
† Any four of these Sciences may be taken.

## Group VI.

*Latin*—Full value, 2,000 marks. Virgil's *Æneid*. Books I, II.

Livy. Book XXI.

Horace's Odes. Books I, II.

Grammar and Composition.

*Text Books*—As in Group II.

Together with any two of the Sciences in Group III.

Full value, 1,000 marks.

*Text Books*—As in Group III.

*Alternative Groups for Females.*

## Group I.

*French*—Full value, 2,000 marks. Grammar, Translation, Composition.

*Text Books*—Subjects as for the Senior University Examination of the current year.

Havet's French Grammar.

Hallard's French Grammar.

## Group II.

*German*—Full value, 2,000 marks. Grammar, Translation, Composition.

*Text Books*—As for Males.

## Group III.

*Latin*—Full value, 2,000 marks. Grammar, Translation, Composition.

*Text Books*—As for Males.

## Group IV.

*Euclid*—Full value, 1,000 marks. Books I to IV, with Deductions.

*Text Books*—As for Males.

*Algebra*—Full value, 1,000 marks. To Quadratic Equations including Surds.

*Text Books*—As for Males.

## Group V.

Any two of the following Sciences :

*Experimental Physics*—Full value, 1000 marks.

*Chemistry*—Full value, 1,000 marks.

*Geology*—Full value, 1,000 marks.

*Botany*—Full value, 1,000 marks.

*Physiology*—Full value, 1,000 marks.

*Text Books*—As for Males of First Class.

NOTE 1. In lieu of the Alternative Subjects of examination herein prescribed for a Second-class or a First-class Certificate, the subjects of the Sydney University Arts' Course (as set forth in the By-laws and annually published in the Calendar) shall be taken up in the Training Schools by those students who have passed the University Matriculation Examination and who may desire to compete, in subsequent University examinations, for the special privilege of remaining a third year in Training and proceeding to the final examination for the Bachelor of Arts degree.

NOTE 2. Graduates of any recognised British or Colonial University of not more than five years standing may be exempted from examination in the Alternative Groups for Class I or Class II.

NOTE 3. Any Teacher who can show, to the satisfaction of the Minister, that he is unable to take Music or Drawing, may substitute for each or either of these any one of the Sciences specified in Group IV, Class II.

NOTE 4. Certificates issued to Teachers and Pupil Teachers by the Technical Education Branch in the undermentioned subjects, will exempt the holders from further examination in such subjects :—

Physics, Chemistry, Geology, Botany, Physiology.

Freehand Drawing (first year)—any grade— for applicants for employment as Pupil Teachers.

Freehand Drawing (second year)—any grade—for Teachers and Pupil Teachers.

Model Drawing (first year)—any grade ; Perspective Drawing (first year)—any grade—Section I.

Geometrical Drawing (first year)—any grade.

## SUBJECTS OF STUDY FOR PUPIL-TEACHERS.

Before Appointment—*Candidates.*

*Reading*—Full value, 100 marks. To read an advanced Class Book, sanctioned by the Minister, with ease, fluency, and expression, to spell well, and to understand the meaning of the passage read.

*Writing*—Full value, 100 marks. Specimens of penmanship, not less than two lines, in round and small hand.

*Dictation*—Full value, 100 marks. As for a Fourth Class.

*Arithmetic*—Full value, 100 marks. To know the Arithmetical Tables, and to work the rules in Vulgar Fractions, Proportion, and Practice.

*Grammar*—Full value, 100 marks. To Parse and Analyse correctly a passage taken from an ordinary Class-book ; to know the Elements of Grammar, including Prefixes, Affixes, and Common Roots.

*Geography*—Full value, 100 marks. To understand the Geographical Terms, to have a general knowledge of the Map of the World, and the Outlines of the Geography of Australia.

*Drawing*—Full value, 50 marks. Freehand Tests, as prescribed for a Third Class in the Standard of Proficiency.

*Vocal Music*—Full value, 50 marks. As prescribed for a Third Class in the Standard of Proficiency.

*Skill in Teaching*—To Teach a Junior Class in the presence of an Inspector.

*Pupil-teachers*—Class IV.

*Reading*—Full value, 100 marks. To read the Fifth Reading Book, sanctioned by the Minister, with fluency and expression, give synonymous words and phrases, and answer upon the subject matter ; to repeat from memory 50 lines of Poetry.

*Writing*—Full value, 100 marks. Specimens of copy-setting.

*Dictation*—Full value, 100 marks. Coutie's Word Expositor, to page 41.

*Arithmetic*—Full value, 100 marks. To work questions in Proportion, Vulgar and Decimal Fractions, and Practice.

*Text Book*—Barnard Smith's Arithmetic.

*Grammar*—Full value, 100 marks. Accidence, Parsing, Analysis, Derivations, and Composition.

*Text Book*—Lennie's Grammar (revised).

*Special Text Book*—Same as prescribed for Junior Examination of current year.

*Geography*—Full value, 80 marks. Cycle of Study for Pupil-teachers of all classes. Outlines of each continent, together with—

1890—Africa and South America, in detail. Physical Geography, Chaps. I to VI.

1891—Asia and North America, " " " Chaps. VII and VIII.

1892—Australia and Polynesia, " " " Chaps. IX to XI.

1893—Europe, " " " Chaps. XII to end.

and so on in cycles of four years.

NOTE.—One question at least may be given on the Geography of New South Wales in each year, and Mapping within the limits of each year's study.

*Text Books*—Wilkins' Geography of New South Wales.

W. Hughes' Class Book of Geography.

W. Hughes' Physical Geography.

*History*—

**History**—Full value, 70 marks. Pupil-teachers of all classes will be expected to have a knowledge of the order and date of Accession of each Sovereign, and of the chief events of each Reign.

Cycle of Special Study for Pupil-teachers of all classes:—

- 1890—George I to present time. Australian History from 1859 to present date.  
 1891—Commencement of Book to Stephen (1154). Australian History to 1808.  
 1892—Henry II to Elizabeth (1603). Australian History to 1851.  
 1893—James I to Anne (1714). " " 1859.

And so on in cycles of four years.

**Text Books**—Nelson's Royal History of England.  
 Australian History.

**Drawing**—Full value, 50 marks. Blackboard Practice.

**Vocal Music**—Full value, 50 marks. Stimpson's Singing Class Book, Chaps. I to VIII.

**Geometry (for Males)**—Full value, 100 marks. Euclid. Book I. Props. I to XXVI.

**Text Book**—Todhunter's Euclid.

**Algebra (for Males)**—Full value, 100 marks. Hamblin Smith's Algebra. Chaps. I to V inclusive.

**Latin (for Males)**—Full value, 100 marks. *Via Latina*, to Exercise XXV inclusive.

\***French (for Females)**—Full value, 100 marks. Macmillan's French Course, First Year.

**School Management**—Full value, 50 marks. The Kindergarten Principle. Gladman's School Method. Laurie's Kindergarten Manual.

**Needlework (for Females)**—Full value, 50 marks. 1. In Paper, cut out and tack drawers, chemise, and pinafore. 2. A Sampler, showing the various stitches in needlework as done by pupils in Classes 1, 2, and 3.

*Pupil-teachers*—Class III.

**Reading**—Full value, 100 marks. To read with improved intonation and expression.

**Writing**—Full value, 100 marks. Specimens of Penmanship; three hands.

**Dictation**—Full value, 100 marks. Coutie's Word Expositor to page 81.

**Arithmetic**—Full value, 100 marks. Compound Interest, Profit and Loss, and Square Root—as in Barnard Smith's Arithmetic.

**Grammar**—Full value, 100 marks. Accidence, Parsing, Analysis, Derivations, Composition.

**Text Books**—Lennie's Grammar (revised), and Text Book for Junior Examination of current year.

**Geography**—Full value, 80 marks. See Cycle in Class IV.

**Text Books**—As for Class IV.

**History**—Full value, 70 marks. English History. Australian History. See Cycle for Class IV.

**Text Books**—Nelson's Royal History of England.  
 History of Australia.

**Drawing**—Full value, 50 marks. Freehand Drawing.

**Vocal Music**—Full value, 50 marks. Stimpson's Singing Class Book, Chaps. IX to XII inclusive.

**Geometry**—Full value, 100 marks. Euclid. Book I. With easy deductions from Book I.

**Algebra**—Full value—100 marks. Fractions and Simple Equations, to Chap. XIV inclusive (H. Smith).

**Latin**—Full value, 100 marks. *Via Latina* to Exercise 48; Appendix II, pages 200 to 205; Appendix V, page 226.

\***French (for Females)**—Full value, 150 marks. Macmillan's French Course, Second Year. Exercises pages 77–103. Grammar, pages 1–19. Macmillan's First French Reader, pages 1–17.

**School Management**—Full value, 50 marks. Gladman's School Method. The Kindergarten. Laurie's Kindergarten Manual.

**Needlework (for Females)**. Full value, 50 marks. 1. A small shirt or dress. 2. A sampler, showing all the stitches required from pupils in Classes 4 and 5.

*Pupil-teachers*—Class II.

**Reading**—Full value, 50 marks. A standard author, with correct intonation and emphasis.

**Writing**—Full value, 50 marks. Specimens of Penmanship; three hands, with increased skill.

**Arithmetic**—Full value, 100 marks. Cube Root, Discount, Stocks, Proportional Parts—as in Barnard Smith's Arithmetic, or Hamblin Smith's Arithmetic.

**Grammar**—Full value, 100 marks. Accidence, Parsing, Analysis, Derivations, Composition.

**Text Books**—Lennie's Grammar and Special Text-book as for Junior Examination of current year.

**Geography**—Full value, 80 marks. See Cycle for Class IV.

**History**—Full value, 70 marks. English History and Australian History: see cycle for Class IV.

**Drawing**—Full value, 50 marks. Model Drawing.

**Vocal Music**—Full value, 50 marks. Stimpson's Class Book, Chaps. XIII to XV inclusive.

**Geometry**—Full value, 100 marks. Books I and II, with deductions from Book I.

**Algebra**—Full value, 100 marks. Simple Equations, to Chapter XIX inclusive (H. Smith).

**Latin**—Full value, 100 marks. *Via Latina* to Exercise 72; appendix II, pages 206–210; appendix V, page 227.

\***French (for Females)**—Full value, 150 marks. Macmillan's French Course, Second Year. Grammar, pages 1 to 38. Exercises, pages 104–140. Macmillan's First French Reader, pages 1–43.

**School Management**—Full value, 50 marks. Gladman's School Method. The Kindergarten Principle (Laurie's Kindergarten Manual).

**Needlework (for Females)**—Full value, 50 marks. 1. Cut out young child's dress in paper, and tack. 2. A patch in calico, print and flannel. 3. A sampler as for last year, but showing greater skill.

*Pupil-teachers*—Class I.

**Reading**—Full value, 50 marks. To read with ease and expression from a standard author.

**Writing**—Full value, 50 marks. Specimen of Penmanship; three hands, with increased skill.

**Arithmetic**—Full value, 100 marks. Application of Rules and Principles. Mensuration of Surfaces.

**Text Books**—Barnard Smith's Arithmetic.

Todhunter's Mensuration. Chapters 7 to 17 inclusive.

**Grammar**—Full value, 100 marks. Accidence, Parsing, Analysis, Derivations, Composition.

**Text Book**—Lennie's Grammar, and Special Text-book for Junior Examination of current year.

**Geography**—Full value, 80 marks. See Cycle in Class IV.

**History**—Full value, 70 marks. English History, and Australian History. See Cycle for Class IV.

**Drawing**—Full value, 50 marks. Advanced proficiency expected in the three sections.

**Vocal Music**—Full value, 50 marks. Stimpson's Class Book, Chap. XVI to end.

**Geometry**—Full value, 100 marks. Books I, II, and III, with deductions from Book I.

**Algebra**—Full value, 100 marks. Quadratic Equations, with Surds, to Chap. XXVI, inclusive, omitting Chapter XXII.

**Latin**—Full value, 100 marks. *Via Latina*, to exercise 93; Appendices II and V. Easy translations. Cæsar, De Bello Gallico. (Chaps. I to III).

\***French (for Females)**—Full value, 150 marks. Macmillan's French Course, Second Year. Macmillan's First French Reader, pages 1–73.

\* From female pupil-teachers in country districts the following will be accepted in lieu of French, where it can be shown that the examinee has had no means of acquiring a knowledge of the language in question:—

*Latin, or  
 Euclid and  
 Algebra.* } As for Males.

*School Management*—Full value, 50 marks. Gladman's School Method. The Kindergarten Principle (Laurie's Kindergarten Manual).

*Needlework* (for Females)—Full value, 50 marks. 1. A young child's dress, showing gathering and stroking, ornamented with various stitches as shown in former samplers; tucks to be run, frill-whipped and hem-stitched to be used as a trimming. Also cut out any garment required as in former classes. 2. A six-inch sampler done in coloured silk with threads drawn showing all the various stitches used in needlework.

NOTE 1.—The course herein prescribed is for all pupil-teachers alike. It is recommended, however, that the Sydney University Matriculation subjects (as set forth in the by-laws and annually published in the Calendar) be also studied by those pupil-teachers who may desire or intend, after admission to the Training School, to present themselves at the Matriculation examination and to compete, in subsequent University examinations, for the privilege of remaining three years in training and proceeding to the final examination for the Bachelor of Arts degree.

NOTE 2.—Any pupil-teacher who may have passed the Junior or the Senior University examination in Euclid, Algebra, Latin, or French may be exempted from further examination in such subject or subjects in Classes IV, III, and II.

NOTE 3.—Drawing must be taken by all candidates for scholarships, even though the standard has been previously satisfied.

NOTE 4.—See also Note 4, at end of Subjects of Study for Teachers.

## APPENDIX B.

### Course of Secular Instruction.

#### INFANTS' DEPARTMENT.

(Course, 2 years.)

*Reading*—Primer and Reader I—"Australian School Series."

*Writing*—On slates, from copies and dictation.

*Arithmetic*—Notation to four places, and Simple Addition on slates; easy mental operations in Addition and Subtraction, and the Multiplication Tables to "7 times."

*Object Lessons*—Familiar Objects, Domestic Animals, Common Vegetables, Common Materials.

*Form*—Lines and Angles, Three and Four-sided Figures, Curved-line and other Plain Figures.

*Colour*—Primary, Secondary, and Tertiary Colours; Combination, Shades and Tints.

*Singing*—Simple Melodies by Ear.

*Scripture*—Narratives and Moral Lessons.

*Drill*—Inspection Drill, Free Exercises, Gallery Exercises, Marking Time.

*Drawing*—On Slates, Lines, Angles, Parallels.

#### FOR PRIMARY SCHOOLS AND FOR BOYS' AND GIRLS' DEPARTMENTS.

##### First Class.

(Course, 1½ year.)

*Reading*—Primers, and Reader I—A. S. Series; or, I.N.B. Series as far as Book II, Section III, Lesson 8.

*Writing*—On slates from copy.

*Dictation*—From Lessons read.

*Arithmetic*— } As in Infants' Department.

*Singing*—

*Scripture*—Narratives and Moral Lessons; Old Testament, No. 1.

*Object Lessons*— } As in Infants' Department.

*Drawing*—

*Drill*—

*Needlework*—Hem, top-sew, make holland or calico work-apron or sachet. Name to be marked.

##### Second Class.

(Course, 1 year.)

*Reading*—Reader II, A.S. Series, or I.N.B. Series, Book II, with Sequel I.

*Writing*—On slates from copy; in copy-books.

*Dictation*—From Lessons read.

*Arithmetic*—Notation; Simple Rules; Mental Arithmetic—Simple Rules; Tables—Money.

*Object Lessons*—Domestic Animals, Common Objects, and Materials, Common Animals, and Vegetables.

*Singing*—Simple Melodies by Ear; Scale Exercises, Two and Three Pulse Measures.

*Scripture*—I.N.B., Old Testament No. 1; Moral Lessons.

*Drawing*—Freehand, on Slates; Simple Right-lined and Curved Figures.

*Drill* (for Boys)—"Infantry Drill for 1889"; Squad Drill with Intervals; Sections 1, 2, 3, 4, 5, 6, 25, 26; Marching, 12, 13, 15, 16, 17, 18, 19, 31, 32, 37, and 50; Physical Training, Sect. V, Exercises, 1, 2, 3, 4.

*Drill* (for Girls)—Dressing with Intervals; Turnings by Numbers; Free Exercises and Body Flexions (six exercises); Marching in Single Rank.

*Needlework*—Hemming, top sewing, feather stitch, satin stitch; a pinafore, pillow-slip, &c.; seams top-sewed and felled-finished with tapes.

##### Third Class.

(Course, 2 years.)

*Reading*—Readers III and IV, A. S. Series; or, I.N.B. Series, Books III and IV; Synonyms, Meanings, Derivations; Repetition of Poetry, 130 lines.

*Writing*—In copy-books.

*Dictation*—From the Reading Lessons, with correct spelling and punctuation.

*Arithmetic*—Compound Rules and Reduction; Simple and Compound Proportion. Mental Arithmetic—Prices of Dozens and Scores, Exercises in Buying and Selling Transactions, and in Proportion.

*Grammar*—All the Parts of Speech; Accidence, Parsing and Analysis of Simple Sentences; the Rules of Syntax; Composition—Letter-writing, description of places and events.

*Geography*—School Locality, Cardinal Points, Definitions, Map of World; Outlines of the Geography of Australasia and Polynesia; Physical Geography, and Towns of New South Wales and Europe; Mapping.

*Object Lessons*—Animal and Plant Life, with Special Reference to Agriculture; the Human Frame and Laws of Health; Elementary Physiology; Important Manufactures.

*History*—Nelson's Brief History of England; History of Australia; Outlines of English History.

*Singing*—Part-singing; Notation, Pitch, Accent, Length of Sound; Double, Triple, and Quadruple Measures; Time Signatures; Scale, &c.

*Drawing*—On Paper; Freehand Exercises from Models and Common Schoolroom Objects; Geometrical Figures, with Rulers and in Freehand.

*Scripture*—I.N.B., Old Testament No. 1; New Testament No. 1.

*Needlework*—Plain under-garments, stitching, herring boning, eyelet and button holes, felling, running, darning, &c.; sampler showing various stitches used in needlework.

*Drill* (for boys)—"Infantry Drill for 1889"; Physical Training, section V, Exercises 5, 6, 7; Squad drill—Sections 8, 10, 11, 20, 21, 22, and 37 to 50.

*Drill* (for girls)—File Marching; Wheeling in File; Marking Time; Changing Step; Free Exercises while Marching and Marking Time.

Fourth

## Fourth Class.

(Course, 1 year.)

- Reading*—Reader V to Lesson 56, A.S. Series; or I.N.B. Fourth Supplement, to page 155. Repetition of Poetry—100 lines.
- Writing*—In copy-books.
- Dictation*—From any portion of books read, with punctuation.
- Arithmetic*—Practice; Vulgar and Decimal Fractions; Interest; Discount, Profit and Loss; Mensuration of Surfaces; Mental Arithmetic.
- Grammar*—Accidence; Parsing and Analysis generally; framing Sentences; simple Essays.
- Geography*—Physical features and Chief Towns of Asia and America; Mapping.
- Object Lessons*—As in Third Class (advanced), with the Chemical and Physical principles involved in Agriculture; Health; Elementary Physical Science.
- History*—Nelson's History of England for Junior Classes, Henry VII to Victoria; History of Australia. Also Work of Class III.
- Singing*—As in Third Class; Sharps, Flats, Transition, Staff Notation, Key and Time; Signatures and Intervals fully; Three Part Songs; Easy Passages at Sight.
- Drawing*—Freehand Drawing, from copies of common objects, which should be enlarged or reduced from the example; Drawing Plans and Elevations of Plane Figures and Rectangular Solids, in simple positions; Drawing Geometrical Figures with Instruments; Drawing to Scale in a limited manner.
- Scripture*—I.N.B. Whole Series.
- Euclid*—Book I, to Proposition XII.
- Drill* (for boys)—"Infantry Drill for 1839"; Company Drill; Formation and Movements—Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 20, 22.
- Drill* (for girls)—Marching in line; Balance Step, with and without advancing; Body and Limb Flexions; Pole Exercises; Dumb Bells ( $\frac{1}{2}$  lb.).
- Needlework*—The Work of the Previous Standards, with advanced skill; Patching in calico, flannel, and print; cutting out garments, and setting work. Ornamental work and knitting to be introduced when standard of plain needlework prescribed for the Third Class has been completed.

## Fifth Class.

(Course, 1 year.)

- Reading*—As prescribed for University Junior Examination.
- Writing*—As in Fourth Class.
- Dictation*—On unruled paper, ordinary prose—15 consecutive lines.
- Arithmetic*—Full Course, from Hamblin Smith's Manual, or any equivalent. Mensuration—Regular Surfaces and Solids.
- Grammar*—
- Geography*—
- History*—
- Natural Science*—Physics or Physiology, or one of the Science Subjects prescribed for University Examinations; or
- Cooking*: For girls.
- Geometry*—Euclid, Books I and II, with easy exercises.
- Algebra*—Hamblin Smith's Algebra to Chapter 13.
- Latin* (for boys)—Abbott's "Via Latina," to page 53, with the first conjugation and the verb *sum*.
- French* (for girls)—Macmillan's Progressive French Course to the end, with Macmillan's "First Reader," to page 28, or an equivalent.
- Needlework*—As for Fourth Class; child's frock in washing material; cutting out and fixing work; fancy work and knitting at discretion of Work Mistress.
- Drill* (for boys)—As for Fourth Class.
- Drill* (for girls)—As for Fourth Class.
- Drawing*—Similar to Class IV, but of greater difficulty; Drawing from Common Objects and from Casts of Ornaments in Light and Shade; Plans and Elevations of Circular Solids, with sections.
- Music*—As in Third and Fourth Classes; Major and Minor Modes; Inversions, &c.
- Scripture*—As in Fourth Class.

NOTE 1.—Where there are pupils in a Fifth Class in third half-year, it is expected that Trigonometry will be introduced; also Euclid Book III; Algebra to Quadratics.

NOTE 2.—Where there are not as many as ten pupils to form a Fourth Class or a Fifth Class, as required, the Fourth Class and Fifth Class courses are to be taken as additions to the courses of the Third and Fourth Classes respectively.

THE STANDARDS OF PROFICIENCY FOR THE SEVERAL CLASSES IN SCHOOLS  
SHALL BE AS FOLLOW:—

## FOR INFANTS' SCHOOLS.

## First Half-year of Enrolment.

- Reading*—To read Primer, Part I (Australian School Series), to Lesson 20.
- Writing*—To write on Slates—i, u, n, m, v, r, w.
- Arithmetic*—To count and read up to 10; to know ball-frame exercises in Addition, and Addition of other Concrete Quantities as far as 10.
- Object Lessons*—Familiar Objects.
- Form*—The different kinds of Lines and Angles.
- Colour*—First (Primary) Colours.
- Singing*—Simple Melodies by Ear.
- Scripture*—Narratives and Moral Lessons.
- Drill*—Inspection Drill for Cleanliness; Free Exercises; Gallery Exercises.
- Drawing*—On Slates—Lines, Angles, and Parallels.

## Second Half-year of Enrolment.

- Reading*—To read Primer, Part I, to the end.
- Writing*—To Write on Slates all the Letters of the Alphabet, with easy combinations.
- Arithmetic*—To Count and Read as far as 20; Addition, in single column, to 20; to add and subtract mentally numbers not involving results higher than 20.
- Object Lessons*—Domestic Animals.
- Form*—Three and Four Sided Figures.
- Colour*—Secondary Colours.
- Singing*—Simple Melodies by Ear.
- Scripture*—Narratives and Moral Lessons.
- Drill*—As for last half-year.
- Drawing*—As for last half-year.

Third

*Third Half-year of Enrolment.*

*Reading*—Primer, Part II, to the end.  
*Writing*—To Write on Slates from Copies.  
*Dictation*—Words from Lessons Read.  
*Arithmetic*—To Read and Notate as far as 100; Addition to three places—three addends; Mental Arithmetic up to 30; tables to "4 times."  
*Object Lessons*—Common Vegetables.  
*Form*—Curved Line Figures.  
*Colour*—Tertiary Colours.  
*Singing*—Simple Melodies by Ear.  
*Scripture*—Narratives and Moral Lessons.  
*Drill*—As for last half-year.  
*Drawing*—As for last half-year.

*Fourth Half-year of Enrolment.*

*Reading*—Australian School Series—Reader I, to the end.  
*Writing*—On slates from copies.  
*Dictation*—From lessons read, 8 lines.  
*Arithmetic*—To read and notate up to 1,000; Addition, 4 places, 4 lines; mental operations in Addition and Subtraction; Multiplication Tables to "7 times."  
*Object Lessons*—Common materials.  
*Form*—Other plain figures.  
*Colour*—Combination; shades and tints.  
*Singing*—Simple melodies by ear.  
*Drawing*—Freehand Drawing on slates—lines, angles, and parallels.  
*Scripture*—Narratives and Moral Lessons.  
*Drill*—As for previous half-years, with marking time—(1) with left foot; (2) with right foot; (3) with left foot and right foot alternately.  
*Drawing*—As for previous half-year.

*Values of Subjects taught in Infants' Schools.*

|                |     |     |     |     |     |     |     |     |     |     |     |
|----------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|

| Drill          | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | 60  |

NOTE.—The enrolment of each pupil in the several classes of an Infants' School must show the time of such pupil in the school and not in the class.

## FOR PRIMARY SCHOOLS AND FOR BOYS' AND GIRLS' DEPARTMENTS.

## FIRST CLASS.

*First Half-year of Enrolment.*

*Reading*—One of the following books, or an authorized equivalent:—  
 1. Australian School Series: Primer I, to Lesson 40.  
 2. I. N. B.: Book I, to Sec. II, Lesson 12.  
*Writing*—To write on slates, from the blackboard, the following letters, with their combinations, in words of four letters—i, u, n, m, o, a, c, e, v, w, r, t, d, l, b, h, j, f, y, g, p, q.  
*Arithmetic*—To count and read any number as far as 20; to add in single columns numbers not involving a higher result than 20; to notate as far as 20; to add and subtract, mentally, numbers not involving results higher than 20.  
*Drawing*—Freehand Drawing, on slates—lines, angles, and parallels.  
*Object Lessons*—As for Infants' Schools; oral lessons on form and colour, on the properties of common objects and materials, and on common animals and vegetables.  
*Needlework*—Hem 2-inch Strips with coloured cotton.  
*Singing*—Simple melodies by ear.  
*Scripture*—Narratives (Old Testament No. 1)—Moral Lessons. (First and Second Classes may be taken together.)  
*Drill*—As for Infants' Schools, first half-year.

*Second Half-year of Enrolment.*

*Reading*—1. Australian School Series: Primer II, to the end.  
 2. I. N. B.: Book I, to the end.  
*Writing*—To write on slates from copies.  
*Dictation*—Words from lessons read.  
*Arithmetic*—To read and notate easy numbers as far as 100; to work sums in Addition—three addends; to add, mentally, numbers involving results not higher than 30; Multiplication Tables to "4 times."  
*Drawing*—As for first half-year.  
*Object Lessons*—As for first half-year.  
*Needlework*—Hem and top-sew together strips with coloured cotton, and plain hems.  
*Singing*—Simple melodies by ear.  
*Scripture*—Narratives and Moral Lessons; Old Testament, No. 1.  
*Drill*—As for Infants' Schools, first half-year.

*Third Half-year of Enrolment.*

*Reading*—1. Australian School Series: Reader I, to the end.  
 2. I. N. B.: Book II, to Section III, Lesson 8.  
*Writing*—On slates from copies.  
*Dictation*—From lessons read.  
*Arithmetic*—To read and notate numbers as far as 1,000; to work sums in Addition to 4 places, 4 lines; to perform easy mental operations in Addition and Subtraction; Multiplication Tables to "7 times."  
*Drawing*—As for first half-year.  
 \**Object Lessons*—As for first half-year.  
*Singing*—Simple melodies by ear.  
 \**Scripture*—Narratives and Moral Lessons; Old Testament, No. 1.  
*Drill*—As for Infants' Schools, fourth half-year.  
*Needlework*—Make Work-apron or Sachet with holland or calico. Name to be worked. *Values*

\* In small schools, the First and Second Classes should be combined for Object Lessons and Scripture, and should receive in each subject not less than one half-hour lesson per week; the inspection to be conducted on the lessons actually given.

*Values of Subjects taught to First Class.*

|  |     |     |     |     |     |
|--|-----|-----|-----|-----|-----|
| Reading (Reading, 60; Spelling, 20; Meanings 20)                 | ... | ... | ... | ... | 100 |
| Writing  | ... | ... | ... | ... | 60  |
| Dictation  | ... | ... | ... | ... | 60  |
| Arithmetic (Notation, 20; Slate-work, 60; Mental Operations, 20) | ... | ... | ... | ... | 100 |
| Singing  | ... | ... | ... | ... | 50  |
| Scripture  | ... | ... | ... | ... | 30  |
| Object Lessons   | ... | ... | ... | ... | 30  |
| Drawing  | ... | ... | ... | ... | 30  |
| Drill  | ... | ... | ... | ... | 60  |
| Needlework   | ... | ... | ... | ... | 60  |

## SECOND CLASS.

*First Half-year of Enrolment.*

*Reading*—One of the following books, or an authorized equivalent:—

1. Australian School Series: Reader II, to Lesson 50.
2. I.N.B.: Book II, to the end.

*Writing*—In copy books.

*Dictation*—Eight lines from lessons read.

*Arithmetic*—Notation as far as six places, three lines; Subtraction; Multiplication by two digits; Mental Arithmetic; More difficult operations in Addition and Subtraction; Multiplication Tables to "12 times."

*Singing*—Simple melodies by ear; Easy Exercises on the Modulator.

\**Scripture*—Old Testament, No. 1.

*Drawing*—Freehand Drawing on slates, of simple right-lined and curved figures.

\**Object Lessons*—Properties of common objects and materials, common animals, and vegetables.

*Drill* (for boys)—"Infantry Drill for 1889"; Squad Drill with intervals; Sections 1, 2, 3, 4, 6, 25, 26; Marching, 12, 13, 15, 16, 17, 18, 19, 31, 32, 37, and 50.

*Drill* (for girls)—Dressing with intervals; turnings by numbers; free exercises and body flexions (six exercises); marching in single rank.

*Needlework*—Hem and top-sew a 9-inch sampler of jaconet with coloured cotton, and feather-stitch all round. Initial or name in satin-stitch.

*Second Half-year of Enrolment.*

*Reading*—1. A. S. S.: Reader II, to the end.

2. I. N. B.: Sequel I, to the end.

*Writing*—In copy-books.

*Dictation*—Eight lines from lessons read.

*Arithmetic*—Notation to 9 places, 3 lines; Multiplication in full; Short Division; Mental Arithmetic Exercises in simple Rules; Tables—Money.

*Singing*—Tonic Sol-fa Notation—Scale Exercises (without accidentals); two and three pulse measures (without subdivision of pulse); simple melodies.

\**Scripture*—Old Testament, No. 1; Moral Lessons. (Moral Lessons to be given orally.)

*Drawing*—Freehand Drawing on slates, of simple right-lined and curved figures.

\**Object Lessons*—As for previous half-year.

*Needlework*—Make a plain pillow-slip, pinafore, handkerchief, or similar useful article; seams to be top-sewed and felled-finished with tapes.

*Drill*—As for previous half-year; and Physical Training, section 5; Exercises 1, 2, 3, and 4.

*Values of Subjects taught to Second Class.*

|  |     |     |     |     |     |
|--|-----|-----|-----|-----|-----|
| Reading (Reading, 60; Spelling, 20; Meanings, &c., 20) | ... | ... | ... | ... | 100 |
| Writing  | ... | ... | ... | ... | 100 |

| Needlework   | ... | ... | ... | ... | 60  |

## THIRD CLASS.

*First Half-year of Enrolment.*

*Reading*—One of the following books, or an authorized equivalent:—

1. Australian School Series: Reader III, to Lesson 20.
2. I.N.B.: Book III, to Lesson 30.

Repetition from memory of twenty lines of poetry.

*Writing*—In copy books.

*Dictation*—Eight lines from lessons read.

*Arithmetic*—Notation, Long Division, Addition, Subtraction, and Multiplication of Money; Mental Arithmetic—Easy Exercises; Tables—Weights and Measures.

*Geography*—To know the school locality and the cardinal points; and the names and positions of the Continents, Oceans, and chief divisions of land and water marked on a Map of the World.

*Grammar*—To define the noun, pronoun, adjective, and verb, and to distinguish each in easy sentences.

†*Singing*—Tonic Sol-fa Notation: scale exercises; easy time exercises; two, three, and four-pulse measures (pulse, half-pulse, hold marks, and rests); simple two part songs and rounds.

*History*—Celtic Period to Henry II; to page 21, Nelson's Brief History of England.

*Drawing*—On paper, from simple rectangular and circular models, and from common objects about the school-room; also simple geometrical figures, to be drawn with rulers and in free-hand.

*Scripture*—Old Testament, No. 1; New Testament, No. 1; Moral Lessons.

*Object Lessons*—Lessons on animals and plants, with special reference to agriculture; on the human frame, and laws of health; on elementary physiology; and on important manufactures.

‡*Drill* (for boys)—"Infantry Drill for 1889"; Physical Training as for Second Class; Squad drill—Sections 8, 10, 11, 20, 21 and 22.

*Drill* (for girls)—File marching; wheeling in file; marking time; changing step; free exercises while marching and marking time.

*Needlework*—A plain chemise, gathered at neck into a stitched band, ornamented with feather-stitching; or similar useful article which can be completed by stitches already taught.

*Second*

\* In small Schools the First and Second Classes should be combined for Object Lessons and Scripture, and should receive in each subject not less than one half-hour lesson per week, the inspection to be conducted on the lessons actually given.

† NOTE.—In Schools below the Sixth Class, the standard in singing for Second Class shall also be that for Third Class.

‡ NOTE.—In schools below the Sixth Class, the standard for drill will be that for the Second Class.

*Second Half-year of Enrolment.*

- Reading*—1. Australian School Series : Reader III, to the end.  
2. I.N.B. : Book III, to the end.  
Repetition from memory of thirty lines of poetry.
- Writing*—In copy-books.
- Dictation*—Twelve lines from the reading lessons.
- Arithmetic*—All the Compound Rules ; Mental Arithmetic.
- Grammar*—To distinguish readily all the parts of speech. Composition—To write a letter of not less than twelve lines.
- Geography*—To know the outlines of the Geography of Australia, Tasmania, and New Zealand.
- Object Lessons*—As for previous half-year.
- History*—To death of Richard III ; to page 44 of Nelson's Brief History of England.
- Singing*—Staff Notation (movable *doh* system) ; Treble Clef ; Pitch and Time ; Names ; Relative Value of Notes ; Two-part Songs and Rounds from Tonic Sol-fa Notation.
- Drawing*—As for previous half-year.
- Scripture Lessons*—Old Testament, No. 1 ; New Testament, No. 1.
- Drill* (for boys)—"Infantry Drill for 1889 ;" Physical Training, section 5 ; Exercises, 5, 6, and 7 ; Squad Drill, sections 37 to 50.
- Drill* (for girls)—As for first half-year.
- Needlework*—A linen sampler, with threads drawn, showing the various stitches used in Needlework, namely : top-sewing, stitching, herring-boning, various feather-stitching, eyelet and button-holes, small square of darning, loops ; name done in satin-stitch.

*Third Half-Year of Enrolment.*

- Reading*—1. Australian School Series : Reader IV, to the end of Lesson 30.  
2. I. N. B., Book IV, to end of Section II.  
Repetition from memory of forty lines of poetry.
- Writing*—In copy-books.
- Dictation*—Twelve lines from the Reading Lessons.
- Arithmetic*—Reduction ; Miscellaneous Exercises in Simple and Compound Rules ; Mental Arithmetic ; Easy Questions in Buying and Selling.
- Grammar*—Parsing of Simple Sentences ; Accidence, and Analysis of Simple Sentences. Composition—To write on paper a letter of not less than twelve lines.
- Geography*—New South Wales—Physical Features and Chief Towns ; Mapping.
- Object Lessons*—As for first half-year.
- History*—Nelson's Brief History of England, to page 70 ; Outlines of English History, to the Abdication of James II.
- Singing*—Staff Notation— $\frac{2}{2}$  and  $\frac{3}{4}$  times ; Time Exercises on Minim and Crochet (with corresponding rests) ; Scale Exercises on the Staff ; Two-part Songs and Rounds from Tonic Sol-fa Notation.
- Drawing*—As for first half-year.
- Scripture Lessons*—Old Testament, No. 1 ; New Testament, No. 1.
- Drill* (for boys)—Same as second half-year.
- Drill* (for girls)—As for first half-year.
- Needlework*—1. Sampler as in last half-year.  
2. A pair of drawers, tucked, finished with button-holes in band ; or similar useful article.

*Fourth Half-year of Enrolment.*

- Reading*—1. Australian School Series ; Reader IV, to the end.  
2. I. N. B., Book IV, to the end.  
Synonyms, Meanings, Derivations ; Repetition from memory of forty lines of poetry.
- Writing*—In copy books.
- Dictation*—Twelve lines from the Reading Lessons, on paper.
- Arithmetic*—Simple and Compound Proportion, with Miscellaneous Exercises in back Rules. Mental Arithmetic.
- Grammar*—Parsing and Analysis of Sentences, with a knowledge of the Rules of Syntax ; Composition.
- Geography*—Europe—Physical Features and Chief Towns of each Country ; Mapping.
- Object Lessons*—As for first half-year.
- History*—English History ; Nelson's Brief History, to the end ; Outlines of English History to the present time ; History of Australia.
- Singing*—Staff Notation,  $\frac{2}{2}$ ,  $\frac{3}{4}$ , and  $\frac{4}{4}$  Times ; Time Exercises on Minim, Crochet, and Quaver (with corresponding rests) ; Scale Exercises on the Staff, introducing *fe* and *ta* ; Two-part Songs and Rounds, from Tonic Sol-fa Notation.
- Drawing*—As for first half-year.
- Scripture Lessons*—Old Testament, No. 1 ; New Testament, No. 1.
- Needlework*—1. Running and felling seams with tucks run and gathered into band, in chemise or similar useful article ; name or initial in satin-stitch.  
2. Darning in stocking-web material.  
3. Button-holes in cloth.
- Drill* (for boys)—Same as for second half-year.
- Drill* (for girls)—As for first half-year.

*Values of Subjects taught to Third Class.*

NOTE 1.—Where there are not ten pupils to form a Fourth Class, the standard prescribed for the first half-year in the Fourth Class shall be that for the fifth half-year in the Third Class.

NOTE 2.—The work prescribed in Object Lessons, Scripture, and Drawing, is for the whole period pupils remain in the Third Class. The examination will be on the subjects taught.

NOTE 3.—When the standard of plain needlework prescribed for the Third Class has been completed, ornamental work, or knitting, or both, should be introduced,

## FOURTH CLASS.

*First Half-year of Enrolment.*

**Reading**—One of the following books, or an authorised equivalent :—

1. Australian School Series : Reader V, to end of Lesson 22.
2. I. N. B. ; Fourth Supplement, to page 63.

Repetition from memory of fifty lines of poetry.

**Writing**—In copy-books.

**Dictation**—Twelve consecutive lines from Lessons read.

**Arithmetic**—Practice ; Vulgar and Decimal Fractions ; Mental Arithmetic—the full course, as treated in any Standard Work.

**Grammar**—Parsing passages from Reading Lessons ; Accidence ; Analysis of a Compound Sentence ; Composition.

**Geography**—Asia ; Physical Features and Chief Towns of each Country ; Mapping.

**Object Lessons**—Lessons on Animal and Plant Life, and on the Chemical and Physical Principles involved in Agriculture ; more Advanced Lessons on Third-class Subjects, with Light Heat, and Air in relation to Health ; also Lessons on Elementary Physical Science.

**History**—English History : Nelson's "History for Junior Classes"—Henry VII to James II ; revision of Third-class Work ; Australian History.

**Singing**—Staff Notation only ; Key Signatures, C, F, and G ; Structure of Scale, Tetrachords, Common Marks of Expression, Abbreviations, and Symbols. Time Signatures,  $\frac{2}{4}$ ,  $\frac{3}{4}$ ,  $\frac{4}{4}$ , and  $\frac{6}{8}$  Times ; Easy Accidentals ; Time Exercises on Minim, Dotted Minim, Crotchet, and Quaver (with corresponding rests) ; Three-part Songs and Rounds ; very easy passages at sight.

**Drawing**—Freehand Drawing, from copies of Common Objects, which should be enlarged or reduced from the example ; Drawing Plans and Elevations of Plane Figures and Rectangular Solids, in simple positions ; Drawing Geometrical Figures with Instruments ; Drawing to Scale in a limited manner.

**Scripture Lessons**—The whole series (Fourth Class and Fifth Class may be taken together).

**Euclid**—Definitions of, Book I.

**Drill** (for boys)—"Infantry Drill for 1889" ; Company Drill ; Formation and Movements—Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 20, 22.

**Drill** (for girls)—Marching in Line ; Balance Step, with and without advancing ; Body and Limb Flexions ; Pole Exercises ; Dumb Bells ( $\frac{1}{2}$  lb.)

**Needlework**—1. Sampler with greater skill than before.

2. A petticoat with tucks run, gathered and stroked into band ; or similar useful article.
3. Darning and button-holes, as in last half-year.

*Second Half-year of Enrolment.*

**Reading**—1. Australian School Series : Reader V, to end of Lesson 56.

2. I. N. B., 4th Supplement, to page 155.

Repetition from memory of fifty lines of poetry.

**Writing**—As for last half-year.

**Dictation**—Selected passages of twelve consecutive lines from books read.

**Arithmetic**—Interest ; Discount ; Profit and Loss ; Mensuration of Surfaces.

**Grammar**—Accidence ; Parsing and Analysis generally ; Simple Essays.

**Geography**—America ; Physical Features, and Chief Towns of each Country.

**Object Lessons**—As for first half-year.

**History**—English History (Nelson's "History for Junior Classes")—William III to present time ; History of Australia.

**Singing**—Staff Notation only ; Key Signatures, B $\flat$ , D, E $\flat$ , A ; Time Signatures fully ; Time Exercises as in last half-year, with Dotted Notes, Ledger Lines, Accidentals, Definitions of most common Musical Terms ; Three-part Songs and Rounds ; Easy Passages at Sight.

**Drawing**—As for first half-year.

**Scripture Lessons**—The whole series.

**Euclid**—Book I, to Proposition 12.

**Drill** (for boys)—As for first half-year.

**Drill** (for girls)—As for first half-year.

**Needlework**—1. A plain night-shirt, showing top sewing, stitching, button-holes, and gathers, and finished with gussets ; or a night-dress tucked and trimmed, or any similar article.

2. Patching in calico and flannel.

3. This class will be expected to set their own sewing, with the advice of the Work-mistress ; and pupils over 14 years of age should be able to cut out and fit garments specified in Third Class.

*Values of Subjects taught to Fourth Class.*

|  | Marks. |
|--|--------|

| Natural Science ... ..  | 70     |
| Geometry (Euclid, 70; Exercises, 30) ... ..   | 100    |
| Algebra ... ..  | 100    |
| Latin ... ..  | 100    |
| French ... ..   | 100    |
| Drawing ... ..  | 60     |
| Music (Singing, 30; Theory, 30) ... ..  | 60     |
| Scripture ... ..  | 60     |
| Drill ... ..  | 60     |
| Needlework ... ..   | 60     |

NOTE 1.—Where there are pupils in a Fifth Class in third half-year, it is expected that Trigonometry will be introduced; and provided the pupils are able to work as far as page 104 of Todhunter's "Trigonometry for Beginners," full marks (100) will be awarded. (Euclid in the third half-year, Book III; Algebra to Quadratics.)

NOTE 2.—*Music*—In separate boys' and girls' departments the sexes may be combined for singing lessons at the discretion of the teachers; but the teachers of the respective departments will be held responsible for instruction in the *theory* of music.

NOTE 3.—*Drill*—In all schools under one teacher, the standard for the second-class shall be the highest required for any class. Subject to this provision, rifle drill should be taught to third and higher classes whenever not fewer than ten pupils can be assembled.

NOTE 4.—*Writing*—All writing will be rejected as a failure if there is no attempt made to imitate the copies set.

NOTE 5.—*Arithmetic*—Pupils of girls' schools will not be expected to work Discount, Stocks, or Cube Root.

## APPENDIX XXIII.

RECEIPTS AND DISBURSEMENTS of the Department of Public Instruction, from 1st January to 31st December, 1893.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

EDUCATION.

(CIRCULARS RESPECTING EXCLUSION FROM ATTENDANCE AT SCHOOL OF CHILDREN UNDER SIX YEARS OF AGE.)

*Ordered by the Legislative Assembly to be printed, 28 February, 1894.*

[Laid upon the Table of this House in answer to Question No. 14, of 28 February, 1894.]

Question.

- (14.) ISSUE OF CIRCULAR RESPECTING SCHOOL CHILDREN:—*Mr. Alfred Allen* (for *MR. CARRUTHERS*) asked THE MINISTER OF PUBLIC INSTRUCTION,—
- (1.) Has a circular been issued to school teachers in reference to excluding from school children under the age of six years?
  - (2.) To what schools has such circular been sent?
  - (3.) Has he any objection to lay a copy of such circular upon the Table of this House?
  - (4.) What has been done by him in regard to charging an extra fee to children over fourteen years of age attending public schools?

Answer.

MEMORANDUM TO INSPECTORS.

MY memo. of 19th ultimo, forwarding for your information copy of a circular dated 10th ultimo, addressed to teachers, respecting exclusion from attendance at school of children under six years of age.

WITH reference to the circular memorandum addressed to teachers on 10th ultimo, I have to state for your information that the instruction contained therein will not apply to pupils under six years of age who have previously been in attendance at a school under this Department, and who, owing to their parents' removal to other localities, may desire to continue in attendance at such other schools, nor to pupils under the prescribed age who may have been enrolled by teachers before they received the circular in question.

Department of Public Instruction, Sydney, 12th February, 1894.

J. C. MAYNARD,  
Chief Inspector.

Department of Public Instruction, Sydney, 10 January, 1894.

Memorandum to Teacher.

Children under Six Years of Age.

THE Minister has directed that, unless specially authorised by himself, no child under six (6) years of age, who has not been already in attendance at your school, shall be admitted by you as a pupil.

J. GIBSON,  
for Under Secretary.

1894.

## LEGISLATIVE ASSEMBLY.

## NEW SOUTH WALES.

## EDUCATION.

(RETURN RESPECTING THE PUBLIC SCHOOL CADET FORCE.)

*Ordered by the Legislative Assembly to be printed, 28 March, 1894.**[Laid upon the Table of this House in answer to Question No. 5, of 28 March, 1894.]*

## Question.

- (5.) LIEUTENANT-COLONEL PAUL—MAJOR DETTMAN:—MR. FULLER (for MR. MARKS) *asked* THE MINISTER FOR PUBLIC INSTRUCTION,—
- (1.) For what reason was Lieutenant-Colonel Paul removed from the command of the Public School Cadet Force?
  - (2.) What position does he now hold; what duties does he now perform; and what salary does he now receive?
  - (3.) Was the present Officer-Commanding, Major Dettman, Organising Officer and Senior Major during Lieutenant-Colonel Paul's command; if so, what were his duties, and what salary does he receive?
  - (4.) As under regulations 26 and 35 of the Public School Cadet Force, allowances are made to commissioned officers, provided their corps have been classed as efficient for the previous year, will he state what officers have received allowances, give their ranks, and the amount received by each, when and where the corps were inspected, and by whom?
  - (5.) In what positions in the Public Service has Major Dettman been employed, and for what length of time in each before his appointment to the cadet department under Lieutenant-Colonel Paul?

## Answer.

(1.) Lieutenant-Colonel Paul was removed from the command of the Public School Cadet Force in order to effect retrenchment in that branch. This was fully explained by the Minister when the Estimates for last year were before the House.

(2.) He now holds the position of Second Officer on the Staff of the Cadet Force. His duties are to visit fortnightly for instruction purposes the corps of the 1st, 3rd, 4th, and 5th battalions of school cadets; to assist at, or take charge of, battalion parades; to inspect Cadet Corps as required; and to attend to special duties. He receives £350 per annum.

(3.) Mr. Dettman was appointed Second Officer on the Cadet Staff under Lieutenant-Colonel Paul, whom he was required to assist generally in the organisation of the Public School Cadet Force. His present salary is £515 per annum.

(4.) A list of the officers who have received their allowances for last year is appended. The reduction of the Staff early last year, and the consequent changes in the cadet arrangements, rendered it impossible to make individual inspection of Cadet Corps. The claims of officers to their allowances were determined by the circumstances of corps as ascertained from returns (ordinary and special), and by seeing many of the corps at the monthly battalion parades, for which printed quarterly programmes were issued.

(5.) Prior to his appointment to the Cadet Force, Mr. Dettman held the undermentioned positions:—

Pupil Teacher from June, 1868, to December, 1872.

Student at Fort-street Training School from January to June, 1873.

Assistant Teacher from July, 1873, to March, 1874.

Head Master of Bathurst Superior Public School from April, 1874, to September, 1886. (For the last fifteen months of this period he was Superintendent of the Bathurst High Schools.)

Vice-Principal and Master of Method, Fort-street Training School, from October, 1886, to June, 1887.

Head Master, Fort-street Model School, from July, 1887, to September, 1889.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

**PUBLIC WORKS ACT OF 1888.**  
(RESUMPTION OF LAND FOR PUBLIC SCHOOL PURPOSES AT BONVILLE.)

*Ordered by the Legislative Assembly to be printed, 7 June, 1894.*

BONVILLE.

[*Gazette, 22nd May, 1894.*]

**NOTIFICATION OF RESUMPTION OF LAND UNDER  
THE "PUBLIC WORKS ACT OF 1888."**

NEW SOUTH WALES, } Proclamation by His Excellency The  
to wit. } Right Honourable Sir ROBERT WILLIAM  
DUFF, a Member of Her Majesty's Most  
Honourable Privy Council, a Knight  
(L.S.) } Grand Cross of the Most Distinguished  
Order of Saint Michael and Saint George,  
R. W. DUFF, Governor and Commander-in-Chief  
Governor. } of the Colony of New South Wales and its  
Dependencies.

WHEREAS I, Sir ROBERT WILLIAM DUFF, the Governor aforesaid, with the advice of the Executive Council have directed that a certain public work, the estimated cost of which does not exceed twenty thousand pounds, that is to say, the erection of a Public School at Bonville, for which work public funds are lawfully available, shall be carried out under the provisions of the "Public Works Act of 1888" as an authorised work by the Minister of Public Instruction as Constructing Authority, and that the land described in the Schedule hereto, which is in my opinion required for carrying out the said work, shall be acquired by taking the same under the "Lands for Public Purposes Acquisition Act," as adopted by the "Public Works Act of 1888": Now, therefore, I, the said Governor, with the advice aforesaid, in pursuance of the "Public Works Act of 1888," do declare by this notification, to be published in the Government Gazette and in one or more newspapers published or circulating in the Police District wherein the said land is situated, that the Crown Land comprised within the description and boundaries set forth in the Schedule hereto has been appropriated, and the private property within such boundaries and comprised in such description has been resumed, for the public purpose aforesaid, to the intent that upon the publication of this notification in the Gazette, the said land described in the said Schedule hereto shall forthwith be vested in the said Constructing Authority as a corporation sole on

behalf of Her Majesty, for the purposes of the "Public Instruction Act of 1880," for an estate in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the further intent that the legal estate therein, together with all powers incident thereto as conferred by the said Acts or either of them, shall be vested in such Constructing Authority as a Trustee; and I declare that the following is the Schedule of land hereinbefore referred to:—

**SCHEDULE.**

All that piece or parcel of land situated at Bonville, parish of Bonville, county of Raleigh, forming part of R. Goulding's additional conditional purchase portion 46, and containing an area of 2 acres: Commencing at the south-eastern corner of R. Goulding's additional conditional purchase of 100 acres, portion No. 46; and bounded thence on the south by part of the southern boundary of that portion bearing west 9 chains 25 links; thence on the west by a line bearing north 3 chains 60 links to the southern side of a road 1 chain wide reserved through that portion; thence on the north by parts of that side of that road bearing south 76 degrees 24 minutes east 90 links, south 65 degrees 58 minutes east 5 chains 79 links, and north 43 degrees 27 minutes east 2 chains 50 links to the western side of the Main Coast Road from Kempsey to Coff's Harbour; and thence on the north-east by part of that side of that road bearing south 25 degrees 33 minutes east 3 chains 16 links, to the point of commencement.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this sixteenth day of May, in the year of our Lord one thousand eight hundred and ninety-four, and in the fifty-seventh year of Her Majesty's Reign.

By His Excellency's Command,

F. B. SUTTOR.

GOD SAVE THE QUEEN!

1894.

## NEW SOUTH WALES.

## UNIVERSITY OF SYDNEY.

(REPORT FOR 1893.)

Presented to Parliament pursuant to Act 14 Vic. No. 31, sec. 22.

*REPORT of the University of Sydney for the year ended 31st December, 1893.*

1. The Senate of the University of Sydney, in pursuance of the provisions of section 22 of the Act of Incorporation, 14 Victoria No. 31, has the honor to transmit the account of its proceedings during the year 1893, for the information of His Excellency the Governor and the Executive Council.

*Matriculation.*

2. At the ordinary matriculation examination in March, 208 candidates presented themselves and 131 passed successfully. In addition 99 passed the junior examination in September in the subjects prescribed for the matriculation examination. Ten candidates out of 28 passed the March entrance examination for the Faculties of Medicine and Science and the Department of Engineering, and 37 qualified themselves similarly by passing the senior examination in the required subjects. Thus the total number who qualified themselves for admission to the University was 277, of whom 47 passed in the higher standard required for medicine, science, and engineering.

*Annual Examinations.*

3. The numbers of students who attended and passed the annual examination in December, 1892, and March, 1893, are as follows:—

|                         |     |     | Faculty of Arts. |         |
|-------------------------|-----|-----|------------------|---------|
|                         |     |     | Candidates.      | Passed. |
| First year examination  | ... | ... | 126              | 88      |
| Second year examination | ... | ... | 90               | 67      |
| Third year examination  | ... | ... | 94               | 83      |

50 evening students, in addition to those included in the above as having passed in the whole of their respective examinations, were successful in individual subjects.

|                          |     |     | Faculty of Law. |         |
|--------------------------|-----|-----|-----------------|---------|
|                          |     |     | Candidates.     | Passed. |
| Intermediate examination | ... | ... | 20              | 12      |
| Final examination...     | ... | ... | 7               | 6       |

|                         |     |     | Faculty of Medicine. |    |
|-------------------------|-----|-----|----------------------|----|
| First year examination  | ... | ... | 31                   | 22 |
| Second year examination | ... | ... | 14                   | 14 |
| Third year examination  | ... | ... | 8                    | 6  |
| Fourth year examination | ... | ... | 23                   | 14 |
| Fifth year examination  | ... | ... | 12                   | 10 |

|   |     |     | Faculty of Science. |   |
|---|-----|-----|---------------------|---|
| First year examination  | ... | ... | 1                   | 1 |
| Second and third year examination                             | ... | ... | 9                   | 7 |
| (In addition two students taking up irregular course passed.) |     |     |                     |   |

|                         |     |     | Department of Engineering. |    |
|-------------------------|-----|-----|----------------------------|----|
| First year examination  | ... | ... | 8                          | 8* |
| Second year examination | ... | ... | 6                          | 5  |
| Third year examination  | ... | ... | 4                          | 2  |

\* One of whom was unmatriculated.

*Attendance at Lectures.*

4. The following are the numbers of matriculated students attending lectures in the various faculties during the year:—Faculty of Arts, 367, including 128 evening students; Faculty of Law, 41; Faculty of Medicine, 101; Faculty of Science, 8; Department of Engineering, 22; total, 539. In addition to the above the day lectures were attended by 10, and the evening lectures by 37, non-matriculated students. The total number attending the University classes was thus, 586. The number of women students included in the above are the following:—Faculty of Arts, 101; Faculty of Medicine, 5; Faculty of Science, 2.

*Degrees.*

5. The following degrees were conferred after examination :—

Master of Arts (M.A.) :—Frank Nunan Brierley, B.A. ; John George Cribb, B.A.

Bachelor of Arts (B.A.) :—Henry Palmer Abbott, Eliza L. Abigail, George Webb Anstey, William Leonard Atkins, Joanna Barton, George Alfred Blumer, Francis Stewart Boyce, Spencer Joseph St. Clair Butler, Charles Robert Campbell, Alfred Ernest Chapman, Alexander Donald Craig, Wyndham John Edward Davies, Margaret Cecilia Dimond, William Norton Dove, Phillip William Dowe, Shafto Landour Drummond, Walter John Enright, Thomas John Augustine Fitzpatrick, Michael Scott Fletcher, John George, Alfred Chalmers Gill, Alfred Edward Hadley, Alfred Ernest Hall, Ida Halloran, Caleb Hardy, Matthew Harris, George Cockburn Henderson, Percy Reginald Higgins, John Barton Holmes, Francis Irvine Hopkins, James Jacobs, Arthur Henry James, George Alfred James, George Wellington Jamieson, Martin Luther Johnson, Frederic Kellett, Harold Leslie Kelynack, Frank Louis Kendall, Annie Augusta Kennedy, John Edward Layton, Ellen Melicent Lenthall, Daniel Levy, Henry Clyde Lewis, Thomas Francis Maher, Thomas Butler M'Nevin, John M'Pherson, Andrew William Maloney, Florence Marks, Leah Marks, Louis Ormsby Martin, Hercules Meares, Percy Harcourt Mills, Eliza Molster, Bennington Haille Paine, Lizzie Proctor, Herbert John Renwick, Charles Noel Derwent Richardson, Ernest Arthur Riley, Charles H. P. Robinson, Ernest John Rourke, George Augustus Rourke, Ethel Albinia Russell, Gerald Ryan, Arthur Saunders, Edric Sydney Scarvell, Alfred John Shewcroft, Charles Wansbrough Sloman, Emma Isabel Smith, William Smith, Hilton Bell Squire, Edmund Clement Swanson, Daisy Symonds, Sarah Taylor, James Barnet Telfer, Richard Weld Thomas, Thomas W. King Waldron, Gabriel Wardrop, Andrew Robert James Watt, Charles Prosper Watt, Amy Isabelle Wearne, Frederick James Wilson, William Archibald Windeyer, Harrie Dalrymple Wood, Clive Tennyson Lionel Yarrington

Bachelor of Law (LL.B.) :—George Harris, Frederick Lloyd, John Michael Taylor, Allen Hammill Uther, Louis Stanislaus Veech, Percival Richard Waddy.

Bachelor of Medicine (M.B.) :—Edward Harold Binney, Paul Bölke, Iza Frances Josephine Coghlan, Terence Albert Green, John Niven Henderson, William Frederick Litchfield, Samuel J. Richards, Grace Fairley Robinson, Grafton Elliott Smith, Edward Henry Scott, Geoffrey Bruton Sweet, Arthur Styles Vallack.

Master of Surgery (Ch. M.) :—Edward Harold Binney, Paul Bölke, Iza Frances Josephine Coghlan, John Niven Henderson, Grace Fairley Robinson, Edward Henry Scott, Grafton Elliott Smith, Geoffrey Bruton Sweet, Arthur Styles Vallack.

Bachelor of Science (B. Sc.) :—James Froude Flashman, James Forde, George Reginald Percy Hall, Michael O'Gorman Hughes, Graham Ford Rutter.

Bachelor of Engineering (B.E.) :—Percy Reginald Hayley, William Henry Ledger.

6. The following Graduates of other Universities wereadmitted *ad eundem gradum*, in accordance with the provisions of the " *Ad Eundem Degrees Act*," 44 Victoria No. 22 :—

Master of Arts (M.A.) :—Henry Deane, M.A.

Bachelor of Arts (B.A.) :—Joseph Carlos, B.A.

7. The total number of degrees conferred during the year was thus 120, divided as follows :—M.A., 3 ; B.A., 84 ; LL.B., 6 ; M.B., 12 ; Ch. M., 8 ; B. Sc., 5 ; B.E., 2.

8. The following are the numbers of degrees conferred in the various departments of the University from its foundation up to the end of the year 1893 :—M.A., 242 ; B.A., 641 ; LL.D., 23 ; LL.B., 34 ; M.D., 33 ; M.B., 71 ; Ch. M., 47 ; B.Sc., 15 ; M.E., 1 ; B.E., 19. Total, 1,126.

9. The following are the honors conferred at Degree Examinations :—

*Faculty of Arts—Honors at the B.A. Examination.*

Latin—Class I :—D. Levy (gold medal), W. L. Atkins, Annie A. Kennedy. Class II :—G. W. Anstey, F. L. Kendall.

Greek—Class I :—D. Levy, A. C. Gill.

History—Class I :—F. S. Boyce, G. C. Henderson, Amy I. Wearne, *æq.*, H. P. Abbott, F. L. Kendall, A. E. Chapman. Class II :—F. Kellett, H. C. Lewis, *æq.*, J. B. Telfer, Daisy Symonds. Class III :—J. E. Layton, W. N. Dove.

Geology and Palæontology—Class I :—J. Macpherson. Class II :—W. J. Enright, Daisy Symonds.

Logic and Mental Philosophy—Class I :—G. C. Henderson (gold medal), Annie A. Kennedy and W. L. Atkins, *æq.*, *prox. acc.* Class II :—F. L. Kendall, Lizzie Proctor. Class III :—A. E. Chapman, L. O. Martin, P. W. Dowe.
